3 Yr. AAA Guarantee. See Page 12.

- Enclosure Uses “Sonic Tube” for Deep, Reinforced Bass
- 12” Woofer with 4½ lb. Magnet Structure and Large 2” Voice Coil

Here's a bookshelf system with the big, multi-dimensional sound that only multiple speakers can produce...and at an unbeatable price too! Every musical instrument is reproduced with brilliant realism because there are 6 speakers covering four portions of the entire audio spectrum. There's a big 12” speaker for the lows, a 5” unit for the midrange, two 3” tweeters for the highs and two 1½” super-tweeters for the ultra high frequencies. The enclosure is also equipped with a tuned “sonic tube” that makes use of the acoustic output from the rear of the woofer to produce deep, reinforced bass for which this type of system is famous. And best of all, this system is efficient enough for use even with low powered stereo components — actually make them sound better too! Yet, because it can handle up to 50 watts of power, you can also use this system safely with high powered components, either now or in the future. Includes continuously variable midrange and high frequency level controls and polarized terminals. Enclosure is of ¾” construction and is fiberglass filled. Tastefully styled with a fine furniture finish of oiled walnut on four sides for vertical or horizontal placement either on a shelf or floor standing. - Separate Midrange and High Frequency Level Controls.

A no-compromise 6-speaker system created for just one purpose—the authentic reproduction of a massive symphony orchestra. Brings the spectacular realism of a living performance right into your home. This major accomplishment was achieved by careful selection and design of speaker units and enclosure. A 12" acoustic suspension woofer in a large air-tight enclosure over 3½ cubic feet in overall size results in remarkably powerful, solid bass. Added to this is an acoustically isolated 6½" midrange speaker that offers natural "presence" without exaggerated midrange peaks. Four tweeters spread across the front in a calculated configuration ensure a wide dispersion of the highs and reduce high frequency "beaming." Two of these are 3" units covering the 4,500 to 12,000 Hz range, and two are ultra-high frequency 1½" aluminum cone units that extend response to well beyond audibility. - For Direct Vector Addition
- Hyperbolic Sine and Tangent Scales; Two Sine Scales—One Marked in Degrees, One Marked in Radians
- 5 Log Log Scales Plus a Voltage DB Scale

The Lafayette VECTORLOG Slide Rule provides a new concept in scientific calculation, incorporating scales and arrangement designed for quick-easy-manipulation. Twenty-seven (27) scales incorporate the many problems encountered in Electrical Engineering and Physics. The unique P, P', and Q scales allow direct right angle vector addition. No longer are several settings required to obtain right angle vector sums—these scales work in the same manner as the C and D for multiplication. The two Hyperbolic Sine and one Hyperbolic Tangent Scale, the voltage db scale, and the five Log Log scales, provide maximum coverage of these dynamic fields. VECTORLOG is the result of extensive tests for ease of manipulation. Several of these features are: C and D scales on both the front and back of the rule; Sine scales in both degrees and radians, removing the necessity of bothersome conversion of units; a problem-tested location of scales; and adjusted screws to allow variable tension on the slide. Scales include: (FRONT) Tr-1, Tr-2, P, P', Q, ST-, S-1, S-0, C, D, LL0, LL02, LL03, LL11, RB, SH-1, SH-2, DF, A, B, C, C1, FT, Th, C, D, LL3, LL2, db. SHIPPING AND DELIVERY INFORMATION

HOW TO ESTIMATE PARCEL POST CHARGES
Up to 16 oz., all zones allow 6c for first 2 oz., 2c for each additional oz. Find the weight of your merchandise in the extreme left-hand column of the chart at left. Pay the amount listed for Parcel Post shipment to your zone. A fraction of a pound is charged as a full lb. For example, if the weight is 6 lbs. and 1 oz. to Zone 3, postage would be for 7 lbs.
