Let's face it. When it comes to selecting CD and MiniDisc products for studio applications, it doesn't make any sense to work with consumer decks in a +4 dBu environment. Denon, the first name in digital, has developed the DN-C680 CD Player, DN-M1050R MiniDisc Player/Recorder and DN-T620 Combi-Deck specifically for these demanding applications.

**DN-M1050R MiniDisc Recorder/Player**
- AES/EBU, SPDIF, Balanced and Unbalanced Analog I/O
- PC Keyboard Port
- +/- 9.9% Pitch Control
- Optional SMPTE, FS Converter and Hot Start
- External Control (Serial RS-232C/422A, 9-pin, Parallel 25-pin)

**DN-T620 Combi-Deck (CD & Cassette Deck)**
- Variable Pitch +/- 12%
- Record CD to Cassette
- XLR Balanced I/O
- Dolby B Noise Reduction
- Wired Remote Control Terminal
- Cue To Music (CD)
- Auto Repeat (Cassette Deck)

**DN-C680 CD Player**
- AES/EBU, SPDIF, Balanced and Unbalanced Analog Out
- Optional SMPTE Kit and FS Converter Kit
- Variable Pitch +/- 9.9%
- External Control (Serial RS232C/422A, 9-pin, Parallel 25-pin)
- Auto Cue Function/Fog Shuttle Wheel

Welcome to the 1998/1999 Bradley Broadcast Sales, Inc. Catalog!

This has been an exciting year of change and growth at Bradley, and our largest-ever catalog is proof of that! We have been busier than ever finding the newest and most exciting products for you, to make your jobs easier and more productive. I direct your attention specifically to several areas: Our new Installed Sound section has many useful items for indoor and outdoor PA and sound reinforcement applications. Our section on computer hardware and software has been expanded dramatically, and you’ve never seen so many choices in UHF wireless microphones as you’ll see in this year’s book.

There have been other important changes at Bradley as well. You’ll probably notice that we’ve moved! Our new facility in Frederick, MD is larger and more efficient. We’ve also installed an all new business operating system (yes, it’s year 2000 compliant!). What this means for you is faster order turnaround, and more of the products you want available from stock.

One thing that didn’t happen: we weren’t bought out by some mega-conglomerate. As a result, you can continue to depend on the quality of service you’ve come to expect from us; a friendly, human voice answering your call, and the prompt, knowledgeable service that is our hallmark.

For all of you who have been our loyal customers over the years, let me take this opportunity to thank you for your continued trust in us, and for those who haven’t done business with Bradley before, let me invite you to find out why we say: Our Service Makes the Difference!

Art Reed
General Manager
PORTABLE DAT & MINIDISC RECORDERS

DIGITAL BRING IT BACK PACK

To help you with your field recording, we package the popular, portable TCD-D8 Sony DAT recorder with Audio-Technica's great AT822 stereo microphone with cable. $1,199.00 value. **PACKAGE 9801 - ONLY $969.00**

TASCAM DA-P1 PORTABLE DAT

Not all professional DAT recorders cost as much as a small car. The DA-P1 from Tascam sports balanced XLR mic/line inputs with phantom power, unbalanced RCA, digital S/PDIF output, and rechargeable battery. You also get selectable sampling rates, a mic limiter, and a 20dB pad. For monitoring, the unit has a TRS headphone jack (no built-in speaker) and level control for any headphones.

The display shows program time, sampling rate, ABS time, and record margin; displaying counter mode is easy, as are counter reset, margin reset, and ID select. A hold switch prevents accidental operation. Standard accessories include a shoulder belt, AC adapter, and one battery.

DA-P1 60TEDAP1 MFR LIST $1,899.00
Porta-Brace Case 600PBARDAP1 MFR LIST $183.00
Extra battery 60TEBPD1 MFR LIST $100.00
Charger 60TECBD1 MFR LIST $75.00

HHB PORTADAT

From Hollywood to Washington, the PORTADAT is on the job. The PDR1000 is built around a rugged direct-drive transport with four heads for confidence recording. The nickel metal hydride rechargeable battery runs the unit for two hours (juice it back up on the charger/12VDC supply, which is included and operates on all international mains voltages).

The unit has XLR balanced inputs, phantom power, AES/EBU and S/PDIF digital I/O, limiter, built-in speaker, and selectable sampling rates. A carrying case comes with it. Weight: 4.4 pounds including battery. This is a most impressive professional effort from HHB.

Ask us about the PDR1000-TC with time code for motion picture and other time-critical work.

PDR1000 60HHPDR1000 MFR LIST $3,495.00
PORTADAT with Time Code 60HHPDR100TC MFR LIST $6,395.00

SONY TCD-D8 DAT RECORDER

Sony's portable DAT recorder is the latest version of one of our most popular tools for collecting audio in the field. Now the deck is a sleek charcoal black. You can make 44.1kHz recordings from an analog source. Also, no longer must you hunt for an AC adapter; it comes packed with one.

This lightweight Sony recorder/player runs on four "AA" cells and weighs about a pound. Digital volume limiting, automatic date function, and audible cue are standard. It offers 20-22kHz audio at 48 and 44.1kHz sampling; 32kHz is also supported. Standard DAT tapes give you two hours of the highest fidelity audio, or four hours in long-play mode.

Sony also offers the optional SBM-1, a Super Bit Mapping 20-bit A/D converter for making the most of analog input recording, for use with the TCD-D8 and other digital recorders.

TCD-D8 6050TCD08 MFR LIST $899.95
SBM-1 6050SBM1 MFR LIST $549.95
Mic Cable for TCD-D8 (feeds mono mic audio to both channels) 61WHENG6 only $12.00
Car Battery Cord 6050DCEC260NG only $20.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

SONY PCM-M1 DAT RECORDER

Every aspect of the Sony PCM-M1 has been optimized for field recording: from the die-cast magnesium body, to the low power-consumption circuitry incorporated into all stages of the PCM-M1. With the two supplied Nickel-Hydride batteries, you can record for up to 3.5 hours. Standard AA batteries may also be used. Sony SBM-1 circuitry is used, improving mic S/N ratio by 3dB.

An intelligent AGC system automatically sets the recording level in accordance with the input level in the DSP circuitry, preventing overloads. A full range Start-ID function allows automatic, manual or Level synchronized ID's to be recorded. This is a particularly useful feature in live recording, where a threshold must be set to prevent start ID's from being caused by crowd noise, instead of beginning of desired audio. Full digital in/out capability is standard, as is recording at 48kHz, 44.1kHz, and 32kHz. Weighing only 10oz, this unit is road-ready.

Sony PCM-M1 DAT Recorder 6050PCM1 $995.95
GET THE STORY PACKAGES!

Whatever your story, you’ll capture it better with Bradley. We’ve put together a package which includes a Marantz PMD portable cassette recorder, an Audio-Technica AT804 handheld mic (complete with stand adapter and coiled cord), Sony MDR-7506 stereo headphone (only the industry standard), an Audio-Technica AT8314 25' low-Z mic cable, a Mic-Eze 16" Rubberneck, and a Rowi Model 76 Clamp, as well as a Kaces KEB-20 gig bag (to put all this stuff in), and 10 cassette tapes—all at an incredible price. We have just about everything you’ll need in the way of audio—broadcast, recording, field gear—you name it. And we’re just a phone call away (and a toll-free one at that: 800-732-7665).

PACKAGE 9802 - ONLY $699.00

DIGITAL GET THE STORY PACKAGE

Superb DAT recording in the field was never easier. Order the Tascam DA-P1 pro DAT recorder, described on the facing page, and add Audio-Technica's AT825 stereo microphone with cable, a total $2,425.00 value.

PACKAGE 9803 - ONLY $1,865.00

BRING IT BACK PACKAGES!

MONAURAL PACKAGE

The “Bring It Back” Mono Pack includes the Marantz PMD-222 cassette recorder with vinyl case, the professional Audio Technica AT804 mic, and a coiled ENG cable.

PACKAGE 9804 W/PMD-222 - ONLY $479.00
PACKAGE 9805 W/PMD-221 - ONLY $449.00
PACKAGE 9806 W/PMD-201 - ONLY $389.00

STEREO PACKAGE

The “Bring It Back” Stereo Pack gives you Audio-Technica’s AT822 stereo mic and the Marantz PMD-430 stereo cassette deck. Also included are a windscreen and adapter cables for the mic, a case for the recorder, and a 25' XLR to XLR cable with Cord-Lox. Valued at over $1,000.00.

PACKAGE 9807 W/PMD-430 - ONLY $779.00

SONY TCM 5000EV PRESSMAN

Four alkaline “C” cells provide about 20 hours of recording with this pro, three-head mono cassette deck. A warning signal in your headphones tells you when your tape is running out. Other features include built-in condenser mic, one touch recording, -20% to +40% pitch control, instant edit mode, one touch review, auto shutoff at the end of the tape, locking pause, VU meter/battery life indicator, tape counter, and earphone jack. In the voice activated mode, the unit will delay recording until the motors get up to speed. The result is gapless VOX operation. Mic input is 1/8" mini TS. AC Adapter not included.

TCM-5000EV 6050TCM5000EV $489.00

EXTRA!

Bradley’s special accessory kit includes a pair of Sennheiser HD 470 headphones, Rowi mic clamp, desk tripod mic stand, a 10’ rubber gooseneck, 25’ XLR-to-XLR mic cable with Cord-Lox strap, and a great Kaces gig bag to hold it all. A $235 value.

PACKAGE 9808 - ONLY $139.00
SONIFEX COURIER

The Courier recorder is the latest product to record onto removable PCMCIA (sold separately), hard disk or flash card. Courier records, plays and edits, with graphical display operated by a scrub wheel. Recording in a number of different audio formats, uncompressed (.wav) or with MPEG layer II compression, you can ensure that Courier will be compatible with your playback or editing system. You can also plug a modem into Courier to transfer data over telephone lines. Want to transfer audio? The Courier also comes in an ISDN model. Software updates are free of charge from the Sonifex website.

Courier features two balanced XLR mic/line inputs, phantom power, AES/EBU out, limiter, fader, headphones and built in speaker. All this in 3 pounds including the battery. Courier uses standard 8mm camcorder batteries giving you up to four hours run-time and comes with carry case, Nicad battery and universal 90V-240V power supply. Sample rates from 16 kHz to 48Khz and a full range of MPEG 2 layer II bit rates up to 384kbps may be selected.

Standard Courier  605XCOSTD  MFR LIST $3,650.00
ISDN Courier  605XCOISDN  MFR LIST $4,630.00

SONY MINIDISC PORTABLE RECORDER

Record on MiniDisc in the field with the MZ-B3. This stereo model has a built-in speaker and mono microphone, plus a 1/8” mini connector for stereo mic. Since audio capacity doubles in mono, you can use one 74 minute disc to hold 148 minutes, or operate the unit in the normal stereo mode. Note, mono recordings are not compatible with many studio MD machines.

The MD format assures you of pristine, low-noise audio and convenient access functions. The MZ-B3 adds high-speed playback and powerful search features including a system that lets you mark sections of your audio for later retrieval.

Weight: 1 lb. with batteries (takes 3 “AA”).

MARANTZ PMD680 AND PMD690

Your future is in the cards, literally. The new Marantz PMD680 and PMD690 use standard PCMCIA type III cards to store audio information. PC cards are credit-card sized memory cards that are available in either Flash or Hard Disk formats. Flash memory offers extreme reliability and shock resistance, while Hard disk PC cards offer more bytes for the buck.

A wide array of professional inputs and outputs are included to satisfy any recording environment. The 680 and 690 offer the choice of compressed or uncompressed recording. Each track of a recording is converted to an MS-DOS compatible file allowing almost any PC to read the files recorded on the PMD680 and PMD690. Download your recording easily to your PC by simply plugging the PCMCIA card into a PC card slot or via a parallel port. The PMD680 and PMD690 also provide onboard editing capability. Call your favorite Bradley Professional for the correct size PCMCIA card you need. PCMCIA cards sold separately.

MARANTZ PORTABLE CASSETTE RECORDERS

News reporters, oral historians, court reporters, and audio people of every stripe reach for Marantz cassette recorders. Their favorite: The PMD-222.

It's a three-head mono deck with a balanced XLR input for your favorite pro mic. These features help you in your work: speaker, VU meter, phone jack, pitch control, built-in electret condenser mic, two speeds, auto-shutoff, cue and review, memory rewind/replay, and 1/4" TRS headphone jack. It also has a switchable limiter, automatic noise-control switch, and metal tape capability. Three "D" cells give you 7-1/2 hours operation; the optional Ni-cad rechargeable provides 5-1/2. We love it.

PMD-222 60MR222 $369.00

The PMD-221 contains all features of the PMD-222, above, but the mic input is 1/8" TS mini.

PMD-221 60MR221 $349.00

The PMD-201 is a two-head version of the PMD-221, without memory rewind/play. Mic input is 1/8" TS mini.

PMD-201 60MR201 $279.00

Marantz on a budget: The PMD-101 is an affordable, two-head mono portable with ±20% pitch control, tape counter, line input/output RCA jacks, and a headphone jack. Use the built-in condenser or plug in your own mic with 1/4" connector. Tone control, low-battery LED, and two speeds are standard. AC Adapter not included.

PMD-101 60MR101 $215.00

The PMD-430 is the stereo big brother in this family, featuring dbx noise reduction and three heads. You also get 6% pitch control, illuminated VU meters, limiter, and Dolby B. Memory rewind, auto shut-off/replay, three step mic attenuator, and headphone jack round out the list of useful functions. Mic inputs are 1/4" TS, line inputs and outputs are RCA phono. Carrying case included. Does not record 1/2 speed.

PMD-430 60MR430 $499.00

Accessories:
Kaces KEBZO Gig Bag 40KEKB20 $22.50
Vinyl carrying case for PMD 221 and 201 60MRCLC221 $35.00
All weather case for all models 60MRWPC221 $20.00
Porta-Brace deluxe case for all PMD recorders 60PBAR222 $175.00
Ni-cad battery pack for all PMD recorders 60MRRBD430 $66.00
AC Adapter for all models 61MRAC $13.00
FIELD GEAR

WHIRLWIND ACTIVE PRESS BOX

Tilling as we do near Washington, we know something about press events. When a passive mic box isn’t enough, we recommend Presspower. It accepts two inputs and feeds 16 transformer-isolated XLR outputs. You can send down a 1kHz tone so everyone can set their levels before the shouting starts. A VU meter and a headphone jack let you keep an eye and an ear on everything.

Presspower can run on AC or just four 9V batteries. It provides phantom power (+48VDC when running on AC, +12V from batteries). Inputs can be mic or line level, both have low cut filters. Twelve outputs are mic level, on XLR and 1/8” connectors, two outputs are line level fixed at 0dB, and two are adjustable line level. The variable outputs also appear on 1/4” TRS connectors. It is supplied with a carrying case and can be rack mounted.

Presspower 61WHPP $1,799.00

WHIRLWIND MEDUSA PRESS BOXES

Here come the wolves in the press pack! But you’re ready for them with your Medusa Press Box. It accepts a single line-level signal and gives you multiple mic level, 150 ohm output feeds. Designed to hold up under severe treatment, Whirlwind’s cold-rolled steel boxes are on the job in punishing environments everywhere.

6 Channel 61WHPB06 $229.00
12 Channel 61WHPB12 $449.00
16 Channel 61WHPB16 $549.00
24 Channel 61WHPB24 $839.00

WHIRLWIND PRESSMITE

Got a smaller event to cover? The new PressMite is a compact high performance press feed distribution box with 12 mic and 2 line outputs (all transformer isolated). It features a mic/line input with adjustable gain and a built-in headphone amp, and runs on two standard 9V batteries.

61WHPM $795.00

ATI PRESSBOX/MIC DISTRIBUTION

The PB2X8 has phantom power and provides two low-noise mic/line inputs. Eliminate mic clutter with a single or back-up pair of mics. Feed each of eight transformer-isolated channels from either input or both mixed. Drive a high-level XLR and a medium- or low-level TRS line simultaneously from each output. Use as a 2X8 or stereo 1X4 DA, or a two-input mixer. Features include oscillator, low-cut, loop-through expansion, VU meter, and headphone output. Uses XLR, 1/4", and 3.5mm TRS jacks.

PB2X8 60AIPB2X8 MFR LIST $1,399.00

SHURE FIELD DEVICES

FP16A
A Bradley Best-Kept Secret, the FP16A is a handy field tool. It's a one-in, six-out audio DA for routing audio feeds, useful as a press bridge, at remote events, anywhere you want multiple portable mic/line outputs. Includes phantom power, XLR transformer-balanced I/O (each switchable for mic or line), link jacks for ganging, and screwdriver-set gain controls. Run it on 120/240VAC or three 9V batteries for up to 20 hours. The battery supply automatically cuts in if you lose your AC power. Optional rack mount available.

FP33
A step up from the popular FP32, this version is a portable stereo mixer with a 30dB reduction in self-noise, making it compatible with the latest digital stuff. Also: recessed panpots to prevent accidental movement; a dynamic range of 100dB; indicators for input levels, limiters, and low battery; and three kinds of phantom power for each input including 48V. The FP33 has three inputs, two outputs, and a cable to connect two mixers. Uses two 9V batteries.

SHURE SCM268 MICROPHONE MIXER

When you see the price attached to the SCM268 microphone mixer, you'd never guess that there are six transformers inside: four balanced XLR mic-level inputs, one balanced XLR mic/line input and one internal low stray field, toroidal power transformer. Why do you need all those transformers? They provide protection from RF interference, prevent ground loops and make the SCM268 exceptionally quiet.

Wait, there's more! In addition to the 6 transformers, the SCM268 includes five unbalanced aux level inputs, an LED peak output meter, one unbalanced aux level output, an IEC power cord connector, 12V phantom power for condenser microphones and built-in low cut filters on mic inputs. The internal toroidal power transformer makes the annoying “wall wart” a thing of the past.

M367
The M367 mono mixer inherited quality from the M267 and added to it: it's 25dB quieter and has another two mic/line inputs, for a total of six. Other additions include 12 and 48V phantom, two XLR outputs, input peak LEDs, headphone monitor circuit, adjustable limiter threshold, and full meter illumination. Delayed power-on means no start-up “pop”. Takes two 9V batteries.

FP42
The FP42 is a stereo sibling of the mono M367. Four balanced mic/line inputs with pan pots and phantom power are provided. Cue audio is routed to the stereo headphone jacks when a channel control pot is pulled out. Run it for eight hours on three 9V batteries, or plug into 120/240 VAC. Controls include mono/stereo switch, tone oscillator, limiter on/off, and headphone level control.

SHURE FP II & FP22 AMPS

FP11 MIC/LINE AMP
Does your field gear accept mic-level audio? If not, here's a useful mic-to-line amp with adjustable gain of up to 84dB. It runs on a 9V battery and has both a balanced XLR mic input and a 1/8” TS mini input for a high level, high impedance source. The output is transformer balanced and appears on both an XLR connector and a set of spring contact binding posts. A switchable peak limiter and belt clip are included.

FP22 STEREO HEADPHONE AMP
Monitor your field audio in stereo. Power is by a 9V battery or 12-24VDC. The FP22 weighs 16 ounces and allows a mono signal and a stereo signal to be mixed any way you wish (either or both signals, in either or both ears). Loop-through chaining, belt clip, XLR and phone jack are standard.

PORTABLE MIXERS & POWER SUPPLIES

ROLLS MX442

The MX442 field mixer is a breakthrough in price and performance for the broadcast and remote recording market. It features four XLR balanced inputs with phantom power, 20 dB pad and Lo-Cut switches. Each input has trim and volume controls, and a pan control for adjusting the signal placement in the stereo field. The large level meters may be switched to monitor the Right and Left channel outputs mono and stereo, monitor signal, or battery condition. The MX442 has two oscillators, one 20Hz tone with the Slate Mic, and a 400Hz tone for sound check and setup. An internally adjustable limiter with adjustable threshold is also included. The MX442 is powered by two 9V alkaline batteries and is housed in a light weight aluminum chassis.

Rolls MX442 Field Mixer 61RLMX442 MFR LIST $1,050.00

SHURE AUTOMATIC MIC MIXERS

With multiple mics come multiple headaches. Use too few, and you don’t get adequate coverage. Use too many, and you get more background noise, and less gain before feedback on a PA. Ponder two solutions from Shure, one for the studio, one for the field. Both models distinguish between constant background noise and speech. Last-mic lock-on keeps one mic open when no one is talking, so you don’t lose ambiance. Both have phantom power, limiter, linking capability, and rack mount.

The FP-410 is Shure’s popular, portable automatic mixer, operating off either 120V or two 9V batteries. It has four mic/line inputs and two XLR outputs, one mic/line switchable, the other line level.

The SCM-810 is Shure’s latest automatic mic mixer. Like the FP-410, it activates only those mics being addressed, minimizing poor audio caused by open mics. This mixer has eight mic/line channels. Each input has two-band EQ for setup in different mic environs. Logic terminals help with activation of external devices and external mic control. The I/Os are on removable header connectors; an optional adapter converts to XLR. Each channel also has a 1/4” phone jack for use as a direct output, gated channel output, send/receive insert, or external speech gate for mixing consoles.

Folio Powerpad is Spirit’s smallest and most affordable powered mixer, yet despite its small size, it more than meets Spirit requirements for professional DAT quality sound and features. PowerPad was specifically designed with the multimedia generation in mind. It’s the easy way to incorporate microphones, CDs, Phonographs, and AV playback with your corporate presentation when reinforcement is required.

Spirit Folio Powerpad 60SFRWS427 MFR LIST $399.95

SKB RACKMOUNT CASES

These durable racks are made not of wood but of rigid polyethylene with welded frames, so they're half the weight of wood racks. The removable latch-front and rear covers seal tight. You know they travel well because they meet ATA specs. Rackable depth is 17" with cover. Cases have two carrying handles and can be stacked.

SKB Shock Rack Cases are similar and give extra protection with an internal, shock-absorber frame. Both the 8sp and the 12sp have a 20" usable depth.

One of SKB's best ideas was the Pop-Up Rack. Plop it in place, pull off the cover, pop up your gear at any angle. The 12-space frame has heavy-duty slide hinges. The interior is 8"H x 20-5/8"W x 23-1/2"D.

(Here's one that's not a rack: For stashing stuff, the SKB-1713 Utility Case is the way to go. Top lid is hinged at the back. 17" x 13" x 10-1/2").

KACES III EQUIPMENT CASES

This company wants to prove that they have a soft gig bag for every need. OK, that works for us. Our customers use lots of portable products, and Kaces makes very affordable bags for them. In fact, they're good enough to earn a Bradley Best-Kept Secret. You get sturdy web handles, tear-resistant nylon, thick padding, heavy-duty zippers, and lots of room for microphones, cables, and notepads.

Bags for many other products are available; give Bradley a call.

Kaces KB20 for Marantz Portables, Shure FP31 & 32 $24.95
Kaces KB22 for Mackie 1202 $25.95
Kaces KB29 for Spirit Folio Mixer $45.95
Kaces KB30 for Mackie 1604 (includes strap) $54.95
Kaces KB31 for Mackie 1402 $37.95
Kaces MB6 Mic Bags (fits 6 mics) $89.95
Kaces MB12 Mic Bags (fits 12 mics) $99.95

MACKIE MIXER BAGS

If your mixer moves as much as you do, carry it correctly in a stylish and nearly indestructible mixer tote made just for your Mackie 1802VLZ, 1402VLZ and 1604VLZ.

High-impact, high-density rigid internal foam offers superior drop protection. Choose from black nylon fabric or black suede-like stuff.

**GALAXY AUDIO FAR OUTLET**

Long overdue, the Far Outlet personal power station, from Galaxy Audio, is a fully self-contained portable source of 110 volt, 60Hz, household current. About the size of a lunchbox and lightweight enough to carry in one hand, the Far Outlet provides up to 250 watts of continuous power and 400 watts at peak. An included accessory kit allows you to re-charge the Far Outlet from your car’s battery or the 12V accessory outlet.

**LEATHERMAN TOOLS**

Tired of searching for wire cutters or pliers? Bradley has the answer for YOU! Leatherman tools all come equipped with needlenose pliers, regular pliers, wire cutters and at least one knife blade. The Pocket Survival Tool II adds hard-wire cutters, a serrated knife, two files, a sharpening groove, ruler, bottle opener, 3 sizes of flat-blade screwdrivers, Phillips head screwdriver and scissors.

The Super Tool adds a clip-point knife, a wood saw, electrical crimper and wire stripper (sorry no scissors on this one). A must-have for anyone who works!

**MARTI RPS-402 PHONE REMOTE MIXER (FORMERLY TELFAX GX440)**

A mainstay for radio stations for many years, the RPS-402 features four mic channels and two aux inputs. Channel 4 doubles as a spotter channel, taking its input from either mic #4, Aux #2 or phone line #2, providing several alternatives for off-air cueing. A radio monitor input and four headphone connections are also included. A built-in peak limiter prevents phone line overload, and an Aux out jack is configurable for PA feeds or recording of just the send audio from the console, or a mix of send and received audio, from the RPS-402’s second phone line input. This input is useful for airing telephone calls at the remote site, or for feeding more than one station or phone line.

Tone/pulse dialing, electronic ringer, and modular telephone jacks make connection and operation simple, and high capacity ni-cad batteries charge in 2 1/2 hours, ready for ten hours use. An 8-pin DIN accessory jack allows instant interfacing with low-frequency extenders, or other external processors. A transformer balanced 0dBm signal is available on the DIN jack to feed dedicated loops, codecs, or cellular interfaces.

Loaded with features, this unit should be in every station’s remote kit!

TELEPHONE INTERFACES

JK AUDIO REMOTEMIX 3

Plug Remotemix 3 into any phone line or handset cord, and you have an instant Remote broadcast facility, IFB patch, or live interview station. Featuring two XLR mic inputs, RCA line in/out and two headphone jacks, plus a DTMF dial pad and VU meter, this powerful little mixer really brings it home! Runs on two 9V batteries, or included AC adapter. Functions as a telephone when attached directly to a phone line.

CONEX CELLJACK FOR CELLULAR PHONE REMOTES

Feed great remote audio back to the studio with your Motorola bag phone and the new Conex CellJack. It's a compact cellphone adapter that connects to various broadcast devices with its balanced XLR input and line output, both transformer isolated. The XLR input gain is switchable, so it accepts either your dynamic mic or the output of a field mixer. Use the stereo headphone jack to monitor the cellphone, when your radio is plugged into the tuner input, its audio is fed to one side of the headset. Very nice.

An 18 in. interconnect cable is included with this palm-size problem solver. Call us.

JK AUDIO QUICKTAP IFB

This useful device connects to the handset cord of any phone, providing an IFB tap with both 1/8" mono jack with volume control, and a fixed output 600 ohm male XLR output. No batteries or AC are required for operation.

COMREX HOTLINE POTS CODEC

The HotLine provides wideband two-way audio over a standard dial line. It employs an algorithm especially designed for use over low bit-rate modem connections and, unlike other units, the HotLine will provide quality audio over a wide range of modem connections: from 33.6 kbps down to 12 kbps. The HotLine algorithm adjusts frequency response based upon available bandwidth and runs a setup routine upon connection to determine at what speed a stable connection may be established. At 33.6 kbps' frequency response is 20Hz - 10kHz. The HotLine is an essential and economical addition to your audio toolbox. ISDN may not always be available or practical for your remote application, but POTS service is always readily available. HotLine provides great audio from anywhere, for the price of a phone call.

J K AUDIO REMOTE MIX 3X4

The Remote Mix 3x4, a multi-line hybrid and mixer, is the newest broadcast tool from JK Audio. Designed to handle television IFB feeds and radio remote broadcasts, its combination of inputs, outputs and controls makes even the most complicated remote a simple one.

In television applications, IFB feeds can be monitored over up to 4 phone lines using the Remote Mix 3x4. One phone line can be in use while setting up the remaining lines making live broadcasts a snap.

Impromptu talk shows are no problem for this four-line hybrid with a monitor section that can be used to screen callers. In remote broadcast applications, the Remote Mix 3x4's three balanced XLR microphone inputs and three 1/4" TRS headphone jacks allow you to select between the mixer, main phone line or monitor phone line. Line LEDs light when a line is seized and flicker when the line is ringing.

The Remote Mix 3x4 operates for 10 hours on two 9V batteries or uses the AC adapter which is included.
COMREX DIGITAL AUDIO CODECS

Comrex offers several potent choices for sending audio over digital phone lines.

**DXP.1** and **DXR.1** codecs deliver superb bi-directional mono feeds over ISDN or SW56 using the G.722 standard. On a 56 or 64 kb/s circuit, they produce 7.5kHz audio, and they upgrade automatically to 15kHz if the connection is 112 or 128 kb/s. The very low delay makes this an excellent choice for live programming such as talk, news, and sports.

The DXP.1 is a portable unit with external AC supply, headphone output, and selectable mic/line input. The DXR.1 is a rack mount unit with balanced line level I/O. Each requires a terminal adapter with IMUX (sometimes called “bonding”) to send 15kHz on a BRI ISDN line.

The **DX-100** is a full mono/stereo apt-X encoding/decoding system. It's capable of bi-directional audio up to 15kHz and supports data rates from 56 to 256 kb/s. The low-noise, low-delay coding scheme makes it suitable for STL and studio-to-studio work.

The DX-100 has IMUX which adds the data rate of two independent 56 or 64 kb/s data channels. Configure it for ISDN or Switched 56 operation, or for satellite, wireless modem, or fractional T1.

The **DX200** MusicLine codec is an affordable way to send wideband, bidirectional stereo audio over ISDN. It uses ISO/MPEG Layer II coding to send full bandwidth stereo over digital paths as low as 112 kb/s. A broadcaster, recording studio, or music service can send stereo using one ISDN or two Switched 56 lines, or send mono 11kHz on a single SW56 or 64 kb/s.

Choose among sampling rates of 24, 32, and 48kHz. The DX200 encoder is configurable for output data rates (from 56 to 384 kb/s) and it allows full stereo, joint stereo, dual mono, and mono operation. It now also has Turbo G.722 for low-delay work and backwards compatibility with almost all installed Layer II codecs. The DX200's built-in IMUX allows it to support transmission rates up to 256 kb/s.

The optional Control Panel is a 1RU unit with control buttons and LCD display to allow changing settings “on the fly.”

All Comrex codecs have balanced analog I/O connectors. Data ports are DB25 (EIA-530), with a DB25-to-DB25 cable provided. Optional cables for connecting to X.21 or V.35 are available.

**CALL 1-800-732-7665 FOR BRADLEY PRICE**

---

COMREX FREQUENCY EXTENDERS

Everyone's talking about digital audio over phone lines, with good reason, but don't forget you can use frequency extension today to affordably upgrade any audio fed over standard phone lines.

One-line systems encode audio by shifting frequencies up by 250Hz. At the decode end, frequencies are downshifted to restore 2-1/2 octaves of program energy to the low end. For single-line encoding, put one LXT/R encoder/decoder at the studio, another in the field. It includes a built-in coupler for direct connection to the phone line.

Ask us about two-line systems (a full 5kHz audio connection), and three line (8kHz).

**ask about two-line systems** (a full 5kHz audio connection), and three line (8kHz).

**LXT/R one line encoder/decoder**

**CALL 1-800-732-7665 FOR BRADLEY PRICE**
TELOS ZEPHYR DIGITAL TRANSCIEVER

Harness the power of the digital telephone system. The Zephyr codec creates world-class audio for remote broadcasts, sports coverage, voice-overs, distribution of spots, recording studio feeds, ad hoc networks, and backup to microwave and satellite links. It was designed specifically for broadcast applications on ISDN and Switched 56.

Zephyr provides both the superb quality of Layer III and compatibility with installed Layer II-only equipment. With just the push of a button, you select the coding scheme to use.

Each ISDN line has two 64 kb/s channels on a single copper pair. Zephyr, on just one ISDN line, provides bi-directional, 20kHz stereo plus ancillary data transmission.

Layer-III allows 15kHz mono on a single ISDN channel or one SW56 line, reducing your transmission costs when sending mono material.

COMREX VECTOR POTS CODEC

The Vector delivers 15 kHz two-way audio on a standard phone line...at a realistic 24 kb/s, and is compatible with the Comrex HotLine, but incorporates a higher level coding algorithm that permits wider band audio at lower data speeds. The Vector contains plenty of mixing and monitoring facilities to make any remote a breeze. The Vector Mixer includes three headphone outputs on 1/4" phone jacks, three mic level inputs on XLR, with input 3 switchable to line level. Outputs include a line level XLR for PA feed, headphone output, and telco and phone set connections. All outputs are an externally controllable mix of local program audio and studio return. PA output can be muted with a front panel push switch.

Vector Field Unit 60CCVECTOR MFR LIST $4,500.00
Vector Rack Mount unit 60CCVECTORRM MFR LIST $4,500.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

- Auto-Answer
- Automatically switches to HotLine mode if connected to a Hotline POTS Codec
- Quick-dial memory feature allows one button dialing.
- Last number redial with one button.
- Two contact closures are available. One is automatically enabled upon connection. The second is a momentary contact closure that can be initiated by pushing a button on the keypad.
- Twenty different international dialing protocols. Works on virtually any A/C power in the world.
- Internal peak limiter.
- Also available in a 2U rackmount version.
- Works at data rates as low as 9600 baud.
- Defaults to standard telephone mode if the telephone line is so bad that the modem cannot operate.
- A MaxRate can be preset to provide a “margin of safety.”
- If errors occur, a one-button push (from either end) resets the modem to the next lowest data rate - without dropping the line.
- If the line quality deteriorates badly, the Vector will automatically renegotiate.
- The Vector features error correction, which can be enabled through simple menu options.
- The Vector requires either another Vector or a HotLine POTS Codec at the other end of the telephone line.

THE APT DRT 128 DIGITAL REPORTER TERMINAL

Portable and robust, the DRT 128 WorldNet Digital Reporter Terminal is designed for outside broadcast and limited bandwidth applications, delivering high quality audio over ISDN, using the apt-X coding algorithm. Balanced analog audio is available via XLR ports on the rear panel, while the microphone and headphone jacks make the terminal ideal for the mobile reporter. A numeric keypad and LCD display provide full status information. The DRT 128 provides reporters with a variety of transmission options - including stereo - to suit the individual application. An additional benefit is that the system can also be used to transmit data - uploading, for example, material from a journalist's laptop computer.

CALL 1-800-732-7665 FOR BRADLEY PRICE

- Full two-way operation - encoding and decoding in the same box
- Simultaneous, bidirectional MPEG Audio Layer II or G.722 coding.
- Built-in ISDN Terminal Adapters with ST and U interfaces
- Selectable sampling rate (MPEG only)
- Compatible with most other MPEG Audio Layer II ISDN codecs
- Simple user interface with "one-touch" call setup
- Auto-detection of the receive audio characteristics

TELEPHONE INTERFACE
MARTI SMARTI TELEPHONE REMOTE

The SMARTI RKS-411 and RKS-111 are capable of sending and receiving broadcast quality audio over a standard (POTS) telephone line. Utilizing the latest MPEG compression algorithms coupled with modern DSP technology, the SMARTI offers Broadcast Audio Quality with phone line convenience. For more than just “talk”, the SMARTI handles complex audio. The SMARTI incorporates many features not found in other telephone remote equipment without the need for costly “ADD ON” items. IT’S ONE SMART BOX... or TWO.

RKS-411

- Four inputs using standard XLR connectors, mic/line switchable and individual level adjustments.
- Front panel, 600 ohm monitor output via standard 1/4" plug.
- Three headphone jacks using standard 1/4" connections with individual program/return fade pots.
- Return and Program audio line level adjustments.
- Supports up to 33.6 Kbps depending upon the phone line.
- Internal switching power supply operates from 100 to 240 volts
- Software upgrades are done automatically via modem connection to MARTI.

RKS-411 62BRRK411 $2,800.00

RKS-111 features are the same as the RKS-411 with the exception of:

- One input using standard XLR connectors, mic/line switchable and individual level adjustments.
- One headphone jack using standard 1/4" connections with individual program/return fade pots.
- Rack mountable or field portable.

RKS-111 62BRRK511 $3,200.00

MUSICAM USA CODECS

The CDQ Prima series now incorporates Layer III coding, in addition to Musicam™, a digital audio enhancement to MPEG Layer II that is compatible with other Layer II codecs.

All models in the family are based on a common set of core features, configurable with different options, and you can upgrade any CDQPrima as your needs grow. Common features include an integrated support processor with the power of a high-end personal computer, world power supply, 18-bit AD/DA converters for better signal quality, plug-in communications modules, and AES/EBU so you’re ready for the all-digital studio (optional on Model 110). You also get a dial keypad, downloadable software changes, and computer ports for external control. Each codec supports MPEG-I at 32 and 48kHz, and MPEG-II at 16 and 24Hz; each also contains G.722 ADPCM coding and will automatically detect which scheme is in use. No separate terminal adapters needed.

You can customize your codec with psychoacoustic parameter adjustment, multiple interface slots, alarm relay, inverse line multiplexing to use several ISDN lines at once, digital VU meter, SMPTE time code, and more.

CALL 1-800-732-7665 FOR LITERATURE AND A BRADLEY PRICE QUOTE.

COMREX CODEC BUDDY

Codec Buddy is just that, a field unit designed for use with digital codecs like the ones we offer on pages 10-12. This versatile four-channel mixer is ideal for feeding cellular phones, POTS lines, and RPUs.

Remotes using codecs require lots of feeds, including main channel to station, headphone audio for several people, PA feed, intercom audio for the engineer, backup feed, and more. With all these mixes, each with its own level, your remote site can look like a wiring nest. Use the Buddy instead. Most sites will require only a Buddy and a digital codec with terminal equipment.

Features include four XLR mic inputs (two of which also take line), four headphone outs, spotter input, sophisticated headphone mixer and matrix, a PA feed so local fans can hear talent and callers coming in on the return codec channel, a telco interface with coupler and dial pad, and a single-line frequency extender to enhance program transmission on a standard dial-up line or cellphone. Weight: eight pounds.

**GENTNER HYBRID COUPLER AND AUTO COUPLER**

**GENTNER HYBRID COUPLER**

The economical Hybrid Coupler is nice for one-way audio feeds, news, and telemarketing. It connects to a phone line via a modular jack, and provides a loop-through to a telephone set. A three position switch allows it to seize the line, simply tap the circuit, or be turned off. Its hybrid coil provides approximately 10dB of separation between send and receive, adjustable with a trimmer. The coupler is a passive device requiring no power.

CALL 1-800-732-7665 FOR BRADLEY PRICE

**GENTNER AUTO COUPLER**

Gentner's auto-answer, auto-disconnect units are intended for listen lines and IFB sends. Connect one at each audio source you wish to monitor by phone. They allow simultaneous send and receive upon connection. Balanced 600 ohm connections are provided for both send and receive audio, and a null trimmer pot maximizes isolation. This version hangs up the phone line at loop drop. A special CP version is used on lines where the phone company does not provide the loop drop signal. The decoder disconnects when it hears dial tone, busy signal, recorder signal, or ringback. Units operate on 117VAC from a provided external power supply.

**TAC AUDIO COUPLER**

Feed your precious audio from your field recorder into a phone, and listen while you're feeding. TAC, by Sound America, connects in series with the handset and is suitable for feeding news cuts, remotes, and sales demos. Great for Marantz and Sony decks. It connects with virtually any phone (except those with the dial in the handset). The low impedance input on both models is designed for cassette recorder outputs. TAC+ adds a high/low impedance selector and 60dB attenuator pad.

**GENTNER MICROTEL**

Microtel is bristling with connectors to make your job of connecting audio to a phone line easier.

It connects to a phone, replacing the handset with your mic and headphones. Inputs are provided for a mic (XLR) and an aux (1/8" TS mini). An additional input lets you feed the headphone bus with IFB or air monitor. Outputs are provided for headset (1/4" TRS) and high-level (1/8" TS mini), as well as an auxiliary feed jack for tape machines or dedicated loops. It's for IFB, news reporters, salespeople, anyone who needs to record calls or send audio. Uses one 9V battery.

Remotes are Tough.  
Your Tools Should Be Too.

Remotes are tough enough in themselves. The last thing you need is equipment headaches. That's why JK Audio offers a full line of remote broadcasting equipment that's functional, rugged and easy to use. So whether your situation demands a full-featured phone line hybrid/mixer or simply a telephone audio tap, JK Audio has the tools you need to face even the toughest remotes. For your free JK Audio product catalog, please ask Bradley Broadcast or email us at info@jkaudio.com.

COMREX TELEPHONE COUPLERS

These couplers provide clean transformer connections between your telephone lines and external audio equipment. Designed for send or receive-only applications, they have modular telephone jacks for the phone line and for a telephone set.

The TCB-1 Manual Coupler provides a switched hold connection. Unbalanced audio in/out is on a single 1/4" TRS connector. The unit does not require power. The TCB-2 Auto-Answer Coupler answers the telephone line on the first ring and disconnects that line when the caller hangs up. An A/C power supply is included. If your CO does not provide loop drop, order the optional dial tone detect board.

EXCALIBUR HC-1 HANDI-COUPLER

Use the Handi-Coupler on remotes and around the station: on-air, production, the newsroom, the sales office, and in the sports kit. The HC-1 connects in series with the handset of any telephone using modular connectors. Since a connection to the telephone line is not required, the HC-1 can be used with almost any telephone in single or multi-line, modern electronic or older key systems.

Pressing the front panel button disconnects the handset and connects the external audio in/out jacks to the telephone. Releasing the button reconnects the handset, allowing normal use of the phone. External audio is connected via separate input and output jacks. Both inputs and outputs are 1/4" TRS jacks wired so that you may use either balanced or unbalanced connectors.

HC-1 60EXHC1 $99.00

Take $10 off the price of an Excalibur HC-1 when you buy any Marantz PMD recorder!

SOUND AMERICA R/SVP

News, sales, and PR types will use the “Record/Send Verywell Phone”. It's a classic TouchTone™ desk phone with a coupler built in, so you can connect a cassette recorder or other source direct to the phone network with no loss of quality. Feed your audio down the line – use the handset to mix in voice or switch it to "mute". Also record phone conversations or make voicemail messages with music added. Mini 1/8" jacks for send and receive are provided. SVP is a send-only version.

Want a push-to-talk handset? Order the PT-1 option with either model.

TELEPHONE INTERFACE
BROADCAST DELAY, HYBRIDS & INTERFACES

SYMETRIX 610 BROADCAST DELAY

Symetrix offers great value in the 610 talk delay, which gradually builds up 7.5 seconds of 14kHz stereo audio in memory. Push a button to dump the profanity and start the build-up again.

The 610 can be set up so that only half of the 7.5 second memory is deleted, retaining a reserve of 3.75 seconds. This lets the host bring up another caller without having to wait for memory to build from scratch, a feature which will be appreciated on fast-moving talk shows. Push “exit delay” at the end of the show, and the 610 gradually releases memory until you’re operating in real time again. Connectors are XLR with switchable +4/+8 nominal level. The unit is bypassed if power is lost or the bypass switch pushed.

A cough button lets the host take a quick break with no dead air, great for taking a quick sip of water. No one will ever know.

610 60SY610 MFR LIST $2,695.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

EVENTIDE BDS500 DIGITAL BROADCAST DELAY

Thousands of broadcast users made suggestions for Eventide’s next model, and here’s the result, a stereo delay with an enhanced version of their exclusive automatic catch-up circuitry, optional digital I/O, and many conveniences.

When you push DUMP, you no longer have to worry about a few moments of unprotected airtime while the delay re-builds. The BDS500 lets you divide the delay time into segments. Each time DUMP is pressed, only one segment is dumped. If another naughty word is spoken right away, push it again to dump the next segment of delay. So you might set up three segments, like this: [3 seconds], [3 seconds], [2.5 seconds], each an extra level of protection.

Standard stereo delay is 8.5 seconds, and more can be added. A new “sneeze” button edits audio to your delay, so the host can cough or make an aside without being heard and without a pause. Most front panel switches can now be remoted.

Analog XLR’s are standard, with digital AES/EBU available optionally. It’s all in one rack unit, and all built around Eventide’s great algorithm that catches up quickly without degrading your audio.

CALL 1-800-732-7665 FOR BRADLEY PRICE
GENTNER TS612 MULTI-LINE PHONE SYSTEM

Gentner's impressive system has two digital hybrids that let you conference up to four callers at once. The TS612 is sophisticated yet requires little training, and lets your operator screen and organize calls with ease. With new optional call-screening software, the screener can control the system right from a PC keyboard, with eight fields to describe each caller.

Choose between six and twelve lines, expandable to several studios and applications. No mix minus is required. A glance at the multi-color indicators shows the status of each line (ringing, in-use here, in-use elsewhere, unscreened-and-holding, screened-and-holding, and on-air). A VIP button puts a guest on a line that cannot be deselected or put on hold.

The control surface is unique and one of the best things about the TS612. It incorporates a phone handset, so you don't need a separate screener's phone. Your screener can talk with a caller while other callers are on the air. If you wish, you can add two more control surfaces to the basic system to add a second studio and an outside screener.

A NEXT feature selects the call that has been waiting the longest. A REC button allows simple recording of calls by triggering your tape deck.

The system allows direct connection to a PC or digital storage system via RS232. A new, optional network interface provides for expansion to accommodate up to ten studios. Up to ten TS612 systems can be networked using the same six or twelve common lines.

The TS612 is suited to talk shows, contests, business TV, and audience interaction.

GENTNER DH-III, DH20 & SPH-10

Superior audio quality is the hallmark of the professional Gentner hybrid DH-III. Semi-AGC provides consistent audio levels for your callers. The CUE button lets you screen calls off air; REC starts your tape recorder.

Automatic re-nulling allows the hybrid to be connected to a multi-line phone instrument used as an on-air selection device. Auto answer/auto disconnect, auto nulling, caller alert tone, and quiet switching on new line selection are also part of the DH-III story.

A simpler, economical alternative is the DH20, which omits the AGC, REC, and CUE functions but retains the performance quality through 16 bit processing with 2x oversampling, 10kHz sampling rate, automatic and continuous nulling, adjustable caller control (ducking), internal test tone generators, remote control capability, and single-space rack mount design.

The DH20 and DH22 are single and dual hybrids with all-new features. No mix-minus is required, as the units generate them internally. Auto-answer/disconnect are standard, as is a monitor amp for caller audio. The DH20 and DH22 automatically adapt to changing telephone line conditions, to provide superior audio quality at all times.

Also Available: Gentner SPH-10 Telephone Hybrid

A new, affordable analog telephone hybrid from Gentner, the SPH-10 incorporates exclusive audio filtering and equalization to eliminate unwanted noise and hum, while maximizing caller intelligibility. The SPH-10 includes a monitor speaker jack for hands-free call monitoring, and caller-only and caller plus send outputs for recording. I/O is via balanced XLR connectors, with telephone connection and loop-through on RJ-11 connectors. Worldwide compliant, the SPH-10 is CE/CSA approved, and accepts power supply voltages from 100 to 240 volts at 50/60 Hz.

| SPH-10         | MFR LIST | $499.00 |

CALL 1-800-732-7665 FOR BRADLEY PRICE

Note: The DH-20, DH-22 and SPH-10 require “talk battery” to function. They will not work with handset adapters, switches, or PBX extensions that provide only a “dry” line.

RADIO SYSTEMS TI-101 INTERFACE

You'll find this affordable telco interface easy to install and set up. Connections are XLR for audio, banana posts for phone. Popular with smaller stations, this is a solid choice when you're watching the dollars carefully.

Connect pro audio mixers to phone lines and eliminate feedback and gating problems. Caller equalization, send limiter, caller mute, and conference linking are standard. The factory support from the folks at Radio Systems is very good.

HYBRIDS & ACCESSORIES

TELOS ONE DIGITAL TELEPHONE HYBRIDS

One of the best values in telephone hybrids anywhere, and year after year a customer favorite thanks to automatic adjustment to each call, sophisticated AGC on input and output, an advanced downward expander on the caller audio, and digital processing to reduce dramatically the chances for feedback when monitoring with open speakers.

Telos ONE has two outputs and a switchable mic/line input. Choose between rack mount and "modem ease" versions, which can also rack mount with optional hardware.

The ONE plus ONE starts with two Telos ONE digital hybrids in a single rack unit chassis. Each hybrid functions independently. An internal mix-minus matrix cross couples the outputs of the two hybrids. In a dual hybrid application, you need only send the ONE plus ONE a single mix-minus. All of the Telos ONE features are included.

Telos ONE rack mount version 60TS1R MFR LIST $1,050.00
Telos ONE modem case version 60TS1 MFR LIST $680.00
Telos ONE plus ONE 60TS11 MFR LIST $2,180.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

TELOS 100 DELTA DIGITAL HYBRID

The digital signal processing of the 100 Delta includes a dynamic digital equalizer that examines the caller audio in three frequency bands within the context of the overall signal. The high and low bands are automatically equalized with reference to the mid band. The 100 Delta also boasts logarithmic (dB) dynamics control and context sensitive AGC. Together these processes offer increased caller intelligibility and matched levels.

The 100 Delta has two mixed inputs (one line level and one mic/line) and two outputs (one with caller audio and the other with a continuously adjustable mix of caller and mix-minus). This simplifies the creation of external mix-minuses. DUPLEX DEPTH can be adjusted for full-duplex, half-duplex, or any point in between. Two DEPTH settings can be stored and remotely selected. This allows remote switching, between a setup requiring more depth for maximum feedback suppression, and one where feedback is not a concern and maximum duplex conversation is desired. The 100 Delta performs well on even the toughest phone lines thanks to its extraordinary trans-hybrid loss and sophisticated processing.

100 Delta 60TS1000 MFR LIST $2,180.00

TELOS DIRECT INTERFACE AND 1A2 INTERFACE MODULES

Here are two powerful choices for selection and control of multiple telephone lines in broadcast systems. The Direct Interface allows direct connection of up to 10 phone lines. It functions as a full broadcast phone system including program on hold and caller conferencing.

The 1A2 Interface Module makes use of standard 1A2 key telephone equipment. Each handles 10 phone lines and units can be coupled to handle up to 30 lines. Software upgrades for both interface modules add several functions such as AUTO-ANSWER, which automatically answers incoming calls and places them on hold.

The desktop Switch Console offers extensive line control, remote tape machine start/stop, and a BUSY-ALL mode that is great for clearing all lines before a contest. Other control options include drop-in modules for BE, PR&E, and other popular radio consoles. Screen your callers with phones, or use the powerful Assistant Producer software, described to the right.

TELEX RADIOCOM BTR-500/600 UHF

The Telex Radiocom BTR 500/600 UHF wireless intercom system offers the ultimate in reliable, high performance full duplex communications.

Operating in the 520 to 760 MHz range, these units operate reliably at distances over 1000 feet. The base station and belt pack on the BTR500/600 have two UHF transmit frequencies and two UHF receive frequencies.

The BTR 600 series incorporates auto-switching two-channel frequency agile audio operation, permitting the belt pack user to select between two separate audio channels of communication. The BTR-600 series also includes a unique digital encryption process for those who need secure communications. Both systems are perfectly suited for stand-alone operation and easily expand up to 16 BTR/TR sets permitting up to 32 discrete full duplex channels. The BTR500/600 are fully compatible with the RTS TW and Audiocom party line intercoms, as well as RTS Digital Matrix systems and other 4 wire communication systems.

**THE TELOS LINK**

From the Telos factory in Cleveland comes this very useful device to connect intercom systems via phone lines. Your crew can communicate as effortlessly as if they were together in one location.

The Link allows natural, full-duplex communication without level or feedback problems, thanks to adaptive digital hybrid technology. Both the telco and comm paths use digital auto-nulling hybrids, so neither party misses a syllable. A digital audio processor performs automatic gain control, smart gain switching to enhance hybrid performance, high pass filtering to reduce hum and interference, pitch shifting for feedback reduction, and call signal generation.

The Link has an interface for RTS, Clear-Com, and other intercom systems. Other features include a "wet" single channel operation option to provide power to belt packs and metering for both intercom and telco levels. The auto-answer function lets field personnel simply call in to be connected. Rack mounting kits are available.

Note: The popular 'Mos ONE phone hybrid is available in versions for interfacing four-wire intercom systems with dial-up phone lines or two-wire intercoms. Call us for info.

**TELEX INTERCOM SYSTEMS**

You'll see the Telex name on TV every weekend, adorning the heads of coaches who stomp up and down the sidelines, their neck veins bulging as they direct their troops. Telex is built to take the abuse, not only on the field but in broadcast vans, theaters, and lecture halls.

Audiocom is versatile, capable of balanced or unbalanced formats, single or two channel lines, wet or dry operation, even in limited rack space. Components are modular, letting the system grow with you. You can set up simple belt pack party lines, or sophisticated, director-controlled networks with multiple channels, IFB's, and matrix control. Use standard mic cable to connect up to 22 channels of user stations, belt packs, speaker stations, and power supplies.

Radiocom is a wireless alternative to any intercom, performing like a wired system thanks to quality VHF highband companding, full duplex. It has a built in interface for connection to Audiocom balanced line systems, RTS, and other unbalanced systems such as Clear-Com.

CALL 1-800-732-7665 FOR A TELEX INTERCOM SYSTEMS BROCHURE

**RTS SERIES 2100 WIRELESS INTERCOM**

Communicate without wires. The RTS Series 2100 is a complete wireless intercom system that operates in the 150 to 216MHz band, protected from external radio and electrical interference. Four belt pack transceivers can operate with the Model 2105 base station, and when two base stations are chained together, up to eight headset stations can be tied into a full duplex communication network.

The rugged, lightweight Model 2110 belt packs offer up to 24 hour operation on a single battery and numerous operator convenience features. Two belt pack transceivers form a simple two person link, and the Series 2100 is easily used as an extension to your hard-wired intercom for unlimited possibilities.

MB QUART COMMUNICATION HEADSETS

You've never heard of MB Quart, right? We hadn't either, but when we tried these headsets we knew you'd love them. Virtually indestructible, (you can jump on them and they won't break) these rugged headsets come with a three-year manufacturer's warranty. Choose from three models: the MBK800 is a closed ear design, wired for mono systems but can be ordered with 1/4 inch mono plug or C with 1/4 3.5mm plug. The MBK800E features with a XLR 4-pin female connector.

MBK800 62CTMBK800 MFR LIST $189.99

BOOMSETS

TELEX HEADSETS

Intercom headsets must meet a different standard. They're worn constantly, so they must be lightweight and rugged. The audio needs to be clean and clear, targeting voice frequencies. Yet they can't bust your budget, because you have other things to spend your money on.

The PH-1 is a single-sided, full cushion monaural headset with dynamic, noise-cancelling boom mic with response of 100Hz-8kHz. Earphone output is 105dB. The PH-2 is a dual-sided version.

If you prefer a lightweight model, choose the PH-4 dual sided headset with 98dB earphone output, or the PH-8 single-side version. Mic response is 50Hz-10kHz.

All models listed have earphone impedance of 150 ohms and earphone response of 50Hz-15kHz; all have five foot cable terminated in a female XLR-4 connector. (For male connector, add "R" to the part number.)

PH-1 60TXPH1 MFR LIST $140.00
PH-4 60TXPH4 MFR LIST $150.00
PH-2 60TXPH2 MFR LIST $160.00
PH-8 60TXPH8 MFR LIST $140.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

SENNHEISER HMD 25-1

The HMD 25-1 has comfortable closed supraural earpieces for good isolation, and a supercardioid mic with 50-12kHz response. Headphone response gives that great Sennheiser sound at 30-16kHz. The six-foot cable is unterminated.

HMD 25-1 60SNHMD251 $160.00

CROWN HS MICROPHONES

Do you use Sony headphones? Crown's broadcast microphones are designed to fit onto the earpiece of your MDR-7506, either side. Turn a classic headphone into a classic headset!

The CM-311AHS is suitable when you're covering a sports event, soaring above the city in a traffic chopper, or working a news story. It rejects background and off-axis noise with a highly effective cardioid pattern.

The CM-312A with hypercardioid pattern is for quieter studio environments, talk shows, and location interviews. The mic is to the side of the mouth, inconspicuous and resistant to pops.

Both models adjust for comfort and come with a belt pack with XLR output connector, battery on/off switch, mute switch, and foam pop filters. Power your mic with phantom or a 9V battery.

Headphone not included.

CM-311AHS 60CRCM311HS MFR LIST $299.00
CM-312A 60CRCM312HS MFR LIST $279.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

SHURE SM2

You'll be a hero for finding great headset quality at this price. It's for radio, TV, film, and video. The boom puts the mic on either side of the head. The mic is designed to be used very close to one corner of the mouth; it reduces distant noise effectively. The set is heavy duty but weighs less than 11 ounces and is soft against your ears. Mic response is 50-15kHz, headphones 100-5kHz. The cable is detachable for quick and easy changes between mono, stereo, or split feed headphone functions. Cable is unterminated.

SM2 60SHSM2 $209.00

BEYERDYNAMIC DT SERIES

The DT-290 is a double-sided headset with dynamic mic and five-foot cable. It's part of a new series of low profile, lightweight sets for sports commentating, great on camera. Modular parts make service simple. Single-sided and condenser versions are available.

Always popular, the DT-108 and 109 provide full bandwidth headphone audio; their noise-cancelling mics can handle considerable sound pressure from excitable air talent. The DT-109 is a dual-ear-muff model; the DT-108 has one earpiece. Headphones on the 108 and 109 are 400 ohms. With the DT-290, you now have a choice of 80 or 250 ohms. All mics are 200 ohms with other impedances available. Headset cables are unterminated. The 108 and 109 can be ordered with optional coiled cable and in balanced mic versions.

SENNHEISER K6 MODULAR MIC SYSTEM

Choose your mic capsule, add the powering module, and you’re set with one of the most flexible mic systems around. Choose a lav system, or handheld ENG. Need to switch to a shotgun mic, or a podium style? Switch capsules simply by screwing them off and onto the K6. It runs on 12-48V phantom or for 150 hours on a single “AA” cell, and includes bass rolloff switch. Its output is balanced, low-impedance (200 ohms) and terminates in a 3-pin XLR.

All capsules are black and use back-electret technology. A single module plus a few interchangeable capsules provide you the flexibility you need in your mic kit.

Popular Systems:
- MKE2-60 omni lavalier and K6 power supply
- ME64 ENG handheld and K6 power supply

Mic Capsules if bought separately:
- ME65 for ENG, a new supercardioid handheld with high gain before feedback. 50-20kHz. $229.00
- ME66 Short Shotgun combines supercardioid at low frequencies plus shotgun above 2000Hz. Light weight prevents fatigue in handheld use. 50-20kHz. $219.00
- ME67 Spot Shotgun combines supercardioid at low frequencies plus shotgun above 2000Hz. An excellent value, great for TV or podium use. 50-20kHz. $219.00
- ME64 Cardioid, tight pattern, high gain before feedback, good for speech. 50-20kHz. $309.00
- MKE2-60 Omni Lavalier, less than 1/4” diameter, popular for broadcast or instrument use. 20-20kHz. $169.00

Powering Module: K6 (phantom and “AA”)
- 60SNK6 $219.00

Other modules available. Call for pricing on mounting hardware and windscreens.

ROLLS PB24 PHANTOM POWER PLUS

The PB24 battery powered phantom power adapter delivers all the clean transparent power needed for any microphone. This unit operates on battery or AC power. Phantom Power Plus 61RLPB24 $90.00

LIGHT WAVE SCREENS, MOUNTS & FISHPOLES

Protect your field shotgun from wind and handling noise. Super Screens provide great wind attenuation; add a Super Mount pistol grip for the best in mic isolation. Models to match mics in this section are listed; we can quote many others.

Light Wave fishpole booms have telescoping cam locks and provisions for internal wiring. Also available: several models of high-wind covers to provide further protection, including the classic Super-Sock, an oversized Super-Sock, and the Windmaster with 3/8” deep fur-like pile.

BIG EARS PARABOLIC REFLECTOR FROM SENNHEISER

Big Ears is a parabolic reflector that makes it possible to pickup sounds more than 200 feet away. Attach your mic and you’ll hear the result of intensive study into the ideal reflective patterns. Big Ears can be focused for the best performance. It’s lightweight (five pounds) thanks to patented composite plastic. It’s available in clear or in one of five see-through colors. Both the shape and thickness are molded to very tight tolerances. Two mounting plates in the handle accommodate wireless equipment. The handle and mic yoke detach for storage. The dish is shatter-resistant for the safety of the operator. Microphone not included.

MICROPHONES
HANDHELD MICROPHONES FOR ENG/EFP

BEYER M 58
Your friend with the “golden ears” will tell you how fine this mic sounds. The M 58 is a top-of-the-line handheld with a full 40-20kHz response. Its low mass diaphragm produces superb intelligibility. Shock mounted for low handling noise. The balanced 10” shank has a sweet feel in your palm. You’ll find this mic in the field kits of some of the finest in our trade.

M 58 60BEM58 $179.00
Mic clamp 61BEMKV8 $17.95
Windscreen 60BESS58 $18.00

SHURE VP64A
Over and over our customers tell us how pleased they are with this simple, affordable, durable field mic. The long handle on the VP64A provides an interviewer with better reach, and its styling looks great on camera. It uses a neodymium magnet for an output up to 6dB higher than competing models.

An internal shock mount reduces handling noise. Response: 50-12kHz. The VP64A includes a windscreen and stand adapter.

VP64A 605HVP64 $89.00
VP64 Long 605HVP64AL $109.00

Karry your mics in style with Kaces mic bags. See page 10!

SHOTGUN MICROPHONES

Can’t get there from here? Grab a shotgun and listen in anyway. Most can be handheld, camera or boom mounted, or operated from a fishpole.

AUDIO-TECHNICA
Power the popular AT815B with either one “AA” cell or phantom 9-52V. At only nine ounces and under 19”, this Audio Technica model won’t load you down. Or consider the AT835B extended-range condenser. It combines the best attributes of cardioid and shotgun mics. Phantom or internal battery powered, the AT835B has high sensitivity and flat response. It is 14-1/2” long. Both models include bass rolloff, stand clamp, storage case, and windscreen.

AT815B 60AT815 $279.00
AT835B 60AT835B $229.00

SENNHEISER
The Sennheiser MKH-416 is a specialized directional mic for interviews, podiums, and long-distance video work. It has a supercardioid/lobe shotgun pattern with good feedback rejection and 128dB/SPL. It’s 10” long and weighs about six ounces, suitable for boom, fishpole, and cameras. Audio is full bandwidth; use 48V phantom or ask about the 18V A-B version. Also ask us about the MKH-70 ultra-directional, for crowded news conferences, movie and TV sets.

MKH-416 605NMKH416 $1,247.00
AKG C535EB

The C535EB has the clean, open characteristics of AKG's best studio condensers, enhanced by a 2dB rise between 7 and 12 kHz to project vocals in front of the mix. An integral four-position switch tailors output level and bass roll-off for a variety of uses. A sharp LF cut at the full output level reduces pops and handling noise in vocal applications, while a gradual roll-off at the reduced output is ideal for most instrument applications. The C535EB requires 9-52V phantom power.

C535EB  60AKC535EB  $189.00

AUDIO-TECHNICA MB4000C

Bringing professional condenser mic quality to the stage at an affordable price, the MB4000C offers exceptional sound quality (frequency response of 50-18,000Hz), a multi-stage internal breath shield to reduce popping, internal shock-mounting, and other intelligent features. It offers more clarity and high end than you can get from dynamic mics, along with smooth, silky transients. Perfect for live vocals in nearly any situation, especially considering its low price. Operates on 9-48V phantom power or 1.5V AA battery (not included).

MB4000C  60ATMB4000C  $79.00

AUDIO-TECHNICA UNITOOLS

Overcome commonly encountered sound installation challenges quickly with Audio-Technica's Unitools. They're rugged, compact, economical and easy to install. Unitools provide solutions for individualized custom applications that would otherwise require a fully equipped accessory rack costing much, much more!

- Mic Limiter with adjustable threshold  60AT8686LM  $59.00
- Voice operated switch with adjustable threshold  60AT8682GATE  $59.00
- 2-to-1 Mic Combiner with balance control  60AT8681MIX  $54.00
- Mic Attenuator with switch function  60AT8664MUTE  $54.00

CROWN GLM SERIES

Looking for that perfect microphone for instrument use? Look no further! Crown's GLM-100 miniature omnidirectional microphone has exceptionally wide, smooth frequency response specifically designed for musical instrument applications. An 8' cable with a male XLR connector is permanently attached and comes with the GLM-UM universal mount, GLM-W82 windscreen and the GLM-7B tie bar. Order the GLM-100/E, omnidirectional molded Mic capsule, for use with wireless microphone transmitters. Need a hypercardioid mic instead? The GLM-200 is the mic to choose. All three require 12-48V phantom power.

HANDHELD MICROPHONES

AUDIO-TECHNICA STEREO MICROPHONES

Suitable for use with pro DAT and cassette machines, the AT825 from Audio Technica has two elements in an X/Y pattern. It produces wonderful stereo recordings and is mono compatible. Use an "AA" cell or phantom power. Switchable low cut filter and windscreen are included; the cable terminates in XLR's.

AT825  60AT825  MFR LIST  $525.00

Also Available: The AT822 stereo mic is ideal for use with portable DAT decks like the Sony MZ-R30 and TCD-D8. It's similar to the AT825 but is designed for battery use only and outputs are unbalanced. You get two cables: One terminating with a 1/8" stereo mini-plug and the other with dual 1/8" mono mini-plugs with 1/4" phone plug adapters. A great field tool, a super value.

AT822  60AT822  MFR LIST  $399.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

ELECTRO-VOICE RE50

It's like a mic within a mic. The omni RE50 has the same tailored response and high output of its cousin the 635A, and its resilient shock mount design gives plenty of isolation. The built-in windscreen is an effective pop filter. Also available in an N/DYM version; call for pricing.

RE50  60ELRE50  $179.00
RE50B  60ELRE50B  $179.00
Windscreen  60EL376  $24.00

AKG D-230

The long handle of this 8-1/2" omni dynamic holds a mic flag nicely; the integrated windscreen rejects wind and pops. The matte, non-reflective finish is perfect on camera. Worth a listen for any field work. Response 40-20kHz, weight 8 oz. Internal shock absorber.

D-230  60AKD230  $139.00

AUDIO-TECHNICA PHANTOM POWER SUPPLY

Can you do without the NEW Phantom supply from Audio-Technica? This phantom power supply delivers 48 volts in a single AC powered supply. Powers a single microphone.

48V Phantom Power Supply  60AT8801  $65.95

SHURE SM57 & SM58

For handheld or lectern use, the SM57 is a good choice. Presence boost and low end roll-off treat voice frequencies with wondrous care. Non-glare gray is ideal for stage or camera. Also a fine instrument mic. 40Hz to 15kHz.

The next step up is the SM58, used for voiceovers and ENG. It has a spherical windscreen and fixed bass roll-off to prevent popping or boombiness close up. Order it with or without on/off switch. Also an outstanding music vocal mic. 50Hz to 15kHz. Both weigh about 10 oz. These dynamic cardioids are truly two of our best sellers.

SM57  60SH57  $97.00

Critical recording demands ultra-low self-noise, great sensitivity, and wide dynamic range. Here they are, all in one condenser package: the RE2000. It's compatible with your finest digital audio recording equipment. E-V gives you response of 70-18,000Hz, an integral heating system that controls the heat and humidity of the mic, and its own external power supply so you need not rely on inconsistent power from a console phantom system.

Features include supercardioid pattern, gorgeous mid-size diaphragm for high output with smooth transient response, custom Jensen transformer for clean true 150-ohm output, and 12-dB-per-octave switchable low-frequency roll-off. The RE2000 comes with hard-shell case, external pop filter, power supply, shock mount system, stand adapter, and 20-foot cable. This is an exceptional professional microphone. Weight of mic with mount: 28.3 oz. plus power supply and cable.

RE2000 60ELRE2000 MFR LIST $2,450.00

AKG C3000

AKG is leading the way at bringing expensive condenser performance within everyone's reach. The C3000 doesn't look like any other mic, but in performance it emulates the best AKG's. It includes a built-in spider shock absorber and the following switchable features: cardioid/ hypercardioid pattern, bass roll-off, and -10dB pad for close miking. Takes 9-52V phantom. A super, large-diaphragm performer. Weight 11 oz.

AKG C3000 60AKC3000 $269.00
HTS22 Elastic Suspension 60AH1352 $179.00

STUDIO CONDENSER MICROPHONES

AUDIO-TECHNICA 4060 TUBE

The 4060, the latest offering from Audio-Technica, brings back the vintage tube sound of years past with the versatile performance necessary for the most demanding studio applications. Wide dynamic range, low self-noise and high max SPL capability guarantee a carefully-controlled cardioid pattern that maintains uniform off-axis response. The 4060 has dual large-diaphragm elements for extended frequency response from 20-20,000 Hz. Hand-selected tubes are aged and individually tested to ensure peak performance. Accessories furnished with the 4060 include the AT8560 power supply, switchable 120V/230V input, AT8447 shock mount; 32.8' (10 m) special mic-to-power supply cable, AC power supply cable, power supply rack-mount adapters and protective mic case.

4060 Tube Mic 60AT4060 MFR LIST $1,695.00

AUDIO-TECHNICA 4050/CM5

Here's a warm, multi-pattern studio mic for demanding uses. Dual gold-plated, large-diaphragm, aged condenser elements provide response of 20-20kHz, dynamic range of 132dB, and SPL handling of 149dB, even more with the switchable 10dB pad. Patterns are cardioid, omni, and figure eight. Low-end roll-off switch, internal windscreen, and external shock mount are included. It operates with any remote phantom or simplex source supplying 48VDC. Weight: 16.9 oz.

AT 4050/CM5 60AT4050CM5 $599.00

AUDIO-TECHNICA 4033

The AT4033 is an affordable cardioid condenser mic, well-suited for digital applications. It boasts frequency response of 30Hz to 20kHz. Powered by an external 48V phantom source, the AT4033 can handle up to 140dB SPL (150dB SPL with the switchable 10dB pad) without distorting and has dynamic range of 129dB. It also has an 80Hz hi-pass filter to reduce sensitivity to popping. The mic is also available with a shock mount. Wt: 14.5 oz.

AT4033-SC (w/stand damp) 60AT4033SC $399.00
AT4033-SC (w/shock mount) 60AT4033 $399.00

NEUMANN TLM-193 CONDENSER

The familiar name, the incredible audio, the famous logo at the bottom... they're all here. The TLM-193 is a cardioid large-diaphragm condenser mic with 130dB dynamic range, 20Hz to 20kHz response, very low self-noise, and the rich Neumann sound. But the price—ay, there's the rub. It's less than half that of other famous Neumann condensers. Let us give you a quotation for this fine audio device. Requires 48V phantom power. Weight 1.08 lb.

TLM-193 60NTELM193 MFR LIST $1,495.00
WS-89 Windscrean 60NEWS89 MFR LIST $30.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

NEUMANN TLM 103

Virtually every vocal recording through the history of recorded music couldn't have been done without Neumann. Neumann mics have always lent that unmistakable "Neumann sound" to recordings by the biggest and best artists ever. In the past, this unrivaled quality has always come at great cost. But no longer! The brand new TLM 103 is the Neumann for the rest of us. Using a new cardioid pattern condenser large-diaphragm capsule design that is modeled on the beloved U 87 capsule, it provides the sound you've always been after at a price previously unimaginable. If you want to enhance your recordings as much as possible, start at the very beginning: the microphone. From there, the rest will all fall into place. Requires 48 volt phantom power. Weight 1lb.

TLM 103 60NTELM103 MFR LIST $995.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

AKG SOLIDTUBE

The heart of this large-diaphragm condenser transducer microphone is the ECC83 vacuum tube. The housing on the Solidtube provides a large air cavity for the capsule, creating an ideal environment for the acoustic properties of the large diaphragm.

Flip the side switch on the Solidtube to activate a 20dB pre-attenuation pad, enables the Solidtube to handle sound pressure levels up to 145 dB SPL.

The Solidtube comes packed in a rugged carry case complete with elastic shock mount suspension, windscreen, power supply and all connecting cables. Weight 2lbs.

AKG Solidtube 60AKSOLIDTUBE $995.00

AUDIO-TECHNICA AT837R

Now you can get UniPoint performance in a superior vocal mic. This handheld has an internal shock mount. The hypercardioid element can be swapped for three other optional patterns. Runs on 48V phantom only. Windscreen included.

AT837R 60AT837R $159.00

AKG C1000S

AKG condenser quality is available in a moderate price range with the C1000S. It includes a pattern converter for cardioid or hypercardioid operation. Powering is via an internal 9V battery or external 12-48V phantom. The C1000S comes with a foam windscreen and stand adapter. Weight 9.7 oz.

C1000S 60AKC1000S $179.00

STEWART POWER SUPPLIES

Deliver +48V to mics, direct boxes, any device needing phantom power. All versions include a PS-1 power supply, and you can combine models for up to 12 channels on one supply. Isolated outputs protect other equipment.

For field work, use the BPS-1 battery supply which uses two 9V's to produce +48V phantom power for a single mic. Belt clip and low-battery indicator included.

PM-1 one channel 60SEPM1 $79.00
PM-2 two channel 60SEPM2 $125.00
PM-4 four channel 60SEPM4 $149.00
BPS-1 battery powered 60SEBPS1 $95.00

AUDIO-TECHNICA ATM73AC

The ATM73AC from Audio-Technica is the perfect microphone for anyone requiring hands-free operation. The ATM73AC boasts a comfortable, unobtrusive headband design with front-of-mouth pickup. The belt-mounted power module operates on battery or phantom power with a 3' cable permanently attached between the microphone and power module. Included with your ATM73AC are windscreen, AT8530 power module (attached) and a battery.

ATM73AC 60ATM73AC $109.00

AUDIO-TECHNICA TALKBACK MIC

The 16.25 in. gooseneck on this talkback mic lets you set it where you want it, and the subcardioid pickup pattern reduces noise. The response is 200Hz to 5kHz, great for simple voice communication. A low-Z XLR male connector on the base of the gooseneck plugs into your console.

AT808G 60AT808G $105.00
Base w/Switch 60AT8615RS $75.00

The new 7000 Series UHF wireless systems give you instant access to 100 PLL-synthesized channels, so you can enjoy bullet-proof UHF band operation wherever you go. But that's only the top 100 reasons. There's more.

You get true diversity operation for better reception, InvisibleLink® circuitry for optimum sound quality, plus a ground-lift switch, adjustable squelch control, and balanced and unbalanced audio output jacks. All this in your choice of a handheld or body-pack system.

And with the versatile UniPak™ body-pack system, you can select from an array of new Wireless Essentials™ accessories. Wireless Essentials offer lavalier, headworn and specialty microphones, plus a guitar/instrument cable and a Lo-Z mic cable, all pre-terminated for A-T wireless – providing you with the most versatile body-pack system available.

Want more reasons? Call, write or fax today. Because when you put them all together, you get the number one reason to buy the 7000 Series: excellent performance at a great value.
**ELIMINATE “STATIC.”**

*Particularly the kind from the accounting department.*

Sony's new Freedom™ Series wireless microphone systems mean you can say good-bye to virtually all unwanted noise, dropped signals and most of all, needless flak from the bean counters. Because with a fully configured "6-Pack" receiver and your choice of handheld or body pack transmitters, you get six channels of diversity wireless in a compact, single rack space for under $1000 a channel. And the Freedom Series' 94 channels provide a clean, clear signal every time. For simple single channel applications, choose from handheld, Lavaliere, or Guitar Packs complete with a single channel receiver. The Freedom Series products also provide full compatibility with Sony's extensive and widely-acclaimed 800 Series wireless product range. And the most welcome sort of sticker shock is the folks in finance. For more information, call (800) 635-SONY, ext. FREEDOM and check out our website at www.sony.com/"audio"

UNIPOINT AND PRESSURE ZONE MICROPHONES

AUDIO-TECHNICA BOUNDARY UNIPOINTS

For demanding surface-mounting situations, choose between omni and uni patterns of A-T's condenser plate mics. Both are about 2.5" wide, both run on either "AA" cell or 5-52V phantom and come with 25' cable. A good match for the SmartMixer on page 69.

AT841a omni 60AT841A $205.00
AT851a uni 60AT851A $209.00

CROWN PRESSURE ZONE MICROPHONES

Crown PZM mics use the pressure zone at an acoustic boundary, such as a floor or table surface, to eliminate distortion and comb filtering problems.

1. The PCC-160 is for stage floors, lecterns, and TV news desks. The large surface increases sensitivity and prevents phase problems; its supercardioid pattern minimizes background noise. Balanced low impedance output. 15' cable included. Takes 12-48V phantom.

2. The PZM-185 has a balanced low impedance output. This model is suited to broadcast production, conferences, and recording. It's powered by an internal "N" cell or external phantom power. The male XLR connector is in the handle. No cable.

The Sound Grabber (not pictured) is a very affordable, portable PZM powered by an "AA" cell. It looks similar to the PZM-185 but has an unbalanced high-impedance output, 10' cable to 1/8" TS plug, and adapters for 1/4" TS phone and 3/32" TS applications. All models listed are black: the PCC-160 can also be ordered in white.

PCC-160 60CRPC160 MFR LIST $309.00
PZM-185 60CRC185 MFR LIST $199.00
Sound Grabber 60CRSG MFR LIST $99.00

UNIPOINT SERIES

UniPoints are a family of low profile specialty mics with great low frequency response and interchangeable heads for different patterns. They control feedback with exceptional rejection specs.

1. AT859QML
   It plugs into any XLR jack for swift installation or removal. 9-52V phantom power only.
   AT859QML 60AT859 $123.00

2 & 3. AT857
   The 857AMa can mount on a mic stand or its own threaded surface mount adapter. It has an on/off/roll-off switch and can run on "AA" cell or phantom. Its brother, the 857QMa, plugs directly into a female XLR connector and operates only on phantom power. Roll-off switch.
   AT857AMa 60AT857AM $217.00
   AT857QMa 60AT857Q $183.00

4. AT853A
   Hang this one using the plastic coated, stainless steel hanger, or mount it on a stand adapter. It has an on/off/roll-off switch and can operate on "AA" cell or phantom.
   AT853a 60AT853 $183.00
   AT853wa (white) 60AT853WA $207.00

ROLLS PB23 & PB223 PHANTOM POWER ADAPTER

The PB23 and PB223 provide the clean, efficient power that condenser microphones require. Both units offer a dc loop through jack for powering another identical unit. The PB223 has two adapters in one box.

Phantom Power Adapter 61RLPB23 $60.00
Dual phantom Power Adapter 61RLPB223 $75.00
SONY LAVALIERS

Our customers choose Sony condenser lavs above all others. These mics ignore unwanted noise and give you the convenience of battery operation.

The ECM-77B, a mere 1.5 grams, is Sony's tiniest lavalier, an unobtrusive, high performance omni with the best bandwidth of the four. The popular ECM-56B has an omni pattern and is recommended for the widest applications. The ECM-66B has a uni pattern ideal for musical instruments.

The economical ECM-44 is omnidirectional; it includes a foam windscreens, while the other models include a metal mesh. All versions are matte black; all conveniently take “AA” cells; all but the 44B accept 48V phantom. Case and clips included. Also available: unterned versions for wireless systems.

ECM-44B  60504413  $165.00
ECM-55B  6050556  $269.00
ECM-66B  60506613  $299.00
ECM-77B  605077B  $309.00
Also available: Colored windscreens, and holder-clip styles including double mic, pencil or safety-pin type, tiepin and necklace types. Call us for assistance.

CROWN CM-10

The Crown CM-10 is a miniature omnidirectional condenser lapel microphone perfect for professional broadcast and sound reinforcement use. Comes with 12-48V phantom power and has an 8’ attached cable with 3-pin XLR output connector. Order the CM-10/E without the connector, for connection to a wireless mic transmitter. Color: black.

CM-10  60CM10  MFR LIST  $149.00
CM-10/E  60CM10E  MFR LIST  $98.00

SHURE SM11

Pick this mic when you want a lavalier that doesn't require powering. Get small with the SM11, a tiny dynamic lav with optimized response, natural sound quality and Shure toughness. You also get a lavalier cord, tie bar, and tie tack.

SM11  60SH11  MFR LIST  $116.50

CALL 1-800-732-7665 FOR BRADLEY PRICE

SHURE MX SERIES LAVALIER MICROPHONES

The MX184 supercardioid condenser lav solves problems of extraneous sound and gain-before-feedback, so pick it for talk shows and other noisy environments. The cardioid MX185 provides an intermediate pattern for directional use. For less complex applications, the omni MX183 is an excellent choice. Both have a frequency response dip at 730Hz that minimizes the “chest resonance” effect; both include tie clip, cable, and beltpack preamp that takes phantom power only.

MX185 cardioid  60SHMX185  MFR LIST  $280.00
MX184 supercardioid  60SHMX184  MFR LIST  $290.00
MX183 omnidirectional  60SHMX183  MFR LIST  $260.00

- LM-1 Oyster 61LULM1 $52.00
- LM-1 Black 61LULM1B $52.00

Also available: Luxo LM-2 is similar to LM-1 but has a 26" reach.

- LM-2 Oyster 61LULM2 $52.00
- LM-2 Black 61LULM2B $52.00

**C. PRO RISER**

Get a rise from your mic with this 12" metal pedestal, a convenient mount and longer reach for your Luxo arm.

- Oyster 61LURISER $21.00
- Black 61LURISERB $21.00

**D. LUXO MOUNTING BRACKETS**

These handy brackets make it easy to mount any of the arms on this page to virtually any surface.

- C-clamp Oyster 61LUABR $10.50
- C-clamp Black 61LUABRB $10.50
- Table mount Oyster 61LUCBR $10.50
- Table mount Black 61LUCBRB $10.50
- Wall mount Oyster 61LUBBR $10.50
- Wall mount Black 61LUBBRB $10.50

**ROWI CLAMP**

If you have a field mic, you need a Rowi Clamp. Attach your microphone to almost any surface. The jaw opens to 1-1/2", and the mic adapter swivels.

- Rowi Clamp 60BBRC $36.95

**ATLAS MIC ADAPTERS**

Useful chrome adapters. If you don't see what you need, give us a call.

- 3/4" long, 5/8"-27M thread (shown) 61ATAD4B $4.60
- 3/8" pipe F to 5/8"-27F 61ATAD3B $4.40
- Coupling; 5/8"-27F to 5/8"-27F 61ATAD5B $4.60
- Coupling; 7/8"-27F to 7/8"-27F 61ATAD6B $6.45
- 3" long tube; 5/8"-27M thread each end 61ATAD7B $4.60
- 6" long tube; 5/8"-27M thread each end 61ATAD8B $4.60

**O. C. WHITE MIC ARMS**

Bradley can accommodate any mic with the right O.C. White arm. Beige, with models in black available by special order.

- Single mic arm only 600CSMA MFR LIST $98.00
- Single mic arm with riser 600CSMARB MFR LIST $135.00
- Two joint single mic arm 600CTISMA MFR LIST $188.25
- Triple mic arm with riser 600CTMA MFR LIST $441.00

**MIC SPLITTERS AND COMBINERS**

Use Pro Co's MS-2 to split the signal from a low-Z mic to two mixers. Direct output, plus isolated output with ground lift. The MC-2 combines signals from two low-Z balanced mics to one input. One connector has polarity reverse switch. Both units use XLR connectors. (See our Audio Interface section for more accessories!)

- MS-2 Splitter 60PCMSC1 $89.00
- MC-2 Combiner 60PCMC2 $89.00

**CALL 1-800-732-7665 FOR BRADLEY PRICE**
**PRESONUS M80**

Introducing the M80 Eight Channel Microphone Preamp featuring the Jensen® low noise balanced input transformer. Each channel is designed with discrete Class A input amplifiers followed by a twin servo gain stage for ultra low noise and wide gain control. Features include Phase Reverse, Phantom Power, 20 dB Pad, Rumble Filter, +28dBu headroom and full output metering per channel. The M80 is designed with a low impedance stereo mix bus for assigning and panning any channel to the main stereo output connectors. It has a high gain headphone output for monitoring the main bus.

A special feature of the M80 is the Idss control on each channel. The Idss control adjusts the drain current on the input FET amplifier thus altering the even harmonic levels of the signal. A wide range of control is offered from 0% to 100%. This feature may be used to adjust the harmonics of the signal from absolutely pure (no harmonics) to simulacism of the effects of tape saturation and tube "warmth".

Fully loaded with XLR balanced input/output connectors and TRS line inputs via Neutrik combo connectors, each channel is equipped with separate send and returns jacks for inserting dynamics processors. Mix output connectors are XLR for balanced signals and TRS for line level signals such as digital audio card inputs.

Housed in a double rack space, steel chassis; with a high quality blue anodized front panel, the M80 utilizes an internal power transformer with external access for international power requirements eliminating the need for a Wall Wart.

**M80**

**SAMSON UMI1 UHF MICRO SYSTEM**

The UMI system operates on the clear 800 MHz UHF frequency band. This, in conjunction with the UMI receiver's advanced diversity circuitry, provides fail-safe reception in all kinds of RF conditions. Providing superior audio, its extremely compact size allows it to fit seamlessly onto video cameras. The receiver also features a comprehensive metering layout and control scheme along with balanced and unbalanced outputs, and special antennas to further maximize reception. Along with 9V battery operation, the system also includes a special carry case and a host of other accessories.

**ATI MIC PREAMPS**

The Ultimike is a small preamp that can mount near the audio source and has an unusually quiet, active balanced instrument type input stage. Switchable limiter and low-cut filter are built in. Gain is adjustable, and a front jack gives 15dB of gain trim from a remote location with a 10K pot. Features include a phase reversing switch, 48V phantom, and XLR connectors.

The M1000 is a dual preamp for one stereo or two mono mics and a transformer output. Drive a pair of 600-ohm outputs from 50 to 250 ohm impedance mics. It uses XLR connectors. Call us for pricing on rack kits and versions of the M1000 with balanced differential outputs, and 48V phantom power.

AUDIO-TECHNICA 7000 SERIES
FREQUENCY AGILE UHF SYSTEMS

You want a frequency agile wireless system for how much? Well, have we got a deal for you and all for under $650! The 7000 Series offers you one hundred PLL-synthesized channels selectable operating at 700 MHz or 900 MHz. True Diversity operation selects the better signal from two independent receiver sections thus reducing dropouts. Two receivers can be mounted side-by-side in a single 19” rack space. The WTW-T76 handheld microphone/transmitter features a Hi-ENERGY dynamic element with superior shock mounting.

ATW-7375 UniPak™ Body-pack System Components:
• ATW-7375 ATW-R73 receiver and ATW-T75 UniPak™ transmitter
• Select a Wireless Essentials™ microphone or cable to complete the system
ATW-7375 System 60ATATW7375 $629.00

ATW-7376 Handheld Microphone System Components:
• ATW-7376 ATW-R73 receiver and ATW-T76 handheld unidirectional dynamic microphone/transmitter.
ATW-7376 System 60ATATW7376 $619.00

AUDIO-TECHNICA 1900 SERIES UHF SYSTEMS

The 1900 Series UHF wireless system from Audio-Technica offers True Diversity operation, which automatically selects the better signal. Choose from one of 20 UHF frequencies for minimum interference. The rugged metal receiver case mounts in a standard 19” equipment rack. Transmitters feature dual-power battery save switches. Please specify frequency.

UniPak™ Body-pack System Includes:
• ATW-1951 ATW-R19 receiver and ATW-T51 UniPak™ transmitter.
• Select a Wireless Essentials™ microphone or cable to complete the system.
UniPak™ Body-pack System 60ATATW1951 $399.00

Handheld Microphone System Includes:
• ATW-1952 ATW-R19 receiver and ATW-T52 handheld unidirectional dynamic microphone/transmitter.
Handheld System 60ATATW1952 $449.00

AUDIO-TECHNICA 900 SERIES UHF SYSTEMS

The 900 Series brings the stellar performance and great reliability of UHF wireless to an entirely new price level. For the price of many VHF systems, you can go UHF. The great part is, Audio-Technica hasn’t sacrificed quality or ease of use to bring you affordable UHF—the 900 Series is packed full of features, and with its multiple frequencies and various configurations, is also incredibly versatile.

UniPak™ Body-pack System Includes:
• AT-900 Series receiver and ATW-951 UniPak™ transmitter.
• Select a Wireless Essentials™ microphone or cable to complete the system.
UniPak™ Body-pack System 60ATATW951 $319.00

Handheld Microphone System Includes:
• AT-900 Series receiver and ATW-952 handheld unidirectional dynamic microphone/transmitter.
Handheld System 60ATATW952 $349.00

WIRELESS MICROPHONES

SHURE UHF WIRELESS MICROPHONE SYSTEM

SYSTEM COMPONENTS:

Body-Pack Transmitter
choose a Shure lavalier microphone, headset, or instrument cable 60SHU1

Instrument Cable 60SHWA302

4’ Mic Cable 60SHWA310

Hand-Held Microphone-Transmitter
with interchangeable microphone heads 60SHU2

Dual Channel MARCAD Diversity Receiver
with switching power supply 60SHU4D

Active Remote Antenna Kit 60SHUA830A

Antenna Distribution System 60SHUA840A

The Shure UHF frequency agile wireless system features their exclusive MARCAD® Diversity circuitry, which provides the combined benefits of two independent RF sections for remarkable sensitivity, improved reception and exceptional freedom from dropout.

The Shure UHF Wireless microphone system is a frequency-agile diversity system operating in the UHF band between 762 to 806 MHz in the U.S.A. Up to 20 UHF Wireless systems can be operated simultaneously in a single installation. Shure takes frequency-agility to new levels. While many systems offer you multiple channel options, Shure gives you an outstanding 191 fully selectable, user programmable frequencies from which to choose. Shure UHF systems function on a much less crowded operating band, with far less chance of interference from other sources. So wherever you set up the system, Shure's frequency-agility virtually guarantees that you will be able to find an available frequency. The Shure UHF Wireless components provide a complete and interchangeable system. Receivers and transmitters are not specifically matched, allowing any Shure UHF transmitter to work with any Shure UHF receiver.

CALL 1-800-732-7665 FOR BRADLEY PRICES

SHURE UA888 COMPUTER INTERFACE

The UA888 is a computer interface accessory that allows Shure UHF wireless microphone users to monitor and control the functions of up to 32 receivers from a remote site using an IBM compatible PC computer. The UA888 system is ideal for installed sound applications, such as theater, houses of worship, and for touring sound and audio/video rental. The UA888 includes rack-mountable interface module, Microsoft Windows-based software and connecting cable for use with the Shure UHF Wireless U4S or U4D receivers.

CALL YOUR FAVORITE BRADLEY PROFESSIONAL FOR A LISTING OF MICROPHONES AVAILABLE FOR THE PT300 BODYPACK THAT FIT YOUR SPECIFIC APPLICATION.

AUDIO-TECHNICA UHF ANTENNA DISTRIBUTION

The ATW-D70 and ATW-D90 UHF antenna distribution systems work with virtually any UHF wireless system. Each system provides two “1-in, 4-out” RF channels and connects a pair of antennas to as many as four diversity receivers. Included with your ATW-D70 or ATW-D90 are four DC interconnect cables to power up to four receivers; eight RF output cables and two rack mount adapters. The ATW-D70 and ATW-D90 rack mount in a single 19 inch rack space. Choose ATW-D70 for systems operating at 728-750 MHz and ATW-D90 for systems operating at 940-955 MHz.

Antenna Distribution System 60ATATWD70 MFR LIST $650.00

WIRELESS MICROPHONES

SONY UHF SYNTHESIZED SYSTEMS

Broadcast, sound reinforcement, Broadway... when you're handling critical wireless audio, ponder Sony UHF.

Synthesized control makes it easy to access up to 94 channels for virtually interference-free wireless operation. The space diversity system offers stable reception at extended operating distances. Presets are programmed into each tuner for instant configuration of systems using up to 11 channels simultaneously.

Sony wireless keeps getting better. The new WRT-860A68 is a bodypack transmitter that's 1/3 smaller than the popular WRT-820A and adds detachable antenna, higher power, and battery life indicator. The new WRT-867A68 is a hand-held dynamic mic that runs on a single "AA" cell and produces great vocal audio even though it's smaller than other Sony handheds.

Tuners are one rack space tall and include rack ears. Antennas are purchased separately.

Call Bradley for the details and package pricing on these outstanding systems.

SONY FREEDOM UHF MIC SYSTEM

The latest additions to the Sony UHF wireless family bring Sony quality and features at a real-world price. There are two receiver types: the WRR800A, a single-channel, half-rack diversity tuner, and the WRR801A, a 6-bay diversity tuner for multi-channel use at one location. Each includes one WRU-801A receiver module.

The WRT800A handheld mic-transmitter features a cardoid electret condenser capsule, operates for up to twelve hours on a single AA battery, and includes a detachable mic holder for stand use. The WRT805A body-pack transmitter is designed for lavalier, headset mic, and/or guitar use. You may select guitar cable, any of three lavalier mics, or a headset style mic to use with the WRT805A. The Freedom series shares components with other Sony wireless systems, including the WD820A antenna divider, and AN820A UHF antennas. You can mix and match transmitters and receivers with previous Sony 800 series wireless systems in any combination.

BEYERDYNAMIC U 400 UHF AND U 500 UHF WIRELESS

The U 400 and U 500 UHF systems from Beyerdynamic offer frequency agility. Up to 16 frequencies can be accessed within UHF channel 69. Both systems are designed as stand-alone units or for large theatre setups with the addition of antenna distribution amplifiers.

The U 400 and U 500 have a multi function LCD display, which shows the chosen frequency along with RF and VU level and antennae information. All of the systems are available in handheld or pocket transmitter format. The receivers are a compact half, 19-inch rack.

CALL YOUR FAVORITE BRADLEY PROFESSIONAL TO CONFIGURE THE U 400 OR U 500 SYSTEM THAT'S RIGHT FOR YOU.

Don't see the system you're looking for? Your Bradley Professional knows wireless! Call Today: 1-800-732-7665
TELEX USR100 UHF WIRELESS SYSTEM

The USR-100 frequency agile UHF wireless system from Telex features a unique pair of UP-UP channel slew buttons that allow rapid selection. The 100 available channels, operating from 668.0 to 746.0 MHz, cover a full 12 MHz, virtually assuring multi unit performance in even the harshest of RF environments. The large readout display is active at all times, thereby allowing instant channel verification at a glance.

The heart of the USR-100 receiver is an on-board Programmable Integrated Circuit (PIC) Microprocessor. This PIC performs unprecedented functions in a wireless microphone receiver, and allows the marriage of digital precision with real analog sound to provide the best that both technologies have to offer. The PIC processor controls all metering functions on the USR-100. These include audio level, RF signal strength, diversity phase relationship, channel selection, channel spacing, and display indicators.

The tuning range of each individual USR-100 is established upon initial power up. Each of the available 100 channels then undergoes a tuning process, and this information is permanently stored in non-volatile memory, available for immediate recall. A rack kit is included with the USR-100.

Components:

- The LT-100 transmitter is a compact, rugged beltpack designed to meet the needs of most any wireless user. It features 100 tunable channels, selectable hi/low power output, and adjustable mic gain. Tone coded squelch allows for single toggle switch operation. Two AA alkaline batteries provide up to 12 hours continuous use. Four-segment indicator displays battery level at the push of a button.

- The SH-100 transmitter is a full featured, elegantly styled handheld microphone transmitter, and has the same features as the LT-100.

USR-100H/L Combo Pack 60TX7123300X MFR LIST $1,545.00

OTHER SYSTEM CONFIGURATIONS ARE AVAILABLE. CALL YOUR FAVORITE BRADLEY PROFESSIONAL FOR THE SYSTEM THAT MEETS YOUR SPECIFIC NEEDS.

AZDEN WIRED-TO-VHF WIRELESS CONVERTER

Turn your favorite dynamic wired mic into wireless with the Azden 31XT. This sleek transmitter plugs into the XLR connector of your mic. The unit is powered by a single "AA" cell for ten hours of operation. Adjustable audio level handles a variety of mics. Azden matches it up with four great receivers so you can choose the configuration you want. It's available on 17 different VHF frequencies.

Bradley carries the whole Azden family of wireless products, including headset, handheld, and bodypack systems. Call us for an info packet.

Each system shown includes a 31XT transmitter and the appropriate receiver. Optional rack kits are available.

DPA MINIATURE MICROPHONES

Okay, does the world really need another miniature microphone? Yes, if it is from Danish Pro Audio (DPA). The 4060, 4061 and 4062 omnidirectional Miniature Microphones from DPA Microphones use a newly designed pre-polarized condenser cartridge element with a vertical diaphragm. The microphone element is specifically designed to cope with humidity, sweat, wind and popping making the Miniature Microphone perfect for close mic applications.

The Miniature Microphone comes terminated with Sennheiser MicroDot. Adapters are available for virtually any UHF or VHF wireless systems allowing the user of multiple systems to use the DPA Miniature Microphone. Available in white, beige and black.

CALL YOUR FAVORITE BRADLEY PROFESSIONAL TO CHOOSE THE MODEL PERFECT FOR YOUR APPLICATION.
**SHURE LX SERIES VHF SYSTEMS**

Built on the popular L Series, the LX VHF wireless features 6dB quieter performance, detachable antennas, front-panel squelch, and rack hardware that can handle single or dual receiver setups. But it's still easy on your budget.

All bodypacks and transmitters have Shure's innovative battery "fuel gauge". Other features include micline level switch, 18-20 hour battery life, level meters for RF and audio, and in-line power supply instead of a "wall wart". The heart of LX is the LX4 MARCAD diversity receiver, really two radio receivers with exceptional audio and rejection of noise.

Handheld systems are available with a range of interchangeable Shure mic elements including premium BETA mics. Bodypack systems are available in several flavors of lavalier and instrument mics... even a headworn version for DJs and aerobics instructors.

The rack hardware can mount one or two receivers, with antennas in the rear. For front antennas, order the WA503 option, below. Also ask us about antenna splitters, antenna distribution for multiple systems, 1/2 wave antennas, and non-diversity systems.

**CALL 1-800-732-7665 FOR BRADLEY PRICE**

TASCAM DA-20MKII DAT RECORDER

Considering the jump to digital and worried about the cost? Looking for an affordable DAT option for a secondary studio? Tascam's new DA-20MKII may be your answer.

Record and play at all three major sampling frequencies (48, 44.1, and 32), including recording either analog or digital at 32kHz. It connects to the world with unbalanced RCA analog inputs and outputs as well as S/PDIF digital I/O. SCMS copy protection can be switched off. The specs, as usual with Tascam, are impeccable. The DA-20MKII occupies three rack spaces and includes a wireless remote.

DA-20MKII 60TEDA20 MFR LIST $899.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

TASCAM DA-30MKII DAT RECORDER

The Tascam DA-30MKII features a data/shuttle wheel, standard and long record modes, selectable copy ID provisions, and more. The shuttle wheel lets you find cuts fast, enter program numbers, and trim the ABS time display when setting Start or Skip ID positions.

Features include a parallel port for external control, digital I/O in both the AES/EBU (on XLR) and S/PDIF (coaxial) formats, start ID positioning, and +4dBm and -10dBV analog inputs and outputs. Recording is offered at 48kHz, 44.1kHz and 32kHz sampling frequencies. Ideal for audio track mastering.

PANASONIC DAT RECORDER

All three of the Panasonic DAT family models described here provide analog inputs and outputs on balanced XLR, plus digital I/O in both the AES/EBU and S/PDIF formats. All come with rack kits and Panasonic's exceptional audio performance.

The SV-3800 inherits the features of its predecessor, the widely-hailed SV-3700, and improves on them with new 20-bit resolution DACs for the best possible playback. A single-play function plays one cut to the next start ID, then stops (ideal for broadcast and live sound). A front-panel switch lets you choose +4 or -10 operation; attenuation is adjustable. A front-panel display keeps track of drum hours. Multiple digital I/O facilities are provided for connecting to many kinds of gear: And the familiar shuttle wheel is here, plus a shuttle search function that finds your cut and cues up to it. Choose the SV-3800 with confidence.

The SV-3900: This model is configured for sophisticated remote control uses. Control up to 32 machines on an ES-bus LAN. The unit also accepts P2 protocols for single machine/controller combinations.

The SV-4100 (not pictured): Shines in specialized applications. Features include external sync for video post and stereo submix recording, Quick Start memory adjustable with one-frame resolution, synchronized frame-accurate editing, four locate points, and more.

DAT AND HARD DISK RECORDERS

DA-60 MKII 4 HEAD TIME CODE DAT RECORDER

You won't find a better 4-head synchronizable DAT value than TASCAM's DA-60 MKII. With complete Sony P2 support, the DA-60 MKII behaves like a VTR and can be integrated with edit controllers and hard disk systems making it the perfect DAT for post-production environments. More importantly, its onboard synchronizer and improved servo system means virtually instant lock-up times. In addition, with advanced A/D and D/A converters, the DA-60 MKII delivers extremely high dynamic range and very high signal-to-noise ratios.

- 4-head design with confidence monitoring
- Memory start and rehearsal
- Differential power supplies for A/D and D/A converters
- Pre or post stripe time code

Tascam DA60MKII DAT Recorder

CALL 1-800-732-7665 FOR BRADLEY PRICE

SONY PCM-R500 DAT RECORDER

With Sony's surprisingly affordable PCM-R500, you can switch in Super Bit Mapping. Signals with an apparent resolution of greater than 16 bits (the product of today's high-bit A/Ds) can be recorded on a standard tape. This single-ended noise shaping system can transfer a 20-bit signal to a 16-bit medium without just "chopping off" four bits. The result: your recordings are smoother and clearer, especially at low levels, no matter what machine you play them on. A shuttle/jog wheel is provided for easy system operation of fast forward/rewind and AMS/program number selection.

The PCM-R500 has a robust four motor transport, analog I/O on balanced XLR connectors (adjustable from -12 to +4), digital I/O on both AES/EBU and S/PDIF, and no SCMS to worry about. A digital meter keeps track of head time. A rack kit and wireless remote are supplied; the unit also provides an 8-pin parallel connector for fader start and other control.

360 SYSTEMS INSTANT REPLAY HARD DISK SYSTEM

Listen up, radio stations, stadium scoreboard operators, theater sound technicians, TV audio engineers... this is what you've been asking for: powerful audio storage with instant access. Instant Replay is a digital recorder with the hard disk built in, and is available in 16 and 24 hour versions.

It stores up to 1,000 cuts, long or short, and lets you assign 500 at a time to 10 "banks" of 50 buttons. Jingles, effects, songs, commercials, any audio is at your fingertips.

To play a cut, just push its button. Audio starts instantly. Or create a playlist from the 50 hot keys, and set the list to play through or to cue up after each cut.

The display shows cut name, duration, bank number, and hot key number. The imbedded keyboard lets you name your cuts. Finding cuts is easy with the FIND command. A printer port lets you create copies of your cut or bank lists.

Features include 16 bit stereo audio, +4dBm analog I/O, and AES/EBU and S/PDIF digital I/O. A new GPI port allows remote start. Use the built-in D-NET to transfer audio at high speed to other Instant Replays or DigiCart/TIs. Also includes SCSI ports.

360 SYSTEMS SHORTCUT PERSONAL AUDIO EDITOR

Designed to replace reel-to-reel tape machines for fast editing of single or dual channel audio, the Shortcut offers digital and analog 110, 16 bit linear uncompressed audio, one-touch instant recording, and non-linear editing with random access.

Designed for easy, intuitive operation, the Shortcut includes built-in speakers and selectable mic/line inputs. A large scrub wheel provides outstanding simulation of tape reel rocking, and is surrounded by large buttons which perform the major functions: CUT, COPY, INSERT and ERASE. The front panel also features familiar tape transport controls, a qwerty keyboard for cut location and titling, and HOT KEYS for instant access to predetermined audio segments.

Shortcut is ideal for acquiring and quickly editing voice cuts. It is indispensable for news and call-in shows where speed and accuracy is essential. Operates on 90-250 volts, 50/60hz. for worldwide operation. No battery option is available.

MINIDISC RECORDERS/PLAYERS

DENON MINIDISC FAMILY

Like DAT before it, MiniDisc is now far more popular among professional users than with the general consumer. The pros love the easy digital recording and fast playback access.

CART STYLE

The DN-990R recorder/player has a look that any broadcaster will find inviting. Rotary selector knob for titles and functions. Instant start. End monitor: hear the end of any cut at the touch of a button. Digital and balanced-analog I/O on XLR connectors. Serial and parallel control ports.

DUPLICATING

Use the new DN-045R to create complete copies of your MiniDiscs. The digital dubbing circuit bypasses the ATRAC compression for the best possible dub. Dubbing occurs at up to 3.5 times normal speed. Windows software, provided, allows editing during replication.

If you haven't already taken these out for a test drive, here's your chance.

**Short/cut™ Editor**

The perfect replacement for generations of reel-to-reel tape recorders. Short/cut delivers hard-disk storage, plus fast cut and paste waveform editing. Add an optional Zip™ drive and get low-cost copies. This editor is fast enough for on-air use, and tough enough for the road. So take Short/cut out for a test drive and watch it perform.

**DigiCart/II Plus**

The new DigiCart/II Plus puts up to 50 hours of audio on hard disk, and now includes the popular Zip™ drive for low-cost storage. As always, it's your choice of linear or Dolby® AC-2 recording, plus precise editing and powerful playlistsing capabilities. The new “Plus” model delivers all the reliability that has made DigiCart a broadcast standard, and it's now available at a great new price. Ask for a test drive, and put it through the paces at your station.

**Instant Replay 2.0**

NEW • SCSI port supports external disk drives for expanded storage capacity. • Choose linear or Dolby® AC-2 recording format.

Instant Replay puts a thousand audio clips right at your fingertips. Sound effects, music, station ID's - up to 24 hours of your greatest material. And with 50 Hot-Keys, you can make your shows as spontaneous as you'd like. With everything titled, timed and ready to play, you'll find Instant Replay fast, fun and easy to use. So take us up on our offer to go for a test drive. It's on us.

Attention call letter stations.* You're only a phone call away from a free 10-day Test Drive. So try it out. We'll understand if you don't give it back.

SONY MDS-B5 MINI-DISC RECORDER

The latest generation Sony MD recorder incorporates Direct Duplication Link, which enables high speed copying of the compressed signal on a MiniDisc, avoiding generation loss. This feature is also useful for eliminating fragmentation on heavily edited discs. Multi-access hot start of up to 10 tracks is provided via the supplied remote control, or via IBM® keyboard or parallel remote port. RAM-TOC edit lets you decide whether or not to save your edited recording to a master disc. You can also perform temporary editing of a pre-mastered disc. Monaural recording option allows up to 148 minutes on a disc. A ±12.5% vari-speed control is incorporated, along with next-track selection for playback while listening to the current selection. You may assemble seamless loops, move cuts, or divide and recombine audio with ease. Connectors: S/PDIF digital I/O, and analog +4dBm inputs on XLR.

360 SYSTEMS DIGICART/II PLUS HARD DISK SYSTEM

"Like Fort Knox, with an ATM." If storing and retrieving audio is in your job description, consider DigiCart/IP. It’s a treasury of accessible audio; a cart machine, a mini-workstation, a hard disk recorder in one package.

DigiCart/IP offers access to 10,000 cuts with just a few keystrokes. Make a selection, hit play, and audio is rolling immediately. While one cut plays, cue up the next.

Back-to-back cuts are seamless, so one machine can replace multiple audio sources. Playback choices include programmed playlists, which can be simple strings of cuts or sophisticated groupings of linear or rotating stacks.

DigiCart/IP stores up to 48 hours of stereo audio internally, and now features industry-standard Zip drives for removable media. An upgrade path is available for those who wish to convert their Bernoulli drives to Zip drives.

DigiCart/IP provides AES/EBU, AES/SMpte 75 ohm, and S/PDIF digital I/O ports, as well as balanced analog I/O. It creates 16-bit recordings, either in linear mode or with Dolby AC-2 data reduction for extended recording time. Digital editing of heads, tails, fades, and gain is non-destructive and subframe accurate.

D-NET, standard with Digicart II Plus, lets you transfer audio at high speed to other DigiCart/ITs or Instant Replays. Comprehensive GPI and serial control interfaces let many broadcast automation systems "talk" to DigiCart/II. Also available: Added storage of up to 80 hours with the companion Hard Disk System.

2730 DigiCart/IIPlus With 24 hour 3-GB hard disk  | 60TH2730 | MFR LIST | $3,995.00 |

HHB CDR800 CD RECORDER

Why bother transferring your demos or masters to tape when you can press them to CDs for not much more money? (Actually, blank CDs are even cheaper than cassettes these days.) The versatile CDR800 allows you record to CD painlessly, by offering 5 different recording modes, automatically converting input signals to the appropriate 44.1kHz frequency for CDs, and recording in either pro (for studio use) or consumer (write-protected) CD formats. Your music—whether you’re sending it to an A&R guy, selling it at a gig, or backing up your ADAT masters—sounds a whole lot better on CD.

MARANTZ CDR-620 AND CDR-615 COMPACT DISC RECORDERS

Create your own CDs for promotion, demos, and archiving. Studios, broadcasters, production houses, and museums will use it to prepare original recordings, make reference and demo discs from other media, store jingles and sound bites, and restore older recordings.

The CDR-620 is a write-once recorder with one-bit digital converters, sample rate converting, auto track incrementing and indexing from CD, DAT, DCC, and MD. The SCSI-II interface allows integration into a digital audio workstation or PC. The recorder allows you to stop your work and resume it later. Digital I/O includes AES/EBU and S/PDIF formats, balanced +4/-10 analog XLR in and +4 out. The wired remote gives full status and control, copy prohibit on/off, and emphasis on/off.

The CDR-615 is a more economical version of the CDR620. It does not have SCSI-II port capability, 2x speed recording, or AES/EBU inputs/outputs. The RC-620 remote comes standard with the CDR-615 and allows index recording and playing, defeatable copy prohibit, defeatable emphasis, and other features not addressable from the main unit.

CDR-620 60MRCDR620 MFR LIST $3,600.00
CDR-615 60MRCDR615 MFR LIST $2,300.00

MARANTZ CDR630 CD RECORDER

The Marantz CDR630 is the latest addition to their Professional CD Recorder line. It is the first Marantz model to record in the new CD-RW rewritable format, which allows the last track or the whole disc to be erased and re-recorded. Note that CD-RW discs can only be played back on a rewritable drive or a Multi-read capable drive. A wide array of inputs and outputs allow direct digital recording from CD, DAT, MD and PCs. A built-in sample rate converter allows any frequency between 32-48kHz to be input and converted to the CD standard. Analog sources may be input via unbalanced RCA or balanced XLR connection. A subcode converter is built-in to allow the CDR630 to automatically set the track numbers from these sources. The CDR630 can also automatically start recording, producing a copy of one track, or a whole tape or disc.

IR remote, Stereo RCA audio cables, and one Coaxial Digital cable are included with the unit.

Marantz CDR630 CD Recorder 60MRCDR630 MFR LIST $1,200.00

ALESIS ADAT XT20 DIGITAL MULTITRACK RECORDER

- ADAT Type II format—records 16- or 20-bit digital audio (tapes are backwards-compatible with previous ADATs when saved in 16-bit format)
- Better than CD audio quality (102dB dynamic range, 48kHz sample rate)
- On-board digital editing and 10-point autolocating
- New, faster transport with intelligent software control
- Solid aluminum die-cast chassis
- Up to 16 XT2Os can be linked for up to 128 tracks of recording
- Records on standard S-VHS videocassettes

What's better than an ADAT-XT? A new, higher-resolution ADAT XT20! With its amazing 48kHz sampling rate and 20-bit digital audio quality, the ADAT XT20 surpasses even the most stringent audio standards, for truly professional digital recording and editing. Of course, it still uses inexpensive S-VHS tapes and works pretty much exactly like all previous ADATs. All ADAT tapes can be played and recorded on, using the ADAT XT20, and it will format tapes in 16-bit (as well as its standard, ADAT XT20-only 20-bit), so they are compatible with 16-bit ADATs as well. While the Alesis engineers were perfecting these new audio standards, they also had the opportunity to improve and speed up the transport mechanism, refine and expand the software control, and add other smart features. The results? The finest ADAT to date—and that's saying a lot.

ALESIS ADAT LX20 DIGITAL MULTITRACK RECORDER

- Recording Format: ADAT Type I (16-bit), ADAT Type II (20-bit) rotary head digital recording
- Eight Audio Channels
- Five specialized locate points
- Digital Conversion: Record (A/D): 20 bit linear codec converter, 64 times oversampling, single converter per channel; Playback (D/A): 20 bit linear codec, 128 times oversampling, single converter per channel
- Frequency Response: 44.1/48kHz, Selectable
- Analog Inputs/Outputs: Sixteen phono (RCA) jacks (8 input, 8 output), unbalanced, -10dBv
- Digital Inputs/Outputs: 8-channel ADAT Optical jacks (1 in, 1 out)
- Synchronization: ADAT Sync Input and Output

For musicians, home studio owners, or users of other ADAT models wishing to supplement an existing system, the ADAT LX20 provides an economical solution for capturing the power of the award-winning ADAT recording format. Even though the LX20 is the most affordable ADAT ever made, it offers the same 20-bit ADAT Type II digital recording format as the XT20 recorder, making it capable of producing professional-quality recordings. The LX20 is compatible with all ADAT-model recorders as well as peripheral devices like the BRC and third-party products like digital consoles, interfaces and more. Using the same Optical Digital Interface and Synchronization Interface as other ADATs, the LX20 may be the ideal recorder to add more tracks to an existing system. If you've waited on the sidelines of the digital recording revolution, the LX20 is the answer for affordable, 20-bit ADAT-quality recording.

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web: http://www.bradleybroadcast.com
ALESIS M20 PROFESSIONAL 20-BIT DIGITAL AUDIO RECORDER

New from Alesis, the M20 Professional 20-Bit Digital Audio Recorder is a professional-quality modular digital multitrack tape recorder that was specifically created for commercial audio recording facilities, as well as high-end video and film post-production studios. Its sophisticated full-servo direct-drive transport, and true 20-bit capability brings modular digital multitrack recording up to a world-class level, with finely detailed audio that unquestionably surpasses even the best analog mastering recorders. The M20 was engineered for demanding, around-the-clock applications, which require the highest standard of audio quality as well as low maintenance, quick response and built-in SMPTE/EBU time code synchronization. Using the same S-VHS tape and sample-accurate multi-unit synchronization that made the Alesis ADAT the most popular digital multitrack ever made, the M20 will revolutionize professional recording and post-production studios in the same way the original ADAT revolutionized the project studio world.

The Alesis M20 features the new ADAT Type II format, which records eight tracks of true linear 20-bit digital audio onto one tape. 20-bit recording offers greater sonic detail than 16-bit recording since each additional bit doubles the number of values that may be recorded, resulting in an increased dynamic range of up to 6dB. To capture this incredible fidelity, the M20 employs built-in, high-resolution, oversampling A/D and D/A converters. Unlike some hard disk recorders, the M20 uses a linear recording format, meaning that no data compression of any kind is applied to the signal going to or from tape. Plus, a 60-minute tape recorded in the ADAT Type II format holds over 3 gigabytes of audio data, with no upload or download time required...just pop in a new set of tapes and start recording.

RMD DIGITAL REMOTE METER DISPLAY FOR THE M20

The RMD is a digital remote meter display for the M20. Offering 32 meters with the capability of monitoring four M20’s simultaneously, the RMD is the ticket to keeping an M20’s audio levels under surveillance. The RMD’s adjustable Peak Mode and Peak Clear mode may be set from the front panel of the M20 or the CADI, and a special fine metering mode allows you to set levels with 0.2dB accuracy. The RMD also provides eight LEDs on the front panel that warn of any error conditions or tape dropout problems. Mounts in any standard equipment rack.

HENRY DIGITAL RECORDER

Capture network feeds for delayed playback; put one at your translator site for station ID’s. Record weather alerts or request-line calls; program “talking signs.” DigiCord can hold 16 messages for play in any order without re-cue time (eight are accessible from a front panel switch; all 16 from the remote connector). Features include single or repeat modes and EOM output to start next event. Other features include battery backup to prevent memory loss, and the ability to record from mic or line.

CREAMWARE CLAN—CUTMASTER LINEAR AREA NETWORK

CLAN is an advanced Client-Server audio system that serves as the backbone of your in-house audio distribution. Consisting of several integrated components, CLAN is a full-system approach to your networked audio requirements. The Server can be configured at graduated levels, so that a CLAN installation can be implemented over time, based on available budget. When you decide to expand, your existing Server license will be fully credited towards the new Server implementation. This modular approach makes possible the development of a large, sophisticated network in small, definable steps. The system can evolve through several phases of development according to your budget. The workstation components of the CLAN can be installed on advanced PCs running Win95. The Server software is available for Windows NT and Novell Netware.

CLAN is an open system. Read and write various linear and reduced audio formats in real time. Existing compressed audio material from other systems can be converted and transferred into the CLAN system at no additional cost.

COMPONENTS:

• CUTbase is a MS-based Database. CUTbase manages incoming and outgoing audio data as well as all other information necessary to integrate the various CLAN components. From inclusive system-wide inquiries, previewing of all recorded or acquired audio, playlist logging and databasing of licensed material, to integrated tools for optimization, CUTbase, featuring heuristic query mechanisms and external archiving, has all the functions required for a networked installation.

• With CUTmaster you can quickly edit voice and music material with bit accuracy, use crossfades and parametric filters to clean up the existing audio, plus, read and write various linear and reduced audio formats. CUTmaster supports you with integrated pull down-menus; you won’t be spending more time learning technique than getting work done. The answer you need is always only one mouse click away.

• For more extensive productions, such as jingles or radio production, use the exciting professional Realtime Tools of the CUTmaster Pro. The superior audio processing of the CUTmaster Pro’s Expander, Compressor, Limiter, Noise-Gate, De-Esser, Delay Processor and Room Simulator make complete production on desktop a reality. CUTmaster Pro also features measurement and analysis modules - a Correlation meter, and a fully scalable, zoomable Spectrum Analyzer. If your jingle, audio clip, or voice-over is too long or too short - simply adjust it to the desired length with the integrated Time-Stretching tool.

• With a CD-Writer you can burn an audio CD directly from within CUTmaster without having to exit to an external application. Create your CD either track-by-track (TAO) or all in one session (DAO) with full international Redbook Standard support. Produce CD’s with excellent audio quality, plus all the additional coding and information required to create a Master disc.

• Touch-up your archival or other substandard audio material now stored on reel-to-reel tape, records, transcriptions or cassettes. With the Osiris Restoration Package you can restore sonically degraded recordings in real time, and burn a CD immediately afterwards! Old favorites can be aired again, with renewed life. And, like all audio processing in the CLAN, with extraordinary quality, as if it had been recorded yesterday.

• For a monitoring-only workstation, CUTplayer is the perfect tool! Listen to the first or last few seconds (or any part you like) of any audio clip from local station or audio server. Set markers while playing, check the total duration, the playing or remaining time—CUTplayer is ideal for auditioning your audio library.

• Want to take your studio on the road? The answer is CUTmaster ToGo - for your notebook! Connect ToGo to a database module. Since it outputs linear and various reduced audio formats, you are able to transmit directly to your broadcast station via ISDN or Modem.

• With masterCART you can edit playlists, audition and load jingles, trailers or ID’s into the integrated CARTwall. Fades and crossfades are possible by using up to three stereo output channels. Connect the output channels to your console for live broadcasting.

• Finally, the longtime recorder Event completes the picture. You can choose between permanent or level-controlled recording modes (in which case the recording will consist of user-controlled discrete events). You can add either standard or additional comments and even set markers during recording. Great for sports events, or other types of long-form programming.

CALL YOUR FAVORITE BRADLEY PROFESSIONAL TO HELP YOU PICK THE CLAN SYSTEM JUST RIGHT FOR YOUR NEEDS.

RECORDING AND PLAYBACK
DIGITAL AUDIO LABS V8 SYSTEM

What if your PC had enough multi-track muscle and DSP horsepower to turn your favorite software into a world class studio? Meet the V8, the PC based hardware platform that's configured to your specifications and runs under your choice of software interfaces. The V8 main board already knows what's under the hood. Rather than wait for you to tell it what I/O peripherals and options are installed and where they are, it finds all attached components, registers them, and makes them available to your software. Add an audio hardware system specifically designed for third party software support with a robust sixteen track hard disk recording engine, a flexible real-time mixing console/routing system, and a signal processing reserve deep enough to satisfy the most demanding DSP software. Include a variety of high fidelity analog and digital I/O peripherals. Finally, put the system under the complete control of your favorite music and audio applications. Now you're driving the V8.

The V8's mixing and routing section is completely autonomous; it doesn't care whether disk channels, external inputs, or DSP plug-in channels feed the inputs. The V8's mixer can be used alone as a powerful, digital mixer with full automation and DSP plug-in support. Your V8 system isn't just a disk recorder and editor. It's an automated digital mixer with built-in, automated signal processing from the best DSP programmers in the business. Moreover, you can easily add more DSP as your software demands increase.

The V8 coaxes up to 16 simultaneous disk channels from off the shelf disk drives and interfaces. The V8 bus supports 16 channels in and 16 channels out at one time with a flexible routing scheme that allows any disk channel, mixer component, or I/O channel to be patched to or through any other. In addition, the V8's broad choice of analog and digital I/O peripherals can be combined and daisy chained to bring as many ins and outs under computer control as desired.

DIGITAL AUDIO LABS V8 MAIN BOARD

- Full length ISA 16-bit slot
- Sample Rates: 44.1k, 48k, and variable with external source
- Disk Channels: up to 16, depending upon system throughput
- Simultaneous I/O across V8 Bus: 16 in, 16 out
  (1 or more I/O peripherals required)
- Includes support for use of CardD Plus as stereo I/O

RECORDING AND PLAYBACK

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web: http://www.bradleymbroadcast.com
Bradley offers many choices in audio cassette decks. For the most critical audio recording we recommend this trio. They are rackable recorders with Dolby B and C noise reduction and Dolby HX-Pro for extra headroom. Features include ±12% pitch, three locate markers, 25-pin parallel port, and separate left and right input controls. Signal-to-noise is 78dB using Dolby C, and metal tape response is at least 25Hz to 19kHz.

122 MKIII: A three-head cassette deck, well-suited for on-air use. Bias and level calibrations are on the front panel. Input level controls are gear/clutch coupled. The head system features Cobalt Amorphous heads with independent azimuth adjustment. Connectors are balanced (+4 dBm XLR) and unbalanced (-10 dBV. RCA on rear and 1/4" on front).

112 MKII: For Tascam pro performance in an economical machine, order the 112 MKII, a two-head deck with unbalanced connectors (-10 dBV, RCA on rear and 1/4" on front). A balancing kit with XLR connectors is optional.

112R MKII: (pictured) Choose this auto-reverse, three-head deck when you need extended recording and playback time. The head rotates 180 degrees for accurate playback alignment of both sides of the tape. The 112R MKII has unbalanced connectors like the 112 MKII.

BONUS! Get 5 free TDK SA80 cassettes with each purchase of a Tascam Cassette machine.

The Tascam 202 MKIII has two auto-reversing wells with simultaneous record on both, and continuous playback capabilities. Built for studio use, the 202 MKIII is enhanced by twice-speed dubbing and a headphone jack. This model has one set of line I/O connectors plus front-panel mic inputs.

Both models rack mount and include Dolby B, C, & HX-Pro. Synchro Reverse makes two-sided tapes when one is longer than the other. Machines are high impedance, low level, unbalanced on inputs and outputs.

READY TO RIP
Special: We package the fine Technics RS-TR575 dual cassette deck, below, with Excalibur’s IIF-to-PRO interface amplifier IA-1 and a Middle Atlantic rack shelf. Value: $498.00

Unlike many dual cassette decks in this price range, the RS-TR575 records in both wells. It allows sequential or simultaneous parallel recording from the same source. You get a dual tape counter, 2X FF/REW speed, motor-driven well doors, and auto tape calibration for fidelity on any brand tape. Play in series for 24 hours. Other features include Dolby B&C noise reduction and Dolby HX-Pro headroom extension. Connectors are -10dBV on RCA phono jacks.

Also available: The RS-TR272 double auto-reverse deck records in one well. It has an electronic counter, serial record, and Dolby B&C and HX-Pro.

The RS-BX501 is a single-well auto-reverse machine with Dolby B&C, HX-Pro, and auto tape calibration.
SONY TC-WE825S CASSETTE DECK WITH DOLBY S

Make stunning recordings with the power of Dolby S type noise reduction. In a twin-well deck, Dolby S delivers the very best audio on analog cassettes.

The TC-WE825S is dual well. Dual recording, dual auto reverse and dual 2-motor transports are featured. Twin/sequential recording and playback, auto record calibration, high and normal speed dubbing and twin linear time counters are standard features.

In addition to Dolby S, the TC-WE825S has Dolby B & C and Dolby HX-Pro, for increased headroom and low distortion.

TC-WE825S 60SOTCWE805S MFR LIST $330.00

TASCAM MULTITRACK PORTASTUDIO

For the musician or other professional seeking convenient multitrack recording, Tascam has improved its very popular 424 Portastudio. The 424 MKII is a four-track cassette recorder and eight-input mixer (four mono, two stereo). Features include three-band EQ with sweepable mid, two tape speeds, balanced XLR mic inputs, two aux sends (one to cue for headphone mix), auto punch/rehearse, and an internal power supply. No external transformers! Dedicated tape outputs allow integration to external mixers.

Need more inputs? Ask us for a quote on Tascam's 464. For eight-track recording, request the 488 MKII.

424 MKII Portastudio 60TE424 MFR LIST $549.00

TELEX CASSETTE DUPLICATORS

For the simplest voice dubbing work, choose the Replica, the smallest, fastest copier on the market, with 16x record speed and weighing only 7 pounds.

The popular Copyette models are improved: they now have an erase head built right in, so you don't need to bulk erase your tapes. For affordable, portable copying, they're ideal. Dub both sides of a C-60 tape in less than two minutes, all in a ten-to-twelve pound package. The Copyette 1-2-1 makes one dub at a time; the model 1-2-3 makes three copies at once. A protective hard cover is included.

These models dub with response to 6.3kHz mono or 8kHz stereo. For higher fidelity dubbing or if you're handling much larger quantities of cassettes, ask us about the Telex ACC series of expandable tape duplicators.

MARANTZ CASSETTE MACHINES

Churches, aerobics instructors, and corporate A/V professionals enjoy Marantz quality. These are two-head, two-motor single-well decks with auto-reverse, Dolby noise reduction, and rack ears.

The PMD-501 is an affordable, basic deck. The 502 adds ±15% pitch control, Dolby C and HX-Pro, output level control, an electronic counter, and dual front-panel mic inputs on 1/4" jacks (nice for smaller installations where no mixer is available). A balanced XLR line I/O option is available for this model.

TASCAM 130 CASSETTE DECK

The new TASCAM 130 is a 3-head cassette deck and thus provides confidence monitoring - enabling the engineer to know exactly what's being printed to tape as it's being recorded. With the Auto Monitor feature, it's easy to check Source / Tape signals, so there's never a question as to what's being monitored. The recorder is 3U rackmountable, provides unbalanced RCA inputs and outputs, features an automatic tape type selector, and has timer record and play capability.

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web: http://www.bradleybroadcast.com
**MARANTZ PMD520**

The Marantz PMD520 sets new standards for innovation and design. Featuring two independent 3-head mechanisms, the PMD520 is designed to provide the audio professional with the most flexible and comprehensive cassette deck available.

Marantz's progressive thinking when designing the PMD520 brings unique features to the world of cassettes. The doors have been eliminated so that tapes can be inserted and removed with greater efficiency. Servicing your PMD520 is easy because each mechanism can be completely removed while the other remains in service. During continuous recording, the overlap record feature can be activated to ensure uninterrupted recording when going from well to well and deck to deck. The overlap record feature will start the next tape 3 minutes before the current tape ends, so you'll never lose a word.

Want a remote? Not a problem, Marantz thought of everything. The WRC220 wired remote provides complete control for playback, recording and duplication. Also available is the RC5PMD infrared remote.

**DENON DNT620 CD/CASS COMBO**

The Denon T-620 is a professional CD player and cassette player/recorder housed in a single 3U, rack-mount chassis. It is the successor to the DN-610F and includes many new feature enhancements for professional applications, including balanced XLR connectors on the inputs and outputs.

- Headphone jack and volume control
- Headphone source select switch
- Wired Remote Control terminal
- Balanced (XLR) In/Out terminals
- Two machines in one
- Record from CD to tape
- Play background music continuously
- Mix from both sources, add mic audio
- Rack mountable
- Single or continuous Playback mode
- Back cue function
- A-B repeat mode
- Variable pitch control up to +12% of playback speed

**TASCAM CD-A500 CD/CASSETTE COMBO**

New from Tascam: the CD-A500 integrated CD player and reversible cassette deck! With its 3U rack mount design, the CD-A500 offers CD to cassette dubbing with A side/ B side program dubbing with CD sync. Continuous play function, wireless remote control and flexible output architecture (dedicated RCA outputs for CD in addition to common RCA outs), the CD-A500 is for commercial recording facilities and sound contractors alike.

<tbody>
<tr>
<td>CD-A500</td>
<td>$389.00</td>
</tr>
</tbody>
</table>

**MARANTZ DUAL CASSETTE DECKS**

The PMD-500 and 510 allow simultaneous recording (from a single source on the 500, or separate sources on the 510), playback on one tape while recording on another, and quick auto-reverse. Serial recording gives three hours of continuous material. Standard or high-speed dubbing, Dolby B&C Noise Reduction, Dolby HX-Pro, and memory rewind are included.

The PMD-510 is really two machines in one deck. Extra features include ±15% pitch control, cascade circuitry allowing series recording with multiple machines, and separate meters and counters for each well. A switchable headphone jack allows cueing of one well while the other is playing.

Both models are rackable and provide -10dBV on unbalanced RCA connectors. An RC5 port makes serial, IR, or master remote control simple to configure. The optional remote kit works with either model and includes a wall/rack mount controller with handheld wireless remote. It's handy for duplication projects, since you can operate multiple units in parallel.

Defining the standards for broadcast audio performance ....

... Established in 1924, beyerdynamic's legacy of innovation, fidelity and reliability is recognized and honored by professionals around the world.

73 years of audio excellence.

beyerdynamic... Fidelity in Audio,™
Forge Ahead With Confidence
When you need absolutely brilliant audio for your next project, look to the ultimate sound editing software for Windows, Sonic Foundry's Sound Forge 4.5.

Radio and television broadcast studios and post-production houses throughout the world are discovering a new level of interactivity, accuracy and overall control. Extensive effects. Flexible features. Expandable power. Isn't it time to start using the one audio editing package that gives you complete confidence and control?

Enhance Your Audio With Other Sonic Foundry Products

ACID
A revolutionary music production tool that brings unprecedented creative flexibility to loop arranging & editing.

CD ARCHITECT
Design and build professional audio CDs to red book spec.

XFX 3
Create instant ear-catching effects, including Amplitude Modulation, Distortion, Vibrato and more.

SOFT ENCODE
Enhance your audio files with easy-to-use Dolby Digital encoding software.

ACOUSTIC MIRROR
Add to your sound by applying the acoustics of various real-world environments.

For more information see our website www.sonicfoundry.com or call 1 800 57 SONIC
DENON CD CART MACHINES

Play CD's with the convenience of carts on the DN-951FA. Use the rotary track knob to dial the next cut, then hit play for instantaneous audio. Manually search through a track, choose single or continuous play modes, and preview the last several seconds of a track just by pushing a button, a handy feature in the on-air studio.

Denon's Auto Track Select System reads barcodes you place on the CD. You can set it up to cue only to a specified track, to the exclusion of all others; or cue to a specified track, allowing the operator to select others, or lock out a specific track, allowing the operator to select any of the others.

Three decks mount in a rack with an optional shelf. Remote control uses pull-to-ground logic or RS422. Outputs are balanced analog, adjustable from -20 to +18dBm, and AES/EBU digital. Each CD is protected and stored in a special plastic CD "cart" case even while it's in the machine.

DN-951FA 60DEDN951FA MFR LIST $1,500.00

The DN-961FA is a drawer-loading version for those stations who choose not to use the CD Cart format. No Auto Track Select.

DN-961FA 60DEDN961FA MFR LIST $1,500.00

JVC XU-301BK 3 CD-MD COMBO DECK

This triple CD player has three independent CD trays, with play and exchange system. CD Text feature allows retaining disc title and performer name, with 32 characters per title or name, for up to 200 CDs. Pitch control is also provided. But that's just the beginning: this unit also includes a MiniDisc recorder with 1-bit D/A and A/D converters, and features all five MD edit functions. An internal sample rate converter simplifies recording from any medium, and the XU-301BK has the ability to mix and record from CD, line input and/or mic input. A great machine for home, office, or studio use.

JVC 3CD-MD Combination Deck 60IUXU301BK $550.00

JVC XL-V282BK CD PLAYER

This affordable single-play CD player features 10-key direct track access, 1-bit converter with 8x oversampling digital filter, and wireless remote control. Index play capability is available via the remote control. Convenient center-tray loading mechanism.

XL-V282BK 60IVXLV282BK $169.95

DENON C680 CD PLAYER

Track search select knob, jog/shuttle wheel, pitch control, rack mount, balanced audio outputs and auto cue are just a few features which make the DENON DN-C680 a "must have" single CD player for studio and broadcast production. You can listen to the end of a track using the End Monitor function, and the End Of Message function provides a warning to the operator that the track will end shortly.

This unit uses 18-bit, 8-times oversampling, and it occupies three rack spaces. Big friendly buttons, parallel remote port, RS-232C/422A switchable serial remotes, digital AES/EBU and SPDIF, and XLR balanced/RCA unbalanced analog outputs are provided. Be sure to call and ask about available add-on options such as the Sampling Rate Converter and SMPTE Kit.

SONY CDP-D500 CD PLAYER

The latest professional quality CD player from Sony features precise cueing by CD frame unit, with a rehearsal function. A Jog Dial precisely places the cue point, while the cue/standby button offers back cueing capability. The CDP-D500 operates with a variety of remote interface options, including RS232C, GPI, and supplied wireless remote. Word sync input is provided via BNC connector, and ±12.5% varispeed may be employed in 0.1% increments.

TEAC CD-P1440 CD PLAYER

New from Teac the CD-P1440 single CD player, offers both variable pitch control at ±6% and auto cue with LED indicator. The multi-function 8-digit FL displays total, elapsed and time remaining. Select a cut using direct track access from the front panel or the remote.

CD-P1440 CD player 60TECDP1440 $159.00 (special Bradley price)

TASCAM'S CD FAMILY

The CD-201: Solid CD performance on a budget. You get rack mount, single-play function, and auto-cue with two sensitivity settings for tight starts with no dead air. Other features include fader start ports, RCA unbalanced outputs, and digital S/PDIF. The optional wired remote lets you create a custom playlist of up to 20 tracks, and has a search key to move through a track while you listen. The CD-201 occupies 3RU.

The CD-301 MKII: The same features of the 201, plus balanced XLR analog outputs and a heavier-grade transport. The new 1-bit delta-sigma D/A system in these models produces exceptional audio for your money.

The CD-401 MKII: Broadcast features at a consumer price. It too is rack mounted, and comes with a fader start port and ±6% pitch control. This fine player has XLR balanced and RCA unbalanced analog outputs, plus digital S/PDIF.

Specs are broadcast standard, with 18-bit, 4x oversampling, a precision three beam pick-up for accurate tracking, and Tascam's "Zero Distortion" circuitry for superb audio. This unit will cue to index. A wired remote is optional.

CD-201 60TECD201 MFR LIST $529.00

BACK TO THE FUTURE... WITH VINYL!

The warm familiar sound of vinyl is finding new fans and you can make them happy with the best-selling, always popular, still chuggin' along, built-like-a-brick, feels-like-old-times SL-1200MICR turntable from Technics. You'll see it in broadcast studios, clubs, and anywhere people want to get the best from their records.

The massive base and isolation feet keep the rumbles of the world away from the cartridge. Features include quartz lock, slide fader pitch adjustment of ±8%, 0.7 second startup time, stylus illuminator, and speed strobe indicator. The SL-1200MKII comes with tonearm, base, and dust cover. The direct drive mechanism provides the lowest noise and rumble in this price range.

Need a cartridge and preamp? We've got 'em too. Call Bradley today.

FIDELIPAC DYNAMAX MX

The no-nonsense MX series is for the studio manager looking for an economical way to get on-air performance in a bullet-proof console, and you get your choice of rotary or linear faders. These are modular mixers with active balanced line inputs and outputs, up-timer, internal power supply, and two inputs per channel, one of which may be configured for mic with an optional preamp kit (the console includes one).

Pre-fader patch points, two mono outputs (useful for mix-minus work), VCA design, and all-steel construction are standard. Let us fax you the specs.

Below we list just some of the 14 possible configurations of the MX series, ranging from 6 to 18 channels. Certain sizes offer you a choice between wide and narrow fader modules.

CALL 1-800-732-7665 FOR BRADLEY PRICE

ATI DISC-PATCHER

The DP100 is a one-way level/impedance interface with UL listing. It rejects common mode interference, which is important in high RF environments. The Disc-Patcher offers 102dB dynamic range, flat (20-20kHz,±0.25dB) frequency response, and 0.005% THD. A Velcro mount is supplied. Great for CD players. (Ask about the P-1000 turntable amp.)

DP100  60AIDP100  MFR LIST  $279.00
Rack Kit  Holds one or two Disc-Patchers.  60AID2073  MFR LIST  $28.00

LOGITEK DIGITAL CONSOLE SERIES

It's the missing link for the all-digital radio station that gives you a new way to think about studio design. Logitek's unique design separates all the audio from the control surface, creating an audio engine that makes it easier and faster to install or build a studio. More than a digital version of an analog console, Logitek's audio engine is designed to give you all the benefits that new digital technology has to offer, including an interface to your computer-controlled hard disk audio system. Logitek's Serial Sound digital audio engine can perform all the functions of a standard radio console: off/on, mixing, cue... and a fully configured engine can handle 64 mono inputs and outputs, 32 stereo inputs and outputs or any combination in-between. Analog and digital cards can be mixed to handle the required number of signals. You get as many busses as you have outputs. The engine can perform functions that are usually considered extra on an analog console, such as PAN and EQ, or profanity delay, which usually requires third party hardware. With hot swappable plug in cards, field upgrades, and servicing can be easily and quickly done without on-air interruption. Connections, LCD information display and card replacement are all done from the front side...making it easy, fast and convenient. In addition, you get the utmost flexibility in defining bus structures, talkback/intercom, relay closure, mix minus and more through Logitek's configuration software. Logitek's digital audio engine is built to maximize the functionality and value of your audio hard disk storage system. It comes ready to connect with a RS-232 port and a protocol to give any audio hard disk storage system total control.

The ROC-10 is one of the control surfaces available to Logitek's powerful audio engine. Its low profile, ergonomic design with choice of durable epoxy-based, oven-baked paint fits into any studio decor. Ruggedly constructed of aluminum, it has long-lasting, industrial-type buttons and switches for years of trouble-free use.

The ROC-5 is a totally assignable 5-fader control surface for the Logitek Audio engine. Its small size makes it ideal for satellite/automated stations, production, talk booths and newsroom environments. Only one cable is needed to link the ROC-5 to the Audio Engine. Designed for the new reality of radio, Numix's ergonomic shape gives your studio a modern, open look. Air talent can more easily see one another. Monitors can be placed closer and directly above, making them easier to read and giving a closer relationship between faders and on-screen events, meaning fewer mistakes.

Modular in design, you can build a control surface by simply adding fader wedges. Faders are no longer tied to an input, meaning more flexibility with fewer faders. The surface is as flexible as you choose: users can be limited or each have a preferred configuration. You can even have multiple control surfaces for the same engine...ideal for shows with talent and producers.

Logitek Digital Console priced upon application. Call 1-800-732-7665 for more information.

FIDELIPAC DIGITAL CONSOLE MX-D

The MX-D console from Fidelipac offers the broadcaster the ability to economically upgrade to digital console capability, while retaining analog input capability as well. This eight-channel mixer provides two inputs per channel, digital or analog, and the ability to select the number of desired input types at time of purchase. Mic preamps are standard on all analog modules, SPDIF or AES/EBU on digital modules. Analog modules digitize incoming audio and convert that signal to the MX/D mixer's internal data format. Digital modules convert all incoming digital signals to a common sampling rate and synchronize data with the internal matrix. Three digital channels plus three analog channels are available for the console output. Both output types support program, audition, and mono feeds. Digital out is at 48kHz sampling rate, although 32kHz may be preset at the factory prior to delivery, or 44.1kHz may be obtained optionally.

ARRAKIS 12000 SERIES DIGITAL CONSOLES

12,000 Series consoles are available in 8, 18, & 28 channel mainframes. These modular consoles offer analog control of mics, phones and remotes, as well as optional digital fader modules and control interfaces. A variety of available input modules include features such as two mix-minus telephone hybrid drives (3 optionally), stereo cue, A/B input switching, remote start/stop and channel on/off logic with A/B follow. Digital timer, built in talkback, muted monitor and headset feeds for control room and two talk booths are also featured. Priced typically almost half the cost of any equivalent console, the 12,000 is the most popular full featured, top quality broadcast console in America. Call Bradley for a system configuration sheet.

See page 130 for Radio Systems Clocks

RADIO SYSTEMS MILLENIUM CONSOLES

The Millennium from Radio Systems is available in 6, 12, 18, and 24 channel sizes. Millennium consoles all feature 3 output busses, complete remote control and metering, a comprehensive monitor section with standard eight position selector, and a clock/timer. Models differ only in their channel count and meter over-bridge. For example, the six channel has three meters, the 12 and 18 have five, and the 24 has seven. The 18 and 24 channel units also feature an auxiliary cutout for an extra meter or clock/timer.

The Clock/Timer is part of the Radio Systems CT-8 line so it connects serially to its external master driver to function as a clock slave readout. The display switches modes between clock and up-timer via front panel console switches, which also control all timer functions.

Millenium consoles make extensive use of VCA technology and electronic switching, providing that there is no audio path through any switch or fader - as these controls get dirty over time, they will never affect the quality of your audio. In fact, there is no audio at all on the front panel except for the cue speaker! This dramatic lack of internal audio wiring and long cable runs inside all Millenium consoles means exceptional RFI immunity and overall low noise levels. Call your Bradley Professional today to configure the Radio System Millennium console perfect for your facility.

CALL 1-800-732-7665 FOR BRADLEY PRICE
**MACKIE DIGITAL 8-BUS CONSOLE**

Employing powerful DSP technology, Mackie has created a whole new class of digital console. It features a familiar analog-like interface and far more processing power than any other 'affordable' digital mixer. The Digital 8-Bus uses an industry standard 32-bit Pentium Compatible CPU Processor with 16MB of RAM. Besides keeping track of 72 channels of audio, it can perform data operations like reading and writing to built-in floppy and hard drives (on the separate computer unit), and driving a full-color monitor via a built-in SVGA video port. You can even add a PC-compatible keyboard and PS/2(tm) mouse. The integral meter bridge displays tracking, monitoring levels, and each channel's aux send levels. Bus Assign lets you quickly route channels to busses. It's like a digital patch bay!

Write-Record enables automation on the current channel. For those of you who want instant hands-on control, the D8B's automation can also be run in Touch mode. As soon as any recordable control is adjusted, the corresponding channel automatically goes into automation record mode. The channel strip V-Pots give you instant feedback and control over panning, eight mono and two stereo aux send levels.

Behind the Digital 8-Bus' 100mm motorized faders are four banks of channels, each available at the touch of a dedicated button. Channels 1-24 are for tracking. Channels 25 to 48 are tape returns. A third bank controls the Internal Stereo Effects Returns and four external stereo effects returns. In addition, you get a fourth bank – 8 virtual group masters, 8 faders for MIDI control, and 8 bus master faders. When you switch banks, the SVGA display changes, reflecting the selected bank. Convenient Speaker Select and Level Controls let you choose between near-field or large speakers. You get two Phones/Cue Mix sections that allow you to choose the source for two separate, stereo headphone mixes. Each provides headphone outputs, and there is a built-in Talkback Microphone. There are three stereo analog inputs for external cue sources. Each of the 48 main inputs channels feature a gate, compressor/limiter and a four band parametric EQ. The two stereo reverb/delay units can be expanded to eight through the Mackie DSP card.

The Digital 8-Bus is expandable, with analog and digital I/O cards. Pop in one to three D8B I/O cards and replace an external autolocator with the built-in Tape Transport Controller. You can also arm up to 24 tape machine tracks directly from the Record Ready button on each D8B channel strip. The multifunction Position Display above the transport section reflects tape position in SMPTE/Real Time (hours: minutes: seconds)/MIDI (bars: beats), and lets you mark multiple in and out points. A floating window lets you graphically control 5.1 and 7.1 sound source centers anywhere in the sound field.

Ask your Bradley professional for detailed specifications and a copy of the Mackie video about this incredible console.

**MACKIE 8-BUS SERIES**

What's not to like about the 8-BUS? It's a recording and PA board, available in 16, 24, and 32 channels. Features include +48V phantom power, four-band EQ, six stereo assignable AUX returns, stereo solo, and talkback with mic. Double your inputs for mixdown with MIX-B. All channels have high headroom mic preamps.

Two headphone monitoring set-ups allow you to build custom mixes for the talent and the operator. All channels provide patching, direct out, tape returns, balanced mic inputs (XLR), and balanced line inputs (1/4”); the console has balanced XLR's on the main L/R output. The power supply is rack mountable.

Distortion, response, and gain specs are suitable for today's digital sources. An optional tiltable meter bridge provides ladder LEDs for each input channel and VU meters for the main outputs. We can also provide pricing on metal stands and a “side car” with rack space for power supplies, patch bays, and more.

YAMAHA O3D DIGITAL MIXING CONSOLE

If you're ready for a compact, comfortably priced, full-featured digital mixer - one especially made for professional project and post production studios relying on modular digital multitrack recorders such as TASCAM, ADAT, AES/EBU and YAMAHA digital formats - then you're ready for the O3D Digital Mixing Console. The O3D is a self-contained, 26-input/18-output fully-automated digital mixing console, featuring an intuitive user interface, ease of operation and a long list of essential professional engineer's tools. Fast 32-bit internal DSP, 20-bit ADs and DAs, 32-bit onboard multi-effect processors with freeze (sampling) and guitar amp simulation effects, motorized faders, fader and mute grouping, surround sound mixing, scene snapshot memories, onboard automation, and MIDI remote capabilities, combine to make this console a complete solution.

The O3D's flexible configuration of analog and digital inputs and outputs makes it suitable for a wide range of professional mixing applications. Included are 24 input channels and a fully-featured stereo input for a total of 26 inputs, plus 4 bus outputs, 4 auxiliary and 2 internal effect sends, a main stereo mix bus and a solo bus. Stereo digital inputs and outputs, plus 8 digital inputs and outputs (optional, via a YGDAI slot), provide a total of 10 digital inputs and 10 digital outputs.

Input channels 1-8 have mic preamps, XLR and balanced stereo 1/4" phone connectors, and individual phantom power switches. Inputs 9-16 feature balanced stereo 1/4" connectors. All 16 channel inputs feature input gain controls with 30 detents. Channels 1 and 2 include analog inserts for connecting external dynamics processors. Aux sends and bus outputs can be paired together for stereo operation and can be routed to the control room monitors for cue mixes, with onboard effects returns included. The four bus and four aux send signals are output via balanced stereo 1/4" connectors.

Coaxial and AES/EBU stereo digital I/O connectors permit direct connection to DAT recorders and other compatible digital devices. The stereo digital input signals can be routed to the stereo bus for submixing, or to the stereo input channel for mixing and processing. The number of inputs can be increased by digitally cascading two O3Ds together, or one O3D and O2R. The O3D's YGDAI (Yamaha General Digital Audio Interface) slot, which accepts the same single-size YGDAI cards as the O2R, provides 8 digital inputs and 8 digital outputs for direct digital connection to all modular digital multitrack recorders.

The O3D features an array of onboard parametric EQs and dynamics and effects processors. Comprehensive libraries of preset EQ, dynamics settings, and multi-effects processors with freeze (sampling) and guitar amp simulation are available for all 26 individual channel inputs, the 2 on-board stereo effects returns, the 4 bus outputs, 4 aux sends, and main stereo outputs. The onboard dynamics processors include compressor, expander, gate, ducker and compander functions, and a total of 80 dynamics memories.

YAMAHA O1V

Could Yamaha make a good thing better? Yes, that is exactly what has happened with the release of the O1V. The O1V is an integral mixing tool for sound reinforcement installations and live sound situations where the ability to return to previously stored mixer settings is a necessity. While the Yamaha O1V retains all the popular ProMix 01 features, including snapshot storage, instant reset of all functions, motorized faders, on-board dynamics, parametric EQ and digital effects, it includes some significant advances to meet the needs of the sound reinforcement and live sound markets.

The Yamaha O1V provides 24 full-featured channels, two stereo effect returns, six buses, six aux sends plus direct outputs on channels 1-16. It offers balanced connectors for all inputs and outputs, with parallel 1/4" in. and XLR inputs, Mic preamps, and 48-volt phantom power on channels 1-12. The primary input channels (1-16) each feature the same 4-band parametric EQ and limiter compressor/gate found in the Yamaha O2R, plus a 250 ms delay line. Input channels 17-24 can accept digital or analog sources. Analog outputs include up to 300 ms of delay, ideal for speaker alignment in sound reinforcement applications. In addition to dedicated analog connections for the stereo bus and monitor outputs, four analog OMNI-SEND outputs can be programmed to output any of the buses, aux 1-4, or channel direct outputs.

The O1V adds a new OPTION I/O card slot allowing for the installation of any of five new MINI digital I/O cards. Optional cards facilitate interface to popular 8-channel digital multi-track recorders and signal processing equipment in Alesis ADAT, Tascam TDM, or AES/EBU digital formats. Not doing digital yet? Optional analog cards allow the user to configure the O1V for applications in which all the sources and output equipment is analog.

MACKIE MICROSERIES MS 1202-VLZ

This is the updated version of Mackie’s instant classic compact mixer. The improvements aren’t just cosmetic. If you go shopping for a mixer, you’ll find it very hard to even come close to what this 12-channel mixer does for the money. Use it as a main board in a small studio, as an effects submixer, or as a mic preamp.

Features include: very low impedance design (for better noise specs), 60dB gain and low-cut filter on channels 1-4, three-band EQ on all channels, PFL solo, balanced XLR main outputs (as well as 1/4”), RCA tape interface, a sophisticated control room/phones section, mutes on every channel, and the same ALT 3-4 system used on the big brother CR-1604 mixer, giving you an extra stereo bus when you mute a channel. Channels 1-4 have XLR mic inputs and 1/4” TS line inputs, while channels 5-12 have 1/4” TRS line inputs configured in four stereo pairs. Input channels have center detent gain and pan controls, two aux sends, and channel inserts on 1-4. The master section includes two stereo aux returns, headphone level control, RCA phono jack I/O, and the LED display. The power supply is built in.

MicroSeries 1202 VLZ 60MD1202VLZ $349.00
Kaces Soft Carrying Case 40KEKB22 $25.95

MACKIE MS 1402-VLZ

The MS1402-VLZ is a fantastic and affordable tool for all sorts of mixing environments. With 6 high-headroom/low-noise mic preamps, 60mm faders, 3-band EQ, mute and solo switches, and ample routing flexibility, you’ll find the MS1402-VLZ everywhere, from video post-production, live club performance, multimedia, home studio, corporate boardroom.

A low cut filter on mic channels 1-6 lets you cut out mic thumps and room rumble without sacrificing your low frequency EQ. The Control Room/Phones matrix makes mixdown routing a snap. And the Mute/Alt 3-4 features gives you two more output sources, effectively turning this 2-bus board into a 4-bus problem-solver. You won’t find a more feature-laden mixer in this price range.

M1402 VLZ 60MDMS1402VLZ $485.00

NIGEL B 1402 STAND

Need a stand for your Mackie 1402 mixer? Nigel B has anticipated your every need. The 1402 Mixer stands on an instantly-adjustable angled platform. When assembled, a cover on the column conceals all the wiring.

MACKIE CR-1604 VLZ MIXER

The updated version of the CR-1604 mic/line mixer maintains the sound quality and unique five-way mounting configuration of the famous original, and adds a long list of new features. They include a true four-bus design, with channel assigns to busses 1-2, 3-4, or main L/R, plus bus assigns to left or right Main Mix. Now you also get acclaimed Mackie mic preamps on all 16 channels, 60mm log-taper faders, mid-range EQ sweepable down to 100Hz up to 8kHz, inserts on every channel, control room outputs, and a new trim control to handle everything from hot digital multitrack inputs to quiet vocals.

Other improvements: low-cut filter and signal-present LED on every channel, mono output volume control, RCA ins and outs for two-track mixdown, and lots of aux and effects power. And the trim control is accessible no matter how the I/O pod is rotated.

Post-fader direct outputs on channels 1-8 allow split monitoring. If you can’t afford an eight-bus console, this is a reasonable alternative for multitrack and mix-down work. The mixer is rackable. The RotoPod option brings the connectors face-forward. MixerMixer is an active combiner that lets three 1604’s act as one; the remote fader option then lets their main output be controlled by one fader. CordPack includes all cables to connect three 1604’s with one MixerMixer.

CR-1604 VLZ 60MD1604VLZ $939.00
MixerMixer 60MDMM $229.00

You need a 16-channel console for live and studio mixing, but you also need an effects unit. FX16 gives you all this in a rugged, compact 10U frame, because it's a dedicated live/recording mixer from Spirit and a programmable Lexicon effects unit. Take FX16 to a venue and its 16 mic preamps, subgroup, mono out, HPFs and up to 3 pre-fade aux sends make it a versatile live console. Back in the studio, its 16 pre/post fade direct outs and 3-band swept mid EQ make it the perfect mixing tool. But what makes FX16 so special is its internal Lexicon effects unit with 16 editable programs, which saves you the cost of an external unit that ties up valuable rack space. All main inputs (except 2-track return) on FX16 are balanced. In addition, outputs are impedance balanced so that long cable runs are possible without the worry of interference. FX16 uses Spirit's patented UltraMic™ Preamps. These represent a revolution in low cost mixer electronics with the ability to handle +22dBu of input level, a high CMRR and an EIN figure that's as close to the theoretical noise floor as it's possible to get. In addition, the mic and line inputs offer up to 60dB of gain range. FX16's relocatable jackfield means that if you are using the console in a rack you can connect your leads to the “underside” of the console - saving rack space and unsightly trails of cables.

Spirit is the only low-cost mixer that can offer you the leading name in studio effects - Lexicon. The Lexicon effects section offers a wide range of breathtaking treatments including reverbs, delays and choruses. Up to 26 inputs as standard - with a maximum of 16 mic/line inputs and 4 effects returns, this mixer offers plenty of input capability. Even the 2-track return can be routed to mix, providing a valuable extra stereo input. Each channel includes a Direct Out for multitrack recording or individual effects feeds. A balanced XLR connector allows you to connect microphones, with Phantom Power available from the master section. The balanced 1/4" jack allows you to connect electronic instruments, such as keyboards, with balanced or unbalanced cables. Signal processors such as compressors or graphic EQs connect to each channel’s insert point using a "Y" cable.

MACKIE SR SERIES

And lest you think Mackie forgot about four-bus mixers, allow us to introduce you to their SR Series.

Great for live sound, also suitable for anyone doing multitrack work. Churches, community centers, and budget-minded broadcasters will want to consider them.

The audio performance, log-taper faders, and high-end preamps are based on Mackie’s superb 8-Bus mixers. The 4x2x1 bus design is easy to master. Features include six balanced aux sends with masters, PFL/AFL, sophisticated EQ, LED's on each channel for overload and signal present, 60dB of gain on the mic preamps, “double bussed” sub outs for 8-track recording, phantom power, balanced main outputs on both XLR and TRS plus a separate mono sum, balanced inputs (XLR and 1/4”) on every channel, and an internal power supply. These boards weigh only 30-40 pounds.

Mackie brochures are among the most informative and fun in the business. Let us send you a copy about the Mackie board of your choice.

SPIRIT 328 DIGITAL CONSOLE

Spirit 328 represents a revolution in low cost professional audio, bringing all the functionality and sonic excellence of digital mixing to a brand new audience. With its unique console based interface, 328 finally bridges the gap between analog and digital mixers, retaining the spontaneity and ease of use of an analog console yet providing all the advantages of digital, such as instant TOTAL recall, moving fader automation and onboard Lexicon effects. Quite simply, Digital 328 is the most advanced analog 8 bus you'll ever drive combined with the easiest digital console you've ever used. For a mixer with such a small footprint, Digital 328 packs an extraordinary number of inputs. 16 analog mono mic/line channels - each with its own balanced XLR connector, dedicated insert point and access to phantom power - come as standard, along with 5 stereo inputs. With the addition of 16 digital tape returns on 328's TDIF and ADAT optical interfaces, a maximum of 42 inputs are possible. Every input is fully routable to any of the 8 groups and has access to the full complement of 328's parametric EQ, signal processing, onboard effects and auxiliaries.

Soundcraft has designed Spirit 328 to operate like your old analog 8-bus console. There's instant access to any channel, group or master feature with one button press. The key to it all is Spirit 328's unique "E-strip", the lighter-colored bank of encoders and switches that runs across the center of the console. Simply select a channel and the E-strip immediately becomes a "horizontal input channel" with instant access to all that channel's EQ, aux sends, channel pan and routing. Alternatively, press any button in the rotaries section above the E-strip and the encoders change to become a channel pan, auxiliary send, or Lexicon effects send for each channel. Select a fader bank to display mic/line input faders, tape returns faders, or group and master faders and that's it! With 328, everything you need is immediately accessible from the front panel of the console - giving you the freedom to let your ears decide. If you want the functionality of a digital console but the usability of your old analog 8 bus, then Spirit 328 is for you.

Only 328 can offer the world's premier name in studio effects on board - Lexicon. Two separate effects units are included, offering a full range of reverbs, choruses, delays, and flanges as well as dual effects such as chorus plus delay - all with fully editable program and parameter settings. Two Digital 328s may be digitally cascaded, giving you up to 84 inputs at mixdown and 32-track digital recording capability. The 328 reads and writes MTC and reads all SMPTE frame rates, with a large readout display instantly indicating current song position. Store and locate points are accessible from the console's front panel, with 328's transport bar controlling a wide range of devices including Tascam and Alesis digital recorders.

TASCAM TM-D1000

Tascam has done it this time! The TM-D1000 is the most versatile and affordable compact mixer available. Designed for the home studio, project studio or off-line editing suite in a post-production environment, this feature-packed console provides an 8-track configuration with expansion capability to accommodate 16 tracks with eight analog and eight digital channels. With support for multiple digital I/O protocols and MIDI Machine Control capability, this mixer provides an outstanding level of performance and functionality and will integrate easily into any modern studio. Expandable with an additional interface card, the optional IF-TD1000 adds eight channels of TDIF or four channels of AES/EBU or S/PDIF. The TM-D1000 is easily augmented with the optional FX-1000 effects board which adds four channels of dynamic processing and one stereo pair with reverb, chorus, delay and flanger.

TM-D1000 60TETMD1000 $999.00

TASCAM TM-D8000 DIGITAL RECORDING CONSOLE

The TM-D8000 represents the pinnacle of leading-edge technology in digital production and post-production consoles. With AES/EBU and S/PDIF digital main stereo outs in addition to both XLR balanced and RCA unbalanced analog outputs, internal snapshot automation, optional dynamic automation with a Mac G3 via an external computer and an onboard transport controller, this console enables you to work both intuitively and quickly. With onboard machine control supporting TASCAM sync, Sony P2 and MIDI Machine Control protocols, the TM-D8000 will easily integrate into the most demanding production environments.

Basic configuration of the console is 40 mono inputs and 6 stereo inputs, each with its own fader, and assignable to any of the 8 busses, stereo mix or directly to the digital tape send of the corresponding channel. There are 24 dedicated digital tape sends and returns via TDIF-1, making digital connection to DA-98s, DA-88s or DA-38s simple. You'll also find 16 high-quality analog inputs that are individually switchable between the XLR mic pre-amps or balanced TRS line inputs. Each of these channels provides analog insert points and phantom power. These 16 analog channels can also be switched to TDIF, thus providing 40 channels of TDIF at mixdown. Additionally, channels 9-16 can be selected to accept either 8 channels of AES/EBU or 4 channels of AES/EBU and 4 channels of S/PDIF.

For dynamic effects processing, the TASCAM TM-D8000 offers 8 internal digital dynamic processors, including GATE, COMPRESSION or EXPANSION. Much like the EQ settings, parameters for the dynamic modules can be stored and recalled at any time. You can easily incorporate your existing dynamics processors into the mix using the 4 channel insert matrix included in the TASCAM TM-D8000. Any of the dynamic modules or insert matrix points are assignable to any of the channel inputs, tape returns or stereo mix.

RECORDING/UTILITY MIXERS

SOUNDCRAFT K1 MIXING CONSOLE

Soundcraft also offers this new, affordable four-bus mixer. You order your inputs in multiples of four, so you save money over fully modular designs without sacrificing a lot of flexibility.

The K1 offers 8, 16, 24, or 32 mono or stereo inputs. The 4x4 matrix allows multiple speaker systems to be set up easily. Stereo inputs can connect to DAT, CD, or tape sources. Four-band EQ, six auxiliaries, and peak-reading bargraph meters make this compact board easy to use.

Mono modules accept any mic or line source via XLR or 1/4". Phantom +48V, polarity reverse, high pass filter, pre-fader insert, and pan are standard. Two stereo input channels are fitted in every board as standard; more can be added in blocks of four. Each stereo channel has two 1/4" inputs, one of which can be set with RIAA curve for phono cartridges.

Faders are 100mm. Power supply is external. Weights range from 30 to 70 pounds.

ASHLY MIXERS

Ashly's rackable audio mixers have a five-year warranty so you can install them with confidence in studios, remote vehicles, or meeting rooms. The MX-508 is an eight input, stereo output mixer, with low noise and distortion. Each input has XLR mic and 1/4" TRS line connections, level trim with clipping indicator, three-band EQ with sweepable mid, two aux sends, and channel patching. The mixer also has a stereo input on RCA jacks for a tape player or CD.

Phantom power is available for the mic inputs. Ports include a stereo, +24dBm transformer balanced output on XLR's, a balanced stereo output on 1/4" TRS, an independent mono output, a tape output on RCA jacks, and headphone. The master section has pre-master sub in/out patches, two aux sends and returns, and LED metering. For ease of service, this three-space mixer is modular from the rear: A Bradley Best Seller.

CALL 1-800-732-7665 FOR BRADLEY PRICE

RANE SM-26B SPLITTER/MIXER

As we pointed out in this space last year, the SM-26B is unusual because it does so much. Allow us to explain.

First, it's a six-to-two, line level mixer, accepting six balanced or unbalanced line inputs which are applied to six Level and Pan controls. An added master stereo input brings the total inputs to eight. The mix is sent to left and right output jacks. The unit is also a splitter: it can take one or two line level inputs, and split these to any of the six mono outputs on the rear. In this mode you can control the level from each input bus to each output. It is also a six in, six out buffer amp, and a -10 to +4 shifter. The SM-26B may also be used in a combination of modes. One example: inputs 1 through 3 are mixed to the left and/or right output buses, while outputs 4 and 5 are delivering signal originally applied to the left and right master inputs, and output 6 is driven from input 6 straight through. All ins and outs are 1/4" TRS active balanced. Sorry, it won't do windows.

SM-26B  60RNSM26  MFR LIST $429.00

CALL 1-800-732-7665 FOR BRADLEY PRICE
YAMAHA MX200 MIXER

The price of these models demands attention. Available in four sizes, all with stereo and mono output busses, the MX200 is intended primarily as an SR mixer for small concerts, but will find a home in other situations.

All input channels have switchable “A” and “B” inputs: the “A” inputs are balanced XLR with phantom power, the “B” inputs are balanced TRS phone jacks that also accept unbalanced signals. Insert patch points on every channel let you add processing. A -20dB input pad and -16 to -60dB rotary gain control let you match levels with virtually any input source, and a switchable 80Hz high-pass filter cuts out hum and rumble.

Three band EQ, four aux sends, pan pots, on/off switches, and pre-fader listen are provided. Four switchable LED bargraphs monitor your bus signals with peak-reading accuracy. Independent master faders control the left and right stereo busses, as well as the mono bus.

Also available:
Yamaha's M200 mixers have eight output groups and stereo and mono busses, and come in frame sizes from 16 to 40 channels. Call us for details.

TASCAM UTILITY MIXER

The ten-pound M-08 gives you 12 inputs (four mono, four stereo), two-band EQ, phantom power, effect returns, mute, PFL, overload indicators, and daisy chain connections. Size: 13" x 3-1/2" x 12-7/16".

U.S. AUDIO RACK MOUNT MIXERS

Designed and built in the U.S. by Whirlwind, these mixers are available in a version to answer any thorny problem.

The MIX-5S is an all-purpose mixer for sound contracting and similar work. It's a single-space, five-input device with four input channels (each with XLR and 1/4" TRS balanced connectors for mic or line), LED level indication, phantom power, pan, and an aux channel with RCA for a tuner or CD player. The outputs are XLR and 1/4" TRS. The MIX-5 is the popular mono version and a notable value.

The MIX-6 is a broadcast-quality mixer in one rack space. Inputs 1-4 and the stereo outputs are capable of any combo of line- or mic-level, XLR or 1/4" balanced or unbalanced signal. Input 5 is a stereo RCA pair, input 6 is a stereo 1/4" pair (balanced or unbalanced). This last input is switchable to take it off the output and patch it to the headphone for solo monitoring. This unit has a switchable stereo limiter, phantom power, and internal power supply.

MIX-8 provides eight stereo line level inputs, with headphone monitoring, stereo sends on inputs 1-4, and pans on inputs 5-8. Each channel has volume control; output level is set with a single stereo master pot. A foot-switchable circuit can mute the main outputs and allow monitoring of the main mix. A clip LED indicates overload.

MIX-44 is an unusual, two-space device that lets you create four discrete mixes from four separate inputs. It takes four separate balanced line-level inputs, and applies them to four mixer sections where they are combined through volume controls to four output mixes. Call for the specs on this useful matrix mixer.

ATI NANOAMP MIC/LINE MIXER

With Nanoamps you can configure your setup as it suits you. The MX100 is a three-input mic/line mixer, while its companion XP100 is a four-input expander. Inputs and outputs are XLR. The expander comes with DC and audio connection cables.

Features include independent level sets, master gain, adjustable headphone output, phantom mic power, balanced inputs, and metered output for balanced or unbalanced lines.

Order the AC/DC wall supply separately. An optional external battery pack runs an MX100 for three hours. Install Nanomaps in a rack with optional hardware, up to three across; various rack and desk mount kits are available.

ATI MXS100/MX200 PORTABLE MIXERS

The MXS100 is a full-featured stereo field mixer. It includes three XLR switchable Mic/Line low noise balanced inputs, phantom power, pan pots, switched low cut filters, slate microphone, stereo tape in and tape out jacks, a test tone oscillator. It also features stereo, bright LED bargraph VU meters, low distortion servo XLR balanced mic/line outputs with switchable peak limiting, and a stereo program/cue headphone output.

The MX200 is a lower cost stereo mixer for studio applications that does not include all of the bells and whistles needed for field operation which are included with the MXS100. The MX200 features three XLR Mic/Line low noise inputs with pan pots and phantom power. It features balanced line level stereo outputs and independent headphone monitoring. Rack or desk mount. Increase inputs with one or two XPS input expanders. Rack mount kits allow up to 11 mic/line inputs in single rack space.

Expand the MXS100 or MX200 mixer with an XPS100 for four additional Mic/Line inputs with pan pots or combine with the XPS200 to add two stereo line level inputs. Use multiple input expanders to precisely meet your requirements. Expanders include all audio and DC interconnects.

AUDIOTECHNICA MX351 SMARTMIXER

The NEW AT-MX351 SMARTMIXER delivers 5 channels of auto-switching performance. Complete with automatic threshold adjustments as well as a single AUX IN to accommodate tape or other line inputs, the Smartmixer features individually switched 48V phantom power as well as selectable limiting to prevent overloads. Other features included are: balanced inputs and outputs, pre or post controller outputs from mic/line channels, D-sub connector for TTL output, closure control input, NOMA operation, manual override, priority preselect switch and headphone output.

SPIRIT POWERSTATION 600

The best portable mixers combine mixing, effects, and power amplification all in one.

Spirit's Powerstation is a powered mixer with renowned Lexicon digital effects available on all inputs via Aux 2. The mixer has eight mono and two stereo inputs, three-band EQ, stereo seven-band graphic EQ to suit any room, PFL, and inserts on every mono input. A high pass filter fights mic pops and stage rumble. Each channel has two auxs.

The custom power amp at 2 x 300W (into 4 ohms) ensures clear, loud audio without distortion all night long. Use the patchbay to feed external amps with or without the graphic EQ or to plug another mixer into your amp. Powerstation is freestanding and includes a detachable lid.

YAMAHA EMX2000 POWERED MIXER

The new Yamaha EMX2000 Powered Mixer provides flexible audio mixing, high-power stereo amplification, and digital effects processing in an extraordinarily compact unit, with carrying handle. With all the main components necessary for live sound, and a “plug-in-and-go” approach, the EMX2000 is ideal for clubs, bars, theaters, churches, conference rooms, and so on. External wiring is kept to a minimum, and the logical panel layout makes for straightforward operation.

Inputs channel features include balanced XLR-type mic input, line-level phone jack input, insert (channels 1-4), PEAK indicator, variable gain control, 3-band EQ, two monitor sends, one effects send, PFL switch, and smooth-action level fader.

Digital stereo effects provide vocal, hall, room, plate, and gate reverb programs. External effects signals are returned to the two stereo sub inputs. A flexible seven-band graphic equalizer on the stereo output provides room-acoustic correction and feedback control. Two stereo sub inputs allow various sound sources to be connected, and a record out connection is provided. The new energy efficient Yamaha power amplifier delivers 200 watts of stereo power, and the speaker output signals can be set to Stereo L/R, Monitor 1 and Mono, or Bridge.

  - 60ARPDP9 MFR LIST $160.00

**FURMAN POWER PRODUCTS**

Lower your noise floor and stop lifting grounds, too. The Furman Isolation Transformer will change the way you look at studio hum problems. Designed for critical, low-noise installations, the IT1220 can supply 20 amps of balanced AC power. The goal: drastically reduce hum and buzz caused by ground currents from power supply filtering and by radiation from supply cables into sensitive signal sources. You can install it yourself for clean, safe power.

Typically gives a 16dB improvement in background noise floor in systemwide installations. This 3RU chassis has 12 isolated outlets on the back and two more on the front.

**IT-1220**

Digital Mixing Perfection by Tascam.

The Tascam TM-D1000: fully loaded with absolutely professional features and specs, at your dealer this summer, and priced for the real world. The time has come to go all digital!

- 8 analog inputs with 4 balanced XLR mic inputs with phantom power
- 8 channels of digital I/O via TDIF
- AES/EBU and S/PDIF digital inputs and outputs — expandable to 16 with optional card
- Compatible with Light Pipe converters
- 16 channel strips with long-throw faders
- 3-band sweep EQ
- 4 Group/AUX faders, a stereo master fader, complete monitor section, analog inserts, and more
- Snapshot automation with 128 scene memory recalled via the front panel or from your favorite sequencer via MIDI
- Synchronization with word clock (send/receive) and complete MIDI Machine Control
- You can even control your DA-88 or DA-38 directly from the front panel with 16 memory locations
- On-board dynamic effects processors with 10 stereo effects

Once you get your hands on a TASCAM TM-D1000 you'll forget about how you used to mix and begin to experience the promise of an all digital studio. Get more details at www.tascam.com and get the full story via TASCAM Faxback at 800-827-2268. Request document #8010.
The Yamaha 01V, 02R and 03D digital mixing consoles help you create the ultimate mix for your vision. With instant recall of mixes, 32-bit sonic processing, surround sound*, automation features, a completely digital signal path and connection to popular audio work stations, these workhorses make your job easier while improving your image.

Whether you're mixing for television, film or multimedia, you'll find a Yamaha digital mixer with all the features you need. Who says we don't live in a perfect world? For product literature, call (800) 937-7171 ext. 679 or visit a Yamaha Professional Audio dealer near you.

Tired of lugging around your PA system? If you answered yes, we think the Passport from Fender is just what you've been looking for. Truly unique, the Passport is a totally self-contained portable sound system. Weighing only 53 pounds, it can be picked up as easily as a medium sized suitcase, set up in minutes (5 to be exact) and operated by anyone—anywhere!

Eight 6.5" highly efficient speakers, four in each cabinet, work together to deliver clean, full-range coverage while the self-powered mixer delivers 250 watts of true stereo sound. One touch EQ is able to adjust bass, mid and treble simultaneously for optimum response and feedback control. The Passport comes equipped with switchable line voltage for international use and onboard storage for mics and cables. The complete audio package includes two dynamic cardioid microphones, clips and cables, two speaker cables, power cable and protective cover.

**YAMAHA EMX640 POWERED MIXER**
If you've never had a sound system, you want simplicity, all the components you need working flawlessly with an absolute minimum of work on your part. The EMX640 is a total system composed of four pieces: a high quality mixer, a digital reverb, two graphic equalizers and a high powered two-channel amplifier. Yamaha has already patched and level matched all these pieces so you can get your PA up and running quickly with no prior experience.

The EMX640 has six inputs, two of which are stereo, effectively giving you eight. Plus, the EMX640 has tape in and effects return inputs, giving you the equivalent of 10. The EMX640 has the most powerful amplifier (it has two) of any mixer in its price range. If you will use the system for speaking and vocals only, the EMX640 gives you maximum flexibility to cover the audience, including the ability to route all the power from both amplifiers to one set of speakers. A digital reverb makes your sound music like it's in a larger space, giving it a more expansive feel.

**COMMUNITY CSX SPEAKERS**
Join the community! Classics in their price range, CSX speakers deliver sonic quality every time. Fuseless protection guards your speakers against excessive input. Ferro-fluid cooling of the LF drivers is equal to the rigors of long term use. CSX cabinets are finished in an attractive durable black carpet.

The CSX25 is the smallest, with a twelve-inch two-way configuration. 32 pounds, 18.25"H x 15"W x 13.5"D.

The CSX35 is slightly larger and uses a 15" woofer and a larger cabinet to produce a more solid low frequency response. 43 pounds, 23.75"H x 17.25"W x 13.5"D.

The CSX52 has a smooth, three-way design for honest reproduction of the important mid-range, while still using a 15" woofer for pleasing lows. The 52's sound like Hi-Fi speakers, yet they will develop tremendous SPL. 89 pounds, 33.5"H x 18"W x 18"D.

Other Community models are available.

CALL 1-800-732-7665 FOR BRADLEY PRICE
These multipair systems are so much nicer than the snake-haired mythical creature whose name they bear. Use them for heavy-duty audio runs. Systems are available in 6 to 52 channel configurations. Each has foil shielding and numbered, color coded fan-outs for easy set up. Medusa systems use cold rolled steel boxes, thick jacketed cable, mil-spec strain reliefs, premium PVC shrink tubing, and Whirlwind connectors.

The Power series, also listed below, is ideal for powered mixers. They incorporate two runs of 14 gauge speaker wire built into, but shielded from, the mic and monitor lines. Call us for pricing on other Medusa cables including versions for multitrack.

**SHURTAPe GAFFER'S TAPE**

Tape your cables, carpets, and more with a tape that pulls up cleanly after the job.

- 2" wide, black 180' | 61STBK2 | $13.50 per roll
- 2" wide, grey 180' | 61STGY2 | $13.50 per roll

**SPECIAL!** Buy six rolls of Shurtape for only $64.80.

## SONIC II HEARING PROTECTORS

Reduce sound pressure on your ear without reducing highs or lows. Includes box with key chain.

- 42NOSON2 | $6.95

## WHIRLWIND CABLE REELS

Stow your cables quickly with these durable take-up reels. Note: these reels will hold less if the cable's outer diameter is larger. Call us for configuration help.

- (1) WD-1 Capacity: 640' of 1/4'' OD cable | 61WHWD1 | $139.00
- (2) WD-2 Capacity: 1640' of 1/4'' OD cable | 61WHWD2 | $176.00
- (3) WD-3 Capacity: 2100' of 1/4'' OD cable | 61WHWD3 | $325.00
- (4) WD-35 Capacity: 3675' of 1/4'' OD cable | 61WHWD35 | $325.00

ULTIMATE SUPPORT STANDS

Remotes, concerts, lectures... anywhere you need to support a speaker; these stands are the Ultimate. We can only show our best sellers here; call for info on mic stands, speaker stands, lighting support, and more. Ultimate products carry a lifetime warranty. Let us send you an Ultimate catalog. Ultimate TS-80T can be varied in height from 3'6” to 6’8”, and will support up to 110 lbs. Bag included.

Ultimate TS-80T can be varied in height from 3’6” to 6’8”, and will support up to 110 lbs. Bag included.

Silver 61USTS80T $89.00
Black 61USTS80BT $108.00

Ultimate TS-88T will extend to over 9’ and support 110 pounds, yet it weighs only eight pounds! Bag included.

Silver 61USTS88T $107.00
Black 61USTS88BT $129.00

Accessories:
TAD-138 1-3/8” diameter tripod adapter is used with same sized sockets provided by Community, EV, Toa, and others.
61USTAD138 $11.50

TMB-400K is a unique two part mounting system that consists of a thin plate (screwed to the bottom of the speaker) and a slide-in bracket (attached to the top of the tripod). Mounting screws included.
61USTMB400 $29.00

BMB-200K attaches speakers with built-in threaded inserts spaced 4-3/8” to 6” apart, such as those provided by Ramsa and Bose. Mounting screws not included.
61USMBMB200 $23.00

Ask us about “Telelock” stands for extra-easy and safe load lifting.

CROWN CE SERIES AMPS

Originally designed for theater and cinematic applications, Crown's CE Series amps work exceptionally well in any installation setting. With their extensive protection circuitry, long-term reliability, easy to access front panel controls, great sound reproduction, and unique open-architecture design (so you can add inexpensive, customized plug-in modules such as the SST-Stereo Crossover), these amps are professional powerhouses that do it all. They even come with a 3-year warranty and comprehensive technical support to back them up. What else would you expect from Crown?

See Power Amp Comparison Chart on page 86 for specs.

CROWN K2 SERIES AMPS

No fan! No Noise! 2,500 Watts! Need we say more? The Crown K2 offers revolutionary technology that delivers more power (2500 watts) and more sound while consuming less energy than any other amplifier. The K2 uses new patent-pending Balanced Current Amplifier (BCA™) to give you massive amounts of power while generating virtually no heat.

The K2 is so thermally efficient, it generates just one-tenth the heat of conventional amplifiers eliminating the need for a fan. Lower operating temperatures put less stress on the components, and the fan-free, sealed chassis virtually eliminates problems caused by dust, high humidity and other environmental factors. See Power Amp Comparison Chart on page 86 for specs.

CROWN D-75A & D-45 POWER AMPS

This is the model that pros all over the world specify by name. Rugged, easy to install, and reliable. The D-75A feeds 40 watts into 8 ohms, 55 into 4 ohms. It has detented level controls for each channel, headphone jack, barrier block outputs, and balanced combo XLR and 1/4” inputs, all in a single rack space. A distortion indicator alerts you in the unlikely event that distortion of any kind exceeds 0.05%.

The D-45 is a smaller amp, rated at 25 watts into 8 ohms, 35 into 4. It's identical to the D-75A except in power and price, and is suited to broadcast and recording nearfield monitoring, headphone amps, and small paging systems. See Power Amp Comparison Chart on page 86 for specs.

HAFLER P-1000

The P-1000 brings the quality of Hafler’s larger amps to a popular lower price and power range.

Conservatively rated at 50 watts per channel into 8 ohms and 55 into 4, the amp has both balanced XLR and 1/4", and unbalanced RCA inputs. Outputs are barrier strip. “Trans-ana” design results in very stable, linear operation. The front panel has a power switch, a normal/bridged mono switch, level controls, headphone jack, and LED’s for clip, thermal, and signal; the rear panel has a chassis/float ground switch and a balanced/unbalanced 115V/230V power line selector.

Expect response of +/-0.1dB from 20Hz to 20kHz, and +01-3dB from 0.1Hz to 100kHz (can you hear that high?). Convection cooling assures quiet operation. The warranty is five years. See Power Amp Comparison Chart on page 86 for specs.

P-1000 60HFP1000 MFR LIST $569.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

HAFLER P-1500 AMPLIFIER

Suitable for studio monitoring and touring sound, the P-1500 uses patented “Trans-nova” topology (for “transconductance nodal voltage amplifier”) to produce a fine sound.

Features include 1dB gain controls with anti-tamper caps, XLR and 1/4” balanced inputs, binding post outputs, electronic fuse, lateral MOSFET output devices, two-channel or bridged mono output, and quiet convection-cooled design. LED indicators allow monitoring each channel. Other indicators include thermal, short, clip, and signal. The P-1500 is rated at 75 watts per channel into 8 ohms, 85 into 4. This is a two-space rackable amp with a five-year warranty. See Power Amp Comparison Chart on page 86 for specs.

CALL 1-800-732-7665 FOR BRADLEY PRICE

SYMETRIX 420 POWER AMPLIFIER

Wipe out powering problems without wiping out your budget. Hook up the 420 to studio monitors, nearfields, and multiple pairs of headphones. It’s a handy two-channel amp, with XLR inputs paralleled with TRS 1/4" jacks, and screw terminal outputs. The 420 will drive up to 20 watts per channel stereo into a 4 or 8 ohm load, or 40 watts mono bridged. Typical distortion is less than 0.04%.

The mono sum feature lets you check compatibility of signals, or mix paging and music for commercial installations. Front controls include gangable level knobs, headphone jack with defeatable speaker mute, clip LEDs, and power switch. See Power Amp Comparison Chart on page 86 for specs.

420 60SY420 MFR LIST $429.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

TASCAM PA-20 MKII

With its dual power, switchable stereo/mono design, this amp excels in control room and recording booth situations, running single, paired, or bridged speakers. It’s equipped with both XLR balanced and RCA unbalanced inputs, optimized for +4dBm and -10dBV. It pumps 25 watts per side into 4 ohms stereo; throw a switch and you have 50W bridge in 8 ohms. Bright LEDs tell you when the protection circuits are engaged so you can identify problems. See Power Amp Comparison Chart on page 86 for specs.

Installed Sound

It has become quite obvious to us at Bradley that many of our customers are doing their own installations. We decided to try and make your job a little easier by adding our new "Installed Sound" section to our catalog. These are by no means all the products available when doing installed sound, just a sampling of some of our favorites. Don't see what you need? Call your favorite Bradley Professional to help you put the system together that's right for you. Look for the Installed Sound logo throughout the catalog.

TOA CEILING MOUNT SPEAKERS

The F101C-101CM High Ceiling Speaker and the F121C-121CM Uniform Directivity Ceiling Speaker from TOA provide extensive sound coverage for a variety of sound applications.

The F101C-101CM is designed to provide full-range sound in areas with high ceiling at a low cost while the F121C-121CM provides high sound quality for low ceiling mounted speaker installations while requiring fewer units. Features common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage, common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage, common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage, common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage, common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage, common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage, common to both models is built-in circuitry that automatically activates to alleviate low/mid range frequency input damage.

The F121C-121CM speaker is designed to provide a much wider dispersion angle than standard ceiling speakers. It is equipped with a specially designed sound diffuser, housed in a mesh cone or any hard surface using the triangle bracket. The speaker can be ordered with three eyebolts for easy hanging, or the speaker can be mounted flush on a ceiling, wall or any hard surface using the triangle bracket. The speaker wire extends out behind the reflector for easy hook-up to the sound system or to a custom universal transformer.

Choose from three different methods for mounting the Model 110A, a special hanging kit, secured to a hard ceiling or wall using the mounting bracket or connected to the tee-bar of a drop ceiling with special clips and a mounting bracket. The speaker wire extends out behind the reflector for easy hook-up to the sound system or to a custom universal transformer.

There are two easy methods for mounting the Model 2212-1. The speaker can be ordered with three eyebolts for easy hanging, or the speaker can be mounted flush on a ceiling, wall or any hard surface using the triangle bracket. The speaker accepts a 1/4" phone plug for easy connection to the sound system. Other models available.

TOA DX-0808 8 X 8 MATRIX

This is an 8 x 8 digitally controlled, analog matrix for routing, distribution, level control and mixing of audio signals. Input and output channels are expandable, when using up to four units. (Example: 16 in/8 bus/16 out using two units). Any input or combination of inputs can be mixed and routed to any output or combination of outputs. Each unit, or system comprised of up to 30 units, is digitally controlled using a graphic PC interface. The software allows easy access, changes to the matrix configuration, and includes off-line editing and data file storage of setups. Mix bus assignments and level settings can also be stored in and recalled from 16 non-volatile memories in individual units. Security features are included to prevent unauthorized changes to stored parameters.

SONIC SYSTEMS SOUNDSPHERE 110A AND 2212-1

Soundsphere loudspeakers are recognized problem solvers for difficult mounting surfaces and highly reverberant environments. The Model 110A and 2212-1 are the ideal choice for distributed public address systems including background and foreground music. These loudspeakers are acclaimed for crisp voice announcements in shopping malls, racetracks, courtrooms, airports, restaurants and small churches.

Sound is directed by the symmetrical reflector in a smooth circular pattern assuring wide, even coverage over 360° in the horizontal plane and over 180° in the vertical plane. This permits desired sound levels to be reached with less amplifier power than conventional sound systems, resulting in savings to the installer. Because of the extremely wide coverage, fewer speakers are needed for all installations, resulting in savings to the customer.

Choose from three different methods for mounting the Model 110A, a special hanging kit, secured to a hard ceiling or wall using the mounting bracket or connected to the tee-bar of a drop ceiling with special clips and a mounting bracket. The speaker wire extends out behind the reflector for easy hook-up to the sound system or to a custom universal transformer.

There are two easy methods for mounting the Model 2212-1. The speaker can be ordered with three eyebolts for easy hanging, or the speaker can be mounted flush on a ceiling, wall or any hard surface using the triangle bracket. The speaker accepts a 1/4" phone plug for easy connection to the sound system. Other models available.

TOA M-1264 10 IN X 6 OUT RACK MOUNT STEREO MIXER

This is a true stereo mixer with two remotely controllable motorized stereo output controls. The M-1264 provides five independent mono mixes, L+R mono-summed output and cue output for pre-listening to inputs. A built-in compressor and switchable high-pass filter are provided for mic/line inputs to prevent mixer overloads. Phantom power for condenser microphones is included on each mic/line input. Security cover and rack mount ears included.

JBL CONTROL CONTRACTOR SERIES INDOOR/OUTDOOR SPEAKERS

This series of speakers provide for superior audio reproduction in a variety of indoor and outdoor applications where foreground/background music and paging are required. Common to all six speakers is the InvisiBall mounting hardware (included), making short work of permanent installation and adjustment. This mount provides 37 degrees of vertical and 44 degrees of horizontal rotation, with adjustments made from a hidden access point on the front of the speaker. All models readily accept a variety of paints and finishes. Each model is available in black or white, and in 8 ohm or 70 volt line configurations. The Control 23 handles up to 50 watts program power; the Control 25, up to 150 watts, and the Control 28, 175 watts. Sold in pairs.

RANE SRM 66 PROGRAMMABLE SPLITTER / ROUTER / MIXER

The SRM 66 provides a cost-effective solution for systems requiring any combination of zone distribution, room combining, and remote level control. Split, route, and mix functions are implemented with a six input, six output matrix mixer.

Control consists of a backlit LCD, five buttons and a data wheel. All programming is accomplished using 10 easily accessible edit pages. Six pages control output programming, three for Control Group programming and one for Memory functions. The SRM 66 allows independent routing and mix-level adjustment of any input to any output. Each output may have a unique programmable mix of the six inputs. Settings may be copied and pasted between outputs.

Inputs and outputs are balanced and equipped with Euroblock connectors. Rear panel gain switches on each input and output allow -10 dBV or +4 dBu sensitivity settings. Front panel Mix Input Headroom LEDs indicate the remaining headroom for each of the six inputs at 4 dB and 16 dB. Programable Limiters on each output prevent mixer overload. Limit Threshold is adjustable from maximum to -28 dBu for each output. If output level exceeds the Limit Threshold, all six mix levels for the given output are reduced.

The optional DSC 1 accessory provides a bridge to connect a PC's RS-232 port and the RIP (Remote Interface Port) used in the SRM 66. Coupled with the included SRM Exchange software, the DSC 1 allows an exchange of settings between an SRM 66 and the PC. Once the settings are obtained by the PC they can be manipulated, stored in a file, printed for future reference or sent to another SRM 66.

ROLAND AR-100 ANNOUNCEMENT RECORDER

The Roland AR-100 Announcement Recorder is a half rack digital recorder-player perfect for any application requiring pre-recorded announcements. Audio is recorded on a built-in PCMIA card with no moving parts for reliable, maintenance free operation. Theme parks, museums and music delivery systems are just a few of the applications that would benefit from the AR-100. Three recording modes are available: stereo, mono or independent dual mono. Need to change your announcement? Recording can be accomplished by remote control.

**BI-AMP SYSTEM ONE MODULAR MIXING SYSTEM**

SYSTEM ONE is an extremely flexible, high-performance mixing system consisting of several functional modules. These modules can easily be combined in a variety of system configurations, tailored for specific applications. Modules may be used together, alone, or with other audio products, in a wide range of applications including churches, courthouses, boardrooms, teleconferencing, legislatures, city council chambers, hotels, and restaurants. From a single 8-channel mixer... to an automatic mixer with unlimited inputs, channel priority, logic outputs, remote control, 3-band EQ, and multiple auxiliary outputs... SYSTEM ONE is a creative and powerful tool.

### ONE 8-CHANNEL MIC/LINE MIXER
- 8 Channel ‘page-over’ muting (via channel 1-7 jumpers)
- Notch filters, tone controls, and rumble filter at main output

**MFR LIST**
- **ONE 60BONE**
- **$555.00**

**CALL**
- 1-800-732-7665 FOR BRADLEY PRICE

### DMD 4-CHANNEL DEVICE MATCHING DRIVER
- Provides balanced 'direct' outputs from ONE & EX mixers
- May be used with other mixers or any line-level signals

**MFR LIST**
- **DMD 60BIDMD**
- **$259.00**

**CALL**
- 1-800-732-7665 FOR BRADLEY PRICE

### RC II 4-CHANNEL VCA REMOTE CONTROL
- Provides remote level & mute control of ONE & EX mixers
- May be used with other mixers or any line-level signals
- Internal jumpers sum any or all inputs to the fourth output.

**MFR LIST**
- **RC II 60BIRCII**
- **$314.00**

**CALL**
- 1-800-732-7665 FOR BRADLEY PRICE

### EX 8-CHANNEL MIC/LINE EXPANDER
- ONE & EX mixer ‘stacking’ for limitless input capability
- Electronically balanced inputs and output on XLR jacks
- +12V phantom power jumper per channel (+48V option)

**MFR LIST**
- **EX 60BIEX**
- **$485.00**

**CALL**
- 1-800-732-7665 FOR BRADLEY PRICE

### DRC 44 PROGRAMMABLE VCA REMOTE CONTROL
- Provides remote level & mute control of ONE & EX mixers
- May be used with other mixers or any line-level signals
- Remote control via infrared, wall-mount, and/or computer
- Presets, logic outputs, and combined control with RC II.

**MFR LIST**
- **DRC 60BIDRC44**
- **$485.00**

**CALL**
- 1-800-732-7665 FOR BRADLEY PRICE

### AG II 8-CHANNEL AUTOMATIC GATE
- Provides automatic mixer functions to ONE & EX mixers
- May be used with other mixers or any line-level signals
- Priority switch and ‘gate active’ indicator for each channel
- Logic outputs from channels for relay/speaker switching

**MFR LIST**
- **AG II 60BIIAGII**
- **$485.00**

**CALL**
- 1-800-732-7665 FOR BRADLEY PRICE

### AM 8-CHANNEL/3-SEND AUXILIARY MIXER
- Provides auxiliary send mix matrix from ONE & EX mixers
- Balanced outputs with level, peak indicator, & XLR jacks
- Expansion jacks allow increased input/output capability.

**MFR LIST**
- **AM 60BIAM**
- **$419.00**

**INSTALLATION SOUNDS**

---

**MONITORING**

---
The Rane MLM 82 is an eight-input, two balanced output mic/line mixer. It is a versatile mixer, fitting well into any installation requiring ease of use and compact size. The MLM 82 is perfect for churches, conference rooms, schools and rental sound systems. The studio-grade specifications of the MLM 82 allow for use in many other applications from submixing to post-production.

Inputs 1-4 are mic/line level switchable and inputs 5-8 accommodate up to four stereo or mono line level sources. Inputs 1-4 are balanced XLR connectors for use with microphone or line level sources and split equally to both outputs. Mic phantom power is provided by a switch on the rear of the unit and recessed front panel switches, with LED indicators, convert each of these inputs to line level. Phantom power is removed from the input whenever LINE is selected.

For the end user who only needs to control volume levels, simplicity makes the MLM 82 the mixer of choice.

The CP 31 is a single-page commercial preamplifier for the small restaurant, lounge, retail boutique, or small office or manufacturing facility. System designers now have three choices in Commercial Processors from Rane to fulfill their paging needs - the CP 31 and its bigger brothers the CP 52 & CP 64.

The CP31 provides Page Ducking for its single stereo Program Input. One stereo or two completely independent mono Zones are served. The Page signal can be independently assigned to either of the two mono outputs, to Off (no Zones) or Both Zones for stereo or dual-mono zone applications.

The CP 31 is the least complex and least expensive of Rane’s Paging products, which include the CP52 and CP64. The CP31 is also perfect for zone expansion of Rane CP-based systems. Simply connect the CP52 or CP64 Page or Program Expand outputs to a CP31 for an extra Zone, set with its own page, program, both or neither.

- Mic/Line Selection with Gain Trim
- High and Low Cut Filter Switch
- Adjustable Detector Threshold with Active LED
- Paging Level Control
- Level Control
- 1 of 4 Program Select
- Ducking On/Off with Depth Control
- Page Initiated Program Ducking
- Page/Program Expansion with Level Control
- UL/CSA Remote Power Supply (120 VAC)

The two-channel AES/EBU meter

With digital equipment all around you, monitoring those levels is more and more important. Dorrough's 880/890 series now offers two-channel, AES/EBU-reading audio meters with over-indication and selectable peak hold. They conform to AES 3 1992.

The 280 series is horizontal, the 380 is vertical. Analog versions are also available.

Among the most popular analog Dorrough meters is the Model 40-A2. It has a scale allowing 14dB of headroom in 1dB steps. It's a stand-alone unit with internal power supply. All 40A2 meters include peak hold. For dual (stereo) metering, use two meters and a dual rack kit. Call us for straight line versions.

The display of both peak and average is the trademark of Dorrough's award-winning meters, allowing your operators to make better judgments about your audio.

280-D (40dB) 60DR280D MFR LIST $850.00
280-E (60dB) 60DR280E MFR LIST $850.00
380-D (40dB) 60DR380D MFR LIST $850.00
380-E (60dB) 60DR380E MFR LIST $850.00
40-A2 60DR40A2 MFR LIST $475.00

Rack mount kit for 280 Series, specify single, dual, or triple 60DR280RMX MFR LIST $45.00
Rack mount kit for 40A/40AP, specify single or dual 60DR40XX MFR LIST $45.00

The display of both peak and average is the trademark of Dorrough’s award-winning meters, allowing your operators to make better judgments about your audio.

1200 60DR1200 MFR LIST $1,650.00

Here’s the solution to balance your stereo lines, an easy to operate gain set. The 1200 is a stereo signal test device for measurement of balance, level, crosstalk, and S/N over the dynamic range of the system from noise floor to clipping. Use it for L/R polarity and phase compatibility testing in mono and stereo. Rack mountable.

1200 60DR1200 MFR LIST $1,650.00

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web: http://www.bradleybroadcast.com
METERING, TUNERS, AND SYSTEM MONITORING

LOGITEK BRIGHT VU

Logitek improves their economical VU's with an expanded bargraph that can handle a range of 53dB, digital DSP for extra precision, XLR input connectors, internal multivoltage power supply, and a choice of digital or analog inputs.

The multicolor displays show VU and PPM simultaneously. VU is a solid bar, peak a single dot. Accuracy is ±0.1dB. Analog sensitivity is adjustable -10 to +24dBU for full scale. Digital models accept AES/EBU and S/PDIF, and have a loop-through for installation convenience.

Available in complete, rack mounting sets that are one rack space high, or as desktop meters. (Also ask about Ultra-VU, with dual analog/digital inputs, high-res “zoom” mode, stereo image/phase emphasis, and sample rate indication.)

Specify analog or digital.

- Single stereo meter, desktop 60LTDTX MFR LIST $470.00
- Single stereo meter, rack mount 60LTBDTX MFR LIST $560.00
- Dual stereo meter, rack mount 60LTBV4X MFR LIST $795.50
- Triple stereo meter, rack mount 60LTBV6X MFR LIST $995.50

CALL 1-800-732-7665 FOR BRADLEY PRICE

LOGITEK VU METERS

Mechanical VU meters have been the industry standard for years; in loudness measuring applications they are hard to beat. The Logitek 4VUB supplies four large, accurate, mechanical VU response meters in a 2RU self-powered box. For smaller applications, the 2VUB provides two meters centered in a 2RU enclosure. Each meter has a balanced, bridging, high impedance input and a rear panel zero adjustment control.

A phase button, for each pair of meters places left plus right on the left meter and left minus right on the right meter. Comparing these two readings gives a quick check for correct phasing. Meter lights and an integral label strip add to the usefulness of these handy units.

4VUB 60L4VUB MFR LIST $790.00
2VUB 60L2VUB MFR LIST $525.00

ROLLS RS78B AND RS79 TUNERS

The ROLLS tuners are single rack space digital PLL synthesized AM/FM tuners with large LCD Displays with auto search that store up to 16 FM and 8 AM presets. All settings are saved from power outages for up to 4 days. Need signal meter, headphone out, XLR out? Choose the RS79.

AM/FM Tuner 61RLRS78B $247.00
Tuner with XLR's, Headphone out, 3yr. Memory 61RLRS79 $298.00

DENON AM/FM TUNER WITH RDS

Denon’s tuner has superb audio and the added features of RDS, including program service name (call letters or slogan), program type, radio text, and traffic program ID. The unit can also tune to the type of format you wish to hear. Other features include 40 station presets, auto FM presets, character input to title your presets, RF attenuator, and low impedance output. An AM loop antenna is included.

TU-1500 60DETU1500RDP MFR LIST $379.00

TECHNICS AM/FM RECEIVERS

You can get a sweet-sounding radio receiver without spending a whole lot of money. The SA-EX110 provides 100 watts per channel, and specs out at 40-20kHz, 8 ohms, and 0.8% THD. Class H+ amplifier circuitry gives you high power output with outstanding dynamic headroom. Features include 30-station FM/AM random access presets, four audio inputs plus one for VCR audio, quartz-synthesized digital tuning, and a motor-driven volume knob that's controllable by the 31-key wireless remote.

The SA-AK910 ups your power to 120 watts, adds home theater modes, and includes Dolby Pro Logic Surround, sub-woofer signal output, and other performance features. Four audio and two video inputs.

SA-EX110 60TCSAX110 MFR LIST $199.95

**SYSTEM MONITORING/POWERED MONITORS**

**BROADCAST TOOLS**

**SMART SILENCE MONITOR**

This circuit card monitors any stereo or monaural audio source, including mod monitors, tuners, and automation systems. Set the time-out from two seconds to 8-1/2 minutes with dip switches. One relay is latched for the duration of the audio loss, the other until reset is activated.

Silence Monitor 60BTSIL  MFR LIST $199.00

Rack Kit 60BTRM2  MFR LIST $49.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

**GENTNER SILENCE SENSOR**

Silence Sensor is ideal as a failsafe device when using a dial-up transmitter remote control. On detecting silence, this unit activates an open collector output (capable of sinking 250mA, 48VDC, noninductive). Simultaneously it starts a timer. At the end of the time period, a second open collector output and a relay closure are also activated. Use the first output for an alarm, and the second output for a second, louder alarm while the relay closure starts a backup tape machine. The timer’s period is adjustable over a range of 0 to 99 seconds and then up to 99 minutes in one-minute increments.

Silence Sensor 60GESS  MFR LIST $569.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

**FURMAN VU-40**

**STEREO SYSTEM MONITOR**

Furman’s monitor is an inexpensive dual meter that can keep watch on either line levels or amp power outputs. The scales are set with a positive action, resettable switch matrix on the rear. It has two independent channels with familiar VU meter scales coded in three colors, and lets you switch for peak or average response. Each channel has a line level/power out switch; line level is settable for -10, zero, or +4dBu. Also includes ground lift switch and sixteen power-out choices from 20 to 1260 watts; it also accommodates 25V and 70.7V lines. The “B” version adds XLR balanced I/O.

VU-40 60FUVI40  MFR LIST $249.00

VU-40B 60FUVI40B  MFR LIST $299.00

**WOHLER POWERED**

**STEREO MONITORS**

A reviewer writing in “Radio World” said Wohler’s design “reminds me of those rare pieces that are almost overdesigned to prevent obsolescence.” We agree: these monitors sound great and will last a long time.

Wohler’s rackable, powered stereo monitors are shielded for installation in TV stations, mobile trucks, flyaway systems, and many other specialty environments. The AMP-1A has response from 100Hz to above 10kHz, at levels loud enough for a busy studio. Mids and highs are reproduced through the left and right speakers, while lows are combined in the center.

For extended response and even more volume, the two rack unit AMP-2 is your choice. It includes LED level meters with VU or PPM ballistics, and visual phase/polarity indication.

Models not already so equipped can be ordered with input switching, phase/polarity indicators, three-state level indications (off, on, over range), surround sound, output volume adjust, headphone output, and more.

AMP-1A 60WOAMP1A  MFR LIST $715.00

AMP-2 60WOAMP2  MFR LIST $1,095.00

Options: Digi-1 option card allows these models to receive input signals in the AES/EBU or SP/SPDIF digital audio formats. Format and sampling rate are sensed automatically. This version replaces the monitor’s analog inputs; call for other configurations.

DIGI 1 60WODIGI1  MFR LIST $485.00

POWERED & UNPOWERED MONITORS

MACKIE HR824
POWERED MONITORS

Turning their considerable attention to creating exceptional active monitors, Mackie has done it again. Just as with their mixers, far more forethought and features have gone into these monitors than is reflected in their affordable price. These make the perfect complement to any Mackie mixer in a studio setting.

HR824  60MDHR824  $749.00

- Built-in FR Series bi-amplification: one high-frequency amp (rated at 100 watts continuous/150 watts peak) and one low-frequency amp (rated at 150 watts/200 watts peak)
- 8.75” woofer and 1” alloy-dome tweeter, both with extra-smooth response and featuring a logarithmic taper waveguide
- 3-position Acoustic Space Control
- Low-frequency roll-off switch
- Auto turn-on feature
- Each set comes as a matched pair for accuracy
- Vertical, downward facing input panel (for flush-mounting speakers) with balanced and unbalanced XLR and 1/4” TRS jacks

JBL 4200 SERIES
STUDIO MONITORS

With their curved baffles and sparkling clear audio, these speakers bring a new look and sound to console-top, near field monitoring. The Multi-Radial baffle optimizes stereo imaging between three and five feet from the speakers. Both the 1” titanium high frequency transducer and low frequency components are shielded for use near video monitors and other sensitive equipment. Woofers are 6-1/2” on the 4206 and 8” on the 4208. The enclosures are covered with gray vinyl and the front baffles are injected molded polypropylene.

4206  60JB4206  MFR LIST  $204.00 ea.
4208  60JB4208  MFR LIST  $268.00 ea.

Also available:
JBL is out with a powered near-field reference monitor, the 6208. It’s a 50x50 watt bi-amplified monitor that looks like a 4208 and accepts -10 or +4, balanced or unbalanced audio.

6208  60JB6208  MFR LIST  $499.00 ea.

AURATONE SPEAKERS

Updated for 1998, the Auratone speaker line now features four products for your nearfield and rack monitoring needs. The USC is the Ultra Sound Cube, successor to the popular 5PSC series. It is now available with perforated metal grille (PMG), removable fabric grille (RFG), or standard with no grille (STD). It features a rear port for improved bass response. All Auratone systems now have improved shielding for use near video monitors. The R3C, which is a three-speaker, individual-input, rack mounting speaker system comes in any of the three grille options. The TSC two way sound cube features a 4” woofer and dome tweeter, producing wider frequency response. The RT4 is a rack mount version of the TSC, with one speaker system (two-way) in a rack-mount enclosure.

AURATONE RT4-PMG  60AART4PMG  $160.00 ea.
AURATONE RT4-STD  60AART4STD  $155.00 ea.

JBL CONTROL SERIES MONITORS

1. CONTROL ONE

The Control One is a small two-way system suited to broadcast and video work. It’s made of molded polypropylene. High power handling capacity (150W, pink noise), excellent audio (120Hz to 20kHz, ±3dB), and shielding make it suitable for critical monitoring. Size: 9-1/4 x 6-1/4 x 5-5/8”.

Control One  60JBCNTRL1  MFR LIST  $305.00 pair

2. CONTROL FIVE

The spirit and quality audio of James B. Lansing live on in this best selling compact monitor. The Control Five will handle up to 175W and provides 75-20kHz response. The system has a titanium dome tweeter and a 6-1/2” woofer. The dividing network uses protection circuitry against dangerous overloads. High quality components give excellent transient response. Mount with Omnimount 75 series or in a rack with MTC-53 hardware.

Control Five  60JBCNTRL5  MFR LIST  $518.00 pair

Accessory: MTC-2+ This Universal Mount with ball joint holds a single Control One or Control One Plus monitor on the wall or ceiling and lets you aim it.

JBL MONITOR SPEAKERS

Proven JBL performance! The 4408A is a two way, 8” woofer system ideal for broadcast and general monitoring applications.

The 4410A is a powerful three way, 10” woofer studio monitor that gives exceptional spatial detail because of its vertical, in-line driver array.

The 4412A is a three way, 12” woofer studio monitor that has superior efficiency, greater power handling capacity, and extended bandwidth.

Power ratings with pink noise are 100, 125, and 150 watts, respectively. All provide at least 50Hz to 20kHz response, ±2dB.

Price shown is per speaker. Add R or L to part number to specify Right or Left when ordering.

JBL LSR32 REFERENCE STUDIO MONITOR

The LSR32 Linear Spatial Reference Studio Monitor combines JBL's latest in transducer and system technology with recent breakthroughs in psycho-acoustic research to provide a more accurate studio reference. Instead of focusing on a simple measure such as on-axis frequency response, LSR designs require much better control over dispersion via transducer selection and crossover frequency design. Critical decisions of image placement, EQ, balance and timbre are typically made within +/- 15° vertically and +/- 30° horizontally. This workspace is where the engineer, producer and artist make critical mixing decisions and this is the area that LSR is optimized for superb in room response. By incorporating LSR into the system design requirements, a more stable image is maintained and off-axis coloration is minimized. The end result is a monitor with more accurate reproduction capability, with less critical monitor placement requirements.

LSR32 60JBLSR32 MFR LIST $999.00

TANNOY REVEAL SERIES

Tannoy Professional announces Reveal, a distinctive playback monitor that provides Tannoy's unrivaled sonic excellence at a budget price level. A two-way discrete system, Reveal provides extremely detailed, dynamic sound with a wide, flat frequency response, essential for monitoring with reliable accuracy. Reveal is ideal for nearfield monitoring in project studios, mobiles, broadcast, audio post and AV applications. Reveal's characteristic front panel is not just for show. Its curved baffle has been precisely designed to minimize diffraction. At 40mm thick, this panel provides a massive non-resonant mounting platform for the drive units. A 25mm soft dome tweeter is matched with a 165mm long throw bass unit using a hard-wired, low-loss crossover. Both drivers are magnetically shielded, allowing operation close to video monitors.

DIGITAL AUDIO FOR THE WORLD!

SAMPLITUDE
Record and edit your music on up to 999 tracks with unlimited multiple inputs and outputs. Mix down using the real time mixer, 3 stage parametric EQ, dynamics section, delay, room simulator and more. Master your audio and burn a CD.

PRODIGI 24
Full duplex digital sound card with AES/EBU, S/PDIF and optical connections. 16 to 24-bit audio resolution and 48 kHz sampling rate. 18-bit stereo analog line/headphone output. Great card for digital mastering and perfect for Red Roaster 24-bit!

PRODIGI GOLD & PRODIGI 32
Prodigi Gold: Alesis ADAT™ 8-channel digital card, full duplex, S/PDIF on RCA's Plug-n-Play PCI. Win '95, NT driver.
Prodigi 32: Stereo digital PCI card with optical 16/24 I/O, S/PDIF on RCA's, Unbalanced AES/EBU. Mac, '95, NT driver.

SEK'D 2496 ADDA CONVERTERS
For the ultimate in high resolution audio the new 2496 ADDA S and the 2496 ADDA DSP converters give engineers the ultimate in high resolution digital/analog analog/digital conversion. The S model rewards its user with a dynamic range 110 dB. The DSP model performs at an astounding 128 dB level! For the best in digital audio conversion, SEK'D 2496 ADDA S and DSP are world leaders.

RED ROASTER
Create true audio CD masters for your fans and mass duplication. Freely place track markers between songs or on live recordings. Only Red Roaster allows you to arrange your audio master piece on multiple tracks.

RED ROASTER

ARC44 SOUND CARD
Plug your guitar, keyboard or mic into the 4 solid 1/4" jacks of the ARC 44. Record and playback 4 tracks simultaneously. Input monitor, hardware resampling, double decker mode for 8 I/O.

ANALOG ARC88
PCI studio recording card with 8 analog In/Out and digital stereo In/Out. Place up to 3 cards in your PC for 24 channels. Connect via convenient break out cable with 16 female RCA plugs. Full duplex record while play and input monitoring. Connect digital devices via optical stereo I/O with 16 to 24 bit resolution.

O2R VISUALIZER
Control your Yamaha™ O2R from a PC with the Visualizer. Imagine the O2R displayed as an analog console with all the knobs where you expect them to be. Edit and store your Automix and add 16 new valuable features. Connect from O2R host connector to serial port of your PC via provided cable.

Direct Box Problem Solvers

DB25 MATCHBOX $35.00
The DB25 takes a high impedance signal to low impedance via shielded transformer balancing.
- Converts high-impedance to low-impedance & vice-versa
- Ground Lift for "hum" reduction
- Attenuator switch for connection to line level or speaker level signals
- May be ordered with male or female XLR jacks

ADB2 ACTIVE DIRECT BOX $50.00
The ADB2 is an active direct box with superior frequency response suitable for recording applications.
- Uses standard 12 to 48 volt phantom power
- Ground Lift for "hum" reduction
- Attenuator switch for connection to line level or speaker level signals

SE162 RED SQUARE $80.00
The SE162 is an electronically balanced direct box with the added benefit of a sonic exciter. The exciter gives your sound more life and animation.
- DI Box / Sonic Exciter
- Adds clarity and presence to any signal
- Bottom and Definition controls
- XLR and 1/4" Outputs

DB14 DIRECTOR $70.00
The DB14 is a specialty direct box that takes two RCA inputs, gives them separate volume controls, and outputs them via the two RCA output jacks and a transformer balanced XLR jack.
- Stereo Patch / Direct Box
  - Separate control for A source and B source
  - Lo Z out for connection to a mixing board, mixes A and B together
  - May be ordered with male or female XLR jack

Phantom Power Problem Solvers

PB23 & PB223 PHANTOM POWER ADAPTER
PB23: $60.00  PB223: $75.00
Condenser microphones require clean, efficient power. The PB23 and PB223 provide just that. They both offer a dc loop through jack for powering another identical unit.
- Powers most any condenser microphone
- +12 or +48 VDC power available
- High-frequency power supply
- PB223 has two adapters in one box

PB24 PHANTOM POWER PLUS $90.00
The PB24, battery powered phantom power adapter delivers all the clean transparent power needed for any condenser microphone.
- Battery or AC powered
- Powers any condenser microphone
- +12 or +48 VDC power available
- High-frequency power supply
Mixer Problem Solvers

**MX41MIXER**  
$35.00  
The MX41 is a passive resistance mixer that will accept up to four signals. It may also work in reverse, sending out up to four signals.

- 4 Input to 1 Output
- 1/4" Hi Z Jacks
- 100K Ohm Pots

**MX44 MINI-MIX IV**  
$75.00  
The MX44 mixes line or instrument level signals with enough power to drive long lines or even headphones.

- 1/4" unbalanced inputs and output
- For line and instrument level signals
- Output will drive headphones
- Battery included

**MX22 2 CHANNEL MIXER**  
$50.00  
The MX22 will mix a 1/4" line-level signal such as a wireless microphone, with an RCA signal such as a cassette or CD player. This makes the MX22 perfect for aerobics studios, schools, churches, etc.

- Mixes 1/4" line level signals and stereo RCA signals to a mono output.
- Individual controls for each signal

**MX28 MINI-MIX VI**  
$100.00  
The MX28 is for mixing up to three stereo line signals. Any keyboardist that does not want to carry around a bulky rack mixer will find the MX28 the lightweight answer.

- Mixes 3 stereo signals
- True stereo right and left 1/4" outputs

**MX51 MINI-MIX 2**  
$80.00  
The MX51 mixes two 1/4" signals with up to three stereo RCA signals. The signals are mixed to mono and output via two RCA jacks or a 1/4" jack on the front panel.

- For mixing up to two 1/4" inputs with up to three RCA input signals
- Four channels total
- Line / Headphone output level

**DU30 Mic Preamp/Audio Ducker**  
$100.00  
The DU30 takes any program material present at the RCA jacks and ducks it under any signal present at the Mic Input.

- Mic Preamp w/phantom power
- Alt in for cascading another unit
- Perfect for restaurants, clubs, shops etc.

Personal Monitor Problem Solvers

**PM50s PERSONAL MONITOR SYSTEM**  
$50.00  
This is the "more me" box. Mix your microphone with a main monitor mix for a perfect monitor mix that you control. The PM50 also works as a line tester.

- Monitors Mic and Monitor signal
- 1/4" Input accepts line and speaker levels
- Mic pass-through for mixer connection

**PM52 HEADPHONE TAP**  
$50.00  
The PM52 allows connection directly to a powered line making it perfect for anyone wanting to replace a wedge monitor with headphones.

- Connects speaker level signal to headphone level
- Mono/Stereo mode
- Power Amp loop through
- No external power or batteries required
MS20 MIC SPLITTER /COMBINER
$50.00
The MS20 takes a low impedance signal such as a microphone, and sends it to two separate XLR outputs. One output is a pass-through, the other is transformer isolated.

- Transformer coupled
- 3: XLR jacks
  1: Female input and 2 Male outputs OR
  1: Male input and 2 Female outputs
- Ground Lift

VP29 PHONO PREAMP
$76.00
The VP29 is used to amplify an RIAA equalized signal from a turntable to line level and standard equalization.

- RIAA eq
- RCA inputs/outputs
- 1/4” TRS output
- Adapter included in U.S. models

CT1 CABLE DETECTIVE
$60.00
Find those pesky problem cables quickly with this little spy. No musician or audio professional should be without a CT1.

- Tests 1/4”, RCA and XLR cables
- Tests combinations of the above
- Easy-to-read LED indication

HA43 HEADPHONE MIXER
$100.00
A single in - four output headphone amplifier. Connect it to the headphone out of any mixer and up to four people can listen at once.

- Single input, four output headphone amplifier
- Slider volume controls
- Full frequency response
- Lots of output level - it’s loud

MP13 MINI-MIC PREAMP
$90.00
The MP13 is a compact and easy way to get a microphone up to line level. A board room or small announcement system is one of many ideal places for this single channel microphone preamp.

- XLR and 1/4” Inputs and Outputs
- +30 V Phantom Power
- AC adapter included
- Clip Indication
- Output will drive headphones

MO2020 TESTOSCILLATOR
$100.00
The MO2020 provides a compact way to get a test signal into any audio device. Having sine and square waves allows you perform tests from frequency response to group delay, and the -10 dB pad gives you mic level for testing more sensitive inputs.

- 1/4” unbalanced sine and square wave outs
- Frequency range from 20Hz to 20kHz
- VCO Input for external frequency control
- AC adapter included in US models

SX21 TINY TWO-WAY CROSSOVER
$100.00
Very often a need arises for a simple one-in, two-out crossover. Bass players, combo bands and small public address systems are just a few applications for the SX21.

- 24 dB / Octave rolloff
- Mono 2-Way crossover
- 100Hz - 5 kHz range
- DC Loop-Thru for multiple-unit use
- Other crossover frequencies available
ELECTRO-VOICE SENTRY MONITORS

This model is a mainstay. The Sentry 100A has an 8" woofer; the 1.5" tweeter handles up to 25 watts input power where most tweeters do about five. For 15 years it has been popular in broadcast and video production. Finished in black with a removable gray grille. Response: 45Hz - 18kHz. The Sentry 100EL is a 50W powered version, with XLR balanced and 1/4" phone unbalanced inputs.

OMNIMOUNT UNIVERSAL MOUNTING SYSTEMS

Hanging a load on a wall or ceiling is serious business. Choose Omnimount to do the job right. The ball and clamp assembly enables full movement. Wiring can be hidden for a dressed installation.

For tiny loads up to five pounds, choose the 25-WBX, suitable for nearfield monitors on racks or walls. The 50 series holds up to 15 pounds, the 75 series is rated for 25 pounds, and the 100 series will hold 55 pounds.

The WB-BC bottom mount has a double bend tube to hold the speaker from its bottom. The WA-BC is of similar design, but has a single bend tube to hold the device from the rear. Also available is the CA-MP ceiling mount, several other configurations, and series with greater load handling. Call us to pick the right model.

60EE1DT48 $269.00

SONY MDR-7506 HEADPHONES

Our all-time headphone champ, the MDR-7506 is widely hailed for its exceptional audio and comfort in a headphone that doesn't run into three figures. The clever collapsible design means they're easy to take with you. Audio from the 40mm drivers is crystal clear with 10Hz to 20kHz response. The closed ear design reduces noise and feedback. Gold 1/8" plug with screw-on 1/4" adapter. 36 ohms.

MDR-7506 60SOMDRV6 $89.00

Call Bradley for info on Furman's Headphone Distribution System HDS-6 and HR-6

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web: http://www.bradleybroadcast.com
Your graphic EQ is fine for shaping sound, but if you use it to control feedback, the width of its filters means you may be removing a lot of good stuff too. An FBX-1020Plus or 2020Plus, placed in front of your power amp, senses feedback and, in less than a half-second, places a super-narrow adaptive digital filter on the resonating frequency. It's automatic and ver-very precise.

This will help audio pros anywhere. You get feedback control and increased clarity. At last you can crank up those monitors. Connectors are XLR and 1/4" TRS, balanced and unbalanced. The FBX is a dual mono version with a few extra features thrown in.

The FBX SOLO is a miniature version of the 1020Plus and 2020Plus, controlling feedback on one input channel. Pack one with your wireless mic setup. Monitor engineers can patch one on any offending channel. Mount up to six in a rack tray. The latter has a pre-amp and phantom power.

 reliability Rane EQ's are now improved with balanced XLR and 1/4" TRS connectors. Their filters are constant Q with grounded center-detent controls. The ME-15B is a two-channel, 2/3 octave device in one rack unit; the ME-30B is one-channel, 1/3 octave in one rack unit. Features include overall level control, bypass mode, 20mm sliders, RFI filtering, and ±6 or 12dB slider range.

The ME60 is a two-channel, 1/3 octave EQ with sweepable low and high cut, in a two RU chassis. It's like two ME30's in one unit, with some nice extras. It uses XLR, 1/4" TRS, and RCA jack I/O; sliders are 20mm. Need longer sliders? Ask about the GE60.

The BlueMax from Presonus is a compressor/limiter with a brain. That's what you get with the BlueMax. 15 studio pre-sets and a manual mode give you full control over compression parameters including: variable I/O, attack/release times and ratios from 1:1 to 20:1. Onboard metering shows input/output levels and gain reduction for stereo and mono operations. The BlueMax takes up only 1/2 of a rack space and has an internal power supply eliminating the need for yet another wall wart.
**DBX 166XL DUAL COMPRESSOR/LIMITER/GATE**

A compact, high performance tool with two independent channels, each combining OverEasy® compression, PeakStop, and a soft knee expander gate. The front panel gives you stereo or dual mono operation. Connectors: balanced XLR and unbalanced 1/4" inputs and outputs, IEC AC connector.

Prevent transient peaks from overloading your digital recorder; make an intimate vocal stand out in a music mix; use compression for jingles and post production.

166XL  60DB166  MFR LIST  $419.95

CALL 1-800-732-7665 FOR BRADLEY PRICE

**DBX 1066 DUAL COMPRESSOR/LIMITER/GATE**

It's packed: OverEasy soft knee compression, zero-attack PeakStopPlus limiter, 70dB expander/gate, 12-segment gain reduction meters, over/under LED's, and peak-reading I/O meters. Vary the ratio to select anywhere from gentle downward expansion to gating. Link both channels for stereo compression. Adjust your attack and release times or let the unit do it.

Monitor input or output. You can A/B your audio with or without sidechain processing. Work in the dark thanks to illuminated switches. Use either the balanced XLR or unbalanced 1/4" TRS connectors; convert semi-pro -10dBV audio to the internal +4dBu. Forget "Y" cables; sidechain sends and returns are on separate jacks. The internal supply lets you use this box all over the world.

Each channel has the following controls: expander/gate threshold & ratio, compression threshold & ratio, compression attack & release times, output gain, and limiter threshold.

1066  60DB1066  MFR LIST  $549.95

CALL 1-800-732-7665 FOR BRADLEY PRICE

**ASHLY CLX52E COMP/LIMITER**

Place a ceiling on the peak levels of your program material. The CLX52E lets you set the amount of gain reduction, attack/release times, and output gain. Features include trigger circuit patch, variable threshold, variable ratio from 2:1 to infinity:1, variable attack and release, and LED's to indicate up to 20dB of reduction. The CLX52E provides two channels of gain reduction in one compact package, strapable for stereo.

CLX52E  60ASCLX52  MFR LIST  $499.99

CALL 1-800-732-7665 FOR BRADLEY PRICE

**RANE DC24 DYNAMIC CONTROLLER**

Take advantage of effective split-band processing in a single, affordable box. The DC24 is a two-channel compressor, limiter, expander gate with controls for compression ratio & threshold, expander/gate ratio & threshold, and limiter threshold. Gain reduction meters keep you up to date.

The internal crossover allows a single audio channel to be divided into two bands, processed separately, and re-combined into one channel. This crossover may also serve as a dividing network allowing all processing functions for each band. Connections are XLR and 1/4", with gain switches for -10/4; RFI filtering is built in. Individual channel hard wire bypass switches are also provided.

DC24  60RND24  MFR LIST  $599.00

CALL 1-800-732-7665 FOR BRADLEY PRICE
**SYMETRIX AGC/LEVELERS**

A Symetrix AGC/Leveler is the solution for inconsistent levels. Unlike a compressor/limiter, it not only pushes “down from the top” but also makes your quiet sounds louder, with finesse.

Got a walkaway automation system? Pick the stereo 422 to feed your air chain processing a steady diet. Got loud commercials on your cable TV system? Not any more. Use it to convert “all-over-the-place” audio to a smooth, constant level. This model is also handy in theaters, tape duplication work, and music mixdown.

Set up is easy; just set your target level and let the unit gently boost low levels and compress hot ones. Peak limiter, I/O metering, and remote bypass port are standard. The 422 handles line-level audio. Connectors are balanced XLR and 1/4” TRS.

422  $595.00  MFR LIST
421m  $599.00  MFR LIST

**APHEX DOMINATOR II LIMITERS**

Limiting is important but you want to avoid dullness and “hole punching” in your audio. Aphex designed the Dominators to reduce the audible side effects of limiting. This means greater limiting depth for higher loudness without sacrificing audio quality. As a peak overshoot protection limiter, the Dominator is undetectable while it prevents peak levels from exceeding the level you set. The result is greater density and punch.

The 720 is a stereo, three-band peak limiter with a 104dB dynamic range, compatible with your digital equipment. Model 722 adds pre-emphasis (either 50 or 75 µsec) before the limiters. A de-emphasis circuit appears after the final limiter. Both pre-emphasis and de-emphasis are switchable. The 722 is designed for use in broadcast, satellite, and transmission links.

720 Dominator II  60AP720  MFR LIST  $1,350.00
722 Dominator II  60AP722  MFR LIST  $1,495.00

**RANE AUDIO DELAYS**

Rane has several delay models for your situation. The AVA-22 is for A/V synch, providing two channels of audio delay in video increments, up to 9.5 NTSC frames and 8.0 PAL/SECAM frames. Features include half-frame increments, remote memory recall, two memories per channel, and front-panel lockout. Suitable for TV and video post.

The AD-22 is a balanced, two in/two out audio delay with a range of 0.011 to 327.68 milliseconds on each output. The delay is adjustable in 10 microsecond and 1 millisecond increments. Each output has two non-volatile memories of delay values. Quality is assured with Dolby Time Link 1-bit delta-sigma circuitry. Features include front panel lockout and fail-safe bypass in case of power loss.

The AVA-22 and AD-22B use XLR connectors; the AD-22 has terminal strips.

AVA-22  60RNAVA22  MFR LIST  $899.00
AD-22  60RNAD22  MFR LIST  $849.00
AD-22B  60RNAD22B  MFR LIST  $849.00

**EVENTIDE DSP-4000B ULTRA-HARMONIZER®**

The software on board this digital-ready effects processor was created especially for radio, TV, and post-production. Push a button, you’re the voice of a computer. Push another, you’re talking through a car phone. Yet again, and we hear you talking from the cabin of an airplane. Choose from dozens of environments. You also get sound effects and audio backgrounds: thunder and rain, the surf, a passing plane. You can be on a mountaintop or at the bottom of the ocean. Reverts, choruses, flanging, and pitch change are here, along with TimeSqueeze’ time compression. Store your creations on internal memory or removable PCMCIA card. Create a cast of characters and settings for your morning show or any special production. XLR and 1/4” analog, MIDI in/out/thru and PA422 serial port data connectors are provided. An available option for the DSP-4000B is an AES/EBU and S/PDIF digital I/O for an all-digital path, plus an optional sampler board adds more power.

DSP-4000B  60EVE4000B  MFR LIST  $3,995.00
AES/EBU Option  60EVEAESOPT  MFR LIST  $1,000.00

**CALL 1-800-732-7665 FOR BRADLEY PRICE**
**ART QUADRA FX**

By housing two independent stereo effects processors in one unit, and selling for one unbelievably low price—the guys at ART are doing the audio world another great favor. The Quadra/FX gives you four channels (with 4 discrete ins/outs) of stellar effects processing, all controlled by their new, proprietary DEA™ software for complete, intuitive control. Using its brand new algorithms (plus some old favorites), you can create an amazing array of high-resolution effects and then store them in any of the 100 user preset spots. And we’re sure you can find more than 100 new effects worth saving.

**ART Quadra/FX 60MX415**

- ART’s proprietary Dynamic Engine Allocation™ software
- 24-bit double-precision effects resolution, with 20-bit A/D - D/A audio conversion
- Four discrete ins and outs
- 2 independent and discrete stereo audio signal paths
- 72 digital effects algorithms and 100 user presets
- Arrange effects and multi-effects in any order

**MFR LIST $299.00**

- 5.5 second max. delay time
- 4 Operation modes: Twin Stereo (two independent stereo in/stereo out effects processors), Discrete 4 (four independent effects processing channels), Cascade or Stereo
- 1/4” unbalanced (+4/-10dB switchable) ins and outs
- Performance MIDI™, with full parameter control

**AVOCET AV-2000 DELAY CANCELLER**

The Avocet Delay Canceller is designed to eliminate the problems caused by delayed audio feedback in live broadcasts.

This patent-pending system identifies a voice match between the microphone and off-air return signal and effectively removes the delayed voice from the return. The speaker’s voice is suppressed from the off-air signal by up to 40dB and with up to 800 milliseconds of delay.

The AV-2000 offers broadcasters the ability to perform the equivalent of a mix-minus from a remote site. The delay cancellation is done from each remote site allowing an unlimited number of users to remove their individual voices.

The mic-line input includes a compressor/limiter offering a small amount of processing to remove the sharp peaks associated with voice. Designed to have a minimum impact on the quality and delivery of the microphone signal, the audio bandwidth is 15 kHz with better than .5% THD.

**CALL 1-800-732-7665 FOR BRADLEY PRICES ON ALL OF THE AV-2000**

**DBX PERFORMER & PRODUCTION SERIES PROCESSORS**

Half-rack signal processors from one of the most famous names in processing. The 140X and 150X have electronically balanced inputs and outputs on 1/4" TRS jacks, and are designed to operate at +4dBm. All include hardware to mount one or two units.

**140X AND 150X NOISE REDUCTION**

Get more than 40dB of extra dynamic range from your audio systems. For limited bandwidth devices (telco, cart decks, STL’s, certain digital gear), use Type II noise reduction with the 140X. For full bandwidth systems (studio open reel recorders, digital systems sampled at more than 40kHz), use Type I with the 150X. Both are two channels of encode/decode with bypass switches for each circuit.

**140X 60DB140X MFR LIST $319.95**

**150X 60DB150X MFR LIST $319.95**

**CALL 1-800-732-7665 FOR BRADLEY PRICES ON ALL OF THESE DBX PRODUCTS**

**Bradley carries the Alesis family of processors, too. Call for details.**

**ROLAND VT-1B**

Put this in the hands of a good air talent, and watch the crowds flock to your next remote. The VT-1 is a little box with simple controls that let you alter incoming mic audio and produce hilarious results: women sound like Barry White, men sound like leprechauns, kids sound like robots. Take a couple to your next remote, wire in some mics, and let the listeners play. Or use it for your morning show and production guru. Presets let you switch between effects quickly.

**APHEX 320A COMPELLOR**

Ride gain like a cowpoke rides a bronco: quickly and intelligently. The Compellor compresses, levels, and limits peaks. These functions were designed to work together. The leveler provides a platform based on long term average audio levels. The compressor readily handles short term gain changes. A process balance control varies the ratio of these two functions. A fast peak limiter follows, to catch any overshoots and hold them to an absolute peak value. A silence gate prevents gain pumping during slow fades. You decide how much the lowest level signal will be brought up and the proportion of leveling to compression, and trim the output for unity gain.

The transparent audio path is servo-balanced (XLR) inputs and outputs and the Aphex VCA 1001. The unit works in dual mono or one of two stereo link modes. A Bradley Best Seller.

CALL 1-800-732-7665 FOR BRADLEY PRICE

**LEXICON DIGITAL REVERBS**

Fans of the classic Lexicon PCM-70 will be delighted with the PCM-81 digital effects processor, with classic and new effects, 200 programs, and digital I/O for use with ADAT and other popular devices. All programs are discrete stereo; all programs incorporate multi-voice delay effects AND reverb (not either/or). You get RAM or ROM storage with PCMCIA data card for future software upgrades. It uses balanced analog 1/4” jacks and SPDIF digital coax connectors.

**SYMETRIX 528E VOICE PROCESSOR**

Use it for announce mics, voice-over studios, and PA systems. More than a preamp, it's a self-contained voice processor. It enhances intelligibility, reduces off-mic noise, and increases perceived presence. It performs six functions: mic preamplification, de-essing, downward expansion, compression/limiting, voice symmetry alignment, and parametric EQ. Preamp gain is variable up to 60dB; 48V phantom power is provided for your condenser mics. A switchable 15dB pad, mic/line input switch, RFI protection, and variable EQ bandwidth are standard. Mic and line inputs and the balanced output are XLR; the unbalanced out and other connections are 1/4".

Bradley Broadcast and Pro Audio - Our Service Makes The Difference!
YAMAHA REV100 DIGITAL REVERB

With 99 editable presets, the affordable REV100 reverberates with standard reverb, stereo reverb, "gated" reverb for warmth or ambiance, mono and stereo delay for repeats or bouncing effects, delay/reverb combinations, and reverb/modulation effects including flange, chorus, and symphonic. The simple controls include input level, mix balance (wet/dry), decay, delay, and level. Connectors are analog 1/4" I/O and a MIDI port. This unit uses an external A/C adapter:

Z-SYSTEMS
SAMPLE RATE CONVERTERS

The Z-2SRC Sample Rate Converter is an uncommonly good way to convert from one digital audio rate to another. The digital design provides the best audio conversion for CD to DAT, varispeed to 44.1, DAW to digital mixer, and other uses. Features include jitter reduction, format conversion, and external sync. Ins and outs are AES/EBU, SPDIF, coax, optical, and XLR.

Get the same audio quality in a smaller, economical package with "Z-Link". It's built on the Analog Devices AD1890 asynchronous chip and puts out 44.1 and 48kHz using precise crystal references. You get switch-selectable AES/EBU and SPDIF output flags on transformer-isolated RCA or BNC connectors, with 20-bit resolution, 120dB dynamic range, and -106dB THD+N. Yes the specs are impressive, and that's what you want when your audio is at stake. The "plus" version adds AES sync input and loop-through for sync to other samplers and rates and sources.

YAMAHA EFFECTS PROCESSORS

The SPX-990 has 80 great preset effects and 100 memory locations into which you can store your own versions. The 990's two-in/two-out setup allows stereo sources to be processed without disrupting the original stereo image. Effects include natural reverb, tempo-based delays, and various pitch change and combination effects. Inputs and outputs are analog, electronically balanced, with XLR and TRS 1/4" connectors. A/D-D/A are 20 bits.

The classic SPX-1000 provides 40 preset programs including pitch change, distortion, natural reverbation and early reflections, delay and echo, and various combinations. Presets can be edited, retitled, and stored in user-defined memories; each program has a range of parameters and EQ to tailor the effect. Program five effects at the same time. Other features include MIDI implementation, 1/4" unbalanced analog I/O connectors, and Yamaha-format digital I/O. A/D-D/A are 16 bits.

Both models provide switchable stereo -20dBV and +4dBm I/O.

ATI MULTIPLE AMPLIFIER ARRAYS

ATI's UL-listed arrays can be used alone or in sets to create a mic distribution amp, headphone amp, consumer-to-pro interface, press box, or simple mixer. They combine gain control, distribution, and mixing in a single rack space. They're available in four or eight channels of line-to-line (to 42dB) amplification.

Rear panel jumpers let you create combinations of distribution amplifiers, mono summing networks, or sum and difference networks. Call us if you prefer XLR termination strips or for info on mic-to-line versions.

API L-200 PROCESSING SYSTEM

API has developed quite a name for itself with producers and engineers alike. Super high quality sound and performance are its hallmarks. With the L-200 System, you get a modular rack that lets you plug in the processing you need. The rack features an external power supply, XLR in and out, TP-Type feature connector, and is linkable to other L200 racks. All the insertable modules are discrete and transformer isolated on the outputs.

CALL 1-800-732-7665 FOR BRADLEY PRICES AND CONFIGURATIONS ON AN API SYSTEM

Module Available:
201L  passive fader module
205L  Hi-Z instrument direct
212L  Mic Preamp (shown channels 1-4)
215L  Sweepable hi/low pass filter
225L  Compressor (shown positions 9-12)
235L  Noise gate/Expander (shown positions 5-8)
245L  De-esser
250L  2 band EQ (future)
RACK-UPS™ are small studio problem solvers that operate on 24 volt DC (don’t forget to order the power supply). Several units can run on a single supply, up to its current limits.

Any module can mount using the tenacious adhesive strips provided, or order the optional rack kit to mount up to three side-by-side. Other options allow under-counter or flush mounting; or choose a one-rack-space universal chassis that holds up to five Rack-Ups and eight Stick-Ons. Call Bradley for a pamphlet that describes all of the hardware in detail.

AUDIO DA

Distribute line-level signals.
The DA-4D handles one stereo in to four out, or one mono in to eight out. Recessed level controls and audio presence indicators are provided. Connect balanced or unbalanced, high or low impedance lines on the rear-panel barrier blocks.

TRIPLE RACK MOUNT

Mounting for three Rack-Ups in a single rack space. Order RU-FP1 fillers for unused slots or to reverse-mount any Rack-Up. Choose the JP-1 Universal Jack Panel for custom mounting of your own connectors.

RU-RA3 Triple Rack Mount 60RDURU3A MFR LIST $29.00
RU-FP1 Filler 60RDURU1 MFR LIST $10.00
JP-1 Jack Panel 60RDURU1 MFR LIST $15.00
What are Stick-Ons? They fit in your hand. They’re simple to install, and provide super audio despite their size. What do they do? Well: most anything.

Stick a module onto any surface by attaching its stiff adhesive strip to an edge or side.

All modules marked (*) require a power supply, purchased separately. The PS-24A can power any Stick-On, and sometimes more than one depending on the mix.

**ST-AMC3 Active Mic Combiner** lets you expand a mic input on your mixer. Combines three mic-level inputs, with gain settings, to one mic-level output.

**STM-1 Mic Preamp** is a Hi or Lo Z preamp for commercial sound and broadcast. It provides a fixed 50dB gain to bring a mic signal up to the range of nearly any line input. Balanced or unbalanced output; internal/external phantom capability. For intercom use, the input will operate directly from a speaker.

**STM-2**

**ST-MPA2 Mic Phantom Adapter** allows you to add phantom-powered mics to standard inputs. Power two mics with one module. Full response, trim-pot adjustable voltage.

**ST-MX3 Mixer** has three adjustable line level inputs and a single output. It allows you to combine signals of different levels, impedances, or balanced/unbalanced configurations. The ST-MMX3 is similar, but inputs are at mic level, output is line.

**STA-1M Audio Line Amplifier** has a gain range of -14dB to +7dB when using the balanced I/O. When using the unbalanced I/O, the gain range is -7dB to +14dB. Single channel.

**STA-1M**

**ST-TC1 Telephone System Coupler** connects to your phone system KSU, simulating a telco CO line and letting you add radio control or paging. When the line is seized, the ST-TC1 provides a relay closure to control the equipment of your choice. An audio feed is available for input to or output from the KSU.

**ST-TC1**

**STP-1 Attenuator** is useful for reducing input levels to improve headroom. Each STP-1 has two variable modified "H" pads providing up to 85dB attenuation. A 15 turn trim pot allows adjustment of levels.

**STM-1 Mic Preamp** is extra low noise and has gain adjustment from "off" to +65dB, two balanced or unbalanced outputs, and more. If you need even more gain, ask about the STM-3. RDL mic pre-amps can operate on 12VDC with a loss of 6dB headroom.

**STM-2**

**STD-DA3 Distribution Amplifier** has one input, three outputs. Use two for 2x6 stereo output. Master gain adjustment provides up to 20dB gain. Inputs and outputs are RF bypassed. If the source is mic level, choose the STM-DA3 mic DA, feeding one 150 ohm signal to three isolated outputs.

MUSIC AND PAGING SYSTEMS

Your customer will never know what you've done, they'll only know it sounds good. Rane's family of Commercial Processors is your best choice in quality audio processing for these and many other applications:

- Restaurants
- Nightclubs & Bars
- Retail Stores
- Factories
- Offices
- Hotel & Convention Centers
- Aerobic Studios & Fitness Centers
- Museums & Attractions

There are a number of features Rane introduced in the CP 31, CP 52 and CP 64 designed to accommodate the most demanding projects requiring background and foreground music with paging. Features include:

- Mic/Line Paging Inputs
- Stereo Line Level Inputs
- Automatic Priority Override of Page and Program Audio
- Independent, Fully Adjustable Ducking
- 7-band Program Equalization
- Expandable Outputs for Zone, Page or Program
- Wired Remotes for Source Selection/ Volume Control and Page Assignment
- Stereo and Mono Zone Distribution
- Adjustable Signal Detect Thresholds
- Exceptional Audio Quality

Doesn't your next project deserve the reliability of Rane Contractor products?

CP 31 / CP 52 / CP 64
The PreSonus M80 Eight Channel Microphone/Preamplifier with Mix Bus.

- Greatly improve the quality of any console, analog or digital, by adding eight very high end mic preamplifiers.
- Amazing front end for two, four or eight channel analog to digital converters such as the Digidesign 888® or Soundscape SS810-1®.
- Add warmth to any microphone using the proprietary FET IDSS adjust.
- High headroom summing bus allows true stereo imaging utilizing more than two microphones.

PreSonus (audio electronics)
MORE RADIO DESIGN LABS

ST-ACR Audio Controlled Relays let you control switching from any audio signal. Multi-turn adjustments cover the range from mic to line level. Relay release can be adjusted from 1/2 to 5 seconds on the ACR1, and from 5 to 50 seconds on the ACR2. Double-pole, double-throw switching contacts are provided. A “slave” terminal connects Stick-On logic controlled relays (see below).

WHIRLWIND AUDIO ACCESSORIES

(1) The Hot Box active direct box runs for 500 hours on two 9V batteries, and also takes 48V phantom. It provides super-clean audio through super-clean circuitry. It has a ground-lift switch, useful for eliminating hum problems. Includes an LED “on” indicator and a +15dB, Flat, -40dB switch.

Hot Box 61WHHB $139.00

(2) IMP 2 is an economical direct box that converts a line or instrument unbalanced signal to a low impedance balanced one. Hi-Z bridging input and ground lift on output.

IMP 2 61WHIMP2 $42.00

(3) Director direct box combines road durability with great studio performance and no power required. Loading, distortion, and signal loss are eliminated by the TRHL-M transformer and custom circuitry. Mumetal shielding is included for EM and RF isolation.

Director 61WHDIR $95.00

(4) IMP Splitter allows a single input to be split into two or three signals. Low impedance.

1x2 61WHMS2 $59.00
1x3 61WHMS3 $69.00

(5) IMP Combiner combines low impedance signals into one low impedance output. Features phase reverse switch to match phase or to throw mics out of phase for special effects.

IMP Combiner 61WHCOMB $64.00

(6) Phase Reverse is a handy “back pocket” adapter for reversing phase on low impedance lines. XLR connectors.

Phase Reverse 61WHPR $19.00

(7) IMP Pads provide fixed attenuation on low impedance lines. XLR connectors.

10dB pad 61WHPAD10 $23.25
20dB pad 61WHPAD20 $23.25
30dB pad 61WHPAD30 $23.25
40dB pad 61WHPAD40 $23.25

(8) Lifter is a handy in-line device for ground lift at pin-1 on an XLR line.

Lifter 61WHGL $17.00

(9) Whirlwind Little IMP in-line impedance matching transformer with female XLR connector to male 1/4” connector.

61WHLI $12.60

SHURE IMPEDANCE TRANSFORMERS

A95U in-line impedance matching transformer with male XLR connector. Male and female 1/4” adapters supplied.

A95UF in-line impedance matching transformer with female XLR connector. Male and female 1/4” adapters supplied.

IMP Combines two low impedance signals into one low impedance output. Features phase reverse switch to match phase or to throw mics out of phase for special effects.

IMP Combiner 61WHCOMB $64.00

(6) Phase Reverse is a handy “back pocket” adapter for reversing phase on low impedance lines. XLR connectors.

Phase Reverse 61WHPR $19.00

(7) IMP Pads provide fixed attenuation on low impedance lines. XLR connectors.

10dB pad 61WHPAD10 $23.25
20dB pad 61WHPAD20 $23.25
30dB pad 61WHPAD30 $23.25
40dB pad 61WHPAD40 $23.25

(8) Lifter is a handy in-line device for ground lift at pin-1 on an XLR line.

APHEX 124A AUDIO LEVEL INTERFACE

Match ‘em Dan-o. The Aphex 124A is a two-way buffer that lets you connect -10dBV semi-pro and consumer audio products with +4 or +8dBm pro systems. It allows both to operate at their best by matching impedances and operating levels. Inputs and outputs are transformerless for wide, flat frequency response and perfect square waves to preserve transients. Hum and noise rejection are high, while noise and distortion are almost non-existent. A switchable 600 ohm load allows input line termination.

MP connectors are RCA; balanced I/O’s are XLR. The optional rack kit holds one or two units in a single rack space.

124A 60AP124 MFR LIST $229.00

Rack Kit 60AP44008 MFR LIST $29.95

**DMIC-20 2 CHANNEL DIGITAL MIC PREAMP**

The DMIC-20 combines two low noise analog mic preamps, 48V phantom power and a precision 20-bit analog to digital converter in one box. Input sensitivity is adjustable to accommodate a wide range of microphone types and LED indicators are provided for monitoring input levels. AES inputs are available on both balanced (XLR) and unbalanced (BNC) connectors. Use the DMIC-20 to add a mic input to your workstation, to record direct to digital multi-track, or for any application where one or two mic inputs are needed on an AES/EBU device. When used with phantom power mics, the DMIC-20 requires the PSU-1 power supply.

**SOUNDPALS DATS CONVERTER**

Upgrade your digital audio system with DATS converters from Graham-Patten. These passive devices allow equipment with balanced AES I/O to be interconnected using 75 ohm coaxial cable, resulting in error-free transmission over greater distances than is possible with twisted pair - up to 1000 feet or more with high quality coax. DATS converters also facilitate the integration of professional equipment with AES3-ED I/O and consumer equipment with SPDIF into existing AES systems.

- **AES to DATS source converter**
  - MFR LIST: $50.00

- **DATS to AES destination converter**
  - MFR LIST: $50.00

- **RCA to BNC adapter, for SPDIF interconnect**
  - MFR LIST: $5.00

**CALL 1-800-732-7665 FOR BRADLEY PRICE**

**SOUNDPALS DFADE-2**

The DFADE-2 from Graham-Patten is a two channel digital audio fader. Control the gain of any AES channel pair; this versatile module provides independent local level adjustment of -18 to +30dB for each channel. In addition, the DFADE-2 provides independent remote control of channel fade and pan, allowing you to remotely adjust the level, channel balance and channel pan. Channels can even be swapped by panning channel one fully to channel two and vice versa. Requires a power supply.

- **Dual channel digital fader**
  - MFR LIST: $899.00

**CALL 1-800-732-7665 FOR BRADLEY PRICE**

**SOUNDPALS DAC-20 D/A AUDIO CONVERTER**

- 20-bit signal processing
- Both XLR and BNC inputs
- Headphone jack for monitoring
- LED indicators for emphasis and data error conditions

**20-bit D/A converter**

**SOUNDPALS ADC-20 A/D AUDIO CONVERTER**

- 20-bit signal processing
- Simultaneous XLR and BNC outputs
- Internal 44.1 or 48kHz reference
- AES BNC reference input between 30-50 kHz
- Adjustable input range (-3 to +6 dBu at -20 dBFS)

**A/D converter w/ 44.1kHz internal reference**
- MFR LIST: $549.00

**A/D converter w/ 48kHz internal reference**
- MFR LIST: $549.00

**CALL 1-800-732-7665 FOR BRADLEY PRICE**

Both the DAC-20 and the ADC-20 from Graham-Patten can be rack mounted in the studio or operate on batteries in the field.

**SOUNDPALS DMIX-41**

The DMIX-41 4 channel digital audio mixer and sample rate converter combines up to four AES inputs onto a single AES output. Inputs may be individually enabled or disabled remotely. When equipped with optional sample rate converters, the DMIX-41 can combine AES inputs with different sample rates. Use the DMIX-41 to pre-select and/or combine sources to expand the input capability of any digital audio console or recorder. Available with XLR or BNC connectors and up to 4 SRC inputs. Requires a power supply.

- **4-channel digital audio mixer and sample rate converter**
  - MFR LIST: $899.00

EXCALIBUR IA-1 INTERFACE AMPLIFIER

Use the IA-1 to connect consumer type equipment to pro broadcast gear. It’s a newly-improved two-way stereo box with unbalanced RCA jacks and balanced, removable Euro-style wire capture blocks. I/O levels are adjustable. Rubber feet let you mount it on a flat surface; angle brackets attach it to the wall or under a counter. The optional rack mount puts one or two IA-1’s in a single RU. Power is via the attached. UL-approved plug transformer.

Use it with DAT decks, workstations, ENG gear, and more. Response is DC-85kHz ±0.2dB, with distortion better than 0.006% and common mode rejection of an impressive 75dB at 1kHz. It’s DC coupled and uses no audio transformers. Phase, response, and RF rejection are superior. As always, Excalibur gives great audio for your money.

IA-1 60EXIA1 MFR LIST $180.00
Rack Kit 60EXRM1 MFR LIST $22.00

EXCALIBUR DISTRIBUTION AMPS

Excalibur’s new DA2-6, with one stereo input and six outputs and the DA2-10, with one input and ten outputs, are high quality stereo distribution amps. Unlike other distribution amps, the DA2-6 and the DA2-10 are designed specifically for stereo use. Each output has both left and right level controls together on the front panel for easy adjustment. Tired of tangled wires crossing back and forth between sides of the chassis? Problem solved! On the rear panel, both left and right outputs for each channel are on the same connector. This allows for much neater wiring using two pair cable; all five wires connect to the same connector. Both the DA2-6 and DA2-10 come with euro-block connectors and external UL approved transformers.

DA2-6 Distribution amp 60EXDA26 MFR LIST $395.00
DA2-10 Distribution amp 60EXDA210 MFR LIST $495.00

RIXX PAM-1 PASSIVE ATTENUATOR/MIXER

The RIXX PAM-1 is a simple passive device which can be used for independent, variable attenuation of two unbalanced audio channels. It can also be used to sum the channels into a mono signal, with resistors incorporated to prevent output driver damage. Continuously variable attenuators are internally located to prevent tampering.

Typical uses include reducing levels between "pro" and "semi-pro" audio gear, or between broadcast and consumer VTR's; mixing channels for mono dubs, padding outputs from digital workstations and recorders or to feed a mono monitoring device (such as a video monitor speaker).

PAM-1

$39.95

RADIO SYSTEMS DISTRIBUTION AMPLIFIERS

This New Jersey company has been making quality audio products for two decades, and their DAs are among our most popular. Front panel independent level adjusts, balanced bridging inputs, balanced low impedance outputs, barrier strip connectors, and super low noise and distortion combine to make them a sure fire investment.

Response is within a tenth of a dB of 20Hz-20kHz, gain is up to +26dB without pad, and distortion is below 0.01%.

DA-8 (8 Mono)

$340.00

DA-16 (8 Stereo/16 Mono)

TASCAM FOUR CHANNEL INTERFACE AMP

Like other audio interfaces, the LA-40 MKII lets you use balanced XLR equipment with unbalanced RCA gear. Unlike others, this rackable unit offers four channels in each direction.

All I/O connectors are located on the back panel. Ground lift switches for each channel and a universal "all-lift" minimize unwanted noise. Front-panel dials let you fine tune the amplification by -6dB. Under the chassis, switches toggle between +4 and -20dBm nominal outputs.

The LA-40 MKII lets you assign the signal of a single input to multiple outputs. Flip one switch to assign it to all the channels above it (assuming they are of the same I/O conversion type). The system also accommodates the "multing" of multiple inputs or stereo input pairs.

LA-40 MKII

$475.00

CALL 1-800-732-7665 FOR BRADLEY PRICE
**RANE DA 216 DISTRIBUTION AMP**

You say that you are seeing only only ONE Rane DA 216? Look closer. Every DA 216 gives you double the distribution power of its predecessor – the FDA 28 – running circles around it. And it doesn't cost a penny more! The DA 216 can be configured in an amazing number of ways. You want 1 input to 16 outputs? No problem! 1 stereo input to 8 stereo outputs? You've got it! 2 mixed inputs to 16 outputs? It's yours! 2 independent inputs to dual 8 mono outputs? Whatever you want! The DA 216 features two predistribution screwdriver-adjustable master level controls, with 16 screwdriver-adjustable output level controls. Terminal strips on the rear handle the connections, with balanced line level outputs while inputs are switchable between mic and line. 15 volt phantom power is switchable when the mic inputs are selected. Whenever you need a distribution amp, get twice as much with the Rane DA 216. Give us a call. We'll tell you all about it.

**APHEX 120A DISTRIBUTION AMPLIFIER**

The 120A boasts THD 0.002% at +4dBm and hum and noise better than -90dBm at unity gain. XLR I/Os and maximum RF shielding make it suitable for both studio and field. The 120 is a half-rack DA with one input, four outputs with level controls, and one unity gain direct output. Aphex publishes an aggressive response spec (5Hz to 100kHz, +0, -0.5dB) which makes it suitable for critical applications, as well as distributing SMPTE time code. The optional rack kit holds one or two in a single RU.
**BURK LX-1 SIX-INPUT STEREO SELECTOR**

Integrate numerous sources—studios, feeds, players—through one master control unit. The transition is smooth and levels remain constant. The LX-1 can connect to your remote control system for remote program switching. It matches -10 IHP to +4 PRO inputs, so you need no external matching equipment. The LX-1 also allows mixing of two studio sources, or lockout of all audio sources. Tally indications are provided for each source, making clear which is active. Individual start and stop pulses are available for each source, a feature which lets you use the LX-1 to start a fill tape or reset automation.

LX-1 60AVLX1 MFR LIST $1,295.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

**HENRY PORTAMATCH**

Portamatch, the battery-operated version of the Matchbox II operates on two 9V batteries, and is ideal for use where AC power is not available. Portamatch is the ideal way to correctly interconnect "consumer" or semi-pro equipment with professional gear. Portamatch is a bi-directional unit, employing four independent amplifiers to convert stereo inputs and outputs from unbalanced -10 dBV levels to +4 dBm balanced 600 ohm lines. All four outputs can be adjusted to accommodate a wide range of operating levels. Portamatch also features a special HI GAIN mode to properly match the low-level unbalanced outputs of computer sound cards. The unit's direct-coupled circuitry and exceptional dynamic range provide absolute sonic transparency, making Portamatch ideal for use with digital editors, DAT recorders, and other digital audio sources.

Portamatch 60HEPM MFR LIST $195.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

**360 SYSTEMS AM-16/B ROUTING SWITCHER**

Let Bradley and 360 Systems save you a lot of trouble and time. You can configure the AM-16/B as a 16 x 16 mono or 8 x 8 stereo matrix. The companion AM-16/E slave unit operates in parallel to provide more simultaneous inputs. Combine one master and one slave unit for 16 x 16 stereo operation. Use additional slaves for multi-channel applications or for custom matrices.

Replace patch panels and cumbersome switchers with this expandable system. Store your configurations in 100 memory locations, and easily recall individual patches or complex "salvos."

All inputs and outputs are electronically balanced. The switcher has both RS-422 and MIDI remote control facilities. The front panel includes single ended jacks with the input and output of two mono channels or one stereo pair, to serve as test points or for an emergency patch. Specifications are impeccable. Frequency response is ± 0.5dB, 20Hz to 20kHz. Distortion is less than 0.008% THD+N, DC to 20kHz @ +22dBm. Signal to noise is 105dB unweighted, and crosstalk is 99dB at 1kHz and 83dB at 20kHz, any channel to any other.

The optional AM-16/R is a single space remote control station that operates on the EIA-485 control bus for X-Y and salvo switching. It controls up to four AM-16/B's or may be used in multi-drop configurations.

AM-16/B Switcher 50TH16B MFR LIST $1,495.00

HENRY ENGINEERING

MATCHBOX II & TWINMATCH

Everyone's heard of the Matchbox, Henry's bi-directional device for marrying pro gear to equipment with consumer levels and impedances. Use the improved Matchbox II with DAT machines, CD players, cassette decks, and digital editors.

The average noise floor is reduced by 8dB for more dynamic range. A high-gain mode brings very low levels from digital editor sound cards up to +4dBm. Gold-plated RCA jacks extend the life of the unit. And all outputs, both balanced and unbalanced, are now adjustable. (You won't over-drive the inputs of those sound cards.) The AC cord is three-wire, and AC ground is isolated from audio ground to reduce noise.

TwinMatch is a four-channel, one way model bringing -10 to +4, great for two stereo consumer sources like CD players. Barrier strip connectors for both input and output.

MixMinus Plus

If your console manufacturer won't put Mix-Minus in your board, do it yourself. Use this box to add a mix-minus output suitable for feeding the send input of a telephone hybrid. One input of this unit is fed with the mixer output, the other takes hybrid receive audio. These two signals are subtracted using phase reversal to create a program mix, minus the receive audio. Initial null adjustment will provide 40dB rejection of the receive audio signal. Very handy.

StereoSwitch

Hank's products are simple and reliable. They have that undefinable "good feel" in your hand. This one is an audio switcher that takes three stereo balanced sources, selects the one you indicate, and routes it to the stereo balanced output.

Program it internally to select one input when AC power comes up. Tally outputs will drive remote status indicators. Use it as a line selector or for auto source selection under the control of an automation system.

It uses sealed relays with gold-plated contacts, and is "transparent" since it puts no circuitry in the audio path. Control it with any momentary or maintained contact closure, open collector, TTL/CMOS logic, or DC voltage from 5-24 volts. Audio connections are barrier strip.

StereoMixer

StereoMixer is an eight-input stereo line mixer that lets you mix four stereo or eight mono sources (or a combo of both). It has three outputs: L, R, and Mono. Inputs and outputs are balanced barrier strip; bus inputs allow linking. The power supply is internal, and the StereoMixer is built with the same ruggedness and audio quality as all Henry products.

See Henry Audio Online On page17.
Bradley clients use the AS-101 to expand mixer inputs, set up simple automation systems, and fix other studio problems. This 10x1 stereo routing switch can be programmed for “overlap” switching, which prevents the source from turning off until the trailing edge of the command strobe turns on the new source. Inputs may be individually switched for 10K bridging or 600 ohm terminating. Audio connections are via plug in screw clamp terminal blocks, and all audio paths are transformerless balanced. The control format is four-level BCD plus strobe, ground, and 12VDC. Several control heads may be operated in parallel.

You can do more, too: An auxiliary rack mount chassis accepts option boards for relay-based machine control, RS-232/422 interface, and a system controller board which allows the unit to function as a simple automation system when controlled by a PC. Call for the list of Conex options.

NEUTRIK CONNECTORS

X series connectors have only four parts. They have no set screw, and crimping during assembly is not required. One piece unbreakable die cast housing, bellows-style polyurethane flex relief, and chuck-type, snap on cable clamp provide secure strain relief.

The C series are right angle connectors that swivel at 45-degree intervals when assembled for maximum packing density. Both XLR types are available in nickel shell with silver contacts or black shell with gold contacts.

BRADLEY CORD-LOX

Cord-Lox stay with your cable, helping you store or coil. Each strap makes two loops: a cable holder to keep the strap on the line, and a larger loop to hold the coil. Three sizes delivered from stock. Black only. (Call us about custom imprints and colors.)

| 3/4" x 5" With cable holder closed at both sides. For shorter cables. | 60CL205C | $1.20 |
| 1" x 7" With cable holder closed at both sides. For medium cables. | 60CL307C | $1.29 |
| 1-1/2" x 18" for snakes | 60CL4180 | $3.48 |

WHIRLWIND WALL MOUNTING PLATES

Whirlwind's stainless steel plates fit standard single or double gang electrical junction boxes. Mounting screws are included.

FURMAN MODEL PB-48

The PB-48 is Furman's standard patch bay, usable in almost any application. It features 1/4" TRS phone jacks in all positions, front and rear, with one switching jack in the lower front positions. TRS jacks have the advantage of being usable in either balanced or unbalanced systems. The PB-48's front panel can be easily removed, even when the unit is already mounted in a rack. The unit may be customized by removing the front panel, pulling out any module to be non-normalled, turning it end-for-end, and replacing it.

Model PB-48D

The PB-48D is Furman's top of the line patch bay. It features 1/4" TRS phone jacks in front for easy patching, and six 25-pin D-Sub connectors in the rear, per Tascam DA-88 wiring standards.

FURMAN PB-48 PATCH BAY | 60FUPB48 | MFR LIST $169.00 |
FURMAN PB-48D D-SUB PATCH BAY | 60FUPB48D | MFR LIST $229.00 |

Cables

WEST PENN 510

Wiring stereo signals? Use this two-pair individually foil shielded cable with common drain wire and overall shield. 1000' reels.

60WP510  $175.00

BRADLEY MIC CABLES

Some of the most widely heard audio in the world runs through Bradley assembled mic cables, featuring Neutrik XLRs.

3' cable 61WHMK403 $12.50
6' cable 61WHMK406 $13.25
10' cable 61WHMK510 $14.00
25' cable 61WHMK520 $14.50
50' cable 61WHMK550 $22.00

BRADLEY BULK MIC CABLE

Make your own! You save money when you buy this rugged, low-impedance mic cable in bulk.

60AT8300 35¢ per foot

CANARE STAR QUAD MIC CABLE

An excellent low-noise bulk cable, designed for mics but excellent for any audio. It gets its name from the four conductor-style construction that minimizes the loop area between twists of the conductors, reducing noise. Buy it by the foot, in two reel sizes, or assembled. Black is the only color offered by the foot. Reels are available from stock in black. Special order blue, brown, gray, green, orange, purple, red, white, and yellow. Call for pricing on multipair setups. (Specify color)

Bulk Star Quad 60CAL4E6BK 57¢ per foot
656' reel 60CAL4E605XX  $335.00
1000' reel 60CAL4E701XX  $599.00

CANARE STAR QUAD ASSEMBLED MIC CABLES

These cables come with Neutrik XLR connectors. Black is available from stock. Other colors are special order. Cables may be special ordered in any length, with a minimum order of 10 cables in any mix of colors and lengths. (Specify color)

5' 60CAG055FBXX $23.50
15' 60CAG0515FBXX $29.00
25' 60CAG0225FBXX $35.25
50' 60CAG050FBXX $51.50

PLUG EM! BRADLEY ENG MIC CABLES

We know what kind of ENG cables you need: durable, high-quality, with a choice of straight or coiled. Our cables are for portable DAT and cassette recorders and will stand up to the rigors of field use. Straight cords are 6 feet long except as noted; coiled cords extend to over ten feet. Need something else? CALL US.

XLR female to XLR male, straight cable (6) 61WHMK406  $13.25
XLR female to XLR male, coiled cable 61WHMK510  $35.95
XLR female to XLR male, straight (10') 61WHMK410  $14.40
XLR female to 3.5mmTRS mini, straight 61WHMK515  $12.00
XLR female to 1/4" TS, straight cable 61WHMK415  $12.00
XLR female to 1/8" TS mini, straight cable 61WHMK520  $12.00
XLR female to 1/4" TS, coiled cable 61WHMK620  $28.00
XLR female to 1/8" TS mini, coiled cable 61WHMK630  $28.00
* Mono for use with Sony DAT and MD.

EBTECH HUM ELIMINATOR

A handy little device that banishes that offensive ground loop hum from your sound automatically. Just plug in your line outputs, and it rewires itself to eliminate the annoying hum.

Hum Eliminator 61EBHE MFR LIST $75.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

CONEX CG-25A TONE GENERATOR

The Conex CG-25A tone generator is used with reel tape systems to record 25Hz on either or both audio channels between selections. It also finds applications in translators, satellite systems, and cable broadcasting. Two front panel switches allow pre-set timed or manually timed tones. Front panel LEDs indicate duration of tone and silence intervals. One or two units can be rack mounted in a single rack space with an optional rack kit.

Conex CG-25A 60CNN25 MFR LIST $451.50
RMK Rack Kit 60CNRMK MFR LIST $27.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

WHIRLWIND CABLE TESTER

Slip it in your pocket. This versatile tester checks most varieties of cables with any combo of XLR, 1/4", or RCA plugs for shorts, opens, and phase. The hands-free design lets you play with your cables to find the intermittents. Belt clip included.

Cable Tester 61WHTA $62.00

FOSTEX TT-15 TONE GENERATOR

“Quick, give me a tone!” No problem when you have the battery-operated TT-15. Generate your choice of five at the push of a button: 40Hz, 400Hz, 1kHz, 10kHz, and 15kHz, with distortion typically less than 0.02%. An attenuator provides output levels of 0dBV, -10dBV, and -30dBV with insignificant level shift when changing from a bridging load to a 150 ohm load. An internal 9V battery provides reliable operation of this rugged, metal device.

TT-15 60FOTT15 $60.00

CAIG TECHNICIAN’S SERVICE KIT

Suffice it to say, having the proper tool for the job makes all the difference in the world. The Technicians Service Kit from Caig comes with DeoxIT, which is used as a general treatment for connectors, contacts and other metal surfaces, PreservIT which provides long-lasting protection for newly manufactured or recently cleaned components, CaiKleen 41 contact cleaner and degreaser for equipment and moving parts and CaILUBE for improved performance of electric contacts. The Technicians Service kit includes lint-free cloths, paper, swabs and brushes. Call your favorite Bradley professional today for a mini Caig catalog for all the products you need to keep your equipment in tip top shape.

Caig Technician’s Kit 60CG40ST $54.95

GOTHAM CT-1 CABLE TIES

Bag of 100. They’re reusable! 7-1/4” long.

61NECT1 $59.00/Bag

CORD-LOX COIL ’N CARRY

Carry large cable spools conveniently. Webbing is wrapped around a doweled handle and attached to a wide Cord-Lox strap.

Coil’n Carry 60CLA19WHP $15.25

PROGOLD

ProGold from CAIG Laboratories is a must-try treatment for your audio connections. It’s an environmentally safe conditioner, preservative, and lubricant for your contact, IC’s, sockets, and relays. It will improve conductivity, prevent degradation of your signals, and fight RFI and intermittents.

The 5% solution is an excellent all-purpose spray for connectors. Use solvent-free 100% ProGold where more cleaning and lubrication is called for, particularly on carbon pots.

ProGold 5% Spray, 6 oz can 60CGGG5S $14.00
ProGold 100% Spray, 2 oz can 60CGGG100 $22.00
ProGold 100% Liquid, brush applicator 60CGGG100L2DB $16.00
ProGold Wipes, 100% (50) 60CGGG50W $17.00

THE INTRAPLEX STL PLUS SYSTEM

The Intraplex STL Plus is a fully integrated STL system designed to transmit 16-bit linear stereo audio over T1 lines with no digital compression, making it an ideal choice to use where compression may occur at other stages of the audio chain. Unlike microwave radio links, T1 requires no direct line-of-sight, is not subject to environmental interference, and can operate over any distance.

The STL Plus system employs T1 multiplexing to deliver a benefit not available from other STL products on the market: it allows you the option of adding your choice of one or more extra STL and TSL channels. This means that voice, data, remote control, and additional audio program channels can be added to the system, one-way or full duplex, in the same circuit, without affecting the quality of the broadcast signal.

The Model 4200 is the heart of the STL Plus system. It includes TDM-163 T1 multiplexers for both the studio and transmitter ends of the link, equipped to provide a stereo 15kHz or 7.5kHz digital STL with compact disc audio quality. The use of discrete channel 16-bit coding with oversampling produces greater than 90dB dynamic range, and the system incorporates Intraplex's extraordinary error mitigation circuitry, using digital signal processors to eliminate chirps and clicks caused by transmission line errors. Audio input and output can be specified as either analog or AES/EBU digital.

The Model 4200 STL Plus operates over any type of T1 circuit: private line, leased line, digital microwave radio, or T1 subcarrier over an analog video microwave radio.

CROWN FM TRANSMITTERS AND TRANSLATORS

Crown's innovation is an integrated FM system that combines audio processing, stereo generation, and RF in one easy-to-ship unit, in power ranges up to 2000 watts. This approach provides an economical flexible system well-suited as a translator (satellite or terrestrial-fed), or a back-up or main low-power transmitter. Installation and set-up are simple, even by non-techies.

Select the frequency of the transmitter yourself using the internal dial switches. A built-in remote I/O interface supports remote and monitoring. Automatic control circuitry provides proportional foldback protection. The DC power hookup can provide uninterrupted service when AC power is lost.

All integrated models include digital metering and diagnostics, 100/120 VAC, 220/240 VAC, and DC operation. Translator versions, providing RF in and out, also include an integrated FM receiver and FSK IDer.

**EXCALIBUR CDA-1 COMPOSITE DA**

The one-in/three-out CDA-1 adds flexibility to your transmission facility. Use it to feed auxiliary STL systems, test equipment, and back up transmitters. Each output has its own 20 turn level control, and can drive up to 75 feet of RG-58 coax. A ground lift switch and transient protection on the power supply are provided. Other uses include distributing modulation monitor outputs and subcarrier generator outputs. Frequency response is DC to 100kHz ±0.2dB (less than 0.05dB down at 53kHz), THD is less than 0.01%, and noise is greater than 90dB below 4V at unity gain.

**BRADLEY BACK-UP RF PACKAGE**

Here's a special Bradley package, ideal as a back-up FM system. You'll have a low-power transmission system ready to go on short notice. It includes a 500-watt Crown transmitter with processor and stereo generator, three-bay Shively antenna, and 150' of coax cable with connectors. We can also configure it other ways to fit your situation. The system works nicely on your studio roof, at a temporary tower, or at any emergency location. Power it with a portable generator or battery-driven inverter.

**PACKAGE 9814 - MFR LIST $13,100**

**BRADLEY FM TRANSMITTERS**

The Intraplex STL Plus system employs T1 multiplexing to deliver a benefit not available from other STL products on the market: it allows you the option of adding your choice of one or more extra STL and TSL channels. This means that voice, data, remote control, and additional audio program channels can be added to the system, one-way or full duplex, in the same circuit, without affecting the quality of the broadcast signal.

The Model 4200 is the heart of the STL Plus system. It includes TDM-163 T1 multiplexers for both the studio and transmitter ends of the link, equipped to provide a stereo 15kHz or 7.5kHz digital STL with compact disc audio quality. The use of discrete channel 16-bit coding with oversampling produces greater than 90dB dynamic range, and the system incorporates Intraplex's extraordinary error mitigation circuitry, using digital signal processors to eliminate chirps and clicks caused by transmission line errors. Audio input and output can be specified as either analog or AES/EBU digital.

The Model 4200 STL Plus operates over any type of T1 circuit: private line, leased line, digital microwave radio, or T1 subcarrier over an analog video microwave radio.

**MFR LIST**

**RF EQUIPMENT**

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web site: http://www.bradleybroadcast.com
REMOTE CONTROL

SINE SYSTEMS REMOTE CONTROL

Bradley customers can benefit from the cost-effective approach to remote control espoused by Sine Systems of Nashville. The RFC-1 lets you control and monitor your transmitter from any phone. It speaks to you with a human voice and can phone you to report out-of-tolerance conditions and automate power/pattern changes. The control unit itself is only as large as a modem.

The typical basic system is one RFC-1/B and one rackable RP-8 eight-channel relay panel. Add RP-8s for more channels. We recommend you also add an SP-8 heavy-duty surge protector. If you elect to add the SP-8, Sine Systems will include lightning damage coverage in your one-year warranty. Available options include room temperature monitor, a serial option for logging, and a current monitor for tower-light confirmation.

**RFC-1/B**
62SIRFC1BHV3 MFR LIST $1,199.00

**RP-8 Relay Panel**
62SIRP8 MFR LIST $399.00

**Rack Kit for RFC**
6251RK3 MFR LIST $35.00

**SP-8 Surge Protector**
62SISP8 MFR LIST $129.00

CALL 1-800-732-7665 FOR BRADLEY PRICE

GENTNER VRC-2000 REMOTE CONTROL

This popular transmitter control now comes with PC software for Windows® that lets you see your meter readings, check all status channels at a glance, and control up to six sites, all with point-and-click ease.

The VRC-2000 is a powerful 16-channel voice-response remote control system. It provides transmitter control via any bi-directional audio link, whether dial-up, dedicated phone line, or radio link (such as SL7/TSLSCA). When it's operated as a stand-alone unit, you can control your transmitter from any telephone that has a DTMF keypad. The VRC-2000 responds with a synthesized voice. The Command Relay Unit provides relay isolation between the VRC-2000 and your equipment. Handles eight raise and eight lower commands. The most popular system is shown below. Call us for configuration assistance. Also available: special purpose accessories including a failsafe unit, temperature sensor, and UPS.

**VRC-2000 System (with Windows software, data interface, command relay, and two barrier strips)**
60GFVRC2000P1 MFR LIST $3,979.00

**VRC-2000 Unit only**
60GF9100072201 MFR LIST $3,295.00

Federal Government Buyers! Write for a copy of our GSA Price List for ATI, Comrex, Excalibur, Gentner, Middle Atlantic, and Telos Systems purchases.

GENTNER GSC3000 SITE CONTROL

Here's a site-expandable transmitter remote control system that can run from one to 256 sites, with 8 to 256 channels of metering, status, and command per site! Thanks to networking protocol and a modular approach, the GSC3000 is ideal for radio and TV station owners, duopolies, LMA's, and other complex transmitter combos, as well as single-site users. A powerful Windows® application makes setup and operation of multiple sites a breeze. You can query any site from your modem-equipped PC or laptop computer at any time, with full security. However, the GSC3000 does not require the dedicated use of a computer in order to control sites. All functions necessary to operate, change, or correct transmitter parameters are performed by local hardware at each site.

The true power of the GSC-3000 is its ability to execute user-created macros to intelligently issue commands that get you back on the air in the event of a failure. For example, a macro can issue all commands necessary to switch from a main to a standby transmitter, including all functions necessary, such as antenna transfer. Or, in the event of AC power loss, a macro can turn on a standby generator, then perform a sequence to bring your transmitter back up.

The GSC3000 is plug-compatible with VRC-2000 accessories, making upgrade or parallel operation simple to implement. Multiple security level capability allows restricted access to users who are not qualified to alter commands or change parameters. And the GSC3000 can communicate over telephone, RF or Direct PC connection. Call Bradley to find out how advanced site control can enhance your station's reliability AND your peace of mind.

CALL 1-800-732-7665 FOR BRADLEY PRICE
If you don't have the all-digital Omnia.fm processor from Cutting Edge, you're missing out on a major sound explosion. Clean, clear highs. Tight, thundering bass that shakes the walls. Digital precision that's as smooth and fluid as analog, with amazing loudness. Warmth that gets vocals and other musical elements “up front,” with a richer, more natural timbre throughout the frequency band.

Your listeners may not know what “aliasing distortion” is, but they know grunge when they hear it. The outdated 32kHz digital processors have a Nyquist cutoff that's far too low, resulting in the production of aliasing distortion—even with 128kHz upsampling. But the Omnia's virtual- upsampling in the final limiter gives the performance of a 192kHz system. Combined with the Omnia's anti-aliasing design, you have the best possible sound, **rock-solid peak control, and absolutely no digital grunge**.

For increased loudness, the Omnia's digital stereo generator includes an adjustable composite clipper and low-pass filter. And for added transparency, the Omnia can easily interface with D/CET™, the world's first digital composite interface.

But before you listen to the Omnia, listen to this: The Omnia is priced well below the competition and we offer a 60-day, risk-free, money-back guarantee.

Omnia. The promise of digital... *delivered!*
Something missing in your studio?

5 easy to assemble pieces fit together in any combination!

Middle Atlantic Products, Inc.
**BURK ARC-16 REMOTE CONTROL**

The ARC-16 Two-Unit Transmitter Remote Control System allows you to rectify problems instantly. Clear text display and simple controls are “talent friendly”. The system includes a studio unit for monitoring and alarms, and a transmitter unit with the same functions that lets you calibrate your system on-site. Unlike many remote controls, it offers control and metering of studio equipment including automation, EAS, and security. It provides full-time studio control, dial-up control, or both. It has 16 metering channels, 16 raise/lower outputs, and 16 status channels. (Ask us about the single-unit system that allows control from any phone with a DTMF keypad.)

The Enhanced Speech Interface option allows control or readings from a touch-tone phone; the caller is greeted with a human voice and prompted. The ESI lets you listen to program audio; it will also call a series of phone numbers to announce an alarm, and it can be enhanced with optional CDL software to interface with a computer directly or via modem. Call for info on other systems options.

ARC-16 two-unit system includes modems to connect by telco, STL, SCA, or TRL (specify).

**MARTI RPU**

The new Marti SR-10 base station receiver is designed for broadcast remote pickup and ENG. Its frequency agility and fine selectivity will help you find your way through the high interference levels in today's RPU work. Features include front-panel selection of channels, six programmable priority channels, backlit LCD display, built-in monitor speaker with headphone jack, and double balance mixers. Options include remote channel selection and display, and subaudible tone detection for signaling and automatic repeater applications.

Marti has mono and stereo RPU systems in configurations starting at about $3200. Call or fax Bradley for a Marti catalog.

**CIRCUIT WERKES DR-10**

The DR10 is a microprocessor based remote control that allows operation of station equipment over any phone line, via touch-tone. The DR-10 auto answers, provides password protection, and allows any of the 16 DTMF zones to activate any of the ten relays in the DR-10. Each relay can be programmed for momentary, latching, or interlocked operation. Additionally, relays can return a beep tone to acknowledge activation.

The DR-10 also features four logic-level inputs that will activate one of its relays, or call out to any of four phone numbers (one per logic input), and tell you which channel caused the alarm with a series of beeps.

Applications include EAS monitoring, remote audio switching, RPU control, or automatic tape recording. When used with its companion “silencer” option, the DR10 can share the audio channel from your remote broadcast to deliver commands without interrupting program audio.

**WILL-BURT HURRY-UP**

The Hurry-Up is a 25' telescoping mast designed for fast, easy deployment. It's ideal for small ENG microwave antennas, Marti antennas, and weather instruments weighing up to 20 pounds. You extend it manually by pushing up the six nested aluminum sections and fixing them with quick release collars. You can pop it up in less than a minute even if you're wearing thick gloves, and it's easy to adjust and lock the direction of your antenna.

No guy wires to worry about; you just lock the mast into the holding tube on the mounting stand, and drive your vehicle onto the plate to keep everything in place. With a typical load, it'll survive winds well over 50 mph. The mast itself weighs 28 pounds and is 6' high when nested. The base weighs 36 pounds.

**ON AIR PROCESSORS/TIMING SYSTEMS**

**CUTTING EDGE OMNIA**

Omnia.fm represents a completely new approach to FM processor architecture, and, most importantly, brings you full digital control of your air signal, without the harsh digital "grunge" often heard in other digital processors. The Omnia.fm uses PCMCIA card technology to configure all processing resources, including system configuration and user presets. Remote operation and control of the unit is accomplished via web browser (coming soon), a universally available interface.

Software driven features include daypart automation, format presets, and two levels of processing control for novice or expert users. A front panel headphone jack is provided for monitoring in noisy environments.

The topology of the Omnia consists of multiple audio processing sections, followed by a digital stereo generator, and selectable composite clipper. Unique sections include the "Thunder Boost" EQ section, which provides an unusually clean and powerful low end without sacrificing loudness, and a Dynamic Peak Limiter that produces a more natural, musical sound, with lower I.M. distortion.

Call Bradley to learn more about the amazing Omnia.FM processor.

---

**OMNIA.FM.JR.**

Containing all the features that have made the Omnia.fm so popular with broadcasters, the Omnia.fm.jr employs a 3-band processing system in order to contain costs. Omnia.fm.jr incorporates both digital and analog input/outputs, a digital stereo generator, and the same user interface as the Omnia.fm. This allows users to make the full transition to Omnia.fm processing when desired.

---

**CUTTING EDGE OMNIA.AM**

Cutting Edge introduces the newest member of the Omnia family of audio processors, the Omnia.am. The unit adopts the best audio processing features of the renowned Omnia.fm, such as totally phase linear low pass filtering for improved audio quality, a multiband processing structure, and custom presets for common AM formats. Omnia.am also incorporates special features that optimize it for AM broadcasting, such as mono or stereo operation and selectable lowpass filtering and response tailoring; they make the unit suitable for conformance to not only NRSC standards, but broadcast requirements throughout the world.

---

**RADIO SYSTEMS CLOCK & TIMING SYSTEM**

Enter the new millennium with Radio Systems Clocks and Timing Systems. Radio Systems and Bradley Broadcast know how busy you are, so we put together the perfect Master Clock System for you! Our package includes one CT-6 Thin and one Master Desktop unit. The CT-6 Thin is only an inch deep and designed to stick on (or screw down) to any console rack or table surface, without losing any of the features of the larger clocks. The Master Desktop has a guaranteed accuracy of 1 PPM after the first year with a maximum drift of 1.3 seconds a month. Other systems are available.

---

**THE INFORMER**

How hot or cold is it outside? What's the temperature in your transmitter room or garage? Bradley offers two versions of this specialized thermometer. The digital readout version reads from -40 degrees to 120 degrees Fahrenheit, and has high and low temp memories. Includes 50' cable and probe; runs on "AA" cell.

Ideal for measuring extremes of temperature, the Informer Gauge can display a range of -99°F to +150°F, with a super bright .4" red display. It mounts in a standard 2 1/16" hole cut-out and comes standard with a 10ft sensor cable. Requires 12VDC at .01amp to operate. Special sensor cable lengths up to 100ft are available on special order.

---

Bradley Broadcast • 7313-G Grove Road • Frederick, MD 21704 • 800-732-7665 • 301-682-8700 • Fax: 301-682-8377 • Web: http://www.bradleybroadcast.com
The Model 2020 FM Pro is a complete FM broadcast audio processor self-contained in a single chassis. All functions are integrated within one interactive, optimized processing framework. The unit is housed in a two rack space chassis. Its self contained power supply automatically accepts any mains voltage from 80 to 268VAC 50/60Hz. It is designed to operate with either 75 or 50 microseconds pre-emphasis, user selectable through panel controls.

Every stage of processing is a completely new design, with new processing algorithms. Each stage of processing is crafted to work seamlessly with the next so there is no sense of competition or “fighting” for control between the leveler, compressor, and limiter elements. At every stage, the sonic effect of the process was carefully tuned for the minimum objectionable artifacts and maximum performance. Importantly, no multi-band clipping is used in the model 2020. The multi-band clipping incorporated in some competing audio processors causes grunge and listener fatigue. It also stimulates and exacerbates the effects of multi-path distortion and can actually degrade your coverage area. Equally important is that the model 2020 without composite clipping can achieve dominating loudness. Through digital control, the unit can be operated from the front panel and from remote control software running on a PC Windows platform. Password protection can be set to allow only approved operators access to the controls.

To marry the best of both the digital and analog worlds, Aphex developed the model 2020 around advanced analog circuits tuned and adjusted by digital control. A carefully designed high definition (20-bit) digital I/O interface is provided for users who want to place the model 2020 within a digital audio framework. Optional professional standard AES/EBU I/O is available for digital audio systems while analog I/O is standard. Both methods of I/O can be selected for use at any time, and a defeatable autoswitch feature is available to automatically switch to the analog input should the digital audio data become corrupted or fail. The digital audio input accepts standard sample rates from 32k/s to 48k/s while the output sample rate may be synchronously slaved to the input or set up independently at any chosen sample rate. Both input and output are 20-bits wide. Because of the very high-grade converters and the extensive reconstruction afforded by the intermediate analog audio processing, the model 2020 serves as an outstanding sample rate converter. An example of how this applies is interfacing between a digital audio STL and a digital FM exciter. Digital audio can be supplied to the model 2020 from a typical 32kB/s 16-bit digital STL while the digital output from the model 2020 to the exciter can be set to 48kB/s (with 20 bits) for noticeably better on-air audio quality.

APHEX 2020 FM PRO AUDIO PROCESSOR

WARNING LIGHTS

1. BE Studio Warning Light
   This classic light comes with a 25 watt red bulb and an attention grabbing flasher. The silk-screened globe housing fastens to a steel mounting plate. Available legends are ON AIR, AUDITION, REHEARSAL, and RECORD. Specify vertical or horizontal lettering. Also available in other languages, or blank so you can label your own.

   60BR83500X MFR LIST $66.00

2. Titus Warning Lights
   Titus ON AIR and RECORDING lights are beautiful and practical ways of indicating that a studio is in use. Four internal lamps are wired in parallel, and use 24VDC, eliminating the need for relay interface boxes. The mounting base is of solid oak. Size: 8-11/16" x 4-3/4" x 2-1/2" (W/H/D). Lettering is on a smoked glass window that is available with either a horizontal or vertical orientation with a silver or a gold frame.

   60TOALXX MFR LIST $125.00

3. Fideliscac Warning Lights
   Red lettering on a black background provides a highly visible warning that microphones are live. ON AIR or RECORDING legends are available in English. The ON AIR legend is also available in Spanish, French, German, Japanese, and four other languages. Lights are 5" x 10" x 2-1/2" (H/W/D).

PANASCHEME MEDIA STORAGE

The guys at Panascheme understand you want what you want and 'no' is not an option. That's why they make the MS Series Enclosures available in so many finishes, two different sizes and with multiple drawer options for audio and video media.

MS Series enclosures come standard constructed of 3/4" wood panels and 4" black base. However all models are available without the base allowing them to be stacked. MS Series Enclosures are available in wood or laminate exterior finishes. These durable storage cabinets can be painted or stained to match existing furnishings.

Available in 27" (MSS) or 43" (MSL) wide versions, the MS enclosures come standard with casters and handles. Mix and match VHS, CD, DAT, and cassette tapes for the media cabinet that best fits your needs.

**MSL Drawer Options:**
- VHS Drawer: Holds up to 95 standard VHS tapes
- CD Drawer: Holds up to 350 CD jewel cases
- DAT Drawer: Holds up to 300 standard DAT Tape Cases
- Cassette Drawer: Holds up to 240 standard cassette cases
- Multi Drawer: Holds up to 150 DAT cases AND 120 cassette cases

**MSS Drawer Options:**
- VHS Drawer: Holds up to 57 standard VHS tapes
- CD Drawer: Holds up to 200 CD jewel cases
- DAT Drawer: Holds up to 180 standard DAT Tape Cases
- Cassette Drawer: Holds up to 150 standard cassette cases

MIDDLE ATLANTIC OBRK AND OSR24 OAK LAMINATE RACKS

The natural elegance and beauty of oak combine with value-oriented engineering to create a new line of modular equipment racks. Both the OBRK and the OSR series ship flat via UPS.

The OBRK series racks feature an attractive 3/4" oak laminate construction, and utilize modern 1/4-turn fasteners and threaded inserts to preserve a sleek outward appearance free from the presence of plugs or other hardware. Easily assembled with the included hardware, each rack features factory-installed 11-gauge, 10-32 threaded rack rail. The racking depth on all OBRK series Oak Racks is 18 inches.

The OSR series racks feature a gently sloped rackface to facilitate equipment viewing. Utilizing the same attractive 3/4" oak laminate construction found on the OBRK series, each OSR series rack feature casters to enhance mobility. 11-gauge rack rails are factory installed on the OSR.

MIDDLE ATLANTIC MULTI-DESK SYSTEM

Like all Middle Atlantic products, their new Multi-Desk System of configurable studio furniture is well built and affordable, and ships via UPS to save money. Design your setup around the MD-48, a 48” x 30” grey laminated tabletop with steel tube legs. “Quick-Lok” construction lets you assemble it in minutes. Simply lift the legs into place from their folded shipping position.

Then add your choice of optional Multi-Bridges and side Multi-Racks, both with rails. You assemble the tabletop Multi-Bridge as an open work space or as a rack with one or two bays. The rolling Multi-Racks provide added counter and rack space; one face is sloped, one is vertical, for maximum flexibility.

The standard system shown here includes an MD-48 desk, two MR-14W side racks, and an MB-6 overbridge that you can also set up as two six-space bays. We can also quote other configurations and tell you about optional modesty panels, cable management kits, and drawers.

CALL US TO ORDER OR ASK FOR AN INFO PAMPHLET.

MIXRAK

MIXRAK is an affordable, no-frills line of modular furniture. The design makes assembly and expansion easy. Board surfaces are protected by melaface and high pressure laminate. The desk is edged with 1-1/2” solid oak, the other edges are protected by T-molding. Heavy threaded rack rails ensure proper mounting of equipment.

CUTTING WEDGE

These charcoal gray acoustic tiles control noise, slap, echo, and standing waves. The tiles come in convenient 12” by 12” squares. They can be shipped via UPS in any quantity, so you save on shipping. Order by the case and save even more.

PANASCHEME RACKS

For fine furniture enclosures, look no farther than Panascheme, a Bradley Broadcast exclusive. They ship assembled, ready to install. We offer two series.

**Oak Trim Racks** are made of high density, 3/4" Domtar Melamine panels, with edges finished in a custom-milled red oak cap, treated with lemon oil. Standard color is black; other colors are available optionally.

**Oak Ply/Solid Wood Racks** have a beautiful all oak exterior surface constructed of 3/4" multi-ply, cabinet-grade panels. Edges are finished in red oak cap. Both models include a lightweight removable back panel, and pass-through holes in the bottom rear.

Standard racks are 18" usable depth models; call for other depths, glass doors, rear rail, locks, carpeting, and any other features you need. Racks may ship via truck. For a quality oak knock-down alternative that ships UPS, see below.

CALL YOUR BRADLEY PROFESSIONAL TODAY FOR PRICING INFORMATION ON THE PANASCHEME RACKS.

PANASCHEME OAK KNOCK-DOWN RACKS

These oak racks come ready for assembly, so you get a fine wood enclosure yet minimize your shipping expense. These are a step up from inexpensive particle-board knock-downs. The barrel-nut and through-bolt hardware doesn't strip even after multiple assemblies. The enclosures are made of multi-ply, cabinet-grade red oak and treated with tung oil for a durable finish. Edges are capped in solid oak.

Choose from four standard sizes, all with 17-1/4" usable inside depth and packed with hex key and hardware. Available options include other sizes and depths, doors, locks, rear rail, sloped front, and casters.

MIDDLE ATLANTIC RK RACKS

Build them yourself and save. Wood racks look nice and set up easily with the supplied Allen key and hardware. The surface is black laminate over 5/8" high density particle board. Rails are drilled and tapped to fit all equipment. Each rack ships knocked down for convenient UPS delivery. An optional caster set lets you roll your rack away. Other sizes are available by special order.

You can wall mount these economically with the WMS-20 shelf (inset), which holds up to 200 pounds.

MIDDLE ATLANTIC GANGABLE RACKS

Slim 5 is a knock-down metal enclosure that ships via UPS to save you money. Buy just the frame, or add removable vented side panels. These racks can be ganged together for versatility.

The patented corner joint provides great strength and helps in your setup. Slim 5 comes with substantial top and bottom panels; the bottom is open for cable access and pre-punched for optional casters and leveling feet. Electrical knockouts are provided.

Ask about optional split rear rack rails, cable chases, and front and rear doors. Usable depth 20".

Skirted Caster Base 61MACBS5 $105.00
Leveling Feet (4) 61MALF $19.00

SOUNDOLIER EQUIPMENT RACKS

Soundolier's industry standard metal utility cabinets have been redesigned for better ventilation, wire management, and overall appearance. They are complete with base, top panel, vented side panels, vented rear locking door, knockouts, one pair of fixed rails, mounting screws, and hardware. The rear door is removable and can hinge right or left.

Series 100 is shipped knocked down (K.D.) to save you money on shipping. Series WA100 is welded and pending UL approval. Both have new, easy wiring access through openings in the top and bottom. You can leave the openings for access and ventilation, or cover them with an optional panel. The top opening can accept exhaust fan ES195-22. Call us for optional solid or acrylic front doors, or WA200 series racks with front doors, adjustable rails, and available extra depth.

The racks above are in black textured enamel; other colors by special order. Inside usable depth is 17-1/4".

RAXXESS ERSS ECONOMY SPEAKER STANDS

These monitor stands are ideal for any studio and are constructed of 3/4" furniture grade hardboard, finished in black laminate. The speaker platform and base are 12" square. The bottom is easily removed to allow the 5" center post to be filled with sand for acoustic de-coupling. Sold in pairs, these stands are shipped knocked down in one box and assemble in minutes. Available in 36" or 48" heights.

36" weight 39 lbs. 61RXERSS36 MFR LIST $169.95
42" weight 41 lbs. 61RXERSS42 MFR LIST $179.95

CALL 1-800-732-7665 FOR BRADLEY PRICE
We carry the full line of Murphy Studio, Winsted and Nigel B computer and video furniture. Call us!

DESKTOP RACK STAND
Handle up to 13 rack units of equipment in an adjustable, lockable frame that goes from vertical to horizontal. Good for recorders and mixers. Size: 26"H x 21"W x 18"D.

60NBPLDRS MFR LIST $199.95
CALL 1-800-732-7665 FOR BRADLEY PRICE

RECORDBER STAND
Sturdy and movable, with heavy-duty construction and smooth rolling casters. Has 13 rack units of space plus eight additional units between its uprights.

60NBPLRS MFR LIST $459.00
CALL 1-800-732-7665 FOR BRADLEY PRICE

MIDDLE ATLANTIC RACK SHELVES
Quick and easy rack mounting in one, two, or three spaces. Steel is 16 gauge with durable black powder coat finish. Depths: 11" for U1, and 14-3/4" for U2 and U3. Inside left to right dimension on all shelves is 17 3/8". Need a lot of U2 shelves? Ask about the master pack of 50.

One space, holds 35 lbs 61MAU1 $29.00
Two space, holds 50 lbs 61MAU2 $38.00
Three space, holds 85 lbs 61MAU3 $42.00

MIDDLE ATLANTIC SLIDING SHELVES
The SSL is a new, low-profile sliding shelf that occupies one rack space and provides a black laminate slide-out surface with positive lockout and 11" reach. It supports up to 35 pounds. The universal telescopic rear support fits all racks. The popular SS version holds up to 50 pounds, extends 14", and now latches in both open and closed positions. The SS occupies slightly more than one rack space, usually not a problem due to the equipment being placed on top.

SSL 61MASSL $65.00
SS 61MASS $99.00

MIDDLE ATLANTIC CLAMPING RACK SHELVES
Adjustable rubber-lined clamps secure your unit from the top, "L" brackets grab it from the rear. Steel construction, vented bottom. These sizes are one-piece with 14-3/4" depth. Taller, knock-down models are available.

2RU 61MARC2 $32.00
3RU 61MARC3 $42.00
4RU 61MARC4 $47.00

RAXXESS SECURE RACK STORAGE
Store and secure tapes, tools, CD's, and detritus that can clutter up your life. The Rak-Vault is a steel, rack-mount enclosure with a hinged front panel and keyed lock. Black, baked enamel finish. 9" deep.

RKV-3 (5-1/4" high) 61RX3V $79.95
RKV-4 (7" high) 61RX4V $89.95
THE RACK RULER
We love it. This steel tape measure with belt clip pulls out to eight feet and is incremented in both rack spaces and inches. Bonus: the back of the tape has great formulas and engineering info.

THE RACK RULER  $12.95

PLEXIGLAS SECURITY COVERS
A lightly smoked Plexiglas door protects your equipment behind a keylock. Depth of covers is 1 1/2".

2 spaces  61MASEC12  $36.50
4 spaces  61MASEC14  $37.00
8 spaces  61MASEC18  $33.00

CUSTOM RACK SHELVES
Rack mount your non-rackable equipment, without unsightly gaps. Custom rack mounts are more than shelves. They bring your unit up to the next full rack space, and prevent it from sliding back with rear brackets. Custom cut-outs are made for your equipment, and the complete shelf is shipped to you in two to three weeks. Many patterns are already on file, so call us to review. Some assembly is required. These shelves accept units up to 17-3/8" wide.

Brushed and black anodized aluminum  61MARSH4A  $125.00
Textured black enamel on steel  61MARSH4S  $109.00

SECURITY COVERS
Ideal for providing both security and protection, these perforated steel covers are 1" deep and allow easy viewing of control settings. Screw notches let you remove them without unmounting the gear. Use with tamper-proof screws.

1 space  61MA51  $20.00
2 spaces  61MA52  $24.00
3 spaces  61MA53  $26.00

REAR HANGING BRACKET
To support amps and other gear with rear ears. Each is a pair.

RH-2 2 Space  61MARH2  $8.00
RH-3 3 Space  61MARH3  $9.00
RH-4 4 Space  61MARH4  $10.00

BLANK PANELS
Our best selling blank panels, flanged for strength and made of black brushed and anodized aluminum. Easy to machine.

1 space  61MABL1  $12.50
2 spaces  61MABL2  $13.75
3 spaces  61MABL3  $16.75
4 spaces  61MABL4  $18.75

ECONO-BLANKS
They're now flanged for strength. Black powder coat on steel. Less expensive but heavier to ship. Need a lot? Save with master packs.

EB-1 1 space  61MAEB1  $6.25
EB-2 2 spaces  61MAEB2  $7.95
EB-3 3 spaces  61MAEB3  $8.95
EB-4 4 spaces  61MAEB4  $10.95
EB-5 5 spaces  61MAEB5  $12.95
EB-6 6 spaces  61MAEB6  $14.25
EB-1 Master Pack (50)  61MAEB1MP  $219.00
EB-2 Master Pack (25)  61MAEB2MP  $269.00

KD SHELVES
KD means knock-down. When you assemble them, you save on shipping. Flush studs are provided with bottoms for easy assembly. KD shelves are 16 gauge steel painted with black baked enamel, and can be used with equipment up to 17-3/8" wide. Ears come packaged in pairs. Call for extra-tall ears and extra-deep bottoms.

Important: For a complete shelf, purchase both a bottom section and a set of ears.

Bottom Section, 15-1/2" deep
61MAKDB  $17.00
Matching Ears, 3-1/2" tall  61MAKDE1  $28.00
Matching Ears, 5-1/4" tall  61MAKDE2  $30.00
Matching Ears, 7" tall  61MAKDE3  $31.00
Matching Ears, 8-3/4" tall  61MAKDE4  $32.00
Matching Ears, 10-1/2" tall  61MAKDE5  $33.00
Matching Ears, 12-1/4" tall  61MAKDE7  $35.00

Bottom Section, 11-1/2" deep
61MAKDBS  $17.00
Matching Ears, 3-1/2" tall  61MAKDE1S  $27.00
Matching Ears, 5-1/4" tall  61MAKDE2S  $29.00
Matching Ears, 7" tall  61MAKDE3S  $31.00

HALF RACK UNIVERSAL SHELF
Mount one or two half-rack devices horizontally in one rack space. Mounting hardware is included and the shelf is drilled with universal holes. 10" deep. Need lots? Ask about the 50-piece master pack.

61MAUTR1  $19.95
MIDDLE ATLANTIC, CONT...

RACK CHASSIS
For your custom electronics. Flush face is easily removed for punching and the rear panel is full height and removable. Face and rear are black anodized aluminum. While the top, bottom, and sides are steel. These chassis are 10" deep and ship ambled.

ALPS MEDIA STORAGE CABINETS

Look to the Alps when you have a lot of media to store, whether it's CD, DAT, reel, cassettes, or video. Each has a footprint of only 2 x 4', and look how much they hold. Partitions can be mixed among drawers in a single unit. Cabinets come in white, almond, and gray laminates. These are typical CD models. We have similar pricing for other media. Prices do not include truck freight.

   Five drawer floor unit for 2120 CD's, 42"H
   60ALCBADBSCD $1,670.00
   Eight drawer floor unit for 3392 CD's, 60"H
   60ALCBAB8CD $1,439.00
   Six drawer top unit for 1836 CD's, 45"H
   60ALCBB66CD $1,385.10

Alps Mini-storage cabinet for any media. This compact cabinet provides the same safety and security for your media as its larger brothers, at a great price!

   Alps Mini Media Cabinet 60ALMMSC $649.00
   Lock for MMSC 60ALMINLOCK $80.00

ORDERING INFORMATION

Minimum order: $25.00 in merchandise and $8.00 in shipping and handling.

Ordering by telephone: Call 800-732-7665 or 301-682-8700 during our office hours, listed at right. Net 30 terms are available to qualified buyers, subject to credit limit. We require a firm purchase order signed by an authorized agent of your company for Net 30 purchases. We also welcome MasterCard, Visa, American Express, and Discover; credit card orders are authorized in full at the time of purchase.

Ordering by fax: Send your order by fax to 301-682-8377, 24 hours a day. Include shipping and invoicing instructions.

Ordering by mail: Mail your order, with shipping and invoicing information, to Bradley Broadcast Sales, 7313-G Grove Road, Frederick, MD 21704. Enclose your purchase order (if you have an account), or payment or credit card information. Remember to include tax if appropriate.

Shipping charges: We can quote shipping charges, so you may include them with your prepayment, or we can ship your merchandise freight collect, or charge shipping to your credit card, or ship via the carrier of your choice using your account number. If you have a Bradley account in good standing, shipping charges can be added to your invoice.

COD shipments: COD orders are limited to items immediately available from stock. We reserve the right to ship COD only to established clients. Shipments in excess of $500 may require payment by certified check. We do not ship COD via U.S. Mail.

Tax: Maryland customers must add 5% sales tax or provide signed documentation of Maryland sales tax exemption at the time of order.

DAMAGED, DEFECTIVE, OR INCORRECT MERCHANDISE

If any package shows signs of damage, do not accept it. We will replace the item when the carrier returns it to us, or we will re-ship immediately upon notification of the problem. In the latter case, new merchandise will be separately invoiced or charged, with credit or refund issued upon return of defective merchandise. When you receive any merchandise, always inspect it before signing. Under carrier rules, it is YOUR responsibility to report damage or loss. Note damage on any shipping documents, and save all packing material and waybills. Request inspection by the carrier immediately. Claims for defective or incorrect merchandise must be reported to us within five days. When you call us, we will issue you a return authorization (R.A.) number, which MUST appear on our return package or we cannot accept it. If you order the wrong item, you are responsible for shipping charges to return it. If the error is ours, we will pay for shipping. Merchandise returned for any reason other than defects or damage is subject to restock fees. No returns or exchanges after 30 days.

BRADLEY BROADCAST GUARANTEE

All merchandise is new and fully warranted by the maker. Bradley Broadcast neither offers nor implies any warranty other than that provided by the manufacturer. Bradley does not guarantee the suitability of any product for your intended purpose and is not liable for consequential damages incurred in the use of any product we provide. Product specifications are subject to change without notice.

ACCOUNT TERMS

Credit terms are Net 30 days. Interest at the rate of 1.5% per month (18% per annum) will be charged to overdue accounts, and further credit privileges suspended at our option. The calculation of due date is based upon the shipment date for each item, or our invoice date, whichever is later. We invoice partial shipments and expect payment within 30 days on each shipment. If your institution or company cannot accept partial billings, we will hold merchandise for complete shipment at one time. Postmark date of your payment must be within 30 days of invoice or ship date to be considered timely.
We always love doing what we consider the best part of creating the catalog – designing the cover. My special thanks to Eric Schwartz, who started the antique radio craze at Bradley and allowed us the use of his personal collection, and to “my guys”, Ray Biba, Ric Goldstein, Bob Eburg, and Art Reed for the use of their radios.

A special thanks to Renee Ciufo at RTM who took a very generic idea, “something with antique radios, Bob”, and developed the very cool concept of radio heads. And last, but not least, thanks to Emily, who reminded me to “take it down a notch.”

We hope you enjoy the trip down memory lane.

TOOLBOX MAGIC

Whirlwind custom panels and wiring systems ensure the reliability and performance of facilities throughout the world. But many of our favorite products in the field are housed in smaller venues — toolboxes, toolbags, briefcases and gadget drawers. These are the magic items that get you through the day on an installation or trouble-shooting mission, and we dedicate them to everyone who has had to make a system work on a deadline.

MICPOWER provides phantom power for most condenser mics from two 9V batteries.

The TESTER quickly and reliably checks cables with almost any combination of XLR, Phone, and Phono connectors for shorts, opens, or cross wiring.

The Qbox® packs a built-in speaker with amp, a built-in mic with preamp, a built-in reference tone generator and Voltage Present LEDs for detecting phantom or 3-wire intercom power. It drives headphones and carbon earpieces and operates at mic or line level. A real life saver for audio line testing.

The PHASE REVERSER is the quick cure for an "out of phase" mic or piece of processing gear.

The Lifter provides an immediate ground lift to solve a problem or troubleshoot one.

The MD-I™ combines a studio-quality mic preamp with a transformer-isolated line driver and a built-in headphone amp. The mic input and headphone driver have individual gain adjustments and phantom power is switch selectable. An innovative Mix control mixes the preamp input and a separate aux input to permit simultaneous headphone monitoring of an additional line level signal.

IMP PADS come in 10, 20, 30, and 40dB versions for temporary or permanent level correction.

The LINE BALANCER SPLITTER balances and isolates or splits line level signals. With individual ground lift switches on each output and both XLR and 1/4" TRS for maximum flexibility.

FROM whirlwind
Zephyr Is Everywhere.

The irrepressible Telos Zephyr has earned a hard and fast place in the hearts of broadcasters, engineers, and recording professionals around the world. Why? With its integrated ISDN terminal adapter, MPEG Layer 3 and Layer 2 compression technology, optional AES/EBU digital I/O, and an intuitive user interface, the Zephyr was designed by Telos specifically for broadcast audio applications over ISDN. It’s the ideal solution for remote mixing and broadcasts, ad hoc networks, recording sessions, voiceovers, distribution of commercials, backup to satellite and microwave links, and nearly any other application you can imagine. How could anyone function in today’s world without one?

ZephyrExpress Is Everywhere Else.

With its ground-breaking design and capabilities, the amazing new ZephyrExpress takes Zephyr’s industry-leading operation wherever you need to go, and combines a full-featured ISDN codec and three digitally-controlled stereo mixers in a single, road-worthy chassis. With an unprecedented, easy-to-use interface and specs that blow away most studio codecs, the ZephyrExpress is like nothing you’ve ever experienced. Now you can hit the road without having to leave your Zephyr behind.

The Best Way to Hear from There™
