EVERYBODY’S SAYING THE SAME THING ABOUT ROSIE O’DONNELL’S FIRST SEASON...
Hundt maps out FCC agenda for 1997  FCC Chairman Reed Hundt detailed his plans for 1997, setting goals for addressing and resolving a series of issues facing both industries. His agenda includes the FCC's review of broadcast ownership rules, digital TV rules, cable inside wiring regulations, satellite-delivered digital radio, universal service and political advertising. /4

Digital TV standard adopted by FCC  The FCC adopted the compromise agreement reached last month by broadcast, computer and consumer electronic industry negotiators. That deal called for adoption of the "Grand Alliance" standard minus the controversial picture formats that had divided the industries. /4

ABC takes double hit in court  In separate cases, ABC news magazines were hit with a $10 million libel judgment and finding that network employees committed fraud, trespass and breach of fiduciary duty in connection with an undercover report exposing alleged wrongdoing at Food Lion supermarkets. /10

FCC OKs Westinghouse-Infinity  The FCC has approved the $4.9 billion sale of Infinity Broadcasting Corp. to Westinghouse Electric Corp., creating the nation's largest radio group. With Justice Department approval secured in November, the door is now open for closure of the 43-radio-station deal. /12

Networks take aim at Nielsen  The Big Four sponsored a joint print advertising campaign in major media and advertising trade publications the week of Dec. 16 slamming Nielsen Media Research. /17

Matt Lauer was named co-anchor of NBC News's 'Today' last week, replacing the departing Bryant Gumbel. /17

'News of the Weird' comes to TV  Nashville-based High Five Entertainment is betting that Chuck Shepherd's offbeat syndicated newspaper column, "News of the Weird" can be transformed into a successful weekly reality series. /18

How to win 'Friends': The cast of NBC's 'Friends' finally got what it asked for from Warner Brothers TV in the way of a reported $45,000-plus boost to their current $30,000-$35,000 per-episode salary. /18

Cable-rate rises in decline  Cable television rates rose an average of about 7.8% through November and will likely close out 1996 with a similar increase. Some predict a leveling-off beyond that. /28

Disney plans children's educational network for daytime  Disney will jump into the lucrative daytime kids market with a children's educational network by early 1998, competing for the same ad dollars now being spent on Viacom-owned Nickelodeon. /26

PC Meter finds household 'Net use doubling  Use of the Internet has spread to more than twice the percentage of U.S. households of a year ago and America Online continues to be the most popular single access point. /49

C/Net, Intel plan New Year's cyber-bash  C/Net and Intel Corp. will open their online event Mediadome venue with a New Year's Eve Webcast of a San Francisco concert featuring Chris Isaak, Lyle Lovett and Los Lobos. /50

FSN chooses Comprompter software  FSN, Time Warner's interactive television service in Orlando, Fla., has purchased roughly $200,000 worth of Comprompter automation software to support its new Orlando operation. /51

Limited channel space makes launching tougher  Prospects for launching new networks next year appear to be tougher than ever, say cable industry observers. The days of launching small independent cable networks without major MSO affiliation may be numbered. Cover art by Nicolas Via/SIS /36

Telemedia Week

Hundt maps out ‘Hard Road’
Outlines FCC agenda for 1997, including political advertising, broadcast ownership

By Chris McConnell
WASHINGTON

The FCC will keep broadcast and cable lobbyists busy in 1997 if FCC Chairman Reed Hundt is able to keep to the agenda he outlined last week.

“During the next year this commission will take numerous actions designed to move us toward that competitive marketplace in communications and that general enjoyment of public benefits from communications,” Hundt said.

Among the public benefits Hundt envisions is improved access to the public by political candidates. He said the FCC will provide Congress with views on ways to improve the access of candidates to TV and suggested asking broadcasters to set aside ad time for candidates as part of the industry’s public interest obligations.

Hundt cited a New York Times report that political spots accounted for 1.3% of the total number of TV commercials broadcast in major markets between April and October.

“We can assume that some 1.5 to 2 percent of total advertising time represents an approximation of the appropriate amount of time taken up by political advertising in a presidential election cycle,” Hundt said. “Broadcasters could be asked to make available not more than that time to candidates for use for political spots.”

Hundt previously had suggested requiring broadcasters to set aside 5% of their digital television capacity for public interest programming. Last week he suggested that the commission and lawmakers examine political airtime proposals aimed at today’s analog TV.

One idea Hundt cited was using free-airtime pledges to solve another longstanding FCC problem: competing applications for new TV and radio stations. A 1993 court ruling struck down the commission’s criteria for choosing a license winner from competing applications, and the FCC has not implemented a new system since.

Hundt suggested that the commission might simply award the analog licenses to the applicants pledging free airtime, children’s educational programming and other public interest programming.

“If spectrum is to be given away at no charge, this option at least provides the public with assurance that its property is going to those [who] would return the most in terms of public interest programming,” he said.

While discussing the political airtime plans, Hundt also set a series of goals for wrapping up pending proceedings. Among the targeted issues:

Broadcast ownership rules. The FCC last fall launched a review of

DTV standard: It’s official

FCC commissioners last week adopted the digital TV compromise reached last month by broadcast, computer and consumer electronic industry negotiators. That deal called for adoption of the Grand Alliance standard minus the controversial picture formats that had divided the industries.

Negotiators for the industries reached the compromise in response to a Nov. 25 deadline set earlier in the fall by FCC Commissioner Susan Ness.

Broadcasters delivering digital TV now will be required to use the remaining elements of the Grand Alliance standard, which includes specifications for compressing video, delivering sound and sending the signals over the airwaves.

“We’ve killed the idea that DTV broadcasts only to DTV receivers,” FCC Chairman Reed Hundt said of the compromise agreement.

The FCC action leaves two more rulemakings to wrap up before broadcasters can begin sending the digital signals to sets. One—launched in 1995—concerns the rules under which broadcasters will operate in the digital age.

In that proceeding, commissioners need to settle a series of issues, including how long stations will be able to hold on to their analog channel and whether broadcasters will be required to deliver any high-definition programming.

FCC officials must also wrap up a rulemaking aimed at assigning each station a channel for delivering the digital signals. In August, the FCC released a proposal for assigning the channels.

Hundt has said that the commission plans to complete both rulemakings by April.
CONGRATULATIONS TO JENNY JONES ON WINNING THE PRESTIGIOUS 1996 NANCY SUSAN REYNOLDS AWARD.

For the moving episode “AIDS IN AMERICA.” The award is given by Advocates For Youth, honoring outstanding portrayals in the entertainment media.
ownershing and attribution rules. Hundt said the commission should complete the rulemakings by June.

- Antenna restrictions. Commissioners are considering whether apartment buildings should be subject to a rule barring local restrictions that impair a viewer’s ability to install receiving gear for TV, DBS or wireless cable. Hundt pledged an answer in the first quarter.
- Inside wiring. The FCC is reviewing the cable “demarcation” point, currently defined as 12 inches outside a subscriber’s unit. Hundt said the FCC will resolve the issue early in ’97.
- Local Multipoint Distribution Service (LMDS) spectrum. Commissioners are deciding whether to allow local cable and phone companies to bid for LMDS spectrum within their own regions. Hundt promised allocation and service rules within the next several weeks and said the FCC will auction the spectrum early next year.
- Digital audio radio satellite (DARS) service. FCC officials are writing service rules for the satellite-delivered radio service. Hundt said an auction of DARS spectrum should begin in April.
- Universal service. A Federal-State Joint Board in November adopted a series of recommendations aimed at promoting the universal availability of telecommunications service. Hundt said he has asked FCC staff to prepare final rules by the commission’s April meeting.

Quello out by June
Kennard leads race to replace FCC commissioner

By Harry A. Jessell

WASHINGTON

FCC Chairman Reed Hundt may have fewer worries as he tries to move his considerable agenda next year.

By late spring, Hundt’s chief nemesis on the commission, Jim Quello, should be gone, replaced by another Democrat more to Hundt’s liking.

Told two weeks ago that the President wants his seat for another, Quello agreed to go quietly, but asked to stay until June 1. “It’s time to get the hell out of here,” says Quello, who will celebrate his 83rd birthday and 23rd anniversary as a commissioner in April.

Quello says that he doesn’t know whether the White House will honor his request to remain until June 1. But even if the White House nominates a successor in late January or early February, it could easily take until then to win Senate confirmation.

The front-runner for Quello’s slot is Bill Kennard, the FCC’s 39-year-old general counsel. Also said to be angling for the post is Russell Frisby, chairman of the Maryland Public Service Commission.

Whoever the replacement, his or her name is expected to be sent to Capitol Hill for Senate confirmation along with that of Gina Keeney, a former Hill aide, now chief of the FCC Common Carrier Bureau.

President Clinton first nominated Keeney last August to fill the vacancy created by the departure last April of Republican Andrew Barrett. But the nomination sat nowhere on Capitol Hill. Not only was the name sent up late in the legislative session, but it was done apparently without notifying key senators in advance.

Keeney also is burdened by being the principal author of the FCC’s controversial interconnection rules, which regulate what local telephone companies may charge cable and other competitors desiring to hook up to the telcos’ networks. The local telcos’ antipathy toward the rules could be focused on the Keeney nomination.

First appointed in April 1994, Quello has served under six Presidents and six FCC chairmen. Quello’s last five-year term expired in June, but he is allowed to continue until the end of this year or until a replacement is appointed.

Quello, who enjoys the political game as much as any man in Washington, would have liked to be reappointed so he could serve another year or so. And he probably has enough friends in industry and on Capitol Hill to insure speedy Senate confirmation.

But government and industry sources say there was little chance President Clinton—acting on the advice of his top telecommunications policy adviser, Vice President Gore, and Gore’s friend, Chairman Hundt—would nominate Quello.

Hundt wants Quello out. He and Quello have been at odds over a series of important issues and have developed a strong dislike for each other. The animosity rose highest earlier this year in the fight over children’s educational programming, which Quello eventually lost.

Although not assured of the nomination, Kennard may be hard to beat. He has Hundt’s endorsement, the trust of regulated industries and relevant experience.

Before joining the commission in 1993, Kennard was a well-regarded communications lawyer at the firm of Verner Liipfert Bernhard McPherson & Hand. The Yale Law graduate also spent a year at the NAB.

A radio broadcaster in his first career, Quello has been an unabashed and enthusiastic supporter of “free over-the-air television.” And he also has generally promoted cable, except where its interests have clashed with those of broadcasting.
**Networks rolling out TV ratings**

**Broadcasting and cable networks are busy assigning ratings for programs**

**By Lynette Rice and Rich Brown**

The four major broadcast networks say they will begin airing programs this week with the new voluntary system unveiled Dec. 19.

Meanwhile, the WB network was the first to rate its shows when it superimposed the ratings icons on its Dec. 22 lineup.

The big four are saving their official announcements for Jan. 1, but they've already begun to hint at how they will rate shows—overall and for individual episodes.

Most basic-cable networks will debut the voluntary TV ratings system in January, but it is not clear whether all pay-TV movie channels will follow suit. Some cable networks will continue to use ratings they have developed, combined with the new ratings.

USA Network, one of the few that has announced a launch date, plans a Jan. 3 debut. Other cable networks contacted last week are busy reviewing their plans and expect to adopt the system next month.

The TV industry unveiled its age-based ratings system in early December. With six categories ranging from TV-Y and TV-Y7 for children's programming to TV-G, TV-PG, TV-14 and TV-M for general audience programming.

News programming will not be rated, but entertainment news shows such as *Inside Edition* and talk shows such as *Oprah* will be. However, if a talk show crosses into news with, for example, an interview with the First Lady or a hard-news exclusive, the program will be exempt from a rating.

"We wanted to have something that parents would use," says Jack Valenti, president of the Motion Picture Association of America and head of the TV ratings implementation group. "What we're doing is in the long-range interest of every parent in this country."

The ratings icon for all shows will appear in the upper left corner of the picture frame for the first 1.5 seconds of the program. If the program is longer than one hour, the icon will reappear at the beginning of the second hour. The group is launching a massive media education campaign, including broadcast public-service announcements, a World Wide Web page and a toll-free 800 number.

The examples set by movies such as Disney's "G"-rated "101 Dalmatians" are not likely to stop broadcast networks from labeling 8 p.m. shows that appeal primarily to adults—such as NBC's *Jeff Foxworthy Show* and CBS's *Everybody Loves Raymond*—as TV-G-rated sitcoms.

A TV-G does not mean the show is designed for children; it means only that little ones may watch the show without moms or dads. Network standards and practices departments are largely expected to do the rating duty.

At NBC, look for "Must See" sitcoms such as *Friends*, *Frasier* and *Mad About You* to earn TV-PGs, while certain episodes of *Seinfeld* and ER may earn TV-14s. (Overall, however, both Thursday night shows will be TV-PGs.) Ratings for gritty dramas will vary: *Profiler* will earn a TV-14, while *Homicide: Life on the Street* is closer to a TV-PG, although individual episodes may warrant a tougher rating.

Theatricals, however, could force NBC to break away from its largely TV-PG lineup. The upcoming broadcast of "Schindler's List," from 7:30 p.m. to 11 p.m. on Feb. 23, may be a more appropriate recipient for a TV-M, the strongest category in the new ratings system.

CBS expects to label most sitcoms and dramas with either a TV-G—Promised Land and Touched by an

Angel, among them—or a TV-PG—Cosby, Ink and Pearl, for example. Dramas like Chicago Hope will keep a TV-PG, as will the midseason replacement JAG, but Nash Bridges is expected to earn a TV-14.

TV-Gs and TV-PGs are expected to describe ABC’s prime time lot, with Steven Bochco’s NYPD Blue more apt to receive a TV-14. At Fox, however, all shows will likely receive a minimum TV-PG rating, with such skinfests as Beverly Hills, 90210 and Melrose Place, not to mention America’s Most Wanted, deserving a “parental guidance suggested” label, a source says. Anything associated with Chris Carter is expected to earn a TV-14.

The netlets—which have long described their lineups as family-friendly—are rolling out TV-G and TV-PGs ratings. At UPN, Moesha and In the House will earn TV-G, while Malcolm and Eddie, Good Behavior, Sparks, Homeboys in Outer Space and The Sentinel will receive TV-PGs.

The WB will give TV-Gs to 7th Heaven, Sister, Sister and Nick Freno: Licensed Teacher, and TV-PGs will go to Savannah, The Wayans Bros and The Jamie Foxx Show.

Kids network Nickelodeon has not announced the date it will debut the ratings system, but is considering how it will rate its shows. It plans to give most of its shows a G rating, but will rate certain shows such as Ren & Stimpy and Are You Afraid of the Dark? with an expected rating of TV-Y7 (children 7 and older), according to spokesperson Pam Dill.

Published TV listings will need time to catch up with the on-air debut of the ratings system.

Executives at Discovery Communications Inc. met last Monday to discuss plans to implement the ratings for its Discovery Channel and Learning Channel services. Most programming on the two networks likely will fall under G and TV-PG (parental guidance suggested), says spokesman Jim Boyle. He says certain shows will be exempt, such as upcoming ABC News-produced news magazine Discovery This Week.

Boyle says Discovery will continue to use its existing parental advisories on shows that might not be considered suitable for all audiences.

Likewise, HBO will continue to use its long-standing content advisory system combined with MPAA ratings. The network’s latest content advisory system, devised with Showtime in 1994, consists of 10 abbreviations used to describe the type and degree of content themes: Adult Language (AL); Graphic Language (GL); Mild Violence (MV); Violence (V); Graphic Violence (GV); Nudity (N); Brief Nudity (BN); Adult Content (AC); Strong Sexual Content (SC); and Rape (RP).

HBO is exploring how it may integrate the new ratings system into its existing advisories, but no changes are imminent, says spokesman Henry Gomez.

Competing service Encore has yet committed to the new system. “At this point we’re studying whether we’re going to be able to get involved with it,” says Encore spokesman Matt Barrett.

Showtime plans to adopt the new system, but only for original movies and series that are not already rated, says Matthew Blank, CEO, Showtime Networks Inc.

---

**V-chip technology waits for Washington**

While the implementation of a television ratings system seems like a sure thing, consumers shouldn’t expect to buy a V-chip-equipped television set anytime soon.

The V-chip TVs will allow parents to automatically black out TV shows based on their ratings. The proposed six-level MPAA ratings system is technically feasible, according to executives at the Consumer Electronics Manufacturers Association (CEMA). But TV set manufacturers will wait until the ratings are finalized by the FCC before putting V-chips into sets.

“From a technical point of view, once the V-chip is in a television set and you have designed both the integral workings and the user interface, you can’t change the ratings system,” says Joe Peck, director of government legal affairs for CEMA. “If you do, you obsolete sets from the marketplace.”

Peck adds that broadcast equipment suppliers will also wait for FCC specifications before building encoders to embed ratings information in the vertical blanking interval of the broadcast signal.

Once the V-chip standards are set, it will take TV set manufacturers about 18 months to change their products—and their prices. While the extra silicon required for the V-chip won’t have much of a price impact on high-end sets, cheap, no-frills sets could cost up to 15% more, says CEMA President Gary Shapiro.

“For closed captioning [made mandatory by Congress in 1993], you only need reception capability,” he says. “This takes a tremendous amount of remote control technology—you need memory, and the ability to program and block out channels.”

Existing TVs, of course, don’t have V-chips. Soundview Technologies, a Greenwich, Conn.-based start-up, is targeting that market (estimated at over 200 million sets) with its V-Chip Converter, an external device that will plug into the video input jack of a TV set. The product will be introduced at the Consumer Electronics Show in Las Vegas next week, although it won’t come to market until a ratings system is finalized. Soundview President David Schmidt says the box should sell for around $40.

ABC takes double hit in court

Food Lion impact on climate for investigative journalism remains unclear

By Steve McClellan

NEW YORK

A s libel awards go, it was a bad week for ABC News that reflected a bad year for journalism.

On Dec. 18, the news magazine 20/20 was socked with a $10 million libel judgment in the case of a Florida financier and some of his dealings with real estate investors. Two days later, a North Carolina jury ruled that PrimeTime Live committed fraud, trespass and breach of fiduciary duty in connection with an undercover report exposing alleged wrongdoing at Food Lion supermarkets.

The libel judgment was the toppper for what had already been shaping up as a bad year for the industry regarding big monetary awards to plaintiffs by juries. The Libel Defense Resource Center in New York estimates that in the six cases in 1996 in which juries awarded libel damages, the average award was about $3.8 million—more than twice the average of the seven awards handed down in 1995.

Nevertheless, it was the Food Lion case that had the industry concerned. In the case, the plaintiff never challenged the accuracy of the alleged wrongdoing in court, but rather challenged the process by which ABC obtained its information.

Food Lion sued ABC for fraud, trespass and breach of fiduciary duty as defined by North Carolina law in connection with the actions of ABC producers who misrepresented themselves to get jobs as Food Lion meat packagers, then used hidden cameras to film allegedly spoiled and outdated meat being repackaged for sale.

Indeed, jurors in the case were not allowed to see the broadcast at issue before rendering their verdict—leading some legal experts to say the finding was a foregone conclusion. The judge’s instructions to the jury were, in part: “You should not concern yourself in any way with what the ABC broadcast did or did not broadcast about Food Lion. The claims of fraud, trespass and breach of duty do not have anything to do with the content of the broadcast.”

Thus, while industry executives and legal experts say the initial decision in the case could have a chilling effect on some news organizations’ willingness to do hidden camera reports, they say the real significance of the case won’t be known until the second phase is complete—when the same jury decides what damages the grocery chain incurred and how much ABC should compensate Food Lion.

During the damages phase of the case, which starts today (Dec. 30), the jury will see the broadcast of PrimeTime Live’s story on Food Lion.

“A lot of the significance here is going to depend on the amount of the verdict,” says Rex Heinke, a media lawyer. “If they come back and award one dollar, I think a lot of companies in Food Lion’s position are going to conclude this just isn’t worth it. On the other hand, if they come back with a big award, companies will be saying this might be a good way to do this [instead of trying to mount a libel challenge].”

The Food Lion case is not the first time a company has challenged the process, but it’s believed to be the first time a jury in such a case has sided with the plaintiff.

Sandra Baron, executive director of the Libel Defense Resource Center, thinks ABC will argue on appeal that its employees did not violate North Carolina fraud and trespass laws, as Food Lion claimed. Baron notes that ABC won a similar case in Illinois last year after PrimeTime Live sued elderly patients, wired for sound, for an expose of a major eye clinic. The clinic argued in court that the network invaded its privacy, as defined by Illinois law—an argument the court threw out.

“I think at least in the short run it will mean journalists approach these techniques a little more cautiously and carefully,” says Baron.

---

Lieberman named to key Cahners post

Bruce A. Barnet, president and chief executive officer of Cahners Publishing, has announced the appointment of Mark S. Lieberman as executive vice president of entertainment, communications and media. Cahners (a division of Reed Elsevier, the world’s largest publisher of business, scientific and professional information, with 1995 revenue of $5.7 billion) is the parent company of Broadcasting & Cable, Variety and Publishers Weekly.

Lieberman will be in charge of Cahners’ 12 entertainment, communications and media trade magazines and its 10 communications and computer trade titles.

Lieberman, 37, a magna cum laude graduate of Tufts University and the holder of a J.D. degree from the Benjamin N. Cardozo School of Law, is the former president and owner of Abel Technologies Inc., a merchant bank whose functions included forming several multimedia and information companies. Previously Lieberman served as associate deputy secretary and assistant secretary for technology for the U.S. Department of Commerce. A lawyer and engineer, he practiced intellectual property rights and sports law for the firm Lieberman & Nowak.

Barnet said he had looked outside the traditional publishing community to fill this key position. “Mark’s considerable experience in media and technology, coupled with his unique entrepreneurial perspective, will help Cahners extend its existing brands and acquire new businesses in the entertainment arena, as we build an electronic entertainment community,” Barnet said. Lieberman himself says: “I look forward to working with our world-class publishers and editors to build upon what are already very successful businesses and well-recognized brands.”

Networks’ spirits rise with boost in scatter market

Increases estimated from high teens to 40%

By Stephen McClellan

NEW YORK

Fueled by new-product introductions and generally strong business and consumer confidence, the broadcast networks are getting big increases in this year’s scatter market—ranging from the high teens to 40%, depending on the daypart and the network. Syndicators report getting scatter price increases in the teens.

Also boosting the scatter market is the return of an estimated $400 million or more withheld from advertisers’ regular budgets in 1996 to put toward the summer Olympics.

Network executives are so buoyed by results of the fourth-quarter and first-quarter scatter markets that they believe the 1997 up-front market may break the $6.1 billion record set in the 1996 up-front. One network sales head sees the next up-front reaching $6.4 billion.

Another healthy sign, networks and syndicators say, is that a significant number of advertisers are doing scatter deals now that extend through the third quarter, rather than doing them one quarter at a time. “It’s a sign that they think the market is going to be strong,” says Robert Cesa, executive vice president, advertiser sales, Twentieth Television.

Agency executives say it’s too early to predict how the 1997 market will shape up, and even network executives admit that the second-quarter scatter market is the traditional barometer for what the following up-front market will bear. The second-quarter market won’t be in full swing for another month. At that time advertisers will also decide whether to exercise options to bow out of midseason advertising commitments made in June—another harbinger of how strong the following up-front ad market will be.

This year’s scatter market will total $1.5 billion-$1.7 billion, advertising sources say. Estimates are that the first-quarter network scatter market will total some $275 million, with less than $50 million of available inventory left. The fourth-quarter scatter market totaled about $500 million, with low double-digit price hikes over the up-front.

Larry Hoffner, executive vice president, network sales, NBC-TV, reports cost-per-thousand price hikes “in the teens” for first-quarter scatter, compared with up-front prices. In a typical year, that’s generally in line with expectations of scatter price rises over the up-front. “We had a real good up-front,” says Hoffner. “When the pricing is good, you take it a little further, not knowing what’s going to happen later. Scatter can be flat after a great up-front, but we had a good first-quarter scatter market.”

At this point, says Hoffner, the signs are positive for 1997. “It looks like the money is out there. So far, there doesn’t seem to be any pulling back by advertisers. We still have to wait and find out about second-quarter options that fall through in January, but I think it’s going to be fine.”

At CBS, Joseph Abruzzese, president, sales, says he was expecting mid-teen scatter price increases, “but they’re up around 25 or 30 percent.” And while scatter accounts for only about 15%-20% of the network’s inventory, “it’s pretty healthy and it fits right in with the predictions for next year—that the money is definitely there.”

At ABC, Marvin Goldsmith, president, sales and marketing, reports that the network’s scatter prices are up 25%-35% in prime, roughly 30% in daytime and up about 40% in news—including World News Tonight and Good Morning America.

ABC will have 20%-25% of its inventory to sell in scatter this year. “We took a risk that there would be a strong scatter market this year, and it has certainly paid off for us,” says Goldsmith.

Agency executives point out that part of the scatter surge is due to lower network ratings, fewer available gross rating points and thus higher cost-per-thousand rates. “No one in the buying community is surprised they are paying more in scatter when there is erosion in the daypart,” says Julie Friedlander, executive vice president in charge of national broadcast buying for Ogilvy & Mather.

All things considered, says Goldsmith, leading indicators bode well for another record up-front market. “If the up-front started tomorrow, I’d say we’re looking at the largest one we’ve ever had.”

---

**Done deal: FCC OKs Westinghouse/Infinity**

The FCC has approved the $4.9 billion sale of Infinity Broadcasting Corp. to Westinghouse Electric Corp., creating the nation’s largest radio group.

With Justice Department approval secured in November, the door is now open for closure of the 43-radio-station deal.

The deal, struck in June, will close at “the first opportunity,” possibly this week, a CBS Radio spokesperson says.

As part of its OK last Thursday, the FCC gave Westinghouse permanent approval to own TV as well as radio stations it acquired from CBS in New York (the nation’s No. 1 TV market), Los Angeles (2), Chicago (3), Philadelphia (4), San Francisco (5) and Detroit (9). Westinghouse already had permanent one-to-a-market waivers in Boston (6) and Baltimore/Washington (7). But in both cases, the FCC granted conditional approval for the purchase of Infinity’s additional radio stations in those markets. Permanent approval awaits FCC action on its one-to-a-market rule. Official liberalization of the rule is expected by June 1997.

In its action, the FCC also backed Justice’s requirement that Westinghouse spin off one FM in Philadelphia and one in Boston (Broadcasting & Cable, Nov. 19). And the FCC gave Westinghouse six months to divest stations in Chicago and Dallas/Fort Worth so the company can meet the commission’s local ownership cap. Meanwhile, the stations are in trust.

In related action, the FCC last Thursday gave Cox Radio Inc. temporary waiver of the one-to-a-market rule to own wftv(Tv) and six radio stations in Orlando, Fla. Cox needed the waiver to proceed with its swap of two Chicago radio stations for three Infinity radios in Orlando.

December 30 1996 Broadcasting & Cable
CBS, Fox sue PrimeTime 24

By Michael Katz

WASHINGTON

A group of broadcasters is suing PrimeTime 24, claiming the country’s largest satellite carrier flagrantly violated the Copyright and Satellite Home Viewer Acts by delivering broadcast signals to prohibited areas.

The suit was filed in federal district court by Fox, CBS, the CBS Affiliates Association and five CBS affiliates. The broadcasters accuses PrimeTime 24 with knowingly selling network programming to ineligible customers, depriving the broadcasters of millions of dollars.

According to the Satellite Home Viewer Act, satellite carriers are protected against copyright liability only for programs delivered to so-called white areas—places where a regularly broadcast network signal, or Grade B signal, is unavailable.

“Our policy is to adhere to the Satellite Home Viewer Act as best we can,” says PrimeTime 24 Chairman Sid Amira. PrimeTime 24 acknowledges that “tens of thousands” of its subscribers receive Grade B signals, but do not get a clear picture. “We suggest that picture quality” should be part of the act, Amira says, noting that the company has been campaigning heavily on Capitol Hill for an amendment that would include picture quality among the criteria.

Tom Olson, a partner at Wilmer, Cutler & Pickering, which is representing CBS Inc. and Fox Broadcasting Co., explains that Miami viewers receiving the satellite service often watch programming on CBS’s Raleigh, N.C., affiliate instead of bothering to switch to a broadcast antenna to watch the Miami affiliate. This practice, says Olson, deprives local affiliates of viewers and millions of dollars in advertising.

PrimeTime 24 says it has terminated service to 320,000 customers based on challenges by local affiliates. However, the company maintains that the affiliates filing the suit are not losing viewers, because those viewers, despite receiving a Grade B signal, could not get a clear picture from the local station.

Diller eyes Miami remake

W

With the complicated merger of Silver King Communications, Home Shopping Network and Savoy Pictures concluded, Barry Diller and his growing executive team are gearing up for a busy 1997.

The broadcasting arm of the new company, which changed its name last week to HSN Inc., is strongly considering making its first move in Miami by the end of next year or early 1998. Diller, chairman of HSN, has long said that he intends to replace the Home Shopping Network programming on some or all of the group’s 11 major-market UHF stations with locally oriented entertainment, sports and informational fare.

Some local programming ideas may be tested next year on KHON-TV, the top-rated station in Honolulu, and other Fox affiliates in the SF Broadcasting group. SF was formed three years ago as a joint venture of Savoy and Fox.

Although the HSN group has outlets in the top three markets, Miami is viewed as a good testing ground for a range of concepts, such as English-language programming targeted to the booming Hispanic market. The station group may adopt the umbrella name CityVision, but no decision has been made, a spokesperson said last week.

Diller’s latest programming venture, launched with backing from cable giant Tele-Communications Inc., is also close to unveiling a key staff appointments, including a No. 2 engineering executive, head of sales and head of editorial development for the station group.

Glimpse of Magness estate

A

An Arapahoe County, Colo., judge’s decision to seal documents means it will be at least three months before there is public disclosure on how Tele-Communications Inc. founder Bob Magness’s huge estate will be distributed. But documents filed with the Securities and Exchange Commission on behalf of Magness estate executors Donne Fisher and Daniel Ritchie shed light on how powerful Magness was. Estate stock holdings include: 30.8 million shares of supervoting (10 votes per share) TCOMB stock, representing about 36.4% of total shares; 3.5 million shares of TCOMA stock, about .6% of the total; 7.7 million shares of Liberty (LBTYB) supervoting shares, about 36.3% of the total; roughly 880,000 shares of LBTYA, about .6% of the total, and about 125,000 shares of Class B preferred stock (worth about $8 million). Total value: $703 million.

TCI Chairman John Malone has right of first refusal to buy the TCOMB and LBTYB shares.

NEW YORK

Super Bowl sellout

The Fox network expects to rake in advertising revenue in the respectable neighborhood of $71 million for its Super Bowl presentation Jan. 26. The network has sold all of its advertising airtime at a rate of $1.2 million-$1.3 million per 30-second spot. There are 56, 30-second units available per regular-season football game, and that figure is roughly the same for play-off and Super Bowl games.

Hard choices

FCC Chairman Reed Hundt and others not withstanding, almost 70% of local general managers (69 out of 100) say they should have the right to air hard-liquor advertising on their stations, according to Broadcasting & Cable’s annual survey of GMs. (Results of the survey will be published in the Jan. 6, 1997, issue.) Only 21 of the 100 GMs surveyed said they do not believe stations should have the right to air such advertising. Ten said they weren’t sure. Nevertheless, only 12 of the managers said their stations had actually aired or considered airing hard-liquor ads, while most of the rest (86) reported they did not carry such ads.
Campaign reformers promote free airtime

‘Public responsibilities’ could cost broadcasters millions

By Heather Fleming
WASHINGTON

The latest plan to reform campaign financing would scrap the discounts given candidates for advertising, but could cost broadcasters hundreds of millions of dollars more in political ad revenue each election cycle.

Even with lowest unit rate (LUR) TV and radio advertising discounts given to federal candidates, campaign spending reached a record high during the 1995-96 election cycle. In figures offered by the Television Bureau of Advertising after the election, politicians spent a record $500 million on local and network broadcast TV. The Cabletelevision Advertising Bureau estimated that another $30 million-$35 million was spent on cable.

With LUR, a broadcaster must offer a candidate the rate it would offer a favored advertiser, regardless of the number of spots the candidate purchases. Simple enough in theory, in practice LUR is often complicated by a maze of varying rates and schedules.

The just-released reform proposal from Free TV for Straight Talk Coalition’s Paul Taylor, American Enterprise Institute’s Norman Ornstein, Brookings Institution’s Thomas Mann, State University of New York’s Michael Malbin and Colby College’s Anthony Corrado would scrap the LUR radio and TV discounts for federal candidates, and in exchange each broadcaster and cable operator would be assessed a surcharge of 50% on all political advertising sold at prevailing commercial rates.

The money raised would be deposited in a “national political time bank” from which vouchers would be distributed to qualified federal candidates and political parties to purchase airtime at prevailing rates. The parties would then redistribute the vouchers to the candidates of their choice.

Taylor estimated that the cost to broadcasters could be about $250 million per two-year election cycle. But broadcasters estimate that the LUR discount, which would be eliminated, costs $5 million-$10 million per election cycle.

Taylor said that now is a good time to ask broadcasters for additional public interest responsibilities, since digital TV licenses have not yet been awarded. “This is the right moment to extract new public interest requirements from broadcasters.”

Other public interest obligations that Taylor suggested broadcasters could impose to further reduce campaign costs include: a 75% or 100% surcharge on political time sold; a fee on digital TV spectrum; and a trust fund to which broadcasters would contribute.

In an interview, Cabletelevision Advertising Bureau President Billy Fritts said: “This proposal would only perpetuate the proliferation of negative political advertising time bank; and would fail to further the national dialogue through free debates, free public affairs programs and free coverage on news programs.”

Taylor estimated that the cost to broadcasters could be about $250 million per two-year election cycle. But broadcasters estimate that the LUR discount, which would be eliminated, costs $5 million-$10 million per election cycle.

“What does it end?” asked Taizin. “If this idea becomes the law of the land, will Congress later expand the free-time principle to mayoral races? City council races? School board races? Before long, local broadcasters will be forced out of business or forced to charge viewers for access to their programming.”

But Senator John McCain (R-Ariz.), who will chair the Senate Telecommunications Subcommittee, agrees. “If this idea becomes the law of the land, will Congress later expand the free-time principle to mayoral races? City council races? School board races? Before long, local broadcasters will be forced out of business or forced to charge viewers for access to their programming.”

FCC Chairman Reed Hundt last week proposed that broadcasters make available free of charge up to 2% of their advertising time to political candidates. Should Congress adopt such a plan, Hundt said in his 29-page draft for 1997, it could also offset the financial impact on stations by permitting tax...
Top of the Week

Cable and phone companies take on local regulators

Historic rivals fear locals could stifle new ventures

By Chris McConnell

WASHINGTON

Cable and telephone companies, frequent opponents at the FCC, this month found a common enemy: local governments.

Representatives from both industries urged commission officials to keep local regulators out of the telecommunications rulemaking business. Speaking at an FCC forum on local management of public property, cable and telephone lawyers were concerned that local telecom regulations would discourage their companies from launching new ventures.

“We see this urge to regulate in detail,” said Steve Harris, of Pacific Telesis. Dan Brenner of the National Cable Television Association (NCTA) agreed that excessive local regulation of telecommunications could discourage cable companies from entering the local phone business.

“The FCC should lay out some general rules,” said Tony Epstein, a Washington attorney for MCI.

FCC Chairman Reed Hundt said the commission plans to respond by creating an advisory committee to offer recommendations on such state and local jurisdictional issues.

“We want to learn,” Hundt said in opening the forum. He asked attending industry and government representatives to suggest members for such a committee.

Local regulators contend they need to regulate access to the streets to prevent public disruptions and threats to public safety. Vitaly Troyan, San Francisco’s deputy director of public services, presented slides depicting repeated excavations of city streets by telecommunications providers.

“We do accommodate everyone as long as they play by our rules,” Troyan said.

“These are essential for the orderly operation of our cities.” Knoxville, Tenn., Mayor Victor Ashe said of the local rules regarding rights-of-way.

Cable and telephone companies countered that they have no objection to local management of the public property, but rather to rules they say go beyond simple management.

“We don’t have any problem putting cobblestones back.” PacTel’s Harris said. Howard Symons, a Washington attorney for Tele-Communications Inc. (TCI), added that his company is worried local regulators will use their administrative oversight as a platform for other forms of regulation.

Tele-Communications is battling an ordinance in Troy, Mich... that requires telecommunications service providers using public rights-of-way in the city to obtain a telecommunications franchise. TCI has asked the FCC to declare that the local regulators are exceeding their authority in enforcing the provision.

“The FCC clearly has the authority to review Troy’s actions.” Symons told officials last week. Symons said that he expects more cities to adopt similar franchise requirements if the FCC does not preempt Troy’s regulations.

“If you don’t act here, you will have to act soon,” he told the FCC officials.

Attorneys for the city maintained that their regulation applies to all telecommunications service providers, including Ameritech, and that the rule does not pose any barrier to new competition.

“It is intended to manage use of the city’s rights-of-way.” Mark Van Bergh, an attorney for the city, said of Troy’s franchise requirement.

Van Bergh said the rule does not prevent TCI from upgrading its cable network to fiber optics, provided the company does not offer phone service over the upgraded network until it obtains permission from state and local regulators.

“The facts are that TCI has never sought any authority to occupy Troy’s row to provide telecommunications service.” Van Bergh said.

Cable and telephone lawyers are concerned that local telecom regulations will discourage their companies from launching new ventures.

Broadcasting & Cable  December 30 1996
Petitions granted
Two more Time Warner cable systems won deregulation from the FCC this month. The commission’s Cable Services Bureau granted petitions by the company to deregulate the rates for its systems in Clearwater, Fla., and Upper Arlington, Ohio. The rulings followed a decision earlier in December to deregulate the rates for Time Warner’s system in Columbus, Ohio. Commission officials ended rate regulation of the Clearwater system after deciding that the system is facing effective competition from a 77-channel cable system operated by GTE Media Ventures. The officials said Time Warner’s Upper Arlington system faces competition from Ameritech New Media’s cable system in the market.

No emergency
The National Association of Broadcasters (NAB) wants the FCC to cut stations a little slack on enforcing new emergency alert system (EAS) rules. The rules require broadcasters to purchase equipment for the new alert system by Jan. 1.

EEO fines
The FCC’s Mass Media Bureau has fined WPET(AM)/WKSI-FM Greensboro, N.C., $12,000 for violations of the FCC’s equal employment opportunity (EEO) policies as part of a decision to renew the licenses for the stations. Additionally, the bureau upheld two notices of apparent liability for EEO violations it had issued earlier. Officials fined KKIQ-FM Livermore, Calif., $10,000 and fined KTID-AM-FM San Rafael, Calif., $15,000.

Dziedzic moving
David Dziedzic is moving from the Texas Rangers to the National Association of Broadcasters to head the association’s Advertising and Services department. Dziedzic, who started his new position Dec. 27, previously was vice president of marketing with the Rangers.

Open meetings
The FCC is broadcasting its open meetings over the Internet. “Net surfers can tune in to the sounds of communications policymaking at http://www.fcc.gov/realaudio. The necessary gear: a computer with a soundboard, speakers and a modem.”
Combined nets take aim at Nielsen

ABC, CBS, NBC and Fox advertise their displeasure over rating service

By Steve McClellan

In an unprecedented move, the four major networks sponsored a joint print advertising campaign in major media and advertising trade publications the week of Dec. 16 slamming Nielsen Media Research.

“Our confidence in Nielsen is DOWN,” read the headline of the full-page ads purchased by ABC, CBS, NBC and Fox, with the logos of all four prominently displayed at the top of the page.

The ad went on to say:

“Each of the networks has informed Nielsen that:

■ The peoplemeter sample is insufficient in today’s TV environment.
■ The in-tab sample rates for key demographics are the lowest in 10 years.
■ Their national sample does not reflect the national demographic profile.
■ There is a growing disparity between local overnight ratings and national ratings.”

The ads came in response (and in identical format) to a set of ads Nielsen ran in the Nov. 11 editions of several trade publications that proclaimed, “Our service is UP.” The Nielsen ad cited the expansion of the peoplemeter sample to 5,000 homes, improvements in cooperation rates among recruited households and the expansion of local metered service to 38 markets by 1997.

The anti-Nielsen ads followed by one week an ALTV request that the FCC investigate flaws in the ratings services provided by Nielsen. The ads also come on the heels of a charge by NBC Research Senior Vice President Nicholas Schiavone that “reported” drops in viewing levels by Nielsen will cost the six networks $100 million in revenue for fourth quarter 1996. Schiavone thinks the reported drops are due to flaws in Nielsen’s service and not the result of less TV watching.

David Poltrack, CBS executive vice president, planning and research, says declines in the Nielsen ratings for the Late Show with David Letterman in the fourth quarter have a value of about $20 million. Poltrack has recently taken Nielsen to task for the growing discrepancy between reported ratings from its local station and network household samples. One recent night, he says, there was a 31% difference between the reported rating for Letterman from the overnight markets and that part of the national sample represented in those markets. The differences, he says, “should be close to identical, subject to some minimal level of sampling error.”

Poltrack confirms that the four-network ad was in response to Nielsen’s ad, which the networks felt was “totally misleading. Their claims aren’t supported by the facts. They have all of these problems and they aren’t able to answer many questions we have about discrepancies in their service.”

Nevertheless, Poltrack acknowledges that the Nielsen service, flawed as it may be, is probably not responsible for the entire 2 percentage-point drop (to 65%) in four-network prime time share and the 6% drop in rating reported this season. “The collective

Lauer to succeed Gumbel

As expected, Matt Lauer was named co-anchor of NBC News’s Today last week, replacing the departing Bryant Gumbel. Lauer will fill the spot opposite Katie Couric beginning Jan. 6.

“I think the biggest hurdle is that people will want to compare me to Bryant,” said Lauer, who turns 39 today (Dec. 30). “I hope people don’t tune in January 6 and expect to see an imitation of Bryant. That’s the wrong idea. The only thing I can do is rely on what I have been doing the last three years with filling in. I hope the response is good.”

The terms of Lauer’s contract were not disclosed. A replacement for Lauer, who has served as the news anchor since January 1994, will be announced shortly.

NBC News President Andrew Lack acknowledged that while other prospects expressed interest in Gumbel’s job, Lauer was clearly the front-runner for the number-one-ranked show. As of the week of Dec. 9, Today has remained on top for 53 straight weeks in households and 14 straight weeks for adults 18-49.

“The show has performed well over the last two years, regardless of Bryant or Matt.... It has a wide margin of strengths,” Lack said. “I don’t think it will change in terms of ratings.”

Lack wouldn’t disclose Gumbel’s future at the network, other than to say that talks are continuing and the “chairman emeritus” will always be welcome at Today for special reports. A two-hour tribute to the veteran morning anchor, featuring surprise guests, is set for Jan. 3.

—LR
network audience has shown a continued decline," he says.

As to the ALTV filing, Schiavone says it is testament to the fact that, "whether you are a station or a network, this is really everybody's problem."

But at least for now, Poltrack says, CBS doesn't want to get the government involved and would prefer to work with Nielsen and the Electronic Media Ratings Council and other industry groups to resolve the differences. At the same time, he says, "What we think is critical to having the best service is to introduce a competitor." That's why ABC, CBS, and NBC are investing millions in the SMART ratings system being developed by Statistical Research Inc., Poltrack says.

A Nielsen spokesperson says the networks' ad was a "negative response to our positive campaign" and that Nielsen's efforts have been supported by "key customers," including David Marans of J. Walter Thompson and Betsy Frank, executive vice president, Zenith Media.

The spokesperson did admit that the drop in rates of usable (in-tab) data to calculate the ratings "is a legitimate issue, and we are trying to deal with it."

The position of most ad agencies and media buyers is that Nielsen isn't perfect, but it's the best the industry has and it gets the job done.

"No audience research is perfect, and Nielsen could improve its products," says Marans. "However, after many meetings with top management at Nielsen, along with discussions with other leading experts as well as our own analyses, we continue to believe that the Nielsen measures are probably the best media research available in any medium."

During the past year, some network executives, including Fox's Chase Carey, have hinted at possible legal action if the ratings company didn't take corrective measures. But no such action appears imminent.

At NBC, network television president Neil Braun does not rule out a lawsuit but says he hopes it doesn't come to that. "We'll do what we have to, to protect our interests, but litigation to me is a last resort." NBC is currently involved in its "most active and most specific dialogue" with Nielsen over concerns about the ratings, he says. As for progress, Braun says, "it's hard to say. I'll have a better idea during the first quarter."

At Fox, Giles Lundberg, senior vice president, research and marketing, says "the legal option is still an option [for Fox] and is frequently discussed." But, he adds, "first and foremost, we want improvements."

Lundberg says there's been little progress in getting Nielsen to address concerns. "In many areas Nielsen has unfortunately dug in their heels, and I don't think the industry is going to take it for much longer."

As to the ALTV filing, Lundberg supports it: "I believe the more attention that is focused on the issue, the better."

---

### Getting 'Weird' at NATPE

**High Five productions is shopping show based on 'News of the Weird' column**

**By Cynthia Littleton**

St. Bernard Parish, La.: City equipment driver Bobby Bouffine resigned under fire in October.

According to city officials, Bouffine had stopped by an X-rated video store for several hours during a workday and parked the city's $100,000, eight-ton, 25-foot-long pothole-filling machine in the parking lot. "News of the Weird," Feb. 19, 1995.

"News of the Weird," Chuck Shephard's nationally syndicated newspaper column, has been amusing readers with such offbeat news items for nearly a decade. Nashville-based High Five Entertainment is betting that Shephard's ever-growing archive of oddities can be transformed into a successful weekly reality series.

The High Five partners plan to shop a pilot of the show to distributors at next month's NATPE convention in New Orleans. High Five, known for producing music specials and Tribune Entertainment's first-run series The Road, has licensed the TV rights from Shephard and Universal Press Syndicate, which distributes the weekly column to more than 330 newspapers.

Larry Frankenbach, High Five's vice president, worldwide distribution, says the show will be "a lighthearted look at the light-headed," blending re-enactments with live footage, amateur video, animation and on-the-scene reporting.

"The presentation of the show will look just like a local newscast," Frankenbach says.

According to Universal Press Syndicate, "News of the Weird" is carefully researched and all clippings are kept on file. The items are compiled from stories that appeared during the previous nine months in U.S. and Canadian daily newspapers or ran on one of the world's five major wire services.

Frankenbach says High Five intends to push the half-hour show as a companion to America's Dumbest Criminals and other reality weeklies.

---

**Friends' paychecks**

The cast of NBC's Friends finally got what they had asked for from Warner Bros. TV in the way of reported $45,000-plus boosts to their current $30,000-$35,000 per-episode salaries. The new contracts for the six actors extend through the 1999-2000 season and call for roughly $85,000 per episode in the fourth year, going to $100,000 the next year and $120,000 in year six, according to a source. The actors reportedly wanted more money after learning the hefty price the syndication arm was demanding for Friends reruns.

**Facilities:** Ch. 29, 5,000 kw visual, 500 kw aural, ant. 1,491 ft.

---

**More Orlando OKs**

As expected, the Justice Department has signed off on Paxson Communications Corp.'s deal-making in Orlando, Fla., Paxson says. Justice already has approved Chancellor Broadcasting Co.'s radio holdings there (B&C, Dec. 16).

Along with Cox Broadcasting Inc., the companies were being investigated for possible antitrust violations after their dealings reduced the number of station owners in the market from 1-4 at the beginning of the year. The companies also would control 96% of the market's radio revenue.

Paxson says it now is free to own four FMs and two AMs in Orlando.

---

**Bottom Line**

It also operates an LMA with WIRB (TV) Orlando.

**Triathlon out of race?**

Robert F.X. Sillerman–backed Triathlon Broadcasting Co. is looking to "maximize shareholder value," perhaps through the sale of the company. "Strategic alliances and additional acquisitions" also are being considered. CEO Norman Feuer said in a Dec. 17 news release. Triathlon owns, is buying or operates 40 radio stations in seven Western markets: Little Rock, Ark.; Colorado Springs; Wichita, Kan.; Lincoln and Omaha, both Nebraska, and Spokane and Tri-Cities, both Washington.

Triathlon's stock closed at $8.19 the day of the announcement. On Dec. 26 it closed at $8.25.

Up-front buys take off in first quarter

Demand is high as advertisers book time to avoid being shut out

By Donna Petrozzello

If the hectic pace of network radio buying up-front is any indication of the state of the marketplace, radio executives may have cause to celebrate the approaching year.

To avoid being shut out, media buyers representing products from low-fat margarine to pharmaceuticals say they have booked network radio campaigns for first quarter 1997 a bit earlier this year.

"To avoid the crunch," Rich Russo, senior vice president and director of radio for JL Media, started buying network radio spots last August for client Great Foods of America that will appear in first quarter 1997.

"I foresaw this happening," Russo says. "I don't have to worry about the up-front buying that's going on right now which is insane." Russo says he's already purchasing network radio for fourth quarter 1997.

Likewise, media manager Roby Weiner has locked in a full calendar of network radio buys for client Warner Lambert. Weiner predicts a "strong first quarter and strong year" for network radio advertising.

David Landau, president of MultiVerse Networks, described first quarter 1997 as the "best network radio up-front season since 1990."

At least two factors are driving the up-front buying frenzy—an influx of new advertisers to network radio and continued bullish buying by returning network advertisers.

Advertisers in financial industries—including banks and credit card and insurance companies—are making up the bulk of new network radio accounts, say network executives.

Network radio also is being used more frequently by cable television companies, direct TV and satellite groups to reach a national audience. More advertising also is coming from makers of various packaged goods, network officials say.

"We've had more up-front business this year than ever before," says Dick Silipigni, senior vice president of sales for CBS Radio Networks. "We've had two or three new advertisers come into the medium with substantial schedules, and people are buying across the board."

Silipigni estimates pricing for CBS Radio Network spots to be up about 8%-10% over 1996.

Lyn Andrews, senior vice president of advertising sales and marketing for ABC Radio Networks, says the total dollars committed to network up-front buys at ABC are pacing up to 8% higher for 1997 over 1996. First-quarter sales also are "running far ahead this year, compared with last year," Andrews says.

Andrews cites repeat-customer demand and the lower cost of network radio, compared with television, as part of what is driving up demand: "There has been a recognition that network radio works, that it is an extremely good value for the dollar."

ABC is also enjoying a healthy up-front season because it plans to fold its youth-targeted Excel radio buying network as of Jan. 1. While ABC will offer advertisers looking to reach adults 18-49 inventory on its new Advantage network, which targets young listeners in the nation's top 10 markets. Andrews says ABC has at least 50% less youth-targeted inventory to offer.

As a result, ABC has enjoyed not only brisk up-front sales for its remaining youth inventory but also high spillover demand for its adult networks, which drives up profits for the network. Andrews says cost-per-point rates will increase "20% to 30%" for its youth networks and increase "in the high single digits" for adult network rates.

Rod Calarco, executive vice president of sales at Westwood One Radio Networks, says advertisers' attraction to Westwood One's format and demographically targeted buying networks has created an "extremely busy" up-front season. Yet Calarco says he "is not yet sold out for the first quarter" and doesn't want to be. "I always like to have inventory to sell to an advertiser," he says.

Regardless of whether networks choose to sell out inventory far up-front or hold on to some to sell later in the first quarter, executives agree that healthy network sales benefit the entire industry.

Craig Kitchin, executive vice president of Premiere Radio Networks, says strong sales breed "creative expansion" among networks to take chances introducing new programing and production service packages.

"A robust up-front season tells us that we see good things happening in 1997 economically, and if we have 10 or 12 projects that are on the development plate, we're going to be more inclined to try them because we know there will be an economy to support it," Kitchin says.

Some 65% of Premiere's inventory for the first quarter has already been sold, and 40% of the network's inventory 1997 is already committed to advertisers, he says.

"We've seen the return of every player from last year with budgets that are the same or slightly larger," Kitchin says. "That's gone a long way toward supporting the confidence of sales management in network radio."
NAB wants scaled fees for radio
Stations should pay according to size, not technical class

By Elizabeth Rathbun

S
maller stations would pay less and large sta-
tions would pay more in FCC regulatory fees
under a National Association of Broadcasters
(NAB) proposal.

That system would be “more fair than the current
system,” under which stations pay depending on their
technical class, says the NAB’s Jack N. Goodman.
Under that system, a Class A AM station in a small
Midwestern town pays as much as a Class A station in
New York City ($1,250).

The NAB wants to add to the mix the population
that a station reaches. The FCC earlier this year indi-
cated that it was looking for such a solution for the
congressionally mandated fees, Goodman says. This
way, the smallest Class A AM would pay $325, while
the largest would pay $1,800 (see chart). The formula
also would make radio assessments more like TV
fees, which vary by market size.

Although fees for small radio stations would be
“substantially reduced” from current levels, fees for
stations serving midsize markets would stay about
the same, NAB says in its proposal. The fee in-
creases for large stations, particularly those that
reach 1 million or more people, “would not present
a significant burden,” NAB concludes.

The FCC asked for comments on radio regula-

tory fees last month in a Notice of Inquiry. Comments
were due Dec. 23.

LBC picks up Spanish NFL
broadcasts
The New York–based Latino Broadcast-
ing Co. radio network (LBC) debuted its Spanish-language coverage
of National Football League games on
Dec. 28 with the start of the NFL play-
offs. LBC also plans to broadcast the
Super Bowl and Pro Bowl games in
January and February. LBC took over
Spanish-language NFL rights from
CBS Radio’s Spanish-language CBS
Americas division, which the network
shut down in April. LBC, which was
formed in April, is a collaboration
between LBC President Raul Hernan-
dez and the Colombian-based Caracol
S.A. media group. In addition to foot-
ball, LBC also holds rights to Spanish-
language coverage of Major League
Baseball and soccer and the National
Basketball Association. LBC distrib-
utes international news and entre-
tainment programming to 50 U.S. affiliates,
and its programming also is carried by
stations in Mexico and Chile.

Clinton criticizes talk radio
President Clinton trashed talk radio
again in a one-hour interview on
SPAN’s Booknotes. Clinton said he
doesn’t listen much to talk radio,
but says it is not good for America.
“[What] strikes me about...talk
radio—the sort of hostile, shrill
talk radio—is [that it is] over-
whelmingly right wing—not just
Republican, but right wing—and
therefore very hostile to me and to
my administration, to my wife, to
others and to our policies. And I
think when it goes from criticism to
ridicule and hatred, and particularly
when it is at variance with the
facts, which is quite often, it’s not
serving the country well. This is a
country where there is free speech,
and they have...a right to do it. But
I don’t think it’s been very good for
America.”

MMR unveils ‘Snapshots’

borough Research.
IF YOU THINK BIG TENT REVIVAL IS A JIM & TAMMY REUNION, THINK AGAIN.

Big Tent Revival is a hot new band with chart-topping success playing music with a positive vibe, the nation's newest and most exciting new band.

As the industry leader in this genre, Music Television is a new generation in music entertainment, shining light on artists and videos on peace, hope and encouragement - no violence, no sex or nudity. Music Television is more exciting to some of all musical styles including pop, rock, urban and country.

If you think Music Television is just another music video service, think again.

For a sample video and more information, just call our affiliate relations office at (617)660-5900. Then, visit music.television.
Cable-rate rises in decline

Eventual leveling-off is anticipated given increased competition

By Price Colman

able television rates rose an average of about 7.8% through November and will likely close out 1996 with a similar increase.

It's too early to predict how high cable rates will climb in 1997, although many of the larger MSOs have indicated they plan rate increases.

Tele-Communications Inc., for instance, plans in January to raise rates about 7% for roughly 3 million unregulated customers. TCI Chairman John Malone told analysts this fall that the company likely would raise rates a similar amount in June for its 11 million regulated subscribers.

The cable industry has long depended on basic-cable rate increases as a key source of new revenue. The coming year could mark the beginning of the end of that practice, however, as competition in the video services business accelerates.

"I think the days of across-the-board rate increases are winding down," said Ted Henderson of Denver investment company Janco Partners. "I think operators are smart to take them while they can."

The DBS industry and Baby Bells Ameritech, GTE and PacTel gave cable its first real whiff of competition in 1996, although not enough to fuel a price war. At the recent Western Cable Show in Anaheim, Calif., NCTA President Decker Anstrom called on cable operators to "be careful about price increases" because "inattention to prices was the match that lit the bonfire that ultimately subsumed us in 1992."

Currently, DBS holds a slim content lead over cable through its use of digital compression to deliver more programming. But the cable industry plans to roll out digital cable to millions of subscribers in '97, adding new programming that will minimize DBS's advantage. The suggestion is that price, increasingly, will become a differentiator between cable providers and competing video providers.

The average 7.8% basic-cable rate increase through November compares with about a 4.1% average increase in 1995 and is in sharp contrast to an average decrease of about 2.3% in 1994. That decrease was largely the result of the 1992 Cable Act, which imposed rate regulation on the industry and forced a number of cable operators to lower rates for basic-service tiers.

Since the U.S. Department of Labor's Bureau of Labor Statistics first began keeping cable rate records in 1983, rates have risen an average of about 103%, reflecting the growing power and penetration of cable.

This year's 7.8% average rate increase is a bit surprising in light of TCI's 13% average rate increase and Time Warner's 10% average hike. Together, the companies account for nearly 40% of all cable subscribers in the U.S., with TCI alone constituting about 22% of the U.S. total of $63.2 million.

But despite TCI's size and corresponding impact on the market, its rate increase for nearly 14 million subscribers went into effect on June 1, mitigating the effect on industry rates as a whole.

Underscoring the double-edged nature of rate hikes—a revenue enhancer on the one hand and a potential public relations bomb on the other—Malone acknowledged that TCI poorly handled the June increase. That is, TCI raised rates without adding new services, prompting customers to defect to DBS or to drop cable service altogether. During the third quarter, TCI lost about 70,000 subscribers.

In the coming year, TCI and others will deploy migrated programing tiers (MPTs) designed to give customers greater choice in programing or a significant cut in monthly bills.

Disney takes on Nick

Plans children's educational network for daytime

By Jim McConville

Disney will jump into the lucrative daytime kids market, launching a children's educational network by early 1998 that will compete for the same ad dollars now being spent on Viacom-owned Nickelodeon.

The Disney network, with the working title ABZ (the Disney name may also be added), will reportedly target young children during the day and teenagers and young adults at night.

ABZ is reportedly the brainchild of Disney/ABC Cable Networks President Geraldine Laybourne, who joined Disney last December after helping to build Nickelodeon into a kids cable-TV giant during the past 10 years.

Disney hasn't said it will directly position ABZ against the 17-year-old Nickelodeon, which controls a large chunk of the daytime kids market.

In figures released by Nickelodeon last week, the channel claims approximately 57% of the rating points among children 2-11. For the week of Dec. 9, Nickelodeon had 11 of the top 15 cable shows, according to Nielsen Media Research figures.

Disney is also said to be going forward with plans to launch a cable soap opera channel.
one time or another, we've all shouted the answer to some slowpoke on Jeopardy! A phenomena that inspired us to make Game Show Network the reality of interactive television. And when you think about it, no other tv genre lends itself to real interactivity better than games. Today, millions will play along with us for real prizes in real time, combining their cable-tv and telephones. And soon, folks will duke it out from their couches, with live studio contestants, for big-time bucks. Our vision even includes local games inserted right there on your cable system.

So play along with the phenomena of Game Show Network. Call us at 310-280-2222 in L.A. or 212-933-9727 in NYC. The future looks like fun.
**Dish prices fall again**

*From $700 at start of year to under $100*

By Jim McConville

With DBS sales still lagging behind industry forecasts, retail prices on 18-inch DBS satellite dishes are now falling as fast as the snow in Lake Tahoe.

DBS dish prices—$700 at the start of 1996—have dropped below the $100 mark. California retailers Frys and Fedco are now selling RCA's DBS satellite system at $99.95, down from its $200 promotional price set last September.

Circuit City, the nation's largest consumer electronics chain, is selling the same dish for $149.95. With both offers, customers must sign up for a $300 programming package in advance.

Signs that DBS operators wouldn't meet their 1996 forecasts appeared in October, when DIRECTV, the nation's largest DBS operator, revised its downward forecast twice—from 2.5 million subs to 2.25 million and then to 2 million.

The revision surprised many industry watchers who thought September's $199 price promotion (initiated by EchoStar and matched by DIRECTV) would act as a catalyst to push 1996 subscriber counts past DBS's original projections.

While final-year DBS figures are still a week away, industry analysts say it's clear that 1996 will fall short of the plan.

"Sales aren't going quite as fast as they wanted them to, obviously, because of the revised-down numbers," says Evie Haskell, editor of Sky Reports.

"DBS people are looking at where they would be at the end of the year and the Christmas selling season, and it just hasn't turned out as well as they hoped," says Bill Marchetti, analyst for Paul Kagan & Associates, who projects that DBS will end 1996 with 6 million subscribers, compared with 2.2 million at the end of 1995.

**Warner Bros. strikes deals with UK's ITV, Channel 4**

The UK's commercial terrestrial broadcaster ITV Network has firmed up its ongoing relationship with Warner Bros., signing a program supply agreement with the studio on Dec. 18. One week earlier, Warners sealed a programming deal with rival terrestrial commercial service Channel 4. The ITV deal, described as a "multi-million pound" agreement, gives the channel access to films released theatrically in the U.S. during 1995 and 1996 as well as animation series and new hour and half-hour TV shows from the 1996-97 season. Among the movies to make their terrestrial premiere on the ITV from 1998 onward will be "Ace Ventura 2," "Batman Forever," "The Bridges of Madison County," "Outbreak," "Eraser" and "Executive Decision."

The Channel 4 deal—estimated to be worth $100 million—includes released and upcoming films from Castle Rock until 2001. It also includes library films from Warner Bros. and MGM, the majority of which will air in 1997. As part of the deal, Channel 4 also secured popular series *ER* and *Friends* from 1998 to 2000. The two series, for which Channel 4 has rights for 1997, have become invaluable to the channel. The last episode of the third series of *Friends* attracted 5.72 million viewers, positioning it slightly below the top-rated domestic soap, *Brookside*, with 7.11 million, while *ER* pulled in 1.75 million viewers, according to UK ratings service BARB.

**NetHold in Netherlands**

NetHold's near-video-on-demand service Movies On Demand has launched a commercial service in the Netherlands. The service will be rolled out to Scandinavia and Belgium in early 1997. MOD has non-exclusive PPV deals with MGM/UA, PolyGram, Independent, Concorde, Morgan Creek, New Regency and Nordisk Films and is expected to sign PPV agreements with two more Hollywood studios shortly. MOD has the capacity to offer up to seven titles via seven channels at 30-minute intervals for top movies and one or two hours for older movies. The company hopes to increase the number of channels to 36 by the second quarter of next year. Blockbuster movies are priced at Dfl11.95 (US$6.90), while less successful features cost Dfl7.95. Among the first titles being offered are "Species," "Bullets over Broadway," "Prêt-a-Porter," "A Bronx Tale," "Ace Ventura II" and "Showgirls."

**Telepiu Disney deal**

Italian pay-TV group Telepiu has concluded a 10-year pay-per-view and exclusive pay-TV deal with Disney/ABC International Television for live-action feature films from Disney, Hollywood, Touchstone and Miramax. Telepiu's digital bouquet, Telepiu Satellite, will also carry a premium Disney Channel, which is expected to launch in late 1997. The Disney Channel is available in Taiwan, the UK and Australia and will launch on Canal+'s Canalsatellite Numerique of France on March 22, 1997, and Middle East pay-TV group Orbit on April 2, 1997.

**Canal+ pay-TV deal**

French pay-TV group Canal+ has signed a five-year exclusive pay-TV and PPV movie deal with News Corp.'s U.S. studio 20th Century Fox. The deal gives Canal+ access to recent Fox blockbusters such as "Independence Day," "Braveheart" and "Broken Arrow" as well as upcoming features such as "Speed 2," "Cruise Control" and "Alien III Resurrection." Both companies also plan to develop channels that will be carried on their respective platforms internationally.

Millions of people drive this road every day just to buy a vowel.

Information Superhighway

rough with the Infobahn Wannabes. Time for a little reality. Today thousands of folks at home will play along with our real-time games. Nearly one million visits will be made to our web site this month. And the original shows we're creating will put real prizes in the hands of your customers on a daily - even hourly - basis. Kinda makes the whole interactive-future-thing seem like a pretty good time, eh? So launch Game Show Network today, and put the pedal to the metal. (Get us on the horn in NYC at 212-833-8727 or call us from your car or some trendy bistro in L.A. at 310-280-2222.) The future looks like fun. Wanna play?
**MLB to vote on Turner Braves deal**

Any deal will have to pass muster with Fox, ESPN

*By Jim McConville*

Major League Baseball owners will vote next month on whether to allow Turner to retain television rights to approximately 100 Atlanta Braves games yearly through 2000.

Owners vote Jan. 16 during MLB's annual winter meetings in Phoenix, Ariz., according to Bill Giles, owner of the Philadelphia Phillies and a member of MLB's executive committee.

The vote has a very large string attached to it, however. The deal proposed by Turner—to televise roughly 100 Braves games per season over the next four years—must first gain the blessings of cable networks ESPN and Fox Sports, which own MLB cable rights through 1999.

"It is clear that MLB cannot do it without their blessing," says Giles. "We may vote on it subject to that [approval]. But whether we're going to get ESPN and Fox to bless the conversion [of TBS from superstation to free-market station] is still very much up in the air."

Giles says Turner may have to give ESPN and Fox something in return for their approval. "That is currently being discussed," he says.

A Fox spokesperson, who declined to be identified, says Fox will likely look to gain some sort of concession for its vote, adding: "How we play our card is up to us."

---

**Cable survey finds work to be done**

One quarter of subs say they would likely switch to cable competitor

*By Michael Katz*

A year-end state-of-cable report reveals a state that the industry would rather not revisit in 1997.

The fourth annual report was conducted by Horowitz Associates and Marshall Cohen Associates and was sponsored by several industry players, including Comcast Cable Communications, MTV Networks, Discovery Communications, Showtime Networks and USA Networks. Between October and November 1996, the nationwide report surveyed 1,510 television households and 200 general managers and marketing managers at cable systems.

Despite the cable industry's customer-service battle cry, the report found that almost one quarter (24%) of cable subscribers would be very likely or likely to switch to a new cable company if the same service were offered at the same monthly cost. (Of course, put another way, the vast majority (76%) of cable subscribers appear to be happy with their present service.)

Although the NCTA and CTAM have emphasized the importance of their industrywide public service initiative, 81% of surveyed cable subscribers rated their local telephone service as excellent, compared with 64% who gave the same rating to their cable company. The report also concluded that premium-cable subscribers are more likely to switch than basic subscribers and that men are more likely to switch than women.

"It is clear that the price and value of cable need to be repositioned in this ever more competitive marketplace," says Howard Horowitz, president of Horowitz Associates. "Consumers are concerned by cost issues, but they also want greater variety and quality of programming and they are willing to pay for it."

According to the survey, only 38% of subscribers rated their cable service as good or excellent in terms of value for the cost of service. However, only 29% of all subscribers say that lowering cost is the most important thing that cable companies can do to keep them as customers. Those surveyed cited more channels, new channels and better programming as ways to retain subscribers.
So what'll it be, enhanced revenue and customer loyalty, or the deluxe mahogany bedroom set?

Today's grand prize on Game Show Network is a great new source of income. From new customers who love watching a whole network of America's most enduring entertainment genre. From advertising revenue that pays an immediate return on your investment. And from a retention tool that can make your customers as loyal to you as they are to Wheel Of Fortune and Jeopardy! To cash in with Game Show Network, call us in L.A. at 310-280-2222 or in NYC at 212-833-8727. The future looks like fun.
Global shops for stations

Home shopping network follows in competitor HSN's footsteps

By Rich Brown

While Barry Diller works to replace Home Shopping Network programing on the Silver King TV stations, upstart competitor Global Shopping Network plans to build distribution for itself using the old HSN/Silver King model.

New York--based GSN expects to reach 30 million broadcast homes (20 million of which are also cable homes) by the end of 1997 and has pinpointed local TV stations in a dozen markets to carry out the plan, says Barbara Laurence, president of GSN and a 15% partner in the service. The first, WAGN-TV Raleigh-Durham, N.C., is expected to debut GSN as early as this week.

Laurence says deals to launch GSN on TV stations in San Francisco and Boston are expected to be finalized by February; additional markets will roll out as follows: Los Angeles, Cleveland, Detroit, Houston, Louisville, Ky.; Knoxville, Tenn.; Dallas, and Seattle.

The TV stations that will carry GSN are being purchased by Ramcast, a separate company formed by the GSN partners. Laurence's partners in both ventures are Rachimim Anatian (75%) and Moti Gal-Oliver (5%). Anatian is founder and owner of USA Detergents, a multimillion-dollar company that produces Extra laundry detergent; Gal-Oliver has strong ties to New York's Diamond District, which supplies the jewelry that constitutes 60% of GSN's merchandise.

"Each one is the equivalent of passing a kidney stone," GSN President Barbara Laurence says of the task of finding and closing on the TV station properties.

WGN-TV gets Christmas present

Tele-Communications Inc. gave WGN-TV an unexpected pre-Christmas bonus, reversing a decision to drop the superstation in five states. TCI systems in Illinois, Indiana, Iowa, Wisconsin and Michigan will continue to offer WGN-TV come Jan. 1.

TCI based its change of direction on a deal between WGN-TV and the NBA that allows the station to continue carrying Chicago Bulls games (WGN-TV also carries the popular Chicago Cubs baseball games). Consumer outcry and protests from systems managers also influenced the decision.

"We did hear from more than several hundred concerned customers about WGN," said TCI spokeswoman LaRae Marsik.

Although consumers in those five states may have notched a win, others weren't so lucky. Roy Bliss, president of United Video Satellite Group Inc., resigned—apparently under pressure—after criticizing TCI's decision to drop WGN-TV. UVSG uplinks the station and other programing to TCI and other MSOs. TCI owns 37% of UVSG Class A shares and 85% of super-voting (10 votes per share) Class B shares.

TCI is developing plans to "cherry-pick" the most popular WGN-TV programing and provide it in those systems where the superstation was not reinstated. To do that, TCI plans to preempt certain programing on "host" networks such as Animal Planet, C-SPAN, C-SPAN 2 and "anyone else who will legally allow us," and insert WGN-TV programing, Marsik said. —PC

its aggressive search for TV stations.

"We are acquiring only channels with strong signals," says Laurence. "We are not counting on must carry."

Ramcast is prepared to cut deals with cable system operators in the event that must carry disappears, Laurence says. (Under the FCC's must-carry rules, TV stations can require local cable system operators to carry their signal.) She says GSN is already closing in on a deal with one top multiple system operator to carry the service in markets where the network does not plan to have broadcast affiliates. The MSO in exchange would receive 5% of the gross sale of merchandise in its markets plus what Laurence describes as a "very small" equity stake in GSN.

Ramcast plans to program the stations with a variety of programing that will include GSN as well as local content and other networks to be launched by the partners. (GSN expects to debut a second, as-yet-undisclosed network in the first half of 1997.) Laurence has hired former Tribune syndication sales executive David Sifford to acquire three hours of weekly kids programing, which will be included in the schedule to meet FCC requirements.

Laurence says there is plenty of room for home shopping services despite a growing list of competitors that now includes Home Shopping Network, QVC, Viewvision, Shop at Home and various new infomercial networks. Shopping services will always find room because they provide carriers with the opportunity to share in the revenue, she says.

In addition to TV station and cable carriage, Laurence hopes to interest direct broadcast satellite providers in the service.

Since its debut last March, GSN has been available only to the 2.3 million homes equipped with backyard dishes. To gear up for its expanded distribution, GSN has just boosted its daily live programing lineup from eight hours to 16 hours. The network's staff has grown to 200 employees.

In other GSN developments, the network has signed an eight-year contract with Saicom C-4 and will switch to the satellite from Galaxy 1R in January.

December 30 1996 Broadcasting & Cable
Now Game Show Network comes with a free state-of-the-art cash machine.

Get a free Sony VideoStore™ Digital Ad Insertion System just for launching.

While other networks are giving a few bucks here and there in launch incentives, Game Show Network is awarding a grand prize worth more than $300,000. Launch us now and you're eligible to receive a complete Sony VideoStore™ system that inserts local commercials digitally on 12 or more cable channels. And like the best things in life, it's fully MPEG-2 and absolutely free. So while your customers enjoy over 50,000 episodes of America's best loved game shows, you'll enjoy an ad-sales annuity for years to come. And we pay the capital costs! Heck, this is even better than winning a beautiful new washer/dryer combo. So call us at 310-280-2222 in L.A. or 212-833-8727 in NYC. The future looks like fun.
By Jim McConville

Announcing a new cable network is easy. Actually launching one is much more difficult.

With little cable carriage space available and digital set-top boxes still far from a household item, prospects for launching networks in 1997 appear to be tougher than ever, say cable industry observers.

"In a channel-constrained environment prior to rebuild, I’d say that it will be a challenge for cable operators to consider [adding] new channels," says Lynn Buening, vice president of programming for Falcon Cable.

The days of launching small independent cable networks without major MSO affiliation appear numbered. Only two major independent networks without an MSO partner were able to launch this past year: America’s Health Network and Classic Sports Network.

New networks launched in 1996 typically satisfied one or more of the following criteria: they paid lucrative up-front fees and/or offered exclusivity; they were part of a vertically integrated company with MSO backing; they own retransmission-consent agreements; they launched first on satellite.

Network launches during the year included Black Entertainment Network’s BET on Jazz, Discovery’s Animal Planet, Nick at Nite’s TV Land, News Corp.’s Fox News Channel (FNC), NBC’s MSNBC, MTV’s M2, ESPN’s ESPNEWS and, most recently, CNN’s, the joint venture of Sports Illustrated and CNN.

Major networks scheduled to arrive in early 1997 include: CBS’s Eye on People, A&E’s Biography Channel, Rainbow Programming’s Romance Classics and BET Movies, a black movie channel co-produced by BET and Encore Media. All have an existing network, deep pockets or an MSO partner—or all three.

But new networks—even those with money and MSO partners—can no longer expect automatic cable carriage.

Case in point: Rupert Murdoch’s Fox News Channel, which ran into a wall when it tried to force itself onto Time Warner Cable of New York’s public access channels.

Jeff Flathers, associate analyst, Paul Kagan & Associates, says delays in set-top delivery will reduce 1997 launch prospects for many of the proposed networks. "The digital TV rollout next year is going to be slower than previously predicted, with only about 1 million households expected to be hardwired with digital set-top boxes."

New networks also face the prospect of reaching many of their first subscribers through satellite dishes rather than cable wire. Rival sports news networks ESPNEWS and CNN, both of which launched this fall, say roughly 75%-80% of their charter subscribers are coming from DBS and C-band.

ESPNEWS launched in November with an estimated 1.5 million subscribers, mainly from satellite, while...

Since the inception of the Ad Council's Safety Belt Education campaign in 1982, the percentage of Americans wearing safety belts has risen from 11 to 67%.

It is estimated that 62,000 lives have been saved and more than a million injuries prevented by safety belts over the past decade.

Over the past decade, alcohol-related fatalities have been reduced by 30 percent. Still, there is an alcohol related fatality every 32 minutes on average.

The Advertising Council is venturing into the electronic world with its own web site address:

http://www.adcouncil.org

We have created this home page to serve as a resource for the media and the general public. By simply logging on, you can easily access information about the organizations that sponsor Ad Council public service campaigns and the issues they address. Also, you can get more information from Research and Results, News from the Front, Calendar of Events and much, much more.

To order PSAs, or to share your thoughts with us, you can simply e-mail us at adcouncil@prodigy.com.

If you want more information on the sponsors of the Ad Council campaigns, you can log on to their web sites as well. They are as listed:

Dear Colleague:

As The Advertising Council enters its second year behind the Commitment 2000: Raising a Better Tomorrow, we would like you to join us in building a Dream Team for Kids. In 1996 we launched The Coalition for America’s Children, and in 1997 will introduce new campaigns for 4-H, The Urban League, The National Black Child Development Institute, Children Now, Parental Responsibility, and Youth Fitness.

Along with all of our other important efforts, we are all part of a team devoted to improving the quality of life in our communities. The media play a key role on this team. While the Ad Council is the largest provider of public service announcements, developed pro bono, it’s the media who deliver the messages. You hold the power to positively influence the lives of millions of Americans — including our children.

We are pleased to be your source of compelling messages addressing education, the environment, community service, health concerns, substance abuse and public safety with a variety of campaigns.

Our goal is to make it easy for you to support Ad Council messages. We hope this calendar will be useful throughout the year, suggesting events and occasions that will make your schedule of PSAs and editorial content topical, interesting and helpful to the community you serve.

Thanks for your continued support of the Ad Council, and our efforts to make America a better place for children.

Sincerely,

Ruth Wooden

Young & Rubicam
new cable networks

work for showcasing new cable channels to 9 million TCI subscribers. TCI will replace Intro TV with Encore Media's Plex multiplex movie service.

With limited space, some cable networks secure partial or sheltered launches on existing channels until carriage opens up. Lifetime Network will launch The Place, a two-hour Friday night block aimed at young women that it hopes to spin off as a network within the next two years, says Doug McCormick, Lifetime

Cable's latest wannabes

Even though cable systems have a limited amount of channel space, there appears to be no limit to the number of would-be programers developing ideas they hope to grow into successful networks. Following is a list of fledgling services (launched since January 1996) and those expected to debut by 1999.

ABZ Channel (working title)
Los Angeles 818-569-7500
Programming: Educational programing for young children and pre-schoolers during day, and teenagers and young adults at night.

Online Services

PC Meter finds household 'Net use doubling

America Online maintains strong entry position

By Richard Tedesco

The number of households accessing the Internet has more than doubled in the past year, and America Online continues to be the most popular single access point.

According to PC Meter, 11.1% of U.S. households accessed the Internet during a 1-month period between September and October 1996, compared with 4.4% for the same period last year. PC Meter conducted interviews with residents of 9,928 households during October. Nearly 14% of those surveyed said they had access to some sort of Internet service, including access at work, in the preceding month.

Meanwhile, search engines, or services effectively acting as Internet ingress ports, remain the most popular point of access. According to PC Meter's individual usage report for October, more than 40% of PC users in its sample used AOL, with Yahoo and Netscape used by more than 38%. More than 15% of all users reached the 'Net via Microsoft Network.

Nearly 70% of all PC users used search engines, with news, information and entertainment services also scoring high with 55%. PC users typically accessed approximately four services daily and viewed more than seven pages in one half-hour of access per day. Educational content sites showed a 46.2% access rate, with adult content sites just over 25% and shopping sites around 24%. Adult content sites experienced the most pages accessed per usage—more than 14 pages on average.

In its overall Web usage...

Discovery charts new course online

Discovery Channel Online is coming from a very different place, beginning this week.

Widespread acclaim for its site notwithstanding, Discovery is reinventing itself in cyberspace toward a more straightforward format. Individual pages will be longer, effectively offering more access to specific content, in addition to its core topic areas of history, nature, science, technology and exploration.

"It gives us more flexibility to allow people to get directly to things," says Rebecca Farwell, Discovery Online editorial director. "The front page is the hub, and you're never very far from what you want."

Meanwhile, Discovery is not far from licensing original content for the @Home service. As one of @Home's programming affiliates, Discovery intends to develop content exclusive to its site there "over time," at which point a critical mass of cable subscribers can access it, Farwell says.

In its current overall revamp, Discovery will have "rebuilt" some 10,000 pages, according to Farwell, who says she plans to run more serialized stories, with experts popping up more randomly in different areas.

Discovery's monthly virtual expeditions, including an upcoming journey into deep space to repair the Hubble telescope, proceed apace, with the idea of charging excursion fees now in limbo. "We're not yet sure what people are ready to pay for," Farwell says.

Discovery claims it is drawing about 30,000 visitors to its site daily, with 5 million pages viewed monthly.—RT

Mundie outlines Microsoft's mission

In Microsoft's worldview, sometime in 1998 the fundamental battle between the television and the personal computer has been joined and is about to be settled.

Given the orientation of the Redmond, Wash., computer software goliath, the outcome is easily deduced, particulars aside. "If the [digital broadcast] standard turns out to make PCs a digital receiver, we'll ship about 15 million of these things," says Craig Mundie, Microsoft senior vice president, consumer platforms division.

In Mundie's vision of the near future, the collision between TV and PC is "imminent and inevitable," a view shared in one way or another by many interested observers. But Microsoft is more than an interested observer, as its role in the recent resolution of digital transmission standards made clear. And now, as Mundie puts it, "We want PCs to become ubiquitous receivers of television."

Microsoft has a deal in place with DIRECTV to enable reception of that service's signals direct to PC. And that relationship will involve production of "turboivered" content—online material that can be streamed to a PC to supplement a particular programer's content or as stand-alone content. It's just one of several TV-related initiatives that Microsoft has in the works.

"We want digital TV to become one of these all-inclusive motherboard features as early as possible," Mundie says.

He made it clear during the recent opening session of the Western Show that the cable industry didn't exhibit any particular foresight on the digital front. "I think as the cable industry saw digital coming, it started out with the orientation of doing the same thing again—sending television digitally," he said.

But now he believes that cable players such as Tele-Communications Inc., cable's counterpart to Microsoft, sees a business opportunity in the oncoming PC/TV convergence. Mundie thinks the broadcast industry has yet to wake up, notwithstanding the recent digital wake-up call: "The irony is that we think we're a big part of their future. They haven't internalized that yet."

Microsoft already has one PC/TV project in development with TCI. And the software company is actively seeking partnerships with terrestrial broadcasters, according to Mundie, to develop services as part of its grand strategy—positioning itself as something considerably more than a software company.—RT
survey, PC Meter found that more than 33% of households accessing the Web had annual incomes of $100,000 and 28% had occupants with advanced degrees. Only 5% of home usage occurred in households with annual incomes of $25,000 or less, occupied by residents with high school degrees.

On a regional basis, 14.6% of western U.S. households accessed the Internet, with 11.2% from the South, 10.6 percent in the Northeast and 8.6% in the North Central census regions.

Webcasting

ClNet, Intel plan cyber-bash at new Mediadome

By Richard Tedesco

ClNet and Intel Corp. will open their online event Mediadome venue with a New Year's Eve Webcast of a San Francisco concert featuring Chris Isaak, Lyle Lovett and Los Lobos.

That's an apparent indication of what's to come on the site (www.mediadome.com), which will use the latest streaming technologies for planned biweekly Internet entertainment happenings. An event is planned around the release of the feature film "Turbulence" on Jan. 13, when online participants will be able to attempt to land a virtual jumbo jet using Superscape's Viscape simulation technology. The Fugees will perform on Jan. 27, and jazz great Herbie Hancock follows in February.

Meadiadome also plans to utilize Progressive Networks' RealAudio and Xing's StreamWorks to enable the Webcasts. Technical requirements for each "webisode," as the companies are calling them, will be displayed on the site. "Meadiadome is a prime example of how the marriage of brand-name media properties and dynamic Web technologies can introduce a whole new level of interactive entertainment to Internet consumers worldwide," says Ronald Whittier, senior vice president and general manager of Intel's content group.

Intel also is involved in the Intercast project with NBC, streaming supplementary material with programing via PC. Mediadome is intended to offer PC users a varied multimedia experience with each event.

Apple gets Jobs back in NeXT move

Apple Computer celebrated Christmas early by buying NeXT Software for $400 million last week. Most of that will be in cash, and half of it goes to Steve Jobs, who comes full circle in returning to the Silicon Valley company he co-founded.

Apple wanted a strong operating system and figured that a tie to a high-volume installed base and a prolific manufacturing company was the best thing for NeXT. "It means we greatly strengthen our Internet, Enterprise, and software propositions," says Gil Amelio, Apple chairman. "And it means we complete our commitment to deliver a truly modern operating system to our customers."

Amelio also characterizes the move as emblematic of a new era at Apple, which will welcome involvement with new technologies not necessarily of its own design. Apple, he says, will not be an island, but rather will "build a bridge to the center of an open-standards world based on industry alliances."

Gemstar to acquire StarSight

Gemstar International Group Ltd. agreed to purchase StarSight Telecast Inc. last week for $273 million in stock. The deal enables Gemstar to marry its VCR Plus+ recording technology with StarSight's VCR programming software and its onscreen electronic guide technology.

More than half of each company's shareholders had already approved the transaction. StarSight management remains in place except for its chairman, Larry Wangberg, who now assumes an advisory role.

Simultaneously, StarSight concluded a $20 million licensing deal with Microsoft Corp. Both of those deals come on the heels of StarSight's winning a $17.7 million judgment in a legal dispute with Scientific-Atlanta. Gemstar and StarSight had been involved in a legal wrangle (which will be dropped as part of the deal) about intellectual property rights.—RT
FSN chooses Comprompter software

Interactive service moves its encoding operation to Orlando

By Glen Dickson

The Full Service Network (FSN), Time Warner's interactive television service in Orlando, Fla., has purchased roughly $200,000 worth of Comprompter automation software to support its new Orlando encoding operation for The News Exchange. TW and Tribune Interactive Network Service's on-demand news service offers content from ABC, CNN, The Weather Channel and local NBC and ABC affiliates WESH-TV and WFTV-TV.

FSN had been encoding the programming for The News Exchange in New York at Time Inc. New Media headquarters, transmitting the video material back and forth from Orlando over a fiber-optic link. "However, we determined that system architecture between New York and Orlando wasn't cost-effective," says FSN spokesmemn John Dunn.

Now the encoding takes place in Orlando at FSN's digital production center. According to Todd Morse, operations manager for the center, FSN takes fiber-optic feeds from Time Warner's cable franchise in Orlando, runs them through Vela Research MPEG encoders, then sends compressed files to its network operations center, where they are stored and played back on Silicon Graphics servers.

The Comprompter software, a customized version of the company's Windows NT-based ENR newsroom automation system, automates the program capture, compression and uploading for client viewing, says Comprompter President Ralph King. The software also makes backup tapes on Beta SP in case of server failure.

The Orlando encoding operation has been operational for several weeks. Morse says the new Comprompter software, which replaced a customized Brughetti automation package in New York, is working well.

"ENR is a very powerful automation system in itself, which maybe hasn't been realized by its traditional users," he says. "Taking a product pretty much out of the box, we expected a lot more difficulty. But we've been having a tremendous success rate."

ABC builds all-digital control room

Move is first stage in seven-year upgrade plan

By Glen Dickson

To begin its transition to digital television, ABC has constructed an all-digital control room, TV-7, in its network headquarters in New York. The new 7,500-square-foot facility is the first of seven Manhattan production control rooms that the network plans to upgrade to digital, at the rate of one a year.

"This is our first rebuild of a control room that's totally digital, both video and audio," says Elliott Reed, vice president of post-production and special programs for ABC broadcast operations and engineering. "It will serve as a model for the ones to follow."

The digital TV-7, which controls the adjoining TV-7 studio, cost $4 million—$6 million to build and took roughly two years to complete. It encompasses an additional 4,000-square-foot audio control room, with a Solid State Logic Axiom digital audio console, and a 7,500-square-foot transmission/video room.

The heart of the new TV-7 is a 64-input Grass Valley 4000 component digital switcher with customized Lynx Systems software, which connects to the rest of the plant via a Philips BTS Venus digital router, Tekniche digital-to-analog converters, and Leitch digital distribution and monitoring equipment.

"Our plant, of course, still has an analog infrastructure, so we're in the
process of building a new central switching facility to connect to the new control room and our digital graphics rooms," says Bruce Simon, general manager of studio and field systems for ABC BO&E.

Running on Philips BTS’s Jupiter facility control software, the Venus functions as a “smart router”: sources that remain analog are dialed digitally by the BTS router, which searches for the D-A path. The conversion process is seamless to the operator, says David Linick, manager of audio/video systems for ABC BO&E.

TV-7 also uses dynamic mapping, a concept that ABC is trying to employ throughout its technical operations. Since TV-7 will serve as a floater studio for news or sports, the incoming signals to the switcher need to be reconfigured rapidly. So ABC is using touchscreen monitors with a graphic representation of the monitors and buttons on the switchers, which allows a technical director to assign signals to the switcher inputs at the touch of a finger—making a “virtual patch.”

Other gear in TV-7 includes an Abekas Brutus digital video effects unit, an RTS Adam intercom system, an AT&T V-band digital phone system and 100 Ikegami monitors. To handle the production of large news events, ABC has installed a projection screen on the left side of the room that displays a computer-generated chart of incoming remotes. That system is a lot more efficient than scribbling with Magic Marker on a board, says Linick.

The next control room to be rebuilt for digital operation is TV-2, which controls the Good Morning America studio. That job should start within the next six months.

---

**Cutting Edge**

By Glen Dickson

**WETA-TV**, the PBS station in Washington, will be using a newly developed **Dielectric antenna** to launch experimental HDTV broadcasts in early 1997. **WETA-TV**, which will use a Harris digital transmitter to generate the HDTV signals on ch. 34, is installing the Dielectric DC-10JSC Cardioid model, a side-mounted antenna that is designed to handle up to 17 kw average input power and is approximately 22 feet long. According to Jerry Butler, the station's vice president of engineering, the Dielectric antenna will eventually transmit HDTV signals on ch. 35, the channel allocated to **WETA-TV** for digital television under the FCC's current frequency plan.

**Deep Blue Sea**, a Miami-based visual effects and animation company, has designed and created “Crop Circles,” a network ID for NBC that suggests an alien landing. The ID is based on the “crop-circle phenomenon,” a source of fascination for science fiction fans, and will run on Saturday nights during NBC's lineup of “x-treme” shows. The Crop Circles concept was originated by Deep Blue Sea's David Woodward, who designed the storyboard and composited the images on a Discreet Logic Flame.

**Fox News Channel** has purchased a Quantel Editbox 4020 nonlinear editing system, which it will use to rapidly edit complicated clips. The system has two hours of storage and will be integrated with Fox News Channel's existing Quantel and computer-based systems to facilitate the distribution of graphics. FNC already has two Hal Express systems and five Paintbox Expresses.

**Cox Broadcasting** has just purchased four **Sony Betacam SX DNW-A50 hybrid recorders for wsb-tv**, its Atlanta ABC affiliate. The new recorders, which combine both digital tape and hard disk storage, will be used in the station's ENG vans and edit bays. The deal is part of a $13 million contract Cox signed with Sony's systems integration division last April to create a new digital broadcast facility for wsb-tv based on Sony's Digital SX format and MPEG-2 4:2:2 Profile at Main Level.

**Virtual-set developer Orad Hi-Tech Systems**, which provided a virtual set to **ABC News** for its election-night coverage, says it is ready to deliver its new Virtual Presence feature for its CyberSet system. Virtual Presence allows producers to incorporate a live remote feed into the virtual-set environment. "The Virtual Presence feature makes it possible to seamlessly insert a remotely located actor into the virtual studio," says Orad owner Dr. Milky Tamir. "Actors moving in the virtual studio will now be able to interact with those 'remote' actors as though they were physically on the same stage."

**TV Asahi** in Tokyo has purchased FROST, Discreet Logic's real-time 3-D modeling and animation system for broadcast graphics creation and playout. The system, which will run on a single processor Silicon Graphics Onyx supercomputer with InfiniteReality graphics, was already tested in **TV Asahi**'s coverage of the preliminary Japanese political elections. "FROST was used to produce real-time tabulation maps and projected winner boards," says Hitoshi Sakai, TV Asahi's News Center associate director. "We now intend to use the power of FROST in our daily news and weather broadcasts." Sakai says a selling point for the Discreet Logic software was its ability to do real-time rendering, 3-D graphics and animation without the use of a blue screen.

---

**Orad's Virtual Presence feature incorporates remote feeds into the virtual-set environment.**

BROADCASTING & CABLE'S CLASSIFIED RATES

All orders to place classified ads & all correspondence pertaining to this section should be sent to BROADCASTING & CABLE, Classified Department, 245 West 17th Street, New York, NY 10011. For information call Antoiiine Fasulo at (212) 337-7073 or Sandra Frey at (212)337-6941.

Payable in advance. Check, money order or credit card (Visa, Mastercard or American Express). Full and correct payment must be in writing by either letter or Fax (212) 206-8327. If payment is made by credit card, indicate card number, expiration date and daytime phone number.

Deadline is Monday at 5:00pm Eastern Time for the following Monday's issue. Earlier deadlines apply for issues published during a week containing a legal holiday. A special notice announcing the earlier deadline will be published. Orders, changes, and/or cancellations must be submitted in writing. NO TELEPHONE ORDERS, CHANGES, AND/OR CANCELLATIONS WILL BE ACCEPTED.

When placing an ad, indicate the EXACT category desired: Television, Radio, Cable or Allied Fields; Help Wanted or Situations Wanted; Management, Sales, News, etc. If this information is omitted, we will determine the appropriate category according to the copy. NO make goods will run if all information is not included. No personal ads.

The publisher is not responsible for errors in printing due to illegible copy—all copy must be clearly typed or printed. Any and all errors must be reported to the Classified Advertising Department within 7 days of publication date. No credits or make goods will be made on errors which do not materially affect the advertisement. Publisher reserves the right to alter classified copy to conform with the provisions of Title VII of the Civil Rights Act of 1964, as amended. Publisher reserves the right to abbreviate, alter or reject any copy.

Rates: Classified listings (non-display). Per issue: Help Wanted: $2.10 per word, $42 weekly minimum. Situations Wanted: 1.15¢ per word, $21 weekly minimum. Optional formats: Bold Type: $2.45 per word. Screened Background: $2.50, Expanded Type: $3.20 Bold, Screened, Expanded Type: $3.65 per word. All other classifications: $2.10 per word, $42 weekly minimum.

Word count: Count each abbreviation, initial, single figure or group of figures or letters as one word each. Symbols such as 35mm, COD, PD etc., count as one word each. Any phone number must have area code and the zip code count as one word each.

Rates: Classified display (minimum 1 inch, upward in half inch increments). Per issue: Help Wanted: $167 per inch. Situations Wanted: $93.50 per inch. Public Notice & Business Opportunities advertising require display space. Agency commission only on display space (when camera-ready art is provided). Frequency rates available.

Blind Box Service: In addition to basic advertising costs. Situations Wanted: No charge. All other classifications: $30 per issue. The charge for the Blind Box service applies to advertisers running listings and display ads. Each advertisement must have a separate box number. BROADCASTING & CABLE will now forward tapes, but will not forward transcripts, portfolios, writing samples, or other oversized materials; such are returned to sender. Do not use folders, binders or the like. Replies to ads with Blind Box numbers should be addressed to: Box (number), c/o Broadcasting & Cable 245 W. 17th Street, New York, NY 10011

Confidential Service. To protect your identity seal your reply in an envelope addressed to the box number. In a separate note list the companies and subsidiaries you do not want your reply to reach. Then, enclose both in a second envelope addressed to CONFIDENTIAL SERVICE, Broadcasting & Cable Magazine, at the address above.
"For the Record" compiles applications filed with and actions taken by the FCC. Applications and actions are listed by state; the date the application was filed or the action was taken, when available, appears in italic.

Abbreviations: AOL—assignment of license; ant.—antenna; ch.—channel; CP—construction permit; D.I.P.—debtor in possession; ERP—effective radiated power; kw—kilowatts; kHz—kilohertz; km—kilometers; m—meters; mhz—megahertz; mi—miles; TL—transmitter location; w—watts. One meter equals 3.28 feet.

Brinkley fan

EDITOR: I missed David Brinkley the very first week he was gone. The co-hosting of Sam Donaldson and Cokie Roberts won't work so long as Sam keeps hogging the questioning and they keep stepping on each other in Cokie's attempt to get a word in. The show needs a real leader who can allow real participation of all the panelists. Brinkley's style will be missed.—Phillip Bradshaw, Las Vegas

Taking exception

EDITOR: In response to the Nov. 4 "Open Mike" from G.D. Roberts of Nashville, I would like to say this: "Hogwash."

Clearly, this person knows nothing about the radio business. Roberts says in his letter that all music programing is derivative: radio hosts/DJs are extremist or rude, and talk show hosts are self-inflated and controversial.

These are all unfair generalizations. Some music programing may be derivative, as Roberts claims, but these usually are the stations that carry the satellite-fed music programing to which he referred. Satellite programing primarily is used for cost control more than anything else. If these stations could effectively afford to hire airstaffs around the clock, believe me, they would. Radio, before anything else, is a local medium. Creating a relationship with your audience is of primary concern to any program director worth his/her weight. If Mr. Roberts would read the playlists, he would see that stations do differ by market, sometimes greatly. No program director in Washington, D.C., cares what someone wants to hear in Los Angeles.

I would agree that controversial DJs and talk show hosts are getting a great deal of publicity these days, but if Mr. Roberts would step back and look at the big picture he would see that they are considered controversial because they are the minority! As a matter of fact, most stations are now trying to distance themselves from controversial talent because it tends to scare off potential advertisers. This is especially true in the midst of deregulation.

Radio groups will not need shock jocks to separate themselves from the pack. They will own the pack. The days of the "Morning Zoos" are gone, and most radio shows are now much more music intensive.

One other thing Mr. Roberts obviously can't appreciate is a paragraph in the U.S. Constitution called the First Amendment. Whether Mr. Roberts approves of what is being said on the radio, the First Amendment still provides broadcasters with the right to free speech. Rather than count on the government to begin censoring radio more harshly, I prefer to believe in listener censorship. "If you don't like it, turn it off." Nothing the FCC could do would be more effective.

I bet Mr. Roberts wouldn't be so quick to pass judgment if Big Brother came knocking on his door one day to take away his first edition of "Catcher in the Rye."—Brendan Hurley, Stanford, Conn.

No question

EDITOR: Now that Westinghouse Electric Co. has split in two, CEO Michael Jordan reveals that one of his two problems is finding a new name for the broadcasting/cable company, which, he claims, is like naming a new brand of Doritos. He says he is going to consult the investment community, the press and focus groups and do it, in his words, "scientifically." Has anyone told Mr. Jordan that broadcasting is a lot different from the cracker business? CBS is still one of the great names. Keep it! Unfortunately, another memorable brand name—Westinghouse Broadcasting Co.—made great by the creative, dynamic leadership of men like Chris Witting, Larry Israel and Don McGannon, is no longer available.

—Richard Pack, former senior vice president, programming and production, Westinghouse Broadcasting Co.

Messages for a new medium

Scott Siegler’s recent move from MediaFour—the management production company he co-founded—to become president of American Cybercast exemplifies the diverse paths his career has followed.

Earlier, Siegler had left Columbia Pictures Television, where he had been president, to start MediaFour, and a similar impulse had prompted his departure from ColumbiaPictures Television, where he had been president, to start TriStar TV, a similar productive period at the studio.

“It seemed he’d found the ideal spot. But he found a more intriguing one in 1986, when he was named the first president of the newly formed TriStar Television, that studio’s initial entry to the field. When TriStar TV merged with ColumbiaEmbassy TV in 1987, Siegler became president of the new Columbia Pictures TV. While at Columbia, he also produced such durable sitcoms as ‘Who’s the Boss?, Designing Women, Married...With Children and, most recently, Party of Five.

But Siegler started from scratch again in 1994, when he left Columbia to co-found MediaFour. And American Cybercast was getting off to a running start in cyberspace before his arrival there, but the unique facets of the medium have fired up his entrepreneurial fervor one more time. “I’m curious and optimistic about this new medium. I’m curious to learn more about it and figure out what forms of entertainment are going to work,” he says.

Siegler concludes that content development for online series must be markedly different than one for TV: “It’s a unique medium, and starting with motion picture ideas isn’t the way to do it.”

He feels that the emphasis on virtual communities transforms the basic nature of cyberspace, where a broad audience can be reached, but also where reaching distinctly new audiences is the real objective. At this point in its development, American Cybercast is aiming cyber-serials that could have some resonance as TV properties. Siegler envisions characters that could migrate from cyber-soaps to draw broader audiences on TV, and expects branded TV personalities to do the same.

Whatever the ultimate direction, Siegler figures to play a significant role in that multimedia drama at American Cybercast, which has already produced two pioneering cyber-serials: The Spot and EON-4. And given the elemental stage of the medium’s development, he figures to confront enough at the cutting edge to keep him occupied for a while.

—RT

Scott Siegler
**BROADCAST TV**

Anne Egerton, head, litigation practice group and principal legal officer, West Coast, NBC Law Department, Burbank, Calif., named senior VP, NBC Law.

Mark Antonitis, VP/news director, wmaq-tv Chicago, joins Kelo-tv Sioux Falls, and KcLO-tv Rapid City, both South Dakota, as vp/gm.

Appointments at WLEX-TV Lexington, Ky.: Marilyn Clark, station manager, named VP/station manager; Mary Broberg, general sales manager, named vp/gsm; Sandra Byron, business manager, named vp, business and finance.

Christy Henderson, weekend meteorologist, KCEN-tv Temple/Waco, Tex., joins Wvue(tv) New Orleans in same capacity.

Appointments at Wcet(tv) Cincinnati: Jay Jansen joins as pledge producer; Lisa Jones, annual giving manager. Cincinnati Zoo and Botanical Garden, joins as membership manager; Jillian Darwish, teacher, Indian Hill Primary School, joins as director, educational technologies.

1996 he was honored by the National Association of Radio Talk Show Hosts as Talk Show Host of the Year.
Nine states have joined Alaska's petition for an FCC ban on distilled liquor ads. They are Hawaii, Iowa, Kansas, Maryland, Minnesota, Michigan, North Dakota, Rhode Island and Vermont.

Six lawmakers are backing the FCC's telephone interconnection rules, which are being challenged in a federal court. Senate Majority Leader Trent Lott (R-Miss.) and Senate Commerce Committee members Ernest Hollings (D-S.C.), Daniel Inouye (D-Hawaii) and Ted Stevens (R-Alaska) joined with House Commerce Committee Chairman Thomas Bililey (R-Va.) and Commerce Committee member Edward Markey (D-Mass.) in signing a friend-of-the-court brief supporting the FCC rules.

In a strangely symmetrical deal, Jacor Communications Inc. and American Radio Systems Corp. are swapping radio stations that the Justice Department separately told them to get rid of. Jacor will swap WHAM (AM)-WVOR-FM in Rochester to radio stations that were subject to FCC approval.

Senior White House adviser George Stephanopoulos has been named a contributing correspondent and political analyst for ABC News, effective in January, when he is scheduled to leave his White House post. He'll make regular contributions to broadcasts including Good Morning America and This Week.

CBS has sold more than two-thirds of its inventory for the 1998 winter Olympics in Nagano, Japan, to 12 advertisers for nearly $350 million. Joseph Abruzzese, president, sales, CBS-TV, confirms that the network has sold about 68% of its inventory to a dozen clients. Ad agency sources say they include Visa, Coca-Cola, Nissan, Toyota, Ford, Chrysler and Anheuser-Busch. Abruzzese said CBS is probably getting increases for Nagano, versus the Lillehammer winter games in 1994, comparable to those NBC got this year for Atlanta versus the Barcelona games in 1992. NBC recorded an overall 36% gain in sales in Atlanta, to $675 million. In 1994, CBS generated about $370 million in sales for Lillehammer. If the network is able to maintain price hikes achieved so far, it could break $500 million.

Babylon 5 star Claudia Christian has signed on as host of Ladylaw, the first syndicated project from start-up distribution outfit Skyline Television.

Paramount Domestic Television is hoping to build on the boom in wildlife shows with Wild Thing, described as a reality show "that doesn't just watch from the bushes, it crashes through them."

Heard Entertainment is introducing a weekend lifestyle entry, B. Smith with Style, hosted by author/restaurateur Barbara Smith.

With more than 500 episodes in the vaults, Twentieth Television has decided to end production on the long-running reality strip Real Stories of the Highway Patrol. But Twentieth plans to repackage existing episodes into theme weeks with new wraparound segments.

John Pike, veteran studio and network programming executive, has joined MGM Worldwide Television as senior vice president, business development. Pike, who resigned from CBS last February, is executive-producing MGM's remake of "Elmer Gantry" for Showtime.

Warner Bros. has cleared its revival of People's Court on NBC O&Os in nine markets, including New York, Chicago and Washington. The four strip with former New York City mayor Ed Koch has also been picked up by ABC affiliates kstv-TV Minneapolis and katu(TV) Portland, Ore. Worldvision Enterprises' Pictionary has been picked by kgtv(TV) San Diego, wpix(TV) Pittsburgh, wcsc(TV) Charleston and klas-TV Las Vegas. All American Television is also making progress with its talker, Arthel & Fred. The hour strip has been cleared for a fall start by McGraw-Hill Broadcasting's ABC affiliates wrtv(TV) Indianapolis and kgtv.
Genesis

It was no surprise to this page when Congressman Edward Markey and those of like mind raised a hue and cry over the electronic communications media's V-chip ratings system, even before it had been announced. He and they objected to the industry's voluntary system because it is age-based, not content-based.

Jack Valenti, head of the Motion Picture Association of America and chairman of the industry effort that produced the ratings standard, was quick to say the industry would go to court before striking its flag. We hope so, but we're waiting and seeing. The industry should have gone to court the minute Congress passed the V-chip legislation; instant outcry is still a valid legal principle. By the time the V-chip gets to court, if it ever does, the question may no longer be whether it's implemented but how it's implemented.

This is what will happen next. The industry will label all programing. Congressman X and Senator Y will see some show that offends them, probably for sexual suggestive-ness—there being virtually no violence in network prime time. The next day they'll call a press conference to decry the rating given this show and demand that the show be removed from the air.

What everyone should know and accept is that the V-chip is a handle by which Congress and the power elite seek to remove programing from the air, not sort it into categories. We are only in the foothills of that new censorship, which will dog television to the end of time.

Guessing game

Along with those visions of sugarplums over the holidays came visions of the FCC to be. We see Reed Hundt in place for a year (handicappers say September, but we know that everything takes longer than you want it to take). Susan Ness, whose White House connections are superior even to Hundt's, is the odds-on favorite to succeed him. James H. Quello, who will never go into retirement, will establish operations in Washington and Michigan, after 23 years of service. Rachelle Chong, whose term expires in June, had not been expected to be reappointed but is now expressing interest. Regina Keeney, whose nomination went up last August, will again be nominated to fill the Andrew Barrett (Republican) seat. And the smart money is on General Counsel Bill Kennard to succeed Quello.

Hundt could be forgiven for wanting to stay around, just to see what it's like with a working majority. He's had to do it the hard way the first time around.

Here comes tomorrow

It was almost anticlimactic by the time the FCC got around to approving the digital TV standard last week. But it was nevertheless a historic moment, and should be recognized. Sooner than most think, the effect of that decision will be felt in the marketplace.

That doesn't mean overnight, unfortunately. It will take a year to get the receiver production lines up to speed, and perhaps even longer to get DTV stations on the air. The next bottleneck will be the allotment process, which has the potential of being a nightmare.

And then, of course, there are the service rules, and FCC Chairman Reed Hundt's ambition to quantify the public interest standard at some 5% of airtime. There's already a 2% expectation for children's educational programing, leaving 3% to be carved out for political advertising and public service efforts. It would be a historic holding-hostage of a medium, in contravention of the First Amendment, and we fear the precedent. It's one thing for the television medium to step forward on its own, but quite another to have its airtime taken by fiat.

It may seem halting, but incredible progress is being made in our time. All involved in the process may take great gratification at what's being wrought.
31st SMPTE Advanced Motion Imaging Conference

The Age of Compression: Nonlinear Editing, Digital Broadcasting, and Other Wonders

February 6-8, 1997
Crowne Plaza Manhattan
New York, N.Y.

Sessions
Four sessions with an emphasis on the transition to digital technology and nonlinear systems, including video servers, graphics devices, and storage systems associated with the latest broadcast technology.

SMPTE Sessions:
- Nonlinear Editing: Technical and Operational Issues
- Digital Distribution
- Storage Technologies Using Compression
- Advanced Television

Two Day-Long Seminars to Follow Conference
- Shooting on Film, Editing Nonlinear, Completing on Film and Video: What Procedures are Available for the Filmmaker?
  Saturday, February 8, 1997, 9:30 a.m. - 5:30 p.m
  Crowne Plaza Hotel
- A Technical Introduction to Digital Video by Charles Poynton
  Saturday, February 8, 1997, 9:30 a.m. - 5:30 p.m
  Astor Ballroom, Marriott Marquis (one block from Crowne Plaza)

Save $100
Register prior to January 10, 1997

Seminars Only
- Shooting on Film
  Member | $100 | $125 |
  Nonmember | $125 | $150 |

Members of AIVF, IFF, I.A., DGA, ITVA, ITS, AICP and Women in Film receive SMPTE member rates on Shooting on Film seminar registration only. Please specify your organization.

- A Technical Introduction to Digital Video by Charles Poynton
  Member (Book incl.) | $135 | $155 |
  Nonmember (Book incl.) | $160 | $175 |

Social Events
- Partner's Program | $125 | $150 |
- Get-Together Luncheon | $50 | $60 |

AUTHORS: Two days Papers Program Complimentary Seminar $100

TOTAL AMOUNT DUE | $ | $ | 

- Cancellations must be made in writing. A $50 administrative fee will be incurred.
- No refunds or cancellations postmarked after January 20, 1997.
- Registration credentials will be available for pickup on site.
