Make a smooth and cost-effective transition to DTV with proven solutions from Harris

Let the Harris FlexiCoder™ ATSC MPEG-2 Encoding System support your digital growth path

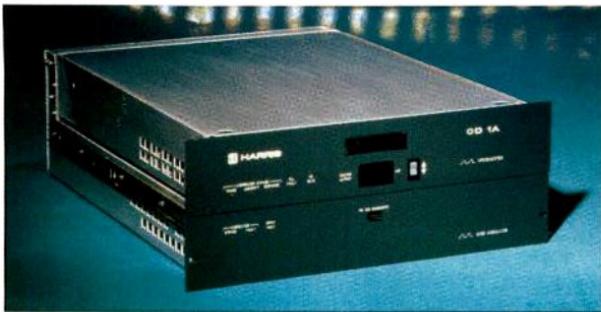

Selected as a *Broadcast Engineering Pick Hit* at NAB 1998, "future-proof" FlexiCoder can solve your immediate needs for DTV encoding and simply lets you plug in additional capabilities when needed.

You can start with a single-channel SDTV or HDTV system and upgrade to a redundant, multi-channel configuration simply by adding boards and software. FlexiCoder includes monitoring decoders, system or board-level redundancy, dual ATSC transport stream output, SMPTE 310M ATSC output interface, and external transport stream frequency reference.

For more information, please fax us at 217-222-0581.

Harris CD 1A - broadcasting's first second-generation ATSC 8-VSB exciter for DTV

The exciter is the most complex part of the transmitter, so you don't want to take a chance on unproved technology. The Harris CD 1A is the industry's first second-generation ATSC exciter. The heart of all Harris VHF and UHF DTV transmitters, it builds on field-proven Harris technology operating in more than 50 exciters worldwide. With CD 1A, Harris offers even more features to maximize performance and coverage. Learn why Harris DTV exciters were used by six of the seven United States experimental DTV stations and by HDTV receiver manufacturers from France to Japan. For more information, please fax us at 217-222-0581.

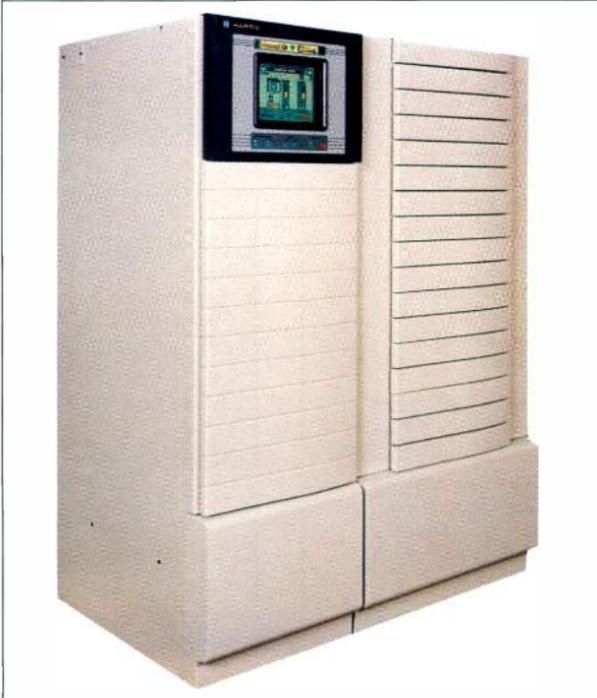

Harris offers new DTV white papers

Harris engineers have released new white papers focusing on topics relating to digital television. Papers include:

- **A Fresh New Look at 8VSB Peak to Average Ratios and Practical N+1, N-1 Combining Systems** by Robert J. Plonka, principal engineer.
- **HDTV Broadcast of Major League Baseball** by Gerald W. Collins, director of TV engineering.
- **A Harris WAVESTAR UHF Traveling Wave Array Antenna for Dual-Channel DTV/NTSC Operation** by Harris staff.

For a copy of any of these papers, please fax your request to 217-222-0581.

Maximize performance and coverage with the Harris DiamondCD™ UHF Solid State DTV Transmitter

The DiamondCD Series was developed especially for DTV. This modular system offers exceptional redundancy, while its CD 1A second-generation ATSC 8-VSB exciter provides superb, field-proven performance. Special features - including a power supply for every two "smart" power amplifier modules - ensure maximum coverage. Straightforward controls and graphical diagnostics simplify local and remote operation. Air cooling and configuration flexibility simplify installation, even in crowded transmitter buildings. See why DiamondCD could be your best choice for DTV. For more information, please fax us at 217-222-0581.

Harris/ITI DTV conversion studies provide complete RF blueprint for cost-effective DTV implementation

Harris has partnered with International Towers, Inc. (ITI) to offer customized DTV conversion studies. These studies consider every part of the broadcaster's RF air-chain to provide a comprehensive planning document outlining various DTV implementation options. The Harris/ITI studies include results, photos and recommendations from a complete physical tower inspection; a DTV RF proposal and budgetary information for antenna, transmission line, and transmitter; NTSC and DTV antenna/transmitter summaries and coverage estimates; a structural analysis and modifications of the existing tower (including proposed DTV equipment); tower location and registration section based on differential GPS measurements; tower-related budgetary prices, and a preliminary installation schedule. For more information, please fax us at 217-222-0581.

Harris combined-channel antennas can help alleviate tower problems

Harris offers a comprehensive range of wideband antennas capable of combined-channel operation, including:

- **UHF Dual-Channel Wavestar®**, a slotted, coaxial, center-fed antenna with a low-windload design. This antenna is ideal for stations with analog and lower-adjacent (N-1) DTV channel assignments. Providing exceptional aperture efficiency, this side-

mount antenna can replace an existing single-channel antenna without adding significant windloads to an existing tower.

- **UHF Deltawing**, a line of wideband panel antennas that can accommodate up to five separate channels, whether they are adjacent or widely spaced.

These antennas are available for low-power to high-power (240 kW average power) applications. While a semiflexible transmission line is standard, a rigid feed system is

available and offers maximum reliability for high-power applications. Deltawing antennas offer enormous pattern flexibility, and are well suited for stacked arrangements.

- **VHF Deltawing**, wideband panel antennas that are available for low-band and high-band applications. These antennas, which also lend themselves to combined operation, can mount on existing towers and are ideal for stacked arrangements. Among other benefits, they are simpler - and therefore more reliable - than dipole antennas.

- **VHF Batwing**, turnstile antennas that are capable of adjacent-channel (N+1 and N-1) and multi-channel operation. These antennas are ideal for top mount, side mount and stacked arrangements.

For more information, please fax us at 217-222-0581.

Harris adds DTV courses to Training Center line-up

Harris has added two five-day courses to support broadcasters in the conversion to DTV to the curriculum roster at its Broadcast Technology Training Center in Quincy, IL:

- **Intro to HDTV** provides a roadmap to DTV planning for engineers and first-line managers. This course is designed to provide a comfortable understanding of the entire DTV system. Focuses include DTV technologies (MPEG-2, 8-VSB, AC-3 Dolby® audio), peak to average power, NTSC and ATSC combining including N+1 and N-1, coverage issues, and possible bottlenecks and constraints.
- **TV Systems and Installation** aims to prepare engineers and support staff to design and install the second transmission air-chain required during the DTV conversion.

For additional information, please phone the Harris Broadcast Technology Training Center at 217-221-7589 from 8 a.m. to 5 p.m. CDT weekdays or check our website: www.broadcast.harris.com.

From the editor...

Welcome to *Broadcast Engineering's* annual Product Source. Our goal is to provide you with the latest new product information in broadcast and production technology.

This month, we focus on some of the hot new DTV products released at NAB. While the convention looked to be the unofficial "launch" of digital television, it was the selection of differing video formats by the networks that received most of the attention.

This significant divergence of opinion in the march to DTV now forces technical managers to select

equipment carefully, lest they find themselves format challenged.

Ah, but rest easy, my friend,

because you now hold in your hands help in finding the answers you need to

build that format-friendly facility.

As always, let me know what other types of information you'd like included in further issues of *Broadcast Engineering*.

Fujinon's 19X. The *New* Pro Standard!

A19 X 8.7ERM

Winner of the Emmy in
Lens Technology

Designed specifically for today's pro video digital cameras.

As the industry leader in optical technology, Fujinon continues to set new standards with the new 19X lens. It's the widest angle, highest magnification lens ever developed for today's pro video digital cameras.

Although priced for the professional market, the new 19X offers broadcast-quality features you won't find on any lens in its price class.

Innerfocus This proprietary Fujinon feature eliminates the need to reset polarizers and other adjustable filters each time you refocus. It makes filter settings and focusing independent...so you can focus freely, without influencing your creative effect.

QuickZoom This Fujinon exclusive lets you return precisely to your original framed shot after you've zoomed in to focus...all at the push of a button.

AT A Fujinon broadcast-industry first, Aspheric Technology increases optical performance while reducing size and weight.

Vformat Another Fujinon breakthrough, this optional ratio converter maintains proper field of view on switchable 4:3/16:9 format cameras.

For your FREE Windows™ version of Fujinon's Select-A-Lens software, call 1-800-553-6611.

FOCUSED ON THE FUTURE

Digital Noise Reducers

Philips PreCast VsdB Series: the PreCast multichannel noise reduction system greatly improves MPEG compression efficiency; the multichannel noise reduction for digital broadcast applications features a 20% to 30% gain in MPEG encoding efficiency; other features include patented motion adaptive, spatial and temporal filtering, as well as FM sparkle, dirt and scratch concealment; 801-977-1611; fax 801-972-0837; info@mail.phbtsus.com; www.philipsbts.com

Circle 106 on Free Info Card

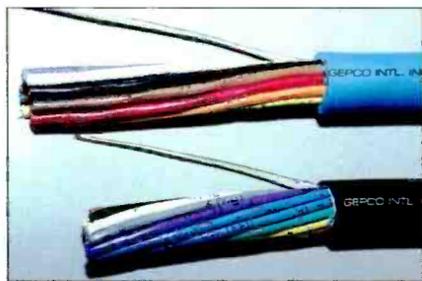

Mini Tools for Video Applications

Kramer Tools: a line of miniature devices for almost every professional or consumer needs including DA for video and audio, Y/C line amplifiers, mechanical switchers for composite and Y/C, VGA distribution amplifier and a switcher, a transmitter and a receiver for twisted-pair A/V and a range of port extenders; some tools have bandwidth of 280MHz and up and can handle SDI signals with no distortion; 908-735-0018 or 888-275-6311; fax 908-735-0515; www.kramerelectronics.com

Circle 107 on Free Info Card

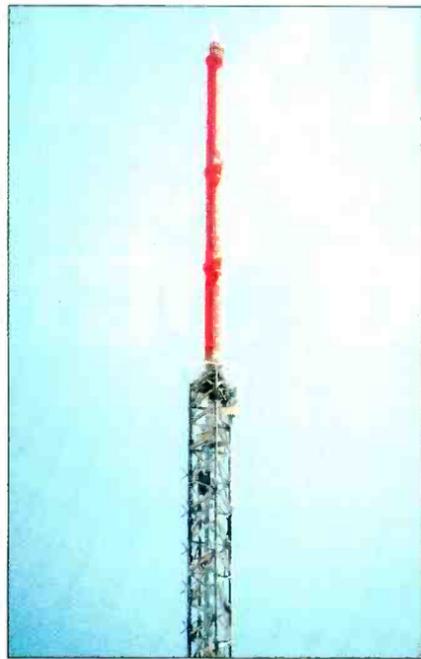

Audio Cable

Gepco International: reintroduces its GEP-FLEX audio cable – now with color-coded pair jackets to the base-10 resistor color code; cable consists of flexible outer jacket compound surrounding the 618 (22 gauge), 724 (24 gauge) and 803 (26 gauge) series multipair audio cable; used for remote applications and permanent installation in recording studios, radio stations and other facilities; audio cable jackets are identified with alphanumeric surface print, inverted every inch; 312-733-9555; fax 312-733-6416; www.gepco.com

Circle 108 on Free Info Card

High-Power Traveling Wave UHF Slot Antenna

Jampro JTW traveling wave antenna: this antenna is available in various patterns and polarizations for effective broadcast coverage to achieve maximum market penetration; highly null-filled vertical patterns, high-power handling, high gains and single feed point assure optimum pattern performance and low VSWR; now available for DTV applications; 916-383-1177; fax 916-383-1182

Circle 109 on Free Info Card

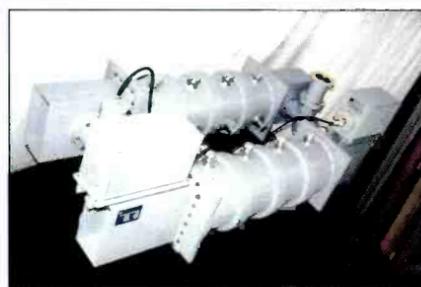

Digital Production Switchers

Ross Video Synergy series: a family of digital production switchers designed for live news, live sports and live production; over-the-shoulder boxes, picture freezes, repositioning of keys, pushes and more are available with the innovative "squeeze & tease" feature; other features include preview overlay, 12 aux buses, up to 64 inputs, VTR control, external DVE integration and redundant power; 613-652-4886; fax 613-652-4425; www.rossvideo.com; solutions@rossvideo.com

Circle 110 on Free Info Card

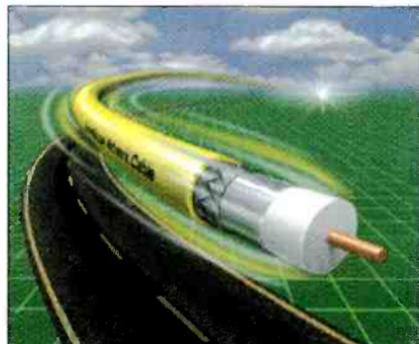

Absorptive Filters

Micro Communications Inc. (MCI) UHF dual-mode absorptive filters: these filters can be used on the output of high-power common amplification DTV transmitters to provide a constant impedance VSWR as seen by the transmitter; they also attenuate and absorb out-of-band splatter generated by the transmitter that could affect NTSC reception on an adjacent channel; 603-624-4351; fax 603-624-4822; www.mcibroadcast.com

Circle 111 on Free Info Card

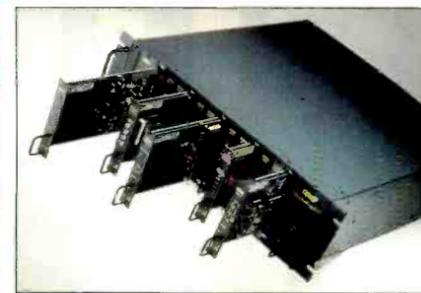

HDTV Transmission Over Coax

CommScope 7538: with a 0.159-inch diameter, this miniature, low-loss digital coax cable provides outstanding performance in digital applications including HDTV; the small size allows improved wiring management in high-density areas; for longer runs, CommScope has the 5765 low-loss serial digital cable; 704-459-5000; www.commscope.com

Circle 112 on Free Info Card

Signal Processing Products

Nova Systems/Videonics new modules for StudioFrame: the modular and flexible StudioFrame system accommodates today's, as well as tomorrow's, video and audio interfacing requirements; the DTV-ready and scaleable nature of its 10-bit architecture, along with wide, comprehensive product range, allows it to be easily reconfigured and/or upgraded as video standards and requirements continue to evolve; 860-693-0238; fax 860-693-1497

Circle 113 on Free Info Card

On the cover

Synchronizer

Digital Processing Systems DPS-470: this component digital video synchronizer provides component, composite, S-Video and SDI video inputs and outputs; features include 10-bit 4:2:2 processing, real-time transcoding, a VITS inserter, auto-switch TBC and integrated digital test pattern generator; all audio outputs are active simultaneously, enabling analog and digital devices to be connected at the same time; 606-371-5533; fax 606-371-3729; info@dps.com; www.dps.com

Circle 100 on Free Info Card

ATSC-Compliant Test Equipment

Digital Transport Systems: has developed MPEG-2 digital TV test equipment to ATSC (Advanced Television Systems Committee) standards; the adoption of the ATSC standard underscores the company's commitment to be the first U.S. company with a complete test solution for ATSC transport streams; 619-675-1410 x101; fax 619-675-1412; www.dtsvs.com

Circle 101 on Free Info Card

HDTV Lenses

Fujinon HDTV lenses: this series includes several portable lenses such as the HA10X5.2BEVM, the HA14X8EVM and the HA20X7.5BEVM; other lenses in the series include the HA24X7BESM studio lens and the HA66X9.5ESM field lens; all the lenses in this series of high-definition lenses have features to satisfy the excellent picture quality of HDTV; 800-553-6611; 201-633-5600; fax 201-533-5216

Circle 102 on Free Info Card

Master Control Switcher

Pesa Switching Systems Alliance: a master control switcher, based on NEC's multiformat technology; single platform switcher designed for both full-time and mixed SDTV and HDTV broadcasting; basic dual format configuration allows for two SDTV channels (480i or 480p) or one HDTV channel (1080i or 720p); 516-845-5020; fax 516-845-5023; salesinfo@pesa.com; www.pesa.com

Circle 103 on Free Info Card

Display System

Barco Vivaldi: connected to the Rosa management concept, Vivaldi features remote configuration and re-configuration of an entire monitor wall, uninterrupted monitoring of signal presence, customized automation tasks to interact with existing video routing systems, video source monitoring of digital uplink centers, and upgrades without hardware modification to monitor walls; 770-218-3200; fax 770-218-3250; www.barco.com

Circle 104 on Free Info Card

Mini-arc Lighting

Frezzi Energy Systems MA-50: this full-spectrum Sun Gun is a compact, 50W daylight corrected HMI; can be used on camera, stand-mounted or hand-held; weighs just 1.25 pounds and consumes 65W power; input voltage is 12-15VDC; bulb life is 4,000 hours; comes with optional indoor filter and barn doors; operates from any 12V, 13V or 14V battery; 973-427-1163; fax 973-427-0934; frezzi@frezzi.com; www.frezzi.com

Collage

Does!

The little grey box that ~~could~~

Combining character generation, paint, still store and animation, Collage offers a wider range of graphics tools than any other on-air graphics device.

Still Store

"4:4:4 image quality, fast image capture and recall, TCP/IP based networking, and a diverse range of transition effects."

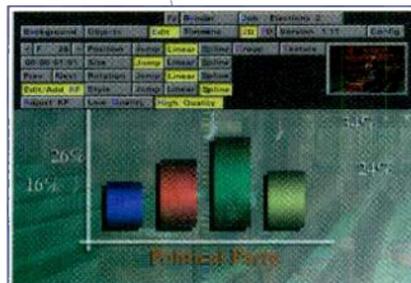

Character Generator

"A user friendly C.G. that renders postscript and true type fonts with multiple surface, edge and shadow styles. Collage features numerous real-time text animations and works with newsroom computer systems."

Paint System

"Full featured painting tools including variable size and contoured brushes, custom brushes, texture and opacity mapping, and VTR control for frame capture or rotoscoping."

2D Animation

"Flexible keyframe animation of object attributes makes Collage 2D a powerful tool for creating complex layered graphic treatments."

Editing

"Affordable timeline based non-linear editing with uncompressed video clips, features 4 layers of DVE, 8 layers of 24 bit audio and all the graphics tools that made Collage famous."

3D Animation

"Quickly create three dimensional graphics with true 3D bevels, extrudes, multiple light types, texture and bump mapping."

With over 550 systems in use worldwide the Collage family offers proven performance at surprisingly affordable prices. There is a Collage solution to almost every broadcast or post-production problem.

To see Collage for yourself contact Majortech at 1-800-461-7814

Leader Instruments Supports HDTV

Broadcast networks, production houses and suppliers now actively engaged in HDTV applications are currently using Leader Instruments' award-winning products for both signal sources (Model LT 440D) and monitoring (Model LV 5150D). Among these are ABC, CBS, Crawford Communications Film Group, DaVinci, Lighthouse Digital, Pesa, Utah Scientific...

Models LT 1611 and LT 1608 Combination of Programmable RGB Generator and NTSC/PAL/HDTV Encoder

A unique combination of Models LT 1611 and LT 1608 expand the far-ranging attributes of a fully programmable RGB generator, the LT 1611, with an NTSC/PAL/HDTV encoder, the LT 1608. The encoder accepts RGB, sync and clock signals from the RGB generator and outputs fully encoded NTSC, PAL or HDTV component three-wire. Both NTSC and PAL outputs are full composite with encoded color subcarrier.

The HDTV feeds are in YPbPr form and include standard tri-level sync.

The combination of RGB generator and encoder puts the programming features of the RGB generator, in terms

of raster architecture (within specified limits) and both stock and user-designed test patterns, into the form required by NTSC, Pal or HDTV component systems and monitors. An example of a very useful application occurred during setup of the Garth Brooks concert in Central Park, NY. Here the combo was pressed into service to provide crosshatch patterns in the HDTV format to drive the projection monitors during setup. Model LT 1611 provides analog RGB feeds with a maximum dot clock frequency of 150 MHz. It operates as a stand-alone generator using a supplied ROM, but is fully controlled and programmed from a PC connection in the Windows® format using supplied software. PC control sets up raster/timing parameters, stock and custom-design test patterns and output signal conditions. For more information, contact Leader Instruments Corporation, 380 Oser Avenue, Hauppauge, NY 11788. 1-800-645-5104 or 516-231-6900.

LT 425D - NTSC Video Pattern Generator

A precision test source for digital-component facilities, the LT 425D offers one parallel and four serial outputs (one digital black.) AES/EBU digital audio may be embedded in the serial data stream, but is also available as a separate output. Test signals are tailored to digital operations and include the SDI checkfield and a programmable moving marker and switched stills for compression tests. A programmable 20-character source ID, calendar and clock rounds out the full list of operating options. For more information, contact Leader Instruments Corporation, 380 Oser Avenue, Hauppauge, NY 11788. 1-800-645-5104 or 516 231-6900.

LV 5100D - Digital/Analog Component Waveform Monitor

Able to work in component digital as well as component analog facilities (and mixed operations), the LV 5100D provides comprehensive waveform, vector, timing and picture monitoring capabilities. Menu-driven control functions extend familiar waveform observations into highly specialized areas and include local calibration control, the ability to show or blank SAV/EAV signals in both the waveform and picture to monitor digital signals in GBR or YCbCr form, line select (with an adjustable widow), memory storage of test setups with capabilities such as on-screen labels, flexible cursor measurements, automatic 525/60 and 625/50 operation and much more. For more information, contact Leader Instruments Corporation, 380 Oser Avenue, Hauppauge, NY 11788. 1-800-645-5104 or 516 231-6900.

ABR202 Digital Audio Broadcast Receiver

Using the new ABR202 audio broadcast receiver you can transmit a full 20 kHz stereo CD-quality audio signal in as little as 96 kbps. ISO/MPEG compression helps maximize space segment efficiency, and multiple operating rates and modes let you optimize your network for increased audio and data quality and space segment savings.

The ABR202 is contained in a lightweight chassis with low power consumption, and can operate in either Ku- or C-band networks. It is functionally compatible

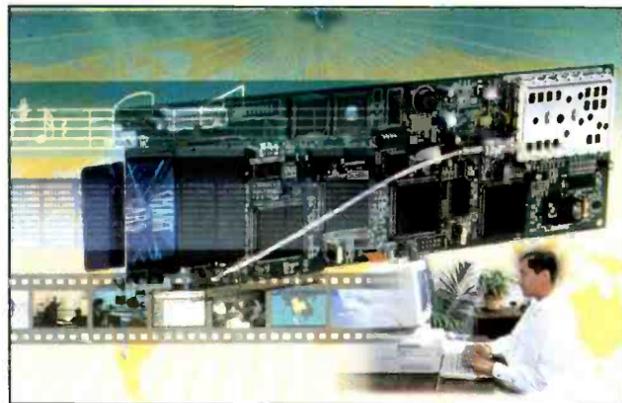

with the ABR200. Applications include radio program distribution, point-of-purchase audio with advertising insertion, and data broadcasting.

For additional product information, please contact ComStream's Satellite Products Division, telephone: 619.657.5849; fax: 619.657.5415.

MediaCast™ PC/Server Receiver Card

ComStream's DVB-compliant MediaCast™ Satellite PC/Receiver card delivers MPEG-2 video, CD-quality audio programs, and high-speed data information such as online news, software downloads and financial information to PCs and LAN servers at transmission rates of up to 45 Mbps. Up to 32 services can be delivered simultaneously from one data stream, and conditional access is supported. The MediaCast card is designed to operate in a 120 MHz Pentium-class, multimedia-ready PC with 16 MB of RAM or more. Applications include distance learning for corporate and educational institutions, Intranet broadcasting, and applications requiring reliable file transfer.

For additional product information, please contact ComStream's Broadband Products Division, telephone: 619.657.5248; fax: 619.657.5897.

What do these global leaders have in common?

Another global leader.

There has been a lot said about ComStream. After all, we've been leading the satellite technologies industry for fourteen years. We supply some of the largest companies in the world with satellite technology.

Our modems, earth stations and broadcast receivers have been described as "world class."

Our customers say they choose us because of our superior technology and unsurpassed reliability. But we're not stopping there.

We're continuing to develop evolutionary, cost-effective products to ensure we earn our customer's business well into the future. We want to earn your business too.

CM601 Digital Satellite Modem

ComStream's compact CM601 digital satellite modem, is a low-power consumption modem for two-way telephony, data, and broadcast applications. The new CM601 modem is interoperable with the CM701 and ComStream's DT7000/8000 earth stations. Its modular architecture allows for easy field upgrades of its stand-alone modules.

Packaged in a smaller low-profile 1RU (single rack unit) chassis, the CM601 features ComStream's innovative new virtual control panel, Quik-Link™. Quik-Link is a Windows® 95- or NT- based graphical user interface that allows users to easily configure the modem. Quik-Link is also compatible with the CM701 modem.

For additional product information, contact ComStream's Satellite Products Division, telephone: 619.657.5849; fax: 619.657.5415.

DT8000 Earth Station

ComStream's new, low cost DT8000 integrated SCPC earth station is ideal for point-to-point or point-to-multipoint satellite communications. A highly integrated indoor/outdoor unit, the DT8000 combines the features of the CM701 modem with RF technology (i.e. antenna and up/down converter) to yield a family of fully interactive, dedicated channel VSATs. The DT8000 can be used with either Ku- or C-band transceivers. Programmable power levels and operating parameters can compensate for low signal levels near the fringe of a satellite beam, varying or extreme weather conditions, or other location variables.

For additional product information, contact ComStream's Satellite Products Division, telephone: 619.657.5849; fax: 619.657.5415.

If you haven't already taken these out for a test drive, here's your chance.

Short/cut™ Editor

The perfect replacement for generations of reel-to-reel tape recorders. Short/cut delivers hard-disk storage, plus fast cut and paste waveform editing. Add an optional Zip™ drive and get low-cost copies. This editor is fast enough for on-air use, and tough enough for the road. So take Short/cut out for a test drive and watch it perform.

Short/cut is your next tape recorder, edit block and digital delivery system. It's Un-Reel.

Test drive theirs then test drive our DigiCart/II Plus. We've got more under the hood.

DigiCart®/II Plus

The new DigiCart/II Plus puts up to 50 hours of audio on hard disk, and now includes the popular Zip™ drive for low-cost storage. As always, it's your choice of linear or Dolby® AC-2 recording, plus precise editing and powerful playlisting capabilities. The new "Plus" model delivers all the reliability that has made DigiCart a broadcast standard, and it's now available at a great new price. Ask for a test drive, and put it through the paces at your station.

Instant Replay® 2.0

NEW • SCSI port supports external disk drives for expanded storage capacity. • Choose linear or Dolby® AC-2 recording format.

Instant Replay puts a thousand audio clips right at your fingertips. Sound effects, music, station ID's - up to 24 hours of your greatest material. And with 50 Hot-Keys, you can make your shows as spontaneous as you'd like. With everything titled, timed and ready to play, you'll find Instant Replay fast, fun and easy to use. So take us up on our offer to go for a test drive. It's on us.

Instant Replay. Instant sound effects. Instant music. Instant fun. Take it out for a joy ride.

Attention call letter stations.* You're only a phone call away from a free 10-day Test Drive. So try it out. We'll understand if you don't give it back.

ROSS

SYNERGY SERIES

DIGITAL PRODUCTION SWITCHERS

POWERFUL

HUGE input/output matrix with up to 64 Inputs & 12 Aux Busses

Add MLEs and a larger control panel as your needs grow

Squeeze & Tease
Freeze, Zoom, Reposition & Push Keys. 2 per MLE

Full function keys have dedicated push buttons, flying borders for every key type, Squeeze & Tease, chroma keying, key over transition, quick preview & take, and bi-color on-air status

Chroma Keyers with chroma suppression, hue rejection, natural & simulated shadows and transparencies

Direct control of VTR transport with timecode

32 Custom Control Hot Buttons recall any combination of switcher memories, button pushes and external device control

All MLEs have full effects capability, their own memory system keypad, two pattern generators, five comprehensive matte generators and dual chroma keyers

Preview Monitor Overlay Display including: VTR timecode, count up/down timer, source ID, safe title area

DVE Effects from all popular DVEs are seamlessly integrated as switcher transitions

11 RU frame
Redundant power
600 W, 1/4 line delay

Excellent price

3 year transferable warranty

Ross has combined the latest digital technology with a firm understanding of video production and over 20 years of switcher design experience to develop a series of production switchers which will be the standard that all digital switchers will be compared to for years to come.

DVB-T Exciter with integrated OFDM Modulator

The Exciter, with integrated OFDM Modulator, provides a 1 Wrms OFDM RF output signal of superior quality and stability in either VHF band III or UHF bands IV/V, fully compliant to ETSI ETS 300 744. Itelco's DVB Exciter features modular plug-in design, optimal integration of digital and analog technologies, upgradability to Single Frequency Network (SFN), maximum on-air availability, built-in diagnostics and remote control interface. The Exciter measures the same compact dimensions as an analog exciter, allowing easy upgrade.

Circle 65 Free Info Card

DTV Exciter with integrated 8-VSB Modulator

Itelco's DTV Exciter provides a 1 Wrms DTV RF on channel signal in either VHF or UHF bands of superior quality and stability, fully compliant to ATSC DTV standard. The Exciter features modular plug-in design, Itelco proprietary DTV 8-VSB Modulator, advanced precorrector, built-in diagnostics and remote control. The Exciter is housed in a compact frame which occupies the same space as NTSC or PAL exciter, allowing easy upgrade.

100 - 800 Watt DAB L-band Transmitters with LDMOS technology

100 Wrms through 800 Wrms DAB Transmitters include Itelco's state-of-the-art DAB (OFDM) Exciter with integrated COFDM encoder and digital precorrector. The Transmitters feature excellent analog and digital performance, full compatibility with ETSI ETS 300 401 edition 2,

flexible design, use of latest LDMOS transistor technology, and straightforward system control. The simple installation, high efficiency and superb reliability of the Transmitter ensure low operating costs throughout the Transmitters long service life.

itelco®

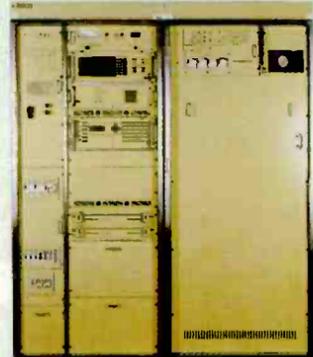

1-30 kW DTV solid state Transmitters with liquid cooling system

1 kWrms through 30 kWrms DTV Transmitters operating in VHF or UHF bands and fully conforming to ATSC DTV specifications. The Transmitters feature innovative DTV 8-VSB Exciter, clear modular design, unique patented liquid cooling system, unreached safe operating area, extraordinary redundancy, most compact overall dimensions, economy, and ease of installation and maintenance. The lowest transistor flange and junction temperature in the industry provides an outstanding MTBF. The Transmitters are also available with DVB-T (OFDM) Exciter.

10 -100 kW DTV IOT Transmitters with switch-mode beam power supply

10 - 100 kW DTV Inductive Output Tube (IOT) Transmitters provide unmatched performance and full compatibility to ATSC DTV specifications. The Transmitters feature innovative DTV 8-VSB Exciter, unique choice of linear or switch-mode beam power supply, efficient liquid cooling, multiple tube suppliers, high performance cavities manufactured by Itelco, economy, and straightforward microprocessor-based system control. The very compact dimensions and simple liquid cooling system ensure easy and quick installation. The Transmitters are also available with DVB-T (OFDM) Exciter.

DVCPRO and Anton/Bauer... Performance Standards

A standard is defined as the measure by which all others are judged. The revolutionary features and performance of the Panasonic DVCPRO family of products has been established as the digital format by which all others are judged.

All DVCPRO camcorders include The Worldwide Standard® Anton/Bauer Gold Mount installed at the factory as standard equipment. The Gold Mount® unlocks exclusive features of each DVCPRO camcorder as well as the performance, power and reliability of the InterActive™ battery technology.

The full range of Anton/Bauer products is recommended by Panasonic to power all DVCPRO equipment. From the pioneering technology of the Digital battery, to the unmatched performance and versatility of the PowerCharger, to the studio-quality Ultralight high efficiency on-camera light.

Anton/Bauer, The Worldwide Standard® of broadcasters and professionals around the world is now the standard worldwide for Panasonic DVCPRO.

antonbauer

Power + Confidence.

Stepping up to digital broadcasting used to be a risky business.

Introducing the new DiviCom MediaView™ MV40 encoder. With its powerful architecture and built-in upgrade path, the MV40 MPEG-2 encoding system protects you against the shattering effects of a changing digital environment. Without it, your technology investment could be in jeopardy.

A full complement of advanced features includes sophisticated preprocessing, 4th generation dual-pass compression technology, unique lookahead statistical multiplexing and 4:2:0/4:2:2 switchability. All of which adds up to higher quality video at lower bit rates, and a risk-free migration path to high definition TV. Take the first step now. Call DiviCom at +1.408.490.6560, or visit us at www.divi.com.

Largest Video Catalog Ever From Winsted

Winsted has just published the largest catalog in its history. The 164 page catalog features extensive additions to its broadcast, video, multimedia desk, and media storage line. New LAN and file server products with versatile mobile LRx Stations featuring L-Frame architecture expand on the exciting product line introduced last year. Several new mobile producer's desks ranging from 42" up to 94" wide add to the wide

line of desks already offered to the multimedia and video production industry. Several unusual new accessories are featured including a 21" wide keyboard shelf for standard keyboards that swivels in order to be slid out of the way when not in use. The keyboard shelf is designed to be incorporated into a 19" EIA wide slope or vertical rack and requires only 2U of rack space. It includes a platform for a mouse pad.

To bolster Winsted's vertical rack line expanded last year by the introduction of the VRx premium rack, Winsted now has added a full line of welded economy racks. These economy racks feature many quality features including a textured black enamel finish for a maintenance-free long life. Although these vertical racks are perfect for any electronic environment, they are especially suited for the broadcast and video markets. A free copy of Winsted's new catalog is available by contacting the company in any of four convenient ways: call toll free 800-559-6691, email Winsted at racks@winsted.com, visit their website at www.winsted.com, or write them at 10901 Hampshire Ave. So., Minneapolis, MN 55438.

Winsted Fileserver Station Fills An Emerging Need

Winsted corporation has recognized a growing need in the broadcast and LAN markets for a portable and modular fileserver. To answer that need they have introduced the modular LRx series of fileserver stations featuring steel L-frame architecture. Although there are several complete models from which to choose, the modular design of this new line allows the user to mix and match components to create their own organized system with a clean appearance. Each system includes smooth rolling wheels for mobility.

The basic L-Frame comes with either a stationary server shelf for multiple servers or a pullout server shelf for individual servers. The sliding server shelves have optional retractable cable lacing guides which keep cable in place while the server shelf is pulled out. Pull-out keyboard shelves, deep enough to hold three keyboards, come in flat or tiered versions. Each section will hold two monitor shelves, and either shelf can be tilted for easy viewing. All shelves can be raised or lowered in 1" increments.

Several optional accessories are available such as cable management tracks, a 72" wiring channel, monitor straps, rack mount panels, and a ten outlet power supply.

These new file server stations as well as a complete line of accessories are all described in detail in the new 164 page Winsted catalog which is available free by calling 800-559-6691 or by writing to the Winsted Corporation, 10901 Hampshire Ave. So., Minneapolis, MN 55438. You can also learn more about them by visiting the Winsted website at: www.winsted.com.

New Top-Of-The-Line Racks From Winsted

The VRx series is an all-new line of heavy duty vertical racks from Winsted. The all-welded units are 78-3/4" (45U) have an overall size of 86"H x 24"W x 30"D, and are packed with top-of-the-line performance features. The racks have a heavy black enamel textured finish for an attractive, non-marring surface that doesn't show finger prints.

The VRx has front and rear rack rails that adjust front to back to accommodate electronics of any depth. These rails are anodized and are tapped (10-32) for equipment mounting that meets strict EIA standards. Both the top and bottom of the rack are open and have 19" wide tapped rails to allow mounting of standard vented panels, fan units or other panels. Other features include: independent two-piece lift-off side panels, large corner uprights for strength, an easy to install lacing bar that allows easy cable management, conduit knock-outs top and bottom, two grounding lugs, and mounting holes in top for eyebolts.

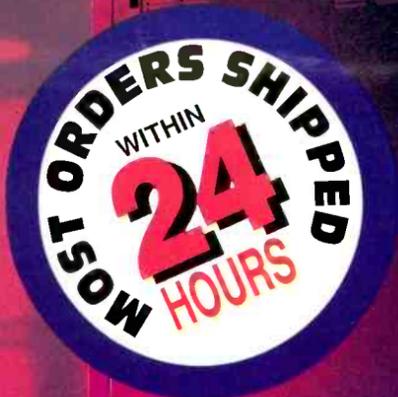

Winsted offers a wide variety of optional accessories to complete a rack system such as stationary shelves, pull-out shelves, electrical outlets, fan cooling systems and much more.

A full line of equipment racks is described in detail in the new 164 page Winsted Catalog available free by calling 800-559-6691 or by writing to The Winsted Corporation, 10901 Hampshire Av. So., Minneapolis, MN 55438.

VERTICAL RACKS DON'T HAVE TO BE BORING

Rack buyers, bored with the same old specs are finding new and exciting features to think about with Winsted's New **VRx** Racks

- 1) Mounting holes in top for eye-bolts.
- 2) Fully adjustable rack rails.
- 3) Heavy-duty welded construction.
- 4) 2-piece lift-off side panels.
- 5) Tapped rack rails, front & rear.
- 6) Black textured long-life finish.
- 7) Cable management system.
- 8) Conduit knock-outs, top & bottom.
- 9) Open top & bottom w/EIA rack rails..
- 10) Two grounding lugs.
- 11) Venting top and bottom.
- 12) Racks meet strict EIA standards.
- 13) Independently tested for strength.
- 14) 78-3/4" (45U) of usable rack space.

Winsted Offers New DVCPRO Rack Slide Kit

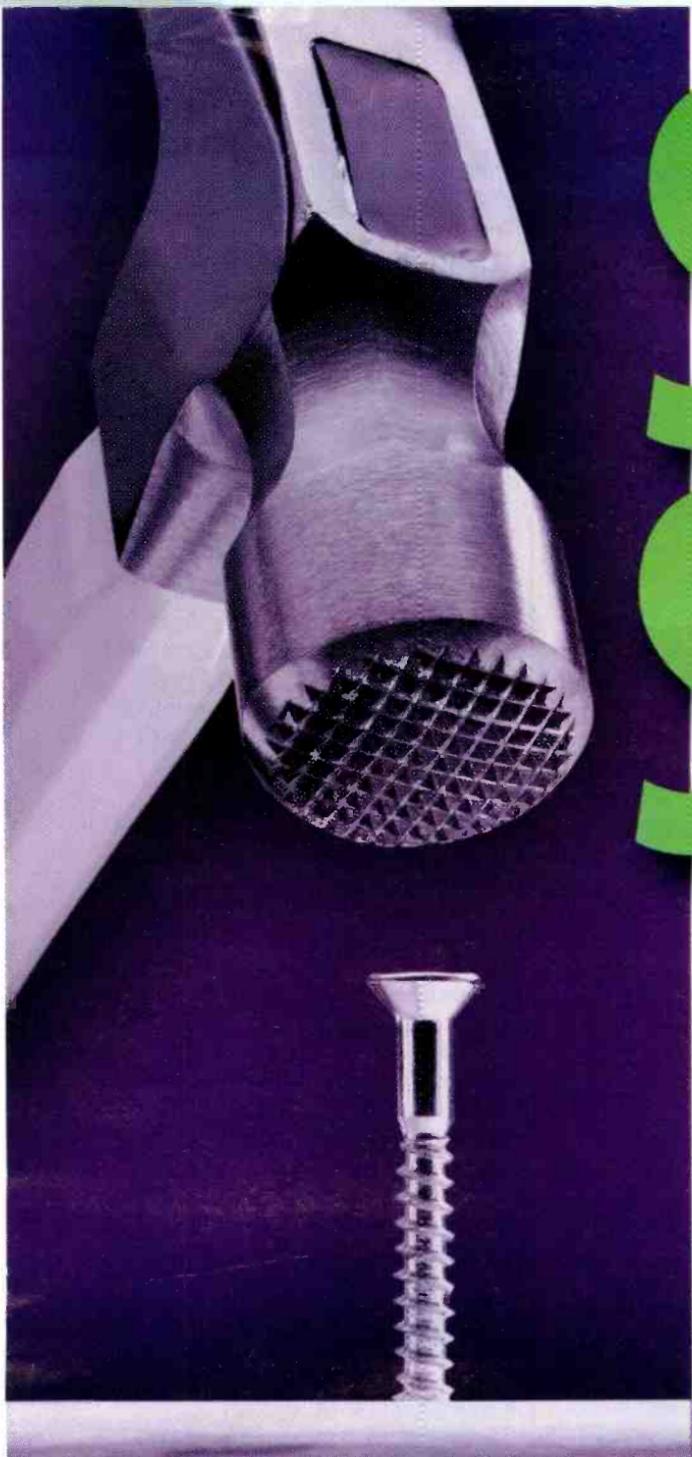

Winsted Corporation has expanded their offering of professional quality Rack Slide Kits. Guided by the growing popularity of the Panasonic DVCPRO VTR models, AJ-D640/650 and AJ-D750, Winsted has added the model F8203 to their wide offering of rack slide kits designed specifically for Panasonic, JVC, and Sony VTRs. This extensive line of rack slides also includes models designed for Vicon and Barco monitors.

Just as with all Winsted Rack Slide Kits, these models will feature: heavy duty chassis support brackets, Accuride ball bearing slides for smooth pulling action, and pivoting rear finger brackets to allow mounting in sloping or vertical racks. All Winsted Rack Slide Kits come with large chrome handles with extruded aluminum handle brackets and slide rails custom punched to the original VTR equipment specifications.

The new DVCPRO models list for \$235.00. To get your free Winsted catalog or for more information regarding these and other Rack Slide Kits call Winsted at 800-559-6691 or write to Winsted at, The Winsted Corporation, 10901 Hampshire Ave. So., MN 55438. HOW TO GO DIGITAL WITHOUT GOING POSTAL.

It's finally happening—the world of broadcast television will soon be all-digital. It's exciting. It can also be terrifying, if you're the one who's in charge of specifying the equipment necessary to accomplish the transition.

We can help, every step of the way. Most of our digital products give you the option of switching between digital and analog, which means that the product you buy today, while you're still mainly analog, won't have to be thrown out and replaced tomorrow, when you're completely digital.

INTRODUCING
PANORAMA *dtv*
A WOHLER TECHNOLOGY COMPANY

We're also introducing a new force in

digital video: PANORAMA *dtv*, our new line of All-Digital Broadcast Video products. Representing the innovations of leading broadcast digital engineers from around the world, each of these exciting new products was designed from the ground up to ensure a smooth, trouble-free transition into the Digital Broadcast Television Era.

Find out more. Call us toll-free at (888)5-WOHLER. Or, check out our website at www.wohler.com. In the meantime, relax. All you need is a little professional help.

USR-100 Microprocessor Controlled UHF Wireless Microphone System

The Telex® USR-100 wireless microphone system is a powerful, microprocessor-controlled system designed to offer the broadcaster involved with roving production situations and news gathering maximum frequency flexibility, sonic quality and aggressive pricing. With the availability of 100 channels, the USR-100 offers the broadcaster a problem solving wireless microphone solution to crowded airwaves. Microprocessor control allows the unique automatic self-tuning of exact factory set frequency information, enabling the full retention and recall of those settings. As most other designs implement a "wide band" approach allowing possible interference, the USR-100 maintains frequency specific accuracy, thereby minimizing interference. Dual Squelch is performed by a Tone Coded Squelch on a little used tone frequency of 31.250kHz coupled with an RSSI Amplitude Squelch. Microprocessor control also allows for efficient Pos-i-Phase Smart™ diversity implementation.

Radiocom™ Two-Channel Encrypted Digital UHF Wireless Intercom.

The powerful Telex® Radiocom™ BTR-600 Two-Channel Encrypted Digital and BTR-500 Two-Channel UHF Wireless Intercom systems are designed to meet the needs of any situation where mobility needs combine with communication needs. The BTR-600 is a full duplex wireless intercom system capable of addressing two independent channels of a wired intercom. Operating in the 524 to 608 MHz and 614 to 746 MHz frequency bands, the unit offers full frequency agility. The system integrates into any two-wire or four-wire Telex, RTS™ or other intercom system. The digital encryption scheme found on the BTR-600 offers a cipher code of 65,536 possible combinations ensuring interference free transmissions that cannot be intercepted. The BTR-500 is identical to the BTR-600, less the digital encryption system.

Zeus 2400 DSP Matrix Intercom System

The Telex RTS™ Zeus 2400 DSP Intercom system provides high quality audio, system flexibility, compact size and aggressive pricing. The system is aimed at broadcast and simulator situations, military and industrial applications, and auditorium and stadium installations. The RTS Zeus 2400 DSP Matrix intercom system, based on the highly regarded ADAM Advanced Digital Audio Matrix, is designed to deliver 24 channels of better than CD quality audio in a two rack unit package. The heart of the system is a TDM ASIC that performs all audio switching and mixing in the digital domain. The CD quality sample rate of 44.1kHz is enhanced by 20 bits of resolution yielding superior audio clarity. The TDM ASIC processes 45 bit word length, insuring full performance regardless of the number of users on a given path.

News Crews Nationwide Making the "Impossible" Live Shots Possible with Telex's Camlink II

The latest wireless video equipment is giving ENG crews across the country unprecedented freedom to cover the news without cables between the camera and truck while maintaining the highest possible video quality.

Cincinnati's WXIX-TV has been using two CamLink IIs primarily for its "19 in the Morning" show for several months. Paul Smith, assistant chief engineer at WXIX, notes that the unit's flexibility gives the station's cameramen the ability to roam that the competition does not.

"We wanted to lose the worry of always being tethered for a live broadcast," says Paul Smith, assistant chief engineer at WXIX in Cincinnati. "Now, with the CamLink II, we can get a live remote going at a moment's notice and get as close to the scene as is safe and possible."

Smith says the CamLink II's ease of use, high-quality capabilities and affordable cost made it the clear choice for FOX 19. "We've had the

CamLink II outside the studio's building and had the signal go through walls with nearly perfect video," says Smith. "We've also tested it using directional antennas and, with a clear path, we've had the signal travel a couple miles with very good reception. We are very happy with the CamLink II's capabilities and how it lets us shoot previously unattainable live video."

In Omaha, Nebraska, news crews at top-rated WOWT have found that once unattainable is now within their reach. "The CamLink II gives our cameramen the flexibility during bad weather situations and isolated terrain locations to get up close and deliver a high-quality live broadcast," explains Mike Plews, chief photographer for NBC-affiliate WOWT. "The quality is remarkably good. During coverage of a multiple vehicle accident recently, the CamLink II's signal path had to cross three lanes of highway where semi-trucks were constantly going by. The feed did not break-

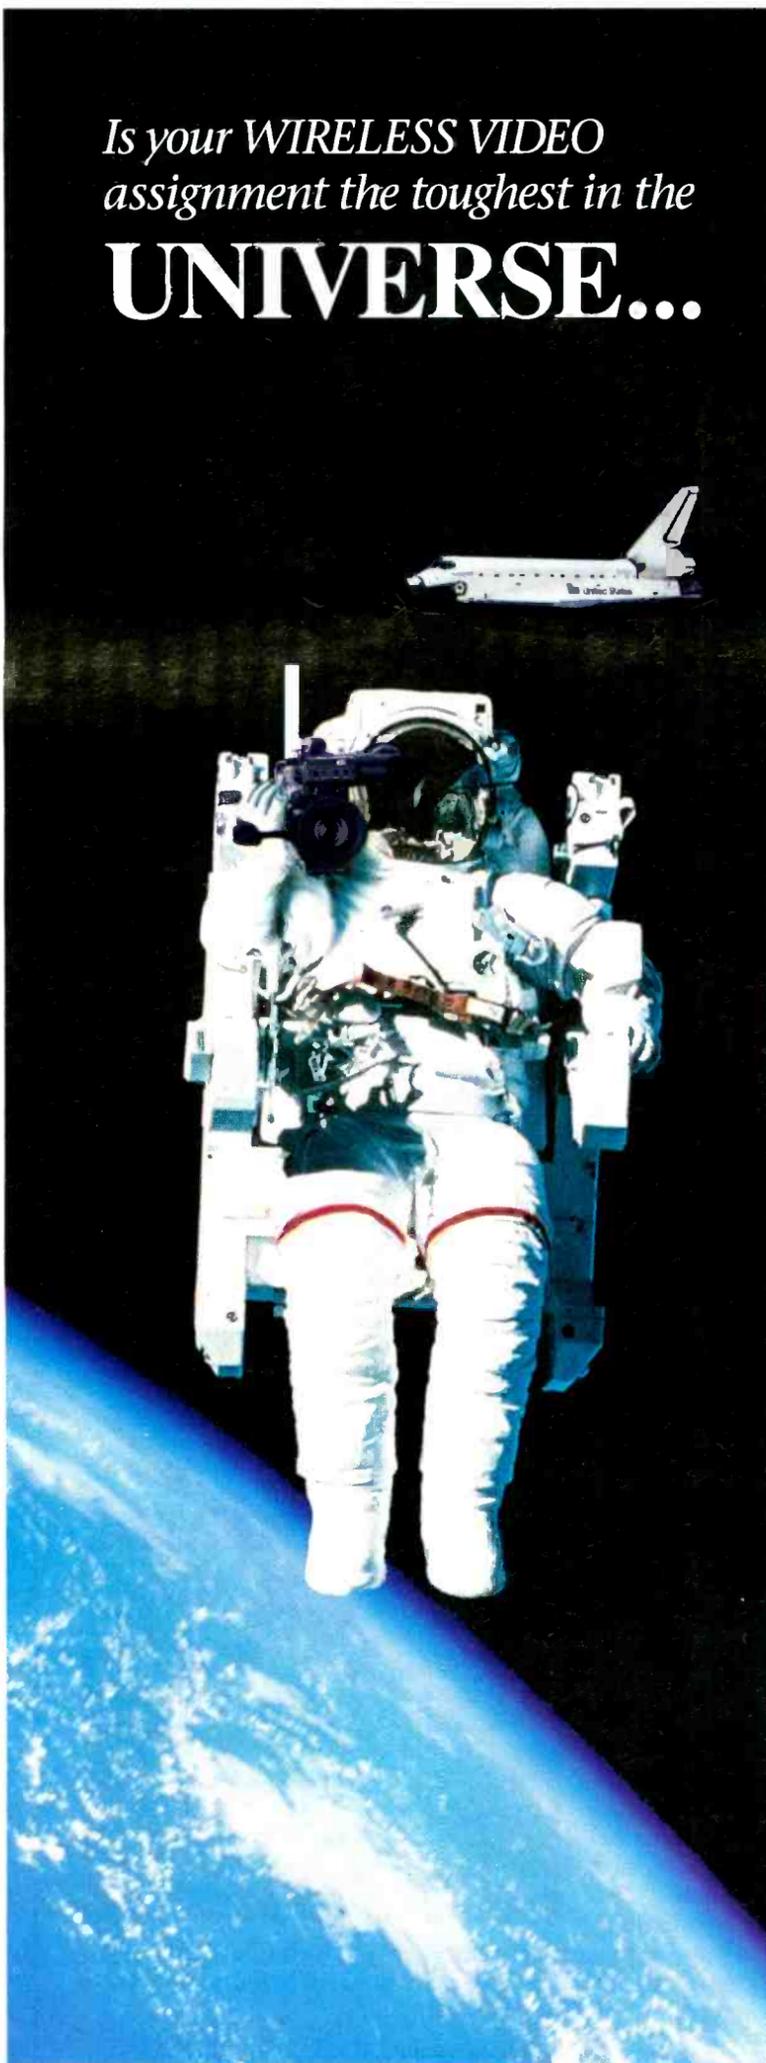

up or get disrupted at all. We were very impressed."

WOWT uses the CamLink II daily for three live shots for the four o'clock news. The CamLink II's receiver is rack-mounted in one of four of the station's ENG microwave trucks. Plews says the CamLink II's flexibility, range and overall broadcast quality, give WOWT a clear advantage over the competition.

Is your WIRELESS VIDEO assignment the toughest in the UNIVERSE...

CamLink II™
WIRELESS VIDEO

Or is it more down to

EARTH?

EITHER WAY,
DON'T BE TIED
DOWN BY CABLES!

The CamLink II Wireless Video System is being used all over the planet to cover breaking news, sports, live events, and feature film production. Even spacewalking NASA and MIR astronauts who need to send broadcast-quality pictures back to their spacecrafts will use the CamLink II. You too can depend on CamLink II's reliability, stability and exclusive features:

- Longest Ranges: from 100 yards to 5 miles and beyond
- Auto-Phase™ Triple Diversity for rock-solid video
- 16 Synthesized Channels for maximum frequency agility
- Timecode and Tally transmission create Instant Window Dubs™

Use CamLink II and put your newscasts and video productions "worlds above" the competition.

For more information on CamLink II or its use by NASA in space, call 1-612-884-4051 or e-mail us at camlink@telex.com or visit our web site at www.telex.com.

VIDEO Testing

Sencore covers all your needs!

DSA309 Digital Video Studio Analyser

- Tests composite and component serial digital video signals.
- Continuous on-line monitoring of key parameters.
- Graphic touch screen interface and menu system.
- Errors displayed on the LCD screen, or routed to a printer or stored on the built-in 3.5" floppy drive.
- Real-time detection of illegal colors.

S310 Digital Video Analyser

- Tests composite and component serial or parallel digital video signals.
- Direct readout key signal parameters.
- User selectable alarm thresholds.
- A comprehensive CCIR601 pattern generator. (34 different test patterns.)

AT951 ATSC Stream Player

- Single play or continuously looped playout of ATSC or DVB signals.
- Adjustable playout start and stop points.
- Automatic determination of Transport Stream playout rate.
- Internally generated or external source of playback clock.
- 188 byte packet formats.

SV953P MPEG-2 Portable Transport Stream Analyzer

- Record, playout, monitor and analyze MPEG-2 and DVB signals.
- Conformance test TS layer and PES layer.
- Complete Buffer Analysis.
- Real-time monitoring of MPEG-2 for complete signal analysis.
- Easy-to-use Windows NT™ interface.

HAMLET

EXCELLENCE IN VISION

Which are the **ONLY** devices in the world
to **Digitally** analyse both
Digital video and audio plus
Analog video and audio
in one unit?

The Answer:

Monitor Scope™ 601

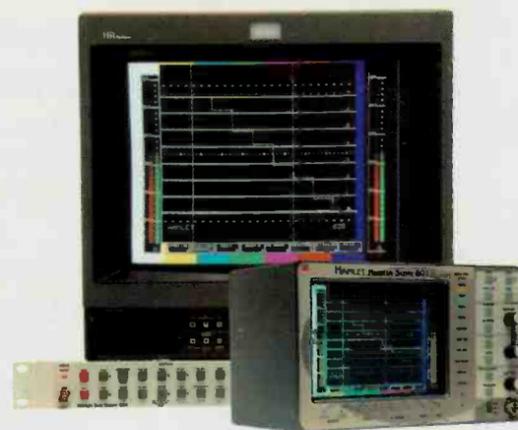

and Digi Scope™ 601

In fact they - do it all!

Real Multi-Format On Screen analysis and measurement:

- Serial Digital Video, embedded and AES/EBU audio.
- Analog component, composite video and audio.
- Full SDI transport analysis, error displays, alarms and printouts against time.
- Coloured Waveform, Vectorscope, and audio bar graphs with peak level indicators and phase displays.
- Simultaneous assessment of component and RGB illegal levels. Unique out of gamut Poly™ display and alarms.
- Vertical, Horizontal and Vector cursor measurements.
- Outputs may be displayed on any monitor, digital or analog.
- Remote Control, data and trace transfer via RS232/modem.
- Selectable clean feed AtoD and DtoA outputs from the inputs.
- All digital 10 bit processing, NO internal adjustments and a Modular Upgrade path into the next millennium and more....

**So who
are clearly
the winners?
Hamlet users!**

The Top 5 ENG Wireless Receivers

UCR200D

Synthesized UHF wideband. Diversity reception. 256 frequencies. Auto-tracking front-end. External DC powering

UCR195D

Crystal controlled UHF wideband. The ultimate audio quality. Battery or DC operation. Diversity reception.

UCR195

Crystal controlled UHF wideband. The ultimate audio quality. Battery or DC operation. Single antenna reception.

UCR190

Crystal controlled UHF narrowband. UNICHANNEL® filtering. Battery or DC operation. Single antenna reception.

CR187

Crystal controlled VHF narrowband. UNICHANNEL® filtering. Battery or DC operation. Single antenna reception.

Made with pride in the USA

No matter how you stack it up, the best wireless microphone systems for ENG production are from Lectrosonics.

Call: (800) 821-1121

Synthesized UHF Wireless IFB

The way you need it...

256 user selectable frequencies!

The **T1 transmitter** offers 250mW output and direct intercom interface with DIP switch input configuration. External 12V DC powering.

The **T2 transmitter** provides a 100mW belt-pack for person to person communications with headset and lavalier mics. 9 Volt battery powered.

The **T3 transmitter** adapts to any microphone with an XLR connector. 100mW output. 9 Volt battery powered.

The **R1 receiver** offers automatic scanning and programmable memory for up to 5 stored frequencies. 9 Volt battery powered.

Call: (800) 821-1121

Automatic microphone mixing.

Programmable matrix mixing.

What it will do for you...

Suppress background and ambient noise in the studio and eliminate the need to "chase" microphone activity on the console with the AM8 automatic microphone mixer. No more "late" mics and outstanding sound quality, all with convenient hands-free operation.

Utilize programmable audio signal routing and multiple mixes with the MM8 matrix mixer. Instantly recall up to 6 stored configurations with a simple dry contact closure, or up to 9 stored configurations using computer control. RS-232 interface built-in.

LecNet™ products work as stand-alone components or interface with production consoles and other audio signal processing equipment. Inexpensive, very flexible and highly reliable. LecNet™ software included.

For **FREE demo software**

SONY

DSR-200A 3-CCD Digital (DVCAM) Camcorder

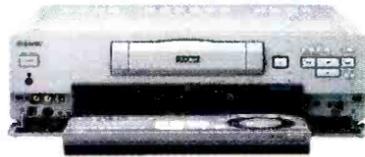

Combining a compact and lightweight body with the superior picture quality of DSP (Digital Signal Processing) and the DVCAM format, the DSR-200A is the ideal acquisition tool for video journalists, event and wedding videographers, stringers and production houses. 500 lines of horizontal resolution, 48kHz or 32kHz digital audio, three hour record time, and minimum illumination of 3 lux is only the beginning. Other features include 16:9/4:3 capability, Steady Shot, high resolution 1-inch viewfinder, time code operation, time/date superimposition and an IEEE-1394 interface for direct digital output. Offers full automatic as well as manual control of focus, iris, gain, white balance and shutter speed.

- Variable servo 10X optical power zoom lens goes from 5.9 to 59mm in 1.7 to 24 seconds. The manual zoom rocker is continuously variable right up to where the digital 20X zoom kicks in.
- Sony's Super Steady Shot reduces high frequency camera shake without compromising image quality. SteadyShot uses horizontal and vertical motion sensors that allow it to work accurately while zooming, moving (even shooting from a car), and shooting in low light conditions.
- Has digital effects including audio and video fade, overlap and Slow Shutter.
- Automatic and manual focus, iris, shutter, gain and white balance. Iris is adjustable in 12 levels from F1.6 to F11, shutter from 1/4 to 1/10,000 of a second in 12 steps, Gain from -3dB to +18dB in 8 steps.
- Zebra Pattern indicator, built-in ND filter.
- Custom Preset function lets you preset, store and recall custom settings for color intensity, white balance (bluish or reddish), sharpness and brightness.
- Stores Photo, Date/Time, Shutter Speed, Iris, Gain and F-stop for easy recall. So if you have to re-shoot, you know your original settings for every scene and frame.

- Records Drop/Non-Drop Frame time code. Time code can be read either as RC time code or as SMPTE time code
- Has a large 1-inch B&W viewfinder with 550 lines of resolution for easy focusing even in low contrast lighting situations. Separate information sub panel displays time code, battery time, tape remaining and other camcorder functions without cluttering up the viewfinder.
- Records 16-bit/48kHz audio on one stereo track or 12-bit/32kHz with two pairs of stereo tracks (L1/R1, L2/R2), so you can add stereo music or narration.
- One-point stereo electret condenser mic for clear stereo separation. Directivity can be selected from 0°, 90° & 120°.
- Automatic & manual (20-step) audio level record controls. Monitor audio with headphones or from the LCD panel which has an active VU meter.
- XLR input connectors for mics and audio equipment.

DSR-200A Field Package:

- DSR-200A Camcorder • NPA-1000/B Battery Case Adapter
- 3 NP-F930/B 7.2v 4000 mAh Batteries
- AC-V900/B AC Adapter, Triple Battery Charger
- VCT-U14 Tripod Adapter • LC-2000CP System Case

DSR-30 DVCAM Digital VCR

The DSR-30 is an industrial grade DVCAM VCR that can be used for recording, playback and editing. DV standard 4:1:1 sampling digital component recording with a 5:1 compression ratio provides spectacular picture quality and multi-generation performance. It has a Control L interface for editing with other Control L based recorders such as the DSR-200A DVCAM Camcorder or another DSR-30. It also has a continuous auto repeat playback function making it ideal for kiosks and other point of information displays. Other features include high quality digital audio, IEEE-1394 Digital interface and external timer recording. The DSR-30 can accept both Mini and Standard DVCAM cassettes for up to 184 minutes of recording time, and can playback consumer DV tapes as well.

- Records PCM digital audio at either 48kHz (16-bit 2 channel) or at 32kHz (12-bit 4 channel).
- Equipped with Control L, the DSR-30 is capable of SMPTE Time Code based accurate editing even without an edit controller. Built in editing functions include assemble and separate video and audio insert.
- By searching for either an Index point or Photo Data recorded by the DSR-200A camcorder, the DSR-30 drastically cuts the time usually required for editing. The DSR-30 can record up to 135 Index points on the Cassette Memory thanks to its 16K bits capability.
- Audio lock ensures audio is fully synchronized with the video for absolute precision when doing an insert edit.

- Built-in control tray has a jog/shuttle dial, VCR and edit function buttons. The jog/shuttle dial allows picture search at ±1/5 to 15X normal speed and controls not only the DSR-30 but also a player hooked up through its LANC interface
- DV In/Out (IEEE 1394) for digital dubbing of video, audio and data ID with no loss in quality.
- Analog audio and video input/outputs make it fully compatible with non-digital equipment. Playback compatibility with consumer DV tapes allows you to work with footage recorded on consumer-grade equipment. Tapes recorded in the DSR-30 are also compatible with Sony's high-end DVCAM VCR's.

PVM-14N1U/14N2U & 20N1U/20N2U 13-inch and 19-inch Presentation Monitors

With high quality performance and flexibility, Sony's presentation monitors are ideal for any environment. They use Sony's legendary Trinitron CRT and Beam Current Feedback Circuit for high resolution of 500 lines as well as stable color reproduction. They also accept worldwide video signals, have a built-in speaker and are rack mountable. The PVM-14N1U/20N1U are designed for simple picture viewing, the PVM-14N2U and 20N2U add RGB input and switchable aspect ratio.

- They Feature:**
- 500 lines of horizontal resolution
 - They handle NTSC, NTSC 4.43, PAL, and SECAM.

- Picture (chrome, phase, contrast, brightness) and setup adjustments (volume, aspect ratio) are displayed as easy-to-read on screen menus.
- Closed captioning is available with the optional BKM-104 Caption Vision Board.
- PVM-14N2U/20N2U Only:**
- (Last Input Switch) - Contact closure remote control allows you to wire a remote to an existing system so that the monitor's input can be remotely controlled to switch between the last previously selected input and the current input.
- 4:3/16:9 switchable aspect ratio

PVM-14M2U/14M4U & 20M2U/20M4U 13-inch and 19-inch Production Monitors

Sony's best production monitors ever, the PVM-M Series provide stunning picture quality, ease of use and a range of optional functions. They are identical except that the "M4" models incorporate Sony's state-of-the-art HR Trinitron CRT display technology and have SMPTE C phosphors instead of P22.

- HR Trinitron CRT enables the PVM-14M4U and 20M4U to display an incredible 800 lines of horizontal resolution. The PVM-14M2U and 20M2U offer 600 lines of resolution. M4 models also use SMPTE C phosphors for the most critical evaluation of any color subject.
- Dark tint for a higher contrast ratio (black to white) and crisper, sharper looking edges.
- Each has two composite, S-Video and component input (R-Y/B-Y, analog RGB). For more accurate color reproduction, the component level can be adjusted according to the input system. Optional BKM-101C (video) and BKM-102 (audio) for SMPTE 259M serial digital input.

- Beam Current Feedback Circuit
- 4:3/16:9 switchable aspect ratio.
- True multi-system monitors they handle four color system signals: NTSC, NTSC 4.43, PAL, and SECAM.
- External sync input and output can be set so that it will automatically switch according to the input selected.
- Switchable color temp: 6500K (broadcast), 9300K (pleasing picture), User preset (3200K to 10000K).
- Blue gun, underscan and H/V delay capability
- On-screen menus for monitor adjustment/operation.
- Parallel remote control and Tally via 20-pin connector.

SONY UVW-100B

More affordable than ever, the UVW-100B offers 700 lines of horizontal resolution, 60dB S/N ratio, 26-pin VTR interface, compact design and ease of operation—making it ideal for field shooting applications.

- Three 1/2-inch IT Power HAD CCDs with 380,000 pixels attain sensitivity of F11 at 2000 lux (low light is 4 lux), S/N ratio of 60dB and 700 lines of resolution.
- Gain-up can be preset in 1dB steps from 1dB to 18dB.
- Auto Iris detects the lighting conditions and adjusts for the proper exposure.
- Clear Scan records computer monitors without horizontal bands across the screen. Shutter speed can be set from 60.4 to 200.3 Hz in 183 steps. Also has a variable high speed shutter from 1/100 to 1/2000 of a second.
- SMPTE LTC time code and UB generator/reader. Rec Run/Free Run, Preset/Regen are easily set. For multi-camera operation, genlock to an external time code is provided.
- Genlock input and built-in color bar generator.
- 26-pin VTR interface for feeding component, composite and S-Video signals to another VTR for simultaneous recording. Start/stop are controlled and external VTR status such as Rec and Tally are shown in the viewfinder.
- Diecast aluminum, 1.5-inch DXF-601 viewfinder is rugged yet comfortable while providing 600 lines of resolution.
- Large diameter eye cup reduces eye strain and simplifies focusing. Diopter adjustments (-3 to 0) compensates for differences in eye sight.
- Zebra level indicators, safety zone and center marker generator. Shows tape remaining and audio levels.
- 8-digit LCD display indicates time data, warning indications and video status. Battery status audio level are also shown in a bar graph meter.
- With Anton/Bauer Digital Batteries remaining battery power is displayed on the LCD panel and through the viewfinder.
- Weighs 15lb. with viewfinder, battery, tape and lens. Shoulder pad is adjustable, so you maintain optimum balance when using different lenses and batteries.

UVW-1200/UVW-1400A Betacam SP Player • Player/Recorder

The UVW-1200 and UVW-1400A are non-editing VCRs which deliver Betacam SP quality and offer features for a wide range of playback and recording applications. RGB and RS-232 interface make them especially ideal for large screen, high quality video presentation, scientific research and digital video environments.

- Ideally suited for work in computer environments, because RGB signals can be converted into component signals and vice versa with minimum picture degradation.
- 25-pin serial interface allows external computer control of all VCR functions based on time code information. Baud rate can be selected from between 1200 to 38,400 bps.
- Built-in Time Base Stabilizer (TBS) locks sync and subcarrier to an external reference signal as well as providing stable pictures. High quality digital dropout compensator further ensures consistent picture performance.
- Equipped with two longitudinal audio channels.
- Both read LTC Time Code and UB (User Bits). The UVW-1400A also generates LTC and UB (Free-Run/Rec-Run).
- Built-in character generator can display VTR status, time code, self-diagnostic messages, set-up menu, etc.

- Auto repeat of entire or a specific portion of the tape.
- Control of jog, shuttle, playback, record, pause, FF and REW with the optional SVRM-100A Remote Control Unit.
- Composite and S-Video as well as component via BNCs which are switchable to RGB output. The UVW-1400A has two switchable sync connectors and a Sync on Green.
- Built-in diagnostic function and hour meter.
- Initial set-up menu for presetting operational parameters. Settings are retained even after power is turned off.

UVW-1600/UVW-1800 Betacam SP Editing Player • Betacam SP Editing Recorder

The UVW-1600 and UVW-1800 are the other half of the UVW series. They offer the superiority of Betacam SP with sophisticated editing features. They feature an RS-422 9-pin interface, built-in TBCs and Time Code operation. Inputs/outputs include component, composite and S-Video. **All the features of the UVW-1200/1400A PLUS—**

- Optional BVR-50 allows remote TBC adjustment.
- RS-422 interface for editing system expansion.
- Two types of component output, via three BNC connectors or a Betacam 12-pin dub connector.

- Frame accurate editing is assured, thanks to sophisticated servo control and built-in time code operation. In the insert mode of the UVW-1800, video, audio Ch-1/2 and time code can be inserted independently or in any combination.

PVW-2600/PVW-2650/PVW-2800 BETACAM SP 2000 PRO SERIES

Whenever versatility and no compromise performance is needed, there is only one choice. Legendary reliability and comprehensive support for its many users has established the PVW series as the standard in broadcast and post production. The PVW Series includes the PVW-2600 Player, PVW-2650 Player with Dynamic Tracking and the PVW-2800 Editing Recorder. They feature built-in TBCs, LTC/VITC time code operation and RS-422 serial interface. They also offer composite, S-Video and component video inputs and outputs. Most important they are built for heavy, every day duty.

- Built-in TBC's and digital dropout compensation assure consistent picture performance. Remote TBC adjustment can be done using the optional BVR-50 TBC Remote Control.
- The PVW-2600, PVW-2650 and PVW-2800 (generates as well) read VITC/LTC time code as well as User Bits. Ext/Int time code, Regen/Preset, or Rec-Run/Free-Run selections
- Built-in character generator displays time code or CTL data.
- Set-up menu for presetting many functional parameters.

PVW-2650 Only

- Dynamic Tracking (DT) playback from -1 to +3 times normal speed.

PVW-2800 Only

- Built-in comprehensive editing facilities
- Dynamic Motion Control with memory provides slow motion editing capability.

- Two longitudinal audio channels with Dolby C-type NR.
- Recognizable monochrome pictures at up to 24X normal speed in forward and reverse. Color at speeds up to 10X
- Two types of component connection; three BNC connectors or a Betacam 12-pin dub connector. They have composite and S-Video signals as well.

UHF WIRELESS MICROPHONE SYSTEMS

Consisting of 5 handheld and bodypack transmitters and 6 different receivers, Sony's UHF is recognized as the outstanding wireless mic system for professional applications. Operating in the 800 MHz band range, they are barely affected by external noise and interference. They incorporate a PLL (Phase Locked Loop) synthesized control system that makes it easy to choose from up to 282 operating frequencies, and with the use of Sony's pre-programmed channel plan, it is simple to choose the correct operating frequencies for simultaneous multi-channel operation. Additional features, like space diversity reception, LCD indicators, reliable and sophisticated circuit technology ensure low noise, wide dynamic range, and extremely stable signal transmission and reception. Ideal for broadcasting stations, film production facilities, and ENG work.

Panasonic

QUICK DIAL 74
WJ-MX50
Digital A/V Mixer

- Four input switcher and any two sources can be routed to the program busses. • Two-channel digital frame synchronization permits special effects in each A/B bus.
- Combination of 7 basic patterns and other effects creates 287 wipe patterns. • External edit control input for RS-232 or RS-422 serial controls. Also has GPI input.
- Wipe boundary effects: soft/border (bold, eight background colors available). • Digital effects: strobe, still, mosaic, negative/positive, paint, B&W, strobe, trail, and AV synchro.
- Real-Time compression - entire source image is compressed inside a wipe pattern.
- Fade-in and fade-out video, audio, titles individually or synchronously faded. • Down stream keyer with selectable sources from character generator or external camera.
- "Scene Grabber" moves a pattern while upholding the initially trimmed-in picture integrity.
- Eight separate memories enable instant recall of frequently used effects. • 8 preset effects including: Mosaic Mix, Position Stream, Corkscrew, Bounce, Flip, Shutter, Vibrate, and Satellite. • Audio mixing capability of 5 sources with 5 audio level adjustments.

Canon

IF+ Series Zoom Lenses

Canon's IF+ family of lenses are engineered to meet the needs of the next generation of broadcasting while meeting the standards of today. Besides having the widest wide angle lens available, the IF+ lens series have wider angles at shorter M.O.D. (Minimum Object Distance), provide higher MTF performance and incorporate Hi-UD glass for reduced chromatic aberration. In addition to superb optics they're all designed with Canon's "Ergonomic Grip" for fatigue-free shooting over an extended time. IF+ lenses are your assurance of unsurpassed quality and performance for today and tomorrow.

J15ax8B

A next generation internal focusing lens with the shortest MOD and widest angle of any standard lens, the J15ax8B IRS/IAS is a standard ENG lens that lets you shoot in tight or restricted areas at the closest minimum object distance ever possible and capture more of the subject. It incorporates all the great features of IF+ lenses including a built-in 2X extender, high MTF performance, Hi-UD glass, square lens hood and Canon's "Ergonomic Grip".

J20ax8B IRS/IAS

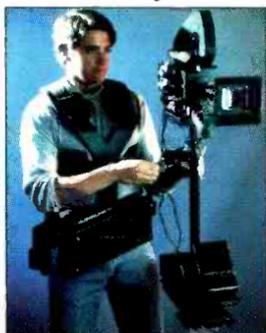

Excellent for ENG, sports and production, the J20ax8B IRS/IAS lets you squeeze in shots from 8mm and still take you all the way out to 320mm with its built-in extender. Incorporates all IF+ features, plus is the only lens (besides the J9ax5.2B IRS/IAS) with a Vari-Polar lens hood, enabling rotation of attached filters.

V-16 AND V-20

Camera Stabilization Systems

The V-16 and V-20 allow you to walk, run, go up and down stairs, shoot from moving vehicles and travel over uneven terrain without any camera instability or shake. The V-16 stabilizes cameras weighing from 10 to 20 pounds and the V-20 from 15 to 26 pounds. They are both perfect for shooting the type of ultra-smooth tracking shots that take your audience's and client's breath away - instantly adding high production value to every scene. Whether you are shooting commercials, industrials, documentaries, music videos, news, or full length motion pictures, the Glidecam "V" series will take you where few others have traveled.

sachtler

Sachtler quality is available to low budget users. The price of a CADDY system includes the 7-step dampened CADDY fluid head, ultra-light but rugged carbon fiber tripod, lightweight spreader and either a soft bag or cover. The CADDY fluid head features an adjustable pan arm, 7-step adjustment for quick counter balance and the self-locking Sachtler Touch and Go System.

CADDY systems

- CAD 01 Single-Stage ENG Carbon Fiber System:**
 - CADDY Fluid Head • ENG Single-Stage Carbon Fiber Tripod
 - SP 100 Lightweight Spreader • Transport Cover 100
- CAD 2A 2-Stage ENG Carbon Fiber System:**
 - CADDY Fluid Head • ENG 2-Stage Carbon Fiber Tripod
 - SP 100 Lightweight Spreader • Soft padded ENG Bag

MILLER Fluid Heads and Tripods

Miller 20-Series II Fluid Head

- Dynamic fluid drag control
- Sliding/quick release camera platform
- Weighs 4 lbs. - handles up to 22 lbs.
- Counterbalance system compensates for nose heavy or tail heavy camera configurations and permits fingertip control of the camera throughout the tilt range.
- Includes independent pan and tilt locks, bubble level, dual pan handle carriers and integrated 75mm ball levelling.

Miller 25-Series II Fluid Head

- 100mm ball level fluid head • Robust, lightweight, low profile design
- Quick release camera platform • Weighs 7lbs - handles up to 25 lbs.
- Multi-step fluid drag system and integrated counterbalance system provide ultra-smooth, repeatable pan-and-tilt fluid control and finger-tip camera balance for ENG camcorders, industrial CCD cameras or small studio cameras

#601-Lightweight Tripod

- Weighs 4.5 lbs., supports up to 30 lbs.
- Minimum height down to 24", maximum height to 57".
- Folds down to 33" • Engineered from thermoplastic moldings, diecast alloy and hard anodized tubular alloy.
- Fast, one turn, captive leg locks
- Includes 75mm (3") ball levelling bowl

#649-2-Stage Tripod

- Two extension sections on each leg. Operates at low levels as well as normal heights without the use of mini legs.
- High torsional rigidity, no pan backlash
- Weighs 6 lbs., supports 50 lbs. • Very portable, folds to 27"
- Includes 75mm (3") ball levelling bowl

- System 20 #338**—Miller 20 Head, 601 Lightweight Tripod, On Ground Spreader
- System 20 ENG #339**—Miller 20 Head, 649 2-Stage Aluminum, On Ground Spreader
- System 25 #500**—Miller 25 Head, 611 Lightweight Tripod, On Ground Spreader
- System 25 ENG #502**—Miller 25 Head, 641 2-Stage Aluminum, On Ground Spreader

Vinten

Vision SD 12 Pan and Tilt Head with Serial Drag

The Vision SD 12 head features "Serial Drag" pan and tilt system. System consists of a unique, permanently-sealed fluid drag and an advanced lubricated friction drag. You achieve the smoothest pans and tilts regardless of speed, drag setting and ambient temperature. Patented spring-assisted counter-balance system permits perfect "hands-off" camera balance over full 180° of tilt.

- Instant drag system breakaway and recovery overcome inertia and friction for excellent "whip pans".
- Consistent drag levels in both pan and tilt axis.
- Flick on, flick off pan and tilt caliper disc brakes.
- Greater control, precision, flexibility and "touch"
- Touch activated, time delayed illuminated level bubble.
- Working conditions from as low as -40° up to +60°C.
- SD 12 weighs 6.6 lbs and supports up to 35 lbs.

Vision 12 Systems

Vision 12 systems include #3364-3 SD 12 dual fluid & lubricated friction drag pan/tilt head, single telescoping pan bar & clamp with 100mm ball base.

SD-12A System

- SD-12 pan and tilt head
- 3518-3 Single stage ENG tripod with 100mm bowl
- 3363-3 Lightweight calibrated floor spreader.

SD-12D System

- SD-12 pan and tilt head
- 3513-3 Two-stage ENG tripod with 100mm bowl
- 3314-3 Heavy-duty calibrated floor spreader

Vision Two Stage ENG and LT Carbon Fibre ENG Tripods

The ultimate in lightweight and innovative tripods, they are available with durable tubular alloy (Model #3513) or the stronger and lighter, axially & spirally wound carbon fiber construction (Model #3523). They incorporate torque safe clamps to provide fast, safe & self-adjusting leg clamps.

- "Torque Safe" requires no adjustment. Its unique design adjusts itself when required, eliminating manual adjustment and maintenance and making for a much more reliable clamping system.
- New hip joint eliminates play and adds rigidity.
- They both feature 100mm levelling bowl, fold down to a compact 28", and support 45 lbs.
- #3513 weighs 6.5 lbs - #3523 CF (Carbon Fibre) weighs 5.2 lbs.

VIN-5ST and VIN-10ST

- Compact & lightweight, they maintain Vision performance and quality.
 - Provide total stability and durability with payloads up to 33 lbs.
 - Ideal for the latest generation of dockable and one-piece camcorders.
 - Compatible with all Vision accessories.
- VIN-5ST includes Vision 5LF head, single stage toggle clamp tripod, spreader and soft case.
 VIN-10ST includes Vision 10LF head, single stage toggle clamp tripod, spreader and soft case.

antonbauer

DIGITAL Gold Mount Batteries

Acknowledged to be the most advanced battery in the industry, the Logic Series DIGITAL batteries deliver the feature most requested by cameramen: a reliable and accurate indication of remaining battery power.

DIGITAL PRO PACS

The ultimate professional video battery and recommended for all applications. The premium heavy duty Digital Pro Pac cell is designed to deliver long life and high performance even under high current loads and adverse conditions. It's size and weight creates perfect shoulder balance with all camcorders.

- **DIGITAL PRO PAC 14 LOGIC SERIES NICAD BATTERY**
 14.4v 60 Watt Hours. 5 1/8 lbs. Run time: 2 hours @ 27 watts, 3 hrs. @ 18 watts
- **DIGITAL PRO PAC 13 LOGIC SERIES NICAD BATTERY**
 13.2v 55 Watt Hours. 4 3/4 lbs. Run time: 2 hours @ 25 watts, 3 hours @ 17 watts

DIGITAL TRIMPAC

Extremely small and light weight, the Digital Trimpac still has more effective energy than two NP style slide-in batteries. High voltage design and Logic Series technology eliminate the problems that cripple conventional 12 volt slide-in type batteries. The professional choice for applications drawing less than 24 watts.

- **DIGITAL TRIMPAC 14 LOGIC SERIES NICAD BATTERY**
 14.4 v 43 Watt Hours. 2 3/4 lbs. Run time: 2 hours @ 20 watts, 3 hours @ 13 watts.

InterActive 2000 Power/Chargers

QUAD 2702/2401 Four-Position Power/Chargers

The lightest (and slimmest) full featured four position chargers ever. They can fast charge four Gold Mount batteries and can be expanded to charge up to eight. They also offer power from any AC main: all in a package the size of a notebook computer and weighing a mere four lbs! The 40 watt 2401 can charge ProPacs in two hours and TrimPacs in one. Add the Diagnostic/Discharge module and the QUAD 2401 becomes an all purpose power and test system. The 70 watt QUAD 2702 bundles all Power/Charger features in the ultimate professional power system.

Dual 2702/2401 Two-Position Power/Chargers

The DUAL 2701 (70 watt) and 2401 (40 watt) are sleek, rugged and economical two position Power/Chargers that have all the features of InterActive 2000 technology including DC camera output and LCD display. The DUAL 2701 will charge any Gold Mount battery in one hour, the DUAL 2401 charges ProPac batteries in two hours and TrimPacs in one. Their compact, lightweight package design makes them the ultimate travel Power/Chargers. They can also be upgraded with the Diagnostic/Discharge Module and/or with the Expansion Charge Modules to charge up to six batteries of any type.

Calibar 3-Oz. Pocket-Sized Test Generator

The size of a ball point pen and running on a single battery, Calibar is an NTSC test signal generator that packs a rack mount's worth of test equipment into a battery operated instrument. Calibar is the fastest, easiest and most portable way ever to calibrate video equipment. No patch bay racks. Just one cable. So besides giving you fast accurate readings in the studio, it's perfect for off-site events or trouble-shooting in the field.

- Designed for studio and field operation, it produces 24 test pattern functions at the touch of a button. 10-bit precision digital-to-analog conversion assures highly accurate signals.
- Calibar's combination of low cost, portability and full-featured operation makes it ideal for broadcast engineers, television production facilities and video post houses.
- Tuck Calibar in your pocket and you're ready to go. Touch the button to generate SMPTE color bars, touch it again to calibrate convergence and so on.
- With the supplied AC adapter, it also functions as a black burst generator.

CHYRON PC-CODI & PC Scribe Text and Graphics Generator and Video Titling Software

PC-CODI incorporates a broadcast quality encoder and a wide bandwidth linear keyer for the highest quality, realtime video character generation and graphics display. A video graphics software engine running under Windows 95/NT, PC Scribe offers a new approach and cost effective solution for composing titles and graphics that is ideal for video production and display applications. Combined, they're a total solution for realtime character generation with the quality you expect from Chyron.

PC-CODI Hardware:

- Fully-antialiased displays
- Display and non-display buffers
- Less than 10 nanosecond effective pixel resolution
- 16.7 million color selections
- Fast, realtime operations
- Character, Logo and PCX Image transparency
- Variable edges: border, drop shadow and offset
- Full position and justify control of character and row
- User definable intercharacter spacing (squeeze & expand)
- Multiple roll/crawl speeds
- Automatic character kerning
- User definable tab/template fields
- Shaded backgrounds of variable sizes and transparency
- Software controlled video timing

- User definable read effects playback: wipes, pushes, fades
- NTSC or PAL sync generator with genlock
- Board addressability for multi-channel applications
- Auto display sequencing
- Local message/page memory
- Preview output with safe-title/cursor/menu overlay
- Composite and S-video input with auto-genlock select

PC-Scribe Software:

- Number of fonts is virtually unlimited. Also supports most international language character sets. Fonts load instantly and the level of anti-aliasing applied is selectable.
- Adjust a wide range of character attributes. Wide choice of composition tools.
- Characters, words, rows and fields can color flash
- Character rolls, crawls and reveal modes. Speed is selectable and can be auto timed with pauses. Messages can be manually advanced or put into sequences along with page transitions.

- Multiple preview windows can be displayed simultaneously.
- Transitions effects include: cut, fade, push, wipe, reveal, peel, zoom, matrix, wipe, spiral, split, weave and jitter.
- Import elements to build graphics. This includes OLE objects, INFINIT! RGBA and TGA with alpha channel. Scribe also imports and exports TIFF, JPEG, PCX, TGA, BMP, GIF, CLP, ASCII, IMG, SGI, PICT and EPS formats.

PC-CODI and PC-Scribe Bundle\$2995.00

TARGA 1000/MCXpress NT Professional Video Production Workstation

Incorporating the award-winning TARGA 1000 video card and Avid MCXpress NT non-linear editing software, this fully-configured workstation meets the needs of production professionals, corporate communicators, educators and Internet authors.

TARGA 1000 Features:

The TARGA 1000 delivers high processing speed for video and audio effects, titling and compositing. Capture, edit and playback full-motion, full-resolution 60 fields per second digital video with fully synchronized CD-quality audio.

- Compression can be adjusted on the fly to optimize for image quality and/or minimum storage space. Has composite and S-video inputs/outputs. Also available with component input/output (TARGA 1000 PRO).
- Genlock using separate sync input for working in professional video suites
- Audio is digitized at 44.1KHz or 48KHz sampling rates, for professional quality stereo sound. Delivers perfectly synchronized audio and video.

MCXpress Features:

The ideal tool for video and multimedia producers who require predictable project throughput and high-quality results when creating video and digital media for training, promotional/marketing material, local television and cable commercials, CD-ROM and Internet/intranet distribution. Based on Avid's industry-leading technology, it combines a robust editing functionality with a streamlined interface. Offers integration with third-party Windows applications, professional editing features, powerful media management, title tool and a plug-in effects architecture. It also features multiple output options including so you save time and money by reusing media assets across a range of video and multimedia projects.

TARGA 1000/MCXpress Turnkey Systems:

- 300-watt, 6-Bay Full Tower ATX Chassis
 - Pentium ATX Motherboard with 512K Cache
 - Pentium II- 300 MHz Processor
 - Matrox Millennium II AGP 4MB WRAM Display Card
 - 64MB 10ns 168-Pin (DIMM) S-DRAM
 - Quantum Fireball 6.4GB IDE System Drive
 - Seagate Barracuda External 9.1GB SCSI-3 Ultra Wide Capture Drive
 - Adaptec AHA-2940UW Ultra Wide SCSI-3 Controller Card
 - Teac CD-532e 32X EIDE Internal CD-ROM Drive • 3.5" Floppy Drive
 - Altec-Lansing ACS-48 3-Piece Deluxe Speaker System
 - Viewsonic G771 17-inch (1280 x 1024) Monitor (0.27mm dot pitch)
 - Focus 2001A Keyboard • Microsoft MS Mouse
 - Windows NT 4.0 Operating System Software
 - Avid MCXpress for Windows NT
 - Truevision TARGA 1000 or 1000 Pro Video Capture Card
- With TARGA 1000\$7495.00
With TARGA 1000 Pro (component input/output)\$7995.00

KNOX VIDEO

RS4x4/8x8/16x16/16x8/12x2 Video/Audio Matrix Routing Switchers

Knox's family of high performance, 3-channel routing switchers are extremely versatile, easy-to-use and very affordable. Housed in an ultra-thin rack-mount chassis they accept and route (on the vertical interval) virtually any video signal, including off-the-air and non-timebase corrected video. They also route balanced or unbalanced stereo audio. The audio follows the video or you can route the audio separately (breakaway audio). Each of the switchers offers manual control via front panel operation. They can also be controlled remotely by a PC, a Knox RS Remote Controller, or by a Knox Remote Keypad via their RS-232 port. Front panel LEDs indicate the current routed pattern at all times. Knox switchers are ideal for applications such as studio-feed control and switcher input control, plus they have an internal timer allowing timed sequence of patterns for surveillance applications as well.

- Accept and routes virtually any one-volt NTSC or PAL video signal input to any or all video outputs.
- Accept and route two-volt mono or stereo unbalanced audio inputs to any or all audio outputs.
- Video and audio inputs can be routed independently, they don't need to have the same destination.
- Can store and recall preset cross-point patterns. (Not available on RS12x2.)
- Front panel key-pad operation for easy manual operation.
- Can also be controlled via RS-232 interface with optional RS Remote Controller or Remote Keypad.
- Front panel LED indicators display the present routing patterns at all times.
- An internal battery remembers and restores the current pattern in case of power failure.
- Internal vertical interval switching firmware allows on-air switching.
- Housed in a thin profile rackmount 1" chassis.
- Also except the RS12x2 are available in S-Video versions with/without audio.
- Models RS16x8 and RS16x16 are also available in RGB/component version.
- With optional Remote Video Readout, the RS16x8 and RS16x16 can display active routes on a monitor at remote locations, via a composite signal from a BNC connector on the rear panel.
- The RS4x4, RS8x8 and RS16x16 are also available with balanced stereo audio. They operate at 660 ohms and handle the full range of balanced audio up to +4 dB with professional quick-connect, self-locking, bare-wire connectors.

LEADER

Manufacturing test and measurement equipment for over 40 years, Leader Instruments is the standard which others are measured against for reliability, performance, and most important—cost effectiveness.

5860C WAVEFORM MONITOR

A two-input waveform monitor, the 5860C features 1H, 1V, 2H, 2V, 1 s/div and 2V mag time bases as well as vertical amplifier response choices of flat, IRE (low pass), chroma and DIF-STEP. The latter facilitates easy checks of luminance linearity using the staircase signal. A PIX MON output jack feeds observed (A or B) signals to a picture monitor, and the unit accepts an external sync reference. Built-in calibrator and on-off control of the DC restorer is also provided.

5850C VECTORSCOPE

The ideal companion for the 5860C, the 5850C adds simultaneous side-by-side waveform and vector monitoring. Featured is an electronically-generated vector scale that precludes the need for fussy centering adjustments and eases phase adjustments from relatively long viewing distances. Provision is made for selecting the phase reference from either A or B inputs or a separate external timing reference.

5100 4-Channel Component / Composite WAVEFORM

The 5100 handles three channels of component signals, plus a fourth channel for composite signals, in mixed component / composite facilities. Features are overlaid and parade waveform displays, component vector displays, and automatic bow-tie or "shark fin" displays for timing checks. Menu-driven options select format (525/60, 625/50, and 1125/60 HDTV), full line-select, vector calibration, preset front-panel setups and more. On-screen readout of scan rates, line-select, preset numbers, trigger source, cursor time and volts.

5100D Digital Waveform/Vectorscope

The 5100D can work in component digital as well as component analog facilities (and mixed operations). It provides comprehensive waveform, vector, timing and picture monitoring capabilities. Menu driven control functions extend familiar waveform observations into highly specialized areas and include local calibration control, the ability to show or blank SAV/EAV signals in both the waveform and picture, the ability to monitor digital signals in GBR or YCbCr form, line select (with an adjustable window), memory storage of test setups with the ability to provide on-screen labels, flexible cursor measurements, automatic 525/60 and 625/50 operation and much much more.

5870 Waveform/Vectorscope w/SCH and Line Select

A two-channel Waveform/Vector monitor, the microprocessor-run 5870 permits overlaid waveform and vector displays, as well as overlaid A and B inputs for precision amplitude and timing/phase matching. Use of decoded R-Y allows relatively high-resolution DG and DP measurements. The 5870 adds a precision SCH measurement with on-screen numerical readout of error with an analog display of SCH error over field and line times. Full-raster line select is also featured with on-screen readout of selected lines. A strobe on the PIX MON output signal to highlight the selected line, and presets for up to nine lines for routine checks.

5872A Combination Waveform/Vectorscope

All the operating advantages of the 5870, except SCH is deleted (line select retained), making it ideal for satellite work.

5864A Waveform Monitor

A two-input waveform monitor that offers full monitoring facilities for cameras, VCRs and video transmission links. The 5864A offers front panel selection of A or B inputs, the choice of 2H or 2V display with sweep magnification, and flat frequency response or the insertion of an IRE filter. In addition, a switchable gain boost of X4 magnifies setup to 30 IRE units, and a dashed graticule line at 30 units on screen facilitates easy setting of master pedestal. Intensity and focus are fixed and automatic for optimum display. Supplied with an instruction manual and DC power cable.

5854 Vectorscope

A dual channel compact vectorscope, the 5854 provides precision checkout of camera encoders and camera balance, as well as the means for precise genlock adjustments for two or more video sources. Front panel controls choose between A and B inputs for display and between A and B for decoder reference. Gain is fixed or variable, with front panel controls for gain and phase adjustments. A gain boost of 5X facilitates precise camera balance adjustments in the field. Supplied with a DC power cable.

Designed for EFP and ENG (electronic field production and electronic news gathering) operations, they feature compact size, light weight and 12 V DC power operation. Thus full monitoring facilities can be carried into the field and powered from NP-1 batteries, battery belts and vehicle power. Careful thought has been given to the reduction of operating controls to facilitate the maximum in monitoring options with the operating simplicity demanded in field work.

CORPORATE ACCOUNTS WELCOME

Multistandard Studio/Field Camera

Hitachi SK-3000 & SK-3000P (portable version): a multistandard studio camera that provides simultaneous HDTV and NTSC outputs; features include a seven-inch viewfinder and automatic 16:9/4:3 signal conversion; the 1.5Gb/s digital output from the camera head is brought to the camera control unit via an optical fiber cable; in addition to the standard analog and digital HDTV outputs, the signal is digitally converted to an NTSC rate (16:9 or 4:3) for the serial digital component and analog outputs; this camera uses 2,000,000-pixel CCDs and operates in a 16:9 HDTV format at all times; 516-921-7200; fax 516-496-3718

Clearly a Winner!

PATENT PENDING

The VTM-200 family features high-resolution images at a winning price!

The award-winning VTM-200 Multi-Format On-Screen Monitor family combines crisp waveform, vector, audio, and picture displays on one low-cost SVGA monitor. This ingenious package allows each high-resolution quadrant to be expanded to full-screen.

Members of the VTM-200 family feature different combinations of analog composite (NTSC or PAL) video inputs, 601 serial digital (525 or 625) video inputs and Component Analog Video inputs. Both of the versatile audio options display levels and phase differences on up to four AES stereo pairs and four analog stereo pairs, and one option monitors embedded digital audio. The audio bar-graph has a wide dynamic range and user selectable resolution and ballistics.

A unique ZOOM feature allows ultra-accurate set up and measurement of black, white, and audio reference levels.

Whether your facility is NTSC, PAL, multi-format, serial digital, or in transition, the VTM-200 family is clearly the winning choice for all your on-screen test and measurement needs.

Call today to find out more about this and other winning next-generation solutions from Videotek.

LEITCH

THE BEST VIDEO SERVER IN THE BUSINESS JUST MOVED UP IN THE WORLD.

7echnically speaking there's no better broadcast video server than ASC's VR300™. With 1 Gb/sec bandwidth, it serves up to 24 simultaneous channels and 96 hours of online digital storage.

FIBREDRIVE. ALL THE DIFFERENCE IN THE WORLD.

The VR300 is the only on-air server with FibreDrive™, ASC's exclusive Fibre Channel technology. FibreDrive is the only server architecture that gives all users true simultaneous random access to Fibre Channel RAID storage.

SERVE UP FASTER, BETTER LOOKING NEWS.

For a completely tapeless newsroom, integrate the VR300 with ASC's NEWSFlash™, a powerful full-featured

news editing solution. Record satellite feeds, edit news stories, and play directly to air – all at the same time with the same media. No tapes. No local buffers. No file transfers.

THE WORLD'S MOST ADVANCED VIDEO SERVER IS NOW PART OF THE LEITCH FAMILY.

Recently, ASC's innovative server technologies became part of the Leitch family of digital broadcast solutions. Now the leader in video servers is backed up by Leitch's global support network and world-class customer service.

ASC and Leitch. The best just got better. Visit us on the web at www.leitch.com/asc.
