

LAFAYETTE AGAIN LEADS

WITH THE MOST EXTRAORDINARY STEREO HI-FI PHONO SYSTEM VALUE!

LAFAYETTE STEREOPHONIC-MONAUURAL FM-AM STEREO TUNER

ITS FLEXIBILITY OF DESIGN & LOW BUDGET PRICE ALLOW YOU TO INSTALL STEREO NOW!

For FM-AM Stereo Reception • For FM or AM Monaural Reception • For FM Multiplex Reception (Requires Decoder) • For Separate FM & AM Simultaneous Listening In Different Rooms

- SEPARATE AM AND FM SECTIONS, EACH WITH INDIVIDUAL PRECISION FLYWHEEL TUNING • 4 FM IF STAGES, INCLUDING DISCRIMINATOR, PLUS 2 AM IF STAGES • ARMSTRONG FM CIRCUIT WITH LIMITER AND DISCRIMINATOR • FM FREQUENCY RESPONSE 20-20,000 CPS \pm 1 DB • FM SENSITIVITY 3 MICROVOLTS • NO-DRIFT FM WITH AUTOMATIC FREQUENCY CONTROL (AFC) & AFC DEFEAT • OUTPUTS FOR AM/FM MONAUURAL, AM & FM STEREO, AM & FM STEREO OR MONAUURAL TAPE RECORDING, & FM MULTIPLEX • HANDSOME, MODERN HI-FI STYLING

An excellent unit with many outstanding features whose low cost and high degree of flexibility combine to make it practicable to enjoy stereo FM/AM broadcasts NOW without fear of obsolescence. The Lafayette LT-99 Stereo Tuner may be used for standard AM or FM monaural or for FM and AM stereo listening. Or, you can use it as a 2-channel receiver, feeding an AM program into one room and an FM program into another room simultaneously. Provision is also made for reception of FM Multiplex stereo (with the aid of a decoder, when available). Outputs are provided for stereo or monaural tape recording directly off the air. Styling is modern and pleasing with any room decor.

SPECIFICATIONS

SENSITIVITY: FM—3 microvolts for 20 db quieting; AM—75 microvolts loop sensitivity. SELECTIVITY: FM—200 kc bandwidth at 6 db down; AM—7 kc at 6 db down. FREQUENCY RESPONSE: FM—20 to 20,000 cps \pm 1 db; AM—20 to 5,000 cps \pm 2 db. OUTPUT VOLTAGES: FM—2½ volts for 100% modulation; AM—1 volt average. HUM: —70 db below 1 volt. OUTPUT JACKS: AM/FM Monaural, AM Stereo, AM Tape Recording, FM Tape/Multiplex. CONTROLS: Stereo-Monaural Switch, Selector Switch (AM, FM-AFC, FM, OFF), AM Tuning, FM Tuning, Multiplex-Tape Switch (rear panel). BUILT-IN FM AND AM ANTENNAS: with provision for connecting external antennas if needed for distant reception. TUBES: 6BE6, 2-6BA6, 6U8, 12AT7, 6AU6, 6AL5; diode AM detector, selenium rectifier. AUXILIARY AC OUTLET, FOR 105-120 VOLTS, 50/60 CPS AC. SIZE: 8½" d (10½" including knobs and ferrite loop) x 13 5/16" w x 4¼" h (add ¼" for rubber feet). SHIPPING WEIGHT: 16½ lbs.

AN IDEAL QUALITY SYSTEM FOR LISTENING TO THE NEW HIGH-REALISM STEREO SOUND!

Here is a complete superb stereo hi-fi phonograph music system with outstanding components brought to you by Lafayette to bring out the full, thrilling capabilities of the new stereo recordings for the utmost in realism; the nearest thing to being present at the actual live performance. The new Lafayette LA-90 with 28 watts (14 watts each channel) is the heart of the system and acts as a complete stereo control center with high sensitivity for stereo phono cartridges and stereo tape heads; it may be used as a monaural 30-watt amplifier, or as a 2-channel stereo amplifier or as an electronic crossover with separate high and low frequency speaker systems with monaural program sources. Other fine system components are the famous new Garrard RC121/II 4-speed automatic record changer ready to accept stereo cartridges, with automatic or full manual operation; sensitive automatic trip for low cartridge tracking pressures; full intermix of 10" and 12" records in any order at same speed, with new spindle to prevent double record drop; resonance-free cast aluminum tone arm; "stop-pause" feature to allow stopping without losing groove position; and balanced 4-pole shaded-pole motor; the Lafayette PK-111 wood base for changer, of fine selected woods; the new GE GC-7 stereo/monaural variable reluctance cartridge with 0.7 mil genuine GE diamond stylus for microgroove monaural or stereo records, with frequency response of 20-17,000 cps, 3½-7 gms tracking force and extremely high compliance and stereo channel isolation; and 2 of the unbeatable, for performance-value, world famous Lafayette SK-58 12" coaxial speakers with response of 30-15,000 cps, built-in crossover network and brilliance level control. Has all the inputs necessary if you wish to add stereo tape and/or stereo FM/AM later. Supplied complete with plugs, cables, and easy-to-follow instructions. Shpg. wt., 66 lbs.

Enjoy the latest stereo records with this superb high fidelity phono system. Truly breathtaking sound reproduced realistically in your home. You can also add, at any later date, a stereo tape deck and/or stereo FM/AM tuner to complete your music center. This system will also enhance your enjoyment of ordinary monaural records, with the two speakers distributing the sound energy evenly in the listening room. No more of that point source effect. The system features the ultra-modern Harman-Kardon A-224 stereo amplifier with 2 12-watt channels and a complete stereo control center. A special switch enables it to be used as a 24-watt amplifier for monaural program source. Frequency response is ± 1.5 db 45-20,000 cps at 12 watts output. The front controls fulfill every practical stereo need. Also included in the system is the new Garrard RC121/II automatic record changer which can also be used as a manual player. The cartridge selected is the new G.E. GC-7, variable reluctance compatible stereo cartridge with LP diamond stylus. The wood base is the Lafayette PK-111 wood base available in mahogany, blonde or walnut (please specify). The speakers chosen are the brilliant University UXC-122 2-way 12" diffused speakers, having 12" woofer, and Diffusone high-

frequency elements. System supplied with inter-connecting cables, and simplified instructions for installation. Shpg. wt., 65 lbs.

A deluxe stereophonic phono system designed to satisfy the critical music listeners, carefully selected by Lafayette's audio experts to bring you the utmost performance at a tremendous saving. Completely compatible, this system features the Harman-Kardon A-250 Stereo Amplifier newly introduced by this famous manufacturer of hi-fi equipment. This formidable amplifier is rated at 25 watts per channel for stereo use, or 50 watts for monaural applications. It incorporates many latest hi-fi engineering advancements such as the use of silicon rectifiers to improve power supply regulation, reducing total distortion figure to a minimum. Covers the full audio frequency at rated output with less than 1% harmonic distortion. The control center is versatile and simple to operate, it fulfills every stereo and monaural need. The Garrard RC 121/II automatic 4-speed record changer is selected for its outstanding performance. New GE GC-7 Variable Reluctance Compatible Stereo Cartridge with diamond LP needle tracks stereo records at a low pressure. For the final links in this deluxe chain of equipment, 2 University 3-way 15" 6303 Speakers are chosen. Famous for its excellent quality, the 6303 has a 15" woofer, Diffusone mid-range and super tweeter with new T-50

Hypersonic driver. System supplied with interconnecting cables and simplified instructions for easy installation. Shpg. wt., 88 lbs.

COMPONENTS

"EPIC" A-250 STEREO AMPLIFIER

This formidable instrument is used as a complete stereo amplifier with two 25 watt channels or as a complete monaural amplifier of 50 watts. Features include: Phase inverter utilizing positive and negative feedback to drive output tubes with minimum phase shift and maximum stability; Power amplifier has instantaneous recovery resulting in clean faithful transient response; Optimum power supply regulation is accomplished by 4 sealed silicon rectifiers; Separate power supplies are provided for both channels; Bass and treble control circuits. Specifications: Frequency Response: 20 to 20,000 cps; Output level: 25 Watts per channel at less than 1% harmonic distortion; Peak Power: 50 watts per channel; Hum: 95db below 20 watts at minimum volume; Channel Separation: better than 50db; Tone Control Range: ± 16 db at 50 cps on bass, ± 16 db at 10,000 cps on treble; Damping Factor: 8; Panel Controls: Treble/Power, Bass, Loudness, Balance, Mode (Stereo Normal, Stereo Reverse, Monaural Right, Monaural Left), Function Selector (Aux 1, Aux 2, Tuner, Phono, tape head), Rumble Filter, Scratch Filter, Contour, 2 Speaker Selector switches and Equalization Selector. Speaker output impedances: 4, 8 and 16 ohms. Rear Panel Controls: (2) Output tube balance control channels A and B. Tubes: (10) 4-6L6, 3-ECC82/12AU7, 3-ECC83/12AX7, + 4 silicon diode rectifiers and 1 selenium rectifier bridge for filaments. Size: 15 1/2" W x 4 3/4" H x 13" D. Shpg. wt., 40 lbs. Decor. Panel is copper colored anodized aluminum. Cage is brushed copper with black display panel. HARMON-KARDON A-25D (less cage) Net 179.95

NOCTURNE AX-20 DUAL STEREO PREAMPLIFIER WITH 20 WATT AMPLIFIER

This unit provides for the simple and ideal conversion to stereo of any existing monaural system—of any manufacturer—One connection to the present amplifier is all that is necessary. This unit has many exceptional features; original amplifier may be hidden out of sight and be separated from this unit by 20 feet; Complete control of entire stereo system is provided by preamplifier; a fail safe 20 watts power amplifier; Phase inverter utilizes both negative and positive feedback for minimum phase shift and improved stability; Specifications: Output Level: 20 watts at less than 1% harmonic distortion; Peak: 40 watts; Speaker Outputs: 8 and 16 ohms; Frequency Response: ± 20 -20,000 cps. at 15 watts; Damping Factor: 5; Hum: minimum volume 90 db below 15 watts; Stereo Preamp. Separation: better than 50 db; Tone Control Range: ± 12 db at 50 cps and at 10,000 cps; Second Preamp. Output Level: 0.5 v low impedance modified by all controls; Equalization: RIAA, EUR and NARTB 7 1/2 and 3 1/2. Panel Controls: (10) Treble/Power, Bass, Loudness, Balance, Mode, Function Selector (Tape head, Phono, tuner, and Aux), Rumble Filter, Contour, Speaker Selector, Equalization switch, Rear Controls: (3) output tube balance control, low level and high level hum adjust control. Tubes: (7) 1-E2B1, 2-EL84, 2-ECC82/12AU7 2-ECC83/12AX7. Size: 12 1/2" W x 4" H x 11 1/2" D. Power 75 watts at 117V AC. Control Panel Copper. Enclosure Copper cage with black panel. "CONCERTO" TP-200 AM-FM STEREO TUNER AND PREAMPLIFIER

A brilliant new design consisting of a FM/AM stereo tuner and dual stereo preamplifiers. Tuner section has provision for AM/FM stereo or monaural reception. A jack is provided for a FM multiplex adapter. The preamps provide complete control of stereo and monaural programming. Features include a stereo index on panel which permits identification of AM/FM stereo stations; Permits any monaural or stereo program material to be played; cathode follower outputs permit the basic amplifiers to be placed up to 50 feet from the TP-200. Preamplifier Specifications: Frequency Response ± 0.5 db 15-30,000 cps; Distortion: 0.3% harmonic and intermodulation; Hum: 90 db below 1 volt at minimum volume; Preamp. crosstalk: 50 db; Tone Control Ranges: ± 12 db at 50 cps, ± 12 db at 10,000 cps. Record Equalization: RIAA or EUR, Tape Equalization NARTB 7 1/2 & 3 1/2 IPS. FM Specifications: Sensitivity: 3.5 μ v with 20 db of quieting; Selectivity: 240 KC bandwidth; Drift: ± 0.5 KC maximum. Distortion: From 0.5% to 3% IM at 30% to 100% modulation; Frequency response ± 0.75 db 30-15,000 cps. Hum level: 60 db below rated output; meets FCC radiation requirements; AM Specifications: Selectivity: 10 KC bandwidth; Image Rejection: 55 db; IF Rejection: 55 db Distortion: 1% harmonic. Frequency Response: ± 3 db 20-5,000 cps; Hum level: 55 db below 80% modulation. Panel Controls: FM tuning, Treble/power, Bass, Loudness, Balance, Mode (Stereo normal, Stereo reverse, monaural left, monaural right), Function (AM, FM, AM/FM Stereo, Multiplex, Phono, Tape & Aux.) AM tuning, Scratch Filter, Rumble Filter, Contour and Equalization. Size: 15 1/2" x 4 3/4" x 13". Shpg. wt., 20 lbs.

"TRIO" A-224 STEREO AMPLIFIER

The ultra modern TRIO A-224 stereo amplifier includes the latest advances in stereo hi-fi circuitry. (This decorator styled component actually embodies three excellent instruments in one compact unit). Two 12 watt channels are provided, and if you wish the amplifier may be fed to a single speaker system and used as a 24-watt amplifier or both channels may be used as an electronic crossover monaurally through two speaker systems. Stereo (or monaural) inputs include tape head, magnetic phono, crystal or ceramic phono, tuner, tape-high level; Rumble Filter Switch; Contour Switch; Speaker Selector Switch (1 or 2); Speaker Selector Switch (A or B). Rear Controls include right and left channel equalization switches, output tube balance controls, and hum balance controls. Tubes are 2-ECC82/12AU7, 3-ECC83/12AX7, 4-EL84, GZ34 (rectifier). A special feature is the switch for paralleling the 2 amplifier outputs to obtain 24 watts. Power Consumption is 125 watts at 117 volts, 60 cps AC. Dimensions are 13-13/16" x 4 3/4" x 11 1/2". (not including knobs). Shpg. wt., 18 lbs. The cage has a Copper Control panel (anodized aluminum) and the enclosure body is black.

"DUET" T-224 STEREO TUNER

Stereo Binaural Monaural Whatever the application this new AM/FM tuner is designed to give maximum performance. A jack on the rear panel makes it readily adaptable for multiplex reception. This tuner also incorporates an indexing scale to permit easy identification of stereo AM/FM stations. The "Duet" is also an ideal monaural tuner designed for the best in monaural programming. Features: Low noise FM front end consisting of grounded grid, cathode fed RF amplifier; double tuned RF interstage; wide band IF stages; Armstrong circuit with pentode limiter; Foster Seeley discriminator; and AFC. AM features include low noise, high gain RF pentode; wide band IF stage; quick action AVC; high pickup sensitivity resulting special high-Q ferrite loopstick antenna. Specifications: FM: Sensitivity: 7 μ v for 30 db of quieting, 3.5 μ v for 20 db of quieting; Selectivity: 240 KC bandwidth \pm db down; Drift: ± 5 KC maximum; IM rejection: 40 db; IF rejection: 60 db; Distortion: less than 0.5% at 30% modulation; less than 3% at 100% modulation; Frequency response: ± 0.75 db 30 to 15,000 cps including 75 μ -second de-emphasis. Hum Level: 60 db below rated output; RF radiation is within FCC requirements; high output impedance. AM: Sensitivity: 80 μ v sec meter. Terminal sensitivity 10 μ v; Selectivity: 10 KC bandwidth \pm db down; Image rejection: 55 db; IF rejection: 55 db; Distortion: 3% IM, 1% harmonic; Frequency response: ± 3 db 20-4,000 cps; Hum level: 45 db below 80% modulation. Controls: FM tuning, Function Selector (off, FM, AM, Stereo), and AM tuning; Outputs (rear panel) AM/FM Monaural and FM stereo, AM stereo, FM multiplex. Tube complement: 2-ECC85, 3-6AU6, 1-6AL5, 1-6AT8, 1-6B6, 1-6BA6. Power consumption is 40 watts. Size: 13-13/16" W x 12 1/4" D x 4 3/4" H. (excluding knobs). Decor escutcheon brushed copper, cage black. Shpg. wt., 13 lbs.

Deluxe hi-fi phono system features the Bogen DB130A Amplifier offering exceptional versatility plus full-toned, perfectly balanced reproduction. The other expertly matched components have been carefully selected to reproduce music with a high degree of realism to please the most critical hi-fi enthusiast. This 35-watt amplifier has extremely uniform output, low distortion and high power handling capacity with ample inputs and other features which make it an ideal central control amplifier for any hi-fi installation. The system includes Bogen DB130A 35-Watt Amplifier with Mahogany or Blonde Metal Case; Electro-Voice 12TRXB 3-Way Speaker and Mahogany or Blonde "Aristocrat" Enclosure; Garrard RC-88-4 4-Speed Record Changer with Mahogany or Blonde Woodbase; NEW G.E. GC-7 GOLDEN CLASSIC COMPATIBLE VARIABLE RELUCTANCE STEREO CARTRIDGE with 0.7 mil stylus for stereo or monaural records.

The Electro-Voice 12TRXB 3-way speaker with built-in crossover and wired with brilliance control and the "Aristocrat" folded horn corner enclosure provide unusually smooth reproduction down to 35 cps. Garrard's RC-88 "Triumph II" 4-speed deluxe auto-manual precision-constructed record changer handles records carefully with trouble-free operation. System is supplied with coded cables and plugs for quick simple installation. For 110-120 volts, 60 cycle, AC. Shpg. wt., 105 lbs.

NEW! Bogen STEREOPHONIC ADAPTER The Ideal LOW-COST Flexible Answer

For Conversion To STEREO!

Provides an excellent, low-cost way to obtain single, centralized control of 2 amplifiers in a 2-amplifier stereo system—practically a necessity for a simplified stereo add-on system. Includes a Balance Control for equal volume levels from both amplifiers, a concentrically-mounted Volume Control which affects both amplifiers in the same degree and at the same time, a stereo Normal-Reverse switch for reversing channels, and a Stereo Monaural switch. May be used with any 2 of the following Bogen units: DB-114, DB-125 and DB-120A amplifiers, RB-115 tuner-amplifier, PE-100A/D070 preamp-amp combination; may also be used with almost any 2 amplifiers with separate preamplifiers and almost any 2 identical amplifiers with tape monitoring inputs and outputs. Dimensions are 3 1/2" w x 4 3/4" h x 5" d (not including knob projections). Requires no connection to the power line and contains no tubes. Shpg. wt., 3 lbs.

STEREO COMPONENTS

130 STEREO PREAMPLIFIER

This stereo preamplifier can be used monaurally or as an electronic crossover. Special circuitry permits the stereo cartridge to be used for monaural records. A phasing switch permits phase reversal of one of the channels if program material requires it. A third center channel is provided for another amplifier to achieve optimum realism. Balancing for each of the channels is provided. Visual indication of mode of operation is provided. Separate bass and treble control is provided for each channel. Stereo selector switch has Balance A, Balance B, monaural records, stereo, Reverse stereo, Channel A monaurally through both amps; Channel B monaurally through both amps; Channel A treble, bass and crossover; Channel B treble, bass and crossover; Stereo Balance Channel A only, Channel B only, loudness; Loudness Volume switch; Phasing switch; Scratch filter; Rumble filter; Input selector has 8 positions covering all types of equalization. Pick up selector 1 & 2. Two magnetic stereo inputs available. There are 2 hi level stereo inputs for AM/FM stereo tuner or tape recorder. There are microphone provisions.

Rear controls include: Phono level, NARTB tape level, tape playback level, and 2 level controls for high level inputs—Outputs include: Channel A, Channel B, and center channel. Phase reverse switch places channel A and B 180° out of phase making possible the use of vertical transcription records.

Specifications: Frequency response: 19 to 95,000 cps; Harmonic distortion: 0.15% at rated output; Size: 15 1/2" x 4 1/2" x 12 1/2". Shpg. wt., 15 lbs.

This combination is truly a fabulous system for listening to stereo records; but it also has the promise of things to come because its preamp has inputs for STEREO from ANY SOURCE and inputs for any monaural source. The complete system consists of: Scott 130 Stereo Preamp; 2 Scott 250 Power Amplifiers; Lafayette Professional PK-245 Turntable on Deluxe Woodbase, outfitted with new GE TM-2G Stereo Tone Arm and new GE-GC-5 Compatible Stereo Cartridge, and the new JENSEN KT-233 12" 3-way Speaker System which consists of 2 complete 3-way speaker systems with Stereo Director Chassis. Housed in a suitable enclosure, this combination is guaranteed to produce sound of the most faithful and pleasing quality. The use of the Stereo Director principle permits placement of enclosures in "difficult" decorating situations, with excellent stereo effect. Unique provisions on the Scott preamplifier provide for a THIRD amplifier and speaker for absolute optimum stereo realism; if desired, complete balance of the two stereo channels;

ability to play a monaural source on either channel, through both power amplifiers and both speakers; permanent input connections for magnetic input for phono and tape with selection control on front panel. The power amplifiers have plenty of reserve power for any speaker system. Sensitivity rating is high, response flat from 20 cps. 20,000 cps, noise and distortion incredibly low. This combination offers many possibilities for future "add-on" equipment. Complete with inter-connecting cables and instructions for installation. Shipping wt., 145 lbs.

The M. H. Scott Model 299 Complete Stereo Amplifier and the highly regarded Garrard RC-88-411 changer, newly redesigned for stereo playing, are here combined to form the core of a compact stereo phono system. The E-V 12TRXB 3-way speakers supplied in this system are completely in line with the high quality of the electronic components. In addition to these units, the new GE Golden Classic GC-7 Magnetic Variable Reluctance Cartridge with 0.7 mil DIAMOND STYLUS fills out the system. This system is easily capable of yielding a response of ± 1 db from 35-15,000 cps. The 20 watts RMS audio output power from each channel is enough for any home installation. Like the more elaborate Scott 130 Preamp, the Type 299 has complete balance between channels, phase reversal switch, separate inputs for magnetic or ceramic stereo cartridges, input for FM-AM broadcasts, ability to play a monaural record through both amplifiers for higher power capacity, tape input as well as tape recorder output. This complete amplifier combination can be mounted in a very small cabinet or on a small shelf. Comes complete with interconnecting plugs, cables and simple installation instructions. Shipping wt., 84 lbs.

330C STEREO AM-FM TUNER

This superb AM-FM Stereo tuner has a radically new extended response AM section featuring performance entirely comparable to the FM section. This provides the ultimate in stereo reproduction. Features: Planetary drive mechanism; Front panel stereo monaural sw. FM features include: Improved silver plated front end; Special wide band circuitry that insures selective no-drift performance and distortionless reproduction of high frequencies; 2 stages full limiting; Automatic gain control; Low capture ratio assures rejection of interference; low impedance output permits connecting cables up to 70 ft. long; Separate multiplex output. **AM Features:** 1 μv sensitivity for audible audio output; Detector assures no detector distortion at highest modulation % and at high frequencies; 3 pos. adi. IF bandwidth; 10KC whistle filter; Extended AM freq. response. Illuminated signal strength and tuning meter. Controls: FM vernier; AM vernier; OFF-ON; Selector (FM, AM wide range, AM normal, AM dx). Separate output jacks for Binaural or Stereo operation and tape recording. **Tubes:** 1-6BQ7A, 1-6U8, 4-6AU6, 1-6BE6, 1-6BA6, 2-12AX7, 1-6X5, 1-6AL5; two diodes, 2-1N64; 105-125 volts at 50-60 cps. AC. 60 watts. **Size:** 15 1/2" w x 12 1/2" D x 4 1/2" H. Shpg. wt., 15 lbs.

H. H. SCOTT 330C—Less Case (See Scott Case Listing) **22.50 Down Net 224.95**

NEW! MODEL 101R FM-AM STEREO TUNER

Here on one chassis is a true stereo FM-AM tuner of the highest quality. 4 types of operation: FM stereo, FM multiplex stereo (with multiplex adapter), FM std. and AM std. (monaural). Separate Micro Ray tuning indicator for easy, accurate FM and AM tuning. Complete versatility with 4 front panel plus 2 output level controls. 7 low impedance outputs including jacks for monaural or stereo recording. 80 db separation between channels. 6 antenna terminals for any reception conditions.

FM Section: Now famous "Gold Cascade" RF stage—extreme sensitivity and low noise. Triode mixer and dual limiter stages. 4 IF stage with wide band detector. AGC assures constant audio output within 1 db for antenna input of 1.5 to 500,000 μ v. Automatic interstation noise muting. Sensitivity—1.6 μ v for 20 db quieting. Frequency Response—20 to 20 kc within 1 db. Noise—60 db for 100 μ v input. AM Section: Tuned IF stage, temperature compensated converter stage for stability. 2 IF amplifiers. Bandwidth selectable. Features delayed AGC and sharp 10 KC filter. Sensitivity—3.5 μ v for 0.5 v out. Freq. Response—10 db at 7.5 kc (Broad-band), or—10 db at 4 kc (Sharp-band). Totals 15 tubes. Less cabinet. For 105-125 v. 50/60. Size 15 1/2 x 13 x 4-13/16". Shpg. wt., 20 lbs.

For the very highest quality of stereo sound, matched and balanced components for each channel is an obvious requisite. Pilot meets this basic requirement in the form of the two units which are the heart of this stereo system—the SP-210 Stereophonic Preamp/Amplifier and the SA-232 Stereophonic Basic Amplifier. Each unit comprises 2 channels of matched components each will give 16 watts output, insured by ganged volume controls and a channel balance control on the preamp/Amplifier. The excellent frequency response of these electronic components is complemented by the other fine units which round out the system: the new GE GC-7 Golden Classic Compatible Magnetic Variable Reluctance cartridge with 0.7 mil diamond stylus for stereo or monaural records; the new Garrard RC-121X 4-speed auto-manual Record Changer wired for stereo, with LAF PK-111 mahogany wood base; 2 superb ELECTRO-VOICE 3-way coaxial 12TRX8 speakers with built-in crossover network. Overall response of the system in recommended speaker enclosures is ± 1 db from 35-15,000 cps. The output of the basic amplifier of each channel, 32 RMS, has plenty of reserve power for the 20 watt capacity speaker which it drives, thus insuring minimum noise and harmonic distortion (1% at peak audio power output). Such a grouping of components can yield only the most satisfying quality of stereo sound. System is

provided complete with plugs, interconnecting cables and simplified installation instructions. Shpg. wt., 75 lbs.

LAFAYETTE LA-22 12 WATT AMPLIFIER WITH CASE

The Lafayette LA-22 amplifier is a complete 12 watt power amplifier with built-in pre-amplifier-equalizer that brings you real high fidelity at low cost. Its wide range frequency response and low hum and distortion insure sparkling reproduction that will delight you. This undistorted power is achieved from circuitry employing the new premium quality EL84 tubes in a pentode connected balanced output circuit. Five inputs are provided for every type of crystal, ceramic or magnetic phono cartridge, for tuner and tape head as well as high level auxiliary input for such devices as TV audio, additional crystal phono, etc. A rear chassis switch changes from tape head to magnetic input. The front panel function selector and equalization switch gives instant choice of tuner aux., or phono with proper equalization for all types of records and tape head. Equalization positions are RIAA (LP), 78 for old type records, and NARTB equalized tape head. This last position also provides equalization for London (ffrrLP) and other European recordings.

The loudness control is a compensated volume control that approximates Fletcher-Munson characteristics to give you tonal balance at low listening levels. This control also operates the AC on and off switch. The bass and treble controls afford a wide variation of cut or boost for emphasis or deemphasis of highs and lows. Other features include an auxiliary AC receptacle on back to plug in a tuner or phono so it can be turned on or off with the amplifier switch. Provision is made for mounting in cabinet or on a panel. It is attractively finished in fine grain hammer-tone copper shade that blends harmoniously with both modern and traditional decor. Its appearance matches the Lafayette LT-25 tuner. It comes complete with removeable case.

SPECIFICATIONS

POWER: 12 watts normal, 24 watts peak. **FREQUENCY RESPONSE:** 30-20,000 cps \pm 1 db. **I.M. DISTORTION:** Less than 1 1/2% (60 and 7000 cps) at full rated output. **HUM:** Tuner 80 db below full output; phono 60 db below. **INPUTS:** 5: Tuner, crystal, phono, magnetic phono, tape head and aux. **CONTROLS:** 4: Function selector and equalization; bass, treble and loudness with AC on-off switch. **EQUALIZATION:** RIAA (LP), 78, TAPE HEAD (NARTB) OR LON. (ffrr) **TOPE CONTROL RANGE:** 12 db cut or boost on bass and treble. **INPUT LEVEL:** For full output: 1/2 volt on tuner, crystal or aux., 8 mv. for magnetic phono or tape head. **DAMPING FACTOR:** 10. **TUBES:** 2-12AX7, 2-EL84 plus EZ81 rectifier and pilot light. **SPEAKER TERMINALS:** 8 and 16 ohms. **AC OUTLET:** Auxiliary AC outlet on rear controlled by front panel on-off switch. **MOUNTING:** Provision for mounting in cabinet or on panel. **SIZE:** 13 1/2" L x 6 3/4" D x 4 1/2" H including bumper feet. Knobs extend 3/4" in front of panel. **SHIPPING WEIGHT:** 15 lbs.

LAFAYETTE LT-25 FM-AM Tuner WITH CASE

Like its matching amplifier, the Lafayette LT-25 FM-AM tuner is a most unusual value. A glance at the specification chart will show that we have incorporated all the basic qualities that go into a fine high fidelity tuner. The circuit features temperature compensated oscillator for stability and low drift automatic frequency control to "lock in" the station and AFC defeat for precision tuning on weak stations. High sensitivity and selectivity are likewise achieved by having 3 stages of I.F. including limiter in the FM section plus 2 I.F. stages in the AM section. Wide range frequency response plus extremely low hum and distortion characteristics will bring in your FM programs clear, crisp and clean. Inertia flywheel makes tuning smooth. Has auxiliary AC outlet on rear for attaching a phono or other device to be turned on or off by tuner switch. Attractively finished in the same fine grained hammer-tone copper shade to match the LA-22 amplifier. A handsome edge-lighted dial further enhances the appearance. It comes complete with removeable cover. Provision is included for mounting in cabinet or on a panel if desired.

SPECIFICATIONS

FM CIRCUIT: Armstrong circuit with limiter and Foster-Seeley discriminator, AFC and AFC defeat. **AM CIRCUIT:** Superheterodyne with automatic volume control. **FREQUENCY RANGES:** 88-108 MC and 530-1650 KC. **FREQUENCY RESPONSE:** 20-20,000 cps \pm 1 db on FM; 20-5000 cps \pm 3 db on AM. **FM DRIFT:** \pm 5 KC max. **HUM LEVEL:** 60 db below 100% modulation. **DISTORTION:** Less than 1% on FM; less than 1% on AM for up to 80% modulation. **CONTROLS:** Function switch for OFF, FM, FM/AFC, and AM. Tuning. **OUTPUT LEVEL—FM:** 2 1/2 V for 100% modulation. **ANTENNA INPUT:** Built-in AM ferrite loopstick antenna and 300 ohm FM line ant. Terminal for outside antenna. **RADIATION:** Meets FCC requirements. **OUTPUT IMPEDANCE:** High impedance output. **CONVENIENCE OUTLET:** 110V AC aux. outlet on rear. **TUBES:** 2-6AU6, 1 each 6AL5, 6BA6, 6BE6, 6U8, 12AT7 plus selenium rectifier. **SIZE:** 13 1/2" L x 4 1/2" H x 8-3/16" D. Height includes rubber bumper feet. Knobs extend 3/4" in front of panel. AM antenna 1 3/4" behind rear. **SHIPPING WEIGHT:** 15 lbs.

This excellent monaural system will not only play monaural LP records but, supplied with the new GE GC-7 compatible Stereo Cartridge with 0.7 mil Diamond Stylus, it will also play monaurally the new stereo records now coming off the presses. The compatible stereo cartridge with diamond stylus is the only type that will not destroy stereo records used for monaural play, so that its use is your assurance for future enjoyment of your records when you convert to full stereo. And, in addition, the quality of sound obtained from a stereo record played monaurally through the stereo compatible cartridge is as good as, if not better than that obtained from monaural records! From any point of view, you are the winner when you prepare for stereo by starting with this excellent complete phono system consisting of Lafayette's own LA-22 amplifier, specially engineered to give you the most features at the least cost, Lafayette's own high quality SK-58 12" Coaxial Speaker, the famous Garrard RC-121-11 record changer, newly redesigned for accepting compatible stereo cartridges, the new GE GC-7 Compatible Stereo Cartridge with 0.7 mil Diamond Stylus and Lafayette PK-111 Changer base in mahogany or walnut (specify). You can easily add-on units to convert to a complete stereo phono system and even add a stereo tuner and tape playback/recorder later. Comes with connecting cables and Instructions. You don't have to discard your present hi-fi equipment in changing over to stereo. We this excellently matched group of components as the basic units to add on to the above system or any similar system in order to provide the two channels necessary for stereo phono listening. The complete "add-on" system consists of the economical LA-22 12 Watt Complete Amplifier, the Lafayette SK-58 12" Coaxial Speaker with flat frequency response of 30-15,000 cps, the new Pickering Fluxvalve 371-7D Compatible Cartridge with diamond stylus for monaural LP and stereo records and the new Lafayette Stereo Balance Meter. The combination of the LA-22 and the SK-58 speaker will yield plenty of audio power of high quality, more than enough for any home requirement. The LA-22 permits the addition of a stereo tuner and stereo tape deck in the future, to make a complete stereo home music center. Monaural operation too is always possible with this set up. The TM-40 Stereo Balance Meter is offered as a professional way to balance visually the two channels just as is generally done in the most expensive stereo amplifiers. The balance meter is incorporated into the circuit by simply connecting the 2 leads of each meter across the output taps of each amplifier, where the speakers are connected. The system comes with all necessary interconnecting cables and instructions for installation. Shpg. wt., 31 lbs.

NEW Bogen DB230 60-WATT STEREO AMPLIFIER

The ultimate in a stereo amplifier for top quality and design. With this system you can control all types of stereo and monaural program sources, and feed them through the dual 30-watt amplifiers. When you use it monaurally you have the combined 60 watts available, with a special switching arrangement for monaural phono cartridges. Features are CPF output circuit, Phasing Switch which eliminates hole in middle effect, a provision for remote balance control. Specifications: **Power Output:** 30 watts (60 watts peak) each channel for stereo, 60 watts (120-watts peak) for monaural. **Harmonic Distortion:** less than 1% at rated output. **Frequency Response:** 20 to 20,000 cps \pm 0.5 db. **IM Distortion:** less than 2% of rated output. **Hum and Noise:** (below rated output) fundamental —85 db. **Inputs:** (10 inputs—5 channel 1, 5 channel 2) magnetic cartridge, crystal cartridge, tape, tuner, auxiliary. **Outputs:** channel 1 speaker, channel 2 speaker, channel 1, tape, channel 2 tape. **Controls:** Input selector (5 pos): Tape, 78, RIAA, tuner, Aux. Bass, Treble. Loudness: 0, —10, —20 db. Lo filter: Hi-filter. Stereo-monoaural: Channel 1, Channel 2 (for monaural); Normal; Invert (for stereo). Channel 1 tape preamp. OFF-ON. Channel 2 Tape preamp. OFF-ON. Balance; Volume; Power (on-off); phasing (two positions); cartridge stereo, monaural; Channel 2 speaker impedance selector and Hum adjust (on chassis); Amplifier parallel (on chassis); Output impedances: 32, 16, 8 and 4 ohms. **Dimensions:** 15" W x 5 1/2" H x 13 1/2" D. SHERWOOD S-3000 FM TUNER

Only \$9.95 Down \$9.00 Monthly

The popular Sherwood S-3000 FM Tuner features one of the most sensitive FM circuits ever developed which makes FM reception practical beyond 100 miles. In addition highly stable coil design, delayed Automatic Gain Control, and Foster-Seely type discriminator (preceded by three limiters) assure a minimum of distortion even with modulation over 100%. Other features include AFC with 16 db correction for accurate FM Station tuning and drift-free operation, a front panel AFC disabling switch for receiving weak distant stations adjacent to strong signals and "feather-ray" tuning eye for pin-point tuning. Also has a front-panel "local-distance" switch to suppress cross-modulation images caused by very strong signals, cathode follower output and FM multiplex output. 0.95 uv sensitivity and cascade balanced input. 9 tubes plus 14 x 1/2" rectifier. Attractive white leatherette panel. Size 4 x 14 x 10 1/2". For 100-120V 60 cycles AC. Shpg. wt., 16 lbs.

THE LAFAYETTE STEREO-TUNER IS UNIQUE AND INCOMPARABLE THE STEREO-TUNER IS YEARS AHEAD

More than a year of research, planning and engineering went into the making of the Lafayette Stereo-Tuner. It was designed not only to be a fine quality high-fidelity tuner, not only to include every practical and worthwhile feature, but also to protect your investment for the coming years. Binaural broadcasting (simultaneous transmission on both FM and AM) has already started, and will naturally become more and more the method of high-fidelity broadcasting. The unique design of the Lafayette Stereo-Tuner protects you against obsolescence.

The FM and AM sections may be operated either independently of each other or together. For binaural (stereophonic) broadcasts, separate output jacks are provided so that the 2 channels may each be simultaneously fed to individual amplifier-speaker systems to enjoy the ultimate in high-fidelity-stereophonic sound.

The FM and AM sections have separate volume controls so that, when used for binaural programs, a proper balance can be set for each channel. Without this all important feature, the wonderful realism of stereophonic sound would be destroyed. Convenient front panel switch changes from binaural to monaural use. Simplified accurate knife-edge tuning is provided by magic eye which operates independently on FM and AM. Automatic frequency control locks in FM signal permanently.

Apart from its unique flexibility, this is, before all else, a quality high-fidelity tuner incorporating features found exclusively in the highest priced tuners. As shown by the number and types of tubes, no "short-cuts" have been used. With the Lafayette Stereo-Tuner you are assured of noise-free, drift-free, distortion-free reception. You will not only hear this quality, you will sense it even in the mechanical details; in the "feel" of the velvet-smooth easy flywheel tuning, in the professional appearance of the tastefully selected colors. The just-right shade of gold-brass escutcheon contrasts just enough with the dark maroon background, and is set off by matching maroon knobs with gold inserts. Carefully designed for ease of installation in cabinets if desired. Size is 13 1/4" H x 10 3/4" D x 4 1/2" H. Supplied complete with cover. Made in U. S. A.

SPECIFICATIONS

RANGE: FM 88-108MC, AM 530-1650KC. **FM CIRCUIT:** Armstrong, low noise front end with triode grounded grid amplifier and triode mixer. Double tuned dual limiters, Foster-Seeley discriminator, AFC and AFC defeat. **AM CIRCUIT:** Superhet with 3 stages AVC, 10kc whistle filter, ferrite antenna. **DISTORTION:** Under 1% harmonic on FM; under 1% on AM for up to 80% modulation. **HUM LEVEL:** 60db below 100% modulation. **SENSITIVITY:** FM—full limiting on signals as low as 1µv, 2µv for 30db quieting; AM Terminal Sensitivity 5µv. **SELECTIVITY:** FM 200kc bandwidth; 6db down, AM 8kc BW; 6db down. **FREQUENCY RESPONSE:** FM 20-20,000 cps ± 1/2db, AM 20-5,000 ± 3db. **FM DRIFT:** ± 5kc Maximum. **IMAGE REJECTION:** FM 40db; AM 30db. **I.F. REJECTION:** FM 70db; AM 50db. **RADIATION:** MEETS FCC REQUIREMENTS. **OUTPUT LEVEL:** FM 2 1/2v for 100% modulation, 1v for 30%; AM average 1v. **CONTROLS:** 5 controls; FM VOL, AM VOL, FM Tuning, AM Tuning, and five position function selector switch. **TUBES:** 3-6BA6, 2-6AU6, 1 each 6AS8, 6BK7A, ECC85, 6AL5, 6BE6, 12AU7 and 6U5 tuning eye. Selenium rectifier. **OUTPUT IMPEDANCE:** Low impedances cathode follower. Output jacks for FM, AM or Binaural. **ANTENNA INPUT:** 300 ohms. Shipping weight 22 lbs.

IN KIT FORM

The Lafayette Stereo-Tuner was designed with the builder in mind. Two separate printed circuit boards make construction and wiring simple even for such a complex unit. Complete kit includes all parts and metal cover plus step-by-step instruction manual, schematic and pictorial diagrams.

LAFAYETTE MASTER AUDIO CONTROL CENTER

with EXTRA CATHODE FOLLOWER CHANNEL FOR CONTROL OF BINAURAL (STEREO) TUNER OR SECOND PREAMP
HIGHLY FLEXIBLE—CANNOT BECOME OBSOLETE!

- 6 INPUTS—FOR TAPE HEAD, MAGNETIC PHONO, TUNER CRYSTAL PHONO, TAPE RECORDER AND AUXILIARY
- OUTPUT FOR TAPE MONITORING OR RECORDING
- 2 CATHODE FOLLOWER OUTPUTS • UP TO 15 VOLTS OUTPUT
- INPUT FOR CONTROLLING SECOND CHANNEL OF STEREO SYSTEM
- DC ON ALL FILAMENTS — HUM-FREE AMPLIFICATION

- UNIFORMLY FLAT FREQUENCY RESPONSE OVER ENTIRE AUDIBLE SPECTRUM
- EXTREMELY WIDE DYNAMIC RANGE
- PRACTICALLY DISTORTIONLESS
- SHARP SLOPE RUMBLE FILTER
- SEPARATE TURNOVER & ROLL-OFF SWITCHES—24 POSITIONS OF EQUALIZATION
- 2 MILLIVOLTS SENSITIVITY • SELF-POWERED
- PRINTED CIRCUIT WIRING

An outstanding achievement in the audio field. Practically distortionless, hum-free amplification, with sensitivity enough for any magnetic phone pickup or tape head and inputs for control of up to 7 different program sources. The second channel provided allows you to control a stereo (binaural) tuner or the output of a second preamplifier, using the Lafayette preamp as the control center—ideal when converting existing hi-fi systems to stereo. Finest quality parts throughout, with special low-noise resistors where required.

SPECIFICATIONS — CONTROLS: PHONO TURNOVER-INPUT SELECTOR: Radio, Aux, Tape, plus 4 phono turnover frequencies—AES, RIAA (NARTS and NEW AES), 800, LP. ROLL-OFF: LP, RIAA, AES, 10.5 (Old London LP), 5 (FFRR 78), Flat, plus NARTS tape head position. BASS: 16 db boost, 18 db cut, at 30 cps. TREBLE: 11 db boost, 18 db cut, at 10,000 cps. **LOUDNESS-VOLUME:** Concentric dual control, one with power on-off switch. Separate Loudness on-off switch. **TAPE MONITOR SWITCH:** For recorders with monitoring head and preamp. **RUMBLE FILTER SWITCH. GAIN CONTROL. RADIO INPUT LEVEL CONTROL. INPUTS:** Radio, Tape, Tape Head, Aux, Magnetic Phono, High Level Phono (Crystal, Ceramic, FM or Capacity Pickups), High Level for control of 2nd channel of binaural (stereo) system. **HARMONIC DISTORTION:** Less than 0.07% at 1 volt output; less than 1/2 of 1% at 5 volts out. **INTERMODULATION DISTORTION:** Less than 0.09% at 1 volt out. **FREQUENCY RESPONSE:** Uniformly flat over entire audible spectrum. **OUTPUTS (3):** Amp, No. 1 cathode follower—permits cable up to 100' (6' cable furnished); Amp, No. 2 cathode follower—output of 2nd channel (unamplified); Tape Recorder—permits recording while listening or monitoring with monitoring switch—unaffected by volume or tone controls. **3 AUXILIARY AC OUTLETS:** 2 controlled by preamp power switch. **GAIN AND SENSITIVITY:** Mag. —54 db (2mv. input produces 1 volt output. Radio, Tape, Aux —14 db (0.2 volts in produce 1 volt out.) **DYNAMIC RANGE:** No increase in output distortion with up to 1 volt to magnetic phone input. **HUM AND NOISE:** 80 db below 3 volts at full gain (radio, tape, aux inputs); better than 60 db below effective program level at full gain with 10mv. phono or tape input. **TUBES:** 3-ECC83 plus 2-selenium rectifiers. **POWER REQUIREMENTS:** 105-125 volts, 50/60 cps AC. **FINISH:** Anodized gold finish aluminum panel, case gold finish with dark maroon trim and with matching maroon knobs with gold inserts. Die-formed metal case designed for shelf, tabletop or cabinet mounting (on panels up to 3/4" thick). **SIZE:** 12 1/4" w x 9 1/2" d x 3 3/4" h. **SHIPPING WEIGHT:** 10 1/2 lbs. **MODEL KT-300 KIT—**Complete with all parts, tubes, case and detailed construction manual with step-by-step instructions, detailed assembly and mechanical drawings. MODEL KT-400
70-WATT AMPLIFIER KIT
(AVAILABLE COMPLETELY
WIRED AS MODEL LA-70)

Only \$6.95
Down -
10 Months
To Pay!

70-WATT DELUXE BASIC AMPLIFIER

- FREQUENCY RESPONSE 10-100,000 CPS ± 1 DB AT 1 WATT
- POWER RESPONSE 20-20,000 CPS ± 1 DB AT 70 WATTS WITH LESS THAN 2% HARMONIC DISTORTION
- VARIABLE DAMPING • INVERSE FEEDBACK

- MATCHED-PAIR KT-88 OUTPUT TUBES
- METERED BALANCE & BIAS ADJUSTMENTS
- ULTRA-STABLE CIRCUITRY
- PRINTED-CIRCUIT WIRING
- FAMED CHICAGO WIDE-RANGE LINEAR OUTPUT & POWER TRANSFORMERS

FEATURES: A very conservatively rated amplifier designed for continuous heavy duty and specifically intended as a perfect companion-piece for any of the newest high-fidelity speakers and components. The matched-pair push-pull KT-88's, normally top-rated at 100 watts, are used for only 70 watts maximum output. Similarly, only highest quality, conservatively-rated components are used throughout.

To achieve maximum stability without regard to the kind of speaker load used, phase-correction networks have been kept to a minimum and the power supply uses pure resistance-capacitance filtering to avoid the potentially resonant and unstable performance of choke-filtered circuits.

The calibrated variable-damping factor control provides optimum performance from any of the amplifier output taps with any speaker system, without affecting volume level or frequency response. The control can be switched out of the circuit, if desired.

The Balance-Adjust Control and Meter enable you to match output tubes when they are replaced. The Bias adjustment, also read on the built-in meter, is a further provision for correct operation of the output tubes when replaced and is your assurance of continuous top quality performance.

SPECIFICATIONS: **POWER OUTPUT:** 70 watts continuous sine wave, 80 watts program material, 160 watts instantaneous peak. **HUM AND NOISE:** 90 db below rated output. **HARMONIC DISTORTION:** Less than 1%, 20-20,000 cps at 60 watts, ± 1 db; less than 2% at 70 watts. **IM DISTORTION:** Below 1 1/2% at 70 watts (60 and 7000 cps); less than 1% at 60 watts and below 0.3% at 30 watts. **FREQUENCY RESPONSE:** 10-100,000 cps ± 1 db at 1 watt, with gradual controlled roll-off above 100,000 cps; 20-20,000 cps ± 1 db at 70 watts. **STABILITY:** No peaking or marginal instability with reactive loads. **DAMPING FACTOR:** Variable 0.5 to 12. **INPUT SENSITIVITY:** 2.0 volts for 70 watts output. **CONTROLS:** Calibrated variable damping factor control, bias adjust, balance adjust, and meter switch. **METER:** Clear plastic-front rectangular meter. **TUBES:** 2-KT88, 6AN8, GZ34 (Rectifier) plus selenium rectifier. **REAR PANEL:** Incorporates octal socket (unwired) for use in supplying power for preamplifier, 2 auxiliary 117 volts AC outlets, 2 speaker terminal strips, input jack, and fuse. **OUTPUT TAPS:** 4, 8, and 16 ohms. **SIZE:** 14 1/2" w x 10" d x 7 1/2" h. **SHIPPING WEIGHT:** 40 lbs.

LAFAYETTE PROFESSIONAL TURNTABLE Value ~~129.50~~ Only **64.50**
 with AUTHENTIC HYSTERESIS SYNCHRONOUS MOTOR SAVE OVER 50%

Perfect for New Stereo & Monaural Records

PROFESSIONAL 4-SPEED TURNTABLE WITH HYSTERESIS-SYNCHRONOUS MOTOR

The LAFAYETTE TRUE HYSTERESIS-SYNCHRONOUS MOTOR. Since many so-called "hysteresis" motors have appeared and will continue to appear on the market, it is important that you know the difference between the real thing, as provided by Lafayette, and the imitators with partial hysteresis motors!

THE LAFAYETTE TRUE HYSTERESIS SYNCHRONOUS MOTOR IS PERFECT FOR THE NEW STEREO AND MONAURAL RECORDS. THE FACT THAT THE NEW STEREO RECORDS CONTAIN VERTICAL MODULATION IMPOSES STRINGENT REQUIREMENTS ON TURNTABLES. THEY HAVE TO BE FREE FROM RUMBLE, FLUTTER, WOW AND SPEED VARIATION. THE LAFAYETTE TRUE HYSTERESIS SYNCHRONOUS MOTOR MEETS ALL THESE REQUIREMENTS WITH EFFORTLESS EASE, RESULTING IN SUPERIOR REPRODUCTION OF STEREO DISCS, AS WELL AS TREMENDOUS REDUCTION IN RECORD WEAR.

ONLY LAFAYETTE'S HYSTERESIS-SYNCHRONOUS MOTOR, in its price class, is made to extremely fine tolerances (on the order of .0001 inches)! Only Lafayette's motor has 16 cores, a high permeability rotor magnet, ball thrust bearings, oilite sleeve bearings plus felt oil reservoir, cooling fins as an integral part of the rotor and a hollow rotor core for maximum efficiency and minimum heat. Only Lafayette's motor can be oiled from above, without disassembly, through a unique oil feed system. Only Lafayette's motor has a self-aligning armature.

ONLY LAFAYETTE CAN GIVE YOU A REALLY PROFESSIONAL TURNTABLE WITH TRUE HYSTERESIS-SYNCHRONOUS MOTOR AT SUCH AMAZINGLY LOW PRICES!

Here's THE turntable—the last word in professional high-fidelity performance! A fine precision instrument in every sense. Just look at some of these **OUTSTANDING FEATURES: WOW AND FLUTTER:** Less than 0.2% variation of each speed; the extremely low noise and rumble figure of —50 db below average recorded level; wow and flutter (speed variations) of less than 0.2%; new-type oversize precision-ground idler with special lubrication features; positive-locking detents on 4-speed single-knob speed selector; ["off" positions between all speed positions; free-floating shock-mounted motor; automatic idler disengagement in "off" positions; precision spindle turns on single ball bearing; heavy duty 4-pole induction motor. Heavy rubber turntable mat. For 105-120 volts, 60 cps AC, draws 0.13 amperes. Size of motor plate 11" x 10" x 1 1/2"; requires 4" below motor board, 1 1/2" above. Complete with stroboscope disc, 45 rpm adapter, AC line card. Shpg. wt., 14 lbs.

NEW GE MODEL TM-2G COMPATIBLE STEREO TRANSCRIPTION TONE ARM

New professional GE "Stereo Classic" model TM-2G tone arm is designed specifically for use with GE compatible stereo cartridges, as an integrated, all GE pickup system. This light weight aluminum constructed tone arm can also be used with GE VR-II 4-gram cartridges, for outstanding monaural reproduction. Tracks records up to 12" with a maximum error of 2". Superb stereo performance is assured by the feature of static balance. When adjusted, the arm maintains its lateral equilibrium at all times even if the turntable is not perfectly level. Thus, even pressure is exerted on the 2 walls of the V-shaped groove, resulting in minimum distortion and record wear. The arm also features an unusual 2-step tracking force adjustment for precise determination of tracking force. Complete with all necessary accessories. Shpg. wt., 3 lbs.

LAFAYETTE COMPLETE STEREO TRANSCRIPTION PLAYER

- 5-CONTACT PLUG IN HEAD FOR ALL STEREO CARTRIDGES
- 4-SPEED, HEAVY DUTY 4-POLE TRANSCRIPTION TYPE MOTOR ● MAGNETIC BRAKE FOR FINE SPEED ADJUSTMENT ● STYLUS WEIGHT ADJUSTMENT SCREW ON TONE ARM.

Here is a complete hi-fi, compatible stereo pickup system, designed against obsolescence and yet priced modestly. This top quality manual player features a 5-contact plug in head to accommodate the latest stereo as well as monaural cartridges.

The lightweight tone arm is an integral part of the mounting plate and requires no installation. Equally important in contributing to the excellent performance of this system is the new 4-speed turntable assembly. It is equipped with a quiet, heavy duty 4-pole motor, with an exclusive magnetic brake for instantaneous fine adjustment of each speed. Stroboscope disc also included. Smooth operations is assured further by the 10" heavy turntable, fitted with rubber mat. Provision for easy adjustment of stylus pressure is available. Dimensions of mounting plate 12-13/16" left to right, and 10 1/4" front to rear. Requires 2 1/4" below and 3" above motor board. For 105-120V, 60 cps. Accessories included are: 45 rpm adaptor, output cable to amplifier and plug in heads. Shpg. wt., 14 lbs.

NEW! AUDIOGERSH "STEREOTWIN" VARIABLE RELUCTANCE MAGNETIC STEREO CARTRIDGE

● FOR MICROGROOVE MONAURAL & STEREO RECORDS

The new Audiogersh "Stereotwin" model XP variable reluctance magnetic stereo cartridge incorporates all the excellent features of its monaural companion line, the famous "Microtwin" cartridge. This new cartridge, which can be used for superior reproduction with all LP and 45 rpm microgroove records as well as with the new stereo discs, has a frequency response of 30-18,500 cps ± 2 db, output is 75 millivolts of 1000 cps with a recorded velocity of 10 cm/sec and is smooth, free from resonant peaks, with excellent transient response. Compliance is 4x10-6 cm/dyne; cross-channel modulation less than 20 db; recommended load is 37,000 ohms. Stylus is easily replaceable, and the cartridge fits into all standard tone arms. Recommended tracking force 4-6 gms. With single 1/2 mil diamond stylus.

AUDIOGERSH "XP" STEREOTWIN Net 59.50

NEW ElectroVoice® COMPATIBLE "20" SERIES CERAMIC STEREO PHONO CARTRIDGES

With the aid of these cartridges you can now be READY FOR THE MAGIC OF STEREO SOUND. Frequency Response of these fine new cartridges is 20-16,000 cps, within 2 1/2 db, with recommended load of 3 megohms. Each cartridge consists of 2 ceramic elements, each responsive to only one of the stereo record channels, and with an exclusive, patent pending design to eliminate turntable rumble and permit use of any type of changer or transcription player for stereo! Even the sound on your present monaural discs will be improved by the 0.7 mil styli used for LP and stereo on all these cartridges. SIZE is 1 3/16" deep x 1 1/2" high x 37/64" wide; the cartridges fit most tone arms (with 3- or 4-wire phono cables). Cartridge weight is 2.4 gms (single stylus) and 2.6 gms (turnover models). Tracking force is 6 gms; compliance is 2x10-6 cm/dyne laterally and vertically for minimum wear of stereo grooves; output is 0.5 volts; channel isolation is 20 db; vertical rumble rejection is 15 db; distortion is below 2%. Cartridge models with "M" suffix produce velocity output curves and may be used to directly replace all magnetic type cartridges. Shpg. wt., 3 ozs.

THE NEW GENERAL ELECTRIC "GOLDEN CLASSIC" & "STEREO CLASSIC" VARIABLE RELUCTANCE MAGNETIC STEREO CARTRIDGES

- THE FAMOUS GE VARIABLE-RELUCTANCE DESIGN IN FORCE
- A SUPERB MAGNETIC STEREO CARTRIDGE!
- RESPONSE 20-17,000 cps
- HIGH OMNIDIRECTIONAL COMPLIANCE
- 3.5 - 7 GMS. TRACKING FORCE
- LOW TRACING DISTORTION
- 20 DB CHANNEL SEPARATION
- FOR 3- WIRE OR 4- WIRE STEREO PHONO CABLES

A magnificent new addition to GE's famous line of variable reluctance magnetic high fidelity phonograph cartridges, of moderate cost, with "floating armature" design in which the stylus is the only moving part; it is inserted directly through the armature, which "floats" in damping cushions. This reduces effective stylus mass to 2 milligrams. A double mu-metal shield minimizes hum pickup. A ground strap allows use of this cartridge with either 3- or 4-wire stereo systems; the cartridge shield may be grounded individually by a separate wire. The cartridge fits all standard tone arms. SPECIFICATIONS: FREQUENCY RESPONSE: 20-17,000 cps; OUTPUT: 6 mv. per channel at stylus velocity of 5.5 cm/sec.; INDUCTANCE: 500 mh. per channel; CHANNEL SEPARATION: 20 db, 100-7,000 cps; LATERAL COMPLIANCE: 3 x 10-6 cm/dyne; VERTICAL COMPLIANCE: 2 x 10-6 cm/dyne; RECOMMENDED LOAD, EACH CHANNEL: for flat response—100,000 ohms; minimum—47,000 ohms; RECOMMENDED TRACKING FORCE: 3.5-7 gms; SHPG. WT.: 6 oz.

NEW! THE UNIQUE FAIRCHILD 232 MAGNETIC STEREO CARTRIDGE

Successor to the now famous XP-4, with unique dual rotating-coil stereo transducer assembly for flat response without distortion. Extremely high lateral and vertical compliance, 28 db channel separation, 4-load construction for minimal hum. Tracking force 2-4 gms, output 3 mv. per channel, impedance 600 ohms. Recommended load 10,000 ohms or higher. Excellent for microgroove monaural records as well as stereo with 0.6 mil diamond stylus. Fits standard pickup arms. Weighs 12 gms. Size 1 1/2" long x 15/16" w. x 1/8" h. Shpg. wt., 4 oz.

NEW! LAFAYETTE-GOODMANS 3-WAY EXTRA-VALUE HIGH FIDELITY SPEAKERS

- 1 1/4 LB. TO 6 1/2 LB. MAGNETS OF "ALCOMAX"—THE MOST EFFICIENT MAGNETIC MATERIAL AVAILABLE!
- FREE-EDGED CONE SUSPENSION MADE BY EXCLUSIVE GOODMANS PROCESS
- 12" AND 15" MODELS, ALL 3-WAY WITH SMOOTH LOW-, MID- AND HIGH-FREQUENCY COVERAGE
- ALL MODELS HAVE SPECIAL LOW-RESONANCE WOOFER CONES, STIFF MID-FREQUENCY RADIATOR CONES, COMPRESSION-DRIVER TWEETER HORNS
- FREQUENCY RESPONSE 30-20,000 CPS
- HIGH POWER-HANDLING CAPACITY
- HIGH EFFICIENCY WITH LOW-DISTORTION TRANSIENT RESPONSE
- WIDE DISPERSION-ANGLE TWEETER WITH SELF-ALIGNING ALUMINUM VOICE COIL & DIAPHRAGM
- PLUG-IN 12 DB/OCTAVE CROSSOVER NETWORK WITH HIGH FREQUENCY LEVEL CONTROL SUPPLIED WITH ALL MODELS

LAFAYETTE went to this leading English speaker manufacturer for these outstanding custom speakers to provide you with this SUPER-PERFORMANCE VALUE by direct importation. These speakers are all 3-way units, with woofer, mid-range radiator and tweeter all axially mounted to provide an efficient, low distortion, wide-range speaker system. Available in 12" and 15" models, all speakers employ extremely heavy Alcomax magnets—the most efficient magnetic material available—for converting electrical impulses to sound with minimum distortion, especially with musical program material. In the exclusive Goodmans process used in manufacturing the woofer cones of these speakers, the cone rolls and cone edges are bombarded with minute particles of specially-blended plastic ma-

terials to form a virtually free-edged cone suspension without the usual joint faults found in so-called free-edged cones and eliminating standing waves and surround resonances. Frequency response of all models is 30-20,000 cps, voice coils are all 16 ohms. Free-air woofer cone resonances are 25 cps for 15" models, 35 cps for 12" models. At 2000 cps the stiff-coned mid-frequency radiator provides smooth mechanical crossover; the compression driver tweeter has a rigid plastic horn with 2 1/2" circular mouth, 1" diameter aluminum voice coil and diaphragm in a self-aligning assembly with an air chamber and phase equalizer and utilizes the plug-in 12 db per octave electrical network for smooth crossover of 5000 cps. The network has a high-frequency level control with attractive escutcheon and knob.

SP-210 STEREO PREAMP

Two identical preamplifiers with ganged controls for convenient stereophonic control. Matched to stereophonic amplifiers Models SA-232 and SA-260, it derives its power from either of these units or from external power supply. **FEATURES:** Provides automatic shut-off after last record is played. Balance control on front panel permits accurate balancing of levels. DC heater supply for all tubes reduces hum to a minimum. Full range individual bass and treble controls use feedback-type circuits. High gain permits use with even the lowest output magnetic cartridges. Stereo or monaural operation from all inputs. Left-to-right changeover switch on front panel permits proper positioning of instruments. Premium type 7025/12AX7 low noise triodes are used in low level stages. **SPECIFICATIONS:** Outputs: 4 (2 in each channel). Inputs: 12 (6 in each channel). Frequency response: 1 db 20-20,000 cps. Output audio output jack 1 volt tape output .11 volt. Sensitivity for 1 volt output; phono and mike 3 millivolts; tone head 2 millivolts; tuner, multiplex and Tape recorder .11 volt. Harmonic distortion at maximum sensitivity less than 0.2%. Phono equalization for RIAA, LP, NAB and AES curves; NARTB tape head equalization. Tubes: 7025/12AX7 preamplifiers (one in each channel), 12AX7 voltage and tone control amplifiers (one in each channel). Supplied with 3 foot power cable, and 3 foot shielded audio output cables. Size: 14 1/2" L x 5" H x 11" D. Shpg. wt., 15 lbs.

PILOT MODEL SP-210 Net 89.50
MODEL P-10—optional power supply for use with Model SP-210 when used with amplifiers other than Pilot Models SA-232 or SA-260. Net 19.50

SA-232 STEREO AMPLIFIER

A compact two channel amplifier for stereo use. Two complete power amplifiers with total output power of 32 watts (16 watts per channel) and peak output of 64 watts. Interleaved windings and grain-oriented steel of output transformer guarantee even, efficient performance. This amplifier supplies power to Model SP-210 stereophonic preamplifier, and is a matched companion to stereo preamplifiers Models SP-210, SP-215, or SP-216. Automatic shut-off switch turns off entire Hi-Fi system after last record is played. Has two convenience outlets for associated equipment, and motor plug for phonograph motor. Frequency response 20-20,000 cps with maximum harmonic distortion of 1% and maximum intermodulation distortion of 1.5%. **Sensitivity:** 1 volt for full power output. Hum level 90 decibels below full power output. Output impedances 4, 8 or 16 ohms. Tubes used: 12AU7 input amplifier, two 12AX7 amplifiers-phase inverters, four E184 power output tubes (two in each channel) and a GZ34 rectifier. Power consumption 120 watts at 110 volts, 60 cycle AC. Size: 13 1/2" L x 5 1/2" H x 5" D. Shpg. wt., 25 lbs.

PILOT MODEL SA-232 Net 89.50

SA-260 STEREO AMPLIFIER

An extremely compact stereophonic amplifier with 60 watt RMS output (30 watts per channel) and 120 watt peak output. A companion unit to the SP-210 stereophonic preamplifier. Individual bias and balance controls permit accurate balancing of output stages for minimum distortion. Output transformers of special high efficiency design with interleaved windings and grain-oriented steel for maximum power response. Convenience outlet for associated equipment, plus automatic equipment shut-off after playing of last record, offer the highest flexibility in installation and operation. Frequency response 20-20,000 cps, at 1/2% harmonic distortion and 1% intermodulation distortion. **Sensitivity:** .8 volt for full rated output. Hum level 90 db below full power output. Output impedances 8 and 16 ohms. Tubes: 12AU7 first voltage amplifier, two 12AX7 amplifiers-phase inverters (one in each channel), four EL34/6CA7 power output tubes (two in each channel) and two 5U4GB rectifiers. Power consumption 215 watts, 105-120 volts, 60 cycles, fused. Size: 15 1/2" L, 5 1/4" H, 7 1/4" D. Shpg. wt., 40 lbs.

PILOT MODEL SA-260 Net 129.50

SM-245 STEREO PREAMP AND AMPLIFIER

A versatile combination of stereo preamplifier, 28 watt stereo amplifier, and stereo control center. **FEATURES:** Stereo or monaural operation from all inputs. Automatic shut-off position on power switch turns off entire system after last record. Left-to-right stereo switch conveniently switches channels. Stereo balance control adjusts level of channels for equal output. Low impedance dual outputs permit stereo recording even with long leads. DC heater supply for low level stages assures low hum and eliminates cumbersome hum balancing circuits and controls. Loudness control is independent of volume control. Phono inputs equalized for RIAA, NAB, LP and AES; tape head input for NARTB curve. **SPECIFICATIONS:** Power output 14 watts RMS continuous each channel, 28 watts peak. Response: 1 db 20-20,000 cps. Harmonic distortion at full output less than 1%, intermodulation distortion at rated output less than 1.5%. **Sensitivity:** for full output: phono 8 millivolts, tone head 2.5 millivolts, microphone 3.5 millivolts, tuner and auxiliary 150 mv. Hum and noise 80 db below rated output. Input impedances: phono and tape head, 100K, mike 1 meg, radio and aux 470K. Speaker output impedance 4, 8, or 16 ohms, tape output impedance 500 ohms. Two convenience outlets controlled by power switch and automatic shut-off. Tubes: 4-EL84 power output tubes, 2-7025/12AX7 preamplifiers, 4-12AX7 amplifiers, 12AU7 cathode followers, GZ34 power rectifier. 150 watts, 105-120 volts, 60 cycles. Size: 4-13/16" H, 14-11/16" W, 12 1/4" D. Shpg. wt., 30 lbs.

The A-224 Trio, a most flexible and versatile unit, does the work of three electronic units to convert your existing monaural hi-fi system to stereo. The Harman-Kardon A-224 Trio (less cage) comprises both a dual channel stereo preamplifier and a power amplifier in which the two 12 watt output power channels may be connected for 24 watt monaural operation on one channel by merely throwing a switch on the chassis. Your existing hi-fi equipment serves as the power amplifier of the second channel, thus completing the full stereo system. The new Pickering Compatible Fluxvalve 371-.7D cartridge, which is to be wired into your present tone arm (complete directions supplied) and an excellent 12" speaker, the University 312, a 3-way diffraxial complete the "Add-On" system. This "add-on" is capable of delivering 12 watts of audio power at +1.0 db over a range of 45-20,000 cps. with practically no audible hum and less than 1% harmonic distortion—with plenty of reserve power, up to 24 watts. The

HARMAN-KARDON A-224 STEREO AMPLIFIER

UNIVERSITY 312 SPEAKER

PICKERING 371-.7D STEREO COMPATIBLE CARTRIDGE WITH DIAMOND STYLUS

preamplifier section has some interesting features, such as: tape inputs for future stereo tape playback, tape output for future stereo tape recording, loudness and balance control of the two channels, all the usual function selections and equalization positions, such as phono, tuner, contour control. Thus, this moderately priced add-on system enables you to convert to stereo with the minimum number of additional units—saves you space and money! Your compatible Pickering .7 mil diamond cartridge will enable you to play both your present LP records and your new stereo records, as your system will be completely compatible. The A-224 is beautifully styled. The system comes with all interconnecting cables and instructions for installation. Shpg. wt., 30 lbs.

NEW! LAFAYETTE 8" HI-FI SPEAKER

- "MECHANICAL 2-WAY" SPEAKER OF UNUSUAL DESIGN • EXTRA-HEAVY MAGNETS, EXTREMELY HIGH FLUX
- RESPONSE 40-16,000 CPS
- SPECIAL PATENTED CONE CONSTRUCTION AND MATERIAL FOR SMOOTH, DISTORTION-FREE RESPONSE
- EXCELLENT FOR STEREO

9.95

A most unusual dual-cone construction is used in these extra-high-quality 8" speakers to economically provide the same type of wide-range frequency response normally found only in true coaxial speakers or multiple speaker systems. There are 2 separate cones, acting through a common voice coil. The outer edge of the tweeter cone is attached to the mid-section of the woofer cone; both cones "float" on flexible, corrugated edges. This mounting,

plus apertures provided behind the woofer cone, results in mechanical crossover so that both cones operate in phase at low frequencies, but only the tweeter cone operates at high frequencies. This gives improved high frequency directional characteristics and minimum distortion. The patented cone materials provide extremely smooth reproduction. Magnets are large and heavy, with flux density of 10,500 gauss and total flux of 56,000 maxwells. Their high efficiency means good transient characteristics, low distortion, and good response at either high or low sound levels. Terminals are screw-type for solderless connections. Sensitivity is 99.5 db/watt; resonance is 55-70 cps; voice coil is 8 ohms. Size is 8" diam., 4 1/4" deep; requires 6 1/2" diam. baffle opening. Shpg. wt., 5 1/2 lbs. **SK-98 8" 2-way Speaker** Net 9.95

NEW! 6 1/2" COAXIAL SPEAKER

- FOR EXCELLENT HI-FI SOUND
- ECONOMICAL & A SPACE-SAVER FOR STEREO
- RESPONSE 50-16,000 CPS!
- BUILT-IN CROSSOVER NETWORK
- LARGE, HEAVY MAGNETS

6.95

An excellent speaker, with all the best features of coaxial design, especially recommended for use in stereo high fidelity systems where space and/or cost are factors.

The 6 1/2" woofer is provided with extra-heavy large magnets for good power sensitivity and low distortion; the 2" tweeter is a separate speaker coaxially mounted in a housing which completely seals off back radiation and with a mesh dispersion screen to provide smooth, wide-angle-dispersion high frequency response. The built-in electrical crossover contributes to the overall smooth tonal response of 50-16,000 cps. Woofer resonance is 70 cps; voice coil impedance is 8 ohms. Color-coded, screw-type terminals. Requires 5 1/2" diameter cutout. Mounts with 4 equally-spaced holes. Size is 6 1/2" diam., 3 1/4" deep. Shpg. wt., 3 1/2 lbs.

LAFAYETTE UNIVERSAL HI-FI BASS REFLEX ENCLOSURE KITS

• EASIEST TO ASSEMBLE — ALL YOU NEED IS A SCREWDRIVER! • 3/4" WHITE BIRCH • PRECISION-CUT — FITS TOGETHER SMOOTHLY • PERFECT FOR SINGLE WIDE RANGE, 2-WAY OR 3-WAY SPEAKER SYSTEMS • HIGHBOY OR LOWBOY STYLE

All pieces of these carefully designed bass reflex high fidelity speaker enclosures are accurately precut of 3/4" veneers to fit snugly together and eliminate spurious resonances. Front panels are handsomely detailed with picture-frame moulding and covered with pleasingly decorative plastic acoustic grilles to blend with any finish and room decor. Attractively tapered offset legs are protected by good-looking brass ferrules. Acoustic lining material is provided to prevent reverberation and cabinet resonance. Cutouts are provided for 15" speaker plus adapter for 12"; 8 1/2" or 8" midrange plus adapter for 5" and blank wood block if no midrange speaker is used; Jensen compression horn tweeter plus adapter for Lafayette HK-3, HW-7 or Lafayette-Goodmans SK-104 tweeters plus blank wood block if no tweeter is used. Thus, any single wide-range 12" or 15" speaker may be used, or any Lafayette 2- or 3-way speaker system, or almost any other combination of speakers. Kits are supplied unfinished, smoothly sanded and ready for finishing. The lowboy-style cabinet dimensions are (less legs) 28 3/4" w x 23 1/2" h x 16 3/4" d; legs are 5" high. Highboy has same dimensions with height and width interchanged. Instructions, all parts, hardware, and grille are included with each kit. Shpg. wt., 54 lbs.

NEW! LAFAYETTE-GOODMANS High Fidelity Speakers

FROM ONE OF ENGLAND'S LEADING SPEAKER MFR'S!

Made to Lafayette's own rigid specifications!

LAFAYETTE-GOODMANS 12" WOOFER

A highly-efficient low-frequency transducer for faithful reproduction of the lowest audible frequencies without tone coloration or distortion. Incorporates high flux Alcomax magnets for smooth response and good power sensitivity. Frequency response is 30-7,000 cps, with recommended crossover at 700 to 1000 cps. Total flux is 89,500 maxwells; voice coil diameter is 1 3/4". Rated at 30 watts power handling capacity for integrated program material in a multiple speaker system with an LC crossover network. Voice coil impedance 16 ohms. Size 12 1/4" diam. x 6" deep. Shpg. wt., 9 lbs.

SK-102 12" Lafayette-Goodmans Woofer Net 23.50

LAFAYETTE-GOODMANS 8 1/2" MIDRANGE SPEAKER

A sweet-sounding high-fidelity reproducer capable of doing full justice to the most important range of musical reproduction — the mid-frequency range from 500 to 5,000 cps. Incorporates high-efficiency Alcomax magnets, a specially-constructed cone with an "accordion fold" half-way down for smooth sound reproduction free from peaks and distortion; plus a completely sealed rear housing to prevent back radiation and interaction with other speakers. Response is 500 to 8,000 cps. Recommended crossovers are 700-1000 cps at the low end, 5,000 cps at the high end in a 3-way system. Magnet total flux is 32,900 maxwells. Voice coil diameter is 1". Power rating is 30 watts program material in a 3-way system. Voice coil is 16 ohms. Size is 8 1/2" diam. x 3 3/4" deep. Shpg. wt., 4 lbs.

SK-103 8 1/2" Lafayette-Goodmans Midrange Net 5.95

LAFAYETTE-GOODMANS high frequency DRIVER and HORN

• Self-Centering Aluminum Voice Coil

A highly efficient compression-type wide-angle radiator for the higher audio frequencies. With high flux Alcomax magnets. Rigid plastic horn with circular mouth and special design acoustic chamber with phasing plug achieves smooth wide-angle distribution to extremely high frequencies. Horn diameter 2 1/2", mouth opening 1 3/4" diam. Pot diameter 2 3/4". Overall depth 3". Frequency response 2500 to 16,000 cps; 8 db down at 20,000 cps. Magnet flux is 25,400 maxwells. Voice coil diameter is 1". Recommended crossover is 5,000 cps. Power rating is 30 watts program material in a 3-way system. Voice coil is 16 ohms. Shpg. wt., 3 lbs.

SK-104 Lafayette-Goodmans Tweeter Net 10.95

PERFECT for LAFAYETTE BASS REFLEX CABINETS

LAFAYETTE-GOODMANS 3-way SPEAKER SYSTEM

• HANDLES 30 WATTS • FAMOUS ENGLISH GOODMANS-MADE 12" WOOFER, 8 1/2" MIDRANGE, COMPRESSION-DRIVER HORN TWEETER • LAFAYETTE L/C CROSSOVER NETWORK • SYSTEM RESPONSE 30-16,000 cps.

Here is an outstanding 3-way high fidelity speaker system which we are indeed proud to be able to offer. It includes a group of speakers custom-made for Lafayette by Goodmans, famous English manufacturer of some of the world's best high fidelity speakers. The system is ideal for installation in Lafayette bass reflex speaker enclosures, and provides the extremely wide range of 30 to 16,000 cps (8 db down at 20,000 cps) smoothly and, without unpleasant peaks. Power handling capacity of the system is 30 watts of integrated program material. Included in the system are the Lafayette-Goodmans SK-102 12" woofer covering the range from 30 to 700 cps, the Lafayette-Goodmans SK-103 8 1/2" midrange speaker covering 700 to 5,000 cps, and the Lafayette-Goodmans SK-104 compression-driver tweeter operating at from 5,000 cps to over 16,000 cps. Also included is the Lafayette LN-5 inductance-capacitance (L/C) crossover network with attached Brilliance (high-frequency) and Presence (mid-range) controls. System impedance is 16 ohms. This is a really great system at an unusually low price! Shpg. wt., 25 lbs.

- 8-INCH MID-RANGE SPEAKER (SK-74)
- METAL-CASED CONE TYPE HI-FI TWEETER (HK-3)
- 3-WAY CROSSOVER NETWORK WITH CONTINUOUSLY VARIABLE PRESENCE & BRILLIANCE CONTROLS (LN-3)

38.50

Here is another 3-way speaker system designed to save you money and make your next hi-fi project quick and easy. Truly a triumph in the field of acoustics. This combination created intense interest with budget-minded music lovers at various trade and consumer shows because of its unusual performance capabilities. Each component is specifically designed to reproduce its own range with optimum fidelity. The system consists of the SK-68 12" Woofer which gives exceptionally clean mellow bass frequencies from 35 to 350 cycles, the 8" Driver which reproduces the mid-range frequencies from 350 to 5000 cycles clearly and true-to-life, and the new metal-cased HK-3 High Frequency Tweeter which provides brilliant treble response in the 5000 to 16,000 cycle region. The LN-3 Crossover Network, crossing over at 350 and 5000 CPS, completes this ultra modern system. Has "Brilliance" and "Presence" controls. Shpg. wt., 22 lbs.

TAPE RECORDER

Here is a sensational new recorder embodying all the newest developments in tape recording! Has new heads with 0.12 mil gap for response of 50-12,000 cps at 3 3/4 inches per second tape speed—equal to or better than formerly available from most recorders at 7 1/2 ips! Response at 7 1/2 ips goes to beyond audibility!

The New heads provide 4-track stereo with double the playing time of 2-track stereo; with the improved frequency response 4-track stereo provides quadruple the playing time at 3 3/4 ips over that of 7 1/2 ips dual track.

The new Lafayette recorder is compatible; it will play 2-track stereo tapes, 4-track stereo open tape reels, or monaural tapes; it will also record standard half-track monaural. It has one complete 5-watt amplifier channel with 6" woofer, 4" tweeter and L/C crossover network built-in; it also has a built-in preamplifier for the second (stereo) channel. A separate matching portable amplifier-speaker combination is provided to be used with the tape recorder's built-in preamp for the second channel; it includes a self-powered 5-watt amplifier with volume and

tone control, 6" woofer, 4" tweeter, and L/C crossover network. The amplifier has 2 inputs for connecting tuner, ceramic phono, tape preamp, etc.

The recorder's deluxe mechanism has a single-knob rotary control for greatest possible simplicity of operation and a heavy-duty 4-pole balanced motor. Flutter and wow are below 0.4%; has a sensitive "magic eye" recording level indicator. Styling is 2-tone, modern, in ivory and gray. Comes complete with 5" reel of tape, empty 7" takeup reel, crystal mike and instructions. Size of recorder is 14" w x 17" d x 11" h.; size of amplifier-speaker unit is 9 1/2" h x 12 1/2" w x 12 1/2" d. For 105-120 volts, 60 cps AC. Shipping wt. of complete system is 30 lbs.

LAFAYETTE - FAMOUS-NAME HI-FI KITS

SUPER VALUES! BUILD-IT-YOURSELF AND SAVE!

NEW DYNAKIT MARK III 60 WATT

- POWER AMPLIFIER KIT**
- PRE-WIRED PRINTED CIRCUIT ASSEMBLY
 - MATCHED PAIR PREMIUM TUBES
 - CHOKE FILTERING TO MINIMIZE NOISE

79.95 Only \$8.00 Down
\$8.00 Monthly

Compact 60 watt basic amplifier designed for finest listening quality in modern hi-fi installations. Pre-wired printed circuit assembly with parts mounted assures correct trouble-free construction in as little as three hours. Accurate and simple bias setting independent of meter accuracy. Balancing or critical adjustments are not required to meet performance specifications. Frequency response better than $\pm .5$ db from below 6 cps to above 60 kc. Response at any level up to 60 watts is $\pm .1$ db over a range in excess of 20 cps to 20 kc. IM distortion less than 1% at 60 watts, .5% below 50 watts and .04% at average listening levels. Less than 1% harmonic distortion within 1 db of 60 watts from 20 cps to 20 kc. Excellent transient response on pulses, square waves, etc., and noise 90 db below maximum. 4, 8, and 16 ohm outputs. Utilizes 1 6AN8, 2 KT88 (or 6550), 1 GZ34 and selenium rectifier. Washable, chip-proof vinyl coated finish on cover. All parts, tubes and protective cover included in kit. Shpg. wt., 28 lbs.

5-WATT PUSH-PULL AC-DC HI-FI AMPLIFIER KIT

- SEPARATE VOLUME, BASS AND TREBLE CONTROLS
- PUSH-PULL AUDIO OUTPUT STAGE
- INVERSE FEEDBACK CIRCUIT
- AC OR DC OPERATION

10.95

Here in kit form is an AC-DC hi-fi amplifier that presents unusual features despite its amazingly low price. The separate bass and treble controls permit adjustment of both low and high frequency response and balance. Works equally well with both crystal or ceramic cartridges. Has a 4-tube line up—a 12AX7 amplifier and phase inverter, a 35W4 rectifier and a pair of 35C5's in push-pull, having a power-packed low distortion output. The circuit utilizes an inverse feedback loop to reduce the level of hum and distortion. Kit is complete containing all essential parts, tubes and detailed instruction manual showing pictorial and schematic diagrams. Shpg. wt., 4 lbs.

12 TUBE AM-FM TUNER KIT

43.95

Only \$4.40 Down!

- 12 TUBES PLUS CRYSTAL DIODE DETECTOR
- DUAL LIMITERS—FOSTER-SEELEY DISCRIMINATOR
- ARMSTRONG CIRCUIT—TEMPERATURE COMPENSATION
- FM RESPONSE 20-20,000 CPS $\pm .5$ DB
- 6 SECTION VARIABLE-TUNED RF STAGES

Build this fine 12 tube AM-FM tuner that covers both 88-108MC and 530-1650KC AM and FM bands with superb quality. Frequency response is 20-20,000 CPS $\pm .5$ db on FM, and 20-7500 CPS ± 3 db on AM. Twelve tube circuit includes 4-6AU6, 2-6AB4, 2-6BA6, 1 each 6CB6, 6AL5, 6BE6, and 6CA cathode follower output plus 1N34-60 crystal diode detector. Has 6 section variable capacitor, iron core tuned I.F., discriminator, antenna, RF and oscillator coils. Band width is 200KC. Has tuned RF stage in both AM & FM. Hum level is -70 db below average output. Drift is held to minimum by temperature compensation. Extremely sensitive, 5-10 μ v, 20-30 db on FM, 5 microvolts on AM. Controls are tuning and 3 position switch for AM, FM, On-Off. Copper plated lacquered 16 gauge chassis measures 9 1/2" L x 5" H x 8" W. Rich gold finished escutcheon panel and brass inlay knobs. 24 page instruction manual is replete with easy to follow pictorial, mechanical and schematic diagrams with step by step instructions for assembly and operation. External power supply required is 190 volts DC-55 ma and 6.3 volts AC 4 amp. KT-109 power supply is ideal for this purpose. Kit is complete with all parts and tubes. Shpg. weight 12 lbs.

EICO 30-WATT HI-FI INTEGRATED AMPLIFIER KIT with PREAMPLIFIER EQUALIZER AND CONTROL SECTION

- EXTREMELY VERSATILE EQUALIZATION AND CONTROL
- NEWLY DESIGNED "LOW-SILHOUETTE" CONSTRUCTION

57.95 Complete Kit

Only \$5.80 Down - \$6.00 Monthly

Combines the high stability margin, wide frequency range, negligible distortion and exceptional power supply reliability of the power amplifier section with an extremely versatile preamplifier control section featuring tape head and microphone inputs and including scratch and rumble filters in addition to the usual facilities. Has 3 low level inputs for magnetic phono tape head and microphone and 3 high level inputs for TV or tuner, crystal or ceramic cartridge or tape; 4 phono equalizations and NARTB tape head equalization with equalization circuit of extremely low distortion feedback type. Single switch selects any input and/or equalization. 4 EL84 push-pull parallel output stage with very high quality hi-fi audio transformer provide 30 watts continuous, 47 watts peak power with minimum distortion. IM Distortion: 2% at 30 watts, 0.5% at 10 watts. Harmonic Distortion: Below 1% 20 cps-20KC ± 1 db at 30 watts. Frequency Response: At 30 w ± 0.5 db 15 cps-50KC; ± 1.5 db 15 cps-100KC; ± 0.1 db 15 cps-30KC at any level from 1 mw to 30 w. Square Wave Response: 20 cps to 20 KC essentially undistorted. Speaker Connections: 4, 8 and 16 ohms. Sensitivity (input for rated output): Mag Phono-5 mv, Tape Head - 2 mv, Mic - 4 mv, High Level - 2 mv. Tubes: 2-ECC83/12AX7, 2-EC90/6CA, 4-EL84, 2-EZ81. Power Requirements: 117V, 60 cps; 140 watts consumption. Size: 15" x 4 1/2" x 10 1/2". Shpg. wt., 28 lbs.

49.95 COMPLETE KIT

Only \$5.00 Down - \$5.00 Monthly

High quality equalizer and control section plus 20 watt Ultra-Linear Williamson-type power amplifier. Low distortion feedback equalization; 5 equalizations provided for LP's and 78's including RIAA. Variable turnover, low distortion feed-back tone controls. "Flat" positions at center settings of control knobs. Loudness control and separate level control both on front panel. Provides adjustable Fletcher-Munson compensation or no compensation when desired. Loudness control can be adjusted to give desired listening level without affecting tape output. Permits use of up to 30 ft. of cable. Six inputs: 4 high level switched inputs - Tuner, TV, Tape, Auxiliary (crystal/ceramic phono or second tuner); 2 low level inputs (not switched) - provides proper pick-up loading and attenuation for all leading magnetic, FM and high quality crystal cartridges without changing resistors. Hum balance control for balancing out 60 cycle residual hum. Power Consumption: 110-120 volts, 60 cps, 100 watts. Tubes: 2-12AX7, 2-12AU7A, 2-6L6GB, 1-5U4GB. Handomely styled to eliminate the necessity for cabinetry. Size: 8 1/2" H, 15" W, 10" D. Shpg. wt., 24 lbs.

NEW! EICO MODEL HFT90 FM TUNER KIT

- PRE-ASSEMBLED, PRE-ALIGNED, SHIELDED FRONT END
 - TRAVELING TUNING INDICATOR
 - EXCELLENT SENSITIVITY
 - SIMPLIFIED CONSTRUCTION AIDS
- Only 10% Down

Kit includes an entirely completed and aligned "front end" housed in a solid aluminum shield which not only provides excellent sensitivity and low noise, but is also stable and drift-free because of advanced circuitry and temperature-compensated components. This "front end" makes possible construction of an FM tuner comparable to a factory wired unit, even by a novice builder. A traveling tuning indicator, travels along the slide-rule dial, blossoming into an exclamation point at the exact center of the channel. Other features include fly-wheel tuning, automatic gain control, stabilized low limiting threshold, broad band rate detector, and very low distortion plus flat frequency response. Important construction aids include simplified dial cord arrangement and pre-wired tuning eye assembly. SENSITIVITY: 1.5UV for 20db quieting; 2.5UV for 30db quieting; full limiting from 25UV. INPUT: 300 ohm balanced. OUTPUTS: Cathode follower and multiplex. TUBE COMPLEMENT: 1-ECC85/6AQ8, 3-6AU6, 1-6AL5, 1-6CA, 1-6X4, 1-DM70. HUM: 60db below 1 volt. POWER: 110-125V AC, 60 cps; 40 watt consumption. SIZE: 12" w x 8 1/4" d x 3 3/8" h. Complete kit with detailed instructions.

NEW! LAFAYETTE STEREO PHONO AMPLIFIER KIT

- GANGED TONE CONTROLS
- STEREO-MONAUROUS SWITCH
- .04 VOLT SENSITIVITY
- 4 WATTS STEREO OUTPUT
- ISOLATION TRANSFORMER
- SEPARATE VOLUME CONTROLS

Only
\$18.95

Another stereo first by Lafayette's engineering staff. A complete kit for building this new stereo amplifier. This small unit is so versatile there is no end to the number of its uses. Features separate volume control for each channel to completely compensate for unequal input levels or for speakers having different efficiencies. A Stereo-monoaural switch is used to feed one channel to both speakers, and to reverse the channels on stereo for proper positioning of instruments. Ganged tone controls provide the easiest way to vary tone of both channels. For example: a stereo changer, two speakers and feed right for any use where a small stereo amplifier is required. This amplifier could all be mounted in one cabinet to make an ideal stereo phonograph for use both at home and during vacations or trips. This versatile amplifier is ideal for custom mounting in even the tightest locations; specially designed for small apartment sized stereo systems. Two speakers, the model KT-126 amplifier, and a small matching enclosure make the perfect portable monitoring attachment for a stereo tape recorder; will monitor tapes as they are recorded, and will play them back in full stereo sound, even in the field. An isolation transformer included on the chassis makes this circuit extra safe to use, even for children. There is no shock hazard, since the chassis is completely isolated from the power line. Other circuit features for better all-round performance include application of negative feedback to driver and output stages for wide range response and extra low distortion. Dual-triode 12AX7 tubes function as voltage amplifier and driver, providing very high gain; 40 millivolts drives this unit to full output. This tremendous gain, plus an extremely high input impedance, make this amplifier perform exceptionally well with all types of ceramic and crystal pickups, as well as tuners, tape recorders, etc. Selenium rectifier power supply has extremely good regulation. Logical layout, high quality parts, plus complete instructions for assembly, make this kit a pleasure to build and use. Tubes: 2-50C5, 2-12AX7 plus selenium rectifier. Size: 9 1/2" x 5" x 4 1/2". Complete with all parts. For 110-120 volts, 60 cycle AC. Shpg. wt., 7 lbs.

NEW! SUPER-SENSITIVE PHOTOCELL ELECTRONIC RELAY KIT

- WITH CLAIREX CADMIUM SULPHIDE PHOTOCELL
- ADJUSTABLE SUPER SENSITIVITY—WORKS WITH JUST A FLASHLIGHT AT 250 FEET!
- NEEDS NO SPECIAL HIGH-INTENSITY LIGHTS
- INSTANTANEOUS OR SUSTAINED OPERATION ON THE FLIP OF A SWITCH!

CAN BE USED AS
BURGLAR ALARM

12.95

Lafayette's latest achievement in a super-sensitive photocell relay kit. Ideal for sustained operation required for burglar alarms, door buzzers, for turning on porch and home lights at night to discourage prowlers when away in the evening. Excellent for instantaneous on-off operation required for counters, packaging, door opening, motor activation and countless industrial applications. A simple push on the "RESET" switch opens the external circuit and turns off the alarm. The unit operates on 110 volts AC and incorporates the efficient 5823 cold cathode tube, permitting longer life since there are no filaments to burn out. The controlled circuit is plugged into a convenient 110V AC output socket. A simple change in wiring (in instructions), as well as convenient input terminals, enable you to supply the external circuit with any desired voltage. Relay contacts rated at 5 amps permitting up to 500 watts external load on 110 Volts AC. Complete with all parts, photocell, tube, chassis, silk-screened metal cabinet and easy-to-follow illustrated instructions. Size: 3" x 4" x 5". Shpg. wt., 3 lbs.

- 2-STAGE BROADCAST RECEIVER
- WIRELESS BROADCASTER
- WIRELESS CODE TRANSMITTER
- REGENERATIVE RADIO RECEIVER

ASSEMBLE THE BASIC COMPONENTS — THEN WIRE EACH CLEARLY EXPLAINED CIRCUIT BY SIMPLY CONNECTING THE PROPER LEADS.

AN IDEAL LABORATORY KIT WHICH HELPS TEACH YOU HOW TRANSISTORS WORK IN A PRACTICAL WAY.

THE MOST EXTENSIVE TRANSISTOR LAB KIT IDEAL FOR STUDENT — HOBBYIST — EXPERIMENTER

Lafayette's new 15-in-1 transistor experimenters kit is the most practical introduction to the understanding of the operation of transistors — since it utilizes basic transistor principles and circuitry. Its unexcelled simplicity of construction provides a fascinating and educational program of instruction. You build practical, useful operating transistor devices that teach you transistor fundamentals and applications.

This versatile kit is supplied complete with transistors, relay, photocell, dual headphones and all necessary items including lead wire, solder and battery — Nothing else to buy. You also receive an easily understood instruction manual which explains just how each of the 15 circuits works. Battery powered, the kit is shockproof and safe — ideal for beginners. Shpg. wt., 4 lbs.

THE LAFAYETTE NOVELETTE

FIRST REALLY NEW IDEA IN PORTABLE RADIOS

\$9.95 SALE IN TWENTY YEARS

FOR GROUP LISTENING: The Novelette has its own plug-in extension speaker

● **FOR PRIVATE LISTENING:** It has a separate plug-in earpiece so you alone can listen

- **POCKET SIZE:** The set measures only 5 1/2" L x 3 1/8" H x 1 1/2" D.
- **SEPARATE SPEAKER:** Superb tone quality. Case measures 2 3/4" W x 3" H x 1 3/8" D.
- **BEAUTIFULLY STYLED:** Handsome maroon plastic case with clear lucite dial with silver lettering

The Lafayette Novelette is the finest handiest little portable set you can buy. Because the speaker is in its own properly baffled case free from the space limitations of self-contained speakers, the tone quality is superb. A 3 1/2 ft. extension cord enables the speaker to be placed conveniently wherever desired so all can hear. When you want to listen "silently" without disturbing anyone else, you simply plug in the personal earpiece in place of the speaker. It is therefore ideal for both home use or to take with you on picnics, camping, or wherever you go. It slips right into your pocket. The circuit is very selective, sensitive, and powerful using 4 tubes with built-in antenna. The Novelette comes complete with tubes, speaker and earpiece. Less batteries. Shpg. wt. 3 lbs.

- Machined Marine Fittings!
- Die-cut Embossed Deck!

Lafayette makes it possible for everyone to experience the thrill of radio control models. Completely packaged — completely assembled — not a kit in any sense. Now you can have the boat-motor-transmitter-receiver-and electric servo mechanism — ready to run — at the lowest price ever offered! A flashy 18" cabin cruiser — with a forward speed of 3 to 5 feet per second. Authentic-machined-marine fittings. All heavily chromed. Operating running lights — plastic windshield — planked deck — removable cabin and deck — snap fittings for receiver and batteries — heavy double permanent magnet screwmotor — electric servo mechanism to control rudder — preformed styrene pan to hold motor — servo-receiver-batteries. All components fit neatly and snugly below decks in preformed positions. Highly stable, crystal controlled transmitter and specially matched receiver keep the craft under your control up to 1,000 feet. You choose the course, straight — left — right — in any sequence. Tight turning radius — amazingly quick response. Hull specially designed for electric propulsion. Factory assembled, crystal controlled transmitter measures only 8 1/2" x 2 3/4" x 1 1/2". Range approximately one mile on the exam-free 27.255 MC R/C band. Matching receiver is completely enclosed — designed for use in boats — assembled, wired and factory tested. Just snap in the receiver and batteries — switch on the transmitter — and proudly join the ranks of the Model Mariners! Shpg. wt. (Boat with motor and servo, transmitter and receiver — less batteries) 12 lbs. With complete instructions.

NEW! Lafayette's SUPER-TROL R/C EQUIPMENT

(A) RADIO CONTROL TRANSMITTER: Assembled-tested-guaranteed. No license examination required for operation. Crystal controlled for stability and to meet F.C.C. regulations. Uses powerful 3A5 tube for range of approximately one mile. Will operate any 27.255 mc R/C receiver. Overall dimensions only 8 1/2" x 2 3/4" x 1 1/2" — just a handful! Includes antenna — tube — crystal — and instructions. Less Batteries. Shpg. wt., 2 1/2 lbs.

F-249 Net 14.95
Batteries required: Burgess U30 (3 needed) 1.75 ea. Burgess #2 (1 needed) .13 ea.

(B) RADIO CONTROL RECEIVER: Completely wired and tested receiver — extremely sensitive and stable. Completely enclosed — ideal in boats — or case may be removed if desired. Ingeniously constructed to withstand vibration and shock. Features external fine tuning — antenna "snap" lead — plug for power and actuator connections. Ideal Companion for F-249 Transmitter and F-327 Servo shown elsewhere on this page. Requires one 1.5V battery and one 45 Volt battery. Size determined by use. Measures only 3" x 2 3/4" x 1 1/2". Complete with tube and instructions. Less batteries. Shpg. wt., 8 oz.

TRANSISTORIZED RECEIVER KIT

- THE MIGHTY MITE OF THE R/C FIELD!
- WEIGHS — 1 OZ.
- 100% SUB-MINIATURIZED!

Lafayette takes the lead in the popular R/C field with this super sensitive and efficient subminiature transistorized "Citizen Band" receiver kit. Operates on 27.255 MC and can be used with any "Citizen Band" remote control transmitter. A perfect mate for Lafayette Remote Control Transmitter Kit KT-87. Planned for compactness and sturdiness to withstand severe vibration and shock, yet weighs no more than 1 oz. 2-1/16" L x 1 1/2" W x 1-11/16" D. overall. Uses one 1 1/2 V and one 45V batteries. Battery size depends on size of model.

LORENZ REMOTE CONTROL TRANSMITTER KIT FOR MODEL PLANES, BOATS AND CARS

As Described in POPULAR ELECTRONICS

The Lorenz Remote Control Transmitter is a highly efficient instrument designed to operate on the license free "Citizen Band" frequency of 27.255 megacycles. The only F.C.C. regulation is that on F.C.C. form 505 (supplied with kit) be filled out and sent to the nearest F.C.C. office.

Designed for use with any "Citizen Band" remote control receiver such as Lafayette KT-84. Transmits signals which are picked up by the receiver for the purpose of remotely controlling model planes, boats, cars and other mechanical units. Its power output provides a wide range of control. Truly tops for value and dependable performance! Shpg. wt. 4 lbs.

NEW! MULTI-PURPOSE ELECTRIC SERVO MECHANISM

POWERFUL, MOTOR DRIVEN R/C ACTUATOR 4.95

- POSITIVE, INSTANTANEOUS ACTION
- FOR MODEL BOATS AND CARS

Lafayette's new, motor driven, remote control servo-mechanism. Imported by Lafayette to sell for half the price of any comparable unit! Carefully constructed for power, durability and rugged use. Operates with any single channel, remote control receiver and transmitter. When operated at the prescribed 3 volts, the action is accurate and rapid. Provides for selective steering and automatic return to neutral. Extremely efficient when used with model boats or land vehicles. Hobbyists will find uses for the servo-mechanism restricted only by their imagination. Single pulse operation — electronic neutralization. Measures only 2 1/2" x 2" x 1 1/4" overall. Includes instructions and linkage to extend actuator arm. Shpg. wt., 8 oz.

F-327 Net 4.95

"JEWEL" REMOTE CONTROL RELAY

The Mighty Mite of the R/C field. Weighs less than 1/2 oz. 1 1/2" x 1 1/2" x 1 1/2". Highly sensitive — extremely rugged. Pulls at 1.4 Ma — drops out 1.2 Ma D.C. S.P.D.T. 5000 ohm coil.

REMOTE CONTROL ESCAPEMENT

AT THE LOWEST PRICE ANYWHERE!

A sturdy 2 arm self-neutralizing escapement. Completely wired (not a kit). Converts electrical impulses from remote control receiver to mechanical motion for varying movement of plane, boat, or car. Four 90° rotations — two by armature activation, two by neutralization. Has ratchet governor for maintaining foolproof rotating speed. Weighs only 7/8 oz. Size: 1-3/8" L x 2" W overall. Shpg. wt., 5 oz.

F-255 Net 2.45

COMPOUND REMOTE CONTROL ESCAPEMENT

LAFAYETTE'S AMAZING VALUE IN A 4-ARM SELF-NEUTRALIZING COMPOUND ESCAPEMENT!

NO NEED TO WORRY ABOUT LOSING YOUR MODEL!

You have no sequence of operation to worry about! Simple as A B C! One pulse always gives right turn; two pulses always gives left turn. Three pulses closes the circuit for the supplementary control such as motor (F-257) or elevator, if used. The rudder always returns to neutral position after any turn as soon as transmitter keying button is released. With ratchet governor for foolproof operation. Sturdy construction — low current drain. Uses 1-1/2 volt battery. Weighs 1-1/8 oz. Size: 2-7/8" L x 1-9/16" overall. Shpg. wt., 6 oz.

F-256 Net 3.95

REMOTE ENGINE CONTROL ESCAPEMENT

Lafayette's exciting new air-bleed self-neutralizing remote engine control. Varies engine speed of your model. Neutral position of one arm is low speed, neutral position of 2nd arm is high speed, and maintained activated position of either arm (armature activated) stops motor. Perfect mate for Lafayette F-256. Compact and weighs only 3/4 oz. Requires 1-1/2 volt battery. Low current drain. Size: 1-5/8" x 1" x 3/4". Shpg. wt., 5 oz.

F-257 Net 3.45

SHURITE BATTERY TESTERS

NEW! Miniature Panel Meters

- D'ARSONVAL MOVEMENTS
- BAKELITE CASES
- JEWELLED BEARINGS
- ONLY 1-9/16" SQUARE FACES, 1 1/4" OVERALL BEHIND PANEL
- ACCURACY 2% OF FULL SCALE

Unusually low-priced for such excellent quality!

Ruggedly built miniature panel meters, with excellent accuracy. 1 1/4" dial faces, with silvered dials and black numerals and pointers. Accuracy 2% of full scale. 1-9/16" square fronts, 1 1/2" overall front-to-back, with 1 1/4" behind panel including 1/4" terminals. Require 1 1/2" diameter round hole in panel; 4 corner holes for mounting, with 1/4" centers for #4 or #6 screws (not furnished). Terminal polarity on DC models clearly marked. Screw terminals. Zero adjustment screw on front of panel. Clear optical glass fronts. Shpg. wt., 8 oz.

VU METER — Volume level indicator, calibrated in standard -20 to +3VU and 0-100% ranges. Uses precision carbon film multiplier resistor and full-wave rectifier. Damped in accordance with standard VU meter requirements for faithful indications of actual sound levels. Reference level 1 mw. in 600 ohm line. 13,600 ohms internal resistance. "0" VU is 1.225 volts sine wave AC across meter connected to 600 ohm source with 600 ohm load. May be used with T-pad attenuator. 0-100% scale used to indicate percent use of transmitter output.

TM-10

Net 3.95

"S" METER — Standard "ham" signal strength indicator. Basically a 0-1 ma. dc meter calibrated in "S" units from 0-9, with the scale terminating in +10 and +30 db calibrations. Additional full scale calibrations of 0-5 and 0-10 in linear scale divisions. A "must" for radio amateurs for conversion of any communications receiver with AVC action to give calibrated signal strength indications. Use of "S" meter fully described in 1958 "Radio Amateur's Handbook" (Lafayette stock no. BK-1000), pages 106-107.

NEW CONTACT MICROPHONE

Easily Attaches to All String Instruments

This low priced, high quality contact microphone is ideal for amplification of single stringed instruments such as guitars, banjos, mandolins, cellos, ukuleles, etc. Provides rich, natural reproduction of the actual tone with sufficient amplification to be heard in a large hall. The clamp bar on the mike slides directly under the sounding board cutout to give a secure fit. Comes equipped with 8 ft. cable for connection to public address amplifiers, tape recorders or radios. Frequency response 40-9000 cps. High impedance. Size: 1 1/2" L, 1 1/8" W, 5/16" D. Shpg. wt., 12 oz.

PA-61 37.50

ONLY 3.75 DOWN — 5.00 MONTHLY

LAFAYETTE MODEL PA-61 • 18 WATT P.A. AMPLIFIER
FEATURES: New improved circuit features ensure top performance. Uses two 6V6 hi-fi output tubes and designed to give wide range response. Meets power requirements of chapels, clubs, schools, restaurants and industrial plants. Covers up to 50,000 square feet when used with trumpet type speakers. Chassis equipped with 2-speaker output sockets. Housed in well ventilated case of all steel construction. Large instrument type control knobs. Cabinet is finished in baked hammerloid enamel.
CONTROLS: Microphone, Phono, Bass, Treble, On-Off.
POWER CONSUMPTION: 75 Watts, 110/120 V.A.C., 60 cycles. **SIZE:** 14" w x 8" d x 6" h. **SHIPPING WEIGHT:** 19 lbs.

LAFAYETTE MODEL PA-61—Complete with Tubes Net 37.50

4-SPEED PHONO TOP

For above amplifier. Fits in place of cover. Plays all speeds—78, 45, 33 1/3 and 16 1/2 RPM. Has constant 4-speed motor, with turnover cartridge, complete with two precious metal needles. Has arm-rest and plug connection; for 117 volts, 60 cycles. Shpg. wt., 10 lbs.

PA-65—4-Speed Phono Top Net 16.95

Superb Performance! Incomparable Value!

FOR GROUP AND PRIVATE LISTENING

27.50
LESS CASE AND BATTERY

Transistor-wise Lafayette proudly presents its newly revised 6 Transistor Superhet Receiver Kit KT-119A. This improved model uses the latest GE NPN-PNP Transistors in an ingeniously engineered, laboratory tested circuit providing superb performance and an amazing superior commercial quality. The circuit features a specially matched set of 3 IF transformers, Oscillator Coil, High-Q Loop, Class B Push-Pull Audio Amplification and optimum Transformer Coupling in audio and output stages. Has efficient 2 1/4" speaker for exemplary reproduction and earphone jack for private listening. Complete with all parts, transistors, pre-punched chassis, but less battery and leather case. New 28 page easy-to-follow step-by-step instruction book. Size 6 x 3 1/2 x 1 1/2. Shpg. wt., 3 lbs.

SHORT WAVE CONVERTER KIT

- LISTEN TO SHORT WAVE STATIONS
- POLICE CALLS—SHIPS—PLANES—HAMS
- FOREIGN COUNTRIES

Easily constructed—fascinating addition to any existing receiver. Converts any superheterodyne radio into a double superheterodyne short wave receiver. No electrical connection between radio and converter are used. A magnetic pick-up device is included for coupling the radio and converts electronically. Can be used with any loop or ferrite rod antenna. Receives all short wave broadcasts from 2 megacycles through 18 megacycles. Self contained power supply. Uses two flashlight cells and one 45 volt battery. Kit includes plastic case, 3A5 tube, variable condenser, chassis, hardware, front panel, set of plug-in coils and complete instructions. Shpg. wt., 2 lbs.

4 AND 6 TRANSISTOR SUPERHET KITS POCKET AND HOME RADIOS FOR SPEAKER AND EARPHONE OPERATION

POCKET SIZE: 4" L x 3-5/16" W x 1" D BUILT-IN ANTENNA! REQUIRES NO EXTERNAL ANTENNA OR GROUND!

Lafayette engineers have designed this fascinating 4-transistor superhet receiver kit in a unique and interesting form. It is, by itself, a completely self-contained pocket sized personal portable set which operates a miniature earpiece so only you can hear, by plugging into the KT-96 kit listed below, it is instantly converted to a full 6-transistor home radio, complete with speaker for the entire family to enjoy. Circuit features use of 4 transistors (2 high frequency and 2 audio type) plus a germanium diode, 2 I.F. stages and built-in high gain ferrite core and antenna. The result is a sensitive, stable and selective set covering the entire broadcast band. Requires no outside antenna or ground connection. The kit is furnished complete with transistors and all parts, including battery and chassis already drilled and punched. The earpiece and carrying case are accessory items, not supplied. All necessary pictorial and circuit diagrams are furnished with simple, easy-to-follow instructions.

2-TRANSISTOR PUSH-PULL OUTPUT KIT WITH SPEAKER SELF-CONTAINED IN BEAUTIFUL PLASTIC CASE

• CONVERTS 4-TRANSISTOR KIT INTO A 6-TRANSISTOR HOME RADIO WITH SPEAKER

Add a completely transistorized push-pull audio stage to your 4-transistor receiver. Complete stage including speaker and case measures only 3" H x 2 3/8" W x 1 3/8" D. Plugs right into 4-transistor kit above. Converts your 4-transistor set to a 6-transistor plus diodes superhet receiver. Performance equal or superior to commercially wired sets selling at more than twice the price. Kit includes 2 transistors, 2 transformers, 2 1/2" PM speaker, pre-punched chassis, speaker case to hold entire stage, battery, hardware, instructions and diagrams.

- KT-96—Shpg. wt., 1 lb..... Net 11.50

3 TRANSISTOR SUPER-HET POCKET RADIO KIT KT-116

• CONVERTER, 2 IF STAGES, DIODE AND AUDIO OUTPUT DESIGNER'S DREAM IN A TRUE POCKET SUPERHET RECEIVER! NO EXTERNAL ANTENNA! NO EXTERNAL GROUND!

A highly sensitive, super-selective true pocket superhet receiver that will surprise you with its performance over the complete broadcast band. Just place it in your shirt pocket, place the earphone to your ear, and you're in for a treat! Best of all! No pesky external antenna and ground leads to worry about! The circuit uses 2 high frequency converter and IF Transistors, 2 specially matched IF transformers for maximum power transfer, an efficient crystal diode for detection and a dependable Audio Transistor in a single-ended audio output stage. The components are housed in an attractive professional-looking plastic case. Comes complete with ON-OFF knob and stylish station dial that adds considerable class to the receiver's appearance. Complete with all parts, transistors, battery, case, dial and easy-to-follow step-by-step instructions. 4 1/4" x 2 3/8" x 1-1/16". Shpg. wt., 1 lb.

NEW! 4 TRANSISTOR TELEPHONE PICK-UP AMPLIFIER KIT

- FOR FAMILY AND BUSINESS GROUP LISTENING
- HI-GAIN AMPLIFIER FOR PHONO AND MIKE

17.95

Lafayette's new Super-Sensitive 4 Transistor Telephone Pick-up Amplifier with class "B" push-pull output for efficient speaker operation. Permits the whole family to enjoy phone conversations. Invaluable for efficient speaker operation. Permits the whole family to enjoy phone conversations. No need for on long distance calls, as well as for group listening on business calls and conferences. No need for an extension phone receiver and you'll marvel at how loudly and clearly the two-way conversation comes through the speaker. Uses transformer coupling for optimum performance. The kit comes complete with all parts including 4 transistors, 3 transistor audio transformers, speaker, volume control, an attractive ripple-finish metallic cabinet, a pre-cut metallic chassis that makes mounting and wiring of parts a snap, wire and solder, less battery and pickup coil. Includes easy-to-follow illustrated instructions.

"SUNFLEX" 2 TRANSISTOR REFLEX RADIO RECEIVER KIT

- FOR SOLAR OR FLASHLIGHT BATTERY OPERATION
- NPN-PNP COMPLEMENTARY SYMMETRY CIRCUIT SUPER-REFLEXED FOR 3 TRANSISTOR PERFORMANCE
- BUILT-IN "HI-Q" FERRITE ANTENNA

An efficient and economical miniature receiver kit for earphone operation. Uses one NPN transistor, one PNP transistor and a crystal diode in an ingenious reflexed complementary symmetry circuit for 3 transistor performance without external antenna or ground connections. Local stations in most locations are received. Operates on 2 inexpensive penlight flashlight batteries (3 volts) or will give lifetime performance in sunlight or under artificial light with use of amazing new silicon solar battery (not supplied). Ideal for the beach, ball games and other outdoor uses as well as for indoors. Complete with all parts, transistors, diode, perforated chassis, two-tone plastic case, batteries, wire, solder and easy to follow instructions. Size 4 1/4" x 3-5/8" x 1-5/8". Shpg. wt., 1 lb. NEW! COMPLETE TRANSISTOR BROADCAST RECEIVER COIL KIT

- 3-455KC IF'S • OSCILLATOR • FERRITE LOOP ANTENNA • MINIATURE 2-GANG POLY-VARI-CON TUNING CONDENSER • MATCHED MICRO-MINIATURE COILS

3.95

A complete set of matched micro-miniature coils for use in sub-miniature transistorized radio receiver circuits. Shielded IF and Oscillator coils measure only 7/16" high above chassis and are 3/8" in diameter! Correct impedances are provided for maximum gain in transistor circuits; high "Q" coil design and impregnation for maximum stability make these units hard to beat at any price!

The oscillator coil has an inductance of 261 μ h, variable \pm 20% by means of a tuning slug. Unloaded "Q" is 140, and distributed capacitance is 7 mmf. The 1st IF coil (converter output) primary impedance is 15,000 ohms; secondary is 350 ohms; primary tuning capacitance is 200 mmf. Unloaded "Q" is 140; loaded "Q" is 35; center frequency is 455KC and coil is slug tuned. Insertion loss is 5.2 db and insulation resistance (at 100 volts DC) is 100 megohms. The 2nd IF (interstage) has the same characteristics, but impedance of secondary is 500 ohms. The 3rd IF (detector) is also the same except for secondary impedance of 5,000 ohms. The ferrite loop antenna is of the flat type and measures only 2 3/4" long x 9/16" w x 1/4" thick. Primary and secondary are independent and match transistor input impedance. Tuning the ferrite loop is the famous Poly-Vari-Con 2-gang tuning condenser, a miniature unit using polyethylene as the dielectric between plates and providing extremely high "Q", with antenna section capacity of 11-200 mmf, and oscillator section capacity of 9-88 mmf. "Q" at 1,000 KC., 50 mmf., is over 2000! Shpg. wt. of kit is 1 lb.

MS-450 Net 3.95

SUB-MINIATURE TRANSISTOR RADIO RECEIVER COIL KIT

2.49

Includes same set of high "Q" miniature components as MS-450 except for the tuning condenser. For those who may already have suitable tuning capacitors.

ECONOMY ALL-PURPOSE DYNAMIC EARPHONES.

- FOR TRANSISTOR AND SUBMINIATURE RECEIVERS
- FOR SILENT RADIO AND TV LISTENING.

A sensitive all-purpose earphone designed with both your listening pleasure and pocketbook in mind. Extensive range and excellent tone combine to provide excellent reproduction. Lightweight, equipped with a practically invisible ear support, that slips comfortably over either ear, from which the earphone can't slip out or fall. Ideal for use with TV and radio sets, amplifiers, miniature and transistor receivers, etc. Attractive unit with shiny chrome finish. Complete with a 3 ft. cord. A super value at this price. NEW! sub-miniature TRANSISTOR AUDIO TRANSFORMERS

ONLY 79¢

- Input, Output and Driver Transformers
- Only 1/2" x 1/2" x 1/2"

A new series of miniature transformers for transistor and experimental miniature circuits. Ideal for miniature radio receivers, amplifiers, hearing aids, etc., using standard transistors. Incorporate special heat-treated high permeability magnetic cores and treated to resist corrosion. Designed for improved frequency response with low distortion. 3" color-coded leads. Average shpg. wt., 4 oz.

- TR-97 INPUT TRANSFORMER—Primary impedance 100,000 ohms; secondary 1000 ohms; DC resistance primary 1000 ohms; secondary 100 ohms. Net .79
- TR-98 DRIVER TRANSFORMER—Primary impedance 10,000 ohms; secondary 2000 ohms, center-tapped. DC resistance of primary 240 ohms; secondary 60 ohms, center-tapped. Net .79
- TR-99 OUTPUT TRANSFORMER—Primary impedance 500 ohms center-tapped; secondary 3.2 ohms. Primary DC resistance 42 ohms, center-tapped; secondary 0.7 ohms. Net .79

NEW! FERRITE-ROD LOOP ANTENNA

- BEESWAX IMPREGNATED FOR STABILITY
- EXTREMELY HIGH "Q"

LAFAYETTE LEADS AGAIN with this tremendous buy. This high "Q" (over 500) ferrite loop antenna is wax-impregnated to eliminate moisture-absorption and maintains its "Q" despite varying humidity. Its inductance is 425 microhenries, making it suitable for replacement in most receivers—it resonates with many popular tuning capacitors and provides extremely high sensitivity over the entire broadcast band. Excellent for experimenters and hobbyists. Leads are brought out to an impregnated insulated mounting bracket. Ferrite core is 5" long by 3/8" diam. Bracket 3 3/4" x 1 3/16" and has 3-3/16" mounting centers. Shpg. wt., 6 oz.

NEW! WORLD'S SMALLEST PM SPEAKER 1-3/16" DIAMETER—ONLY 9/16" THICK!

- IDEAL FOR EXTREMELY THIN TRANSISTOR RADIOS
- HIGHLY EFFICIENT AS SPEAKER-MICROPHONE FOR TELEPHONE-TYPE INTERCOM HANDSETS & HEARING AIDS!
- COMPLETE WITH MINIATURE TRANSFORMER

1.95

One of the most flexible speakers made! Combines high sensitivity as a microphone with relatively high powerhandling capacity as a speaker to make it perfect for "wrist-radio" use, for transistor radios down to about $3/8"$ thickness, for miniature transistor intercoms and telephone-type handsets, extremely small hearing aids and numerous other miniature applications.

This amazing speaker delivers approximately 0.5 milliwatts average output as a dynamic microphone and may be used by itself connected directly to a high impedance amplifier microphone input. Or—it may be used with the transformer supplied as a matching transformer for running a long low-impedance (14 ohms) line with a voltage step-up of approximately 20:1.

The speaker is capable of handling up to 300 milliwatts of audio power. Frequency response is 550 to 5000 cps — 10 db. Resonant frequency is 600-700 cps. Voice coil impedance is 14 ohms. The miniature transistor output transformer supplied has a primary impedance of 8000 ohms, single-ended. Transformer size is $1" \times 11/16" \times 3/8"$ h. with 1-5/16" mtg. centers. Shp. wt., 1/2 lb.

SK-96—Miniature PM Speaker and Output Transformer Net 1.95

NEW! SUPER POWER DYNAMIC EARPHONE FOR TRANSISTOR CIRCUITS

3.95

- MADE IN ENGLAND
- THREE TIMES THE OUTPUT OF OTHER EARPHONES

This super-power dynamic earphone is not to be confused with run-of-the-mill earphones. Extra efficient construction and a powerful magnet provides up to three times the volume of other dynamic earphones. Lafayette brings you this ideal solution to the problem of low output inherent in transistor circuits. You'll be amazed at the difference in volume when you use this dynamic earphone, as well as at its quality of reproduction. We have tested this ear on all kinds of transistorized circuits, and this remarkably efficient earphone functioned so well that in many cases the program was distinctly heard with the earphone over 2 feet away from the ear! It is of course, not limited in use to low powered devices — it will give superior performance wherever a high impedance dynamic earphone is required. AC impedance 7000 ohms, DC resistance 1500 ohms. Snap on earpiece readily removed for cleaning. Complete with 3 ft. detachable plug-in cord.

MS-260

- TESTED AT 3 TIMES WORKING VOLTAGE
- EXCEPTIONALLY RESISTANT TO HIGH TEMPERATURES AND MOISTURE
- SURPASSES PERFORMANCE OF MOLDED PLASTIC TUBULARS

They're new, they're different, and they're better! Now, at a price for less than that of ordinary plastic molded tubulars, Lafayette brings you, for every day service work, a condenser that was designed for critical industrial applications. The case is of durable gleaming porcelain, a ceramic known for its high degree of imperviousness to moisture and resistance to heat. The capacitor is of finest quality, tested at 3 times the rated voltage with such closer capacity tolerance. It maintains its characteristics under extreme conditions of heat and humidity. Its mechanical construction is excellent, the leads are firmly attached and sealed — they won't twist or break off. We've selected the most popular values and put them up in two servicemen designed kits. Each condenser is plainly marked. Each value is mounted on separate handy strips. All are conservatively rated at 600 DC working volts. See chart for contents of each kit.

Mullard Genalex EMITRON HIGH FIDELITY TUBES

These premium quality tubes were especially designed for minimum noise, and least possible feed back, (no loose elements), low loss, long life, and the widest frequency response. They are widely used by Hi-Fi equipment manufacturers. The critical audiophile is now using them to replace conventional tube types in amplifiers, pre-amps, tuners, radios, and TV sets. Several types are available in matched pairs. These are precisely balanced for use in push-pull output stages. Tube types with * are directly interchangeable with equivalent types listed. Others may require some wiring changes. All of these tubes carry the famous MULLARD, GENALEX, and EMITRON guarantee.

NEW! 2 SET TV BOOSTER & 3 SET COUPLER

BLONDER-TONGUE B-23

- SHARPER, CLEARER PICTURES ON 1, 2 or 3 TV SETS WITH ONLY 1 ANTENNA
- FIXED TUNED-CHANNELS 2-13. HANG IT ON REAR OF SET AND FORGET IT!
- WORKS WITH ALL TV SETS—IDEAL FOR COLOR TV
- PERFECT FOR MOTELS & MULTIPLE DWELLINGS

Made by the leading manufacturer of television amplifying equipment, this flexible combination television booster and 3-set coupler is a fine example of advanced engineering design and construction. It provides improved home TV reception without the need for tuning or adjustments. Simply make connections to convenient screw terminals, hang it on the back of the TV set, and forget it. Automatically amplifies channels 2 through 6 more than 6 db; channels 7 through 13 more than 2 db. Input for standard 300 ohm balanced antenna. Outputs for 1, 2 or 3 TV sets, 300 ohm balanced. Low noise figure—works well with all latest types of TV sets and reduces interference. Amplifies the signal on 1 or 2 TV sets, whether one or both are operating. Permits use of 1 antenna on up to 3 TV sets—outperforms all non-powered couplers by more than 2 to 1. Size 6 1/4" x 3 3/4" x 2 1/2". Uses 6BK7A or 6BK7B tube. For 117 volts, 60 cps AC. Shpg. wt., 2 lbs.

BLONDER-TONGUE B-23 Net 14.95

BLONDER TONGUE UHF CONVERTER

MODEL 99R

The only UHF-VHF converter for Class A signal areas with these exclusive features. Three section shielded tuner which complies fully with minimum F.C.C. radiation standards. Double tuned input tracks with oscillator, and reflects spurious signals. Precise impedance match gives maximum signal conversion—NO LINE GHOSTS—NO PICTURE SMEAR. Drift free performance is achieved by use of a thermally compensated oscillator circuit. Simple one knob control covers all UHF channels from 14 to 83, and also permits viewing of VHF channels 5 and 6 without knob switchings. UL approved. Complete with tube and instructions. Shipping wt., 4 lbs.

Model 99R—List 22.95—Net 15.63

UHF VHF TV SIGNAL BOOSTER

Increases video and sound output over 20%. Consists of complete IF stage which easily plugs into any receiver inside the cabinet, thus eliminating external switches and connections. Has advantages of broad band boosters but without separate tuning for each channel. Ideal for poor signal areas.

Super SPECIALS!

NEW "mini-pro" 2 x 2 35 MM SLIDE PROJECTOR

ONLY **19.95**

REGULAR PRICE **37.50**

- COMPACT-ONLY 8 1/2" x 6" x 4 1/2" OVERALL
- COMPACT-ONLY 8 1/2" x 6" x 4 1/2" OVERALL
- BRIGHTER-SHARPER-EVEN IN LIGHTED ROOMS
- 80 mm f/3.5 COATED 3 ELEMENT LENS

A new, portable projector for showing mounted 2" x 2" 35 mm transparencies. An unusually fine, compound lens system develops a brilliance seldom found in projectors of far higher wattage. Projection lens in a fully coated, 80 mm f/3.5, three element, triplet type, anastigmat, extremely fine, aspheric, multi-condenser system multiplies the lamp output giving the maximum illumination possible. Exceptionally bright-sharp images—even in lighted rooms. Highly efficient double tube venturi cooling plus hardened, heat absorbing filter. Slides will not "pop" out of focus—eliminates constant refocusing. Flat field projection eliminates the usual distortion. Projection distance ranges from 3 feet to 26 feet. Fill a 40" x 40" screen at 10 feet. At 26 feet you get a giant 8 ft. by 15 ft. picture. Elevating knobs tilt projector to desired angle. Weighs less than 3 1/2 lbs. Includes 150 watt projection lamp, attractive, sturdy carrying case, standard two slide carrier, six foot cord and protective lens cap. Shpg. Wt. 5 lbs.

Lafayette IMPORTED SLIDE RULES

- Machine Engraved Graduations
- Smooth Slider Action
- Extreme Dimensional Stability
- Easily Read Graduations
- Modern Scale Arrangements
- Saddle Leather Case

10" LOG LOG DUPLEX TRIG SLIDE RULE

10" Log Log Slide Rule: Constructed of specially selected, laminated, non-hygroscopic bamboo. All scales are machine engraved on white plastic in permanently accurate calibrations. Adjusting screws permit varying the tension on the slide. 21 scales in all including the more frequently used C, D and CI scales on both sides of the rule. Evaluates trigonometric, algebraic and exponential problems. L10 and L100 scales refer to B scale. All other scales coordinate and refer to D scale. Scales are L, L1, DF, CF, CIF, C1, C, D, LL3, LL2, LL0, A, B, K, CI, C, D, S, ST and T. Scale characteristics permit multiplication, division, proportion, inverse proportion, reciprocals, cotangents, squares, square roots, cubes, cube roots, logarithms, tangents, sines, PI factor multiplication and division, powers and roots of numbers less than 1, powers and roots of numbers greater than 1, logarithms to base "e". The most often used slide rule in all basic fields science, engineering, production and economics. Shpg. wt., 1 1/2 lbs.

F-341Net 10.50

5" POCKET SLIDE RULE

5" Pocket Slide Rule: Convenient pocket sized slide rule of specially selected and treated bamboo. Will not warp, shrink or lengthen under varying atmospheric conditions. A, B, C1, C, D and K scales engraved on white plastic surface. Reverse side of slide has standard S, L and T scales. The upper, beveled edge of the rule is graduated in m/m to 13 cm. Other edge is divided into 5 inches by 32nds. Only 5-13/16" long over all. Carried easily in any pocket. Shpg. wt., 8 oz.

Professionally Designed and Produced **'SATELLITE SCOPE'**
THE Explorer

- 50mm. Clear Aperture Objective
- 6 Element, Wide Field, Coated Erfle Eyepiece
- 6.2 Power—11° Field—8mm. Exit Pupil
- First Surface Mirror—Aluminum Evaporated
- Light Collecting Power—51X

Regularly ~~90.00~~
Only 49.50

Lafayette's "EXPLORER"—professionally designed and produced—not a collection of "surplus" parts and lenses—far exceeds the mechanical and optical specifications for the "Moonwatch" project. The achromat objective is a hard-coated Fraunhofer type with a clear aperture of 50mm., focal length 185mm., light collecting power (for naked eye) 51X, resolving power (with respect to double stars) 2.5", faintest discernible star 10.3m. The eyepiece is a 6-element, coated Erfle type, focal length 30mm., apparent field of view 68°. Magnification is 6.2X, exit pupil 8mm., real field of view 11°. The eyepiece has a 1 mm. wire in its field to define the meridian. Spiral focusing with locking ring to set eyepiece. Body tube and fork type alt-azimuth mount of light weight metal alloy. All bearings of brass and stainless steel. Altitude gauge fitted to the trunnion sleeve reads 0-90-0 in 5° increments in relation to the telescope tube axis. Extremely bright, first surface, aluminized mirror, 95mm. X 50mm., set at 45° to the axis. Lever clutch permits removal of mirror at will. Mount may be bolted to a base or mounted on standard tripod. Positive locks in each axis. Entire tube may be withdrawn from mount and hand held. May be used as a fine rich field telescope—a wide field finder scope—a 6X telephoto lens—a 9X to 70X astronomical telescope by use of 2X Barlow lens and 6mm., 9mm., 12.5mm. or 20mm eye pieces. Overall size 8½" x 14¼". Weight: Telescope only—1½ lbs., base and mount only—2 lbs., mirror assembly only—¾ lbs. Shpg. wt., 6 lbs.

LAFAYETTE'S IMPORTED

Binoculars

with **COATED ACHROMATIC LENSES and PRISMS**

- ★ Light weight alloy bodies
 - ★ Each with pigskin case and straps
 - ★ Coated and corrected optics
 - ★ Money back guarantee
- Lafayette has gone "all-out" to present these fine, imported Zeiss type binoculars at heretofore unheard of prices! Each of these extremely precise optical instruments have coated lenses—clamped in (not just glued) prisms—light weight alloy all metal bodies—weather proof, tear proof outer coverings—maximum light transmission—minimum distortion. Made by leading optical manufacturers to our own rigid specifications. Whether you are a yachtsman—hunter—hiker—sports fan—or a bird watcher—you'll find the binoculars you need in Lafayette's great selection. And Lafayette's famous money-back guarantee applies as always.

FOCUS—mechanism is either central focus (C.F.) by means of a single wheel and one adjustable eye piece, or individual focus (I.F.) wherein both eye pieces are separately adjustable.

POWER—is the number of times an image is magnified through your binoculars. For example 7X (7 power) means the object will appear 7 times larger (or closer) than with the naked eye. The second number used (i.e. the "50" in 12X, 50) is the diameter in millimeters of the objective lens.

COATED LENSES—tend to reduce reflection and pass up to 50% more light than uncoated lenses.

INCLUDES HARD PIGSKIN CASE

BINOCULAR MOUNTING CLAMP

Indispensable accessory for high powered binoculars. Fits all sizes—Individual or central focus. Used with standard camera tripod. Holds binoculars steady for long range extended period use. Satin-black finish. Shpg. wt., ½ lb. **F-187**—Net **2.45**

Meteor 3 1/4" REFLECTOR

- ★ Extremely Compact
- ★ Professional Design
- ★ 84X, 38X
- ★ Rack and Pinion Focus
- ★ Micro-Motion Control

44.50

Only 4.45 Down

An extremely fine, compact, professionally designed and produced 3¼" reflector. Primary mirror is aluminized and quartz overlaid. Secondary mirror is also an extremely bright, aluminized, first surface element. Exceptionally low light loss due to high reflectivity and care in adjustment of secondary reflector. Perfectly achromatic system. Light collecting power is 148X (for the naked eye). Finder scope 4X. Eyepieces are a 20mm coated Ramsden and a 9mm coated Huyghenian-Mittenzwey. All metal construction. Body tube white enameled. Altazimuth, fork type mount with clamps in both axes. Exclusive body point support maintains extreme rigidity and incorporates slow motion altitude drive control. 17" metal table tripod. Mount may be removed for use with field tripod. Shpg. wt., 15 lbs.

NOW 30.59
ELECTRICALLY REVERSIBLE! PORTABLE!

● Push-button Control ● Powerful 20" Blade ● Three Speeds Each Way ● Cools One Room or Several ● Rain Will Not Damage GE Motor ● Adjustable Mounting Panel ● Quiet Rubber Mounted Motor ● Safety Grills Protect Fingers ● Automatic Thermostat Control

Here's the ultimate in portable window fans! It provides constant comfort with an automatic GE thermostatic control—and what's more, this deluxe model is electrically reversible. Ideal room circulator during the day and powerful ventilator to draw out hot stuffy air and bring in cool fresh air at night. Lightweight with convenient disappearing handle, can be easily moved from one room to another. Fits all windows of sash type from 20" to 38" wide. Sash can be closed when fan is not operating. Thermostat turns fan ON when it's hot, OFF when it's cool. Push-button convenience—3 speeds for intake and 3 for exhaust—can be reversed while running even at full speed. Scientifically matched GE motor, blade and orifice with sealed oil system requiring no oiling in normal use. No radio or TV interference. Won't disturb your sleep. Motor and blade mounted on rubber. Air velocity rating is 1100 ft./min.; ventilating air delivery 2100 cu. ft./min. and circulating air delivery 4000 cu. ft./min. Noise level is 40 DB. Grill guards protect fingers; snap-out front and back for easy cleaning. Height including handle 23 3/4", width 23 1/2" and overall depth 7". Operates on 110-120 volts 50-60 cycles AC only. U.L. Approved. Comes with 8' cord and adjustable mounting panel. Shpg. wt., 34 lbs.

● Three Speeds Each Way ● Blade Cools Up To 5 Rooms ● Fits All Sash Windows 20" to 38" ● One Piece Construction ● Easy Controls ● No Radio or TV Interference ● U.L. Approved

A new concept in design and engineering, this electrically reversible 20" window fan provides amazingly low-cost home cooling. Pulls in cool fresh air at night, or exhausts stale air like magic at the twist of a knob! Central control knob, easy to reach, simple to operate, 3 speeds each way for perfect comfort control, can be reversed while running, even at full speed. Easy to install with only a screwdriver, the fan mounts in front of window so sash can be closed when fan is not operating. Reinforced steel extension panel holds fan rigid in window—extra quiet. Motor and blade mounted on rubber for quiet operation. Ventilating air delivery 2100 CFM, circulating 4000 CFM. Noise level 50 DB. Scientifically matched GE motor, blade and orifice with sealed oil system needing no oiling in normal use. Height 23 3/4", width 29 1/2" to 38", depth 7 1/2". Smartly finished in two-tone grey with egg-shell white grill. For 110-120 volt 50-60 cycle AC only. 8' cord. Shpg. wt., 22 lbs.

NEW! LAFAYETTE SPEAKER SELECTOR SWITCH

- SELECTS 1-2- OR 3-SPEAKERS IN ANY COMBINATION
- HEAVY DUTY SWITCH HANDLES SPEAKERS UP TO 50-60 WATTS
- MOUNTED ON HEAVY GAUGE STEEL PLATE—FITS IN STANDARD 3" WALL BOX OR ON CONSOLE PANEL

Provides heavy duty switching for up to 3 speakers or speaker groups in any hi-fi system or for music/paging system with up to 50 or 60 watts of audio power. The 7-position switch permits selection of speaker groups in any combination (1-2, 2-3, 1-3), or individually (1, 2 or 3), or all simultaneously. It automatically switches amplifier output taps to compensate for changed load impedances, without the need for "dummy load" resistors. Mounted on a gold-finished standard steel 2 1/4" x 4 1/4" electrical outlet plate and may be mounted on an outlet box or hi-fi console panel. A decorative white plastic knob with molded black escutcheon, heavy-duty silvered contacts and a terminal board with screw terminals are among its outstanding features. Shpg. wt., 1 lb.

IMPORTED FROM HOLLAND TO SAVE YOU MONEY!

LAFAYETTE'S EASY PAYMENT PLAN • SIMPLE - FAST - ECONOMICAL - CONFIDENTIAL

● AVAILABLE ON ORDERS OF \$45 OR MORE

● REQUIRES ONLY 10% DOWN

● LOWEST CARRYING CHARGES

● SMALL EASY-ON-THE-BUDGET MONTHLY PAYMENTS

Lafayette's Easy Payment Plan enables you to get the equipment you want now, even if you are short of ready cash. This sensible plan permits you to buy without disturbing savings and to pay out of future earnings. You need only a small down payment on all orders of \$45 or more.

Lafayette's Easy Payment Plan is only available to residents of the 48 states. It cannot be applied to shipments to U. S. Possessions or Territories, to A.P.O. and F.P.O. addresses or to foreign countries.

Types of Merchandise Sold on Easy Payments. You can buy whatever you please under this plan including High Fidelity Systems, individual Hi-Fi units and accessories; Test Equipment; Kits; Public Address and Intercom Equipment; Amateur Gear; Power and Hand Tools; Phonographs and Record Changers; Telescopes, Binoculars and Photographic Eqpnt.; Tape recorders, Books and Manuals.

Not Available on Easy Payment Terms. Electrical appliances, pre-recorded tape, records, tubes and parts may not be purchased on Lafayette's Easy Payment Terms.

Refund Of Carrying Charges For Advance Payment. All carrying charges will be refunded if payment is completed within 60 days after shipment. Take the full time to pay if you wish. However, a pro-rata refund of carrying charges will be made if payment is complete before the required time.

How To Buy On Lafayette's Easy-Pay Plan. To order the merchandise you want on easy terms, use your Lafayette order blank. Then supply the answers to the simple questions on the reverse side of the order blank and sign it. Attach the remittance covering your down payment (10% or more) and mail your order. As soon as your credit is approved, your order will be shipped. Your first payment is not due until 30 days after date of shipment.

Lafayette has made this Easy Payment Plan as simple and confidential as possible — no red tape. Any responsible person over 21 having a steady income, can get credit approval.

LAFAYETTE'S EASY PAY PLAN

Monthly Payment—See table. All payments are for equal amounts as shown, except the last payment which is for the balance due. The minimum payment is \$5.00 per month.

Carrying Charge—See table.

Kits

High Fidelity

P.A. Equipment

Test Equipment

Amateur Gear

Books

Tools

Telescopes

TV Accessories

Additional Purchases—Should you desire to make additional purchases, this can be easily accomplished once your Lafayette Easy Payment Account has been established. On purchases of \$25 or more, write the merchandise you want (excepting excluded items) on one of our order blanks, make the notation "to be added to my account" and give the number of your account. Make certain that you sign the Easy Payment agreement on the reverse side of the order form. You will not have to make another down payment. The amount of the purchase and the usual carrying charge are added to the amount you owe, and you pay on only one account. You may continue to pay the same monthly amount. However, if the new unpaid balance is substantially greater than the original amount, a new monthly payment is set up. Additional purchase carrying charges: \$25.00 to 29.99, \$2.50; \$30.00 to 34.99, \$3.40. Use the table for charges over \$35.00.

CUT ALONG DOTTED LINE

FILL IN THIS FORM TO ORDER ON EASY PAYMENT

Please answer all questions fully to help establish your credit promptly. Write your order on the reverse side (or attached order form).

NOTE: Easy payment contracts cannot be accepted from persons under 21 years of age. If you are under 21, have this form filled out by a person of legal age, regularly employed or engaged in business. We can make the purchase for you, and will be responsible for payment.

NOTICE TO THE BUYER

1. Do not sign this agreement before you read it or if it contains any blank space.
2. You are entitled to a completely filled in copy of this agreement.
3. Under the law, you have the right to pay off in advance refund of the credit service charge.

REMOTE CONTROL FOR SILENT TV VIEWING

- SIMPLE TO ATTACH TO ANY TV SET OR RADIO
 - SEE AND HEAR—NOISELESSLY—CONVENIENTLY
- FOR LATE LISTENERS:** One or two people can both see and hear the program with the loudspeaker cut off. Taps for enjoying the late-late show without disturbing the rest of the household or the neighbors.
 - FOR HARD-OF-HEARING:** They can see and hear without turning the set volume so high that others can't stand the noise. They can listen either with the loudspeaker cut off or, if the rest of the family want to hear, with the speaker on.
 - FOR NOISY PROGRAMS:** Don't let the kids' "Wild Westerns" bother you. Let them view and listen with the speaker cut off.
 - FOR NORMAL OPERATION:** Does not affect your regular use of the T.V. set. Does not have to be disconnected from set.
 - REMOTE CONTROL:** Comes complete with 20 ft. of cable so it can be operated comfortably from a distance. Has its own volume control, speaker on-off switch, and two sets of jacks to either 1 or 2 ear phones can be connected.
 - DYNAMIC EAR PHONE:** Set is supplied with one of ARGONNE exclusive Mi-Fi dynamic miniature earphone. Highly sensitive and efficient. Phone is complete with 3 ft. cord and tips, ready to insert in ear phone box.
 - CONVENIENT:** Size only 3 1/2" x 2" x 1 1/2". Complete with 1 earphone and 20 ft. cable. Completely wired with instructions. Shpg. wt. 3 lbs. **MODEL MS-125** Net 6.50
- EXTRA EARPHONE**
 To plug in to extra jacks on control box so two can listen. **AR-51** Net 1.95

REGENCY FM TELEVERTER

- MAKES ANY TV SET AN FM RECEIVER
- COMPLETELY TRANSISTORIZED
- SIMPLY INSTALLED BY ANYONE

14.96

MODEL RC-103

The Regency Model RC-103 Televerter makes any TV set an FM receiver at the flip of a switch, yet does not interfere with normal TV reception. Utilizes the TV audio system and large speaker baffle to produce tone quality far superior to small table model FM receivers. Completely transistorized, its power source is 3 tiny penlight batteries with current drain so low (300 µA) that battery life expectancy approaches shelf life. Simply installed by anyone in 5 minutes—the only connections necessary are to TV set antenna terminals and antenna. Meets FCC radiation requirements. Large easy-to-read dial and planetary drive make fine tuning easy and razor sharp. Housed in attractive 4 1/2" x 6" x 4 1/2" plastic cabinet. Shpg. wt., 5 lbs.

LATEST 3-TRANSISTOR MINIATURIZED HEARING AID

- LIGHT AND UNOBTUSIVE
- FITS IN BREAST POCKET
- OPERATES ON 1 "PEN-LIGHT" CELL

19.50 Reg. Price **50.00**

This low cost, completely serviceable unit takes the "hearing aid" out of the class of expensive "MEDICAL THERAPEUTIC" devices and places it within the economic reach of anyone who requires its use. Its high gain 3-transistor circuit produces a high intelligible output with good sensitivity. The unit has a conveniently accessible "on-off" switch and volume control. It comes with a miniature dynamic earphone, fitted with 2 detachable rubber covered ear plugs of different size—to suit the individual and with a 3 ft. long colorless plastic cord. The electronic circuit and seat for the penlight cell are both easily accessible in a specially gold finished attractive case. The unit is easily carried in the breast pocket and secured by means of two clips; economically operated on one penlight cell. Comes in attractive zippered case, with spare cell.

TRANSISTOR MINIATURE HEARING AID

A Lafayette Special

29.50

Reg. Value 75.00

- LIGHTWEIGHT AND POWERFUL—A REAL BOON TO THE HARD-OF-HEARING
- WEIGHS ONLY 5 OZ.—SMALLER THAN A PACK OF CIGARETTES
- USES ONLY 2 SMALL LOW-COST FLASHLIGHT CELLS
- QUALITY AND PRECISION BUILT FOR YEARS OF OUTSTANDING PERFORMANCE
- ECONOMICAL IN COST AND UPKEEP

A completely self-contained modern hearing aid whose power and sensitivity will open up a "new world" for those with even severe hearing loss. Small enough to be carried in a breast pocket, it weighs only 5 oz. Complete with batteries. Only 2-3/16" wide x 2-13/16" long x 3/4" thick! Its 4-transistor circuit provides high amplification, good intelligibility and quiet operation. The tiny flesh-colored dynamic earphone fits snugly into the ear, and a 3-foot long thin flexible cord is supplied, with ing aid dust and moisture free—while making inspection and service easy. A smoothly operating volume control permits easy adjustment for the various requirements of daily living. The alumite case is extremely handsome and finished in gold by a special process to prevent peeling and rusting. A good-looking gray leather zipper carrying case is also supplied. Uses only 2 pen-light battery cells, low-cost and replaceable anywhere, yet battery life is approximately 2 months with a rate of use of 4 hours per day! Shpg. wt., 1 lb.
