Ratings get revamped

Networks, except for NBC, agree to add content labels

By Paige Albiniai
WASHINGTON

The TV ratings deal is done, again, and reactions from advocates and opponents range from E for elated to H for hopping mad to S for stubborn.

After more than four months of negotiations with children's advocates, TV executives, says NBC, last Thursday released a plan for revising the seventeen-month-old and much maligned ratings system.

TV shows will continue to sport the now-familiar age-based ratings—Y, Y7, G, PG, 14, and MA. But starting Oct. 1, they will also carry content warnings—S for sexual content, V for violence, L for strong language, D for suggestive dialogue and FV for “fantasy violence” in programs for children 7 and older.

The icons will be larger than the current ones and, as before, will run for 15 seconds at the start of each show. The system will allow parents to use V-chip technology to keep their children from watching shows with certain ratings (see story, page 10).

With an S for steadfast, NBC is refusing to air the content-based ratings, contending that they are a further intrusion on its free-speech rights. Other broadcasters and cable networks are not thrilled with the new system, but agreed to adopt it to avoid congressional trouble.

Advocacy groups got the content ratings they wanted. Having wanted even more detailed descriptions of content, they still feel shortchanged.

The American Psychiatric Association dissented from the deal at the last minute, citing "inadequate guarantees that it will operate in the public interest.”

Center for Media Education President, Dr. Kathryn Montgomery, says that "although the modified system is a compromise, we believe that the addition of content information will significantly improve the current age-based system, making it a more effective tool for families."

Vice President Gore seemed happy at a White House announcement of the deal last Thursday. "Today, America's parents have won back their living room," Gore said. He and President Clinton helped to broker the original TV ratings deal last year.

And parents should be ecstatic, said Representative Edward Markey (D-Mass.), originator of the V-chip legislation. "This new ratings system will get the highest Nielsen ratings ever in the parental happiness area."

The three principal industry negotiators were less than enthusiastic and chose not to appear at the White House.

"This is not something we celebrated as a great victory," says Motion Picture Association head and lead negotiator Jack Valenti. "This is something we did because we had to do it."

"It is our hope that parents take advantage of the modified system and find it useful in raising their children," says NAB President Eddie Fritts.

With the changes we've agreed to make, parents will now have additional information about the specific content of television programs so they can better monitor the television viewing of their children.

THE NEW DEAL

The ratings system set to go into effect on Oct. 1 builds on the existing system. It calls for affixing specific content ratings—FV, V, S, L or D—to some of the familiar age-based ratings. Here's how it works:

Programs created solely for children:

**TV-Y** All Children This program is designed to be appropriate for all children. Whether animated or live-action, the themes and elements in this program are specifically designed for a very young audience, including children from ages 2-6. This program is not expected to frighten younger children.

**TV-Y7** Directed to Older Children This program is designed to be appropriate for children who have acquired the developmental skills needed to distinguish between make-believe and reality. Programs in which fantasy violence may be more intense or more combative than in other programs in this category will be designated TV-Y7-FV.

Programs designed for the entire audience:

**TV-G** General Audience Most parents would find this program suitable for all ages. It contains little or no violence, no strong language and little or no sexual dialogue or situations.

**TV-PG** Parental Guidance Suggested This program contains material that parents may find unsuitable for younger children. The theme itself may call for parental guidance and/or the program contains one or more of the following: moderate violence (V), some sexual situations (S), infrequent coarse language (L) or some suggestive dialogue (D).

**TV-14** Parents Strongly Cautioned This program contains some material that many parents would find unsuitable for children under 14 years of age. This program contains one or more of the following: intense violence (V), intense sexual situations (S), strong coarse language (L) or intensely suggestive dialogue (D).

**TV-MA** Mature Audience Only This program is specifically designed to be viewed by adults and therefore may be unsuitable for children under 17. This program contains one or more of the following: graphic violence (V), explicit sexual activity (S) or crude indecent language (L).
7.5 MILLION WOMEN REACHED IN PREMIERE WEEK!

WAY TO OPERATE!

Congratulations to the producers, writers, cast and crew of port charles for increasing the time period delivery 46% among women 18 - 49.

The figure of 7.5 million is based upon NTI cume for W18+ during the premiere week of Port Charles (6/2/97 - 6/6/97). The 46% increase among W18-49 represents premiere week average delivery for Port Charles (6/2/97 - 6/6/97) vs. average delivery for The City (3/3/97 - 3/30/97).
children,” says Decker Anstrom, president of the National Cable Television Association. “That’s what parents told us they want; and that’s what we have delivered.”

NBC took a stronger stance: “The ultimate aim of the current system’s critics is to dictate program content. NBC is disappointed that the industry capitulated to political and special-interest pressure and did not look more seriously at the implications of the flawed process in which they engaged. Therefore, NBC will not be a part of the new agreement.”

NBC’s refusal to sign the deal could spell trouble for other networks. Without NBC’s acquiescence, legislation might be passed to force the network to add content-based ratings. Lawmakers say that all pending legislation penalizes only broadcasters who have not implemented a content-based ratings system, so only NBC would be affected if Congress passed such a law.

Representatives sent broadcasters letters offering them three years of assurances that no content legislation would be passed in the House. V-chip proponents Edward Markey (D-Mass.), Dan Burton (R-Ind.), Jim Moran (D-Va.) and John Spratt (D-S.C.) sent one letter: House Telecommunications Subcommittee Chairman Billy Tauzin (R-La.) sent another.

Although Markey is happy with the new deal, he certainly is not happy with NBC. Markey last week sent a letter to Jack Welch, president of General Electric, NBC’s owner. Markey urged Welch “to take a second look” at NBC’s holdout position.

“If NBC insists on ignoring the system worked out with parents in favor of the system supported only by industry, your commitment to the public interest is likely to be seriously questioned,” Markey wrote.

Senate Commerce Committee Chairman John McCain (R-Ariz.) last week offered broadcasters a letter of his own, which included signatures of Senate Majority Leader Trent Lott (R-Miss.), Senate Judiciary Committee Chairman Orrin Hatch (R-Utah) and Judiciary ranking member Patrick Leahy (D-Vt.).

A group of senators who get the “hopping mad” icon—Ernest Hollings (D-S.C.), Joseph Lieberman (D-Conn.), Kent Conrad (D-N.D.), Sam Brownback (R-Kansas) and John Ashcroft (R-Mo.)—refused to support offering legislative assurances. Hollings still plans to offer legislation that restricts violent programming to late hours. Without NBC, the ratings system will not work with the V-chip, says Maury Lane, Hollings’s communications director.

Although TV content legislation that gets to the floor tends to pass, the House has offered assurances to broadcasters both from V-chip proponents and opponents. With the congressional assurances, broadcasters have won at least a temporary stay on government action on the issue. The first sign that action will stop is the FCC’s postponement of a hearing on TV ratings that had been rescheduled for today.

Despite the networks’ acquiescence, some broadcasters are concerned that the ratings system may result in consumer boycotts of programming with intense content. But at least one network presi-
NOW MORE THAN EVER, TALK IS UNIVERSAL.
In a world where over 90% of all new shows fail in their first season, Universal once again delivers a proven winner. Joining our outstanding success stories, Sally and the Jerry Springer Show, Maury Povich brings added dimension to the team with his six years of rock-solid performance, making Universal the new powerhouse of issue-oriented talk. So why take a chance on a newcomer when you can have proven success all under one roof?

Top of the Week

Don’t rush out to buy a V-chip set
WASHINGTON—TV sets won’t be ready to block the violence for at least 18 months, and probably longer.

Set makers long have said they would need a year or two to incorporate the V-chip circuitry into their sets once ratings and technical standards were settled. And so far neither issue is settled enough to start building the chips into sets, manufacturers say.

“We couldn’t have any confidence in it,” says Werner Wedam of Sharp Laboratories. “It’s a very tenuous situation.”

Wedam and others say they will need an FCC stamp of approval on the ratings before they can start designing circuits that will decode the ratings labels. They warn that once they start building the circuits into TV sets, future changes in the ratings scheme will not be accommodated by the sets.

“Once this is set, it’s set,” says Gary Shapiro, president of the Consumer Electronics Manufacturers Association. “You can’t change it.”

Shapiro’s group is leading an industry effort to develop technical standards for the blocking technology. The FCC will need to review those standards as well. Officials at the commission are preparing a rulemaking proceeding on the technical specifications, but so far have not launched the effort.

Others at the FCC also speculate that technical specifications eventually will be needed for digital TV sets as well as analog.

Shapiro is confused by a portion of last week’s deal that calls for the ratings icons to appear on screen at the press of a button. That technical feature has not been part of the industry’s standard-setting effort so far and is not likely to be included in the effort, Shapiro says. “It’s a confusing state of affairs,” he says of the ratings plan.

While the TV industry waits for FCC action, set-top blocking boxes could show up. On the heels of last week’s industry agreement, Soundview Technologies Inc. said it would offer a $60 device to decode the new ratings. The company says it will be able to offer its set-top device three or four months after the ratings are adopted.

Setback for PrimeTime 24
Federal magistrate recommends action against network retransmitter

By Dan Trigoboff and Chris McConnell
WASHINGTON

A federal magistrate has recommended a preliminary injunction against PrimeTime 24, finding the network signal retransmitter in likely violation of the Satellite Home Viewer Act by marketing to ineligible households.

At issue is exactly what constitutes a “white area”—considered unserved by local signals that can be received by rooftop antenna. PrimeTime 24 has been under fire from many broadcasters who contend that the network retransmitter provides signals to customers who can receive an acceptable off-air signal. Broadcasters want a strict interpretation of what the law refers to as a “Grade B intensity signal” and have challenged homes they contend can receive Grade B signals. PrimeTime 24 says it goes to homes with signals that are unacceptable.

Miami-based Magistrate Judge Linnea Johnson noted that Grade B, as defined by the FCC, is an objective and measurable standard.

“PrimeTime 24 contends that it should continue to be able to offer network service to anyone willing to state that his or her over-the-air picture quality is unacceptable,” she wrote in a report released last week. “The Court cannot accept this contention.” She also wrote that “Congress expressly placed on PrimeTime 24 the burden of proving that each of its customers is an unserved household.”

Johnson also rejected PrimeTime 24’s argument that since Congress and the Copyright Office are reviewing satellite and compulsory licenses, the court should “stay its hand.” “It is not for this court to speculate about what changes Congress may (or may not) make in the future,” she wrote.

National Association of Broadcasters President Eddie Fritts says he was “pleased” by the magistrate’s recommendation. “We are hopeful that the District Judge in Miami will promptly adopt this recommendation and issue the injunction.”

PrimeTime 24 Chairman Sid Amira was “disappointed” and plans to continue the dispute. Amira notes that the recommendation carries no legal weight.

PrimeTime 24 plans to ask for a new hearing within 10 days, and “we don’t expect any kind of ruling on this hearing for another month. This is just the first skirmish in the preliminary injunction hearings.” PrimeTime 24 also launched its own lawsuit in late May, alleging antitrust violations by all major networks, their affiliates and the NAB. That suit seeks an injunction against the broadcasters who are challenging...
PrimeTime 24 subscribers. Alleging collusion, PrimeTime 24 said the broadcasters mounted “sham” and “unsupported challenges.”

The Miami lawsuit is one of several satellite/broadcast battles under way in the courts and in Washington. While PrimeTime 24 has filed a countersuit against the networks and the NAB, networks have lawsuits pending against PrimeTime 24 in three cities.

While fighting PrimeTime in the courts, broadcasters have been negotiating with satellite carriers to establish a new system for defining which customers can and cannot legally receive distant network signals.

An agreement in principle signed in April by Primestar Partners, Netlink and EchoStar calls for using a combination of topographic maps, broadcast signal maps and ZIP codes to determine which customers can sign up for the satellite signals. Negotiators are still ironing out details.

Officials in the Copyright Office meanwhile, are preparing a report to Congress on cable and satellite compulsory licenses. The licenses give satellite and cable operators the right to retransmit broadcast signals without first negotiating royalty fees with the program copyright owners.

The Copyright Office is scheduled to offer its recommendations for changes to the current compulsory license system on Aug. 1.

And this week representatives of program distributors and copyright holders will be making their final arguments in an arbitration proceeding to set a new schedule of copyright fees. Arbitrators are scheduled to issue their final determination on the new fees by Aug. 29.

Late-night talkers ready to go

Wayans show, ‘Vibe’ target young multicultural audience

By Joe Schlosser
HOLLYWOOD

S
how starring the likes of Martha Stewart, Terry Bradshaw and even a new Captain Kangaroo headlined Synditel '97 (during which TV syndicators present programs to the press. But the talk in syndication now is centered on the upcoming late-night talk show wars.

Starting Aug. 4, two new late-night talk shows from heavyweight syndicators Columbia TriStar and Buena Vista Television will enter the competition to target the young, multicultural audience abandoned three years ago with the demise of Arsenio Hall’s show.

Columbia TriStar’s entry is Vibe, described by co-executive producer Quincy Jones as “hip TV for a hip generation.” Host is Chris Spencer, a little-known stand-up comedian.

Buena Vista’s offering, The Keenen Ivory Wayans Show, features the former star of In Living Color, who has also starred in a number of theatrical releases.

Officials of both shows say there is a large audience waiting to be drawn back to late night, and advertisers and stations seem to agree. Both Wayans and Vibe are cleared in more than 90% of the country; advertisers say both shows likely will attract the desired demographics.

“Part of the problem is that everyone has been repeating what is already on.” Wayans says, “We don’t intend to reinvent late night, but rather bring it up to date, just as [David] Letterman did when he came on. Now Letterman has become conventional, and I think there is an opportunity for a different act.”

Both Vibe and Wayans have pluses and minuses. Vibe has Quincy Jones behind it. His reputation and contacts in the music industry are unmatched, analysts say. Also, Columbia TriStar, along with Jones and fellow executive producer David Salzman, got a jump on Buena Vista.

Vibe was unveiled by Columbia TriStar at NATPE in January, with producers and talent all but set for the launch. That same month Buena Vista was selling a weekly late-night show with former National Basketball Association player John Salley as host. Buena Vista dropped Salley for Wayans shortly after the convention, bringing in English production company Planet 24 and co-executive producer Charlie Parsons to get the show ready for a late-summer launch.

“I guess the question is how much time do you need to put something together?” asks Katz Vice President and Director of Programing Bill Carroll. “I’ve seen shows that have been successful that have been put together in a short time and I’ve seen things that they’ve spent years on that have failed. We’ll just have to see.”

Vibe’s apparent weaknesses seem to be Wayans’s strengths. Carroll and others say Wayans is close to being a household name, while Spencer is not. Jones, who says he’s not worried that Spencer is an unknown commodity, notes that Spencer comes with little “baggage.” Wayans says he may also have a leg up on the competition because of the syndication outlets quickly secured by Buena Vista. Wayans will he on Fox O&Os, while Vibe is carried in the major markets mainly on UPN affiliates.

“Some people perceive being carried on the Fox O&Os as being a better place to be.” Carroll says. “But those stations that are now UPN affiliates were the same stations that Arsenio was carried on and the audience found him.”

It appears that the shows will feature similar content. Both will have bands, live studio audiences and big-name stars. But neither program will admit to a late-night war.

“You can’t look over your shoulder,” Wayans says. “You have to focus on what you are doing. Is there room for both of us? Absolutely.”

Fox, Disney Bidding for Classic Sports

News Corp. reportedly has inside track, but talks continue with ESPN; a third bidder is possible

By John M. Higgins

NEW YORK

Classic Sports Network has become the latest front in the war between News Corp. and The Walt Disney Co., with units of the two companies bidding to acquire the vintage sports clip channel.

Sources familiar with the negotiations say that News Corp.'s Fox/Liberty Sports venture has the lead in the negotiations. However, one source familiar with the discussions says that a Fox deal isn't close, and that Classic Sports is in talks not only with Disney's ESPN but also with a third bidder whom the source wouldn't identify.

The Fox negotiations call for merging the vintage net into the 10-million-subscriber NewSport, which is slated to convert into a Classic Sports clone, American Sports Classics. The deal would include some cash to buy out one investor, but would give investment bank Allen & Co. and other investors a continuing minority interest in the operation.

Sources say Classic Sports chairman Brian Bedol wants to continue running the programming side of the channel.

However, ESPN simply wants to buy the network outright for an undisclosed amount of cash. Judging from the value of other recent network deals, the 10-million-subscriber Classic Sports would be worth more than $150 million.

Fox and Liberty parent company Tele-Communications Inc. met last week with Bedol and 40%-owner Herb Allen at investment banker Allen & Co.'s annual summer camp for media elite in Sun Valley, Idaho.

This is the third Fox-Disney bidding contest in the past three months, as Disney seeks to ward off attacks on its two most lucrative franchises—sports and kids entertainment. Disney lost out to News Corp.'s $1.9 billion bid for International Family Entertainment Inc., whose Family Channel will be reprogrammed as a children's network 12 hours a day.

Disney even bid higher than Fox/Liberty's $850 million bid for a 40% stake in Cablevision Systems Corp.'s Rainbow Sports operation. Disney lost anyway.

Bedol had clashed with Fox/Liberty Sports over American Sports Classics, a proposed 50-50 venture with Rainbow Sports, before its proposed launch this month was indefinitely delayed.

But Bedol primarily was angry with Rainbow, which was running American Sports Classics. He gets along better with Fox/Liberty executives, who are taking control of the channel.

@Home IPO zooms

NEW YORK—High-speed Internet service @Home Inc. became a high-speed Internet stock Friday, more than doubling after its initial public offering.

When trading opened Friday morning, @Home's stock jumped from the $10.50 IPO price to $25.50. Big demand delayed trading for more than two hours. After the initial spurt the stock settled down to $19 per share at midday.

@Home, which has developed services to be delivered through cable systems via high-speed modems, was valued at more than $2 billion at the $19 share price. The company is controlled by MSOs Tele-Communications Inc., Comcast Corp., Rogers Communications Inc. and Cox Communications Inc., plus venture capital firm Kleiner Perkins Caufield & Byers and several computer equipment companies.

Lead investment banker Morgan Stanley Dean Witter had repriced the offering Thursday night, from $9 each for the 9 million shares to $10.50 each.

The deal gives @Home $94.5 million in cash and sets the foundation for future stock sales if the company can keep the stock price up.

TCI selling headquarters

DENVER—Tele-Communications Inc. has put its suburban Denver headquarters up for sale, partly in search of better space but also to pocket some cash.

TCI says that its chief need is to organize its 600 local employees better. However, exercising an option to buy the building and then selling it could generate a quick profit of $10 million-$20 million.

TCI leased the 12-story building—which had been in foreclosure—in 1990 with an option to buy it for $13 million. In the depths of the savings and loan crisis that harvested Denver real estate then, that came to just $56 per square foot, or about 40% less than the cost of constructing a similar building from scratch.

Randy Swearingen, a commercial broker in the Denver office of Grubb & Ellis, says that the Denver Tech Center in Englewood (where TCI is located) is the hottest area in the local market, with one nearby high-end building fetching $142 per square foot. "They'll clear $100 easily," he says, adding that under the right circumstances the headquarters could bring $150 per foot.

Fox’s big ‘Roar’?

Network hopes medieval drama will give summer a boost

By Lynette Rice
HOLLYWOOD

Tonight’s premiere of *Roar* on Fox could turn up the volume on a summer programing strategy that has hardly given the network a reason to shout.

While Fox has posted ratings increases over last summer—its 4.6 rating in households is up 2%, while adults 18-49 is up 7%, to 3.1—the strategy of offering up to 40% new programing this summer has yet to take Madison Avenue by storm. *Pacific Palisades*, already targeted for cancellation, has averaged only a 3.5/6 HH and 2.2/7 in adults 18 to 49, while *Ruby Wax* has averaged a 3.0/6 HH and 1.9/7 in the key adult demo.

*Beyond Belief: Fact or Fiction* and the prime time runs of *Mad TV* have fared better, but not much better, than the established Fox franchises: *Beyond Belief* has averaged a 4.4/9 in HH and 3.1/12 in the key adult demo, while *Mad TV* has hovered around 3.8/7 HH and a 2.5/9 in 18-49. While Fox’s broadcast of the Major League All-Star Game on July 8 provided a decent promotional opportunity for *Roar* and the rest of the network’s summer lineup, the 11.8/21 HH it earned was the lowest-ever prime time telecast for the game since 1953.

“I don’t think there has been anything [on Fox] for our side of the street to say. ‘Wow, isn’t that brilliant?’ There have been disappointing results...there’s nothing yet that says this is working,” says Bill Crousdale of Western Media. “Yet everybody applauds its efforts to try to bring viewers back to the broadcast networks, particularly in these doldrums—the third quarter.”

Undaunted, Fox Entertainment President Peter Roth has reiterated the network’s long-term commitment to develop year-round original programing to stem the tide of audience erosion.

“I think we all agree that as an industry, we can no longer afford to keep shutting down for the summer,” Roth said at last month’s affiliates meeting in San Francisco. “We’re driving viewers to non-broadcast choices.”

Says Crousdale: “Basically, it boils down to so many options out there today. It’s almost impossible to attract people to come back and watch a series...unless it gets a lot of buzz right from the get go.”

Synergy within Universal, producer of *Roar*, could provide the necessary buzz for the cornerstone of Fox’s summer strategy. The medieval drama from Ron Koslow (*Beauty and the Beast*) and Shaun Cassidy (*American Gothic*) marks the first time that Universal has looked to its amusement parks for serious cross-promotion: the 35,000 to 40,000 people who visit the company’s parks in California and Florida each day are greeted by *Roar* billboards, banners, cups and napkins. Fox also has its own campaign in full swing.

“I couldn’t be more excited about launching at this time,” says Ken Solomon, president of Universal TV’s network division. “We have something that stands out even amongst other shows that we’re launching. We are on our own, and all the attention is being paid to us. People watching television in the summer crave something different.”

Reviews for *Roar*, nicknamed *Braveheart: The Series*, have been upbeat, with kudos going to Fox for having a “no-fear attitude” toward innovative programing. The investment is certainly there—Fox ordered 13 episodes of the drama, which costs roughly $1.3 million per hour to produce.

“It’s always difficult to launch a new series in the anticlimactic period after May sweeps,” says Audrey Steele, Zenith Media. Citing ABC’s *Covington Cross*, launched—and subsequently canceled—in 1992, Steele adds, “[*Roar*] is the type of show that has been tried in prime time, yet without the difficulty of launching in summer. But I think it can do well, especially with a younger audience.”

---

Showtime prepares for next PPV round

NEW YORK—It’s official: Mike Tyson will be a pay-per-view non-event for a year. When the Nevada Athletic Commission revoked Tyson’s boxing license for noshing on Evander Holyfield’s ear, Showtime Event Television and cable operators were deprived of their biggest pay-per-view draw for at least a year, prompting the cable network to regroup.

“Mike Tyson out of the boxing business is a PPV loss, on a revenue basis,” says Mark Greenberg, SET’s executive vice president of sports marketing.

“But Holyfield has some reasonably good PPV days ahead of him.”

The problem is that Holyfield lacks formidable challengers who could match the 1.9 million PPV buys and $95 million revenue of Holyfield’s most recent Tyson matchup. Tyson is consistently the biggest draw in pay per view.

Greenberg notes that when Tyson went “on hiatus” while in prison for raping a beauty pageant contestant, Showtime did good business with lighter-weight fighters, particularly Julio Cesar Chavez. Sources say the network hopes to set up a middleweight PPV fight as early as August.

Holyfield has tended to take long rests between fights, but Greenberg says that Holyfield might get back in the ring as early as November. Another boxing executive dismissed that as “hopeful.”

Showtime did not disclose ratings for a full replay of the bout on the pay cable network last Monday. The network had been screaming copyright infringement at CNN, ESPN and Court TV, which carried the PPV footage in full as it was played during an athletic commission hearing.

Discovery in, A&E out at BBC

By Lloyd Shepherd
LONDON

Bob Phillis, the British Broadcasting Corp.'s deputy director general, said last week that the BBC's longstanding co-production relationship with A&E in the U.S. "will have to change" as a result of the BBC's new joint-venture agreement with Discovery Communications.

Phillis, speaking at a status report briefing on the ongoing negotiations over the Discovery venture fine print, said the BBC would, however, seek to preserve its distribution relationship with PBS. Under the Discovery joint venture, a new 50-50 distribution entity will be formed. The new entity will negotiate U.S. program co-production agreements and will itself be a co-producer.

A&E is the BBC's biggest U.S. co-production partner, working on such heavyweight BBC dramas as Pride and Prejudice and Ivanhoe. An A&E spokesman said only 5% of the channel's programing comes from the BBC. "We wish the BBC well in its new venture," he said.

Phillis and Discovery Chairman John Hendricks said the joint-venture agreement covered five areas: establishment of an umbrella company; launching of international joint-venture channels; establishment of a distribution company and co-production entity; launch of a BBC Americas entertainment channel in the U.S., and a 20% stake for the BBC in Discovery's U.S. Animal Planet channel. The BBC is putting no cash into the overall deal, but will contribute creative and management resources. Its programing will be available to the new joint-venture channels at a market rate, but will not be available to competing services.

Hendricks said removal of potential competition was the BBC's main contribution to the deal. Phillis and Hendricks confirmed the Oct. 6 launch of two joint-venture channels in Latin America: Animal Planet and People & Arts.

DENVER

Daniels & Associates & Associate?

Daniels & Associates is looking anew for a partner. The long-time cable investment banker wants to ally with a larger firm to serve clients with bigger asset sales and financings. While the Denver-based firm has handled system sales as large as $650 million in recent months, the very biggest sellers turn to Wall Street. Operators also turn to the Street when they need to sell big slugs of bonds. The discussions—and recent health problems of 77-year-old founder Bill Daniels—have spurred rumors that the firm is ready to sell. "Daniels & Associates is not for sale," says President Brian Deevy. "We've had discussions about things we can do together with investment banks, commercial banks and such." Daniels had a similar, although abortive, partnership with Salomon Bros. until 1990.

LOS ANGELES

Parting shot?

Someone in or near Fox's press department may be taking this "Fox Summer Blast" campaign a bit too seriously. A bogus press release sent to reporters last week claimed that the arrival of new brass in the network's marketing department was the reason that five members of the press and publicity department are leaving. The error-ridden memo did tip reporters off to a possible hire—that of Tom Tyrer, a former publicist for Televi who's about to take over as VP of public relations, replacing the departing Mark Kern. Whoever penned the memo wanted to get somebody's goat—the anonymous writer referred to Fox as the "struggling weblet."

**Top of the Week**

**Tie goes to the liquor industry**

**Hundt’s plan to probe hard-liquor ads strikes out**

**By Chris McConnell**

**WASHINGTON**

In a rare tie vote, FCC Chairman Reed Hundt’s push for a commis-
sion inquiry into hard-liquor advertising went down the drain last week.

As expected, the four commissioners split over the plan to gather in-
formation about broadcast advertising of distilled spirits. Hundt and Commissioner
Susan Ness voted for the inquiry, with commissioners Rachelle Chong and
James Quello voting against.

Quello and Chong frequently have sided against Hundt and Ness on broad-
cast-related issues. But last week’s open meeting was the first at which the two
sides voted against each other rather than striking a compromise or tabling
the issue. The tie vote prevents the hard-
liquor inquiry from moving forward,
since a majority vote is required for the
FCC to act.

"The government is already taking
responsible action," Quello said, citing
ongoing Federal Trade Commission
investigations of televised alcohol ads.

The FTC is investigating alcohol ads
run by Joseph E. Seagram & Sons and
Stroh Brewery Co. and also has gath-
ered information from Miller Brewing
and Anheuser-Busch.

Quello said he would be willing to
consider an inquiry if the FTC were not
already conducting its investigation.
Quello later suggested he would be will-
ing to reconsider the issue once the FTC
wraps up its probe. "Let’s get the results
of the FTC [investigation] first,” he said.

Hundt made much of those remarks,
stating at a post-meeting press confer-
cence that a majority of commissioners
now feel the FCC has authority to act in
response to hard-liquor advertising.

"I think today’s vote was a big defeat
for the hard liquor industry," Hundt
said. He added that if the industry inter-
prets the tie vote as a green light to crank
up its broadcast advertising effort, "they
will be whistling past the graveyard."

But Quello later warned that Hundt
"shouldn’t over-interpret what was a
rather neutral statement.” While not
ruling out the prospect of later FCC
action, Quello also said that the FTC’s
investigation might resolve the issue.

"It depends on what the report says,"
Quello said.

The tie vote followed about an hour
of debate among the four commis-
sioners. Chong, who last month pulled
a vote on the inquiry from the FCC meet-
ing agenda, said the FCC has no busi-
ness looking into advertising for a legal
product aimed at adults.

**FCC wants channels 60-69 back**

**WASHINGTON**—The FCC last week took the first step toward reclaiming
channels 60-69 from broadcasting.

Officials proposed dedicating four of the 10 channels to public safety
applications and devoting the rest of the spectrum to fixed and mobile
communications as well as broadcasting. The FCC plans to auction the
spectrum that is not assigned to public safety, although auction rules were
not included in last week’s proposal.

"This is the fruit of our hard work and creativity in the digital television
proceeding," FCC Chairman Reed Hundt said. In its DTV channel assign-
ment plan, officials limited new TV assignment in the 60-69 band so that
the spectrum could be reclaimed and auctioned.

Several broadcasters since have asked the FCC to place more digital
TV stations in the 60-69 range to reduce interference in various markets.
Last week, Commissioner James Quello said that option remains open.

"I want to emphasize...that the item protects full-power broadcasters
operating in this spectrum, and retains the commission’s right to add
traditional broadcasters to this spectrum if we determine that such use is
necessary to ensure a smooth transition to DTV," Quello said.

Last week’s proposal also invited comments on “alleviating” the reallo-
cation’s impact on low-power TV and translator stations operating in the
spectrum.

—I think the notice goes beyond a
simple fact-finding,” Chong added,
maintaining it is not neutral to assign
responsibility for a social problem to
broadcasters.

Ness maintained that the FTC investi-
gation will not give the public a chance
to participate in the debate on the issue.
"There is no evidence the FTC is going
to be issuing a report," Ness said. She
also maintained that the FCC was only
looking to gather information.

"I cannot understand how anyone
could conclude...that the commission
cannot even conduct an inquiry." Ness
said.

Chong countered that public debate
on the issue should occur in Congress
rather than at the commission. Quello
later added that FTC Chairman Robert
Pitofsky had told him that the FTC
would be supplying a report on its
investigation to the commission.

Also jumping into the fray was Mass
Media Bureau Chief Roy Stewart. In
an unusual display (commission offi-
cials generally speak at meetings only
to summarize proposals or answer
questions by commissioners), Stewart
voiced concern about the link between
hard-liquor advertising and underage
drinking. He also urged commissioners
to support the inquiry.

"Until somebody preempts us, I
think we should try to do something,"
Stewart told the commissioners. "I just
felt I had to say that."

The tie vote drew cheers from broad-
casters and advertisers and jeers from
other groups that had been pushing for
FCC action.

"I am hopeful that once the new
commission is appointed, it will be
resolved to aggressively tackle this
growing assault on America’s kids," said
Representative Joe Kennedy (D-
Mass.). “[Quello and Commissioner
Chong have made a mockery of the
commission’s responsibility to require
that broadcasters service the public
interest,” added Alcohol Policies Pro-
ject Director George Hacker.

Praising Chong and Quello was
NAB President Eddie Fritts, who said
the proposed inquiry “would have rep-
resented a solution to a problem that
does not exist.

“We are extremely pleased,” added
Fred Meister, president of the Distilled
Spirits Council of the United States.

—CM
When you put life into perspective, you realize how little time there is to do something truly significant to further our industry's growth through good times and bad. Thankfully, all of us now have that opportunity by contributing our time, our energy and our financial support to "The National Cable Television Center and Museum". Based in Denver, this global institution will educate professionals, students and the public. It will preserve historical and contemporary information, demonstrate future services and produce programming about cable telecommunications for audiences around the world. We have all helped our industry grow and we've done well financially. However, let's never forget how good this business has been to us. With that in mind, please be generous in your support of The Cable Center.
Ornstein on obligations

By selecting Norman Ornstein to co-chair an advisory committee to detail broadcasters' public interest obligations in the digital age, the White House has predetermined that free broadcast time for political campaign will be prominent in the committee's deliberations.

A resident scholar at the conservative Washington think tank American Enterprise Institute, Ornstein has long advocated providing free time to candidates as part of overall campaign financing reform.

As this interview shows, Ornstein shares FCC Chairman Reed Hundt's belief that TV stations ought to provide free TV time or other concrete benefits to the public in exchange for the second channels they are receiving from the government for digital broadcasting. This like-mindedness may be more than coincidence. Ornstein and Hundt have talked communications policy as longtime friends and suburban Washington neighbors. Ornstein's wife, Judy Harris, went to Yale Law School with Hundt and worked for a time as the Hundt FCC's Hill lobbyist.

Ornstein, who was nominated for the advisory committee by the League of Women Voters, says he doesn't know if Hundt was a factor in his selection.

Do you see yourself as a counterpoint to your co-chairman [CBS Entertainment President] Leslie Moonves?

No, I certainly don't. We are co-chairs. We will cooperate on this. I'm sure we come from different places and different perspectives, but we've known and respected each other for a long time. I don't think either of us has defined how the advisory committee will work logistically. But we both see the general perspective here: There is some public interest obligation that comes with the granting of these digital television licenses. We need to indentify what it is and how it might work. We won't have any trouble working together on that.

So you believe that broadcasters serve the public interest by serving the marketplace?

Basically, I believe that there is an obligation that goes beyond just serving the marketplace. What we have here is a hugely valuable public resource that is being given to broadcasters. If I had my druthers, it would have been wise to have auctioned the [digital channels] off as we have other parts of the spectrum. I believe in allowing the marketplace to work. We didn't do that. We worked out a fairly complex process of transition in granting these valuable assets, but it seems pretty clear to me that whatever the channels are worth—$10 billion or $70 billion—they are worth a lot and there is an obligation that comes with it. And one part of it is very likely to be broadcast time for political campaign purposes. How much and what fashion are going to be the questions, rather than whether.

Your preference would have been to auction the channels?

Yes. You can handle that in a couple of ways. You can auction with some specific obligation built in and have people take that into consideration when they make their bids; or you could auction the channels and use the proceeds in whatever fashion the government believes would serve the public. But that's not going to be done at this point.

Because you've been an outspoken advocate of campaign finance reform, can we assume that free political time is at the top of your personal list of public interest obligations for broadcasters?

There is no question it goes at the top of my list. As I've looked at broader ways of dealing with the serious problems we have with campaign finance, I've seen free broadcast time as part of the solution. I've joined with scholars and others in proposing the concept on a broadcast bank. I think it's workable. I don't believe that you can simply give time to every federal candidate. That doesn't work. You have to have an allocation system. You've got to do it in a fair and balanced way.

Reed Hundt has talked about broadcasters devoting five percent of their time to public interest programming. How does that number sit with you?

At this point, I don't know. Reed Hundt has spent a lot more time looking at the specifics than I have. I'm going to have to study some of the technological questions [relating to] what the digital spectrum means and might mean down the road.

What other public interest obligation might the committee come up with? How about educational programming?

I honestly don't know the answer to that. The educational area is clearly a major one. But I don't know who else will be on the advisory committee. Certainly we ought to discuss any area that people are interested in bringing up and figure out what makes sense and what is most in the public interest. And in the end we have to mesh with whatever is going on at the FCC and in Congress.

Are you going to be involved in the selection of the 13 other committee members?

Probably not. That's an ongoing process within the administration. They will pick the members. I've indicated some general areas that ought to be covered. I certainly hope there is a prominent legal scholar who is particularly conversant with all the constitutional questions.

Let's talk about one of those constitutional questions: the First Amendment. Is it right to intrude on what broadcasters say or how they say it? To take away three pages of a newspaper for free political advertising is unthinkable.

My understanding is that the last thing you raised would fall into the assertion that this could be a taking issue—a Fifth Amendment issue, rather than a First Amendment issue. As I understand it, it is pretty clearly established that there is no taking issue here. When broadcasters apply for licenses or renewal of licenses they make it clear that this is not an issue of property rights.

* Under the proposal, broadcasters would contribute dollars or on-air minutes to the "bank" based on their total advertising revenue. The bank also would raise money from spectrum auctions and from the fees broadcasters must pay on any nonbroadcast use of their digital spectrum. The bank would turn over some of the dollars and minutes to the major political parties for distribution to their candidates and some directly to candidates who meet campaign fund-raising guidelines.
This partnership will double the strength of your advertising very efficiently.

T a u z i n s e e k s ‘ f r e e - t r a d e z o n e i n o u t e r s p a c e ’

By Paige Albiniak

WASHINGTON

The administration should get behind making the international satellite spectrum a "free-trade zone in outer space," House Telecommunications Subcommittee Chairman Billy Tauzin (R-La.) said at a satellite symposium on the Hill last week.

Tauzin said the administration has already embraced a similar idea, the "free-trade zone for electronic commerce" in senior administration official Ira Magaziner’s policy paper on regulation-free electronic commerce, released last week.

The "free-trade" idea is not completely new in Congress, House Commerce Committee Chairman Thomas Billey (R-Va.) and Commerce Subcommittee ranking member Edward Markey (D-Mass.) last month introduced legislation that would privatize intergovernmental satellite organizations Intelsat and Inmarsat.

Tauzin, Billey and Markey want to ensure that once privatized, Intelsat and Inmarsat will allocate international spectrum in a "fair and just way," says one Hill staffer. Intelsat and Inmarsat currently receive spectrum allocations from the International Telecommunication Union, an agency of the United Nations. The consortiums then distribute this spectrum on a first-come, first-served basis. Without legislation, these consortiums could decide to auction that spectrum for profit—which could limit use of that spectrum.

The issue has far-reaching implications. Senate budget legislation forbids the FCC from auctioning off international satellite spectrum, but the House legislation does not address the subject. If Congress adopts the House version of the budget bill, the FCC could be free to auction the spectrum to raise money for the federal treasury.

Tauzin hosted a day-long satellite technology exposition last Wednesday for members and staff of the House Commerce Committee. Companies including EchoStar, Primestar, Direct TV, USSB, PanAmSat, Loral and Hughes exhibited direct-to-home, broadband, Internet and multimedia technologies.

FCC to ABC

The FCC Mass Media Bureau’s digital TV point man has taken his DTV experience to ABC, Saul Shapiro, previously the bureau’s assistant bureau chief for technology, joined the network last Thursday as vice president for broadcast technology. He will be working on the network’s transition to digital broadcasting, reporting to ABC President of Broadcast Operations and Engineering Preston Davis. At the FCC, Shapiro spearheaded the bureau’s efforts to write rules for the new broadcast technology.

In another FCC job shift, James Coltharp of Commissioner James Quello’s office is joining Comcast Corp.’s Washington office as senior director, public policy. Coltharp, a legal adviser to Quello since May 1996, will be representing his new employer before the FCC and Congress.

Wiley gets lifetime achievement Emmy

Richard Wiley, the former FCC chairman who headed the nine-year effort to recommend a new TV transmission standard to the FCC, is winning an Emmy for his work. Wiley this week will receive the Charles F. Jenkins Lifetime Achievement Emmy Award.

Hands off local rights-of-way

A committee assembled to advise the FCC on state and local regulatory issues wants the commission to keep its hands off local regulation of public rights-of-way. “The FCC should not be tempted to act precipitously to preempt state and local governments unnecessarily,” said the FCC Local and State Government Advisory Committee.

FCC officials currently are reviewing a Tele-Communications Inc. request that the federal government preempt telecommunications rules in Troy, Mich. FCC officials doubt the commission will take such an action in response to the city’s rules. Although the advisory committee’s policy statement does not mention the Troy case by name, the group said it was submitting its statement before the commission makes its decision on the Troy case.

Strategy, Communication, Performance
NBC will be the decisive winner again; NBC's ER, the leading program; NBC's Veronica's Closet, the top new series. But surprisingly, ABC will win most nights of the week. These are the key findings of Broadcasting & Cable's sixth annual survey of advertising agency experts who are handicapping the new prime time season.

The highlights of the latest forecast by ad agencies with aggregate prime time network TV billings of more than $2 billion: The peacock network will win the prime time competition for the third consecutive season by 1 share point over ABC and CBS (which will tie for second), followed by Fox, and followed distantly by UPN and The WB.

NBC's win will be pegged largely to the overwhelming performance of its Thursday night programs, predicted to average a 30 share, 17 points higher than second-place CBS on that night.

ABC, which is not forecast to win the season, is predicted to dominate four nights of the week, mainly on the strength of Monday Night Football and of 20/20 on Friday.

CBS, which will be strong throughout the weekend, is predicted to win Saturday and Sunday.

Fox, blown away on Thursday (as are all other networks) by NBC, will recover on Friday, Sunday and Wednesday.

NBC's Thursday night ER, the top prime time scorer since the 1994-95 season, again will command the highest average share of all programs. Veronica's Closet, which brings Kirstie Alley (Cheers) back to a network TV series, is scheduled for Thursday's charmed time period between NBC's Seinfeld and ER. The show is picked to attract the highest share, 28, of 43 new series and to be one of 1997-98's solid hits.

Others falling into the "hit" category among the new shows are ABC's Union Square, an ensemble comedy, with a predicted 24 share, and ABC's Hiller and Diller, starring stand-up comic Richard Lewis and Saturday Night Live alumna Kevin Nealon as comedy writers, with a 19 share forecast.

Analyzing the networks one by one, the survey says that ABC will offer the season's most aggressive schedule: five new comedies and five new dramas, plus the return of The Wonderful World of Disney's two-hour Sunday movie. ABC, which has made changes every night of the week, doesn't have a single show at 8 p.m.—the key hour that opens every prime time evening except Sunday—that was in the same time period a year ago.

CBS, with three new dramas and three new comedies (plus former Today Show host Bryant Gumbel in a news magazine), seems to be trying to woo younger viewers on Fridays.

Two long-running series acquired from ABC, Family Matters and Step by Step, will anchor CBS's new Friday night comedy block. These sitcoms are paired with two new shows: Meego, starring Bronson Pinchot (Perfect Strangers) as an alien nanny, and The Gregory Hines Show, with Hines as a widower raising a 12-year-old son.

Fox comes into 1997-98 with five new shows—three dramas and two comedies—the smallest new slate of any of the four major broadcast networks. Nine series are returning. The new dramas all are co-produced by 20th Century Fox Television, which, like Fox, is owned by News Corp.

Fox's Sunday lineup returns unchanged with a rotating program of video clips, World's Funni-
Broadcasting & Cable  July 14 1997

The new season from top to bottom

If Broadcasting & Cable's 1997 ad agency forecast is correct, this is how the new TV season will end up next spring. Shows are ranked by share, from 1 to 120. New shows are in red.

Live action high school sitcom from The Simpson's producers

ext... leading into The Simpsons, King of the Hill and The X-Files. On Thursdays, which agency experts say will be Fox's least competitive night, the network is fielding two comedies and a drama, all new.

NBC's new season includes 18 comedies, six of which are new (plus two new dramas). Surprisingly, NBC has made changes every night of the week. In addition, several returning comedies are moving to new nights after benefiting in previous seasons from exposure in the network's dynamite Thursday night lineup. Eliminated in the new season is one of NBC's two prime time movies, while a fourth hour of the news magazine Dateline NBC has been added.

According to handicappers, NBC will be weakest on Sunday and Monday. On Monday, the network is counting on a quartet of young female stars: Brooke Shields (Suddenly Susan), Sharon Lawrence (Fired Up), Lea Thompson (Caroline in the City) and Tea Leoni (The Naked Truth). Leoni will be counterprogrammed against ABC's male-targeted Monday night, which features NFL football.

UPN has scheduled three new comedies for September (later filling its nights on Thursday with a science-fiction film, starting in first quarter 1998). A fourth comedy new to UPN is Clueless, which is a pickup from ABC.

The upcoming season on The WB features two new comedies (its...
The following chart shows advertising agency consensus on share estimates and nightly averages for the six broadcast networks for the 1997-98 TV season. Shares of 10 leading agencies were averaged. Sources for the data requested confidentiality for competitive reasons. The prediction for the new season in household shares is NBC by a length over a deadlocked ABC and CBS, with UPN and The WB bringing up the rear. Not surprisingly, NBC's latest addition to its Thursday night powerhouse, Veronica's Closet, figures to be 1997-98's top newcomer. But agency experts think ABC will rebound sufficiently to win four nights of the week.

New show titles are in red, returning shows occupying a new time period are in italic; projected winner of time slot is tinted yellow.

We created these shows to bring joy to the cheerless, laughter to the downhearted, and milk through your nose.

A great woman once said, "What the world needs now is love, sweet love." We beg to differ. What the world really needs is funny cartoons. That's why we're committed to creating hilarious, original programming. In fact, we're premiering a whole bunch of hilarious Cartoon Network Originals this month. We've got two brand-new series, "Johnny Bravo" and "Cow and Chicken," and all-new episodes of "Dexter's Laboratory." So join in the fun and launch the network with great original programming that will keep your customers tooned in to cable. But remember: This is serious comedy. Think before you drink.

The Newsmagazine Outlook

Among other nuggets found in this year's forecast: Monday, 10-11 p.m., is one of the more competitive time periods because Monday Night Football will bridge Steven Bochco's new Brooklyn South for CBS and the new Dateline NBC are going head-to-head.

It's a seesaw night on Wednesday for NBC. The survey estimates that 3rd Rock from the Sun, moved from Sunday night, will rise 4 points above the new comedy Built to Last's 8:30-9 slot, while the returning Law & Order will jump 5 points from its lead-in, the Fred Savage comedy vehicle Working.

ABC's new edition of 20/20 on Thursday night is given only a 13 share in the forecast (opposite ER), compared with the returning Friday edition's 23 share estimate.

The lowest forecast for a new NBC show is for the African-American comedy Built to Last, with an 11. The Tony Danza Show, which has the star returning to sitcom TV as a sportswriter raising two daughters, is predicted to score a 12 share.

The unprecedented 10 news magazines, including new editions of Dateline NBC and ABC's 20/20, as well as the new The Bryant Gumbel Show on CBS, will average a 17 share, a solid number.

Timecaps from Universal, ABC's football companion on Monday nights, is a projected 11 share performer, 15 less than its lead-out.

Bob Newhart and Judd Hirsch, returning to the sitcom scene in George & Leo, support the end of the CBS Monday night comedy block.
of Cosby. Everybody Loves Raymond and Cybill. Police drama Brooklyn South tops the night for CBS with a predicted 18 share in what used to be the Chicago Hope slot.

The addition of David Caruso (Michael Hayes) and Danny Aiello (Dellaventura) to the CBS Tuesday night lineup, according to the forecast, will not be enough to outpace ABC’s 9-11 schedule of Home Improvement, Hiller & Diller and NYPD Blue.

ABC sophomore Spin City, an adult-audience show in a new early-evening time period, Wednesday at 8, will battle The Nanny on CBS for the time slot win. Spin will give ABC the war, while the remini of Dharma and Greg sitcom a sufficient lead-in to compete with CBS’s returning Murphy Brown.

According to the agencies, Chicago Hope, in its new Wednesday 10 p.m. time period, will be beaten by both ABC’s PrimeTime Live and the veteran Law & Order on NBC.

ABC is in for a tough Saturday night with its lineup of C: 16 FBI, Total Security and The Practice, three hour-dramas. They will compete, not with CBS and NBC for the nightly win, but with Fox for third place.

Thursday and Friday nights will see the most new shows with seven each night. The Thursday schedule includes four new comedies and three new dramas. Five comedies and two dramas debut on Friday.

No comedies are scheduled for Saturday, but the night will have three new dramas. The score for new series on Wednesday is comedy four, drama zero.

Last season may be remembered best for the end of network runs of five long-running sitcoms: Coach and Roseanne on ABC. Married With Children and Martin on Fox and Wings on NBC. The season also was marked by ABC losing 13% of its audience and the Big 4 networks collectively losing 6%. NBC took its 10th consecutive sweeps victory. During the February sweeps, the peacock network aired theatrical feature “Schindler’s List,” which proved to be the highest-rated movie on TV since “Jurassic Park,” another Steven Spielberg movie smash. aired during the May sweeps two years earlier.

What will distinguish the upcoming season? The introduction of new prime time viewing nights by UPN and The WB; the continuing dominance of sitcoms as prime time’s most popular genre, and maybe NBC’s attempt to challenge the reigning CBS Monday comedy block with one of its own.

Take the Industry By Storm

High-powered graphic workstations with ultra-fast processing are taking the industry by storm. A full "weather station in a box," these powerhouses provide graphics, radar, looping and realistic animation depicting lightning-fast weather changes in real time.

With more breakthroughs on the horizon than ever before, on October 27 Broadcasting & Cable looks at the ever-changing world of weather systems. We'll present the latest advances and examine how key news providers are utilizing various systems.

If you manufacture weather systems or related software, you'll want to be part of this issue. Your message will reach 35,000 key industry decision-makers, including top news directors and GMs. To take advantage of the best advertising opportunity under the sun, contact your sales representative to reserve your space today.

ABC angling for long-term deals

Perpetual licenses would keep hit shows from straying

By Lynette Rice

As ABC looks to revamp the way it renegotiates license fees for hit shows, Disney Television is preparing the creative community for long-term deals with the network.

Disney TV—on its way to becoming the in-house production unit for Disney-owned ABC—is asking show creators to pre-approve a perpetual license with the network, quashing any future chances to peddle hit shows elsewhere if bargaining talks break down in the fourth or fifth year, sources say. Successful renegotiations are relied upon to resolve steep show deficits.

Creators "ride the profit garnered by the production company. Disney's own greed keeps them honest," says one agency source. "But when it makes a deal with ABC, it's the same company. They are no longer motivated to extract as much."

Skyrocketing license fees this development season had already prompted ABC to request renegotiation with studios after five years rather than the standard four. Lengthening the time between renegotiation means putting off—for one more year at least—the inevitable cost increases of a hit show. The studios balked at the last-minute request this year but saw it as a warning for what's to come next season. Other networks are expected to make similar requests.

Some believe the Disney contract demand is in response to the recent lawsuit filed against the studio by Windy Dancer Productions. The suit alleges that Disney didn't act in good faith when renegotiating Home Improvement's deal with ABC. Yet other industry sources

Povich's new show cleared in 20 of top 25

Universal Television Enterprises has wasted little time in clearing its version of the Maury Povich show, which will debut in fall 1998.

Since the reported $10 million-a-year deal with Povich was struck in May, Universal has cleared the show soon-to-be named version in 20 of the top 25 markets. Povich's current show, distributed by Paramount Domestic Television, will continue under the Paramount flag for one more season.

Universal officials say multiyear deals with station groups representing 56% of the nation were signed within a month of Povich's move. Steve Rosenberg, Universal's head of sales, says 90% of stations cleared for Povich's new show run the current version.

"We thought the right thing to do would be to go to the incumbent stations first and that's what we did," Rosenberg says. "I'm one who believes if it already works in one place, why change it?"

Povich will continue to be carried on WNBC (New York), WGN-TV Chicago and KCAL (Los Angeles). Sources say Universal was looking for $40,000-$50,000 weekly cash license fees for the show in the big three markets. Financial terms of the deals were not released.

As for changes in Povich's show after the transition in 1998, Rosenberg says there won't be too many: "We'll probably take out the clutter and quicken up the pacing like we've done for other shows we've acquired," he says. "Probably just a little fine tuning overall."
defend the studio, saying long-term deals are not a new concept in the absence of the financial interest and syndication rules.

"This is not a heavy-handed thing on the part of the studio. It's sort of lets everyone agree now to a concept as to how the true value [of a show] can be measured when it gets down to the end of a normal term," says one high-ranking network executive in business affairs. "It makes eminent sense. "I'm not shocked it is happening," the source continues. "There are very few shows that have become instant hits. Seinfeld was not a hit in the first year. It takes longer to get to a position where a show is a certifiable hit; and meanwhile, the networks are making all of the investments in the first couple of years."

**Twentieth signs More-Medavoy, Levitan**

**Studio gains access to acting, producing talent**

By Lynette Rice

Twentieth Century Fox TV—the leading supplier of prime time network dramas for the 1997-98 season—made significant strides last week in talent acquisition and series development.

The Sandy Grushow-led studio signed a first-look deal with the More-Medavoy management company, which boasts a talent pool of Laura San Giacomo, Jonathan Silverman, Jason Bateman, David Schwimmer, Tisha Campbell and Marlee Matlin, among others.

Although not a part of the deal, 20th Century Fox TV had already chosen More-Medavoy client Jenna Elfman for its ABC sitcom Dharma & Greg, which debuts next fall. The management company headed by Erwin More and Brian Medavoy also signed client Ryan Reynolds to the studio's Two Guys, A Girl and a Pizza Place, a midseason sitcom for Fox.

In other moves, Grushow boosted his roster of writers/producers by signing Steven Levitan, creator of NBC midseason show Just Shoot Me, to an exclusive, multiyear development deal. Levitan—a fair-haired producer at NBC after Entertainment President Warren Littlefield asked him to take over temporarily as show runner on the struggling Men Behaving Badly last season—will remain on the Brillstein-Grey show through early 1999 and then serve as a consultant for another two years.

Levitan had been in a two-year arrangement with Brillstein-Grey, but signed with 20th Century Fox TV for a deal that begins in June 1998. Levitan's credits also include co-executive producer on Frasier and The Larry Sanders Show.

Twentieth Century Fox TV's team of producers/writers includes Chris Carter, David E. Kelley and Glen Morgan and James Wong on the drama side, and Chuck Lorre, Danny Jacobson and Tom Gammill and Max Pross in comedy.

**Salhany to Tarses: Stay**

Should ABC Entertainment President Jamie Tarses quit, now that she has a new boss in Chairman Stu Bloomberg? Departing UPN President Lucie Salhany gave her two cents to reporters at the annual press tour gathering last week in Pasadena, Calif. "I'd hate to see her not be there. Then you get into the issue of no real diversity in any of the networks....and that's frightening." Salhany leaves her post in September but will remain on the network's operating board. In programing news, UPN executives promised more tweaks for Hitz—the comedy starring Andrew Dice Clay—and for Head over Heels, which centers on a dating service in Miami.

**ABC goes to the movies**

The price could increase if "Air Force One" succeeds at the box office, a source close to the negotiations says. Another film in the package is "The Fifth Element," starring Bruce Willis.

**Paramount gets Behr**

Producer and author Ira Steven Behr signed a three-year overall deal to develop drama series and longform projects for the network TV division of Paramount. Behr currently is executive producer on Paramount's syndicated Star Trek: Deep Space Nine.

**WB reups Daniels, signs Litvack**

The WB's Susanne Daniels has signed on for another four years and has earned the new title of executive vice president, programing. Daniels—on board since the network's creation—has been instrumental in developing shows that include Buffy, the Vampire Slayer. In other programing moves, The WB tapped John Litvack to be senior vice president of current programing. Litvack, senior vice president of network TV at Walt Disney TV since 1995, developed The WB's Smart Guy, among other shows.
This is perhaps the most pivotal year ever in children’s programming. An FCC mandate requiring stations to air three hours of educational shows weekly is expected to sharply increase product demand. The result, syndicators and television networks are producing a record number of shows directed exclusively to children. Already the leading player in kids TV, cable is creating even more shows as well. And with 1996-97 ad revenues at a record $750 million — up from 1995’s $660 million — children’s television is big business like never before.

On July 28, Broadcasting & Cable focuses on Children’s Programming. In this seventh annual special report, we’ll explore the impact of FCC regulations and profile key kids TV programmers. Plus, we’ll examine advertising in the genre, spotlight local educational shows, and look into the role of the cable industry on the kids TV playing field.

If you are involved in children’s programming, you’ll want to be part of this must-read issue. Your message will reach an influential audience of 35,000 decisionmakers in television, cable, radio, and related multimedia and new technology. To show growth in this booming industry, call your sales representative to reserve your ad space today.

'Viper' shooting in Vancouver

 Paramount Television has begun filming another season of its high-tech action series 'Viper.' Twenty-two episodes of the one-hour weekly are being shot at a new production facility in Vancouver, B.C. The facility was transformed from a Molson Brewery plant to a specially designed production house for 'Viper' and UPN's 'The Sentinel.'

'Roseanne' sells in U.S., New Zealand

 King World Productions has cleared 'Roseanne' on WXYZ-TV Detroit; KSHH-TV Kansas City, Mo.; WSMV-TV Nashville, and WNEV-TV Bay City/Flint, Mich. The new talk show is now cleared in seven of the top 10 markets, representing more than 30% of the country. King World International also locked up its first overseas deal for 'Roseanne' with TV 3 New Zealand. The show will air as a one-hour strip in the U.S. and internationally. It debuts in the U.S. in fall 1998 and overseas in 1999.

IMG buys GGP

International Management Group has purchased the majority assets of Golden Gate Productions. The deal includes GGP's distribution and event marketing arms, as well as its library. TWI acquires seven made-for-TV events, including a handful of ski series, the Lifetime Women's Triathlon and the Swatch AVP Open. The two companies have collaborated on several syndication projects in the past, including 'The Miss World Beauty Pageant.'

Want fries with that?

Scott Entertainment and Central Entertainment Network have cleared 'Burger Town' on PBS stations in Los Angeles, New York, Milwaukee and St. Louis. The one-hour documentary looks into postwar hamburger restaurants in and around Los Angeles. 'Burger Town' features a rare interview with Richard J. McDonald, founder of the McDonald's fast food chain. Vintage burger commercials and the world's largest collection of hamburger memorabilia also are featured.

Minority health sparks news syndication

Television newscasters have a new option for health coverage, this time geared specifically toward a minority audience. The Ethnic Health Network (EHN), a production of VNR-1, Video Public Relations Inc., will provide one-to-two-minute health news packages with supporting footage three times weekly to affiliate newscasters. The pieces are targeted to African-American, Hispanic and Asian audiences. Jack Trammel, VNR-1 president, says the service will focus on diseases to which minorities are particularly susceptible, such as hypertension and breast cancer. VNR-1, a video production and syndication company based in Texas, syndicates another health news program, 'The Sixty-Second Health Call' with Dr. Bob Lanier. EHN expects to begin service on Oct. 1.

'Travel Update' returns

News Travel Network's half-hour news magazine 'Travel Update' has been renewed for the eighth consecutive season. Top stations carrying the show include KGO-TV San Francisco, WMAQ-TV Chicago and WPLG-TV Miami. 'Travel Update,' which is cleared in 92 markets, features consumer trends and travel tips.

Hip-hop, Spanish and talk formats hold strong

Emmis holds lead in New York, Hefel wins in Los Angeles

By Donna Petrozzello

In New York, hip-hop/wrap WQHT(FM) topped the market while Spanish contemporary music remained strong in Los Angeles and news/talk ranked first in Chicago. The information comes from Arbitron’s spring 1997 radio listener survey, released last week. (All shares are based on listening by adults 12-plus, Monday-Sunday, 6 a.m.-midnight.)

Emmis Broadcasting’s WQHT(FM) held onto its top slot in the market, earning a 6.1 share. The spring book marks the station’s second consecutive book in first place.

In Los Angeles, Hefel Broadcasting’s Spanish contemporary music KLVE(FM) once again outranked its competitors, earning a 6.6 share, up from its 6.0 last winter. Tribune Broadcasting’s news/talk WGST(AM) Chicago took top place in the market, earning 5.9 in spring, down slightly from 6.2.

Elsewhere in New York, Evergreen Media’s light adult contemporary WLTW(FM) ranked second with a 6.0, up from its 5.7 last winter. Tied for third place were CBS Radio’s oldies WABC-FM and Evergreen’s rhythmic dance WKTI(FM). Both stations earned a 4.7. Spanish contemporary WKQX(FM) ranked fifth with a 4.3, slightly below its 4.4 last winter.

In Los Angeles, some Spanish music stations saw shares increase in the spring book. Spanish KSCA(FM) had a 4.4, up from a 3.5, pushing it into third place. Spanish KMEX(AM) also moved up, from a 2.1 to a 2.5. However, Spanish music KLAX(FM) fell from 3.2 to 2.6.

Among English-language stations in Los Angeles, urban adult contemporary KJLH(FM) ranked second, despite a steep share decline from 5.5 last winter to 4.5. Contemporary hits KPWR(FM) ranked fourth with a 4.3 and oldies KRTI(FM) was fifth with a 3.9.

In other formats, contemporary hits KGIL-FM Los Angeles earned a 3.8, up from 3.2; alternative rock KROQ(FM) earned a 3.8, up from 3.4; news/talk KMAL(AM) fell from 4.3 to 3.7; adult contemporary KOST(FM) improved from 3.2 to 3.6, and adult contemporary KSOL(FM) increased from 2.4 to 2.8.

In Chicago, urban contemporary WGGI-FM ranked second with a 5.6; soft adult contemporary WLTW-FM was third with a 4.8, down from 5.1; contemporary hits WBGM-FM came in fourth with a 4.5, down from 4.8, and urban WVAZ-FM ranked fifth with a 4.2, down from 4.5.

Elsewhere in Chicago, oldies WJMK(FM) jumped from 3.3 last winter to 4.0 and adult contemporary Wavin(FM) went from 2.2 to 2.7. Classic rock WCKG(FM) moved up from 2.6 to 2.8; adult contemporary WNDA(FM) went from 3.5 to 3.9, and alternative rock WQX-FM went from 2.8 to 3.3. Although WGN(AM) remained first in the market with a 5.9, its share was down from 6.2 last winter. Both news/talk WLS(AM) and all-news WBEM-FM saw their shares improve, with WLS up to 4.1 from 4.0 and WBEM(FM) up to 4.2 from 4.1.
Cable bALKS AT GATES’S ROYALTY TREATMENT

Operators nervous about Microsoft plan to get cut of digital transactions

By John M. Higgins

MicrosOFT corp. chairman Bill Gates's push for a way into the cable set-top is encountering resistance from operators. They object to his plan to charge royalties on the number of transactions done through the digital converter.

The royalty plan is just one of a host of issues that Microsoft and cable operators are discussing as Gates advances his push into television. He seeks to convince MSOs to incorporate versions of his operating systems into digital set-tops being rolled into consumer homes.

Among all the technical, connectivity, cost and market issues discussed in a meeting between Gates and senior cable officials last Monday, the royalty question is the one that operators are most hesitant about, according to industry executives familiar with Microsoft's proposals.

Digital converters will open the TV set to a number of computer-like functions, such as interactive program guides and perhaps even high-speed Internet surfing. Rather than simply packing a $50-$100 operating system into the box, as Microsoft does with PCs, Gates wants to get a sliver of the transaction.

"It's as if General Instrument a few years ago wanted to get paid every time you changed channels," said one cable executive. The reference is to the largest manufacturer of analog converters and the one with a hard lock on digital equipment as well.

Other problems: Would a Windows version for cable require too much memory and processing power, driving the cost of the box even higher than the hefty $350-$400 operators already face? Could Microsoft smoothly integrate the set-top into headend equipment from other manufacturers?

The upside is Microsoft's ability to make the converter do double duty, decompressing digital cable signals and surfing the Internet with Gates's WebTV display technology without the need for a separate computer.

The software titan met last week with members of Cablelabs' executive committee to discuss collaborating on a digital set-top. Cable executives attending the session at Time Warner Inc.'s headquarters included Telecommunications Inc. Chairman John Malone, Time Warner Inc. Chairman Gerald Levin, Time Warner Cable Inc. Chairman Joseph Collins, Cox Communications Inc. Chairman James Robbins, Comcast Corp. President Brian Roberts and Rogers Communications Inc. Chairman Ted Rogers.

While some depicted it as a summit meeting, participants described the gathering as part of a long-running discussion between cable operators and Microsoft. Of course, the last meeting, in April, helped trigger the software giant's $1 billion investment in Comcast Corp. At that one, Comcast's Roberts joked that if Gates wanted to spur deployment of high-speed Internet service, he should "buy 10 percent of everyone in this room."

Last week's meeting was less momentous, "It was sequential," said one executive attending. "Bill's pushing a box that he's in control of. Sony's trying to do it in the TV itself. Oracle's doing it. Lots of people are doing it."

But the companies involved provided only sketchy details.

"We think what Microsoft presented is an intriguing proposal, and we will continue to discuss it with them," said Time Warner spokesman Michael Luftman. He noted that the company also received an "interesting approach" from Oracle about its Navio system: "We're encouraged by both proposals."

Gates's lust after cable converters is just part of his television strategy. Digital cable, digital broadcast TV and Web-surfing TVs all require the television set to have computing power, but there is no particular need for Microsoft's core software products. Gates, who is buying WebTV, has fought hard to ensure that digital broadcast standards are flexible enough to allow computer companies to play.

But "smart" cable converters have been moving beyond Gates's reach. Those set-tops' primary function is handling compressed digital signals, allowing cable systems to load dozens of additional channels without full-blown rebuilds. The main goal is to

July 14 1997  Broadcasting & Cable
Don't crack your knuckles, you'll get arthritis.

Everybody thinks they're a doctor. Fortunately, on America's Health Network, everybody really is. So when there's a question, viewers can ask a practicing Family Doctor, Pediatrician, OB/GYN, Dietitian, even a Veterinarian. America's Health Network is on call 24 hours a day, 7 days a week. Is there a doctor in your customer's house? If not, call us at 1-800-246-6436.
keep the channel-hungry TV addicts from turning to direct broadcast satellite services like DIRECTV and EchoStar.

But putting computer processing power in the box opens it up for other possibilities. While no one is talking about ambitious interactive TV schemes that collapsed two years ago, digital converters could readily handle on-screen guides, impulse pay-per-view ordering and tapping of limited information services.

Cable operators are still concerned that Gate's proposal would require far more memory than the meager 520 kilobytes currently planned for the boxes. About 80% of the memory would be consumed by on-screen programming guides. Additional memory would increase the cost of the converters, which operators—not consumers—pay for. "[Microsoft's] big agenda is how to get their hooks into the box; ours is to get it cheaper," said one MSO executive.

Another possible cost of handing too much business to Microsoft is submitting to a company that loves near-monopolies and does not hesitate to use its power over PC manufacturers.

Cable operators know the dangers of such power, being near-monopolies themselves. But the rollout of digital TV already has been delayed more than two years by reliance on General Instrument, which has had trouble developing a workable, affordable digital converter.

"We’re a very wise industry now," said one participant in the meeting with Gates.

Kirch, ISL at odds

German media company Kirch Group has seriously angered Swiss sports rights marketer ISL, its TV rights partner for 2002 and 2006 World Cup tournaments. Kirch announced a TV marketing and distribution deal for two World Cups with London-based Prisma Sports & Media, founded in 1996 by former ISL executives. ISL says the deal breaches the ISL-Kirch contract, which forbids related deals with one of the other's competitors. Not only does ISL consider Prisma a rival, but the two are embroiled in a separate law suit.

BBC going digital

The UK’s BBC announced a record cash surplus of £520 million ($878 million) and a five-year, £1 billion investment plan for digital television. The public broadcaster will funnel 9% of its annual license fee revenue toward the new technology over the next five years. The BBC also will invest £500 million in its existing services.

Warner Bros. makes Spanish PPV deal

Warner Bros. International TV has signed a 10-year exclusive pay-per-view and near-video-on-demand output deal with Spain’s Sogecable for digital DTH package CanalSatellite Digital and Spanish terrestrial pay service Canal+ España. Time Warner’s Cartoon Network, TNT Classic Movies and CNN International also will launch on CanalSatellite Digital in July.

USA tops in Mexico City

USA Networks-owned USA Latin America was the ratings leader among advertising-supported channels in May on Mexico City’s Multivision cable system. According to ratings body IBOPE, USA Latin America earned a 2.0 prime time rating, outpacing all other ad-supported cable channels. It is the 14th time in 17 months that USA Latin America has led the category in prime time. The network also led in full-day ratings.

Indovision expansion

Datakom Asia, owner of Indonesian pay-TV group Indovision, is conducting a U.S. roadshow aimed at raising $225 million in bonds to fund the expansion of the five-month-old Indovision. Part of the proceeds will finance short-term bank borrowing and the planned launch of up to four channels from the Indostar-1 bird in early 1998.

Digital Deutsche

German telco Deutsche Telekom has agreed to free up capacity on its cable network for up to 150 digital channels. The news comes just days after pay-TV rivals Kirch Group and Premiere agreed to a merger. Telekom and Premiere shareholder CLT-Ufa each have agreed to take a 33.3% stake in Beta Research, Kirch’s technical arm, to develop a cable version of the digital box.

Symes heading MGM Worldwide

Hollywood studio MGM is reorganizing its TV arm and has rechristened it MGM Worldwide Television Group. The new division, formerly MGM Telecommunications Group, will be headed by John P. Symes. Symes will oversee the international pay- and free-TV operations, program development, production, co-production, distribution and financing, and MGM Animation.

New Hungarian licenses

A Scandinavian Broadcasting System-led consortium has been awarded one of Hungary’s two national terrestrial 10-year licenses for $50 million. Hungarian RTL, the consortium led by European media group CLT-Ufa, has won the second frequency, which has about 65% reach.

Loral increases stake in Asia B&C

U.S. satellite manufacturer Loral Space & Communications may emerge with just under 50% of Thailand-based Asia Broadcasting & Communications, which is undergoing ownership restructuring. Loral owns 8% of the cash-strapped group, which plans to launch LaoStar-1 in the first quarter 1998 for its planned regional DTH service. Telesat Canada’s 5% holding may also increase significantly. The current controlling shareholder is Thai businessman Sondhi Limthongkul’s M Group.

CTAM focuses on pushing digital cable

Convention to study how to live in a more complicated competitive landscape

By John M. Higgins

The struggle to sell subscribers on digital cable will dominate cable's annual gathering of marketing executives at next week's CTAM convention in Orlando, Fla.

Titled “Facing Your Future,” the conference will focus in large part on digital services that many operators are beginning to roll out this year. Operators, particularly Tele-Communications Inc., are pushing hard to roll out fat digital programing packages. But, as recent turnover in its executive ranks shows, the MSO isn’t sure how to sell them.

CTAM President Char Beales says the biggest change in the past year is that “digital is closer and the whole competitive landscape is more complicated.” On the plus side, direct broadcast satellite has proved a weaker threat than expected, while telcos and wireless cable operators largely have faded.

But suddenly marketing executives are faced with the prospect of digital broadcast TV, which could include a six-channel over-the-air program package. “They’re going to have a product that’s going to be free, the most powerful word in marketing,” adds Beales.

Convention highlights include a six-member panel on digital television that includes Tele-Communications Inc. President Leo Hindery, Fox Television President Chase Carey, USA Networks Chairwoman Kay Koplovitz, NBC Cable President Tom Rogers, ABC News reporter and moderator Jeff Greenfield plus a Microsoft executive to be named later.

Also appearing at the three-day convention will be HSN Inc. Chairman Barry Diller, plus two executives outside the industry who will talk about marketing at their companies: Eckhard Pfeiffer, president of PC manufacturer Compaq and August Busch IV, marketing vice president of Anheuser-Busch Inc.

The convention is co-chaired by Doug Holloway, USA Networks executive vice president of marketing and affiliate sales, and Katie McEnroe, president of American Movie Classics.

Attendance is expected to fall short of the 2,700 who attended last year's conference in Boston, partly because of the location. Orlando in July is not the most alluring prospect, but Beales says that last year Boston drew an unusually large number of walk-in registrations, particularly from New York.

However, TCI seems to be back following budget crunches that prompted the company to slash its attendance at all conventions. About 50 from TCI have registered this year, versus just five last year.

The conference includes the usual emphasis on education, particularly for system-level managers. The emphasis will be on such marketing nuts-and-bolts as reviving cable's lackluster basic subscriber growth, increasing pay sales, branding, customer service and competitive marketing. “We’re so practical,” Beales says. “That’s our strength; we’re not embarrassed by that.”

Digital cable is creating some big challenges in the trenches. The chief benefit of digital cable is signal compression to create room for new programing packages. But the new converters are so expensive, that operators don’t want simply to install them in every home, and they want subscribers to pay for the new programing. So the task of sales and marketing managers is convincing subscribers to step up and buy.

The problem is that cable always has had difficulty creating and selling new products. Mike Tyson’s a hit, but otherwise pay per view has been a lackluster business. The failures of digital audio, The Sega Channel and interactive TV all loom large.

But Holloway says that many executives are taking too narrow a view, since digital elements include signal quality, the prospect of HDTV and digital broadcast TV signals. “Digital has become a catch phrase to mean a lot of things in the cable industry and we need to break it into its component pieces,” he says.
families subscribe to Americast. Ameritech says it has cable systems in 40 Midwestern cities. Americast, which offers interactive program guides and child lockout features, is being developed jointly with The Walt Disney Co., BellSouth, GTE, SBC Communications and SNET.

Prime Cable deploying 30,000 modems

Cable modem maker Com21 will deliver 30,000 of its ComPort modems to Prime Cable over the next two years. Prime, which plans to start deploying the high-speed modems in its Las Vegas system this fall, expects to have several thousand boxes in the field by year's end. The value of the deal will be $9 million-$10 million, based on a cost of $300-$350 per box. ComPort boxes can operate at a downstream rate of 2.5 Mb/s.

Travel with Charlie

The Travel Channel aired a tribute to late newsmen and traveler Charles Kuralt last week. It ran six episodes of On the Road With Charles Kuralt, originally broadcast on CBS. “We want to honor his inimitable spirit, his self-effacing style and his enduring love of the road less traveled by airing some of his finest stories on The Travel Channel,” said Travel Channel General Manager Bahnson Stanley. “It's the best way we know of honoring his contribution to television history.” Kuralt moved away from conventional reporting for 13 of his 37 years at CBS by going On the Road in a motor home.

Monmouth gains Knowledge

Comcast of Monmouth County, N.J., has launched Knowledge TV as part of its basic cable lineup. Comcast of Monmouth serves more than 70,000 subscribers in 23 communities. Knowledge TV, which offers instructional and how-to programs, is operated by Jones Education Co.

Discovery pledges to go HDTV

Cable channel will switch in 1998, but details aren’t yet defined

By Glen Dickson

Discovery Communications plans to launch an HDTV programming service and to join HBO as the second national cable programmer to distribute high-definition pictures in 1998. Discovery CEO John Hendricks made the announcement in a speech to the Washington Metropolitan Cable Club last week.

But so far, Discovery has more of a pledge than a plan.

According to John McCofkey, Discovery's senior vice president of technology, Discovery will introduce its HDTV service about one financial quarter after HBO, which has targeted summer 1998 as its HDTV launch date. But McCofkey is hazy about post-launch HDTV details, stating merely that Discovery already has a wealth of 35 mm and Super-16 film material from Discovery Channel, Learning Channel and Animal Planet that could easily be converted to HDTV.

McCofkey says that Discovery has talked to possible HDTV equipment vendors mostly through its origination service providers—Group W Network Services in Connecticut and TCI's National Digital Television Center in Colorado—and hasn't made any decisions yet on gear. He does confirm that Discovery won't eliminate any of its existing digital standard-definition services for the HDTV feed, but will instead repack existing satellite transponders or seek new capacity. Discovery now uses capacity on GE Americom's Satcom C3 and C4 and Hughes's Galaxy VII to distribute four analog and four digital feeds.

“By example, Animal Planet is offered both in a digital multiplex and off an analog transponder, so we have some options,” says McCofkey. “With advanced compression, we also could consolidate on some transponders.”

Cable affiliates would be expected to buy HDTV receiving and transcoding equipment if they wanted to carry the new service. McCofkey admits that “not a lot of affiliates are asking us to do HDTV,” but he denies that Discovery is simply announcing HDTV intentions to dissuade broadcasters from pursuing multiple channels of SDTV instead of providing one channel of high-definition programming. He says that Discovery’s nature films and documentaries are ideally suited to the new format.

“We want to be early out of the chute with a high-quality product,” says McCofkey. “We believe there’s a latent consumer interest in improved pictures.”

MediaOne weathers Michigan storm

Uses fiber to restore lost service to cable subscribers

By Glen Dickson

MediaOne’s cable operation in Hamtramck, Mich., is now back in full swing after being rocked by a severe storm on July 2. The MSO’s headend in the Detroit suburb suffered heavy damage from a devastating weather system that killed sixteen people in southeastern Michigan and placed Hamtramck under a state of emergency. All of MediaOne’s 54 channels in Hamtramck were knocked out of service, as winds over 100 mph and heavy rain destroyed its 125-foot microwave receive tower and damaged two satellite receive dishes. The storm also cut off power to the headend’s 3,000 customers.

“The damage to the satellite dishes was fairly minor—one was blown out of position and one dish was bent and had one of the edges broken off,” says Bill Black, MediaOne’s director of public affairs. “But the microwave receive tower was completely destroyed.”

MediaOne engineering crews
For its astute customers, Vyvx means easy satisfaction. Because Vyvx is the very best way to get video from wherever it is to wherever you want it to be. By whatever route: fiber or satellite.

Count on Vyvx to find the best solution for each video transport situation. Sometimes you need an immediate satellite uplink. Vyvx it. Need the digital quality and absolute security of fiber-optic transmission? Vyvx it.

Vyvx it, too, when you need fast delivery. International routing. Fail-safe connectivity for a major event. Direct fiber service to hundreds of teleproduction firms. Or national distribution of TV spots.

With just one call, Vyvx can schedule fiber routes, transponders, teleports, and local loops. Vyvx delivers your video when and where you want it to go. Without blood, sweat and tears.

When it's video, Vyvx it.

For more information contact us at 1-888-vyvx it (898-9048) ext. 130.

THE INTERNATIONAL VIDEO SERVICES COMPANY
FIBER SATELLITE TELEPORT

A Williams Communications Group Company
Cutting Edge

By Glen Dickson

Fox Sports Pittsburgh will transmit all Pittsburgh Pirates and Pittsburgh Penguins games in stereo starting Wednesday with the Cincinnati Reds versus Pirates game, live at 7:30 p.m. from Three Rivers Stadium. All on-site pre-game editions of SportsBeat, with Stan Savran and Guy Junker, also will be televised in full stereo sound starting Wednesday. Fox Sports Pittsburgh says stereo transmission is now possible because of the new studios in its Allegheny Center headquarters.

Post Edge handled the special effects for this Casio spot.

Post Edge, Miami Beach, Fla., designed, animated and completed post-production work for the 44-second Casio G-Shock commercial, “Total Normal.” The spot features Casio’s new glow-in-the-dark water-resistant watch. The special effects included 2-D animation composited with live action, 3-D computer animation of a waterskier, and a penguin composited with live action, Discreet Logic Flame tracking and compositing of live frogs, Elastic Reality morphing bullfrogs, and green-screen live action of flying actors.

By both laying its own fiber and leasing dark fiber from Teleport Communications Group, MediaOne was able to establish a new transmission link with one of its nearby headends to receive 11 local broadcast channels and some satellite channels. The MSO also brought in crews and equipment from across Michigan and Ohio to aid in the repair effort. Black says. By Friday, July 4, the Hamtramck operation again was distributing all 54 channels.

MediaOne doesn’t plan to replace the 20-year old microwave tower, although in the past it had used microwave exclusively for retransmitting local broadcast stations. “We’ll rely on fiber from this point forward,” Black says. “It was in our plans for later down the road. But we’ve got it accomplished now.”

Technology

NBC has purchased a Solid State Logic Altimix digital post-production system to edit audio for network promos, movie opens and affiliate presentations. The Altimix system features audio editing with integrated video and audio mixing capabilities and uses SSL’s DiskTrack technology to recall audio and video files quickly. “With DiskTrack, we will have a distribution system for central storage of sound effects and special cuts, and have electronic distribution rather than physical distribution of tapes,” says Jim Keller, director of technical operations for NBC Entertainment. “All of this translates into time saving and increased productivity.”

CBS has selected the Telex ADAM Advanced Digital Audio Matrix intercom system for its coverage of the 1998 winter Olympics in Nagano, Japan. The Telex ADAM system, which is based on a patented application of Time Division Multiplex core processing technology, offers processing of up to 1,000 channels of CD-quality digital audio. “The power and compactness of the ADAM system will give us a 288 by 288 matrix within three ADAM frames,” says Bob Gilmartin, CBS director of engineering. “Additionally, the central ADAM system will interface via hybrids to smaller distributed matrices at our venue sites.”

Ziff-Davis Television Productions has purchased seven StrataSphere nonlinear editing systems from Scitex Digital Video for its new digital production facility in San Francisco. ZDTV uses the Scitex systems in the production of The Site, the hour-long news magazine on MSNBC, as well as to support The Site’s Website, Thesite.com. Supporting the content of the Website is made easier with the StrataSphere’s QuickTime-native file format.
Electronic Commerce

Record AOL deals spotlight rising value for 'Net turf

'Location, location, location'—even in cyberspace

By Richard Tedesco

America Online is selling cyberspace storefront property at record prices, garnering $44 million in its latest round of Internet commerce closings.

Last week's deals, with online bookseller Amazon.com and 1-800-Flowers, give the vendors exclusive selling space on AOL, which is pushing near the $200 million mark for deals struck in the past four months. Amazon.com simultaneously made a multimillion dollar deal with Excite, so that the popular search engine would feature it as the exclusive bookseller.

Amazon.com is putting up $19 million over three years for a front-screen button on AOL's Website (www.aol.com). Some revenue sharing with AOL may kick in during the three years. The 1-800-Flowers deal is an extension of that retailer's existing relationship with AOL: it will pay $25 million plus a share of revenues over four years to plant itself exclusively in AOL Marketplace.

For its part, AOL seems determined to sell as much commercial space as fast as it can, moving away from a business model based on subscriptions. Last month, it struck a $50 million deal with CUC International to make CUC the exclusive discount shopping service on AOL Marketplace. In March, Tel-Save Holdings paid AOL $100 million to market its discount phone service to AOL's subscribers.

That growing subscriber base, building from the 8 million it had when it temporarily halted new subscriptions to shore up its infrastructure, makes AOL prime commercial territory. And those infrastructure costs are a spur to capitalize on its position. Sounding as though he's still at Century 21, AOL Networks president Bob Pittman says, "If you want a store, where do you want it? On the corner of 57th and 5th, which is where we are in cyberspace."

The AOL deals suggest that the principles driving the real estate business are beginning to take root in the once distinctly noncommercial realm of cyberspace. "It proves that brand and real estate are key things people will pay for," says Daniel Amdur, Internet market strategies analyst for The Yankee Group. "It's location, location, location."

PC Meter research indicates that during April, 38% of all Internet users reached the Internet through AOL. Prodigy accounted for 5% of Web traffic, while Microsoft Network provided access to 4% of Web surfers.

However, the value of that commercial real estate remains largely unproved, except in the deals that AOL has hatched recently. "AOL is preaching the future of online commerce, but it's not nearly there yet," Peter Krasilovsky, analyst for Arlen Communications, observes.

The aggressiveness of AOL's strategy is particularly evident in light of a deal struck with Barnes & Noble four months before the Amazon.com pact. In March, Barnes & Noble became the exclusive bookseller in AOL Marketplace. Terms of that
deal were not revealed.

“Even if companies establish tenancies on the AOL flagship service, AOL can turn around and offer similar, if not equal, access on its Website,” says Krasilovsky.

Building revenues, not business loyalties, is obviously the bottom line. In announcing its deal with AOL, 1-800-Flowers projected $250 million in sales over the course of the deal. That has to get the attention of any wanna-be online retailer out there.

It also explains the reasoning behind the $1 billion that AOL and Bertelsmann A.G. reportedly bid for CompuServe—and why that bid was rejected. AOL itself may have raised that ante considerably this week.

Cyberspace meets outer space
The World Wide Web visited another world last week, as the principal Website for the Mars Pathfinder mission drew ‘Net surfers in droves.

As of early last week, more than 150 million visits had been paid to the primary Mars Pathfinder site on the Web (mpf.www.jpl.nasa.gov), and 16 mirrored sites had been set up to accommodate the demand. The additional sites included one assembled hurriedly over the July 4th weekend by Silicon Graphics engineers working with the Pasadena Jet Propulsion Labs—the major player in the NASA project.

SGI provided the technology for a novel online feature: a virtual tour of the Martian surface where Pathfinder and its self-propelled Sojourner companion alighted. Some two dozen Web pages include three brief QuickTime movies of the Sojourner making its moves around the Red Planet. Content on the Websites also includes videos of test landings, along with maps and diagrams of the actual landing site.

NASA anticipated a hearty online appetite for Pathfinder content last August, when reports about meteors discovered in Russian Siberia suggested that there was evidence for life on Mars. Traffic doubled at NASA’s Website.

But the desire for Pathfinder particulars has far outstripped the anticipated appeal, prompting the addition of the mirror sites. “The project did a very good job of anticipating heavy demand,” says NASA spokesman Brian Dunbar. “But I don’t think anybody expected the kind of demand we’ve gotten.”

Even after the Pathfinder mission, NASA expects higher-than-usual traffic to its Website. Meanwhile, misguided surfers seeking Mars might have found themselves in a slightly bizarre corner of cyberspace if they searched for a logical address for NASA. Visitors to www.nasa.com discovered a link to a promo site on a page that also featured a picture of Mike Tyson about to put the bite on Evander Holyfield, with the caption: "Hey Mikey! Eat first, then fight!"

Microsoft makes a stop on Twin Cities Sidewalk
Denizens of the Minneapolis—St. Paul metro area presumably breathed easier about catching local events after Microsoft’s launch of Twin Cities Sidewalk last week (www.sidewalk.com).

Just before to its introduction, a Sidewalk poll concluded that almost three-quarters of 500 Twin Cities residents hadn’t attended recent events of interest because they didn’t know about them in time. This version of the Sidewalk urban online guide aims at reducing that fallout with advance notices about performances at 90 area theaters, concert halls and auditoriums.

To cover events on the rock scene, Twin Cities Sidewalk features links with three local rock stations, KQPS-FM, KGE-FM and KXX (FM). Those stations, in turn, feature links to JamTV, the online music promoter that produces online concert events.

The new Sidewalk also includes reviews of 600 area restaurants and hole-by-hole reviews of 400 golf courses, among other recreational activities. One feature provides details about fossils that can be found at the St. Paul Brickyards. “Sidewalk covers where to hike, bike, fish and camp and even lets you reserve golf tee times online,” said David Fryxell, executive producer of Twin Cities Sidewalk.

Twin Cities Sidewalk is the fourth iteration of Microsoft’s city guide series, following Seattle, New York and Boston online. Sidewalks are expected to be rolled out for San Francisco; Houston; Denver; San Diego; Washington, D.C.; and Sydney, Australia later this year. The Sydney site will introduce an international area that will include Munich and other cities—a strategy resulting from the failure of Sidewalk

Montreal earlier this year.

Whirling onto weekly Web strip
WhirlGirl will set the virtual universe free.

That’s the basic plot line for a new animated superhero who goes into action on the Internet later this month against a “tyrannical, media-tech empire” in weekly Web installments. The Sunday night episodes debut at 8:30 p.m. ET on July 27, with Kia Cross, the 20-something, post-Generation-X woman leading the rebellion with appropriately futuristic weapons (www.whirlgirl.com).

“We based WhirlGirl on the idea that media consolidation could lead to worldwide media monopoly,” says David Williams, WhirlGirl creator and president of Visionary Media. A preview sponsored by WebTV has been up on the site since spring (Telemadia, March 10).

The series itself will be mildly futuristic by Web standards, featuring sound effects and some animation in the dozen Web-page panels making up each segment. Music will be provided by a New York City band called Halcion.

The departure here is Visionary’s plan to drive the series with 15-second-on-air TV spots aimed at adventure fans. Spots will appear in major markets starting Sunday during series including Xena: Warrior Princess, Hercules and Star Trek: The Next Generation. The first spot airs during the off-network Seinfeld on Fox (tv) New York. Online ads will appear on Yahoo! and Netscape as well.

Hoping for a theatrical movie spinoff, the producers are running a pre-launch “Casting Couch” promotion on the Epson America Website (www.epson.com), with an Epson digital camera to the winner.

Merchandising plans are already in place: WhirlGirl T-shirts will be on sale on the Website when the series debuts. — RT
HELP WANTED MANAGEMENT

RadioDate, world’s most profitable dateliner service for non-traditional broadcasters revenue seeks top-level, well-connected radio executives to introduce Station Owners, GM’s, GSM’s and PD’s to the revenue-generating potential of RadioDate in the exploding $500 million plus broadcasting voice personalities industry. High, long-term commissions payable on a per station basis. Interested parties should fax resume to 1-914-364-5297 or call our Corporate Office at 1-800-320-7870 for more information. EOE.

Oregon FM seeking quality manager with good sales and administrative capability. Fax resume to 301-907-9221.

General Manager for Oregon coast FM station with staff of five. Send resume, salary requirements and letter of introduction describing management successes to The Fellows Company, PO Box 69241, Portland, Oregon 97201.

100,000 FM in beautiful Northern Michigan. Solid facilities with performance driven ownership. Committed to radio with aggressive future plans. Send letter of introduction, resume and salary requirements to Box 01105 EOE.

HELP WANTED SALES

Sales Manager for small market Oregon coast FM station. Send resume, salary commission requirements and letter of introduction describing supervisory and sales successes to The Fellows Company, PO Box 69241, Portland, Oregon 97201.

General Sales Manager. Now more than ever, premium cable services and PPV are seeing a sharp upswing in programming activity and subscriber numbers. New pay channels are debuting in rapid succession. And DBS is a big boon to pay TV, with over 50% of subscribers signing up for at least one pay channel.

On September 8, Broadcasting & Cable will unscramble the state of Pay TV. Plus, we'll look into new services ready to challenge the cable giants.

If you're looking to connect with 35,000 industry leaders in electronic communications — including MSOs, DBS services and other key carriers — you'll want to be part of this issue. For a premium opportunity with real profit potential, call your advertising sales representative to reserve your space today.

Broadcasting & Cable July 14 1997 67
Nightly directive for Lucy Johnson: pray to her Bob Barker and Bill Bell dolls.

Johnson likes to joke about her profound respect for Barker, the longtime host of The Price is Right, and Bell, creator of The Young and the Restless. The Bold and the Beautiful. But she’s serious when it comes to recognizing the cornerstones of the successful daytime lineup at CBS, where she is senior vice president, daytime/children’s programing and special projects, CBS Entertainment.

“They are geniuses at what they do,” says Johnson. “They don’t need to hear my opinion on how to do their job. My job is to support them and nurture the surroundings and make their life as comfortable as possible.”

Humble words from a senior vice president whose daytime schedule has enjoyed a precedent-setting number 1 ranking for eight consecutive years. But equally humble were Johnson’s beginnings in the business as a wanna-be graphic artist who yearned for a production gig in television.

“I was hungry for real life,” says Johnson, who studied graphic design at Boston University before moving back to her native New York. “I don’t think I could have articulated at the time what I wanted. I just wanted to be a part of a production team, working on variety shows or some kind of sitcom.”

An entry-level job in NBC’s record library gave access in the mid-’60s to the network’s production department, where Johnson worked odd jobs on game shows, elections, daytime dramas and dramatic specials. In 1967 Johnson got a hankering for a serious vacation in Rome—but within six months she was back in New York looking for free-lance production work.

She hit pay dirt in 1968, picking up jobs as an assistant to the producer that had her feeling like a theater stage manager one day and an assistant film director the next. She worked on “juicy” TV projects from Harry Belafonte, Alan King and David Susskind.

Her marriage at the time to a TV and commercial producer eventually took her to Los Angeles, where the two developed a drama series for PBS with the help of a grant. The project never materialized but many contacts did, helping Johnson land a job as director of daytime programing at NBC.

“I was so thrilled. I thought, ‘They pay you to watch soap operas?’” she says of NBC, where supervising Days of Our Lives and searching for new game shows topped her daily agenda.

Johnson took a break from daytime in 1983, looking for the next great movie-of-the-week while developing animation and game shows for Lorimar Productions. But the writers’ strike in the late 1980s had Johnson back at the network door. She interviewed with CBS’s Michael Brockman, who had hired her at NBC.

“I’d been a fan of CBS shows since I was a kid. I knew how healthy the schedule was. I wouldn’t be walking into a crisis-laden situation,” Johnson recalls. “As I entered, Michael left. But I kind of ended up being in charge of myself, and it has turned out to be a fabulous, extraordinary ride. I’ve been able to concentrate on all forms. I’m not just putting out fires every five minutes.”

Which brings her back to those fictitious Bell/Barker dolls. The continuity provided by those two men is what makes the daytime schedule so successful, Johnson says.

“One of the beauties of The Young and the Restless that helped it enormously for 25 years is that it has the same visionary at the helm who created those characters,” Johnson says. “He’s still writing for them. Other [daytime dramas] have a different writing team every 18 months.”

The story is different over at children’s entertainment, a division she inherited last July amid calls for higher ratings from the higher-ups and better shows from Washington. While she is concerned about the new block of news that will fill the Saturday morning lineup come fall (“It scares me. It interrupts the flow.”), Johnson says she’s enthusiastic about her new responsibility. At the very least, it has led to an introduction to the President.

“I think it has been one of the most exciting years,” says Johnson. “It’s been very hard work. But while it’s been extremely demanding and very energizing, it’s made my daytime work more stimulating.

“We still have a tough job ahead of us,” Johnson says of the entire daytime lineup. “From the day I walked in there, I haven’t taken anything for granted. Each Thursday I look at the ratings. I operate with a team of people that still focuses on the competition. We have a big job ahead of us.” —LR
Make Sure They See You at CTAM

As one of the premier cable events of the year, CTAM attracts top-level industry leaders focused on the latest marketing and promotion programming strategies. The marketplace has never been more competitive, and this year's event will emphasize developing brand awareness in response to digital and other emerging technologies.

On the cusp of conference activity, Broadcasting & Cable will look at CTAM. This July 21 report will be read closely by 35,000 industry leaders, including CTAM members — top-level executives who can impact your business. And bonus distribution of this issue at CTAM delivers your message to influential event attendees.

If you want the competitive edge in your cable arena, you'll want to be seen in our CTAM focus. Contact your sales representative to reserve your ad space today.

Special Report: CTAM
Issue Date: July 21 • Ad Close: July 11
Bonus Distribution: CTAM, Orlando

Broadcasting & Cable will donate 10% of this issue's advertising revenue to the CTAM Educational Foundation.
Charles Kuralt, 1934-1997

Charles Kuralt, 62, CBS News reporter, correspondent and host, died July 4 in New York of complications from lupis. Kuralt had a 37-year career at CBS and was probably best known for his "On the Road" pieces shot on location as he and a crew traveled the back roads of America looking for unusual people and places.

He began his journalism career at the University of North Carolina as editor of The Daily Tar Heel. After graduation he joined the Charlotte News in his native North Carolina as a reporter and columnist. He joined CBS in 1957 as a writer, moved to the assignment desk the following year and became the youngest CBS News correspondent ever in 1959 at age 24. In 1960, he became the first host of the CBS News prime time show Eyewitness and also covered that year's presidential campaign. The next year he was chosen to head the network's new Latin American bureau, later becoming a roving reporter. In 1963 he moved to Los Angeles as West Coast correspondent, returning to CBS News headquarters in New York in 1964.

He did four tours covering Vietnam. In 1967 he decided he'd had enough of hard news and began a three-month trial of "On the Road," eventually covering all 50 states and logging more than 50,000 miles a year in his motor home.

In 1979, while still traveling, he began hosting Sunday Morning, CBS's 90-minute magazine. It was known for its leisurely pace and sharp writing, the latter a Kuralt trademark. In 1980-81 he interrupted his traveling to anchor Morning with Charles Kuralt on weekday mornings.

He retired three years ago, telling his audience: "I aim to do some traveling and reading and writing." And he did, writing "Charles Kuralt's America," a 1995 collection of his favorite spots in the country, one for each month (his sixth book). Then he returned to TV screens earlier this year as host of I Remember on CBS Eye on Cable (the last of the show's 10 first-run episodes appeared on July 1; they will be rerun beginning July 15). He also appeared in An American Moment, a series of 90-second vignettes on people, places and other aspects of Americana syndicated by Ninth Wave Productions of Austin, Tex., and was seen in reruns of On the Road on The Travel Channel.

In September 1995 he also became a station owner, buying WELY-AM-FM in Ely, Minn., one of those 12 perfect spots in the country he described in "Charles Kuralt's America."

He won numerous awards, including 12 Emmys (one was a sports Emmy for his reports from the 1992 winter Olympics), three Peabodys and the George Polk Memorial Award. In 1983 he was named Broadcaster of the Year by the International Radio-Television Society.

President Clinton commented: "Charles Kuralt's extraordinary imagination and skill gave America a unique view of itself. He helped us see the beauty and strength of our small towns and countryside. In so doing, he brought all members of the American family closer together."

He is survived by his wife, Petie Baird Kuralt; two daughters from a previous marriage, and two grandsons.

—MKM
Doug Barrington, director, advertising, Garden State Cable Television, Philadelphia, joins www-tv Topeka, Kan., as local sales manager.

Carla Wohl, reporter, Real Life and KCBS-TV Los Angeles, joins ABC NewsOne there as correspondent.

DEATHS

Rita Morley Harvey, 69, television actress, died of cancer June 28 in Simsbury, Conn. Harvey appeared several times during the 1950s and 1960s in such soap operas as The Edge of Night, As the World Turns and Secret Storm.

Buren C. Robbins, 91, broadcaster and educator, died July 1 at Memorial Hospital of Carbondale in Illinois. His health had been declining for the past year. Robbins’s broadcasting career began in the ’30s, when he became a part-time announcer at WHOL(AM) Des Moines, Iowa, and a producer, announcer and writer at Stoner-McRae Advertising Agency. He was continuity writer for WOG(AM) Birmingham, Ala., and announcer and program director at WSOY(AM) Decatur, III. While working toward a doctoral degree in broadcasting at Ohio State University, Robbins taught radio announcing, writing and analysis, and radio drama writing classes. He later joined Southern Illinois University at Carbondale (SIUC) as director, broadcasting service. During his tenure at SIUC, Robbins developed and designed the broadcasting service and the television and radio departments. He was instrumental in putting the university stations on the air and in enhancing the programming. He is survived by his wife, Mary Jane; a daughter, and a brother.

A New York Times Magazine article in Sunday's paper (and in the works for nearly a year) provided a new twist to the ongoing drama of Jamie Tarses, ABC's entertainment president. Writer Lynn Hirschberg, who was granted a surprising amount of access to the 33-year-old executive (typically shy around the press), said Tarses' lawyers have been in talks with ABC about a possible departure from the network. The story also included a no-holds-barred quote from former ABC Chairman Ted Harbert, who showed some sympathy for Tarses but added that "the town hates her, and I'm not sure even hits will fix that."

Seagram & Co. appealed to a Delaware judge to hold Viacom Inc. to the terms of the partnership agreement in their 50-50 USA Networks Inc. either by selling MTV Networks or naming its price for USA. Friday, in a final round of briefs before Judge Myron Steele decides how to break up the partnership, Seagram reiterated its request that would likely force Viacom to trigger a "buy-sell" clause, put a value on USA Net-works and let Seagram decide whether to buy out Viacom or sell its half. Since Steele found that Viacom's other basic networks violated a noncompete clause when Viacom bought Paramount and its USA Networks stake, Seagram argued that the judge should not reward Viacom by honoring its request for a public auction. Viacom's filing was not available at press time.

Lawmakers last week were looking to help jumpstart an FCC inquiry into digital TV public interest obligations. FCC Chairman Reed Hundt has been looking to launch an inquiry into the public interest obligations of DTV broadcasters and other spectrum users, but commissioners James Quello and Rachelle Chong have opposed the plan. Last week, 38 House members wrote the FCC in support of the inquiry. "If the process is delayed, new public service obligations are in danger of becoming an ineffectual afterthought, cheating the public out of the compensation owned them by the broadcasters for use of the spectrum," the lawmakers said.

FCC officials Friday were wrapping up their replies to network concerns about children's programing precisions. Officials are expected to OK network plans to reschedule some weekend educational programing around sports events during the first year of the commission's new educational programing rules. Officials expected the letters to ABC, CBS and NBC to go out either late Friday or today. Shortly after buying WENN-FM and three other radio stations in Birmingham, Ala., Cox Broadcasting Inc. turned around and is selling WENN-FM to Dick Broadcasting Co. for $14.5 million (see "Changing Hands," page 42). The divestiture will "facilitate the administrative review process by the Department of Justice," Robert F. Neil, president of Cox Radio Inc., said in a news release. Including WENN-FM, Cox would own five of the top 10 stations in the market, according to Arbitron's winter 1997 book. WENN-FM is eighth in the market in terms of AQH share, leaving Cox with stations one, two, five and seven. Market share is among the issues that Justice considers when looking at the antitrust implications of a large deal.

Boxing promoter Don King filed a libel suit against ABC and its KABC-TV Los Angeles over remarks made by KABC-TV sportscaster Rick Lozano regarding the outcome of the second Mike Tyson–Evander Holyfield fight. King is seeking compensatory damages in excess of $1 million and another $5

Who the H asked for the D?

Now that the ratings talks are over, one question looms large: Where did the D for suggestive dialogue come from in the new TV ratings system?

National Cable Television Association President Decker Anstrom says NBC requested it. "NBC was the network that was supportive of adding that D," Anstrom says. "When you think about their prime time schedule, it makes sense." Top NBC shows like Friends and Seinfeld are laden with sexual innuendo.

But NBC said reports that it asked for the D rating were "absolutely wrong," according to a spokesperson.

Another theory is that industry came up with the D rating to bring NBC on board, which, as the world now knows, did not work. One thing is sure, the new rating did not come from the advocacy groups.

"We were ambivalent about it," one source said.—PA

Have a house, man!

While Fox's animated Simpsons may not be real, their real estate is. Fox, Fox Interactive, Pepsi-Cola and Kaufman & Broad Home Corp. are giving away a life-size replica of Homer's home. The 2,200 square-foot, four-bedroom, split-level house can be won with "Simpsons House Giveaway" game pieces on Slice, Orange Slice, Mug root beer, Brisk and Josta beverages. The promotion celebrates the award-winning show's ninth season. The house is in the Las Vegas suburb of Henderson, Nev., in Spring-field, a new development named after the Simpsons' home town.

Errata

Tribune Broadcasting, Chicago, has a management agreement and an option to buy WDBC-TV Washington. It does not have a time brokerage agreement with the station, as stated in the special report on the “Top 25 TV Groups” in the June 30 issue, page 32. Also, the company headquarters is located in Suite 1800 of 435 N. Michigan Ave.

Regarding Viacom’s holdings, as described in the special report on the “Top 25 Media Groups,” July 7, page 23, the company no longer owns any radio stations; it owns TV Land and Famous Music, as well as 50% of UPN, USA Networks, Comedy Central and All News Channel.

Cablevision Systems should have been included in July 7’s “Top 25 Media Groups.” With revenue of $1.3 billion and operating profit of $74.4 million, Cablevision would have ranked 20th among the 25.

MSG Network was scheduled to air improved baseball graphics last Friday night for its telecast of the Yankees–Tigers matchup. QuesTec Imaging has enhanced its SuperVision graphic ballistic tracking product, which provides MSG with animated replays of pitches, to create a more realistic Yankee Stadium backdrop.

Now you can see the lawn mower stripes in the grass,” says QuesTec’s Mike Russo.

More lawmakers are pushing for rural representation on the FCC. In the July 2 letter to President Clinton, 16 House members urged the president to consider a candidate with rural credentials for one of the commission vacancies. “We are very concerned about the effect of the Implementation of the Telecommunications Act of 1996 and other communications decisions on our rural constituents,” said the letter, whose signers included Representative Ron Klink (D-Pa.). “We believe they need a voice on the FCC in order to ensure affordable access to telecommunications services in rural areas.”

With its July meeting approaching last week, FCC officials still were trying to wrap up business from the commission’s June assembly. In that brief get-together, commissioners voted on one item—a new schedule of suggested fines for violations of FCC rules. The new “forfeiture guidelines” will replace the guidelines that the U.S. Court of Appeals in Washington threw out in a 1994 ruling. Officials from the FCC Compliance and Information Bureau initially said they would issue the new fine schedule on June 19, the day of the FCC vote. Nearly three weeks later, however, FCC officials were still tinkerimg with the new fine guide and were not ready to release it.

...And for our beach report, an unexpected high tide has covered the jetty at Oceanview!"
The voice of America

Our tribute to Charles Kuralt goes first on this week's editorial page because we'd rather celebrate the triumph of his contributions to broadcasting than the tragedy of those who failed broadcasting and cable last week. For the second time, the leadership of the electronic press caved in to congressional and so-called advocacy group pressure to sign away First Amendment rights. We now add July 10, 1997, to the list of dates that will live in infamy. They've now denied the First Amendment at least twice: we fear it's not far away.

We no longer blame the Congress: that's a job for the courts, if they ever find out what's happening to this country's freedom of expression. We blame the National Association of Broadcasters (along with ABC, CBS and Fox) and the National Cable Television Association, which have sold out their constituents' birthrights for a mess of pottage. In an ultimate demonstration of going along to get along, they have put the First Amendment last among the priorities for which they fight in Washington. Only NBC has had the wisdom and the gumption to say no.

So much for the past. Here's what to expect in the future.

- Once the new ratings are in effect, the PTA and other advocacy groups will complain about the manner in which they're executed and the interpretations presented by the networks. Now, inside the tent, they will use their five full votes to intimidate and dominate the monitoring committee and the ratings process.

- Congress will pass legislation codifying the voluntary system. The NAB will not object; broadcasters will be allowed to keep the analog spectrum. The NCTA will not object: all cable rates will be deregulated.

- Having made the system mandatory, Congress will begin a continuing review process (censorship) to ensure that any programs they and the advocacy groups find unacceptable will not appear on the air.

Would this all come to pass? In fact, it is virtually ordained by precedent and political inclination. This page has been committed to the First Amendment and the Fifth Estate for 65 years. The balance has tipped: in our view, because the opposition grows more numerous and the industry no longer cares. The pursuit of money has won out over the pursuit of principle.
