We’re Mapping
The Road To Success
For Television Broadcasters
While other pay TV providers battle on Capitol Hill over retransmission rights, we have focused our efforts from the start on providing consumers with a free solution to receiving their local channels. With that goal in mind, we’ve formed a powerhouse coalition with the Consumer Electronics Manufacturers Association, the National Association of Broadcasters, the Satellite Broadcasting and Communications Association and Antenna Manufacturers to provide a solution for receiving local channels with an 18" DSS® dish.

This year, our antenna coalition will introduce signal-strength maps of all 211 markets nationwide. We’ll provide these maps to retailers in these markets. In turn, retailers will use these maps to recommend the best type of antenna to a customer depending on their location. This will allow them to view their local channels for free, and often with better reception than cable, all with the touch of a button on their DSS remote.

We are proud to support the television broadcast industry by helping to provide consumers with a viable terrestrial broadcast reception solution. We are also helping to pave the way for the advent of high definition digital signals coming later this year.

Let’s make a deal—for CPs

Companies scramble to collect unclaimed TV licenses at FCC by Jan. 30

By Chris McConnell

Bud Paxson is leading a stampede to sweep up new TV licenses at the FCC. With the deadline for striking deals coming up Friday (Jan. 30), the Paxson Communications chief and other broadcasters are scrambling to collect leftover licenses that long have been sitting idle at the commission.

“It’s the great gold rush of the late ‘90s,” Paxson says of the quest for the TV licenses. Last week he added that his company had struck deals to procure five of the permits.

Paxson and others say the unclaimed construction permits offer them an opportunity to expand the reach of their new networks. United Television Inc., owned by UPN backer Chris Craft, has applications pending for 12 stations. And lawyers say the other new networks also are eyeing the licenses as potential new affiliates.

“We’re a network that needs distribution,” says The WB’s Brad Turell, who adds that the network’s affiliates as well as the Acme station group—owned by supporters of the network—are interested in the CPs: “If there’s a possibility of getting construction permits, we’re there.”

“These construction permits aren’t worth much without a concept that will attract viewers,” says Julius Genachowski, general counsel for USA Network’s broadcast division. “We think we have a concept that will.”

So far, at least some of the construction permits have been worth millions. Paxson says his company unsuccessfully offered $2.5 million for one license in Texas. Other industry sources say that the most expensive licenses have gone for more than $4 million.

“Even in smaller markets there’s an interest,” one industry source says. The WB’s Turell says that his company is interested in finding affiliates in any of the top 100 markets.

The interest is not limited just to new networks. Lawyers say broadcasters such as Anthony Fant and Pappas Telecasting also are in the running. “We think there’s a legitimate need for additional TV service in the available markets,” Pappas Telecasting President Harry Pappas says. He hopes his company will be able to secure some of the licenses before Friday’s deadline.

There are 90 commercial licenses up for grabs. The backlog is the product of the FCC’s long-defunct procedure of assigning licenses through a process of comparative hearings. Because a court in 1993 threw out the criteria that commission officials used to choose license winners, the FCC has no procedure for assigning radio or TV licenses in cases where more than one party has applied for a permit.

To fix the problem, Congress last summer gave the FCC new authority to auction the licenses. But the lawmakers said the FCC must first give the pending applicants six months to settle competing bids. To encourage settlements, the commission also waived rules that prevent companies from paying off other applicants to drop competing bids.

The FCC also is allowing companies without pending bids for the licenses to pay off those that have filed applications. The move allows Paxson and other so-called white knights to stake claims on the unassigned licenses through private auctions among those seeking the CPs.

Their bids will not buy the broadcasters a second channel for digital TV. But some bidders say they might be able to shift from analog to digital broadcasting on the channels they acquire once digital receivers are widely in use.

While only a handful of settlement agreements have reached the FCC by last week, officials were expecting more as broadcasters seek to beat Friday’s deadline.

“People are going crazy right now,” says Washington communications lawyer David Oxenford, pointing to the approaching deadline. “Next week is going to be a blur,” another lawyer added last Friday.

Once the deadline passes, companies that have been unable to pay off competing applicants likely will have to pay the government instead for the right to broadcast on the frequencies. The FCC has launched an effort to establish auction rules for the analog TV and radio licenses, but that rule-making effort is not yet complete.

Broadcasters in the markets targeted by the new networks voice little concern about the prospect of an added compet-

NATPE: More foreign, less domestic

International buyers and sellers pump life into show

By Price Colman

NATPE ’98 emerged as an increasingly busy global marketplace for international producers and buyers. On the domestic side, however, activity appeared to be down.

“This is the only conference that has all the international buyers in one place,” says NATPE President Bruce Johansen. “You don’t see many American buyers going to MIP and MIPCOM.”

The influx of international buyers and advertising executives helped drive up early attendance numbers for this year’s conference. First-day registration totaled 16,782, up from last year’s early return of 15,673. Johansen said the 35th annual event’s numbers likely would increase by 1,000 by the end of last week.

The convention’s international registration already had surpassed that of last year, with 3,427 international TV executives registered as of Monday night. In 1997, 3,265 international buyers and sellers made the trek to New Orleans. And there were 300 foreign exhibitors this year, up from last year’s 240.

Final results won’t be available for several days, NATPE staffers say.

While previous shows have been criticized for being an insider scene—U.S. companies dealing with U.S. companies—NATPE 1998 was fertile ground for overseas firms dealing with their peers and, increasingly, with U.S. companies.

“This is a global business now,” Johansen says. “The general manager in a local market needs to be aware of what’s happening internationally. ... Studio executives will say that over 50 percent of their sales are coming from international.”

Fred Cohen, president of King World International and chairman of NATPE’s international committee, says this year’s show was the best market he’s seen from an international perspective. “NATPE is definitely becoming more important on the international side. There are more buyers from more channels and more sellers. I wish we had five days. The international people are used to five and six days at MIP and MIPCOM.”

During the show, King World cleared Roseanne in a number of international markets, including England, Australia, New Zealand, Canada and Finland. Hollywood Squares is currently on or cleared in Poland, Russia, Belgium, Germany and several other countries, and Oprah is in 135 countries. The talk show launched two weeks ago in Moscow, where, says Cohen, “I think it’s the number-one or -two show.”

By 2000, Cohen says, NATPE will be 60% domestic and 40% international, on its way to becoming 50-50.

International participants praised NATPE as fertile ground for networking, but some domestic independent producers took shots at what they saw as organizational problems.

NATPE “is excellent,” says Mary Pittelli, executive director of TAP, which represents pay TV programmers targeting Latin America. “Cable operators from all over Latin America come to NATPE looking for programming. It’s like a mini MIPCOM.”

Because independent producers were sequestered in one corner of the convention floor, “there’s no incentive for people to come over here,” said Wendell Walton of Mickey Corcoran Productions of Beverly Hills, Calif. Nonetheless, Walton was happy with overall early traffic at his booth.

That traffic eventually fell off, according to another participant. “The feeling in the city is that there’s no one here,” one programming executive said on day two.

Johansen, however, dismissed the notion that the show had lost any steam.

“Last year, the show was a week earlier and inconvenient for a lot of people. The weather was nasty and a lot of people were ill,” he says. “It was difficult for people to get here and not as attractive a proposition. ... Now the business is very strong. Stations, for the most part, came off a very strong fourth quarter.”

That strength notwithstanding, several rep sources say that markedly fewer of their clients—down as much as 25% from last year—attended this year’s conference. The reason: A number of new programs—talkers

Donny & Marie, Roseanne, Howie Mandel and game show Hollywood Squares—are launching earlier and thus required deals done before NATPE.

"That's not a new phenomenon," Johansen says. "But the selling and buying of TV programs is a smaller part of what this whole conference is about."

Networking may be a big part of NATPE, but some executives are pondering the worthwhileness and expense of that. "The question is whether meeting and greeting is business, and that's what we're trying to figure out," says Bill Carroll, director of programming at Katz Television.

Trigony takes over NATPE chair

Universal Television Chairman Greg Meidel officially passed the baton as NATPE chairman last week to Cox Broadcasting President Nick Trigony. Trigony, president of Cox since 1990, is the former chairman of the Television Operators Caucus and has served on the NATPE board for the past three years. "I don't think there is anything major we need to do," Trigony said. "We just need to continue to refine things."

Other new faces for NATPE in 1998 include Vincent Grosso, vice president of interactive media at NBC, and Allison Bodenmann, senior vice president and broadcast director at Jordan, McGrath, Case and Taylor. They become member representatives of NATPE's executive committee. CNN Newsource Sales President Susan Grant has moved into the first vice chair position. Meidel will serve as immediate past chair.

Kings of the convention

King World celebrates new daytime and prime time projects with $5 million Elton John bash

By Joe Schlosser

The King brothers lived up to their party-animal reputations last week at NATPE. King World Productions hosted the biggest bash (an Elton John concert at the Superdome) and perhaps spent the most money of any distributor at the show—$5 million, according to Roger King. To top it off, KWP even broke some news, which was in relatively short supply at the convention.

The company's message at every turn was "we're bigger than ever," as KWP Chairman Roger King put it, and far from the endangered species of the not-too-distant past.

What many saw as the biggest news of the show was KWP's landing of Whoopi Goldberg as the center-square occupant in Hollywood Squares, the comedy-disguised-as-a-game show that bows this fall.

That news, announced at Tuesday evening's concert, overshadowed KWP's launch of a daytime talk show (a venture with NBC) planned for fall 1999. The Kings liken the show to the current leader in daytime talk, Live with Regis & Kathie Lee.

KWP also announced a planned foray into network prime time television. It has struck deals with two writers and two producers to develop a "gangster series" called Murder, Inc. The show may be produced with NBC Productions, according to King World, but all the major networks will get a pitch.

Co-hosts of the 1999 show aren't firm yet, but there is speculation that Whitney Island New York weathercaster Al Roker and Dana Reeve (wife of actor/director Christopher Reeve) are among the leading candidates. The pair hosted a nationally syndicated Christmas special that got huge numbers in New York. Also mentioned as a possible co-host is MSNBC anchor Jodi Applegate. The show, which will originate from New York, is cleared on the NBC-owned stations.

"We said we were going to branch out and we are doing it," said Roger King. "We're going into prime time for the first time. We're going to do the morning talk show and there are a number of other things we still have coming."

Goldberg signed a multiyear deal to appear on and co-executive produce the King World/Columbia TriStar co-production of Squares. At a press conference last Wednesday, she defended her decision to enter the game show arena: "This does not mean somebody's career is dead. We are going to get people who would not normally be on a show like Hollywood Squares to come and have some fun, and we'll treat them like royalty."

Goldberg said that after 37 films and numerous comedy specials, her career had come to a crossroads and it was time for something different. Squares will be produced by John Moffitt and Pat Tourk Lee, comedy writer Bruce Vilanch and veteran game show producer Steve Radosh. KWP has confirmed that Roseanne, the host of its new 1998 talker, will appear on Squares during the sweeps.

On the Murder, Inc. project, Nick Pileggi and Ken Solarz have been hired to write the first two scripts, and the production team of Albert Ruddy and Andre Morgan will supervise development. Pileggi co-wrote the films "Goodfellas" and "Casino," while Solarz has produced prime time series including The Untouchables and Profiler.

Paxson goes shopping at NATPE

New network acquires two new shows, programming chief

By Joe Schlosser

owell “Bud” Paxson went to last week’s NATPE conference in New Orleans to tie up loose ends for his soon-to-be broadcast network and to talk to potential affiliates. Paxson says he accomplished that, but there were little things at the conference that annoyed him.

The World Wrestling Federation put out a vaguely worded release at the convention heralding its new Friday afternoon show on Paxson stations. The pairing of Paxson and World Wrestling is an unlikely combination, and Paxson says the arrangement is not exactly as billed. According to Paxson, the WWF purchased eight weeks of infomercial time to run in February and March on Paxson’s 73 stations.

“It has nothing to do with Pax Net,” Paxson said Friday from his headquarters in Palm Beach, Fla. “That was strictly an infomercial deal. That’s what I do right now, sell infomercials, and they purchased some time.”

Pax Net, Paxson’s family-oriented broadcast network, is slated to launch on Aug. 31 and will run a “small amount of infomercials.” Paxson hinted that WWF will not likely air on Pax Net, or at least not in daytime or prime time viewing hours, come launch time.

Paxson announced last week that he has acquired off-network rights to Paramount’s Diagnosis Murder and The Father Dowling Mysteries for Pax Net. Diagnosis Murder was the final piece of Paxson’s 6 p.m.-midnight weekly prime time puzzle, a lineup that includes Touched by an Angel: Dr. Quinn, Medicine Woman, and three other one-hour shows. Father Dowling, Paxson says, likely will run as a strip in daytime.

Paxson says he is pleased with the acquisitions, but not with the media speculation beforehand. In an unusual move last week, Paxson, in a press release for the two Paramount shows, added a sentence that said he had “passed” on the off-network rights to Columbia TriStar’s Party of Five.

“There was a lot of media attention out there saying that we were going to get Party of Five or that we had already acquired it,” Paxson says. “The legal guys wanted me to put that in there, and truth is, we never seriously considered it.”

The network’s schedule is nearly filled, with only a small amount of daytime programming and family-oriented movies left to acquire. And Pax Net executives have “taken home a lot of move data and packages” to mull over for the next month.

Another piece of the Pax Net puzzle was solved during NATPE. Paxson announced that Bill Scott will take over the top programming job at the new network. He has been a member of the Paxson Communications board of directors and a longtime consultant to the company. Scott also is the former president of the Travel Channel, of which Paxson owned the majority until last September.

Paxson says he is amazed at the amount of traffic that his network’s booth attracted at NATPE. Extra personnel were flown in from Florida during the conference to help handle the load, Paxson says. And he added: “I was amazed at how many stations said they were thinking about defecting to Pax Net. We’ll get our 80% [coverage].”

NBC gets animated for Super Bowl

Uses innovative SGI graphics

By Glen Dickson

BC Sports teamed up with Silicon Graphics Inc. to offer the latest in real-time 3-D graphics for yesterday’s telecast of Super Bowl XXXII, including 3-D animations of receivers’ pass routes and animated models of defensive formations.

In the first application, NBC used Multigen software running on SGI Onyx2 computers to generate a 3-D model of Qualcomm Stadium in San Diego and to show real-time animations of receiver patterns, yardage after catch, passing charts and quarterback fade patterns. The information was constantly updated throughout the game at three input stations using SGI O2 workstations.

“It’s a huge improvement to slapping numbers on the screen,” says NBC commentator Randy Cross, who at press time planned to use the graphics package at the end of each quarter.

NBC’s second trick was 3-D animated models of defensive packages, shown after a play to give fans a quarterback’s view of the defense. The 3-D “Football-Guy” models, which included linemen, linebackers and backs, were developed with Boston Dynamics software. “People have never seen this before,” says Cross, who thinks the Football-Guy animations might also serve as a training tool for NFL quarterbacks.

SGI lent all the hardware and software to NBC at no charge, considering the exposure of its technology to be enough of a benefit. “To use it for something as important as a Super Bowl really legitimizes it and shows how reliable it is,” says Greg Estes, SGI director of entertainment marketing.
Networks scramble to cover ‘internegate’

ABC was first to broadcast news Wednesday morning; PBS talks to Clinton; anchors pulled back from Cuba

By Paige Albiniax

The Washington Post beat ABC News by mere minutes with last week’s story on the President Clinton sex scandal, but ABC News was hours ahead of the rest of the broadcast and cable networks.

ABC News claims it broke the story, and, if the segment’s producers did not see the Washington Post article, they are correct as far as they knew. An ABC spokesperson says that ABC started working on the story on its own the weekend before it broke.

In the end, however, the Post was on newsstands by 12:30 a.m. ET Wednesday, while ABC Radio went with the story at 12:45 a.m. ABC World News Now broke the first television story at 2 a.m. ET.

Newsweek reporter Michael Isikoff had the story first, but the newsweekly’s editors decided late Saturday (Jan. 17) to hold it—to give special prosecutor Kenneth Starr more time to gather his case. Word of Newsweek’s decision leaked to Internet gadfly Matthew Drudge, who printed a blurb about Newsweek’s crisis of confidence on his popular Drudge Report Website on Jan. 18.

From there, the race was on. While ABC led the pack, CBS repeated the slow news reflex that drew criticism when Princess Diana and her companion, Dodi Fayed, were killed in a car crash late last summer. The network ran its first story on Clinton and his alleged affair with White House intern Monica Lewinsky during CBS This Morning, which airs at 7 a.m. ET.

ABC updated its broadcasts all night. Fox News Channel did the same, first airing the story at 1:30 a.m. after seeing the Washington Post story. CNN’s Headline News picked the story up from the Post at 3:30 a.m. ET, and CNN independently confirmed the story at 4:15 a.m. ET.

NBC’s David Bloom aired that network’s first report at 5 a.m. on NBC News at Sunrise. MSNBC made its first mention of the story at 6 a.m. on Don Imus’s program, during which Imus discussed the Post article. Imus had referred to the Drudge report the morning before.

The next chance for the networks to win the breaking-news race was at 3:30 p.m., when PBS led the networks live footage of Jim Lehrer’s exclusive, prescheduled interview with the President.

In the middle of Wednesday afternoon the networks broke in to air a clip from that interview, which was shown in full on The NewsHour with Jim Lehrer later on PBS. ABC News again was first, and it was the only network to air parts of the interview live starting at 3:30 p.m., according to a network spokesperson. ABC’s choice to go live was somewhat controversial, because the other networks understood their agreement with PBS to mean that they could air only one minute of edited footage of the interview.

A PBS spokesperson says that all the networks handled the coverage appropriately, but that if ABC had asked if it could air the interview live, PBS would have said no. ABC did not ask, however. PBS says that it was not explicitly written in the agreement that ABC could not air live footage, so PBS does not feel it has cause for complaint.

CBS, however, waited nearly 20 minutes before going on the air with Dan Rather from Cuba. A CBS spokesperson says that the network made an editorial decision to delay airing the PBS interview and that no one at the network felt that CBS’s coverage was slow.

The other networks followed with short, edited clips from the interview. MSNBC aired its first clips from the interview at 3:32 p.m.; NBC broke in at 3:34 p.m.; CNN broadcast it at 3:35; Fox News Channel ran a segment at 3:37; CBS was on the air with it at 3:58.

By Wednesday night, all the news organizations were regularly pumping out information about the Clinton scandal. By Thursday night, all three networks had flown their anchors—ABC’s Peter Jennings, NBC’s Tom Brokaw and CBS’s Dan Rather—back from Cuba, where they had planned to cover the Pope’s historic visit. Jennings went to New York, while Brokaw and Rather went to Washington.
DIRECtv's ethnic-into-ethnic plan

Company says it is targeting niche-language programming, not local-into-local

By Price Colman

DIRECtv isn't alone in seeking to tap ethnic niche markets in the U.S. Competitor EchoStar Communications Corp. is preparing to move foreign-language niche services to its full-CONUS bird to its satellite at 61.5 west.

But DIRECtv maintains that, unlike EchoStar, it doesn't plan to deliver local signals into local markets.

"It's not part of the plan," DIRECtv spokesman Bob Marsocci says.

DIRECtv announced last week an in-house deal with PanAmSat that will allow it to add up to 120 channels of specialty programming to its DBS service.

That's enough capacity to offer local-into-local programming to every local station in the top 25 U.S. television markets if DIRECtv were to adopt EchoStar's strategy of offering only the top four broadcast affiliates in each market.

Not surprisingly, some observers wonder whether the DIRECtv/PanAmSat deal paves the way for DIRECtv to offer local-into-local.

"It won't happen, says Marsocci, nor will DIRECtv use the new capacity for high-speed Internet service. Instead, as advertised, it will focus on ethnic niche programming and, probably, HDTV programming.

DIRECtv announced earlier this month that it will begin delivering HDTV programming this fall.

The foreign-language programming plan makes sense at a modest level, says Curt Alexander of Media Group Research.

"The fact that ethnic populations in the U.S. can't get language-specific programming anywhere else makes it a must buy," he says. "People in that constituency are really drawn to programming in their native language."

At the same time, Alexander adds, "It's not a stand-alone business clearly, but a supplement to what [DIRECtv] has."

DIRECtv has contracted with Ethnic American Broadcasting Co. of Fort Lee, N.J., to fill at least six of the channels. The new channels will require a parabolic 21-by-35-inch dish capable of receiving programming from 95 and 101 degrees. That dish will be "somewhat more expensive" than the current dish, which sells for about $199, Marsocci says.

DIRECtv has not yet decided what to charge for the niche services, which are likely to draw small but intensely interested audiences.

Whether DIRECtv has a local-into-local plan remains to be seen.

The company denies it, but others point to DIRECtv's desire to launch a fleet of six Ka-band birds, all in full-CONUS slots. If the FCC approves the company's petition to expand into the Ka-band arena, Marsocci says, DIRECtv will use the birds to deliver more movies, sports, children's programming, ethnic programming, data and multimedia services. The company hopes to gain FCC approval to pair 240-watt transponder birds at 96.5, 101 and 105.5 degrees west to deliver those services.

The FCC has given no indication of when it will rule on the request, and construction of the birds hasn't started. Even given an FCC green light, Ka-band service from DIRECtv is unlikely before 1999 at the earliest.

CEMA sounds alarm over TCI DTV plans

The Consumer Electronics Manufacturers Association last week decried Tele-Communications Inc.'s plans to deliver less-than-optimum HDTV signals to its digital subscribers.

"Manufacturers and broadcasters have committed to bringing Americans the astounding picture resolution of HDTV," said CEMA President Gary Shapiro at the NATPE convention. "But now TCI's 14 million customers may never have the chance to see it. This is a huge tragedy for the American consumer."

"The tragedy," in Shapiro's view, is TCI's intention to deploy new digital set-top boxes that will degrade broadcasters' planned HDTV programming. According to Shapiro, the boxes will downconvert the HDTV broadcasts in either 1060i or 720P formats to the lower-resolution 480P format.

"The FCC must ensure that if broadcasters transmit programming in high definition, cable companies are required to pass the programming through to the consumer in the same manner. Otherwise, cable subscribers will be involuntarily downconverted to a picture resolution no better than today's TV," Shapiro told his NATPE audience. "Any effort to label 480P as true HDTV is an attempt to fool American consumers."

"A TCI spokeswoman says that Shapiro's description of its plans "is not a correct characterization at all." The next generation of advanced digital set-tops that TCI will begin deploying later this year will be able to pass HDTV signals to TV sets, according to the spokeswoman.

But Jerry Bennington, senior VP of CableLabs, who appeared at NATPE with Shapiro, conceded that the planned boxes could not handle the higher-resolution formats. However, he said, the boxes could be designed to pass through the broadcast HDTV signals directly to HDTV sets. "One thing we've been talking to the networks about is not to tie the way the signal is transmitted to the way we display it," Bennington said.

General Instrument spokesman Dick Badler said that the set-top box is still a work in progress. "The current box does not have HDTV capability, but that's anticipated as demand warrants."

Executive shuffles

By John M. Higgins

There was shuffling in the executive suites of cable and DBS companies last week, as key executives left Comcast and Cablevision Systems and a new president entered EchoStar.

At Comcast, cable division president Tom Baxter resigned, ending nine years as chief of system operations. At Cablevision, COO Robert May exited after just 16 months. And EchoStar picked up John Reardon—a former executive with MTV, TCI Music and failed interactive TV programmer Zing—as president.

Baxter’s exit was a surprise. He ran what Wall Street analysts considered one of the most efficient operations in the industry. Comcast executives say that Baxter had talked about leaving the company since last fall. Tiring of a larger company and hoping to take advantage of the financial security afforded him by last year’s surge in Comcast’s stock price, Baxter wanted to get involved in an entrepreneurial venture.

Comcast Corp. President Brian Roberts praised Baxter and said that he will remain a consultant to the cable division after he leaves in February.

May arrived at Cablevision in 1996 to help CEO James Dolan get his arms around the company’s system operations. But he had no background in media. Earlier in his career, he spent 20 years at Federal Express, where he created its much-praised business logistics unit. Cablevision says May resigned to follow “different opportunities.” Units reporting to May now will report to Dolan until a replacement is named.

Reardon, EchoStar’s new president, worked in advertising for MTV before becoming president for three years until 1990. More recently, he founded Zing Systems, a TCI-backed interactive programming venture that collapsed in 1995. TCI then put him in charge of TCI Music, a venture that is trying to collect various audio, video and computer services to be offered through digital cable. Reardon exited that slot last year.
Cheers greet Kennard’s first address

However, broadcasters differ over new FCC chairman’s agenda

By Chris McConnell

It wasn’t like Reed Hundt’s first NATPE speech.

Addressing broadcasters for the first time, FCC Chairman William Kennard last week greeted the industry with words of praise. Unlike his predecessor, Kennard steered clear of programming issues except to laud the industry’s work, particularly its news coverage.

“You have opened up the world to viewers by allowing them to go places and see things they would never have seen on their own,” Kennard said. He cited the industry’s coverage of Martin Luther King Jr.’s 1963 “I Have a Dream” speech as well as ABC’s Jan. 18 Wonderful World of Disney movie about civil rights figure Ruby Bridges.

At its conclusion, Kennard’s speech drew a standing ovation.

Some broadcasters and lobbyists at the NATPE ’98 Program Conference and Exhibition in New Orleans appeared to mean it. They contrasted Kennard’s compliments with the criticism of TV violence that Hundt voiced when he first addressed the convention in 1994.

“It was a refreshing and important contrast to the Hundt speech,” said Washington broadcast lawyer Mickey Gardner. “Bill has established himself as a friend of the broadcast community and I think you heard that,” added Glencairn Ltd. Broadcast Properties President Eddie Edwards.

But the doubts of others were not assuaged, with some maintaining that the new chairman’s agenda will not differ significantly from Hundt’s. For instance, Kennard said he soon hopes to write new rules on broadcast public interest obligations in the digital age.

“Broadcasters have been given new ways to expand into the digital age, so it is only fair to expect that they provide new ways of serving the public interest,” he said.

Kennard added that he is looking forward to hearing the recommendations of the advisory committee assembled by Vice President Gore to study the public interest issue. “I hope that their process will yield useful suggestions for the FCC,” Kennard said.

FCC Chairman Bill Kennard praised broadcasters’ news coverage.

“’It’s the same agenda as Reed Hundt, but he’s nice,’ one broadcaster said in response to Kennard’s comments. “I think broadcasters are in for a hard time.” Another agreed, pointing to the presence of three Democrats on the commission, a majority.

Kennard devoted much of his speech to discussing steps that the FCC can take to speed the industry’s shift to digital broadcasting. The FCC will vote on a final table of DTV channel assignments this Thursday (Jan. 29).

Broadcasters have asked the FCC to preempt local rules on tower siting as a means of speeding DTV implementation. Kennard said he thinks the FCC should consider preemption “only as a last resort.” He instead urged broadcasters to work with local governments “to achieve workable solutions.”

He also raised the possibility of establishing a “strike force” of FCC staff members to assist local governments in reviewing technical issues.

“You need to reach out to local government,” Kennard said.

Tauzin slams NFL deals

Says consumers will be forced to pay for unwanted programs

By Harry A. Jessell

House Telecommunications Subcommittee Chairman Billy Tauzin (R-La.) told broadcasters in New Orleans that he is upset by the prices the broadcast and cable networks paid for National Football League rights.

All told, ABC, ESPN, CBS and Fox agreed to pay nearly $18 billion to the NFL to telecast games over the next eight years.

Speaking at the pre-NATPE conference of the Association of Local Television Stations, Tauzin seemed particularly upset by ESPN’s $4.8 billion bid for a Sunday-night package of games. Consumers shouldn’t be “forced to buy programs they don’t want to get programming they do want,” he said.

Although Tauzin didn’t mention ESPN by name, aide Ken Johnson confirmed that the congressman is concerned because ESPN is passing on some of the NFL cost to cable operators in the form of higher affiliate fees. The operators, in turn, hike cable subscribers’ rates and everybody ends up paying for the games, even if they don’t watch football. “Is that fair?” Johnson asked.

Marketing ESPN on an a la carte basis to prevent non-football fans from paying for the NFL doesn’t make sense, says ESPN spokeswoman Ronni Faust. That would lead to decreased ad revenue and increased marketing costs, “necessitating higher fees,” she says. “ESPN has been built on widespread distribution.”

Tauzin also said he supports legislation that would enable DBS operators to distribute local broadcast signals.
Time
zones
are so passé.

Eastern time, Mountain, Central, Pacific. These days, they're practically the same. Because whether it's 11 p.m. or 2 a.m. when news happens you better have it. With over 500 affiliates and 32 bureaus worldwide, depend on our unparalleled resources to come through when you need them most. From more and better video to live, breaking coverage the second we get it, we do whatever it takes to keep you up-to-the-minute. No matter where that minute happens to be.

www.americanradiohistory.com
within their local markets. Earlier this month, EchoStar initiated such service, offering the Big Four affiliates in six markets.

Delivering local broadcast signals is key to DBS companies competing effectively against cable, Tauzin said. The lack of such signals is the “Achilles heel” of DBS.

Tauzin told the broadcasters that he believes in “regulatory parity” and for a must-carry requirement: DBS operators that offer local service must carry all local stations.

Regulatory parity between DBS and cable should be “our guide,” Tauzin said. “We want to make sure we are not picking the winners or losers or leaving anybody out.”

But talking to reporters after the speech, Tauzin said he does not believe satellite companies should be burdened immediately with must-carry obligations if they don’t have sufficient channel capacity.

Just like some small cable operators, Tauzin said, EchoStar and others should be exempt from must carry for a “transition period.” But at some point in the future, he said, they will have to carry all signals.

Tauzin also renewed his call for the FCC to relax the rules barring common ownership of two TV stations in a market and the common ownership of a broadcast station and daily newspapers in the same market. The agency should reconsider the rules “as quickly as possible,” he said.

Tauzin said he continues to oppose any plan to make broadcasters pay for digital TV spectrum as long as they use the spectrum for HDTV. But as the law stipulates, he said, if broadcasters use any of the spectrum for non-broadcast services they should pay fees.

Tauzin also criticized proposals to make broadcasters give free ad time to political candidates. Among other things, he said, such proposals are “dangerous” to democracy. They represent incumbent politicians’ efforts to control how future politicians are elected.

### Divided FCC debates ownership

**Ness, Tristani urge diversity; Furchtgott-Roth, Powell think rules need another look**

By Chris McConnell

FCC commissioners appeared to divide along partisan lines at last week’s ALTV conference when discussing the TV industry’s ownership rules.

Republican commissioners Harold Furchtgott-Roth and Michael Powell stressed the need to reevaluate the rules in light of changing market conditions, while Democratic commissioners Susan Ness and Gloria Tristani emphasized the importance of diversity. The fifth commissioner, FCC Chairman William Kennard, did not participate in the ALTV conference panel.

The commissioners currently are reviewing the TV ownership restrictions, including rules that bar companies from owning multiple stations within a market.

“I support a pretty rigorous reevaluation,” Powell said, adding that he feels industry changes have undermined some, if not all, of the rationales for instituting the ownership rules.

Powell punctuated his point about programming diversity by holding up a copy of Monday’s TV listings. “The role of the commission is to follow the law, not invent it,” added Furchtgott-Roth.

But Tristani voiced concerns about the “monopoly of ideas” in a consolidated marketplace. And Ness stressed that a wide range of programming choices does not ensure a diversity of voices: “The underpinning of democracy is to receive a wide diversity of voices.”

Also weighing in was Commerce Department Assistant Secretary Larry Irving, who voiced concerns about the consolidation that followed the decision of Congress to relax radio ownership rules. “I don’t want to see that happen in television,” Irving said.

He also said that the National Telecommunications and Information Administration is conducting more research on the industry’s use of local marketing agreements (LMAs), deals in which one station operates another in the same market. Irving said he is concerned that some of the LMAs “are duopolies disguised as LMAs.”

The FCC commissioners are not expected to take up the ownership rules before April. Higher on their immediate agenda is the table of allotments assigning each station a digital TV channel. The FCC is expected to vote on the final table at month’s end.

Ness said the final table will address the concerns of UHF stations that the original plan did not grant them enough power to broadcast digital signals. “It should be that the signal passes through buildings,” she said.

Ness also said a proposal by the Association for Local Television Stations involving the use of tilt-beam antennas to boost power “seems to be a very legitimate way of approaching the problem.” The other commissioners did not comment on the allotment table.
Every step in video production affects the next.

Your first is the most critical—start with 4:2:2!

To get the most out of today's digital editing systems, you need to begin with the best raw footage possible. And that means shooting in 4:2:2. With DIGITAL-S, you get 4:2:2 color sampling with perceptually lossless compression. This produces an image that remains free of annoying artifacts that could build up through various steps in post production and digital distribution.

DIGITAL-S also offers superior chroma resolution, producing more well-defined colors, chroma keys and effects. In fact, all high-end systems, including the best non-linear editors, require 4:2:2 to achieve these benefits. The result is performance and quality that can stand up through each phase of digital video production. Shooting in a 4:1:1 DV format compromises your image, and you can't bring back the quality once it's lost.

Take your first step into high performance. Make it DIGITAL-S. For more information call:

Copyright to study local-into-local

Office will examine EchoStar request to deliver TV stations in top 20 markets

By Paige Albinak

The U.S. Copyright Office will examine whether current law allows direct broadcast satellite companies to offer local broadcast signals in certain local markets, said Bill Roberts, the agency's senior counsel.

EchoStar Communications wants to offer local broadcast signals to all viewers in the top 20 TV markets, but needs a change in the law to do so legally. EchoStar last month asked the Copyright Office to rule that the law does allow satellite companies to retransmit local signals in local markets. The Copyright Office last week said that it would open an inquiry.

EchoStar earlier this month began offering local signals to viewers in New York, Chicago, Boston, Washington, Atlanta and Dallas who cannot receive local signals clearly over the air. The DBS company plans next month to offer that service to viewers in Detroit, Philadelphia, Baltimore and Miami.

EchoStar's argument turns on the legal interpretation of the term "unserved." Traditionally, "unserved" has been used to describe viewers in a market that could not get a clear broadcast signal over the air by using an antenna. EchoStar would like the Copyright Office to rule that "unserved" defines viewers who can get over the air only one local network signal from each affiliate.

In some markets, which EchoStar would call "served," viewers receive overlapping signals. In Philadelphia, for example, viewers may be able to receive signals from ABC affiliates in New York and Wilmington, Del., as well as from the Philadelphia affiliate.

In Atlanta, however, a viewer receives only the signal of the Atlanta ABC affiliate, because there is no overlap. EchoStar wants that type of market to be defined as unserved.

That definition also would work to EchoStar's advantage because it would keep many broadcasters happy. If EchoStar retransmits an affiliate's signals into its own designated market area but does not retransmit those signals into another affiliate's market, it will provide affiliates with wider distribution without infringing on someone else's market.

But if EchoStar goes ahead under that business plan, broadcasters still will argue that the DBS company has to adhere to the same must-carry and retransmission consent laws that cable providers must abide by. If Congress agrees with broadcasters and the cable industry that DBS should bear much of the regulatory burden as cable, then DBS providers will have to carry all local stations in a market and they will have to negotiate carriage deals with each station.

Changing the law, or at least the way it is interpreted, would make all the difference for EchoStar, which has invested $500 million in two new satellites specifically to offer local service. If the Copyright Office rules in EchoStar's favor, the company could begin offering local service to all viewers in such markets like Atlanta, where there is no signal overlap between affiliates.

Whether the Copyright Office will rule in EchoStar's favor remains to be seen. Once the Federal Register issues a notice of inquiry this week, there will be a 30-day comment period followed by a 30-day reply period. The Register of Copyrights then will issue a final ruling, but she has no deadline for doing so.

Congress will examine the relevant law this session. EchoStar hopes to get something passed before the end of the year, although many Hill staffers and lobbyists do not expect such legislation to pass this year.

---

Broadcasters concerned about DBS must-carry

Broadcasters last week pressed policymakers on whether they plan to impose must-carry obligations on EchoStar.

"There's some trade-off here," Commerce Department Assistant Secretary Larry Irving said. He added that the administration wants to promote the ability of DBS companies to compete with cable, but also wants to protect local broadcasters.

Irving and other government officials offered their thoughts during the opening session of the Association of Local Television Stations conference in New Orleans.

The congressional and administration officials voiced no plans to act in the interim while EchoStar proceeds with its plan to deliver the local signals to viewers "unserved" by a local broadcaster.

That worried broadcasters, who voiced fears about a renewed court battle over the rule requiring cable systems to carry the signals of local broadcasters. Others were concerned that stations not affiliated with one of the four major networks will be left out of the satellite service. "It will be to the detriment of my station," one broadcaster said.

The policymakers also appeared to be taking no positions when pressed about their plans for applying the must-carry law to digital television. FCC officials are expected to launch a rulemaking on the issue in February or March.

Anita Wallgren, adviser to Commissioner Susan Ness, said the commission could impose a requirement that the cable companies carry all 6 mhz of the digital channel or carry only the primary broadcast on the digital channel. Wallgren also said the commission could elect to impose no must-carry requirement on the digital channel while cable companies continue to deliver the analog channel.

"The chairman has not come out one way or another on this," Susan Fox, adviser to FCC Chairman William Kennard, said of the must-carry issue. Advisers for the other commissioners also said their bosses are continuing to gather information on the topic.

Robert Pepper, chief of the FCC's Office of Plans and Policy, meanwhile, worried that cable's first wave of digital set-top boxes will not display high-definition signals from broadcasters. Pepper suggested that the demand for high-definition programming might not develop if viewers are not exposed to the service.

Disney moving kids to UPN

Animation lineup to air on netlet in 1999

By Joe Schlosser

Word has it that UPN and Buena Vista Television have reached a long-term deal for the network to broadcast Disney animated shows.

The deal will start in the fall of 1999 and will be a two-hour block to air six days a week (Monday-Friday afternoons, Sunday mornings).

Displaced from the UPN lineup will be teen-targeted Sweet Valley High and companion Breaker High, both from Fox-owned Saban. According to sources, those two shows are out of production and UPN has been given the go-ahead to slate replacements.

But Saban will not be out of the loop. UPN is reportedly poised to create a two-hour Sunday morning block (9-11 a.m.) for the 1998-99 season programmed with Saban product The Incredible Hulk and Friends, Beetlebongs, X-Men and Spiderman. All are from Marvel Entertainment and distributed through Saban.

Sources say that the 1998-99 season will likely feature a one-hour block of Disney shows on the UPN stations, Monday through Friday only. This new deal will not affect the Disney-Kellogg alliance, which will continue 1998-99 season.

The programs currently in that 90-minute syndicated Disney block are 101 Dalmatians, Mighty Ducks, Scaredy Cat and Ducktales.

The new long-term deal with UPN that starts in 1999 will almost certainly include Doug. Sources say other shows being considered are Disney’s Hercules and Pepper Ann.

Neither parties would comment and sources say the deal is still being finalized.

Fox to affils: Show me the money

Network says it needs stations to help with programming costs, promotion, marketing

By Steve McClellan

At the network’s affiliate meeting in New Orleans on Jan. 17, Fox executives told station managers that as the stakes get higher, affiliates are going to have to make a greater contribution—in marketing, promotion, programming and probably cash—to make the business work.

“IT’s an appropriate message,” said Fox Television Chairman Chase Carey. “It’s a reality that for us to continue to be a strong competitor we have to invest aggressively, and our ongoing working relationship with affiliates must evolve to deal with those realities.”

Obviously, the recently completed National Football League rights renewal is the most glaring example of soaring program costs. Fox agreed to pay $550 million a year—a 39% increase—for eight years. Fox did not say how much it expects its affiliates to pony up.

But Carey did say that a proposal would be outlined shortly and that the plan called for affiliates to pay more going forward just as Fox is paying more.

For the last NFL package, Fox affiliates agreed to forfeit to the network the retransmission fees connected with the launch of the FX network.

On the digital front, affiliates were briefed on a program that Fox has put together to help them maximize the strength of their new signals as they prepare to convert from analog. One quid pro quo: Fox wants affiliates to forgo launching any new local-market digital services. Instead, it wants all new digital services to be planned and coordinated with the network.

“Together we must find the business plans that work in the digital world,” said Larry Jacobson, president, Fox Television Network. The network will spend much of the next year exploring new services, he said. “We don’t have all the answers yet, but the potential for Fox digital services is so profound that we cannot rule anything out. And so we ask you to reserve your broadcast spectrum for these new services to be built together.”

The digital signal maximization program has four elements. Fox will help affiliates design their antennas and has
committed up to $30 million to purchase and install digital satellite receivers at local stations. The network also has secured volume discounts from digital equipment vendors, including The Andrew Corp. (antennas); Comark (transmitters), and co-owned News Digital Systems (compression technology). Fox also will share reams of proprietary research with affiliates, Jacobson said, to help them design better digital stations.

Like Carey, Jacobson stressed that affiliates are going to be paying more to help the network shoulder spiraling programming costs, which he said have “almost doubled” in the past few years. “There must be a financial balance on either side of our relationship if the mutual interdependence of our past is to continue into the future.”

Jacobson said Fox “will write off hundreds of millions of dollars on football,” as it did with the last rights package. Fox executives declined to speculate on what form affiliate contributions for the NFL might take. Clearly, affiliates want to pay as little cash as they can get away with. “I can’t see cash myself,” said Kevin O’Brien, executive vice president, Cox Broadcasting, and a Fox affiliate board member.

Carey said that negotiations to restructure the Fox Kids Network will be completed by the end of February. A proposal from the network will be submitted by Feb. 15, and affiliates need to respond by the end of the month. He said that if enough affiliates accept the deal it will be implemented. If not, the old deal will remain intact. Fox and affiliate executives didn’t rule out a possible link between whatever new FKN agreement is reached and the contribution that affiliates make for football. Affiliate executives told the network they wanted to see at least an outline for the proposed NFL contribution before signing on to a new Fox Kids Network financial structure.

At the meeting, affiliates not yet in the news business were urged to move swiftly to draw up local news plans. “It is very difficult for the network and 88 affiliates who have invested in news to support those who have not. Your failure to participate puts the entire collective at risk.” The network is spending $30 million annually to upgrade its affiliate

news service NewsEdge. Starting this year, affiliates will begin paying for the service, with negotiations to be finalized shortly, said Brian Jones, executive vice president, newsgathering, Fox News.

Jones also said that 30 Fox affiliates have signed up for the network’s news module service—turnkey national news segments to fill out local newscasts—which will be ready for delivery in 1999.

Affiliates were chastised by Haim Saban, chairman, Fox Kids Worldwide, for not doing enough to promote and market the kids area. “We need you to clear us in the strongest time periods and in pattern,” he said. “We need you to promote us outside of Fox Kids time periods. We need you to reactivate local Fox Kids Clubs and to look upon them as the powerful promotional and revenue-generating vehicles they can be.”

Saban also strongly urged affiliates that accept advertising for Nickelodeon and Cartoon Network to reconsider. “Take a hard look at what that really means and what it tells your viewers,” he said.

Saban seemed annoyed that less than half the Fox affiliates are participating in local sweepstakes developed by the network. “When we offer you a turnkey sweepstakes package, complete with third-party sponsorship opportunities, and I see that only 60 stations participate, that tells me that some of you are trying very hard to make this work and others are not trying at all.”

Peter Roth, president of the Fox Entertainment Group, briefed affiliates on three prime time program prospects.

One of the network’s “toughest assignments” for next fall is developing a contender for the Friday 8 p.m. slot. One leading candidate is The Invisible Man, which is being developed by producer Dick Wolf.

Another top contender for that time slot is Hollyweird, from the producers of theatrical hits “Scream” and “Scream 2.”

One 1999 midseason comedy that looks promising, Roth said, is a claymation series, PJ’s, with Eddie Murphy supplying the voice of the lead character.

Separately, Fox Sports executive producer Ed Goren said Fox is considering expanding its NFL pregame show from an hour to 90 minutes starting next season.

Fox also said 48 affiliates made it into the “Number 1” club in November by being first in their markets with adults 18-49. Fox arranges a special resort junket for stations making it to that club during each sweep.

Green to head Fox affiliates

Murray Green, senior vice president of Malrite Communications, was elected chairman of the Fox affiliate board of governors at the network’s affiliate meeting in New Orleans Jan. 17. Green succeeds Pat Mullen, GM of WXXI (TV) Grand Rapids, Mich., who served in the post for two years.

Four new members also elected to the board: Don Richards, GM, WRLH-TV Richmond, Va.; David Woods, president/owner, Woods Communications; Linda Gray (board secretary), GM, WXXN (TV) Indianapolis, and Joe Mazza, GM, KASI (TV) Cape Girardeau, Mo./Paducah, Ky.

Returning board members are Harry Pappas, owner, Pappas Telecasting Companies; Kevin O’Brien, executive vice president, Cox Communications; Judy Kenney (board treasurer), GM, WYSV (TV) Lansing, Mich.; Diane Frisch, GM, KTVY (TV) Boise, Idaho; Ron Cowder, GM, KWWK (TV) Waco, Tex., and Cullie Tarleton (board vice chairman), GM, WCBC (TV) Charlotte, N.C.

—Steve McClellan
**WB affiliates celebrate ratings jump**

**New WB Tuesday lineup sets record; netlet will turn attention to filling top-100 gaps**

By Steve McClellan

WB affiliates drank champagne at their meeting in New Orleans last week to celebrate the growth of their network over the past year.

To cap off the celebration, Nielsen overnight averages showed that WB's new Tuesday lineup got off to a roaring start with a record 5.0 NTI rating/share. UPN had a 2.2/3. WB's live national circulation was up to 87%, compared with UPN's 72%. WB beat CBS in every demographic category under 50 for every half hour of the night.

Last week, the same week that five Sinclair stations switched from UPN to WB, the frog network for the first time tied UPN for the season to date with a 3.0 rating. WB has tied or beaten UPN eight of the past 10 weeks.

**Russell Simmons hosts ‘Oneworld’**

Music producer Russell Simmons is set to host a new weekly show that is being billed as "the Entertainment Tonight of R&B music."

Warner Bros. Domestic Pay-TV is launching Oneworld's Music Beat With Russell Simmons for a September 1998 debut. The show is based on Simmons' Oneworld magazine and will feature R&B musical acts and news in its magazine format.

Warner Bros. had tested the market with its quarterly R&B-TV specials and had recently expanded it to a weekly syndicated show, Oneworld will take over for R&B-TV next year.

With new, top-named musical shows coming to the market for 1998, Warner Bros. executives felt compelled to get a top name attached to its program.

"We wanted to do something that really legitimized the show," says Eric Frankel, executive vice president Warner Bros. Domestic Pay-TV, Cable and Network Features. "Getting Russell does that. He is to the '80s and '90s R&B scene what Barry Gordy was to the music scene in the 60's." —Joe Schlosser

Speaking at the meeting, WB head Jamie Kellner said the feeling at The WB was "just like the feeling at Fox in its third or fourth year when it started to take off." (Kellner headed Fox Broadcasting Co. before leaving to start The WB.)

As to the competition, specifically UPN, Kellner said: "I think we're going to kick their ass." UPN, he said, jumped into the fray after WB announced its plans, "tried to buy shelf space and has made no creative advancement in three years.

"Hang on to your seats; this is just the beginning," said Kellner, telling reporters before the meeting that WB in the next two months plans to make a push in the dozen or so top-100 markets where it doesn't have an affiliate. The network will pitch UPN affiliates and available independents. If no broadcasters sign on, Kellner said, WB will pitch cable operators and extend the Web cable delivery concept to those holes in the top-100 markets. To date, Web has been using a market 100-plus strategy.

Suzanne Daniels, head of program development for The WB, offered a peek at several dramas and comedies in the works for next fall. In the drama category is a coming-of-age story, Felicity, from Imagine Entertainment. Also in the works: a project from John Ridley (The John Larroquette Show) that Daniels described as "The White Shadow for the '90s."

There's also a drama in the works about an emergency services unit that Daniels described as "M*A*S*H meets NYPD Blue."

On the comedy side is a project from Michael Jacobs (Boy Meets World) that explores a father-son relationship. Also in the works is an Addams Family remake with Tim Curry. And Castle Rock is developing a teen-targeted animation project.

Also in development, a comedy about an accountant who finances his wife's catering service, from producer Bentley Evans, who finances his wife's catering service in real life.

**CBS affiliate bill for NFL pushes $400 million**

Stations say they're 'comfortable' with that; NBC working on football-less Sundays; ABC stations not committing to chipping in for 'Monday Night Football'

By Steve McClellan

CBS affiliates may end up contributing nearly 10% of the $4 billion in rights fees that their network has agreed to pay to the National Football League over the next eight seasons. That's almost $50 million a year that will probably be a combination of cash and advertising inventory.

Details aren't yet firm, but CBS affiliate board chairman Howard Kennedy said he believes the affiliates' contribution will be "less than 10 percent of the bid price, and I think it's fair to say the affiliates as a group are very comfortable with that." Network sources confirmed that estimate. "It may be less [than 10%], but it won't be much less."

said one source. The affiliates passed a resolution committing to a financial contribution whereby stations in AFC markets would pay more than those in non-AFC markets.

Meanwhile, CBS affiliates were positively giddy after meeting with CBS officials on Monday, Kennedy said. So giddy in fact that at the end of the meeting, affiliates and network executives took turns applauding each other for recent efforts.

The ABC and NBC meetings also were upbeat, the latter surprisingly so in the wake of having lost the AFC to CBS.

NBC said it was committed to programming the 3-6 p.m. Sunday block without football. Next fall, movies will be used to fill most, if not all, of the
ACME Television

Acquisitions Totaling $196.2 million
CEA acted as the exclusive broker to ACME on the following acquisitions:

- KPLR - TV* St. Louis
- KWBP - TV Portland
- KZAR - TV* Salt Lake
- KAUO - TV* Albuquerque
- WINT - TV Knoxville

Financings Totaling $262.8 million
CEA acted as ACME's exclusive advisor related to the placement of the following instruments:

- $55,442,500 Common Units & Convertible Debentures
  CEA placed for ACME
- $40,000,000 Preferred Stock
  CEA advised ACME
- $127,370,000 Senior Subordinated Notes
  CEA advised ACME
- $40,000,000 Revolving Senior Facility**

*Closing subject to FCC approval
**Closing pending final documentation
block. The network already has approached several studios about acquiring all-barter movie packages for that purpose, according to several studio sources.

In addition, both NBC Sports President Dick Ebersol and News President Andy Lack will try to come up with "franchise programming" to fill the block starting in 1999, said NBC Television Network President Neil Braun.

Ebersol also spoke at the meeting, taking affiliates through the events that led to NBC’s passing on the $500 million price tag. What may have deflated some affiliate wrath was that a group of affiliates—including affiliate board chairman Ken Elkins, president of Pulitzer Broadcasting—was kept in the loop as the talks progressed.

Elkins told affiliates that under the circumstances, NBC "made the only prudent decision that it could" when the bidding reached a certain level. Jon Ruby, general manager of NBC affiliate KVOA-TV Tucson, Ariz., applauded NBC for making the right business decision.

Braun also outlined the timetable for a joint-venture agreement between affiliates and the network. A specific proposal and support documents will be distributed to affiliates by April 30. The plan will be discussed at the May affiliates meeting, and summer regional meetings will be convened to go over details. Braun said the hope is that by next fall a "critical mass of affiliates" will be prepared to embrace the venture.

The venture, as envisioned would "fundamentally change the economic relationship" between affiliates and the network. Braun said, "It would truly be a business partnership that will minimize the supplier nature of the relationship" that now exists.

At ABC, affiliates applauded the network’s renewal of Monday Night Football, but stopped short of making any financial commitment to help pay the freight. Affiliate board chairman David Barrett, executive vice president of Hearst Argyle Broadcasting, said a committee has been formed to consider what kind of contribution the affiliates could make.

An ABC official said the network wants its affiliates to ante up at least $30 million a year, the amount Fox affiliates agreed to when their network landed NFL rights four years ago.

**Wolf says NBC tightening programming budget**

That’s result of record fees for ‘ER’; network may have to renegotiate some deals, producer told

*By Barry Garron*

The sky-high license fee NBC will pay for top-rated drama ER is not likely to spill over to other dramas, said Dick Wolf, creator and producer of Law & Order, another NBC hit drama.

Last week, NBC agreed to pay $13 million for each episode of ER for the next three seasons. That more than doubles the highest license fee ever paid, a reported $5.5 million for Seinfeld, also on NBC.

At a Tuesday morning NATPE session, Wolf said that he was told by Don Ohlmeyer, NBC West Coast president, that the deal for ER left NBC with a tight budget for programming.

Ohlmeyer said NBC would not be ordering additional episodes of ER beyond the 22 covered in the three-season deal. "We don’t have the money," Wolf quoted the NBC executive as saying.

The networks may have to renegotiate with some shows, said Wolf, who also created New York Undercover and Players. He added that Law & Order "is already picked up for next year."

During the NATPE question-and-answer session, Wolf said increasing attention is being paid to the international market, although "I don’t think you sit down and write a show that’s uniquely appealing to Italy or Germany." Nonetheless, the high cost of producing drama makes it important for a show to have appeal overseas.

Wolf said he is in the early stages of looking at ways in which Law & Order can be adapted to the justice systems of other countries. "There’s a dream I have. I’d love to do it in England...with Helen Mirren as the prosecutor. I’d love to watch that show."

Wolf said he owes much of his success as a producer to his knack for hiring obsessive people. Production schedules require months of 18-hour workdays, he said. It takes an obsessive person to give

---

**Burrows looks back**

James Burrows recalled memorable moments of his directing career last Wednesday morning at NATPE. He told of how he was able to hire Andy Kaufman to play Latka on Taxi only after agreeing to give a guest spot to Tony Clifton, Kaufman’s obnoxious lounge lizard alter ego. Burrows, who directed the pilots for Veronica’s Closet, George & Leo, Union Square and Dharma & Greg, also outlined the routine for producing a situation comedy. Burrows said there have been only two times in his career that he has instructed actors to come to a halt until the audience stopped laughing: when Reverend Jim on Taxi asked the meaning of a yellow light and when a cat clung to the back of Ross on Friends. —Barry Garron
Zero speed limit. Zero dirty pictures. Zero pirating. Teleglobe Broadcast Services is proud to announce that we are now transmitting MPEG 4:2:2 international video standard via ATM fiber optic packets. Across the map. It's a world first. New York to London, London to Los Angeles, Los Angeles to Vancouver. Millennium™ is here. An ATM video cloud that envelops the globe. Connecting it, seamlessly. All at a price that promises zero hesitation. 100% real time communication. Once, it was science fiction. Now, it is science fact.

up any outside life to focus completely on the show.

Wolf said that thoughts of syndication inspired the idea for _Law & Order_: "In 1989, it was the end of hour shows in syndication." He was trying to come up with "an hour that could be split into two parts and sold as half hours. That didn’t happen." But that ultimately gave rise to the format of _Law & Order_, with each show told in two distinct parts.

---

### BVT ready to deal

Buena Vista is hoping to bring back _Let’s Make a Deal_, with Gordon Elliott taking over Monty Hall’s role as chief dealmaker, according to industry sources. Stone Stanley Productions has rehearsed the show and hopes to shoot the pilot early this spring, the sources say. Buena Vista sees the show as a replacement for failing half-hours this year and hopes to clear it for national rollout in 1999. Buena Vista distributes three other game shows: _Debt_, which is moving from Lifetime to syndication this year, and _Win Ben Stein’s Money_ and _Make Me Laugh_, which air on Comedy Central.

### Petry picks its syndicated hits

**By Steve McClellan**

Petry Television announced its recommendations for the new crop of syndication shows at a meeting with clients last week in New Orleans. The recommendations were announced by Petry’s Dick Kurlander (director), Jack Fentress and Jennifer Getson.

Each show on the recommended list was rated on a scale between 1 (worst) and 10 (best).

Highest-rated among the new talk shows was _Roseanne_, which scored a 6.5. Four others made the cut: _Howie Mandel_ (6.0); _Donny & Marie_ (5.5); _The Magic Hour_ (5.0), and _Forgive & Forget_ (4.0).

Among new game shows, the new _Hollywood Squares_ topped the Petry list with a 6.5. The only other new talk contender to make the cut was _The Match Game_, which scored a 5.5.

In the court show category, two new entrants were highly recommended. _Judge Joe Brown_ and _Judge Mills Lane_. Both scored a 7 on the Petry scale.

Two relationship shows—_Love Connection_ and _Change of Heart_—made the cut, each with a 6.0.

Among the new syndicated off-net sitcoms, Petry recommended _Moesha_ (6.0) and _Spin City_ (5.0). And for 2001, the rep firm’s sitcom picks included _King of the Hill_ (8.0), which Twentieth Television is expected to start marketing within a couple of months.

Also recommended among the sitcoms debuting in 2001 were _Everybody Loves Raymond_ (7.0) and _Bill Cosby_ (5.0).

In the off-net drama category, Petry recommended _Party of Five_ (4.5), which debuts in 1999, and _7th Heaven_ (4.0), which bows in 2000 (and which already has been acquired by Tribune Broadcasting).

Petry also recommended two new first-run weekly programs, _Malibu, CA_ (4.0) and _Better Living with Carrie Witt_ (5.0).

Two Petry-recommended off-net dramas available for weekly airing (and also being stripped on cable) are _New York Undercover_ (5.0) and _ER_ (5.5).

Among the crop of new first-run weekly hours, Petry recommended _Stargate SG-1_ (7.0), _Mortal Kombat_ (5.0), _VIP_ (4.5), _Motown Live_ (4.0), _Air America_ (3.5), _The Crow_ (3.0) and _Kickboxer and the Kid_ (3.0).
It Takes the Whole Team...

And score big in the digital age.

To win at the digital game, you've got to assemble your whole team—everyone from managers to engineers—and go to NAB98. With so much to see, do, hear and learn, every player counts as you map out your game plan at the most comprehensive broadcasting and e-media convention in the world! Start assigning your key players to test drive and learn about the latest technologies. Register now and enter the digital age like a Hall of Famer!

Spotlighting DTV—in the sessions, on the exhibit floor and at special events!

Moonves: Sweeps stunting backfires

CBS Entertainment head argues that forcing viewers to choose among networks’ best offerings hurts broadcasters

By Steve McClellan

If broadcasters want to stop ratings erosion, they must start thinking more creatively when it comes to scheduling and stop shooting their programming wads at each other come sweeps time, CBS Entertainment President Leslie Moonves said during last week’s NATPE convention keynote address.

Moonves said that programmers run the risk of alienating viewers when popular shows are scheduled against one another. “When that happens, we’re not offering viewers a choice, we’re forcing one on them. Competitive scheduling moves like these may pass the testosterone test,” he said, “but in the process they cheat viewers, who often face viewing decisions that aren’t good for them or us.”

The situation is exacerbated during the sweeps periods, Moonves said, when all four networks tend to save their biggest movies, miniseries, specials and the best episodes of regular series. “Does this benefit the viewer? I don’t think so. Does it benefit the industry? I know it doesn’t.”

The point is, he said, “programming decisions are made without a clear picture of the wants and needs of our primary consumer. And that’s at the cost of our relationship with viewers.”

But despite the “foolhardiness” of such scheduling, Moonves said, no other distribution vehicle is even close to displacing the networks as most advertisers’ first choice for distributing their messages to viewers.

“The most immediate impact of increased competition and news technologies has been a slight decline in viewership of broadcast television. That has left us concerned about what impact this will have on our relationship with advertisers.” But in the near term, he said, the effect has been “minimal.” In fact, he said, 1998 spending on broadcast television will set another record. “And industry estimates project year-to-year increases for the foreseeable future, with total spending exceeding $50 billion for the first time in the year 2000.”

But Moonves also stressed that broadcasters must continue to create distinctive and high-quality programming. If cable sticks to its current programming philosophy, he said, broadcasters will remain the dominant medium. In November, cable’s top 50 shows included 22 theatrical movies not available to advertisers, 12 Nickelodeon kids shows, 16 sports events, wrestling, off-network repeats, one news special, a music special and a handful of movies, according to Moonves. “Hardly examples of original comedy and drama, and collectively they had an average rating of 2.1.”

As to regulatory issues, Moonves said his discomfort with the ratings system imposed on the industry was “balanced by my reaction as a parent. Ultimately it’s my decision whether my children watch a program or not. It’s the same decision that, hopefully, is being made night after night in most households across the country.”

Moonves also said that the industry is “grateful for the breath of fresh air at the FCC,” where in the recent past “an open dialogue hasn’t always existed.” Going forward, he said, the industry must make it clear to Washington that there are distinct limits on government’s involvement in our business, especially as we head into a new world of technology that is changing daily.”
The World of the Future.

Kids rules, what kids rules?
Panelists say children's TV mandates have had little effect

By Barry Garron

ew federal regulations requiring educational programs for children have had virtually no effect, according to members of a NATPE panel on children's programming held last week.

“I don’t think more people are watching us, and I don’t think fewer people are watching us,” said Carol Monroe, Fox Kids Network senior vice president, program services.

What matters is not whether the program is educational but whether it’s good, said John Claster, president, Cluster Television.

“The real problem is that the conceptual model and the financial model don’t mix,” he said. If you spend only $7,000 on a program, it’s not likely to work, he said.

Cyma Zarghami of Nickelodeon said it is possible to do great educational programs for preschoolers but difficult to make them attractive to older children.

Although panelists disagreed about the extent to which the merchandising of toys pushed children’s programs a decade ago, they agreed that toy-driven programs shouldn’t have a place on a kids schedule.

“The megahits in television over the past 10 years have all been programs where you had the toys and the shows working together,” Claster said. But, he added, citing the popularity of The Smurfs in the 1980s, “I think it’s a mistake to think that toys can’t spawn a television show.”

Panelists were asked if the influx of international funding was having a bad effect on the content and quality of the programs that are produced.

Children’s programs shouldn’t arise out of international negotiations, said Anne Sweeney, Disney Channel president and executive vice president of the Disney/ABC cable networks. “Deal-driven television is the worst television, and kids can spot it in a heartbeat,” she said.

Added Zarghami: “You put in too many cooks and too many kitchens and you wind up with a bad meal.”

Asked to predict the future of children’s TV, panelists said there probably would be few new players; that children will continue to be attracted to good programs, and that technological innovations, such as online viewing, would become more common.

“Kids will go where good programming is, whether it is online, network or cable,” said Vanessa Coffey, president, King World Kids/Coffey-Ballantine.

“I’m placing my bets on a total integration of all of this in 10 years,” said Kathy Quattrone, PBS executive vice president, programming services. “The content will be delivered in a lot of different ways.”

‘Howie’ hits 90%
Paramount Domestic TV has cleared talker The Howie Mandel Show in 151 markets representing 90% of the country. On the reality front, Paramount’s Real TV strip has been cleared in 90 markets, representing 70% of the country, and Hard Copy has been renewed in 91 markets representing 75% of the country for the 1998-99 season.

Metal station finds home on the 'Net

KNAC’s back, using new technology to blast its metal

By John Merli and Elizabeth A. Rathbun

KNAC(FM), the Los Angeles metal rock station that went dark three years ago, is roaring again—this time on the World Wide Web. Feeds of old KNAC broadcasts recently began surfacing online at knac.demonet.com. On Feb. 15—the third anniversary of the demise of KNAC’s terrestrial broadcast—new and original KNAC programming will begin via the Website.

In addition to metal music, videos of metal bands and a chat room will be offered, according to Rob Jones, operations manager of DemoNet Inc., which built the site.

There are no plans to take the old KNAC back on the air, except perhaps through syndication of its new programming. In any case, KNAC’s call letters were reassigned to a public station after KNAC went dark, Jones says.

More than a decade ago, KNAC was among the first West Coast radio outlets to feature such heavy-metal acts as Guns N’ Roses and Metallica.

Former station personalities Nasty Neil, Long Paul, Thrasher and Mike Stark, among others, will be featured...
on the Internet site.

"We've reassembled the troops," Jones says. "It's no different, other than you've got to have a computer to listen."

Since its Web debut Dec. 12, KNAC has logged almost 9,000 hits—"and we haven't even started the campaign," Jones says. The service will be advertiser-based; the most logical buyers are record companies and concert promoters, he says.

The new "broadcasts" will originate from DemoNet's studios in Long Beach, Calif.

The technology is being provided by Vosaic LLC and Microsoft News-Show. Listeners with the right connection speed can get FM-quality sound.

Jones says. CD quality eventually will be available.

DemoNet's online radio service requires no plug-in or download software.

A network of so-called "buzz sites" will make the audio stream relatively easy to access worldwide, DemoNet says.

For the future, DemoNet is looking to satellite radio in cars, "It's the next step in broadcasting," Jones says.

**RIDING GAIN**

**Danny, Chancellor make New York changes**

Chancellor Media Corp. hopes that morning-drive talent Danny Bonaduce will steer New York's WHTX-FM (formerly WNSR-FM) to hot AC heights. Bonaduce is moving from Chancellor's WKQJ-FM Detroit to WHX-FM, which debuted last Tuesday as "Big 105 FM." The station previously was dubbed "Buzz" and offered a modern AC format. With music chosen by local research, and production and jingles likewise oriented toward the city, Big 105 offers "a very big New York sound," General Manager Bennett Zier says. WKQJ was owned by Evergreen Media Corp., which since has merged with Chancellor. Of New York's 11 AC stations, WHTX ranked fifth, with 2.5, per quarter-hour share among the key 18-34-year-old demographic, according to Arbitron's fall 1997 book. Bonaduce will take over morning drive in mid-February.

**It's Mercury time**

The call for entries has been issued for advertising's richest radio awards contest, the 1998 Radio Mercury Awards. There is $225,000 in prize money at stake, including a grand prize of $100,000, five Mercury Gold awards of $20,000 each and five Mercury Silvers of $5,000 each. Categories are humor, music and sound design, local station-produced, Hispanic and non-humor. The nonprofit Radio Creative Fund, which sponsors the competition, also will tap the best public service announcement and pick a promising college student for the Dick Clark Summer Fellowship. All award entries must be submitted by March 8. Call (212) 681-7207 for more information. The awards presentation is scheduled for June 4 in Manhattan.

**Talk Show Hosts take new seat**

The National Association of Radio Talk Show Hosts has moved south, from Boston to Washington. The move was effective last Monday, but a permanent home for the association is about a month away. In explaining the move, President Blanca Quinata Cullum notes that most trade groups are based in Washington. The group particularly wants to keep an eye on station consolidation, she adds. As consolidation happens, "the little guys around the country need us even more," Cullum says. The group, which was founded in 1987, has about 1,500 members. says Executive Vice President Carol Nashe, who is staying in Boston to expand her public relations firm.

**Jacor plans stock, notes sale**

Jacor Communications Inc. is looking to raise $450 million from sales of stock and notes. Jacor is looking for proceeds of $200 million from an offering. 3.8 million shares of common stock. It also will offer to sell $100 million in 12-year senior subordinated notes and $150 million in 20-year liquid yield option notes, or LYONs. —Elizabeth A. Rathburn

**AP to make radio services more user-friendly**

The Associated Press is repackaging its radio wire services and pricing as of Feb. 1. The changes, the first of several planned in the coming months, are attributed to the competitive challenges that have resulted from the Telecommunications Act of 1996, AP says.

"Rather than giving our members too much of what they don't need, or not nearly enough of what they do need," says Corinne Baldassano, general manager of AP's Radio Division, "we'll instead be providing options that will most suit [member stations'] specific needs."

AP will offer its new NewsPower+ and NewsPower Power Max services with options for 24-hour, morning/evening drive time or morning-only service—at variable prices. "Our new 'Cooler Copy' feature will be a daily compilation of the quirky stories of the day that many stations, especially [those with] morning hosts, like to call on for on-air features. Presenting these all in one user-friendly service rather than scattering the items among all the other wire service activity makes it easier for our stations to locate and use," Baldassano says.

Pricing too will change, for the first time in a decade. Most AP pricing has been based on market size and station classification. Starting next month, cume, format and other specific parameters will be used to make the costs to stations more equitable, Baldassano says. She predicts that nearly 70% of AP stations will see a reduction in prices. As part of its repackaging scheme, AP also will provide its NewsDesk and SoundDesk editing software at no additional charge. —John Merli
Things are looking up for fledgling cable services. Thanks to digital technology, they will operate in a far friendlier environment than in previous years.

Digital opens door to new nets

By Kim McAvoy, B&C correspondent

The promise of digital has made the cable programming business so much more attractive that major programmers are busy creating new services. Even though it’s likely to be three or four years before half the country’s cable homes have digital set-top boxes, says Larry Petrella, senior media analyst with Lehman Bros., programmers already are laying claim "to this new digital real estate."

In most cases, the boxes are expected to give viewers access to more than 100 channels, which will ease past problems of scarce channel capacity. New services will have a far better shot at gaining cable carriage than they have had in the past.

The number of new cable networks continues to climb. Last May, BROADCASTING & CABLE’s count of new channels reached

Computer geeks or couch potatoes?

Neither, Ziff-Davis says, readying launch of ZDTV

By Donna Petrozzello

Ziff-Davis Inc.'s $100 million investment in ZDTV is one of cable's most ambitious and potentially lucrative ventures of the year.

Unlike other recent cable start-ups that have had to fight for funding and name recognition, ZDTV is backed by Ziff-Davis's fiscal clout as well as the prestige that accompanies the publisher's long list of technology and computer industry publications.

With ZDTV: Your Computer Channel, Ziff-Davis is determined to create a 24-hour network that will entertain and inform, lure heavy Internet users to their TV sets and motivate cable viewers to spend an hour longer on their PCs. In the process, Ziff-Davis wants to change the notion that computers, and the channel, are just for geeks.

"I don't want to just have talking

www.americanradiohistory.com
Late last year, programming giants MTV Networks and Disney/ABC Cable Networks unveiled plans for new digital offerings. And MSO Tele-Communications Inc. and its programming unit, Liberty Media, are planning to distribute a package of 10-12 digital Spanish-language networks this spring.

At MTV Networks, its two music networks—MTV and VH1—will launch in July a seven-pack of digital video services called The Suite. Each service is distinct, including M2, a free-form music channel; MTV Ritmo, a Latino music channel, and VH1 Smooth, a combination of jazz, new-age and adult-contemporary music.

"The Suite is reliant on the growth of digital technology," says Matt Faber, senior vice president of programming enterprises for MTV and VH1. "But we definitely believe digital cable will roll out," he says. The channels are available as a package and à la carte. Faber says.

Disney/ABC Cable is talking about at least four digital networks. Toon Disney, slated to launch April 18, is a 24-hour basic cable network featuring the company’s animated programming. Although it’s designed for a digital tier, the new service will also have analog carriage. The rest of Disney’s digital offerings have not been revealed.

"Operators told us that they wanted more of Disney, not less," says Anne Sweeney, president of The Disney Channel and executive vice president of Disney/ABC Cable Networks. Toon Disney, packaged with The Disney Channel, will be offered exclusively to operators already carrying The Disney Channel as a basic service.

Also aiming for digital distribution is Lifetime Television’s proposed Lifetime Movie Network, slated to launch in September. The new network, which will air made-for-TV movies, will be available for both analog and digital distribution. The Disney/ABC Cable Network owns 50% of Lifetime.

“We look at digital as the the next wave in marketing to cable subscribers," says Doug McCormick, president of Lifetime Entertainment Services.

“If Lifetime were to just time-shift its programming, viewers are not going to pay for that.” But McCormick thinks they will pay for movies. Lifetime’s movies, he says, have “credibility” that operators can leverage to their advantage and use to help market their digital tiers.

Also jumping on the digital bandwagon is the Do-It-Yourself (DIY) network, proposed by Scripps Howard. The new network, announced earlier this month, will incorporate material from Scripps’s Home & Garden Television (HGTV) and the Food Network. Some of the channel’s do-it-yourself programming from HGTV has never aired in the U.S.

“I think we’re probably on the front end of this [new technology]. But we need to plant our flag and get our service up and running,” says Susan Packard, HGTV chief operating officer.

Packard has high hopes for the new service, which is slated to debut a year from now. "We’ve learned from HGTV that there’s a passion out there for this kind of programming," She also points out that DIY will have interactive elements, which “marries well” with digital technology.

Other than Discovery, most cable programmers have been reluctant to slate networks for digital tiers. Discovery has four digitally delivered programming services. "We have a year and a half [of] experience," says Discovery’s Charley Humbard, vice president of programming for Discovery Networks.

Since the December announcement of this spring’s launch, ZDTV has signed four relatively small cable operators. They are Prime Cable, which serves Las Vegas; Harron Communications (Detroit); Prestige Cable (Warrenton, Va.), and Televue (suburban Atlanta).

Harron plans to add ZDTV along with other channels when it completes a rebuild of its analog tier serving 63,000 in Michigan this spring.

Linda Stuchell, vice president of programming for Harron, says that in return for carriage, Ziff-Davis is providing Harron with access to its database of magazine subscribers living in Harron’s service area. Harron will use the list to target consumers to whom it can market high-speed cable modem service, Stuchell says. She adds that Harron was attracted to ZDTV’s programming idea, which she thinks will appeal to a niche of underserved viewers.

Wangberg realizes that with limited analog space available to many operators, ZDTV, like other new cable networks, likely will need to offer incentives to potential affiliates.

“We are working closely with cable operators across the board to offer the channel on an analog tier,” Wangberg says. “Our goal is analog distribution, but we understand the capacity issue and we are addressing this.”

Meanwhile, to make the carriage deal attractive to cable operators, Ziff-Davis has attached a “very aggressive rate card” that includes two minutes of local ad time for the operators, Wangberg says. He declines to say whether Ziff-Davis will pay operators anything for their carriage of ZDTV.
Our New Commitment Needs Your Commitment!

As the Ad Council embarks on its new initiative, Commitment 2000: Raising a Better Tomorrow, we've expanded our calendar to include even more dates and events that seek to enrich the lives of our nation’s children.

The best way for the Ad Council to serve the public is to serve you in the media. With this in mind, we hope the Calendar will serve as a useful resource in planning your PSA schedule throughout the year.

Our Media Outreach Department is available to answer your questions, provide you with PSA materials and help you with special requests. It's easy to reach us: just call one of our offices listed on the Calendar or our 24-hour Fulfillment Center (1-800-933-PSAS) to request free materials. And don't hesitate to order our compilation kits which contain most of the Ad Council's current creative – they're a real timesaver!

Your suggestions and comments are always welcome, whether by phone, fax or e-mail. Thank you for your donations of time and space in support of Ad Council public service messages!

http://www.adcouncil.org

We have created this home page to serve as a resource for the media and the general public. By simply logging on, you can easily access information about the organizations that sponsor Ad Council public service campaigns and the issues they address. Also, you can get more information from Research and Results, News from the Front, Calendar of Events and much, much more.

To order PSAs, or to share your thoughts with us, you can simply e-mail us at info@adcouncil.org. If you want more information on the sponsors of the Ad Council campaigns, you can log on to their web sites as well. They are listed as:

1998 Public Service Events Calendar

A planning tool for the Media
Dear Colleague:

Since The Advertising Council began its Commitment 2000 initiative three years ago, we have taken a new motto: Stay the course. It wasn't difficult for the Ad Council to identify the problem - in this case the terrible state of American children. And our solution was to focus on creating multiple, multi-year, multi-media campaigns that help kids. The challenge for us has been to realize that our commitment to improving kids lives won't change things overnight, or even in a year or two.

So as we continue our efforts, we are creating new alliances and investigating new outlets to deliver our messages to the public. The Council is committed to improving the quality of life in our communities and the media plays a key role in accomplishing this goal. While the Ad Council is the largest provider of public service announcements, developed pro bono, it's the media who deliver the messages. You hold the power to positively influence the lives of millions of Americans - including our children. We ask you to stay the course.

Our goal is to make it easy for you to support Ad Council messages. We hope this calendar will be useful throughout the year, suggesting events and occasions that will make your schedule of PSAs and editorial content topical, interesting and helpful to the community you serve.

The Ad Council is currently supporting 46 major campaigns. Each year the American media donate hundreds of millions of dollars in time and space for the Council's ads. Advertising Council campaigns have covered a range of governmental and social concerns including: Forest Fire Prevention, The College Fund UNCF, Recruiting New Teachers, Crime Prevention, Child Abuse Prevention, Domestic Violence Prevention, Drunk Driving, Safety Belt Education and Earth Share among others. In all cases, communication makes a unique contribution to helping your communities.

Thanks for your continued support of the Ad Council and our efforts to make America a better place for children.

Sincerely,

Ruth Wooden

Ad Council Public Service Messages Make a Measurable Difference

The College Fund/UNCF has been one of the most successful educational support programs in the country for more than 20 years. Nearly 150,000 students graduated from college because of the generosity of donors inspired by the memorable tagline "A Mind is a Terrible Thing to Waste."

Forest Fire Prevention For more than 50 years, Smokey Bear and his message, "Remember... Only You Can Prevent Forest Fires," has taught Americans how to build safe campfires and keep them under control. Since the campaign’s inception, acreage of public lands by lost wildfires has been reduced by over 50%, despite the fact that 14 times as many people visit our National Forests as in the 1940's.

Drunk Driving Prevention Using family photos of the victims of drunk drivers and the tagline, "Friends Don’t Let Friends Drive Drunk," this campaign serves as a grim reminder of the danger of driving drunk. In a recent survey, more than 84 percent of respondents had seen or heard the ads and, after exposure to the PSAs, 79 percent said that they personally acted to prevent drinking and driving.

Crime Prevention McGruff the Crime Dog and his message, "Take a Bite of Crime," have proved so effective that 98% of children ages 6-12 recognized him.

Safety Belt Education Vince and Larry, the crash test dummies, have successfully educated Americans about the importance of wearing their safety belts. In 1985, safety belt usage among Americans was a paltry 11%, but since the dummies were introduced ten years ago, usage has increased every year and is currently 68%.

Welfare To Work With the advent of welfare reform, nearly four million people will be exiting the welfare system and looking for gainful employment to improve their lives. The mission of The Welfare to Work Partnership is to move people off public assistance and into jobs in the private sector – without displacing existing workers. The campaign is directed at changing many of the erroneous perceptions about welfare recipients and increasing the willingness of businesses to train and hire people formerly on public assistance. A free, practical guide to help businesses hire and retain welfare recipients is available by calling 1-888-USA-JOB1. A website address (www.welfaretowork.org) is also available for more information.

Save The Children The high rates among children and youth of functional illiteracy, substance abuse, pregnancy, and crime reveal a tragic picture of not just a generation at risk - but a nation at risk. Many of these problems stem from the fact that young people have lost their natural proximity to caring, mature adults. Mentoring – the presence of one or many caring individuals who, along with parents and guardians, provide youth with support, counsel, friendship, reinforcement and constructive example – is a proven strategy for dealing with the many problems facing our young people. The goal of Save The Children’s National Mentoring Initiative is to inform the public about the proven success of mentoring and the need for resources to dramatically increase the reach of mentoring programs for at-risk youth in America. Callers to a toll-free number will be connected to accredited mentoring organizations in their community.

The technology that will help you get the most out of your computer is already in your living room.
president, digital television and special projects.

Digital raises the "level of accessibility for consumers. They can see what they want when they want," Hubbard says.

Even start-up cable networks, which without MSO or substantial financial support, have experienced perhaps the most serious difficulty in gaining distribution, are optimistic about the future. "The idea is that new networks now have a chance [for carriage]," Petrella of Lehman Bros. says. But he adds, "They'd better have a good concept, and they'd better have good financial backing."

"We've been holding out for digital," says Doug Ritter, president of the Arts & Antiques Network. The fledgling service has been on the "back burner," he says. But now Ritter is encouraged: "We're certainly going to keep carrying the torch for that reason."

"Digital suddenly seems like a reality," says Barbara London, president of The Boating Channel. While the channel does not have a firm launch date, London also is heartened by the promise of digital. "We're in a better place than we were a year ago."

"We believe this rollout is real," says Dean Hoke of The Military Channel. "We've started gearing up again." The network, which has targeted July 4 for its launch, says it will be carried in well over a million homes through a combination of satellite and cable distribution. The channel has brought cable veteran Patrick Mulvey on board as president. Mulvey is a former senior vice president of corporate marketing for Cablevision Systems.

As an independent start-up without MSO backing, Hoke admits there is still opportunity for "good ideas and good strong niches."

A strong niche is what Tim Pike is banking on. Pike is president of the Local News Network, a new service that he hopes will attract the attention of cable operators. Pike is talking about rebroadcasting individual local newscasts from at least 48 stations across the country: "We would provide top news, sports and weather coverage from each state daily."

Pike is looking for financial backing, and he has not yet made copyright arrangements with local broadcasters for their news, but he is hopeful that TV stations and cable operators will like the idea.

Even some fledgling networks with big backers, like CBS's Eye on People, found out last year that gaining carriage in the current analog world is not easy. But the network predicts that it will have 17.5 million subscribers by the end of 1998.

And there's Discovery's Animal Planet, which debuted in June 1996. With 31.4 million subscribers, it appears to be one of the fastest-growing networks.

Thanks to digital, the environment for new cable services may be picking up. My Pet Television Network (MPTV) is finalizing a distribution deal with a significant MSO this week; the deal will put it before viewers on a full-time basis in May. MPTV's Michael Marcovsky believes cable MSOs are ready to go forward with some new networks.

He suggests that operators carry MPTV at a la carte: "That will help drive your digital tier." With à la carte, Marcovsky says, viewers can "vote with their wallets."

---

**ZDTV continued from page 44**

to take the channel.

Some 13 charter advertisers have signed on, says Michael Mason, vice president of affiliate sales and marketing. These sponsors include Intel, Microsoft, Charles Schwab, Gateway, Sun Microsystems and Dell Computers.

"ZDTV is a huge departure from the normal sphere of cable advertisers because it gives the cable system on a local level the ability to align strategically with the fastest-growing category in advertising, which is technology-oriented products," Mason says. "ZDTV fills a category that is grossly underrepresented in traditional TV."

ZDTV has named Greg Drebin, former senior programming VP at MTV, to head programming and production. ZDTV is counting on Drebin to develop programming that will be highly interactive with its audience and with the companion Website, located at zdtv.com.

ZDTV's initial eight hours of daily programming will include shows about the latest computer games, buying home PCs and investing in computer and technology industry stocks. However, technology and computer industry news will be the heart of ZDTV, Drebin says. "What CNN is for hard news, we are aiming ZDTV to be for technology and entertainment."

To come up with enough topical programming, Ziff-Davis is building an 11,000-square-foot production studio filled with state-of-the-art equipment in San Francisco, Ziff-Davis's print headquarters.

A test run did not fare as well as Wangberg may have hoped. The hour-long computer show *The Site*, which ran on MSNBC in July, dragged down the network's ratings. It was canceled after three months.

Wangberg is encouraged about positive results of consumer surveys. Frank Magid and Associates found that 65% of cable households and 45% of non-cable customers would be interested in a channel such as ZDTV.

Wangberg estimates that there are 100 million consumers who "use computing as an everyday part of their lives at work and at home" who are potential viewers. ZDTV will reach the 20 million-sub mark in three years, he hopes.

Cable channels stake their claims

Digital technology and the promise of increased channel capacity appears to be opening the floodgates for new cable networks. Broadcasting & Cable's last look at the fledgling services (May 12, 1997) featured a list of 94. This year's freshman class includes 109 either launched since January 1996 or expected to debut by the end of 1998.

Air & Space Network
Portland, Ore. 503-538-1093
Website: www.airspacemag.com/airspacenet
Programming: family-oriented entertainment, education, information on all aspects of global aviation, space flight

Garry, ‘Larry’ signing off

TV critics preview slate of cable offerings

By Donna Petrozzello

Home Box Office created the biggest splash at last week’s Television Critics Association tour with the announcement that it would shutter The Larry Sanders Show after this season.

Although he called Sanders “the most acclaimed series on HBO and the one that’s been the most highly reviewed,” HBO Chairman Jeff Bewkes said the season of Sanders that premieres March 13 “will be the last.”

Sanders star and creator Garry Shandling told critics that “this may likely be the last season,” adding that he’s considering a story line in which Sanders co-star Jon Stewart would take over in Shandling’s place. But, Shandling said, “I’m not sure yet if I want my show to go on without me.” Columbia TriStar TV Distribution is slated to take the show into syndication in 1999.

HBO and the other cable networks represented at TCA stressed big-budget original productions. Discovery, USA, Arts & Entertainment, Showtime and others plan expansive miniseries this year, ranging from dramatic retellings of classic novels to depictions of the Vietnam War.

Home Box Office’s presentation of its 12-part miniseries From the Earth to the Moon, executive-produced exclusively for the network by actor Tom Hanks, is one of the pay cable network’s most ambitious projects. The series will air on six nights, between April 5 and May 10. It charts the course of NASA’s Apollo space exploration missions and the men who flew them over an 11-year period.

HBO also will feature A Bright Shining Lie, the story of one man’s experience of serving in Vietnam, adapted from author Neil Sheehan’s Pulitzer Prize-winning book of the same name.

Also inspired by the Vietnam conflict, Showtime will premiere its original feature The Wall, a trilogy of short films that tell the stories behind mementos left daily by visitors to the Vietnam Veteran’s Memorial Wall in Washington. Showtime also premieres The Informant, an original feature based on “Field of Blood” by Gerald Seymour, a book that depicts terrorism in Ireland.

In basic cable, sweeping dramas dominated the TCA tour. In April,
A&E presents the North American premiere of *Tom Jones*, a six-hour retelling of the Henry Fielding novel that was co-produced with the BBC. In 1999, A&E will debut what network executives called its most expensive project to date, the six-hour miniseries *Vanity Fair*. The BBC will collaborate with A&E on the miniseries.

USA Networks will deliver its ambitious two-part miniseries *Moby Dick* to viewers on March 15-16. Starring Gregory Peck and Patrick Stewart, the feature was shot off the Australian coast and is the latest retelling of the Herman Melville classic. Rod Perth, USA Networks’ president of entertainment, called the series “absolutely the largest event USA has ever done.”

Long-form programming marked CNN’s news at TCA. In collaboration with the Time Warner Inc.-owned magazines *Time*, *Fortune*, *Money* and *Entertainment Weekly*, CNN will launch its news magazine series, *CNN Newsstand*. The shows will report on news and trends, with content overseen by the editors of the print magazines.

Last week’s TCA tour made it clear that networks are committed to producing original documentaries. Even music-heavy programmer MTV announced two new series—*Ultrasound*, which features documentary-style profiles of contemporary musicians, and *True Life*, which documents troubling life situations faced by MTV viewers.

CBS Eye on People will launch two series. *David Frost: Interviews I’ll Never Forget* will feature selected archival segments from Frost’s celebrity interviews: *Great People of the 20th Century* is a 10-part series commemorating the past century that is produced by David Wolper.

Discovery Networks unveiled new reality series on Discovery Channel and The Learning Channel. This spring, TLC debuts the miniseries *Boot Camp*, about an elite group trained to fight fires, defuse bombs or perform as paramedics. The series will be presented in TLC’s *Real Life, Real Heroes* anthology program.

TLC’s sister network Discovery Channel will debut the half-hour series, *Real Kids, Real Adventures*, which will air within Discovery’s children’s programming block on Sunday mornings, *Real Kids*, which retells stories of heroic deeds performed by children stars 16-year-old Hamilre Rustia.

In children’s programming, animation will be king for the coming year. Nickelodeon will bring the landmark cartoon strip “Peanuts” to its program lineup starting in late January. Nickelodeon has acquired rights to 58 *Peanuts* shows totaling 63 half-hours of episodic series and *Peanuts* specials.

Nickelodeon also announced a $350 million initiative to launch an original animation series, *Oh Yeah, Cartoons!* and to create an animation studio in Hollywood to serve as headquarters for creative talent behind the new series.

Following its top-rated cartoon strip *South Park*, on June 15 Comedy Central will introduce a new animated series, *Bob and Margaret*, about a British dentist and his podiatrist wife.

Special Report: Domestic Satellites

A year ago, the U.S. satellite industry was in a state of distress after the loss of the Telstar 401 satellite in January 1997. Since then, however, the domestic capacity market has recovered, with ample capacity and stable prices available today. This report takes a look at the major players in the U.S. market, both on the reseller and operator side, and also checks in with the broadcast networks to find out how they'll deliver their new digital television signals to local stations.

Resellers report: Capacity outpaces demand

In U.S. occasional-use satellite prices have come down

By Noel Meyer, B&C correspondent

Adequate capacity and stable pricing are likely to be watchwords for the occasional-use satellite market in 1998 in both Ku- and C-band, with Ku-band prices stable at about $750 per hour and C-band going for $500-$550.

Segment shortages brought on by the failure of Telstar 401 in early 1997 have been solved by the launch of Telstar 5 and GE 3 and the bankruptcy of AlphaStar.

"The market for occasional use in 1998 is very well positioned," says Carl Capista, director of operations, GE Americom. "The satellite operators have a lot of capacity. Assuming all the upcoming launches go as planned, I don't see any shortages—more of an equilibrium. I would say that it would be pretty much the same in 1999 as in 1998. What you don't have is a lot of satellites reaching the end of their life and not being replaced, as you did a couple of years ago."

GE Americom is launching Ku-band bird GE-5 this year, and Capista thinks it will be operational late in the third quarter or early in the fourth. "We hope to have a number of dedicated transponders for SNG on GE-5, and we are trying to dedicate that satellite as our SNG satellite." Americom plans to launch GE-4 in early 1999; it will also have some dedicated C- and Ku-band occasional-use transponders.

Loral Skynet will launch Telstar 6 this year, with an in-service date of Nov. 1, and Telstar 7 shortly thereafter. Telstar 7, however, will not see service until 1999. "I see Telstar 6 playing much more of a role in the occasional business: Telstar 7 is targeted more for cable operations," says Joan Byrnes, vice president of marketing for Loral Skynet.

"On Telstar 6 on the C-band side, we will dedicate one or two transponders for occasional—in some cases it might be as many as three or four. On Ku-for SNG we are a little more generous, with two, three or four for occasional use," Byrnes adds. "We will make sure there are enough transponders to manage the SNG market in the afternoon.

"I think the occasional-use transponders will become more and more important to our customers, and more traffic will be driven to them, because fewer clients will want to take long-term contracts," Byrnes says.

"There is ample availability, so pricing will probably stay around $750 an hour for Ku-band," says Comus Communications account executive Michelle Petraw. "The market can't support high prices anymore because of the launch of Telstar 5 and the additional capacity that's up there now and not spoken for. I don't expect prices to fall much lower than that, but what I do expect—maybe—is that resellers will become more flexible in their cancellation terms or on their policies involving booking space."

Part of the drive to increased service, Petraw says, is that private industry is willing to pay a little extra for satellite segment if they know that the reseller is willing to service the account and take care of them. "Service has
we have some kind of anomaly, we are keeping pace with content increase and digitization. We have consciously made the decision to hold inventory for the occasional-use pool. It is strategically important for our customers.

Although the market is now stable, [become] a bigger issue than price among the resellers," she says.

If some in the industry believe there is adequate capacity for both Ku- and C-band occasional use, others are not so sure. "There is the possibility that certain transponders will be preempted for full-time service, reassigned, which could impact available capacity," says Laura Kenney, president of Tulsa, Okla.-based reseller Vyvx. However, Kenney agrees that for the immediate future the market is stable, with capacity slightly outpacing demand.

"In terms of supply, the U.S. domestic market for both Ku- and C-band occasional use is probably as good as it has been for the last 18 months or so," says Richard Wolf, vice president of telecommunications and distribution for ABC. "Now the issues are: Will that supply continue, or will some of the capacity in the occasional pool be gobbled up for full-time capacity? That's what I think many people in the marketplace believe will occur."

"I don't see any any immediate shortages," SkyNet's Byrnes adds. "The launches I see planned seem to be pretty well timed for the evolutions in the industry, with the broadcasters going digital and [16] HDTV. Unless occasional use is growing, Vyvx reports 60% growth over the past few years, and Atlanta-based Crawford Communications reports a five-fold increase in C-band use. "I'm seeing more advertising and business-related use for C-band," says Kevin Haymes, Crawford Communications manager of broadcast services, "as well as broadcasting, such as our in-house broad-

By Glen Dickson

As the major broadcast TV networks gear up to launch digital broadcasts this fall, they are evaluating how best to utilize their existing satellite capacity to support both continuing NTSC service and new DTV transmissions.

NBC, CBS, Fox and ABC plan to "repack" their space segment by digitizing and compressing their existing NTSC service, thus freeing up capacity to simultaneously transmit DTV programming. But none of the four networks has decided which equipment suppliers it will use to encode the signals at the network and decode them at affiliates, and none

TV networks eye digital delivery

Plan for compressed NTSC and DTV feeds

GlobeCast's Keith Buckley says C-band demand is growing. Vyvx's Laura Kenney says the satellite market is stable, with capacity outpacing demand.

Charles Jablonski says NBC will star its digital conversion late this year. Bob Seidel says CBS hasn't decided on a compression ratio. Andy Setos says Fox has settled on 4:2:2 as its ratio.
WELCOME TO YOUR FUTURE

PanAmSat is the world's commercial leader in global satellite services, providing the most advanced communications to every corner of the world. Whether it's cable tv, direct-to-home applications, news and business information services or Internet access, PanAmSat is bringing the future home today.
has announced a definitive timetable for digitizing NTSC service.

Fortunately, all four networks have experience using MPEG-2 compressed feeds, either in their newsgathering operations or for distributing their spin-off cable networks. CBS and NBC, for example, were relying on MPEG-2 4:2:0 feeds last week to bring back coverage of the Pope's visit to Cuba.

NBC plans to begin converting its overall network distribution to digital in late 1998 carrying over into 1999, says Charles Jablonski, NBC vice president of broadcast and network engineering. That means the conversion won't be completed until after some NBC O&Os and affiliates have already begun DTV broadcasts. "We may have to do something different for the first NBC stations going on air with DTV next fall," Jablonski admits. "But I hope not."

While NBC has been successful using Wegener MPEG-2 4:2:0 encoders and decoders for news feeds from affiliates, NBC Newschannel and MSNBC, it still is evaluating about a dozen compression vendors to provide gear for network program distribution. Jablonski says, NBC also hadn't decided whether it would use 4:2:0 or 4:2:2 "studio profile" compression gear, which has more chrominance information and is better suited to post-production, for either its NTSC or DTV feeds.

"Whether we need to go to 4:2:2 for affiliate distribution, it's too soon to tell," says Jablonski. He isn't sure whether sports backhauls will require 4:2:2 compression either, since NBC doesn't do "heavy production" on its sports feeds, he says.

What Jablonski is looking for is a digital compression system with a "multigeneration product plan" that allows NBC to plug in and add on extra pieces as needed. While NBC was forced to put in what Jablonski calls an "overlay system" for news because of a pressing need for capacity, the network wants its program distribution equipment to handle both digital NTSC and DTV feeds. "I don't want to put in a whole other set of boxes to pitch and catch signals," he says.

Jablonski also wants to fit two HDTV signals into a 36 mhz Ku-band transponder, which he says is "a bit of a push," but can be done with advanced satellite modems. But NBC will still keep the data rate of an individual feed at 45 Mb/s, so fiber can carry it as well. "Whatever we do, we want to be able to stuff it into a 45 Mb/s circuit, so the encoder could just as easily feed DS-3 fiber," Jablonski says.

The magic number for CBS also is 45 Mbs. says Bob Seidel, CBS vice president of engineering, because of the compatibility it affords between satellite and terrestrial distribution. "We could probably fit a little more data on the satellite, but that makes transitioning to terrestrial [either fiber or microwave] more difficult," he says.

Seidel is especially concerned about the roughly 60 CBS stations whose studios aren't co-located with their receive sites and which must backhaul incoming network signals to their plants. Because of microwave interference problems, most use DS-3 fiber links, which are relatively economical. Jacking up the data rate above 45 Mb/s on the network feed would require going to OC-3 fiber at 155 Mb/s, which
The biggest story at Loral Skynet is that the success of your business comes first in our book. Loral Skynet is a new chapter in satellite communications. To get the whole story, call 1.800.847.9335.
is significantly more expensive.

Within a 45 Mb/s satellite circuit, CBS will do one high-definition feed or three simultaneous 15 Mb/s channels for 525-line standard-definition programming. Since the NTSC feeds will remain more regionalized than the nascent HDTV programming, Seidel says CBS might have 10 NTSC feeds going at once and only two HDTV feeds, such as West Coast and East Coast paths.

CBS hasn’t decided whether it will use 4:2:2 or 4:2:0 compression, or a mixture of both. “We might use 4:2:2 for backhauls and 4:2:0 for distribution,” says Seidel. “It depends upon the function you’re trying to achieve. In Cuba, we’re bringing back 10 simultaneous digital feeds for the Pope’s visit. We’re running a much higher data rate for the prime time feed with Dan Rather than for backhauling to stations, which are running at about 6 Mb/s. For football, we might use a different rate. The ability to go either way is important.”

Unlike NBC’s Jablonski, Seidel doesn’t care if CBS winds up using separate compression systems for its NTSC and DTV feeds. “We’re not looking for one DTV/NTSC system,” he says. “It would be nice to use [the NTSC and DTV systems] interchangeably, but in reality, we’ll be operating two parallel paths for many years to come. And we always have a hot standby for on-air paths.”

One solid vote for 4:2:2 compression comes from Andy Setos, executive vice president of News Corp.’s News Technology Group. For Fox’s program distribution, Setos says there’s “no question that whatever we do there is going to be 4:2:2.” Setos says that Fox has just sent a request for information on 4:2:2 compression products to a number of manufacturers; he adds that Fox will also focus heavily on satellite modem technology to maximize the achievable payload on a satellite.

“We can offset the cost of the modem against the cost of the transmission channel,” says Setos. “The modem is the number-one issue.”

To continue to provide affiliates with an analog NTSC signal, Fox plans to send 4:2:2 compressed 480 I digital feeds that will come out of an affiliate’s receiver/decoder as either NTSC analog or serial digital component. Like NBC, Fox also wants to incorporate the technology for both NTSC and DTV distribution into one system and roll out both distribution paths at the same time (with the possible exception of Fox’s early DTV stations), although Setos didn’t offer a timetable.

“We’ve actually put our digital [NTSC] rollout on hold because of DTV,” Setos says. “Now we’re seeing them as a simultaneous project. The two components will coexist.”

While Fox hasn’t announced the “nitty-gritty” of its digital distribution plans to affiliates, the network plans to hold a day-long DTV symposium for affiliates at NAB ’98 in Las Vegas. “A lot of this will come clear then,” says Setos. “We understand the deadlines the affiliate stations have, and we plan to complement them at the network level.”

ABC isn’t talking about its digital distribution strategy. “Our plans have not been solidified,” says Ken Michel, ABC director of technology and equipment planning. “Our focus initially is on the digital distribution of DTV material or HDTV material to our stations, and we’re evaluating all possible alternatives.”

Rich Wolf, ABC vice president of telecommunications and distribution services and the network’s point man on satellites, doesn’t have much more to add. “We have no time lines or milestone dates for the digitizing of NTSC service,” says Wolf.

As for ABC’s choice of 4:2:0 or 4:2:2 compression, Wolf says that decision hasn’t been made either. “However, I do think that because of the inherent technical advantages that 4:2:2 offers for contribution-quality service to the ABC Television affiliates, if and when ABC decides to digitize its NTSC service, 4:2:2 could be appropriate,” he says.

PanAmSat: a huge hit for Hughes

By merging with PanAmSat, Hughes picks up a savvy satellite operator

By Peter J. Brown, B&C correspondent

Later this year, Hughes Space & Communications Co. will be on the front page. For the first time, a giant commercial satellite will be launched from a floating platform far out in the Pacific Ocean. The satellite, Galaxy XI, will be the newest addition to PanAmSat Corp.’s space-based fleet, and is the first of the Hughes HS 702 series.

“Sea Launch” brings together engineering and design talent from the U.S., Russia, Norway and Ukraine. It is 40% owned by Boeing Commercial Space Co. For Hughes, the HS 702 marks another innovative phase in its history. This will be the most powerful commercial satellite ever launched.

The risk for Hughes is considerable. There will be no preliminary full-scale testing of Sea Launch. The Galaxy XI launch will constitute the first complete activation of this revolutionary offshore launch system.

Hughes Electronics Corp. has just wrapped up its first full year with a 71% stake in PanAmSat. Under the terms of the merger, according to one Wall Street analyst, Hughes Communications Inc. can grow its stake to more than 80% of PanAmSat or reduce it to almost half.

Hughes is the world’s leading operator of commercial satellites. By merging in 1996 with PanAmSat, a dominant player in the fast-growing interna-
Meet the new company with decades of experience.

Once broadcasters looked to DMV (formerly the advanced products division of NTL) for compression, and News Datacom for conditional access. Now DMV and NDC have come together to create NDS. Your one clear choice for digital broadcast solutions. Whether you’re involved in contribution, distribution, digital terrestrial, private networks, or cable, NDS has everything you need to be successful.

NDS has already provided systems to leading broadcasters worldwide such as: CBC, DIRECTV, EBU, Fcx, Galaxy Latin America, N3C, PanAmSat, Reuters, and others.

Call NDS today. Because with NDS, the future of digital broadcasting never looked clearer.

www.ndsworld.com
tional satellite services market, Hughes has become an even stronger space and satellite communications company, with terrestrial wireless communications technology part of the mix.

Besides building satellites, it is growing the largest DBS service in the U.S., DiRECTV. And while some observers consider last year's departure of former Hughes Electronics Corp. chairman C. Michael Armstrong the end of an era, the company is thriving, and strives to be forward-looking. A new stock made its debut a few days before Christmas under the old symbol (NYSE: GMH). On Jan. 16, GMH stock closed at 35-7/16.

"So many things are happening here, and yet we need to reestablish a track record. Our GMH stock is not quite ready to get a track record going. After all, we became a new quantity on Dec. 17," says Steven D. Dorfman, vice chairman, Hughes Electronics. "It's our job now to go out and explain the new Hughes Electronics to the investment community."

"As far as PanAmSat is concerned, we are very satisfied with the outcome of the merger, and Wall Street appears to agree with this assessment. At the end of 1997, we were up to around $42 from a stock price of approximately $30 at the start of the year. That represents roughly a 40 percent appreciation," Dorfman says.

PanAmSat's year-end financial data have not been released. For the first nine months of 1997, PanAmSat (Nasdaq: SPOT) had revenue of $558.1 million and long-term satellite service contracts of more than $7 billion.

Hughes must not only introduce potential new investors to the restructured company. Dorfman stresses, but also execute its strategy properly to maintain the lead in its core markets. The goal is to stay one step ahead of the competition, and that has been achieved for now by the merger with PanAmSat. While Hughes is keeping its domestic satellite operations personnel on the West Coast, the finance and marketing arm of the Hughes Galaxy team has moved east to join PanAmSat's cadre of international satellite fleet operators in Greenwich, Conn.

"We felt from the start that the two teams were complementary. To make this a success, we knew that we couldn't keep them as two separate teams. We had to blend them," says Carl A. Brown, executive vice president of PanAmSat. "Operations was perhaps the cleanest part of the whole merger. All of our personnel were

**DiRECTV grabs Galaxy III-R capacity**

DiRECTV has signed a deal with satellite operator PanAmSat for satellite capacity on the Galaxy III-R bird, which DiRECTV will use to offer niche and special interest programming and to launch HDTV this fall.

Initially, DiRECTV is leasing four 63-watt transponders on PanAmSat's Galaxy III-R bird, which it will use to roll out six channels of ethnic programming from Fort Lee, N.J.-based Ethnic American Broadcasting Co. (EABC) starting in mid-1998. The channels will include Russian programmer WMNB-TV; Network Asia, serving Asians from the Indian subcontinent; Ukrainian Broadcasting Network; Ciao TV- The Italian Superchannel, and both the Egyptian Satellite Channel and Nile TV.

According to a DiRECTV spokesperson, DiRECTV has the option of expanding to as many as 24 transponders on Galaxy III-R, although no timetable has been set for this expansion. That translates into approximately 120 additional channels of programming. DiRECTV's plans also call for both Galaxy III-R and its DBS satellites to beam down high-definition television programming later this year. DiRECTV demonstrated HDTV transmission at the CES show in Las Vegas earlier this month, downlinking two HDTV channels (each running at roughly 12 Mbps) off a DBS bird.

"We're really looking forward to providing this kind of service," Lourdes Saralegui, PanAmSat executive vice president, says about the DiRECTV deal. "This was something that several of our programmers were clamoring for, the ability to offer subscribers more and more services. This is the kind of service we love. It's brand new, and we have been working closely with DiRECTV on the satellite side, as well as pulling the programming together."

DiRECTV subscribers will access both Galaxy III-R, which is deployed at 96 degrees west, and DiRECTV's DBS satellites at 101 degrees west, by using a single 30-inch elliptical DSS system developed by Hughes Network Systems (HNS). HNS has been offering another dual-feed DSS system, DirecDuo, which incorporates a similar elliptical dish. DirecDuo allows subscribers to access DiRECTV, JUSB and DirecPC, the high-speed Internet access service developed by HNS, which is beamed down from PanAmSat's Galaxy IV satellite at 99 degrees west.

Galaxy II-R is currently beaming Galaxy Latin America's DiRECTV service to South America and the Caribbean. That service will be flash-cut over to the new Galaxy VIII satellite, which is co-located at 95 degree west. Galaxy III-R's switchable beams will be aimed back at North America in a full CONJ configuration.

"—Peter J. Brown
retained. We needed all of our satellite control facilities and teleports for domestic uses. ... We're outwardly focused now. We're focused on our customers."

Wall Street apparently has given a thumbs-up to the deal as well.

"It is an excellent fit. From the strategic standpoint, it gives PanAmSat the ability to offer worldwide seamless coverage," says Robert Kaimowitz, satellite industry analyst at C.E. Unterberg, Towbin. "PanAmSat is now the leading commercial satellite operator in the world, with 17 satellites in orbit and four more planned for launch this year. Their only true rivals are Intelsat, with Loral on the horizon. (There were 64 Hughes-built satellites in service last year for a long list of clients.)

"Satellite transponder capacity isn't necessarily a commodity. You have to see it evolving in what are referred to as good neighborhoods. You could describe it as a real-estate play. And PanAmSat's strategy is to capture those good neighborhoods," Kaimowitz says. Kaimowitz was evaluating both Hughes and PanAmSat at press time but was not ready to share his target price. At Bear, Stearns & Co., associate director Vijay Jayant has rated PanAmSat's stock as "attractive," with a target price for 1998 of $53 per share.

"The potential for growth is tremendous. I issued a buy for the stock at 30-3/8. I am concerned about the extremely small float. In other words, out of the 149.1 million PanAmSat shares, only 8 to 9 percent of the stock actually is in the public domain, and that's very small for a company that has a $6 billion equity cap with over $2 billion in debt. To generate new interest, Hughes and PanAmSat need to address the liquidity of this stock," Jayant says. "For 1998, it's an important year for PanAmSat with four launches scheduled."

With a dozen satellites in orbit, GE Americom maintains a slight edge over PanAmSat in North American satellite capacity. At the same time, PanAmSat is chasing Intelsat for the top slot in the global satellite race. Brown describes the new PanAmSat as "a condensed, compact organization" involving some 450 employees, or roughly the same number of employees working in both companies before the merger.

As PanAmSat looks forward to the launches of Galaxy X, Galaxy XI, PAS-7 and PAS-8 this year, the demand is there, at least in the domestic market. Transponder capacity on Galaxy X, scheduled for launch in June, is selling briskly. The Asian market is less predictable given its recent financial instability.

"We see the transition to digital combined with the widespread practice of dual feeding—the dual use by a source of both digital and analog feeds—creating some buying pressure. This is why we are putting on increased capacity. Overall, we characterize the domestic market as one where we will see continued growth in video distribution to cable headends, along with broadcast network feeds and DTH," Dorfman says. "Galaxy X and Galaxy XI will each carry 48 transponders, both C-band and Ku-band."

Dorfman predicts that his organization can achieve a 20% growth rate at a time when an annual growth rate of roughly 10% has been the norm. He sees plenty of room for new customers and new applications, including the data-intensive traffic in Internet-based services. With the explosive growth of the Internet, in particular. Dorfman is hesitant to predict how the increasing demand for data services will change

Broadcasting & Cable January 26 1998
the mix of services in which video has traditionally occupied about 80% of the pie chart.

Dorfman emphasizes the success of Hughes’s DBS service, DIRECTV, and dismisses the talk about slowing DBS sales. However, he also sees a marketplace evolving in which satellite communications provide synergy for the cable industry.

“The FCC has done a terrific job as far as satellite communications is concerned. Consumers have benefited, although we still have concerns about achieving a level playing field for DIRECTV. Cable is still in an extremely strong position,” Dorfman says.

“Both cable and satellite communications will flourish, and that has been the FCC’s principal role—to facilitate competition and to do what’s necessary to make that happen. DIRECTV and DBS constitute a real success story. Signing a million customers per year for three years is an impressive track record. At the same time, our cable customers are even stronger,” he says.

As far as fiber-optic capacity is concerned, Dorfman sees the final hurdle—connecting individual homes to large fiber-optic-based networks—as an enormous challenge.

The new fiber-optic networks emerging from companies such as Qwest Communications International, Worldcom and Williams Cos. will not adversely impact satellite communications, at least not for now.

“The critical issue for anyone using fiber on the ground to compete with satellites is not just the last mile, it is also the last 100 feet from the trunks,” Dorfman says. Building that digital pipeline with HDTV as its cornerstone has been a process that Hughes and PunAmSat have found both challenging and rewarding.

“NHK has HDTV up and running on our satellite today, although it is not yet a full-period channel open for delivery. All of our customers, broadcasters and cable, are concerned about signal quality, and all of them are involved in different levels of development and testing,” Brown says. “Cable is obviously where you find more compression-driven business plans. It has the advantage of a lot of small cable programmers who want to try out niche programming, while at the same time they cannot justify the cost of a full transponder. As expected, you see more risk-takers.”

Loral Skynet: The new Telstar connection

Despite many acquisitions last year, company still seeking new markets through joint ventures, acquisitions or joint marketing agreements

By Peter J. Brown,
B&C correspondent

Loral Space & Communications Ltd. did not sit still in 1997. In one year, the company brought under its umbrella AT&T Skynet Satellite Services, Satélites Mexicanos, S.A. de C.V. (SatMex), Orion Network Systems Inc. (this deal is scheduled to close this quarter) and Spectrum Satellite’s gateway in Richmond, Calif.

At the end of last year’s third quarter, Loral reported revenue of just over $1.1 billion, along with a net loss of $29 million for the nine months ended in September. Loral’s ongoing investment in both its Globalstar and CyberStar satellite systems is largely responsible for the net loss. Loral stock (NYSE: LOR) increased from $13 per share to more than $24 over the past year. It closed at $22-1/4 on Jan. 20. Year-end financial data were not available.

According to Joan Byrnes, formerly with AT&T and now vice president for marketing, sales and new business development at Loral Skynet, there is considerable flexibility, with regard to the three SatMex satellites, which may be used for domestic or international broadcasts. The SatMex orbital slots are located just east of the primary U.S. cable neighborhood on the equator, and they are ideal by any measure. With Solidaridad I and 2 at 109.2 and 113 degrees west, respectively, and with Morelos II at 116.8 degrees West—to be replaced by a much more powerful Morelos III in late 1998—these three SatMex satellites can cover all of North America.

The FCC has already authorized Televisa Internacional LLC to beam a mid-power Ku-band DTH service into a million U.S. homes using Solidaridad II. In October, Loral teamed with Telefónica Autrey in the bidding war for SatMex and won a 75% stake for $688 million.

“SatMex can currently sell capacity to U.S. customers; however, we would recommend that our U.S.-based services use our Telstar platforms. We feel that we can stimulate traffic between North and South America. That’s our objective here,” Byrnes says.

She emphasizes that Loral is actively seeking new markets by way of joint ventures, acquisitions and joint marketing agreements. It would be difficult for Loral to sustain indefinitely the pace of expansion it set last year. Intelsat’s privatization could become a vehicle for Loral’s further expansion: “It’s been two years away for three years already,” says one Wall Street analyst, who suggested that Comcast may go on the auction block and that Loral could be one of the bidders.

Orion recently has been carving out a niche as a premier pipeline for high-speed data. With its valuable domestic satellite slots, it could become a significant factor in Loral’s ongoing development of domestic and international private network services.

In addition, the Orion team’s expertise in high-speed data could prove valuable. A recent report issued by Massachusetts-based Pioneer Consulting, “Satellite Data Networks: The Internet’s Next Frontier,” concludes that the global DTH/DBS and video broadcast markets will grow from $14 billion to almost $80 billion in 2011, while the fixed data market will expand from $2 billion to $63 billion. Orion’s revenue for 1998 is projected to be approximately $36 million.

By the end of next year, Loral expects to have nearly 60 geo-
If you don’t make the move to Editbox, you could be on the road to nowhere

If you want your business to move forward, take a look at Editbox today.

Call our 24 hour Editbox Hotline now: 1 800 218 0051 Ext. 749
Quantel Inc., 28 Thorndal Circle, Darien, CT 06820 Tel: +1 203 656 3100 Fax: +1 203 656 3459 http://www.quantel.com
stationary and LEO (low earth orbit) satellites in orbit. These will include Globalstar LEOs and CyberStar, which will use fixed Ku-band capacity to start with, and Ka-band platforms to follow. Loral Skynet’s domestic fleet consists of Telstar 5, which was launched in May, Telstar 4 and Telstar 3, which is in inclined orbit. Telstar 6 will follow next September and Telstar 7 in 1999. In addition to Orion-1, which serves Europe, Russia and central Asia, an Orion satellite is scheduled for deployment over the Pacific this year, and a third Orion satellite for the Atlantic region is scheduled for launch in 1999.

Loral Skynet Satellite Services ranks third behind PanAmSat and GE Americom in the domestic fixed-satellite market. Loral Skynet may be dwarfed by the two, but its fast-paced acquisitions of the past year, combined with the fact that Loral’s two anchor tenants, Fox and ABC, remain firmly attached to the Telstar fleet, means Loral will be in the spotlight in coming months. However, Loral Skynet is not the exclusive provider of satellite capacity to Fox, which taps GE Americom and PanAmSat for C-band. Loral Skynet oversees about a third of Fox’s two dozen North American transponders.

The only significant departures from the Telstar roster in 1997 were PBS, which signed a multitransponder contract with GE Americom last summer while retaining one C-band transponder on Telstar 4, and the DTH service known as AlphaStar, which went bankrupt last summer. At the time of its launch, AlphaStar was Telstar 5’s largest Ku-band client. “It was significant for us to become a Loral company on March 15. It was a tremendous step forward,” Byrnes says. “Nineteen ninety-eight is when digital technology will come into its own, and the Telstar 5 footprint—with its ability to reach all 50 states—gives us a tremendous selling advantage.”

Byrnes emphasizes that Loral’s acquisition of Skynet translated into instant credibility: “It is proving that we are here to stay... With the expansion of our fleet and the advent of digitalization, we are having to expand our view of what constitutes our customer-service base.

“With access to digital spectrum, our broadcast clients will come into their own, while the cable industry will be able to take advantage of larger and larger doses of content. Overall, we have the ability to serve key neighborhoods, including distance education, business TV, resellers and the syndication market. And, of course, a growing number of Internet service providers,” she adds.

Resellers account for perhaps 15% of Loral Skynet’s business, according to Byrnes. Specialty programming in the form of ethnic fare from the new Pan-Asian Ku-band SpaceTV service is rolling out on Telstar 5 along with a sizable block of C-band transponders devoted to serving wireless cable affiliates under the TelQuest banner. Telstar 5 also serves ABC News’s NewsOne Channel, UPN, Fox and jewelry-oriented home shopping channel America’s Collectibles Network.

Byrnes predicts that management will change significantly as a result of digitalization. New varieties of services will emerge with the flood of single channels extracted from digitally compressed transponder capacity. The lower costs will open the door to new and nontraditional customers.

The issue of capacity in the sky involves many variables, including the possibility that other distribution technologies may affect satellite distribution and satellite access costs in the next decade. More attention is being paid to contrasting theories concerning elastic demand for bandwidth. Digital compression’s ability to instantly increase capacity eightfold to tenfold is opening doors by driving access prices down while simultaneously expanding the market.

“As leasing capacity becomes cheaper,” says Vijay Jayant, associate director at Bear, Stearns & Co., “it opens the market to more marginal players. The transition to an all-digital environment will be gradual. Will there be any problems due to overcapacity? With HDTV coming on-line, that’s hard to decipher. And when you consider what I describe as the numerous brandlets of cable programming, it means that many new channels will appear on the horizon soon. The result will be that net revenue per transponder is going to be higher, while the cost per channel will be lower.”

Making the technological mix even more interesting is a trend toward highly diversified communications companies that offer a broad mix of terrestrial and satellite-based services. Williams Cos., Tulsa, Okla., is a good example. Through its Williams Communications Group, it offers satellite services under the banner of Global Access Telecommunications. Williams also owns Vyvx, which consists of a mix of fiber-optic capabilities and satellite services.

“It is not uncommon to sit down at the table with representatives from another company and find yourself sorting through whether the other party is a customer, a competitor, a collaborator or a potential partner,” Byrnes says. “You have to be aware of these different roles.”

Since last February, Loral Space & Communications Ltd. has owned 100% of Space Systems/Loral, which also has a booming satellite manufacturing business. It has moved into the second spot behind Hughes in terms of commercial geostationary satellites under construction.

---

Turner signs up on GE-3

Turner Broadcasting has signed an agreement with GE Americom for capacity on the hybrid C/Ku-band GE-3 satellite, which it will use to deliver CNN programming throughout North America.

Under the deal, Turner will use 3 C-band transponders on GE-3 to transmit programming for the CNN spin-off networks CNNfn and CNN/SI. Turner also will use a Ku-band transponder on GE-3 for CNN Newsource, its syndicated news service with more than 500 network affiliates and independent stations in the U.S., Canada and Mexico.

GE-3, which is located at 87 degrees west longitude, is GE Americom’s latest bird. The hybrid satellite has 24 C-band and 24 Ku-band transponders, became operational in October 1997.

—Glen Dickson
Microsoft staffers pushed off Sidewalk

Meanwhile, software giant brings out Explorer 4.0 for 3.1

By Richard Tedesco

Microsoft Corp. played give-and-take last week, taking 36 full-time positions from its Sidewalk online service, while giving Internet Explorer 4.0 to Windows 3.1 users.

The extension of IE 4.0 to a larger audience was business as usual and—in a way—so was Sidewalk’s 20% workplace slice. Lagging behind its goal of launching a dozen sites this year, the start-up city guide service lost one Sidewalk location when it pulled the plug on its Montreal site.

Newspapers in major cities across the country were anxious about Microsoft’s entry into the city guide market. In Sidewalk’s second year, Microsoft is redefining its editorial mission; the service is getting leaner as it gears up to grow itself fivefold this year. By year’s end, however, Sidewalk will still contribute to the $300 million–$400 million Microsoft stands to lose on content development.

Microsoft is discovering that its Sidewalk attraction isn’t quite as original as it first imagined, according to Peter Krasilovsky, vice president and online analyst for Arlen Communications. “They realized, before they were in too deep, that they have nothing unique to provide in the arts and entertainment area,” Krasilovsky says. “Now they’re finding they’re a yellow pages, and they’d better get their act together.”

Krasilovsky applauds Microsoft’s reappraisal of what he calls its ambitious, overextended editorial approach for Sidewalk. He foresees Microsoft using its extant services, like Cinema and CarPoint, for localized extensions in Sidewalk as it moves toward a model focused on commerce.

Microsoft claims its Sidewalk business already is booming, beating all its revenue goals to date, according to Matt Kursh, Sidewalk business unit manager. He says efficiency—not necessary cost-cutting—is the sole motivation behind the layoffs. “We’ve found ways to produce high-quality sites more effectively than we knew we could have,” says Kursh.

Sidewalk still plans sites in 50 cities—a quantum leap from the nine sites it has now in New York, Washington, San Francisco, San Diego, the Twin Cities, Denver, Houston, Boston and Seattle, according to Kursh. A pared-down Chicago staff will soon launch a site there.

Sidewalk claims that major advertisers such as Sears, Barnes & Noble, BMW, Prudential Real Estate and United Airlines, along with 5,000 local advertisers, have pushed it beyond original ad sales projections. But Kursh declines to project when Sidewalk may start to show a profit.

Competition from CitySearch and America Online’s Digital Cities, along with local online newspaper guides, could give Microsoft further food for thought on those plans to launch 41 new sites by the end of the year.
The World Wide Web

Online networks, networks online

CBSnow aligns with Oracle, Razor Fish, Icon CMT
By Richard Tedesco

Trumpeting its imminent affiliate network’s presence on the Internet, CBS New Media officially embraced Oracle Corp., The Weather Channel and Razor Fish as partners on the CBSnow project.

Oracle Corp. is to supply what CBS calls a “revolutionary” online engine to drive the CBSnow site and offer PC users access to affiliate sites from CBS.com. Oracle is customizing its Web technology for the project and providing consulting services to the network’s new media unit.

The primary benefit of the Oracle link for CBS? Oracle’s parallel server technology will ensure that scalability for the 100 million Web pages the site will offer monthly will be readily available to Web surfers.

That rounds out the technical online pairings for the Big Three broadcasters: NBC is partnered with Microsoft Corp., and Disney has bought its own inhouse development partner for ABC in Starwave Corp.

In a second deal, affiliates will have the option of branding weather information on their sites with The Weather Channel. The channel will localize weather data, including online satellite and radar maps, for affiliate sites. “Reliable and accurate weather information is universal content,” says Dean Daniels, vice president and general manager for CBS New Media.

Another content partner, TheTrip.com, will link PC users to travel services through the CBSnow site.

Users can track flight availability, make reservations and access maps and travel guides through the site.

In addition to the content from these partners, CBS will rely heavily on links to CBS SportsLine and CBS MarketWatch to drive usage on the affiliate sites—and traffic back to primary CBS sites.

Razor Fish, the Silicon Alley (New York City) online developer whose clients include Sony, Time Warner and the Smithsonian Institution, figures to bring a sharp edge to the CBS.com interface with CBSnow. That will be sorely needed to maintain an audience for the “bridge” pages that CBS will employ as advertising opportunities between page downloads as PC users push on to their respective affiliate sites.

Finally, CBS New Media has enlisted Icon CMT Corp. to play host and provide network connectivity for CBSnow.

Online Programming

An alternative mix
Live Alternative Entertainment goes online
By Richard Tedesco

The Alternative Entertainment Network kicked off a genuine alternative online last week: live streaming content on a regular weekly schedule.

AEN has been providing an eclectic mix of on-demand content to PC users on its AENTV.com site for almost a year, with a half-hour Judy Tenuta vehicle the marquee feature. Now Tenuta’s show has gone live weekly along with another original show and some syndication reruns, among them the Comedy Shop series, with Norm Crosby, and former ABC sitcom Hi Honey, I’m Home. Add some one-shot productions, including a Connie Francis special and a documentary about Harley Davidson motorcycles, and you have an indefinable online entertainment animal.

Run it up a cyberspace flagpole and see who salutes—that’s the basic plan of AEN founder Drew Cummings, a former TV producer who seeks a “strange demographic” of PC users 25 to 45 years old. “Everybody seems to think the demographic is much younger on the Internet,” says Cummings. “[AEN] is a nice mix of drama, comedy, nostalgia and documentaries. We’ll see what works.”

It’s working well enough for AEN to report a modest profit on the strength of equally modest licensing fees for the content, which fills its 10 “channels” with 5,000 shows, series and clips.

AEN has made a major technical transition, recently replacing VDONet’s streaming technology with RealNetwork’s RealVideo. Its sponsors include Casio, Seagate Technologies and Intergraph Computer Systems, which is supporting the new live channel. AEN will stream ad spots as part of its “live” content, according to Cummings, adapting some on-air TV spots to the purpose.

Cummings claims that more original content will be coming from AEN’s $200,000 broadcast facility in Simi Valley, Calif. All in a Day’s Work, a weekly take on dangerous livelihoods hosted by former NFL quarterback Dan Pastorini, is the latest addition.

Coming up soon on AEN’s lineup: the Sonny & Cher Show, an old Redd Foxx series and a Frank Sinatra special. “It’s like TV back in the early ’70s,” Cummings says.

It’s sort of a retro take on TV adapted for a growing Internet audience of high-end PC users likely to gravitate to any multimedia for the sheer novelty of it. In that way, it’s the Internet imitating early TV.
Is This Career Challenge The Right Opportunity For You?

Broadcasting & Cable January 26 1998 75
**Chief Engineer:** KDFA-TV station in Dallas is looking for a Chief Engineer. This position is responsible for day-to-day technical operations related to studio, transmitter, and LAN operations. Must possess the knowledge and advanced understanding of television broadcasting, including digital and UHF transmitter. Ability to handle multiple projects, general building and electrical power system maintenance. Must have a basic knowledge of applicable laws related to but not limited to employment and television broadcasting. Able to communicate effectively both verbally and in writing with strong interpersonal skills. Demonstrate supervisory experience and ability to interact with all other managers within the station effectively. Qualification: Must have 5 or more years of experience as Chief Engineer or as a proven Assistant Chief with a TV station. A BS Degree or related field is preferred. Send resume to KDFA WB 33, A Division of Tribune Television Company, 8001 John Carpenter Freeway, Dallas, TX 75247. Attn: Human Resources. Resume must be postmarked no later than 02/02/98, EOE and drug free workplace. No phone calls please.

**Chief Engineer:** WUAB-TV, Cleveland, has immediate opening for Chief Operator. Requires knowledge of FCC regulations. FCC license or SBE certification a plus. Minimum 5 years experience in television broadcast engineering, including working with UHF transmitters. Must be solutions oriented, able to lead and work on team and individual projects, and have excellent communication and interpersonal skills. Fax resume and cover letter to 216-348-0614, or mail to Cannell Communications 1717 E. 12th St., Cleveland, OH 44114. EOE. Women and minorities encouraged to apply.

**Help Wanted News**

**Weekend Sports Reporter-Anchor:** Southeast mid-market station needs a sports anchor/reporter who can perform with the best. Has a strong work ethic and a can-do attitude. Our growing sports market offers the best in big time college and professional teams/events plus the nation’s best college women’s sports programs. The successful candidate will be versatile enough to entertain the non-sports viewer and jock talk with the folks at the sports bars. Our weekend anchor is responsible for a high volume of reporting and must be a superb storyteller. You will be asked to shoot, write, and edit your material, and you will also work with great sports photographers. Applicants should have three to five years anchoring experience in mid-size or large markets; be very comfortable with windows-based computer systems; and be organized enough to produce a great cast. Send non-returnable tape/resume to Box 01310 EOE.

**PROMOTION WRITER/PRODUCER**

**KING 5 TV**

*The Pacific Northwest's leading news station,* is seeking a seasoned Promotion Writer/Producer with a focus on News. Successful candidate must be versatile with video, film, graphics, audio, and off-line production. Avid experience a plus.

If you have 3+ years experience, are well-organized with exceptional interpersonal skills, and have a proven track record of successful spots, send 2 copies of your resume and a non-returnable BETA tape to:

**KING 5 TV**

Attn: HR Dept. #9KB1R 333 Dexter Ave. N. Seattle, WA 98109

An Equal Opportunity Employer. M/F/D/V

**NEWS PROMOTION WRITER/PRODUCER**

**KRON Channel 4, the NBC affiliate serving the San Francisco Bay Area** has an immediate opening on our promo team. We’re looking for a skilled writer and top quality producer who knows their way around a news room. Your assignment: Topicals, teases and tie-ins. Nights? Probably. Weekends? Occasionally. We welcome your 2 to 3 years experience with a leading network affiliated station. **KRON** is locally owned and operated by the Chronicle Broadcasting Company, the Bay Area’s news and information leader that includes Bay TV cable, and The Gate on-line. In exchange for sharing your talents with our television station, we offer a competitive salary and benefits, and the opportunity to live and work in the most beautiful and creative city in America. We are a drug free company that requires pre-employment drug testing.

Send your tape and resume no later than February 28, 1998, to **KRON** Human Resources PO Box 3412 San Francisco, CA, 94119.

**KRON**

The Chronicle Broadcasting Company

Rison (Ark.) star at Eyemark

W hen Ed Wilson graduated from the University of Arkansas in December 1979, he thought he’d wind up working at a local bank in the Little Rock area. The finance major was all but set on getting into the finance/banking industry—maybe not a savings and loan—in Bill Clinton’s hometown.

But after going to an Arkansas football game just weeks before graduation, Wilson changed his mind. Through mutual friends, he was introduced to former Viacom executive Jim McCormick, who talked him into a job in television. Two days after graduation, Wilson was on his way to New York to sell Viacom programming.

“They taught me to read a ratings book, they told me what a spot was and they basically taught me the business,” says Wilson, now president of Eyemark Entertainment and CBS Enterprises. “I really didn’t know anything, and I had never been in a TV station before.”

The green kid from Rison, Ark. (population 1,200) was suddenly working in a Manhattan high-rise that had more than double the population of his hometown. Wilson caught on quickly and was sent out into the marketplace to sell a variety of products from Viacom’s library. In his bag was everything from *I Love Lucy* to *The Andy Griffith Show*. “I made my first cash sale the following May,” the 40-year-old Wilson says. “It was *Have Gun Will Travel* and *Gunsmoke*, and I sold it in Ada Ardmore, Arkansas. I think the total deal was $10,000.”

After a few years in New York, Wilson moved to Chicago and then on to Dallas, selling Viacom product and moving up the company ladder. He met his wife, Leslie, in Dallas and decided it was time to get off the road and into a more stable family environment. Also wanting to learn the broadcasting side of the business, he wound up as sales manager at *KATV* (TV) Little Rock in 1983. Wilson sold local advertising time and oversaw a group of salesmen at the local ABC affiliate for a year.

After learning a little about what went on on the other side of the table, Wilson yearned to get back into the syndication business. A friend of his in Dallas—a guy named Greg Meidel, whom Wilson had met during his days with Viacom and had dealt with at *KATV*—had a plan.

“We ended up working out a deal where I replaced him in Dallas,” says Wilson, who in 1984 was named head of Paramount Television Sales in Dallas and the Southeast. “Greg was being promoted to head of sales at Paramount in Los Angeles, and it just worked out perfectly.” Meidel is the current head of Universal Television and USA Networks.

Wilson remained in Dallas for three years, moving on to New York in 1987 to head Paramount’s sales division in the Big Apple. “This time I went to New York with a wife and two children and some knowledge of the business,” he says. Three years later, Wilson once again was packing his bags, this time headed west to Los Angeles. Named senior vice president of syndication at Columbia TriStar Domestic Television, he worked under Barry Thurston, whom Wilson calls a “true legend in the industry.”

After selling such product as *Married... With Children* and *Seinfeld*, Wilson thought the timing was right to start his own syndication outfit. In fall 1994, Wilson and A.H. Belo Corp. founded MaXaM.

“After doing it for a while, you start thinking you’re entrepreneurial enough to do it on your own,” Wilson says. “I had known the Belo people from my days in Dallas, and Ward Huey [vice chairman of Belo] is one of the classiest guys in the business.”

MaXaM opened up three regional sales offices, acquired a Hallmark Entertainment film package and launched *Psi Factor* into syndication. In what Wilson calls “a wonderful 14 months,” the independent syndication company built a reputation, with a launching pad for new shows on the valuable Belo stations. MaXaM was nearly acquired by one Hollywood studio only a year after its start. But just after Group W and CBS merged in late 1995, the Tiffany network came calling. In January 1986, CBS acquired MaXaM and turned it into Eyemark Entertainment.

“There is a little irony to all of this,” Wilson says. “My first job in the business was with Viacom. Viacom was created when the FCC said that CBS couldn’t be in the syndication business back in the late 1960s. When the FCC said they could be in the business, we created Eyemark. So I almost feel like I have come full circle in my life.”

Today, Wilson runs Eyemark’s syndication unit, successful recently in first-run series with Martha Stewart and in off-network sales of CBS series, including *Touched by an Angel*.

“I guess you could say I’ve come a long way from selling Andy Griffith,” he says.

DEATH

Jack Lord, 77, actor, died Jan. 21 of heart ailments at his home in Honolulu. Lord, born John Joseph Patrick Ryan in New York City, starred as Steve McGarrett in the CBS crime show, Hawaii Five-0. For 12 years, Lord, who produced and sometimes directed the show, ended most episodes by saying “Book ‘em, Danno!” Hawaii Five-0 ended in 1980. Lord also made guest appearances on such television shows as The Untouchables and Have Gun, Will Travel.

Broadcasting & Cable January 26 1998
FCC officials are ready to wrap up the digital TV allotment table Jan. 29. As expected, the commission last week placed the item on its agenda for this Thursday’s open meeting. Sources expect changes to the table in the northeast as well as in Los Angeles. Sources also expect the new table to permit UHF broadcasters to boost their digital power.

House Telecommunications Subcommittee Chairman Billy Tauzin (R-La.) and subcommittee member J. Dennis Hastert (R-Ill.) have asked FCC Chairman Bill Kennard to keep channels 2-6 for broadcasting only. The FCC has been suggesting that it might move broadcast signals out of the lower frequencies to make way for other services. Tauzin and Hastert argue that the stronger signals in the lower frequencies reach much farther than signals in the higher frequencies, “which results in more extensive and efficient television service to those people residing in small towns, rural areas and mountainous terrain.”

Children’s advocacy groups are still working to get naysayers NBC and BET to use the content-based ratings system. The National Parent Teacher Association has launched a call to action on its Website at www.pta.org. The association is asking parents and concerned adults to e-mail NBC President Bob Wright, BET President Robert Johnson and the general manager of their local NBC affiliate. Meanwhile, NBC shows no sign of budging. Wright told reporters at the Television Critics Association tour in Pasadena, Calif., last week that he has no plans to add S for sex, V for violence, L for language and D for dialogue to NBC’s shows.

Once Congress returns tomorrow (Jan. 27), Senate Commerce Committee Chairman John McCain (R-Ariz.) hopes to move legislation that would stay the U.S. Copyright Office decision to raise the rates that satellite TV providers pay to carry broadcast network signals. McCain also plans to hold hearings on rising cable rates and the Telecommunications Act of 1996 during the second session of the 105th Congress. he said during a press conference in Phoenix last week.

The National Cable Television Association and children’s advocacy groups next month will announce “Tools to Help You Choose,” a series of broadcast public education spots to help parents understand the television content ratings system. NCTA and nine advocacy groups will unveil the campaign at a press conference on Feb. 5. Ratings advocates Senate Commerce Committee Chairman John McCain (R-Ariz.), Rep. Ed Markey (D-Mass.) and former Captain Kangaroo Bob Keeshan will attend.

NFL International used virtual signage for the first time in a worldwide Super Bowl broadcast in the telecast of Super Bowl XXXII yesterday. At press time, NFL International was planning to use electronic imaging technology from Princeton Video Image to insert virtual signage from Coca-Cola in the broadcast, which would reach 670 million viewers outside the U.S. and Canada. The virtual signage from Coca-Cola, inserted into the live video feed via computer, was to include a “Scoring Button” that indicated points for touchdowns and kicks and “Fun Facts” trivia dur-

NATPE clearance update

Columbia TriStar has cleared talker Donny & Marie in 97% of the country, action hour V.I.P. in 83%, Vibe for a second season in 82% of the country and off-net The Nanny in 93%.

Kelly News & Entertainment has cleared Rebecca’s Garden on 61 stations representing 63% coverage. Stations that renew the show are eligible to win a trip for two to Holland for the Tulip Festival in mid-April. Series star Rebecca Kolis will serve as guide on the 10-day trip.

Worldvision as of last Thursday had cleared Pictionary in 45% of the country for year two, Judge Judy in 78% for year three, Judge Joe Brown in 70% for its freshman outing and America’s Dumbest Criminals in 55% for year three.

Pearson All American has cleared Kickboxer and The Kid on 73 stations representing 61% of the country; Air American, the action hour starring Lorenzo Lamas, has been cleared on 81 stations (75% coverage); Match Game has been cleared on 64 stations (66% coverage).

Tribune Entertainment Co. has renewed Gene Roddenberry’s Earth: Final Conflict and Nightman for second seasons. Both shows have been cleared in 39 of the top 40 markets. Earth is now cleared in 70% of the country and Nightman in 77%. Earth: Final Conflict is the highest-rated new first-run action hour, averaging a 4.3 cume rating, season to date, according to Nielsen Media Research. Nightman is averaging a 3.4 household rating in its first season. The distributor has also cleared Malibu, CA on 80 stations representing 74% of the country.

PolyGram Television’s new first-run series The Crow: Stairway to Heaven has been cleared in more than 70% of the country. The series, based on the Ed Pressman films of the same name, has been sold to 60 stations, including WCUI-TV Chicago, WDCX(TV) Washington and KTXX(TV) Fort Worth. PolyGram has also cleared its new one-hour weekly music series Motown Live on 77 stations representing 75% of the U.S. Clearances include WWOR-TV New York, KCO(P) Los Angeles and KRON-TV San Francisco.

Harris and Lucent unveil DTV encoder

Harris Broadcast and Lucent Technologies introduced an ATSC-compliant digital television encoder last week. Harris will begin delivering the encoder in March.

The modular product, which will be marketed as the Harris FlexiCorder, will be capable of SDTV and HDTV encoding in both interface and progressive scan formats. It can deliver multichannel SDTV encoding now, which Harris and Lucent demonstrated in New York last week, and will be able to deliver HDTV encoding by October. A base 4801 encoder starts at about $90,000, while a full-blown unit capable of encoding 480i, 480p, 720p and 1080i will sell for around $450,000.

Initial FlexiCorder customers include Cox station and ABC affiliate WSB-TV Atlanta and three A.H. Belo stations: ABC affiliate WFAA-TV Dallas, CBS affiliate KHOU-TV Houston and NBC affiliate KING-TV Seattle. All of the stations will get SDTV models in March; the three Belo have ordered HDTV capability as well, while WSB-TV is sticking with a 4801 SDTV unit for now.

"We want to come up with converters that match what the networks' formats are going to be," says John Swanson, vice president of engineering for Cox Broadcasting. "The last information I got [was that] they were leaning toward 720p. That's what I've heard, but we're waiting to make a determination until they tell us something."

—Glen Dickson

Regional Networks officially join the Fox Sports Net family on Wednesday (Jan. 28).

kwtv-tv Waco, Tex., reporter Kathryn Dettman was found beaten to death in her Temple, Tex., apartment last week, just days before she was to start a new job at CBS affiliate KKT-V(TV) Dallas–Fort Worth.

Dettman, 36, apparently had just stepped out of the shower when she was attacked in her home. Police are questioning a young male neighbor they found covered in blood. Dettman's friends said the man had "been calling her a lot. But she seemed unconcerned about it," according to Temple police spokesman Tony Hennes.

Charges were not filed Thursday, but the man remained in custody and underwent more questioning. Dettman was to leave her job at kwtv-tv Friday to start work as a general assignment reporter at KNTV today (Jan. 26).

The House Judiciary Committee will continue its oversight hearings on satellite and cable compulsory licenses Feb. 4. Invited to testify are Charlie Ergen of EchoStar, Sid Amira of PrimeTime24, Eddie Fritts of the NAB, Peter Boylan of United Video Group, Matt Polka of the Small Cable Business Association and Bob Phillips of the National Rural Telecommunications Cooperative.

Errata: The Jan. 19 "Fifth Estater" feature should have identified Fox's FX cable network as being three and a half years old, rather than 10 months old. Also, the Fox Sports news show that starts one hour earlier than ESPN's SportsCenter should have been identified as Fox News, not as The Last Word.
Polite applause

FCC Chairman Bill Kennard drew from past and present last week to praise broadcasters for their contributions to society. Citing Martin Luther King’s “I Have a Dream” speech and ABC’s airing last week of the story of civil rights figure Ruby Bridges, Kennard hailed the NATPE audience for showing viewers things “they would never have seen on their own.”

The speech was in stark contrast to the broadside delivered by predecessor Reed Hundt in his inaugural speech at NATPE. Hundt’s criticisms of TV as contributing to a “wasteland of crime” created some instant animosity that future events would only reinforce.

Kennard’s speech was not without a red flag. He emphasized that he wants to write new public interest rules for the digital age, which smacks to us of more content regulation. The Kennard speech received a standing ovation from the NATPE crowd. For now, we’ll keep our seat until we’ve seen more of the Kennard agenda.

Free speech at steak

While we are confident in TV superstar Oprah Winfrey’s ability to defend herself against the beef industry, we are concerned about the laws under which her current litigation has been brought. We find both fascinating and worrisome the notion that lawmakers in Texas—and several other states—took time from their presumably busy legislative agendas to write a law that seeks to protect food from insult.

Growers and sellers of perishable foods make the point that theirs is a fragile industry, especially vulnerable to quick turns of the marketplace. They say it can suffer great and irreversible damage when disparaged recklessly. Advocates insist these “disparagement statutes” are not overly burdensome, and that plaintiffs have to meet a substantial burden of proof to win.

But the flow of information can also be fragile. We worry about the small-market radio and TV reporters who can be intimidated by laws restricting speech about particular industries. If a remark from a talk show is attacked, how many journalists can we expect to vigorously pursue consumer issues? Human beings are fragile too, and unsafe food products can harm people faster than speech can harm an industry. How many potential health hazards will go uninvestigated?

It’s been noted that if Oprah is successful defending against the dubious notion that her on-air remarks were defamatory and cost the beef industry millions, there will be no appeal and the law could remain intact. We hope, however, that Winfrey’s defense will shed the light of truth on this law and that legislatures in Texas and other states will do the right thing and repeal this unnecessary and unconstitutional burden on speech.

The game’s up

We want to add our voice to those already raised to challenge the federal law banning truthful speech about legal gambling. Two lower courts already have ruled that the ban violates the First Amendment. Now the Supreme Court has a chance to put an exclamation point on those decisions. Among the arguments against the ban: While ads for state-sanctioned gaming are legal, ads for state-regulated casino gambling are not, in what the Association of National Advertisers accurately describes as a “crazy quilt of content-based discrimination.” The ANA also points out that the government was trying to resurrect an exception for so-called vice products, an exception which the high court already has said is invalid.

We would add the argument that, as the high court made clear in its Liquormart decision in 1995, “government may not suppress speech as easily as it may suppress conduct.” That means that the government may not treat a ban on gaming ads as a more narrowly tailored means of achieving its interests than a ban on gambling.
