# Graybar ELECTRIC COMPANY 

CATALOGNO. 105

As the owner of a Graybar Catalog No. 105 you lave in your possession the most complete catalog of electrical supplies and equipment yet published. We estimate that approximately 65,000 items are listed covering nearly all the commonly used products and many specialties. However, the scope of the Electrical Industry has increased so rapidly that even this book cannot be complete. If you don't find what you want listed, please call our nearest office and warehouse (see last page for location).

PRICES IN THIS CATALOG ARE APPROXIMATE LIST PRICES AT THE TIME OF PUBLICATION AND SUBJECT TO CHANGE WITHOUT NOTICE.

PRICE OF THIS CATALOG $\mathbf{\$ 1 0 . 0 0}$ POSTPAID

# what YOU can expect 

## . . . all the products you need from a single source.

Graybar offers the largest variety of electrical supplies and equipment available from any single source. On standard items, even on items which are not usually stocked, we can give you the fastest possible delivery. More than 100,000 electrical products for the home, the office, industry and goverument, are available through Graybar to fill your electrical requirements emergency or normal. One order, one responsibility will save you time and money.
. . . the quality and reliability you want (and get) from the nation's leading electrical manufacturers.

The Graybar tag is a symbol of quality and dependability. We have a reputation for distribution of top grade, top value supplies and equipment designed to do any kind of electrical job. Long term association with nationally known leaders in electrical manufacturing (many relationships existing for close to and, even more than, half a century) has established Graybar as TIIE place to come for the right products to answer your electrical needs. You can purchase with confidence, when you buy from
 Graybar.

## . . . the specialized help you require to assist with your problems.

It's not enough to sell the best products-at least that's the way we feel. Graybar offers, as well, know-how in the correct use and application of these products. Our specialists in cooperation with our Suppliers' engineers and technicians are available to help you with unusual electrical problems. They have a thorough knowledge of the materials and equipment best suited to your requirements. Call Graybar first when you need special help. It's the place to get it!

From Portland, Maine . . . to Los Angeles, California __ From Seattle, Washington . . . COAST TO COAST - BORDER TO BORDER

## FROM

 GraybāR
## . . . a localized service with national resources.

Graybar service can be had from coast to coast, border to border. It is a localized service with national scope and resources. In more than 130 locations established strategically throughout the country, you can get "home town" service from your local Graybar house. It's as near as your tele-phone-and waiting for your call. For emergency needs . . . for special help . . . for complicated orders . . . for routine purchases, call Graybar first! It's the sure, fast, convenient way and only an arm's length away.

## . . . service that's sure and satisfying.

The guesswork is taken out of your delivery dates when you plan your purchasing with Graybar. You get the materials you need when and where needed. Through our unique, speedy, service set-up, the materials you order are shipped from our widely diversified local warehouse stocks immediately. Out of stock items will be expedited from other of our branch warehouses or direct from our numerous, loyal sources of supply. Billing is last, too! No long wait to learn the exact status of your account.
. . - seasoned experience backed by streamlined operation.
Graybar's experience predates much of the vast electrical industry as we know it. Yet in product lines, methods and specialized services, we endeavor to keep a step ahead of today's requirements. Founded in 1869, we have kept apace of rapid developments in the electrical and clectronics fields. Actually the name Graybar is only thirty-two years old but company tradition extends back into the beginning of the Western Electric Company and the electrical industry itself, giving us eighty-nine years of electrical heritage and know-how.

## . . . a personal interest in serving you and serving you right.

Graybar people own their company. That's why they are anxious to give you the kind of service you expect. They have a personal interest in wanting to maintain customer good will, for it not only protects their jobs, it protects their company. Graybar employees purchased their company in 1929 from Western Electric and have made a success of it ever since because of this personalized service. Whatever your requirements, be they catalog information or quotation service, counsel on problems or delivery of an order, you get this friendly, efficient service from every Graybar House.

to Jacksonville, Florida

From Dallas, Texas . . . to Duluth, Minnesota GRAYBAR'S SERVICE IS AS NEAR AS YOUR TELEPHONE. CALL GRAYBAR FIRST

## PRICES

Prices found in this catalog are revised to agree with the latest lists at the time of going to press. It is understood that they are subject to change or correction without notice and are, therefore, not offered by us as a quotation. It is contemplated that all prices are for shipment from our warehouse unless otherwise specified.

## ORDERS

Where possible, we have placed opposite each article a calalog number. When ordering give the catalog number and description of the article required.

You are requested to specify the routing over which you prefer shipments to be made. In the absence of specific instructions, we shall use our best judgment in selecting the route, but we are not responsible for extra trucking expenses at destination.

## TERMS . . .

Onr terms are 30 days net from date of invoice.
layments may be made by check, bank draft, postal or express money order, drawn to the order of or endorsed to the order of the Graybar Electric Company, Ine.

Payments in currency through the mails even if registered are not recommended and are at sender's risk. We are not responsible for loss or miscarriage of the mails.

Receipts are not issued for remittances unless requested. Our endorsement on remittance is acknowledgment of the receipt of the funds.

We solicit new accounts on a credit basis and in order to give prompt service, request (if you are not well rated by the Commercial Agencies) that you forward bank and trade references or other information of a credit character with your order. These will be immediately acted on and the results held in striet confidence for our sole use. When reasonably satisfactory, shipment will follow with all possible dispateh.

To avoid the delay incidental to communicating with references, etc., when immediate shipment is desired, it is suggested that you send cash in advance or anthorize us to ship your first order C. O. D. or sight draft bill-of-lading attached, through a local bank. This will permit us to make immediate shipment of your initial order and communicate with you as quickly as possible relative to the establishment of credit, if you desire open account facilities for future convenience.

## RETURNED GOODS

We can lake no responsibility for any material returned without our authorization. Where we give shipping instructions for returning goods, they should be carefully followed so that credit may be issued promptly.

## SHIPMENTS

As experienced packers are employed, and as reasonable care is used in packing, we cannot be held responsible for breakage in packages which are delivered in "good order" by the carrier.

Shipments of glassware are made at your risk.
Goods ordered to be shipped by parcel post will be sent only at the purchaser's risk of loss or damage.
(ioods are sold f. o. b. shipping point unless otherwise specifically stated.

## RESPONSIBILITY

All statistical information contained in this catalog, pertaining to Strength and Proper Working Loads of material, tools or machines is derived from tables compiled by the Manufacturers thereof, and is reprinted by us for the convenience of the buyer. This information is necessarily based upon use under proper working condilions. We assume no responsibility by this reprint, and in no way do we give you a guarantee, expressed or implied, on any material.

# Phelps Dodge Building Wire and Cable 

## Single Conductor- 600 Volts N.E.C.

## Thermoplastic Insulated <br> Habirdure-Type TW

Insulated with Habirdure, a synthetic resin possessing high dielectric strength. Brated covering is not necessary because of the toughness of this insulation. Hahirdure is practically non-aging, is highly resistant to moisture, oil. acids and alkalis and is casy to pull. Omission of braided covering reduces outside diameter to a minimum.
Type TW: Approved by N.E.C. for general purpose wiring and also for use in wet locations at $60^{\circ} \mathrm{C}$.

## 3-Conductor-Round

## Lead Covered

## Type RML—Code Grade Insulation

Individual conductors insulated with code grade rubber compound and enclosed in a fibrous covering. Conductors are twisted, filled with jute, and covered with rubber filled tape and over-all lead sheath.

For installations where greater flexilility is required than obtainable with solid conductors. Always recominended for larger sizes where solid conductors would make cable too stiff to handle.

# Phelps Dodge Service Drop and Entrance Cable 

## 2- and 3-Conductor

Concentric bare neutral cable may be used economically for many types of installations, suel as service drop cable from secondary wires at the pole to point of attachment at building, service entrance cable or combination service drop and service entrance permitting a non-splice connection bet ween service wires at pole and service efuipment.
Also has further use as a range cable and can the used for this service within the building up to range receptacle. I Ias a smooth moisture-resisting flame-retarding finish. Standard color for sityle sl) eable is black. Standard color for sityles sE-l and SE-A is neutral gray; however, other colors can be furnished upon request. The eoverage of insulated conductors by the concentrically stranded bare neutral makes Phelps Dodge Service Drop and Entrance Cables virtually tamperproof.
Standard fittinws are available for all types.

## Type SD Service Drop Cable

Approved by Underwriters' Laboratories

Primarily a sersice drop cable for use from secondary wires at the pole to point of attachment at huidding. May also be used as a service entrance cable if protected by conduit.
Has either one or two insulated inner conductors over which is latid a concentric bare conductor protected by paper lape and moisture and flame-resisting braid. In 3-conductor cables, insulated conductors are coded for quick identification.

## Type SE-A Service Entrance Cable (Armored) <br> Approved by Underwriters' Laboratories as Type SE

Armored service entrance cable for use without conduit. Similar in construction to Type SE-T except for a flat steed armor tape applied directly over the bare neutral. Approved for the same sorvice as Type SE-L without exception. Type SE-A calle is generally used on the exterior of a building where it may be subject to mechanical injury.

Size 10 solid- Annealed.
Other Sizes--stranded soft drawn.

# Type SE-U Service Entrance Cable Unarmored) 

Approved by Underwriters' Laboratories as Type SE

Can be installed on exterior and interior of a building without conduit.

Approsed hy the I'nderwriters for service directly to the ramgerereptarle; may be used for the entire serviee or any portion of the wiring between the pole line and the electric range or service recoptinle.

The use of 'Type sib-d cable reduces the items required for any installation to a minimum and thereby effeets savings where used.

Type se-d entrance cables have either one or two insulated immer conductors over which is laid a concentric bare conductor proteded by rubberized tape and a substantial watherproofed cotton braid, finished gray or other suitable color if desired, and firming a smooth, moisture-proof covering.

# Phelps Dodge General Purpose Type RR Cable For Direct-Burial and Duct Use-Neoprene Sheathed Habirprene 

Single Conductor

2-Conductor
Designed for use in ducts or for direct underground burial. Tough Habirprone (nooprene) sheath is resistant to moisture, alkalis, acids and abrasion, assuring long service life in underground installations

Habirduct moisture resistant insulation is supplied for 600 volt cable, and IDabirite ozone resistant insulation is supplied for 5,000 volt cable.

Habirprene sheath conforms to A.s.'T.M. Sperification D-752, lutest issue. IIabirprone sheathed calles conform to the dimensional requirements of I.D.C.E.A. specifications

## 3-Conductor

for rubber or thermo-setting synthetic sheaths. Ileavier sheaths for unusually severe service conditions can also be furnished.

Single conductor cables are assembled with sheath directly over insulation; multiple conductor cabtes have single rubberfilled tapes over individual conductors, and are assembled with suitable fillers and rabber-filled tape over the assembly.

Cables of other sizes and voltage ratings are also a vailable. For further information contact Graybar.

GraybaR

## Phelps Dodge Varnished Cloth Insulated Cable

For connecting equipment of all voltages in power stations and substations. Used in buildings instead of rubber-insulated cable where special reliability is necessary, and instead of paper insulation in lead sheathed cable subjeet to crystalization from vibration.
Varnished cloth tapes are helically wound over conductors with mineral base grease between wraps of the insulation.

*"Preferred voltage ratings" for general apparatus, recommended by N.E.M.A.-N.E.L.A. Joint Committee on voltage standardization.

Two-conductor cables will be furnished in round construction unless flat construction is specified on orders. All cables in aceordance with I.P.C.E.A. and A.S.A. standards.

For additional information, including prices, contact Cravbar.

Phelps Dodge Non-Metallic Sheathed Cable Underwriters Approved
Perma-Dure Thermoplastic Multi-Purpose Type UF and NMC Underground Feeder and Branch Circuit Cable

HABIRSHAW PERMA-DURE TYPE UF $14 / 2$

These new cables eliminate costly conduit and permit low cost installations in locations where resistance to moisture and corresion are basie requirements.
Highly resistant to flame, moisture, rot and ahrasion. Flexible, lightweight, simple to install, strip and connect.

## PD-X Non-Metallic Sheathed Cable

## Type NM- $\mathbf{6 0 0}$ Volts

Inspected and Labeled by Underwriters' Laboratories, Inc.
Connections easily and quickly made. Insulation is clean and smooth. Paper armor is applied with a long twist. Quickly removed, no sticking. Barrier tape keeps finishing eompounds out of the cable.

For use in new and old honse wiring for all cireuits beyond entrance where permitted by local code.

## Phelps Dodge Flexible Cords Type S or 50600 Volts

Used as portable power supply cords for small electric tools and machinery. Listed loy National Electrical Code as suitable for peudent or portable application in damp places for extra hard usiage.
Type S has Buna-S synthetie rubher jacket; type So jacket is meoprome.

Type SJ or SJO Cords- $\mathbf{3 0 0}$ Volts

Similar to type S and SO; however lave thinner jackets. Used for drop lights, lamps and small tools.

## Phelps Dodge Armo-Lok Interlocked Armor Cable

Varnished Cloth Insulated

Provides industrial plant and electric utilities engineers a unit package, metal-clad line of materials to replace cables in conduit or in underground ducts or metal clad hus.

System is made up of Armo-Lok power and control cables with a fully coordinated line of terminators, straight and branch joints and junction boxes, installed on racks, or in troughs or baskets with a pleasing over-all appearance.

Cables furnished with galvanized steel, bronze or aluminum armor.

## Phelps Dodge Neoprene Arc Welding and Power Supply Cable

Cable is made with a super flexible conductor composed of fine, solt-drawn, bare copper wires. Has paper separator for case in stripping and greater flexibility.
Shoathol with a tomgh, durable neoprene compomad that resists heal, uils, acids, alkalis. Cable meets full requirements of A.s.T.M. Sprecilications D-T.3.2.

Note-Standard Weiphts, Hesistances and Breaking Strengths are calulatex and rounded off according to the methods prescribed in ASTM B-258 and the following formulas.

Weight, lhs. per $1000 \mathrm{ft} .=$ C.M. $\times 0.00302699 \times 1.02^{*}$
Weight, lhs. per mile $=$ C.M. $\times 0.0159825 \times 1.02^{*}$
*'The factor 1.02 in the ahove provides for the increase in weight due to trandiug. Use 1.01 for conductors consisting of 3 st rands.
Variations in the above weights are to be expected in comnercial practice.
D.C. Hesistance, ohrns per $1000 \mathrm{ft} .=\frac{\mathbf{P}}{\mathrm{C.M}} \times 11.8504 \times 1.02^{* *}$
$P=910.15$ ohms (mile, pound) for Hard Drawn Wire and
905.44 ohms (mile, pound) for Medium-Hard Drawn Wire.
**The factor 1.02 in the above provides for tbe increase in resistance due 0 stranding. Use 1.01 for conductors consisting of 3 strands.
The Reastance values are hased on ASTM sprecifications; the values hown are maximum and thus higher than the average values for Com nercial Cahles.
Breaking Strength, Ibs. $=$ Tensile Strength, minimum psi.*** $\times$ C.M. $\times 0.7854 \times 0.9^{* * * *} \times 10.6$.
***Teasile Strength, minimum psi, as given in the appropriate ASTM specifications for Hard Drawn and Medium-Hard Drawn Wire for the respective diameters of the individual strands.
****The factor 0.9 provides for the decrease in tensile strength due to atranding.

## Phelps Dodge Weatherproof Wire and Cable Type URC-Triple Braid

Made to conform to the requirements of ASA specifications for Weather-resistant Wire and Cable, URC Type, which are the recognized American Standard for this product

## Phelps Dodge Traffic Signal Control Cable

Habirdure Insulated-600 Volts<br>Solid Conductors

Designed for control wiring on traffic-signal circuits. It can be installed in conduit or ducts, in open air, or buried directly in the earth.

Can be easily and readily installed because color coding of the individual conductors facilitates circuit identification. The jacket of smooth Itabirdure allows easy pulling into conduils and ducts. Habirdure cable is practically nonaging, is non-inflammable and is highly resistant to oils and corrosive chemicals.

Individual conductors are solid annealed bare copper insulated with $1 / 32-\mathrm{in}$. color coded Ilabirdure. The assembled conductors, with necessary fillers to make round and compact, are covered with a durable cable tape and overall is applied an extruded black Habirdure jacket.

Phelps Dodge Trolley Wire

Round

Figure Eight

Grooved

Figure Nine

Available in round, grooved, or in figure 8 cross-sections. Conform to the requirements of ASTM specifications.

## Phelps Dodge Insulated Wires and Cables

## General Information

Phelps Dodge wires and cables are insulated with rubber thermoplastic material, paper or varnished cloth.

Some of the special compounds regularly furnished by Phelps Dodge are briefly described. Complete specifications and information on these types of insulation will be furnished on request.

## Code Grade Compound Underwriters' Type R

A standard compound, although designed primarily to meet minimum requirements of Vational Electrical Code, possesses superior electrical, mechanical and aging properties.

## Habirite

Habirite is a high voltage compound of butyl rubber for use in circuits up to 30,000 volts in both single and multiple conductor constructions. It is corona-resistant and has remarkable aging qualities.

Recommended for installation at low voltages where cable is to be subjected to alternate wet and dry conditions up to 8. C. Habirite is furnished with any of the standard coverings such as lead sheath, neoprene sheath, cotton braid, asbestos braid, etc. Conforms to A.S.T.M. Specification D-1352 and 1.P.C.E.A. Standard S-19-81 Appendix () ozone resistant butyl rubber insulation. The principal application is in medium voltage distribution circuits and series street lighting.

## Habirdure

Insulated with a plasticized synthetic resin which is noninflammable, highly resistant to oils and corrosive chemicals. Mechanically tough and requires no outer protective covering. Has exceptionally high dielectric strength and is highly corona-resistant. Il labirdure insulation is practically non-aging as it does not oxidize. Made in a wide variet y of fadeless colors The clean, smooth, tourh finish makes it casy to install. Conforms to A.S.T.M. D-73 4 and I.P.C.E.A. Standard S19-81.

## Habirduct <br> Underwriters' Type RH and Type RW

A moisture and heat resistant rubber insulating compound. Conforms to requirements of Underwriters' Laboratories for Type IRII and Type RW insulations and to the requirements of A.S.T.M. Specifications D-754 and D-755. It is the recommended insulation for secondary network cable and other low voltage constructions for installations requiring a heat and moisture resisting grade of insulation.

Cable is furnished with any of the standard coverings such as lead sheath, neoprene sheath, cotton braid, asbestos braid, etc. Habirduct wire and cable is suitable for operation at conductor tenperatures up to 75 C .

A vailable also is a combination RII-RW type wire which is approved by Underwriters' Laboratories for use as Type IIW at temperatures up to 60 C ., and as RII up to 75 C .

## Type RHW

A heat and moisture resistant rubber insulation compound incorporating the most modern development. It conforms to the requirements of Underwriters' Laboratories for Type RIIW insulation and is approved by Underwriters for use in either wet or dry locations with conductor temperatures up to 75 C .

## Habirprene

Habirprene is a generic term for the neoprene compounds used as wire and cable coverings. Itabirprene jachet provides a tough abrasion resistant covering for many types of cables. Vot affected by weather or sumlight and ean be used in locations where exposed to oil, acids and alkalies, conforming to A.S.T.VI. D-752 and I.P.C.E.A. Standard S-19-81 Appendix K.

For additional information contact GRAYBAR.

## Phelps Dodge Slow Burning Wire and Cable

Approved by Underwriters' Laboratories
Triple Braided

Supplied with three cotton braids, each thoronghly saturated with white fireproof compound. The compound used on the outer braid provides a hard smonth finish, with no sacrifice of conductor flexibility.

Recommended for use in furnaces, boiler rooms, foundries and other installations having continuously high temperatures.

Made to conform to the remuirements of ASA specifications for Slow-[Burning Wire and Cable, which are the rocognized American standard for this product.

## Phelps Dodge Bus Tube Extruded and Drawn Seamless Copper

Minimum conductivity. $98 \%$.
Made to conform to the requirements of ASTM specifications which are the recognized American standards for this product.

Tubular hus shapes are processed to a uniform temper and to meet close dimensional and st raightness refuirements.

These shapes are characterized by greater mechanical rigidity per sfuare inch of crosis-section, and provided for hetter heat dissipation, decreased "shin effect," lower corona losses and better efficiency of transmission at power frequencies.

Tubular shapes may be easily bent or flattened for application of terminals or to meet special installation requirements.

## Anaconda Underground Service Cable <br> Type USE-Durasheath Jacketed 600 Volts

Approved by Liderwriters for use as one cable from pole underground to house to meter.

Neoprene jacket construction furnishes a high deyree of resistance to tlame, sumlight, oils and suil acids and athatis. On request, cable furnished with 60\% rubber jachet instead of neoprene.

Conductor size should be adequate, particularly for buried cables, to reduce dander of mechanical trouble.

Insulation, Type RW, moisture-resistant.

## Anaconda Service Drop and Secondary Cable

Type N-SD-Neutral Supported- $\mathbf{3 0 0}$ Volts
Consists of one or more aluminum or copper conductors, each insulated with black, pigmented polyethylene or neoprene and twisted around one bare conductor. The latter serves both as neutral and supporting messenger.

## Aluminum-Copper Messenger

2-Conductor-Hard Drawn Copper Messenger Neutral

Anaconda Service Drop and Secondary Cable 2 Plus 2 Type N-SD and Type K-300 Volts

Type N-SD (2 plus 2)

## Type K

2 Plus 2 Type N-SD: lusulated conductors are covered with a wall of rubber and another wall of neoprene, providing improved insulating quality and equal weathering properties.
Type K: Consists of two solid or stranded aluminum conductors; neoprene insulation on each, laid parallel, jute fillers, saturant and finish per ASA Standard C8.19, and a neutral conductor of hard-drawn aluminum ribbons applied concentrically over-all. Not approved by U/L.. lnc.

## Anaconda Control Cable

*Conductors insulated with vinyl resin thermoplastic compound.
$\dagger$ Conductors insulated unless otherwise specified, with Type ANW (Incat-resistant) rubber compound. Other compounds can be supplied.
$\ddagger$ A vinyl resin thermoplastic compound
Based on IPCEA Standard S-19-81, 1st Edition, January 1946 with additions and corrections thereto.
Conductor sizes listed are standard for control cables. Nonstandard sizes can be supplied to purchaser's specification.
These conductor assemblies are representative. Others can be furnished if in quantity.
These data are approximate and subject to normal manufacturing tolerances.
Prices on application.

*Insulated with rubber compound.
**Insulated with Type Al3 (Anaconda Butyl) ozone and heat-resistant compound.
Durasheath cable with light jacket is recommended by IPC.EA for use in conduit and underground ducts; with heavy jacket for aerial and direct burial.

** lusulated with rype AB (Anaconda Butyl) ozone and heat-resistant compound.

13ased on 11’ClíA Standard S-19-81, 2nd Edition, February, 19.51 .

Heavier jacket thicknesses may be advisable where service conditions are unusually severe.

These data are approximate and suhject to normal manufacturing tolerances.

## Anaconda All-Purpose Cable

Durasheath-Nonmetallic Sheathed Cable
Single Conductor-0-600 Volts-Nonshielded
*hasulated with Type RH-liW (Anaconda Type ANW) rubber compound.
$\dagger$ Durasheath cable with light jacket is recommended by LPCEA for use in conduit and underground ducts; with heavy jacket for aerial and direct Inmial.
Based on ID'CEA Standard S-19-81, 2nd Edition, February, 1951.
$\ddagger$ Durasheath cable with heavy jacket approved by Underwriters' Laboratories, Inc. for use as follows: insulated with Type RIIIW compound, as Type LSEL underground service entrance cable at 7.5 C ; with Type R11-RWW compound as Type ISE or 'Type I $F$ at 60C; recommended by IPCLEA for aerial and direct-burial installation.

SNonveturnable reels. All others are standard returnable.
These data are approximate and subject to normal manufacturing tolerances.

*For 3 conductor cables. They are recommended to have both grounding conductor and individually shielded insulated conductors and so furnished unless otherwise specified by the purchaser. Conductor temper is furnished medium hard drawn.
$\dagger$ Conductors are insulated with a heat-resistant ruliber compound meeting requirements of AS'IM Specification D75.4-5 IT.
$\pm$ Conductors are insulated with an ozone-resistant loutylrubber compound meeting the requirements of IPCFA Standard S-19-81, February, 1951, Appendix O, amended rated at 85 C . maximum conductor temperature.
¢ Corrent ratings based on cables installed in ventilated boreholes having a mean ambient temperature of 40 C . with single conductor cables carrying alternating current, one cable per borehole.

§ozone liesistant insulating compound. (Anaconda Butyl.)
Based on IP' IEA Standard S-19-81, 1st Edition, January 19.16 with additions and corrections thereto.

These data are approximate and subject to normal manufacturing tolerances.
$\dagger$ Lead thichness will differ in some sizes if the requirements of the Underwriters' Laboratories, Inc. are followed.
Prices on application.

*Tape or braid over individual conductor insulation.
$\dagger$ Three conduchor, rubber power cable can be supplied, shiolded up to 15,000 Volts.
 for 600 -volt service.
§lead thickness will differ in some sizes if underwriters' rexuirements are followed.
Based on IIPCEA Standard S-I9-81, Ist Edition, Jantary, 19.16 with additions and correetions thereto.
These data are approximate and sulijeet to normal manufacturing tolerances.
Prices on application.

Conductors insulated, unless otherwise specified, with Type 1 RII (heat-resistant) rubber compound. Other compounds can be supplied.
*Recommended insulation thicknesses apply to singleconductor and individual insulated conductors of multiconductor cables.

Cables rated 2001 to 7000 volts are insulated with an ozone-resistant and heat-resistant compound, (Anaconda Butyl).

For two-conductor 600 -volt concentric mining machine cable, $1 / 64$ inch greater insulation thickness than shown above is recommended.

## Anaconda Portable Power Cable Securityflex 0-600 Volts Single Conductor

## ANACONDA

Conductors are insulated, unless otherwise speciliod. with T'ype RH (heat-resistant) rubber compound. Other compounds can be supplied
Steel wires not to exceed $10 \%$ of the area of the conductor may be substituted for copper when greater tensile strength is required.

Hased on 1000 foot lengths. Longer lengths can be furnished to purchaser's specifications.
All types and sizes of portable cables for mine use branded with the designation 102 I3M, by authorization of Underwriters' Laboratories, Inc.
Instead of standard neoprene fillers, Type W cables will be manufactured to order with jute fillers for winding on very small diameter reels.
t-conductor 'Types W and Gi cables, 2001-5000 volts, can be supplied.
Special cables and cables with other numbers of conductors can be furnished.
These data are approximate and subject to normal manufacturing tolerances.
Prices on application.

## Anaconda Portable Power Cable

Type SH-2001-7000 Volts<br>3-Conductor-Securityflex

Complies with U.S. Bureau of Mines and Pennsylvania Department of Mines Specifications
Vanufactured in accordance with IPCEA Standard S-I9-81. Second Lidition F"ebruary. 19.31. Securit yflex Neoprene dacket highly resistant to abrasion, particularly to mechanical cutting. Also resistant to flamer. moisture, oils and grease, acids and alhalis.

Conform to U. S. Bureau of Mines standards.
$\dagger$ Based on $1000-$ foot lengths. Longer lengths can be furnished to purchaser's requirements.
§Not included in I. S. Bureau of Mines standards since the Burcau does not approve operation of drills or remote control stations without grounding wire. All types and sizes of portable cables for mine use braided with the designation 102 IBM, by authorization of Underwriters' Laboratories, Inc.

These data are approximate and subject to normal manufacturing tolerances.

Prices on application.

Designed for hard usage, pendent or portable in either moist or dry places.
Conductors insulated, unless otherwise speeified, with Type RII (heat-resistant) compound.

These data are approximate and subject to normal manufacturing tolerances.

Prices on application.

## Anaconda Copper Bus Conductors

## Flat Bars Tubes_Channels-Square Tubes-Bare Cable Commercially Hard Drawn

Copper conductors, hecause of their low resistance, low losses, high thermal conductivity and excellent resistance to corrosion, are particularly suited for use in bus systems.
Supplied in several forms to provide mechanical and electrical characteristics required for the best and most economical performance of a particular hus system design.

## Flat Bars

Shape provides maximum surface for heat dissipation. Capable of unlimited direct-current capacity in properly designed multibar busses.

I sually limited to 3000 amps on a-c systems. Available in a wide range of sizes.
For information, contact (;rayhar.
BARS

ROUND TUBES

## Round Tubes

Provides relatively large crosssect iomal area in minimum space. Rigid, suitable for bending and the long spans in outdoor switch yards.
Offers lowest impedance to a-c current; minimum corona discharge at high voltage.

Nay be internally cooled by oil or water.

## Channel Busses

Arranged to form a hollow square tube with lomgitudinal ventilating slots vertically one above the other.

[]
CHANNELS

Provide:

1. Greater rigidity than round tube, permitting longer span.
2. Good current distribution.
3. Large surface area for dissipation of heat.
4. Simplicity of arrangement for minimum installation expense. Available in lengths to 25 feet.

## Round Solid Bars and Wire

Used for light doads, special types of construction, plug-in ducts.

Solld

SQUARE TUBES

## Square Tubes

Stronger and more rigid than round tubes. Have the advantage of flat surfaces for joints.

Obtainable in ventilated or unventilated designs, in lengths to 25 ft ., 3 -in. to 8 -in. square. Larger sizes furnished to meet special requirements. For additional information, contact Grayhar.

CABLES

## Cable Conductors

Particularly useful for extremely heavy currents in a confined space.

Provides flexibility. Frequently used in high capacity are furnaces for connections from main bus runs to electrodes. F'or specifications, consult Graylbar.

NOTES: Sizes above and below those listed availalide.
Variations from these valnes must be expected in practice.
Tabular weights and resistances based on Density of 0.323
lbs. per cu. in.
(a) D-C resistance for hard-drawn temper:

Diameters up to l-in. inclusive, conductivity $96.60 \%$
IACS mininum.
Diameters over 1-in., conductivity $97.40 \%$ IACS minimum.
(b) Skin-effect ratio at 60 cycles per second.

Prices on application.
(c) For sizes up to and including 6-in. diameter, bare, the 60 -cycle indoor current ratings are based on 30 C temperature rise above a 40 C ambint for copper pipe having conduetivity of 98 per cent IACS. The mominal outdoor ratings take advantage of favorable conditions such as air currents, weathering of coppor, ete. Both ratings in this table are from National lilect rical Name facturers Assoriation Standards for Power Switching Equipment, 1'ublication No. SG6-195.t, Part 8, and other NEMA publications.

## NOTES:

Variations from these values must be expected in practice. ASTM Specification B 188, Seamess Copper [3us Pipe and 'Tube, Controls the tensile properties, conductivity, tests and inspection. Dimensional tolerances are agreed between manufaeturer and purehaser at the time of placing an order.
(a) D-C resistivity. The resistances are based on the ASTM Specilication I3 188 . The conductivities of square tubes according to size are:

Up to 6-in. outside dianeter and up to $3 / 16$-in. wall thickness, eonductivity $97.10 \%$ IACS minimum.
Up to 6 -in. outside diameter and over $3 / 16$-in. wall thickness, conductivity $97.80 \% / \mathrm{ACS}$ minimmm.
All sizes over $6-\mathrm{in}$. outside diameter, conductivity $98.40 \% \mathrm{IACS}$ minimum.
(b) Skin-effect ratio at 60 cycles per second.
(c) 60 -cycle current-carrying-capacity ratings have been computed for 30 C temperature rise in still air at 40 C , conductor with new, bright, mill finish, horizontal and free from all outside magnetic influences.

Based on ASTM Specification 138-56. classes of stranding in accordanee therewith.
*These sizes not included in ASTM B8-56.
These data are approximate and subject to normal manufacturing tolerances.

I'rices on application.

# Anaconda Hard Drawn Copper Overhead Conductors <br> $\mathbf{9 7 . 5} \%$ Conductivity-IACs <br> *Hy-Therm and Other Commercial Grades <br> Solid Conductor 

[^2]Pricrs on application.

Anaconda Bare Aluminum-Steel Cable (ACSR)

*Aluminum wires only.
**Lltimate strength is caleulated as the sum of the minimum average ultimate strength of the aluminum wires plus the stress developed in the steel wires at one percent elongation in 10 inches.
$\dagger \dagger$ D-c resistance based on 17.011 ohms (nil, foot) at $20 \mathrm{C}(68 \mathrm{~F})$ for the nominal aluminum area of the conductors, with standard increments for stranding. ASTM B2:39-5.5T.

A-c resistance of ACSR having a single layer of aluminum wires is considerably higher than d-c resistance.
§The allowable tolerance shall be plus or minus 5 percent for all sizes larger than No. 1 . For No. 1 and smaller shall he plus or minus 10 percent.
$\dagger$ Nonreturnable Reels.
These data are approximate and subject to normal manufacturing tolerances.
Prices on application.

## General Cable Non-Metallic Sheathed

## *Romex (Type NM) Cable 600 Volts

## OENERAL CABLE $\nabla 12 / 2$ TYPE NM GOOVROMEX

For concealed or open work in locations that are reasonably dry. Inspected and labeled by Inderwriters' Laboratories.
Romex ( V I ) has very high insulation value, both bet ween conductors and to ground. There is no metal covering to become accidentally grounded or opened.

Insulated with thermoplast ic compound, colored for polarity ident ification. Covered with a protective paper armor.

Overall covering of tibrous braid, finished with a flame and moisture-resistant compound, surface marhed for identification.

# General Cable Messenger Type Service Drop and Secondary Cable 

## 600 Volts

A self-supporting aerial cable suitable for service drop and secondary distribution application. Cable consists normally of one or two neoprene or polyethylene insulated conductors twisted around a straight messenger. The messenger offers mechanical support for cable and serves as neutral conductor. Advantages of this type of cable include ecomomy of installation, excellent weather resistance, relief from strain on the insulated conductors and neat appearance.

Cables normally supplied with either copper or E.C. Grade aluminum power conductors and have either a hard drawn copper or copper covered steel neutral conductor; cables having aluminum power conductors are in addition available with E.C. Grade hard drawn aluminum or A.C.S.R. neutral conductor.

## Typical Construction Details

Power Conductors: Copper conductors shall be uncoated annealed copper solid or stranded as indicated in the tables which follow, and conforming to A.S.T.M. Specifications 133 and B8. The aluminum conductors shall be uncoated E.C. Grade aluminum, solid or stranded as specified in tables which follow.

Neutral Conductors: Copper neutral conductors shall he hard drawn bare copper solid or stranded and conforming to A.S.T.M. Specifications B1 and B8 as may be applicable. The aluminum neutral conductors shall be "E.C." grade, hard drawn aluminum solid or stranded as indicated and conforming to A.S.T.M1. Specifications 13230 and B231 as may be applicable. The copper covered steel neut ral conductor shall be stranded composite copper and copper covered steel conforming to applicable requirements of A.S.T'M. Specification 13229. The aluminum conductor steel reinforced neutral conductor shall be composed of six aluminum st rands around one steel strand conforming in all respects to A.S.T.M. Specification 13232.

Insulation: Neoprene, a special weather resistant compound applied in the wall thicknesses specified in following tables. The Neoprene insulation conforming to requirements set forth by I.P.C.E.A. for this type of service. Polyethylene, an insulating compound having a high resistance to exposure to direct sunlight and the effects of weathering. Compound colored black and applied in the wall thichnesses specified in following tables. The polyethylene insulation shall conform to the I.P.C.E.A. requirements for service on this type of cable.

Assembly: One or more insulated conductors are twisted around the neutral conductor withont fillers, and with a suit able lay.

## General Cable Tree Wire

## Neoprene Jacketed Thermax-W*

Tree wire is usually supported on insulators in same manner as ordinary weatherproof wires. Wire manufactured with a tough abrasion, ozone, and weather resistant neoprene jacket.
Tree wire mainly used by utilities for aerial urhan or suburban primary fieders (orcasionally for secondaries) and series street lighting circuits where had tree conditions exist. Standard wall insulation thichnesses are recommended for use on secondary lype wires, thin wall insulation is recommended for normal primary tree wire applications and is indicated in tables that follow.

Conductors: Medinm hard drawn copper, tin or lead alloy coated, or hard drawn uncoated alumimum. No. A AWG and smaller solid; larger sizes st randed. Aluminum conductors will be supplied in sizes 8-1/0 AWG only.

## General Cable Rubber-Insulated Power Cables

These cables fall into three broad classifications-

1. Neoprene Jacheted Cables
2. Lead Sheathed Cables
3. 13raid Covered Cables

The first group of cables has by far the widest field of application. Cables offer important advantages such as light weight, flexibility, ease of splicing and installation. Cables are not subject to rust, rotting, erystallization, induced sheath hosses or trouble from stray currents. Rubher insulated neoprene jacketed cables available for operation at potentials up to 15000 volts and are designated as SUDEISSLIEATII* cables by General Cable Corporation.

## Supersheath Cables

These cables are suitable for installation in conduit and underground ducts, for direct earth burial and may also be used aerially. Primarily these cables are designed for use in moist or wet locations; therefore, the principal requirements for this type of cable are:

1. An insulation of the moisture resistant type having stable physical and electrical properties, as, when the cable is installed in a wet location, moisture will in time find its way through the cable coverings and come in contact with the insulated conductors. To meet this requirement, SDPLRSHEATH* Cables are supplied with any one of the following outstanding types of moisture resistant insulations TIlEIR-MAX-N* AOUASEAL* GENCORONE:* OR BI'TARONE*. The latter two insulations are of particular inportance where resitance to ozone is an additional essential requirement.
2. A tough, durahle outer protective covering with strong resistance to rot or deterioration when in contact with moisture, earth acids, alhalies, or other earth chemicals. To meet this requirement, a tough heavy duty neopreme jacket having a suitable wall thickness for the service involved is provided on all St PERSLlEATH* Cables.

## Lead Sheath Cables

Where the need for a completely impervious shoath outweighs the advantages of the non-metallic sheathed type, (iraybar can supply a complete line of lead sheat hed cables suitable for conduit, underground duct or aerial use and direct earth burial if suitably protected by outer coverings.

The grade of iusulation employed on lead shoathed cables is dependent upon the operating temperatures and voltages involved. All grades of insulation are available.

## Braid Covered Cables

Braid covered cables are suitable for conduit, underground duct, or aerial use. All grades of insulation are available on braid covered cables.

Detailed specifications follow. Engineering data and packaging information are available upon application. Contact GiRÂYBAR for all your requirements.

## General Cable Thermax-W* (RH-RW) Insulated Neoprene Jacketed Power Cable

Type Designation: Supersheath*-Thermax-W* (Ileat and moisture-resistant insulation).
Operating Voltages: 600 to 3000 volts.
Conductors: Conductors are solid or stranded lead alloy coated annealed copper or uncoated E.C. grade aluminum. Coated copper conductors conforming to A.S.I.M. Specifications 13189 and 138 , solid uneoated aluminum conductors to A.S.T.M. Specifications B230 or B262, stranded to A.S.'T.M. Specifications 13231.

Strand Shielding: All cables having stranded conductors and rated oyer 1000 volts are to have a semi-conducting strand shielding tape applied directly over the conductor.
Insulation: Thermax-W*, suitable for operation in wet or dry locations at a maximum conductor temperature of $75^{\circ} \mathrm{C}$. This insulation compound meets the repuirements of A.S.T. M. and I.P.C.E.A. for Performanere and Heat Resistant rubber insulation and further complies with I.P.C.E.A. Appendix $N$ requirements when tested by Mothorls (iM and EX1-60 for inoisture absorption and electrical stability.

Insulation Thiekness: Insulation wall thichness is based upon conductor size and voltage rating in aceordance with I.P.C.E:A. Standard S-19-81.

Polarity Identification: For two or three eonductor cables colored fibrous eoverings over the individual insulated conductors may be used, two conductor blach and white, three conductor back, white and red. Single conductor cable may he supplied with colored jacket.

Cabling: Two conductor shall be twin flat or round construction, three conductor cables shall be round construction.

Jacket: Heavy duty nepprene meeting the requirements of 1.P.C.E.A. Standard S-10-81 Appendix K. On single conductor unshiclded cable a heary wall jacket is normally supplied for direct burial or a light wall jacket for conduit or underground duct use.

## General Cable Aquaseal* (Low SIC) Insulated Neoprene Jacketed Power Cable

'Type Incsignation: Supersheath*-Aquascal* (Iow SIC, heat and moisture-resistant insulation).

Operating Voltage: 600 to 3000 volts.
Conductors: Conductors are solid or stranded lead alloy conted ammaked copper or monated lic.C. grade abmomon. Coated copper eonductors conforming to A.s.'T. M. Spee. 13189 and 138, solid meoated abminmon eonductors to A.S.'T. I. Sperifications [3き30 or 13262 . st randed to A.S.T'M. specification 132:3].

Strand thidding: All cables having stranded conductors and rated ower 1000 volts are to have a semi-conducting strand shielding tape applied directly over the conductor.

Insulation: Aquaseal* insulation compound is suitable for operation in wet or dry locations at a maximmm condnetor temperature of $7.0^{\circ}$ C. Meets A.s.'T.M. and I.P.C.E.A. requiremonts for Performance and Ileat Resistant rubher insulation and complies with I.P.C.I.A. Appendix N reguirements when tested by Methods (iM and li M-60 for moisture absorption and electrical stability.

Insmation Thickness: Insulation wall thickness is hased upon conductor size and voltage rating in accordance with I.I.C.E.A. Standard S-I9-81.

Polarity Identification: For two or three conductor cables colored fibrous coverimes over the individual insulated conductors may tre used, two conductor back and white, three conductor black, white and red. Single conductor cable may be supplied with colored jacket.
(abling: 'I'wo conductor shall be iwin flat or round eonst ruction, three conduetor cables shall be round construction.

Jacket: I Ieary duty neoprene meeting the reguirements of I.P.C.E.A. Standard S-19-81 Appendix K. On single conductor unshielded cable a heravy wall jachet is normally supplied for direct burial or a light wall jacket for conduit or underground duct use.

**'These tests apply to single conductor unshielded cables rated at 2 KV and higher.

Jacket Thickness: Jacket wall thickness is hased upon I.I.C.IE.A. Standard S-19-81.

# General Cable Gencorone* (Oil Base) Insulated Neoprene Jacketed Power Cable 

Type Designation: Supersheath*, Gencorone* (Oil Base, Ozone Resistant lusulation).

Operating Voltages: 600 to 1.5000 volts.
Conductors: Conductors are solid or stranded lead alloy coated annealed copper or uncoated E.C. grade aluminum. Coated copper conductors conforming to A.S.T.M. Specifications B 189 and 138, solid uncoated aluminum conductors to A.S.T.M. Specifications 13230 or B262, stranded to A.S.T.M. Specification B231.

Strand Shielding: All cables having stranded conductors and rated over 1000 volts are to have a semi-conducting strand shielding tape applied directly over the conductor.

Insulation: Gencorone*, suitable for operation in wet or dry locations at a maximum conductor temprature of $75^{\circ} \mathrm{C}$. for voltages 8 KV and less than $70^{\circ} \mathrm{C}$. for higher voltages. This insulation compound meets requirements of A.S.T.M. and I.P.C.E.A. for Ozone Resistant Grade Insulation and further complies with I.P.C.E.A. Appendix N requirements when tested by Method EM-60 for moisture absorption and electrical stability.
Insulation Thiekness: Insulation wall thickness is based upon conductor size and voltage rating in accordance with I.IP.C.E.A. Standard S-19-81.

Shiedling: For all single and multiple conductor cables rated over 3 KV grounded or ungrounded neutral the conductor insulation shall be shielded by means of a tinned copper shielding tape applied in suitable manner and conforming to the requirements of I.P.C.E.A. Standard S-19-81, Part 5.
Note: Cables intended for aerial use bound by a metallic binder to a messenger will be of unshielded construction up to and including 5 KV grounded neutral.
Polarity Identification: Color coding for polarity identification may be accomplished by use of colored tapes or by means of colored neoprene jackets. Standard coding for two conductor cables is black and white: for three conductor cables black, white and red.

Cabling: Two conductor shall be twin flat or round construction, three conductor cables shall be round construction.

Jacket: lleavy duty neoprene meeting requirements of 1.P.C.E.A. Standard S-19-81 Appendix K.

On single conductor unshiclded cable a heavy wall jachet is normally supplied for direct earth burial or a light wall jacket for conduit on underground duct use.

## General Cable Butarone* (Butyl Rubber) Insulated Neoprene Jacketed Power Cable

Type Designation: Supersheath*-Butarone* (Buty Rub)ber (Ozone Resistant Insulation).

Operating Voltage: 600 to 15,000 volts.
Conduetors: Conductors are solid or stranded lead alloy coated annealed copper or uncoated E.C. grade aluminum. Coated eopper conductors conforming to A.S.T.M. Specifications B189 and B8, solid uncoated aluminum conductors to As'rM Specifications 13230 or B262, stranded to A.S.T.M. Specification B231.

Strand Shielding: All cables having stranded conductors and rated over 1000 volts are to have a semi-conducting strand shielding tape applied directly over the conductor.

Insulation: Butarone* suitable for operation at maximum conductor temperature of $90^{\circ} \mathrm{C}$ up to 5000 volts and $85^{\circ} \mathrm{C}$ for higher voltages. Exceeds I.P.C.E.A. Standard S-19-81 Second Edition, Appendix O, and A.S.T.M. D-574 and D-1352 reguirements for ozone resistant insulation.

Insulation Thiekness: Insulation wall thickness is based upon conductor size and voltage rating in accordance with I.P.C.E.A. Standard S-19-81.

Shielding: For all single and multiple conductor cables rated over 3 KV grounded or ungrounded neutral the conductor insulation shall be shielded by means of a timned copper shielding tape applied in suitable manner and conforming to requirements of I.P.C.E.A. Standard S-19-81, Part 5.

Note: Cables intended for aerial use bound by a metallic binder to a messenger will be of unshielded construction up to and including 5 KV grounded neutral.

Polarity Identification: Color coding for polarity identification may be accomplished by the use of colored tapes or by means of colored neoprene jackets. Standard cording for two conductor cables is black and white, for three conductor cables black, white and red.

Cabling: Two conductor shall be twin flat or round construction, three conductor cables shall be round construction.

Jacket: IIeavy duty neoprene meeting the requirements of I.P.C.E.A. Standard S-19-81 Appendix K. On single conductor unshielded cable a heavy wall jacket is normally supplied for direct earth burial or a light wall jacket for conduit or underground duct use.

## General Cable Series Street Lighting Cables

Engineering data and other information on the following products will he supplied upon application.

GENERAL CABLE

## Rubber Insulated, Lead Sheathed

Rubber Insulated, Neoprene Jacketed

## Gencaseal* Insulated

## Polyethylene Insulated

## General Cable Traffic Control Fire Alarm and Signal Cable

Enginering data and other information on the following products will be supplied upon application.

Rubber Insulated, Lead Sheathed Multiple Conductor Cable for General Use in Underground Ducts, Or For Aerlal Use with Messenger

Rubber Insulated, Braid Covered Mutti-Conductor Cable for Installation in Buildings and Stations

Rubber Insulated, Neoprene backeted Multi-Conductor Cable for General Use in Underground Ducts, Aerial Use With Messenger or for Installation in Buildings or Stations

Gencaseal* Insulated-Gencaseal* Jacketed

## General Cable Power Cables

## 600 Volts-Bus Drop

Bus drop cables designed to provide flexible and extensible comecting circuits between overhead open or enclosed fixed hus structures and electrically-driven machinery and equipment in factories, mills, machine shops, ete.

Experience shows that bus drop cable installations are dependable, time-saving and economical because:

1. Conduits are not required.
2. Standard fittings are used.
3. Installations and comnections are simply and rapidly made.
4. Cost of completed installation is low.
5. Cable adjustments are made quickly and with little expense when equipment is moved.
Bus drop cable in actual practice is usually conmected directly to the overhead hus at upper end, and to a manual starter mounted on or near the motor or machine to be served at other end. A loop of several turns ordinarily held in place near the bus end of circuit provides desired reserve length in the bus drop commection and makes it unnecessary to cut cable if machine is moved.

## Rubber Insulated Neoprene Jacketed Type RMN

Conductors: Conductors and ground wires are stranded lead alloy mated, ammaled copper meeting requirements of A.S.'T.M. Specification 13189 and 188.

Insulation: Code 'Type I? rubber insulation with color coded Guardian fibrons coverings.

Cabling: The insulat ed conductors are cabled with three ground wires arranged one in each interstice. Suitable fillers are employed to provide a rounded core and a core tape applied overall.

Jacket: Tough oil and flame resistant neoprene jacket meeting all requirements of A.S.T.M. Specification D7.52 and I.I.C.E.A. Standard S-19-81 Appendix K.

## Gencaseal* Insulated and Jacketed-Type TMG

Conductors: Conductors and ground wires are stranded uncoat od annealed copper, meeting requirements of A.S.T.M. Specitications 133 and 133.

Insulation: Gencaseal* insulation meeting all requirements for IL Type 'T, color coded for polarit y identification.

Cabling: The insulated conduetors are cabled with three ground wires one in each interstice. Suitable tillers are employed to provide a rounded core and core tape applied overall.
Jacket: Oil and flame resistant Gencaseal* jacket meeting all requirements of I.P.C.E.A. Standard S-19-81 Appendix.I. Note: Regular coding colors for bus drop cables are black, white, red and will he furnished unless otherwise specified.

## General Cable Wire Armored Semi-Portable Cables

> Dredge Cables
> 3000 to 15,000 Volts

These cables are furnished in three conductor form in a complete range of voltages up to 15 KI .

Data on const ruction and ot her information will be supplied upon request. Cantact (ilRAYBAR.

[^5]
## General Cable Drive-In Theater Cables 600 Volts

Designed for direct installation in the earth under outdoor motion picture theater lots to serve for sound distribution net works from the projection booth to spraker posts installed adjacent to the designated antumobile parking station.

Two types of cable are avaitable (I) Ruhber insulated and neoprene jackel cable, (2) Gencaseat* uni-insulation and jacket cable.

## Construction Data on Rubber Insulated and Neoprene Jacketed Type Cables

(iomelnctors: Solid or A.S.l'. I. Class B stranded coated annealed copper conductors, or when so specified may be A.S.'I'.M. Class $k$ flexible bunch stranded.
lnsulation: $3 / 64$ in. wall of 1 WW 75.5 preformance grade moisture resistant compound.

Assembly: "The two insulated conduetors are laid parallel and bound with a suitable open braid or serve. Over the assembly so formed is applied a tough heavy duty neoprene jacket in a wall thickness of $3 / 6$ in. and which coniplies with all the requirements of I.1'.C.E.A. Standard S-19-81, Appendix $k$.

Cirenit identification is ohtained by means of two ridge tracers approximately 90 degrees apart on one edge (minor face) of the jacket.

The above data are approximate and subject to normal manufactnring tolerances.

## General Cable Varnished Cambric Insulated Wire and Cable

Two Conductor Round Bralded

Three Conductor Varnished Cambric Lead Sheathed

Three Conductor Individually Braided
Available upon request is information covering a complete. line of varnished cambric insulated wires and cabless for building wiring for general power purposes and for special applications where varnished cambric insulation is the most suitable type to employ.

All the requirements are in compliance with the spacifications of the hasulated Power Cable Enginerers Association or the National Eilectrical Code.

The above data are approximate and sulbject to normal manufacturing tolerances.

The sizes of calle recommended by the Machine Group of the NEMA Eilectric Welding Section for standard hand welding equipment based on lengeths up to 90 ft that is, 15 ft . of welding cable and 4.5 ft , of return cable, are as follows:

100 Amp . Welder fi AW( 1.50 Amp . Welder 3 AW( 200 Amp . Welder 2 All: 300 Amp. Welder $1 / 0$ AWG

100 Amp. Welder $2 / 0$ AWG .000 Amp . Wrider $2 / 0 \mathrm{AWC}$ 600 Amp. Welder 3/0 AW G
(1) The abowe values for current carrying capacity are based on a copper temperature of $60^{\circ} \mathrm{C}$. and an anthent temperature of $10^{\circ} \mathrm{C}$. and yiold load factors of from approximately 32 per cent of the No. 2 AW ( cable to approximately 23 per eent for the Vor, 30 AWG cable and hisher for the smaller sizes. The IPCEA Standards cover only sizes $8-300$ VICM, inclusive. The sizos of cables generally used rame from No. 2 AWG to No. $3 / 10$ AW (a. In actual service the hoad factor may be moch hishor than indieated without overhating the cable as the ambient temperature will generally be sabstantialty lower than $10^{\circ} \mathrm{C}$.

Note: Size 8 to 300 MCM available in 250 ft . coils and 1000 ft . reels.

[^6]
## General Cable *Super Service Mining Machine Cable

Used principally in mines on cutting machines, gathering locomotives, shuttle cars, and other mine equipment, and are designed to have a maximmm flexibility for this type of cable. Ised also for general portable power cable use where size and weight are important considerations.

## General Cable *Super Service Cable

Two conductor round, Type W and Type G, 600 and 1000 volts, used in mines for entting machines, loaders, eranes and conveyor mining systems; recommended for gencral power supply purposes and various single phase portable machinery.

Multi-conductor round type, Type W and Type G, 600 and

1000 wolts, used for general power supply purposes: heavy portable tools and appliances, large portable lights, flexible jumpers and portalle construction equipment; also in mines for eutting machines, drilling units, loaders and other mining machinery. Flexible, resilient and non-kinking.

## General Cable *Super Service High Voltage Cable

All General Cable SLPER SERBVICE products feature an extra heavy duty llame resistant mold-cured newprene jacket with cord reinforcement, trademarked SUPERTUF.

Service high voltage portable power cables - Supertuf jacheted designed for wide variety of purposes. In general their use covers transmission of power from the supply to the mobile electrical equipment - shovels, dredges, cranes and draglines. I sed also as a temporary liae during const ruction or repair work in generating stations and substations. Can be used fo advantage in power distribution work to by-pass a fault y section of buried cable while repairs are being made. Super Service portable power cables are selected where arduous service and safety must combine for uninterrupted production and long eable life. A vailable for oprating voltages up to and inclading 15,000 volts. in single and multi-conductor form, and in a wide range of condactor sizes.

There are three general types of super Service high voltage cables:

> Type W Cables - Without grounding eonductors.
> Type 1; cables - With grounding conductors.

Type Sll (Shielled) - With or without grounding conductors.

Super Service Type W - Supertuf: Jacketed, portable cables eonsist of rubliner insulated flexible stranded conductors with acither shielding nor gronnd wires. Type $W$ not recommended for service exceeding 3000 wolts, although it can be furnished for voltage ratings up to 5000 volts. Where maxi!inum safet y is desired on voltages above 2000 volts, Type SIID is recommended.

Super Scrvice Type G Supertuf: Jacketed, portable cables are of same construction as Type $W$ except they have flexible grounding conductors in each filler space. While cables oparating above 2000 volts should preferably be shielded, the gromending conductors in TYpe G cables in effeet provide sume shielding and afford a certain degree of protection to operators when the grounding conductors are grounded at both ends of the cable length. In many instances Type ( cables have proved satisfactory at 5000 volts, which is the maximum recommended rating. Where maximum safety is desired on voltages above 2000 volts, Type SII-D is recommended.

Super Service Type SII Shielded - Supertuf: Jacketed, portable cables are similar to Types $W$ and $\mathbf{G}$ except for the addition of shielding braids and are recommended for operating voltares above 2000 volts to 15,000 volts. These cables are classilied in four groups depending on the way in which the shielding is applied and whether or not grounding conducturs are inchoded.

It is considered good practice to employ grounding conductors in all shielded high-voltage portable calles. These grounding conductors are normally uninsulated to permit elect rical eontact with the shielding braids.

For operating voltages up to 6000 volts, a shield over the assembled conductors with the nse of grounding conductors (Type SH-C) is sometimes used. For voltages from $\mathbf{0 0 0}$ to 1.5,000 volts, shielding over the individual conductors with the use of grounding conductors (Type SII-D) is strongly recommended and is generally used.
*Trade Mark.

Three Conductor 2,000 to 5,000 Volts Type W Without Grounding Conductors

Three Conductor 2,000 to 5,000 Volts
Type $G$ With Grounding Conductors

Type SH-A Shlelding on Each Conductor without Grounding Conductors

Type SH-B Shielding Over Cabled Conductors Without Grounding Conductors

Type SH-C Shielding Over Cabled Conductors With Grounding Conductors

Type SH-D Shielding on Each Conductor With Grounding Conductors

## General Cable Flat-Twin TV and FM Transmission Lines <br> Polyethylene Insulated-300 Ohms

Low-loss, high frequency cable for service as a transmission line (antema lead-in) between antenna and television or FM receivers. Ispful for forming folded dipole antennas iu attics, apartments, or wholly within receiver cabinets.

May be used for intra-receiver high frequeney connections. Velocity of wave propagation, approximately $8 \mathfrak{i k} \%$.

Supplied with dark brown insulation unless otherwise specified. Also available in natural translucent or frosty white polyethylene.

| Siz6 | Net WI. Per 1000 Ft. | Actual Character istic Impedance | Capacitance |  | Attenuation Ob/100 Ft. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Standard pachages, 1000 ft . on spools; 5000 ft . on reels.
Longer lengths available on special order.
Also supplied with flame-resistant polyethylene when specified.

The above data are approximate and subject to normal manufacturing tolerances.

## General Cable Standard Coaxial Cable

## GENERAL CABLE

Polyethylene insulated conductor surrounded by braided return conductor which is provided with an overall covering. Widely used for carrying r-f power, up to 5000 watts at 100 Mc., between a transmitter and receiver and an antenna. For i-f and video transmission and applications where radiation or pickup nust be reduced.
Engineering data and all other information available upon request. Contact GIRAYBAR.

## General Cable Hinge Cable Type TA - 600 Volts

Single Conductor-Extra Flexible Stranded
liecommended for swinging panel jumpers and connections and other applications where extra flexible construetion is required.
Insulation: Wall of Gencaseal compound and a wall of felted ashestos saturated with flame heat and moisture-resisting compound; covered with a cotton braid finished with a flame and heat-resisting compound. Not recommended for use in temperatures lower than - $10^{\circ} \mathrm{C}$.

# General Cable Range and Appliance Lead Wire 

Types A and AI

## Single Conductor - $\mathbf{3 0 0}$ Volts

Recommended for wiring small portable electric heating appliances.

Type A: Particularly suitable for wiring of apmaratus where severe heat conditions exist. Rated $200^{\circ} \mathrm{C}$.
Type AI: Suitable for use where moderate moisture hazards exist. Subject to hower maximum operating temperatures than Type A , since it has a moisture-resisting impregnant. Rated $125^{\circ} \mathrm{C}$.

## Construction Features

Insulated with felted asbestos. Flame and heat-resistant saturant. Type Al also has moisture-resistant properties. Conductors, untimed amealed copper. standard eolors, black or white. Alternate color linishes on specifieation. Frurnished with no outer covering, or with eotton or rayon "appearance" braid.

## General Cable Power Cable and Rheostat Wire Type AA Rated $200^{\circ}$ C.

## GENERAL CABLE

## Single Conductor $\mathbf{3 0 0}$ Volts

For open wire applieations in dry locations whieh are sabject to extreme heat or lire hazards, such as rheostat wiring, furmace and oven commetions.

Also recommended for switchboard wiring where temperatures are too high lor Type AVB or "TA siwitchboard Wire. Insulated with fetted astrestos, saturated with flame and heat-resisting compound. Asbestos braid outcr covering, standard color, white.

## General Cable Motion Picture Projector or Arc Lamp Cable Type AA-Rated $\mathbf{3 0 0}$ Volts, $\mathbf{2 0 0}{ }^{\circ} \mathrm{C}$

## general cable

F'or wiring motion-picture projectors, are lamps, seareh lights. flowdights, electric cranes, controllers and similar equipment in dry locations. Conductors, extremely flexible stranded, untimed, anmealed eopper.

Felted asbestos insulation and outer asbestos braid saturated with flame and heat resistant compound.

## General Cable Power and Rheostat Wire Type AIA-Rated 600 Volts, $125^{\circ} \mathrm{C}$ Single Conductor-Solid or Stranded

Recommended for higher voltare rated installations where moisture resistance is required. Similar to Type AA except for lowered tomperalure rating due to use of moisture resistant impregnant.

Conduclors, untinned annealed copmer: insulated with wall of lided ashestos saturated with flame, heat and moistureresistant compound.

Saturated asbestos braid outer covering: Standard color, black.

*Not listed in 1956 National Electrical Code.
**()n sizes \#18 to 8 A.W.G. (inclusive) 600 V , the thickness given may include, at the mamfacturer's option, a barrier tape not over 10 mils thick.

The above data are approximate and subject to normal mannfacturing tolerances.
Prices on application.

## General Cable Apparatus and Motor Lead Cable

## Type AVA-Rated 600 Volts, $110^{\circ} \mathrm{C}$

## 0 CIMENAL CABLE

## Single Conductor-Extra Flexible Stranded

Recommended where flexibility is an important requirement. Used for motor leads, coil connections, transformer leads and internal wiring of mining machinery, etc.

## General Cable Hinge Cable

## Type AVB—Rated 600 Volts- $90^{\circ} \mathrm{C}$

## GENERAL CABLE

## Single Conductor-Flexible Stranded

Specially tested cable, recommended for swinging panel connections or other uses requiring extra flexibility.

## General Cable *Gencaseal Appliance Wiring Material 600 Volts

For machine tool, appliance and switchorard wiring. I'nderwriters' approved for operation at various temperatures and at $60^{\circ} \mathrm{C}$, under all conditions. Machine tool and switchmord wire is rated at $90^{\circ} \mathrm{C}$.; a vailable in 18 to $\mathbf{1 / 0}$ A. W . ( $\mathrm{B}, \mathrm{A}$ Apliance wire rated at $10.5^{\circ} \mathrm{C} .$, sizes 18 to 8 A.W.G.; $90^{\circ} \mathrm{C}$., sizes 18 to $1 / 0 \mathrm{~A} . W .\left(\mathrm{i}\right.$. and $80^{\circ} \mathrm{C}$. for sizes larger than $\mathrm{t} / 0 \mathrm{~A} . \mathrm{W} . \mathrm{G}$.
Available with spiral stripe identification.

$\dagger$ Approved by Inderwriters' for $60^{\circ} \mathrm{C}$. operation under oil conditions and $80^{\circ} \mathrm{C}$. in air- 600 volts.

Standard Colors: \#18 to \#10 13lack, White, Red, Blue, Green, Yellow and Orange. \#8-and larger, 13lack, White and lied.

# General Cable Square and Rectangular Bare Copper Wire 

## Soft or Annealed (A.S.T.M. Specification B 48-55)

## GENERAL CABLE

Round corners, freedom from surface imperfections and control of bending eharacteristics during fabrication make this wire particularly suitable for use in the construction of translormers and other electrical apparatus.

Manufacturered to customer specifications and to A.S.'T. M. (IYpes A and 13). When ordering, state type or use to which wire will he put.

*Spuare wire, 0.072 inches and under, shall have a corner radius of 0.012 inches, phas or minus $2.5 \%$.

A rounded edge is produced by rolling round wire to the size specified either with or without edging rolls.

## Density

For calculating weights, cross-sections, etc., the density of copper shall he taken as 8.89 grams per cubic cm . ( 0.32117 Ibs. per cu. in.) at $20^{\circ} \mathrm{C}$. $\left(68^{\circ} \mathrm{F}^{\circ}\right.$.).

## Resistivity

Resistivity is used in place of percentage conductivity. The value of 0.15323 ohm (meter, gram) at $20^{\circ} \mathrm{C}$. ( $68^{\circ} \mathrm{l}^{\circ}$.) is the international standard for the resistivity of amealed copper equal to $100 \%$ conductivity. This term means that a wire 1 mile in length and weighing 1 gram would have a resistance of $0,10,328$ ohms. This is equivalent to a resistivity of 875.20 ohms (mile, pound), which signifies the resistance of a wire 1 mile in length weighing 1 pound. It is also equivalent to 1.7241 microhms per cm. of length of a bar 1 square centimeter in cross-section.

## General Cable Concentric Stranded Cable

## Bare and Tinned or Coated Copper-Soft or Annealed <br> Medium Hard and Hard Drawn <br> ASTM Standard B 8-56 <br> 

Class AA: Used for bare cable.
Class A: For weather-resistant (weatherproof), for a slowburning and for weather-resistant slow-hurning cable. For bare cable where flexilility greater than that of Class $\Lambda \mathrm{A}$ is required.

Class B: For cable insulated with various materials, such as rubher, paper, varnished cloth, etc. and for cable indicated under Class $\Lambda$ where greater flexibility is required.

Class C and Class D: For cable requiring greater flexibility than that afforded by Class B cable.

# General Cable Tinned or Lead Alloy Coated Solid Wire <br> <br> Soft or Annealed Copper 

 <br> <br> Soft or Annealed Copper}

## Mamen mine

TInned WIres: B33-56T-Lead Alloy Coated: B189-56T

Tinned copper wires are also available in hard drawn and medium hard drawn tempers in accordance with $\Lambda$ STM Standard 13216-51'I.

# General Cable Overhead Line Conductors 

Bare Copper-Hard Drawn and Medium Hard Drawn

## A.S.T.M. Standards B 1-56; B 2-56 and B 8-56

A complete series of hare overhead line conductors, covering the entire range of electrical and physical requirements necessary for all designs of transmission, distribution, signal and communications systems, is supplied by General Cable.
Copper conductors are available in a variety of tempers to provide the best combination of tensile strength and flexibility for a particular application. The conductivity of copper is higher than that of any other commercial metal.

Long, dependable service life, re-usability and high salvage value are characteristics of these conductors, maintained ly copper's high degree of resistance to corrosion, fatigue and abrasion.

†For ligure 8 and Figure 9 wire, dimensions given are nominal height of entire section and width of lower lobe.
Size $6 / 0$ A.W.G. ( 336,200 C.M.) Grooved or l户igure 8 will regularly be furnished in 350,000 C.M.
Weights: Based on nominal dimensions.
Tolerances: Round-Wire - Diameter $\pm 1 \mathrm{C} / \mathrm{C}$. Grooved Wire - Dimunsions, see Diagrams page 32. Weight $\pm 4$ 尼 of values listed. Figure 8 Wire-Dimensions, see Diagrams page 33. Weight $\pm 5 \%$ of values listed. Figure 9 Wire-Demensions, see Diagrams page 33. Weight $\pm 5 \%$ of values listed.

Breaking Strengths: Based on nominal dimensions.
Resistances: Based on nominal dimensions, and on the following resistivity: 900.77 ohms (mile, pound) at $68^{\circ} \mathrm{F}$. ( $20^{\circ} \mathrm{C}$.) $97.16 \%$ I.A.C.S. conductivity.

The above data are approximate and subject to normal manufacturing tolerances.

## General Cable Copper Trolley Wire

A full range of copper trolley contact wires are available. In the manufacture of these wires special care is taken in rolling and drawing to obtain a surface free from imperfections and wire continuously true in shape. This produces a contact wire giving maximum life and freedom from operating trouble.

Wire manufactured in accordance with A.S.T.M. Specification B47, A.S.A. C7.6 and American Transit Association Specification D2. These specifications were prepared jointly by these associations in collaboration with the Association of American Railroads and are identical.

A.S.T.M. Standard B116-55

## General Cable Copper Alloy Conductors

## A.S.T.M. Standard B105-55

Bronze wires are copper alloyed with small amounts of tin and/or cadminm to provide high strength and electrical conductivity. They are highly corrosion resistant under atmospheric conditions and are, therefore, useful as line wires, guy and messenger strands, overhead ground wires or in combination with copper as composite conductors.

Nominal Modulus of Elasticity: Solid $16 \times 10^{6}$. Stranded $10 \times 16^{6}$.
Coefficient of Linear Expansion per Degree F: .0000094.

| Allay conductivity I.A.C.S. | Density at $20^{\circ} \mathrm{C}$. |  | Minimum Tensile Strength 6 A.W.G. | Max. Resistivity |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grams | Lbs. Per | (.1620") | at $68{ }^{\circ}$ | $\left.0^{\circ} \mathrm{C} .\right)$ |
|  | Per | Circ. | HO.Wire | Ohms | Ohms |
|  | Cu | Mil | Lbs. Per | (Mile | (Mil |
|  | Cm | M. Ft. | Sq. In. | Lb.) | Ft) |
| Copper Tin Alloy |  |  |  |  |  |
| 30 | 8.89 | 003027 | 9.4,800 | 2917 | 34.57 |
| 40 | 8.89 | 003027 | 80,400 | 2188 | 25.93 |
| 65 | 8.89 | 003027 | 72,000 | 1346 | 15.96 |
| Copper Tin Cadmium Alloy |  |  |  |  |  |
| 55 | 8.89 | 003027 | 84,000 | 1591 | 18.86 |
| 80 | 8.89 | 003027 | 78,600 | 109.4 | 12.96 |
| 85 | 8.89 | 003027 | 74,600 | 1030 | 12.20 |

Characteristies:
Copper alloy characteristics compared to copper indicates:
(1) Weight: Corresponds to copper.
(2) Strength: $53 \%$ to $16 \%$ greater than Hard Drawn Copper.
(3) Conduetivity : $30 \%$ to $85 \%$ that of Annealed Copper.
(4) Modulus of Elasticity: Approximately that of llard Drawn Copper.
(5) Coefficient of Lincar Expansion: Corresponds to Hard Drawn Copper.
Note: Solid and stranded hard drawn copper alloy conductors and wires are available according to ASTM Standard B105-53 and information regarding these may be obtained upon request.

Prices on Application.

Breaking strenthes and weights based on mominal wire diameters:

 of the hreaking strengthe of the imdividual steel wires, bosed on the strexs at I per cont extersion as specitied in ASTM 13232 .

Weights are calculated using the following (ASIM $\mathbf{M} \mathbf{2} \mathbf{2 2}$ ) increments for stramding.

|  | Increment, Per Cent <br> ACSR Constructions |  |
| :---: | :---: | :---: |
| $6 / 1$ and $7 / 1$ | $1 . .3$ | 0 |
| $18 / 1$ | 2.0 | 0 |
| $6 / 6$ | 2.0 | 0.3 |
| $21 / 7$ and $26 / 7$ | 2.5 | 0.4 |
| $30 / 7$ | 2.7 .7 | 0.5 |
| $54 / 7$ | 2.7 .0 | 0.3 |
| $30 / 19$ | 3.0 | 0.6 |
| $5.1 / 19$ |  | 0.6 |

All conductors sulject to dimensional tolerances of ASTM 13 230, 13 232, and 1324.
Nominal shipping lengths shown are subject to a variation of $\pm 10 \%$ for conductors 1 Awg and smaller, and $\pm 5 \%$ for conductors larger than 1 Awg. Ten per cent of the reels or coils may he shipped in random lenghs of not less than $50 \%$ of the indicated nominal length.
*Sizes 6 through $1 / 0$ st andard lengths shipped on mon-returnable reels.
The alowe data are approximate and subject to normal manufacturing tolerances.

## General Cable URC Weatherproof Wires and Cables

## "OK" and "Peerless" With Copper Conductors

Stranded Copper Conductors

Solid Copper Conductors

$\dagger$ Breaking strengths represent minimum values for hard and medium hard drawn conductors and maximum values for soft drawn conductors correspunding to the requirements of A.S.T. 11 . $131-56,132-52, \mathrm{~B} 3-50$, and $\mathrm{B} 8-50$ for bare conductors, adjusted in acoordance with the provisions of the propmed revision of A.S.A. C8.18.

All weights are met and subjeet to A.S.A. specifieation tolerances.
Standard lengghare subjert to a manufacturing tolerance of plus or mimes $10 \%$. Vot more than $10 / 4$ of the total quantity of wire on any given order may be shipped in mondom lengths not shorter than $50 \%$ of the listed standard lengths.

Sizes 81014 A.W.G. inchusive also supplied in 100 lb . Iondes of four coils, each weighing approximately 2.0 lbs .
 The alove data are approximate and subjeet to normal manufacturing loberances.

## Light Duty Cord-Type SV

Diamond Red-D Types SV and SV-Neoprene are very flexible, small diameter, light weight cords with tough jackets overall. Intended for light duty service where frequent flexing occurs, and where ease of landling is especially desired. T'ype SV Neoprene recommended where there is possibility of exposure to oil, heat, sunlight or chemicals. Listed by U/L. For light duty appliances, vacuum cleaners, office machines, ete.

## Heavy Duty Oil Resistant Cord-Type SO

Diamond Red-D Type $S(0$ is a companion cord to Type $S$. Construction features such as durability, abrasion resistance and flexibility are similar. Outstanding for use when exposed to oil and grease, sumlight, ozone, most chemicals, solvents and acids. Tough neoprene jacket is practically unaffected by these enemies of natural rubber and general purpose synthetic rubbers. In addition, Neoprene has superior ageresisting qualities, is flame-retardent and leat-resistant. Listed by Underwriters' Laboratories. 'Type SO Neoprene Jacketed Cord-60 C. Service. Canadian Standards Ass'n. Approved. 250 ft . coils.

## Medium Duty Cord Type SJ

Red-D Type SJ is a flexible, light weight rubber sheathed cord, resistant to moisture, alkalies and acids. Intended for medium duty uses. Exitra flexible or Constant Service type recommended if much movement is apt to be encountered. Stationary Service type where less inovement in use is expected.

Used as extension power cords, extension lights, household appliances, lawn mowers, oflice equipment, etc.

## Diamond Red－D－Prene Cords

Type MD－（Mill Duty）

## Rubber Insulation Red Neoprene Jacket

The most advanced design in portable cord for heavy duty use throughout mill and plant installation both indoors and outdoors．

Constructed with a fine soft textile center，insuring a maximm uniform flexibility and moisture and abrasion resistance．Type III）is outstanding for use when exposed to oil and grease，sumlight，ozone，mest chemicals，solvents and acids．Type（11）Red Veoprene jacket has superior aga－ resisting qualities，and is flame－retardant and heat－resistant．

This cord was esperially designed and created for fabri－ caters，antomotive industry，oil refineries，sterl mills，chemical industries，find and meat packers，and textile plants．

## Call Graybar FIRST For ．．．

## Diamond Coiled Cords

The manufacture of spring type conds has a history of many vears．However，it was in the middle and latter 1930＇s that the chomistry of rubber，neopreme and similar insulating and protective materials permitted the first commoreial application of the coiled cords of the Iype inost emmmonly used．

＇The first applications of the concept of＇molding the jacket and insulating matorials of a piece of wire into a fereal construction．formed by winding the wire around a mandrel． resulted in the production of an expansible dog heash．

The first commereial applications of curront－carying coiled cords oecurred aftor laboratory and developmont enginecring work using the facilities alt the Diamond Wire \＆Cable Com－ pany in the Chicago Ileiphts pant，Chicago lloights，Illinois．

Thos．from the tirst commerotal recogntion of the coiled
 and has had experibence in the feld．In recent years，Diamond Wire（ar．has heen a major supplier of cuiled cords to the telephone industry．It is participating in basie researeh on rubber．neoprone，and plastic insulations and jackets and methods of const ruetion．that are resulting in the finest，most serviemble Retractile Cords made．

Coiled cords are conginered for specilic application．Spe－ cial oil，acid，and moisture resistant propertios of the jackets． and the largest standard molding fasilitios for plag and con－ ductor termination are available to customers．Contact Gild ABAR．Yonr quotation requests will receive immediate attention．

${ }_{*} *$ I. P.C.E.A. and A.S.T.M. Specifications permit $1 / 4$-inch thinner lead sheath.

Purple thread under the fibrous covering or lead sheath identifies TRI-
ANGIE lead covered cable.
Prices on application.

Triangle Building Wire and Cable 600 Volts
Type TW
Trioseal (polyvinylchloride) Insulated Single Conductor-Wet or Dry Locations
TRIANGLE TYPE TW GOOV

Parallel conductors of tinned (alloy coated) copper, rubber insulation of each conductor wrapped with fibrous covering. saturated and finished. Wer-all covering is cotton braid, paint and wax finished for ease of handling.

## Triangle Armored Cable

 600 VoltsListed by Underwriters' Laboratories, Inc. Type ACT

Interlocking flexible steel armor, hot dip galvanized. Bushed and Ionded. Thermoplastic (polyvinylchloride) insulated conductors.

## Triangle Non-Metallic Sheathed Cable

Type NM-Glazon Covered
Trioseal (polyvinylchloride) Insulated 2 and 3 Conductors- $\mathbf{6 0 0}$ Volts

Triangle non-metallic sheathed cable is identified by the parple thread under the braid.

Avaikable with or without ground wire.

Type UF and NMC/UF
Trioseal (polyvinylchloride) Insulated
Trioseal Sheathed
1, 2 and 3 Conductors- 600 Volts

## Triangle Service Drop Cable Self Supporting

Trioprene (neoprene)-Triolene (polyethylene) Insulated Copper Conductor-Copper Messenger 2 and 3 Conductors 600 Volts

Bare neutral supports cable weight leaving conductors free of tension so that installation and splicing operations can be aceomplished casily. Available with either polyethylenc or neoprene covering, both of which offer great resistance to sunlight and exposure to the elements.

Vote: Internal (Strand) Shielding is used also on unshielded cable.
Linshielded braided cables of above 2000 wolts rating are recommended only for installation in permanently dry locations or on full voltage insulators.

## Single Conductor

Shielded and Unshielded

For All Purposes,
Conduit and Duct, Aerial and Direct Burial
Neoprene Sheathed
4001-5000 Volts

# Simplex Anhydrex XX Cables <br> Anhydrex $X X$ Insulation Neoprene Jacket <br> For Power Circuits <br> Overhead, in Ducts, or Buried in the Ground 

## $\ddagger 5,000$ Volts, Nonshielded

Three Conductors

## Construction Features:

Coated copper conductors.
Simplex special strand shielding except over solid conductors.

Simplex-Anhydrex XX heat-resistant, ozonc-resistant, low water-absorptive rubber insulating compound.

Cabled conductors protected by a specially compounded neoprene jacket.

3 -conductor cables have colored tapes for coding.
Simplex Neoprene Jacket is resistant to abrasion, soil acids and alkalies, oils, sumlight and weather hazards.
$\ddagger$ Note: 1.P.C.E.A. specifies a shield in calles operating over 3,000 volts.

## 5,000 Volts, Shielded Three Conductors <br> Construction Features:

Coated copper conductors.
Simplex special strand shielding except over solid comductors.

Simplex-Anhydrex XX heat-resistant, ozone-resistant, low water-absorptive rubber insulating compound.

Simplex Semiconducting Tape printed "SIMPLLEX CONDOCIING TAPE-REMONE WIDEN SPLICING OR ThimilNATING." semiconducting tape is printed in different colors for coding.

Tinned copper shielding tape over insulated conductor.
Cabled conductors protected by a specially compounded ne, prene jachet.

Simplex Neoprene Jacket is resistant to abrasion, soil acids and alkalies, oils, sumlight and weather hazards.

## 5,000 Volts, Shielded <br> Single Conductor <br> Construction Features:

Coated copper conductors
Simplex special strand shielding.
Simplex-Anhydrex XX heat-resistant, ozone-resistant, low water-ahsorphive rubber insulating eompound.

Simplex Semiconducting Tape printed "SIMPLIEX CONDtCANG TAPIE-REMONE: WIIEN SPLICING OR THEMMINATING."
'Timed eopper shielding tape over each conductor,
Srecially compounded neoprene jacket protects insulated conductors.

Simplex Neoprene Jacket is resistant to abrasion, soil acids, atkalies, oils, sunlight and weather hazards.

Made with Interlocked (Condex) Armor or Armor Wire coverings.

# Simplex－Tirex Portable Cables 

2－Conductor 600 Volts W．P．
Selenium Neoprene Armored Cured in Lead
These cables bear approval P－101 of Pennsylvania Department of Mines．Also listed by U．S．Bureau of Mines．

Type W Cable（without Grounding Conductor）
＇lwin：Specially dexigned for shontle car operation．Con－ ductors are＂ribbed＂or＂qear－shaped．＂providing greater adhesion between jacket and conductor insulation．Complies with I．S．Burean of Mines Schedule 2－E．
Robund：Recommented for mining machines．cranes．loaders and other mobile equipment．Suitable for $d$ ec motors and single phase portable machines．

## 2－Conductor Round

Type w

Type G

## Type G Cable（with Grounding Conductor）

Twin：＂Ribhed＂conductor construction．Complies with IJ．S．Bureau of Nines Sehedule 2－F：

Roumd：Twisted conductors．Girounding conductor，divided in two parts．in interstices．Conforms to new Federal Mine Safety Code．

## Shuttle Car Cable

＊Approximate values．
Grounding conductor is divided into two equal parts to avoid increasing diameter of cable．Total circular mil area of the two parts is that of the size listed．

To enable the worhman to identify the size and type of wire，Simplex－Tirex Cables are provided with molded markings on the jacket．Being raised characters．these markings are provided at no sacrifice of jacket thickness．These molded characters will not ruh off or separate from the jacket．

Prices on application．

## Simplex-Anhydroprene Cables

Single Conductor-i600 Volts W.P.

For power circuits in conduits or ducts. or as open wire in buildings. The same cable used underground in ducts may be extended up walls and owerhead in buildings.
Designed primarily to replace baided or taped cables. Simplex-Anlydromene cables in many instances have proved to be more dependable than metallic sheathed types.

## Construction

Conductors: Solid or stranded, tin or alloy coated copper. Insulation: Low-water-absorption Anhydrex rubher. Dossesses high dielectric strength and low specifie inductive capacity. Suitable for use at opreating temperatures as high as $75^{\circ}$ (. $\left(16^{\circ}{ }^{\circ}\right)$.

Jacket: Neoprone, resistant lo sumlight, oil. acids. fungus growth. mildew. heat and thame. Not sulbect to corrosion. Smonth finish facilitates palling through ducts.

## Solid Conductors

## Stranded Conductors

tSimplex-Anhydroprene cables are also availatle for voltages up to 17.000 volts. For Specification data, including weights and diameters. contact Ciraybar.

Prices on application.

## Simplex-Tirex Portable Cables

Designed for portable service under extreme service conditions.

Conductors. flexible or extra flexible stranded and insutated with high-dielectric rubber.

Jackets of Sedenium- Xeoprene. cured in lead for maximum toughess, resistance to oil. moisture, abrasion acids. alkalis and sunlight.

## Motor Lead Cable

 Single Conductor- $\mathbf{6 0 0}$ Volts W.P.

For interior wiring of motors. mine locomotives and other installations reguiring a flexiblo cable.

To enable the workman to identify the size and type of wire, Simplex-Tirex cables are provided with motded markings on the jacket. Being raised characters, these marhings are provided at no sacrifice of jacket thickness. These molded characters will not rub off or separate from the jacket.

Prices on application.

## Simplex-Tirex Portable Cords

## Selenium Neoprene Armored-Cured-in-Lead

Non-kinking, tlexible, portable cord. Copper conducturs stranded to provide extra flexibility and ease of handling. Individual conductor insulation is high-grade rubber compound, color-coded for identitication and polarity marking. Type SO: Heavy duty, designed for long-life, trouble-free performance under continuous rough usage. I sed on portable tooks wherever working conditions call for unusual stamina and endurance. Conductors protected from me-
ehanical injury ly heavy, tough Selenium Neoprene Armor. Type SJO: Lighter and smaller in diameter than Type so). Clean, non-fraying, smooth outer covering. Suitable for use in ollices or in residences where a small, flexible conductor is reguired.
llospital silent Call Cord: Flexible stranded conductors.
Two conductors with color-coded insulation for identification. Brown, smooth rubler sheath.

## Standard Packages-Tirex Cords

Following standard stock sizes, 2.50 ft ., cutout carton.

## Type SO

\#18-2, 3, and 4-Conductor \#16-2, 3 and 1 -Conduetor \#14-2-Conductor

Maximum, two lengths per carton. Mininum length, 50 ft . Each length under 100 feet in carton will be 5 feet more than marked. All other sizes in coils or on reels.

Conductors comply with As'rM Standard B-3.3.
Insulation complies with U/L Type RII-IRW, ASTM Standard D-754, Federal Specification J-C-103 and IPCEA Specification Appendix C.

Sheath complies with ASTM Standard D-6.52 and IPCEA Specification Appendix K and Underwriters' Laboratories standards.

## Call Graybar FIRST For

## Type TW-Nepconol Thermoplastic <br> Listed by Underwriters' Laboratories, Inc.

## 

For use in unusually moist or hmmid locations.
Possesses high resistance to moisture, acids, alkalis, oil and grease.

Available in a wide range of permanent colors, marked and measured.

## Thermoplastic Non-Metallic Sheathed Cable

Listed by Underwriters' Laboratories, Inc.

A multi-purpese cable which can be used for: Direct earth burial in lranch or feeder circuits: interior wiring in wet, damp or corrosive locations; embedded in plaster or masonry block walls, and installed in dry locations.

## National Electric 600 Volt Motor Lead or Apparatus Cable All-Asbestos-Type AIA

## Neartsestios

Flexible coated copper conductor. . 045 in. black ashestos braid which is flame-heat-and moisture resistant impregnated. Dielectric test voltare Kv 1.5 .

Recommended particularly for motor connections, erane and engine compartnent wiring, electric furnace leads and other open wired high temperature installations where moisture is not a factor. Can be operated at temperatures up to $125^{\circ} \mathrm{C}\left(25^{\circ} \mathrm{F}\right)$.

## $\dagger$ l't. in coil.

## National Electric Switchboard Wire 600 Volt-Asbestos-Varnished Cambric Type AVB

Recommended for wiring panel hoards, switchboards and control equipment; also suitable for general purpose wiring in dry lecations. Can le operated at temperatures up $6090^{\circ} \mathrm{C}$ ( $\left.19.4^{\circ} \mathrm{F}\right)$.

Solid erated copper conductur; gray flame-and heat resisting finish cotton braid. Standard package 500 feet.

Varnished cambric thicknesses: Sizes Nos. 14 to 8, . 030 in.; Nos. 6 to $4 / 0$, 010 in . Size Xiss. 14 to 8 suligeeted to 3 kv , and Nos. 6 to 404 kv , diclectric test voltage.

*Subject to plus or minus $5 \%$ tolcrance due to variations in manufacturing processes.

## National Electric Braided Power Cable 5000 Volts-Asbestos-Varnished Cambric Type AVA-50

Recommended for wiring in the open or in conduit where subject to heat, oil and grease, fire hazard and corrosive fumes in boiler roonts, steel mills, power plants, factories ete. Permitted for operating temperatures as high as $100^{\circ} \mathrm{C}$ (212 ${ }^{\circ}$ ト)
Stranded copper conductor. Black asbestos braid is flame-heat-and moisture resistant impregnated. Varnished cambric thichness . 120 in., askestus loraid thickness . 04 in in. Dielectric test voltage $\mathrm{K} v .12 .5$.

## National Electric Power and Rheostat Cable 600 Volt-All-Asbestos Type AlA

Recommended for wiring rheostats, ranges, hot-plates and general open wiring where exposed to heat, fumes, grease, etc. Will withstand operating temperatures up to $125^{\circ} \mathrm{C}$ ( $257^{\circ} \mathrm{l}^{\circ}$ ). It is not recommended for use in raceways except as leads to or within apparatus.
Uneoated stranded copper eonductors; .0t5-in. flame-heat-and-monisture resistant impregnated back asbestos braid. Subjected to 1.5 kv dielectric test voltage.

tSupplied on recls.
*Suhjeet to plus or minus $5 \%$ tolerance due to variations in manofacturing processes.

Dote: Can be furnished with white flame-and-heat resisting saturant and finish, for 300 volt service and operating temperatures as high as $200^{\circ} \mathrm{C}\left(392^{\circ} \mathrm{F}\right)$ in definitely dry locations.

## National Electric Braided Power Cable 600 Volts Asbestos-Varnished Cambric Type AVA

Stranded copper conductor; black asbestos braid which is flame-heat-and-moist ure resist ant impregnated.
Recommended for power wiring in the opon, in conduit or raceways where subject to heat, oil and grease, fire hazard and corrosive fumes in boiler rooms, steel mills, power plants, factoriss, etc. Permitted for operating temperatures as high as $110^{\circ} \mathrm{C}\left(230^{\circ} \mathrm{F}\right)$.
Thickness of ashestos braid $.0 .5 \overline{\mathrm{in}}$. Thickness of varnished cambrie . 030 in . on sizes \#1 thru $\$ / 0$ and .010 in . on circular mil sizes.

## National Electric 600 Volt Motor Lead or Apparatus Cable

## Asbestos-Varnished Cambric -Type AVA

Flexible coated copper conductor. Black asbestos braid is flame-heat-and-moisture resistant impregnated.
Recommended for coil connections, transformers, resistors, traction and mill motors, diesel and electric locomotives, etc. Can he operated at temperatures up to $110^{\circ} \mathrm{C}\left(230^{\circ} \mathrm{F}\right)$.
Thickness of astestos braid .015 in . Thickness of varnished cambric . 030 in . on sizes \#14 thru $4 / 0$ and .040 in . on circular mil sizes.

## National Electric Fixture Wire 300 Volt-Heat-Resisting Type AF

## Plain

Braided
Recommended for wiring lighting fixtures, radio apparatus and as small motor leads. Suitable for operating tempreatures 4 to $150^{\circ} \mathrm{C}\left(302^{\circ} \mathrm{F}\right)$. Standard colors, plain type-black or white. Braided type-brown, old brass, or black with or without tracer in cotton or rayon.

## National Electric Motion Picture Cable

300 Volt-All-Asbestos-Type AA
national

Rope lay stranded plain copper conductor. . 045 in . white asbestos braid which is flame and heat resisting. Subjected to 1.0 kv dielectric test voltage.
Recommended for motion picture projectors, arc lamps, spot lights and industrial applications. Can be operated at temperatures up to $200^{\circ} \mathrm{C}\left(392^{\circ} \mathrm{F}\right)$.

## National Electric Power Cables <br> ＂Nepco－Sil＂Silicone Rubber Insulated 0 to 1000 Volts <br> Maximum Operating Temperature－125 $\mathrm{C}\left(257^{\circ} \mathrm{F}\right)$

Stranded timed copper conductor，Nilieone rubber insula－ tion，and white glass（silione impregmated）braid．

## National Electric Station Control Cables

For use in control circuits rated at 600 wolts and less． Solid emducturs can be furnished but flexible conducters are mest desirable as they provide for a more flexible，easior to handle assembly，and also provide for greater flexibility on the individual conductors．

Smeify Vational Thermo－Sal rubher insulation if moisture， high temperatures or other eritical conditions are to be en－ countrered．

Combuctors are cabled round with fibrous fillers where
neessary and tomed together with a rubber lilled cable tape． Over this assombly is applied Vational＇s tough Nerpreme sheath．This shath provides resistance teooil，grease．moisture， hoat，flame acids，alkalis，oxidation，and abrasion to mention a few．

## National Electric Nepcozone Flexlay Cable

## Type RR-5000 Volt-Non-Shielded For Duct Installation

Conductors of tinned soft drawn copper complying with ASTM Standard 13-33. Class C stranding. Strand shielding of semi-conducting non-metallie tape. Insulation is Nepcozone butyl or oil base rompound complying with ASTM Standard D-1352 or 1)-54 and LPCEA Standard S-19-81 Appendix O or 1). Also Fioderal Spec. J-C-I?1.

Neoprene sheath complies with Astal standard 10-7.02 and IPCEA Standard S-19-81 Appendix K.

## National Electric Nepco-Lok Power Cables

## Type NE-1 <br> Three Conductor

5,000 Volt Varnished Cambric Insulated Nepconol-Jacketed Interlocked Armor Cable

For 0 to 5,000 volt power circuits in industrial plants, sul-stations, and similar installations. "The Nepomol thermoplast ic sheath provides a water-seal making the cable suituble for outdoor instalhations.

Comsists of untinned coprer conductors, varnished Cambric tape insulation, color coded tape on each conductor, conducturs cabled with jute fillers, cable tape, a Veponol thermoplastic-sheath and single strip interkocked galvanized steel armor. Aluminum or bronze armor can also be furnished.

Type NE-2
15,000 Volt Varnished Cambric Insulated, Shlelded Nepconol-Jacketed, Interlocked Armor Cable

For 15,000 volt grounded neutral service for industrial and ot her power applications. Shielded to provide the protection neressary at such voltages. The Noponol thermoplastic sheath serves as an adequate water seal which is recommended for installation in outdoor or damp locations.

Constructed with untinned copper conductors, varnished Cambric tape insulation, rubber filled tape on each conductor, timued copper shielding tape, jute fillers, tinned copper shielding binder tape. Nepoonol thermoplastic-sheath, and a single strip interlocked galvanized steel armor. Aluminum or bronze armor can be furnished.

## National Electric Nepco-Lok Power Cables

## Type NE-3 <br> *Three Conductor

600 Volt Varnished Cambric Insulation
Braided, Interlocked Armored Cable

The most economical calle of the Nopco-lok line. Designed for 600 volt maximum service in indoor and dry locations. Does not have the overall protection of a Nepeonol jacket and is not recommended for outdoor or installation in damp locations.

Constructed with untinued copper conductors, varnished Cambric tape insulation, color coded cotton braid or rubber filled tape on each conductor. cabled conductors are eovered with asphalt impregnated fibertes tapes, all encased in a single strip interloched galvanized steel armor. Aluminum or bronze can also be furnished.

## National Electric Underground Service Entrance Cable

Listed by Underwriters' Laboratories, Inc.

## Type USE—Style RR-Flexlay

Has unlimited application in the residential, commercial and industrial wiring field.

Can be buried directly in earth. installed in ducts or conduit, or in the open air for wet or dry conditions.
Ideally suited where both underground and overhead installations are required on the same line.

Neoprene sheath affords protection against the destructive forces encountered below the earth's surface and also gives outstanding protection when exposed to the sun and the weather.

CovaLFLEXAA.B.C!

## For Open or Concealed Surface Wiring

Flat shape permits laying directly on walls or ceilings of tile, emerete or brick.
When necessary, Ovalflex may be covered with an ordinary thickness of plaster.
Bends easily, edgewise or flatwise, for snug fitting into eorners around machincry, beams or offisets.
Furnished with anti-short bushings for dependable, safe bushing of cut ends of cable.
Regularly supplied with N.E.C. insulation and solid conduetors: other insulation types and stranded conductors upon specification.

## Kaiser Grizzly ${ }^{*}$ Power Cables

Rubber-insulated, neoprene-jacketed Griarly Power Cables are used for general power distribution. Nay be installed in conduit, underground ducts, or buried directly in the gromend. When supported by a suitable messenger they may be installed aerially.

Cables conform to all applicable IPCEA and NEMA specifications. They have conductor shielding for operating voltages above 2,000 and are externally shielded for voltages above $\mathbf{3 , 0 0 0}$. Bither annealed copper or three-quarter hard aluminum is available as the conductor.

Aluminum cables mean less weight and should be considered for use where weight is important, such as for aerial cable.

All insulations used on these constructions are resistant to heat, allowing the conductor to be operated at the maximum temperature permitted for rubber and rubber-like insulation. For cables used in duct installations and for direct burial, the insulations are resistant to both heat and moisture. Laytex insulation is available on the smaller sizes of 600 volt cables. resulting in cables with smaller diameters and less weight than can be oftained with the conventional extruded insulations. Orone-resistant insulations of the oil base or Butyl type are available for all voltages. Both insulations, especially the Butyl type, show remarkable electrical stability and outstanding resistance to ozone, heat and moisture.

The neoprene jacket used on cables for operation at 2,000 volts and less conforms to A.S.T.U. Specifiation D-752. The jacket used on cables for operation at higher voltages conforms to this specification and, in addition, possesses ozone resistance which compares favorably with the requirements for oil base insulation.

## Kaiser Service Entrance Cables Aluminum Conductors <br> Concentric Uninsulated Neutral <br> Underwriters' Type SE, Style U <br> Rated for $75^{\circ}$ C. Operation

## KAISSER WMRU相

## Braided

Consists of two or three conductors, one of which is uninsulated. Conductors are aluminum insulated with RIIW compound and covered with a color coded tape.

In the two conductor cable, the taped conductor is covered with an aluminum conductor in the form of a concentric wrap. Over the uninsulated conductor, a moisture seal is applied and then protected by a moisture resistant, flame-retardant lraid with a gray finish.

The three conductor cable is constructed as above with the exception that two taped conductors are laid parallel before application of the concentric. Couductors 8 AWG and larger are stranded.

## Neoprene Jacketed

Same as above except the completed construction is covered with a neoprene jacket, rather than braid.

Consists of two or three stranded conductors, one of which is uninsulated. Conductors are annealed coated copper insulated with type RU11 $90 \%$ unmilled grainless rubber insulation and covered with a color coded weatherpronfed cotton braid. In three conductor cables two insulated conductors, one red and the other black, are laid parallel and covered with a treated paper tape. Over this assembly the minsulated annealed coated copper conductor is applied in the form of a concentric wrap. Over the uninsulated conductor a moisture seal is applied and the whole assembly is protected by a moisture resistant, flame-retardant braid finished gray. In two conductor cables a single insulated conductor, colored black, is used.

## Specification 952-Neoprene Jacket

Same as above except tape on individual conductors. On the three conductor construction, a paper tape is applied over the neutral (open wrap). On the two conductor construction, the jacket is applied over the concentric.

## Laytex Kaiser Master Portable Cords and Cables

The Kaiser Master's rugged, lead-cured jacket of $60 \%$ neoprene assures highest protection against sunlight, heat, oil, acid, alkalies, etc. Fine strands of tinned copper are helically wound around a fibrous core for maximum resistance
to flexing, impact, abrasion and cord breakage. Patented Laytex ${ }^{90 \%}$ natural rubber insulation guarantees unbeatable physical, aging and electrical properties.

## Laytex Kaiser Master Portable Cords Fibrous Core Conductors- $\mathbf{6 0 \%}$ Neoprene JacketCured in Lead <br> Type 50-Specification 920 Heavy Duty 600 Volts- $60^{\circ}$ C.

## 

A 3-mil wall of neoprene laytex over the insulation affords added protection. Insulated conductors are twisted with rayon tire cord fillers, then spirally wrapped with cotton and jacketed with neoprene.
Laytex Kaiser Master Cords conform with all industry practices concerning jacket thickness and over-all diameter.

## Laytex Kaiser Master Portable Cables 600 Volts-2-Conductors Paraliel- $60^{\circ} \mathrm{C}$. Neoprene Jacketed-Cured in Lead

## Laytex Kaiser Master <br> P-103BM

Designed for service demanding greater current-carrying capacity than permissible with portable cords. Standard constructions are: 2-conductor parallel cable, Types $W$ and $\mathrm{G}, 2,3$ and 4 conductor round cable, Types $W$ and $G$.

Sizes 8 through 1 give 600 volt service. llubber fillers are used in all 3 and 4 -conductor round Laytex Kaiser Master Cables. For the 2, 3 and 4 -conductor round cables, the neoprene jacket is applied in two layers with an intermediate reinforcing fibrous braid.

Note: Cables approved by Pennsylvania Dept. of Mines.

## Kaiser Master Laytex Resin Utility Control Cables

## KAISER WIRE

Composed of 19 -strand coated annealed copper conductors individually insulated with Laytex, an unmilled natural rubber compound protected by a three-mil colored synthetic resin coating. applied by the dip process, and firmly bonded to the insulation. 'The required number of conductors (2-18) is cabled together with suitable treated fillers, as necessary, and covered with a rubber-filled tape. The core thus formed is covered with a nooprene jacket.
Suitable for 600-volt service on the control circuits of the electrical systems of industrial plants, utility generating stations and similar installations. Way be installed in conduits, ducts or trays, as aerial cable on a suitable messenger or buried in the ground. Specification No. 935.

## Kaiser Master Laytex Resin Supervisory Control Cables

Used in systems for the selective control and automatic indication of remotely controlled units, such as in municipal fire alarm, police signal and traflic control applications. Composed of solid annealed coated copper conductors individually insulated with $90 \%$ unmilled grainless rubber compound and protected by a three-mil colored synthetic resin coating firmly londed to the insulation

Required mumber of conductors (2 to 20) are cabled together with suitable treated filler, as necessary, and covered with compound-filled tape. Wach layer of more than 8 conductors is covered with rubber-filled tape. The core thus formed is covered either with a neoprene jacket. a lead-alloy sheath, a lead sheath with armor or a rubler jacket.

Suitable for 600-volt scrvice. Specification No. 933.

## Kaiser Fluted Gold Welding Cable Extra Flexible $60^{\circ}$ C．

An entirely new and superior conception in the design of welding cable．Its rugged fluted jacket of yollow， $60 \%$ rubber is molded with fluting to incroase case of handling and over－all flexibility，to aid in dissipation of heat from the conductor． The yellow jacket provides an excellent contrasting color to black where two cables are required on a welding machine． Fluted Gold is easier to see and cooler to handle．Cable is lightweight and flexible，facilitating welding in eramped quarters．

Base of cable made of fine strands of bare copper，which are combined into a ropestranded conductor and covered with a wrap of high－grade insulating paper tape．Special insulation of $60 \%$ rubber is applied over the paper tape． Heavy reinforcing braid is applied over the insulation，and the cable is completed with a rugged jacket of yellow 60\％ natural rubber，molded and cured in tead to produce a jacket of permanent smoothness and maximum rugredness．

Designed for use on clectrode holders．Available with aluminum conductor．Specification No． 751.

## Kaiser Master Welding Cable

Extra Flexible $60^{\circ} \mathbf{C}$ ．

## WELDING CABLE

Ihope－stranded conductor of fine strands of bare copper forms the base of this construction．Conductor is wrapped with a high－grade insulating paper tape and insulated with Performance compound．Heavy reinforcing braid is applied over the insulation，and the assembly is completed with a jacket of $60 \%$ neoprene，cured in lead for maximum tough－ ness and continuonsly embossed for identification．

Designed for use on electrode holders．Its extra－flexible construction increases ease of handling．Available with aluminum conductor．Specification No． 752.

$\dagger$ The above values of allowable current carrying capmeity are hased on eopper temperature of $60^{\circ} \mathrm{C}$ ．and an ambient tempera－

 service，the load factor may be much higher than indicated without werheating the cable as anhemt temperature will ordinarily le substantially lower than $10^{\circ} \mathrm{C}$ ．

Note：The sizes of cable recommended by the Machine（iroup of NEMA Vilectrie Wielding section for standard hand－ weding equipment based on maximmm lempth of 90 ft．，that is，fot of wolding cable and t．foel of return cable，are as follows： 100 ampere woddor－No． 2 eable： 200 ampere wedder－No， 2 cable； 300 ampere welder－No． $1 / 0$ cable； 100 ampere welder－ No． $2 / 0$ cable； 600 ampere welder－No． $3 / 0$ eable．

## Kaiser Intercommunication Cables <br> Thermoplastic Insulation and Jacket

Cables are made with bare annealed copper conductors insulated with $.015-\mathrm{in}$ ．of colored thermoplastic compound． Pairs and single conductors as required are cabled and a treated crepe paper tape applied over the conductor assemily． A jacket of brown thermoplastic compond $.010-\mathrm{in}$ ．thick is applied overall．Finished cable is flameprof throughout． Specification No． $2=8$ ．

## Whitney Blake Dynaprene

Approved by Underwriters' Laboratories, Inc.

Veoprene is a fough syuthetic rubber. For all-around servire, neoprene componids provide the most dependable jackets available for flexible cords. because of their exceptionally good resistance to oil, aging, smulight, chemical vapors and alirasion. Whitney Bhakes' Dynaprene neoprene-jacketed eord is recommended where the exposure conditions or application demand a long-wearing, eil-resisting cord. Factories and parages where oil and grease are constant hazards to rubber jarketed cords are lacalities where neoprene-jacketed cord should be used. Sanders, pertable tools, and food mixers which come into contact with oils and eleaning compounds in normal use are just a few of the products which require neoprene-jacketed cord if early replacement is to be avoided.

Construction: Annealed eopper conductors stranded for flexibility; wound cotton separator over conductor to protect insulation from eorrosive effects of copper; high dieleetrie stringth natural or synthetic rubber insulation, color-coded for polarity; fillers for roundmess and strength; textile covering for firmess and reinforement; tongh, abrasion, oil and flame-resistant, tire-tread lym neoprene jacket - for rugged performance.

## Whitney Blake Rubber Jacketed Portable Cords

Natural or synthetic rubber, Buna type, provides a sturdy jacket for cords which are not used in greasy, oily locations or where they might he exposed to chemical fumes. Whitney Blake rubber-jacketed cords are of the finest quality, the jacket being carefully compounded for abrasion resistance and tear resistance.

Construction: Annealed copper conductor stranded for flexibility; separator over conductor to protect insulation from corrosive effects of copper; high dielectric strength natural or synthetic rubber insulation; fillers for roundness and strength: textile covering for firmness and reinforcement; tough, durable natural or synthetic rubber jacket for rugged performance.

## Whitney Blake Teleprene ${ }^{\text {* }}$

## Neoprene Jacketed Outside Telephone Wires

TEIEIIRENE telephone wires are designed to give long, dependable service. Conductors have Teleplate coating-lead to resist corrosion with an electroplated brass coating over the lead to provide enduring adhesion of the insulation to the conductor. Teleplate coating meets the Ammonium Persulphate Test for continuity of coating, in accordance with A.S.T.M1. Spec. B-189. Insulation is high quality Buna rubber selected for its long life and excellent electrical characteristics. Jacket is a tire-tread type neoprene compound which provides excellent resistance to sunlight, abrasion, oils, acid fumes, alkalies and other corrosive chemicals.

Samples exposed to natural weathering for twelve years remain substantially unchanged in appearance and tests indicate that many more years of service can be expected:

Prices on application.

## Whitney Blake Parallel Distribution Wires

Designed for use in rural areas in place of open wire. Its tough jacket protects the conductors from the many conditions that harm open wire. Parallel Distribution Wire is economical hecause it can be installed with minimum later. the need for cruss arms is eliminated. It may he used to extend runs of rural distribution wire where only one, two or three pairs are required. In lecations where atmospheric conditions are detrimental to open wires. such as the seat const, insulated larallel Distribution Wire is malfected.
Construction: Extra high strength $30 \%$ enductivity Copperwedd conductors. High mellecular weight polyethylene insulation and jacket. Ridged one side for polarity identification.

## Microphone Cable Copper Shield

Construction: Timed soft copper conductors insulated with high quality rubber and shielded with braided tinned copper. Cothon ewvered with oil resistant neoprene jacket.

*One eonductor to other conductors connected to shield.
**Any pair with third leg and shield grounded.
$\dagger$ Wodified for heavy duty. Can be used for direct burial.

Whitney Blake Multi-Pair Distribution Wire
Polyethylene Insulation-Polyvinyl Chloride Covering Over Each Conductor

Used primarily for extending service economically in rapidly growing rural and suburban resident ial areas. Made with high, conductivity No. 19 AWG., No. 22 Allg, and No. 2t Awg. ammealed copper conductors.

No. 19 Awg. and Vo. 22 Awg. are made with paired conductors, twisted with varving lays to minimize eross talk, are insulated with high dielectrie strength, weather resistant polyethylene. Color coded with polyvinyl chloride plastite jachet. Biars are catbed around a core of polyethylene-covered 109E galvanized stere.

No. 21 Awg. is made in the same manner is other two sizes except it is insulated with color coded polyvinyl chloride and has an over-all binder. Shipped on nonreturnable reels.

## Whitney Blake Telecable (Inside)

Construction: Solid bare soft copper conductors in No. 21 and No. 22 AWG insulated with tough semi-rigid polyvinyl chloride to a nominal wall of .014 in . Color coded for polarity and pair identification. Dairs are twisted with systematically varied lays to minimize crosstalk. Pairs are cabled without fillers into a round core. F'ree-stripping jacket is brown or ivory polyvinyl chloride with a nominal wall of .040 in . for all except 51 and 76 pair which have . 0.50 in, nominal wall. Sted rip wire under jacket for easy removal of plastic covering.

# Whitney Blake Telecable (Outside) Exchange Area Cable for Aerial and Duct Use 

Totally new design using only copper, polyethylene and an aluminum shiefd. Polyethylene used for conductor insulation becouse of its low enpacitance, high dieleetric strength and generally exeellent stalbility. Black polyethylene, properly compounded to withstand sumbight oxidation, is used for the jacket. REA approved per Specifications PL-11.

Construction: Each conductor is bareannealed copper with a nominal insulation wall of . 010 on 21 AW (; . .012 on $2=$ AWC: and .016 on 19 IW (i. Its high diefectric strength insures satisfactory operation of cable even if sheath becomes damaged. Up to and including 76 Pair Cable, one pair of each cable has one red leg and one orange leg for use as tracer pair. All other pairs have one red leg and one natural leg.

101 Pair Cable has a center core of 50 pairs, 49 pairs with one ley red and one leg natural and one marker pair with one leg red and one leg orange. Around this core are cabled 51 pairs, 50 pairs with one leg blue, one leg natural and one marker pair with one leg red and one leg orange.
152 Pair Cable has center core of 52 pairs, 51 pairs with one leg red and one leg natural and one marker pair with one leg red and one ley orange. Around this core are cabled 62 pairs, 61 pairs with one leg blue and one leg natural and one marker pair with one leg red and one leg orange. Outside layer has 38 pairs, 37 pairs with one ley red and one leg natura and one turker pair with one leg red and one leg orange.
202 lair Cable has a center core of 52 pairs, 31 pairs with one legred and one leg natural and one marker pair with one leg red and one ley orange. Around this core are cabled 62 pairs, 61 pairs with one leg blue and one ley natural, and one marker pair with one log red and one leg orange. The next layer has 41 pairs, 40 pairs, with one leg red and one leg natural, and one marker pair with one leg red and one legr orange. The ontside layer has 47 pairs, 16 pairs with one leg blue, one leg natural and one marker pair with one leg red, one leg orange.
303 Pair Cable assembled into 50 and 51 pair units, each having a red-orange pair in the outer layer. Five units- 3 with blue-white pairs and 2 with red-natural pairs are cabled around one unit with red-natural pairs. Each unit is provided with an open spiral multiple and textile binder.

Whitney Blake Telecable Exchange Area Cable for Direct Burial

Construction of this cable is similar to Telecable Exchange Area Cable for aerial and duct use with the addition of a double layer of heavy gage aluminum armor applied spirally over the polyethylene belt. A sheath of black weather-resistant polyethylene is applied over the armor.

## Whitney Blake Teleduct ${ }^{\text {* }}$ Inside Telephone Wires

Teleduct is the family name for Whitney Blake inside telephone wire and without jacket. Plastite and neoprene types are available. Teleduct is used inside buildings for extending circuits from arrestors or other terminating fixtures of outside lines to station sets. 500 Ft . Coils.

Construction: Soft copper conductors insulated with smooth Plastite polyvinyl chloride that has high dielectric strength and is tough, flameproof and highly resistant to abrasion, water, oil, alkali and most solvents. Colored rayon threads permit easy identification for polarity. Standard colors, ivory and brown.

Construetion: Soft copper conductors, one tinned for instant polarity identification. Iligh dieleetric strength IPastite insulation. Web type construction for easy separation of insulated conductors. Wire requires less space than twistod pair type. Available in brown and ivory. Designed for low cost speedy installation by modified Bostitch type stapling gun. Lies flat for exceptionally neat and unobirusive installation.

Soft copper conductors insulated withf ree stripping, high dielectric strength polyethylene insulation. Over-all plastite jacket. Pair has one leg red, one leg green; triple has yellow third leg; quad has black fourth leg. Used in all types of building ducts.

## Whitney Blake Teleduct ${ }^{*}$ Inside Telephone Wires

Construction: Tinned soft copper conductors, color coded neoprene insulation, over-all brown neoprene jacket. Nominal wall of insulation is .022 in . Nonimal wall of jacket is $.0 \geq 8 \mathrm{in}$. Tough neoprene jacket is highly resistant to sunlight, heat, moisture, abrasion and eompression loads. This wire can be used directly from the outside station protector to the telephone with eomplete safety.

## Whitney Blake Telecord Replacement Sets

Telecord has excellent flexibility and is neat, clean and attractive. The neoprene jachet is highly resistant to abrasion, perspiration, humidity, oil and grease.

Ilas cadmium bronze tinsel conductors for improved conductivity and flex endmance, a protective separator and an essentially sulphur-free rubber insulation to eliminate the risk of tarnish. Conductors are parallel and paper wrapped.

Made from Telecord deseribed above, the following standard cord sets are completely trimmed and equipped with solderless terminals and strain reliefs, ready for attachment to the equipment indicated.

Cat．No．3．027 is similar fo Cat．No． 3513 lut has a No． 2.2 AllG solid timmed copper gromnd wire run laterally under a timned copmer shiold，a lateral paper tape and an over－all gray cotton loraid．

## Whitney Blake Shielded Wires and Cables Microphone Cable Semi－Conducting Textile Shield

Construction：This is a completely new cable design in which a close semi－condocting textile wrap and a stranded flesible drain wire replaced the eonventional braded copper shield．（anduchors are cadimum copper for imponed tlex lifie and insulated with high quadity rubher．This cable is not subject to damage by twisting and by the prossame of heravy equipment rumbing over it．There is no danger of the shield broaking as a resiat of contimued flexing．Ther cord has at tough brown neoprene jachel which will resist abrasion．ail， proase．perspiration，sumbight and acid fumes．The cord is lightwoifht，hamdles easily and can be coiled easily without kinking．The use of the textile shield removes the objertiont－ able stiflness inherent in copper shielded construetion．Xoisy circoits camsed by intermithent opens with movement of the cable are non－existant in this new construction．Because of this construction this cord has longer service life．

## Whitney Blake Telecable Self Supporting Exchange Area Cable

Available in 6, 11, 16 and 26 pair No. 19 AWG high strength $40 \%$ conductivity copperweld conductors with high molecular weight polyethylene insulation.

Insulated conductors are twisted into pairs with the lays varied to eliminate cross talk. Wach cable has a tracer pair with one red leg and one orange leg. All other pairs have one red leg and one natural leg.

Cable core wrapped spirally with a non-lygroscopic tape and then covered with an aluminum shield. Jacket is black weather-resistant polyethylene.

## Measured Electrical Characteristics

Mutual Capaeitance: At 1000 cps . Average- .085 microfarads per mile.

Conductor Resistance: At $68^{\circ} \mathrm{F}$. Maximum- 117 ohms per mile of cable.

Insulation Resistance: Conductor to other conductors and shield- Minimum 1000 megohms 1 mile.

Dieleetrie Strength: Conductor to other conductors and shield- 10,000 volts rms.

Attenuation: At 1000 cps . Nominal-2.01 db/Mile.
Transmission Distance: Non-loaded, based on 30 db loss Nominal- 15 miles.

## Whitney Blake Telecable Multiple Drop Cable

Provides a simple, fast method of installing multiple drops. Made with No. 19 AWG bare, medium hard copper, polyethylene insulated conductors twisted into pairs with length of lay systematically varied to provide minimum cross talk levels.

Color-coded pairs are cabled around a center filler core, then wrapped with separator tape over which is applied an aluminum shield.

Over-all black polyethylene jacket provides protection under all weather conditions. Shipped on nonreturnable reels.

## Whitney Blake Teleframe * Distributing Frame, Jumper and Duct Wires

Teleframe is the family name for Whitney Blake distributing frame and jumper wires made with enamel and textile insulation, with Plastite insulation and with Plastite insulation and nylon jacket. 1000 Ft. Metal Spools.

Construction: Soft copper conductors, tinned for easy soldering. Insulated with high dielectric strength semi-rigid Plastite. Nominal wall of 015 in . Toughness and high resistance to crushing of semi-rigid Plastite permits small diameter. Semi-rigid Plastite is tough, abrasion resistant and flame resistant. I sed on distributing frames and cross connecting racks and in duets.

| 1404 | 22 S 4 12BWG | 17.7 | . 055 | 7 | 14 |

Construction: Same as 22 S with the following exceptions. Nominal wall of insulation is .010 in . For extra protection a jacket of transparent nylon, which resistss cuffing and pulls easily through rings or bunches of other wires, is added. Nominal wall of jacket is . 00.0 in . I sed on distributing frames and cross connecting racks and in ducts.

Construction: Enamel timed soft copper conductors covered with two cellulose acetate wraps and one cot ton wrap to provide insulation and mechanical protection. Laequered for flame and moisture resistance and to prevent fraying.

## Plastic Wire and Cable Flexible Cords

## PWC Yankee Saftey Cord

(Chrome Yellow Jacket)
Designed for extra hard service in industrial, municipal and utility organizations where safety is important. Insulation and jacket are oil and moisture resistant. Will not support combustion.
On quantity orders personalized jacket printing available according to special PWC policy.

Type ST - $\mathbf{6 0 0}$ Volts

## PWC Motor Plant Cord (Maroon Jacket)

Designed for extra hard usage in industrial plants where exposure to oil and grease is prevalent. A special composite stranding in the conductors assures extraordinary flexural endurance and increased breaking strength. It has excellent abrasion resistance.

Rated for 600 volts.

PWC Super Safety Tool Cord (Clear Vinyl Jacket)

Designed for hard usage on high cycle and standard electric tools requiring three circuit conductors and a grounding conductor.

This is a safety cord with four additional uninsulated grounding conductors laid into the interstices of the insulated conductors.

A transparent vinyl jacket covers the cable assembly to allow visual inspection of the core and grounding conductors at all times.

Rated for 600 volts.

## PWC Multi-Conductor Flexible Control Cable <br> Rated 600 Volts

A cable design, available in sizes \#18 to \#10 AWG with
 extra flexible stranding. The conduetors are insulated with a high dielectric strength polyvinyl chloride and are fully color coded. Cabled for maximum flexibility.

A polyvinyl, hard service jacket offers ample protection from severe usage. Will not support combustion. Is abrasion and impact resistant.

## Plastic Wire and Cable Station Control Cables

## Rated 600 Volts

## PWC STATION CONTROL CABLE

Station Control cables are made in conformance with 1 PCEA specifications. Insulated with polyvinyl chloride and fully color coded.
Sheathed with a tough vinyl sheath having temperature range from $-40^{\circ} \mathrm{C}$. $1080^{\circ} \mathrm{C}$. Alternate constructions can be furnished on request.

Plastic Wire and Cable Rur-A-Line
Polyethylene Insulated Telephone Line Wires No. 214, No. 212, No. 083 S

## PWC - RUR ALINE - WIRE

A two conductor parallel line wire insulated with a tough, high-molecolar weight polvethylene. Extra high strength eopperwedd or steed conductors allon span lengeths up to 600 feet in light storm bading districts. Surcial preformed hardware has beren desighed lor Rum-A-Line, Sag, construction and transmission data can be farmished apm reguest.

Recommended for rural tolephome lines; railroad communications: lerest telophone lines; yard commonication systems and sea coast and corrosive locations.

Standard package 5000 ft . reels.

Prices on application.

## Plastic Wire and Cable Microphone Cord - Shielded

Tinned ennductors, polyethyleme insulation, timned copper braid shiefd. 80', mininmm coverage. Black vingl jacket overall. Recommended for microphone trailing and hard nsage.

Moisture and oil resistant. Hirh insulation resistance and low attemation at audio frequencies.

## Plastic Wire and Cable Multi-Pair Inside Telephone and Intercommunication Cable Unshielded

## PWC TYPE 122 INTERCOM CABLE

Type 122 cables are manufactured in sizes \#2 1 , \#22 and \#19 AWCi. The conductor insulation is a tough heat resistant vimsl componnd. Twisted pairs have a systematically varying lay to minimize cross talh

The vablo assembly is bound with nylon binder tape. A special mylon rip thread is placed longitudinally under the jacket to facilitate easy jarket removal. A suerial vinyl jacket provides excollont protection against all types of installation conditions.
Conductor sizes 24 and 22 are insulated with a 012 in. wall of vinyl, and size 19 with a .015 in , wall of vinyl.
Recommended for inside telephone, switchbard, intercommunication and somud systems.

Packaged in 500 ft . coils or 1000,1500 or 2.500 ft , Ienarths on reels.

## Plastic Wire and Cable Gasoline and Oil Resistant Wire <br> U/L Listed and Labeled

NyIon Jacketed-600 Volts
PWC - OASOLINEIANO OLL RESISTANT TYPE TW -500 F

For electrical and control wiring where exposure to gasoline or oil is prevalent. 'TW' insulation with nylon jacket.

Listed as 'lype 'IW $60^{\circ} \mathrm{C}$. at 600 volts. (bil Resistant for use in open wiring or approved metal raceways where exposed to gasoline, gasoline vapors or mineral oil.

Sizes 14 to 12: Black, white, red, green, orange.
sizes 10 to 6: Black, white, red.

## Plastic Wire and Cable Mining Machine and Shuttle Car Cables

Listed by U. S. Burean of Mines and Dept. of Mines Pennsylyania as Flame Resistant and damage resistant. Listing No. P-124-13.M.
'These mining calles are the first of thermoplastic construction to be listed by the 1. S. Bureau of Mines and the Dept of Vines Commenwealth of Pemsybania. In addition (o) meting the flame resistance tests, these cables also meet the severe Damage Resistance 'liests of U.S. Burean of Mines.

Twin Type W Cable- 600 Volts (Small Diameter) Color Orange

"Small Diameter" is explained by the fact that cable with a given conductor size has the same overall dimensions as the noxt smaller size in a conventional Type W eonstruction. (i.e. a \# A AWG Small Diameter Type W Cable has the same dianeter as a \#1 IW (i conventional Type W Cable.) This fartor has two distinct advantages.

1. Ising the same conductor size, at least $20 \%$ more cable can be rected.
2 . Using the same cable diameter, the next larger conductor size can be used, allowing greater strength, less voltage drop and reduced heating.

Interral insulation and jacket of special "PWC.-DR" polyvinyl chloride compound. High dielectric strength, excollent flame, moisture, abrasion, crushing. and impact resistance. This compend is also resistant to vils, greases. aeds and alkalis. Service tomperature range, $0^{\circ} \mathfrak{F}^{\circ}$. (1) $180^{\circ} \mathfrak{F}^{\circ}$.

## Twin Type G Cable - $\mathbf{6 0 0}$ Volts - Color Orange

Type G cable is constructed with extra flexible stranding and the newly developed "PWC-DR" Compound. The integral insulation-jacket design gives greater service life and performance; will not crack or come apart under the most severe service conditions.

Insulated Conductors: Bare soft annealed copper in AWC: sizes \#6, \#1 and \#2 only. Type K, extra flexible stranding per ASTM-B-1:2 except one conductor with reverse lay. Individual strands are \#30 AWG size conforming to ASTM 13-3.

Ground Conductor: Bare soft annealed copper conductors of 'Type K stranding. Size equals $50 \%$ minimum of the power conductor size.

Insulation: Integral insulation and sheath of special PWC. polyvinyl chloride compound. High dielectric strength, excollent flame, moisture, abrasion, crushing and impact resistance. Compound is highly resistant to oil, grease, acids and alkalis. Service temperature range from $0^{\circ} \mathrm{F}^{\circ}$. to $180^{\circ} \mathrm{F}^{\circ}$.

Standard feet on reel 1000 feet.

## Plastic Wire \& Cable Premium Aerial and Duct Cable

## PWC Type 150

Premiun grade cable designed for aerial or duct installation. Manufactured in Nos. 19, 22 and 24 gauge sizes. The conductors are insulated with polyethylene. Pairs are semi-color coded and twisted with varying lays. Cable assombly hound with non-hygroscopic tape and shielded with .0n2-in. copper tape.
A long-aging, durable dark gray polyvinyl chloride jacket protects cable from moisture and weather.

## Plastic Wire \& Cable Rural Distribution Wire <br> REA Listed

## PWC Type 177 Wire

A self-supporting rural distrihution wire designed for medium length spans. Offers an economical construction for rural extension runs. The pairs are fully color coded and assembled around an 1800 pound breaking strength polyethylene insulated steel messenger.
Conductors are insulated with polyethylene and individually jacketed with polyvinyl chloride. Stringing sag data for Rural Distrihution Wire will be furnished upon refuest.

## Plastic Wire \& Cable Exchange Cables

PWC Type 190 Cable
Designed for aerial and duct installation.
Electromagnetic and electrostatic shielding is achieved with a helically applied aluminum tape. A black polyethylene sheath provides excellent mechanical protection and weathering resistance. REA listed and conforms to REA spec. PE14.

## Plastic Wire \& Cable Long Span Rural Distribution Wire

PWC Type 180
A self-supporting rural distribution wire desigued for long span installations. Particularly adaptahle for joint use on long span power lines. Each conductor insulated with polyethylene and jacketed with highly moisture and weather resistant polyvinyl chloride compound.
The pairs are fully color coded and assembled around a polyethylene insulated $.142-\mathrm{in}$. high strength steel messenger. (Breaking strength 3000 llis.) Stringing sag data available upon request.

## Plastic Wire \& Cable Urban Distribution Wire

## PWC Type 183

A 16 pair No. 24 AWG self-supporting wire for urban distribution use. Offers an economical construction where a gronp of subscribers are to be served a short distance from the main pole line.

Conductors insulated with a $.025-\mathrm{in}$. wall of polyvinyl chloride that is weather and abrasion resistant. "The pairs are fully color coded and assembled around a 109 E polyethylene insulated steel messenger.

Stringing sag data is available upon request.

# Plastic Wire \& Cable Direct Burial Telephone Cables 

## PWC Type 166 Cable

Hard service double sheathed cable designed for direct earth burial. Manufactured in No. 2t, No. 22 and No. 19 AWG sizes. Conductors are insulated with polyethylene. They are twisted into pairs with variable lays to prevent crosstalk. A polyethylene inner jacket provides additional mechanical protection necessary for direct burial as well as maximum dielectric protection from lightning surges.

A low resistance copper tape is applied over the inner jacket providing protection from induced power line noise. The outer jacket is polyvinyl-chloride; mechanically tough and resistant to moisture and earth acids.

## Plastic Wire \& Cable Buried Telephone Wire

Types 163 and 164 designed for direct earth burial in rural areas hy means of a cable plow. A single circuit wire that can be installed with total cost comparable to open line wire installation.

Type 163 Buried Telephone Wire-Unarmored
PWC Type 163 is a parallel line wire designed for direct burial. The conductors are No. 17 AWG special relief annealed, hard drawn copper individually insulated with polyethylene, one blue and one white. The conductors are jacketed in parallel with a . $030-\mathrm{in}$. wall of tough, moisture resistant poly vinyl chloride, bright red in color.

Type 164 Buried Telephone Wire—Armored
Constructed with No. 17 AWG special relief-annealed hard drawn copper conductors. The conductors are insulated in parallel with black polyethylene. A ridged tracer provides tip and ring identification. A .005-in. bronze armor tape is applied longitudinally for both shielding protection and against rodent or insect damage. A special jacket of chrome yellow polyvinyl chloride gives a protective covering against water, oil, and earth alkalis.

## Plastic Wire \& Cable Self-Supporting Telephone Cables

PWC Types 130 and 132 with Polyethylene Jacket PWC Types 160 and 162 with PolyvinyI Chloride Jacket

Self-Supporting 'Telephone Cables designed for use in aerial spans without messenger support. Types 130 and 160 feature \#19 gauge copperweld conductors for high tensile strength. Types 132 and 162 are made with \#19 hard drawn copper conductors. In all types the conductors are partially color coded with a $.015-\mathrm{in}$. wall of polyethylene.

Types 130 and 132 are jacketed with black hard service polyethylene compound. Types 160 and 162 feature a durable hard service polyvinyl chloride jacket.

Full sag and tension data will be furnished upon request.

No. 43

No. 42
Although spiral shielding is preferred by many, because of the ease in preparing the shield tails for ground connections, there are many applications where a lraided shield is desired.

## Gavitt Harness and Cable Assemblies

Harness and cable assemblies are available from the smallest simple single lead to the most complicated assembly with a multiplicity of varions wires, branch-outs, terminals and connectors.

Can be furnished from any standard wire constructions, or wire can be made to meet your own specifications.

Graybar can incorporate all standard terminals, plugs, sockets, connectors and wiring terminals in a harness or assembly; also can supply assemblies twisted in multiple conductor form or laid out in harness form.. . laced, taped, shielded, braided or molded.

Contact GHAYBAR for prices and additional information.

## Gavitt Ribbonized Wire

## Multi-Conductor Flat Cable

Riblonized wire required minimum space; lVC insulated only with excellent adhering qualities and rip features.

Available in gage size No. 1.4 thru No. 28. Concentric insulation regardless of number of conductors. Any number of conductors up to 35 depending on gage, insulation and practical packaging.

Can combine any of the following 15 solid colors in any sequence: Brown, tan, red, pink, orange, yellow, dark green, light green, dark blue, light blue, purple, violet, grey, white and black.

Contact GRAYBAR for price and other information.

## Times Extruded Teflon ${ }^{\circledR}$ Hook－Up Wires

Manufactured to the MIL－W－1687813 specifications with a rating of $-90^{\circ}$ to $+250^{\circ} \mathrm{C}$ ．，are available in 14 solid colors， and／or spiral striping．Conductor of silver plated copper． Solid Colors：Black，Yellow，Brown，Green，White，Tan， Pink，Red，Orange，Blue，Light Blue，Gray（Slate），Violet （Purple），Light Green．

＊Electrical Charactrristies：
1．Characteristic Impedance（Nominal）Ohms．
2．Capacitance（Nominal）mmfd．
3．Velocity of Propagation（Nominal）percent．
4．Attenuation at $400 \mathrm{MC} \mathrm{db} / 100-\mathrm{ft}$ ．（Vominal）．
5．Dielectric Strength in all of the above cables is $\mathbf{1 0 0 0}$ ．

## Alcoa Self-Supporting Secondary and Service Drop Cables

Composed of one or more insulated conductors and one bare neutral conductor serving as the supporting member ("Multi-
plex" cables), is recommended for use on circuits not exceeding 300 volts to ground.

The standard lengths are subject to a manufacturing tolerance of $\pm 10$ per cent. An amount not excerding 10 per cent of the total length of any one order may be shipped in random lengths with mo piece less than 25 per cent nor longer than 110 per econt of the standard length. Reels will be marked to show length of each piece, and, in the case of reels containing random lengths. the number of pieces, footage of each piece and position on reel.

Shipments to each destination will be made to the nearest package specified on each item ordered.
Weights of covered conductors are approximate and subjeet to normal manufacturing tolerance.

**Nonreturnable reels.
*One phase wire identified by ribhing.
† ( uadruplex sizes No. 6 , No. 1 and No. 2 can be supplied in 500 -foot coils.
$\ddagger$ IJ-inch drum.
The standard lengths are sulject to a manufacturing tolerance of $\pm 10$ per cent. An amount not exceeding 10 per cent of the total length of any one order may be shipped in random lengths with no piece less than 25 per cent nor longer than 110 per cent of the standard length. Reels will be marhed to show length of each piece, and, in the case of reels eontaining random lengths, the number of pieces, footage of each piece and position on reel.

Shipments to cach destination will be made to the nearest pachage specified on cach item ordered.
Weights of eovered conductors are approximate and subject to normal manufachuring tolerances.

## Alcoa Heavy Series Aluminum Alloy Bolts, Nuts and Washers For Bus Bar Stock Items

(

## Alcoa Aluminum Conductors

## Steel-Reinforced (ACSR) Bare

*Based on standard weight zinc-coated steel core wire.
$\dagger$ Have a high ratio of mechanical strength to current-carrying capacity. I sed largely for werhead ground wires and for special construction such as river erossing spans.

## Notes:

1. An amount not execeding 10 por ent of the total weight of any one order may be shipped in random kengths, but no piece shorter than 50 per cent of the standard length will be shipped. No random length will be wound on the same reel with a standard length, and all reels will the marked showing number of pieces, length of piece.
2. The actual weight of cable will be held within a tolerance of phas or minus two per cent ( $2 \%$ ) of the weights listed. Invoicing will be based on actual wripht.

of each piece, and, in the case of reels containing random lensths, the number of pieces, fontuge of each pigere and pength. fleels will he inarked to show length

Weiphts of covered conductors are approximate and subject to normal mumufucturing taleordered.
For further information enotact firay har.

## Alcoa Parallel Groove Clamps

Cap Screw Type- 480 Series

Universal Parallel Giroove Clamps will accommodate a range of conductor sizes in each groove. They are recommended for this convenience and for light-duty service. Not recommended lor main cirenit comerelions.

Heavy Duty Parallol Groow Clamps are recommended for main line connertons and horavy duty service. These clamps offer maximum clectrical efficieney. The growe contour and the aluminum hardware combine to make them the best parallel groove clamps for use where the current load is large or operating conditions are severe.

| Clamp <br> Catalog <br> No. | Nominal <br> W!. <br> Lbs. |

## Heavy Duty Parallel Groove Clamps

## 480 and 580 Series

The following clamps are cataloged by a decimal system which denotes the groove sizes:

$$
\text { Example: } \quad \text { A. } 181 . \stackrel{(B)}{(2} \text { Clamp }
$$

(A) has a Number 1 groove shown in the units figure (Range 0.292-0.502),

|  | Diam. Range |  | ACSR |  | Stranded Conductor |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number | Min. | Max. | Min. | Max. | Min. |  | Max. |
| 1 | 0.292 | 0. 502 | $26 / 1$ | $3 / 06 / 1$ | 2 | 3/0 |  |
| 2 | 0.464 | 0. 743 | $3 / 06 / 1$ | $397.5 \mathrm{M1}$ : $1118 / 1$ | 3/0 | 400 | MCM |
| 3 | 0.7 .13 | 1.060 | $397.5 \mathrm{MCM} \mathrm{18/1}$ |  | 4.50 NCM | 800 | MCM |

*Extensive field experience and exposure tests show that if a suitable grease type joint compound is liberally applied over and around the contact area, coppr-to-aluminmm electric connections can he made satisfactorily with aluminm clamps without copper bushings.

Copper boshings are available for all universal grooves--subject to infuiry.
In choosing a parallel groove clamp for connecting two diflerent sizes of conductor, determine the groove and clamp required for the size of conductor.

## Alcoa Parallel Groove Clamps

## Globetray Interchangeable Trays

For Cable Wiring and Tubing Support

## Interchangeability

These illustrations show the advantages of using Globetray (ladder type tray) in conjunction with Cable-Strut (basket type).
The cross channel design of Globetray provides natural drop out openings wherever needed. Globetray and CableStrut can be juined with the Universal Splice Plate at any puint. They match perfectly, provide lower cost installation and are completely compatible. All straight seetions and filtings are completely interchangeable.

These two trays were engineered for uniform and easy installation. There is eomplete interchangeability at any given location between the two types.

The Globetray (ladder type) is intended for use where festooning of cables is not a problem, while the Cable-Strut (basket type) is used for the support of communication wire, instrument tubing and control cables in automation applications. Both types available in steel or aluninum, will complete accessories for speedier installation and with oflset locking channels to eliminate sharp edges and to add strength and rigidity.

## Fittings:

All Globetray and Cable-strut fittings are enginered to have the same load capacity as the straight sertions.

All parts are produced and inspected to assure prefied alignment for faster installation.

## Accessories:

This system carries a complete line of accessories in looll types to speed installation and heep tield manpower down t" a minimum.

## Load Charts:

Load charts for both types have been prepared by Piltsburgh Testing Laboratory and are to be found at the end of this section.

For complete information and prices contact your nearest (imay bar office.

## Globetray and Cable-Strut Fittings

Engineered to carry the same loads as the straight sections. All radii start at the ends of the fitting, therefore in critieal locations a small amount of space is required to change elevations and make quick turns. This is accomplished by
furnishing straight, half curve and full curve splice plates.
Divider strips are available for all straight sections and fittings.

## Splice Plates

## Standard Type

Universal splice plates are made of No. 10 gauge steel, hot dip galvanized, or of $1 / 8-\mathrm{in}$. alloy $50.52-\mathrm{Il} 34$ aluminum and come complete with four square shank hutton head bolts, washers and hex nuts (all hot dip galvanized). This splice plate can be installed as quickly as any hammer type connector or gimmick type connector-in many cases much faster. It is the strongest type connector made.

Note: Splice plates are ordered as a separate item.

## Hinge Type Connector

Available where this type connector is desired: but no hinge type connector can carry the loads specified on load chart.
For complete Information and Prices contact your nearest Cravbar office.

## Globetray and Cable-Strut Accessories

## Interchangeable on Both Trays

Gilobetray and Cable-strut acoessories are designod to spered installation and eliminate holes in eross chamels to produce a smooth cable surface. Their use will rliminate

## Cable Clamps

Wade from ahminum alloy 5052-50 (. $\mathbf{5}$ (1)-in.) complete will cadmimmplates No. $10-21$ serows, washers and muts. supplied straight and casily bent in the lield to cable curve.

## Conduit Clamp Brackets

Holds conduit or cable when it is neessary for them to run over side of tray.

## Divider Strip For Horizontal Elbow

Supplied in 6-ft. lengths and can easily be bent to any radins. It follows curve of the cable.

## Wall Brackets

To supmer (ilohetray and Cablo-Strut from walls, chlomms and available makes of chamel framing.

## Hold Down Clamps

Locks securely to side chamels and can tre bolted tir most available makes of channel framing.

## Globetray Cable Pulleys

Twosizes-for any bend larger than $1.5^{\circ}$ the Vo. Ift-24 permits curvature of the cable to a minimum radins of 21 -in., while the No. 1414-32 premits curves to a minimum of $33-\mathrm{in}$. radius.

## Globetray Cable Rollers

For pulling cable into straight sections of tray. Reduces drag.

For eomplete information and prices contaet your nearest Graybar oflice.
field labor almost entirely. The accessories on this page are available in either st yle tray.

## Side Channel Clamps

For fastening down tray when it is to be mounted flush with wall.

## Drill Jigs

When sections are required to be cut in the fiold, this jog oliminates the mecessity of laying oul holes. Locks securely in prition, guides drill merfertly.

## Tray To Box Connector

Use $90^{\circ}$ spliee plate. Frame type comectors also available.

## Divider Strip Cable Protector

Used where cables cross over divider strip. Made of rubber, Slips over top edge of divider strip.

## Straight Section Divider Strip

Quick, easy to install. Divider Strip Clamp include's bolts, nuts and washers cadmium plated.

## Cover Clamps

Semedy fastens conar on horizontal or vertical rims. Complete wilh (2) bolts, muts and washers.

## Cable-Strut Hanger Channels

Will carry the full loads as shown on load charts. Punched with 9 16-in. diam. holes for $1 / 2-\mathrm{in}$. diam. rods. Hot dip galvanized or aluminum.

## Cable-Strut Single Hangers

Will support tray so cable can le installed from side. For 3 -in, and t-in. Cable-Strut only. Galvanized.

## Cable-Strut

Double Hangers
Will support two travs. Cables can be installed from the side. For 3 -in. and 4 -in. Cable-Strut only.

## Safe Uniform Loads for Globetray and Cable-Strut

## (Pounds Per Lineal Foot)-Deflection (Inches)

Tested as a free beam. When tray is used as a continuous beam, deflection will be (two fifths) of that shown.

These load charts hava been prepared by the Pittshurgh Tesing laboratory and are based on tests performed by them in their laboratory

Tested as a free beam. When cable-strut is used as a continuous heam, deflection will be $2 / 5$ (two-fifths) of that shown.

Extended-25 Ft. Long
Eliminate trailing wires; always retract to their original length. Reduce cord replacements; Koiled Kords are not subjeet to the twisting or tangling of straight cords.

Neoprone jasketed; permanently coiled into a spring-like shape. A vailable with one to seven conductors. Supplicd in mandred lengelhs, cut and used like ordinary straight cord, or furnished aceroding to specifications in combinations of coiled and straight lengths, with or without terminals.

## Standard Types

Stook items consist of a full line of 18 -in. mandrel lengths and a limited number of prepared coil sets. Where quantity is sufficient, cords will be furnished for shielded applications. shielding is provided by a special tinsel. Facilities for specialty items are available.

In forwarding inquiries on cord sets, enclose either specifications indicating design and construction, or a drawing.

| CF22A | †'luid Paint | $3 / 8$ | $11 / 16$ | 32 | $\mathbf{7 6 . 0 0}$ |

$\dagger$ Hose has proper O.D. for DeVilhiss fittings. Paint-fluid hose is not recommended for air service as this use is usually severe on the specially compounded rubber necessary for paints and oil solvents.
*For ratchet device add $\$ 3.00$ to ahove prices. Ratchet designed for use where constant tension is unnecessary. For ceiling installations only.

## Appleton Portable Reelites and Accessories

## Automatic Reeling Devices for Extension Cords

## Continuous Swivel Reelites

P'urnish light-or ilesible power source for electrical devices when and where yon want it, while keeping cord neatly reeled up and out of the way. Continuous swiveling action reduces accident hazards and increases cord life by preventing kinks or other damage. Positive stop action holds cord at any desired length, yet a flick of the wrist lets the reel take up cord when the job is done.

Ilanger plates fit neatly over any 4 -in. octagonal outlet box; installation is quick and easy.

## 75 Series

Double silyer-alloy contact brushes permit free rotation of entire reel without power interruption or tangling of cord.
'lotally enclosed steel construction keeps dust from moving parts. Fournished with durable, attractive baked hammertone finish. Reel Diameter, 7 -in.

No. 752

No. 7S2: Rated 10 amps., 250 volts. Maximum accessory weight. 20 \%\%.

No. 7S2G: Rated 7 amps., $\mathbf{2 . 5 0}$ volts. Maximum accessory weight. 20 \%\%.

No. 7SV2: Fiurnished complete with handlamp, as shown, with heavy plastic handle, heavy-duty wire guard and vapur-proof globe. Ideal for wet, steamy areas. Takes lamps up to $\overline{\text { ö }}$ watts. Type sol Cord, size 18 A.W.fi., 3-conductor. has one conductor grounded to reel frame for added salety. Rated 7 amps., 250 volts. Maximum accessory weight. $30 \mathrm{c} \%$.

| Cord | Each |

## Appleton Type YS Reelites <br> Portable Power for Electric Hoists

Designed principally for automatic
 cord takeup on electric hoists operating on straight or curved tracks. Cord may be fed in any direction. Swivel range of $33.5^{\circ}$ provides full track coverage with half cord length.

Enclosed current collectors, elimination of hazards from tangled cords and provisions for adequate grounding prevent electrical mishaps.

Grounding shunt furnished as standart.

Long-life power spring and selflubricating bearings keep maintenance at a minimom. Supplied with swivel base and Type $S$ rubber-covered cord. Reel diameter, $121 / 2$ in.; overall height, $16 \frac{1}{4}-\mathrm{in}$. Finished in two tone baked enamel.

## Retract-0-Reel Handwheel

Provides safe, quick spring tension adjustment for proper balance, particularly after reel servicing. Net weight, 8 oz .
No. 11-1321
Each $\$ 1.65$

## Benjamin Grounding Reels For Static Discharge

Available for use in connection with the generation of static charges on fuel servicing equipment during the transfer of combustille fuels.

The use of a Grounding Reel is an added precaution in
eliminating the possibility of fire or explosion because of discharge of sparks in the vicinity of inflammable fuels or vapors. The Reel keeps the grounding cable off the ground where there is always the possibility of damaging or entangling it and making it useless.

## Hykon Wiring Reels

Keep wire free from kinks and smarls; mantain conrect tension. Save time, effort and wire on any wiring joh. Wire may be recled oll top or botton from any angle. Adjustable
 to diflerent sizes of wire molls. liurnished with holes, in edge of face plate, into which free wire end may be anchored. 'lurns casily, hut will not coast. A vailable in gang units, or individually.

Finished in durable back enamel.
Showing simple method
of loading Hykon reels.

## Reel Specification

Hykon 15-inch reels take wire up to Vo. 8 A. W.G.; 18-inch takes larger diameter coils, such as loom wire, heavy wire and light cable.

|  | 15-Inch Reel | 18-Inch Reel |
| :---: | :---: | :---: |
| Disc I ${ }^{\text {a }}$ (ameter (In.) | 15 | 183/4 |
| Coil live Adjustment (In.) | . $11 / 2$ to $121 / 2$ | 41/2 to 133/4 |
| * Coil Width (lı.) | (pto $51 / 2$ | Up to 6 |

* Coil width can be increased if desired.

In addition to standard sizes, larger sizes made up to meet special reguirements.

## Individual Reels

Fastens on any framework, on service trucks or in the storeroom.

## Hykon Wire Meter

Accurately measures wire, loom, etc. Will handle flexible material up to 1 incls in dianter and registers up to 1000 feet.

Dials are instantly reset to zero and are easy to read. By using this wire meter. errors and guesswork is eliminated.

Meter is well built for long lifio. Sold soparatols or with store Romu Reel.
Floor stand also available.

Description

## Hykon Wire Measuring Equipment

Init. consisting of storeromen reef. wire moter and take-up reel. facilitates measuringe and recoiling of wire, in the storeromil or in the field. Portable, easily handed by one man.

Wire Meter: For wire, foom, etc., up to 1 -inch diametor. Rugisters up to booo feet. Easy to read diak. Instantly reset to \%ero. Riminates errors and gueswork.
Storeroom Reel: Takes any size wire or cahle without adjustment. Will mot tip, hut easily moveet. Wire pulls oft without kinks or tangles. Welded construction. A vailable with or without wire meters.

Take-up Reel: Jawinds wire from stormomin rel, through meter, making a neat, compact coil. Guter dise slides oll for casy removal of measured coil.

## Hykon "Tums" Wire Measuring Units

Consists of meter and take-up reed momented on a light weight but sturdy stod framework. Takes wire, rope and other flevible material up to 1 -in. diameter. Accurate measurement guaranteed. Registers up to 1,000 feet. Instantly reset to \%ro.
Take-up reel has tapered cone for easy remosal. Row dimensions, $183 / 4$-in. diameter, 7 -in. wide. Capacity $1 . .300$ feet of Vo. 11 wire. Other sizes aceordingly.

[^15]
## Brady Perma-Code Wire Markers

For marking wires, harnesses, circuits, coils, panels, assemblies, terminals. Self-stickirg. Apply to any wire. Permanent "around-the-wire" identification. Seleet from over 3000 different stock markers. Conform to NEMA and NMTBA specifications for a standardized wire identification system. Markers are Silicone Plastic Coated for maximum resistance to dirt, grease, moisture and abrasion. Markers come monted on handy, catch-free Blue Streak (®) Dispenser Cards. Exclusive Brady Zip-Strip permits instant removal of one or all markers from dispenser card for quick permanent identification.

Brady Wire Marhers come in a size for every wire. a marker for every purpose. Two different sizes in stoch to fit your needs:

Order $11 / 2$-in. long markers for wire $1 / 4 \mathrm{in}$. o.d. and over. Order $\frac{3}{3}-\mathrm{in}$. long markers for wires under $1 / 4 \mathrm{in}$. o.d. (Specify $3 / 4$-in. when ordering). $3 / 4$-in. markers give you twice as many markers at no extra cost.

11/2-in. long markers on this consecutive Number Card are for wires over $1 / 4$ In. O.D.

Use $3 / 4$ In. Iong markets for wires under $1 / 4$ In. O.D. $3 / 4$ In. Iong markers furnished at no extra charge.

## All-Temperature Vinyl-Cloth Wire Markers

These general purpose markers have black legends on white background. Withstand $-300^{\circ} \mathrm{F} .10+300^{\circ} \mathrm{F}$. Pulling thru conduit won't hoosen markers.

## All-Temperature Color-Code Wire Markers

Gives you two-way identification-both color and number. Nunibers on all standard NEMA color backgrounds in stock.

## Flame-Proof Aluminum Foil Wire Markers

Self-sticking 3 mil super-thin markers hug wires tightly in oil surronndings, elevated temperatures; won't discolor.

## Solid Number Cards

Ask your GRA)BAR salestuan for samples and complete list of 3,000 different 11 ire Varkers in Brady Bulletin \#1:30.

## Brady All-Purpose Numbers and Letters

5A 5 A
For fast economical marking of arcas, lays, columis, tote bexes, machinery, shelves, stock bins, parts. plant and oflice equipment. Positive, at-a-glance identification. Self-Stiching, no special shill or tools required. Come mounted on handy, portable dispenser cards. Just peel from card, and press in place. Permanent. Cost as little as $1 / 4$ cent per Marker.

Five stoch sizes from 1/2 to 5-in. Stock Markers come printed in bold black letters on bright lellow background: specials made to your order.

Contact (ill A) BAR for prieses, samples and Bulletin \#16.5.

## Brady Self-Sticking Miniature Markers

Designed and "jolotested" for identifying small diameter wire under ${ }^{5}$ \% in. O.D., miniature electronic components and sub-miniature eircuits.

At-a-glance identification from any angle. loour bold legends per marker. White bachground with black letters and numerals.
1.50 individual markers ( $3 / 16$ in. $x \frac{1}{2}$ in.) mounted on Blue Streak (B) Dispenser Card. Over 100 numbers and letters in stoch.

Blank Miniature "Write-On" labels for on-the-spot marhing of small parts and assemblies. Use pencil or ball point. Stock labels come monnted on Dispenser Cards in three sizes: $3 / 16 \times 1 / 2 \mathrm{in}$.; $1 / 4 \times 1 / 2 \mathrm{in}$.; $1 / 2 \times 1 / 2 \mathrm{in}$.

Special Miniature Markers made to your order-any color, any size-any printing.

Contaet (ilhA)BAR for prices, samples and Bulletin 13:30-2.

## Brady Pre-Cut Quik-Masks

Pre-cut, self-stiching Quik-Mashs. Protect nameplates. dials, plated or polished surfaces, holes, threads, etc. from paint spray, plating, machining, tumbling or from damage during shipment.
Reduce your mashing costs, increase production and save inspection, re-worh and clean up time. Quik-Mashs are ready-to-use precision precout pieces of self-sitiching mashing tape. Come mounted on handy Bhue Streah (A) Dispenser Cards or Zip-Off liners. Stock cireles $1 / 4 \mathrm{in}$. O.D. to 5 in. ().D. ready for immediate shipment. Special Brady Pre-Cut Mashs made in any si\%e, any shape to your specifications. select from over 300 dillerent tapes.

Ask your (ilRAYBAR salesman for prices, samples and Bulletiii \#160.

## Brady Card Holders

Vew, time-saving Card Hodder reduces labor costs. speeds produelions, saves motions. Iise with card-mesunted Brady Wire Markers, Special Quik-Labels, Pre-Cut Quih-Masks and Brady Printed Cirenit Tapes and shapes.
Card loolder eliminates all non-productive motions of picking up and putting down card cach time a Marker or lask is used. Worher uses both hands for speedy production.

Vo parts to wear out or replace. Ask your GRAYBAR satesman for demonstration, prices and Brady Bulletin \#1.i.

## Brady "Quik-Label" © Special Markers <br> Made to Order

I se Brady Solf-Sitiching Suerial Markers to instruct, int spect, identify and improve vour product. Eeonomical to buy and inexpensive to apply. Stick to any clan, dry surlace withont mosistening. Silicome Plastic overcoating resists dust, dirt, grease and abrasion.

New write-en surface permits coding, dating, calibrating during assembly or installation.
You can get Special Brady Quik-Labels with any wording, trade mark, number or symbol . . . in any eolor, size, shape or material you sperify.
Ask your CRAYBAR salesman for samples, case history file, prieres and Bulletin \$132.

## Brady Quik-Plates

Sdll-Bonding Nameplates-.003-in. aluminum. Won't peep. chip of erack. Lew enst. Any size, any shape, "all-over anodized."* Stick to flat, curved or crinkled surfaces. Fast to apply. No holes to drill, no fasteners required.

Four diflerent solf-bonding types meet Mill sperifications.
Trademarks, instructions, gauges, dials and diagrams made to your specifications. Ask your GIBAYBAIS salesman for prices, samples and Bulletin \#17.
*patent pending.

## Brady Printed Circuit Tapes and Shapes Self-Sticking

Save engimering and dralting time. Nake aecurate and detailed inhless layouts with Brady precision-slit black, photographic, sell-sticking tape.
Stoch Terminal Cirdes, Commector Strips, Fillets, etc. come mounted on Blue Sitreak ( $\left.{ }^{( }\right)$Dispenser Cards.

Stoek 13rady Connector Strips are furnished on Dispenser Cards in 9 -in. lengths or in 18 yard rolls-all precision slit to exact dimensions for accurate reproduction.

Contact GIBA) BAR for prices, samples and Bulletin \#16.3.

## Brady Self-Sticking Pipe Markers

The standardized method of identifying pipe eontents and direction of flow. Low cost Perma-Code bipe Markers cont form to American Standards Assn. Standard A-13, "Identification of Piping Systerns". Pipe contents are clearly marhed in large, loold letiers on bright fade-proof backgrounds. Quick, mositive identification for productive maintenance. Anvone who can read can identify pipe contents at-a-glanee.

I se this "jol)-tested" Pipe Identification system to make repairs fast, reduce costly mistahes and guesswork. Save valuable production time in emergencies.

All standard A.S.A. legends and Directional Arrows in stock. Special Pipe Markers made to order.

Contact GRAIBAR for Pipe Marker Planning Kit, prices, samples and Brady Bulletin 135.

Brady All-VinyI Aisle Markers

## Outlast Painted Lines 5 to 1

Brady Dotted Line marked aisles save time, labor. Simple to apply, aisles are marked without interrupting traffic or material flow. Bright, allvinyl Yellow.
Self-sticking all-vinyl Aisle Markers withstand severe truck, pedestrian traflic. Unailected by oil, grease, aicds, salts, maisture and many solvents. Stiok and stay stuck to any clean, dry surface.

Four stock diameters: $2,3,4$ and 5 inch. Matching Yellow Directional Arrows also in stock for 2 to 5 inch sizes.
Contact (BllA BAR for prices, free testing sammes and Brady Bulletin \#111.

## Brady Accident Prevention Signs Self-Sticking

## DANGEB NO SMOKING

Lower your accident rate by using low cost, longer lasting. casy-to-apply Self-Stiching Acrident Prevention Signs. Stocked in over 100 different signs made to A.S.A. Siandard \%. 3.5. 1 and National Salely Council Sperifications.

Self-sticking Signs stick to smooth or rough, curved or flat surfaces. No screws, tags, moistening or tools needed for application.
lou can apply signs in seconds right at the point of hazard. Mahe up your own combination signs for caution, darger and plant housekerping.
Contact GlRAYBAR for prices, samples and Bullet is \#1.5.

## Sticka Black Friction Tapes

High quality friction tape, nonravelling and suitable for all application where friction tape is indicated.

Strong, abrasion-resisting, and very adhesive.

F'ree from pinholes, will not dry out. Rolls packed in moisture-proof wrapping.

| Roll Sizo | Min. Ft. | Rolls Por | Per 100 |
| :---: | :---: | :---: | :---: |

## Okonite Rubber Tape

Compounded only from new, JpRiver line Para rubber. When wrapped on the joint, fuses into a homogeneous wall of tough insulation, impervious to moisture, that stays clastic and resilient.
Insures highest electrical strength and permanence.

Roll, $3 / 4-\mathrm{in}$. wide, packed $1 / 2 \mathrm{lb}$. in yellow cans.
Per L.b...........................
$\$ 1.70$

## Ruberoid Insulating Tape

Waterproof, both sides allhesive. For use both above and below ground. Iligh tensile strength; resist abrasion; acid and alkali promf. Will not dry, crack or harden. Way be stored without deterioration.

Furnished in $1 / 2-1 \mathrm{~b}$. rolls, $3 / 4-\mathrm{inch}$ wide. Other widths available.

Per Lh........................ . 50.85

## "Scotch" Brand Electrical Insulating Tapes <br> Listed by Underwriters' Laboratories, Inc.

## No. 33

 Plastic Electrical Tape-. 007 In. Thick

IIas a stretchy, rubber-like plastic backing enabling it to do the work of two ordinary tapes. Goes on in one operation.

Stretchability and resistance to oil and moisture provide a wide range of uses in electrical construction and repair. "Thinness is advantageous in eliminating "overstuffed" junction boxes. Ilas a dielectric strength of 9,500 wolts. Backed with the same synthetic resin Provides complete electrical and mechanical protection.

Bishop Bi-Seal Self-Bonding Electrical Tapes

For Sealing, Splicing, Insulating

A permanent moisture sealing polycthylene base tape. Ideal for comminnication and power distribution wire and cable splicing; moisture prooding bi-metal comections; insulating high frequency electronic circuits.
All rolls $30-\mathrm{ft}$. by . 020 thick. $1 / 2-\mathrm{in}$. rolls packed two per tox. All others individually boxed.
'Type 1. (Clear) - Type 2A, (Black) - Type 4. (Ivory).

## Bishop High Voltage Splicing Tapes

No. 30

Use this butyl rubber base tape for splicing high voltage cable operating at 2 kv . to 17 kv .

Exceptional resistance to corona and ozone plus outstanding aging properties insures a lasting splice that will equal or better the original cable insulation.
Recommended for operating temperatures of $90^{\circ} \mathrm{C}$ up to 5 kr , and $8.5^{\circ} \mathrm{Cup}$ to 17 kv .
Rolls are $30-\mathrm{ft}$. by 030 thick. One cellophane wrapped roll per container.

## Bishop Electrical Filler Tapes

## No. 125

Synthetic rubber hase. Ciond for cable splice huild-np. cable end sealing. etc. Can be molded by hand to fit odd shapes.
IRolls $1 / \frac{1}{2}$-in. wide by 5 -ft. long by $1 / 8$-in. thick. 2t individually hoxed rolls per case.

Per Roll
51.17

Votr: Special Case and Quantity prices available on request.

## Bishop Bi-Prene Electrical Jacketing Tapes

## Types C and H

A neoprene base jacketing tape ex-
 cellent for splicing neoprene sheathed calles. Fuses into a solid mass to form a permanent weatherprofof outer sheath. Protects against ozone, heat, moisture, and sunlight. Tape is tlame resistant.

All rolls 30-ft. Kong by . 030 thick.
$1 / 2$-in. widths packed two per box.
All others one per box.

*Type 11 is designed for use with valcanizing equipment. Note: For red or yellow add $10 \%$ to 'Type 11 prices above.

## Okolite High Voltage Tape

specially designed for splicing cables insulated with ozonte-resistant rubber compounds, particularly those operating at over 2000 volts between phases.
lligh electric strength, low power factor. Fuses into moisture-proof wall of insulation.
Tape, $3 / 4$-in. wide, containing 30 ft. packed $1 / 2 \mathrm{ib}$. in red cans.
Per Lh.
$\$ 1.80$

## Okoprene Weather-Resistant Tape

Made with neoprene, provides
 permanent, non-fibrous protection for splices, in neoprene-sheathed cable.

Particularly designed for protecting splices in neoprene-sheathed cables. Eliminates need for friction tape and paint while adding electrical values.
Tape, $3 / 4$-in. wide, containing 30 ft . packed $1 / 2 \mathrm{lb}$. in blue cans.
Per 1b.
\$1. 80

## Permacel Electrical Tapes

All lermacel electrical tapes are looth pressure sensitive and heat curing.

## Permacel 21 <br> Glass Cloth Electrical Tape

A glass cloth backed tape for applications requiring great mechanical strength and heat resistance such as taping coils in large motors and generators. Acceptable for NEAA Class $B$ insulation. 60 yd. rolls. Tensile strength 150 lls . per in.

## Permacel 201

## Cotton Cloth Electrical Tape

For armature winding, transformer coils and anchoring heavy leads. Permacel 201 possesses low stretch features, excellent varnish-penetration properties and good conformability to irregular surfaces. 60 yd . rolls. Tensile strength 50 llis. per in.

## Permacel Electrical Tapes

## Permacel 202

Sized Cotton Cloth Electrical Tape
Permacel 202 hat a special non-corrosive adhesive, high tensile strength and excellent wear resistance. Suitable for anchoring heavy leads, coil wrapping and taping motor leads. Easy unwind promits quick hand or machine dispensing. 60 yd. rolls. 'Tensile strength 50 lls . per in.

Recommended for fine wire applications, where maximum corrosion resistance and dialelectric strength is required. Made of electrical grade acetate cloth with a 0.88 film-laminated together and coated with a non-corrosive adhesive. 72 yd . rolls. Tensile strength 45 lbs , per in.

## White Acetate Cloth Electrical Tape

Excellent electrical properties and a high-hold, heat-curing adhesive make Permacel 24 especially suitable for tine wire applications. Its strength also permits its use in medium to heavy wire applications. Excellent coil wrapping tape. 60 yd. rolls. Tensile strength 45 lbs . per in.

## Permacel 242

## Colored Acetate Cloth Electrical Tape

Particularly suitable for outside wrups on transformers coils and solenoids. Same as P24 except for color. Available in black and brown. 72 yd. rolls. 'Tensile strength 45 lbs . per in.

Has high hold value for lasting adhesion. Its principal uses are for insulation applications requiring hish purity, good dielectric propertics and great tear strength. Constructed of a cellulose acetate film, laminated to a 4 mil rope paper and coated with a pressure sensitive heat-curing adhesive. 72 yd . rolls. Teusile strength 50 lhs . per in.

Permacel 25
Clear Acetate Film Electrical Tape
Extrmely thin with high dieleetric strength and insulation resistance, Permacel 25 is ideal for holding and insulating fine wires in transformers and coil construction where a very limited space is required. 72 yd. rolls. Tensile strength 2.5 ths . per in.

## Permacel 251 <br> Orange-Yellow Acetate Film Electrical Tape

The exceptionally high dielectric strength and thimess of Pormacel 2.5 make it idmal for fine wire holding and insulating where maximum resistance to clectrolytic corrosion at high homiditios is rempired. The distinctive orange-yellew color makes permacel 2.5 ! suitable for marking and anehoring the start and finish of wires in coil winding operations.

## Black Crepe Paper Electrical Tape

Permacel 22 is a purified kraft paper backed tape impremmated with an electrical grade saturatiner solution for uniformity and better electrieal properties and a non-rorrosive heat-curing adhesive. Features maximum streteh and "quick stick." 60 yd . rolls. Tensile strength 22 llos. per in.

## Permacel 23

## Black Flatback Paper Electrical Tape

A paper tape with purified $100 \%$ rope paper imprernated with an electrical qrade saluratiug solution. Recommended for all jobs that recpire an extra-strong tape. Ilas superior holdvalue, excellent heat stability and maximm "puich stick." 60 yd. rolls. Tensile strength 50 ll s . per in. of width.

## Permacel 27

Yellow Flatback Paper Electrical Tape
Constructed from an imprexnated 4 mil rope paper coated with a heat coring pressure sensitive adhesive. Excellent lor applications which require an easy handling tape with high tear and tensile strength. 60 yd. rolls. Tensile strength 50 ll s . per in.

## Permacel 28 <br> Yellow Crepe Paper Electrical Tape

Recommended for application to irregular shaped surfaces Excellent for protective jols reguiring a flexible electrical tapm and applications where the tape must withstand pro-hake cycles at elevated temperatures without softening and must have improved solvent resistance and higher adhesion after baking. 60 yd. rolls. Tensile strength 22 Ihs. per in.

## Permacel Electrical Tapes

## Permacel 252

Orange-Yellow Polyester "Mylar"* Film Electrical Tape
An orange-yellow film tape made with a 1 mil electrical grade " 1 ylar" film and a heat curing nom-eorrosive athesive. An ideal insulating tape in small construction where apace is an important factor. High heat stability is provided together with a thermoselting adhesive. Particularly suited for units operating at high temperatures. 72 yd. rolls. Tensile strength 20 lbs . per in. of width.

## Permacel 253

Clear Polyester "Mylar"* Film (1 mil) Electrical Tape
A "Mylar" film backed tape with a heat curing adhesive, free of corrosive arents. Execllent resistance to the attach of varnish and paint solvents. The high insulation resistance and complete lack of corrosibility make lermacel 253 ideal for holding and insulating applications where the finest graure wires are used. 72 yd. rolls. 'Tensile strength 20 lts. per in. of width.

* Du I'ont's reqistered trade-mark.

Through its combination of superlative physical. mechanieal, chemical, electrical and adhesive properties, Dermacel 25: finds broad applieation throushout the entire electrical and electronic manufacturing field. 72 yd . rolls. Tensile strength 50 lls . per in. of width.

## Permacel 255

Clear Polyester "Mylar" ${ }^{*}$ Film ( 2 mil) Electrical Tape
A polyester "Vylar" film backed tape with a heat curing adhesive, with outstanding physical and mechanical propertties. It has high tensile and tear strength, and affords maximum dielectric strength per unit thickness. 72 yd. rolls. Tensile strength 50 lis. per in.

* Du Pont's registered trade-mark.

Permacel 29 used as insulation in a wire splicing application.

## Permacel 29

 Plastic Electrical TapeA sperially formulated vinyl plastic backing, with a pressuresensitive adhesive, free from corrosive agents. Carefully balanced adhesion and easy stretch. Flame resistant for greater safets as an electrical insulating material. 20 and 60 ft . rolls. 'lensile strength $20 / \mathrm{hs}$. per in. of width.

## Permacel 291

## Plastic Electroplating Tape-Yellow

A clear vinyl plastic backed tape specially compounded for clectrical properties. Elongation and conformatility with ease of handling are assured by carrefully controlled formulation. Tloisture proof and resists acid, oil, fasoline and salt water. 30 yd. rolls. Tensile strength 22 Ibs. per in.

## Permacel 30

Heavy Duty (Electrical Grade) Plastic Tape (Black, Grey)
A vinyl film tape with a vinyl film backing and a high-hold non-corrosive adhesive. Extremely high dielectric strength and maximum insulation resistance. Other features inclade exceptional strength and elongation, high adhesive firmness. 36 yd . rolls. Tensile strength 30 lth . per in. of width.

## Permacel 29 A Display

A colorful display box containing 12 rolls $1 / 2$ in. by 150 in . black plastic electrical tape. Each roll is cellophane wrapped to insure clean, fresh stock. A handy size for minor electrical repairs and numerous other applications.
Per Roill

## Permacel 29 C Display

Contains 12 rolls of $3 / 4 \mathrm{in}$. by 20 ft . plastic electrical tape in a sturdy, eye-ratching display box. cellophane protected from dust and handling. It is a job size roll ideal for antenna wining, repaing frayed cords, olectrial splicing, etc.
Per Roll.
$\$ 0.55$

## Permacel Plastic Tapes

## Permacel 29 D Display

Each display contains 12 rolls $3 / 4 \mathrm{in}$. by 66 ft . plastic clectrical tape. Each roll is packed in a metal can for maximum protection. A free plastic cutter bar is included with each roll. Permacel 29 D is the ideal shop and service kit size tape roll, for insulating splices, harness wrapping, protecting tool handles, splicing in junction hoxes, etc.
Per Roll.
$\$ 1.50$
Permacel 306

## Heavy Duty (Pipewrap) Plastic Tape

A vinyll film non-electrical tape made specifically for use where high chemical and abrasion resistance, strength and conformatility are needed. 100 ft . rolls. Tensile strength 30 lbs. per in. of width.
Per 100 Sq. Ft. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 23.33$
Permacel 307

## Extra Heavy Duty (Pipewrap) Plastic Tape

A vinyl film tape with a superior aging high-hold adhesive. Maximum abrasion resistance and good conformance is obtained with this flexible tape. Has a nonconductive fungi, bacteria resistant backing and adhesive. 100 ft . rolls. Tensile strength 40 lhs . per in. of width.
$\operatorname{Per} 100 \mathrm{Sq} . \mathrm{Ft}$.
. $\$ 37.33$

## Permacel Acetate Fibre and Film Tapes Permacel 97 <br> Tru-Color Acetate Fibre Tape

A moisture-resistant colored tape enpecially designed for use in packaging. Will provide a moisture-resistant and colorful closure. Printable to serve as a message-carrying closure. A vailable in white, yellow, light blue, crean, light gray, silver, gold, red, orange, green, btue black, orange-yellow and brown. 72 yd. rolls. Tensile strength 3.5 lhs . per in. of width.

## Permacel 98

## Moisture-Tight Colored Acetate Fibre Tape

An opaque moisture-tight acetate fibre tape whose colors are derived from pigments in the laminating adhesive. Backing is cellulose acetate film combined with a strong but thin rope-fibre paper. Has strong adhesive qualities. 72 yd . rolls. Tensile strength 34 lth . per in. of width.

| 1/2 | 72 | 1.65 |  |  |  |

## Permacel 90 <br> Clear Acetate Film Tape

A transparent acetate film backed tape with excellent aging properties. It is more water resistant than cetlophane. llas excellent ultra-violet transmission properties, both backing and adhesive being resistant to ultra-violet effect on aging qualities. 72 yd. rolls. Tensile strength 2.5 Ils. per in. of width.

## Permacel 99

## Moisture-Tight Transparent Acetate Fibre Tape

A cellulose acetate film and thin rope-fibre paper backed tape which is semi-transparent, and highly moisture-resistant. Laminated backing gives high tensile strength and tearresistance. 72 yd. rolls. Tensile st rength 38 lbs . per in. of widt h.

## Permacel 991

## Low M. V. T. Transparent Acetate Fibre Tape

A thin semi-transparent highly moisture-resistant tape especially designed for packing and packaging under Government specifications. 72 yd. rolls. Tensile strength 38 lbs per in. of width.

## Permacel Cotton Cloth Tapes

## Permacel 66 Extra Strength Tape

An ideal general-purpose cloth tape, with high flexibility. great tensile strength and connparative thinness. 60 yd . rolls. Tensile strength 50 lbs . per in. of width.

## Permacel 663 Heat-Resistant Extra Strength Tape

A cotton cloth lacked tape suitable for general industrial applications requiring conformability and strength, combined with resistance to moderately high temperatures. llas goond stain resistance. 60 yd. rolls. Tensile strength 50 lhs . per in. of width.

## Permacel 68 <br> Extra Strength Colored Waterproof Tape

A cotton cloth tape waterproofed with a plastic coating which permits the use of an adhesive with maximum "quickstick" for ease of application and "high hold" value for lasting adhesion. 60 yd . rolls. Tensile strength 60 lbs . per in. of width

## Permacel 681

Extra Strength White Waterproof Tape
A white cloth tape waterproofed with a plastic coating. Ideal for those applications requiring printing of tape. Use of plastic coated backing permits use of tackier adhesive and results in high "quick stich," better conformance to irregular shapes. 60 yd. rolls. Tensile strength 60 lls . per in. of width.

| Permacel 68 and 681 |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

## Permacel 69

## Low M. V. T. Colored Waterproof Tape

A cotton cloth tape treated with a waterproof plastic coating, with a very low moisture vapor transmission rate. Backing almost completely impervious to moisture. with a special adhesive for extra "high hold" value. 60 yd. rolls. Tensile strength 60 lbs . per in. of width.
$\left.\begin{array}{ccc|ccr}\begin{array}{c}\text { Width } \\ \text { Inches }\end{array} & \begin{array}{c}\text { Rolls } \\ \text { Per Case }\end{array} & \begin{array}{c}\text { Per } \\ \text { Roll }\end{array} & \text { Width } \\ 1 / 4 & 96 & \$ 1.30 & \text { Inches }\end{array}\right)$

## Permacel 691

## Production Grade Colored Waterproof Tape

A waterproof cloth tape developed for packaging, sealing and waterproofing operations. Plastic-coated backing minimizes lint pick-up. Meets Government specifications. 60 yd . rolls. Tensile strength 5.5 lts . per in.

## Permacel "Texcel'" Cellophane Tapes Texcel 46 <br> Hi-Tack Cellophane Tape

A cellophane tape designed for industrial uses involving rough surfaces where an extra adhesive cushion is required. Also ideally suited for sealing and holding applications. 2592 in. rolls. Tensile strength 27 Ilss. per in. of width.
$\begin{array}{lllllllll}\text { Width, In.... } 1 / 4 & 3 / 8 & 1 / 2 & 5 / 8 & 3 / 4 & 1 & 11 / 2 & 2\end{array}$ Per Roll. $\$ 0.53$ \$0.67 \$0.92 \$1.18 \$1.34 \$1.76 \$2.64 \$3.52

## Permacel Texcel Dispensers Texcel 5 A <br> Desk Dispenser

For hoth office and home use, is available in black, satinwood, blue spruce and inahogany and holds tape up to 1 in . wide and $23 / 4 \mathrm{in}$. in diameter.
Per Dispenser.
$\$ 1.98$

## Texcel 5 B

## Counter Dispenser

For storeroon, shipping room or sales counter use, is available in French Grey and Sea Spray. A heavy duty, all purpose dispenser, it holds tape up to $11 / 4 \mathrm{in}$. in width and $61 / 4 \mathrm{in}$. in diameter.
Per Dispenser.
$\$ 3.95$

## Texcel 5 C

## Industrial Dispenser

For production line, and shipping room is available in Gummetal. The roll width capacity of $21 / 4 \mathrm{in}$. and roll dianeter of $73 / 4 \mathrm{in}$. makes this the ideal dispenser for high speed production work.
Per Dispenser.
\$6.10

## Kester Acid Core Solder For General Soldering

Quickly forms permanently strong joints. Acid llux flows evenly, in right amount.

No paste or additional flux necessary.

Standard size, $1 / 8$-inch. Approximately 2.5 feet per pound.

```
Pkg..
Prices on application.
```

$$
\begin{array}{ccc}
\text { J-Lh. } & \text { S-Lh. } & \text { 20-Lb. } \\

$$

## Kester Plastic Rosin Core Solder For Electrical and Radio Work

Non-corrosive plastic rosin flux, flows evenly in correct amount.

Forms perfect solder joints.
No pastes or additional flux necessary.

Standard solder size 3/32-inch.
Approximately 50 ft . per pound.
Spool Size in Pounds............. 1
Prices on application.

## Dunton Solders

## Gem Rosin Core

For Electrical and Radio Work
Made of virgin tin and lead-no scrap metals used. Rosin flux.

Approximate size of solder, .093 inch standard gage.

Supplied in spools of 1,5 , and 20 pounds each.

## Ideal Acid Core

Made of virgin tin and lead-no scrap metals used.

Superior acid soldering flux. Approximate size of solder, No. 8 standard gage.
Supplied in spools only of 1,5 , and 20 pounds each.

## Nokorode Core <br> For General Soldering

For all kinds of soldering. Jeplaces acids or resin core solder. Ready for instant use.

Quick-working; forms permanently strong joints.
Metals, virgin tin and lead. Core completely and uniformly filled with solid flux. Flux will not run out on heating; no waste. Supplied in 1, 5, and $20-\mathrm{lb}$. spools.

Prices on application.

## Allen Aluminum Solder

## 

Complete, solder and thux combined. Requires only heat to permanently join aluminum to itself or other metals.
Supplied in $1 / 8$-inch ( 11 gauge) square wire, or triangular $1 / 4$ and $1-\mathrm{lb}$. bars.
Prices on application.

## Kester Bar Solder

## 

Tin-lead alloy solder. Bar form particularly convenient for heavier soldering jobs.
I'rices on application.

## Allen Stainless Steel Solder

Hi-Luster. Supplied in wire form, provides close-matching, non-dulling joints. Particularly desirable on decorative work.

Irices on application.

## Extra-Strong

Forms joints of unusual strength. Designed for general stainless steel soldering. Bar forms only.

Darkens slowly with age, but does not lose strength.
Prices on application.

## Allen Soldering Paste

Approved by Underwriters' Laboratories, Inc.

## Standard Formula

Convenient, corrosion-free, soft form of flux.

Fast working; adheres to surface during soldering.

Makes solder self-fluxing.

## Dunton Rosin "X" Flux

51 can per case
Completely non-corrosive and electrically non-conductive. An activated flux which has been certified for Army-Navy and Air Force Specification MIL-N-6872. lispecially adapted for the Electronies, Radio, 'Television and Vlectrical Industries. Free from acid reaction, safe as rosin, fast as acid.

A vailable in cored solders.

## Dunton Neutro-14 Flux

Contains no zinc or ammo-
 nium chloride nor strong acids. lias no rosins or other synthetic resins or waxes. Non-fuming and non-toxic-

Residues are non-corrosive, non-condnetive and non-hygroscopic. Readily water soluble. Contains special wetting agent to give maximum wetting properties to the flux.
Not designed for use on Inconel, tarnished stainless steel, aluminum nor zinc.

## Allen Soldering Flux

## "All-Sol" Stainless Steel

Fast flux which makes soldering of stainless steel as casy as soldering tin plate.

Works with all solders. Available in a special odorless formula where less strength is required.
Size
No. Per Ctn.
Each Pint
6
$\$ 1.60$

## Allen Silver-Brazing Flux

Rapid working product that enables operator to fuse silver with itself or with other netals. Strong, ductile and will not discolor silver in any way. This flux meets Army, Navy and Military specifications.

Size
1 Lb.

No. Pou Ctn.
6

## Allen Neutral Rosin Liquid Flux

Alsolutely safe for electric motor, telephone, radio, commutator and instrument work, or on tine wires.

Will not corrode, even if spilled on work and allowed to stand.

Neutral, moisture-free flux, non-conductive to electric current.

Size Can.
1 Qt. 1 Gal.
No. per Cartori
$\$ 1.00 \quad \$ 3.50$

## Allen Soldering Salts

Non-acid flux in convenient powder form.
Takes a quick bite and makes solder hold on. Solders all metals but aluminum.
For old metals, use 3 parts water to 1 part salts; for new metals, 5 parts water to 1 part salts.
In bottles or metal container.

## Burnley Soldering Salts

For all metals.
Made of pure chemicals.

| $\begin{aligned} & \text { Size } \\ & \text { LDs. } \end{aligned}$ | Standard Package | Per <br> Pound |

## Unique Joint Wiping Cloths

linishing and catch cloths have smooth, slick wiping surface to which solder will not stick. Made of tinest ticking.

## Formed Flexible Finishing Cloth

Permanent eurve of elolh forms neat, narrow uniform joints.

Ready to use: no breaking in necessary.

Contains no stiffening: can be massaged to any desired flexibility without losing curvature.

## Formed, Finishing Cloth

## Reliable Testing Clips

For temporary connections to insulated wires. Made of heavy bronze with hard sharp insulation puncturing points and perfeetly registering tereth.

## No. 1

Pitted with screw, nut, spike, and washer for altaching to instrment cord.
No. 1 ............ each $\$ 0.26$

## Nos. 2 and 3

Same as No. 1 with exceptions as noted. Preferred where connection to cord is to be soldered.
No. 2 No screw, nut or washer. .................each $\$ 0.24$
No. 3 Without spike.
each 0.24
No. 5
A light, sturdy elip with a strong spring. Convenient for temporary connections in radio, telephone and signal work.
Particularly good for congested tolephone equipment. Ample space for soldering flat cord terminals.

Quantity prices on request.

## Mueller Universal Test Clips and Insulators

No. 24-A Clip Only

No. 45 Clip with
No. 47 Insulator

For electrical work requiring quich temporary connections. A complete line of test clips and flexible insulators.
Clips are pachaged in standard quantities of 10 and 100. Sizes 21-A, 21-A, and 11 A are packed half marked plus, half plain to indicate polarity.

Flexible insulators provide convenient protection against electric shock, and prevent clips from shorting against each other. Color coding offers quick identification of different leads. Packaged in standard quantities of 10 and 100 in red and black, half of each color.
All Mueller products may be assorted to obtain quantity prices.

1. Strip Wire. 2. Serew-on-that's alt. "Wire Nut" threads on to wire just like a nut on a bolt. The coil shaped spring insert presses (does not cut) clean threads into the stripped wires as the Connector is applied. Wires are tighty compressed and automatically twisted together by powerful grip. Holded composition shell completely protects against shorts, grounds and corrosion such as develop in loose solder and tape comnections. Solid or stranded.

## Ideal Set Screw Wire Connectors

Underwriters' Laboratories approved
for 600 volts, and as pressure cable connectors.

llave the same pos-
 itive holding power as "SCOTCIILOK" Electrical Spring Connectors.
Constructed with tough spring stecl, rugged vinyl cover plus metal armor cap which prevents fracture or crushing in a crowded junction box.
Ilave "live" reserve strength and ability to alsorb stress of electrical loads.

WIRE RANGES: Solid Stranded

## Ideal Crimp Connectors <br> With "Wrap Cap" Insulator <br> Underwriters' Laboratories Approved

Made of steel for maximum strength, cadinium plated for corrosion resistance. Gives greater holding power than any other crimp connector used for pigtail splices.
llandles all wire combinations from No. 14 through No. 10. Compact, strong, vibration-prowf.

| No. | Per 100 | ${ }_{1000}$ |
| :---: | :---: | :---: |
| 30-410 | \$1.00 | 9.00 |

## "Wrap-Cap" Insulator

Assures perfect insulation on every connection. Deep skirt insures greater safety, even when wires are not evenly stripped.

Made of the same vinyl insulating material used in TW wire, providing excellent ageing characteristies and resistance to corrosive atmospheres, sunlight, water, alcohol and even gasoline.

Listed for maximum temperature of $165^{\circ} \mathrm{F}$., easily workable at $10^{\circ} \mathrm{F}$.

## Sherman Solderless Wedge-Grip Connectors

## Sherman Midget Connector

Has positive acting screw for securing wires. Fine pitch threads will not shake loose.

No. SC-6X

For service entrance and all small wire connections.

The oval point, hexagon head, bronze screw wedges wires between V-shaped corrugations.

Pure copper body is hard drawn with highest conductivity; needs no taping.

## O.Z. Solderless Connectors

These copper alloy fittings are so designed that high clamping pressure is exerted by the pressure plate to insure high conductivity. (Type XL furnished with wrench for socket set screws.)

Combination "T" and Parallel Taps

As a "T" Tap

## Type XTP

Can be used either as " T " or Parallel Tap, taking a range of wire sizes on main or tap as below.
One piece copper alloy with socket set screws. Complete with wrench.

Two-Wire Lugs

Type LM
Copper alloy, machined on one side only. With socket set screws. Complete with wrench.

To solect terminals according to the N.E.C. ratings governing knife switches. use the following equivalents:
$\begin{array}{llllllll}\text { Capacity...amperes } & 30 & 60 & 100 & 200 & 100 & 500 & 800 \\ 1000\end{array}$ Size lug.....inches $1 / 4 \quad 3 / 8 \quad 1 / 2 \quad \frac{12}{16} \quad 1 \frac{1}{16} \quad 1 \frac{7}{16} \quad 13 / 4 \quad 2 \frac{1}{16}$
*Furnished square end unless speeified round. Not made seamlens.
$\dagger$ 'urnished with $\frac{9}{32}$ or $\frac{13}{32}$-inch st ud hole at no extra charge.
Standard lugs furnished blank (without stud hole) at no extra charge.
lags which are to be bent should be specified "Annealed," $10 \%$ extra plas set-up charge.
Quantity prices on request.

## Sherman Heavy Duty Soldering Lugs

## N.E.L.A. Standard

Best quality seamless copper tubing.
Blank lugs furnished when specified; otherwise regular bolt holes as listed. Special drilling may be had at extra cost. Straight lugs regularly furnished. Angle lugs tis and 90 -dearee when sperified at exifa price. Plain finish unless otherwise spectified.

Sureial finishes as follows at added prices: Rosin dipped, cadmitum plated, and tinned all over. Special dimensions may be made to order with dimension E other than regular or special drilling of stud holes, at added cost.

T\&B Lock-Tite ${ }^{\circledR}$ Lugs
Approved by Underwriters' Laboratories

## One Bolt Hole Tongue

One-piece design lugs. Uniform pressure allaround provides direct contact and high conductivity.

For all types of conduc-fors-stranded, solid. flexible, ete., from No. 4 A.W.(i. to 1000 MCM .

Proven in tests to make up tight, stay tight and to run cooler than cable.

| No. | Description | Use Key Wrench No. | $\begin{aligned} & \text { Unit } \\ & \text { Quan. } \end{aligned}$ |  | Per 100 |

T\&B Sta-Kon ${ }^{\circledR}$ ) Pressure Terminals
Approved by Underwriters' Laboratories

Provide solderless, high conductivity connections, mechanically as strong as the wire itself.

Copper tongue comes into direct contact with wire, and secure mechanical grip is produced by the staking, which runs parallel to the strands. Complete terminal is hot-tinned. Staking pressure may be applied by hand or power operated tools. Available in many forms for wires from No. 18 A.W.G. to 250 MCM .

Standard Serles-For Use with Stock Tool No. WT-111M

## Sta-Kons® ${ }^{\circledR}$ For The Production Line

Additional tongue sizes, bolt sizes, and a wide variety of special shapes and designs of Sta-Kon Terminals and Connectors are available. Full information is available on request from Graybar.

Where large quantities are required, Sta-Kons can be supplied packed in bulk for direct shipment at lower prices than the standard stock packing shown above. Specific inquiries are invited.

For high-speed production installation there is a broad line of power tools available, hydraulic or air actuated. They make consistently uniform installations at speeds up to one thousand per hour. Complete details will be furnished on request.

## Burndy Hydent Connectors

Hydent connectors are of one-piece, pure copper construction. They are indented onto conductors with simple and easy-to-use llytools and Ilypresses as listed on following pages. Due to the one-picce construction and uniform harrel thickiness of Ilydent connectors. the indent can be placed anywhere on the circumference of the barrel.

```
Solderless and Secure
Electrically Efflcient Electro-Tinned Easily Inspected.
```

Hydent connector sizes include the smallest used on wiring harnesses, electronic equipment, etc., to the largest
required for industrial applications. Those listed below and on the following pages are the most commonly used types and sizes carried in stock. Applying the Hydent method to the many wiring needs can effect eeonomies of both time and expense. Siandard llydent connectors meet the requirements of:

Underwriters' Laboratories, Inc. Canadian Standards Association U. S. Air Force.

Army Signal Corps.
Army Signal Corps.
Ordnance Department Ordnance De

Bureau of Ships
Eureau of Aeronautics
Bureau of Ordnance
Civil Aeronautics Authority.

Hydent Cross-Section. Note how the cable strands have been formed into one solid mass.

## Burndy Hylugs

Listed by Underwriters' Laboratories, Inc.
For No. 22 Through No. 8 Commercial and Aircraft Conductors

## For Cable to Flat

Ilylugs are compact, one-piece solderless pure copper terminals that provide dependable and rapidly made connections. Electro-tinned surfaecs minimize corrosion. Iloles in back of barrels permit quick visual inspection for proper insertion of cahle. Insulation grips are provided on many terminals listed below.

A complete line of terminals with tongue sizes and shapes conforming to special specifications is available.

Available in new flip-top box for sizes from No. 22 through No. 8
In sturdy corrugated boxes through 2000 MCM .

On large conductors, particularly from 300 MCM through 2000 MCM , multiple indents are sometimes desirable for severe operating conditions. Long barrel Iydent connectors are especially designed for this purpose.

For complete information, contact Graybar.

## Burndy Flag-Type Hylugs

Listed by Underwriters' Laboratorles, Inc.
Type YBV
For No. 20 through No. 9 Commercial and Aircraft Conductors For Cable to Flat

Fig. 1

Fig. 2

Fig. 3

These flag or side entrance type terminals are of pure copper, one-piece construction. lilectro-tinned surfaces minimize corrosion. Provide dependable and rapidly made connections. Installed onto conductor with Ilytools and Hypresses.

## Burndy Clasps and Clasp Lugs <br> Listed by Underwriters' Laboratories, Inc.

Type YZ-H Type YZ-H1 Type YZ Type YZ-1 Type YZA

The Burndy Clasp is a quick disconnect composed of two identical hatves for joining commercial or aircraft cable sizes from No. 22 through No. 9. Cannot be separated by direct tensile stress. Clasps can be supplied with insulation grips as well as locking tals that lock the comnection against accidental loosening. Terminal comection is made by Burndy Clasp lug which conneets to the clasp.

Clasps and Clasp Lugs are installed onto conductors with standard IIytools and Hypresses.

For complete information and prices, contact Graybar.

## Burndy Belled Hydent Connectors

Type YS-LB

These belled entrance connectors are available for efficient insertion of flexible, extra-flexible, and welding calles. Deep Hypress indentations made during installation provide lowresistance, high-strength connections.

For complete information and prices, contact Graybar.

## Burndy Hyseal Connectors

For preventing electrical faults that arise from the admission of water, moisture or acid vapors into the conductor strands or under the insulation. Made of pure copper, one-piece, and fit a variety of cable sizes and insulations.

## Typical Applications of Burndy Hyseal Connectors

Hyscalugs: For battery jumpers that seal cable against acid vapors. Also used in mines.
Hysealinks: Provide moisture-proof end-to-end connections.
IIysealplugs: For primary metering connections that prevent seepage of water at the connection and through the cable strands into the meter boxes.
These connectors are installed with Hypresses. The connector barrel is indented onto the bare conductor providing an excellent mechanical and electrical connection. The skirt or shroud provides a watertight connection by firmly gripping the cable insulation (synthetic or natural rubber compounds). Hyseal joints resist water pressures in excess of 50 psi .

For complete information and prices, contact Graybar.

## Burndy Shielded Cable Terminations Type YIC and YOC

A single or double ferrule is used for tapping braid on shielded cable. This connector can also be used to anchor the braid ending, therely preventing it from slipping or fraying.

For complete information and prices, contact Graybar.

## Burndy Hydent Installation Tools

Electrical connectors are only as dependable as the tools which install them. Here is a wide variety of practical, tested, welldesigned tools whose uniform performance assures dependable electrical connections.

These tools are made for manual, pneumatic or hydraulic operation. For small connectors, where quantity high-speed production is not required, Itytools in the form of hand pliers are employed. For quantity production, both manually-operated Hytools and power-actuated Hypresses are available.

Each tool has been designed to insure: Simple operation by unskilled personnel, rapid low-cost-unit installation-as many as 1000 small-wire connections per hour can he made with a pneumatic Ilypress; Uniformity of installation-the release valve feature of IIypresses and the close tolerances built into all Burndy tools control the depth of indentation.

No.
Type 18 ND

## Burndy Hylugger

## Type Y8ND

A light weight, compact, fast acting pneumatic tool.

Air pressure of 90 psi . is augmented by internal cam action to provide more than 3000 lb . crimping force. The built-in full cycle valve assures ram cannot return until it has completed its full forward motion. Thus crimping is uniform.

Convenient trigger location. Uses same dies as the M8ND. Dies must be ordered separately.
Head dimensions: $11 / 2$-in. wide, $3 / 8$ in. thick, $3 / 4$-in. from terminal to end. Overall length $91 / 2$-in. complete with honse.

Weight $2 \% / 4 \mathrm{lbs}$.
Hylugger, without dies
Each
$\$ 183.00$

Burndy Pneumatic Hypress
Type Y10NCP
A high-speed, the insulation and installs Hydent Connectors on conductor sizes No. 22 through No. 10. A single indenting die installs; connectors on this entire conductor range. Other features are wire strippers, bolt cutter, thread chasers, and dies for closing insulation grips.

Type Y10M—Weight each $3 / 4$ Lbs.
Ea. \$3.95

## Type MY29

A simple hand-operated Hytool that installs Ilydent Connectors on conductor sizes No. 8 Stranded through 2.50 MCM withont requiring the removal of dies. Unique indentor and nest which is adjustahle to cable size scale on side of the Hytool gives this extensive range.

Type MY29—Weight each 6 $1 / 2$ Lbs
İa. $\$ 36.00$

bench-mounted, foot-actuated Hypress, furnished withpneumatic pressure unit, footpedal and body. Installs IIydent Connectors on stranded cable sizes No. 22 through No. 8, and on solid wire sizes No. 22 through No. 6. Dies are extra. Trool angle and adequate jaw spacing, plus foot-actuated pneumatic operation permit last feed of assemblies into the die.

An air-line pressure of 90 psi ., developing over 2000 lbs . total force is required for operation of this Hypress over its entire range. For smaller connectors lower pressures will be satisfactory.

Type Y 10 NCl -Without Dies; wt. ea., $\mathbf{1 0 1 / 2}$ Lbs. Ea. $\mathbf{\$ 2 7 0 . 0 0}$

## Burndy Hydent Installation Tools

A manual Ilypress weighing 9 lbs. that delivers a 9-ton force. Ideal for close-quarter operation; head rotates $90^{\circ}$. Installs Ilydent Conneetors on cable sizes No. 6 to 500 MCM . Tool is neoprene covered. Dies are quickly placed into the head-all dies must be ordered separately. Pumping the handle operates the llypress. An overload valve controls the depth of indent on each size connector and its operation is indicated by an andible elick and a drop in force when the indent is correctly completed. The indentor is returned to indent is correctly completed. metal carrying case.
Type Y34A-Without Dies; Weight each, 9 lbs., Each $\$ 155.00$

# Burndy Foot-Operated Hydraulic Hypresses Type Y-B 

Made in five types as illustrated. Includes foot-pump, $8-\mathrm{ft}$. flexible hose, llypress head, and metal carrying case, All dies must be ordered separately. Flexible hose and swivel joint permit use of head at any angle, making the llypress suitable for both bench and field installation. An overload valve controls the depth of indent on cach connector size, and its operation is indicated by an audible clich and a drop in force when the indent is correctly completed.

Air and electric units are also available to replace footpump units. Graybar invites your inquiries.

## Burndy Cable Terminals

## Qiklug Type Q2A and Type Q3A

Type Q2A

Type Q3A

Type 021: A compact clamp type connector with two clamping elements for joining two cables to bar or flat pad. Comneetion is quickly made by inserting cables into Qiklug cable eyes and tightening nuts. Qiklugs can be used.

Type 03A: A Qik comnector for terminating three cables to bar or flat pad. Cables are securely held in place, forcing a high pressure contact with terminal, by merely tightening nuts on clamping elements.

## Burndy Aluminum Hylinks

## Type YS-A

## For Aluminum Cable End-To-End

Aluminum IIylinks for making end-to-end connections of aluminum cable from \#12 str. to 2000 Mcm . Supplied factory filled with Penetrox A and capped so that there is no need to apply this corrosion inhibiting and oxide penetrating compound as a separate operation.

The staked plug which forms cable stop in center of hylink provides maximum insertion of the conductor and proper distribution of Penetrox A through the strands.

To make installation, insert aluminum cable in each end and crimp with recommended installation tool and ide.

Contact GRA YBAR for price and further information.

## Burndy Aluminum Hylugs

## Type YA-A-TN

For joining aluminum cable to flat. Tin-plated aluminum IIylugs recommended wherever it is necessary to terminate aluminum cable to a copper or aluminum surface.
Supplied factory-filled with Penetrox A, a corrosion inhibiting and oxide penetrating compound.

Easy to install, simply insert the aluminum conductor and erimp with recommended installation tool and dies. I.S. standard flat washers recommended for use under the hads of the clamping bolts when installing these Hylugs.

Contact GRAYBAR for price and further information.

## Burndy Cable Connectors

Listed by Underwriters' Laboratories, Inc.

Versitaps-Type QPX
For Range of Copper Conductors

An all-purpose connector used to make parallel taps, T-connections or end-to-end connections.

Made of high strengtli, high conductivity copper alloy, it consolidates the functions of a number of connector types into one lowpriced device.

## Variety of QPX Connections

## Oklips-Type KVS

For Copper Conductors
A husky connector for heavy duty copper to copper service connections. Takes a wide range of conductors.

Made of high strength, high conductivity alloy. its compact construction permits quick and easy taping. No loose hardware. -rubberlike rings canture lolts, thus preventing their loss.

| No. | Run Conductor Rango |  |  | Tap max | $\begin{gathered} \text { Quan. } \\ \text { In } \\ \text { ctn. } \end{gathered}$ | wt. Per 100 Lbs. | $\begin{gathered} \text { Per } 100 \\ \text { (Ctn. to 99) } \end{gathered}$ |

## Burndy Flat Bar and Tubular Bus Fittings

Ilustrated on this and following pares are typical lurndy bus connectors available through Graybar. Connectors for fat. square, angle or tulniar bus. or cable and for connections between the varions conductor types can be furnished to meet your particular jnstallation refuirements. for complete information on these and other types, contact your nearest Graybar oflice or warehouse.

## Flat Bar Fittings

Bar clamps distribute pressure over a wide area. Availahle for fat bars, or for flat har to cable, tube or special shapes. Conmectors for taps from molipile hars also avalable,
tither the 1 -bolt nud cap, or special chaming eye nud cap elements are reconmended for joining cahles lo flat har. Contact frayhar.

## Burndy Connectors for Special Bus Shapes

A complete line of heavy-duty connectors is available for chamel, angle and square tuhe bus. Iligh-pressure contact areas are set up liy the clamping bolts, providing these conneetors with excellent electrical characteristics and the ability to withstand the large short-circuit forees encountered in high-current buses.

## Burndy Connectors for Underground and Industrial Systems

Provide compact, secure, insulated connections with full cable insulation protection at low installation enst.

Another feature of this equipment is its llexibitity in providing for linture additional loads which can be installed rapidly and inexpensively.

Type $X$

Efficiency Non-Adjustable Supports

## Type K

Malleable iron, Case hardened set serew. Designed for supporting porcolain and glass insulators to beams and angles in open steel construction of all kinds. Made in four sizes for standard insulators. Has numerous applications. Does not require burning or drilling holes.
Complete information and prices on reguest.

## Type $X$

Dallcable iron, extra heavy head. Case hardened cup point set serew and nut. Sot serew tightens on mut, if thread is stripped, replacement can be made with common sted nut.
Desigmed for use where no more than two insulators or fittings are required, and where these fittings may be placed in either an upright or horizontal pusition. Adaptable to mount various designs of cable racks.
No drilling or burning holes in heam is required. A great variety of uses can be found for this support.

Complete information and priees on request.

Malleable iron, electro-galvanized. Case hardened cup pointed set screw.

For securing porcelain or glass insulators, knobs, cleats, brackets, or pipe in any open construetion.

Easily attached to I-beams, angles, channels, etc., or to round, square or flat bars, edges of tanks, pipes, etc.

One set screw design, providing a three-point contact that holds the support securely and rigidly to the steel framework. Vibration will not loosen set screw.

Screw holes for fastening insulator to Universal Insulator Supports are tapped standard as indicated.

Special tapping can be specified when required, at no extra cost.

Machine screws for fastening porcelain insulators to Universal Insulator Supports are furnished only when specified and at additional cost.

## Steel City Marchand Clamps and Plugs

## For Stranded Wire Cable

Assembled view showing "dead-ending" Clevis Clamp attached to strain insulator and clamp end of $1,000,000$ CM stranded copper conductor.

Safest and most efficient wire clamp on the market.
Simple in design. Saves labor and material. Easily and quickly installed. The only Single Clamp that can be used for maximum strain. Does not crush the strand-each wire of strand gripped separately and carries cqual load. Standard designs meet all conditions of construction. Only one clamp required for each connection. Sherardized finish.

Clamps and plugs only. Insulator not included.

## Efficiency Time Saver Cleats

Unique design. Base is mountLnique design. Base is mount-
ed permanently with one bolt, and forms a solid support or shelf for the wire or cable. Cap is bolted as a separate operation. Wire aroove diameters $\frac{3}{16}$-inch to $17 / 8$-inch. Also available with mounting for lag serew, machine bolt, toggle bolt or expansion plug.

Complete information and prices on recpurst.

## Efficiency Cleat Racks

For Time Saver Cleats

Made in 2, 3, 4, 5 and 6 cleat types and 3 phase cleat rack. Wire size $3^{3}$-inch and $17 / 8$-inch. [Base of 'lime waver cleat is monoted permanently with one bolt and forms a solid support or shelf for the wire or cable. Cap is bolted as a separate operation. Fiurnished with or without adjustable beam supports. When ordering give outside diamcter of wire or cable over insulation.

Complete information and prices on request.

Walleable Iron. Independent mountings for cable and wires. Type Vib requires only one bolt to be tightened to hold porcelain bushing and clamp to base. In both supports the bushing is completely surrounded by metal. Mounted with one bolt; the circular base is adjustable to any angle. For a-c service, a brass half is furnished to prevent induction. For wire sizes $\frac{5}{16}$-imeh to $23 / 8$-inch. When ordering give outside dianter of wire or eable over insulation. Complete information and prices on rembest.

## Type G

Adaptable for mounting on Steel, Wood, Concrete, Tile, Brick or Stone.

Malleable Iron. For a-c service a brass half is furnished to prevent induction. For wire sizes $\frac{5}{16}$-inch to $23 / 8$-inch. When ordering give outside diameter of wire or cable over insulation. Toggle or machine bolts, lag serew or expansion plug are extra.

Complete information and prices on request.

## Efficiency Bushing Messenger Supports

## Type GM

Designed to suspend wire or cable from messengers where beam mometing is not possible. A combination of Type (i Bushing Support with strip steel messenger attachment. Furnished complete as illustrated. For wire sizes $\frac{8}{16}$-inch to $23 / 8$-ineh. For ate or d-c service.
When ordering give outside diameter of wire or cable over insulation. Also size of messenger.

Complete information and prices on reguest.

## Nested Conductor Rack-Type U

Two Conductor Rack

Three Conductor Rack

Relieves impedance. Compact and scientifically designed to carry conductor equidistant from center to center.

One bolt supports the bushing and clamps the bushing support to the rack.

Each fitting is a separate unit and permits installation of each cable line independently.

Rack is standard rolled steel channel.

Bushing supports are matleable iron.

For a-c or d-c service. Fora-c sersice a brass half is furnished to prevent induction. For wire sizes $\frac{5}{16}$-inch to $2^{3} 8^{-}$ inch.

Completeinformation and prices on request.

## Efficiency Hangers

## 2 or $\mathbf{3}$ Wire Cleat Mounting

This fitting is furnished complete with No. 150 Adjustable Support, malleable iron cleat fitting, 2 or 3 wire glazed porcelain eleats and all bolts. Wire sizes from 2 to 14. Also available without adjustable support.

Complete information and prices on request.

## Efficiency Bushing Racks

## Type B Adjustable

Only one bolt required to support the bushing and clamp the bushing support to the rack. Each fitting is a separate unit and permits the installation of each line of cable independently.

Rack is standard rolled steel channel, sizes $11 / 2 \times 1 / 2 \times 1 / 8-$ inches and $2 \times 1 / 2 \times 1 / 8$-inches, varying according to size of bushings and number of mountings to each rack. Bushing supports are malleable iron. Bushings are glazed porcelain, extra large and heavy, and designed to allow a minimum of leakage.

These racks can be furnished with any required number of bushing mountings.

The bare rack can be attached permanently to the structure and mountings can be added later as required.

B-700S to and including B-702S are spaced 4 inches center to center of bushing.

B-703S to and including B-705S are spaced 5 inches center to center of bushing.

B-706S to and including B-710S are spaced 6 inches center to center of bushing.

Any desired spacing of bushings, from center to center, other than above specified, can be furnished.

Made in 2, 3, 4, 5, and 6 bushing racks. For a-c or d-c service, wire diameters from $\frac{5}{16}$-inch to $23 / 8$-inch. For a-c service a brass half is furnished to prevent induction.

Available with or without single or double adjustable beam supports. Complete information and prices on request.

Efficiency Adjustable Insulator Supports

With Time
Saver Cleat

Showing How Wires May Be Run Above Or Under The l－Beam，or Carried At The Side Parallel With The Beam

Designed to carry insulator and fittings at any angle， either above or below the beam．Permits the mounting of several conductors on one support，or any combination of wires or cables by the addition of various fittings．Slot per－ mits movement of $120^{\circ}$ from vertical position．Support clamps tightly to beans or angles without drilling or burning holes．

Malleable iron frame with case hardened cup point set screw． Complete information and prices on request．

## Republic Rigid Threaded Conduit, Couplings and Elbows

Easy-hending stcel raceway, produced by "continuous weld" process. I niform; free from "hornt" or hard spots which might cause eutting, threading or bending problems. Welds will not open even under severe abonse. Cits freerunning threads easily and cleanly. Inside surface is smooth and lree of burrs and rough spots.

ENAMELITE® Finish
Red Label: Protected inside and outside with a heavy, haked-on coating of tough, wear-resisting black enamel. Coating is highly resistant to acid types of corrosion, particularly where sulphuric fumes are present.

## GALVITE $\mathbb{R}^{\circledR}$ Finish

Blue Label: INot-dip galvanized inside and outside, with a special coating of haked-on lacquer applied inside and outside to further insure high eorrosion-resisting properties.

All dimensions shown above are nominal.
Conduit is furmished in accordance with American Standards Association specifications C80. 1 or C80.2 and F'ederal Specifications WW-C-581 or WW-C-571, latest revision.
Conduit is furnished in 10-foot lengths, threaded both ends, with coupling screwed on one end and thread protector on the other.
Conduit is always designated by its nominal inside diameter.

## Triangle Rigid Steel Conduit, Couplings and Elbows

Hot-Dipped Galvanized or Black Enameled Finish
Conforming to Federal Specifications WwC 581A (Gaivanized) and WWC 571 (Enameled)

## Hot-Dipped Galvanized

In hot-dip galvanizing each length of Triangle conduit is immersed in a bath of malten virgin zinc ( $99.85 \%$, pure), thoroughly gavanizing the interior as well as the exterior surfaces.

Intimate contact of the surfaces of the tube with the molten zine results in an alloying action which thoroughly bonds the pure ainc coating to the pipe.

Further protection against corrosion is provided by submerging the conduit in a bath of specially prepared linseed oil hase lacquer. A thorough baking of the lacquer produces a smooth, even, continuous finish.

## Black Enameled

Finished with high quality, tough, elastic black enamel. Thoroughly baked to produce a durable black luster.

All dimensions given above are nominal.
Lightweight, easily suspended. Particularly useful as overhead conduit in corrosive atmospheres.
*Sizes manufactured on special order.

# National Electric Rigid Steel Conduit Couplings and Elbows 

## "Sherarduct"

A high grade, rigid steel conduit that has been galvanized by a dry process of galvanizing known as sherardizing. The steel conduit and commercially pure zinc dust are heated together at a very high temperature. In this process, the zine combines with the steel to form zinc-steel alloys which become a part of the steel wall. Being an intergal part of the steel conduit wall, the galvanized coating cannot flake or scale; even the threads are Sherardized.

Additional interior, exterior protection is provided ly National Electric's new MVC-1 enamel. This enamel coating is composed of a modified vinyl copolymer and is plasticized and pigmented. MCC-1 vinyl enamel is highly impervious to all chemical attacks; it also withstands extreme mechanical abuse without fracture or shinning of the coating. MVC-1 enamel has elasticity that allows lends and general worhing of conduit without damage to the interior bended coating of enamel.

Sherarduct with its new M\C-1 enamel coating guarantees double corrosion protection.

## "Superduct"

Completely new, Superduct was specially designed to answer a dolinite need for a protective electrical conduit for locations where corrosion is both severe and costly. Like Sheraduct, this conduit is made of high quality steel, rigid, with threads, conplings and conduit zinc-coated by the sherardizing process of galvanizing.

After the galvanizing process, Superduct is then coated, inside and out, with a special vinyl chloride-acetate copolymer, pigmented and plasticized enamel finish. The vinyl cnamel resists the corrosive and deteriorating action of practically all chemicals, greases, oils, moisture, salt water and severe weather conditions.

The improved Xduct rigid threaded sted conduit now has a new interior finish which is a baked-on-coating of aluminum enamel. The outside surface is also new; a heavy and uniform conting of electrolytically pure zinc is deposited on the outside surfaces of the conduit by an exclusive end-suspension technique. This insures a zinc coating which adheres to the hasic steel and has exceptional resistance to both corrosion and to flaking during bending operations.
A special brightening agent, applied over the pure zinc electrogalvanizing, gives Xduct conduits a highly-polished apprarance and makes it ideal for exposed-to-view instalations.
Twice as easy to start pull, and $66 \%$ easier to continue pulling wires, as proved by actual test results.

## Economy Enameled Conduit

Made of homogeneous, fine-grain steel.
Tough, flexible, enamel applied by immersing conduit.
Clean, scale-free surfaces prepared before immersion eliminate any possible cracking off of enamel. Threads are kept clean by protectors during enameling.

Threaded on both ends and shipped in lengths of 10 -feet, including coupling.

## Anaconda Everdur Electrical Conduit

lligh-strength. corrosion-resistant conduit, composed of non-magnetic copper-silicon alloy. Possesses high strength, exceptional ductility and fatigue-resistance.
Suitable for use in installations where unusually corrosive conditions are encountered.

## Seamless Rigid Conduit <br> Listed by the Underwriters! Laboratories, Inc.

Supplied in nominal sizes from $1 / 4$ to 4 inches. As ordinarily supplied, the 10 -foot lengths are threaded both ends with oneEverdur coupling attached.

| Nom. <br> Size <br> In. | Outside <br> Diameter <br> In. | Inside <br> Diameter <br> In. | Wall <br> Thickness <br> In. | Wt. Per <br> Foot <br> Los. |

Seamless Rigid Conduit Elbows
Threaded Both Ends-Without Coupling

listed under Factory Inspection and Label Service Procedure by the Underwriters' Laboratories, Inc.

## Alcoa Aluminum Rigid Conduit, Couplings and Elbows

## Approved by Underwriters' Laboratories, Inc.

Lightweight, corrosion-resistant aluminum conduit for longer service life, easier handling during installation and more efficient performance of electrical systems.

The lower reactance of aluminum conduit systems results in a lower voltage drop than that of systems using magnetie conduit. Conductors of a single or polyphase system may lee enclosed, regardless of the electrical load, each in a separate aluminum conduit.

Aluminum conduit cannot discolor or stain adjacent surfaces. Painting is not necessary except under severest service conditions.

Furnished in $10-\mathrm{ft}$. lengths, one end fitted with a coupling.
For use with standard threading fittings, of aluminum or galvanized or cadmium-plated iron or steel.

Easily bent with rigid conduit bending tool for sizes 1 -in. and larger and with thin-wall conduit bending tool for size $3 / 4$-in. and smaller.

Triangle E.M.T. Conduit and Elbows
Contorming to Federal Specification WWT-806A
Electro-Galvanized

Produced from flat cold-rolled steel, oxy-acetylene welded to form a perfectly true tube of uniform thickness and strength.

Tubing, which is threadless and much lighter in weight than heavy wall conduit, is first thoroughly pickled and cleaned to remove all scale and foreign substances adhering to its surfaces and is then immersed in a bath of molten virgin zinc ( $99.85 \%$ pure.)
Tubing sizes up through 2 -inches are approved by N.E.C. for use on circuits where the conductor size does not exceed No. $1 / 0$ and where the voltage does not exceed 600 volts.

Conduit furnished in $10-\mathrm{ft}$. lengths.

Also available in $45^{\circ}$ elhows. Flbows are of same highgrade material as tulbing, and are protected against corrosion by the same process of cleaning and coating.

## Call Graybar FIRST For . . .

## Republic Electrunite ${ }^{\circledR}$ E.M.T. and Elbows

Lightweight Rigid Steel Raceway-Threadless

Iligh-strength, ductile E.M.T. for protection of electrical conductors.

Rerfuires no thread cutting. Galvanized, vibration-proof compression fittings slip over tube without disturbing the corrosion-resisting zine coating.

Easily lrent and formed; "**Inch-Marked" and "Guidelined" for convenience. Knurled inner surfaces make wire pulling as much as $30 \%$ easier.

Approved by N.E.C. for exprosed, concealed or concrete slab construction. Particularly suited for use in close quarters, such as narrow spaces between pans in concrete work.

ELECTIRUNITEA E.M.T. is furnished in galvanized finish in accordance with American Standards Assuciation Specification C80.3. Federal Specification WW-T-806 and Underwriters' Laboratories Standards.

"Dekoron-Coated" E.M.T. standard galvanized clectrical metallic tubing protectex liy an extruded covering of polycthylene. provides an economical means of oliminating eorrosion damage to electrical raceway systens. The chemica-ressistant butyethylene coating protects E.A.I. against unnsual corrosive conditons, packing plunts or sewerage disposal piants.
ands no special tools for installation. Standard M.M.T. fittiogs or, by the use of a connector, threaded conduit ittings are used.
Standard chemical-resistant tapes available permit completely corrosionresistant systems to he provided by forming atmosphere-tight wrapping over fittings and couplings.
In addition to the excellent chemical resistance of polyethylene, it posesses toughness good weathering characteristics. insensitivity to moisture flexibility and dimensional stability over a wide temperature range.
For further information, prices and technical data, contact Graybar.
(13) Trade Mark.

## National Electric Xduct Junior E.M.T. and Elbows <br> Electro-Galvanized

Uniform unbroken zinc coating produced by electrogalvanizing.
Inside surfaces furnished additional protection by a complete covering of aluminum enamel. Enamel will not crack or break down even under severe baking and bending. Not affected by weather. Irovides permanent protection against abrasion, moisture and corrosion.

# American Brass Sealtite* Flexible, Liquid-Tight Conduit 

Flexible, liquid-tight conduit for protecting electrical conduit from moisture, oil, grease, dirt, chemicals, corrosive fumes, abrasion, etc., in both indoor and outdoor connection. Reduces burnouts, downtime. Construction: Flexible galyanized steel core over which is extruded a polyvinyl chloride cover. Supplied in corrugated cartons on non-returnable reels; can be cut and assembled on the job. Takes standard liquidtight connectors.

Three general types: U.A. (Underwriters' Laboratories Approved) C.S.A. (Approved by Canadian Standards Association) E.F. (Meets J.I.C. (Joint Industry Conference requirements). Colors: Black, gray. (Black only on C.S.A. type).

## Installation

Screw Perrule and Sleeve Assembly ( 1 ) on end of LiquidTight Filexible Conduil, Insert Flexible Conduit with Firrule attached inte connector body.

Tighten nut onto comnector body. (Important-nut must be tightened as far as possible to complete compression action which assures liquid-t ight seal.)

Cross sertion of completed connection shows how tapered end of mut performs compression action on Ferrule wall, and gives positive ground between flexible conduit and conmector.

Ferrule Assembly as seen when nut is loosened and end of Liquid-Tight Flexible Conduit with Ferrule attached is withdrawn from connector lexdy.

## Pyle-National CT Series Connectors

## For Use with LIQUID-TIGHT Flexible Conduit

(Sealtite or Equivalent Products)
"CT" Series comectors can be installed assembled no parts to lose . . . no wasted time. Available in straight,
 flexible eonduit. Meet I/L. and II.I.C.. standards.

## 1. Displaced Bending Action

Tapered grounding shank olongated to extend beyond gland nut, thus avoiding short radius bends which shomen life of the conduit sheath and more import ant the permaneney of the joint.

## 2. Highly Efficient Ground

Less than 10 millivolt drop.
Tapered grounding shank, integral with connedor body, makes a lirmly wedged contact with the flexible metal conduit.

## 3. Extra Strong Grip

Compression furce is supported-not by the conduit alone -lut also by the body shank, making a vise-like clamp. Gripping is well behind end of flexible conduit for firm anchorage against crepping loose.

Pliable scamless slerve makes a plastic-to-plastic grip with the conduit sheath . . Werehy avoids eutting and abrasion common to metal sleeves.

High safety factor of compression range more than eompensates for tolerance in the outside diameter of the flexible conduit.

## 4. Permanent Seal

Plastic slenve and conduit sheath have equivalent physical characteristies therefore the seal will last the life of the conduit, unimpaired by temperature variations within the limits of the conduit.

# For Use with LIQUID-TIGHT Flexible Conduit 

(Sealtite or Equivalent Products)

Protects Wiring from Oil, Grease, Water and Dirt Designed to Meet Underwriters' Laboratories and J.I.C. Standards

Seamless, oil-proof, highly pliable plastic ring provides positive gripping and sealing. Tapered inner wedge integral with body assures positive grounding and supports clamping presure of plastic ring or gland.

Giland nut has tapered seat on wedging flange resulting in a elamping action against tapered gromading wedge of the body well beyond the termination of the resilient conduit sheath.

$\dagger$ Dimensions of liquid-tight flexible conduit as prescribed by I'nderwriters' Laboratories, Inc.

Fairmount Conduit Couplings

A

8

C

Iron couplings used for making connections between conduit, pipe and bends. Various types and sizes available.
Prices on request.

Fairmount Cast Iron Bends

TYPES 3R ANO $3 L$

TYPES 2L AND 31/2L

TYPES 3-64 AND 3V2-64.

Six types of iron bends available for making turns in subsidiary ducts of underground conduit construction.

## Conduit Running Thread Pipe

## 3-Foot Lengths

A real convenience to the contractor where indefinite dimensions are encountered.

Can be cut to length to meet different installations.
Type A: Raw Black: threads raw black.
Type B: Raw Black; threads electro-galvanized.
Type C: Ilot-dip galvanized; threads electro-galvanized.
When ordering, specify Type desired.

Conduit Pipe Products Nipples Hot Dip Galvanized

Underwriters' Labeled

Provide fast casy assembly.
Make light, weather-and corrosion - proof assemblies.

Clean, accurately cut threads. Starting threads correctly chamfered.

## Steel City Conduit Enlarger

$1 / 2$ to $3 / 4$-Inch
Unit package 25, standard package 100. Weight per 100, 9 pounds.
No. $1326 \ldots . . .$. . Std. Pkg., Per $100 \$ 19.40$

## Appleton Tiger-Grip Bondnuts <br> Schedule LB <br> Galvanized Finish Only <br>  <br> $1 / 2$ - and $3 / 4$-Inch

Provide a lock-tight spring action between threads and the surface of the box. Sharp, beveled teeth cut into the outlet or switeh box, insuring positive metal-to-metal grounding.

Bondnuts lock with a firm, permanent grip; will not slip or loosen through vibration.

Shoulders permit tightening from all angles, with fingers, pliers or wrench.

Thorough cadmium plating eliminates rusting.

T\&B Threadless Couplings and Connectors

## For Heavy Wall Conduit

Approved by Underwriters' Laboratories

Coupling

Connector

For standard rigid conduit. Easy to tighten: made ready with fingers-then a turn with a wreneh and the connection is permanent. Made of malleable iron and steel.

## Couplings

## T\&B Couplings and Box Connectors <br> For Electrical Metallic Tubing

Formed steel ribhed glands, with opposite faces parallel. Easily lightened with wrench or pliers.

Raintight

T\&B Tite-Bite $\circledR^{\circledR}$ Combination Couplings

Approved by Underwriters' Laboratories

To connect flexible conduit and standard threaded rigid conduit. 'T'ite-l3ite saddle holds flexible conduit secerely with a double grip.

With a Chase Vipple this fitting will connect tlexible conduit to out!et boxes, allowing more wiring space in the box than the usual connector.

O. Z. Split Couplings

Type SP
A union for joining conduit on indoor installations where conduit cannot be turned or where space is limited.

It can be slipped over the conduit when in the open position to permit butting of ends of conduit.

T\&B Short Elbows
For Standard Rigid Conduit
Approved by Underwriters' Laboratories
Threaded
TSB Short Elbows ( $90^{\circ}$ Angle Adapters) are well bushed, with clean machine-cut threads. Malloable iron, Tabolite galvanized inside and out.
Conduit sizes: $1 / 2$-inch to 2 -inches.

*Holes accommodate maximum size cable according to code.

Note-Set screw type fittings for threadless conduit car be furnished. Can be supplied for thin wall conduit (E.M.T.) and fibre conduit on request at additional charge.
Holes other than standard can be drilled according to specification.

For hot dipped galvanized finish add $25 \%$ to price.

## O. Z. Insulated Bushings

Threaded Type

Set Screw Type

capped. In set screw type, the bushing is securely fastened
to conduit by case-hardened cup-point set screws.

These bushings, using bakelite as an insulator, will prevent disastrous grounds. The insulating material is molded and locked into the casting of high grade malleable iron. All are

## Snap-In Blanks and Bushings

For closing up knockouts in outlet and service boxes, meter loops, drop cord eovers, electric sign letters, etc. Snap in like a glove fastener. Neat, one-piece design; occupy little space in box. Thoroughly rust-proof.

Bushings: $1 / 2$-inch size takes single-braid rubber covered wire up to No. 8; 3/4-inch size takes double-braid up to No. 4.

## Appleton Sill Plates

## Schedule OF

For Service Entrance Cable
Provides metallic protection at the point where the service entrance cable enters the building.

Eliminates unsighty bends, making a neater, safer installation.

Dade of aluminum and furnished with two hot dip galvanized serews.
Can be furnished with Duxseal weatherproof eompound for filling and sealing the entrance hole. Compound is compressed around cable, and fills up the hole when the sill plate is sorewed down. Pormits hole to be drilled on a downward angle and allows longer sweep bends to be made in cable.

## Appleton Entrance Cable Fittings

## Entrance Fittings

Schedule OF
For Underwriters' Types SEA or SEU (Oval) Cable

For use with oval bare neutral concentric service entrance cable and for oval armored service entrance cable.

Combine greater convenience with increased weather protection. Oncpiece cast bodies eliminate need for fastening a separate cover on top of

OF-2 entrance head; eliminate danger of losing covers.

Clamping plate secures cable, locks insulating covers in place, and provides slot for passage of ground wire.

Only two screws are loosened and retightened in making installation.

## Cable and Conduit Hangers

Made of zinc-plated steel or Everdur alloy.

Quichly and easily put in place.
Open wiring, conduit and cable may be run rapidly and arranged compactly.

For voltages above 5.50 volts, the hanger should be used with insulating bushings.

Korns Conduit Supports

Galvanized or Black Enamel Finish

Edge Type

Edge Type

For attaching conduit easily and securely to sterl framework without drilling holes.

Eliminates the neressity of designing sperial rigging for either pernament or temporary work.

Made of malleable iron with a piece of tool sterl inserted into one end. Edge of tool steel bites into structural stere member to which it is attached, providing a mon-slip grip.

## T\&B Conduit Supports

Approved by Underwriters' Laboratories

## Malleable

Will fit any beam flange up to 5/6 inch thick. Pointed set screw bites into the leam, insuring permanent tightness and a good electrical ground.

Tough, malleable iron body holds standard rigid conduit or E.M.T.

## T\&B Adjustable Conduit Hangers

## Approved by Underwriters' Laboratories

Will fit any flange from $23 / 4$ to 12 inches. They are universal in the range of beam flanges they fit, the number of pipes they accommodate, and the various angles at which the pipe may be run.
Adjustable for varying plaster lines, and will support any number of conduits, from one to eight.

## T\&B Disconnect Hangers

Approved by Underwriters' Laboratories
Provides a safety disconnect for light and power circuits. Designed primarily for mereury vapor lighting units. Can be used equally well with other types of industrial lighting fixtures.

Each hanger consists of a locking hook with 10 -amp., 2.50 -wolt polarized receptacle and a bushed loop.

Made of tough malleable iron, they support the fixture or pendant outlet and cannot be unhooked until the plug is out and the fixture "dead." The plug closes the hook so the loop cannot be removed while the plug is in place.

## Sherman Heavy Duty Cast Ground Clamps

Listed by Underwriters' Laboratories, Inc.

For copper water pipe connections. Fits $1 / 4$ to $3 / 4$-inch pipe and $1 / 2$ to 1 -inch ground rods of any shape or material. Body of cast copper alloy, no loose parts to handle.
No.
Carton
Standard Package 100
Weight per 1000. 260
Per 100
$\$ 36.11$

## O. Z. Insulated Bushings

## Grounded Type BL.

These are standard insulated bushings equipped with combination lug, and can be used for through type ground conneetions as well as for end use.
They afford the protection of insulated bushings and provide a means of making quick, positive ground connections. The insulating material is molded and locked into the casting of high grade malleable iron. A cup point set screw locks the casting in any desired position. Cadmium plated.

## Mueller Ground Clamp

The exclusive patented feature of a l-shaped cross section in combination with a l-shaped clamp gives rigidity and effectiveness to the Clampipe.

The Clamlipe will not bend or lop over when applied to a pipe. The point of the large case hardened screw, culs through rust, paint or corrosion into clean, fresh metal, insuring a good contact. The Clamp may be installed on a pipe lying flush against a wall. Will not spread open. Applicalle to pipe $38^{\prime \prime}$ to $13 / 8^{\prime \prime}$ outside diameter.
Packed 10 in a bex.
No. 58

# Appleton Ground Fittings 

Schedule GF
For Grounding Service Wire and Conduit Systems
Cadmium Finish
Type GCH

For No. 8 or No. 6 Bare Armored Ground Conductor
Made with adjustable top clamp to accommodate No. 8 or No. 6 bare armored ground conductor, and for arounding to $1 / 2,3 / 4$ or 1 -inch water pipe or 1 -inch ground rod.

| Size of Water Pipe Inches | $\begin{aligned} & \text { ctn. } \\ & \text { aty. } \end{aligned}$ | $\begin{gathered} \text { stad. } \\ \text { dug. } \end{gathered}$ | Std. Pkg WI. Lbs | ${ }^{\text {Per }} 100$ |

## Type GCAR

## Swivel Type-Adjustable

Adapted for No. 8, 6 or 4 BdS armored ground wire.

Takes wires No. 8, 6 or 4 either solid or stranded. The wire fastening deviee consists of a $3 / 8$-inch bolt with a $1 / 4$-inch hole throught it. In connecting the wire, put the end of the wire through the hole in the bolt, then tighten the nut, clamping the wire with the bolt. Miade of malleable iron.

| 1/2, 3/4, 1 | 1 | 5 | 25 | 10 | \$104.00 |
|  | pe FG Flexible |  |  |  |  |

Has an 8-inch flexible copper strip that can be bent, twisted or turned into any position. Particularly useful where water pipe or ground rod is not casily accessible. If the ground conduit should by ehance be a little too long or too short, the flevible strap can be formed to meet the conduit. Furnished with vise-grip clamp.

Solderless, adjustable type, furnished with "V" shaped clamp.
Fits any $1 / 2$-inch ground conduit and takes $1 / 2$ to 1 -inch ground rod.

Can be bent, twisted or turned into any position.

## Bonding Meter Ring

## Type GR

Designed for grounding the meter box to a driven or artificial ground, when a water pipe or other grounding electrode is not available in the building.
Meter ring is placed between the watertight connector and the meter box, after which the ground wire is placed through either the vertical or horizontal hole and the screw is then tightened. This makes a good tight connection and a positive bond; requires no soldering.

## Type GCH with Clamp Connection for Ground Conductor

For Nos. 8, 6 or 4 Armored or Unarmored Ground Conductor.

In this type the grounding conductor passes through the bolt and is clamped between the under side of bolthead and upper face of square cavity. A set serew holds armor in place and effectively grounds it to clamp. Walleable.

For Nos. 8, 6, or 1 Unarmored Ground Conductor and No. 2 Solid Copper Wire. GCH91 $1 / 2$ to $1 / 2$ to $1 \quad \$ 1.60$

Type GCE Strap Clamp Terminals

## Type GC Strap Clamps

For bonding and grounding equipment in wiring systems.

## Type GC Grounding Straps

For bonding and grounding equipment in wiring systems. Flexible Copper.

No. GC100 1 to 10 Coils of 50 Ft.
Each. . per Coil $\$ 44.75$ No. GC100 11 to 25 Coils of 50 Ft . Each. . per Coil $\mathbf{4 0 . 6 0}$ No. GC100 26 to 50 Coils of 50 Ft. Each. . per Coil 38.50 No. GC100 51 or More Coils of 50 Ft. Each. . per Coil 37.50

## T\&B Ground Fittings

## Hub Type

Approved by Underwriters' Laboratories
Complete fittings, consisting of hub and waterpipe clamp. Available with hub for grounding standard rigid conduit, or with hub for use with armored ground wire. Each size waterpipe clamp makes positive ground connections quickly and neatly on a range of pipe sizes.

## For Standard Rigid Conduit Fixed-Length Hub

Solderless grip takes ground wires from No. 8 to No. 2 A.W.G.
Tongue of ground wire clamp, extends into hub, protecting ground wire against mechanical damage.

IUub has 8 -inch length of No. 4 wire, forming a flexible connection of variable length, between end of conduit and waterpipe.
Wire, fastened to waterpipe clamp with a solderless grip, can be bent to position or varied in length to meet installation conditions.

## T\&B Ground Fitting Parts

## Approved by Underwriters' Laboratories

The interchangeable hubs and waterpipe clamps listed below will assemble to do any type of grounding job required for condnit, armored wire or unarmored wire ground connections.
Waterpipe clamps are complete ground fitlings for unarmored wire.

T\&B General Purpose Ground Clamp
Approved by Underwriters' Laboratorles

No. 3846

No. 3847

Cast from enduring bronze or malleable iron. No loose parts and only one serew to tighten.

Easy to install in dark corners.
Powerful jaws make a positive pround, yet cannot crush copper tubing.

Fits $1 / 2$ to $3 / 4$-inch copper tubing or waterpipe; $1 / 2$ to 1 -inch ground rod.

## Burndy Grounding Connectors

This wide variety of connectors for grounding are designed and manufuctured as accurately as those which are called upon to carry current continuously. They are cast of high copprer alloy and assembled with durium hardware. High strength and corrosion resistance are combined to provide permanently tight connections which may be buried as required. The allbronze non-magnetic construction is also advantageous in the safe conduction of high frequency oscillatory lightning discharges.

The reliability and convenience of using these comectors for grounding is witnessed by the fact that they are specified in grounding standards of leading utilities and consulting engineers in the refining. mining and chemical indust ries.

## Burndy Ground Connectors

Type GB

## For Cable To Flat Bar

For clamping ground lead cable to supporting flat metal surface or equipment casing. Head of bolt has oval shank to prevent turning. Only one wrench reguired for installation.

Cast copper alloy body accommodates a range of cable sizes. Bolts, muts and washers made of high strength, corrosion resistant silicon bronze.

A standard silicon bronze bolt will grip 1/4-in. bar. For hovier bar longer bolts will be supplied on request.

## O. Z. Ground Connectors

Type "ABG"

Right Angle

Parallel

A high strength copper alloy ground connector connecting a ground wire either parallel or at right angles to a ground rod or pipe. A positive ground is assured by the clamping pressure that can be applied by the high strength silicon bronze U-bolt, nuts and lock washers.

## T\&B Duplex Clamp Connectors

Approved by Underwriters' Laboratories
Designed to accommodate two armored cables in the same knock-out-saving labor, time and materi als.

Fitting has a single opening. Both cables securely clamped by a single screw.

Made of malleable iron, Tabolite galvanized.

Ilolds, 14W2, 14W3, 12 W 2.

## Appleton Guy Wire Conduit Clamps and Box Supports

For Rigid Conduit (Heavy Wall) and E.M.T.
Schedule OB

Outlet Box with 17210 Outlet Box Support and 17200 Clamp

For use in industrial plants having irregular or high ceiling construction making it necessary to suspend the conduit system at a practical levol. Box supports are equipped with $3 / 8$-in. fixture studs. Galvanized finish.

## Guy Wire Conduit Clamps

Standard package, 100.

Finish-Malleable iron cadmium plated. For hot dipped galvanized add $2.5 \%$ 10 price.
Can be furnished for thin wall conduit (E.M.T.) and fibre conduit on refluest at additional charge.

When ordering, specify type of conductor, number of conductors in conduit and outside diameter of each.

## Split Type D

For use where the cables are already installed in the conduit.
I se with two or more standard rubber, synthetic, plastic, varnished cambric or lead covered cables.
When ordering, sperify type of conductor, number of conductors and outside diameter of cach.

| No. | Conduit, \|n. | $\begin{aligned} & 2 \text { to } 1 \\ & \text { Same Size Wires } \\ & \text { Each } \end{aligned}$ | $\begin{aligned} & 5 \text { or More, or } \\ & \text { Different Size Wires } \\ & \text { Each } \end{aligned}$ | WI., Ea. Lbs. |

Types CIN and CAN are same as types CI C. and CAC except with conduit threads in top of body for the extension of conduit or greenfield comector.
*Finish-Matleable iron bodies, cadmium finish. For hot dipped galvanized add $25 \%$ to prices.
When ordering, specify size of conduit, number of conductors, diameter over lead sheath and dianeter over insulation under sheath.

## O. Z. Cable Terminators <br> Types CLC and CLN <br> For Lead Covered Cable

No. CLC

For use with a multiple or a single conductor cable.
This fitting seals the cable and grounds the lead sheath. The body of fitting screws directly on the conduit, clamping the lead sheath to a bronze belling ring which has been previously set into the end of the conduit. Fittings available with taping cones; filling compound not included.

| Type "CLC" With Cover |  | Type "CLN" No Cover |  | Cond. In. | $\begin{gathered} \text { Max. } \\ \text { Cable } \\ \text { Diam. In. } \end{gathered}$ | Diam. | Oyerall Ht. In. | Wt., Ea. Lbs. |

| CIC600 | 33.85 | CLN600 | 26.50 | 6 | 4.50 | 25/8 | $67 / 8$ | 19.0 |

Note-Type CLN is same as Type CLC, except with conduit threads in top of body for the extension of conduit or greenfield connector.

Finish-Malleable iron, cadmium plated. For hot dipped galvanized add $25 \%$ to prices.

When ordering, specify size of conduit, diameter over lead sheath, number of conductors and diameter over insulation of individual conductors.

This compact device permits termination of the cables and the sealing of both conduit and cables outside of cabinets without disturbing the installed conduit.

Con be used as a terminating and sealing fitting or a pulling and splicing chamber.

Filling compound not included.

## O. Z. Interlocked Armor Cable Terminators

Type "PK"
The "PK" is used to terminate and ground inter-
 locked armor cable. Can be used with cable entering at hottom, top or side of cabinet. Can be installed in a standard I.I.S. knockout, sliphole or drilled and tapped entrance.

A complete line of interlocked armor cable terminators and splicing fittings are also available.

## T\&B Cable Clips

## For Armored Cable

Made of galvanized round steel wire. Needle sharp points will stick even in hard wood when pushed in with the fingers. Will hold 14-2, 14-3, 14-4, 12-2, 12-3, 12-4, 10-2, 8-1, 6-1, 4-1; Lead 14-2, 14-3, 12-2.

| No. | Size | std. | Wt Lbs $\text { Per } 100$ | $\begin{aligned} & \text { Per } \\ & 100 \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| 90 | $3 / 8$ | 10,000 | 11/4 | \$0.59 |

## For Non-Metallic Sheathed Cable

All inside surfaces are rounded to prevent damage to cable. Shorter than Cat. No. 90, this clip suits the smaller diameter of unarmored cable. Will hold $2 \# 14,3$ \#14, $2 \# 12,3 \# 12$, 2 \#10, or 3 \#10.

## Steel City Combination Box and Bar Sets

 GalvanizedFor Armored Cable, Non-Metallic Sheathed Cable or Loom, and Rigid Conduit

## 31/2-In. Octagon Boxes-11/2-In. Deep-18-In. Bars

All bar sots listed below are assembled on bar with 3 6-in. malleable iron stud with wing-nut.

## 4-In. Octagon Boxes-11/2-In. Deep-18-In. Bars

Bars of clamp boxes are assembled through the $3 / 8$-in. madleable iron stud and two straps formed from the loottom of the box. Stud has no wing-nut; set-screw through center of stud is used only to hold box in position on bar.

Clamp boxes have four $\frac{21}{32}$-in. pri-outs in sides and bottom al clamps, permitting entrance from either sides or bottom of box. One K.O. for $1 / 2$-in. conduit in each of two opposite sides.

## Combination Boxes

With Side Mounting Ears

No. 560LXE

No. 561LXE

Boxes with side nomming ears meet the requirements of many territorios where the installation of outlet amd combination boxes require furring strips at each ceiling outlet to support cut ends of laths.

As furring strips alford an ideal support for outlet lowes, the momenting cars permit boxes to be attached directly to the strips and eliminate the additional expense of bar hangers.

Boxes with moumting cars will not tip or rock after installation, avoiding the hazard of cracked plaster.

All boxes are $11 / 2-\mathrm{in}$. deep.

VB Bracket Switch Boxes-No Lath Support

No. 95VB

No. 44VB

No. 383VB

Simplifies the electrician's work in installations using wall board or veneer board. The flat type "VB" Bracket spotwelded onto the long side of a Standard Switch Box, provides an easy means of solidly mounting the switch box to the wide side of a two-by-four, eliminating the need for channeling out the wall board or the studding. The "VB" Bracket Switch Box is easily fixed into place so that the edges of the switch box cone perfectly flush with the outer surface of the board.

May be used under $3 / 4$-inch Celotex or boards having a thickness up to $7 / 8$-inch.

44VB boxes have two ${ }^{21} / \sqrt[2]{2}$-inch knockouts in ends and sides; one $1 / 2$-inch knockout in bottom for conduit.

95 VB box has two $21 / 32$-inch knockouts in end corners.
383VB box has two ${ }^{21 / 62}$-inch knockouts in ends, two ${ }^{21 / 32-}$ inch knockouts in sides, and four $21 / 52$-inch and one $1 / 2$-inch knockout in bottom.

## Appleton E-Z-In Switch Box Supports

For mounting switch boxes to beaverboard, sheetrock, metal laths, ete or old house wiring using lath and plaster. Will take standard switeh boxes of any number of gangs.

Cut opening in wall just large enough for switeh box, insert E-Z-In Switeh Box Support, one on each side of opening for switch box and bend over the two projections against the wall on the outside which serve to fasten the Switch Box Support temporarily until the box is inserted.

Insert Box in wall in the usual manner, press ears of box firmly against the wall, then while still pressing against box, bend the projections of the Switeh Box Supports down over the sides into the box, securely anchoring the box in the wall constructed of any material. It is unnecessary to countersink the ears of the box and no serews are required. The switch or receptacle plate will lie flat on the surface of walls.

Hinged Cover Junction Boxes Type H3200 Weatherproof Surface Mounting NEMA III, IV, V

Standard Construction: Cast Iron Box and Cover; Hot Dip Galvanized finish; Retained rubber gasket; Brass with bronze hardware.

Special Construetion: Drilling; Tapping; Bosses for five threads; Mounting lugs; Interior buttons; Special gaskets; Hasp.

Retained rubber gasket, adequate pressure hinges and brass wingnut provide thorough weathertight and dust-tight closure. Bossed and tapped conduit entrances recommended. Nounting lugs for ease of installation. Ideal for enclosing panels, transformers, relays and many diverse types of electrical equipment.

Hope Cast Iron Boxes
Underwriters＇Laboratories Approved

Sidewalk Boxes Type H5800
Weatherproof Flush Mounting NEMA III，IV，V

Standard Construction：Box，Flange and Cover of cast iron；Hot Dip Gialvanized finish；Rubber gasket；Monel hardware．

Special Construction：Drillings；Tappings；Bosses for five threads；Special gaskets．

H．5800 type boxes widely installed in sidewalks and walk－ ways of bridges，dams，tunnels，approaches and airports． The checkered non－slip cover，flush with finished concrete． is cross－ribbed for heavy pedestrian trallic．Flanges and covers are replaceable without disturbing box and conduits when heavy velicle damages installation．Monel cap screws， set down in counter－bore，assure weathertight clostre．

Hope Cast Iron Boxes
Explosion Resisting Housings Type H6000 Class I Group D Surface Mounting NEMA VII

Standard Construction: Box and Cover of cast iron; Hot Dip Galvanized finish; Metal to Metal joint; Two mounting lugs each long side.

Special Construction: Five thread tapping; Bosses with five threads; Interior mounting buttons; Bronze hinges.

Manufactured to the standards of the Underwriters' Laboratories but not tested by that agency. Specifying engineers recognize the rugged construction with bolt-on type covers as wholly adequate for installation in Class 1 hazardous locations of explosive vapors in refineries, chemical and powder plants, paint, varnish and solvent manufacture.

## Hope Cast Iron Boxes <br> Terminal Cabinets Type H3200-T Weatherproof-Dust-tight Surface Mounting NEMA III, IV, V

Standard Construction: Box and cover of cast iron; Hot Dip Galvanized finish; Retained rubber gasket; Mounting lugs; Brass with bronze hardware; Terminal blocks mounted on buttons.

Special Construction: Drilling; Tapping; Bosses for five threads; Special gaskets; Hasp.
Hinged terminal cabinets enclosing rugged terminal blorks in a variety of sizes to meet differing wiring conditions. The blocks, rated at $30 \mathrm{amps}, 750$ volts, are mounted on blind tapped buttons raised above back of box to provide air gap: each has white target strip for marking circuits. Ample wiring gutters. Ideal for thermocouple and telephone circuits; instrunientation.

## Series "GR"

Explosion-Proof and Dust-Tight With Regular Threaded Hubs
Furnished with External Threaded Surface Covers

Type GRE

A small, compact junction fitting $35 /$-in. diameter, 25/8-in.high, with cover hav. ing external threads. Has five threaded hubs, one in each of four sides and in bottom. Four hubs have close-up plugs and one hub open.

|  | Size, | Wt. Lbs. |  |
| :---: | :---: | :---: | :---: |
| No. | In. | Per 25 Pcs. | Each |
| $\mathbf{4 0 0 9 4}$ | $1 / 2$ | 19 | $\mathbf{\$ 3 . 7 5}$ |
| $\mathbf{4 0 0 9 5}$ | $3 / 4$ | 19 | $\mathbf{3 . 7 5}$ |

Type GRUJ-2
With Cover Removed Showing
Close-Up Plugs In Certain Threaded Openings
This is a Universal litting and can be used as a junction box because practically any combination of outlets can be made with the use of close-up plugs, reducers and connectors.
The GRUJ-2 and GRIJ-4 have 4 conduit hubs on back which are on the same centers as the knockouts in a 4-in. square outlet box No. OB-4S, commonly known as the 1900 box. As many old gasoline pump wiring installations are made with conduits entering through the back hnockouts of the 1 -in. square outlet box, changing over to an explosion-proof installation is comparatively easy. It is only necessary to remove the old outlet box, attach union connectors to the existing conduits and make connections to the unilet. Requires no cutting or bending of conduits to meet the openings in the unilet.

## Appleton Unilets

## The " 35 " Line

Threaded type in all popular styles. Sizes $1 / 2$ to 6 inches.

Unbreakalle malleable iron castings, clean-cut in every detail, smooth and free from scars, holes and blemishes. Cadmium finish insures positive resistance to rust and corrosion.
Have no cover car lugs and can he used where specifications require fittings without ear lugs. Wide, flat cover surfaces, drilled and tapped at each end for cover serews.
Conduit hub edges are chanfered assuring straight and accurate tapping-no sharp or rough edges.

Blank metal covers are reinforced and slightly raised.
Poreelain and composition covers are perfectly flat and smooth.
Moulded receptacles are specially designed for convenient and easy wiring.

Threaded types listed below; for information and prices on NoThread types, contact Graybar.

No-Thread type in all popular styles. SIzes $1 / 2$ to 6 inches. For complete information, contact Graybar.

## Appleton Explosion-Proof Expansion Unions

For Class I, Groups C and D;
Class II, Groups E, F, and G
Listed by Underwriters' Laboratorles, Inc.

## "UNY" Series

These completely new Lixpansion Unions are more compart, are saffer and easier to install than conventional union fittings.
I nion is shipped as one assembled unit, and is never taken apart, either during installation, or while performing maintenance after initial instalation.
The reduced external diameters permit casy installation in places where yom might ordinarily encounter difliculty.
The union remains completely explesion-proof at all times, regardless of its position (full retraction to maximmen extension, or any point between).

The close tolerances to which these unions are manufactured and a specially designed phosphor-bronze spring insure pesitive grounding at all times.

# Appleton Explosion-Proof Lighting Fixtures AA51 Series - Vented Type With Reflectors 

A new explosion-proof design, featuring improved vented design, safer and casier installation and maintenance, increased light output and cooler operating temperature.

Canopies are standardized; interchangeable for any size fixture in the line, 100 - to 500 -watt, without rewiring.

No wiring in canopies; collector ring method of energizing permits instant removal of entire fixture.

Canopy has five full threads engaged whenever contact is made or broken . . . confining any ares in approved explosion proof method, even if fixture were accidently left energized during maintenance.

Entire lower edge of hood serves as a continums louver, and interiors are of porous metal, providing even heat distribution and lower operating temperatures. Gives longer bults life.

Malleable iron, cadmium finish on Ceiling Unilets; aluminum, satin finish on Canopy, Globe IIolder and Guard. Ilood is steel. Type AAC has explosion-proof junction fitting, with four threaded huls for $1 / 2$ and $3 / 4$-in. conduit-three of which have close-up plugs.

Refloctors are porcelain enameled, green outside, white inside.

# Appleton Vaportight Lighting Fixtures <br> Series "V-51" Convertible <br> For use with Rigid Conduit <br> (Heavy Wall) 

These fixtures have been re-enginecred throughoul and incorporate advantages to the user beyond all previons designs.

Relamping is simple, and removing or replacing reflectors is a matler of seconds - no clamps or set screws, no tools required.
Valleable Iron Unilets - $1 / 2$ or $3 / 4$ in. huls in pendant, ceiling or bracket types. Ilas vaportight gasket; connecting block with line wire terminals and spring leaf contacts for globe adapter. Takes either 100 watt or 1.50 200 watt adapters.

Globe Adapter
Die cast aluminum; 100 watt and $150-200$ watt sizes; complete with shock-absorbing socket : collector ring assembly; vaportight gasket. Threaded for Navy standard globes; t wo cavities to receive snap-type guard.

Keflector - Steel, with green porcelain enamel exterior and white interior. Standard dome, shallow dome, deep bowl or angle types.

Neoprene Rubber Ring - Attaches reflector to Unilet with slight twisting pressure ... cushions against vilration.

Guard - Die cast aluminum, with two sealed ball plunger units that suap securely into cavities in globe adapter. When turned counler-clockwise, the guard acts as a tool for easy removal of adapter and globe assembly.

# Appleton Type EFUX Explosion-Proof X-Ray Film IIluminator <br> With Explosion-Proof Switch <br> Class I, Group C and D <br> To Take Two 15 Watt T-12 Fluorescent Lamps Furnished with 110-125 Volt 60 Cycle Ballast 

The Type "EFOU" Expho-

Type "EFUX", Explosionproof X-Ray Film Illuminator, llush mounting in tile wall sion-proof X-Ray lïlm Illuminator is designed for thosh momuting in Itospital Operating Rooms.

The fixture is compact and includes an Explosion-proof switch which eliminates the need of an additional switch I nilet. The handle of the bx-plosion-proof' switeh extends through the pancl within eonvenient reach of the operator. Glass cover pamel. Four chrome plated roller elips at top of glass to hold the X-Ray film. Two extended hinge elips support the wet filn loolder. A drip tray can the casily adapted to two of the four lower clips which hold the panel.

A threaded hub for $3 / 4$-inch rigid conduit is provided in cabinet. 'Two cabinet styles, one shallow and one deep, are available as illustrated in dimensional drawings below.

When installing, the metal cabinet should first be mounted in the wall. The fixture is mounted in cabinet with the use of a union (which is furnished). Line wires are connected to the connection bock located under screw cover in lower housing. All other wiring and sealing is completed at the factory.

To relamp, renove switch handle, loosen one cover screw and remove plastic, glass panel cover. 'Tip, fixture out of the rabinet by releasing tension of spring clip (no tool is necessary for this operation) then remove screw cover and pull out lamp.

Type "EFUX'' Explosion-proof X-Ray Film Illuminator with cover removed

The Type "EF: X" Exphosion-proof X-Ray Film Illuminator is designed for boftom entrame of eonduit, however the complete unit can be inverted when momed in the wall to allow for conduit entrance at the top. When cabinet is momed with hob at top, the switeh handle will be at the bottom. If a drip tray is to be used on inverted instatlation. specify and a handle with an extension is included. This handle is located under the drip tray for easy ellow operation.

# Appleton Type EFUX Explosion-Proof Duplex X-Ray Film Illuminator With Explosion-Proof Switch 

Class I, Groups C and D
To take four 15 Watt T-12 Fluorescent Lamps
Furnished with 110-125 Volts $\mathbf{6 0}$ Cycle Ballast
Type "EFUX" Appleton Explosion-proof Duplex X-Ray Film Illuminator is similar in construction to the regular type "EFI X", except that the cabinet and cover are wider to accommodate two units, each to take two 15 Watt T-12 fluorescent lamps.

# Appleton Fluorescent Lighting Fixtures 

## Type EFU - Explosion-Proof

Class I, Groups C and D
Class II, Groups E, F and G
Made in Two Sizes: For use with Two 40-Watt, 48 in. T12; also for Two 100-Watt, 60 in ., T17 Fhrorescent Lamps.

Explosion-Proof Fluorescent Lighting Fixture suspended more than 12 inches from fixture canopy, with "GRU" Flanged Unilet, Fixture Canopy and Type "ESD" and "ESS" Swivels

Modern fluorescent lighting for hazardous locations.
Hospital operating rooms, volatile fuel and chemical refineries, powder manufacture and shell loading, flour and grain mills are a few of the many locations where fluorescent lighting can now be safely applied.

The advantages of fluorescent lighting include new working comfort due to low brightness and lack of glare: high efficieney when compared with incandescent lamps of efual wattage and the ever important saffty of operation in explosive atmosphere due to cooler operating temperature.

They are designed to be suspended horizontally or at 45 degrees. No external seals are necessary as all seals and internal wiring are completed in manufacture. Line comnections are made to terminal bloch in junction chamber.

Are casily relamped by lowering at chain end (if an extra 3 in , of chain is provided when fixtures are installed). Relamping from either end is possible by swinging fixture out of line with the use of a Type "ESS" Swivel.

The National Electrical Code. Article 500, calls for flexibility in the form of a fitting or flexible connector to the used when lighting fixtures are suspended more than 12 in . from fixture canopy. Types "ESS" and "ESD" Swivels shown in illustration above will give the fixture this llexibility.

Standard equipment of all Appleton Fluorescent Lighting Fixtures includes the following:
lligh power factor two-lamp ballast.
Necessary auxiliary equipment.

Two-piece reflector, with high-reflector factor; Inside white, outside gray.

Reflectors - B/F Steel; White Inside, Gray Outside Ballast Size: One Two-Lamp of 95\%'Power Factor LAMPS ARE NOT INCLLDDED

## Appleton Unilets

## Malleable Iron, Cadmium Finish

## Series "AL" - Flexible Fixture Hangers

## For Pendant Fixtures

(Threaded Stem takes $1 / 2$ in. or $3 / 4 \mathrm{in}$. Rigid Conduit)
Designed in two styles - Ball and Cushion - and provide a flexible suspension for electric fixtures.
The suspension is from a universal joint which permits the fixture to swivel to an angle of 20 degrees in any direction from the perpendicular and assures the fixture hanging plumb at all times. This also prevents breaking of fixture stem at point of suspension caused by unusual strain, accidental or otherwise.

## Appleton Unilets

## Series "ER"

Malleable Iron, Cadmium Finish With Threaded Hubs
(Dotted lines in bottom of illustrations indicate hubs)

## Explosion-Proof and Dust-Tight Fittings

Designed in the rectangular shape to provide as narrow a fitting as practical with ample wiring space. For use as a junction box in all hazardous locations. Cover and Unilet body have a ground surface where the two parts join each other. Covers attached by screws, which are fixed in place to prevent loss when installing. Hubs threaded standard for conduit.

Form 1

Length exclusive of IJubs $51 / 2$ in.

# Appleton Panelboards 

For Class I，Groups C and D； Class II，Groups E，F and $G$ ；and Class ili，Hazardous Locations

Type＂ELP＂
Explosion－Proof and Dust－Tight

Complete with Connectlon Block and Thermotype Circuit Breakers
15， 20 and 30 Ampere Ratings

Designed as a convenient control and distribution center for lighting circuits or single phase motor circuits．Has many im－ provements，such as lighter weight，simplified wiring installation， casier aceess for inspection or maintenance，new locking switch handles，provision for identifying circuits，etc．Wired complete－ factory wiring terminates in a connection block located for field conneetions．

The 4 to 8 circuit panelboards have a $11 / 2 \mathrm{in}$ ．main center lub， a $11 / 2 \mathrm{in}$ ．side loub，and seven 1 in ．hubs for branch circuits； For installations requiring bottom or straight－thru feed a Special Junction Box Unilet can be furnished．

The 10 to 16 circuit panelboards are furnished complete with Center Junction Unilet having two 3 －in．hubs allowing for top or bottom entrance or straight－thru feed；one 3 －in．close－up plug furnished for unused conduit opening．
＊ 14 to 16 Circuits，Single Pole； 8 Circuits Double Pole
Wiring System

## Appleton Unilets <br> Series "EFS"

Motor Control Push Button Stations Explosion-Proof and Dust-Tight

Complete with Momentary Contact "Start-Stop", Switches. With Threaded Ituhs.
Two-lhatton Start-Stog Switch - 5 Amp.
bin olls A-C Maximum
Circuit - I Normally open - I Normally Clesed
Unilet Malleable Iron. Cadmium Finish. Size, exclusive of hubs: $4 \frac{5}{8} \mathrm{in}$. long, 3 itl . wide, $41 / \mathrm{itl}$. high.

## Appleton Lighting Fixture Swivels

 Type "ESD" - Explosion-Proof Class I, Groups C and DClass II, Groups F and $\mathbf{G}$

Designed to introduce flexibility for suspension lighting fixtures in hazardous locations.

The National Lilectrical Code. Article 500, calls for flexibility in the form of a fitting or flexible connector to be used when lighting fixtures are suspended more than 12 in . from fixture canopy.
This light wright, smooth fitting will give the fixture the flexibility to mert those requirements.

Gray Iron, Cadmium Finish.
Dimensions: $315 / 16$ in. high, $27 / 8$ in. wide.

| No. | Size In. | Wt. Lbs. Per 25 Pcs. | Each |
| :---: | :---: | :---: | :---: |
| ESD-50 | 1/2 | 86 | \$13.50 |

Quantity prices on request.

## Appleton Unilets

Malleable Iron, Cadmlum FInish
Series "CPSI" - Explosion-Proof
Dead-End Receptacles and Plugs
For Industrial Plants
15 Amp. or 1 Hp., 115 or 230 Volts, 60 Cycles A-C

For use in industrial plants where hamardous fumes and explosive atmosphere exist. The dead-end receptacle isolates the exposed, outer contacts from the live, inner contacts and allords a safety measure which proves indispensable in hazardous locations.

Type "CPSIC"
Unilet Complete
with Lift Cover
(Closed)
An extraground is furnished to carry off any accumulated charges in either plug or receptacle. Should always be installed with cover hinge in downward position.

## 2-Wire, 3-Pole

Form 5 and $10-0 . S$. Diameter $3 / 8$ in. Depth over all $41 / 8 \mathrm{in}$.

## Appleton Unilets <br> Series "CES" - Explosion-Proof Malleable Iron, Cadmium Finish

## Dead-End Receptacles and Plugs

For use mainly in commercial and industrial plants where a receptacle must comply with the safety recuirements as preseribed for fittings to be installed in explosive atmospheres.
Added salety was introduced in the development of the deadrend receptacle. That is, an intermediate, current carrying receptacle normally isolated from the line until the plug is inserted, turned to the right and seated fully; actual reestahlishment of the circuit does not take place until the plug is pushed in as far as it will go.
The I nilet body upon which the "CES" receptacle is fastened, is designed for wall mounting with a 15 degree tilt to the plug outlet. Both the plug and receptacle are ruggedly constructed of materials to stand up under wear and strain comsistent with its usage. All sliding members are made of metal. Unilets have three hubs, two of which have removable close-up plugs.

$$

Type "FSQX" Unilet
with Type "FP" Plug
This Unilet comprises an Interlocking Safety Switch and Plug Receptacle monnted in a malleable iron body, cadmium finish, with threaded type cover. The receptacle and switch are interlocked so that the plug camot be inserted or withdrawn unless the switch is in the "off" position. Likewise, the switch cannot be operated until the phig is fully inserted.

The receptacle, as well as the "FP" phyg, is polarized and the contacts are self-aligning. Wach 2 -Wire and 3 -Wire receptacle and "FP" plug is provided with an additional terminal which is expressly designed for grounding only These ground terminals are also connected with the shell of the plug and receptacle, making an effective ground throughout the entire conduit system.

Furnished complete with two fastening lugs for attaching to a wall, machine, etc. Two types are available: one having four outlets for $3 / 4-\mathrm{in}$. conduit, and one having four outlets for 1 -in. conduit. Three of the outlets are equipped with removable close-up plugs.

Type "FSQX" Unilets are furnished with Interlocking Switch and Receptacle Housing - Withont Plug. Will take Type "FP" Plugs.

## Crouse-Hinds Plugs and Receptacles

## Type BP Plugs <br> For Flexible Cable

For use with types BRD, BRG, BIRME. BRI', BKY, and plug receptacle housings. The 30 -ampere plugs are arranged for soldered terminals. The $20-a m p e r e$ plugs are equipped with binding serew terminals. Plugs so equippod with binding screw will not take wires larger than No. 12: consequently, these plugs are rated at 20 amperes. Otherwise, the 20 and 30 -ampere plugs are exactly alike.

Grounding-l'rovision is made on these plugs for an extra grounding conductor in the cable for grounding the frame of the portable device to the shell of the plag.

The grounding or safety circuit is completed through the shell of the plug, the detent spring, the receptade housing, and the conduit system. The detent spring in the recoptade has three branches, two of which make contact before and break contact after the main circuit contacts. This method of grounding is N.E.C. standard.

## Crouse-Hinds Type CPP Plugs

For Type CPS Receptacle Units Furnished with Cable Grip and Rubber Bushing

## Crouse-Hinds Plugs and Receptacles

Types CES and CESD Delayed Action
Arktite Plug Receptacle Condulets
Explosion-Proof Class 1, Group D*

## Includes Condulet, Receptacle, and Receptacle

 Housing-Takes Type CPH PlugsStyle 2-Grounded Through Extra Pole and Shell
Interchangealility: Types AP and APJ Arktite circuitbreaking plugs cannot be used with types CES and CESD delayed action Arktite receptacles. Type CPH delayed action Arktite phugs can be used with regular style 2 receptacles of the same rating and pole arrangement. This fact may be utilized in a plant having hazardous and non-hazarchous locations as follows: Types CES or CESD delayed action receptacle Condulets can he installed in the hazardous areas.

Regular Style 2 Arktite receptacles rated 30 or 60 amperes, 2 -wire, 3 -pole or 3 -wire, 4 -pole can be installed in non-hazardous areas.

Portable equipment suitable for use in the hazardous areas may he equipped with type CPII delayed action plugs. Such equipment may then be used anywhere in the plant, including the non-hazardous areas.

Portable equipment not suitable for use in such areas may be equipped with regular types AP and AP'J Arktite plugs and such equipment can then be used in any non-hazardous focation in the plant, but there is complete assurance that it cannot be connected to a receptacle in the hazardous areas.

Type CES Condu-
 lets have three hubs, one on each side and one at the top, and two threaded pipe plugs. Type CESD Condulets have vertical through feed hubs and one threaded pipe plug. There is a threaded opening in the top with a cover which may be removed to facilitate pulling wires.

## Type CPH Plugs

## For Types CES and CESD Receptacle Equipment

Furnished with Mechanical Cable Grip and Rubber Bushing.

## Pyle-National Triploc Plugs and Receptacles

Listed by Underwriters' Laboratories, Inc.

Interehangeability: The universal construction of the Triploc line permits thousands of plug and receptacte assembly combinations. The wide variety of styles and sizes allows meeting individual requirements for any portable electrical equipment rated within the capacity of the line.
Triploc contact units ( 1 to 12 poles) are all of one standard size and shape to fit in the same plug shells and receptacle housings. The line includes receptacle housings for standard conduit fittings and sheet metal hoxes. Because of the many possible assembly combinations, all phag shetts and receptacle housings are listed less contact units which must be ordered separately.
Reversibility: Either male (fuseless) or female contact units can be assenbled in the plug shetl or receptacte housing, depending upon which is the live side when the plug is withdrawn.

Automatic Loeking: Fuseless and fusible plug shells are provided with a bayonet lock which automatically engages a lock post on the receptacle housing.
Manual Release Type: Positive locking. A slight turn of the outer sleeve releases the lock.

Antomatie and Manual Release Type: Same as manual release type except lock releases with heavy strain on portable cord.

## Triploc Plug Shells-Fuseless <br> \section*{Less Contact Units}

Fit Types AR and XIR Receptacle Housings. Contact Units must be ordered separately. Use only grounded contact units when equipment ground wire is required. Take only 'Type AP' Fuseless Mate and Type AR Female Contact Units. Pressed steel, galvanized.

# Pyle-National Environmental Neptune Series 

## Electrical Connectors 7 to 100 Poles

Service "A" Ratlng
(M1I-C-5015-B operating voltage Ulmits at sea level: 700 volts DC-500 volts AC rms)

An entirely new line of electrical connectors for universal application in military and industrial use, with extraordinary new characteristics of construction and performance never before combined in compact, light, standardized connectors.
Designed to meet and exceed Class A, B, C and E of military specifications MIL-C-5015C also NEC requirements, these connectors will provide design engineers with new possibilities for power, lighting, control, telemetering and coaxial connector systems.

These connectors have been thoroughly tested for satisfactory performance under Neptune Class W conditions listed below. Being of far more rugged construction they are not interchangeable with military connectors of the AN type.

## Environmental Limits

Temperature: $-80^{\circ} \mathrm{F}$. to $225^{\circ} \mathrm{F}$. Consult factory for higher limits.
Pressure: 300 PSI External-200 PSI Internal.
Chemical Resistance: Oil. most acids and alkalis.
Corrosion Resistance: Salt spray: 300 days, no failure.
Dust Resistance: Exceeds requirements of Mil C 5015 C. Also suitable for NEC Class 11, Groups E, F and G I lazardous Locations.
Shock Resistance: 50 G Minimum. Consult factory for higher limits.
Vibration: Exceeds 20 G to Method II of Mil-C-5015 C. Humidity and Moisture Resistance: Exceeds Class E Spec of Mil-C-5015 C.
Air Leakage: Meets Class E Spec of Mil-C-5015 C.
Male Skirt Barrels with Contact Inserts

Male skirt with pin (P—Male) or socket (S-Female) contact insert as listed.

## Basketweave Grips

For above cable housings.

Information furnished on request.

## R \& S Delayed Action Receptacles, Plugs and Connectors

Type EFS-For Surface Mounting Explosion-Proof-Class I, Groups C and D 15 Amp., 125 or 250 Volts A.C.
Two and Three Wire with One Pole for Grounding Polarized

Maximum Horsepower Ratings:
Two Wire, Three Pole-1 Hp., 1-Phase, 125 or 250 Volts, A.C. Three Wire, Four Pole-11/2 Hp., 3-Phase, 125 or 250 Volts, A.C.

No. 4462

No. 4464

## Factory Sealed

The delayed action feature requires the turning of plug shell on withdrawal to allow time for extinction of the arc and cooling. Equipment grounding is provided by means of a separate pole which makes contact before and breaks contact after the circuit poles.

## Plugs and Connectors

No. 4466

No. 4804

15 Amp., 125 or 250 Volts A.C.-Polarized

Plugs and connectors are furnished with aluminum alloy cable clamp and neoprene cable bushing.

|  | Plugs |  | Connectors |  | $\begin{gathered} \text { Bushing } \\ \text { Bus } \end{gathered}$ |

$\dagger$ Catalog numbers listed are for $45^{\circ}$ Angle Type Receptacles. For Straight Type, prefix "FCll" to catalog number. Price is the same.
Enclosures - Cast iron, corrosion resisting baked enamel finish.
Gang Units - Can be furnished in gang units. Prices on application.

- Have small size flanges.

Outlets - Unless otherwise specified, furnished with one outlet top or bottom as follows: 15 and 30 amp . $3 / 4-\mathrm{inch}$; 60 amp. $11 / 4$-inch; 100 amp. $11 / 2$-ineh; 200 amp. 2 -inch. Additional or larger outlets charged extra. Maximum conduit size as listed, four way. Specify size and location.
*Ilave provision for equipment grounding through enclosure only; all others have equipment ground through separate pole.

For Reverse Service add suffix "IR" to above catalog numbers. Prices on application.

## 200 Amperes

*Have provision for equipment grounding through housing only; all others have equipment ground through separate pole.

For Reverse Service add suffix "li" to above catalog numbers. Prices on application.

## 600 Volt Service

Type FC units rated
$\mathbf{6 0 0}$ Volts, A-C.- $\mathbf{2 5 0}$ Volts, D-C.
Can be furnished in sizes from 15 to 200 ampers. Prices and information on application.

$\dagger$ Catalog numbers listed are for $45^{\circ}$ Angle Type Receptacles. For Straight "I'ype Receptacles, prefix "SCiR" to catalog number. Price is the same.

Enclosures - Cast iron, corrosion resisting baked enamel finish.

Gang Units - Can be furnished in gang units. Prices on application.

- Have small size flanges.

Outlets - Unless otherwise specified, furnished with one outlet top or bottom as follows: 15 and $30 \mathrm{amp} .3 / 4$-inch; 60 $\operatorname{amp} .11 / 4-$ inch; 100 amp. $11 / 2^{-i n c h} ; 200$ amp. 2 -inch. Additional or larger outlets charged extra. Maximum conduit size as listed, four way. Specify size and location.
*Have no provision for equipment grounding; all others have equipment ground through separate pole.

For Reverse Service add suffix "'IR" to above catalog numbers. Prices on application.

## Crouse-Hinds Condulets

Graybar distributes the complete line of Crouse-Hinds Condulets. The extensive listing on the following pages is sufficiently eomplete for most applications. When more complete information on Condulets is needed, ask your (iraybar representative or refer to Crouse-Ilinds Catalogs 3000 or 3100 .

Discount Schedule: Inless otherwise specified. Condulets carry Crouse-Hinds CD Schedule of terms and discounts. Finish: Inless otherwise indicated, the standard finish is cadmium-galvanized.
Matcrial: Unless otherwise indicated, all Condulets are made of Feraloy. a special Crouse-Ilinds alloy. Crousellinds "complete line" is more than just a range of sizes-there is a Condulet for every need and purpose.

Feraloy is a special alloy having the desirable characteristics of both cast stcel and gray iron. It is the result of many years of study and development. Feraloy possesses high tensile strength and unusual resistance to corrosion.

Condulets will be found to stand up under the trying conditions of installation and subsequent use.
(Condulets are made only by Crouse-I Iinds)

## Crouse-Hinds Condulets

Types EJB and GUB Junction Condulets With Terminal Blocks Explosion-Proof and Dust-Tight

## Class I, Group D; Class II, Groups E, F, and G; and Class III

Use: The EJB and GLB explosion-proof and dust-tight junction Condulets with terminal blocks provide convenient means for making taps of branch circuits for main feeders.

EJB1184 and EJB1185 with Main Hubs and Branch Tapping Cover Removed Showing Terminal Block

They are exceptionally useful in making up explosion-proof bus assemblies for groups of motor starters, branch circuit breakers, or combination starters and breakers. One such junction Condulet provides a means of tapping the main feeders to accommodate up to ten branch circuits.

One compact EJIB or GI 13 junction Condulet with terminal block takes the place of one or more large junction boxes at as little as one-third the cost.

Design: These Condulets are standard types EJB and GIB, listed elsewhere in this section, except that they are provided with terminal blocks.

The blocks are equipped with heavy duty cast copper alloy pressure connectors for the main feeders. They are so arrange that the main cables may be pulled through unbroken and need only be skinned where they are clamped between halves of the pressure connectors.

The upper half or top clamp of each main pressure connector is arranged for attachment of standard branch circuit wire lugs.

## Crouse-Hinds Condulets

Type ESC Pull Condulets<br>For Pulling or Splicing Conductors<br>Explosion-Proof and Dust-Tight<br>Class I, Group D; and Classes II and III

For use in hazardous locations, and designed to afford a convenient opening in the conduit system for pulling or splicing conductors.
The body is cylindrical with a long and wide opening in the front between the threaded end portions.

| Overall Length, In. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

## Type LBH Condulets <br> For Pulling Cables <br> Explosion-Proof and Dust-Tight

Parlicularly well suited for pulling large conductors or conductors that are stitl because of their lead sheathing. lispecially useful at motor locations. Covers are domed, which provides room for an easy bend in the conductor, thus avoiding undue strain upon the insulation or lead sheath.

Type ECD Drain and Breather Valves
Explosion-Proof-Class I, Groups C and D

ECD Drain

ECD Breather

The IECD breather valve is similar to the ECD drain but is designed to be installed in the top of explosion-proof housings, allowing air to pass in or out as conditions vary. The labyrinth handle is a rotating cap to prevent dirt from interfering with the action of the valve.

## Crouse-Hinds Type EC Flexible Couplings

Explosion-Proof, Dust-Tight and Watertight Class I, Group D; and Classes II and III
For use in hazardous locations where it is necessary to employ flexible fittings, as at motor terminals. Provide a safe means of making connections. They are made to withstand explosion pressures and to provide ample mechanical and electrical protection.

Also watertight, and are, therefore, suitable for use in damp lucations or under water, such as connections to underwater floodlights and fountain lights.

## Crouse-Hinds Wedgtite Hangers and Wire Supports

Type CHRP Installed Pipe Parallef With a Structural Support

Wedgtite hangers are for attaching conduits or wire hangers to structural steel members. They can be installed without drilling or in any way preparing the member. A few hlows of the hammer makes the attachment secure.

## Type CHRP

For pipe rumning parallel or at right angle to support.

## Crouse-Hinds Lighting Fixtures EV Series

## Explosion-Proof Class I, Groups C and D

Hoods are cast aluminum with etched Alzak aluminum inner reflectors. Globe holder assembly consists of clear, heat-resisting, impact-resisting, glass globe, equipped with sheet aluminum gasket and cast aluminum mounting and retaining rings. Cast aluminum guards are held to globe mounting rings by machine screws. Furnished without reflectors.

## Type EVA Pendent Type

Complete with a Condulet body for pendent mounting on a conduit stem. A set screw in hub may be tightened against unthreaded part of conduit to prevent unscrewing from conduit when relamping. May be suspended by a conduit stem from GUA or GI F series Condulets with three-inch cover opening and GUA fixture covers or canopies.

## Type EVCX-Ceiling Type

llas four threaded hubs, three of which are furnished with pipe plags.

## Type EVBX-Bracket Type

Four huls tapped for rigid conduit are provided, three of which are equipped with threaded pipe plags.

## Type VDB Fixtures With Reflectors Class III

Crouse-Hinds Vaportight Industrial Lighting Fixtures

Type VIDB is an industrial fixture of the vaportight type, designed to meet the need for a simple, effective, and inexpensive vaportight industrial lighting fixture. Fiurnished with a clear. plain pear-shaped globe. and a porcolain enameled reflector. The reflector is held to the budy by four screws.

Form 3 furnisthed with Vo. VDl33 glohe, rellector, and median base lann receptable.

Form 5 lurnished with No. VDBs glohe, reflector, and mogul base lamp receptacle.

Crouse-Hinds VM Series Vapormaster ${ }^{\circledR}$ Vaportight Lighting Fixtures

VM Series Vapor Master lightiag fixtures provide the user with greatest convenience in installing and maintaining a vaportight lighting system. A varict y of Condulet bodies in pendent, eriling, and bracket types are available. Any st yle or size V.M Vapordaster fixture can be assembled in a few seconds. All fixtures can be made up from a stock of only 33 items.

I nit construction simplifies refamping, changing reflectors, and changing from one lamp size to another; reducing maintenance time to a minimum. VM Vapor Vaster fixtures olfer a ch ce of relamping methods-replacing the lamp only, or replacing the whole assembly of lamp, glohe, and adaptor. Any Condulet body will take either a Form 100 or Form 200 adapter without disturbing wiring. Fiorm 100 VM Series fixtures take up to 150 -watt, $\mathrm{A}-23$ lamps; Form 200 up to 300 -watt, medium hase PS 30 lamps.

Features of the VM sories include: aluminum adapterguard assembly fitting all Condulet bodies; guard is part of adapter and is not removed for relamping. Stainless steel retaining spring holds reflector. Gaskets make vaportight seal between globe and adapter, reflector and body, adapter and reflector. Pear-shaped globe adds to effectiveness of shock-absorbing receptacle-lamp camot strihe side of globe. Globe clamping spring opens for relamping. Condulet body equipped with receptacle base has set screw in hub to fock on conduit. Shock-absorbing receptade has "universal" action-absorbs shock from any direction. Porcelain enameled steel reflector.

## Crouse-Hinds Fixture Hangers Type EFHC

For EVA, EVF, and DLA Pendent Fixtures
Explosion-Proof, Dust-Tight, and Weather Resistant (Raintight)
Class I, Groups C and D; Class II, Groups E, F, and $G$; and Class III

Suspension attachment for type EFIIC Condulets can be furnished for $3 / 8^{\prime \prime}$ max. diam. supporting rod or span wires. Add suffix S1 to cat. no. and \$.40 to list price.

## Crouse-Hinds AL Series Flexible Fixture Hanger Condulets For Pendent Fixtures

AL series Condulets provide a flexible suspension for electrical fixtures. The fixtures are suspended from a universal joint which assures that the fixture will hang plumb.

This universal joint permits the fixture to swing through an angle of about 20 degrees in any direction from the perpendicular.

# Crouse-Hinds Fixture Hangers For Pendent Fixtures <br> EC Series Flexible Lighting Fixture Supports Explosion-Proof, Dust-Tight, and Watertight Class I, Group D; Class II, Groups E, F, and G; and Class 111 

The National Electrical Code reguires the use of a flexible member for fixture stems tonger than 12 inches. This flexible member must not be more than 12 inches from The point of attachment to the supporting Condulet. (Section 5019 N.E.C.)
, $\quad$-inch EC series flexible fixture supports are also suitable for Class I, Group C locations. $3 / 4$-inch supports, suitable for Class I, (iroup C locations, can be supplied and are made up using hoavier flexible tubing. Add suffix D)] to the cataleg numbers and $\$ .60$ per inch of flexible lengrth.

Permit tixtures to assume vertical positions loy gravity, thus proteeting the conduit and connections from lateral stresses caused by fixture sway.

## Crouse-Hinds AL Series Flexible Fixture Hanger Suspension Attachment For Horizontal Span Wire or Vertical Support Rod

S1

## Suspension <br> Attachment

AL series flexible fixture hanger Condulets can be furnished with a malleable iron loop fastened to the top of the Condulet body to provide means for suspending fixtures from vertical support rods or horizontal span wires. The loop will take a wire or cable with a maximum dianeter of $3 / 8$ of an inch. The boss on the top of the loop is tapped $3 / 8-16$, for a threaded rod. When this suspension atlachment is required, add suffix Sl to the AL. series catalog number and $\mathbf{\$ . 6 0}$ to the list price.
Cushion Hangers for fixtures weighing up to 61 lbs . can be furnished. Information on request to Graybar.

## Types UNJ and UNJC

For supporting pendent fixtures so that they will always hang plumb, even though supported from an inclined surface. They will allow the fixture to swing through an angle of $20^{\circ}$ in any direction from the perpendicular.

## Type DBR Circuit Breaker Condulet

With Interlocking Arktite Plug Receptacle Dust-Tight and Weather-Resistant (Raintight)
Class II, Group G, and Class III (NEMA Types IX, V, and III) Take Type APJ Arktite Plugs

For use wherever power outlets combined with over-current protection are recpuired. They may be employed for supplying motor-operated portable appliances up to the maximum horsepower for which the circuit breakers are suitable.

The receptacle is so interlocked with the circuit breaker that the plug cannot be withdrawn unless the breaker is open; and the lreaker cannot be closed unless the plug is fully inserted.

## 60-Ampere, 3-Wire, 4-Pole Style 2

Plug Receptacle with Spring Door Housing 100-Ampere Frame Size Circuit Breaker with Non-Interchangeable Thermal Trip and Non-Adjustable Magnetic Trip.

$\dagger$ Furnished with one drilled and tapped conduit opening at the top equipped with threaded-in bushing. Removal of the bushing permits the use of the opening for the next larger size conduit. Other sizes or arrangernents of conduit openings can be furnished. Prices on application to Graybar.

## Type EPC Plug Receptacles With Interlocked Circuit Breaker

Explosion-Proof, Dust-Tight, and Weather Resistant (Raintight)

Class I, Group D (NEMA Type VII); Class II, Group G; and Class III (NEMA Types IX, V, and III)

Take Type APJ Arktite Plugs.
For use wherever power outlets conbined with over-current protection are required. They may be employed for supplying motor-operated portable appliances up to the maximum horsepower for which the circuit breakers are suitable.
The receptacle is so interlocked with the circuit breaker that the plug cannot be withdrawn unless the breaker is open; and the breaker cannot be closed unless the plug is fully inserted.

## Type FLS General Use Switch Condulets Explosion-Proof, Dust-Tight and Weather Resistant (Raintight) <br> Class I, Group D (NEMA Type VII); Class II, Groups E, F, and $G$; and Class III (NEMA Types IX, V, and III) <br> Furnished with No Fuse Switch

Type FLS Condulets with single throw and double throw fuseless switches with no "off" position, rated in amperes, are general use enclosed tumbler switches for hazardous locations. Double throw and motor reversing fuseless switches with "off" position, rated in horsepower, are fur use as motor circuit switches in hazardous locations.

General use switches are quick-make and quick-break. Motor circuit switches are slow-make and quick-break. Slow-make permits proper control of handle for jugging.

## Single Throw-Tumbler

## Type FLS Motor Circuit Switch Condulets <br> Explosion-Proof, Dust-Tight and Weather Resistant (Raintight) Class I, Group D (NEMA Type VII); Class II, Groups E, F, and G; and Class III (NEMA Types IX, V, and III)

## Furnished With Switch-Not Fusible

Type FLS Motor Circuit Switches are for motor disconnects to comply with code requirements for installation of disconnect switch within sight of motor.
The fuseless switch is the sliding action quick-make quickbreak type with double break positive pressure contacts.

Type ERS Replacement Switch Units
For Replacement of Non－Explosion－Proof Flush Mounted Switches in Hazardous Locations Includes tumbler switch with sealed housing and cover

In existing buildings it is frequently impractical to remove． in their entirety，non－explosion－proof switch outlets and replace them with full explosion－proof types．In such in－ stances，a considerable degree of safety can be had by ent clesing switches in explosion－proof chambers．Type IERS replacement units provide such explosion－proof chambers． but will not bring an electrical installation into full conformity with the National Electrical Code．

## EFD Series Push Button Station Condulets Factory Sealed

## Explosion-Proof and Dust-Tight

Class I, Groups C and D (NEMA Type VII); Class II, Groups E, F, and G; and Class III (NEMA Types IXA, IX, and V)
EFD series Condulets utilize heavy duty, 600-volt A-C, factory sealed, single button universal push button stations. lach push button station may be connected for one circuit normally closed. one circuit normally open or two circuits, one normally closed and one normally open. One unit may le used for jorging service or two may be used to make up a "Start-Stop" push button station.
The name plate marking for each push button station must be specified.

Certain standard markings are available at no extra charge. Special markings will be furnished at $\$ 1.00$ per word list additional. The standard markings available are as follows:

| START RUN | TEST | FORWARD UP | RAISE |  |
| :--- | :--- | :--- | :--- | :--- |
| STOP | JOG | IIANI | REVERSE DOWN LOWEA |  |
| ON | IRSET | AUTO | OPEN | IN |
| OFF | TRIP | EMER. CIOSE | OUT |  |

Push Button Station Rating-Heavy Duty, 600 Volts, A-C Max.

$\dagger$ Indicating plate marking must be specified.
*Catalog numbers listed above include red pilot light jewel ( J 1 ) in all cases. Where a different color is required substitute the proper color symbol. Example EFSC225-J1 with amber jewel is EFSC225-J6.

## Type EGP Condulets

## Explosion-Proof, Dust-Tight-For Panel Mounting Factory-Sealed Class I, Groups C and D (NEMA Type VII); Class II, Groups E, F, and G; and Class III (NEMA)Types IXA, IX and V)

Furnished with l-inch through-feed hubs. Pilot Light: Pilot light Condulets are cquipped with candelabra base lamp receptacles, 12.5 -volt, 6 -watt, type S - 6 clear bulb lamps, for use on 110-125 volt circuits; and colored or clear glass jewel.
Push l3utton Stations: Heavy duty, 600volı A-C. factory-sealed, single button universal push button stations are used. Lach push button station may be connected for one circuit normally closed, one circuit normally open, or two circuits, one normally closed and one normally open. One unit may be used for jogging service or two may be used to make up a "Start-Stop"pushbut tonstation.

*List price includes switch with one interchangeable heater. Specify voltage and horsepower or Full Load Motor Current when ordering.

## EFD Series Manual Motor Starting Switch Condulets-Without Overload Protection

Explosion-Proof and Dust-Tight
Class I, Groups C and D (NEMA Type VII); Class II, Groups E, F, and G; and Class III (NEMA Types IXA, IX, and V)

## EFD Series

Furnished with Trumbull manual motor starting switches. These switches are without overload protection and do not take heater units.
 spected Electrical Equipment.

## Type GUSC Line Starter Condulets <br> Explosion-Proof, Dust-Tight, and Weather Resistant (Raintight) <br> Class I, Groups C and D (NEMA Type VII); Class II, Groups E, F, and G; and Class III (NEMA Types IXA, IX, V, and III)

Furnished with across-the-line manual motor starting switches for starting D)-( or single and polyphase A-C motors. They provide thermal relay time limit overload protection but do not provide undervoltage or short circuit protection. They are furnished with $3 / 4$ " throughfeed hubs for threaded conduit, and external mounting lugs with fastening holes.

Motor Starting Switch Information Horse Power Ratings

Specify voltage and h.p. or Full Load Motor Current when ordering.

Crouse-Hinds Condulets

## EFD Series Motor Sentinel Condulets

Explosion-Proof and Dust-Tight
Class I, Groups C and D (NEMA Type VII); Class II, Groups E, F, and G; and Class III (NEMA

Types IXA, IX, and V)
Furnished with either Bryant or Westinghouse Motor Sentinels.

Heaters are interchangeable and, therefore, may be used with either Motor Sentinel.
Maximum Horsepower Ratings: Bryant or Westinghouse

*List price includes Motor Sentinel with one interchangeable heater. Specify voltage and hp. or Full Load Motor Current when ordering.

## Type FSPC Tumbler Switch Condulets

## Explosion-Proof, Dust-Tight and Weather Resistant-Raintight

Class I, Groups C and D; Class II, Groups E, F, and G; and Class III (NEMA Types 3, 3R, 5, 7CD, 9EFG)

Furnished with tumbler switch, threaded cover, through feed threaded huls, and mounting feet.

Ilub size on all models is $3 / 4 \mathrm{in}$.

## Type GUB Line Starter Condulets Magnetic Across-The-Line Motor Starters

Furnished with external push button for operating manual reset overload relays.

Type GUB Condulet Remote Control

Starters are opened and closed by push button "startstop" stations located at convenient points. Types EFD, EFS, and EGP series air break push button stations and type OFC oil immersed push button stations are recommended for this service.
$3 / 4^{\prime \prime}$ threaded hubs with integral bushing, two on the bottom and one on the top, are supplied. Other sizes, arrangements or union hubs can be furnished if specified. Prices on application to Graybar.

Types FLF and GUB Condulets are also available with General Electric, Westinghouse, Allen-Bradley, Arrow-II.\&H., and Trumbull starting switches; infornation on request to Graybar.
${ }^{* *}$ Also available for 110 and 550 volts at the same prices.
$\ddagger$ For larger starters and Combination Starters refer to listings of Type EPC Condulets.

Ordering Information: When ordering complete type FLF or GLB Line Starter Condulets, give complete catalog number and specify hp., voltage, frequency, number of phases, r.p.m, type, and full load ampere rating of motor. If complete motor data is not available, specify ampere rating of heater required.

Ileaters: Two-pole motor starters are furnished with one heater; three-pole and four-pole starters are furnished with two heaters.

Crouse－Hinds Condulets

## Type EMP

## Explosion－Proof and Dust－Tight－Panel Mounting

Class I，Groups C and D（NEMA Type VII）； Class II，Groups E，F，and G；
and Class III（NEMA Types iXA，IX，and $V$ ）

Type E：VIP Comdulets are designed for monnting on panel－ boards so that pilot lights，push buttons，and swit ch handles are flush with the front of the panel，and bodies are in back of the panel．Threaded necks of EMP Condulets are provided with locking nuts to firmly clamp the Condulets in place． This permits easy alignment with conduit and other Condu－ lots on the panel．

EDIP Condulets are compactly designed to require the absolute minimum panel space consistent with explosion－ prool＇construction．For this reason they are ideally suited for flow chart panels．

Comdulet bodies have through－feed $1^{\prime \prime}$ conduit hubs．They are fitted with flat ground joint covers fastened with heavy sorews．Large covers give maximum accessibility to interior．

PDIP Condulets are furnished in two styles：Style 1 for 12．5－volt pilot lights only－Factory Sealed；Style 2 for push hutton stations．selector switches and pilot lights with trans－ formers，or combinations of these－Not Factory Sealed．

Condulet parts extending beyond the face of the panel have dull Hack instrument linish．External seals are required when push button stations and／or selector switches are used．

＊＇To catalog number add suflix－Jl for red；－J3 for green； －J6 for amber；－J8 for opal；－Jl0 for clear；and－Jll for bluc． tSpeeify indicating plate marking for ench push button．
§Specily indicating plate marking for each selector switch．

## Type OFC

For Oil Immersed or Air Break Devices Explosion－Proof，Dust－Tight，and Watertight Class I，Group D（NEMA Types VII and VIII）；Class II， Groups E，F，and G；and Class III（NEMA Types IXA，IX，V，IV，and III）

Furnished with Motor Control Push Button Station．

Push hutton station may be air break or oil immersed．

| （）FC2139 | 2 Circuits | Must le | 3／4 | 30.50 |
| OFC3139 | İniversal | Specified | 1 | 30.90 |

$\ddagger$ Two－circuit push button stations are provided with a jumper for common line connection．It can be quickly removed for independent connections．

## Type GUSC Auxiliary Circuit Breaker Condulets

## Explosion－Proof，Dust－Tight，and Weather Resistant（Raintight）

Class I，Groups C and D（NEMA
Type VII）；Class II，Groups E，F， and $G$ ；and Class III（NEMA Types IX，V，and III）

Furnished with Heinemann \＃0131 Electro－Magnetic Auxiliary Breaker

Auxiliary Breaker Information－Condulet with Breaker Condulet with Breaker No．
GUSC2041－11－$\dagger$
GUSC2041－13 $\dagger$
GUSC2041－31－$\dagger$
GUSC2041－33－$\dagger$
GUSC2041－51－$\dagger$
GUSC2041－53－$\dagger$

Auxiliary Breaker Information sizo
＋Insert anpere shown in listing alove）．Example：Cat．No．GUSC2041－ 13－2 covers a Condulet with auxiliary breaker for 115 volts a－c and with 2 ampere rating．

## Crouse-Hinds Panelboards With Circuit Breakers

## Type EDP Explosion-Proof, Dust-Tight, and Weather Resistant (Raintight)

## Class I, Group D (NEMA Type VII); Class II, Groups $E, F$, and $G$; and Class III (NEMA Types IX, V, and III)

Furnished with Thermal Branch Circuit Breakers, Main Lugs, and Terminal Connection Blocks.

Type EDDP panellooards are especially designed for use in hazardous locations. They may akso be used in non-hazardous locations where corrosive vapors, non-combustible dusts, or moisture are present.
All EDI pamels are wired complete. Connections between terminal blocks and circuit breakers are made at the factory. Each circuit breaker compartment is sealed from the " T " section.
