## Let BSW Work to Your Advantage

**Best Price Guarantee** – You can be confident you are getting a competitive price at BSW. We guarantee to beat any competitor's printed advertised price within 30 days of purchase date.\*

**Same Day Shipping** – BSW stocks a huge warehouse of products. If we have it in stock, we will ship it the same day. Just call us by 5:00 PM Eastern Time.\*\*

**Knowledgeable Sales Staff** – Our sales professionals have real-world broadcast and studio engineering experience to offer expert help with your equipment purchase.

**Extended Hours** – We are open from 6:00 AM to 6:00 PM Pacific Time, 9:00 AM to 9:00 PM Eastern Time. You can also fax us anytime using our toll-free number – or better yet, email us at sales@bswusa.com or visit www.bswusa.com.

**Flexible Terms** – We offer a variety of payment methods including open net 30-day account to qualified domestic businesses, major credit cards and personal checks with TeleCheck approval.

## More Benefits With Advantage Partners

This Advantage Partner Logo next to products throughout this catalog indicates that these products carry the special Advantage Partner benefits listed below.

- **Extended Product Warranty** – All products from these manufacturers come with an extended product warranty for up to twice as long - at no additional cost!
- **Extensive Product Inventory** – BSW will keep an even larger inventory of Advantage Partner products on hand for fast shipment to you. We also offer the best possible access to the factory for the non-stock products you want.
- **Factory Trained and Certified Sales Representatives** – BSW sends our sales representatives to the factory for in-depth product training so we can offer you the best sales support possible.

\*Items must be new, current models and available from an authorized dealer. Ads must be in printed direct mail or trade publications. \*\* Applies to domestic customers with approved credit only.

## QUICK INDEX

Detailed manufacturer and product listings are found on page 175-176

Amplifiers (power, distribution)	3-6
Audio Processing	7-24
Cart Machines & Accessories	25
Cassette Machines	25-29
Compact Disc Machines	29-33
Consoles (on-air)	34-40
Consoles (production, compact mixers)	41-50
Digital Recorders/Production Systems & Accessories (DAT, hard disk, MD, multitrack)	51-74
EAS (Emergency Alert Systems)	75
Headphones/Headsets & Accessories	76-83
Interface/Patching Equipment	83-90
Microphones & Accessories	91-107
Public Address (PA Systems)	108-109
Reel-to-Reel Recorders & Accessories	110
Remote Control	111-115
RF Equipment (RPU monitors - modulation, RDS, tuners)	115-121
RF Equipment (RPU, STL, transmitters)	121-128
Satellite Equipment	129
Speakers & Accessories	130-136
Studio Furnishings (furniture, rack accessories, power, lighting, sound treatment, storage, meters, clocks, weather)	137-143
Studio Furnishings (power supply, misc.)	144-151
Telco Equipment (codecs)	152-157
Telco Equipment (hybrids & couplers)	158-163
Telephone Systems	164-165
Test /Servicing (testers, service supplies)	166-168
Turntable & Accessories	169
Wire & Cable Products	170-172
Order Form and Credit Application	173-174
Index	175-176

## How to Use This Catalog

Since we represent over 200 manufacturers, we provide thousands of products that would be impossible for us to list in any one source. Our 176-page catalog is a representation of the most popular products from each manufacturer. So if you don't see the products you seek, just ask.

All products are shown with the manufacturer's list price (not our sales price). Because our catalog is printed each year in January, it is impossible to print retail pricing for the entire year. Rest assured, BSW is going to offer you an excellent price on every item in our catalog, so please call or fax us today to get your discounted BSW price.

Products are organized in this catalog alphabetically by general application categories, and within each category alphabetically by manufacturer. Major category headings are listed on page 1. Product descriptions and list prices are subject to change at the manufacturer's discretion.

### Need Complete Product Specifications?

Complete product specifications are available upon request. We are happy to fax or e-mail you additional product information as we cannot possibly include all product information in each catalog listing. Also, you may visit our website at [www.bswusa.com](http://www.bswusa.com) which includes hot links to many of the manufacturers we represent. Specifications should be verified prior to ordering, as they do change without notice.

### Stock vs. Non-Stock Items

**Special order or non-inventory items** (designated by an asterisk\* in this catalog) may be subject to restrictions on return or exchange. A BSW sales professional can verify if any product is deemed "non-inventory".

In addition, a restock fee may be assessed on returns of non-inventory items or for reasons other than defect, damage or situations arising outside of BSW's control.

## How Do I Order from BSW?

Call us toll-free at 1-800-426-8434 from anywhere in the United States, Puerto Rico, U.S. Virgin Islands and Canada. International customers, please call us at 253-565-2301. Sales professionals are on duty 6:00 AM to 6:00 PM Pacific Standard Time, Monday through Friday.

You may fax us toll-free (1-800-231-7055) or e-mail us at ([sales@bswusa.com](mailto:sales@bswusa.com)) and a sales professional will contact you to confirm your order. International customers, please fax your order to 253-565-8114. As a convenience, we have provided an order form on page 173 that you may photocopy and fax to us. Or visit our website at <http://www.bswusa.com>.

### We Offer Flexible Payment Terms

To qualified *domestic business* and educational customers, net 30-day billing is available with approved credit. For your convenience, a credit application is provided on page 174. We also accept Visa, Mastercard, American Express and Discover. Personal checks may be accepted with TeleCheck approval. Limited COD services are available to BSW business customers only. COD service is available on inventory items only. Please check with your sales representative for further details.

BSW offers our *international customers* a number of payment options: Prepayment via Checks/Cash/Cashier's Check. (funds in U.S. dollars and checks drawn on a U.S. bank) • Payment via Letter of Credit • Payment via Visa, Mastercard, American Express or Discover • Payment via Wire Transfer. Interbank wire services (such as SWIFT) are the preferred option of payment. Please contact a BSW international representative for information on all purchasing options.

### Customized Shipping to Meet Your Needs

We know fast delivery is important to you, so we make every effort to stock the items you need. Our warehouse is filled with thousands of items available for immediate shipment. Some products will be shipped directly from the manufacturer at our discretion. We offer a variety of shipping options and carriers to save you money and time.

Shipping charges are based on actual shipping weights plus a minimal handling fee, so please call for price quotes if paying in advance. Shipping charges will be added to the credit card if provided. BSW ships F.O.B. Point of Origin unless other arrangements are made and approved in advance.

### BSW Return Policy

If a return of any equipment is deemed necessary, please contact our customer service department immediately at 800-426-8434 or 253-565-2301 between 6:00 AM and 6:00 PM Pacific Standard Time for a Return Authorization (RA) number. You may fax customer service at any time (253-565-8114) or e-mail to [custserv@bswusa.com](mailto:custserv@bswusa.com).

For your convenience, complete return instructions, including return shipping labels, are included on the back of all BSW packing lists. Please contact your sales professional or BSW customer service for additional information.

### Fine Print

BSW is not responsible for typographical or photographic errors. Suitability of products for intended use is the sole responsibility of the customer. All factory warranties apply. Service and repair must be completed at designated factory repair centers. BSW will not be responsible for any damage resulting from the equipment we provide. BSW strives to provide its customers with the very best in professional audio equipment and service. We go to great lengths to ensure that your order is correctly filled in a quick and concise manner; however, an occasional error may occur. In these situations, BSW stands ready to correct the problem and work with you to resolve the situation in a timely manner. BSW cannot assume responsibility for delays or errors caused by manufacturers or others in the course of doing business.

**ALESIS**

**RA100 - Power Amplifier**

Features: front panel level controls; silent, convection cooling with large built-in heat sinks for silent operation; .05% THD; power-up delay; clip lights on each channel; unbalanced 1/4" inputs; 1/4" and push clip speaker connectors. 90-day warranty.

RA100 75 watts/chan. @ 8Ω Mfr. List \$379.00 Call For BSW Price

**BRYSTON**

**2B-LP/3B-ST - Power Amplifiers**

Features (2B-LP): front panel level control; power/clipping indicator; front panel headphone jack; ground lift switch; balanced inputs with gold plated XLR or 1/4" connectors; gold-plated 5-way binding post output connectors; < .01% THD; 20-year warranty.

Features (3B-ST): power/clipping indicator; ground lift switch; balanced/unbalanced inputs with gold plated XLR/1/4" combination connectors; gold plated 5-way binding post output connectors; < .01% THD; 20-year warranty.

*2BLP	60 watts/chan. @ 8 ohms	Mfr. List \$995.00
*3BSTPRO	120 watts/chan. @ 8 ohms	Mfr. List \$1,650.00
*4BSTPRO	250 watts/chan. @ 8 ohms	Mfr. List \$2,350.00

Call For BSW Prices

**CROWN**

**D45/D75A - Power Amplifiers**

Features (both models): detent, front panel level controls; power and distortion indicators; active balanced inputs with XLR/1/4" combination connectors; barrier strip output connectors; < .001% harmonic distortion @ full power; 3-year, no-fault warranty.

D45	25 watts/chan. @ 8Ω	Mfr. List \$487.00	Call For BSW Price
D75A	40 watts/chan. @ 8Ω	Mfr. List \$641.00	Call For BSW Price

**CROWN**

**K SERIES - Power Amplifiers**

Features: completely sealed construction; no fan noise; unmatched thermal efficiency; recessed front panel level controls; LED indicators; universal power supply; modular design in a wide variety of colors; XLR and 1/4" TRS input connectors; 3-way binding post output connectors; 3-year warranty.

*K1	350 watts/chan. @ 8 ohms	Mfr. List \$1,532.00
*K2	475 watts/chan. @ 8 ohms	Mfr. List \$1,840.00

Call For BSW Prices

**CE SERIES - Power Amplifiers**

CE Series amplifiers have the rugged construction that characterizes Crown amplifiers, but at a very affordable price level. Features: front panel level controls; useful function indicators including power, signal, clip and fault; fan-assisted cooling; short circuit protection; 3-year warranty.

*CE 1000	275 watts/chan. @ 8 ohms	Mfr. List \$718.00
*CE 2000	400 watts/chan. @ 8 ohms	Mfr. List \$1,025.00

Call For BSW Prices

**MACRO TECH - Power Amplifiers**

Features (all models): front panel level controls; stereo, bridged mono and parallel mono modes; balanced 1/4" TRS inputs; very low distortion with extremely high dynamic range; 3-year no-fault warranty.

*MA600	220 watts/chan. @ 8 ohms	Mfr. List \$1,532.00
*MA1200	310 watts/chan. @ 8 ohms	Mfr. List \$1,789.00
*MA2400	520 watts/chan. @ 8 ohms	Mfr. List \$2,299.00

Call For BSW Prices

**MICRO TECH - Power Amplifiers**

Features (all models): rear panel level controls; stereo, bridged mono and parallel mono modes; balanced 1/4" TRS inputs, binding post output connectors; 3-year no-fault warranty.

*MT600	220 watts/chan. @ 8 ohms	Mfr. List \$1,075.00
*MT1200	320 watts/chan. @ 8 ohms	Mfr. List \$1,383.00
*MT2400	520 watts/chan. @ 8 ohms	Mfr. List \$1,793.00

## HAFLER

### P SERIES - Power Amplifiers

Features (All models): front-panel level controls; soft start power-up; silent convection cooling; output overload protection circuitry; clip and thermal indicator lights; balanced/unbalanced inputs with XLR/1/4" combination connectors; 5-year warranty.

Features (P1000): headphone jack; unbalanced RCA inputs; screw terminal outputs; <0.2% THD.

Features (P1500 and P3000): MOSFET output stages; overload indicator lights; 5-way binding post output connectors; <0.1% THD.

P1000	50 watts/chan. @ 8 ohms	Mfr. List \$569.00
P1500	75 watts/chan. @ 8 ohms	Mfr. List \$599.00
P3000	150 watts/chan. @ 8 ohms	Mfr. List \$779.00

## QSC

### PLX SERIES - Power Amplifiers

The PLX features studio-quality audio performance including virtually inaudible hum and noise (-110 dB 20 Hz-20 kHz) and ultra-low distortion performance (.03% THD at rated power into 8 ohms). Features: PowerWave supply delivers tight high output bass; compact chassis fits in any rack; LED indicators include bridge mono and parallel input modes; all metal XLR and 1/4" balanced inputs; selectable clip limiting and subsonic filters for each channel; 4-wire shock-proof binding posts; true soft-start turn-on.

*PLX1202	200 watts/chan. @ 8 ohms	Mfr. List \$798.00
*PLX1602	300 watts/chan. @ 8 ohms	Mfr. List \$1,198.00
*PLX2402	425 watts/chan. @ 8 ohms	Mfr. List \$1,498.00
*PLX3002	550 watts/chan. @ 8 ohms	Mfr. List \$1,798.00
*PLX3402	700 watts/chan. @ 8 ohms	Mfr. List \$2,098.00

Call For BSW Prices

## MACKIE

### M800/M1400i - Power Amplifiers

The M800 and M1400i deliver excellent audio quality, reliability under extreme conditions and watts-per-dollar value. Features: front panel level controls; T-design constant gradient fan cooling; ultra-low impedance capability; built-in sweepable constant directivity horn compensation; built-in sweepable high-pass filter; flat response over a wide frequency range (+0/-3 dB from 10 Hz to 70 kHz); low distortion (M1400i THD is only .012% at 8 ohms; M800 is only .025%); XLR thru, 1/4" TRS and 5-way binding post outputs.

M800	140 watts/chan @ 8 ohms	Mfr. List \$549.00	Call For BSW Price
M1400i	250 watts/chan @ 8 ohms	Mfr. List \$699.00	Call For BSW Price

## SYMETRIX

### 420 - Power Amplifier

Features: front panel level controls and headphone jack with a speaker mute switch; a mono/stereo mode switch and a switch to allow the gain controls to operate independently or be ganged together; THD < .02% at full power output; 1-year parts & labor.

420	20 watts/chan. @ 8 ohms	Mfr. List \$429.00	Call For BSW Price
-----	-------------------------	--------------------	--------------------

## QSC

### RMX SERIES - Power Amplifiers

RMX series amplifiers offer true professional-quality performance at low cost. Features: front mounted gain controls; independent, user-defeatable clip limiters to reduce distortion; selectable low-frequency filters (30 Hz or 50 Hz) to protect speakers and increase headroom; signal and clip LED indicators to monitor performance; variable-speed fan cooling; balanced XLR, 1/4" TRS and barrier strip inputs; binding post and Neutrik Speakon outputs.

*RMX850	200 watts/chan @ 8 ohms	Mfr. List \$549.00
*RMX1450	280 watts/chan @ 8 ohms	Mfr. List \$649.00
*RMX2450	475 watts/chan @ 8 ohms	Mfr. List \$899.00

ATI

DDA SERIES - Digital Distribution Amplifiers

These AES/EBU digital audio distribution amplifiers are available in single and dual input configurations. Levels and connectors are optimized for use with balanced XLR 110 ohm cable or unbalanced BNC 75 ohm coax. Adjustable input equalization and multiple regenerated independent AES/EBU low jitter output make them ideal for the most demanding digital audio signal distribution requirements. Features: accepts sample rates from 27 to 96 kHz; data re-clocking and regeneration; input cable equalization; status and error indicators; transformer balanced inputs; up to 12 XLR or 24 BNC outputs per channel.

*DDA106XLR	1 x 6	Mfr. List \$799.00

AUDIOARTS

SDA8400 - Distribution Amplifiers

The model SDA-8400 is a 1x8 channel stereo, rack mount distribution amplifier. Features: LED status lights for all input and output channels; extremely flat frequency response; separate 3-conductor connectors for each input and output.

*SDA8400	Mfr. List \$524.00	Call For BSW Price
----------	--------------------	--------------------

ESE

ES246/ES217 - Distribution Amplifiers

The ES246 is a rack mount, quad 1x6 DA with the choice of barrier strip or optional XLR connections. Features: front panel gain adjustment is available for each of the 4 input channels; balanced or unbalanced operation with switchable 600Ω or 10kΩ input termination; barrier strip model is 1RU high, the XLR model is 2RU high.

The ES217 is a 1x4 DA housed in a free-standing chassis. Features: barrier strip or optional XLR connections; balanced or unbalanced I/O.

*ES246	1x6 DA, barrier strip	Mfr. List \$395.00

## HENRY ENGINEERING

### U.S.D.A. - Distribution Amplifier

U.S.D.A. ("Utility Summing and Distribution Amplifier") can be used as a conventional 1x4 or 2x4 DA, or to combine a stereo input to a mono output. **Features:** two inputs (one stereo pair) accept balanced or unbalanced sources; four 600 ohm balanced outputs (two stereo pairs); mono/stereo switches; built-in power supply; screw barrier connectors.

USDA	Mfr. List \$195.00	Call For BSW Price
------	--------------------	--------------------

## RDL

### RU-SERIES - Distribution Amplifiers

These compact, rugged distribution amps can be mounted up to three across. All units require a PS24A power supply.

**RU-DA4D Features:** two independent channels with one input to 4 outputs; can be configured for 8 mono outputs from single source; balanced or unbalanced I/O via barrier strip connectors; screwdriver level controls.

**RU-UDA4 Features:** two channels, each with a single input to 4 outputs; inputs and outputs are unbalanced -10 dBv with RCA connectors; unity gain is maintained on both channels.

**RU-BDA3 Features:** single, front panel XLR input with gain control accepts either balanced or unbalanced sources; three balanced 150 ohm XLR outputs; alternate rear panel screw barrier input.

RUDA4D	dual 1x4 or mono 1x8 DA	Mfr. List \$231.00

# More Truth in Advertising

It's no longer a secret, people all over the world are discovering, despite the hype, that digital dynamics processing can't compete with good analog. Even Cutting Edge® claims their Omnia unit sounds almost as good as analog, while both Cutting Edge and Orban® claim each other's digital product trashes the signal.

The Apex 2020 FM Pro offers the purity of an all analog signal path with the power of digital control. Through its use of 11 patented circuits, the 2020

achieves the greatest possible loudness while retaining musicality and naturalness.

No digital grunge, no aliasing, no overshoot. No subcarrier artifacts from composite clipping. Just the loudest, cleanest FM processing with the greatest possible coverage area.

Better sound *and* more listeners - too good to be true? Call Apex today for a demonstration, and we'll show you there *is* truth in advertising.

**APHEX**

**2020 FM PRO - Digital FM Audio Processor**

Inspired by the success of their Audiophile Air Chain, Aphex has created the FM Pro, a world-class, digitally controlled FM processor with modular and upgradable architecture. FM Pro was designed to offer maximum processing flexibility to help you create a truly unique and competitive sound, from detailed and neutral to heavy and loud. **Features:** 8 read-only factory presets; 16 user programmable read-write presets; Frequency Discriminate Leveler with selectable silence gate and AGC upper and lower control limits; 4-band compressor with adjustable crossover frequencies, adjustable compression drive, Easyrider compression and Peak Accelerated Compression algorithm; bass processor with bass clipper, warm bass EQ, sub bass EQ and total bass mix control; peak limiter; remote control interface with Windows-compatible software for PC control locally or remotely via modem; supervised password security; large LCD graphics panel display; rotary encoder knob; extensive real-time LED metering; balanced XLR analog I/O. **Options:** 2020-1 AES/EBU I/O; 2020-2 pre-emphasis limiter with special 50 or 75 microsecond pre-emphasis filtering and non-overshoot low-pass filters; 2020-3 combination Digicoder type PPDM stereo generator with the pre-emphasis limiter.

**MILLENNIUM - Digital Audio Processor**

The Millennium digital audio processor from Circuit Research Labs marks the beginning of a whole new generation of audio processing technology. The sound is clear and real loud. The Millennium is based on a 32-bit floating point DSP processor. It has a straightforward touch screen and graphical user interface that allows you to create your own unique sound identity – setting your station apart from the crowd. There’s also a legion of factory presets from which to choose.

**Features:** the Millennium includes a true digital stereo multiplex generator, AGC, five-band compressor and a multi-band limiter; remote control software that makes adjustments fast and easy; 100% floating point digital signal processing; 256 kHz final limiter sample rate (the highest currently available); it accepts analog and AES/EBU digital signals (wired or optical). It can even accept both at the same time and mix them in the digital domain.

Hardware and software upgrades are included for the first year at no charge. The AES/EBU rate adaptive digital interface (32 kHz/44.1 kHz/48 kHz) is included at no additional cost. Warranty (parts and labor) is 3 years. The unit is available in an array of “loud” colors as well as black.

**716-00 DAVID II - FM Stereo Processor/Generator**

The DAVID II integrates FM audio processing and stereo generation into a single, easy-to-use affordable package. It lets you achieve an aggressive sound that is fully protected from overmodulation without sacrificing ease of setup. **Features:** digital synthesis of the composite multiplex signal; feed-forward pulse width modulation (PWM); built-in composite processor to maximize modulation density; unique "bass-enhanced" feature (suppresses subaudible program components while augmenting legitimate "bottom-end"); internal combining for SCA and RDS subcarriers.

**71600 Mfr. List \$2,000.00 Call For BSW Price**

**708-00 - Digital Synthesis FM Stereo Generator**

The 708-00 provides cost-effective stereo generation for audio processors that don't have a stereo generator built in. **Features:** digital synthesis of the stereo pilot and MPX signals; front-panel metering; patented overshoot compensation with an adjustable pre-pilot composite clipper; adjustable composite equalization; internal combining for SCA and RDS subcarriers.

**\*708-00 Mfr. List \$1,530.00 Call For BSW Price**

**MODULATION SCIENCES**

**CP803 - Composite Processor**

Keep your FM station loud, clean and legal by adding the CP803 to your compressor/limiter/stereo generator to enhance the stereo composite signal. Increase your signal by 6 dB with greater dynamic range without the breathing, pumping or swishing associated with conventional processing. The composite processor also eliminates peaks of overmodulation and limits composite signal without affecting stereo pilot. BNC composite I/O.

**\*CP803 Mfr. List \$1,495.00 Call For BSW Price**

**SCA186 - Sidekick Subcarrier Generator**

All you need for SCA in a single chassis. The SCA186 contains subcarrier generator, audio processing, peak holding deviation meter, noise generator and incidental AM noise meter to optimize transmitter tuning for minimum cross talk. Specify 67 kHz or 92 kHz subcarrier when ordering. Balanced screw barrier inputs; BNC composite input; BNC telemetry input; BNC RF input; BNC composite output; BNC SCA output.

**\*SCA186 Mfr. List \$3,835.00 Call For BSW Price**

**OMNIA**

**OMNIA - Family of All-Digital Audio Processors**

Since the Omnia.fm all-digital audio processor made its debut, it's become the model for an entire family of processors dedicated to providing the best audio platform for different broadcast media. Now in addition to the FM model, Omnia is available in AM, Digital Audio Broadcasting and Internet Webcasting versions. Plus you can order Omnia.fm with specific algorithms for your station's format!

Omnia.fm is a complete digital 4-band FM processor with digital stereo encoder. It utilizes an advanced design philosophy to provide extraordinary sonic performance with maximum control flexibility. From the user-adjustable wideband AGC to the ThunderBoost EQ and non-aliasing final limiter, Omnia will not compromise your sound. What does all this technology add up to? Crystal clear power.

**Features:** software configured processing on a plug-in PC card with user adjustable wideband AGC; Thunder Boost EQ for cleaner, more powerful low end; four-band AGC; four-band dynamic peak limiter; non-aliasing final limiter that exceeds the smoothness of a well designed analog limiter; selectable composite clipper. Additional features: factory presets for various formats, plus user presets; daypart automation; front panel headphone jack; external control is via local serial RS-232 or modem; balanced XLR analog I/O; AES/EBU digital I/O; SCA/RDS subcarrier input; two independent composite outputs.

**Options:** new Omnia plug-in PC Card modules provide algorithms to further tailor the power of the Omnia platform; for crank-it-up-to-eleven loudness, choose the Hot model; for stations with more traditional formats like classical or jazz, choose the clean sound of the Veris. The new Space-EFX algorithms improve the stereo soundfield without creating unnatural imaging or increasing multipath.

Omnia.fm,jr is a lower priced, 3-band all-digital FM processor. All other features are identical to the Omnia.fm, including digital I/O and digital stereo generator and it can be upgraded to Omnia.fm at any time.

Omnia.am offers unrivaled levels of positive modulation with a smooth, FM-like quality plus adjustable filtering for NRSC and narrow band broadcast requirements throughout the world. Stereo or mono processing.

Omnia.net provides spectral and loudness consistency to webcasts. It optimizes audio processing for a wide range of bit rates and audio bandwidths; it also conditions audio processing for multimedia listening environments.

Omnia.dab optimizes audio processing for selected broadcast bit rates and audio bandwidths as high as 20 kHz. It's compatible with Eureka-147 transmissions.

Call today and speak to one of our knowledgeable sales professionals about the right Omnia model for your station or application.

**OPTIMOD™ 8200 - FM Digital Audio Processor**

The 8200 is a complete digital audio processing system for FM broadcast, fulfilling all of your station's processing needs: automatic gain control, compression, peak modulation control and stereo generation. Features: flexible software-based processing; select from several factory presets or adjust and store your own custom presets (up to 32) for instant recall; 5-band processing for comprehensive modulation control; fully software upgradable; automatic program switching for format changes throughout the day or night; 8200PC Software (included with purchase of 8200) provides full control of your station's processing from any location. It displays all of the 8200's meters and processing controls on a computer screen via modem communications or direct connection. Balanced XLR I/O and BNC composite outputs.

**Options:** the 8200D/32 basic digital interface card allowing 32 kHz AES/EBU inputs and outputs; the 8200D/SRC digital interface card which can accept inputs of 32, 44.1 or 48 kHz AES/EBU and convert for output of 32, 44.1 or 48 kHz AES/EBU.

# If you want to know what's new in AM processing, ask the guy who's been thinking about it since 1962.

**BOB ORBAN** is a quiet legend in radio. Which is ironic, considering all he's done to engineer louder, clearer, punchier sound in AM broadcast. But after nearly four decades studying, listening, and thinking about audio processing, that wealth of experience has found its way into the latest release of the OPTIMOD 9200 version 2.0. What began as the industry's first 100% digital, fully programmable AM processor is now ready to take major market sound into the new millennium – with unmatched performance, price, and, of course, Orban engineering.

## ART AND SCIENCE

Version 2.0 takes the polished, proven sound of the OPTIMOD-AM and blends it with exceptional digital controllability. So now you have a much wider range of sound signatures at your fingertips, with factory presets that guarantee outstanding results even if you aren't an audio processing expert. Day-parting is easy, too, just by using the 9200's versatile remote control to recall presets.

Whether it's sports, news/talk or music, Orban's exclusive receiver equalizer overcomes the muddy sound of typical AM radios without sacrificing loudness or coverage. The 9200 delivers a bright, clear, punchy sound at a

price that's even less than its analog predecessor. So small market stations can easily achieve major market sound, while larger stations can customize their sound precisely for their format and target demographic.

## NOW HF READY

Version 2.0 adds presets that improve punch and intelligibility for narrow-bandwidth audio like shortwave. The same presets are perfect for MW stations needing to cut through co-channel interference at night. So the 9200 is now the perfect choice for MW broadcasters and HF broadcasters alike.

What's more, programmable bandwidth gives MW users the ability to tailor bandwidth to suit their program, and optimize coverage. You can use full bandwidth for music, lower bandwidth for voice. Or reduce your bandwidth if it's required for AM IBOC broadcasts. No other AM processor offers you more options, better engineering, or greater investment protection. That's why in just a few

short years, it's become the best-selling digital processor in AM. With nearly four decades of Orban expertise behind it, it's the digital solution that deserves to be called an OPTIMOD.

## THE OPTIMOD 9200

*Pump up your voice with the new ToolVox from Omnia.*

## TALK TO ME, BABY

The new ToolVox from Omnia is the all-digital microphone processor that jocks everywhere have been waiting for. With ToolVox, voice talent is clean, full and powerful—while the music remains untouched.

ToolVox is the best sounding mic processor ever because it harnesses the power of DSP. Bulletproof AGC, compressor and noise gate sections neatly handle everything from a whisper to a scream. An intelligent de-esser—the first of its kind—uses sophisticated FFT analysis to automatically find and remove every trace of sibilance, while preserving high end frequencies. Built-in phase

rotators and TrueVerb from Waves® allow you to maximize vocal presence without affecting the rest of the air-

chain. And unlike some “flying saucers”, the front panel is talent-friendly—just a single knob and selector switch control everything.

If you think this sounds great on paper, wait ‘til your jocks hear ToolVox in the studio. It’s the first microphone processor designed by people who really understand audio processing.

To find out more, call BSW at 1-800-426-8434. We’re listening to you, baby.

# THE ENTIRE HISTORY OF VOICE PROCESSING INNOVATION

## 528E Voice Processor

Based on Symetrix's pioneering design in analog voice processing. Microphone preamplification, de-essing, compression/limiting, downward expansion, parametric equalization and voice symmetry alignment all in one self-contained rack space. Twelve years after Symetrix introduced the 528, the 528E remains the industry standard for voice processors.

## 628 Digital Voice Processor

The next generation in personalized signal processing for voice talent. This digital counterpart combines the familiarity of the 528E's analog front end with the power of 119 custom presets. No menus to step through, just straightforward adjustments with the turn of a knob. The optional RC-1 remote controller accesses eleven presets, provides a bypass function and eliminates frantic dashes to the equipment rack. Presets tailored for each on-air talent are only one button away with the 628.

**Voice Processing Excellence  
for Broadcast and Production**

 **Symetrix**

## ALESIS

### 3630 - Compressor/Limiter/Gate

An affordable dual channel unit, the 3630 ideal for a number of applications from vocal recording to stereo program mixdown. Features: switchable RMS/peak and hard knee/soft knee styles of compression; variable attack and release in peak mode allow you to customize the dynamic response to suit the job; independent built-in noise gate ensures quiet performance; sidechain inputs for de-essing or ducking functions; dual mono or stereo operation; unbalanced 1/4" I/O with -10/+4 level selection.

3630 Mfr. List \$299.00 Call For BSW Price

## APHEX

### 661 - Expressor Tube Compressor/Limiter

This single channel unit combines several of Aphex's leading technologies such as Expressor™ manual compression circuitry, Easyrider® automatic compression and Tubessence® tube sound circuitry. Features: HFX™ high frequency expander; linking for multi-unit operation; sidechain low-cut filter; 20 segment audio level and gain reduction meters; switchable -10/+4 levels; balanced XLR and TRS I/O.

661 Mfr. List \$749.00 Call For BSW Price

### COMPELLOR - Compressors/Limiters

The dual-channel 320A delivers intelligent compression, levelling and peak limiting simultaneously for automatic gain riding that is artifact-free. Features: dynamic silence gate and quick compression recovery; 3 modes of stereo/dual mono operation; comprehensive metering; balanced or unbalanced I/O via XLR connectors.

The single-channel 323A combines Compellor® circuitry with Aphex's popular Aural Exciter® circuitry. Balanced or unbalanced I/O via XLR connectors.

## DBX

### DDP - Digital Compressor/Limiter/Gate

The DDP stereo processor gives you the classic dbx sound with gating, compression, limiting, de-essing and sidechain EQ with the precise control of digital. Features: extensive metering; graphical representation of signal shows composite effects in real time; 24-bit A/D-D/A converters; 50 factory and 50 user presets; balanced XLR and TRS 1/4" I/Os. Options: digital I/Os.

DDP Mfr. List \$599.95 Call For BSW Price

### QUANTUM - Digital Mastering Processor

Quantum is the first studio mastering tool that offers sampling rates up to 96 kHz, with a true 48-bit digital signal path and superior dbx dynamics processing. It also comes with the patent-pending TYPE IV™ conversion system on board. TYPE IV captures the character and original warmth of any analog signal to the digital domain. Features: 4-band stereo compressor/gate/limiter; 5-band EQ (hi and low shelves, 3-band fully parametric); outputs to 16, 20 or 24 bits; AES/EBU and S/PDIF digital I/O.

QUANTUM Mfr. List \$1,995.95 Call For BSW Price

## DBX

### 160SL - Compressor/Limiter

The newest member of the 160 series, the 160SL is designed around a powerful VCA that boasts 127 dB dynamic range. Features: ultra-low distortion; attack, release and hard-knee threshold characteristics of the classic 160; OverEasy® compression mode; PeakStopPlus® limiting; sidechain input; Jensen® transformers; balanced I/O with gold-plated Neutrik® XLR connectors.

\*160SL Mfr. List \$2,799.95 Call For BSW Price

### 160A - Compressor/Limiter

The 160A is an improved version of the famous 160 single channel compressor/limiter. Features: Over-Easy® or hard-knee operation; wide range of compression ratios including negative compression; gain reduction and input/output level metering; balanced XLR and TRS inputs; independent balanced XLR and unbalanced 1/4" outputs.

160A Mfr. List \$459.95 Call For BSW Price

### 1066 - Compressor/Limiter/Gate

This flexible dynamics control device allows you to choose the level and style of compression/limiting you like. Use the "Auto" button to automatically achieve a classic "dbx" sound, or use the independent attack and release controls to tailor the 1066 to your specific needs. Features: PeakStopPlus™ circuitry offers stiff limiting without unwanted side effects; new lightpipe technology replaces standard LEDs, making the 1066 very easy to read and operate; sidechain input for ducking and frequency dependent limiting; balanced inputs and outputs with XLR and 1/4" connectors.

1066 Mfr. List \$549.95 Call For BSW Price

### 166XL - Compressor/Limiter/Expander/Gate

This two-channel, stereo linkable compressor/limiter/expander/gate offers a choice of Over-Easy® or hard-knee compression with two sets of program dependent attack and release time constants. Features: expander/gate with continuously variable release and a 75 dB threshold range; PeakStop® limiting; switchable low frequency shelf prevents LF programming from punching holes in your sound; balanced XLR and 1/4" inputs and outputs.

166XL Mfr. List \$329.95 Call For BSW Price

## DBX

### 266XL - Compressor/Gate

The 266XL is a full-featured, high-performance dual compressor/gate that uses the dbx AutoDynamic™ attack and release circuitry to deliver true dbx compression for a wide range of applications, plus an advanced dbx gate circuit for smooth, natural sounding gating. Features: stereo or dual-mono operation, separate precision LED displays for gain reduction; simple set up and operation; sidechain insert; balanced XLR and 1/4" TRS inputs and outputs.

266XL Mfr. List \$249.95 Call For BSW Price

## PRESONUS

### ACP88 - Eight Channel Compressor/Limiter/Gate

The ACP88 is an 8-channel dynamics processor designed to provide compression, limiting and noise gating in a variety of applications: multitrack recording, live sound reinforcement, broadcast and permanent sound installations. Each channel on the ACP88 provides crystal clear, musical compression and is equipped with full-featured controls including variable attack and release and soft/hard knee. Features: manual or auto compressor mode; noise gate with gate key/sidechain for precise frequency gating applications; linking function makes it possible for any channel to be linked (from 2 to 8 channels together in any order); LED indicators; balanced 1/4" TRS I/O (selectable +4dBu/-10dBu switch); two-rack, all-steel chassis.

\*ACP88 Mfr. List \$999.95 Call For BSW Price

### ACP22 - Compressor/Limiter

The ACP-22 two-channel dynamics processor is designed to provide compression, limiting and noise gating for a variety of applications. Features: compression ratio from 1:1 to infinity:1; variable attack and release times and switchable hard/soft-knee; automatic mode offering program dependent attack and release times; switchable gate range (-60dB/-6dB); internal power supply; balanced XLR and unbalanced 1/4" I/Os.

\*ACP22 Mfr. List \$399.95 Call For BSW Price

### BLUEMAX - Compressor/Limiter

PreSonus BLUEMAX is a smart stereo compressor/limiter with 15 studio presets: 3 vocal presets, 8 instrument settings, 2 classic stereo settings and 2 special effects. Besides the studio presets, its manual mode gives you full control over compression parameters including variable input/output, attack/release times and ratio from 1:1 to 20:1. Features: onboard metering shows input/output levels & gain reduction; sidechain input; stereo/mono operation; +4/-10 stereo operating levels; internal power supply; unbalanced 1/4" I/Os.

BLUEMAX Mfr. List \$199.95 Call For BSW Price

# M80

## The PreSonus M80 Eight Channel Microphone/Preamplifier with Mix Bus.

*"...a microphone power tool...eight channels of no-fuss gain, a convenient mix bus and flexible I/O..."*

*Laren Alldrin, Pro Audio Review*

- Amazing front end for two, four or eight channel analog to digital converters including Digidesign™ 888, MOTU™ 2408 & others.
- High headroom mix bus allows true stereo imaging.
- High impedance inputs for exceptional instrument preamplification.
- Insert your favorite outboard gear via Servo Balanced Send/Return Jacks.
- Feed the inputs of any digital audio workstation with the M80's direct outputs.
- Chain multiple M80's together via the Auxiliary Input.
- Mix Bus assign for Multiple Mic/Instrument Stereo Imaging and monitoring via headphone out.

# MP20

## The Perfect Gift for Your Favorite Pair of Microphones.

*"Wholly praiseworthy products seem to come along only once in a blue moon... The PreSonus MP20 is one of those rare products."*

*Brian Knave, Electronic Musician*

- Each channel includes Polarity Reversal, Phantom Power, 20dB Pad, Rumble Filter, Full Output Metering and High Impedance Instrument input for DI with amplification.
- HUGE Class A Sound!
- 10Hz to 50kHz Bandwidth. E1N less than -127.5dB.
- IDSS Control Adjusts Harmonic Distortion to emulate a tube circuit.
- Servo Balanced Send and Return Jacks on Each Channel for External Balanced Processing.
- High Output Headphone Amplifier.

# VXP

## Instant Vocal Karma.

The PreSonus VXP Dual Servo Mic Preamp Voice Processor.

Your all-in-one, easy-to-use, set & forget total microphone processing solution!

- Mic Preamp: Hi quality transformer with Class A Discrete Input Buffer, Dual Servo Gain Stages. IDSS Control. Phantom Power. 20dB Pad.
- Dynamics Processing: 16 Pre-set compression curves. Downward Expander (Variable). De-esser (Variable). Crystal Clear Compression Optimized for Maximum Dynamics Control.
- Equalizer: Four Band, Semi-Parametric EQ with Low and High Shelving. High Pass Rumble Filter. Narrow Q select.
- Peak limiter Maximizes Bit Resolution for Digital Recorders and provides a separate Threshold from the compressor section.
- Optional 24-Bit, 48K/96K digital audio output card. Crystal™ converters, selectable sample rate external clock input, psycho-acoustic dithering. SPDIF and AES/EBU output connections.

# FEEL THE VIBE

PreSonus products have vibe, making them favorites with engineers & artists all over the world. Use PreSonus products for your own creative applications. PreSonus' huge sound ng, musical mic-preamps give YOU the creative edge! Packed with the latest in engineering excellence, high-end components and amazing features, unparalleled artistic attitude can be yours! If you don't have at least one PreSonus product in your rack, it is time you felt our vibe!

### PE17 - Parametric Equalizer

Rane's five-band parametric EQ is excellent for digital audio workstations, production and on-air applications. Low noise and wide bandwidth make it ideal for heavy commercial use. Features: 5 bands each with full 10 Hz to 20 kHz frequency range; sweepable high and low-cut filters; bandwidth range from 2 octaves to .03 octave;  $\pm 12$ -15 dB boost/cut range; individual band bypass switches; balanced XLR and 1/4" TRS inputs and outputs; 1/4" TRS patch insert jack.

PE17 Mfr. List \$549.00 Call For BSW Price

# 60 PRODUCTS, ONE PROMISE.

You've probably heard that Rane makes the best EQs and crossovers around. You heard right. But you've really only heard the beginning. Rane actually makes more than 60 different innovative audio products, from tiny low-noise mic preamps to sophisticated multi-function Digital Signal Processing stations. Rane products serve a wide variety of applications from sound stage to nightclub, recording studio to teleconferencing system, courtroom to cinema. But they all have one thing in common—the Rane philosophy. A dedication to quality we promised in our very first brochure. And a promise that is stronger than ever today. We vowed that each and every model we make will carry that distinctive set of Rane characteristics: top of the line performance, refreshingly easy to operate, remarkably cost-effective, extremely reliable, and thoroughly backed by the best technical and customer support in the industry. We've made good on this promise for nearly two decades, with legions of satisfied Rane owners to show for it. Whatever your sound needs might be, be sure to ask about Rane. You'll be very glad you did. We promise.

## RANE

### ME SERIES - Graphic Equalizers

The ME60 dual channel stereo graphic equalizer features 20mm sliders for precise visual control. Features: 2 x 30 bands of interpolating constant-Q filters; sweepable high and low-cut filters;  $\pm 12$  dB boost/cut range; input level controls; overload indicators; bypass switches; balanced XLR and 1/4" TRS inputs and outputs; unbalanced RCA I/O; two-year limited warranty.

The Rane ME15B is a 2 channel, 15-band 2/3 octave EQ in a single rack space unit. The ME30B is a single channel unit with 30 bands (1/3 octave). Features (both units): a range switch for the 20mm faders allowing cut or boost of  $\pm 12$ dB or  $\pm 6$ dB; input and output level controls; balanced XLR or 1/4" TRS I/O.

## EVENTIDE

### H3000B SERIES - Broadcast Ultra-Harmonizers

In addition to offering natural sounding reverbs, delays, built-in sound effects, etc., the H3000B+ Broadcast Ultra-Harmonizer allows broadcasters the ability to create special effects and character voices quickly, at the push of a button. Like its famous predecessor, the H3000B, the H3000B+ has two full-function pitch change channels that can operate in phase-locked stereo, dual, layered or reverse mode. So, if you can imagine what a four-headed troll sounds like, you can create that sound with the H3000B+. Features: factory presets designed specifically for broadcasters; time compression with algorithms for gating, compression and ducking; TimeSqueeze® function for automatically controlling the speed of reel-to-reel and cart machines; Mod Factory "algorithm construction kit" which allows selecting and patching together a set of independent processing modules; balanced XLR analog I/O;

H3000B/LT is a less expensive version without the TimeSqueeze® algorithm (variable-speed tape machine control) included in the B+.

## LEXICON

### MPX-100 - Multi-Effects Processor

The Lexicon MPX-100 is a true stereo dual-channel effects processor for powerful, affordable signal processing. Features: 24-bit internal processing; 20-bit A/D and D/A converters; 240 presets, 16 user programs; dual stereo effects with pitch, 5.7 second delay, modulation and Lexicon reverb; independent processing on each input and simultaneous analog and digital outputs; software selectable MIDI out/thru port; S/PDIF digital output; unbalanced analog RCA I/O.

MPX100 Mfr. List \$299.00 Call For B5W Price

### PCM81/PCM91 - Digital Effects Processors

25 years of experience go into the making of the PCM81 Digital Effects Processor and PCM91 Digital Reverberator. Lexicon's unique dual-DSP platform enable the PCM81 to create the most flexible effects combined with superb reverb, while the PCM91 offers reverbs that rival Lexicon's top-end units. Features: PCM81 has 300 presets (50 user), PCM91 has 450 (100 user); dynamic spatialization effects for 2-channel or surround applications; PC (RAM) card slots accept optional RAM cards for storing your own settings, or an optional series of effects cards adding new algorithms and capabilities; AES/EBU and S/PDIF digital I/O; balanced/unbalanced 1/4" TRS I/O (PCM91 includes XLR connectors).

**MX SERIES - Audio Consoles**

True modularity, superior flexibility and low cost give Fidelipac's MX series consoles real value for the dollar. MXR consoles are available with 6, 8, 10 or 12 rotary faders. MXL consoles offer 6, 8, 10 or 12 linear faders mounted three inches apart. MXE consoles permit 10, 12, 14, 16 or 18 linear faders mounted two inches apart. Features: fully modular input modules with precision motherboard construction offer durability and flexibility. Every input module has two inputs that can be wired for mono or stereo. The "A" side of any input module can be fitted with an optional mic preamp (one included standard). Line inputs can be wired for consumer or pro level, eliminating the need for outboard matching units. Additional features include VCA mixer and monitor control; two input expansion switches; four assignable outputs - two stereo plus two mono; remote start logic; count-up event timer; built-in cue amp/speaker and headphone amp; all steel construction; excellent RF immunity; virtually indestructible control surfaces.

### NUMIX - Digital Audio Console

Numix's ergonomic shape gives your studio a modern, open look. The enclosures are low and narrow providing better line-of-sight and access to video monitors behind the console. The control surface is modular in design. Start with a Selector wedge and add as many fader wedges as you need. The surface is as flexible as you choose. Faders can be limited to just one or two inputs or can access up to every input and output on the Audio Engine. This means smaller, less expensive hardware can still get a big job done.

Stored setups can be created which will allow each operator or day part to have a different configuration. You can even have multiple control surfaces connected to one Audio Engine. These surfaces can run independent studios or act as one large console for talent and producer-type shows.

The Numix connects to the Audio Engine with a single cable which makes installation a snap. Its flexibility, modest size and ease of use make it a clear choice for a full featured console. Call and talk to our sales professionals today.

**\*Price Based On Configuration**

### ROC-10 - Digital Audio Console

The Logitek ROC-10 console control surface is ergonomically designed with 10 fully assignable faders, giving you easy access to up to 64 inputs. Separate audio and control sections allow you to keep audio out of the control room. **Features:** easily connects up to 64 inputs and outputs – analog or digital; analog inputs/outputs have 20-bit AD-DA converters; digital inputs take either AES or S/PDIF and have sample rate converters for each; each audio engine supports two control surfaces and replaces the need for an audio switcher; LCD display shows audio sources and their destinations. ROC-10 consoles are configured with a control surface in your choice of colors (white or gray), AE32 audio engine with communication controller and power supply, one SHARC™ DSP card for each control surface used and your choice of digital and/or analog I/O cards (4 stereo ins/outs per card) and mic preamps.

8-TRACK RECORDING    effects

## You asked. We listened.

The 1642-VLZ PRO is packed with goodies including sweepable midrange EQ, 75Hz low cut filters to cut room rumble and drum vibrations, Control Room/Phones switching matrix with individual level controls, four aux sends per channel, constant loudness pan control and in-place stereo solo.

**Recording:** The new 1642-VLZ PRO gives you the finest mic preamps ever offered on a compact mixer. Two dedicated channels for tracking. Eight for

monitoring. And two stereo channels for effects. Plus "double-bussed" submix outputs so you can feed all 8 channels of your recorder without having to re-patch.

**Live and Alive:** Mixers aren't always sitting calmly on the side of the stage anymore. Often, they're out front. They're instruments. The 1642-VLZ PRO has plenty of mic inputs for vocals, guitars and drums – plus 4 stereo channels for DJs and Keyboards.

Call toll-free or visit our web site for complete information on the new midsize luxury 1642-VLZ PRO. Learn why it's the best compact studio or live sound mixer (and rip-roarin' Electronica sound collage board) on the planet.

\* \$999 suggested U.S. retail price does not include extra toppings or optional thick Sicilian crust. Your price may vary. No user-serviceable parts in this footnote.

**VM-3100PRO/VM-3100 - Audio Mixers**

The VM-3100Pro and VM-3100 V-Mixing Stations offer professional digital mixing capabilities and superb 24-bit sound quality in compact and affordable desktop mixers.

The VM-3100Pro is a full-featured 20-channel/8-bus digital mixer with two high-quality onboard stereo effects processors, powerful Scene memory and MIDI mixer capabilities, and an optional external ADAT™/Tascam® interface. Because it is digitally controlled, the VM-3100Pro is able to be configured as a full 8-bus mixer via its stereo Main, Auxiliary, Bus and Monitor outputs. This flexible mixer also offers digital output via its Digital Out A and Digital Out B output busses, bringing the total number of busses to 12. The VM-3100Pro's powerful onboard dual-stereo multi-effects processors offer a variety of effects as well as Mic Simulation and even new COSM Speaker Modeling.

**VM-3100Pro Features:** compact digital mixer with 20-channel/8-bus design and full 24-bit resolution; two stereo multi-effects processors offer compression, reverb, chorus, delay, guitar/vocal/keyboard multi-effects, COSM Mic Simulation and Speaker Modeling; scene memory enables storing and recalling complex mixer settings, routings and effects; Full MIDI compatibility with external sequencer; onboard 136 x 32 dot backlit graphic LCD includes helpful icons; self-luminous buttons allow speedy operation  
**Options:** DIF-AT Interface Box adds ADAT™/Tascam® communication compatibility

The straightforward VM-3100 gives users 12 channels of 24-bit digital mixing with onboard stereo effects at an incredibly affordable price.

**VM-3100 Features:** affordable 12-channel/8-bus tabletop digital mixer; onboard stereo effects processor with compression, reverb, chorus, delay, and guitar/keyboard/vocal multi-effects

## SOUNDCRAFT

### GHOST - Audio Mixer

Soundcraft Ghost is the ultimate affordable analog recording console. It delivers the audio precision, quality and all the control features of a big studio desk without the usual prohibitive cost. These 8-bus in-line multi-track mixers are available in 24 channel, 56 input and 32 channel 72 input versions.

\*Price Based on Configuration

## SPIRIT

### FOLIO FX16 - Audio Mixer

A flexible 4-bus mixer, the FX16 is capable of producing digital quality sound for both live and recording applications. **Features:** 16 balanced mic/line inputs with UltraMic™ preamps, 60dB of gain range and +22dB of headroom; 4 auxiliaries with aux masters and AFL monitoring; Lexicon effects section with dual effects such as chorus and reverb, chorus and delay or reverb and delay; 3-band EQ with swept mid-frequency; steep 18 dB/octave high-pass filter; 4 stereo returns with level control; 4-bus structure with 2 subgroup outs; 100mm tapered faders; global +48V phantom power; optional rack mount kit.

\*RW5528 Mfr. List \$1,199.95 Call For BSW Price

### FOLIO FX8 - Audio Mixer

At home in studio and live environments, FX8 is a multipurpose console that offers the best sound and durability. **Features:** digital sound quality; 16 inputs standard; 8 balanced XLR inputs with mic preamps giving 60 dB of gain range; built-in Lexicon dual effects processor with editable programs and parameters; 8 globally pre/post switchable direct outs for recording or FX sends; 3 additional AUX sends with pre/post fader configurability; 3-band EQ with swept mids on mono inputs; steep 100 Hz 18 dB-per-octave high-pass filter on mono ins; PFL solo; 4 bus structure with 2 subgroup outputs; 2 stereo inputs with faders; 2 stereo returns for effects units or stereo instruments; 100mm tapered faders throughout; global +48v phantom power for condenser mics; channel and mix inserts; dedicated mono sum output with separate level control. All in a rugged chassis with an optional rack kit.

### O1V - Digital Audio Mixer

The replacement to the popular ProMix01, the O1V is an enormously powerful digital mixer featuring a wealth of signal routing, processing and mixing options. Features: 24 inputs (16 analog inputs – 12 balanced with mic pre amps and phantom power – plus 8 digital inputs); 99-scene memory; two stereo multi-effects processors with the same DSP as the Yamaha ProR3 and REV500, and an effects library with 42 presets and 57 user presets; 4-band EQ with dedicated knobs (each band adjustable from 20 Hz to 20 kHz); MIDI thru/in/out; 4 assignable balanced TRS analog outputs, balanced XLR stereo outputs; digital coaxial I/O. Options: expansion cards for an additional 8 digital inputs or 8 assignable digital outputs for direct connection to multi-track recorders.

O1V	Mfr. List \$1,999.00	Call For BSW Price
-----	----------------------	--------------------

### O2RV2 - Digital Audio Mixer

O2R Version 2 includes a long list of new features resulting from extensive consultation with many O2R users worldwide. O2RV2 builds in the basics of the original O2R such as an "open system" for compatibility with all major industry-standard digital audio formats (TASCAM [TDIF-1], ADAT, AES/EBU, and Yamaha), 40 input channels (24 analog and 16 digital), 8 output busses (analog/digital), 16 direct outputs, and 8 auxiliary sends for extraordinary signal processing power in remarkably compact dimensions.

New version 2 features add tremendous power with on-board 24-bit recording capability, various surround panning options, off-line copy-and-paste editing, timecode offset and timecode quick location, touch sense fader editing, which allows a fader to be instantly updated by simply moving it, MIDI remote and MIDI control assign; on-board MS stereo decoding, bus channel pairing, more flexible routing assignment and fader grouping, more scene memories, automatic fader start and stop of MD, DAT and CD - and much more. Features: 40 Inputs (24 analog inputs and 16 digital inputs provide for 40 channel inputs, with 16 of the 24 analog inputs incorporating high-performance head amplifiers for optimum matching with microphone or line sources; 24-bit recording; surround pan functions support 2+2, 3+1 and 3+2+1 (5.1) modes; Automix off-Line Editing; touch sense fader editing; timecode offset and eight timecode locate points; I/O assign input patching; MIDI control assign functions; remote MIDI control; 96 scene memories; fader start and stop internal automation system with 100mm motorized faders; "snapshot" scene memory; 4-band parametric EQ; 8 bus outputs; 8 AUX sends; 16 direct outputs; built-in dynamics and effects processing; balanced XLR stereo outputs; AES/EBU and S/PDIF digital outputs. Dimensions: 26"Wx27"Dx9"H. Options: digital interface cards for DA-88, ADAT, AES/EBU; MB02 Meter bridge.

## ARRAKIS

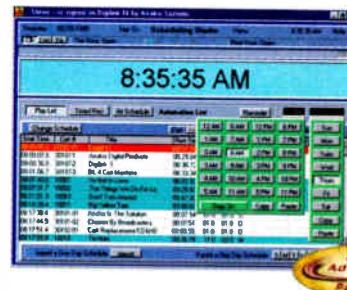

### DIGILINK IV - Digital Audio Storage/Automation Systems

The Digilink IV is an award-winning series of digital audio workstations designed for professional broadcast applications. Not a failure prone PC computer with a sound card, the DL4 is a dedicated digital audio record and playback jukebox that stores audio on high-quality SCSI hard disk. As a hard disk audio jukebox, the DL4 is not subject to viruses, network crashes, software conflicts, and other PC related problems. The built-in audio switcher for satellite and other sources and the logic control for console and satellite interface make the DL4 ideal for Live On-Air cart machine replacement, Hard disk automation and Satellite automation. Because the DL4 features 3 or 6 playback outputs and 1 or 2 Record inputs, a single DL4 workstation services as many as two On-Air studios and two Production/Scheduling studios from a single audio library. There is therefore no need for delay between Production and On-Air playback as found in computer based systems that must produce a spot in one studio and network transfer it to the Air studio. If there is a need to move an audio file from a PC to the DL4, the DL4 features a simple transfer utility. Because the DL4 has BOTH analog and digital inputs and outputs, the DL4 can be easily integrated into any existing studio.

With your audio secure in the DL4 hard disk jukebox, the workstation may be controlled in a number of ways to get audio to Air. The DL4 features an optional LCD control panel for local or remote control of record and playback, similar to a familiar cart machine.

Windows-based PC computers may run Arrakis software for Scheduling, Production, Live Air, Automation and Logging. Without the audio locked inside the computer, a PC makes an excellent control device. If the control PC fails, the DL4 workstation will continue to play to Air.

DL4-AUTO Automation Software

Arrakis Windows 95/98/NT control software features Voice tracking/Voice overs, Phoner recorder/editor, Jingle box, Cut and Splice MPEG editor without transcoding, sophisticated scheduling system and Logging, and much more.

The DL4-AUTO automation software shown above provides automated/semi-automated control for live assist On-Air play, hard disk automation and satellite automation including features such as a jingle box, phone editor and scheduling capabilities.

## ARRAKIS

DL4-SCHED Scheduling Software

DL4-SCHED scheduling software allows manual scheduling, importing of traffic schedules, importing of music schedules, timed recording schedules with full play logs. In addition to scheduling functions it provides facilities for audio recording and PC audio file transfer plus the ability to do voice tracking, phoner editing and segue editing.

Flexible, reliable, powerful, and easy to use, the DL4 workstation is an ideal choice for a complete radio station from Scheduling to Production to Air.

### DL4-STD-2 - Dual Studio System

On-Air & Production/Scheduling studios:

## WIREREADY NSI

### NEWSREADY32 - News Room Software

NewsReady32™ is a cutting edge, 32-bit Win95/NT newsroom system based on the original NewsReady and RadioReady Systems used by over 2500 radio stations. It integrates and organizes your wire services, news scripts, phone contacts, school closings, and audio bits all on the same screen and offers built-in word processing and audio editing. Digitally record and edit all your phone bits and automatically time-record all your satellite actuality feeds. Use with all Windows-compatible sound cards. Requires Pentium computer with Win95 or WinNT, 32 MB of RAM; 17" or larger monitor strongly recommended. Can run stand-alone, or multi-user on a LAN. LANs require a customer-supplied Windows, NT or Linux-based server. Includes 1-year of 24-hour 800# support and a free upgrade through manufacturer. Training, installation and maintenance packages also available.

NewsReady32 is now used by Clear Channel stations from coast to coast.

**TRC8 - Multitrack Hard Disk Recorder**

For pros that know the difference – this high-end 8-track hard disk recorder comes loaded with all the extras and delivers top-of-the-line sonic quality. Made by 360 Systems, the originators of rugged hard disk recorders for broadcast, the TRC8 offers true 24-bit audio performance for outstanding recordings. It comes with a complete set of synchronization and VTR emulation options; and an intuitive front panel design that makes setup easy. Features: large display with cut titles, status indicators and detailed menu prompts; supports all frame rates in both NTSC and PAL formats; sample rates extend from 44.1 kHz to 96 kHz; standard internal hard disk provides 2 hours of 8-track recording (optional drives can extend storage capacity to over 96 hours of track time); includes balanced XLRs for analog I/O; AES/EBU digital I/O; LTC and VITC; sync to word clock, AES black, or video reference signals; RS-422 P2 protocols for VTR emulation (emulates BVW-75, DVW-500 and PCM-7040); GPI/O; control I/O for keyboard titling and multi-machine remote control. Production/Editing: cut-copy-insert editing with tape-style scrub; jog/shuttle; auto locate; auto punch; read-modify-write; varispeed; crossfades; offsets; individual track slip; and more. Storage: supports hard disks of unlimited size; current internal hard disk options range up to 50 gigabytes for total recording times in excess of 12 hours for 8 tracks at standard broadcast 48 kHz sample rate. For recording on the go, check out the front panel drive bay, which supports high-density SCSI removable disks and hard disks. Rear panel SCSI allows use of external drive arrays. A 250 MB Zip® drive is included for economical storage, and can be used to load software upgrades received via e-mail downloads. Note: the TRC8 now also includes DVD-RAM!

**ALESIS**

**ADAT-XT20/ADAT-LX20 - Multitrack Recorder**

The Alesis ADAT-XT20™ offers a new standard in audio quality while remaining completely compatible with the huge foundation of 100,000 ADATs in use worldwide. Using ADAT Type II, the modular digital multitrack recording format that writes 20-bits to tape, the XT20 records 8 tracks of true, linear 20-bit digital audio onto tape (16 times more detailed than the 16-bit sound of compact discs), without using external converters or multiplexers. Features: intelligent software-controlled tape transport; familiar track copy, tape offset and track delay functions; 20-bit, 128-times oversampling D/A converters; onboard 10-point autolocation system, automated punch in/out; compatible with ADAT Type I (16-bit); six-pound die-cast aluminum chassis; balanced analog I/O via 56-pin ELCO connector; unbalanced RCA analog I/O (x8); optical digital I/O; optional remote controller (BRC).

ADAT-LX20 provides an economical solution for capturing the power of the ADAT format. It offers the same 20-bit ADAT type II digital recording format as the XT20, but lacks some of the high-end control features such as the 10-point autolocation system (ADAT-LX20 offers 5 locate points, etc.)

**D-108/D-160V2 - Multitrack Recorders**

Fostex D-108 and D-160V2 are the next generation of "stand-alone" digital multitrack recorders improving on the industry standard 16-bit linear recorders, the D-90 8-track and D-160 16-track machines.

Key features of the D-108 include Fostex's widely acclaimed FDM53 disk management technology allowing, for example, up to 1,548 track minutes of 44.1kHz full-bandwidth recording on an 8.2 GB hard drive (products ship standard with 5.2 GB hard drive; 8.2 GB hard drive is optional). A total of 24 tracks are available, of which 8 can be simultaneously recorded or played back at any one time allowing you to keep multiple "takes" of your tracks. The D-108 also offers an additional 99 memory locate points in addition to the 6 memory edit points, 99 "virtual reels" and a new graphical preview function, all of which are easily displayed on the large FL display. The most innovative function is the ability to export and import the tracks of any project as PC standard .WAV files to facilitate editing, processing and sound file conversion using any popular PC-based editing software. SCSI-2 is standard, with balanced I/O and comprehensive timecode facilities available on optional plug-in cards.

D-160V2 is a 16-track machine. It also ships with a 5.2 GB hard drive.

**FOSTEX**

**VR800 - Multitrack Recorder**

If you're looking for the ultimate in digital recording affordability, check out the VR800 digital multitrack from Fostex. Small, compact, yet incredibly powerful, it's the ideal partner for any digital mixing console, offering simultaneous recording of 8 tracks to the media of your choice via the ADAT optical interface. The VR800 has the ability to record at 16 bits with a sampling frequency of 44.1kHz across all of its 8 tracks. But one of the great things about the VR800 is that you're not limited to just 8 recording tracks. You get 24 uncompressed tracks in all. With this type of power you can record different versions, then choose which of the 8 tracks you wish to record or play back. The VR800 uses a digital non-linear recording system, so non-destructive Copy Paste, Move Paste and Erase functions are available, along with Undo/Redo commands. A handy preview feature enables you to repeatedly listen to data 1 second before and after any locate point. Ease of editing is also aided by the ability to display scrubbed audio graphically, making intricate "on-the-fly" edits simple. Handy locate tools include Auto Locate, Auto Return/Play and Auto Punch In/Out. A built-in metronome with eleven signature types, tempo control and MIDI clock output means your recordings will always be in time. And in addition to supporting MTC, MMC and Fostex System Exclusive Message, the VR800 also features Word Out for high-precision synchronization with external devices. Finally, your chosen media can be split into 99 "virtual reels" each with their own characteristics such as name, locate points, tempo and MIDI timing.

**TASCAM**

**MX-2424 - Multitrack Recorder**

The MX-2424 is a revolutionary product – a 24-bit, 24 track digital audio hard disk recorder. It ships with a 9 GB internal drive, which equates to roughly 45 minutes of recording time across all 24 tracks. If that's not enough, you can slave more drives off the SCSI Wide port on the back panel, or build a drive into the front panel standard drive bay. The front panel can also be used to install an approved DVD-RAM drive for back-up, using increasingly affordable DVD-RAM media (optional). Also, the MX-2424 can record to Macintosh (SDII format) or PC (.WAV format) hard drives, allowing you to later export to the computer for other functions. The MX-2424 can provide 24 tracks of recording at up to 48kHz, or it can be switched into a 12-track 88.2 kHz or 96 kHz recorder. The analog I/O option (not included at base price) has 96 kHz converters built in, so you REALLY CAN record 24-bit, 96kHz audio right from the machine without interpolation. Features: unlimited virtual tracks; 100 levels of undo; non-destructive or destructive recording modes; SMPTE synchronization, Word Clock, MIDI time code and MIDI machine control; the included ViewNet MX software runs on either Mac or PC, and connects with standard ethernet lines to provide DAW style editing, as well as system set-up screens and virtual track management; AES/EBU and S/PDIF 2 channel I/O. Options: digital I/O cards offer 24 channels of TDIF, Lightpipe or AES/EBU I/O; analog I/O card (the analog and digital slots are separate, so the analog option and one digital option may be installed simultaneously); RC-2424 remote control.

## DIGIDESIGN

### DIGI 001 - Digital Audio Interface

Digi 001 is a complete audio/MIDI, hardware/software solution in one box. Digi 001 comes packed with all the I/O options you need – eight analog inputs, eight analog outputs, eight channels of ADAT optical I/O and two S/PDIF I/O channels – all at 24-bit resolution. It also comes with a one-in, one-out MIDI interface built in, a footswitch input for QuickPunch control, and an additional pair of analog monitor outputs and a headphone output with separate volume control. Two of the eight analog inputs on Digi 001 include high-quality microphone pre-amplifiers with gain control and phantom power, reducing the need to incorporate a separate mixer. Instead, you can plug in an instrument or microphone, set the levels and start recording!

Because Digi 001 is an integrated system featuring hardware and software, both by Digidesign, there is no need for concern over compatibility issues. Everything about Digi 001 has been designed and tested as a complete unit in one location. With Pro Tools LE software, this cross-platform package<sup>†</sup> is ready to plug in and use. Software features include: up to 24 tracks of 16- or 24-bit audio; complete integrated MIDI sequencing; five inserts and sends per track for effects; 16 internal mixing busses, full dynamic and breakpoint automation supports Real-Time AudioSuite (RTAS) plug-ins and support of all Pro Tools automation modes except trim.

<sup>†</sup> Windows version of Pro Tool LE due 1st quarter, 2000

### TOOLBOX XP - Digital Audio Card/Software

Audiomedia III is the centerpiece of Digi ToolBox XP, Digidesign's simplest cross-platform solution for audio production. The Audiomedia III card has established itself as the most popular high-quality interface card. Audio enthusiasts of all disciplines use this simple PCI card to get better than CD-quality audio into and out of their computer. With 18-bit analog stereo I/O and 24-bit S/PDIF digital I/O, Audiomedia III makes it easy to interface with a small mixer or transfer DAT recordings. Now with Pro Tools LE (see description in DIGI 001 above), Digi ToolBox XP has everything you need in a single package. With Digi ToolBox XP, you have access to all the real-time processing and mixing power and high track count of Pro Tools LE at the lowest price available. Coupled with the Audiomedia III card's high-quality I/O and proven reliability, Digi ToolBox XP is an extremely cost-effective solution for digital audio production.

### SAW SERIES - Recording/Editing Software

Based on the already established and popular SAWPlus32 design, the new enhanced SAWPro is the ultimate SAW product for the professional, incorporating 24-bit/96 kHz capabilities, and new enhanced 3D rendered graphics, simultaneous playback of up to 32 mono or stereo tracks, and support for up to 12 stereo sound cards, translating into a maximum of 24 input/output channels.

With SAWPlus32 easily record and edit up to 32 mono or stereo tracks with 16-bit resolution (CD and DAT-quality sound files) directly on your computer's hard drive. SAWPlus32 supports up to twelve stereo sound cards for a maximum of up to 24 physical inputs and outputs, and automatically converts 8 bit, 16 bit, mono or stereo files of any samplerate, playing them all seamlessly in sync - live...in REAL-TIME! The elegance and speed of the SAW's design offers unmatched efficiency in taking a project from conception to completion.

SAW32 is identical in design to SAWPlus32, but has 16 mono/stereo tracks and supports up to 6 stereo devices.

Even the most basic of the SAW products, the SAW32LITE offers the same functionality as SAWPlus32, but has 8 mono/stereo tracks and supports up to 3 stereo devices.

# SONIC FOUNDRY

SONIC FOUNDRY'S AWARD-WINNING SUITE OF PRODUCTS IS THE TOTAL BROADCAST PRODUCTION SOLUTION.

CREATE

EDIT

DELIVER

YOUR TOTAL BROADCAST SOFTWARE SOLUTION

ACID PRO™ is the definitive production library. ACID PRO, and the Loops for ACID library offer a fast and easy, royalty free alternative to subscription libraries and music bed services. Use any of your own audio content, in .WAV or .AIF format, combined with anything from the Loops for ACID library and you've just created a customized music bed for a fraction of the price you might normally have spent with a service. ACID now includes wave editing and digital effects such as reverb, chorus, and delay.

Vegas Pro™ is Sonic Foundry's ultimate broadcast production tool. Music beds and background elements can be combined, mixed, and edited quickly. Create multiple versions very easily from a single Vegas project. Record voice-overs directly into Vegas and edit with speed, power, and convenience that you've never experienced before. Save to .WAV or streaming file formats and you're ready to go directly from Vegas to air.

Sound Forge™ 4.5 is still the standard by which audio editors are measured. 48 tools, effects, and processes including drag and drop audio mixing for voice-overs, compression, EQ, non-destructive play list editing, and batch processing. This is the workhorse that you can depend on. Sound Forge also supports DirectX plug-ins such as the improved Noise Reduction or unique Acoustic Mirror.

CD Architect™ provides layout tools that are unmatched in the industry and supports over 150 recorders. CD is still a great way to get audio from place to place and CD Architect allows you to read audio tracks from CDs, record from DAT, or digitize material through your sound card.

### SMARTSOUND - Soundtrack Software

SmartSound® is the revolutionary new family of audio software products that allows broadcast professionals to create soul-stirring soundtracks in minutes instead of hours. It is the first and only software to approach audio creation from a visual creator's perspective – not a musician's. And because of its patented, award-winning technology, visually creative people can open the program and begin creating emotion packed, precisely timed soundtracks with amazingly professional results in minutes.

It's simple. SmartSound takes fully orchestrated, high-quality, real music and sound effect files and embed them with special information. This information allows the patented software process to manipulate the audio in almost any way you choose – automatically. This gives you complete control over the soundtrack creation process without the need for time consuming sound editing of difficult music composition.

The software includes a complete library of 50 royalty-free, movie-quality selections written and performed by top hollywood professionals. These selections are designed to work with SmartSound's patented technology. You can save your finished soundtracks in most industry standard audio formats.

The optional Audio Palette and Sound Palette series of CD-ROMs lets you add as much "Smart enabled" music and sound effects as you want – at your own pace. Each palette contains plenty of versatile selections within specific areas of interest including: action, film scoring, documentary, narration, romance, commercials, sound effects and many more. New palettes are released each month.

# KILLER BROADCAST PRODUCTION SYSTEM

O1V Digital Audio Mixer

AX16-AT ADAT Audio I/O Expansion Card

AX88 Analog Audio I/O Expansion Unit

AX44 Analog Audio I/O Expansion Unit

## Do All of Your MultiTrack Recording, Mixing and Sound Processing On Your Desktop

The Yamaha DSP Factory gives you a constant supply of audio production firepower. It is based around the DS2416 PCI audio card with stereo analog and digital I/O jacks. The PCI card includes DSP chips with plenty of muscle to handle all of your recording, mixing and effects processing needs. In other words, your computer's processor never limits the DSP Factory's extensive capabilities – all it has to do is run your favorite recording software. DSP Factory expands to fit your specific needs with the AX44 4-channel I/O breakout box, the rack mount AX88 with 8 channels of 24-bit analog I/O, or the AX16-AT PCI card providing two pairs of ADAT-format optical connectors.

Get the full power from your DSP Factory with Minnetonka MxTrax software (specially bundled with DSP Factory). MxTrax takes full

advantage of all the processing power in the DS2416 PCI card to offer real-time mixing with drag-and-drop custom mixers, non-destructive waveform editing, EQ, dynamics processing, automation and more.

For even more power and flexibility, add Yamaha's O1V, a full-featured programmable 24-input digital mixer to your system. Its extensive analog mic and line inputs, digital inputs, effects and automation will come in handy during recording. Plus, you can map the O1V's faders and knobs to MxTrax to act as a hardware controller for on-screen mixing. However you configure your DSP Factory, you're certain to wind up with a killer broadcast production system that's cost effective, excellent sounding and easy to use.

World Radio History

## SOUNDSCAPE

IBOX8LINE 8-channel TDIF to analog interface sold separately

### MIXTREME - 16 Channel PCI Audio Card

The Mixtreme PCI card provides 16 channels of 24-bit digital input and output via two industry standard 8-channel TDIF (Tascam Digital Interface) ports, but it also has 24-bit digital mixing and real-time DSP effects plug-ins.

The fully configurable Soundscape V2 mixer puts a 24-bit, 16 in/out, 16 bus virtual digital mixer at your fingertips, running high-end DSP effects plug-ins from Wave Mechanics, TC Works and of course, Soundscape. DSP-based mixing has a very important advantage compared to computer based (i.e. native) effects and mixing. The latency (delay) for most computer-based mixers is anything from 100 ms upwards, which creates an extremely annoying delay when you try to record while playing back other tracks, or if even you just want to use the "real-time" effects. Mixtreme has a real DSP-based digital mixer on-board, and so what you hear is real-time.

Mixtreme's dual TDIF ports allow direct connection to a digital console or Tascam DA-88 (see page 64). Optionally, you can connect two IBOX8LINE 8-Channel TDIF to analog interfaces to Mixtreme, for 16 channels of 20-bit analog I/O. For ADAT users, there is the IBOX8ADAT TDIF to ADAT converter, and you can connect two of these, or combine an ADAT and analog interface.

Soundscape is now offering the Mixtreme 2000 PowerPAK that includes the Mixtreme card, plus the Soundscape iBOX 2-line interface, plus a bundle of software including: Nemesys GigaSampler LE synth program, Sonic Foundry ACID "Style" loop player and loops, Emagic's MicroLogic AV sequencer/audio recorder/editor, Sonic Foundry SoundForge XP 4.5 recording/editing software, Seer Systems SurReal synth engine, Wave Mechanics Reverb, plus Soundscape's Audio Tool Box - real time DSP studio multi effects plug-ins.

**DSP FACTORY DSP2416 - Digital Recording Hardware**

The DSP Factory DSP2416 offers the mixing power of the Yamaha O2R digital mixer complete with 24 channels of digital mixing, on-board digital effects and dynamics processors plus 16 tracks of hard disk recording with up to 32-bit resolution. Features: 24-channel, 32-bit digital mixer with 10 bus outputs and 6 aux sends; 4-band parametric EQ; 26 dynamic processors, 2 effects processors equal in quality to the REVS00 (see page 24); channel delay on 20 channels; 8 track simultaneous recording with 16 track playback with up to 32-bit resolution; signals to and from recorder and mixer remain in the digital domain; compatibility with a wide variety of control software programs; stereo analog I/O on RCA connectors; stereo digital (coaxial) I/O.

It is easy to expand the DSP Factory by adding multichannel interface boxes. The AX44 installs into the drive bay of a PC tower and provides four 1/4" analog inputs (two allow mic level) and four 1/4" analog outputs, plus a headphone jack. Two AX44s can be connected to one DSP2416 card to provide eight additional analog inputs and outputs.

The AX16AT is a PCI card that provides two pairs of ADAT optical connectors for transferring 16 tracks of digital audio to and from the DSP2416 card at resolutions of up to 24-bit.

For maximum I/O power choose the AX88. This single-space rack unit offers eight 24-bit, balanced inputs and outputs. Main inputs 1 and 2 offer front panel XLR/phone combo jacks and main outputs 1 and 2 also feature XLR and 1/4" connectors on the back panel. Input levels are selectable for +4dBu and -10dBv. The AX8816X links to an AX88 for an additional 8 channels of I/O (for a total of 16 channels).

MxTrax™ (see page 68), an easy-to-use multi-tracking and mixing software program offered by Minnetonka Audio Software, is designed specifically for the Yamaha DSP factory.

**CM AUTOMATION**

**MOTOR MIX - Workstation Control Surface**

Motor Mix provides a useful control surface for audio production software. It's dedicated to the task of providing natural control over audio mixing (eliminating the need for awkward mouse and keyboard controls for many functions). With Motor Mix's 8 assignable 100mm motorized faders, "view switches" and 8 rotary pots, you can control workstations with any number of channels. Operation is fast and intuitive and on-screen mixing just got a lot more efficient. Features: assignable rotary pots with display for control of Pan, AUX, Sends, EQ, Time Delay, dynamics and other plug-ins; backlit LCD screen; MIDI and serial interface supported by several popular software programs.

## GRAHAM PATTEN

### ADC-20/DAC-20/DMIX-41 - A-to-D/D-to-A Converters/Misc.

Part of the Graham Patten Sound Pals line, the ADC-20 and DAC-20 are compact and rugged converters. Features: 20-bit precision; simultaneous XLR and BNC outputs on ADC-20; both XLR and BNC inputs on the DAC-20; internal 44.1 or 48 kHz reference (specify when ordering) plus external AES reference (30 to 50 kHz) on ADC-20; headphone jack with level on DAC-20; battery or AC powered with optional AC adaptor.

With the DMIX-41 digital audio mixer combine up to four AES inputs into a single AES output. Inputs may be individually enabled or disabled remotely. When equipped with optional sample rate converters, the DMIX-41 can combine AES inputs with different sample rates.

The DTG-1 digital test generator is an economical source of a variety of audio test signals in the digital domain and output in the AES/EBU format.

## LUCID

### AD9624/DA9624/ADA1000 - A-to-D and D-to-A Converters

Lucid's AD9624 and DA9624 offer true 24-bit resolution assuring full dynamic range in both A/D and D/A signal paths. Features: 96 kHz conversion for maximum sampling bandwidth; true 24-bit resolution using high precision converters; simultaneous AES-3 (XLR), S/PDIF (coaxial), and S/PDIF (TosLink) digital outputs; 20-segment level LED ladders (input for AD9624 and output for DA9624). Features (AD9624 only): internally generated sample rates of 32, 44.1, 48, 88.2 and 96 kHz; external sync via word clock; user-selectable 16-bit noise shaping.

The useful ADA1000 combination A/D-D/A converter offers superior sound quality with 20-bit oversampling delta/sigma technology, a +4 dBu interface to your sound card with XLR and 1/4" analog, and AES/EBU or S/PDIF digital ports.

10 Years

NEW!

# PERSONAL MONITOR SYSTEMS AND HEADPHONE AMPLIFIERS

Rolls has introduced a complete headphone submixing and distribution system. The HM Series combines a main stereo mix with up to four mono auxiliary mixes, and distributes all signals out via a standard DB25 cable to the remote units. There you make your own mix. Plus, we've added compression and equalization to further custom tailor your mix. You won't find a more complete headphone monitoring system.

Rolls also offers the PM50s and PM50sOB (optional battery) Personal Monitor Amps. These units mix a 1/4" TRS stereo monitor signal with an XLR microphone signal. They make the perfect "more me" box - you mix your own voice/instrument with the main mix.

The PM52 replaces a monitor speaker. It requires no power - you simply plug this inline with monitor speakers, plug in your headphones and play.

Finally, our very popular line of headphone amplifiers are sure to keep even the most particular listener happy. The HA43 is a simple four-channel headphone amp with a single 1/4" TRS stereo input and four 1/4" TRS stereo outputs. The RA53 Five Channel and RA62 Six Channel Headphone Amplifiers feature individual channel inserts and a variety of input options. You need volume? We got it. All our Monitor Systems and Headphone Amps are loud. Even drummers love 'em.

## YOU'VE NEVER HEARD YOURSELF SO WELL

## ROLLS

### RA62 - Headphone Amplifier

This inexpensive headphone amp offers 6 stereo channels with independent output controls on each channel. The stereo input includes a pan control and a mono switch to mix two mono sources. Insert jacks are provided so each can be used independently.

## SYMETRIX

### 304 - Headphone Amplifier

This stereo input, 4-output headphone amplifier is the improved version of the popular SX204. It utilizes proprietary high voltage converter technology to drive high impedance headphones, while providing more than ample power for low impedance phones. It features individual volume controls for each channel plus a master input volume control, pass-thru jacks to permit daisy-chaining of multiple units and balanced or unbalanced 1/4" input.

## SS 2.1/BNC

*Composite - AES/EBU Switcher/Router*

Passive switching/routing with 2 composite audio, video or AES-EBU inputs to 2 composite audio, video or AES-EBU outputs, or vice-versa.

## SS 2.1/TERM

*Stereo Audio Switcher/Router*

Passive switching/routing with 2 stereo inputs to one stereo output or vice-versa.

## SS 3.1

*Stereo Audio Switcher/Router*

Passive switching/routing with 3 stereo inputs and one stereo output or vice-versa.

## DSC-20

*Dual Satellite Controller*

Adds remote control capability to the Scientific-Atlanta Encore, DSR-3610, AD-4595, Virtex StarGuide II/III, Com Stream and Wegener receivers, allowing memory/service - audio changing by automation systems or contact closures.

## USC-16

*Universal Satellite Channel Controller*

Offers remote control capabilities with multiple channel/memory selection for the Scientific-Atlanta 7300/DAT-32 series, ENCORE, DSR-3610 and AD-4595; Comtech/Fairchild DART-384, and Ariel type receivers.

## PBB-24

*Programmable Button Box*

Provides 24 SPST buttons to remotely control external equipment and/or be configured to generate user-programmable ASCII strings.

## IPC-1/IPC-2

*Level Converters*

IPC-1 is a bi-directional IHF to professional level converter. IPC-2 is a twin IHF to professional level converter.

## 3X2

*Dual Stereo Audio Switcher*

Active crosspoint switcher with 3 stereo inputs and 2 stereo outputs.

## 6X1

*Stereo Audio Switcher/Router*

Passive switching/routing with 6 stereo inputs and one stereo output, or vice-versa.

## 8X1 DAS

*Digital Audio Switcher*

Routes any one of eight AES/EBU digital inputs to three outputs.

## 8X2D

*Dual Stereo Audio Switcher*

Active crosspoint switcher with 8 stereo inputs, 2 stereo plus 2 mono outputs.

## 10X1

*Stereo Audio Switcher/Router*

Passive switching/routing with 10 stereo inputs and one stereo output or vice-versa.

## SS 12.4

*Stereo Crosspoint Audio Switcher*

Active crosspoint switching with 12 stereo inputs and 4 stereo outputs.

## SS 8.2

*Stereo Crosspoint Audio Switcher*

Crosspoint switching/routing with 8 stereo inputs, 2 stereo plus 2 mono outputs.

## MC-16

*Megacoupler*

Allows telephone interfacing with programmable DTMF to ASCII conversion, along with 16 relay operation.

**BROADCAST TOOLS**

**Stereo Audio Switcher/Router Series**

**SS2.1/BNC** offers passive switching/routing with 2 composite audio, video, or AES/EBU inputs to 2 composite audio, video, or AES/EBU outputs. Features: remote control/status; RS-485 multi-drop serial port; last selected source memory; BNC connectors.

**SS2.1/TERM** offers passive switching/routing with 2 stereo inputs to one stereo output or vice-versa. Features: remote control/status; RS-485 multi-drop serial port; last selected source memory; pluggable screw terminal connectors.

**SS3.1** passively switches or routes three stereo inputs to one stereo output or vice-versa. Features: step input with manual or automatic sequencing; remote control/status; RS-485 serial port; input one is normally routed to the output; gold contact relays; balanced I/O.

**3X2** is designed to accommodate 3 stereo inputs and 2 stereo outputs. The inputs may be assigned to either or both stereo outputs. Features: multi-turn input trimmers; remote control via serial port or contact closures; two control modes (alternate action mix mode and latching control); cascade multiple units; active balanced I/O.

**6X1** passively switches or routes 6 stereo inputs to a single stereo out. Features: front panel selection switches with LED indicators; front panel safety lockout; programmable power-up selection; output muting; remote control with status; remote step input; RS-232 serial port; balanced I/O.

**8X1 DAS** routes any one of eight AES/EBU digital inputs to split outputs.

**8X2D** accommodates 8 stereo inputs, 2 stereo and 2 mono outputs controlled via front panel switches with LED status indicators. Features: internal silence sensor with LED indicator; multi-turn input trimmers; programmable power-up selection; output muting; remote control with status; remote step input; RS-232 serial port; active balanced I/O.

**SS8.2** provides active crosspoint switching with 8 stereo inputs, 2 stereo plus 2 mono outputs.

**10X1** passively switches or routes 10 stereo inputs to one stereo output or vice-versa. Features: front panel selection switches with LED indicators; front panel safety lockout; programmable power-up selection; output muting; remote control with status; remote step input; RS-232 port; balanced I/O.

**SS12.4** accommodates 12 stereo inputs and 4 stereo outputs with matrix-style audio routing. Features: front panel 16-character, 2-line display shows source and destination descriptions; rotary encoder knob; three switching modes (mix, overlap and immediate); multi-turn input and output trimmers; RS-232 and RS-485 ports; optional remote control units.

**SM6** lets six stereo inputs feed a single stereo output (or dual mono). Sources are added to the mix via front panel push-button select switches. Features: 15-turn input trim pots; supports balanced or unbalanced sources.

# MONITORING, MIXDOWN, AND DUBBING HAVE NEVER BEEN THIS EASY...

Mix down to, or dub between any of four stereo devices, A through D

Monitor the console mix or any of four stereo devices

Listening Level

MONO Sum DIM 15 dB

High-resolution 80-LED meter with VU/PMM and Peak Hold

Peak/Average Meter Switch

Select from three speaker pairs (one self-powered) and trim to equal loudness

Built-In High Power Headphone Amp

Ground Lift

Power ON/OFF

Speaker Pair "C" Connectors

Speaker Pair "B" Connectors

Power Amp Inputs and Outputs

SRM-RU Remote Input

To Self-Powered "A" Speakers

To Power Amp Inputs

RCA Ins and Outs for Devices B, C and D

Inputs and Outputs for Device A

Source Inputs (Console)

+4 / -10 Level Switch

The new SRM-80 Signal Router/Monitor makes mixdown and dubbing simple, professional and affordable.

The SRM-80 provides signal routing and monitoring for four stereo devices (such as DAT, cassette, Mini Disc, CD-R, etc.)

— plus the main console output. And it performs!

Multiple copies can all be made simultaneously. And that's only the beginning.

You can monitor using three different speaker pairs, *at the same loudness*, using Furman's exclusive "set-once" level trims.

Speaker button "A" switches line-level for driving self-powered monitors; B and C use a high power relay to redirect your power amp output to either of the two pairs.

Optional SRM-RU Remote Control

The SRM-80 even has a built-in high-power headphone amp.

In fact, the SRM-80 is packed with features for your application: A high resolution 80-LED meter for precise level calibration of all stereo devices, MONO Sum to check for mix problems, a DIM button to reduce listening levels during interruptions, and more.

All five pushbutton functions are also available remotely on the optional SRM-RU, which includes a 10-foot cable.

The SRM-80 saves time and helps you get it right. Try it.

FURMAN SOUND, INC.  
1997 South McDowell Blvd.  
Petaluma, CA 94954

Call BSW at 1-800-426-8434 for a free SRM-80 data sheet. Ask for Furman's new color catalog too.

**CM AUTOMATION**

**PM64 - 32x32 Router/Level Controller**

This programmable, fully balanced router/level controller delivers 32x32 matrix switching, level control and metering for audio signals. Suitable for recording studios, production facilities and broadcast applications, the PM64 is the most technologically advanced router in its class. Each source and/or destination level can be controlled via internal programming and MIDI/RS-232 ports. Wiring is accomplished by means of DB25 connectors or screw terminals (via optional DB-8 terminals) on the rear of the unit. Besides routing line level audio signals, this unit is capable of automating outboard devices by means of MIDI command capability. Each setup can be stored into non-volatile internal memory (90 program storage capacity for any application). Features: 32x32 inputs and outputs configured as mono or stereo pairs (expandable to 1000x1000 with multiple units); level control range -100dB to +10dB in 1dB increments; meter range -30 dBV to +20 dBV; program memory for 32 input levels, 32 output levels and 16 channel MIDI patch map; gold plated DB25 female connectors.

\*PM64 Mfr. List \$2,499.00 Call For BSW Price

**FURMAN**

**SRM-80 - Signal Router/Monitor**

The Furman SRM-80 signal router/monitor makes mixdown and dubbing simple and affordable. It facilitates mixdown and copying between different media types without tying up additional console channels and handles up to 4 stereo devices (such as DAT, cassette, CDs and MDs) – in addition to main mix from the board. Monitoring is easy using the built-in headphone amp or uniquely thought out amplified speaker selection system. Features: power amp drives two speaker pairs; unit also accommodates one pair of self-powered speakers; speaker select function switches between speaker pairs; 40-segment high resolution metering for L/R monitor outputs; VU metering; DIM button reduces level by -15 dB and MONO sum button helps identify mix problem for radio compatibility.

**PRO PATCH PULL-OUT SERIES - Patchbays**

These pull-out versions of the popular ProPatch™ audio patch panel are designed for truck or studio applications where front access to terminations is needed. **Features:** rear panel design eliminates the need for rear access by sliding the jacks and terminations forward out of the rack, providing access to the QCP (quick connect pushdown) terminations mounted on the bottom of the tray; terminates up to 96 circuits in one rack space. **Options:** QCP or EDAC connectors; bantam or longframe models; normals brought out; normalised strapped at jacks; half-normalled; stub end umbilical configurations.

Call B5W For Price And Configuration

**PROPATCH MARK II - Patchbays**

Widely used in a number of pro audio industries, this very popular patchbay series offers absolutely bulletproof performance. **Features:** 48 TRS longframe jack points; available in 1 and 2 rack-height versions; fully enclosed ProPatch chassis protects all the internal patchbay wiring; cable support bar helps take strain off connections; wire fanning strips organize cables; designation strip system with replaceable cards; front panel and rear panels remove easily for service without removing the unit from the rack; includes ADC's Ultra Patch termination panels with QCP connectors that provide a "gas tight" connection that will not deteriorate over time.

Call B5W For Price And Configuration

**BJF MARK II SERIES - Patchbays**

The best features of the ProPatch™ Series are incorporated into the BJF Mark II Series of patchbays. **Features:** front and back panels separated with a cable harness in between; standard harness length is 4' but any custom length can be ordered.

## FOSTEX

### DP8 - Digital Patch Bay

Looking for an easy and fast method of patching between digital recorders and digital mixers? Try the Fostex DP-8 digital patchbay. Ultra compact (single rack space) and simple to use, the DP-8 features 6 optical I/Os (ADAT & S/PDIF) and 2 coaxial I/Os (S/PDIF), with any input being routed to any output via the front panel rotary switches. S/PDIF signals can be seamlessly converted from optical to coaxial and from coaxial to optical. Plus, for ease of use, the optical I/O for channel 8 is conveniently located on the front panel for "temporary" patches.

## STUDIOHUB

### STUDIOHUB - Console Harnesses and Studio Wiring System

This plug-and-play system makes studio wiring and rewiring simple. Using CAT-5 shielded twisted pair (STP) cables, StudioHub efficiently routes both analog and digital signals throughout a facility. STP cable, widely used in the computer industry, is preferred for analog and digital signals in broadcast for many reasons: 100-ohm impedance and low capacitance range; excellent performance at audio frequencies; wide bandwidth and wide availability.

Starting with easy-to-use console harnesses consisting of connector hubs and pre-wired cables (customized console pin-outs at one end; RJ-45 at the other), StudioHub dramatically reduces time for on-site wiring. Beyond console harnesses, StudioHub has pre-wired source cables, connector blocks and companion amplifiers for the rest of your studio equipment. Accessories include: balancing amplifiers, microphone pre-amps, headphone amps and various switching and adaptor plates using the StudioHub's standard RJ-45 connector type, and the unique DC-Link auto power system.

StudioHub comes in complete console and studio wiring packages (as well as custom ordered parts and accessories). Pre-made console harness kits include cabling for all console A+B inputs, and program and monitor outputs (specify console type when ordering). All harness cables are 7 ft. standard.

The 1HUBHARNESS for a 6-channel console includes cables for 12 inputs, 2 outputs and 4 monitors. 2HUBHARNESS for an 8-12-channel console includes cables for 24 inputs, 4 outputs and 8 monitors. 3HUBHARNESS for an 18-channel console includes cables for 36 inputs, 6 outputs and 12 monitors. 4HUBHARNESS for a 20-24-channel console includes cables for 48 inputs, 8 outputs and 16 monitors.

To go beyond console wiring, studio wiring kits include pre-made cables and MatchJack™ adaptors to connect your console harness to all source equipment. MatchJack adaptors connect RJ-45 patch cables to various source equipment I/Os and are available with active amplifiers to balance consumer gear, or as passive connector adaptors.

The SMSTUDIOKIT package for a 6-channel console studio includes 1 Hub power supply, 2 MatchJack output amplifiers, 1 MatchJack input amplifier, 1 mic XLR connector with well mount, 1 headphone amplifier with well mount, 6 single MatchJack adaptors, 2 dual MatchJack adaptors, 3 each 7', 10', 12', 15', RJ-45 patch cables. MIDSTUDIOKIT for an 8-12-channel console studio includes 1 Hub power supply, 2 MatchJack output amplifiers, 1 MatchJack input amplifier, 2 mic XLR connector with well mount, 2 headphone amps with well mount, 12 single MatchJack adaptors, 4 dual MatchJack adaptors, 6 each 7', 10', 12', 15', RJ-45 patch cables. LGSTUDIOKIT for an 18-channel console studio includes 1 Hub power supply, 4 MatchJack output amps, 2 MatchJack input amps, 3 mic XLR connector with well mount, 3 headphone amps with well mount, 18 single MatchJack adaptors, 6 dual MatchJack adaptors, 8 each 7', 10', 12', 15', RJ-45 cables. XLSTUDIOKIT for a 20-24-channel console studio includes 1 Hub power supply, 4 MatchJack output amplifiers, 2 MatchJack input amplifier, 3 mic XLR connector with well mount, 3 headphone amps with well mount, 24 single MatchJack adaptors, 8 dual MatchJack adaptors, 12 each 7', 10', 12', 15', RJ-45 cables.

## Capture the Warmth. Vintage-style.

When it comes to capturing the essence of a musical moment, every nuance... each subtlety... it's hard to beat the warmth of a vintage-style, large-diaphragm microphone.

That's why we created the new AT4047/SV. It offers the sonic characteristics reminiscent of early F.E.T. studio microphones and delivers the consistent performance and reliability you've come to expect from A-T's 40 Series.

The AT4047/SV gives you a perfect blend of classic sound and modern precision engineering. We call it a contemporary replication of vintage condenser technology. You'll call it amazing.

*AT4047/SV Cardioid  
Capacitor Microphone*

# FIRST CHOICE FOR EVERY VOICE

You've spent years perfecting your voice with just the right articulation and timbre to get you into broadcast. You need a microphone that faithfully delivers that sound to your audience. That's why broadcasters everywhere choose the Electro-Voice RE20 and RE27N/D. Their wide-band response and Variable-D® design delivers an outstandingly clear performance every time. Variable-D® eliminates the up-close "proximity effect" bass boost that makes other directional microphones sound "muddy."

Why not check out EV's entire family of problem-solving broadcast microphones. Every one guaranteed unconditionally against malfunction from even accidental abuse, for two years from the date of purchase. The first choice of professionals...

**EVERY TIME, EVERYWHERE.**

### M. AUDIO TECHNICA AT895 - Adaptive-Array Mic System

The AT895 system incorporates a revolutionary DSP-controlled 5-element microphone array that provides adaptive directional audio acquisition. Utilizing A-T's DeltaBeam™ technology, the AT895 manipulates and filters the output of the array by acoustical, analog and digital means. This process enhances the pickup of a sound source from a desired direction relative to unwanted background noise or interference, providing cancellation of up to 80 dB. It's perfect for handheld interviews as well as long-range sound pickup.

The AT895RK package includes microphone; 6-conductor shielded cable (10') with XLR7F connectors; carrying case; zeppelin-type windscreen; pistol-grip shockmount; click-on battery holder; AT895CP control pack.

AT895RK Mfr. List \$2,995.00 Call For B5W Price

## SHURE

### UT SERIES - UHF Wireless Mic Systems

Shure's UT series offers five application-specific UHF systems. All systems offer MARCAD® diversity technology and noise squelch circuitry. Each system is composed of a body pack or handheld transmitter and a receiver. Available microphone elements include the SM58, BG3.1 and WL185. Features: operating distance up to 300 ft.; up to 8 available frequencies per location; system distortion 0.1% THD typical; signal/noise ratio 90 dB.

**\*Call For System Configurations And BSW Prices**

## SONY

MB806A (shown with optional receiver models)

### FREEDOM SERIES - Wireless UHF Mic Systems

Build your own wireless mic system with the Sony Freedom Series. The system offers 800 MHz UHF transmission quality with 94 selectable frequencies in the range from 794 to 806 MHz; frequency-synthesis tuning to protect against unwanted interference by allowing instant channel switching; space diversity reception for added protection against a weak signal; comprehensive LCD displays and high-quality microphones.

Choose from the professional vocal handheld microphone (WRT807A) or one of three lavalier mic elements (ECM models numbers) with plug-on or belt-pack transmitter (WRT808A or WRT805A). Then combine with the dual-antenna single channel receiver (WRR-802A) or for greater expandability, the 6-channel rack mount receiver (MB806A) which requires a UHF synthesized tuner module (WRU-806A) for each microphone (one module included in price of MB806A).

For television reporting, the system also features camera mount receivers. Call today for more information on this great system from Sony.

# Passport

Every once in a great while,

an innovation comes along that changes the rules, expands the boundaries of our imagination and improves our lives. Fender, which has been introducing revolutionary products since 1946, presents the Passport.

Truly unique, the Passport is a totally self-contained, self-protected portable sound system. It can be picked up and carried as easily as a medium-sized suitcase, set up in a few minutes and operated by anyone—*anywhere*.

## Passport 250

Totally self-contained and road tough, Fender's Passport portable audio system includes everything you need to create great sound anywhere. Perfect for voices, musical instruments, CD, tape playback and more. It is powerful, easily set up in minutes, covers large audiences, is extremely simple to operate and works on any AC voltage as well as 12V DC with available voltage converter accessory. Specs: 250W of stereo power, (125W per channel) four high-efficiency 6.5" (165mm) speakers per cabinet: Features: built in digital reverb, V.I.P.™ (Vocal Input Priority) — music is lowered when someone speaks into mic 1.

Now available with built-in wireless microphone options!

All Passport products are covered by a limited, 5-year warranty.

## Passport 150

The Passport 150 is a smaller version of the Passport system, featuring 3 mic/line inputs, stereo input and an extra stereo to mono mic input to input 3, digital reverb and V.I.P.™

Power output is 150W total (75W per channel) with two high-efficiency 6.5" (165mm) speakers per cabinet.

## OTARI

### MX5050 SERIES - Broadcast Reel Recorders

The Otari MX5050 series includes the MX5050BIII 2-track and MX5050BQIII 4-track recorders. Features: very dependable construction; 3-head design; front-panel setup adjustments with built-in oscillator; sophisticated transport with built-in mini auto locator;  $\pm 20\%$  pitch control; 37-pin parallel interface; 1/4 track playback. Options: several remote control options and roll-around stand.

## BROADCAST TOOLS

### DC-8A - Dial-Up DTMF Controller

This dial-up remote control allows the user to control a facility from any touch-tone telephone. The DC-8A will answer the phone line after the programmed number of rings (up to 20), accept an access code of up to 8 digits and if valid, will allow the control of 8 form-A relays and the monitoring of 8 logic level status inputs. **Features:** audio hybrid allows user to send and/or receive external audio, while controlling the unit; the pager alert function can activate up to 3 digital pagers and display the telephone number and the status input(s) which triggered the alarm; programming is performed with a standard touch-tone phone; nearly all functions can be programmed remotely; defeatable CPC control; user programmable tone acknowledgment defeat; may be configured for stand alone program DTMF tone decoding; each relay may be configured for momentary, latching or interlocking closures; front panel LED indicators for DTMF tone detection, off-hook (line connected) status, ring signal, and power; open collector outputs for remote ring and off-hook conditions.

DC8A Mfr. List \$399.00 Call For BSW Price

### SRC-8A/SRC-8B - Remote Relay Controls

The SRC-8A serial remote control provides a means of adding eight channels of remote control to RF, wireline and fiber-type STL systems. The SRC-8A may also be used with dedicated modems (US Robotics "courier" only) from 1200 to 9600 baud. The SRC-8A consists of two units. The SRC-8T which is located at the origination end (studio) and the SRC-8R which is at the receiving end (transmitter site). Both units look identical and may be mounted within 25 feet of the STL system or modems. Each unit is supplied with a 12 vac wall transformer, modular cord and a modular 9-pin D-sub adaptor. The units are supplied with or without 8 opto-isolated inputs on the SRC-8T and 8-SPST relays on the SRC-8R. **Features:** TTL/CMOS compatible or opto-isolated 5-24 vdc inputs (wet or dry); form 1-A relays; removable screw terminals or WAGO clamp-style wire captive terminals; relay and input status LED indicators; on-board switching power supply; aluminum chassis.

SRC8A one-way control Mfr. List \$399.00 Call For BSW Price  
 SRC8B bi-directional control Mfr. List \$499.00 Call For BSW Price

### SSM - Smart Silence Monitor

The SSM (Smart Silence Monitor) utilizes the innovative "WNSD" circuitry and is designed to monitor any stereo or two independent monaural sources and generate alarms when white noise or silence is detected. **Features:** active balanced inputs with multi-turn trimmers; alarm sensitivity down to 35dB below program; precise time delay from 2 seconds to 93.5 minutes; alarm activity indicators for each channel; two DPDT relays enabling use as a 2x1 program switcher; four open collector function outputs; remote and local defeat and reset inputs; screw style wire captive terminals; optional RM-2 or RM-3 rack mounts for mounting units in a 19" rack. Power adaptor provided.

SSM Mfr. List \$209.00 Call For BSW Price

## BROADCAST TOOLS

### PSC - Programmable Schedule Controller

With the PSC (Programmable Schedule Controller) store and control up to 160 events. **Features:** events can be programmed with hour/minutes/seconds and day/month/year or day of week; each event may control any one of 20 provided SPST relays and/or 32 serial custom commands; momentary or latched contact closures; program with any non-dedicated PC and off-the-shelf communication software; stable 60 Hz time base (3 seconds per month or less); sync input for external clocks; DST; 24-hour time format; password option; WAGO clamp style wire captive terminals. **Options:** rack panels.

PSC Mfr. List \$399.00 Call For BSW Price

### PBB-24 - Programmable Button Box

The PBB-24 provides 24 SPST buttons that may be used to remote control external equipment, and/or be configured to generate user programmable ASCII strings which are output to the provided RS-232 serial port. **Features:** switch covers provide insertable imprinted legends through the slot of a clear switch cover top; 24 SPST N.O. heavy duty silent switches; twelve character-printable ASCII serial strings per switch; non-volatile program memory; power and data activity LEDs.

PBB24 Mfr. List \$299.00 Call For BSW Price

## BURK TECHNOLOGY

### ARC-16 - Transmitter Remote Control

Now, you have a choice: full-time studio control and monitoring, dial-up telephone control – or both. Because of its modular design, the ARC-16 offers features never before available in a 16-channel remote control system. With the studio controller, you have a constant link to your transmitter, for instantaneous response. The 32-character LCD display shows out-of-tolerance conditions at a glance, and makes it easy to make adjustments. The ARC-16 offers control and metering of studio equipment, including program automation, EAS, security, status control and alarm functions at both the studio and transmitter site. The two-unit-system has 16 channels of analog metering, 16 status channels and 32 control outputs. Indicators and connections for external audible alarms alert the operator to out-of-tolerance conditions. The Enhanced Speech Interface lets you take control using the telephone keypad from any touch-tone phone. It can be used as the only control, or in addition to the studio controller. **Features:** digitally-recorded human voice for dial up; built-in subcarrier generators; built-in alarms and multiple site control. **Options:** AutoPilot® for Windows makes automatic operation of a studio/transmitter facility easy.

\*Price Based On Configuration

## CIRCUITWERKES

### DR-10 - Audio and Control Interface

Control your equipment from anywhere there is a DTMF phone with the DR-10. Features: audio hybrid lets you control equipment while monitoring external audio; audio in and out are active balanced with gain controls; password protected; control 10 relays (two are DPDT) that can be momentary, latching or interlocked with other relays; a special momentary-at-end-of-tone mode makes it easy to control automation from the field without getting start tones on the air; relays can be assigned to any tone; anti-falsing and two-tone modes prevent unwanted closures during audio feeds; relays can beep when activated; four status inputs can dial pagers, etc. and can close relays when activated; auxiliary audio input lets you control the DR-10 from an external audio source, with or without telephone connection; status indicators for power, unlocked, DTMF and programming mode; external logic outputs for online and unlocked. Options: Silencer (mutes all DTMF signals so none get on the air); CP-1 call progress detector for PBXs and telcos without normal hang-up signals.

DR10 Mfr. List \$399.00 Call For B5W Price

### DTMF-16 - Remote Control

The DTMF-16 listens to practically any audio source and activates its appropriate optocoupler output when it hears any of the sixteen DTMF tones. Jumper selectable modes are available for momentary, interlocking-latching, two-tone and anti-falsing. Applications include backup transmitter control over STL, radio or telephone coupler, remotely controlled audio switcher, etc. It's perfect for interfacing networks to your automation, controlling remote satellite receivers and repeaters. Options: the SILENCER option board lets you send inaudible DTMF control signals via your RPU, satellite, dedicated loops, or standard dial-up phone lines. Your talent or producer in the field can fire IDs, start breaks, light up an attention flasher, or control just about anything right in the program path, without getting any tones on the air.

DTMF16 Mfr. List \$219.00 Call For B5W Price  
SILENCER Mfr. List \$159.00 Call For B5W Price

## CONEX

### DT-40 - Remote Control

The DT-40 accepts DTMF tones from an audio line, receiver or other source, accepts a user access code, then allows remote control of sixteen SPDT relays. The relays can be momentary, latching or interlocking. The DT-40 is easy to understand, easy to install, secure and effective. Features: miniature screw-clamp terminal strips for easy connection to your external circuits; relay interlock mode allows easy use as a remote-controlled audio selector; status lights indicate power, DTMF tone detection and unit selected; switch-selectable Device Selection Code allows up to 15 DT-40s to be individually controlled from one audio source.

DT40 Mfr. List \$339.00 Call For B5W Price

## CONEX

### DT-55 - Remote Control

The DT-55 telephone remote control answers a phone line, accepts a user determined access code, then allows remote control of 10 SPDT relays and the remote monitoring of 10 external switch contacts or logic levels. The levels are magnetic latching. On power loss and restoration, the relays can retain their prior states or return to the de-activated state. Each relay can be set, cleared or activated momentarily (for as long as the button is pushed down on the calling telephone). Additionally, the DT-55 can be set up to act in an interlocking mode. When a button is pressed, its associated relay is set and all other relays are cleared. Features: Miniature screw-clamp terminal strips for easy connection to your external circuits; easily distinguishable tones indicate the high-low or open-closed status of the ten external inputs; status lights indicate the ringing signal, power, DTMF tone detection, line connection and access; switch-selectable access code; compact size.

DT55 Mfr. List \$339.00 Call For B5W Price

## DAVICOM

### M-A-C - Remote Control

The M-A-C System can control up to 32 analog (metering) inputs, 64 digital (status) inputs and can monitor 16 audio inputs. It can control up to 64 relays and offers 16 RS-232 serial communication ports for external equipment. The menu-driven software built into the unit allows the user to easily program complex operations such as: switching to a back-up transmitter, controlling the emergency power source, monitoring VSWR of several antennas, etc. Features: easy to set up and operate; extra level of security for system supervisors; flexible reporting of alarms; operation via telephone or PC; relays included in main unit; up to 16 RS-232 ports allow you to talk to other equipment at the site without the need for extra modems; programmable delays before action or return-to-normal conditions; multiple relay activation on a single condition; works with any vendor'd sensor products; "virtual" inputs and relays for establishing conditional actions. A communication software package, MACOMM, which offers a full graphical interface for fast and simple operation, is also supplied with each unit.

MACNET (sold separately) is a central management software that can be used to collect alarms and reports from an entire network of sites. MACNET uses a map-style graphical interface to make it quick and easy to monitor conditions from a variety of sites. MACNET is a decision assistance tool for the communication network operator. All the decisions are taken by the operator but MACNET will promptly supply him or her with all the information required to make the right decision and know exactly what is going on at the transmission sites. MACNET runs on Windows 95/98 and its database is Microsoft ACCESS™ compatible.

# Now You Have a Choice for Transmitter Remote Control

## The M-A-C SYSTEM Scalable to Fit Your Application

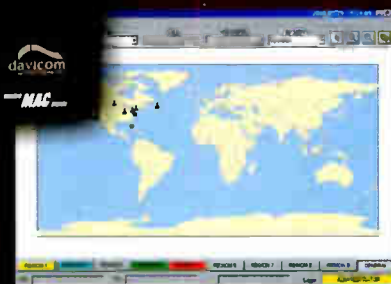

A M-A-C system is the flexible choice for controlling your facilities. With up to 32 metering (analog) inputs, 64 status (digital) inputs, 16 audio inputs for monitoring; up to 64 manually or automatically activated relays, and up to 16 RS232 ports, it represents a wise investment with room to grow your facilities control.

The M-A-C may be controlled by a personal computer, either locally or by modem, or via telephone (using DTMF tones). The system alerts you to any problems via telephone (voice), computer, pager, or your fax machine. With the M-A-C, you can enjoy these benefits:

- Minimized downtime
- Improved access to critical information
- Increased security at remote sites
- Reduced maintenance costs
- Easy operation
- Year-2000 compliant.

### M-A-C Features

- Easy set-up and operation
- Extra level of security for system supervisors
- Flexible reporting of alarms
- Operation via telephone or PC
- Relays included in main unit
- Up to 16 RS-232 ports allow you to "talk" to other equipment at the site without the need for extra modems
- Programmable delays before action or return-to-normal conditions
- Multiple Relay Activation on a single condition
- Works with any vendor's sensor products
- "Virtual" Inputs and relays for establishing conditional actions

Optional MAC NET software allows you to monitor a network of facilities with an easy-to-use, map-style interface.

1-800-426-8434 or [www.bswusa.com](http://www.bswusa.com)

### The MiniMAC Ideal for Small Sites

Complete system at an affordable price featuring:

- 8 Metering inputs
- 16 Status inputs
- 8 Relays
- 2 Audio inputs
- 1 RS232 port

## DAVICOM

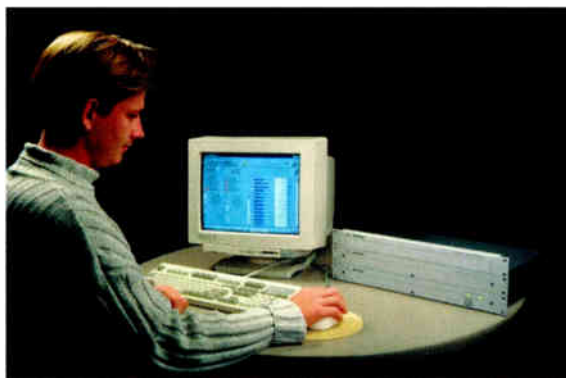

### MINIMAC - Remote Control System

Perfect for broadcast stations with a single transmitter, the MiniMAC provides complete monitoring, alarm and control functions in a small, affordable package. Features: 8 metering inputs; 16 status inputs; 2 audio inputs; 16 command outputs; 8 relays; MACOMM setup/operation software, operation via PC, terminal or DTMF telephone right out of the box; alarm reporting via telephone (voice), pager, PC or FAX; "Virtual" inputs/relays allow you to establish conditional actions, plus you can stack the physical inputs in conditional order to meet your exact requirements; user programmable delay times for actions and return-to-normal; works with any manufacturer's sensor products.

\*MINIMAC Mfr. List \$2,395.00 Call For BSW Price

## GENTNER

### GSC3000 - Remote Site Control

The GSC3000 was developed to address the needs of broadcasters requiring extensive control capabilities. Its modular approach allows it to handle a variety of applications from a single site with minimal requirements to large multi-site networks with extensive requirements. It incorporates several features found in the popular VRC2000 plus new features and capability that leave an open door for system expansion. With the Gentner GSC3000, you can control multiple transmitter sites from your studio, home, car or any location. Simply connect to the GSC3000 via local or wide-area network, personal computer/modem, or by telephone using the optional voice interface. Features: site expandability that is easy to manage; control of one or multiple sites; 8 to 256 logical channels of metering, status and command per site; single or multiple PC monitoring sites; friendly Windows® based operation (simply click on the desired area and its information pops up on your screen); PC-based voice/DTMF option allows monitoring and control of multiple site locations from a single dialed number; receive notification by phone, pager or computer; program unit to take its own corrective action; purchase affordable 8 or 16 channel site controllers plus the interface options required for your application.

Typical 16 Channel Package Under \$4,000 Mfr. List

## MOSELEY

### MRC1620 - Remote Control System

The MRC1620 system consists of a remote terminal that allows an optional control terminal or IBM PC with TaskMaster20 software to monitor and control a remote facility from both dedicated and/or dial-up control points. The MRC1620 remote terminal comes equipped with 32 relay isolated command outputs (16 raise/16 lower), 16 TTL status inputs and 16 analog metering inputs with the required terminal connectors.

The remote and control terminals are simple to operate and easy to understand. All status channels are simultaneously displayed on a set of 16 LEDs. The front panel displays read-outs of selected channel number and telemetry data. LEDs indicate operation mode, alarms and other system parameters. During alarm conditions, intelligent automatic corrective action can be taken by the remote terminal under the direction of the TaskMaster20. The remote terminal comes equipped with the appropriate modems to communicate over dedicated circuits (STL/ TSL/ FMSCA, 2/4 wired leased lines or standard dial-up lines).

*MRC1620RT	remote terminal	Mfr. List \$3,450.00

Call For BSW Prices

### MRC2 - Remote Control System

Multi-site, multifunction, the MRC2 controls and monitors as many as 99 remote sites, with multiple control terminal capability to let you delegate control from master to master as needed. Up to 255 status, 255 telemetry and 255 command channels supervise your sites.

Command, status and telemetry setup is straight forward on the MRC2. Using the remote terminal keyboard and 48 character alphanumeric LED display, the system provides plain English prompting and menu pages for setup selection. Similar procedures are used at the control terminal to set up and verify telemetry limits, assign data links and to set up controlled access for restricted functions.

Several options and configurations available. Call for complete information and pricing.

SINE SYSTEMS

**RFC-1/B/RAK-1/ RP-8 - Remote Control**

The RFC-1/B is an affordable, full-featured transmitter remote control system that can be accessed through a standard telephone or cellular phone. Readings are reported with a natural sounding human voice. The basic system consists of an RFC-1/B and an RP-8 Relay Panel. (Sold separately)

RP-8 is the interface to outboard equipment. It provides eight channels of telemetry input and control output (multiple RP-8s can be used to expand the system to 64 channels). The RFC-1/B can be programmed to perform power/pattern changes and take readings automatically. It can also be programmed to alert station personnel during an alarm condition.

RAK-1 adds a modem, parallel printer port, battery backed power supply, telephone line surge suppression and front panel indicators to the RFC-1/B in a sleek rack-mountable aluminum chassis. The 2400 baud 'AT' modem provides external control by computer and the parallel printer port allows simultaneous printer and modem operation. In addition to being controlled manually via telephone, the RFC-1/B and RAK-1 can perform tasks automatically, based on the date and/or time of day (i.e. pattern changes). Up to 80 timed events can be programmed into the system.

Call For B5W Prices

**AFS-2 - Audio Failsafe**

The AFS-2 is typically used to trigger an alarm on a remote control system or terminate transmission if program audio fails. It monitors one or two audio signals and provides a relay contact closure as long as audio is present on at least one of the two audio inputs. When no audio is present on either input for a preset length of time, the relay contacts open and an Alarm LED lights. The length of the delay is adjustable from 7 seconds to 4.5 minutes. AFS-2 can be used with RFC-1/B remote control (above).

*AF52	Mfr. List \$260.00	Call For B5W Price

## MARTI

### DSTL - Digital STL

The DSTL (originally manufactured by Dolby) features the Dolby AC-2 Digital Audio System, and takes full advantage of the latest in audio, digital and RF technologies. Features: highly sensitive receiver offering increased fade margin even on long or obstructed paths; greater immunity to interference through a wide RF dynamic range giving you the very best signal quality; superior spectral efficiency due to sophisticated modulation techniques and an ultralinear RF transmitter; frequency response left and right 20 Hz to 15 kHz; less than .08% distortion at 1 kHz; dynamic range 90 dB; channel crosstalk less than -80 dB, -90 dB at 1 kHz; 44.1 kHz sample rate (left and right); two modem channels (1 modem 2400 baud max, 1 modem 9600 baud max); time delay less than 9 ms.; weight 42 lbs.

\*Pricing Is Based On Configuration

## MARTI

### STL15C/R15C - Composite STL System

The Marti STL-15C transmitter and companion R-15C receiver form a high quality, frequency synthesized, radio communications link. Depending upon the available channel bandwidth, the systems can transmit composite stereo with two subcarriers, or digital stereo audio when used with external modems. Features: unexcelled composite stereo separation, noise and distortion specs; high interference rejection receiver; 9.5 watts of power; new narrow channels provision for automatic switching; 2-year limited warranty.

\*STL15C/R15C Composite Stereo System Mfr. List \$6,000.00

Call For BSW Price

### STL10/R10 - STL System

For mono operations or for non-composite stereo applications, choose the STL10 Package. Separate right and left units can be linked for stereo operation with greater interference rejection, superior noise specifications and lower channel crosstalk than most composite systems. Four optional sub-channels are available. Features: excellent square wave response; user selectable audio processing; low pass and band pass filtering for minimum overshoot and high selectivity; extensive front panel test features and built-in automatic switching capability.

\*STL10/R10 mono system Mfr. List \$3,550.00 Call For BSW Price

## MOSELEY

### DSP6000 - Digital STL Encoder/Decoder

Your key to an STL system that can pass CD quality audio is the DSP6000. This digital encode/decode system is designed to be used with Moseley PCL6000 or PCL606 Series STLs. Features: 90 dB SNR with only .01% distortion; operates in existing channel allocations from 100 to 500 kHz, coexisting with established analog radios; higher system gain (up to 25 dB over analog STLs), constant SNR - unaffected by fades, no crosstalk, no degradation with multiple hops.

The standard system comes equipped with an encoder and decoder for two (right and left) audio channels and one data channel with provisions for up to two auxiliary program channels and one additional data channel.

## MOSELEY

### STARLINK 9003T1 - T1/E1 Audio Transmission System

The Starlink 9003T1 is a powerful, all-digital modular system for transmitting CD quality audio over T1/E1 lines. It provides great flexibility in configuring multiple channel STL/TSL. Perfect for LMAs and duopolys, its configuration options are limited only by the imagination. This system utilizes a range of personality modules and daughter cards in a 3-rack unit mainframe. The mainframe can house up to eight application-specific modules including 16-bit PCM linear digital audio, ISO/MPEG layer II or apt-X source coding, drop/insert and variable-rate digital mux, speech/fax/data cards, T1/E1 and more. A building block "any card, any slot" approach is used resulting in lower cost, greater flexibility and enhanced reliability. The use of international standard digital I/Os allows the system to seamlessly connect to the outside world. This commitment to open architecture gives you the power to choose solutions that will work with existing and future investments. Linear digital audio can be delivered by use of a source coder module, a source decoder module, two T1/E1 line drivers, external CSUs and the mainframes. Full duplex T1/E1 audio transmission is possible by the addition of another source encoder and decoder pair. A digital four-port mux allows additional compressed audio channels to be carried by the system. In addition, data and voice cards for transmitter control and operational communications can be added into the system. Several STL/TSL pre-packaged systems are available, or configure a system to your specifications. Call for more information.

\*Pricing Is Based On Configuration

### STARLINK SL9003Q - 4-channel STL

Continuing its four decades of leadership and innovation in broadcast products, Moseley is proud to offer the Starlink SL9003Q - their latest technology and the world's first open-architecture, all-digital, 4-channel linear audio Studio-Transmitter Link. Utilizing spectrally efficient QAM (Quadrature Amplitude Modulation) technology, the SL9003Q delivers four 16-bit linear audio channels and two data channels over a single narrow-bandwidth 950 MHz STL channel. This uncompressed audio is absolutely uncompromised and can be configured with up to two pairs of stereo audio (it's like getting two radios for the price of one). AES/EBU I/Os, combined with a built-in variable rate converter, provide seamless connection to the all-digital air chain without compression. Plug-in MPEG audio modules and a digital multiplex allow for additional program, voice, FSK async and sync data channels. The high spectral efficiency of the SL9003Q is achieved by user-selectable 16, 32 or 64 QAM. Powerful Reed-Solomon error correction, coupled with a 20 tap adaptive equalizer, provide unsurpassed signal robustness in hostile RF environs. An ultra-linear 2 Watt average transmit power out is achieved with redundant RF power modules. Other features include: user-selectable 200-500 kHz channel bandwidth; built-in T1/E1 connectivity; minimal processing delay; full metering and diagnostics. Attain the peak performance you seek with the Starlink SL9003Q.

\*Pricing Is Based On Configuration

# Sound Advice.

**1.**

Demand **UNCOMPRESSED** 16-bit linear audio in your all-digital air chain. Compression means compromise and we just won't hear of it.

**2.**

Select a digital STL that can be configured with **UP TO TWO PAIRS** of linear stereo audio. It's like getting two radios for the price of one.

**3.**

Exercise your **FREEDOM OF CHOICE**. Choose 32, 44.1 or 48kHz audio sampling. It's your broadcast—select the rate that works best for you.

**4.**

Choose a digital STL that **CAN ADAPT TO ANY RF ENVIRONMENT** with user-defined 16, 32 or 64 QAM rates. (Flexibility is always a good thing.)

**5.**

Purchase a 950 MHz RF STL. The channel allocation is free, and the money you save over a T1 STL goes straight to your bottom line.

*Moseley's Starlink SL9003Q is the only 4-channel digital studio transmitter link on the market with all these features. Not just an STL, a sound investment.*

**Moseley**

## MOSELEY

### PCL6000 SERIES - Composite STL Systems

The PCL6020, 6030 and 6060 systems employ a synthesized reference oscillator to eliminate fixed frequency crystals. Monaural or composite operation is available from a single system. By selecting appropriate jumpers, you can enable wideband composite stereo or 15 kHz monaural basebands. Two PCL6000 systems can be used in a dual discrete configuration to transmit right and left stereo programs with no measurable crosstalk. Receiver IF bandwidth can be factory or field set for channel spacing of 100 kHz to 500 kHz.

If you have no adjacent channel interference, the PCL6020 will offer superior performance. The PCL6030 and PCL6060 are designed for hostile RF environments where adjacent channel rejection is required.

\*PR950 Mfr. List \$700.00 Call For BSW Price

## CROWN

### FM SERIES - Integrated FM Transmitter Systems

More than just an FM exciter or amplifier, a Crown integrated FM transmitter system combines built-in audio processing and stereo generation in one rugged, compact unit. Each model provides excellent signal quality, ease of use, and economical long-term reliability with a variety of features including: quick set-up; built-in digital metering and diagnostics; 87-108 MHz user-selectable frequency range; 100/120 VAC, 220/240 VAC or DC operation. Reliable operation is a major design criterion. With Teflon circuit boards and copper heat spreaders in the RF chain, the unit functions with less head and improved life span. A unique Automatic Level Compensation (ALC) circuit protects the unit from voltage, temperature and VSWR variations. If operating parameters move outside the safe operating range, the ALC automatically reduces output power to safe limits until normal conditions are restored.

Highly efficient power amplifiers are part of the FM transmitter system 1 kW and 2 kW transmitters. The FM2000T 2 kW transmitter is broadband and 75 to 80% efficient across the band. It includes a power amplifier, power supply and FM100T driver and features hot-swappable 500 watt power modules, a responsive protection mode and a power-factor-corrected power supply. The FM1000T 1kW transmitter includes power amplifier, power supply, FM30T driver and four hot-swappable 250-watt power modules. All Crown units feature a 3-year warranty.

## QEI

### E SERIES - FM Exciters/Transmitters

The E series establishes a new level of FM performance with the advantage of highest power emergency back-up available in an exciter style package. QEI took the field-proven design of the model 695 exciter and incorporated high power FET amplifiers to deliver uncompromised performance as a transmitter, exciter, booster or translator (option). Features: frequency synthesized in 100kHz increments (10 kHz optional); phase locked; "on-carrier" direct FM; unconditionally stable solid state amplifier and ultra low distortion, crosstalk and noise. 75 to 1000 watts.

\*Call For BSW Pricing

### QUANTUM SERIES - Solid State FM Transmitters

QEI's Quantum Series of FM broadcast transmitters are totally solid state and provide an unsurpassed broadcast signal with utmost efficiency. All Quantum transmitters under 6 kW fit in a cabinet only 59" high, facilitating air freight shipping and easy installation. Quantum allows you to buy precisely the amount of power you need between 1.2 and 9.6 kilowatts in 600 watt increments. QEI's exclusive cableless, solid state power combiner eliminates all trouble prone connections and high loss cabling. A single phase power supply facilitates installation for a range of applications.

### QUANTUM SERIES - Broadband Emergency Transmitters

Now there's a cost-effective alternative for groups desiring complete transmitter backup for multiple frequencies. This broadband line features remote control frequency agility so a single transmitter can back up multiple sites within a given market. Modular systems can be configured to your specific power requirements.

\*Call For BSW Pricing

## QEI

### FMQ SERIES - FM Tube Transmitters

QEI's FMQ series FM broadcast transmitters are conservatively designed for years of trouble-free service. Available in 3.5, 5, 10, 20 and 30 kW models, these transmitters utilize an inherent broadband design to provide a superb broadcast signal. The FMQ power amplifiers utilize a single triode in grounded grid service. This grounded grid triode design offers inherently greater stability, better performance and is less critical in operation than its tetrode counterparts. FMQ series transmitters are supplied with the 675B exciter and optionally with the model 695 exciter.

## CIRCUITWERKES

### SUB-03/SEN-6 - Subaudible Tone Decoders/Encoder

The Circuitwerkes SUB-03 decodes industry standard 25 Hz, 35 Hz and combination tones with dry contacts for each. **Features:** LEDs for all three outputs, audio presence and clipping LEDs, balanced input and output with gain adjustments and integral audio filtering; external enable lets automation or clock prevent unwanted closures. It may also be ordered for 50 or 75 Hz operation.

The SEN-6 subaudible encoder takes contact closures and generates 25 Hz, 35 Hz, 50 Hz, 75 Hz and combo 50/75 tones. **Features:** active balanced audio in and out with gain control; integral filtering keeps audio source material from falsely activating decoders.

SUB03	25 Hz/35 Hz tone decoder	Mfr. List \$349.00	Call For B5W Price
SEN6	subaudible encoder	Mfr. List \$399.00	Call For B5W Price

### DTMF-16/DEN-8 - DTMF Decoder/DTMF Generator

The DTMF-16 listens to practically any audio source and activates its appropriate optocoupler output when it hears any of the sixteen DTMF tones. Jumper selectable modes are available for momentary, interlocking-latching, two-tone and anti-falsing. Applications include backup transmitter control over STL, radio or telephone coupler, remotely controlled audio switcher, etc. It is also perfect for interfacing networks to your automation, controlling remote satellite receivers, etc. **Options:** the SILENCER option board lets you send inaudible DTMF control signals via your RPU, satellite, dedicated loops or standard dial-up phone lines. Your talent or producer in the field can fire IDs, start breaks, light up an attention flasher, or control just about anything right in the program path, without getting any tones on the air.

The DEN-8 is a DTMF generator that takes up to 8 contact closures and generates separate, user programmed DTMF sequences from 1 to 10 digits long. Active balanced output with level control.

DTMF16	Mfr. List \$219.00	Call For B5W Price

## ALESIS

MONITOR TWO

POINT SEVEN

MONITOR ONE

### MONITOR ONE/MONITOR TWO/POINT SEVEN

#### - Studio Reference Monitors

Arrakis Monitor One™ is a compact near-field reference speaker with wide frequency response, accurate transient reproduction, clear imaging and high power handling capability. Alesis' exclusive SuperPort™ technology and proprietary 6.5" mineral-filled low frequency driver give Monitor One solid high-power bass transients and low frequency response that outperforms comparable near-field monitors. Its 1" silk-dome high frequency driver adds accurate high-end to the system.

Monitor Two™ offers the same accurate tonal balance and imaging of the Monitor One but with a 10" three-way speaker design, producing a larger sound field, extra deep bass and exceptional mid-frequency detail.

Point Seven are two-way speakers with a 5" woofer and 1" dome tweeter. Magnetic shielding makes them perfect for use with computer-based workstations, video editing suites, MIDI studios, or any facility using video monitors. Additional features include front ported venting system for tight bass response and high power handling capability.

## AUDIX

PH5VS

PH150

### PH5VS/PH150 - Powered Monitor Speakers

Audix has combined great sound quality and very competitive pricing in these compact powered monitor sets (one speaker holds the amplifier, the other is a satellite speaker). The PH5VS features a 5 1/4" woofer and 3/4" tweeter driven by a 25-watt-per-channel internal amplifier. It is housed in a durable, high impact plastic cabinet with a wire mesh speaker grill, making it ideal as a portable set of monitors. Inputs to the amplifier are RCA unbalanced. The speaker pair is connected via a standard speaker cable with 1/4" connectors (included).

The PH150 is housed in a dense particle-board cabinet with front porting. It features a 3/4" polycarbonate-dome, ferrofluid tweeter and a 5 1/4" long-excursion, rubber surround woofer powered by an internal 45-watt-per-channel amp. High-quality crossovers ensure superb definition and clarity. PH150s provide a great sounding, inexpensive and space-saving solution for monitoring in small production rooms. Amplifier inputs are balanced (floating ground) via RCA connectors. 1/4" speaker connection cable is supplied.

Both models come with shielded cabinets for use near magnetically sensitive computer components.

## ELECTRO-VOICE

S-40B

S-60B

### S SERIES - Compact Monitor Speakers

The Electro-Voice S-40 is a high-performance 2-way personal sized monitor housed in a high-impact polystyrene enclosure. It features exceptional bass response for its size, smooth, extended top end and independent protection for the woofer and tweeter. Long-term power handling is rated at 160 watts. Optional mounting hardware allows stand mounting or wall and surface placement. Available in black or white.

The S-60 is a compact, two-way constant directivity speaker system designed for sound reinforcement and monitoring. Its small size, high sensitivity and high power-handling capability make it an excellent all-purpose speaker. The S-60 features a 6" woofer and a 1.25" tweeter with a dispersion-controlling beveled opening. It also provides automatic resetting tweeter protection and flexible mounting options.

# PS Project Studio

## Bi-amplified Direct Field Monitor Systems

It's about confidence. Confidence that your monitoring system is accurate. Confidence that what you're hearing from your speakers isn't being colored. Confidence that your mixes will sound the way you meant them to sound when they get played in the car, or in your living room—or in the office of a record company executive.

The new Project Studio monitors inspire that confidence, giving you the same precise, accurate sound as their respected forebears, our award-winning 20/20 series. So when you hear the vocal sounding sweet and in balance with the music, you'll know that it truly is sweet and balanced.

We accomplish this through the use of custom driver components, as well as amplifiers and electronic crossovers designed specially for those components. That's right, amplifiers—one for the woofer, and one for the tweeter. Giving each driver its own amplifier means the amps can be far more efficient, since each one is dedicated to a specific frequency range. The result: Increased dynamic range. Higher SPL. Greater transient response. Improved damping. Smoother phase response. Lower intermodulation distortion.

Oh, yes, and great sound.

The result: Confidence that what you hear is what you get. No fiddling with EQ to compensate for a speaker's deficiencies. No wondering if you have too little or too much bass. Just knowing that what you hear is real; that a mix done on a Project Studio monitor will translate accurately to other playback systems.

# Mixes You Can Trust.

Pictured front to back: PS5, PS6, PS8

## ELECTRO-VOICE

### SX80/SX100+/SX300/SX500+ - Loudspeakers

The SX300 is a two-way, high efficiency portable speaker system with 300-watt long term power handling capability, utilizing a 12" low frequency driver and a molded-in constant-directivity horn. It's lightweight (39 lbs.) and made of very durable polypropylene structural foam with molded-in handles and attachment points for secure mounting and suspending. It can be easily fitted with a tripod stand and makes an excellent loudspeaker for remote work. SX300a is a powered version with an integral 300 watt power amplifier and a net weight of only 47 lbs.

The SX500 has a larger 15" woofer and handles 400 watts of power.

The SX100+ (12") and SX80 (8") are lighter weight, lower output models.

The SB121 and SB180 add woofer systems for powerful concert bass.

### SENTRY 100A - Monitor Speakers

Having limited monitor space doesn't mean you have to compromise on sonic accuracy. The Sentry 100A is a compact, no frills speaker system. It's the oldest member of the Sentry family and has become the industry standard of reliability. The Sentry 100A delivers a flat 45 to 18,000 Hz frequency response with a wide 120° dispersion at 5,000 Hz. The Super Dome™ tweeter handles a remarkable 25 watts of input power and is matched with an 8" direct radiator woofer in an optimally vented enclosure.

The Sentry 100EL combines the reproduction components of the Sentry 100A with an integral high performance 50 watt power amplifier that's perfectly matched to the requirements of the speaker system.

## EVENT

### 20/20 - Monitor Speakers

Searching for accurate studio monitors? Don't spend a small fortune. Designed by industry veterans Frank Kelly and Walter Dick, the Event 20/20, 20/20p and 20/20bas speaker systems offer reliable, flat monitoring that's very affordable.

The 20/20 is a passive speaker with the following features: a 25mm silk-dome tweeter with aluminum voice coil support and ferrofluid cooling that doesn't cause ear fatigue over long listening periods; 8" mineral impregnated precision polypropylene woofer with highly damped rubber surround for consistent and smooth extended range frequency response without the need for added EQ; a very solid laminated MDF cabinet with extra acoustical damping to reduce standing waves; a front mounted, large diameter bass port; 2nd order passive crossover.

The 20/20p amplified speakers feature two 100-watt amplifiers housed within one speaker (one drives the powered cabinet, the other the satellite monitor). This affordable set includes one master unit and one standard 20/20 satellite.

The powered 20/20bas includes the components of the 20/20 with the following additions: an active asymmetrical 4th order crossover; a 130-watt amplifier designed specifically for and directly connected to the woofer; a 70-watt amplifier designed specifically for and directly connected to the tweeter; front panel power on/clip LED; a combination 1/4"/XLR input with level adjustment; precision HF and LF adjustments; power cord.

### TRIA - Powered Monitor Speakers

This monitoring system perfectly complements any digital audio workstation environment. The Tria three-piece monitoring system comprises a floor-loaded 8" mineral-filled polypropylene cone VLF (very low frequency) driver housed with five separate power amplifiers (80 watts each woofer, 40 watts each tweeter), active crossovers, and a full set of calibrated trim and level controls. These amplifiers power the two bi-amplified satellite speakers, each with a 5-1/4" polypropylene cone driver and 1" natural silk dome neodymium driver. Features: magnetically shielded; small footprint; reference-quality frequency response (down to 55 Hz for the satellite speakers, down to 35 Hz for the VLF driver), very low listener fatigue.

## ATLAS/SOUNDOLIER

### MXVA SERIES - Monitor Panels

Atlas-Soundolier's single rack space MXVA monitor panels are active devices for aural and visual monitoring of eight or sixteen different speaker and line level circuits in any combination. Each input is individually selectable using an easy-to-position jumper. MXVA's offer easy visual assessment using twelve-segment LED bar graphs that provide 33 dB of resolution and monitor any combination of line level (1V reference) - 25 Vrms, 70 Vrms and 100 Vrms simultaneously. The bottom ten LEDs are green and have a VU ballistics response. The two red LEDs at the top of the bar graph have a peak to provide instantaneous level indication. LED meter sensitivity is -30 dB to +30 dB. Units offer the capability to aurally monitor individual channels via an internal speaker, headphone jack, line level output or output to an external speaker. Panel functions include a channel selection knob, channel audible monitoring level control and headphone jacks.

## Edit CENTER™

The all-new Edit Center line of professional studio furniture has been specifically designed for the rigorous demands of broadcast, video editing and post-production environments.

Featuring two choices of high-pressure laminate desktops, the Edit Center System can be quickly arranged to suit any user's preference by simply rotating the unique Side Bay Racks to the desired angle. Desks are available in two widths: 60" and 84", and in your choice of two styles of attached overbridge (with two under-bridge rackbays, or with an under-bridge open span), and feature rotating speaker monitor platforms as standard equipment.

## Multidesk System 2

The all-new MultiDesk System 2 studio furniture line is equally suited for the professional radio broadcast, audio recording, or video production studio. The modular MultiDesk System 2 is an excellent economical alternative to custom studio furniture.

## Acoustical Panels

Our new wall panels provide effective acoustical treatment for problem rooms. Panels are faced with 100% polyester fabric, which will not rip, tear, or crack like foam products, and feature resin-hardened edges which are beveled for aesthetics. Offered in 4 sizes and two attractive colors, all 2" thick.

### MODULUX FLEX-STUDIO - Studio Furniture

The new Flex-Studio is a complete, modular furniture package that can be assembled in dozens of different ways to meet nearly any studio design. It can be assembled left or right-handed as well as in all of our standard configurations: 'Short L', 'Long L', and 'Unbalanced U'. All pedestal returns have front equipment racks and rear access doors. The table pedestals have both inside and outside access doors. The tabletop equipment pod provides rack mount space for tabletop equipment. A 60-inch interview table is standard and designed to be placed on any 60+ inch outer edge of the studio. The console table is 36 inches deep and 45 inches wide to accommodate most consoles. A 37 inch width, console spanning, copy stand completes the package.

Modulux is a top selling studio furniture system with nearly 2000 studios sold worldwide. As a standard Modulux product, the new Flex-Studio features solid oak trim, high pressure laminate table surfaces, complete laminate finish inside and out, ease of assembly and fast delivery from factory stock.

Standard colors are medium gray tabletops, beige side panels and red oak trim (custom configured Modulux furniture packages are also available).

## MURPHY FURNITURE

### Studio Furniture

Whether you choose the economy priced Murphy Furniture Classic series, the contemporary Stealth series, or one of several other stylish designs, you can be assured of getting the finest quality furniture that offers both beauty and functionality. Standard features on all Murphy Furniture include oak trim on all exposed edges, a bumper base covered with a non-chip material, plexiglass panels over racks near operators' feet and sloped faces on all returns. Wire management and passive ventilation systems have also been incorporated into the designs. Murphy's concept is modular construction with custom fit. The flexibility of these furniture systems will address all your needs. Delivery is typically 2-4 weeks depending on the customization required. We ship RTA (Ready to Assemble) via van line carriers. Customization of any system component is available.

## NIGEL B.

### Studio Furniture

Nigel B. furniture is designed with a building block approach to allow for personalized configurations at a fraction of the cost of custom-built systems. These components are of highest quality and are guaranteed for life. Systems range from elaborate work systems to simple edit/dub stations, with an infinite number of combinations in between.

Each component is made with superior grade cold rolled steel, finished with scratch resistant, oven-baked enamel. Desktops are high-quality laminates with rolled edges for comfort and safety.

Forget about waiting weeks for your furniture. Most Nigel B. items are in stock and will ship from the factory within a few days upon receipt of order from BSW. Their pack-flat approach means lower shipping costs and many items can ship UPS.

Shown above is a "stand up" high Junior Workstation with monitor overbridge, speaker brackets, microphone arm bracket and computer keyboard bracket. Most Nigel B. furniture can be ordered as "stand up" 36" high, or with standard 28" high desks.

## PROLITE

### Warning Lights

Designed to fit a variety of interior specifications, the Prolite Architectural series lights are attractive and functional, warning that a microphone is on. Housing and canopy are triple ground, cast aluminum with a baked, matte black enamel finish. Dimensions are 7 1/2" square. Two 20W, 6 1/2" long-life lamps are supplied. 120 volts required for operation. Choose from three configurations with either "on the air" or "recording" symbols.

The L101 fits in a standard single duplex electrical box and operates on 24-volt DC (user supplied). Specify white or red plastic lens.

## DORROUGH

### 40-A2/240-A2 - Loudness Monitor

Dorrough Loudness Meter model 40-A2 displays both the peak and average of the audio signal. The unique metering ballistics accurately present loudness variations on an easy-to-read scale. Dual inputs allow sum and difference metering. Peak Hold functions are standard along with a DB9 connector to access various "over" and "under" parameters. Other models are available with either 14dB (A scale) or 20dB (C scale).

Model 240-A2 is a vertical single channel loudness meter designed for standard console mounting (only 1.4" x 5" high). It can also be used for surround sound configuration.

**3 CHANNEL MIXER**

**ISDN & POTS**

**AUTO-"D" CELL BACKUP**

**SCOOP REPORTER II**

**PC PROGRAMMABLE**

**WORLDWIDE AC VOLTAGES**

**99 AUTODIAL PRESETS**

It's interesting how a single word like "consolidation" can have so many implications.

But, when it comes to the Scoop Reporter II, it means only one thing: Real Savings! That's because the Scoop Reporter II is the world's first codec to combine ISDN, POTS, auto-battery backup, 3 channel mixer, PC programmability, and lots more! As a result, "consolidation" means a cost effective, "all-in-one" solution that inspires confidence when you are out in the field.

Linking Innovation With Clarity

AETA AUDIO CORPORATION  
75 Fleetwood Dr. Suite 200 • Rockaway, New Jersey 07866

**AEQ**

**ACD-5001 - ISDN Audio Codec**

The AEQ ACD-5001 is a dual multi-format audio codec for ISDN lines, with terminal adaptors built in, offering all the combined utilities needed for establishing either two independent mono audio channels plus auxiliary data, or one stereo link with the highest possible audio quality and easy operation. The ACD-5001 receiver is designed with the same outstanding features as the MPAC-02 (below) and makes an excellent partner for remote broadcasting. The ACD-5001 is equipped with a full-duplex intercom, allowing simple and independent communication with both audio channels, without external wiring and operations. The monitoring capability permits the oversight of all signals transmitted and received without causing any interference to the communication. Features: audio coding algorithms including G.711, G.722 (statistical and H.221/H.242), LD-Extend and ISO/MPEG for mono, dual and stereo transmission at 64 and 128 kbps; up to 15 kHz stereo audio; up to 11.5 kHz bi-directional audio; adaptive echo cancellation using G.711 for maximum quality performance in analog telephone network connections; built-in intercom for direct in line operation; independent dialing for each B channel, with sub-addressing capability; generously sized LCD screen; phone call status on-screen; intercom microphone input and headphone output on front panel; alphanumeric phonebook with 32 inputs; DTMF tone generator for remote equipment control.

\*ACD5001 Mfr. List \$2,490.00 Call For BSW Price

**MPAC-02 - Portable ISDN Audio Codec**

The AEQ MPAC-02 is a multifomat, dual channel, portable audio codec for ISDN remotes and makes an excellent partner with the ACD-5001 (above). It offers the best possible audio and data connections, a user-friendly interface for the journalist with a full set of features for the technician. Offering two-way communications in two independent audio channels on a single ISDN line (the two B channels can be used independently), the MPAC-02 enables the setting-up of simultaneous program and coordination circuits. Levels for all input channels, mix, monitoring, program and coordination are independent. The ability to connect to a standard telephone line, easy access to the dial keypad on the front panel and a back-lit LCD screen with intuitive messages make the MPAC-02 a one-box solution for remotes. Features: digital hybrid with frequency extender, compatible with TH-02EX MKII and TLE-02, operative on analog telephone lines; a digital audio codec G.726/16 kbps for external modem connection; G.711, G.722 (statistical and H.221/H.242), LD-Extend and ISO/MPEG LII for mono, dual or stereo transmission on ISDN lines; up to 15 kHz stereo audio; up to 11.5 kHz bi-directional audio; 3 microphone and 1 mic/line inputs with XLR/jack combo connectors; 3 stereo headphone outputs with independent level controls; independent dialing for ISDN B1 and B2 channels with sub-addressing capabilities.

\*MPAC02 Mfr. List \$3,490.00 Call For BSW Price

**AETA**

**SCOOP REPORTER II - Combination ISDN/POTS Codec**

Following the success of the original Scoop Reporter, with thousands of units installed worldwide, AETA Audio's Scoop Reporter II combines more standard features making it the most convenient, compatible and cost-effective codec for remote broadcasts. The "all-in-one" Scoop Reporter II can handle POTS calls as well as ISDN transmissions! Its ISDN offers the highest performance with bi-directional 20 kHz audio at 128 kbps. While ISDN certainly is the preferred method for remote broadcasts, there are still situations with limited advance notice or where ISDN simply isn't available. Now you simply carry one codec and take advantage of 7.5 kHz POTS capability that will guarantee you get on the air, anywhere, anytime! With a built-in 3-channel mixer, it's primed and ready for your sports or talk broadcast teams. Powered by internal "D" batteries, external 12 volt or AC voltages, the codec will always remain powered. And a speed dial directory with 99 presets containing dial-up and codec settings makes it easy to use. Features: supports G.711, G.722, ISO/MPEG Layer II and J.52; PC programmable; LCD display; balanced XLR mic inputs; AUX in/out; metal chassis. SRMII is a rack mount studio version.

# Tame Your Remote Demons

## ...with a Vector.

Remotes are a necessary evil, but the Vector makes them more civilized by delivering **15 kHz two-way audio on a single dial-up phone line**. No bulky RPU antennas to rig and no costly digital phone lines to install. And the Vector is so easy to use that even your non-technical staff can operate it.

**Call us today so we can talk about the demons that may be plaguing your remote broadcasts!**

**COMREX**  
[www.comrex.com](http://www.comrex.com)

**APT**

**BCF256 - Codec**

This full duplex codec facilitates FM quality digital audio up to 20 kHz over fixed or ISDN links. Although primarily an ISDN codec, the unit also features an integral X.21 DTE interface. It is capable of operating up to four ISDN B channels with an integral terminal adaptor. Features: transmission bandwidths from 56 to 256 kbps with corresponding audio bandwidths from 6.8 kHz mono to 15 kHz stereo; sample rate converter; auxiliary data and integral fail-safe ISDN backup; analog I/Os; digital AES/EBU I/O.

**\*BCF256 Mfr. List \$7,750.00 Call For BSW Price**

**DSM100/PRO-LINK - Digital Audio Transceiver**

APT's WorldNet™ DSM100 incorporates high quality apt-X100 data compression, enabling real-time transmission of full duplex digital audio (7.5 kHz mono to 22.5 kHz stereo) on low capacity circuits such as ISDN and Switched 56. Features: simultaneous transmission/reception of full bandwidth mono or stereo audio over low capacity digital links; sample rate converter; timecode and RS-232 auxiliary data facilities; balanced analog and digital (AES/EBU) I/O.

The Pro-Link ISDN Manager combines a fully featured terminal adaptor with an intelligent inverse multiplexer to provide a wide range of bandwidths while automatically maintaining transmission security under adverse conditions. An intelligent device, it synchronizes up to six ISDN B-channels at 64 kbps with a minimal delay. Its integral six-channel terminal adapter allows direct connection to ISDN network terminating units.

**\*Prices Based on Configuration**

**COMREX**

**VECTOR - POTS Codec**

The Vector POTS codec delivers 15 kHz two-way audio on a plain telephone line at a realistic data rate of 24 kbps or higher. Features: 4 XLR mic level inputs (3rd and 4th are switchable to line level); 3 headphone outputs on 1/4" phone jacks and an extra line level output on XLR that could feed a PA; quick dial memory for one button dialing; auto or manual answering; standard coupler if phone line cannot support modem transmission; compatible with the HotLine POTS codec.

# Complete Remote Solutions at a MARTI® Value.

## MARTI – The Remote Experts

For over 50 years, MARTI has been synonymous with value and service for remote broadcasting products. As the radio industry changes, so has MARTI. Discover our complete line of cellular, POTS codecs, frequency agile RPU/STLs, excitors and accessories — all at a MARTI value.

**GX-500**

The New GX-500 is now easier to operate and service. A powerful new option has been added - an add on cellphone adapter. The adapters are "Model Specific", and are available for some digital cell phones.

**Cellcast®**

Three watt cellular remote broadcasting studio. AC power, battery, or 12V adapter options.

**SMARTI RKS-411**

**SMARTI RKS-111  
Field Portable/Rackmount**

Today's telephone remotes demand a smart solution and that solution is SMARTI: the family of field proven, adjustable bandwidth POTS codecs. Utilizing MPEG compression and DSP technology, SMARTI gives you superior audio quality with phone line convenience and a 33.6 Kbps internal modem.

**Talk\*Port**

The Talk\*Port provides all the features you need for great sounding remotes through a dial-up phone line or optionally through the micro-cellular phone interface. Adapters available for most popular brands of cell phones.

**RPT-2**

**RPT-15**

Three different power levels are available for the one- and two-frequency Remote Pickup Transmitters. The 2-watt unit (RPT-2) and the 15-watt unit

(RPT-15) are shown here. They are available in both US UHF and VHF frequency ranges as well as export frequencies. The third model available is the RPT-30, a 4 input, 30-watt (maximum power dependent on the frequency) unit.

**SRPT-40**

Frequency agile RPU equipment available in VHF or UHF. The SRPT-40 (shown above) covers all of the 450 and 455 MHz UHF bands while the SRPT-40E can be programmed for 16 VHF frequencies. Matching frequency agile receivers available.

**COMREX**

**DXP.1/DXR.1 - Mono Codecs**

The DXP.1 and DXR.1 contain an upgraded version of G.722 (Turbo G.722) that allows sending bi-directional 15 kHz audio using both B channels of an ISDN line or two SW56 circuits (112/128 kbps). They automatically drop back to the normal 7.5 kHz when sending at 56/64 kbps. A major advantage of G.722 is that it is a widely used international telephone standard, providing the best chance for compatibility with the outside world. These codecs are low-propagation delay (allowing real-time program backfeed) and low in cost, both in terms of transmission data rate and hardware required. They are ideal for sports, talk or any type of mono programming.

**SMARTI LITE - Standard Telephone Codec System**

Similar to the RKS-411, the downsized RKS-111 SMARTI LITE can send and receive 7.5 kHz audio over a single standard analog telephone line with true broadcast audio quality. SMARTI LITE offers a single XLR connector (mic/line switchable with level control) and one headphone jack. Unlike the RKS-411, SMARTI LITE also comes with a handy battery package (battery, AC to DC power cable, 12V battery adaptor cord) so it may easily be operated in the field. SMARTI LITE offers three different operating modes: MPEG 2 Layer III, low delay G.728, and direct analog telephone interface. Plus, it uses the fastest modem speed available and automatically adjusts speed up and down to match the telephone line conditions. Within easy reach, its functions are menu driven from the telephone style keypad and displayed on the easy to read 2x16 backlit LCD display. Features: supports up to 33.6 kbps depending on the phone line (7 kHz audio at 24 kbps); full duplex data connection for attaching two computers via data port; 10 telephone number storage (up to 70 characters each); up or down event timer; 2 relay contact closures for control at both ends of link; headphone jack with program and return switches; operates from 90 to 264 volts (50/60 Hz) without setting switches or jumpers.

- SMARTI1 (RKS-111)** Mfr. List \$2,575.00 Call For BSW Prices

**MARTI**

**SMARTI - Standard Telephone Codec System**

The RKS-411 SMARTI can send and receive 7.5 kHz audio over a single standard analog telephone line with true broadcast audio quality. Within easy reach, its functions are menu driven from the telephone-style keypad and displayed on the easy-to-read 2x16 backlit LCD display. The RKS-411 SMARTI incorporates a fully functional mixer with 4 inputs (XLR connectors, mic/line switchable with individual level adjustments) and 3 headphone jacks (1/4" connectors, individual program/return fade pots). SMARTI offers three different operating modes: MPEG 2 Layer III, low delay G.728 and direct analog telephone interface. Plus, it uses the fastest modem speed available and automatically adjusts speed up and down to match the telephone line conditions. Features: supports up to 33.6 kbps depending on the phone line (7 kHz audio at 24 kbps); full duplex data connection for attaching two computers via data port; 10 telephone number storage (up to 70 characters each); up or down event timer; 2 relay contact closures for control at both ends of link; headphone jack with program and return switches; operates from 90 to 264 volts (50/60 Hz) without setting switches or jumpers. Optional battery package available.

**TELOS**

**ZEPHYR/ZEPHYREXPRESS - Network Audio Transceivers**

Zephyr is the ideal solution for remote broadcasts, ad hoc networks, voiceovers, commercial distribution, backup to microwave and satellite links, and many other applications. On just one ISDN circuit, Zephyr can convey 20 kHz duplex stereo audio, and it can transmit 15 kHz mono audio using only one of an ISDN line's two channels. MPEG audio Layers III and Layer II, as well as G.722, are provided for the highest audio quality and compatibility with nearly every installed codec. Features include a built-in ISDN terminal adaptor with NT-1 and 9600 baud RS-232 bi-directional data for communications and control. Available V.35 connection allows Zephyr to connect with Switched 56 and other data links. Zephyr includes full metering, a headphone jack, mic/line inputs, and input protection limiting.

With the ZephyrExpress sending live audio from the field via ISDN has never been easier. Telos lightens your remote broadcast burden by combining a full-featured codec, an ISDN terminal adaptor, and an audio mixing/monitoring system, all in a road-rugged chassis. With ZephyrExpress, there is no need to lug additional electronics. It includes the complete features of the standard Zephyr. You get MPEG Audio Layers III and II, as well as G.722 for the compatibility and performance you require. G.711 allows you to place a voice-grade call to any standard telephone, saving you the expense of an additional circuit at the remote site. The three-input mixer has two mono mic level and a two-channel line level input. Two independent headphone outputs have selectable source controls for monitoring local and/or return audio. Optional hard and soft carrying cases are also available.

**LXT/R - Single Line Frequency Extender**

This basic system restores the low end on telephone transmissions, offering a substantial improvement for telephone remotes. LXT/R combines encoding/decoding functions and a telephone coupler in one unit and can be set up to send or receive with a flip of a front panel switch. A high frequency enhancement circuit has been added to the encoder for improved audio quality. Compatible with all Comrex One Line Systems. An LXT/R is required on both send and receive ends of the telephone line.

**LXTR** Mfr. List \$850.00 Call For BSW Price

**MIX-MINUS BRIDGE - Multiple Mix-Minus Interface**

While mixing remote audio sources to program can be easily done on a studio console, it can be very difficult to manage the audio fed back to each remote site. The MIX-MINUS Bridge makes it easy to handle this process by creating up to 5 separate mix-minus feeds (a sum of all program audio except for the audio coming from that device). These feeds are necessary because hosts at remote sites cannot tolerate the time delay associated with modern audio processing. The MIX-MINUS Bridge sends a backfeed to all devices from the studio's audition bus. Inputs are separately selectable, levels are individually controllable, and an IFB feed is available to each source for producer cues.

**MIXMINUSBRIDGE** Mfr. List \$1,200.00 Call For BSW Price

## COMREX

### TCB-1/TCB-2 - Telephone Couplers

TCB-1 broadcast coupler sends and receives program material via the switched telephone network. This unit requires no external power and connections are via standard modular plugs. The TCB-1 contains an FCC-registered coupler which provides isolation from hazardous voltages and currents and includes an active circuit to hold the telephone line. 1/4" jack for line level input.

Built specifically for broadcast use, the TCB-2 auto-answer coupler is perfect for listen-line applications. Just plug in the standard connectors, attach the power supply and you're ready to go. Coupler answers on the first ring and disconnects when calling party hangs up.

# Talent in...Caller out it's that simple

## You know us for our tough remote gear, now put our DSP knowledge to the test.

Our latest innovation, the Innkeeper 1 packs the quality and features of an expensive digital hybrid into an affordably priced unit. For example, Innkeeper 1 continuously adapts to the phone line during every call. We don't just tune to the phone line at the beginning of the call and then lock in to those line parameters. Our algorithm uses the actual transmit signal to identify network conditions. Within the first second of speech we've tuned and corrected to remove the transmit signal from the caller outputs. If the line characteristics change during the call, we adapt. We

continue to adapt until there's no crosstalk. This approach allows the Innkeeper 1 to achieve stable performance over a variety of network conditions, typically exceeding 50dB of trans-hybrid loss. Perked your interest? If this is the type of performance you expect from a hybrid, you'll find it in the Innkeeper 1. Any other questions? We've got the answers...and the performance to back it up. For more information, contact BSW at 1-800-426-8434.

## Remote Broadcast Gear

**HENRY ENGINEERING**

**AUDIO ONLINE - Telephone Information System**

This telephone information system is designed specifically for radio stations. It's perfect for "listener information" lines providing concert information, weather/ski/surf reports, school closings, road/traffic conditions, contest rules, etc. AUDIO ONLINE is caller-interactive; the caller can select from a menu of multiple messages. The system is fully automatic and operates unattended. The system consists of special multi-line telephone modem boards and software that runs on a regular DOS-based PC (user supplied). Messages are recorded on the computer's hard drive. An 80MB drive will store over 2 hours of messages. Up to 16 phone lines can be answered simultaneously with AUDIO ONLINE with hundreds of messages available to callers. A call counter tracks the number of times each message has played.

\*Two-Line Version Starts At \$995.00 Mfr. List Call For BSW Prices

**DIGISTOR II - Digital Message Storage System**

DigiStor II is a digital multi-message storage system that is ideally suited for telephone "information lines", e.g., concert, ski report, sports scores, etc. DigiStor II will store up to 8 minutes of monoaural audio with a bandwidth of 6.5 kHz for automatic playback via a regular telephone line. Up to 8 messages are stored in digital flash memory with no battery backup needed. Recording and playback is via local or remote control. DigiStor II can record from either a mic or line level source.

DIGISTORII Mfr. List \$795.00 Call For BSW Price

**MIXMINUS PLUS - Differential Summing Amplifier**

MixMinus Plus is a differential summing amplifier designed to add a "Mix-Minus" output to a broadcast audio console. This output is typically used to feed the send input of a telephone hybrid device. MixMinus Plus subtracts the hybrid receive signal from the program output, creating a program mix, minus the receive audio. The null adjustment will provide 40dB rejection of the receive audio signal (30 Hz - 3 kHz).

MIXMINUSPLUS Mfr. List \$195.00 Call For BSW Price

**INOVONICS**

**PBX - Remote Telephone Line Switcher**

The PBX allows as many as 7 devices to share a single line for both incoming and outgoing calls. Features: up to 7 devices per unit - 2 or more PBXs can be daisy-chained to accommodate additional devices if needed; incoming calls are selectively routed to the proper extension with DTMF touch-tone commands; "priority channel" gains immediate access to the line (useful for alarms and signal problem notifications); easy installation.

\*PBX000 Mfr. List \$420.00 Call For BSW Price

**JK AUDIO**

**INNKEEPER 1 - Digital Hybrid**

The JK Audio Innkeeper 1 digital hybrid gets high-quality audio in and out of the telephone for talk radio. It connects audio signals to a standard analog telephone line without the variations in quality found with traditional analog hybrids. It is especially good at preventing transmit/receiver crosstalk. In the real world, when you send the radio host's voice down the telephone line, it has a tendency to bleed over into the caller's audio. The hybrid must adapt to the phone line in order to properly separate transmit and receive audio. The Innkeeper 1 uses a 16-bit digital signal processor to continuously monitor the phone line and audio signals to deliver better separation. The dual-convergence algorithm achieves superb trans-hybrid loss, typically exceeding 50 dB. Features: 16-bit DSP technology; proprietary auto null algorithm; auto answer/disconnect; front panel headphone jack; monitor speaker terminals on back; Voice Presence Compensation for richer caller audio; balanced XLR mic/line input; balanced XLR caller output; balanced XLR user defined output. Options: Guest Module 1 remote control keypad.

**TELOS TWO - ISDN Telephone Hybrid**

The Telos TWO ISDN hybrid offers amazing new ISDN capabilities for audio professionals. With the TWO, the first telephone hybrid that works with digital phone lines (BRI/U or S), users can exploit the ability of the ISDN network to cross-connect with POTS lines, eliminating the studio side of telco A/D-D/A conversion. You get pure digital caller audio, right from the central office – along with truly independent send and receive paths, lower noise and distortion, and caller ID functionality. Besides ISDN connectivity, TWO offers other important advantages: it contains two digital hybrids, so you can conference two callers internally, and all mixing and conferencing is done completely in the digital domain. AES/EBU as well as analog outputs give you maximum output flexibility. Features: 2 digital telephone hybrids; 20-bit A/D converter; automatic high-precision sample rate conversion; unmatched send/receive separation using Telos' Adaptive Cancellation technology; sophisticated AGC/limiting functions; caller ID and fully adjustable caller ducking; Ethernet and RS-232 ports; simultaneous AES/EBU and analog I/O.

**GENTNER**

**TS612 V.2.5 - Multi-line Telephone System**

The popular Gentner TS612 Version 2.5 multi-line telephone system makes it easy to manage call-in broadcast programming. The TS612 contains two digital hybrids that provide a high-quality interface to six telephone lines (expandable to twelve). The dual hybrids allow the TS612 to operate as a single-studio telephone system able to conference up to four callers simultaneously or as a two-studio system able to conference two callers to each studio. The TS612 supports a dedicated "phone-like" call-screening control surface. An off-air screener takes incoming calls and places them in a screened-hold queue. The on-air talent or producer presses the NEXT button on the main control surface and the call is immediately On-the-Air. The integrated mix-minus provides superior audio quality and easy installation. Automatic gain control (AGC) provides consistent audio levels on all calls. Features: Split-Caller mode brings the two hybrid outputs to the audio console independently; Split-Hybrid mode brings the two hybrid outputs to the console independently and returns your program mix to the TS612 on two separate channels; Previous-Hold places calls on hold automatically when you select another line; Two-Button Hold allows you to place a single call on hold when two or more lines are conferenced; 6 lines (expandable to 12); auto mix-minus; RS-232 control (enhanced); Aux I/O control (enhanced). Options: on-air screening software.

**TELOS**

**TWOx12 - Digital Multi-Line Talk System**

Even if you have noise-free digital telephone service at your station, keeping talk show audio clean and pure isn't easy. You've got to transform digital call-in lines to work with your old analog phone system. Wouldn't it be great to have a talk show system that connects directly with digital lines – without all the hassle of analog conversion? The solution is the TWOx12 Talk Show system from Telos – the world leader in broadcast telephone technology. The Telos TWOx12 brings ISDN clarity right into the studio, without any messy analog conversion. Just plug them in and you're done. The TWOx12 is the easiest, most efficient upgrade path from analog to digital. It's the only multi-line talk show system that you can use right now with your existing POTS lines, and upgrade for use with ISDN lines later. Features: single rack mount package includes two high-performance digital telephone hybrids and a 12-line broadcast phone system (Desktop Director) for high-quality conferencing between callers – and no need for any external equipment; unmatched send/receive separation using Advanced Adaptive Cancellation technology; hybrid automatically adjusts to phone line conditions, eliminating the hollowness, feedback and distortion that occurs when send audio "leaks" into the caller output signal; clear, user-friendly front panel meters and controls for unparalleled ease of setup; AGC/limiting functions plus three-band dynamic equalization ensure consistent caller audio levels and spectral consistency; studio-grade 20-bit A/D conversion, combined with noise gating and shaping, delivers crystal clear caller audio, even when using POTS lines.

Along with the digital hybrids, up to four Desktop Directors (12-line broadcast phone system) can be used with the TWOx12 to maximize flexibility and control. Features: intuitive, "quick read" status symbols make line selection easier than ever; hosts receive immediate information about line availability, on-hold and ready-for-air queue status; Busy All function lets talent clear contest lines with just the touch of a button; simultaneous baseband analog and AES/EBU outputs; automatic high-precision sample rate conversion for send to caller input; caller ID support and fully adjustable caller ducking helps hosts stay in control; built-in Ethernet connection for remote control and easy software upgrades.

For even more control, add optional Windows®-based Assistant Producer call screening software to facilitate instant producer/host communication via LAN or WAN.

Even if you don't have ISDN in your studio yet, the TWOx12 gets you ready for the future. Start with POTS inputs and upgrade to ISDN inputs later, whenever you're ready. Call BSW today for more information on this advanced digital talk show system.

**ONE-x-SIX - Multi-line Talk System**

The ONE-x-Six has all of the telephone interface equipment needed for talk show programming. A single rack mount unit houses both a Telos ONE digital hybrid and a six-line, broadcast phone system which includes all of the most popular features found in Telos' Direct Interface Module. For system control, the ONE-x-Six is packaged with a desktop Switch Console (sold separately). Special function buttons on the Switch Console are used to automatically select the next caller, to control external recorders and delays, and to access several other unique features. Using your ONE-x-Six could not be easier. The Switch Console is used to place calls, put callers on the air or on hold, and to conference. A standard telephone set may be used for call screening. The ONE-x-Six is very easy to install – all six phone lines are connected using standard RJ-11C plugs and all audio connections are XLR.

Optional PC software compliments the ONE-x-Six. Two versions of Call Screen Manager are available. Host Software provides for a director position and any number of talent positions using a single PC. Remote Software allows communications between the studio and talent located at a remote site via modem. Call for more information.

# TALK DIGITAL TO ME

**The advantages of ISDN are clear:** Faster set-up, intelligent call handling and the superior performance of ISDN audio. And now Telos Systems brings the benefits of ISDN to the talk show environment.

**The TWOx12** digital talk show system plugs right into ISDN BRI phone lines. Your callers sound louder and cleaner with the isolation performance that only a true four-wire system can deliver. And if you don't have ISDN in your studio yet, the TWOx12 lets you start with POTS and upgrade to ISDN whenever you're ready.

**As easy as picking up the phone.**

Call management is fast and efficient with our new Desktop Director, a fully integrated telephone and switch console. Intuitive, user-friendly operation is enhanced by the exclusive Status Symbols™ graphical icons that convey line and caller status at a glance.

**And finally, a real breakthrough** in telephone technology. Up to 12 callers can be routed to the two all-digital hybrids. Self-contained, easy-to-install and maintain, the TWOx12 simplifies even the most complex talk shows.

**Ready to talk digital?** For more information, call BSW at 1-800-426-8434.

## CONNECTRONICS

### BODGE PLUGS - Emergency Audio Connectors

No tool kit is complete without a set of Bodge Plugs. Each plug has either two or three color-coded, spring loaded, quick connect terminals. By pushing the end of the terminal a slot is opened to receive and hold securely a bare wire or test probe. 45 different adaptor cables can be quickly made in the field without the need of soldering.

BODGEFAM Mfr. List \$314.29 Call For BSW Price

## CONNECTWORKS

### YC40 - Unidapt Universal Adaptor Kit

The YC40 allows you to mix and match any male or female adaptor section with any other SMA, N, UHF, BNC, TNC, F, RCA or mini UHF section. Simply choose the two common connector ends you need, and screw them together with the universal adaptor.

YC40 Mfr. List \$150.80 Call For BSW Price

## ART

### SNAKE - Wire And Cable Cover

This unique product makes an excellent covering for bundles of wire or cables. When your wires are tucked inside the Snakeskin they become a single audio "snake" cable that is easy to manage, providing a sleek, clean appearance. The wraparound design provides 100% coverage that holds wires snugly in place. Wires can be covered with or without ends attached and can be branched out at any point along the snake. Since Snakeskin is expandable, you can add wires to your bundle at any time. Choose 1/2" or 1" styles for your particular application.

SKIN058B	1/2" Snakeskin, 8' section	Mfr. List \$16.00	Call For BSW Price
SKIN108B	1" Snakeskin 8' section	Mfr. List \$20.00	Call For BSW Price

## HOSA

### WTI SERIES - Wire Ties

Keep wires and cables organized with Hosa ties. WTI-148G is a velcro reusable tie for mic cables and the WTI-173 is a 10" heavy-duty permanent wire tie.

WTI148G	pack of 5 velcro ties	Mfr. List \$5.50	Call For BSW Price
