When a recording machine leaves its factory, the heads are unmagnetized. However, music and speech consist of a series of transients, often not symmetrical in shape. Other asymmetrical transients may occur in line noise, in starting and stopping the machine, and similarly during spurious sounds. The effect is cumulative, and after a week of steady use the recording head may have picked up enough magnetism to raise the noise level by several db and to increase second harmonic distortion. The Audio Head Demagnetizer, Type No. 800, is an AC magnet assembly made with extended pole pieces shaped to fit the contour of the recording head. Properly used, this head demagnetizer will remove any permanent magnetism which may have accumulated on the recording head—thereby reducing noise level which is attributable to this cause.

**3-WAY SPEAKER SYSTEM INCLUDING 8 WATT HI-FI PUSH PULL AMPLIFIER**

The New Lafayette 3-Speaker Hi-Fidelity Unit includes an 8-Watt Push-Pull Hi-Fi Amplifier and 3-Way Speaker System All Mounted in One Cabinet. This unit is especially designed so that it can be used in conjunction with a 45 rpm record player, 3-speed record changer or tape recorder, etc. All you have to do is plug it into your record changer and you will have a Complete Hi-Fi System. Incorporates Features found only in expensive Hi-Fi phonographs: 8-watt AC push-pull Amplifier, 3 Separate Output Transformers, 3 Speakers (246 Speakers—side-mounted for Low Frequency and 4" speaker—center-mounted for High Frequency). Rattled Acoustically For Full Hi-Fi Sound. Can be Used With Any Standard Record Player (RCA, Webster, VM, Columbia, etc.), as well as Tape Recorder, Tuner or Microphone. In Two Jacks can be Used With either a Crystal or Resistance Cartridge. Can be used with any type AM-FM Tuner. Volume Control is compensated for uniform frequency response as the control is varied. It is also tapered to avoid accidental "blasting" of sound. Tone Control knob varies the frequency range of the unit from treble to deep bass. Dual AC Outlet for other electrical appliances, such as radios, lamps, etc. Requires very little space—set it in your bookcase or any table. It is small in size yet gives quality Hi-Fi performance.

Latest development in the FLEXOR concept. Single-limb construction. Features the unique FLEXOR "calibrating" bracket for peaking desired UHF channels. Top for high and medium signal strength areas, this attractive light-boat-type reflector array is available in 4, 6, 8, and 12 db. For all positions, the reflector and directional element are pre-rotated to give maximum signal gain. This budget-priced corner reflector features a tilted, pre-assembled, cadmium plated unit that can be installed on any type of roof. Lafayette does it again! We couldn't pass up a fabulous deal offered us by one of the big boys! They wanted to sell for cash—Lafayette put it on the line and our customers can obtain a brand new PHILCO BOOSTER, Model TB-3, in original factory sealed cartons with a money back guarantee! Lists at 539.50—yours for only 12.50 ea.

The Philco Television Booster Model TB-3 is a high-quality, push-pull, wide-band booster for the specific channel. Designed for use with a 300-ohm line, and can be switched in or out of the circuit when the switch is in the ST-BY (stand-by) position or OFF position, and can be tuned to television channels 2 through 6 when the switch is in the LOW (high) position.

**Mallory 88 UHF CONVERTER**

The Mallory "88" UHF converter is a result of many years of Mallory research in the field of variable inductance tuning devices. Maroon plastic cabinet, 7½"x7½"x4½". Shpg. wt. 4 lbs. Complete with tubes. For 110-120 volt 50-60 cycle operation.

**Mallory 188 CONCEALED UHF CONVERTER**

A UHF converter that fits inside your cabinet—completely hidden except for easy to use selector dial and switch. Installed in a few minutes with no external changes in set. Gives the top quality performance, trouble-free reception on all UHF channels without sacrifice of any VHF channels as the Mallory 88 cabinet model. Low Radiation prevents interference. Shpg. wt. 5 lbs.

**SUPER SONIC TV BOOSTER**

Again Lafayette is out front with a hot booster deal! The Super Sonic booster has a list price of $32.55. Lafayette made a deal with the manufacturer for a large quantity at a real price, and as a result we are now able to make a special offer to you of $9.95. Get yours now, as at this price they won't last long.

**STANDARD TV BOOSTER**

Handsome and compact, this booster features continuous r-f amplification, printed circuit construction, iron core transformer, sealed and waterproof. Offers high gain on all channels, low noise factor. Designed for use with fine tuning control for sharper picture and sound reception. Fully shielded, for 300 ohm or 72 ohm lines. Here's a UHF Front end that covers the entire UHF spectrum 470-890 mc channels 14-82 with the most advanced engineering features. The Cavituner consists of three cavities, two functioning as a band pass pre-selector, the third controlling the local oscillator frequency. The local oscillator, a Colpitts type, tunes below the signal frequency for double superheterodyne or converter applications. Cavity tuning is universally recognized as the finest. Its features includes no moving electrical contacts, frequency stability, uniform bandwidth and high selectivity over entire tuning range, low noise, high gain and completely shielded construction. The double-tuned preselector has an image ratio better than 50 db, an IF (80mc) rejection greater than 85 db, with an insertion loss of approximately 2 db at 890 mc. Cavituner preselector coupling is primarily magnetic and capacitance feed-thru is negligible. Mixing takes place in a low noise diode, with an IF appearing at VHF channels 5-6. It's an ideal unit for anyone experimenting with UHF frequencies, for building a UHF converter (it was the heart of the expensive Radio Receiver converter) for building UHF oscillators, as a tuner or basic front end. Supplied complete with 6AF4, 6BZ7 and IN82. These three parts alone are worth the price, Size overall 7¼" H x 4¾" W x 4½" D. Drum extends 1½" over top. Shpg. Wt. 4½ lbs.

OPTICAL KIT
Produced by the American Optical Co. in collaboration with the Museum of Industry and the Encyclopedia Britannica.

For the young scientist interested in the amazing world revealed by glass, this kit is designed by top-flight scientists to teach the basic science of optics. With it, you can conduct experiments with a telephone like the original one made by Alexander Graham Bell. You also learn how to read electrical circuit diagrams, how to build a vacuum tube radio, how to make an electro-magnet, how to make an aluminum loudspeaker, etc. It is complete with printed book telling how to conduct dozens of experiments with light and sight. Shipped, 7 lbs.

HI-FI PUSH-PULL PHONO AMPLIFIER KIT
Here is a kit designed by the best brains in the country to develop young scientists, giving them a start on the basic science of electronics. This is a 2-line push-pull output amplifier circuit that cuts off the output of a push-pull output device. It utilizes Jensen transformers, designed to take advantage of modern 6L6 output tubes, and obtains 1500 watts per channel. It is complete with all essential parts including tubes and output transformers. Complete with illustrated chassis and schematic diagrams. Shipped, 6 lbs.

AC-DC BROADCAST RADIO SET KIT
Here is a radio set kit designed to give hard-of-hearing aid for radio. A headphone enables two people to listen, etc. Complete with a large supply of parts, including tubes and output transformers. Complete with illustrated chassis and schematic diagrams. Shipped, 6 lbs.

HEADPHONE CUSHIONS FOR ALL PHONES
These headphone cushions fit all types of headphones. They are made of soft rubber and supply the utmost in comfort for hard-of-hearing and for radio enjoyment for people who find it difficult to hear radio programs properly. Also for private listening without disturbing others. Quickly and easily to be restricted to headphones but does not affect picture. Ideal for hard-of-hearing or to cut out noisy programs. Consists of output bus with 15 ft. of cable, one set headphones with cord and plug. Outfit box has 2 phone jacks, remote on-off switch for loudspeaker and headphone volume controls. Shipped, 7 lbs.

MALLEY MIDGET JACKS
Extremely compact. Inexpensive. Mount in 5⁄8" hole. Type A-1" infant" jack is not illustrated. Shipped, 9 lbs.

**HIGH SENSITIVITY AC-DC MULTITESTER**

20,000 ohms per Volt

The new Lafayette High Sensitivity Multitester is a complete instrument packed with every desirable feature found only in instruments costing twice as much. One of the most sensitive multitesters ever offered, 20,000 ohms per volt DC, 8,000 ohms per volt AC, having a high sensitivity of 45 microamperes. Full scale AC-DC voltage ranges are 0-10V, 0-50V, 0-250V, 0-500V. DC current ranges 0-50 microamps, 0-1000 microamps, 0-500 microamps, 0-10 microamps. Decibel range: 0-10 to +20, +30, +50 in 2 decibel steps. Circuit diagram--3½" x 3½". Complete with batteries and leads. Shpg. Wt. 8 lbs.

**NEW POCKET AC-DC VOM MULTITESTER**

1,000 ohms per Volt

This instrument is one of the best buys that Lafayette has ever offered in a Wide Range AC-DC MULTITESTER. An ideal portable unit that meets the need for a compact, yet rugged test instrument. Has ease of operation usually found only in more expensive instruments. Has 1000 ohms/ volt sensitivity on both AC or DC. Uses full 3½" rectangular meter with large easy to read scale. Uses 1% precision resistors. D'Arsenal microamp meter movement. Ranges: AC-DC output 0 to 500 microamps, 50 microamps, 0.2 microamps, 0.05 microamps, 0.01 microamps, 0.005 microamps, 0.001 microamps, 50 microamps, 0.2 microamps, 0.001 microamps. Features single selector switch for use in the shop. An annual buy in accurate and sensitive #111111111111111. IMPORTED BINOCULARS
With Coated Achromatic Lenses and Prisms

NEVER BEFORE AT THESE HISTORY MAKING PRICES

Lafayette has "gone all-out" to present these fine, imported Zeiss type binoculars at heretofore unheard of prices! Each of these extremely precise optical instruments have coated lenses—clamped in (not just glued!) prisms—light weight alloy all metal bodies—weather proof, tear proof outer coverings—maximum light transmission—minimum distortion. Made by leading optical manufacturers to our own rigid specifications. Whether you are a yachtman—hunter—hiker—sports fan—or a bird watcher—you'll find the binoculars you need in Lafayette's great selection. And Lafayette's famous money-back guarantee applies as always.

FOCUS—mechanism is either central focus (C.F.) by means of a single wheel and one adjustable eye piece, or individual focus (I.F.) wherein both eye pieces are separately adjustable.

POWER—is the number of times an image is magnified through your binoculars. For example, 7X (7 power) means the object will appear 7 times larger (or closer) than with the naked eye. The second number used (i.e., the "50" in 12X, 50) is the diameter in millimeters of the objective lens.

COATED LENSES—tend to reduce reflection and pass up to 50% more light than uncoated lenses.

FULLY GUARANTEED FOR 6 MOS. AGAINST MECHANICAL AND OPTICAL DEFECTS.
