DELUXE 2-SPEAKER 2-WAY SYSTEM

| 44.95 |
| Powerful Handling Capacity—30 Watts |
| Powerful 10" Woofer with 1 lb. Magnet Plus 4" Tweeter |
| "Tuned" Enclosure with Tube-Type Ducted Port |
| High Frequency Brilliance Control |
| Overall Response 30-19,000 Cycles |

An unusually compact speaker system that delivers really "big" sound. Enlosure is a bass-reflex design using a ducted port of the tube type to provide proper acoustic "tuning." The tube provides a special path for the low frequency sound waves radiated from the rear of the woofer so that they emerge "in-step" with those radiated from the front and thus provides substantially greater bass sound power from the system. Solid wood construction, plus the use of sound absorbent material ensures an extremely rigid enclosure, free of undesirable resonances. A powerful 10-inch woofer provides reproduction of the low frequencies. A 4-inch cone-type tweeter provides reproduction of the mid-range and high frequencies (to beyond audibility) and is of the closed back type to prevent interaction with the 10-inch woofer. Smooth transition is achieved by means of electrical crossover at 2800 cycles. Features high frequency brilliance, control at rear of cabinet. Dimensions are 21½x11¾x10¼"D. Overall frequency response: 30-19,000 cycles; nominal impedance: 8 ohms; power handling capacity: 30 watts program material. Shpg. wt.: 30 lbs. Imported. Oiled walnut finish on all 4 sides.

DRAFTING & DRAWING SUPPLIES

(A) LAFAYETTE VECTORLOG® SLIDE RULE

For Communications Engineers and Physicists
- Laminated Bamboo Construction • P, P', and Q Scales For Direct Vector Addition • Hyperbolic Sine and Tangent Scales. Two Sine Scales — One Marked in Degrees. One Marked in Radians • 5 Log Log Scales Plus a Voltscale DB Scale • Complete with Belt Carrying Loop and Leather Case.

The Lafayette VECTORLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums — these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the volume db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTORLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule. Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units. A problem-tested location of scales; and adjustment screws to allow variable tension on the slide. Scales include: (FRONT) Tr-1, Tr-2, P', P, Q, ST, S-1, S0, C, D, LL01, LL02, LL03, LL11, (REAR) Sh-1, Sh-2, DF, A, B, CI, CF, Th, C, D, LL3, LL2, db. With instruction book, leather carrying case, and belt carrying loop. Imported.

(B) DELUXE LOG LOG DUPLI DECIMAL TRIGONOMETRIC SLIDE RULE
- 25 Scales with 8 Log Log Scales • Two Color Scales • Extended Range Avoids "Going Off Scale" • Extra Scale Simplifies Computations

10" log log dupli decimal trigonometric slide rule contains 25 scales including 8 Log Log Scales. Troublesome end-for-end resetting is eliminated by extensions of C and D scales. Twin set of Log Log scales run from 1.001 to 100.000 and .999 to .0001, enlarging the scale by one scale length each compared with ordinary log log slide rules. Extra features include P scale which enables direct "readout" of cosine value. Scales include LL01, LL02, LL03, OF, CF, CIF, CI, C, D, LL3, LL2, LL1, LL00, L, K, A, B, S, ST, T, C, D, DT, P, and LL0. With instruction book, saddle leather case. Overall length is 14". Imported.

(C) 10" LOG LOG DUPLI TRIG SLIDE RULE

Specially selected, laminated, non-hygrosopic bamboo. Scales machine engraved on white plastic in permanently accurate calibrations. Adjusting screws permit varying tension on slide. 21 scales including C, D and CI on both sides. LLO and LL00 scales refer to B scale. All other scales coordinate and refer to D scale. Scales are L, LLI, DF, CF, CIF, CI, C, D, LL3, LL2, LL0, LL00, A, B, K, CI, C, D, S, ST and T. Scale characteristics permit multiplication, division, proportion, inverse proportion, reciprocals, cotangents, squares, square roots, cubes, cube roots, logarithms, tangents, sines, PI factor multiplication and division, powers and roots of numbers less than 1, powers and roots of numbers greater than 1, logarithms to base "e". The "CB Commander" offers every feature you'll ever want in a 2-way CB radio—PLUS provision for Business Band operation! You get 23 crystal-controlled CB channels with an ultra-stable circuit that uses a separate crystal for each transmit/receive channel. And every crystal is supplied for CB—27 in all! There's even provision for 2 extra channels—lets you choose from 5 Business Band frequencies—27.235, 27.245, 27.255, 27.265, or 27.275 Mc. Business Band operation permits increased antenna height...gives you greater range and coverage—and less crowding!
