BRYSTON

2B LP/3B ST - Power Amplifiers

Features (2B LP): front panel level control; power/clipping indicator, front panel headphone jack; ground lift switch; balanced inputs with gold plated XLR or 1/4" connectors; gold plated 5-way binding posts output connectors; < .01%THD; 20 year warranty.

Features (3B ST): power/clipping indicator; ground lift switch; balanced/unbalanced inputs with gold plated XLR/1/4" combination connectors; gold plated 5-way binding posts output connectors; < .01%THD; 20 year warranty.

RA100 - Power Amplifier

Features: front panel level controls; silent, convection cooling with large built-in heat sinks for silent operation; 0.05% THD; power-up delay; clip lights on each channel; unbalanced 1/4" inputs; 1/4" and push clip speaker connectors.

90-day warranty.

ASHLY

SRA-120 - Power Amplifier

Features: front panel level controls; front panel headphone jack; input sensitivity select switch; power-up delay; independent thermal protection; silent convection cooling; <.05% THD; 1/4" and barrier strip inputs; 5-way binding post output connectors. 5-year warranty.

CROWN

D75A/D45 - Power Amplifiers

Features (both models): detent, front panel level controls; power and distortion indicators; active balanced inputs with XLR/1/4" combination connectors; barrier strip output connectors; <.001% harmonic distortion @ full power. 3-year, no-fault warranty.

POWER BASE - Power Amplifiers

Features (all models): rear panel gain controls; fan cooled; dynamic output protection; input sensitivity switch; 1/4" balanced/unbalanced inputs; 5-way binding post output connectors; <.05% THD; 3-year, no-fault warranty.

MICRO TECH - Power Amplifiers

Features (all models): rear panel gain controls; stereo, bridged mono and parallel mono modes; balanced TRS inputs, binding post output connectors; 3-year no-fault warranty.

A NEW KING OF BROADCAST AMPLIFIERS HAS BEEN CROWNED

"My mixes start in the basement... That's where the bottom end lives. And then, all of a sudden like magic, the sun comes up and the top end is born. 'Hafler Amplifiers are Fat from the bottom up!'

Gary Lux
Recording Engineer/Producer

"At Spotted Peccary Studios, we have found no other amplifier that even comes close to the Hafler Transnova for its depth-of-field and definition, smoothness and clarity, and warmth and musicality. The Hafler Transnova is understatedly outstanding in a class of its own."

Howard Sivens
Spotted Peccary Studios

"Hafler Amps: More powerful than a 20 year old diaper!"

Carlene Scovill
with favorite producer, engineer, dad
Robert Scovill
MusicCanvas Studio, SAG Inc.
Eldon's Boy Records

"In a word, I am ready to qualify the P1000 as a best-buy amp in terms of audio quality. And no wonder. Designer Jim Strickland has condensed the wonderful sound of the larger transnova MOSFET amps (called trans•ana in this model) into a one-rack unit.

The little Hafler amp is wonderfully transparent and non-fatiguing. I tried it with all kinds of near fields: ported and acoustic suspension: single and dual-woofer alike - and it flattered them all.

I did have a few other bi-polar amps that I compared. Sure enough, the MOSFET Hafler was definitely easier on the ears at moderate-to-higher volumes over several hours of listening. The other amps made me want to turn them down over the long haul - even though the levels were the same.

Way to go Hafler. Your engineers have done it again in a smaller package."

John Gatski
Editor, Pro Audio Review, Sept. 1996

Lower Price!
Single rack space
Usable new features
State of the art surface mount construction
True audiophile sonic performance (not just a claim!)

### RDL

#### RU-UDA4/RU-BDA3 - Distribution Amplifiers

The RU-UDA4 is a compact 1/3 rack space unit featuring two channels, each with a single input to 4 outputs. Features: Inputs and outputs are unbalanced -10dBv with RCA connectors; unity gain is maintained on both channels; requires PS24A power supply (multiple units may be operated from one power supply).

The RU-BDA3 is a balanced I/O 1x3 DA. Features: front panel XLR connectors with an input gain control that can be adjusted with the hand or with a screwdriver; XLR input will accept either balanced or unbalanced sources; an alternate rear panel screw barrier input; inputs are 10 k ohm balanced bridging and outputs are 150 ohm balanced.

Both units can be mounted up to 3 across in a standard 19" rack. A RU Series 1x4 video DA is also available. RDL also offers more audio DA's in their Stick On Series (see page 74).

Everyone imagines being louder than their competition without causing listener fatigue. It’s no longer just a fantasy. With the new Aphex FM Pro, loudness doesn’t come at the cost of mind-numbing grunge and distortion any more. It took the genius of four existing patents, combined with five new inventions, to create the most powerful, greatest sounding processor ever.

- Engineers will love the ease of set-up and use, plus remote control and security features to keep unwanted hands off the controls.
- Program directors will love the complete flexibility to fashion truly unique processing for their particular programming and tastes.
- Station managers will love the increased loudness to grab listeners and the high audio quality to keep them tuned in.

It’s a no brainer - if you want loud without listener fatigue, call for a demonstration today.

APHEX SYSTEMS Improving the way the world sounds™
APHEX

2020 FM Pro - Digital FM Audio Processor

Inspired by the success of their Audiophile Air Chain, Aphex has created the FM Pro, a world-class, digitally controlled FM processor with modular and upgradable architecture. FM Pro was designed to offer maximum processing flexibility to help you create a truly unique and competitive sound, from detailed and neutral to heavy and loud.

Features: 8 read-only factory presets; 16 user programmable read-write presets; Frequency Discriminate Leveler with selectable silence gate and AGC upper and lower control limits; 4-band compressor with adjustable crossover frequencies, adjustable compression drive, Easyrider compression and Peak Accelerated Compression algorithm; Bass processor with bass clipper, warm bass EQ, sub bass EQ and total bass mix control; peak limiter; remote control interface with Windows compatible software for PC control locally or remotely via modem; supervised password security; Large LCD graphics panel display; rotary encoder knob; extensive real time LED metering; balanced XLR analog I/O. Options: 2020-1 AES/EBU I/O; 2020-2 pre-emphasis limiter with special 50 or 75 microsecond pre-emphasis filtering and non-overshoot lowpass filters; 2020-3 combination Digicoder type PPD stereo generator with the pre-emphasis limiter.

CRL

FM/AM AUDIO - Processing Systems

CRL FM and AM modular processing can be purchased as systems or as individual components. Both AM and FM systems are comprised of combinations of basic units including multiband AGC with noise reduction, multiband compressor/limiter/EQ, final peak limiter and stereo generator for FM and AM stereo applications. Ask a BSW representative to help you configure the system that best fits your technical and financial requirements.

Price Based On Configuration

AMIGO - FM & AM Stereo Processors

CRL's Amigo audio processing systems combine the best of CRL technology into a complete, economical and compact package that is easy to use.

Features: (Amigo FM) dual band AGC followed by a variable pre-emphasis multiband limiter and a digitally synthesized stereo generator; balanced barrier strip audio input and AUX output; BNC composite output.

Features: (Amigo AM) complete processing for C-QUAM AM stereo; fully mono compatible; dual band AGC; 3-band stereo matrix limiter; single channel limiter; NRSC output filters; balanced barrier strip I/O.

168A - Dynamics Processor
The 168A is a dual channel unit that offers smooth, inaudible AGC leveling and/or more aggressive, dense sounding compression. These characteristics make the 168A perfect for use as a preprocessor for final peak limiters or as the head end to your STL system. Features: compressor; feed forward de-esser; high and low frequency spectral enhancement; silence gate; output level control; high resolution gain reduction and peak output metering; hardwire bypass; floating balanced XLR I/O.

168A Mfr. List $999.95 Call For BSW Price

INOVONICS

716-00 DAVID II - Integrated FM Audio Processor
The DAVID II integrates FM audio processing and stereo generation into a single, easy to use and affordable package. The David II lets you achieve an "aggressive" sound that is fully protected from overmodulation without sacrificing ease of setup. Features: comprehensive audio processing section including low-pass filtering, pre-emphasis, AGC, compression/ limiting; composite clipping; "bass-enhance"; BNC input to accommodate SCA or RDS subcarriers; balanced screw binding audio inputs; BNC composite output.

716-00 DAVID II Mfr. List $1,985.00 Call For BSW Price

MODULATION SCIENCES

CP803 - Composite Processor
Sharpen your competitive edge by adding the CP803 to your compressor/limiter/stereo generator to enhance the stereo composite signal. Increase your signal by 6 dB with greater dynamic range without the breathing, pumping or swishing associated with conventional processing. BNC composite I/O.

CP803 Mfr. List $1,495.00 Call For BSW Price

222-00 - AM NRSC Processor
The 222-00 can act as a stand alone processor, or interface with existing processing to provide an NRSC compliant audio signal for AM broadcasting. Features: adaptive pre-emphasis characteristic to enhance signal intelligibility and presence; a sharp roll-off to eliminate adjacent channel interference; built-in peak limiter; balanced screw barrier I/O.

222-00 Mfr. List $620.00 Call For BSW Price

CUTTING EDGE

DIVIDEND - FM Composite Filter
The Dividend reduces noise in the upper composite spectrum from 53 kHz to 99 kHz. That noise is often generated by audio processing and STLs. By installing the Dividend, stations can achieve a noise floor of greater than -60 dB. This provides a clean SCA environment for the most demanding subcarriers. Great for stations that use FM subcarriers for (RBDS/RDS), microwave STLs, composite clipping, or want to regain lost modulation, or reduce multipath related distortion. BNC composite I/O.

DIVIDEND Mfr. List $1,195.00 Call For BSW Price

SCA186 - Sidekick Subcarrier Generator
All you need for SCA in a single chassis. Contains subcarrier generator, audio processing, peak holding deviation meter, noise generator and incidental AM noise meter to optimize transmitter tuning for minimum cross talk. Available at 67 kHz or 92 kHz. Balanced screw barrier inputs; BNC composite input; BNC telemetry input; BNC RF input; BNC composite output; BNC SCA output.

SCA186 Mfr. List $3,835.00 Call For BSW Price

QEI

710A - Digital FM Stereo Generator
The 710A accepts any analog input or AES/EBU input with sample rates from 12 kHz to 56 kHz and generates a stereo signal with superior clarity, separation and high frequency definition. Features: 24 bit DSP internal processing and 18 bit D/A output conversion; MPX composite test output; audio failure alarm output; remote control of audio source selection and pre-emphasis. Balanced XLR analog inputs; AES/EBU XLR digital input; unbalanced BNC subcarrier inputs; unbalanced BNC composite outputs

It's loud.

It's cheap.

It's 100% digital.

Best of all, it's an OPTIMOD-FM.

Introducing the OPTIMOD-FM 2200, the most affordable digital FM processor in the world. Now any station can enjoy the benefits of true digital processing: precision, stability, set-it-and-forget-it simplicity, and clean sound. And with features such as two-band processing, protection limiting, factory and user presets, and digital stereo encoder, your sound goes out over the airwaves loud, clear and distinctly your own.

For years only stations with big budgets could benefit from digital processing. But now the undisputed worldwide leader in digital audio processing is giving smaller stations a competitive edge. The OPTIMOD-FM 2200 digital processor. It's about time.
ORBAN

8200 OPTIMOD™ - Digital Audio Processor
The 8200 is a complete digital audio processing system for FM broadcast, fulfilling all of your station’s processing needs: automatic gain control, compression, peak modulation control and stereo generation.

Features: flexible software based processing; select from several factory presets or adjust and store your own custom presets (up to 32) for instant recall; two basic configurations available: as a two-band processor for transmitter protection with minimal processing or as a five-band processor for more comprehensive modulation control; fully expandable to incorporate future software upgrades and processing structures; automatic program switching can be programmed into the internal clock to follow format changes throughout the day or night; 8200PC Software (included with purchase of 8200) provides broadcasters with full control of a station’s processing from any location. It displays all of the 8200’s meters and processing controls on a computer screen via modem communications or direct connection. Balanced XLR I/O and BNC composite outputs.

Options: the 82000/32 basic digital interface card allowing 32 kHz AES/EBU inputs and outputs; the 8200D/SRC digital interface card which can accept inputs of 32, 44.1 or 48 kHz AES/EBU and convert for output of 32, 44.1 or 48 kHz AES/EBU.

AVA22 - Audio/Video Alignment Delay

The AVA22 provides a cost-effective solution to the problem of aligning audio to video in broadcast. Modern video processing and satellite links can create time delays between audio and video of up to several frames. The AVA 22 has a maximum delay of 9.5 NTSC (8.0 PAL/SECAM) frames and can operate as a stereo unit or as two independent mono channels. Balanced XLR I/O.

AVA22  Mfr. List $799.00  Call For BSW Price

MODULATION SCIENCES

STEREOMAXXX - Spatial Enhancer

Almost all air chain processors work to increase loudness. StereoMaxx makes your station sound bigger, not just louder. Works with all on-air audio processing units. Balanced XLR I/O.

STEREOMAXX  Mfr. List $2,889.00  Call For BSW Price

ORBAN

222A - Spatial Enhancer

The Orban 222A stereo spatial enhancer detects and enhances psychoacoustic directional cues to give your station enhanced stereo imaging. The 222A accomplishes this with no increase in FM multipath distortion, unnatural reverberation, or sensitivity to vertical tracing distortion. Balanced XLR and barrier strip I/O.

222A  Mfr. List $975.00  Call For BSW Price

275A - Stereo Synthesizer

The Orban 275A stereo synthesizer automatically detects mono signals and blends to mono-compatible synthesized stereo. Includes auto-polarity detector/corrector and single-ended noise reduction. Electronically balanced barrier strip inputs and outputs.

**1066 - Compressor/Limiter/Gate**

This flexible dynamics control device allows you to choose the level and style of compression/limiting you like. Use the "Auto" button to automatically achieve a classic "dbx" sound, or use the independent attack and release controls to tailor the 1066 to your specific needs.

Features:
- PeakStopPlus™ circuitry offers stiff limiting without unwanted side effects;
- New lightpipe technology replaces standard LEDs making the 1066 both very easy to read and operate;
- Side chain input for ducking and frequency dependent limiting;
- Balanced inputs and outputs with XLR and 1/4" connectors.

**1066**

**MARANTZ**

**PMD SERIES - Portable Cassette Recorders**

Without a doubt, Marantz makes the most popular portable cassette recorders used in broadcast, with 5 models to choose from to match your application. PMD200 Series Features: 7 1/2 hours of continuous recording on 3 "D" size batteries (AC power supply included); modular telephone jack for direct telephone recording and playback; switchable limiter; built-in electret condenser microphone and monitor speaker; Vari-speed; 3-position mic attenuation; line input and output jacks; cue and review; volume and tone control; automatic or manual record level. The PMD201 is a mono 2 head machine. Both the PMD221 and PMD222 feature 3 heads for confidence monitoring. PMD222 features an XLR mic input.

The PMD101 is a slightly scaled down version of PMD201, yet it offers all of the necessary features of a great professional field recorder. Features: built-in speaker, electret condenser mic, normal or 1/2 speed operation, ±20% pitch control on playback; external mic input, line in/out; a sturdy metal chassis. Does not include a VU meter, the RJ11 output jack and adjustable mic level (utilizes built-in AGC). AC adaptor must be ordered separately with the PMD101.

The PMD430 is a high-quality stereo recorder similar to the 200 Series models.

Then look at our competition. Of course many stations are cost-conscious these days—just remember why you wanted a new console in the first place: to upgrade.

The R-60 has what's needed, with all the right features: our SIMPLE PHONE® module for easy error-free talk segments; twin six bank preselectors, so you won't run out of input capacity; onboard machine control panel, clock, timer, a well-designed cue system, and a truly effective control room and studio monitor interface. And because it's totally modular, service is easy—even while you're on-the-air! Documentation: this can determine whether you have an installation day or an installation week. We've done it right to guide you through. And performance? Of course we've handled that; simply compare our specs.

Don't miss your opportunity to upgrade. Choose the R-60 radio console from AUDIOARTS.

**MX SERIES - Audio Console**

True modularity, superior flexibility and low cost give Fidelipac's MX Series consoles real value for the dollar. MXR consoles are available with 6, 8, 10, or 12 rotary faders. MXL consoles offer 6, 8, 10, or 12 linear faders mounted three inches apart. MXE consoles permit 10, 12, 14, 16, or 18 linear faders mounted two inches apart.

**Features:** Fully modular input modules with precision motherboard construction offer durability and flexibility. Every input module has two inputs that can be wired for mono or stereo. The "A" side of any input module can be fitted with an optional mic preamp (one included standard). Line inputs can be wired for consumer or pro level, eliminating the need for outboard matching units. Additional features include VCA mixer and monitor control; two input expansion switches; four assignable outputs-two mono plus two stereo; remote start logic; count-up event timer; built-in cue amp/speaker and headphone amp; all steel construction; excellent RF immunity; and virtually indestructible control surfaces.

**Prices Range From $3,270.00 to $8,210.00 Mfr. List**

Logitek

**SERIAL SOUND - Digital Air Console System**

More than a fixed console, the Serial Sound is a digital mixing system consisting of the control surface (pictured) and a rack mount audio processing unit. Two control surfaces can be connected to the audio processor at the same time. This allows the Serial Sound to act as two separate consoles or one large one. There is also provision for external computer control for automation etc. Features: 32-bit DSP audio processing with 16-bit control processing; control surfaces feature ten 100mm sliders, each with a 16 character LCD display showing the selected signal source; assign multiple inputs to sliders in any configuration; up to 64 mono inputs and 64 mono outputs or 32 stereo inputs and outputs are available depending on the number of I/O cards purchased (8 inputs and outputs per card - up to 8 cards); digital or analog audio I/O cards available; sophisticated control of external devices possible via channel On/Off buttons and optional computer control; flexible multiple bus assignment; cue bus with built-in amp and speaker; flexible multiple source monitoring section; built-in multifunction clock/timer; 25-LED VU bargraph meters for Program and Audition.

**Dimensions:** (control surface) 29"W x 16"D x 6"H; (rack mount audio processor) 6RU high x 14"D.

**Prices Range From $4,595.00 to $7,295.00 Mfr. List**

SOUNDCRAFT

Modular consoles, available in three mainframe sizes, operate on voltages between 90V and 240V, 50-60Hz. Features: mono mic/line, stereo and telephone input modules; channel on/off and control/status logic; stereo program, stereo audition, mix-minus and mono output busses; standard meter bridge includes a pair of VU meters; deluxe meter bridge adds a digital timer and internal cue speaker; standard packages shown below include 1 or 2 mono modules, a telephone module and the balance in stereo line modules. The 12 and 20 channel standard packages feature the deluxe meter bridge. Custom loading available. Dimensions: (170STD) 17"W; (1701STD) 22.7"W; (172STD) 33.6"W x 9.68"H x 17.2"D.

**Prices Based On Configuration**
MR-40 - Audio Consoles
The MR-40 has features that allow it to function as a multitrack production board and double as a secondary on-air board. Features: 4-track bus assign for your tape recorder or digital workstation; program assign so you can transfer direct to your 2-track or go right on-air; mono mic/line and stereo line inputs; channel on/off with machine control; defeatable 3-band equalizer on input channels; dedicated 4-track monitor section; studio/control room monitor section with talkback; cue on inputs, subgroups and stereo module; studio muting and tally functions; cue speaker and amp; metering for 4 subgroups and stereo program. Dimensions: 29.5"W x 7.75"H x 22"D. Options: 5-input stereo source selector; tape control modules; custom engraved off buttons; color fader knobs.

SR SERIES - Audio Consoles
Mackie's SR consoles offer durability and quality in a flexible 4-bus format that is suitable for both recording and sound reinforcement. Features: ultra-high headroom/ultra-low noise performance; rigid steel chassis, super heavy-duty knobs and horizontal fiberglass circuit board with brass standoffs ensure bulletproof reliability; wide bandwidth mic preamps; accurate, logarithmic input filter; unique ultra-high frequency EQ enhancer on sub groups; 6 AUX sends (4 can be pre or post fader); pre and post fader listen (cue); special level setting function in solo (cue) mode; flexible control room and tape monitoring; talkback facilities; balanced mic and line inputs (XLR and TRS); balanced TRS AUX outputs; balanced TRS and XLR main stereo outputs. Dimensions: (SR24-4) 31"W; (SR32-4) 41.4"W x 6"H x 19.2"D. Options: Mixer stand (Quik Lok ZM2025 for SR24-4, ZM2034 for SR32-4) see page 122.

LM3204 - Audio Mixer
Mackie's LM-3204 packs more inputs into less rack real estate for less money than ever before - sixteen stereo (16x2) line inputs plus four stereo (4x2) AUX returns, for a total of 40 inputs in only 5 rack spaces! Features: luxurious headroom; unity gain structure; +4dBu internal operating levels; intuitive layout; 3-band EQ; two of Mackie's famous studio grade mic preamps with input trim that can be patched to any of the 16 channels; separate monitor/control room out with level control; unique Mute/Alt 3/4 feature mutes a channel input and reroutes it to the Alt 3-4 outputs creating an additional stereo mix; switch for sending AUX return 4 to monitor mix only (for listening to external cue sources or hearing a pre-program mix with effects). Dimensions: 19"W x 8.73"H (5 RU) x 9.66" D. Options: LM3204E 16 channel mixer expander.
**MACKIE DESIGNS**

**CR1604VLZ - Audio Mixer**

The latest rendition of the mixer that started the Mackie craze, now with VLZ architecture for optimum audio performance. Features: 16 mic/line inputs with Mackie's famous preamps with 60dB of gain and a virtual 10dB pad to handle a wide range of input signals; accurate 60mm log-taper pots; 3-band EQ with swept mids and low-cut filter; 6 AUX sends (AUX 1&2 are switchable pre/post fader); PFL & AFL (solo) button; channel mute; switchable low cut filter; true 4-bus design with subgroup and stereo bus assign; a handy effects-to-monitor switch lets you blend effects back into the AUX bus for monitors; control room/headphone monitor section with source matrix for monitoring tape, sub 1&2, sub 3&4 and main mix; unique 5-way physical configuration with rotating input/output pod; balanced XLR outputs. Dimensions: 19"W, Height ranges from 4.9" to 9.3" depending on I/O pod configuration, depth 12.8" with I/O jacks extending behind mixer, 17.9" with I/O pod facing up or toward the top of the mixer. Options: RP1604VLZ rack adapter for roto pod; Mixermixer lets you combine up to 12 outputs from any 3 mixers.

**MS1202VLZ - Audio Mixer**

This second generation mixer is built around Mackie's VLZ architecture used in Mackie's acclaimed 8-Bus consoles, offering performance that's dead quiet with absolute minimum crosstalk. Features: 4 mic inputs with Mackie's famous high-gain preamps; 4 stereo line inputs; 2 AUX sends and returns; AUX1 can be selected for pre, or post fader; 3-band EQ; PFL (solo) button; Mute/ALT 3-4 Bus feature allows you to mute the audio of a given channel from appearing in the main mix and route the signal to a stereo ALT output. This can be used for a cue bus or to create a separate stereo mix. The first 4 channels offer 60dB of gain with a virtual 10dB pad to handle a wide range of input signals; switchable low cut filter (channels 1-4); a handy EFX-to-monitor switch lets you blend effects back into the AUX1 bus for monitors; separate control room and headphone sections offer more monitoring flexibility; balanced XLR outputs. Dimensions: 11.8"W x 3.3"H x 11.2"D. Options: RM1202-VLZ rack ears; KEB22 carrying bag.

**SOUNDCRAFT**

**DELTA/K1 SERIES - Audio Consoles**

Soundcraft Delta Series consoles represent the ultimate in audio performance and styling, drawing their heritage from the famed British console tradition. Whether your field of focus is radio/TV broadcasting, music performance/production or video/post, Soundcraft has a model to fit your application. The K1 is the affordable, 4-bus live mixing board in 8, 16, 24 and 32 channel versions with modular input section and fixed output section. Delta DLX is the popular 4-bus, fully modular recording console also in 8, 16, 24 and 32 channel versions. Delta AVE is designed specifically for audio for video editing and interfaces with virtually any type of edit controller. Call a BSW representative for more complete information and pricing.

MS1202-VLZ 12x2 • 4 MIC PREAMPS

Both models have:
- Studio-grade mic preamps with discrete circuitry for high headroom low noise (~129.5 dBm E.L.N.) and wide frequency response (over \(30\,\text{kHz}\)).
- Low cut filters (12dB/oct. @75Hz) on mono mic/line channels allow use of low-frequency EQ on vocals without boosting room rumble, mic thumps, P-pops and wind noise.
- Trim Controls on mono channels have 60dB total gain range for boosting weak sound sources and a 1/4dB "virtual pad" for taming hot digital multitrack outputs.
- 2 Aux Sends per channel (one globally switchable pre/post, one post-fader), each with 15dB of gain above Unity to boost weak effects.
- 3-band equalization with 12kHz High shelving EQ, broadband musical 2.5kHz peaking Midrange & 80Hz Low shelving EQ.
- Constant loudness pan controls.
- Stereo in-place Solo.
- Mute button routes signal to "bonus" Alt 3-4 stereo bus outputs & Control Room monitor. Handy for both recording and live applications.
- MS1402-VLZ only: 60mm logarithmic-taper faders based on our exclusive 8Bus design. Long-wearing wiper material and tight polymer lip seals to protect against dust & other crud.
- Built-in power supplies — no outlet-eating wall warts or hum-inducing line lumps.
- Phantom power so you can use high quality condenser microphones.
- XLR outputs with mic/line level switch (along with 1/4" TRS outputs on top panel).

MS1402-VLZ 14x2 • 6 MIC PREAMPS

Both models have:
- Radio Frequency Interference protection via metal jacks & washers plus internal shunting capacitors.
- High-output headphone amp can drive virtually any set of phones to levels even a drummer can appreciate.
- Aux 1 Master level control & pre/post switch.
- Effects Return to Monitor switch folds Aux 1 return effects into a stage monitor mix via Aux 1 Return 2 level control.
- RCA-type tape inputs & outputs.
- Peak-reading LED meters with Level Set LED combined with In-Place Solo allows fast, accurate setting of channel operating levels for maximum headroom and lowest noise floor.
- Control Room/Phones Matrix adds monitoring, middown & metering flexibility. Select any combination of Main Mix, Tape In and Alt 3-4 signals for routing to phones, Control Room outputs and meters. Can be used as extra monitor or headphone mix, tape monitor, or separate submix. Way cool.
- Tape Assign To Main Mix assigns unbalanced RCA tape inputs to main mix. Besides its obvious use as a tape monitor, it can also add an extra stereo tape or CD feed into a mix or submix during a break.
- MS1402-VLZ only: Global Solo Mode selects PFL or AFL solo modes.
- Solid steel chassis & thick fiberglass internal circuit boards resist abuse.
- Channel inserts on mono channels.

VLZ MicroSeries: Small Mixers With What It Takes to Handle Serious Projects.

Not every production project requires dozens of input channels and busses of buses. But doing ANY audio job well requires a mixer with superb specs...and the right combination of useful features.

Our MicroSeries 1202-VLZ and 1402-VLZ might have small footprints, but when it comes to performance, they walk very tall.

Since both are basically chips off our blockbuster 8Bus Series consoles, they have big-board specs:

- Greater than 90dB signal to noise ratio, less than 0.005% distortion, more dynamic range than compact discs and frequency response that's only down 1dB at 60,000 Hz.

Why own an imitation when you can own the brand of compact mixer that serious pros prefer. Call for info today.
SPIRIT

RW5347 FOLIO SX - Audio Console

Here's a portable mixer with plenty of inputs for even complex mixes in the field. Features: 12 mono mic/line input channels; 4 stereo line inputs (unbalanced RCA and balanced TRS) 3-band EQ with swept mids on mono channels; 3 AUX sends on all input channels (1 pre, 1 post, and 1 pre/post switchable); 3 AUX returns; stereo main and sub mix buses; 100mm faders on all input channels; PFL (cue) on all input channels; insert points on all channels; switchable pre/post direct outs on channels 1-8; dedicated 2-track input; TRS balanced group and main outputs. Dimensions: 18.9"W x 20.2"D x 2.8"H.

HENRY ENGINEERING

STEREOMIXER - Utility Mixer
Features: 8 line level inputs (4 stereo or 8 mono); bridging inputs accept a balanced or unbalanced source; stereo and mono balanced outputs; individual input level adjustment; L/R bus input for linking multiple units; 115/230 VAC, 50/60 Hz; all connections via barrier strip terminals.

MICROMIXER - Utility Mixer
This four-input, two-out stereo utility mixer is the same size as the popular Matchbox. Features: balanced and bridging inputs; individual input level controls; each input is separately assignable to the left, right, or both outputs; balanced stereo outputs will drive a 600 ohm load to +25 dBm; all connections via barrier strip terminals.

INTELIX

8002MCB - Mic/Line Mixer
This high-quality mixer was designed for professional use for broadcast, sound reinforcement and recording applications. Features: 8 balanced mic/line inputs with rear panel 40dB variable gain/trim control for level matching; additional AUX line level input can be used to link multiple units; switchable phantom power; low cut input filter; compressor limiter with threshold and ratio controls; dual output bus configuration allows for configurations such as mix minus and cueing; multi-color LED bar graph indicates peak or average output levels for either the main or AUX bus; balanced XLR inputs and outputs.

RANE

SM26B - Splitter/Mixer
Here is an extremely versatile, single rack space mixing tool that can act as a 8-in/2-out line mixer, a 2-in/6-out line splitter or a 6-in/6-out booster amp. Features: 6 balanced inputs can be panned between two main outputs; 6 mono outputs can be fed with any mix of the separate L and R inputs; front panel mix/pan and level controls for each channel; balanced TRS inputs and outputs.

RDL

RUMX5 - Mic/Line Mixer
This compact, 5-channel mixer is only 1/3 rack space wide. Features: 5 balanced/unbalanced main inputs (4-mic/line, 1-line only); a mix input for combining multiple mixers; balanced mic or line output; LED level indicators (-20, 0, +5); phantom power (jumper selectable); connections are via barrier strip; flexible mounting options available. For RDL stick on mixers see page 74.

SHURE

FP410 - Automatic Microphone Mixer
Now you can operate a multiple mic mix with ease with the FP410. Patented IntelliMix technology allows for smooth mixes by activating mics for speech, but not constant room noise, and automatically turning down unused mics. Features: limits the number of activated mics to one per talker; keeps most recently activated mic open until a newly activated mic takes its place; phantom powering; linking capability (up to 25 Mixers); manual or automatic modes; AC or battery operation; 4 balanced XLR mic/line inputs; 2 balanced mic/line outputs; rack mount ears and link cable included.

FP42 - Portable Stereo Mixer
Basically a stereo version of the famous M267. Features: 4 balanced mic/line inputs, balanced L/R outputs; pull-pot cueing on all input channels; low-cut filters; mono/stereo switch; mix bus for linking units; headphone amp; tone oscillator; switchable limiter; phantom power; dual VU meters; AC or battery power; XLR/O connections (mix input RCA); Options: A16R rack panel.

**M367 - Microphone Mixers**

The M367 is a very rugged and quiet compact mixer in the tradition of the M267. Features:
- 6 balanced mic/line inputs
- Phantom power
- Input peak LEDs
- Balanced, 2-position mix bus
- Switchable output peak/limiter with adjustable threshold and limiter LED
- Illuminated battery/AC/VU meter and program monitor input selector
- All-metal chassis (same size as the M267)
- Detachable power cord
- Easy-access side battery compartment
- Headphone monitor circuit

Options: A367R rack panel.

**RW5197 PRO TRACKER - Audio Mixer**

The Pro Tracker was designed to provide a compact (3 RU high) mixing system for use with modular digital multitrack recorders, providing the most clean, most direct signal to the recorder as possible. These qualities also make it an ideal mixer for remote sports trucks, digital audio workstations or digital multitracks.

Features:
- High-gain mic preamps (-129dBu EIN) available on each of the 8 input channels
- 8 independent line level inputs
- 60mm faders
- A 100 Hz high pass filter
- A fast action limiter with adjustable threshold
- Pre fader listen (cue) on each channel
- Switchable pre/post fader AUX send on each channel
- Channel insert returns can be switched between monitor and channel paths
- Mix to 7/8 switch allows 6 unmixed channels to be bounced down to channels 7 and 8 on the same 8-track machine
- A comprehensive headphone system allows monitoring of the dedicated 2-track inputs, the AUX buss, mix 7&8 or the main stereo mix
- 100-240 volt universal power supply
- Cascade expansion jacks
- Balanced/unbalanced inputs (mic XLR, line TRS)
- Balanced XLR and unbalanced RCA main outs

SONY

All Pro.

Sony's exclusive Super Bit Mapping recording function delivers sonic quality close to that of a 20-bit recording on an industry standard 16-bit tape, resulting in superior sound resolution with added clarity and a richer, more vivid audio performance.

Set-Up Menu provides multiple menu modes for convenient set-up of recording preferences.

Four direct-drive motors on the head drum, capstan, supply reel and take-up reel work together, resulting in better tracking, lower error rate, longer motor and tape life, and faster, smoother high speed cueing and shuttling.

An extensive selection of Audio Interface Options meet a wide, flexible range of application needs.

Independent Channel 1/Channel 2 recording level volume controls.

The handy Jog/Shuttle Dial fast forwards and rewinds for easy system operation and conveniently locates the AMS/Program Number.

No Cons.

The Sony PCM-R500 DAT Recorder has all the pros a pro could want. Powered with four direct-drive motors, the PCM-R500 is built for durability and reliability. And with Sony's unique, Super Bit Mapping technology, it delivers the audio quality of a 20-bit signal, but is compatible with the 16-bit DAT industry standard. It's the pro DAT recorder no professional should be without.

360 SYSTEMS

INSTANT-REPLAY - Hard Disk Player

- 1,000 Cut Library
- Up To 16 Hour Audio Storage
- Map 500 Cuts To Hot Keys For Instant Access
- Stereo 16-Bit Digital Audio Quality
- Playlisting
- Analog And Digital I/O
- Printer Output For Library Hard Copy

The Instant-Replay (DR550) is a fully professional quality digital audio hard disk recorder/player. It maps individual recordings to 50 "Hot-Key" buttons, providing instant access to a very large library of recordings. Unlike electronic music samplers that only allow short "snapshots", Instant Replay stores hundreds of cuts ranging from a few seconds to almost unlimited duration. Like other 360 Systems products, Instant Replay offers powerful playback options that place it miles ahead of analog cart and tape machines.

Features: stores up to 1,000 audio cuts of various lengths on it's internal hard disk; records with a "start on audio" feature for tight starts; recorded cuts becomes part of a well-managed library so they are easy to find again; find a cut by typing its name or ID number, or, if it has been assigned to one of the 50 Hot-Kays, just hit its associated key for absolute instant access; library is divided up into ten "banks" into which you can sort spots, sound effects, music, etc. Each bank can be a group of recordings for a particular air shift, production project, etc. 50 cuts from each bank can have their own Hot-Key assignments for a total of 500 cuts mapped to Hot-Key's at any given time; printer port allows hard-copy listings to be output on standard "parallel input" printers. Printed data includes the cuts, ID numbers and playing time for each cut. Print options include listing the cuts within each bank, the entire disk, or the contents of each playlist; built-in D-NET File Transfer Network capability lets you transfer audio files, including the cut names and running times, between DigiCart/lls, Shortcuts and other Instant Replays.

Play Back Features: simply press a Hot-Key to play a cut; audio starts instantly; when the cut is finished the audio is instantly re-cued; jump from one cut to another with completely seamless transitions; Instant Replay will play the effect instantly every time the button is pushed, making it ideal for a number of live situations and for producing special effects; audio cuts can be selected as part of a playlist for sequential playback; different playlists can be stored for each of the ten banks, and can be recalled for playback or editing at any time; looping function causes a cut to continuously and seamlessly play back; pause function interrupts playback and can be resumed noiselessly and instantaneously; a preview button that lets you listen to a cut through the headphone jack without sending audio to the main outputs; balanced XLR analog I/O; AES/EBU digital I/O. Options: padded gig bag with side pocket.

360 SYSTEMS

SHORT/CUT - Personal Audio Editor

- Replaces Reel To Reel
- One Button Instant Recording
- Extremely Fast Editing
- Dedicated Function Keys
- Great For Actualities, Phone-ins, Voice Overs
- Analog And Digital I/O
- D-NET Transfer Network Compatible

Shortcut is a stereo editor designed to replace two-track reel-to-reel tape machines for fast editing and production of single or dual channel audio information. It offers all the features you'll need to capture and edit audio for talk radio, call-in clips, news actualities, promos and spots. Most importantly, you'll get results in record time.

Features: all common functions are associated with a dedicated button so you don't spend your time wading through multiple menus; buttons are grouped together in logical layouts for fast one-hand operation; instant record feature allows you to immediately capture incoming audio when you hit the record button, no matter what mode you've been working in; recording goes directly to the internal hard disk so all audio is "on-line" for immediate access; select cuts for playback by simply typing the cut name on the keyboard, or for even quicker access; assign a cut to one of the 10 Hot-Kays; a large scrub wheel emulates reel-rocking on tape recorder, right down to the sound; the typewriter-style keyboard is convenient for adding titles and finding cuts; 10 Hot-Kays can store frequently used cuts or acts as extra "clipboards" for saving bits during editing; 10 function keys provide easy access to file management and preference menus; zoom in and zoom out buttons are conveniently located directly under the display; the mark button identifies segments for later editing, or highlights "keeper" cuts (up to 500 markers per cut); edit in and edit out buttons act like a digital grease pencil for marking edit points; a unique "bleep" button overwrites obscenities with a tone or with a custom sound you've created; edit and solo buttons isolate a single channel for editing; the high resolution, backlit display shows big waveforms with details as small as a few milliseconds—or an entire sentence at a glance; weighing only 12 pounds, the Shortcut makes a very portable workstation, and with built-in speakers, headphone amp and a mic level input, you can produce final edited recordings out in the field; built-in D-NET File Transfer Network capability lets you transfer audio files, including the cut names and running times between DigiCart/lls, Instant Replays and other Shortcuts; balanced XLR analog I/O (left channel input is switchable mic/line level); AES/EBU digital I/O. Options: padded gig bag with side pocket.

** DN80R - Portable MiniDisc Recorder/Player **

The DN-80R, Denon's portable MD recorder/player, is a compact, rugged MD recorder designed for life on the road. Features: housed in a rigid aluminum case, it utilizes a highly effective vibration-absorbing design with pickup mechanism suspension dampers to ensure great recordings under adverse conditions; the PRE-UTOC function allows you to recover audio from recordings that were terminated due to loss of power etc.; 16 megabit RAM buffer memory (equivalent to 40 sec. stereo signal) helps prevent dropouts; instant recording that begins the moment the record button is pushed; recordings up to 148 minutes on a single disc in mono mode; built-in speaker with volume control; AC or Battery operation; ACD-19 control software for track editing from your lap-top computer and many of the record/edit functions found in Denon's studio models; switchable XLR mic/line level inputs with switchable mic attenuation; AES/EBU and IEC-958 digital I/O.

** DN1100R - MiniDisc Recorder/Player **

The rapid-fire playback characteristics of the DN-1100R MD Recorder make it an excellent choice for fast paced live on-air work and productions, or in sports arenas and theaters where instant playback is required. Features: 10 Hot Start buttons provide instant start of any 10 tracks that you preassign. Each button will start audio the moment it is touched even if another cut is playing; a 25-pin port allows you to remote control all of the Hot Start buttons with an optional Hot Start control box; cue to music; Denon's famous track select knob; switchable EOM indication; fader start; fade in function and much more; balanced XLR and unbalanced RCA analog I/O. RCA coaxial digital input.

** DN045R - MiniDisc Replicator **

This unique machine performs digital-to-digital MD dubs, bypassing the ATRAC compression circuit, preserving the high quality sound of the original MD. Features: automatically defragments data from a fragmented disc so the dubbed copy will have a single, uninterrupted string of data on it (Repeated editing on a MiniDisc causes data for each track to be fragmented over the disc, making it less efficient); dubs can be made up to 3.5 times faster than real time; Windows' software is provided to allow MDs to be edited during replication through the RS-422A/232C serial interface board. Note: this machine does not record from an external audio source. Internal dubbing only.

**The First Name In Digital, The First Family In MiniDisc**

The first name in digital, Denon has also become the premier manufacturer of MiniDisc products for broadcast and post production applications. Even the most demanding tasks of repetitive audio required by fixed installations are made easy and reliable with MiniDisc. Denon not only offers the most comprehensive line of MiniDisc products; they are totally committed to the further development of MD technology.

The MiniDisc format has proved to be the most convenient and reliable medium available. MD can literally be used millions of times without any signal degradation. The sonic quality is equal to Compact Disc and immensely superior to celluloid, while offering unsurpassed portability.

More and more digital audio users are turning to MD for archival purposes.

From recording and replication to MD Carts and ENG MD recorders, Denon has a full family of products to integrate MiniDisc technology quickly and economically. Contact your favorite distributor and find out why Denon is the first family in MiniDisc.

**DN-80R Portable MD Recorder**

The DN-80R is the most advanced ENG recorder on the market, allowing up to 148 minutes recording time in mono and 74 minutes in stereo, per disc. The portable unit provides broadcast-quality microphone and interview recording with a 40 second memory buffer; further time-saving production features include field editing on a single disc. A standard 23-day video camera battery provides maximum power for a full 48 minutes.

**DN-1100R MD Recorder**

The DN-1100R MD recorder offers 74 minutes of stereo recording time with a 44.1 kHz sampling rate 16-bit linear (A/D converter) quantization and ATRAC compression. The unit also features 10 independent "Hot Start" buttons to which any 10 tracks from a total of 255 can be assigned. This feature is ideal for sound effects libraries, sound bytes and announcements.

**DN-045R MD Replicator**

The DN-045R MD replicator performs exact digital-to-digital dubbing up to 2.5 times faster than real-time without the cascade of ATRAC compression. The included Windows™ software also allows fool-proof editing during replication.

IN THE PROFESSIONAL MINIDISC MARKET, THERE ARE THE HAVES.
AND THE HAVE-MORES.

Allow us to state the obvious. The new MDS-B5 Digital Pro MiniDisc Recorder/Player has more high-end features than any other MiniDisc cart available today. And they all come standard, not as costly options. The MDS-B5 is the smart choice for radio, television, theater, and other applications requiring professional sound quality. Its flexibility and easy operation make it ideal for sound effects, commercial messages and station promos. And high speed disc cloning is perfect for program distribution or safety back-ups.

When you're looking at professional MiniDisc carts, remember the MDS-B5 doesn't just have what you need. It has more.

**ADAT XT - Digital Audio Recorder**

The ADAT format has become a world standard for compact digital multitrack recording with several thousands of units installed to date. The ADAT XT is the newest generation ADAT, keeping the ease of use and great sound the original ADAT is known for and adding even better performance and more flexibility. Features: up to four times faster than the original ADAT with intelligent software controlled tape transport; track copy feature lets you clone any track (or group of tracks) and copy it to any track (or group of tracks) on the same machine; using two or more ADAT-XTs and the tape offset feature, you can copy and paste not only from track to track, but from location to location; improved audio performance is the result of the latest ultrahigh fidelity 18-bit, 128 times oversampling A/D converters; onboard 10-point autolocation system with auto record, automated punch in/out; comprehensive vacuum fluorescent display; balanced analog I/O via 56-pin ELCO connector; unbalanced RCA analog I/O (x8); optical digital I/O.

Features:
- Up to four times faster than the original ADAT
- Intelligent software controlled tape transport
- Track copy feature
- Autolocation system with auto record, automated punch in/out
- Comprehensive vacuum fluorescent display
- Balanced analog I/O via 56-pin ELCO connector
- Unbalanced RCA analog I/O
- Optical digital I/O

**E-MU**

**DARWIN - Multitrack Recorder**

Darwin is a stand-alone random access hard disk recorder that features screen-based digital audio workstation style recording/editing capabilities with a user interface that is extremely easy to use, all at a price comparable to popular modular multitrack digital tape recorders. Features: playlist-style editing and multiple levels of undo put real power at your fingertips; large tape machine-style transport controls and large, easy to read, main edit screen make even the most computer illiterate operators comfortable; all of Darwin's sophisticated editing and recording features can be accessed from the main screen—no need to scroll through menus to find different functions; virtual slave reel function allows you to hold up to 100 different edited versions of an audio cut such as a commercial with only a slight increase in memory from the original; built-in MIDI interface; wide range of expansion options with 5 rear panel and 2 internal option slots for adding external SCSI drives, a sync card for linking up to 4 Darwins, ADAT digital I/O card, 4 additional analog inputs, even onboard removable disks; 8 balanced TRS analog outputs; 4 balanced TRS analog inputs; S/PDIF digital I/O. Options: 4 analog input expansion; ADAT interface; SCSI interface; sync card for linking with multiple units.

**FOSTEX**

**D-80 - Multitrack Recorder**

The D-80 excels in all the areas required of a great digital multitrack recorder: audio quality, expansion, synchronization and editing—all at a very reasonable price. Features: up to 18 minutes of simultaneous 8-track recording and playback with supplied 850MB, removable hard disks (upgradable to 60 minutes per track); additional hard drives can be exchanged in seconds with a handy key-lockable caddy system; CD quality audio; unique removable front panel doubles as a full function wired remote control; virtual reels feature divides the hard drive into 5 separate segments that can contain their own separate cuts with preference data unique to each reel; easy to use cut, copy, paste and move editing within individual tracks or across multiple tracks; undo and redo functions; multiple D-80s (and DMT-8s) can be slaved together without losing audio via built-in MTC/optical S/PDIF Word Clock; auto locate, auto return/play, search and auto punch in/out record instantly; highly visible Fl tube display with audio metering and 3 time modes showing absolute time, MTC—MIDI timecode, or bar/beat clock; 8 unbalanced RCA analog inputs and outputs; optical digital I/O for data and 2-track audio with optional S/PDIF adapter. Options: 9040B empty hard drive caddy for approved 3rd party drives; COP-1 optical to coaxial S/PDIF converter; 8051 footswitch.

**DMT8VL - Multitrack Recorder**

This second generation machine incorporates a 16-bit linear hard disk recorder and an 8-channel, 22 input mixing system into one compact unit. Features: Record directly to the internal 540MB hard drive (upgradable to 2.55GB for 60 minutes); random access editing with cut, copy, paste, move plus undo/redo; supports MMC, MTC, MIDI clock and song position pointer; instantaneous search to Zero or any cue point; jog shuttle wheel provides digital scrubbing without pitch change as well as fast, audible Cue and Review; two direct-to-disk digital inputs plus S/PDIF optical outputs; 8-channel mixer with two inputs (main and sub with separate gain and pan controls), 2-channel parametric EQ (on main channels) 2 AUX sends and group assign switches; channels 1-4 have input trim faders that allow for mic or line input levels as well as channel insert patch points; main and monitor stereo outs, fluorescent tube display with audio metering as well as absolute time, MIDI time code and MIDI/Bar/Beat readout; unbalanced analog I/O via 1/4" and RCA connectors; expansion bay for future E-IDF and SCSI interface options. Options: COP-1 optical to coaxial S/PDIF converter; 8051 footswitch.
### PANASONIC

**MDA1 - Digital Audio Recorder**  
Based on the ADAT S-VHS tape format, the MDA-1 8-track modular multitrack digital recorder is designed for audio professionals looking for pro level audio interface and performance. Features: outstanding audio quality with 18 bit 128 times oversampling A/D converters and 20 bit, 8 times oversampling D/A converters; utilizes the latest developments in transport technology incorporating an "intelligent", quick response software-controlled tape transport combined with a dynamic braking system for smooth gentle tape handling that is very fast and accurate; on board editing capability including track copy and track delay, as well as a tape offset feature that facilitates assemble style editing between two machines; 10-point autolocate memory system; auto record function enables punch in/punch out times accurate to 1/100th of a second; the auto play function sets segment start and end points for track shuttle purposes; auto return allows a point to be set at which the tape returns to the auto play point; rehearse mode allows audio takes to be practiced before being committed to tape; fluorescent tube display shows audio levels, absolute or relative time; balanced XLR and unbalanced RCA inputs and outputs.

ARRAKIS

DIGILINK IV - Digital Audio Storage System

A remarkable product cost-effective enough to be used as a stand alone replacement for 3-deck cart machines, reel machines, DAT machines, etc. Powerful interface and control options make it an ideal building block for multiple-studio and shared storage systems.

Features: cost effective workstation designed specifically for broadcast; triple play and simultaneous record — a virtual triple deck cart machine in a box; dual stereo play outputs (mix and cue) allow a file to be cued while playing two others on the air; on board cut and splice digital editing; an excellent (and far more reliable) replacement for CD jukeboxes. With MPEG II compression, the DL4 can store thousands of songs economically on hard disk and can be connected to the DL3 as if it were a CD jukebox; two DL4s can be connected together and can share all stored audio. This means that any recording from one DL4 is immediately available on the second. DL4 for playback and editing — there is no network transfer time; with triple play and record capability, a single DL4 can be shared between an on-air and production studio. The production studio can play-record-edit while the air studio can use dual play for overlap; create a star network of up to 32 DL4s with shared audio storage.

Remote Control Options

- remote front panel
- Digilink 2 or 3
- PC Computer
- GEM6 control panel
- GEM-DL4 console control panel

DL4 can be controlled from the built-in control panel with LCD display and two other control ports at the same time. Control the DL4 via the optional 99 button Gemini control panel, PC via modem or locally; a Digilink workstation; optional GEM-DL4 console module (fits 12,000 and 22,000 series consoles); optional remote LCD control panel that duplicated the DL4 front panel.

DALET - Digital Media Systems

Dalet provides digital audio solutions for all stations regardless of size or format for applications including: live-assist, satellite automation, walkaway music automation (music on hard drives), multitrack editing, combined text and audio editing for news, ISDN transfer for remote workstations and more. Designed as a network system, Dalet utilizes modular software and modular control panels with standard, off-the-shelf PC hardware and networks. Its open architecture approach allows you to customize any size system to your specific needs now, without limiting your ability to grow with new technology in the future.

Features:
- Fully integrated applications that are made to run together seamlessly
- Instant and simultaneous access to all stored audio
- Standard off-the-shelf hardware and networks
- Multilevel access protection
- Software screens for live assist, satellite/machine automation, cart replacement, multitrack production, music and commercial scheduling, newsroom text/audio production, automated recording and ISDN remote communication
- Multi-level access protection.

THE BLUE GROUP

PHONEBYTE - Digital Reel-to-Reel Replacement

Say good-bye to klunky recorders, razor blades and splice tape...say hello to incredibly fast and easy digital editing with PhoneByte. Just a single keystroke or simple click of the mouse allows you to record, edit, play, and archive all of your phone bits and sound effects. Features: nondestructive cut and paste editing; instant playback; grouping/stacking functions; continuous or single cut playback; assignable hot keys for standard keyboard of optional touch button panels.

WIREREADY NSI

RADIOREADY - News Room Software

RadioReady™ is the #1 newsroom software for integrating wire services, news text scripts and audio bits onto your PCs and/or LANs. Features: package combines WireReady and NewsReady software (now used by 2000 radio stations) with CartReady and ReelReady software; compatible with CardD Plus or SoundBlaster16/32 audio cards; works with .WAV files and ZIP/JAZ drives; supports simultaneous play/record when configured with 2 audio cards installed in same computer(s); requires user supplied Pentium class computers with 16MB of RAM; includes 1 Year of 24 hour 800 support and a free upgrade through manufacturer; training, installation, and maintenance packages also available.

MUSICREADY - Music On Hard-Drive Software

Simple & affordable music on hard-drive software for small market stations. Works with two CardD Plus audio cards or two SoundBlasters16/32 on your own Pentium class computer. Features: supports multiple hard-drives; simultaneous play and record; dual-play; programmable overlaps and crossfades. Add a second computer with audio card, your favorite multitrack editing software and external storage drives for the perfect production/swappable backup system. Includes setup and training via customer supplied modem.

This is NOT a TOY!

If sound quality is important to you, don't trust your production to anything but the CardDplus™ from Digital Audio Labs.

- Digital and analog interfaces
- Full WAV compatibility
- Superior fidelity

“The Digital Only Card gives me back exactly what I put into it: clean, quiet audio.”
Tom Jung
DMP Records

“Professional features and excellent audio quality... an excellent companion to Software Audio Workshop™.”
Bob Lentini
Innovative Quality Software

“Great analog sound and perfect digital transfers. This is the one!”
Tom Bates
Grammy-winning Engineer

“Exceptional... the sonic quality is superb, rivaling digital equipment many times the price.”
Dominic Hawken
Audio Media Magazine

“The digital quality is unsurpassed. We’ve produced three platinum albums on the CardD in the last year alone... tremendous bang for the buck.”
Dave Morse
Record Way, Los Angeles

“Five out of five for sound quality.”
Dave Miles Huber
Electronic Musician

“We recommend the CardDplus to all our Sound Forge™ users.”
Monte Schmidt
Sonic Foundry

“Easy to use, yet powerful. Totally transparent. Dollar for dollar, the best system available.”
Bruce Schirmer
KGO Radio, San Francisco

“Unbelievable... this is one piece of gear you should hear for yourself.”
Tom Schizzano
Home & Studio Recording

### DM800 - Digital Audio Workstation

Economical, comprehensive and easy-to-use, the DM800 was designed for the audio professional and is perfect for demanding radio production.

**Features:**
- 8-track recorder with 100 layers per track
- 16-bit linear recording data format
- Selectable sampling rates of 48 kHz, 44.1 kHz and 32 kHz
- Integrated 12 channel mixing system
- Super stable hardware platform
- Non-destructive recording/editing
- Full dynamic automation, MIDI integration
- Time compression
- Pitch correction
- Supports SMPTE and MTC sync
- Video display output
- SCSI ports for external drives and DAT back up
- TRS balanced analog I/O
- IEC-958 coaxial digital I/O

**Options:**
- RS 422 interface
- DA-88 interface
- ADAT interface
- 4-channel D/A converter adds 4 additional analog outputs

### VS-880 - Digital Audio Workstation

A truly comprehensive digital workstation, the VS-880 handles everything from recording and editing to mixing and mastering in one, very reasonably priced, compact unit.

**Features:**
- Non-destructive recording and editing with 999 levels of undo, even after conducting multiple recording/editing sessions
- 18-bit A/D and D/A conversion
- Supports 48, 44.1 and 32 kHz sampling rates
- 64 recordable virtual tracks with 8 track playback
- Digital editing with cut, copy, paste, move, insert and delete functions
- Compression and expansion without pitch change
- 1,000 markers per spot/song
- 8 locate points with direct access keys
- Two mix modes: direct input-track mode and a virtual mix mode allowing mixing of 8 recorded tracks and 6 input sources at the same time
- Parametric EQ
- Three-band on input-track mode, two-band on Mix mode
- Store all mixer parameters
- Automated mix-down via external MIDI sequencer
- Optional onboard digital effects
- Choice of 540 MB internal IDE hard drive or lomega Jaz drive with 1 GB removable cartridges
- SCSI interface for external drives
- Data backup to audio DAT
- Supports MTC and MMC MIDI sync

**Mfr. List:** $2,595.00

EAS - EAS Encoder/Decoder System

From the maker of the trusted ARC-16 remote control system comes this very "broadcast-friendly" EAS system. Features: six balanced audio inputs; one button weekly test is completely self-contained, minimizing interruptions to busy operators and reducing training time; familiar telephone style keypad makes entry fast, easy and natural; 80 character display shows the whole command at once; menus are organized to make routine tasks quick and easy; broadcast quality audio storage helps maintain a consistent air sound, even in the auto-forward mode; a plain paper printer is included, logging all system activity for you; three RS232 interface ports for computer control and monitoring; works with Burk's ARC-16 and other transmitter remote controls; 600 Ohm balanced output; line/monitor output; eight direct digital inputs and outputs.

Options: RX-4 EAS monitor receiver system with four receiver modules, individually adjustable balanced outputs, built-in selectable monitor amp and speaker (specify AM, FM or NOAA Weather receivers); LX-4 EAS audio switch with four independent program channels that accepts one common EAS channel.

TFT

EAS911 - EAS Encoder/Decoder System

With over 20 years of emergency broadcast experience and 4 years of development and testing with the FCC, TFT has developed a comprehensive, yet intuitive and easy-to-use EAS system—the EAS 911. This modular system can be configured to fit a wide variety of applications. Features: sequentially lighted keys guide operators through EAS tests or alerts with ease; all programming, tests and entry are performed on front panel buttons (no external programming device required); help key provides operational and program assistance; practice key allows off-line operator training; available with up to 10 audio inputs (EAS911 base unit includes 2); optional plain paper printer and built-in digital recorder available; control from multiple locations (up to 16) with optional remote control status modules via twisted pair wiring up to 5000 feet away. Options: EAS930A multi-module receiver comes standard with 3 receivers (AM, FM, or NOAA Weather) with space for a fourth module; EAS941A remote control status module that duplicates major system functions; EAS940A program/transmitter interrupt unit that automatically interrupts program audio and inserts EAS audio for unattended operation applications.

*Power supplies must be ordered separately.
Audio professionals around the globe have come to depend on the quality, diversity, and excellent craftsmanship of RDL products. Choose the right solution from the finest selection of foundational products for problem solving and system design.

Stick-On Series
This ingenious group of products is so practical and affordable you'll wonder how you've ever done without them. Over 50 "Stick-On" Series products are available. Choose from power amplifiers, audio DA's, mic preamps, compressor/limiters, equalizers, line amplifiers, and much, much, more. Each unit is only 3" x 2" and has adhesive to mount Stick-On's anywhere they are required. Optional rack mount allows 15 Stick-Ons to be mounted in a single rack space.

Rack-Up Series
Rack-Ups feature the advanced circuitry for which RDL products are known, combined with accessible user-friendly controls and displays. The ultra-compact design permits high density installations with three products mounted in a single rack unit.

TX Series
TX Series transformer products are ideal for a variety of applications such as music on hold amplifiers, bridging input transformers, adjustable line transformers and more! Small size 1.2" x 3.0" x 1.4" allows TX Series to be mounted right where the need is.

A wide variety of mounting and control accessories help make RDL products among the most flexible and favorable to audio professionals worldwide.

**FURMAN**

**PB40 SERIES - Patch Bays**
These sturdy, heavy gauge steel patch bays feature 40 patch points with either mono 1/4", 1/4" TRS or RCA jacks. Features: modular construction (20 circuit boards with 4 jacks mounted on each board) that makes it easy to reconfigure the panel with the types of jacks required for a given application by swapping out different boards; circuit boards are supplied with a "normalling" jumper, which means that the source feeding the top rear jack is normally connected to the corresponding bottom rear jack until a patch cord is inserted to reroute the circuit. Normals can be defeated by cutting the appropriate jumpers.

Options: 30" patch cables (sets of 10 only) in RCA/RCA, 1/4"/1/4" or TRS/TRS configurations.

Lindy Williams  
V.P. Engineering  
Lotus Communications  
Los Angeles, California  
"We've replaced some 'very expensive' condenser microphones with the RE27N/D ...now the GM wants the guest mic replaced, as well as the production studio and the newsroom microphones. You're blowing my engineering budget!"

Steve Lariviere  
Chief Engineer  
WSNE  
East Providence, Rhode Island  
"We replaced six expensive German condenser microphones in favor of the RE27N/D. What a great sound!"

Mary Collins  
Chief Engineer  
KFI-KOST-KACE  
Los Angeles, California  
"The RE27N/D has the fullness of a ribbon with the punch of a shotgun condenser microphone. The pattern is very good, giving good backside rejection of noise. Congratulations on building such a fine microphone."

RE27N/D  
Studio Dynamic Microphone  
The new broadcast standard.

The Sound Of Broadcast Professionals

Shure Microphones and circuitry products are used extensively throughout the world by broadcasters who demand nothing but the best. Robust mixers designed for the rough and tumbled world of life on the road. Microphones that cater to all kinds of voices in all kinds of settings. When thousands of listeners and (your career) are on the line, settle for nothing less than.....Shure.

SHURE®
LAVALIER MICROPHONES

AUDIO TECHNICA
AT803B - Lavalier Mic
Type: condenser lavalier; Pickup Pattern(s): omnidirectional; Features: high intelligibility for vocal reproduction; low frequency roll-off switch; requires AA battery or 9-52 volt phantom power; includes clothing clip, windsheild and case. Optional Accessories: AT8412 double tie clip; AT8414 tie tac clip; M10 or M25 mic cables.

BEYER
MCE 7 - Lavalier Mic
Type: electret condenser lavalier; Pickup Pattern(s): omnidirectional; Features: extremely small and unobtrusive; wide frequency response; insensitive to handling noise; requires phantom power; Optional Accessories: MKV50 tie clip. Available April 1997.

SHURE
MX 180 SERIES - Lavalier Mics
Type: electret condenser lavalier; Pickup Pattern(s): omnidi, cardioid, or supercardioid (specify one); Features: interchangeable mic capsules; optimized for speech; extremely small size; low self-noise; requires K6 power module for battery or phantom power; includes windscreen. Optional Accessories: right angle cable; various mounting clips.

ELECTRO-VOICE
CO2PRO - Lavalier Mic
Type: electret condenser mini lavalier; Pickup Pattern(s): omnidirectional; Features: smaller than a standard paper clip, paintable mic and cable surfaces, extremely durable with extra long cable, 12-52 volt phantom power required; includes single mic & cable tie bars, dual mic tie bar, mic & cable vampire clips, tie tack, vinyl pouch; white version available. Optional Accessories: CO2E unterminated version for wireless; CO2EX with TA4F connector for EV and Vega wireless; M10 or M25 mic cables.

SONY
ECM55B - Lavalier Mic
Type: condenser lavalier; Pickup Pattern: omnidirectional; Features: voice tailored frequency response, requires AA battery or 48 volt phantom power. Included accessories: mesh windscreen, single horizontal and vertical tie clips, mic case; Optional Accessories: various mounting clips, multi-colored urethane windscreens, power supply holder clip.

SENSEHISER
ME102/104 - Lavalier Mics
Type: subminiature condenser lavalier; Pickup Pattern(s): ME102 omnidirectional, ME104 cardioid; Features: interchangeable mic capsules; optimized for speech; extremely small size; low self-noise; requires K6 power module. Available April 1997.

SHOTGUN MICROPHONES

AUDIO TECHNICA
AT815B/AT835B - Shotgun Mics
Type: condenser shotgun Pickup Pattern(s): line+gradient Features: super tight pattern and high sensitivity for long range pickup; low frequency roll-off switch; requires "AA" battery or phantom power; AT815B has slightly extended reach and LF response; mics include windscreen, battery and carrying case. Optional Accessories: AT8410A shock mount.

BEYER
MCE86/87 - Shotgun Mics
Type: condenser shotgun Pickup Pattern(s): lobe/hypercardioid Features: extremely high sensitivity; superb off-axis rejection; non-reflective finish; supplied with shockmount and stand clamp. Optional Accessories: fishpole boom, blimp windscreen and various shockmounts.

SHURE
SM89 - Shotgun Mic
Type: condenser shotgun Pickup Pattern: supercardioid Features: very natural sounding; unique port design decreases off-axis coloration; super light construction; includes windscreen and carrying case. Optional Accessories: A89SM shock mount.

DBX

760X - Microphone Preamplifier

Features: high quality transformerless inputs and outputs; 60 dB of sonically transparent gain; clip indicators; polarity reverse switch; switchable phantom power; rack mounting hardware included; balanced XLR and unbalanced RCA outputs.

Mfr. List $349.00

RDL

RU-MP2 - Mic Preamp

Features: dual channel unit; low noise audio performance with RF filtered inputs; gain trim controls; selectable phantom power; XLR mic inputs; front (XLR) and rear (barrier strip) line level outputs; requires PS24A power supply. See page 74 for Stick-On Series™ mic preamps.

Mfr. List $269.00

PS24A Power Supply BSW Price $14.30

ROLLS

RP220 - Dual Tube Mic Preamp

Features: utilizes 12AX7A tubes in a unique configuration to give smooth controllable gain with true transformer balanced inputs; front panel gain and volume controls and 5 segment output level LEDs; inputs and outputs are selectable for mic or line levels and feature both unbalanced 1/4" and balanced XLR connections.

Mfr. List $500.00

SYMETRIX

SX202 - Dual Mic Preamp

Features: two ultra clean microphone preamplifiers with variable gain; 15 dB pad; +48 volt phantom powering; polarity reversal switch; separate left, right, and left + right balanced/unbalanced TRS outputs.

Mfr. List $319.00

Microphone Accessories

(A) ART 127 TUBE MP - mic pre/Direct Box
Use for tube mic pre, active direct box, or phantom power unit.
127 Mfr. List $149.00 Call For BSW Price

(B) ROLLS ADB2 - Phantom Direct Box
powered by phantom power, this direct box offers a 3 position attenuator and ground lift switch. Two 1/4"ins-XLR out.
ADB2 Mfr. List $50.00 Call For BSW Price

(C) ROLLS PB23 - Phantom Power Adapter
Provides 12 or 48 VDC phantom power. Includes AC/DC adapter.
PB23 Mfr. List $50.00 Call For BSW Price

(D) PROCO MS42 - 4 Channel Mic Splitter
4 channels with single female XLR input and 2 isolated XLR male outputs. Output ground lift switches. B-channel unit available.
MS42 Mfr. List $333.00 Call For BSW Price

(E) PROCO MC2 - Mic Combiner
2 female XLR ins, 1 male XLR out with input polarity reverse switch.
MC2 Mfr. List $119.00 Call For BSW Price

(F) SHURE FP11 - Mic-to-Line Amp
Balanced XLR mic input to balanced XLR line output. Uses 9 volt battery and includes limiter, AUX in and belt clip.
FP11 Mfr. List $370.00 Call For BSW Price

(G) WHIRLWIND MICPOWER - Phantom Power Adapter
Provides +12 to +18VDC phantom power. Operates on two 9 volt batteries for approximately 50 hours. Includes battery level LED.
MICPOWER Mfr. List $89.00 Call For BSW Price

(H) WHIRLWIND LITTLE IMP - Impedance Matcher
XLR low-Z input to 1/4" high-Z output. Lets pro level mics be used with consumer level mic inputs.
LITTLE IMP Mfr. List $12.25 Call For BSW Price

(I) WHIRLWIND SPLITTER 1X2/1X3 - Mic Splitters
One low impedance XLR input to 2 or 3 low impedance XLR, transformer isolated outputs with separate ground lifts.
SPLITTER1X2 Mfr. List $71.00 Call For BSW Price
SPLITTER1X3 Mfr. List $93.00 Call For BSW Price

AUDIO TECHNICA

AT8681 UniMix - 2-to-1 Mic Combiner
Combines the output from two microphones into one channel. Includes a balance control between the two inputs.
AT8681 Mfr. List $70.00 Call For BSW Price

AT8682 UniGate - Voice-Operated Switch
Automatically attenuates a mic channel when not in use. Adjustable threshold sets the level at which gate opens. LED lights when gate is open.
AT8682 Mfr. List $75.00 Call For BSW Price

AT8684 UniMute - Mic Attenuator/Switch
Allows remote mic functions such as on/off switching, push-to-talk and push-to-mute, as well as control of logic-level DC circuits.
AT8684 Mfr. List $70.00 Call For BSW Price

AT8683 UniSteep - 80 Hz Mic Hi-Pass Filter
Provides a steep 18 db/octave low frequency attenuation to minimize stage rumble and other low frequency background noises.
AT8683 Mfr. List $50.00 Call For BSW Price

AT8685 UniTrap - Constant-Q Mic Notch Filter
Tunable notch filter helps control feedback by attenuating a narrow frequency band that is susceptible to feedback. 30 dB notch tunes in two ranges.
AT8685 Mfr. List $80.00 Call For BSW Price

AT8686 UniLim - Mic Limiter
Keeps the output of a microphone from exceeding the level set by the adjustable threshold control.
AT8686 Mfr. List $75.00 Call For BSW Price

GS SERIES - Microphone Pop Filter

An effective way to reduce or eliminate P-popping without sound coloration. Features: double nylon screen for superior performance; unobtrusive black 5" or 7" filter frames; 13" black gooseneck; brass tipped locking screw prevents scratching of mic stands; replacement screen available.

- **GS-5**: 5" screen w/gooseneck [Mfr. List $22.50]
- **GSS-5**: 5" replacement screen [Mfr. List $17.78]
- **GS**: 7" screen w/gooseneck [Mfr. List $37.00]
- **GSS**: 7" replacement screen [Mfr. List $27.00]

Call For BSW Prices

WINDTECH

Windscreens

WindsTech™ windscreens are high quality, cost effective, come in a large variety of colors and fit most microphone models. These screens are made of an open-cell, hypo-allergenic foam that won't color sound, yet provide maximum protection against wind-noise and P-popping. The nature of their composition makes them long lasting, holding their shape and color even after washing.

Just call BSW, specify the mic you are using, and choose from virtually any color of the rainbow (plus neon and tie-dyes on certain models). Low cost windscreens for shotgun mics also available.

*Please specify color

A. BSW IC6 - Interview Cable
6' adapter cable interfaces pro mics with portable field recorders. XLR to 1/8" mini.
IC6 BSW Price $14.00

B. WHIRLWIND BSWMC24 - Coiled Mic Cable
Coiled black cable perfect for interviews, etc. 2.5' long retracted, extends to over 10'.
BSWMC24 BSW Price $35.00

C. HOSA WT1148G - Cable Ties
Velcro ties keep mic cables coiled neatly. Tie stays attached to cable even when uncoiled.
WT1148G BSW Price $5.50

D. PROCO M10/M25 - Mic Cables
Quality, low-loss mic cables in 10' or 25' lengths with XLR connectors.
M10 BSW Price $9.95
M25 BSW Price $11.95

E. WINDTECH MC6 - Mic Clip
Standard tapered, slip-in clip fits most handheld mics. Adjustable angle; brass insert with 5/8"-27 threads.
MC6 BSW Price $3.95

F. WINDTECH MC9 - Insulated Mic Clip
Heavy duty clip with rubber insulator. Adjustable angle; brass insert with 5/8"-27 threads.
MC9 BSW Price $4.95

G. WINDTECH MC11 - Slim Mic Clip
Heavy duty clip for slim mics (8" to 1" in diameter). Adjustable angle; brass insert with 5/8"-27 threads.
MC11 BSW Price $4.75

H. WINDTECH SMC7 - Spring Loaded Mic Clip
Spring clamp type clip fits a wide variety of mics. Adjustable angle; brass insert with 5/8"-27 threads.
SMC7 BSW Price $4.50

I. ROKSAK MB12 - Microphone Bag
Nylon bag keeps 12 mics protected in foam. Includes removable shoulder strap and compartment for accessories.
MB12 BSW Price $99.95
A. ATLAS - DS2 Vibration Isolating Stand
Non-adjustable 3" high chrome tube Non-reflective 4"x 6" charcoal base.
DS2 BSW Price $23.95

B. ATLAS - D57 Adjustable Desk Stand
Adjustable height 8" to 13". Grip-action clutch. 6" diameter charcoal base.
Black or silver.
D57 BSW Price $18.95

C. ATLAS - DS5 General Purpose Stand
Non-adjustable 4" high chrome tube. 6" diameter cast iron charcoal base.
D55 BSW Price $13.95

D. ATLAS DMS - 7E Heavy Duty Desk Stand
Features an oversized 10" cast iron base providing maximum stability for
larger studio mics and boom attachments. Adjustable height 8"-13". Black
finish.
DMS7E BSW Price $27.95

E. ATLAS PB11XE - Short Mic Boom
Boom extends from 16.25" to 24.5". Use with DMS-7E to create a heavy
duty boom stand for tabletop applications such as interviews, etc.
PB11XE BSW Price $43.95

F. QUIK LOK A114 - Telescopic Desk Stand
Heavy weight base and pivot feature allow for optimum placement of even
heavy studio mics. Adjustable from 16.5" to 23.5".
A114 BSW Price $39.95

G. AKG KM231/1- Tripod Desk Stand
Chrome legs fold in so stand fits easily into equipment bag or brief case.
KM231/1 BSW Price $12.95

H. QUIK LOK A/205 & A/300 - Tripod Floor Boom Stands
The A/205 is a heavy duty stand, adjustable to 64" tall with a 30" boom.
A/300 is a lightweight economy version, adjustable to 60" high. Black only
A/205 BSW Price $57.95
A/300 BSW Price $37.95

I. ATLAS MS12C - General Purpose Floor Stand
10" weighted base. Adjustable from 34" to 62". Black or silver.
MS12C BSW Price $37.95

J. ATLAS PB25X - Microphone Boom
Attaches to any stand with 5/8" threads. Grip action clutch. Expandable
from 31" to 50". Black or silver.
PB25X BSW Price $69.95

K. TE16BE - Microphone Stand W/Boom
Rugged tripod mic stand with boom. Stand height adjustable from 35" to
60". Boom extends to 25 1/2". Black color.
TE16BE BSW Price $49.95

L. ATLAS MAC-1 - Universal Clamp
Mounts mic almost anywhere. Holds any 5/8"-27 threaded accessory and
mounts to table edges or round tubing up to 1 1/8" in diameter.
BSW Price $29.95

M. ATLAS BC-1 - Desk Clamp
Bracket-style clamp with 6" chrome tube attaches to tables, countertops,
workstation furniture etc.
BSW Price $23.95

N. ATLAS GN SERIES - Goosenecks
Flexible goosenecks in 6", 13" and 19" lengths with male and female 5/8"-
27 threads. Chrome or black finish.
GN6 BSW Price $7.95
GN13 BSW Price $9.95
GN19 BSW Price $19.95

O. ATLAS CH-1B - Cable Hanger
Use to hang coiled mic cables or headphones on mic stand.
CH1B BSW Price $14.95

P. ATLAS TM-1 - Stereo Mic Mount
Allows mounting of 2 or 3 mics onto one stand. Available in chrome or
black: 8 3/4" wide.
TM1 BSW Price $19.95

Q. ATLAS AD-11B - Mounting Flange
5/8"-27 female flange with 1 3/4" base diameter. Chrome or black.
AD11B BSW Price $6.95

LUXO

LM SERIES - Studio Microphone Boom/Arm
LM1 is a 41" extended reach arm for mics weighing up to 1 pound. LM1-3
is the same basic arm, but holds heavier mics weighing up to 3 pounds. Avail-
able in oyster or black color. LM2 is a 26" reach arm for mics weighing up to 2
pounds. Available in grey color only.
Mounting options include a clamp style (model A), a wall mount (model
B), a desktop mount (model C), or a 12" aluminum extension pedestal. Specify
black, grey, oyster or unpainted (riser only).
LM1, 2 or 3 BSW Price $69.95 ea.
Model A, B, or C BSW Price $12.50 ea.
RISER 12" pedestal mount BSW Price $24.95

### H. STL/MRL - Test Tapes
Complete selection of test tapes for every application. Available in open reel, cassette and audio cartridge.

Call BSW With Your Requirements
**DC-8A - Dial-Up DTMF Controller**

This dial-up remote control allows the user to control their facility from any touch-tone® telephone. The DC-8A will answer the phone line after the programmed number of rings (up to 14), accept an access code of up to 8 digits and if valid, will allow the control of 8 form A relays and the monitoring of 8 logic level status inputs. Features: built-in audio hybrid allows user to send and/or receive external audio, while controlling the unit; the pager alert function can activate up to 3 digital pagers and display the users telephone number and the status input(s) which triggered the alarm; all programming is performed with a standard touch-tone® phone; nearly all functions can be programmed remotely; defeatable CPC control (unit hangs up when caller hangs up); user programmable tone acknowledgment defeat; may be configured for stand alone program DTMF tone decoding; each relay may be configured to close for as long as the associated key is depressed, latching and interlocking mode; each input and relay can be individually polled with easily distinguishable tones indicating their open or closed status; busy input allows external disabling of the DC-8A from answering the phone line; front panel LED indicators for DTMF tone detection, off-hook (line connected) status, ring signal, and power; open collector outputs for remote ring and off-hook conditions; front panel send and receive audio level controls; screw type wire captive terminals.

**SRC-8A - Remote Relay Control**

The SRC-8A adds remote relay control to your DSP-6000 (or equivalent) digital STL or ISDN remote equipment. Applications include direct relay control for your dial-up remote control, a supplement to your dedicated remote control, relay control of satellite, transponder or remote audio switching as well as machine control and talent alerting for remotes. The standard system provides one-way control. The SRC-8B is available for bi-directional control and status. All SRCs utilize a high integrity data format for maximum reliability. The SRC-8A consists of both transmit and receive units. Each unit is mounted in an aluminum case with mounting holes allowing convenient mounting. The optional RM-2 rack mount may be purchased for mounting two units in a 19" rack. Power adapters and serial cables are provided.

**Silence Monitor - Loss Of Audio Monitor**

The Silence Monitor is designed to monitor any stereo or monaural audio source for activity. Features: can monitor modulation monitors, AM/ FM/TV tuners, etc.; can be configured to produce an alarm when either both channels fail or when each individual channel fails; the absence of audio will extinguish either or both of the "SIGNAL" LEDs and close both the unlatched and latched relays after a precise programmable time delay. The unlatched relay remains closed for the duration of the loss of audio, while the latched relay may be set to flash or remain continuous; precise time delay is programmed via an 8-position dip switch in increments of 2 seconds with a maximum time delay of eight and a half minutes; internal alarm reset switch, opto-isolated remote reset and defeat inputs; LED indicators for presence of audio, power and silence alarm; supplied in an aluminum chassis with mounting holes allowing convenient mounting. The optional RM-2 allows two units to be mounted in a 19" rack.

**Burk Technology**

**ARC16 - Remote Control**

Now, you have a choice: Full-time studio control, dial-up telephone control—or both. And because of modular design, the ARC16 offers features never before available in a 16-channel remote control system. With the studio controller you have a constant link to your transmitter, for instant response to any problem. The 32 character LCD display shows out-of-tolerance conditions at a glance, and it’s simple to make adjustments, with clear-text prompting to guide you. The Enhanced Speech Interface (ESI) lets you take control using the telephone keypad from any Touch-Tone® phone. It can be used as the only control source, or in addition to the studio controller. It can be installed in the transmitter or the studio unit.

Features: clear text prompts (studio units); digitally-recorded human voice for dial up; built-in subcarrier generators; built-in alarms and multiple site control; AutoPilot computer software makes automatic operation of a studio/transmitter facility a dream come true. With modes defined by the user, the program will take corrective action when needed. AutoPilot can reduce down time and operator errors, while providing better records to show FCC compliance. AutoPilot runs on a 286 PC and is designed for use with the ARC-16 containing the computer interface option.

**BURK TECHNOLOGY**

**TC8 - Remote Control**
The TC8 is a full featured remote control system that requires only 1 3/4" of rack space and provides 8 analog metering channels, 8 status inputs and 16 control outputs (8 raise, 8 lower). Studio and transmitter units communicate via telco loops or STL/SCA subcarriers. Specify which you prefer at time of ordering. Status inputs accept 5 to 28 V signals and metering channels accept inputs of either polarity from 0.25 to 4 V, ensuring easy interface with all broadcast equipment. Status LED's and a large dot matrix metering display can be read from across the room. CRT display, logging and fully automatic operation is possible using the optional RS-232 interface.

**CIRCUITWERKES**

**DR-10 - Remote Control**
Control your equipment from anywhere there is a touch-tone phone with the DR-10. Features: password protected; control 10 relays that can be individually programmed as momentary, latching or interlocked; relays can be assigned to any tones; anti-falsing modes prevent accidental closures during remote broadcasts; relays can beep when activated; 4 logic inputs can activate a relay and/or call your pager; 4 logic inputs can activate a relay and/or call your pager; audio hybrid allows control while monitoring external audio; program with any DTMF telephone. Options: Silencer (see description and pricing above); call progress (CPC) options.

DR-10  
Mfr. List $2,495.00  
Call For BSW Price

**DTMF-16 - Remote Control**
The DTMF-16 listens to practically any audio source and activates its appropriate optocoupler output when it hears any of the sixteen DTMF tones. Jumper selectable modes are available for momentary, interlocking-latching, two-tone and anti-falsing. Applications include backup transmitter control over STL, radio or telephone coupler, remotely controlled audio switcher, etc. It is also perfect for interfacing networks to your automation, controlling remote satellite receivers, repeaters etc. Options: the SILENCER option board lets you send inaudible DTMF control signals via your RPU, satellite, dedicated loops, or standard dial-up phone lines. Your talent or producer in the field can fire IDs, start breaks, light up an attention flasher, or control just about anything right in the program path, without getting any tones on the air.

**GSC3000 - Remote Site Control**
The GSC3000 was developed to address the needs of broadcasters requiring extensive control capabilities, yet with its modular approach, it is designed to handle a variety of application from a single site with minimal requirements, to large multi-site networks with extensive requirements. It incorporates several features found in the popular VRC2000 plus new features and capability that leave an open door for system expansion. Features: site expandability that is easy to manage; control of one to 256 sites; 8 to 256 logical channels of metering, status and command per site; single or multiple PC monitoring sites; friendly Windows® based operation—simply click on the desired area and its information pops up on your screen; PC-based voice/DTMF option allows monitoring and control of multiple site locations from a single dialed number; purchase affordable 8 or 16 channel site controllers plus the interface options required for your application.

BSW System Prices Based On Configuration

**VRC2000 - Remote Control**
This system provides a total solution for controlling your broadcast transmitter where a telephone line, radio link, data link, or bi-directional audio link is available. The VRC2000 will notify you when something goes out of tolerance, when security is breached, or when corrective action is taken. Features: 16 single-ended analog metering channels; 16 TTL compatible status channels; 32 "open collector" transistor command outputs; can be used to automatically monitor conditions at a remote site, automatically log regular reports to a printer, take corrective action based on monitored conditions, and notify a human operator via telephone or radio links should an undesired condition occur. The VRC2000 has an outstanding list of options and accessories that make installation and operation easy and efficient.

MRC1620 - Remote Control System

The MRC1620 system consists of a remote terminal that allows an optional control terminal or IBM PC with TaskMaster20 software to monitor and control a remote facility from both dedicated and/or dial-up control points. The MRC1620 remote terminal comes equipped with 32 relay isolated command outputs (16 raise/16 lower), 16 TTL status inputs and 16 analog metering inputs with the required terminal connectors.

The remote and control terminals are simple to operate and easy to understand. All status channels are simultaneously displayed on a set of 16 LEDs. The front panel displays read-outs of selected channel number and telemetry data. LEDs indicate operation mode, alarms and other system parameters. During alarm conditions, intelligent automatic corrective action can be taken by the remote terminal under the direction of the TaskMaster20. The remote terminal comes equipped with the appropriate modems to communicate over dedicated circuits (STL/ TSL/ FMSCA, 2/4 wired leased lines or standard dial-up lines).

SINE SYSTEMS

RFC1B - Remote Control

Control and monitor your transmitter from any telephone with the Sine Systems RFC1/B, the affordable fully-featured dial-up remote control. It speaks to you with a natural human voice! Its built-in alarm system phones up to six different telephone numbers to report out-of-tolerance conditions. It can automate transmitter power/pattern changes as well. The basic system consists of one RFC1/B and one RP-8, eight-channel relay panel. Add more RP-8's for additional channels.

Options: SP-8 heavy-duty surge protection system (Sine Systems will cover lightning damage under the one-year warranty with systems using the SP-8); RS-232 option lets your RFC1/B system print your readings with a serial printer. Multiple RFC1/B sites can log into the same printer; ACM-1 not only tells you if the lights are on or off, it can detect a change in average lighting current as small as 1%; AFS-1 audio fail safe detects the loss of program audio. It can monitor 2 audio channels with an adjustable delay time for relay closure.

DAI-1 - Dial-Up Audio Interface

The DAI-1 Dial-up Audio Interface provides an impressive array of control features. It combines an autocoupler, a dial-out alarm, two AGCs, a DTMF operated equipment controller and an audio switcher into one affordable device. It is commonly used as a tool for "walkaway" EBS compliance. Another popular application is to allow "dial-up" remote broadcasts when the studios are unmanned. Options include the DB-1 50 millisecond delay board that prevents DTMF tones getting on the air, the CI-1 Composite Insertion Module for use when discrete audio is not available and the DAI-RP rack mount kit.

#### RPT30/RPT15 - Remote Pickup Transmitters

Remotes are a breeze with a Marti Remote Pickup System. The RPT30 transmitter offers four balanced microphone inputs (one selectable for line level) and a built-in FM compressor providing automatic modulation control. The RPT15 is a compact 15 watt transmitter that can operate on 115 VAC or 12-14 VDC. It features an XLR mic input, Aux line level input and built-in FM compressor/limiter. The RPT-2 is Marti's hand-carried RPU transmitter that operates for up to 3 hours on an internal Ni-Cad battery, from 115 VAC or an external 12 VDC power source. All of the above models are available as single or dual frequency systems.

**WILL-BURT**

**Pneumatic Telescopng Masts**
Will-Burt's pneumatic telescoping masts are a quick and convenient way to get the antenna height you need from your remote vehicles. The masts are extended from their compact nested height by pneumatic pressure supplied by air compressors, hand pumps or compressed air bottles. They can be mounted to extend through the roof of a remote vehicle, or on the vehicles rear bumper.

Call BSW For Pricing And Detailed Specifications

**HURRY-UP - Telescoping Mast**
Here's a simple, inexpensive, and effective portable antenna mast for your remotes. The TMD Hurry-Up mast is designed for fast and easy deployment of light weight antennas. It consists of 6 graduated aluminum tubes which nest one inside another. The mast is extended by pushing up the sections and fixing them into position using quick lock/release collars. It can be fully extended to 25' in one minute or less. Hurry-Up is free standing in its universal vehicle mounting stand so you can take it on remotes using whatever vehicle is available. Weight is only 20 lbs. with a nested height of 6'-0".

Getting your signal from Point A to Point B is not really all that difficult. Getting it there in its purest form reliably is a more difficult task. Don't leave something as important as the conveyance of your air signal to amateurs. For over 25 years, thousands of broadcasters worldwide have delivered their programming with Moseley.

**DSP 6000**
The digital STL solution for the all digital airchain.

**Starlink 9003TT**
An all digital, open architecture, modular system for transmitting audio and data over T1/E1 lines.

**PCL 6020/6030**
Frequency-agile composite system built to perform in the harshest RF environments.

**Starlink 9001SS**
A 2.4 GHz Spread Spectrum link for stereo remotes up to distances of 25 miles.

**RPL 4000**
Frequency-agile UHF RPU for stations on the go who demand quality remote broadcasts.

Legendary Quality. Uncompromised Audio. Incredible Reliability

Moseley. The Trusted Name In Communications
**MARTI**

**STL15C - Composite STL System**

The Marti STL-15C transmitter and companion R-15C receiver form a high quality, frequency synthesized, radio communications link. Depending upon the available channel bandwidth, the systems can transmit composite stereo with two subcarriers, or digital stereo audio when used with external modems. Features: Unexcelled composite stereo separation, noise and distortion specs, high interference rejection receiver, 9.5 watts of power, available for new narrow channels provision for automatic switching, two year limited warranty.

STL15C/R15C Composite Stereo System  
Mfr. List $7,000.00  
Call For BSW Price

**STL10 - STL System**

For mono operations or for non composite stereo applications, choose the STL10 Package. Separate right and left units can be linked for stereo operation with greater rejection of interference, superior noise specifications, lower channel crosstalk and redundancy than most composite systems, plus four optional sub-channels available. Features: excellent square wave response, user selectable audio processing, low pass and band pass filtering for minimum overshoot and high selectivity, extensive front panel test features and built-in automatic switching capability.

STL10/R10 mono system  
Mfr. List $3,550.00  
Call For BSW Price

**MD2E/MD2D - Digital Encoder/Decoder**

Upgrade the performance of your composite analog STL with the MD-2E digital encoder and MD-2D digital decoder. Combined with the Marti STL, or other current composite STL systems the MD-2E and MD-2D create a high quality, 16 Bit digital link delivering outstanding audio specifications such as crosstalk of -85dB and dynamic range 93dB typical. Encoder features digital AES/EBU inputs with 3 selectable sampling rates as well as RDS and MPX inputs.

**MOSELEY**

**STARLINK 9003T1 - T1/E1 Audio Transmission System**

The Starlink 9003T1 is a powerful, all-digital modular system for transmitting CD quality audio over T1/E1 lines. It provides great flexibility in configuring multiple channel STL/TSL. Perfect for LMAs and dupolycps, its configuration options are limited only by one's imagination. This system utilizes a range of personality modules and daughter cards that are housed in a 3 RU mainframe. The mainframe can house up to eight application-specific modules including 16-bit PCM linear digital audio, ISO/MPEG layer II or apt-X source coding, drop/insert and variable-rate digital mux, speech/fax/data cards, T1/E1 and more. A building block "any card, any slot" approach is used resulting in lower cost, greater flexibility and enhanced reliability. The use of international standard digital I/Os allows the system to seamlessly connect to the outside world. This commitment to open architecture gives one the power to choose solutions that will work with existing and future investments. Linear digital audio can be delivered by use of a source coder module, a source decoder module, two T1/E1 line drivers, external CSUs and the mainframes. Full duplex T1/E1 audio transmission is possible by the addition of another source encoder and decoder pair. A digital four-port mux allows additional compressed audio channels to be carried by the system. In addition, data and voice cards for transmitter control and operational communications can be added into the system. Several STL/TSL pre-packaged systems are available, or custom configure a system to your specifications.

Pricing Is Based On Configuration

**DSP6000 - Digital STL Encoder/Decoder**

Your key to an STL system that can pass CD quality audio is the DSP6000. This digital encode/decode system is designed to be used with Moseley PCL6000 or PCL606 Series STLs. It provides a 90 dB SNR with only .01% distortion, and can operate in existing channel allocations from 100 to 500 kHz, coexisting with established analog radios. Look at the advantages of having digital: Signal-to-noise ratio of 90 dB with .01% distortion, higher system gain (up to 25 dB over analog STLs), constant SNR - unaffected by fades, no crosstalk, no degradation with multiple hops.

The standard system comes equipped with an encoder and decoder for two (right and left) audio channels and one data channel with provisions for up to two auxiliary program channels and one additional data channel.

PCL6000 SERIES - Composite STL Systems

The PCL6010 transmitter and PCL6020, 6030 and 6060 receivers employ a synthesized reference oscillator to eliminate fixed frequency crystals. Monaural or composite operation is available from a single system. By selecting appropriate jumpers, you can enable wideband composite stereo or 15 kHz monaural basebands. Two PCL6000 systems can be used in a dual discrete configuration to transmit right and left stereo programs with no measurable crosstalk. Receiver IF bandwidth can be factory or field set for channel spacing of 100 kHz to 500 kHz.

Which system is right for you? If you have no adjacent channel interference, the PCL 6020 will offer superior performance. The PCL 6030 is designed for hostile RF environments where maximum selectivity and adjacent channel rejection are required. The PCL6060 goes even further to operate in congested antenna farms. It offers noise-free performance in the most hostile RF conditions.

**QUANTUM - Solid State FM Transmitters**

QEI’s new Quantum Series of FM broadcast transmitters are totally solid state and provide an unsurpassed broadcast signal with utmost efficiency. Everything you need, including QEI’s new 300 watt exciter, is housed in a single cabinet. All Quantum transmitters under 6 kW fit in a cabinet only 59” high, facilitating air freight shipping and easy installation. Only the Quantum allows you to buy precisely the amount of power you need between 1.2 and 9.6 kilowatts in 600 watt increments. QEI’s exclusive cableless, solid state power combiner eliminates all trouble prone connections and high loss cabling. A single phase power supply facilitates installation for a broad range of applications.

Call For BSW Pricing

**FMQ SERIES - FM Tube Transmitters**

QEI’s FMQ series FM broadcast transmitters share unique design elements and are conservatively designed for years of trouble-free service. Available in 3.5, 5, 10, 20 and 30 kW models, these transmitters utilize an inherent broadband design to provide a superb broadcast signal. The FMQ power amplifiers utilize a single triode in grounded grid service. This grounded grid triode design offers inherently greater stability, better performance and is less critical in operation than its tetrode counterparts since it requires no neutralization or additional energy consuming power supplies. QEI’s 675B exciter is supplied with the FMQ Series transmitters standard and optionally with the model 695 exciter.

Accept No Substitute

To meet the challenges of today's high performance communication systems, you cannot afford to settle for anything less than the best coaxial cable assembly available. That's why you have to "Ask for HELIAX" coaxial cable and connectors.

Unlike braided cable, only HELIAX coaxial cable can handle the current proliferation of higher frequencies, multichannels and higher average power levels. Its solid copper outer conductor combines both strength and flexibility to accommodate the tightest applications.

When fabricated with Andrew premium performance connectors, HELIAX coaxial cable assemblies optimize electrical and mechanical performance, protecting against EMI-RMI interference and intermodulation.

So if it's not from Andrew, it's not the best coaxial cable in the business.

HELIX is a registered trademark of Andrew Corporation.

BROADCAST TOOLS

USC-16/XP-3 - Satellite Channel/Transponder Controllers

The USC-16 provides remote channel selection for DAT-SEDAT digital audio cards installed in Scientific Atlanta DAT-32 Series, Comtech/Fairchild DART-384 and Ariel receivers, along with sixteen memory selections for Scientific Atlanta ENCORE, DSR-3610, or AD-4595 receivers. 2400/9600 baud serial port for computer control, status and easy programming.

The XP-3 provides remote transponder selection for Scientific Atlanta, Comtech/Fairchild and Ariel receivers. It allows selection of the three transponder channels via users remote control systems or switch contacts. It is equipped with a wire captive terminal strip providing remote control and status, along with local switches for transponder selection.

10302/20306 - Monitor Speakers

ALC speakers are compact affordable and sound great. The 10302 is a full range cube speaker (7 7/8") with snap away grill. The 20306 is a compact two-way system with 8" woofer and phenolic tweeter.

CIRCUITWERKES

DS-8/SUB-03 - DTMF/Subaudible Tone Decoders

The DS-8 is a DTMF sequence decoder providing dry closures for 8 different tone sequences. Can decode four digit DTMF sequences used by networks for automating closed circuit feeds and local insertions. Relays can be easily programmed via DTMF phone to operate in momentary, latching, or interlocked latching modes.

SUB-03 is a subaudible tone decoder for industry standard 25 Hz and/or 35 Hz tones providing dry relay contacts. Features include presence and clipping LEDs; input gain adjustment; variable balanced output; integral output filtering.

ZEPHYRUS

700 SERIES/300 SERIES - Satellite Receivers

The Zephyrus 700 Series single or dual channel SCPC receivers offer outstanding performance and features at an affordable price. Zephyrus also manufactures a full line of electronics to receive and process baseband signals, audio and "sub-audible" tones transmitted by networks to their affiliates. The 300 Series provides a modular approach that allows you to purchase only the equipment needed for a particular application.

ALESIS

MONITOR ONE/MONITOR TWO - Studio Reference Monitors

Monitor One™ is a compact near-field reference speaker with wide frequency response, accurate transient reproduction, clear imaging and high power handling capability. Alesis’ exclusive SuperPort™ technology and proprietary 6.5” mineral filled low frequency driver give Monitor One™ solid high-power bass transients and low frequency response extended beyond that of comparable near-field monitors. It's 1” silk-dome high frequency driver adds accurate high-end to the system. Monitor Two™ offers the same accurate tonal balance and imaging of the Monitor One™ but with a 10” three way speaker design producing a larger sound field, extra deep bass and exceptional mid frequency detail. Both models are covered with a nonslip rubber textured laminate finish.

POINT SEVEN - Shielded Reference Monitors

These affordable reference monitors are acoustically balanced providing accurate, flat audio reproduction. Since they offer magnetic shielding, they are perfect for use with computer based workstations, video editing suites, MIDI studios, or any facility using video monitors. Additional features include front ported venting system for tight bass response and high power handling capability.

AUDIX

PH5II/PH15 - Powered Monitor Speakers

AudiX has combined great sound quality and very competitive pricing in these compact powered monitor speaker sets. The PH-511 features a 5 1/4" woofer and 3/4" tweeter driven by a 40 watt per channel internal amplifier. It is housed in a durable, high impact plastic cabinet with a wire mesh speaker grill, making it ideal as a portable set of monitors. Inputs to the amplifier are RCA unbalanced. The speaker pair is connected via a standard speaker cable with 1/4" connectors (included).

The PH-15 is housed in a dense particle board cabinet with front porting. It features a 3/4" polycarbonate-dome, ferrofluid tweeter and a 5 1/4" long-exursion, rubber surround woofer powered by an internal 40 watt per channel amp. High quality crossovers ensure superb definition and clarity. PH-15s provide a great sounding, inexpensive and space-saving solution for monitoring in small production or control rooms. Amp inputs are balanced (floating ground) via RCA connectors. 1/4" speaker connection cable is supplied. Both models are available in shielded or non-shielded versions.

20/20 - Monitor Speakers

Your search for very accurate studio monitors doesn’t have to end in spending a fortune, at least not with the 20/20. Designed by industry veterans Frank Kelly and Walter Dick, the 20/20 and 20/20bas speaker systems offer very reliable, flat monitoring that’s within reach of almost any budget.

The 20/20 is a passive speaker with the following features: a 25mm silk dome tweeter with aluminum voice coil support and ferrofluid cooling that is very reliable and doesn’t cause ear fatigue over long listening periods; 8" mineral impregnated precision polypropylene woofer with highly damped rubber surround for consistent and smooth extended range frequency response without the need for added EQ; a very solid laminated MDF cabinet with extra acoustical damping to reduce standing waves; a front mounted, large diameter bass port; 2nd order passive crossover.

The powered 20/20bas includes the components of the 20/20 with the following additions: an active asymmetrical 4th order crossover; a 130-watt amplifier designed specifically for and directly connected to the woofer; a 70-watt amplifier designed specifically for and directly connected to the tweeter; front panel power on/clip LED; a combination 1/4"/XLR input with level adjustment; precision HF and LF adjustments; standard detachable power cord.

6301B - Amplified Speaker

The 6301B features a built-in 10 watt amplifier and can accept any line or instrument-level input, even from an amplifier. The 6301BEAV is a shielded version with balanced, XLR inputs. 6301BDUALRAC (pictured) is an optional dual rack kit from Middle Atlantic that its two 6301s horizontally in three rack spaces.

CONTROL SERIES - Monitor Speakers

These speakers not only sound great, they combine rugged construction with a wide variety of mounting options for maximum flexibility. The Control 1 is a two way system with a 5 1/4" low frequency speaker and a polycarbonate dome tweeter. Frequency response is 70Hz - 20 kHz. The Control 1 PLUS uses the same enclosure as the Control 1, but uses a more powerful woofer and pure titanium diaphragm tweeter for even greater frequency range. The Control 5 monitor features a 6 1/2" woofer and larger cabinet for extended bass response. Control 8SR is a compact 2-way sound reinforcement system with 8" LF driver and flat-front Bi-Radial® horn. The Control 10 is a 3-way speaker that features a 12 inch woofer, perfect for large studios and sound reinforcement/PA applications. Control 12SR is a 2-way portable sound reinforcement system with a 12" LF driver and HF horn.

JBL

4400A SERIES - Monitor Speakers

JBL’s 4400A Series studio monitors have become one of the most frequently asked for speakers in the broadcast industry. Now JBL has improved on their solid design and introduced the 4400A Series. Included in the new Series are the 4408A (8", 2-way), 4410A (10", 3-way) and the 4412A (12", 3-way). JBL has upgraded all major components and circuitry for even smoother, more accurate audio monitoring. They’ve also given the new 4400A’s a new look with matte grey laminate finish and charcoal grill cloth.

RAMSA

WSA SERIES - Loudspeakers

Ramsa loudspeakers are tough, compact, and sound great. Use them as portable monitors, for remotes, or in clubs. The durable synthetic cabinets are designed for stacking or use with floor stands or other mounting hardware.

The WSA200 features a 12 inch woofer in a ported enclosure and a high-quality compression driver mounted to a constant directivity twin bessel horn. It delivers outstanding performance from 70 Hz to beyond the audible frequency range.

The WSA80 utilizes an 8" woofer and a 1" soft-dome transducer mounted in a constant directivity horn for maximum dispersion.

For applications requiring maximum bass output add the WSA240 subwoofer (same cabinet size as the WSA200) and WSSP2 subwoofer processor.

TANNOY

SYSTEM 600/800 - Monitor Speakers
Both System 600 and System 800 possess high sensitivity (+90 dB) and power handling (150+ watts) to achieve high sound pressure levels at the mix position. Coupled with the phase coherent, point source Dual Concentric drive units is an innovative, low profile landscape cabinet design that provides better line of sight over the console, improves overall tonal balance and results in deeper bass extension for both models.

WOHLER

AMP SERIES/VM2 - Amplified Speakers
Wohler Technologies offers accurate, self powered monitoring systems in compact rack mount units. These speakers provide excellent magnetic shielding with optimally focused, high fidelity sound for operators in an "ultra near field" (1' to 3') working environment. The AMP-1 series provides self-powered, full fidelity stereo monitoring in a single rack space. It's larger brother the AMP-2 offers wider frequency response from a 2RU enclosure. There's also the economical VM-2 for confidence monitoring in a single rack space. A number of optional features include visual level and phase monitoring, several input configurations, headphone output, 12V DC operation and more.

The MultiDesk™ System

A new concept in configurable studio furniture

5 easy-to-assemble pieces fit together in any combination!

Middle Atlantic’s MultiDesk™ System is a high quality, affordable modular furniture system that gives you the flexibility to create the ideal workstation to fit your surroundings. Furniture pieces assemble in minutes with the hardware and tools provided. Start with the MD-48 MultiDesk and add straight, or wedge top MultiRacks with reversible straight or slant rack faces to create a workstation style that fits you — semicircular, “serpentine” style — whatever. Choose the 4-space or 6-space overbridge and options such as a pullout keyboard tray, modesty panel or cable management kit to round out your system. Quality features like high-pressure laminates, threaded inserts for added strength, hidden castors, adjustable leveling feet, quick-connect 1/4 turn fasteners and more, ensure a beautiful, durable and highly functional furniture system that you will be proud to own.

BSW

Power Protection
BSW can provide you with virtually any type of AC power protection that you might require from surge suppressing outlet strips, to 3 phase surge/lightning service panels, to uninterruptable power supplies (UPSs). We feature products from several well known manufacturers.

Call Us With Your Requirements

DR. FERD

PSA - AC Transformer Extender
The PSA aka Dr. Ferd's Wart Remover is a quick and easy answer for those frustrating "wall wart" power supply transformers that always cover up the receptacles in your power strip. The Wart Remover takes the bulky housing of the transformer away from the power strip. Sturdy receptacle base comes with adhesive backing strip.

PSA Wart Remover
BSW Price $7.88

FURMAN

PL-PLUS/PL8 - Power Conditioner/Light Module
The Furman Power Conditioner and Light Module is the perfect accessory to any rack-mount system. Install in the top slot of your rack, and the eight switched AC outlets on the rear panel will power up all your equipment while its two slide-out light fixtures provide discrete, shadow-free illumination. A dimmer control lets you adjust the lamp brightness to just the right level. Protects your equipment by combining a high voltage surge/transient suppressor with an RFI/EMI interference filter to keep out high level power spikes and lower level electronic noise. PL-PLUS features front panel line voltage indicator.

PLPLUS
Mfr. List $229.00
PL8
Mfr. List $159.00

AR-PRO - Worldwide AC Line Voltage Regulator
The AR-PRO voltage regulator accepts single phase input AC voltages within two capture ranges (88-134 or 170-264 volts) and converts them to the North American standard 120 volts (+/-4%). This unit is ideal for situations where local power is unstable, or for use worldwide to convert different voltage levels to be compatible with equipment requiring 120V power. AC-Pro includes twelve AC outlets on its rear panel and two in the front panel, each featuring spike and RFI protection.

ARPRO
Mfr. List $2,295.00

JUICE GOOSE

WORLDWIDE SD - International Line Conditioner
The Model SD "step-up/step-down" transformer will convert 120 volts to 240 volts and vice versa at 50 or 60 Hz. At the same time the unit can supply simultaneous power distribution of 120 and 240 volts. 2,400 volt-ampere capacity (20 amperes @ 120 volts, approximately 10 amps at 240 volts).

ADTRAN

Service Units

AdTran service units provide a cost effective way to utilize digital audio equipment with various telco services.

For ISDN, AdTran supplies single and dual channel units supporting dual 64 kbps or single 128 kbps of dialed bandwidth with built-in network termination (NT-1). Adtran also supplies DSU/CSUs for switched S6, T1 and other dedicated lines.

Prices Based On Configuration. Call BSW With Your Requirements

AEQ

ACD3001 - Digital Audio Codec

The ACD3001 digital audio codec offers full duplex operation and up to 13 kHz audio bandwidth utilizing 56 or 64 kb/s services. This codec makes use of the G.722 and ISO/MPEG Layer II compression algorithms in a wide range of operating modes and combinations. There are three basic modes that can be selected for operation including a Stereo (dual) mode utilizing ISO/MPEG Layer II at a 24 kHz sampling rate yielding about 6.1 kHz bandwidth, a single mono channel utilizing ISO/MPEG Layer II for up to 13 kHz bandwidth or a single mono channel utilizing G.722 for 7.4 kHz bandwidth. Sampling rates of 16, 24, 32 and 48 kHz can be selected to yield various bandwidths for different applications. The ACD3001 can be synchronized manually or automatically and will re-establish sync with the last selected operating mode in the event of sync failure. It also offers the flexibility of an auxiliary data channel, at data speeds of 300 and 1200 bauds, which is available when the ISO/MPEG Layer II coding scheme is selected in one of the mono modes. A front panel loop switch provides full testing capabilities, by means of true digital loopback.

ACD3001 Mfr. List $1,895.00 Call For BSW Price

TH-02EXMK-II

This flexible unit can be used in the two-wire mode as a simple digital hybrid, or in the four-wire mode as a full duplex intercom. It features two telephone/communication lines and a built-in mix-minus bus. The two lines can be configured together or separately in various modes for great system flexibility. A built-in frequency extender makes this unit a natural for remote applications. Transformer balanced audio inputs and outputs.

Control Panel  Mfr. List $300.00  Call For BSW Price

DX100 - Stereo Audio Codec
DX100 is the digital audio codec of choice when highest quality with minimum compression is required. Utilizing the popular apt-X audio coding algorithm, the DX100 is capable of 15 kHz stereo transmission 256 kb/s or 15 kHz mono at 128 kb/s (as well as a variety of other rates and modes). This is a very stable algorithm with high immunity to transcoding artifacts and very low delay to facilitate program monitoring.

DX100  Mfr. List $3,000.00  Call For BSW Price

DXP.1/DXR.1 - Mono Codecs
The Model DXP.1 and DXR.1 contain an upgraded version of G.722 (Turbo G.722) that allows sending bidirectional 15 kHz audio using both B channels of an ISDN line or two SW56 circuits (112/128 kb/s). They automatically drop back to the normal 7.5 kHz when sending a 56/64 kb/s. A major advantage of G.722 is that it is a widely used international telephone standard, providing the best chance for compatibility with the outside world. These codecs are low-delay (allowing real-time program backfeed) and low in cost, both in terms of transmission data rate and hardware required. They are ideal for sports, talk or any type of mono programming.

GENTNER

TS612 - Multi-line Telephone System

Gentner designed the TS612 multi-line telephone system expressly for ease of use, excellent audio quality, maximum flexibility and expandability. The control surface on the TS612 has a handset and keypad built in so you can take on-air or off-air calls from any location. Up to 3 control surfaces can be used with a single mainframe. Out of the box it offers connection to 6 phone lines, with simple expansion to 12 lines as an option.

The TS612 is so intuitive and easy to use. For instance, to take a call off-air, just pick up the handset and select the line. If you select a line while the handset is in the cradle, the system automatically places it on the hybrid. If you’re talking with someone off-air and wish to place the call on-air, just press the AIR button. Status of each line is indicated by LEDs above the line buttons. The LED glows red for on-air status, green for off-air status and flashes at different rates for ring or hold status or if the line is in use by another control surface.

Two built-in digital Superhybrids, digital audio enhancement and built-in mix minus ensure the highest quality audio with the ability to connect directly to any console.

But it doesn’t stop there. These additional features expand the system’s flexibility and make it a pleasure to use: control via RS232/422, a VIP button ensures that "VIPs" cannot be deselected or placed on hold, a "Next" feature that selects the call that has been waiting the longest or the next screened call, a caller mute function and two AUX buttons for controlling external equipment such as a delay dump or recorders.

TELEHYBRID - Telephone Hybrid

TeleHybrid turns your existing phone system into a "broadcast-ready" telephone system. That’s right! TeleHybrid installs easily to any phone set (analog, digital, single, or multiple line) as long as the handset is detachable with a modular plug. Once connected to your studio phone, TeleHybrid will provide high quality digital nulling for full duplex audio without echo or feedback.

Operation is simple. Answer each call with the handset as you normally would. When you’re ready to put the call on the air just set the handset down on TeleHybrid’s pressure sensitive keypad. Pick the handset up to talk to the caller off-air and hang up the handset to disconnect the call. It’s that easy!

Telehybrid  Mfr. List $795.00  Call For BSW Price

TELESWITCH - Telephone Call Director

With TeleSwitch, up to five lines can be directly connected, placed on hold, and routed to a hybrid or telephone set. Conference and even record callers with the press of a button. TeleSwitch will work with most business phone systems. Installation and operation is simple as using a multi-line telephone. Control panel lights indicate whether the line is ringing, in use, on hold, or available. Unit uses standard RJ11C telephone connectors.

Teleswitch  Mfr. List $995.00  Call For BSW Price

G2500 - Digital Telephone Hybrid

Unlike other hybrids, the G2500 features an automatic mix minus allowing you to feed the program output of any console down the telephone line, even when the output contains caller audio. The G2500 automatically removes the caller audio from its feed path. Also featured in the G2500 are: auto answer/disconnect, auto-nulling, auto re-null on new line selection, RS-232 control, single cable conferencing and acoustic echo suppression to further reduce the chance of feedback.

G2500  Mfr. List $1,995.00  Call For BSW Price

DHIII - Digital Telephone Hybrid

The Digital Hybrid III is the newest generation of Gentner’s most popular hybrid. With automatic gain control, automatic nulling and automatic re-null on new line selection (through a call director such as a multi-line telephone or Teleswitch etc.) DHIII provides the best possible hybrid performance from line to line. The DHIII also provides a one button record feature that starts and stops outboard recorders. Just push the record button and DHIII will automatically start your tape machine and stop it at the end of the call. The cue feature allows your talent to use the DHIII off the air much like a speakerphone. A remote cue input allows you to use this function automatically via the cue position on your console.

DHII  Mfr. List $1,895.00  Call For BSW Price

DHIA - Digital Telephone Hybrid

Now you can take advantage of digital signal processing technology to enhance your telephone audio with the Gentner Digital Hybrid. Using DSP technology, DHIA "auto nulls" every time it is activated to provide a match to that particular telephone line’s characteristics, so telephone audio is crisp, clear and understandable without annoying feedback or hollowness. Then, during the course of the call, it monitors the telephone line and automatically adapts to any changes that could create problems.

DHIA  Mfr. List $1,199.00  Call For BSW Price

G3200 - Digital Telephone Hybrid

Designed for large talk studios or talk shows with a live audience, the G3200 combines both digital hybrid technology and digital acoustic echo cancellation to provide clean telephone audio. When caller audio is sent over studio speakers, some returns to the mics, creating potential feedback. The G3200’s acoustic echo canceller automatically removes this audio from its send path (even when it has been delayed by as much as 224 milliseconds). Where echo cancellation is not required, the canceller can be used as an auto mix-minus generator. The same automatic features as the G2500, plus a built-in auto mic mixer (up to three mics) and power amplifier, make the G3200 ideal for a number of talk show situations.

GENTNER

SPH5 - Telephone Hybrid
The SPH5 incorporates advanced features not found in most analog hybrids. For instance, with a single push of a button you can automatically start your tape recorder to record both on and off-air calls. The cue function will route audio to the caller via the announcer mic or the mix-minus output of your console, manually or automatically, so you can talk to callers before they go on the air. Low distortion, low noise and maximum telephone frequency response ensures the best possible caller audio quality. The SPH5 represents the ultimate in analog hybrids.

SPH5  Mfr. List $879.00  Call For BSW Price

SPH3A - Telephone Interface
The SPH3A telephone system provides an easy, inexpensive method of interfacing your equipment with a telephone system allowing simultaneous send and receive audio (full duplex operation). It can be used for on-air interviews and talk shows, recording telephone calls in the production studio or newsroom, or for teleconferencing applications. Built-in monitor amplifier eliminates the need for guests or talent to wear headsets to hear the caller. The SPH3A is simple to install and works with most analog and digital phone systems, including multi-line systems. SPH3A is fully remoteable.

EXCALIBUR

HC -1 - Handy-Coupler
The HC-1 gives you the simplest, quickest, most convenient way to connect audio to a telephone. The HC-1 connects in series with the handset of any telephone using modular connectors. External audio is connected via 1/4" connectors on back. Unit is passive, so no power is required. Simply press the front panel on-off button and external audio in and out are connected to your telephone. Release the button and the handset is once again connected, allowing normal use of the telephone.

HC1  Mfr. List $99.00  Call For BSW Price
Without taking one step away from your comfy little desk right here.

Introducing the easiest way to monitor transmitter sites...

With the introduction of the GSC3000, you can now control from one to 256 transmitter sites while barely moving a muscle. What's more, if you decide you've had enough of the office and would rather monitor your sites from home, the GSC3000 can be controlled from a network - either local or wide area. Heck, you can even control them from your laptop, on a beach in the Bahamas. The GSC3000 simply brings you more transmitter site control and expandability than you've ever seen before. And no, it's not expensive and it's not complex. Because the system is modular, each site can be set up to control from 8 to 256 channels of metering, status, and command. So it can meet the needs and budgets of a single site radio operation or be expanded for the most complex television broadcast company.

The GSC3000 also features automatic and time of day commands, and macro command functions. Plus, the friendly Windows interface makes the whole thing as simple as point and click. For more information on specs and features, please give us a call.

100 Delta - Digital Hybrid

The advanced digital signal processing (DSP) in the Telos 100 Delta results in full-duplex, natural sounding conversation on even the most difficult phone lines. Plus, smart digital gain control and equalization offer increased caller intelligibility. The dynamic digital equalizer is so advanced that its technology is not currently found in any other broadcast product. The EQ examines the caller audio in three bands and automatically equalizes the high and low bands, with reference to the middle band, to create uniform spectral density.

Other digital processing components include logarithmic (dB) dynamics control, context sensitive output AGC, and feedback suppression for greater gain before feedback when monitoring callers through open speakers.

Installation and operational enhancements include dual inputs and outputs, comprehensive metering, and two remotely selectable adjustments for caller override.

**1X6 - Multi-line Talk System**

The ONE-x-Six has all of the telephone interface equipment needed for talk show programming. A single rack mounting unit houses both a Telos ONE digital hybrid and a six-line, broadcast phone system which includes all of the most popular features found in Telos' top-of-the-line Direct Interface Module.

For system control, the ONE-x-Six is packaged with a desktop Switch Console at no additional charge. Special function buttons on the Switch Console are used to automatically select the next caller, to control external recorders and delays, and to access several other unique features. Using your ONE-x-Six could not be easier. The Switch Console is used to place calls, put callers on the air or on hold, and to conference. A standard telephone set may be used for call screening. To meet the needs of smaller installations, the ONE-x-Six is very easy to install. All six phone lines are connected using standard RJ-11C plugs and all audio connections are XLR.

Call Screen Manager complements the ONE-x-Six and other Telos talk show systems by helping your screener/director provide your talent with the information they need. Your ONE-x-Six can be dialed. SAFE keeps operation simple for non-technical personnel, but, if the station requires, the user can disable this feature from the back panel and turn the system into a single, preferred configuration. The user can dial, disconnect and edit messages.

Two independent headphone outputs have selectable source controls for monitoring local and/or return audio. The three-input mixer has two mono mic level and a two-channel line level input. Two independent headphone outputs have selectable source controls for monitoring local and/or return audio. The straight forward, easy to operate front panel controls handle channel assignment and input levels, with more advanced audio routing preferences accessed from the LCD and EDIT control.

**ZEPHYR - Digital Network Audio Transceiver**

Zephyr is the ideal solution for remote broadcasts, ad hoc networks, voiceovers, commercial distribution, backup to microwave and satellite links, and many other applications. On just one ISDN circuit, Zephyr can convey 20 kHz duplex stereo audio and it can transmit 15kHz mono audio using only one of an ISDN line's two channels.

MPEG audio Layers III and Layer II, as well as G.722, are provided for the highest audio quality and compatibility with nearly every installed codec. Features include a built-in ISDN terminal adapter with NT-1 and 9600 baud RS-232 bidirectional data for communications and control. Available V.35 connection allows Zephyr to connect with Switched 56 and other data links. Controls are straightforward for easy operation by non-technical users. Zephyr includes full metering, a headphone jack, mic/line inputs, and input protection limiting.

**ZEPHYREXPRESS - Portable Zephyr System**

Sending live audio from the field via ISDN has never been easier. Telos lightens your remote broadcast burden with the ZephyrExpress, by combining a full-featured codec, an ISDN terminal adapter, and an audio mixing/monitoring system, all in a road-rugged chassis. With ZephyrExpress, there is no need to lug additional electronics. Complete features of the standard Zephyr are included. You get MPEG Audio Layers III and II, as well as G.722 for the compatibility and performance you require. G.711 allows you to place a voice grade call to any standard telephone so you can save the expense of an additional circuit at the remote site.

Of course, Telos' ISDN terminal adapter, compatible with virtually every ISDN system in the world, is included. ISDN operation is through familiar keypad, a large LCD display, and an EDIT control knob. The menu structure is simple and includes on-line help.

The three-input mixer has two mono mic level and a two-channel line level input. Two independent headphone outputs have selectable source controls for monitoring local and/or return audio. The straight forward, easy to operate front panel controls handle channel assignment and input levels, with more advanced audio routing preferences accessed from the LCD and EDIT control.

A unique, selectable SAFE feature allows the ZephyrExpress to be locked into a single, preferred configuration. The user can dial, disconnect and change levels but is restricted from modifying the ISDN set up and number to be dialed. SAFE keeps operation simple for non-technical personnel, but, if the station requires, the user can disable this feature from the back panel and access the full menu.

The molded chassis of the ZephyrExpress absorbs the bumps of the road, Optional hard and soft carrying cases are also available.

Hassled by ISDN

Loves Zephyr

The new voiceover guy lives 1000 miles away, and travel is just not in the budget. The music bed got lost in shipment, and you need it by noon. And it’s ratings time again – tomorrow’s remote had better impress the heck out of the advertisers.

Radio is complicated. Zephyr makes it easier.

Zephyr is number one among US radio stations for sending high quality audio over ISDN. Once programmed, anyone can Auto-Dial ISDN calls. Not sure what to do next? Press the HELP button for plain English information.

Telos will even help you get your ISDN line ordered. Just call our Customer Support guys or check our web site.

Zephyr is full-duplex for two-way transmission. And don’t sweat about what codec is on the other side - with Layer III, Layer II, and G.722, Zephyr can handle whatever is thrown at it.

Zephyr might not get you more vacation time. But if you find some, please be sure to send us a postcard.

- The ideal solution for remote broadcasts, ad hoc networks, voiceovers, distribution of commercials, backup to satellite and microwave links, and many other applications.
- Designed by Telos specifically for radio applications over ISDN.
- Clean, uncluttered front panel for simple operation. Full metering, call duration timer, headphone jack, and mic/line inputs.
- Built-in input protection limiter. When your talent screams, your audio doesn’t distort.
- Zephyr has an integrated ISDN terminal adapter designed for the non-technical operator. You can even place a standard voice-grade call to a Plain Old Telephone Service (POTS) telephone.

Telos Zephyr: The Best Way to Hear from There™
Test/Servicing Equipment

BIRD

Test Equipment

Now in its fifth decade of serving the broadcast industry, Bird Electronic Corporation has been the pioneer in developing products for measurement, filtering and termination of RF power. The Company's products, originally developed in response to specific design requirements of broadcast equipment manufacturers, have since become standards of the industry. Recognizing that broadcast test equipment must be even more reliable than the transmitter, constantly on-call and totally trustworthy, Bird has achieved an enviable record of reliability.

BROADCAST TOOLS

TALKING DUCK - Remote Audio Circuit Identifier

The Talking Duck, unlike any other product available, conveniently identifies any audio circuit. By simply connecting the wall transformer to the Talking Duck and pressing the RECORD button, a 16 second identifying message may be recorded. On playback, a 4 second 1 kHz tone along with the recorded message will continually run. By connecting the Talking Duck to a Telco loop or ISDN equipment, the user can immediately identify a remote circuit by dialing up or selecting the circuit and listening to the message. The Talking Duck will continually feed the circuit until a 1/4" TRS plug is inserted into the front panel jack, at which point, the recording is disconnected and the source equipment is switched back to the circuit.

AA-51A - Audio Analyzer
The AA-51A is a multipurpose, precision audio analyzer which was designed specifically to enable the measurement of critical audio parameters in terrestrial broadcast transmitter facilities. This instrument measures audio level, total harmonic distortion, intermodulation distortion, frequency response, wow and flutter, stereo signal phasing, left channel/right channel amplitude ratio and frequency. The AA-51A exhibits excellent RF shielding and is rugged, portable, accurate, simple to operate and suitable for extended field use.

AA-51A Mfr. List $3,960.00 Call For BSW Price

AG-51 - Stereo Audio Generator
The AGS1 produces low distortion sine wave signals from 20 Hz to 200 kHz, a 3.15 kHz fixed frequency wow and flutter test signal and an intermodulation test signal of 60 Hz and 7 kHz at a 4:1 ratio. Output signals are simultaneously available at levels of up to +20 dBm at separate LEFT and RIGHT output ports. Outputs may be selected for left only (L), right only (R), left and right in phase (L+R), or left with right in 180° opposition (L-R). Outputs are fully balanced (or unbalanced) at a source impedance of 600 ohms (or 150 ohms)

AGS1 Mfr. List $3,525.00 Call For BSW Price

RDL

RU-OSC4A - Sequencing Audio Oscillator
This device features 4 separate oscillators set at 100 Hz, 1 kHz, 7.5 kHz and 15 kHz. Tones sequence through, holding on each for a user-selectable period from 3 to 30 seconds with a silent period between the 15 kHz and 100 Hz tones. A hold button allows the user to manually hold a tone indefinitely until the hold button is pushed again. Continuing to push the hold button selects the next frequency for fully manual operation. Output connections are made via barrier block terminals. See page 74 for Stick-On series/oscillators.

RUOSC4A Mfr. List $230.00 Call For BSW Price

WHIRLWIND

Cable Tester
Check for shorts and bad connections easily with the Whirlwind Cable Tester. Accommodates XLR, 1/4” and phono plugs. 9 volt battery required. Fits in your tool box.

Before Snakeskin

After Snakeskin

SNAKE - Wire And Cable Cover

This unique product makes an excellent covering for bundles of wire or cables. When your wires are tucked inside the Snakeskin they become a single audio 'snake' cable that is easy to manage, providing a sleek, clean appearance. The wrap around design provides 100% coverage that holds wires snugly in place. Wires can be covered with or without ends attached and can be branched out at any point along the snake. Since Snakeskin is expandable, you can add wires to your bundle at any time. Choose 1/2" or 1" styles for your particular application.

SKIN0.58B
1/2" Snakeskin, 8' section
BSW Price $16.00

SKIN1.08B

- NC3MX XLR male

**CONNECTRONICS**

Bodge Plugs - Emergency Audio Connectors

No tool kit is complete without a set of Bodge Plugs. Each plug has either two or three color coded, spring loaded, quick connect terminals. By pushing the end of the terminal a slot is opened to receive and hold securely a bare wire or test probe. 45 different adapter cables can be quickly made in the field without the need of soldering.

**CONNECTWORKS**

YC40 - Unidapt Universal Adapter Kit

The YC40 allows you to mix and match any male or female adapter section with any other SMA, N, UHF, BNC, TNC, F, RCA or mini UHF section. Simply choose the two common connector ends you need, and screw them together with the universal adapter.
