Excellent for beginners as well as advanced experimenters, this kit enables you to build and learn about 20 interesting and useful transistor circuits. By utilizing "Breadboard" construction, each project can be simply wired and traced. After building the basic circuit, any of the 20 projects can be built by simply inserting a few preassembled component blocks and interconnecting leads between them. A soldering iron is only required for the basic wiring and not for subsequent projects. All wiring is covered in a step-by-step manner by the instruction manual. Each of the 20 projects is clearly presented with step-by-step instructions, large easy-to-read pictorial wiring diagrams, schematic diagrams, and an explanation of the circuit behavior. The kit is complete with perforated mounting board, 2-transistors, 1-diode, earphone, and all other parts required for construction. The detailed 28-page instruction manual contains a wealth of information about each project. Less batteries.

- Compatible with Lafayette Priva-Com IV

Real Tiny: 1¼Hx3¾Wx6¼"D.

Lafayette's Priva-Com III Selective Caller pioneers a new era in reliable transistorized private tone circuitry. Using a new ingeniously designed ceramic and resonant tuning fork circuitry instead of conventional reed relays, the solid state Priva-Com III is exceptionally adaptable for reliable mobile as well as fixed station performance. Its tiny size makes it a handsome mate for even the smallest solid state CB transceivers. Its dual tone signal minimizes the possibility of the transceiver speaker being turned on by stray ignition and power line signals. The Priva-Com III mutes the receiver. When its call switch is activated, either at base or mobile stations, the transmitted dual tone is received by the other Priva-Com III. The CB receiver is activated and the indicator light goes on. This light stays

on until manually reset. Both base and mobile units can initiate calls at any time. The Priva-Com III features 9-transistors plus 2-diode solid state circuitry; simple-to-operate push-button switches for Standby, Normal, Call and Reset; a Volume Control; and Indicator Light; a sturdy mobile bracket for mounting under dash, under transceiver, etc. Supplied with 2 plug-in selective ceramic and resonant tuning fork filters, one for 817.5 cps, and one for 997.5 cps tone frequencies; also includes a 11 prong plug at end of cable for direct mating with Lafayette HB-500A, HB-555, HB-525A, HB-525B, HB-600, and HE-20T.
