Here’s a bookshelf system with the big, multi-dimensional sound that only good speakers can produce ... and at an unbeatable price too! Every musical instrument is reproduced with brilliant realism because there are 6 speakers covering four portions of the entire audio spectrum. LAFAYETTE Criterion® Acoustic Suspension Speaker Systems

Deluxe Criterion “5XA” 75 Watt 12 Inch 3-Way Acoustic Suspension System

Now, Lafayette brings you our all deluxe Criterion 5XA...a 3-way bookshelf speaker system that provides a higher level of musical performance than any bookshelf system we have produced before. It provides astonishing range and clarity, with a deep, solid bass response that makes a stunning impact on the listener. Each employs the acoustic suspension principle, the 5XA uses three outstanding woofers to cover the full spectrum of sound. Each was carefully designed for optimum response. The 12-inch acoustic suspension woofer with 6 lb. 2 oz. magnet structure has an exceptionally compliant, long-throw suspension. Its uniquely constructed voice coil consists of heavy ribbon-shaped copper wire edge-wound on an aluminum form. Remarkably low bass response—undistorted even at high power levels. An acoustically isolated 6½-inch midrange speaker with 12 oz. magnet structure provides flawless reproduction free of annoying peaks, yet adding true “presence” to the system. Extending response to beyond audibility is a 2-inch tweeter with a specially designed aluminum cone for brilliant reproduction of the high frequencies to 25,000 Hz and without any shrillness to mar listening enjoyment. LAFAYETTE Criterion “80” 100 Watt 6-Speaker 4-Way Acoustic Suspension Console Speaker System

The Finest Reproduction of Sound Offered by LAFAYETTE for the Home....

A no-compromise 6-speaker system created just for one purpose—the authentic reproduction of a massive symphony orchestra. Brings the spectacular realism of a living performance right into your home. This major accomplishment was achieved by careful selection and design of speaker units and enclosure. A 12” acoustic suspension woofer in a large air-tight enclosure over 3½ cubic feet in overall size results in remarkably powerful, solid bass. Added to this is an acoustically isolated 6½” midrange woof that offers natural “presence” without exaggerated midrange peaks. Four tweeters spread across the front in a calculated configuration ensure a wide dispersion of the highs and reduce high frequency “beaming.” Two of these are 3” units covering the 4,500 to 12,000 Hz range, and two are ultra-high frequency ¾” aluminum cone units that extend response to well beyond audibility. Crossover frequencies: electrical at 800 and 4,500 Hz, mechanical at 12,000 Hz. Heavy-duty enclosure is finished in a rich, hand-rubbed oiled walnut with dark brown tweed grille cloth.
