NUMBER 8

Thank God for a Radio

NOT least of the many blessings for which we may render thanks next Thursday is radio. While it has become commonplace and incidental in the lives of most of us and while some radio widows still look upon it as a curse, there are thousands to whom it is a boon. Particularly is this the case in the lives of those unfortunates who are ordinarily considered to have less for which to be thankful than those who enjoy much of the freedom and advantages of modern civilization.

So even if you are unable or unwilling to give thanks for your own possession of a radio—an improbable supposition—at least be generous in your thoughts for those who have not as many other diversions as you. "Diversion" is a good word here. For surely radio "turns or draws the mind from care or study, and thus relaxes and amuses." Nay, more! It dispells loneliness, it brings forgetfulness of sorrow, it relieves suffering.

No sacrilege need be involved in a companion piece to "Thank God for a Garden" in "Thank God for a Radio." Thousands of letters to broadcast station attest this fact.

Radio has relieved the pathos of life for many otherwise unable to receive the solace of religion, the inspiration of fine music, or even the joy of jazz.

It satisfies the wanderlust of those unable to bodily visit distant places. It brings the news of the world to those unable to read it. Even the normally deaf person can frequently hear radio. And many an otherwise weary hour during the day or late at night is pleasantly passed by its aid.

Thanks is too often selfish. Like happiness, it should be shared. So instead of consigning a set which no longer suffices for your needs to the dark confines of basement or closet, or instead of accepting its small trade-in value, why not get in touch with some charitable organization that can place it where it will do good for others?

Thus can you carry out the spirit which might well govern our observance of Thanksgiving Day. And your own feasting and cheer be all the greater because of the personal satisfaction in bringing thankfulness into the hearts of others.

The Loud Speaker

By EARLE ENNIS

Isn't it remarkable what a lot of people there are in the world who function under the delusion that the rest of the world is just panting to be orated at? One has to have a radio set and listen for a few nights to get the full beauty of this delusion, and to really appreciate how much blating is done day after day, without anything being accomplished by it.

* * *

Here we have a man—a foreigner who can't speak English, trying to tell us what is the matter with America. There we have an American who can't speak English, trying to tell us what is the matter with Europe. Where there is one who is constructive there are ten who are destructive. At the end of an evening, we have a dark brown taste—and nothing else.

* * *

Sometimes every station around the bay has a third-rate speaker, talking, talking, talking—hurling words out on the air blythely, hopefully, satisfied with himself and his subject—and if he only knew it, boring the radio fans to death. G. Bolivar Watts on "Sofa Cushion Planting in Bolivia." T. Wimpus Smith on the value of "Washing Behind the Ears of Your Ford." Or Henry Jones, explorer, on "How I Grabbed a Tusk Off a Walrus!"

* * *

Only the other night, with a hunger for some music, we trotted right around the dial. Not a scrap. Every station in the bay district was blating about something or other and most of it was the sort of drivel that nobody would read in the cheapest kind of a magazine. And so, we did what hundreds of other radio fans are doing these nights—went out of town to Los Angeles, Portland, San Diego and Denver and got our entertainment. Local stations are losing out with so much talky talk. Folks are tired of it.

* * *

There are about five or six features in the San Francisco bay district worth hearing. Because we don't want to hurt any feelings, we shall not tick them off. But you can all name them.

But at that, the radio fan would stand for poor music without a murmur if these self-constituted orators would quit making speeches over the air. The same old hokum. The same old applesauce. The practice of broadcasting a banquet is another of the radio pest family. Who wants to listen to a banquet. Who wants to hear the fat, complacent little orators, tell the same old chestnuts, or the same old dishes rattle?

* * *

Once in a year there is a speech over the radio that is worth hearing. Lately the stations have developed another complex, viz., that of stopping a first class musical concert in the middle to let Mr. Bla-bla-bla finish the series of talks he is giving on "The Way to Wheedle Dandruff Out of a Clam" or something equally as heavy. That is irritating and ruinous to the concert. The fan curses, changes stations and never hears the rest of the program. Ask 'em. They all tell you the same thing.

* * *

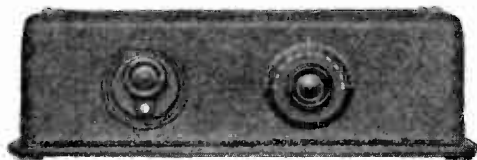

Maybe there is money in these speeches. All right—we admit the right of the station to compensation. But if the announcer or the operator would only do us a favor and just throw the switch so these talky boys do not come out on the air. Not only do we not want to hear them, but when they have from 1,000 to 5,000 watts of power behind their voices, they keep a lot of us from hearing anything else. And this is rotten selfish.

* * *

We do not include in this category the educational talks which are for a purpose. We refer to—well, you know just what we refer to. If we dared mention names you'd agree. As it is, you can figure it out. The next time you hear one on the air, you'll say, "There's one of those radio pests the Loud Speaker was kicking about!" And you'll be dead right.

If you have a friend and he intends to make a speech over the radio, lead him aside and show him this and tell him to think it over. Maybe it will help the cause along. Maybe he thinks we want to hear him. Well—we don't! And we don't mean maybe.

ATWATER KENT RADIO

Treasure Chest, 1 dial, 6 tubes, shielded, \$75

This is the outstanding set of its type in the one dial field this year. It is, we believe, outselling any other one dial set. From its brown crystalline finish and glistening bakelite and from the golden decorative plaque with its ship model, right through to the smallest part inside, it is well built, compact and a remarkable set in performance.

If you require something super-sensitive and super-selective, then the one dial Model 32, having seven tubes, and selling for \$145 will fill your requirements.

It is an Atwater Kent year. No other sets do so much, so well, so consistently. No radio speakers require less care, give trouble, and have less deterioration in tone quality and operation than the Atwater Kent models priced from \$17 to \$24.

It's an Atwater Kent Year

Long Life. No Acids or Liquids Better Radio Reception

Majestic "B" Current Supply

delivers pure direct current—From your light socket

Majestic Standard — B
Capacity seven tubes or six plus one power tube. 45 milliamperes at 135 volts.

\$32.50

West of Rocky Mts., \$35.00

Durability No acids or liquids. Uses Raytheon Tube; no filament to burn out.

Dependability Maximum and unvarying power always available.

Better Reception No hum. Superior to any source of power.

Majestic Super—B
Capacity 1 to 12 tubes, including the use of power tubes, 45 mils at 150 volts.

\$35.00 (As illustrated)

West of Rocky Mts., \$37.50

Economy Low first cost. Cheapest and best form of "B" power. Average cost, 1 cent for 10 hours.

Flexibility Voltage can be accurately adjusted to meet varying conditions in every city—and on any set.

Majestic Master—B
For Radiola 25, 28 and 30 and Super heterodynes. Operates all power tubes. Rating 60 miles at 150 volts.

\$42.50

West of Rocky Mts., \$45.00

See your dealer today. Insist on a demonstration on your own set immediately

Cardwell Condensers

The Type "C" has a tuning characteristic which approaches straight frequency at minimum and straight wavelength at maximum. Priced from \$4.00 up.

The
Type "C"
Cardwell
Condenser is
almost the uni-
versal selection of
Radio Engineers and
Editors who want the
best. Mr. John B. Brennan
used them in the New Radio
Broadcast "Lab" circuit. . . . Mr.
E. M. Sargent recommends the 317-C
as the only condenser for the "Infra-
dyne" The "A. C. Varion," which
you can build to work direct from the light-
ing fixtures, uses the 217-C. . . . For Short
Wave Reception, Cardwell Condensers have always
been accepted as the only practical instrument.

The Patent Cone

In line with the intensive study of instruments for improving audio reproduction of broadcast programmes, the Patent engineers have achieved a truly masterful Cone Speaker. It is indeed a finished piece of research and engineering.

Original Nathaniel Baldwin Inc.

SALT LAKE CITY

This Signature Is Your Guarantee

In 1910 Nathaniel Baldwin invented and patented the floating armature radio unit. Sixteen years of continuous operation of their factory, with uniformity and quality as their object, has developed and perfected a loud speaker unit that is unequaled by any other factory.

Mr. N. E. Borch.

Dear Sir: My Infradyne is working better every day. Here are a few stations that I have brought in on the loud speaker all in the last few days:

KVOO	Bristow, Okla.	WEBH	Chicago, Ill.
KOWW	Walla Walla, Wash.	WSWS	Chicago, Ill.
WSB	Atlanta, Ga.	KDKA	Pittsburgh, Pa.
KLZ	Denver, Colo.	KFKX	Hastings, Neb.
KOA	Denver, Colo.	KMOX	St. Louis, Mo.
WDAF	Kansas City, Mo.	WORD	Batavia, Ill.
KMO	Tacoma, Wash.	WLW	Cincinnati, Ohio
KOB	Messila, N. M.	WOAW	Omaha, Neb.
WJAZ	Chicago, Ill.	WSMB	New Orleans, La.
CNRV	Vancouver, B. C.	KFNF	Shenandoah, Iowa
CFCT	Victoria, B. C.	KMA	Shenandoah, Iowa
WLS	Chicago, Ill.	WCCO	Minneapolis, St. Paul
WQJ	Chicago, Ill.	WGBH	Clearwater, Fla.
WBBM	Chicago, Ill.	CZE	Mexico City, Mexico
WHT	Chicago, Ill.		

Have picked up Clearwater, Florida, nearly every night for the last two weeks, from 6 to 7 p. m., besides about 40 other stations on the Pacific Slope from Vancouver to San Diego.

(Signed) W. H. WADMAN,
Crockett, California.

If results like this are what you demand, I can satisfy your utmost requirements with an Infradyne.

N. E. BORCH

PERRYMAN RADIO TUBES

Perryman Type P. A. 210 Super-Power Amplifier

Standard Long Pin Base

Clear!

A power amplifier is quite like an ordinary detector-amplifier but it is made to handle larger currents at greater voltage. The power tube which amplifies with the least effort does so without distorting tones. The twin filament construction and the patented Perryman Bridge combine to make Perryman power tubes extremely efficient. They handle big loads with amazing ease and without distortion.

Perryman wholesale distributors are authorized and fully equipped to service their dealers on orders, advertising matter, and in every necessary respect. Dealers can cooperate by anticipating their requirements in time for wholesalers to effect satisfactory deliveries.

A&B Battery Charger ONLY \$2

SATISFACTION GUARANTEED

Charges any type of storage "A" or "B" battery, using a few cents worth of ordinary house current. Cannot injure battery. Complete directions enclosed. Anyone can operate. No expensive "extras" to buy. Why pay \$10 to \$15 for a charger when you can get this splendid GUARANTEED R. B. Charger by mailing us \$2.00 (bills, money order, check or

stamps) plus 10 cents in stamps or coin to pay mailing costs. Charger will be sent post-paid. If you are not satisfied, return within five days and we will refund your money. Order at once—TODAY!

R. B. Specialty Company

Dept. Z55, 308 E. Third St., Cincinnati, Ohio

Valley T.B.C. Charger

The twin bulb design of this Valley Charger overcomes the only objection to the bulb type charger, i. e., the slow charging rate.

Using both bulbs, you have a 5-ampere charger. Using only one bulb, the charging rate is 2½-amperes. Thus the charging rate and the purchase of one bulb or two are entirely optional.

Absolutely noiseless. Built in handsome black grained metal case. Complete with cord and plug, and leads and clips. Price \$16.50 without bulbs.

Valleytone Model No. 52

The small cut below shows the Valleytone Radio Receiver, 5-tube, tuned radio frequency. Two dial control. Wired so that the use of the power tube is optional. Price \$96.00.

USE WITH THE SENSIBLE GUARANTEE

Stop walking

He—"Please stop walking—I just missed the announcer—because your walking vibrates these tubes and I can't hear anything but 'noises.'"

She—"But dear, I must walk—We have no other means for conveying these dishes into the kitchen."

He—"Pardon me, you're right Honey. I didn't mean to speak so harshly—I guess I'll take Charlie's advice—your brother Charlie sure does know radio—You know, he had the same trouble—He tried all kinds of tubes without success—He even put sponge rubber under the sockets, but that did not prevent the tube elements from vibrating—So he went out and bought a set of those New Supertrons—They are internally re-enforced and rigid—Since then he and Maude dance and even Charleston without affecting reception!"

She—"Now ain't that grand—You better get some Supertrons now—Be sure they are Isolantited—You'll see the difference."

He—"Alright Honey—I won't take anything 'Just as Good' this time. I'll insist on Supertron because they are guaranteed by serial number and if I'm not satisfied the dealer will replace or refund within 30 days—So long Honey, will be back soon with Supertrons."

HELP US KEEP THESE SCHEDULES ACCURATE

MORE DOPE FROM JORDAN ABOUT HIS CALCO FIVE

2109 108th Avenue, Oakland, Calif.
November 6, 1926.

California Coil Company,
Oakland, Calif.

Gentlemen: The following stations have all been received on the Loud Speaker, using our Calco five, between October 30 and November 5. I doubt if there is another five-tube set made that will equal this record—CYE, CFAC, CNRV, CJCA, CFCN, KFWC, KOIN, KOMO, KFKX, KMOX, KOA, KOIL, KSL, WOC, WBAP, WJR, WOAM, KYW.

Very truly yours,

H. G. JORDAN.

We will rebuild your old set regardless of make, into a new Calco five-tube, for only \$25. Price includes a new bakelite panel, special coils, and many extra parts. The Calco will absolutely separate all locals and bring in long distance on the speaker with locals in operation.

BRING OR SHIP YOUR OLD SET

6 Tube Model
XL-20-6

\$74

A-C DAYTON

RADIO

Other Models

\$59.00

to

\$268.00

A remarkable receiver in the popular three dial control model, with six tubes. Selective over the entire wave band. Ample volume through three audio stages. Unusual tone quality at full volume graduated to a whisper by one simple control.

Equipped with Volume Control and Clarity Control. Air spaced coils are used—an exclusive type in all A-C DAYTON receivers—insuring exceptional “pick up” and sharpness. This receiver will give the best there is in radio with minimum interference, due to accurate tuning that is possible with three dials.

Panel is dull black, gold engraved bakelite; cabinet is in two tone walnut with scroll work. All control knobs are bakelite finished in green gold. All outlets on panel in dull gold. All connections made from the rear. Provision for “C” and extra “B” battery voltage and power tube. Three degrees of selectivity are provided from three aerial taps. Specially designed condenser provides easy tuning on the lower and upper wavelengths with minimum interference. Size: 22 inches long, 7 inches high, 10 inches deep.

W. E. & W. H. JACKSON

GAROD ELECTRIC POWER RADIO

Electric Power Captures New Range of Tone

Brings A
and Rich

GAROD TONE

NTS

1. Electric POWER—equivalent to 10 "B" Batteries!
2. POWER TUBES—100 times stronger than standard tubes!
3. Powerful Transformer—steps house current to 450 volts!
4. Neutrodyne—guarantees world's finest selectivity!

New Garod is brilliant. It is inspiring. What a contrast with the thin, artificial tones of receivers that have sacrificed the elements vital for range, depth, clearness and the finer things of radio. Before investing in an old-type receiver—hear the amazing tone of the new-era Garod reproducing entirely by ELECTRIC POWER!

"THE HOUSE THAT PARTS BUILT"

"THE HOUSE THAT PARTS BUILT"

"Buy Your Xmas Radio Early"

But buy an Apex

The new APEX "SIX" offers more than mere outward appearance to the eye. Hidden in every corner, both inside and out, you will find the best of quality, the most thorough of conscientious workmanship.

To greet the eye you witness handsomely, not gaudily, designed cabinets—five-ply walnut veneer and finished in an attractive high-lighted surface. Everywhere you sense a durability of construction and a harmony of proportion that can readily be

Model 6—\$115

appreciated on inspection. Behind the illuminated, single dial and bronze panel are contained the most advanced technical improvements yet attained in the vast field of radio. The impedance coupling, a new and revolutionary feature, eliminates distortion and assures a pure tone quality and clarity of reception. Numerous refined points show that perfection has been the attained ideal.

hear its full volume, to herald countless distant stations at the turn of a single dial will give you that keen delight known only to the APEX owner.

APEX guarantees a performance that is without peer, regardless of the most discriminating judgment. To

Announcing the
Super Electric

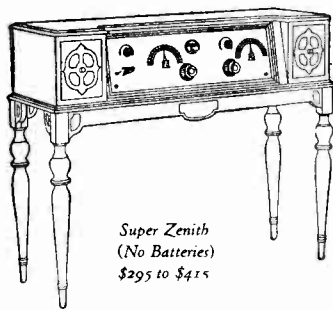

NO BATTERIES

Connect with your light socket. No chargers . . . No acids . . . No trouble . . . No worry. Improved tone . . . Uniform and greater power (no more weak batteries).

The Zenith "A" and "B" units completely rectify and filter the current. Tubes may be rejuvenated without removal. Three stages of Audio Amplification, instead of two as used by others. Costs less than a cent an hour to operate.

Super Zenith
(No Batteries)
\$295 to \$415

Immediate Delivery

Your choice of three distinct models

 Palace Orchestra

YAXLEY
A. PRIME RADIO PRODUCTS

Cable Connector Plug

The very appearance and sure positive action as you put it together will sell you on the new Yaxley Cable Connector Plug.

The Bakelite construction, the phosphor bronze double contact springs, the convenient mounting plate with the permanently attached color guide for wiring tell you the unusual merits of this practical plug for quickly and conveniently connecting battery leads to your set.

The No. 660 is the plug illustrated—\$3.50.

The No. 670 is the plug for the set with binding posts—no soldering. Just hook-up the terminals to your set and batteries and the job is done—\$4.00.

Radio Convenience Outlets

Yaxley Radio Convenience Outlet Receptacles and plates fit standard outlet boxes.

- No. 135—For loud speaker or head phones \$1.00
- No. 136—For aerial and ground. \$1.00
- No. 137—For battery, antenna and ground in combinations as shown above \$2.50

Henger-Seltzer Co.

1111 Wall Street, Los Angeles
377 Brannan Street, San Francisco

Yaxley Manufacturing Co.

Dept. H, 9 So. Clinton St.
Chicago, Ill.

FIND NEW PLEASURE IN THE AIR!

BRING all of it in with your Radiola, Victor, Brunswick-Balke or Bosch—but to do this you need a Weston Convertible "Pin-Jack" Voltmeter with High Range Stand.

This is the most practical, double purpose voltmeter yet offered to the radio listener. Just plug the voltmeter in on the panel of your radio set, to regulate filament voltage and insure proper set operation.

Remove the voltmeter and plug it into the High Range Stand and you at once have a convenient portable high-range voltmeter for testing "B" Batteries and the circuits of your set. Other sets can be adapted to use this unique device by simply mounting filament pin-jacks on the panel—these pin-jacks are supplied with each instrument.

Ask an Expert's advice, ask your dealer, ask us to send you Bulletin "O" explaining the contribution the Weston 506 Convertible "Pin-Jack" Voltmeter can make to your radio.

Phone Garfield 6972

Electrad Certified By-Pass Condenser

Bring out the low notes in your amplifier and decrease distortion. Every condenser tested and certified electrically and mechanically. Has low power factor, low radio frequency resistance and negligible D. C. leakage. Preferred by experienced radio men—don't take substitutes!

Six Points of Perfec- tion

Uniform pressure, insured by rigid binding at six points prevents capacity changes. Mica insulation. Sheet copper, not tinfoil. Guaranteed to remain within 10% of calibration. Standard capacities, packed in sealed dust and moisture-proof packages, at prices ranging from 30c to 75c.

Breaking all Records

In addition to breaking all records for public preference, the Musselman Certified Radio Tube has always proved its ability to break all records as a distance getter, while at the same time bringing in the programs clear, strong and undistorted, and with remarkable volume.

The record-breaking achievement of the Musselman Certified Radio Tube in becoming established in so short a time as the standard of the world in tube quality was no mean accomplishment, but you are more interested in what these remarkable tubes will do in your set. So I suggest that you install them in competition with any other make of tubes, regardless of the price, and compare the results.

All Musselman Certified Radio Tubes are individually tested at the factory and a characteristic curve chart for each is enclosed in the carton. I guarantee this curve chart to be the correct reading for the tube with which it is enclosed.

NOW READY! THE NEW MUSSELMAN CERTIFIED "B" BATTERY

Musselman Certified "B" Batteries are manufactured in compliance with the recommendations of The United States Bureau of Standards and the leading radio engineers of the world, who have set an indisputable standard of measurement. These batteries are superior in quality, of full rating and are exceedingly long lived. They are the only Certified "B" Batteries backed by an unqualified guarantee.

Hale's "Californian"

\$98.50

R.T.O.
(Ready to Operate)

A Reason for Thanksgiving

—is Hale's Californian. It serves as an open sesame to that delightful realm—Radioland—with all its treasures of music and culture.

Another cause for thanksgiving is its price—well within the average household budget.

Become a Hale's "Californian" owner, if you like, by paying \$9.85 down and \$9.85 a month.

The price includes complete equipment—and free installation—within delivery radius of Hale's stores.
