LAFAYETTE Priva-Com® III Solid State Private Tone Caller

For Lafayette 12 Volt Solid State Transceivers

- 9 Transistors plus 2 Diodes
- No Reed Relay Contact Points—Longer Life!
- For Quiet, Private Communications
- Dual Tone Minimizes Stray Signal Interference
- Incoming Call Indicator Light
- Mates Directly with Lafayette HB-555, HB-525A, HB-525B, HB-500A, HB-600 and HE-20T
- Compatible with Lafayette Priva-Com IV

LAFAYETTE Priva-Com III Selective Caller pioneers a new era in reliable transistorized private tone circuitry. Using a new ingeniously designed ceramic and resonant tuning fork circuitry instead of conventional reed relays, the solid state Priva-Com III is exceptionally adaptable for reliable mobile as well as fixed station performance. Its tiny size makes it a handsome mate for even the smallest state CB transceivers. Its dual tone signal minimizes the possibility of the transceiver speaker being turned on by stray ignition and power line signals. The Priva-Com III mates the receiver. When its call switch is activated, either at base or mobile stations, the transmitted dual tone is received by the other Priva-Com III. The CB receiver is activated and the indicator light goes on. This light stays on until manually reset. Both base and mobile units can initiate calls at any time. The Priva-Com III features 9-transistors plus 2-diode solid state circuitry, simple-to-operate push-button switches for Standby, Normal, Call and Reset, a Volume Control; and Indicator Light, a sturdy mobile bracket for mounting under dash, under transceiver, etc. Supplied with 2 plug-in selective ceramic and resonant tuning fork filters, one for 817.5 cps, and one for 997.5 cps. Tone frequencies: also includes a 11 prong plug at end of cable for direct mating with Lafayette HB-500A, HB-555, HB-525A, HB-525B, HB-600 and HE-20T. Size: 1¾"H x 3¼"W x 1¼"D. Shpg. wt. 3 lb.
