## ALPHABETICAL INDEX OF MANUFACTURERS' DISPLAY PAGES

### By Name and Trade Name

**NOTE:** Trade names of manufacturers are indicated in parentheses after the names of their respective owners. In cases where a trade name is so far removed alphabetically from that of its owner as to make it inconvenient to locate readily, the trade name will be found also in its own alphabetical sequence, with the manufacturer's name appended.

#### — A —

	Section	Page
Abbott Instruments, Inc.	H	16
Acro Electric Company	I	8

# RADIO'S MASTER

## NUMERICAL INDEX OF

### MANUFACTURERS' DISPLAY PAGES

#### By Section and Folio

**EDITOR'S NOTE:** This bare outline of the seventeen sections of RADIO'S MASTER will serve for speedy reference and for the purpose of familiarizing yourself quickly with its general contents. A digest of each section is given, but you are warned that these are presented in very sketchy fashion. During your forays through the Master you will find many additional items, too numerous to list here—you may also discover an item in a section to which it does not directly relate. For real accuracy and completeness, therefore, please consult the exhaustive detailed General Index at the back of book.

#### SECTION A

##### TUBES—RECEIVING, TRANSMITTING, INDUSTRIAL— SPECIAL PURPOSE TUBES— PANEL AND GLOW LAMPS

Section & Page	Manufacturer
A-1, 2	Radio Corporation of America
A-3 to 6	Sylvania Electric Products, Inc.
A-7 to 10	Raytheon Manufacturing Co.
A-11, 12	Tung-Sol Lamp Works, Inc.
A-13 to 15	Natioanl Union Radio Corp.
A-16	General Electric Co., Ken-Rad Div
A-17	Standard Arcturus Corp.
A-18, 19	Amperex Electronic Corp.
A-20 to 22	Westinghouse Electric & Mfg. Co.
A-23	General Electric Co., Tube Division
A-24	Heintz & Kaufman, Ltd.
A-25, 26	Electronic Enterprises, Inc.
A-27, 28	United Electronics Co.
A-29, 30	Eitel-McCullough, Inc.
A-31, 32	Taylor Tubes, Inc.
A-33, 34	Continental Electric Co.
A-35, 36	General Electric Co., Lamp Dept.

#### SECTION B

##### PHOTO-ELECTRIC UNITS, PHOTO CELLS, INSTRUMENT RECTIFIERS

B-1 to 4	Worner Electronic Devices
B-5	Selenium Corporation of America
B-6	Schauer Machine Company
B-7	Conant Electrical Laboratories
B-8	Bradley Laboratories, Inc.

#### SECTION C

##### AMPLIFIERS, PHONO P.A. EQUIPMENT, SOUND SYSTEMS, INTERCOMMUNICATION—RECEIVER KITS—WOOD CABINETS

C-1 to 10	David Bogen Co., Inc.
C-13 to 23	Bell Sound Systems, Inc.
C-25, 26	The Erwood Company
C-27 to 30	Mark Simpson Mfg. Co.
C-31, 32	The Rauland Corporation
C-33 to 36	Regal Electronics Corp.
C-37 to 42	Talk-A-Phone Mfg. Co. (Chicago)
C-43 to 46	Stromberg-Carlson Co.
C-47, 48	John Meck Industries, Inc.
C-49, 50	Meissner Manufacturing Co.
C-51, 52	Radio Merchandise Sales

#### SECTION D

##### SPEAKERS, PROJECTORS, REPRODUCERS, HORNS, TRUMPETS

D-1 to 7	Racon Electric Co., Inc.
D-9, 10	Quam-Nichols Company
D-11 to 15	Utah Radio Products Co.
D-17, 18	University Laboratories
D-19 to 26	Jensen Radio Mfg. Co.
D-27, 28	Atlas Sound Corporation
D-29, 30	Kainer & Company
D-31 to 34	Cinaudagraph Speakers, Inc.

#### SECTION E

##### MICROPHONES, PICKUPS, STANDS—PHONO UNITS, MOTORS— RECORDERS, RECORDING EQUIPMENT—DISCS, NEEDLES

E-1 to 4	Universal Microphone Co.
E-5 to 8	Shure Brothers
E-9, 10	Amperite Company

#### Section & Page

#### Manufacturer

E-11 to 14	The Astatic Corporation
E-15	Electro-Voice Corporation
E-16 to 18	The Turner Company
E-19 to 22	American Microphone Co., Ltd.
E-23, 24	Eastern Mike-Stand Co.
E-25	Garrard Sales Corp.
E-26	The Brush Development Co.
E-27, 28	Audak Company, Inc.
E-29, 30	Presto Recording Corp.
E-31, 32	Rek-O-Kut Company
E-33, 34	The Alliance Mfg. Co.
E-35 to 37	DuoTone Company, Inc.
E-38	The Jensen Industries, Inc.
E-39, 40	M. A. Miller Mfg. Co.
E-41	The Recordisc Corporation
E-42	The Gould-Moody Co.
E-43, 44	Audio Devices, Inc.

#### SECTION F

##### TESTERS, ANALYZERS, TESTING EQUIPMENT—MEASURING INSTRUMENTS—PANEL METERS

F-1 to 4	Triplett Electrical Instrument Co.
F-5, 6	Sterling Manufacturing Co.
F-7	General Electric Co., Apparatus Div.
F-8 to 12	Weston Electrical Instrument Co.
F-13 to 16	Jackson Electrical Instrument Co.
F-19 to 21	Supreme Instruments Corp.
F-22	Dejur-Amsco Corporation
F-23, 24	Allen B. DuMont Laboratories
F-25 to 28	Simpson Electric Company
F-29 to 34	The Hickok Electrical Instr. Co.
F-35 to 38	Precision Apparatus Co.
F-39, 40	Superior Instruments Co.
F-41 to 44	Roller-Smith
F-45 to 48	J-B-T Instruments, Inc.
F-49 to 52	Industrial Instruments, Inc.
F-53 to 55	Littelfuse, Inc.

#### SECTION G

##### BOOKS—MANUALS

G-1, 2	Murray Hill Books, Inc., Tech. Div.
G-3 to 6	John F. Rider Publisher, Inc.
G-7, 8	American Radio Relay League
G-9	Editors & Engineers, Ltd.

#### SECTION H

##### TRANSMITTING EQUIPMENT, COMMUNICATION RECEIVERS, AMATEUR EQUIPMENT—ACCESSORIES—VARIABLE CON- DENSERS — COILS — INSULATORS — CRYSTALS — HEADPHONES—CABINETS, RACKS, PANELS

H-1	Echophone Radio Co.
H-2 to 12	The Hallicrafters Company
H-13, 14	Radio Manufacturing Engineers, Inc.
H-15	Hammarlund Mfg. Co., Inc.
H-16	Abbott Instruments, Inc.
H-17 to 36	National Company, Inc.
H-37	Kaer Engineering Co.
H-39 to 42	Hammarlund Mfg. Co., Inc.
H-43 to 47	The Allen D. Cardwell Mfg. Corp.
H-48 to 52	E. F. Johnson Comuany
H-53, 54	Barker & Williamson
H-55 to 58	James Millen Mfg. Co.
H-59	Browning Laboratories, Inc.
H-60, 61	Bliley Electric Company

## MANUFACTURERS' DISPLAY PAGES—NUMERICAL (Cont'd)

Section & Page	Manufacturer
H-62 .....	Trimm, Inc.
H-63 .....	C. F. Cannon Co.
H-64 .....	The Brush Development Co.
H-65 to 73 .....	Meissner Manufacturing Co.
H-74 .....	Stanwyck Winding Co.
H-75 to 78 .....	Par-Metal Products Corp.
H-79, 80 .....	Karp Metal Products Co., Inc.
H-81, 82 .....	Middletown Manufacturing Co.
H-83 to 86 .....	Insuline Corporation of America
H-87 to 102 .....	Bud Radio, Inc.

### SECTION I

#### SWITCHES—TELEGRAPH KEYS—RELAYS—JACKS

I-1 to 4 .....	P. R. Mallory & Co., Inc.
I-5 to 7 .....	Utah Radio Products Co.
I-8 .....	Acro Electric Company
I-9 to 12 .....	Centralab, Div. Globe-Union, Inc.
I-13 .....	General Electric Co., Apparatus Div.
I-14 .....	Signal Electric Mfg. Co.
I-15, 16 .....	J. H. Bunnell & Co.
I-17, 18 .....	Les Logan Company
I-19, 20 .....	Telegraph Apparatus Co.
I-21 to 24 .....	The Vibroplex Co., Inc.
I-25, 26 .....	Ward Leonard Electric Co.
I-27 to 30 .....	Advance Electric Company
I-31, 32 .....	Allfield Control Co., Inc.
I-33, 34 .....	Guardian Electric Mfg. Co.
I-35, 36 .....	Price Brothers Co.
I-37, 38 .....	Sigma Instruments, Inc.

### SECTION J

#### TRANSFORMERS—REACTORS—CONSTANT AND VARIABLE VOLTAGE REGULATORS & CONTROLS

J-1 to 4 .....	Utah Radio Products Co.
J-5 to 17 .....	Standard Transformer Corp.
J-18, 19 .....	Sola Electric Company
J-20, 21 .....	Thermador Electrical Mfg. Co.
J-22 to 30 .....	Thordarson Electric Mfg. Co.
J-31 to 42 .....	United Transformer Corp.
J-43 .....	General Electric Co., Apparatus Div.
J-45, 46 .....	The Haldorson Company
J-47 to 50 .....	Superior Electric Company

### SECTION K

#### CAPACITORS—FILTERS—CAPACITOR TEST EQUIPMENT

K-1 to 14d .....	Cornell-Dubilier Electric Corp.
K-15 to 31 .....	Solar Manufacturing Corp.
K-32 to 34 .....	General Electric Co., Apparatus Div.
K-35 to 52 .....	Aerovox Corporation
K-53 .....	Centralab, Div. Globe-Union, Inc.
K-55 to 62 .....	Sprague Products Company
K-63 to 72 .....	P. R. Mallory & Co., Inc.
K-73, 74 .....	Albert Rothenstein, El-Menco
K-75 to 79 .....	Industrial Condenser Corp.
K-80 to 82 .....	Dumont Electric Company
K-83 .....	Noma Electric Corporation
K-84 to 90 .....	Sangamo Electric Company

### SECTION L

#### RESISTORS—VOLUME CONTROLS—RHEOSTATS—POTENTIOMETERS—ATTENUATORS—VOLTAGE REGULATORS

L-1 to 3 .....	Centralab, Div. Globe-Union, Inc.
L-4 .....	DeJur-Amsco Corporation
L-5 to 10 .....	Clarostat Mfg. Co., Inc.
L-11 to 18 .....	International Resistance Co.
L-19 to 21 .....	Atlas Resistor Company
L-23 to 26 .....	Continental Carbon Inc.
L-27 to 34 .....	P. R. Mallory & Co., Inc.
L-35, 36 .....	Lectrohm, Inc.
L-37 to 39 .....	Utah Radio Products Co.

Section & Page	Manufacturer
----------------	--------------

L-41 to 44 .....	Ohmite Manufacturing Co.
L-45 to 48 .....	Ward Leonard Electric Co.
L-49 to 52 .....	Wirt Company
L-55, 56 .....	Amperite Company

### SECTION M

#### SOCKETS AND PLUGS—TUBE ADAPTERS—CONNECTING DEVICES—TERMINAL STRIPS—INSULATING MATERIAL

M-1 to 26 .....	American Phenolic Corporation
M-27 to 35 .....	Howard B. Jones Company
M-37 to 42 .....	National Fabricated Products
M-45 to 50 .....	Alden Products Company
M-51, 52 .....	Adaptol Company

### SECTION N

#### PILOT LIGHTS, ASSEMBLIES, ACCESSORIES

N-1 to 5 .....	Drake Manufacturing Co.
N-7 to 10 .....	Gothard Manufacturing Co.
N-11 to 18 .....	Dial Light Co. of America, Inc.

### SECTION O

#### WIRE AND CABLE—ANTENNAS—ANTENNA EQUIPMENT AND ACCESSORIES

O-1 to 6 .....	Alpha Wire Corporation
O-7 to 16 .....	Birnback Radio Company
O-17 to 20 .....	Cornish Wire Co., Inc.
O-21 to 23 .....	Belden Manufacturing Co.
O-24 .....	The Ward Products Corporation
O-25 to 28 .....	Premax Products, Div. of Chisholm-Ryder Co., Inc.
O-29, 30 .....	Technical Appliance Corp.
O-37, 38 .....	Corning Glass Works

### SECTION P

#### POWER CONVERSION EQUIPMENT—BATTERIES, CHARGERS, ELIMINATORS, ACCESSORIES—VIBRATORS AND PACKS—POWER SUPPLIES—GENERATORS, CONVERTERS, POWER PLANTS

P-1 to 4 .....	Burgess Battery Company
P-5, 6 .....	Mueller Electric Company
P-7 to 16 .....	P. R. Mallory & Co., Inc.
P-17, 18 .....	Utah Radio Products Co.
P-19 to 22 .....	Electronic Laboratories, Inc.
P-23 to 27 .....	American Television & Radio Co.
P-28 .....	General Transformer Corp.
P-29, 30 .....	Electro-Products Laboratories
P-31 .....	Standard Transformer Corp.
P-32 .....	Kato Engineering Company
P-33 .....	Carter Motor Company
P-34, 35 .....	Atlas Aircraft Products Corp.

### SECTION R

#### TOOLS—HARDWARE—SERVICE AIDS

R-1 to 8 .....	Insuline Corporation of America
R-9 to 14 .....	Bud Radio, Inc.
R-17 to 21 .....	Radio Essentials, Inc. American Radio Hardware Co.
R-22, 23 .....	Harry Davies Molding Co.
R-25 to 38 .....	General Cement Mfg. Co.
R-41 to 48 .....	Walter L. Schott Co.
R-49 .....	American Electrical Heater Co.
R-50 .....	Electric Soldering Iron Co., Inc.
R-51, 52 .....	Drake Electric Works, Inc.
R-53, 54 .....	Hexacon Electric Company
R-55 .....	Sound Equipment Corporation
R-56 .....	The Ruby Chemical Co.
R-57 to 60 .....	Kraeuter & Company, Inc.
R-61 to 63 .....	Park Metalware Co., Inc.
R-64 .....	Roesch & Spears
R-65, 66 .....	General Hardware Mfg. Co.
R-67 to 69 .....	Vaco Products Company

[ FOR DETAILED GENERAL INDEX OF SPECIFIC ITEMS  
AND THEIR PAGE NUMBERS, REFER TO BACK OF BOOK. ]

# RCA RADIO TUBE PRICE LIST

PRICES EFFECTIVE AS OF JANUARY 1, 1945

Prices shown are exclusive of all Federal, State and local excise, sales and similar taxes.

NOTICE: OPA has, under Section 6.48 of Rev. Supplementary Regulation 14 to General Maximum Price Regulation, established by type maximum retail and wholesale prices, and the maximum prices which may be charged by anyone reselling the types listed in this price list are subject to that regulation.

ELECTRONIC AND RADIO TUBES

# TRANSMITTING and INDUSTRIAL TUBES

## Price List

Raytheon has long led the way in the development and manufacture of Transmitting and Special Purpose tubes which are now widely used in industrial, medical, communication, and other similar equipment. Raytheon furnishes a full range of these tube types, especially those particularly adapted for use in the high and ultra-high frequency spectrum.

Raytheon Transmitting and Special Purpose tubes are never limited to the use of one specific class of material in manufacture. Tantalum, molybdenum, tungsten, and carbon are selected for use as grid and plate materials only after exhaustive tests to determine, in terms of highest efficiency, the best-adapted material to the class of service for which the tube has been designed.

From Raytheon laboratories have come many important tube developments making possible the solution of tremendous war communication problems. These developments are now restricted to the use of our armed forces for necessary reasons of wartime security; but postwar amateur, shortwave, and industrial markets may confidently look to Raytheon for tubes of even greater efficiency and wider application.

### RECTIFIER TUBES

Raytheon is a leader in the field of Rectifier tubes and offers a most complete line of these types.

Listed below will be found high voltage-low current rectifier tubes and low voltage-high current rectifier tubes which are widely used in industrial applications. Special attention is called to the gas-filled and mercury-vapor rectifiers in the development of which Raytheon has long been a pioneer.

The continued research and development of tube types for special applications has always been among the prime achievements of Raytheon, and in the post-war period Raytheon will continue to offer unexcelled tube engineering talents to the industrial field of Electronics.

\* May be used as ionic heated cathode rectifier under some conditions.

### FLAT HEARING AID TUBES

The Flat Hearing Aid Tube types listed below are an exclusive Raytheon development.

In the majority of hearing aids that have been manufactured in the United States, these Raytheon

flat type tubes have been used as original equipment.

These tubes are now finding many new applications where very low battery drain, extremely small tube size, and long life are required.

TYPE NO.	CONSTRUCTION	SPECIAL USES	Volts	FILAMENT		Type	RATED VOLTAGES			PO.—WATTS Output	NET PRICE

Fig. 2

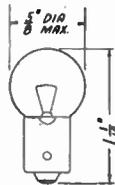

Fig. 3

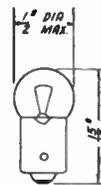

Fig. 4

Fig. 5

Raytheon Radio Panel Lamps are packed in unit boxes of ten (10) of a type. All orders for these lamps must be for unit quantities, or multiples, of each type.

### SUGGESTED DEALER'S DISCOUNT SCHEDULE

1-9 Cartons - - - 40% from list (Fed. Excise Tax additional)  
 10-19 Cartons - - - 40-10% from list (Fed. Excise Tax additional)  
 20 or more Cartons - - - 50% from list (Fed. Excise Tax additional)

Above discounts apply to assorted cartons on any one order (10 lamps per carton).

**ALL TYPES  
\$1.00 ea.  
List Price**

Switch may be placed in operation by pulling out stop lug.

#### PACKING and HANDLING:

Each control is individually packaged in colorful N.U. carton, with full mounting instructions.

N13	Screw	2.5	.30

### RADIO BATTERIES

During normal times National Union provides a complete line of popular types of replacement batteries for radios and flashlight batteries. At present the line is limited to one type, N801—Pack.

### SOUND SYSTEMS

National Union in peace time makes available a wide choice of amplifiers including Portable Systems, Mobile Systems and School Systems. These units while not now available due to war time restrictions will be again offered to the trade after the war.

### NATIONAL UNION

### Research & Development

National Union has extensive research and development laboratories staffed by leading scientific personnel. Problems having to do with production of advanced electronic devices employing vacuum tubes may be submitted to this division for study.

The local National Union Distributor carries stocks of many kinds of materials and parts used in the electronic field. Use him as a quick source of supply, rely on him as an expediter.

**Other National Union Products: Transmitting Tubes - Cathode Ray Tubes

## TRANSMITTING and SPECIAL PURPOSE RADIO-ELECTRONIC TUBES

Engineered and produced to meet the most exacting requirements of such users as the Army and Navy these National Union tubes offer an assurance to the purchaser that they are scientifically correct. War time restrictions do not permit the disclosure of many improvements in performance made possible by National Union research and engineering techniques. Inquiries are invited for availability information on types not listed but which may be required for special applications.

### NATIONAL UNION PHOTOTUBES

26 TYPES . . . Gas Filled and Vacuum

Sensitivity Range from 12 to Over 300 ua. per lumen

High Frequency, Motion Picture, Relay & Industrial Applications

**Longer Life:** Due to fine materials, rigid standards, design for severe service.

**Higher Ionization Point:** National Union phototubes have a much higher ionization voltage point thus offering a wider efficient operating range than competitive tubes with an ionization point at 100 volts. National Union wide operation range avoids critical voltage adjustments.

**Greater Output Current:** At a voltage 10% below ionization voltage, output current is greater than that of competitive tubes tested under similar conditions—consequently higher output at rated 90 volts operating voltage.

**Wider Frequency Response:** Practically straight line response over a wide range of frequency. Less than 2 db. loss in audio frequency range with consequent higher fidelity.

**Fortified Against High Ambient Temperatures.**

**Non-Microphonic.**

**Clear Glass Bulbs:** Specially selected. True light source variation without distortion.

**Low Dark Current.**

Write for Technical Data Catalog PT-344.

## WATER JACKETS

TYPE NO.	PRICE	Suitable for these Amperex types:
DW-1580	\$50	207, 848, 863, 891, 892,
DW-2000	50	220C, 222A, 232C, 233,
DW-2500	150	237A, 342A, 343A, 858, 859.

NOTE: Amperex Water Jackets fit interchangeable tube types of other makers.

**GENERAL GUARANTEE**—Amperex tubes are guaranteed against all mechanical and electrical defects for a period of 1000 hours within one year from date of sale if operated in accordance with the ratings and within specified limits. They are not guaranteed against glass or filament breakage. Should a tube fail in normal operation, it should be returned to the manufacturer for examination, with a statement giving the number of hours used and the type of circuit in which it was installed. In returning tubes for adjustment the customer gives permission to the Amperex Electronic Corporation to break the glass bulb and to dissect the structure of the tube in case such procedure is considered necessary for complete examination. A pro rata adjustment or replacement will be made if the defect is found to be due to a manufacturing defect. **ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.**

# ELECTRONIC TUBES

for Transmitting Service

Priced Low

Unsurpassed in Value

• General Electric has designed and built tubes to meet the most exacting requirements on land and sea and in the air for three decades. G.E. on a transmitting tube assures you of long, dependable service at low cost. Bulletin EXT-5 lists the complete G-E transmitting-tube line, together with technical data and prices. Ask for a copy.

### G-E BEAM POWER TUBES

for More Power with Less Equipment

Low Driving Power—Quick Band Change

**GL-807 . . . . . Net \$2.25**

• The G-E beam tube for your low-power requirements. Oscillator, amplifier, frequency multiplier or modulator—you can't buy a more versatile performer for \$2.25! Less than half a watt drives two 807's; ICAS cw output: 100 watts!

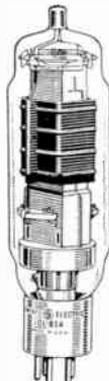

**GL-814 . . . . . Net \$15.50**

• The G-E beam power tube for any medium-power r-f application up to 30 mc. 160 watt cw 130 watts plate-modulated phone (ICAS) with 1.5 or 3.2 watts driving power respectively. A 1b frequency multiplier, too. \$15.50 puts one in your rig.

**GL-813 . . . . . Net \$22.00**

• The G-E beam tube for high power. It will produce 150 watts cw as a crystal oscillator, 500 watts cw with only 1 watt driving power. An excellent frequency multiplier. Makes quick band change at high power easy.

### G-E MERCURY-VAPOR RECTIFIERS

# GAMMATRON TUBES

**24G**  
PLATE DISS.  
25 W.

**257B**  
PLATE DISS.  
75 W.

**454**  
PLATE DISS.  
250 W.

This complete line, covering a power range of 50 to 5,000 watts, embodies 18 years of pioneering and experience in the design and manufacture of tantalum tubes.

Special plate, grid, and filament design, and new metal-to-glass seals, give Gammatrons remarkable VHF performance. Other features: ability to withstand high plate voltages, complete protection against tube failure due to overloading, and long, efficient operating life.

The Gammatron engineers responsible for these developments will be glad to help you with your special problems.

## Power and Transmitting Tubes

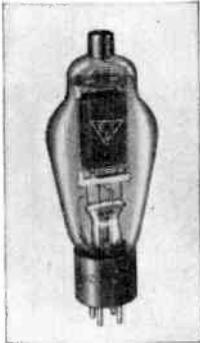

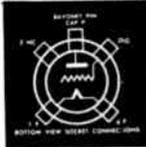

FOR ALL INDUSTRIAL AND ELECTRONIC APPLICATIONS

Type 811

### Type 811 TRANSMITTING TRIODE ZIRCONIUM COATED ANODE

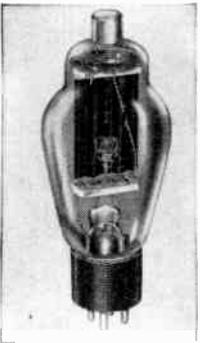

EE-811 is a high- $\mu$  transmitting triode with a normal plate dissipation of 50 watts. Two tubes functioning as Class "B" AF Amplifier or Modulator handles power output of 225 watts. A single 811 as Class "B," RF amplifier has power output of 25 watts. Single tube, Class "C" RF amplifier power output 120 watts, and as RF Oscillator 170 watts. Filament 6.3 volts, 4.0 amps. Amplification factor 160. Grid to plate capacitance 5.3 MMF. Max.

Type 812

### Type 812 TRANSMITTING TRIODE ZIRCONIUM COATED ANODE

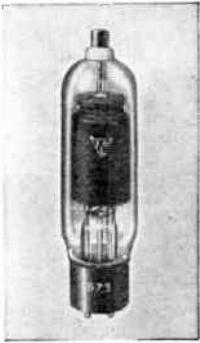

EE-812 is a low- $\mu$  transmitting triode with a normal plate dissipation of 50 watts. Two tubes as Class "B," AF amplifier or Modulator capable of 225 watt output. Single tube, Class "B" RF amplifier has power output capacity of 25 watts. Single tube, Class "C," RF amplifier 120 watts, and as RF Oscillator 170 watts. Filament 6.3 volts, 4.0 amps. Amplification factor 29. Grid to plate capacitance 5.3 MMF max.

Type 3B 27

### Type 3B 27 HALF-WAVE HIGH VACUUM RECTIFIER

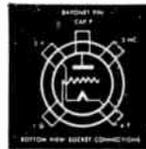

EE-3B27 features double heaters and cathodes, close spacing between heaters and cathodes. Ceramic spacers provide long leakage paths. For use when temperature conditions or noise restrictions prohibit the use of mercury vapor testers. Max. ratings: 8500 volts, 150 amps, or 6000 volts, at .25 amps. Peak plate current at 6000 volts 1 amp. Heater 2.5 volts at 5 amps. May be mounted in any position.

Type 873

### Type 873 HALF-WAVE MERCURY-VAPOR GRID CONTROL RECTIFIER

EE-873 is intended for use where continuously variable power output is required in such applications as vacuum tube bombarding and induction heating equipment. Ratings are as follows: Supply frequency 0-150 cycles, condensed mercury temperature 20-50° C. peak inverse voltage 10,000 max., peak plate current 5.0 amps. max., average plate current 1.25 amps. max. At 20° to 70° C peak inverse voltage 5,000 max.

### Type EE-17 HALF-WAVE MERCURY-VAPOR GRID CONTROLLED RECTIFIER

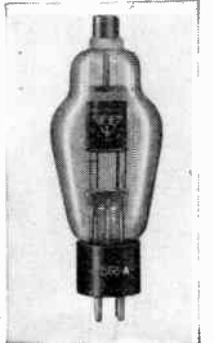

EE-17 rectifier is intended for use in devices which require a continuously variable power output or on and off control such as in transmitter keying. Peak inverse voltage 7,500 max., peak plate current 2.0 amps. max., average plate current .5 amps. at 20° C. condensed mercury temperature. Heating time 30 seconds. Ionization time 10 microseconds. De-ionization time 1000 microseconds. Supply frequency 0-150 cycles.

Type EE-17

### Type 866 A/866 HALF-WAVE MERCURY-VAPOR RECTIFIER

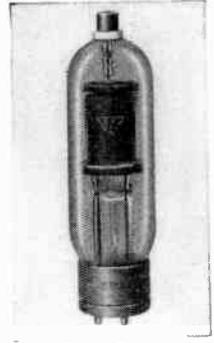

Rugged construction. Extra large, new alloy filament permits operation at low temperature and higher inverse voltage and assures long life. Maximum ratings with supply frequency to 1000 cycles, condensed mercury temperature 25-70° C, peak inverse voltage 5100 max., peak plate current 1.0 amps. max., average plate current 0.25 amps. max. tube drop 15 volts. With condensed mercury temperature 25 to 60° C and to 150 cycles supply, peak inverse voltage 10,000 max.

Type 866 A/866

### Type 872-A HALF-WAVE MERCURY-VAPOR RECTIFIER

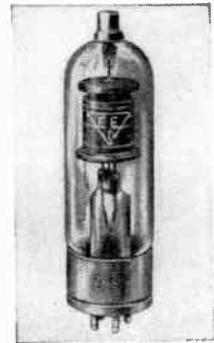

EE-872-A is a heavy duty rectifier. Maximum ratings are as follows: Supply frequency to 150 cycles, condensed mercury temperature 25-50° C. Peak inverse voltage 10,300, peak plate current 5.0 amps., average plate current 1.25 amps., tube voltage drop approx. 10 volts. Filament 5.0 volts, 6.75 AC. Tubes may be used with choke or condenser input and in single or multi-phase connections.

Type 872-A

### Type 8008 HALF-WAVE MERCURY-VAPOR RECTIFIER

EE-8008 is a heavy duty rectifier with an oversize filament connection at all times. Ratings are as follows: Supply frequency to 150 cycles. Condensed mercury temperature 15-50° C, peak plate current 5.0 amps. max., average plate current 1.25 amps. max. Tube voltage drop approx. 10 volts. Tubes may be used with condenser or choke input and in single or multi-phase rectifier circuits.

## Power and Transmitting Tubes

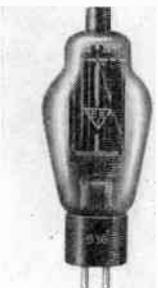

FOR ALL INDUSTRIAL AND ELECTRONIC APPLICATIONS

Type 575-A

### Type 575-A HALF-WAVE MERCURY-VAPOR RECTIFIER

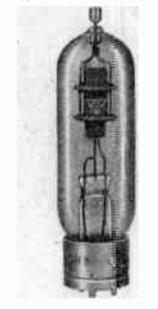

EE-575-A mercury vapor rectifier for heavy duty use where ventilated service is permissible. Tube operates on supply frequencies to 150 cycles, condensed mercury temperature 15 to 50° C. Peak inverse voltage 15,000 max. peak plate current 6.0 amp. max. Average plate current 1.5 amps. max. with internal drop of approximately 10 volts. Large 50 watt type base for rugged mounting and perfect contact. Suited for multi-phase operation.

Type 836

### Type 836 HALF-WAVE HIGH-VACUUM RECTIFIER

EE-836 features double heaters and cathodes with rugged construction permitting close spacing between cathodes and plates. Ratings are 5000 volts max., peak inverse volts, 1.0 amp. max., amperes peak plate current, 0.25 amp. max., average plate current. Heater 2.5 volts at 5.0 amps. Full wave, two tubes, 1765v per tube input (RMS) and 1590v DC output to filter at 0.5 amp. load, 3 phase double "Y," parallel, 6 tubes, AC input 2040 v (RMS) per leg, 2390 volts DC at filter at 1.5 amp.

Type 371-B

### Type 371-B HALF-WAVE HIGH-VACUUM RECTIFIER

EE-371-B high-vacuum filament type rectifier for application in high voltage circuits. Withstands high inverse voltage. 4 Pin Jumbo base assures positive contact even under severe vibration. Ratings: Maximum peak inverse voltage 25,000. Peak plate current 1.5 amp., max. Average plate current 0.3 amp., max. Filament 5.0 volts (AC) at 10 amperes. 4 tubes in full-wave bridge circuit deliver 15,650 volts to filter at 0.6 amps. with 17,650 volts total AC input.

Type 8020

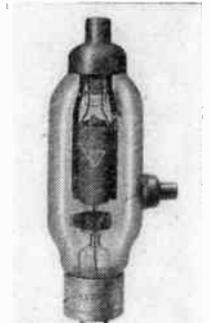

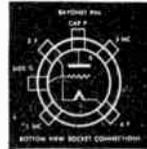

### Type 8020 HALF-WAVE HIGH VACUUM RECTIFIER

EE-8020 has thoriated filament and is capable of withstanding peak inverse voltages to 40,000. Peak plate current 0.5 amps., max. average 0.1 amp. max. Filament consumes only 5 volts AC at 6 amps. 4 tubes in full wave bridge deliver 25,440 volts to filter at 0.2 amps. with 28,240 total volts AC input. Medium 4 pin bayonet socket. Mounts vertically.

### Type EE-200 POWER AMPLIFIER OSCILLATOR, CLASS B MODULATOR

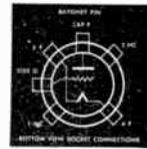

EE-200 is a medium power multi-purpose triode. Tube is ruggedly constructed for industrial applications, long life and operating stability. Operates as self excited oscillator at 60 MC with plate dissipation of 150 watts. Also recommended for Class "B" or "C" applications. Handles plate voltages to 2500 and has amplification of 18. Filament to volts at 3.25 amps. Capacitances: grid to plate 5.2 MMF, grid to filament 1.2 MMF.

Type EE-200

### Type EE-300 POWER AMPLIFIER OSCILLATOR, CLASS B MODULATOR

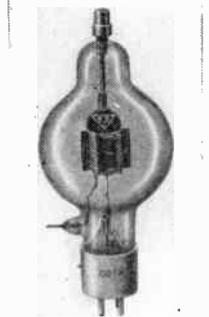

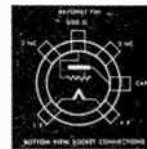

EE-300 is similar to EE-200 except capable of higher power output. Same rugged construction and long life features are incorporated. As self excited oscillator at 60 MC, plate dissipation up to 200 watts. May be employed as Class B power amplifier or modulator, or Class amplifier or modulated RF amplifier. Plate voltages of 3000 are easily handled and amplification factor is 23. Capacitances: grid to filament 6.0 MMF, grid to plate 6.5 MMF, plate to filament 1.4 MMF.

Type EE-200

### Type 100-TH TRANSMITTING TRIODE, TANTALUM ANODE

EE-100-TH medium power transmitting triode has normal plate dissipation 130 watts. Tantalum anode assures gas free long life. Tungsten anode greatly reduces high frequency loss. Tube operates at plate potentials to 3000 volts and has low interelectrode capacitance. Recommended as Class "C" RF amplifier, and Class "B" amplifier or modulator. Filament 5 volts at 6.5 amps. Base: 4 pin ceramic for low loss.

Type 100-TH

### Type 808 TRANSMITTING TRIODE

EE-808 medium power triode is recommended as a modulator or Class C oscillator. May be used for Class B amplification. Plate dissipation 50 watts. Anode potentials to 1500 volts may be applied. Filament 7.5 volts, 4.0 amps. Mu 47. Grid is capped at side of tube for low RF loss. Maximum signal output, two tubes as Class B modulators 190 watts. Capacitances: grid to filament 5.2 MMF, grid to plate 2.8 MMF, plate to filament 0.15 MMF.

United Electronics Company is a pioneer in the field of high-frequency heating. Many popular makes of induction heating generators use UNITED tubes for the r-f power source. This is likewise true in machines for dielectric heating applications — notably in the plastics industry.

Step by step UNITED has progressed with this important industrial electronic development, designing specialized power tubes in close collaboration with the research of equipment manufacturers.

The three tube types illustrated in this panel embody structural features and electrical characteristics to intimately adapt them to the specific requirements of r-f heating generators.

Type	Normal Plate Dissipation	Filament Volts	Amperes
KU-23	300 watts	11	4.0
949-H	500 watts	11	7.7
HV-18	200 watts	10	3.85

United radio-therapy oscillators and rectifiers are used by the majority of short-wave generator manufacturers. UNITED has worked hand in hand with leading therapy instrument designers to develop better tubes. These tubes are specifically designed for heavy

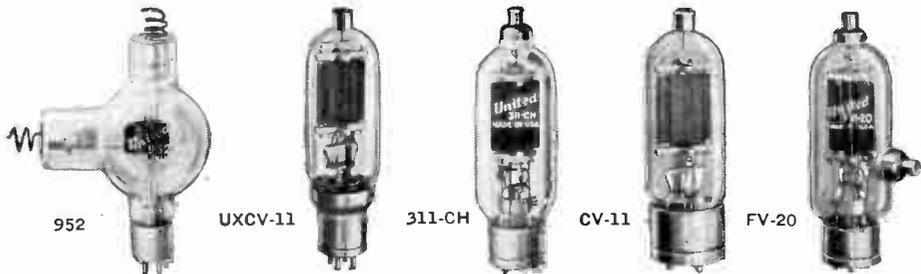

duty use in these self-excited oscillator circuits, in which general purpose tubes cannot properly be applied.

Accurate replacement of tubes can most readily be made by selecting the proper UNITED types from the tables below.

2312-18 WABANSIA AVENUE, CHICAGO 47, ILLINOIS

Licensed by RCA and G-E

**822**

**For Induction Heating**

A Heavy-duty Triode—thousands in use in R. F. Heating Apparatus. Fil. 10.0 V.—4.0 A. Max. plate Volts—2500. Max. plate current—MA—350. Grid to plate cap.—13.5 mmf. Amp. Factor—27. Plate Dissipation—200 Watts. Max. size—9 in. x 2 5/16 in. Nonex Glass. Standard 50 watt base.

**\$18.50**

**814**

Same electrical and physical specifications as 822 except Amp. Factor is 12. **\$18.50**

**203-A**

Taylor's 203-A created a new standard for long, trouble-free performance. It is a husky Triode. Fil. 10.0 V.—3.25 A. Max. plate Volts—1250. Max. plate current—MA—175. Grid to plate cap.—13 mmf. Amp. Factor—25. Plate dissipation—100 watts. Max. size—7 1/2 in. x 2 5/16 in. Nonex Glass. Standard 50 watt base.

**\$10.00**

**211**

Same electrical and physical characteristics as 203-A except Amp. Factor is 12.

**\$10.00**

**211-C**

Special Diathermy type. Grid to plate cap. is 9 mmf. Special grid and plate leads increase safety factor. **\$12.50**

**Multi-Element Types**

- 803—Pentode ..... \$25.00
- 813—Beam Power.. 22.00
- T-21—Beam Power.. 1.95
- 282-A—Screen Grid. 22.00

**T-200**

A heavy-duty Triode—operates at high efficiency with full input at 30 mc. Fil. 10.0 V.—5.75 A. Max. plate Volts—2500. Max. plate current—MA—350. Grid to plate cap.—7.9 mmf. Amp. Factor—17. Plate dissipation—200 Watts. Nonex Glass. Standard 50 watt base. Max. size—9 1/2 in. x 3 3/4 in.

**\$21.50**

**805**

High Mu—zero bias Triode. Fil. 10.0 V.—3.25 A. Max. plate Volts—2000. Max. plate current—MA—200. Grid to plate cap.—7.7 mmf. Amp. Factor—Variable. Plate dissipation—125 Watts. Max. Size—8 1/2 in. x 2 5/16 in. Nonex Glass. Standard 50 watt base.

**\$11.00**

**T-125**

Fine performing medium power Triode for operation in frequencies up to 60 mc. Fil. 10.0 V.—4.5 A. Max. plate Volts—2500. Max. plate current—MA—250. Grid to plate cap.—6.0 mmf. Amp. Factor—25. Plate dissipation—125 Watts. Max. size—8 1/4 in. x 3 in. Nonex Glass. Standard 50 watt base. **\$13.50**

**810**

Medium power Triode—interchangeable with RCA 810. Same appearance as the T-125. Fil. 10.0 V.—4.5 A. Max. plate Volts—2250. Max. plate current—MA—275. Grid to plate cap.—4.8 mmf. Amp. Factor—36. Plate dissipation—150 Watts. Max. size—9 in. x 2 3/4 in. Nonex Glass. Standard 50 watt base. **\$13.50**

**T-40 — TZ-40**

Versatile and highly popular 40 watt Triodes. Full input to 60 mc. Fil. 7.5 V.—3.0 A. Max. plate Volts—1500. Max. plate current—MA—150. Grid to plate cap.—5.0 mmf. Plate dissipation—40 Watts. Amp. Factor—T-40-25; TZ-40-62. Max. size—6 1/4 in. x 2 1/8 in. UX 4 prong base.

**\$3.50**

**T-55**

Good High Frequency Triode. Full input on 60 Mc. Fil. 7.5 V.—3.0 A. Max. plate Volts—1500. Max. plate current—MA—165. Grid to plate cap.—3.85 mmf. Amp. Factor—20. Plate dissipation—55 Watts. Max. size—7 in. x 2 5/8 in. Nonex Glass. UX 4 prong base.

# Taylor Tubes

**"More Watts  
per Dollar!"**

2312-18 WABANSIA AVENUE, CHICAGO 47, ILLINOIS

**866 JR.—(2B26)**

Half-wave Mercury Vapor Rectifier. For use in power supplies from 600 to 1250 volts. Widely used. Fil. 2.5 V.—2.5 A. Max. peak inverse Volts—5000. Max. peak plate current Amps.—0.5. Max. av. plate current Amps.—0.125. Voltage drop—15. Size max.—5¼ in. x 2¼ in. Socket—Standard 4 contact—Ceramic.

**\$1.00**

**249-B**

Half-wave Mercury Vapor Rectifier. Suitable for a wide range of services midway between the 866-A and the 872-A. A pair will deliver 750 MA. at 3200 volts D.C. Nonex Glass. Exact replacement for all tubes with the same type number. Fil. 2.5 V.—7.5 A. Max. peak inverse Volts—10,000. Max. peak plate current Amps.—1.5. Max. av. plate current Amps.—.375. Voltage drop—15. Max. size—6¾ in. x 2½ in. Socket—Standard 4 contact—Ceramic.

**\$5.00**

**258-B**

Replace tubes of same type number. Has same electrical and physical characteristics as 249-B except has two ¼ inch prongs only. Fits W. E. type 138-B socket.

**\$6.00**

**875-A**

Half-wave Mercury Vapor Rectifier. A pair will deliver 3.0 Amps. at 4750 Volts D.C. Fil. 5.0 V.—10.0 A. Max. peak inverse Volts—15,000. Max. peak plate current Amps.—6.0. Max. av. plate current Amps.—1.5. Voltage drop—15. Max. size—10¼ in. x 3 13/16 in. Socket—Transmitting 4 contact—50 watt type.

**\$30.00**

**HI-VAC HALF-WAVE  
HI-VOLT RECTIFIER**

**TR-40-M**

High Vacuum, High Voltage, Half-wave Rectifier. Incorporates latest design features insuring long filament life. Nonex Glass. Fil. 5.0 V.—10.5 A. Max. peak inverse Volts—60,000. Average plate current—250 MA. Socket—Transmitting 4 contact—50 watt type. Max. size—10¼ in. x 3¾ in.

**\$20.00**

**Write us for  
TAYLOR TUBES  
new MANUAL

**866-A**

Half-wave Mercury Vapor Rectifier. Long-life multi-strand filament. Alsimag safety plate cap insulator minimizes glass failures. More Taylor 866-A's in use than any other. Fil. 2.5 V.—5.0 A. Max peak inverse Volts—10,000. Max. peak plate current Amps.—1.0. Max. av. plate current Amps.—0.25. Voltage drop—15. Max. size—6¼ in. x 2 5/16 in. Socket—Standard 4 contact—Ceramic.

**\$1.50**

**872-A**

Half-wave Mercury Vapor Rectifier. Taylor improved design with multi-strand filament. A pair will deliver up to 2.5 Amps. at 3500 Volts D.C. Nonex Glass. Fil. 5.0 V.—7.0 A. Max. peak inverse Volts—10,000. Max. peak plate current Amps.—5.0. Max. av. plate current Amps.—1.25. Voltage drop—15. Max. size—8¼ in. x 2 5/16 in. Socket—Transmitting 4 contact—50 watt type.

**\$7.50**

**8008**

Same as the 872-A except has longer base pins. Use in a Johnson 244 or Mykroy 8008 socket.

**\$7.25**

**GRID CONTROL  
GASEOUS RECTIFIERS**

**TT-17**

Replaces Gen. Elec. FG-17. Grid-controlled Mercury Vapor Triode Discharge-Rectifier tube. Fil. 2.5 V.—5.0 A. Max. peak inverse Volts—2500. Max. peak plate current Amps.—2.0. Max. av. plate current Amps.—0.5. Negative starting voltage. Max. size—6¾ in. x 2¼ in. Socket—Standard 4 contact—Ceramic.

**\$6.00**

**873**

Grid-controlled Mercury Vapor Triode Discharge-Rectifier tube. Fil. 5.0 V.—7.0 A. Max. peak inverse Volts—7500. Max. peak plate current Amps.—5.0. Max. av. plate current Amps.—1.25. Voltage drop—15. Negative starting voltage. Socket—Transmitting 4 contact—50 watt type. Nonex Glass. Max. size—10¼ in. x 3 13/16 in.

**\$17.25**

**We carry a complete stock of Taylor Tubes and always have the New Tubes as soon as they are announced.**

# CETRON ELECTRONIC TUBES

Engineered and Manufactured by Continental Electric Co., Geneva, Ill.

## CETRON PHOTOTUBES

CETRON phototubes are either of the gas-filled or of the vacuum type. With the gas-filled type, greater effective response is obtained, particularly in low impedance circuits, while the vacuum type is recommended where maximum stability is desired.

CETRON phototubes are selected as to their sensitivity and priced accordingly. Phototubes of the Super Class A/B are generally used for experimental purpose where very high sensitivities are required; Class C mostly for motion picture equipment; Class D for relay work, etc.

Standard phototubes are those listed without an asterisk \* while special ones, which are only produced on demand, carry an asterisk \*.

## GAS-FILLED PHOTOTUBES

The rated sensitivity for Super Class A/B is 200 microamperes per lumen and up (average 300); Class C, 125-200 microamperes per lumen (average 160); Class D, 75-125 microamperes per lumen (average 100). These sensitivities are measured at recommended operation and test voltage as specified in our technical chart.

Engineering bulletins giving detailed specifications on all tubes listed here are available and may be had upon request. The extensive engineering and manufacturing facilities which we have, make possible the development and production of many types of special tubes. If you have a problem involving the use of any CETRON tubes you are invited to consult with us. We are also prepared to make special tubes to your specifications.

### WARRANTY

We guarantee all products manufactured by us to be free from all material and manufacturing defects and to give satisfactory service when operated in accordance with instructions indicated for their use.

Continental Electric Co.

# FOR QUICK VISUAL INDICATION

Investigate the Unique Characteristics of G-E Neon Glow Lamps

● The unique characteristics of General Electric Neon Glow Lamps recommend them for a variety of uses in radios and electronic devices . . . as indicators, voltage regulators, pilot lights and test lamps.

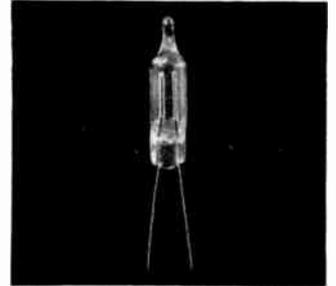

The uses described at right are typical. If you think G-E Neon Glow Lamps can be useful to you, write or phone the address below. Experienced General Electric Lamp Engineers will be glad to discuss your problems with you.

## CONSIDER THESE ADVANTAGES

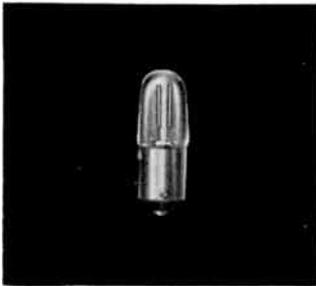

1. Distinctive orange-red glow—no colored cover glass needed.
2. Dependable performance and long life—rated at 3,000 hours.
3. Very low current consumption—less than 1/2 milliampere for smallest lamp.
4. Variety of sizes and wattages.
5. High resistance to vibration, shock.
6. Normally usable on a-c or d-c.
7. Screw base lamps for 105-125 v. circuits; similar lamps with bayonet bases available without resistors.
8. Produce practically no heat.
9. Nearly flat volt-ampere characteristics.
10. Insensitive to voltage variations above critical value.

**NE-48** (also NE-16). Indicator lamps. Special volt-ampere characteristics of these lamps indicate use as voltage regulators. Screw base lamp available as NE-45.\*

**NE-2** One of the most widely used indicator and test lamps—popular because of compactness and small size. Nominal wattage is only 1/25 watt. This lamp is unbased—has wire terminals.

**NE-51** For general indication, such as showing existence of potential across various parts of electrical circuits.

**NE-17** Indicator and pilot light lamp that flashes to show condition of B-battery in portable radios. Frequency of flashes decreases as battery runs down.

① Applies to lamp when new.

② Glass part; wire terminals extend additional 1 3/8".

③ Designed for DC flashing operation in RC circuit.

① Meets JAN-1A specifications for 991. Special marking JCG-991 supplied at small extra charge.

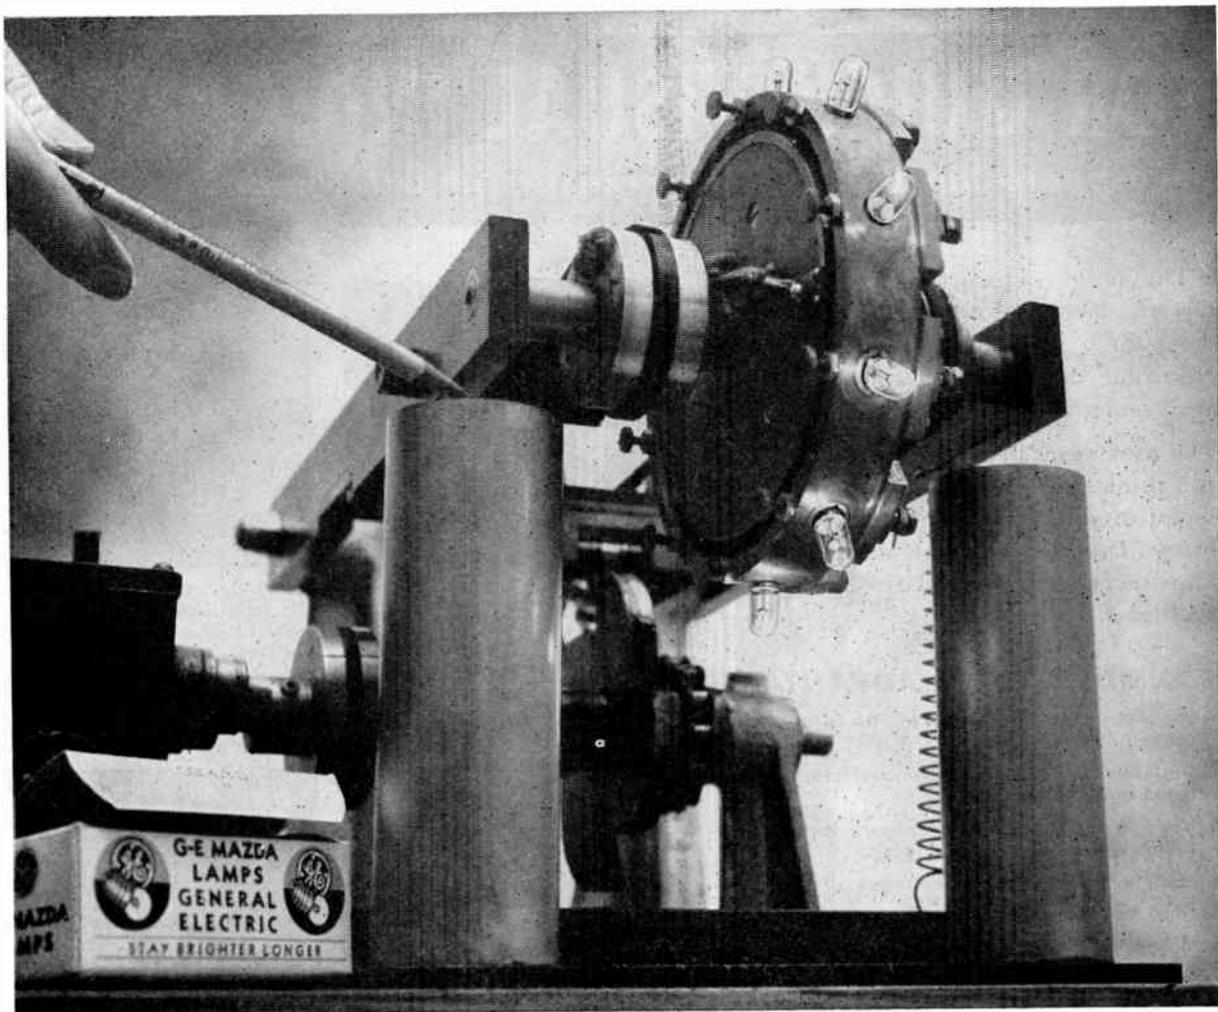

② Designed for 67-87 Volts D.C. (D.C. operating voltage at 1.5 milliamperes, 53-65 volts).

For further information, write address below for Bulletin 7100.

**NELA SPECIALTY DIVISION LAMP DEPARTMENT**

# GENERAL ELECTRIC

1 Newark Street, Hoboken, N. J.

## *It turns 'em, burns 'em and bounces 'em!*

This is the rotary hot shock tester—one of many testing devices built by General Electric research engineers to assure top quality in G-E Mazda Miniature Lamps. More than once a second for eight hours, the carriage that supports the revolving wheel bounces up and down on the steel posts, giving the lighted lamps a terrific shock.

Rigid testing and careful manufacturing controls like this are important reasons for specifying G-E Mazda Miniature Lamps for radio panels and for similar uses in other electronic devices. General Electric makes all types of miniature lamps; they are designed for longest possible life consistent with wattage and light output; they are rugged and of uniform high quality. Ask your G-E lamp supplier for G-E Mazda Miniature Lamps—or get in touch with your local G-E Lamp Department District Sales Office.

## How You Can Profit By the Use of ELECTRONICS

**War-born production speed and precision now makes "automatic operation control" vital to post-war competition.**

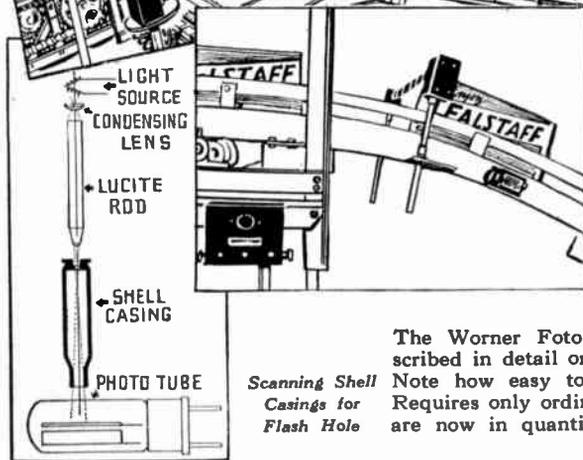

Consider how Worner Fotoelectric Units can see more accurately than the human eye; respond more quickly, more surely than the human hand . . . continuously, unflinchingly, night and day! With untiring accuracy, with unerring precision they see and act instantaneously . . . they stop, start, sort, grade, count, signal, etc. more quickly than human mental processes can begin to function.

Today, Worner Fotoelectric Units are controlling hitherto unconquerable uncertainties in an amazing variety of unrelated problems. Suggestive applications are listed here. Translate them to your problems and let us help you plan opportunities for you to capitalize at once.

*Synchronizing Conveyor Operations*

*Controlling Smoke for Proper Combustion*

*Scanning Shell Casings for Flash Hole*

The Worner Fotoelectric Units are described in detail on the following pages. Note how easy to install and operate. Requires only ordinary care. These units are now in quantity production.

*Counting*

### How FOTOELECTRIC Units Now Serve Industry

*In addition to the many common uses described at the left, Worner Units have been adapted to handle the following and many other problems.*

Control machinery by interruption of light by objects too light in weight to operate mechanical switches!

Control of water valves by radiant energy from hot billets that are to be descaled.

Shutting off boiler feed water and giving alarm when creosote is prominent in condensate thus arresting damage to boiler tubes.

Control for automatically wrapping bread, candy and many other packages so that the printed matter is in desired position.

Inspection and rejection of lightweight and empty cans that have been through cooker and are enroute to cooler. This is to prevent these cans from clogging cooler.

Counting of sheets in tin plate mills.

Pin hole detection.

Detecting breaks in belts, paper, wire, etc.

Automatically controls amount of artificial illumination according to change in natural light.

Control of tower street beacon signs, etc. Turns lights on and off at a predetermined intensity.

Flame control in oil or gas burners to prevent explosion by preventing flow of combustibles after flame is extinguished.

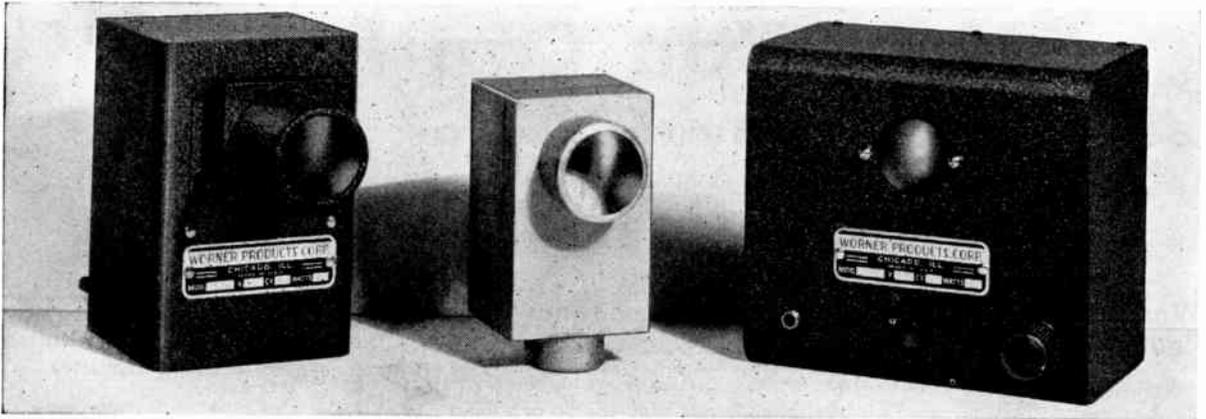

Automatic control of flow of materials on conveyors or belts.

Control of humidity in room where shoe soles are conditioned before going into production.

**NOTE: What is your problem? Let Worner Electronics Engineers solve it for you.**

See Page U-3 for Worner Anti-Sabotage Equipment, the invisible ray that protects life and property.  
See Page U-4 for Worner Combustion Supervisor that maintains boiler operation at correct combustion level for maximum efficiency and lower fuel consumption.

# WORNER Fotoelectric PRODUCTS

Light Source for 2-Unit Set

Extension Photocell for 3-Unit Set  
Extension Light Source for 3-Unit Set

Amplifier and Relay for 2-Unit  
and 3-Unit Sets

## Two and Three-Unit Sets

The Two-Unit Set consists of a Light Source and a Photo-Electric Receiver equipped with a sensitivity control and an on-off switch. The Three-Unit Set consists of an Amplifier, an Extension Photo-Cell and an Extension Light Source. The Amplifier contains relay, sensitivity regulator, power supply and output terminal. The Extension Photocell Unit is available in three sizes for convenient installation where space limitations are a factor.

## Operation

The sets will operate upon interruption of the light beam or on a change of light intensity. Response is sufficiently fast to open and close built-in relays up to 500 times per minute.

## Lamp Life

Lamp life in either two or three-unit-system is approximately 2000 hours.

## Relays

Relays are double pole, double throw types rated at 3 amperes non-inductive, 1 ampere inductive at 110 volts, 60 cycles AC.

## Construction

Each unit is carefully engineered and accurately constructed of finest parts. Cases are sturdily made of 19 gauge steel, finished in gray crackle. Light Source measures 6" x 7" x 4 1/8"; Receiver 7" x 6 1/4" x 4 1/4". Wall brackets are included. Extension Photocell Units are available in the following three sizes: The standard Extension Photocell Unit for both the Light Source and the Photo Cell has cast iron weatherproof housing for 1/2" conduit, size 4 1/2" x 3" x 2 3/4". Where applications require a smaller extension unit, order our 18 gauge size 6 1/4" x 1 5/8" x 1 5/8" or 18 gauge, size 3 3/4" x 1 1/8" x 1 1/8".

## Installation

The installation will vary to meet the requirements of the particular job. We shall be glad to supply detailed information on request. Both models are for use from 110 volts, 60 cycles AC.

## List Prices

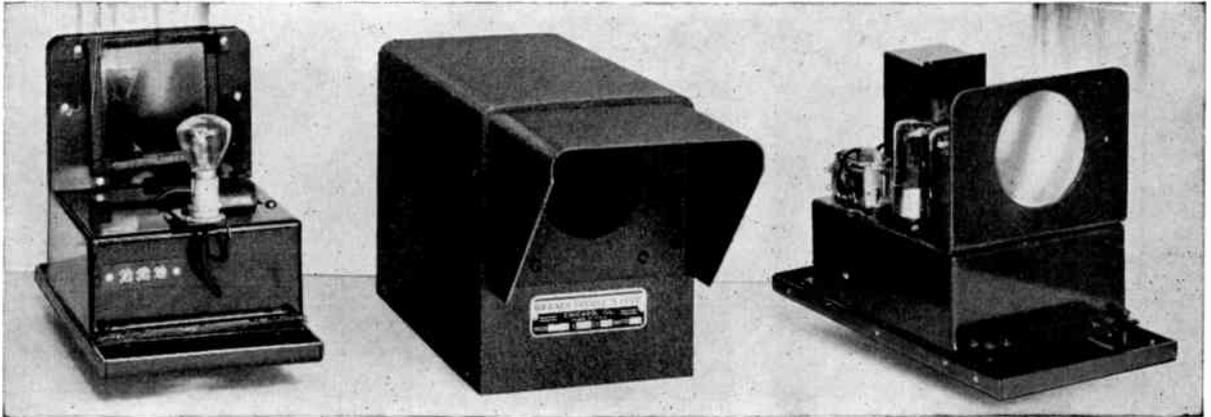

MODEL 2801-RL—Amplifier and Relay.....	\$55.00	} For distances under 4 feet.
MODEL 2801-LL—Extension Light Source.....	\$12.00	
MODEL 2801-R—Amplifier and Relay.....	\$55.00	} For distances over 4 feet
MODEL 2801-L—Extension Light Source.....	\$12.00	
MODEL 2104—Amplifier and Relay.....	\$60.00	
MODEL 2304—Extension Light Source.....	\$ 8.50	
MODEL 2204—Standard Extension Photocell.....	\$ 8.50	

(For smaller size Extension Photocell, write for quotation.)

We will gladly furnish you with details pertaining to our experience in the following applications or any other application not listed here.

- Remote control of machines, doors.
- Ventilation control.
- Operation of valves & switches.
- Detecting paper breaks (printing).
- Production inspection and counting, sorting, sizing, and weighing.
- Conveyor Control.
- Reversing steel mill rolls.
- Automatic package wrapping.
- Spray control for painting.
- Registering control (p-inting).
- Operation of safety doors.
- Auto speed indicators.
- Remote control of dangerous processes.
- Safety protection of oil burners, gas burners and stokers.
- Safeguards expensive dies on punch and forming presses.
- Elevator safeguards.
- Control and inspection.
- Turbidity control in water supply.
- Titration of chemicals.
- Detecting flaws in materials.
- Color Analysis—matching and comparison
- Sorting Foods.
- Control of cut-off saws.
- Measuring liquids, tanks, bottles, cans, barrels, etc.
- Automatic control of paper trimming.
- Calipering small parts.
- Room illumination and window display control.
- Airport, aviation and lighthouse beacons.

## ANTI-SABOTAGE EQUIPMENT

**For The Plant That is NOT EXPENDABLE . . .  
THE INVISIBLE RAY THAT PROTECTS LIFE AND PROPERTY**

The Worner Anti-Sabotage system is an extremely flexible photocell sentinel. Provides protection that cannot be bribed. For the war plant, warehouse, shipyard, light plant, railroad yard anywhere! Carefully engineered, incorporating most practical features to assure utmost protection. Projects a beam of infra-red (invisible) rays which, when interrupted, actuate a relay which, in turn, operates an alarm or series of alarms. The alarm may be Visible or Audible, it may be local and may also be hooked up to the closest police headquarters.

*Worner Anti-Sabotage systems are protecting vital plants throughout the country. In shipbuilding yards, in factories, in power plants, Worner systems serve as ever vigilant sentinels to protect the increasing flow of materials so necessary to the successful conduct of the war.*

### Operates Indoors or Outdoors

Indoor installation shows exact room in which trespass occurs; Outdoor installation locates trespasser within 500 feet. Can also be connected to turn on floodlights in the area where the trespass occurs. The entire installation may be invisible if desired. The units comprising the system are small and readily hidden from view. The projected infra-red rays are invisible, and so the intruder—even if he suspects the presence of a photo-cell system—is not aware of its location.

### Two Standard Models

Available with ranges of 250 feet and 500 feet respectively. Where greater coverage is required, send detailed information and sketches showing areas to be protected. Quotations will be promptly supplied, covering a system engineered to that particular job. Installation is simple and can be made by anyone with a little electrical knowledge.

### Specifications

The Worner Anti-Sabotage Equipment consists of the Robot and Light Source illustrated above. A weatherproof metal case covers each unit. The visor protects lenses against rain or snow.

### Lamp Life

The life of the lamp in the Light Source is approximately 1000 hours.

### Relays

Relays are all double pole, double throw types. Maximum current capacity is 3 amperes at 110 volts, 60 cycles AC non-inductive and 1 ampere inductive load.

### Construction

The cases are built of sturdy 14 gauge steel, and all joints are carefully welded for complete weatherproofing. Case size is 7" high, 5 3/4" wide and 1 3/4" deep. Finished in brown wrinkle enamel. Equipped with mounting flanges which accommodate 1 1/2" pipe. For operation from 110 volts, 60 cycles AC. Complete with tubes.

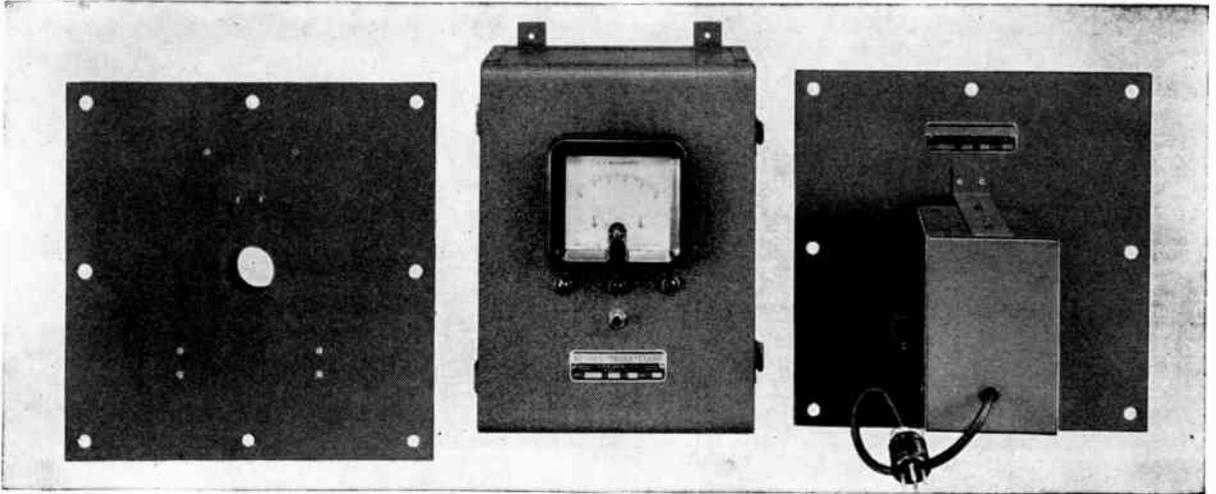

Model No.	List Price	Ship. Wt.
2250 250 foot range*	\$170.00	33 lbs.
2500 500 foot range*	265.00	33 lbs.

\* Both models are equipped with a scientifically engineered device for limiting the unwanted-light. The Worner unwanted-light rejector materially increases the daylight range of the unit if equipment is installed so that 90% of the light reaching the Photo-Cell is that generated by the Light Source.

### Burglary Protection

For burglary protection, ranges are available from 100 to 500 lineal feet. Write for Engineering Bulletins on Burglary Protection.

## COMBUSTION SUPERVISOR

**Maintain Boiler Operation at Correct Combustion Level**  
**Get Maximum Efficiency • Reduce Fuel Consumption**

Essential wherever a boiler is used. It is of greater-than-ever importance under today's conditions of high-speed performance. It is a photo-cell system which accurately and dependably operates combustion controls to maintain boiler operation at maximum efficiency, and accuracy. It works on a "smoke detection" principle. A more-than-normal increase in the density of smoke passing through a boiler breeching means a reduction in heat, loss of efficiency, increase in fuel consumption and operating costs, and a violation of ordinances directed at control of the smoke nuisance.

### Entirely Automatic

The Combustion Supervisor is easily installed (requires only two small openings) across the breeching leading from a boiler. Provides dependable warning when smoke density increases beyond a permissible level. It is entirely automatic, eliminates possibility of errors from the "human element" and provides control of amazing accuracy and flexibility.

### Flexibility

As easy to regulate as a pressure gauge. Responds to any magnitude of smoke density to assure a maximum efficiency and economy in boiler performance. Condition of smoke density is shown at all times by the *meter* and the *colored jewels* on the front of the Control Cabinet. If a permanent and continuous record of boiler behavior is desired, a *recording meter* may be used. Built-in relays can be connected to operate any Audible or Visible alarm and any combustion control mechanism. To avoid "false alarms" resulting from an excess smoke density of momentary duration, the Combustion Supervisor is equipped with a variable time-delay which may be adjusted to control operation for any interval, from instant to one minute. We have designed a triple method of air flow with removable glass baffle for easy cleaning.

### Complete, Compact, Convenient

The system consists of three units: a Light Source which projects a beam across the area to be protected; a Receiver which contains a sensitive Photocell; a Control Cabinet which contains Amplifiers, Relays, Terminals for Power, Control and Alarm, Light Intensity Regulator, Photocell Sensitivity Regulator, Time-delay Regulator, Operating Signals, Smoke Density Meter and Restoration Control Button.

### Lamp Life

Average life ranges from 2000 to 3000 hours depending upon brilliance of beam required.

### Relays

Relays are double pole, double throw types rated at 3 amperes non-inductive, 1 ampere inductive at 110 volts, 60 cycles AC. If more current must be handled, auxiliary relays may be connected to terminals on control panel.

### Construction

Cases are built of 14 gauge steel and are equipped with standard outlet boxes. Light Source if built on a 12" x 12", 14 gauge steel flange which is provided with 8 holes for easy mounting. Control Cabinet is 11 3/4" high, 9" wide and 5" deep. Fifteen feet coaxial cable supplied as standard. For greater length, please specify. For operation from 110 volts, 60 cycles AC.

	List Price	Shipping Wt.
MODEL 2101-A—For use where no time delay is necessary. Usually used as an alarm device, not to control automatic combustion correcting equipment. . . . .	\$100.00	33 lbs.
MODEL 2101-B—For use with combustion control equipment. Equipped with time delay to arrest operation of control equipment from voltage drop and short puffs of smoke. . . . .	\$150.00	33 lbs.
MODEL 2101-C—For use with combustion control equipment. Equipped with time delay to arrest operation of control equipment from voltage drop and short puffs of smoke. An additional time delay holding control to continue operation of combustion correcting equipment for a predetermined period of time. Prevents cycling of equipment. . . . .	\$175.00	35 lbs.

SCA Selenium Instrument Rectifiers  
SCA Selenium Power Rectifiers

SCA Selenium Self-Generating Photo Cells  
1717 West Pico Boulevard, Los Angeles 15, California

## SCA PHOTO-ELECTRIC CELLS

**S-100-W**

Self-generating type and is manufactured in three sensitivity grades. The output is 320 amperes at 100 ft. candles. The cell is mounted in metal case with two terminals in the back of the case. The overall dimensions are  $1\frac{1}{16}$ " x  $\frac{7}{8}$ " x  $\frac{1}{4}$ ".

**R-100-W**

Self-generating photo cell has output of 600 micro amperes at 100 ft. candles. Characteristics permanent and unit withstands most severe conditions of use.

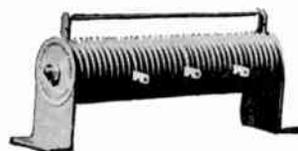

Ask for 12-page Booklet on Photo Cells

## SCA SELCOCHARGER

Use the Selcocharger as an "A" eliminator. Maximum AC input 18 volts, single phase. DC output 12 volts, 4.5 amperes DC into a resistive or inductive load.

## SCA SELCOPACK

Use the Selcopack as a "B" eliminator. Rating 80 to 90 volts, 0.240 amperes DC into a resistive or inductive load. AC input 110 volts, single phase.

## SCA INSTRUMENT RECTIFIERS

### HS

Type HS is a half wave rectifier assembled in plastic case with mounting extension. Maximum AC input 5 volts, maximum DC current output .008 amperes.

### HL

Half wave rectifier consisting of one type L rectifying plate mounted in aluminum case. The entire assembly is covered with salt spray resistant coating. Terminals are sealed. AC volts 5 maximum current .020 amperes.

### N-2

Input 10 volts AC. Half wave. Continuous DC .001 amperes. Used with meters, detector circuits, bias voltage.

### N-25

Input 250 volts AC. Half wave. Continuous DC .001 amperes. Suitable for high frequency applications.

### HO-20

Consists of twenty type O rectifying elements assembled in bakelite tubing with two screw-on caps, cadmium plated. Soldered terminals as well as 6-32 screw terminals are provided. The entire unit is less than  $1\frac{1}{2}$  inches long and is rated at 220 volts .005 amperes.

### HO-10

Half wave rectifier assembled with ten type O plates. Case and terminals similar to HO-20. Rating AC volts 110, DC .005 amperes.

### CS

Consists of two center tapped type S rectifying elements. Maximum AC volts 10, DC .008 amperes. Rectifying elements are assembled in plastic case. 2-inch long flexible leads soldered to the terminals are supplied with the unit.

### CL

Center tapped rectifier consisting of two type L elements. Rating AC volts 10, DC .035 amperes. The aggregate is coated with salt spray resistant coating.

### HS 4-MO

Consists of four closely matched rectifying plates specially suitable for modulation and demodulation. Five leads 2 inches long soldered to terminals are provided.

### BS

Consists of two rectifying elements type S connected in series, assembled in plastic case. AC volts 5, DC .005 amperes.

### DS

Input 10 volts AC. Full wave bridge. Continuous DC .010 amperes. Unbreakable plastic case with mounting extensions.

### DL

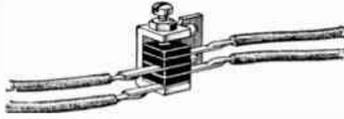

Input 10 volts AC. Full wave bridge. Continuous DC .035 amperes. Mounted in aluminum case with mounting extension.

# ELECTROX RECTIFIERS

Full and Half Wave Low-Capacity Copper Oxide Rectifiers  
For Instruments, Test Sets, and Similar Applications

## TYPE A—3/16" Square Disks - DC Output - 5 Milliampers

TYPE A-4  
CAT. No. 5020

Type A-4, Cat. No. 5020—A full wave rectifier unit with four 3/16" square copper oxide rectifying elements contained in metal housing and provided with four 3-inch insulated leads. Continuous service output of 5 MA at a maximum of 3 volts DC. Maximum AC input 4 volts.

Type AA-4, Cat. No. 5064—A full wave rectifier unit with four 1/8" diameter copper oxide rectifying elements contained in bakelite housing and provided with four 4-inch bare leads. Continuous service output of 1 MA at a maximum of 1 volt DC. Maximum AC input 1.5 volts.

## TYPE B—7/16" Round Disks - DC Output - 20 Milliampers

TYPE B-2  
CAT. No. 5047  
CAT. No. 5049

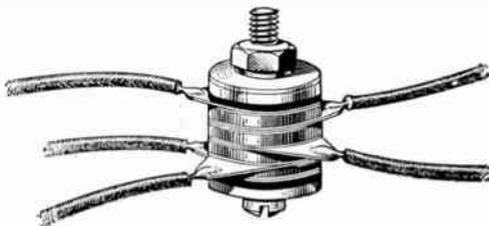

Type B-1, Cat. No. 5048—A half wave rectifier unit with single 7/16" diameter copper oxide rectifying element contained in bakelite housing and provided with two 3-inch insulated leads. Continuous service output of 13 MA, DC, and 3 volts AC in the reverse or high resistance direction.

Type B-2, Cat. No. 5047—A half wave rectifier unit with two 7/16" diameter copper oxide rectifying elements contained in a bakelite housing and provided with three 3-inch insulated leads. Continuous service output of 13 MA, DC. Maximum AC input 4 volts.

Type B-2, Cat. No. 5049—A half wave rectifier unit with two 7/16" diameter copper oxide rectifying elements contained in a bakelite housing and provided with three 3-inch insulated leads. Continuous service output of 13 MA, DC, and 3 volts AC per disc in the reverse or high resistance direction.

Type B-4, Cat. No. 5016—A full wave rectifier unit with four 7/16" diameter copper oxide rectifying elements provided with five 3-inch insulated leads. Continuous service output of 20 MA at a maximum of 3 volts DC. Maximum AC input 4 volts.

## TYPE C—3/4" Round Disks - DC Output - 50 Milliampers

TYPE C-4  
CAT. No. 5017

elements provided with three terminal lugs. Continuous service to supply an output of 32 MA, DC and 3 volts AC per disc in the reverse or high resistance direction.

Type C-2, Cat. No. 5010—Two half wave rectifier units, each with single 3/4" diameter copper oxide rectifying element, mounted on one bolt, and insulated from one another. Two terminal lugs provided for each section. Each unit rated to supply an output of 32 MA, DC, with maximum of 3 volts AC in the reverse or high resistance direction.

Type C-4, Cat. No. 5014—A full wave rectifier unit with four 3/4" diameter copper oxide rectifying elements provided with five terminal lugs. Continuous service output of 64 MA at a maximum of 3 volts DC. Maximum AC input 4.1 volts.

Type C-4, Cat. No. 5017—A full wave rectifier unit exactly the same as Cat. No. 5014, with the exception that 3-inch insulated leads are supplied for connecting the rectifier units.

Over ninety per cent of all rectifier requirements are served by 12 types—4 basic assemblies in 3 series. These 3 series are the three primary units of Conant rectifiers. Special types, however, can be developed as needed, and you'll find Conant ready to cooperate.

**SERIES 500 UNITS** are for general applications requiring greater output current for meters, relays or other apparatus requiring more than 1 milliamper. Recommended for all such applications at commercial and the lower audio frequencies. Will also operate up to 50,000 c.p.s. in special applications wherein accuracy of readings is not essential.

**SERIES 160 and 160-C** are for applications requiring good frequency response over the entire commercial and audio range and especially when the meter, relay or other apparatus requires less than 1 milliamper for operation. In some special applications these units may be operated at frequencies up to 15,000,000 c.p.s. with special circuit treatment.

**SPECIAL TYPES** are available in both series 500 and 160-C. When requesting a quotation on a special type include a sketch of the rectifier required or a circuit diagram showing source and frequency of the input voltage, resistance

and kind of load, required load current and the ambient temperatures.

**SERIES 500** Disc diameter .500 inch. Area each disc .15 square inch. Furnished with 3" braided, tinned copper leads. Finished in clear lacquer. Nickel plated end plates.

**SERIES 160** Disc diameter .160 inch. Area each disc .02 square inch. Furnished with 3" stranded, tinned double silk covered copper leads. Nickel plated case. Assembly sealed with specially developed moisture proof compound.

**SERIES 160-C** Disc diameter .160 inch. Disc area, lead wire and length and moisture proof seal are identical with Series 160. Dimensions of the nickel plated case have been reduced to the most compact size. These units may be mounted in a standard midget fuse clip.

# NEW RECTIFIERS FOR SIMPLIFICATION OF CIRCUIT DESIGN PROBLEMS

## STANDARD MODELS OF COPROX RECTIFIERS

Coprox Model CX-2E4-A9, ring-connected and mounted in tube base, detects phase differentials in A.C. currents and small D.C. potentials applied to balanced A.C. circuits. Maximum 4.5 volts continuous. Shown here in actual size.

Coprox Model CX-1C2B1, a center tap, full wave rectifier. Completely enclosed in Bakelite. Low capacitance. Rectifies high frequency current. Conservatively rated up to 4.5 volts A.C., 3.0 volts D.C., 500 microamperes D.C. Other models and capacities to meet all needs.

Coprox Model CX-4D4F23, a full wave rectifier with high conversion efficiency, for electronic control work. Rated at 5 volts A.C., 40 milliamperes D.C. continuous. Fully enclosed. Mounts on a single screw.

Coprox CX-3E8C3 double bridge rectifier with current and temperature current characteristics balanced to better than 1% over a range of  $-40^{\circ}\text{C}$  to  $+70^{\circ}\text{C}$ . Rated up to 4.5 volts A.C., 3 volts D.C., 5 milliamperes D.C. Other models and capacities to meet all needs.

Coprox CX-2E1H5 (Not illustrated) Single, half-wave rectifier rated up to 4.5 volts A.C., 3.0 volts D.C., 2.5 milliamperes D.C.

Coprox CX-2E2D4 (Above) Double half-wave rectifier rated up to 4.5 volts A.C., 3.0 volts D.C., 2.5 milliamperes D.C.

Coprox CX-2E4F2 (Not illustrated) Full wave rectifier rated up to 4.5 volts A.C., 3.0 volts D.C., 5 milliamperes D.C.

Many variations are possible with the basic Coprox Rectifier models described at the left. Bradley's application experience can help you, not only in the use of these units but also in the development and production of special rectifiers for special jobs. Here are the special features of all Bradley Coprox Rectifiers:

- Gold coating of "pellets" to combat aging.
- Pre-soldered lead wires, or special terminals, to prevent overheating during assembly.
- High leakage, low forward resistance, for efficient operation.
- Waterproof lacquering or wax potting, for perfect sealing.
- Highly adaptable mountings.
- Ratings are very conservative.

For samples and special data which will help you design more efficient circuits that will stand up longer than others, write Bradley. Ask any questions you have in mind.

## LUXTRON PHOTOCELLS

A Bradley booklet is available, to suggest the many ways in which Luxtron<sup>®</sup> photocells can be used for control and testing purposes. These cells generate sufficient current to operate in-

struments and instrument relays without amplification. They are built for long life and have varied mountings and a wide range of sizes. (\*Trade Mark Reg. U. S. Pat. Off.)

## IMPORTANT — PLEASE READ AND SAVE TIME!

**LOW IMPEDANCE INPUTS:** Models EL35, and HH-HLO Preamplifiers can be obtained with additional Low Impedance Inputs built-in at an extra cost of \$23.75 per input. Specify when ordering.

Additional Low Impedance Inputs are obtainable on Models EL75 — EL30 — EL14 at an extra cost of \$17.50. Specify when ordering.

**RACK AND PANEL MOUNTING:** All Bogen Amplifiers, Boosters and Preamplifiers are available for rack and panel mounting if specified when ordering. Models E75 — E8 — E10 — E100 add \$8.00. Models with Sloping Panels — EX35 — E30 — E14 — HH — HLO — LLO — add \$10.00.

**REMOTE CONTROL CIRCUITS:** Models E14 — EL14 — E30 — EL30 — E75 — EL75 can be obtained with remote control circuits for all inputs, built-in, at an extra cost of \$5.00, if specified when ordering.

**REMOTE CONTROL UNIT:** Model SRC50 — SR Remote Control complete with 50 ft. Cable and Plugs for use with all Bogen Amplifiers equipped for Remote Control. Price \$11.00.

**CHOICE OF MICROPHONES:** All Bogen Systems can be obtained with a choice of microphones other than those listed with each system. Choices are enumerated after each system. Specify microphone selected when ordering, and ask for information regarding additional cost.

# BOGEN EX35 De Luxe "Streamliner" Systems

MODELS WITH LOW AND HIGH IMPEDANCE INPUTS

## 35

### Watts

- ★ Exclusive New Triple Range Electronic Tone Corrector
- ★ Controls Bass, Treble and Intermediate Tone Ranges
- ★ Four Input Channels
- ★ Three Microphones and Phono
- ★ Remote Control Circuits built in for all inputs
- ★ Illuminated Sloping Control Panels
- ★ Push pull 6L6 Output
- ★ Inverse Feedback and fixed bias
- ★ Weatherproof Outdoor Trumpet Systems

**C**OMBINING every desirable feature of advanced sound engineering with new and exclusive Bogen developments, the EX35 "Streamliners" invite comparison with any equipment in their power range. Chief among the exclusive features of the new "Streamliners" is the **BOGEN TRIPLE RANGE ELECTRONIC TONE CORRECTOR**. Exceeding all previous standards of performance this new circuit offers complete control of three tone ranges—Bass, Treble, and the middle register. Three separate tubes, each one acting as an electronic audio channel, control and amplify the overall tone range. A unique dual control system permits the operator to create any tone range desired regardless of the acoustics of the installation. The Electronic Tone Corrector differs completely from ordinary Bass or Treble controls or equalizers, and it has none of the objectionable features of compensators or tone controls such as power loss or distortion. Other de luxe features of the new EX35 "Streamliners" are four Input Channels for three microphones and phono—Electronic Mixing between all input channels—full range individual gain controls for all inputs and a low impedance model for installations where long microphone cables are required. The model EL35 low impedance amplifier provides one low impedance input channel. The other two microphone inputs and phono remain high impedance as in the model EX35 but if desired, additional low impedance inputs can be obtained built-in at an additional cost. A remote control circuit is built-in on all "Streamliner" models permitting mixing and fading with Bogen wired or wireless remote controls, of two microphones or one microphone and phono. Sloping control panels, illuminated, insure greater visibility and ease of operation. For further convenience variable tapped outputs are available at a terminal strip and two speaker sockets—the variable taps permitting correct matching at both points. These and many other quality features contribute greatly toward making the new Bogen EX35 "Streamliner" amplifiers second to none.

**BOGEN DE LUXE MODEL EX35 "STREAMLINER"**—Amplifier, complete with tubes.

#### LOW IMPEDANCE AMPLIFIER

**DE LUXE MODEL EL35 "STREAMLINER"**—Amplifier, with first microphone input channel equipped for low impedance operation—tapped at 50, 200, and 500 ohms. Specify tap setting desired when ordering. Model EL35 "Streamliner" amplifier, complete with tubes.

#### BOGEN EX35 "STREAMLINER" SOUND SYSTEMS

**MODEL EX35F**—Complete basic system includes: 1—EX35 amplifier. 1—Kit of matched tubes. 2—Jensen PM12B heavy duty 12" dynamic speakers each with 25' heavy rubber covered speaker cable and plugs and, choice of 1—(a) Amperite BH velocity microphone, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal. Each with 12½' cable and plugs.

C-2

#### FOR INDOOR INSTALLATIONS

**MODEL EX35B—"STREAMLINER"**—Complete system as above but with 2—WA12 de luxe walnut baffles.

#### FOR PORTABLE USE

**MODEL EX35P—"STREAMLINER"**—Complete system as above but with 1—Heavy duty No. 134X reinforced dual speaker case and one No. 133X de luxe amplifier case.

#### FOR OUTDOOR INSTALLATIONS

**MODEL EX35T—"STREAMLINER"**—Complete system includes: 1—Model EX35 amplifier. 1—Kit of matched tubes. 2—Bogen-University 4½' reflexed non-resonant weatherproof trumpets and two Bogen-University 25-watt PM dynamic trumpet units (not dynamic cone speakers), choice of 1—(a) Amperite BH velocity microphone, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal. Each with 12½' cable and plugs.

**MODEL SRC50—SR Remote Control**, for use with any of above systems or amplifier. Complete with Model RC 50' cable and plugs.

#### MODEL EX35 "STREAMLINER" SPECIFICATIONS

**POWER OUTPUT:** 35 watts undistorted (less than 5%)—peak power—50 watts.

**INPUT CIRCUITS:** Four input channels—three Microphone inputs, 1—Phono input. All circuits may be mixed simultaneously.

**INPUT IMPEDANCES:** Microphone channels—High impedance 500,000 ohms. (Low impedance channels available in Model EL35 provides taps of 50, 200, 500 ohms). Phono input—high impedance —500,000 ohms.

**OUTPUT CIRCUITS:** Tapped terminal strip and two plug-in speaker sockets.

**OUTPUT IMPEDANCES:** 2, 4, 9, 250 and 500 ohms available at both terminal strip and sockets.

**GAIN:** Microphone Inputs, 130 db. Phono Inputs, 90 db.

**FREQUENCY RESPONSE:** 30 to 14,000 cycles + or - 1 db. Tone corrector range—bass control—15 db. to + 13 db. at 30 cycles. Treble control—15 db. to + 12 db. at 10,000 cycles.

**TONE CONTROL:** Triple Range Electronic Tone Corrector; Intermediate Range, fixed, 1—Bass control, 1—Treble control.

**CONTROL PANEL:** Illuminated, mounting three microphone controls, one phono control, 2 electronic tone corrector controls and master AC power switch.

**REMOTE CONTROL PROVISION:** Built-in—provides complete mixing and fading of any two of the 4 available inputs from remote point.

**TUBES:** 3—7B4, 2—7F7, 1—7B7, 1—7C7, 1—6F6, 2—6L6, 1—5U4G.

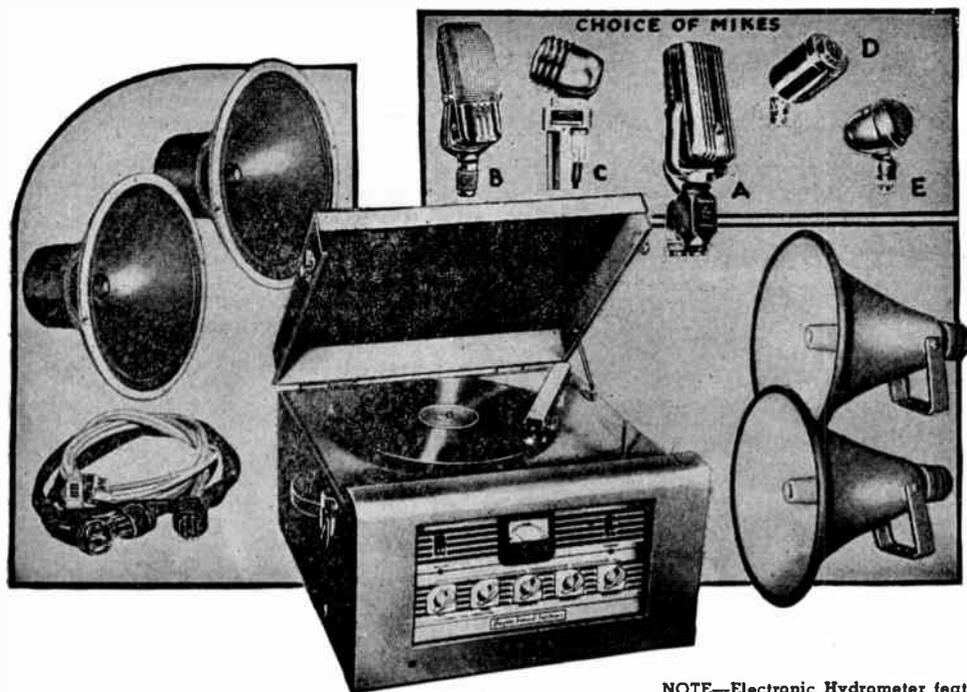

**POWER CONSUMPTION:** 190 watts, 117 volts, 50-60 cycles A.C.

**DIMENSIONS:** 16½" x 8½" x 10¼".

PRICES LISTED ON PAGE C-1

# BOGEN EX326 De-Luxe MOBILE SYSTEMS

UNIVERSAL FOR 6 VOLTS DC AND 115 VOLTS AC OPERATION

## FEATURES

- ★ 32 Watts
- ★ No Outside Power Packs
- ★ Two Speed Motor
- ★ Electronic Tone Corrector
- ★ 3 Channel Input
- ★ Automatic Change-over from AC or DC
- ★ Standby Switch - for Battery Economy
- ★ Provision for Remote Mixing

NOTE—Electronic Hydrometer feature discontinued for duration.

**MODEL EX326 UNIVERSAL MOBILE SYSTEM** is recommended wherever the finest in sound is required.

- \* Makes passenger car easily convertible for sound work.
- \* Makes ideal portable unit for truck use.
- \* Will amply cover all average requirements for indoor and outdoor use.

### NO OUTSIDE POWER PACKS REQUIRED

The EX326 is completely self contained in one compact unit including amplifier, and phono assembly with its own hinged cover. A six volt D. C. and 115 volt A. C. power supply is built in. Changeover is automatic.

### THREE INPUT CHANNELS

The EX326 allows mixing of two microphones and phono at the same time.

### TRIPLE RANGE ELECTRONIC TONE CORRECTOR

An extremely important feature of the EX326 is the Bogen Triple Range Electronic Tone Corrector. Exceeding all previous standards of performance this new circuit offers complete control of three tone ranges, Bass, Treble and the Middle register. A unique dual control system permits the operator to create any tone range desired regardless of the acoustic condition of the installation. The Electronic Tone Corrector differs completely from ordinary Bass or Treble controls or equalizer, and it has none of the objectionable features of compensators or tone controls such as power loss or distortion.

### ELECTRONIC HYDROMETER CONSTANT CHECK ON BATTERY

An exclusive Bogen feature is the new Electronic Hydrometer which is a special meter mounted on the control panel. This meter gives an accurate check of the condition of the battery at all times under load.

### STANDBY SWITCH

A switch located on the control panel cuts the B power but allows the tubes to remain heated, ready for instant return to operation. **REMOTE STANDBY SWITCH** is incorporated in special microphone handle—performs same function except at any distance away from the amplifier. This standby switch on your Bogen amplifier means reducing battery consumption.

### DASHBOARD OR EXTERNAL REMOTE CONTROL

A very desirable feature on the EX326 is the provision for connecting the Bogen remote control unit which may be mounted on the dash for finger tip operation or used at distances up to 2000 feet or more for controlling volume of any two channels. Remote control may be transferred to any two of the three available input channels quickly and easily.

### PHONO MOTOR

A dual speed motor insures smooth running operation, eliminating wows or waver on either 6 volt D. C. or 115 volt A. C. An Astatic crystal pickup with a new type shock-proof arm is mounted on the phono assembly.

**MODEL EX326—De Luxe Mobile Amplifier** complete with dual speed phono assembly and tubes.

### DE LUXE UNIVERSAL SOUND SYSTEMS

**MODEL EX326F MOBILE DE LUXE SYSTEM**—Complete with Model EX326 Universal mobile amplifier and tubes. Two heavy duty 12" Jensen PM dynamic speakers, each with 15' of cable and plugs and, choice of 1—(a) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal microphone. Each with 12½' microphone cable and plugs.

### OUTDOOR INSTALLATIONS

**MODEL EX326T DE LUXE MOBILE SYSTEM**—Complete with EX326 amplifier and tubes. Two high power University 3½' trumpets, each with 25 watt unit, choice of 1—(a) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal microphone. Each with 12½' microphone cable and plugs.

**MODEL SRC50—SR Remote Control**, for use with any system or amplifier described above. Complete with Model RC50, 50' cable and plugs.

**MODEL AHG SPECIAL MICROPHONE HANDLE**—With built-in remote control standby switch and complete with 25' remote control cable and plugs.

### EX326 AMPLIFIER SPECIFICATIONS

OUTPUT: 32 watts.  
 OUTPUT IMPEDANCE: 4-8-15-250-500 ohms.  
 GAIN: 120 db. on microphone, 81 db. on phono.  
 INPUT: 3-2 microphone at 500,000 ohms, 1- phono 500,000 ohms.  
 FREQUENCY RESPONSE: ± 30-12000 cycles.  
 PROVISION FOR REMOTE CONTROL: Built in.  
 TUBES: 3-7B4, 2-7F7, 2-6L6G, 1-5U4G.  
 CURRENT DRAIN: 6 volt D. C. 23.5 amps., 117 volt A. C. 120 watts.  
 DIMENSIONS: 16" long x 16" wide x 10¼" high.

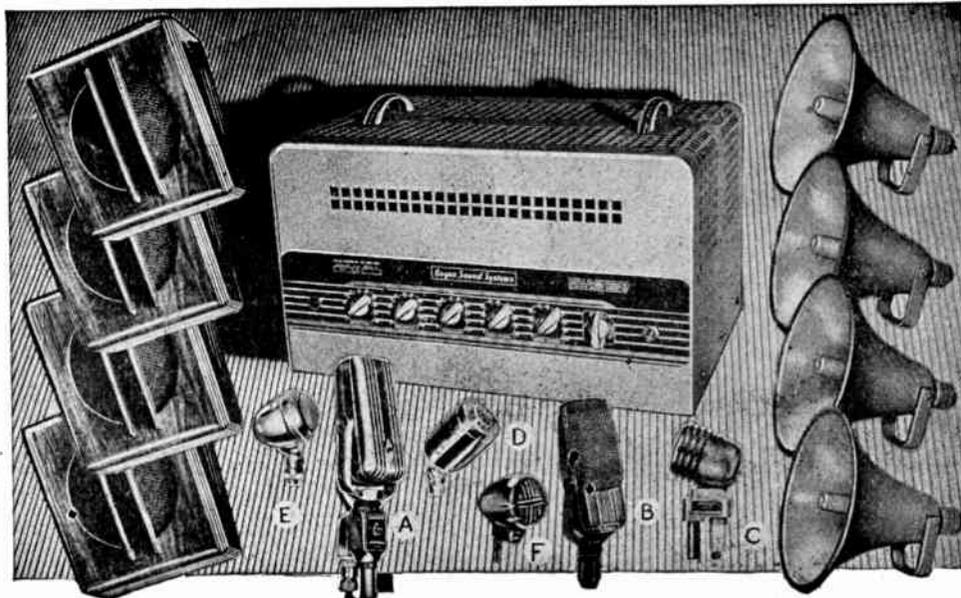

PRICES LISTED ON PAGE C-1

# BOGEN E75 High Power Systems

MODELS WITH LOW AND HIGH IMPEDANCE INPUTS

## 70

### WATTS

- ★ Less than 4% distortion
- ★ Exclusive BOGEN dual construction
- ★ Two complete 35 watt power amplifiers
- ★ Separate power supply for each amplifier
- ★ Three input channel mixing
- ★ Two microphone and Phono input
- ★ Remote Control circuits built-in for all channels
- ★ Bass and treble tone compensator.

**THE NEW BOGEN E75** is a high powered amplifier retaining most of the outstanding features of the famous Bogen De Luxe EX70 Amplifier. It is designed for installations where high power and exceptional tone quality are desired—at an economical cost. Containing the exclusive Bogen Dual Amplifier circuit the E75 offers the greatest value in sound equipment at a price range previously considered low for SINGLE OUTPUT Amplifiers.

#### GENERAL DESCRIPTION

The E75 is a dual unit consisting of two separate 35 watt power amplifiers, each with its own Driver Stage, Power Supply, Separate Fixed Bias Rectifiers, Inverse Feedback, and Separate Master Gain Controls.

#### DUAL POWER AMPLIFIERS

The E75 may be used as two separate 35 watt Power amplifiers—driven by preamplifier common to both—or the outputs of both amplifiers may be paralleled to deliver 70 watts. The tapped output transformer of each amplifier is connected to marked terminal strips. An external switch may be attached to obtain instant changeover from either output, in cases of emergency.

#### UNIVERSAL APPLICATION

This new low cost 70 watt amplifier is highly recommended for all high power installations such as Skating rinks, Athletic fields, Stadia, Dance halls, Airports, etc.

As an emergency feature the dual amplifier design of the E75 safeguards against complete breakdown. In the event of tube burn out, condenser or transformer failure, etc., half the power (35 watts) of the E75 is still available in the amplifier section not affected.

#### MULTIPLE MICROPHONE AND PHONO INPUTS

Two Microphones and Phono may be mixed simultaneously thru the three High Impedance inputs. Each input has its full range volume control. A LOW IMPEDANCE MODEL EL75 is available, at a slight additional cost, for installations where it is necessary to run very long microphone lines. This provides one Low Impedance Input for Mike—one high Impedance Input for mike and one Phono Input.

#### MULTIPLE REMOTE CONTROL

The E75 has provision for plugging-in a Bogen multiple remote volume control. Any two input channels may be mixed and their volume regulated at any distance, from the amplifier. The Bogen Remote Control circuit is exclusive and is not subject to the Loss, Hum or Frequency discriminations that is inherent with most other remote controls.

#### DUAL PROTECTIVE FUSES

Two fuses are located on the rear of the chassis, one for each power amplifier. A switch is also provided to obtain voltage for the preamplifier from either power supply.

#### BASS AND TREBLE TONE COMPENSATOR

A complete variation of the overall tone is made possible by the Bass and treble compensator, insuring better flexibility of

the tone ranges than is possible to obtain thru the use of ordinary tone controls.

Auxiliary equipment to use with the E75 for indoor and outdoor installations has been carefully selected to insure the finest results for the purchaser of these splendid amplifiers.

**BOGEN MODEL E75 AMPLIFIER**—Complete with tubes.

#### LOW IMPEDANCE AMPLIFIER

**MODEL EL75 AMPLIFIER** — Same as above Model E75 but with first micro-input channel equipped for low impedance. Uses special high fidelity input transformer mounted right on chassis, humless, tapped at 50-200-500 ohms. Complete with tubes.

NOTE: If additional low impedance inputs are desired, refer to price sheet.

NOTE: If any systems are ordered less microphone refer to price sheet.

#### BOGEN E75 SYSTEMS

**MODEL E75F BASIC SYSTEM** — Complete E75 amplifier with tubes—Four Jensen 12" heavy duty PM12B speakers, 1—(f) Arctic JT30 Crystal Microphone. With 12½' microphone cable and plugs.

#### FOR INDOOR INSTALLATIONS

**E75B SYSTEM** — Complete system same as above, but with 4 12 inch speakers mounted in De Luxe walnut baffles Model WA12.

#### FOR OUTDOOR INSTALLATIONS

**E75T SYSTEM** — Complete E75 amplifier and tubes — four 4½' University trumpets and 25 watt units, 1—(f) Astatic JT30 Crystal Microphone. Each with 12½' microphone cable and plugs.

**CHOICE OF DE LUXE MICROPHONES** other than those above: (a) Amperite B'H Velocity Microphone, (c) Amperite B'H Dynamic, (d) American D8T Dynamic, (e) Astatic T3 Crystal. Each with 12½' microphone cable and plugs. For extra cost refer to price sheet.

#### E75 AMPLIFIER SPECIFICATIONS

**OUTPUT:** 70 watts. (2-35 watt power amplifiers) less than 4% distortion.

**OUTPUT IMPEDANCES:** Each power amplifier tapped—4-8-15-500-1000 ohms, may be parallel to deliver 70 watts.

**GAIN:** Microphone 124 db, Phono 95 db.

**INPUTS:** 3-2 Microphones, 1 Phono—each 500,000 ohms. (In Model EL75, low impedance channel is tapped at 50-200-500 ohms.)

**FREQUENCY RESPONSE:** 30-14000 cycles—1 db.

**REMOTE CONTROL PROVISION:** Built-in.

**TUBES:** 4—6X4, 2—12A7, 2—8F6G, 4—6L6G, 2—5U4G.

**CONTROLS:** (6) 2 Mike, 1 Phono, 2 Master Controls, 1—Bass and Treble Compensator.

**CURRENT DRAIN:** 290 watts at 117 volts—50-60 cycle. AC.

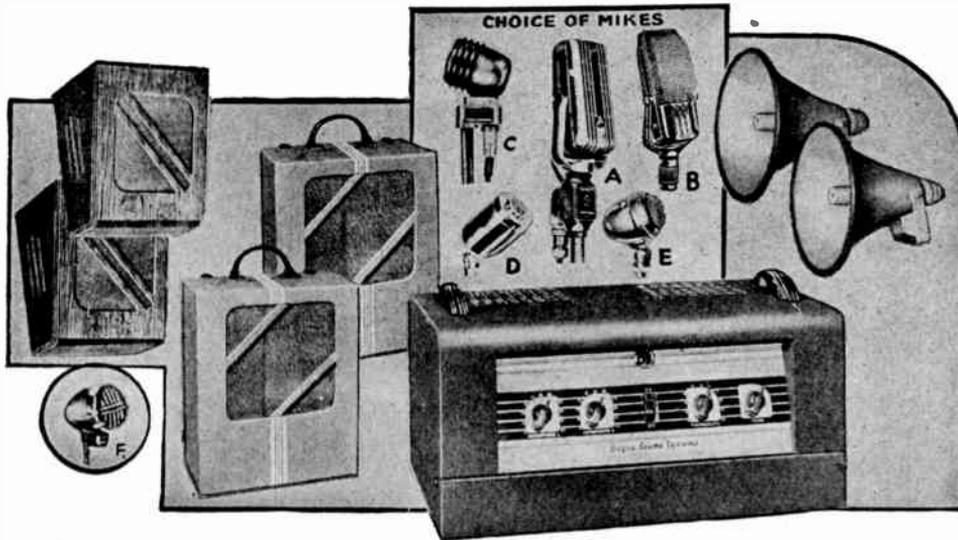

**DIMENSIONS:** 17½" long x 10" high x 12½" deep.

# BOGEN E30 "Trail Blazer" Sound Systems

MODELS WITH LOW AND HIGH IMPEDANCE INPUTS

## 30

### Watts

- ★ Three Input Channels
- ★ Two Microphones and Phono
- ★ Electron Mixing on all channels
- ★ Full Range Contrals
- ★ Treble and Bass Tone Compensator
- ★ Built-in Remote Control for all Inputs (Optional)
- ★ Beam Power 6L6 Push Pull Outputs
- ★ Illuminated Sloping Control Panel
- ★ Outdoor Weather-proof Trumpet Systems

**E**STABLISHING a new standard of quality, performance and features, the new Bogen E30 "Trail Blazer" amplifier and systems, leads the way in offering finer sound equipment at lower and more popular prices.

Available in both High and Low Impedance Models, the E30 "Trail Blazer" units are seven-tube high gain amplifiers using the popular 6L6 Beam Power Tubes in the output stage to insure maximum power output and excellent tone quality. Equipped with three input channels for two microphones and one phono the E30 amplifier permits wide flexibility of operation. Each input channel is individually controlled and all channels can be mixed and used simultaneously. All inputs are high impedance on the Model E30. The Model EL30 Low Impedance amplifier is provided with a low impedance microphone input channel which is extremely valuable for installations where long microphone cables are used. In addition, the EL30 amplifier includes a second high impedance microphone input and a separate phono input thereby permitting the use of both high and low impedance microphones. An optional feature is the Remote Control provision which can be obtained built-in to any "Trail Blazer" amplifier. This feature permits complete wired or wireless remote control and mixing of any two of the available three input channels from distant points as far as 2,000' from the amplifier. For complete variation of tone, a bass and treble compensator is built-in insuring better variation of tone ranges than the ordinary tone controls commonly used. An illuminated sloping panel, handsomely etched in bright modern colors matches the smart streamline chassis design. A variable impedance output strip and two built-in speaker sockets add greater convenience for speaker connection and matching. All component parts are selected materials of the finest quality and "Trail Blazer" amplifiers are engineered to give lasting and consistent service.

**MODEL E30 "TRAILBLAZER"** — Amplifier and tubes.

#### LOW IMPEDANCE AMPLIFIER

**MODEL FL30** — 30-watt amplifier, same as above Model E30 "Trail Blazer" but with first microphone input channel equipped for low impedance. When ordering specify one of the following impedances: 50, 200, 500 ohms. Model EL30, complete with tubes.

#### BOGEN E30 "TRAILBLAZER" SYSTEMS

**MODEL E30F** — Complete basic system, includes 1 Model E30 amplifier and tubes, 2—12" Jensen PM12C speakers each with 25' cable and plugs. 1—Astatic JT30 Crystal microphone, and 12½' cable and plugs.

#### FOR INDOOR INSTALLATIONS

**MODEL E30B** — Same as above, with 2—WA12 Walnut speaker baffles.

#### FOR PORTABLE USE

**MODEL E30P** — Same as E30F but with Model K30 portable carrying case for 2 speakers and amplifier.  
Price .....

#### FOR OUTDOOR INSTALLATIONS

**MODEL E30T** — Complete system includes: 1—E30 amplifier and tubes, 2—Bogen-University 3½' reflexed non-resonant weatherproof trumpets each with swivel mounting brackets, 2—25-watt Bogen-University PM trumpet units (not dynamic cone speakers), 1—Astatic Crystal JT30 microphone, and 12½' of cable and plugs.

**CHOICE OF MICROPHONES**, other than those listed above: (a) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal. Each with 12½' cable and plugs. Ask for information on additional cost.

**OPTIONAL FEATURE** — Remote control circuit built-in for operation of all input channels, can be obtained at an additional if specified when ordering.

**MODEL SRC50** — SR remote control comes complete with RC50, 50' cable and plugs.  
Model SRC50.

#### MODEL E30 "TRAILBLAZER" SPECIFICATIONS

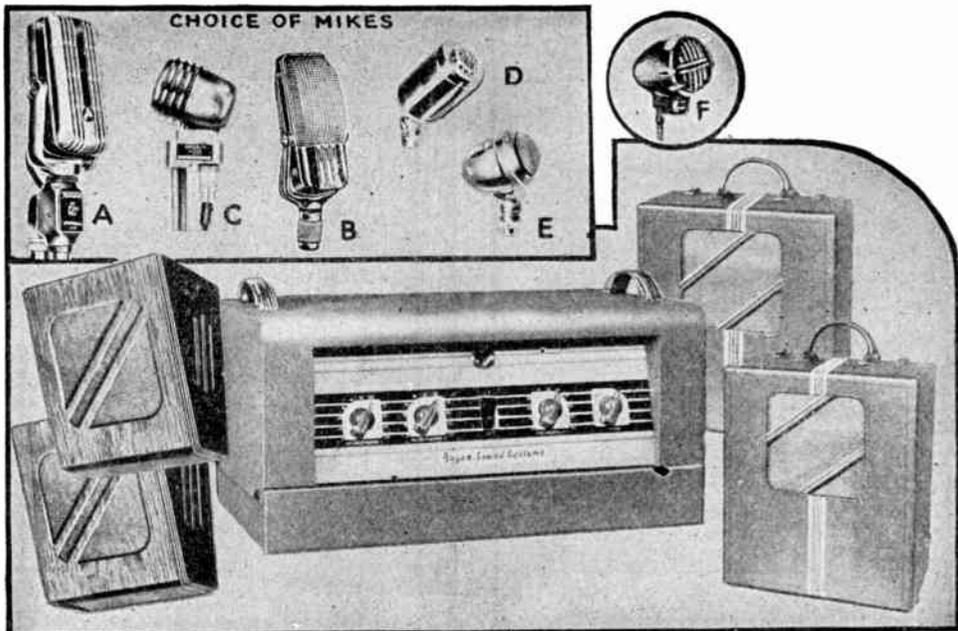

**POWER OUTPUT:** 30 watts undistorted (less than 5 per cent.), peak power, 40 watts.  
**INPUT CIRCUITS:** Three input channels, two Microphone inputs, one Phono input.  
**INPUT IMPEDANCES:** Microphone channels: High impedance 500,000 ohms. (Low impedance channels available in Model EL30 provides taps of 50, 200, 500 ohms.) Phono input, High impedance, 500,000 ohms.  
**OUTPUT CIRCUITS:** Tapped terminal strip and two plug-in speaker sockets.  
**OUTPUT IMPEDANCES:** 4, 8, 15, 250 and 500 ohms available at own terminal strip and sockets.  
**GAIN:** Microphone Inputs—129 db.  
Phono input—89 db.  
**FREQUENCY RESPONSE:** 40 to 12,000 cycles + or — 1.5 db.  
**TONE CONTROL:** 1—Bass, Treble compensator.  
**CONTROL PANEL:** Illuminated. Mounting two microphone controls, one phono control, one tone compensator control and master A.C. power switch.  
**REMOTE CONTROL PROVISION (OPTIONAL):** Built-in, provides complete mixing and fading of any two of the three available inputs from remote point.  
**TUBES:** 2—7B4, 1—7F7, 1—7N7, 2—6L6G, 1—5U4C.  
**POWER CONSUMPTION:** 130 watts, 117 volts, 50-60 cycles A.C.  
**DIMENSIONS:** 15" x 7¾" x 9¾".

# BOGEN E14 "Pacemaker" Sound Systems

MODELS WITH LOW AND HIGH IMPEDANCE INPUTS

14  
Watts

- ★ Multi-channel Inputs
- ★ Two Microphones and Phono
- ★ Full Range Electron Mixing on All Inputs
- ★ 6L6 Beam Power Push Pull Outputs
- ★ Bass and Treble Tone Compensator
- ★ Remote Control for All Inputs—Optional
- ★ Variable Impedance Speaker Matching and Tapped Outputs
- ★ Illuminated Sloping Controls Panel

**T**HE new Model E14 "Pacemaker" Sound Systems set the pace for medium powered Public Address equipment in the popular price range.

No other amplifier or system incorporates all of the features, listed above, at these low prices. Most of these features have only been available in larger so-called De Luxe units selling at much higher prices. The Bogen E14 "Pacemaker" is a 7-tube high gain amplifier providing three input channels for two microphones and phono. Each microphone input has its own separate input tube and full range individual gain control. Phono input is also provided with separate gain control and electronic mixing is effected between all three channels simultaneously. All input channels are high impedance and microphone inputs are universal for use with all current high impedance microphones, dynamic, crystal, velocity, or velotron. Low impedance inputs, an exclusive Bogen feature, are available on any or all inputs in the Model E14 amplifier, (described below). A new and exclusive two channel remote control input for wired or wireless remote controls is an optional feature of the Model E14. Bogen remote controls permit the operator to mix and fade any two of the three input channels available from a remote point and are not to be confused with remote controls that do not provide mixing or multi-channel operation. With the exclusive Bogen Remote Control the operator can control either two microphones or one microphone and phono at will. A bass and treble tone compensator is another De Luxe feature built in the Model E14 "Pacemaker." This is not an ordinary tone control but permits accentuation of the bass or treble ranges at will. A pair of 6L6 beam power output tubes in push-pull assure ample power with excellent quality. A beautifully etched, sloping control panel illuminated for greater visibility enhances the appearance of the new Bogen E14 "Pacemaker." For ease of connection lock type shielded connectors are provided for the microphone inputs, terminal strips for phono inputs and a new variable output terminal strip tapped at 2, 4, 9, 250, and 500 ohms insures quick and easy speaker matching. For further convenience two speaker sockets are built-in. The new E14 "Pacemaker" establishes a new standard in the medium priced field.

**MODEL E 14**—Amplifier and Tubes.

#### LOW IMPEDANCE AMPLIFIER

**MODEL EL14**—14 watt amplifier same as Model E14 "Pacemaker" above with first microphone input channel equipped for low impedance operation—tapped at 50, 200 and 500 ohms. Specify tap setting desired when ordering. **MODEL EL14**, complete with tubes.

#### BOGEN MODEL E14 SYSTEMS

**MODEL E14F**—Complete basic system consists of: 1—Bogen Model E14 "Pacemaker" amplifier, 1—Kit of matched tubes, 2—12" Jensen M12C Dynamic speakers each with 25' of speaker cable and plug.

Astatic JT30 Crystal microphone and 12½' of microphone cable fitted with lock type connectors.

#### FOR INDOOR INSTALLATIONS

**MODEL E14B**—Complete system. Same as E14F but with 2—WA12 Walnut speaker baffles.

#### FOR PORTABLE USE

**MODEL E14P**—Complete system. Same as E14F but with Model E14 Portable Carrying Cases for two speakers and amplifier.

**CHOICE OF DE LUXE MICROPHONES** other than listed above (a) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal microphone. Each with 12½' cable and plugs. Ask for information on additional cost.

#### OPTIONAL FEATURE

Remote control circuit built-in for operation of all input channels can be obtained at additional cost if specified when ordering.

**MODEL SRC50**—SR remote control complete with RC50, 50' cable and plugs.

#### MODEL E14 AMPLIFIER SPECIFICATIONS

**POWER OUTPUT:** 14 watts undistorted (less than 5 per cent.), peak power, 25 watts.

**INPUT CIRCUITS:** Three input channels, two Microphone inputs, one Phono input.

**INPUT IMPEDANCES:** Microphone channels—High impedance 500,000 ohms. (Low impedance channels available in Model EL14 provides taps of 50, 200, 500 ohms.) Phono input, High impedance, 500,000 ohms.

**OUTPUT CIRCUITS:** Tapped terminal strip and two output sockets.

**OUTPUT IMPEDANCES:** 4, 8, 15, 250 and 500 ohms available at both terminal strip and sockets.

**GAIN:** Microphone Inputs—125 db.  
Phono Inputs—85 db.

**FREQUENCY RESPONSE:** 40 to 12,000 cycles + or - 1.5 db.

**tone CONTROL:** 1—Bass, Treble compensator.

**CONTROL PANEL:** Illuminated. Mounting two microphone controls, one phono control, one tone compensator control and master A.C. power switch.

**REMOTE CONTROL PROVISION (OPTIONAL):** Built-in, provides complete mixing and fading of any two of the three available inputs from remote point.

**TUBES:** 2—7B4, 1—7E7, 1—7N7, 2—6L6G, 1—5Y4G.

**POWER CONSUMPTION:** 90 watts, 117 volts, 50-60 cycles A.C.

**DIMENSIONS:** 14" x 7¾" x 8".

# BOGEN E1620 "UNIVERSAL" MOBILE SYSTEM

← 20 WATTS →

**T**HE Improved new Bogen E1620 mobile system answers a long felt need for an economical amplifier that may be easily converted to operation from six volt storage battery or 115 volt A.C. Changeover from 6 volt battery to 110 volt A. C. is automatic.

The E1620 amplifier comprises a single self-contained amplifier unit with its own power supply and phono assembly. Microphone and phono inputs may be mixed or faded thru two independent volume or gain controls. A Bass and Treble compensator control is built-in. The E-1620 features a sloping recessed four color panel.

The E1620 is furnished with a phono assembly comprising a dual speed motor, powered by a built in supply to eliminate any speed variation or waver on 6 V. D. C. and 110 V. A. C. The phono assembly is complete with Astatic crystal pickup.

Tapped output transformer—Speaker plug-in connections—Smart styling and fine performance makes this an amplifier that lends itself to a wide variety of uses.

**MODEL E1620 AMPLIFIER**—complete with phono assembly and tubes.

**MODEL E1620F SYSTEM**—Complete with E1620 amplifier and tubes. Two PM12C Jensen 12 inch dynamic speakers, Astatic JT30 crystal microphone with 12½' microphone cable and 15' speaker cable and plugs on each speaker.

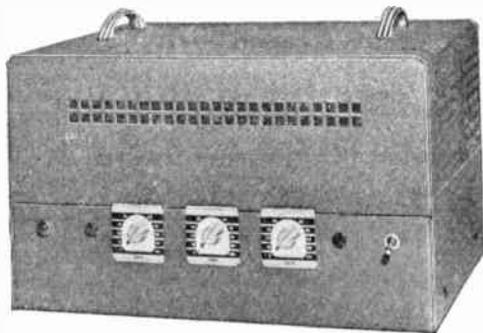

**MODEL E1620T SYSTEM**—Complete with Model E1620 amplifier and tubes. One University 3½" high power trumpet and 25 watt unit. Astatic JT30 Crystal microphone with 12½' microphone cable and plugs.

**NOTE:** Model E1620 Systems are available with choice of De Luxe Microphone at an extra cost: (a) Amperite BH Velocity, (b) Amperite BAH Dynamic, (c) American D8T Dynamic, (d) Astatic T8 Crystal microphone. Each with 12½' cable and plugs.

## E1620 AMPLIFIER SPECIFICATIONS

**OUTPUT:** 20 watts undistorted (less than 5%) peak—25 watts.  
**OUTPUT IMPEDANCES:** 4-8-15-250-500 ohms.  
**GAIN:** Microphone 116 db. Phono 69 db.  
**INPUT:** Two—1 microphone—500,000 ohms. 1 phono—500,000 ohms.  
**FREQUENCY RESPONSE:** 30—12,000 cycles ± 2 db.  
**TUBES:** 1-6SJ7, 1-6SL7GT, 2-6L6G, 2-6X5GT.  
**CURRENT DRAIN:** 6 volt D. C.—13.75 amps. 117 V. A. C.—95 watts.  
**DIMENSIONS:** 15" long x 9¼" deep x 8½" high.

# BOGEN E80 DUAL CHANNEL 80 WATT BOOSTER

## BOGEN 80 WATT ZERO LEVEL BOOSTER AMPLIFIER

The new Bogen Model E80 is a dual channel booster amplifier, ideally designed for use in large P.A. and centralized sound systems, where an amplifier which can be driven to full output with zero level input is required.

The dual channel construction of the Model E80 provides maximum protection against breakdown, for should one channel break down, the other will continue to supply its own bank of speakers. Each channel has an output of 40 watts at less than 2.5% distortion, and the two separate output channels can be paralleled to deliver 80 watts of audio power. The Bogen E80 requires a signal of only .5 volts to drive it to full output, so that it can be fed by any zero level line or output, the high impedance output of a tuner or a high impedance crystal pickup, and a number of boosters can be added to an existing system without increasing the size of the driver.

## E80 SPECIFICATIONS

**GAIN:** Overall 87.5 db.  
**FREQUENCY RESPONSE:** ± 2 db 30 — 14,000 cycles.  
**POWER CONSUMPTION:** 250 watts at 117 V. A. C., 50-60 cycles.  
**FUNDAMENTAL HUM:** —69 db.  
**TUBES:** 1-7B4, 1-7F7, 2-6F6G, 4-6L6G, 2-5U4G.  
**INPUT:** High Impedance 1.0 Megohm.  
**OUTPUT:** 80 watts — less than 5% distortion.  
**OUTPUT IMPEDANCES:** Each channel has its own output terminal strip tapped at 4, 8, 15, 500 and 1000 ohms.  
**CONTROLS:** 3 — 2 volume (one for each channel)—one tone control.  
**DIMENSIONS:** 17½" long x 10" high x 12½" deep.

# BOGEN E10 De Luxe Economy System

10 Watts

**T**HE improved Bogen EP10 system meets the demand for medium powered, two speaker sound systems at an economical price. Many features of the more expensive de luxe systems are incorporated in the EP10.

The amplifier is equipped with separate input channels for one microphone and one phono. These two channels each have their own full range gain control. Electronic mixing permits fading and mixing between both channels and also their use simultaneously. A high frequency tone control is provided. All controls and A. C. switch are mounted on an especially styled and colorful control panel.

The output circuit comprises a pair of 7CS beam power tubes in push-pull amplification assuring excellent tone quality and volume. The output transformer is tapped at 4-8-15-250-500 ohms and connected to a speaker terminal strip. In addition two speaker sockets are built in and provide quick and easy means of connecting speakers.

The E10 amplifier may be used in many types of installations for hard of hearing aids, small paging systems, etc. The unit is ideal for speech modulation and may be used as a driver for medium powered transmitters.

The components used in making up the EP10 sound systems assure fidelity of reproduction, and dependable long life for continuous operation.

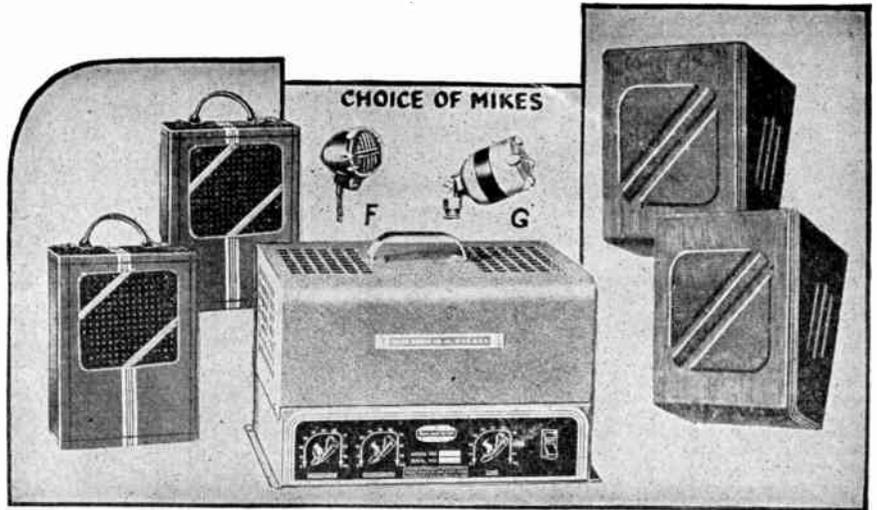

**MODEL E10F "Economy" system** comprises 1—E10 amplifier with tubes; 2—10" PM dynamic speakers. Each with 25' cable and plugs, and one Astatic Crystal microphone Model JT30 and 12½' cable.

## FOR INDOOR INSTALLATIONS

**MODEL E10B**—Complete system same as above but with two WA10 Walnut Baffles.

## FOR PORTABLE USE

**MODEL E10P**—Complete system same as E10F but with port-

able two section leatherette covered speaker baffle Model 10A for carrying amplifier and mounting the 2 speakers.

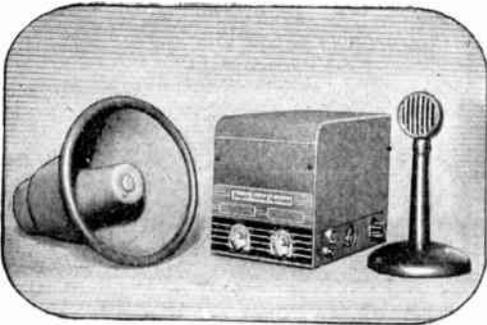

**MODEL E10**—Amplifier only, complete with tubes.

**NOTE:** If system is ordered less microphone refer to price sheet. If system is ordered with (G) American D4T Dynamic, for extra cost refer to price sheet.

## E10 AMPLIFIER SPECIFICATIONS

**OUTPUT:** 10 watts—less than 5% distortion.  
**OUTPUT IMPEDANCES:** 4-8-15-250-500 ohms.  
**FREQUENCY RESPONSE:** 65—9000 ± 2 db.  
**CONTROLS:** Three—one microphone, one phono, one tone.  
**GAIN:** Microphone 114 db., phono 75 db..  
**INPUTS:** 1—microphone 500,000 ohm. 1—phono 500,000 ohm.  
**TUBES:** Total 5; 2-7F7, 2-7C5, 1-5Y4GT.  
**CURRENT DRAIN:** 88 watts at 117 v. A. C.  
**DIMENSIONS:** 7" deep x 11" wide x 7.5 16" high.

# BOGEN E66 Universal MOBILE AMPLIFIER

**MODEL E66F**—System, complete, includes: 1-E66 Amplifier; 1-complete set of matched tubes; 1 Special Bogen University trumpet; 1-Astatic Y30 Crystal microphone with removable handle, removable base for desk stand operation and 7½' of cable.

**MODEL MB**—Special mobile speaker bracket.

**MODEL E66**—Amplifier only with Tubes.

## MODEL E66 SPECIFICATIONS

**POWER OUTPUT:** 8 watts (or + 31 db).  
**HUM:** AC: — 45 db; DC: — 62 db.  
**INPUT CIRCUITS:** 1 microphone input—Lock Type Screw on Connector; 1 Jack for Phonograph Input.  
**INPUT IMPEDANCE:** High Impedance, (500,000 ohms) for Microphone and Phonograph.  
**OUTPUT IMPEDANCE:** 4, 8, 15 ohms available at 5-prong speaker socket.  
**POWER CONSUMPTION:** 6.3 watt storage battery; 7 amperes; 117 volts AC; 50 watts.  
**GAIN:** Overall gain: microphone input: 110 db; phonograph input: 75 db.

**TUBE COMPLEMENT:** 1—7F7, 2—6V6, 1—7Z4.

**DIMENSIONS:** 5¾" wide x 7¾" deep x 6¾" high.

★ Extremely Compact

★ Built to Police Specifications

★ Mounts Under Car Dashboard

★ 6 Volt DC and 110 Volt AC Operation

★ Output Equals Ordinary 15-18 Watt Amplifiers

The Bogen Model E66 is a radical departure in mobile amplifier construction, and has been designed in accordance with the specifications of Police Departments in some of the country's largest cities. Compact, inexpensive—yet highly efficient, it is intended for use in Police, safety, fire and emergency cars, and also as a public address system for outdoor gatherings. The Bogen Model E66 can be used on either a 6 volt storage battery or a 117 volts AC and the current drain is exceptionally low. It is modern in design, extremely simple to install and mounts directly under the dash-board. It takes as little space in a car and is as simple to operate as a radio or small heater.

The speaker, developed as a companion unit for the Model E66 is a special Bogen University reflex trumpet of the folded exponential type. It may be mounted easily in the motor compartment under the engine hood—or on a fender alongside the headlight. This speaker is so amazingly efficient that with it, the Bogen Model E66 delivers the equivalent results of a 15 watt system. 100% waterproof and of all metal construction, this specially designed speaker will stand considerable abuse and is a revelation in high efficiency reproduction. A special bracket is available for speaker mounting.

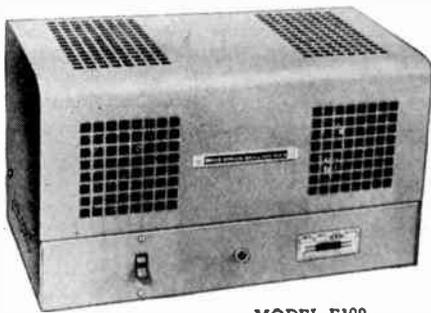

The microphone, a streamlined Astatic crystal with a handle and 7½ feet of cable, can be used by the driver without interfering with his normal driving operations.

The Amplifier utilizes push pull output and incorporates a stand-by switch which reduces the current drain and keeps the Amplifier ready at all times for immediate use. A phonograph connection is provided and the unit is constructed so that tubes or vibrator may be removed without disturbing the amplifier mounting.

The usefulness of Police Cars is immeasurably increased when the compact, mobile E66 is added to the usual two way radio communication, making each police car an extremely effective traffic safety car.

# BOGEN Booster and Pre-Amplifiers • Phono-Players

## 100 WATT BOOSTER AMPLIFIER

MODEL E100

The Bogen 100 Watt Booster Model E100 lends itself ideally to large installations such as stadiums, memorial parks, auditoriums, ball parks, etc. Embodies the latest circuit developments. Four 6L6 tubes arranged in a special push-pull parallel circuit deliver 100 watts of undistorted power output. All transformers are generously designed to give the excellent regulation so necessary in this type of circuit. Despite the enormous power output, surprisingly little driving power is necessary—only 2 watts. Thus any existing small system may easily be converted into a high powered installation of the largest type.

Input 15, 50, 250 and 500 ohms; output 500, 250, 166, 125, 100, 84 and 72 ohms. Separate secondary for voice coil with taps at 15, 9, 4 and 2 ohms to enable the matching of any combination of speakers or lines. Connections on terminal strips.

**MODEL E100 SPECIFICATIONS—(Complete with tubes).**

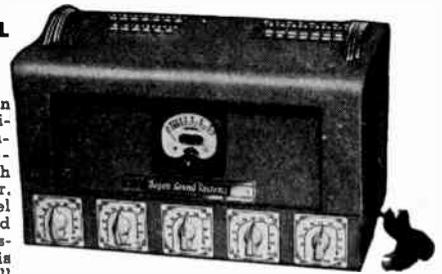

**GAIN:** Overall 17 db. **FREQUENCY RESPONSE:** 30 to 12,000 cycles. **CURRENT DRAIN:** 300 watts, 110 volts, 50-60 cycles. **DIMENSIONS:** 9" deep, 16½" wide, 9¾" high. **OUTPUT:** 100 watts—less than 5 per cent Harmonic Content. **TUBE COMPLEMENT:** 4-6L6G, 3-5U4G. **CONTROLS:** 1 Master Power Switch.

## 4 CHANNEL MIXER-PREAMPLIFIERS

BUILT IN REMOTE CONTROL PROVISION  
FOR ALL CHANNELS ON EACH MODEL

### MODEL HH

FOR ALL NORMAL  
P. A. APPLICATIONS

MODEL HH

This four position mixer and pre-amplifier will mix four high-impedance microphones into any high impedance amplifier. Each input channel has its own tube and gain control. A master volume control is provided for overall gain. The unit includes its own built in A. C. power supply. Will answer to a wide variety of uses such as mixing and fading microphones to recording equipment, also to increase the input channels of existing amplifiers. Compact and smartly styled.

**SPECIFICATIONS:** Input impedance 500,000 ohms on all inputs. Output impedance 500,000 ohms. For 110 volts A. C. operation. **TUBES:** 5-7B4, 1-7Z4. **SIZE:** 14-1/16" x 8" x 7¾" high. **MODEL HH** complete with tubes without meter. Gain 60 D. B.

### MODEL HLO FOR REMOTE LINE APPLICATIONS

Similar to Model HH, with four high impedance inputs, but equipped with a zero level output amplifier built-in with output transformer terminating in 50-125-200-500 ohms taps. A DB meter is provided on control panel to indicate output level and master gain control is built in. Ideal for use as a remote Pre-Amp on telephone lines or as a remote pre-amp operated for P. A. work at a distance from the main amplifiers. All input impedances—500,000 ohms. For 110 volts A. C. operation. **SIZE:** 14-1/16" long x 8" deep x 7¾" high. **TUBE KIT:** 5-7B4, 1-7A4, 1-7Z4. **MODEL HLO** with tubes and D. B. meter. Overall gain 76 D. B.

### MODEL LLO FOR PROFESSIONAL BROADCAST USE

Built to conform to strictest requirements of broadcast equipment. Embodies four low impedance input channels, each with separate gain control. Each input is tapped at 50-125-200-500 ohms. A master gain control is included along with a built in DB level meter. Low impedance output of 50-125-200-500 ohms is available at zero level. Built in A. C. power supply is absolutely humless. Precision equipment combined with smart styling. **SIZE:** 14-1/16" long x 8" deep x 7¾" high. **TUBES USED:** 5-7B4, 1-7A4, 1-7Z4.

**MODEL LLO** with tubes and meter. Overall gain 76 D. B.

(NOTE: MODELS HH, HLO & LLO DISCONTINUED FOR DURATION.)

## PHONOGRAPHS

### PORTABLE MODEL 8007

Complete with Green Flyer governor controlled motor, model AB8 crystal pickup, and 10" turntable. Self-contained in well constructed carrying case reinforced and covered with durable fray leatherette. Dimensions 15¾" x 13" x 7¼". For 110 volts, 60 cycles.

### De-Luxe PORTABLE MODEL 8016

#### FOR 16" RECORDINGS

The DeLuxe Model 8016 supplies the demand for a unit capable of playing 16" professional transcription recordings as well as the Standard 10" and 12" records. Contains a heavy duty Green Flyer motor, dual speed for 78 and 33-1/3 R.P.M. Recordings. Equipped with a crystal pickup and special 12" arm. Complete with 12" turntable. Entire unit mounted in a fine leatherette carrying case strongly reinforced and finished with leather corners and gunmetal hardware. For 110 volts, 60 cycles. Dimensions: 21¾" x 17" x 7".

### MODEL 8016L

Similar to Model 8016 but equipped with the new Model HP16 low pressure pickup with permanent sapphire stylus. Especially recommended for professional use.

MODEL 8007

MODEL 8016

## MODEL PT16AD PORTABLE PHONO AMPLIFIER

Same as Model PT16 except this model operates from either 110 volt A. C. or D. C. current and the output of the amplifier is 4 watts. Complete with tubes. **TUBES USED:** 1-7F7, 2-25L6G, 1-25Z6G.

**NOTE:** Either of above models are available with a microphone input at slight extra cost. They can also be equipped with new Low Pressure Astatic HP-16 Professional Pickup with Sapphire Stylus at slight extra cost. Specify when ordering extras. (MODEL PT16AD DISCONTINUED FOR DURATION.)

## MODEL PT16 TRANSCRIPTION PLAYER

This general purpose phono player with amplifier is designed to handle 16" transcription records along with the standard variety. The 12" turntable is driven by a special heavy duty General Industries dual speed motor for 33-1/3 and 78 RPM. Astatic Crystal pickup feeds the built in 6 watt high quality amplifier that is equipped with master gain and tone controls. 10" PM dynamic speaker mounted in cover of carrying case. Cover is removable and may be used at a distance from the main unit. Ideal as a portable record player to handle any size recordings. Operation is from 110 volt A. C. only.

**DIMENSIONS:** 23½" x 17¼" x 10¼". Complete with tubes.

**TUBE COMPLEMENT:** 1-7F7, 2-7C5, 1-7Z4.

MODEL PT16

# BOGEN *Communo-Phones*

## BOGEN TYPE "A" SYSTEMS

### MODELS 4A, 12A, 219A

#### Master to Remote Station Communication

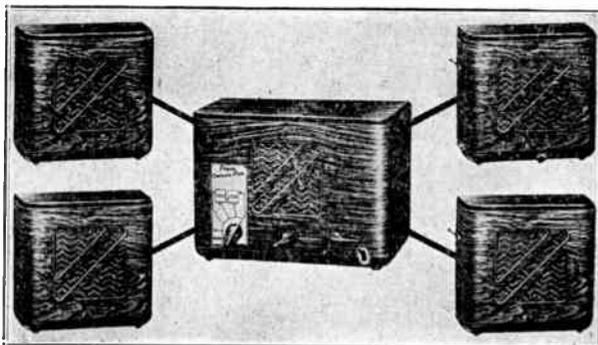

**B**OGEN Type "A" Communo-Phones provide instant communication between distant points. Systems consist of one Master and additional remote stations. Up to four remote stations may be added on the Model 4A, up to eleven remote stations on the Model 12A, and up to eighteen stations on the Model 219A. A Master can select any one remote station to speak with, or— with a 4A Master—all remote stations at once, thereby instantly locating any person in your organization. Persons called reply through the remote station nearest to them—they need not be close to the station—replies made from 20 to 30 feet away can be received by the Master station clearly and distinctly.

The Master station can be set to permit any remote station to call it, or remote stations can be obtained with call-in switches, either built-in or external, to permit remote stations to initiate a call to the Master at any time.

Masters are equipped with an "on-off" switch, "press-to-talk" switch, and station selector. On the Model 4A a special arrangement permits closing out background noise levels from remote stations by a "silent" position on the Master station selector. A volume control on the Master permits adjustment of volume to any desired listening level.

Masters are finished in highly polished walnut bakelite to harmonize with any office surroundings.

TUBES USED: 1—12SJ7; 1—50L6GT; 1—35Z5GT

**Model 4A**—One Master only, for up to 4 stations, complete with tubes.

**Model 4AE**—Same as 4A, but equipped with earphone for privacy of conversation.

**Model AR**—Remote station only, for all type "A" Masters.

**Model RS**—Same as AR, but with built-in call switch.

#### MODELS 12A and 219A

These models are for larger installations than the Model 4A. They are similar in all features except that they do not include the ALL STATION call position or the SILENT position.

**Model 12A**—One Master only, for up to 11 stations.

**Model 12AE**—Same as 12A, but with earphone for privacy of conversation.

**Model 219A**—One Master only, for up to 18 stations.

**Model 219AE**—Same as 219A, but with earphone.

**NOTE:**—Type "A" Systems require a 2-conductor cable between Master and each Remote station.

Systems using Remote stations with call switch require a 3-conductor cable between Master and each Remote station.

## BOGEN TYPE "C" SYSTEMS

### MULTIPLE MASTER SYSTEMS

#### (Model 6C Equipped with Paging Switch)

**B**OGEN Type "C" Intercommunication Systems have been designed to meet the requirements of Multiple Station installations where a number of executive stations are desired. Systems for up to six, twelve, or nineteen stations are available. Each station is a Master and can call any other Master independently. Two Masters can converse with each other at will and several pairs of Masters can converse at once without interference.

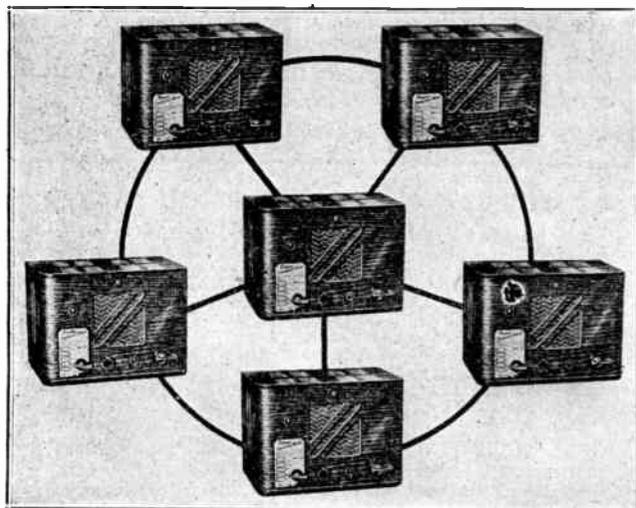

An extremely desirable feature of the Model 6C is the All-Station switch which permits any station to call or page all other stations in the system at one time. This feature is not available on Models 12C or 219C.

If private conversations are desired, earphone Masters are available for one or all the Masters. This type of arrangement works like an inter-office telephone system. An extremely important feature is that it is not necessary to use the "Press-to-Talk" switch on any Master equipped with earphone, when earphone is in use.

Each station is housed in a beautiful walnut finished bakelite cabinet and equipped with station selector, master volume control, talk-listen switch, on-off switch and pilot light that shows when system is on or off.

TUBES USED: 1—12SJ7, 1—50L6GT, 1—35Z5GT

**CABLE NOTE:**—Installation of Type "C" Systems requires a cable with one more conductor than the number of stations to be installed (i.e.) five stations require a six conductor cable, etc.

**Model 6C**—One Master only, for up to 6 stations, complete with tubes.

**Model 6CE**—Same as 6C, except with earphone for privacy of conversation.

**Model 12C**—One Master only, for up to 12 stations.

**Model 12CE**—Same as 12C, but with earphone.

**Model 219C**—One Master only, for up to 19 stations.

**Model 219CE**—Same as 219C, but with earphone.

## 15-Watt Amplifier Model 615

- Three Input Channels
- Illuminated Control Panel
- Streamlined Two-Tone Case
- Beam Power Output Tubes
- Exceptional Tone Quality

### MODEL 615 SPECIFICATIONS

POWER OUTPUT: 15 watts at less than 5% distortion. 18 watts peak.

GAIN: Microphone channels 124 db. Phono 85 db.

FREQUENCY RESPONSE: 35 to 10,000 cycles—within plus or minus 1.5 db.

INPUT IMPEDANCE: Two microphone channels 10 megohms each (low impedance available at extra cost). Phono 500,000 ohms.

TUBES: 2—6SJ7; 1—6SF5; 1—6N7; 2—6V6G; 1—5Y3G.

OUTPUT IMPEDANCES: 1.25; 2.5; 4; 8; 15; 250 and 500 ohms.

CONTROLS: Two microphone volume controls; one phono control; one tone control.

POWER REQUIRED: 100 watts, 110-120 volts AC 50-60 cycles.

DIMENSIONS: 8½" deep; 8" high; 16½" long.

NET WEIGHT: 25 lbs.

Order Catalog No. U-5001

This amplifier is as fine in performance as its beautiful, modern design suggests. A new peak in appearance and tone! Its illuminated, full-vision pointer dials are set on an incline, at the proper eye level, in a beautiful, two-tone gray cabinet trimmed in deep red. With push-pull beam power output tubes utilizing inverse feedback and an expertly engineered circuit, it is literally a packaged miracle in performance and ease of operation.

The 15-watt output has less than 5% distortion. Peak output is 18 watts. Two individually controlled microphone channels and one phono channel can be mixed in any combination of volume. Circuit and tubes are easily accessible through the one-piece removable top-and-back panel.

## 30-Watt Amplifier Model 630

- Four Separately Controlled Inputs
- Electronic Bass and Treble Boost
- Inverse Feedback Stabilizer
- Convenient Inclined Illuminated Panel
- Streamlined Two-Tone Housing

### MODEL 630 SPECIFICATIONS

POWER OUTPUT: 30 watts at less than 5% distortion. 38 watts peak.

GAIN: Microphone channels 132 db. Phono 85 db.

FREQUENCY RESPONSE: 35 to 12,000 cycles—within plus or minus 1 db.

INPUT IMPEDANCE: Three microphone channels 10 megohms each (low impedance available at extra cost). Phono 500,000 ohms.

TUBES: 3—6SJ7; 2—6SC7; 1—6C5; 1—6N7; 2—6L6G; 1—5U4G.

OUTPUT IMPEDANCES: 1.25; 2.5; 4; 8; 15; 250 and 500 ohms.

CONTROLS: Three microphone volume controls; one phono control; one bass boost tone control; one treble boost tone control.

POWER REQUIRED: 130 watts, 110-120 volts AC 50-60 cycles.

DIMENSIONS: 11" deep; 8½" high; 16½" long.

NET WEIGHT: 33 lbs.

Order Catalog No. U-5003

A new high in amplifier value! Undistorted 30-watt output, a peak power of 38 watts, and a perfected circuit utilizing push-pull beam power output tubes and inverse feedback. Separately regulated tonal control—and when properly used, helps reduce feedback. Three microphone inputs and one phono input, with separate volume controls, permit any combination.

This versatile, feature-packed unit is encased in an ultra-modern housing finished in two-tone gray and featuring easy-to-read, illuminated pointer dials. One of the most attractive units you've ever seen! The interior circuit is accessible through an easily removable one-piece top and back. No detail in amplifier perfection has been overlooked!

## 10-Watt Amplifier Model 610

- Undistorted Output
- Three Input Channels
- Modern Two-Tone Design
- Illuminated Sloping Panel
- Easily Removable Top

### MODEL 610 SPECIFICATIONS

POWER OUTPUT: 10 watts with less than 5% distortion. 14 watts peak.

GAIN: Microphone 115 db. Phono 75 db.

FREQUENCY RESPONSE: 50 to 10,000 cycles within 2 db.

INPUT IMPEDANCE: 2 Microphones 10 megohms. 1 Phono 500,000 ohms.

TUBES: 2—6SJ7; 1—6N7; 2—6V6G; 1—5Y3G.

OUTPUT IMPEDANCE: 1.25; 2.5; 4; 8; 15; 250 and 500 ohms.

CONTROLS: Two volume controls for microphones, one for phono and one tone control.

POWER REQUIRED: 85 watts, 110-120 volts AC 50-60 cycles.

DIMENSIONS: 8½" deep; 8" high; 16½" long.

NET WEIGHT: 23 lbs.

Order Catalog No. U-5000

## 25-Watt Amplifier Model 625

- Electronic Bass and Treble Boost
- Three Separately Controlled Inputs
- Inverse Feedback Stabilizer
- Modern Housing—Illuminated Panel
- Built to Last—Easy to Service

### MODEL 625 SPECIFICATIONS

POWER OUTPUT: 25 watts at less than 5% distortion. 30 watts peak.

GAIN: Microphone channels 130 db. Phono 85 db.

FREQUENCY RESPONSE: Within plus or minus 1 db. 35 to 12,000 cycles.

INPUT CIRCUITS: Two microphone channels 10 megohms each (low impedance available at extra cost). Phono 500,000 ohms.

TUBES: 2—6SJ7; 1—6SF5; 1—6N7; 2—6L6G; 1—5U4G.

OUTPUT IMPEDANCE: 1.25; 2.5; 4; 8; 15; 250 and 500 ohms.

CONTROLS: Two microphone volume controls; one phono control; one bass boost control; one treble control.

POWER REQUIRED: 120 watts, 110-120 volts AC 50-60 cycles.

DIMENSIONS: 8½" deep; 8" high; 16½" long.

NET WEIGHT: 27 lbs.

**BELL SOUND SYSTEMS, Inc.**

## 100-Watt Amplifier Model 700

The finest amplifying unit money can buy. Powered by twin, independently operated 50 watt amplifiers, combined with many extra quality features, it affords versatility, power and clarity of tone for practically any P.A. requirement. Attractive, economical and exceptionally carefree in maintenance.

### MODEL 700 SPECIFICATIONS

**POWER OUTPUT OF EACH OUTPUT STAGE:** 50 watts with not more than 2% distortion. 58 watt peak with not more than 7% distortion.

**GAIN:** Microphone channels, 135 db. low level. Phono channel, 90 db. high level.

**FREQUENCY RESPONSE:** 30 to 12,000 cycles within plus or minus 1 1/2 db., with tone controls in normal position.

**INPUT IMPEDANCE:** Four microphone channels 10 megohms. One high impedance phono circuit, 500,000 ohms.

**OUTPUT IMPEDANCE:** Each amplifier, 1.25; 2.5; 4; 8; 15; 250; 500 ohms.

**TUBES:** 2—5U4G; 2—5Y3G; 4—6L6G; 2—6N7; 1—6SF5; 1—6L7 or 1612; 1—7F7; 2—6SC7; 4—6SJ7.

**CONTROLS:** Four microphone volume controls; one phono volume control; two master gain controls, one bass boost tone control; one treble boost tone control; one auto expessor level control; one auto expessor switch; two power switches—one for each amplifier unit; one power switch for preamplifier B supply.

**POWER REQUIRED:** 350 watts, 120 volt 50-60 cycle A.C.

**DIMENSIONS:** 17 1/2" high; 12 1/2" deep; 16 1/2" long.

**NET WEIGHT:** 88 lbs.

Order Catalog No. U-5005

- 50 or 100-Watt Undistorted Output
- Twin 50-Watt Power Units—Operable Separately or Together
- Electronic Treble Boost
- Automatic Expessor Level Control
- Automatic Expessor Switch
- Inclined Dial Panel with Remote Control Knobs
- Five Input Channels
- Tap Impedance Switch
- Compact, Modern Design
- Handles for Portability

## 50-Watt Amplifier Model 650

- Quality—Power—Tone Excellence
- Four Separately Controlled Inputs
- Separate Bass and Treble Boosters
- Ultra-Modern—Illuminated Panel
- Beam Power Tubes and Inverse Feedback

### MODEL 650 SPECIFICATIONS

**POWER OUTPUT:** 50 watts at less than 5% distortion. 58 watts peak.

**GAIN:** Microphone channels 132 db. Phono 85 db.

**FREQUENCY RESPONSE:** 35 to 12,000 cycles—within plus or minus 1 db.

**INPUT IMPEDANCE:** Three microphone channels, 10 megohms each (low impedance available at extra cost). Phono 500,000 ohms.

**TUBES:** 3—6SJ7; 2—6SC7; 1—6SF5; 1—6N7; 2—6L6G; 1—5Y3G; 1—5U4G.

**OUTPUT IMPEDANCE:** 1.25; 2.5; 4; 8; 15; 250 and 500 ohms.

**CONTROLS:** Three microphone volume controls; one phono control; one bass boost tone control; one treble boost tone control.

**POWER REQUIRED:** 215 watts, 110-120 volts AC 50-60 cycles.

**DIMENSIONS:** 12" deep; 8 1/2" high; 16 1/2" long.

**NET WEIGHT:** 44 lbs.

Order Catalog No. U-5004

## A.C. MULTI-CHANNEL PRE-AMPLIFIERS

### Model 602—Two Channels

This finely engineered, beautifully housed, two channel, Pre-Amplifier is just the unit for installation where microphone equipment is to be used at a distance from the main amplifier, or where modern microphone equipment is to be adapted to a low gain amplifier. It provides for mixing two high impedance microphone circuits, with master gain control, and incorporates a built-in AC power supply.

### Model 604

Similar to Model 602 but provides for mixing four high impedance "mikes," each having separate volume controls.

Order Catalog No. U-5007

### MODEL 602 SPECIFICATIONS

**OVER-ALL GAIN:** 58 db.

**TUBES:** 3—6SJ7; 1—6X5G.

**INPUT CHANNELS:** Two 10 megohm inputs are provided for high impedance microphones.

**OUTPUT IMPEDANCE:** 500; 250 and 100,000 ohms.

**CONTROLS:** Two microphone mixer volume controls. One master gain control.

**POWER REQUIRED:** 50 watts, 110-120 volts AC 50-60 cycles.

**DIMENSIONS:** 8 1/2" deep; 8" high; 16 1/2" long.

**NET WEIGHT:** 20 lbs.

Order Catalog No. U-5006

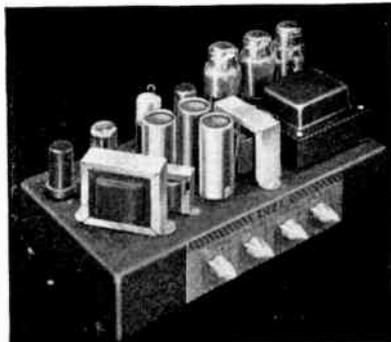

Illustrates Four-Channel-Model 604

## Model V-15 Microphone and Phono Amplifier

The renewed popularity of recorded music has brought heavy demands for this equipment. The model V-15 phono amplifier delivers unsurpassed fidelity of tone and faithfulness from every type of recording. It features 15 watt undistorted output and a new form of automatic volume expansion. This expander recaptures with amazing fidelity the full richness of expression, power, range, and volume of the original music. It requires no intricate adjustment; and it will reproduce symphonic, dance or vocal music equally well.

Model V-15 is designed especially for record reproduction. Its compactness makes it an ideal unit with which to modernize older phonographs, or to incorporate in new or old record-playing systems for home, school or entertainment use. It has a high impedance (10 megohm) microphone input channel for regular public address use, or for home novelty stunts. It is also equipped with a volume control for the microphone and one for the phonograph; a control for the degree of expansion, and a fourth control which permits a range of tone adjustment for widely varying requirements. Tubes utilized: 1—6SJ7; 1—7F7; 1—6L7; 1—6N7; 2—6V6G; 1—5Y3G.

### 10-14 Watts—Model P.A. 610

- Undistorted 10-Watt Output
- Three Input Channels
- Illuminated Control Panel
- Dual Speakers—One Case
- Easy to Operate—Easy to Service

This moderately priced, medium powered portable system is "just right" for many needs. It utilizes a Model 610 amplifier (for specifications see page C-35) which incorporates push-pull beam power output tubes and inverse feedback, and develops undistorted output of 10 watts, with

a peak power of 14 watts. Three input channels—two microphone and one phono have separate volume controls and can be simultaneously mixed.

The amplifier is housed in a streamlined cabinet finished in two-tone gray and trimmed in deep red. Two 10-inch high quality dynamic speakers are mounted in a gray, Keratol-covered carrying case which also accommodates the amplifier, cables and microphone. A similar system for permanent installation is available in Model P.X. 610D, listed below.

#### MODEL P.A. 610 SPECIFICATIONS

For Amplifier Specifications see Model 610—page C-35

#### P.A. 610E—ECONOMY DUAL SPEAKER SYSTEM, LESS TUBES

- 1—Model 610 Amplifier (less tubes).
  - 2—Model 33—10" Dynamic Speakers.
  - 2—25-ft. Speaker Cables and Plugs.
  - 1—Model 30 Crystal Microphone.
  - 1—15-ft. "Mike" Cable and Plug.
  - 1—Model 20 Desk Stand.
  - 1—Model 15—Three Piece Carrying Case.

Order Catalog No. U-5102

#### P.A. 610—STANDARD DUAL SPEAKER SYSTEM, LESS TUBES

Same as Model P.A. 610E except choice of 59, 60, 62 or 63 "Mike" (Model 59 unless otherwise specified). Less tubes. Shipping Weight—48 lbs.

Order Catalog No. U-5103

#### P.A. 610D—DELUXE DUAL SPEAKER SYSTEM, LESS TUBES

Same as Model P.A. 610 except with Model 57 Uniplex Crystal Microphone for greater distance pickup. Less tubes. Shipping Weight—50 lbs.

Order Catalog No. U-5104

#### P.X. 610D—DELUXE PERMANENT SYSTEM, LESS TUBES

- 1—Model 610 Amplifier (less tubes).
  - 2—Model 33—10" Dynamic Speakers.
  - 2—Model 90 Speaker Housings.
  - 1—Model 57 Uniplex Crystal Microphone.
  - 1—Model 22 Pedestal "Mike" Stand.
- Shipping Weight—48 lbs.

Order Catalog No. U-5105

Note: For other accessories available for this system, write to factory.

#### MICROPHONES

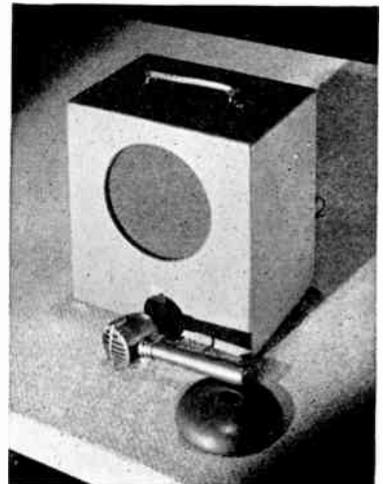

Bell Portable P.A. Systems can be supplied with microphones illustrated: No. 59—Crystal diaphragm; No. 63—high impedance dynamic; No. 57—"Uniplex," sensitive in front, dead in rear; No. 62—Dynamic protected against humidity and temperature change; or No. 60—"Rocket" Crystal diaphragm.

#### Model 15 CARRYING CASE

Cat. No. 1024—Overall size: 18" wide, 20" high and 13½" deep.

### 6-8 Watts Model 606

#### Ballyhoo Unit

- 6-8 Watts
- Beam Power Output
- Quality Crystal Microphone
- Completely Self-contained
- Two-way Mike Stand

A compact, quality-tone amplifier at rock-bottom cost. Window and store demonstrators, auctioneers, lecturers, ballyhoo artists, entertainers of every description hail this as the ideal unit for smaller crowds.

Has one input for a high impedance microphone and one for a high impedance phono pickup.

The carrying case is of durable construction, covered in brown Keratol. The 8-inch loudspeaker is an electro-dynamic type. Over-all size of complete portable unit is 11¼" x 12" x 8". Weight is 14 pounds.

#### MODEL 606 SPECIFICATIONS

Ballyhoo System, with tubes.

- 1—6-8 Watt Amplifier with tubes.
  - 4—Tubes: 1—6SJ7; 1—6LG6; 1—6C5; 1—5Y3G.
  - 1—Model W30 Crystal Microphone with 15 ft. mike cable and plug.
  - 1—8" Electro-dynamic speaker with 25 ft. cable and plug.
  - 1—Carrying Case.
  - 1—Two-Way (Desk or Hand) "Mike" Stand.
- Cased Size: 11¼" x 12" x 8".  
Shipping weight, 16 lbs.

- Undistorted 25-Watt Output
- Electronic Bass Boost
- Electronic Treble Boost
- Inverse Feedback
- Inclined Illuminated Dials
- Three Inputs—Separate Control
- Smart, Modern Design and Finish
- Compact, Easy to Carry

Popular wattage, inexpensive, compact, and light in weight.

Amplifier Model 625, described on page C-35, has peak power of 30 watts. Inverse feedback stabilizer, bass boost and treble compensators, two electronic tone controls, and separate controls for all three channels.

Complete system is contained in two compact cases. The speaker case is 20" high, 18" long, and 13 1/2" deep. The amplifier case is 10" x 18" x 12 1/2". Also supplied for permanent installation system.

Model 14 Cat. No. U-1023    Model 95 Cat. No. U-1038

### 30 Watts—Model P.A. 630

- Four Individually Controlled Inputs
- Separate Bass and Treble Boost
- Inverse Feedback Stabilizer
- 30-Watt Undistorted Output
- Inclined, Illuminated Panel
- Handsome Streamlined Design
- Easily Accessible for Service
- Strong, Compact Construction

#### MODEL P.A. 630 SPECIFICATIONS

For Amplifier Specifications See Model 630—page C-35.

#### P.A. 630—STANDARD SYSTEM (DUAL SPEAKER)

- 1—Model 630 Amplifier (less tubes).
- 2—Model 35 Heavy-Duty Dynamic 12" Speakers.
- 2—50-ft. Speaker Cables and Plugs.
- 1—Microphone; choice of 59, 60, 62 or 63. (Model 59 Crystal Microphone furnished unless otherwise specified.)
- 1—25-ft. Mike Cable and Plug.
- 1—Model 20 Desk Type "Mike" Stand.

- 1—Model 95 Two Pce. Carrying Case for Speakers.
  - 1—Model 14 Amplifier Carrying Case.
- Shipping Weight—70 lbs.  
Order Catalog No. U-5130

#### P.A. 630D—DELUXE SYSTEM (DUAL SPEAKER)

- Same as Model P.A. 630 except supplied with Model 57 Uniplex Crystal Microphone for greater distance pickup.
- Order Catalog No. U-5131

#### P.X. 630D—DELUXE—(PERMANENT SYSTEM)

- 1—Model 630 Amplifier (less tubes).
  - 2—Model 35 Heavy-Duty Dynamic 12" Speakers.
  - 2—Model 90A Spkr. Housings—Walnut Finish.
  - 1—Model 57 Uniplex Crystal Microphone.
  - 1—Model 22 Pedestal Microphone Stand.
- Shipping Weight—68 lbs.  
Order Catalog No. U-5132

NOTE: For other accessories, write factory.

### 15 Watts—Model P.A. 615

- Three Input Channels
- Illuminated Control Panel
- Convenient Angle-Set Dials
- Twin Heavy-Duty Speakers
- Inverse Feedback Stabilizer
- Easily Portable in One Case

MODEL P.A. 615

Medium wattage with many fine points of design. Peak of 18 watts. High gain amplifier (see page C-35 for specifications). The two 10-inch high quality dynamic loudspeakers, in neat gray Keratol housings fit together to form a compact carrying case which also houses the amplifier, microphone and necessary cable. Furnished for permanent installation as Model P.X. 615D.

#### MODEL P.A. 615 SPECIFICATIONS

For Amplifier Specifications See Model 615—page C-35.

#### P.A. 615E—ECONOMY PORTABLE SYSTEM (DUAL SPEAKER)

- 1—Model 615 Amplifier (less tubes).
  - 2—Model 33 Heavy-Duty 10" Speakers.
  - 2—25-ft. Speaker Cables and Plug.
  - 1—Model 30 Crystal Microphone with 15 ft. Shielded Cable and Plug.
  - 1—Model 20 Desk-type Microphone Stand.
  - 1—Model 15 Portable Carrying Case.
- Shipping Weight—50 lbs.

Order Catalog No. U-5110

#### P.A. 615—STANDARD PORTABLE SYSTEM (DUAL SPEAKER)

- Same as Model P.A. 615E except with choice of Model 59, 60, 62 or 63 "mike." (Model 59 unless otherwise specified.) Less tubes.
- Shipping Weight—50 lbs.

Order Catalog No. U-5111

#### P.A. 615D—DELUXE PORTABLE SYSTEM (DUAL SPEAKER)

- Same as Model P.A. 615 except with Model 57 Uniplex Crystal Microphone for greater distance pickup.
- Shipping Weight—50 lbs.

Order Catalog No. U-5112

NOTE: For other accessories, write factory.

## 50 Watts—Model P.A. 650

### MODEL P.A. 650 SPECIFICATIONS

For Amplifier Specifications See Model 650—page C-36.

#### P.A. 650—STANDARD SYSTEM (DUAL SPEAKER)

- 1—Model 650 Amplifier (less tubes).
- 2—Model 35 Heavy-Duty 12" Dynamic Speakers.
- 2—50-ft. Speaker Cables and Plugs.
- 1—Microphone; choice of 59, 60, 62 or 63. (Model 59 Crystal Microphone furnished unless otherwise specified.)
- 1—25-ft. Mike Cable and Plug.
- 1—Model 20 Desk Type Mike Stand.
- 1—Model 95 Two-pce. carrying case for Speakers.
- 1—Model 14 Amplifier Carrying Case.

Shipping Weight—80 lbs.

Order Catalog No. U-5140

#### P.A. 650D—DELUXE SYSTEM (DUAL SPEAKER)

Same as Model P.A. 650 except supplied with Model 57 Uniplex Crystal Microphone for greater distance pickup.

Order Catalog No. U-5151

#### P.X. 650D—DELUXE PERMANENT INSTALLATION SYSTEM

- 1—Model 650 Amplifier (less tubes).
- 2—Model 35 Heavy-Duty 12" Dynamic Speakers.
- 2—Model 90A Speaker Housings—Walnut Finish.
- 1—Model 57 Uniplex Crystal Microphone.
- 1—Model 22 Pedestal Microphone Stand.

Shipping Weight—76 lbs.

Order Catalog No. U-5142

NOTE: for other accessories, write factory.

- Strikingly Modern Design
- Unsurpassed Tone Quality
- Four Controlled Inputs
- Electronic Treble Boost
- Inverse Feedback Stabilizer
- Beam Power Output Tubes
- Convenient, Inclined Dial Panel

"Deluxe" equipment featuring ample wattage to cover a majority of needs, both large and small.

The high-gain 50-watt amplifier (see Model 650—page C-36) has almost unlimited tone selection. Inverse feedback eliminates acoustic feedback and also stabilizes the amplifier.

Three microphone channels and the phono pickup channel have separate volume controls. Connections are provided for using and matching as many as six speakers.

Matchless appearance is achieved in this

streamlined amplifier housing. The steel cabinet is of welded construction, finished in rich two-tone gray. Trim is in deep red plastic. Pointer dials are mounted on an inclined panel, and are indirectly illuminated. Dials have remote knob control. The carrying case for the amplifier matches the twin Keratol-covered speaker housings, which fit together to form a convenient, easily-portable carrying case. The speaker case also holds the microphone and cables; SIZES: Amplifier Case—10" high, 18" wide, 12½" deep; Speaker Case—20" high, 18" wide, 13½" deep.

## 30 Watt Mobile Model M-30

- Universal (110-Volt AC or 6-Volt DC) Operation
- Three Separately Controlled Inputs
- Dual Shielded Chassis
- Inverse Feedback
- Beam Power Output Tubes
- Power Economizer Switch
- Bass Boost and Treble Compensators
- New Inclined, Illuminated Panel

Sufficient wattage to cover gatherings of as many as 10,000 people, this all-purpose mobile system operates on either a 6-volt DC storage battery or 110-volt 60 cycle AC line current. Conversion from one type of current to the other is simple.

### MODEL M-30 SPECIFICATIONS

POWER OUTPUT: 30 watts at less than 5% distortion. Peak, 35 watts.

POWER CONSUMPTION: Approximately 25 amperes for DC operation; 160 watts for 110-volt AC operation.

TUBES: 2—6SJ7; 1—6C5; 1—6N7; 2—6L6G; 2—6X5G.

INPUT CIRCUITS: Three channels—two for high impedance microphones—one for phonograph.

OUTPUT IMPEDANCE: 500; 250; 15; 8; 4; 2.5; 1.25 ohms.

CONTROLS: Three volume controls—bass boost and treble boost controls, filament switch, economizer power supply switch and phono switch.

POWER REQUIRED: 6 volts DC—110-120 volts, 60 cycles AC.

DIMENSIONS: 14½" deep; 9" high; 16½" long.

NET WEIGHT: 43 lbs.

#### MODEL M-30—COMPLETE MOBILE SYSTEM, LESS TUBES

1—30 Watt Amplifier-Phono Assembly (less tubes).

2—Model 35 Heavy-Duty 12" Dynamic Speakers each with 25-ft. Cable and Plug.

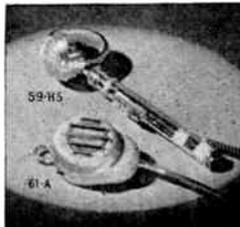

1—Model 59HS Crystal Microphone (Model 61A Dynamic if preferred).

Shipping Weight—65 lbs.

Order Catalog No. U-5054

NOTE: For trumpets and other accessories write factory.

Current consumption is reduced by a power economizer switch and high-efficiency dynamic speakers. Separate power switches. The amplifier housing is finished in two-tone gray.

While Model 59HS (Cat. No. U-1009) Crystal Microphone is supplied, Model 61A (Cat. No. U-1007) dynamic type microphone will be furnished if preferred.

## 15 Watt Mobile Model MN-15

### SPECIFICATIONS

POWER REQUIRED: 6 volt DC or 110-120 volt 60 cycles AC.

POWER CONSUMPTION: Approximately 20 amperes for DC operation; 120 watts for AC operation.

TUBES: 1—6SJ7; 1—6C5; 1—6N7; 2—6V6G; 2—6X5G.

INPUT CIRCUIT: Two channels, one for high impedance microphone, one for phono.

OUTPUT IMPEDANCE: 500; 250; 15; 8; 4; 2.5; and 1.25 ohms.

CONTROLS: Two volume controls—one for microphone, one for phonograph; one tone compensator; filament power and phono switches.

SIZE: 12" deep; 9" high; 16½" long.

WEIGHT: 35 lbs. (Amplifier phono unit only.)

#### MODEL MN-15—COMPLETE MOBILE SYSTEM, LESS TUBES

1—15-watt Amplifier-Phono Assembly (less tubes).

2—Model 34 Heavy-Duty 12" Speakers with 15-ft. Cables.

1—Model 59HS Crystal Microphone (Model 61A dynamic type if preferred).

Shipping Weight—55 lbs.

Order Catalog No. U-5050

NOTE: For trumpets and other accessories write factory.

# PHONO-P.A. AND SCHOOL SYSTEMS

By  
**BELL SOUND SYSTEMS, Inc.**

## 15 Watt Phono—P.A. System

- Self-Contained Phono Unit
- 15-Watt Undistorted Output
- Beam Power Output Tubes
- Inverse Feedback Stabilizer

- Improved Treble Compensator
- Portable—Easy to Operate
- Plays All 12" and Smaller Records

**Model 676**

One of the most completely satisfactory phono systems ever offered for general use where 110 volt AC current is available. It combines a 15-watt amplifying system of quality and tone with a phono-pickup that plays all 12-inch and smaller records. Capacity is ample for the majority of needs.

The high gain amplifier has a peak power of 18 watts. Specifications for the amplifier are very similar to those for Model 615, shown on page C-35. Inverse feedback; improved tone compensator; beam power output tubes; and two microphone inputs and one phono input, each with separate volume controls are features.

Amplifier housing is of modern design, with two-tone-gray finish. Trim is in deep red plastic. A high quality phono turntable and crystal pickup are mounted on top of the amplifier. The phono unit operates at a speed of 78 r.p.m.

The two 10-inch heavy-duty dynamic speakers are conveniently assembled in two-section case covered in gray Keratol. This case also provides space for the amplifier-phono unit. Over-all size of the case is only 18" wide, 20" high, and 15½" deep.

### Model 676—Specifications

POWER OUTPUT: Rated 15-watt. Peak, 18 watts.

OVER-ALL GAIN: 124 db.

TUBES: 2—6SJ7; 1—6SF5; 1—6N7; 2—6V6G; 1—5Y3G.

CONTROLS: AC on-off switch; three volume controls; treble compensator.

OVER-ALL SIZE OF AMPLIFIER UNIT: 12" wide; 6½" high; 16½" long.

WEIGHT: 35 lbs. (Amplifier unit only.)

### MODEL 676—PHONO—P.A. SYSTEM (DUAL SPEAKER SYSTEM)

- 1—15-watt Amplifier with Phono Turntable and Crystal Pickup (less tubes).
- 2—Model 33 10" Heavy-Duty Speakers.
- 2—25-ft. Speaker Cables and Plugs.
- 1—Model 59 Crystal Microphone.
- 1—25-ft. "Mike" Cable and Plug.
- 1—Model 20 Desk Type Stand.
- 1—Model 15 Three-piece Carrying Case.

Shipping Weight—55 lbs.

Order Catalog No. U-5176

## 10 Watt Phono—P.A. Model 677

A smaller capacity 10 watt system similar to Model 676. Fine tone amplifier like Model 610, described on page C-35. Fine quality motor and crystal pickup. Takes 12-inch records—speed, 78 r.p.m. One 10" dynamic speaker. Amplifier-phono unit and speaker housed in one gray Keratol carrying case, size 13" x 16¼" x 17".

### Model 677—Specifications

POWER OUTPUT: Rated 10 watts. Peak 14 watts.

OVER-ALL GAIN: 122 db.

TUBES: 1—6SJ7; 1—6N7; 2—6V6G; 1—5Y3G.

CONTROLS: AC on-off switch, one volume control for microphone and one for phonograph, tone control.

OVER-ALL SIZE: Amplifier-Phono unit 13" wide, 16¼" high and 17" long.

WEIGHT: 36 lbs.

### MODEL 677—COMPLETE PHONO-AMPLIFIER (SINGLE SPEAKER SYSTEM)

- 1—10-watt Amplifier with Phono Turntable and Crystal Pickup (less tubes).
- 1—Model 33 Heavy-Duty Dynamic 10" Speaker.
- 1—25-ft. Speaker Cable and Plug.
- 1—Model 30 Crystal Microphone.
- 1—15-ft. "Mike" Cable and Plug.
- 1—Model 20 Desk Stand.

Shipping Weight—42 lbs.

Order Catalog No. U-5177

## COMPLETE SYSTEM FOR SCHOOLS

### Zephyr Model 601

Everything needed to give the modern school, hotel, club or hospital an all-purpose sound system is available in the new Bell Zephyr Unit.

**RADIO**—A high-quality, superheterodyne receiver of standard manufacture, features: Frequency coverage, 537 to 1660 KC, 5.85 to 18.8 MC—6 tubes, including cathode-ray tuning indicator (magic eye)—R.F. mixer, and oscillator stages on all bands—3-Gang precision-tuning condenser—Full-vision, calibrated dial—7¼" Linear scale; vernier tuning—Sensitivity control—Single-stage, high-gain ferrocast I.F. channel—Automatic volume control—Audio volume control.

**AMPLIFIER**—A 15-watt amplifier, with a total harmonic distortion of not more than 5% under average output conditions. Circuit is four-stage class-A resistance coupled. Filter components are built into the amplifier chassis. The room-selector keys are of the lever-operated three-position type, each switch having positions for talk-back, radio or phono, and off. For larger requirements an amplifier having additional power output can be furnished.

**PHONO PICKUP**—The electrical turntable and phonograph pickup are capable of playing 10" or 12" laterally-cut records. One-speed motor provides for 78 r.p.m. records. Special phono units can be supplied if desired.

### MODEL 601—ZEPHYR—(Unit shown above)

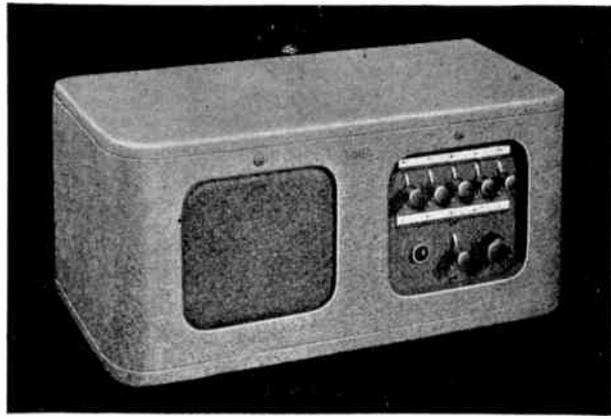

- 1—Model 615 Amplifier Unit, 15-watt (less tubes).
- 1—3½ watt Call-Reply Amplifier (less tubes).
- 1—6 Tube Superheterodyne Radio (less tubes).
- 1—Electric Phono Turntable and Pickup.
- 1—Headphone Monitor Input.
- 1—Set of 10 Room Switches.
- 1—Walnut Cabinet.

Order Catalog No. U-5275

NOTE: For further details on variations and combinations of this equipment, write factory.

# BELfone Intercommunicating Systems

By  
**BELL SOUND SYSTEMS, Inc.**

## 350 Series BELfones

BELfone Systems save thousands of unnecessary steps, eliminate lost time and irritating, costly delays in all kinds of inter-departmental communications. Instant contact with other departments or offices is obtained by merely pressing a key . . . conversation is as easy as though the parties involved were facing each other across a desk! Waiting for central switchboard connections is eliminated. Employees are never called away from their work needlessly.

The 350 Series includes specific models for systems of Master-to-Master type and Master (Central) to Sub-station type. Their compactness, efficiency, dependability and clarity of tone is unmatched in their price range. Power consumption is remarkably low. No noticeable heat is generated.

☞ Left:

**MODEL 350 Master (Central) Unit:** In choice of brown keratol or walnut finish. 10 Sub-station capacity. Cat. No. U-5220.

- Key-type Selector Switches
- Two-Watt Power Output
- Convenient Key-type Send-Receive Switch
- Low Power Consumption
- Two Volume Controls—One for Speaker Stations and One for Master Unit

- Uses either AC or DC
- Plug-In Cable Connector
- Beautiful Walnut or Keratol Cabinets. (Add DT for Keratol)
- Octal Tubes (Low Power Consumption and Minimized Heat Development)
- Dependable, Proved Performance

### MULTIPLE MASTER TO MASTER SYSTEMS

For Complete, Deluxe Intercommunication

**MODEL 351-M Master Unit:** Use in master-to-master circuit arrangements where any number of master units up to 11, inclusive, are desired for complete two-way intercommunication. Used in master unit systems only. Operates on 110-volt AC or DC. Other features identical to Model 350.  
Order Catalog No. U-5222

**MODEL 352M:** Same features as Model 351M, except has 3.5 watt power output. 110 volts, 60 cycles AC only.  
Order Catalog No. U-5226

### CENTRAL TO SUBSTATION SYSTEMS

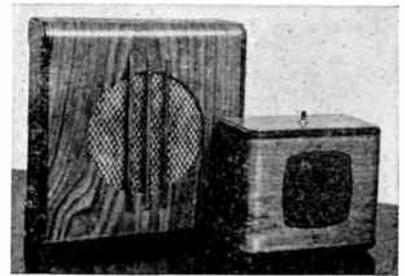

**MODEL 350 Master (Central) Unit:** Use with 10 or fewer sub-stations. Operates on either 110 volt DC or AC. Has 2 watt power output. Specify walnut or brown keratol cabinet. Weight 8 lbs.

Order Catalog No. U-5220

**MODEL 352 Master (Central) Unit:** Use same as Model 350, except that 3.5 watt power output supplies greater volume. 110 volts, 60 cycles AC only. Weight 10 lbs.

Order Catalog No. U-5224

NOTE: All Models with "M" suffix may be use with sub-stations for paging only.

**MODEL 357**  
Cat. No. U-5231  
Wall Type Substation

**MODEL 356**  
Cat. No. U 5230  
Desk Type Substation

Use with Master (Central) Units 350 and 352. Equipped with switch to initiate call to Central Unit but not to another substation.

## 360 SERIES—INTERCOMMUNICATION AT LOW COST

### Multiple Master to Master Systems

Complete Two-Way Communication

**MODEL 366M:** Use for Master-to-Master circuits where any number of master units, up to seven inclusive, are desired. May be used with Sub-stations, but for paging only.

Order Catalog No. U-5207

- Key-type Selector Switches
  - Two-Watt Power Output
  - Convenient Key-type Send-Receive Switch
  - Low Power Consumption
  - Two Volume Controls—One for Speaker Stations and One for Master Unit
  - Operates on Either 110 volts AC or DC
  - Plug-In Cable Connector
  - Beautiful Walnut or Tan Leatherette Cabinets\*
  - Octal Tubes (Low Power Consumption and Minimized Heat Development)
- \* To order leatherette cabinets, add "DT" to model number of each unit.

**MODEL 367:** Desk-type speaker substation Use with Master (Central) Unit Model 366. This unit is equipped with a push-button call switch, permitting substation to call central station — but not used after conversation is started.  
Catalog No. U-5210

**MODEL 367S:** Same as Model 367, above, without call switch.  
Catalog No. U-5211

### Central to Substation Systems

The BELfone Master (Central) Unit listed at right is for two-way communication between a central station and each of several outlying substations. The outlying stations can communicate with the central station, but not with each other.

**MODEL 366:** This Master (Central) unit has selector switches for six Sub-stations and is recommended for three- or four-station systems where additional substations are apt to be required later.

Order Catalog No. U-5205

# DELUXE INTER-COMMUNICATION AND SOUND EQUIPMENT

By  
**BELL SOUND SYSTEMS, Inc.**

## 370 Series BELfone

### Deluxe Secretive Inter-Comm

No finer inter-office communication equipment can be found than this beautifully designed, full-featured BELfone Model 374SS. It provides for completely secretive conversations between any two parties, with connections in the standard unit for a system of as many as 12 additional stations. With this secretive feature no third party can listen-in on the conversation between any two stations, although it is possible to call in on a busy circuit in case immediate contact is needed. Also a "busy signal" indicates when the party being called is already communicating with another station.

Another advantage of this model is that no talk-listen switch is required. A special, high fidelity microphone is mounted on top of the cabinet. To converse with an individual at any other station, you merely depress the station selector key and talk back and forth without further use of keys—exactly as though the individual were at your desk.

Two levels of additional volume for attracting attention or paging are instantly available through simple key switch pressure. Long life is assured by the fact that power consumption is automatically reduced during stand-by periods.

Several stations may join in a conference merely by switching the station selector keys of all parties to be included on any one of the units. Write us for further particulars in regard to flexibility.

### Speaker Sub-Stations

One or more speaker substations may be used in a system of 374SS master units, at stations where a paging or call service only is required, and where two-way conversation or reply is not essential.

Model 374SS BELfone—provides for up to 12 station system (also may be furnished with 24 up). Deluxe design—walnut finish. Operates on 110 volt AC, 50-60 cycle only. Order Catalog No. V-5240.

## HEAVY-DUTY SOUND AND VOICE-PAGING EQUIPMENT

### for Industrial Buildings, Hospitals, Airports, Depots, etc.

The war has proven that "communications" are one of the prime factors in conducting a successful operation. Every modern civilian establishment now realizes the necessity for a dependable, efficient system of independently operated sound and voice paging. But until now equipment for this industrial service had to be either custom built or made up of light duty standard commercial units. Bell Heavy-duty Sound Equipment offers for the first time a truly standard industrial system readily adaptable to practically any plant requirement . . . for broadcasting of music to workers on the job or during rest periods . . . saving time through explicit verbal paging . . . permits management to make plant-wide talks . . . or serves as a signaling or alarm system. Heavy-duty, top-quality standard units specially designed and built for high power amplification, fool-proof and tamper-proof operation, and long maintenance-free service. The standard units are designed not only for initial installations of any size but also to permit future expansion of the system by merely adding units to the original setup.

Rack-Type (Left)

Cabinet-Type (Below)

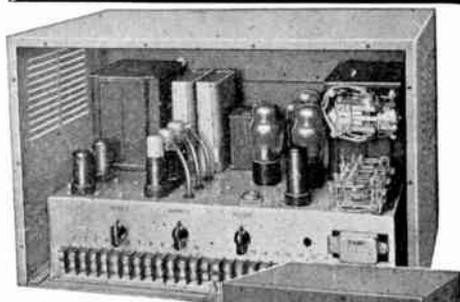

An "on-off" switch, a microphone with either a hand or foot "Talk-switch," and a phonograph unit (if recordings are to be used) are all located at receptionist's desk or control station. A Driver or Control Amplifier and one or more Speaker Amplifiers (AC operated) are remotely located at convenient points. Loud speakers are then strategically located in all departments or buildings to be covered by the system. Though the on-off switch is turned on, the units, being relay operated, merely idle except during actual broadcasting.

Control circuits are of low voltage-type. Through the use of a control amplifier the speaker power amplifiers may be located in the departments covered by their respective speakers. The unit is protected against tampering by a modern steel housing and is capable of controlling up to 10 or more 100-watt speaker amplifiers. The speaker amplifier is of 50 or 100-watt capacity. Every part is of the highest, heavy-duty quality. Under average conditions, one 100-watt amplifier will adequately handle up to 50 speakers.

# HEAVY-DUTY SOUND AND VOICE-PAGING EQUIPMENT

By  
**BELL SOUND SYSTEMS, Inc.**

(Cabinet Model)

## Model 2B Heavy-Duty Rack or Cabinet CONTROL AMPLIFIER

**Power Output:** 1 watt into low impedance line. Power sufficient to drive up to 15 Bell Model 50B or 100B power amplifiers.

### Gain and Frequency Response:

**Microphone Channels—Gain 83DB.**  
Frequency response within 3DB from 50 to 8,000 cycles.

**Phone Channel—Gain 45DB.**

Frequency response within 3DB from 40 to 12,000 cycles.

**Noise and Hum Level:** 60DB below full output.

**Input Channels:** Two high gain high impedance inputs suitable for high impedance crystal or dynamic microphones and one low gain high impedance input suitable for radio record reproduction or programs from telephone line use. (Low impedance inputs available at additional cost.)

**Tubes Utilized:** 2-6SJ7; 3-6L7; 1-6N7; 2-6F6; 1-VR-150-30; 1-5Y3G.

**Power Source:** 110-120 volts; 50-60 cycles AC.

**Cabinet:** Wall mounting type heavy gauge steel, 19" long x 12" high x 13" deep, gray wrinkle finish—with knockouts for conduit wiring. Complete with tubes. Catalog No. 2000

**Rack Panel Type:** Mounted on standard 19" (width) steel rack panel. 12 1/4" high, gray wrinkle finish. Complete with tubes. Catalog No. 2001.

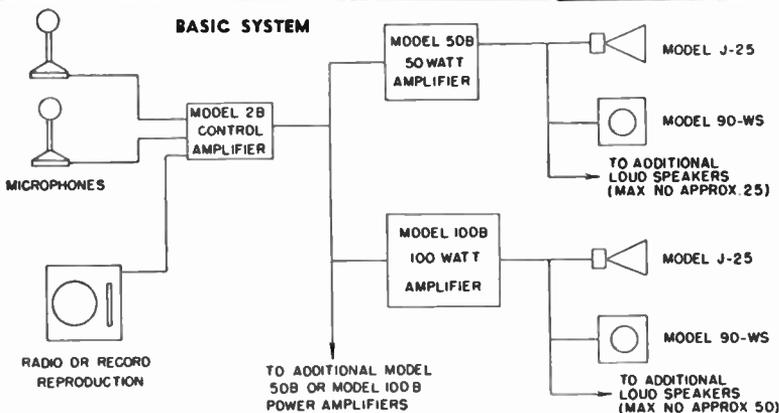

**Model 62G—Dynamic microphone on 9" desk stand; illustrated, equipped with hand "talk" switch. If preferred foot treadle can be furnished in place of hand switch. Cat. No. U-1153.**

**Model J-26 radial reflex trumpet, generally preferred. Height 19", acoustic length 60". Cat. U-1088.**  
**Model J-25—Reflex trumpet with acoustic length of 4 1/2 ft. Overall length: 21"; bell diameter: 25" projection angle 90 degrees. Cat. U-1089.**

**Model 90-WS—An ideal speaker for auditoriums, cafeterias, offices, or other locations where a neat, attractively housed, wall-mounted unit is preferred. It contains a 12-inch, high fidelity, permanent magnet speaker with line matching transformer. It is capable of handling up to 10 watts of power with high fidelity reproduction. Its beautifully finished walnut-housing measures overall 19 5/8" x 17 7/8" x 8 1/2". Cat. No. U-1035.**

## Model 50B Rack or Cabinet 50 Watt AMPLIFIER

**Power Output:** 50 watts; 3% Distortion.

**Gain:** 65DB.

**Frequency:** Response within 3DB from 40 to 10,000 cycles. Suitable for finest reproduction of music or voice.

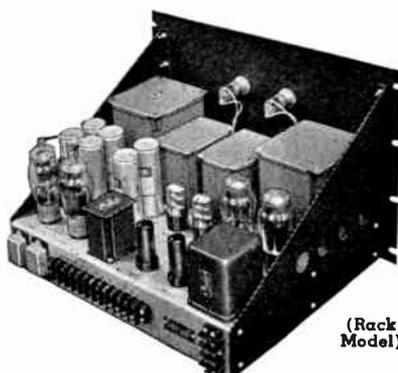

**Hum and Noise Level:** 58DB below full output.

**Input Impedance:** 600 ohms normal can be supplied bridging input.

**Output Impedance:** 500-250 ohms. **Tubes Utilized:** 1-6N7; 2-6F6; 2-807; 1-5Y3G; 2-5U4G.

**Relay Control:** Arranged for complete remote control by relay over any distance desired. Individual control of filament and plate supply with plate supply energized only during actual operation.

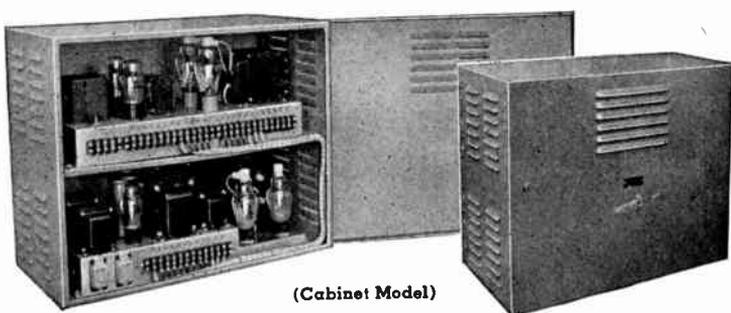

**Power Requirements:** 117 or 234 volts—50 to 60 cycles approx. 150 watts.

(Rack Model)

**Cabinet:** Wall mounting type, heavy gauge steel 20" wide x 14" high x 16" deep, gray wrinkle finish, with knockouts for conduit wiring. Complete with tubes. Catalog No. 2050.

**Rack Panel Type:** Mounted on standard 19" (width) rack panel 12 1/4" high, gray wrinkle finish. Complete with tubes. Catalog No. 2051.

(Cabinet Model)

## Model 100B Rack or Cabinet 100 Watt POWER AMPLIFIER

**Power Output:** 100 watts, 5% distortion.

**Input Impedance:** 500 ohms.

**Output Impedance:** 500-250-166-125 ohms.

**Tubes Utilized:** 2-6A5G; 2-809; 2-866.

**Relay Control:** Complete remote control of AC Power. Plate power applied only during actual use. This insures longer life, reduced power consumption and cooler operation.

**Power Source:** 110-120 volt; 60 cycle AC.

**Cabinet:** Wall mounting type of heavy gauge steel, 24" long, 20" high, 13" deep. Gray finish with knockouts for conduit wiring. Complete with tubes.

**Catalog No. 2100.**

**Rack Panel Type:** Mounted on two standard 19" (width) steel rack panels each 12 1/4" high, gray wrinkle finish. Complete with tubes.

**Catalog No. 2101.**

# Erwood SOUND EQUIPMENT

## Erwood MODEL No. 1420 — 20 WATT MOBILE PUBLIC ADDRESS SYSTEM

Designed and engineered by the originators of Mobile Public Address Systems, Model No. 1420 provides in simple compact equipment a dependable combination of 6-volt and 120-volt services. Primarily designed for mobile services, the ease with which this model may be transported makes it desirable for general public address applications.

**APPLICATION:** Suitable for outdoor crowds of 2,000 or more people, with corresponding greater indoor capacity. Suitable for civic celebrations, sports announcements, orchestral broadcasting, etc.

**FEATURES:** Will operate on either standard 120-volt A.C. power line or 6-volt storage battery. Facilities for one microphone. Self-contained record playing mechanism for phonograph record reproduction. Hum and other noises generally associated with mobile equipment have been eliminated by special Erwood extra shielding and filtration. High quality crystal pickup and noiseless rim drive turntable motor. Amplifier is equipped with 7 tubes operated well within manufacturers' ratings to eliminate tube trouble. Reproduction is excellent with ample capacity for extra power and stepped-up quality performance when required. Well designed ventilation. Accessibility has been stressed in this model.

### AMPLIFIER SPECIFICATIONS

Power Output: 20 Watts. Gain: Microphone, 129 DB. Phonograph, 73 DB. Controls: One microphone, phonograph, tone control, ON and OFF switch, and a standby switch. Input: For one microphone. Tubes: Seven required, consisting of: 1—6J7, 2—6N7, 2—6L6, 2—6X5. Output Impedance: Four, Eight, Two Hundred Fifty and Five Hundred Ohms. Power Consumption: 130 Watts A.C. 20 Amperes, D.C. Dimensions: 16" x 16" x 12". Shipping Weight: 42 lbs.

**MICROPHONE:** Because of particularly durable construction, Model 156C crystal microphone is included with these systems. Microphone has a wide frequency range, is sensitive over a wide angle of pickup. Particularly adapted to the rough usage of outdoor work and frequent handling. Frequency ranges flat output level.—62 DB. Microphone is furnished complete with 25 feet of RCS cable, plug and handle.

**SPEAKERS:** Two No. 120—12" permanent magnet speakers are included with this system. The magnetic structure of these speakers uses 21 ounces of magnetic material. They have a power handling capacity of 10 watts per speaker. Speakers are furnished with 25 feet of cable and plug.

System 1420M comprises one 1420 high fidelity amplifier, one 156C crystal microphone with 25 foot cable and plug and two 120—12" permanent magnet speakers, with 25 foot cables and plugs. List: \$154.00. Shipping Weight: 55 lbs. Code: SAGES. Kit of matched tubes. List \$7.80. Shipping Weight: 2 lbs. Code: TABLE.

## Erwood MODEL No. 3545 45 WATT AMPLIFIER

For the elaborate and exacting requirements of the "big installation," this system has been designed to embrace every modern improvement known to sound. In every respect it can be depended upon to meet every expectation.

**APPLICATION:** Adopted to larger installations requiring multiple microphone, where the stage presentation covers considerable area—automatic volume control greatly improves the pickup of the system and helps to eliminate feedback. Will handle crowds up to 10,000 persons under the most adverse conditions.

**FEATURES:** Model 3545 amplifier combines automatic volume control for microphones, volume expansion for record reproduction, remote control for the three microphone positions permits monitoring the program from a remote position. High and low tone compensation permits adapting the equipment to troublesome acoustical conditions. Uses a new circuit with two power transformers, variable output impedance switch, locking type input plugs.

### AMPLIFIER SPECIFICATIONS

Power Output: 45 Watts.  
Gain: Microphone 130 DB, Phonograph 75 DB.  
Controls: Three microphone volume controls, one master gain control, one combination volume control, one low frequency control, one ON and OFF switch.  
Input Impedance: For microphones, two megohms; for phonograph, one-half megohm.  
Tubes: Fourteen required, consisting of: 4—6J7G, 2—6N7G, 1—6L7G, 1—6F6G, 1—6H6G, 2—6L6G, 1—5U4G, 1—83.  
Output Impedance: Four, Eight, Two Hundred Fifty and Five Hundred Ohms.  
Current Consumption: 320 Watts.  
Dimensions: 8 3/4" x 11" x 18".

No. 3545—Amplifier Only.....List \$132.50  
Shipping Weight: 55 lbs. Code: APPLE.  
Kit of matched tubes for Model 3545 Amplifier.  
List: \$12.85. Shipping Weight: 4 lbs. Code: TUBES.

## Erwood MODEL No. 101 PHONOGRAPH UNIT

Model No. 101 phonograph unit is a record playing device for either ten or twelve inch phonograph records and it comprises a 78 R.P.M., rim drive phonograph motor with a ten inch flock covered turntable. The phonograph pickup is of the off-set arm type with a crystal cartridge. Output for 500,000 ohm load.

The equipment also includes a six foot power cord, a six foot shielded input cord and a gain control with an attached ON and OFF switch. The entire assembly is enclosed in an attractive portable case with a tweed covering. Dimensions 7" x 13" x 13". Shipping Weight 13 lbs. List Price: \$29.50. Code: PHONO.

# Erwood SOUND EQUIPMENT

**Erwood**

## MODEL No. 1312 — 12 WATT PORTABLE PUBLIC ADDRESS SYSTEMS

Styled like aeroplane type hand luggage this low priced system is distinguished for its superb reproduction. Ample reserve capacity provides "big-system" volume without over-load, distortion or blasting.

**APPLICATION:** Adapted to smaller installations of not over 1000 persons in such places as assembly halls, churches, night clubs, bingo games, funeral parlors, etc. Exceptionally fine record reproduction is possible when used with our No. 101 record player.

**FEATURES:** Model No. 1312 is a portable system contained in a compact and durable carrying case with a heavy tweed covering. Ample space is provided for substantially mounting the speakers, amplifier, microphone, all cables, and a full length floor stand. The same precision and care has been exercised in the manufacture of this equipment that is so evident in our larger and more expensive equipment.

### AMPLIFIER SPECIFICATIONS

Power Output: 12 Watts. Gain: Microphone 119 D.B., Phonograph 75 D.B. Controls: One microphone, one phono, one tone control and ON and OFF switch. Provision is also made for remote control of microphone volume. Input impedance: Two megohms for microphone and one-half megohm for crystal pickup. Tubes: Five required, consisting of: 1—6J7G; 1—6Y7G; 2—6V6G; 1—5V4G. Output Impedance: 3-4 and 6-8 ohms. Power Consumption: 86 Watts. Dimensions: 7" x 8" x 11". Amplifier is equipped with 6 ft. A.C. cord and plug.

**MICROPHONE:** Model 150-A is a streamlined high impedance crystal having an output of -52 D.B. The response is free from objectionable peaks or dips. The crystal cartridge is cushion mounted to prevent floor and stand noises in reproduction. Finish is a beautiful gray and chrome combination. The microphone is furnished complete with floor stand and 25 feet of SRC cable and plug.

**SPEAKERS:** Two 8-inch permanent magnet type speakers complete the system. They have a speaker voice coil diameter of 1 inch. The magnetic structure contains 14 ozs. of magnetic material per speaker. Both speakers are equipped with 25 feet of rubber covered cable and plug.

Model 1312-PC comprises complete portable system, consisting one Model 1312 Amplifier, one Model 150-A Crystal Microphone with floor stand and 25 feet of cable, two Model 108 Permanent Magnet Speakers with 25 feet of cable and

plug, and one Model C-3 Portable Carrying Case. List Price: \$112.80. Shipping Weight: 55 lbs. Code: PACKS. Model 1312 Amplifier only, less tubes. List Price: \$41.50. Shipping Weight: 22 lbs. Code: ABASE. Kit of Matching Tubes: \$6.00. Shipping Weight: 2 lbs. Code: TABOO.

## Erwood MODEL No. 2418

### 18 WATT PORTABLE PUBLIC ADDRESS SYSTEM

- Dual Speakers • One or Two Floor Stands and Microphones
- Remote Control (Optional) • Edge Illuminated Non-Breakable Dial • Single Case Construction.

**APPLICATION:** For all temporary or semi-permanent installations, most particularly adapted to traveling orchestras, road shows, religious activity and other applications for crowds up to 3000 persons.

**AMPLIFIER:** Is a model 2418—18 watt power amplifier of exceptional range and power handling capacity. Two microphones can be used simultaneously with perfect control over each microphone. The gain of the amplifier is sufficient to (129 DB) effect pickup by the microphone over a wide area. A tone control permits modification of the reproduction to meet local conditions. Controls are located on a beautiful edge illuminated non-breakable dial which is easy to see in a dark room. The amplifier is of substantial construction housed in an attractive steel case finished in deep maroon, and chrome trimmed.

**MICROPHONES:** Model 151A uni-directional microphones are furnished with this system. Their excellent frequency characteristic extends from 30 to 10,000 cycles, and while very sensitive to the front, are relatively insensitive to sounds from the rear, a characteristic which is highly desirable for public address installations. Each microphone is furnished with 25 feet of special shielded cable and polarized plug. The head is tilting and is finished in satin chrome. Microphones are furnished with a three piece sectionalized floor stand.

**LOUD SPEAKERS:** This system is furnished with two model 120 permanent magnet speakers having a diameter of 12 inches and a power handling capacity of 12 watts. The voice coil and cone structure is particularly adapted to the baffles to which they are mounted. Each speaker is provided with 25 feet of rubber covered cable and polarized plug.

**PORTABLE CARRYING CASE:** The Model C4 portable carrying case is of three piece construction, the lower section functioning as a compartment for carrying the amplifier. The upper sections are of trapezoidal construction and contain the speakers, microphones and microphone stands. In which use, they function as the loud speaker baffles and provision is made for securing them to the wall.

Model 2418-P2C is a complete system comprising a 2418 amplifier less tubes, two No. 151A microphones with cords, plugs and floor stands, two No. 120 permanent speakers with cords and one No. C4 portable carrying case. List Price: \$208.00. Shipping Wt.: 78 lbs. Code: PORTS.

Model 2418-P1C. Same as above except with one microphone and one stand. List Price: \$183.50. Shipping Wt.: 67 lbs. Code: POOLS. Kit of extra sound tubes for Model 2418 amplifier. List Price: \$8.20. Shipping Wt.: 2 lbs. Code: TALCS.

Model 2418. Amplifier only, less tubes. List Price: \$56.00. Shipping Wt.: 31 lbs. Code: ABYSS.

**Erwood**

## MODEL No. 3428 28 WATT AMPLIFIERS

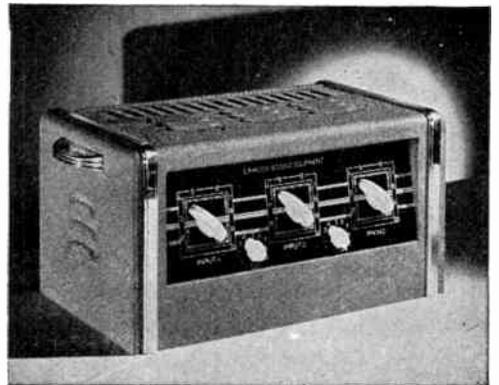

Housed in a metal cabinet of unusual beauty, this new design exceeds its rating by a substantial margin. This increased margin guarantees high quality performance without distortion at levels considerably in excess of the rating. The three inputs accommodate two microphones and a phonograph. In our opinion, this amplifying system will be most talked about because of its unusual dynamic range and tone quality.

**APPLICATION:** A well-balanced engineered system capable of exceptional performance. Well adapted to use in auditoriums, theatres, schools, churches and other public gathering places. Provides perfect reproduction for audiences of 4000 or for auditoriums of 1,000,000 cubic feet.

**FEATURES:** Model 3428 amplifier permits the use of two microphones and a phonograph input in a multiple mixing circuit. Extra refinement in circuit design reduces noise and hum to new low levels only attained in expensive recording amplifiers. Provision is incorporated for the use of a two-position remote control unit. Two tone controls permit perfect balancing of reproduction to auditorium requirements.

### AMPLIFIER SPECIFICATIONS

Power Output: 28 Watts. Gain: Microphone 130 DB, Phonograph 75 DB. Controls: Two microphone volume controls, one phonograph volume control, one high frequency control, one low frequency control, and an ON and OFF switch. Remote control attachment optional. Input: Two, two-megohm for microphones and one-half megohm for phonograph. Tubes: Eight required, consisting of: 2—6J7; 2—6C5; 2—6L6; 1—5V4; 1—6N7. Output Imped-

ance: Four, eight, two hundred and fifty and five hundred ohms. Current consumption 125 Watts. Dimensions: 8' 5/8" x 14 1/2".

No. 3428 amplifier only, less tubes. List: \$75.00. Shipping Wt.: 38 lbs. Code: ABBEY. Kit of matched tubes for Model 3428 amplifier. List: \$8.55. Shipping Wt.: 2 lbs. Code: TABBY.

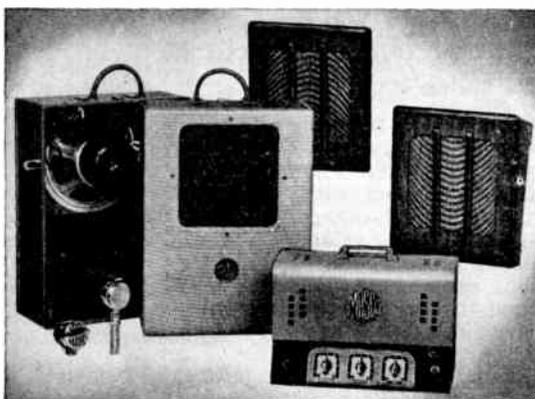

# SOUND SYSTEMS

## MASCO 17 WATT PORTABLE OR PERMANENT SOUND SYSTEM

### FEATURES

- Tapped Output, 2-4-8-15-500 Ohms
- Beam Power Output (2-6L6G)
- Electronic Mixing Over-all
- Aero-dynamic Design
- Full Range Controls
- Individual Controls
- Inverse Feedback
- 24 Hour Operation
- Custom Made

Ease of setup and operation, plus maximum output and excellent tonal quality are the salient features of these systems. The amplifier chassis is finished in a hard baked smooth gray wrinkle. Chrome and red trim are added to enhance the rich appearance. The carrying case is styled after the finest aeroplane hand luggage with tweed facings and calf skin tan overall striping. The interior of the case is designed to hold the complete system and accessories. Amplifier is mounted on sliding panel for ease in removing from case when in use.

Specifications for Model MA-17 Amplifier: Power Output: 17 Watts  
 • Gain: Microphone 118 DB, Phono 74 DB • Controls—Three: Microphone, Phono, Tone • Separate on-off AC Switch • Input—Two: Microphone and Phono • Tubes: 1-7C7, 1-7F7, 2-6L6GA, 1-5Y3GT • Output: Tapped—2-4-8-15-500 Ohms • Power Consumption: 90 Watts • Hum Level: Below Zero Level—22DB • Frequency Response: 50 to 10,000 cycles • Dimensions: 12" x 6 3/4" x 7 3/4".

### APPLICATION

These systems are highly efficient and afford outstanding results to meet requirements for medium power installations. For coverage up to 175,000 cubic feet. Microphone and Phono may be used simultaneously through the use of separate controls. Hum and noise have been reduced to a negligible level through correct design and filter.

### PORTABLE SYSTEM

The MAS-17 complete portable system consists of: Model MA-17 amplifier less tubes, mounted in carrying case. An Astatic JT-30 Microphone with 25' cable with connectors, two 10" PM speakers each with 25 ft. cable plus plugs.

MAS-17—Complete portable system as described	List Price \$97.50
MAS-17—Complete portable system, same as above but with Astatic T-3 Microphone	106.50
MA-17 —Amplifier less tubes, with streamline cover	42.50
Kit of MATCHED tubes	8.00
Model 304—Portable amplifier case only, Case dimensions: 14 1/2" wide, 13" deep, 18" high	16.50
No. 102—10" walnut speaker cabinet	6.25
If Astatic JT-30 Microphone is not desired, deduct	12.50

## MASCO 25 WATT PERMANENT OR PORTABLE SOUND SYSTEM

### FEATURES

- Output Tapped, 2-4-8-15-500 Ohms
- Two Microphones and Phono
- Electronic Mixing Over-all
- Beam Power 6L6 Output
- Undistorted 25 Watt Output
- Triple Channel Inputs
- Inverse Feedback
- 24 Hour Operation
- Custom Made

Amplifier Specifications for Model MA-25: Power Output: 25 Watts • Gain: Microphone 125 DB, Phono 78 DB • Controls—Four: Two Microphones, Phono, Tone • Separate On-Off Switch • Input—Three: Two Microphones, Phono • Tubes: 2-7B4, 1-7F7, 1-7N7, 2-6L6GA, 1-5U4G • Output: Tapped—2-4-8-15-500 Ohms • Power Consumption: 120 Watts • Hum Level: —55 DB below 25 Watts • Frequency Response: 50 to 10,000 Cycles • Dimen: 15" x 8" x 8".

Portable System: The MAS-25 complete system consists of: Model MA-25 amplifier less tubes, mounted in carrying case as described. Astatic JT-30 Microphone with 25 ft. cable with connector, two heavy duty 12" PM Speakers, each with 25 ft. cable plus plugs.

MASCO offers industrial streamlining and extra refinement in circuit design, imperative in modern sound equipment. Model MA-25 permits use of two microphones and phono in a multiple mixing circuit. Output is tapped to match any speaker or speaker groups. Humless operation plus fine tonal quality at high level output are only a few of its outstanding features. Richly appointed carrying case of two-tone tan calf and tweed. Amplifier is finished in attractive gray baked crystal with red and chrome handles, dial plate and trimmings. Accessories housed within carrying case. Amplifier mounted on sliding panel for ease in removing from case when in use.

### List Price

MAS-25—Complete portable system as described	\$116.50
MAS-25—Complete portable system same as above but with Astatic T-3 Microphone	125.50
MA-25 —Amplifier less tubes, with streamline cover	60.00

# SOUND SYSTEMS

## 25 WATT UNIVERSAL PHONO-TOP MOBILE SYSTEM . . . FOR BATTERY AND 115 VOLT AC OPERATION

### Model MAC-25P Mobile System

**Amplifier Features:** Model MC-25P 6 volt DC and 115 volt AC amplifier is a high-powered De Luxe Unit that is applicable to all uses for outdoor sound. Provisions for two microphones and phono-input with independent controls along with universal speaking matching of 2-4-8-15 and 500 Ohms, add to its value. The MASCO battery saver "stand-by" switch is also incorporated. The extra-heavy duty vibrator assures a 75% overload safety factor, and through its use steady voltage and frequency is maintained. A primary feature is the Ripple-Free operation; chassis finish is attractive gray with red and chrome trim.

**Amplifier Specifications for Model MC-25P:** Power Output: 25 Watts • Gain: Microphone, 125 DB; Phono, 78 DB. • Controls—Four: Two Microphones, Phono, Tone • Switches: On-off AC, On-off Phono Motor, Stand-by Battery Saver Switch • Input—Two: Microphone and Phono • Tubes: 2—7B4, 1—7F7, 1—7N7, 2—6L6GA, 1—5U4G • Output: Tapped—2-4-8-15-500 Ohms • Power Consumption: AC 120 Watts, 6 Volts DC 22 Amps • Hum Level: Ripple-Free on Battery—55 DB below 25 Watts • Frequency Response: 50 to 10,000 cycles • Dimen: 12" x 10" x 8".

**Portable System:** The Model MAC-25P complete portable system consists of: Model MC-25P Phono-top amplifier less tubes, mounted in carrying case of attractive two-tone tan and brown. One Astatic JT-30 Microphone with 25 ft. cable with connector, two heavy-duty 12" Speakers with 35 ft. cable and plugs.

	List Price
MAC-25P—Complete portable system as described	\$160.00

MC-25P—6 volt DC and 115 volt AC phono-top amplifier less tubes	106.00
MC-25—6 volt DC and 115 volt AC amplifier less tubes, with plain cover	90.00
Kit of MATCHED tubes	11.00
Model 305—Portable amplifier case, 23" high, 15" deep, 18½" wide	20.00
Model 402—12" all steel non-resonant baffle	13.50
If Astatic JT-30 Microphone is not desired, deduct	12.50
NOTE: If amplifier with plain cover is desired with above system deduct	15.00

NOTE: If the above amplifier systems are desired as Outdoor Systems, deduct the List Prices of the Amplifier Case and add the List Price of two No. 402 baffles.

## DE LUXE PHONO-TOP P. A. EQUIPMENT (AC)

**Features and Application:** Another MASCO first is presented here with everything that is desirable in portable systems. Now for the first time, complete portability in P. A. is attained. Especially adaptable where combined P. A. and recorded music is essential. The MAS-17P and MAS-25P are leaders in their respective fields. Both equipped with a 78 R.P.M. constant speed motor, and modern Astatic tangent head crystal pickup.

### Model MAS-17P System

**Amplifier Specifications:** Chassis size for Model MA-17P, 12" x 10" x 8". All other specifications same as Model MA-17. (See Page C-29 for specifications.)

**Portable System:** The MAS-17P complete portable system consists of the following: Model MA-17P phono-top amplifier, less tubes, mounted in carrying case, an Astatic JT-30 Microphone with 25 ft. cable with connector, two heavy duty 10" PM Speakers, each with 25 ft. cable plugs.

	List Price
MAS-17P—Complete portable system as described	\$116.00
MAS-17P—Complete portable system same as above but with Astatic T-3 Microphone	125.00
MA-17P—Amplifier with phono-top cover, less tubes	62.50
Kit of MATCHED tubes	8.00
Model 304—Portable amplifier case: 14½" wide, 13" deep, 18" high	16.50
If Astatic JT-30 Microphone is not desired, deduct	12.50

**Permanent Installation:** NOTE: If Model MA-17P Phono-top amplifier is desired as a permanent system (see page C-29 under MAS-17 listing), deduct list price of MA-17 amplifier from system and add list price of MA-17P amplifier.

### Model MAS-25P System

**Amplifier Specifications:** Chassis size for Model MA-25P, 12" x 10" x 8". All other specifications same as Model MA-25. (See Page C-29 for specifications.)

**Portable System:** The Model MAS-25P complete portable system consists of: The Model MA-25P phono-top amplifier, less tubes, mounted in carrying case, an Astatic JT-30 Microphone with 25 ft. cable with connector, two heavy duty 12" PM Speakers, each with 25 ft. cable with plugs.

	List Price
MAS-25P—Complete portable system as described	\$132.50
MAS-25P—Complete portable system same as above but with Astatic T-3 Microphone	141.50

## DE LUXE WALNUT SPEAKER CABINETS

Uniformity throughout has been the keynote of our design in bringing you the new "MASCO" DE LUXE line of walnut speaker cabinets. Ranging in size from 5" to 15". All "MASCO" cabinets are designed primarily from the standpoint of acoustical efficiency, however, one look at the STURDY CONSTRUCTION, will convince you that in endeavoring to attain the highest acoustical standard we did not SACRIFICE BEAUTY. We call your attention to the GROOVED back on all cabinets which releases air pressure or back lash. These cabinets will not resonate or rattle at high volume due to their STURDY CONSTRUCTION.

### 15" Model No. 115—MASCO Super Quality Walnut Speaker Cabinet

Made to accommodate a 15" speaker. Made of choice Walnut Veneer. Heavily constructed and reinforced throughout. Slope front and attractive grille bars add to the beauty of this cabinet. Size: 18" high, 18" wide, 10 $\frac{3}{4}$ " deep. Supplied with hardware for mounting speaker. List Price .....\$12.50

### 12" Model No. 101—MASCO De Luxe Walnut Speaker Cabinet

Made to accommodate a 12" speaker. Beautiful WALNUT finish. Constructed to permit correct release of speaker pressure. Slope front and attractive raised grille bars. Size: 14" wide, 15 $\frac{1}{2}$ " high, 9 $\frac{1}{2}$ " deep. Supplied with hardware for mounting speaker. List Price, \$8.00

### 10" Model No. 102—MASCO Superior Quality Walnut Speaker Cabinet

For installation where the finest type of equipment is required. Has slope front with raised grille bars. Made to accommodate a 10" speaker. Size: 12" wide, 13 $\frac{1}{2}$ " high, 7 $\frac{1}{2}$ " deep. Supplied with hardware for mounting speaker. List Price, \$6.25

### 8" Model No. 103 MASCO Standard Wall Cabinet

To house 8" or 9" speakers. Handsome WALNUT finish. Raised grille bars. Slope front. Sizes: 10" wide, 11 $\frac{1}{2}$ " high, 7 $\frac{1}{4}$ " deep. Supplied with hardware for mounting speaker. List Price .....\$5.00

### 6" Model No. 104 All Purpose Wall Cabinet

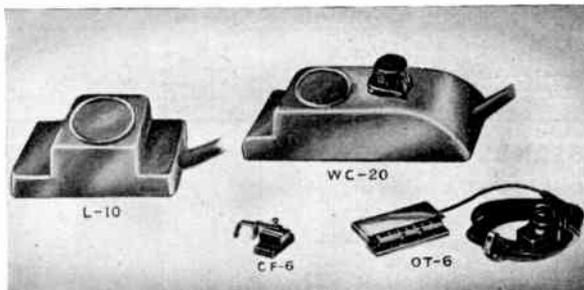

To house 5" and 6" speakers. WALNUT finish. Slope front with raised grille bars. Size: 7 $\frac{1}{2}$ " wide, 9" high, 5 $\frac{1}{2}$ " deep. Supplied with hardware for mounting speaker. List Price ..... \$4.00

### 5" Model No. 105—MASCO General Purpose Walnut Cabinet

Front and back grilles, finished in two tone walnut and black trim. Made to fit any standard 5" speaker. Used in PA or Inter-Office communication. Rubber bumpers are supplied at base of cabinet to prevent marring. Size: 6 $\frac{1}{4}$ " wide, 6 $\frac{1}{2}$ " high, 4" deep. Supplied with hardware for mounting speaker and back cover. List Price .....\$3.75

## MUSICAL CONTACT MICROPHONES

- Ease of Installation
- Operates with All Instruments
- Operates with Most Modern Radios
- Will Not Mar Surfaces
- Operates with All Makes of Amplifiers
- Mellow Rounded Tone

"MASCO Musical Microphones" are designed for use with ANY musical instrument. They operate by being placed in contact with the body of the instrument and receiving vibrations from the instrument when it is played. The resulting brilliance of tone far exceeds the power of the instrument alone. MASCO MUSICAL MICROPHONES may be slipped on in a moment, and require no special strings or instrument changes.

### Models Nos. WC-20 and L-10

**Features:** Twelve model L-10 less volume control, with 15 ft. of cable each, may be connected in parallel and plugged into one input, while five model No. WC-20 with volume control and 15 ft. of cable each, may be paralleled and connected to one input. Both models are ideal for use as a pickup for disc and film recording. Use of them in this manner eliminates background noises usually encountered with regu-

lation microphones. They are also well adapted for use as vibration testers for machinery, mechanical devices, etc.

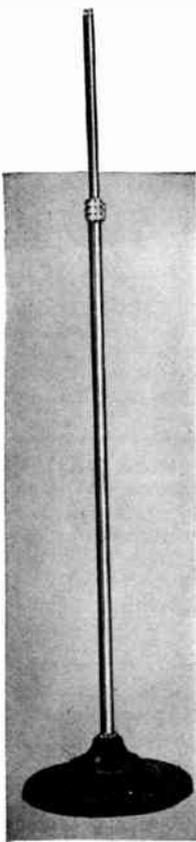

**List Price**  
 WC-20—With volume control and 15 ft. cable.....\$12.00  
 L-10—Less volume control, with 15 ft. cable..... 9.00

## MASCO DE LUXE MICROPHONE STANDS

All "MASCO" microphone stands are made of seamless extra heavy gauge brass tubing throughout. Assuring dependability and service, also eliminating rust and corrosion. These stands are heavily chrome plated to insure long and lasting wear.

The "EVER SILENT" friction clutch will never wear out due to the exclusive MASCO hardened fibre bushing, which is incorporated

into both the clutch and telescope sections of the 3/8" tube. Easily adjusted with one hand and stays "PUT".

MASCO'S NEW GRIP TIGHT, STAY-FAST LOCKING CLUTCH prevents disturbing adjustment noises when amplifier is working.

MASCO DE LUXE stands have standard 5/8" x 27 thread, for all types and makes of microphones. Standard height: 35" to 68".

Model No.	Base Finish	Tube Finish	Base Diameter	Height	Weight Lbs.	List Price

8	Black Crackle	Chromium	10"	35" to 68"	11 1/2	8.50
9	Chromium	Chromium	10"	35" to 68"	11 1/2	10.00
9A	Chromium	Chromium	10"	35" to 68"	18	12.50

NOTE: Models Nos. 8, 9 and 9A, have felt screwed in bumpers to prevent marring of floors.

## BANQUET STANDS

For your convenience in PA applications, MASCO offers the following types of banquet stands:

All tubing made of extra heavy gauge brass, heavily chrome plated. All models have felt screwed in bumpers to prevent marring of desk or table.

All models are available in chromium or black crackle finish, on both the adjustable or fixed type stands.

The adjustable models, Nos. 6 and 6A, use the "EVER-SILENT" clutch. The models Nos. 4 and 4A, use the same type of tubing and "EVER-SILENT" friction clutch as used on the floor stands. Bases may be had in gray crackle with contrasting red circle, or in all chrome.

W-106Q

Remote Unit

## W-100 Series

### Combination Masters and Remotes

The W-100 Series Systems are extremely versatile and are among the most popular Intercom equipment because of their ability to fill the greatest number of installation needs. These Systems provide instant 2-way communication between central or Master locations and a number of Remote locations—beginning with a 6-Station System to handle the popular demand for six or less stations—and also available in 12 and 18-station Systems designed to handle the expanded needs of larger installations. Masters may call any one or all other stations simultaneously. On single master installations remotes may call the one master but cannot talk to each other. On multiple master installations, remotes cannot originate a call. Compact Master station is beautifully housed in a streamlined cabinet of choice woods; Remote station is equally attractive. (To provide for complete privacy of conversation, models are also available with earphone attachment.)

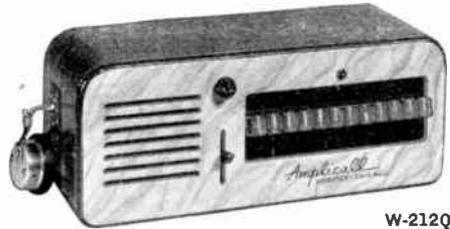

M-318

## W-300 Series—Combined Intercom & Paging

Here is a System of great versatility and considerable power in which the central Master station can not only carry on a two-way conversation with each Remote station in the system, but can also page independently over any one remote station or over all Remote stations simultaneously. Remote stations can originate calls to Master. Maximum facilities of the W-300 System are for 18 Remote stations. Maximum power is 25 watts. Accurate station selection is accomplished by new type push-button selector switches. Master station is of beautiful, compact design; paging stations are metal-cased; Remote stations are of wood. The flexibility of the W-300 System makes it ideal for army barracks, rifle ranges, and similar military application as well as for wartime industrial use. Offers instant location of personnel through the "all call" paging feature.

**PRICES AND  
DISCOUNTS QUOTED  
ON REQUEST**

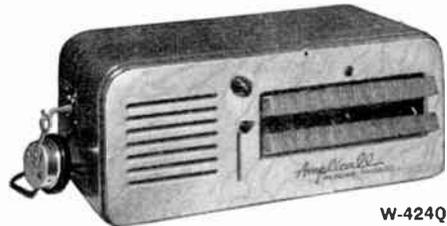

There is a Rauland-Webster AMPLICALL Intercom System for every type of installation. AMPLICALL speeds up office and plant routine—saves time, steps, and money—plays a vital role in the war effort. Write for complete catalog giving full details. (See other side of page for information covering the complete line of Webster-Rauland Amplifiers, Sound Systems, Factory Paging units, Power Stages, etc.)

W-212Q

## W-200 Series—All-Master Systems

The W-200 Series, recognized as one of the most universal and advantageous of all Intercom Systems, consists entirely of Master stations. This Series permits every station of the system to call and converse at will with every other station. All conversations are absolutely private—there is no cross-talk or eavesdropping possible. Each Master has a 3-position "talk-listen" switch: depress to talk; returns automatically to center position for listening; raise to "up" position when carrying on long conversation or dictation, or when using earphone. When earphone is used, it is not necessary to operate "talk-listen" switch; conversation is carried on same as on a telephone instrument. The W-200 Series is available in two models—Systems for 12 or for 24 stations. Units are fashioned of beautiful two-toned walnut and birch in modern design.

W-424Q

## W-400 Series All Combination Hi-Power Systems

Here is the very latest in deluxe Intercom equipment. Master stations can be combined with Remote stations in practically any combination; all conversations between Masters are absolutely private; Masters can listen in on Remote stations; Remote stations are able to originate a call to as many as six Master stations. New features include: two volume controls for both incoming and outgoing volume; individual locking type, finger-tip push-buttons selectors; 3-position "talk-listen" switch, etc. There can be no eavesdropping or cross-talk on Masters; multiple Master conversations are absolutely private. Models are also available with earphone attachment for extra privacy. Compact station units are streamlined modern, in two-tone birch and walnut. W-400 Series Systems are available in two models—for 12 or for 24 stations.

INDUSTRIAL USES**

## **RAULAND - WEBSTER "TAILORED - TO - FIT" SOUND HELPS SPEED AMERICA'S WAR EFFORT**

840 Watt  
Installation

Typical of Rauland-Webster Sound installations designed for war industry, is the 840 watt rack and panel Sound Unit (illustrated at left) built for a new government ordnance plant. This giant RAULAND System covers 30 square miles, and is used primarily for instant paging, for direction, and for emergency announcements.

Rauland-Webster Sound helps boost the output of wartime industries by providing instant communication; by preventing production tie-ups; by speeding the movement of materials; by protecting plants, providing instant warning against air-raids, fire, and sabotage; by improving morale with the provision of music during lunch and fatigue periods, etc.

Rauland-Webster will build "tailored-to-fit" Sound Equipment (on priority ratings available to industry) to meet any special requirement. Write for full details.

### **New Deluxe Power Stages and Mixer Pre-Amplifier**

Also available for industrial and similar applications is a new line of super-fidelity rack type equipment. Illustrated above are several of these Power Stages combined in a short rack cabinet. Illustrated at top is the W-4205 "Super-Fidelity" Mixer—Pre-Amplifier for 4 microphones (high or low impedance) and 2 phonos. The new W-4260 Bi-Power 60 watt Power Stages are mounted directly below the Mixer. An unlimited number of these stages may be used with the W-4205 unit. Write for complete details describing Rauland-Webster Power Stages and Mixer-Pre-Amplifiers.

### **Mobile Amplifiers That Can "Take It"!**

Rauland-Webster offers a selection of superb Mobile Amplifiers designed for operation from 117 volts AC or from 6 volts DC. The W-841 Amplifier (illustrated) has a 30 watt output; has 3 microphone inputs; one phono input; mixer-fader control on all 4 inputs (remote mixing on mikes); separate bass and treble controls; phono motor, crystal pickup, etc. The W-821 Amplifier has 20 watts output; includes 2 microphone inputs; one phono input; mixer-fader

control on all three inputs; dual tone control; phono motor and crystal pickup.

### **There's a Rauland-Webster Amplifier for Every Need**

Write for our Catalog No. 141 for full details covering a most complete selection of quality Sound equipment. There is a Rauland-Webster Amplifier available for every industrial requirement (paging, recreation, emergency alarms, etc.), for use by our Armed Forces, for experimental or laboratory use, etc. Rauland-Webster Deluxe Amplifiers are available in power outputs ranging from 14 to 60 watts, and can be had in a wide range of complete Systems from low-power portable Systems to the famous new BI-POWER High-Power Systems. The finest of 1942 features are embodied in each Rauland-Webster Amplifier to meet the most exacting requirements of wartime industry and business. No matter what your Amplifier needs may be, write for complete details. Ask for Catalog No. 141.

Rauland-Webster also offers a fine selection of Dynamic, Velocity, and Crystal Microphones, as well as a wide variety of high-quality Sound accessories, designed and built to render the dependable service demanded by today's rigid requirements. Write for complete descriptive literature.

510 Series Master to Master

**"Tokfone"**

**Model 510—MASTER to MASTER  
SELECTIVE SYSTEM**

Use of Talk and Listen Switch Unnecessary

The Master System Model 510 has many new features to recommend it. Two-way private conversation between any two stations with a total selection of 10 stations is now possible. Every Master Station Model 510 is a veritable complete and private self-contained telephone switchboard! Just turn the selector switch to the station to which you wish to speak and you can carry on a private conversation. FIVE SEPARATE AND DISTINCT PRIVATE CONVERSATIONS CAN BE CARRIED ON SIMULTANEOUSLY.

The 510 System does not require the use of a "talk and listen" switch. Simply lift the phone to your ear and you can carry on a RUNNING CONVERSATION.

Master Station 510 comes complete with ear phone, selector switch, "on" and "off" switch, "talk and listen" switch, volume control. Cabinet of beautiful hand rubbed walnut. 50 feet of wire. **\$48.00**  
Complete

SW 3 W.re Remote

141 Remote

141 Master

**"Tokfone" Model 141  
BEAM POWER SYSTEM**

With 2 Watt Output. From 2 to 11 Stations with Selector Switch

Where efficient, economical and fast, direct two-way AMPLIFIED communication is desired between two or more persons of departments, this System is just the thing.

Model 141 TOKFONE Master station comes with selector switch, "on and off" switch, "talk and listen" switch, volume control, complete with one sub station and 50 feet of wire for **\$49.50**

The Model 141A illustrated may be used for extra stations, wherever needed. Each comes with 50 feet of wire. **\$10.00**  
Each

The Model 141-S and 141-SW is exactly the same as the Model 141 and 141-A except that it comes equipped with a special switch on the right hand side of the Master and a special switch on the sub station. The Master Station and one sub station and 50 feet of wire complete is only **\$53.00**

TOKFONE Remote SW Station is used where additional Remote stations are needed for any 3 wire SW systems. **\$11.50**

Model 140

**"Tokfone"  
WIRELESS  
SYSTEM**

Works on A.C. or D.C.—  
No Wiring Necessary

The Tokfone Wireless Model 140 provides two-way communication between any two points without the necessity of laying wires between the units to be used. This arrangement makes the "140" desirable where it is impractical to do wiring. For example it is ideal for use in the home between the sick room and the kitchen, from the nursery and the living room, etc. Extreme portability is its chief claim to fame. Just plug each station into the nearest electric baseboard outlet and it's ready for use.

Comes in beautiful walnut cabinet equipped with "on and off" switch, volume control, "talk and listen" switch, jewel pilot light. Per pair **\$69.50**

**"Tokfone"  
REMOTE  
SWITCH  
CONTROL**

Remote Switch Control

A highly practical, and efficient means of speaker control where the speakers are located on wall brackets, or mounted in some other position which is not easily accessible... up to distances of 15, 20 or 30 feet. Comes equipped with 6 feet of wire **\$7.50**

**"Tokfone" STORM-PROOF  
"MARINE MIDGET" P.M. SPEAKER**

This new horn of inverted reflex design offers an air column length of 15" thus giving a maximum ratio of power input to sound pressure output. Features wide range frequency response and fine reproduction of voice. Because of complete weather and mechanical protection, dependable operation can be expected with a driving rain beating directly into the bell opening.

Constructed of heavy gauge aluminum. Battleship grey enamel finish.

Adjustable steel mtg. bracket at no extra charge. The P.M. Speaker unit has a conservative power rating of 5 watts. Overall size of horn: Bell 10", over-all depth 8". Price **\$24.50**

**"Tokfone" TRUMPET**

The exclusive design of Tokfone Trumpets increases their strength and eliminates rain leakage at the seam where the 2 sections of the baffle are joined. The cone speaker is securely held in place with the same bolts that hold the baffle together. Extra mtg. bolts not needed.

Comes equipped with cadmium plated hardware and two mtg. loops for hanging. **6" SPEAKER, 15" bell opening, 10" length; overall length 15". All aluminum.**

Price **\$29.50**

**Add \$2.00 for 220 Volts for all Models.**

MODEL 142-EA

### THE IDEAL SYSTEM FOR HOTEL PAGING, HOSPITALS, DEPARTMENT STORES, FACTORIES, OFFICE SUITES, FOR DIRECT 2-WAY AMPLIFIED COMMUNICATION

### HERE'S A LOW PRICED TWO-WAY SYSTEM FOR EXECUTIVES, PROFESSIONALS & HOME USE

MASTER WITH 1 REMOTE AND 50 FEET OF WIRE  
TOKFONE, Jr. is an inexpensive but highly efficient two way communication system which can be used between any two remote points in an office, factory, or home.

TOKFONE, Jr. gives you instant personal contact between managers and their employees, between one department and another or from one room in the home to another.

TOKFONE, Jr. is attractive in appearance, simple to install and costs a trifle to operate. It is a thoroughly practical and proven product which will pay for itself over and over again in saving time, steps and anxiety.

TOKFONE, Jr. will be found indispensable for simplifying and speeding up office routine, interdepartmental contacts and will save the housewife many steps in keeping in touch with the kitchen, nursery, garage or other parts of the home. Complete ..... **\$27.50**

## "Tokfone" Jr. S-W

TOKFONE, Jr. SW is optional equipment. Its use permits calling the master station from the outlying station. The arrangement is such, however, that the switch on the remote station must be operated to permit person called to answer the call from the master station. It also keeps the remote station in quiet position, and the master station at all times can call the remote station.

This system complete with switch on remote station only, and 50 ft. of triple twisted wire **\$30.50**

#### COMPLETE WITH SELECTOR SWITCH

The most efficient, economical, and fastest means of holding direct, two way, amplified communication between two or more persons or departments. Complete 2-way system comprising one Model 142-EA, one Model 142-E and 50 feet of wire. Complete..... **\$49.50**

MODEL 142-EA and MODEL 142-E comprise a complete two way system. Additional sub-stations up to ten units can be added to the Tokfone system. This is the only communication system having this many stations; also on each sub-station 4 speakers may be connected in series parallel, giving you a total of forty direct stations which no other communication system affords. Master comes equipped with Earphone. Works on AC-DC current. Communication between master station and any remote station in which any remote station can call the master, and the master is the only one that can call all remote stations separately or altogether. **\$10.00**  
EXTRA STATIONS with 50 ft. of wire.....

## "Tokfone" Model 143 & 143-A

Is exactly the same as Model 142-EA—except that it does not come equipped with earphone. Model 143 and 143-A come complete with master sub station and 50 feet of wire..... **\$47.50**

## "Tokfone" Model 143-S — 143-SW

Is exactly the same as Model 143-143A except that it comes equipped with special switch on the right hand side of the Master and a special switch on the sub station, complete with master, sub station and 50 feet of wire..... **\$50.75**

## "Tokfone" Model 142-EA SW

Switches on both master and sub station. Is optional equipment and its use permits calling the master station from the outlying station. The arrangement is such, however, that the remote switch need not be operated to permit the person called to answer questions to the master station. It also keeps the remote station in a quiet position but the master station at all times can call the sub station. This system complete with switch on master and remote station and triple twisted wire **\$53.00**

### Every Home Needs the Protection of the Amazing

## "Talking Door"

SP-3 REMOTE

TALKING DOOR "MASTER"

BX-3 REMOTE

A modern convenience for every home which permits a two-way conversation to either the front or rear door from the kitchen or other convenient location. Keeps out undesirables such as promotion salesmen, solicitors, time wasters—even kidnapers. No need to "go to the door" and stand in the draft of an open door. Small initial cost, easy installation and low operating cost make

this a necessity in every home. Consumes no current except when in use. Comes complete with 1 station and 50 ft. of wire ready to install. May be had with either Model BX3 in black crackle finish for mounting outside of door or Model SP3 for mounting inside of door.

Talking Door with one Remote complete..... **\$24.95**

Additional units of BX3 or SP3 for another door **\$10.00**

# INTERCOMMUNICATION SYSTEM

## Model 743S Master and 743W Remote Unit

List Price \$69.50

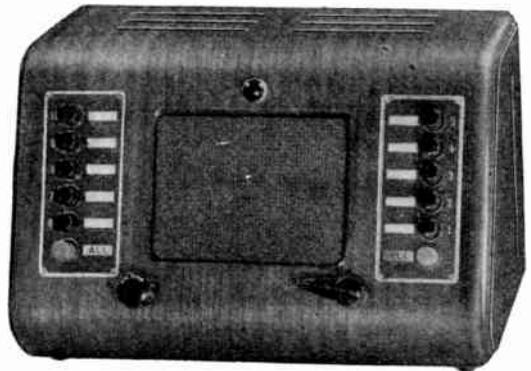

The TOKFONE DeLuxe represents the culmination of many years' experience in the manufacture and sale of Intercommunication Systems. It is by far the most efficient, most economical and the fastest means of carrying on direct, two-way, amplified intercommunication between two or more persons, offices or departments.

The basic system comprises one DeLuxe Master Unit (top) and one DeLuxe Remote Station (bottom), although Additional Remotes may be added (to the total of 10) to meet the specific requirements of any business.

The DeLuxe System utilizes PUSH BUTTON CONTROL. By simply pressing one button on either side you automatically connect the circuit between the Master and any one Remote. Two-way conversation is made possible by means of the talk-listen key.

The flexibility of this unit may be judged by the fact that when set up for its maximum communication possibilities, 10 Remote stations may be connected to the Master. These are arranged in two groups of 5 each. The Master may call one single station in either group or one station in each group at the same time or may call and converse with all 5 Remotes in either group or all 10 Remotes in both groups at one time. If desired, any Remote can call the Master at any time.

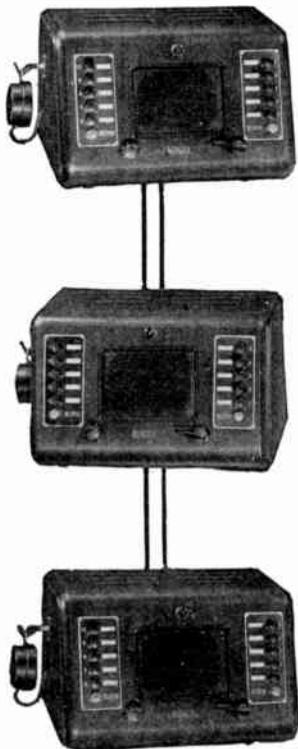

One of the exclusive features of the TOKFONE DeLuxe System is that it is designed so that it may be used with either a two-wire or three-wire cable.

### Flexibility

When used as a 3-wire system a switch at the side of the cabinet enables a Remote station to carry on a running conversation with the Master, once the circuit is completed. It also permits the Remote to remain silent when the circuit is not in use and prevents the Master from listening to trivial or non-pertinent conversations at the Remote.

When a two-wire cable is used, both the Master and Remote stations always remain open so that a running conversation is possible at all times when the "all" button is depressed or in a closed position.

## INTERCOMMUNICATION Reaches New High With MASTER TO MASTER SYSTEM

### A Selective System Which Makes Use of Talk-and-Listen-Switch Unnecessary

The Master System Model 710 has many features to recommend it. Two-way private conversation between any two stations is now possible. Every Master Station in this system is a veritable and complete and private self-contained telephone switchboard! Just press in the button indicating which station you wish to speak to and you can carry on a private conversation. SIX SEPARATE AND DISTINCT PRIVATE CONVERSATIONS CAN BE CARRIED ON SIMULTANEOUSLY.

The 710 System does not require the use of a "talk and listen" key. Simply lift the phone to your EAR and you can carry on a RUNNING CONVERSATION. The only time "Talk Listen Key" is used by Master is when loud-speaker operation is desired.

Master Station 710 comes complete, with earphone, "on" and "off" switch, "talk and listen" switch, volume control and 12 push button selector. Cabinet of beautiful hand rubbed walnut, sloping front.

## SPLIT-SECOND SPEAKING COMMUNICATION — SPEEDS UP OFFICE AND PLANT ROUTINE — SAVES TIME, STEPS, MONEY

### LP-5 MASTER SELECTIVE

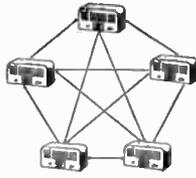

Consists of 1 Master Station working with up to a total of 5 Sub-stations. Master Station can talk privately to any of the Sub-stations or to all at one time. Each Sub-station can answer and call the Master, but Sub-stations cannot call each

other. Up to a total of 5 Sub-stations can be used with the Master. You can begin with a single Sub-station and Master, and then add any number of Sub-stations up to 5, as they are required. The Master enjoys complete privacy; Sub-stations cannot listen in on the Master; they can hear only when they are called. "Silent" feature shuts out all noises originating at Sub-stations. Operates with units as far as 2000 feet apart from each other. Voices carry clearly to a distance of from 25 to 50 feet from Sub-stations. Individuals at Sub-stations may answer when called without leaving work or touching units, at distances from 25 to 50 feet from Sub-stations. Volume level is controlled by Master. The LP-5 Master is housed in a handsome walnut cabinet, only 9 3/4" long x 5 3/4" deep x 8" high. Weight packed, 8 lbs. Sub-station is contained in an attractive metal cabinet of modern design, only 5 3/4" long x 3 3/4" deep x 7" high. Weight packed, 4 lbs. The LP-5 System operates universally on 110-115 volts, AC or DC. (Also available for use with up to 10 Sub-stations.)

### LP-5 LIST PRICES

### LP-100 SUPER-SELECTIVE

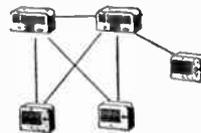

System is made up exclusively of Master Stations up to 5 in number. Permits two complete 2-way conversations to be maintained simultaneously, without cross-talk, or interference. Any one Master can talk to any other Master at will with absolute privacy. Masters may call one another regardless of whether station being called has power "on" or not. Up to a total of 5 Master Stations may be used. You can begin with 2 Masters and then add other units up to a total of 5, as required. Complete privacy of operations is assured by the LP-100. An exclusive advantage is the "Silent" feature which assures 100% silence at every Master Station between conversations. The LP-100 operates with units as far as 2000 feet apart. Voice volume can be adjusted at each Master from a whisper to a loudness that can be heard at 25 to 50 feet from the unit. Master Stations are fashioned of choice walnut woods, finished beautifully both front and back, and compact in design; only 9 3/4" long x 5 3/4" deep x 8" high. Weight packed, 8 lbs. The LP-100 System will operate universally on 110-115 volts, AC or DC. Each Master unit costs only 15c. per month to operate at average rates. (Also available for use with up to 10 Masters.)

### LP-100 LIST PRICES

Model LP-100—Master Station Super-Selective Unit for 5-Station use, complete with tubes and instructions. List Price ..... \$39.75  
 Model LP-110—Master Station Super-Selective Unit, for 10-Station use, complete with tubes and instructions. List Price ..... \$44.75

 No. 6655 Connecting Cable—The proper cable (11 conductor) for inter-connecting LP-110 Master Units. List Price per 10 feet ..... \$2.20

### LP-65 COMBINATION MASTER

Any Master in the System can talk at will to any of up to 4 other Stations, either Master or Sub-station type, or both intermixed. Sub-stations cannot listen in on the Masters except when called by a

Master. Masters may talk to each other or to Sub-stations at will, but Sub-stations do not originate calls. Up to a total of 5 mixed units (Master or Sub-station types) may be used. You can begin with 2 Stations (at least one must be a Master) and then add units as required, up to a total of 5. The LP-65 will operate effectively even when units are as far as 2000 feet apart. Incoming voice volume is adjustable at each Master unit from a whisper to a loudness that can be heard at 25 to 50 feet away from the unit. Individual being called may reply without leaving work even if he is 25 to 50 feet away from the unit. Master Stations are beautifully built of choice walnut woods. Masters measure only 9 3/4" long x 3 3/4" deep x 7" high. Weight packed, 8 lbs. The LP-65 System will operate universally on 110-115 volts, AC or DC. System can be operated for an entire month for less than 15c. Sub-stations consume no electricity at all.

### LP-65 LIST PRICES

### KR-40 MASTER SELECTIVE

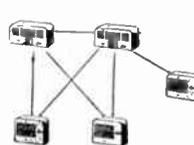

Consists of 1 Master Station working with up to a total of 10 Sub-stations. Affords private 2-way communication between Master and any of the Sub-stations as well as simultaneous address from Master to all Sub-station units. Sub-stations can answer and call the Master, but cannot call one another (Privacy earphone optional). Up to a total of 10 Sub-stations may be used with the Master. You can begin with a single Sub-station and a Master, and then add any number of Sub-stations up to a total of 10. System will operate with units as far as 2000 feet apart from each other. Voices carry to a distance of from 25 to 50 feet from the Sub-station location. Individuals at Sub-stations may answer when called without leaving their work and without touching the unit, from as far away as 25 to 50 feet. "Silent Feature" shuts out noises originating at Sub-stations—yet permits Sub-stations to originate call to Master Station. Volume level is controlled by Master. The Master is housed in a streamlined compact walnut cabinet, only 12" long x 6 1/2" high x 5 5/8" deep. Weight packed, 10 lbs. Sub-station (small cabinet) is only 7 1/2" long x 3 3/4" deep x 6 1/8" high. Weight packed, 4 lbs. The KR-40 System operates on 110-115 volts, AC or DC. Complete System operates for an entire month for less than 15c.

### KS-60 SUPER SELECTIVE

Consists of Master Stations only, up to 10 in number. Permits five 2-way private conversations to be held simultaneously without interference or cross-talk. Masters can call one another regardless of whether station being called has power "on" or not. Up to a total of 10 Master Stations may be employed. You can begin with 2 Masters and then add units up to a total of 10, as required. Complete privacy of communication is assured by the KS-60 System. (Privacy earphone optional—when used, system works like a telephone without use of "talk-listen" switch.) "Silent Feature" assures 100% silence at every Master Station between conversations. The KS-60 operates with undiminished power with units as far as 3000 feet away from one another. The volume may be adjusted at each Master from a whisper to a loudness that can be heard at 25 to 50 feet from the unit. The KS-60 is amazingly economical—each unit costs less than 15c per month to run! KS-60 units (large cabinet above) are luxuriously fashioned of choice walnut woods. Compact in size (only 12" long x 6 1/2" high x 5 5/8" deep). Weight packed, 10 lbs. The KS-60 System will operate universally on 110-115 volts AC or DC.

### KC-80 COMBINATION MASTER

Any Master in this System can talk at will to up to 10 other Stations, either Master or Sub-station types, or both. Masters may listen in at will to any of the other units in the System. The Sub-stations cannot listen in on the Masters except when they are called by the Masters themselves. Masters may talk to each other or to Sub-stations at will, but Sub-stations do not originate calls. (Privacy earphone optional). Up to a total of 10 mixed units (Master or Sub-station types) may be used. You can begin with 2 Stations (at least one must be a Master) and then add units as required, up to a total of 10. Operates with units as far as 2000 feet away from one another. Volume is adjustable at each Master from a whisper to a loudness that can be heard at 25 to 50 feet away from unit. Individual being called may reply without leaving his work even if he is 25 to 50 feet away from his station unit. The KC-80 Master cabinet units are built of choice walnut woods; measure only 12" x 6 1/2" x 5 5/8"; weight packed, 10 lbs.; the Sub-stations 7 1/2" x 3 3/4" x 6 1/8"; weight packed, 4 lbs. The KC-80 Master Station can be operated for an entire month for less than 15c! Sub-stations consume no electricity. System operates on 110-115 volts, AC or DC.

#### KR-40 LIST PRICES

Model KR-40. De Luxe Master Station Selective Unit as illustrated (but less earphone) complete with tubes, junction box and instructions.

List Price ..... \$59.00

### MODEL C-410 MASTER SELECTIVE SYSTEMS

The "Chief" Master Selective System (illustrated above) made up of a master station working with up to a total of ten stations affords instant private two-way communication between master and any of the sub-stations as well as simultaneous address from master to all sub-station units by the use of one button. Sub-stations can answer and call the master but can not call one another. Privacy earphone which automatically shuts off speaker is optional. You can begin with a single sub-station and master and then add any number of sub-stations up to a total of ten. Volume is adjusted at each master station from a whisper to full room volume. Built-in automatic "Silent Feature" shuts out noises originating at sub-stations yet permits sub-station to originate call to master station. As an added feature the unit is provided with paging facilities if needed. The "Power" button is depressed when the auxiliary amplifier HP-16 is used to overcome extremely high noise levels. Thus the call can be heard above the noise of machinery, etc. The C-410 System operates on 110-115 volts AC-DC.

### MODEL C-610 SUPER SELECTIVE SYSTEMS

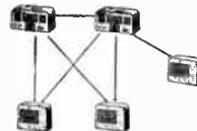

The "Chief" Model C-610 utilizes only master stations up to ten in number. With the use of the patented "Hold-A-Matic" push button action, not only may five private two-way conversations be held simultaneously but in addition a conference between any number of stations may be held without any danger of eavesdropping. All stations can call each other, and masters can call one another regardless if station being called has power on or not. You can begin with two masters and then add units up to a total of ten as required. Other features include "Power" and "Uni-Trans," the latter being especially effective for one way transmission of speech. When privacy earphone is used, system works like a telephone without the use of the "Talk-Listen Switch." Built in "Silent Feature" assures 100 per cent silence at every master between conversations. Model C-610 operates with undiminished power with units as far as 3000 feet away from each other. The volume may be adjusted at each master from a whisper to a loudness which can be heard at 25 to 50 feet from the unit. C-610 Units (large cabinet above) are luxuriously finished of choice walnut woods; size 15" L. x 6 1/2" H. x 7" D. C-610 System will operate universally on 110-115 volts AC-DC.

### C-712 COMBINATION SYSTEM

The Talk - A - Phone "Chief" Model C-712 combines the use of Master Stations and Sub-stations in combination in the same system. You can begin with 2 Stations (at least one must be a Master) and add either Masters or Sub-stations up to a total of 12 units. Master Stations may call any other units in the system and receive answers. Sub-stations can receive calls from Master and answer, but cannot originate calls to Masters or speak to other Sub-stations. Volume is adjusted at each Master Station by continuously variable volume control, easily accessible, on the front of the unit. Individual being called at either Master or Sub-station may reply without leaving his work even if he is 25 to 50 feet away from unit. Privacy earphone is optional on Master Station of this system. The C-712 operates on 110-115 volts AC-DC.

# Talk-A-Phone *Super* CHIEF

**THE FINEST IN INTERCOMMUNICATION — FEATURES INCLUDE CONFERENCE TRAFFIC CONTROL—BUSY SIGNAL LIGHT—UNI-TRANS SYSTEMS**

## MODEL CS-1410 MASTER SELECTIVE SYSTEMS

The "Super Chief" Model CS-1410 has incorporated in its design innovations never before used in the master selective type inter-communication system. This system using one master and up to a total of ten staff stations affords

communication between the master and any of the staff stations. Built into this unit are the now famous Talk-A-Phone "Call Waiting" and "Busy Signal" lights. When the master is talking to a staff station and another staff station wishes to call the master, as soon as the second station attempts to originate the call a red light goes on his station indicating that the master is busy. At the same time an amber light appears at the master station indicating that another staff station is trying to reach him. As soon as the conversation is completed, the lights go off and the new conversation may proceed. Other features include the "Power" button used with the auxiliary amplifier IIP-16 to overcome extremely high noise levels and automatic "Silent Feature." Units have extremely high power, undistorted five watts—more than enough for any normal operation. System operates on 110 volts AC, 60 cycles.

### MODEL CS-1410 LIST PRICES

Model CS-1410—"Super Chief" Master Station for ten station use, complete with tubes, junction box and instructions. List Price.....\$120.00  
 Model CS-1410-C—"Super Chief" Master Station, same as above but with privacy earphone attachment.  
 List Price.....\$135.00

 No. 8866—Interconnecting Cable—The proper cable (5 conductor) for interconnecting Model CS-1410 Master Stations and staff stations.  
 List Price per 10 feet.....\$1.45

## MODEL CS-1010 SUPER SELECTIVE SYSTEMS

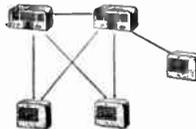

The Model CS-1010 "Super Chief" is made up exclusively of master stations. Any number up to ten may be had in the system. This system permits five two-way conversations to be held simultaneously without interference or

cross-talk. You can begin with two masters and then add up to ten as required. In addition by the use of "Traffic Conference Control" any number of stations may hold private conferences without interruption or eavesdropping from stations outside of the conference group. If one of the conference group is called by an outside station, he is signalled by a light so that he knows a call is waiting. At the same time the "Busy Signal Light" on the caller's unit is illuminated so that he knows that the line he is trying to reach is busy. An outstanding feature is "Uni-Trans" control which enables you to talk to one or as many as you want without interruption, a splendid feature when dictating to one or to a group. When earphone is used, system works like a telephone without use of "Talk-Listen Switch." Styled by industrial designers, cabinets are beautiful ultra-modern and of harmonious matched wood design size 15" L. x 6 1/4" H. x 7" D. System operates on 110 volts, AC, 60 cycles.

### MODEL CS-1010 LIST PRICES

Model CS-1010—"Super Chief" Master Station for ten stations, complete with tubes, junction box and instructions. List Price.....\$120.00  
 Model CS-1010-C—"Super Chief Master Station, same as above but with privacy earphone attachment.  
 List Price.....\$135.00  
 No. 2142—Interconnecting Cable—The proper cable (21 conductor) for interconnecting Model CS-1010 "Super Chief" Master Stations.  
 List Price per 10 feet.....\$5.00

## MODEL CS-1910 COMBINATION SYSTEMS

The "Super Chief" Model CS-1910 offers supreme versatility never before achieved in inter-communication equipment. The CS-1910 combines two systems into one.

By the mere flick of a button you have your choice of either an All Master system or a Master Selective system. In addition the unit is also equipped with "Busy Signal" and "Call Waiting" lights. "Uni-Trans" for use between Masters is also built into this system. The volume of incoming voice at both Masters and Staff Stations may be adjusted by a continuously variable volume control easily accessible on the front of the unit. Privacy earphone on Master Stations is optional in this system. Operation is on 110 volts AC, 60 cycles.

"CHIEF" MODEL

## KC-87 DE LUXE MODEL

The KC-87 DeLuxe System uses Master Stations, Staff Stations or Sub-stations in combination in the same system. Master Stations may communicate with each other in perfect privacy and can call Staff Stations and Sub-stations and receive an answer from them. Staff Stations can originate calls to Masters but cannot call other Staff Stations or Sub-stations. Sub-stations can receive calls from Master Stations and answer. Privacy earphone on the Master Station is optional. You can begin with two units (at least one must be a Master) and add as many as required up to a total of ten. System operates with units as far as 3000 ft. away from one another. Volume is adjusted at each Master from a whisper to a loudness that can be heard from 25 to 50 ft. away from the unit. Model KC-87 Master Stations as well as Staff Stations are beautifully designed and built of choice walnut woods. Model UC-82 Sub-stations and UC-201 Staff Stations are also available in metal cabinets at no additional charge. Master Stations weigh packed 10 lbs. Staff or Sub-stations 5 lbs. KC-87 units are furnished complete with tubes, interconnections, six foot cable, and junction box, and operates on 110-115 volts AC-DC.

## C-810 "CHIEF" MODEL

The Talk-A-Phone "Chief" Model C-810 combines the use of either Master Stations, Staff Stations, or Sub-Stations in the same system. Master Stations may carry on a number of two-way conversations or have a conference in complete privacy. Staff Stations or Sub-stations cannot eavesdrop or interrupt Master Stations. Staff Stations may originate calls to Masters but cannot talk to other Staff Stations or Sub-stations. Sub-stations may receive calls from Masters and answer but cannot talk to other sub-stations or Staff Stations. Privacy earphone is also optional on this model. You can begin with two stations (at least one must be a Master) and add units as required up to a total of ten. Outstanding features include optional "Power" and "Uni-trans" control described previously. Volume is adjusted at each Master Station by a continuously variable control easily accessible on the front of the unit. The system operates on 110-115 volts AC-DC.

# Talk-A-Phone X-TRA POWER

HP-16 POWER BOOSTER

The Talk-A-Phone Model HP-16 is a Booster Amplifier of advanced design delivering 15 watts of "VOICE RANGE" Power. When connected to Models C-410, C-610, C-810 or CS-1410, the HP-16 becomes an integral part of these systems so that not only do you have the regular communication advantages but in addition paging facilities, as well as a supplementary 15-watt inter-com system. Operation is simple. By merely pressing the button marked "Power" (in addition to the regular operation of the system) you immediately have a 15-watt inter-communication system. Voice of Master is heard at regular room volume and is controlled by the Master Station. The Booster is equipped with "on-off" switch, "Pilot Light Indicator" and "Variable Volume Control" which controls outgoing volume up to 15 watts. Operation is on 115 volts, AC, 60 cycles. Units are furnished complete.

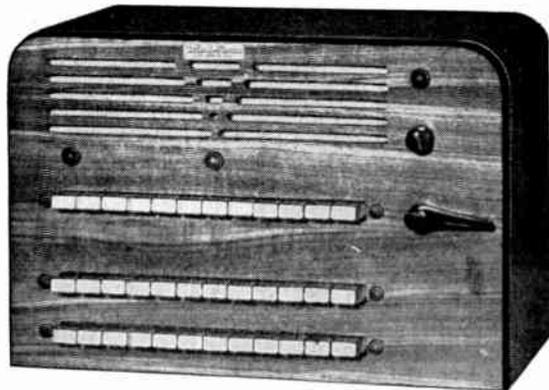

HP-1 SPEAKER

The HP-1 Auxiliary Speaker—Is ideal for paging and inter-communication purposes and has a capacity of 5 watts. Units are in durable metal cabinets.

The HP-2.—Same as above but for up to 15 watts capacity.

**No. 21 FIFTY WATT AMPLIFIER**

**Brief Specifications**

**Overall Size:** Width, 16½"; Depth, 14"; Height, 10".  
**Weight:** 41 lbs. Net, 50 lbs. Packed for Shipment.  
**Tubes Required:** 3 No. 6SJ7, 2 No. 6N7, 1 No. 6J5, 4 No. 6L6G, 2 No. 6SF5, 2 No. 5U4G.

**Power Supply:** 105-125 Volts, 50-60 Cycles.  
**Inputs:** 3 Microphone, 1 Phonograph, All High Impedance.  
**Controls:** 3 Microphone, 1 Phonograph, 1 Bass Booster and Bass Suppressor, 1 Treble Suppressor, 1 ON-OFF Switch, 2 Master Volume Controls.

No. 21 Amplifier

**Power Output:** 50 Watts at 117 Volt Line; 25 Watts on Each of the Dual Channels.

**Power Gain:** 117 db from Microphone Inputs, 87 db from Phonograph Input.

**Output Impedance:** Two Separate Output Transformers Each Tapped at 4, 8, 30, 60, 125, 250, and 500 Ohms.

**Useful Frequency Range:** 40 to 10,000 Cycles.

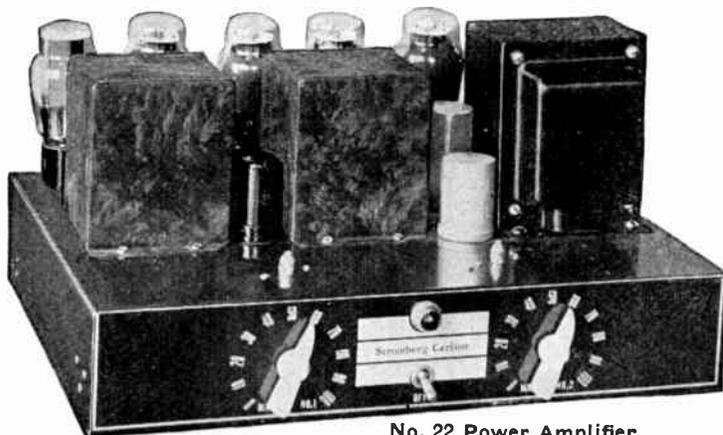

**Accessory:** 33584 Remote Mixer.  
**Finish:** Van Dyke Brown.

Send for Engineering Data Sheet SED 1.7 for Complete Specifications.

**STROMBERG-CARLSON**

Straight-Line Communication Equipment includes Microphones, Speakers and Accessories for Complete Installations.

**No. 22 POWER AMPLIFIER**

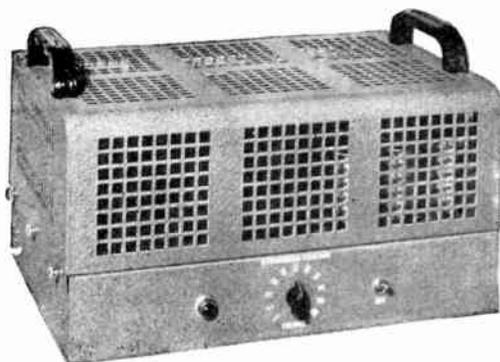

No. 22 Power Amplifier

**Brief Specifications**

**Overall Size:** Width, 16½"; Depth, 14"; Height, 8½".  
**Weight:** 37 lbs. Net; 45 lbs. Packed for Shipment.  
**Tubes Required:** 2 No. 6SF5, 4 No. 6L6G, 2 No. 6N7, 2 No. 5U4G.  
**Power Supply:** 105-125 Volts, 50-60 Cycles.  
**Inputs:** 1 High Impedance Input with Double Input Jack Arrangement.  
**Controls:** Two Master Volume Controls.  
**Power Output:** 50 Watts at 117 Volt Line; 25 Watts on Each Channel.

**Power Gain:** 93 db from Input.  
**Output Impedance:** Two Separate Output Transformers Each Tapped at 4, 8, 30, 60, 125, 250, and 500 Ohms.  
**Useful Frequency Range:** 40 to 10,000 Cycles.  
**Finish:** Van Dyke Brown.  
**Accessories:** 35508 Top Cover with Handles. 35224 Connector Cord, Used When Driving No. 22 Amplifier from No. 21.  
 Send for Engineering Data Sheet SED 1.8 for Detailed Specifications.

**No. 25 POWER AMPLIFIER EQUIPPED WITH  
 No. 37273 COVER**

No. 25 Amplifier  
 Equipped with No. 37273 Cover.

**Brief Specifications**

**Size:** Chassis Base 16" x 3" x 12½". Height with Cover: 10".  
**Weight:** 35 lbs. Net, 50 lbs. Packed for Shipment.  
**Tubes Required:** 2-6SJ7, 4-6L6G, 2-5U4G.  
**Power Supply:** 105 to 125 Volts, 50-60 Cycles.  
**Audio Power Output:** 45 Watts at a Line Voltage of 117 Volts, 60 Cycles.  
**Input Transformer:** Hum Bucking Coil Construction with Tri-alloy Shielding, Impregnated and Potted. Primary 10,000 Ohms, Center-tapped at 2,500 Ohms. Designed to Operate from 500 Ohm Line at an Input Voltage of 1.73 Volts.  
**Power Gain:** 51 db Based on 10,000 Ohm Input Impedance and 500 Ohm Output Impedance.  
**Fidelity:** Not More Than 3 db Variation from 75 to 10,000 Cycles.  
**Hum and Noise Level:** 60 db Below 45 Watts Output.  
**Output Transformer:** Tapped at 4, 8, 30, 60, 125, 250 and 500 Ohms.  
**Controls:** Continuously Variable Volume Control; Separate ON-OFF Switch.  
**Finish:** Slate Gray Ripple Enamel Over Copper Plated Steel Chassis.  
 Send for Engineering Data Sheet SED 1.1 for Detailed Specifications.

**MODEL 500 PRE-AMPLIFIER MOUNTED ON  
 No. 35690 PANEL ASSEMBLY**

**Brief Specifications**

**Overall Size:** Width, 13½";  
 Depth, 9"; Height, 10¼".

**Weight:** Net 26 lbs. Packed  
 for Shipment 35 lbs.

**Tubes Required:** 2 No. 6SJ7;  
 1 No. 6N7; 2 No. 6F6G; 1  
 No. 5U4G.

**Power Supply:** 105-125 Volts,  
 50-60 Cycles.

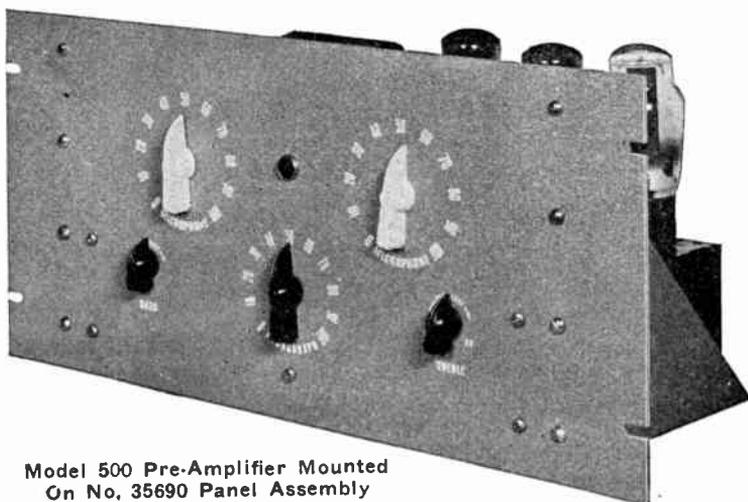

**Inputs:** Two Microphone, One  
 Phonograph, All High Impedance.

**Controls:** 2 Microphone, 1 Pho-  
 nograph, 1 Bass Suppressor,  
 1 Treble Suppressor with ON-  
 OFF Switch.

**Output Impedance:** 500 Ohms.

**Power Gain:** 75 db from Microphone Inputs;  
 40 db from Phonograph Input.

**Output Impedance:** 500 Ohms.

Model 500 Pre-Amplifier Mounted  
 On No. 35690 Panel Assembly

**Useful Frequency Range:** 40 to 10,000 Cycles.

**Finish:** Van Dyke Brown.

Send for Engineering Data Sheet SED 1.4  
 for Detailed Specifications.

**MODEL 20P PORTABLE SYSTEM**

**Brief Specifications**

**Size:** 20½" H Case Only, 24" H Over Handle, 16"  
 W, 14"D.

**Amplifier:** Equipped with No. 20 Amplifier.

**Speakers:** Two Heavy Duty 12" P. M. Cone  
 Speakers.

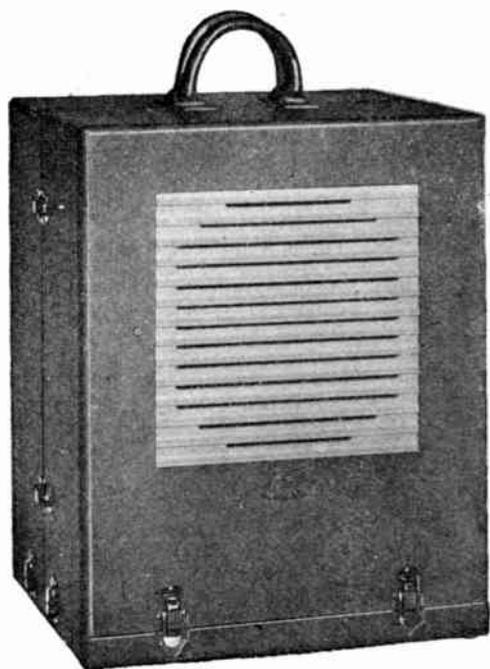

**Cords:** Two Super Service 25 ft. Speaker Cords.

**Catches:** Rattle-Proof Type.

**Weight:** Less Amplifier 25 lbs. Packed for Ship-  
 ment 30 lbs.

**Finish:** Durable Dark Blue Fabrikoid; Sand Colored  
 Louvers.

**No. 31 DUAL OUTPUT POWER AMPLIFIER**

No. 31 Amplifier

**Brief Specifications**

**Size:** Length 16½", Depth 14", Height 8½".  
**Weight:** 37 lbs. Net, 45 lbs. Packed for Shipment.

**Tubes Required:** 2-6J5, 2-6N7, 4-6L6G, 2-5U4G.

**Power Supply:** 105-125 Volts 50-60 Cycles.

**Audio Power:** 45 Watts at 117 Volts.

**Input:** 10,000 Ohms Center Tapped.

**Power Gain:** 75 db. Based on 10,000 Input Impedance, 4 Ohm Output Impedance.

**Hum Level (at Max. Gain):** Combined Noise

and Hum Level Approx. 68 db. Below Full Rated Output.

**Useful Frequency Ranges:** 40 to 10,000 Cycles.

**Output Impedance:** Two Separate Output Transformers Each Tapped at 4, 8, 30, 60, 125, 250, and 500 Ohms.

**Controls:** Two Master Volume Controls. Separate A.C. Switch.

**Accessory:** 35508 Top Cover with Handles.

**Finish:** Van Dyke Brown.

**No. 30 MARINE AMPLIFIER**

**Brief Specifications**

**Size:** 18¼" L, 12¾" W, 10" H.

**Weight:** 37 lbs. Net; 45 lbs. Packed for Shipment.

**Finish:** Base, Cadmium Plated; Choke and Transformer Containers, Black Ripple.

**Potted and Impregnated:** Transformer and Choke.

**Wiring:** Fire and Moisture Resistance Insulation.

**Controls:** One Input Volume Control — Continuously Variable.

**Terminals:** Screw Type.

**Relay:** Provision for Plate Supply Relay, Terminals Provided on Terminal Strip.

**Hum Level:** At Least 46 db Below Maximum Power Output.

**Frequency Response:** Within 3 db from 75 to 10,000 Cycles.

**Tubes Required:** 4-6SJ7, 4-6L6G, 2-5U4G, Tube Clamps on 6L6G and 5U4G Sockets.

**Pilot Lamp:** 1 No. 29956.

**Power Supply:** 105-125 Volts, 60 Cycles at 125 Volts.

**Power Consumed:** 250 Watts at 125 Volts.

**Power Gain:** 105 db Based on 30 Ohm Input Impedance.

**Power Output:** 50 Watts at a Line Voltage of 117 Volts, 60 Cycle.

**Output Impedance Taps:** 4, 8, 30, 60, 125, 250, and 500 Ohms.

**Input Transformer:** 30 Ohms Primary, Hum Bucking Coil Construction with Tri-alloy Shielding, Impregnated and Potted.

Send for Engineering Data Sheet SED 1.2 for Detailed Specifications.

# MECK RADIOS

JOHN MECK INDUSTRIES, Inc. • PLYMOUTH, INDIANA, U. S. A.

## MECK RADIO-PHONOGRAPH COMBINATION MODEL 5-TC-3

5 Tube Super.

TUNING RANGE: 538—1750 KCs.

CABINET: Portable type covered with genuine calfskin leather—16" wide, 11" high, 18" deep.

PHONOGRAPH: Two-Post Automatic Record Changer. Changes twelve 10" or ten 12" records.

PLUS FEATURE: Exclusive MECK Chassis makes it possible to reduce the height to only 11 inches.

## MECK PHONOGRAPH The Palm Springs Model P-25

3 Tube Amplifier. 6" Oval Dynamic Speaker.

PHONOGRAPH: Two-Post Automatic Record Changer. Changes twelve 10" or ten 12" records.

CABINET: Portable type covered with genuine calfskin leather—16" wide, 11" high, 18" deep.

## MECK RADIO-PHONOGRAPH CONSOLE COMBINATION MODEL 7-CFP-70

7 Tube AM-FM Super.

TUNING RANGE:

538—1750 KCs standard broadcast.

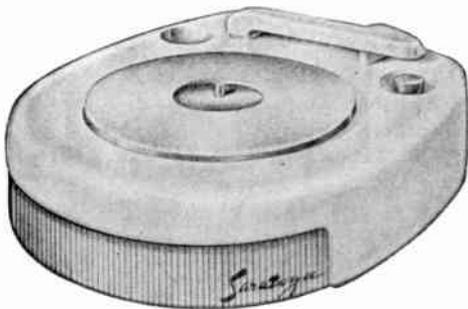

42-50 Megohms Frequency Modulation broadcast.

CABINET: Selected and matched sliced cut and stump walnut—42" high, 28" wide, 18" deep.

"HIDE-A-WAY" PHONOGRAPH: Two-Post Automatic Record Changer. Changes twelve 10" or ten 12" records.

Face to Face Reception

## MECK PHONOGRAPH The Saratoga Model P-21

3 Tube Amplifier.

4" Electro-Dynamic Speaker.

Self-starting constant speed phonograph motor. New low pressure crystal pick-up. Plays 10" or 12" records.

CABINET: Ivory plastic: 11" wide, 3" high, 15" deep.

Also available as a wireless record player, Model P-22, and as a record player attachment, Model P-23.

TABLE MODELS • PORTABLES • CONSOLE COMBINATIONS • PHONOGRAPHS

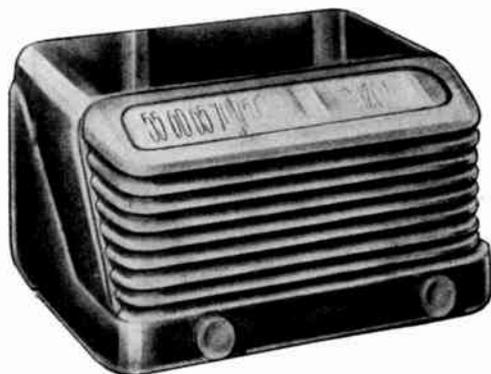

# MECK RADIOS

JOHN MECK INDUSTRIES, Inc. • PLYMOUTH, INDIANA, U. S. A.

## MECK RADIO MODEL 4-T-40

4 Tube AC-DC Super.  
Dynamic Colortone Speaker.  
Plastic cabinet of modernistic design. Size, 6" high, 3½" wide, 8" deep.  
Covers full standard broadcast band.  
Available in walnut and white.

## MECK RADIO MODEL 5-T-41

5 Tube AC-DC.  
6" Oval Speaker.  
CABINET: Plastic—6" high, 10" wide, 6" deep.  
TUNING RANGE: 538—1750 KCs. Covers full standard broadcast band.  
Available in walnut and white.  
This five tube chassis also available as follows:  
Model 5-T-42, Wood Table Model.  
Model 5-T-43, Wood Table Model.  
Model 5-T-44, Leatherette Table Model.

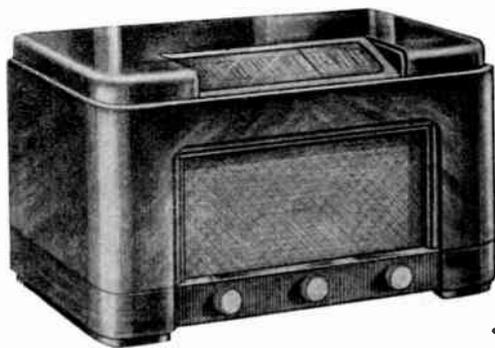

## MECK RADIO-PHONOGRAPH COMBINATION MODEL 5-TC-1

5 Tube Super.  
TUNING RANGE: 538—1750 KCs.  
6" Oval Dynamic Colortone Speaker.  
Slide Rule full vision dial. Built-in antenna.  
CABINET: Walnut—16" wide, 11" high, 16" deep.  
PHONOGRAPH: Two-Post Automatic Record Changer.  
Changes twelve 10" or ten 12" records.  
PLUS FEATURE: Exclusive MECK design chassis makes it possible to reduce the height to only 11 inches.  
Also available as a single record player combination.  
Model 5-TC-2.

## MECK PHONOGRAPH—The Bar Harbor MODEL P-24

3 Tube Amplifier. 6" Oval Dynamic Speaker.  
PHONOGRAPH: Two-Post Automatic Record Changer.  
Plays twelve 10" or ten 12" records.  
CABINET: Handrubbed walnut—16" wide, 11" high, 16" deep.

## MECK RADIO MODEL 7-TF-45

7 Tube AM-FM Super.  
TUNING RANGE: 538—1750 KCs standard broadcast.  
42-50 Megohms Frequency Modulation broadcast.  
6" Oval speaker.  
CABINET: Walnut—9½" high, 14" wide, 8" deep.

# Meissner "Custom" Super Kits

## 12-TUBE CUSTOM SUPER RECEIVER KIT

The finest all-wave home receiver in the Meissner Kit line—uses twelve latest type tubes, every one performing a vital function and contributing to the unequalled overall performance of this peer of radio receivers!

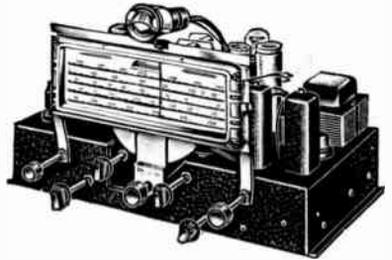

High-gain "television" type tubes are used in the RF section for maximum sensitivity and stability; two-stage I-F channel with electrically-variable band-expanding transformers. Separate bass and treble tone controls permit tonal modification to suit the most fastidious ear; inverse feedback in the output stage eliminates distortion; full 15 watts of distortionless audio energy available at the speaker!

Full frequency coverage between 540 kc and 42 mc in four bands plus an additional Longwave band covering 132 to 405 kc. Phono input jack permits

use of full audio system including tone and volume controls.

### COMPLETE KIT

Anyone can build the Meissner 12-tube "Custom" Super with one of these Complete Kits. Everything is furnished, except tubes and speaker, down to the last nut and bolt—includes hook-up wire and solder. The only tools required are a screwdriver, pliers and soldering iron. Detailed instructions supplied with each kit, including famous Meissner Pictorial Wiring Diagram. A good 12" dynamic speaker is recommended, having a 2000-ohm field and output transformer to match 6L6's in push-pull. Tubes required are: 2-6AB7 (1853), 1-6SA7, 2-6K7, 1-6H6, 2-6C5, 2-6L6, 1-5X4G and 1-6G5.

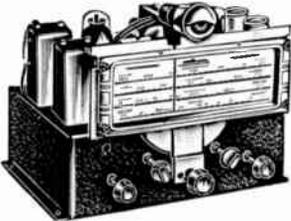

### "ESSENTIAL" KIT

In addition to the Complete Kits, Meissner also offers the Essential parts required to build this quality receiver at a considerable saving in cost. "Essential" Kit includes the punched chassis, pre-aligned RF Tuning Assembly, dial, all I-F Transformers, Selectivity Switch and other special parts with complete instructions for assembly and wiring. Detailed Parts List describes other parts required which are all readily obtainable from general stock. No. 12-1028—"Essential" Kit...List Price \$65.50

- No. 10-1156—12-tube "Custom" Super, Complete Kit less Tubes and Speaker; without panel and cabinet; shipping weight, 25 lbs.....List Price \$109.50
- No. 10-1166—12-tube "Custom" Super, Complete Kit less Tubes and Speaker; with panel and Cabinet; shipping weight, 43 lbs.....List Price \$121.00
- No. 11-8210—Front Panel for 12-tube "Custom", 19 1/4" x 10", black-crackle steel.....List Price \$3.85
- No. 11-8222—Steel Cabinet to match, 19 1/4" x 10" x 11 1/4", black-crackle finish.....List Price \$8.25

## 9-TUBE CUSTOM SUPER RECEIVER KIT

### "Essential" Kit

For those who have a supply of small parts on hand or who may wish to obtain them separately, this "Essential" Kit is available to provide all of the special Meissner parts required to build this excellent receiver. Contains completely punched steel chassis, pre-aligned RF Coil Assembly, dial, input and output I-F Transformers, and other special small parts with detailed assembly and wiring instructions, schematic and pictorial diagrams same as supplied with the Complete Kit. Detailed Parts List included. No. 12-1027—"Essential" Kit...List Price \$47.50

Second only in performance to the 12-tube "Custom" Super and designed to include most of the quality features of the larger receiver. A considerable reduction in cost has been made possible, however, by judicious use of dual-purpose tubes and simplification of general arrangement of parts. Makes a very excellent replacement chassis for those who have a fine cabinet that they wish to keep or may be used in special Meissner steel cabinet, professionally finished in black crystal lacquer. Everything has been included to obtain maximum possible performance from a receiver of this size! High-gain RF stage on all bands; the four-band pre-aligned RF Coil Assembly provides full coverage from 540 kc to 42 mc. Ferrocarril iron-core I-F stage provides maximum selectivity consistent with good tonal quality. Diode second detector with transformer-coupled push-pull output stage; inverse feedback eliminates distortion; 6V6G output tubes

provide full 8 1/2 watts audio energy to the speaker. Phono pick-up jack is provided at input of audio system.

### Easy to Build—Complete Kit

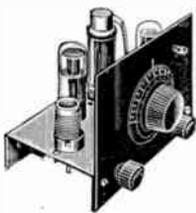

The construction of a complete receiver from one of these Complete Kits is extremely simple. The only parts not included are the tubes and speaker. A good 10" or 12" dynamic speaker should be obtained with a field resistance of 800 to 1250 ohms and output transformer to match 6V6's in push-pull. Tubes required are: 2-6AB7 (1853), 1-6SA7, 1-6K7, 1-6F8G, 2-6V6 or 6V6G, 1-5Y4G and 1-6G5. Detailed instructions with schematic and pictorial wiring diagrams are provided. The only tools required are a screwdriver, pliers and soldering iron; final alignment may be readily accomplished with standard service equipment.

- No. 10-1129—9-tube "Custom" Super, Complete Kit less Tubes and Speaker; without Panel and Cabinet; shipping weight, 22 lbs.....List Price \$83.75
- No. 10-1168—9-tube "Custom" Super, Complete Kit less Tubes and Speaker; with Panel and Cabinet; shipping weight, 38 lbs.....List Price \$94.50
- No. 11-8221—Front Panel for 9-tube "Custom", 19 1/4" x 10", black crystal lacquer.....List Price \$3.50
- No. 11-8222—Steel Cabinet to match, 19 1/4" x 10" x 11 1/4", black crystal lacquer.....List Price \$8.25

# ★ Student "Midget" Receiver Kits ★

## ★ BATTERY-OPERATED MODELS ★

## ★ AC-DC POWERED MODELS ★

These Meissner Student "Midget" Kits have been especially designed for use in classrooms where Radio is being taught. Not toys in any sense, but real radio receivers, just as carefully engineered as the large, multi-band Meissner Receivers. The One-Tube Receiver may be assembled by the Student or Experimenter and, after he has become thoroughly familiar with its operation, he can make a Two-Tube set out of it—simply by adding the parts included in the first "Add-On" kit. The use of the second "Add-On" Kit will convert the Two-Tube set to a Three-Tube receiver. Latest types of 1 1/2-volt battery operated tubes provide high performance with minimum battery drain. Each Kit supplied with plug-in coil to cover Broadcast Band, 200 to 545 meters; additional coils available to make it a real "all-wave" receiver. See listing below at right. All three models have a single large bakelite dial; Regeneration Control is provided on all three and a Volume Control is added when the Three-Tube set is built. All sets are designed for Headphone operation, although the Three-Tube set will operate a small magnetic or P-M dynamic speaker with excellent results.

Absolutely everything required for completion of the set is included. After it is all built it is only necessary to obtain a set of tubes and batteries and a pair of headphones and start listening! Detailed printed instructions are packed with each kit; Pictorial Wiring Diagrams show exactly where each part belongs and how it is connected. The only tools required are a screwdriver, pliers and a small soldering iron. All three sets use a single 1 1/2-volt "A" battery; the One-Tube set uses a single 45-volt "B" battery while the Two- and Three-Tube sets require two 45-volt "B" batteries and one 7 1/2 volt "C" battery. The One-Tube set uses a 1E4G tube; the Two-Tube set adds a 1C5G and the Three-Tube set uses an additional 1H5G tube.

### ★ BATTERY "MIDGET" KITS ★

- No. 10-1161—One-Tube Student "Midget" Battery Receiver Kit...List \$5.50
- No. 10-1162—Two-Tube Student "Midget" Battery Receiver Kit...List 6.75
- No. 10-1163—Three-Tube Student "Midget" Battery Receiver Kit...List 8.50

### ★ "ADD-ON" KITS ★

- Contain all parts and instructions necessary to make a Two-Tube set out of a One-Tube or a Three-Tube out of a Two-Tube.
- No. 10-1180—One- to Two-Tube "Midget" Add-On Kit, with instructions, List Price \$1.25
- No. 10-1181—Two- to Three-Tube "Midget" Add-On Kit, with instructions, List Price \$2.25

In response to popular demand, the famous Meissner Student "Midget" receivers are now available for AC or DC operation—directly from any 110-volt power line! Practically identical in appearance and general circuit arrangement, their principal difference lies in the type of power supply only. The same progressive building idea has been maintained in making these new sets available in the form of two- and three-tube kits—with a special "Add-On" kit to convert the two-tube to the three-tube set! The circuit is of the regenerative type, providing remarkable sensitivity for a limited number of tubes; both sets are intended for headphone operation. The same plug-in coils as used in the battery models are used in these AC-DC models, the Broadcast band coil being furnished with the kit. Every student or beginning experimenter in radio will be able to gain a world of valuable practical information by building one of these efficient little receivers!

### ★ COMPLETE BIT—EVERYTHING FURNISHED ★

When you unpack one of these kits and start to assemble it according to the easy step-by-step instructions included, nothing need stop you until the job is done! Absolutely all parts are included except tubes and headphones. Two type—76 tubes are required for the two-tube set and three of the same type for the three-tube set. One of these serves as a rectifier in each set. They are inexpensive and available anywhere. Detailed instructions furnished include complete Pictorial and Schematic diagrams—every part and wire is shown just as it appears in the finished set!

### ★ AC-DC "MIDGET" KITS ★

- No. 10-1192—Two-tube Student "Midget" AC-DC Receiver Kit...List \$7.00
- No. 10-1193—Three-tube Student "Midget" AC-DC Receiver Kit...List 8.00

### ★ TWO- TO THREE-TUBE CONVERSION KIT ★

- Contains all of the extra parts required to make a three-tube receiver out of the two-tube set. Complete instructions included.
- No. 10-1194—Two- to three-tube "Midget" AC-DC Add-On Kit...List \$0.75

### ★ ACCESSORIES FOR STUDENT "MIDGETS" ★

- No. 18-2940—75 to 200 meter Plug-In Coil.....List Price \$0.86
- No. 18-2941—35 to 70 meter Plug-In Coil.....List Price .86
- No. 18-2942—17 to 35 meter Plug-In Coil.....List Price .86
- No. 18-2944—545 to 1500 meter Plug-In Coil.....List Price 1.65

## PERMANENT MAGNET HORN UNITS

All Permanent Magnet units use the finest grade of Alnico steel magnets and Armco iron throughout. All steel parts cadmium-plated to prevent corrosion. Units are magnetized, using an electromagnetic cutout switch which gives the maximum flux density obtainable in the gap. All magnets are measured for flux density and each unit is

tested with special machines for power handling capacity as well as 300 volt ground-test, making for uniformity and ability to withstand all types of service. All units are supplied with corrosion-proof metal diaphragms or plastic diaphragms on request, without extra charge. Voice coil impedance on all units: 15 ohms. Special ohmages on request.

### STANDARD P-M UNITS

Using Alnico Blue Dot Magnet

#### SUPER GIANT

Operating capacity at 250 cycles...25 watts  
at 110 cycles...10-12 watts  
130 oz. Alnico Magnet.  
Flux density.....15,000 gaussses per sq. cm.  
Total weight.....17 pounds  
Code: REVUM.....List Price \$65.00

#### GIANT

Operating capacity at 250 cycles...25 watts  
at 100 cycles...10-12 watts  
104 oz. Alnico Magnet.  
Flux density..... 14,000 gaussses per sq. cm.  
Total weight.....13 pounds  
Code: REVUX.....List Price \$52.50

#### MASTER

Operating capacity at 250 cycles...25 watts  
at 100 cycles...10 watts  
60 oz. Alnico Magnet.  
Flux density..... 12,000 gaussses per sq. cm.  
Total weight.....9 pounds  
Code: REVUE.....List Price \$42.50

#### JUNIOR

Operating capacity at 250 cycles...20 watts  
at 100 cycles.....8 watts  
46 oz. Alnico Magnet.  
Flux density.....10,000 gaussses per sq. cm.  
Total weight.....7 7/8 pounds  
Code: REVAT.....List Price \$32.50

#### BABY

Operating capacity at 300 cycles...10 watts  
17 oz. Alnico Magnet.  
Flux density.....8,000 gaussses per sq. cm.  
Total weight.....3 pounds  
Code: REVEL.....List Price \$18.00  
(Coupling included for attachment to standard horns, if desired. \*Net price 40c additional.)

#### JUNIOR GIANT

Operating capacity at 250 cycles...25 watts  
at 110 cycles...10-12 watts  
Flux density..... 13,000 gaussses per sq. cm.  
Total weight.....6 1/2 pounds  
Code: RETOT.....List Price \$47.50

#### BABY GIANT

Operating capacity at 250 cycles...25 watts  
at 110 cycles...10-12 watts  
Flux density.....11,000 gaussses per sq. cm.  
Total weight.....3 1/2 pounds  
Code: RETIL.....List Price \$32.50

#### DWARF

Operating capacity at 500 cycles.....5 watts  
Frequency to 12,000 cycles.  
Flux density.....8,000 gaussses per sq. cm.  
Total weight.....1 pound  
Code: REDOW.....List Price \$18.00

### DIAPHRAGM REPLACEMENTS

Code:	Description:	Net Price
Code: RUTEX	Type A Diaphragms only.....	\$2.60*
Code: RUVEX	Type B Diaphragms only.....	3.60*
Code: RUZEN	Type A Head Assembly (including diaphragm) Theatre Type.....	4.25*
Code: RUZUR	Type B Head Assembly (including diaphragm) General PA Type.....	5.25*
Code: RUBUF	Type A High Fidelity Head Assembly (including diaphragm).....	6.00*

### MULTIPLE HORN COMBINATIONS

Connectors made of heavy cast bronze with loose couplings for unit connection.

Combinations of two or three trumpet horns driven by one unit through properly designed connectors, will be found very efficient and flexible for public address service. Wider coverage can be obtained from the same power level, and frequency response is improved since the low-frequency cut-off is a product of the total bell area of all the horns.

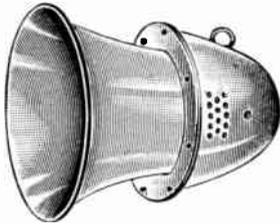

Double Connector — Dispersion angle 75°  
Code: RADIX.....List Price \$15.50  
Triple Connector — Dispersion angle 105°  
Code: RACER.....List Price \$21.00

**ARMORED CONE SPEAKER PROJECTORS**

**ARMORED CONE PROJECTOR**

An efficient heavy gauge steel and aluminum projector for dynamic cone speakers. Rugged and suitable for indoor or outdoor use. Steel back enclosure and heavy gauge aluminum bell with waterproof overlap. Provided with mounting hook and mounting holes. For use with 12" cone speakers. Overall length 20". Bell diameter 17".

**ARMORED CONE PROJECTOR**

For use with 8" cone speakers. Overall length 15". Bell diameter 15".

Code: RUMIX.....List Price \$8.00

Above with steel back, acoustically damped with heavy sound absorbing material, and cone opening protected by wire screening and silk gauze.

Code: RIFLE.....List Price \$10.00

All steel projector; steel back and bell.

Code: RUM!L List Price \$9.00

Code: RUMID .....List Price \$10.00

All steel projector (steel back and steel bell).

Code: RUMIS.....List Price \$11.00

Projector with aluminum bell and steel back, acoustically damped and cone opening protected by wire screening and silk gauze.

Code: ROBOT .....List Price \$12.50

**STEEL SWIVEL BRACKETS FOR CONE PROJECTORS**

For wall or truck mounting, with tooth ratchet swivel to give 180° angular movement; with or without stand, to attach to standard pipe.

For Cone Projectors

Without Base  
Code: RAMIS  
List Price \$3.00

With Base  
Code: RAMIT  
List Price \$4.50

For 12" or 8" Cone Marine

Without Base  
Code: RAMUN  
List Price \$3.00

With 11½" Base  
Code: RAMUB  
List Price \$5.00

???

*Important Announcement*

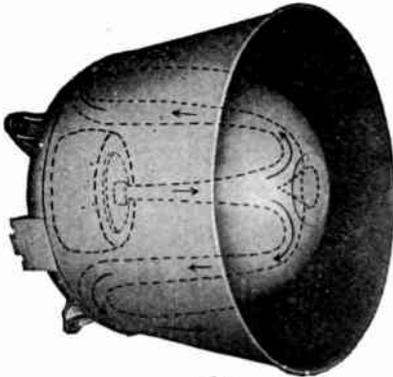

RACON, the outstanding manufacturer of small diaphragm units and horns, has at last evolved a sound projector with the perfect distribution over a maximum angle.

It is known in the art that straight axis projectors have a distribution pattern the angular width of which varies almost inversely as the frequency, with the maximum angle of distribution at the low frequency and the minimum angle at the high frequency.

So-called "Radial Horns" have a distribution along the radial axis approximately the same as straight axis projectors but with a lower intensity and with the disadvantage of having a so-called "Hot Spot" of sound at right angles to the radial axis.

Now, at last, RACON is proud to present a new principle of construction, **PATENTED**, that not only gives uniform distribution over the complete frequency range, but gives a greater angle of distribution. Speakers can be supplied to give a predetermined angular distribution of all frequencies up to 180° with uniform intensity, or can be supplied with a varying angle of intensity in two planes perpendicular to each other—180° in one plane and 90° in the other, with whatever variations are desired between.

**WATCH FOR ANNOUNCEMENT OF RELEASE.**

### BULL MARINE SPEAKER

A large re-entrant type of horn, 28" diameter, 21" deep, made of heavy aluminum casting and Racon unbreekable bell and centre section. Will withstand extremely high wattages without vibration.

Designed to operate with Racon Bull unit for 50 watts, with 4 Racon Marine units for 100 watt operation, or 2 Racon Marine units for 50 watt continuous operation. Cut-off 125 cycles.

Code: REDUL REVUL—Bull Horn with Bull Unit complete, 50 watt operation; wt. 120 lbs.	List Price
Code: RADOF REVUE—Bull Horn with 4 Marine Units complete, 100 watt operation; wt. 118 lbs.	\$525.00
Code: RADOT REVUE—Bull Horn with 2 Marine Units complete, 50 watt operation; wt. 91 lbs.	490.00
	400.00

### MARINE SPEAKER

Approved by the Bureau of Marine Inspection and Navigation, Department of Commerce, for all Emergency Loudspeaker Systems on ships, under the 53rd Supplement of the Bureau, after tests made by the Bureau of Standards, Washington, D.C.

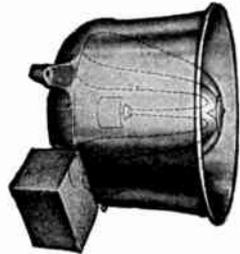

The latest speaker in Marine Practice! A double re-entrant type of horn, 14" in diameter, 10" deep—having a base of heavy aluminum casting and heavy aluminum spinning. Uses a Racon Master Unit. The driving Unit and connections are all enclosed, making a completely waterproof speaker not affected by temperature or weather, including use on sea even during storms!

This Marine Speaker is used both as a Loudspeaker and as a Microphone. It will pick up sound outdoors

from distances up to 100 feet with very small amplifying gain, and will deliver 100 DB of sound 10 feet from the horn with an input of approximately one watt! Cut-off 250 cycles.

Makes an ideal speaker not only for Marine work but also for general P.A. use, where a highly concentrated sound for great distance is required.

Code: REDIX—Complete with unit; weight 25 lbs. Special non-corrosive Aluminum castings; Baked Chromatic Undercoat Finish plus outside lacquer finish. List Price \$106.25

### MIDGET MARINE SPEAKER

Approved by the Bureau of Marine Inspection & Navigation, Dept. of Commerce, for ship use. A double re-entrant type horn, 9 1/4" diameter, 6 3/4" deep. Uses a Racon Junior P.M. unit. Built as sturdily as the regular Marine speaker but smaller in size. A highly efficient and directional P.A. speaker. Cut-off 350 cycles.

Code: RASOM—Marine Speaker, complete with Junior unit; weight 10 1/2 lbs.	List Price \$52.50
Code: RASOB—Marine Speaker, complete with baby unit; weight 7 1/2 lbs.	List Price \$37.50

### MINIATURE MARINE SPEAKER

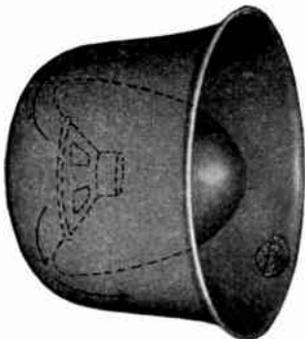

Approved by the Bureau of Marine Inspection & Navigation, Dept. of Commerce, for ship use. A miniature re-entrant type of horn, similar in design to the above Marine speakers. Bell diameter 6 1/4", depth 4 3/4". Uses a Racon Baby Unit. Ideal where a highly efficient and directional speaker is required to occupy a small space and where voice reproduction must overcome high noise levels. Cut-off 500 cycles.

Code: REDUP—Miniature Marine Speaker, complete with unit; Weight 5 1/4 lbs. List Price \$27.50

All marine speakers (except Miniature) can be supplied blast-proof against concussion due to gunfire at additional cost of \$5.00 each net. — Specify B.P.X. after speaker when ordering.

### CONE MARINE SPEAKER

IN ALL RACON CONE MARINE SPEAKERS bell is made of heavy gauge aluminum; cone mounting is made of aluminum casting; and center bullet is made of RACON ACOUSTIC material to prevent resonant effects. Material is stormproofed for all weather conditions.

#### FOR 12" CONE

Bell Diameter	24"
Depth	15"
Weight	10 lbs.
Code: RELIM	
List Price, without speaker	\$32.50

#### FOR 5" CONE\*

Bell Diameter	10 1/2"
Depth	8 1/2"
Weight, without speaker	2 1/4 lbs.
Code: REKIM	
List Price, without speaker	\$9.50

#### FOR 8" CONE

Bell Diameter	17 1/2"
Depth	11 1/2"
Weight	4 1/2 lbs.
Code: REFIM	
List Price, without speaker	\$17.50

#### FOR 4" and 3" CONE

Bell Diameter	7 1/2"
Depth	5 1/2"
Weight	2 1/4 lbs.
Code: REPIM	
List Price, with speaker	\$10.50

A re-entrant speaker of the marine type, for cone operation. . . . Owing to its unusual construction, this speaker can be used outdoors as well as indoors, in all weather and temperatures, without impairment. . . . The cone diaphragm is protected not only from direct contact with rain but also from physical damage. Can be used for voice as well as musical reproduction.

\*NOTE: 5" and 4" Cone Marine supplied with bracket without charge.

# TRUMPETS for HORN UNITS

## ACOUSTIC TRUMPETS

Trumpets are made of Racon patented acoustic non-vibratory material. Stormproof models are guaranteed for life as waterproof in outdoor use in all climates and weathers, including immersion in water. Brass loose couplings for easy unit attachment. For voice or band music.

### 3 1/2-Foot Regular Model

Equipped with rolled-metal beaded edge, metal ferrule and suspension ring. Adapted for 7/8-18" or 1 1/8-18" threaded unit. Weight 6 1/2 lbs. 22" diameter.  
Code: RELAY.....List Price \$27.50

**De Luxe Type**—Equipped with rolled-metal beaded edge, reinforced cast-aluminum tone-arm, and suspension ring. For indoor use. Weight 10 lbs.  
Code: REMIT.....List Price \$35.00

**Stormproof Type**—Equipped same as De Luxe. Waterproof. Weight 12 lbs.  
Code: RENEW.....List Price \$50.00

### 4 1/2-Foot Trumpet

Equipped with rolled-metal beaded edge and 25" cast-aluminum throat. Demountable into two sections, which can be quickly assembled or disassembled.

**De Luxe Type**—Weight 16 lbs.  
Code: RANCH.....List Price \$52.50

**Stormproof Type**—Weight 18 lbs.  
Code: RACEY.....List Price \$71.00

### 6-Foot Trumpet

Equipped with rolled-metal beaded edge, 34" cast-aluminum throat, and suspension eyelets. Bell 30" diameter.

**De Luxe Type**—Weight 18 lbs.  
Code: RHYME.....List Price \$72.50

**Stormproof Type**—Weight 23 lbs.  
Code: RIDER.....List Price \$90.00

## ALL ALUMINUM TRUMPETS

All trumpets made of 12-gauge aluminum with cast-aluminum throat sections and cast-aluminum clamping edges, with reinforced bell. Brass loose coupling for easy unit attachment. For voice as well as musical reproduction.

### 6-Foot Trumpet

Bell 30" diameter. Demountable into three sections. Weight: 19 lbs.

**New Single-Unit Type**—34" cast throat.  
Code: RHINO.....List Price \$75.00

**New Two Single-Unit Type.**  
Code: RHOMB.....List Price \$82.50

### 4 1/2-Foot Trumpet

Demountable into 2 sections. 25" cast throat. Bell: 25". Weight: 11 lbs.

**Single-Unit Type**  
Code: RIANI.....List Price \$55.00

**Two-Unit Type**  
Code: RIBES.....List Price \$62.50

### 3 1/2-Foot Trumpet

Demountable into 2 sections. 10" cast throat. Bell: 22". Weight: 7 lbs.

Code: REPEX.....List Price \$30.00

## UNBREAKABLE REINFORCED TRUMPETS

Made of Racon acoustic stormproof material, reinforced throughout. Guaranteed unbreakable. The last word in trumpet design and particularly adaptable where high quality and high efficiency is required, with the ability to withstand the roughest handling without breakage. Loose coupling for unit attachment.

### 4 1/2-Foot Trumpet

Demountable into 2 sections. 25" cast throat. Bell: 25". Weight: 15 lbs.

Code: REFIX.....List Price \$85.00

### 6-Foot Trumpet

Demountable into three sections. Equipped with 34 inches of aluminum throat casting.

**Single Unit Type**  
Code: REGON.....List Price \$110.00

**Two-Unit Type**  
Code: REGAY.....List Price \$117.50

## PAGING HORN Acoustic Model

A small, extremely efficient 2-foot trumpet speaker, for use where highly concentrated sound is required to override high noise levels, such as in factories, outdoors, etc. Particularly adaptable for paging systems, hotel lobbies, trucks, etc. Made of acoustic non-vibratory material as per Racon patents. Cast aluminum throat section.

Bell diameter 12". Overall length 24".

**Stormproof Type**—Guaranteed for life as waterproof in outdoor use, in all climates and weather, including immersion in water.  
Code: RISAT.....List Price \$16.00

**Indoor Type**—Indoor use only.  
Code: RIKAL.....List Price \$12.00

**All Metal Type.**  
Code: RIMAD.....List Price \$13.00

## PERMANENT MAGNET HIGH FREQUENCY UNIT

An efficient and precision built unit, to meet the latest requirements for wide-range reproduction. Designed to cover the frequency band from 3,000 to 12,000 cycles. Special models are available for response up to 18,000 cycles. Supplied with horn, (as shown) and mounting bracket, (not shown). Designed to operate in conjunction with a suitable low frequency speaker (cone or horn type) in order to give high fidelity reproduction in the wide-range audio frequency band. Not made to operate below 3,000 cycles. Voice Coil impedance 15 ohms.

Code: RABAT—Complete with Unit  
List Price .....\$25.00

## RE-ENTRANT TRUMPETS

ALL RACON RE-ENTRANT SPEAKERS have base and inside tone arm made of aluminum castings, outside bell of heavy gauge aluminum spinning, and center reflecting section of RACON ACOUSTIC material to prevent resonant effects prevalent in all metal reflecting surfaces. Sturdy construction makes them practically abuse-proof.

Swivel ratchet mounting bracket supplied without charge. Can be attached to 1/2" or 1 1/4" pipe.

Made in four sizes:

### 6 FT. RE-ENTRANT

Bell Diameter ..... 25 1/2"  
 Overall Length ..... 28"  
 Weight ..... 20 lbs.

Code: REMOL

List Price ..... \$55.00

### 3 1/2 FT. RE-ENTRANT

Bell Diameter ..... 18"  
 Overall Length ..... 16"  
 Weight ..... 7 lbs.

Code: REMOX

List Price ..... \$27.50

### 4 1/2 FT. RE-ENTRANT

Bell Diameter ..... 24 1/2"  
 Overall Length ..... 23 1/2"  
 Weight ..... 11 lbs.

Code: REMOM

List Price ..... \$42.50

### 2 1/2 FT. RE-ENTRANT

Bell Diameter ..... 12 3/4"  
 Overall Length ..... 16"  
 Weight ..... 4 3/4 lbs.

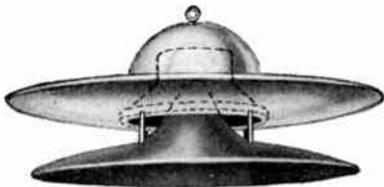

Code: REMOD

List Price ..... \$22.50

A compact trumpet of the double re-entrant type, made to occupy a small space, yet has a long air column, delivering highly concentrated sound with the greatest efficiency over long distances.

Standard P.M. Units can be used, from the Baby size to the Super Giant size.

## RADIAL CONE SPEAKER

A radial speaker for cone operation.

This speaker is designed to project sound over a complete circumference of 360°, distributing the sound with even intensity and bringing out the high response lacking in direct cone horns.

Particularly adapted for use on trucks and in auditoriums where complete coverage is desired.

Can be camouflaged to blend with ceiling architecture.

IN ALL RACON RADIAL CONE SPEAKERS, the upper deflector is made of heavy gauge steel, cone covering of steel, and lower deflector of RACON ACOUSTIC material to prevent resonant effects prevalent in all metal reflecting surfaces, and storm-proofed for all weather conditions.

### FOR 12" OR 10" CONE

Reflector diameter ..... 31"  
 Depth ..... 14"  
 Weight ..... 10 lbs.

Code: RADAG

List Price,  
 without speaker ..... \$27.50

### FOR 6" OR 5" CONE

Reflector diameter ..... 17"  
 Depth ..... 7"  
 Weight ..... 3 1/2 lbs.

Code: RADAC

List Price,  
 without speaker ..... \$9.50

Code: RASAY

List Price,  
 with 5" speaker ..... \$13.50

### CELLULAR HORN

A new type of cellular horn for operation between 350 and 12,000 cycles, with an angular distribution of 60 degrees.

Uses a highly efficient P.M. Unit with a patented phase cancellation compensating device, reproducing all frequencies without cancellation effects.

Made only in blocs of 4 cells—of Racon unbreakable material, having heavy aluminum throat castings and unbreakable bell sections. Overall length 32 1/2". Total bell opening 12" x 12". Weight 18 1/2 pounds.

Code: RAGAM—Cellular Horn with Master Size Unit..... **List Price \$135.00**  
 Code: RAGOT—Cellular Horn with Giant Size Unit..... **145.00**

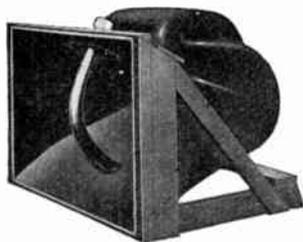

### 6-FT. FLAT BELL TRUMPET

This trumpet has been developed to meet special conditions where the height or width available are insufficient for the standard round bell horns. It is acoustically equal to the standard circular bell 6 Foot Trumpet. The bell section, however, is 12" in height by 51" wide. This horn is particularly suited for truck mounting and for interior work such as above or on the sides of stages.

All types equipped with double cross braces, cast aluminum throat sections semi-demountable, and loose couplings for unit attachment.

DELUXE INDOOR TYPE—Weight 24 lbs. **List Price \$72.50**  
 Code: ROGUE  
 STORMPROOF TYPE—Weight 28 lbs. **List Price \$95.00**  
 Code: ROBIN

### AUDITORIUM HORN

A 7 foot length horn folded to occupy a space 21 1/2" x 26 1/2" x 23 1/2".

An excellent horn for auditoriums, small theatres, portable talkie equipment, etc., and for mounting in the proscenium arch of a large theatre. Small in size and light in weight.

A departure in standard horn design, giving excellent musical as well as speech reproduction out of all proportion to the small size of the horn.

DeLuxe Type for indoor use. Weight 25 lbs. **List Price \$66.00**  
 Code: ROOST (horn only).  
 Storm-proof Type, guaranteed for all climates and weather. Weight 29 lbs. **List Price \$88.00**  
 Code: RETRO (horn only).

### RADIAL HORN

Width 43" Height 50"  
 Equipped with cast aluminum throat, cold rolled steel suspension brackets, reinforced edge. Demountable. Loose couplings for easy unit attachment.

This horn is accurately designed to project sound over a complete circumference of 360 degrees, distributing same with even intensity. It is particularly adapted for use on trucks, tower equipment, churches, amusement parks and general public address use where a complete circumferential coverage is desired.

#### 2 Unit Radial Horn

RADIAL Horn only, STORMPROOF

Weight 60 lbs. without units and brackets.

Code: ROUND..... **List Price \$275.00**

RADIAL Horn only, REGULAR—For indoor use

Weight 55 lbs. without units and brackets.

Code: RUSAN..... **List Price \$225.00**

#### 4 Unit Radial Horn

RADIAL Horn only, STORMPROOF

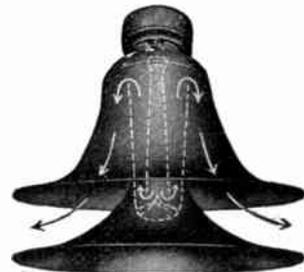

Weight 68 lbs. without units and brackets.

Code: RADAH..... **List Price \$340.00**

RADIAL Horn only, REGULAR—For indoor use

Weight 63 lbs. without units and brackets.

Code: RUSHY..... **List Price \$275.00**

### RADIAL HORN SPEAKER

A 3 1/2 foot re-entrant type horn designed to project sound over a complete circumference of 360°, distributing the sound with an even intensity. For all sound installations where complete coverage is desired.

Base and tone arm made of heavy aluminum castings, center deflector and deflecting bells made of RACON ACOUSTIC material to prevent all resonant effects. Material storm-proofed and guaranteed against all weather conditions. Brass loose couplings for easy unit connection.

Uses standard RACON Units. Height 17" **Weight 7 lbs.**  
 Width 17" **List Price \$37.50**  
 Code: RADAK.

# MULTIPLE UNIT HORNS

## 4 1/2 FOOT AEROPLANE HORN

Bell 24" diameter. Length 42".

Requires an overall width of 39" to clear Super-Giant Units when mounted.

Equipped with cast aluminum throat section, rolled metal beaded edge, loose couplings for units, and suspension ring. Demountable. Specially developed for installations where space is limited and weight factor small.

### 2 Unit Type

**DELUXE**—Indoor type. Weight 18 pounds.

Code: REPAY.....List Price \$60.00

**STORMPROOF.** Weight 20 pounds

Code: RECUE.....List Price \$82.50

### 4 Unit Type (Illustrated)

**DELUXE**—Indoor type. Weight 23 pounds.

Code: REGUS.....List Price \$90.00

**STORMPROOF.** Weight 25 pounds

Code: RELAX.....List Price \$115.00

## 4 UNIT AEROPLANE HORN

Bell 30" diameter.  
Length overall 54".

**STORMPROOF.** Rolled metal beaded edge. Heavy cast aluminum throat section. Loose couplings for unit. Suspension ring. Demountable.

Equipped to operate 4 Units.

An extremely powerful and efficient Public Address Aeroplane Horn for long range projection.

Two mile ground projection capacity.

Weight 30 pounds.

Code: RECUR.....List Price \$200.00

## 9 UNIT AEROPLANE HORN

Bell 30" diameter.  
Length overall 54".

**STORMPROOF.** Rolled metal beaded edge. Heavy aluminum throat section. Loose couplings for units. Suspension ring. Demountable.

Equipped to operate with 9 Units.

A super-powerful and efficient Public Address Horn for extreme long range projection.

Three mile ground projection capacity.

Weight 48 pounds.

Code: RABIB.....List Price \$335.00

**STORMPROOF TYPE GUARANTEED WEATHERPROOF INCLUDING IMMERSION IN WATER**

## QUAM Senior ELECTRO-DYNAMICS

The problems of service engineers became the problems of our engineers when planning the QUAM line of replacement speakers. Every possible situation that might confront the engineer in the field was taken into consideration. We sincerely believe that our success in solving these problems is indicated by a study of the various features that make the line distinctive. The field coils of QUAM Senior Electro Dy-

amic speakers are enclosed in Fire Underwriter's Approved metal shields. This provides weather proofing and protection from mechanical injury. Universal mounting brackets are supplied with the 4", 5", 5½" and 6½" speakers. The field coil pots are drilled and tapped for mounting direct to the chassis, or on a bracket. Each speaker may be installed with minimum effort.

**MODEL 40S 4" Standard**  
Rating 3.5 watts. Dustproofed. 10" leads. Dimensions: Dia., 4½" Square basket; Mtg. Dia., 4¼"; Depth, 2¼". Ship. Wgt., 1½ lbs.  
Model 40SM—Same as 40S EXCEPT depth 2¾".

**MODEL 50S 5" Standard**  
Rating 3.5 watts. Dustproofed. 10" leads. Dimensions: Dia., 5" Round basket; Mtg. Dia., 4¾"; Depth, 2¾" Ship. Wgt., 2 lbs.

**MODEL 55S 5½" Standard**  
Rating 4.5 watts. Dustproofed. 10" leads. Dimensions: Dia., 5½" Square basket; Mtg. Dia., 6½"; Depth, 2½". Ship. Wgt., 2½ lbs.

**MODEL 65M 6½" Modified**  
Rating 4.5 watts. Dustproofed. 12" leads. Dimensions: Dia., 6½" Round basket; Mtg. Dia., 6½"; Depth, 2½". Ship. Wgt., 2½ lbs.

**MODEL 120S 12" Standard**  
Rating 12 watts. Dustproofed. 24" leads. Black finish with chromium pot cover. Dimensions: 12" Round basket; Mounting Dia., 11¾"; Depth, 5¾". Ship. Wgt. 8½ lbs.

Field resistances are indicated by part numbers. Be sure to specify part numbers and model numbers when ordering.

## QUAM Senior P. M. DYNAMICS

Service and sound engineers have adopted QUAM Senior P. M. Dynamics as their standard. These units are designed to fill the demand for speakers with unusual power handling capacity. They have excellent frequency response characteristics. The arc welded construction used insures permanent alignment of integral parts. QUAM

Senior P. M. Dynamics are suited for a wide range of installations such as AC and AC-DC sets, automobile sets and battery portables, home sets, public address systems, inter-office communication systems, and as auxiliary speakers. They do not require current for field excitation.

**MODEL 40PM 4" 5 oz. Magnet**  
Rating 3.5 watts. Completely dustproofed. Dimensions: Dia., 4½" Square basket; Mtg. Dia., 4¼"; Depth, 2¼". Ship. Wgt., 2½ lbs.

**MODEL 50PM 5" 5 oz. Magnet**  
Rating 3.5 watts. Completely dustproofed. Dimensions: Dia., 5" Round basket; Mtg. Dia., 4¾"; Depth, 2¾". Ship. Wgt., 2½ lbs.

**MODEL 55PM 5½" 8 oz. Magnet**  
Rating 4.5 watts. Completely dustproofed. Dimensions: Dia., 5½" Square basket; Mounting Dia., 6½"; Depth, 2½". Ship. Wgt. 2½ lbs.

**MODEL 65PM 6½" 8 oz. Magnet**  
Rating 5.5 watts. Completely dustproofed. Dimensions: Dia., 6½" Round basket; Mounting Dia., 6½"; Depth, 2½". Ship. Wgt. 2½ lbs.

**MODEL 80PM 8" 8 oz. Magnet**  
Rating 7 watts. Completely dustproofed. Dimensions: Dia., 8" Round basket; Mtg. Dia., 7¼"; Depth, 3¼". Ship. Wgt., 3 lbs.

Voice coil impedances on 120 PM, M120PM, D80PM and S80PM, 6 ohms at 400 cycles. All other speakers shown above have 4 ohm voice coil impedance included on all speakers. See reverse side for matching transformers.

**MODEL 80PM 8" 28 oz. Magnet**  
Rating 10 watts. Pot cover. Completely dustproofed. Dimensions: Dia., 8" Round basket; Mounting Dia., 7¼"; Depth 3¼". Ship. Wgt. 5½ lbs.

**MODEL D80PM 8" 48 oz. Magnet**  
Rating 15 watts. Pot cover. Completely dustproofed. Dia., 8" Round basket; Mtg. Dia., 7¼"; Depth, 4¼". Ship. Wgt., 7½ lbs.

**MODEL M120PM 12" 28 oz. Magnet**  
Rating 15 watts. Pot cover. Completely dustproofed. Dia., 12" Round basket; Mtg. Dia., 11¾"; Depth, 5¾". Ship. Wgt. 7 lbs.

**MODEL 120PM 12" 48 oz. Magnet**  
Rating 25 watts. Pot cover. Completely dustproofed. Dia., 12" Round basket; Mtg. Dia., 11¾"; Depth, 5¾". Ship. Wgt. 8½ lbs.

## QUAM Permanic SPEAKERS

**MODEL 40 4" Permanic**  
10" leads. Dimensions: Dia., 4½" Square basket; Mounting Dia., 4¼"; Depth, 2¾". Ship. Wgt. ¾ lb.

65L	Low
65M	Medium
65H	High
65C	500 ohm line

Check this listing of tube impedances for correct selections

### LOW IMPEDANCE TUBES (Order 40L, 50L or 65L)

Types 48 and 43 in push-pull, single types 43, 45, 59, 71A, 12A5, 25L6, 32L7, 50L6, 25B5 and for any type of output tube in single or push-pull having a total primary load impedance of 2000 to 6000 ohms.

### MEDIUM IMPEDANCE TUBES (Order 40M, 50M or 65M)

Types 43, 45, 71A in push-pull and single types 10, 12A, 18, 19, 20, 31, 83, 33, 41, 42, 43, 46, 47, 49, 59, 89, 2A5, 6A4, 6A6, 12A5, LA, GA, PZ, 1C5, 1Q5, 6K6, 6F6, 6C6 and for any type of output tube in single or push-pull having a total primary load imp. of 6000 to 12,000 ohms.

### HIGH IMPEDANCE TUBES (Order 40H, 50H or 65H)

Types 10, 12A, 18, 19, 20, 31, 33, 38, 41, 42, 46, 47, 79, 59, 89, 2A5, 6A4, LA, 6A6, in push-pull and single types 88, 49, 12A7, 1A5, and for any type of output tube in single or push-pull having a total primary load impedance of 12,000 to 25,000 ohms.

# SPEAKERS

with Interchangeable Transformers

## QUAM Junior Electro-Dynamics

The demand for lower priced replacement speakers carrying the full guarantee of the manufacturer resulted in the QUAM JUNIOR Replacement Line. These speakers are constructed of quality materials and give excellent performance characteristics. The finish is baked brown enamel.

**MODEL 40J 4" Junior**  
Rating 2.5 watts, 10" leads. Dimensions: Dia., 4 3/8" Square basket; Mounting Dia., 4 1/4"; Depth, 1 3/8". Ship. Wgt. 1 1/2 lbs.

**MODEL 50J 5" Junior**  
Rating 2.5 watts, 10" leads. Dimensions: Dia., 5" Round basket; Mounting Dia., 4 1/4"; Depth, 2 1/2". Ship. Wgt. 2 lbs.

**MODEL 65J 6 1/2" Junior**  
Rating 3.5 watts, 12" leads. Dimensions: Dia., 6 1/2" Round basket; Mounting Dia., 6 1/8"; Depth, 2 3/4". Ship. Wgt. 2 1/2 lbs.

**MODEL 80J 8" Junior**  
Rating 4 watts, 15" leads. Dimensions: Dia., 8" Round basket; Mounting Dia., 7 1/4"; Depth, 3 1/8". Ship. Wgt. 2 1/2 lbs.

Field resistances are indicated by part numbers. Be sure to specify part numbers and model numbers when ordering.

Field	40J	Model Number		80J
		50J	65J	
3000 Ohms	4JD30	5JD30	6JD30	8JD30
2500 Ohms	4JD25	5JD25	6JD25	8JD25
1800 Ohms	4JD18	5JD18	6JD18	8JD18
1000 Ohms	4JD10	5JD10	6JD10	8JD10
450 Ohms*	4JD45*	5JD45*	6JD45*	8JD45*
6 Volt†	4JD4†	5JD4†	6JD4†	8JD4†

\*Bucking Coil included. †Dustproofed. Voice coil impedances on above speakers 4 ohms at 400 cycles. Transformer mounting brackets included on all speakers. See column at right for matching transformers.

## QUAM Cabinet SPEAKERS

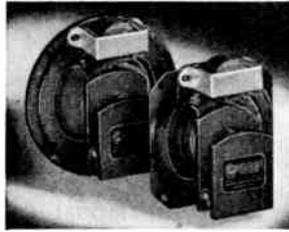

Suitable for table or wall mounting. Scientifically designed and constructed of seasoned hardwood throughout to provide clear, wide range reproduction. Cabinets are not sold separately.

Any 12" QUAM speaker can be ordered installed in the 120 cabinet and any 8" QUAM speaker in the 80 cabinet.

**SPEAKER CABINET 120**  
Cabinet Only. For 12" speaker. Not sold separately. Dimensions: Height 15", Width 14", Depth at Base 9 1/2", at Top, 5". Ship. Wgt. 9 lbs.

**SPEAKER CABINET 80**  
Cabinet Only. For 8" speaker. Not sold separately. Dimensions: Height, 11 1/2"; Width, 11 1/2"; Depth at Base, 5"; at Top, 3". Ship. Wgt. 4 lbs.

## QUAM Junior P. M. Dynamics

Well designed and built. Performance characteristics are excellent. Made in various sizes and specifications for table models, consoles, automobile sets, battery portables and inter-communication systems. The finish is baked brown enamel.

**MODEL 4JP2 4"**  
Rating 1.5 watts. L.F.S. dustproofing. Dimensions: Dia. 4 3/8" Square basket; Mounting Dia., 4 1/4"; Depth, 1 3/8". Ship. Wgt. 1 1/4 lbs. 2 oz. Magnet.

**MODEL 4JP4 4"**  
Rating 2.5 watts. L.F.S. dustproofing. Dimensions: Dia., 4 3/8" Square basket; Mounting Dia., 4 1/4"; Depth, 1 3/8". Ship. Wgt. 1 3/8 lbs. 4 oz. Magnet.

**MODEL 5JP2 5"**  
Rating 1.5 watts. L.F.S. dustproofing. Dimensions: Dia., 5" Round basket; Mounting Dia., 4 1/4"; Depth, 2 1/8". Ship. Wgt. 1 3/8 lbs. 2 oz. Magnet.

**MODEL 5JP4 5"**  
Rating 2.5 watts. L.F.S. dustproofing. Dimensions: Dia., 5" Round basket; Mounting Dia., 4 1/4"; Depth, 2 1/8". Ship. Wgt. 1 1/2 lbs. 4 oz. Magnet.

**MODEL 6JP4 6 1/2"**  
Rating 2.5 watts. L.F.S. dustproofing. Dimensions: Dia., 6 1/2" Round basket; Mounting Dia., 6 1/8"; Depth, 2 3/8". Ship. Wgt. 2 1/4 lbs. 4 oz. Magnet.

**MODEL 8JP5 8"**  
Rating 3.5 watts. L.F.S. dustproofing. Dimensions: Dia., 8" Round basket; Mounting Dia., 7 1/4"; Depth, 3 1/8". Ship. Wgt. 2 5/8 lbs. 5 oz. Magnet.

**MODEL 8JP7 8"**  
Rating 6 watts. L.F.S. dustproofing. Dimensions: Dia., 8" Round basket; Mounting Dia., 7 1/4"; Depth, 3 1/8". Ship. Wgt. 2 3/4 lbs. 7 oz. Magnet.

Voice coil impedances on above speakers 4 ohms at 400 cycles. Transformer mounting brackets included on all speakers. See column at right for matching transformers.

## QUAM Permanent Microphones

A truly sensational microphone that requires no batteries or transformer. Compares favorably with a crystal microphone and yet it costs only about one-third as much! Frequency range of 60 to 8000 cycles with an output level of -50 DB. Connects directly to the grid of the amplifier tube in any radio set. Finds many uses for home broadcasting, sales meetings, call systems, truck ballyhoos, amateur radio use, and wherever a low priced, sturdy microphone is needed. Also used in conjunction with wireless record players. Available in brown or black crackle finish. (Brown furnished unless black is specified.)

5' cord and pin tip connectors.....  
5' shielded cable and pin tip connectors  
With 20' cord, not shielded.....  
Dimensions: Height, 5 3/4"; Width, 4 1/4";  
Base Diameter 3 1/2". Ship. Wgt. 1 1/2 lbs.

## Select Matching Transformers from this list

One of the greatest contributions to servicing is the interchangeable transformer. This feature, pioneered by QUAM, continues to meet with universal enthusiasm. Prior to the inception of this feature, engineers in the field had to be content with transformers having various matches which were not only inefficient, but costly, or wait for factory delivery of proper transformers. The transformer with correct matching impedance renders greater value in truer tone at less cost. All QUAM replacement transformers are manufactured from quality materials and are made impervious to climatic conditions by vacuum wax impregnation.

# REPRODUCERS

## THE NEW BAFLEX REPRODUCER

Utah engineering and precision manufacturing score another triumph! Straight from the Utah laboratories, the latest refinements

in sound equipment construction and design have been combined to augment the broad and diversified Utah speaker line.

In the new Utah Baflex Reproducer, Utah engineering has incorporated all the latest developments and improvements of reproducers for public address systems, schools, colleges,

greatly improved bass response. They are especially adaptable for use with television and Frequency Modulation (FM) receivers, which require a wide audio frequency range. The frequency response has a range up to approximately 9500 cycles per second.

taverns, dance halls, auditoriums, clubs, etc. They are available in four models.

The cabinets are of sturdy, extra-heavy construction, scientifically designed to eliminate cabinet vibration and resonance. The cabinet design is strikingly modern, with an attractive, durable satin bronze finish.

These new Utah Public Address Reproducers are marked by a total absence of "back radiation." There is no distortion in the

### IMPORTANT INSTRUCTIONS For Ordering Replacement Cone and Voice Coil Assemblies

In ordering cone replacements, it is absolutely necessary to supply us with all the numbers stamped on the speaker. All speakers are stamped with three sets of numbers, and on many speakers, with the voice coil impedance. One number designates the date on which the speaker was made; one is our catalog stock number; and the third is our production number which gives us the complete specifications of the speaker.

When all the numbers are given on your order, we shall be able to supply the correct cone and voice coil assembly for the designated speaker. It is also helpful if you can inform us of the voice coil impedance and whether the spider is of the bakelite or corrugated paper construction. . . . REMEMBER, THE STOCK NUMBER OF THE SPEAKER DOES NOT GIVE US COMPLETE INFORMATION.

Some of the above items may not be available for the duration. Consult your local UTAH jobber.

## THE NEW UTAH BI-DIRECTIONAL SPEAKERS

The Utah Bi-Directional Speaker embodying the latest speaker design and construction features, has been especially developed and engineered for factory call and paging systems. Their sturdy construction and improved de-

sign combined with their popular price make them ideal for factories, hotels, clubs, etc. The baffles are molded, non-metallic. There is no excessive low frequency response to distort intelligibility. A swivel joint bracket assures correct mounting.

## UTAH WALL REPRODUCER

The new Utah Wall Reproducer is the effective solution for sound systems that require a reproducer for music as well as voice. Its low price makes it an economical one as well. The finish blends with any decorative scheme.

The tone quality has been immeasurably improved by the molded, non-metallic housing. Ideal coverage of a given area is assured because of the scientifically engineered angle of the new Utah Wall Reproducer.

## THE FAMOUS UTAH "R" SERIES REPLACEMENT DYNAMIC SPEAKERS

The "R" Series combines maximum performance at lowest possible cost. One size heavier wire used in the field gives higher flux density resulting in better efficiency and damping and purer tone quality. Bucking coil for "humless" performance used throughout the entire "R" series. Undoubtedly the best speaker value in the industry.

## SPEAKERS & TRUMPETS

### NEW UTAH AC FIELD EXCITED SPEAKERS

Again Utah engineering brings you a solution for the current shortage of certain essential raw materials. A complete line of AC Field Excited Speakers humless in operation, and equivalent in performance to the famous Utah high fidelity Permo Dynamic line. A speaker for every public address and sound requirement. Require only the addition of the AC field supply shown below to substitute for any Permo Dynamic application. Standard Utah weather-resistant construction. Use Standard Utah output transformers.

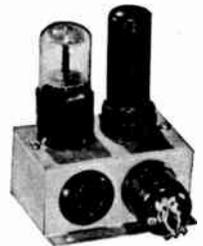

12 AC 20

Stock Number	Cone Diameter	Voice Coil Impedance	Voice Coil Diameter	Normal Wattage	Peak Wattage	List Price	NET PRICE
8 AC 30	8 Inch	6-8 Ohm	1 1/4"	12	18	\$ 8.75	\$ 5.25

### NEW AC FIELD EXCITATION SUPPLY

AC field supply properly designed for humless operation of any of the above Speakers. At 117 volts, 60 cycle input, the maximum output is 12 watts at 105 mills. May be mounted directly in the speaker baffle. Use a separate supply for each speaker. Price less Rectifier tube but includes ballast and plug. No cord furnished. Requires 1-50 Y6 GT rectifier tube. Stock No. ACSF1—List Price \$4.75.....NET PRICE \$2.85

ACSF1

### DRIVER REFLEX TRUMPETS

Three years of Utah research now gives you a new projector trumpet that will amaze you with its higher efficiency, its broader frequency response, its sturdier construction, its new beautiful finish. Available in 2 models, reflexed for compactness, fully weather proofed, and equipped with a sturdy ratchet lock mounting fixture that locks positively at any practical angle. In combination with the driver unit listed below, we invite you to compare Utah's projectors with any on the market. We know your reaction will be favorable.

24D

#### 21D SPECIFICATIONS

Overall Length .....17 Inches  
 Bell Diameter ..... 21 inches  
 Projection Angle ..... 90 Degrees  
 Shipping Weight .....16 Lbs  
 Driver unit attachment tapped for 1 3/8 x 18 "standard".  
 Mounting Fixture tapped for 1/2 inch I.P.S.  
 High Lustre Baked-on Art Enamel.  
 Exponential length .....4 Feet

## HIGH EFFICIENCY REFLEX SPEAKERS

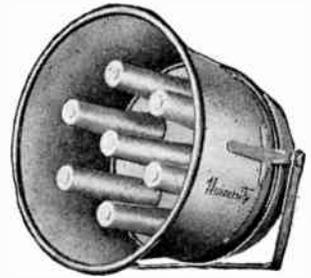

# University

## HIGH POWER DRIVER UNITS

### SUPER POWER SPEAKERS

Present war conditions have created many needs for extremely high powered Loudspeakers capable of projecting sound over large areas and for long distances at sea, or through wooded areas and/or to overcome high noise level conditions. University engineers developed the Model AA7 and Model 4A4 Loudspeakers as an answer to these problems. These Loudspeakers, although ruggedly constructed, are extremely compact in design and are light enough in weight to permit easy handling and maneuverability. Projectors are of reflex design, and Driver Units are hermetically sealed. This combination assures complete waterproof protection for outdoor use, under the severest weather conditions.

University engineers also have developed for the various government agencies high powered Loudspeakers capable of handling up to 400 watts of audio. At present, these Loudspeakers are available only for use by the armed forces. Specifications are available to government agencies or to firms engaged in war contracts, on request.

MODEL AA7

Model	AA-7	4A4	2YR
Power	250 Watts	100 Watts	50 Watts
Impedance	100 ohms series 2 ohms parallel	60 ohms series 15 ohms parallel	30 ohms series 8 ohms parallel
Drivers	7 PAM	4 PAM	2 PAM
Dispersion	90°	80°	90°
Frequency	250-5000 Cycles	300-5000 Cycles	250-5000 Cycles
Projection	Up to 2 Mi.	Up to 1½ Mi.	Up to ¾ Mi.
Diameter	23 inches	17 inches	25 inches
Height	21 inches	17 inches	18 inches
Weight	100 Lbs.	60 Lbs.	35 Lbs.
Price	\$721.00	\$437.50	\$264.45

Prices include Driver Units and "U" Bracket.

### HIGH EFFICIENCY ANNOUNCING SPEAKERS

Combining high efficiency with extreme compactness of size, the University Model IB-8, originally designed for industrial plant installations, has proved to be a most versatile speaker. Despite its small physical dimensions, it is capable of handling greater power than any other speaker of its size with the result that thousands of IB-8's are now performing remarkable service throughout airplane, ordnance, munitions and other factories throughout the country. Leading Sound Engineers have recognized the IB-8 as the finest speaker of its type, especially suited for voice reproduction.

Model IB8 is waterproof and shockproof and will operate continually outdoors, under the most adverse climatic conditions. Price includes mounting bracket and hermetically sealed Driver Unit built into loudspeaker.

MODEL IB8

MODEL IB8

Model	IB-8	IBR
Power	12 Watts	10 Watts
Impedance	8 Ohms	8 Ohms
Drivers	Hermetically sealed Driver Unit Built Into Speaker	
Dispersion	60°	360°
Frequency	300-5000 Cycles	300-5000 Cycles
Projection	Up to ½ Mile	Radially
Diameter	9 inches	9 inches
Height	9 inches	10 inches
Weight	5 Lbs.	5 Lbs.
Price	*\$26.40	\$30.00

\*Speaker with heavy duty bracket for mobile use \$30.15

### HIGH EFFICIENCY BOOSTER SPEAKERS

Model CR Booster Speakers, originally designed for noisy factory paging installations, are now being used on jeeps, cars, trucks, etc., for high power direction and control. Model CR Booster Speakers also are being installed on outer decks of ships, docks, yards and loading platforms, and give satisfactory operation in all kinds of weather. The Driver Unit is hermetically sealed and built into the Loudspeaker in such a manner as to be impervious to any weather conditions. University Model CR is available with rugged mounting brackets for marine bulkhead and mobile installations. University Model CR is also manufactured in radial type for 360° uniform coverage.

Price includes mounting bracket and hermetically sealed Driver Unit built into loudspeaker.

MODEL CR

MODEL CR

Model	CR	RCR
Power	18 Watts	15 Watts
Impedance	15 Ohms Standard, 4 Ohms on Req	
Drivers	Hermetically sealed Driver Unit Built Into Speaker	
Dispersion	70°	360°
Frequency	200-5000 Cycles	200-5000 Cycles
Projection	Up to ½ Mile	Radially
Diameter	11 inches	14 inches
Height	9 inches	10 inches
Weight	9 Lbs.	10 Lbs.
Price	*\$42.00	\$48.50

\*Speaker with heavy duty bracket for mobile use \$45.75

### RADIAL REFLEX SPEAKERS

University Radial Reflex Projectors are designed to give absolute uniform 360° sound coverage. They are capable of covering large areas and still override high noise levels without blasting effect. To further eliminate the concentration of sound directly underneath the Loudspeaker, the diameter of the lower deflector is much greater than that of the bell, thus a tendency to spread out the sound. Many industrial installations have found the Radial Projector a much better solution to certain acoustic problems than the straight Projector. Sound engineers also have found that, in many cases, one Radial Projector with a University High Efficiency Unit will provide equal or better cover than two to four standard projectors in the same area. This has resulted in greater economy and better performance in many industrial installations.

Each Projector shipped complete with University "U" bracket less Driver Units.

MODEL RPH

Model	RLH	RPH	RSH
Dispersion	360°	360°	360°
Frequency	120 Cycles Cut-off	150 Cycles Cut-off	180 Cycles Cut-off
Air Column	5 Ft.	4 Ft.	3 Ft.
Diameter	28 inches	21 inches	19 inches
Height	19 inches	16 inches	11 inches
Weight	21 Lbs.	13 Lbs.	10 Lbs.
Price	\$59.00	\$40.00	\$26.00

### RADIAL CONE SPEAKER PROJECTORS

For installations where extreme low frequency response is required, in addition to uniform 360° projection, University Model RBP Radial Cone Speaker Projectors are especially designed for music reproduction and are superior to any similar type available. The University Model RBP Projectors have the pleasing appearance and compact construction of the ceiling or "chandelier" type Projector. In addition, due to the exclusive "infinite baffle" design, the reproduction of the low frequencies is excellent.

As in all other models, University Model RBP Radial Projectors are completely non-resonant, even the cone speaker is mounted in a rubber rim. The Projector is so designed as to be "water shedding," and can be used outdoors continuously. Projector shipped complete with mounting hardware, but less loudspeaker.

MODEL RBP 12

Model	RBP-12	RBP-8
Dispersion	360°	360°
Frequency	Uniform down to 50 Cycles	Uniform down to 80 Cycles
Diameter	27 inches	18 inches
Height	17 inches	9 inches
Weight	19 Lbs.	9 Lbs.
Price	\$29.40	\$19.60

**HIGH EFFICIENCY  
REFLEX SPEAKERS**

*University*

**HIGH POWER  
DRIVER UNITS**

**HIGH EFFICIENCY REFLEX LOUDSPEAKERS**

University's complete line of reflexed, all-metal waterproof Projectors, High Efficiency Driver Units and Radial Loudspeakers represent an outstanding contribution in the field of acoustic reproduction. Scientific precision designing by University engineers in combination with rigid standards of construction and careful workmanship have resulted in a product superior to any heretofore obtainable. Today, University Loudspeakers are specified by the armed forces to meet the rigid requirements of wartime use.

University Projectors, fabricated of heavy gauge metals, are extremely rugged and stand up under "battlefront" operating conditions. Outstanding among the many features of University Projectors is the now famous University rubber rim which tends to eliminate all possible rattles and resonant vibration. The combination of heavy duty materials and the rubber tire rim used on all University Projectors makes possible a completely non-resonant Projector. This

insures absolute clear reproduction of sound so vital to wartime needs. In addition, special non-corrosive finishes are applied to all Projectors and Driver Units. This minimizes any possibility of rust or deterioration to the equipment now in use from the tropics to the arctic.

University's reflexed Projectors, when used with University hermetically sealed Driver Units, assure a waterproof, weatherproof, outdoor Loudspeaker and guarantee continual, long life operation, in all climates and temperatures throughout the world. All University Projectors are equipped with universal "U" brackets, permitting easy installation and providing flexible setting in any position. These many features account for the successful and continuous use of thousands of University Horns and Units by our armed forces for direction and control, both on land and sea.

**Shockproof . . . Waterproof . . . Breakdown-proof Driver Units**

Originally designed for peacetime requirements, but today recognized as the finest units for meeting the necessities of the armed forces, University high power PM dynamic Driver Units are built to the most exacting standards of precision engineering. Many radically new and exclusive design features have been incorporated into these units. Chief among University developments is the exclusive "Rim Center" construction and assembly. "Rim Centering" eliminates the use of pins, and instead provides a means of centering the voice coil and head assembly in a much closer magnetic gap. An increase of 20 to 25% in gap energy thus obtained provides

University units with a higher conversion efficiency than any other units of similar size and weight. Another important development is the use of plastic for diaphragm flexing surfaces. This assures three times greater life of the Unit as compared to metallic diaphragms. The combination of rim centering, bakelite flexing surfaces, heatproof voice coil suspension and hermetically sealed dust covers spun directly over the unit structure makes possible the unconditional breakdown guarantee, which first made University units nationally famous.

# Jensen

FULL RANGE SOUND EQUIPMENT

*Known all over the world for predominating high quality*

## NEW Hypex PROJECTORS

with Annular Diaphragm Unit

These new Jensen "Hypex" Projectors consist of a Type H "Hypex" Horn and Type U "Annular" Driver Unit. The "Hypex" Horn (Patents Pending) is a totally new Jensen development—not "exponential," but with an entirely new flare formula that gives increased efficiency in the region above acoustic cut-off. Two horn sizes give nominal cut-off values of 165 cps. and 140 cps., either of which can be used with any Type U "Annular" Driver Unit below.

Type U "Annular" Driver Units (U. S. Pat. 1,845,768), offered in equivalent Field Coil and PM designs, employ the exclusive Jensen "Annular" principle in which the dural diaphragm is clamped at periphery and center. This gives extra stability, greater freedom from harsh "breakup" sometimes encountered with "dome" diaphragms.

"Hypex" Projectors are especially suitable for speech reproduction, since response extends from the vicinity of acoustic cut-off to the 5,000 cycle region with greatest emphasis on middle highs that add "punch" and "carrying power." Commercially acceptable music reproduction, within the limitations of all small reflex horns, is also provided. Sturdy steel encased unit, plus reflex horn construction insures dependable operation indoors and out, under all weather conditions. Finish is durable baked two-tone gray lacquer.

### STANDS AND SUPPORTS

EA-6. Adjustable Stand. Sturdy cast fitting with three-leg base, for mounting projector on wall or other surface. Horizontal and vertical adjustment.

List Price .....\$5.00

EA-7. Adjustable Support. Provides adjustment when projector is mounted on pipe mast.  $\frac{3}{4}$  inch pipe thread both ends.

List Price .....\$3.75

### TYPE U "Annular" DRIVER UNITS

U-20. "Annular" Driver Unit. Permanent Magnet type. Rated at 15 watts average, 25 watts maximum, with normal voice or music input. 16-ohm voice coil. Internal screw terminals. Dustproof, screened sound chamber. Diameter, 6  $\frac{1}{2}$ ". Depth, 3  $\frac{3}{4}$ ". Shipping weight, 11 lbs. Specify ST-630.

List Price .....\$36.00

UF-20. "Annular" Driver Unit. Field Coil type, 1250 ohms. Normal excitation, 10 watts from FS-10 or other Field Supply. Shipping weight, 12 lbs. Specify ST-631.

List Price .....\$36.00

UF-20. "Annular" Driver Unit. Field Coil type for 6-volt (1.6 amp.) battery. Specify ST-632. List Price.....\$36.00

### Type H "Hypex" PROJECTOR HORNS

H-20. "Hypex" Horn only. Bell diameter, 20  $\frac{3}{4}$ ". Depth, 16  $\frac{3}{4}$ ". Acoustical length, 4 feet. Nominal acoustic cut-off, 165 cps. Stand coupling flange tapped for  $\frac{3}{4}$ " pipe thread. Net weight, 11  $\frac{1}{4}$ " lbs. Shipping wt., 18  $\frac{1}{4}$  lbs.

List Price .....\$28.50

H-24. "Hypex" Horn only. Bell diameter, 24  $\frac{3}{4}$ ". Depth, 20  $\frac{1}{2}$ ". Acoustical length, 5 feet. Nominal acoustic cut-off, 140 cps. Net weight, 14  $\frac{3}{4}$  lbs. Shipping wt., 21  $\frac{3}{4}$  lbs.

List Price .....\$35.00

## JENSEN Type "S" Peri-Dynamic Projector ...

15-25 WATTS CAPACITY

These Projectors are complete assemblies of specially designed Driver Speaker and acoustic system utilizing the Peridyamic principle and correctly designed projector horn. Unusually good response is obtained in the 100-cycle region and high frequency response at good efficiency is maintained to 5500 cycles, thus especially qualifying these projectors for applications emphasizing music reproduction and naturalness in speech quality. Except for opening into horn, projector is completely weatherproofed, suitable for use indoors and out. Power rating is 15 watts average, 25 watts maximum, with normal voice or music input. Voice coil impedance, 8 ohms. Bell diameter, 24  $\frac{1}{2}$ ". Overall length, 30". Shipping weight, 30 lbs. Complete with plugs for voice coil and field connections. Field coil designs require 10-watt normal excitation from battery or Field Supply Unit.

FULL RANGE SOUND EQUIPMENT

*Known all over the world for predominating high quality*

These New Coaxial Speakers bring you the high type of performance only obtainable in a properly designed and co-ordinated two-way reproducing system in which separate speakers handle most effectively their particular portion of the total frequency range. Low frequency performance depends also on the acoustic enclosure provided and Jensen Bass Reflex cabinets are recommended for best results.

The High Frequency Control Systems now furnished or available as accessories, enable you to take full advantage of the extended high frequency range on high quality program material, yet instantly adjust for most acceptable results when some distortion is present. Thus Jensen Coaxial Speakers become more nearly universal for quality, moderate-level reproduction . . . adaptable to a wider range of circumstances and preferences.

## HIGH FREQUENCY RANGE CONTROL FURNISHED WITH JAP-60 AND JHP-52

Previously, frequency range controls have been limited to the most expensive types of two-way reproducing systems. Now Jensen engineers have developed a new method of adjusting the high-frequency cut-off which is incorporated in the high channel of a two-channel frequency dividing network. This system is offered for the first time on JAP-60 and JHP-52 Coaxial Speakers, A40-1 Network, and on reproducers incorporating these speakers. A 4-position switch on an extension cable provides choice of four cut-off frequencies, corresponding to typical high-quality single speaker performance as the lower limit, the full range of the coaxial speaker as the upper limit, and two intermediate values.

A control of this type permits the full extended-range performance of the coaxial speaker to be utilized on distortion-free program material, while limited-range performance is immediately available when needed for low and medium quality input such as worn lateral records, overmodulated AM radio, and the like. Control knob is installed on right side of cabinet on complete reproducers.

**JAP-60 (15-Inch)** This coaxial speaker is a high efficiency model ideally suited for such professional applications as FM-AM broadcast monitoring, transcription playback and the like. Efficiency is approximately 3 db higher than that of other 15-inch models listed. Response, when installed in suitable enclosure such as a Bass Reflex cabinet, extends smoothly from 50 to 12,000 cps, with a substantial contribution in the 15,000-cycle region. High Frequency Range Control switch lowers cut-off in four steps to suit program quality. Two channel network effects frequency division at 4,000 cps, with a cut-off slope of 10-12 db per octave. While intended for moderate level operation, maximum power input rating is 14-15 watts. Input impedance, 500 ohms. H.F. Control Switch is furnished complete with knob and escutcheon. Shipping weight, 23 1/2 lbs. Specify ST-600.  
List Price .....\$70.00

**JHP-52 (15-Inch)** Unqualifiedly recommended for all general applications requiring extended range high fidelity reproduction. Fully equivalent to the JAP-60 in every essential respect, differing only in efficiency which has been lowered slightly to a value suitable for average use at lower cost. Excellent for high quality FM-AM radio receivers, phonograph reproducers, monitoring and similar applications. Complete with H.F. Range Control Switch on extension cable, escutcheon and knob. Input impedance, 500 ohms. Power rating 12 to 14 watts. Specify ST-601.  
List Price .....\$49.50

**HIGH QUALITY OUTPUT TRANSFORMERS**  
These transformers are designed to match push-pull output tubes to 500 ohms (JAP-60 and JHP-52). No voice coil taps provided. Output is  $\pm 1$  db from 30 to 15,000 c.p.s. Encased in metal can; will not mount directly on speakers.  
Z 3155—(3,000 C.T. to 500) Z 3156—(5,000 C.T. to 500)  
Z 3157—(10,000 C.T. to 500)  
List Price .....\$9.25+

## Q8P HIGH-FREQUENCY SPEAKER

As used in 15" coaxials. Designed to reproduce the high frequencies from 4,000 to 15,000 cps., when used with dividing network (such as A40-1) and suitable low frequency speaker. Impedance, 16 ohms. Overall diameter, 5 1/2". Depth, 3 5/8". P.M. design.  
Q8P. H.F. Speaker. ST-589.  
List Price .....\$13.00

ST-605. Mounting Arms. Set of 4 as used on 15" coaxials.  
List Price .....\$1.00

## A40-1 NETWORK

This uniquely designed two-channel network is offered to those who wish to assemble their own two-way speaker systems, or add a high-frequency speaker to an existing single speaker. Frequency division is at 4,000 cps., with an attenuation outside pass band of 10-12 db per octave. Low frequency channel will accommodate any suitable 8 ohm 12" or 15" speaker. High channel takes one to four Q8P High Frequency Speakers (16, 8 and 4 ohm taps). Input, 500 ohms. High Frequency Range Control Switch feature included. Specify ST-604.  
List Price .....\$26.00

## JCP-40 (12-Inch) COAXIAL SPEAKER

The JCP-40 is a new member of the Jensen coaxial family. It makes available at a new low cost the extended range performance inherent in a correctly designed combination of low and high frequency speakers. Physically interchangeable with any full-size 12" conventional speaker, it is an ideal replacement and modernizing unit. In a suitable enclosure (such as Jensen "Bass Reflex") the JCP-40 gives effective reproduction of the frequency range from 50 to 10,000 cycles with some contribution even in the 12,000-cycle region. Simplified low-cost bridging network is incorporated. Terminals are provided so that accessory ST-606 High Frequency Level Control may be added by purchaser if desired. Voice coil impedance, 8 ohms. Power rating, 8 to 10 watts. PM design. Specify ST-603.  
JCP-40. Coaxial Speaker. List Price.....\$29.50

## Accessory H. F. Level Control for JCP-40

A simplified system of fidelity control which can be added by the purchaser to the JCP-40 Coaxial Speaker has been developed. This consists of a properly designed continuously variable resistance network which is easily connected to terminals provided for this purpose on the speakers. The control permits the user to adjust the level contributed by the high frequency speaker, thus permitting instant accommodation to program quality and listener preference. Control can also be used as general purpose 16-ohm 15-watt level control. 5/8" bushing 1" long for mounting on heavy cabinets. Complete with antique bronze escutcheon and brown bakelite knob.  
ST-606. High Frequency Level Control. List Price.....\$4.00

## HIGH FIDELITY REPRODUCERS

*with Bass Reflex*

FURNITURE AND UTILITY MODELS . . . COAXIAL AND SINGLE RADIATOR TYPES

### TYPE "CR" REPRODUCERS

Type "CR" Reproducers combine arresting beauty and distinction with outstanding performance at moderate cost. They are ideal for broadcast and recording monitoring and audition on FM or AM, for FM-AM receivers, high quality record reproduction, and many other professional and home applications. Cabinets are handsomely styled, suitable for practically any environment, and are well constructed of beautiful striped walnut.

Choice of coaxial or single radiator types is available, with performance in accordance with descriptive data on speakers, each having provided the ideal acoustic environment in a beautiful properly designed Bass Reflex Cabinet. Coaxial reproducers are equipped with high frequency control knob on right side of cabinet. CA-15 cabinet is 27 1/4" wide, 31 1/2" high, 14" deep. CA-12 is 27 3/4" wide, 31 1/2" high, 12" deep.

Reproducer	Stock No.	Cabinet	Speaker	Input Impedance	List Price
CRJ-60‡	ST-610	CA-15	JAP-60	500 ohms	\$118.75
CRT-12	ST-577	CA-12	PM12-CT	6 ohms	58.50
CRT-12G*	ST-637	CA-12	G12-RT	6 ohms	60.25
CRJ-40‡	ST-607	CA-12	JCP-40	6 ohms	75.25
CRJ-52‡	ST-609	CA-15	JHP-52	500 ohms	98.25

\* 105-120 V. 60 cy. model, complete with Field Supply, A.C. cord and switch.  
‡ Coaxial Reproducer, complete with High Frequency Control.

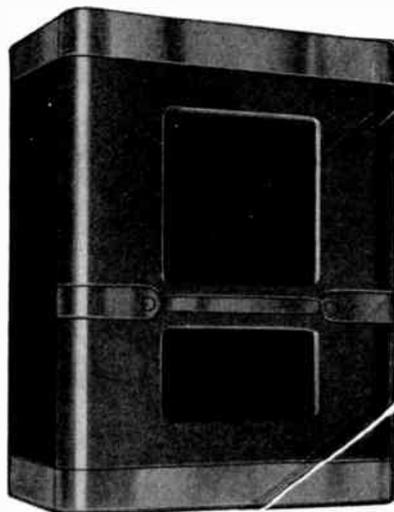

### TYPE "MT" REPRODUCERS

Type "MT" Reproducers give performance in every way equivalent to that of more expensive corresponding types. Cabinets are durably constructed of plywood and finished in two-tone brown lacquer. Reproducers incorporate speakers from 8-inch single radiator to 15-inch coaxial sizes, answering every demand for the finest performance in attractive but unpretentious cabinetry.

All "MT" Reproducers of course incorporate Bass Reflex for maximum extension of low frequency response. For data on performance of particular reproducers, refer to description of speakers incorporated in reproducer. Coaxial models are equipped with high frequency control knob on right side of cabinet. MT-81 cabinet: 17 1/4" by 23 3/4" by 11". MT-121: 23 1/4" by 30 1/4" by 12 1/4". MT-161: 25" by 33 1/4" by 13 1/4".

## New "Sector-Speaker" .. a Modern, Multi-Purpose High Fidelity Reproducer

### FUNCTIONALLY DESIGNED TO SOLVE SPACE AND POSITION PROBLEMS

Because it is functionally designed to fit into corners . . . occupy minimum space . . . blend into surfaces . . . the new, modern "Sector Speaker" provides wider latitude, new convenience in installation. The "Sector Speaker" has the form of a quarter cylinder requiring less than 1 square foot of floor space. The unit fits into most any 90-degree corner formed by sidewalls, ceiling or floor. Mounted horizontally, sound is projected downward at 45 degrees. Two units combined form semi-cylinder, blend attractively into wall and provide wide angle sound distribution. Reproducers listed incorporated the famous PM8-CT (and field coil equivalent G8-RT) extended-range high-fidelity speakers which, in the "Sector" Bass Reflex enclosure, effectively reproduce the full 50 to 10,000-cycle range. Suitable for broadcast monitoring and other applications requiring moderate level extended-range reproduction. Plywood construction, finished in two-tone brown lacquer. Height, 28". Radius, 13". Power input rating, 6 watts. 6-ohm voice coil.

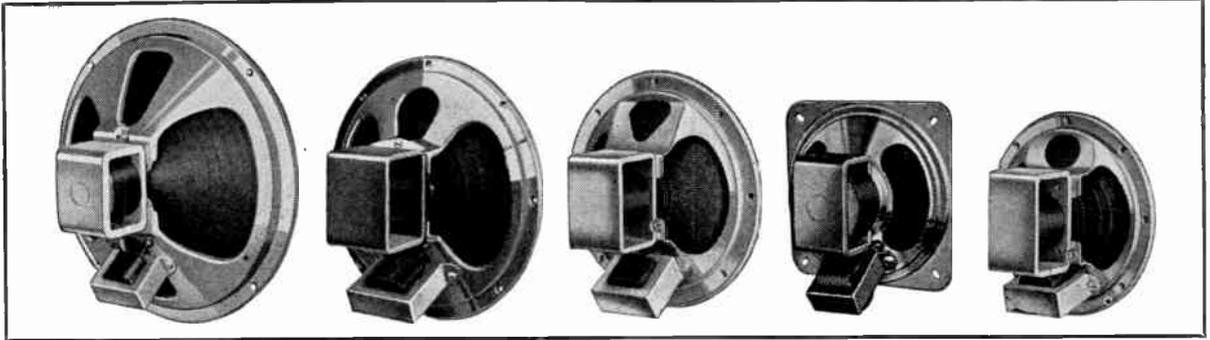

AB-20. "Sector Speaker." PM type. ST-615. List Price..... \$39.75  
AB-20. "Sector Speaker." For 105-120 v. 60-cy. operation. Complete with Field Supply, AC cord and switch. ST-640. List Price..... \$45.00

## FULL RANGE SOUND EQUIPMENT

Known all over the world for predominating high quality

### "Standard" SPEAKERS . . . For General Applications

Exceptionally good speakers for use in radio receivers, low power public address and the like. Not to be confused with many cheaply made inefficient speakers. All speakers are completely dust-proofed and all are supplied less transformer but with facilities permitting

easy attachment of the transformers listed on page D-25. Mounting dimensions are standard R.M.A. All field coil models (except 6 volt types) have bucking coil.

## FULL RANGE SOUND EQUIPMENT

*Known all over the world for predominating high quality*

### Concert SPEAKERS

These are heavy-duty highly efficient speakers and are widely used for Public Address and high quality Radio and Phonograph applications. All Speakers are designed so that they may be used in the Jensen BASS REFLEX Enclosures and Cabinets. All field coil models have bucking coils.

Facilities are provided for easily attaching any of the transformers listed on page D-25. Speakers are supplied without transformers attached unless specifically ordered, in which case increase list price by \$1.00, plus list price of transformer. For special field coils, increase speaker list price \$1.00.

† Gap Energy, expressed in millions of ergs, indicates relative efficiency of speakers.

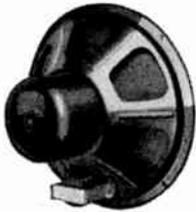

\*\* Correct field resistance for Jensen FS-1, FS-4 and FS-5 field supplies (300 volts).

\* High Frequency Response extended to 7500 cps. NOT recommended for General P.A. applications.

### SPECIAL EXTENDED RANGE — HIGH FIDELITY SPEAKERS

For those applications where high fidelity performance extending to 10,000 cps. is required, these Special Extended Range High Fidelity Speakers are recommended. Power handling capacity is limited by permissible distortion. They are designed for home and

studio use and will accommodate indoor audiences on the order of 100 people. They are highly qualified for monitoring in broadcast stations and for high fidelity reproduction of voice at relatively low levels.

MT CABINETS  
BR ENCLOSURES

CA CABINETS

VO ENCLOSURES

No. 3000 and 4000  
CABINETS

## JENSEN Enclosures . . . BASS REFLEX . . . PERI-DYNAMIC

The BASS REFLEX principle introduced four years ago by JENSEN is now a byword in the industry. For those who desire the maximum performance from a loudspeaker we recommend these cabinets employing BASS REFLEX. Through the use of this principle extra octaves of low frequency performance are available to an extent not possible even with an infinite baffle. A "BR" enclosure will improve the performance of any loudspeaker. For maximum value, however, we always recommend that the speaker be designed for Bass Reflex use. All Jensen Concert, Special and Auditorium Speakers (see page D23) are designed so that they may be used in Bass Reflex enclosures.

### TYPE CA CABINETS

Type CA Cabinets are arresting in distinctive beauty of form and finish. Beautifully-grained genuine striped walnut paneling, and attractive styling, make these cabinets suitable for practically any environment in studio, home, or institution. The Jensen Bass Reflex principle is of course employed. Two sizes are offered to accommodate twelve inch and fifteen-inch speakers. CA cabinets are an ideal choice for housing high-performance speakers such as the new extended-range high-fidelity coaxial units. They can of course be used for single radiator speakers with outstanding results.

Model	For Speaker Size	Dimensions	List Price
CA-12	12"	27 3/4" x 31 1/2" x 12"	\$39.50†
CA-15	15"	27 3/4" x 31 1/2" x 14"	46.50†

### TYPE MT CABINETS

For those who desire an inexpensive but durably constructed plywood cabinet employing Bass Reflex we now offer the type MT cabinet. These are identical in performance and construction to the well known type BR enclosures but are shipped completely assembled.

Model	For Speaker Size	Dimensions	List Price
MT-81	8"	17 1/4" x 23 3/8" x 11"	\$20.55†
MT-121	12"	23 1/4" x 30 1/8" x 12 1/2"	28.50†
MT-151	15"	25" x 33 3/4" x 13 3/8"	33.00†

### TYPE BR ENCLOSURES (Unassembled)

We think an unusually effective compromise has been made between appearance, performance and low cost in these model BR Bass Reflex enclosures. Durably constructed of plywood, finished in rich brown lacquer with contrasting trim. Shipped knocked-down for economy, but easy to assemble.

Model	For Speaker Size	Dimensions	List Price
BR-81	8"	17 1/4" x 23 3/8" x 11"	\$18.90
BR-101	10"	21 1/2" x 28" x 12 1/2"	23.50
BR-121	12"	23 1/4" x 30 1/8" x 12 1/2"	26.50
BR-151	15"	25" x 33 3/4" x 13 3/8"	31.00
BR-181	18"	27 3/4" x 36" x 15 3/8"	39.25

### TYPE VO ENCLOSURES (Unassembled)

In these enclosures the low frequency response has been purposely attenuated since they are intended primarily for the reproduction of speech. They are accordingly recommended for paging, announcing, and any application involving principally voice reproduction. Constructed of plywood and finished in neutral gray lacquer. Shipped knocked down in the interests of economy.

Model	For Speaker Size	Dimensions	List Price
VO-8	8"	9 3/4" x 11 1/2" x 6 1/2"	\$ 8.70
VO-10	10"	11 3/4" x 14 1/4" x 7 1/2"	10.00
VO-12	12"	13 3/4" x 16 3/4" x 9 3/8"	12.50

### WALL MOUNTING CABINETS

Model 3000 Cabinets are heavily built of hardwood panels finished in ebony black lacquer with natural walnut trim. They are designed for surface mounting on a wall and are recommended for school room, hotel room and extension speaker use. Will accommodate an 8" speaker. The front panel is equipped with three knock-out buttons so that volume controls and selector switches as required may be installed if desired. Model 4000 is larger but otherwise similar. It accommodates a 12" speaker and employs the Bass Reflex principle.

Model	For Speaker Size	Dimensions	List Price
3000	8"	12 1/2" x 16 1/2" x 8"	\$11.25
4000	12"	20" x 30" x 14 3/4"	35.00†

## FIELD SUPPLIES

### Ratings from 10 to 120 Watts

FS-10. Field Supply. Small and inexpensive, yet conservatively designed. May be mounted on amplifier chassis or in speaker cabinet. Easily wired to A.C. line and field from under-chassis lugs. Will supply 10 watts of field power to a 1250-ohm field. For example, it will supply 1-B12X ST-345, 1-UF-20 ST-631 or 2-E6RS ST-565, etc. Complete with 117-Z6GT tube.

List Price .....\$4.25

FS-11. Field Supply will fully excite two 10 watt 1,250-ohm fields in series, such as UF-20 ST-631, SFB-81 ST-634, AP-20 ST-642, B12-X ST-345, etc. Will also acceptably excite one Jensen Auditorium speaker (3000-ohm field) or two A-12 speakers with 5400-ohm fields in parallel. Has Hi-Lo tap. Complete with type '80 rectifier tube.

List Price .....\$10.50

All Jensen Field Supplies are designed for 105-120 volt 60-cycle operation only.

FS-10 FS-11

FS-1. Field Supply. Ruggedly constructed and conservatively rated. Will deliver 45 watts continuously. D.C. voltage output, 300 volts at full load. Equipped with fuse, terminal strips and Hi-Lo switch to control output. Has unusually low hum level at rated load. Complete with 5Z3 rectifier tube. List Price .....\$34.00†

FS-5. Field Supply. Similar in construction to model FS-4. Power output, 60 watts. Delivers 200 ma. at 300 volts. Equipped with twist lock plugs and receptacles for both A.C. input and D.C. output. 1 1/2% ripple voltage at rated output. Complete with 5Z3 tube. List Price .....\$45.00†

FS-4

FS-4. Field Supply. A heavy duty unit with exceptionally good power regulation. 1% ripple voltage at full 120 watts output. D.C. voltage output, 300 volts at 400 ma. at full load. Supplied with twist lock plugs and receptacles for both A.C. input and D.C. output. Has Hi-Lo switch. Complete with 2 5Z3 rectifier tubes. List Price .....\$62.50†

# Jensen

## FULL RANGE SOUND EQUIPMENT

Known all over the world for predominating high quality

### TRANSFORMERS FOR JENSEN SPEAKERS

#### ADJUSTABLE IMPEDANCE TRANSFORMERS

All Jensen Speakers are offered, (1) Less input transformer, (2) With Input transformer. Those speakers carried in our stock for immediate shipment are less transformer, but any speaker may be shipped complete with transformer attached when the proper transformer is specified. In such cases add the price of the transformer to the price of the speaker plus

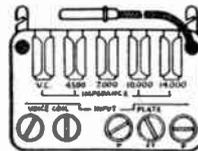

the extra charge for attachment of transformer. (\$0.50 for Standard Series; \$1.00 for all others.) The best way to order speakers is to order them less input transformer and then select the proper transformer from the list on this page. All speakers and transformers are arranged so that you can easily complete the assembly.

#### MODEL "X"

These transformers are for matching conventional "plate" impedance values. See illustration at right and observe how easily the adjustments are made with flexible lead and pin

tip jack. Impedance values are voice coil, 4,500, 7,000, 10,000 and 14,000 ohms and all except voice coil may be center tapped for push pull tubes.

Stock No.	Size	Voice Coil	For Use on Model	List Price
ZX1002	3/4 x 3/4	8	C8RS, C10RS, C12R	\$3.10
ZX1004	3/4 x 3/4	6	PM8C, PM12C, G12RS, PM12GS	3.10
ZX1005	3/4 x 3/4	8	PM12H, A12PM, B12X, A12, B15X	4.15
ZX1007	1 x 1	8	A15	6.50
ZX1012	3/4 x 3/4	6	G8RT, G10RT, G12RT, PM8CT, PM12CT, MT8 (CRT-12, Section Speaker, JCP-40, MT12)	4.15
ZX3000	1 x 1 1/4	8	All Auditorium Speakers	12.00†

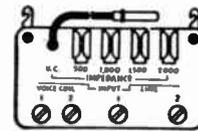

MODEL "X"

#### MODEL "Y"

Model Y is the same as Model "X" except it is for matching "line" impedance values; 500, 1000, 1500, 2000,

and voice coil. See illustration at right.

Stock No.	Size	Voice Coil	For Use on Model	List Price
ZY2001	3/4 x 3/4	6	PM8C, PM12C, G12RS, PM12GS	\$3.10
ZY2002	3/4 x 3/4	8	C8RS, C10RS, C12R, PAH8, SPIH8, SFB81, FAB8	3.10
ZY2003	3/4 x 3/4	8	PM12H, A12PM, B12X, A12, B15X	4.15
ZY2005	1 x 1	8	A15	6.50
ZY2007	3/4 x 3/4	4	E6RS, D8RS, PM8DS, PM6DS, PM5DS	2.25
ZY2008	3/4 x 3/4	6	G10RS, PM10GS, PM8GS, PM6GS	2.25
ZY2009	3/4 x 3/4	6	G8RT, G10RT, G12RT, PM8CT, PM12CT, MT8 (CRT-12, Sector Speakers, JCP-40, MT12)	4.15
ZY4000	1 x 1 1/4	8	All Auditorium Speakers	12.00†

MODEL "Y"

#### MODEL "P" AND "L"

These Transformers have somewhat less convenient method for making adjustments in the terminal board since a soldering iron is required. But they are lower priced than Models "X" and "Y" and when used in proper application are perfectly

satisfactory. Center tap is provided on Types ZP-1021 and ZP 1022, not on others. ZP-1020 and ZL-2020 illustrated at right.

Stock No.	Size	Voice Coil	For Use on Model	List Price
ZP-1020	1/2 x 1/2	4	H4S, H5S, H6S, F8RS, PM4FS, PM5FS, PM6ES, PM8ES	\$1.45
ZP-1021	3/4 x 3/4	4	E8RS, D8HS, PM8DS, PM6DS, PM5DS	2.00
ZP-1022	3/4 x 3/4	6	G10RS, PM10GS, PM8GS, PM6GS	2.00
ZL-2020	1/2 x 1/2	4	H4S, H5S, H6S, F8RS, PM4FS, PM5FS, PM6ES, PM8ES	1.45

### FIXED IMPEDANCE TRANSFORMERS

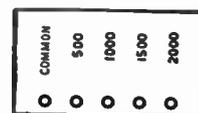

It is easy to select the proper fixed impedance transformer for any Jensen speaker from the list below. If a design is required not included in the list give complete information regarding primary and voice coil impedance plus the size

transformer wanted. Increase list price of transformer 25% for special designs. Example, list price of 3/4 x 3/4 transformer in special design is \$1.70 plus 25%

FULL RANGE SOUND EQUIPMENT

Known all over the world for predominating high quality

## JENSEN *Speech Master* REPRODUCERS

AP-10

**Phone Communication:** For amateur, commercial, police, aviation, as separate unit or integral equipment.

**C W Telegraph:** Aids selectivity, helps signals over-ride QRM and QRN. Husky voice-coil to withstand keying transients.

**Intercom and PA:** For modern Intercom, Paging and PA at moderate levels. Good "talk-back" performance.

**Short-Wave Listening:** Better than your regular speaker. Can be used on any receiver.

### 5-Watt "AP-10, 11" for DESK AND PANEL

The truly remarkable performance of these new "Speech Masters" is due to the Peri-Dynamic principle and special radiating system. Normal room level requires less than 0.5 watt input; maximum rating of 5 watts on speech insures dependability. Speech reproduction is especially clear, crisp, intelligible . . . yet if required, music can be reproduced with better quality than that of the average "midget" radio.

Extra-sturdy construction, overall mechanical protection, double dust-proofing, beautiful streamlined design, exceptional acoustic performance . . . all these combine to set AP-10 and AP-11 "Speech Masters" entirely apart from conventional speakers.

**AP-10 Desk Type "Speech-Master."** Permanent Magnet design. For desk or wall mounting. Complete with "tilt" adjustment and base. Double dust-proofed, fully enclosed and protected. Internal mounting bracket for 1/2" x 1/2" transformer. R.C. cord 36" long. Height 6 3/4"; depth 5 1/8"; diameter 5". Shipping weight, 5 1/4 lbs. Attractive Hammered Gray finish.

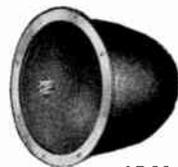

AP-10 ST-590. (4 ohm v.c.). List Price.....\$10.95

AP-10 ST-591. (45 ohm v.c.). List Price..... 10.95

**AP-11 Panel Type "Speech-Master."** Similar to AP-10 less base and swivel bracket. Has clearance eyelets for mounting screws. Mounts in 4 27/64" cut-out, extends 4 1/2" inside panel (from front surface). Screws and drilling template included. Shipping weight, 3 3/4 lbs.

AP-11. ST-592. (4 ohm v.c.). List Price.....\$8.90

AP-11. ST-593. (45 ohm v.c.). List Price..... 8.90

AP-11

### 6-Watt "AR-10" REFLEX SPEECH MASTER FOR GENERAL APPLICATIONS

This new Jensen reflex type "Speech Master" has many applications for paging, intercom and call systems operating at medium levels under moderate noise conditions. Specially designed reflex horn increases efficiency in mid-frequency range, giving added effectiveness and "punch" to speech quality. Though not classified as a strictly weatherproof device, reflex construction prevents direct access of rain and snow to speaker diaphragm. Voice coil impedance, 4 ohms or 45 ohms. Power rating, 6 watts. Internal space for 1/2" by 1/2" transformer (designs stocked for 4-ohm v.c. only). Overall diameter 10". Depth, 8". Complete with mounting bracket, P.M. design.

AR-10. "Speech Master." 4 ohm v.c. ST-643. List Price.....\$16.50

AR-10. "Speech Master." 45 ohm v.c. ST-644. List Price..... 16.50

### 25-Watt "AP-20" SPEECH MASTER FOR HIGH-LEVEL PAGING AND CALL SYSTEMS

The AP-20 "Speech Master" is heavy-duty unit for high level paging and call systems in noisy industrial installations. Rated maximum input, 25 watts. Voice coil impedance, 8 ohms. Furnished with eyebolt for overhead suspension but less EA-5 stand required for wall mounting. Separable plug for voice coil connections. Overall diameter 13 1/2". Depth 9".

AP-20. "Speech Master." PM design. ST-641. List Price.....\$45.00

EA-5. Adjustable Stand. List Price..... 5.00

PAH-8. Driver Speaker only. PM design. ST-563. List Price.....\$20.00

FAB-8. Driver Speaker only. Field resistance, 1250 ohms. Requires 10 watts excitation. ST-582. List Price ..... 20.00

# ATLAS SOUND CORPORATION

## "DYNAMIC REFLEX" SOUND PROJECTORS

The utmost in sound projection can be expected of the "Dynamic Reflex" Projectors which are highly efficient . . . storm-proof . . . rugged and compact. Constructed of heavy gauge steel spinings and sturdy iron castings, the "DR" Projectors are finished in a combination battleship gray enamel and gun-metal shrivel.

**MODEL DR-42—3½ FT. PROJECTOR**—has a bell diameter of 20", overall length of 18", air column length of 3½ ft., acoustic cut-off at 135 cycles, projection angle 80°. Universal strap-iron mounting bracket supplied. Less Driver Unit. . . . \$24.50 LIST

**MODEL DR-54—4½ FT. PROJECTOR**—has a bell diameter of 25", overall length of 24", air column length of 4½ ft., acoustic cut-off at 110 cycles, projection angle 90°. Universal strap-iron mounting bracket supplied. Less Driver Unit. . . . \$36.75 LIST

**MODEL DR-72—6 FT. PROJECTOR**—has a bell diameter of 29", overall length of 28", air column length of 6 ft., acoustic cut-off at 85 cycles, projection angle 100°. Universal cast malleable iron mounting bracket supplied. Less Driver Unit. . . . \$55.00 LIST

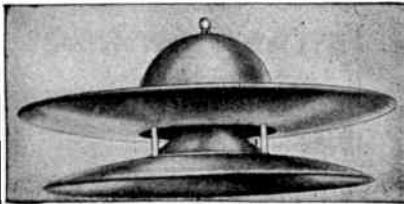

## "DYNA-FLUX" P.M. DRIVER UNITS

Designed for "DR" Projectors

Highest conversion efficiency combined with improved frequency response makes these P.M. compression units the best obtainable. Exclusive Atlas Sound features include non-corrosive diaphragms, best grade ALNICO magnets, and "sealed-tite" waterproofing. Special heat-treating, anodizing, parkerizing, and electro-chemical processes insure trouble-free operation. Twelve months guarantee. **MODEL PM-25 STANDARD 18-25 WATT UNIT**—has a voice coil impedance of 15 ohms. Frequency response: 60-5500 cycles. Recommended for critical public address applications. Thread size: 1¼"-18 to fit "DR" Projectors. Baked gray and green two-tone enamel finish. . . . \$50.00 LIST

**MODEL PM-26 "HI-FI" 18-25 WATT UNIT**—incorporates a special high-fidelity sound chamber. Voice coil impedance of 15 ohms. Frequency response: 55-6000 cycles. Recommended for ultra-high fidelity applications. Thread size: 1¼"-18 to fit "DR" Projectors. Baked gray and green two-tone enamel finish. . . . \$55.00 LIST

## 360° "CHANDELIER" SPEAKER BAFFLES

Radial sound dispersion is uniform over a complete 360° area with minimum of feedback. Baffles are constructed of heavy gauge steel finished in pearl gray enamel. Large mounting loop permits quick, simple suspension.

**MODEL L-360—12" SPEAKER BAFFLE**—for all 12" speakers. Overall diameter 31", height 14". . . . \$29.50 LIST

**MODEL L-360SL—BAFFLE COMPLETE WITH 12" SPEAKER**—The 12" speaker used is a P.M. type with a normal power of 12 watts, peak 16 watts. V. C. imp. 6-8 ohms. . . . \$43.50 LIST

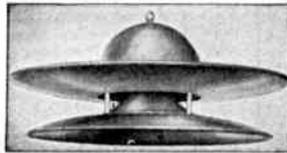

**MODEL M-360—8" SPEAKER BAFFLE**—for all 8" speakers. Overall diameter 24", height 15". . . . \$19.50 LIST

**MODEL M-360HL—BAFFLE COMPLETE WITH 8" SPEAKER (12 Watts)**—Speaker used is a P.M. type with a normal power of 12 watts, peak 16 watts. V. C. imp. 6-8 ohms. . . . \$35.00 LIST

**MODEL M-360LL—BAFFLE COMPLETE WITH 8" SPEAKER (7 Watts)**—Speaker used is a P. M. type with a normal power of 7 watts, peak 10 watts. . . . \$26.50 LIST

## "CHANDELIER, JR." P.M. SPEAKER

Ideal for call systems . . . will also reproduce music with good fidelity. Heavy gauge metal spinings finished in pearl gray enamel. Overall diameter 17", height 7", weight 6 lbs. The S-360SP comes complete with 5" P.M. cone unit. Rating 5 watts, v. c. imp. 3.5 ohms. **MODEL S-360SP** . . . \$14.50 LIST

## ALL-STEEL PARABOLIC BAFFLES FOR 6", 8", 12" SPEAKERS

ALL-STEEL "armor plate" baffles will stand up under the severest service. Exclusive inter-lock seal eliminates rain leakage at the seam. No drilling required as all speaker mounting holes are punched at the factory. Cadmium-plated hardware, and two suspension loops with each baffle. Finish is a durable blue-gray weather resistant enamel.

**MODEL SM-6 BAFFLE FOR 6" SPEAKERS**—Bell opening 11½", bell length 6", total length 10½", shipping weight 4 lbs. . . . \$9.00 LIST

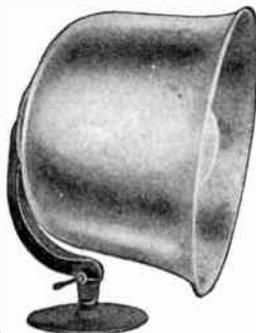

**MODEL SM-8 BAFFLE FOR 8" SPEAKERS**—Bell opening 17½", bell length 8", total length 14", shipping weight 5 lbs. . . . \$10.50 LIST

**MODEL SM-12 BAFFLE FOR 12" SPEAKERS**—Bell opening 20", bell length 8", total length 18", shipping weight 9 lbs. . . . \$12.00 LIST

## BAFFLE FIXTURES

**MODEL SA-10 SADDLE FIXTURE**—includes saddle bracket, ratchet, and wing nut arrangement. Lower casting has ½" female pipe thread for attachment to standard pipe fittings. . . . \$3.00 LIST

**MODEL ST-8 COMPLETE FIXTURE AND BASE**—(illustrated) with heavy iron pipe stem and sturdy base casting. Height 12", base 8". . . . \$4.75 LIST

## WX "MARINE HORNS" WITH P.M. SPEAKERS

"WX" Marine Horns will withstand a direct driving rain without damage to the cone speaker. Spinings are heavy gauge metal, finished in weatherproof battleship gray enamel. Speaker hardware supplied.

**MODEL WX-8 HORN FOR 8" SPEAKERS**—has a bell opening of 18" and a depth of 12", shipping weight 15 lbs. . . . \$21.00 LIST

**MODEL WX-8HL HORN COMPLETE WITH 8" SPEAKER (12 WATTS)**—P.M. Speaker has a normal operating power of 12 watts, peak 16 watts, V. C. imp. 6-8 ohms. Shipping weight 22 lbs. . . . 36.50

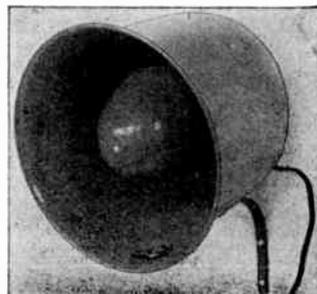

**MODEL WX-8LL HORN COMPLETE WITH 8" SPEAKER (7 WATTS)**—P.M. Speaker has a normal operating power of 7 watts, peak 10 watts, V. C. imp. 6-8 ohms. Shipping weight 20 lbs. . . . 28.50

**MODEL WX-B MOUNTING FIXTURE AND BASE**—has a heavy cast back plate, goose-neck, and base finished in a durable black crackle. . . . 7.00

## "MARINE MIDGET" P.M. SPEAKER

Inverted reflex design offers air column of 15" . . . which allows cone to operate with maximum efficiency. WX-5SP is ideal as a "talk-back" unit in call systems. Entirely storm-proof with speaker protected against mechanical damage. Constructed of heavy gauge metal finished in durable battleship gray enamel. Steel mounting bracket supplied. P.M. Speaker unit supplied has a power rating of 5 watts, v. c. imp. 3.5 ohms. Size of horn: Bell 10", Depth 8", weight 5 lbs.

**MODEL WX-5SP HORN AND SPEAKER** \$13.50 List

We reserve the right—during the present emergency—to change prices and mechanical specifications without notice.

# ATLAS SOUND CORPORATION

## "MUSIC BOX" Walnut Cabinets

Attractive natural grain walnut cabinets with musical motif, and distinctive gold grille cloth. Sturdy glue-block construction.

- MODEL AE-8 FOR 8" SPEAKERS**—Dimensions: 12½" high, 11" wide, 7½" deep at top end. Weight 4 lbs. \$6.25 LIST
- MODEL AE-12 FOR 12" SPEAKERS**—Dimensions: 15½" high, 14" wide, 10" deep at top end. Weight 7½ lbs. \$8.25 LIST
- MODEL AE-15 FOR 15" SPEAKERS**—Dimensions: 20" high, 18" wide, 12" deep at top end. Weight 15 lbs. \$11.75 LIST

## "PERI-CONIC" Triangular Cabinet

### ★For 12" Speaker

Triangular cabinet permits corner, side-wall mounting, and cluster arrangements. Bass reflex aids response of any 12" speaker. Sturdy cabinet of natural walnut, with gold grille cloth. Dimensions: overall height 19½", width 19", maximum depth 9", inside depth 7".

**MODEL TR-12 ENCLOSURE**.....\$13.00 LIST

## "TWO-WAY" ENCLOSURE

### ★For 8" Speaker

Offers two-directional sound projection with the use of a single 8" speaker. Case is of pressed steel finished in gray enamel. Metal-cloth grille for both sides of the enclosure. Convenient adjustable mounting brackets. Speaker hardware supplied. Case diameter 10", depth 5". Wt. 4 lbs.

**MODEL TW-8 ENCLOSURE**.....\$7.00 LIST

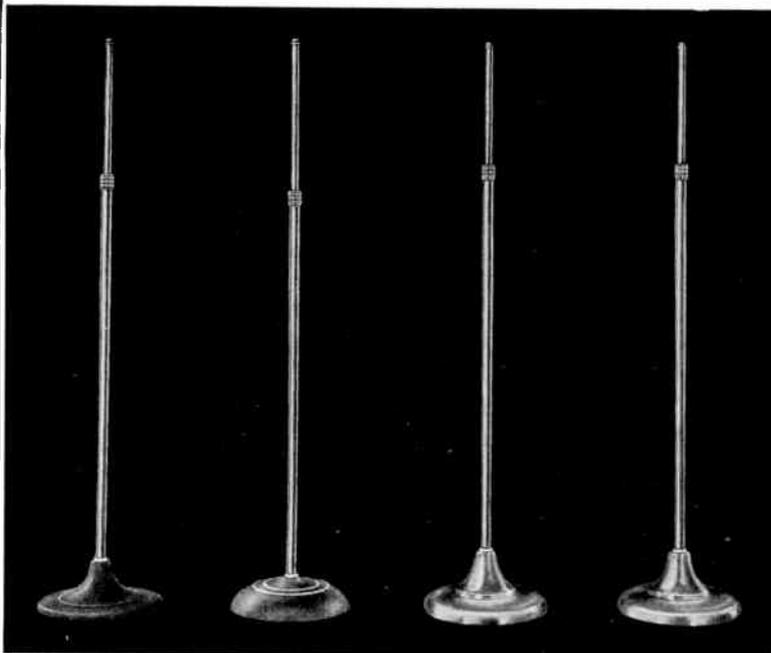

## SPEAKER POWER VOLUME CONTROL

**MODEL RC-1 VOLUME CONTROL**—Constant impedance control for use across voice coil of any speaker, providing uniform tapered, gradual control from full ON to OFF position. Includes special tapered wire wound potentiometer, fixed vitreous resistor for power absorption at minimum volume settings, etched indicator plate, and red molded bar knob.

mounted on gun-metal finished steel case (Atlas CB Box). Diameter 3". \$3.50 LIST

**MODEL CB "UTILITY" CONNECTOR AND CONTROL BOX**—Identical to the one used for RC-1 Control. For switch mountings, connector plug-ins, microphone connection terminals, and other applications. Snap-buttons cover holes not in use; rubber grommet supplied. \$1.00 LIST

## ATLAS "Velvet Action" Microphone Floor Stands

MS-8C

MS-9C

MS-11C and MS-12C

MS-18C

Velvet Action means no slipping . . . no scratching . . . no noise. Positive assurance against sudden dropping of the telescoping tube, and subsequent damage to the microphone. Telescoping sections are of heavy tubing with triple "super-chrome" plating. All models have a 7/8" diameter outer tube, and a 3/4" inner tube. Microphone thread size is 3/8"-27 male. All bases furnished with rubber bumper pads to protect floor surfaces.

MODEL	BASE FINISH	BASE DIAMETER	ADJUSTMENT	WEIGHT	LIST PRICE
MS-8C	Black Crackle	10"	36 to 67"	8 lbs.	\$7.25
MS-9C	Gun-Metal, Red Rings	10½"	37 to 68"	9 lbs.	9.00
MS-11C	"Super-Chrome"	10½"	38 to 69"	11 lbs.	10.00
MS-12C	Gun-Metal Crackle	10½"	38 to 69"	11 lbs.	8.50
MS-18C	"Super-Chrome"	10½"	38 to 69"	18 lbs.	12.50
MS-10C*	Gun-Metal Crackle	16½"	38 to 69"	10 lbs.	9.50
MS-31C†	Gun-Metal, Red Rings	10½"	19 to 67"	9 lbs.	10.50

\* MS-10C has a three-legged cast base which offers the utmost in stability. † MS-31C has a "take-down" tube arrangement of three sections. Base is same as the MS-9C shown above.

## "VELVET ACTION" DESK STANDS

Tubes on all stands finished in triple-plate "super-chrome." Bases available in chromium or black crackle finish. Adjustable models DS-3 and DS-4 use the exclusive "Velvet Action" friction clutch. All desk stands have a 6" base mounted on scratch-proof felt bumpers. The TS-5 is a special Banquet Stand using the 3/4" and 5/8" telescoping tubes as used on the Atlas Floor Stands, and a base of 8". Standard 3/8"-27 male microphone thread on all models.

Model DS-3

MODEL	TYPE	HEIGHT	BASE	LIST PRICE
DS-1	Fixed	8"	Black Crackle	\$2.25
DS-2	Fixed	8"	Chromium	3.25
DS-3	Adjustable	10 to 15"	Chromium	4.50
DS-4	Adjustable	10 to 15"	Black Crackle	3.50
TS-5	Adjustable	18 to 32"	Gun Metal Crackle	6.50

## "HOLD-TITE" SHIELDED CONNECTORS

F-1 Female Connector

Accommodates mike cable sizes up to 5/16" o. d. Constructed of solid brass machined parts, chrome-plated. Ingenious internal clamp for shield contact, spring extension for cable protection.

**MODEL F-1 FEMALE CONNECTOR**—Thread size: Female 3/8"-27, permitting use with Atlas and other standard connectors. \$ .55 LIST

**MODEL M-1 MALE CONNECTOR**—Thread size: Male 3/8"-27, to fit F-1 and other female connectors. \$ .45 LIST

**MODEL P-1 PHONE PLUG**—Thread size: Male 3/8"-27. Use with F-1 to make a handy combination connector. \$ .50 LIST

**MODEL C-1 CHASSIS CONNECTOR**—Thread size: Male 3/8"-27. Practical terminal for input circuits. \$ .35 LIST

We reserve the right—during the present emergency—to change prices and mechanical specifications without notice.

# KAINER SOUND PROJECTORS

## NEW KAINER "High Intensity" REFLEX TRUMPETS

Another Forward Step In Sound Projection! The same practical and unique construction that has been used so successfully in all KAINER Weatherproof and Reflex Horns is the basis of the new design of these Reflex Trumpets. Like all other KAINER Projectors, a special spun steel alloy is employed, assuring excellent acoustic properties, ruggedness and durability.

The mounting fixture supplied with both the R-T21 and R-T25 models is easily adjustable to all practical angles and is constructed of cast malleable iron with rust protective finish. The driver unit is directly attached to a cast section which is integral with the primary reflex tube and mounting fixture, insuring a rigid, permanently aligned assembly. The use of a casting which holds the secondary air column in place assures a perfect alignment of the air column and rigidity of the entire assembly.

These NEW Reflex Trumpets are beautifully finished with gray high lustre weatherproof baked-on art enamel which adds to the acoustic value and durability of the finish.

A moulded rubber rim attached to the beading on the edge of the bell is supplied as standard equipment, as illustrated. Both models are equipped with a threaded attachment 1 1/2 inches diameter by 18 thread to use KAINER P. M. Driver Units or any other standard driver units.

**Permanent Magnet Driver Units**—Manufactured to the highest electrical and mechanical standards and of the finest available materials. Three models designed to take care of all public address work, rated at the same handling capacity in watts. The chief difference is in the increased efficiency in power output and in total range evident in the larger models. Diaphragms are breakdown proof at the rated capacity of 25 watts continuous operation and the unit is waterproof from all angles.

All units are equipped with 1 1/2" by 18 thread connection to fit either the R-T21 or the R-T25 Trumpet models.

Model R-T25

Overall Length ..... 21"  
 Bell Diameter ..... 25"  
 Acoustic Length ..... 4' 10"  
 Projection Angle ..... 90 degrees  
 Ship. Wt. .... Approx. 20 lbs.

List Price ..... **\$37.00**

Model No. DU-2

Continuous Power Cap. 25 watts  
 Freq. Response... 60-5500 cycles  
 Rec. Trumpets... R-T21 & R-T25  
 Net Weight..... 7 lbs.  
 List Price ..... \$53.00

Model No. DU-1

Continuous Power Cap. 25 watts  
 Freq. Response... 70-5000 cycles  
 Rec. Trumpets... R-T21 & R-T25  
 Net Weight..... 4 lbs.  
 List Price ..... \$33.00

Model R-T21

Overall Length ..... 18"  
 Bell Diameter ..... 21"  
 Acoustic Length ..... 4'  
 Projection Angle ..... 80 degrees  
 Ship. Wt. .... Approx. 16 lbs.

List Price ..... **\$23.00**

## All Steel Exponential Sound Projector for 12" Speakers

Model J-12 all steel sound projector is the result of severe laboratory and field tests. It will accommodate all types of 12" speakers with or without matching transformers, including those with extra heavy permanent magnets.

Sturdily constructed of heavy spun steel alloy, it is light in weight yet strong enough to stand the abuse of heavy vibration under load as well as rough handling.

Breather opening is screened. Entire projector is beautifully finished with high lustre, baked-on, weatherproof art enamel. The malleable iron fixture to which the lower bracket can be attached is welded to the baffle and extends up the sides to include two of the speaker bolts which assures the minimum of vibration in the entire instrument.

The malleable iron base and bracket carries a tilting dog-toothed adjustment with a swivel and lock nut.

Model J-12

Overall Length ..... 20"  
 Circular Mouth Opening..... 17"  
 Flare Extension ..... 11"  
 Shipping Weight ..... 16 lbs.

J-12—Base only, includes fixture with 1/2" I. P. S. tapping..... **\$15.00**

J-12-B—Adjustable bracket with base as illustrated ..... \$2.50

J-8-B—Mounting fixture, includes flange elbow and pipe connection ..... \$1.00

## All Steel Exponential Sound Projector for 8" Speakers

Model J-8 is specially designed to accommodate all types of 8" speakers and is very similar in construction to Model J-12 above.

The sturdy spun steel alloy construction is light in weight yet very strong. The handle is in only two pieces, with the exclusive KAINER wide fit feature which overcomes vibrations under extreme load.

Built with perforated breather opening. Both baffle and bracket are attractively finished with a new high lustre, weatherproof, baked-on art enamel.

The malleable iron fixture to which the lower bracket extension can be attached is firmly welded to the baffle, and is tapped so that any distance from the floor, wall or ceiling may easily be obtained by using 1/2" pipe, nipples, couplings, etc.

Bracket attachment furnished separately consists of flange base with length of pipe and elbow for either wall or upright mounting.

Model J-8

Overall Length ..... 17"  
 Circular Mouth Diameter..... 14"  
 Flare Extension ..... 9"  
 Shipping Weight ..... 8 lbs.

J-8—Baffle  
 List Price ..... **\$12.25**

J-8—Mounting Fixture Only—List Price..... \$1.00

## All Steel Exponential Sound Projector for 6" Speakers

Model J-6 is used extensively in parking lots, garages, small playgrounds, hallways, stock rooms, hotels, hospitals, warehouses and other places where call systems are needed. A perfect accessory to installations where 6" speakers must withstand all weather conditions and heavy service. Severe tests have proved that the Model J-6 Baffle produces clearer and more perfectly projected speech than when unprotected speakers or flat type speaker housings are used.

Has perforated breather opening. The shell is built to accommodate any 6" P.M. speaker with matching transformer.

Constructed of heavy spun steel alloy all parts attractively finished in the new high lustre, weatherproof, baked-on art enamel. The malleable iron fixture is welded to the baffle and tapped so that any distance off the wall or ceiling may be obtained by attaching required length of 1/2" pipe, nipples, couplings, ect., thus insuring a permanent and rigid installation.

Model J-6

Overall Length ..... 9 1/2"  
 Circular Mouth Opening..... 10"  
 Flare Extension ..... 5"  
 Shipping Weight ..... 4 1/2 lbs.

J-6—Baffle  
 List Price ..... **\$7.50**

J-6B—Mounting Fixture Only—List Price..... \$1.00

# KAINER SOUND PROJECTORS

## CHANDELIER BAFFLE

A late Kainer development in speaker baffles for uniform coverage. Eliminates areas of concentrated sound, tends to reduce feed back. This one baffle replaces multiple speaker installations when desirable and numerous wall baffles. Ideal for restaurants, clubs, cabarets and dance halls where the necessity of projecting sound close to the performers is important—recommended only for ceiling heights above 12 feet. Suspended from ceiling with link chain or sash cord—easy to install. Accommodates any heavy duty 12" P.M. Speaker.

CONSTRUCTION: Spun steel alloy finished in attractive grey baked enamel. SIZE: Diameter, 32"; height 17".

PRICE: Complete without speaker, List.....\$30.00

## AIR COLUMN HORN Model A-C-8

Specially effective for all outdoor work: Baseball Parks, Circuses, Athletic Fields, and all installations where power and direction of sound are particularly required. ¶The A-C-8 Air Column Horn is well suited for applications where sound must be projected great distances and with the minimum of feedback. When using a microphone under conditions where ordinary baffles would be unsatisfactory, this horn with its uni-directional qualities will allow in most cases double or more power to be used before the feed back point is reached. ¶The back of this horn is completely closed, eliminating to the best possible extent, interference to person or persons using a microphone, and allowing the best possible placement of speakers either directly above and slightly forward of the microphone, or to the left or right of the microphone and slightly forward. Both of these positions eliminate bothersome "double talk" and "lag" which is objectionable to audiences. This method of placement gives the best illusion that the sound is coming directly from the person using the microphone. ¶The bracket attachment is welded to the horn, properly balanced, and mounting fixtures with base can be furnished as a complete unit, permitting exceptionally convenient means for installation. ¶THE KAINER AIR COLUMN HORN is constructed of heavy spun steel alloy, light in weight, yet very strong. All parts finished with durable baked art metal enamel. Designed for 8" HEAVY DUTY Speaker—Bell Opening 24"—Overall Length 36".

Horn Complete with Mounting Fixture, but without Base and Adjustable Attachment.....List \$34.50  
Base and Fixture.....List \$5.00

## KAINER WEATHERPROOF HORNS Model WH-5

### FOR 5" SPEAKERS—COMPACT AND EFFICIENT

The inverted reflex design is similar to that used in the WH-6 and WH-8 models, which aids materially to the performance of any good cone speaker. ¶For all purpose use, including use as a microphone in Talk-Back installations—wide frequency range, good for both music and voice. ¶The very substantially constructed bell and reflex cone are of spun steel alloy, finished with gray baked art metal enamel. The bell and cone are mounted on an aluminum alloy casting to which the base fixture is also attached. This insures a rigid assembly and makes it convenient to install 5" cone speaker direct to the aluminum casting.

#### SPECIFICATIONS

Over All Length—8". Bell Opening—11". Ship. Wt. 5 1/2 lbs.  
Horn complete with base .....List \$10.

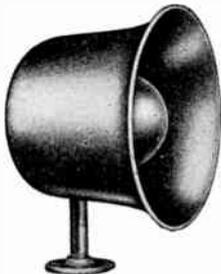

### Model W-H-8

Constructed for all unsheltered outdoor and indoor use: Factories, Airports, Sound Trucks, Police and Fire Cars, Stadiums, etc., etc. ¶Exceptionally sturdy construction—Possible physical damage to the cone speaker is overcome due to its inverted position. The speaker faces the inside of the horn. ¶This construction will withstand exposure to rain, snow and wind. ¶The bell and housing are spun of heavy gauge steel alloy, light in weight, yet very strong; and all parts are heavily finished with a durable baked art metal enamel. ¶Bracket attachment is welded to the horn, properly balanced, and mounting fixture with base can be furnished as a complete unit, permitting exceptionally convenient means for installation on Sound Trucks, Wall, or Portable Use. ¶Designed for 8" HEAVY DUTY Speaker. Bell Opening 22 1/2". Over-All Length 17 1/2"—Height from Base 27".

Horn Complete Without Base and Fixture.

List \$25.85

Base and Fixture .....List \$2.50

### Model WH-6

Construction similar to Model WH-8 except size is for 6" speaker. ¶Used for all unsheltered outdoor and indoor installations, factories, airports, sound trucks, police and fire cars, stadiums, etc. ¶The bell and speaker housing are of spun heavy gauge steel alloy, all parts finished with a durable art baked enamel. ¶Heavy aluminum casting firmly holds speaker. Mounting is attached to casting on which the speaker is mounted. ¶Very sturdy construction throughout. Designed for 6" Heavy Duty P.M. Speaker.

#### SPECIFICATIONS

Bell Opening—15". Over All Length 12".  
Shipping Weight—11 lbs.

Horn complete with base and mounting fixture .....List \$15.00

# Cinaudagraph Speakers, inc.

## REPLACEMENT SPEAKERS 2" TO 12"

Cinaudagraph Speakers offer the most complete range of speakers available, for replacement, small P. A. installation and inter-office communicators. Each speaker has the inherent Cinaudagraph quality.

### TRANSFORMERS

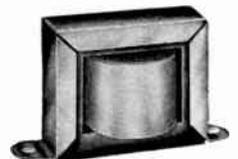

#### Universal or Single Output and Line

Transformers are for general applications, and are arranged so that they can be mounted on the speaker. The Universal Transformers are tapped on the primary winding to provide matching impedances to the output tube or line as indicated. The Universal Output Transformers are center tapped and provide primary impedance terminations for the popular output tubes. The Universal Line Transformers are tapped to provide matching impedances of 500, 1000, 1500 ohms.

The transformers listed below have been especially designed for use with these speakers. They are highly efficient and provide the correct matching for maximum output efficiency. Model 1290 voice coil to grid transformer is enclosed in a metal shell.

# Cinaudagraph Speakers, inc.

## PUBLIC ADDRESS SPEAKERS AND AIR COLUMN UNITS

The ultimate in precision built, high quality reproducers for the largest or smallest installation.

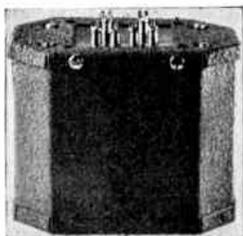

There is a Cinaudagraph speaker for every P.A. requirement from inter-communicating systems to stadium sound projection. All Electro-dynamics have bucking coils.

The speakers listed, with the exception of the 15" and 18", are provided with transformer mounting brackets so that transformers can be easily attached. The speakers, however, are supplied without transformers attached.

Cinaudagraph Air Column Sound Projectors differ from the conventional exponential horn unit. The high efficiency and broad frequency response of these cone type speakers overcome the various deficiencies and failures of the conventional dynamic units.

The air column speakers are made to withstand rigorous conditions imposed by weather and rough handling out-of-doors. The composition of the tough and pliant weather proof cone eliminates failures due to the crystallization of the flexing portions of the conventional brittle metal diaphragms.

The wide range transformers are for use where the highest efficiency is required. These transformers are sealed in metal cases fully protected against moisture, but due to their design can not be mounted on the speaker.

DISCONTINUED FOR DURATION

## LINEAR STANDARD SPEAKERS

CINAUDAGRAPH linear standard speakers represent the closest approach to the ideal from the viewpoint of uniform response, low wave form distortion, high efficiency and dependability. These speakers are used extensively for high fidelity service in broadcast monitoring, custom built radio sets, high quality PA, frequency modulation receivers, motion picture sound work, and wherever exacting requirements must be met.

- **HIGH FIDELITY** — The unequalled high fidelity characteristics of the linear standard speakers are achieved through the use of special polyfibrous cones plus efficient magnetic structures.

- **LOW DISTORTION** — Both the electrical and mechanical elements of these speakers have been carefully related to effect a minimum of harmonic distortion combined with a high rate of decay, which overcomes the detrimental effects of "tails" and "hangovers."

The speakers listed, with the exception of the 15" and 18", are provided with transformer mounting brackets so that transformers can be easily attached. The speakers, however, are supplied without transformers attached.

**NOTE:**—Due to the extreme high-fidelity response on the linear standard speakers it is important that the input or the output of the amplifying system should be free from all forms of distortion. If such a combination is not available then it is recommended that the public address series of speakers be used.

DISCONTINUED FOR DURATION

## FM-12 CINAXIAL SPEAKER AND WOOFER - TWEETER SERIES

*The Ideal Speaker for FM, Broadcast Monitor,  
Auditorium, or Other High Fidelity Service*

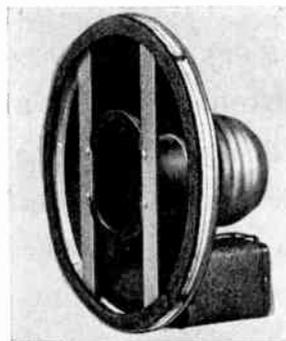

### MODEL FM-12

#### ● Frequency Response

The lows are propagated by a heavy 12-inch speaker capable of efficient response from 45 cps. to 2500 cps. with proper baffle. The higher frequencies are reproduced by the smaller unit which is designed to function efficiently from 2000 cps. to 15,000 cps.

#### ● Power

There is a limit to which power can be applied without distortion. Much depends upon the perfection of the audio system. Under ideal conditions the Cinaxial unit will handle up to 15 watts easily. However, the very nature of FM requirements does not call for "Power"; rather, fidelity of tone at room level.

FM-12

CINAUDAGRAPH Permanent Magnet Woofer Speakers are specifically designed for low frequency service in woofer-tweeter combinations. In addition to excellent low frequency response, the design effects negligible cone break-up and minimum "hangover."

Model	Size	Undist. Norm. Watts	Peak Watts	Factor of Merit	Voice Coil Dia.	Ship. Wt.	List Price

CN1500V	— 1500-cycle cross over network to 6 to 8 ohm output.						.....
CN1500L	— 1500-cycle cross over network to 500 ohm line.						.....

LM-5-15T—new high frequency permanent magnet tweeter fully enclosed, response—5DB, 1,500 to 17,000 cycles, for 15 watt combinations. For 20 to 30-watt woofer-tweeter combinations, two of these tweeters should be used.

#### ● Network

It is essential that a correctly designed network be employed when using a two speaker system to allocate properly the frequencies to their respective speakers. The FM-12 Cinaxial system utilizes a cross over frequency of 1500 cps. which has been ascertained to be the most efficient point of change on this system. Networks may be purchased separately—see listing above.

## ANNOUNCING THE NEW D20 SERIES DYNAMIC MICROPHONES

A quality microphone with extended frequency range and conventional dynamic response characteristics built with Universal's new "DYNOID" construction.

Most modern in appearance with departure from the conventional streamlining in that while it has all the elements of streamlined motion, it has a definite stability which enhances its lines. Its design makes it fit in the most modern of settings as well as most classic and yet it is rugged enough for industrial applications.

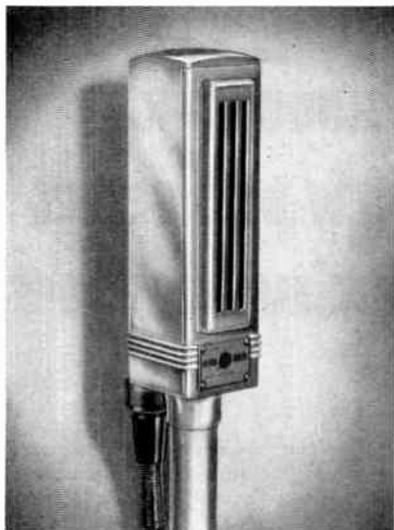

In addition to the rugged "DYNOID" construction, several other features make the D20 Series outstanding microphones. Mounted on substantial "Micro-Adjust Swivel," the unit may be positioned anywhere throughout a 60° angle without disturbing the balance or appearance of the microphone. The Universal "Micro-Adjust Swivel" brings to the Public Address field the first and only swivel action which is smooth and that stays put. It responds in a velvet smooth manner without being frail and indeterminate in position. A definite departure from the "knuckle-joint" swivel prevalent in use.

Internal element is mechanically isolated, minimizing "stand and cord noises." Built-in cable connector is easily accessible without interference with microphone. Unaffected by weather conditions and vibration. Designed for use both indoors and outdoors with a frequency range of 50 to 8000 cycles at -54 db as referred to one volt per bar. The D20 is suitable for recording, public address, transmitters or wherever a full-ranged dynamic microphone is desired.

In view of the demand for this unit we must state that we will be compelled to abide first by Government Priority Regulations in handling orders for this microphone, then in the absence of such regulations priority will be given orders as they are received.

# UNIVERSAL MICROPHONE CO.

INGLEWOOD, CALIFORNIA

## "808" VELOCITY MICROPHONE

### 5MM Series

For use where a smooth responding microphone with a smart modern design is required. Suitable for stage presentations, orchestras and general public address applicators indoors. Bi-directional response allows for pick-up of audience reaction without "feed-back." This microphone does not pick-up sound from the sides, thus it eliminates much of the feed-back difficulty encountered with other types of microphones.

Uses sensitive 5MM ribbon element designed to reduce phase shift at high frequencies. This feature improves the high frequency response over the conventional velocity microphone.

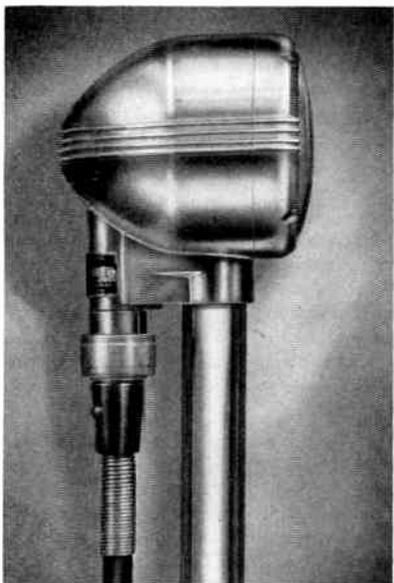

Frequency response: 40-10,000 Cps.

Output level: 63 db below one volt per bar.

Satin Chrome plate. Complete with locking type connector at housing and 25 foot rubber covered, low capacity cable. Stand coupling:  $\frac{3}{8}$ "—27 thread. Microphone size:  $1\frac{1}{4}$  inches square by  $4\frac{1}{2}$  inches high. Shipping weight: 2 pounds.

Model 808. High Impedance (40,000 Ohms.)

List Price.....\$24<sup>50</sup>

## "308" DYNAMIC MICROPHONE

### 15MM Series

Ideal for general public address installations, recording, orchestras, dramatic presentations. Well built 15MM voice coil and substantial suspension provides the excellent reproduction of this reliable instrument. Its small size gives it "Artist Appeal." Well built for dependable service. Unaffected by temperature or humidity.

Frequency response: 50-8000 Cps.

Output level: 63 db below one volt per bar.

Satin Chrome plated. Microphone size:  $2\frac{1}{4}$  inches in diameter, depth  $2\frac{3}{8}$ ". Stand coupling:  $\frac{3}{8}$  inch 27 thread. Locking type connector at housing. Complete with 25 foot low capacity rubber covered cable. Shipping weight: 3 pounds.

Model 308. 40,000 Ohm impedance.

List Price.....\$24<sup>50</sup>

## "CU" CARBON MICROPHONE

### Communications Type

For private aircraft, police and all types of mobile and marine applications. Frequency Response characteristics restricts pick-up to essential voice frequencies rejecting unwanted background noise. Single button type carbon microphone. Button impedance 200 Ohms.

Available in two models — the only difference being in the plug furnished.

Output level: 30 volts RMS across secondary of microphone input transformer. Double pole, single throw, press-to-talk switch connects microphone and relay control circuit (see diagram on opposite page). Complete with heavy duty "Push-in" mounting bracket. Moisture proof, flexible  $3\frac{1}{2}$  foot cord. Cord reinforced against strain at ends.

Microphone size: Diameter  $2\frac{1}{8}$  inches,  $1\frac{1}{2}$  inches thick. Net weight:  $6\frac{1}{2}$  ounces. Shipping weight:  $\frac{3}{4}$  pound.

Model CU-1, with 3-way phone plug.

List Price.....\$19<sup>50</sup>

Model CU-2, (illustrated) with 3-way switchboard type plug.

List Price.....\$22.50

# UNIVERSAL MICROPHONE CO.

INGLEWOOD, CALIFORNIA

## HANDI-MIKES

### Carbon Microphone Series

A hand microphone whose popularity has been won by trustworthy performance and rugged dependability. Well balanced all-metal construction. For call systems, small transmitters; for use wherever a close-talking microphone with clear crisp voice reproduction is required.

Single button carbon type with impedance of 200 Ohms,

Output level: 18 db below one volt per 100 bars.

Minimum of carbon "hiss," with high signal-to-noise ratio.

Chrome plated. Complete with snap switch on standard Model 200-A. Other switch and circuit combinations available. Suffix letter on model number indicates the type of switch and circuit. (See diagram and illustrations elsewhere on this page.) 6 foot flexible cord included. Microphone size: 8 inches overall with 2 1/4 inch head. Shipping weight: 1 1/4 pounds.

Model 200-A.	200 Ohms Impedance.	List Price.....	\$12.50
200-TA	200 Ohms Impedance.	List Price.....	15.00
200-TC.	200 Ohms Impedance.	List Price.....	16.00

## HANDI-MIKES

### Dynamic Microphone Series

Built with the ruggedness of a carbon type microphone, this dynamic hand microphone represents the best in proven performance. Well built 15MM voice coil; substantial suspension and construction throughout. Same general appearance and physical dimensions as carbon series listed above. Available only with "T" Switch, whose vertical toggle action makes it an ideal press-to-talk switch. Internal spring return of switch button eliminates possibility of microphone being left "on."

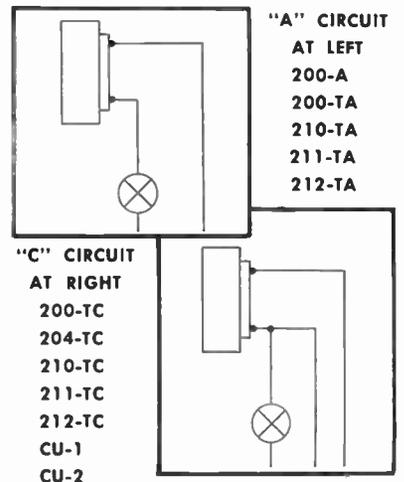

Response characteristics provide extremely clear speech response without over-emphasis of high frequencies. Available in two types of circuits and various impedances listed below.

Frequency Response: 500-7500 Cps.

Output level: 23 db below one volt per 100 bars. (Output level of #212 High impedance, 40,000 Ohms model—other models in proportion.)

Chrome plated. Complete with 6 foot flexible cord. Suffix letter on model number indicates the type of switch and circuit. (See diagram and illustration elsewhere on this page.) Microphone size: length overall 8 inches, diameter of head 2 1/4 inches. Shipping weight: 2 pounds.

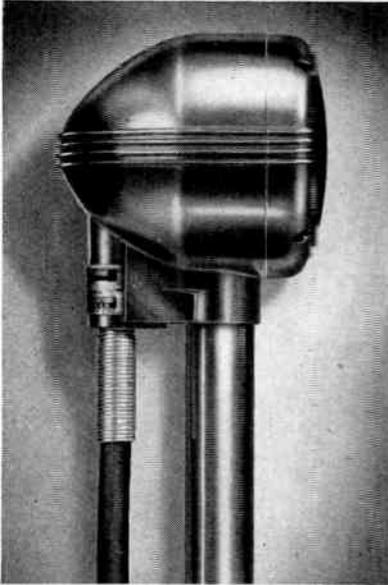

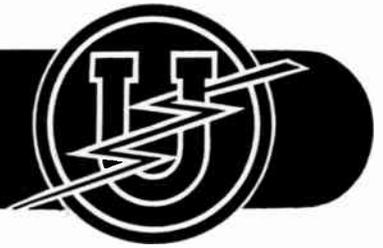

Model 204-TA.	35-50 Ohms Impedance.	List Price.....	\$25.00
204-TC.	35-50 Ohms Impedance.	List Price.....	26.00
210-TA.	200 Ohms Impedance.	List Price.....	27.00
210-TC.	200 Ohms Impedance.	List Price.....	28.00
211-TA.	500 Ohms Impedance.	List Price.....	27.00
211-TC.	500 Ohms Impedance.	List Price.....	28.00
212-TA.	40,000 Ohms Impedance.	List Price.....	27.00
212-TC.	40,000 Ohms Impedance.	List Price.....	28.00

Handi-Mikes are available in various switch and circuit combinations. Diagrams at right illustrate circuit arrangements.

# UNIVERSAL MICROPHONE CO.

INGLEWOOD, CALIFORNIA

## "KD" DYNAMIC MICROPHONE

An economy microphone for home recording, amateurs, carnivals. Slightly rising frequency characteristic provides increased clarity. Unaffected by temperature and humidity.

Frequency Response: 50-7500 Cps.

Output level: 63 db below one volt per bar.

Statuary Bronze plated. Microphone size  $3\frac{1}{4}$  inches in diameter, depth  $2\frac{3}{8}$  inches. Stand coupling:  $\frac{9}{16}$  inch 27 thread. Spring steel, cable strain relief at housing. Complete with 10 foot rubber covered cable. Shipping weight  $1\frac{1}{4}$  pounds.

Model "KD." 40,000 Ohms impedance.

List Price..... **\$16<sup>25</sup>**

## "W" CARBON MICROPHONE

### Cartridge Type

Highly sensitive, single button carbon microphone. Light in weight and compact. Ideal detectaphone. An experimenter's favorite. Clear cut response to voice frequencies. Excellent for midget transmitters.

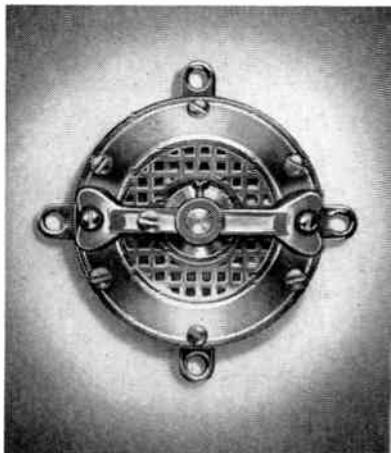

Button Impedance: 200 Ohms.

Output level: 18 db below one volt per 100 bars.

Black plastic case with metal back. Screw terminals. Microphone size: Diameter  $1\frac{1}{8}$  inches, thickness  $\frac{1}{2}$  inch. Net weight  $1\frac{1}{2}$  ounces. Shipping weight  $2\frac{1}{2}$  ounces.

Model "W."

List Price..... **\$4<sup>00</sup>**

## MODEL XX

### Carbon Microphone

Small heavy duty, double button carbon microphone. A world's favorite with radio amateurs. Low background type carbon granules. Stretched dural diaphragm. Excellent voice reproduction. Frequency response: 50-5500 Cps. Output level: 40 db below one volt with 10 bar signal.

Polished Chrome plate. Diameter  $2\frac{1}{2}$  inches, overall thickness  $1\frac{1}{4}$  inches. Shipping weight: 1 pound.

Model XX. Impedance 200 Ohms per button.

List Price..... **\$10<sup>00</sup>**

## MODEL XI

### Carbon Microphone

Identical to Model XX except is single button carbon type without cross bar. Chrome plated screen grille protects diaphragm. Shipping weight:  $\frac{3}{4}$  pound.

Model X1. Impedance 200 Ohms.

List Price..... **\$7<sup>50</sup>**

# Cardioid Microphones

## "556" SUPER-CARDIOID BROADCAST DYNAMIC

*Solves Difficult Problems in Broadcasting and Recording for Studio or "Remote"*

Reduces reflections and reverberation effects—decreases random noise pickup by 73%. Smooth response from 40 to 10,000 cycles over wide angle at front—dead at rear (down 12 to 15 db). Super-Cardioid pattern—more unidirectional than the Cardioid. Single unit construction simplifies production; offers advantages of ruggedness and economy. Accomplished through Shure "Uniphase" principle (Patented). Floating moving coil system; double wind screened. Built-in isolation unit. Swivel head. Standard  $\frac{5}{8}$ " — 27 thread; adapters to R.C.A. or W.E. thread furnished with microphone upon request at no charge. Equipped with 18" rubber covered two-conductor shielded cable. Convenient terminal connections for attaching of longer length cables. Case dimensions:  $4\frac{1}{4}$ " high,  $3\frac{1}{4}$ " wide,  $3\frac{1}{2}$ " deep. Shipping weight  $4\frac{1}{2}$  lbs.

Write for Bulletin No. 172 for additional information.

MODEL	IMPEDANCE	OUTPUT LEVEL	INCLUDES INTERNAL TRANSFORMER	CODE	LIST PRICE
556A	35-50 ohms	Into 50 ohms: 62.8db below 6 Milliwatts for 10 bar signal	No	RUDOM	\$75.00
556B	200-250 ohms	Into 250 ohms: 63.8db below 6 Milliwatts for 10 bar signal	Yes	RUDOP	\$75.00
556C	35,000 ohms For High Impedance Input	55db below 1 volt per bar	Yes	RUDOR	\$75.00

## "UNIDYNE" CARDIOID DYNAMIC

*Solves Feedback—Permits Higher Volume*

Allows closer placement of microphone and loudspeakers. Makes it easier to set up your sound system in any location. Picks up sound from greater distance in front—gives freedom to performers. Eliminates reproduction of background noise and reflected sounds at rear.

Faithful reproduction from 40 to 10,000 cycles. Rugged construction. Practically unaffected by atmospheric conditions. Has technical advantages of exclusive Shure "Uniphase" principle. (Patented) Swivel head. Built-in cable connector. Low impedance model permits use of any length cable required.  $\frac{5}{8}$ " — 27" thread. Case same size as "556" series. Shipping weight  $4\frac{1}{2}$  lbs.

MODEL	IMPEDANCE	OUTPUT LEVEL	CABLE	INCLUDES INTERNAL TRANSFORMER	CODE	LIST PRICE
55A	35-50 OHMS	Into 50 ohms: 62.8db below 6 Milliwatts per 10 bar signal	25 ft.	No	RUDAR	\$47.00
55B	200-250 OHMS	Into 250 ohms: 63.8db below 6 Milliwatts for 10 bar signal	25 ft.	Yes	RUDAT	\$49.50
55C	35,000 OHMS for high Impedance Input	55db below 1 volt per bar	25 ft.	Yes	RUDAS	\$49.50

## "UNIPLEX" CARDIOID CRYSTAL

*The Only True Cardioid Crystal Microphone*

The Shure "Uniplex" is the most economical means of obtaining the advantages of true cardioid performance. High quality reproduction from 30 to 10,000 cycles over a wide angle at the front, yet practically unaffected by sound approaching from the rear. (Rear response down approximately 15 db.) Permits more volume without feedback—simplifies microphone and speaker placement—greatly improves systems using ordinary microphones. Uses exclusive Shure "Uniphase" principle. (Patented) Output level 63 db below 1 volt per bar. Specially moisture-proofed Grafoil Bimorph Crystal. Swivel head. Built-in cable connector. Standard  $\frac{5}{8}$ " — 27 thread. Dia.  $3\frac{1}{8}$ ", depth  $3\frac{3}{8}$ ". Shipping weight  $1\frac{1}{2}$  lbs.

**Model 730A.** "UNIPLEX" Cardioid Crystal Microphone. Complete with 25 ft. super-shielded cable. Code: RUPEL. List price — \$35.50

# Dynamic and Crystal Microphones for General Use

The appearance of your microphone is important. It is always in the spotlight. A beautiful microphone tells your customers that you are using good equipment. Make the right impression. The Shure Stratoliner's projectile form—its rich, bright metallic and gray effect makes an impression on the public that you are using more expensive equipment. But beauty is not the only feature of this microphone. Careful engineering has given it response characteristics for high quality reproduction. Its ear impression matches its eye impression. The Stratoliner looks expensive and sounds expensive.

## "STRATOLINER" DYNAMIC

A rugged microphone with unusually smooth response. Its faithful reproduction makes it ideal for music as well as voice. Its ruggedness qualifies it for heavy duty work on Police transmitters, at Airports, in War Production Plants on paging and outdoor systems. Practically unaffected by heat or humidity. Moving conductor system. Die cast case, swivel head, built-in cable connector. Diam. 2½", length 4-7/16", Shipping weight 2¾ lbs. Stand Thread ⅝"—27.

MODEL	IMPEDANCE	OUTPUT LEVEL	CABLE	CODE	LIST PRICE
508A	35-50 ohms	68db below 6 milliwatts for 10 bar signal	18 ft. 2 conductor shielded	RUVAM	\$28.80
508B	200-250 ohms			RUVAP	\$28.80
508C	High Impedance	60db below 1 volt per bar	18 ft. single conductor shielded	RUVAS	\$28.80

## "STRATOLINER" CRYSTAL

An expensive looking microphone at low cost. High output level with good response. Designed for Home Recording, Public Address, Paging Systems, Transmitters and other general purpose use. Has all the features of an expensive microphone such as swivel head, built-in cable connector and sparkling appearance. Genuine Bimorph Crystal. Case dimensions and specifications same as "508" series above. Shipping weight 2½ lbs.

MODEL	CABLE	OUTPUT LEVEL	IMPEDANCE	CODE	LIST PRICE
708A	7 ft.	49.7db below one volt per bar	High Impedance	RUDUM	\$19.50
708A—18 ft.	18 ft.			RUVAT	\$20.30

## "ULTRA" 700D CRYSTAL Highest Quality Performance

Outstanding feature is dependable performance. Shure "Ultra" wide-range response from 30 to 10,000 cycles. Output level: 58db below 1 volt per bar. Triple-moisture-sealed Grafoil Bimorph Crystal. Barometric compensation. Internal screen-protected cartridge. Small, compact swivel head—easily aimed at source of sound for best response. Built-in cable connector. Standard ⅝"—27 thread. Diameter 2¾". Shipping weight 2¼ lbs.

**Model 700D.** "Ultra" Crystal Microphone. Complete with 18 ft. single-conductor shielded cable. Code: RUVBE. List Price ....\$26.80.

## SHURE 76B LAPEL MICROPHONE

Gives freedom to lecturers. Small, light, crystal microphone with high output level. High quality reproduction of speaker's voice. Inconspicuous. Only 1⅜" diameter; weight only 1½ oz. Gray finish. Handy lapel clip. 25 ft. shielded single-conductor cable. Shipping weight 1 lb.

**Model 76B.** .....Lapel Microphone. Code: RULOP. List Price ....\$25.00.

## 702L LABORATORY NON-DIRECTIONAL MICROPHONE

Shure Non-Directional Crystal Microphone designed for scientific and industrial sound measurement work—and for high quality sound reproduction in broadcasting, professional recording and other applications. High fidelity flat response from 30 to 10,000 cycles in the horizontal plane. Output level: 58.3 db below 1 volt per bar open circuit (61.5 db below 1 volt per bar at end of 25 ft. cable). Diam. 2¼". Built-in cable connector. Satin Chrome finish. 25 ft. shielded single-conductor cable. Shipping weight 2 lbs. **Model 702L.** .....Code: RUPAY. List Price .....\$47.50.

Individual Frequency Response Curve measured in our laboratories, furnished for \$10 net.

## NEW 707A CRYSTAL

A good sturdy microphone at low cost. Attractive modern die cast case in Iridescent Gray finish with highly polished plating on front grille. Natural life-like reproduction. Output level 49.7 db below one volt per bar at end of 7 ft. cable. Bimorph Crystal, mechanically isolated. 7 ft. single-conductor shielded cable, with spring protector. Standard ⅝"—27 thread. Diam. 2¾". Shipping weight 1¼ lbs.

**Model 707A.** Crystal Microphone. Code: RUDOF. List Price \$12.50.

## NEW HAND MICROPHONE

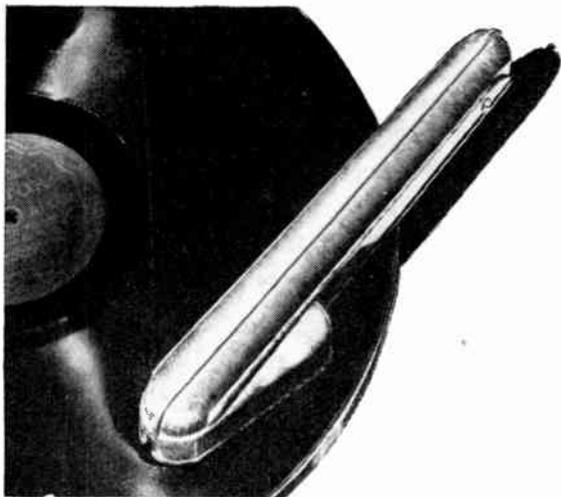

Lowest cost crystal microphone. Tenite plastic case and handle. Output level . . . 49.7 db below one volt per bar. Genuine Bimorph Crystal. Smooth response. 7 ft. single-conductor, shielded cable. Diam. 2½", height overall 6", depth 1½". Shipping weight ¾ lb.

**Model 717A.** Crystal Hand Microphone. Code: RUDUK. List Price \$9.95.

# Crystal Pickups and Magnetic Recording Heads

## Save Records with the new Hi-Lo 1-Ounce Crystal Pickup

1 Ounce needle pressure practically eliminates record wear. 1.4 volts output at 1,000 cps. (Audio Tone Record) makes possible easy replacement of heavier pickups. Permanent sapphire point eliminates bother of changing needles. Low price makes it possible to modernize a record player with a lightweight pickup at a trifle more than the cost of replacing the cartridge. Plays 10" and 12" records. Streamlined plastic arm in mahogany finish blends harmoniously with modern cabinets. Offset head. Set screw permits changing of needle without replacing entire cartridge. Genuine Bimorph Crystal. Playing radius 7 1/8". Overall length 8 5/8". Can be mounted in 1/4" or 1/2" holes. Furnished with 14" leads and arm rest. Shpg. wt. 9 ozs.

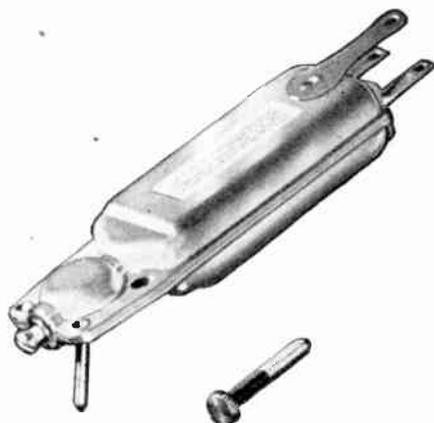

MODEL	PRES-SURE	OUTPUT AT 1000 cps	WITH SAPPHIRE NEEDLE?	RESPONSE	NEEDLE SCREW	CODE	LIST PRICE
97AN	1 oz.	1.4 V	Yes	60-6000 cps	Set	RUZER	\$6.50
97A			No			RUZEP	\$5.50
95A	2 oz.	3.0 V	No	60-5500 cps	Set and thumb screw	RUZES	\$5.50

## Here's How to Give Your Customers Better Service on Crystal Cartridge Replacements

The two most important factors in replacing a cartridge (in addition to response and correct dimension<sup>s</sup>) are needle pressure and output voltage. When you replace a cartridge in a conventional arm, you give your customer better service, if you give him a new cartridge designed for a lightweight pickup. Of course, it is necessary that you give him the same or better output voltage. If you can do this, he will have a new cartridge with lower needle point stiffness. That means less record wear and reduced surface noise. This is possible only when you use Shure Hi-Lo pickup cartridges as standard for replacement. A new development gives these cartridges the highest output with the lowest needle pressure. You also give your customer improved response — the best reproduction of his records.

Shure Hi-Lo pickup cartridges will directly replace all other standard flat type cartridges. Use the following table as a handy guide:

MODEL	REPLACES SHURE	REPLACES OTHER STANDARD FLAT TYPE CARTRIDGES WITH	CODE	LIST PRICE
W40A	99-180	Pressure of 2 oz. or more output of 3 volts or less	RUZOP	\$4.00
W41A	99-181	Pressure of 1 1/2 oz. or more output of 2 volts or less	RUZOK	\$4.00
W42A	99-182	Pressure of 1 oz. or more output of 1.4 volts or less	RUZOG	\$4.00

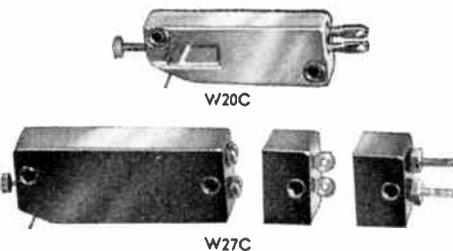

## Handy Reference Table for Shure Magnetic Cutter Replacements

Many tens of thousands of Shure Magnetic Cutters are in use throughout the world in Home Recording Sets. These cutters operate directly from the voice coil winding of the output transformer. A stiff moving element permits recording on practically all recording materials. Furnished with 36" flexible lead. Overall length 3 3/8". Shpg. wt. 8 oz.

MODEL	REPLACES	D.C. RESIST	400 CYCLE IMPEDANCE	POWER INPUT	CODE	LIST PRICE

## OTHER CRYSTAL PICKUP CARTRIDGES

**Model W20C.** Metal type cartridge that fits Shure 99, 94 and 910 pickups. Has built-in "Needle-Tilt" Balanced Tracking. Code: RUZIM. List Price.....\$4.00.

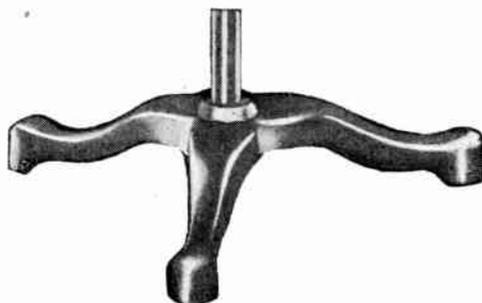

**Model W27C.** Bakelite type cartridge for universal replacement. Three-in-one all purpose unit. Has lug terminals, but is also supplied with screws and pins for quick, easy conversion to screw, or "plug-in" pin type as used in many record players and "coin machines". Straight needle tracking. Code: RUZOR. List Price.....\$5.00.

## Stands and Accessories

The microphone stand is the only part of a sound system operated by the performer. Don't annoy the performer and the audience with a cheaply constructed stand. Shure stands have been scientifically designed by microphone engineers. They work smoothly and quietly to give you the best performance from your microphone. Stabilized base cushioning gives 10 to 18 db reduction of noise pickup from floor.

MODEL	BASE STYLE	WEIGHT OF BASE	BASE DIAM.	HEIGHT ADJUSTMENT	SHPG. WT.	CODE	LIST PRICE
S50B	Round	8 lbs.	9 1/2"	44" to 71"	11 1/2 lbs.	RUSAG	\$11.00

### MICROPHONE "ON-OFF" SWITCHES

Many microphone applications do not require switches at the microphone. Therefore switches are not built into Shure Microphones. But, whenever a switch is needed these "On-Off" switches plug into the microphone quickly and conveniently. You can depend on them.

**Model A83A.** Quickly attached to any cable-connector type Shure microphone. No wiring; internal plug establishes connections. Bakelite arrow knob.

Code: RUNIM. List Price.....\$4.00.

**Model A84B.** Momentary "On-Off" Switch. Press-to-talk Bakelite disc.

Code: RUNID. List Price.....\$7.50.

**Model A80B.** Threaded 5/8"—27 to fit non-connector type microphones Bakelite arrow knob.

Code: RUNIB. List Price.....\$2.50.

### TAKE-APART STAND

**Model S34B.** Handy low-cost stand for desk or hand use. One twist of handle locks it securely in base for use as a table stand, or releases handle for use in hand. Metal base, wood handle. Metal top threaded 5/8"—27. Height over all 6-11/16". Base diam. 4 1/2". Length of handle 5 3/8". Shpg. wt. 1 lb.

Code: RUKAB. List Price \$2.00.

**Model A41A.** Microphone Handle. Threaded 5/8"—27.

Code: RUJAD. List Price...\$75

### CABLE-TYPE TRANSFORMER

**Model A86A.** High quality Cable-Type Transformer. Matches 35 to 50 and 200 to 250 ohm microphones to high impedance amplifier input. Compact, sturdy. Case Diam. 1 5/8", length 2 7/8", 7 ft. cable. Shpg. wt. 1 1/2 lbs.

Code: RUDEB. List Price \$12.00.

AMPERITE MICROPHONE STANDS

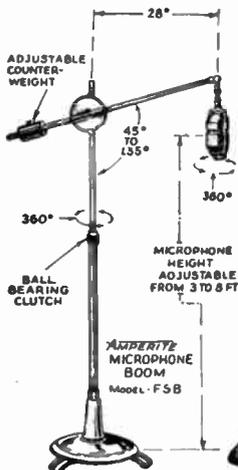

Scientifically designed, Amperite stands feature:

1. Positive, non-sliding clutch. Will never wear out, never require adjustment. Will not "creep".
2. Shock-absorbing rubber bottom.

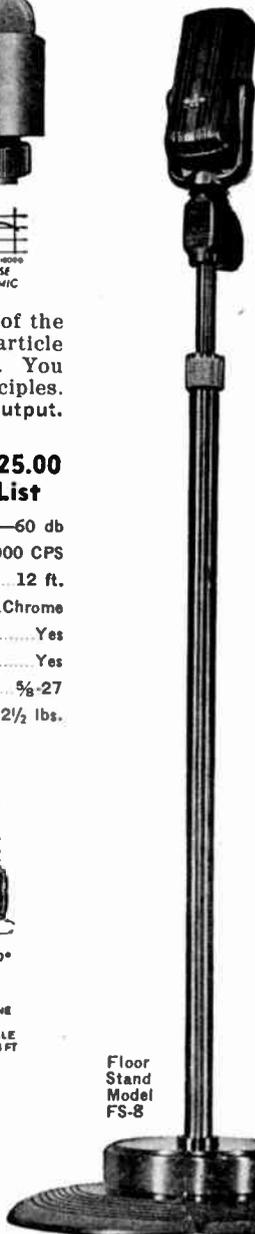

The microphone can be rotated without loosening clutch. The action up and down is smooth, pneumatic-like.

### New Studio Model SR80n, Output 56 db.

On the basis of all-around tests, Model SR80n has achieved an outstanding record. Now accepted as the best for studio, P.A., and recording. Frequency range 40 to 15,000 cps. Output, —56 db. Triple shielded, fitted with switch (optional) cable connector, and 25' of cable.

**Model List**  
 SR-80H hi-imp. . . \$80.00  
 SR-80n 200 ohms\* 80.00  
 Chrome or gunmetal finish.  
 Call Letter Plate . . \$7.00  
 \*Other impedances obtainable at no extra cost.

### A Very Popular, Very Excellent VELOCITY-RAH

Answering the demand for a high quality velocity microphone at a competitive price, Amperite presents models RAH-RAI. Excellent for both speech and music. Eliminates feedback. Has a frequency range of 60 to 7500 cps. Output, —68 db. Unaffected by temperature or humidity. Unusually rugged. Triple shielded, and fitted with heavy shock absorber. Shipping weight 5 lbs.

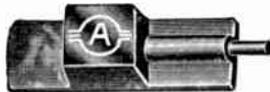

**Model**  
 RAH hi-imp. 12' cable  
 RAI 200 ohms 8' cable  
 Either Model, Chrome or Gunmetal. List \$22.00

### New Amperite-ACH Compact Velocity

The smallest complete velocity ever made. Complete with output transformer, cable connector and switch. Has the output of a large velocity —70 db open line. Frequency response 60 to 7500 cps. ± 2 db. Can be used for speech or music. Fits standard 5/8-27 stand. Can also be used as a hand microphone—has comfortable pistol grip.

Size of Head: 1 1/2" x 2 3/8" x 1 3/8".  
 Net weight 1 lb.

**Model List**  
 ACH—25' cable. . . . . \$25.00

### Kontak Mike

For Musical Instruments Can Be Attached To Most Radio Sets Gives natural reinforcement without peaks. Easily attached without tools. Will operate with either low or high-gain amplifiers. Frequency response 40 to 9000 cps. Output, —40 db. Shipping Weight 2 lbs.

**Model List**  
 SKH Hi-imp. . . . . \$12.00  
 KKH Deluxe Hi-imp. . . . . 22.00  
 KTH With Hand Volume Control . . . 18.00

 BT Boosting Transformer for radio sets 3.00  
 Low impedance available in models SKH and KTH at same price.

## THE AMPERITE VELOCITY

Distinguished in Design and Quality offers an exclusive feature in **THE ACOUSTIC COMPENSATOR**

### Models RBHk-RBMk

Considered the finest types of microphone available for P. A. work, these models are excellent for close talking and distant pickup, speech, music, or wherever else a high-quality microphone is required. Frequency range 40 to 11,000 cps. Output, —65 db. Excellent also for studio or recording. Complete with switch, cable connector and 25' of cable.

The Acoustic Compensator permits the increase of the high frequencies by the mere flip of the finger. Simple construction. As shown in diagram, simply push the knob up to increase high frequencies, or down to increase lows. Makes microphone adjustable for close talking or distant pickup.

**Models RBHk-RBMk**, with acoustic compensator. Frequency range 40 to 11,000 cps. Output, —65 db. Complete with switch, cable connector and 25' of cable. Chrome or Gunmetal. List \$42.00

Same as above, except without acoustic compensator  
 Chrome or Gunmetal

**Model RBMn 200 ohms . . . . . List 42.00**

PUSH UP TO INCREASE HIGHS,  
 PUSH DOWN TO INCREASE LOWS

### Models RBBHn-RBBn

For unusual feedback conditions such as footlight installations. Not to be used for close talking. Frequency range 40 to 11,000 cps. Complete with switch, cable connector and 25' of cable.

**Model RBBHn High impedance . . . . . List \$42.00**  
**Model RBBn 200 ohms . . . . . List 42.00**  
 Chrome or Gunmetal

**AMPERITE MICROPHONES ARE TRIPLE SHIELDED** against all RF or magnetic fields, entirely eliminating hum pickup. They are acoustically designed to eliminate any possibility of cavity resonance.

**FINISHES:** All microphones have the new standard gunmetal finish. Also available at no extra charge in long-lasting chrome finish.

**NOTE:** Special custom microphones, such as microphones with increased low or high frequencies, or special impedances, obtainable at no extra charge.

Additional **CABLE LENGTHS** obtainable at 8c list per foot.

### New RSHk-RBSk

With Acoustic Compensator

Similar in appearance to RBHK. Has slightly less output and frequency range. For speech or music. ACOUSTIC COMPENSATOR permits adjustment for close or distant pickup or for various conditions encountered. Complete with switch and cable connector. Output —68 db. Frequency range 60 to 8000 cps. 12 ft. of cable.

Chrome or gunmetal  
**Model RSHK high-imp. . . . . List \$32.00**  
**Model RBSK 200 ohms . . . . . List 32.00**

Obtainable without Acoustic Compensator at same price.

### Amperite-7JH Velocity Mike

"Lapel"

The most successful "lapel" made. Size of match box. Ideal for lectures and speciality acts. Can be hidden under coat. Output constant with any position of the head. Transformer included in microphone case. Flat response 60 to 7500 cps. Output, —70db. Shipping weight 3 lbs.

**Model 7J-H Hi-imp. . . . . List \$22.00**  
**Model 7J 200 ohms . . . . . 22.00**

### Input Transformer (Cable Type) LGP

Enables the use of low impedance microphones and cable lengths up to 5000 ft. with amplifiers having high impedance input. Hum trouble entirely eliminated. Can be used with 25, 50, or 200-ohm microphones. Output connects directly to high imp. input of amplifier. Standard grade recommended for speech; laboratory grade for music. 2' cable. Shipping Wt. 3 lbs.

**Model List**  
**LGP (Standard) 60-8000 cps. . . . . \$ 6.00**  
**LGP (Lab.) 40-14,000 cps. . . . . 10.00**

## CRYSTAL MICROPHONES

TRADE MARK REGISTERED

LICENSED UNDER BRUSH DEVELOPMENT CO. PATENTS.

### JT-SERIES MICROPHONES

This Astatic Microphone, popular because of its wide range of usefulness, excellent performance and low price, is used extensively for amateur, public address and home recording. JT-Series Microphones are available in both wide and voice range models and, in addition to standard equipment, are furnished complete with concentric cable connector, convenient wood handle, interlocking metal base and 25-ft. shielded cable. Wood handle may be removed and microphone used on floor stand. Pleasing bass response with uniform highs free from objectionable peaks or dips. Output level —52 db provides ample reserve for use with high gain amplifiers. Choice of all chrome or chrome and gray finish. Stand and handle gray.

JT-30-TT Wide Range, Code ASVLG,  
List Price ..... \$15.50  
JT-40-TT Voice Range, Code ASVLD,  
List Price ..... 15.50

### WR-SERIES MICROPHONES

The WR-Series, Multi-Unit Microphones, made in two models for varied cable lengths, are highly recommended for studio, public address and high quality recording purposes. These microphones are built with dual-diaphragm crystal cartridges in multi-unit arrangements, assuring high fidelity reproduction. Overall frequency response is exceptionally smooth up to 10,000 cycles. Due to their special interior assembly design, the WR-Series Microphones cannot be acoustically overloaded. Model WR-20 may be used on cable up to 100 ft. with negligible loss of output and Model WR-40 is more than able to handle cable twice this length. Output level —56 db. Finish, all chrome.

WR-20, Code ASVGZ.....\$29.50  
WR-40, Code ASVAL..... 39.50

### N-SERIES MICROPHONES

Because of their exceptionally smooth frequency response and many other improved characteristics, Astatic Model N-Series Crystal Microphones are especially desirable for modern public address installations. Swivel joint, tilting head permits adjustment to either semi-directional or directional position, providing a practical and effective method of acoustic feedback control. Concentric cable connector facilitates quick interchange of cables. Two models are available. Model N-30, with output level —52 db, is a high fidelity, wide range microphone, 30 to 10,000 cycles. Model N-80, voice range microphone, output level —49 db, with rising response to 3,600 cycles. All-chrome finish. Complete with 25-ft. cable and spring protector.

N-30 Wide Range, Code ASVJR,  
List Price ..... \$17.50  
N-80 Voice Range, Code ASVJP,  
List Price ..... 17.50

### MODEL T-3 MICROPHONE

In Model T-3, Astatic offers a Crystal Microphone for practical use in almost every field of usage. Here is a microphone with an ideal frequency response, definitely established by long and continued popularity, that appeals to professionals and amateurs alike. Its use is suggested for studio set-ups, with amateur rigs, intercommunicating systems, public address installations and for high class recording purposes. Microphone head may be tilted with ease on unique swivel mounting and pickup pattern made semi or non-directional, as desired. Output level —52 db. Frequency response substantially uniform from 30 to 10,000 cycles. Equipped with interchangeable plug and socket connector and 25-ft. cable. All chrome finish.

T-3, Code ASVCX.....List Price \$25.00

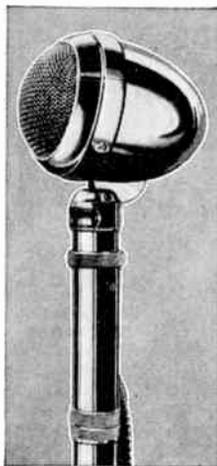

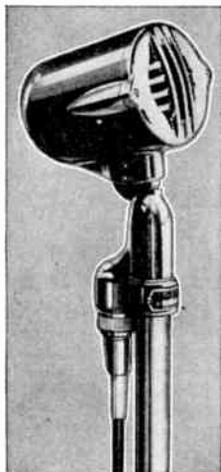

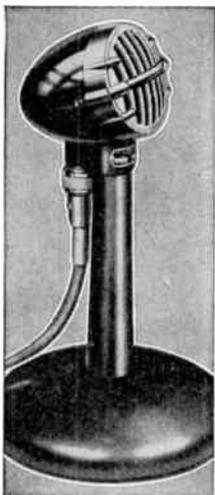

### TYPE S SWITCH ADAPTOR

When so ordered, at little extra cost, a convenient on-off switch, as shown with N-Series Microphone, in accompanying illustration, may be had with Astatic Model Microphones N-30, N-80, T-3, WR-20, WR-40, D-104 and K-2. This Model "S" Switch is NOT SOLD SEPARATELY but must be ordered with microphone. Model "S" Switch shorts the microphone circuit in "off" position, and is a convenient method of cutting in and out on two-way conversations. In practical fields, using intercommunicating systems, the "S" Switch plays an important role in convenience and usefulness. With amateurs, too, this switch is becoming increasingly popular. In ordering this switch, add \$2.50 to the List Price of any Astatic Microphone listed above and add the letter "S" to the model number.

### MODEL D-104 MICROPHONE

This is Astatic's time-tested and proven microphone . . . the first practical crystal microphone ever developed . . . and still preferred by a great host of veteran amateurs. Model D-104, it is safe to assert, is used by more amateurs than any microphone ever made. With high output level —48 db, possesses definitely reduced feedback tendencies and does not gum up or overload when used for close-talking applications. New type yoke-driven, bridge-mounted Graphoil crystal element, improved shock-proof mounting and barometric compensation. Speech range frequency response from 500 to 4,000 cycles. Bright chrome finish. Standard equipment includes interchangeable plug and connector, spring cable protector and 7-ft. cable.

D-104, Code ASUPA.....List Price \$22.50

## MICROPHONES AND STANDS

TRADE MARK REGISTERED

LICENSED UNDER BRUSH DEVELOPMENT CO. PATENTS.

### MODEL K-2 MICROPHONE

Because of its smooth, undistorted reproduction and the fact that it cannot be acoustically overloaded, Astatic Model K-2 Crystal Microphone is highly recommended. In this model, Astatic provides a small size, dual-diaphragm type crystal microphone for studio use, recording, dance bands, public address installations and general applications where quality performance is required. With dual crystal unit design, Model K-2 has twice the capacitance of the usual crystal microphone and correspondingly longer cable lengths may be used. Output level —60 db, below one volt per bar. Frequency response 30 to 10,000 cycles with rising characteristic beyond 6,000 cycles with non-directional pickup. Standard equipment includes plug and socket connector and 25-ft. cable. All chrome finish.

K-2, Code ASURX..... List Price \$27.50

### DYNAMIC MICROPHONE

Model "DN" is a semi-directional, all-purpose dynamic microphone incorporating a new unitary moving coil system, and carefully proportioned acoustic circuit to highly damp the natural resonance of the moving system and provide a response characteristic substantially flat from 50 to 7,000 cycles. The "DN" design employs all features necessary for wide applicability, including Astatic's tilting-head swivel mount, permitting semi- or non-directional positions. Standard equipment includes plug and connector, spring cable protector and 25-ft. cable. Two-tone gray and chrome finish.

- DN-50 (50 ohms), Code ASVNI ..... List Price \$20.00
- DN-200 (200 ohms), Code ASVNI ..... List Price 22.50
- DN-500 (500 ohms), Code ASVNH ..... List Price 22.50

### LAPEL TYPE MODEL L-1

This very small dual-diaphragm crystal microphone was developed to meet especially difficult pickup conditions. Equipment includes lapel-type spring clip and over-shoulder cord to permit wide latitude of movement. Output level —62 db. Frequency response uniform from 30 to 10,000 cycles with rising characteristic beyond 6,000 cycles. Finish, staturary bronze. Furnished with 25-ft., small diameter, single conductor cloth covered cable.

Model L-1, Code ASUSN..... List Price \$25.00

### SPECIAL MODEL 218

Astatic's concealed placement crystal microphone, Model 218, is used extensively for dictographic and detective work. The unit is small, only 7/8-inches thick, finished in black and therefore easily made inconspicuous. Cable connects through collet type ferrule. Spring clip on back of case for easy attachment purposes. Output level —46 db. Frequency response designed with rising characteristic above 500 cycles for speech frequencies.

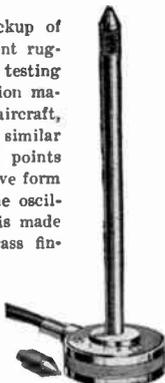

Model 218, Code ASUVV..... List Price \$22.50

### MODEL VP VIBRATION TYPE

Astatic's inertia type pickup of simple design and inherent ruggedness, for production testing of moving and reciprocation machinery, motor cars, aircraft, water leak detection and similar applications. All contact points are of hardened steel. Wave form may be observed with the oscillograph. Model VP case is made from heavy machined brass finished in bright chrome.

Model VP, Code ASZGK  
List Price.....\$25.00

## CRYSTAL PICKUPS

TRADE MARK REGISTERED

LICENSED UNDER BRUSH DEVELOPMENT CO. PATENTS.

### Low Pressure CRYSTAL PICKUPS

### PERMANENT SAPPHIRE STYLUS

Only highest quality precisely ground, highly polished, natural Sapphires are used in Astatic Low Pressure Pickups. This jewel point is protected with a "U" shaped guard surface and internal protector spring. With a radius slightly larger than the record groove, the stylus point rides slightly up on the groove sidewalls for finer reproduction.

Designed for a higher standard of phonograph performance, Astatic Low Pressure Crystal Pickups, with permanent, built-in Sapphire jewel points, have contributed immeasurably to the convenience, economy and enjoyment of electrical phonographs and radio-phonograph combinations. This rounded Sapphire stylus, gliding smoothly over the record with feather-weight one-ounce pressure, makes this pickup basically different from any crystal pickup previously available. No needles to change. No wear on records. No gadgets to get out of order. With stylus pressure of only one ounce, scarcely more than one-third the pressure necessary in conventional pickups, records, literally speaking, don't wear out but, instead, retain their newness for hundreds of plays. Surface noise and distortion due to wear are, as a result, practically eliminated. The offset angle in arm design is such that a low tracking error is combined with balanced sidewall pressure in the record groove. Stylus pressure is controlled by spring action, permitting a low value of up and down inertia not obtainable with a counterweighted arm.

- Model FP- 8, Cartridge LP- 6, Code ASXIF ..... List Price \$16.50
- Model FP-18, Cartridge LP-21, Code ASXIE ..... List Price 16.50
- Model FP-38, Cartridge LP-23, Code ASXID ..... List Price 16.50

### PROFESSIONAL MODEL LOW PRESSURE PICKUP

Incorporating all the advantages of Low Pressure design and performance, Models HP-16 and HP-36 are particularly suited for Broadcast and Recording Studio use. Ball-bearing swivel base, accurately counterbalanced arm for one-ounce needle pressure on transcriptions up to and including the 16" size. Maroon finish.

- HP-16, 30 to 7,000 cycles, Code ASK1B  
List Price \$25.00

List Price \$25.00

Model HP-16 and HP-36

← **MODEL B-16**—This is Astatic's finest offset arm Crystal Pickup designed for professional use on lateral transcriptions of all sizes. Tru-Tan offset head reduces tracking error to 2.4 degrees on a 16" record. Free from mechanical resonance throughout the audio range. Response characteristic may be altered to suit conditions by modification of input circuit. Overall length, 14". Needle pressure 2 3/4 oz. Complete with 4-ft. single conductor shielded cable and individual arm rest. Black and Chrome finish.  
Model B-16, Code ASWKG..... List Price \$22.50

← **MODEL B-10**—Here is another deluxe Crystal Pickup, intended for those who desire the ultimate in fidelity of record reproduction. Tru-Tan offset head design. Plays both 10" and 12" records. Ball bearing swivel base. Selected Type B Cartridge. Beautifully finished in black and chrome. Overall length 12 1/4". Needle pressure, 2 3/4 oz. Complete with 4-ft. single conductor shielded cable and individual arm rest.  
Model B-10, Code ASWKII..... List Price \$17.50

← **MODEL AB-8**—In this Crystal Pickup, Astatic offers a new high type performance combined with ultra modern styling. Special features include Spring-Axial Cushioning, Astatic's famous Type B (Bakelite encased) Cartridge with internal damping to assure permanence, Bender Crystal element with "Ebonite" water-proof coating, and last but not least, a sturdy, new die-cast arm. For use with 10" and 12" records. Overall length 10 3/4". Needle pressure, 2 3/4 oz. Statuary Brown finish. Complete with 4-ft. single conductor shielded cable and arm rest.  
Model AB-8, Code ASXFZ..... List Price \$10.00

← **MODEL O-7**—This Astatic Pickup was designed primarily for radio-phonograph combinations and public address applications requiring quality output combined with short mounting center of only 7". Axial cushioned, die-cast, Tru-Tan arm. Now furnished with the improved M-22 Type Cartridge. Graphoil Bimorph Crystal element, Ebonite treated. Output response may be altered to suit conditions. Telephone black with bright chrome trim. Overall length, 9 1/2". Needle Pressure, 2 3/4 oz. Complete with 4-ft. single conductor shielded cable and arm rest.

**MODEL D-9**—Combining low cost with high performance standards. Ideal for manual record players. Used extensively for modern replacements. Mounting center adjustable to 6 1/2" or 7". Tru-Tan offset head. Employs L-Type Cartridge. Statuary Brown finish. Complete with 12" plain leads.  
**Model D-9, Code ASXFU...List Price \$4.95**

### MOBILE MODEL AB-8M PICKUP

The pickup illustrated above is designed by Astatic especially for use on sound trucks, airplanes, automobiles, trains, and other mobile units. Model AB-8M is mechanically counterbalanced so as to track on recordings even in a vertical position without jumping the groove. Hinged head may be tilted upward for quick and easy changing of needles. Characteristics almost identical to Model AB-8. Standard equipment includes locking arm rest, 2-ft. shielded cable, 7" mounting center. Standard telephone black finish.

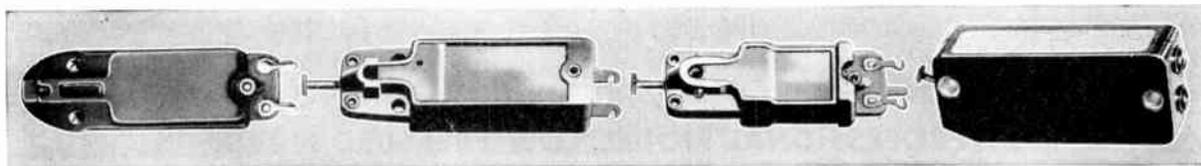

**MODEL SL-8**—Straight-arm pickup ideal for certain specific applications, particularly for lightly cut home recordings. Not apt to jump grooves or sweep to inside of record. Employs L-Type Cartridge. Adjustable to 7" or 8" mounting center. Statuary Brown finish. Complete with 12" plain leads.  
**Model SL-8, Code ASXFT...List Price \$4.95**

**MODELS S-8 and S-12**—This is the ORIGINAL CRYSTAL PHONOGRAPH PICKUP engineered by Astatic and still a favorite with sound men desiring a straight arm. Rigid steel channel arm with axial cushioning and ball-bearing swivel base. Use Type B Cartridge. Black wrinkle finish. Complete with 4-ft. cable and arm rest.

# ELECTRO-VOICE MICROPHONES

## DYNAMIC MICROPHONES

### CARDAK Poly-Directional Microphone

Model 725. A versatile microphone with a constantly variable sound pick-up pattern. Simple control enables it to function as a true cardioid as well as a bi-directional for elimination of sidewall reflected sound. In fact, the CARDAK is adjustable for any combination of reflected sound direction. Frequency response is substantially flat from 30-10,000 c.p.s. Average level, -52 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). "On-off" switch is built-in. Tiltable for non-directional use. Three contact wiping connector. All impedances available (low impedance balanced to ground). 20' cable. Butler chromium finish.

Model 725, Cardak List \$55.00  
Model 730, Cardak II, List \$75.00

### MODEL 630

Smart, modern appearance. Frequency response: 30-9,000 c.p.s. unusually flat through lower and middle register, rising 5 DB on upper frequencies for added crispness of speech and brilliance of music. Output: -55 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). Full equipment includes "on-off" switch, tilting head for directional or non-directional operation, 20' cable (all low impedances are balanced to ground) and cable connector.

Model 630C, Chromium Finish, List \$30.00

### MODEL 640

A rugged, dependable and professional style microphone with amazing voice and music reproduction qualities. Exceptionally wide and flat frequency response, 30-12,000 c.p.s. Output: -52 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). Tiltable for directional or non-directional operation. Cable connector is built as an integral part of the sturdy, steel reinforced cradle. 20' well shielded cable.

Model 640C, Bright Chromium Finish, List \$32.50  
Model 640G, Gunmetal Finish, List \$30.00

### MODEL 612

A high standard of value and quality in the low priced field. Full musical reproduction; voice is natural and crisp. Tiltable in 90 degree arc for directional or non-directional pick-up. "On-off" switch. Resistant to heat, temperature changes, salt air and rough handling. Frequency response; 40-9,000 c.p.s. Output: -56 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). 20' well shielded cable.

Model 612C, Chromium Finish, List \$27.50

### MODEL 605

Dependable quality, maximum durability, flexible operation, handsome appearance. Overall response is highly desirable for all type of sound work, recording and industrial P.A. systems. Fixed 22 degree tilt. Frequency response: 45-8,000 c.p.s. Output: -58 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). 8' cable. Despite the low price there has been no compromise in design or quality of materials.

Model 605C, Chromium Finish, List \$20.00  
For 20' cable, add to list price \$ 1.50

## COMMUNICATIONS MICROPHONES

### MODEL 245 Differential Microphone

Noise-cancelling Differential type carbon microphone which effectively shuts out all ambient noises and reverberation. Frequency response substantially flat from 200-4,000 c.p.s. Low harmonic distortion. Self-supporting to free both hands of the operator. Uniform response in all positions. Unaffected by temperature cycles from -40 to +185° F. Able to withstand complete immersion in water. Physically strong enough to withstand 10,000 drops. Weight, including harness, cord and plug, 1 1/4 ounces. Model 245, List \$12.50

### MODEL 600-D DYNAMIC MICROPHONE

Designed for police, airport, utility, mobile communications and portable P.A. installations. "Press-to-talk" switch opens microphone and closes relay simultaneously, if desired. High impact black phenolic case, built to stand requirements of rugged military use, yet weighs but 9 ounces. Will withstand temperatures from -40 to +185 degrees. Frequency response: 50-8,000 c.p.s. Curve substantially flat for highest articulation. Output: -57 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). 8' cable. Panel mounting bracket on rear of microphone.

Model 600-D, List \$27.50  
Model 600-DL (with switch lock), List \$29.00

### MODEL 205-S Carbon Differential Microphone

Noise-cancelling Differential type carbon microphone. Has extremely high intelligibility even under intense noise. Ideal for aircraft, factories, railroads, police and emergency services. Weighs less than 8 ounces. Operates in all positions. High impact phenolic case. Close talking, blast proof, waterproof, shock-resistant. Fiberglass wind noise filter. Withstands temperatures from -40 to +185° F. Interchangeable with conventional carbon microphones. Response substantially flat from 100-5,000 c.p.s. High output level: -20 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). Internal noise level below .001 volt. Press-to-talk switch opens microphone, actuates relay simultaneously, if desired. Cable length 5'. Panel mounting bracket on back.

Model 205-S, List \$25.00  
Model 205-SL (with switch lock), List \$26.50

### MODEL 210-S Carbon Microphone

High quality single button carbon head mounted in 600-D case. Response from 200-4000 c.p.s. level -20 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>).

Model 210-S List \$17.50  
Model 210-SL (with Switch Lock) List \$19.00

### MODEL 75 Carbon Microphone

With an internal shock-absorber that is even more shockproof than ring mounting, yet conforms to modern design. 3/8"-27 stand coupling. Button current 5 m.a. for close talking or feedback reduction. 15 m.a. for normal work. Gunmetal finish.

Model 75, Double Button, List \$8.00  
Model 75S, Single Button, List \$6.50

### MODEL 50 Carbon Microphone

An efficient carbon microphone, designed to give clear reproduction and long life. Mounting for ring type stand. High output to work into low gain amplifier.

Model 50G, Gunmetal, List \$5.50  
Model 50GS, Gunmetal, List \$4.00

## VELOCITY MICROPHONES

### MODEL V-2

The basic design embodies every desirable engineering innovation. One-third larger than the V-1. Rubber suspended ribbon assembly. Trim, modern, functional. Frequency response: 35-11,000 c.p.s., substantially flat when placed 6", or more from sound source. Output: -64 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). 20' cable, connectors, "on-off" switch, and locking cradle. For wide range public address, communications and recording.

Model V-2, List \$37.50

### MODEL V-3

Exclusive features. Similar in appearance to the Model V-2, and has a slightly extended frequency response. Equipped with the Vari-Z selector, the V-3 is an all impedance microphone. 50, 200, 500 ohms and Hi-Z, direct-to-grid. Low impedances balanced to ground. Adaptable to all pick-up.

Model V-3, List \$50.00

### MODEL V-1

Small in size and flexible in operation. Frequency response: 40-10,000 c.p.s., substantially flat when placed 6" or more, from sound source. Output: -65 DB (0 DB = 1 volt/dyne/cm<sup>2</sup>). 20' cable, connectors, shock-absorber, locking cradle, and "on-off" switch. Ideal for public address, recording and communications.

Model V-1, Gunmetal Finish, List \$27.50

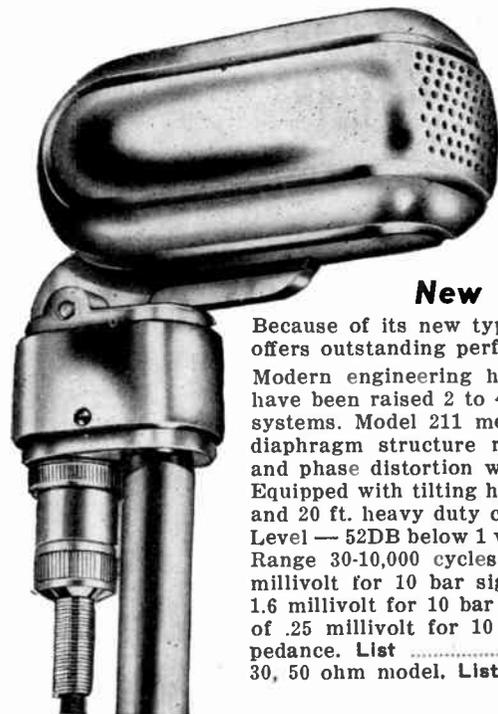

NOTE: All Electro-Voice Dynamic and Velocity Microphones are available in Hi-Z (Direct-to-Grid) or 50, 200 and 500 ohms. Stand connector 3/8"-27.

# Turner Microphones

## New 211 BROADCAST TYPE DYNAMIC

Because of its new type magnet structure and acoustic network, Turner 211 Dynamic offers outstanding performance characteristics.

Modern engineering has extended the high frequency range, and the extreme lows have been raised 2 to 4 decibels to compensate for over-all deficiencies in loud speaker systems. Model 211 meets the requirements of extended range set up by F.M. Unique diaphragm structure results in extremely low harmonic and phase distortion without sacrificing high output level. Equipped with tilting head, balanced line output connection and 20 ft. heavy duty cable. Finished in rich satin chrome. Level — 52DB below 1 volt per bar for hi-impedance models. Range 30-10,000 cycles. 500 ohm model has output of 2.5 millivolt for 10 bar signal. 200 ohm model has output of 1.6 millivolt for 10 bar signal. 30-50 ohm model has output of .25 millivolt for 10 bar signal. 200, 500 ohm or hi-impedance. List .....\$45.00  
30, 50 ohm model. List..... 42.50

### TESTED

Each and every Turner Microphone is given an individual sound pressure level test over the entire audio band, before leaving the factory—your assurance of complete satisfaction.

### No. 101 CARDIOID

Where the going is tough and acoustic conditions practically impossible, the New Turner Cardioid will do the job. Two-element generator produces true cardioid characteristics, offering the best features of both the dynamic and velocity.

No. 101 is extremely sensitive in front, and completely dead in rear. Through the use of the two elements, NO SACRIFICE of frequency response is necessary. For studio, P.A. and recording.

All models have tilting heads, balanced line output connection and 20 ft. of heavy duty cable. Brushed chrome finish.

### Standard Model 101A

Level — 59DB below 1 volt per bar for hi-impedance models. Range 30-9,000 cycles. Front to back ratio; 24 DB at 1,000 cycles. 500 ohm models—output 1.6 millivolt per 10 bar signal. 200-250 ohm model—output 1 millivolt per 10 bar signal. 30-50 ohm model—output .16 millivolt per 10 bar signal. 101A—30, 50, 200, 500 ohms or high impedance. List Price .....\$60.00

### De Luxe Model 101B

Same as 101A but with 3-position switch to allow different pickup patterns. List Price.....\$70.00

### Broadcast Model 101C

Same as 101B with range extended to 10,000 cycles and not furnished in hi-impedance. All other impedances available. List Price.....\$75.00

### SWITCH EQUIPMENT

Models 22X, 22D, 33X, 33D and 34X are available with SWITCH illustrated. Permits finger-tip control of microphone. Switch completes circuit quietly. For S Models of 22, 33, or 34 ADD \$2.00 to List.

... Tops in Performance ...

## 22X CRYSTAL — 22D DYNAMIC

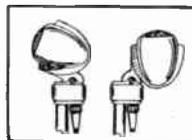

22X Crystal gives clear reproduction. Smartly engineered design cuts feedback to minimum. Full satin chrome finish, 90° tilting head and removable 7 ft. cable set. Built-in wind-gag permits outdoor operation. Crystal impregnated against moisture. Automatic barometric compensator. Range 30-7,000 cycles. High level — 52DB. Complete with schematics and 7 ft cable set. List.....\$18.50

22D Dynamic has same appearance as 22X but has high level dynamic cartridge. Dependable indoors and out. Reproduces smoothly at all frequencies. Range 40-8,000 cycles. Output — 54DB. Complete with tilting head, 7 ft. removable cable set, and schematics. 200 or 500 ohms or hi-impedance. List .....\$23.50  
30-50 ohm. List ..... 21.50

### TILTING HEADS

Models 22X, 22D, 211, 101A, B and C, 33X, 33D and 34X are all equipped with 90° tilting heads permitting semi or non-directional operation.

RUGGED  
TURNER

33X or  
33D

33X Crystal—Satin chrome finished, with high capacity crystal to permit extra long lines. Response 30-10,000 cycles free from peaks. Output — 52DB. Tilting head. Ideal for amateur, recording, or P.A. work. With 20 ft. cable set and diagrams. List Price .....\$22.50

33D Dynamic—Same appearance as 33X with balanced line cable on low impedance units to eliminate noise pickup. 200, 500 or hi-impedance complete with 20 ft. cable set and diagrams. List Price .....\$25.00  
50 ohm model, List..... 23.50

34X

SEMI-DIRECTIONAL

Ideal for use where feedback conditions are bad. Crystal is moisture proof. This mike has automatic barometric compensator, and is blast and mechanical shock-proofed. 50 ft. lines may be used. Equipped with 90° tilting head. Range 30-10,000 cycles. Level — 52DB. With diagrams and 20 ft. removable cable set. Chrome type finish. List Price.....\$27.50

CRYSTAL MICROPHONES LICENSED UNDER PATENTS OF THE BRUSH DEVELOPMENT CO.

# Turner Challenger

## OUTSTANDING PERFORMANCE AT LOW COST

Where the utmost in performance, quality and appearance must be had at lowest cost, use these Turner Challenger models for exceptionally fine results.

Crystal models are complete with shock-proof cartridges, barometric valves, moisture-sealed crystals and wind-gags to prevent blasting. Dynamic models give equally clear-cut results for both voice and music. Unusually rugged and dependable. You can rely on these Challenger Dynamics—they're fully Turner Guaranteed!

### BX Crystal

Ideal for recording, P.A. and amateur work. Bronze enamel finish. Level —55DB. Range 50-6,000 cycles. Complete with 7 ft. cable.

List Price .....\$9.95

### BD Dynamic

Same appearance as BX. Works equally well indoors or out. Built-in transformer is free from hum pickup. Level —52DB. Range 50-5,000 cycles. 200-250 ohms, 500 ohms or hi-impedance.

List Price .....\$14.50

### CX Crystal

Chrome type finish with 7 ft. removable cable set using Amphenol connectors. Level —55DB. Range 50-7,000 cycles. A Real Microphone value. List.....\$15.00

### CD Dynamic

Same style and finish as CX, with 7 ft. removable cable set. Level —52DB. Range 50-7,000 cycles. In 200-250 ohms, 500 ohms or hi-impedance. List Price.....\$18.00

CRYSTAL MICROPHONES LICENSED UNDER PATENTS OF THE BRUSH DEVELOPMENT CO.

## Famous TURNER Dynamics

### U9-S DYNAMIC

Fills 4 Impedance Needs . . .

Same professional design and appearance as 99 and 999. Whatever impedance you need, 50 ohms, 200 or 500 ohm or hi-impedance, a twist of the switch illustrated on U9-S fills your requirements. Adjustable to semi- or non-directional operation. Removable 20 ft. cable set. Level —52DB at hi-impedance. Response is free from peaks and holes from 40 to 9,000 cycles. Handle the toughest job with U9-S. Packed with 20 ft. cable set and diagrams.

List Price .....\$37.50

### 99 and 999

#### Sure-Fire Performance

Model 99 Dynamic is the most rugged microphone in the entire Turner line. Withstands climate and temperature changes. Adjustable saddle. Fits any standard stand. Semi or non-directional operation. Model 99 won't blast from close speaking. Broadcast studios, large city police departments and internationally famous manufacturers specify Turner 99 for crisp, clear results. Finished in fine gunmetal. Range 40-9,000 cycles. Level —52DB. Complete with 20 ft. cable set and diagrams. 200 or 500 ohms or hi-impedance.

List Price .....\$32.50

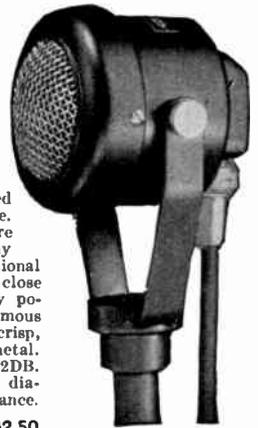

30 or 50 ohms. List Price..... 29.50

### 999 Balanced Line Dynamic

Same appearance as 99. Voice coil and transformer leads insulated from ground and microphone case. Gives smooth, dependable, professional performance. Complete with dignified gunmetal finish, 3-pin polarized locking connector and 20 ft. balanced line low-capacity cable. Range 40-9,000 cycles. Level —52DB.

200, 500 ohms or hi-impedance. List Price.....\$35.00

30 or 50 ohms. List Price..... 32.50

### TURNER GUARANTEE

Turner microphones are guaranteed against defective workmanship and materials for ONE YEAR, providing that instructions are fully complied with, and that units are not opened or tampered with in any way.

Cedar Rapids, Iowa, U. S. A.

Pioneers in the Communications Field

# Turner "Han-D"

## CRYSTAL or DYNAMIC

### Does the Job of Several Mikes

Here's a vari-purpose mike you'll want for it fills the job of two or more units. It fits the hand snugly, has suspension hook for hanging mike applications, stage work and call systems; it can be mounted on any standard floor or desk stand. Especially engineered for maximum voice response and smooth, natural response to music pickups. Chrome type finish.

Positive contact slide switch on both crystal and dynamic models permits off-on operation.

9X Crystal—Will withstand a lot of abuse. Level —48DB. Range 60-7,000 cycles. List.....\$22.50

9D Dynamic—Particularly recommended for use under bad climate conditions, intense heat and rough handling. Level —50DB. Response 60-7,000 cycles. With 7 ft. removable cable set. 200-250 ohm, 500 ohm or hi-impedance. List.....\$25.00  
30-50 ohms. List ..... 23.50

## Magnetic Pickup for Your Musical Instruments

Model MM

Turner MM Microphone gives you immense volume from any stringed instrument without feedback. The unit has a novel clamp for fastening to violin, banjo, etc. — without use of tools or adhesives. Installed in an instant. Has continuously variable volume control built in. High impedance — works directly to the grid. Withstands rough handling and severe use. Finished in rich brown enamel. Measures 3 1/2" long by 1 1/8" wide.

Model MM—Complete with 20 ft. cable. List Price .....\$16.50  
Without Volume Control. List Price.... 14.50

## L40 LAPEL MIKE

or

Concealed  
Microphone

Alligator clip secures the L40 to the clothing and prevents twisting on the lapel. Light and comfortable to wear. Built especially to give crisp clear reproduction of speech, and

minimize feedback. Chest sounds are damped out. Sounds good over the air. Level —52DB. Use on lapel or concealed as you wish. Chrome type finish.

Model L40—With 20 ft. cable black cloth covered. List Price .....\$25.00

Hearing  
Aid  
Mike 7

Small crystal microphones for compact hearing aids. Lightweight, high level with unusual response for voice pickup. Send for details. List Price .....\$8.00

## TURNER "THIRD HAND"

Holds the  
microphone  
for you

Goose Neck Adjusts Mike to Any  
Position

Slips over your head in a jiffy, and holds the mike close to your mouth, where you get excellent volume without feedback. As natural to wear as a necktie, and lets you use both hands elsewhere. Stays out of your line of vision. Talk close without craning your neck; cuts down background noises.

Can be used with long line, as traveling microphone. Makes driving safer. Ideal for window demonstrators. Has 5/8"-27 mike thread. Recommended for use with Turner microphones, as they will not blast from close speaking.

Can be furnished with mike switch when ordered with Turner Microphone.

Model 3H—List Price.....\$5.00  
With switch, add, List ..... 1.00

CRYSTAL MICROPHONES LICENSED UNDER PATENTS OF THE BRUSH DEVELOPMENT CO.

## VR2 DYNAMIC MICROPHONE

### A Microphone with a NEW IDEA and a NEW USEFULNESS

For the first time, the many desirable characteristics found only in several different types of microphones have been combined in a single unit. The VR2 has an easily accessible external adjustment of the most important acoustical reactors in the dynamic microphone. A smooth change from a communication-type response, with a cutoff below 500 c. p. s., through a flat response to an augmented bass, attained by a simple, positive adjustment.

The response adjustment on the VR2 has a very broad effect and does not introduce narrow peaks. It is different from anything previously introduced.

Complete with 12½' cable and plug at microphone providing balanced line. Dull chrome finish. Net wt. less cable, 15 ozs. Hgt. 4". Greatest diameter 3".

The above graph illustrates the average response characteristics for the various settings as indicated on the scale.

**VR2T Dynamic (38,000 ohms), Code: VARIT. List \$38.50**

Available on order in 200 or 500 ohms.....List **\$38.50**  
(Complete with 12½' cable)

**VR2 Dynamic (30-50 ohms), Code: VARIA.....List \$35.75**  
(Complete with 12½' cable)

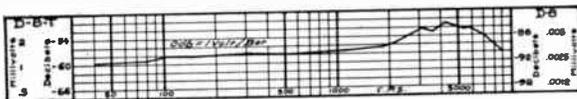

## D8T DYNAMIC MICROPHONE

**THE D8T DYNAMIC MICROPHONE** has been carefully designed to have a consistent, well-balanced response. It is exceptionally rugged and assures the user of trouble-free service over a long period of time.

The D8T is particularly useful for all types of public address installations, orchestra pick-up, as well as solo work and straight announcing.

The D8T is 3¼" long, 2" in diameter, weighs only 13 ozs. A swivel mounting permits either nondirectional or semidirectional pick-up. Comes complete with 12½' cable and plug at microphone and ⅝" x 27 thread for suspension or stand mounting. Platinum Chrome Finish.

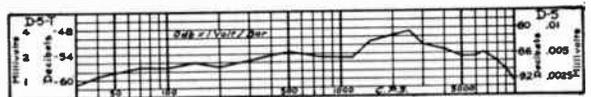

**D8T Dynamic (38,000 ohms), Code DATAH.....List \$27.50**  
Available on order in 200 or 500 ohms.....List **\$27.50**

**D8 Dynamic (30-50 ohms), Code: DATAL.....List \$24.75**

## D5T DYNAMIC MICROPHONE

IN FOURTH YEAR PRODUCTION

**THE D5T DYNAMIC MICROPHONE** is well known. An excellent, diversified-purpose microphone. The dynamic is the most rugged type microphone and its life of trouble-free operation is indefinite. Being a pressure-operated instrument, the response is unaffected by either a close or distant sound source. The D5T approaches the ideal microphone for general use due to its versatility and dependability. Sensitivity: 52 db below 1 V/bar.

**D5T Dynamic, 38,000 ohms, Code: DYHIM..... LIST PRICE \$35.75**  
Available on order in 200 or 500 ohms.....**LIST PRICE \$35.75**  
**D5 Dynamic, 30-50 ohms, Code: DYLOM.....LIST PRICE \$30.25**

Moving-Coil, Permanent Magnet Dynamic • Semidirectional • Close or Distant Pick-up • Excellent Frequency Response • Freedom from Wind Noises • High Output, Low or High Impedance • Immune to Temperature Changes • Minimum Feed-Back (Flat Response) • Low-Level Mixing • Exceptionally Rugged.

## AT2 Specialized COMMUNICATION-TYPE MICROPHONE

**THE AT2 CARBON HAND MICROPHONE** has been designed for a specific purpose. The response characteristics are such that the greatest efficiency covers the important voice frequencies. Frequencies below 200 c.p.s. and above 3500 c.p.s. do not contribute to intelligibility. The AT2 has a sharp cut off above and below the intelligibility band; therefore equipment used with the Model AT2 will operate at greatly increased efficiency. The graph illustrates the high output of the AT2. For a 10-bar signal the output is -12 db.

As a hand microphone it will pick up efficiently in any position with minimum variance in level. A positive switch, for the operation of a relay and the microphone unit, is built into the case. The beryllium-copper switch blades, with rare metal contacts, wiping action, assure long life. Recommended current 15 ma. and load impedance 100-150 ohms. Four-foot length three-conductor, cloth-covered cable supplied with each microphone. Finish: Natural black plastic. Weight with cable 7 1/2 oz.

The case fits the hand comfortably and the convenient thumb switch requires but four ounces of pressure to operate. Prolonged use of the switch does not tire the thumb. The case and insulating parts are molded from an indestructible plastic. All circuits are thoroughly insulated from the hand. A convenient hanger eye is provided.

AT2 Microphone. Code: ATMIK ..... List Price \$18.00

## C6 CRYSTAL MICROPHONE

**EXTREME SENSITIVITY.** New crystal driving lever, twice as efficient as previously used, produces twice the voltage output with equal sound pressure.

**BROADER RESPONSE.** Results of new construction include extension of both low and high end.

**BASS END IMPROVED.** Naturalness insured by improvement in low frequency response.

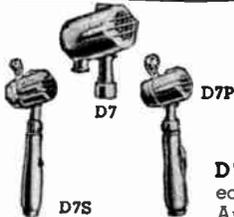

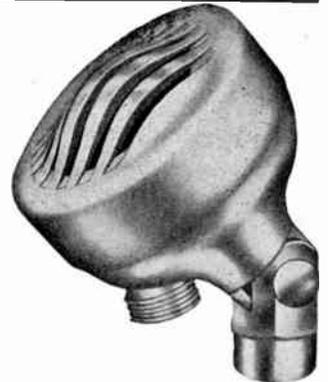

**LONGER LINES.** By increasing the voltage output, the cable length may be increased proportionately. In laboratory tests, regular cables 250 feet in length have been used with a net voltage sufficient to operate any standard high gain amplifier.

**MECHANICAL NOISE REDUCED.** Mechanical and stand noise is no longer a factor. The C6 method of crystal mounting reduces mechanical noises by 12 db.

**LESS AMPLIFIER AND INDUCED NOISE.** The high output of this microphone assures a very desirable signal-to-noise ratio.

**SWIVEL HEAD.** All angles for semidirectional and nondirectional pick-up are provided by the 3/8" x 27 (standard) mounting connector.

Complete with 7' cable and plug at microphone. Polished chrome finish. Net weight 8 oz. Over-all height 3". Diameter 2 3/8". 5/8" x 27 thread provided for suspension or stand mounting. C6 Crystal, Code CESIX ..... LIST PRICE \$16.50

### THE "Clipper" DYNAMIC

**D7 and D7T MICROPHONES** equipped with 12 1/2' R/J cable and Amphenol plug. Chrome finish.

5/8"-27 connector. Over-all height, 2 1/2". Diameter, 1 1/2". Net weight, 8 1/2 ozs.

**APPLICATIONS:** Excellent for communication purposes, airplane use, Marine safety-at-sea installations, police broadcasting, amateur communication, public address, indoor and outdoor installations.

**D7T**—High Imp., 38,000 or 500 or 200 Ohms; Code: DISET ..... List Price \$24.75

**D7TP** (Press-contact Switch), Code: DIMAT ..... List Price \$28.50

**D7TS** (Slide Switch), Code: DIAHT ..... List Price \$27.50

**D7**—Low Impedance, 50 Ohms, Code: DISEV ..... List Price \$22.00

**D7P** (Press-contact Switch), Code: DIMAR ..... List Price \$25.75

**D7S** (Slide Switch), Code: DIAHL ..... List Price \$24.75

### RC CRYSTAL MICROPHONE

Complete with **NON-BREAKABLE PLASTIC STAND** and 7 foot Cable

RC Crystal Microphone may also be mounted on any stand equipped with standard 5/8" x 27 thread. . . . An excellent microphone for Communication, Public Address or Amateur Radio.

HOME RECORDING OR BROADCASTING  
HIGH OUTPUT, GOOD QUALITY

Base easily removed by quarter turn, releasing bayonet lock. Cable replacements accomplished by releasing set screw in back of microphone and pulling gently on spring cable protector ..... List Price \$9.95

## D9A Unidirectional MICROPHONE

**GUARANTEED to produce 30% MORE VOLUME (power) than any microphone at twice the list price. UNIDIRECTIONAL. True CARDIOID pattern pickup, frequency response good to 10,000 c. p. s.**

**Actual Tests are Convincing Arrange for Test with your Jobber**

The above graph illustrates the average response characteristics for the D9A and D9AT. Voltage output levels, for 1 bar sound pressure (1 bar=1 dyne per sq. cm.) of the high and low impedance models. For 10 bar signal the output will be 20 db. higher.

Net weight, 2 1/2 lbs. Packed weight, 4 lbs. Height, 7"; depth, 2 1/4"; breadth, 2 1/2". Standard 3/8-27 thread provided for suspension or stand mounting. Finish: Satin Chrome.

25' Shielded Rubber-jacketed Cable Supplied with each Microphone.

D9A, Low Imp. (50 ohms). Code: LOWEL List \$33.50

D9AT, High Imp. (38,000 ohms). Code: HIWEL List \$41.25  
Available on Order in 200 or 500 ohms List \$41.25

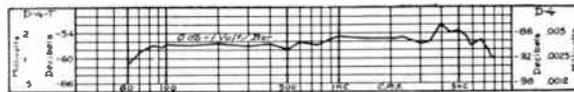

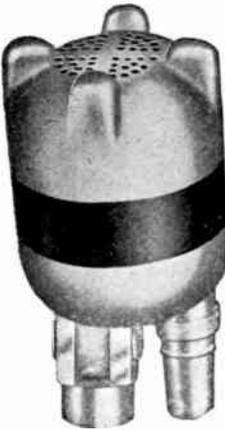

## D4T DYNAMIC MICROPHONE

**A QUALITY, LOW-PRICED, MOVING-COIL MICROPHONE.** For general use where clear speech and natural music reproduction is required. This new AMERICAN microphone is a very efficient instrument, having a broad range, from 60 to 7500 c.p.s., and high output of -56 db (O db=1 v/bar). The utility value lies not only in the quality and type of response but also in mechanical features, such as light weight (approximately 10 1/2 oz.), a full 180° vertical angular setting, and positive friction lock at the swivel.

The D4T, high impedance, is equipped with a single-contact, shielded plug. The 50, 200 and 500 ohm models are equipped with a two-conductor plug and have a balanced line out.

The D4 model is of voice-coil impedance, approximately 30 ohms. Lines up to several hundred feet may be used on all models except the high impedance, where line should be restricted.

The complete assembly includes 12 1/2 feet of shielded, rubber-covered cable and shielded plug. Finished in platinum chrome. Standard mounting, 3/8" x 27 thread.

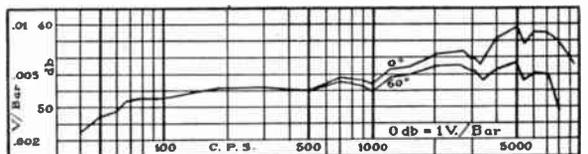

D4T Dynamic (38,000 ohms) Code: DFORT.....LIST PRICE \$22.00  
Available on order in 200 or 500 ohms.....LIST PRICE \$22.00  
D4 Dynamic (30-50 ohms) Code: DEFOR.....LIST PRICE \$19.75

## D6T DYNAMIC MICROPHONE

Ideal for general public address including stage sound-reinforcement, both permanent and portable installations. It is entirely suitable for playground and athletic field direction, police and amateur broadcasting, and recording.

Net weight, 1 3/4 lbs. Packed weight, 2 lbs. Height, 3 3/4", diameter 2 1/2". Standard 3/8-27 thread provided for suspension or stand mounting. Finish: Polished Chrome. 12 1/2' Shielded Rubber-jacketed Cable supplied with each microphone.

characteristics may be had by varying the angle of the microphone to the source of sound. For nondirectional horizontal pick-up, the response is substantially flat.

# American MICROPHONES

1. **C6 CRYSTAL MICROPHONE.** The best buy in a crystal microphone. New crystal driving lever, twice as efficient as previously used, produces twice the voltage output with equal sound pressure. Long cables, 250 feet or longer, may be used with this microphone. The increased output voltage assures only slight proportional losses in cable lengths. Provided with plug at microphone and mounting swivel with standard  $\frac{5}{8}$ " x 27 thread. Chrome finish. Net weight 8 ozs. Complete with 7' cable and microphone plug. Accessories 7, 8, 9, 10, 11, 12, 13, 14, and 16 available for use with this model.  
**C6 Crystal Microphone, Code: CESIX.....List Price \$16.50**
2. **AG CRYSTAL MICROPHONE.** Preferred by crystal buyers for four years. Communication-type receiver. Equipped with mounting yoke, providing rear or through cable outlet. Standard  $\frac{5}{8}$ " x 27 thread. Accessories 7, 8, 9, 10, 11, 12, 13, 14, and 16 available for use with this microphone.  
**AG Crystal Microphone, Code: AGTAL.....List Price \$22.50**
3. **B9 CRYSTAL MICROPHONE.** Semi-directional. Recommended for public address. Chrome finish.  $\frac{5}{8}$ " x 27 thread. Complete with 8' cable and plug at microphone. Accessories 7, 8, 9, 10, 11, 12, 13, 14, and 16 available for use with this microphone. Code: BENIN.....**List Price \$22.50**
4. **CL2 CRYSTAL LAPEL MICROPHONE.** Built especially for lapel use. Maximum sensitivity in voice range.  $2\frac{1}{2}$ " diameter. Weight  $1\frac{1}{2}$  ozs. Complete with 25' cloth-covered, shielded cable and clip for attaching to clothing.  
**CL2 Crystal Lapel Microphone, Code: LATAL.....List Price \$25.00**
5. The B9 as a hand microphone. Chrome finish. Available with two types of switches. 8' cord. B9P with press-contact switch in handle, and B9S with slide switch in handle.  
**B9P Crystal Hand Microphone, Code: BECON.....List Price \$26.00**  
**B9S Crystal Hand Microphone, Code: BEHAN.....List Price \$25.00**
6. The AG as a hand microphone. Chrome finish. Available with two types of switches. 8' cord. AH using slide switch, and AGP using press-contact switch.  
**AH Crystal Hand Microphone, Code: AHTAL.....List Price \$25.00**  
**AGP Crystal Hand Microphone, Code: AGPAH.....List Price \$26.00**
7. **AG DESK STAND.** Consists of upright (handle) and base. Chrome finish  
Code: AGESK .....**List Price \$2.50**
8. **AG HANDLE.** Upright of AG Stand. Easily attached to AG Base by half turn, bayonet lock. Chrome finish. Code: AGHAN .....**List Price \$1.50**  
**AG BASE.** For use with AG Handle. Code: AGBAS .....**List Price \$1.00**
9. **AH HANDLE.** Upright of AG Stand with slide switch. Chrome finish.  
Code: SHAND .....**List Price \$2.75**
10. **DH HANDLE.** Upright of AG Stand with press-contact switch. Chrome finish.  
Code: DEPAH .....**List Price \$3.75**
12. **SUSPENSION EYE.** For suspending any microphone with standard  $\frac{5}{8}$ " x 27 thread. Chrome finish. Sturdy. Code: DYEYE.....**List Price \$1.10**
13. **BS BANQUET STAND.** Round base 8" in diameter. Rods 12". Extended height 24". Satin Black finish. Code: FUDAS .....**List Price \$8.50**
14. **FH3 and FL3 FLOOR STANDS.** Approved by the best sound studios. Positive, leather, friction-lock clutch. Noiseless operation. Rods 38". Extended height 6'. Three-contact, "floor grip," rubber-mounted base. FH3, studio model, net weight 15 lbs. FL3, public address model, net weight 10 lbs.  
**FH3 Floor Stand, Code: FUHET.....List Price \$17.00**  
**FL3 Floor Stand, Code: FLEXR .....List Price \$11.50**
15. **EL4 CARBON MICROPHONE.** Double button. Semi-stretched diaphragm. Good quality. Mounting yoke included. No ring or springs necessary.  
Code: LITEG .....**List Price \$8.00**
16. **DD DESK STAND.** Round base, 4" upright. Net weight  $1\frac{1}{4}$  lbs.  $5\frac{1}{4}$ " base. Chrome finish. Code: DYNES .....**List Price \$2.75**  
**DS Desk Stand.** Same as DD Stand except with  $4\frac{1}{4}$ " base. Chrome finish.  
Code: DINAC .....**List Price \$2.75**
17. **SJ CARBON MICROPHONE.** Single button. Sensitive. Chrome finish.  
Code: JOHNE .....**List Price \$5.50**
18. **FP CARBON MICROPHONE.** New single-button, sensitive, carbon microphone. Operates in any position. For use in French phones and other types of telephone and listening devices. Code: FRONE .....**List Price \$3.25**
19. **CARBON HAND MICROPHONES WITH SLIDE SWITCH.** Chrome finish.  
**DB2, Double-button, Hand Mike, Code DBTWO .....List Price \$16.50**  
**SB2, Single-button, Hand Mike, Code: SUTRO .....List Price \$11.00**  
Either above models with press-contact switch list \$1.00 extra.
20. **SB HAND MICROPHONE.** Sensitive. Operates in any position. Black crackle finish. Code: TILEX .....**List Price \$5.50**

# EASTERN

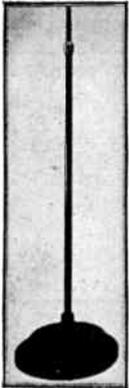

# MICROPHONE STANDS

Due to the fact that restrictions on strategic materials were still in effect at the time this catalog went to press, EASTERN is withholding the most sensational announcement in the history of microphone stands! When Victory is ours and restrictions are lifted,

EASTERN will present an exclusive new line of microphone stands which we guarantee will be the talk of the sound equipment industry. Watch for it!

Until then, we present herewith a condensed listing of our pre-war line.

## MODERNISTIC FLOOR STANDS

**EF139**— Beautifully proportioned 12" cast iron base in grey wrinkle finish combined with "Eastern" pump-action tubing in chromium. Has six felt feet. Height 37" to 65".  $\frac{5}{8}$ "-27 thread. Net weight 16 lbs.

**EF140**—A heavy type of floor stand for use with large velocity microphones. Has a chrome plated tubing section of larger diameter than that used on stand above. Base in grey wrinkle finish. Height 37" to 65". Fittings for  $\frac{5}{8}$ "-27 and  $\frac{1}{2}$ " pipe thread. Net weight 24 lbs.

## EASTERN "NECK SUSPENSION"

Catalog No. ES160

For switchboard and applications calling for a chest mounting, the EASTERN "THIRD HAND" leaves your other two hands free for required manipulations. Made from die cast metal and supplied with a 7" flexible gooseneck. An integral part of the casting is a call letter plate which is suitable for station or chain affiliation (letter in your

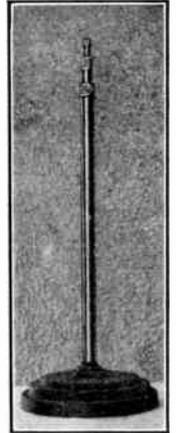

own call letters). Has a neck strap which is held by snap fasteners and a body strap which prevents shifting of microphone when leaning forward. Finished in beautiful black wrinkle.

## PORTABLE STANDS

### LIGHTWEIGHT STANDS FOR PACKAGE SOUND AND RECORDING SYSTEMS

**EF94**—A specially designed 3-section stand, ideal for portable applications where a full weight stand is specified. Has a new "BRAKE-LOCK" telescopic tubing with sections non-removable when extended. Heavily weighted modernistic base, 3" high with 9" diameter, requires very little space. Height of stand 24 $\frac{1}{4}$ " to 60". Has  $\frac{1}{8}$ " pipe and  $\frac{5}{8}$ "-27 thread. Base finished in Grey wrinkle and tubing in Chromium. Net weight 9 lbs.

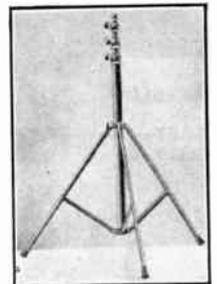

**EF92**—A full height two-section floor stand with same 9" modernistic Grey wrinkle base as supplied with EF94 described above, and tubing in Chromium. Height 35" to 64".  $\frac{5}{8}$ "-27 thread. Net weight 9 lbs.

### FOLDING TRIPODS

**EF73**—A three-section folding stand, of heavy material, made especially for microphone use. Ideal for all portable applications where light weight and minimum space are essential factors. Height 26" to 60". Base spread 24". Folds to 21 $\frac{3}{4}$ ". Thread  $\frac{5}{8}$ "-27. Net weight 3 $\frac{3}{4}$  lbs. Thumbscrew adjustment. All Chromium finish. Has rubber bumpers.

**EF74**—A four-section folding stand similar to above but with fourth section added, giving adjustable height from 27" to 78". Folds to 22 $\frac{3}{4}$ ". Thread  $\frac{5}{8}$ "-27. Rubber bumpers. Net weight 4 lbs. Thumbscrew adjustment. All Chromium finish.

## CRYSTAL PRODUCTS

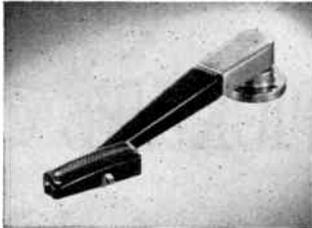

The Brush PL-20 crystal phonograph pickup is further adding to its already fine reputation through widespread use and acceptance in America's leading war plants and broadcasting stations. Not only does it insure the highest quality reproduction, but also conserves records. A stylus force of 30 grams (approximately 1 ounce) virtually eliminates

record wear and background noise. Laboratory tests reveal the permanent sapphire stylus shows no measurable wear after 250 hours of continuous use. The wide-range frequency response is indicative of the high quality playback characteristics of the PL-20 (flat within plus or minus 2.5 db. from 50 to 6,000 cps; slight rise to 10,000 cps.)

### BRUSH MODEL "PL-20" CRYSTAL PICKUP

Precision built for quality reproduction. Enough output for a conventional 2-stage amplifier. Reproduces "Constant Amplitude" recordings without equalization.

PL-20 pickup is shipped complete with No. 3761-B high impedance equalizer used for commercial "Constant Velocity" recordings. Additional No. 3761-B equalizers can be supplied at \$2.50 List. For low impedance applications No. 3761-A equalizer for 50/200/500 ohm line is available on special order. List Price \$15.00

Net Wt. 5 oz. Code Laped  
Shipping Wt. 1 lb.

Pickup arm is designed for records up to 17 1/4" in dia. Readily adaptable to most phonographs. Black molded plastic arm with satin chrome metal parts.

Pickup with 3761-B equalizer. List Price . . . \$45.00

Net Wt. 2 lbs. 4 oz. Code Payle. Shipping Wt. 8 lbs.

### BRUSH MODEL "RC-20" CRYSTAL CUTTER

The Brush RC-20 Crystal Cutter has been designed to satisfy the demand for high quality, low cost recordings in the home, school, and studio. Due to its inherent stiffness, the RC-20 will cut lateral type records in virtually all hard or soft disc materials. Being of simple and compact design, it is readily adaptable to all types of transcription equipment. A three watt amplifier is sufficient to satisfactorily drive the RC-20 cutter. Frequency response—flat within plus or minus 3 db. from 50 to 9,000 cps.

Cuts "Constant Amplitude" without equalization, and "Constant Velocity" or other desired frequency characteristics with suitable equalization. Complete technical data sent on request.

Cutter (less stylus)  
List Price . . . . . \$25.00

Net Wt. 4 oz. Code Reco  
Shipping Wt. 2 lbs.

### BRUSH MODEL "BR2S" MICROPHONE

A non-directional, high quality microphone incorporating the well-known floating-crystal SOUND-CELL.\*

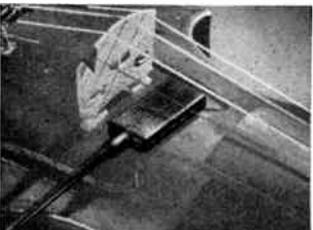

Performance is unaffected by vibration, shock, or low frequency wind noise. Output level -65 db. (based on 1 volt per bar reference level).

Flat from 30 to 2,000 cps with gradual rise to 4 db. maximum.

Especially suitable for public address systems, monitoring, recording, amateur radio, and industrial or institutional applications.

Microphone complete with plug and socket. List Price . . . . . \$29.50

Net Wt. 7 oz. Shipping Wt. 2 lbs. Code Maple

### BRUSH MODEL "VM-1" VIBROMIKE

The VM-1 or "Vibromike" is a miniature CONTACT-TYPE microphone with high sensitivity and unusually wide-range frequency response (30 to 6,000 cps.).

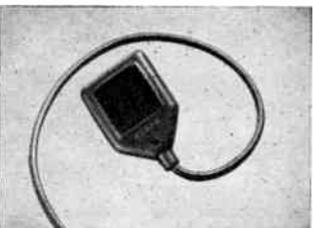

Designed for a broad field of reproduction applications through direct contact. Adaptable to musical instruments, industrial uses—detecting mechanical vibrations.

The crystal generating element is hermetically sealed in black rubber covered case, adding to general ruggedness.

Output voltage from .05 to .1 volt or higher. Supplied with spring-type mounting clamp. Easily installed. Size of microphone 7/8" x 3/4" x 3/8".

Microphone complete with mounting clamp and 25' of cable. List Price . . . . . \$17.50

Net Wt. 6 oz. Shipping Wt. 2 lbs. Code Music

### BRUSH MODEL "BL-1" LAPEL MICROPHONE

A non-directional SOUND-CELL\* lapel microphone for public speaking.

Especially designed to allow freedom of movement about the speaker's platform.

Can be used as either a lapel or hand-type microphone.

Has typical high quality SOUND-CELL response. The BL-1 is small (1 1/2" x 2 1/4") rugged and durable, a soft rubber covering gives added protection against shock. Output level -68 db. (based on 1 volt per bar reference level).

Microphone complete with 25' of cable. List Price . . . . . \$25.00

Net Wt. 8 oz. Shipping Wt. 2 lbs. Code Maize

PICK-UP UNITS

AUDAX

RECORDERS

*The Standard by which Others are Judged and Valued*

FOR more than a decade the design of the phonograph pickup has progressed but little, experiencing no fundamental improvement.

It is a pleasure, therefore, to record here for readers of "Electronics" the results of much research on the part of Maximilian Weil of the Audax Company, leading finally to a new unit—the MICRODYNE, in which the bugaboo of moving-mass has been eliminated etc." (reprint "Electronics") . . . This bears out the contention long made by leading scientists . . . that the MOVING-INDUCTOR principle is the only one that makes possible HIGH FIDELITY—and that means MICRODYNE.

FOR RECORDS UP TO 12"

**MICRODYNE D-38-H** . . . FLAT within  $\pm$  about  $2\frac{1}{2}$  db to 7500 cycles. Rising bass curve reaching about 6 db at 50 cycles. Exceptionally low Vibratory-Momentum. Point pressure about 43 grams. If desired, may be used with jewel-point. Tip-jack connectors. Black and Silver finish. Overall length 12". Impedance 200 or 500 ohms.....**\$49.75**

**L-17** . . . FLAT within  $\pm$  3 db to approximately 6500 cycles. Rising bass curve reaching about 8db at 50 cycles. Low Vibratory-Momentum. Point-pressure about  $1\frac{3}{4}$  ozs. Black and Silver finish. Overall length 11". High impedance or 200 or 500 ohms. **\$27.50**

FOR RECORDS UP TO 18"

**MICRODYNE D-39-H** . . . FLAT within  $\pm$  about  $2\frac{1}{2}$  db to over 7500 cycles. Rising bass curve reaching about 6 db at 50 cycles. Exceptionally low Vibratory-Momentum. Point-pressure about 43 grams. If desired, may be used with jewel-point. Tip-jack connectors. Black and Silver finish. Overall length  $14\frac{1}{2}$ ". Impedance 200 or 500 ohms. **\$64.75**

**L-18** . . . FLAT within  $\pm$  about 3 db to about 6500 cycles. Rising bass curve reaching about 8 db at 50 cycles. Low Vibratory-Momentum. Point-Pressure about  $1\frac{3}{4}$  ozs. Black and Silver finish. Overall length  $13\frac{1}{2}$ ". High impedance or 200 or 500 ohms. **\$39.50**

**RELAYED-FLUX MICRODYNE\***

THESE remarkable instruments operate on the famous "RELAYED-FLUX" principle. They are recommended to those who desire the finest of which science is capable. Because of abrasive in the material, present-day records operate best with steel-needles. This is a serious factor to be reckoned with when JEWEL-POINT operation is considered. For this reason, the "RELAYED-FLUX" MICRODYNE PRO-2 is the answer . . . While low point-pressure is desirable (provided it is not carried to extremes), VIBRATORY-MOMENTUM is the No. 1 factor in record wear. By ingenious design the VIBRATORY-MOMENTUM in the "RELAYED-FLUX" MICRODYNE has been brought down almost to the vanishing point.

FOR RECORDS UP TO 12"

**"RELAYED-FLUX" MICRODYNE PRO-2** . . . Designed for use with either needle or jewel-point—depending on type of records used. Extremely small moving mass cuts down Vibratory-Momentum almost to the vanishing point. FLAT within  $\pm$  about 2 db to over 8500 cycles. Output about —35 db. Point-pressure about 39 grams. Black and Silver finish. Overall length 12". Impedance 200 or 500 ohms. ....**\$68.50**

\* For working principle of "RELAYED-FLUX" see "PICKUP-FACTS."

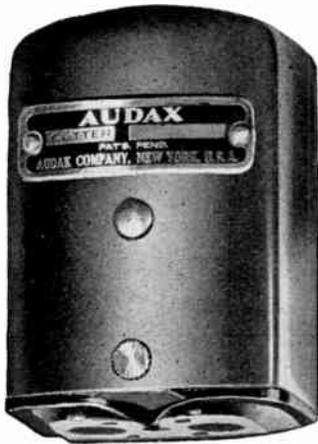

FOR RECORDS UP TO 18"

**"RELAYED-FLUX" MICRODYNE PRO-5** . . . Used in Radio Stations, Recording Studios and wherever super-quality performance is desired. Designed for and equipped with special Sapphire Jewel-Point. Extremely small moving mass cuts down Vibratory-Momentum almost to the vanishing point. FLAT within about  $\pm$  2 db to 10,000 cycles. Output about —35 db. Point pressure about 36 grams. Tip-pack connectors. Black and Silver finish. Overall length  $14\frac{1}{2}$ ". Impedance 200 or 500 ohms.....**\$108.00**

**Audax Pickups are built for use with the better grade sound systems and combinations.**

*The Standard by which Others are Judged and Valued*

## NEW AUDAX HIGH FIDELITY CUTTERS

*Distortion has been the greatest retarding factor in producing high quality instantaneous recordings. These NEW AUDAX CUTTERS make possible recordings that are comparable to the best commercial discs. Yet, with all their superlative qualities, cost no more than ordinary cutters. They fill an important gap in quality Recording technique.*

**AUDAX CUTTER H-5** . . . Substantially FLAT to 10,000 cycles. Distortion about .5% at 1000 cycles. Fully modulates groove with input of 16 db with 96 lines. Impedances up to 500 ohms.....**\$150.00**

**AUDAX CUTTER H-3** . . . Substantially FLAT to about 8000 cycles. Distortion about 1.5% at 1000 cycles. Fully modulates groove with input of 16 db with 96 lines. Impedances up to 4000 ohms.....**\$78.00**

**AUDAX CUTTER H-4** . . . Substantially FLAT to over 9000 cycles. Distortion about 1.0% at 1000 cycles. Fully modulates groove with input of 16 db with 96 lines Impedances up to 500 ohms.....**\$125.00**

**AUDAX CUTTER 8-X** . . . Substantially FLAT to over 5600 cycles. Distortion only 3.3% at 1000 cycles. Fully modulates groove with input of 16 db with 96 lines. Impedances to 5000 ohms.....**\$48.50**

AUDAX CUTTERS are magnetically powered—their characteristics are not affected by temperature or atmospheric changes. **They are readily interchangeable on most good recording machines.**

### JEWEL POINTS

Jewel-Point operation is a highly critical matter. Its use should not be undertaken without advice of the AUDAX COMPANY. All AUDAX jewels are made with the greatest precision by the highest skilled craftsmen of the lapidary art. Every AUDAX Jewel is finished and highly polished to the extreme accuracy of  $\pm .0001$ ".

STATIONARY

## SOUND RECORDING EQUIPMENT

### PRESTO MODEL "Y" RECORDER

The PRESTO model Y recorder fills the need for a 16" transcription recording and playback equipment which is extremely portable and yet capable of producing high grade recordings. It makes continuous 15 minute, 33 1/3 RPM electrical transcriptions of sufficiently good quality to be used by broadcasting stations. It also makes 78 RPM recordings on 6", 8", 10" or 12" discs and may be used to cut 11 1/2", 13 1/2" and 17 1/4" master recordings from which commercial pressings are produced. In addition to recording, the model Y gives excellent reproduction of both electrical transcriptions and phonograph records and is widely used for auditioning recorded radio programs to prospective sponsors. As a public address system it will provide sound for audiences up to 1000 persons.

Among the important features of the model Y recorder are:

1. The exclusive Presto rubber-rimmed-turnstile driven directly by a steel pulley on the motor shaft, a simple, foolproof drive system that eliminates vibration and holds the turntable speed absolutely constant. Maintenance is negligible. There are only two moving parts which need replacement about once a year.
2. A lever changes the turntable speed instantly without stopping the table or removing the record.
3. A lever adjusts the cutting mechanism to cut either from the outside of the disc toward the center or from the center out.
4. A cam lever lowers the cutting head gently on the record preventing accidental damage to sapphire needles.
5. A vibration damper attached to the cutting head suppresses vertical modulation in the record groove and eliminates variation in groove depth due to surface irregularities in

### PRESTO MODEL "L" TRANSCRIPTION PLAYBACK

This equipment is designed for radio stations, advertising agencies and program producers, who demonstrate recorded programs at the offices of prospective clients.

Salesmen who use the Model L Playback will particularly appreciate its attractive, workman-like appearance, its small size and light weight which make it extremely easy to carry, its simplicity which makes it possible to set up for operation within a few seconds and the remark-

ably clear, wide range reproduction . . . far superior to that ordinarily expected from portable equipment.

The Model L Playback was developed to meet an insistent demand among the larger broadcasting stations and agencies for "something better" in portable reproducing equipment. Those who use the Model L Playback in connection with important sales of station time and programs will consider its exceptional performance well worth its cost.

L-2—Portable transcription playback .....List, \$275.00

the disc. The damper also eliminates flutter when the records are played with pickups having a resonant peak in the low frequency range.

6. The cutting arm may be unlocked from the feed mechanism to cut spiral starting and runout grooves.
7. A time scale on the cutting arm shows the starting point for each size record and elapsed recording time at both 78 and 33 1/3 RPM.
8. The cutting head feed mechanism is located beneath the turntable where it is protected from dust or accidental damage. The parts of this mechanism are hand finished and fitted and its performance is equal in every way to the overhead lathe type mechanism commonly used.
9. The recording amplifier includes a two microphone mixer, high and low frequency equalizers and a change-over switch for continuous recording or re-recording. The amplifier and loudspeaker fit together to carry in a single case.

Y-2 Recorder ..... \$737.00  
Y-4 Recorder (low impedance inputs)..... 776.00

### PRESTO MODEL "K" RECORDER

The Presto model K is a portable sound recorder, record player and public address system complete in a single carrying case. Exceptionally light and compact, it is ideally suited to the needs of sales training and industrial schools, teachers of speech, music and dramatics, as well as professional actors and musicians who require an instrument that can be carried easily and set up for operation in a few minutes time.

The model K records 15 minutes continuously at 33 1/3 RPM on one side of a 13 1/4" disc. It may be connected to any home radio set to record complete radio programs. It also makes 6, 8, 10 and 12 inch records, and plays all makes of phonograph records. As a voice amplifying system it will serve audiences of about 500 persons.

Although it is the lowest priced complete Presto recorder, it contains many valuable features of the more expensive instruments such as:

1. A magnetic cutting head and pickup, the design used in the highest grade equipment.
2. A full sized, 6 tube amplifier having push-pull triodes in the power stage.
3. A high frequency equalizer for 33 1/3 RPM recording and a tone control for suppressing needle scratch when commercial records are played.
4. A safety cam lever for lowering the cutting head to prevent accidental damage to sapphire needles.
5. A detachable, dynamic loudspeaker which may be operated at any desired distance from the recorder.
6. A cutter feed mechanism located beneath the turntable where it is protected from dust or accidental damage.
7. Provision for quick change from cutting outside-in to inside-out.
8. The exclusive Presto rubber-tired turntable driven directly by a pulley on the motor shaft, a drive system that eliminates rubber pulleys and belts which are subject to rapid wear. Turntable speed may be changed in 5 seconds from 78 to 33 1/3 RPM by removing a brass pulley on the motor shaft.

These features, not found in any other low-priced recorder enable the user to make high quality recordings, consistently. They simplify the operation of the instrument for non-technical owners and reduce operating costs by preventing spoilage of discs and needles. As a result of its excellent performance, more Presto model K recorders are now used by schools, industrial concerns and in the home than any other recorder in a similar price range. K-8—Complete Recorder less microphone and stand, List, \$303.00

## PRESTO DISCS AND NEEDLES

FOR COMMERCIAL, EDUCATIONAL AND HOME RECORDING

All Presto discs may be cut on both sides. Each disc is labeled and enclosed in an individual envelope. Playing time per side for various sizes is as follows:

6" — 1 minute      10" — 3.5 minutes  
8" — 2 minutes      12" — 4.5 minutes  
16" — 15 minutes (33 1/3 RPM)

### PRESTO GREEN SEAL DISCS—ALUMINUM BASE

(611-A and 613-A packed in boxes of 30 discs;  
616-A in boxes of 25 discs)

Type	Size	Thickness	Price	Code
611-A	11 7/8"	.052"	\$1.25	ELVET
613-A	13 1/4"	.052"	1.80	THYRT
616-A	16"	.056"	2.50	SHIEV

### PRESTO OVERSIZE MASTER DISCS—ALUMINUM BASE

(All sizes packed in boxes of 20 discs)

Type	Size	Thickness	Size of Pressing	Price	Code
623-A	13 1/2"	.066	11 7/8"	\$2.25	TRIOS
627-A	17 1/4"	.066	16"	4.00	SEVYT

### PRESTO ORANGE SEAL DISCS

(Medium Aluminum Base—Overall Thickness .036")

Type	Size	Price (Box of 10)	Code (Box of 10)
306-A	6 1/2"	\$4.50	ORSIN
308-A	8"	5.50	ORBAL
310-A	10"	8.00	ORCAR
312-A	12"	10.00	ORDEL

### MONOGRAM DISCS

Economical composition base, but same coating as Green Seal discs. Overall thickness .050".

Type	Size	Price (Box of 10)	Code (Box of 10)
706-A	6"	\$2.00	MOBEL
708-A	8"	3.50	MONOR
710-A	10"	5.00	MOSBY
712-A	12"	7.00	MOTAX
713-A	13 1/2"	10.00	MOXIE
716-A	16"	15.00	MOTUD

NOTE: 16" Monogram discs are packed 25 to the box. All other sizes, 10 to the box.

### Type 10-A Turntable

The 10-A table forms a part of the Presto 62-A and 63-A transcription turntables. The chassis only is offered as a replacement unit for stations having satisfactory reproducing pickups mounted on worn or inadequate turntables. The 10-A chassis can be mounted in most cabinets without disturbing the pickups or controls.

The mechanical design of the 10-A table is extremely simple. There are but 2 moving parts. The table consists of a metal platter to which a live rubber tire is fitted. This assembly is machined to perfect roundness and dynamic balance. A steel step pulley on the motor shaft drives against the rubber rim of the table. Speed is changed instantly by moving the motor carriage to engage either section of the drive pulley. Maintenance consists of oiling at 90 day intervals, occasional adjustment of the drive pressure and replacement of the tire once yearly.

The 10-A table is used and recommended by leading radio stations and transcription makers for playing both vertical and lateral recordings. List Price.....\$228.00

### ALUMINUM DISC RE-COATING SERVICE

Size	Perfect One Side	Both Sides	Code
12"	\$1.10	\$1.25	CLIVE
13 1/2"	1.40	2.00	CLAFF
16"	1.50	2.25	CLEXE

NOTE: We reserve the right to reject any discs which are damaged to such an extent that they cannot be recoated. About 20% of the recoated discs are perfect on one side only.

440-B	Red Shank Steel playing needle (carton, 40 pkg. of 25)	10.00	DAWES

### Type 75-A Recording Turntable

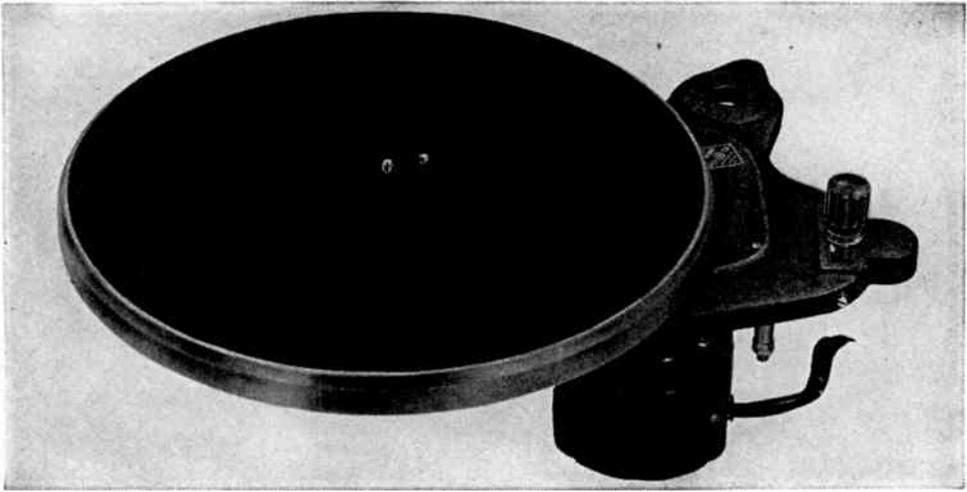

The lightest 16" dual speed recording turntable made. Recommended for all services requiring a high grade portable recorder. Widely used by broadcasting stations that record local news events for delayed broadcasts; a rugged, compact recording installation for mobile pick-up units.

**Standard Equipment:** The equipment consists of a 16" cast aluminum turntable, carefully machined to dynamic balance, weighing 10 lbs. It revolves on a single ball bearing at the base of a bronze shaft well. A heavy live rubber tire on the rim of the turntable engages with a steel, step-pulley on the motor shaft to drive the table. The motor is suspended by rubber grommets in a carriage which is moved up or down by a lever to change the turntable speed. The motor drive and turntable are mounted in a cast aluminum base designed to combine extreme rigidity with light weight. The cutting mechanism consists of a fan gear, worm and pinion driven by a worm on the turntable shaft. The 1-C high fidelity cutting head, 171-A vertical damper, 21-A time scale and 150-C lateral pickup are included as standard equipment. The 75-A table is mounted in the 2A carrying case. The 75-B turntable is mounted in the 3-A cabinet.

List Price.....\$424.00

# REK-O-KUT

## Professional RECORDING EQUIPMENT

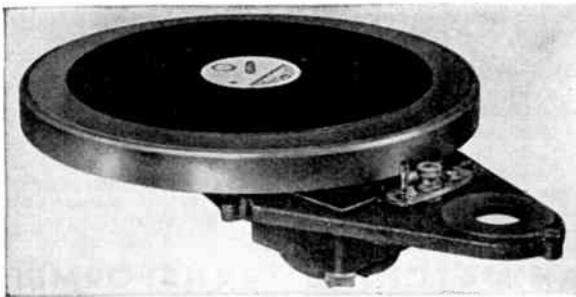

### RK-D16 DUAL SPEED 16" RECORDING MOTOR ASSEMBLY

This precision-constructed instrument, unsurpassed in quality and performance is operating in many of the leading broadcasting stations and educational institutions. Ruggedly constructed and painstakingly assembled for efficient and prolonged service.

#### EQUIPMENT

- 1) Lathe turned, 25 lb. cast iron turntable, dynamically balanced, with disappearing drive pin and rubber turntable pad.
- 2) Turntable fitted with one inch diameter polished steel shaft, with special oil grooves for force feed lubrication when operating. Rotates on a single ball bearing at the bottom of the turntable well.
- 3) 1/20 H.P. General Electric constant speed motor.
- 4) One dual and one single speed idler.
- 5) Adjustable stops to regulate idler pressure against turntable.
- 6) 10 lb. machined mounting base of Cast Iron, with integral lathe bored and lapped turntable bearing.
- 7) This single unit type construction insures positive and easy alignment of the REK-O-KUT overhead mechanism with the turntable.
- 8) Entire assembly can be permanently installed in 15 minutes.

RK-D16—Dual Speed 16" Recording table, mounting base and motor..... Net Price, \$125.50

### RK-D12 DUAL SPEED 12" RECORDING MOTOR ASSEMBLY

The answer to the demands of small studios, program and advertising agencies, educational institutions, etc. . . . for professional dual speed 12" recording units at substantially lower cost. Design and construction similar to model RK-D16, 16" assembly. Turntable can accommodate 16-inch blanks for playback.

**CONSTRUCTION**—Similar to RK-D16 (16" assembly) in material, workmanship and design. RK-D12 differs only in that the cast iron turntable weighs 12 lbs., and smaller constant speed recording motor and special rotor speed shift arm are employed.

Net Price

RK-D12—Dual Speed 12" Recording table, base and motor \$59.50  
 RK-12—Single Speed 12" ..... 37.50

### RK Monitor Meter

A sturdy meter of the rectifier type, especially designed for monitoring purposes. The meter has four scales, one reading from -10 db. to +7 db., and a second from +7 db. to +25 db. The other two scales for recording level indication are calibrated in terms of "undercut," "normal cut," and "overcut." They are clearly indicated. The meter is tapped for 8 ohm and 500 ohm input.

RK—Monitor Meter Dual scale 8 and 500 ohm ..... Net Price, \$9.75

**Professional  
RECORDING  
EQUIPMENT**

## REK-O-KUT OVERHEAD FEED MECHANISMS

(Illustrated above with horizontal type crystal cutter)

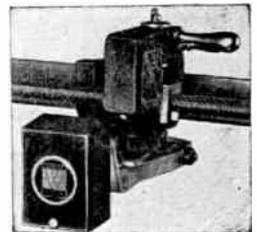

The REK-O-KUT 1942 Model overhead feed mechanism is the first professional unit to offer a Universal Cutter Mount with micrometer adjustment. This exclusive feature, not found on any other machine, permits the user to interchange the vertical magnetic cutter with the horizontal crystal or magnetic type, or the Brush Crystal oblong Cutter, without changing the position or the height of the mechanism after it has been mounted. The micrometer adjustment enables the operator to raise or lower the cutter in easy stages to compensate for the height of the cutter, and to get the proper stylus angle. Mechanisms are made for both 12" and 16" turntables.

Universal cutter mount with Brush crystal oblong type cutter.

### OUTSTANDING FEATURES

- 1) Universal cutter mount for interchanging popular type cutters.
- 2) Micrometer adjustment for selecting preferred stylus angle and to compensate for record thickness, without raising or removing the entire mechanism.
- 3) Double action swivel for easy alignment of mechanisms with REK-O-KUT turntable.
- 4) Simplified carriage lift for accurate spot recording or spiral.
- 5) Standard units record 100 lines per inch, outside in. Also available inside out at no extra charge.
- 6) Deluxe units are now offered with 120 line precision, lathe cut feedscrews.
- 7) Either 100 or 120 line feedscrews available as standard replacements.
- 8) Patented chip collector eliminates stylus "pull" and doublecutting.

Universal cutter mount with vertical magnetic type cutter.

ALL MAGNETIC CUTTERS AVAILABLE 8 OR 500 OHMS  
NO OVERHEAD MECHANISMS SOLD WITHOUT CUTTERS

### RK MATCHING TRANSFORMER

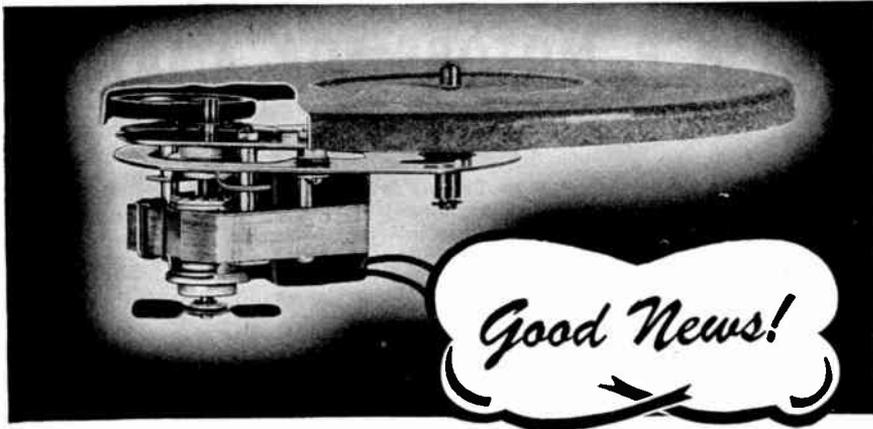

Specially designed to operate with Brush High Fidelity cutter. The frequency response of the RK Matching Transformer is flat from 50 to 9000 cycles. Input taps of 6-8 and 500 ohms gives user a choice of tapping his cutter into either an 8 ohm or 500 ohm line. This matching transformer is required where the user of a crystal cutter is unable to have a direct hook up to a high impedance line.

RK—Matching Transformer for Brush and Astatic Cutters 50-9000 cycles, Net Price, \$5.50

# ALLIANCE "Even Speed" PHONO-MOTORS

## TWO MOTORS THAT MEET 95% OF ALL REPLACEMENT REQUIREMENTS

### "Even-Speed" MODEL 80

Available for operation on 110 or 220 volt, 40, 50 or 60 cycle source at 16 watts input, 78 R.P.M. only. Simple and quiet in operation—no gears—smooth positive friction rim drive. Good regulation characteristics for uniformity of table speed. Ample proportioned bearings—large oil reserves. Motor and idler plate shock mounted to mounting plate for low vibration transfer to turntable and motor board. Forced ventilation for cool operation. Slip type fan precludes possibility of injury. Mounting plate maintains correct turntable height regardless of mounting board thickness. Available with 8, 9 or 10 inch turntable top. Maximum depth below base mounting plate,  $2\frac{1}{8}$  inches.

### "Even-Speed" MODEL K

The 25-cycle Companion to the Model 80 Friction Drive Phonomotor. Available for operation on 110 V. 25 cycle source at 12 watts input. This phonomotor is designed specifically for 25 cycle operation, having a motor of entirely new design, but employing the same efficient, positive, friction rim drive as the popular Model 80. Interchange-ability in mounting is therefore obtained without sacrifice in performance. Ample proportioned bearings and large oil reserves assure long, trouble-free service. Motor and idler plate are shock mounted to cabinet mounting plate for low vibration transfer to turntable and motor board. Available in 8 or 9 inch turntable sizes only. Maximum depth below base mounting plate,  $2\frac{1}{4}$ ".

# DUOTONE *Recording Blanks*

## DUOTONE-VAN EPS CUTTING HEAD

This cutting head has a reed armature, which is rugged, and acts as its own damper, eliminating rubber, and other deteriorating materials which usually cause cutting heads to change from day to day.

The measured distortion is 1.8% at 400 cps.

The impedance of the cutter is actually 500 ohms at 400 cps.

It requires only plus 20 db level (6 milliwatts in 500 ohms) for normal amplitude. This is less than 1 watt of power.

It is easily installed. The head comes equipped with an extra mounting plate for instant mounting and is easily interchanged where other heads are used.

It is carefully tested at our laboratory and a graph accompanies each cutter, giving the frequency response.

The head is hermetically sealed and GUARANTEED if the seal is not broken.

# DUOTONE Needles

## STEEL CUTTING STYLUS No. 8

The ideal needle for use in homes by amateur record makers. With ordinary care will make a quiet, record of good quality, which can be played back many times. Will make approximately 15 to 25 10" records. Packed 4 to handy point-protecting felt-lined package.

- List  
 Cat. No. 8-P—Package of 4 needles.....\$ 1.00  
 Cat. No. 8-B—Carton of 25 pkgs..... 25.00  
 Cat. No. 8-C—Display card of 25 pkgs..... 25.00

## STELLITE CUTTING STYLUS No. 9 Available in Long and Short Shank

The Stellite cutting stylus with proper care, will make a record that compares favorably with a professional cutting. Its hand-lapped edge cuts a groove which assures a noiseless recording. Stellite styli are recommended after some cutting experience has been acquired. The reduction in surface noise and the improved quality of the recording will be instantly noticeable, and will be well worth the difference in cost. Will cut approximately 500 6" records. Individually packed on cards.

- List  
 Cat. No. 9-P—Needle, each .....\$ 2.00  
 Cat. No. 9-B—Carton of 12 needles..... 24.00  
 Cat. No. 9-C—Display card of 12 needles... 24.00

## LAPPED STEEL CUTTING STYLUS No. 10

The hand-made lap on the cutting edge of the needle, makes a much smoother cut, thereby reducing surface noise and adding to the life of the needle. Especially recommended for making vocal recordings.

- List  
 Cat. No. 10-P—Card of 5 needles.....\$ 1.50  
 Cat. No. 10-B—Carton of 50 needles..... 15.00  
 Cat. No. 10-C—Display card of 50 needles.. 15.00

## SAPPHIRE STYLUS No. 12

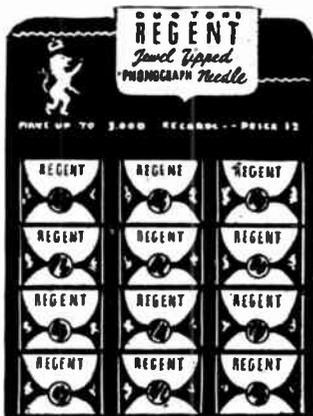

Available in Long and Short Shank. The sapphire Professional cutting stylus is the finest available. The cutting jewel is very highly polished and has a patented hand-lapped edge, which cuts and polishes the groove, making a record with the lowest surface noise. With proper handling will give 10-15 hours of cutting and can be resharpened many times.

- DO NOT DROP  
 Packed in plastic container.  
 Cat. No. 12—Needle, list price, each .....\$5.50  
 (Resharpening—Each \$2.00)

- DURAL SHANK No. 11  
 Available in Long and Short Shank  
 This needle is similar to No. 12, and in addition is held to more exacting specifications, as established by leading engineers. Mounted in Dural shank. Packed in plastic container. Each \$7.25  
 (Resharpening—Each \$2.00)

## DUOTONE RECORDING FLUIDS

### DUOTONE RECORD PRESERVER

A newly developed fluid that helps make phonograph records (Victor, Columbia, Decca, etc.) last much longer. Duotone Record Preserver not only cleans the record, but actually puts a thin protective coating on it. This coating protects the record against excessive wear and in addition enables the needle to glide smoothly, thus reducing surface noise.

- List  
 Cat. No. 105-P—One 2-oz. bottle, each.....\$0.50  
 Cat. No. 105-B—Attractive display carton of twelve 2-oz. bottles... 6.00

### BEARING LUBRICANT

For Recording Mechanism, Turntable Spindles and Phonograph Motors. Will not dry out—will not thin or run—Non-Acid. Will improve performance of any machine.

- Cat. No. 103-P  
 Each .....\$0.50  
 Cat. No. 103-B  
 Carton of 12 bottles..... 6.00

### PRE-RECORDING FLUID

For use on the disc before cutting. When applied to the surface with a piece of soft cotton, it allows the needle to cut smoothly, thus reducing surface noise and needle wear. Will not harm ANY kind of coating.

- Cat. No. 101-P List  
 Each .....\$0.50  
 Cat. No. 101-B  
 Carton of 12 bottles..... 6.00

### HARDENING FLUID

For use on home recorded records after cutting. Apply to surface with piece of soft cotton, covering entire surface of record. Preserves groove structure and record life. Materially reduces surface tension. Restores original tone quality on older records.

- Cat. No. 102-P List  
 Each .....\$0.50  
 Cat. No. 102-B  
 Carton of 12 bottles..... 6.00

### CACTUS NEEDLE SHARPENER No. 104

A "fool proof" sharpener guaranteed to make a point the equal of a new one. Utilizes the turntable of your phonograph. Each disc has pointing and polishing sides, assuring a sharp smooth finish to the point. Emery disc will last for many months. Extra discs available 30c each at any dealer.

- List  
 Cat. No. 104—Each.....\$1.25  
 Extra discs, each ..... 0.30

# DUOTONE Needles

## FILTER POINT No. 610

The Filter Point needle is a newly developed needle which actually filters surface noise, yet retains the brilliance of your recordings. The highly polished and rounded point assures smooth movement in the record groove, reducing record wear to a minimum. The needles are hand picked and will play from 12 to 15 records without frequency loss or distortion. The specially designed point is guaranteed not to break when used with any type of record changer.

No. 19 "STAR" SAPPHIRE

Reproduces any type of record without surface noise yet maintains brilliant high frequencies. Finest quality gem, brightly polished for smooth riding in groove. Special design filters out all noise and needle talk. Has flat on shank for easy insertion in pickup. May be removed if desired. Individually packed in beautiful lucite box. Ideal for dubbing.

## CHROMIUM No. 17

The DuoTone Chromium needle is Duo Chrome plated to insure long life and minimum record wear. Ideally suited for use on record changers. Each needle has a highly polished surface, and is shadowgraphed. Being of a semi-permanent type, the Chromium needle avoids the necessity of constantly changing needles. Each needle is

## TRANSCRIPTION No. 710

Transcription needles are individually shadowgraphed to insure each needle being perfect. They are especially designed to reduce record wear on home recordings and will give life-like reproductions when used on commercial or home records. This needle, because of its perfect point and fine frequency response, is extensively used by broadcasting stations, and recording studios. Economically packed for use in homes and studios.

## DURPOINT No. 15

Permanent needle for home use. Will play over 4000 records without changing. Takes additional polish from the groove of the record thus minimizing record wear, and reducing surface noise. Because of this feature the Durpoint should not be removed from pickup until replacement is necessary. Packed individual cards.

- |   |                    |

# Jensen PHONOGRAPH NEEDLES

for the world's finest music

## The Royal Jewel

## Genuine Sapphire Needle

Jensen Royal Jewel Display with 12 individually packaged needles . . . Catalog Number 25 D. List price . . . \$30.00

Designed by a recognized authority in the field of sound engineering, the Jensen Royal Jewel Phonograph Needle has a genuine sapphire tip—the same precious jewel universally used in fine watches and delicate precision instruments. The design of the needle assures full tonal range and high fidelity. The sapphire tip provides smoothness and extraordinary long life. It absorbs vibration, minimizes hiss, prolongs the life of valuable records. And it plays over 10,000 times. Illustrated here is the much talked about Jensen Royal Jewel Needle display with the velour tray holding twelve slick-black oval packages. The attractive backboard is printed in full color and invites considerable interest in the needle.

Jensen Royal Jewel Genuine Sapphire Phonograph Needle . . . Catalog Number 25. List price . . . \$2.50

## The POPULAR Jensen CONCERT NEEDLE

The full tonal range, fidelity and long wearing qualities of the Jensen Concert Needle are assured by the *precious metal tip* and the flanged design. The spring action of this popular needle preserves the surface of records and lengthens their playing life. It incorporates all of the latest discoveries in acoustical science; plays up to 5,000 times.

Pictured at the left is the colorful, point-of-sales display holding twelve individual blue and gold packages of Jensen Concert Needles. The display card bears signature endorsements of the needle by famous orchestra leaders.

Jensen Concert Phonograph Needle . . . Catalog Number 10. List price . . . \$1.00

Jensen Concert Needle Display holding twelve needles . . . Catalog Number 10 D. List price . . . \$12.00

## The RADIO SERVICEMAN'S HANDY SALES KIT

The Jensen Phonograph Needle Saleskit (designed especially for Radio Servicemen) contains three Jensen Concert Needles retailing at \$1.00 and three Jensen Royal Jewel Needles retailing at \$2.50 each. This compact, convenient kit is just the thing for slipping into the pocket and taking on service calls . . . a definite aid in demonstrating fine phonograph needles. It's a real sales-help. Descriptive copy is printed alongside the needles as a sales convenience. Jensen Phonograph Needle Saleskit holding 6 Needles as above. Catalog Number 6 K. List price . . . \$10.50

### The COIN MACHINE NEEDLE KIT

The Jensen Coin Machine Needle Sales kit is a handy, leatherette covered aid for the coin machine serviceman. It consists of a pocket-size kit with a note pad for ready reference notations. Supplied with 100 coin machine needles in units of 10 needles. Each needle card has space for a record of the needle's playing history. Jensen Coin Machine Needle Saleskit . . . Catalog Number 10 K-

THE Jensen INDUSTRIES INC.

# Planning

## FOR TOMORROW

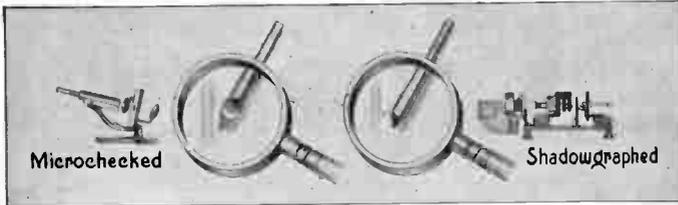

Phonograph and sound-recorder manufacturers now planning for post war production, are invited to consult M. A. Miller Company for standard and special types of recording and play-back needles.

Our manufacturing capacity has been more than tripled and we are prepared to meet the most rigid requirements as to quality, quantity and delivery. We can follow your specifications and blue prints to a high degree of accuracy—or design any changeable or fixed type needle required. We also manufacture small metal parts, and Osmium alloy tipped pivots for precision instruments.

We solicit inquiries on specially packaged and private label needles.

**M. A. MILLER MANUFACTURING CO.**  
1168 East 43rd Street Chicago, Ill.

# M. A. Miller RECORDING AND PLAYBACK NEEDLES

**INDIVIDUALLY MICROCHECKED AND SHADOWGRAPHED TO INSURE PERFECTION . . .**

To insure a high standard of quality in Miller "Clarion Dynamic" needles, each needle is carefully checked by micrometer, and inspected with the aid of powerful shadowgraphs, magnified over 200 times to reveal possible flaws and maintain uniform quality.

## MILLER FAMOUS "CLARION DYNAMIC" QUALITY CUTTING NEEDLES PLAYBACK NEEDLES

### Alloy Tool Steel

Made of the finest alloy tool steel, microscopically ground and polished with diamond dust. Recommended for amateur home use. Will cut approximately twenty-five six-inch records.

List \$ .25

### Rigid Type

Semi-permanent, precious metal alloy tip, play back needle for home or commercial use. Rigid type, high fidelity. Will play more than four thousand records. Ideal for coin operated phonographs.

List \$ .50

### Precious Metal Alloy

Precious metal alloy tip recording stylus, for the advanced amateur. A sturdy, long wearing, highly polished needle. Cuts a V bottom groove. Will make approximately three hundred six inch recordings.

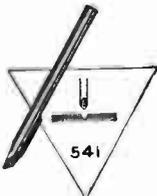

List \$ .50

### Flexible Type

Semi-permanent, flexible type play back needle, for home use on new light weight pick-ups. Reduces record scratch to minimum. Precious metal alloy tip, will play more than four thousand records.

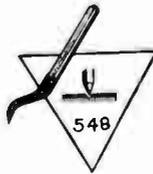

List \$1.00

### Precious Metal Alloy

A high grade recording stylus, for the advanced amateur and professional use. Electrically welded precious metal alloy tip, microscopically ground, and polished with diamond dust. Hand finished tip cuts round bottom groove for best possible results. Will cut approximately five hundred six inch records.

List \$1.00

### Offset Type

Scientific construction gives highest possible fidelity reproduction with lowest possible distortion and scratch.

List \$ .50

### Stellite

This patented Stellite recording stylus, when used by the advanced amateur or professional, will give results closely approximating the finest Sapphire. Hand finished tip, cuts quiet round bottom groove. Will cut approximately five hundred six inch records.

List \$1.25

### Osmium Alloy Tip

Gold plated bent needle. Highly polished. Enamelled shank. The finest permanent type Osmium Alloy tipped needle on the market.

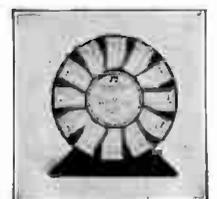

List \$1.50

### CELLOPHANE WRAPPED CARDS

Needles mounted on individual cards and enclosed in cellophane envelopes.

INCREASE YOUR SALES WITH OUR NEW COUNTER SALES BUILDER. TWELVE NEEDLE CARDS MOUNTED ON EACH DISPLAY.

## Recordisc Home Recording Blanks "Snapshots-in-Sound"

Outstanding among instantaneous home recording blanks are Recordiscs — the amateur's blanks with professional reproduction standards. Made in accordance with an exclusive formula, the Recordisc blanks described herein have a flawless, mirror-like surface, and are available in pre-war qualities. Recordiscs have long been the most popular instantaneous home recording blanks in the country because of their natural, life-like tone and superior performance. Minimum surface noise, ease of cutting, long wear and low cost are but a few of the advantages that make more people demand Recordisc than any other blank.

### YELLOW LABEL

Designed primarily for the home recording fan, these discs are admirably suited to the average type of amateur transcription. Reasonable fidelity may be secured. The base material, a 30 point compo base, has been specially selected for surface uniformity and flatness. A "party" favorite. Non-inflammable—U/L Approved.

### ORANGE LABEL

Slightly heavier and firmer, with a compo base that is 50 points thick, these recording blanks are carefully coated with our standard Recordisc surface compound. They are particularly suitable for clear voice reproduction. Professional nitrate coating.

### GREEN LABEL

Favored by schools, colleges, conservatories, orchestras and more advanced home recording enthusiasts, these blanks are uniformly coated over a heavy, specially processed steel base that is surface-processed and critically inspected. The chemical qualities of our compound enable reproduction of truly wide tonal ranges. Non-inflammable—U/L Approved.

### BLUE LABEL

For brilliant and consistent reproduction quality over a wide frequency range, we recommend these discs. The heavy coating on our carefully prepared, bulky, critically processed steel base, insures quiet, smooth-cut grooves. With surface noises reduced to a bare minimum, they are vastly superior to commercial phonograph records. Professional nitrate coating.

### RED LABEL

Comparable in quality to those used by broadcast stations and professional recording studios, "Red Label" discs have been reduced in size for universal adaptation by those who have equipment of a non-professional type. These discs are made with a heavyweight, name-plate aluminum base. More expensive than others in the Recordisc line, "Red Label" discs were created for critical ears who require the finest discs available in small sizes.

GRADE (color code)	LIST PRICES			
	6 1/2 inches	8 inches	10 inches	12 inches
YELLOW LABEL	12 1/2¢	20¢	30¢	—
ORANGE LABEL	15¢	25¢	35¢	—
GREEN LABEL	25¢	35¢	50¢	—
BLUE LABEL	30¢	40¢	60¢	—
RED LABEL	40¢	60¢	80¢	\$1.00

Recordisc engineers, through constant association with recording problems, have perfected our coating compounds and application processes to such a degree that brilliant reproduction qualities are no longer limited to the more expensive grades, but are inherent in every Recordisc blank.

## RECORDING ACCESSORIES

### SAPPHIRE STYLUS

While this type of cutting needle represents a greater initial investment, it has the longest life and produces superior instantaneous recording. The specially lapped sapphire point cuts a clean shiny groove with the lowest surface noise. Ordinarily, these styli can be used for ten hours of recording time. In addition, they may be resharpened, periodically, as many as 15 times. Packed in plush lined, individual jewel boxes. List price, each \$5.00

### SAPPHIRE PLAYBACK NEEDLE

As many as 6,000 home recording blanks may be played back with a single needle. Packed individually in plush lined jewel boxes. List price, each \$2.50

### STELLITE STYLUS

Carefully machined, of a special metal alloy, these needles produce results almost as good as those obtained from the sapphires. Not as fragile as more expensive sapphire styli. Packed one to a protective card. List price, each \$1.75

### ALLOY PLAYBACK NEEDLES

Specially tempered metal alloy. These playback needles play up to 5,000 instantaneously recorded discs. Individually packed. List price \$1.25

### STEEL STYLI (Hand lapped)

Carefully hand lapped for greater fidelity. Packed one to the protective card. List price 35¢

### STEEL STYLI (Silver plated shank)

Recording life of approximately 1 hour. Packed in felt lined folder, 5 to a card. List price 5 for \$1.00

### STEEL STYLI (Gold plated shank)

Recommended for home recording. While these needles will record with reasonably good quality, their life is usually no greater than 1 1/2 hours. Cannot be resharpened. Packed 4 to a package. List price, 4 for \$1.00

### RED SHANK PLAYBACK NEEDLES

Carefully shadowgraphed to fit grooves of instantaneously recorded blanks. Recommended for wide frequency response and minimum record wear. 30 to the envelope. List price per pkg. 25¢

### SILVER SHANK PLAYBACK NEEDLES

Designed for acetate records but recommended for general commercial use. Each plays up to 10 recordings. A fresh needle should be used for acetate after commercial record has been played. 50 to the envelope. List price per pkg. 30¢

### RECORD PRESERVER

This lubricant not only cleanses and preserves the fresh surface, but lubricates the groove to a degree where the improvement in tonal qualities is readily discernible. List price 2 ounce bottle 45¢

### TURNTABLE LUBRICANT

This Recordisc lubricant is recommended for smooth operation of all parts subject to friction wear. List price per jar 40¢

### MAILING ENVELOPES

Made of heavy brown Kraft and lined with high test corrugated board, may be sent via Parcel Post or Express with absolute safety. Printed with provision for return address of sender.

For 6 1/2 inch record, list price each 10¢  
For 8 inch record, list price each 12¢  
For 10 inch record, list price each 15¢

# GOULD-MOODY

## "Black Seal"

### ALUMINUM INSTANTANEOUS RECORDING BLANKS

For the first time in the history of recording blanks, Gould-Moody has developed a formula that will not dry out, and will be as faithful in reproduction after prolonged periods of storage as when originally cut. Head and shoulders above competition, Gould-Moody "Black Seal" blanks have such desirable advantages as engineered center thread action . . . four holes in every disc . . . continued high fidelity through long months of play-backs . . . and greater economy.

BUY AND HOLD WAR BONDS TILL VICTORY

# audiodiscs

## ALUMINUM AND GLASS BASE RECORDING BLANKS

Audi discs are high quality, precision-made, instantaneous recording blanks which have established new standards of perfection and won the acclaim of professional and amateur recordists.

### AN AUDIODISC FOR EVERY RECORDING NEED

**RED LABEL AUDIODISCS** exceed the professional demands of broadcasting stations, sound and movie studios where top quality and dependability are primary requirements. These discs are double-sided and are acclaimed throughout the profession as the ultimate in disc perfection.

**SINGLE FACE RED LABEL AUDIODISCS** bring new economy to applications requiring but one side. Both sides are coated with the recordable side identified. In quality and appearance these discs conform exactly to the double-sided type.

**YELLOW LABEL AUDIODISCS**, double-sided blanks of high, uniform quality, have "wide latitude" characteristics that make extra-fine adjustments, special styli, or close attention to the cutting angle unnecessary. High-fidelity, easy-to-use Yellow Label Audi discs are the popular choice for all general purpose recordings.

**REFERENCE RECORDING AUDIODISCS** permit extreme economy in making test-cuts, filing and reference recordings. Coated on both sides.

**MASTER AUDIODISCS** are the outstanding choice where pressings are to be made after electroplating. Professional master blanks are made in oversize diameters coated on both sides. Single-face Masters are also available.

## PROPERTIES THAT MAKE FOR AUDIODISC LEADERSHIP

### UNIFORM COATING

Audi discs' exclusive machine process produces a smooth flat coating seven thousandths of an inch thick, free from swirls, waves and "orange peel" effect. The depth of the coating is consistent within one-half thousandth of an inch.

### LONGER STYLUS LIFE

The homogeneous coating is free from microscopic abrasive materials and surface imperfection which, in inferior discs, damage cutting points and cause extraneous noises in playback.

### SILENT BACKGROUND

Audi discs, cut under good recording conditions are entirely free from audible "background scratch".

### LONG PLAYBACK LIFE

With correct playing equipment an Audi disc can be played for more than a hundred times with no noticeable increase in surface noise.

### BRILLIANT FREQUENCY RESPONSE

These discs are noted for their brilliant high frequency response. Audi discs "speak for themselves" with quality performance that pleases the most critical recordist.

### NO DETERIORATION WITH AGE

A special curing process removes from Audi discs the last trace of volatile constituents. Blanks made over five years ago still cut easily and play back perfectly.

### CONSISTENT QUALITY

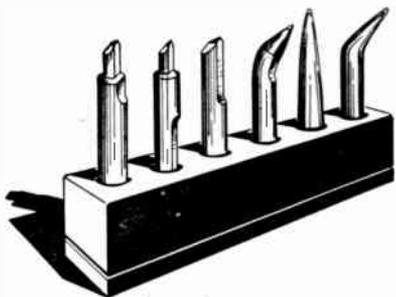

Audi discs are manufactured by a unique automatic precision-machine process which assures consistent quality. This uniformity is a feature that helps engineer and amateur attain the highest degree of recording excellence.

### GENERAL NOTE:

Audi discs are manufactured on aluminum or glass base. The extent to which aluminum base discs are available at any time depends on WPB regulations. Consult your distributor as to the current situation. All Audi discs are coated with identical recording lacquer improved through many years of constant research.

# audiopoints

## MICROSCOPICALLY MATCHED CUTTING AND PLAYBACK POINTS

*Especially Designed for Use with Audiodiscs and Other Instantaneous Recording Blanks*

The quality of sound obtainable from a recording blank can be no better than the points used in its cutting and playing. Our research has established a much-needed set of cutting and playing needle standards which, if adhered to, bring out the best qualities not only of AUDIODISCS but of ALL blanks. The following data explains why AUDIOPPOINTS will solve your needle problems.

### AUDIO CUTTING POINTS

Audio Cutting Points are available in several types and materials to give full range to the recordist's needs.

#### SAPPHIRE

Sapphire, though brittle and requiring careful handling, makes the finest cutting point. It takes a fine polish, has a low coefficient of friction and is extremely long wearing. Though more expensive, it is, in view of its long life and the fact that it can be repeatedly sharpened, the most economical of stylus materials. It is especially recommended for professional and master-recording work.

#### STELLITE

Stellite, an extremely hard metal alloy, cuts a groove comparable to a sapphire. Stellite styli are low in first cost, have good wear life and can be repeatedly sharpened.

#### STEEL

Where first cost is a major consideration, good steel points can be used. The groove is not as silent and shiny as that obtained with a sapphire but is, for many purposes, entirely satisfactory. Steels must be changed often and cannot be economically resharpened.

### AUDIO PLAYBACK POINTS

Manufactured and checked to specifications which bear a practically ideal relationship to Audio Cutting Points. Audio Playback Points are made in several types and give best playback results and longest life to all records.

#### SAPPHIRE

The finest playback needle from every standpoint is the sapphire. One sapphire AUDIO-PLAYBACK POINT will play thousands of recordings and, when finally worn, can be resharpened. Care, however, must be used in handling to prevent breakage of the brittle point, as the jagged edge of a break will seriously score the record grooves.

#### STEEL

The most practical playback is the shadowgraphed steel needle. Steel AUDIO-PLAYBACK-POINTS will each play dozens of instantaneous recordings without damage to the grooves because they are shaped to match AUDIO-CUTTING-POINTS. They are shadowgraphed, highly polished, and wear-resistant.

Type	Description	Point Material	Shank Material	Type No.	List Price	Code Word

\*Supplied in standard short shank (17/32 inch) with "flat" (unless long) and/or round shank are specified.

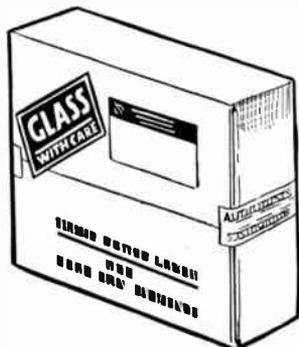

\*\* Best type for home recorders with crystal cutting heads.

AUDIOPPOINT PACKAGING—AUDIOPPOINTS reach you in specially developed, convenient packages. Avoid sending styli in envelopes. Where this must be done be sure to mark package "Hand-Stamp Only."

### SAFETY CARTON

For Shipping Glass Base Audiodiscs or Shellac Pressings

#### COMPLETE PROTECTION

The SAFETY CARTON consists of an inner carton to contain the discs, an outer carton to contain the inner carton, and shredded lint-proof, paper cushioning material. Each carton holds from 1 to 3 AUDIODISCS. Approved by leading transportation companies, the ability of this carton to protect discs in spite of rough handling is self evident. In view of the irreplaceability of many recorded discs, shipping in a SAFETY CARTON is essential.

#### NET PRICES

# Radio **TRIPLET** Testers

## COUNTER OR PORTABLE TUBE TESTER—7" INSTRUMENT

This sensational new Tube Tester has a large six-inch scale RED DOT Lifetime Guaranteed Measuring Instrument. Filament voltages are provided in 20 steps from 1 to 110 and transformer connections are made for future tubes with voltages between these ranges. This continues Triplet's policy of providing every sensible anti-obsolescence feature, and accounts for the thousands of Triplet tube testers in use today although built four or five years ago.

Model 1612 has a fully balanced RMA circuit and leakage test for Cathode and Heater and inner elements, with shorts test between any two elements, check for open filaments, and any two elements, hot leakage check, separate section test of multi-section tubes, separate plate tests of diodes and rectifiers. Other features are the noise test jack, and a separate line voltage meter, essential for settings while tube readings are taken. Tests for receiving tubes including Miniatures, Localtas, Bantam Single Ends, Bantam Jr., new high voltage 117Z6, etc., gaseous rectifiers and ballast tubes. The customer reads the same tests on the GOOD-BAD scale of the oversize instrument. A handy loose leaf indexed card tube chart is fastened to the front of the tester by means of a ring binder and provides latest available testing data on tubes named. Has streamlined, beautifully finished seamless heavy steel case and panel with silver grey suede baked enamel finish and maroon and chrome fittings. Size is 15 1/4" x 11 3/4" x 5".

Model 1612—Code TALOA—Dealer Net Price.....\$32.83

Model 1612

### Model 1613—Portable Style

Model 1613 is a portable tester, same as the Model 1612, but has a detachable cover with attached handle. Cover is removable permitting use as a counter tester. Case size with cover, 15 1/2" x 11 3/4" x 6 1/2".

Model 1613—Portable Tester. Code TASSE. Dealer Net Price.....\$38.32

## WIDE-RANGE SIGNAL GENERATOR—MODEL 1632

Model 1632 wide-range Signal Generator provides continuous coverage of standard broadcast ranges; as well as the new high frequencies for frequency modulated and television receivers. CONTINUOUS FREQUENCY COVERAGE from 100 Kc. to 120 Mc. on 10 bands . . . All frequencies fundamentals. METERED OUTPUT to multiplier and attenuator. HETERODYNE DETECTOR is incorporated. Permits checking the oscillator, or beating with another oscillator, without a receiver. OUTPUT AVAILABLE AT END OF CO-AXIAL CABLE. Minimizes losses and disturbance to circuit under test. PROVISION FOR EXTERNAL MODULATION at audio or radio frequencies. VOLTAGE REGULATOR TUBE . . . regulates voltage for the oscillator. Improves stability. PERMEABILITY ADJUSTMENT AND TUBULAR AIR-TRIMMER CAPACITORS are used throughout for increased accuracy and stability of calibration. LOW RESISTANCE COPPER SHIELDING and low-loss construction. Coil and trimmer assemblies and condensers shielded to minimize radiation of the unmodulated radio frequencies. POSITIVE VERNIER DIAL TUNING control . . . no backlash. ACCURACY AND STABILITY beyond anything before demanded in the test field. STREAMLINED METAL CASE with attractive rolled-edge design. Size is 15" x 9" x 6 3/4". Black enamel finish. Snap-away leather handle. Beautiful black panel, with red and white markings. Model 1632. Complete with accessories. A.C. operated.

Code—TACIX  
Dealer Net Price.....\$87.83

Model 1632

## FLEXIBLE TUBE TESTER—MODEL 1620

This sensational Triplet counter model has every facility desired including a new highly flexible switching system . . . unsurpassed beauty and customer appeal. . . Individual connections for each tube element as well as a spare socket. Four separate sections (socket, meter, chart, switching and power supply) can be entirely replaced . . . for simplicity in modernization. FLEXIBLE SWITCHING, new lever-type, gives individual control for each tube prong. This also takes care of roaming elements, dual cathode structures, multi-purpose tubes, etc. Simply set the switch according to instructions appearing above each lever on the loose leaf indexed card chart. Only three lever switch settings required for most tubes. CONCLUSIVE TESTS of present receiving tubes. Tests Gaseous Rectifier tubes and has improved Ballast Tube continuity test. Noise test jack incorporated. Fully balanced RMA approved circuit. FILAMENT VOLTAGE SWITCHING from 1.1 to 110 to take care of present and future tubes with filament voltage up to 117 volt types. NEON SHORT TEST. Separate plate tests on diodes and rectifiers. SEPARATE LINE VOLTAGE METER permits constant observation and adjustment for line fluctuation. RED • DOT LIFETIME GUARANTEED 7" indicating instrument has long 6" Direct Reading GOOD-BAD scale in colors. The wood case is of graceful proportions with ebony finish. Socket and switching panels are sloping with ebony background, sockets, knobs and white markings. Case size is 18 1/2" x 10 3/4" x 6 3/4".

Model 1620—For 60 cycles, 110 volts. Dealer Net Price.....\$41.67

Model 1620

### PORTABLE TUBE TESTER—MODEL 1621

Model 1621 is a counter or portable Tube Tester similar to Model 1620 described above. It comes in a smaller more readily portable case. Has 4" square RED • DOT Lifetime Guaranteed Indicating Instrument with GOOD-BAD scale. Otherwise features are the same as Model 1620.

Model 1621, for counter use only, less carrying case. Size 12 1/2" x 7" x 10"

Dealer Net Price.....\$38.33

### Carrying Case

Snappy two-tone tan tweed airplane type case. Purple plush lining. Heavy rubber feet on bottom of tester fit in holes in case to hold it in place.

Dealer Net Price.....\$5.50

# Radio TRIPLET Testers

## VOLT-OHM-MILLIAMMETERS

Model 1200-E

25,000 OHMS PER VOLT D.C. measurements and resistance readings to 40 megohms with this new super sensitive Volt-Ohm-Milliammeter. Instrument reads D.C.: 10-50-250-500-1000 volts at 25,000 ohms per volt; 0-50 microamperes; 1-10-50-250 milliamperes and 1000; 40,000 ohms, 4 and 40 megohms; A.C. 10-50-250-500-1000 volts.

Has two RED DOT Lifetime guaranteed instruments, A.C. and D.C., in twin case. Switch contact error less than 1/2 % on milliamperes. No error on voltages. Resistance measurements have individual zero adjustments. Selector switch for all readings. Contains 22 1/2 and 1 1/2 volt batteries. Shpg. wt. 7 1/4 lbs.

1200-E Unit—Code—TWARB  
Dealer Net Price.....\$28.83

Model 1200-A—Same as 1200E but reads as follows: D.C. 10-50-250-500-1000 volts at 2000 ohms per volt; 1-10-50-250 M.A. low ohms, backup circuit, 500; 1500 ohms, 1 1/2 and 3 megohms. A.C. 10-50-250-500-1000 volts. Shpg. wt. 7 1/4 lbs.

1200-A Unit—Code—TRIFE  
Dealer Net Price.....\$24.33

Model 1200-C—Same as 1200-A but with 5000 ohms per volt D.C. suitable for AVC checking; 250 microamperes, and 7 1/2 megohms scales. Shpg. wt. 7 1/4 lbs.

1200-C Unit—Code—TRFFA  
Dealer Net Price.....\$25.50

## SIGNAL GENERATORS

Model 1232-A

New improvements in these Signal Generators answer the demands for reasonably priced service instruments with performance approaching that of precision laboratory equipment. Model 1232-A is for 110 volts, 60 cycles operation. Its features include: Triple Shielding—A new assurance of satisfaction. Top panel is insulated from R.F. Main wiring is beneath double shielded panel. Coils and the band switch are individually shielded. Improved Attenuation Zero for all practical purposes. Large Dial Opening 180°—Improves readability. Scale is 345°. Dial is direct geared, permitting quick and accurate settings. Six Bands cover frequencies from 115 KC to 30.5 MC. All frequencies are fundamental. Line Filter—Filters RF between oscillator and the line. Six Trimmer Calibrated Coils—For accuracy well within servicing requirements on all bands. 400 Cycle Audio Note—obtained from panel jacks. Improved Band Selector Switch—for added convenience. Low loss switching. All parts low capacity. Model 1232-A (A.C. Operated). Complete with accessories. Code—TAPET. Shpg. wt. 10 1/2 lbs. Dealer Net Price.....\$33.17

Model 1231-A—Same as 1232-A but battery operated. Uses standard Eveready 22 1/2 V (X-163) Burgess (A-15-ST) and three flashlight cells (Eveready 935). Replacements may be readily obtained. Complete with batteries and accessories. Code—TARDI. Shpg. wt. 11 lbs. Dealer Net Price.....\$30.67

## TUBE TESTER

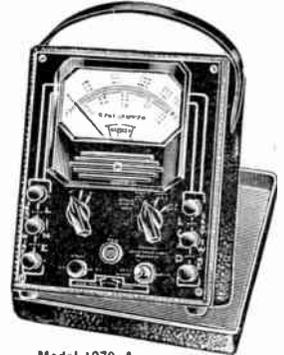

Model 1213

Checks all receiving tubes quickly and conclusively including Loctal, Miniature, Bantam Jr., high voltage 117Z6, etc., gaseous rectifier types and ballast tubes. Provision for future tubes, with filament voltages ranging from 1 to 110. Has fully balanced RMA approved circuit. Separate plate tests on diodes and rectifiers. Neon shorts test shows slightest inter-element shorts and leakages. Results show directly on the three-color GOOD-BAD scale of the RED DOT guaranteed instrument. Separate line voltage control meter, essential for making adjustments while testing. Attached under spring clips in cover, or can be removed and fastened on wall. See case description below.

Model 1213—Code—TAMOT.  
Shpg. wt. 14 lbs.  
Dealer Net Price.....\$24.50

## APPLIANCE TESTER (For Watts, Volts, Amperes)

Model 1270-A

Measures the wattage consumption, amperes and line voltage of all household appliances and small motors under actual operating conditions. Testing facilities are: Six Wattmeter Scales 0-20-40-500-1000-2000-4000 at 130 or 250 volts (4000 scale is most essential for modern range testing). Alternating Current Scales A.C. amperes 0-26; 0-6.5; 0-13; 0-26. Two A.C. Voltage Scales 0-130-260. All switches and leads are ample to carry full load current continuously. See Page F-3 for case description. Model 1270-A—Complete with Leads for Two-Wire Circuits. Dealer Net Price.....\$33.17  
3-wire male connector cable... 4.50  
3-wire female connector cable... 4.50

## DUAL-INSTRUMENT APPLIANCE TESTERS

Model 2000—Provides quick and accurate means of testing power consumption of radios, refrigerators, fractional horsepower motors and household appliances under actual running conditions. Wattmeter readings 1500 watts at 220 volts; 750 watts at 110 volts. Current rating 7.5 amperes. Dual voltmeter scale reads 130-260. Leather case 6 1/2" x 3 1/4" x 3 1/4". Dealer Net Price.....\$21.33

Model 2001—Same as Model 2000 but has additional switch to permit use with any current transformer having a 5 amp. secondary, for higher single phase wattmeter readings. Dealer Net Price.....\$22.67

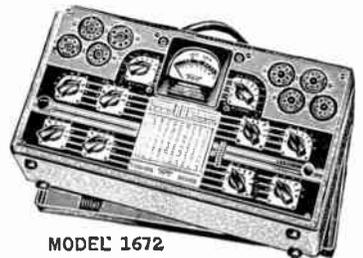

Model 2002—Same as the 2000 but has current rating of 10 amperes. Wattmeter ranges are 1500 and 3000. Voltage ranges are 130 and 260. Dealer Net Price.....\$21.67

## 1200 SERIES CASES

1200 Series Cases are metal with black suede baked enamel finish, 7 3/4" x 6 5/8" x 6 5/8". Attached leather strap handle. Modernistic durable panels.

## FLEXIBLE VIBRATOR TESTERS

COMPLETE TESTING facilities for all standard 6-volt vibrators, as used in automotive and home battery radio receivers. THREE-SCALE DIAL . . . 0-10 Volts scale shows input voltage to vibrator for start or running tests . . . Two-zone, two-color merit scale shows vibrator condition as GOOD or BAD . . . 0-100 scale permits inter-comparison of vibrator output under standardized input conditions. ADVANCED CIRCUIT developed with cooperation of leading vibrator engineers. Uses standardized 5000 Ohms - 8-Mfd. load. SPEED ROTARY CHART with listing of key settings. Assures quicker operation. FUSED AGAINST SHORTED VIBRATORS. ANTI-OBSOLESCENCE DESIGN. Included in accessories is an adapter with leads with which it is possible to check new vibrators without waiting for instructions from the factory. Individual switches for each element afford another safeguard against obsolescence. STREAMLINED METAL CASE with blue-gray suede electro-enamel finish; 14 1/2" x 7 5/8" x 4 1/2". Complete with accessories. Dealer Net Price.....\$32.84

MODEL 1672

## TELEVISION AND HIGH VOLTAGE TESTER

Model 1280

Ranges to 10,000 volts. Metal contacts and instrument parts are removed a minimum of one inch from the sides of the case. Prods attached to test leads are inserted through holes in the top panel to the contacts in the sub-panel beneath. Test leads, three feet long, tested to 25,000 volts breakdown, are used. Prods are provided on the panel for grounding the metal case, the surest precaution against bodily injury at the high voltage.

Tests A.C. and D.C. volts in steps of 2500 and 10,000 volts; D.C. Microamperes in steps of 50, 500 and 5000. Meter sensitivity is 25,000 ohms per volt for D.C., and 5000 ohms per volt for A.C.

This tester is equipped with the RED DOT Lifetime guaranteed 4" instrument in bakelite case, which is also mounted beneath the front panel, and is easily read through the large window opening in the panel. Accessories include a pair of special high-tension cables with prods on one end and alligator clips on the other end.

Model 1280—Code—TANIA. Dealer Net Price.....\$34.67

TRIPLETT D.C. INSTRUMENTS are the D'Arsonval type with extra light-weight moving coil, magnets of chrome, cobalt or alnico with uniform pole pieces and scales with maximum linearity. A.C. INSTRUMENTS are the moving iron repulsion type, air damped, with extra light weight moving parts. Dynamometer type also available is a most efficient standard design.

All with two of the best jewel bearings, metal bar bridge, finest workmanship and processed in a most modern equipped factory. White enameled metal dials, molded zero adjusters. Easiest serviced instruments of any in case of accidental damage. Front and rear illumination also available. Write for information.

Model 666-H—Code—TRAIB. Dealer Net Price.....\$16.00

### MODEL 666

Model 666 Pocket Volt-Ohm-Milliammeter is the same as Model 666-H but has the following ranges: A.C.-D.C. Volts 0-10-50-250-500-1000 at 1000 ohms per volt; 0-1-10-50-250 D.C. M.A.; Low Ohms 1/2 to 300; High Ohms to 250,000. Shpg. wt. 4 lbs. Model 666—Code—TRYMA. Dealer Net Price.....\$15.34

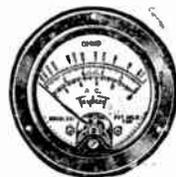

## TWIN INSTRUMENTS

THE TWIN is furnished in any combination of A.C. or D.C. instruments. Both are included in the special rectangular molded case that requires a minimum of space. Permits simultaneous readings on both instruments when connected in the same or separate circuits. Instrument scales are side by side making possible two distinct readings at a glance. Used to balance loads in three-wire circuits; detect line fluctuations when load readings are taken; measure antenna and modulation current; determine filament and plate voltages and similar applications.

To determine Net Price of Twin Instruments take the sum total net price of both instruments as supplied in Models 321 or 331.

## WATTMETERS—DYNAMOMETER TYPE

Outstanding new developments assure extreme ruggedness and accuracy within 2 per cent. The instruments can be used on single phase A.C. or D.C. as wattmeters. On special order they can be made up as voltmeters or ammeters. Instruments are self-contained to 300 Volts—10 Amperes. Over that external connection can be made. For use on frequencies up to 133 cycles per second. Dynamometers are available in cases to match current Triplet three-inch models: Models 361 (331) and 367-A (337-A). Case dimensions are the same except for depth, the dynamometer case being 2" back of the flange. (2-15/16" over the studs.) Wattmeters can be combined in the Triplet twin case with a voltmeter or ammeter. Available later in larger models.

Standard ranges as follows:

Code	Range	Volt	Amp.	Se.	Net	Code	Range	Volt	Amp.	Se.	Net
TAIBW	75	150	1/2	75	\$11.57	THOAC	150	300	1/2	75	\$12.30
TAMMA	150	150	1	75	11.57	THRON	300	300	1	60	12.30
TAWAB	300	150	2	60	11.57	TIARA	600	300	2	60	12.30
TEPEG	750	150	5	75	11.57	TIMAB	1500	300	5	75	13.40
THEAN	1500	150	10	75	12.83	TOBUD	3000	300	10	60	14.50

### DOUBLE RANGE WATTMETERS (Double Voltage Limits Only)

Code	Range	Volt	Amp.	Se.	Net

TALDO	1500-3000	150-300		15	60

## POWER LEVEL INDICATORS

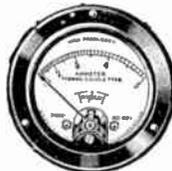

Used to measure sound or noise levels in amplifiers for Public Address, Theatres, Broadcasting Studios, Broadcasting Station Equipment, etc. The Decibel Meter permits the operator to make instant adjustments to prevent sound blasting or distortion. Furnished in two ways—either standard or highly damped. Standard range furnished reads up 6 and down 10 decibels. zero decibel at 1.73 volts, 500 ohm lines, 6 milliwatts. Standard damping furnished, unless highly damped is specified. Other ranges to order only.

Model 321—Up 6 down 10 Decibel Meter. Code—TAINT..... 8.63

## THERMO AMMETERS † High Frequency. Accuracy 2%

Triplet Thermo Ammeters are supplied in Models 241, 341, 346, 441 and 541. These models correspond in size, etc., to corresponding D.C. models. All have molded cases. Have external couples which withstand 50% overload connected to meter with 2 ft. leads. Couples are easily replaced when necessary. Internal couples to order. External Couples only, for any Model.....List Price \$4.00

Three-Inch Models (341-316-317-A) with internal couples in any standard range. Dealer Net Price, each \$4.97

## ULTRA-SENSITIVE V-O-MA.

A new impressive tester with 25,000 Ohms per Volt D. C. sensitivity. Furnished in two styles—for panel mounting, or portable use. D. C. VOLTS 0-10-50-250-1000 at 25,000 Ohms per Volt. A. C. VOLTS 0-10-50-250-1000 at 1000 Ohms per Volt. DIRECT CURRENT 0-50 Microamperes; 0-1-10-50-250-500 Milliampere. RESISTANCE 1/2 to 500, Low Ohms, shunt type circuit; 20,000 and 200,000 Ohms; and 2 and 20 Megohms, series type circuit. RED • DOT LIFETIME GUARANTEED 7" Instrument. STREAMLINED CASE is maroon and the panel is ivory with maroon trim. Size is 15" x 9" x 4". Model 1600-E, complete with batteries for all but 20 megohm range, and accessories, in case. Dealer Net Price.....\$28.00

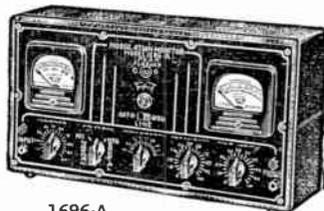

Model 1600-E

## SENSITIVE RELAYS

Highly sensitive Triplet relays are of the D'Arsonval Moving Coil type, carefully designed to give dependable, satisfactory performance. Fixed contacts of instruments are set in adjustable screws, allowing a wide adjustment of upper and lower limits of contact. Contacts furnished are hardy metal; also platinum, silver, and platinum-iridium are supplied according to applied current and voltages. These relays are generally used in connection with polarized relays when current draw exceeds 50 M.A. Magnetic clutch type with manual release can also be had. Since relays cover such a wide field and most of them are made to special order, no standard models are listed. Each application should be accompanied with information specifying maximum and minimum currents and voltages which will pass through relay coil and contact points.

## MODULATION MONITOR

1696-A

Model 1696-A is easy to use. Plug it into your A. C. line—make simple coupling to the transmitter output and the monitor shows: FIRST—CARRIER REFERENCE LEVEL (only one adjustment for operating calibration.) SECOND—PER CENT OF MODULATION on specially designed high speed meter (Fast Upswing of meter pointer; Slow Downstroke.) THIRD — INSTANTANEOUS NEON FLASHER (no inertia) indicates when per cent of modulation has exceeded your predetermined setting. Setting can be from 40 to 120 per cent. Peaks of very short duration are instantly detected. Balance control permits interchangeability of tubes. Maximum efficiency from 100 to 130 volts, 50 to 60 cycle A. C. line. Use of the Monitor assists in complying with FCC regulations. Convenient switch permits reading of positive or negative peaks. Two RED • DOT Lifetime Guaranteed Triplet instruments. Modernistic metal case, 14 1/2" x 7 5/8" x 4 1/2", with black suede electro enamel finish. Black and white panel. Blends with standard amateur equipment in appearance. Model 1696A—Amateur's Net Price.....\$38.34

### FOR RACK PANEL MOUNTING

Also available as a rack panel mounting unit. The monitor is mounted in a heavy steel panel, 19" x 10 1/2", with black wrinkle finish. Amateur's Net Price.....\$39.80

We also distribute a complete line of TRIPLETT Multipliers, Shunts, Ring Shunt Assemblies, Multi-Deck Selector Switches and Bar Knobs.

**ALL PRICES ARE SUBJECT TO CHANGE—ALL MODELS SUBJECT TO SUBSTITUTION**

# STERLING PANEL METERS

## AMMETERS, VOLTMETERS, MILLIAMMETERS FOR USE ON DIRECT AND ALTERNATING CURRENT A COMPLETE MODERN LINE

These improved STERLING Panel Meters while retaining the accuracy, beauty and ruggedness which have always characterized STERLING instruments, show a modern trend in the gracefully unique arrangement of the broader and more clearly defined scales. The meters for alternating current and direct current are perfectly matched and therefore suitable for mounting on the same panel. Both the A.C. and D.C. meters are of the permanent magnet, iron vane, solenoid type. This affords positiveness of action and breadth of movement suggestive of those of the D'Arsonval type. The large needle-tipped pointers and wide clearly marked scale divisions of these panel meters make them easily read.

STERLING Panel Meters may be had in any of the types illustrated. The ZERO ADJUSTER can be supplied for any of the instruments listed, A.C. or D.C. but it can be applied only to those put up in the type 68, 78 or 88 case.

SPECIAL COMBINATION A.C.-D.C. METERS WITH HAIR-SPRING REPULSION TYPE MOVEMENT FITTING SAME CASES, ARE ALSO AVAILABLE.

Standard pkg., 100 meters, Ship. wt. 30 lbs.

ALL STERLING Panel Meters are guaranteed accurate within 5%.

FINISHED ONLY IN BLACK

TYPE 68

Flush case, square flange, standard finish black enamel. Screw holes in flange for mounting. Width flange 2 1/2" Dia. case 2 1/4". Depth case 3/4"

TYPE 80

Flush case, narrow flange, standard finish black enamel or nickel. Circular adjustable back clamp for mounting. Diameter flange 2 1/2" Diam. case 2". Depth case 3/4". Requires hole 2 1/4" in Diameter Length terminals 1 1/2"

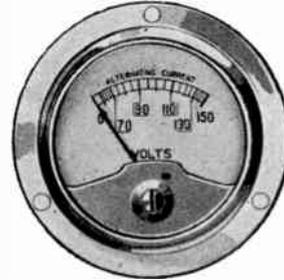

TYPE 88

Flush case, narrow apron flange, for ZERO ADJUSTER equipment. Standard finish black enamel or nickel. Circular adjustable back clamp for mounting. Same dimensions as Type 80.

TYPE 70

Flush case, wide flange, standard finish black enamel or nickel. Screw holes in flange for mounting. Diameter flange 2 1/2" Diam. case 2". Depth case 7/8" Requires hole 2 1/4" in Diameter

TYPE 78

Flush case, wide flange with apron designed to carry ZERO ADJUSTER equipment. Standard finish black or nickel, screw holes in flange for mounting. Same dimensions as Type 70.

## STERLING POCKET METERS

### STANDARD LINE

#### Direct Current Pocket Ammeters, Voltmeters and Voltammeters for all Purposes

No. 24A Ammeter

No. 45 Voltammeter

STERLING Pocket Meters are useful in all kinds of battery testing, in railroad signal work, and in telephone and low-voltage electrical work generally. They are polarity indicators.

- No. 24 Ammeter, for testing No. 6 dry cells. 0-35 ampere scale, 1 ampere divisions. List Price, \$1.25
- No. 24A Ammeter for testing dry cells including the heavy-duty Ignition type of cell. 0-50 ampere scale, 1 ampere divisions. List Price, \$1.25
- No. 23 Ammeter, for photo-flash dry batteries. 0-20 amp. scale, 1/2 amp. div. List Price, \$2.00
- No. 33 Voltmeter for ordinary single cells and "Flashlight" cells, 0-3 v. scale, 1/10 v. div. List Pr., \$1.50
- No. 34 Voltmeter for "Hot Shot" and Radio batteries. 0-10 volt scale, 1/5 volt div. List Price, \$1.50
- No. 34A Voltmeter for 12 volt batteries. 0-16 volt scale, 1/2 volt divisions. List Price, \$1.75
- No. 34B Voltmeter for ordinary 22½ v. radio "B" batteries. 0-30 v. scale, 1 v. divisions. List Price, \$1.75
- No. 34C Voltmeter for testing ordinary 45 v. radio "B" batteries. 0-50 v. scale, 1 v. div. List Price, \$2.00
- No. 44 Voltammeter for "Hot Shot" and Radio batteries and No. 6 dry cells, 0-35 ampere scale, 1 ampere divisions; 0-10 volt scale, 1/5 volt divisions. List Price, \$1.75
- No. 44A Voltammeter for 12 volt batteries and No. 6 dry cells. 0-35 ampere scale, 1 ampere divisions; 0-16 volt scale, 1/2 volt divisions. List Price, \$2.00
- No. 45 Voltammeter for testing No. 6 dry cells and ordinary 45 volt radio "B" batteries. 0-35 ampere scale, 1 ampere divisions; 0-50 volt scale, 1 volt divisions. List Price, \$3.00
- No. 45A Voltammeter for testing dry cells including the heavy-duty Ignition type and ordinary 45 v. radio "B" batteries. 0-50 amp. scale, 1 amp. div.; 0-50 v. scale, 1 v. div. List Price, \$3.25
- Meters 2¼" in diameter and 5/8" thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

### STERLING SPECIAL-PURPOSE POCKET METERS—NEW SERIES

#### Testers for Portable Radio Batteries

The special "A" and "B" dry batteries built for the operation of Portable Radio sets cannot be satisfactorily tested with ordinary battery testers. The new STERLING double voltmeters are designed for testing with correct loads the special "A" and "B" dry batteries used on Portable Radio sets. The new STERLING flexible plugs of these meters fit easily into the small closely spaced socket holes.

No. 38A Voltmeter

- No. 37A Voltmeter for 45 v. "B" batteries and 1.5 v. "A" batteries. Scale 0-50 v., 1v. div. Scale 0-2 v., 1/10 v. div. Tests 45 v. "B" and 1½ v. "A" batteries. List Price, \$2.50
- No. 38A Voltmeter for 90 v. "B" batteries and 1.5 v. "A" batteries. Scale 0-100 v., 5 v. div. Scale 0-2 v., 1/10 v. div. Tests 45 v. and 90 v. "B" batteries and 1½ v. "A" batteries. List Price, \$2.75
- No. 39A Voltmeter for 90 v. and 135 v. "B" batteries and 1.5 v. "A" batteries. Scale 0-150 v., 5 v. div. Scale 0-2 v., 1/10 v. div. Tests 90 v. and 135 v. "B" batteries and 1½ v. "A" batteries. List Price, \$2.75
- No. 40A Voltmeter for 90 v. and 135 v. "B" batteries and 4.5 v., 6 v. and 7.5 v. "A" batteries. Scale 0-150 v., 5 v. div. Scale 0-10 v., 1/5 v. div. Tests 90 v. and 135 v. "B" batteries and 4½ v., 6 v. and 7½ v. "A" batteries. List Price, \$3.00
- No. 42A Graphic General Tester. Red and Green color chart for all standard batteries including 45 v. and 90 v. "B" batteries and 1.5 v., 4.5 v., and 7.5 v. "A" batteries. 0-100 v. scale for special sizes of "B" batteries, 5 v. div. Tests all Portable Radio batteries. List Price, \$6.00

#### Testers for Hearing Aid Batteries

- No. 31 Double voltmeter for special 30 or 45 v. "B" batteries and 1½ v. "A" batteries, scale 0-50 v., 1 v. div., scale 0-2 v., 1/10 v. divisions. Carefully engineered to impose the correct loads on the small delicate batteries used to operate vacuum tube hearing aids. Equipped with new STERLING flexible plugs. List Price, \$3.50
- No. 531 Plug-in—Safety type double voltmeter for testing hearing aid batteries. This new tester has the same capacity and scales as the No. 31. No cord is necessary because the rigid plug-in type terminals are designed to fit hearing aid batteries having accessible keyed sockets. This arrangement makes it impossible to overload the No. 531 instrument or reverse the polarity while it is being used for testing hearing aid batteries
- No. 35A Voltmeter for batteries used on carbon type hearing aids, also "C" batteries, scale 0-5 v., 1/10 v. divisions. List Price, \$1.75
- Meters 2¼" in diameter and 5/8" thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

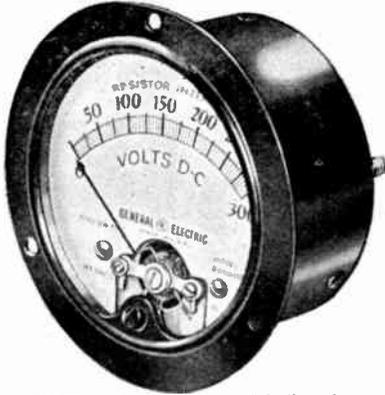

No. 531 Plug-in Safety Type  
Double Voltmeter

# ELECTRIC INDICATING INSTRUMENTS For Panel Mounting

*Internal-pivot Direct-current and Radio-frequency Types*

Type DW-51 voltmeter in a metal (brass) case

Type DW-52 ammeter in a molded Textolite case

These small panel instruments are particularly suitable for use in radio and other communications equipment where compactness, especially minimum depth behind the panel, is essential. Thinness is obtained by the use of a unique single-unit, high-torque element of the permanent-magnet, moving-coil type. In this element, the pivots, instead of being secured to the outside of the armature winding, are solidly mounted on the inside of the armature shell.

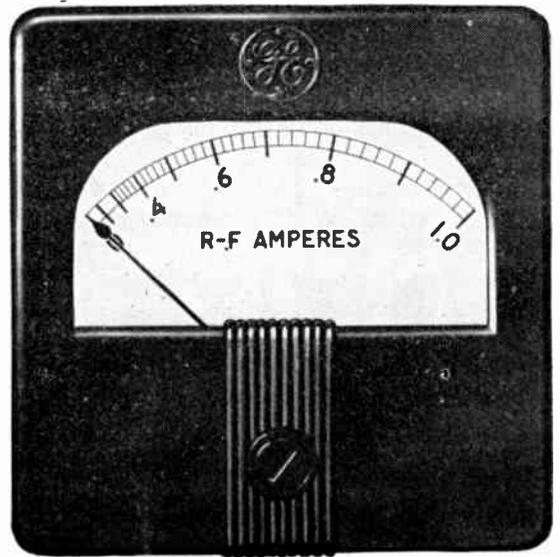

G-E internal-pivot instruments are available in a variety of standard ratings to measure direct current and voltage (Type DW-51), and radio-frequency current (Type DW-52). They are of the 2½-inch classification. The depth behind the panel is 0.89 inch for the molded Textolite case; 1.03 inches for the metal case.

## OTHER TYPES

Many other types of G-E indicating instruments are available for panel mounting. They include 3½-inch a-c, d-c, r-f, and rectifier types in standard round cases as well as in rectangular cases, such as the one shown below. Also 2½-inch alternating-current instruments. Still other types can be supplied to meet unusual requirements.

# Weston RADIO INSTRUMENTS

Round Style

## PANEL INSTRUMENTS

Distinguished for their fine workmanship and permanently dependable performance with exceptional accuracy for their size, Model 301, 425 and 476 round instruments are regularly supplied in flush type 3 3/8" bakelite, 3 1/2" bakelite or 3 1/4" metal cases with black finish. Model 476 can be obtained in surface metal; Model 301 or 425 in surface metal or bakelite cases. Rectangular bakelite cases, flush type only, are also available. Model 506, 507 and 517 instruments are regularly supplied in flush type, narrow flange, black finished metal cases with a clamp for panel mounting. Wide flange metal or bakelite cases are available at no extra cost. When ordering specify style, and whether metal or bakelite case is desired.

Instruments for use on circuits above 300 volts should be specified with bakelite cases when not possible to connect in grounded side of line. Normally calibrated for use on non-magnetic panels. If they are to be used on steel panels, specify panel thickness when ordering. List prices shown below, are subject to 25% discount. For other instrument prices write to Weston Electrical Instrument Corp., Newark 5, N. J.

Rectangular Style

## MODEL 772—TYPE 6 SUPER-SENSITIVE ANALYZER

1,000 Volts—20,000 Ohms per Volt

The most complete super-sensitive analyzer on the market today, Model 772 type 6 provides d-c voltage ranges at a sensitivity of either 1000 or 20,000 ohms per volt. Addition of new Weston Model 766 Televerter gives top d-c voltage range of 5000 volts. Services television and radio transmitters and receivers, P.A. systems, vacuum tube and cathode ray equipment, sensitive telephone and telegraph relay circuits and can readily be used for industrial and household appliance testing.

Model 766 Televerter is a carefully designed high resistance (100 megohms) multiplier which fits conveniently into the tool compartment of the analyzer. Specially insulated test prongs for protection of operator. Breakdown voltage of 17,000 volts in accordance with A.I.E.E. safety standards. Present owners of Model 772's can adapt the Televerter to the instrument at small extra cost.

Measurements of plate voltage and current on amateur transmitters, as required by the F.C.C., can easily be made. Diode currents in AVC circuits and AFC current can be quickly and accurately measured. Ideal for condenser leakage tests—maximum voltage on any range being 15 volts. Overall accuracy on a-c ranges is within 3% on normal frequencies due to improved rectifier circuit. Practically no frequency error from 50 to 7000 cycles. Temperature error is guaranteed to be within 2% from 40° F to 110° F.

Equipped for mounting Model 666 Socket Selector unit. Black panel trimmed in red and chromium. Size: 15 1/8" x 5 1/8" x 8 3/4". Weight: 8 1/2 lbs.

## MODEL 778—SERVISSET

This deluxe test set is a complete portable workshop! It contains Model 772 Super-Sensitive Analyzer and Model 777 Type 1 Tube and Battery Checker. Ideal for both field and shop use—units are mounted in handy combination case . . . with ample room for Weston socket selector units or tools. Can be quickly mounted on any panel or shop bench—both instruments are identical in size, shape and color—a matched set of accurate radio servicing equipment. If you now own one of these individual instruments, you can complete the set by ordering the remaining unit in the combination case. Size: 5 5/8" x 14 1/4" x 17 1/4". Weight: 17 lbs.

Net Price, 778 less socket selectors.....\$97.50

# Weston RADIO INSTRUMENTS

## MODEL 777—TYPE 2

### COUNTER TYPE

#### TUBE AND BATTERY TESTER

Step up your tube and battery sales with this eye-appealing Tube and Battery checker, equipped with the TIME SAVING ROTATOR TYPE TUBE INDEXER and the new type SELF-WIPING, LONG SERVICE TOGGLE SWITCHES. . . . RICH . . . colorful . . . dignified . . . With a big, sensitive Weston meter stepped up from an attractive red and black panel. This counter model Tube and Battery checker is ideal for promoting effective merchandising campaigns.

All features . . . TOTAL EMISSION . . . INDIVIDUAL ELECTRODE test . . . neon short check . . . CATHODE LEAKAGE . . . NOISE TEST . . . LINE VOLTAGE CONTROL . . . load tests. WILL CHECK LOCTAL, MINIATURE, AND HIGH FILAMENT VOLTAGE TUBES. 1.5, 6, 45 AND 90 VOLT RANGES FOR BATTERY TESTING. Size 14½" x 10½" x 7". Weight 11½ pounds.

Net Price, Model 777, Type 2, complete.....\$54.75

## MODEL 785

### INDUSTRIAL CIRCUIT TESTER

#### 27 Practical Ranges

For . . . Industry—Laboratories—Schools

The Model 785 Industrial Circuit Tester brings new simplicity and ease to production and maintenance testing. This compact, self-contained unit with its ultra sensitive instrument provides all the ranges necessary for voltage, current and resistance measurements wherever high sensitivity is a factor . . . including all types of signal systems, telephone circuits, photo-cell circuits, oscilloscope circuits, and for servicing network protectors, etc. . . . checking the electrical values in sensitive relays, cathode ray tubes, public address systems and amplifiers, thyratron tubes, electrical equipment, etc. . . . as well as for many other plant production and electrical maintenance requirements.

#### RANGE OF MEASUREMENTS

DC VOLTAGE—10 Millivolts to 1000 Volts (20,000 ohms per volt).

AC VOLTAGE—0.1 to 750 Volts (1000 ohms per volt).

DC CURRENT—0.5 Microampere to 10 Amperes—Self-contained.

AC CURRENT—10 Milliampere to 10 Amperes—Self-contained.

RESISTANCE—0.5 Ohm to 30 Megohms.

Further information on Model 785, foot of Page F-12.

## MODEL 777—TYPE 1

The same instrument described above is available in a light weight portable carrying case. Has generous compartment for tubes or tools—ideal for checking and selling tubes on the job. Complete rapid-reference chart in cover. Size: 15½" x 8¾" x 5½". Weight: 10 lbs.

Net Price, Model 777, Type 1, complete.....\$49.50

# Weston RADIO INSTRUMENTS

## MODEL 697—VOLT-OHM-MILLIAMMETER

Very popular pocket-size device with a-c and d-c voltages, d-c milliampere and ohm ranges. Precision resistors used throughout. Accuracy has not been sacrificed for size. All ranges brought out to pin jacks. Toggle switches protect and connect the meter in the circuit as a voltmeter or ohmmeter. Self-contained  $4\frac{1}{2}$  volt battery supplies necessary potential for ohm ranges. Ohmmeter adjustment compensates for changes up to 25% in battery potential without affecting meter accuracy. Accuracy guaranteed to be within 2% on d-c and within 5% on rectified a-c.

Ranges: VOLTS a-c and d-c—0-7.5/15/150/750

MILLIAMPERES, d-c only—0-7.5/75

OHMS (full scale)—5,000/500,000

OHMS (center scale)—35/3500

Size:  $5\frac{9}{16}$ " x  $3\frac{3}{4}$ " x  $3\frac{9}{16}$ "

Weight:  $1\frac{3}{4}$  lbs.

Net Price, Model 697, complete with pair of test leads.....\$24.00

Model 697

## MODEL 695—TYPE 11

### POWER LEVEL METER, VOLTMETER, OUTPUT METER

Gives readings in decibels as well as volts making it ideal for power level measurements in all types of speech equipment and radio receivers. Medium speed, moderately damped movement. Constant impedance of 20,000 ohms. 11 Db ranges from -4 to +35 Db at zero on the Db scale. 7 voltage ranges from 2 to 200 volts. Calibrated for 500 ohm lines with zero level of 6 milliwatts (.006 watts) or 1.73 volts. Complete with pair of test leads. Accuracy guaranteed to be within 5% on rectified a-c. Size:  $5\frac{1}{2}$ " x  $3\frac{3}{4}$ " x  $3\frac{1}{8}$ ". Weight:  $1\frac{1}{2}$  lbs.

Net Price, Model 695, Type 11.....\$28.50

Model 695

## MODEL 564—VOLT-OHMMETER, TYPE 3-C

A fine, Weston quality instrument with a very useful selection of voltage and resistance ranges. A self-contained  $4\frac{1}{2}$  volt battery provides the necessary potential for the ohmmeter ranges. Ohmmeter adjustment compensates for changes in battery potential without any affect on meter accuracy. Ranges are available from pin jacks. A toggle switch connects meter in circuit as a voltmeter. Complete with a pair of 4 ft. test leads. Accuracy guaranteed to be within 2%.

Ranges: VOLTS, d-c, at 1,000 ohms per volt—0-3/30/300/600

OHMS (full scale)—0-1,000/10,000/100,000/1,000,000

Size:  $5\frac{1}{2}$ " x  $3\frac{3}{4}$ " x  $2\frac{9}{16}$ "

Weight:  $1\frac{3}{4}$  lbs.

Net Price, Model 564, Type 3-C.....\$28.80

Model 564

## MODEL 666, TYPE 1C SOCKET SELECTORS

With this selector unit you can make all current, voltage and resistance measurements AT THE TUBE SOCKET without breaking soldered connections in the receiver, etc. In addition to all standard tubes, this unit is now equipped to handle the octal, locta and miniature tubes.

The selector block of the Model 666, Type 1C is quickly mounted on Models 666, 772 and 778 or any analyzers.

Net Price, Model 666, Type 1C.....\$15.83

Model 666,  
Type 1B

# Weston RADIO INSTRUMENTS

## MODEL 665, TYPE 1—SELECTIVE ANALYZER

With this analyzer, a-c and d-c voltage, direct current and resistance can be measured over a total of 33 ranges—all self-contained within this one instrument. A simplified switching and pin jack arrangement facilitates rapid operation.

All d-c and a-c ranges have a sensitivity of 1000 ohms per volt. The accuracy of a-c readings at various frequencies and wave forms is better maintained by using the more efficient full wave rectifier. Output measurements are made through a self-contained fixed condenser.

All resistance spoils are adjusted within 1/2 of 1%, and are non-inductive. Sustained accuracy is assured under all operating conditions.

Ranges: VOLTS, a-c and d-c, (1000 ohms per volt) 1000/500/250/100/50/25/10/5/2.5/1

OHMS (full scale) 1000/10,000/100,000/1,000,000  
 OHMS (center scale) 25/250/2500/25,000  
 MILLIAMPERES, d-c only—500/250/100/50/25/10/5/2.5/1  
 A-c output ranges—1 to 1000 volts

Size: 5 1/2" x 8 1/4" x 3 7/8"

Weight: 5 lbs.

Net Price, Model 665, Type 1 without carrying case.....\$58.50

Net Price, Carrying Case .....\$4.13

## MODEL 663—VOLT-OHMMETER

Model 663 is exceptionally suited for radio servicing where a wide range, battery-operated ohmmeter is desired along with d-c voltage and current ranges. All ranges are rapidly selected by the rotary switch and pin jacks. The instrument requires only 50 microamperes for full scale deflection. This low current drain permits resistance measurements in critical circuits without seriously disturbing the circuit characteristics.

Standard self-contained batteries supply energy for resistance readings. A special ohmmeter adjustment compensates for changes in battery potential without any effect on meter accuracy.

Ranges: OHMS, (full scale) 0-200/1,000/10,000/100,000/1,000,000/10,000,000  
 OHMS, (center scale) 0-5/25/250/2,500/25,000/250,000  
 MILLIAMPERES, d-c—1/5/25/100  
 VOLTS, d-c—2.5/10/50/250/500/1,000

Size: 8 1/4" x 5 1/2" x 3 7/8"

Weight: 4 1/2 lbs.

Net Price, Model 663 without carrying case.....\$49.13

Net Price, Carrying Case .....\$4.13

## Further Information on Model 785

Continued from Page F-10

### INSTRUMENT

Standard Weston 4 1/4" instrument. D-c sensitivity 50 microamperes. New temperature compensated rectifier circuit gives greater a-c accuracy.

### FULL SCALE RANGES

D-c Voltage—1/10/50/200/500/1000 volts (20,000 ohms per volt). Accurate within .2% up to 500 volts, 3% at 1000 volts.

A-c Voltage—5/15/30/150/300/750 volts (1000 ohms per volt). Accurate within 3%.

D-c Current—1/10/100 milliamperes, 1/10 amperes. Accurate within 2%. Instrument is calibrated so that 100 mv. and 50 mv. shunts can be used for ranges above 10 amperes.

A-c Current—5/15/10 amperes. Higher ranges with external current transformers. Accurate within 3% on 60 cycles.

Resistance—3,300/30,000/300,000/3 meg./30 meg. Center scale values are: 25/250/2,500/25,000/250,000 ohms. Self-contained batteries. Accurate within 2% of the linear arc length on any ohmmeter range.

### SIZE AND WEIGHT

3" x 12 1/2" x 5 1/2" (34 x 32 x 14 cm.). Weight with batteries, oak case, etc.: 13 1/2 pounds (6.12 kgs.).

## Radio Testing Equipment

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

### MODEL 636 DYNAMIC TUBE TESTER

#### With Built in Rotary Tube Chart

Has every feature of finest design and construction including Dynamic test method, roll chart, noise test, neon shorts test, line control, power switch, etc.

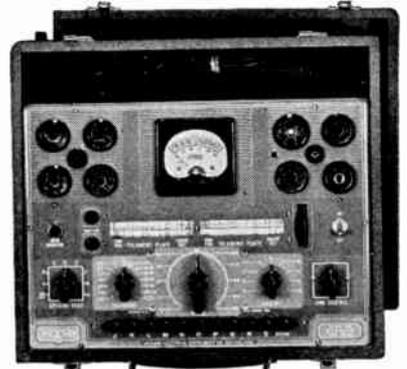

- NEW in design and performance including the latest Jackson patented switching circuits.
- MODERN in every feature of construction, appearance and operation.
- COMPLETE with every valuable feature. Up to date for all newest tube types.

#### SPECIFICATIONS

**"DYNAMIC" METHOD OF TEST**—Makes a better test on every tube. The "Dynamic" method is more accurate, frequently finding "poor" tubes which might pass for "good" in ordinary testers.

**NEW-HIGH VOLTAGE POWER SUPPLY** is a feature of this tester. By testing tubes at higher plate voltages (over 200 V. for some types), more accurate results are obtained.

**TESTS ALL TUBES**—ALL of the popular receiving types and television amplifiers, including BMTAMS—LOCTALS—SINGLE ENDED—HIGH VOLTAGE FILAMENT TYPES and MINIATURES. Provision for many more. The tester is protected against obsolescence in every possible feature.

Portable Style

Bench Style

**ROLL CHART** tube index—simplifies correct settings.

**FULL RANGE FILAMENT SELECTION**—From  $\frac{3}{4}$  V. to 115 V. Selector marked directly in volts. This feature eliminates guess work and helps the operator to avoid mistakes.

**MOST IMPROVED TYPE OF SWITCHING SYSTEM**—Spare circuits and switch positions provided for future use. Two "spare" socket positions.

**NOISE TEST** jacks are provided for audible test of possible tube noise.

Illustrated above is the Model 636 Portable. The tester is installed in a beautiful French grey leatherette case. The hinged lid is removable. The Portable Model is recommended because of the extra convenience and added protection for instrument panel.

Dimensions: 14" long x 12" x 5  $\frac{1}{2}$ ". Wt. 11 lbs.

**MODEL 636 (PORTABLE) NET CASH PRICE \$41.50**

#### BENCH STYLE

Installed in welded steel cabinet, with sturdy handle and rubber bumpers on both base and back. Two tone grey finish. Dimensions: 13" long x 9  $\frac{1}{2}$ " x 5  $\frac{1}{2}$ ". Wt. 10 lbs.

**MODEL 636-B (BENCH STYLE) NET CASH PRICE \$36.95**

### MODEL 637 DYNAMIC OUTPUT TUBE TESTER

#### With Complete Universal Meter Ranges

IN THE SHOP or OUT ON THE JOB, here's the ideal tester for modern servicing. Combines 27 ranges and 10 functions including—

- 1—Dynamic Output Tube Tester—accurate, thorough.
- 2—Ballast tube tester—finds shorts or burn-outs.
- 3—High sensitivity neon continuity tester.
- 4—Condenser test for finding shorted or leaky condensers.
- 5—Multi-range A.C. Voltmeter 0-10/100/250/500/1000/2500.
- 6—Multi-range D.C. Voltmeter 0-10/100/250/500/1000/2500.
- 7—Decibel Meter—Ranges from minus 10 to plus 14/10 to 34/30 to 54.
- 8—Multi-range D.C. Milliammeter 0-1/10/100/250.
- 9—Ammeter range—0 to 10 amperes D.C.
- 10—Triple range Ohmmeter 0-3000/300,000/0-30 megohms.

**AUTOMATIC PUSH BUTTON SELECTOR** provides for instant use of any meter range. This new selector is remarkably fast to use and also reduces the possibility of mistakes in selecting meter ranges.

**FULL RANGE FILAMENT SELECTION**—From  $\frac{3}{4}$  V. up to and including 115 V. Filament selector marked directly in volts at each position. This feature eliminates guess work and helps the operator to avoid mistakes.

**TESTS ALL TUBES**—All of the popular receiving types and television amplifiers, including BMTAMS - MINIATURES - LOCTALS - SINGLE ENDED - AND HIGH VOLTAGE FILAMENT TYPES. Provision for many more. Tester is protected against obsolescence in every possible feature of design and manufacture.

**"DYNAMIC" METHOD OF TEST**—Makes a better test on every tube. The "Dynamic" method is more accurate and frequently finds "poor" tubes which might pass for "good" in ordinary testers.

**NEW - HIGH VOLTAGE POWER SUPPLY** is a feature of this tester. By testing tubes at higher plate voltages (over 200 V. for some types), more accurate results are obtained.

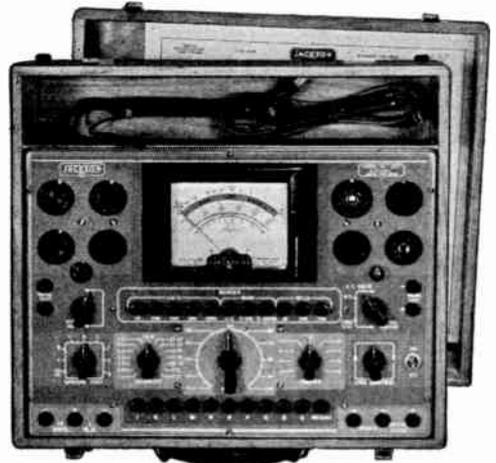

**MOST IMPROVED TYPE OF SWITCHING SYSTEM**—Spare circuits and switch positions are provided for future use if new or different tubes are announced. Two "spare" socket positions are provided on the tester panel.

**REMARKABLY EASY TO USE**—Notice the simplicity of panel and controls. The engineering is all BENEATH THE PANEL—you don't lose valuable time figuring out "the next move."

**ILLUMINATED METER DIAL**—Easy to read in any room. Panel lettering is large and distinct.

**NOISE TEST** jacks are provided for audible test of possible tube noise.

**ALL READINGS DIRECT** on "Good-Bad" Scale. No special marks for diodes, etc.

The FULL VISION Jackson Meter is an exclusive feature of this tester. Meter measures 6 inches over flanges. DIAL IS ILLUMINATED.

OAK CASE is of finest construction and has removable hinged lid. Dimensions 14  $\frac{3}{4}$ " x 13  $\frac{3}{4}$ " x 6". Weight 14 pounds.

ACCESSORIES—Furnished complete with self contained battery (for ohmmeter), and test prods.

**MODEL 637 NET CASH PRICE \$61.50**

### CONDENSER TESTER

**MODEL 650-A****RANGE—.00001 to 1,000 mfd.**

**AUTOMATIC PUSH BUTTON CONTROLLED**—Amazing in speed and simplicity of use. Capacity readings almost instantaneous! Leakage test by just pressing a button.

The Model 650 is a modern, accurate and complete instrument for detecting faulty condensers—ELECTROLYTIC, PAPER or MICA. Uses a new method for Leakage Test which will reveal otherwise unnoticed condenser defects.

**SCALE IS GLASS ENCLOSED** and is equipped with the new Jackson SCALE EXPANDER indicating pointer—doubles effective scale length.

**MEASURES ALL VALUES** direct reading in Microfarads.

**RANGES**

.00001 to .001 mfd.	.1 to 100 mfd.
.001 to .1 mfd.	50 to 1000 mfd.

**MEASURES POWER FACTOR** on direct reading dial. Power Factor range calibrated from 0 to 60%.

**COMPLETE SELECTION OF TEST VOLTAGE.** 20 volts to 500 volts.

**ELECTION RAY TUBE** indicates exact balance or shows if leakage is present.

**INSTANTANEOUS LEAKAGE INDICATION**—counting of flashes eliminated. No other guess-work with this modern tester. Has special built-in amplifier stage which actually responds to slightest leakage, if present. Thus all leakage defects may be located.

**MODEL 650-A**

NET CASH PRICE

**\$36.95**

### MODEL 640 TEST OSCILLATOR

A complete "standard type" oscillator for all general purpose work. Has full range direct reading dial from 100 KC up to 30 Megacycles. No skips or harmonics calibrated. All ranges are fundamental frequencies. PUSH BUTTON selection of all ranges makes speedy and accurate operation possible.

**GLASS ENCLOSED DIAL**—prevents dust and avoids possibility of damage to pointer.

**TWO CIRCUIT ATTENUATOR** provides variable ratio and also vernier control.

**HAS POWERFUL SIGNAL** output which may be used either as pure R.F. or Modulated R.F. Carrier is modulated at approximately 30%. The A.F. voltage is available for external use.

**ACCURACY GUARANTEED** to  $\frac{1}{2}$  of 1% on all ranges.

Operates from 110 volt 60 cycles. Uses three tubes (rectifier, oscillator and modulator).

**MODEL 640**

## Radio Testing Equipment

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

### MODEL 645 AC-DC ELECTRONIC MULTIMETER

(Vacuum Tube Voltmeter)

BOTH A.C. AND D.C. VOLT RANGES ARE ELECTRONIC. This provides the maximum of sensitivity and overload protection for all A.C. ranges as well as D.C. and ohms ranges.

MEASURES RESISTANCE UP TO 1 BILLION OHMS (1 thousand megohms)—and as low as 2/10 ohm.

3 MILLION OHMS PER VOLT SENSITIVITY on 0-4 volt D.C. range. Constant input resistance 12 megohms on all D.C. volts ranges.

Over 4 million ohms per volt sensitivity on 0-1 volt A.C. range. Input resistance of 4.4 megohms on all A.C. ranges. Flat frequency response between 50 cycles and 10,000 cycles.

METER CANNOT BE DAMAGED BY ACCIDENTAL OVERLOAD on any electronic range. Electronic overload protection on all A.C. and D.C. volts, and ohms ranges.

Variations in line voltage do not affect accuracy within the range of 100 to 125 volts. The instrument is equipped with ballast control tube and self-compensating circuits.

Contains 3 tubes (6X5GT/6K6GT/7N7), neon regulator, 1-4 1/2 volt battery and ballast; all self-contained and furnished with the instrument.

METER RANGES—

A.C. Volts: 0-1/4/10/40/100/400/1000

D.C. Volts: 0-4/10/40/100/400/1000

Ohms: 0-1000/10,000/100,000/1meg/10meg/100meg/1000meg

M.A.: 0-1/4/10/40/100/400/1000

Decibels: Minus 30 to minus 5/minus 10 to plus 15/10 to 35/30 to 55

Either positive or negative D.C. voltmeter indications instantly by means of reversal switch. Signal Tracing type test lead with isolation resistor in probe.

Model 645 is an ultra-modern high sensitivity instrument, with all of the famous Jackson features, including exceptional accuracy and simplicity of use.

#### GENERAL SPECIFICATIONS

The instruments listed on these pages are perfectly matched units—identical in panel size, style, color, and case construction. (Models 634, 640, 642, 643, 645, and 650-A.)

DIMENSIONS—8 1/2" x 8 1/2" x 6"—Unit welded steel, finished in grey morocco. Each instrument (except Model 640 Oscillator) is equipped with removable hinged metal lid.

ACCESSORIES—Each instrument is completely equipped with all necessary tubes, test leads or batteries and ready to operate.

Shipping weight for any unit—approximately 10 lbs.

### MODEL 642 UNIVERSAL MULTIMETER 20,000 OHMS PER VOLT

*A valuable and necessary instrument for all measurements of sensitive circuits such as A.V.C. voltages, etc. Many measurements may be made with current drain as low as 10 microamperes!*

AUTOMATIC RANGE SELECTION—PUSH BUTTON CONTROLLED. Instant selection of any meter range is made simple with the eleven key push button selector.

TWENTY-THREE RANGES—SEVEN FUNCTIONS AC/DC volts—ohms—decibels—milliamperes—microamperes and amperes. Has special built-in shunt and 10 ampere range.

OHMS RANGES from 1/2 ohm up to thirty megohms. No external batteries or line power required. Current readings may be made as low as 2/1000ths of one milliampere. All D.C. volts ranges are 20,000 ohms per volt.

METER RANGES—

A.C. Volts: 0-10/100/250/500/1000/5000

D.C. Volts: 0-10/100/250/500/1000/5000

Decibels: Minus 10 to plus 14/10 to 34/30 to 54

D.C. M.A.: 0-10/100/250

Microamps: 0-100

Amperes: 0-10

Ohms: 0-3000/300,000/30,000,000

Construction is of the finest in materials and workmanship. Case is welded steel finished in grey morocco. Fitted with removable hinged steel cover. Protects meter and controls.

Case dimensions: 8 1/2" x 8 1/2" x 6". Weight 6 lbs. Complete with self-contained battery. Furnished with test leads.

MODEL 642

NET CASH PRICE

\$48.50

1,000 OHMS PER VOLT MODEL—Same ranges as above except micro-amps is 0-1000 and ohms ranges are 0-3000/300,000/3,000,000.

MODEL 643

NET CASH PRICE

\$33.95

### NEW COMPACT MULTIMETERS

Models 610 and 615 are excellent general purpose instruments, compact in size but very complete in ranges. The two instruments are identical in size and style. Panels are finished in attractive two tone grey with white lettering.

RANGE SELECTION—Rotary switch method saves time and reduces errors. HIGH QUALITY METER—Three inch square type meter with two jewelled bearings.

RANGES MODEL 610

TWO OHMS RANGES—0-1000/0-500,000

FIVE D.C. VOLTS RANGES—0-5/50/100/250/1000

FOUR D.C.M.A. RANGES—0-1/5/50/250

RANGES MODEL 615—Same as Model 610 except has additional ranges of—

FIVE A.C. VOLTS RANGES—0-10/100/200/500/2000

ADDITIONAL HIGH VOLTAGE D.C. RANGE—0-2500 v.

Each instrument supplied complete with self-contained battery for ohms ranges. Test leads not included. Dimensions—7" x 4 1/4" x 3"

# JACKSON

## Radio Testing Equipment

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

### INDUSTRIAL CIRCUIT TESTER

Volt Ohm Milliammeter  
MODEL 665-J

This multiple range instrument is designed to meet exacting requirements in various uses where thorough electrical testing is a necessity.

Production testing on motors, controls, etc.  
Industrial and educational laboratories.  
Military use—Signal Corps, Air Corps, etc.  
Manufacturing—Plant Maintenance.  
Tests on Signal Systems, Alarm Devices, etc.

The instrument is completely self-contained, is lightweight, compact, and portable. The unusually complete selection of meter ranges are suited to a wide range of measurements.

A total of 33 ranges are provided. Any range may be rapidly selected by means of the switching and pin jack arrangement. All meter shunts and multiplier resistors are wire wound. The resistors are non-inductive and have a negligible temperature coefficient. All resistor spools are protected against moisture absorption.

The indicating meter is of finest quality, designed for sustained accuracy under severe service conditions. It is designed to withstand various temperature and humidity changes as well as vibration, overloads, etc.

A.C. ranges are accomplished by means of a full wave type copper oxide rectifier. This full wave rectifier circuit provides more stability at various frequencies and wave forms than the half wave type.

The panel is molded bakelite with all characters white filled for maximum legibility. Pin tip jacks for test leads are molded into the panel. The case is made of steel and finished in black morocco enamel.

#### — RANGES —

### AUDIO OSCILLATOR

MODEL 652

The Model 652 provides an audio frequency voltage DEVELOPED AT ITS FUNDAMENTAL FREQUENCY. The basic design of the instrument is entirely different from the "beat frequency" type of Audio Oscillator.

#### FEATURES

RESISTANCE CAPACITY TUNED CIRCUIT DESIGN, engineered for modern needs of audio measurements.

NO ZERO ADJUSTMENT—Tuned Fundamental Frequency method provides permanently locked calibration.

OUTPUT CHARACTERISTICS—Model 652 meets the most exacting requirements as to WAVE FORM—UNIFORM FREQUENCY CHARACTERISTIC—AND OUTPUT LOAD IMPEDANCE SELECTION. A special feature of the output system is the ten ohm tap for low impedance circuits such as speaker voice coils, etc.

COMPLETE STABILITY—The stability of frequency calibration is constant throughout the entire range. The stabilized circuit permits large changes in line voltage to occur without affecting frequency or waveform and having negligible effect on output voltage.

SIMPLIFIED OPERATION—It is only necessary to select desired FREQUENCY and OUTPUT. THERE ARE NO OTHER CONTROLS. Therefore the possibility of errors in operation is eliminated.

HIGH OUTPUT POWER—More than THREE TIMES the output power usually available from "ordinary" audio oscillators.

CONSTRUCTION—Frequency dial is glass enclosed. All controls are legibly marked. Rugged mechanical construction assures trouble-free operation under severe service conditions.

#### SPECIFICATIONS

Frequency Range—20 cycles to 20,000 cycles in 3 ranges. 20-200 cycles/200-2000 cycles/2000-20,000 cycles.

Accuracy—Frequency calibration accurate to within 3% or 1 cycle.

Output Impedance—Five values of output impedance 10 ohms/250 ohms/500 ohms/5000 ohms/HIGH. Controlled by selector switch.

Output Power—500 milliwatts. Continuously variable from zero to maximum.

Waveform—Less than 5% Harmonic Distortion between 30 and 15,000 cycles.

Frequency Characteristic—Plus or Minus 1 DB between 30 and 15,000 cycles.

Line Voltage—105-120 Volts—50-60 Cycle A.C.  
Tubes—1-80, 1-6SJ7, 2-6F6 furnished installed in instrument.

Dimensions—13" wide, 9 1/2" high, 9 3/4" deep. Wt. 26 lbs.

MODEL 652 NET CASH PRICE \$88.50

### CATHODE RAY OSCILLOGRAPH — MODEL 523

SENSITIVITY—The input sensitivity to vertical plates is 4/10 of one volt R.M.S. per inch of deflection. This sensitivity is secured by means of high gain amplifiers having a frequency range to 100 kilocycles.

HORIZONTAL SWEEP—A horizontal time axis "sawtooth" oscillator provides a frequency from 20 to 20,000 cycles. Frequencies up to 100,000 cycles may readily be inspected, resulting in a five pattern image. Timing frequency range switch is marked directly in frequency. This feature greatly simplifies the selection of a desired frequency range.

CONSTRUCTION—Design and construction are practical in every respect. The entire cabinet is heavy gauge steel construction. The instrument is attractively finished in grey morocco, oven-baked enamel. The control plates are etched with white background and black characters. The very finest of materials and construction are employed throughout.

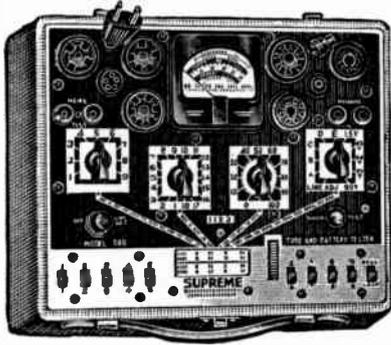

POWER SUPPLY & TUBES—Operates from 110-volt, 50-60 cycle power supply. The Model 523 is supplied complete with 3-inch Cathode Ray Tube, two type 57, one type 885 and two type 80.

DIMENSIONS—17" x 8 3/4" x 12 1/4" overall. Weight 30 lbs.  
MODEL 523 NET CASH PRICE \$76.50

- Vertical Amplifier and Horizontal Amplifier
- Calibrated Linear Timing Circuit
- Frequency Control and Vernier
- Automatic "Lock-in" Control
- Spot and Focus Controls on Main Panel
- Calibrated Screen

# SUPREME INSTRUMENTS

## Newest Engineering Developments

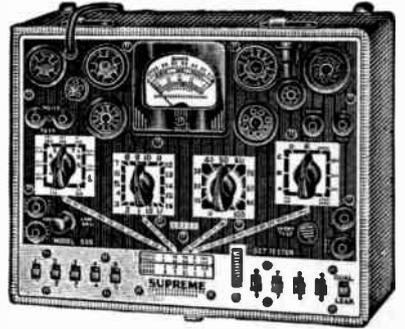

**MODEL 589**  
**TUBE AND BATTERY TESTER**

MODEL 589 TUBE AND BATTERY TESTER has a completely modernized circuit. The tube test sockets are not wired directly to the circuit, but, instead, pass through the patented Supreme Double Floating Filament Return Selector system which automatically re-connects all tube elements to any possible tube base arrangement. Due to the fact that any or all elements of each socket can be rotated to any desired position, only one socket of each type is necessary. Tests every type of tube from ¼ volt to full line voltage at its correct anode potential under proper load. Tests separate sections in multi-purpose tubes. Checks all leakages, shorts, open elements and filament continuity with a neon lamp. A circuit insert is provided for checking noise, leakage, loose and bad connections.

The battery testing circuit of the Model 589 provides the proper load at which each battery is to operate, plainly marked on the panel, for all 1.5, 4.5, 6.0, 45 and 90 volt portable radio types. The condition of the battery is indicated on an English reading scale.

This is the fastest and easiest tester to operate. Just "follow the arrows"—you can't go wrong. Roller type tube chart with brass geared mechanism lists tubes in logical numerical order. Each tester carries a one year free tube setting service. SUPREME engineering and construction PLUS the best materials the market affords, make the 589 your biggest dollar value. You will be proud to own this instrument.

Dealer Net Cash Price..... **\$38.50**

**MODEL 599**  
**TUBE AND SET TESTER**

MODEL 599 TUBE AND SET TESTER is very similar in appearance to the Model 589, and includes all the features and advantages of this instrument. In addition, it provides the following ranges:

0.2 TO 1500 D.C. VOLTS—5 carefully selected ranges—0/6 15/150/600/1500 volts. 1000 ohms per volt STANDARD sensitivity.

0.2 TO 600 A.C. VOLTS—4 A.C. ranges—0/6/15/150/600 volts. Rectifier guaranteed with instrument and fully protected from overload damages.

0.2 M.A. TO 600 M.A.—3 direct current ranges 0/6/60/600 allow measurement of screen, plate, "B" supply and D.C. filament loads.

0.2 TO 600 OUTPUT VOLTS—0/6/15/150/600—ideal for alignment. No button to hold down—no external condenser necessary.

0.1 OHM TO 20 MEGOHMS—4 ranges 0/200/20,000 ohms, 0/2/20 megohms. A low range at high current with 3.5 ohms center scale.

ELECTROSTATIC—ELECTROLYTIC LEAKAGE TEST—provides an excellent test of paper condensers by means of the highly sensitive 20 megohm range. Much better than neon lamp methods as the ohmmeter is calibrated. Equally useful in checking leakage in electrolytic condensers. Just as the 589 is your best value in a tube and battery tester, the 599 is your best value in a combination tube tester, battery tester and set tester. All the features of the 589 PLUS a complete AC, DC, volt, ohm, megohm, milliammeter, at a cost of only 47c per range.

Dealer Net Cash Price..... **\$49.95**

### MODEL 563 AUDIO OSCILLATOR

The SUPREME Beat Frequency Audio Oscillator has many important service applications. It provides three output impedances of 250, 500, and 5,000 ohms; output frequency of 30 to 15,000 cycles  $\pm$  1 db. from 30 to 10,000 cycles. Down 2 db. at 15,000 cycles; power output is 125 milliwatts; distortion less than 5% RMS over entire range; hum level —60 db. below maximum output; large ratio dial, calibrated scale 11" in length; tube complement of 2 type 6SK7, 2 type 6C5, and 1 6X5; power consumption 35 watts—fuse protection. Shipping weight 20 lbs.

Dealer Net Cash Price..... **\$56.15**

### MODEL 504-A COMBINATION TESTER

Model 504-A is radio's finest quality combination tube tester, battery tester, condenser leakage tester, and a 31 range push-button operated multimeter. Correctly tests all types receiving tubes with filaments from ¼ volt to full line voltage. Uses patented Double Floating Filament Return Selector System which automatically re-connects each tube socket for any possible tube base arrangement. Due to this special circuit only one socket is required for each tube base. Tests all standard type tubes, including octals, sockets, miniatures, Bantam, Jr., pilot lamps, etc. Speedy operation. Set controls from left to right—just "follow the arrows". Neon lamp checks for leakage, shorted elements, open elements and filament continuity. Pressing a button increases the sensitivity of the neon lamp to 2 megs. Circuit insert for noise test. Fast roll chart—free tube setting service for one year. Checks portable radio batteries under proper load. Checks leakage of electrolytic and electrostatic by-pass condensers. Quality of tubes, batteries, and electrolytic condensers all indicated on English reading "good-bad" scale. Multimeter section completely automatic with instantaneous push-button finger-tip control—7 ranges 0.1-5/25/100/250/500/1000/2500 D.C. volts; 5 ranges 0.1-5/10/50/250/1000 A.C. volts and output; 7 ranges 10-500 microamperes/2.5/10/50/250 mils., 1/10 amperes; 5 ranges 0.1-200/2000/20,000/2 meg./20 megs.—3.5 ohms center scale. Rectifier guaranteed—temperature compensated circuit. No external condenser required on output volts. Accuracy of calibration 2% on D.C. and 3% on A.C. Complete with batteries and detailed instructions.

Dealers Net Cash Price ..... **\$83.50**

# SUPREME INSTRUMENTS

## Supreme by Comparison

### MODEL 571 SIGNAL GENERATOR

A test oscillator which offers high accuracy and stability at an amazingly low price! By using air core trimmer capacitors and iron core inductors Model 571 can be calibrated at both ends of the dial, making over-all accuracy to less than 1/2 of 1%. High "Q" coils and ideal L/C combination, together with rugged construction provide high frequency stability. Double shielding makes unit capable of withstanding large temperature and humidity changes as well as minimizing unwanted leakage. Wide frequency range from 65 KC to 20.5 megacycles in five bands on fundamentals and to over 60 megacycles on harmonics. All five bands read on but two basic scales calibrated on a large 6-inch illuminated dial. Dual ratio tuning mechanism provides easy, accurate adjustment. Has built-in 400 cycle audio oscillator with sine wave out-put. Provisions for internal modulation at two levels (high and low) for checking second detector distortion. Audio output also available from panel for checking A.F. systems. R.F., I.F. and high frequency fully controllable with double shielded non-shorting ladder type attenuator. Beautiful black metal panel with silver and red trim. Complete with all accessories and operating instructions.

Dealer Net Price..... **\$49.40**

### MODEL 546 OSCILLOSCOPE

Model 546 has merited the endorsement of servicemen, radio set manufacturers in research and production, industrial laboratories, factories and colleges for more than four years. A complete oscilloscope incorporating a cathode ray scope, vertical and horizontal amplifiers and linear sweep generator. Uses a high vacuum 3" cathode ray tube of the medium persistence type. All controls are on the front panel including special terminals for direct connection to deflecting plates. Can be used with or without the specially designed sensitive linear amplifiers. Both vertical and horizontal amplifiers have high impedance input and wide frequency response. Has built-in linear sweep generator for providing timing axis from 15 to 30,000 cycles. Positive, stable synchronization, internal or external. Observations may be made using external or internal sweep. Ideal for checking alignment of radio receivers, percentage of modulation on transmitters, waveforms. Extremely flexible design makes applications unlimited. Complete with detailed instructions.

Dealer Net Price..... **\$82.50**

### MODEL 561 COMBINATION A.F. & R.F. METERED SIGNAL GENERATOR

The Model 561 is a combination of four indispensable instruments—each of the highest quality and a leader in its classification. Engineered and built into one beautiful unit it includes a RADIO FREQUENCY GENERATOR, an AUDIO FREQUENCY GENERATOR, a FREQUENCY MODULATOR and a CARRIER AND MODULATION MONITOR. The RADIO FREQUENCY GENERATOR is of special design to insure high stability and good wave-form from 65 kilocycles to 20.5 megacycles in five bands on ONLY TWO SCALES. Last band will provide signal to over 60 megacycles using harmonics. All R. F. coils are provided with adjustable iron cores and air trimmer capacitors, making the calibration accuracy to less than 1/2 of 1%. A separate tube is used as a buffer amplifier to provide smooth carrier control and linear modulation. Output is equipped with a completely shielded attenuator for signal control from 1/2 microvolt to 100,000 microvolts. The AUDIO FREQUENCY GENERATOR covers the complete audio spectrum from 15 to 15,000 cycles. Audio output has excellent wave-form with less than 5% harmonic content. Frequency response is virtually flat from 30 to 10,000 cycles and down 2 db. at 15,000 cycles. Power output is approximately 150 milliwatts with an open circuit voltage of 35 volts. Push button selection of four output impedances (50/500/5000 and 50,000) with provisions for push-pull inputs. The FREQUENCY MODULATOR is of the electronic type with internal frequency to produce a double image pattern with automatic synchronization. Two vacuum tube voltmeters are built into the unit to monitor the R. F. voltage and percentage of modulation. Each generator may be used separately or in conjunction with each other to provide the radio technician with any type of signal required for the testing and alignment of radio receivers and other electronic equipment. Each unit is shipped complete with all cables, tubes, and detailed instructions.

Dealer Net Cash Price ..... **\$107.50**

### MODEL 562 AUDOLYZER

This is a quick, easy, inexpensive test instrument for DYNAMIC TESTING of every radio receiver using the Signal Tracing method. Easy to operate. You always HEAR the demodulated signal instead of watching a meter or magic eye. You can find the dead portion of any receiver by connecting your modulated signal generator to the receiver and touching the SUPREME AUDOLYZER'S probe first to the antenna post, then the grid of the R.F. tube, the R.F. tube plate, etc., right back through the complete receiver. You will hear a signal in the AUDOLYZER'S speaker (which has a volume control) until you hit the dead stage. You can use the AUDOLYZER'S vacuum tube volt meter to measure all D.C. voltages without disturbing receiver's normal operations. 7 D.C. voltage ranges of 0/1/3/10/30/100/300/1000 at 15 megs input. Meter is center-reading type with 'plus' and 'minus' readings to each side of center eliminating reversing test leads for polarity changes. You can measure resistance from 0.1 ohm to 20 megohms. 5 ranges give you perfect overlap as the 0/200 is the low range with 3.5 ohms center scale. Total ranges are 0/200/2000/20,000 ohms and 2/20 megohms. Next, you can check receiver's oscillator. If oscillator cuts out or is weak when receiver dial is rotated, AUDOLYZER meter immediately indicates it. To determine unknown frequency of oscillator, I.F., or R.F. signal, use tuning portion of SUPREME AUDOLYZER and AUDOLYZER'S V.T.V.M. as frequency meter.

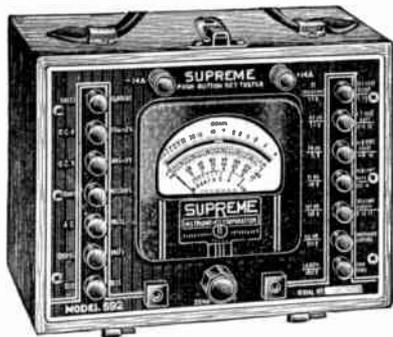

For receiver's oscillator place probe on oscillator output and tune AUDOLYZER for greatest meter swing. Read frequency on AUDOLYZER'S direct-reading dial. For R.F. determination, connect your signal generator to receiver's input and place AUDOLYZER probe on output of R.F. stage under test. Adjust signal generator and AUDOLYZER to same frequency. Adjust receiver trimmer until receiver dial reads correctly. To determine actual signal fed to I.F. stages connect AUDOLYZER probe to first Det. output, feed a

signal into receiver and adjust AUDOLYZER dial until you get maximum swing of its meter needle. Read actual I.F. signal's frequency on AUDOLYZER. Relative gain or loss of signal strength in any stage, tube or transformer can be determined. You can check A.V.C. circuits for correct applied voltage under actual operating conditions. You can adjust A.V.C. circuits. Distortion is easily noted by ear.

Dealer Net Cash Price..... **\$99.95**

# SUPREME INSTRUMENTS

## Supreme by Comparison

### MODEL 592 SET TESTER

Service men who know the principle of Model 592 operation will never go back to rotary switch or pin jack operation. 44 ranges at your finger tips.

1 Microampere to 14 amps; 8 ranges (1—70/700 microamps; 7/35/140/350 M A; 1.4/14 amps.)

0.1 to 1400 D.C. volts; 7 ranges at 1000 ohms per volt and 7 ranges at 25,000 ohms per volt sensitivity of: (0.1-3.5/7/35/140/350/700/1400). Double Meter Sensitivity.

1/4 ohm to 50 megs; 6 ranges (1/4—500/5,000/50,000/500,000 ohms and 5/50 megs). All from self contained battery power.

0.1 to 1400 A.C. volts; 6 ranges 0.1—7/35/140/350/700/1400). Temperature compensated—rectifier guaranteed.

Complete output ranges: 6 ranges (0/7/35/140/350/700/1400). No external condenser necessary.

—0 to +46 D.B.: 4 ranges 0.006 to almost 200 watts—(0/+16; +10/+26; +20/+36; +30/+46).

50 meg. resistance range allows very accurate leakage check of all electrostatic paper and mica condensers. New specially designed A.C. rectifier circuit minimizes burnouts from momentary overloads. NO SAFETY SWITCH TO HOLD DOWN. Copper-oxide rectifier GUARANTEED the same as every other part. D.B. (decibel) conversion chart furnished so D.B. readings can also be taken on any line of known impedance. D.B. readings direct from 500 ohm line. SUPREME 592 easiest multimeter to operate—just depress one button on left side of panel for desired function and one button

on right side for desired range. One set of pin jacks serve 43 ranges. 14 amps range on separate binding posts, 40 microampere meter movement. Wire wound shunt resistors. Special push-button for quick ohmmeter zero adjustment. Four years actual field use by thousands of Service Men prove the 592 to be TOPS in instrument value.

## MULTIMETERS

### A POPULAR COMPACT POCKET LABORATORY

#### MODEL 543 POCKET MULTIMETER

The Model 543 Pocket Multimeter uses the same bakelite case as Model 542. Attractive two-color panel—full size 3" one-mil meter. A single rotary selector switch provides functions and ranges of: Resistance—0/2000/200,000 ohms; Direct Current—0/6/60/600 M.A.; AC—0/15/150/600/3000 volts; D.C. 0/15/150/600/3000 volts. Batteries furnished and contained within case. Ranges at 1,000 ohms per volt standard sensitivity. With this instrument you can make A.C. and D.O. voltage measurements in radio and television receivers and if you are a "Ham" you can use the high voltage ranges on your transmitter and scope. This is a beautifully designed and rugged little instrument at an astonishingly low price.

Dealer Net Cash Price ..... **\$16.25**

#### MODEL 542 POCKET MULTIMETER

A regular little pocket laboratory with a case only 3 x 5 3/4 x 2" in size, weighing but 28 ounces—24 ranges—just as accurate and even more convenient than you would expect to find in an instrument twice its price. 4 DC mil ranges (with first scale division 5 microamperes) of 0/0.3/6/30/150; 4 DC volt ranges (with first scale division 0.1 volt) of 0/6/150/300/1500; 4 ohms ranges (with 1 ohm first scale division and 25 ohms center scale) of 0/2,000/20,000/200,000/2 meg; 4 AC volt ranges (with first scale division 0.1 volt) of 0/6/30/150/600; 4 output ranges of 0/6/30/150/600; 4 decibel ranges of —6/+10, +8/+24, +22/+38, +34/+50. The Model 542 is not a toy—it uses a full size 3" square meter with a rugged, accurate 200 microampere movement and a knife edged pointer. This movement has a sensitivity of 5000 ohms per volt. All ohmmeter ranges, including the megohm ranges, are operated by batteries furnished with the instrument and contained within its durable black moulded bakelite case.

## Construction Features of DeJUR Instruments

- Strong moulded phenolic base, open front for access to movement
- Chrome steel magnet protected by cadmium and tin platings
- Aircraft type bracket
- Beryllium copper balance weights
- Anodized coil frame
- Matched torque to minimize temperature effect
- All brass scale plate
- Static grounding lug
- Scale plate lacquers are fume-proof
- Guaranteed accuracy of plus-minus 2% of full scale

**Better Balancing**, and a uniform magnetic flux around the moving coil eliminate possibility of calibration error.

**Longer Pivot Axis** permits more accurate adjustment of jewels and pivot assembly. More easily accessible, too, in event of repair or servicing.

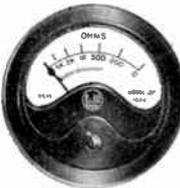

**Superior Magnetic Materials** . . . Alnico and cobalt are used in conjunction with soft iron pole pieces, thus assuring high torque, fast response and improved performance.

BUILT TO CONFORM WITH GOVERNMENT SPECIFICATIONS

### HERMETICALLY SEALED METERS

**1 1/2-INCH SQUARE**

# Cathode-Ray TUBES ★ OSCILLOGRAPHS ★ EQUIPMENT

## DU MONT TYPE 164E 3" CATHODE-RAY OSCILLOGRAPH

Because of its compactness, limited weight and modest price, the Type 164E Cathode-Ray Oscilloscope is a favorite with radio servicemen and with engineers who require a small portable field instrument. The limited power consumption of this instrument is also a valuable factor in field work.

A three-inch cathode-ray tube is employed operating at an accelerating potential of 1100 volts, to provide good brilliance with a fine, sharp trace. The single-stage vertical amplifier has a voltage-gain of approximately 45 over the frequency range from 5 to 100,000 sinusoidal cycles per second. The horizontal amplifier may be switched to amplify either the sweep circuit or any externally-provided signal, so that Lissajous patterns for frequency determinations may be employed.

Deflection-plate terminals are available at the rear of the instrument without removing the case. Either a Type 3AP1 cathode-ray tube with medium-persistence green screen or a Type 3AP5 cathode-ray tube with short persistence blue screen for photographic applications may be employed. A removable calibrated scale, which is supplied with the instrument, fits over the screen of the cathode-ray tubes.

### SPECIFICATIONS

Standard 3-in. Type 3AP1 supplied. Standard tube has green, medium-persistence screen. Short-persistence blue screen for moving-film recording supplied on order at slight additional cost. Removable calibrated scale fits over tube screen.

**Input-Impedance:** Vertical: 1,000,000 ohms. Horizontal: 800,000 ohms. Maximum potential 400 d.c. volts.

**Frequency-Range:** Vertical and Horizontal amp. both uniform within 20% from 5 to 100,000 cycles.

**Deflection Sensitivity:** Maximum vertical: 0.80 r.m.s. volt/in. Maximum horizontal: 0.65 r.m.s. volt/in. Deflection sensitivity of cathode-ray tube is 30 r.m.s. volt/in.

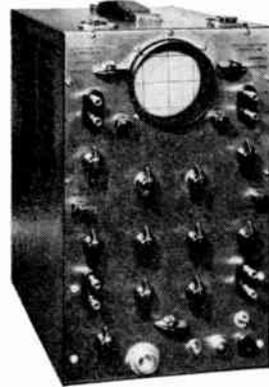

**Sweep Circuit:** Amplified sweep circuit over continuous range from 15 to 30,000 cycles. Return-trace elimination included. Synchronization from either vertical deflection or external signal.

**Power Supply:** 115/230 volts, 40-60 cycles a.c. Power consumption 50 watts.

**Tubes:** All tubes, including the cathode-ray tube are supplied with the instrument.

**Physical Specifications:** Black wrinkle-finish steel cabinet. Convenient carrying handle. White characters on black, plated metal background. Height, 11 1/2 in.; width, 7 3/4 in.; depth, 14 in. Shipping weight 25 lbs.

1067A	164E	230v. 40-60 cycles with 3AP5 Cathode-Ray Tube.....	67.25

## DU MONT TYPE 224A — 3" EXPANDED-RANGE OSCILLOGRAPH

The greatly expanded frequency range of this instrument permits study of signals of frequencies far beyond the range of usual standard oscillographs. It has a comparably faithful square and sinusoidal wave response. Also, it is a more versatile instrument because it provides for extreme variety in the application of the signal to the cathode-ray tube through front panel jacks or binding posts. Also, terminal on panel couples into grid of cathode-ray tube for intensity modulation. Y-amplifier has an input connection for the test probe and shielded cable supplied, reducing input capacitance and eliminating usual stray pickup.

This instrument is housed for severe service out in the field as well as in the laboratory or plant. Protective, removable front cover safeguards panel and controls when not in use or when in transit, and also holds the test probe and shielded cable.

### SPECIFICATIONS

Standard 3-in. Type 3GP1 supplied. Standard tube is green medium-persistence screen. Removable calibrated scale fits over tube screen. **Input-Impedance:** Vertical and horizontal: To terminals, 2 meg., 30 uuf. To probe, 1 meg., 20 uuf. Direct (Balanced) 10 meg., 20 uuf. Direct (Unbalanced) 5 meg., 25 uuf.

**Frequency Range:** Y-axis sine wave response uniform within 3 db. from 20 c. to 2 mc. Comparably faithful square and sinusoidal wave response.

X-axis uniform within 3 db. from 10 c. to 100 kc. Distortionless input attenuator and gain control.

**Deflection Sensitivity:** With amplifier, to Y-axis terminals, 0.1 volt r.m.s./in. deflection; to Y-axis with probe, 0.4 r.m.s./in. deflection; to X-axis terminals, 0.7 volt r.m.s./in. deflection. Direct to deflection plates, to Y-axis, 25 volts r.m.s./in. deflection; to X-axis, 28 volts r.m.s./in. deflection.

**Linear Time-Base:** Frequency range of 15 to 30,000 c.p.s. Direction of sweep, left to right. Synchronizing signal sources, internal or Y signal, 60 cycle, or external. Synchronizes with either polarity of synchronizing signal.

**Power Supply:** 115 volts. 50-60 cycles a.c. Power consumption 150 watts. Fuse protection 3 amps.

**Tubes:** All tubes, including cathode-ray tube, are supplied with the instrument.

**Physical Specifications:** Olive drab wrinkle-finish steel cabinet. Convenient carrying handle. Black characters on etched bright metal panel. Removable front cover. Height, 14 1/2 in.; width, 8 3/4 in.; depth, 15 1/2 in. Shipping weight, 49 lbs.

# Cathode-Ray TUBES ★ OSCILLOGRAPHS ★ EQUIPMENT

## DU MONT TYPE 208B 5" CATHODE-RAY OSCILLOGRAPH

Popular five-inch instrument incorporating every possible desirable feature in a standard instrument along with many new improvements which have been incorporated for the first time in any cathode-ray equipment. High accelerating-potential on the new intensifier-type tube insures good brilliance. New, wide-frequency-range amplifiers with symmetric deflection and high sensitivity provide good focus over the entire screen area of the Cathode-Ray tube. The direct-current-coupled deflection amplifier provides for d.c. amplification with a sensitivity of approximately 0.5 d.c. volt per inch deflection. The cathode-loaded input stage of this instrument gives undistorted frequency-response over the entire frequency-range regardless of input attenuator setting.

Unusual mechanical design of this cathode-ray oscillograph has been incorporated which gives more efficient electrical operation and balances the weight distribution of the instrument so that it is very convenient to carry. Amplifier, sweep, and position-control circuits offer extended frequency-range and ease of operation, permitting the beam to follow immediately all changes in control adjustment. Regulated power supplies make the oscillograph practically independent of line-voltage surges in spite of its high gain.

### SPECIFICATIONS

**Cathode-Ray Tube:** Type 5LP1 intensifier type, high-vacuum, with four free deflection plates. Standard tube, Type 5LP1, has green medium-persistence screen. Type 5LP5 with blue, short-persistence screen supplied at slight additional cost. Beam switch provided on front panel. Removable calibrated scale supplied.

**Input-Impedance:** X-axis, 5 megohms, 25 uuf Y-axis, 2 megohms, constant 30 uuf input loading. Continuously-variable attenuator free from both frequency and amplitude distortion attenuates signal with no pattern-shift.

**Frequency Range:** Y-axis, plus or minus 10% from 2 to 100,000 sinusoidal cycles; X-axis, plus or minus 15% from 2 to 100,000 sinusoidal cycles.

**Voltage Gain:** Y-axis—2000 times; X-axis—43 times.

**Deflection Sensitivity:** Max. Y-axis 0.010 r.m.s. volt/in. Max. X-axis 0.500 r.m.s. volt/in. Direct to deflection plates—21 and 22 r.m.s. volts/in. Y-axis and X-axis respectively.

**Horizontal Switching:** Frequency-range control for horizontal sweep-circuit is arranged so that its OFF position connects X-axis amplifier input to input terminal provided on front panel.

**Sweep Circuit:** Recurrent sweep available over continuously-variable range from 2 to 50,000 cycles. Direction of sweep is from left to right.

**Power Supply:** High-voltage power unit supplies 1120 v. d.c. in series with amplifier power unit to furnish total accelerating potential of 1400 volts. Deflection-plate potentials vary in balanced pairs about ground. Voltage regulation is provided for low-level amplifiers and positioning circuits. Instrument operates directly from 115/230 v. 40-60 cycle a.c. Consumption 90 watts.

**Tubes:** All tubes including the cathode-ray tube are supplied with the instrument. A total of 15 tubes is employed.

**Physical Specifications:** Black, wrinkle-finish steel cabinet. Convenient carrying handle. Plated brass front panel with chrome-on-black lettering. Height, 14 1/4 in.; width 8 1/2 in.; depth 19 1/2 in. Shipping weight 67 lbs.

## DU MONT TYPE 185A ELECTRONIC SWITCH

The Type 185A Electronic Switch is an extremely valuable supplementary instrument for use with any Du Mont or other make of cathode-ray oscillograph.

The instrument has been designed for simultaneous studies of such signals as input and output signals of amplifiers, of both phases of push-pull amplifiers, and for simultaneous voltage- and current-studies of a.c. and d.c. circuits. Two or three units may be operated in cascade to provide three channels for investigations of three- and other polyphase a.c. circuits.

The Type 185A Electronic Switch consists of two amplifiers, operating in parallel, which are alternately biased to cut off by a multivibrator type square-wave generator whose frequency may be varied over a wide range to suit operating conditions. The outputs of the two amplifiers are fed to a common output terminal. In application one unknown signal is connected to the input of each amplifier and their mixed and switched output is fed from the output terminal to the input of a standard cathode-ray oscillograph to give the appearance of observing both signals at once. The balance control of the Electronic Switch makes it possible to superimpose both signals for direct comparison or to separate them on the screen of the cathode-ray tube for individual study.

### SPECIFICATIONS

**Frequency Range:** Continuously variable, 10 to 2000 times per second. Essentially uniform response of amplifier from D.C. to 5,000 sinusoidal cycles per second. No phase distortion experienced from low-frequency limit to 25,000 sinusoidal cycles per second.

**Voltage Gain:** 10 times for identical amplifiers on each axis.

**Controls:** Coarse and fine square wave and switching frequency controls, separate amplifier gain controls, balance control and power switch.

**Power Supply:** Instrument entirely A.C. operated from 115/230 v. 40-60 cycle supply. Power consumption, 30 watts. Fuse protection, 1 amp.

**Tubes and Functions:** All tubes supplied with instrument, as follows: 2—Type 6V6 Blocking Tubes; 2—Type 6SJ7 Switching Amplifiers; 2—Type 6J5 Oscillators; 1—Type 80 Rectifier.

**Physical Specifications:** Black wrinkle-finish steel cabinet. Convenient carrying handle. Black, plated panel with white lettering. Dimensions: Height, 11 1/2 in.; width, 7 3/4 in.; depth 13 in. Net weight 17 lbs.

## MODEL 260 VOLT—OHM—MILLIAMMETER The New "High Sensitivity" Tester

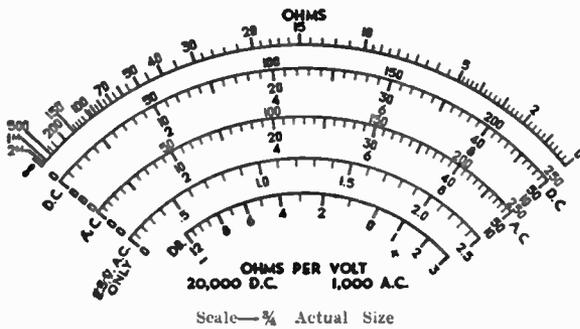

AT 20,000 ohms per volt this instrument is far more sensitive than any other instrument even approaching its price or quality, and covers a wide range of unusual conditions that cannot be checked by ordinary servicing instruments. The practically negligible current consumption assures remarkably accurate full-scale voltage readings, ranging from 2.5 to 5000 volts. Current readings as low as 1 microampere, and as high as 500 milliamperes, are available. Resistance readings are equally dependable, ranging from 1/2 ohm to 10 megohms. The finely built 4 1/2 inch meter is mounted in a handsome molded bakelite case, which is provided with a leather handle.

Size: 5 1/2" wide, 7" long, 3" deep. Weight 2 1/2 lbs.

### RANGES

- (20,000 ohms per volt, D.C.)
- (1,000 ohms per volt, A.C.)
- Volts, A.C. and D.C.: 0-2.5, 10, 50, 250, 1000, 5000
- Output, A. C. Volts: 2.5, 10, 50, 250, 1000, 5000
- Milliamperes, D.C.: 0-10, 100, 500
- Microamperes, D.C.: 0-50, 100
- Decibels: (5 ranges) —10 to +52 DB
- Ohms: 0-1000 (12 ohms center)
- 0-100,000 (1200 ohms center)
- 0-10 megohms (120,000 ohms center)

## MODEL 215 VOLT—OHM—MILLIAMMETER

The Model 215 Tester incorporates all of the essential ranges for modern servicing, both AC and DC. It is the first small, low priced instrument to incorporate a large 4 1/2 inch meter, with a long, easy-to-read scale—before now available only in Simpson higher priced Testers. Handsome molded bakelite case has leather handle for easy carrying. Pair of test leads furnished with each instrument.

### RANGES

- (5000 ohms per volt D.C.; 1000 ohms A.C.)
- Volts, A.C. and D.C.: 0-2.5, 10, 50, 1000, 5000
- Output, A.C. Volts: 2.5, 10, 50, 250, 1000, 5000
- Milliamperes, D.C.: 0-10, 100, 500
- Microamperes, D.C.: 0-250
- Decibels: (5 ranges) —12 to —52 DB
- Ohms: 0 to 4000 (30 ohms center); 0 to 400,000 (3000 ohms center); 0 to 4 megohms (30,000 ohms center)

## "Micro-Testers"

### MEET EVERY TESTING REQUIREMENT

MODEL 280

A.C. Ammeter. Half actual size.

Ranges: 0-1, 0-2.5, 0-5, 0-10, 0-25 amps.

Dealer's net price .....\$11.75

THE Simpson Micro-Testers represent a new idea in the form and use of testing instruments. Each of these compact, finely built instruments covers a complete zone of electrical measurements. Model 280, at left, for example, is the first low cost A.C. ammeter ever offered that combines an indicating instrument with a current transformer—that provides readings in five different ranges. Models 280 to 288 inclusive blanket 55 ranges of current, voltage and resistance. Any three can be combined in a handy carrying kit to provide a low cost combination unit that will meet practically any testing requirement.

Micro-Testers can perform a vital service in industrial plants—in some cases replacing high priced laboratory instruments, in most cases replacing panel instruments used in production testing and in all cases becoming a handy portable supplement to them.

Micro-Tester Models 230, 235 and 240 (see p. F-28) are small combination instruments for use where narrower ranges will meet the requirements. Model 245, which tests batteries the right way, under load, completes the line.

All Micro-Testers are housed in sturdy red moulded bakelite cases with matching red bakelite meter cases. Models 280 to 288, inclusive, have metal panels with a beautiful silver-satin finish and are furnished with binding posts. Models 230, 235, 240 (see p. F-28) and 245 have bakelite panels because of the high voltage ranges and incorporate jacks as illustrated. All Micro-Testers are the same small handy size—2 7/8" x 5 1/4" x 1 3/4"—and each weighs about 20 ozs.

The low prices of these Micro-Testers do not mean a sacrifice of quality or accuracy but, rather, serve as proof that Simpson offers today's greatest value in testing instruments.

## "Micro-Testers"

### MEET EVERY TESTING REQUIREMENT

#### MODEL 240 "HAMMETER"

Model 240

THE Simpson "Hammeter" answers the amateur's vital need for a compact, all-purpose tester.

The range and utility of this instrument are far greater than its small size or modest price would indicate—it is a 3000 volt, self contained unit (no external multipliers necessary). A copper oxide rectifier is built into the meter for A.C. voltage ranges and a battery is provided for both ohmmeter ranges. By adding an external condenser in series with A.C. voltage ranges it may be used as an output meter for checking receivers.

Completely encased in bakelite, the Hammeter is shockproof in every detail. The test cables for instance are insulated for 5000 Volts—a 2,000 volt margin of safety. Well insulated tips for plugging into jacks are provided, and the Alligator clips with ample rubber sleeves as illustrated provide a safe means for making high voltage connections.

The typical Simpson beauty of design is apparent in the illustration. The panel is black Formica with distinct gold characters. A knife-edge pointer gives sharp readings on a handsome silver-etched scale with clear black and red characters.

#### WIDE UTILITY

The "Hammeter" is the answer to every need for testing all component parts and circuits when constructing transmitters. It is indispensable for trouble shooting—quickly locating the flaws in transmitters and receivers—checking A.C. or D.C. filament voltage, line voltage and transformer voltage on high A.C. ranges. Extremely high voltage may be checked by measuring to the center tap from each side.

Other tests that can be made with the Hammeter include: Checking grid bias, screen and plate voltage on the lower D.C. voltage ranges—checking power supply D.C. voltages in accordance with latest requirements—checking grid, screen, and plate current of any tube—checking current of carbon microphones. With its self-contained battery, the Hammeter is an excellent continuity meter and will save many hours in construction by locating faulty connections.

#### RANGES

Volts: A.C.—0-15, 150, 750, 3000; D.C.—0-15, 75, 300, 750, 3000.

Milliamperes, D.C.: 0-15, 0-150, 0-750.

Ohms: 0-3000 (center 30); 0-300000 (center 3000).

Resistance 1000 Ohms per volt both A.C. and D.C.

Dealer's net price .....\$18.00

**HICKOK**

# TEST EQUIPMENT

## DYNAMIC MUTUAL CONDUCTANCE TUBE TESTERS

Models 532P and 532C — Hickok Tube Testers — Easy to Operate

The HICKOK is the only tester that provides both English-reading and Micromho scales, and it is the only one that contains an accurate and dependable gas test. Gassy tubes ruin A.V.C. and I.F. stages. Its design is compact and convenient—its operation is extremely simple. It is the choice of engineers of the highest standing.

The HICKOK uses two rectifiers to energize both plates and grids; has a filament voltage up to 117 in steps; detects frequency disturbances with its sensitive noise test; locates shorts—hot or cold; tests diodes separately with low voltage to prevent paralysis of the elements; gives accurately-calibrated line test indication on a large test meter and offers a continuous adjustment of line voltage from 100 to 130 volts.

Tested and demonstrated by expert technicians who probe the effectiveness of all Octal, Loktal, Miniature, Ballast and Magic Eye tubes. These HICKOK Tube Testers are foolproof; they record all tube data on a roll chart. Compactly built, conveniently designed, and easy to operate.

MODEL 532C

MODEL 532P

### SPECIFICATIONS:

**Model 532P**  
Size: 15" x 14 1/2" x 6 1/4". Weight: 24 lbs.  
Power Supply: 110-120 volts, 50-60 cycles.  
Cabinet: Hardwood covered with imitation black leather. Tube Complement: 1 No. 83; 1 No. 5Y3GT, supplied and installed.

**Model 532C**  
Size: 15" x 14" x 6 1/4". Weight: 24 lbs.  
Power Supply: 110-120 volts, 50-60 cycles.  
Cabinet: All steel, finished in baked blue crackle lacquer. Tube Complement: 1 No. 83; 1 No. 5Y3GT, supplied and installed.

## DISPLAY TUBE MERCHANDISER

Model 532D

This counter display instrument sells radio tubes most effectively. Imposing appearance creates confidence, stimulates tube sales by showing weak reading of bad tubes to the customer. Built with the HICKOK basic dynamic mutual conductance circuit and a 9" square micromho meter with illuminated dial. An additional four inch square line voltage meter enables you to make more precise tests. Detailed features are the same as those built into the 532P and 532C.

### SPECIFICATIONS

**Model 532D**  
Size: 25" x 14" x 12". Weight: 34 lbs.  
Power Supply: 110-120 volts, 50-60 cycles. Tube Complement: 1 No. 83; 1 No. 5Y3GT, supplied and installed.  
Structure: All steel cabinet. Finish: Baked, blue crackle lacquer.

MODEL 532D

## COMPACT TUBE TESTER

Model 545

Most compact of all the HICKOK tube testers, yet contains all the features of the Model 532P except the roll chart. The test data is printed on loose leaf sheets mounted in cover. Sturdy all-steel cabinet with removable cover makes it ideal instrument to toss into car for a hurry-up trip.

**SPECIFICATIONS:**  
Size: 15 1/2" x 8" x 5 1/4"  
Weight: 20 lbs. Power Supply: 110-120 volts, 50-60 cycles. Tube Complement: 1 No. 83; 1 No. 5Y3GT, supplied and installed. Finish: Blue baked crackle lacquer.

MODEL 545

## ALL-PURPOSE TUBE AND SET TESTER

Model 534

Designed for the service man as an all-purpose tester. Tube test features are the same as in Model 532P, but roll chart has been omitted. Mounting panel has been enlarged to accommodate a complete analyzer unit.

**FEATURES:** Measures volts, ohms, milliamperes, capacity, inductance, leakage, and decibels. Volts in four ranges 0-20-200-500-1000 A.C. and D.C. 1000 ohms per volt for all ranges. Electronic rectifiers used in patented circuit assuring linear scale for all ranges. D.C. Milliamperes 0-20-200. — Ohms 1/10 ohm to 25 megohms in three overlapping ranges. — Checks leakage of electrolytic or paper condensers. — Checks inductance of choke coils. — Checks hum in any stage of receiver. — Has rectangular five-inch meter for easy reading. — Portable black imitation leather-covered hardwood cabinet with detachable cover.

**SPECIFICATIONS:**  
Size: 15" x 14 1/2" x 6 1/4". Weight: 25 lbs. Power Supply: 110-120 volts, 50-60 cycles. Tube Complement: 1 No. 83; 1 No. 5Y3GT; 2 No. 6H6, supplied and installed.

MODEL 534

**HICKOK**

# TEST EQUIPMENT

MODEL 536

## PROFESSIONAL TUBE TESTER

### Model 536

Contains all the features found in Model 532 plus ADDITIONAL FEATURES of particular value to the exacting technician. Recommended for use in laboratories, telephone and telegraph offices where electronic repeaters are used, sound equipment installations, etc. In addition to the microhm meter, it has a line voltage meter which indicates voltage while the tube is being tested. By pressing a button this meter will accurately measure the voltage at the power socket. A special feature is the thermionic efficiency test which reveals the probable life of the tube being tested and insures uninterrupted service. Also permits exact matching of tubes. Instrument is mounted in a hardwood, black imitation-leather covered cabinet with removable cover.

**SPECIFICATIONS:**—Size: 13" x 14½" x 6½". Weight: 26 lbs. Power Supply: 110-120 volts, 50-60 cycles. Tube Complement: 1 No. 83; 1 No. 5Y3GT, supplied and installed.

## COMBINATION TUBE TESTER AND CIRCUIT ANALYZER

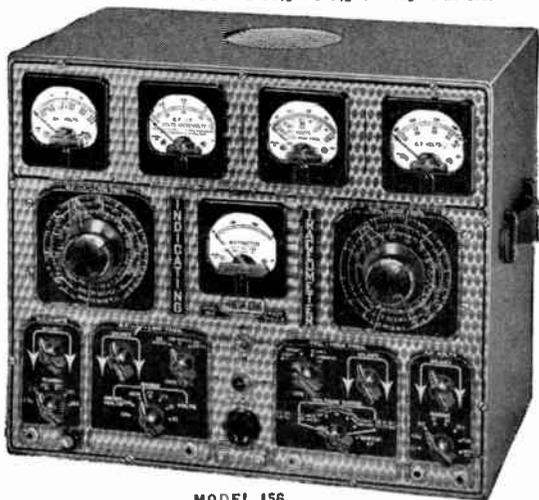

### For the Technician — Model 538

This DE LUXE test equipment contains all the tube testing features of Model 536 including the thermionic efficiency life test. In addition, it is equipped with the analyzing section as supplied with Model 534. A line voltage meter provides constant voltage reading. Also accurately measures voltage at the power socket. The microhm indicating meter is five inches square. Recommended for laboratory, telephone, telegraph, aircraft, and railway electronic testing.

**SPECIFICATIONS:**—Size: 15" x 14½" x 6½". Weight: 26 lbs. Power Supply: 110-120 volts, 50-60 cycles. Tube Complement: 1 No. 83; 1 No. 5Y3GT; 2 No. 6116, supplied and installed.

MODEL 538

MODEL 156

## INDICATING TRACEOMETER

### Model 156

The latest, most advanced and most complete equipment for signal tracing and rapid servicing of frequency modulated, amplitude modulated and television receivers.

A built-in speaker for monitoring either I.F. or R.F. or A.F. channels. With the five precision meters, A.C., D.C., R.F. and I.F. voltage, wattage and frequency measurements can be made and the signal traced throughout the entire receiver without interfering with normal operation.

Seven simultaneous measurements are possible; two frequency measurements, four voltage measurements and one wattage measurement. Vacuum tube voltmeter circuits are so arranged that accidental over voltage cannot damage meters.

**SPECIFICATIONS:** Size: 13" x 16" x 10". Shipping Weight: 22 lbs. Power Supply: 105-130 volts, 50-60 cycles. Finish: Baked crackle lacquer.

## CRYSTAL CONTROL MICROVOLT SIGNAL GENERATOR

### Model 191X

Calibrated output in microvolts from 90 kilocycles to 72 megacycles. Standardized by a self-contained vacuum tube voltmeter. Permits selectivity and sensitivity measurements. Self-contained decibel meter calibrated in 3 ranges from -10 to +38 decibels.

Self-contained crystal controlled oscillator giving signals every 100 KC with accuracy of .01 per cent from 100 kilocycles, to over 15,000 kilocycles, and from 1,000 KC to over 150 megacycles every megacycle.

Over 100' of direct reading frequency scales with accuracy better than 1 per cent. Radio frequency ranges calibrated to 144 megacycles.

**SPECIFICATIONS:**  
Size: 13" x 16" x 7". Shipping Weight: 33 lbs. Power Supply: 105-130 volts AC, 50-60 cycles. Cabinet: Finished in baked crackle lacquer.

MODEL 191X

## CRYSTAL CONTROLLED BATTERY OPERATED MICROVOLT GENERATOR

### Model 91X

Model 91X is similar to Model 191X with the following exceptions:

1. Self-contained battery operated power supply.
2. Frequency coverage—15 kilocycles to 30 megacycles in eight ranges.
3. Vacuum tube voltmeter not interchangeably used as power level meter.
4. Size—14½" x 9½" x 19".
5. Shipping weight—60 lbs.
6. A sturdy leatherette-covered oak carrying case, copperlined, with room for operating instruction manual and cables.

MODEL 91X

# HICKOK

# TEST EQUIPMENT

## UNIVERSAL CRYSTAL CONTROLLED SIGNAL GENERATORS

Models 277X and 288X

Models 277X and 288X Universal Crystal Controlled Signal Generators are specifically designed for use in connection with frequency and amplitude modulated receivers and television equipment. The wide range of output selections found in the Models 277X and 288X Signal Generators meets with all requirements for universal radio and television servicing.

Models 277 and 288 are identical electrically to Models 277X and 288X and are wired for crystal control but the crystal or 6J5 crystal tube is not included. Crystal and tube can be installed at any later date without returning the signal generator to the factory.

MODEL 277X

MODEL 288X

### SPECIFICATIONS—288X

Size: 13" x 13" x 7". Finish: Baked crackle lacquer. Shipping Weight: 28 lbs. Power: The Oscillator includes a complete built-in power supply consisting of a trans-

former, rectifier and filter. It may be operated from any 110 volt A.C. line, 50 to 65 cycles, other voltage and frequencies available at slight additional cost.

## UNIVERSAL VACUUM TUBE VOLTMETER

Model 1108

A precision vacuum tube voltmeter permitting A.C. and D.C. voltage measurements with a minimum of loading on the circuits under task.

A.C. Voltage measurements independent of frequency to over 300 megacycles.

Extended D.C. voltage ranges to 10,000 volts.

A.C. VOLTMETER RANGES 0 to 2½-10-50-250 volts R.M.S. Input impedance—5 micro-microfarads 15 megohms.

FREQUENCY RANGE—10 cycles to over 300 megacycles.

ZERO ADJUST—Single zero adjustment sets zero on all A.C. voltage ranges.

A.C. VOLTMETER PROBE—A type 9006 ultra high-frequency diode tube is used in the A.C. Voltmeter tube.

D.C. VACUUM TUBE VOLTMETER—Ranges—from 0-2½-10-50-250-1000, with input impedance of approximately 10 megohms. Extended D.C. voltage ranges of 2500 and 10,000 volts with input impedance of approximately 10<sup>8</sup> megohms.

SELF-CONTAINED VOLTAGE REGULATION.

ACCESSORIES—Supplied complete with all necessary cables.

### SPECIFICATIONS:

Size—7¼" x 10¾" x 12½". Finish—Baked crackle lacquer. Shipping Weight—25 lbs

MODEL 1108

## AUDIO FREQUENCY SIGNAL GENERATOR

Model 198

Designed to provide a laboratory standard audio frequency Signal Generator in a compact, portable and rugged instrument giving in three ranges audio frequency output from 20 to 20,000 cycles. The signal generator is of the resistance capacity type with automatic stabilization and degeneration.

RANGES: 20-200, 200-2000, and 2000-20,000 cycles.

OUTPUT POWER: 250 milliwatts.

OUTPUT IMPEDANCE: 10, 250, 500 and 5000 ohms.

IHM LEVEL: 60 DB below maximum output.

FREQUENCY CHARACTERISTICS: Plus or minus 1 DB, 60 to 20,000 cycles.

ACCURACY: 2% or 1 cycle.

### SPECIFICATIONS:

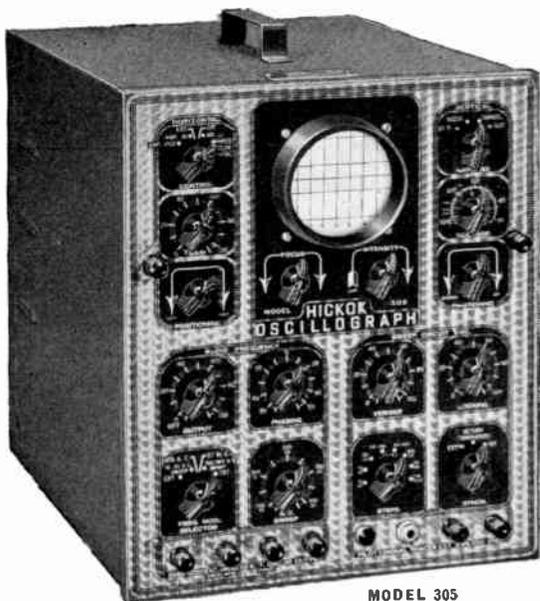

Power Supply: 105 to 120 volts, 50-60 cycles A.C. 35 Watts. Construction: Entire unit is ruggedly constructed in a steel cabinet with the main tuning dial and condenser mounted in ball bearings. Tube Complement: 1 Type 6X5GT, 1 Type 6SJ7, 1 Type 6V6, and 1 Type 6SN7. Weight: 17 lbs. Dimensions: 11¼" x 10¾" x 7".

MODEL 198

# TEST EQUIPMENT

MODEL 305

## CATHODE RAY OSCILLOGRAPH

Model 193

Designed for a small compact portable instrument for field and laboratory use where compactness and light weight are essential.

Type 3AP1 three-inch high vacuum electro statically deflected cathode ray tube. Accelerating Potential—1000 volts.  
 Input Impedance: Y axis—1 megohm—20 micro-microfarads—through amplifier. Y axis—3 megohms—20 micro-microfarads—direct. X axis—1 megohm—25 micro-microfarads—through amplifier. X axis—3 megohms—25 micro-microfarads—direct.

Amplifier Frequency Response: Y axis—sign wave response—uniform within 3DB from 10 cycles to 100 kilocycles. Y axis—amplifier gain—approximately 150. X axis—frequency response—uniform within 3 DB from 10 cycles to 100 kilocycles—sign waves. X axis—voltage gain—125.  
 Power Supply: 110-130 volts, 50-60 cycles, 50 watts. Size: 8½" wide, 13" high, 15¼" deep. Finish: Baked crackle lacquer. Shipping Weight: 30 lbs.

MODEL 125

## VACUUM TUBE VOLT OHM MILLIAMMETER

Model 125

Combines the desirable features of the vacuum tube voltmeter with other features of D.C. volts, ohms and milliamperes measurements found in Model 203. Electronic Volt-Ohm-Milliammeter. Has a wide application in laboratories as well as many radio service shops.

A.C. Voltage Ranges: 0-2.5-10-25-100-250. Frequency Characteristics: 60 cycles to 300 megacycles. Input impedance: 5 mmfd. shunted by 15 megohms.

D.C. Vacuum Tube Voltmeter—Ranges: 0-2.5-10-25-100-250-1,000 volts. Electronic Ohmmeter—Five ranges permitting measurements from .1 of one ohm to 1,000 megohms with no zero reset required when changing ranges.

SPECIFICATIONS: Size: 11" x 7" x 10". Cable Compartment: Supplied on the side of the case for all test leads and power cord. Power Supply: 100-130 volts, 50-60 cycles, 20 watts. Finish: Baked crackle lacquer. Shipping Weight: 23 lbs.

MODEL 203

MODEL 193

## ELECTRONIC A.C.-D.C. VOLT-OHM MILLIAMMETER

For Radio Service Shops and Laboratories

Model 203

A small, practical, compact universal test instrument for the radio shop and laboratory providing for A.C.-D.C. voltage measurements with extremely high input impedance permitting voltage measurements to be made without affecting the circuit under test. Also incorporated is an electronic ohmmeter permitting resistance measurements from .1 of one ohm to 1,000 megohms. A conventional milliammeter is also provided, giving in 3 ranges, measurements to one ampere.

### SPECIFICATIONS

Size: 7½" d. x 8" w. x 10½" h.  
 Shipping Weight: 14 lbs.  
 Finish: Baked crackle lacquer.

## OSCILLOGRAPH

Model 305

The One Oscilloscope Specifically Designed for Frequency Modulated—Amplitude Modulated and Television Servicing. For Complete Visual Analysis Self-contained Wide Band F.M. Oscillator, Narrow Band F.M. Oscillator, Demodulator, Video Amplifiers, Signal Tracer, Visual A.C. Vacuum Tube Voltmeter 0.2 to 1000 Volts.

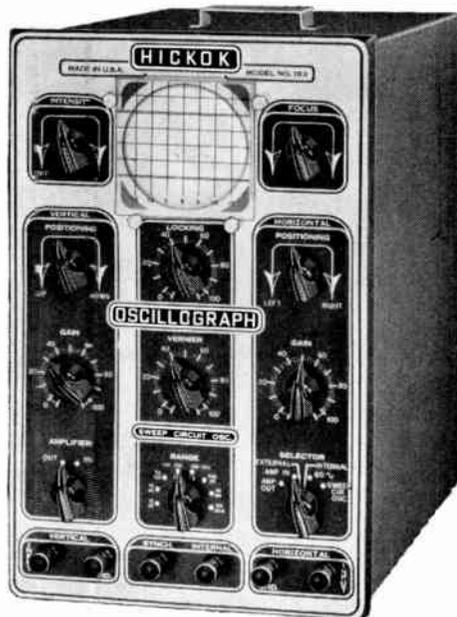

USE: This Oscilloscope in both R.F. and I.F. stages.

### ADDITIONAL IMPORTANT FEATURES

1. Return trace eliminator. 2. High sensitivity amplifiers (0.2 volts per inch). 3. Calibrated screen. 4. Video Amplifiers. 5. Variable width frequency modulated sweep. 6. Pilot light. 7. Phasing control.

### SPECIFICATIONS

Power Supply: 110-120 volts, 50-60 cycles. Size: 11" x 12" x 15¼". Finish: Baked crackle lacquer. Shipping Weight: 55 lbs.

# TEST EQUIPMENT

## VOLT-AMPERE WATTMETER

Model 900

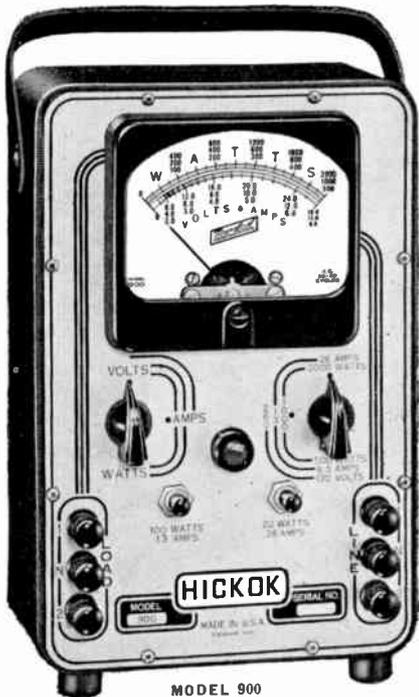

Electrical Appliance Tester and Circuit Analyzer. True to the Finest Hickok Tradition

For Measuring Actual Load Values of Volts, Amperes and Watts. Indicates: A.C. Watts: 0-20-100-500-1000-3000. A.C. Amperes: 0-1-3-6.5-13-26. A.C. Volts: 0-130-260. A.C. Milliamperes: 0-260. Scale is 3 3/4" long, clear and legible. The Model 900 Volt-Amp-Wattmeter has been designed for all A.C. appliance-testing, from bell transformers and clocks to electric ranges operating on the 220-volt three-wire Edison system. The extremely low range of 0-20 watts will measure the power consumed by the smallest of appliances and is protected from accidental overload by a fuse. For measuring electric ranges the Number 9A and 9B special leads are available with standard three-wire range connectors. It tests appliances while in actual operation, indicating wattage consumption, amperes, and line voltage.

Mounted in a durable pressed steel case with strap handle and rubber bumpers. The wear-proof metal panel has markings and designations permanently embossed. Detachable leads, for small appliances, are furnished. Test leads with prods also included.

Service men will find a wattmeter especially handy for checking all A.C. sets. Part No. C-105—This external current transformer is designed to give ranges of 5,000 and 10,000 watts and 65 and 130 amperes when used with Model 900. Part No. C-105 transformer may be installed in lead compartment of carrying case. When transformer and carrying case are ordered together, transformer will be installed before shipping.

Model 900—Size: 9 1/2" high, 6 1/4" wide, 3" deep. Shipping Weight: 8 1/2 lbs.

MODEL 900

Model 135 has completely interchangeable components including a plug-in rectifier unit. Supplied complete with batteries and test leads. The finest volt ohm milliammeter available.

**METER RANGES:**

D.C. Microamperes: 0-40-500.  
D.C. Milliamperes: 0-5-50-500.  
A.C. and D.C. Volts: 0-2.5-10-50-250-500-2500.

## LABORATORY QUALITY SET TESTER

Battery Operated  
High Sensitivity  
A Super-Sensitive Volt Ohm Milliammeter  
Model 135

25,000 ohms per volt.  
Built with precision. Measures with permanent accuracy.

MODEL 135

Resistance: 0-30-10,000-1 meg.-10 meg.  
Scales: —20 to plus 3, plus 15, plus 29, plus 43.  
Battery Tester: All popular sizes up to 135 volts.  
Net Weight: 6 lbs.

## VOLT OHM MILLIAMMETER

Model 134A

Because of the many overlapping ranges this is especially desirable in the laboratory. Black hand-engraved high dielectric bakelite panel. Supplied in pressed metal, black crackle enamel finish. Leatherette covered wooden carrying case. Complete with batteries and test leads. All ranges operated from self contained flashlight batteries.

RANGES: D.C. Volts: 0-1-2.5-5-10-25-50-100-250-500-1000. A.C. Volts: 0-1-2.5-5-10-25-50-100-250-500-1000. D.C. Milliamperes: 0-1-2.5-5-10-25-50-100-250-500. Resistance: 0-1,000-10,000-100,000-1 meg. Net Wt: 4 lbs.

## POCKET PORTABLE INSTRUMENTS

Models 480 and 481

MODEL 134A

Accuracy within 1%. Unshielded. D.C. Model 480. Scale length 3 3/4". Voltmeters, Millivoltmeters, Ammeters, Milliammeters, Microammeters and Volt-ammeters, A.C. Model 481. Scale length 3 3/4". Ammeters, Milliammeters, Voltmeters, Wattmeters—single phase. Mirror Scales, Knife Edge Pointers.

**DIMENSIONS:**

Length .....	6 3/4"	Depth .....	2 3/4"
Width .....	4 3/4"	Weight .....	3 lbs.

Cases, of molded bakelite, are furnished with slip hinges permitting the cover to be removed. The resistor compartment is separate from the meter movement. Model 480 and 481 pocket portables are designed for smallness and accuracy. They will easily slip into the pocket and their high accuracy enables them to be used in many testing and inspecting applications. Extensively used by the U. S. Signal Corps. All types have mirror scales, knife edge pointers and full open faces as illustrated. The movements are of the very highest quality. Direct current models have D'Arsonval movements, with high strength alloy magnets. Alternating current models have magnetic vane movements, but the A.C.-D.C. Wattmeters have electrodynamicometer movements. Direct current voltmeters have a resistance of 1000 ohms per volt. They are self-contained up to 1000 volts and are designed for continuous use at 1000 volts without temperature error. Direct current microammeters in this model have a sensitivity as low as 50, full scale. A.C. voltmeters are made self-contained up to and including 750 volts. Weight 3 lbs.

MODELS 480-481

# TEST EQUIPMENT

## VOLT OHM MILLIAMMETER

Model 4957 (Popular Model)

MODEL 4957

The most popular Volt Ohm Milliammeter built to highest Hickok standards. Rugged, high torque meter, guaranteed rectifier circuits, high accuracy.

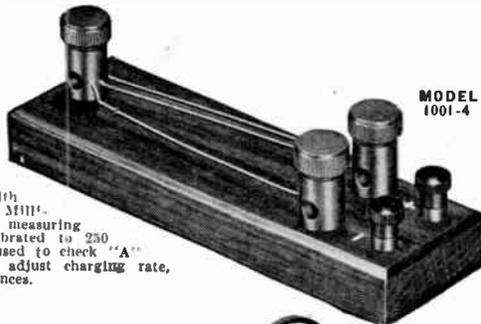

A.C.-D.C. voltage ranges at 1,000 ohms per volt. The 500 microampere range is calibrated to 250 millivolts for use with an external shunt for ampere measurements. The meter is a standard Hickok Model 848 with a basic sensitivity of 350 microamperes. The scale is printed in four colors. Ohmmeter operates from one No. 935 flashlight cell and one No. 751 4½ volt battery self-contained. External battery required for 10 megohm range. Supplied with self-contained batteries, test leads, and leather strap handle.

The instruments used in these Volt-Ohm-Milliammeters are especially built by Hickok for this service. The movement is large and rugged, and a very high torque-weight ratio gives lively, instantaneous pointer action. Large, open face dial. The movement is curve-corrected by an exclusive Hickok process which gives a higher accuracy at all points on the scale. Permanently correct calibration.

These are the finest Volt-Ohm-Milliammeters obtainable today. Regular leads supplied are 4" long with special insulated pin prods of proper diameter for insertion in the latest type tube socket.

## SHUNT

Model 1001-4

MODEL 1001-4

Two ranges, 0-5 amperes and 0-50 amperes. May be used with many of the models of Volt Ohm Milliammeters to increase the current measuring ranges. Shunt supplied is calibrated to 250 millivolts with leads. May be used to check "A" battery current of auto radios, adjust charging rate, service all types of D.C. appliances.

## JUMBO ZERO CURRENT SET TESTER

Model 211

MODEL 211

A Radio and Television Tester with Zero Current Voltmeter. A special bench tester—all components are fastened to the front panel. Tester may be removed from case and installed in any suitable location on your service bench. Meter is 9¼" wide, with a full open face and illuminated scale printed in four colors. Power consumed is measured directly on the 5 ampere A.C. scale of meter. THE ZERO CURRENT VOLTMETER: Infinite ohms per volt. Absolutely no current drain from the circuit under test. A.V.C., A.F.C., frequency modulated and any high resistance circuit voltages are accurately measured without disturbing operation of set. Size: Case 13" high by 16" wide by 7" deep. Finished in blue crackle enamel. Shipping weight: 35 lbs.

## JUMBO VOLT OHM MILLIAMMETER

Model 4923

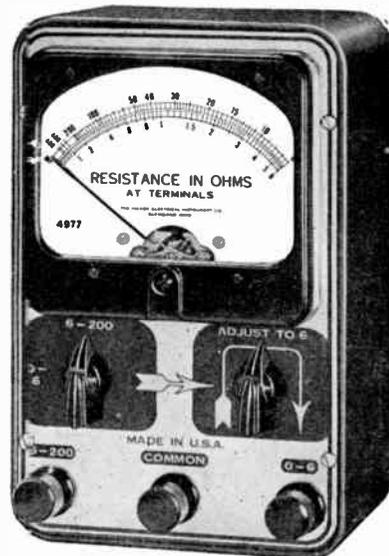

MODEL 4923

Large 9" open face meter. Designed for your service bench. Same circuit components as Model 4957 portable volt ohm milliammeter but equipped with a large meter and case for rapid bench testing

## ULTRA LOW RANGE OHMMETER

Model 4975-S

(An Exclusive HICKOK Development)  
Ranges: 0-6, 6-600

MODEL 4975-S

Note the special feature of the scale. It does not overlap as in most ohmmeters. Low range covers from 0-6 ohms, higher range starts from 6 and runs up to 600 ohms. This eliminates duplication of scale on the two ranges, and permits battery adjustment at logarithmic center of most accurate section of scale. Overall accuracy is approximately plus or minus one degree of scale deflection, the scale being 100 degrees. Change in battery voltage does not affect the accuracy. May be used for accurate measurements in any very low resistance circuit. An exclusive HICKOK development, thoroughly tested in service. This low range ohmmeter has proven useful in checking low resistance motor armatures and fields, ignition coil primaries and secondaries, voice coils and other low resistance windings. Size: 7¼" x 4¼" x 3½". Shipping weight: 5 lbs.

## SERIES 920 Combination Dynamic Mutual Conductance Type Tube Tester, Battery Tester and 33 Range A.C.-D.C. Multi-Range Set Tester

### AVAILABLE IN FOLLOWING MODELS

- \* 920-P—(illustrated) In hardwood, walnut finished portable case with tool compartment and hinged removable cover. Size 12 x 13 x 6". Complete with battery, test leads and operating instructions. Code: Drive. **NET PRICE \$65.95**
- \* 920-MCP—Open type Metal Case Portable, black ripple finish as illustrated for Series 912-MCP. Size 10½ x 12 x 6". Complete as above. Code: Dicer. **NET PRICE \$61.55**
- \* 920-PM—Consists of Series 920-MCP inserted into matching steel panel and dust cover. Panel size 12¼ x 19" for standard rack mount. Appearance same as illustrated for Series 912-PM. Unit removable from front for portable use. Code: Dream **NET PRICE \$65.95**
- \* 920-C—In modern, chrome trimmed, round cornered, counter type cabinet; black ripple finish on heavy gauge steel as illustrated for Series 912-C. Size 16 x 13½ x 7". Slopes to 3 inches at front. Complete, ready to operate. Code: Drake **NET PRICE \$65.95**

### TUBE AND BATTERY ANALYZING FEATURES

\* A DYNAMIC MUTUAL CONDUCTANCE TYPE TUBE TESTER employing an exclusive "PRECISION" engineered circuit, which in one operation, effectively tests all radio receiving tubes for both MUTUAL CONDUCTANCE and CATHODE STRUCTURE. \* TESTS ALL TUBE TYPES: FILAMENT VOLTAGES from 1.4 to 120 volts. LOKTALS, BANTAM JUNIOR AND BUTTON-7-PIN PORTABLE RADIO AND HEARING-AID BATTERY TYPES, SINGLE-ENDED, TELEVISION AND F. M. AMPLIFIERS, REGULAR OCTALS (MG, G, GT and METALS), SPRAY-SHIELD AND GLASS TYPES. \* AUTOMATIC PUSH-BUTTON SYSTEM: Flexibility for non-obsolete free point tube analysis. \* DUAL FREE-POINT FILAMENT TERMINAL SELECTION. \* VISIBLE FILAMENT CONTINUITY TESTS. \* SPECIFIC INDIVIDUAL LOADS AND VOLTAGES: APPLIED TO ELEMENTS OF TUBE UNDER TEST. \* VARYING A. C. SIGNAL applied to control grids. \* METER READS IN PLATE CIRCUIT: Indications entirely dependent upon control action (trans-conductance) of the intervening elements. Shows up tubes having open elements. \* Individual tests for each section of multi-section tubes. Visible tests of fluorescent screen and winking of cathode ray indicator tubes. \* HOT CATHODE LEAKAGE and INTER-ELEMENT SHORT TESTS. \* NOISE TEST pin jacks for earphone or amplifier connection. \* BALLAST TESTS: The regular tube test sockets accommodate all ballast units. \* PILOT LIGHT TESTS. \* DOUBLE WINDOW ROLLER TUBE CHART. \* MICRO-LINE ADJUSTMENT read directly on meter. No arbitrarily tapped transformer employed. \* TESTS ALL POPULAR RADIO A, B, AND C BATTERIES 1.5 to 135 volts, UNDER ACTUAL LOAD. Condition read on simple 3 colored REPLACE—WEAK—GOOD scale. A single selector switch automatically applies appropriate load for the particular battery under test. \* TELEPHONE CABLED WIRING EMPLOYED THROUGHOUT. \* ACCURACY of tube test circuit closely maintained by use of individual calibrating controls.

### SET ANALYZING FEATURES

- \* SIX A.C. and SIX D.C. VOLTAGE RANGES at 1000 ohms per volt: 0-12-60-300-600-1200-3000 volts. \* FIVE D.C. CURRENT RANGES: 0-1-2-12-120-600 MA., and 0-12 AMPS. \* FOUR SELF-CONTAINED RESISTANCE RANGES: 0 to 400 ohms, 0-100,000 ohms, 0-1-10 megs. \* SIX DECIBEL RANGES from -12 to +64 D.B. \* SIX OUTPUT RANGES: Same as A.C. volts. \* SIMPLIFIED MASTER ROTARY RANGE SELECTOR SYSTEM. \* LARGE 4½" EASY READING "PRECISION" 400 microampere METER. \* CONDENSER LEAKAGE TESTS. \* 1% WIRE-WOUND SHUNTS and MATCHED MULTIPLIERS employed throughout. \* ALL RANGES INDIVIDUALLY CALIBRATED within 2% D.C. and 3% A.C. overall accuracy.

## SERIES 910 and 912 Dynamic Mutual Conductance Type Tube Testers

The PRECISION Series 910 and 912 are Dynamic Mutual Conductance Type Tube Analyzers incorporating the same time-proven tube test circuit features described for Series 920, above. Series 910 makes use of an attractive 3" bakelite cased meter. Series 912 utilizes an extra large 4½" meter, and in addition also provides the full battery testing facilities described for Series 920. The physical appearance and overall dimensions of Series 910, 912 and 920 are the same. (See illustrations.)

- \* 910-P—(as illustrated for Series 920-P) In hardwood, walnut finished portable case. Size 12 x 13 x 6". Complete with operating instructions. Code: Front. **NET PRICE \$41.75**

- \* 910-MCP—Open type Metal Case Portable, as illustrated for 912-MCP, at right. Size 10½ x 12 x 6". Complete, ready to operate. Code: Frail **NET PRICE \$37.35**

- \* 910-C—In modern, chrome trimmed, round cornered counter type cabinet. Size 16 x 13½ x 7". Slopes to 3" at front, as illustrated at right, for Series 912-C. Code: Frisk. **NET PRICE \$41.75**

- \* 910-PM—Consists of Series 910-MCP, removably inserted into matching steel panel and dust cover. Panel size 12¼ x 19" for standard rack mount, as illustrated for 912-PM at right. Code: Fried. **NET PRICE \$41.75**

- \* 912-P—(as illustrated for Series 920-P) In hardwood, walnut finished portable case with tool compartment and hinged removable cover. Size 12 x 13 x 6". Complete with operating instructions. Code: Fence. **NET PRICE \$46.15**

- \* 912-MCP—Open type Metal Case Portable, black ripple finish, as illustrated at right. Size 10½ x 12 x 6". Complete, ready to operate. Code: Felon **NET PRICE \$41.75**

- \* 912-C—In modern, chrome trimmed, round cornered counter type cabinet. Black ripple finish on heavy gauge steel. Size 16 x 13½ x 7". Slopes to 3" at front. Complete, as illustrated at right. Code: Frame. **NET PRICE \$46.15**

- \* 912-PM—Consists of Series 912-MCP, removably inserted into matching steel panel and dust cover. Panel size 12¼ x 19" for standard rack mount. See illustration at right. Code: Fetid **NET PRICE \$46.15**

## SERIES 914

Modern Counter Type Tube & Battery Merchandiser employing a large 7" chrome trimmed SWIVEL MOUNTED METER

An economically priced, but nevertheless elaborate, attractively designed instrument, occupying a minimum of counter space. The 7" swivel mounted meter provides both customer and operator with a FULL VIEW of test results, regardless of cabinet position.

- \* A modern, streamlined, customer appealing tube merchandiser.
- \* Large, easy reading, 7" chrome trimmed bakelite cased meter.
- \* 3 colored—REPLACE—WEAK—GOOD SCALE with 0-100 division tube matching reference arc.
- \* Full vision double-window roller tube chart.
- \* Dynamic Mutual Conductance Tube testing and Battery test features, same as described for Series 920.
- \* 914 TUBE MERCHANDISER—Attractive, modern streamlined design with chrome trimming on fine dull black wrinkle-finished, heavy gauge cabinet. Separately enclosed meter, swivel mounted. Cabinet size 16" x 13½" x 7", slopes to 3" at front. Code: Handy. NET PRICE \$50.55

## SERIES 954

Combination Dynamic Mutual Conductance Type Tube Tester, Battery Tester and 37 Range Super-Sensitive A.C.-D.C. Multi-Range Set Tester 20,000 OHMS PER VOLT DC

A complete service laboratory: one compact unit, provides every facility for accurate, reliable solutions of all tube test and measurement problems of Radio (A.M. and F.M.), and Television.

### TUBE AND BATTERY ANALYZING FEATURES

\* Same as Dynamic Mutual Conductance tube test circuit described for the Series 920.

### SET ANALYZING FEATURES

\* SEVEN AC and SEVEN DC VOLTAGE RANGES: 0-3 to 0-6000 volts. 20,000 ohms/volt DC—1000 ohms/volt AC. \* SEVEN DC CURRENT RANGES. 0-60 microamps to 0-12 AMPS. \* SELF-POWERED RESISTANCE RANGES to 60 MEGOHMS. \* SIX DECIBEL RANGES: —12 to +70 DB. \* SEVEN OUTPUT RANGES to 6000 volts. \* 45/8"—50 microampere bakelite cased meter.

\* 954P—(illustrated) In hardwood portable walnut finish case; removable cover and tool compartment. Size 12" x 13" x 6". Complete with batteries and extra-high voltage test leads. Code: Happy. NET PRICE \$81.35

The Series 954 is also available in the same additional types of housings described for the Series 920.

\* 954MCP—Open type portable—complete with batteries and high voltage test leads. Code: Horse. NET PRICE \$76.95

\* 954C—Counter type—complete with batteries and high voltage test leads. Code: Human. NET PRICE \$81.35

\* 954PM—Standard Panel Mount—complete with batteries and high voltage test leads. Code: Hermit. NET PRICE \$81.35

## SERIES 832-A

31 Range A.C.-D.C. Multi-Range Tester

Though small in size, Series 832-A incorporates the same full-bodied electrical components provided in all larger "Precision" multi-range instruments. Meter scale-plate design is in Black, Red and White with large sized numerals, for maximum ease of reading.

### SPECIFICATIONS

- \* 6 D.C. voltage ranges—1000 ohms/volt 0-6-30-150-300-600-1200 volts.
- \* 6 A.C. voltage ranges—500 ohms/volt 0-12-60-300-600-1200 2400 volts.
- \* 4 D.C. current ranges—0-1.2 to 0-600 Milliamps.
- \* 3 Resistance ranges to 5 MEGS. Up to 500,000 ohms on internal battery.
- \* 6 Decibel ranges (—10 to +62DB).
- \* 6 Output ranges to 2400 volts.
- \* Wire-wound shunts, metallized multipliers—1% tolerance.
- \* A PRECISION instrument designed to withstand the abuse and punishment of rough service.

\* 832-A—In hardwood walnut finished case (7" x 4½" x 3") with leather handle, complete with batteries (less test leads). Code: Anvil. NET PRICE \$18.65

## SERIES 834

31 Range A.C.-D.C. Circuit Tester

1000 OHMS PER VOLT A.C. AND D.C.

The Series 834 is an advanced and highly practical improvement in compact, A.C.-D.C. multi-range circuit testers. Simplified rotary selection allows all measurements from ONLY TWO tip jacks (except 1200 and 6000 volts). An extra large 3¼" 400 Microampere meter provides Scale Length and Ease of Reading not usually associated with compact instruments.

### SPECIFICATIONS

- \* 6 D.C. and 6 A.C. voltage ranges—1000 ohms/volt: 0-12-60-300-600-1200-6000 volts.
- \* 4 D.C. Current Ranges: 0-1.2-12-60-600 milliamperes.
- \* 3 Resistance Ranges: Batteries fit inside of case. 0-5000-500,000-5,000,000 ohms.
- \* 6 Decibel Ranges: from —10 to +70 DB.
- \* 6 Output Ranges: at 1000 ohms per volt. 0-12-60-300-600-1200-6000 volts.
- \* 1% wire wound shunts and matched metallized multipliers.
- \* Each instrument individually calibrated: 2% D.C. and 3% A.C. overall accuracy.

\* Series 834—In hardwood, walnut finished case with leather handle. Size 7 x 4½ x 3". Complete with 3 volt battery (less test leads). Code: Labor. NET PRICE \$21.95

## SERIES 844

34 Range A.C.-D.C. Volt-Ohm-Decibel-Milliammeter  
6000 volts A.C. and D.C., 10 megohms, and 12 amps.  
1000 OHMS PER VOLT A.C. & D.C.

The Series 844 is an excellent general purpose A.C.-D.C. multi-range tester, invaluable to laboratory, industrial, serviceman and engineer. Ruggedly constructed, it will maintain its initially high degree of accuracy under constant usage and handling.

\* 844L—(illustrated) Housed in walnut finished hardwood open type case with carrying handle. Compact in size 7" x 8" x 4". Code: Manse, NET PRICE (Less batteries and test leads)

**\$27.45**

### SPECIFICATIONS

- \* SIX A.C. and SIX D.C. VOLTAGE RANGES at 1000 ohms per volt: 0-12; 0-60; 0-300; 0-600; 0-1200; 0-6000 volts.
- \* SIX D.C. CURRENT RANGES: 0-1.2 MA to C-12 AMPERES.
- \* FOUR RESISTANCE RANGES: Batteries mount inside of case. 0-400; 0-100,000 ohms; 0-1 meg.; and 0-10 megs.
- \* SIX DECIBEL RANGES from -12 to +70DB.
- \* SIX OUTPUT RANGES: 0-12 to 0-6000 volts.
- \* Large 4 5/8" 400 microampere bakelite cased meter.
- \* All instruments individually calibrated and sealed against laboratory standards assuring 2% D.C. and 3% A.C. overall accuracy. Complete telephone cabling employed.

\* 844P—In closed type portable case. Code: Malad. NET PRICE (Less batteries and test leads)

**\$29.65**

\* 844PM—In standard panel mount. 19" x 12 1/4". Code: Maize. NET PRICE (Less batteries and test leads)

**\$30.75**

## SERIES 845

41 RANGE HIGH SENSITIVITY A.C.-D.C. TESTER  
RANGES TO 6000 VOLTS, 20 MEGS., AND 12 AMPS.  
5000 OHMS PER VOLT D.C.  
1000 OHMS/VOLT D.C. 1000 OHMS/VOLT A.C.

Series 845 is a reliable, highly accurate, multi-range tester of moderate sensitivity for more accurate measurements in sensitive communications and electronic apparatus. Its dual-sensitivity feature, suits Series 845 to the requirements of laboratory, maintenance and production testing.

\* 845L—(illustrated) Housed in walnut finished hardwood open type case with carrying handle. Compact in size 7" x 8" x 4". Code: Isben, NET PRICE (Less batteries and test leads)

**\$31.85**

### SPECIFICATIONS

- \* 6 D.C. voltage ranges at 5000 ohms per volt: 0-12; 0-60; 0-300; 0-600; 0-1200; 0-6000 volts.
- \* 6 A.C. and 6 D.C. voltage ranges at 1000 ohms per volt: 0-12-60-300-600-1200-6000 volts.
- \* 7 D.C. current ranges: 0-300 Microamps. 0-1.2-12-60-300-1200 MA and 0-12 Amps.
- \* 4 Resistance Ranges: Batteries mount inside of case. 0-2000-200,000 ohms. 0-2-20 megohms.
- \* 6 Decibel Ranges from -12 to +70 DB.
- \* 6 Output Ranges: same as A.C. voltage ranges.
- \* Large 4 5/8" 200 microampere, easy reading bakelite cased meter.
- \* 1% wire-wound shunts and matched multipliers, plus individual instrument calibration assures 2% D.C. and 3% A.C. overall accuracy.

\* 845P—In closed type portable case. Code: Icing. NET PRICE (Less batteries and test leads)

**\$34.05**

\* 845PM—In standard panel mount. 19" x 12 1/4". Code: Ideal. NET PRICE (Less batteries and test leads)

**\$35.15**

## SERIES 856

44 RANGE SUPER-SENSITIVE A.C.-D.C. TESTER.  
6000 VOLTS, 40 μAMPS., 12 AMPS., 60 MEGS.  
20,000 OHMS PER VOLT D.C.  
1000 OHMS/VOLT D.C. 1000 OHMS/VOLT A.C.

The Series 856 is specifically designed for obtaining reliable measurements in modern communication and electronic circuits where only minute current drain of the measuring instrument can be tolerated.

The DUAL SENSITIVITY FEATURE doubles its utility, providing the equivalent of ANOTHER COMPLETE INSTRUMENT for measurements at standard 1000 OHMS PER VOLT sensitivity.

### SPECIFICATIONS

- \* SEVEN D.C. VOLTAGE RANGES: 20,000 ohms/volt: 0-3; 0-12; 0-60; 0-300; 0-600; 0-1200; 0-6000 volts.
- \* SEVEN A.C. and SEVEN D.C. VOLTAGE RANGES: 1,000 ohms/volt: 0-3-12-60-300-600-1200-6000 volts.
- \* SEVEN D.C. CURRENT RANGES: 0-60, 0-300 microamps: 0-3, 30, 120, 600 MA; 0-12 AMPS.
- \* SEVEN D.C. CURRENT RANGES: 2% accuracy: 0-60, 0-300 microamps: 0-3, 30, 120, 600 MA; 0-12 AMPS.
- \* THREE RESISTANCE RANGES: Self-contained batteries: 0-6000, 0-600,000 ohms, 0-60 megohms.
- \* SIX DECIBEL RANGES FROM -12 to +70DB.
- \* SEVEN OUTPUT RANGES: 0-3-12-60-300-600-1200-6000 volts.
- \* Large 50 microampere 4 5/8" bakelite-cased meter.
- \* WIRE-WOUND SHUNTS, METALLIZED MULTIPLIERS—1% ACCURACY.

\* All ranges individually calibrated to within 2% D.C. and 3% A.C. overall accuracy.

\* Wax-impregnated telephone cabling and XXX bakelite mounting strips employed throughout.

\* 856P—(illustrated) In attractive walnut finished hardwood portable case with removable cover and tool compartment. Size 9" x 10" x 6". Code: Jatop, NET PRICE (Complete with batteries and high voltage test leads)

**\$43.95**

The Series 856 is also available in the same type of mountings and combinations described for Series 844.

**\$45.05**

## SERIES 864

A.C.-D.C. VOLT - OHM - DECIBEL - MILLIAMMETER  
A Laboratory Multi-Range Tester Incorporating a Large 9" Meter and Remote Control Selector Unit

\* 864—In standard panel mount finished in black ripple. Size 19" x 12 1/4" with dust cover 6 inches deep. Code: Kapok, NET PRICE (Complete with batteries and high voltage test leads) —

**\$50.55**

### ELECTRICAL SPECIFICATIONS SAME AS SERIES 845

Conforming electrically to all specifications of Series 845 (adjacent), Series 864 Deluxe Multi-Range Tester is housed in standard 12 1/4 x 19" panel with completely enclosed rear dust cover, and is designed to mount into any standard relay rack. The separately encased Selector Unit is easily slid out from its panel compartment for remote bench operation. A seven foot flexible cord, permanently connecting meter to Remote Selector Unit, allows complete freedom of manipulation.

The 9" Precision Rectangular 200 Microampere Meter with large easy reading scales and numerals, allows highly accurate readings with greatest ease and minimum eye strain.

This instrument is an indispensable adjunct to the modern laboratory for radio service, industrial and television application and wherever operator efficiency is at a premium.

## SERIES EV-10

A NEW TYPE OF VACUUM TUBE MULTI-RANGE METER with Ranges to 6000 Volts A.C. and D.C. 2000 Megs. — 12 Amps. — 70 DB.

**PERFORMANCE, ACCURACY, EASE OF MANIPULATION**—Series EV-10 provides eight distinct instruments for most all measurements in the present and future electronics and communications fields. Combining both VTVM as well as standard 1000 ohms per volt test circuits, Series EV-10 permits rapid check of all voltage, current, and resistances encountered in television, photo-electric, F.M. networks, etc., without disturbing operation of circuit under analysis.

### IMPORTANT FEATURES

- \* VOLTAGE REGULATED—BRIDGE TYPE CIRCUIT: provides unusually high VTVM accuracy. Uses one type 6C5, 6X5 and VR-150.
- \* ZERO-CENTER VTVM—READS voltage at any test point WITHOUT reversal of test prods.
- \* SINGLE MASTER RANGE SELECTOR—Provides rapid, positive selection of all ranges.
- \* SHIELDED COAXIAL TEST PROBES—permit direct voltage measurements without disrupting apparatus under test.
- \* DUO-BALANCED ELECTRONIC-BRIDGE OHMMETER—BOTH ends of ohmmeter scales are independently zero adjusted, providing high accuracy throughout scale length. A single OHMS scale serves for ALL ranges.
- \* 1% wire-wound shunts and matched multipliers plus telephone-cabled, wax-impregnated, wiring employed throughout.
- \* EACH INSTRUMENT INDIVIDUALLY CALIBRATED.
- \* FULL VISION 8½" RECTANGULAR 400 microampere METER.

### RANGES

- \* Eight Zero-Center Vacuum Tube Voltmeter Ranges—from ±3 to ±6000 volts D.C.—Input Resistance—13⅓—26⅔ and 133⅓ Megohms.
- \* Six Circuit Probing, Zero-Center, VTVM Ranges—from ±3 to ±600 volts D.C.
- \* Six Wide-Range Ohmmeter-Megohmmeter Ranges: 0-2000-200M ohms. 0-2-20-200-2000 Megohms.
- \* Eight A.C. and Eight D.C. Voltage Ranges at 1000 ohms per volt. 0-3-6-12-60-300-600-1200-6000 volts.
- \* Seven D.C. Current Ranges—0-600 Microamps: 0-3-12-60-300-1200 MA; 0-12 AMPS.
- \* Eight Output Ranges—0-3-6-12-60-300-600-1200-6000 volts.
- \* Eight Decibel Ranges—from -26 to +70 DB.
- \* EV-10-MCP—(illustrated) In black, ripple finished, heavy gauge steel case. Size 10½ x 12 x 6". Complete with tubes, battery and testing probes. Code: Place. NET PRICE \$54.95

\* EV-10-P—Complete as described above but in hardwood walnut finished portable case. Code: Phone. NET PRICE \$59.35

\* EV-10-PM—In standard panel mount. Code: Panel. NET PRICE \$59.35

## SERIES "J" Multi-Range A.C. Ammeter

THE PRECISION SERIES "J" is a rugged, portable, MULTI-RANGE A.C. AMMETER: with wide selection of ranges to meet the requirements of many fields of application from 25 cycles up.

### SPECIFICATIONS

Eight alternating current ranges: 0-300-600-1200 Milliamps. 0-3-6-12-30-60 AMPS. Internal heavy duty current transformer designed for 25 cycle operation and up. Heavy duty, brass, bakelite insulated, binding posts. Full vision, easy reading 4½" bakelite cased meter, Accuracy 2%.

\* Series J-P—(illustrated) In hardwood walnut finished carrying case, size 9 x 10 x 6". Code: Apple. NET PRICE \$24.15

\* Series J-L—In open face hardwood carrying case, size 7½ x 8½ x 4". Code: Atone. NET PRICE \$21.95

## SERIES E-200 SIGNAL GENERATOR

For All A.M., F.M. and Television Receivers, featuring "Servicing by Signal Substitution"

● Six Bands: 90 KC to 88 MC. ● Accuracy—Constancy of calibration: MAXIMUM of 1% DEVIATION on all bands, insured by use of the "PRECISION" developed "UNIT OSCILLATOR" construction. ENTIRE "UNIT OSCILLATOR" is SINGLE-POINT-MOUNTED, providing positive freedom from effects of mechanical shock, eliminating the need of costly, useless, single frequency reference crystals.

● LARGE FULL VISION 6½" INCH NO-GLARE DIAL: approx. 6 feet of direct reading deeply etched scales. Ball bearing planetary drive.

● 0-100 Point Vernier Scale and Twin Hair-Line Indicators: provide direct reading to one part in 1000 for critical laboratory usage.

● The Circuit—uses the new 6S7 in a highly stable E.C.O. circuit—Modulated in the buffer amplifier by a 6C5 400 cycle sine-wave audio oscillator. An 80 full-wave rectifier forms the basis of a hum-free D.C. supply. ● 400 Cycle Sine-Wave Audio Oscillator—Independently Controlled—provides both modulation and external audio signal of over 60 volts. ● DUAL CALIBRATED R.F. Attenuators—Separately shielded—provides direct R.F. gain measurement facilities and smooth stepless control.

● LOW LEAKAGE: complete shielding of all vital components, in addition to a heavy gauge etched panel and steel cabinet—Power transformer electro-statically shielded—A.C. line, choke-condenser filtered. ● SELF-SHIELDING COAXIAL OUTPUT CABLE and dual (LOW-HIGH) coaxial connectors with separate screw cap for elimination of leakage from unused terminal. ● Four Types of Signals—"Unmodulated R.F." "400 cycle Modulated R.F." "EXTERNALLY Modulated R.F." (frequency or amplitude) "400 cycle Audio Output."

● VARIABLE MODULATION CONTROL—0-100% modulation AT WILL—more than triples signal utility as against obsolete fixed modulation of only 30 or 40%. ● A.V.C. SUBSTITUTION SYSTEM—The Series E-200 fully overcomes serious alignment troubles arising from receiver A.V.C., by supplying ITS OWN A.V.C. VOLTAGE, controllable at the front of the panel from 0-50 volts. ● HAND CALIBRATION—Each instrument INDIVIDUALLY hand calibrated on all six bands. ● Fully licensed under patents of American Telephone & Telegraph Co. ● Not only an unsurpassed, efficient Signal Generator for purposes of alignment but SPECIFICALLY DESIGNED for "Servicing by Signal Substitution", the new modern Dynamic speed approach to receiver alignment and adjustment problems, described in a new 120 page illustrated text book.

● E-200—In black ripple heavy gauge steel case. Size 12" x 10½" x 6". Complete with FREE copy of "SERVICING BY SIGNAL SUBSTITUTION." Code: Trade. NET PRICE \$43.95

\* E-200PM—In standard panel mount. Code: Trace. NET PRICE \$48.35

## A.C.-D.C. INDUSTRIAL CIRCUIT TESTERS

Series 844-J—1000 OHMS per VOLT—42 RANGES NET PRICE \$53.85

Code: Miser

Series 845-J—5000 OHMS per VOLT—49 RANGES NET PRICE \$58.25

Code: Ignite

Series 856-J—20000 OHMS per VOLT—52 RANGES NET PRICE \$65.95

Code: Jason

(Series 856-J illustrated below in hardwood finished portable case with tool compartment and removable cover.) Size 11 x 15 x 6"

Ranges to 6000 Volts A.C.-D.C. ● 60 Amps A.C. ● 12 Amps D.C.

Precision INDUSTRIAL CIRCUIT TESTERS provide a practical solution to A.C.-D.C. circuit test and maintenance problems. Through matching design of Series "J" A.C. Ammeter, these wide-range Circuit Testers will meet your individual sensitivity requirements. Merely combine Series "J" with either Series 844, 845 or 856 and a universal A.C.-D.C. circuit tester is produced to YOUR SPECIFICATIONS, providing every desirable range of Series 844, 845 or 856, PLUS the full facilities of Series "J".

## VOLT-OHM-MILLIAMMETER

### Model PB-100

#### Measures:

- D. C. VOLTAGES TO 2500 Volts
- A. C. VOLTAGES TO 1000 Volts
- Resistance to 1 MEGOHM
- OUTPUT VOLTS TO 1000 Volts
- D. C. CURRENT TO 2.5 Amperes
- DECIBELS TO + 55 D. B.

#### Features:

- ★ Push Button Operation
- ★ Direct Reading
- ★ Housed in Portable Oak Cabinet
- ★ No External Source of Current Required

YOU NEED ONLY PUSH A BUTTON to select the service you want when using the Model PB-100. Speed is only one of the many advantages afforded by this truly versatile unit. A complete laboratory housed in a single cabinet, the model PB-100 is the ideal, all around instrument for making quick and accurate tests in the laboratory, shop or field.

#### Specifications:

6 D.C. VOLTAGE RANGES  
0 to 5/25/50/250/500/2500 Volts  
5 A.C. VOLTAGE RANGES  
0 to 10/50/100/500/1000 Volts  
5 OUTPUT METER RANGES  
0 to 10/50/100/500/1000 Volts

4 D.C. CURRENT RANGES:  
0 to 10/100/250 Ma. 0 to 2.5 Amp.  
3 RESISTANCE RANGES:  
0 to 10,000 Ohms, 0 to 100,000 Ohms, 0 to 1 Megohm  
3 DECIBEL RANGES:  
— 10 to + 15 D.B., 0 to + 35 D.B., + 30 to + 55 D.B.

Model PB-100 comes housed in a hand-rubbed Oak portable cabinet complete with cover, self contained battery, test leads and instructions.

Net Price **\$28.40**

All the Resistance Ranges, incidentally, operate on a standard 4 1/2 Volt battery so that no external source of current is required. A special compartment is provided in the carrying case for the battery which may be replaced without removing the front panel.

# SUPERIOR

# TEST EQUIPMENT

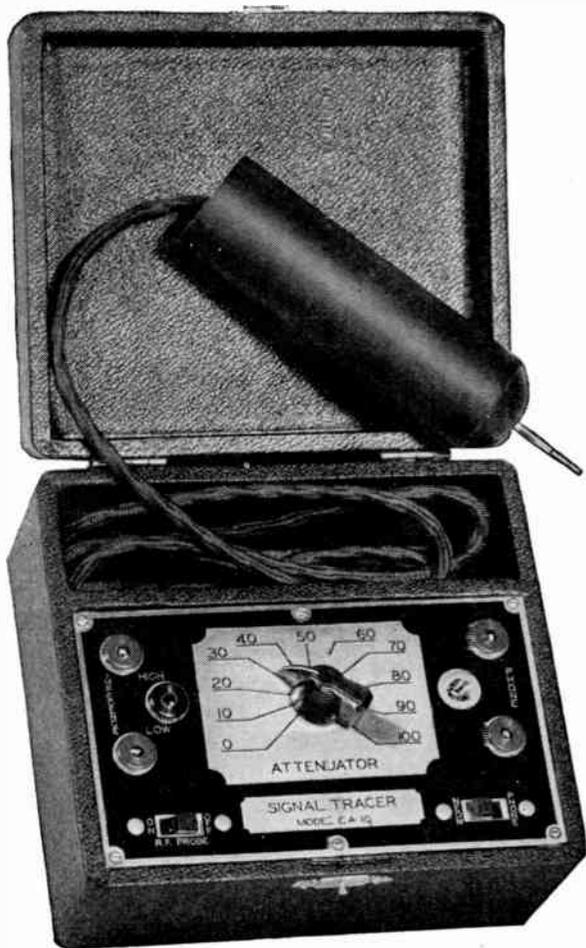

## Improved SIGNAL TRACER

### Model CA-10

COMPLETE WITH

## DETECTOR PROBE

FOLLOWS THE SIGNAL FROM  
THE ANTENNA TO SPEAKER  
OF ANY SET!!

Here at last housed in a single portable cabinet are combined all the components required for servicing by the well-established Signal Tracing Method. With the CA-10 the serviceman can follow the signal from antenna to speaker through each individual stage of any receiver ever made and use the signal itself as a basis of measurement to locate the cause of trouble. To be specific servicing by Signal Tracing involves isolating the faulty stage in a receiver and then proceeding to locate and repair the cause of trouble. The Model CA-10 enables you to quickly and conveniently do just that.

An unusual feature of the Model CA-10 never before included in signal Tracing Equipment is the special Detector Probe furnished with the unit. A 1T4 tube used in conjunction with an R.C. network comprises the complete assembly housed within the Probe itself. The Probe may be used on both R.F. and I.F. stages with negligible loading and is sufficiently sensitive to respond to a signal picked up by an antenna without amplification.

An impedance matching transformer, suitable for all audio stages both high impedance as encountered in plate and grid circuits or low impedance as found in speaker lines, is used in the Model CA-10. An attenuator control mounted on the front panel permits variation of the signal level. A neon lamp, also on the front panel, is used to compare the relative power and voltage of audio circuits. An ordinary single or double headset may be used to "listen in" when tracing for noise or distortion in either the R.F. or Audio Sections. Phone jacks are provided on the front panel for convenient insertion of phones and a front panel snap switch automatically cuts in the attenuator control for phones or the indicator lamp.

The Model CA-10 comes housed in a beautiful leatherette, portable carrying case, Detector Probe (complete with tube) furnished with unit. Size 7" x 6" x 4".

Net Price **\$14.85**

## PORTABLE INSTRUMENTS

From a background of over forty years pioneering in the field of precision electrical measurement, Roller-Smith offers today mass-produced instruments em-

bodily design refinements and construction advantages made possible only by long manufacturing experience.

### TYPE NP

**Size:** 8" x 8" x 5 1/2"

**Scale length:** 5 1/4"

**Accuracy:**  
1/3 of 1%

Designed for general use where a highly accurate and extremely rugged instrument is required, The case, made in two parts, has walnut exterior and an inner two-piece metal case which furnishes full magnetic shielding and protection from external strains, dust and moisture. The lid, when closed completely, covers the dial and all binding posts.

Type NP instruments are supplied to make the following measurements:

d-c		a-c	
Amperes	Amperes	Watts	
Milliamperes	Milliamperes	Power Factor	
Volts	Volts	Frequency	
Millivolts			

Available in single- and multi-ranges.

### "STEEL-SIX"

**Size:** 6" x 6" x 4"

**Scale length:** 5-3/16"

**Accuracy:** 1/2 of 1%

Designed primarily for general testing where accuracy and moderate price are required. The all-metal case is both dust and moisture proof and provides full magnetic shielding. Large window opening combined with well-designed dials results in a proportionally long scale and unusual readability. These instruments can be furnished to measure the same electrical units listed under Type NP.

### MULTI-TESTER MODEL 2014 . . .

**Size:** 9-9/16" x 9-9/16" x 5 1/8". **Scale length:** 3-5/16". **Accuracy:** ± 3% for a-c except 10 volt range, which is ± 5%.

Designed for the convenience and time-saving of multiple testing, the Multi-Tester is contained in a strong oak case with leather carrying strap. Space is available inside for test leads and small tools.

There are fourteen different ranges on the instrument which make possible the following measurements:

Volts	Direct Current (20,000 ohms per volt)		Alternating Current (1,000 ohms per volt)	
	Milliamperes	Ohms	Volts	
0-2.5	0-0.1	0-600	0-2.5	
0-10	0-10	0-60,000	0-10	
0-50	0-100	0-6 meg.	0-50	
0-250	0-500		0-250	
0-1000			0-1000	
0-5000			0-5000	

The tester is built around a rugged 4" 0-50 microammeter. Below one megohm, resistors are wire wound; wherever it is necessary to use composition resistors, an excessive voltage drop has been avoided. Heavy momentary overloads may be sustained without damage and there is practically no frequency error at commercial and lower audio frequencies. An output circuit blocks out superimposed d-c currents and a chart is provided to convert these readings into decibels.

## MINIATURE PANEL INSTRUMENTS

Built to high standards of precision and dependability, the Roller-Smith line consists of a full range of instruments from which you may select those that meet your requirements.

Dependable long life is assured by design and construction details. D-c mechanisms are of the moving coil (d'Arsonval type) with high-intensity permanent magnet which has soft iron pole pieces securely locked to the magnet. A-c mechanisms are of the repulsion iron vane type employing low loss iron and proportioned to give highest accuracy, permanency and low burdens. Mechanism is sturdily mounted with-

in case and will not loosen from shock or vibration. Pointers are extremely readable, light and strong. Dials are metal with a heat and humidity proof white surface which will not change color. Armatures, pivots, bearings and springs are especially developed and manufactured under precise control to assure a fine, dependable instrument.

Select the instruments you require from the following tabulation. Order simply by number in the "Type Designation" column. Only commonly used ranges are listed; any practical range can be supplied. Your correspondence is invited. Roller-Smith, Bethlehem, Pa.

### 3.5" INSTRUMENTS

## NEW . . . 1.5" D-C PANEL INSTRUMENTS

SIZE: 1.5"      SCALE LENGTH: 1"      ACCURACY: 2%

Small size line of d-c instruments for measurement of microamperes, milliamperes, amperes, millivolts and volts will soon be available. Write for information.

## VIBRATING REED FREQUENCY METERS

### PRINCIPLE OF OPERATION:

Meter consists of a series of spring steel reeds, attached to a reed mounting bar; an individual driving coil surrounding each bank of reeds; a permanent magnet; a series resistor; a central mounting frame; a case, dial, and base with terminal studs.

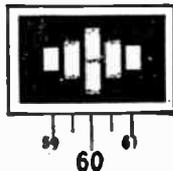

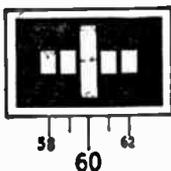

In operation, the alternating current (or interrupted direct current) excites the driving coil. As each reed is adjusted to respond by resonance to but one frequency, the one reed "in tune" with the frequency in the coils will respond by vibrating rapidly because of polarization by the permanent magnet, and induced magnetism from the coil. A series resistor adapts the instrument to specified operating voltage. The frequency of the current can be read opposite that reed on the graduated face of the instrument.

### ADVANTAGES:

Guaranteed accuracy of  $\pm 0.3\%$  or better, depending on the model. This percentage applies to each frequency being measured, and is not an overall percentage based on the maximum scale reading. All meters are permanently calibrated at the factory, and do not require subsequent adjustment. Accuracy is not affected by wave form, external magnetic fields or normal temperature changes.

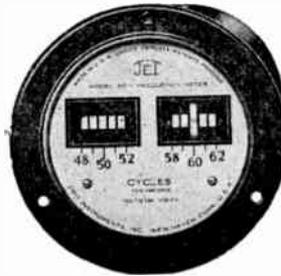

**Caution:** These meters, when plugged in on 60 cy. AC power line will not necessarily indicate a frequency of exactly 60 cycles. Trust your meter! All J-B-T Vibrating Reed Frequency Meters are meticulously calibrated at the factory, entirely independent of frequency of power supply, which may momentarily be off-frequency due to changing load conditions beyond the control of the Utility.

Built with no pivoted parts to wear out, and with lock washers at every critical point, these meters can take much rougher treatment than other types of instruments. They're rugged.

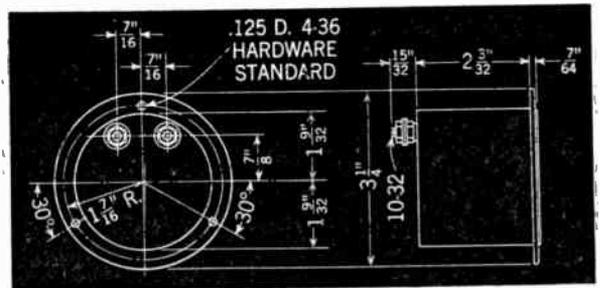

Some standard models are available in either half cycle or full cycle steps. In Column 1, two such meters are shown indicating a frequency of 60 cycles. In the half cycle instrument, the response is broad; in the full cycle instrument, the response is sharp. Both response patterns are extremely easy to read.

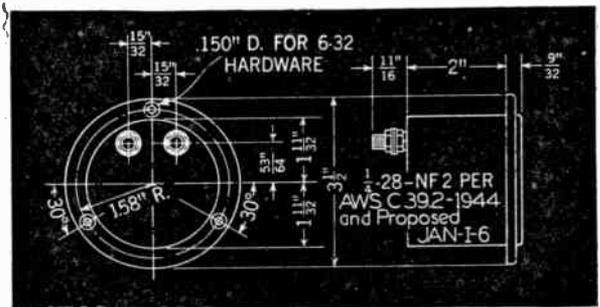

### MODEL 30-F

Range . . . 48 to 52 and 58 to 62 cycles. Double window for ease of reading frequency in either range. High fatigue safety factor and outstanding temperature stability. 100 - 150 volts; 130 ohms per volt; 1 watt power consumption. Flush panel mounting.  
 30-F, 48-52 and 58-62 cy., 3 1/4" metal case.....\$25.00  
 30-FX, 48-52 and 58-62 cy., 3 1/4" Molded Case, AWS mtg. ....\$25.00

Models 30-F, 31-F, 33-F, 34-F; Metal Case

Models 30-FX, 31-FX, 33-FX, 34-FX; Molded Case

### MODEL 31-F

Used in standby power equipment. Handy for accurately measuring frequency of power source. 5 reeds, 58 to 62 cycles. Other characteristics, same as Model 30-F.  
 31-F, 58-62 cy., 3 1/4" Metal Case. .... \$21.50  
 31-FX, 58-62 cy., 3 1/4" Molded Case, AWS mtg...\$21.50

### MODEL 34-FX

Model 34-FX. Used where a broader frequency band is desirable. 9 reeds, 56 to 64 cycles, or in half-cycle steps (accuracy  $\pm 0.2\%$ ) 58 to 62 cycles, 100-150 volts; 130 ohms per volt; 1 watt power consumption. Flush panel mounting.

- 34-F, 56-64 cy., 3 1/4" Metal Case. ....\$24.75
- 34-FX, 56-64 cy., 3 1/2" Molded Case. ....\$24.75
- 34-F, 58-62 cy., 3 1/4" Metal Case. ....\$26.25
- 34-FX, 58-62 cy., 3 1/2" Molded Case, AWS mtg. \$26.25

### MODEL 33-F

Model 33-F, (400 cycle). Used for measuring frequency of high-cycle power sources. Accuracy  $\pm 0.3\%$ . 9 reed, 380 to 420 cycle range. 100-130 volts; 70 ohms per volt; 1.75 watts power consumption. Flush panel mounting.

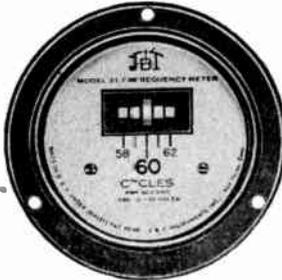

- 33-F, 380-420 cy., 3 1/4" Metal Case. ....\$31.00
- 33-FX, 380-420 cy., 3 1/2" Molded Case, AWS mtg. \$31.00

### MODEL 21-FX

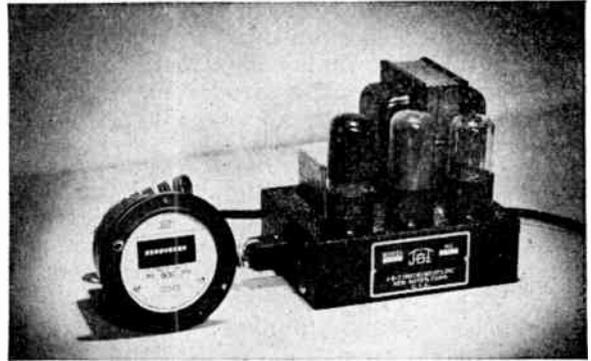

Model 21-FX. Smallest frequency meter manufactured. Meets ASA (AWS) C39.2-1944 in depth of case as well as in mounting dimensions and mounting hardware. Matches other 2 1/2 inch panel instruments. Weighs only 4 1/2 oz. 100-130 volts; 5 reeds; 58 to 62 cycles; 190 ohms per volt; 0.6 watt power consumption. Also 116 to 124 cy.; 160 ohms per volt; 0.7 watt power consumption. Flush panel mounting.

- 21-FX, 58-62 cy., 2 1/4" Molded Case. ....\$20.50
- 21-FX, 116-124 cy., 2 1/4" Molded Case, AWS mtg. \$23.00

## VACUUM TUBE FREQUENCY METERS

(Patents Pending)

Model 33-VTF with cover removed. Vacuum tube unit attaches to rear of panel, meter mounts flush.

### PRINCIPLES OF OPERATION:

J-B-I Models 33-VTF and 39-VTF Vacuum Tube Frequency Meters are designed to provide the maximum degree of accuracy in measuring frequencies located within definite bands. A special multi-vibrator circuit in the electronic unit divides the incoming frequency by two or three or even higher integers in special models and permits the use of a vibrating reed frequency meter in measuring the resultant frequency. The inherent accuracy and ruggedness of the vibrating reed instrument are thus used to full advantage in this combination.

### ADVANTAGES:

- **EXTREME ACCURACY**—Measurement within  $\pm 0.25\%$  for any indicated frequency.
- **PERMANENT ACCURACY**—Calibrated at factory—no subsequent calibration or standardization required at any time.
- **TEMPERATURE DRIFT ELIMINATED**—No initial stabilization period required.
- **BURN-OUT PROOF**—No protection needed against accidental frequencies above the range being measured.
- **FEW CONTROLS**—Requires no complicated controls for operation.
- **STABILITY OF CIRCUIT**—Accuracy of reading is independent of line voltage variation. No voltage regulator external or internal is required.

### PORTABLE FREQUENCY TESTERS

Model 33-FP-9. Handy, compact, portable instrument of exceptional accuracy even under poor wave form conditions, fluctuating voltage or external magnetic disturbances. Developed primarily to meet exacting test requirements of aviation and signal equipment. Treated against fungus and moisture. Housed in sturdy metal case 6" x 3 3/4" x 3 3/8". Hinged top compartment provided for the 4 foot leads which are supplied complete with sharp 5 inch insulated test picks and banana plugs. Electrical characteristics identical with 400 cycle 33-F.

- Model 34-FP-9 electrical characteristics identical with 60 cycle 34-F.
- 33-FP-9, 380-420 cy. ....\$38.00
- 34-FP-9, 56-64 cy. ....\$31.75

### MODEL 33-VTF, Field Type

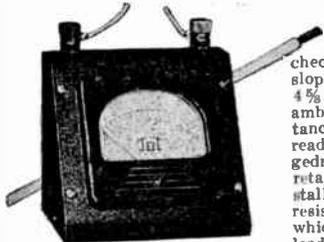

1. Frequency ranges: 380-420 cycles; 760-840 cycles; 1140-1260 cycles; available singly\* or in any combination. \*For single range 380-420 cycle meters, see Model 33-F.
2. Voltage range is 100 to 130 volts. Power to operate the units is obtained from an inverter or other source of frequency being measured.
3. Power consumption is approximately 20 watts. This model requires no power supply other than the source whose frequency is being checked.
4. Input impedance is approximately 650 ohms.
5. Tubes used: 1—6N7-GT/G multi-vibrator; 1—6V6-GT/G amplifier, and 1—6X5-GT/G rectifier.
6. Size: 4 5/8" x 5 1/2" x 6". Weight: approximately 6 pounds. Finish: black wrinkle. Unit is provided with three 1/4-28 vibration-proof nuts for either panel or bracket mounting. Frequency meters, standard 3 1/2" flush panel-mounting.
7. Connecting leads included are a 6 ft. power cord and 2 ft. leads between the electronic unit and frequency meter. They may be located any desired distance apart, however.
8. Model 33-VTF, Single range 760-840 cy. ....\$110.00  
Single range 1140-1260 cy. ....\$117.50  
Double range 760-840; 1140-1260 cy. ....\$125.00

### MODEL 39-VTF, Laboratory Type (not illustrated)

1. Frequency Ranges: Basic range, 380-420 cycles. Multiplier switch permits use in ranges of 2, 3, 4, 6 and 9 times the fundamental range.
2. Voltage range: 100-350 volts.
3. Power consumption: Approximately 25 watts at 115 volts. 60 cycles.
4. Input sensitivity: 500,000 ohms.
5. Tubes: 2—6N7 multi-vibrators, 1—6N7 input, 1—6J5 buffer, 1—6V6 amplifier, and 1—6X5 rectifier.
6. Size: Housed in cabinet 8" x 10" x 8" with sloping panel.
- 39-VTF, Series A ....\$257.00

## TEMPERATURE INDICATORS and GALVANOMETERS

For convenient, accurate indication of temperatures and small electrical quantities; for laboratory furnaces, inspection set-ups, checking heat rise of motors, transformers and coils; for remote indication of infra-red and other oven temperatures; and maintaining controlled industrial processes such as heat treating and annealing. When used with selector switch, permits centralized reading of one to ten thermocouples as in Diesel exhaust manifold applications.

**Model 32-J Pyrometer in T-210 Stand**, handy for quickly checking temperatures. Mounted in sloping front black metal stand  $4\frac{1}{2}'' \times 4'' \times 3\frac{1}{2}''$ . Compensated for ambient temperature. Medium resistance system, damped for quick reading on  $2\frac{3}{4}''$  scale, assures ruggedness and pointer stability. To retain the 1% accuracy of the installation: use only the type and resistance of thermocouple and lead which are provided; do not cut extra lead—coil it—change in length changes calibration. A protection

tube is not generally required. Many users find it convenient to keep an extra couple and lead on hand.

### Model 32J in T-210 Stand

- 0°—650° F with SA-91 thermocouple, SA-84 lead, and CB-1 connector block .....\$25.00
- 0°—1200° F with SA-87 thermocouple, SA-82 lead and CB-1 connector block .....\$25.00
- 0°—2000° F with SA-87 thermocouple, SA-82 lead and CB-1 connector block .....\$25.00

### Model 32J in T-211 Stand (not illustrated)

With 3 binding posts to accommodate flexible extra lead and thermocouple for hard to reach locations.

- 0°—650° F with SA-91 thermocouple, SA-84 lead, CB-1 connector block, and SA-86 flexible lead and thermocouple.....\$28.00

**Model 70-PO Portable Potentiometer-Pyrometer** for quickly measuring and following temperatures where permanent thermocouple installations are not available; for checking existing pyrometers, recorders or controllers; for laboratory checking of instruments and materials; and as temporary substitute for instruments being repaired or replaced.

New in principle, requires no standard cell and, on most ranges, once balanced and adjusted, this instrument follows temperature changes as they occur without further balancing. Accurate to  $\frac{1}{2}$  of 1% of total scale deflection. Withstands vibration well and is compensated for changes in ambient

temperatures from  $-40^\circ$  F. to  $120^\circ$  F. When ordering specify range.

- 70-PO — 0° - 600° F. for 1938 std. I-C thermocouples
- 70-PO — 0° - 1200° F. for C-A thermocouples
- 70-PO — 0° - 2000° F. for C-A thermocouples
- Price (without thermocouple or lead).....\$120.00

**Model 60-JPS**. This portable makes it easy to know temperatures at one to ten locations. Excellent for study of heat in various parts of same equipment; or in a battery of units. Knife-edge pointer, 5.6" scale. Heavy-duty thermocouple switch has average contact resistance of .00075 ohms or less. Automatically compensated for ambient temperature, indoors or outdoors. To retain accuracy of 1% full scale, use leads and thermocouples equal to resistance and e.m.f.-vs-temperature characteristics for which instrument is calibrated. Medium resistance system assures portability. Housed in natural-finish wood case  $11\frac{1}{2}'' \times 8\frac{1}{2}'' \times 4\frac{1}{2}''$  over rubber feet.

- A "must" for inspection, maintenance, and engineering.
- 60-JPS — 0° - 600° F. with SA-86, 7' thermocouple and lead for small apertures .....\$87.60
- 60-JPS — 0° - 1200° F. with SA-88 thermocouple and SA-82, 6' lead .....\$90.00
- 60-JPS — 0° - 2000° F. with SA-88 thermocouple and SA-82, 6' lead .....\$90.00
- 60-JP — For one thermocouple only; furnished with thermocouple and lead same as 60-JPS, but without selector switch.
- 0° - 600° F. ....\$62.60
- 60-JP — 0° - 1200° F. ....65.00
- 60-JP — 0° - 2000° F. ....65.00

Note: When ordering additional thermocouples, specify couples and leads as above. Centigrade equivalent scales available on order.

**Model 70-J Pyrometer**, for accurate reading at a distance, has full 6 inch scale and spade pointer, with accuracy of 1% of total scale deflection. Automatically compensated for ambient temperature. Molded case mounted in steel shielding shell  $7\frac{3}{4}'' \times 8\frac{1}{2}'' \times 1\frac{1}{2}''$ . Connections through bottom of case for wall or front-of-board mounting. When ordering, specify which standard scale range: 0° - 650° F. for 1938 std. I-C; 0° - 1200° F. for C-A; 0° - 2000° F. for C-A thermocouples.

Price, including 24" thermocouple and 26' lead.....\$55.00

**Model G-6, Laboratory Galvanometer**, double pivoted, moving coil construction, designed for high flux density, is an extremely sensitive yet rugged instrument. Lightweight  $4\frac{1}{2}''$  knife-edge pointer is easy to read against 30-0-30 scale with 1 mm. divisions. Short period and ability to withstand vibration make this instrument ideal for test and production conditions. Good zero stability. Current sensitivity 3.3 micro amperes per mm. division with 6 ohm DC coil—sensitivity higher with higher resistances. Case is handsome natural finished mahogany  $7\frac{1}{4}'' \times 4\frac{3}{4}'' \times 2\frac{1}{4}''$  with heavy phenolic panel. For best results, it is recommended that galvanometer and circuit resistances be reasonably matched. Resistances are indicated by model number. G-6, G-17, G-33, G-156, G-400, and G-950. Price, each.....\$24.50

## ACCESSORIES

### LEAD WIRES

To bring the reference junction within the pyrometer, compensating or extension lead wires should always be used. See the instrument dial for the kind of lead and combined resistance of lead and thermocouple. Standard leads include:

- SA-82 6' compensating lead for chromel-alumel couples; duplex, stranded; asbestos-insulated, cotton-braid impregnated with moisture-proof and flame-proof compound; terminals at instrument end; other end tinned for connector block.....\$1.40
- SA-83 26' compensating lead for chromel-alumel as above.....\$4.40
- SA-84 6' extension lead for iron-constantan, 1938 calibration; duplex; moisture-proof and flame-proof; prepared as above.....\$1.40
- SA-85 26' extension lead for iron-constantan, 1938 calibration; similar to above.....\$4.40
- SA-86 7' iron-constantan thermocouple and lead combined; twisted pair No. 20 Ga., asbestos-insulated—for intermittent use on 600° scales; terminals at instrument end; other end welded; resistance is not interchangeable with SA-84 and SA-85.....\$1.70

### THERMOCOUPLES

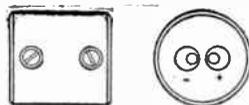

For pyrometers and leads above, J-B-T thermocouples are carefully selected, standardized, and tested.

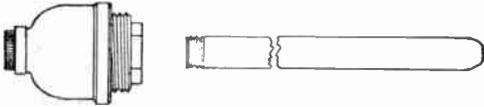

- SA-87 12" No. 14 Ga. chromel-alumel, 2-hole ceramic beads, fits  $\frac{1}{8}''$  hole, welded tip.....\$2.80
  - SA-88 same except 24" No. 14 Ga. ....\$3.50
  - SA-89 12" No. 8 Ga. chromel-alumel 2-hole ceramic beads, fits  $\frac{1}{8}''$  hole; welded tip.....\$2.80
  - SA-90 same except 24" No. 8 Ga. ....\$3.50
  - SA-91 12" No. 14 Ga. iron-constantan, 1938 calibration; 2-hole ceramic beads, fits  $\frac{1}{8}''$  hole; welded tip.....\$2.35
- Flexible thermocouple, 7' length, see SA-86 lead wire.

### CONNECTOR BLOCK

Model CB-1 Lava connector block, withstands high temperatures, accommodates all thermocouples up to No. 6 Ga. Heavy brass connectors keep contact resistance low. Can be used independent of connector head. \$1.25

## PYROMETER ACCESSORIES: CONNECTOR HEAD AND PROTECTION TUBES

Model CH-6. Connector head encloses connector block and rigidly supports the protection tube around thermocouple. Can be opened to inspect thermocouple without disconnecting circuit. Normally supplied with reducing bushing for 1/2" i.p.s. Composition bushing at top can be removed for permanent 1/2" conduit installation. Including block, \$2.00  
Tubes to protect and support "base-metal" thermocouples such as

above. Used in permanent installations at higher temperatures, or in damaging atmospheres. One end is closed, other end normally threaded for 1/2" i.p.s. Proper quality of tubing is very important.

- No. 1 Wrought Iron—For temperatures to 1200° F in oil baths, brazing units, and general intermittent duty
- |  |                                 |
|--|---------------------------------|
| TU-11 No. 1—12 inches...\$1.50   | TU-12 No. 1—24 inches...\$2.00  |
| No. 7 Alloy—27% chromium, iron; drilled tube; for cyanide pots, salt baths with cyanide, open fire with sulphurous content; to 2300° F.  |                                 |
| TU-5 No. 7—12 inches...\$5.00  | TU-6 No. 7—24 inches...\$12.00  |
| No. 9 Alloy—62% nickel, 13% chromium; seamless drawn; for salt baths without cyanide; for gas and oil open fire furnaces and general use, except sulphurous atmospheres; to 2300° F. |                                 |
| TU-2 No. 9—12 inches.....\$4.50  | TU-3 No. 9—24 inches.....\$8.00 |

## INSTRUMENT and TESTER SWITCHES

### Rotary Selector—Single and Multi-Gang—Non-Shorting

J-B-T Switches are a superior type used extensively in high quality test equipment, portable instruments, inspection set-ups, and experimental circuits. Available in two basic types—14 and 20 position—both non-shorting, the design gives extra contacts in minimum space. One to six decks.

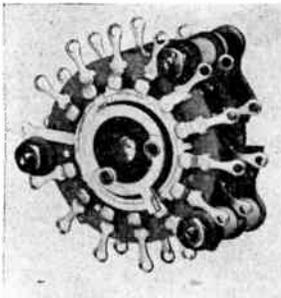

Features which now have approval under many exacting specifications in radio and electronic fields:

- Best Materials**—Special alloy spring, protected by new ball bearing contact, gives thousands of extra cycles. Heavy coin silver plating is used on contacts and moving parts. All parts plated to meet 200 hour salt spray test. Laminated plastic decks and rotors, selected for maximum mechanical and dielectric strength.
- Exceptional Compactness**—14 position switch takes 13 circuits

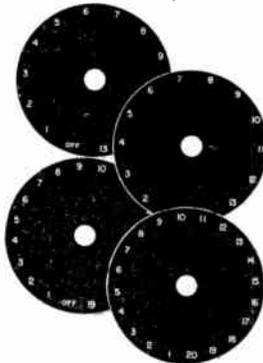

Mounting nut and knob supplied only on individually packed units—not on bulk orders unless specified. Collector arm placed directly opposite to flat on shaft unless otherwise specified. Contact lugs and common lugs positioned as shown, 13 contacts per deck. One to six decks; for each additional deck (or gang) add 5/16" to depth. Continuous rotation type supplied unless otherwise specified. Stop when required, may be

positioned as specified, and may be reversed for use as panel locator. Special stabilizing end ring used on switches with three or more decks.

- |         |                |
|---------|----------------|
| SS-14-1 | 1 deck \$1.35  |
| SS-14-2 | 2 decks \$1.55 |
| SS-14-3 | 3 decks \$1.85 |
| SS-14-4 | 4 decks \$2.35 |
| SS-14-6 | 6 decks \$3.35 |

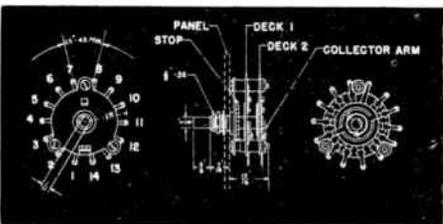

SS-14-2

SS-14 Series  
Etched Dial Plates  
SS-20 Series

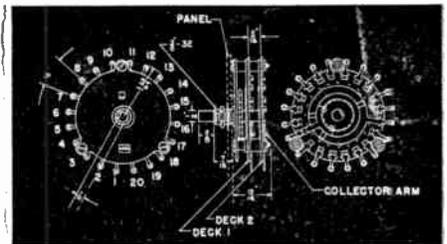

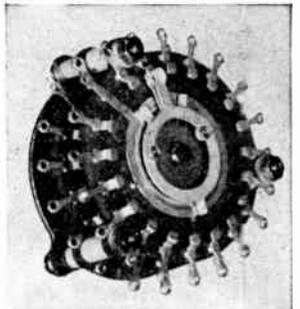

Bright raised numerals on black 2 3/4" dia. to accommodate knobs 2 1/4" and smaller. Designed for use with SS-14 and SS-20 switches.

- |       |                         |
|-------|-------------------------|
| EP-13 | Off thru 13 .....\$0.16 |
| EP-14 | 1 thru 14 .....\$0.16   |
| EP-19 | Off thru 19 .....\$0.16 |
| EP-20 | 1 thru 20 .....\$0.16   |

Mounting nut and knob supplied only on individually packed units—not on bulk orders unless specified. Collector arm placed directly opposite to flat on shaft unless otherwise specified. Contact lugs and common lug positioned as shown, 19 contacts per deck, continuous rotation type. One to six decks; for each additional deck or gang, add 5/16" to depth. Panel locator positioned as shown unless otherwise specified on bulk orders.

- |         |                |
|---------|----------------|
| SS-20-1 | 1 deck \$1.75  |
| SS-20-2 | 2 decks \$2.05 |
| SS-20-3 | 3 decks \$2.65 |
| SS-20-4 | 4 decks \$3.15 |
| SS-20-6 | 6 decks \$4.35 |

### OTHER J-B-T STANDARD PRODUCTS

AC voltmeters and ammeters are manufactured in 3 1/2" and 2 1/2" sizes for flush panel mounting, using basic Triplett designs. Model 331, 3 1/2" flange dia., molded case; Model 332, 3 1/2" flange dia., metal case; Model 231, 2 1/4" flange dia., molded case; Model 232, 2 1/4" flange dia., metal case. On special order, they can be made to AWS C39.2-1944 specifications such as MR35W150ACVV.

### OTHER J-B-T PRODUCTS

Portable volt-ohmmeters, temperature testers, micro-resistance thermometers and accessories, various vibrating reed tachometers and frequency testers, also mono-potentiometers will become standard products when civilian production is authorized.

Keep in Touch With Your Distributor.

### THE WHY OF "INDUSTRIAL INSTRUMENTS"

In the design of production test apparatus the aim of "Industrial Instruments" is to take basic laboratory technique and, using the tried and tested principles that are known to give high accuracy, adapt them to plant production use. In so doing the following goals are set and adhered to:

1. To retain the inherent accuracy and reliability of accepted laboratory circuits and techniques
2. To aim at modification toward simplicity so that the factory layman can use instruments without previous knowledge of them.
3. To increase the speed of readings for production use by utilizing basic laboratory circuits with novel adaptations.

Herewith listed are representative standard instruments. Other instruments are also available. Furthermore, special instruments can be designed and built.

### CAPACITY LIMIT BRIDGE

For high-speed production testing of capacitors and inductances for conformance with tolerance specifications. Negligible setup time, great flexibility, wide range, accuracy, extreme ruggedness, moderate cost. Normally supplied complete with Decade Capacitor Model DK-2AA providing capacitance standards in .001 mfd. steps from .001 to 1.11 mfd.

This is a modified Wheatstone Bridge with high and low limit dials. Two "magic eyes" provide high and low indications. Self-incorporated switch-operated relays provide speed test operation either from switch on panel or at test fixture.

Accuracy: Plus/minus 1% of standard. Unaffected by line voltage variations and tube characteristics. Range: Measures impedance at 60 cycles from 600 ohms to 2.6 megohms. Capacitors from .001 to 4 mfd. Inductors from 2 to 7000 henries. Limit dials continuously variable—any tolerance between 0 and 30% low, and 0 and 40% high. Speed: Up to 1000 capacitors per hour. Instantaneous readings—no needle to come to rest. Hardwood case. Sloping bakelite panel. 15 x 8 x 10" high.

MODEL LB-1-DK2AA Capacitance and Impedance Limit Bridge with Decade Capacitor covering range .001 mfd. to 1.11 mfd. in .001 steps. Wt. 20 lbs. net; 22 lbs., shipping..... \$180.00

MODEL LB-1 Capacitance and Impedance Limit Bridge alone for use with external standards. Wt. 14 lbs. net; 16 lbs., shipping..... \$105.00

MODEL TL-1 High-Speed Test Fixture for use with above. Wt. 7 lbs. net; 10 lbs., shipping..... \$20.00

### RESISTANCE LIMIT BRIDGE

For high-speed production testing. Features negligible setup time, great flexibility, wide range, accuracy, extreme ruggedness. Built-in D.C. source. Balance indicated by sensitive galvanometer. Normally supplied with Model DR-1 Resistance Decade providing resistance standard in 1000 ohm steps from 1000 to 999,999 ohms. Other ranges available.

This is a modified Wheatstone Bridge with high and low limit dials. Self-incorporated switch-operated relays for speedy test operation either from switch on panel or on test fixture. Used with external resistance standards, will check resistors between 1 ohm and 3 megohms. External batteries may be used for other voltages.

Accuracy: Model LB-2, guaranteed to plus/minus 1% of standard; Model LB-3, plus/minus .1%. Range: LB-2, from 1 ohm to 3 megohms. Limit dials continuously variable for any tolerance between 0 and 30% low, and 0 and 40% high. Model LB-3, same resistance range but limits from plus/minus 0 to 11% in .1% steps.

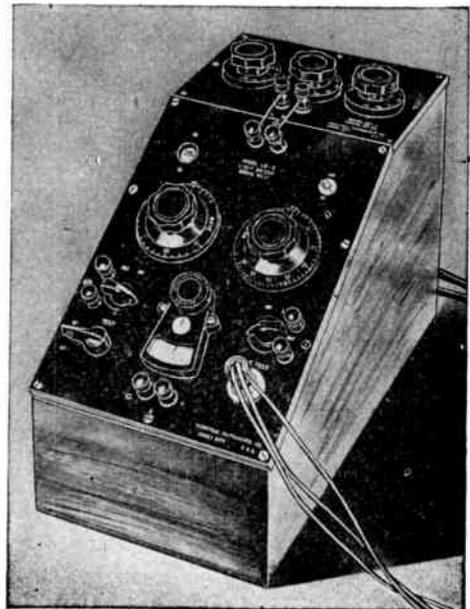

Hardwood case. Bakelite sloping panel. 15 x 8 x 10" high.

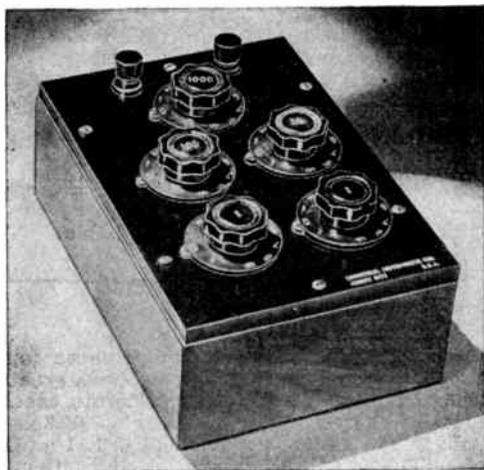

LB-2 DR-1 Resistance Limit Bridge with Resistance Decade, 1000 to 999,999 ohms, in 1000 ohm steps. Wt.: 19 lbs. net; 23 lbs. shipping ..... \$145.00

LB-2 Resistance Limit Bridge singly for use with external standards. Wt.: 12 lbs. net; 16 lbs. shipping ..... \$105.00

LB-3 Resistance Limit Bridge, with accuracy of plus/minus .1%, for use with external standards. Wt.: 12 lbs. net; 16 lbs. shipping..... \$150.00

DR-50 Resistance Decade, range .1 ohm to 9,999.9 ohms in .1 ohm steps. Accuracy .1%. Wt.: 5 lbs. net; shipping 8 lbs. .... \$55.00

### RESISTANCE DECADES

Standard models with resistance ranges of .9 to 999,999 ohms total. Individual units and combinations available for any effective range between .1 ohm and 1 megohm.

Manganin-wire bifilar-wound coils with exception of 10,000 ohms and above, which are nichrome wire non-inductively wound. Ceramic cores. Oven aged and dipped. Switches are self-cleaning type, with four-leaf phosphor-bronze spring wipers and detent mechanism for position location on switch points. All switches and resistors mounted below panel for protection.

**Accuracy:** Models DR-1 and DR-2 guaranteed to plus/minus 1% of nominal. Other models guaranteed to plus/minus .1% of nominal value and adjusted to .05% in manufacture, excepting values below 1 ohm which are guaranteed to plus/minus .25% of nominal. Zero resistance, .025 ohm or less.

Model	Total Ohmage	Decade Steps	Accuracy	Price
DR-1	999,000	9 x (1,000 + 10,000 + 100,000)	± 1%	\$ 40.00
DR-2	99,900	9 x (100 + 1,000 + 10,000)	± 1%	40.00
DR-3	9,990	9 x (10 + 100 + 1,000)	± .1%	35.00
DR-4	999	9 x (1 + 10 + 100)	± .1%	35.00
DR-10	.9	9 x .1	± .1%	16.00
DR-11	9	9 x 1	± .1%	16.00
DR-12	90	9 x 10	± .1%	16.00
DR-13	900	9 x 100	± .1%	16.00
DR-14	9,000	9 x 1,000	± .1%	18.00
DR-50	9,999.9	9 x (.1 + 1 + 100 + 1,000)	— .1%	55.00
DR-51	99,999	9 x (1 + 10 + 100 + 1,000 + 10,000)	— .1%	60.00
DR-52	999,990	9 x (10 + 100 + 1,000 + 10,000 + 100,000)	— .1%	100.00

DR-1 to DR-4: 5¾ x 8 x 4" high. Net wt. 4 lbs.; shipping, 6. DR-10 to DR-14: 4⅛ x 6 x 4" high. Net wt. 3 lbs.; shipping, 5. DR-50 to DR-52: 6⅞ x 9 x 4¼" high. Net wt. 5 lbs.; shipping, 7 lbs.

### WHEATSTONE BRIDGE

A sturdy, carefully engineered instrument for service in laboratory or plant. Entirely self-contained with galvanometer and 4½ volt battery. External galvanometer and batteries may be used if desired.

Both models have ratio dial settings of .001, .01, .1, 1, 10, 100 and 1000, as well as built-in resistance standards of 1, 10, 100 and 1000 ohm decades. Model RN-2 has both Murray and Varley loop circuits with additional multiplier steps on ratio dial for Murray loop. **Accuracy:** Ratios are guaranteed to .05% tolerance, and resistance dial resistors to .1% of nominal value.

Self-cleaning switches with four phosphor-bronze spring wipers and detent mechanism for position location on switch points. Switches and resistors mounted below panel for protection. Manganin-wire bifilar-wound coils on ceramic cores, oven aged and dipped, and finally adjusted to .05%. Galvanometer of well-known moving coil type. Pointer dial has fifteen 1 millimeter divisions each side of zero. Adjusting knob and safety clamp. Sensitivity of 1 microampere per millimeter. Hardwood case with slide-type hinges for removable cover. 9¼ x 7½ x 6¼" high.

**MODEL RN-1.** Standard Portable Wheatstone Bridge complete with batteries, ready to operate. Wt. 9 lbs. net; shipping, 12 lbs. \$90.00

**MODEL RN-2.** Standard Portable Wheatstone Bridge with Murray & Varley loops, complete with battery ready to operate. Wt. 9¼ lbs. net; shipping, 12¼ lbs. \$110.00

### VOLTAGE BREAKDOWN TESTERS

A simple, positive, safe and quick means of testing voltage breakdown of materials or components. Step-up transformer is accurately controlled by Variac. By an ingenious switching arrangement connected directly to Variac, varying resistance is placed in circuit to limit load to approximately 5 milliamperes over full range of Type P-1 (illustrated) for SAFETY. Also, safety switch makes power supply inoperative if chassis is removed from case.

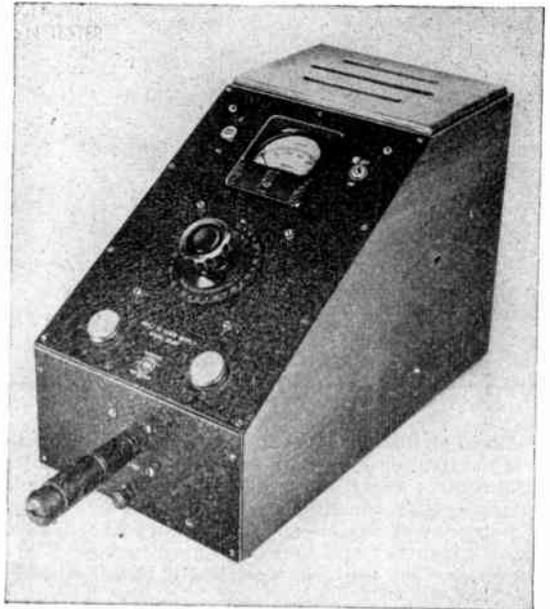

Operates directly on A.C. line. Green light indicates when instrument is operative. Red light flashes to indicate voltage breakdown of sample. Direct reading taken from meter.

**Range:** Type P-1 or small model (shown) continuously variable from 0 to 4000 volts D.C. Type P-2, similar to P-1, but has an A.C. high-potential outlet in addition to D.C. voltage. Model P-3 or large upright cabinet model (not shown) has range from 0 to 10,000 volts D.C., and A.C. outlet for 0 to 8000 volts, with short-circuit current limit of 50 milliamperes.

**MODEL P-1 Voltage Breakdown Tester**, complete with tubes, ready to operate. Hardwood case with sloping metal panel. 15 x 8 x 10". Wt. 29 lbs. net; 32 lbs. shipping. \$150.00

**MODEL P-2 Voltage Breakdown Tester**, complete with tubes, ready to operate, with added 0-3000 volts A.C. outlet. Hardwood case with sloping metal panel. 15 x 8 x 10" high. Wt. 29 lbs. net; 32 lbs. shipping..... \$200.00

**MODEL P-3 Voltage Breakdown Tester**, complete with tubes, ready to operate. Upright metal cabinet. 15 x 21 x 28" high. Wt. 150 lbs. net; 195 lbs. shipping..... \$350.00

### MEG OHM BRIDGE

A rapid, accurate instrument for routine insulation tests. Simple, compact, portable. Equally useful to laboratory and non-laboratory workers for accurate, instantaneous readings.

This instrument is an adaptation of the Wheatstone Bridge, utilizing the "magic eye" indicator in place of costly and delicate galvanometer. Operates entirely from A.C. power line. Self-contained D.C. supply. Unaffected by line voltage variations. When testing capacitors and high-capacity cables, it automatically charges the tested unit as soon as connected with test terminals, thus facilitating rapid testing.

**Accuracy:** Within 5% from 1 to 15 on scale, and as close as readabye on remainder of scale. Hardwood case with slip-hinge removable cover. Wt. 6¼ lbs. net; shipping, 8¼.

**MODEL MB-4.** 100 megohms to 100,000 megohms. 500 volt D.C. bridge source ..... \$60.00

**MODEL MB-6.** 100,000 ohms to 100 megohms; 10 megohms to 10,000 megohms ..... \$60.00

**BODEL MB-8.** 1 megohm to 1,000 megohms; 100 megohms to 100,000 megohms ..... \$75.00

**MODEL MB-11.** 1 megohm to 1,000 megohms; 10 megohms to 10,000 megohms; 100 megohms to 100,000 megohms..... \$120.00

### MEGOHM METER

For high-speed testing of capacitor leakage resistance, insulation resistance and insulation measurements in production and inspection of components. Extra charging terminals charge capacitors prior to test. Broad scale meter dial with wider than usual spacing at high end of scale.

Self-contained source applies voltage not exceeding 200. External battery voltage may be used up to 1000 volts. Internal checking standard enables operator to check and adjust calibration. Stability of operation, assured.

Accuracy: Within plus/minus 3% of full scale from infinity position on meter. Range: 1 megohm to 100,000 megohms on four multiplier ranges of 1, 10, 100 and 1,000. Highest range can be extended up to 500,000 meegohms by using external 1,000 volt D.C. supply.

Hardwood case. Sloping bakelite panel, 15 x 8 x 10" high. Wt. net 19 lbs.; shipping, 25.

MODEL L-2A Megohm Meter complete with tubes ready to operate ..... \$145.00

MODEL L-2AU Universal Model for use on 110-220 V. A.C. power line available on special order ..... \$160.00

### CAPACITY DECADES

Calibrated directly in capacitance so that reading from left to right, dial settings give exact value in microfarads. Progressive adjustments in small uniform steps by means of three dials rotating parallel switches.

Accuracy of Models DK-3, DK-4 and DK-2A adequate for most laboratory and industrial applications. Where closer tolerances are desired, Models DK-10 and DK-11 are recommended.

Hardwood cabinet. Bakelite top. DK-3, DK-4, DK-10 and DK-2A, 7 x 8 x 5½" high; DK-11, 11 x 8¼ x 7" high. Weight: DK-3, DK-4, DK-10 and DK-2A, net 8 lbs.; shipping, 10 lbs. DK-11, net 10 lbs.; shipping, 12 lbs.

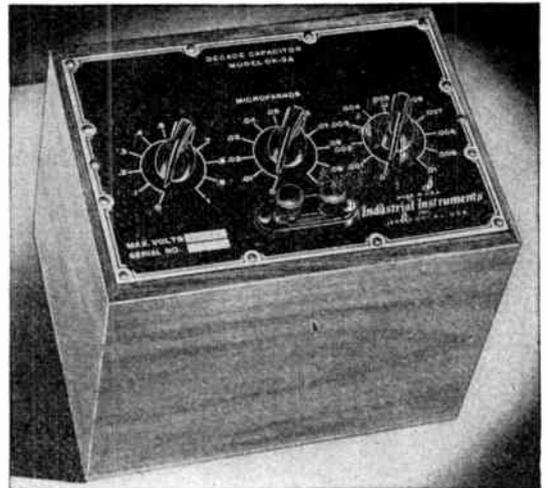

MODEL DK-3. 11.1 mfd. in .01 mfd. steps. 1% accuracy. Paper dielectric. 1% P.F. 150 D.C. Peak Volts..... \$40.00

MODEL DK-4. 1.11 mfd. in .001 mfd. steps. 1% accuracy. Paper and mica dielectric. 1% and .2 P.F. 150 and 700 D.C. Peak Volts..... \$40.00

MODEL DK-2A. 1.11 mfd. in .001 mfd. steps. 1% accuracy. Mica dielectric throughout, .2% P.F. 700 D.C. and 500 A.C. Peak Volts ..... \$75.00

MODEL DK-10. .111 mfd. in .001 mfd. steps. .5% or 10 mmfd. accuracy. Mica dielectric. .2% P.F. 700 D.C. and 500 A.C. Peak Volts..... \$100.00

MODEL DK-11. 11.1 mfd. in .01 mfd. steps. 1% and .5% accuracy. Paper and mica dielectric. 1% and .2% P.F. 150 D.C., 700 D.C. and 500 A.C. Peak Volts..... \$125.00

### DIRECT-READING COMPARISON BRIDGE

A.C. slidewire bridge with vacuum tube null indicator arranged so that resistors, capacitors or inductors can be compared with similar standard. Covers range of approximately plus/minus 50% of value of standard.

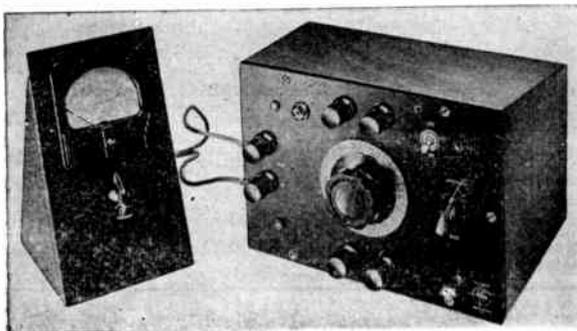

Designed specifically for rapid production testing where moderate accuracy is required. Since slidewire is uncalibrated, external standards are used. Resistors, capacitors or inductors under test are connected to "X" terminals, and rejected or passed by direct reading of meter. Components outside limits set up will result

in meter deflection greater than set value. Limits may be set for any combination of high and low values such as minus 5% plus 14%.

Range: Capacitance, between .0001 and 1.0 mfd. Resistance, between 2000 ohms and 20 megohms. Inductance, between 5 and 50,000 henries. Bridge source voltage, 75 volts at line frequency. Accuracy: Sensitivity and stability permit successful operation within limits set as close as plus/minus 5%, or as wide as plus/minus 50% of nominal.

Hardwood cabinet. 7 x 8 x 5½" high. Metal meter stand. Wt. 6 lbs. net; shipping, 8 lbs.

LB-10 Comparison Bridge, complete with tubes, milliammeter, and meter stand, ready to operate... \$60.00

# LITTELFUSE

"Quicker than a Short Circuit"

## AIRCRAFT LITTELFUSES — ANTI-VIBRATION TYPE

Especially designed for Aircraft Service. Characteristics: High Mechanical Strength—Resistance to Fatigue—Long Vibration Life

4 AG Aircraft Fuse showing reinforced twisted element. (Note clear label.)

Bakelite-enclosed 4 AB Fuse.

**CONSTRUCTION:** Glass-enclosed. Littelfuse Locked Cap Assembly (no cements) prevents loosening of caps. High visibility transparent label for amperage. Elements mechanically depolarized by twisting at 90° (see illustrations) are braced against extreme vibration. "Gooseneck" non-crystallizing fuse element takes up expansion and contraction. Ratings 5 amps. or less use Spring and Link. Service life six times simple wire. The 4 AG and 5 AG sizes are supplied for Aircraft Services for their strength and greater carrying capacity than 3 AG fuses.

**BAKELITE-ENCLOSED:** 4 AB and 5 AB fuses recommended where severe overloads might shatter glass.

**CURRENT RATING:** Rated to NEO specifications to carry 10% overload indefinitely, to blow on 35% overload within 1 hr., and 100% overload within 2 min.

**VOLTAGE RATING:** Voltage at which fuses will break without arcing over, or bursting under short circuit conditions.

**VIBRATION FACTOR:** Minimum hours these fuses endure our Magnetic Vibrator operating 120 cycles a second, while carrying the rated current. Acceleration is 10 times the worst field conditions.

4AG, 4AB, 5AG, 5AB FUSES Intermediate amperages furnished for 20% additional price			4AG FUSES 1 1/4" x 1/4" Dia. Unit wt.—3.5 Gms.			4AB FUSES 1 1/4" x 1/4" Dia. Unit wt.—3.75 Gms.			5AG FUSES 1 1/2" x 1/4" Dia. Unit wt.—8.5 Gms.			5AB FUSES 1 1/2" x 1/4" Dia. Unit wt.—9.0 Gms.

### 5AG BREAKERETTE

Breakerette mounted on panel in circuit

Breakerette removed from panel with shroud lowered for resetting

(Push Breaker Type)

Reset protection in breaker form, interchangeable with all 5 AG size fuses, or Navy "midget" size.

Rated at 3 to 50 amps., 32 volts AC or DC. Snap action break, capable of interrupting short circuits of 1000 amps., in ratings up to 5 amps.; and 2500 amps., in ratings over 5 amps. High time lag. Construction provides trip free, and non-trip free features. Only 2 moving parts. Extremely small and light. Case molded black bakelite. Extreme dimensions 1 3/8" long, 3/8" wide, overall height with trip shield, 1 1/4". Wgt. 15 to 18 gms. Fits into clips on 3/8" spacing or more.

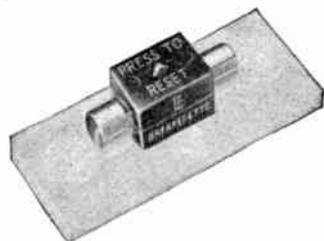

### NON-TRIP-FREE 3AG BREAKERETTE

Interchangeable with 3 AG and SFE 20 Amp. Fuses (1 1/4" x 1/4" dia.)

Reset protection in circuit breaker form (non-switching type), physically and electrically interchangeable with all 3 AG or SFE 20 amp Auto Fuses. Ranges: 1 amp to 20 amps.

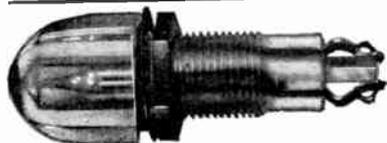

Maximum rating 12 volts; interrupting capacity 500 amperes. Can be used in place of fuses on existing installations, or mounted without fuse clips on new installations. For use in automobiles, trucks, airplanes, battery chargers, "A" battery eliminators, pin ball machines and coin operated machines.

Full details may be obtained from Littelfuse Incorporated, 200 Ong St., El Monte, California, or 4757 Ravenswood Ave., Chicago 40, Illinois. Address nearest office.

### PILOT LIGHT POST No. 201005 (591)

A signal indicating light for panel mounting. Completely enclosed in water-clear plastic. Built-in neon lamp and resistor. For use on 115 volts AC or DC. Maximum panel thickness 1 1/4". Extends 1/2" in front of panel. Overall size 5/8" x 5/8" x 2 3/8" long. Write for full details and prices.

# LITTELFUSE

"Quicker than a Short Circuit"

## 8AG INSTRUMENT high speed LITELFUSES

Locked Cap Assembly and other exclusive Littelfuse features for protection of delicate test equipment, galvanometers, microammeters, milliammeters, voltmeters, etc. Glass-enclosed; 1 x 1/4" dia., accurately rated, high speed action, short time lag. Voltage ratings up to 250 V., AC or DC. For higher voltages use fuses in series.

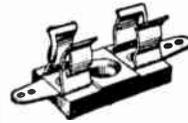

(\$100 protection guaranty against meter burnouts.)

## MOUNTINGS FOR 8AG LITELFUSES

### Single Pole

Cat. No. 381001 (1010)—Black bakelite base, 1 1/4" x 5/8". Overall length 1 7/8". Height 5/8". Tinned shakeproof terminals.

Phosphor bronze nickel-plated fuse clips. Mounting hole takes No. 8FHMS. Std. Pkg. 20. Wgt. 1/2 lb. List PRICE EA. \$0.15.

## METER BACK MOUNTING

Cat. No. 383002 (1059)—Mounts directly on meter binding post. Will not touch other posts on smallest standard meter. Linen bakelite base, 1" x 1 1/4". Length over screw terminal, 1 1/2". Std. Pkg. 20. Wgt. 1/2 lb. List Price Each.....\$0.20

## MOUNTINGS FOR 3AG LITELFUSES Hinged Cover Type

(Meets Underwriters Requirements)

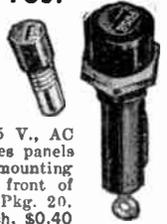

Cover fibre-lined. Metal shielded cover hinged to bakelite base. Terminal mounting extends through insulated base. Nut lightly staked to cover to prevent loss. Requires 1 1/2" x 1 1/4" knockout hole in panel. Two 6-32" x 1/2" mounting studs at 2 1/2" centers. Base 2 1/2" x 1 1/4". 3/8" high above panel. Std. Pkg. 20. List Price Each \$0.60  
351008 (1237A)—Double Pole .....\$0.60  
351005 (1379)—Single Pole ..... .30

## EXTRACTOR FUSE POST

Cat. No. 341001 (1075-S)

—Black bakelite panel mounting. To use, insert Littelfuse in knob and screw knob into post. Meets Underwriters Specifications. For 3 AG fuses, 10 amp. max., 125 V., AC or DC. Shock proof. Takes panels up to 1/8" thick, 1/4" mounting hole. Length 2 1/2" from front of panel, 2 1/2" overall. Std. Pkg. 20. Wgt. 1 lb. List Price Each, \$0.40

## Finger-Operated EXTRACTOR POST

Cat. No. 342001 (1075F) — Same as above, but finger operated. Std. Pkg. 20. Wgt. 1 lb.

List Price Each.....\$0.45

## POCKET TYPE NEON TESTER

Has built-in 200,000 ohm resistor. Will not blow up as ordinary test lamps. Uses 122-1 lamp. Tests for live lines, polarity, and whether AC or DC, RF, blown fuses, defective spark plugs, cables, etc. Indicates approximate voltage (110, 220, 440, etc.) grounded lines, open circuits or shorts. Full directions. Packed in a display card and in individual boxes.

No. 201002 (5076)

Cat. No.	Old Cat. No.	For Voltages	List Price Each
202002	5420	6 to 50 AC or DC	1.75
201002	5076	90 V DC 60 V AC to 500 V AC or DC	1.00

## UNDERWRITERS' APPROVED LITELFUSES

### 3 AG GLASS FUSES—250 Volts

Littelfuse is the first manufacturer to receive Underwriters' approval of 3 AG fuses (1 1/4" x 1/4" dia.) in current ratings over 3 amps. at 350 volts. Following list gives standard approved ratings carried in stock. However, the Underwriters' approval to Littelfuse is a blanket approval from 1/8 to 6 amps. Intermediate ratings can be furnished without separate approval, at a small extra charge. Littelfuse name, the amperage and voltage rating must appear on the fuse caps of approved fuses. Many new fields are opened up by the extension of approval from 3 to 6 amps., where formerly bulky cartridges or plug fuses and their mountings were used. This applies specially to electrical appliances, heavy duty power supplies, amplifiers, radios, communication equipment, electronic devices, motors, etc.

Rating up to 1/2 Ampere—250 Volts

Cat. No.	Old Cat. No.	Rating Amps.	Ohms	List Price Each
313010	1259	1/100	3000	\$0.30

Std. Pkg. 100; wt., 1 lb.

## CONSTRUCTION

Made in Littelfuse Slo-Blo construction.

A carbon pellet provides the heat inertia. (A) melts on short circuits. (A) separates from (B) on sustained overloads.

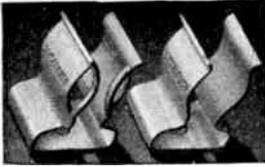

Littlefuses of this group are of the standard straight link type. Elements are rosin coated to prevent oxidation in service, and to promote a clean break on fusion.

This is the new Littelfuse "Sleeve Type" 3 AG fuse that made possible the higher approved ratings on this relatively small fuse. (Pat. Pend.) A separate glass sleeve over the entire fuse element takes the pressure shocks under short circuits. (On 8 ampere rating the sleeve is powder packed.)

For lower voltage types of television, bolometers, X-ray equipment, delicate instrument protection. Suitable for 3000 volts AC and 1000 volts DC. Especially well designed to protect delicate thermocouples of approximately their own rating, because of the low lag characteristics. Glass enclosed. 1 1/4" long x 9/32" dia.

# LITTELFUSE

"Quicker than a Short Circuit"

## LITTELFUSE BERYLLIUM COPPER AND PHOSPHOR BRONZE FUSE CLIPS

Littelfuse manufactures both Beryllium Copper and Phosphor Bronze Fuse Clips. Beryllium Copper, a new alloy, has spring qualities of steel. It has great resistance to corrosion and vibration. Littelfuse Phosphor Bronze Clips are made from a fine homogenous metal of high tensile strength, elasticity, resistance to fatigue, corrosion and wear. They are recommended where requirements are not so severe and price is a factor.

### LITTELFUSE BERYLLIUM COPPER FUSE CLIPS

Silver Plating Standard Finish (Standard Package: 100)

Cat. No.	Old Cat. No.	USE FOR	Height	Width	Fuse Dia.	Weight per 100 (Lbs.)	Weight Each GMS.	Shpg. Weight per 100 (Lbs.)	List Price per 100

Tensioned for Diameter of Fuse when mounted. . . . . Variations of these clips can be made to specifications. Silver Plated Phosphor Bronze Fuse Clips may be had on special order at slightly higher prices.

### LITTELFUSE SIGNALETTE (6, 12 or 28 Volts D.C.)

Interchangeable with Lamp  
Assembly AC42B3593

Cat. No. 1534—An entirely new signal indicator for aircraft and other purposes. Operates by reflected light—in daylight—at right time—by "black light"—and no light, by fluorescent radio-active luminescence. Activated by solenoid. When activated, "butterfly" opens instantly showing signal. Non-shatterable protection. No burn-outs as with lamps. No delicate parts to break from shock or explosion. No spare lamps required. Uses about 1/2 current of filament lamps. Reflecting member available in Red, Amber, Green or White. Made for 3 standard voltages: 6, 12 or 28 volts, D.C. Length overall 2 3/8", for mounting in panels up to 3/8" thickness. Unit Wgt. 45 Gms. Std. Pkg. 20. Weight 2 lbs.

PRICES ON REQUEST

### 3AG ECONOMICAL MOUNTING

Cat. No. 351003 (1128)  
—1 1/2" x 1/8" x 1/8".  
Bakelite mounting strip with 3/32" thick fibre insulator at bottom covering all metal parts. Permits mounting on metal panels. Mounting hole for No. 6 screw. Std. Pkg. 100. Wgt. 1 1/2 lbs. List Price Each.....\$0.10

### 3AG SINGLE POLE Open Type Mounting

Cat. No. 351001 (1060)—Bakelite base 1 1/2" x 1/2" x 1/8". Overall 2 1/8". Live parts space insulated. Shakeproof tinned terminals. Mounting hole for No. 6 RHMS. Std. Pkg. 20. Wgt. 1/2 lb. List Price Each.....\$0.15

### FUSE

#### RETAINER

Cat. No. 151003 (1070)—Holds 3 AG fuses. excellent for test leads or battery cable for auto sets. Cadmium plated. Bayonet lock end takes cable to 3/8" dia. Size 2 1/2" x 3/8" da. (Other sizes available.) Std. Pkg. 20. Wgt. 2 lbs. List Price Each.....\$0.10

#### MOULDED FUSE RETAINER

Same as above except in bakelite. Sturdy, light in weight. Std. Pkg. 20. Prices on request.

### MODERN Radio SERVICING

(1st Edition)

by

A. A. GHIRARDI

Ghirardi gives you a complete course in modern radio service work in this remarkable 1300-page textbook containing over 700 illustrations and 723 self-review questions. Everything explained for you clearly—from the very fundamentals of servicing instruments to the servicing of the most complicated all-wave high-fidelity receivers. There's even a chapter on sales promotion and radio service business management. 1300 pages of invaluable servicing information—written by this leading servicing authority—is yours for only five dollars! Here are the chapter headings:

- |                                    |   |
|------------------------------------|---|
| 1. Measuring Instruments.          | 19. Voltage-Current Set Analyzers.                            |
| 2. Resistance Measurement.         | 20. Resistance Analyzers.                                     |
| 3. Constructing Ohmmeters.         | 21. Tests for Individual Components.                          |
| 4. Commercial Ohmmeters.           | 22. Difficult, Obscure Troubles.                              |
| 5. Capacity and Condenser Testers. | 23. Aligning and Neutralizing T-R-F Receivers.                |
| 6. Output and V-T Voltmeters.      | 24. Allgning Superhets (Cathode-Ray).                         |
| 7. Tube Checkers.                  | 25. Repairing Individual Parts.                               |
| 8. Constructing Tube Checkers.     | 26. Auto-Radio Installation and Servicing.                    |
| 9. Commercial Tube Checkers.       | 27. All-Wave Receiver Servicing.                              |
| 10. Voltage-Current Set Analyzers. | 28. Marine Receiver Installation and Servicing.               |
| 11. Point-to-Point Testing.        | 29. Noise Elimination.  |
| 12. Constructing Set Analyzers.    | 30. High-Fidelity Receiver Problems.                          |
| 13. Commercial Set Analyzers.      | 31. How to Sell Your Service (Advertising and Merchandising). |
| 14. Service Test Oscillators.      |   |
| 15. Constructing Test Oscillators. |   |
| 16. Commercial Test Oscillators.   |   |
| 17. Preliminary Trouble Tests.     |   |
| 18. AVC and QAVC Circuits.         |   |

This is the most complete book on every phase of practical service work ever written—and YOU CAN'T AFFORD TO MISS IT!

OVER 1,300 PAGES . . . \$5.00

*It's New!*

Third  
Edition

### RADIO Trouble- Shooter's HANDBOOK by A. A. GHIRARDI

Brand new completely revised and greatly enlarged 3rd edition of a time-saving data Handbook that has become "standard equipment" in the shops of thousands of smart service men. It now contains 744 manual-size (8½ x 11) pages chock full of tabulated servicing data of all kinds arranged for immediate reference. All data is "factory checked," HANDY . . . COMPACT . . . EASY TO USE. Entirely different from anything you now have in your regular servicing manuals. Here are a few of the sections:

#### ★ OVER 4,800 "CASE HISTORIES"

Symptoms and remedies for the Common Troubles in over 4,800 different home and auto-radio receivers, and record changers. Compiled from actual service records of large servicing organizations. A real time-saver!

#### ★ OVER 20,800 I.-F. PEAKS

Up-to-date listings for all makes and models of superhets, old and new, including latest sets, and also instructions for aligning "orphan" sets.

744 PAGES (8½x11") . . . \$5.00

#### ★ AUTO-RADIO DATA

Ignition-System Interference Data for over 80 car models. Electrical Wiring Diagrams. Table of battery polarities, breaker-point gaps, spark-plug gaps, antenna data, etc. Gear Ratios and Dial Directions of Control Hoods, etc.

#### ★ OTHER FEATURES

Comprehensive Tube Charts for all tube types—from oldest to the newest! Over 50 Charts and Data Tables on Resistors, Condensers, Transformers, portable receiver Replacement Batteries, RMA Color Codes, Trade Directories, etc., etc.—every one of vital importance to every service man.

## SPECIAL MONEY-SAVING COMBINATION OFFER! Modern Radio Servicing WITH Trouble-Shooter's Handbook \$9.50

### SHORT-WAVE HANDBOOK

By CLIFFORD E. DENTON

Everything you could ask for in a book on short-wave radio is here. It is so comprehensive in scope that it is entirely unnecessary to resort to external references for details. Coil-winding data for all standard forms and for all types of tuning condensers are graphically depicted. There are invaluable wire tables for both solid and

litz that everyone can use. The section on audio amplifiers for s.w. receivers is complete. There is a large section devoted to complete construction details on s.w. oscillators, t.r.f. receivers, and a superheterodyne. A good part of the material in this book is based on the actual questions asked by thousands of short-wave experimenters in letters addressed to the author during the last few years—the very questions you yourself need information on.

128 Pages—Over 150 diagrams and illustrations—Bound in heavy, black durable cover. Net Price \$1.00

Radio & Technical Division of Murray Hill Books, Inc., now publish the famous "GHIRARDI" Radio Books, known the world over as the finest works available on radio subjects. Send for complete circulars describing the books announced on this page and on the page following.

### YOUR INVENTION

How to Protect and Merchandise It

By ELMORE B. LYFORD

A book of practical patent information for the inventor, purchaser, or user of patents, explaining in detail every single step which must be taken to secure adequate patent protection, make the most advantageous arrangements for the licensing, sale, or purchase of the patent rights, and raising capital for the manufacture of the patented article.

"YOUR INVENTION" will save its cost hundreds of times over if it merely succeeds in preventing only one of those expensive mistakes that inventors so often make.

210 pages, 5½x8—illustrated. Cloth binding

Net Price \$1.50

A PAIR

Your Service Work  
with GHIRARDI'S GADGETS

You'll marvel at these ingenious "TWIN GADGETS." Handiest little time-savers you ever saw! They'll "trouble-shoot" radio sets with lightning speed—just a flip of a card and there before you are the "remedies" and "tests" to make for whatever "trouble" symptoms you find. They'll cut your trouble-shooting time in half and earn back their small cost on a couple of calls.

ORDER THEM TO-DAY!

Ghirardi's Amazing

## POCKET TROUBLE SHOOTERS

Only 50c Each—\$1 for the Pair

### HOME-RADIO GADGET

Spots 400 different "troubles" in Power Unit, Receiver Circuits Proper, Tubes, Loudspeaker, Antenna, Ground, "A" Battery, "B" Battery, etc. for such symptoms as "Hum," "Weak," "Noisy," "Inoperative," "Intermittent Reception," "Fading," "Oscillation," and "Distortion." It not only tells you exactly what test to make to definitely locate each trouble, but actually suggests the "Remedy" for it.

### AUTO-RADIO GADGET

Spots 444 special auto-radio "troubles" in all possible trouble-sources for 11 common symptoms: 1. "Hum;" 2. "Weak;" 3. "Noisy" when both car and engine are at rest; 4. "Noisy" when car is at rest with engine idling; 5. "Noisy" when car is driven normally; 6. "Noisy" when car is coasting with ignition off; 7. "No Reception;" 8. "Intermittent Reception;" 9. "Fading;" 10. "Distortion;" and 11. "Oscillation."

WORLD-TIME  
INDICATOR  
Gadget

The handiest, simplest, most practical AUTO-MATIC WORLD-TIME INDICATOR that has ever been thought up! Absolutely unique and novel. Just turn the rotating clock dial in the center—and there's the information you want—at a glance. No fussing! No fumbling! No guessing! No calculating! This little wonder-worker figures it all out for you accurately, instantly. Every ham and short-wave fan will find this compact, pocket-size Indicator Gadget indispensable. ORDER YOURS AT ONCE!  
Only 50c postpaid

### In a Flash SHOWS YOU:

- ★ Exact Greenwich Mean Time, Standard or Daylight Saving Time in any city and country in the world.
- ★ Difference between local time and G.M.T.
- ★ Time difference between any 2 cities.
- ★ Complete S.-W. station list.
- ★ Plus many other exclusive features.

# MAKE SERVICING EASY

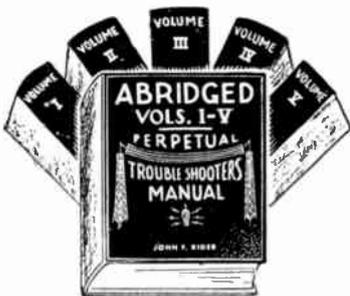

## RIDER MANUALS

The greatest collection of servicing data ever assembled. No serviceman can anticipate the year, make and model of the next set that will come to his bench. For this reason you **must** have the volume of Rider Manuals that contains the servicing information on that particular set. Benefit from the **complete**

servicing information that only Rider Manuals can give you: Data on alignment, I-F peaks, operating voltages, parts lists and parts values, voltage ratings of condensers, wattage ratings of resistors, coil resistance data, gain data, and all the other information that is vital for speedy and accurate trouble-shooting.

### ABRIDGED MANUAL Volumes I-V

The servicing information you need to service the old receivers will be found in the Abridged Manual, Volumes I-V. It is a compilation of the most widely distributed receivers released after 1929 that formerly appeared in Volumes I-V.

As can be readily appreciated, it is by no means as complete as the original first five individual volumes; these contained a total of approximately 5000 pages, whereas the Abridged Volume contains 2000 pages.

In order to select the proper receivers for inclusion in the Abridged Manual, all the manufacturers who were responsible for the sale of the greatest number of sets between 1930 and 1935 were contacted, and information was obtained as to the most widely distributed receivers. The Abridged Manual was then compiled.

2,000 Pages.....Net Price \$15.00

- VOL. XIV.** This newest Rider Manual contains servicing data on the receivers that were among the last produced in April, 1942. Every effort was made in the compilation of the data in this volume to bring them up to date for all manufacturers. This addition of Rider's Volume XIV makes available to the radio servicing industry more than 19,000 pages of authentic servicing information. ...1,376 pages, Net Price \$12.50
- VOL. XIII.** Contains servicing data on receivers manufactured during the latter part of 1941 and early 1942. Cumulative index for Volumes XI, XII, and XIII. ...1,672 pages, Net Price \$12.50
- VOL. XII.** Covers receivers manufactured up to April 1941. ... New arrangement provides for maximum number of sets. Clarified schematics give breakdowns of complicated r-f and a-f switching circuits. ....1,648 pages, Net Price \$12.50
- VOL. XI.** Covers receivers manufactured up to June 1940. Includes vest pocket manual containing push-button frequency ranges, of all automatically tuned receivers and other handy servicing data. Also double-spread pages and new How It Works section devoted to explanations of the electrical and mechanical operations of the more complicated 1940 receivers including television, facsimile, and frequency modulation. ...1,652 pages, Net Price \$12.50
- VOL. X.** Complete information on receivers manufactured up to August, 1939. Also a special 64-page How It Works Section and double-spread pages for the complicated diagrams. Includes a separate 188-page index with lists of exactly what appears on every page in Volume X and all preceding volumes. ....1,664 pages, Net Price \$12.50
- VOL. IX.** Contains installation and servicing instructions on 1889 models manufactured up to October, 1938. Also a special 36-page "How It Works" section and double-spread pages for the complicated diagrams .....1,672 pages, Net Price \$12.50
- VOL. VIII.** Receivers manufactured up to October, 1937 will be found in this volume. Contains installation and servicing instructions on many types of intercommunication systems. Also a special 64-page "How It Works" section and double-spread pages for the complicated diagrams. ....1,650 pages, Net Price \$12.50
- VOL. VII.** In this volume will be found sets manufactured up to October, 1936, together with data on older receivers hitherto unavailable. Data on more than 1,700 models—complete information. ....1,600 pages, Net Price \$12.50
- VOL. VI.** In this volume will be found sets manufactured up to November, 1935, together with data on older receivers hitherto unavailable. Data on more than 950 models—complete information. ....1,240 pages, Net Price \$9.50
- VOL. IV.** Receivers manufactured up to March, 1934, will be found in this volume. Herein will be found the more complicated superhets with QAVC, noise gates, duo-diode pentodes, automatic tone controls, and all the other new designs. A special 24-page section explains some of the more complicated sets .....1,060 pages, Net Price \$8.25

**Vol. I, II, III, and V out of print—no longer available**

**RIDER'S MANUALS HAVE more schematics . . . more I.F. peaks . . . more alignment data . . . more circuit descriptions. . . . MORE EVERYTHING THAN ANY OTHER MANUALS.**

# FREQUENCY MODULATION

The latest development in radio—**FREQUENCY MODULATION**—is on the air. More and more stations all over the country are making provision for “staticless” broadcasting and the number of F-M receivers on the market is increasing. . . . Here is your chance to get in at the start—Rider’s newest book explains the transmission and reception of frequency-modulated signals with especial attention given to the different types of f-m receivers now available—their adjustments and maintenance. . . . This is a “must” for every serviceman who has an eye on the future. . . . It is an investment that will pay real dividends!

## CONTENTS

**Chapter I. Frequency Modulation.**—An introduction to the subject with comparisons drawn between the frequency-modulation and amplitude-modulation forms of transmission and reception. **Chapter II. What Happens at the Transmitter.**—A non-mathematical explanation of how frequency-modulated signals are broadcast, including a discussion of phase modulation. **Chapter III. What Happens in the Receiver.**—How the f-m signal progresses through the receiver and how it is affected by the limiter discriminate tubes. **Chapter IV. Wave Propagation and Service Areas.**—How the ultra-high frequency waves are used for f-m transmission and the area covered. **Chapter V. F-M Receiving Antennas.**—Explanations and data concerning the best types of antennas for the reception of f-m signals. **Chapter VI. Servicing F-M Receivers.**—Valuable instructions for the adjusting and maintenance of the receiver including numerous oscillograms that will guide you in your servicing problems.

**136 PAGES . . . . TYPE SET . . . . FLEXIBLE CLOTH . . . . PROFUSELY ILLUSTRATED . . . . NET PRICE \$2.00**

## THE METER AT WORK

Here is a practical book for all who employ electric meters in radio and the allied electronic arts.

It is only through knowledge of the principles underlying the functioning of any piece of apparatus that a man can get the utmost use from it. To that end, it will be found that the subject matter of this book is treated from an entirely new angle, the theory upon which each meter is based is separate and distinct from any other type and complete in itself.

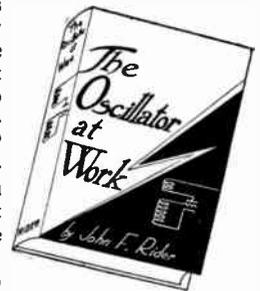

Inasmuch as some types of meters can do several jobs, the practical aspects of the meter are confined to the latter portion of the book. Thus, you can cover whichever phase of the subject you are interested in, and with the new construction of the book—the separation of text and illustrations—you will be able to obtain the information quickly and with the minimum of effort.

### CONTENTS

I—General Considerations. II—Moving-Iron Meters. III—Moving-Coil Meters. IV—Electrodynamometer Meters. V—The Electrostatic Meter. VI—Thermal Meters. VII—Components of Meters. VIII—Characteristics of Meters. IX—Rectifiers and Thermocouples. X—Practical Applications of Meters.

**152 Pages . . . 138 Illustrations . . . \$2.00**

## THE OSCILLATOR AT WORK

Do you get your money’s worth out of your present-day oscillator? Do you derive maximum utility from that unit? Do you know how to test your oscillator and establish if it is working properly? Would you know how to repair it if it went bad? Do you know how many different types of oscillators can be used in the servicing field?

Here is your opportunity to get the true facts about oscillators! Rider’s “The Oscillator at Work” is worth many times the price asked because it helps protect the investment you have made in oscillator equipment.

### CONTENTS

I—How an oscillator works. II—Alternating Currents. III—Triode Oscillators. IV—Electron-Coupled Oscillators. V—Ultra-High Frequency Oscillators. VI—Negative-Resistance Oscillators. VII—Electro-Mechanical Oscillators. VIII—Relaxation Oscillators. IX—Superheterodyne Oscillators. X—R-F Signal Generators. XI—Audio-Frequency Oscillators. XII—Modulation of Oscillators. XIII—Wobblers. XIV—Adjustment of Transmitters. Bibliography.

**256 Pages . . . 167 Illustrations . . . \$2.50**

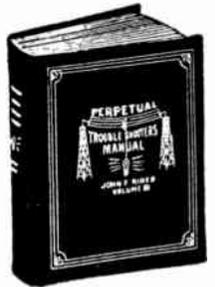

## A.C. CALCULATION CHARTS

146 charts 7" x 11" printed in two colors, covering all alternating current calculations from 10 cycles to 1000 megacycles. A tremendous time saver for all engineers and others who work on power, audio, supersonic, high frequency and ultra high frequency problems. Eliminates the slide rule.

**160 PAGES . . . . 9½ x 12 INCHES . . . . CLOTH BINDING . . . . \$7.50**

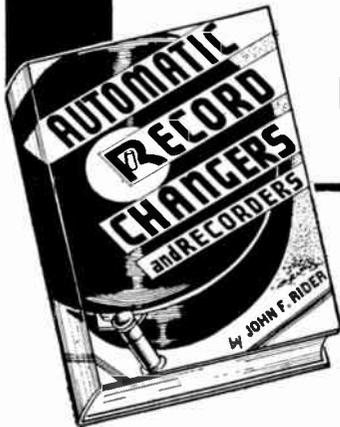

# RIDER

*Publications*

*Just what the Servicing Industry ordered!—*

## RIDER'S "Automatic Record Changers and Recorders"

800,000 record changers are providing an important source of profit for the wide-awake service shops of the country and creating a need for adequate and ready reference data to speed up trouble shooting and repair. Rider anticipated this need and has prepared—just when you need it—a sturdily bound volume containing everything you need know on any automatic record changer or recorder coming to your shop.

Heretofore, the serviceman's prime interest has revolved around the invisible defects which accompany the operation of electrical devices. Mechanics in radio receivers was limited to a lesser degree. However, with the introduction of the automatic record changer, some knowledge of the development of motion by means of gears, levers and cams has become necessary. Hence the birth of Automatic Record Changers and Recorders. Printed on 8½ x 11 paper, the same size as Rider Manuals, the book covers, by means of explanatory text, mechanical and electrical diagrams, all the information you must have to service these high cost instruments quickly and profitably.

### CONTENTS

Chapter I—MOTORS AND DRIVES. D-C Motors. A-C Motors. Universal Motors. Maintenance of Motors. Commonplace Troubles. SPEED REGULATORS and REDUCTION DRIVES. Chapter II—RECORDERS AND PHONOGRAPHS. The Cutting Head. The Groove. Recording Needles. Pick-ups. Phonograph Needles. Chapter III—AUTOMATIC RECORD CHANGERS. Mechanisms. Troubles. Chapter IV—ANALYSIS OF RCA MODEL RP-152-C RECORD CHANGER. MANUFACTURERS' SERVICE DATA.

744 PAGES . . . . . BOUND IN BUCKRAM . . . . . \$7.50

## SERVICING BY SIGNAL TRACING

Signal Tracing is destined to become the universally adopted method of locating defects in communication systems, no matter what the nature of the system—If it is a home broadcast receiver, auto-radio receiver, police receiver, commercial, marine, navy or army receiver. Every public address system, every centralized radio system comes within the capabilities of signal tracing. . . . Television receivers, facsimile receivers and other systems intended for special application can be serviced with equal ease. . . . Signal Tracing, founded upon the signal itself, is the most basic, most fundamental method of trouble shooting ever devised. . . . It is free of every limitation which in the past has hindered speedy service operations. . . .

You can't afford to be without this book. . . . We mean every word of this statement. . . . It is vital to your immediate welfare—to your future. . . . Get your copy today—NOW!

### CONTENTS

Chapter I—Introduction to Signal Tracing. Chapter II—Amplifier Operation and The Signal. Chapter III—Diode Detector Tube Systems. Chapter IV—Multi-Element Detector Systems. Chapter V—Oscillator Tube Systems. Chapter VI—Mixer Tube Systems. Chapter VII—Control Circuits and Voltages. Chapter VIII—Coupling Devices. Chapter IX—The T-R-F Receiver. Chapter X—The Superheterodyne Receiver. Chapter XI—Television and Facsimile Receivers. Chapter XII—Public Address Systems. Chapter XIII—Localizing Defects by Signal Tracing. Chapter XIV—Signal Tracing in Receiver Design.

360 PAGES . . . 188 ILLUSTRATIONS . . . \$4.00  
SPANISH EDITION . . . \$4.00

## VACUUM TUBE VOLTMETERS

The vacuum-tube voltmeter has been rapidly forging to the front as a favorite tool of engineers, research workers and servicemen. By its proper use, dynamic measurements can be made under any and all conditions with a minimum of effort and time. Here is a book that is a perfect mine of information for everybody who wants to know all about these important instruments. Not only is the theory explained upon which the functioning of the different types of v-t voltmeters is based, but the practical applications of these instruments are completely described. Like nearly all types of voltmeters, multipliers and shunts are employed with vacuum-tube voltmeters to extend their ranges. These and their uses are explained, as is the calibration of the different types.

For those men who are interested in the construction of v-t voltmeters, adequate information will be found for v-t voltmeters were built in the author's laboratory, and constants are given for the components of many types, as well as a wealth of other useful data.

### CONTENTS

Chapter I. Fundamentals of Vacuum-Tube Voltmeter. Chapter II. Diode Vacuum-Tube Voltmeters. Chapter III. Triode Vacuum-Tube Voltmeters. Chapter IV. Slide-Back Vacuum-Tube Voltmeters. Chapter V. Rectifier-Amplifier Vacuum-Tube Voltmeters. Chapter VI. Tuned Vacuum-Tube Voltmeters. Chapter VII. Audio-Frequency and Logarithmic Vacuum-Tube Voltmeters. Chapter VIII. Vacuum-Tube Voltmeters for D-C Voltage, Current, and Resistance Measurements. Chapter IX. Design and Construction of Vacuum-Tube Voltmeters. Chapter X. Calibration and Testing of V-T Voltmeters. Chapter XI. Applications of V-T Voltmeters. Bibliography.

180 PAGES . . . 111 ILLUSTRATIONS . . . \$2.50

# RIDER

Publications

## THE CATHODE-RAY TUBE AT WORK

A new era in the servicing of radio receivers, public-address systems, transmitters, etc., is in the offing. It is the use of the cathode-ray tube and the progressive serviceman will prepare himself now for the change that is coming.

The theory underlying the functioning of the cathode-ray tube and the circuits that accompany it receives full consideration in this book.

The second half of the volume is devoted to specific and practical applications of commercial oscilloscopes

to servicing and adjustment problems. Order your copy today!

### CONTENTS

I—The Theory of the Tube. A complete explanation of the different types of cathode-ray tubes. How the spot is focussed and how the beam of electrons is deflected. II—Sweep Circuits. How and why the spot moves across the screen and forms the image. III—A.C. Voltages on Both Sets of Plates. An explanation of the patterns formed on the cathode-ray tube screen when a.c. voltages are applied. IV—Commercial Cathode-Ray Oscillographs. A detailed description of the various cathode-ray oscillographs that are on the market. V—Practical Application of the Cathode-Ray Oscillograph. General directions for adjusting the cathode-ray oscillograph for all tests. VI—Alignment of Tuned Circuits. Understandable explanation of the theory of the frequency modulated oscillator and how it is used in testing with the cathode-ray oscillograph. VII—The A-F. Frequency Modulator. How overall a-f. response curves of audio units are developed and what they mean. VIII—Auto Radio Vibrator Testing. The connections for testing vibrators with the cathode-ray tube oscillograph. IX—Transmitter Adjustment. How the modulation of a wave is measured and the trapezoidal pattern is developed on the screen. X—Other Applications of the Cathode-Ray Oscillograph. Beat patterns, c-w. reception and detection.

338 Pages . . Profusely Illustrated . . Net Price \$4.00

## SERVICING SUPERHETERODYNES

No other circuit in the radio field has undergone all the changes that have been incorporated in the superheterodyne. In order to service these receivers with profitable speed, you must be able to analyze the different portions of the circuit quickly and this is just what Rider tells you how to do in this book. Not only is the theory of all types of Superhets thoroughly covered, but actual servicing details are most complete. Many thousands of Servicemen are using "Servicing Superheterodynes" daily and are finding the investment one that

paid dividends in increased profits.

### CONTENTS

I—The Principles Underlying the Operation of the Superheterodyne Receiver. II—The Generation of and the Relation Between Harmonics. III—Explanation of the Different Types of Superheterodyne Circuits. IV—Function and Characteristics of Individual Parts of the Superheterodyne Receiver. V—Special Circuits and Tube Applications. VI—Troubles and Symptoms Encountered in Superheterodynes. VII—Application of Test Oscillators. VIII—Vibrator Units. Appendix—Intermediate Peak Frequencies of Commercial Receivers with Model Numbers.

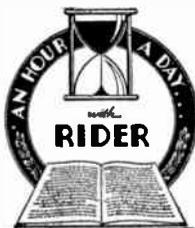

288 Pages . . Profusely Illustrated . . Net Price \$2.00

### Alternating Currents in Radio Receivers

Are you familiar with the different forms of alternating currents which are present in a radio receiver? When once you understand the basic facts relating to the cycle—frequency—sine waves—harmonics—complex waves—modulated waves—phase relations—you will have no trouble in understanding the servicing problems which involve these factors.

### D.C. Voltage Distribution

Only a casual glance at the schematics of some of the 1939 multi-tube sets will convince you that the distribution of the D.C. voltage to the tube elements is complicated. The many different forms these systems take should be recognized at a glance and understood. You should know thoroughly how the value of resistance and wattage rating of each resistor is calculated and why.

96 Pages Each  
Net Price \$1.25 Each

### Resonance and Alignment

Do you know what happens when you tune a circuit to resonance? In order to align a receiver, oscillator, or transmitter properly, so that maximum efficiency is attained, you must be familiar with more than just the mechanical operation. Are you familiar with I.F., oscillator, R.F. and detector alignment for all types of circuits—single, double and triple tuned systems?

### Automatic Volume Control

Automatic volume control has now become a standard feature of every well made receiver. Are you familiar with every type in use and can you recognize one system from another by examining the schematic? Do you know how various types of tubes are used in each circuit? Noise suppression systems, time delay circuits—audio-frequency volume expander systems and other such networks have greatly increased servicing problems.

HARD COVERS . . . . . TYPE SET . . . . . PROFUSELY ILLUSTRATED . . . . . HANDY POCKET SIZE

## SERVICING RECEIVERS BY MEANS OF RESISTANCE MEASUREMENT

Take the guesswork out of servicing by using an ohmmeter in your trouble shooting. This book tells you how to make and correctly interpret point-to-point resistance measurements. It will simplify your servicing problems and enable you to use the resistance data furnished in RIDER MANUALS to the best advantage. Now that more and more manufacturers are supplying resistance data, you need this book to speed up your servicing with greater accuracy. Let Rider show you how to use a modern servicing procedure on the complicated receivers—you will find in this book the usual Rider clarity of explanation and how theory is applied to practice.

203 Pages . . . . . Net Price \$2.00

G-6

## ALIGNING PHILCO RECEIVERS Two Volumes

Everything you need for aligning Philco receivers . . . I.F. peaks—adjustment frequencies—trimmer and padder locations—complete and detailed information for aligning every Philco model from 1929 to 1941. These two volumes, prepared with the cooperation of the engineering staff of the Philco Radio & Television Corp., are the authentic source of alignment information and the data are presented in a brand new way that makes alignment easier and quicker. You will find all the necessary data arranged so that every step in the alignment procedure is carried out in a definite and forth is eliminated completely in this radically new style of presenting alignment data.

Vol. I — 1929 to 1936 — 176 pages — \$2.00  
Vol. II — 1937 to 1941 — 200 pages — \$2.00

Net

## AUTOMATIC FREQUENCY CONTROL SYSTEMS

From the simplest type of A.F.C. circuit to the most complicated push pull control circuit . . . you will find them all clearly explained in Rider's book. The first part of the book is devoted to a review of the combination of D.C. voltages, the phase relations in inductive, capacitive, and transformer circuits, with particular reference to the manner in which these principles appear in A.F.C. circuits. The remaining chapters cover the operation of all types of discriminator circuits, the operation of the various types of control tube circuits, including the push-pull type, the reflected reactance type, and the mutual inductance type. Let Rider tell you all about A.F.C. in this up-to-the-minute book that combines theory and practice.

## The Radio Amateur's Handbook

"THE ALL-PURPOSE VOLUME ON RADIO"

Text, data book, operating manual — it is all these and more. As a text it is probably more used in radio schools and colleges than any other single volume. As a practical constructional handbook, it stands in a class alone. As an operating manual, it provides information available from no comparable source.

### Standard Edition

Paving the way for postwar amateur development, particularly on the ultrahighs (microwaves) and other prospective new techniques, the current Edition of the HANDBOOK includes diversified material new to its scope, while still retaining its time-proved treatment of the orthodox theory and practice of amateur radio — refined, modernized, reorganized for maximum convenience whether used as text, reference or constructional manual. . . . This Edition of the HANDBOOK contains more pages and more information per page than any HANDBOOK yet published. . . . Every subject encountered in practical radio communication is covered, arranged for maximum convenience to the reader, sectionalized by topics with abundant cross-referencing and fully indexed. . . . More than ever the ideal reference work, this Edition also contains practical construction information on tested and proved gear — always the outstanding feature of the HANDBOOK.

\$1.00 In Continental U. S. A.

\$1.50 Elsewhere

\$2.00 Buckram Edition

### Special Defense Edition

This edition of the HANDBOOK is designed especially for use in radio training courses. It eliminates those portions of the regular edition which are not useful for instruction purposes and has added chapters on mathematics, measuring equipment and code instruction. The first chapter covers the elementary mathematics necessary for the solution of all formulas and interpretation of graphs appearing throughout the text. A four-place log table is included in the Appendix.

## A Course in Radio Fundamentals

BY GEORGE GRAMMER

The objective in preparing this course was to accent those principles most frequently applied in actual radio communication. "A Course In Radio Fundamentals" is a study guide, examination book and laboratory manual. Its text is based on the "Radio Amateur's Handbook". Either the special edition for war training purposes or the Standard Edition may be used. References contained in the "Course" are identical in both editions. As a text, this book greatly smooths the way for the student of the technicalities of radio. It contains interesting study assignments, experiments and examination questions for either class or individual instruction. It describes in detail 40 experiments with simple apparatus giving a complete practical knowledge of radio theory and design.

Price 50c

## Learning the Radiotelegraph Code

BY JOHN HUNTOON

This booklet is designed to train students to handle code skillfully and with precision. Employing a novel system of code-learning based on the accepted method of *sound* conception, it is particularly excellent for the student who does not have the continuous help of an experienced operator or access to a code machine. It is similarly helpful home-study material for members of code classes. Adequate practice material is included for classwork as well as for home-study. There are also helpful data on high-speed operation, typewriter copy, general operating information — and an entire chapter on tone sources for code practice, including the description of a complete code instruction table with practice oscillator.

Price 25c

## The A. R. R. L. Antenna Book

BY GEORGE GRAMMER and BYRON GOODMAN

A comprehensive manual of antenna design and construction. Sixteen chapters, profusely illustrated. Both the theory and the practice of all types of antennas used by the amateur, from simple doublets to multi-element rotaries, including long wires, rhomboids, vees, phased systems, u.h.f. systems, etc. Feed systems and their adjustment. Construction of masts, lines and rotating mechanisms. The most comprehensive and reliable information ever published on the subject. Over 100 pages.

Price 50c

---

**AMERICAN RADIO RELAY LEAGUE, INC., West Hartford, Conn., U.S.A.**

## *How To Become A Radio Amateur*

Universally recognized as the standard elementary guide for the prospective amateur. Features equipment which is simple in construction. The apparatus is of a thoroughly practical type capable of giving long and satisfactory service — while at the same time it can be built at a minimum of expense. The design is such that a high degree of flexibility is secured, making the various units fit into the more elaborate station layouts which inevitably result as the amateur progresses. Complete operating instructions and references to sources of detailed information on licensing procedure are given.

**Price 25c**

## *The Radio Amateur's License Manual*

To obtain an amateur operator's license you must pass a government examination. The License Manual tells how to do that — tells what you must do and how to do it. It makes a simple and comparatively easy task of what otherwise might seem difficult. In addition to a large amount of general information, it contains questions and answers such as are asked in the government examinations. If you know the answers to the questions in this book, you can pass the examination without trouble.

**Price 25c**

## *Hints & Kinks*

Amateurs are noted for their ingenuity in overcoming by clever means the minor and major obstacles they meet in their pursuit of their chosen hobby. An amateur must be resourceful and a good tinkerer. He must be able to make a small amount of money do a great deal for him. He must frequently be able to utilize the contents of the junk box rather than buy new equipment. Hints and Kinks is a compilation of hundreds of good ideas which amateurs have found helpful. It will return its cost many times in money savings — and it will save hours of time.

**Price 50c**

## *Lightning Calculators*

### *Radio Type A*

**Price \$1.00**

This calculator is useful for the problems involving frequency, wavelength, inductance, capacity, etc. It has two scales for physical dimensions of coils from one-half inch to five and one-half inches in diameter and from one-quarter to ten inches in length; a frequency scale from 400 kilocycles through 150 megacycles; a wavelength scale from two to 600 meters; a capacity scale from 3 to 1,000 micro-microfarads; two inductance scales with a range of from one microhenry through 1,500; a turns-per-inch scale to cover enameled or singler silk covered wire from 12 to 35 gauge, double silk or cotton covered from 0 to 36 and double cotton covered from 2 to 36. Using these scales in the simple manner outlined in the instructions on the back of the calculator, it is possible to solve problems involving frequency in kilocycles, wavelength in meters, inductance in microhenrys and capacity in microfarads. Gives the direct reading answers for these problems with accuracy well within the tolerances of practical construction.

### *Ohm's Law Type B*

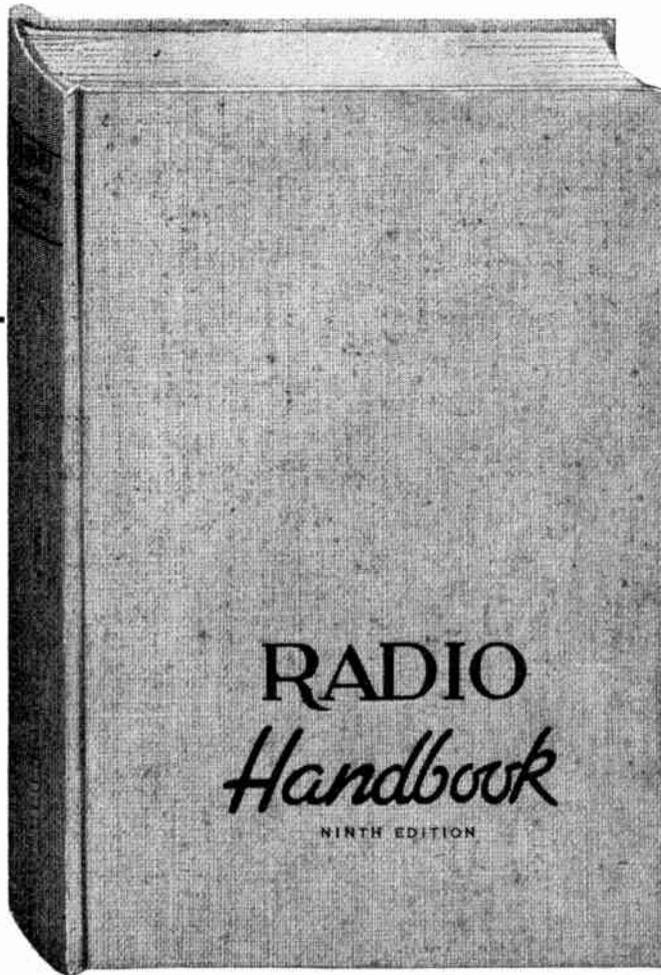

**Price \$1.00**

With this concentrated collection of scales, calculations may be made involving voltage, current, and resistance, and can be made with a single setting of a dial. The power or voltage or current or resistance in any circuit can be found easily if any two are known. This is a newly-designed Type B Calculator which is more accurate and simpler to use than the justly-famous original model. It will be found useful for many calculations which must be made frequently but which are often confusing if done by ordinary methods. All answers will be accurate within the tolerances of commercial equipment.

# ECHOPHONE

COMMERCIAL

*"The Ears of the World"*

**MODEL EC-1**

• • • **FEATURES** • • •

- AC/DC operation-115/125 volts.
- Electrical bandspread on all bands.
- Beat oscillator for locating weak stations.
- Dial calibrated in megacycles with all important service bands indicated.
- Bandspread logging scale.
- Complete isolation for headphones.
- Self-contained speaker.

**PHYSICAL CONSTRUCTION:** The receiver is housed in a metal cabinet finished in gray wrinkle. The dynamic speaker is mounted in the top of the cabinet and covered by a metal grill.

# ECHOPHONE

*"The Ears of the World"*

The demand for a high-quality portable broadcast receiver has resulted in the development of the Echophone Model EC-6. Every feature for superb performance under the difficult conditions encountered in portable operation has been incorporated in this receiver, assuring home receiver results in the field.

Operating from self-contained batteries or power line, dual output stages assure full volume combined with real battery economy.

• • • **FEATURES** • • •

- Three bands, 550 k.c. to 1600 k.c., 2.8 M.c. to 7.8 M.c., 7 M.c. to 19 M.c.
- Accurately calibrated main tuning dial.
- Separate bandspread dial.
- Operation from either 115 volts AC or DC or self-contained batteries.
- Dual audio output stages assure economy on battery with maximum output on AC/DC operation.
- Tropical impregnation of components assures un-failing operation under severe conditions.
- Filter condensers plug-in type.
- Self-contained antenna on reel.
- Built-in PM speaker with treated cone.
- Automatic changeover from AC/DC to battery operation by means of line cord socket.

A real Communications Receiver at a sensationally low price, including all these important features: Three bands covering from 550 k.c. to 30.5 m.c. (550 to 9.85 meters); Electrical bandspread on all bands; Beat Frequency Oscillator; Self-contained PM Dynamic speaker; 6 tubes; AC/DC operation; Good selectivity and exceptional sensitivity; Bandspread logging scale; Complete isolation for headphones through phone circuit transformer; Dial calibrated in megacycles with all important service bands indicated.

Every necessary feature is incorporated in the EC-1 to give the amateur and the short wave listener an up to the minute communications receiver.

**CONTROLS:** Main tuning, Bandspread, Bandswitch, AF gain, Standby switch, Speaker-Headphone switch, Combined BFO-AVC on-off switch. Rear Chassis edge: Phone tip jacks-Doublent Antenna terminals.

**DIMENSIONS and WEIGHT:** 7½" high, 10¾" wide, 7¾" deep. Weight: Packed for shipment, 12 pounds.

**MODEL EC-6**

**CONTROLS:** Bandspread tuning, Main tuning, Band switch, Volume—On/Off.

**PHYSICAL CONSTRUCTION:** The Model EC-6 is housed in a heavy gauge steel cabinet finished in gray wrinkle. A recessed panel is used for the protection of the controls and dial. The antenna is carried on a recessed reel on the rear of the cabinet. A leather carrying handle is provided and the cabinet is mounted on rubber feet.

**DIMENSIONS and WEIGHT:** Overall size 11¾" high by 15" wide by 8" deep. Weight including batteries 30 pounds.

# hallicrafters

## SUPER SKYRIDER

**MODEL SX-28A**

### ***The standard of comparison***

This new Hallicrafters Model SX-28A is a further refinement of the famous SX-28 that achieved such popularity with amateur and professional operators prior to Pearl Harbor. Embodying modifications necessitated by military service, the new SX-28A offers the maximum in communications receiver performance to the discriminating buyer.

The traditional sensitivity and selectivity of the SX-28 have been further improved in this new Super Sky-Rider by the

use of "micro-set" permeability-tuned inductances in the r.f. section. The inductances, trimmer capacitors and associated components for each r.f. stage are mounted on small individual sub-chassis and may be removed for easy servicing. Thousands of these fine receivers have seen service with the armed forces in all parts of the world and have maintained and enhanced Hallicrafters reputation for outstanding quality and performance under the most difficult conditions.

### ***The inside story of the famous SX-28A***

The frequency range of the SX-28A extends from 550 kc. to 42 Mc. and is covered in six bands with suitable overlap at the band ends. In addition to the main tuning dial which is accurately calibrated in megacycles, there is a calibrated bandspread dial covering the frequency ranges of 3.5 to 4.0 Mc., 7 to 7.3 Mc., 14 to 14.4 Mc., and 28 to 30 Mc. Both dials are provided with flywheel inertia tuning.

One stage of r.f. amplification is used on frequencies below 3 Mc. and two stages on the higher frequency bands. These pre-selector stages using the new high-Q "micro-set" inductances assure a good signal-to-noise ratio and a high degree of selectivity. The Model SX-28A has an image ratio of 40 to 1 at 30 Mc., 350 to 1 at 14 Mc., and a proportionately increasing ratio as the frequency is decreased.

The three stage i.f. amplifier is designed to retain its adjustment under conditions of extreme change in temperature and humidity. The i.f. transformers are permeability tuned and are provided with small extra windings which can be connected to increase the coupling between circuits. These windings are used in conjunction with the crystal filter to furnish six different degrees of selectivity. Control is by means of a six-position panel switch. Any desired i.f. selectivity from wide-band high fidelity to razor-sharp c.w. reception is instantly available. In the medium and broad crystal positions the i.f. circuits function as a band-pass filter rather than as the more common broadly peaked resonant

circuit and provide fully intelligible reception of radio telephone signals while holding interference and atmospherics to a minimum.

The SX-28A incorporates a double a.v.c. system. A.v.c. voltage for the r.f. and mixer tubes is taken from the broadly tuned carrier after it has passed through only three tuned i.f. circuits. A.v.c. for the i.f. stages, however, is taken from the carrier after it has passed through six tuned i.f. circuits. This arrangement provides a reduction in between-station noise and a more sharply defined aural tuning action. The "S" or signal intensity meter operates in conjunction with the a.v.c. and is calibrated in "S" units of approximately six db. each and in decibels above S9. A three position panel switch is provided for the control of a.v.c., "S" meter and b.f.o. circuits.

Other features which contribute to the fine performance of the SX-28A are a three stage Lamb type noise limiter with panel adjustment; push-pull 6V6GT output stage with band-pass filter, bass boost, and tone control; antenna compensator; separate a.f. and r.f. volume controls; and panel stand-by switch with break-in control for transmitter. All controls and switches are conveniently arranged.

#### **FEATURES**

1. Frequency range 550 kc. to 42 Mc. continuous in 6 bands.
2. Main tuning dial accurately calibrated in megacycles.
3. Separate calibrated bandspread dial.

# hallicrafters

(SX-28A continued)

4. Two stages of radio frequency amplification.
5. Beat frequency oscillator, pitch variable from front panel.
6. Combination a.v.c.-b.f.o. switch.
7. Send-receive switch.
8. Lamb type 3 stage adjustable noise limiter.
9. Separate r.f. and a.f. gain controls.
10. Provision for battery or external power supply operation.
11. Push-pull 8 watt output stage.
12. Variable tone control, band pass audio filter and bass boost switch.
13. Provision for break-in operation.
14. 500 or 5000 ohm output.
15. Six position i.f. and crystal filter selectivity switch.
16. Crystal phasing control.
17. "S" meter calibrated in "S" units and db. above S9.
18. Oscillator compensated for frequency drift.
19. Antenna compensator mounted on panel.
20. Separate a.v.c. amplifier.
21. "Unit-style" r.f. sections for easy servicing.
22. "Micro-set" type coils in r.f. section, permeability tuned.
23. Dial lock on main tuning dial.
24. Inertia flywheel tuning and pre-loaded gear drive on main and bandsread dials.
25. Phonograph input jack.

## CONTROLS

Tone and A.c. on/off; B.f.o. (pitch control); Bass in/out; A.f. gain; Main tuning; R.f. gain; Band switch; Ant. trimmer; Bandsread tuning; A.v.c. and B.f.o. on/off; Selectivity; Send/receive; Crystal phasing; A.n.l.; "S" meter adjustment on rear of chassis.

## FIFTEEN TUBES

1—6AB7 1st r.f. Amplifier; 1—6SK7 2nd r.f. Amplifier; 1—6SA7 Mixer; 1—6SA7 h.f. Oscillator; 1—6L7 1st i.f. Amplifier Noise Limiter; 1—6SK7 2nd i.f. Amplifier; 1—6B8 a.v.c. Amplifier; 1—6B8 2nd Detector and "S" meter tube; 1—6AB7 Noise Amplifier; 1—6H6 Noise Rectifier; 1—6J5 Beat Oscillator; 1—6SC7 1st Audio Amplifier; 2—6V6GT Push-Pull Output Amplifiers; 1—5Z3 Rectifier.

## EXTERNAL CONNECTIONS

Antenna-ground terminals arranged for single wire or double; speaker terminals for either 500 or 5000 ohm output; line cord and plug; line fuse; special socket, normally shorted by octal plug, provides for battery or external power supply operation and stand-by connections to transmitter; phonograph input jack. All connections are mounted on rear of chassis except headphone jack on panel.

## PHYSICAL CHARACTERISTICS

All components of the Super-Skyrider Model SX-28A are mounted on a rugged steel chassis. Copper plated steel panel has etched black leatherette finish. Panel and chassis are joined by heavy side members. Cabinet is finished in gray wrinkle lacquer with chromium trim. Openings provided for cooling and ventilation.

## DIMENSIONS AND WEIGHT

Cabinet is 20½" long by 10" high by 14¾" deep. Panel is 19" long by 8¾" high. Clearance needed for relay rack mounting, 17¾" long by 8¾" high by 14¾" deep. Model SX-28A—75 pounds. Packed for shipment—87 pounds.

MODEL S-35

## PANORAMIC RECEIVER

The Hallicrafters PANORAMIC RECEIVER, Model S-35, is one of the newest and most interesting applications of the cathode-ray tube. This equipment, a special adapter mounted complete with an SX-28A receiver, makes possible the visual monitoring of whole sections of the frequency spectrum up to 100 k.c. in width. All stations on the air in the portion of the spectrum being monitored are visible on the screen of the S-35. The station which is audible in the speaker or headphones always appears in the center of the oscilloscope screen while stations that are higher or lower in frequency are properly spaced on either side. As the receiver is tuned the entire picture shifts across the screen. Signals appear as upward deflections in the cathode-ray base line and indicate relative amplitude, character of modulation, etc., to the experienced operator.

The panoramic adapter unit consists of a chassis and panel of approximately the same dimensions as the SX-28A on which are mounted the necessary power supplies, intermediate frequency and video frequency amplifiers, saw-tooth oscillator, reactance modulator, and cathode-ray tube. Only one electrical connection is made between the adapter and the SX-28A and it does not interfere in any way with the normal operation of the receiver.

## FOURTEEN TUBES

1—6SG7 455 k.c. Input Amplifier; 1—6SA7 1st Detector; 1—6SK7 100 k.c. i.f. Amplifier; 1—6SQ7 2nd Detector and Vertical Amplifier; 1—6SN7GT Sawtooth Oscillator; 1—6SJ7 Return Trace Blanking Tube; 1—6AC7 Reactance Modulator; 1—6J5 r.f. Oscillator; 1—6SC7 Horizontal Amplifier; 1—2X2/879 High Voltage Rectifier; 1—80 Low Voltage Rectifier; 1—VR105 Voltage Regulator; 1—VR150 Voltage Regulator; 1—5AP1 Cathode-ray Tube.

## DIMENSIONS AND WEIGHT

Cabinet only—20½" wide by 18¾" high by 18" deep. Packed for shipment—180 pounds.

# hallicrafters

## SUPER DEFIANT

**MODEL SX-25**

### **Every worthwhile feature at a moderate price**

The Super Defiant has long been one of Hallicrafters most popular models. Incorporating every important feature for superb broadcast and short wave receiver performance, the Model SX-25 has achieved true economy without compromising quality.

The outbreak of war with its sudden demand for military communications receivers found Hallicrafters already in mass production of the Model SX-25 for amateur use. Produc-

tion was immediately stepped up and tremendous quantities of these receivers were put into military communications work. Many minor modifications and improvements in quality of components to meet rigid military requirements were made but the basic design remains unchanged. The rugged construction, fine workmanship, and superb performance which proved so valuable in military service will continue to feature the Hallicrafters Model SX-25.

#### **FEATURES**

1. Frequency range 545 kc. to 42 Mc., continuous in 4 bands.
2. Main tuning dial accurately calibrated in megacycles.
3. Separate calibrated bandspread dial.
4. Two stages of radio frequency amplification.
5. Beat frequency oscillator, pitch variable from front panel.
6. A.v.c. switch.
7. B.f.o. switch.
8. Send-receive switch.
9. Automatic noise limiter.
10. Separate r.f. and a.f. gain controls.
11. Provision for battery or external power supply operation.
12. Push-pull 8 watt output stage.
13. High-low tone switch.
14. Provision for break-in operation.
15. 500 or 5000 ohm output.
16. Six position i.f. and crystal selectivity switch.
17. Crystal phasing control.
18. "S" meter calibrated in "S" units and db. above 39.
19. Oscillator compensated for frequency drift.
20. Inertia flywheel tuning on bandspread dial.

#### **CONTROLS**

R. f. gain; Band switch; Selectivity; Main tuning; Tone high-low; Xtal phasing; Bandspread; A.n.l. on/off; A.i. gain; Pitch control; B.f.o. on/off; Send-receive; "S" meter adjustment on rear of chassis.

#### **TWELVE TUBES**

1—6SK7 1st r.f. Amplifier; 1—6SK7 2nd r.f. Amplifier; 1—6K8 1st Detector-Mixer h.f. Oscillator; 1—6SK7 1st i.f. Amplifier; 1—6SK7 2nd i.f. Amplifier; 1—6SQ7 2nd Detector, a.v.c. 1st Audio Amplifier; 1—6SQ7 Phase Inverter; 2—6F6 Push-pull Audio Output Stage; 1—6H6 Automatic Noise Limiter; 1—6J5GT Beat Frequency Oscillator; 1—80 Rectifier.

#### **EXTERNAL CONNECTIONS**

Antenna terminals arranged for doublet or single wire antenna. Speaker output for either 500 or 5000 ohms. Standby terminals for external control of receiver in conjunction with transmitter. Line cord and plug. Special socket, normally shorted by octal plug, for use of external power supply or batteries. All connections are mounted on rear of chassis except headphone jack on panel.

#### **PHYSICAL CHARACTERISTICS**

The SUPER-DEFIANT, Model SX-25 is mounted in a steel cabinet finished in gray wrinkle lacquer. Ornamental metal grills in either end provide ventilation. Chassis is cadmium plated steel.

#### **DIMENSIONS AND WEIGHT**

Receiver cabinet only—19½" long by 9½" high by 11⅞" deep. Model SX-25—38 pounds. Packed for shipment—46 pounds.

# hallicrafters

## SKY CHAMPION

**MODEL S-20R**

### **Top performance in the low cost field**

Where economy, combined with top performance is desired, the Sky Champion is the logical answer. Skillful engineering has enabled excellent reception on both broadcast and short waves to be incorporated. The Model S-20R is probably the greatest value ever offered in communications receivers. Its simplicity of design, and excellent workmanship insure long, satisfactory service and make traditional Hallicrafters performance available to the purchaser of an economical

receiver. In common with its larger brothers the Model S-20R has a distinguished war record, and like them, it has been strengthened and improved to cope with military requirements. Large quantities have been produced for the armed forces and have been used for training and communications purposes where performance was important but the use of a complicated receiver was not justified. It is a reliable receiver offering top performance in the low priced field.

#### **FEATURES**

(1) Frequency range 550 kc. to 43 Mc. continuous in four bands, (2) Main tuning dial accurately calibrated in megacycles, (3) Separate electrical bandspread dial, (4) Beat frequency oscillator, pitch variable from front panel, (5) A.v.c. switch, (6) B.f.o. switch, (7) Send-receive switch, (8) Automatic noise limiter, (9) Separate r.f. and a.f. gain controls, (10) Provision for battery or external power supply operation, (11) 2½ watt output stage, (12) Three position tone control, (13) Provision for break-in operation, (14) Provision for external "S" meter, (15) Inertia flywheel tuning on bandspread dial, (16) Internal rubber shock mounted 5" dynamic speaker.

#### **NINE TUBES**

1—6SK7 r.f. Amplifier; 1—6K8 1st Detector-Mixer, h.f. Oscillator; 1—6SK7 1st i.f. Amplifier; 1—6SK7 2nd i.f. Amplifier; 1—6SQ7 2nd Detector, a.v.c. and 1st Audio Amplifier; 1—6F6G 2nd Audio Amplifier; 1—6H6 Automatic Noise Limiter; 1—6J5GT Beat Frequency Oscillator; 1—80 Rectifier.

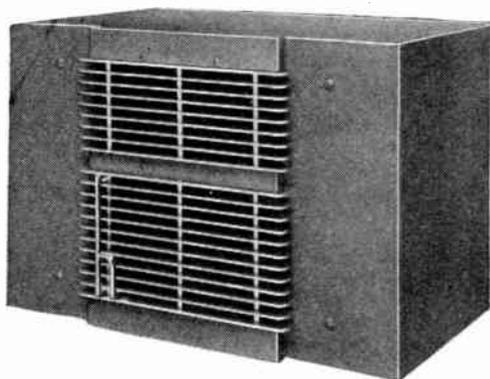

#### **CONTROLS**

R.f. gain; Band switch; Audio gain; Main tuning; A.v.c. on/off; B.f.o. on/off; Bandspread tuning; A.n.l. on/off; Tone a.c. off/high/med./low; Pitch control; Send-receive.

#### **DIMENSIONS AND WEIGHT**

Cabinet only—18½" long by 8½" high by 9¾" deep. Model S-20R—26 pounds. Packed for shipment—32 pounds.

#### **MODEL PM-23 SPEAKER**

This Hallicrafters-Jensen speaker is designed for use with the larger Hallicrafters receivers. Of the permanent magnet type the Model PM-23 has a ten-inch cone and is mounted with its coupling transformer in a steel cabinet finished in gray wrinkle lacquer to match the receiver. Speaker opening is concealed by an attractive metal grill. Transformer matches 5000 ohm output of receiver.

#### **DIMENSIONS AND WEIGHT**

16¼" long by 11½" high by 11" deep. Weight—packed for shipment—22 pounds.

# hallicrafters

## VERY HIGH FREQUENCY RECEIVERS

**MODEL S-36A**  
**FM-AM-CW**

The new Hallicrafters AM/FM receiver, Model S-36A, is designed for maximum performance on the very-high-frequencies. Using acorn tubes in the r.f. amplifier, first detector, and high frequency oscillator circuits, the S-36A provides continuous frequency coverage from 27.8 to 143 megacycles. Either a limiter and discriminator for FM or a third i.f. amplifier, diode detector and noise limiter for AM may be switched into the circuit from the front panel. A beat frequency oscillator is provided for the reception of c.w. telegraph signals. The S-36A incorporates a new three watt audio system with a response curve which is essentially flat from 40 to 15,000 cycles. The entire receiver is designed for use in any climate. Combining FM, AM, and CW telegraph reception in one superbly engineered unit, the S-36A provides the utmost in very-high-frequency reception.

### FEATURES

(1) Frequency range 27.8 Mc. to 143 Mc. continuous in three bands. (2) Main tuning dial accurately calibrated in megacycles. (3) Mechanical bandspread dial. (4) R.f. stage with acorn tube. (5) Beat frequency oscillator, pitch variable from panel. (6) A.v.c. switch. (7) B.f.o. switch. (8) Send-receive switch. (9) Automatic noise limiter. (10) Separate r.f. and a.f. gain controls. (11) Push-pull high fidelity output stage. (12) Four position tone control with bass boost. (13) Provision for break-in operation. (14) 500 or 5000 ohm output plus special balanced 600 ohm line. (15) Sharp-broad selectivity switch. (16) Dual purpose "S" and tuning meter. (17) Oscillator compensated for frequency drift. (18) Antenna compensator mounted on panel. (19) R.f. assembly easily removed for servicing. (20) Inertia flywheel tuning. (21) Hermetically sealed transformers and reactors. (22) All paper condensers oil impregnated. (23) Moisture proofed wiring. (24) FM/AM switch. (25) Switch on chassis permits operation on 115 or 230 volts a.c. (26) Line fuse on panel. (27) Improved gear drive in dust proof housing. (28) "S" meter adjustable from front panel.

### FIFTEEN TUBES

1—956 (Acorn) Radio Frequency Amplifier; 1—954 (Acorn) Converter-Mixer; 1—6AC7 1st i.f. Amplifier; 1—6AB7 2nd i.f. Amplifier; 1—6SK7 3rd i.f. Amplifier; 1—6H6 a.m. Detector and Automatic Noise Limiter; 1—6AC7 f.m. Limiter; 1—6H6 f.m. Discriminator; 1—6SL7GT Audio Amplifier; 1—VR150 Voltage Regulator; 2—6V6GT Power Audio Amplifier; 1—5U4G Rectifier; 1—6J5 Beat Frequency Oscillator; 1—955 (Acorn) High Frequency Oscillator.

### DIMENSIONS AND WEIGHT

Model S-36A—19¼" wide by 9½" high by 15¾" deep. Model S-36A with military type shock mounting—21½" wide by 11¼" high by 15¾" deep. Actual weight 83 pounds. Packed for shipment, 95 pounds.

**MODEL S-37**  
**FM-AM**

The first radio manufacturer to offer a receiver covering both FM and AM at very high frequencies, Hallicrafters has again shown its leadership in designing this superb instrument to operate in the range of 130 to 210 Mc.

The new Model S-37 has been designed to fill the need for very-high-frequency equipment with the performance characteristics of Hallicrafters top communications receivers, and a frequency range extending above 200 Mc. Basically similar to the Model S-36A this new receiver incorporates the latest developments in v.h.f. circuit design and provides sensitivity and selectivity in the range from 130 to 210 Mc. that is in every way comparable to the performance of fine communications receivers on the standard frequencies.

A new pre-loaded gear drive with separate bandspread dial provides ease of tuning, and the entire range of the receiver is covered without band-switching. Two r.f. stages are used and in conjunction with an intermediate frequency of 18 Mc., assure an amazingly high ratio of image rejection. Hermetically sealed transformers and capacitors make the Model S-37 suitable for use in any climate.

### FEATURES

(1) Frequency range continuous from 130 Mc. to 210 Mc. (2) Main tuning dial accurately calibrated in megacycles. (3) Mechanical bandspread dial. (4) Two r.f. stages with acorn tubes. (5) A.v.c. switch. (6) Send-receive switch. (7) Automatic noise limiter. (8) Separate r.f. and a.f. gain controls. (9) Variable tone control. (10) Provision for break-in operation. (11) 500 or 5000 ohm output. (12) Dual purpose "S" and tuning meter. (13) Oscillator compensated for frequency drift. (14) Antenna compensator mounted on panel. (15) R.f. assembly easily removed for servicing. (16) Inertia flywheel tuning. (17) Hermetically sealed transformers and reactors. (18) All paper condensers oil impregnated and hermetically sealed. (19) Moisture proof wiring. (20) FM/AM switch. (21) Provision for operation on 115 or 230 volts a.c. (22) Line fuse on rear of chassis. (23) Improved gear drive in dust proof housing. (24) "S" meter adjustable from front of panel. (25) 18 Mc. i.f. for maximum image rejection.

### FOURTEEN TUBES

2—954 (Acorn) Radio Frequency Amplifiers; 1—954 (Acorn) Converter-Mixer; 1—6AC7 1st i.f. Amplifier; 1—6AB7 2nd i.f. Amplifier; 1—6SK7 3rd i.f. Amplifier; 1—6H6 a.m. Detector and Automatic Noise Limiter; 1—6AC7 f.m. Limiter; 1—6H6 f.m. Discriminator; 1—6SC7 Audio Amplifier; 1—VR150 Voltage Regulator; 1—6V6GT Power Audio Amplifier; 1—5U4G Rectifier; 1—955 (Acorn) High Frequency Oscillator.

### DIMENSIONS AND WEIGHT

Model S-37—19¼" wide by 9½" high by 14¾" deep. Actual weight, 83 pounds. Packed for shipment—95 pounds.

# hallicrafters

## PORTABLES

**MODEL S-39**

### SKY RANGER

The new Sky Ranger is a 9-tube communications receiver which combines the utmost in convenience with a high order of performance.

Incorporating electrical bandspread, b.f.o. for c.w. reception, automatic noise limiter, and the standard controls found on good communications receivers, the light weight, high sensitivity, and collapsible built-in antenna of the Sky Ranger make it an ideal portable receiver. It may be operated on either 115 volts a.c. or d.c. or on its own self contained batteries. Frequency coverage is continuous from 540 kc. to 30.5 Mc. in 4 bands.

#### FEATURES

(1) Operates from its own self-contained batteries or 115 volts a.c. or d.c. (2) Frequency range 540 kc. to 30.5 Mc. continuous in four bands. (3) Main tuning dial accurately calibrated in megacycles. (4) Separate bandspread dial. (5) R.f. stage used on all bands. (6) Beat frequency oscillator. (7) A.v.c. switch. (8) B.f.o. switch. (9) Send-receive switch. (10) Automatic noise limiter. (11) Separate r.f. and a.f. gain controls. (12) Collapsible built-in antenna. (13) Moisture-proof wiring. (14) Components impregnated for use in tropical climates. (15) Neon on/off indicator to prevent waste of batteries. (16) Permeability tuned r.f. and i.f. stages. (17) Plug-in type filter capacitors. (18) Completely rainproofed for outdoor use.

#### NINE TUBES

1—1T4 r.f. Amplifier; 1—1R5 Mixer; 1—1P5GT 1st i.f. Amplifier; 1—1P5GT 2nd i.f. Amplifier; 1—1H5GT 2nd Detector, first Audio Amplifier and a.v.c.; 1—1H5GT Beat Frequency Oscillator, Automatic Noise Limiter; 1—3Q5GT 2nd Audio Amplifier; 2—35Z5GT Rectifiers.

#### DIMENSIONS AND WEIGHT

Cabinet alone 7¼" high by 8¾" wide by 13½" deep. Overall—8½" high by 8¾" wide by 15¼" deep. \* Model S-39—28 pounds with batteries. Ship. wt., 31 lbs.

**MODEL RE-1**

### SKY COURIER

The Hallicrafters Sky Courier, Model RE-1, sets a new standard for portable broadcast receivers. Built to the same exacting specifications as Hallicrafters communications receivers, the RE-1 combines unusual sensitivity and selectivity on the standard and short wave broadcast bands with ruggedness, convenience, and portability. The Sky-Courier employs high-Q iron core inductances in all r.f. and i.f. circuits, operates from its own self-contained batteries or from 115 volts a.c. or d.c., and is mounted in a sturdy metal cabinet with recessed control panel affording maximum protection against accidental damage. The new Hallicrafters portable is truly an ideal receiver for those who demand the utmost in long distance performance.

#### FEATURES

(1) Operates from its own self contained batteries or 115 volts a.c. or d.c. (2) Frequency range 500 kc. to 1600 kc., 2.8 Mc. to 7.8 Mc., 7 Mc. to 19 Mc. (3) Main tuning dial accurately calibrated in megacycles. (4) Separate bandspread dial. (5) High-Q iron core inductances throughout assure maximum sensitivity. (6) Dual audio output stages, combining economy on battery operation and maximum output on power line operation. (7) Components impregnated for use in tropical climates. (8) Self contained 5" PM speaker, moisture resistant cone. (9) Recessed control panel for protection and convenience. (10) Antenna carried on reel on rear of cabinet. (11) Plug-in type filter capacitors. (12) Special socket for line cord provides automatic changeover from a.c./d.c. to battery operation.

#### SEVEN TUBES

1—1R5 Mixer; 1—1N5GT 1st i.f. Amplifier; 1—1N5GT 2nd i.f. Amplifier; 1—1H5GT 2nd Detector, a.v.c. and 1st Audio Amplifier; 1—50L6GT Audio Power Amplifier for a.c./d.c. operation; 1—3Q5GT Audio Power Amplifier for Battery Operation; 1—35Z5GT Rectifier for a.c./d.c. Operation.

#### DIMENSIONS AND WEIGHT

Cabinet: 10½" high by 15" wide by 8" deep. Model RE-1: 30 pounds with batteries. Ship. wt., 34 lbs.

# hallicrafters

**MODEL HT-4E**

## 450 WATT TRANSMITTER

Hallicrafters' Model HT-4E transmitter has the most distinguished war record of any piece of radio communication equipment. First produced several years before Pearl Harbor and designed to meet the requirements of the most exacting amateur operators, the Model HT-4 was selected as the transmitter for the SCR-299 mobile radio station. This famous Signal Corps unit, built by Hallicrafters, has been acclaimed by high military authorities as "the best piece of radio equipment in any army."

The performance of this superb transmitter on every battle front and under the most adverse conditions has become one of the great legends of the war. Originally intended for use as a mobile unit over ranges of a few hundred miles, the SCR-299 so far surpassed expectations that it was soon operating in long distance service over thousands of miles. Commanding officers in the field diverted many of them to use as fixed headquarters stations. SCR-229's were set up as permanent broadcast transmitters in the far cor-

**SPEECH AMPLIFIER**

**MODEL HT-5E**

ners of the earth, and, dismantled from their trucks, they have been flown into the most remote outposts, there to establish vital communications. All of these outstanding accomplishments were made possible by the sterling performance and rugged construction of the HT-4 and its successors.

Radio operators who were acquainted with the pre-war Model HT-4 are not surprised at its wartime achievements but they will be more than pleased with the many refinements and conveniences now available in the new Model HT-4E. Like other Hallicrafters products, this transmitter has undergone a continuous series of modifications and improvements to cope with the hazards of war and most of these refinements will prove as valuable to the amateur operator as they have to the Signal Corps. Among these wartime changes are: adoption of vacuum padding capacitors for low frequency operation, re-design of exciter tuning units to permit v.f.o. as well as crystal-controlled operation, addition of guide channels to make the insertion of tuning units easy and positive, addition of a remote control relay to switch from phone to c.w. and vice-versa, use of a side-tone oscillator in the speech amplifier to permit monitoring of c.w. transmissions, addition of locking rings to hold tubes firmly in position, slight re-design of cabinet for greater rigidity and many others. Refined and strengthened, battle tested under every conceivable hardship, and built by the thousands for service on every continent, the Hallicrafters HT-4E is ready for the re-opening of amateur radio.

## FEATURES

1. Coils available for frequency range 1.5 Mc. to 18 Mc.
2. Power output 450 watts c.w., 325 watts phone (continuous operation).
3. Oscillator and buffer stages may be pretuned for any three operating frequencies and selected by a panel switch.
4. High level class B modulation.
5. Plug-in pre-tuned r.f. exciter units.
6. Transmitter may be remotely controlled and keyed from speech amplifier.
7. Crystal or v.f.o. operation.
8. All operating controls on front panel.
9. Phone-c.w. operation controlled by single switch.
10. Break-in operation provided for.
11. Metering of all exciter stages and power amplifier grid current through meter switching.
12. All components plainly identified.
13. Voltage regulated oscillator power supply.
14. Optimum LC ratio on all bands due to plug-in vacuum padding condenser.
15. Heavy duty components used throughout.
16. Compact, unit style construction for maximum efficiency.
17. Filament voltage adjustment.
18. Modulator bias adjustment.
19. Filament power switch.
20. Exciter power switch.
21. Plate power switch.

# hallicrafters

## HT-4E (continued)

22. High voltage protect switch.
23. Overload reset button.
24. Phone-c.w. switch.
25. Four power supplies.
26. Dual overload relays in high voltage supply.
27. Phone-c.w. relay.
28. Plate power relay.
29. Filament voltmeter on power amplifier.
30. Power amplifier plate current meter.
31. All fuses on front panel.
32. Dial lock on power amplifier tuning.
33. Guides for easy insertion of r.f. exciter units.
34. Tuning chart pocket on panel.
35. Modulation limiter on speech amplifier.
36. Modulator plate meter in speech unit for monitoring.
37. Side-tone oscillator (keying monitor).

### TWENTY THREE TUBES

1—6V6GT Crystal or v.f.o. Oscillator; 1—6L6 Intermediate Amplifier; 2—807 Buffer Amplifiers; 1-250th r.f. Power Amplifier; 3—VR-150 Voltage Regulators; 2—5Z3 Rectifiers; 2—100th Class B Modulators; 2—2A3 Class B Drivers; 2—866 High Voltage Rectifiers; 1—6SQ7 Microphone Amplifier; 1—6J5 Speech Amplifier; 1—6SN7GT Phase Inverter; 1—6SN7GT Push-pull Output; 1—6SR7 Modulation Limiter; 1—6SN7GT Sidetone Generator; 1—80 Speech Amplifier Power Supply Rectifier.

### CONTROLS

Plate tuning; Excitation meter switch; Band switch; CW/Phone switch; Overload reset; Filament power; Exciter plate power; High voltage protect; Plate power; Filament voltage; Modulator bias. On speech amplifier: Gain; Mod. limiter; Sidetone on/off; Trans. on/off.

Note: three tuning units may be plugged into exciter unit at one time. Each unit has controls for oscillator, doubler, and intermediate amplifier. These are pre-tuned and the desired channel is selected by the bandswitch.

### METERS

P. A. plate; Excitation meter; Filament voltage; Modulator plate meter (on speech amplifier).

### EXTERNAL CONNECTIONS

A.c. plug and cord, antenna terminals, sockets for speech amplifier input and power; key and microphone inputs on speech amplifier panel.

### PHYSICAL CHARACTERISTICS

All components of the HT-4E are mounted on heavy steel chassis, finished in gray lacquer. Cabinet is of heavy gauge steel, finished in black wrinkle. Speech amplifier is in its own table model cabinet, finished in black wrinkle.

### DIMENSIONS

Model HT-4E overall—32 $\frac{3}{8}$ " wide by 39 $\frac{7}{8}$ " high by 21 $\frac{3}{8}$ " deep.

### WEIGHT

Model HT-4E—412 pounds. Packed for shipment—500 pounds.

MODEL AT-2

## ANTENNA TUNING UNIT

Designed for use with a two wire transmission line, this unit employs the well known pi-section network. Has heavy duty capacitors and ceramic insulated plug-in inductances and is equipped with an antenna change-over relay to permit the use of one antenna for transmitting and receiving.

### DIMENSIONS

Model AT-2 overall: 22" wide by 9" high by 16 $\frac{1}{2}$ " deep.

### WEIGHT

Model AT-2—35 pounds. Packed for shipment—39 pounds.

MODEL AT-3

## ANTENNA TUNING UNIT

This unit which was used in recent versions of the SCR-299 represents an outstanding achievement in high-frequency design. Covering all frequencies between 1.5 and 18 Mc. without the use of plug-in inductances, the Model AT-3 will tune any single wire antenna from a fifteen foot whip to a long wire. This unit is ceramic insulated to withstand the high r.f. voltages which are generated when antennas are operated far below their fundamental frequencies and will prove invaluable to the operator who is compelled to use an antenna of inadequate size.

### DIMENSIONS

Model AT-3 overall: 10 $\frac{1}{4}$ " wide by 14 $\frac{1}{4}$ " high by 24" deep.

### WEIGHT

Model AT-3—48 pounds. Packed for shipment—56 pounds.

# hallicrafters

## TRANSMITTERS

Designed for maximum flexibility, the Model HT-9 is an ideal self-contained medium-powered transmitter, requiring only a microphone or key, antenna, and 115 A.C. source of power.

Exciter coils and crystals for five bands can be plugged in, pretuned, and selected at will by means of a panel switch. Simultaneous metering of amplifier grid and plate circuits is provided, as well as a meter that may be switched into either the exciter or modulator cathode. All controls are conveniently arranged on the panel. A safety interlock switch is provided for protection against accidental shock.

**100 WATT MODEL HT-9**

### FEATURES

1. Frequency range 1.5 to 18 Mc. and amateur 28 Mc. band.
2. Power output 100 watts on c.w., 75 watts on phone.
3. Five operating frequencies may be pre-set in the oscillator and buffer-doubler stages and selected at will.
4. 100 percent modulation with low distortion.
5. All operating controls on front panel.
6. Metering of cathode current of exciter or modulator, power amplifier grid, and power amplifier plate.
7. Input for medium level, high impedance microphone.
8. Carrier hum more than 40 db. below 100% modulation.
9. Audio response flat within 3 db. from 100 to 5000 cycles.
10. Antenna coil for resistive load from 10 to 600 ohms.
11. Line fuses mounted on rear of chassis.
12. Convenient table mounting.
13. Rugged construction and oversize components assure dependable operation.

### FOURTEEN TUBES

1—6L6 Crystal Oscillator (used above 8 Mc. only); 1—6L6 Crystal Oscillator or doubler; 1—814 Final r.f. Amplifier; 1—6SJ7 1st Speech Amplifier; 1—6J5 2nd Speech Amplifier; 4—6L6 Push-pull Parallel Modulator Stage; 2—5Z3 Rectifiers; 1—80 Rectifier; 2—866 Rectifiers.

### CONTROLS

Audio gain; (speech amplifier) Off; Cathode current-Exc.-Mod; Plate pwr. On/Off; Fil. pwr. On/Off; C.W.-Phone; Bandswitch; Transmit-Standby; Plate tuning.

### DIMENSIONS AND WEIGHT

Model HT-9, overall: 29½" wide by 12½" high by 20½" deep. Weight: 120 pounds. Packed for shipment 160 pounds.

**25 WATT MODEL HT-6**

Filling a long felt need for a low cost high performance transmitter, the HT-6 offers most of the desirable features found in Hallicrafters' larger units. Complete sets of coils and crystal for any three bands may be plugged in, pretuned, and selected at will by means of a panel switch. All operating controls are conveniently arranged on the front panel. Metering of all circuits is provided by a switch which places the meter in the proper circuit. E.c.o. operation is available at any point in the amateur bands if desired. A high quality audio system assures complete modulation, and is designed for use with any medium level microphone. Normally operated from 115 A.C. line, a special socket permits emergency use with external power supply.

### FEATURES

1. Frequency range, amateur bands from 1.7 Mc. to 60 Mc.
2. Normal power output 25 watts, phone or c.w.
3. Three operating frequencies may be pre-set in the transmitter and selected by means of the bandswitch.
4. 100 per cent modulation with low distortion.
5. All operating controls on front panel.
6. Metering of all circuits through use of multirange meter.
7. Input for medium level, high impedance microphone.
8. Carrier hum more than 40 db. below 100% modulation.
9. Frequency response flat within 3 db. between 125 and 5000 cycles.
10. Antenna coil to match all common resistive loads.
11. Line fuse mounted on rear of chassis.
12. Convenient table mounting.

### NINE TUBES

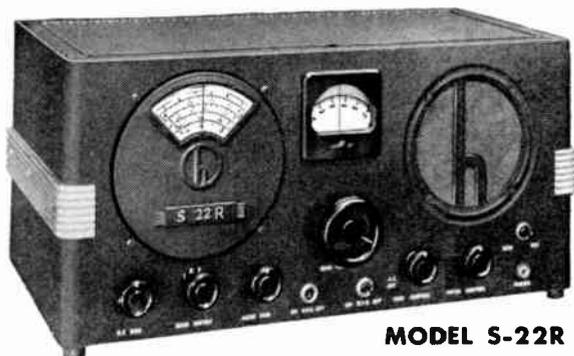

1—6J5 Oscillator (56 Mc. band only); 1—6L6 Crystal or e.c.o. Oscillator; 1—807 Power Amplifier; 1—6SQ7 Speech Amplifier; 1—6SC7 Phase Inverter; 2—6L6G Modulators; 2—5Z3 Rectifiers.

### DIMENSIONS AND WEIGHT

Model HT-6—20" wide by 9" high by 15" deep. Weight—packed for shipment—67 pounds.

# hallicrafters

## MARINE EQUIPMENT

**MODEL S-22R**

### THE SKYRIDER MARINE

#### EIGHT TUBES

1—6SK7 r.f. Amplifier; 1—6K8 1st Detector-Mixer, h.f. Oscillator; 1—6SK7 1st r.f. Amplifier; 1—6SK7 2nd r.f. Amplifier; 1—6SQ7 2nd Detector, a.v.c., 1st a.f. Amplifier; 1—25L6 2nd a.f. Amplifier; 1—6J5 Beat Frequency Oscillator; 1—25Z5 Rectifier.

#### DIMENSIONS AND WEIGHT

Cabinet only—18½" long by 8½" high by 9¾" deep.  
Weight, packed for shipment—31 pounds.

Hallicrafters SKYRIDER MARINE, Model S-22R, is specifically designed for marine service, in the range from 16.7 to 2730 meters (18 mc. to 110 kc.). Improved image rejection at the higher frequencies is achieved through the use of 1600 kc. IF amplifier. The directly calibrated main tuning dial eliminates the use of complicated charts and tables. An efficient mechanical bandspread with separate dial provides easy logging. Built for 110 volt a.c.-d.c. operation.

#### CONTROLS

R.f. gain; Band switch; Audio gain; A.v.c. On/Off; Main tuning; B.f.o. On/Off; Tone control; Pitch control; Send-Receive.

#### FEATURES

(1) Frequency range 110 kc. to 18 Mc. continuous except 1500 kc. to 1700 kc., in four bands. (2) Main tuning dial accurately calibrated in megacycles. (3) Mechanical bandspread with separate dial. (4) Beat frequency oscillator, pitch variable from front panel. (5) A.v.c. switch. (6) B.f.o. switch. (7) Send-receive switch. (8) Separate r.f. and a.f. gain controls. (9) Variable tone control. (10) Inertia flywheel tuning. (11) A.c./d.c. operation. (12) 1600 kc. iron core i.f. for maximum image rejection. (13) Internal rubber shock mounted 5" PM speaker.

### MARINE RADIOTELEPHONE

The Model HT-11 Marine Radiophone is a complete moderately priced ship to shore radio transmitter and receiver. The transmitter can be operated on three frequencies in the marine band of 2000 to 3000 kc. The receiver is manually tuned and covers the standard broadcast band on range No. 1. Range No. 2 covers the marine channels. The separate power supply is designed for 6 or 12 volt DC operation. Power units for other voltages are also available.

#### TRANSMITTER FEATURES

1. Instant selection of any three transmitter frequencies, crystal controlled.
2. Twelve watts output.
3. Transmitter may be used in the range 2000 kc. to 3000 kc.
4. Can be used with any length antenna.
5. Convenient "push to talk" operation.
6. Separate economical low drain power supply.
7. Rust and corrosion protected throughout.
8. Small size for ease of installation.
9. Can be supplied for use with any power source.
10. Panel mounted chart for recording of operating frequencies.

#### RECEIVER FEATURES

1. Two bands; broadcast 550 kc. to 1700 kc. and marine 2000 kc. to 3000 kc.
2. Receiver output may be switched to speaker or handset.
3. Built-in moisture resistant PM speaker.
4. Illuminated, easily read tuning dial.

**MODEL HT-11**

### THE ENSIGN 12 WATT

#### NINE TUBES

Receiver: 1—6SK7 r.f. Amplifier; 1—6K8 1st Detector-Mixer, h.f. Oscillator; 1—6SK7 i.f. Amplifier; 1—6SQ7 2d Detector, a.v.c.; 1st a.f. Amplifier; 1—6K6G 2nd a.f. Amplifier.  
Transmitter: 1—6V6 Crystal-controlled Oscillator; 1—807 r.f. Amplifier Output Stage; 2—6V6 Push-pull Modulator Stage.

#### DIMENSIONS AND WEIGHT

HT-11 only—14½" wide by 9½" high by 9¼" deep. D.c. Power Supply with Cover—13" wide by 9½" high by 8¾" deep. A.c. Power Supply with Cover—9¼" wide by 7¾" high by 7¾" deep.  
Model HT-11—31 pounds. D.c. power supply—21 pounds. A.c. power supply—21 pounds. Add three pounds to any of above for shipping weight.

# hallicrafters

## MARINE RADIOTELEPHONE

### THE COMMODORE MODEL HT-14

#### TWENTY TUBES

Transmitter: 1—6L6G Crystal Oscillator; 2—807 Parallel r.f. Amplifier; 1—12J5GT Speech Amplifier; 4—6L6G Modulators; Receiver: 1—6SK7GT r.f. Amplifier; 1—6SA7GT 1st Detector; 1—6SK7GT I.f. Amplifier; 1—6H6GT 2nd Detector, a.v.c. and Noise Limiter; 1—6SK7GT 1st Audio Amplifier; 1—6K6GT 2nd Audio Amplifier; 1—6J5GT High Frequency Oscillator.  
Power Supply: 1—80 Rectifier; 4—5Z3 Rectifiers.

#### POWER SUPPLY

Power supply combinations for use on four different voltages are available. The 115 volt a.c. power supply unit is mounted in a separate cabinet. The 32 volt (or 110 volt) d.c. models include a 32 volt (or 110 volt) d.c. rotary converter. The 12 volt d.c. model includes a 12 volt dynamotor.

#### PHYSICAL CHARACTERISTICS

The HT-14 Radiotelephone is mounted in a steel cabinet, divided into two sections which are held together by heavy clamps. The upper section contains the radio frequency components of both transmitter and receiver. The lower section holds the speech amplifier and modulator. The loud speaker is mounted in the center of the lower panel and the handset is hung in a bracket. All operating controls and switches are conveniently placed. The power supply unit is mounted in a separate cabinet.

#### ANTENNA REQUIREMENTS

The Model HT-14 Radiotelephone is designed to operate with any antenna from a 15 foot whip to a long wire. With single masted boats, an insulated forestay makes a satisfactory antenna. On boats having two masts, the antenna should be supported between the mast heads.

For dependable service under the most adverse conditions a higher powered transmitter is necessary. The New Hallicrafters COMMODORE, Model HT-14 Marine Radiotelephone incorporates every feature experience has shown desirable for ship-to-shore and ship-to-ship telephone service. A commercial adaptation of the famous Hallicrafters-built SCR-543, the HT-14 basic design has been literally "battle tested." With six crystal controlled channels selected simultaneously in both transmitter and receiver and an output of 45 watts capable of 100 percent amplitude modulation, the HT-14 is an ideal medium power marine radiotelephone.

#### TRANSMITTER FEATURES

1. Instant selection of any 6 operating frequencies, crystal-controlled in both transmitter and receiver.
2. 45 watts output.
3. Frequency range, 1680 to 4450 kc.
4. Any antenna from 15 feet to a long wire may be used.
5. "Push to talk" switch on handset.
6. All components rust and corrosion resistant.
7. Metering of antenna current, final amplifier grid and plate, and modulator plate provided.
8. Entire unit easily removable for ease of servicing.
9. May be operated from 115 volts a.c., 12, 32 or 115 volts d.c.
10. Chart mounted on panel for recording of operating frequencies.
11. All operating adjustments may be made at front of unit.

#### RECEIVER FEATURES

1. Two ranges; 1680 to 2750 kc. and 2750 to 4450 kc., either crystal controlled or manually tuned.
2. Crystal receiver frequencies switched simultaneously with those of the transmitter.
3. Iron core, high-Q inductances used in r.f., detector, and oscillator circuits provide maximum gain.
4. Exceptionally flat automatic volume control.
5. Newly developed diode noise limiter and audio filter circuit.
6. Receiver output may be used on handset or speaker.
7. 5" PM speaker with moisture resistant cone.

#### INSTALLATION

A universal type of shock mounting is furnished with the HT-14 permitting installation either on a bulkhead or table. Special screw type fasteners hold the HT-14 to the shock mounting and permit its easy removal for servicing.

#### DIMENSIONS (OVERALL) AND WEIGHTS

Main cabinet—23" high by 21" wide by 16 $\frac{1}{4}$ " deep.  
Power supply cabinet—9 $\frac{3}{8}$ " high by 16" wide by 15" deep.  
These measurements include protruding parts.

Note: Shock mounts add 2 $\frac{3}{4}$ " to height or depth according to type of installation.

Main cabinet—110 pounds.

115 volt a.c. Power supply—67 pounds.

Combined shipping weight—275 pounds.

For d.c. operated models, add 55 pounds to shipping weight.

SINCE  
1933

**RME**

FINE COMMUNICATIONS EQUIPMENT

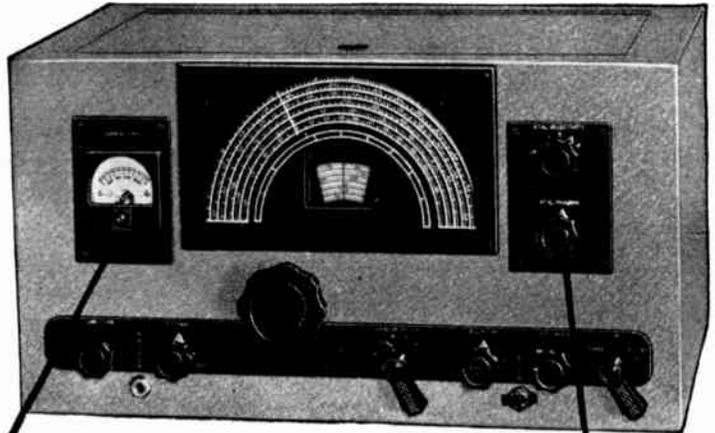

**RADIO MFG. ENGINEERS, INC.**

*Peoria 6, Illinois U. S. A.*

# 41 & 43

## Communications Receivers

The RME 41 & 43 receiver models are identical with the exception of crystal filter and meter assemblies. The Model No. 41 is equipped with provision for installing a plug-in crystal filter and meter at the convenience of the individual listener. The 43 comes fully equipped with these units.

The RME 41-43 series receivers have been built for practical, all-around reception of all frequency channels from 550 to 33,000 kilocycles. Primarily designed as accurately calibrated, vernier tuned, sensitive communications receivers, these models are at the same time unusually convenient for purely private reception purposes.

Nine tubes are incorporated in the RME-41-43 using the superheterodyne circuit. Local tubes, proven for their ideal high frequency tuning characteristics, have been chosen for every radio-frequency, intermediate-frequency, and audio function in these instruments. Coupled with such innovations as a centrally located tuning condenser with triple spaced oscillator plates and with temperature compensated padder condensers, these local tubes produce incomparable results... especially on the higher frequency tuning channels.

Easily installed plug-in crystal filter and signal level

meter are provided for the purpose of converting the RME-41 model into a complete RME-43. Other than this one exception the two models are identical in workmanship, components, and circuit construction.

The RME 41-43 series of receivers introduces for the first time in any RME receiver, a radically new type tuning system in which both the general coverage dial and bandspread dial are operated directly from one control. Termed the CAL-O-MATIC system, this innovation provides accurate direct calibration of the 5 amateur bands from 160 to 10 meters... and in addition, this system permits arbitrary calibration of ALL frequencies within the overall tuning range. All calibration points, whether bandspread or general tuning, are located automatically as these receivers are tuned. There are no dials to be pre-set and no padders to be pre-adjusted... all that is necessary for accurate tuning is the adjustment of a single tuning control.

**TUBES USED: 7B7 r.f.; 7J7 det. & osc.; 7B7 i.f., 7B7 i.f.; 7A6 limiter; 7B6 detector & B.O., 7C7 a.f.; 7C5 beam power output; 80 rectifier.**

- ★ 550-33,000 KC. in 6 bands

- ★ 455 KC. i.f.
- ★ 6 position variable crystal selectivity
- ★ Excellent signal-to-noise ratio
- ★ Uniform sensitivity

- ★ Temperature compensated oscillator components
- ★ Double antenna input
- ★ 4 watts audio output
- ★ R.F. gain control, audio level control, standby switch, band change switch, B.O. pitch control, crystal phasing control, tone control, and headphone jack
- ★ Gray crinkle finish with black trim

RME-41 Communications Receiver, two-tone only, in a gray crackle finished cabinet measuring 10"x10 1/2"x19" with black trim, 9 tubes, less crystal filter and signal level meter. This model is equipped for easy installation of filter and meter. (See Codes: POMMY & PANER below.) 115 volt 50 to 60 cycle operation. With speaker in baffle.

Code: PONIS ..... Net \$145.80

Plug-in signal level meter, fully calibrated in R-db units, for installation in the RME-41 receiver. (Includes a new panel plate.)

Code: PANER ..... Net \$10.80

Plug-in crystal filter complete with crystal, built as a unit, designed to plug into the RME-41. (Includes a new panel plate.)

Code: TOMMY ..... Net \$14.60

RME-43, mounted in a two-tone gray and black crackle finished cabinet with black trim, measuring 10"x10 1/2"x19", complete with tubes, crystal filter, and signal level meter. For 115 volt 50 to 60 cycle operation. With speaker in baffle.

Code: PILAR ..... Net \$166.00

## RME ACCESSORY UNITS FOR RECEIVING EQUIPMENT

**PRESELECTOR**  
DB-20

The addition of the DB-20 PRESELECTOR will improve the operating characteristics of any standard communications receiver enormously. Its addition adds 2 stages and 3 tuned circuits of radio frequency amplification ahead of the instrument.

Using 2-6K7 tubes in a high gain and completely stable circuit, this unit provides a signal step up of over 25 db operating on all frequencies from 550 to 33,000 kilocycles; at the same time it increases the ratio between signal and image until, at a 14 megacycle operating frequency this proportion becomes 50,000 to 1.

Contained in one cabinet, 9 $\frac{1}{4}$ " high, 9 $\frac{1}{2}$ " wide, and 10 $\frac{1}{2}$ " deep, finish—black or gray crinkle—power supply incorporated, antenna changeover switch, velvet smooth planetary tuning control, and 6 position band change switch.

**DB-20** complete with tubes and interconnecting plug and cable, ready for operation from 110-120 volt, 50-60 cycle source.

Code: MONEL . . . . . Net \$59.30

**INVERTER**  
LF-90

The LF-90 is a conversion unit designed for the purpose of expanding the tuning range of a standard radio receiving set to include reception of signals in the 90 to 608 kilocycles band. The only prerequisite for using the LF-90 for this purpose is that the receiver to be converted, must be capable of tuning to a conversion frequency of 1550 KC.

The LF-90 is ideal for simple and economical reception of low frequency signals such as beacon stations, weather reports, aircraft, and ship-to-shore radio telephones. Its gain is about 15 db over that of a standard receiving set. Its selectivity is quite adequate for the requirements of this type of reception.

This unit is of small size neatly housed in a black or gray metal cabinet measuring 4" wide, 9 $\frac{1}{4}$ " high, and 10 $\frac{1}{2}$ " deep. It has its own power supply, uses two tubes, a 6K8 and a 6ZY5G, and is provided with a convenient antenna changeover switch.

**LF-90** complete with tubes and interconnecting plug and cable, ready for operation from a 110-120 volt, 50-60 cycle source.

Code: LIFER . . . . . Net \$29.70

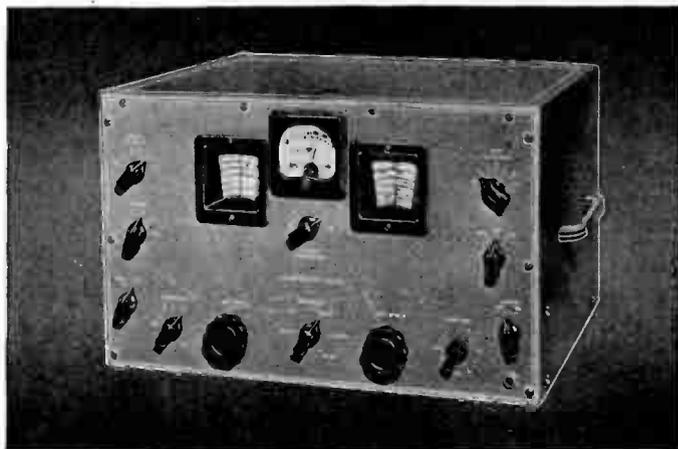

# HAMMARLUND

## "HQ-120-X" AMATEUR RECEIVER

THE HAMMARLUND "HQ-120-X" meets the most critical demands of amateur and professional operators. Hammarlund engineers have gone beyond ordinary practice in designing this new and outstanding receiver. This ultra-modern 12-tube superheterodyne covers a continuous range of from 31 to .54 mc. (9.7 to 555 meters) in six bands, taking in all important amateur, communication, and broadcast channels. The "HQ-120-X" is not to be confused with modified broadcast sets. Two years were required to develop it. This is a special receiver with special parts throughout. Every wave range is individual—that is, each range has its own individual coil and a tuning condenser of proper value for maximum efficiency; thus, including the broadcast band does not decrease efficiency at high frequencies. Besides having all the necessary features for perfect short wave reception, such as A.V.C., beat oscillator, send-receive switch, phone jack and relay terminals, the "HQ-120-X" also includes a new and outstanding crystal filter circuit which is variable in 6 steps from full

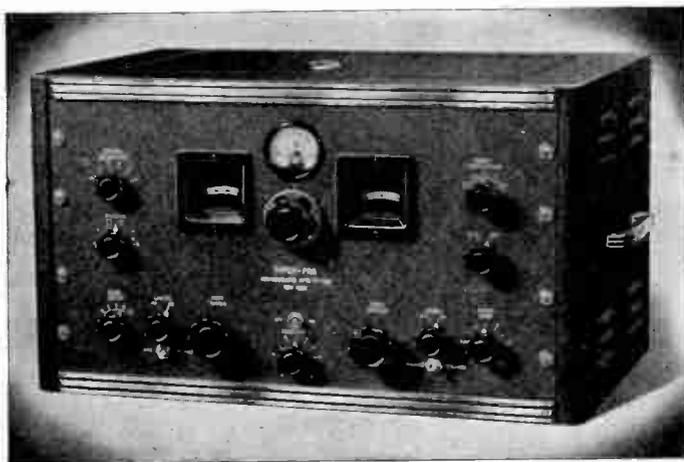

band-width to razor edge selectivity. This permits the use of the crystal filter for the reception of both voice and music. It is no longer necessary to contend with serious heterodyne interference. These annoying disturbances can be phased out with the phasing control on the panel. Other features include a new and accurate "S" meter circuit for measuring incoming signal strength; antenna compensator to compensate for various antennas, and 310 degrees band-spread for each amateur band from 80 to 10 meters. The band spread dial is calibrated in megacycles for each of these amateur bands. The main tuning dial is calibrated in megacycles throughout the entire range of the receiver. Rock Adapter \$6.00 extra. Standard models finished in gray.

Prices Include Speaker and Tubes

Code	Type	Tuning Range	Speaker	Net Price
HQ-120-X	Crystal	31 — .54 mc.	10" P.M. Dyn.	\$168.00

## THE "SUPER-PRO"

THIS new 18-tube "SUPER-PRO" includes all the outstanding features which have made the "Super-Pro" famous, and in addition many recent developments have been added. The new "Super-Pro" has a variable selectivity crystal filter. This crystal filter has five positions of selectivity—3 for phone and 2 for CW. The variable crystal filter, in addition to the variable band width I.F., provides a selectivity range of from less than 100 cycles to approximately 16 kc. The new "Super-Pro" also has an improved noise limiter designed to minimize interference caused by automobile ignition systems and disturbances of similar nature. Maximum image suppression is obtained with two stages of high selectivity tuned R.F. ahead of the first detector. Three stages of I.F. are employed and there are three stages of high fidelity audio amplification resulting in an output of approximately 16 watts. A new and improved "S" meter has been installed in the "Super-Pro" for accurately reporting relative signal strength. Other features include full band-spread on all bands; beat oscillator; send-receive switch; relay connections; phone connections; connections for phono-pickup; beautifully finished modernistic cabinet. The sensitivity of the "Super-Pro" is better than 1 microvolt. Available in rack mounting type at \$10.50 extra.

## TR-4 Ultra High Frequency 2 1/2 Meter TRANSMITTER-RECEIVER

Designed for either fixed station operation or as a mobile unit in automobile, truck, boat or airplane . . . the TR-4 requires a 6 volt battery or 110 volt, 60 cycle A.C. power supply. Its separate receiver employs a Hytron HY-615 as a super-generative detector, while the transmitter utilizes a Hytron HY-75 as an ultra-high frequency oscillator. Operating at approximately 15 to 20 volts, the detector becomes extremely sensitive, and reduces receiver radiation to an absolute minimum. The receiver portion of this Abbott TR-4 incorporates a specially designed circuit in addition to numerous mechanical refinements, including front of panel control variable inductive coupling, variable sensitivity control, audio volume control, etc. . . . Absolute separation of transmitter and receiver sections eliminates the inconvenience of retuning when switching from SEND to RECEIVE during a contact. A ganged antenna send-receive switch is automatically operated when the single, master SEND-RECEIVE switch is operated, enabling the use of a common antenna for both the transmitter and the receiver. The 5 inch PM speaker is self-contained.

● **FREQUENCY:** 112 to 116 MC ● **RANGE:** Varying from 5 to 75 miles, depending upon terrain. Contacts up to 150 miles have been completed in field tests ● **TUBES USED:** One each of Hytron HY-615, Hytron HY-75, 7F7, 6V6 or 6L6 ● **MICROPHONE:** Any good single button microphone.  
TR-4—Overall size 9" x 8" x 4 1/2", less tubes and power supply. Net Price to Amateur

**\$3900**

## HIGH POWER — 2 1/2 METER MOBILE OR FIXED STATION MRT-3 TRANSCEIVER

New, redesigned MRT-3—20 WATTS INPUT; rugged and compact; low priced; ideal for use in automobile, truck, boat or airplane; simple to install and operate; satisfactory operating range from 5 to 50 miles, depending upon terrain and antenna.

● **FOR MOBILE OPERATION:** Any standard 300 volt, 100 MA Vibrator power supply with filter added ● **FOR FIXED STATION:** Any good AC power supply having an output of 300 volts at 100 MA and 6.3 volts at 3.5 amperes ● Antenna coupling is mounted on Polystyrene rod and can be varied by pushing in or out ● **TUBES REQUIRED, HY-75, 6C5, and 6L6 (or 6V6).** MRT-3—9" x 8" x 4" in size, with self-contained P.M. Dynamic speaker, less tubes and power supply.

Net Price to Amateur

**\$2940**

## 2 1/2 METER PORTABLE—MOBILE—FIXED STATION DK-3 TRANSCEIVER

The DK-3 features INDUCTIVE ANTENNA COUPLING, continuously variable and controlled from a special coupling knob on the front panel. This enables use of maximum power while the transmitter is in operation and permits a wide degree of receiver control. Weak signals, lost under ordinary conditions, can be worked. Effective range varies from 2 to 30 miles, depending upon terrain.

### SPECIFICATIONS

● **FREQUENCY:** Covers the amateur 2 1/2 meter band (112 to 116 mc.) ● **FOR PORTABLE OR MOBILE BATTERY OPERATION:** Three 45 volt B batteries (Eveready No. 482 or Burgess M30) and four 1 1/2 volt batteries (Eveready No. 742 or Burgess 4FH) ● **FOR FIXED STATION, 110 VOLT AC OPERATION:** Use an AC power supply giving 135 to 180 volts DC output ● **INDUCTIVE ANTENNA COUPLING:** Variable antenna coupling knob on front panel permits maximum power in transmit position and enables flexible receiver control for both weak and powerful signals ● **ANTENNA:** For portable operation; two pieces of copper or aluminum tubing approximately 17 inches long or an adjustable vertical antenna. For fixed station operation; most standard antennas will work with the DK-3 variable inductive coupling ● **ONLY TWO INEXPENSIVE TUBES:** 6G6G as Audio Amplifier (to receive) or as Oscillator (to transmit); 6J5GT as Super Regenerative Detector (to receive) or as Oscillator (to transmit) ● **MICROPHONES AND HEADPHONES:** Use any good single button 200 ohm carbon mike and any standard headphones. Handsets should incorporate 200 ohm microphone and high impedance phone ● **SIMPLE OPERATION:** One volume control, with on-off switch, for both receive and transmit positions; microphone and headphone jacks; variable antenna coupling knob; ceramic antenna insulators; transmit and receive switch; large easy-tuning knob.

DK-3 Transceiver for 2 1/2 meter operation. Completely self-contained, battery operated, ultra high frequency radio-telephone transmitter or receiver. Compact, grey wrinkle finish metal case with sturdy leather handle. Removable back panel for easy access to batteries and tubes. Size, 11" x 11" x 4 1/2". Shipping weight, 11 pounds. Net Price to Amateur

## NATIONAL COMPANY, INC.

# NSA HIGH-FIDELITY SPEECH AMPLIFIER

The NSA is an eight tube amplifier capable of delivering 15 watts of undistorted output. Two input circuits with electronic mixer, and with separate gain controls are provided. The low level circuit has a gain of approximately 125 db and is suitable for crystal microphones, etc. The high level circuit has a gain of approximately 70 db, and is for phonograph pickups, etc.

Normal frequency range is 25 to 10,000 cycles within 2 db, but a tone control is provided which permits attenuating high frequencies or low frequencies, or both. Push pull 2A3's are used in the output with fixed bias obtained from a separate built-in rectifier.

NSA, Table model, two-tone gray finish, complete with tubes. **List \$**

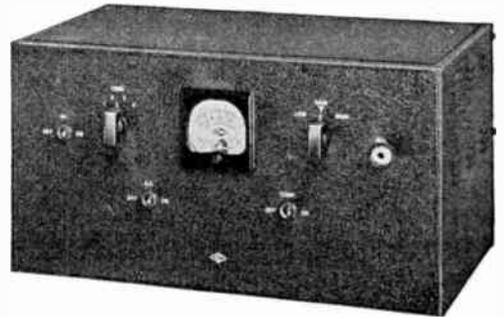

NSA-RA, Rack model on 3/16" aluminum relay rack panel, finish black wrinkle, with tubes. **List \$**

NSA-RS, Rack model on 1/8" steel relay rack panel, finish black wrinkle, with tubes. **List \$**

# NATIONAL NSM MODULATOR

The new Type NSM Modulator Unit is intended particularly for use with the NTX-30 Transmitter, but its many advanced features make it desirable for any modulating job within its 30 watt rating. Typical among its features are Automatic Volume Compression, permitting high modulation levels without danger of overmodulation, its DB meter indicating the amount of compression, its four-position tone control which cuts either highs or lows, or both, or leaves intact the normal range of 50 to 10,000 cycles, and its two separate input circuits.

Four stages of resistance-coupled amplification with 6C6 input, 6D6 second stage, 6F8G phase inverter, and push pull 6L6G output — Power gain approximately 135 db, output 30 watts — 6X5 high voltage rectifier used in Automatic Volume Compression circuit — VR-150 Voltage Regulator. Two separate input circuits, one of which omits the first 6C6 amplifier tube — Frequency response flat from 50 to 10,000 cycles.

NSM, Complete with tubes and mounted in the table model steel cabinet. Finished in black wrinkle. As illustrated above. **List \$**

NSM-RS, Same as above but mounted on 1/8" steel relay rack panel finished in black wrinkle. **List \$**

NSM-RA, Ditto but with 3/16" aluminum panel. Finished in black wrinkle. **List \$**

# NTX-30 TRANSMITTER

The NTX-30 is an exceedingly compact and convenient transmitter having an output of 30 watts on 10, 20, 40 and 80 meters. It employs an efficient exciter system and features a special interlocking push switch in the exciter circuits. AR16-S swinging link type coils described on Page 8 are used in the output stage. Four 6L6's are used as crystal oscillator and doublers, and two 6L6G's are used in the final.

The unit is a self-contained transmitter for CW operation. For phone an external modulator must be used. The NSM described above is ideal for this purpose. Terminals are provided at the rear of the NTX-30 for connecting the modulator.

Structurally, the NTX-30 consists of an exciter with a final stage. Panel control of crystal frequency, interlocking push switch, meter for circuit adjustments, etc. are provided. The NTX-30 has the advantage of a proven design in its circuits, and is ideally suited for use as an exciter-buffer combination whenever higher power is desired.

NTX-30, Table Model Transmitter, complete with all coils, tubes and crystal holder, but less crystal, for operation on 10, 20, 40, and 80 meter bands. **List \$**

NTX-30, RS, Rack Model, same as above but mounted on 1/8" steel panel. Black wrinkle finish. **List \$**

NTX-30, RA, Rack Model, same as above but mounted on 3/16" aluminum panel. Black wrinkle finish. **List \$**

Shipping Weight Approx. 70 Lbs.

*Special combination NTX-30-RS Transmitter and NSM-RS Speech Amplifier mounted in steel cabinet, black wrinkle finish. **List \$***

# NATIONAL HRO

The HRO Receiver is a high-gain superheterodyne designed for communication service. Two preselector stages give remarkable image suppression, weak signal response and high signal-to-noise ratio. Air-dielectric tuning capacitors account, in part, for the high degree of operating stability. A crystal filter with both variable selectivity and phasing controls makes possible adjustment of selectivity over a wide range. Heterodynes and interfering c.w. signals may be "phased out" (attenuated) by correct setting of the phasing control. A signal strength meter, connected in a vacuum tube bridge circuit, is calibrated in S units from 1 to 9 and in db above S9 from 0 to 40. Also included are automatic and manual volume control features, a beat oscillator, a headphone jack and a B+ stand-by switch. Power supply is a separate unit. The standard model of HRO is supplied with four sets of coils covering the frequencies from 1.7 to 30 megacycles. Each coil set covers two amateur bands and the spectrum between. The higher frequency amateur band of each range, by a simple change-over operation, may be expanded to occupy 400 divisions of the 500 division PW instrument type dial.

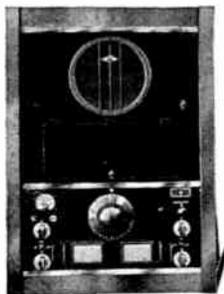

For those who require the high performance of the HRO but do not need its extreme versatility, the HRO Jr. is offered. The fundamental circuit and mechanical details of both receivers are identical, but the HRO Jr. is simplified by omitting the crystal filter, signal strength meter and by supplying coils less the band-spread feature.

The frequency range of both the HRO and HRO Jr. may be extended to 50 kilocycles by using additional coil sets.

A technical bulletin covering completely all details will be supplied on request.

## HRO-C DELUXE COMBINATION

HRO-C, a deluxe receiver installation, see illustration, combines an HRO with an SPC unit (power unit, coil container and loud speaker) in an MRR table rack.

Chromium-plated appearance strips and side trim strips included. **List \$**

SPC, combination of 697 power unit, coil container (5 coil capacity) and 8" PM dynamic speaker. Rack panel, 3/16" x 15 3/4" x 19". Chrome strips included. **List \$**

MRR, table rack, standard width, panel capacity 24 1/2", finish black or gray. Side trim strips included. **List \$**

RACK MODEL

## RECEIVERS

All models of the HRO are supplied with 6.3 volt heater type tubes. Both rack and table models and accessories are finished in black wrinkle enamel.

HRO table model, receiver only, complete with four coil sets. (1.7-4.0, 3.5-7.3, 7.0-14.4, 14.0-30.0 MCS) **List \$**  
HRO, same as above, but mounted on 3/16" x 8 3/4" x 19" aluminum panel. **List \$**

The SW-3U Receiver employs a circuit consisting of one R.F. stage transformer coupled to a regenerative detector and one stage of impedance coupled audio. This circuit provides maximum sensitivity and flexibility with the smallest number of tubes and the least auxiliary equipment. The single tuning dial operates a precisely adjusted two gang condenser; the regeneration control is smooth and noiseless, with no backlash or fringe howl; the volume control is calibrated from one to nine in steps corresponding to the R scale.

**UNIVERSAL MODEL** — The circuit of the SW-3U is arranged for either battery or AC operation without coil substitution or circuit change. Battery operation utilizes two 1N5-G and one 1A5-G tubes. AC operation utilizes two 6J7-G and one 6C5-G tubes; type 5886 AB Power Unit is recommended.

SW-3U, universal model, without coils, phones, tubes or power supply. **List \$**  
5886-AB, Power Supply, 115 V, 60 cycle, with 80 Rectifier. **List \$**  
Shipping Weights: Receiver, 17 lbs. — No. 5886 AB pack, 18 lbs.

PRICES LISTED ON PAGES H-17 AND H-18

# NATIONAL

## NC-200

The National NC-200 is a new communications receiver having a number of features not previously available. Twelve tubes are used in a highly perfected circuit that includes an extremely effective noise limiter. The crystal filter has an exceptionally wide selectivity range for use on both CW and phone, as well as a phasing circuit that makes rejection ratios as high as 10,000 to 1 available even when the interfering signal is only a few hundred cycles from the desired signal. The AVC holds the audio constant within 2 db for signals from 10 microvolts to 100,000 microvolts. The sensitivity of the NC-200 is particularly high, requiring only 1 microvolt input for 1 watt of audio output on the highest frequencies covered by the receiver. Signal-to-image ratio is better than 30 db at ten meters.

There are ten calibrated coil ranges, each with its own scale on the direct-reading dial. Six of these ranges provide continuous coverage from 490 KC to 30 MC. The remaining four ranges cover the 10, 20, 40 and 80 meter bands, each of which is spread over the major portion of the dial scale. Ranges are selected by a panel control knob. A movable-coil system similar to the NC-100 is used. The inertia-type dial drive has a ratio of about 20 to 1.

All models of the NC-200 are suitable for either AC or battery operation, having both a built-in AC power supply and a special detachable cable and plug for battery connection. Removal of the speaker plug disconnects both plate and screen circuits of the audio power stage thus providing maximum battery economy. The B supply filter and the standby switch are wired to the battery terminals, so that the filter is available for vibrator or dynamotor B supplies.

The ten-inch speaker is housed in a separate cabinet specially designed to harmonize with the trim lines of the receiver. The undistorted output is 8 watts.

All features expected in a fine communication receiver are provided. These include CW oscillator, Signal Strength Meter, B-supply switch, phonograph input jack, etc.

**NC-200 TG**, Table Model, two tone gray wrinkle, receiver only

List \$

**NC-2 TS**, Table mounting 10" P.M. Loud Speaker in cabinet to match NC-200 TG above.

List \$

**NC-200 RG**, Rack Model, gray wrinkle 3/16" aluminum panel, receiver only

List \$

**NC-2 RS**, Rack Mounting 10" P.M. Loud Speaker on 10 1/2" panel to match NC-200 RG above.

List \$

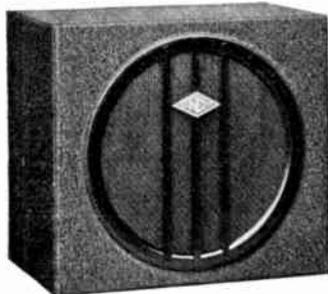

# NATIONAL NEW

## NC-45

The NC-45 receiver is an eight tube superheterodyne combining capable performance with low price. Features include a series valve noise limiter with automatic threshold control, tone control, CW oscillator, separate RF and AF gain controls, and AVC. Power supplies are self contained except for the battery model which must have an external source of heater and plate power, such as batteries or vibrapack.

A straight-line-frequency condenser is used in conjunction with a separate band spread condenser. This combination, plus the full vision dial calibrated in frequency for each range covered and a separate linear scale for the band spread condenser, makes accurate tuning easy. Both condensers have inertia type drive. A coil switch with silver plated contacts selects the four ranges from 550 KC to 30 MC. Provision is made for either head phone or speaker.

Like all receivers which have no preselector stage, the NC-45 is not entirely free from images. However, where price is an important consideration, the NC-45 will be found a very satisfactory receiver.

Copyright by U. C. P., Inc.

**NC-45** — Receiver only, complete with tubes, coils covering from 550 KC to 30 MC for 105-130 volts AC or DC operation — gray wrinkle finish.

## NATIONAL NC-100A NC-100XA

## NC-101X NC-101XA

These 11 tube superheterodyne receivers are self-contained (except for the speaker) in a table model cabinet that is readily adapted to relay rack mounting. One stage of R.F. and two stages of I.F. are used. Low loss insulation and high-Q coils give ample sensitivity and selectivity. Separate R.F. and Audio Gain Controls and a signal strength meter are mounted on the panel. Other controls are tone, CW Oscillator, AVC with amplified and delayed action, a B+ switch, and a phone jack. A self-contained power supply provides all necessary voltages including speaker field excitation. The range changing system is unique in that it combines the mechanical convenience of a coil switch with the electrical efficiency of plug-in coils.

**NC-100A** — complete with tubes. AC model — 10" speaker in cabinet. **List \$**

**NC-100AB** — Battery model — 8" speaker in cabinet. **List \$**

**NC-100XA** — complete with tubes and crystal filter. AC model — 10" speaker. **List \$**

**NC-100XAB** — Battery model — 8" speaker in cabinet. **List \$**

**NC-100SA** — complete with tubes. AC model — 12" Rola G-12 Speaker Chassis only. **List \$**

**NC-100XSA** — complete with tubes and crystal filter. AC model — 12" Rola G-12 Speaker. **List \$**

**NC-101X or NC-101XA** — complete with tubes. AC model — 10" speaker in cabinet. **List \$**

**NC-101XB or NC-101XAB** — Battery model — 8" speaker in cabinet. **List \$**

**RRA Relay Rack Adapters**, designed for mounting any of the above receivers in a standard relay rack. **List, per pair, \$**

**Note:** Cabinets for 12" speaker chassis cannot be supplied.

**Note:** 230 volt 50 cycle and 115 volt 25 cycle models of above receivers available at slightly higher price.

**Shipping weights:** NC100A, 70 lbs. — NC100XA, 71 lbs. — NC101X, 71 lbs.

**NOTE:** Special models of the NC-100 receiver with bands covering a 200-400 KC range are available. Prices furnished upon request. Battery models can be operated from 686 Vibrapak

All **NC-100** series receivers are fitted with a noise limiter of truly remarkable effectiveness.

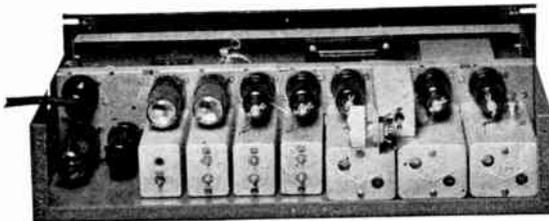

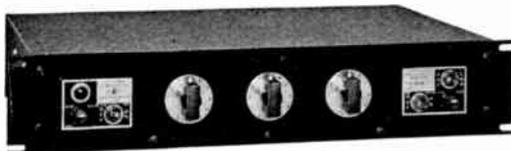

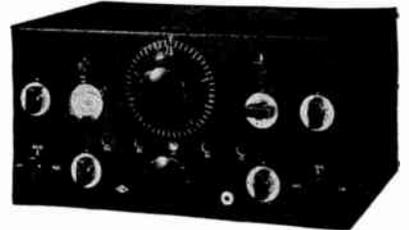

The **NC-100A**, illustrated above, covers the range from 540 KC to 30 MC. The large full vision dial is calibrated directly in megacycles and a separate high speed vernier scale provides high precision in logging. The **NC-100XA** is similar but equipped with a crystal filter.

The **NC-101X**, illustrated below, is built strictly for the amateur bands and covers only the following ranges:

1.7-2.05 MC, 3.5-4.0 MC, 7.0-7.3 MC, 14.0-14.4 MC, and 28.0-30.0 MC. The **NC-101X** is equipped with a crystal filter, S-meter, and the PW type instrument dial.

The **NC-101XA** has the same features as the **NC-101X**, except for the direct reading dial and the cabinet, which are similar to the **NC-100XA**. Prices are the same as for the **NC-101X**.

The battery models use 9 tubes, and operate on 180 V. B-batteries and 6.3 V. A-batteries. Power output of AC model 10 watts, battery model 2 watts.

## NATIONAL

# SCR-2

The **SCR-2** is an extremely compact crystal controlled receiver for single channel reception mounted on a 3 1/2" relay rack panel. It has two stages of tuned RF amplification, a dual purpose converter with crystal controlled oscillator, two stages of IF amplification, a detector and one audio stage. Auxiliary circuits are AVC, CW oscillator and noise limiter. Nine tubes are used, and the power supply is self-contained.

The **SCR-2** is definitely a high performance receiver. Signal-to-noise ratio averages 10 db for an input of 2.5 microvolts. The AVC is flat within 4 db for inputs from 1 microvolt to well over 1 volt. Being crystal controlled, the frequency stability is excellent. The IF channel has a band-spread characteristic to allow for slight transmitter drift, etc.

As the **SCR-2** receiver is intended for communication work, the audio channel has been deliberately made flat only from 100 to 1500 cycles, with increasing attenuation of higher frequencies, thus providing good intelligibility with maximum reduction of unwanted signals and noise.

**SCR-2** receivers are available for use at fixed frequencies between 100 kcs and 18 mcs. A free booklet describing this receiver will be mailed on request.

**List, less crystal, \$**

Copyright by U. C. P., Inc.

# NATIONAL NHU

This specialized communication receiver is a superheterodyne covering the range from 27 to 62 MC in three ranges, each being calibrated on a direct reading full-vision dial.

The circuit uses three acorn tubes (956 RF, 954 First Detector, and 955 Oscillator) followed by three IF stages using 6K7's. A 6C8G Twin Triode is used as an infinite-impedance diode detector, and as a noise limiter. An additional 6C8G acts as first audio and as a carrier-off noise suppressor. Two 6SJ7's are used for the

CW oscillator and for the AVC, which is amplified and delayed. The output employs a 6V6G.

The mechanical details of the NHU are unique. One large knob on the panel slides in or out to engage either the tuning condenser or the range-changing system. Inertia-type tuning is used, with a ratio of approximately 70 to 1. The pointer is positively driven by rack and pinion, and moves vertically when the coil range is changed so that it always points to the proper frequency. The coils are mounted radially in a cast aluminum turret which is easily turned into position by the knob on the panel. Directly above the coil turret is the three-gang straight-line-frequency tuning condenser. The RF circuit and tubes are built completely inside the frame of the condenser, thus making a compact assembly with the shortest possible leads from coils to condensers to tubes.

All features and controls commonly found in high-quality communication receivers are incorporated in the NHU, including a wide range crystal filter.

For Battery operation, 135 to 180 volts "B" and 6.3 volts "A" required. Type 5856 power unit is recommended for AC operation.

**NHU Receiver**, table model, complete with tubes, 8" speaker with cabinet and coils covering from 27 to 62 MC, but without power supply, black finish.

List S

**NHU-20 Receiver**, same as NHU but with 20 Meter Coil.

List S

**NHU-R**, rack model, otherwise same as NHU.

List S

**NHU-20R**, rack model, otherwise same as NHU-20.

List S

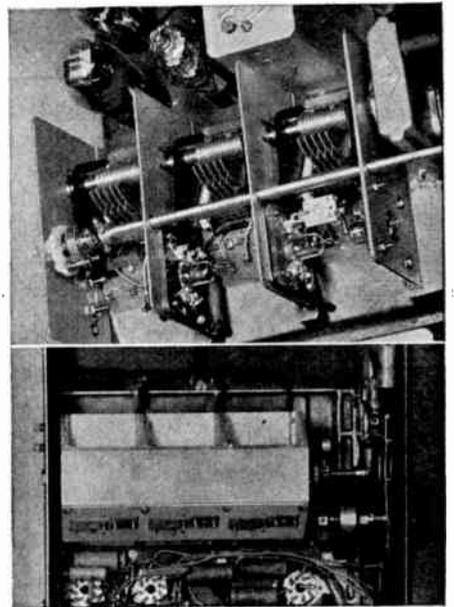

**5856 Power Supply**, table model with rectifier, for NHU or NHU-20.

List S

**SPU-56 Relay rack power supply** with rectifier.

List S

**NHU Shipping Weight**, 82 lbs., **5856**, 18 lbs.

# NATIONAL ONE-TEN

Designed chiefly for the experimenter, the One-Ten Receiver fulfills the need of the experimenter for an adequate receiver to cover the field between one and ten meters.

A four tube circuit is used, composed of one tuned R.F. stage, a self-quenching super-regenerative detector, transformer coupled to a first stage of audio which is resistance coupled to the power output stage. Tubes required: 954-R.F.; 955-Detector; 6C5-1st Audio, 6F6-2nd Audio.

**110 Receiver** and 6 sets of coils, without tubes, speaker or power supply.

List S

**5886 Power Supply** for above receiver, with tube.

List S

**Shipping Weights:** 110 Receiver, 16 lbs. — 5886 AB peck, 17 lbs.

# NATIONAL DIALS

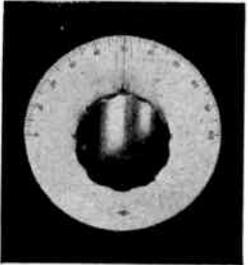

The four-inch N Dial has an engine divided scale and vernier. The vernier is flush with the scale. The planetary drive has a ratio of 5 to 1, and is contained within the body of the dial. 2, 3, 4 or 5 scale. Fits 1/4" shaft. **Specify scale.**

**N Dial List \$**

"Velvet Vernier" Dial, Type B, has a compact variable ratio 6 to 1 minimum, 20 to 1 maximum drive that is smooth and trouble free. An illuminator is available. The case is black bakelite. 1 or 5 scale. 4" diam. Fits 1/4" shaft. **Specify scale.**

**B Dial List \$**  
**Illuminator, extra List \$**

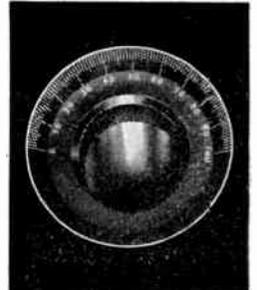

The new National Dial Type AL has a transparent index pointer travelling over an accurately graduated dial 5" in diameter. The drive is through a Type A mechanism with 5 to 1 ratio. Fits 1/4" shaft. **Scale 3 only.**

**AL Dial List \$**

The original black bakelite "Velvet Vernier" Dial, Type A, is still an unchallenged favorite for general purpose use. The planetary drive has a ratio of 5 to 1. In 4 inch diameter with 2, 4 or 5 scale, and in 3 3/8 inch diameter with 2 scale. Fits 1/4" shaft. **Specify scale.**

**A Dial List \$**

The BM Dial is a smaller version of the B Dial (described in the opposite column) for use where space is limited. The drive ratio is fixed. Although small in size, the BM Dial has the same smooth action as the larger units. 1 or 5 scale. 3" diam. Fits 1/4" shaft. **Specify scale.**

**BM Dial List \$**

The new National Dial Type AO is similar to the AL Dial in the opposite column, but is only 3 1/2" in diameter. It employs the same smooth Type A mechanism, and has a transparent index. Fits 1/4" shaft. **Scale 3 only.**

**AO Dial List \$**

## INEXPENSIVE DIALS

**TYPE R**  
List \$  
1 3/8" Dia.  
Etched Nickel  
Silver

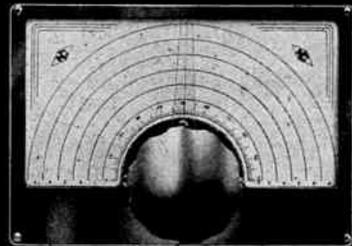

**TYPE O**  
List \$  
3 1/2" Dia.

**TYPE K**  
List \$  
3 1/2" Dia.

**TYPE L**  
List \$  
5" Dia.

**TYPE M**  
List \$  
5" Dia.

## NEW! FOR INDIVIDUAL CALIBRATING

For experimenters who "build their own" and desire direct calibration. Fine for Freq. Monitors and ECO's.

- Dial bezel size 5" x 7 1/4"
- Five blank scales for direct calibration
- Employs Velvet Vernier Drive
- Easy to mount

**TYPE ACN List \$**

R Dial takes Scale 3 only but marked 10-0; O, L, K & M dials take Scale 2 only. All Dials fit 1/4" shaft.

## KNOBS

**HRK List \$**  
Black bakelite knob 2 3/8" diam. Fits 1/4" shaft.

**HRP-P List \$**  
Black bakelite knob 1 1/4 inch long and 1/2 inch wide and fits 1/4 inch shaft. Equipped with pointer.

**HRP List \$**  
The Type HRP knob has no pointer, but is otherwise the same as the knob above.

## DIAL SCALES

Scale	Divisions	Rotation	Direction of Condenser Rotation for Increase of dial reading
1	0-100-0	180°	Either Counter Clockwise Clockwise Clockwise Clockwise Counter Clockwise
2	0-100	180°	
3	100-0	180°	
4	150-0	270°	
5	200-0	360°	
6	0-150	270°	

## ROTOR SHAFT LOCK

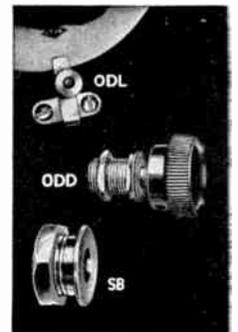

**RSL List \$**  
Designed to fit TMA, TMC or similar condensers, this clamp provides a convenient and secure rotor lock. Fits 1/4" shaft.

## ACCESSORIES

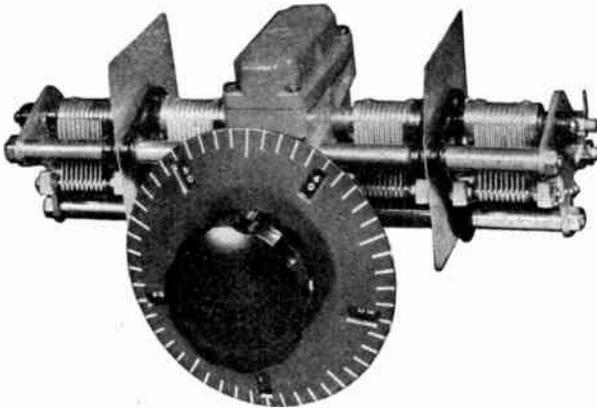

**ODL List \$**  
A locking device which clamps the rim of O, K, L and M Dials. Brass, nickel plated.

**ODD List \$**  
This vernier drive unit may be used with O, K, L, M or other plain dials.

**SB List \$**  
A nickel plated brass bushing 1/2" dia., hole fits 1/4" shaft.

# NATIONAL PRECISION CONDENSERS

The Micrometer dial reads direct to one part in 500. Division lines are approximately  $\frac{1}{4}$ " apart. The dial revolves ten times in covering the tuning range, and the numbers visible through the small windows change every revolution to give consecutive numbering by tens from 0 to 500. The condenser is of extremely rigid construction, with four bearings on the rotor shaft. The drive, at the mid-point of the rotor, is through an enclosed pre-loaded worm gear with 20 to 1 ratio. Each rotor is individually insulated from the frame, and each has its own individual rotor contact, of the multi-fingered brush type. Plate shape is straight-line-frequency when the frequency range is 2:1. Stator insulation is Steatite.

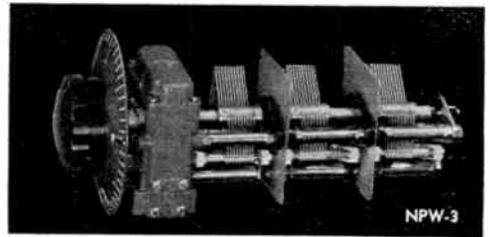

PW Type Condensers are available in 2, 3 or 4 sections, in either 160 or 225 mmf per section. Larger capacities cannot be supplied.

A single-section PW condenser with grounded rotor is supplied in capacities of 150, 200, 350 and 500 mmf, single spaced, and capacities up to 125 mmf, double spaced.

PW condensers are all with rotor shaft parallel to the panel.

PW-4, Double Section right and left	List \$

**NOTE: Specify desired capacity per section**

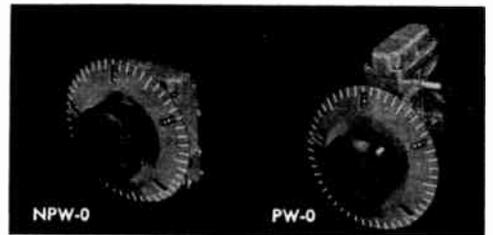

## NPW MODELS

NPW condensers are similar to PW models, except that the rotor shaft is perpendicular to the panel. They were originally designed for use in the NC-100. Prices include micrometer dial.

NPW-3, Three sections, each 225 mmf. List \$

NPW-X, Three sections, each 25 mmf. List \$

## DRIVE UNITS

Two drive units are available, each with micrometer dial and gear drive. The Type PW-0 uses parts from the PW condenser, and the drive shaft is parallel to the panel. Two Type TX-9 couplings are supplied. The NPW-0 uses parts from the NPW condenser, with the drive shaft perpendicular to the panel. One Type TX-9 coupling is furnished.

# NATIONAL MINIATURE CONDENSERS

**USR** — See table — Type USR condensers are small, compact, low-loss units. Their soldered construction makes them particularly suitable for applications where vibration is present. Adjustment is made with a screwdriver. Steatite base.

**USE** — See table — Type USE condensers are similar to Type USR, but are provided with a 1/4" diameter shaft extension at each end.

**USL** — See table — Type USL condensers are similar to Type USR, but are provided with a rotor shaft lock, so that the rotor can be clamped at any setting.

**MSR, MSE, MSL** — See table — Condensers of the MS series are similar in appearance to the US series described above, but they differ in making use of plates which are the same as those of the UM condenser. This and other small changes results in a more robust and rigid assembly. Other details of the MSR, MSE, and MSL are the same as the USR, USE, and USL respectively.

**M-30**

List \$

Type M-30 is a small adjustable mica condenser with a maximum capacity of 30 mmf. Dimensions 1 3/16" x 9/16" x 1/2". Isolantite base.

**W-75, 75 mmf.**

List \$

**W-100, 100 mmf.**

List \$

Small padding condensers having very low temperature coefficient. Mounted in an aluminum shield 1 1/4" in diameter.

The **UM CONDENSER** is designed for ultra high frequency use and is small enough for convenient mounting in PB-10 and RO shield cans. They are particularly useful for tuning receivers, transmitters, and exciters. Shaft extensions at each end of the rotor permit easy ganging when used with one of our flexible couplings. The UMB-25 Condenser is a balanced stator model, two stators act on a single rotor. The UM can be mounted by the angle foot supplied or by bolts and spacers. See table for sizes.

Dimensions: Base 1" x 2 1/4", Mounting holes 5/8" x 1 23/32", Axial length 2 1/8" overall.

Plates: Straight line capacity, 180° rotation.

# NATIONAL NEUTRALIZING CONDENSERS

**NC-600U** List \$  
With standoff insulator

**NC-600** List \$  
Without insulator

The NC-600 and NC-600U are for neutralizing low power beam tubes requiring from .5 to 4 mmf., and 1500 max. total volts such as the 6L6. The NC-600U is supplied with a GS-10 standoff insulator screwed on one end, which may be removed for pigtail mounting.

**STN** List \$

The Type STN neutralizing condenser has a maximum capacity of 18 mmf. (3000 V), making it suitable for such tubes as the 10 and 45. It is supplied with two standoff insulators.

**TCN** List \$

The Type TCN neutralizing condenser is similar to the TMC. It has a maximum capacity of 25 mmf. (6000 V), making it suitable for the 203A, 211 and similar tubes.

**NC-800** List \$

The NC-800 disk-type neutralizing condenser is suitable for the RCA-800, 35T, HK-54 and similar tubes. It is equipped with a micrometer thimble and clamp. The chart below gives capacity and air gap for different settings.

**NC-75** List \$

For 75T, 808, 811, 812 & similar tubes.

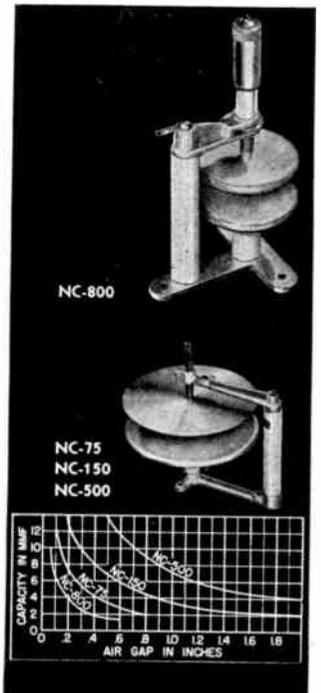

**NC-150** List \$

For HK354, RK36, 300T, 852, etc.

**NC-500** List \$

For WE-251, 450TH, 450TL, 750TL, etc.

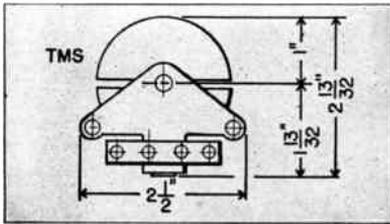

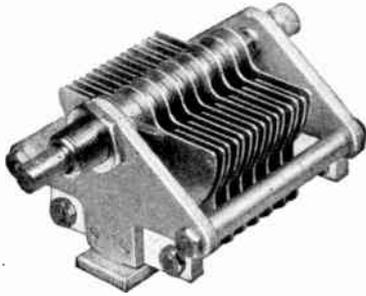

These larger desk type neutralizing condensers are for the higher powered tubes. Disks are aluminum, insulation steatite.

TML condenser is a 1 KW job throughout. Isolantite insulators, specially treated against moisture absorption, prevent flashovers. A large self-cleaning rotor contact provides high current capacity. Thick capacitor plates, with accurately rounded and polished edges, provide high voltage ratings. Sturdy cast aluminum end frames and dural tie bars permit an unusually rigid structure. Precision end bearings insure smooth turning and permanent alignment of the rotor. End frames are arranged for panel, chassis or stand-off mountings.

## TRANSMITTER COIL FORMS

The Transmitter Coil Forms and Mounting are designed as a group, and mount conveniently on the bars of a TMA condenser. The larger coil form, Type XR-14A, has a winding diameter of 5", a winding length of 3 $\frac{3}{4}$ " (30 turns total) and is intended for the 80 meter band. The smaller form, Type XR-10A, has a winding length of 3 $\frac{3}{4}$ " and a winding diameter of 2 $\frac{1}{2}$ " (26 turns total). It is intended for the 20 and 40 meter bands.

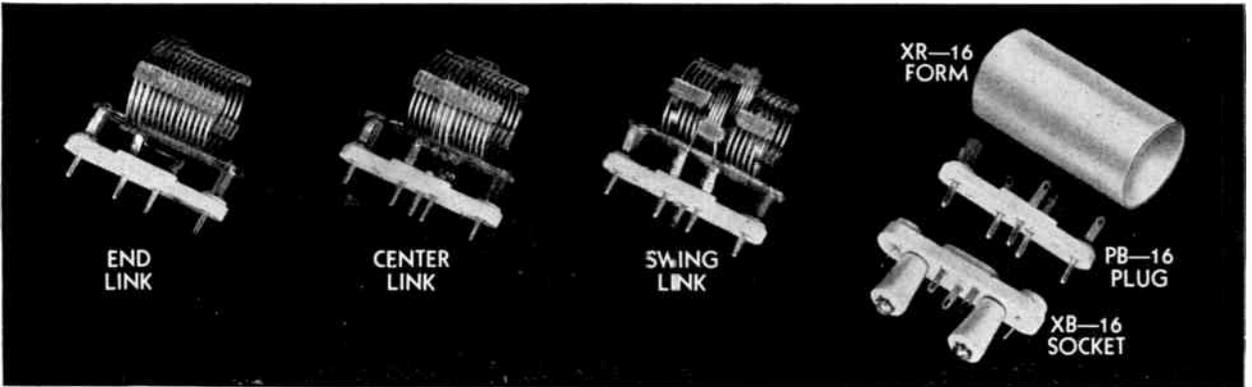

Either coil form fits the PB-15 plug. For higher frequencies, the plug may be used with a self-supporting coil of copper tubing. The XB-15 Socket may be mounted on breadboards or chassis, as well as on the TMA Condenser.

## EXCITER COILS AND FORMS — TYPE AR-16 (Air Spaced)

These air-spaced coils are suitable for use in stages where the plate input does not exceed 50 watts and are available in the sizes tabulated below. Capacities listed will resonate the coils at the low frequency end of the band and include all stray circuit capacities. All have separate link coupling coils and all fit the PB-16 Plug and XB-16 Socket.

The XR-16 Coil Form also fits the PB-16 Plug and XB-16 Socket. It has a winding diameter of 1 $\frac{1}{4}$ " and a winding length of 1 $\frac{3}{4}$ ".

XB-5

## BUFFER COIL FORMS

National Buffer Coil Forms are designed to mount directly on the tie bars of a TMC condenser using the PB-5 Plug and XB-5 Socket. Plug and Socket are of molded R-39.

The two coil forms are of Isolantite, left unglazed to provide a tooth for coil dope. The larger form, Type XR-13, is 1 3/4" in diameter and has a winding length of 2 3/4". The smaller form, Type XR-13A, is 1" in diameter and provides a winding length of 2 3/4". Both forms have holes for mounting and for leads.

 PB-10A-5, 5 Prong Base only List \$  
 PB-10A-6, 6 Prong Base only List \$

## 5-B-100 TANK

The National 5-B-100 is a complete tank circuit (including coils, condenser and R.F. choke), which tunes through five amateur bands with a single dial. The tank replaces the tuning condenser, set of five plug-in coils, plug-in coil socket and R.F. choke, without sacrificing efficiency or space, yet it costs no more.

The 5-B-100 is actually more compact than a tuning condenser and mounted plug-in coil for the same power capabilities. In addition to the compactness and wide tuning range advantages of the 5-B-100, the tank provides for the first time a real constant L/C ratio throughout the tuning range. Harmonics from the low-frequency bands are suppressed without sacrifice of efficiency on the high-frequency bands. Constant link loading or capacity coupling may be used.

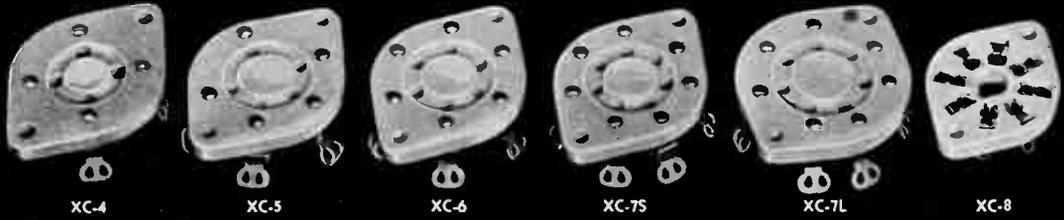

The 5-B-100 is an ideal plate tank for R.F. amplifiers using such tubes as 35T, 809, 811, 812, RK-11, RK-12, HK-24, HY-30Z, HY-51Z, etc. with input up to 150 watts (1250 volts unmodulated or 750 volts modulated maximum). Also ideal for grid tank of amplifiers up to 2 KW plate input.

Four mounting insulators are supplied on the base. Overall dimensions are 4 inches wide, 6 inches high and 8 inches deep. Shipping weight, 5 lbs. List \$

PRICES LISTED ON PAGES H-27 AND H-28

# NATIONAL LOW-LOSS SOCKETS AND INSULATORS

## XC Series Sockets List \$

National wafer sockets have exceptionally good contacts with high current capacity together with low loss Isolantite insulation. All types have a locating groove to make tube insertion easy, with the exception of the Octal socket which has a central locating hole.

**XCA** List \$  
A low-loss socket for acorn triodes.

**XMA** List \$  
For pentode acorn tubes, this socket has built-in by-pass condensers. The base is a copper plate.

**XM-10** List \$  
A heavy duty metal shell socket for tubes having the UX base.

**XM-50** List \$  
A heavy duty metal shell socket for tubes having the Jumbo 4-pin base ("fifty watters").

**JX-50** List \$  
*Without Standoff Insulators*

**JX-50S** List \$  
*With Standoff Insulators*

A low-loss wafer socket for the 813 and other tubes having the Giant 7-pin base.

**JX-100** List \$  
*Without Standoff Insulators*

**JX-100S** List \$  
*With Standoff Insulators*

A low-loss wafer socket for the 803, RK-28 and other tubes using the Giant 5-pin base.

## SAFETY GRID & PLATE CAPS

**SPP-9** List \$  
9/16" Cap L. L. ceramic insulation.

**SPP-3** List \$  
3/8" Cap L. L. ceramic insulation

**SPG** List \$  
5/16" Cap, R-39 L. L. insulation. These offer protection against accidental contact with High Voltage lobe caps.

## GRID & PLATE GRIPS

**GS-6**, 2" List, each \$

**GS-7**, 3" List, each \$

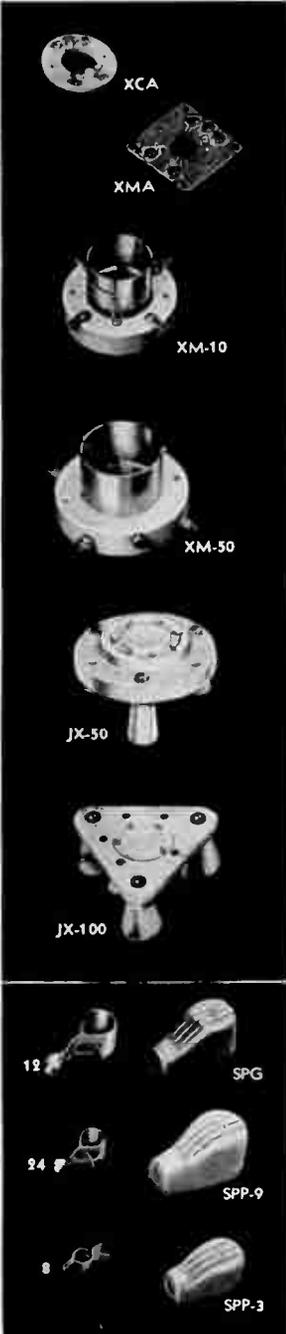

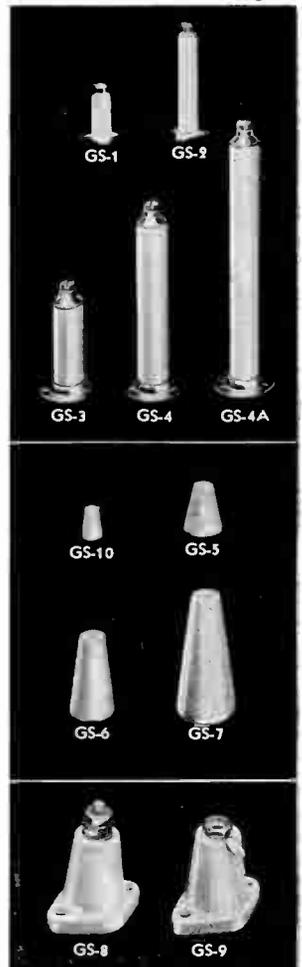

**GS-10**, 3/4", package of 10 List \$

These cone type standoff insulators are of low-loss steatite. They have a tapped hole at each end for mounting.

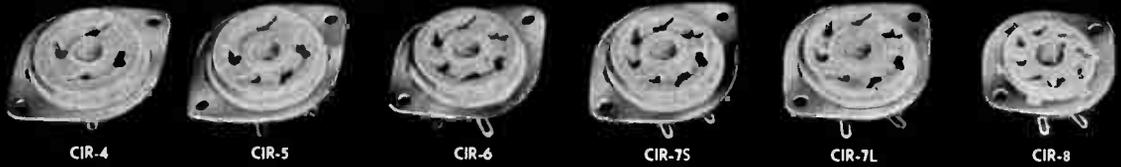

**GS-8**, with terminal List \$

**GS-9**, with Jack List \$

These low-loss steatite stand-off insulators are also useful as lead-through bushings.

# NATIONAL LOW-LOSS SOCKETS AND INSULATORS

## CIR Series Sockets

Any Type List \$

Type CIR Sockets feature low-loss isolantite or steatite insulation, a contact that grips the tube prong for its entire length, and a metal ring for six position mounting. The sockets are supplied with two metal standoffs.

AA-3 List \$

A low-loss steatite spreader for 6 inch line spacing. (600 ohms impedance with No. 12 wire.)

AA-5 List \$

A low-loss steatite aircraft-type strain insulator.

AA-6 List \$

A general purpose strain insulator of low-loss steatite.

XS-6 List, each \$

A low-loss isolantite bushing for 1/2" holes.

XP-6 List, box of ten \$

Same as above but Victron.

TPB List, per dozen \$

A threaded polystyrene bushing with removable .093 conductor moulded in, 1/4" diam., 32 thread.

XS-7, (3/8" Hole) List \$

XS-8, (1/2" Hole) List \$

Steatite bushings. Prices include male and female bushings with metal fittings.

XS-1, (1" Hole) List \$

XS-2, (1 1/2" Hole) List \$

Prices listed are per pair, including metal fittings. Insulation steatite.

XS-3, (2 3/4" Hole) List \$

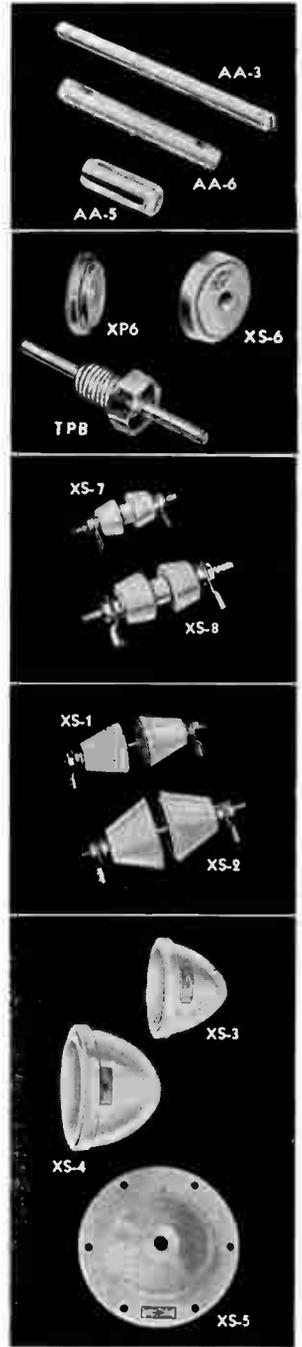

XS-4, (3 3/4" Hole) List \$

Prices are per pair, including metal fittings. These low-loss steatite bowls are ideal for lead-in purposes at high voltages.

XS-5, Without Fittings List, each \$

XS-5F, With Fittings List, per pair \$

These big low-loss bowls have an extremely long leakage path and a 5 1/4" flange for bolting in place. Insulation steatite.

FWG List \$

A Victron terminal strip for high frequency use. The binding posts take banana plugs at the top, and grip wires through hole at the bottom, simultaneously, if desired.

FWH List \$

The insulators of this terminal assembly are molded R-39 and have serrated bosses that allow the thinnest panel to be gripped firmly, and yet have ample shoulders. Binding posts same as FWG above.

FWJ List \$

This assembly uses the same insulators as the FWH above, but has jacks. When used with the FWF plug (below), there is no exposed metal when the plug is in place.

FWF List \$

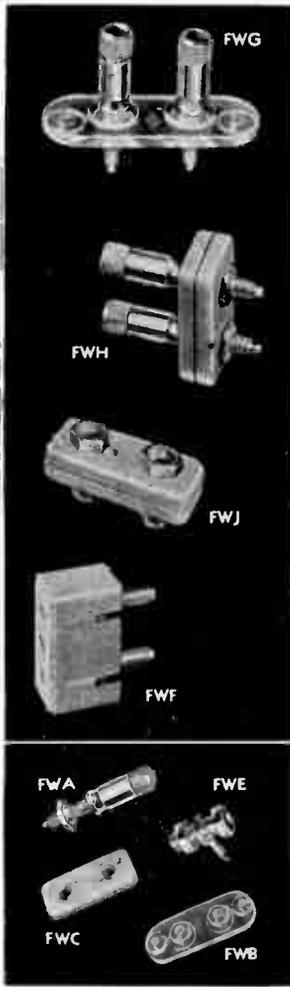

This molded R-39 plug has two banana plugs on 3/4" centers and fits FWG, FWH or FWJ above. Leads may be brought out through the top or side.

### NATIONAL CABINETS

The National Cabinets listed above are the same as those used in National Receivers, except that they are supplied in blank form. They are made of heavy gauge steel, and the paint is unusually well bonded to the metal. Sub-bases and bottom covers are included in the price.

### COIL SHIELDS

RO, coil shield, List \$

2" x 2 $\frac{3}{8}$ " x 4 $\frac{1}{8}$ " high

J30, coil shield, List \$

2 $\frac{1}{2}$ " dia. x 3 $\frac{3}{4}$ " high

B30, coil shield, List \$

3" dia. x 3 $\frac{3}{4}$ " high without mounting base.

B30-B, coil shield, List \$

Same as above, but with mounting base.

### TUBE SHIELDS

TS, tube shield, List \$

With cap and base.

T58, tube shield, List \$

With cap and base, for 77, 78, etc. tubes.

T78, tube shield, List \$

With cap and base, for 77, 78, etc. tubes.

T14, tube shield, List \$

2 $\frac{1}{8}$ " high, for 814, RK-20, etc.

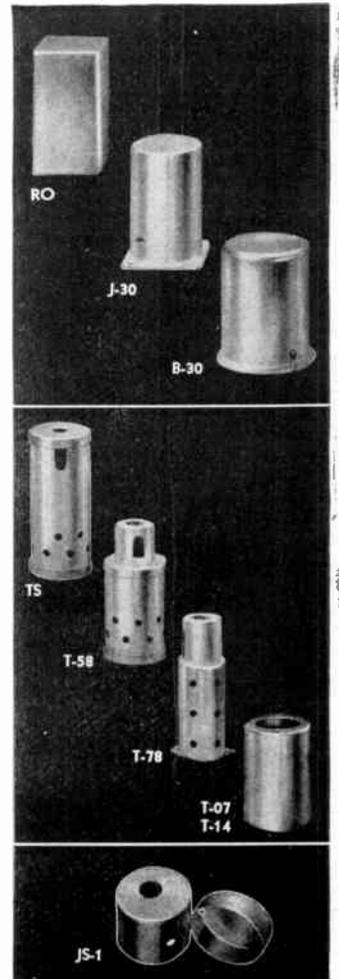

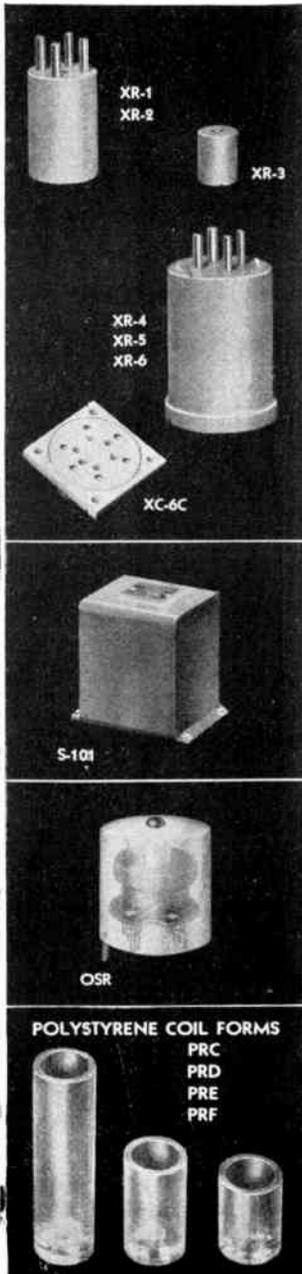

T07, tube shield, List \$

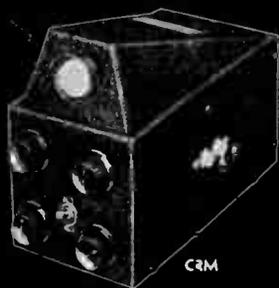

3" high, for 807, RK-23, etc.

### JACK SHIELD

JS-1, Jack shield, List \$

For shielding small standard jacks mounted behind a panel, or on the ends of extension cords.

CRM

CRR

National Oscilloscopes have power supply and input controls built in. A panel switch permits use of the built-in 60-cycle sweep or external audio sweep for securing the familiar trapezoid pattern for modulation measurements.

**CRM**, less tubes **List \$**

1" screen, using RCA-913 and 6X5 rectifier. Table model, 4 7/8" x 6 1/8" x 8".

**CRR**, less tubes **List \$**

2" screen, using RCA-902 and 6X5 rectifier. Relay rack mounting on 3 1/2" panel.

**PUSH SWITCH**

**ACS-4**, Four gang, with trigger bar **List \$**

**ACS-1**, Single section, less trigger bar **List \$**

The National Interlocking Push Switch has low losses, complete reliability and positive contacts. Insulation is R-39. The silverplated contacts are double pole, double throw.

**CHART FRAME**

The National Chart Frame is blanked from one piece of metal, and includes a celluloid sheet to cover the chart. Size 2 1/4" x 3 1/4", with sides 1/4" wide.

Type CFA **List \$**

**COIL DOPE**

**CD-1**, 1/4 pint can **List \$**  
Liquid Polystyrene Cement — is ideal for windings as it will not spoil the properties of the best coil form.

**SPEAKER CABINETS**

**NDC-8** for 8" speaker **List \$**

**NDC-10** for 10" speaker **List \$**

**NDC-2** for 10" speaker **List \$**

These metal speaker cabinets are acoustically correct. They are lined with acoustic felt, and are of welded construction to eliminate rattles. Finish is black wrinkle on NDC-8 and NDC-10. NDC-2 is finished in two-tone gray to match the NC-200 TG receiver.

**I. F. TRANSFORMERS**

**IFC**, Transformer, air core **List \$**

**IFCO**, Oscillator, air core **List \$**

Air dielectric condensers isolated from each other by an aluminum shield on a moisture proofed ceramic base. Litz wound coils. Shield can 4 1/8" x 2 3/8" x 2". Fither 175 KC or 450-550 KC. Specify frequency.

**IFD**, Diode Transformer, air core **List \$**

Tuned primary and untuned, closely-coupled secondary for full-wave diode rectifiers. For noise silencing circuits, etc. 450-550 KC, air core only.

**IFE**, Transformer. Same as IFC but iron core, 450-550 KC only **List \$**

**NATIONAL HIGH FIDELITY TRF UNITS**

Each chassis provides a three-stage RF Amplifier tuned to one station only. A group of separate chassis are usually used in each installation.

RF Transformers tuned both primary and secondary. Coupling adjustable to include 10 KC with less than 1 db variation in the audio range. Sensitivity adjustable from 5 microvolts to one volt. Three models cover ranges of 540-875, 740-1230, and 1100-1700 KC. Mounted on 3 1/2" relay rack panel.

**DLUS**, Tuner, wired and tested on 1/8" steel panel, wrinkle finish, less tubes, **List \$**

**DLUA**, Tuner, same as DLUS but has 3/16" aluminum panel, wrinkle finish, less tubes **List \$**

**DLCA**, Chassis as illustrated with sockets and terminals riveted in place **List \$**

# NATIONAL RF CHOKES

**R-100** List \$

Without standoff insulator

**R-100U** List \$

With standoff insulator

R.F. chokes R-100 and R-100U are identical electrically, but the latter is provided with a removable standoff insulator screwed on one end. Both have Isolantite insulation and both have a continuous universal winding in four sections. Inductance  $2\frac{1}{2}$  m.h.; distributed capacity 1 mmf.; DC resistance 50 ohms; current rating 125 ma.

**R-300** List \$

Without insulator

**R-300U** List \$

With insulator

R.F. chokes R-300 and R-300U are similar in size to R-100U but have higher current capacity. The R-300U is provided with a removable standoff insulator screwed on one end. Inductance 1 m.h.; distributed capacity 1 mmf.; DC resistance 10 ohms; current rating 300 ma.

**R-152** List \$

For the 80 and 160 meter bands. Inductance 4 m.h., DC resistance 10 ohms, DC current 600 ma. Coils honeycomb wound on Isolantite core.

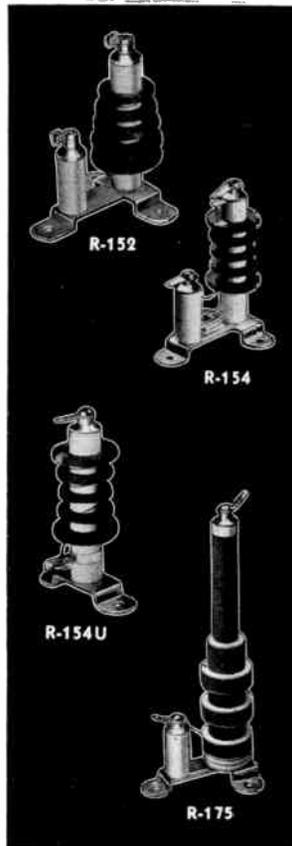

**R-154** List \$

**R-154U** List \$

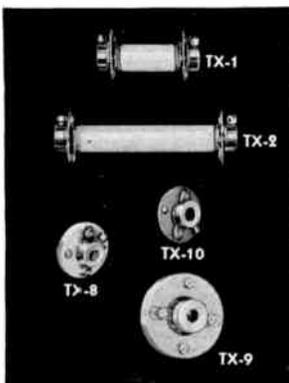

For the 20, 40 and 80 meter bands. Inductance 1 m.h., DC resistance 6 ohms, DC current 600 ma. Coils honeycomb wound on Isolantite core. The R-154U does not have the third mounting foot and the small insulator, but is otherwise the same as R-154. See illustration.

**R-175** List \$

The R-175 Choke is suitable for parallel-feed as well as series-feed in transmitters with plate supply up to 3000 volts modulated or 4000 volts unmodulated. Unlike conventional chokes, the reactance of the R-175 is high throughout the 10 and 20 meter bands as well as the 40, 80 and 160 meter bands. Inductance  $225 \mu\text{h}$ , distributed capacity 0.6 mmf., DC resistance 6 ohms, DC current 800 ma., voltage breakdown to base 12,500 volts.

# NATIONAL SHAFT COUPLINGS

**TX-1**, Leakage path 1" List \$

**TX-2**, Leakage path  $2\frac{1}{2}$ " List \$

Flexible couplings with glazed Isolantite insulation which fit  $\frac{1}{4}$ " shafts.

**TX-8** List \$

A non-flexible rigid coupling with Isolantite insulation. 1" diam. Fits  $\frac{1}{4}$ " shaft.

**TX-9** List \$

This small insulated flexible coupling provides high electrical efficiency when used to isolate circuits. Insulation is Steatite.  $1\frac{5}{8}$ " diam. Fits  $\frac{1}{4}$ " shaft.

**TX-10** List \$

A very compact insulated coupling free from backlash. Insulation is canvas Bakelite.  $1\frac{1}{16}$ " diam. Fits  $\frac{1}{4}$ " shaft.

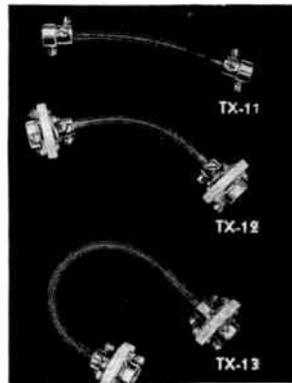

**TX-11** List \$

The flexible shaft of this coupling connects shafts at angles up to 90 degrees, and eliminates misalignment problems. Fits  $\frac{1}{4}$ " shafts. Length 4  $\frac{1}{4}$ ".

**TX-12**, Length  $4\frac{5}{8}$ " List \$

**TX-13**, Length  $7\frac{1}{8}$ " List \$

These couplings use flexible shafting like the TX-11 above, but are also provided with Isolantite insulators at each end.

# NATIONAL POWER SUPPLIES

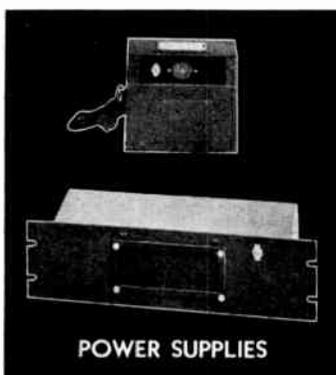

National Power Supplies are specially designed for high frequency receivers, and include efficient filters for RF disturbances as well as for hum frequencies. The various types are listed under the receivers with which they are used.

**FOR AC OPERATION**, 115 volt, 50-60 cycle.

**Type 697**, Table model, (230 V., 75 MA., 6.3 V. Filaments) with tube List \$

**5886**, Table model, (170 V., 50 MA., 6.3 V. Filaments) with tube List \$

**SPU**, Rack mounted, same electrical characteristics as either 697 or 5886, with tube List \$

POWER SUPPLIES

**DPU**, Rack mounted, with two separate and complete power supplies same as GRSPU, with tubes List \$

**FOR AC OPERATION, 230 VOLT OR 25 CYCLE**

Supplies for 230 volts or 25 cycles can be supplied at slightly higher prices than the standard models.

**FOR BATTERY OPERATION**

High voltage power supplies can be supplied for National Receivers for operation from batteries. These units are of the vibrator type.

**686**, Table model, (165 V., 50 MA.) for operation from 6.3 volts DC, with vibrator List \$

Type 650X  
6 V DC Input . . . \$20.00

Type 650Y  
12 V DC Input . . . \$20.00

Type 650W  
32 V DC Input . . . \$23.00

Output 240 volts at 50 ma. (Requires external output filter.)

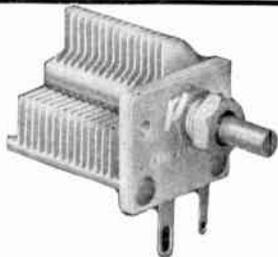

Type 649X 6 V DC Input . . . \$18.75

Type 649Y 12 V DC Input . . . \$18.75

Type 647X (not shown). Provides 240 volts at 75 ma. from a 6 volt battery similar to the Type 649 except uses a synchronous vibrator . . . \$18.25

**TYPE 4-C MICROPHONE**—Single button, carbon type. Superb voice quality. High output. Moisture resistant. "Push-to-Talk" switch. Complete with holder, 3 feet, 3 conductor cable and standard plug. \$11.50

**K SERIES**—Small variable condensers. Standard plate spacing .022". All Kaar capacitors are of rugged construction with soldered and plated brass plates.

K-140 . . . . . 140 mmf . . . . . \$1.34  
K-100 . . . . . 100 mmf . . . . . \$1.20  
K-50 . . . . . 50 mmf . . . . . \$1.02  
K-25 . . . . . 25 mmf . . . . . \$ .91  
K-12 . . . . . 12 mmf . . . . . \$ .82

**K-100-2B**—A very popular "special" with mounting brackets and shaft length to specification. Maximum capacity 100mmf. Plate spacing .022". Available in other capacities and plate spacings.

**K-150-050**—One of the most popular "specials" because of the high capacity available for the small panel space required. Maximum capacity of type illustrated 150 mmf., spacing .050". Available in other capacities and plate spacings, and with special mounting brackets to your specification. Other special types available with dual or even up to five sections.

**TYPE AL-2 AUTO-LOAD ANTENNA**—Far use with medium frequency mobile transmitters. Has matching coil in base to match 72-ohm transmission line without auxiliary tuning equipment . . . . . \$39.50

Other radiotelephone equipment than that listed is available, including Central Station Transmitters and Receivers, Marine Radiotelephones, etc.

## "MC" MIDGET CONDENSERS

Ideal variable for ultra-short wave and short wave tuning, laboratories, etc. Isolantite insulation. All contacts riveted or soldered. Vibration proof. New improved Hammarlund split type rear bearing, and noiseless wiping contact. Cadmium plated soldered brass plates. Shaft— $\frac{1}{4}$ ".

Code	Capacity	List
MC-20-S	20 mmf.	\$2.20
MC-35-S	35 mmf.	2.30
MC-50-S	50 mmf.	2.40
MC-50-M	50 mmf.	2.40
MC-75-S	80 mmf.	2.60
MC-75-M	80 mmf.	2.60
MC-100-S	100 mmf.	2.80
MC-100-M	100 mmf.	2.80
MC-140-S	140 mmf.	3.00
MC-140-M	140 mmf.	3.00
MC-200-M	200 mmf.	3.30
MC-250-M	260 mmf.	3.60
MC-325-M	320 mmf.	4.00

"M"—Midline Plates

"S"—Straight Line Cap. Plates

## "MCD" SPLIT-STATOR CONDENSERS

Like single midgets, these incorporate every requirement imperative to highest quality. Specifications identical to single types except that shield plate is located between stator sections. Also equipped with new Hammarlund noiseless wiping contact and split type rear bearing. Overall length behind panel— $3\frac{1}{8}$ ". Strong Isolantite base. Single hole panel mount.

Code	Capacity	List
MCD-50-M	50 mmf. per sect.	\$4.60
MCD-50-S	50 mmf. per sect.	4.60
MCD-100-S	100 mmf. per sect.	5.00

### IMPORTANT NOTICE

Due to the necessity of our taking a major part in the United Nations' war program, we find ourselves unable to guarantee prices or deliveries. The extreme difficulty of obtaining certain raw materials may require that we use substitute materials at times. It is, therefore, necessary that we reserve the right to change prices or specifications without notice. Correspondence is invited regarding the above in cases where prices, materials, or deliveries may affect your plans.

THE HAMMARLUND MFG. CO., INC.

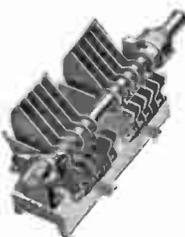

## "SM" STAR MIDGET CONDENSERS

For receiving and transmitting, for short wave tuning, regeneration, antenna coupling, vernier, etc. Low loss, natural bakelite insulation. Non-corrosive aluminum plates. Phosphor bronze spring plate affords proper tension and smooth control and also provides perfect contact. Single hole mounting.  $\frac{1}{4}$ " shaft.  $\frac{5}{16}$ " mounting bushing.  $1\text{-}\frac{9}{16}$ " wide x  $1\frac{3}{4}$ " high. Depth behind panel from  $1\frac{1}{16}$ " to  $1\frac{1}{8}$ " depending on capacity. Exceptionally light in weight and strong and compact in construction. Tinned soldered lugs on the front end are supplied to simplify wiring. Plates of straight line capacity types.

Code	Capacity	List
SM-15	15 mmf.	\$0.90
SM-25	25 mmf.	.90
SM-50	50 mmf.	1.00
SM-100	100 mmf.	1.20
SM-140	140 mmf.	1.40
*SM-35-X	35 mmf.	1.20
*SM-50-X	50 mmf.	1.40

\* Double Spaced Transmitting Types

## "MCDX" DOUBLE SPACED CONDENSERS

Identical to split stator condensers except that plates are widely spaced—actual air gap between rotor and stator plates—.0715". No shield between stators. Equipped with new Hammarlund noiseless wiping contact, and split type rear bearing. Condenser ideal for ultra-high frequency transmitters using up to 1000 volts.

Code	Capacity	List
MCD-35-MX	31 mmf. per sect.	\$4.80
MCD-35-SX	31 mmf. per sect.	4.80

"MX"—Midline Plates

"SX"—Straight Line Cap. Plates

## "MCX" DOUBLE SPACED CONDENSERS

Exceptional unit for ultra-s.w. receivers and transmitters particularly compact transmitters. Plate spacing—.0715". Great for tuning crystal controlled transmitter amplifier stages or for neutralizers up to 1000 volts. In midline (MX) and straight line cap. types (SX).

Code	Capacity	List
MC-20-SX	20 mmf.	\$2.40
MC-20-MX	20 mmf.	2.40
MC-35-MX	32 mmf.	2.60
MC-35-SX	32 mmf.	2.60
MC-50-MX	50 mmf.	2.80
MC-50-SX	50 mmf.	2.80
MC-100-SX	100 mmf.	3.50

## "APC" MICRO CONDENSERS

For S.W. and ultra-S.W. For I.F. tuning, trimming R.F. coils or gang condensers, general padding, etc. Constant capacity under any conditions of temperature or vibration. Size 100 mmf.  $1\text{-}\frac{7}{32}$ " x  $15\text{-}\frac{1}{16}$ " x  $1\text{-}\frac{7}{32}$ ". Isolantite base. Cadmium plated soldered brass plates.

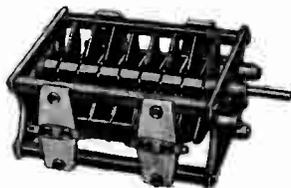

Code	Capacity	List
APC-25	25 mmf.	\$1.30
APC-50	50 mmf.	1.50
APC-75	75 mmf.	1.70
APC-100	100 mmf.	1.90
APC-140	140 mmf.	2.25

# HAMMARLUND

## "TC" TRANSMITTING CONDENSER

An entirely new moderately priced, heavy duty transmitting condenser, featuring heavy aluminum end plate, Isolantite insulation non-inductive, self-cleaning silver plate J beryllium contacts, full floating rotor bearing, non-magnetic rotor assembly, polished heavy aluminum plates accurately spaced. All, except type "L," have round edge plates of .040" thickness. Type "L" has .025" plates with plain edges. Type "F" has .230", 7500 V. air gap. Type "G," .200", 6750 V. Type "H," .171", 6000 V. Type "J," .100" 4250 V. Type "K," .084", 3750 V. Type "L," .070", 2000 V. air gap.

Available in a wide variety of capacities and working voltages, these condensers are ideal for modern up-to-date transmitters with power outputs ranging from 200 watts to 1 kw.

Type	Capacity	Overall Length	List
TC-220-L	220 mmf.	4 3/8	\$ 6.30
TC-440-L	465 mmf.	5 7/8	9.10
TC-90-K	95 mmf.	2 1/8	5.70
TC-165-K	170 mmf.	4 1/8	6.50
TC-220-K	225 mmf.	4 5/8	8.00
TC-330-K	340 mmf.	6 1/2	10.00
TC-240-J	250 mmf.	6 1/2	10.20
TC-25-H	25 mmf.	2 1/8	5.10
TC-50-H	53 mmf.	4 1/8	6.00
TC-110-H	115 mmf.	6 1/2	9.00
TC-40-G	45 mmf.	4 1/8	7.00
TC-65-G	72 mmf.	5 7/8	8.80
TC-100-G	110 mmf.	7 1/2	11.20
TC-150-G	165 mmf.	10 5/8	14.80
TC-55-F	60 mmf.	5 7/8	8.00

## "TCD" SPLIT STATOR TYPES

These split-stator transmitting condensers are identical to the singles shown above, except that the stator sections are individual. Ideal for push-pull power amplifiers ranging in power up to 1 kw. They are of convenient size and lend themselves to construction of compact apparatus. Overall dimensions in back of panel are given in the accompanying table. The capacity values listed are for each section. The last letter in the code represents plate spacing and working voltage. These are identical to those given above. Type "M"—plain plates, .030" air gap.

Type	Capacity	Overall Length	List
TCD-500M	505 mmf.	4 3/8	\$10.30
TCD-80-L	88 mmf.	4 3/8	8.30
TCD-210-L	215 mmf.	5 7/8	10.40
TCD-90-K	95 mmf.	4 5/8	9.40
TCD-165-K	170 mmf.	6 1/2	11.50
TCD-325-K	335 mmf.	11 1/8	20.50
TCD-240-J	250 mmf.	11 1/8	19.00
TCD-50-H	53 mmf.	6 1/2	9.80
TCD-110-H	115 mmf.	11 1/8	16.00
TCD-40-G	48 mmf.	7 1/2	10.50
TCD-75-G	82 mmf.	11 1/8	14.50
TCD-55-F	60 mmf.	11 1/8	13.50

## "HF" MICRO CONDENSERS

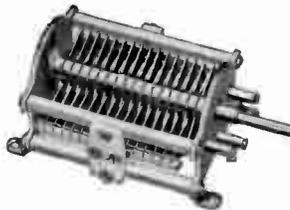

For tuning or trimming on high frequencies. Cadmium plated soldered brass plates. Isolantite. Base mounting, single hole panel mount, or panel mounting with bushings. 140 mmf. size 1 1/2" high x 1 1/2" behind panel.

Code	Capacity	List
HF-15	17.5 mmf.	\$1.40
HF-35	35 mmf.	1.60
HF-50	50 mmf.	1.70
HF-100	100 mmf.	2.10
HF-140	140 mmf.	2.40
*HF-15-X	15 mmf.	1.70
*HF-30-X	30 mmf.	1.90

\* Double spaced

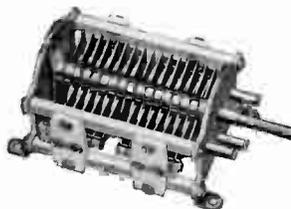

## "MTC" TRANSMITTING CONDENSERS

Compact types, Isolantite insulation. Base or panel mounting. Polished aluminum plates. Stainless steel shaft. Size of 150 mmf. with .070" plate spacing only 4 5/8" behind panel. "A" model has .040" plate thickness, all others .025". "A" and "B" models—rounded plates. "C" types—plain plate edges. Self-cleaning wiping contact.

Code	Capacity	List
MTC-20-B	20 mmf.	\$4.10
MTC-35-B	35 mmf.	4.30
MTC-50-B	50 mmf.	4.60
MTC-100-B	100 mmf.	5.30
MTC-150-B	150 mmf.	6.10
MTC-50-C	50 mmf.	4.10
MTC-100-C	100 mmf.	4.40
MTC-150-C	150 mmf.	4.80
MTC-250-C	260 mmf.	5.30
MTC-350-C	365 mmf.	5.80

## "MTC D" SPLIT-STATOR TYPES

Some outstanding features as MTC singles except that stator sections are separate. Model 110-B with .070" plate spacing, only 5 3/4" behind panel. "B" models—rounded plates "C" models—plain plate edges.

Code	Capacity	List
MTC D-20-B	20 mmf. per sect.	\$6.50
MTC D-35-B	35 mmf. per sect.	6.00
MTC D-50-B	50 mmf. per sect.	6.50
MTC D-100-B	100 mmf. per sect.	8.75
MTC D-50-C	50 mmf. per sect.	5.50
MTC D-100-C	100 mmf. per sect.	6.00
MTC D-150-C	150 mmf. per sect.	6.50
MTC D-250-C	265 mmf. per sect.	7.50

## "HFD" MICRO DUAL CONDENSERS

A compact dual—ideal as a high frequency tuning condenser, for tuning and neutralizing low-powered short wave and ultra-short wave transmitters, etc. Heavy Isolantite base. Equipped with new outstanding Hammarlund split rear bearing and individual noiseless wiping contact for each section. Rotor contacts variable to several positions for shortest leads. Shield between sections for grounding. The 140 mmf. size is only 1 1/2" high x 3 3/4" long behind panel. 1/4" shaft. Cadmium plated soldered brass plates.

Code	Capacity	List
HFD-50	50 mmf. per sect.	\$3.80
HFD-100	100 mmf. per sect.	4.10
HFD-140	140 mmf. per sect.	4.50
*HFD-15-X	15 mmf. per sect.	3.40
*HFD-30-X	28.5 mmf. per sect.	3.80

\* Double-Spaced

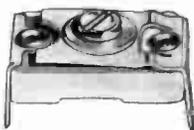

# HAMMARLUND

## "MEX" EQUALIZERS

The midget equalizer shown at right is an extremely small condenser designed expressly for trimming R.F. coils, but useful, of course, for many other purposes. Self-supporting in wiring. Isolantite base— $\frac{3}{8}$  x  $\frac{7}{8}$ ". Mica dielectric, phosphor bronze spring plates.

Code Capacity List  
 MEX 4-30 mmf. .... \$0.30

## "N" NEUTRALIZING CONDENSERS

Rounded edges. Isolantite. Fine adjusting screw. Positive lock. Horizontal adjustment. Type "N-10",  $2\frac{1}{8}$ " high x 1-3 16" deep. "N-15" 4-15/16" high x 3/2" deep. "N-20", 5-11/16" high x 4" deep.

Code List  
 N-10—(2.1—10 mmf.) .... \$4.60  
 N-15—(3.2—14 mmf.) ..... 8.70  
 N-20—(3.8—14 mmf.) ..... 9.30

## "ETU" EXCITER TUNING UNIT

Compact tuning unit for exciters. Ready-wound for 80, 40, 20 and 10 meters. Link output. Has two 25 mmf. double spaced condensers. "ETU-80" for 80 meters, "ETU-40" for 40 meters, etc. Supplied completely wired and ready for installation. Also available unwound. Size 2" x 4" x  $1\frac{1}{2}$ ".

Code List  
 ETU-10-20-40-80—(Wound) ..... \$5.50 ea.  
 ETU—(Unwound) ..... 4.80 ea.

## "FC" FLEXIBLE COUPLINGS

The sides of coupling are insulated from each other, allowing instruments in gang to be operated as independent electrical units. Bakelized canvas with brass bushings for  $\frac{1}{4}$ " shaft. Four rust proofed and hardened steel set screws provide against shaft slipping. Overall diameter  $1\frac{1}{2}$ ".

Code List  
 FC ..... \$0.75

## "CK-125" STAR CHOKE

This low-priced midget choke has four universal wound pies on an Isolantite rod. The pies are impregnated to reduce moisture absorption. Current carrying cap. 125 ma. DC Res.—30 ohms. Ind.—2.5 mh. Dist. Cap.—1 mmf. Has flat flexible leads for easy soldering and mounting. Individually packed.

Code List  
 CK-125 ..... \$0.35

## "CH-500" TRANSMITTING CHOKES

For parallel feed in high powered transmitters—20- 40- 80- and 160-meter amateur bands. High equivalent impedance more than 500,000 ohms. Effective from 1,500 to 15,000 kc. with exception of frequencies between 5,300 and 6,400 and between 8,000 and 9,000. Six thin universal pies. Isolantite core. Insulated mounting brackets secured to Isolantite core with short machine screws. Brackets removable and choke mounted with a single machine screw. Ind.—2.5 mh. Dist. cap. less than 1.5 mmf. D.C. res.—8 ohms. Max. recommended D.C. (continuous) 500 ma. Overall size, less brackets— $1\frac{1}{8}$ " x  $2\frac{1}{2}$ ".

Code List  
 CH-500 ..... \$1.75

## "CHX" AND "CH-250" CHOKES

Invaluable item where space is at a premium. Small in size, light in weight, can be supported by leads. "CHX" has five impregnated pies. Ind.—2.1 mh. DC. res.—35 ohms. Dist. Cap.—1 mmf., 125 ma. DC. Length,  $1\frac{1}{2}$ ". Dia.,  $\frac{1}{2}$ ". "CH-250" similar to "CHX". Has 250 ma. current rating. Ind.—1 mh. DC. Res. 10 ohms. Dist. cap. 1 mmf. Length,  $1\frac{1}{2}$ ". Dia.,  $\frac{3}{8}$ ".

Code List  
 CHX ..... \$ .50  
 CH-250 ..... .50

## "XS-2" CRYSTAL SOCKET

The "XS-2" is a special crystal socket designed to conserve space and provide a low loss mounting for standard crystal holders. Made with heavy-duty spring contacts and mounted on glazed Isolantite. Can also be mounted inside "SWF" coil forms for changing coil and crystal in one operation. Overall diameter  $1\frac{1}{16}$ ".

Code List  
 XS-2 ..... \$0.60

## SHORT WAVE MANUAL SIXTH EDITION

Receivers, transmitters, antennas, modulators—everything for the short wave amateur and experimenter will be found in this valuable little book. Its 32 pages are crammed with information on constructing and operating shortwave transmitting and receiving apparatus. Written in simple language, the new Short Wave Manual will appeal to the beginner and oldtimer alike.

Code SWM ..... Price \$0.10

# HAMMARLUND

## "CF" ISOLANTITE COIL FORMS

Popular coil forms so many fans are using today. Black enameled wooden knob. Removable paper indicating disc protected by celluloid. Surface "non-skid". Plenty of holes—eliminates drilling. Slotted bottom for primary or tickler. Four, five, and six prong types. 1 1/2" diameter. 2 1/2" long exclusive of knobs and prongs.

Code	List
CF-4 (four prongs)	\$1.60
CF-5 (five prongs)	1.60
CF-6 (six prongs)	1.60

## "XP-53" COIL FORMS AND KITS

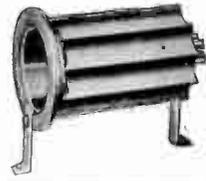

Outstanding forms using new low loss insulation material—XP-53. Natural coloring eliminating losses. Groove-ribbed for air spaced windings. Flange grips, meter indexes. Moulded threaded shelf in form. 1 1/2" diameter and 2 7/8" long exclusive of prongs. Kits with wound coils for MC-140-M condenser also available.

Code	List
SWF-4 (four prongs, coil form only)	\$0.50
SWF-5 (five prongs, coil form only)	.50
SWF-6 (six prongs, coil form only)	.60

No. 40 coil (wound coil, 4 prongs, 10-20 meters)	1.25
No. 41 coil (wound coil, 4 prongs, 17-41 meters)	1.25
No. 42 coil (wound coil, 4 prongs, 33-75 meters)	1.25
No. 43 coil (wound coil, 4 prongs, 66-150 meters)	1.00
No. 44 coil (wound coil, 4 prongs, 135-270 meters)	1.00
BCC-4 (wound coil, 4 prongs, 250-560 meters)	1.25
No. 60 coil (wound coil, 6 prongs, 10-20 meters)	1.50
No. 61 coil (wound coil, 6 prongs, 17-41 meters)	1.50
No. 62 coil (wound coil, 6 prongs, 33-75 meters)	1.50
No. 63 coil (wound coil, 6 prongs, 66-150 meters)	1.25
No. 64 coil (wound coil, 6 prongs, 135-270 meters)	1.25
BCC-6 (wound coil, 6 prongs, 250-560 meters)	1.50
SWK-4 (kit—4, four-prong coils, 17-270 meters)	4.25
SWK-6 (kit—4, six-prong coils, 17-270 meters)	5.00

## "TCF" COIL FORM

A transmitting coil form of XP-53 dielectric is also available. This may be permanently mounted on special brackets supplied, or in plug-in coil fashion. 2 1/4" diameter. 3 3/8" long exclusive of prongs.

Code	List
TCF-4 (4 prongs)	\$0.80
TCF-5 (5 prongs)	.80

## "CF-M" ULTRA S. W. FORMS

Unusual coil form for maximum efficiency at ultra-high frequencies or within the 28-56 megacycle band. Isolantite with correct form factor and resultant minimum high frequency resistance guaranteeing absolute stability. Plenty of holes to facilitate any inductance desired and any type of wiring. Form is 1 1/8" in diameter and 2" long exclusive of prongs.

Code	List
CF-5-M	\$1.30

## "S" ISOLANTITE SOCKETS

Standard socket at right. Lowest losses. Constant resistivity. Gripped prongs—cannot shift. Guide groove. Rust-proof side gripping contacts. Glazed top and sides. Sub-panel or base mounting. 2 1/4" x 1 3/8".

Code	List
S-4 (4 prongs)	\$0.60
S-5 (5 prongs)	.65
S-6 (6 prongs)	.70
S-7 (large base, 7 prongs)	.75
S-7 B (small base, 7 prongs)	.75
S-8 (8 prongs)	.80

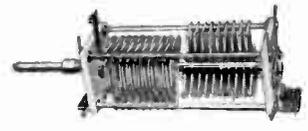

Code	List
UHS-900	\$1.10
UHS-900-X	1.50

New "locking" acorn tube socket for high frequency acorn tubes—954 or 955. 1 1/8" diameter. Five double grip silver plated Beryllium prongs. Top and sides glazed. Shielded plate to reduce feedback. UHS-900-X has 1 3/8" mounting centers.

## "HFBD" TRANSMITTING CONDENSERS

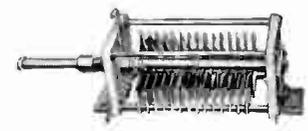

High efficiency, high frequency dual condensers with isolated rotor. Both mounting brackets and control shafts are insulated. DC can be applied to rotor as well as stator. Isolantite end plates, soldered brass construction, cadmium plated. End plate size 1 1/8". Types "E", "F" and "G" have rounded edge plates.

Code	Capacity	Length	Air Gap	List
HFBD-35-C	35 mmf.	2 3/8"	.050"	\$6.80
HFBD-50-C	50 mmf.	2 7/8"	.050"	7.00
HFBD-100-C	100 mmf.	4 5/8"	.050"	8.30
HFBD-200-C	200 mmf.	7 1/8"	.050"	11.00
HFBD-35-E	35 mmf.	3 1/4"	.070"	6.20
HFBD-65-E	65 mmf.	4 1/8"	.070"	7.10
HFBD-100-E	100 mmf.	6 1/8"	.070"	9.00
HFBD-35-F	35 mmf.	4 5/8"	.100"	6.50
HFBD-65-F	65 mmf.	7 7/8"	.100"	8.25
HFBD-35-G	35 mmf.	6 7/8"	.125"	7.25

## "HFB" CONDENSERS

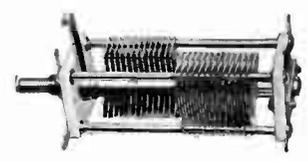

Same as above but single stator types. Stator is mounted at top to reduce capacity to chassis. The "HFB" has insulated mounting brackets and control shaft. Types "E" and "F" have rounded edge plates.

Code	Capacity	Length	Air Gap	List
HFB-50-C	50 mmf.	1 3/8"	.057"	\$4.60
HFB-100-C	100 mmf.	2 5/8"	.050"	5.10
HFB-150-C	150 mmf.	3 3/8"	.050"	5.60
HFB-50-E	50 mmf.	2 7/8"	.070"	4.90
HFB-100-E	100 mmf.	3 1/8"	.070"	5.80
HFB-50-F	50 mmf.	3 3/8"	.100"	5.00
HFB-100-F	100 mmf.	5 7/8"	.100"	6.90

## "HFA" & "HFAD" CONDENSERS

"HFAD" has the same general construction as "HFBD" except that it is smaller in size and does not have the insulated control shaft. Ideal for ultra-high frequency operation. End panels 1 3/8" square. "HFA" same construction, except end panel 1 1/8" x 1 1/8". Both can be single hole panel mounted or can be mounted to the panel with stand-off bushings. Plain edge plates.

Code	Capacity	Type	Length	Air Gap	List
HFAD-75-A	75 mmf.	Dual	2 3/8"	.020"	\$5.00
HFAD-100-A	100 mmf.	Dual	2 7/8"	.020"	5.30

## TRIM-AIR MIDGET CAPACITORS

Combine essential sturdiness with the flexibility obtained only in a spacer-built rotor and stator type of assembly.

ZR-35-AS  
PL-6003

ET-15-AD  
PL-6037

### GENERAL SPECIFICATIONS:

#### CAPACITY CHARACTERISTIC: S.L.C.

FRAME: End Plates of 5/32" thick Isolantite.

SHAFT: 1/4" diameter, nickel plated brass.

PLATES: .020" thick aluminum, specially treated to remove burrs.

FINISH: Spacers, bushing nuts and screws nickel plated brass.

MOUNTING: Singles require one 3/8" hole in panel; Duals provided with four No. 4-36 screws in square brass tie rods. Trim-Air mounting posts or brackets fit both single and dual types. Singles are fitted with tapered nuts acting on split bushing for locking rotor shaft for fixed tune. Duals have rear shaft extension for coupling to other units and have a removable intersection shield, on airgaps of .020 and .030.

Note: Single section Trim-Airs normally stocked with full length shaft for knob or dial. Stub shaft equivalents, with slot for screw driver adjustment only, available to order. "ZS" type singles have .040" thick plates with rounded buffed edges.

## TRIM-AIR HEAVY DUTY SPECIALS

ET-30-ASP  
PL-6058

Four-tie-rod frame, ball and strap rear bearing construction, augmenting the simplified Trim-Air construction, to give even greater strength and rigidity. General characteristics otherwise same as standard Trim-Airs.

Dual section units have balanced rotor and stator sections and both single and dual section types may be single hole mounted or used with standard Trim-Air mounting accessories. Standard Trim-Air shaft locking nut may be used for fixed tune. PL-6069 and PL-6068 are duals with rear shaft extended; all others have ball and strap type rear bearing.

## DIFFERENTIAL TYPE TRIM-AIR MIDGETS

A small, compact balancing type capacitor having ideal constructional features of the regular Trim-Air capacitor. This type has two stators, set 180 degrees from each other, engaging a single rotor. All balancing Trim-Airs are single bearing type except EU-140-AB, which has additional Isolantite rear end plate, with "ball and strap" rear bearing. All types single hole mounting in a 3/8" hole in panel or chassis, or standard Trim-Air bracket or mounting posts may be purchased separately.

EU-75-AB  
PL-6047

Note: Capacity per table, on basis of single rotor section to either one of two stators.

EO-50-FS  
PL-9510

### TYPE "E" MIDGET FIXED AIR CONDENSERS

Similar to larger type "J" Fixed units, the smaller Cardwell type "E" Fixed air capacitors are only 1-13/32 inches square. Built to fit standard Trim-Air condenser accessories. Mounting space required is same as for Cardwell Dual Trim-Air condensers. Used as low-loss interstage coupling condensers in transmitters of moderate power and as capacity loader in circuits requiring combinations of variable and fixed capacities.

# CARDWELL CONDENSERS

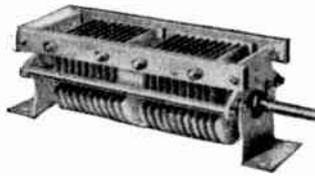

THE ALLEN D. CARDWELL MANUFACTURING CORPORATION

# STANDARDS OF COMPARISON

## MIDWAY TRANSMITTING CAPACITORS

The Midway is ideal for low and medium power transmitters for portable Mobile and aircraft equipment, due to its light weight, compact size and extremely sturdy construction. Incorporates original patented features of the larger "X" type standard transmitting condenser.

MT-100-GD PL-7030  
with PL-5051 Mtg. Brackets

### GENERAL SPECIFICATIONS:

**CAPACITY CHARACTERISTIC:** S.L.C.

**FRAME:** All aluminum end plates and tie rods.

**SHAFT:** 1/4" C.R. steel, cadmium plated.

**PLATES:** .025" aluminum. On sizes having airgap of .070" or over, plates have rounded edges, buffed to minimize corona loss.

**BEARINGS:** Brass, nickel plated shoulder type front bearing with ball thrust rear bearing.

**INSULATION:** Mylexal.

**MOUNTING:** 3 point front panel mounting by means of 3 screws and hex. posts. Two aluminum mounting feet with screws, Cardwell Part List No. 5052 for regular chassis mounting, provided instead, if so ordered. Type "M" special brackets (Part List No. 5051) permit inverted mounting.

## "N" TYPE TRANSMITTING CAPACITORS

Designed for medium power high frequency transmitters and short wave therapy apparatus, the Cardwell "N" series maintains the customary high standard of Cardwell construction, yet eliminates closed circuit loops completely.

NP-35-DD  
PL-7107

### GENERAL SPECIFICATIONS:

**CAPACITY CHARACTERISTIC:** S.L.C.

**FRAME:** Improved aluminum end plates support heavy lateral ceramic insulating bars which carry the stators.

**SHAFT:** 1/4" diameter cadmium plated steel.

**PLATES:** Aluminum, .040" thick, with rounded edges. PL-7106 and 7116 have buffed and polished edges. PL-7105 has .025" thick plates, buffed and polished edges.

**BEARINGS:** Cardwell shoulder type front bearing, with ball thrust rear bearing.

**MOUNTING:** Can be single hole mounted, or by three mounting posts and screws, to front panel. Chassis mounting on feet which form part of end plates, or use Cardwell "M" brackets, Cardwell part No. 301, for inverted mounting, for lowest stator-to-ground capacity.

## "T" TYPE HEAVY DUTY TRANSMITTING CAPACITORS

6 1/4" wide, 5 3/8" high, plates unmeshed. Corona shields on stators for wider airgap types. End plates 1/8" thick, heavy nickel plated. Massive bearings, 3/8" stainless steel shafts; heavy, two finger phosphor bronze rotor contactor bears on sturdy contact ring built to carry very heavy current without power loss. Rotor plates 4 1/2" diameter, .050" thick aluminum. Heavy mounting feet formed as part of end plates. Ball thrust rear bearing. Mycalex insulation.

## TYPE "J" PLUG-IN FIXED AIR CONDENSERS

For fixed capacity loading.

Plates easily removed. All "J" types have 2 1/4" square x 1/4" Alsimag No. 196 ceramic end plates. Supplied with banana plugs to fit "JB" Jack Base. On special order provided with hexagonal brass mounting pillars and mounting screws for permanent installation.

## INSULATED COUPLINGS

For isolating R.F. controls. Ceramic insulation (Alsimag No. 196). All flexible types have N.P. phosphor bronze springs, and heavy N.P. brass hubs, permanently swedged or spin riveted into the springs. Two fillister head, cup point, case hardened steel set screws in each hub insure positive lock to shaft.

All rigid types have improved three-point-spider construction, carefully machined solid brass castings, and are absolutely rigid.

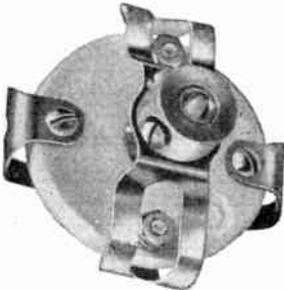

Flexible types C, D, E and F fit both 1/4" diameter shaft or a 3/8" shaft by removing bushing supplied.

## ACCESSORIES

### "MIDWAY" MOUNTING FEET

Heavy aluminum, with 2 screws; for Midway condensers. Parts List No. 5052.....List (Pair) \$0.25

### INDUCTANCE CLIPS

For tapping air-wound inductors. Cadmium plated phosphor bronze spring clips for No. 12 or 14 wire. Thin blades prevent shorting turns. Type 804-A. Parts List No. 5104.....List Price \$0.20

### ROTOR LOCK

For locking "X" standard or "M" Midway rotor shafts in position for fixed tune. Can be set behind panel or attached to any 1/4" shaft, mounted directly on front of panel. Nickel plated brass; diameter 1 1/2".

Parts List No. 5100 (Type ARL).....List Price \$0.75

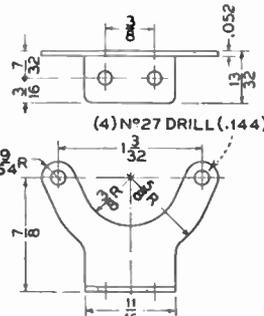

### SHAFT LOCK PANEL BUSHING

Long panel bushing for 1/4" shafts, has tapered nut for locking shaft in position. Fits 3/8" hole in panel. Complete with panel nuts. Nicked brass. Parts List No. 5055 (Type ALB).....List Price \$0.40

### TYPE "M" BRACKET

Use with type "N" U.H.F. duals or "M" Midway condensers. Turns condenser upside down for shortest plate leads in balanced R.F. amplifier. Regular mounting feet can be used to support a tank coil or jack base. Made of strong, satin finished, 1/16" aluminum, and supplied with proper screws and lock washers.

Parts List No. 5051.....List Price, each \$0.25

### "TRIM-AIR" MOUNTING BRACKET

For dual and single Trim-air condensers. Insulated from rotor and stator; N.P. brass, with two screws and nuts.

Parts List No. 5050.....List Price, each \$0.20

### "STANDARD" TYPE "X" MOUNTING FEET

Heavy nickel plated brass; for "X" transmitting types, with four screws. Parts List No. 5053.....List Price, pair \$0.25

### TRIM-AIR ACCESSORIES

As catalogued, Trim-Air singles are equipped for single hole mounting. Additional mounting accessories listed below are sold separately.

**MOUNTING BRACKET**—with 2 screws and nuts. Parts List No. 5050.....List Price \$0.20

**MOUNTING POSTS**—1/4" hex. x 3/4" long, tapped 6-32 N.P. brass. Pair, with screws and lockwashers. Parts List No. 5054.....List Price \$0.25

# CARDWELL CONDENSERS

## "W" TYPE HEAVY WEIGHT TRANSMITTING CAPACITOR

Without reservation, the "W" type construction, has been accepted for many years as the finest example of deluxe high power condenser design. Custom built by handcraftsmen, Cardwell type WX-95-VS, Part List No. PL-9400, is representative of other sizes which can be built to special order only. Quotations submitted on units to suit particular requirements, upon request.

WX-95-VS  
PL-9400

### GENERAL SPECIFICATIONS:

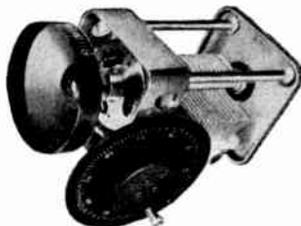

- FRAME:** Cast aluminum end plates with lacquered brass tie rods,  $\frac{3}{4}$ " in diameter.
- SHAFT:**  $\frac{1}{2}$ " diameter stainless steel, press fitted into solid brass rotor barrel.
- PLATES:**  $\frac{1}{8}$ " thick brass, edges milled and turned to perfect radius, buffed and polished—then lacquered.
- BEARINGS:** Steel, nickel plated, shoulder type front bearing with ball thrust rear bearing.
- ROTOR CONTACT:** 4 ply laminated phosphor bronze, self cleaning brush type bearing on heavy nickel silver disc riveted to end plate. Can be on front or rear end, or both.
- ROTOR ASSEMBLY:**  $\frac{1}{8}$ " brass plates staked and soldered into milled slots in  $1\frac{3}{4}$ " diameter solid brass rotor barrel, then polished and lacquered.
- STATOR ASSEMBLY:**  $\frac{1}{8}$ " brass plates staked and soldered into milled slots in massive brass stator blocks. Electrostatic shields on stators and corona cups on all stator studs minimize corona losses.
- INSULATION:** Mycalex (glass bonded mica).  $\frac{3}{4}$ " thick x 2" wide.

Specific for WX-95-VS (PL-9400)

- AIRGAP:** 1" between adjacent rotor and stator plates.
- PEAK VOLTAGE FLASHOVER:** 20 K.V. at 515 K.C.
- CAPACITY:** 100 mmfds. maximum—42 mmfds. minimum.
- DIMENSIONS:** L—14-3/16", W—15-3/8", H—13-13/16".
- LIST PRICE \$292.00**

## CARDWELL PRECISION CAPACITOR Type No. 4.080

Designed for frequency meters requiring maximum mechanical and electrical precision. Type No. 4.080 gear and worm driven capacitor incorporates special design features representing years of research and usage of this component in special measurement equipment which has successfully withstood most rigorous usage our armed forces could give it.

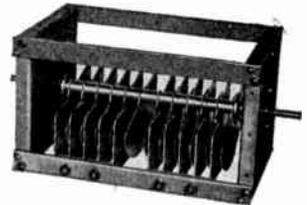

Frequency Meter Condenser  
Pt. No. 4.080

- CAP. RANGE:** Max. Cap. 220 mmfd., Min. Cap. 21 mmfd.
- PLATE SHAPE:** S.L.F.
- DI-ELECTRIC SUPPORTS:** Steatite.
- BACKLASH:** Negligible.
- RESETTABILITY:** To 10 parts in one million.
- GEAR DRIVE:** Precision split worm gear, equipped with precision ball bearings. Ratio—100 : 1 over 360 degrees.
- DIALS:** 3" DRUM: 50 divisions over 180° condenser rotation. 3" FAST RUNNING DIAL: Graduated 100 divisions, makes 1 revolution for each drum division. VERNIER RING: Divides each division on fast running dial into 10 parts.
- DIMENSIONS:** 5 $\frac{1}{2}$ " lg. (over drum dial) x 3 $\frac{1}{2}$ " deep x 3 $\frac{1}{2}$ " high. WEIGHT: 1 $\frac{1}{4}$  lbs. (with cast aluminum frame).
- ROTOR CONTACT:** Silver plated phosphor bronze spring, with 2 silver contacts bearing on silver plated disc.
- MOUNTING:** 3 point, to bottom of main casting.
- PRICE:** Capacitor, Part No. 4.080, only, Special Quote. Drum dial, fast running dial and vernier ring extra and subject to special quotation.

## TYPE "P" LIGHT HEAVY WEIGHT TRANSMITTING CAPACITORS

Designed to accommodate capacitance values up to 150 mmfd. per section in a dual section type having an airgap of .500", the "P" type construction permits higher capacity for a given airgap, and therefore a shorter frame than the "T" type construction. Typical Cardwell sturdiness is built-in, and the "P" type is probably the lightest transmitting condenser built for its size, yet completely satisfactory for heavyweight use. No single section types are catalogued; parallel or series connect for double or half single section capacity listed in table.

PK-125-QD  
Special

### GENERAL SPECIFICATIONS:

- FRAME:** End plates are  $\frac{1}{8}$ " thick formed aluminum, satin finish.
- SHAFT:**  $\frac{3}{8}$ " diameter, non-magnetic stainless steel, extended both front and rear end.
- PLATES:** .064" thick, rounded and buffed edges. Rotor plates are  $\frac{6}{32}$ " in diameter.
- BEARINGS:** Heavy nickel plated brass front and rear shoulder bearings.
- ROTOR CONNECTION:** Heavy, two finger N.P. phosphor bronze wiper bears on  $\frac{1}{8}$ " thick N.P. brass contact ring, at each end.
- STATOR CONSTRUCTION:** Plates permanently staked into slotted, rounded edge aluminum stator blocks.
- INSULATION:** Mycalex (glass bonded mica).
- MOUNTING:** 3 clearance holes for No. 10 screws in each side of each end plate permitting mounting on any side, as well as provision for mounting associated components such as inductance coil mountings, etc.

# CARDWELL CONDENSERS

## THE ALLEN D. CARDWELL MANUFACTURING CORPORATION

## TYPES C AND D CONDENSERS

Type	T	S	W	H
C	2 1/4	3 3/4	5 1/2	5 3/4
D	1 3/4	2 3/4	4 1/4	4

Johnson C and D condensers are sturdily constructed to give trouble-free operation under the most severe service. Only the finest materials are employed, yet these units are lower in price than any other quality condensers. Although value is evident throughout the line the models designed for high power applications are particularly outstanding.

All dual models have center rotor connections to insure balanced operation at ultra-high frequencies.

Important features include: Heaviest plates of any similar condenser, .051" thick... Ultra-steatite insulation... Large laminated rotor brushes... Center rotor contacts on all dual condensers... Heavy 1/8" diameter tie rods, for frame strength and rigidity, insulated to prevent "Short circuit loops"... 1/4" in steel shafts, cadmium plated, extending 1 1/2" in front, 3/4" in rear permitting ganging or rear drive. Panel space Type D, 4 1/4" wide x 4" high Type C, 5 1/2" wide x 5 3/4" high.

## TYPES E AND F CONDENSERS

Type	T	S	W	H
E	1 1/2	1 3/4	2 5/8	2 1/2
F	1 1/2	1 3/4	2 1/4	2

Designed as rugged, compact units for medium and low power transmitters, type E and F condensers are in a class by themselves. Heavy (.032") plates, rounded and buffed... Heavy (1/4") frame rods... Ultra-steatite insulation... Heavy, cadmium plated, phosphor bronze contact springs... and stators mounted above to reduce capacity to ground are outstanding features of these condensers. Front (1 1/2") and rear (3/4") shaft extensions permit ganging. In addition to the spacing shown .030" can also be supplied on special order.

## GENERAL CONDENSER INFORMATION

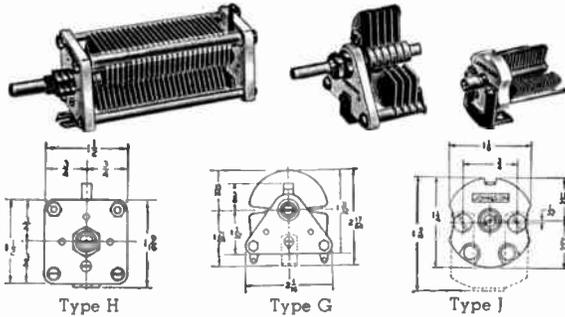

The first part of the catalog number indicates the capacity in mmfd. The following letter indicates the frame size or type, and if a dual condenser the second letter D indicates this. The final number multiplied by 100 is the approximate breakdown voltage. Since many conditions, such as altitude, humidity, and frequency, also influence this factor, this figure is only approximate. The maximum and minimum capacity for the dual condenser applies only to one section. In series maximum will be slightly more than one-half and minimum approximately two-thirds.

## TYPE H, G, AND J CONDENSERS

Type H

Type G

Type J

### Type H Condensers

The Type H Condenser was designed for aircraft transmitters and combines a minimum of weight and size with simple but rugged construction. Extremely small panel space, .020" plates, and universal mounting brackets make this one of the most popular condensers in the line.

### TYPE H CONDENSERS SINGLE SECTION

NOTE: 25H15 to 100H15 inclusive have single end plates.

### Type J Condensers

The type J condenser is a midget with big condenser characteristics. Wider spacing than most small types makes it ideal for oscillator and low power amplifier stages. It can be used in conjunction with Johnson tube socket type inductors to provide an extremely compact tank unit. Universal brackets make possible a variety of mountings.

Cat. No.	Capacity*		Spacing	Number Plates	Length	List Price
	Max.	Min.				
7J12	7	2	.025"	3	7/8"	\$1.65
15J12	15	2.5	.025"	6	1 1/8"	1.70
25J12	28	3.5	.025"	10	1 3/8"	1.90
50J12	55	4.3	.025"	19	1 7/8"	2.05
75J12	74	5	.025"	26	2 1/8"	2.30
100J12	102	7	.025"	36	2 3/8"	2.55

### Type G Condensers

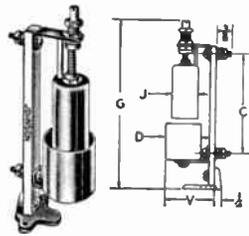

The type G condenser is extremely popular as a neutralizing condenser for medium and low power stages. Universal mounting brackets, simplicity in construction, together with a wide range of capacities and spacings, make it adaptable to many applications. Features include a single end plate of ultra-steatite, low minimum capacity, .032" plates, locking nut, and front and rear shaft extension.

Cat. No.	Capacity*		Spacing	Number Plates	Length	List Price
	Max.	Min.				
25G20	27	3.5	.045"	5	1 3/8"	\$2.75
50G20	52	5	.045"	9	1 3/8"	3.10
8G45	7.5	3	.125"	3	1 1/8"	2.55
13G45	13	4.3	.125"	5	1 1/8"	2.75
23G45	23	6.3	.125"	9	1 1/8"	3.10
6G70	5.5	3	.225"	3	1 1/4"	3.30
12G70	12	5.3	.225"	7	2 1/8"	4.15

These inductors were designed to plug into a four or five prong tube socket such as Johnson Nos. 224 or 225. They are available for all bands with either center or end links. Those with center links are center tapped for split stator circuits. The forms are composed of glazed high grade porcelain and provided with ribs so that a negligible portion of the winding is in contact with the insulating form. Used with the type J condenser mounted inside, they make excellent tank units for oscillator and low power stages. Rugged in construction, there is no danger of damaging a delicate winding by careless handling. Wound of heavy wire they will safely handle powers of 100 watts or less. Convenient additional terminal at top for plate connection to tubes with plate cap. All sizes use coil forms 1 3/4" in diameter and 3 3/4" high.

## TYPE N CONDENSERS

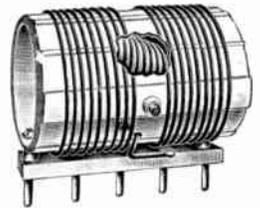

Small mounting space requirements, extremely high voltage rating in proportion to size, fine adjustment with uniform voltage breakdown throughout the full capacity range, and low cost make these neutralizing condensers ideal for the modern transmitter. "Plates" are aluminum cups supported on an ultra-steatite frame with cast aluminum mounting bracket. Because of the design these condensers will stand much higher voltage than conventional flat plate condensers of the same spacing.

Cat. No.	Capacity		DIMENSIONS				List Price
	Max.	Min.	I	D	C	G	
N125	12	2.5	1	1.375	3 1/2	6 1/2	\$4.50

N375	13	3.4	1.375	2.25	4 3/8	8 3/8	6.00

## ROTATING COIL "HI-Q" INDUCTORS

Johnson Hi-Q inductors were designed for optimum LC ratios. The highly glazed porcelain coil form includes ribs which insure a minimum of contact between the wire and the insulating form. Losses involved in this type of construction are a minimum and yet provide a rigid unit which cannot be damaged by careless handling. Floating lugs in the mounting bar insure perfect contact. Two sizes are provided and both are available either with or without the rotating coupling coil. On the higher frequency bands the coupling coils are adequate for working directly into a 600 ohm open wire line, while on the lower frequency bands couplings may easily be made into a 70 ohm line or an antenna tuner.

Cat. No.	Band (Meters)	Cap.* (mmf.)	Coupling	Dimensions LxD	Watts Input	List Price

## TUBE SOCKETS

"The World's Most Famous Tube Sockets," a title earned over years of top quality in material, workmanship and design, cover nearly every transmitting tube requirement. Johnson sockets are specified by exacting users wherever conditions are most severe, as in Government services.

No. 209 is similar to No. 210 but provides greater spacing between contacts and shell, for higher voltages. No. 211, the standard "50 watt" socket, has double filament contacts for carrying heavy currents. No. 216 is for "jumbo 5 prong" tubes such as 204A, 849, etc., and features a plate terminal "safety cup." 210F and 211F are for front of panel mounting and are enclosed in lustrous black finished aluminum housings.

EIMAC 152TL and 304TL tubes take the new 213 socket, and EIMAC 1500TH etc., take the new 214 (with air jet for cooling filament seal).

All contacts are heavy, side wiping type, phosphor bronze, with choice of beryllium copper in most cases; shells, where used, are heavy brass, nickel plated; bases of excellent white porcelain, with steatite (Gov't grade G) optional.

Explanation of catalog number. No letter suffix indicates porcelain base and phosphor bronze contacts. Letter B indicates beryllium copper contacts. Letter S indicates steatite base (Government Grade G).

## WAFER SOCKETS

237-247

235

217-224-225-226-227-228

Johnson ceramic wafer sockets are insulated with steatite (Gov't grade G, wax impregnated) making them excellent for use at high and ultra-high frequencies. Contacts are cadmium plated, reinforced with cadmium plated steel springs, recessed in the form to prevent movement. All metal parts are counter-sunk and mounting holes bossed to permit mounting on metal panel without shorting.

No. 235 acorn socket has silver plated beryllium copper contacts mounted on bosses, providing long leakage paths. No. 237 is a socket for the HK 257 and RCA 813 tubes and No. 247 for the RCA 829 and 832 tubes is similar, with an aluminum tube shield.

Cat. No.	Base	List Price	Cat. No.	Base	List Price

## EDGEWISE WOUND "HI-Q" INDUCTORS

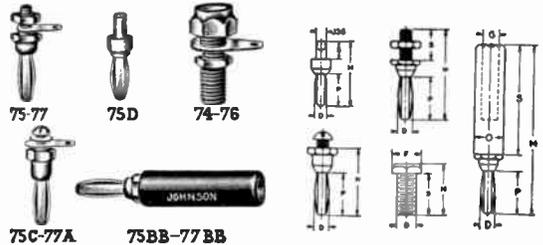

Wound with plated edgewise copper strip and supported by low-loss hard rubber insulation, these inductors present a very commercial appearance and safely handle up to 1000 watts. Sizes for all bands and for impedance matching networks. Also available on special order with Mycalex or Bakelite insulation. Other edgewise wound inductors are listed in the Commercial Catalog.

## PLUGS AND JACKS

### "Banana Spring" TYPE

Nickel-silver springs, and high-grade nickelled brass screw machine parts with accurate threads and milled nuts. Studs extend full length of springs.

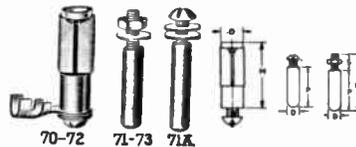

75C is a tapped plug with 1/8" 6-32 machine screw in head. 75D is designed for riveting or soldering. Spring is of beryllium copper.

75BB has 1 3/8" black insulated handle; 75 BR same but red. 77BB has 1 3/4" black insulated handle; 77BR same but red.

### Dimensions

## TUBE CAPS

Tube caps of phosphor bronze, cadmium plated, for transmitting use. Provide positive grip and low resistance contact. Formed on one piece there are no mechanical joints to corrode and cause resistance.

Cat. No.	List Price
852—Medium, for 802, etc.	\$0.05
854—Large, for 866, etc.	.10

## TINNED COPPER SOLDERING TERMINALS

Available in six sizes, Johnson soldering terminals meet the requirements of most applications. Composed of copper for low resistance, they are tinned to permit easy soldering. Composed of heavy material and accurately formed these terminals are far superior to most products.

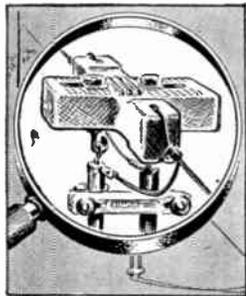

Cat. No.	List Price per 100
880—1/2" long, 6-32 hole	\$0.40
881—3/4" long, 1/4" hole	.53
882—1" long, 3/8" hole	1.25

## THE JOHNSON "Q" AND JOHNSON "Q" BEAM

The phenomenal results obtained by the thousands of users of the Johnson Q antenna system are due to the extremely high efficiency of this famous antenna. Applications include half-wave doublet, either horizontal or vertical, harmonic or "long wire" radiator, radiator-reflector, radiator-director, "V" Beam, Johnson Q Beam and others. All of these systems, including complete technical details, are described in the JOHNSON-BASSETT ANTENNA HANDBOOK listed on page seven.

The Johnson Q Beam is a special application of the Q system. It consists of two half-wave Q antennas spaced 1-5 wave and Q sections connected in parallel at the bottom. In ordering specify two QS antennas for the lower frequency of the two bands desired. For example if you want a Q Beam to operate on 10 and 20 meters, order two Johnson Qs for 20 meters.

### COMPLETE "Q" SYSTEMS

Cat. No.	Band (Meters)	List Price
5QS	5	\$7.00
5QM	5	10.00
10QS	10	8.65
20QS	20	14.50

### "Q" SPACING BARS

Made of dense, highly vitrified white glazed porcelain, with aluminum tubing clamps. Used for spacing tubing in matching transformer applications. Clamps are arranged so spacing is continuously variable from zero to four inches.

No. 33—Spacing Bar.....List \$0.30

33

### "Q" SUSPENSION ASSEMBLY

Includes new type insulator and all necessary hardware for connecting "Q" matching section to antenna and transmission line. Insulator may also be used to bring off "Zepp" feeders from the flat top.

Cat. No. List Price  
39—Suspension Assembly .....\$1.90  
106—Antenna-Feeder Insulator only......60

106

### ENAMELLED COPPERWELD ANTENNA WIRE

Johnson Enameled Copperweld Antenna Wire is the ideal material for any system where the wire must not stretch nor sag. The steel core provide almost three times the strength of ordinary copper wire, the copper coating provides low RF resistance, and the enamel prevents corrosion. Prices are per 100 feet. Carried by most suppliers in bulk, it is available from the factory in any specified length.

Cat. No.	B&S Gauge	Feet per lb.	Breaking Strength	List Price
346	8	22	1700 lbs.	\$4.25
348	10	34 1/2	1130 lbs.	2.75
350	12	54	720 lbs.	1.90
352	14	85	400 lbs.	1.25

### STRAIN INSULATORS

30-32

Numbers 30 and 32 are ideal for ordinary application requiring a sturdy insulator at a low price. Number 38 provides an extremely long leakage path and was intended for high voltage application. All are of white glazed low absorption porcelain. Particularly useful in breaking up guy wires where good insulation and light weight is essential. Keep several on hand for emergencies.

Cat. No.	Length	List Price
30	2"	\$0.11
32	1 1/2"	.08
38	1 1/2"	.15

38

### FEEDER INSULATORS

132-134-136

31

Numbers 132, 134 and 136 are conventional feeder spreaders having a cross-section of 3/8" x 1/2" and No. 132 is also provided with notches for 1 1/2" line spacing. Number 31 Transposition insulator makes possible crossing over the transmission line at frequent intervals to prevent radiation and provide 2" line spacing. All insulators are of high grade low absorption glazed porcelain.

Cat. No.	Length	List Price
132	2"	\$0.15
134	4"	.20
136	6"	.25
31		.16

### ANTENNA INSULATORS

107-112-120

151-152-153

These insulators are of genuine WET PROCESS porcelain, with smooth white glazing. The all-porcelain types are 1" in diameter. Their long leakage path, low capacity, and freedom from moisture absorption result in exceptional efficiency. The Commercial Type is 1 1/2" in diameter, for uses where much greater strength is necessary. End fittings are of non-corrosive aluminum alloy. No. 104 is a dry process 4" antenna insulator, 3/8" square for service where the strength of the 1" types is not required.

Cat. No.	Break Strength	Length	List Price
104	400 lbs.	4"	\$0.20
107	800 lbs.	7"	.70
112	800 lbs.	12"	.90
120	800 lbs.	20"	1.50

Cat. No.	Break Strength	Net	Overall	List Price
151	5000 lbs.	8"	15 1/2"	\$9.00
152	5000 lbs.	12"	19 1/2"	10.75
153	5000 lbs.	20"	25 1/2"	15.00

### RADIO FREQUENCY CHOKES

752-754-762

750

760

Uniformly flat in response, Johnson R.F. chokes are equally effective over the entire range for which they are designed. Coils are of enameled silk-covered wire impregnated with high grade R.F. lacquer, and are wound on steatite cores. Current ratings are for continuous service and may be increased for intermittent use.

Cat. No.	Frequency	Current Rating	Lgh.	List Price
750	1.7 to 30 mc	150 ma	1 1/2"	\$0.70
752	1.7 to 30 mc	500 ma	2 7/8"	1.25
754	1.7 to 30 mc	750 ma	4 7/8"	2.15
760	Ultra-high	250 ma	1 1/2"	.55
762	Ultra-high	1500 ma	2 7/8"	.80

### INDUCTOR CLIPS

860

Phosphor bronze, cadmium plated with clamping screw and integral solder loop. The only clip taking wire from No. 20 to No. 10, without danger of tilting and shorting adjacent turns.

No. 860—Clip.....List \$0.10

# E. F. JOHNSON Company WASECA, MINNESOTA

## STAND-OFF AND CONE INSULATORS

Available in a variety of shapes and sizes all are composed of superior white glazed porcelain except the 500 series which is Alsimag 196. Numbers 65, 66, 67 and 68 are equipped with metal bases which are available either in cadmium plated steel or lacquered brass. Porcelain cones in 600 series have threaded brass inserts, far superior to poorly fitting porcelain threads.

### BRASS BASES

For outside use, particularly under corrosive conditions, lacquered brass bases are recommended, if necessary for replacement, on Numbers 65, 66, 67 and 68 insulators.

Cat. No.	For Use With	List Price
866-867	65	\$0.07
866	66-68	.10
867	67	.12

### SHAFT COUPLINGS

Flexible coupling units insulated with Ultra-Steatite are available in two sizes, No. 250, 1 3/8" diameter and No. 251, 2 1/4" diameter. Flexibility is obtained by cadmium plated phosphor bronze spring with no backlash.

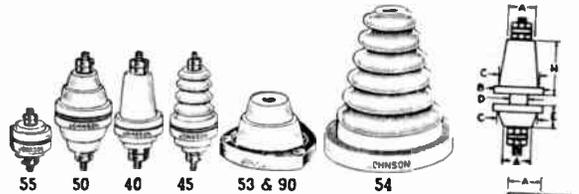

No. 252 is an improved solid insulated coupling of Ultra-Steatite for 1/4" shaft. Long leakage path and accurate alignment of hubs are outstanding features.

No. 258 cadmium plated brass compression shaft coupling will not burr shaft and is much stronger than set screw type. Ideal for coupling together 1/4" shafts where they need not be insulated.

Cat. No.	Shaft	Diameter	List Price

## SWINGING LINK ASSEMBLIES

### TYPE BVL

#### 100 WATTS RATING

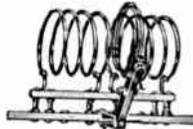

A small, unusually compact, highly efficient Assembly designed for direct mounting on condenser. Ideal for low powered transmitters and exciter stages or in conjunction with B & W Type BL coils in interstage coupling. Six interchangeable plug-in coils provide a complete range, from 5 to 160 meters.

Type	*Capacity MMfd.	Inductance Microhenrys	Net Price
160BVL	100	78	\$2.31
80BVL	54	38	2.09
40BVL	40	13	1.82
20BVL	25	5.0	1.60
10BVL	18	1.7	1.54
5BVL	16	0.6	1.49

BVL ASSEMBLY—includes swinging link and jack bar \$2.75

### TYPE TVH

#### 500 WATTS RATING

"Best yet" for those 500-watt rigs! With TVH's you obtain the same high measure of efficiency at 10 meters as on the lower frequencies. Their novel

plug arrangement permits easy capacity value selection. The time-tested B&W Variable Link design assures peak performance in ALL installations.

Type	Inductance Microhenrys	*Capacity MMfd.	Wire Size	Outside Dia.	Plug Centers	Net Price

10TVH	1.35	22	6	2½"	6"	3.14

TVH Base Assembly 4.13

### TYPE TVL

#### 250 WATTS RATING

The Type TVL AIR INDUCTOR is an outstanding example of the B & W policy—to design every AIR INDUCTOR to do a specific job . . . better than it was ever done before! You'll find Type TVL Coils and Assemblies practical . . . efficient . . . exceptionally dependable for medium power applications—even under extreme operating conditions.

Type	Inductance Microhenrys	*Capacity MMfd.	Wire Size	Outside Dia.	Plug Centers	Net Price

TV Base Assembly 4.40  
TA Antenna Matching Coil 1.93

### TYPE HDVL

#### 1 K.W. RATING

Here is the "King of Swing"! For all around dependability and exceptional performance in high power transmitters the heavy duty Type HDVL Swinging Link Assembly is undeniably superior, both electrically and mechanically, to any other type of coil on the market. As in all B & W Swinging Link units, an independent link and base assembly permits panel control of coupling.

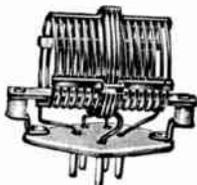

Type	Inductance Microhenrys	*Capacity MMfd.	Wire Size	Outside Dia.	Plug Centers	Net Price
160HDVL	94.0	90	14	3½"	7½"	\$5.78

### B&W "JUNIORS" 75 WATTS RATING

New! Huskier! . . . "Tops" for Most Limited-Space Applications!

These new B&W JUNIORS far surpass, in ruggedness and efficiency, most of the larger, more bulky coils of comparable rating. Designed for optimum performance in oscillator, buffer, or amplifier stages operating at input powers up to 75 watts and plate voltage to 850 volts.

Type	Tuning Cap. Mmfd.

### 100 WATT 5-BAND TURRETS

TYPE BCL—Center Linked, Center Tapped Coils  
TYPE BEL—End Linked Coils

These B&W 100-watt Turrets set new highs in fast, positive band switching on the commonly used amateur frequencies, 10 to 160 meters. Several new features, including a specially - designed switch, make them equal in efficiency to the best individual plug-in coil systems.

They're extremely compact — 7½" high; 7½" wide; depth behind panel, 4½"; shaft extension, 1". They may be used with tubes operating at 1,000 to 1,250 volts and a maximum input power of 165 watts. Each unit comes complete with frequency-marked dial plate, lock washer and nut. It may be mounted directly on the panel in a single ¾" hole. You'll find the total cost of one of these turrets and suitable condensers is actually less than the cost of components for any comparative method now available.

Amateur Net . . . . . Each \$9.35

# B&W

# FIXED LINK AIR INDUCTORS

BARKER & WILLIAMSON • UPPER DARBY, PA.

- Minimum Dielectric in the Field of the Coil
- Extremely Low Losses • Rugged Construction
- Excellent Appearance • Low Cost

Type HDL (Fixed Link)

Each AIR INDUCTOR is a completely finished unit in every respect. All coils are center tapped and equipped with banana type plugs. . . . The "B" series is for use in oscillator and buffer—doubler stages developing up to 100 Watts of power. . . . The "BX" series is suitable for neutralized buffer and final tank stages with inputs up to 250 Watts. . . . The "T" line is especially well suited for high powered neutralized buffer and final tank stages where powers of 500 Watts are developed.

For the Amateur who wishes to use the maximum amount of power, our "HD" series of inductors are unquestionably the finest coils of their type on the market today. Capable of handling a kilowatt with ease. Equipped with oversized plugs of ample current carrying capacity.

### TYPE CX CONDENSER

An unusually high quality component, the B & W type CX variable condenser possesses features not found in units of conventional design. Integrally incorporated neutralizing plates eliminate mechanical mounting details and preserve circuit symmetry. B & W type HDVL, HD, HDL, or TVH inductor assemblies may be mounted directly on the condenser, completely eliminating all closed circuit wiring and reducing total tuned circuit leads to an absolute minimum. Opposed stator sections provide short, high current RF paths so necessary in high powered transmitters.

Standard plate thickness in all models, 1/16". Available on special order, 3/32" plates at 10% additional.  
 Special features—We are prepared to furnish quotations on gear drive, ball bearings, ganged units, or other types of special design.  
 Explanation: The type of each condenser designates its capacity and plate spacing as follows:  
 CX100 indicates 100 mmfd per section.  
 Letters A, B, C, or D denote plate spacing: A—.500", B—.375", C—.250", D—.187". Following N<sub>g</sub> denotes Neutralizing plates.  
 Type HDV assembly mounted on any type of condenser. . . . \$5.00 Net  
 Type HD or HDL Jack Bar mounted on condenser. . . . \$2.75 Net  
 Type TVH assembly mounted on condenser. . . . \$4.25 Net

## B&W LOW-POWER COILS and BAND SWITCHING ASSEMBLIES

### B&W "BAND-HOPPERS"

The Mighty Midgets of Band Switches!

Sturdy, unbelievably compact, low in price! These reliable practical units are now available in two completely redesigned units . . . improved throughout. Cover all five bands, yet require very little space. Panel control.

Model 2A—(25 Watt Rating)—For interstage coupling with beam power tubes. Net \$3.65

Model 2AB—(50 Watt Rating)—For interstage coupling between beam power tubes and triodes or high-powered beam tubes. Net \$3.85

### "BABY" AIR INDUCTORS (25 Watt Rating)

Just the thing for crowded layouts, portable, field transmitters! The smallest, most efficient, most practical 25-Watt coils ever available to amateurs. "BABIES" measure only 1 1/2" x 1 1/4", are made air-spacing, maximum strength, fine appearance and ultra-high efficiency with an absolute minimum of insulating material. Available in five types, from 10 to 160 meters. Conservatively rated. Universal 3-prong Alsimag 196 bases.

Net, Any Type . . . . . \$0.83

Straight Coil	Center Tapped	End Linked	Center Linked	Inductance	*Capacity
160M	MC	MEL	MCL	90	90
80M	MC	MEL	MCL	40	50
40M	MC	MEL	MCL	14	35
20M	MC	MEL	MCL	3.5	35
10M	MC	MEL	MCL	1.1	30

\*Total effective capacity required to effect resonance on low frequency end of specified band.

### "BABY" TURRETS 35-Watt Rating

These compact 5-band switching units cover amateur bands from 10 to 160 meters. They may be tuned in all types of service with any of the 100 mmfd. midget condensers. Their sturdy construction and unique design assure permanent coil alignment and maximum efficiency with a minimum number of tubes. Four types — BTM, straight untapped; BTCT, center tapped; BTEL, end linked and BTCL, center linked—provide vastly improved band-switching efficiency in low-power transmitters and exciter stages. Net, Any Type . . . . . \$6.75

## Amateur Band

# TRANSMITTER ACCESSORIES

### 50-Watt Transmitter—Exciter

USES 6L6 AND 807

Compact relay rack mounting

A Tri-tet circuit, which is used to obtain harmonic output, is reduced to the simple tetrode circuit for oscillator output at the crystal fundamental by short-circuiting the cathode tank circuit. Sufficient oscillator output at the fourth harmonic of the crystal frequency is obtainable to drive the 807, which may be operated as either a straight amplifier or frequency doubler, making it possible to obtain an output of 25 to 50 watts or more in four bands from a single crystal of properly-chosen frequency.

The entire unit is designed to operate from a single 250-ma. supply delivering up to 750 volts, the maximum voltage at which the 807 is designed to operate. A fixed bias of 45 volts is required for the 807 and the two heaters together consume 1.8 amperes at 6.3 volts. A single milliammeter with a scale of 200 ma. may be switched to read the plate current of either stage.

Because it is possible to double or quadruple frequency in the plate circuit of the oscillator and to double frequency in the plate circuit of the 807 as well, there are several possible combinations of coils and crystals which will produce the same output frequency.

90800, less tubes, but including one set of coils. **Net Price** ..... \$37.50

Additional coils, per set of three. **Net Price**.....\$3.00

(In ordering state band in which crystal operates and band in which output is desired)

### Variarm—ECO

A GOOD ECO AT A LOW PRICE

**LOW DRIFT**—Less than 0.06% from cold start. Most drift in first 10 minutes.

**VIBRATION IMMUNE**—Shock mounted oscillator section; sturdy construction.

**NO HAND CAPACITY**

**CHIRPLESS KEYING**—Constant load on power supply.

**GOOD BAND SPREAD**—100 dial divisions from 3500 to 3650 kc. on model 90700. "Variarm" vernier tuning on both models.

**COMPLETE**—Vibrationless power supply, three tubes, output coupling unit.

The Rice-Variarm was described in detail in a comprehensive article by Henry E. Rice, Jr. in the January issue of *QST*. The Millen commercial models are:

No. 90700 has fundamental oscillator frequency range of from 3500 to 3650 kc. "Convenient-to-change" taps on amplifier and link coils provide for output on 80 or 40. Complete with G.E. tubes, ready to use.

**Net Price** ..... \$32.50

No. 90701 is the same as No. 90700 except fundamental oscillator frequency range of from 1750 to 2000 kc., providing for output on 160 or 80. Complete with G.E. tubes, ready to use. **Net Price**... \$32.50

## Modern Parts Designed for Application

MILLEN RADIO PRODUCTS are well designed MODERN PARTS for MODERN CIRCUITS, attractively packaged, moderately priced, and fully guaranteed. They have been designed with a view toward easy and practical application as well as efficient performance. For instance, the terminals are located so as to provide shortest possible leads, mounting feet are designed for easy insertion of screws and socket contacts, so that the solder won't run down inside them and make impossible the insertion of the tube etc. Thus our slogan, "Designed for Application." Our general catalog is available for the asking either from your favorite parts supply house or direct from the factory.

## A Precision Crystal *Secondary* FREQUENCY STANDARD

A precision frequency standard capable of being adjusted to WWV or some other primary standard and putting out uniformly accurate calibrating signals with 10, 25, 100, 1000 KC intervals. Uses the new GENERAL ELECTRIC 1000 KC crystal having a frequency temperature coefficient of less than one cycle/Mc/C°. The crystal is sealed in Helium in a standard metal tube envelope.

The self-contained AC power supply has VR150-30 voltage regulator tube. . . . In addition to oscillator, multivibrators, and amplifier, a built-in detector with phone jack and gain control on panel is incorporated.

The August 1940 issue of the magazine *QST* contains a detailed technical description by the designer, Mr. George M. Brown.

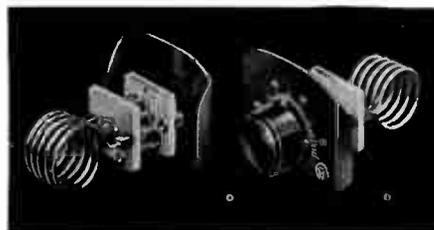

Tubes required: VR150-30; 6K8; 2-6SC7; 6V6; 6SJ7; 5W4. Cabinet size: 9" x 9 1/2" x 10 1/2". Weight of the 110 volt 60 cycle model, less packing, is 16 lbs.

90505 Frequency Std., with G.E. tubes and crystal 110V60 net pr. . . \$135.00

90507 Frequency Std., with G.E. tubes and crystal 220V50-60 net pr. 145.00

## MIDGET FREQUENCY METERS

Many amateurs and experimenters do not realize that one of the most useful "tools" of the commercial transmitter designer is a series of very small absorption type frequency meters. These handy instruments can be poked into small shield compartments, coil cans, corners of chassis, etc., to check harmonics; parasitics; oscillator-doubler, etc., tank tuning; and a host of other such applications. Quickly enables the design engineer to find out what is really "going on" in a circuit. Sold in sets of 4 in handy protective case or individually.

- 90605 Range 3.0 to 10 mc. . . . . \$3.00
- 90606 Range 9.0 to 23 mc. . . . . 3.00
- 90607 Range 23 to 60 mc. . . . . 3.00
- 90608 Range 50 to 140. . . . . 3.00
- 90600 Complete set of four, in case. . . . . 12.00

# BROWNING

## FREQUENCY METER - TYPE S-2 ACCURACY BETTER THAN .005%

### ... Characteristics ...

1. Custom built and hand calibrated for specified frequencies.
2. Checks frequencies within any five bands, 25 to 500 Kc. wide, depending on position in spectrum, from 1.5 to 120 Mc.
3. Stable E.C. oscillators in especially designed circuit.
4. 100 Kc. crystal oscillator provides at least two check points in any band.
5. Cathode ray indicator allows accurate visual check against crystal standard as well as against transmitter.
6. Complete voltage stabilization of both crystal standard and E.C. oscillators.
7. Overall accuracy better than .005%.
8. Rapid operation. Less than one minute required to check one frequency.
9. Portable — a.c.-d.c. operation.
10. May be used to determine any five frequencies in the range from 1.5 to 60 Mc. to an accuracy of .005%.

### ... Circuit Design and Operation ...

The Type S-2 Frequency Meter is designed for accurately checking frequencies in any five bands (25 to 500 Kc. wide depending on location in spectrum) from 1.5 to 60 Mc. A 100 Kc. crystal is used as a secondary standard. Its frequency may be checked readily against the National Bureau of Standards' Station WWV or any reliable broadcast station operating on a multiple of 100 Kc.

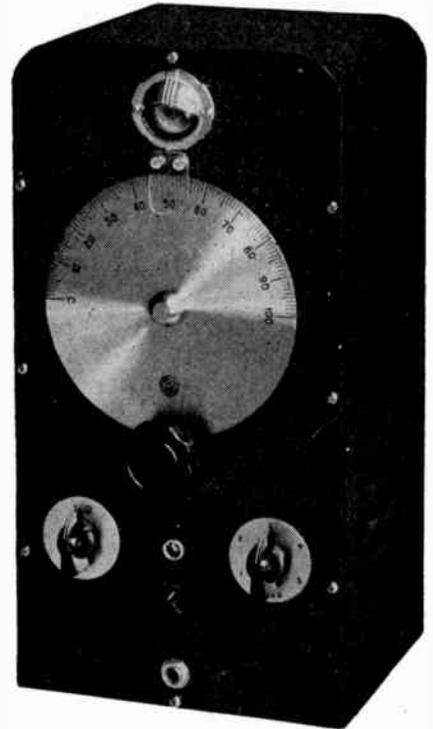

Very stable electron-coupled oscillators are used to cover a band of frequencies from 25 to 500 Kc. wide. The required frequencies are included in these narrow bands. A 5½" vernier drive dial is attached to the condenser controlling the variable oscillator, and an accurate calibration of this dial given. The circuit is so designed that at least two points on any band may be checked against the 100 Kc. crystal oscillator. Slight adjustments of the variable oscillator by means of a front panel control are made when necessary, so that the calibration of the variable oscillator is at all times reliable. The specified frequencies are clearly indicated on the calibration curve and their dial settings given.

To facilitate zero beat adjustments, a tuning eye is employed. When exact zero beat is obtained, the eye opens. Either side of zero beat, the eye "flutters" at the beat note rate. A phone jack is provided so that zero beat may be indicated aurally as well as visually. The tuning eye is employed both in checking the variable oscillator against the 100 Kc. crystal and the transmitter against the variable oscillator. It may be used also to check transmitter frequency deviation. Checks on the transmitter frequency may be made very rapidly, the average time required being less than a minute.

The accuracy of the meter depends primarily on the accuracy with which the dial may be read. It is this reading accuracy requirement which determines the band width employed at any point in the spectrum. There are 200 divisions on the main 5½" tuning dial. Reading to ½ of one division is entirely feasible. At 1500 Kc. this provides a reading accuracy of .004% with a band spread of 25 Kc. The same accuracy at 30 Mc. is obtained with a band spread of 500 Kc. The calibration curve is drawn in the laboratory by means of a frequency standard whose accuracy is better than 5 parts in 5 million and which allows check points every 10 Kc.

The highest order of stability is obtained by voltage regulation. Line voltage changes of 10% have a negligible effect.

With a room temperature change of 10°F either side of the temperature at which the crystal is accurately set, the resulting frequency error in crystal frequency will be .002%. The time taken to reach operating temperature is about one hour. Means are provided for changing the crystal frequency slightly so that this frequency may be at any time adjusted to at least 50 parts in 5,000,000 against the National Bureau of Standards' Station WWV by the zero beat method.

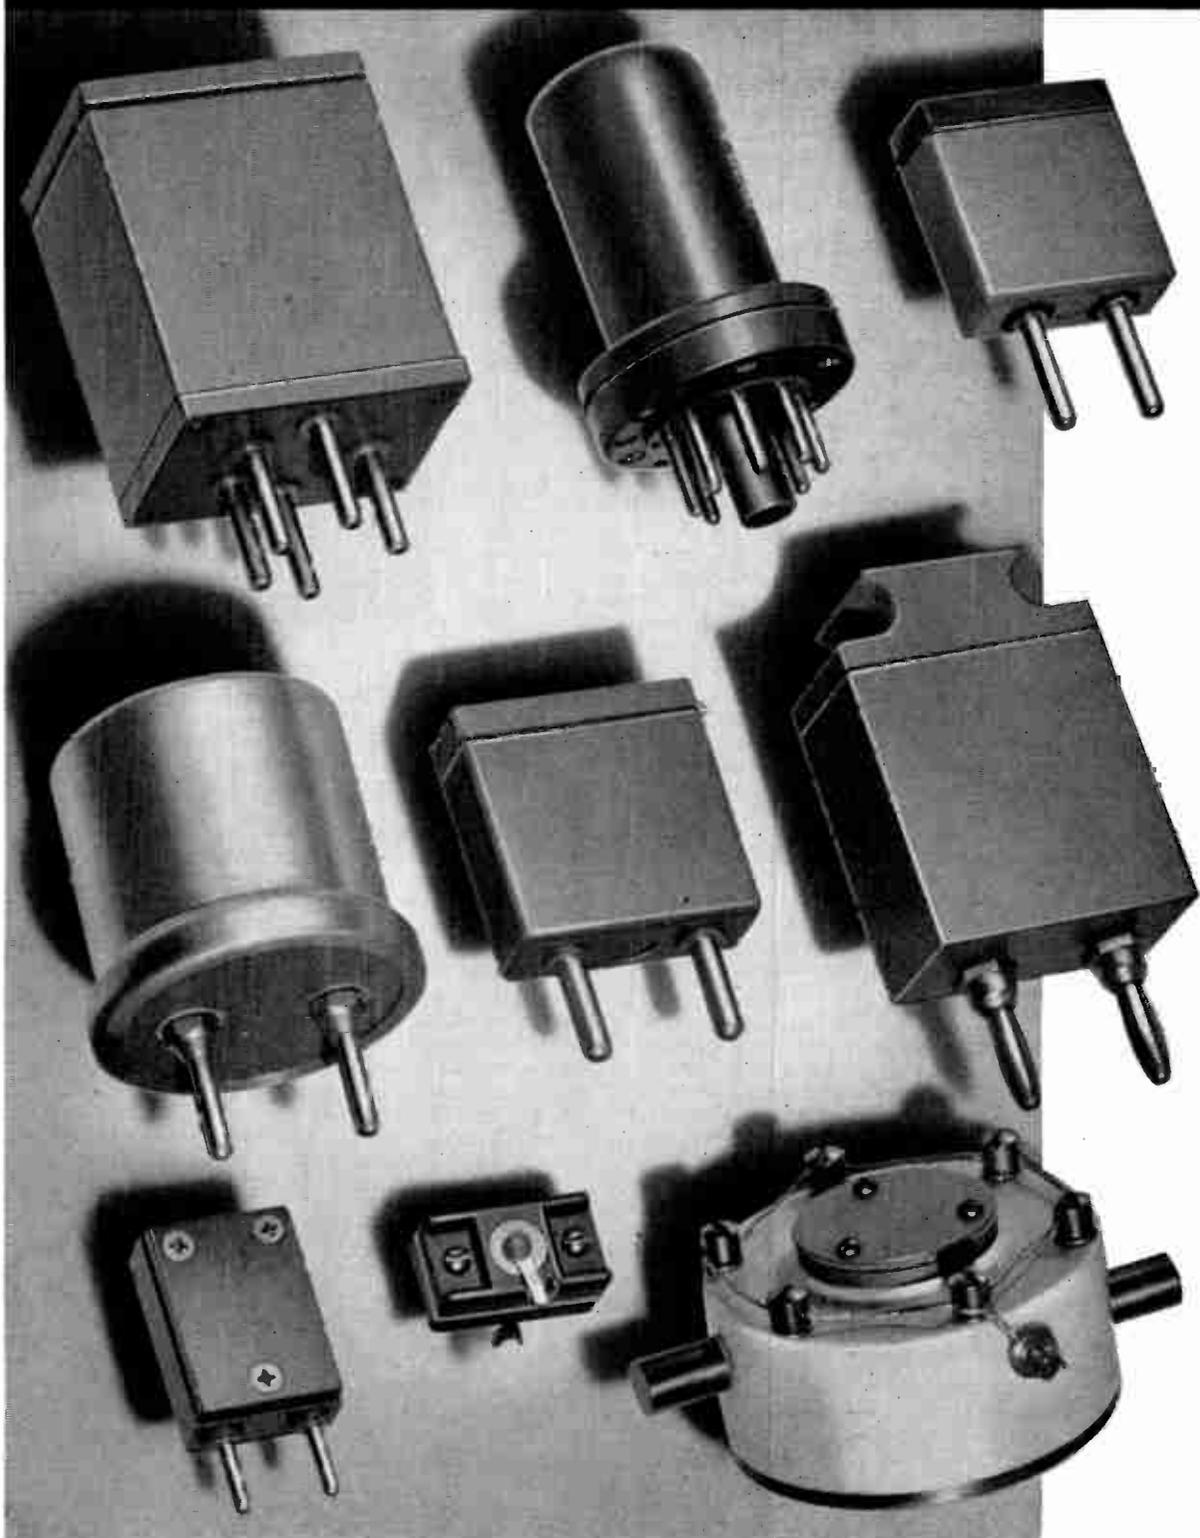

Delivery can be made about 15 days after receipt of order

# Bliley CRYSTALS

# Bliley CRYSTALS

## There is a BLILEY CRYSTAL for every frequency control application

Illustrated here are a few of the crystal types which we are currently manufacturing for use in both fixed and mobile communications equipment of our armed forces and other essential applications. They are designed and pre-conditioned for rugged service in all parts of the world.

The activity and frequency of each crystal is individually proven under laboratory created service conditions of altitude, humidity, temperature, immersion, shock and vibration.

Bliley's background of research and skill in licking tough wartime assignments is your guarantee that Bliley will also have the right crystal for every application in the new developments that are rapidly shaping up for a peacetime world.

When considering new crystal requirements or replacements to existing equipment it will pay you to consult Bliley. Our experienced engineering staff can analyze your application and recommend the best type of crystal for your purpose. Quotations submitted promptly upon receipt of detailed specifications.

# TRIMM

# HEADSETS

KNOWN AROUND THE WORLD

MADE IN U.S.A. SINCE 1922

## FEATHERWEIGHTS

The world famous TRIMM Featherweight. Recognized as a leading quality headset. Weighs 4 1/2 oz. complete with two units, 5 foot moisture-proof wear-resisting cord, and adjustable nickel-plated steel headband. Bakelite shell and cap. Magnet of highest quality cobalt steel alloy. Pole pieces of finest magnetic iron. Coils especially impregnated. A custom-built phone throughout. Standard resistances.

- No. 100—Adjustable nickel-plated steel headband..... \$10.00
- No. 104—Fabric-covered wire headband ..... 10.00

## COMMERCIALS

The most sensitive headset, yet ruggedly constructed. Practically non-breakable. A 5 foot special moisture-proof cord, with telephone type plug attached, and brown leather-covered wire headband with exclusive spring lock and adjusting clamp are all part of this lightweight headset. Dia. 2 1/4", depth 3/4", forged magnet of best grade cobalt steel. Color . . . a rich, warm walnut brown.

- No. 156—600 ohms. Imp. per pair.....\$16.00
- No. 157—17,000 ohms Imp. per pair..... 16.00
- No. 158—600 ohms Imp. (no plug) per pair..... 14.50
- No. 159—17,000 ohms Imp. (no plug) per pair..... 14.50

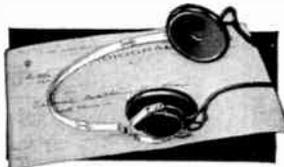

## THE DEPENDABLE

When a high-grade headset is desired, but price must be considered, choose the Dependable. Bakelite caps and shells. Extra heavy bar chrome steel magnets forged to insure strength, 5 foot tinsel cord, fabric-covered wire headband.

- No. 65—2000 ohms d.e. only.....\$3.80
- No. 67—Single Dependable.  
1000 ohms d.e. only..... 2.00

## 24,000 ohms Imp. FEATHERWEIGHTS

Featherweight headset built especially for the Amateur. Precision built throughout, this phone embodies the results of years of experience. Again ultra-sensitivity combined with rugged construction makes a fine headset, which is very light weight.

- No. 106—Adjustable nickel-plated steel headband .....\$10.00
- No. 107—Fabric-covered wire headband ..... 10.00

## ARMY-NAVY HEADSETS

Very sensitive. Meets both Army and Navy specifications. Modifications available. 5 foot moisture-proof cord, phone tip terminals. Leather headband, Bipolar magnets, 2 lbs. Available in two impedances. High impedance (2200 ohms d.e.) indicated by code letter K, and low impedance (112 ohms d.e.) indicated by code letter W.

- No. K29D—2200 ohms d.e.....\$16.00
- No. W28D—112 ohms d.e..... 16.00

## PROFESSIONAL

The choice of countless users . . . the original TRIMM headset. Double unit watch case type. Bakelite cap and shell, forged magnet of chrome steel, impregnated coils, 5 foot moisture-proof wear resisting cord, entirely concealed terminals. Fabric-covered wire headband. Standard resistances.

- No. 70—Double unit headset.....\$4.65
- No. 72—Single unit headset, wire band and 6 foot cord..... 2.60

## THE REX

A fine headset of bi-polar construction having a laminated magnet structure of the best grade chrome steel; shell of polished aluminum; molded cap; adjustable fabric-covered wire headband; high-grade tinsel cords with terminals entirely enclosed. A truly great phone combining features not before incorporated in a low cost headset. Extreme sensitivity to weak signals is attained.

- Double unit headset, 2000 ohms d.e.....\$2.60
- Double unit headset, 20,000 ohms Imp. 5 foot cord..... 2.80
- Single unit headset, 1000 ohms. 5 foot cord ..... 1.60

## THE ACME

A superior headset in the lightweight low price field. Cap and shell of molded bakelite, chrome steel magnets. Weighs six ounces complete.

- Double headset, 4000 ohms d.e.....\$2.75
- Double headset, 2000 ohms d.e..... 2.50
- Single headset, 2000 ohms d.e..... 1.55
- Single headset, 1000 ohms d.e..... 1.50

## PHONE PLUGS

Most compact plug. Bakelite with nickel-plated stem. Cord tips held tightly by serews. Easily attached to cord.

- No. 512—Flat plug.....\$0.60

## EAR CUSHIONS

Rubber ear cushions enable phones to be worn with utmost comfort. They also reduce sound leakage.

- No. 654—Fits Trimm Featherweight, Trimm Commercial .....\$0.90

# HEADPHONES By C. F. CANNON

## THE "CHIEF" — Cannon-Ball Bakelite Headset

The "Chief" is a new addition to the Cannon-Ball family of headsets. There is a demand for a high grade bakelite phone, reasonably priced, and The "Chief" meets this requirement in every respect. It is an inside terminal type. The diameter of the diaphragm is  $2\frac{1}{16}$ ". Bakelite cases and caps. Double coils, two in each receiver. Laminated Chrome Magnets. Braid covered headbands with permanent adjustment and having no removable parts. Cotton covered cord four and one-half feet long.

- | No.  | List Price |
|--|------------|
| CC-2—2000 ohms D.C. 10000 ohms impedance at 1000 cycles..... | \$3.75     |
| CC-3—3000 ohms D.C. 15000 ohms impedance at 1000 cycles..... | 4.25       |
| CC-5—5000 ohms D.C. 25000 ohms impedance at 1000 cycles..... | 5.25       |
- Leather covered headband in place of the braid band, List 45c extra

THE CHIEF

## THE BRANDES "SUPERIOR" MATCHED TONE HEADSET

THE SUPERIOR

The Brandes "Superior" headset has been on the market since 1908.

It was one of the first headsets available to amateurs. It is the outside terminal type. The diameter of the diaphragm is  $2\frac{1}{8}$ ". Aluminum cases. Black bakelite caps. Double coils, two in each receiver. Magnets made of chrome magnet steel. It has a steel headband with permanent adjustment and having no removable parts. Cotton covered cord four and a half feet long.

- No. BS-2—2000 ohms D.C. 10000 ohms impedance at 1000 cycles. List \$3.10

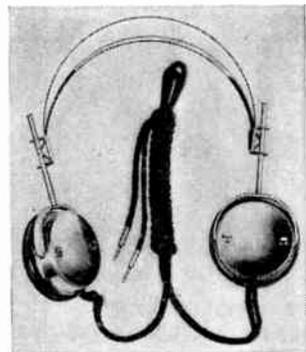

## THE BRANDES "ADMIRAL" MATCHED TONE HEADSET

The Brandes "Admiral" phone is of the same general construction as the Brandes Superior but has the terminals on the inside.

- No. BA-2—2000 ohms D.C. 10000 ohms impedance at 1000 cycles. List \$3.35  
 No. BA-3—3000 ohms D.C. 15000 ohms impedance at 1000 cycles. List 3.75  
 No. BA-5—5000 ohms D.C. 25000 ohms impedance at 1000 cycles. List 5.25

## THE "MASTER" CANNON-BALL

### That Old Reliable Headset

THE MASTER

The "Master" Cannon-Ball headset is of exceptional high quality and rugged construction. It is used extensively in institutions, hospitals and prisons, and by radio servicemen and amateurs everywhere. It is of the concealed terminal type. The diameter of the diaphragm is  $2\frac{1}{16}$ ". Aluminum cases. Bakelite caps. Double coils, two in each receiver. Magnets made of chrome magnet steel. It has a steel headband with permanent adjustment and having no removable parts. Cord is cotton, four and a half feet long.

- | No.  | List Price |
|--|------------|
| MC-2—2000 ohms D.C. 10000 ohms impedance at 1000 cycles..... | \$3.10     |
| MC-3—3000 ohms D.C. 15000 ohms impedance at 1000 cycles..... | 3.50       |
| MC-5—5000 ohms D.C. 25000 ohms impedance at 1000 cycles..... | 5.00       |

## THE "DIXIE" CANNON-BALL

The "Dixie" Cannon-Ball is the same general construction as the Master Cannon-Ball except that the terminals are on the outside.

- CD-2—2000 ohms D.C. 10000 ohms impedance at 1000 cycles ..... \$2.60  
 CD-3—3000 ohms D.C. 15000 ohms impedance at 1000 cycles ..... 2.85

## CANNON-BALL HEADPHONE ADAPTOR

This Adaptor can be attached to any radio set. It has a three-way switch. You can listen with phones or speaker alone or with the phones and speaker together.

- No. K-3 — Mounted Adaptor Switch with cord ..... List \$2.40  
 No. K-M3—Kit complete with Master phones and switch ..... List \$5.75

BRAID COVERED HEADBAND WILL BE FURNISHED WITH THE BRANDES SUPERIOR, BRANDES ADMIRAL, MASTER CANNON-BALL. IF DESIRED WITHOUT EXTRA CHARGE, IF THE BRAID BAND IS DESIRED, SPECIFY BRAID BAND WHEN ORDERING.

# Brush

## CRYSTAL PRODUCTS

Each application of headphones requires some special qualification for satisfactory performance. Brush has a most complete line of crystal operated headphones, and each model is designed for a specific group of applications. Brush crystal phones possess the following outstanding features:

1. BIMORPH\* crystal drive element of such high impedance that line or circuit characteristics are not affected when monitored by Brush phones.
2. Wider range response with more uniform output.
3. Compensation for ear coupling.
4. Light-weight, rugged, shock-proof construction.

### MODEL "BA-301" HUSHATONE\*

A miniature, molded plastic extension speaker for under pillow use. Disc shaped ( $4\frac{3}{16}$ " dia. by  $1\frac{1}{16}$ " thick). Makes no uncomfortable lump beneath the pillow. Tone quality comparable to cone-type speaker because of specially designed plastic diaphragm. Speaker gives ample output with low power consumption (.01 watt). Hermetically sealed, can be dipped into disinfecting solution (temperature

not above 120°F.) Light weight BIMORPH\* crystal drive element insures uniform response and high sensitivity. No parts to wear, loosen, or become detached. Furnished in black with satin chrome trim.

HUSHATONE\* with 6' cord.  
List Price . . . . . \$12.00  
Net Wt. 8 oz. Shipping Wt. 2 lbs.  
Code Sepim

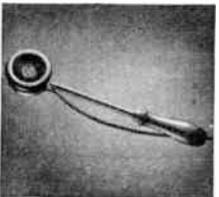

### HIGH FIDELITY MODEL "A-1"

For use where HIGH FIDELITY and extended frequency response are of paramount importance. (60 to 10,000 cps. Corrected for rising response below 200 cps.) Especially suited to monitoring, sound measurement, audiometry, and similar exacting headphone applications. Sensitivity approx. 1.5 bars per volt at 1,000 cps. Impedance over 80,000 ohm. at any frequency.

Headset complete with 5' cord and headband. List Price . . . \$28.70  
Net Wt. 6 oz. Shipping Wt. 2 lbs.  
Code Mihif

### BRUSH MODEL "A" LORNETTE PHONE

The "A" lorgnette phone is designed for use in group hearing aid sound systems installed in churches, concert halls, theatres and auditoriums. Telescope extension from 12" to 17". Attractively finished in satin black. Light weight, easy to handle, and comfortable at the ear.

Single phone complete with 5' cord and lorgnette handle.  
List Price . . . . . \$7.50  
Net Wt. 5 oz. Shipping Wt. 1 lb.  
Code Milme

### COMMUNICATIONS MODEL "BJ"

Developed for COMMUNICATIONS work where light weight, durability, and uniform response are required. Soft rubber housing insures good ear seal and wearing comfort over long hours of constant use. High output impedance .008 mfd. (40,000 ohms at 500 cps), response 100 to 10,000 cps.

Headset complete with 5' cord and adjustable lock-type headband.  
List Price . . . . . \$14.50  
Net Wt. 6 oz. Shipping Wt. 2 lbs.  
Code Micom

### BRUSH MODEL "A" GENERAL PURPOSE

Designed for GENERAL PURPOSE applications including laboratory, studio and skilled amateur home use. The BIMORPH\* crystal drive element insures wide range, uniform response (100 to 10,000 cps) and high sensitivity. High impedance; ideal for multiple installations.

Headset complete with 5' cord and adjustable lock-type headband.  
List Price . . . . . \$13.25  
Net Wt. 6 oz. Shipping Wt. 2 lbs.  
Code Millo

### BRUSH MODEL "A" SINGLE PHONE

Particularly adapted to individual or group hearing aid and radio applications. Light weight, good ear seal, and comfortable to wear. Spring steel headband with soft rubber end cushion to eliminate slipping.

Single phone complete with 5' cord and headband. List Price . . . \$5.90  
Net Wt. 3 oz. Shipping Wt. 1 lb.  
Code Milod

### BRUSH MODEL "B" SINGLE PHONE

Excellent for hearing aid applications because of extreme light weight. Has very low power consumption and high quality reproduction. Hermetically sealed against ear moisture and adverse humidity conditions. Same general characteristics as Communications Model BJ phones. Single phone complete with 5' cord and headband.

List Price . . . . . \$6.10  
Net Wt. 3 oz. Shipping Wt. 1 lb.  
Code Mibor

# Meissner Amateur Equipment

## 14-tube "TRAFFIC MASTER" Communications Receiver

The answer to every Ham's ardent hope, the Traffic Master is the finest communications type receiver that could be designed with present tubes and circuit components! Available either in kit form, with complete instructions for assembling and wiring, or as a complete, laboratory-built receiver, ready for operation! Whether you build it yourself or buy the complete set—you get the same Meissner guaranteed quality—the most for your receiver dollar! The Traffic Master provides full coverage from 540 kc to 31.6 mc, in five bands, accurately calibrated on the big linear dual-control dial. Separate bandspread control, calibrated 0-100, makes tuning in

congested bands childishly simple! Heavy fly-wheels on both main and band-spread tuning controls for rapid coverage. In the kit the complete tuning unit is already assembled and aligned—the entire front end of the receiver up to the I-F channel—ready to drop into place on the chassis—only six wires to connect it to the rest of the set! All parts are included in the Complete Kits, except tubes and speaker; punched chassis, 5-band tuning unit, band-spread dial, air-tuned I-F transformers, crystal-filter, B-F-Osc., illuminated "R" meter, controls, power transformer, condensers, resistors, sockets, etc

### COMPLETE KITS

- 14-tube Traffic Master, less panel and cabinet, No. 10-1174—Amateur Net Price.....\$100.00
- 14-tube Traffic Master, with panel and cabinet, No. 10-1173—Amateur Net Price.....\$107.50
- No. 11-8219—Front Panel only, Net Price.....\$2.75
- No. 11-8224—Cabinet only, Net Price..... 5.75

### ESSENTIAL PARTS KIT

- Contains all "special" parts not generally available in distributors stock; includes 5-band tuning unit, bandspread dial, punched chassis, crystal-filter and B-F-O units, and all I-F transformers, with complete instructions and parts lists. Save money by buying this economical kit as most of the remaining parts you may have on hand!
- No. 12-1030—Essential Parts Kit, Net Price.\$62.25

### LABORATORY-BUILT RECEIVER

- Built to match the finest commercial job on the market—the Traffic Master in complete form—ready for immediate operation! Assembled, wired, and accurately aligned in the Meissner Lab—thoroughly "air-tested" before shipment. A truly outstanding receiver at a moderate price! Complete with full set of tubes; less speaker.
- No. 9-1052—Traffic Master Receiver, Net \$188.75

## 9-tube "TRAFFIC SCOUT" Communications Receiver

### LABORATORY-BUILT RECEIVER

For the Ham who prefers a ready-built receiver, the Traffic Scout is offered completely assembled and wired; accurately aligned and "air-tested"; complete with full set of tubes; less speaker.

- No. 9-1051—Traffic Scout Complete Receiver, Net Price.....\$100.50

Incorporating every feature you have always wanted in a "ham" set, this splendid receiver may be purchased either in "Kit" form or as a completely assembled and laboratory-wired instrument! Whether you build it yourself from the kit or buy the laboratory-built receiver, you are assured of the same eye-opening results that have made this set so popular! Full band-spread with dual-control fly-wheel tuning for rapid coverage; pre-aligned 5-band coil assembly, covers 540 kc to 31.6 mc; bandspread tuning condenser; punched steel chassis; crystal filter unit; B-F-O unit; I-F transformers; sockets; resistors; condensers; controls; hardware—everything needed is included in the complete Kit! Anyone can build this fine receiver by following the detailed instructions and diagrams furnished with every kit.

### COMPLETE KITS

All parts necessary to build the Traffic Scout are furnished with the exception of tubes and speaker. Detailed Schematic and Pictorial Diagrams and Instructions with every kit.

- 9-tube Traffic Scout, less panel and cabinet, No. 10-1170—Complete Kit, Net Price.....\$71.75
- 9-tube Traffic Scout, with panel and cabinet, No. 10-1169—Complete Kit, Net Price.....\$78.75
- No. 11-8246—Steel Front Panel, Net Price...\$2.30
- No. 11-8224—Steel Cabinet, Net Price..... 5.75

### ESSENTIAL PARTS KIT

- Contains all "special" parts required to build the Traffic Scout; includes chassis, dial, tuning condenser, 5-band pre-aligned coil unit, I-F Transformers, X'tal filter and B-F-O; with instructions.
- No. 12-1029—Traffic Scout Essential Kit, Net Price.....\$56.75

## ULTRA-HI FREQUENCY TRANSCEIVER

### 2 1/2-Meter Portable

A complete, combination transmitter and receiver for phone operation on the 2 1/2-meter band—covers 112 to 120 mc—battery operated. Steel case is only 12" square and 5 3/4" deep, finished in "battleship" gray with attractive panel design in ivory. Uses one each type 7A4, 606G and 6SJ7 tubes; distance range is 5 to 30 miles, depending on terrain. A perfected super-regenerative type receiver circuit is employed with separate quench oscillator to give absolutely stable operation. Vertical rod antenna telescopes into top of case when not in use; compartment in rear of case provides space for carrying phones and mike or combination handset. Either crystal or carbon type microphone may be used.

A Precision Type Instrument for Amateur, Commercial or Military Applications

### Easy to Operate

No re-adjustments necessary when changing from send to receive; constant antenna load—no ticklish coupling controls; light in weight—only 12 1/2 lbs. with batteries. Furnished complete with tubes, less batteries, phones and mike.

- No. 9-1081—Ultra-Hi Frequency Transceiver.....Price on Application

## CRYSTAL OVEN

### For Positive Temperature Control

Designed especially to fit into the Signal Spotter but may be used with any Crystal Oscillator unit! Holds up to four mounted crystals; provides accurate temperature regulation within plus or minus 1 degree C. Steel outer shield is 4 3/4" square by 4 3/4" high; crystals in inner chamber of heavy cast aluminum with thick insulating material in walls; terminals on top for connection of 6.3-volt heater supply.

- No. 9-1046—Crystal Oven, Complete, (less crystals), Net Price.....\$15.25

NEW MEISSNER PRODUCTS!  
High-Frequency Combination FM-AM Receptors  
for Amateur and Commercial Use  
Dual-Speed Portable Phono-Radio-Recorder  
— SOON TO BE RELEASED —  
Write for Complete Information

## SIGNAL SHIFTER

### The "Time-Proven" E-C-O

Variable-frequency exciter delivering T9X output of 7 1/2 watts on any of five popular bands! Uses 6F6 oscillator, 6L6 doubler, 2 voltage regulators and a rectifier; tuned by new type vernier dial; no backlash or parallax; link-coupled to control frequency of any transmitter—directly from operating position; arranged for oscillator or doubler keying with built-in filter; relay provides automatic operation with transmitter; provides true CRYSTAL stability in an E-C-O!

### COMPLETE—READY TO OPERATE

The Signal Shifter is complete with tubes and one set of coils for any band specified; 10-meter coils cover 14- to 15 mc, to be doubled in transmitter.

- No. 9-1058—Signal Shifter, 110-v. in black cabinet, Net Price.....\$52.25
- No. 9-1057—Signal Shifter, 110-v. in gray cabinet, Net Price..... 52.25
- No. 9-1059—Signal Shifter, 220-v. black or gray, Net Price..... 55.50
- No. 9-1060—Signal Shifter, 110-v. on rack panel, Net Price..... 57.25

### EXTRA COILS, SETS OF 3

Cat. No.	Band	Amateur
18-2915	180-meter	Net
18-2916	80-meter	Net
18-2917	40-meter	\$2.75
18-2918	20-meter	Per
18-2919	10-meter	Set

## SIGNAL SPOTTER

### Companion Unit to the Signal Shifter

A crystal-controlled, precision-built oscillator, with pre-tuned tank circuits to permit the use of four crystals! Desired crystal frequency instantly selected by switch on panel; power is derived from the Signal Shifter through a cable at the rear; control switch on the Shifter panel selects E-C-O or Crystal output as desired. The four crystal frequencies may all be on any one Amateur band or divided over any two bands; indicator on panel for oven thermostat if Crystal Oven is used.

### COMPLETE PRECISION CONTROL SYSTEM

The "Signal-Spotter, Signal-Shifter" COMBINATION provides the last word in a modern, precision-type frequency control system for the Amateur Transmitter! Use the Spotter for band-edge operation, traffic networks, etc.—the Shifter for general band operation on whatever frequency is best!

Cat. No.	Band
18-2936	180-meter
18-2937	80-meter
18-2938	40-meter
18-2939	20-meter

Net Each.....\$0.95

Supplied complete with tubes and any two coils specified:

- No. 9-1043—Signal Spotter, in gray cabinet, Net Price.....\$24.75
- No. 9-1044—Signal Spotter, in birch cabinet, Net Price..... 24.75

# Meissner Amateur Products

## MC 28-56 CONVERTER

For 5- and 10-meter Bands

This precision-built instrument is responsible for many of the records established in recent years on the high-frequency band! The popular choice of Amateurs and Experimenters everywhere. Designed for full coverage of the 28- to 30-mc and the 56- to 60-mc bands; tuning simplified by precision-type vernier dial, augmented by separate trimmer control. Incorporates a high-C oscillator circuit, fully stabilized by voltage-regulated power supply; insures complete signal stability! Uses an 1852 R-F amplifier, 6F6 oscillator, and 1852 mixer, with a 6X5 rectifier and VR-150 regulator. Average signal gain is 20 DB! Selector switch selects band or connects antenna directly to receiver; output frequency adjustable from 6.9 to 7.4 mc; manual gain control provided. Furnished complete with tubes, ready to operate, in black crackle cabinet 11 1/4" wide, 9" high and 11 1/2" deep.

No. 9-1032—MC 28-56 Converter, 110-v., 60-c., Complete. Net Price.....\$49.50

## UNI-SIGNAL SELECTOR

For Noiseless C-W Reception

The most outstanding Amateur Radio development in recent years! Takes up where the X'tal Filter leaves off; provides super selectivity on ANY receiver! For use on C-W only—too sharp for fone use—provides clear 1000-cycle note regardless of condition of signal. This unit is a combination electrical, mechanical and acoustical filter; connects in place of regular speaker; speaker connects to terminals on rear of Selector; switch on front of unit provides regular speaker output or Selector output. No internal connections to receiver—uses no power! Matches any 4,000 to 5,000 ohm output; installation is extremely simple. Special "Stethoscopic" headphones may be plugged into coupling "jack" in front of unit for private listening.

No. 9-1026—Uni-Signal Selector, Complete, less headphones. Net Price.....\$15.25

No. 26-1001—Special "Stethoscopic" Headphones. Net Price..... 5.50

## SIGNAL BOOSTER

Four-Band Preselector

Regardless of the type receiver you are using—regardless of the number of R-F stages you have—you will find the extra gain provided by the SIGNAL BOOSTER will make possible many solid 100% QSO's that would otherwise be missed. Has an average signal gain of 40 DB! Uses two high-gain R-F stages with type 1852 amplifier tubes; three tuned circuits for maximum selectivity and image attenuation; complete coverage from 1600 to 31,000 kc in four bands; slide-rule dial with 7 1/4" linear scales, accurately calibrated! Antenna Compensator for accurate impedance match; connections for single or doublet antenna; switch connects antenna directly to receiver to cut out preselector without turning it off; includes manual gain control. Furnished complete with tubes for operation from 110 volts, 60 cycles; black crackle finish cabinet is 11 1/2" wide by 9" high by 11 1/2" deep.

No. 9-1031—Signal Booster, Complete with tubes. Net Price.....\$47.75

## BEAT-FREQUENCY OSCILLATOR ADAPTER UNIT

For C-W on Any Receiver

The simplest method of adding a beat-frequency oscillator for reception of C-W signals or assistance in locating weak stations. May be used with any receiver having a 456- to 465-kc I-F channel. Completely self-powered; operates on 110 volts, AC or DC. No internal connections to the receiver are required—just a coupling loop for the top grid of the I-F tube! Has output attenuator on end of chassis; pitch control on top of coil shield; clamp-on switch for "On-Off" control. Supplied either as a complete kit of parts or as wired unit—ready to operate—less tubes. Tubes used are one 6C5G and one 25Z6G. Chassis is finished in black crackle; extra 110-volt receptacle located in end of chassis for radio or other attachments.

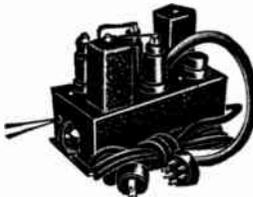

No. 10-6350—B-F-O Adapter Unit, Complete Kit. Net....\$7.75

No. 9-1012—B-F-O Adapter, Wired Unit. Net.....10.00

## NOISE-SILENCER ADAPTER UNIT

Eliminates 90% QRN on Any Set

A useful addition to any receiver with a 456- to 465-kc I-F system. Using the famous "Lamb" principle, it effectively reduces static peaks and man-made noises to a very low level. Permits enjoyable short-wave reception in districts where the noise level is unusually high! Uses four tubes and operates on 110 volts, AC or DC. Very simple connections to any receiver are fully explained in detailed instructions and diagrams supplied with each unit. Available either as a complete kit of parts, less tubes, with detailed wiring instructions, or as a completely wired and tested unit, ready to operate. Tubes required are one each type 6K7, 6J7, 6L7 and 6H6. Has noise level control on one end of chassis and extra 110-volt receptacle on other end for radio or other appliance. Chassis finished in black crackle.

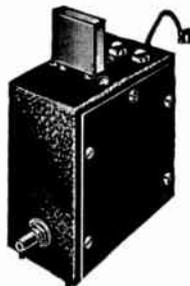

No. 10-7516—Noise Silencer Adapter, Complete Kit with Instructions. Net Price.....\$7.75

No. 9-1011—Noise Silencer Adapter, Complete Unit, ready to operate. Net Price.....10.00

## CRYSTAL FILTER UNIT

Monocrystal X'tal Filter as used in Traffic-Master receiver; complete and ready for installation in any communication type receiver. Only four connections to make; contains matched transformers with air-dielectric peak adjusters phasing condenser with crystal cut-out switch, no-drift coupling condenser and precision quality 156-kc mounted crystal. In black crackle finished shield, 2 1/4" wide, 2 3/8" deep, 4 1/4" high.

No. 9-1042—Net \$15.00

## BEAT-FREQ. OSC. UNIT

For use with any receiver with 456-kc I-F; has only four connections and includes 6817 socket; trimmer on top for rough adjustment; air condenser for panel-operated pitch control on front. In black crackle shield, 2 3/4" x 3 3/8" x 2 1/4".

No. 9-1049—Beat-Freq. Osc. Unit..... Net \$4.00

## B-F-O TRANSFORMERS

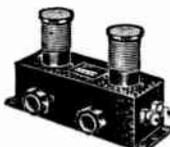

For use with a separate triode oscillator to provide the necessary "beat-note" for reception of CW signals and to aid in locating weak stations; an absolute necessity on amateur communications type receivers. Knob on top controls pitch of beat note; separate trimmer to adjust the BFO frequency to match the I-F. With air trimmers, 2" sq. x 4 1/4"; with mica trimmers, 1 1/2" sq. x 3 1/4".

## SIGNAL SPLICER

Accurately matches any antenna to any receiver; provides high signal gain without tubes! Reduces noise pickup and improves image rejection. One set of coils furnished for use on any band; full instructions included; extra coils available.

The Signal Splicer is a well-designed pi-network arranged to be connected between the antenna and the receiver. Dual air-electric capacitors provide adjustment for matching impedances.

No. 9-1022—Signal Splicer.... Complete, Net \$4.50

No. 18-2950—Extra Coils..... Per Pair, Net 1.10

## WIRELESS PHONO OSCILLATOR

Provides reproduction of records through any radio set; acts as miniature broadcaster to transmit recording to the receiver without intervening wires; signal is tuned in on radio just as any other station! Operates in radius of 20 to 50 ft.; self-powered; operates on 110 volts AC or DC; has receptacle for phono motor. Uses a 6F7 and 25Z5; tubes not supplied.

Available as complete kit of parts or as factory-wired unit; both with detailed instructions.

No. 10-6380—Complete Kit..... Net \$5.70

No. 9-1010—Factory-wired..... Net 8.10

## CRYSTAL-FILTER I-F TRANSF.

Supplied in matched pairs; designed to provide a low-impedance link-coupled filter circuit for superhet receivers. Input unit has tuned primary and low-impedance secondary; output unit has low-impedance primary and tuned, high-impedance secondary. Coupling is set to give optimum gain; selectivity provided by crystal in link circuit. In black crackle cans.

## ANTENNA RELAY

Provides efficient, fast, and noiseless switching of the antenna from receiver to transmitter. Ceramic insulated; handles a full KW; metal parts chromium plated. Works on 110 volts AC; base is 3 1/2" by 4 1/4"; only 2 3/4" high!

No. 28-1004—Antenna Relay. Net Price....\$4.65

## R-F RELAYS

Fully insulated with highest-grade ceramic; may be used in any R-F or power circuit, regardless of frequency. Large contacts and long-life phosphor-bronze springs insure efficient operation with minimum losses; for 110 v. AC.

No. 28-1001—D-P-D-T R-F Relay. Net.....\$3.65  
No. 28-1002—S-P-D-T R-F Relay. Net..... 2.65

## POWER RELAY

Designed to handle 20 amperes, non-inductive load; has "double-break" contact system; heavy 5/16" silver contacts; operates on 110 volts AC; bakelite base.

No. 28-1003—Power Relay.....Net Price \$3.00

## KEYING RELAY

Very compact; will break up to 1500 volts at contacts; operates on 5 to 15 volts AC; adjustable tension spring; single "make circuit" type; bakelite insulated.

No. 28-1000—Keying Relay,.....Net Price \$2.35

## ★ TRANSMITTER CHOKES ★

Highly efficient for Amateur and Commercial use; six lateral wound sections provide effective action over wide frequency range. Windings on ceramic form with tapped ends; mounting brackets included.

Cat. No.	Induct.	Current	Ohms	Net
19-3019	2.8 MH	1000 MA	5.0	\$1.32
19-3022	5.5 MH	500 MA	12.5	1.16
19-3025	5.9 MH	200 MA	34.9	1.16

## ★ UNIVERSAL R-F CHOKES ★

A very efficient radio-frequency choke for use in receivers and low-power stages of transmitters. With a DC resistance of only 35 ohms, this little choke will handle up to 125 milliamperes! Effective inductance is 2 1/2 millihenries; distributed capacity is extremely low.

No. 19-1996.....List Price \$0.28

## CERAMIC OCTAL SOCKETS

For any high-frequency circuit; glazed ceramic insulation with heavy steel mounting saddle; fits standard 1 1/2" centers, uses 1 1/4" hole; four grounding lugs formed on saddle; bronze contacts.

No. 25-8437—Ceramic Socket.....Net, each \$0.24  
No. 25-8439—Carton of Six.....Net 1.35

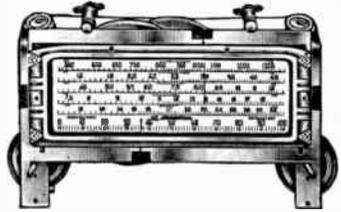

## INTERRUPTION-FREQ. OSC. COIL

Two high-impedance, universal-wound coils, mounted on a single form with iron cores to provide high inductance. Specially designed for use in super-regenerative receivers, operating on ultra-high frequencies, 30 to 120 mc. Bakelite terminal base.

No. 14-7832.....Net Price \$0.90

## DUAL-CONTROL DIAL

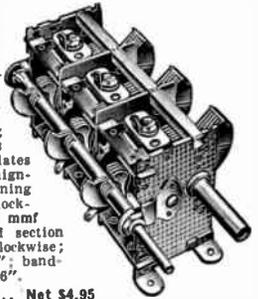

A super-smooth tuning mechanism of great precision, specially designed for use with the Bandspread Condenser below. Used on Meissner Traffic Master and Traffic Scout receivers; has two 3/4" dia. operating shafts, both equipped with flywheels; dual drums have 3/8" and 3/16" hubs to fit condenser shafts. Translucent scale, rear illuminated, 5-bands calibrated 540 kc to 31.6 mc.

No. 23-8229—Dual Control Dial.....Net \$8.25

## BANDSPREAD TUNING CONDENSER

Finest precision tuning condenser available; designed for Meissner Communications Receivers with dual-control dial above; fully ceramic insulated; rigid spacing bars and heavy end plates maintain perfect alignment; main tuning section closes clockwise and has 280 mmf max.; bandspread section closes counter clockwise; main shaft is 3/8"; bandspread shaft, 3/16".

No. 21-5143B.....Net \$4.95

## MIDGET VARIABLE CONDENSER

Standard type with low-loss bakelite insulation; excellent for general use in short-wave receivers; single-hole mounting, 1/4" diameter shaft; metal end-plate with long sleeve bearing and bronze rotor wiper; takes 3/8" hole in panel up to 1/4".

Cat. No.	Plates	MMf. Range	Net
21-5163	3	3.0 to 15	\$0.60
21-5164	5	3.2 to 30	.63
21-5168	14	4.3 to 100	.84
21-5170	20	5.0 to 140	.96

## MIDGET CERAMIC VARIABLE

Exceptionally compact; ceramic plate is only 15/16" by 1 1/4"; fits in single 3/8" dia. hole in any panel up to 3/4" thick; long sleeve bearing eliminates wobble; ideal for all high-frequency work.

Cat. No.	Plates	MMf. Range	Net
21-5173	3	2.4 to 10	\$0.90
21-5174	7	3.0 to 25	.93
21-5175	14	3.5 to 50	.99
21-5176	20	4.5 to 75	1.05
21-5177	27	5.0 to 100	1.11
21-5178	37	6.5 to 140	1.17

## CERAMIC ROTARY SWITCHES

A new type switch especially built for Amateur and Commercial application in transmitters, U-H-F receivers, converters, etc. Switch wafers are of high-grade, low-loss ceramic, close-packed to reduce humidity effects to a minimum. Contacts are silver plated for lower resistance; adjustable stop permits use as many positions as required; moving contact shorts adjacent points during rotation—circuit is never open. Arranged for mounting in single 3/4" diameter hole on any panel up to 1/4" in thickness; over-all diameter is 1 1/4"; wafers are 1 1/4" apart; may be shortened by cutting spacers; flatted, 1/4" dia. shaft extends 2" from front bushing.

Cat. No.	Gangs	Poles	Positions	Net
24-8270	One	One	2 to 12	\$1.85
24-8271	Two	Two	2 to 12	3.00
24-8272	Three	Three	2 to 12	4.15

# Meissner P-A Tuners and Test Equipment

## HIGH FIDELITY P-A TUNER

Specially designed for highest quality reception from local or semi-distant powerful Broadcast stations. Noise-free T.R.F. circuit with band-pass transformers provide true "high-fidelity" reproduction; audio response essentially flat from 40 to 10,000 cycles. Four tuned circuits provide ample selectivity; perfected automatic volume control holds output level constant. Tuning regular band. Self-powered, operates on 110 volts, 50 to 60 cycles. Available either in Complete Kit form or as a complete wired and tested unit ready to operate. Kit does not include tubes; tubes are furnished with wired unit. Uses 2-6K7, 1-6H6, 1-6F8G and 1-5Z4. Complete Kit includes punched chassis, coils, tuning condenser, dial, power transformer, chokes, resistors, condensers, hardware, wire, solder and other miscellaneous parts. Detailed instructions with Pictorial Diagrams.

- No. 10-1152—High-Fidelity P-A Tuner Kit, without Panel and Cabinet, Less Tubes, List Price.....\$45.75
- No. 10-1172—High-Fidelity P-A Tuner Kit, with Panel and Cabinet, Less Tubes, List Price.....\$51.25
- No. 9-1034—High-Fidelity P-A Tuner, Fully Tested, in Cabinet, With Tubes, List Price.....\$77.50

## "UTILITY" P-A TUNER

A general-purpose Tuner, identical in size and general construction to the High Fidelity model described above except for use of straight tuned radio-frequency circuits without band-pass coils. Ferrocart, iron-core, coils are used, however, providing an additional degree of sensitivity without material loss in selectivity. Four tuned circuits are employed and this Tuner may be used for distant as well as local reception. Frequency coverage 530 to 1600 kc; calibrated rectangular dial has linear scales 5/4" long. Full automatic volume control. Specially designed filter circuits in power supply keep hum level at absolute minimum. Operates on 110 volts, 50 to 60 cycles. Available either as a completely wired and tested unit ready to operate, including tubes, or in a complete Kit containing all parts required for construction, less tubes. Tubes used: 3 6K7, 1 6H6, 1 6F8G and 1 5Z4. Detailed instructions and Diagrams.

- No. 10-1119—"Utility" P-A Tuner Kit, without Panel and Cabinet, Less Tubes, List Price.....\$38.50
- No. 10-1176—"Utility" P-A Tuner Kit, with Panel and Cabinet, Less Tubes, List Price.....\$44.00
- No. 9-1035—"Utility" P-A Tuner, Fully Tested, in Cabinet, With Tubes, List Price.....\$71.50

## DUAL-BAND P-A TUNER

Where distant reception is a necessity or short-wave programs are desired. Covers 540 to 1600 kc and 5.9 to 18.8 mc; sensitive superheterodyne circuit with RF stage on both bands. Uses Ferrocart, iron-core, 1-F Transformers for extra gain and selectivity. Incorporates full AVC with diode second detector and dual triode output coupling tube. Output impedances same as High Fidelity model above. Complete unit, ready to operate, is furnished with a full set of tubes; Tuner in Kit form is supplied without tubes. Tubes used: 2 6K7, 1 6K8, 1 6H6, 1 6F8G, 1 6G5 and 1 5Z4.

- No. 10-1151—Dual-Band P-A Tuner Kit, less tubes; without Panel and Cabinet, List Price.....\$46.25
- No. 10-1171—Dual-Band P-A Tuner Kit, less tubes; with Panel and Cabinet, List Price.....\$52.00
- No. 9-1035—Dual-Band P-A Tuner, Complete Unit with Tubes, in Cabinet, List Price.....\$80.50

## P-A TUNER PANELS AND CABINETS

- No. 11-8243—Front Panel for "Utility" or High-Fidelity Tuner, 8 3/4" x 8 3/4", List Price.....\$1.50
- No. 11-8200—Cabinet for "Utility" or High-Fidelity Tuner, 8 3/4" x 8 3/4" x 1 3/4", List Price.....\$5.25
- No. 11-8236—Front Panel for Dual-Band P-A Tuner, 10" x 14", List Price.....\$2.00
- No. 11-8212—Cabinet for Dual-Band P-A Tuner, black crystal steel, 10" x 14" x 11", List Price.....\$6.50

## ★ SIGNAL CALIBRATOR ★

### Precision Frequency Standard

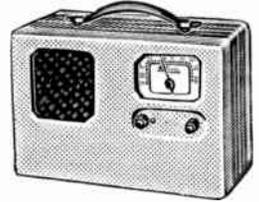

100 KC, 50 KC and 10 KC "markers" up to 20,000 KC — Push-button control of frequency — Delivers modulated or unmodulated signal — Easily set — Instantly checked — Well ventilated cabinet — Precision accuracy.

The Model 9-1076 Signal Calibrator is designed to operate from a 115 volt, single phase, 50/60 cycle AC power source. The power required is approximately 40 watts. The Model 9-1076 Signal Calibrator is a portable self-contained unit designed to generate extremely accurate "marker" signals over the RF range of 10 KC to 20,000 KC. The "Signal Calibrator" is a secondary frequency standard against which unknown frequencies may be checked and accurately determined. The Signal Calibrator provides the means for checking and adjusting radio transmitters, radio receivers, laboratory equipment etc., as follows:

- A. To accurately adjust the radio transmitter to a desired frequency.
- B. To accurately adjust the radio receivers to a desired frequency.
- C. To accurately measure and determine the unknown frequency of an incoming signal.

## AC-DC, BATTERY PORTABLE SUPER KIT

Here's absolutely the latest in a portable radio receiver—a real companion set, always ready in any location, under any circumstances, to bring you whatever is on the air! Covers the regular Broadcast band from 535 to 1600KC. Extremely compact, light in weight, yet contains its own power in the form of dry batteries and its own loop antenna. Equipped also to connect to regular 110-volt power line, either AC or DC, thus effecting a valuable saving in battery life. Also provided with connection for external antenna. Supplied in Kit form for home construction, its initial cost is the lowest possible for a set of this quality. Uses latest type, low-drain battery operated tubes. Estimated battery life is approximately 70 hours for the "B" and 220 hours for the "A" battery during actual battery operation. The attractively finished, sturdy "airplane luggage" style case is only 6 1/2" x 8 1/2" x 13 1/4". Tubes required are one each type 1A7GT, 1H5GT, 34Q5GT, 117Z6GT and two type 1N5GT; tubes are not supplied with kit.

## Build It Yourself—

Anyone can build this remarkable little receiver in a few hours—only tools required are pliers, screwdriver and soldering iron! Full instructions and Pictorial Diagrams. All parts are furnished (except tubes and batteries) including punched chassis, coils, sockets, resistors, condensers, dial, tuning condenser, speaker, etc. Loop antenna is ready built. Two 4 1/2-volt "A" batteries, and two 45-volt "B" batteries are required.

- No. 10-1190—Complete Kit for AC-DC, Battery Portable Super, less tubes, batteries and cabinet, List Price.....\$38.50
- No. 10-1189—Complete Kit for AC-DC, Battery Portable Super, including cabinet; less tubes and batteries, List Price.....\$45.00
- No. 11-8257—Portable Cabinet, 6 1/2" x 8 1/2" x 13 1/4", finished in brown airplane-luggage canvas, List Price.....\$7.75

## "Essential" Kit

- Contains all "special" parts such as tuning condenser, dial, punched chassis, coils, I-F transformers and loop antenna. All other parts such as fixed condensers, resistors, sockets, speaker, etc. are readily obtainable from general stock. Complete detailed instructions and diagrams with parts list also furnished. Here's your chance to build a really fine, fully engineered portable receiver at very low cost!
- No. 12-1031—Essential Kit, List Price.....\$25.50

## ★ NEW MEISSNER "ANALYST" ★

**THE MODERN SERVICE INSTRUMENT**—Undoubtedly the most modern complete servicing instrument on the present day market. Handles the receivers of yesterday, today and tomorrow — with equal efficiency and facility! Entirely fundamental in its testing procedure. Will never become obsolete. **SAVES TIME — SAVES MONEY**—The use of the new Meissner ANALYST will not only permit you to make more money by handling a greater number of service jobs in a given time but it will give you additional assurance that these jobs will "stay sold." **SERVICES BY "SIGNAL TRACING"**—The new Meissner ANALYST tests receivers and locates faults by the "signal tracing" method — proven to be the fastest and most reliable method known at the present time. It is NOT, however, just another signal tracer! It is completely equipped with all devices that might be needed to make simultaneous checks on various parts of the receiver circuit. Five separate and distinct "channels" provide as many different functions; all controls are accurately calibrated with functions clearly indicated.

Complete—Ready to Go to Work

The new Meissner ANALYST is completely wired, aligned and laboratory tested. Furnished complete with a full set of 12 tubes, it is all ready to be put into service the minute it is unpacked and connected to the 110-volt line! No alignment or adjustments are necessary—just read the instructions, hook it up and go to work! Complete Book of Instructions, supplied with the new Meissner ANALYST, gives detailed directions for use of this instrument in locating all kinds of radio troubles.

- No. 9-1040—New Meissner ANALYST, complete with tubes, prods, and Instruction Book; ready to operate. Net Price.....\$96.25

100 KC, 50 KC and 10 KC "markers" up to 20,000 KC — Push-button control of frequency — Delivers modulated or unmodulated signal — Easily set — Instantly checked — Well ventilated cabinet — Precision accuracy.

The Model 9-1076 Signal Calibrator is designed to operate from a 115 volt, single phase, 50/60 cycle AC power source. The power required is approximately 40 watts. The Model 9-1076 Signal Calibrator is a portable self-contained unit designed to generate extremely accurate "marker" signals over the RF range of 10 KC to 20,000 KC. The "Signal Calibrator" is a secondary frequency standard against which unknown frequencies may be checked and accurately determined. The Signal Calibrator provides the means for checking and adjusting radio transmitters, radio receivers, laboratory equipment etc., as follows:

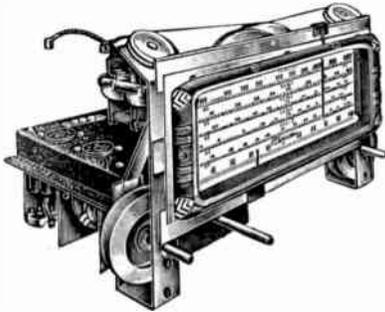

- A. To accurately adjust the radio transmitter to a desired frequency.
- B. To accurately adjust the radio receivers to a desired frequency.
- C. To accurately measure and determine the unknown frequency of an incoming signal.

# Meissner Tuning Units, F-M Parts, R-F Coils

## ALL-WAVE TUNING UNITS

"Communications" type has five frequency-calibrated scales; additional 0-100 scale at bottom for band-spread pointer. Uses dual-control bandspread dial (23-8229) and ceramic-insulated tuning condenser (21-5143B). Incorporates coil assembly No. 13-7617 described below. Used in Meissner "Traffic Master." "Custom" type employs a single-speed vernier dial mechanism (23-8230) with five frequency calibrated scales. Uses three-gang tuning condenser (21-5141B) and coil assembly No. 13-7610, described below. Used in Meissner "Custom 12." Each unit includes complete RF, Mixer and Oscillator coils for all bands; shielded band switch, Align-Aire trimmers, tube sockets and associated resistors, condensers, etc., in addition to parts listed above. Entire assembly mounted on black crackle-finished steel chassis, 8 1/4" long and 5" wide, ready to be dropped into place. Just 7 connections to make to feed into any 456 kc I.F. channel, including plate and heater leads.

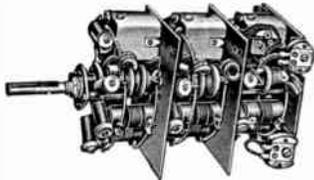

Communications Tuning Unit, 5-bands, 540 kc to 31.6 mc; uses 1853 (6AB7), 6K8 and 6J7G tubes. Completely wired, aligned and tested for sensitivity. Detailed instructions.

No. 13-7614—Less tubes. List Price.....\$63.25

"Custom" Broadcast Tuning Unit, 5-bands, 133 kc to 42 mc; uses two 1853 (6AB7) and one 6SA7 tubes. Furnished with complete instructions; wired, aligned and fully tested.

No. 13-7611—Less tubes. List Price.....\$53.25

## MULTI-WAVE COIL ASSEMBLIES

For use in construction of All-Wave receivers. Contain coils, range-switch, shunt trimmers, series padders, AVC by-pass condensers and all necessary shielding. Provides high-gain RF stage on all bands; complete primary and secondary switching on all coils. Align-Aire (air-dielectric) trimmers on all bands assure minimum frequency drift; extremely short leadwires—all coils except 133-406 kc range are soldered directly to switch terminals. All units are compact, approximately 4" x 5" x 8"; have simple three-point mounting. Factory-wired, tested, aligned and padded. Complete instructions and diagrams.

### For 410-Mmf Condenser

No. 13-7610—5 Band Assembly, Tuning Ranges: 537 to 1754 kc, 1.68 to 5.96 mc, 5.85 to 18.2 mc, 17.6 to 42.0 mc and 133 to 406 kc. List Price, \$32.50

No. 13-7612—4-Band Assembly, Tuning Ranges: 537 to 1754 kc, 1.68 to 5.96 mc, 5.85 to 18.2 mc, and 17.6 to 42.0 mc. List Price.....\$28.00

### For 280-Mmf Condenser

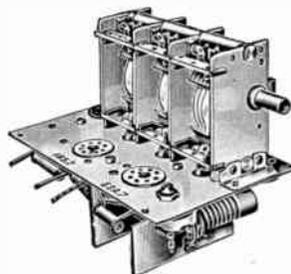

No. 13-7617—5-Band Assembly, Tuning Ranges: 540 to 1580 kc, 1.5 to 4.5 mc, 4.1 to 12.2 mc, 7.3 to 18.8 mc, and 11.2 to 31.6 mc. List Price, \$32.50

No. 13-7605—4-Band Assembly, Tuning Ranges: 1.5 to 4.5 mc, 4.1 to 12.2 mc, 7.3 to 18.8 mc, and 11.2 to 31.6 mc. List Price.....\$28.00

NOTE: ONLY STARRED ★ ITEMS ARE AVAILABLE FOR THE DURATION

## FREQUENCY-MODULATION COMPONENTS

### F-M Tuning Assembly

A complete front-end for any F-M receiver; covers 42 to 50 mc; designed for use with F-M dial below and to feed into 4.3-mc I-F system. Incorporates all components for antenna, mixer-oscillator and voltage regulator, wired, tested and aligned! Three gang special tuning condenser mounts on top of compact unit; fits chassis opening 3 3/4" by 7"; only 2 3/4" below chassis. Only five wires to connect to I-F channel and power supply.

No. 13-7621—List Price .....\$19.50

### 7" F-M Dial

Single-band linear scale dial mechanism designed especially for use with home-built F-M receivers. Calibrated to match F-M Tuning Assembly above; tuning ratio 11 to 1 in 180 degrees. Escutcheon is 3 1/2" by 8 1/4"; dull gold.

No. 23-8234—List Price .....\$6.00

### F-M Antenna—R-F—Osc. Coils

Designed for the experimenter to use in construction of F-M receivers; antenna coil may be used with single or doublet antenna. Cover the 42 to 50 mc F-M band with tuning condenser listed below. Coils are wound on moisture-resistant plastic forms, 1" long; have 3/8" diameter terminal base and single 4-36 stud for mounting to chassis.

No. 14-1034—Antenna Coil

No. 14-1036—Oscillator Coil

No. 14-1035—Mixer Coil

List, Each .....\$ 0.85

### F-M Tuning Condenser

A special, extra-compact tuning condenser for use with coils described above. Only 2 1/2" long, 1 5/16" high and 1 3/8" wide! ceramic-insulated trimmers; 1/4" diameter shaft; 3 sections with 5 plates each; 7 to 22 1/2 mmfd. range with trimmers open.

No. 21-5201—F-M 3-gang Tuning Condenser. List Price...\$3.75

### ★ 4.3-mc. F-M I-F Transformers ★

Illustrated herewith, these high-grade transformers are specially designed with broad response characteristics for F-M circuits. In metal shield can 1 3/4" square and 3" high; windings on molded plastic form; ceramic-base mica-dielectric trimmers; double-tuned.

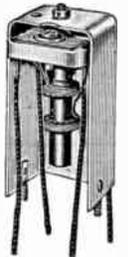

No. 16-6664—List Price .....\$1.93

### ★ Discriminator Transformers ★

Heart of the F-M circuit; accurately peaked at 4.3 mc. Available in standard mica-trim type (1 3/8" x 3") and special air-trim type (1 3/8" x 1 3/8" x 4"). Mica-trim unit has coils on plastic form; air-trim type uses ceramic coil form. Color-coded leads.

No. 17-3483—Mica-trim type. List Price...\$2.75

No. 17-3482—Air-trim type. List Price... 6.50

## 'TIME-SIGNAL' COIL KIT

A highly specialized kit, but one for which there is a definite demand among jewelers, watchmakers, manufacturers of automatic timing devices, physics laboratories in schools and universities—wherever there is any need for reception of the standard time signals transmitted by the Government station at Arlington. These transmissions from NAA are on a frequency of 113 kc, unmodulated.

No. 12-1033—Time-Signal Coil Kit. List Price.....\$27.50

The "Time-Signal" Coil Kit consists of five units including an antenna coupling transformer, antenna coil, R-F coil, combination detector and B-F-O transformer, and a 1.7-kc audio filter. The R-F units are provided with air trimmers and are fully shielded. Complete instructions are included for the construction of a high-quality, 8-tube TRF fixed frequency receiver for 110-volt AC-DC operation.

## ANTENNA AND R.F. COILS

### ★ Standard Antenna—RF Coils ★

Standard type air-core coils of superior construction, designed to cover the broadcast band from 545 to 1580 kc (190 to 550 meters) with a 365-mmfd tuning condenser. Excellent for replacement use and are used as original parts by discriminating set-builders and experimenters in the design and construction of broadcast band receivers. All coils have high-impedance primaries, wound with Litz wire, fully protected against humidity. Shields are 1 1/2" x 2 1/2".

Unshielded coils are equal in construction and quality to the shielded units. Wound on heavy impregnated forms with sturdy mounting brackets.

Shielded, No.	Type	Unshielded, No.
14-1004	Antenna Coil	14-1010
14-1005	R-F Coil	14-1011
List Each, \$0.99		List Each, \$0.77

### ★ Universal-Adjustable Coils ★

These Adjustable-Inductance coils will replace broadcast-band coils in practically any receiver. No longer necessary to order hard-to-get "exact duplicates." Continuously variable in inductance over a wide range, these coils will accurately "track" with other coils in the set when properly adjusted. Exact inductance of the old coil is easily matched by a simple screw-driver adjustment, regardless of the value of the tuning condenser! The oscillator may be used with any I-F from 175 to 520 kc. Shields are 1 3/4" square by 2 1/2" high. Furnished with complete instructions.

Shielded, No.	Type	Unshielded, No.
14-7413	Antenna Coil	14-1026
14-7558	R-F Coil	14-1027
14-7560	Oscillator Coil	14-1028
List Each, \$2.20		List Each, \$1.38

### ★ Compact Antenna—RF Coils ★

Highly efficient coils designed for use where space is at a premium. Cover the broadcast band, 545 to 1580 kc with a 365-mmfd tuning condenser. Ideal for replacement in midget, or auto radio sets as well as for new receiver construction. All have high-impedance primaries with Litz-wire "progressive-universal" secondaries. Windings are on 3/4" diameter forms, 1 1/2" long, fully impregnated. Black crackle shields are 1 1/2" diameter, 2" high.

Shielded, No.	Type	Unshielded, No.
14-1024	Antenna Coil	14-1022
14-1025	R-F Coil	14-1023
List Each, \$0.66		List Each, \$0.50

### Iron-Core Antenna—RF Coils

The use of high-quality iron cores adds substantial gain and increases the selectivity of these radio-frequency transformers. Recommended for use in any circuit where highest quality components are required. Cover the broadcast band from 540 to 1600 kc with a 365-mmfd tuning condenser. Mounted in black crackle-finish shields, 1 3/4" square by 2 1/2" high. Will perform well with any of the standard types of RF amplifier tubes including battery types

Cat. No.	Type	List Price
14-1496—Hi-imp. Pri. Ant. Coil		.....\$1.95
14-1497—Detector Stage R-F Coil		..... 1.95
14-7860—Interstage R-F Coil		..... 1.95

# Meissner Coils — Noise Filters

## MIDGET ANT. AND R. F. COILS

Entirely new design. Specially built for compact I. F., Super-Het and Auto Radio receivers. Wound on  $\frac{1}{2}$ " bakelite form. Four bank windings with Litz wire. High impedance primaries. Shield cans  $1\frac{3}{8}$ " x  $1\frac{3}{8}$ " x  $\frac{1}{2}$ ". Spade bolt mountings. Cover 190 to 450 meters with 365 mmf. condenser.

No. 14-2436—Antenna Coil  
No. 14-2437—R. F. Coil  
List Price, Each.....\$1.10

## ★ OSCILLATOR COILS ★

For the Broadcast band—190 to 550 meters. Tune with 365 mmf TRF type condenser. Will operate in all types of oscillator circuits.

Mounted on special bakelite base, with tinned soldering lugs. Unshielded coils mount by means of screw in one end of dowl. Shielded coils are in cans  $1\frac{1}{2}$ " diameter,  $1\frac{3}{4}$ " high, with spade bolt mountings. Proper value padder condensers must be used.

### Shielded

## INTERFERENCE FILTERS

### DE LUXE DUAL UNIVERSAL WAVE TRAP

Tunes 400-475 to eliminate code signals, etc., entering receiving at intermediate frequency. Also tunes 550 to 1950 kc for interfering signals in Broadcast and low-frequency Police bands. Knob makes adjustment easy. Has Ferrocoat (iron core) for greater efficiency.

No. 15-8048  
List Price.....\$3.00

**Dual Broadcast Model:** a two-section trap designed for maximum efficiency on Broadcast band only, 550 to 1950 kc.

No. 15-8478—List Price.....\$3.00

### DUAL AMATEUR BAND WAVE TRAP

Eliminates interference simultaneously from either 40 and 80, or 40 and 160 meter bands. Similar in construction to above dual unit, but without knob. Has screwdriver adjustment for both bands. Tunes 1.5 to 7.5 mc.

No. 15-8148—List Price.....\$3.00

## WEATHER-AIRCRAFT BAND COILS

Ultra-compact coils designed to provide highest possible efficiency for reception on the Weather-Aircraft band between 200 and 400 kc. Antenna coil has low-impedance windings for loop or other aircraft antenna in addition to regular high-impedance primary. For use with 365-mmfd condenser; in black crackle shields only  $1\frac{1}{2}$ " in diameter,  $1\frac{3}{4}$ " high.

No. 14-1030—Aircraft Ant. Coil, List Price \$3.00

No. 14-1031—Aircraft R-F Coil, List Price 3.00

No. 14-1032—Aircraft Osc. Coil, List Price 2.20

## ★ PHONO-OSCILLATOR COIL ★

Designed for the constructor and experimenter in building either wireless or direct-connected phonograph-oscillator units for record reproduction through the radio receiver. May be incorporated in the receiver or with the record-player. Knob adjustment permits selection of clear frequency in the broadcast band. Coil is in black crackle shield,  $1\frac{3}{8}$ " square by  $3\frac{1}{2}$ " high. Full instructions.

No. 17-9373—List Price.....\$2.20

## PRESELECTOR COIL

Increases the selectivity of any Broadcast receiver not having an R. F. stage—without adding any tubes! Three separate windings, a primary and two tuned secondaries. Covers regular Broadcast band, 545 to 1580 kc, with a 365-mmfd. tuning condenser. Rigidly mounted in black-crackle-finished shield,  $1\frac{3}{8}$ " square, 3" high.

No. 14-6797—List Price.....\$2.20

## DUAL-BAND COILS

Same as used in MEISSNER Kits; will give utmost in performance and stability. Both bands wound on same bakelite coil-form,  $\frac{7}{8}$ " dia. Two mica-dielectric trimmers mounted in cans of shielded coils. All coils designed to be used with a 365 mmf. variable condenser and for operation with a 456 kc. I-F channel. Wound on bakelite forms  $2\frac{3}{8}$ " long. Shielded coils in cans  $1\frac{3}{8}$ " x  $1\frac{3}{8}$ " x  $3\frac{1}{2}$ ". Broadcast-and-Police coils cover 530 to 1550 kc and 1.5 to 4.48 mc. Broadcast-and-Short-Wave coils covers 530 to 1660 kc and 5.8 to 19 mc.

## TRIPLE-BAND COILS

Similar in design and construction to the shielded 2-band coils above; available in two combinations of frequency ranges: BC-Police and S-W bands and Long-Wave, Broadcast and Short-Wave bands. The BC-Pol-SW coils are for use with a 450-mmfd. tuning condenser and cover 540 to 1770 kc, 1.75 to 5.35 mc and 5.2 to 18.5 mc. LW-BC-SW coils are for use with a 365-mmfd. tuning condenser and cover 136 to 370 kc, 530 to 1580 kc and 5.8 to 18.6 mc. All coils are in black crackle shields with side-adjusted trimmers; for use with 456-ke I-F channel.

No. 22-5202—Padder Kit for LW-BC-SW, List 1.65

No. 24-8264—3-position Range Switch, List 2.20

For elimination of electrical interference entering receiver by means of power line. May be connected either to interfering device or to radio. For 110 or 220 volts, AC or DC; 200 watts maximum load. In black crackle case, 2" x 2" x 5".

No. 15-7519—List Price.....\$4.50

## DE LUXE LINE NOISE FILTER

## 10-KC AUDIO FILTER

Eliminates the 10-kc squeals and whistles which spoil high-fidelity reproduction of programs. Two tuned filter circuits provide maximum attenuation of the 10-kc audio noise. Complete instructions and diagrams. Operates with any of standard power output tubes—current carrying capacity 75 ma. Coils universal wound and fully protected. Accurately retuned and mounted in black crackle-finished shield,  $1\frac{3}{8}$ " square by  $2\frac{3}{8}$ " high. Color-coded lead wires, spade lug mountings on shield.

No. 15-7520—List Price.....\$4.00

## INDIVIDUAL ALL-WAVE COILS

The same high-grade antenna, R. F. and oscillator coils used in the Multi-Wave coil assemblies. Separately available for use in making up special combinations for any type of receiver. "Align-Aire" trimmer mounted on each coil; long-wave coils are shielded. Oscillators designed for 156-ke I-F.

# Meissner I-F Transformers

## ★ "ALIGN-AIRE" I-F TRANSFORMERS ★

The result of years of engineering experience in designing high grade transformers for the finest commercial receivers! The exacting requirements of modern high-fidelity and communications type receivers demand units that can be depended upon under any and all conditions. They must be absolutely stable under temperature and humidity variation and unaffected by vibration. These requirements are all met by

the "Align Aire" I-F Transformer! Provides 3600 degrees of micro-meter smooth trimmer adjustment instead of the usual 180 degree rotation! Accurate trimming can thus be readily accomplished. Available with special "iron-core" design for maximum gain and selectivity. Double-tuned and offered in a complete range of frequencies for any application. Shield cans are black crackle finish, 2"x2"x4 1/4".

No.	Frequency Range (kc)	Peak Factory Setting	Gain Setting	Selectivity Band Width			Use
				2x	10x	20x	
16-6643	415-540	456	77	7.0	16.0	22.0	Input
16-6123	415-540	456	29	7.0	18.0	24.4	Interstage
16-6645	415-540	456	105	9.0	25.6	36.2	Output
16-6139	415-540	456	100	8.5	23.2	33.5	Output C.T

List Price, Each .....\$5.50

## ★ "PLASTIC" I-F TRANSFORMERS ★

New type, one-piece molded plastic coil form and trimmer base makes possible this highly efficient transformer, unusually compact in size! Shield can is only 1 1/4" square and 2 1/2" high! Especially suitable for midget or portable receivers, their performance is second to none in any type of set. Made in a complete series of frequency ranges and set positions; windings are universal type with special Litz wire, fully protected against the effects of humidity and temperature variation. Double-tuned with mica-dielectric trimmers; RMA color-coded lead wires.

Frequency	Input	Interstage	Output	List
175	16-6649	16-6650	16-6651

### High-Gain Iron-Core Plastics

Same size and construction as above but with iron cores to provide high gain and selectivity.

No.	Frequency	Input	Output	Either type	List, \$1.65
16-6662	456-kc	Input	Output		
16-6663	456-kc	Output	Input		

### PERMEABILITY-TUNED I-F TRANSF.

For perfect stability under all conditions; no trimmers; variable iron cores provide inductance adjustment. Fixed "silver mica" shunt condenser on each coil insures against drift. High-gain, low-loss universal windings are thoroughly protected from moisture and humidity. Peaked at 456 kc; shield is black crackle finish and is 1 3/4" square by 3 1/2" high. No. 16-6646 16-6647 16-6648 Type Input Interstage Output

List Price, Any Type, Each.....\$3.30

### BAND-EXPANDING I-F's

Variable selectivity transformers to enable adjustment of the I-F channel band-width to meet the conditions of the moment! Coupling is variable electrically by means of a two or three position tap switch—no cams or levers. With the two-position units, normal and extra-selective response curves are provided. On the three-position units, an unusually broad response is added for high-fidelity reception. All are 456 kc, double-tuned; mica-trimmed units are 1 3/4" square by 3 1/2" high; air-trim: 2" by 4 1/2".

No.	Trimmer	Positions	List
17-7410	Mica	Two	\$3.30
17-7412	Mica	Three	3.85
17-7416	Air	Three	6.75

## ★ "STANDARD" I-F TRANSFORMERS ★

Meissner Air-core I-F Transformers have been accepted as "Standard" for general replacement purposes. Gain characteristics have been designed to correspond closely with average values found in the majority of commercial receivers. Input and output units are high-gain, for use in single-stage amplifiers; inter-stage units have low gain to prevent oscillation in two-stage ampli-

fiers. All transformers are double-tuned, with ceramic-base, mica-dielectric trimmers. Windings of high-grade Litz wire are fully impregnated for protection from humidity. Well insulated, RMA color-coded lead wires. Mounted in "standard" size shield cans, 1 3/4" square by 3 1/2" high, finished in black crackle lacquer.

Frequency	Input	Interstage	Output	Output C-T
175	16-5700		16-5702	16-3731
262	16-5704		16-5706	
456	16-5712	16-6133	16-5714	16-3736

Standard I-F Transformers, List Price, Each .....\$1.65

## ★ "FERROCART" I-F TRANSFORMERS ★

Designed primarily as original parts in high-gain receivers of superior quality, these transformers find consistent application in stepping up the performance of old receivers. Many sets with a single I-F stage can be tremendously improved in sensitivity and selectivity by their use. Special powdered-iron "Ferrocart" cores used in the coils permits higher-"Q".

with resultant increase in gain and selectivity! The wide range of frequencies listed provides for a great variation in new receiver designs while also permitting almost universal application for replacement use. All are double-tuned, with ceramic-base, mica-dielectric trimmers; shields are 1 3/4" by 3 1/2".

Frequency	Input	Output
175	16-5728	16-5730
456	16-5740	16-5742

"Ferrocart" Iron Core I-F Transformers, List Price, Each.....\$2.20

## TRIPLE-PIE I-F TRANSFORMERS

Highly efficient, supergain transformers designed particularly for use in single-stage I-F channels. Not recommended for use in two-stage amplifiers, since excessive gain tends to create instability and troublesome oscillation. These transformers are double-tuned with ceramic-base, mica-dielectric trimmers. Mounted in black crackle-finish shields, 1 3/4" square by 3 1/2" high.

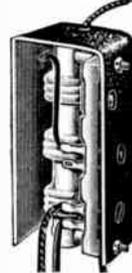

Frequency	Input	Output
370	16-5720	16-5722
456	16-5724	16-5726

List Price, Each.....\$2.00

## TRIPLE-TUNED I-F TRANSFORMERS

Especially designed for high-fidelity superhets, these transformers provide flat-top resonance characteristics with narrow, steep-sided skirts. Accordingly, they deliver the ultimate in tonal quality since there is no cutting of "sidebands". Triple-pie, universal windings are used to provide high gain. Provided with side-adjusted, ceramic-base trimmers. Shields are 2" square by 5" high.

Cat. No.	Frequency	Type
16-6858	456	Input
16-6860	456	Output

List Price, Each.....\$3.30

## COMPOSITE I-F AND OSC.

Combined oscillator coil and input I-F transformer in one shield; for replacement use and new set construction. Designed to cover broadcast band from 190 to 550 meters with a 365-mmf/d tuning condenser. Double-tuned with ceramic-base trimmers; shield is 2" x 2" x 3".

No.	Frequency	Padder
17-4031	175	1135-mmf/d
17-7537	456	425-mmf/d

List Price, Each.....\$3.30

## ★ "CARTWHEEL" I-F ★

Ultra-compact, unshielded I-F's complete with dual trimmers; fine for compact AC-DC or personal receivers! Also very useful as replacements in many sets using odd shapes and locations for their I-F's. Only 1 3/8" by 1-1/32" by 1 1/4", one-piece plastic trimmer base; for 456 kc only, input or output.

No. 16-6661 "Cartwheel" I-F, List.....\$1.10

### I-F TRANSFORMER REPLACEMENT MANUAL

A necessity to every serviceman! Tells what I-F transformer to use in any superhet! Every super ever made, on which data could be obtained, is listed by manufacturer and model no., original part numbers, original peak fre-

quency AND the no. of the Meissner transformer recommended for replacement! Has 254 pages in handy pocket size; lists 9,891 models!

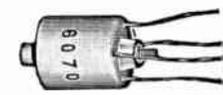

I-F Transformer Replacement Manual, Net Price.....\$ .25

NOTE: ONLY STARRED ★ ITEMS ARE AVAILABLE FOR THE DURATION

# Meissner Replacement Coils

## MAJESTIC COILS ONLY

Exact duplicates of original assemblies. Coils only, without cans or trimmers. Exactly replace defective burned-out units. Improved units, in cans with trimmers, are listed at right.

## MAJESTIC EXACT DUPLICATE TRANSFORMERS

Manufactured from the original Majestic blue-prints, but Meissner-improved to eliminate the causes of failure. New construction insures satisfactory long life—mechanically and electrically perfect. Exactly replaces old units—requires practically no adjusting. Leads have original Majestic color-code.

20-6273	8342	60-62-64	All I.F.	1.10

## BELMONT Composite I.F. and Osc.

Exactly replaces first I.F.—Osc. coil in Belmont C-19, 50-C, 51-C. May also be used in many Sears-Roebuck sets. Complete exact duplicate in shield can.

No. 20-6792—List Price.....\$4.40

## CROSLY Untuned I.F. Coil

Exact duplicate for Models 122, 123, 124, 125, 126. Every serviceman should have a supply of these efficient units.

No. 20-4297—List Price.....\$1.40

## STEWART-WARNER Oscillator Coil

Exact duplicate for the oscillator coil used in Stewart Warner Model M3043. Same physical and electrical characteristics as original.

No. 20-1000—List Price.....\$0.85

## \*"SLIP-OVER" REPLACEMENT PRIMARY WINDINGS\*

Economically replace burned out primaries on all types of Antenna and R.F. coils, where a new primary winding can be slipped over the secondary. High-impedance type for improved performance. Sizes are outside diameter of coil over which replacement primary will fit.

No.	Size	List
14-6850	For 1 1/4" O.D. Coll	\$0.33
14-6852	For 1" O.D. Coll	.28
14-6854	For 3/4" O.D. Coll	.28
14-6856	For 1/2" O.D. Coll	.28
14-8418	For 1/2" O.D. Coll	.28

## REPLACEMENT I.F. WINDINGS

Designed particularly for replacement use in inexpensive midget receivers. Coils are wound on wood dowels, 1/4" diameter and 1 1/4" long; coupling is adjustable by sliding primary coil.

### STANDARD CENTER-TAPPED

No.	Freq.	List	No.	Freq.	List
16-6600	175	\$0.66	16-6602	175	\$0.88
16-6601	456	.66	16-6603	456	.88

## "DOWEL" TYPE REPLACEMENT WINDINGS

For use in replacing burned out primaries, particularly where the "slip-over" type cannot be used due to mechanical difficulties. Fit inside the coil form. Antenna winding Type A is for use with sets having a regular antenna. Type B is for sets having a short "hank" or A.C.—D.C. type antenna. 3500 ohm R.F. winding Type C must be shunted with a 15 or 20 uhf condenser for best performance; 7500 ohm windings no condenser.

No.	Type	Dimensions	Inductance
★14-6865★	A	1/2" dia. by 1 1/4" long	1700 uh
14-6866	A	3/4" dia. by 1 1/4" long	1700 uh
14-6867	A	1" dia. by 1 1/4" long	1700 uh
14-6868	B	1/2" dia. by 1 1/4" long	2250 uh
14-6869	B	3/4" dia. by 1 1/4" long	2250 uh
14-6870	B	1" dia. by 1 1/4" long	2250 uh
14-6871	C	1/2" dia. by 1 1/4" long	3500 uh
14-6872	C	3/4" dia. by 1 1/4" long	7500 uh
14-6873	C	1" dia. by 1 1/4" long	7500 uh

Dowel-Type Replacement Primaries, List Each.....\$0.33

NOTE: ONLY STARRED ★ ITEMS ARE AVAILABLE FOR THE DURATION

# Meissner Miscellaneous Parts

## ★ AIR-CORE R-F CHOKES ★

Accurately wound and individually tested; coils wound on specially treated forms, mounted on bakelite terminal base and thoroughly moisture proofed. Available in shields or without; both single-hole mounting. Shielded chokes have terminals thru top of can so unit may be mounted on inside wall of chassis. Shields are black crackle finish, 1½" dia.

MH Induct.	Shielded		Unshielded	
	No.	List	No.	List

80.0	19-5596	1.10	19-2709	.88

## ★ IRON-CORE R-F CHOKES ★

Universal-wound on special powdered-iron cores, these chokes provide maximum efficiency—lower DC resistance per MH. Coils are wax-impregnated; laminated bakelite terminal base; single-hole mounting; without shielding.

No.	MH	List	No.	MH	List
19-6834	2.5	\$0.77	19-6844	60.0	\$1.27
19-6840	10.0	.94	19-6846	80.0	1.43
19-6842	30.0	1.10	19-6848	125.0	1.82

## FILAMENT CHOKE

A low-resistance choke wound with No. 14 P'E wire designed for use in the low voltage circuits of vibrator power supplies, auto radio sets, etc. Has an inductance of 4 uh, and a resistance of only .012 ohm. Single layer winding enclosed in a cardboard tube ¾" diameter by 1¾" long, with wire leads.

No. 19-4215—Filament Choke. List Price....\$0.45

## CERAMIC-BASE TRIMMERS

Low-loss ceramic base. Hot-tinned alloy plates. Admium-slat-ed steel adjusting screws; extra-fine threads. Accurately threaded brass insert. Clear India Ruby mica dielectric.

No.	Type	Capacity Range	List
22-7002	C	25-100 mmfd	\$0.30
22-7003	C	75-225 mmfd	.35

22-7010	D	500-1400 mmfd	.90
22-7011	D	600-1600 mmfd	.95
22-7012	D	700-1800 mmfd	1.00
22-5211	G (dual)	200-600 mmfd	.65

## AIR-DIELECTRIC TRIMMERS

Metal-cased air trimmer as used in Align-Aire 1-P transformers; absolutely stable under all conditions; dust-proof; moisture-proof.

Provides 3600 degrees rotation from minimum to maximum; ceramic insulation; ¾" dia. by 1¾".  
No. 22-5232—5 to 25 mmfd. List Price....\$1.00  
No. 22-5240—25 to 50 mmfd. List Price.... 1.10  
No. 22-5200—40 to 100 mmfd. List Price.... 1.40

## MIDGET "ALIGN-AIRE"

Similar to above unit but in molded plastic case; only 7/16" diameter, 1¾" long; combination metal end plate and mounting bracket.

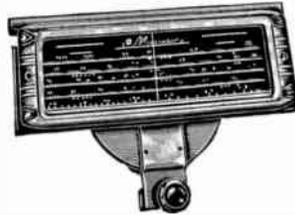

No. 22-5230—1 to 12 mmfd. List Price....\$0.40

## SOCKET PUNCH

Hardened steel. Will cut right-sized hole in sheet metal up to 14 ga to fit either Steelite or Bakelite Meissner sockets. Cuts clean; 1½" hole; tempered to last.

No. 25-3558—Socket Punch. List Price.....\$5.50

## STANDARD "SLIDE-RULE" DIALS

**9-INCH** Used on larger Meissner receivers; single-speed vernier mechanism; fits ¾" shaft; for right or left-hand closing condenser. 4-band scale calibrated 537-1754 kc, 1.68-5.96 mc, 5.85-18.2 mc and 17.6-42 mc. 5-band scale has 133-406 kc band additional.

Scale	Right-hand	Left-hand	List
4-band	No. 23-8233	No. 23-8232	\$7.75
5-band	No. 23-8231	No. 23-8230	7.75

**7-INCH** Used on Meissner 7-tube receivers; fit ¾" shaft; for right- or left-hand closing condenser. Scales calibrated: A—530-1660 kc, 0-100; B—530-1660 kc, 5.85-18.8 mc, 0-100; C—537-1770 kc, 1.75-5.4 mc, 5.2-18.5 mc; D—135-370 kc, 530-1580 kc, 5.8-18.5 mc.

Scale	Right-hand	Left-hand	List
Type A	No. 23-8220	No. 23-8207	\$6.00
Type B	No. 23-8221	No. 23-8208	6.00
Type C	No. 23-8222	No. 23-8209	6.00
Type D	No. 23-8228	No. 23-8210	6.00

**5-INCH** Used on Meissner P-A Tuners; similar to above dials except for scale length. Fits ¾" condenser shaft; for clock-wise closing condenser only; calibrated for broadcast band, 530 to 1600 kc; furnished with escutcheon.

No. 23-8227—5" Slide-Rule Dial. List Price..\$5.25

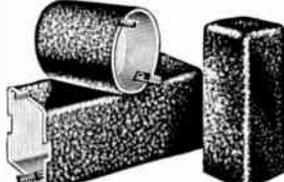

## 4-INCH ROUND DIAL

Used on Meissner 5-tube set; a handy mechanism for any application. Scale calibrated 0 to 100; fits ¼" diameter shaft; dependable friction vernier drive; no cables; includes escutcheon.

No. 23-8257—4" Round Dial. List Price.....\$3.30

## SHIELD CANS

Meissner drawn zinc shield cans; black crackle finish. Furnished with spade-bolts for mounting.

No.	Shape	Dimensions	List
25-8271	Square	1¾" x 1¾" x 1¾"	\$0.30
25-8273	Square	1¾" x 1¾" x 2¾"	.35
25-8275	Square	1¾" x 1¾" x 3¾"	.40

25-8270	Round	1½" dia. x 1"	.20
25-8272	Round	1½" dia. x 1¾"	.25
25-8274	Round	1¾" dia. x 2¾"	.35

## COIL CEMENTS

### High "Q" Cement

The finest R-F lacquer obtainable; sticks fast; no loss in "Q" of coil to which it is applied. Maintains highest efficiency at all times; protects against humidity variations.

No. 25-5045—List Price.....\$0.55

Radio Cement—Best for general coil use; provides greatest tensile strength with minimum loss in "Q"; gives full protection; sets fast.

No. 25-5046—List Price.....\$0.45

Collodion—Dries five times as fast as any other Meissner cement; not quite equal in tensile strength or efficiency but best for rapid work.

No. 25-5047—List Price.....\$0.35

Thinner No. 1—A universal reducing agent for practically all cements and lacquers; not good for High "Q" Cement; used on all others.

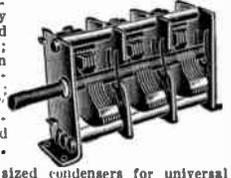

No. 25-5048—List Price.....\$0.55

Thinner No. 2—A specially developed thinner for Meissner High "Q" Cement. Not suitable for Radio Cement or Collodion.

No. 25-5049—List Price.....\$0.35

## STANDARD VARIABLE CONDENSERS

Low-loss precision tuning condensers for any application; improved bakelite insulation; trimmers mounted on top; busbar construction insures rigidity; ¾" dia. shaft, 1½" long; capacity increases clockwise; end plates are 1¾" x 3¾".

These are standard sized condensers for universal receiver use; sections are spaced 1½" apart.

Cat. No.	21-5224	21-5221	21-5222	21-5223
Sections	One	Two	Three	Four
List Price	\$2.50	\$3.50	\$4.50	\$5.75

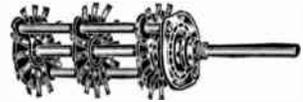

## COMPACT VARIABLE CONDENSERS

Where space is an important factor these compact, reliable condensers are ideal. Each section is only 1" deep; end plates are 1 9/16" x 2¾"; rigid, bus-bar construction; bakelite insulation; trimmers on top; ¾" dia. shaft; capacity increases clockwise.

Capac.	One-Section	Two-Section	Three-Section
140	.....	21-5210 \$2.65	21-5211 \$3.65
365	21-5200 \$1.80	21-5214 2.75	21-5215 3.75
410	.....	21-5216 2.75	21-5217 3.75

## ROTARY TAP SWITCHES

Shorting type contacts two adjacent points during rotation; circuit is never open. Non-shorting type opens circuit between each point; contacts only one point at a time. All have adjustable stops; any number of positions may be used. High-grade laminated bakelite insulation; positive silvered contacts. Overall diameter, 1½"; mounts in ¾" hole; flatted shaft 2" long, ¼" diameter. Sections are spaced 1½" apart; may be shortened by cutting spacers.

Circuits	Posi-tions	Shorting No.	List	Non-Shorting No.	List
One	2 to 12	24-8251	\$1.30	24-8252	\$1.30
Two	2 to 5	24-8253	1.40	24-8254	1.40
Two	2 to 12	.....	.....	24-8256	1.95
Four	2 to 5	.....	.....	24-8258	2.20
Three	2 to 12	24-8259	2.60	24-8260	2.60
Six	2 to 5	24-8261	2.75	24-8262	2.75
Four	Two	24-8263	1.40	.....	.....

## Coil-Shorting Rotary Switches

Designed for use in multi-band receivers; has separate wafers for complete switching of primary and secondary on each coil. Shorts out all lower-frequency coils to reduce absorption. Adjustable stop permits use of limited number of positions. High quality laminated bakelite insulation; positive silvered contacts; overall diameter, 1½"; mounts in ¾" hole. Flatted shaft is 2" long, ¼" in diameter; sections are 1½" apart; may be shortened by cutting spacers.

No.	Gangs	Circuits	Positions	List
24-9202	2	2	2 to 5	\$1.65
24-9204	6	6	2 to 5	3.85
24-9205	8	8	2 to 5	5.00

## Molded Bakelite Socket—Octal Base

Has many points of superiority; accurately molded of highest grade bakelite; mounted in cadmium-plated steel saddle; standard 1½" mounting centers; requires 1½" hole in chassis; has four ground lugs.

No. 25-8209—Bakelite Octal Socket. List....\$0.12  
No. 25-8438—Carton of Six Sockets. List..... .70

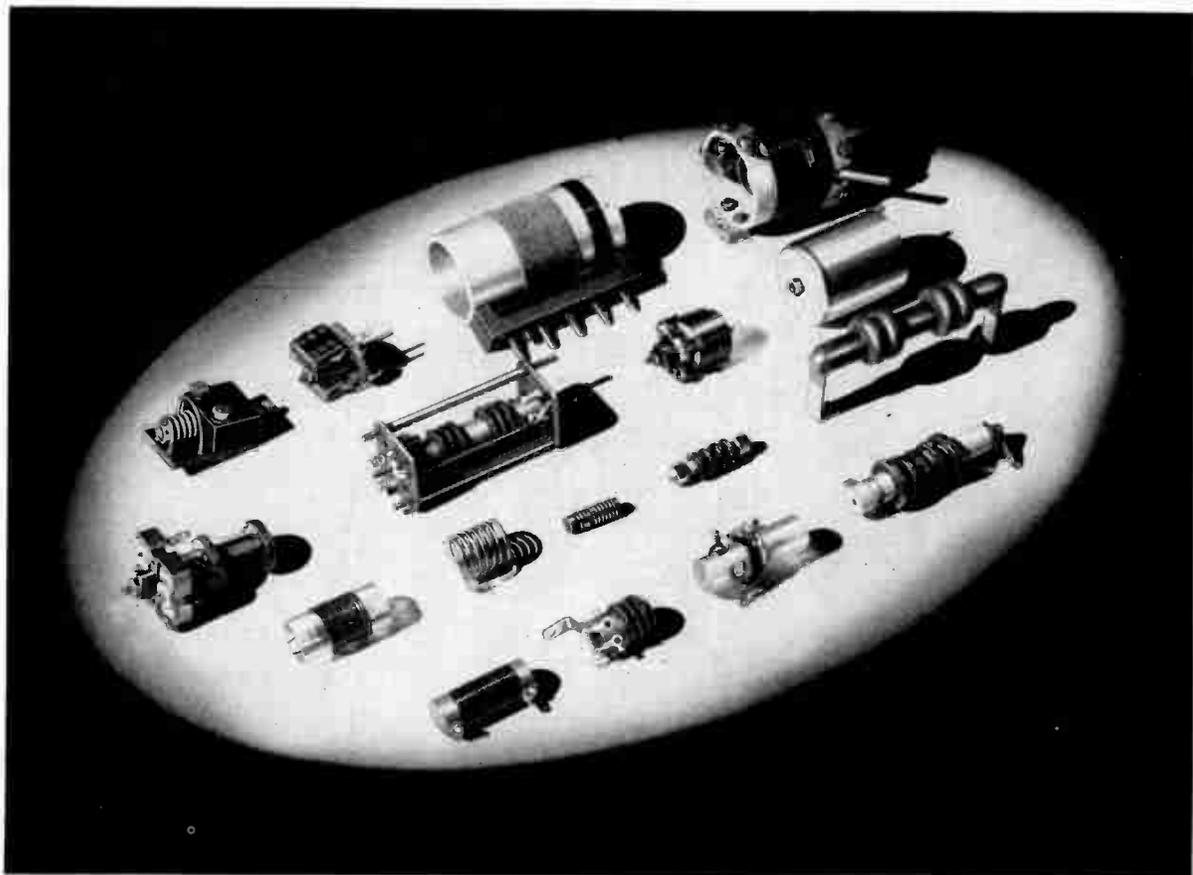

## Low-Loss Ceramic Octal Socket

Of same construction as above, this socket is made of highest quality ceramic insulation; low R F losses make it ideal for high-frequency use. Phosphor-bronze contacts can not pull out with tube; standard mounting centers, 1½".

No. 25-8437—Ceramic Octal Socket. List.....\$0.40  
No. 25-8439—Carton of Six Sockets. List..... 2.25

NOTE: ONLY STARRED ★ ITEMS ARE AVAILABLE FOR THE DURATION

## COILS FOR EVERY APPLICATION IN THE RADIO FREQUENCY SPECTRUM, INCLUDING RADAR AND TELEVISION

In our distinctive new "postwar" package will be found coils made with expert care and incorporating the latest technical advances. Jobbers who must meet high standards should investigate the singular advantages offered by the wide variety of Stanwyck coils.

Manufacturers and engineers developing new types of radio, radar and television equipment are invited to investigate Stanwyck's facilities for machining all types of plastic and ceramic insulating cores and equipment readily adaptable to the production of all types of universal bank windings. Our engineering department is specially set up to collaborate in the design of new coils for specific applications. Your inquiries will be promptly answered.

We will be glad to send you our catalogue and price list when available. Send your name.

# STANWYCK WINDING COMPANY, Newburgh, N.Y.

# PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

## TYPE "A" ENCLOSED RELAY RACKS

### Black Ripple Finish

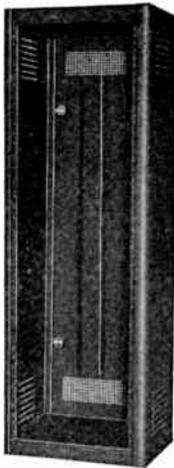

This completely enclosed rack will give your job the "professional appearance" so desirable on transmitters, P.A. systems, etc. Substantially constructed from  $\frac{1}{4}$ " cold rolled steel; panel mounting angles are of  $\frac{1}{8}$ " steel, accurately drilled on universal centers for either type "A" or type "C" panels, tapped for 10/32 machine screws. Panels fit into a recess, so that edges are not exposed. Louvres in sides and screen sections in rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Shipped "knocked-down" with all necessary bolts for easy assembly. Ample supply of panel mounting screws and washers supplied.

Cat. No.	Overall Size	Panel Space	Wt. lbs.	Net Price
ER203	42 x 21 x 16 1/2"	36 3/4"	75	\$21.30
ER205	66 1/2 x 21 x 16 1/2"	61 1/4"	135	28.50
ER207	82 1/4 x 21 x 16 1/2"	77"	165	35.40

### Slate Grey Ripple Finish

The ideal streamlined rack for your next transmitter or P.A. system. The vertical corners at front are rounded. Uniform slate grey ripple finish gives assembly an attractive exterior appearance. Substantially fabricated from  $\frac{1}{4}$ " cold rolled steel; the panel mounting angles are of  $\frac{1}{8}$ " steel, accurately drilled on universal centers for either type "A" or type "C" panels, tapped for 10/32 machine screws. Panels fit into a recess, so that the edges are not exposed. Louvres in the sides and screen sections in the rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Shipped "knocked-down" with all necessary bolts for easy assembly.

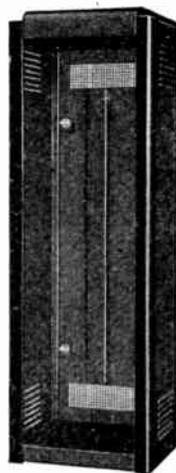

Cat. No.	Overall Size	Panel Space	Wt. lbs.	Net Price

R-215	66 1/2 x 22 x 16 1/2"	61 1/4"	150	32.70
R-217	82 1/4 x 22 x 16 1/2"	77"	175	39.60

## TYPE "A" TRANSMITTER RACKS

### Slate Grey Ripple Finish

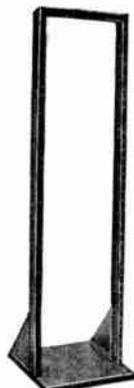

Produced in the new streamlined style, in keeping with modern design. The removable vertical corner mouldings are rounded and cover the panel mounting screws, same as on our type "C" commercial racks (see page H-99). The top, which has also been "streamlined," is perforated at the back to provide additional ventilation. Rack is substantially fabricated from  $\frac{1}{4}$ " cold rolled steel; panel mounting angles are of  $\frac{1}{8}$ " steel, accurately drilled on universal centers for either type "A" or type "C" panels, tapped for 10/32 machine screws. Louvres in side and screen sections in rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Shipped "knocked-down" with all necessary bolts for easy assembly.

Cat. No.	Overall Size	Panel Space	Wt. lbs.	Net Price
R-223	43 1/4 x 22 x 18"	36 3/4"	105	\$30.60
R-225	67 3/4 x 22 x 18"	61 1/4"	160	39.60
R-227	83 1/4 x 22 x 18"	77"	185	47.10

## TYPE "A" CHANNEL RELAY RACKS

### Black Ripple Finish

Ideal for use on all types of transmitters and public address systems. Substantially constructed of  $\frac{1}{8}$ " pressed steel. Vertical members and top cross-brace securely welded together. Base is 22" deep and extends both front and rear on the RR-195 rack; it is 19" deep on the RR-193 rack. Panel mounting holes accurately drilled on universal centers for either type "A" or type "C" panels, tapped for 10/32 machine screws. Ample supply of panel mounting screws and finishing washers supplied.

Cat. No.	Overall Size	Panel Space	Wt. lbs.	Net Price
RR-195	73 1/4 x 20 x 22"	71 3/4"	85	\$12.90
RR-193	38 1/4 x 20 x 19"	36 3/4"	57	10.50

Note: Panels to fit these racks are listed on page H-100.

### TABLE TYPE

For table mounting Useful where a regular floor type heavy duty rack is not required. Base constructed of one piece, similar to a chassis. Mounting holes accurately drilled on universal centers, tapped for 10/32 screws. Finished in black ripple enamel and shipped "knocked-down" with all necessary screws. Shipping weight of rack is 20 pounds.

Cat. No.	Overall Size	Panel Space	Net Price
TR-2520	25 x 21 x 12"	21 x 19"	\$4.05
TR-3220	32 x 21 x 12"	28 x 19"	5.25

## ROLLER TRUCKS FOR RACKS

### STANDARD TYPE

These roller trucks are substantially made from steel with welded corners. The overall size is about 3" wider than the racks, to provide a better distribution of weight. Castors have ball-bearing swivels, with steel wheels. Finish is black ripple enamel.

Cat. No.	Inside Clearance	Wheels	Net Price
RT-400	10 1/2 x 15"	2" Steel	\$4.05
T-401	21 1/4 x 17"	2" Steel	5.10

### DELUXE TYPE

These trucks are especially designed for use on our deluxe streamlined racks, and have rounded corners at the front. Overall size is about 3" wider than the racks for better distribution of weight. Castors are ball-bearing swivel type with steel wheels. Finished in slate grey ripple enamel.

Cat. No.	Inside Clearance	Wheels	Net Price
T-410	21 1/4 x 15 1/2"	2" Steel	\$3.60
T-411	22 3/4 x 17 1/2"	2" Steel	5.40
T-412	22 3/8 x 18 3/4"	2" Steel	6.60
T-415	22 3/4 x 16"	2" Steel	6.60

## HINGED STEEL CABINETS

Excellent for housing monitors, oscillators, etc. Full piano hinged doors, front panels removable. Modern grille type ventilation at sides and back; top corner at front is rounded to give attractive appearance. Finished in black ripple enamel. Prices do not include chassis bases.

Cat. No.	H. L. D.	For Chassis	Net Price

ZINC PLATED

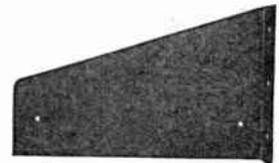

### STANDARD TYPE

Construction is the same as our heavy-duty chassis. Stamped from one piece of cold rolled steel, and have four solid sides with welded corners. Bottom edges are flanged in on four sides to provide additional reinforcement, and they are drilled for bottom plates. The chassis are made from #20 gauge steel, except those marked (\*) which are stamped from  $\frac{1}{8}$ " steel exactly like our heavy-duty type. Bottom plates have holes to match the chassis, and have pressed "bumpers" at the corners. Both chassis and bottom plates may be obtained in either a uniform black ripple finish, or plated.

F-504	12x18x12"	10x17x3"	4.71

## DELUXE SLOPING FRONT Amplifier Foundation Chassis

Latest trend in amplifier design. Combination of sloping front panel and streamlined cover enables you to build up a job similar to that used on commercial deluxe type amplifiers. All parts finished in slate grey ripple enamel. Front panel removable and protrudes 3" from face of screen cover. Chassis supplied complete WITH bottom plates.

Cat. No.	Chassis Size	Screen Cover	Net Price
10120	10x12x3"	6½" high	\$4.11
10170	10x17x3"	6½" high	4.86
13170	13x17x3"	6½" high	5.46

## STANDARD Amplifier Foundation Chassis

Rounded corners effectively streamline the covers on these units. Grille type ventilation gives them a modern appearance. Chassis stamped from one piece of cold rolled steel, with corners securely spot welded. Covers finished in slate grey, chassis in black ripple enamel. Chassis are drilled for bottom plates. Handles can be mounted at both ends of the cover at an addition of 42c net.

Cat. No.	Size	Depth of Cover	Shgp. Wt.	Net Price
F-510	5x10x3"	6"	9 lbs.	\$1.65
F-615	6x14x3"	6"	10 lbs.	1.92

F-1017	10x17x3"	6"	13 lbs.	2.91
F-1317	13x17x3"	6"	15 lbs.	3.36

## TYPE "C" TRANSMITTER RACKS

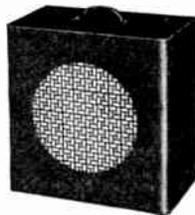

Similar to standard type "C" racks listed at right except that they have been reinforced at rear corners for use with heavier apparatus. At the rear, knockouts are provided for conduit and 4" square duct, as well as a double convenience outlet with receptacle. Knockouts are also supplied at sides for conduit, suitable for entry of cables when units are ganged. The rear door, which is removable, has ample louvres for ventilation, and is covered on the inside with mesh screening. Front trim rounded on vertical corners. Racks are regularly supplied with corner trim for use as a single unit, but will be furnished with suitable front connecting strips for ganging in rows of two or more without additional charge.

FINISH: Black ripple enamel with dull black corner trim as standard. Slate grey ripple enamel furnished without additional charge, if so specified. For grey lacquer finish, add 8% to prices. PANELS: Type "C" panels to fit the G-2218 and G-2219 racks are listed on page H-100. For cost of 30" panels to fit the G-3024 rack, add 100% to prices of 19" panels on page H-78.

Cat. No.	Overall Size	Shgp. Space	Panel Wt.	Net Price
G-2218	76½"x22x18"	70"	270	\$73.95
G-2219	83½"x22x18"	77"	290	82.95
G-3024	76½"x33x24"	70"	450	127.95

## Standard Speaker Cabinets

These cabinets are given a streamline appearance by rounded front corners. They are substantially made from sheet steel, with a louvred back cover. Keyhole slots are provided in back cover for wall hanging. Finished in black ripple enamel.

Cat. No.	Hole Size	Spkr. Size	Cabinet Size	Shgp. Wt.	Net Price
C-996	4¾"	6"	10x10x6	8 lbs.	\$2.40
C-1170	6½"	8"	12x12x7	9 lbs.	3.00

C-1580	11"	12"	16x16x8	20 lbs.	5.10

## STEEL METER CASES

These meter cases may be obtained for 2" and 3" meters. Substantially made from steel, with welded joints, and finished in black ripple enamel. Top front corner is rounded to harmonize with "streamlined equipment." Size is 4½" x 4" x 4".

Cat. No.	Meters	Meter Hole	Net Price
SM-12	Single 2"	2½"	\$0.81
SM-13	Single 3"	2½"	.81

## TYPE "C" CABINET RACKS With Louvres

Professional type racks used on many commercial installations. All-steel construction, welded into an integral unit, to give a lifetime of service. Panel mounting screws concealed by means of full length corner trim on each side at front, rounded on vertical corners. Rear corners finished with regular angle trim. Door has grille at top and bottom, and is hung on sturdy loose-joint hinges; it is held closed by two flush snap-action catches. Additional ventilation provided by louvres at sides. Panel mounting angle irons are ½" thick, with mounting holes accurately drilled and tapped 12/24 thread on multiple 1¼"-½" spacings. Rack is made from ¼" thick cold rolled steel, rigidly braced and reinforced throughout; bottom is 7/8" thick steel. Rectangular opening in bottom for conduits, leads, etc. Opening in back under door for installation of duplex outlet if required.

FINISH: BLACK RIPPLE; if slate grey ripple is desired, substitute letters "RG" instead of "R", when ordering.

R-8318	83½"x22x18"	77"	280	76.50

## Without Louvres

Same design and construction as above. To permit racks to be set up in gangs or rows of two or more, the louvres at sides are omitted. Racks may be joined by a flat trim fastened to front of adjacent support angles, overlapping both racks. Knockout holes 1½" are provided at sides to permit connections. Shipped with corner trim as illustrated; where specified, front joining without additional charge in place of corner trim.

FINISH: BLACK RIPPLE; if slate grey ripple is desired, substitute letters "PG" instead of "P", when ordering.

## TYPE "C" STEEL RACK PANELS — 19" WIDE

For Racks with Multiple 1¼" · ½" Spacings

### BLANK PANELS

These panels are made from 1/8" thick steel and are uniformly slotted to fit type "C" cabinet racks shown on page H-77 and all type "A" racks. They will also fit any other rack equipment having multiple 1¼x½" spacings or what is commonly termed as "W.E. spacing." There are twelve standard sizes available to fill almost every requirement. They may be obtained in either black ripple enamel, slate grey ripple enamel, or grey lacquer as specified below.

6640	19¼"	16 lbs.	2.70
6641	21"	17 lbs.	3.00

These panels are made from 1/8" thick steel and are uniformly slotted to fit type "C" cabinet racks shown on page H-77 and all type "A" racks. They will also fit any other rack equipment having multiple 1¼x½" spacings or what is commonly termed as "W.E. spacing." They may be obtained in either black ripple enamel or slate grey ripple enamel.

### GRILLE PANELS

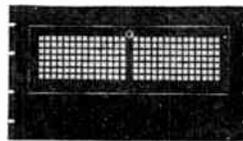

This modern type ventilating grille panel is stamped into the panel itself; it is not a pieced assembly.

Catalog Number	Panel Size	Grille Size	Net Price
P-661 G-661	5¼"	3¾x14¾"	\$1.95
P-662 G-662	7"	4¾x14¾"	2.10
P-663 G-663	8¾"	6¾x14¾"	2.55
P-664 G-664	8¾"	*3¾x14¾"	2.25
P-665 G-665	10½"	8¾x14¾"	2.70
P-666 G-666	10½"	*5¾x14¾"	2.40
P-667 G-667	12¼"	*7¾x14¾"	2.91

\*Allows 3½" space at bottom for chassis mounting.

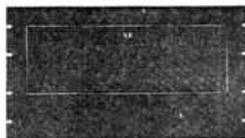

### GRILLE DOOR PANELS

These panels have flush hinged doors with modern type ventilating grille. Doors are equipped with piano hinges, chrome knob and concealed snap catch. All doors start 1" from top to allow space for chassis at bottom. Regular chassis brackets may be used if desired.

Catalog Number	Panel Size	Door Size	Net Price
P-680 G-680	8¾"	4½x15½"	\$3.45
P-681 G-681	10½"	6 x15½"	3.75
P-682 G-682	12¼"	7½x15½"	4.20

### SOLID DOOR PANELS

These panels have flush hinged doors with full length piano hinges; they are equipped with a chrome knob and concealed snap catch. All doors are located 1" from top to allow space for chassis at bottom. Regular chassis brackets may be used if desired.

Catalog Number	Panel Size	Door Size	Net Price
P-670 G-670	8¾"	4½x15½"	\$2.34
P-671 G-671	10½"	6 x15½"	2.58
P-672 G-672	12¼"	7½x15½"	3.00

### METER PANELS

These panels are made so that the meters may be recessed from the front of the panel. Meters are protected by a plate glass insert, allowing 3/4" clearance in back of panel. A blank bakelite sub-panel is provided. The clear sub-panel space is 4½"x15" on the 19" wide panel which is sufficient for 4-3" meters. On the 24" and 30" wide panel the clear sub-panel space is 5¼"x20" and 5¼"x26" respectively.

Cat. No.	Cat. No.	Size	Net Price
Black	Grey		
P-690	G-690	5¼x19"	\$3.90
P-691	G-691	7 x24"	6.60
P-692	G-692	7 x30"	9.00

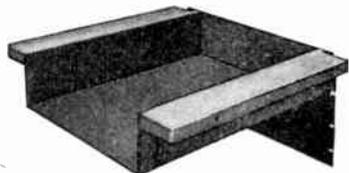

### STANDARD DESK PANELS

These standard tables are rigidly made of 1/8" thick furniture steel. The rounded front corners are of seamless construction and the flanges of the shelf are folded in to provide smooth edges underneath. They are securely mounted to regular 1/4" steel panels, size 10½"x19". They may be obtained in two sizes and finishes as listed below. The tables are 22" wide to give full working space across the front of the racks when mounted in place. Shipping weight is 35 lbs.

Cat. No.	Width	Depth	Finish	Net Price
BT-2220	22"	20"	Black enamel	\$9.90
BT-2216	22"	16"	Black enamel	9.30
AT-2220	22"	20"	Grey lacquer	10.50
AT-2216	22"	16"	Grey lacquer	9.90

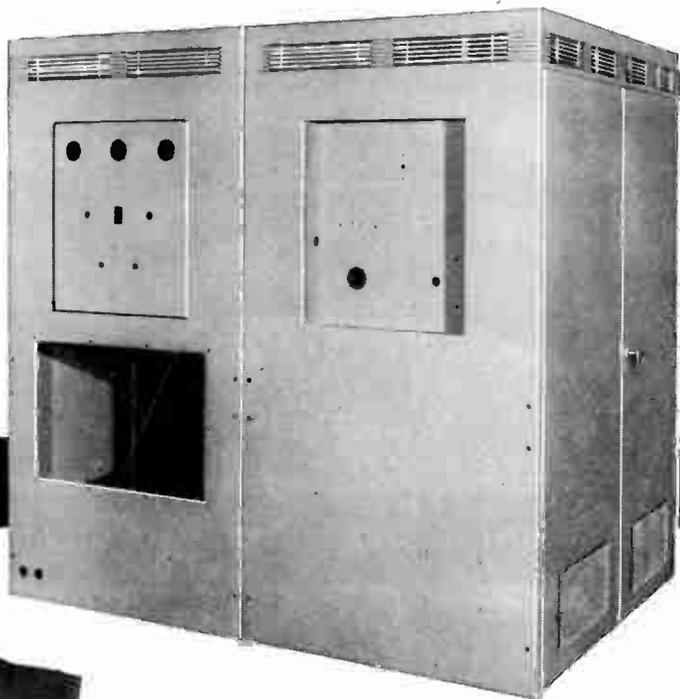

### TYPEWRITER DESK PANELS

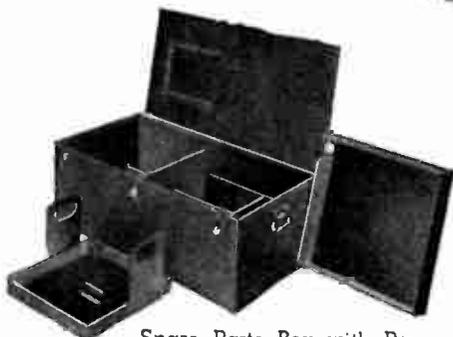

These tables are similar in construction to standard desk type except that a recess 4½" deep is provided for using a standard typewriter. They are securely mounted on regular 1/4" steel panels, 10½"x19", and are 22" wide to give full working space across the front of the rack. Shipping weight is 40 lbs.

Cat. No.	Width	Depth	Finish	Net Price
BY-2220	22"	20"	Black enamel	\$12.90
AY-2220	22"	20"	Grey lacquer	13.80

**KARP** craftsmen, thoroughly skilled and experienced in sheet metal work, individually construct each job to customers' specifications. Complete, modern facilities make possible any manipulation of the material in all stages of manufacture—from the making of the dies, through the fabricating and finishing. Hundreds of stock dies, already on hand, reduce or eliminate the cost of dies. Moreover, **KARP** goes over your plans with you . . . makes recommendations if they are necessary . . . and suggests means of expediting deliveries. Consult a **KARP** engineer or local sales representative when you require highly dependable sheet metal products—whether they be steel, brass, aluminum, monel, stainless steel or an alloy.

## METAL PRODUCTS — ELECTRIC DIVISION

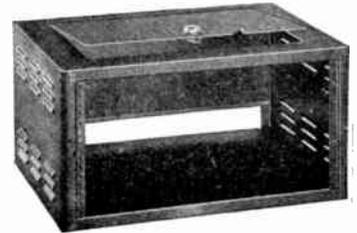

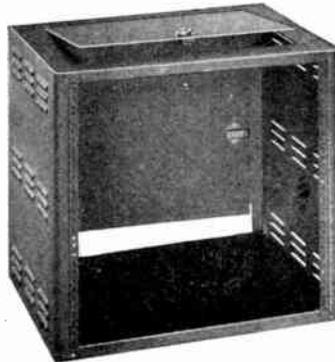

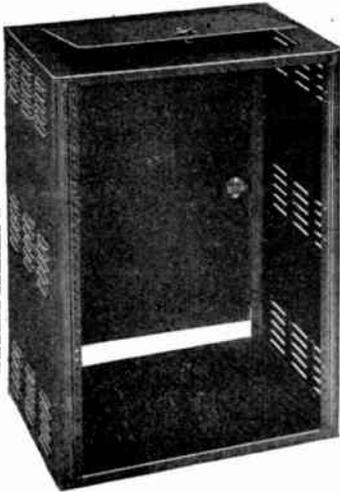

### CABINETS • CHASSIS • CASES • PANELS

#### AMPLIFIER FOUNDATIONS—DeLuxe Models

This unit is designed to meet the most critical requirements. It has rounded corners, special Middletown designed louvres on all 4 sides and elongated holes on top to give maximum ventilation. Chassis are finished in Black wrinkle. Covers are finished in Grey wrinkle. Chassis are drilled for bottom plates which are listed separately. Covers all have a depth of 6".

Cat. No.	Size	List Price
A.F.-5103	5 x 10 x 3"	\$3.00
A.F.-6143	6 x 14 x 3"	3.50
A.F.-7173	7 x 17 x 3"	4.50
A.F.-10123	10 x 12 x 3"	4.75
A.F.-10173	10 x 17 x 3"	5.35
A.F.-13173	13 x 17 x 3"	6.25

#### SLOPING FRONT PANEL CABINETS

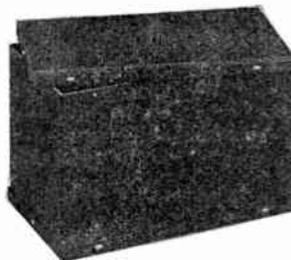

Sloping front panel cabinets have a wide application in the electronic field since they are adaptable for various uses. They are constructed of heavy gauge steel electrically spot-welded. Top corner is rounded, front panel is removable, and louvres on sides provide ventilation.

Back panel is ventilated on top and an opening is provided on the bottom so that connections can be made directly to the rear of the chassis. Finished in Grey wrinkle.

Cat. No.	H.W.D.	Chassis Size	List Price
S.F.-888	8 x 8 x 8"	7 x 7 x 2"	\$3.75
S.F.-8108	8 x 10 x 8"	7 x 9 x 2"	4.00

## DE LUXE STREAMLINED PROFESSIONAL RELAY RACKS

Ideal for housing your Transmitter, P. A. System, or other Electronic Equipment, these large, sturdy cabinets of modern design. Feature rounded vertical front corners and handsome red-stripped, chrome-trim at top and bottom.

Rugged construction, fabricated from 16-gauge ( $\frac{1}{8}$ " cold rolled steel; the panel mounting supports, which are welded to each side of the cabinet, are of  $\frac{1}{2}$ " steel, accurately punched to accommodate either Western Electric or Amateur Notched Panels. The holes are tapped 10-32. Panel mounting supports recessed so that no edges are exposed.

The rear door is hung on loose-joint hinges, and is held securely in place by two snap catches. Door easily removed for repairs. Interlocking Switch Bracket provided with each cabinet.

Shipped "knocked down," with hardware for easy assembly. Available in Black or Grey Crackle finish. When color is not specified, Black will be furnished.

Cabinet can be supplied without louvres on one or both sides at no extra cost. This is a desirable feature when two or more cabinets are to be placed side by side. Standard 19" width panels to be used with these cabinets.

## DE LUXE STREAMLINED PROFESSIONAL CABINET RACKS

Builders of Commercial and Amateur Transmitters, P. A. Systems and other apparatus requiring one or more chassis and panel units will find this series of modernistic Cabinets the most handsome line available.

In keeping with De Luxe Relay Racks the front vertical corners are attractively rounded. Top and bottom are trimmed with red-stripped chrome-finished moldings. Panels fit into a recess so that no edges are exposed. All Cabinets have recessed hinged door on top, provided with a snap catch. The three large sizes have hinged rear doors in addition, making all equipment on shelves readily accessible. Panel mounting holes are accurately drilled and tapped for either Western Electric or

Amateur Standard Notched Panels. The back is terminated two inches above the bottom to give access to various terminals, and to permit switching, keying, and A. C. leads to be brought out. Constructed of 16-gauge ( $\frac{1}{8}$ " thick cold rolled steel, with all joints electrically welded, then smoothly ground. Shipped set up ready for use, in Black or Grey Crackle Enamel finish. Ample ventilation is possible by louvres and opening in back. Panel mounting screws and cup washers for fastening panels to cabinet are furnished.

THESE CABINETS ARE PROVIDED WITH EXTENDED METAL FEET. CAN BE PLACED ON DESK OR TABLE, WITHOUT INJURING FINISH.

Cat. No.	Height	Width	Depth	Panel Space	Ship. Wt.	Your Cost

## STREAMLINED MULTI-PURPOSE CABINETS

For the thousand-and-one uses which are always turning up in the building of Electronic Equipment, or around the Ham Shack, we are presenting these two New Members of the Bud family.

Handsome streamlined metal cabinet finished in Grey Crackle Enamel. Rubber feet are fastened to bottom of cabinet so that sharp edges will not injure finish on desk or table.

Cat. No.	Height	Width	Depth	Ship. Wt.	Your Cost

## ALUMINUM RELAY RACK PANELS

Possessing the advantages of lightness and ease of working, these Aluminum Panels provide strong and rigid support for all types of relay rack-mounting units. They are made of  $\frac{1}{8}$ " thick Aluminum, 19" long, and are available in Black or Grey Crackle Enamel finish, in either Amateur or Western Electric Notching. Black Crackle finish

will be furnished unless Grey finish is specified on order. Panels  $\frac{3}{16}$ " thick may be had, if desired, at a 60% advance over the price of the standard  $\frac{1}{8}$ " panels.

We recommend the stocking of Western Electric Notching, as they will fit all relay racks.

## STEEL RELAY RACK PANELS

Made of high grade steel  $\frac{1}{8}$ " thick, 19" long, and finished in beautiful baked Black or Grey Crackle Enamel, these panels afford rigid support for all types of relay rack units. Available in either Amateur Notching (first notch  $\frac{1}{8}$ " from

edge) or Western Electric Notching (first notch  $\frac{1}{4}$ " or  $\frac{1}{2}$ " from edge). Indicate type wanted by using "A" after catalog number for Amateur or "W" for Western Electric. Black Crackle finish supplied unless Grey is specified.

## MASONITE RELAY RACK PANELS

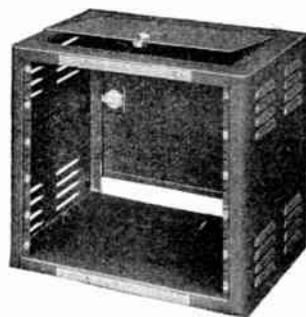

Where light, non-magnetic, insulated panels are desirable, this line, made of Tempered Masonite, may be utilized to good advantage. While strong and tough, these panels are readily worked with ordinary wood-working tools. Panels are  $\frac{1}{2}$ " thick

and 19" long, and are finished in beautiful and durable baked Black or Grey Crackle Enamel. Available ONLY in Amateur Notching. Black finish will be supplied unless Grey is specified.

Relay Racks

Cabinet Racks

Multi-purpose Cabinets

Rack Panels

## PROFESSIONAL RELAY RACKS

Professional appearance will be added to any Transmitter, P. A. System or any Electronic Equipment when housed in one of these excellent Cabinet Relay Racks. Complete protection from damage and dust is provided for equipment.

The enclosed rack is substantially constructed from 16-gauge ( $\frac{1}{8}$ " ) cold rolled steel. Panel mounting supports which are welded to the sides are  $\frac{1}{8}$ " thick, and are accurately punched; holes are tapped 10-32. Holes are spaced to accommodate either Western Electric or Amateur

Standard Notched Panels. The panels fit into a recess, so that the edges are not exposed. The removable rear door is provided with two snap catches. An interlock switch bracket is provided with each cabinet.

These Relay Racks are painted in either Black or Grey Crackle Enamel finish. They are shipped "Knocked Down," supplied with all necessary hardware for assembly. We also supply a sufficient number of 10-32 screws and cup washers for mounting of panels.

## GENERAL CABINET RACKS

For Electronic, Amateur and Commercial applications requiring neat housing at reasonable costs, this unusually fine line of cabinets is recommended. Constructed from 16-gauge ( $\frac{1}{8}$ " ) cold rolled steel, all joints welded, and ground smooth. Cabinets shipped set up and ready for use, available in either Black or Grey Crackle Enamel finish.

Ample ventilation is provided by louvers and opening in back. Hinged rear door with

snap catch is furnished on three larger sizes. All others have solid back welded to sides. Hinged top door with snap catch lock is supplied on all cabinets of this line.

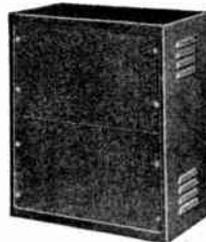

These cabinets are designed so that they will accommodate either Western Electric or Amateur Standard Notched Panels. Screws and cup washers are furnished to fasten panels to cabinets.

## SMALL CABINET RACK

The long-felt need for a small and inexpensive cabinet rack to house low power transmitters and similar apparatus is filled with the introduction of this new addition to the Bud line. This cabinet is constructed to accommodate two panels, one 10 $\frac{1}{2}$ " and one 8 $\frac{3}{8}$ " high and 16 $\frac{1}{2}$ " wide, and will take chassis up to 8 $\frac{3}{8}$ " deep and 15" wide. The rear of the cabinet is covered

by a hinged door with an efficient locking device, and the sides are louvred for ventilation. The entire unit is formed from Black Crackle steel and is furnished complete with panels but less chassis. Chassis Nos. CB-665 and CB-666 listed on Page H90 are intended for use with this cabinet.

Cat. No. RC-1749..... Ship. Wt. 25 lbs..... Your Cost \$9.90

## STANDARD RELAY RACKS

Where a sturdy mounting for a number of panel and chassis units such as in a transmitter, public address system, etc., is desired, allowing complete accessibility to all parts, this line of Relay Racks is indispensable. The one-eighth inch steel channels, three inches deep, are held together by angle cross-pieces of the same material. The base design has been improved to incorporate a chassis-type bottom, together with the usual side angles, making the rack stronger and more stable.

These units are intended to accommodate standard 19-inch panels with either Western Electric or Amateur Notching. Holes are drilled and tapped for 10-32 thread. The finish of these racks is baked Black Crackle Enamel, and they are shipped "knocked down." Assembly is very easy, and all necessary nuts, bolts, and washers are included.

The No. RR-1265 Rack is a professional heavy duty rack for heavier types of commercial installations. Uprights are heavy channel iron, supported by a heavy  $\frac{3}{4}$ " thick angle-iron base. Finish and drilling same as above.

Cat. No.	Overall Size			Panel Size		Ship. Wt.	Your Cost
	H	W	D	H	W		
RR-1263	35 $\frac{1}{2}$ "	20"	22"	31 $\frac{1}{2}$ "	19"	38 lbs.	\$11.61

RR-1265	72 $\frac{1}{2}$ "	20"	15"	66 $\frac{1}{2}$ "	19"	104 lbs.	26.10

## DESK TYPE RELAY RACKS

These small relay racks are perfectly suited for table mounting of low and medium power transmitters, public address systems, and other electronic instruments. Each rack is built around a heavy chassis on which the side uprights mount. This type construction permits the rack to hold great weights. Racks come "knocked down" but are complete with all necessary hardware and are easily assembled. Finish is Black Crackle Enamel. Either Western Electric or Amateur Standard notched panels can be used. Panels set in a recess so that no edges are exposed.

Cat. No.	Overall Size			Panel Size		Ship. Wt.	Your Cost
	H	W	D	H	W		
RR-1248	24"	20 $\frac{3}{8}$ "	12"	21"	19"	15 lbs.	\$4.80
RR-1249	31"	20 $\frac{3}{8}$ "	12"	28"	19"	20 lbs.	6.00

NOTE: H—Denotes Height; D—Depth; L—Length; W—Width.

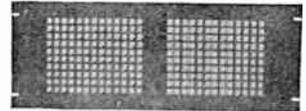

## VENTILATING GRILLE PANELS

Made of  $\frac{1}{8}$ " thick Steel. The Grille is stamped into the panel itself, and is recommended for use where additional ventilation is a factor. We also recommend the use of these panels where it is desirable to watch tubes or other equipment while in operation. These Panels furnished in Black or Grey Crackle finish with Western Electric Notching only. Length of Panels 19".

Cat. No.	H In.	Grille Size Inches	Ship. Wt. lbs.	Your Cost
PS-808	5 $\frac{1}{4}$	3 $\frac{3}{4}$ x 14 $\frac{3}{4}$	8 $\frac{1}{2}$	\$1.95

PS-812	12 $\frac{1}{4}$	*7 $\frac{1}{4}$ x 14 $\frac{3}{4}$	8 $\frac{1}{2}$	2.91

\* Allows 8  $\frac{1}{2}$ " space at bottom for chassis mounting.

Ventilating Grille Panel

## METER PANELS

Both Masonite and Steel Meter Panels are made of same materials as regular rack panels. Each unit is 5  $\frac{1}{4}$ " high, 19" wide, and available in either Black or Grey Crackle finish. Small holes fit all 2" square and round meters, and large holes fit all 3" square and round meters. In ordering metal panels, specify "A" for Amateur or "W" for Western Electric Notching. Masonite Panels available only in Amateur Notching. Black Crackle finish will be supplied unless Grey is specified.

Cat. No.	Holes	Diam. of Holes In.	Type Material	Ship. Wt. lbs.	Your Cost

PS-443	5	2 $\frac{3}{8}$	Steel	4	1.95

Meter Panel

## ENCLOSED METER PANELS

Designed to give maximum protection to meters. The steel panel has a large cut-out, behind which is mounted a blank Masonite sub-panel. This sub-panel has a meter-mounting area of 4  $\frac{1}{2}$ " x 15  $\frac{1}{2}$ " —sufficient space to mount four 3" meters.

The meters are protected by a glass insert which mounts in slides. Due to danger from breakage during shipment, this glass is not supplied with the panel. The glass insert should be

cut 16" long x 4  $\frac{1}{2}$ " wide and may be cut from any stock thickness up to  $\frac{1}{4}$ ". Finish is either Black or Grey Crackle Enamel. Black will be supplied unless Grey is specified. Available in Amateur Notching Only. Size of panel: 19" x 5  $\frac{1}{4}$ ".

Cat. No.	Ship. Wt.	Your Cost
PS-439	4 lbs.	\$3.96

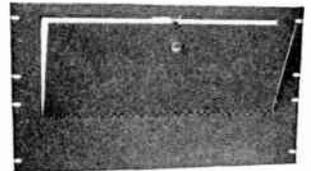

Enclosed Meter Panel

## METAL DOOR RACK PANELS

In many rack panel units it is very desirable to have component parts on the chassis (such as tubes, coils, etc.) accessible from the front of the panel as in this manner, changes can be easily and quickly made. To fill this need, Panel No. 615, with door measuring 15  $\frac{3}{4}$ " x 6" and Panel No. 616, with door 15  $\frac{3}{4}$ " x 7  $\frac{1}{2}$ ", have been introduced. Each door is fitted with a nickel-plated knob and snap catch.

Both the above numbers are available in either Black or Grey Crackle Enamel. Black will be supplied unless Grey is specified. Available in Amateur Notching Only.

Cat. No.	L In.	W In.	Ship. Wt. lbs.	Your Cost
PS-615	19	10 $\frac{1}{2}$	9	\$2.85
PS-616	19	12 $\frac{1}{4}$	10	3.27

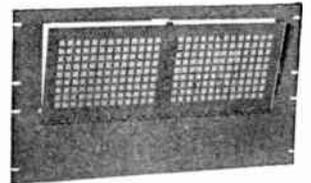

Metal Door Rack Panel

## VENTILATED METAL DOOR RACK PANEL

These panels are identical in construction with the Metal Door Rack Panels described above, plus the added advantage of a generous perforated area in the door, providing adequate ventilation for adjacent units. Ventilated Metal Door Panels are available in Black or Grey Crackle Enamel, in Amateur Notching Only. Black finish will be furnished unless Grey is specified. Length of panels: 19".

Length of panels: 19".

Chassis Mounting Bracket

## CHASSIS MOUNTING BRACKETS

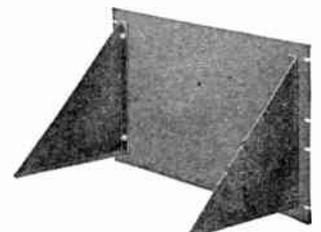

In applications where the panel alone has to support the entire weight of a constructed unit, these Mounting Brackets are very essential to insure proper support of the chassis. Formed of heavy gauge Black Cracked steel. The panel flange is cut away at the bottom to provide chassis clearance and the chassis is mounted flush against the panel.

Cat. No.	H In.	D In.	Clearance In.	Ship. Wt. lbs.	Your Cost

Heavy Duty Chassis Base

Screws and Washers

### RACK SHELVES

Heavy power supplies, modulator units, etc., can be mounted on these rack shelves which are supported in the cabinet by the chassis-supporting angles listed below. They are designed to slide in from the rear of the cabinet. Made of heavy gauge steel and finished in Black Crackle Enamel.

Cat. No.	H	L	D	Ship. Wt.	Your Cost
CB-1976	1"	19"	15"	6 lbs.	\$2.46
CB-1977	1"	19"	12"	5 lbs.	2.13

### CHASSIS SUPPORTING ANGLES

In a relay rack it is frequently desirable to have some support in addition to the panel for an unusually heavy panel-and-chassis unit. To fill this need, these Supporting Brackets may be screwed on the sides of a relay rack cabinet in such a manner that the chassis may slide and rest on them in much the same way as a desk

drawer does. These angles are 12" long and project 3" from each side of the cabinet, affording ample support for a standard 17" width chassis. These brackets are sold in pairs, finished in durable Black Crackle Enamel, and come complete with necessary mounting hardware. Cat. No. SA-1349 Ship. Wt. 4 lbs. Your Cost \$1.08

### INTERSTAGE SHIELDS

These shields find many uses on receiver and transmitter chassis for eliminating interstage coupling and isolating individual circuits. Construction is of 20-gauge steel. Formed angles on front and bottom facilitate mounting on either chassis or panel. Both angles punched with two mounting holes.

Cat. No.	H	D	Ship. Wt.	Your Cost

IS-1247	5 1/2"	10"	1 lb.	.33
IS-1245	6 1/2"	10"	1 lb.	.36

### STEEL CHASSIS BASES

These rugged steel chassis are made from one piece of steel, and all corners are spot-welded. The sides are folded over on the bottom for additional strength, and this also permits bottom

plates to be attached to the chassis if desired. These bases are furnished in either Black Crackle Enamel or Electro-zinc Plated Finish.

### HEAVY DUTY CHASSIS BASES

(FURNISHED WITH BOTTOM PLATES)

The construction of this line of bases is identical with the line of regular Steel Chassis Bases with the exception that they are formed from heavy 1/16" steel and intended for applications requiring unusual sturdiness and where large weights are involved. All sizes are available in either Black Crackle or Electro-zinc Plated Finishes and come complete with bottom plates and mounting screws.

Black Crackle Cat. No.	Zinc Plated Cat. No.	D In.	W In.	H In.	Ship. Wt. lbs.	Your Cost

### SCREWS AND WASHERS—FOR RELAY RACKS

These machine screws are 5/8" long and threaded 10-32. Made from steel with oval head and finished in nickel plate. The cup washers are steel and are nickel plated. Made to fit 10-32 machine screws with either oval or flat heads.

Cat. No.	Description	Ship. Wt. 100	Your Cost
RS-7140	Screw	2 lbs.	\$0.54 per 100
RW-7161	Washer	2 lbs.	.54 per 100

NOTE: H—Denotes Height; D—Depth; L—Length; W—Width.

## REMOVABLE TOP CHASSIS

This new chassis design will be welcomed by amateurs and experimenters who desire to make periodic revisions and changes in their equipment without wasting any more material than is absolutely necessary. These chassis are so constructed that when a parts layout change is desirable, the old top is simply unscrewed and a new top is placed on the old frame. This makes, in effect, an entirely new chassis at less than half the cost of a complete chassis. The removable top feature also greatly simplifies the working of the chassis as all holes, cuts, etc., can be made in the flat top without interference from the sides.

Removable Top Chassis

## OPEN END CHASSIS

Primarily intended to be used with the various sizes and styles of Bud metal cabinets, these light weight chassis are likewise ideal for any type of small built-up unit such as a record amplifier, code oscillator, etc. U-shaped construction is used with ends folded over 3/8" for additional strength. Finish is Electro-zinc Plating.

## CHASSIS DECKS

This line is intended for the Carrying Case and Utility Cabinet series of housings. Each unit is folded over 1 1/2" on the front and 1/2" on the side and made from Zinc Plated steel. These decks are also useful for interstage shielding and supports in regular panel-and-chassis layouts.

## METAL CARRYING CASES

Designed primarily for all types of small portable equipment, this line of Carrying Cases finds many uses in housing transceivers, field strength meters, oscilloscopes, test oscillators, etc. An easy-grip handle is fitted to the top. The removable front and rear panels are fastened to the case by means of 6-32 screws. The steel welded construction assures maximum strength at a minimum weight—very important for portable work. Finish is Black Crackle.

The line of Chassis Decks contains an appropriate size for each of these cabinets.

Metal Carrying Case

## METAL UTILITY CABINETS

The construction of this line of cabinets is identical with the Metal Carrying Cases with the exception that the handle is omitted. The large number of sizes available makes this line useful for all sorts of Electronic Equipment, Monitors, Frequency Meters, etc. A new feature now enables us to tap the flanges to which the panels are fastened, permitting us to use a 6-32 screw instead of the self-tapping screw previously used.

## BOTTOM PLATES

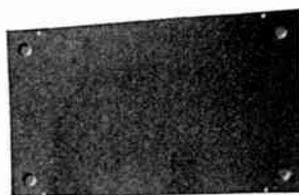

(FIT AMPLIFIER FOUNDATIONS AND STANDARD CHASSIS)

Bud Bottom Plates make excellent dust covers, and protect all wiring and component parts under the chassis. Each plate has four formed bosses which prevent sharp edges from scratching the table top. These covers are especially necessary in

shielding R. F. shelves from audio shelves in rack and panel consorted transmitters. Supplied in Black Crackle or Zinc-plated finishes to match the chassis.

## STREAMLINED SPEAKER CASES

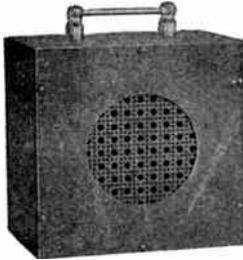

Streamlined Speaker Case

Since many communications receivers are furnished with external and unmounted speakers, this line of speaker housings was introduced to provide an attractive enclosure for such units. In addition, these cabinets are ideally suited for many more types of installations where speakers must be placed in a conspicuous place. Each cabinet has the front vertical corners rounded, and the speaker opening is covered with an artistic metal grille. Two strips of chromium trim are located vertically on each side of the speaker opening, and each case is furnished with a carrying handle which may be re-

moved if desired. These cases are available with either Black or Grey Crackle finish. Black will be supplied unless Grey is specified.

## STREAMLINED CABINETS

De Luxe Streamlined Cabinet

This latest development in housings for receivers, electronic instruments, etc., is this new line of metal cabinets. Their distinctive features are the rounded front vertical corners and the recessed hinged tops. These two factors make a unit built in one of these cabinets very modern in appearance. All parts are completely accessible. The panel of each cabinet is removable and fits flush with the rounded corners. The rear of the cabinet is stopped 2" above the bottom, allowing all necessary leads to the chassis to be readily brought out without drilling the cabinet itself. Both sides are louvred

for ventilation, and the bottom of each cabinet has four embossed feet. These cabinets are furnished in Black Crackle Enamel finish. Suitable Chassis may be found under the listing of Open End Chassis on Page H-91.

Cat. No.	W Panel In.	W In.	Ship. Wt. lbs.	Your Cost
C-1747	12	14 1/2	8 1/2	3.15
C-1748	14	16 1/2	9 1/2	3.60

## DE LUXE STREAMLINED CABINETS

These cabinets are identical with those listed above, except that they have a 1/2" vertical chrome strip at each side of the panel, and are supplied in Grey Crackle Enamel only.

Cat. No.	W Panel In.	W In.	Ship. Wt. lbs.	Your Cost
C-1782	12	14 1/2	8 1/2	3.99
C-1783	14	16 1/2	9 1/2	4.35

## STREAMLINED AMPLIFIER FOUNDATIONS

Streamlined Amplifier Foundation

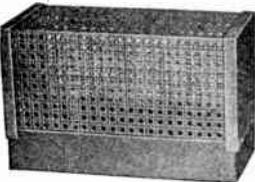

The genuine beauty of these new Amplifier Foundations can be appreciated only after they have been seen. Intended to house public address amplifiers, speech amplifiers, and similar apparatus, these units present a handsome appearance heretofore not available for such apparatus.

Standard finish for this series is either Black or Grey Crackle Enamel. Black will be supplied unless Grey is specified.

BOTTOM PLATES TO FIT THESE FOUNDATIONS CAN BE FOUND ON PAGE H-91.

Cat. No.	W In.	D In.	Ship. Wt. lbs.	Your Cost

CA-1752	17 1/4	7	10	4.20
CA-1753	17 1/4	10	11	4.80

## AMPLIFIER FOUNDATIONS

Amplifier Foundation

Almost all types of speech and amplifier equipment are readily adapted to this very neat line of ventilated housings. Each unit consists of a regular chassis on which is attached the shield cover. This shield cover has cane design sides and top and solid ends, assuring strong construction and, at the same time, adequate protection and ventilation. Material used is cold rolled steel, Black Cracked, and all joints are spot welded.

Cat. No.	H In.	W In.	D In.	H Chass. In.	Ship. Wt. lbs.	Your Cost

CA-1128	8 3/4	12 1/8	10 1/8	3	8	2.91

## SLOPING PANEL AMPLIFIER FOUNDATIONS

Sloping Panel Amplifier Foundation

These foundations add a real "Commercial" appearance to any amplifier. The 4" sloping front on the amplifier chassis provides adequate space and easy visibility for controls and indicators.

enhanced by the two-tone finish. The cover is finished in Grey Crackle Enamel and the chassis is finished in Black Crackle Enamel. Bottom plates to fit these foundations are listed on Page H-91.

Each foundation consists of a sloping front chassis on which is mounted a removable top cover. The top horizontal corners of this cover are rounded and the sides and ends are louvred. The top contains gridded cutouts for adequate ventilation. This cover is attractively finished with red striped chromium rim. Chromium handles are placed on both ends of the chassis. All chassis are 3 1/2" high and all units are 9 1/2" over-all height.

NOTE: H—Denotes Height; D—Depth; L—Length; W—Width.

## SLOPING PANEL CABINETS

Excellent for housing frequency meters, modulation indicators, field strength meters, laboratory or test equipment, and desk control units. The entire front panel is removable so that a chassis can be attached to the lower part of the panel. The chassis, with panel attached, can be slid into the cabinet from the front. The rear panel is adequately punched for ventilation and has an opening at the bottom in order to allow connections to be made directly to the rear of the chassis. All cabinets are finished in Black Crackle Enamel.

The chassis to fit these cabinets are illustrated on pages H-90 and H-91 and are sold separately.

Cat. No.	H In.	W In.	D In.	Fits Chassis In.	Shp. Wt. lbs.	Your Cost

Sloping Panel Cabinet

## INSTRUMENT AND RECEIVER CABINETS

Recent revisions and improvements in the entire line of BUD cabinets have made this series of housings the finest available in both appearance and utility. Each cabinet has an evenly recessed hinged cover with convenient finger lift, and the panel on the front of each cabinet is readily attached with self-tapping screws. Ample louvres are provided on each side for ventilation and all corners are reinforced and spot welded to assure ruggedness. Four embossed feet on bottom of each unit prevent scratching of table, etc., and all cabinets are finished in durable Black Crackle Enamel. Prices include panel but do NOT include chassis.

A suitable chassis for each cabinet will be found in the listing of Open End Chassis on page H-91.

Instrument and Receiver Cabinet

## STREAMLINED UTILITY CABINETS

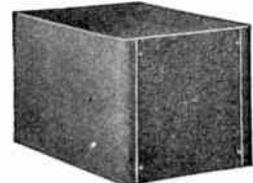

Featuring ease of assembly and attractive appearance, these Streamlined Utility Cabinets are adaptable to a variety of applications. The bottom of the cabinet is removable, allowing easy access to the under-chassis wiring without removing the chassis from the cabinet.

All cabinets are supplied complete with chassis. The chassis is designed to occupy the entire width of the cabinet, even though the front vertical corners of the cabinet are rounded. Finish on the cabinet is Black Crackle Enamel. The chassis is Electro-zinc plated.

On Type "A," only the back panel and bottom plate are removable. Sides are NOT louvred.

On Type "B," both the front and back panels and bottom plate are removable.

## GIANT TRANSMITTER CONDENSERS

### SINGLE SECTION

Modern design, plus precision production methods, makes BUD GIANT TRANSMITTER CONDENSERS the deliberate choice of critical engineers for use in such applications as broadcast transmitters, high-power trans-oceanic communications equipment, and many other types of highly specialized electronic devices.

BUD GIANT TRANSMITTER CONDENSERS are built into a stiff, sturdy frame consisting of  $\frac{1}{8}$ " thick aluminum end plates tied together by  $\frac{1}{8}$ " diameter duraluminum rods. Formed brackets at top and bottom of end plates provide the means for mounting these units, and permit the placing of associated inductances directly on the condenser.

Rotor and stator plates are accurately stamped from 0.064" thick highly polished aluminum with all edges rounded to minimize corona loss and danger of peak-voltage flash-over. The plates are separated by accurately machined duraluminum spacers which insure a constant air-gap throughout the entire length of the condenser.

The large two-finger rotor-contact spring, made from silver plated brass, assures positive contact with noise-free operation. Steatite bars insulate the stator, and are placed well outside

the electrostatic field to keep dielectric losses at a minimum.

BUD GIANT TRANSMITTER CONDENSERS are made in a variety of capacities, with plate spacings for various voltages. See table following. Other technical data will be found in drawings in margin of this page.

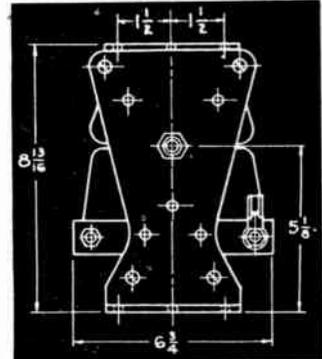

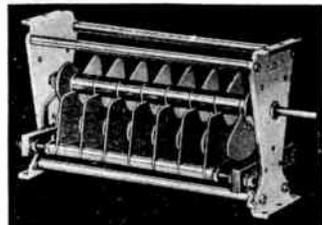

### DUAL SECTION

These GIANT DUAL-SECTION TRANSMITTER CONDENSERS are, in every detail, identical in quality with the GIANT SINGLE-SECTION TUNING CONDENSERS described above, and have the same general constructional features.

The tie-rods in the frame of these split-stator units are insulated from the end-plates, eliminating the possibility of closed loops in the frame.

The rotor-contact consists of four fingers made from silver plated spring brass, placed in the center of the rotor assembly under heavy spring tension. This construction reduces series resistance and improves the efficiency of the unit at the higher frequencies.

When these dual condensers are used in regular split-stator circuits, the capacity is reduced to one-half the listed value; the voltage ratings, however, are doubled.

NOTE: We are equipped to make up these condensers in special capacities and spacings other than those listed above, on order.

## MASTER TRANSMITTING CONDENSERS

### SINGLE SECTION

Each condenser is built in a rigid and sturdy frame consisting of two end-plates which are made from highly polished  $\frac{1}{8}$ " thick aluminum and which are tied together with four  $\frac{1}{8}$ " diameter tie-rods. The end-plates have formed angles on top and bottom to facilitate mounting and to enable the associated inductance to be attached directly to the condenser itself.

The rotors and stators are assembled with plates made from 0.051" thick aluminum on which the edges have been rounded and highly polished. These plates are separated by accurately machined spacers. Large surface cone bearings assure proper alignment and smooth running of rotor with correct tension. Laminated, silver plated phosphor bronze wiper springs are placed at each end of the condenser bracket to assure positive rotor contact and noise-free operation. The stator assembly is insulated from the unit by large Steatite bars which are placed outside the electro-static field. Rotor shaft is  $\frac{1}{4}$ " diameter.

two sections at the center of the rotor. These features eliminate the majority of difficulties encountered in ultra-high frequency equipment due to parasitics, circulating currents, neutralization trouble, and permits perfect circuit balance.

### DUAL SECTION

This series offers the last word in variable air capacitors for high and ultra-high frequency applications. While the general style and construction is identical with the single Master units, all tie-rods in this series are insulated by glazed Steatite pillars, thus completely eliminating all closed metallic loops in the condenser frame. A special outstanding feature, developed by BUD engineers, is that of placing the positive double wiping silver plated rotor contact between the

### BUD JUNIOR SINGLE SECTION CONDENSERS

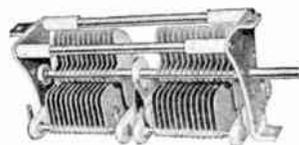

Construction of these condensers features BUD electro-soldered plate assemblies, assuring correct plate spacing, overall rigidity, and light weight. Losses are reduced to absolute minimum by this method of assembly. End-plates of the rigidly constructed frame have formed angles on top and bottom for mounting the condenser in any position, allowing associated inductance to be mounted on the condenser frame.

The edges of the brass rotor and stator plates are rounded and the assemblies are finished in cad-

mium plating. Steatite insulation is used throughout. Large surface front sleeve bearing, and ball and cup rear bearings, provide consistently smooth operation. A two-finger silver plated, spring brass pressure contact wiper assures noise-free and positive rotor contact at all times.

The low minimum capacities of these units make them especially suitable for multi-band applications where a high maximum-to-minimum capacity is desirable.

Panel space for mounting, only 2 3/4" x 2 7/8".

### BUD JUNIOR DUAL SECTION CONDENSERS

Rotor contact is made by a four-finger silver plated pressure spring placed at the center of the rotor shaft between the two sections, thereby providing perfect balance, and improving the high frequency characteristics. The tie-rods are insulated at both ends with Steatite insulators

to prevent the development of inductive loops in condenser frame. All other constructional features and materials are the same as used on Junior single section condenser.

### BUD MIDGET CONDENSERS

With high mechanical and electrical efficiency, small size, and sturdy construction, Bud Midgets have become the most popular of all small tuning units.

Their field of application is almost unlimited, for example, by Amateurs and Experimenters, in Laboratory and Research Projects, and in the products of the Electronic Industries.

In high-frequency and ultra-high-frequency receivers, low-power transmitters, wave meters, monitors, and many other electronic devices, the small size makes them ideal.

Modern design accounts for their high mechanical and electrical efficiency, embodying such noteworthy features as the following: Steatite insulation; long, accurately fitted bearings which eliminate side motion; spring cup washers, large surface silver plated beryllium copper wiper contacts, which insure smooth, noise-free operation; Cadmium-plated electro-soldered brass rotor and stator plate assemblies, which ensure perfect plate spacing, and minimize series resistance; rigid construction, which reduces to a minimum any possibility of vibration.

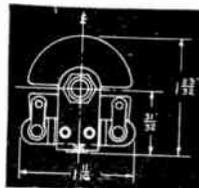

### BUD DOUBLE BEARING MIDGET CONDENSERS

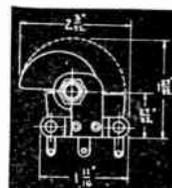

This complete group of double bearing capacitors embodies all the high-grade characteristics of the Bud Midget Line.

Bud Double Bearing Midget Condensers may be had in either the mid-line type plates (straight line

wave length) or semi-circular plates (straight line capacity). They can be single hole panel mounted or chassis mounted. The double and triple spaced units are ideally suited for use in exciter and low-power transmitter applications.

## SINGLE BEARING MIDGET CONDENSERS

The difference in design of these units, in that they have a single front bearing, marks the only variation from the double-bearing units in the Midget line. They are identical in every other respect—workmanship, materials, and finish—with all the other Midget Condensers.

Accuracy in machining the single front bearing, and the application of rigid standards in all steps of production, assure the continuous satisfactory performance of Bud Single Bearing Midgets in any electronic application.

These small capacitors are especially desirable where economy and space are factors. They may be had in either Mid-Line or Semi-Circular type plates.

## MIDGET TRIMMER CONDENSERS

This condenser is primarily intended for antenna coupling, interstage coupling, and tracking applications. Maximum capacity is 36 mmfd. and minimum is 2 mmfd. Base of trimmer is made of ceramic.

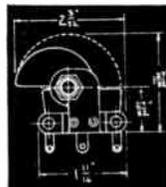

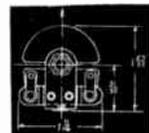

Catalog Number MT-833—Shipping weight 10—2 lbs. Your Cost \$0.15

## DOUBLE GANG MIDGET CONDENSERS

Where space is at a premium and split-stator capacitors are called for by circuit layout, Bud Double Gang Midgets are desirable.

Plate construction and finish, workmanship and materials, are identical with other Midget Condensers. Panel mounting and chassis mounting are provided for in the design of the Double Gang Midgets. They are built in either Mid-Line or Semi-Circular type plates.

### MIDGET CONDENSERS—Triple Section

These mid-line plate type, three-gang condensers fill the need for a tuning unit suitable for short wave super-heterodyne receivers having an R. F. stage, gang-tuned exciters, and numerous other applications.

These condensers are mounted on a glazed ceramic base, offering perfect rigidity. General construction is the same as for other types of Midget Condensers. A shield plate is provided between each stator section. Base or panel mounting may be used.

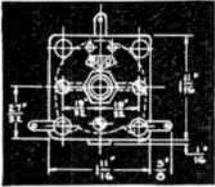

### "CE" MIDGET CONDENSERS—DOUBLE BEARING

These Midget condensers were designed to meet the rigid requirements in design of efficient ultra-high frequency, electronic devices and precision laboratory equipment.

Brass rotor and stator plate stacks are assembled into permanent units by means of electro-soldering, which assures long life and accurate plate spacing. End-plates of solid Steatite, insulate the mounting bushings and angles from the rotor and stator assemblies. A large front sleeve and rear ball thrust bearing provide for smooth rotation. Silver plated wiper contact provides noise-free tuning. All other metal parts are corrosion-resisting cadmium plated. Rotor plates are semi-circular shaped. Provision for either panel or base mounting.

### "CE" TYPE SINGLE BEARING MIDGET CONDENSER

A rotor locking nut, provided especially, adapts these single bearing condensers to portable and mobile service. A screw-driver slot in rotor provides means of adjustment. Either insulated panel mounting or bracket mounting is incorporated. General construction is same as "CE" double bearing condensers.

### "CE" TYPE DUAL MIDGET CONDENSERS

These well constructed dual condensers are similar in design to the double bearing types. They feature a rotor wiping contact placed at center of the rotor assembly to assure maximum efficiency at ultra-high frequency. Having opposed rotors assures perfect counter-balance and provides even torque at any position of rotation. Steatite insulation eliminates any possibility of closed induction loop in frame.

### BUD TINY MITE PADDERS

For applications requiring a constant padder capacity under all temperature and humidity conditions, these units are ideal. They lend themselves readily to I. F. transformer applications, fixed tuned circuits for exciters, ganged condenser air trimmer, and plug-in-coil padding as they fit inside of standard 1 $\frac{1}{2}$ " diameter coil forms. Rotor and stator assemblies are made up of brass plates (.0015" thick) and rods electrically soldered into a solid unit and then are bright cadmium plated. Insulation is Steatite.

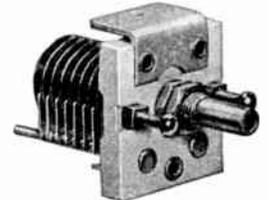

Cat. No.	Max. Cap. MMFD	Min. Cap. MMFD	Air Gap	No. of Plates	Overall Lgth.	Your Cost

### BUD TINY MITE TUNING CONDENSERS—Single Section

This series of condensers has been designed for applications where space or weight are limiting factors, and for tuning of ultra-high frequency circuits. Rigid construction, close fitting bearing, positive rotor contact, and Steatite insulation are the outstanding features. Cadmium plated soldered brass plates and rods insure high frequency efficiency.

Each unit may be mounted in any of three ways without additional hardware, namely (1) single hole panel mount, (2) insulated panel mount, and, (3) insulated base mount.\*

Cat. No.	Max. Cap. MMFD	Min. Cap. MMFD	Air Gap	No. of Plates	Depth Behind Panel	Your Cost

## UNIVERSAL NEUTRALIZING AND HIGH FREQUENCY TUNING CONDENSERS

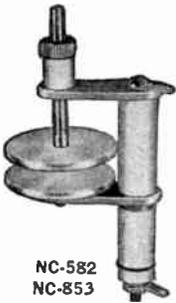

This line of condensers will fill every neutralizing and high frequency tuning requirement that modern circuits impose. Their advanced construction enables these condensers to be mounted either vertically or horizontally. The two-pillar construction makes this unit unusually sturdy and eliminates any possibility of capacity variation due to vibration. The removable plate is adjusted by means of the threaded shaft to which it is attached, and it is permanently locked in any position by the

lock-nut provided. Any loose thread is taken up by a special nut and locked to give smooth operation. All metal parts are of aluminum. Plates have a spun finish and perfectly rounded edges. Having  $\frac{1}{4}$ -32 thread turning stud, each turn of the screw will advance plate  $\frac{1}{2}$  of an inch. Steatite insulation is used. For capacity air gap relations see graph below. For dimensions see drawing and table.

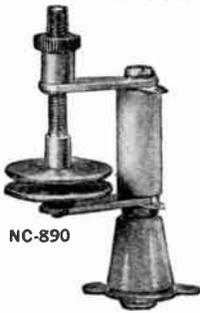

Cat. No.	Plate Dia. Dimension			For Tube Types	Ship. Wt.	Your Cost
	Dim. W	X	L			
NC-1000	1 $\frac{3}{4}$ "	1 $\frac{1}{8}$ "	3 $\frac{1}{2}$ "	35T, TZ 40, HY-40, etc.	2 lbs.	\$2.10

NC-1002	4 $\frac{3}{4}$ "	2 $\frac{1}{2}$ "	6 $\frac{1}{4}$ "	211, 203 T-814, etc.	3 lbs.	4.20

## FEED-THROUGH AND BASE MOUNTED NEUTRALIZING CONDENSERS

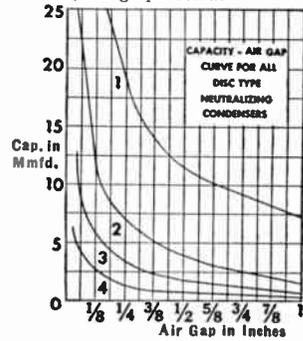

NC-582  
NC-853

NC-890

Feed-through neutralizing condensers are particularly suited in circuits utilizing tubes with the grid lead terminating in the base. One hole is required for mounting of feed-through condensers. The threaded brass rod holding the condenser in place also brings the connection to the bottom plate through the chassis, thus shortening and simplifying wiring. Plates are made of aluminum with spun finish rounded at edges to cut down losses. After proper tuning is attained, movable plate is locked by a knurled nut provided.

No. 890 and No. 852 are ideal neutralizers for popular low-powered beam tubes. No. 890 condenser is base mounted only. For capacity air gap relations, see graph below.

## BUD STAT-AIR CONDENSERS

It is difficult to design a radio-frequency amplifier to cover any large frequency range and maintain a proper L/C ratio due to variable condenser limitations. By paralleling the proper Stat-Air condenser in this series with the tuning condenser, this difficulty is easily overcome.

The finish of these electro-soldered brass plate assemblies is cadmium plating, and Steatite insulation is used. They are furnished in either Junior or Senior types.

## BUD COMPACT NEUTRALIZING CONDENSERS

In applications where space is the prime factor, these units are ideal for neutralizing and high frequency tuning. Low loss steatite is used for dielectric. Mounting of these condensers features either one hole mounting or fastening to solder lugs provided. All brass parts are nickel plated. A knurled locknut permits locking of movable plate.

### 50 WATT OSCILLATOR AND BUFFER COILS

The ceramic mounting base keeps the coil a safe distance from the chassis when the coil socket is mounted on the chassis. It also permits easy coil removal without disturbing the winding. All coils are air-wound with enameled copper wire and mount in 5-prong tube sockets. All 160 meter coils are fitted with end reinforcements to lend additional support to the windings.

OEL Coils have fixed end link and are NOT center tapped. OCL Coils have fixed center link with main winding center tapped. OLS Coils have adjustable center link with main winding center tapped.

\*Denotes total capacity required to tune to resonance at the low frequency end of the band.

### AIR-WOUND TRANSMITTER COILS

The power ratings of these coils indicate the maximum input power allowable to the stage in which they are to be used. The "Air-wound" construction of all these coils, together with the enameled copper windings and Steatite mounting bars, make all three series unusually efficient. Coils are self-supporting but are rigidly held in place by fire-resistant locking strips. All units have a fixed link at the center and are center tapped.

### ADJUSTABLE LINK TRANSMITTER COILS

Since one of the most effective means of varying the loading of an R. F. Stage is by the use of a variable link to the plate tank, these three lines of inductances have this feature incorporated in them. In each series the link winding is connected to the jack bar into which the coils are plugged. The one link may thus be used with any of the coils. This link winding is of the helical type and is so arranged that it may be readily controlled from the panel by means of an extension shaft if required.

All coils in this series are of the "Air-wound" type, making them very efficient. Windings are made of enameled copper wire, and the mounting and plug bars are made of Steatite to ensure a minimum of loss. Windings are held firmly and positively in place by fire-resistant locking strips to ensure constant inductance. The links couple to the coils at the center and all inductances are center tapped.

### ANTENNA MATCHING NETWORK COILS

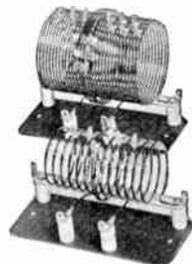

The low frequency coil in each rating is designed for operation from 160 meters to 40 meters, and the high frequency coil in each rating is designed for operation from 20 to 10 meters.

All coils and links have a sufficient number of taps

provided to allow both the inductance and the coupling to be varied over a wide range.

The coils are supported on Steatite insulators, which are mounted on a Black Cracked base. This base is provided with two holes for convenience in mounting.

Cat. No.	Height	Range in Meters	Mtg. Hole Dim.	Length Base	Overall Width	Overall Height	Your Cost
ACV-1	500 W	160-40	6 1/2"	7 1/2"	5 1/4"	5 3/4"	\$3.75

### ADJUSTABLE LINKED ANTENNA COILS

When the final amplifier plate coil has a fixed link, it is desirable to use adjustable linked coils in the antenna matching network. These coils are made in 500 watt

and 1 kw. ratings. Two sizes of inductances are made in both ratings. Mounting hardware and complete instructions are included with each coil.

Cat. No.	Rating	Range	Coil Length	Mtg. Hole	Base Length	Height Link	1/2 Width Coil	Swing	Your Cost

### 100 WATT BAND SWITCH ASSEMBLY

Three types of 10 to 160 meter band switch assemblies are made in this 100 Watt series. XCS-1 and XCS-2 are for operation on 10, 20, 40, 80 and 160 meters. XCS-16 is for operation only on 10 and 160 meters.

XCS-1 and XCS-16 are designed for use in push-pull plate or grid circuits, or single-ended plate circuits where plate neutralization is used. The coils in this assembly are center-tapped and center-linked. Either a single section

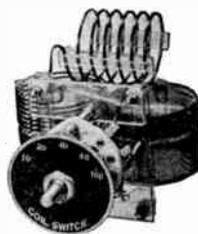

100 mmfd. condenser (such as BUD No. JC-1534) or a dual section 200 mmfd. condenser (such as BUD No. JC-1569) is required to tune all bands. The No. JC-1569 condenser is especially recommended for plate circuit applications in order to obtain the highest possible efficiency on the high frequency bands.

XCS-2 is designed for use in single-ended pentode plate circuits and single-ended grid circuits. The coils in this assembly are end-linked. A 100 mmfd. condenser (such as BUD No. JC-1534) is required to tune all bands.

Each assembly is supplied with complete installation instructions. A five position dial plate, marked "10 to 160" meters, is supplied with XCS-1 and XCS-2 for convenience in identifying the coil positions. XCS-16, being a two position assembly, is supplied with two small name-plates marked "10 Meters" and "160 Meters." Shipping weight, each coil, 3 lbs.

Cat. No.	Width	Height	Depth	Your Cost
XCS-1	8"	4 1/4"	5"	\$6.60
XCS-2	8"	4 1/4"	5"	6.00
XCS-16	7"	4"	4"	4.20

### 50 WATT BAND SWITCH ASSEMBLY

Four types of 10 to 160 meter band switch assemblies are made in this oscillator and buffer series. They are all designed for use in stages where the input power does not exceed 50 watts. OCS-1, OCS-2, and OCS-3 are for operation on 10, 20, 40, 80, and 160 meters. OCS-16 is for operation only on 10 and 160 meters.

OCS-1 and OCS-16 are designed for use in pentode oscillator and buffer stages that are capacity coupled to the following stage.

OCS-2 is designed for use in single-ended pentode oscillator and buffer stages that are link coupled to the following stage. It can also be used in a single-ended grid circuit that is link coupled to the preceding stage. The coils in this assembly are end-linked.

OCS-3 is designed for use in push-pull plate or grid circuits, or single-ended plate circuits where plate neutralization is used. The coils in this assembly are center-tapped and center-linked.

Each assembly is supplied with complete installation instructions. A five position dial plate, marked "10 to 160 Meters," is supplied with OCS-1, OCS-2, and OCS-3 for convenience in identifying the coil positions. OCS-16, being a two position assembly, is supplied with two small nameplates marked "10 Meters" and "160 Meters." A 100 mmfd. condenser (such as BUD No. MC-905 or JC-1526) is required to tune all bands. Where the OCS-3 is used in plate circuit applications, it is preferable to use a dual 200 mmfd. per section condenser (such as BUD No. JC-1569). Shipping weight of each coil, 3 lbs.

Cat. No.	Width	Height	Depth	Your Cost
OCS-1	3 3/4"	3 3/4"	3 1/2"	\$3.60
OCS-2	7"	5"	4 1/2"	4.95
OCS-3	6 1/2"	4 3/4"	4 1/2"	6.00
OCS-16	3 3/4"	3 3/4"	3 1/2"	2.40

### JUNIOR COIL-KITS

These coils are wound on 1 1/4" ribbed bakelite coil forms and are intended for uses as follows:

Nos. CK-354, CK-365, CK-357, and CK-358 are used in tickler type regenerative detectors with antenna coupled through a trimmer and also in R. F. and Pre-selector stages.

Nos. CK-356, CK-366, CK-359 and CK-360 are used in tickler type regenerative detectors where antenna coupling is accomplished through the additional winding provided.

Cat. No.	No. Coils	Prongs	No. Windings	Wave Range	Your Cost
CK-354	4	4	2	11-210	\$1.32
CK-365	1	4	2	7-17	.60
CK-357	1	4	2	185-360	.60
CK-358	1	4	2	350-565	.60
CK-356	4	6	3	11-210	1.92
CK-366	1	6	3	7-17	.69
CK-359	1	6	3	185-360	.69
CK-360	1	6	3	350-565	.69

### PLUG-IN COIL FORMS

Three sizes are available in these Plug-in Coil Forms to suit all usual requirements.

The material used is a special natural color bakelite having a very low loss factor. Eight ribs are molded on the walls of each form to hold the winding away from the form itself and give the coil higher efficiency. Each form has a molded flange at the top to aid in removing the coil from its socket, and the pins fit standard tube sockets.

All 1 1/2" forms have a shoulder on the inside suitable for mounting a regular Tiny Mite Padder condenser in the coil.

Cat. No.	Prongs	Diameter	Winding Space	Hgt.	Your Cost
CF-734	4	2 1/4"	3 1/4"	3 1/2"	\$0.45
CF-735	5	2 1/4"	3 1/4"	3 1/2"	.48
CF-736	6	2 1/4"	3 1/4"	3 1/2"	.48
CF-125	4	1 1/2"	2 1/2"	2 1/2"	.27
CF-126	5	1 1/2"	2 1/2"	2 1/2"	.27
CF-310	6	1 1/2"	2 1/2"	2 1/2"	.30
CF-594	4	1 1/2"	2 1/2"	2 1/2"	.21
CF-595	5	1 1/2"	2 1/2"	2 1/2"	.24
CF-596	6	1 1/2"	2 1/2"	2 1/2"	.24

### SENIOR COIL KITS

All coils in these kits are primarily intended for use in the various types of autodyne and T. R. F. sets being built by home constructors. All coils are wound on regular Senior ribbed bakelite coil forms 1 1/2" diameter and are carefully designed for the greatest possible efficiency. These inductances are wound to cover their specified tuning range with a 140 mmfd. tuning condenser, and identification discs on top of each unit show wave band covered.

Nos. CK-222, CK-223, CK-224, and CK-361 are used in tickler type regenerative detectors with antenna coupled through a trimmer condenser. This series may also be used in R. F. and preselector stages.

No. CK-916 is intended to be used in regenerative detectors utilizing a tapped grid coil in an electron-coupled circuit.

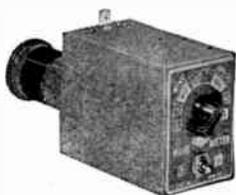

No. CK-917 is identical to CK-916 with the exception that four additional matched coils are included to be used in an R. F. stage preceding the detector.

Nos. CK-362, CK-918, CK-960 and CK-961 are used in tickler type regenerative detectors where antenna coupling is accomplished through the additional winding provided.

Cat. No.	No. Coils	Prongs	No. Windings	Wave Range	Your Cost
CK-222	4	4	2	16-200	\$1.80
CK-916	4	5	2*	16-200	2.19
CK-918	4	6	3	16-200	2.31
CK-917	{ 4 R.F. 4 Det.	4	2	16-200	3.96
CK-361	1	4	2	7-17	.66
CK-224	1	4	2	185-360	.60
CK-223	1	4	2	350-565	.60
CK-362	1	6	3	7-17	.84
CK-960	1	6	3	185-360	.72
CK-961	1	6	3	350-565	.72

\* Denotes tapped secondary winding for use in Electron-coupled circuits.

### WAVE METER

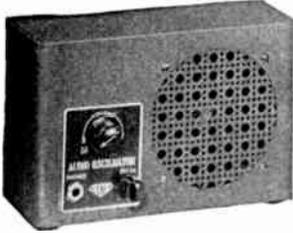

The most necessary device utilized in conjunction with the proper adjustment and operation of an amateur transmitter is a Wave Meter. To fill the need for a unit of this type, accurately calibrated for the amateur bands, this unit has been introduced. With this device, the wave length on which each stage in the transmitter is tuned may be easily and quickly determined, and it is, therefore, particularly useful in checking to see that frequency multiplier stages are operating on the proper harmonics and also to see that the various R. F. amplifier stages are amplifying at the proper wave-length.

Since the BUD Wave Meter will detect quite weak

R. F. fields when its inductance is closely coupled to the tank inductance of the circuit in question, it is also useful as a neutralizing indicator, and in addition, it may be used to indicate the position of standing waves on feeder and antenna systems.

The case is finished in Grey Crackle Enamel. The attractive etched name-plate enables the various amateur bands from 10 to 160 meters to be easily identified, when bandswitching is employed, thereby eliminating the need for plug-in coils. The unit comes completely wired and calibrated, together with indicator bulb.

Cat. No. WM-77—Ship. wt. 4 lbs....Your Cost \$5.25

### CODE PRACTICE OSCILLATOR

This audio oscillator has a built-in magnetic speaker. Operates up to twenty earphones. Speaker is automatically cut out of the circuit when earphones are inserted. Ten phones may be connected in parallel. More than ten earphones, connect in series-parallel.

A volume control and a pitch control are provided. Any number of keys may be connected in parallel for group practice. Operates on 110 volts, A.C. or D.C.

Size 7 1/8" x 4 1/2" x 3 3/4".

Cat. No. CPO-124—Sh. wt. 6 lbs. Your Cost \$9.00

### CODE PRACTICE OSCILLATOR Dynamic Speaker Model

For either individual or group code practice. Readily heard above the ordinary room noises. Mounted on the front panel are the power switch, key jack, and audio pitch selector switch. A choice of two audio tones is available.

Provision to plug in an additional key and speaker when using the oscillator for two-way code practice. This speaker (BUD CPS-121) may be plugged in without the use of an output transformer. Wired complete with built-in dynamic speaker and tube. Operates on 110 volts A.C. or D.C. Size: 6" x 4 1/4" x 3 1/2".

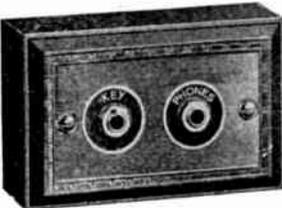

Cat. No. CPO-120—Ship. wt. 6 lbs. Your Cost \$8.75

### CODE PRACTICE OSCILLATOR—Earphone Model Operates 20 Pairs of Earphones

Will operate one to twenty earphones or one to five small magnetic speakers (BUD CPS-123). A volume control and a pitch control are provided. Any number of keys may be connected in parallel for group practice. Housed in a compact metal case. Finished in Grey Crackle Enamel. Operates on 110 volts A.C. or D.C. Size: 4 1/2" x 3 3/4" x 3 3/4".

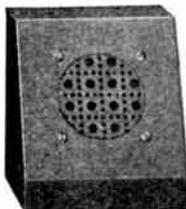

Cat. No. CPO-122—Ship. wt. 4 lbs. Your Cost \$7.75

### KEY AND PHONES OUTLET BOX

Convenient means of terminating Key and Earphone connections in group or classroom practice. Can be placed at each operator's position and wired to the master oscillator. Keys and Earphones terminating in phone plugs can then be plugged into the outlet box. Box made of bakelite. 4 1/2" x 1 1/2" x 2 1/2".

Cat. No. CPO-127—Ship. wt. 10 pieces, 4 lbs. Your Cost \$1.08

### ADDITIONAL MOUNTED SPEAKERS

No. CPS-121 is a 2" permanent-magnet type dynamic speaker and is intended for use with CPO-120. No. CPS-123 is a 3" magnetic speaker intended for use with either CPO-122 or CPO-124. Several speakers can be connected in parallel and used with these oscillators.

The speakers are plugged into the "Phones" jack on both latter units. The speakers are housed in a sloping panel, Grey Crackle metal cabinet. Size 4 1/4" x 4" x 4". Weight 3 1/2 lbs.

Cat. No.	Type	Your Cost
CPS-121	Dynamic	\$2.60
CPS-123	Magnetic	3.00

### WIRELESS PHONOGRAPH OSCILLATOR

Any standard record player easily converted to wireless operation. Record reproduction is then possible through a regular radio receiver without the necessity of cumbersome interconnecting wires. Easily installed. Instructions furnished.

Faithful reproduction. Unit wired and tested, includes tube. Black Crackle Enamel. Operates from 115 volts A.C. or D.C. Frequency range, approx. 1100 to 2150 K.C. 4 1/2" x 2 1/2" x 2 1/8".

Cat. No. WO-6—Ship. wt. 5 lbs. Your Cost \$6.00

### 5 METER INTERRUPTER COIL

An interrupter coil for use in the low frequency oscillator in 5 meter superregenerative circuits. Lattice wound on a ceramic form. Shipping weight, 4 oz. Size, 1 1/4" x 1 1/8".

Cat. No. CH-452—Your Cost \$0.81

### PIE-WOUND R.F. CHOKES With Strap Leads

For radio receivers and transmitters. No. CH-876 is a heavy duty choke for transmitter plate circuits. 1 1/2" x 3/8".

Cat. No.	Induct. in M.H.	D.C. Resist.	Cap.	Your Cost
CH-920S	2.5	45 ohms	125 ma	\$0.30
CH-922S	5.5	60 ohms	125 ma	.39
CH-923S	8.0	72 ohms	100 ma	.48
CH-924S	10.0	78 ohms	100 ma	.54
CH-876S	2.5	16 ohms	250 ma	.54

### PIE-WOUND R.F. CHOKES With Wire Leads

Same Specifications as Above

CH-920W	2.5	45 ohms	125 ma	\$0.27
CH-922W	5.5	60 ohms	125 ma	.36
CH-923W	8.0	72 ohms	100 ma	.45
CH-924W	10.0	78 ohms	100 ma	.51
CH-876W	2.5	16 ohms	250 ma	.51

### ULTRA HIGH FREQUENCY R.F. CHOKES

For ultra high frequency receivers and transmitters. Consists of a ceramic rod with a single layer winding. Suitable for use on 2 1/2 or 5 meters. The CH-570 is sometimes used as a filament choke in certain types of ultra high frequency oscillator and amplifier circuits. CH-570 is supplied with a mounting foot.

Cat. No.	Induct. uh.	Cur. rent ma.	Resist- ohms	L in.	Diam. in.	Ship. Wt. oz.	Your Cost
CH-925	5.7	750	1.4	1 1/2	3/8	3 oz.	\$.18
CH-570	15	1700	0.2	2 3/4	1/2	1/2 lb.	.72

### LATTICE WOUND R.F. CHOKES

Wound with silk-covered enameled copper wire on ceramic bobbin. Readily mounted with a 6-32 screw through the center. Thoroughly impregnated against moisture. Overall diam. 1 1/4", approx. ht. 3/4".

Cat. No.	Ind. M.H.	D.C. Resist. Ohms	Current	Your Cost

CH-1220	80.	332	80	.60

### IRON CORE R.F. CHOKES

Circuit improves by use of these chokes. The improved "Q" results from the D.C. resistance being from 40 to 50% less for a given inductance than for regular air-core types. D.C. voltage drop through the choke is considerably less, yet the choking action is equally as good. Mounted in square shield cans 1 3/8" x 1 3/8" x 1 1/4".

Cat. No.	Ind. M.H.	D.C. Resist. Ohms	Current M.A.	Your Cost

CH-1287	125.	221.	90	1.29
CH-294	Shield Can Only			.18

### TRANSMITTING CHOKES

Heavy duty R.F. Chokes for high-power transmitter plate circuits. Ceramic coating prevents moisture absorption. Withstands momentary overloads without collapsing the individual pies. Intended to be used on 10, 20, 40, 80, and 160 meter bands. Design prevents any of the pies from being resonant, keeps distributed capacity at a minimum. Wt. 1/2 lb. Ht. 3 1/4".

Cat. No.	Induct. MH	Cap. MA	Resist. Ohms	Diam. in.	Your Cost
CH-568	2.2	1000	5	1 1/4	\$1.17
CH-569	4.3	600	12	1 1/2	.99

### CONE STAND-OFF INSULATORS

All applications requiring insulated mountings and supports are readily accommodated by these various types and sizes of ceramic insulators. Each unit is made from high grade glazed porcelain having good mechanical strength. Nos. 1-300 to 1-303 are tapped at each end and are supplied with necessary hardware. Nos. 1-304 to 1-306 are supplied with No. PJ-949 Banana Plug Jack and accommodate standard banana and GR plugs.

#### REGULAR CONE INSULATORS

Cat. No.	H	Top Dia.	Base Dia.	Thread	Approx. Shp. Wt.-25	Your Cost
1-300	5/8"	1 1/4"	3/4"	6-32	3 lbs.	\$0.09
1-301	1"	1 1/2"	3/4"	8-32	4 lbs.	.12
1-302	1 1/2"	2"	1"	10-32	5 lbs.	.17
1-303	2"	2 1/2"	1 1/4"	10-32	6 lbs.	.24

#### JACK TYPE CONE INSULATORS

Cat. No.	H	Top Dia.	Base Dia.	Thread	Approx. Shp. Wt.-25	Your Cost
1-304	1"	1 1/2"	3/4"	8-32	3 1/2 lbs.	\$0.18
1-305	1 1/2"	2"	1"	10-32	5 1/2 lbs.	.21
1-306	2"	2 1/2"	1 1/4"	10-32	6 1/2 lbs.	.30

### CONE FEED-THROUGH INSULATORS

In bringing high voltage and R. F. leads through panels and chassis, and for numerous other uses, this line of two-piece insulators will be found indispensable. Made of the same ceramic material as the Stand-Off Insulators.

Nos. 1-435 to 1-438 are supplied with threaded rod and necessary hardware, while Nos. 1-453 to 1-455 are supplied with No. 1J-949 jack top attached to appropriate threaded rod.

#### REGULAR CONE FEED-THROUGH INSULATORS

Cat. No.	Top Height	Bottom Height	Mounting Hole Dia.	Approx. Shp. Wt.-25	Your Cost
1-435	5/8"	1 1/4"	1 1/8"	3 1/2 lbs.	\$0.12
1-436	1"	1 1/2"	1 1/8"	4 1/2 lbs.	.18
1-437	1 1/2"	2"	1 1/8"	5 1/2 lbs.	.21
1-438	2"	2 1/2"	1 1/8"	6 1/2 lbs.	.39

#### JACK TYPE CONE FEED-THROUGH INSULATORS

Cat. No.	Top Height	Bottom Height	Mounting Hole Dia.	Approx. Shp. Wt.-25	Your Cost
1-453	1"	1 1/2"	1 1/8"	4 lbs.	\$0.21
1-454	1 1/2"	2"	1 1/8"	5 1/2 lbs.	.24
1-455	2"	2 1/2"	1 1/8"	6 1/2 lbs.	.42

### PILLAR INSULATORS

The need for a firm support for high voltage leads such as those going to plates of rectifier tubes or large transmitting tubes is adequately filled by these two numbers.

Each unit consists of a heavy lug on top of a glazed Steatite rod 1/2" in diameter, with a convenient foot for mounting purposes. Fittings are nickel plated.

Cat. No.	Length	Approx. Shp. Wt.-25	Your Cost
1-738	1 3/8"	3 1/2 lbs.	\$0.18
1-739	2"	5 1/2 lbs.	.24

### NEW TYPE FEED-THRU INSULATOR BUSHINGS

New type Bud feed-thru insulator bushing made from LUCITE, in two sizes to simplify insulation problems when high voltage wires are fed through chassis or panels. If wires are insulated, it is not necessary to remove insulation as the center holes are large enough to pass it. If larger size hole is required, material supplied with nut for mounting on material up to 1/8" thick.

Cat. No.	Description	Your Cost
1-456	Diameter 1/2" with 1/8" wire hole	\$0.09
1-457	Diameter 3/4" with 1/8" wire hole	.12

### CERAMIC RODS

These convenient sizes are available in glazed Steatite. Both ends of all rods are tapped for standard machine screws, to simplify mounting condensers, coils, and similar components.

Cat. No.	Length	Diam.	Tapped	Approx. Shp. Wt.-25	Your Cost
1-7569	2 3/8"	3/8"	8-32	3 1/2 lbs.	\$0.36
1-7568	1 3/4"	3/8"	8-32	3 lbs.	.30
1-7507	1"	3/8"	6-32	2 1/2 lbs.	.13
1-6715	1"	3/8"	6-32	3 lbs.	.13
1-6716	2 1/2"	3/8"	6-32	3 1/2 lbs.	.24
1-7758	1 3/4"	3/8"	10-32	3 lbs.	.36

### CERAMIC STAND-OFF INSULATORS

Apparatus requiring a rugged insulated mounting can be readily accommodated by one or more numbers in this series of white glazed insulators. All metal parts are nickel plated brass and the jack type insulators are designed for standard banana and GR plugs.

Cat. No.	Type	Descrip.	Base Size	H	Std. Pkg.	Ap. Sh. Wt.	Your Cost
1-234	Beehive	Stand-off	2 1/8" dia.	2 1/8"	10	3 lbs.	\$0.17
1-933	Beehive	Jack-Type	2 1/8" dia.	2 1/8"	10	3 lbs.	.20
1-974	Senior	Stand-off	1" x 1 1/2"	1 3/8"	20	3 lbs.	.09
1-932	Senior	Jack Type	1" x 1 1/2"	1 3/8"	20	3 lbs.	.13
1-930	Junior	Stand-off	3/4" x 1 1/4"	1 1/2"	25	3 lbs.	.08
1-931	Midget	Stand-off	1/2" x 3/8"	1 1/8"	50	3 1/2 lbs.	.07

### LUCITE INSULATORS

Here is a new series of feeder spreaders, stand-off insulators, and feed-through insulators designed for applications that demand the finest type of insulation. They are made of DuPont Lucite, a new plastic that has extremely low losses at radio frequencies. It is water-clear, and all outside surfaces are highly polished.

In addition to their remarkable electrical properties, these insulators will greatly add to the finished appearance of any piece of equipment in which they are used.

### LUCITE FEEDER SPREADERS

Designed for all average feeder requirements. A 600 ohm line can be made with any size wire from No. 12 to No. 18 by using one of the spreaders listed below. The spreader used for this application depends on the wire size. Further data on this subject is available in any antenna handbook. These spreaders are furnished with locking screws to clamp the wire in place. All spreaders are 3/8" in diameter, and are drilled for No. 12 wire.

Cat. No.	Wire Spacing	Standard Package	Approx. Shp. Wt.	Your Cost
1-1900	2"	25	3 1/2 lbs.	\$0.18
1-1901	4"	25	4 lbs.	.21
1-1902	5"	25	4 1/2 lbs.	.24
1-1903	6"	25	5 lbs.	.27

### LUCITE STAND-OFF INSULATORS

The Lucite pillar-type stand-off insulators listed below are made in a convenient number of sizes to fit a variety of applications. They are intended for chassis mounting in a single mounting hole. The 1/2" diameter insulators are supplied with 6-32 mounting screws. The 3/4" diameter insulators are supplied with 10-32 mounting screws.

Cat. No.	H	Dia.	Std. Pkg.	App. Shp. Wt.	Your Cost
1-1904	1 1/4"	1/2"	25	8 lbs.	\$0.18
1-1890	2"	1/2"	25	8 1/2 lbs.	.24
1-1905	2 3/4"	1/2"	25	8 1/2 lbs.	.27
1-1899	1 1/4"	3/4"	25	8 1/2 lbs.	.30
1-1906	2 1/4"	3/4"	25	8 1/2 lbs.	.36
1-1907	4 1/4"	3/4"	25	4 lbs.	.51
1-1908	6 1/4"	3/4"	25	5 lbs.	.72

### LUCITE FEED-THROUGH INSULATORS

These Lucite feed-through insulators are made in two diameters, and five convenient heights. They are ideal for bringing high-frequency leads through a chassis or shield and are superior to ceramic insulators for this purpose. The 1/2" diameter insulators are furnished with 6-32 hardware. The 3/4" diameter insulators are furnished with 10-32 hardware.

Cat. No.	Rod Dia.	Bot. Hgt.	Top Hgt.	Mtg. Hole	Std. Pkg.	Ap. Sh. Wt.	Your Cost
1-1909	1/2"	1/4"	1 1/4"	3/8"	25	3 lbs.	\$0.18

# Selector Switches

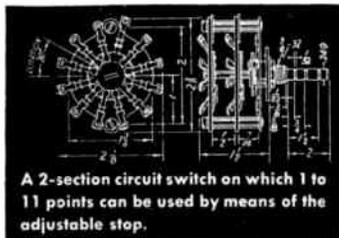

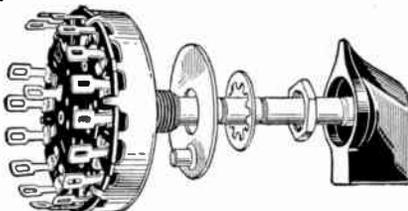

## MULTI-GANG CIRCUIT SELECTOR AND ALL-WAVE SWITCHES

### Types 1200L Series and 1300L Series

## SINGLE-GANG CIRCUIT SELECTOR SWITCHES

### Types 3100J Series and 3200J Series

A 2-section circuit switch on which 1 to 11 points can be used by means of the adjustable stop.

• All contacting members of Mallory Circuit Selector Switches are heavily silver-plated with a hard finish that will withstand the wear throughout the life of the apparatus in which the switch is used. The high lift of the contact springs gives a wiping and self-cleaning contact.

The new adjustable stop feature provides for additional combinations in each switch and makes it possible to use a single switch for many different specifications. Provided with  $\frac{3}{8}$ " diameter,  $\frac{3}{4}$ " long brass bushing and 2" long shaft, grooved for easy cutting at popular lengths.

Three and four-gang switches have one-inch spacing between sections, all others one-half inch. If necessary, these switches can be disassembled, the spacers cut down to meet the requirements as to length of the switch and the spacing of the sections.

(Prices include Mallory No. 366 Knob, one No. 232 Nut and one No. 227 Lockwasher, but do not include Dial Plates. See page L-50 for special Dial Plates.)

No. of Circuits per Section or Gang	Total No. of Circuits per Switch	No. of Points or Contacts per Section	No. of Sections or Gangs per Switch	Shorting Type Catalog No.	Non-Shorting Type Cat. No.	List Price

2	12	6	6	1266L	1366L	6.75

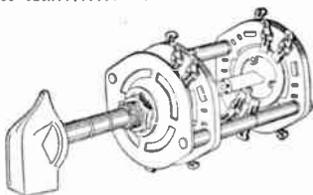

\*These switches are provided with an "off" position which is in addition to the number of positions listed in third column.

### UNIVERSAL MOUNTING BRACKET RB254

• For baseboard or rear support mounting of all Mallory circuit selector switches, volume controls and jacks. Universal Mounting Bracket No. 113254 packed five to the carton. List price each.....\$0.25

### HAMBAND SWITCHES—Series 160C

For transmitter band switching.  
• Hamband Switches are rated for use in transmitter plate circuits using up to 1000 Volts DC with power up to 100 watts inclusive.

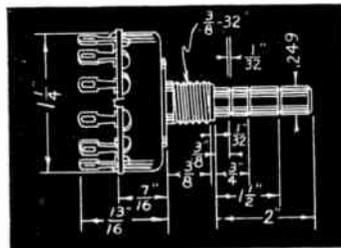

Impregnated magnesium silicate ceramic provides low losses at high frequencies. No stops; switch shaft is capable of continuous rotation, 90° indexing. Technical data sheet, Form Y-646 available on request. Prices include 2" grooved shaft,  $\frac{3}{8}$ " bushing and one each 366 Knob, No. 232 Nut and No. 227 Lockwasher.

Dial Plate for above, numbered 1 to 4.  
No. 488. List price.....\$0.20

4	4	1"	4	164C	5.90
5	5	1"	4	165C	7.35

• For receiver band switching, tone control and tap switch applications. Available only in single gang and in two sizes—one with  $1\frac{1}{2}$ -inch diameter base, the other with  $1\frac{1}{4}$ -inch diameter base. The circuit combinations shown below indicate respective sizes. They are made in both shorting and non-shorting types. Adjustable stop features is available only in the  $1\frac{1}{4}$ -inch base size. Switches are equipped with universal shaft, 2 inches long and grooved to provide easy cutting at popular lengths.

(Prices include one Mallory No. 366 Knob, one No. 232 Nut, and one No. 227 Lockwasher, but no Dial Plate. See page L-50 for special Dial Plates.) Adjustable stop available only on  $1\frac{1}{4}$ " dia. base.

\*Replaces No. 2742. †Replaces No. 2762 by using adjustable stop. ‡Replaces No. 150J by using adjustable stop.

### CIRCUIT OPENING SWITCH No. 1400L

• Mallory No. 1400L Switch will "open" any one of twelve "lines" for the insertion of a current reading meter and maintains a "through" circuit on the other eleven lines.

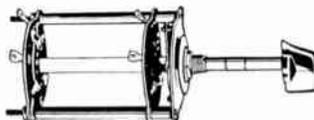

Special Circuit Opening Switch complete with Mallory Bar Type Knob No. 366, one No. 232 Nut, one No. 227 Lockwasher, and Mallory Etched Dial Plate No. 382.

No. 1400L. List price.....\$5.40

### "HAMSWITCH" No. 151L

• Provides a method of using a single meter to measure currents or voltages up to and including five circuits of an Amateur Switcher.

Two-gang construction with  $2\frac{1}{2}$ " spacing between sections, permitting multiplying resistors to be soldered directly to switch terminals. Has 2-inch grooved shaft,  $\frac{3}{8}$ " bushing, one each No. 366 Knob, No. 232 Nut and No. 227 Lockwasher.

"Hamswitch" No. 151L. List price \$2.20. Dial Plate for above, numbered 1 to 5, with markings spaced 60°. No. 487. List price \$0.20.

### "HAMSWITCH" No. 152L

• A two-gang unit, carrying two circuits through six positions, similar to 1326L, but with 330° shorting shoes which automatically connect together and short all unused terminals. Supplied with  $\frac{3}{8}$ " bushing, 2" grooved shaft, one each No. 366 Knob, No. 232 Nut, and No. 227 Lockwasher.

"Hamswitch" No. 152L. List price.....\$2.70

### 24-POINT TAP SWITCH No. 13124L

• A special single circuit, 24-point non-shorting switch with  $\frac{3}{8}$ " bushing and 2" grooved shaft, particularly useful in test equipment applications. No stone-switch is capable of continuous rotation.

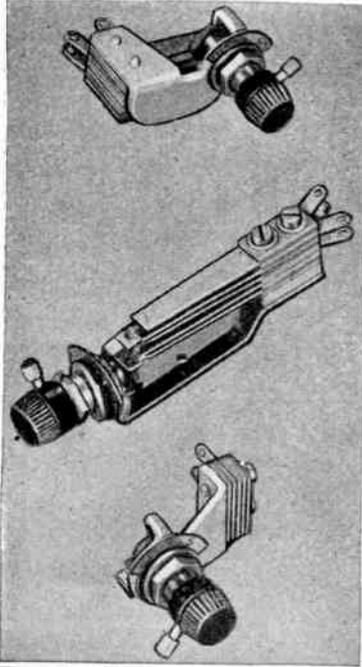

Complete with Mallory Bar Type Knob No. 366, one No. 232 Nut, one No. 227 Lockwasher, and Mallory Dial Plate No. 394.  
No. 13124L. List price.....\$3.20

# Jack and Slide Switches Push-Button Switches

## STANDARD AND JUNIOR JACK SWITCHES

(Made under Patent No. 1,443,604)

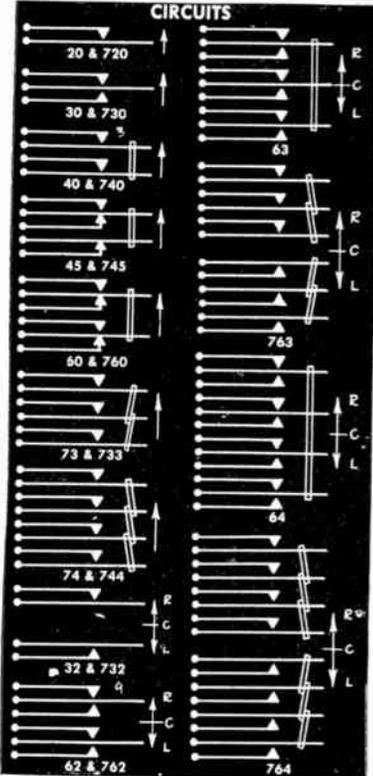

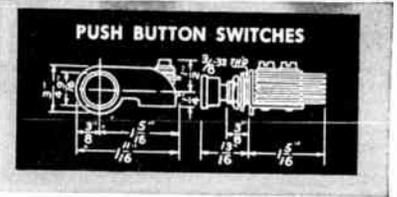

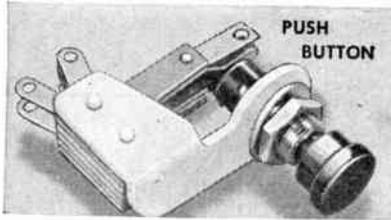

Circuit Arrangement	Two Position

● Mallory Jack Switches and Junior Jack Switches are furnished complete with Black Knob, Pointer, and one each No. 232 Nut and No. 226 Washer. Two-position switches only are furnished with "Off-On" name plate. Mount in a single hole,  $\frac{1}{8}$ " diameter, on panels up to  $\frac{1}{4}$ " thick.

### MIDGET JACK SWITCHES

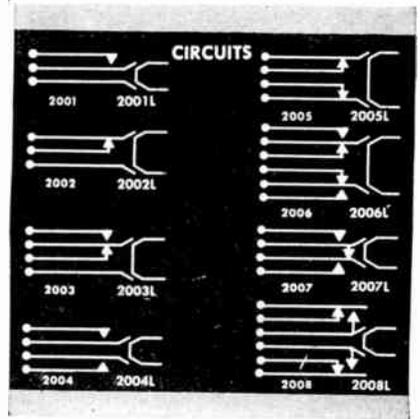

● Same general construction as the Junior types but require less space. Furnished complete with one each No. 255 Nut, No. 226 Washer, Black Knob Pointer and "Off-On" name plate. Mount in single hole  $\frac{1}{8}$ " diameter on panels up to  $\frac{1}{4}$ " thick. List Price  
 Single-Pole, Single-Throw—No. 10 ... \$0.60  
 Single-Pole, Double-Throw—No. 11 ... .87

### PUSH BUTTON SWITCHES (Single)

● Especially adapted for use in laboratories, test panels, motor circuits and where permanent or momentary contact is desired.

The non-locking switch operates only when the button is pushed in and releases on removal of the pressure. The locking type maintains its position when the button is pushed in and is released when button is pulled out.

Furnished with polished black Bakelite Knob, one each No. 232 Nut, No. 226 Washer and Set Screw. Mounts in single hole  $\frac{1}{8}$ " diameter on panels up to  $\frac{1}{4}$ " thick.

No. SC-1A Phone Jack—Equivalent of Signal Corps Jack No. JK-34A. Same spring arrangement as No. 1 Long Frame Jack (see above). Designed to receive following plugs: Mallory No. 75, Western Electric Nos. 47A and 47B, Signal Corps Nos. PL-47, PL-48, PL-55, PL-148, PL-153. List Price ..... \$0.50

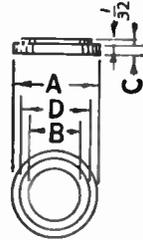

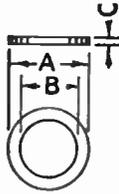

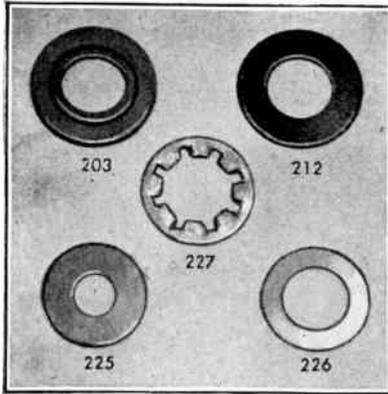

No. SCA-2B Microphone Jack—Equivalent of Signal Corps Jack No. JK-33A. Same spring arrangement as No. 2B Long Frame Jack (see above). Designed to receive following plugs: Western Electric No. 109 and Signal Corps Nos. PL-46, PL-68 and PL-168. List Price ..... \$0.60

The two springs in the microphone jacks are located 120° apart, assuring definite pressure and positive electrical contact between the ground sleeve and bushing.

# Utah

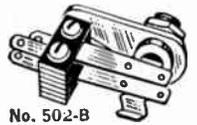

# — CARTER PARTS

No. 103

## LONG AND SHORT JACKS

### SHORT JACKS

No. 502-B

Utah-Carter short jacks are small and compact, but do a full sized job. Depth behind panel is cut down by placing the tempered nickel-silver springs parallel to the panel. High quality sheet bakelite and tubular ebonite insulators are used throughout: No paper or fibre used in Utah-Carter jacks. Supplied with nickel-plated hex, mounting nut and nickel-plated washer.

### LONG JACKS

The original long jacks adapted from telephone switchboard jacks. Long rugged phosphor-bronze springs parallel to the plug axis give precise action. These jacks take minimum panel mounting space, less than the short jacks. Supplied with nickel-plated hex, shoulder mounting nut and nickel-plated washer.

Short and long jacks mount in single  $\frac{3}{16}$ " hole in panels up to  $\frac{1}{8}$ " thick. Fit of the plug in the jack is not affected by the thickness of the panel. Fit all standard plugs in two-and three-conductor types. Strong bright cadmium plated steel frame. All contacts between springs are fine silver, giving minimum contact resistance.

### For 2-Conductor Plugs, with Tip and Sleeve Only

Circuits	Stock Nos.	Contact Arrangement	Long Jacks			Short Jacks

# CARTER PARTS

## IMP PUSHBUTTON SWITCHES

IS-30 Series

These switches are similar in general construction to the widely popular Utah-Carter Imp Short Jacks. Finest nickel-silver springs with integral contacts. High grade phenolic insulation. Body, nuts and washers bright nickel plated. Red or black Kolonite I-piece shaft and button. Springs fully insulated from the mounting bushing and shaft. Made in three circuit arrangements:

IS-10 Series: "Make" contact, single circuit normally open.

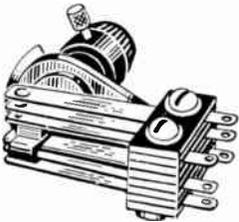

IS-20 Series: "Break" contact, single circuit normally closed.

IS-30 Series: "Break-Make" contacts, single circuit, double-throw.

Description:—One-piece combined shaft and push-button. Mount in  $\frac{3}{8}$ " hole in panel up to  $\frac{7}{32}$ " thick. Supplied with one nickel-plated hex nut and washer.

Circuit	Contact Arrangement	Red Pushbutton Stock No.	Black Pushbutton Stock No.	List Price	Net Price
	"Single Make"	IS-11	IS-13	\$0.75	\$0.45
	"Single Break"	IS-21	IS-23	\$0.75	\$0.45
	One "Break-Make"	IS-31	IS-33	\$0.75	\$0.45

## UTAH-CARTER ROTARY LONG AND SHORT JACK SWITCHES

Rotary Two and Three Position—Long and Short Types.

### SHORT JACK SWITCHES

Similar in design to Utah-Carter short jacks, these switches are small and compact.

### LONG JACK SWITCHES

Similar in design to Utah-Carter long jacks, these are full-size switches, but take less panel space than the short jack switches.

All rotary jack switches supplied with knob and pointer screw, one nickel-plated hex. mounting nut and nickel-plated washer. Fit  $\frac{3}{8}$ " hole in panels up to  $\frac{1}{4}$ " thick. All electrical parts fully insulated from frame.

## TWO-CONDUCTOR PLUGS

Tip and sleeve circuits; fit standard 2-conductor jacks. New types now stocked for wide range of uses. For headphones, microphones, speakers, musical instruments, medical and test equipment, many others.

Molded Bakelite Handles: Now stocked in both red and black as listed. Metal Shield Handles: Bright nickel-plated, with internal 2-layer high-quality tubular insulators, preventing short-circuits in handle.

## TU-WAY PHONE PLUGS

A general-purpose type popular for years. Terminals flat with grooves for one or two phone tips, terminals or wires. Broad-headed knurled hindering screws with screw driver slots. Handles  $\frac{1}{4}$ " diameter,  $2\frac{1}{8}$ " long.

	LIST	NET
No. 4—Black bakelite handle...	\$0.60	\$0.36
No. 13—Red bakelite handle....	.60	.36
No. 7—Shield handle .....	.90	.54

## ONE-WAY PLUGS

Spring-grip terminals for one pair phone tips. No set screws Stay-cord anchor. Handles  $\frac{1}{4}$ " diameter,  $1\frac{1}{2}$ " long.

	LIST	NET
No. 3—Black bakelite handle..	\$0.70	\$0.42
No. 19—Red bakelite handle....	.70	.42

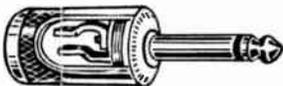

## No. 2 FLAT PLUG

Molded black bakelite body  $\frac{1}{4}$ " thick,  $1\frac{1}{8}$ " diameter. Ideal for panel or wall-plate. Phone tips gripped by set-screws. Stay-cord anchor.

	LIST	NET
No. 2 Flat Plug.....	\$0.85	\$0.51

## No. 16 SHIELDED PLUG

For plain or shielded cords. Broad flat tinned soldering terminals. Shield handle  $\frac{1}{4}$ " diameter, 1" long.

	LIST	NET
No. 16 Shielded Plug .....	\$0.85	\$0.51

## No. 17 SHIELDED PLUG

Designed for cords with center conductor and braided return-conductor shield. Perfect anchoring; sleeve terminal bends to clamp shield braid after soldering in  $\frac{3}{8}$ " hole. Shield handle  $\frac{1}{4}$ " diameter, 1" long.

	LIST	NET
No. 17—Shielded Plug .....	\$0.85	\$0.51

## No. 18 SHIELDED PLUG

Insulation  $\frac{1}{4}$ " wide between tip and sleeve. Used with 3-conductor jack, other 2-conductor plugs short "ring" spring to sleeve; this plug leaves it open, for circuit switching. Also fits 2-conductor jacks. Shield handle  $\frac{1}{4}$ " diameter, 1" long.

	LIST	NET
No. 18 Shielded Plug.....	\$0.90	\$0.54

## THREE-CONDUCTOR PLUGS

Tip, ring, and sleeve circuits; fit standard 3-conductor jacks. For 2-button microphones, or circuits of 3 wires or 2 wires and separate shield. Bakelite handles  $\frac{1}{4}$ " diameter,  $1\frac{1}{2}$ " long. Shield handles  $\frac{1}{4}$ " diameter, 1" long, tubular insulator prevents short circuits.

	LIST	NET
No. 6—Black bakelite handle..	\$0.85	\$0.51
No. 23—Red bakelite handle....	.85	.51
No. 9—Shield handle .....	1.10	.66

## IMP SHORT JACKS

No. 1—Open Circuit Jack

No. 2-A—Closed Circuit Jack

No. 2-B—Microphone Jack

Utah-Carter Imp Short Jacks are popular because they combine compact size, highest quality and economical price. Unique, patented design makes them the smallest jack fitting standard plugs. . . . The new No. 2-B Microphone Imp Short Jack now gives these same desirable features in a 3-conductor jack, having tip, ring and sleeve circuits. . . . These jacks all have finest grade bakelite insulators, tempered nickel-silver springs, and bright nickel-plated threaded brass bushing. . . . Mount in single  $\frac{3}{8}$ " hole in panels up to  $\frac{1}{8}$ " thick without insulating washers, or  $\frac{1}{8}$ " with insulating washers. . . . Supplied with one  $\frac{1}{8}$ " hexagonal nickel-plated mounting nut and washer, one flat and one swedged washer for  $\frac{1}{8}$ " panel hole.

	LIST	NET
No. 1—Open Circuit Imp Short Jack—Has tip and sleeve circuits only. Electrical equivalent of Nos. 101 and 501.....	\$0.30	\$0.18
No. 2-A—Closed Circuit Imp Short Jack—Similar to No. 1, with an additional spring making contact with tip spring until plug is inserted. Electrical equivalent of Nos. 102-A and 502-A.....	.35	.21
No. 2-B—Microphone Imp Short Jack—A new 3-conductor jack, having tip, ring and sleeve circuits. Fits standard 3-circuit microphone plugs. Electrical equivalent of Nos. 102-B and 502-B.....	.45	.27

## DUAL TIP JACKS

Utah-Carter Dual Tip Jacks are rugged simple units designed to receive two standard phone tips. It is these jacks which have been so widely used by large radio manufacturers to provide phone-television sound connections to today's radio, or to provide earphone connection on the popular portable radios.

Dimensions: Length  $2\frac{1}{8}$ " overall; Width  $\frac{5}{8}$ "; Depth  $\frac{1}{4}$ " overall; Mounting Centers  $1\frac{1}{4}$ ". Three circuit arrangements are available and are carried in stock.

Stock No.	Circuit Arrangement	List	Net
TU-11	Open circuit type; simple receptacles only.	\$0.25	\$0.15
TU-21	Automatic Shunt. (Receptacles normally short-circuited to each other; short circuit removed when tip inserted in receptacle A, by means of small fibre lifter.)	\$0.35	\$0.21
TU-31	Closed Circuit Type. Similar to TU-21 but automatic shunt spring is permanently insulated from receptacle B, making it similar to No. 2A Jack switching action.	\$0.40	\$0.24

No. TU-21

## PORTABLE JACKS

Used on end of extension cord. Fit 2-conductor plugs. Screw terminals take one pair phone tips, terminals or wires. Handles  $\frac{1}{4}$ " diameter,  $2\frac{1}{8}$ " long. Shield handles have tubular insulator to prevent short circuits.

	LIST	NET
No. 12—Black bakelite handle..	\$0.60	\$0.36
No. 25—Red Bakelite handle....	.60	.36
No. 8—Shield handle .....	1.10	.66

## IMP TAP SWITCH

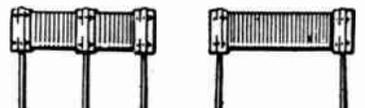

Positive snap action — strong wiping contact grounded to shaft and bushing. In operation contact breaks between makes.

Bushing length  $\frac{3}{8}$ ". Shaft  $\frac{1}{8}$ " from end of bushing.

# Acro Snap SWITCHES

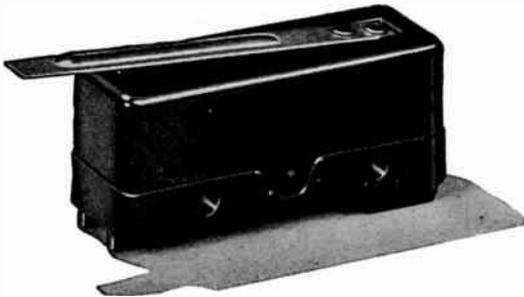

FOR PRECISION CONTROL

**PIN PLUNGER TYPE 1A—ACTUATOR**

Size:  $1\frac{1}{8}$ " x  $\frac{1}{8}$ " x  $\frac{3}{32}$ "

These three standard enclosed snap-action Acro switches operate on the roller spring principle giving instantaneous make and break. Features of this switch are: Frictionless operation, long life, low operating pressure, high contact pressure, small size, unaffected by ordinary vibration, easy installation. Weighs less than one ounce, plastic case drilled for two 6/32 screws. Comes with a variety of actuators, actuation pressures, gaps, overtravel, movement differential, to meet various applications. Normally open, normally closed or double throw. Rated 115 v. 10 amps. A.C.

**5L—LEAF ACTUATOR**

**2M—ROLLER LEAF ACTUATOR**

## ACRO MINIAC SNAP-ACTION SWITCH

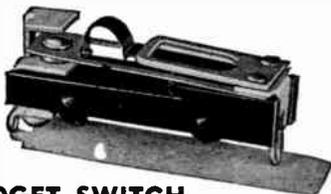

In keeping with demands for snap-action switches of smaller size and greater capacity Acro Electric Company has developed the new fully enclosed Miniac. Actual size is only  $1\frac{1}{8}$ " x  $\frac{1}{8}$ " x  $\frac{1}{4}$ ". The bakelite case provides four  $\frac{3}{32}$ " diameter mounting holes. Actuation is by a stainless steel pin plunger. Leaf type actuators can be attached to the case. Rating is 15 amperes at 115 volts A.C.

## NUT TYPE SWITCH

Illustration  $\frac{1}{2}$  Times Actual Size

A new push-button type switch with a double break shorting bar feature for panel mounting applications.  $\frac{3}{8}$ " diam. Cadmium plated brass case with a sturdy threaded sleeve  $\frac{1}{2}$ -32. Normally open and normally closed circuits. Rating is 15 amps. at 115 volts A.C.

Actual Size

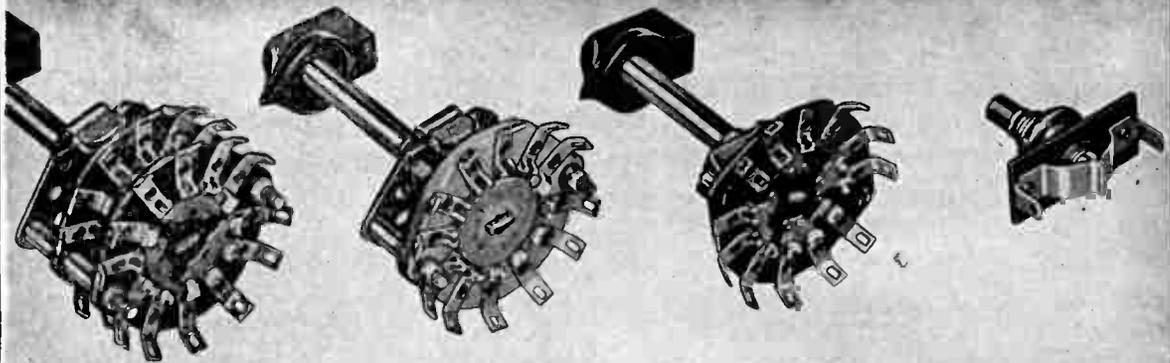

## G5—MIDGET SWITCH

Designed to meet the need for a snap-action switch smaller than the standard Acro but with the same rating. Available as shown or with actuating pin at bottom.

## OPEN BLADE SWITCH

Available in single or two pole with flat or curved blade. Dimensions are approximately  $3\frac{1}{8}$ " x  $\frac{1}{8}$ " x  $\frac{1}{2}$ ". Gap is .006". Rated 1500 watts, 115 volts, 15 amps. A.C.

2522	2523	3	2 to 11	3	3.90
2524	2525	6	2 to 5	3	3.90

## TRANSMITTER SWITCH WITH 90° INDEXING

Cat. Number	Poles	Positions	Sections	Price
2542	1	2 to 4	1	\$1.70
2543	2	2 to 4	2	2.70
2544	3	2 to 4	3	3.90
2545	4	2 to 4	4	4.90
2546	5	2 to 4	5	6.10

## MANUFACTURED TO MEET THE MOST RIGID GOVERNMENT TEST

Assembled switches with self-cleaning double-wipe contact jaws of less than .002 ohm resistance. Index is positive with 30° between each rotating position. Choice of bakelite or steatite sections and rotors. Bakelite sections measure 1<sup>9</sup>/<sub>16</sub>" between mounting centers. The first section is 1/2" behind the front plate, additional sections are spaced 1/2" on 2-section switches, 1" on 3- or 4-section switches. Brass bushing is 3/8" in diameter and 3/8" long. Metal shaft is 1 7/8" long. Steatite sections are 5/32" thick. Other dimensions are the same as for bakelite switches. All types include bar knobs.

## UNIVERSAL FLAT SWITCHES —

For single pole single throw, single pole double throw, double pole double throw, three pole single throw, three pole double throw, four pole single throw or four pole double throw use. 2 1/4" overall metal shaft, non-shorting teeth, bar knob included.

1450	\$0.75
1451—With spring return	1.00

## MOMENTARY PUSH SWITCHES

Rated 1 ampere at 110 volts alternating current. Contacts are phosphor bronze silver plated or steel, bushing is 3/8" insulated, length 3/8". Push button protrudes 1/2" from end of bushing.

1470—Momentary opened	\$0.50
1471—Momentary closed	.50

## 23 POSITION SELECTOR SWITCHES

Features common terminal contact and 23 clips mounted on one section. 15 degree index, shorting type contact.  $\frac{3}{8}$ " bushing,  $\frac{1}{4}$ " metal shaft  $2\frac{1}{4}$ " long. Complete with bar knob.

1443 .....\$2.50

K-173—Dial Plate, numbered 1 to 12 ..... .20

## LEVER ACTION SWITCHES

— Low capacity space-saving switches used singly or in groups. Particularly adapted to broadcasting, receiving, public address, test instruments and individual uses. Available in ten different combinations including positive and spring return action types with either shorting or non-shorting contacts. Use shorting type contact for circuit switching, where contacting new contact before breaking old circuit will avoid noise. Further uses for this type of switch can be found in any application where multiple contact low capacity switches, are required to operate at low voltage and current.

Dimensions of single switch are  $\frac{5}{8}$ " width x  $1\frac{7}{8}$ " height x  $1\frac{1}{2}$ " depth behind panel. Types are listed below, all furnished with black knob and nuts and bolts for panel mounting. Each ..... \$1.00

Contacts		Description		Type of Index
Shorting	Non-Shorting	Poles	Positions	
1452	1454	2	3	Positive
1453	1455	2	3	Spring Return
1456	1457	4	2	Spring Return
1459	1458	4	2	Positive
1466	1467	2	3	Positive and Spring Return

## TONE SWITCHES

— So called because their chief application is in step-type tone control circuits. Actually they find use in many circuits. They are available in four types, all with brass bushing  $\frac{3}{8}$ " in diameter x  $\frac{3}{8}$ " in length. The metal shaft has full length .156" mill,  $\frac{1}{4}$ " diameter and  $2\frac{1}{8}$ " length. It can be cut to the required size, and is insulated from all terminals in all types. Index action is positive "saw tooth" type and all teeth are shorting to minimize clicks when rotated. These switches are limited to low voltage-current applications. The maximum recommended current is 1 ampere at 6 volts. Circuit combinations are as listed below:

1460—Single pole double throw or single pole single throw phonograph-radio switch. Use as tone and sensitivity control.....\$0.50

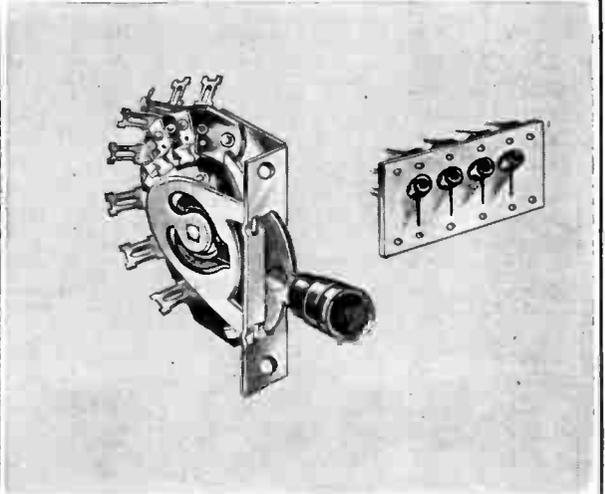

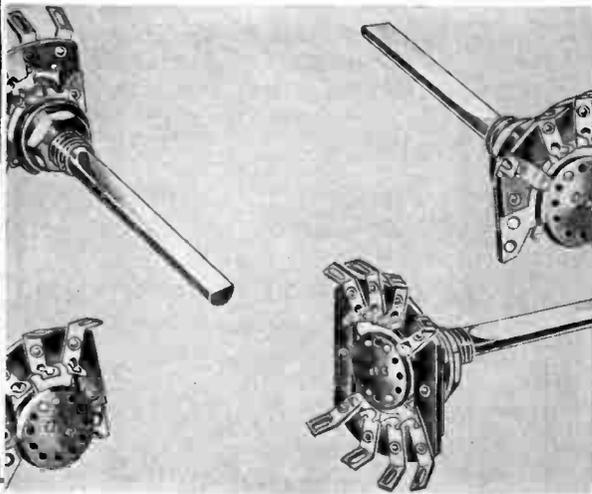

1463—One pole two position switch as above with spring return..... .65

1461—Single pole three position selector switch. Use as tone control or P.A. channel selector ..... .50

1462—Double pole double throw switch that may also be used as a single pole single throw or single pole double throw type. Use as inexpensive wave band switch, inter-office communication talk-back, meter reversing switch or for P.A. channel switchings ..... .60

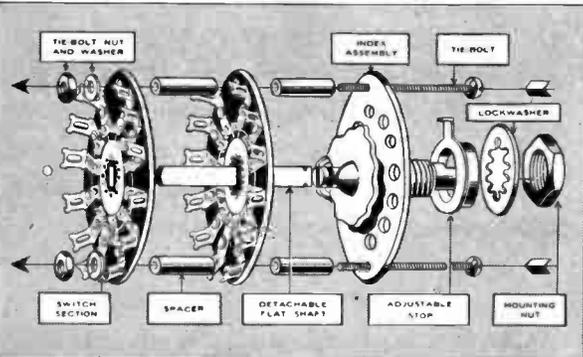

1464—Two pole two position switch as above with spring return..... .75

1473—Two pole three position tone switch, channel selector or inexpensive wave band switch. Similar to type 1462 but with one more position..... .75

**DIAL PLATES** — Made of 24 gauge brass  $1\frac{7}{8}$ " in diameter. Black background, white numerals  $\frac{1}{8}$ " high for easy reading.  $30^\circ$  angle between numerals agrees with index action of all bakelite or ceramic selector switches.

Part Number	Numbered	Price
K-115	1 to 5	\$ .15
K-116	1 to 6	.15
K-117	1 to 10	.15
K-118	1 to 11	.15

**MOUNTING PLATES** — To facilitate mounting of both single and multiple lever action switch combinations, a complete line of mounting plates is carried in stock. They are finished in black lacquer and range from single mounting to 5-gang mounting. The holes for panel mounting are furnished in either vertical or horizontal positions. The metal is of .035" cold rolled steel, No. 1 temper, insuring lasting support. Dimensions of vertical and horizontal mounting holes are given below. Special plates can be supplied up to 40 switches in either steel or brass with nickel or cadmium plating. Special mounting holes can be furnished also.

**SWITCH HARDWARE** — Because there are many instances where special factors demand varied lengths between sections, a group of separate switch hardware, in addition to the regular switch kit parts, is listed below. The accompanying figure serves as an assembly instruction and identifies the various components used in assembling a selector switch. It is advisable to refer to it when ordering parts. By ordering from parts included in this group, switches with varying section spacing can be assembled up to lengths of 8 inches. A quantity of these parts on hand will often make just the switch you need for that emergency job.

Part No.	No. of Switches	Mounting Holes	A	B	Price
P1755	1	Vertical	$\frac{3}{4}$ "		\$ .20

# CENTRALAB

# SWITCH KITS

The demand for selector switches includes so many different types that it is virtually impossible to maintain a complete stock of assembled switches. Selector switches are usually assembled with standard sections. The difficulty arises from the number of different ways that a small group of sections can be put together for the completed switch replacement part. To simplify the stocking of selector switches, Centralab has available two switchkit assortments of sec-

tions, hardware, and accessories. One of these includes bakelite sections and hardware; the other steatite sections and hardware. The parts included in each kit are tabulated below. Each assortment is packed in a sturdy cabinet; the drawer pulls include identification cards to show the location of the parts. The cabinet is supplied free with either kit. Complete kits shipped F.O.B. Milwaukee.

**No. 414**—Includes assortment of bakelite sections, index assemblies and accessories as listed below. These parts may be purchased separately at prices indicated. Entire kit ..... \$100.00

**No. 419**—Kit includes assortment of steatite sections, index assemblies and accessories as listed below. Parts may be purchased separately at prices indicated at right. Entire kit..... \$100.00

# SMALL SWITCHES, LIMIT SWITCHES, AND MAGNETIC RELAYS

## SMALL SNAP-ACTION SWITCH, G-E SWITCHETTE CR1070-C103

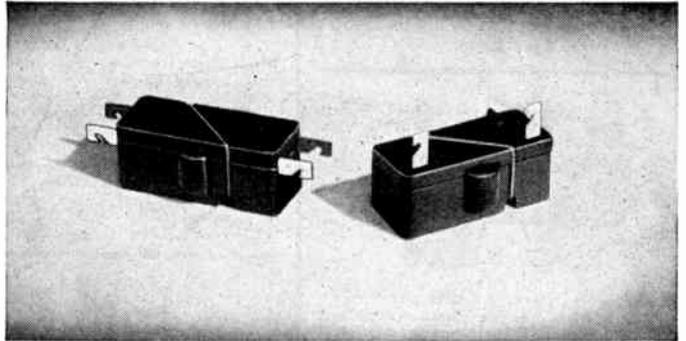

This new, lightweight switch mechanism lends itself especially to applications where space is limited and long life is required.

The Switchette is operated by movement of the spring-return button located in the housing. This button can be actuated by a lever, bellows, or other means. Snap-action, double-break-contact construction gives the G-E Switchette a high current rating and makes it suitable for applications where the vibration is severe.

### FEATURES AND ADVANTAGES

1. Small (approximately 1 1/4 in. by 1/2 in. by 1/2 in.) and weighs only 9 grams (0.02 lb).
2. Resists vibration and corrosion.
3. Phenolic-resin operating button provides safety from live parts during operation.
4. Contact tips are 99.95 per cent pure silver.
5. Particularly suited to electronic applications because of negligible amount of contact bounce.
6. Two terminal arrangements are available, as shown above.
7. Wide variety of forms available, for example, three basic contact arrangements: single-circuit, normally open; single-circuit, normally closed; and two-circuit, normally open and normally closed. Also many special forms.

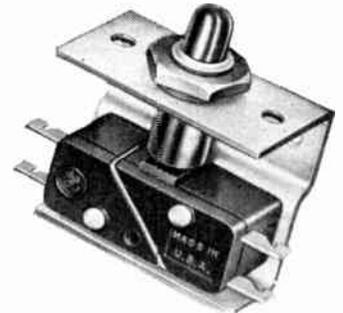

Switchettes are available in ratings up to 10 amperes at 115 or 230 volts a-c. Write for Bulletin GEA-3818.

Switchettes having two terminal arrangements

## LIMIT SWITCH, CR1070-D101

This sturdy, open-type limit switch is operated by a plunger which provides 3/32-inch overtravel. The contact mechanism of this device is the G-E Switchette, which can be wired to control one normally open circuit and one normally closed circuit. Rated 10 amperes at 230 volts a-c.

Open-type limit switch with push-rad operation

## MAGNETIC RELAY, CR2790-E

The CR2790 relay is a compact, attractively finished device for use either as a motor starter or a relaying unit. Available in either an open form or enclosed in a general-purpose housing. Three contact arrangements available: single-pole, single-throw; double-pole single-throw; and double-pole, double-throw. In the open form, all three contact arrangements use the same base, which facilitates mounting. In the enclosed form, the U-shaped cover makes wiring and servicing convenient.

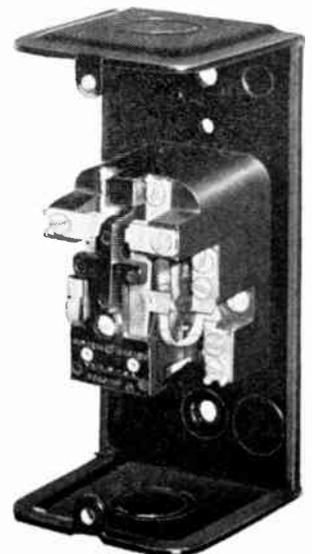

### Applications

Control of pilot circuits in response to remote control switch or thermostat, or for direct control of small motors.

As a fractional-horsepower motor starter, or in conjunction with a magnetic switch controlling larger motors, heating or lighting circuits, and signal systems.

Enclosed magnetic relay

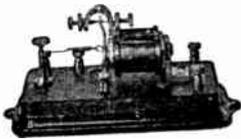

Enclosed relay with cover removed

**112-K  
KEY**

This key is designed for learners who want something that is scientifically correct but moderate in price. Has black enamel metal base and is mounted on a mahogany finished wood base. Key lever is nickel plated. Contact points are platinum.

List \$2.50

**PONY RELAY**

All the metal parts on this pony relay are brass with lacquer finish, excepting armature which is polished and plated steel. Magnets are non-adjustable. Mounted on a mahogany finished wood sub base and cast iron black enamel base.

	List
M-104—4 Ohm .....	\$6.50
M-105—20 Ohm .....	6.75
M-106—50 Ohm .....	7.00
M-107—75 Ohm .....	7.25

**R-48  
KEY**

The beginner in the field of wireless approves this 1/4 K. W. Key for its desirability and inexpensiveness. It is well made with polished key lever and lacquered parts. Contact points are platinum.

List \$2.80

**R-68 PRACTICE SET**

Designed for those who want a well made instrument to learn the code. Set consists of a key and high frequency buzzer mounted on a mahogany finished wood base equipped with binding posts. The code is printed on a plate and fastened to the base between the key and buzzer. Buzzer is adjustable.

List \$4.00

**R-60 BUZZER**

The R-60 high frequency buzzer is the same type used on the R-68 Wireless Practice Set. It is adjustable and has a standard resistance of 2 Ohms. Finish is black crystallized lacquer.

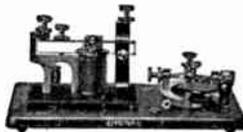

List \$1.25

**SOUNDER**

The tone quality and instant action of this correctly designed sounder are well and widely known. All adjustments are simple and accurate. Bar frame is black enamel and has an aluminum sounding bar, brass bridge and black lacquered steel sounder plate. It is mounted on a mahogany finished wood base equipped with binding posts.

	List
112-S—4 Ohm .....	\$3.90
113-S—20 Ohm .....	4.15

**LEARNER SET**

On city, private and short lines learners will find this instrument easy to handle and having a clear, distinct tone. Bar frame and key base are black enamel, the bridge is brass, sounding bar is aluminum with black lacquered steel sounder plate. Key lever is nickel plated. Sounder and key are mounted on a mahogany finished wood base.

	List
M-110—4 Ohm .....	\$5.75
M-111—20 Ohm .....	6.00

**STANDARD KEY**

This standard wireless key is designed to carry heavy currents. All brass construction with lacquer finish. Furnished with 3 16, 1/4 or 3/8-inch coin silver contacts. Navy type key knob.

	List
R-62—3/16" contacts .....	3.50
R-63—1/4" contacts .....	3.60
R-64—3/8" contacts .....	3.85

**R-70 TWIN PRACTICE SET**

In this practice set is represented value that appeals to the beginner. Set includes two R-69 instruments, 75 feet of wire and instruction manual packed in an attractive, illustrative box.

List \$3.75

**M-100  
KEY**

For rapid transmitting this key is preferred by skilled operators and beginners. The base, equipped with binding posts, is brass with a lacquer finish. Key lever is nickel plated. Furnished with platinum contact points.

List \$3.40

**COMMERCIAL RELAY**

The commercial relay is well designed and constructed for long, continuous service on commercial lines. Heel iron and armature are made of Norway iron. Has rubber covered adjustable coils. Mounted on mahogany finished wood sub base and cast iron black enamel base.

	List
916—150 Ohm .....	\$15.00
917—250 Ohm .....	15.50

**KEY  
R-50**

For the amateur who wants an inexpensive, high grade wireless key, here is the proper instrument. It is equipped with a heavy, cast, well insulated base in a black finish, coin silver contacts, composition knob and nickel parts.

List \$1.75

**R-69 PRACTICE SET**

The R-69 Practice Set is for those who want an inexpensive instrument. Consists of a key lever, non-adjustable buzzer and code plate mounted on a metal base equipped with binding posts and rubber feet. Has maroon finished base and gold lacquered key lever and buzzer cover.

List \$1.75

To cooperate with the War Effort we reserve the privilege of altering specifications or materials, without notice.

# J. H. BUNNELL

Telegraph Keys • Learner's Sets • Sounders • High Frequency Buzzers

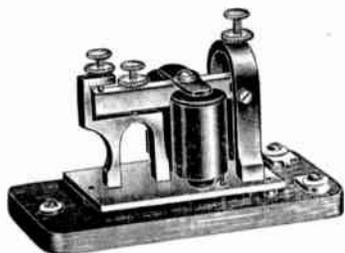

**TRIUMPH  
KEY  
No. 9050  
Type 5-4**

A commercial Telegraph Key on cast brass base with nickel plated steel lever. Has tungsten contacts and "Bug" lip of nickel silver. All brass parts are polished and lacquered.

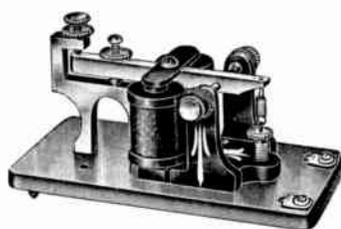

Used extensively by Western Union, Postal, and other communication companies. Can also be supplied with  $\frac{1}{8}$ " or  $\frac{1}{4}$ " diameter silver points—polished and lacquered bronze lever and "Navy" knob or bronze nickel plated lever at additional charge. Shipping weight 1 lb.

No. 9050 Triumph Key with polished brass body.

**GIANT  
SOUNDER  
with  
Aluminum  
Lever  
No. 500  
Type 7-3**

A commercial Telegraph Sounder with aluminum lever. Used extensively by Western Union, Postal and other communication companies. Sounder is supplied with brass base mounted on wood sub-base. Three brass pillars between the wood and brass base create a "sounding board" effect, giving loud, clear signals. Coils of sounder are furnished wound to any required resistance. State resistance required when ordering. Shipping weight—2 lbs. packed.

**DANDY  
LEARNER'S  
SOUNDER  
No. 776  
Type 7-9**

Same sounder as used on Dandy Morse Learner's Outfit, is mounted on wood base and has adjustable trunion screws as well as adjustable spring tension. Shipping weight—2 lbs. packed.

**CENTURY  
HIGH FREQUENCY  
BUZZER  
No. 9740  
Type 17-3**

A high frequency Buzzer with adjustable tone control. Operates from 1 or 2 dry cells. May be supplied

on either Buzzplex or Blinko Buzzplex at an additional charge.

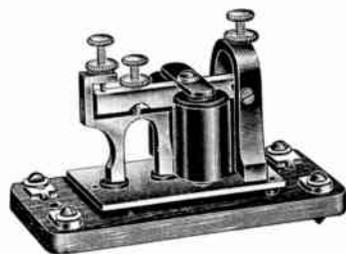

**BUNNEL  
Open Circuit  
Key No. 9037  
Type 5-23**

## Front and Back Contact—Legless Key

When it is preferable to use dry cells instead of closed circuit cells this type of key is highly recommended. Even though a closed circuit is maintained for communication in either direction no current is being used except when key is depressed. Each individual station supplies its own current from local batteries.

**QUAD  
REPEATING  
SOUNDER  
with Rigid  
Points  
No. 9109  
Type 7-6**

Similar in all respects to No. 500 aluminum lever sounder, but has in addition, a pair of auxiliary contacts in the anvil and sounder bar which are connected to two additional binding posts used to repeat the signal to another circuit or a local one. Coils furnished wound to any required resistance. Shipping weight—2 lbs. packed.

**BUZZOPLEX  
No. 8656  
Type 17-1**

This instrument consists of a No. 775 key and high grade buzzer mounted on a common base of birch, finished mahogany. Equipped with 3 binding posts to connect batteries and phones. Shipping weight — 3 lbs. packed.

**BLINKO  
BUZZOPLEX  
No. 9028  
Type 17-2**

Same equipment as used on Buzzplex, but with addition of lamp and switch. Used to give audible or visual signals. Shipping weight—3 lbs.

# J. H. BUNNELL

Telegraph Keys • Learner's Sets • Sounders • High Frequency Buzzers

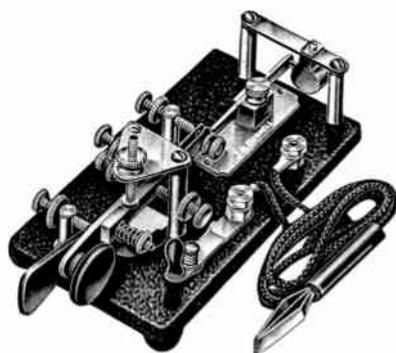

## Bunnell Professional Flash Key #1 No. 800 — Type 5-48

A handsome and efficient transmitting machine, with unlimited sending possibilities. Suitable for all classes of transmitting work where speed and perfect sending are prime essentials. THE OLD RELIABLE SINGLE LEVER KEY.

Two pairs of large, coin silver contact points . . . one for dots, the other for dashes. Designed to meet the most exacting demands of professionals. Equipped with cord as illustrated. Base,  $6\frac{3}{8} \times 3\frac{1}{2} \times \frac{1}{2}$  inches. 800—Black crackle finish.

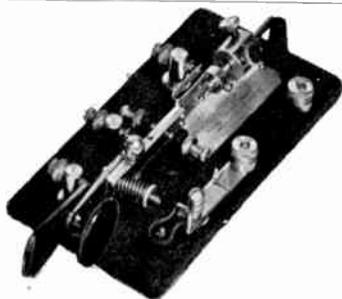

the most exacting demands of professionals. Equipped with cord as illustrated. Base,  $6\frac{3}{8} \times 3\frac{1}{2} \times \frac{1}{2}$  inches.

## Bunnell Professional Flash Key #6 No. 801 — Type 5-45

Experienced professional operators have acclaimed this model as the smoothest, fastest "bug" on the market, surpassing anything ever before achieved in any sending machine. Single lever with improved flat pendulum and instantly adjustable dot contact spring. Two pairs of large coin silver contact points . . . one for dots, the other for dashes. Equipped with cord as

illustrated. Weight  $3\frac{1}{2}$  pounds. Base  $6\frac{3}{8} \times 3\frac{1}{2} \times \frac{1}{2}$  inches. 801—Black crackle finish.

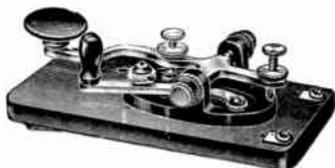

## BUNNELL AMATEUR FLASH KEY No. 803 — Type 5-46

The greatest value ever made available to amateurs. Sturdy construction. Single lever. Two pairs of coin silver contact points . . . one for dots, the other for dashes. Designed especially to meet the demands of amateur operators. Weight 2 pounds. Base,  $6 \times 3 \times \frac{3}{8}$  inches. 803—Black crackle finish.

## DANDY LEARNER'S KEY No. 775 — Type 5-19

A substantial well designed key mounted on a black japanned cast iron base and wooden sub-base. Has steel nickel plated lever, adjustable brass trunion screws polished and lacquered. Spring tension screw and back screw and brass circuit closer which can be removed when key is used for radio operation. Shipping weight 1 lb. packed.

## Dandy Morse Learner's Outfit No. 607 — Type 7-17

The same key and sounder as our No. 775 and 776 except mounted on common base and furnished with 2 Western Union type flat binding posts connected to key and sounder. Can be used singly as a learner's outfit or in pairs. Weight—2 lbs. packed.

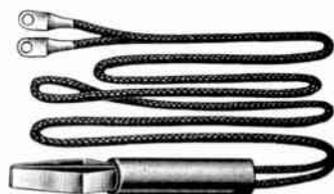

## DOUBLE SPEED KEY No. 5876 — Type 5-12

A non-automatic side action key on brass base. Lever is nickel plated and all brass parts are polished and lacquered. Supplied for telegraph work with circuit closer, which may be removed when key is required for radio use. Dots or dashes made on either side by pressing the lever right or left. In ordering, state whether for telegraph or radio use. Shipping weight—1 lb. packed.

## Carrying Case - No. 5-165 for No. 800 or 801 Flash Key

Carrying case for No. 800 or No. 801 FLASH KEY — a sturdy lightweight case covered with imitation leather over wood frame, with hinged front. Shipping weight, 3 lbs. packed.

## CORD AND WEDGE Set No. 5-183

A  $2\frac{1}{2}$  foot cord with spring wedge on one end and round eyelet terminals on the other end. The springs of the plug are nickel silver securely held in place in a fibre tube with fibre insulation between springs. Shipping weight—6 ozs. packed.

Buzzers

Transmitting and  
High Speed Keys

**TELEGRAPH KEYS FOR EVERY PURSE AND PURPOSE**

**HIGH SPEED SEMI-AUTOMATIC KEYS**

SPEED-X Semi-Automatic Keys are designed and constructed to rigid specifications and are approved by the experienced professional and amateur C. W. operators. They are fully adjustable from lowest to highest speeds. Manufactured in four distinctive and attractive models. Fully guaranteed against any defect in material or workmanship. Bases of all models drilled for stationary mounting.

**STANDARD MODEL No. 500.** New-Improved Standard Model Semi-Automatic Key mounted on extra heavy steel base  $3\frac{1}{2} \times 6\frac{1}{4} \times \frac{1}{2}$ " finished in attractive black wrinkle baked enamel. Mounted on four rubber feet to insure stationary position at all times. The finish will not scratch or chip and will last indefinitely. The frame is chromium finished and has five adjustments with lock nuts, assuring dependable operations at all speeds. Vibrator arm, posts, switch and all machine parts heavily plated in beautiful chromium. Complete with two adjustable weights, two sets  $\frac{1}{8}$ " pure silver contacts, circuit-closing switch and two paddles adjustable to any desired height. Net weight  $4\frac{1}{2}$  lbs.

- No. 500 ..... List Price \$13.50
- No. 500-L (Left-handed model) ..... List Price 15.50
- No. 380—Cord and Plug—Extra ..... List Price 1.00

**PROFESSIONAL MODEL No. 501.** New-Improved Beautiful Polished Chromium Plated Heavy Steel Base  $6\frac{1}{4} \times 3\frac{1}{2} \times \frac{1}{2}$ " with four non-slip rubber feet. Heavy brass connector strips mounted under base. Frame is a Polished Chromium Brass Casting with live screws for sensitive adjustments. Vibrator is designed to obtain slowest and latest speeds required by high speed operators. Two sets of  $\frac{1}{4}$ " pure silver contacts. Pigtail connections to vibrating arm. Perfectly aligned free acting vibrator bearings. Lock nuts on all adjustments. Paddles adjustable to any required height. All machine parts heavily chrome plated, which makes this the most outstanding semi-automatic key on the market. Furnished with circuit closing switch. Net Weight  $4\frac{1}{2}$  lbs.

- No. 501 ..... List Price \$17.50
- No. 501-L (Left-handed model) ..... List Price 19.50
- No. 380—Cord and Plug—Extra ..... List Price 1.00

Nos. 500, 501

**AMATEUR MODEL No. 515.** Baked Black Crinkle Enamel Finished Steel Base  $6\frac{1}{4} \times 3 \times \frac{3}{8}$ " with four rubber feet to prevent slipping or tilting. Heavy Brass connector strips. Die Cast Frame finished same as base with adjustable trunion screws. Chromium brass Vibrator has main spring and U-spring made of clock spring for smooth snappy action. Two adjustable weights. Two adjustable black fibre paddles. Two sets  $\frac{1}{8}$ " pure silver contacts. Lock nuts for every adjustment. Deadener wheel, posts, screws, springs and terminals polished chrome plated. Packed in attractive carton. Net Weight  $3\frac{1}{4}$  lbs.

- No. 515 ..... List Price \$ 9.25
- No. 515-L (Left-handed model) ..... List Price 11.25
- No. 380—Cord and Plug—Extra ..... List Price 1.00

**JUNIOR MODEL No. 510.** Die Cast Base  $2\frac{3}{4} \times 6 \times \frac{3}{4}$ " finished in black wrinkle baked enamel concealing heavy brass connector strips. Frame is same finish as base and all other parts are chromium plated. Vibrator Arm same as Standard model with lots of pep. Adjustable from eight words per minute to as high a rate as desired. Two sets of  $\frac{1}{8}$ " pure silver contacts, two adjustable weights and two adjustable paddles. Circuit closing switch mounted on base. Being small, compact and streamlined, this semi-automatic key is an outstanding value. A light-weight but sturdy built machine for clean-cut sending. Net Weight  $2\frac{1}{2}$  lbs.

Transmitting and  
High Speed Keys

**TELEGRAPH KEYS FOR EVERY PURSE AND PURPOSE**

**MOULDED BAKELITE KEYS, BUZZERS, PRACTICE SETS**

SPEED-X Moulded Bakelite and Metal Hand Keys, Practice Sets and Buzzers are used throughout the world as standard equipment in amateur and commercial work. Each unit is built according to rigid specifications and is fully guaranteed. All models have holes for stationary mounting. Code card supplied with each individually packed unit.

No. 301

**AMATEUR KEY No. 301**—A general purpose key with moulded black bakelite base. Perfect insulation—adjustable smooth acting bearings—improved spring—nickel key arm—pigtail connections—no current on bearings— $\frac{1}{8}$ " pure silver contacts. Net Wt. 6 oz.

- No. 301 ..... List Price \$2.15
- No. 301-S with switch..... List Price 2.50
- Add "L" for  $\frac{1}{4}$ " Contacts—Extra..... List Price .25

**PRACTICE KEY No. 300**—A well-built and inexpensive practice key for the beginner. Moulded Brown Bakelite base and knob. Spring bearings, perfect action, simple adjustments,  $\frac{1}{8}$ " pure silver contacts. All machine parts nickel plated. Standard Code card furnished. Net Wt. 5 oz.

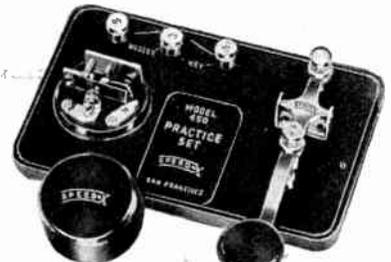

- No. 300 ..... List Price \$1.50

**PRACTICE KEY No. 312**—A standard spring adjustable hand key with  $\frac{1}{8}$ " pure silver contacts mounted on a moulded brown bakelite base  $2\frac{3}{4}$ " x 5" with circuit closing switch and terminal connections on base. Heavy base connector strips concealed under base. Key arm, switch and all machine parts nickel plated. Net Wt. 8 oz.

- No. 312 ..... List Price \$2.50

**PRACTICE SET No. 450**—Consists of one constant frequency adjustable buzzer and a standard hand key with  $\frac{1}{8}$ " pure silver contacts mounted on a moulded brown bakelite light-weight base  $6$ " x  $4$ ". Adjusting screws, key arm and all machine parts nickel plated. Light Spring for perfect keying. A complete sending and receiving set. Three hook-up diagrams on carton show how this Practice Set may be used singly for code practice and in pairs for point to point communications. Standard Code Card included. Net Wt. 12 oz.

- No. 450 ..... List Price \$2.75

No. 450

**CONSTANT FREQUENCY BUZZER No. 400**—Moulded Black Bakelite Base and Cap eliminates insulation problems. Large pure silver contacts—precision parts hold adjustments. Additional adjustment on vibrator. Resistance 2 ohms. Operates on two dry cells or one "C" battery. A high quality buzzer for all purposes. Net Wt. 3 oz.

- No. 400 ..... List Price \$1.25

No. 400

**HEAVY DUTY METAL HAND KEYS**

**METAL HAND KEY No. 305**—An inexpensive metal base key with black wrinkled enamel finish. Smooth acting spring bearings and adjustable key arm spring. Key arm and all machine parts bright nickel finish.  $\frac{1}{8}$ " pure silver contacts. Net Wt. 10 oz.

- No. 305 ..... List Price \$1.75
- No. 306—Lacquered BRASS finish Base ..... List Price 1.75

**STANDARD Key No. 310**—Heavy die cast base finished in black wrinkled enamel. Smooth adjustable bearings.  $\frac{1}{8}$ " pure silver contacts. Has provisions for plugging in our semi-automatic keys when desired. Net Wt. 9 oz.

- No. 310 ..... List Price \$2.50
- No. 311—Chromium Base ..... List Price 3.00
- No. 316—Lacquered BRASS finish..... List Price 2.50
- Add "L" for  $\frac{1}{4}$ " Contacts—Extra..... List Price .25

**STANDARD KEY No. 310-S**—Same specifications as Standard model key No. 310 with circuit closing switch mounted on base.  $\frac{1}{8}$ " pure silver contacts. An attractive high-quality key. Net Wt. 10 oz.

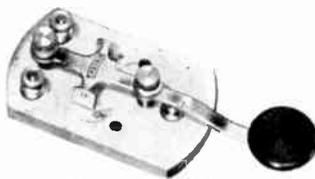

- No. 310-S ..... List Price \$3.00
- No. 311-S—Chromium Base with switch..... List Price 3.50
- No. 316-S—Lacquered BRASS finish with switch..... List 3.00
- Add "L" for  $\frac{1}{4}$ " Contacts—Extra..... List Price .25

**HEAVY DUTY KEY No. 320**—Black wrinkle enameled extra heavy Die Cast Base. Large sturdy chromium plated key arm with adjustable steel bearings. Heavy brass connector strip concealed under base. Well insulated for heavy duty work. Improved Navy Type Knob and  $\frac{1}{4}$ " pure silver contacts. Net Weight 12 oz.

- No. 320 ..... List Price \$3.50
- No. 321—Chromium Base ..... List Price 4.00

**HEAVY DUTY KEY No. 326**—Same specifications as Heavy Duty Model No. 320 but base finished in a beautiful Lacquered BRASS finish. Arm and machine parts chromium plated. Well designed spring gives this model a light keying touch. Navy Type Knob and  $\frac{1}{4}$ " pure silver contacts. Net Wt. 12 oz.

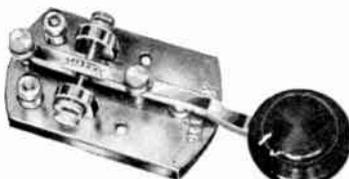

- No. 326 ..... List Price \$3.50

## DELUXE SPEED KEY

**MODEL CP 810**

Finest commercial or amateur bug available. Chrome finished base and superstructure. Springs made of selected blue spring steel for uniform performance in all keys. Nine points of adjustment to suit the most critical touch. Fully adjustable. Silver contacts  $3/16$ " diameter.

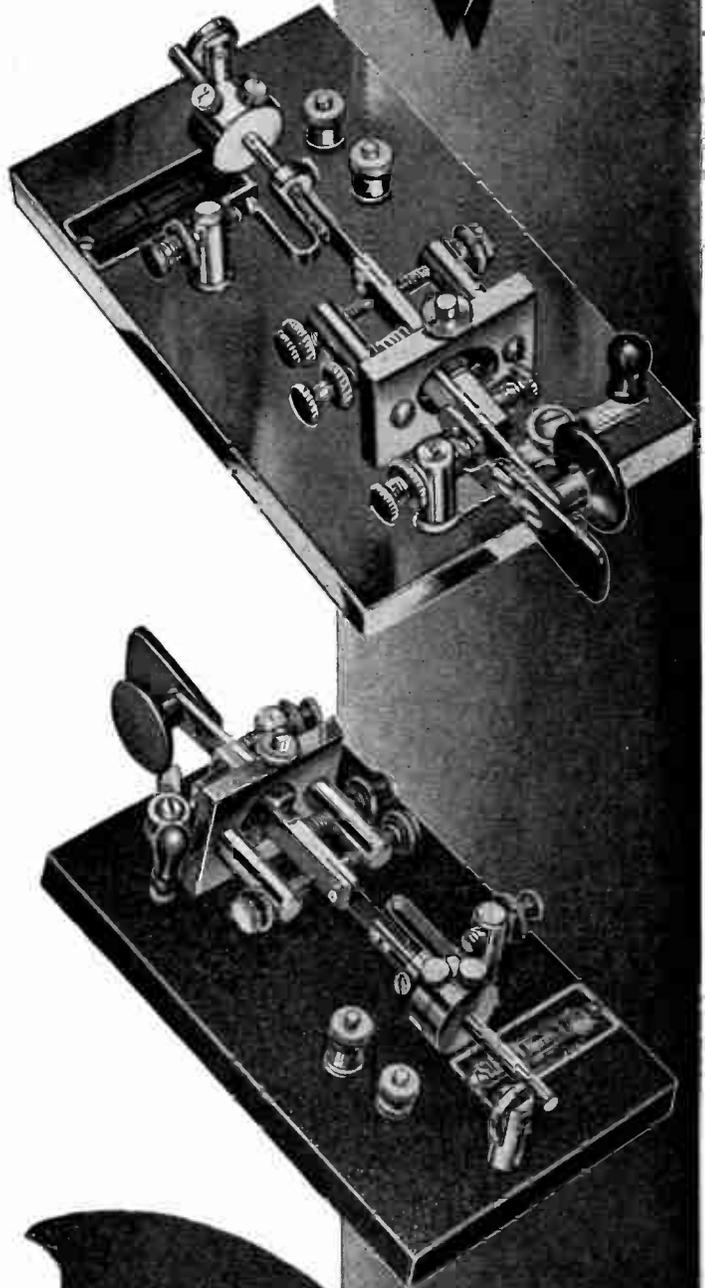

**Amateur Net Price.....\$9.75**

## SPEED KEY

**MODEL CP 510**

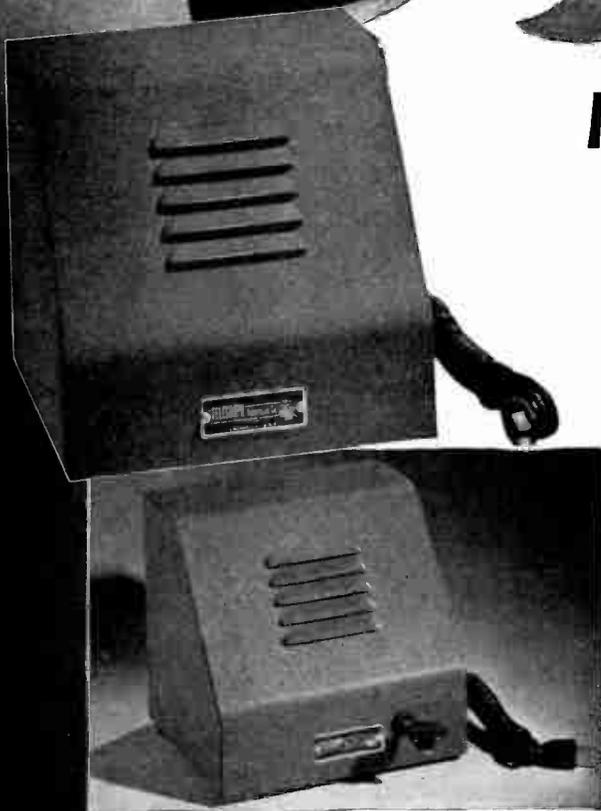

A high grade professional bug designed by World's Champion telegrapher. Battleship gray wrinkle finish and polished chrome. A masterpiece of precision craftsmanship. Silver contact points  $3/16$ " diameter. Springs, contacts and vibrating arm all fully adjustable.

**Amateur Net Price.....\$6.75**

# TELEGRAPH *Apparatus Co.*

Designed by  
**WORLD'S  
CHAMPION**  
Radio  
Telegrapher

## MASTER OSCILLATOR

Designed for individual or class code-learning. Beautiful gray crackle finish steel cabinet. Continuously variable volume control, tone adjustable 500-1500 cycles. Terminals for head phones, and up to 300 phones may be used. Speaker may be on or off as desired. Operates on 110 V. AC or DC. A 117N7 tube is used.

**MS-700—With Tube. Amateur Net Price, \$11.85**

## CODE PRACTICE SET

An ideal practice set that is being used extensively by all branches of the armed forces for learning code and maintaining speed at inactive intervals. External connections are provided for additional keys and headphones. All of the features in the MS-700 are incorporated in this unit.

**MS-700-P—With Tube. Amateur Net Price, \$15.90**

## DELUXE HAND KEY

### MODEL 300

Amateur Net Price  
**\$3.45**

Beautifully finished in polished chrome and nickel. Sturdy, well-balanced construction for smooth, effortless keying. 3/16" diameter contacts, adjustable for tension, spacing, and bearing position. Circuit closing switch, is incorporated.

## MODEL 200 HAND KEY

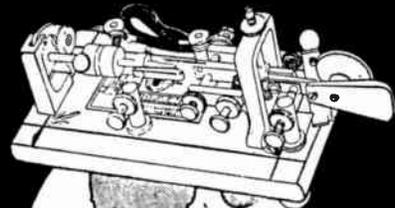

Right up to professional standard in performance and appearance. 3/16" coin silver contacts. Accurately machined bearing screws. Black crackle finish metal base, with circuit-closing switch.

Amateur Net Price.....\$2.25

# The Vibroplex

**A SEMI-AUTOMATIC TELEGRAPH AND WIRELESS TRANSMITTING MACHINE**

*Embodying the latest exclusive features*

**USED BY THE  
WORLD'S BEST  
OPERATORS**

Patent No.  
2187351

Prominent features which have been contributed to the success of the Vibroplex are:

- Simplicity • Durability
- Perfect control • Easy adjustment
- Strong carrier • Ease of manipulation
- Adaptability to changing wire conditions
- Ability to transmit perfect Morse and Continental signals at high speed

These features, which are found only in the genuine Vibroplex models illustrated on these pages, make for clear, rapid, easy transmission; relieve the arm of strain caused by sending on the ordinary key; rest

and strengthen the overworked muscles, and prevent telegrapher's paralysis.

### CLEAR, RAPID SENDING MADE EASY

The Vibroplex transmits the same grade of Morse and Continental code as the strongest clearest hand sender, faster than is possible on the ordinary key, and with less than half the labor.

There is no tensing of the muscles, no nerve strain, no pounding on the key in order to make clear, rapid signals. You simply press the lever—the machine does the rest.

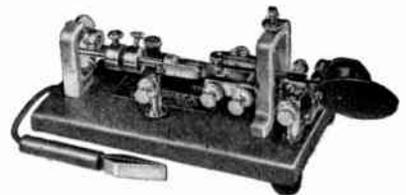

## THE "ORIGINAL" VIBROPLEX

Suitable for All Classes of Transmitting work Where Speed and Perfect Morse Are Prime Essentials

### SPECIFICATIONS

Old style, single lever. Two pairs of contact points: one for dots, the other for dashes. Weight, 3 lbs. 8 oz. A handsome and efficient transmitting machine, with unlimited sending possibilities. Complete with cord and wedge. Finishes—Standard—Polished Chromium parts with black base.

- Amateur Net Price..... **\$15.95**
- DeLuxe—Polished Chromium, gray base and jeweled movement..... **19.50**

## THE "LIGHTNING BUG" VIBROPLEX

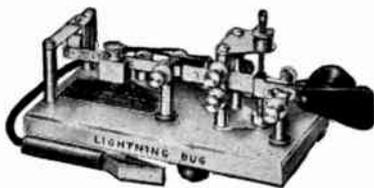

**One of the Latest Model Vibroplexes**

Sending Ease Surpassing Anything Ever Achieved in Any Sending Machine

### HIGH QUALITY SIGNALS AT ALL SPEEDS

This great new Vibroplex is the smoothest and easiest working BUG ever made. It has won fame on land and sea for its clarity, precision and ease of manipulation. Can be slowed down to 10 words per minute or less or geared to as high rate of speed as desired. Maintains the same high quality signal at whatever speed, insuring easy reception under all conditions.

De Luxe Model

- Amateur Net Price..... **\$13.95**
- DeLuxe—Polished Chromium, gray base, and jeweled movement..... **17.50**

### SPECIFICATIONS

Single lever, with improved flat pendulum, instantly adjustable dot contact spring, circuit breaker parallel with pendulum. Two pairs of contact points, one for dots, the other for dashes. Complete with cord and wedge. Weight 3 lbs. 8 oz. Finishes—Standard—Polished Chromium top parts with black base.

## THE "ZEPHYR" VIBROPLEX

A Genuine Vibroplex. Slightly Lighter in Weight. Having Plenty of "Pep" and "Power"

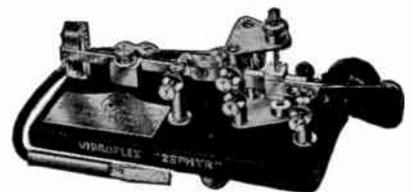

Smaller and more compact but designed in most details the same as the "Lightning Bug" model. Planned to meet the demand for a low priced, efficient and high speed transmitter for telegraph use.

### SPECIFICATIONS

Single lever with standard size contact points. Mounted on slightly smaller base. Weight 3 lbs. 2 oz. Equipped with circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

- Amateur Net Price..... **\$12.50**

All the Vibroplexes illustrated are now equipped with large 3/16 diameter contact points, which are the same diameter as furnished on special radio models selling heretofore up to \$25.00

The  
**Vibroplex**

Telegraph & Wireless  
 Transmitting Machines

## THE "CHAMPION" VIBROPLEX

For Radio Use Only

Designed to Fulfill the Demand for  
 a Low Priced Radio Transmitter

The new "Champion" is an inexpensive transmitter having exceptional sending qualities . . . clarity . . . speed . . . sending ease, which will appeal alike to amateur and professional radio operators. Designed to meet the demand for a low priced Vibroplex in the radio field.

### SPECIFICATIONS

Single lever with two pairs of contact points. Mounted on large standard size base. Weight 3 lbs. 8 oz. Without circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price ..... **\$9.95**

## THE "BLUE RACER" VIBROPLEX

Very similar to the Original Vibroplex except that it is only half the size. Suitable for all classes of telegraph work and in high favor with wireless men.

Small and compact, the "Blue Racer" Vibroplex can be carried around and never be in the way. Embodies the same sending possibilities, the same carrying qualities, the same strength and durability as the larger models. Built especially to meet the demand of telegraphers requiring a small, lightweight and efficient sending machine.

### SPECIFICATIONS

Single Lever. Two pairs of contact points—one for dots, the other for dashes. Weight, 2 lbs. 8 ozs. Complete with cord and wedge. Finishes—Standard—Polished Chromium top parts with black base.

Amateur Net Price ..... **\$15.95**  
 DeLuxe—Polished Chromium, gray base and jeweled movement ..... **19.50**

## VIBROPLEX CARRYING CASE

Keeps the Machine Free from Dust, Dirt and Moisture  
 Insures Safe-keeping When Not in Use

A cloth-lined case, finished in handsome simulated black morocco. Corners are reinforced, adding to its durability and attractiveness. A flexible leather handle makes it more convenient to carry. Has lock and key.  
 Amateur Net Price ..... **\$3.50**

**FOR A LIMITED TIME ONLY** all of the DeLuxe Model Vibroplexes are furnished with patented **JEWEL MOVEMENT**, without additional charge.

This special introductory price is subject to change without notice.

The **JEWELS** used in this Model Vibroplex are the same as placed in the world's finest precision made watches and instruments.

A **JEWEL** bearing main lever insures a "LIFETIME" of service and an ease of operation that can only be referred to as "FEATHER-TOUCH" sending.

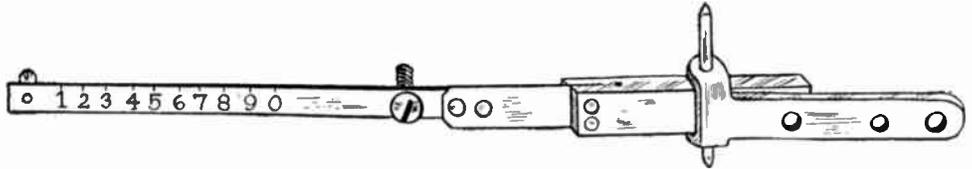

All the Vibroplexes illustrated are now equipped with large 3/16 diameter contact points, which are the same diameter as furnished on special radio models selling heretofore up to \$25.00

## RELAYS For Automatic Control

Ward Leonard Relays have self-cleaning, self-aligning silver-to-silver contacts. Metal parts, except contacts, are cadmium plated subject to Governmental Limitation Orders. Unless otherwise specified they are available for either A.C. or D.C. operation.

On this page and the next one are shown a few representative samples of the comprehensive line of relays made by Ward Leonard. The ones selected for illustration here are some that are particularly adaptable to electronic as well as industrial equipments.

— Prices and Details Furnished on Request —

**LITTLE GIANT—TYPE No. 105.**—A general purpose relay designed for remote control of the ordinary type of electrical appliances, such as electric heaters, electric signals, electric lights, electrically operated pumps, and most types of electronic equipments. The Little Giant is sturdily built on a molded Bakelite base. Heavy, front connected terminals are provided. The Little Giant, as a standard unit, is of the open type, but it can be furnished with a steel knock-out box enclosure.

**Coil Voltages.—**  
 D.C.—6, 10, 12, 24, 32, 115 volts.  
 A.C. (60 cycles)—6, 10, 12, 24, 32, 115, 230 volts.

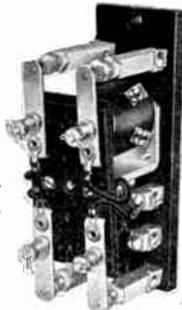

**Contact Arrangement.—**  
 Single Pole, Single Break, Normally Closed.  
 Single Pole, Single Break, Normally Open.  
 Single Pole, Single Break, Double Throw.

**Contact Ratings, in Amperes.—**

Volts	D. C.		A. C.	
	Normally Open	Normally Closed	Normally Open	Normally Closed
0-24	20	15	20	15
25-115	1	1	20	15
230	0.5	0.5	15	10

**Dimensions.**—1 7/8" wide x 2 5/8" long x 1 1/8" high. With 2 mounting holes .193" diameter, spaced 1 1/2".

**HEAVY DUTY—TYPE No. 130.**—For use in circuits, both A.C. and D.C., in which a relay that has current carrying and rupturing capacities greater than the ordinary relay is required. Contact fingers are heavy stiff metal blades using large stainless steel springs for pressure. Large gap contacts with adequate surfaces. As high as four separate circuits may be opened simultaneously with the closing of up to four other circuits. All poles are electrically independent.

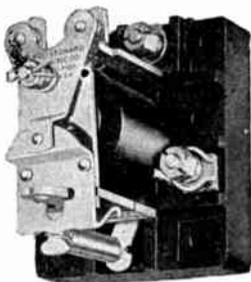

**Coil Voltages.—**  
 D.C.—24, 32, 115, 230 volts.  
 A.C. (25 cycles and 60 cycles)—24, 32, 115, 230, 440 volts.

**Note:** Other voltages and frequencies are available on special order.

**Contact Arrangement.—**  
 Practically any combination of contacts from one pole to four poles can be provided.

**MIDGET—TYPE No. 106.**—For remote control of A.C. or D.C. circuits. Has wide application for use on power circuits or electronic circuits in which the current to be controlled do not exceed the ratings of the contacts. May be energized from main line or from an independent circuit. Built on a molded Bakelite base. Front or back connected terminals.

**Coil Voltages.—**  
 D.C.—6, 8, 12, 24, 32, 115 volts.  
 A.C. (25 cycles or 60 cycles)—6, 8, 12, 24, 32, 115 volts.

**Contact Arrangement.—**  
 Single Pole, Double Break, Normally Closed.  
 Single Pole, Double Break, Normally Open.  
 Double Pole, Single Break, Normally Closed.  
 Double Pole, Single Break, Normally Open.  
 Single Pole, Double Break, Double Throw.  
 Double Pole, Single Break, Double Throw.  
 Double Pole (Common Feed), Single Break, Normally Open.  
 Double Pole (Common Feed), Single Break, Normally Closed.  
 Double Pole (Common Feed), Single Break, Double Throw.

**Contact Ratings, in Amperes.—**

Volts	D. C.		A. C.	
	Single Break	Double Break	Single Break	Double Break
0-24	4	6	4	6
25-115	1*	2	4	6

\*0.7 Amperes if Double Throw.

**Dimensions.**—2" wide x 2 1/4" long x 2 1/8" high. With 2 mounting holes .173" diameter, spaced 1 1/2".

Type No. 106 Relays for 3-wire control are also available. Details will be furnished on request.

**Contact Ratings, in Amperes.—**

Volts	Direct Current	D.C. with Blowout	A.C. 25 Cycles	A.C. 60 Cycles
0-24	25	25	25	25
25-125	3	20	25	25
126-250	1	10	25	25
251-440	.....	.....	10	15

**NOTE:** Blowouts are required for all relays that control Direct Current circuits in which the voltage exceeds 23 volts and the current exceeds 1 ampere.

**Dimensions.**—Base dimensions vary according to the size of the relay as determined by the function or functions it is to perform. Maximum height, 3 1/8".

**RELAYS (Continued from Preceding Page)**

**MIDGET METAL BASE—TYPE No. 101.**—For use in small radio transmitters, sound equipment, aircraft control circuits, and other similar applications. It may be obtained also with ceramic insulation to adapt it to radio frequency circuits. Its small size permits installation in otherwise inaccessible places, such as on the chassis of radio transmitters and sound amplifiers. Built on a metal base, vibration resistant up to 10 times gravity when energized. Front connected, solder type terminals.

**Coil Voltages.**—

D.C.—6, 10, 12, 24, 32, 115 volts.  
A.C. (60 cycles)—6, 10, 12, 24, 32, 115 volts.

**Contact Arrangement.**—

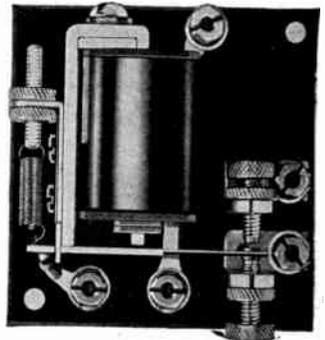

Double Pole, Double Throw.  
Single Pole, Double Throw.

**Contact Ratings, in Amperes.**—

Volts	D.C.	A.C.
0-24	4	4
25-115	0.5	4

**Dimensions.**— $1\frac{1}{2}$ " wide x  $2\frac{1}{16}$ " long x  $1\frac{1}{4}$ " high. With 5 conveniently placed mounting holes .169" diameter.

**SENSITIVE TYPE No. 250.**—For use in applications where a high degree of sensitivity is required, such as in electronic circuits. Built on a molded Bakelite base with large knurled heads and nuts to facilitate adjustment of the contacts and the spring tension on the armature. The use of nickel alloy in the magnetic circuit insures good contact torque at pull-up and a crisp drop-out. Position of the relay does not alter its performance.

**Contact Arrangement.**—

Single Pole, Double Throw.

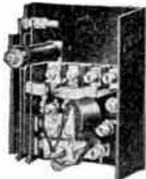

**Contact Rating, in Amperes.**—

Volts	D.C.	A.C.
115	0.75	2.0
230	0.5	1.5

**Dimensions.**— $2\frac{3}{8}$ " wide x  $2\frac{3}{8}$ " long x  $1\frac{1}{16}$ " high. With 2 mounting holes .196" diameter, placed at opposite corners.

**Prices and Details Furnished on Request**

**THERMAL TIME DELAY RELAY.**—Delays the application of voltage to the plates of vacuum tubes until the filaments have heated. The relay illustrated is adjustable over a range of from 15 seconds to 45 seconds. Other time delay relays—thermal type and motor driven type—are also available.

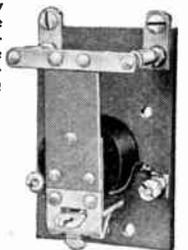

**RADIO RELAYS**

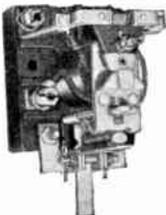

A few examples of Ward Leonard's popular line of relays for use in radio circuits are illustrated here.

Detailed information on specifications and prices will be furnished on request made to Ward Leonard directly or through one of its agents or jobbers.

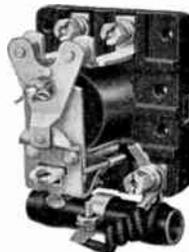

**BAND SWITCHING RELAY.**—Automatically changes frequency bands through two-wire control circuit. Installation of the relay in the set near the coils eliminates the need for long R. F. leads, such as are required when a panel-mounted switch is used. The relay is well insulated to insure against leakage or creepage of high frequencies or high voltages.

**MIDGET OVERLOAD RELAY.**—Protects against overloading vacuum tubes of power amplifiers or transmitters. Current surge causes armature to be pulled in opening contacts which remain open until the operator trips a mechanical latching device.

**MIDGET LATCH-IN RELAY.**—Multi-purpose relay. Energizing coil "pulls in" armature, which is locked in position by mechanical latch. Momentary energizing reset coil releases latch, allowing armature to drop to normal position.

**UNDERLOAD RELAY.**—Protects against damage to tubes and other components of amplifiers when load failures occur due, for example, to inability of one or more vacuum tubes to hold the load because of loss of excitation. De-energizing of relay coil when load drops opens contacts and prevents damage to transformers or tubes.

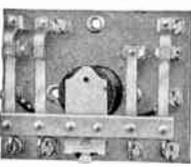

**KEYING RELAY.**—Low voltage type for center-tap or grid-bias keying shown here. High voltage type for use with grid controlled high voltage rectifier tubes also available. Capable of keying up to 40 words per minute. Can be operated with dry cells, if desired.

**ANTENNA CHANGE-OVER RELAY.**—Switches antenna to transmit or receive. May also be used to switch transmitter or receiver to either of two antennas. Satisfactory for frequencies up to 60 megacycles. Well insulated, and provided with silver contacts rated at 5 amperes.

**BREAK-IN RELAY.**—Otherwise known as "Push-to-Talk" Relay for phone transmitters. Pushing button in control circuit connects proper transmitter circuits and disconnects proper receiving circuits to transmit. Releasing button switches all circuits back to normal position for receiving.

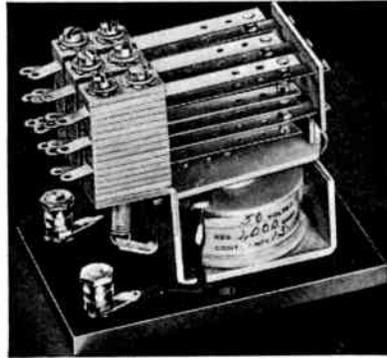

# Advance RELAYS

## GENERAL CIRCUIT CONTROL RELAYS Alternating and Direct Current

These sturdy, compact General Circuit Controls are available for operation on both alternating and direct current—Series 100 and 200 respectively—and incorporate many superior construction features not usually found in economically priced lines. "Full Floating" armature suspension, "wiping" contacts, and more than adequate insulation are but a few of their highly desirable qualities.

The switch stacks, composed of

Dimensions—3 1/4" x 2 1/4"

die-cut, spring phosphor-bronze blades, Bakelite spacers, and hard rubber sleeving, have a break-down test of 2500 volts, and will give a lifetime of service.

Each unit, mounted on a Bakelite base and equipped with binding posts for the coil connections, is entirely "above ground" and all current carrying screws and terminals are fully counter-sunk to prevent any possibility of "short-circuiting."

### PRICE CHART—For Series 100 (A.C.) and Series 200 (D.C.) Relays

The above chart, listing A.C. Relays, may also be used when ordering D.C. Relays by Changing the Series Number from 100 to 200. To avoid possible errors, always specify the correct A.C. or D.C. input voltage. The Series 100 Coils are obtainable for any voltage from 1 to 115 A.C.—Series 200 Coils for any Voltage from 2 to 60 D.C. Prices for other voltages will be furnished on request.

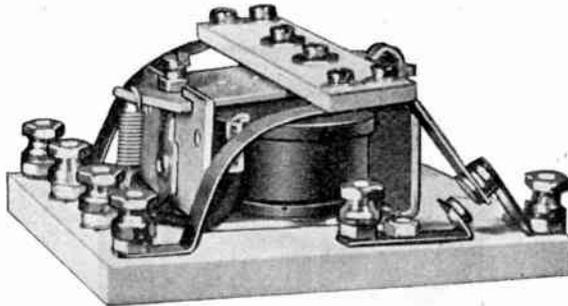

# Advance RELAYS

Isolantite model Antenna Change-Over. Designed for use in Amateur Transmitters.

The contact system is Double Pole-Double Throw, using  $\frac{1}{4}$ " Pure Silver contacts, with exceptional wiping action. Three and four pole arrangements are available on special order.

For high radio frequency control. Entirely hum-

## TRANSMITTER RELAYS

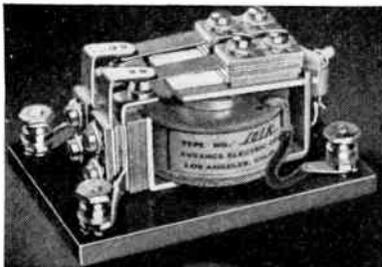

Type 400

free where intended for A.C. operation, and highly efficient on D.C. supplies. All metallic parts are cadmium and chromium plated.

Standard coils are for 110V A.C. and may also be used for 24V D.C. However, they will also be supplied for lower A.C. or D.C. voltages at no increase in price.

List Price .....\$9.00

## KEYING RELAYS

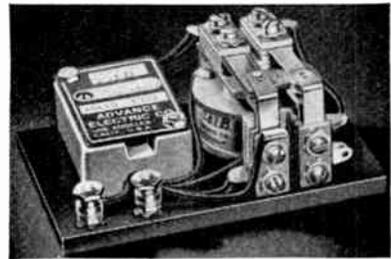

Type 101K—A.C.  
Type 201K—D.C.

Designed expressly for use in Keying Circuits where it is desired to use low voltage across the key to control high voltage transmission through the Relay contacts. The heavy duty coil and strong return spring makes possible an exceptional keying speed. Two sets of  $\frac{1}{4}$ " Pure Silver contacts in series allow a carrying capacity of 2500 volts. The complete unit, mounted on a  $\frac{3}{16}$ " Bakelite base with binding posts for coil connections, has over-all dimensions of 3" x 2" x  $1\frac{3}{8}$ " and is obtainable for A.C. operation to 115 volts or D.C. operation to 60 volts.

List Price .....\$5.00

## TIME DELAY RELAYS

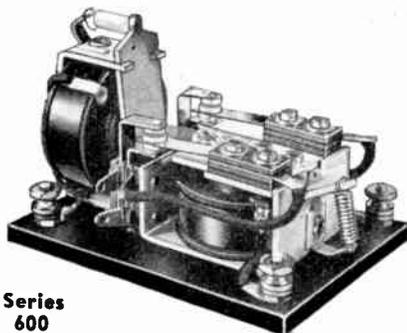

Type 300—N.O.  
Type 350—N.C.

Particularly suited for use where short time delays (10 sec. to 1 min.) are required, these Relays are available with both normally open and normally closed thermostats. Types 300 and 350 respectively, the former being widely used for pre-heating tube filaments, etc. The contact combination on both models is Double Pole Single Throw with  $\frac{1}{4}$ " Pure Silver contacts. Mounted on  $\frac{3}{16}$ " Bakelite bases measuring  $3\frac{3}{4}$ " x  $2\frac{3}{8}$ " x  $1\frac{1}{2}$ " with binding posts for coil connections. Standard operating voltage is 110 A.C. List Price \$7.75

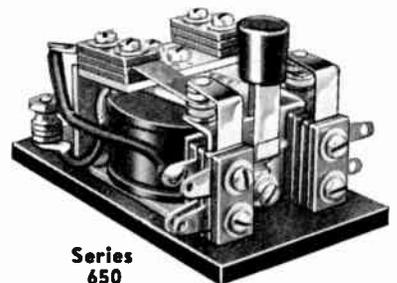

Low voltage units are available on special order.

## LATCHING RELAYS

Series 600

These Relays are highly desirable for applications where it is impractical to have the holding coil in constant service. When the coil actuating the contact arrangement is momentarily energized, the armature is locked in the closed position, and may be released electrically (Type 600) or manually (Type 650).

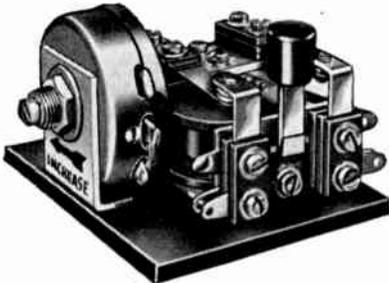

Series 650

	List		List
Type 604B	\$8.75	Double Pole-Double Throw	Type 654B \$6.50
Type 605B	8.50	Double Pole-Single Throw (N. O.)	Type 655B 6.25
Type 606B	8.50	Double Pole-Single Throw (N. C.)	Type 656B 6.25

The above list prices are for  $\frac{1}{4}$ " contacts. For  $\frac{3}{16}$ " points deduct 25c—for  $\frac{1}{8}$ " points deduct 50c. When ordering these types SPECIFY THE VOLTAGE.

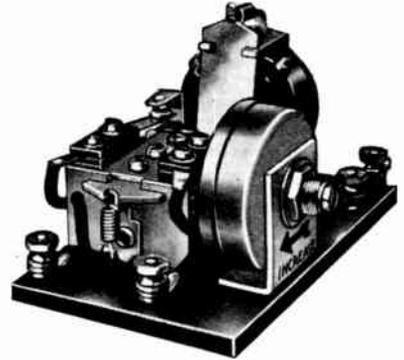

# Advance RELAYS

Type 700

## OVERLOAD RELAYS

These Relays are designed to provide accurate and positive protection against current surges and continuous overloads, and both the Manual Reset (Type 700) and Electrical Reset (Type 750) are divided into two classifications: Type "A" allows the Relay to attract on any current value between 250 and 500 mills, and Type "B" for any setting between 500 mills and 1 ampere.

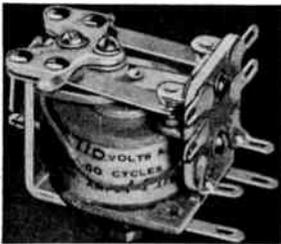

Type 750

When the current flow passes the safety setting, the Double Pole-Single Throw  $\frac{1}{4}$ " Pure Silver contacts are opened, breaking the power supply circuit until reset.

List Price

Type 700—Base dimensions 3" x 2 $\frac{1}{2}$ "..... \$ 9.25  
 Type 750—Base dimensions 4" x 2 $\frac{1}{2}$ "..... 12.00

Series 1500 and 1600

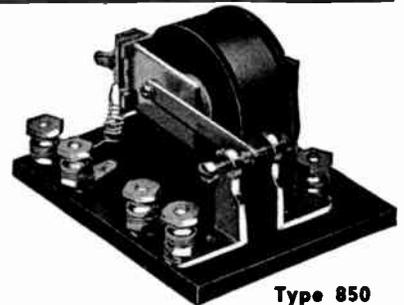

## MIDGET RELAY

Of particular interest where size and cost are factors, this new series of Midget Relays incorporates all of the fine construction features typical of the ADVANCE line. This unit measures only 1 $\frac{1}{2}$ " x  $\frac{3}{4}$ " x 1 $\frac{1}{8}$ " high. Pure Silver contacts are used,  $\frac{1}{8}$ " in diameter. Standard coils are obtainable from 2 to 32 V D.C. and 1 to 115 V A.C. The following switch combinations can be supplied:

TYPE		CONTACT COMBINATION	LIST PRICES
A.C.	D.C.		
1505	1605	DP-ST NOR. OPEN .....	\$3.75
1506	1606	DP-ST NOR. CLOSED .....	3.75
1504	1604	DP-DT .....	4.00

## ELECTRONIC RELAY

An ultra-sensitive unit for use in electronic tube circuits, providing positive, dependable control on as little as 12 milliwatts. Adjustment screws to change the air-gap between the armature and the pole face, allow operation on a voltage differential of 30%, a condition ideal for electronic applications. The contact combination is Single Pole-Double Throw, employing  $\frac{1}{8}$ " Pure Silver points to safely handle 100 watt non-inductive loads. Obtainable in resistances of 2500, 3000, 5000 and 10,000 ohms at no increase in price..... List Price...\$6.50

Type 850

## GENERAL PURPOSE RELAYS

Types 951B — 952B — 953B

These Relays afford maximum power and efficiency at very low cost.  $\frac{1}{4}$ " Pure Silver contacts are standard on the Single Pole-Single Throw (N. O.) Type 951B—Single Pole-Single Throw (N. C.)—952B—and Single Pole-Double Throw—953B—switch combinations. Adequately insulated and entirely above "ground," these Relays may be mounted on any type of panel, quickly and easily, by means of the metal mounting bracket. Coils are obtainable to 115V A. C. or 60V D. C.

List Price .....\$3.50

## GEN-E-MOTOR STARTING RELAY

Type 951C

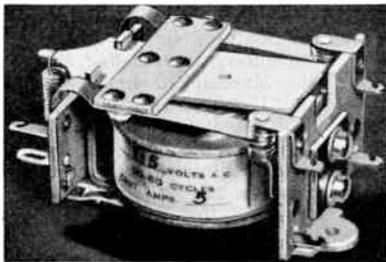

An exceptionally sturdy power transfer Relay, easily capable of handling the heavy current surge encountered on "cold" starts in motor-generator systems. The contacts are  $\frac{3}{8}$ " Pure Silver and have ample carrying capacity for the usual 200-500V converters. Heavy-duty in every phase of construction, this unit is not to be compared with the common five and ten ampere circuit controls. Base dimensions are 3" x 2" and each unit is complete with a braided generator-cable pig-tail and binding posts for all connections. Coils for 5 $\frac{1}{2}$  to 32V D. C. or 1 to 115 A. C. .... List Price...\$6.00

# Advance RELAYS

## MIDGET TYPE CIRCUIT CONTROLS

These Relays are designed for general circuit control applications where the space for mounting is limited, and measure only 2½" in length, 1½" in width, and 1¼" in height. A.C. operated Relays in this series require but 4 watts on 50/60 cycle current, and the D. C. models from 1.5 to 2 watts, affording maximum effi-

ciency without sacrifice of power and dependability. Metal brackets (not shown in the illustration) are supplied with all Relays of this type, and except on special order, these models are limited to the following contact arrangements and the usual standard operating voltages:

Contact Combinations	Type Numbers	Contact Sizes and List Prices	Type Numbers	List
Double Pole-Double Throw .....	104AM	\$5.00	104BM	\$5.50
Double Pole-Single Throw (N. O.) .....	105AM	4.75	105BM	5.25
Double Pole-Single Throw (N. C.) .....	106AM	4.75	106BM	5.25

The above chart lists type numbers for A.C. operated Relays. D. C. coils may be obtained by changing the series number from 100 to 200. Prices apply to both.

## INDUSTRIAL CONTROL RELAYS

Series 960

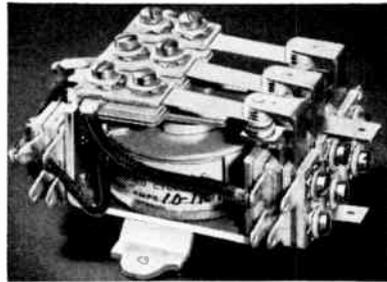

Designed mainly for industrial applications — air conditioning, lighting, and power transfer systems, the Series 960 Relays embody all of the rugged construction features demanded in units of this

type without sacrificing the desirable qualities of the midget style. Available in the following contact combinations, and to operate on standard A. C. and D. C. voltages.

Type	List
Type 964B—Double Pole Throw .....	\$5.00
Type 965B—Double Pole-Single Throw (N. O.) .....	4.75
Type 966B—Double Pole-Single Throw (N. C.) .....	4.75

For smaller contacts, deduct 25c for 3/16" or 50c for 1/8" points, from the above list prices.

Having the same characteristics as the Series 960 Relays, these Three Pole units, Series 970, may be used for fractional h/p 3-phase motor controls, etc. The area required for mounting 2½" x 1½" for Type

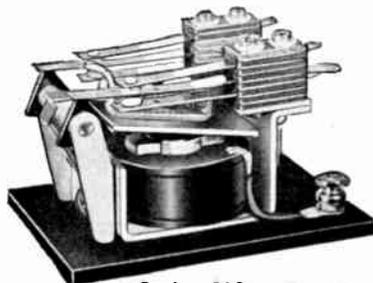

Series 900

970 Relays, as against 2½" x 1¼" for the Type 960's, is due to the slightly larger frame. The metal brackets are the same in both instances—2-5/16" long, and 2" between centers of the 6/32 mounting holes. Available in the voltages indicated in the preceding series, and in the following contact combinations:

Type	List
Type 977B—Three Pole-Single Throw (N. O.) .....	\$5.25
Type 978B—Three Pole-Single Throw (N. C.) .....	5.25
Type 979B—Three Pole-Double Throw .....	6.00

For smaller contacts, deduct 50c for 3/16" or 75c for 1/8" points from the above list prices.

## IMPULSE RELAYS

Series 900

This is another type of Relay for use where it is not feasible to have the holding coil in constant service, but differs from the latching types in that it may be controlled with a single push-button. Coils to operate this type of unit are

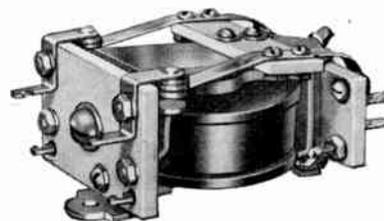

extremely heavy-duty, and are for intermittent (impulse) use only. Available for standard A. C. and D. C. voltages in the following combinations:

	D.P.S.T. List	D.P.D.T. List
With 1/8" Pure Silver contacts .....	\$8.50	\$9.00
With 3/16" Pure Silver contacts .....	9.00	9.50
With 1/4" Pure Silver contacts .....	9.50	.....

When ordering these types, be sure to specify the input voltage, contact combination, and size of points.

## MIDGET TYPE R.F. RELAYS

These models are sturdy, compact Double Pole - Double Throw Transmitter Relays, designed expressly for use in all types of mobile-portable communications equipment

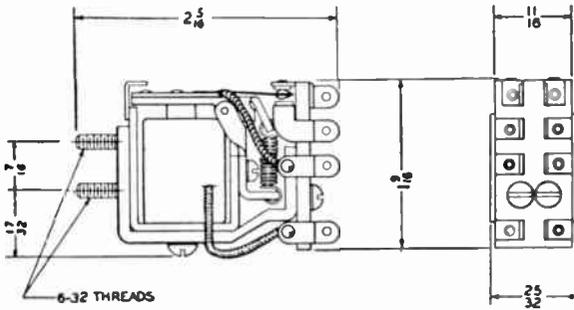

Series 1000—A.C. Series 2000—D.C.

where space is at a premium. The insulation on this, as on the Type 400's, is Isolantite for both the cross-arm and end pieces, with all holes adequately well spaced to prevent structural weakness and possible "creepage." Coils are obtainable for all A. C. and D. C. voltages, and will operate in any position, the former consuming approximately four watts—the latter, two watts of power. Dimensions are 2¾" x 1½" x 1¼".

List Price ..... \$7.50

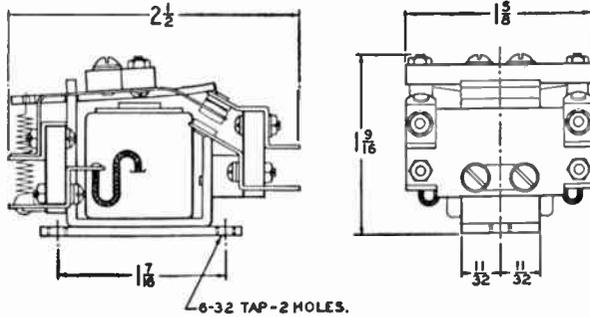

# ALLIED RELAYS

## FOR CURRENT AND VOLTAGE CONTROL EQUIPMENT

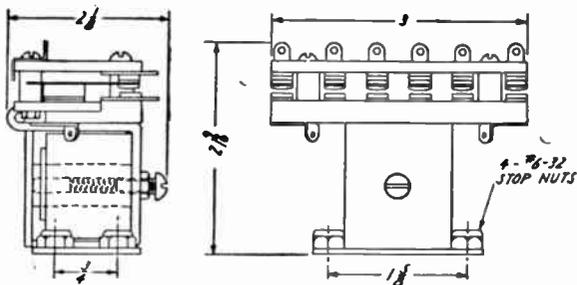

### "BJ" A SMALL POWER RELAY

A small compactly designed 2 watt operating power relay with contacts rated at 5 amperes for 24 volts DC or 110 volts AC. Standard is double pole double throw. Weight is 2 1/4 ounces.

### HR RELAY

A double pole double throw relay with Contact Plate of Ceramic and Cross Arm of low-loss Steatite. Operates at 15 amperes for 32 volts DC and 110 volts AC non-inductive. Weighs 6 ounces.

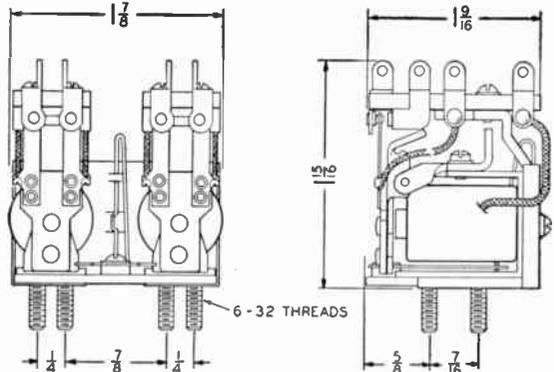

### "BN" A MULTIPLE CONTACT RELAY

Contact arrangement is 6 pole double throw. Contact rating (with Silver Contacts) 15 amperes for 12 and 24 volts DC and 110 volts AC. Weight is 11 ounces.

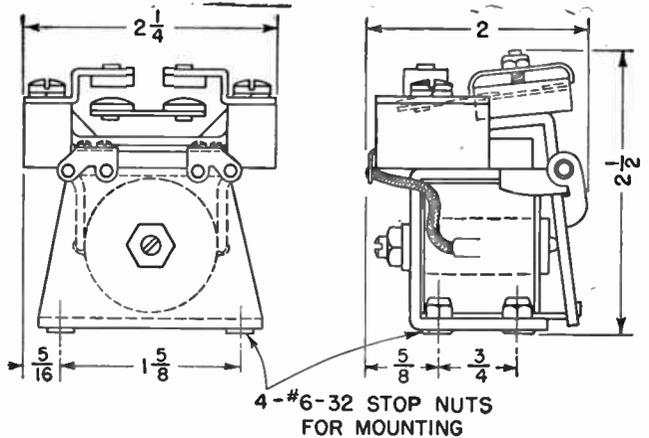

### "BJU" A TOGGLE LATCHING RELAY

BJU locks mechanically in either position so that momentary current needs to be applied to the coils. Four pole double throw, maximum rating 5 amperes per contact, non-inductive, for 12 and 24 volts DC and 110 volts AC. Weight is 6 1/2 ounces.

### "CN" A POWER RELAY

Contact arrangement is single pole single throw, normally open or closed, double break. Contact rating is (with Silver Contacts) 50 amperes for 12 and 24 volts DC or (Model CNS with Alloy Contacts) 75 amperes for 12 and 24 volts DC. Weight is 9 ounces.

**ALL ALLIED CONTROL RELAYS ARE DESIGNED TO MEET ARMY, NAVY and CAA SPECIFICATIONS. THEY CAN BE ADAPTED TO MEET SPECIFIC CUSTOMER NEEDS.**

*Write for Catalog*

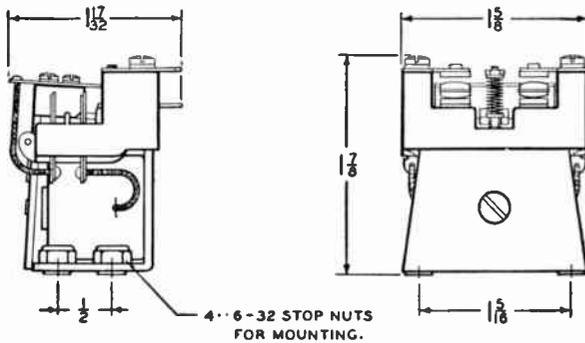

**ALLIED CONTROL COMPANY, INC.**  
**2 EAST END AVENUE • (AT 79th STREET) • NEW YORK, N. Y.**

# ALLIED RELAYS

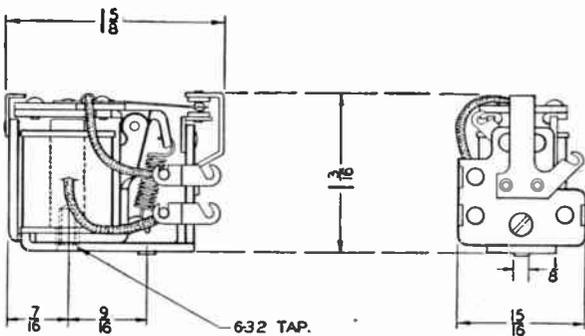

## FOR CURRENT AND VOLTAGE CONTROL EQUIPMENT

**BO 6**

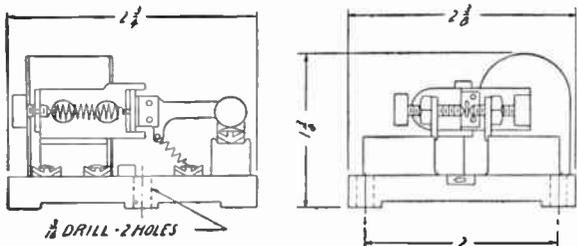

### "BO" AND "DO" SMALL POWER RELAYS

Compactly designed 2½ watt operating relays with contacts rated at 15 amperes for 32 volts DC and 110 volts AC. The "BO" type is double pole double throw. The 3 and 4 pole version is known as the "DO" type. This relay will stand vibration to 12 G and operates at plus 120°C or minus 50°C. The double pole "BO" relay weighs 4 ounces.

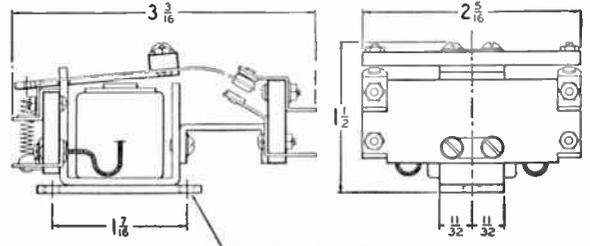

### "AR" AND "AS" FEATHERWEIGHT RELAYS

AR is a single pole double throw relay with transfer contact grounded to frame. AS is a single pole double throw relay with transfer contact insulated from frame. Their contact ratings are 5 amperes for 12 and 24 volts DC and 110 volts AC, non-inductive. Weights are 50 grams.

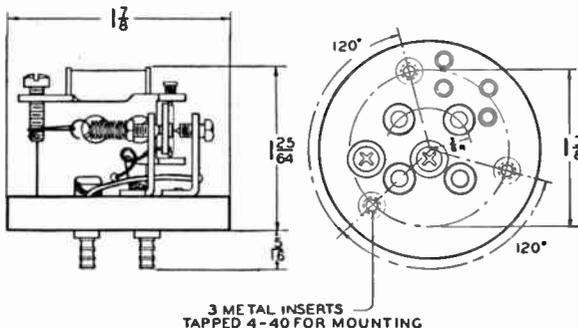

**"B" A SENSITIVE RELAY**

Operates at 0.12 watts for single pole double throw or double pole double throw arrangement, and weighs 7 ounces. Maximum contact rating non-inductive 48 volts DC at 1 ampere—125 volts AC at 5 amperes.

**HF RELAY**

A double pole double throw relay with Ceramic Contact Plate and Cross Arm of low-loss Steatite. Contact rating is 15 amperes for 12 and 24 volts DC and 110 volts AC non-inductive.

**"G" A SENSITIVE RELAY**

Single pole single throw normally open or closed, or single pole double throw. Operates at 0.05 and is rated at 1 ampere for 48 volts DC and 5 amperes for 110 volts AC, non-inductive. Weighs 3½ oz.

**ALL ALLIED CONTROL RELAYS ARE DESIGNED TO MEET ARMY, NAVY and CAA SPECIFICATIONS. THEY CAN BE ADAPTED TO MEET SPECIFIC CUSTOMER NEEDS.**

# RELAYS BY GUARDIAN

THE MOST COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

## A-100 ANTENNA RELAYS

A-100 Antenna Relays have been designed for the amateur who wants compact, convenient, low cost antenna changeover control.

### OPERATING DATA

- Contacts**
- A. Points—Large, fine silver, which give long life even when under heavy overloads.
  - B. Insulation—Low loss AlSiMg 196.
  - C. Switches—Low capacity due to special form.
  - D. Control Capacity—Up to 1 KW. either AF or RF circuits, on frequencies up to and including 28 MC. Tested for these ratings under actual operating conditions.

### Terminals

- A. Solder lug type tinned for easy soldering.

### Coil

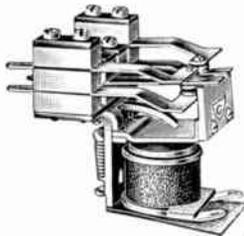

- A. Standard coils operate on 110 volts 50-60 cycles A. C. Coils for other voltages and currents on specification at 10% addition to list price.
- B. Power consumption at above voltage approximately 7 VA.

### Mounting

- A. Two holes, single screw. Screw furnished.
- B. May be mounted on any type panel. All terminals are insulated from ground.

### Applications

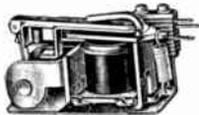

- A. Radio—
  - A-100—Antenna changeover, break-in, heavy duty keying in the primary with contacts in parallel, grid controlled rectifier keying, and many other double pole double throw uses.
  - A-100-C—For single wire fed antenna installations. Two A-100-C Relays in place of an A-100 in open wire line systems avoid possible mismatch caused by distorting the feed system to provide for relay installation.
- B. Industrial—
  - HF and UHF equipment, remote motor control, heating equipment, etc.

	Length	Width	Height	Shp. Wt.	List Price	Net Price
*A-100	2 3/4"	2"	2 3/8"	7 oz.	\$6.85	\$4.11
†A-100-C	2 3/4"	1"	2 3/8"	6 oz.	3.80	2.28

\*Double pole, double throw. †Single pole, double throw.

## RC-100 REMOTE LOCKING CONTROL RELAY

RC-100 Remote Locking Control Relays are a Guardian development of the momentary impulse locking control relay. The circuit to the coil needs be energized only long enough to close armature; contacts lock automatically. Each impulse reverses position of contacts.

### OPERATING DATA

- Contacts**
- A. Contacts—1/4" fine silver. Can handle up to 1500 watts at 110 volt, 60 cycle, non-inductive AC. Can also be used in AC primary circuit of any inductive power supply delivering up to and including 1 KW.
  - B. Insulation—High test Bakelite.
  - C. Furnished in two standard combinations:
    1. Four pole single throw. (RC-100-AR)
    2. Three pole. One pole double throw, two poles single throw. (RC-100-BR).
 For combinations other than above, add 10% to list prices.

### Terminals

- A. Solder lug type, tinned for easy soldering.

### Coil

- A. Standard coils operate on 110 volt, 50 to 60 cycle AC. Coils for other voltages and currents on specification at 10% addition to list prices.
- B. Power consumption—Standard coil requires approximately 23 VA, is for intermittent duty only. Coil is energized only long enough to allow relay to step to the next switch position. Power is consumed for the duration of the energizing impulses only, and remains off until the next switching operation is required.

### Mounting

- Mounts on metal base with all terminals insulated.

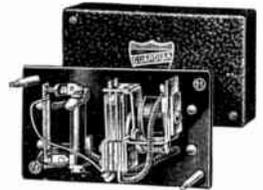

### Applications

- Break in control; phone to CW switching. Any circuit control where locking circuits are used.

	Shp. Wt.	List Price	Net Price
RC-100-AR	8	\$5.75	\$3.45
RC-100-BR	8	6.30	3.78

## T-100 TIME DELAY RELAYS

A laminated relay in assembly with a resistance wound thermostatic unit. The laminated construction of the field piece and armature give an efficient, powerful, trouble free time delay relay. Unit is mounted in a tightly closed metal box for protection against dust and dirt.

### OPERATING DATA

- Contacts**
- A. Oversize silver contacts give long life, can take severe overloads without damage.
  - B. Contact capacity—1500 watts on 110 volt 60 cycle, non-inductive AC. Can also be used in the AC primary of any inductive power supply delivering up to, and including, 1 KW.
  - C. Insulation—high test bakelite—tested at 1500 volts for breakdown to ground.
  - D. Maximum switch capacity—single pole, single throw.
  - E. Time delay—adjustable for any period between 10 and 60 seconds.
  - F. After contacts close, thermostat blade is cut out of circuit.
- Coil**
- A. Standard unit designed for operation on 110 volt 60 cycle non-inductive AC. For coils operating on other than standard voltage, add 10% to list price.
  - B. Power consumption of coil and time delay during closing of thermostatic blade is approximately 10 VA, after closing, 5.5 VA.

### Applications

- A. Radio—In transmitter circuits to prevent damage of rectifiers and tube filaments by application of plate current before filaments are sufficiently heated.
  - B. Industrial—Any control problem requiring the changing of circuits after a predetermined interval.
- T-100—5 1/4" long, 3" wide, 2 1/4" high. Shipping weight 1 1/4 lbs.  
List Price \$13.80 each Net Price \$8.28 each

## T-110 TIME DELAY RELAYS

The T-110 is a compact, sturdy, economical time delay relay for use in applications not requiring the capacities of the T-100. Contact capacity—1250 watts on 110 volt, 60 cycle, non-inductive AC. Can also be used in the AC primary circuit of any inductive power supply delivering up to, and including, 1 KW.

T-110—5 1/8" long, 3 1/4" wide, 2 1/4" high. Shp. Wgt. 8 oz.  
List Price \$8.60 each Net Price \$5.16 each

## R-100 HIGH FREQUENCY RELAYS

R-100 Relays are small, efficient, economical, rugged controls designed to give maximum contact capacity in minimum space at low cost.

### OPERATING DATA

- Contacts**
- A. Points—Large fine silver which give long life even when severely overloaded.
  - B. Insulation—Low loss AlSiMg 196.
  - C. Switches—Special form of leaves gives low capacity.
  - D. Contact Capacity—Up to 1 KW at any frequency up to and including 28 MC, on AF and RF circuits.
- Terminals**
- A. Solder lug type, tinned or easy soldering.
- Coil**
- A. Standard coils operate on 110 volt 60 cycles A.C., draw approximately 7 VA.
  - B. For coils operating on other voltages or specifications, add 10% to list price.

### Mounting

- A. Two holes, single screw. Screw furnished.
- B. May be mounted on any type of panel, as all terminals are insulated from ground.

### Applications

- A. Radio—Band switching, high voltage keying, grid controlled rectifier keying, crystal switching, remote control of receiver and transmitter, etc.
- B. Industrial—Oven control, remote motor control, short wave therapy and diathermy, and innumerable RF and UHF uses.

	Shp. Wt.	List Price	Net Price
R-100—S.P.S.T., normally open	1" 2"	6	\$3.15
R-100-B—S.P.S.T., normally closed	1" 2 3/8"	6	3.15

Length for above items: 2 3/4"

\*The R-100-G is TripleX insulated, is rated at 400 watts at 14 megacycles. For applications requiring higher ratings use the A-100.

CIRCUIT DIAGRAMS FURNISHED ON REQUEST

# RELAYS BY GUARDIAN

THE MOST COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

## U-100 AND U-200 ADJUSTABLE UNDERLOAD RELAYS

Sensitive, precise, finely constructed instruments designed for long, trouble free service. Relays are encased in attractive black metal container protecting them against dust, dirt, and accidental misadjustment.

### OPERATING DATA

#### Contacts

- A. Points—Oversize, fine silver for long life, can take severe overloads.
- B. Insulation—Bakelite.
- C. Switches—Single pole, single throw, normally open.
- D. Control Capacity—A. C. primary of any power supply delivering up to and including 500 watts. Tested for this rating under actual operating conditions.

#### Coil

- A. Standard coil operates over an adjustable range of 100 to 200 mils D. C. on the U-100 model; 200 to 400 mils on the U-200 model. Release current value is 75% of the attract current value. Desired attract current is obtained by screw adjustment of the spring tension.
- B. Normal current through coil of U-100 is 300 mils; of the U-200, 600 mils.
- C. At above ratings, the voltage drop through the U-100 coil is 10.5 volts; through U-200 coil, 9 volts.
- D. To prevent possible "talking back" of relay during modulation, it is recommended that a 200 volt condenser of sufficient capacity, usually a 10 mfd., be connected across the relay coil.

#### Mounting

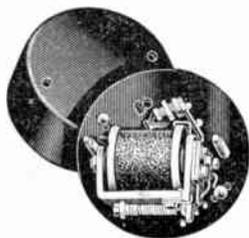

- A. Preferred mounting position has armature hinge on bottom with armature vertical.
- B. Two insulated mounting studs and protective fibre disc permit mounting on any type of panel.
- C. Two holes, two screws. Screws furnished.
- D. Dust proof metal cover, thumb screw fasteners.

#### Terminals

Heavy solder lugs, tinned for easy soldering.

#### Applications

- A. Radio—Protection of class "B" audio equipment in case of class "C" load failure.
  - B. Industrial—Any D. C. circuit where it is desirable to maintain currents above a set value.
- U-100 and U-200 are 3 1/4" in diameter, 2 1/4" high. Shipping weight 14 oz. List Price \$9.75 ea. Net Price \$5.85 ea.

## X-100 ADJUSTABLE OVERLOAD RELAYS

Positive precise protection against current surges and continuous overloads. X-100 replaces expensive, unsatisfactory, time wasting fuses, provides flexible control of the current flow.

### OPERATING DATA

#### Contacts

- A. Points—Large, fine silver, for long life. Can take severe overloads without damage, rated for 1500 watts on 110 volt, 60 cycle, non-inductive A. C. and in A. C. primary circuit of any inductive power supply delivering up to and including 1 KW.

- B. Insulation—High test bakelite.

- C. Switches—Single pole, single throw with special constant tension form. Contacts lock open, cannot be reset, or points held in contact, until overload stops.

#### Terminals

- A. Solder lug type, tinned for easy soldering.

#### Coil

- A. Adjustable to operate on any current flow from 150 to 650 mils.
- B. Voltage drop across coil is 6.5 volts at 650 mils, 9 volts at 150 mils.
- C. Insulation between coil and ground rated at 200 volts.

#### Mounting

- A. Single hole. Mounts on rear of panel with reset button extending through panel. Bushing, and lock nut, supplied with relay, hold unit firmly in place. Bushing requires a 3/8" hole.
- B. May be mounted on any type of panel. All terminals are insulated from ground.

#### Applications

Overload protection in circuits with varying current demands. Adjustability makes this an ideal relay for experimental work with new circuits.

X-100 4" long, 2 1/2" wide, 3 1/2" high. Shipping weight 12 oz. List Price \$11.50 ea. Net Price \$6.90 ea.

Available in non-adjustable type to operate on 150-250-500-750 mls List Price \$8.60 ea. Net Price \$5.16 ea.

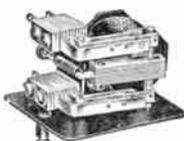

## B-100 BREAK IN RELAYS

Specially designed for break-in operation on amateur transmitters. Low current draw and compact assembly, plus use of laminated field piece and armature, make the B-100 an ideal relay for this purpose.

### OPERATING DATA

#### Contacts

- A. Points—1/4" fine silver, capacity to 1500 watts. 60 cycle non-inductive A. C. and in A. C. primary circuit of any inductive power supply delivering up to and including 1 KW.
- B. Insulation—High test bakelite.
- C. Switches—Double pole, double throw, ample capacity.

- D. Control Capacity—Break-in circuit on any transmitter up to 1 KW.

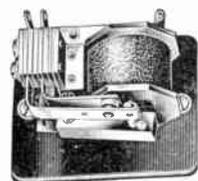

#### Coil

- A. Standard coils operate on 50-60 cycle A. C. 110 volts. Coils for other voltages and currents, on specifications at 10% addition to list price.
- B. Power Consumption—Standard coil requires approximately 8 1/2 VA.

#### Applications

- A. Break-in circuits in amateur transmitters.
- B-100—2 3/4" long, 2 1/8" high, 2 1/4" wide. Shipping weight 11 oz. List Price \$8.60 ea. Net Price \$5.16 ea.

## K-100 KEYING RELAYS

Low voltage relays controlling high voltage transmission. Relay will follow key or bug at highest WPM rate attainable. High speed of response plus strong magnet and return spring, gives a clean make and break, producing the best CW note.

### OPERATING DATA

#### Contacts

- A. Points—Oversize silver. Handle 1500 watts on 60 cycle non-inductive 110 volt A. C. and in A. C. primary circuit of any inductive power supply delivering up to and including 1 KW.

- B. Insulation—High test bakelite. Unit will withstand 5000 volts to ground.
- C. Switches—Compact, single pole, single throw. Design of

leaves give exceptionally fast response.

- D. Control Capacity—Up to 2000 volts with clean make and break.

#### Coil

- A. Standard coils operate on 1 1/2 to 4 volts D. C., 5 to 16 volts A. C. Power consumption on A. C., approximately 1 1/2 V. A., D. C. approximately 1 watt. Coils for other voltages on specification at 10% addition to list price.

#### Applications

Control of battery receivers, transmitters using filament center tap keying of any stage having up to 2000 volts on plate, primary keying or control of power supplies up to and including 500 watts and grid-controlled rectifier keying of 3000 volt power supplies.

K-100—2 3/4" long, 2 1/4" wide, 1 7/8" high. Shipping weight 10 oz. List Price \$6.30 ea. Net Price \$3.78 ea.

# PRICE Brothers Co. RELAYS

FREDERICK, MARYLAND

## RADIO FREQUENCY AND GENERAL PURPOSE RELAYS

The Type 17 series of relays were designed primarily to provide a general purpose relay which may be used in a variety of transmitter and receiver circuits. This series of relays can be furnished in phenolic insulation for low-voltage circuits, or ceramic insulation for use in radi-frequency circuits. Quite frequently this type of relay will fulfill all the relay requirements in a given design, thus, simplifying the wiring and mounting of the relays. In the design of these relays are many special features not usually found in relays of this price range such as; self-wiping contacts, all metallic parts plated, and vacuum impregnated coils. Contacts are  $\frac{1}{4}$ " fine silver rated at 10 amperes. Coil voltages: 6, 12, and 24 V. D.C., 115 V. A.C.

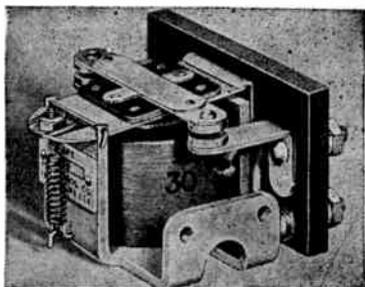

TYPE 17

Dimensions— $2\frac{1}{4}$ " x  $1\frac{1}{2}$ " x  $1\frac{1}{4}$ "

30 years  
of Relay  
Specialization

Type	Contact Arrangement	$\frac{1}{2}$ Aux. Contacts	Insulation	List Price

17-D	DP-ST-NO		Ceramic	7.85
17-E	DP-DT		Ceramic	9.00
17-F	DP-DT	SP-NO	Ceramic	10.10

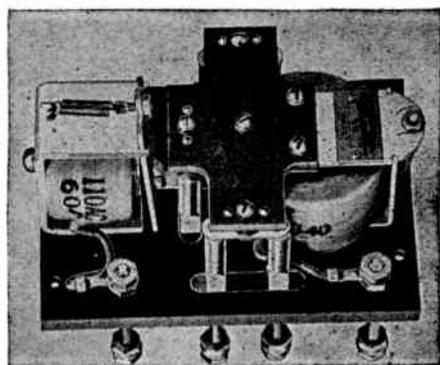

TYPE 30

### GENERATOR STARTING RELAY

The Type 30 is a rugged compact relay especially designed for motor generator starting service. The compact design, with all terminal connections on one end, make this relay ideally suited for use in police mobile transmitters, amateur portable mobile transmitters, and portable amplifiers. Contacts are  $\frac{3}{8}$ " diameter fine silver, rated at 40 amperes continuous duty. All terminals are mounted on a  $\frac{1}{4}$ " thick bakelite panel for ease in wiring. The relay can be mounted in any position by means of two 8-32 tapped holes provided in the mounting bracket.

Dimension— $2\frac{1}{2}$ " x  $2\frac{1}{2}$ " x  $1\frac{1}{2}$ "  
Coil Voltage—6, 12, 24 V. D.C.  
LIST PRICE ..... \$8.40

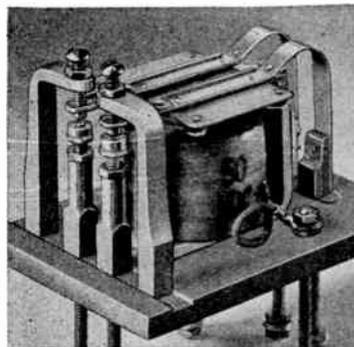

TYPE 55

### HIGH SPEED KEYING RELAY

These relays are designed specifically for transmitter keying application where the utmost in keying characteristics are required at speeds up to 50 words per minute. These features have been achieved by the use of a very light weight armature assembly, and a special magnetic structure made of high grade silicon steel.

The stationary contacts are adjustable, and may be readily replaced and adjusted in the field. All contacts are insulated from each other and from ground for 300 volts D.C. The relays are for panel mounting and are furnished with back connection terminal studs. They will be furnished with a cover if specified.

Reference to the table at the right will show the standard contact arrangements available, and the characteristics of the 50 volt D.C. coil. Other operating coil voltages are available.

Type	Contact Arrangement	Coil Voltage	Coil Resistance Ohms	Watts	List Price
16	SPST NO	50 VDC	1000	2.5	\$25.85
27	DPST NO	50 VDC	1000	2.5	20.25
33	SPST NO	50 VDC	1000	2.5	40.50

### LATCHING TYPE ELECTRICAL RESET RELAYS

The mechanical arrangement of this type of relay is such that after the pull-in coil is momentarily energized, the armature carrying the contacts closes and latches mechanically. When the trip coil is momentarily energized the armature opens.

This type of relay fits many applications where it is not desirable to have current on the relay coil continuously, or where momentary start-stop push button control is desired.

The standard relay is for 115V, AC operation, but DC or combinations of AC and DC coils can be furnished in voltages up to 230.

The contacts are  $\frac{1}{4}$ " diameter fine silver of the bridging type and are rated at 15 Amperes AC non-inductive.

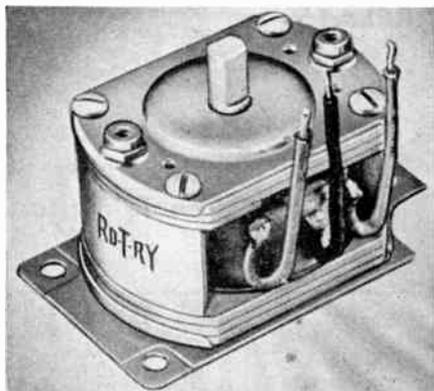

Since the relays are designed primarily for panel mounting, the standard models are furnished with back connection terminal studs of any length specified.

FREDERICK, MARYLAND

TYPE 76

## TYPE 76 Standard Two-position "RO-T-RY" UNIT

This unit is a compact driving mechanism providing up to 30° of clockwise or counterclockwise rotation. When the unit is used to operate a standard switch wafer, one normally closed contact is required for the relay coil circuit. However, if wafers are not used; a side mounting auxiliary switch will be provided if specified. This unit can be supplied for DC operation only.

Space required for mounting is as follows: Base 2-17/32 x 1 1/2". Height exclusive of shaft extension 1-5/16".

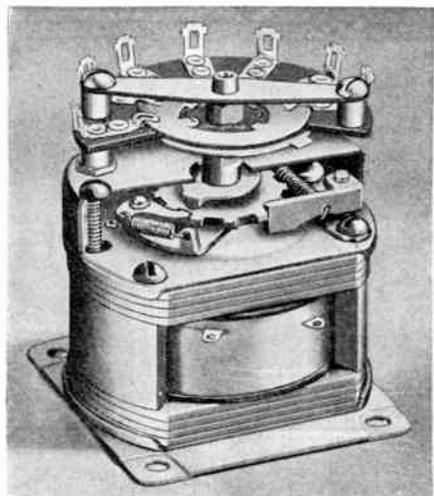

LIST PRICE ..... \$11.25

TORQUE SPECIFICATION (at min. voltage)

Max. Forward Torque 8 1/2 oz. in. Max. Spring Return 8 1/2 oz. in.

### STANDARD COIL VOLTAGES AND COIL CURRENT

Normal Volts DC	Min. Volts DC	Max. Volts DC	Coil Current at normal voltage	
			†Start	Hold
14	9	16	7 amps.	250 MA
28	18	32	3.7 amps.	125 MA

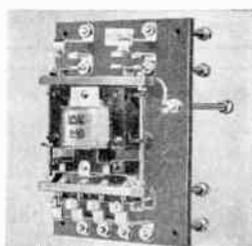

## TYPE 82 "RO-T-RY" Stepper

The standard stepping unit is a compact twelve-position driving mechanism which will operate a shaft extension through 360° in twelve progressive steps. The unit is designed for one step indexing for each current impulse and can be made to operate either clockwise or counterclockwise. The actuator can be furnished with either a spring or a magnetic drive. This unit can be supplied with 12 or 24 VDC coils. The total operating current depends on the total torque requirement of the unit which should not be in excess of 12 oz. in. This unit can be supplied with DC operation only.

Space required for mounting is as follows: Base 2" x 1 7/8" — Height exclusive of shaft extension is 1 3/4" ± 1/16".

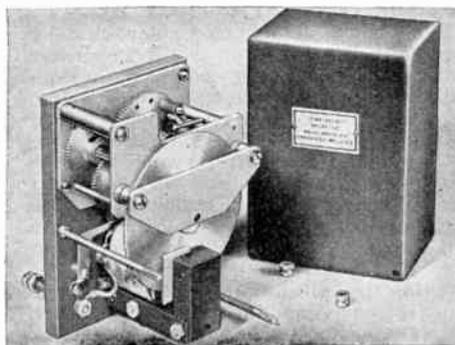

LIST PRICE...\$22.50

## TYPE 92 → TIME DELAY RELAY

The Type 92 Time-Delay Relay is a high quality relay recommended for use in equipment where absolute reliability is demanded under the most severe temperature and humidity conditions. The relay represents a departure from conventional motor-driven time-delay design in that the driving motor is of the induction disc type. This design provides a reliable slow speed, high torque motor, which consists of an aluminum disc rotating in the air gap of a high efficient laminated AC field structure. This design is responsible for the reliable operation of this relay at temperatures as low as -40 degrees Centigrade, where conventional synchronous clock motor types fail due to the drag caused by lubricating oils at this low temperature.

The standard model allows a time-delay up to 55 seconds adjustable in 5 second steps. Contact arrangement is SP-ST-NO with 3/16" diameter fine silver contacts rated at 5 amps. Operating voltages for this relay are 115 Volts, 60 Cycles AC, and 220 Volts, 60 Cycles, AC. Dimension—5" x 3 3/8" x 2-15/16". LIST PRICE.....\$61.85

## A. C. PLUNGER TYPE RELAYS

The special feature of this line of relays is the sturdy, highly efficient and powerful AC solenoid, around which the various contact arrangements and assemblies are built.

In the design of this solenoid, the prime consideration was the complete elimination of all AC chatter and hum usually associated with this type of construction. This highly desirable feature is due largely to the fact that all the pole faces are accurately ground, after the laminations are completely assembled and riveted.

Due to the complete absence of noise and vibration, these relays are especially suited for use in radio transmitters and other sensitive communications equipment.

Since this relay has been designed primarily for this field, it is of the panel mounting type, with back connection terminal studs furnished any length specified by the customer.

Any of the types listed below may be furnished with ceramic insulation for high voltage or RF applications.

The contacts are all of the double break or bridging type, and are either 3/8" or 1/2" dia. fine silver, depending on the rating desired. Reference to the table will show the various contact arrangements, contact ratings, coil voltages and insulations which are standard.

Type	Contact Arrangement	AC Coil Voltage	Overall Size Length	Width	Insula-tion	Contact Size	List Price
100	2P-NO-3P-NC	115-230	4 3/8"	6 3/8"	Phenolic	3/8" or 1/2"	33.75

# Sensitive RELAYS

## SERIES 4 RELAYS

### TYPE 4R

Cover:  $1\frac{1}{2}$ " x  $1\frac{1}{2}$ " x  $2\frac{5}{8}$ " high above socket.

Mounting: by standard 5-pin tube base.

Connections: by standard tube socket.

List Price: \$6.50.

### HERMETICALLY SEALED RELAYS

**TYPE 4AH:** Same as Type 4A but with cover sealed by gasket to moulded base.  $2\frac{1}{8}$ " diameter.

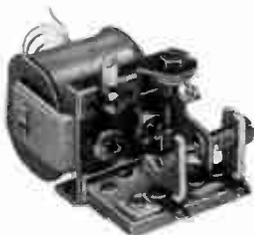

List Price: \$6.50.

**TYPE 4AHPL:** Same as Type 4APL but with cover sealed by gasket to moulded base.  $2\frac{1}{8}$ " diameter.

List Price: \$6.50.

**TYPE 4RHPL:** Similar to Type 4R but with cover solder-sealed to glass base and with soldering lugs and mounting ears instead of 5-pin base. (See illustration of 5RHPL).

List Price: \$8.50.

### TYPE 4F

Without cover or base.

Mounting: Two #6-32 screws on  $\frac{3}{8}$ " centers.

Connections: Coil leads; contact lugs.

List Price: \$5.50.

**GENERAL SPECIFICATIONS:** Balanced armature construction of series 4 relays assures positive operation under extreme vibration and shock as experienced in aircraft service.

**INPUT** must be DC on all types except those designated for AC input. In stationary service inputs as low as 6 milliwatts provide satisfactory operation; but where vibration is present as in aircraft service the input should be a minimum of 30 to 50 milliwatts.

**LOAD CAPACITIES** range from 1 ampere at 115 volts AC to as high as 20 amperes at 24 volts DC according to input power, nature of load, duty cycle, and required life expectancy.

**OPERATING SPEED** varies from 1/60 to 1/1000 second, depending upon ratio of "R" to "L" in coil circuit. Releasing speed is usually greater.

**LIST PRICES** shown are for relays with coils of 2000 ohms or less. For coils of 5000, 8000, or 10,000 ohms add \$.50 to list prices. For 14,000 ohm coil add \$1.00 to list prices.

### TYPE 4A

Cover:  $2\frac{3}{16}$ " diameter snap-on; 2" above socket.

Mounting: by standard 5-pin tube base.

Connections: by standard tube socket.

List Price: \$6.50.

### TYPE 4APL

Cover:  $2\frac{3}{16}$ " diameter snap-on;  $1\frac{3}{4}$ " high.

Mounting: 3 mounting ears on  $2\frac{1}{2}$ " diameter.

Connections: soldering lugs under base.

List Price: \$6.50.

### SPECIAL PURPOSE RELAYS

For AC Input, Types 4R and 4RHPL are available with built-in dry rectifier in full-wave bridge with filter condenser. Height is increased to  $3\frac{1}{4}$ ".

Designate by adding S to type and add \$3.00 to list price.

**FOR CLOSE DIFFERENTIAL** with substantial inputs series 4 relays can be factory adjusted to drop out up to 95% of pull-on voltage.

**FOR HIGH SPEEDS** of operation with long life expectancy, as for keying, special types of pivots are available at slight extra cost.

**CONSTANT VOLTAGE RELAYS** which operate at a definite voltage regardless of varying temperatures are available with some sacrifice of sensitivity, and in various types.

**AC COILS** can be supplied for specific applications on all series 4 relays.

*In ordering or asking for quotations give all possible details of circuit, environment, operating conditions, tolerances, and life expectancy.*

# Sigma Instruments, Inc.

64 CEYLON STREET  
BOSTON 21, MASS.

# Sensitive RELAYS

## SERIES 5 RELAYS

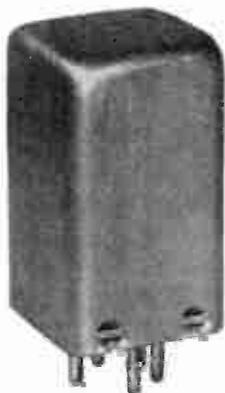

### TYPE 5R

Cover: 1½" x 1½" x 2¼" high (above socket).

Mounting: by standard 5-pin tube base.

Connections: by standard tube socket.

List Price: \$8.00.

### HERMETICALLY SEALED RELAYS

TYPE 5AH has 2¾" dia. cover sealed to moulded base; height 1⅝" above socket.

Mounting: by standard 5-pin base.

Connections: by standard socket.

List Price: \$8.00.

TYPE 5RHPL: Similar to 5R but with cover solder-sealed to glass base and with soldering lugs and mounting ears instead of 5-pin base. (See illustration.)

List Price: \$10.00.

5RHPL

### SPECIAL APPLICATIONS

The double coil design of the Series 5 relay permits many ingenious applications in control circuits. By separate coil connections (on special order) each coil can be energized by a separate source polarized to produce aiding or opposing forces. The relay then operates on the sum or difference of these forces according to polarity.

*When ordering or asking for quotations, give all possible details of circuit, environment, operating conditions, tolerances, and life expectancy.*

**GENERAL SPECIFICATIONS:** Double coil design combined with balanced armature construction makes the series 5 relays remarkably sensitive, rugged and compact. They maintain adjustment through a temperature range of -60 to +90 degrees centigrade. Shocks of 500 g will not disturb adjustment or damage the relay in any way when solidly mounted.

**INPUT** must be DC on all types except those designated for AC input. In stationary service inputs as low as 0.5 milliwatts provide satisfactory operation; but where vibration is present, as in aircraft service, 5.0 milliwatts is usually adequate. This offers contact pressures of 25 to 50 grams, sufficient for uninterrupted contact under vibration of more than 11 g's.

**LOAD CAPACITIES** range from 1.0 amperes at 115 volts AC to as high as 10 amperes at 24 volts DC according to input power, nature of load, duty cycle, and required life expectancy.

**OPERATING SPEED** is not as great as on Series 4 relays, varying from 1/20 to 1/100 sec., depending on circuit conditions.

**LIST PRICES** shown are for relays with coils of under 1000 ohms. For coils of 1000 to 8000 ohms add \$.50 to list prices. For coils over 8000 ohms add \$1.00 to list prices.

### MOUNTING FORMS

In addition to plug-in types, Sigma relays are available with side ears or spade bolts for mounting on metal chassis with lugs passing through a center hole for connection below deck. Another form includes a metal plate welded to the far end of the cover away from the lugs permitting wiring above deck.

### FOR AC INPUT

Types 5F, 5R and 5RHPL are available with dry rectifier in full-wave bridge. Dimensions are not changed. Designate by adding S to type and add \$3.00 to list price.

TYPE 5F

Without cover or base. Mounting: 2 #6-32 screws on 25/32" centers. Connections: lugs. List Price: \$7.00.

**Sigma Instruments, Inc.** 64 CEYLON STREET BOSTON 21, MASS.

# Sensitive RELAYS

## TYPE 4R

Cover:  $1\frac{1}{2}$ " x  $1\frac{1}{2}$ " x  $2\frac{3}{8}$ " high above socket.

Mounting: by standard 5-pin tube base.

Connections: by standard tube socket.

List Price: \$6.50.

## HERMETICALLY SEALED RELAYS

**TYPE 4AH:** Same as Type 4A but with cover sealed by gasket to moulded base.  $2\frac{1}{8}$ " diameter.

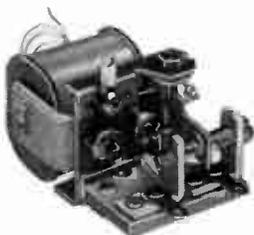

List Price: \$6.50.

**TYPE 4AHPL:** Same as Type 4APL but with cover sealed by gasket to moulded base.  $2\frac{1}{8}$ " diameter.

List Price: \$6.50.

**TYPE 4RHPL:** Similar to Type 4R but with cover solder-sealed to glass base and with soldering lugs and mounting ears instead of 5-pin base. (See illustration of 5RHPL).

List Price: \$8.50.

## TYPE 4F

Without cover or base.

Mounting: Two #6-32 screws on  $\frac{3}{8}$ " centers.

Connections: Coil leads; contact lugs.

List Price: \$5.50.

## SERIES 4 RELAYS

**GENERAL SPECIFICATIONS:** Balanced armature construction of series 4 relays assures positive operation under extreme vibration and shock as experienced in aircraft service.

**INPUT** must be DC on all types except those designated for AC input. In stationary service inputs as low as 6 milliwatts provide satisfactory operation; but where vibration is present as in aircraft service the input should be a minimum of 30 to 50 milliwatts.

**LOAD CAPACITIES** range from 1 ampere at 115 volts AC to as high as 20 amperes at 24 volts DC according to input power, nature of load, duty cycle, and required life expectancy.

**OPERATING SPEED** varies from  $1/60$  to  $1/1000$  second, depending upon ratio of "R" to "L" in coil circuit. Releasing speed is usually greater.

**LIST PRICES** shown are for relays with coils of 2000 ohms or less. For coils of 5000, 8000, or 10,000 ohms add \$.50 to list prices. For 14,000 ohm coil add \$1.00 to list prices.

## TYPE 4A

Cover:  $2\frac{3}{16}$ " diameter snap-on; 2" above socket.

Mounting: by standard 5-pin tube base.

Connections: by standard tube socket.

List Price: \$6.50.

## TYPE 4APL

Cover:  $2\frac{3}{16}$ " diameter snap-on;  $1\frac{3}{4}$ " high.

Mounting: 3 mounting ears on  $2\frac{1}{32}$ " diameter.

Connections: soldering lugs under base.

List Price: \$6.50.

## SPECIAL PURPOSE RELAYS

For AC Input, Types 4R and 4RHPL are available with built-in dry rectifier in full-wave bridge with filter condenser. Height is increased to  $3\frac{1}{4}$ ".

*When ordering or asking for quotations, give all possible details of circuit, environment, operating conditions, tolerances, and life expectancy.*

**GENERAL SPECIFICATIONS:** Double coil design combined with balanced armature construction makes the series 5 relays remarkably sensitive, rugged and compact. They maintain adjustment through a temperature range of -60 to +90 degrees centigrade. Shocks of 500 g will not disturb adjustment or damage the relay in any way when solidly mounted.

**INPUT** must be DC on all types except those designated for AC input. In stationary service inputs as low as 0.5 milliwatts provide satisfactory operation; but where vibration is present, as in aircraft service, 5.0 milliwatts is usually adequate. This offers contact pressures of 25 to 50 grams, sufficient for uninterrupted contact under vibration of more than 11 g's.

**LOAD CAPACITIES** range from 1.0 amperes at 115 volts AC to as high as 10 amperes at 24 volts DC according to input power, nature of load, duty cycle, and required life expectancy.

**OPERATING SPEED** is not as great as on Series 4 relays, varying from 1/20 to 1/100 sec., depending on circuit conditions.

**LIST PRICES** shown are for relays with coils of under 1000 ohms. For coils of 1000 to 8000 ohms add \$.50 to list prices. For coils over 8000 ohms add \$1.00 to list prices.

### MOUNTING FORMS

In addition to plug-in types, Sigma relays are available with side ears or spade bolts for mounting on metal chassis with lugs passing through a center hole for connection below deck. Another form includes a metal plate welded to the far end of the cover away from the lugs permitting wiring above deck.

### FOR AC INPUT

Types 5F, 5R and 5RHPL are available with dry rectifier in full-wave bridge. Dimensions are not changed. Designate by adding S to type and add \$3.00 to list price.

TYPE 5F

Without cover or base. Mounting: 2 #6-32 screws on 25/32" centers. Connections: lugs. List Price: \$7.00.

# Utah

# TRANSFORMERS

A complete line of replacement transformers designed to service the requirements of practically any radio set on the market. Utah Transformers are standard equipment in millions of receivers throughout the world—definite proof of their reliability and performance under all operating conditions—your assurance

of permanently satisfied customers. Fully impregnated and climate-proof. First letter in Part No. designates mounting style; next number principal filament voltage; next two numbers, total milliamperes output. A letter at end designates additional filaments — E is 3 filaments, G is 5 filaments. No letter means 2 filaments.

# STANCOR REPLACEMENT TRANSFORMERS

THE ONLY 100% COMPLETE TRANSFORMER SERVICE

## POWER TRANSFORMERS — NEW UNIVERSAL TYPE

These units will service the majority of radios in use today. Four black-enameled brackets furnished with each transformer to permit choice of five mounting positions—horizontal, vertical four hole half-shell, two hole half shell or Underwriter's type. Electro-statically shielded—R.M.A. color coded flexible leads.

## CRYSTAL RECORDER OUTPUT TRANSFORMERS

The first four units were designed especially for use in radio receivers either for conversion or replacement purposes. Separate transformers are available for either single or push-pull output stages and for simultaneous monitoring while cutting record.

The last three units have high fidelity type construction and are for use with amplifiers designed expressly for recording work. All transformers are conservatively designed to have the best electrical characteristics consistent with their size.

\*Split Secondary.

## UNIVERSAL INTERSTAGE TRANSFORMERS

(Split Secondaries)

May be used as plate to grid; push-pull input or push-pull interstage replacement transformers. Have 3:1 over-all ratio, however primary is center-tapped and secondary has split winding thus permitting ratios of 1:1, 3:1 and 6:1. Transformers may be used in either step-up or step-down applications.

Stancor Number	Application	Turns Ratio	D.C. Pri. Ma.	Type Mtg.	Dimensions			Mounting Centers	Weight in Carton	List Price

## HEARING AID CHOKES (MANUFACTURERS' TYPES)

These small uncased chokes are made available because of mounting interest created by the recent release of very small midjet tubes. Two typical circuits are shown in the current issue of Stancor's Service Guide. Measurements shown are made with .5 M.A.-D.C. in windings; impedances

given are from actual measurements; all inductances are calculated values.

Because of their extremely small size these chokes are not as rugged as their bigger Stancor brothers, and care should be exercised when using them to see that current carrying capabilities are not exceeded.

## STONE CONTROL UNIT

The necessary components for a dual tone control circuit to provide both bass and treble attenuation when used in conjunction with two dual 250,000 ohm potentiometers. Contained in Hi-Fi type W-1 cast case for shielding against hum pickup and provided with 12" Flexible Coded Leads for direct connection in the circuit. Dimensions H.3 1/2" x W.2 1/4" x L.3 1/4"

STANCOR No. C-2332-1.....List \$6.30

## UNIVERSAL SPEAKER FIELD SUBSTITUTE CHOKE

Designed for the service department, to take the place of the speaker field on the test bench. It is so designed that, when used with tap switch or plug-in jacks, all popular speaker field impedances and resistance are readily obtained. May also be used as substitute filter choke in radio to determine correct unit to use. Packed complete with full instructions.

\*Mounted in special can and equipped with cord, plug and receptacle.

## ISOLATION TRANSFORMERS

These transformers are designed with an electro-static shield to isolate line noises and interference from the apparatus being used. They are suitable for screen test booths, electrical therapeutic machines, medical instruments, beauty parlor equipment, electric furnaces, amateur transmitters,

etc. Each unit complete with a 6 ft. cord and plug and a female receptacle. Primary tapped for 105, 115, and 125 volt, 50-60 cycles. Secondary rated at 115 volts, Tapped switch controls primary voltage, except on Nos. P-6123 and P-6125.

Stancor Number	Watts	Type Mounting	Mounting Dimensions			Weight in Carton	List Price

## VOLT ADJUSTERS

STANCOR'S volt-adjuster is the answer to the fluctuating voltage problem. It is a compact unit containing a ruggedly constructed step-up; step-down autotransformer.

The primary winding accommodates various voltages in 10 volt steps. A 10 position tap switch with an off position permits changing of the primary winding when a voltage

shift occurs, and through this switch the output may be changed and kept at 115 or 230 volts. A meter with 0-150 or 0-250 volt range indicates the output at all times. The nominal output is indicated on the meter face by a red line. The entire unit is housed in a beautifully designed modern black wrinkle finished case and is equipped with a six foot approved rubber cord and plug.

# PLATE TRANSFORMERS -- CHOKES

## PLATE TRANSFORMERS

This group of transformers is designed primarily to deliver the rated D.C. voltage and current outputs when used with full-wave mercury vapor rectifier tubes in conjunction with a two section filter employing choke input and two 2 mfd. condensers working into a resistive load. Generous

coil and core design result in a transformer with above average regulation and efficiency. Phenolic terminal boards and heavy duty ceramic insulators assure protection from voltage breakdown.

# MODULATION TRANSFORMERS

## POLY-PEDANCE MODULATION TRANSFORMERS

These most versatile Poly-Pedance transformers are tapped to give wide range of impedances for correctly matching every type of load. Impedance chart and instructions furnished with each unit.

## PLATE MODULATION TRANSFORMERS

Conservatively rated for continuous duty at maximum current and audio wattage. Well insulated against voltage breakdown. Excellent construction and impregnation assure quiet operation and long life.

## PROFESSIONAL SERIES Plate Transformers

By using an entirely new design of cast semi-steel end bells both mechanical strength and eye appeal have been added together with other features such as more effective shielding, etc. Durable Ceramic terminals are mounted on phenolic panels to assure adequate insulation. End bells are compound filled.

The primaries of the new Professional Series Plate Transformers are wound for use on either 115 or 230 volt line. Secondary voltages are balanced to center tap. Symmetrical coil design (resistive, capacitive and inductive balance) results in a more uniform D.C. output from the rectifier tubes.

These rugged units are built to take it. All are insulated to RMA standards. Primaries designed for 50-60 cycle operation.

# THERMADOR TRANSFORMERS

*"Seven Leagues Ahead"*

This group of transformers covers a wide series of applications for small transmitters, amplifiers, and for original equipment and replacement in radio receivers. Duplication of specifications is available in several types of mountings to permit the best physical arrangement for each individual job. All units are attractively finished in durable baked grey enamel. High silicon content core materials, with low current and flux densities, contribute to the engineering superiority which results in the small physical size and low temperature rise of Thermador power transformers. All power transformers in this group have static shields which are grounded to the case and core.

By using the new design of heavy steel end-bells, both mechanical strength and eye appeal have been added together with other features such as more effective shielding, better insulation, etc. Durable ceramic terminals are mounted on steel end panel to assure adequate insulation. End bells are filled with rubber-seal compound.

The primaries are wound for use on either 115 or 230 volt lines.

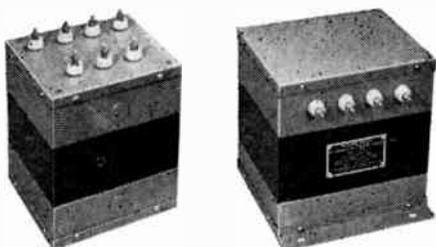

Secondary voltages are balanced to center-tap and are insulated for use in a full-wave rectifier circuit or a full-wave bridge rectifier circuit.

# Thermador Transformers

All Thermador filament transformers have center-taps. They are designed to provide accurate voltage output at rated leads with good regulation, and are insulated to stand well over twice the peak working voltage plus one thousand volts.

Thermador filament transformers are available in several convenient mounting styles which lend themselves to most applications. All potted transformers are poured with rubberseal compound.

The Thermador hi-fidelity series of audio equipment represents probably the highest degree of quality yet attained in audio transformers.

In addition to the absolute moisture elimination provided by "Thermatite" treatment hi-fidelity transformers have the following advantages.

**P-6 Shielding**—This expression refers to the six alternate layers of high-permeability and high conduc-

tivity material used as shielding on our low level transformers. This construction affords hum pick-up 96 db. below that of unshielded transformers.

**Wide frequency range**—transformers of the hi-fidelity series are linear within 1db. from 20 to 20,000 cycles.

**Balanced winding**—Thermador transformers are constructed to give best practical magnetic capacity and resistive balance. In designs where capacity balance is important, each winding is made up of two symmetrical coils. Input transformers are supplied with static shield between primary and secondary.

**Low harmonic distortion**: these transformers are designed to offer proper load impedance to the tubes with which they operate. Maximum primary inductance, low leakage resistance, and low flux densities in the core permit unusually low harmonic levels.

## THERMATITE TREATMENT

Thermador transformers are Thermatite treated, which is a well tested and approved form of vacuum impregnation. This treatment, proved on thousands of transformers under severe climatic conditions, gives these units the resistance to constantly withstand extreme conditions of humidity and heat. This is particularly important at this time with their widened use in foreign countries where extreme temperatures and humidity exist. Thermador transformer division is in complete and efficient operation and in a position to bid on priority requirements.

## EXPERIENCED ENGINEERS

Consider Thermador Electrical Manufacturing Company your source of assistance in engineering and production of transformers to meet your specific requirements. Included in the Thermador Transformer line are audio, auto, geophysical, bias supply, bridging, cathode modulation, coupling, driver, field supply, filament, high fidelity audio, input, midget plug-in audio, mixing and matching, modulation, output, plate, power (combined plate and filament), television, and tube-to-line transformers. Also manufactured are chokes, reactors (audio and equalizing), neon transformers and fluorescent ballasts.

Catalog prices are list, subject to trade discount and change without notice. Add 100% for 25 cycle 115 v. primary; 60% for 230 v. 60 cycle primary; 100% for 230 v. 25 cycle primary.

The letter separating the first two digits of the type number from the last two indicates the classification of the unit. The following legend will further explain:

A = Audio, D = Driver, K = Foundation Unit, P = Plate, S = Output or Speaker, W = Wired Amplifier,  
 C = Choke, F = Filament, M = Modulation, R = Power, V = Voltage Changer.

# Audio (A) Transformers

## AUDIO (A) INTERSTAGE TRANSFORMERS

For coupling the plate or plates of an amplifier stage to the grid or grids of the next stage where grid current is not drawn. C. H. T. interstage audio transformers have hum-bucking coil construction and balanced windings. Frequency response of

C.H.T. types using parallel feed in the primary winding, is flat within  $\pm 1\frac{1}{2}$  db from 60 to 8,000 c.p.s. Compound filled cases fully protect the coils from adverse climatic conditions.

Type No.	Classification	Ohms Impedance		Pri. M.A.	Turns Ratio	Mtg. Fig.	Mtg. Centers		Dimensions			Wt. Lbs.

**FILTER CHOKES**

Thordarson filter reactors are rated in henries under actual working conditions. It is well known that as the D.C. current in a choke increases, there is a corresponding decrease in inductance. In selecting a filter choke from this listing, full assurance may be had that inductance rating has been measured under full operating load conditions.

**Replacement Filter Chokes**

# Chokes (C) — Driver (D) Transformers

## TRANSMITTER INPUT AND FILTER CHOKES

Matched input and smoothing chokes for amateur, amplifier or experimental applications. Inductance values are measured under full load conditions and adequate insulation is provided for recommended service.

### DRIVER TRANSFORMERS FOR SPECIFIC APPLICATIONS

These driver transformers have the correct primary to secondary ratio for the tubes specified, which assures good regulation and minimum driver distortion on the positive grid peaks. The first three types are specifically designed for replacement requirements.

**UNIVERSAL AND MULTI-MATCH DRIVER (D) TRANSFORMERS**

Versatility of application reduces to a minimum transformer obsolescence which is a costly problem to the amateur in these days of rapid tube development. Through the use of five ratios

on each transformer, these transformers will handle all driver requirements usually encountered in amateur transmitter circuits.

## PLATE SUPPLY (P) TRANSFORMERS

While ordinarily used to supply the plate voltage for amateur transmitters, there are additional applications requiring relatively high voltages in which Thordarson plate transformers may be used to good advantage. Thordarson plate transformers are rated in D.C. voltages from a two section filter which includes the voltage drop through the rectifier tubes. Designed especially for Amateur transmitting or experimental equipment. Electrostatic shielding is provided between primary and secondary windings.

Type No.	Primary Volts	Sec. A.C. Load Volts	D.C. Volts	Bias Tap	D.C. M.A.	Pri. V.A.	Mtg. Fig.	Mtg. Centers		Dimensions			Wt. Lbs.

\*These transformers designed for double rectifiers and will deliver both secondary ratings simultaneously. If only the lower voltage taps are used the current rating is equal to the current rating of both windings.

We can supply all Thordarson products. Ask for complete Thordarson catalog.

**UNIVERSAL REPLACEMENT POWER TRANSFORMERS — "13R" SERIES**

The choice of servicemen in all parts of the world because of the universal adaptability to receiver replacement, from both electrical and mechanical considerations. Adjustable mounting brackets permit flush, vertical or horizontal mounting. Replacement recommendations are given in Thordarson Replacement Transformer Encyclopedia No. 352.

# Output (S) Transformers

## OUTPUT (S) TRANSFORMERS

For coupling audio power amplifier tubes to a loud speaker voice coil or line. Correctly matching the output tubes to a speaker load is important. Efficiency, frequency response and distortion are affected by this matching. Small, unshielded types are listed for use with receivers where the transformer is usually mounted on the loud speaker frame. Larger shielded types have multiple secondary impedances as required in sound amplifiers. C.H.T. output transformers have a greater selection of output impedances, meeting practically all speaker requirements. These units are compound filled and are provided with jacks and plugs to facilitate speaker matching. Tertiary winding included on some types for inverse feed-back voltage.

### UNIVERSAL REPLACEMENT TUBE TO VOICE COIL

Preferred by many because of their wide plate impedance and voice coil coverage. Proper matching of load impedances to speaker voice coils is accomplished by using taps as specified in the instruction sheets.

We can supply all Thordarson products. Ask for complete Thordarson catalog.

### C. H. T. MULTIPLE TAP OUTPUT TRANSFORMERS

Include these C. H. T. premium quality features: Switchboard plug-in terminal board for quick and accurate selection of secondary impedances, conservative design for exceptional performance, and complete coil protection against humidity. Tertiary winding to give a feedback voltage 10% of full primary. Split Primaries.

### C. H. T. CRYSTAL RECORDER TRANSFORMERS

The wave of interest in recording radio programs, speech and other audio happenings has created the desire to build recording equipment. These two transformers are offered to meet the requirements for coupling to a crystal recording head. Secondary designed for constant velocity recording (series connection) and constant amplitude recording (parallel connection).

3H

Type No.	Application	Capacity	Primary Taps	Mtg. Fig.	Mtg. Centers	Dimensions	Wt. Lbs.

### VOLTAGE CHANGER (V) TRANSFORMERS FILAMENT CORRECTOR AUTOTRANSFORMERS

To compensate for variations in line voltage or for drop in filament leads. Correct filament voltage at the tube is made possible.

2E

Type No.	Capacity Filament Power Watts	Primary Taps	Mtg. Fig.	Mtg. Centers	Dimensions	Wt. Lbs.
T-18V24	60	105/110/115/120/125V.	2E		2 3/8 2 1/8 3	2 3/4 2 3/8 2 3/8 1

### AUTOTRANSFORMERS

Autotransformers consist of a single winding on an iron core. Voltage variation is accomplished by means of taps.

#### Step Down — Convenience Outlet Type

Input side equipped with cord and plug. Output side has standard receptacle.

2V

Type No.	Input Volts	Output Volts	Output Load		Mtg. Fig.	Mtg. Centers		Dimensions			Wt. Lbs.

### LINE REGULATING AUTOTRANSFORMER

Provides for an increase or decrease of 7.5 volts. May be used on any A.C. line of 50-60 cycle frequency from 90V to 125V as a step-up or step-down transformer. Especially suitable for boosting line voltage for fluorescent lighting units. Fully enclosed (similar to 2H) and mounted on a 4" outlet box cover, allowing for complete enclosure of all wiring in a conduit or BX system.

Type No.	Input	Output	V.A.	Amps.	Mtg. Fig.	Mtg. Centers	Dimensions	Wt. Lbs.
T-18V26	90-125	7.5 Variation	1150	10	4L	3 3/8	4 1/8 3 1/2 4 1/8	5

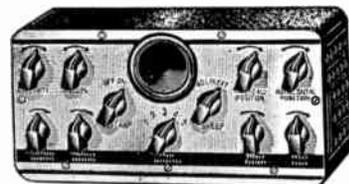

### THORDARSON OSCILLOSCOPE KIT

An accurately designed circuit using a 913 tube. Magnifying lens gives clear 2" image and small overall size of unit makes it ideal for relay rack of servicemen and for amateur and experimental uses.

No. 340 Manual

Type No.	Description
T-11K99	Foundation Unit (Consists of punched chassis, panel, light shield, etched panel, ventilated cabinet and 2" magnifying lens with retainer ring, and complete circuit with constructional and operating data.) In addition to the foundation unit, one T-92R33 power transformer (see below) and one T-74C30 filter choke are required.

Circuit diagram, description and complete parts list given in catalog sheet SD266

\*\*With half wave rectification.

#240 Complete Transformer Manual—35c postpaid—contains Sound Amplifier Guide, Transmitter Guide, and Replacement Encyclopedia with catalogs. A popular book in every technical library.

#333 Amateur Radio—a beginner's guide—75c postpaid—one of the most comprehensive and clearly written books available for learning Amateur Radio. Cloth bound book, 160 pages, over 100 illustrations. A handy reference book for the experienced amateur.

We can supply all Thordarson products. Ask for complete Thordarson catalog.

# LINEAR STANDARD TRANSFORMERS

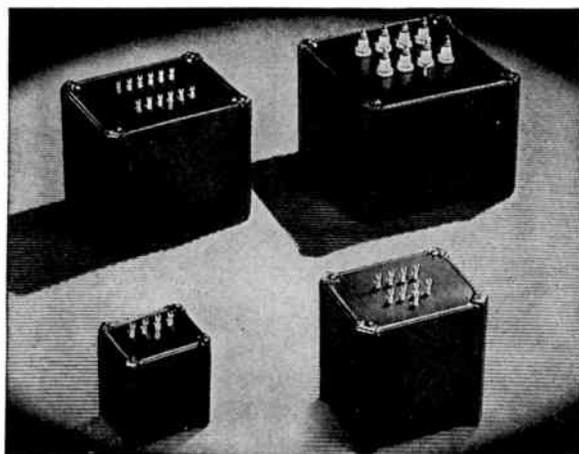

UTC LINEAR STANDARD Components represent the closest approach to the ideal transformer from the standpoint of uniform response, low wave form distortion, high efficiency, thorough shielding and dependability.

The multiple tap windings used make possible a wide combination of impedance connections without impairing the audio range or efficiency.

UTC engineers have spent considerable time studying the many annoying hum pickup difficulties which are prevalent in high gain A.C. operated amplifying equipment. As a result, a special cast alloy has been developed to house all UTC Linear Standard units. In addition, low level input transformers use the new UTC dual and quadruple alloy shields thus making possible a transformer with the lowest hum pickup of any available commercially.

## LINEAR STANDARD UNITS FEATURE:

- **True Hum Balancing Coil Structure . . .** maximum neutralization of stray fields.
- **Balanced Variable Impedance Line . . .** permits highest fidelity on every tap of a universal unit . . . no line reflections or transverse coupling.
- **Reversible Mounting . . .** permits above chassis or subchassis wiring.
- **Full Electrostatic Shielding . . .** brought out to separate terminal.
- **Alloy Shields . . .** maximum shielding from inductive pickup.
- **Multiple Coil, Semi-Toroidal Coil Structure . . .** minimum distributed capacity and leakage reactance.
- **Precision Winding . . .** accuracy of winding .1%, perfect balance of inductance and capacity; exact impedance reflection.
- **Hiperm-Alloy . . .** a Stable high permeability nickel-iron core material.
- **High Fidelity . . .** UTC Linear Standard transformers are the only audio units with a guaranteed uniform response, from 30 to 20,000 cycles  $\pm 1$  db.

## LOW IMPEDANCE TO GRID TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	Shielding and hum reduction	Case No. List Price
LS-10	Low impedance mike, pick-up, or multiple line to grid	50, 125, 200, 250, 333, 500 ohms	60,000 ohms in two sections	Dual Alloy shield -74DB	LS-1 \$16.00
LS-10X	As above	As above	50,000 ohms	Quadruple alloy shield -92DB	LS-1 22.50
LS-12	Low impedance mike, pick-up or multiple line to push pull grids	50, 125, 200, 250, 333, 500 ohms	120,000 ohms overall in two sections	Dual alloy shield -74DB	LS-1 20.00
LS-12X	As above	As above	80,000 ohms overall in two sections	Quadruple alloy shield -92DB	LS-1 25.00
LS-14	Low impedance mike, pick-up, or parallel mixer to grid	2, 5, 5.5, 10, 15, 22, 30, 38, 60 ohms	60,000 ohms in two sections	Dual alloy shield -74DB	LS-1 20.00
LS-14X	As above	As above	50,000 ohms	Quadruple alloy shield -92DB	LS-1 25.00
LS-15	Three isolated lines or pads to one or two grids	30, 50, 200, 250 ohms each primary	60,000 ohms overall, in two sections	Dual Alloy shield -74DB	LS-1 20.00
LS-15X	As above	As above	As above	Quadruple alloy shield -92DB	LS-1 25.00
LS-18	High level multiple line to push pull grids	50, 125, 200, 250, 333, 500 ohms	50,000 ohms overall, in two sections	Alloy casing -60DB	LS-2 22.00

Type No.	Application	Primary Impedance	Secondary Impedance	Shielding and hum reduction	Case No. List Price
LS-27	Single plate to multiple line	8,000 to 15,000 ohms 8 MA., D. C.	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 \$17.00
LS-50	Single plate to multiple line	8,000 to 15,000 ohms	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 17.00
LS-51	Push pull low level plates to multiple line	8,000 to 15,000 ohms each side	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 17.00
LS-37	Crystal microphone or pick-up to multiple line	100,000 ohms	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 18.00
LS-38	Crystal microphone or pick-up to multiple line, with internal equalizer	100,000 ohms	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 22.50
LS-39	Photocell, high-mu triode diode or over-biased detector to multiple line	100,000 ohms	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 18.00
LS-150	Bridging transformer from 50 to 500 ohm line to multiple line	4,000 ohms, bridging	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 18.00
LS-151	Bridging transformer from 50 to 500 ohm line to multiple line	16,000 ohms, bridging	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 18.00

## MIXING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	Shielding and hum reduction	Case No. List Price
LS-30	Mixing, low impedance mike, pickup or multiple line to multiple line	50, 125, 200, 250, 333, 500 ohms	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 \$18.00
LS-30X	As above	As above	As above	Quadruple alloy shield -92DB	LS-1 22.50
LS-31	Three isolated lines or pads to multiple line	30, 50, 200, 250 ohms each primary	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 20.00
LS-31X	As above	As above	As above	Quadruple alloy shield -92DB	LS-1 25.00
LS-32	Mixing low impedance mike, pickup, or parallel mixer to multiple line	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	50, 125, 200, 250, 333, 500 ohms	Dual alloy shield -74DB	LS-1 20.00

## INTERSTAGE AUDIO TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	Shielding and hum reduction	Case No. List Price
LS-19	Single plate to PP grids like 2A3, 59, 46, 6L6	8,000 to 15,000 ohms; split primary	95,000 ohms; turn ratio 1.25:1 each side; split secondary	Alloy casting -50 DB	LS-1 \$17.00
LS-20	Single plate to single grid	8,000 to 15,000 ohms.	60,000 ohms; 2:1 turn ratio	Dual alloy shield -74DB	LS-1 15.00
LS-21	Single plate to push pull grids	8,000 to 15,000 ohms.	135,000 ohms; turn ratio 1.5:1 each side. Primary and secondary each in two sections	Dual alloy shield -74DB	LS-1 17.00
LS-40	Single plate to push-pull grids	As above, will carry 8 MA DC	135,000 ohms 1.5:1 turn ratio each side	Dual alloy shield -74 DB	LS-1 17.00
LS-22	Push pull plates to push pull grids	8,000 to 15,000 ohms	38,000 ohms each secondary, turn ratio 1.6:1 each side of center. Primary and secondary each in two sections	Alloy casting -50DB	LS-2 22.00
LS-26	P.P. plates to P. P. grids. Medium level	8,000 to 15,000 ohms; split primary	100,000 ohms overall; 25,000 ohms each side. Turn ratio 1.3:1. Split secondary	Alloy casting -50DB	LS-1 80.00
LS-26	Bridging line to 1 or 2 grids	5000	60,000 ohms in two sections	Dual alloy shield -74 DB	LS-1 18.00

## OUTPUT TRANSFORMERS TO LINE AND VOICE COIL

Type No.	Primary will match following tubes	Primary Impedance	Secondary Impedance	Case No. List Price
LS-62	Push pull 245, 250, 6V6, 42 or 2A5 A prime	8,000 ohms	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 \$20.00
LS-64	Same as above	8,000 ohms	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 14.00
LS-65	Push pull 2A3's, 6A5G's, 300A's, 275A's, 6A3's	5,000 ohms plate to plate and 3,000 ohms plate to plate	500, 333, 250, 200, 125, 60, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 20.00
LS-67	Same as above	5,000 ohms plate to plate and 3,000 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 14.00
LS-68	Push pull parallel 2A3's, 6A5G's, 300A's, 6A3's	2,500 ohms plate to plate and 1,500 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-4 30.00
LS-61	Push pull 6B5, 6A6, 58, 6E6, 71A, 59, 79, 89, Class B46, 59's	10,000 ohms plate to plate and 6,000 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 20.00
LS-63	Same as above	10,000 ohms plate to plate and 6,000 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 14.00
LS-6L1	Push pull 6L6's self bias	6,600 ohms plate to plate	500, 333, 250, 200, 125, 60, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-3 30.00
LS-6L3	Same as above	6,600 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-3 20.00
LS-6L4	Push pull 6L6's fixed bias or push pull parallel 6L6's self bias	3,800 ohms plate to plate and 3,300 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-4 35.00
LS-845	845 tubes class AB	8,800 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	CC-1 50.00

## DRIVER TRANSFORMERS

Type No.	Application	Primary Impedance	Reflected Secondary Impedance	Case No. List Price
LS-6	Driver, multiple line to class B 838's, 805's, ZB-120's, 203A's and similar tubes	50, 125, 200, 250, 333, 500 ohms	2,000 ohms; 1:2 overall turns ratio	LS-2 \$30.00
LS-8	Driver, push pull 45's, 59's, 2A3's, 6A5's, etc. to push pull 845 or 211D grids	800 to 2,000 ohms	.6 primary impedance turns ratio 1.3:1 overall	LS-2 22.00
LS-7	Push pull 56, 6C5 or similar plates to A prime 45's, 42's, 6F6's, 2A3's	8,000 to 15,000 ohms	.45 primary impedance turn ratio 1:5:1 overall	LS-2 22.00
LS-47X	Driver from push pull 2A3's, 6A5G's, or 300A's to Class B 838's, 203A's 805's, or ZB120's	800 to 1,000 ohms	.1 pri. impedance turns ratio. Pri./1/2 Sec. 3.2:1	LS-2 25.00
LS-48	Driver transformer push pull 845's, to 204 or 849 grids in class B	1,000 to 2,000 ohms	.038 pri. impedance turns ratio. Pri./1/2 Sec. 5.1:1	LS-4 36.00
LS-49	Push pull parallel 2A3, 6A5G, or 300A tubes to four 838, 203A, 805, or ZB120 tubes	800 to 2,000 ohms	.028 pri. impedance turns ratio. Pri./1/2 Sec. 6.0:1	LS-4 30.00

## HIGH LEVEL MATCHING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary	Case No. List Price
LS-33	High level line matching. 15 watts	50, 125, 200, 250, 333, 500 ohms	1.2, 2.5, 5, 7.5, 10, 15, 20, 30, 50, 125, 200, 250, 333, 500 ohms	LS-2 \$20.00
LS-34	High level line matching. 30 watts	50, 125, 200, 250, 333, 500 ohms	1.2, 2.5, 5, 7.5, 10, 15, 20, 30, 50, 125, 200, 250, 333, 500 ohms	LS-3 25.00

## OUTPUT TRANSFORMERS TO HIGH IMPEDANCE (RF) LOAD

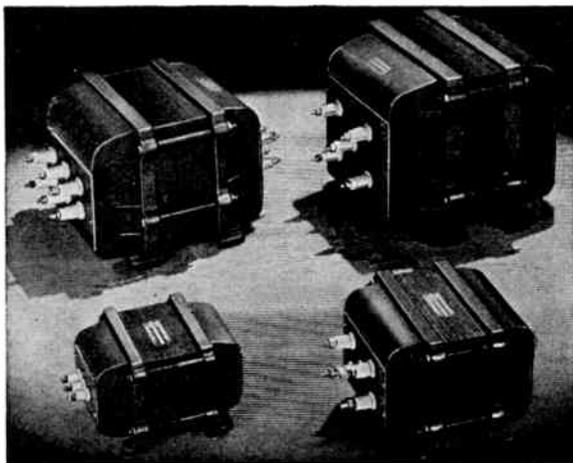

Type No.	Primary will match the following tubes	Primary Impedance	Secondary Impedance	Case No. List Price
LS-66	Push pull 2A3's, 6A5G's, 300A's, 275A's, 6A3's, +36DB	5,000 ohms plate to plate and 3,000 ohms plate to plate	6,000, 5,000, 4,000, 1,800, 1,500, 1,000, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	LS-2 \$20.00
LS-66	Class B 203A, 838, ZB120, 805 +46DB	9,000 ohms plate to plate	5,000, 3,500, 2,500, 2,100, 1,250, 600	CC-1 70.00
LS-67	Class B 203A, 838, ZB 120, 805 +46DB	9,000 ohms plate to plate	10,000, 2,500	CC-1 70.00

# UTC HIPERM ALLOY TRANSFORMERS

The UTC Hiperm Alloy audio and power transformers are specifically designed for portable and compact high fidelity service. The frequency characteristic of the Hiperm Alloy audio units is uniform from 30 to 20,000 cycles. The outer case is of high conductivity alloy finished in high polish black anodic. Through the use of tapped metallic inserts, these transformers can be mounted with the terminals either up or down, and with no waste space. A hum balanced coil structure is used on all audio units to insure minimum pickup. The electrostatic shields are brought out to separate terminals on the terminal strip.

The H-1 case units weigh 1 1/4 lbs. and are 2" x 2 3/4" x 3" high with 1 1/8" mtg. centers. The H-2 case units weigh 2 1/4 lbs. and are 2 7/8" x 3 3/8" x 3 3/4" high with 2" x 2 3/4" mtg. centers.

## PLATE, CRYSTAL AND PHOTOCCELL TO LINE TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	Case No. List Price
HA-111	Crystal microphone or pickup, to multiple line	100,000 ohms	50, 125, 200, 250, 333, 500 ohms	H-1 \$14.00
HA-112	Photocell, high-mu triode, diode or over-biased detector to multiple line	100,000 ohms	50, 125, 200, 250, 333, 500 ohms	H-1 14.00
HA-113	Single plate to multiple line	8,000 to 15,000 ohms	50, 125, 200, 250, 333, 500 ohms	H-1 13.50
HA-114	Push pull low level plates to multiple line	8,000 to 15,000 ohms	50, 125, 200, 250, 333, 500 ohms	H-1 14.00
HA-133	Single plate to multiple line	8,000 to 15,000 ohms	50, 125, 200, 250, 333, 500 ohms	H-1 13.50
HA-134	Push-pull 89's or 2A3's to line	5,000 to 10,000 ohms	50, 125, 200, 250, 333, 500 ohms	H-2 15.00
HA-135	Push-pull 2A3's to voice coil	3,000 to 5,000 ohms	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	H-2 14.00
HA-136	Portable transmitter output, push-pull 53's or single 6F6	7,000 to 10,000 ohms	5,000, 10,000 ohms	H-1 15.00

## POWER TRANSFORMERS

Type No.	Primary Voltage 50/60 Cycles	High Voltage	Filament Windings	Case No. List Price
HP-122	115	220-0-220 15 MA	6.3 V.C.T.-.5A 6.3 V.C.T.-1.2A	H-1 \$10.00

# UTC ULTRA COMPACT AUDIO UNITS

The UTC Ultra Compact audio units are small, light-weight units ideal for remote pickup and similar equipment. High fidelity is obtainable in all individual units, the frequency response being  $\pm 2$  DB from 30 to 20,000 cycles, except A-11, A-21, A-25 (50-10,000 cycles). All units employ true hum balancing coil structures, which combined with a high conductivity outer case, afford a maximum of inductive shielding.

Ultra Compact audio units weigh 5 1/2 ounces and have overall dimensions 1 1/2" x 1 1/4" x 1 1/8". Mounting dimensions are 1 1/2" between centers, top and bottom.

Type No.	Application	Primary Impedance	Secondary Impedance	List Price
A-10	Low impedance mike, pickup, or multiple line to grid	50, 125, 200, 250, 333, 500 ohms	50,000 ohms	\$11.00
A-11	Line to grid, tri-alloy shielding for low pickup	50, 200, 500	50,000 ohms for 1 or 2 grids	12.00
A-12	Low impedance mike, pickup, or multiple line to push pull grids	50, 125, 250, 250, 333, 500 ohms	80,000 ohms overall, in two sections	11.00
A-14	Dynamic microphone to one or two grids	30 ohms	50,000 ohms overall, in two sections	10.00
A-16	Single plate to single grid	8,000 to 15,000 ohms	60,000 ohms, 2:1 turn ratio	9.00

## LOW IMPEDANCE TO GRID AND MIXING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	Case No. List Price
HA-100	Low impedance mike, pickup, or multiple line to grid	50, 125, 200, 250, 333, 500 ohms	60,000 ohms in two sections	H-1 \$14.00
HA-100X	Same as above but with tri-alloy internal shield to effect very low hum pickup			H-1 18.00
HA-101	Low impedance mike, pickup, or multiple line to push pull grids	50, 125, 200, 250, 333, 500 ohms	120,000 ohms overall, in two sections	H-1 16.00
HA-101X	Same as above but with tri-alloy internal shield to effect very low hum pickup			H-1 20.00
HA-103A	Low impedance mike, pickup, or parallel mixer to grid	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	60,000 ohms in two sections	H-1 16.00
HA-108	Mixing, low impedance mike, pickup, or multiple line	50, 125, 200, 250, 333, 500 ohms	50, 125, 200, 250, 333, 500 ohms	H-1 14.00
HA-108X	Same as above but with tri-alloy internal shield to effect very low hum pickup			H-1 18.00
HA-130X	Three isolated lines or pads to one or two grids with tri-alloy internal shield	30, 50, 200, 250 ohms each primary	60,000 ohms overall, in two sections	H-1 20.00

## INTERSTAGE AUDIO TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	Case No. List Price
HA-104	Single plate to P.P. grids like 2A3, 59, 46, 6L6	8,000 to 15,000 ohms	95,000 ohms; turn ratio 1.25:1	H-1 \$14.50
HA-105	Single plate to single grid	8,000 to 15,000 ohms	60,000 ohms 2:1 turn ratio	H-1 10.00
HA-106	Single plate to push pull grids	8,000 to 15,000 ohms	135,000 ohms 1.5:1 ratio, each side	H-1 12.00
HA-107	Push pull plates to push pull grids	8,000 to 15,000 ohms	35,000 ohms each secondary 1.5:1 turn ratio overall	H-2 18.00
HA-137	Same as above, but medium level (+16DB)			H-1 16.00

Type No.	Application	Primary Impedance	Secondary Impedance	List Price
A-17	Single plate to single grid	As above, will carry 8 MA DC	60,000 ohms 2:1 turn ratio	\$11.00
A-18	Single plate to two grids	8,000 to 15,000 ohms	80,000 ohms overall, 2.3:1 turn ratio overall	10.00
A-19	Single plate to two grids	As above, will carry 8 MA DC	80,000 ohms 2.3:1 turn ratio	13.00
A-20	Mixing, low impedance mike, pickup, or multiple line to multiple line	50, 125, 200, 250, 333, 500 ohms	50, 125, 200, 250, 333, 500 ohms	11.00
A-21	Mixing, tri-alloy shielding for low pickup	50, 200, 500	50, 200, 500	12.00
A-24	Single plate to multiple line	8,000 to 15,000 ohms	50, 125, 200, 250, 333, 500 ohms	11.00
A-25	Single plate to multiple line	As above, will carry 8 MA DC	50, 125, 200, 250, 333, 500 ohms	10.00
A-26	Push pull low level plates to multiple line	8,000 to 15,000 ohms each side	50, 125, 200, 250, 333, 500 ohms	11.00
A-27	Crystal microphone to multiple line	100,000 ohms	50, 125, 200, 250, 333, 500 ohms	11.00
A-30	Audio choke, 300 henrys @ 2 MA 6000 ohms D.C., 75 henrys @ 4 MA 1500 ohms D.C., inductance with no D.C. 460 henrys			7.50

# OUNCER HIGH FIDELITY AUDIO UNITS

The new UTC OUNCER series represents the acme in compact quality transformer practice. These units are ideal for hearing aid, aircraft, glider, portable, concealed service, and similar applications. The overall dimensions are  $\frac{7}{8}$ " diameter by  $1\frac{1}{16}$ " height, including lugs. Mounting is effected by two screws, opposite the terminal board side, spaced  $1\frac{3}{16}$ ". Weight approximately one ounce. Units not carrying D.C. have high fidelity characteristics being uniform from 40 to 15,000 cycles. Items with D.C. in pri. and O-14 and O-15 are for voice frequencies from 150 to 4,000 cycles.

## OUNCER HIGH FIDELITY AUDIO UNITS (MAX. LEVEL 0 DB)

200 ohm balanced winding may be used for 250 ohms.

Type No.	Application	Pri. Imp.	Sec. Imp.	List Price
O-1	Mike. pickup or line to 1 grid	50, 200, 500	50,000	\$10.00
O-2	Mike. pickup or line to 2 grids	50, 200, 500	50,000	10.00
O-3	Dynamic mike to 1 grid	7.5 30	50,000	9.00
O-4	Single plate to 1 grid	8,000 to 15,000	50,000	8.00
O-5	Single plate to 1 grid, D.C. in Pri.	8,000 to 15,000	60,000	8.00
O-6	Single plate to 2 grids	8,000 to 15,000	95,000	9.00
O-7	Single plate to 2 grids, D.C. in Pri.	8,000 to 15,000	95,000	9.00
O-8	Single plate to line	8,000 to 15,000	50, 200, 500	10.00
O-9	Single plate to line, D.C. in Pri.	8,000 to 15,000	50, 200, 500	10.00
O-10	Push pull plates to line	8,000 to 15,000 each side	50, 200, 500	10.00
O-11	Crystal mike or pickup to line	50,000	50, 200, 500	10.00
O-12	Mixing and matching	50,200	50, 200, 500	9.00
O-13	Reactor, 200 Hys.—no D.C.; 50 Hys.—2 MA. D.C.; 6,000 ohms			7.00
O-14	50:1 mike or line to 1 grid	200	$\frac{1}{2}$ megohm	10.00
O-15	10:1 single plate to 1 grid	8,000 to 15,000	1 megohm	10.00

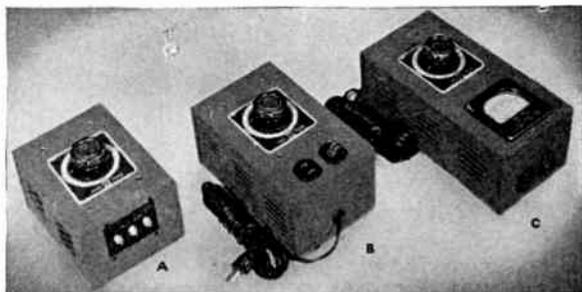

## UTC VARITRAN CONTROLS

**FOR CONTROLLING: Line Voltage, Rectifier Output, Motors, Lights, Heaters, etc.**

- Variable voltage transformers for smooth voltage control. Varitran units employ a special non-fusing roller contact to contact the exposed turns of an auto-transformer winding. Rugged construction is employed, with glass insulation to assure dependability. Output of 115 Volt unit variable from 0-130 volts (230 Volt unit; 0-260 V.) smoothly without interrupting circuit. Output voltage independent of load.

- Maximum Amp. rating applies from 0 to 20 and 95 to 130 volts. Between 20 and 95 volts current rating tapers off to 50% of rated current at 65 V. point.

- Top and bottom mounting for laboratory bench or panel mounting. All units supplied mounted, with terminal strips as in Fig. A except V-1 (Fig. B) and V-1M (Fig. C).

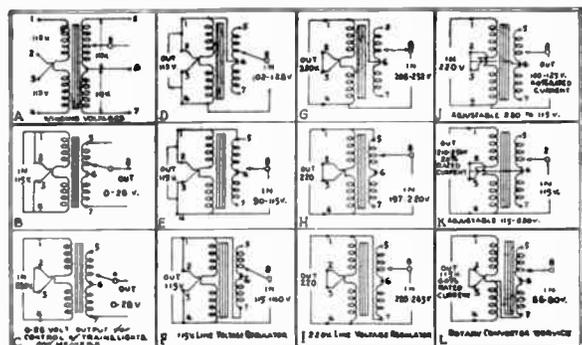

## UNIVERSAL VARITRANS

These varitrans have a 115/230 V. primary winding and a smoothly variable secondary from 0-28 volts. Line voltage control can be effected for 102/140 V. or 197/243 volts to 115 V. or 220 volts respectively. The 28 volt secondary can also be used for low voltage lights, cauteries, trains, rectifiers, etc. The primary and secondary windings can be arranged to effect variable 220/115 or 115/220 volt arrangements. Appearance as in Fig. A above.

Type	Max. Amps. Output	Approx. Dimensions	Approx. Weight, Lbs.	Net Price
VL-0	1.5	3 $\frac{1}{2}$ x 4 $\frac{1}{4}$ x 3 $\frac{1}{2}$	5	\$7.00
VL-1	3.5	4 $\frac{1}{2}$ x 6 x 4 $\frac{1}{2}$	7	8.00
VL-2	6	4 $\frac{1}{2}$ x 6 x 5 $\frac{1}{2}$	10	10.00
VL-3	11	4 $\frac{1}{2}$ x 6 x 6 $\frac{1}{2}$	15	16.00

# VARIMATCH TRANSFORMERS

(For dimensions of cases see following page)

UTC VARIMATCH transformers are available in various types for every PA and transmitter requirement. Thru unique construction high efficiency and good response are obtainable on all terminations.

\* In some cases it is desired to match an RF load to the 500 Ohm output of a PA amplifier. The terminal arrangement noted will take care of this application.

† These impedances are suitable for PA applications. If a monitor speaker is desired, proper distribution of power is obtained by operating this low impedance into the high impedance primary of the speaker transformer.

Intermediate P.P. primary impedance values available in addition to those shown.

## VARIMATCH DRIVER TRANSFORMERS

Type No.	Primary	Typical Output Tubes	Case No. List Price
PA-51AX	All single tubes like: 6C5, 30, 49, 53, 79, 89, 6A6, 45, 46, 2A3	19, 30, 49, 79, 89, 2A3, 45, 46, 6L6, 42, 59	PA-1 \$6.50

## VARIMATCH MODULATION TRANSFORMERS

Will match any modulator tube to any RF load. Here's the answer to your modulation problem. A line of transformers providing a universal range of load impedances for any modulator combination. The VARIMATCH transformer can never become obsolete. All units carry class C current and are supplied with charts giving impedance combinations.

Type No.	Max. Audio Watts	Max. Class C Input	Typical Modulator Tubes	Case	List Price
VM-0	12	25	30, 49, 79, 6A6, 53, 2A3, 6B5	PA-1	\$6.00
VM-1	30	60	6V6, 6B5, 2A3, 42, 46, 6L6, 210	PA-2	9.50
VM-2	60	125	801, 6L6, 809, 4-46, T-20, 1608	PA-3	14.00
VM-3	125	250	800, 807, 845, TZ-20, RK-30, 35-T	PA-4	20.00

VM-5	600	1200	805, HF-300, 204A, HK-354, 250TH	CA-2	80.00

## PA VARIMATCH OUTPUTS

Universal units designed to match any tubes within the rated output power, to line or voice coil. Output impedance 500, 200, 50, 15, 8, 5, 3, 1.5 ohms.

Type No.	Audio Watts	Typical Tubes	Case No.	List Price
PVM-1	12	42, 43, 45, 47, 2A3, 6A6, 6F6, 25L6	PA-1	\$6.00
PVM-2	30	42, 45, 2A3, 6L6, 6V6, 6B5	PA-2	9.50
PVM-3	60	46's, 50's, 300A's, 6L6's, 801, 807	PA-3	14.00
PVM-4	125	800's, 801's, 807's, 4-6L6's, 845's	PA-4	20.00
PVM-5	300	211, 242A's, 203A's, 838's, 4-845's, ZB-120's	CA-1	35.00

## VARIMATCH LINE TO VOICE COIL TRANSFORMERS

The UTC VARIMATCH line to voice coil transformers will match any voice coil or group of voice coils to a 500 ohm line. More than 50 voice coil combinations can be obtained from the LVM-1, LVM-2, LVM-3, and the actual impedances are as follows:

.2, .4, .5, .62, 1, 1.25, 1.5, 2, 2.5, 3, 3.3, 3.8, 4, 4.5, 5, 5.5, 6, 6.25, 6.6, 7, 7.5, 8, 9, 10, 11, 12, 14, 15, 16, 18, 20, 25, 28, 30, 31, 40, 47, 50, 63, 69, 75.

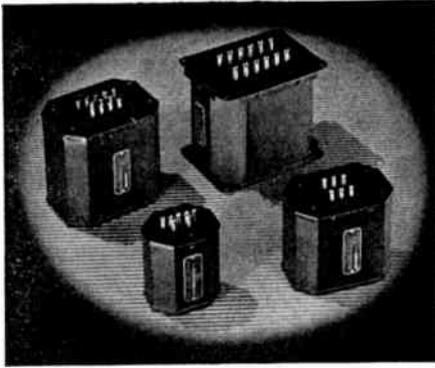

Type No.	Aud'o Watts	Primary Impedance	Secondary Impedance	Case No.	List Price
LVM-1	15	500 ohms	.2 to 75 ohms	PA-1	\$5.50
LVM-2	40	500 ohms	.2 to 75 ohms	PA-2	8.00
LVM-3	75	500 ohms	.2 to 75 ohms	PA-3	12.00

## VARIMATCH LINE AUTOFORMERS

UTC Varimatch Line Autoformers will match one to ten 500 ohm lines or LVM-500 ohm windings to the 500 ohm output of an audio amplifier. The LVM-10 to LVM-14 autoformers have impedances of 500, 250, 167, 125, 100, 83, 71, 62, 50.

Type No.	Audio Watts	Case No.	List Price
LVM-10	15	PA-1	\$5.50
LVM-11	30	PA-2	8.00
LVM-12	60	PA-3	12.00

# UTC PUBLIC ADDRESS AUDIO COMPONENTS

A quality line of popular-priced transformers incorporating conservative design and construction to assure dependability under the most adverse operative and climatic conditions. Uniform drawn cases finished in telephone black enamel with threaded inserts for top or bottom mounting. These units are professional in appearance and suited for continuous commercial service in amplifiers and transmitters. All items are poured with special moisture-proof sealing compound in addition to vacuum impregnation of coil structures. Items in same case size have approximately the same weights, as noted below.

PA-134, 135 and 136 are of the hum-bucking type to assure low hum pick-up. All audio components are linear,  $\pm 1\frac{1}{2}$  DB from 60 to 8,500 cycles. 200 ohm windings on input transformers are balanced and may be used for 250 ohm circuits.

Case	OVERALL DIM., IN.			Mtg. Dim.		Weight Lbs.
	L	W	H	L	W	
PA-1	2 $\frac{1}{2}$	3	3	1 $\frac{1}{2}$	...	2
PA-2	3 $\frac{1}{8}$	4 $\frac{1}{2}$	4 $\frac{1}{2}$	1 $\frac{1}{2}$	3 $\frac{1}{8}$	5
PA-3	3 $\frac{1}{8}$	4 $\frac{1}{2}$	4 $\frac{1}{2}$	1 $\frac{1}{2}$	3 $\frac{1}{8}$	10
PA-4	6	4 $\frac{1}{8}$	6	3 $\frac{1}{8}$	5 $\frac{1}{8}$	18
CA-1	7 $\frac{1}{2}$	9	5 $\frac{1}{2}$	...	...	28
CA-2	11	11	9	...	...	83

## VARITONE UNITS

The UTC VARITONE is a revolutionary audio device incorporating a transformer and frequency response corrective network. Using the VARITONE, tone correction can be effected for defects in acoustic conditions or overall audio response from microphones, pickups, loud speakers, etc. It is also possible to produce new tonal effects from phonograph recordings or radio reception, bringing back notes which would be practically lost otherwise. Due to the high equalization obtainable, an additional stage of amplification is sometimes necessary if the equalizer is to be used at maximum setting. The VT-1 and VT-2 require an external 50,000 ohm potentiometer as the control device.

Type No.	Matching	Equalisation	List Price
VT-1	Triode plate, low impedance mike or line—to 1 or 2 grids	High end, low end, or both	\$10.00
VT-2	Connects across triode plate or low impedance mike or line	High end, low end, or both	8.00
VT-10	Band pass filter for amateur service removes unnecessary low and high frequencies, reducing QRM, increasing efficiency and intelligibility. Connects in plate circuit of triode		12.00

## INPUT TO GRID TRANSFORMERS

PA-1 CASE

Type No.	Application	Primary Impedance Ohms	Secondary Impedance Ohms	List Price
PA-131	1 plate to 1 grid	8,000/15,000	90,000 3:1 ratio	\$6.00
PA-132	1 plate to 2 grids	8,000/15,000	160,000 centertapped 2:1 ratio each side	6.50
PA-133	2 plates to 2 grids	8,000/15,000	30,000 each side 1.75:1 ratio each side	8.00
PA-134	Line to 1 grid hum-bucking	50, 200, 500	100,000	8.00
PA-135	Line to 2 grids hum-bucking	50, 200, 500	150,000 overall	8.50
PA-235	Line to 1 or 2 grids, hum-bucking; multiple alloy shielded for low hum pick-up	50, 200, 500 ohms	80,000 overall	11.00
PA-136	Single plate and low impedance mike or line to 1 or 2 grids. Hum-bucking	8,000/15,000 50, 200, 500	120,000 overall	8.50
PA-233	PP 6C5, 56, similar triodes to AB 45's, 2A3's, 6L6's, etc.	8,000/15,000	8,000 9:1 ratio	7.00
PA-333	PP 6C5, 56, similar triodes to fixed bias 6L6's	8,000/15,000	2,500 5:1 ratio	7.00
PA-433	PP 45, 2A3, similar tubes to fixed bias 2 or 4 6L6's	5,000	1,250 5:1 ratio PA-2 case	7.50

## MIXING AND LOW LEVEL OUTPUT TRANSFORMERS

PA-1 CASE

Type No.	Application	Pri. Imp. Ohms	Sec. Imp. Ohms	List Price
PA-137	Mixing	50, 200, 500	50, 200, 500	\$6.50
PA-140	Triode plate to line	8,000/15,000	50, 200, 500	7.50
PA-141	PP triode plates to line	8,000/15,000	50, 200, 500	8.50

## OUTPUT TRANSFORMERS

Secondary impedances 500, 200, 50, 16, 8, 5, 3, 1.5 ohms

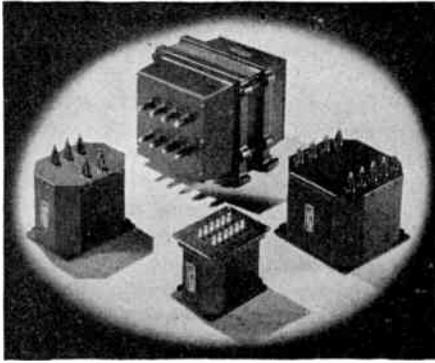

Type No.	Imped. P.P. Ohms	Typical Tubes	Case	List Price

## UNIVERSAL BIAS TRANSFORMERS

Primary 115 V. 50/60 cycles. No filament windings.

Type No.	D.C. Voltage	D.C. Ma.	Case No. List Price
PA-315	Tapped for any voltage from 15 to 100 V. within 6%	250	PA-2 \$10.00
PA-318	Tapped for any voltage from 75 to 400 V. within 6%	250	PA-4 17.00

## VARIPOWER AUTO-FORMERS

Designed for line voltage control, filament voltage control and reduced power operation. Output voltage from 0 to 130 volts, 50/60 cycles. Varipower units permit control of filament voltage at the tube socket to within 2 1/2% of desired value simultaneously with line voltage control and plate voltage control. Can be used to reduce or increase voltages on filament transformers. Taps at 25, 55, 75, 95, 100, 105, 110, 115, 120, 125 and 130 volts permit output voltages from 0 to 130 volts in 5 volt steps.

Type No.	Watts Output	Dimensions	Weight Lbs.	List Price
VA-1	150	4 1/2 x 3 1/2 x 3 1/2	6	\$7.00
VA-2	250	4 3/4 x 4 1/2 x 3 1/2	9	9.00
VA-3	500	5 1/2 x 4 1/2 x 4	11	12.00
VA-4	1000	5 1/2 x 6 x 4	19	18.00
VA-5	2000	7 x 6 x 5 1/2	25	25.00

The new UTC PA power transformers and chokes have been designed to commercial standards. Temperature rise and insulation requirements are in accordance with the conservative specifications of the A.I.E.E. and Fire Underwriters. Ratings are conservative, for continuous duty, and suitable for all commercial and amateur applications. All items are vacuum impregnated in addition to sealing with special insulating compound. Rugged ceramic bushings are used for high voltage terminals.

These transformers and reactors are designed for temperature rise less than 55 degrees C., and are tested for breakdown on all windings at twice working voltage plus 1,000 volts. In addition, plate transformers are given a surge test at 2 1/2 times normal applied voltage using a 500 cycle supply. In view of the conservative ratings and manufacturing procedure, these units are suitable for use on most types of government and standard commercial communication equipment. However, these same quality features make these units ideal for amateur transmitter equipment and also for quality PA units.

## LOW POWER FILTER CHOKES

# RADIO SET REPLACEMENT TRANSFORMERS

The new UTC replacement type transformers represent the culmination of years of development in this field. All units are vacuum sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Shells and brackets are finished in attractive high lustre black enamel.

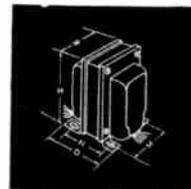

The new UTC shells and universal brackets employed make possible a latitude in mounting dimensions never approached heretofore. Using Varitap coil construction a minimum number of transformers have been developed to cover any requirement in the replacement field.

Through unique construction the five UTC Varitap Duplicate replacement transformers will service as many types of radio receivers as the 15 or 20 units more customarily employed for such service. The universal feet may be used for upright or horizontal mounting, or eliminated for flush mounting.

UTC vertical power transformers are unusually attractive in appearance, having smooth drawn cases finished in high lustre black enamel. The Varitap coil structure assures flexibility of application and permits the three units described to take the place of 5 to 8 units customarily employed for equivalent service.

## VARITAP FLUSH TYPE POWER TRANSFORMERS

The UTC flush type transformers are husky units designed for low temperature rise and good regulation. By employing a Varitap universal coil structure, (brought out to sturdy lugs) the five units described take the place of 12 to 15 units normally found in a flush type series.

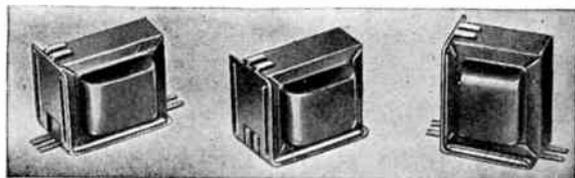

Type No.	High Voltage	Rect. Fil.	Fil. 1	Fil. 2	Dimensions, In.					Wt. Lb.	List Price

The Varitap Duplicate audio units represent the acme in replacement transformer development. The units are extremely attractive, the double shells and universal mounting brackets being finished in high lustre black enamel. The figure A units use the new UTC universal bracket. This bracket makes possible four hole horizontal or vertical mounting and two hole, channel type, horizontal or vertical mounting. The coils of these units, in addition to efficient design and mechanical shielding, are vacuum impregnated and completely sealed with a special compound to assure complete protection against adverse climatic conditions.

## VARITAP DUPLICATE AUDIO TRANSFORMERS AND FILTER CHOKES

(Completely Shielded Units, Universal Mtg.)

Type No.	Application	Description	Fig.	Wgt. Lbs.	List Price
R-23	1 plate* to 1 grid	3 1/2:1 ratio	A	1	\$2.50
R-24	1 plate* to 2 grids	2:1 ratio	A	1	2.60
R-25	2 plates* to 2 grids	1.5:1 stepup for class A triodes 1.5:1 stepdown for 6L6's, 2A3's, 2A5's, etc.	A	1 1/2	2.75
R-26	Driver, 1 plate to 2 grids	Single 42, 2A5, 6F6, 45, 46 to AB 6L6's, 42's, 2A6's, 6F6's, 46's	A	1 1/2	2.75

R-32	Filter choke	10 Hys--150 MA--100 ohms	B	2 1/2	3.28

\*Will match tubes like 27, 37, 56, 6C6 triode, 6C5. Can be used with high mu triodes with loss in low frequencies.

UTC channel frame TROPICAL WETPROOF audios are excellently designed. In addition to good frequency range, coils are vacuum-pressure treated followed by the UTC MOULD SEAL process of WET PROOFING to prevent moisture absorption.

R-45	500 watt capacity	13	20.00
R-46	1000 watts, no cord	26	35.00

## EXPORT VOLTAGE ADAPTERS

Complete with cord and plug and special locking switch providing for line voltages of 105, 115, 125, 135, 150, 210, 230, 250 volts; 42 to 60 cycles. Output voltage 115.

Type No.	Rating	Weight, Lbs.	List Price
R-48	150 watts	5 1/2	\$10.00

## LINE VOLTAGE CORRECTORS

Auto-transformers complete with cord, plug and tap switch. Switch will effect 115 volts plus or minus 2 1/2 volts output for any input voltage from 90 to 135 volts, 50/60 cycles.

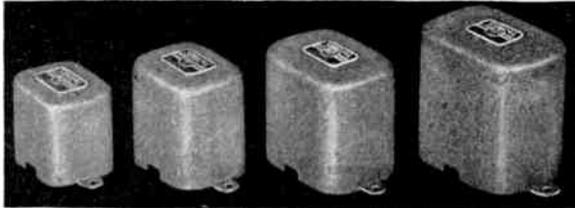

Type No.	Rating	Weight, Lbs.	List Price
R-50	100 watts	4	\$8.00
R-51	250 watts	5 1/2	10.00
R-52	1000 watts	18	35.00

# SPECIAL SERIES AUDIO TRANSFORMERS

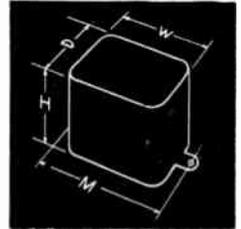

UTC Special Series transformers represent unprecedented value. These items are specifically designed for amateur and popular-priced PA service. For commercial equipment the PA or LS series of units are recommended. The Special Series units are finished in a rich, commercial type gray crinkle enamel. A recessed terminal strip is provided permitting above chassis or breadboard wiring in addition to standard chassis type wiring. The universal windings provided on driver, matching and output transformers assure a maximum of flexibility. Modulator output units will carry the DC current in the class C stage and will match practically any audio tubes to any RF load within the power rating of the transformer. Large components are housed in formed cases with top or bottom mounting and louvers for good ventilation.

## CASE SIZES

Type No.	H	W	D	M	Weight Lbs.
G-1	1 7/8	2	1 3/4	2 7/16	1

# SPECIAL SERIES POWER EQUIPMENT

UTC Special Series power supply components are designed specifically for amateur and popular-priced PA service. The ratings are based on such applications and recommended for intermittent service. For commercial applications, PA or LS grade components should be employed. Tapped coil structures on power and bias supply transformers afford maximum flexibility, permitting a given transformer to be used with many circuits and types of tubes.

# TRANSFORMERS AND REACTORS

## For Radio and Other Electronic Devices

### Hermetically Sealed Units

Compound-filled and hermetically sealed against the entrance of moisture. Designed to meet U. S. Navy salt water immersion tests. Standard hermetic case types range from very small up to units approximately 200 volt-amperes physical size. Special construction is employed for larger units.

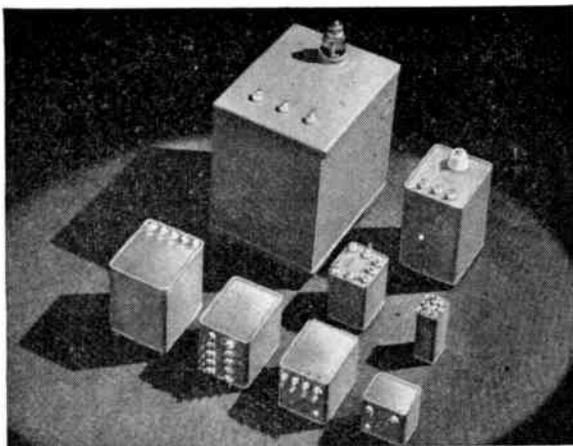

Conventional compound-filled units

### Core-and-coil Units

Usually applied where moisture resistance is not a factor, and where size and weight must be kept to the minimum. Standard core laminations are utilized in core-and-coil units 15 kva and smaller (physical size). Larger units are built up from special parts and ratings above 15 kva require special laminations.

Three general types of transformers and a complete line of reactors assembled from standard unit parts to meet specified requirements: power—with plate, and plate-and-flament units; filament—both conventional types and high-voltage units; audio-frequency—include microphone, input, interstage (or grid), modulation, and output types.

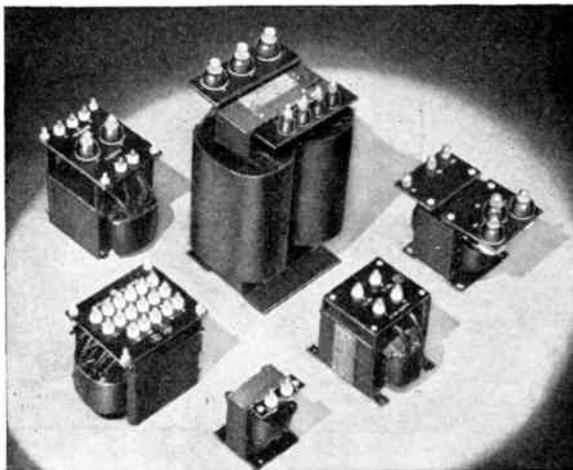

The line of reactors contains microphone, plate,

Hermetically sealed units

### Conventional Compound-filled Units

Not hermetically sealed. Moisture resistant, but not immersion-proof. Wide application in the Frequency-Modulation field. Top or bottom mounting for open or underdeck wiring. Standard case types include units up to 250 volt-amperes physical size. Larger units employ special construction.

Core-and-coil units

filter (conventional or swinging), and modulation units.

No standard ratings are listed as being in stock, but standard parts are available for manufacturing to specifications. This method of production enables every transformer to be specially designed for its given application.

## SECO *automatic* VOLTAGE REGULATOR

The SECO automatic voltage regulator maintains a constant output voltage with variations in input voltage or output load current. This regulator consists of a special bridge and thyatron tube circuit which detects any variation in a c line voltage and authorizes a Motor-driven POWERSTAT Variable Transformer to correct for a constant output voltage.

This improved type regulator retains all the desirable characteristics inherent in the variable voltage auto-transformer.

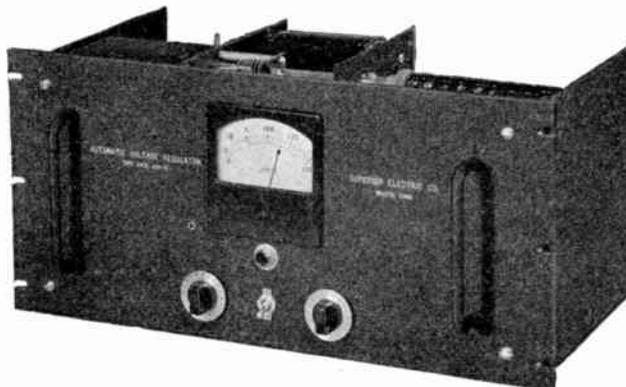

- HIGH EFFICIENCY 98% or better at full load.
- NO WAVE FORM DISTORTION.
- LOW EXCITING CURRENT.
- LOW COST PER KVA.

And the SECO regulator has additional features offered by no other automatic voltage regulating equipment.

- BUILT IN HIGH SPEED CIRCUIT BREAKER PROTECTION.
- NO INTERNAL MECHANICAL ADJUSTMENTS.
- OPERATION NOT AFFECTED BY LOAD OR POWER FACTOR.
- RAPID CORRECTION.
- OUTPUT VOLTAGE AND SENSITIVITY ADJUSTABLE OVER WIDE RANGE.

- CORRECTS A WIDE RANGE OF INPUT VOLTAGES. Standard models correct for input voltage variations of plus and minus 17.5% of the nominal output voltage.
- AVAILABLE FOR RACK MOUNTING OR IN SELF CONTAINED-CABINETS.

For all electrical and electronic applications this modern voltage control is available for single or polyphase 115, 230, or 440 volt circuits in capacities of 1 to 100 KVA.

## POWERSTAT

TRANSFORMERS FOR CONTROL OF A. C. POWER

VARIABLE

The POWERSTAT is a variable auto-transformer for obtaining continuously variable output voltage from a c power lines. The POWERSTAT is adaptable to any application where a smooth continuously adjustable output voltage is required.

The POWERSTAT combines many desirable features of voltage control:

**SMOOTH CONTROL:** Output voltages can easily be adjusted to within fractions of a volt of desired value.

**RUGGED MECHANICAL DESIGN:** Mechanically very rugged and simple, assuring freedom from maintenance and breakdown.

**EXCELLENT REGULATION:** Essentially no variation in output voltage from no load to full load current.

**HIGH EFFICIENCY:** Efficiency remains very high even at low output voltages. This means saving in power and is in contrast to the inefficient wasteful control method by rheostats.

**WIDE RANGE OF OUTPUT VOLTAGE:** Output voltages may be varied from zero to considerably above line voltage.

**LIGHT WEIGHT:** Use of highest grade silicon steel core and aluminum alloy parts results in extremely low weight.

**ADVANCED WINDING TECHNIQUE:** Larger models are wound with glass insulated wire while smaller units use a high strength poly vinyl resin insulation. In addition all units are thoroughly impregnated and baked with a high quality baking varnish.

**DESIRABLE ELECTRICAL FEATURES:** Low exciting current — Low exciting power — No distortion in output wave-form.

TYPE 116U

TYPE 116

TYPE 1226

TYPE 1256

### RATINGS OF POWERSTATS SHOWN ABOVE

**TYPE 1126**  
Input: 115 V, 50/60 cycles, 1 phase.  
Output: 0-135 volts, 15 amperes, 2.0 KVA.

**TYPE 116 & 116U**  
Input: 115 V, 50/60 cycles, 1 phase.  
Output: 0-135 volts, 15 amperes, 2.0 KVA.

**TYPE 1226**  
Input: 230/115 V, 50/60 cycles, 1 phase.  
Output: 0-270 V, 9 amps., 2.4 KVA.

**TYPE 1256**  
Input: 230/115 V, 50/60 cycles, 1 phase.  
Output: 0-270 V, 28 amps., 7.5 KVA.

Standard POWERSTATS are available for use on single or polyphase circuits of 115, 230 or 440 volts for air or oil cooling in sizes up to 100 KVA. Full voltage and limited output voltage ranges available.

# POWERSTAT

## WITH MOTOR DRIVE

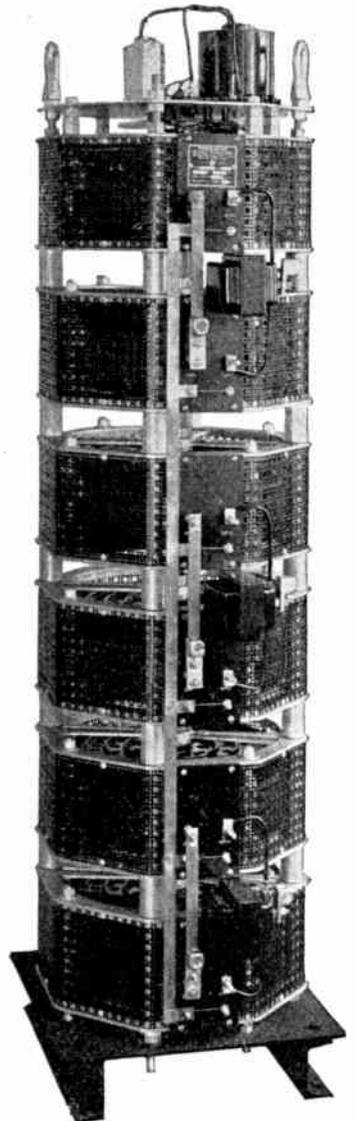

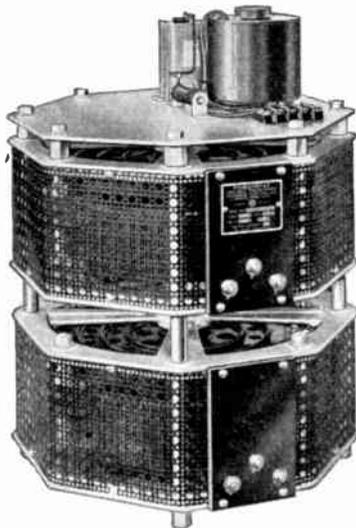

### FOR PUSH BUTTON OR AUTOMATIC CONTROL

SECO'S Motor-driven POWERSTAT Variable Transformers offer a highly efficient and accurate method of controlling a c power. It is unnecessary to bring heavy cable to cumbersome tap changers on switch boards or control desks. Simple wiring from your automatic control device or push button station to the pilot terminals of a Motor-driven POWERSTAT Variable Transformer will enable the operator to control kilowatts of power safely and smoothly.

Engineered combinations of POWERSTAT VARIABLE VOLTAGE TRANSFORMERS and a HIGHLY DAMPED SYNCHRONOUS DRIVING MOTOR of low fundamental speed are the answer to efficient, quick, convenient and continuous control of power.

Where a self-contained piece of apparatus is required for rapidly controlling voltage to any desired value — investigate Motor-driven POWERSTAT Variable Transformers. This equipment is used in radio transmitters, vacuum tube manufacture, electrical testing, induction heating, electric furnace temperature control, automatic voltage regulators and other applications where an efficient high quality control is required.

Motor-driven POWERSTAT Variable Transformers are manufactured in sizes up to 100 KVA for 115, 230 or 440 volt operation on single or polyphase circuits. Various speed operators are available having travel time from one second to one minute.

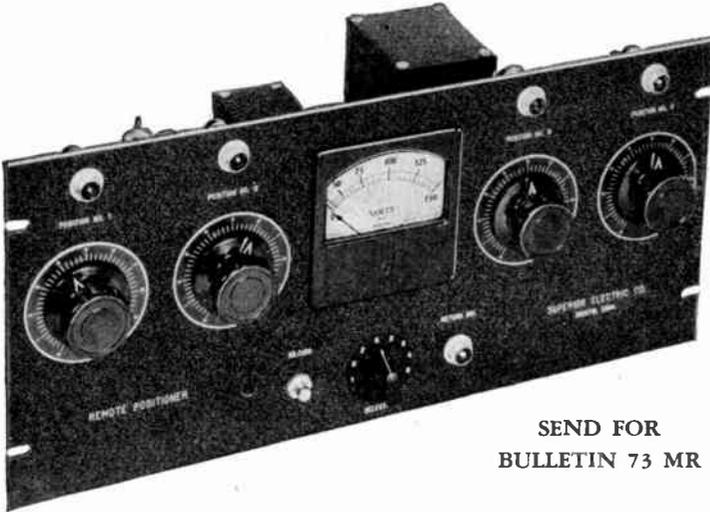

SEND FOR GENERAL BULLETIN MR

# SUPERIOR *Electric Company*

## SECO REMOTE POSITIONER

To remotely control a POWERSTAT Variable Transformer with a high degree of accuracy SECO has added the "POSITIONER" to its line of quality a c voltage control equipment.

SERVO operation is achieved by turning the dial of the remote controller causing the Motor-driven POWERSTAT Variable Transformer to follow in accordance with the dial position. The position of the pointer of the remote controller and the position of the POWERSTAT pointer will always be in exact relationship. Every change made in the position of the controller will be transmitted immediately to the POWERSTAT driving motor so that the POWERSTAT will be positioned exactly to a point corresponding to the location of the controller pointer. Control wires between the "POSITIONER" and the motor operated POWERSTAT serve as an "electrical flexible shaft" coupling the control dial and the POWERSTAT Variable Transformer.

SEND FOR  
BULLETIN 73 MR

## SECO VOLTBOX

In presenting this unique instrument, SECO offers a portable source of variable a c voltage for the laboratory, assembly line, or maintenance shop.

The SECO VOLT-BOX is available in unregulated and automatically regulated types.

The unregulated SECO VOLT-BOX consists of a strong, light weight, compact steel enclosure with a POWERSTAT Variable Transformer to obtain the required voltage, a 1% voltmeter to accurately set the output, high speed circuit breaker protection, pilot light, output receptacle, binding posts, input cord and plug. Standard types are available for 115 volt input, 0-135 volt output at 7.5 amperes maximum or 230 volt input 0-270 volt output, 3.0 amperes maximum.

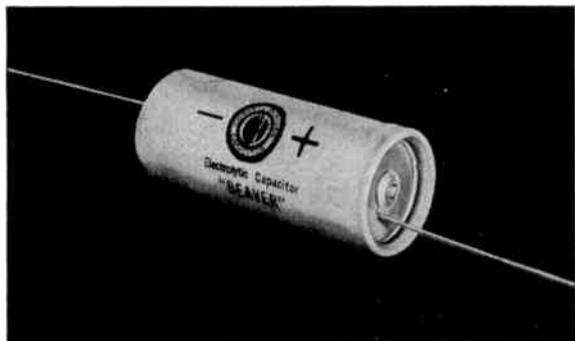

The regulated SECO VOLT-BOX has all the components of the unregulated type plus a voltage stabilizer. With this instrument an automatically regulated output voltage of any value between 0 and 135 volts can be maintained at a current of 5 amperes maximum.

## DRY ELECTROLYTIC CAPACITORS

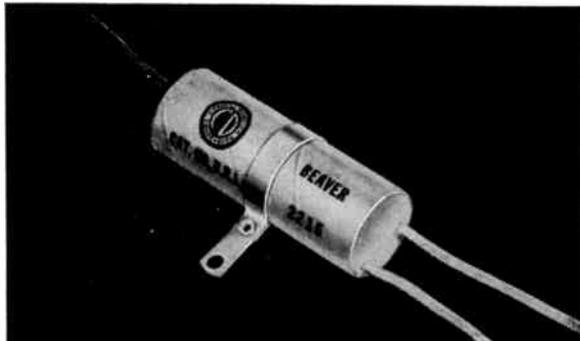

### TYPE BR "BLUE BEAVERS"

Type BR "Blue Beavers" are the most universal capacitors available for use where single section units are required. They are extremely small, handy, and completely eliminate the use of exact duplicate replacement capacitors. Polarity is clearly indicated on a protective varnished cardboard sleeve fitted over a pure aluminum cartridge. Hermetically sealed, vented, and especially designed for use in all radio circuits.

### TYPES BRL AND BRS "BEAVERS"

Type BRL "Beavers" are dual and triple common negative capacitors, while Type BRS are dual common positive units. Capacities, voltages and polarity of the leads are clearly defined by color coding stamped on the cardboard tube casing. Units are provided with a mounting strap around the center of the cardboard tube casing which enables mounting with one screw under the chassis assembly.

## DRY ELECTROLYTIC CAPACITORS

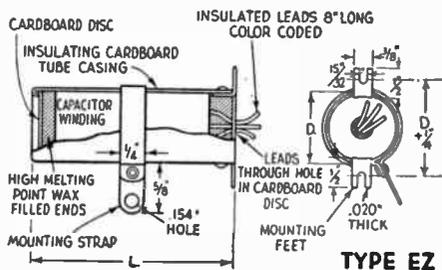

### TYPE EZ UNIVERSAL MOUNTING UNITS

Type EZ capacitors are especially popular for radio servicing where low cost replacements are required. They are designed with mounting feet for upright mounting to replace inverted can-type units, spade-lug units, or may be mounted beneath the chassis by means of the mounting strap provided around the center of the cardboard tube casing. In any instance, the unused mountings may easily be cut off.

These units are without doubt the most practical all-around replacement capacitors available and incorporate C-D etched foil features in design and construction. They are completely sealed in moisture-proof cardboard tube casing, filled with special wax compound, and provided with insulated wire leads eight inches long.

All units are clearly stamped with capacities, voltages and color code designation of leads.

TYPE EZ

### TYPE BRH HIGH-CAPACITY LOW-VOLTAGE UNITS

These compact C-D etched foil electrolytic capacitors have been especially designed for all applications requiring high capacity units operating in low voltage D.C. circuits. They are widely employed in portable radio power rectifying circuits, electric fence devices, telephone and D.C. timing circuits. Units are available in standard capacities and voltage ratings for all uses.

Hermetically sealed in pure aluminum cans with an external cardboard insulating sleeve, these units are provided with metal mounting strap and bare wire leads for convenient wiring into any circuit assembly. They are constructed identically the same as Type BR "Blue Beavers" except all units are provided with a mounting strap.

## DRY ELECTROLYTIC CAPACITORS

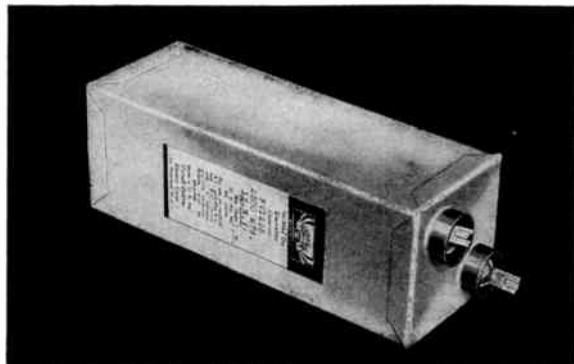

### TYPE FA HIGH-CAPACITY LOW-VOLTAGE UNITS

Type FA capacitors in round aluminum cans are designed for high capacity, low voltage applications, and are especially popular as replacements in motion picture sound equipment, "A" battery power supplies and other low voltage circuits where hum-free operation is essential. Their physical size for a given capacity and voltage rating makes them particularly desirable for compact assemblies. All units are provided with lug terminals on a moulded bakelite cover and furnished with an external cardboard insulating sleeve for protection against short circuits with associated parts of equipment assemblies.

### TYPE FV HIGH-CAPACITY LOW-VOLTAGE UNITS

Type FV high capacity, low-voltage capacitors in rectangular metal cans are widely employed in standard types of low-voltage rectifiers for sound picture equipment, public address and sound systems, low-voltage power supplies, etc. They are particularly popular as replacements for servicing requirements where exact duplicate units are desired.

All units are hermetically sealed in an internal aluminum can insulated from the external metal casing, and provided with bakelite, barrier-insulated terminals and fork soldering lugs.

## DRY ELECTROLYTIC CAPACITORS

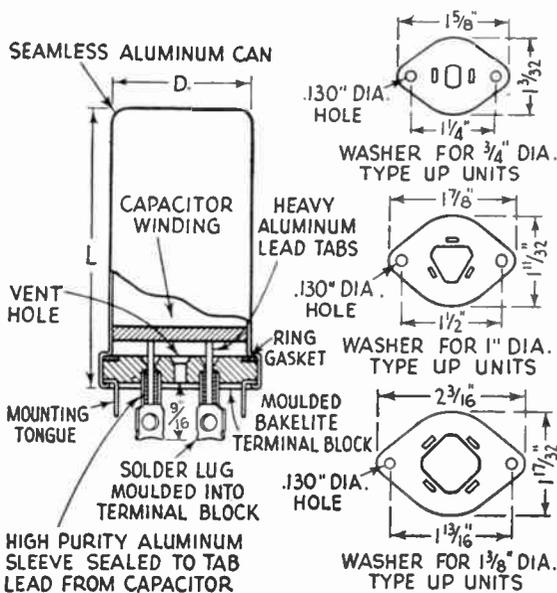

### TYPE UP CYLINDRICAL CAN UNITS

Type UP capacitors are the smallest can-type electrolytic units available. They are hermetically sealed in aluminum cans with positive terminal lugs on a bakelite insulating cover, the can being the common negative terminal.

Projecting tongues provide facilities for mounting in a vertical position on metal chassis bodies or on metal or bakelite mounting washer. Bakelite and metal washers are furnished with each unit. The projecting tongues have small wire holes and are tinned for convenient soldering to common negative connections. All solder lugs are mechanically strong, being made of cold rolled steel, although nothing other than pure aluminum comes in contact with the electrolyte within the container to cause galvanic corrosion. Electrically, these Type UP units possess excellent characteristics, having exceptionally low leakage and power factor, and are especially dependable in operation over wide temperature variations with minimum capacity change.

## DRY ELECTROLYTIC CAPACITORS

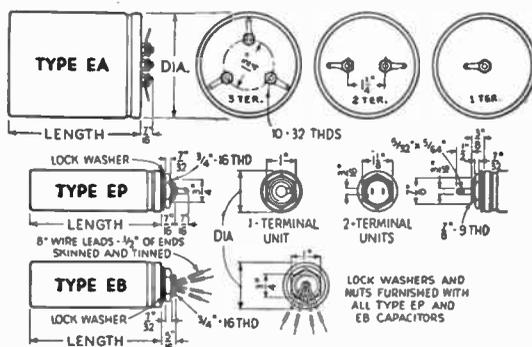

### TYPE EH CARDBOARD BOX UNITS

Type EH capacitors are standbys for "heavy-duty" units in filter circuits of console model receivers or equipment where larger size units can be used. They have mounting flanges (which may be easily cut off if necessary). Dual units are available in separate section construction, having four color-coded wire leads; also in common negative three lug-terminal assembly, with two positive and one negative terminals. Triple section units have four leads, three of which are positive and the fourth, common negative. No deviation is made from this practice because most circuit combinations can be successfully met by the use of one or more of capacitors listed. (L denotes wire leads; SL separate leads.) Color code of leads with polarity, capacity and voltage rating of each section is clearly stamped on all units.

### TYPES EA, EB & EP ALUMINUM CAN UNITS

These Types, EA, EB and EP, are the most popular of the larger round can electrolytic capacitors. Type EB has insulated, color-coded wire leads; in single section units, red lead is positive, black negative. In dual units, this combination holds for the one section, while a blue lead and its complementary yellow lead makes up the other section. In the EP and EA units, the central insulated terminal is the positive, while the metal container is the negative. In multiple section units, EP and EA, positive terminals are insulated and the container is common negative, most generally grounded to the chassis. EB and EP have lock washers and hexagon nuts, EA a mounting ring, (see page 9). Color code of leads with polarity, capacity and voltage rating of each section is clearly stamped on all units.

All Type UM capacitors are clearly stamped with capacity and voltages of sections, including color coding of leads in order to preclude against error in wiring.

### TYPE UM UNIVERSAL REPLACEMENTS

C-D universal replacement capacitors Type UM cover a wide variety of requirements where units of special capacity and voltage combinations are needed. They are furnished in standard cylindrical aluminum cans, cardboard tube and box-type casings as noted in the listing below.

### Cylindrical Aluminum Can Units

## WET ELECTROLYTIC CAPACITORS

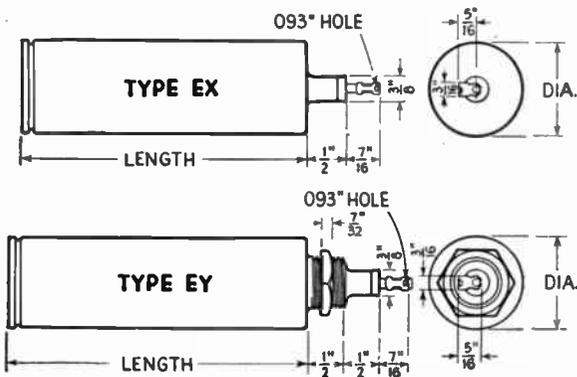

**TYPES EX AND EY WET ELECTROLYTICS**

**NOTICE:** Due to the material requirements of our National Defense program we are unable to supply wet electrolytic Capacitors until further notice. However, we have made available three universal dry type electrolytic units suitable for replacement purposes as follows:

Cat. No.	Replacement for	Size—Ins. Dia. x Length	List Price	Net Price
KR 10	4 to 12 mfd. use	1 3/8 x 3 1/2	\$1.15	\$0.69
KR 20	16 to 20 mfd. use	1 3/8 x 4	1.65	.99
KR 40	24 to 40 mfd. use	1 3/8 x 4	2.00	1.20

For 1" diameter wet electrolytics we recommend Type KR capacitors as listed on a preceding page.

When ordering, please specify above dry type electrolytics desired according to the above catalog numbers.

Cat. No.	Cap. Mid.	Size—Inches Dia. x Length	List Price	Net Price

### "ELECTROLYTIC CAPACITORS"

By PAUL McK. DEELEY

Chief Engineer of the Electrolytic Division

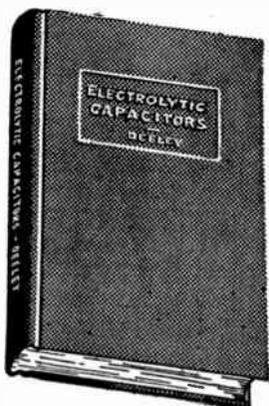

CORNELL-DUBILIER ELECTRIC CORPORATION

Here in one masterly volume, "Electrolytic Capacitors," you will find a wealth of the most practical information ever published on the subject of electrolytic capacitors.

Never before has the technician been offered a manual so complete and so comprehensive at this price—\$1.00 net, formerly \$3.00. "Electrolytic Capacitors" should be in every radio man's professional library and technical file.

This instructive book supplies the reader with specific information concerning the many factors involved in the theory, design and construction of electrolytics. It is profusely illustrated and describes all applications of electrolytic capacitors. 300 pages, size 5 1/2" x 7 7/8", cloth bound hard cover. Every page is a gold mine of facts and data.

This 300-page book is yours postpaid—for only . . . . . **\$1.00 net**

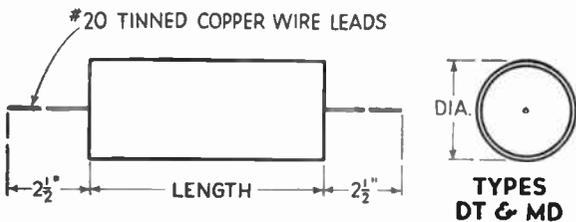

## TUBULAR PAPER CAPACITORS

C-D Type DT, "Dwarf Tiger" paper tubulars are non-inductively wound, specially sealed and impregnated. They are small, have a high safety factor, are uniform in electrical properties and have well-soldered rigidly anchored wire leads. A specially-treated cardboard tube keeps out moisture. High melting point wax ends add strength and give extra protection to the unit.

C-D Type MD "Blue Tiger" tubular paper capacitors are designed to meet the more rigid requirements of improved modern radio receivers. They provide greater permanency of electrical characteristics such as higher resistivity, lower power-factor and more stable capacity over a long period of time. They are non-inductively wound, specially sealed with a wax outer coating, impregnated with Dykanol "D", and are provided with bare, tinned wire leads.

### FEATURES OF TYPES DT & MD

1. Type DT-Halowax Impregnated-Reduced physical size.  
Type MD-Dykanol "D" Impregnated-Improved power-factor; higher and more stable insulation resistance; more constant capacity characteristics; longer life under most severe conditions of humidity and temperature.
2. Hi-Purity Aluminum Foil-Lower R.F. resistance; light weight.
3. Hi-Purity Multi-Laminated Tissue-Higher working voltage.
4. Vacuum Dried and Impregnated-Lower losses; longer life.
5. Oil-Cooled-Higher voltage breakdown.
6. Rigidly Tested-Uniform product.
7. Self-Supporting Leads-No contact resistance; added strength.
8. Wax Impregnated Tube-Protected against moisture.
9. Small Size, Non-Inductive-"Short-path" R.F. bypass.
10. Special Wax-Potted Ends-Better humidity and temperature seal.
11. Conservative D.C. Rating-Triple-tested for dependable service.

**TYPE DT & MD PAPER TUBULARS**

## METAL SHELL CASED PAPER CAPACITORS

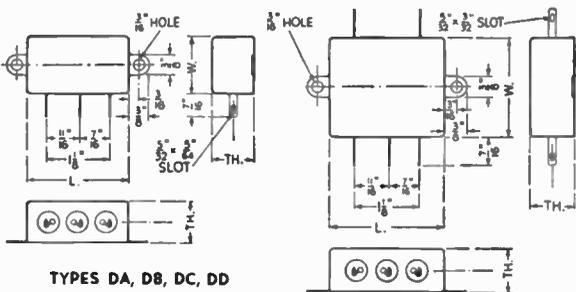

### TYPES DA, DB, DC & DD WAX FILLED UNITS

C-D Metal Shell Type DA to DD capacitors are non-inductively wound, well protected against climatic conditions and available in a large variety of ratings for radio frequency bypass, audio frequency coupling and bypass functions. Lug terminals are amply insulated. Integral with casing, the mounting feet allow ease of assembly.

In the single and dual section capacitor units, the terminals are insulated from the container. The duals have three terminals, the common lug being on the left. In the triple and quadruple section capacitors, the common terminal connection is grounded to the metal case.

All units are wound with the highest grade pure aluminum foil and multi-laminated Kraft tissue, thoroughly dried under vacuum pressure, impregnated in the finest grade wax compound, oil-cooled, and potted in a special wax compound. Conservative D. C. ratings of these capacitors by triple testing assures dependable service in operation.

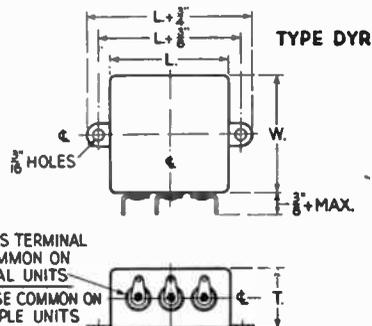

TYPES DA, DB, DC, DD

### TYPE DYR DYKANOL FILLED UNITS

Type DYR Dykanol Bypass Capacitors are non-inductively wound and fill the need for dependable capacitors of fractional capacities that will operate efficiently in R.F. and A.F. bypass, audio frequency coupling and A.C. circuits under all humidity conditions and at temperatures up to approximately 80° C. (180° F.). They are built to stand an immersion test in hot water and have been specially designed to fill the severe requirements of aircraft, submarine, marine and tropical applications for maximum capacity and voltage in minimum space, where quality and reliability are of paramount importance. They are impregnated and filled with Dykanol "A" and sealed in non-corrosive cases with leakproof riveted terminals.

### UNCASED PAPER CAPACITORS

Type RM uncased capacitors are made available to repair paper dielectric filter blocks which were used in the early models of A.C. operated radio sets. Also useful in the elimination of electrical interference caused by pushbuttons, bells, buzzers, and similar applications in radio, electronic and electrical devices.

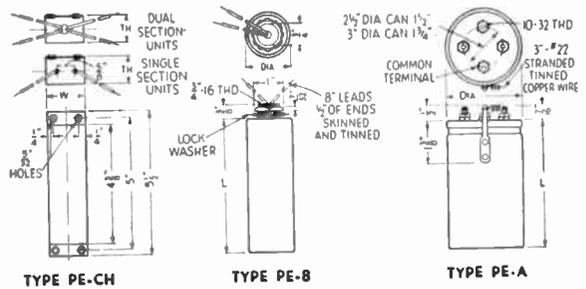

Special capacitor units can be made up and potted into suitable containers by servicemen to fulfill many requirements.

Cat. No.	Cap. Mid.	Size—Inches Lth. x Wid. x Thick.	List Price	Net Price
<b>400 V. D.C.</b>				
RM 4050	.5	2 x 1 x 3/8	\$0.60	\$0.36

### TYPES PE-CH, PE-A AND PE-B PAPER UNITS

Paper Replacement Capacitors that simulate electrolytics in appearance; these types fulfill a real service need. Their actual capacity is from 1/3 to 1/2 of the usual value employed when using electrolytics. They afford a high voltage breakdown which an electrolytic does not offer. There is no polarity to observe when using these capacitors. In Types PE-B and PE-CH, the dual section units have separate leads, a set of two leads of one color identify the terminals for each capacity. In Type PE-A triple section units, the common terminal stud is insulated, with provision made to ground same by means of a small wire lead soldered to the grounding lug on the metal container.

Cat. No.	"Replacement" for Electrolytic Cap. Mid.	Actual Mid. Capacity	Size—Inches Length x Width x Thickness	List Price	Net Price
----------	--	----------------------	---	------------	-----------

### TYPE PE-CH, 1000 V. D.C. Test, 600 V. D.C. Peak, 450 V. D.C. Working

PE-CH 4004	8	2	4 3/8 x 1 3/8 x 1 1/8	\$1.10	\$0.66
PE-CH 4008	8	3 1/2	4 3/8 x 1 3/8 x 1 5/8	1.40	.84
PE-CH 4808	8-8	2 3/8 x 2 1/2	4 3/8 x 1 3/8 x 1 1/8	2.30	1.38

### TYPE PE-CH, 1200 V. D.C. Test, 800 V. D.C. Peak, 600 V. D.C. Working

PE-CH 6004	4	2	4 3/8 x 1 3/8 x 1 5/8	\$1.45	\$0.87

## AUTO RADIO CAPACITORS

Top Row—TYPES IC-2P55, FC-2PV, FC-2P5A & ICH-2W1A.  
Center Row—TYPES IC-2P5C, HC-870E & VL-S1  
Lower Row—TYPES VC 1160, VUL S2 & DT16D5.

The mechanical design of C-D Auto Radio Capacitors insures against damage by the high temperatures and excessive vibration existing under the hood of an auto. Special units such as these are designed for certain particular installations. Thus, for instance, Ford generator capacitor, FC-2P5V, has a special mounting bracket while others are also provided with special mountings and terminals. Vibrator capacitors are oil-treated to withstand high peak and surge voltages.

**TYPE TJU DYKANOL CAPACITORS**

C-D Dykanol Transmitting Capacitors Type TJU are without doubt the most dependable units offered to the radio trade—amateur, broadcast and commercial. Beautifully designed, compact, light-weight, safely-rated, furnished with universal mounting clamp, well-insulated terminals. These are the capacitors which practically every broadcast and government station in the world uses with such marked success. Standard equipment with tens of thousands of amateurs. Also employed in all types of television receivers and transmitters.

These units are thoroughly impregnated and filled with Dykanol "A" (chlorinated diphenyl), a non-inflammable, fire-proof non-oxidizable liquid compound which is unaffected by wide latitude of temperature changes or voltage stresses.

All units are conservatively rated and may be operated continuously at 10% above their rated voltage. Clamp-type mounting brackets as shown below, for mounting units in either upright or inverted position are furnished with all units.

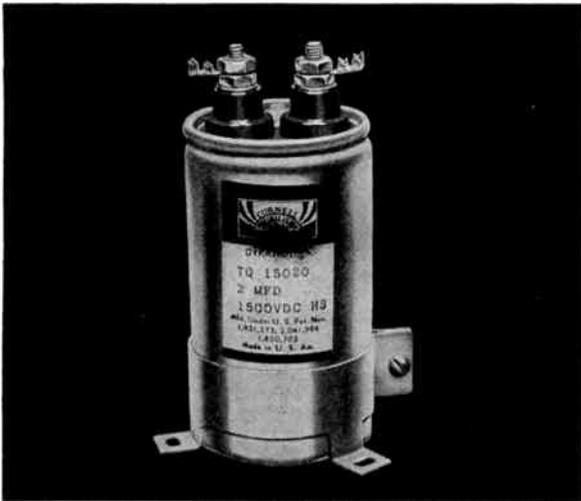

(For higher voltage units 6000 to 25,000 V. D.C. see Cat. No. 160-T which is available to accredited engineering, educational, broadcasting and manufacturing organizations on request.)

\*Type TJU units are not furnished in these larger sizes. But type TJ units can be supplied with mounting feet soldered to bottom of can.

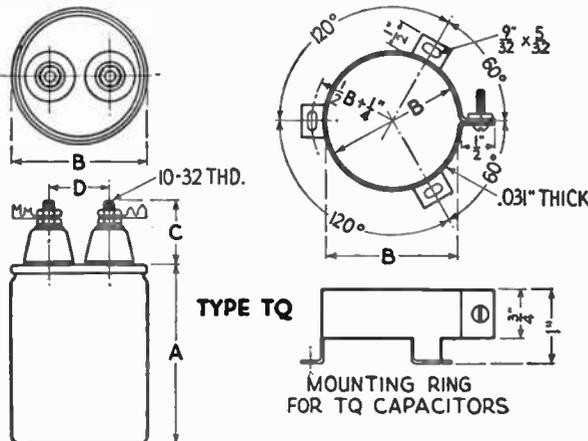

## DYKANOL TRANSMITTING CAPACITORS

### TYPE TQ DYKANOL CAPACITORS

Cornell-Dubilier, Type TQ Dykanol Capacitors, in cylindrical aluminum containers are provided with two insulated terminals and universal mounting rings for mounting the unit in any position with terminals either above or below a subpanel assembly. These units are designed primarily for filter circuits in amateur, low-power broadcast and commercial transmitters. They are also adapted for high-power, high-fidelity public address systems and portable power amplifiers.

### TYPE TLA DYKANOL CAPACITORS

For compact high-voltage filter applications in high-fidelity P.A. amplifiers, power supplies for short-wave portable transmitters and transceivers, type TLA Dykanol filter units in cylindrical aluminum containers are ideal in every respect. One terminal is well insulated, the other being the metal can itself. They will withstand transient voltages as well as high-peak voltage surges, as they are designed to operate for continuous, full-load duty.

Insulating washers, as well as a large spade lug, are provided so that the metal container may be insulated from the chassis. They are thoroughly impregnated and filled with Dykanol as the Dykanol has a di-electric constant of 4.8, a power factor of .3%, and enables the fabrication of capacitors having a direct current resistance of 10,000 megohms per microfarad, of small size and high insulation resistance. An appreciably lower space factor accounts for the substantial reduction in physical size for a given capacity and voltage rating.

Cat. No.	Cap. Mfd.	D.C. W. Volts	Size—Inches Lth. x Diam.	List Price	Net Price
TLA 6020	2	600	2 1/4 x 1 1/4	\$3.30	\$1.98

### HIGH SPEED PHOTO-FLASH DYKANOL CAPACITOR

Type KGT 6250-1 capacitor is rated for operation at 2000 volts D.C. and each unit offers a capacity value of 25 microfarads. Two or more units may be used to provide any desired multiple of this value in the construction of speed flash lamps for making stroboscopic pictures. Unit comes in sealed metal case, 6 1/4 x 4 1/4 x 3 1/4\"/>

## MICA TRANSMITTING CAPACITORS

### TYPES 4 & 9 MICA CAPACITORS

C-D Mica Capacitors Types 4 and 9 are designed to meet the requirements of power amplifiers and low-power transmitters. They are principally employed for grid and plate blocking purposes and for r. f. by-pass functions. These popular units are available in a wide range of capacities and three standard voltage ratings.

Standard tolerance  $\pm 10\%$ . Also available in closer capacity tolerances at slightly higher prices, and low-loss bakelite. . . For low-loss bakelite add 25c to list price.

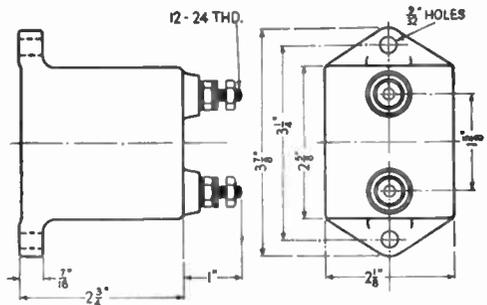

### TYPE 86 MICA CAPACITORS

C-D new and improved Type 86 Mica Capacitors in dehydrated porcelain cases have been designed for amateur radio communication, 'fone, CW and ICW, for plate blocking, grid, buffer, tank, and antenna coupling purposes.

By selecting a special high grade ruby mica, Type 86 capacitors have very low radio frequency resistance and power factor, but extremely high direct current resistance.

While entirely satisfactory for intermittent duty in amateur transmitters, these units are not recommended for use in broadcast station equipment, aircraft transmitters or commercial applications where more rigid tolerances\* and other heavier current carrying characteristics are essential.

## MICA RECEIVING CAPACITORS

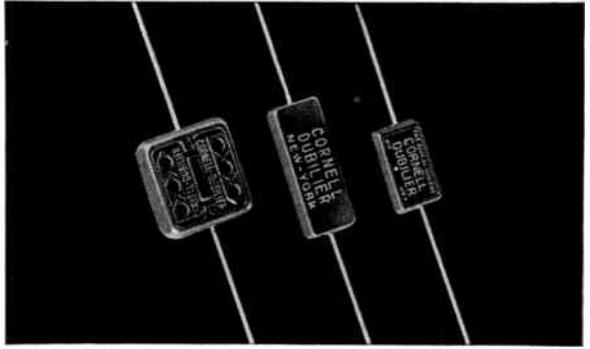

### TYPES 1W, 3L & 5W MICA CAPACITORS

Moulded Bakelite Capacitors, Types 1W, 3L and 5W are suitable for numerous electronic uses and are specially adapted to serve many important functions in low-voltage radio circuits. All units are rated at 500 volts D.C. working and tested at 1000 volts D.C. except on capacities higher than .003 mfd. of Types 1W and 3L which are rated at 300 volts D.C. working—600 volts test. They are individually tested for accuracy of capacity and voltage breakdown and designed to give dependable service where small size units are required.

### TYPES 1R, 2R & 5R MICA CAPACITORS

Types 1R, 2R and 5R "Silver-Mike" Silvered Mica Capacitors are designed for use in electronic circuits where frequency stability must be maintained. They are ideally suited for use in circuits where the LC product must be maintained constant, and particularly adapted for use in tuning IF transformers, push-button tuning circuits and other similar applications. Standard units are moulded in low-loss red bakelite and furnished with tinned brass wire leads.

All units are rated at 500 volts D.C. working and tested at 1000 volts D.C. except on capacities higher than .0025 mfd. of Type 1R which are rated at 300 volts D.C. working—600 volts test.

## CAPACITOR TEST INSTRUMENTS

### C-D CAPACITOR ANALYZER

The Model BF-50 Capacitor Analyzer quickly and accurately measures all important characteristics of all types of capacitors. It offers the most accurate and thorough capacitor test of any instrument of its type, and may be operated on any 110-volt, 50-60 cycle power line. The analyzer will determine the true condition of all paper, mica and electrolytic capacitors, including A.C. motor starting types. It is the only instrument of its type which provides a complete test for all capacitors, with amplifier for adequate sensitivity, easy reading linear scales, push-button switches for simplicity of adjustments, D.C. voltage supply and visual eye leakage indicator.

#### Features of C-D Analyzer

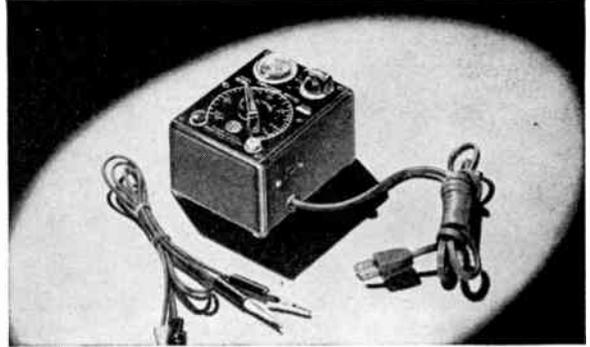

1. Measures Capacity—Accurately measures capacity of paper, mica, air, electrolytic and motor-starting capacitors from .00001 to 240. mfd.
2. Measures Power Factor—Measurements of power factor from zero to 50 percent on all types of electrolytic capacitors including motor-starting types.
3. Employs Wien Bridge—Assures permanent accuracy of capacity and power factor measurements. Readings not affected by line voltage variations.
4. Indicates Insulation Resistance—Insulation resistance measurements of paper and mica capacitors up to 1500 megohms. Also measures many types of insulation.
5. Indicates Leakage—Measurements of leakage of electrolytic capacitors by means of built-in direct current power supply.
6. Visual Eye Leakage Indicator—Provides simplified and reliable leakage tests on all types of capacitors. Enables measurements to be made rapidly.
7. Detects Defective Capacitors—Character measurements, such as leaky, shorted, open, high and low capacity, and high power factor on all capacitors.
8. High Sensitivity on All Measurements—Amplifier for capacity, power factor and leakage tests provides sharp and accurate readings. Amplifier built in Analyzer.
9. Balance Sensitivity Control—Provides sharp or broad balances for quick and accurate readings. All readings are made simply and directly.
10. Direct Reading Linear Scale Calibration—Provides simplified measurements. All scales on panel uniformly spaced, easy to read, thus avoiding possible errors in using multipliers or charts.
11. Push-Button Switching—For convenient and simplified adjustments, all tests and circuit changes are made by means of modern push-button switches.
12. Visual Eye Bridge Balance—Visual detector gives positive indication of bridge balance for convenient, simplified and accurate capacity and power factor measurements.
13. Six Color-Coded Scales—Accurately calibrated, six color-coded scales. Uniformly spaced over total spacing of sixty inches. Easy to read. No "blind" spots.
14. General Purpose Instrument—May be used to check continuity capacity between circuits, insulation of transformer windings and other types of coils, etc.
15. Self-Contained—Portable—An instrument complete in itself, requiring no external standard, headphones, meters or accessories. A portable unit, for 110 volt, 50-60 cycle operation, supplied in walnut cabinet, removable cover, with carrying handle. Size, 6 1/2 x 12 x 9 1/4 inches. Weight, 9 pounds.

MODEL BF-50 CAPACITOR ANALYZER

List Price, less tubes, \$49.80

Net Price, ..... **\$29.88**

For Operation on 110 volts, 50-60 cycles.

### C-D CAPACITOR BRIDGE

The Model BN Midget Capacitor Bridge quickly and accurately measures all types of capacitors between limits of .00001 mfd. and 50. mfd.

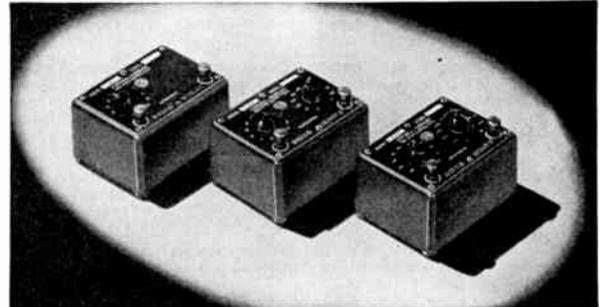

#### Features of C-D Capacitor Bridge

1. Measures Capacity—Accurately measures capacity of paper mica electrolytic and air capacitors between limits of .00001 mfd. to 50. mfd.
2. Indicates Power Factor—Power factor of electrolytic capacitor indicated by means of visual eye detector tube.
3. Detects Defective Capacitors—Detects many types of defective capacitors, open and short circuited, high and low capacity, and high power factor.
4. Checks Circuit Continuity—May be used on continuity meter. A handy instrument for checking circuits, coils, transformers and many other uses.
5. Employs Wien Bridge—Employs Wien Bridge circuit for all measurements. Accuracy independent of line voltage variations.
6. Visual Eye Bridge Balance—Dual type visual bridge balance for accurate measurements facilitates quick tests on service jobs.
7. Direct Reading Scale—Direct reading ranges with all scale markings directly in microfarads. Clear reading dial scale. All capacity calibrations marked on panel. No charts or multipliers required.
8. Self-Contained—The Capacitor Bridge is complete in itself and requires no headphones, standards, external meters or similar accessories.
9. Extremely Compact—The unusually small size of this bridge makes it particularly handy for portable use—3 1/4" x 5" x 3" weight 2 pounds.
10. Attractive—Supplied in attractive walnut Bakelite case complete with detachable test leads and useful instruction booklet.

MODEL BN CAPACITOR BRIDGE

List Price, less tubes, \$19.80

For operation on 110 volts, 60 cycles. Net Price, ..... **\$11.88**

### C-D CAPACITOR DECADES

C-D Capacitor Decades provide accurate standards over a wide range of capacity. May be used in groups of the three decades, shown above, or used individually for maximum flexibility. Each decade is furnished with calibration chart giving exact capacity values for all scale markings, extending use to more precise measurements.

Rated Voltage—600 D. C.—220 A. C.

## QUIETONE INTERFERENCE FILTERS

Top Row—IF-19, IF-18 and IF-21  
Lower Row—IF-4 & 5, IF-6, IF-22, IF-20, AF-10

### RADIO AND APPLIANCE QUIETONES

Most satisfactory results are obtained when Quietones are installed at the source of the interference. A Quietone installed in connection with an offending appliance corrects the noise conditions caused by that appliance, improving your neighbor's radio reception as well as your own.

Where source of interference cannot be located a Quietone connected in the electric supply line of the radio receiver will alleviate, if not fully correct, the condition. When a Quietone is installed, interference will be greatly reduced. Remaining interference usually enters receiver through the antenna system.

#### Quietones for Use at the Radio Receiver

**TYPE IF-4**—For use on small radio receivers, such as A.C.-D.C. midget sets, etc., where noise level is not too severe. Connects in power line between the radio receiver plug and wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut, or green finish. List Price \$0.90 Net Price \$0.54

**TYPE IF-18**—For use in connection with all radio receivers where noise level is severe. Furnished in Bakelite case (see colors). Employs highly effective all-wave capacitive-inductive type filter. Ratings: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory or walnut Bakelite. List Price \$6.00 Net Price \$3.60

#### Quietones for Use at Appliances

**TYPE IF-5**—For small electrical appliances such as food mixers, hair dryers, etc., where radio interference is of low intensity. Plug type filter. Convenient to install. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish. List Price \$0.90 Net Price \$0.54

**TYPE IF-6**—For all types of home electrical appliances where interference is of moderately low intensity. Installed between appliance and power supply line with short return lead which reduces radiation. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish. List Price \$1.50 Net Price \$0.90

**TYPE IF-18**—An efficient all-wave capacitive-inductive sectional band type filter for use in connection with all types of electrical appliances where interference conditions are severe. Provided with frame connection for reduction of radiation. Furnished in Bakelite case (see colors). Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case, walnut finished. List Price \$6.00 Net Price \$3.60

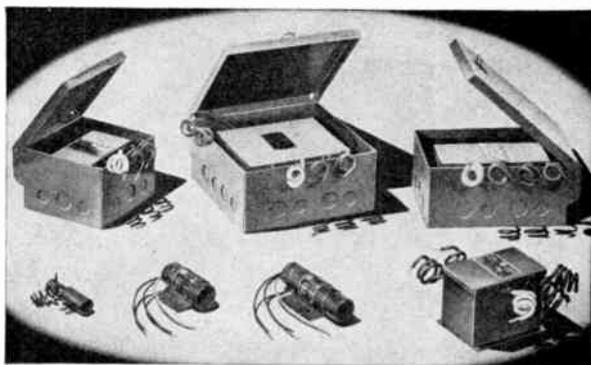

**TYPE IF-19**—Capacitive-inducted type filter for use where interference is severe. Frame connection provided. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish. List Price \$4.80 Net Price \$2.88

**TYPE IF-20**—For use on small electrical appliances where interference is very low. Simply connected to cord plug of appliance and plugged into wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish. List Price \$0.60 Net Price \$0.36

**TYPE IF-21**—All-wave capacitive-inductive type filter for use on appliances where return lead to the frame of appliance cannot be made, such as shaver, barber clippers, etc. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 1.6 amps. Colors—Bakelite case. Ivory or walnut finish. List Price \$3.00 Net Price \$1.80

**TYPE IF-22**—For use in connection with electric shavers of all standard types. Line cord and plug provided with Schick and Packard type adapters which fit practically all type shavers. (Specify type desired when ordering.) Type IF-22A for Schick, Knapp Monarch, and similar type shavers. Type IF-22B for Packard, Zephyr, Remington-Rand and Ronson type shavers. Rating: 110 V.A.C. 5 amps. Colors—Bakelite case. Ivory or black finish. List Price \$2.15 Net Price \$1.29

**TYPE AF-10**—Antenna Eliminator for all types of receivers. Furnished in Bakelite case with two binding posts. Plugs into wall receptacle and provides an efficient aerial connection. Colors—Furnished in ivory, walnut or green finish. List Price \$1.20 Net Price \$0.72

Top Row—IF-11 & 12, IF-7A, 15, 16 and IF-14  
Lower Row—IF-24, IF-25, IF-26 and IF-27, 28, 29

### INDUSTRIAL QUIETONES

The development of radio receiving and broadcasting equipment has been perfected to a degree where complete enjoyment of programs is within the reach of all. However, only too frequently is radio reception marred by disturbing noises commonly referred to as "man-made static." This condition does not have to be endured. It is unnecessary to tolerate the majority of these offending noises. Quietone Filters enable you to enjoy quiet, noise-free reception.

Although atmospheric disturbances in many instances cause radio noise, this condition is not chronically annoying. With the average radio receiver, noise is generally caused by the operation of electrical appliances or apparatus which create high frequency oscillations. Many types of equipment cause minute sparks as a result of a change in electrical conditions within the device, which are essential to its operation. In effect these appliances act as miniature radio transmitters, setting up a disturbance which may affect radio receivers at a considerable distance.

It is highly desirable to correct noise conditions at the source as one filter properly installed at this point may eliminate the noise in a number of radio receivers. Where it is impossible to locate the equipment which is causing the interference a Quietone installed at the receiver will correct the noise in that receiver.

The Quietones listed below will correct radio noise conditions caused by motors, generators, elevators, stokers and many other types of industrial electrical apparatus. They are designed for convenient mounting, and contain highest quality capacitors, with lowest possible impedance internal connections. There are no current limitations for (CP) Capacitive Quietones.

#### Capacitive (CP) Quietones

Type	Volts A.C.— D.C.	Connections	Housing	List Price	Net Price
IF-24*	110	Flex-Leads	Metal	\$0.90	\$0.54
IF-25	110-220	Flex-Leads	Metal	3.60	2.16
IF-26	110-220	Flex-Leads	Metal	6.00	3.60
IF-11	110	BX	Cutout Box	8.40	5.04
IF-12	220	BX	Cutout Box	12.00	7.20
IF-14**	110-220	BX	Cutout Box	16.80	10.08

\*\* All Quietones listed above with exception of IF-14 are for single phase circuits. IF-14 is for 2 or 3 phase or 3-wire circuits.

\* Dual unit for use on fluorescent lighting fixtures.

The Quietones listed below are for the more severe radio noise conditions caused by motors, generators, elevators, diathermy, oil burners, etc. They are designed for convenient mounting and quick connection to these machines. They consist of low-loss coils and highest quality capacitors with correct noise conditions in both broadcast and short wave receivers. They are the most efficient filters available for heavy duty application. All capacitive-inductive (CI) Quietones are for single phase circuits.

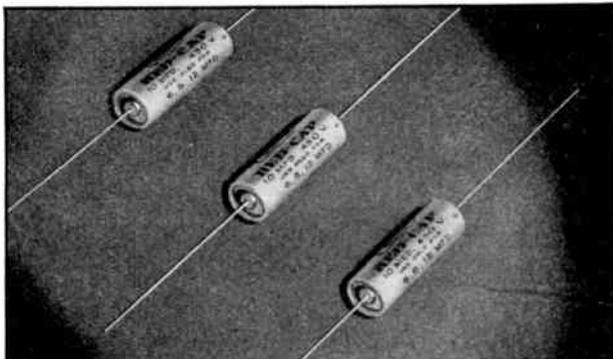

#### Capacitive-Inductive (CI) Quietones

Type	Volts A.C.— D.C.	Max Amps	Connections	Housing	List Price	Net Price
IF-7A*	110-220	5	BX	Cutout Box	\$9.00	\$5.40

## "RED-CAPS" for SERVICE

DRY ELECTROLYTICS IN PLASTIC TUBES

New! The most modern development in service-type dry electrolytic capacitors—tiny, handy, attractive in waterproof, color-coded plastic tubes! Thirteen single values can be used for forty-one capacity applications. Small inventory. Simplicity!

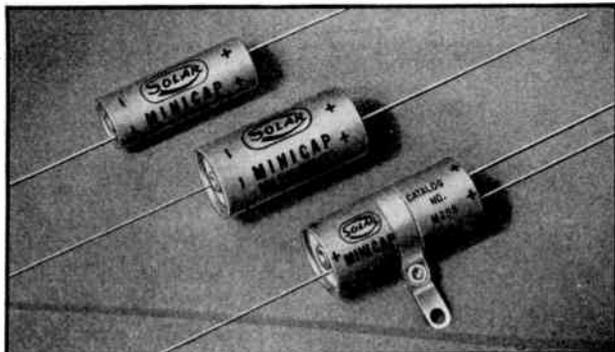

Lengths are uniform; diameters are minimums, so that Red-Caps group together neatly and literally fit anywhere. Bare leads. Packaged with straps.

No need for exact duplicates in an endless number of different sizes! Standardize on "Red-Caps for Service!"—for Speed!—for Value!

### TYPE DH

Popular service-type cardboard tubular units, in single and multiple values, arranged in a really practical manner so that a few types cover virtually every service requirement.

Insulated leads are all brought out one end. Special mounting ears permit upright mounting. For horizontal mounting, a metal

strap is packaged separately with each capacitor. Individually packaged.

(See listing at right)

### TYPE DH—continued.

DJ-0362	8+8	450	4 3/8 x 1 3/8 x 1 1/4

### TYPE DY METAL CANS

FOR TWIST-PRONG MOUNTING

Hermetically sealed, with distinctive Solar base assuring long life, proper venting and rigidity. It is always permissible (if necessary) to use higher capacities than in the original. Terminal codes are stamped on cans.

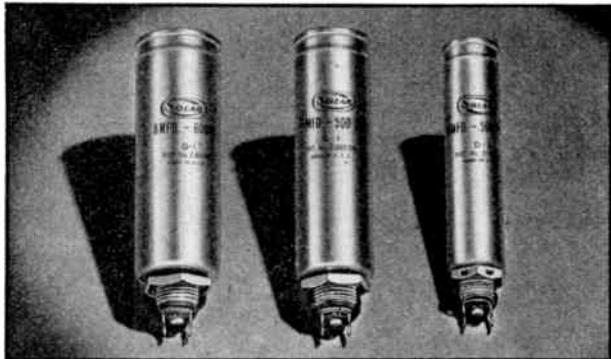

#### TYPE DY

Catalog Number	Capacity in Mfd. & D.C. Working Voltage	Can Size, Inches

# PAPER CAPACITORS

## "SEALDTITE" TUBULARS Moisture-proof Wax-Molded

Exclusively Solar! No other paper tubulars are as modern or reliable. Sealdtite tubulars are actually sealed tight against moisture by a distinctive Solar wax-molding process. This gives a more perfect seal than ever before attained for tubular paper capacitors.

Windings are non-inductive, with full-diameter hot-soldered leads 2 1/4" in length. Excellent r.f. characteristics.

"Sealdtite" means "Value sealed in—Moisture sealed out!" Reliable in every climate. In cartons of ten.

## "SEALDTITE" ASSORTMENTS

The Sealdtite assortments S-10 and S-25 are attractive, handy stock cartons of the most popular capacities and voltages in proportions as required for average service work.

### S-10 ASSORTMENT

Consists of the following 10 Sealdtites attractively boxed:

Four .1 mfd. 600 V.W.                      Two .02 mfd. 600 V.W.  
Two .05 mfd. 600 V.W.                      Two .01 mfd. 600 V.W.

List Price .....

Order by Number S-10

### S-25 ASSORTMENT

Consists of the following 25 Sealdtites attractively boxed:

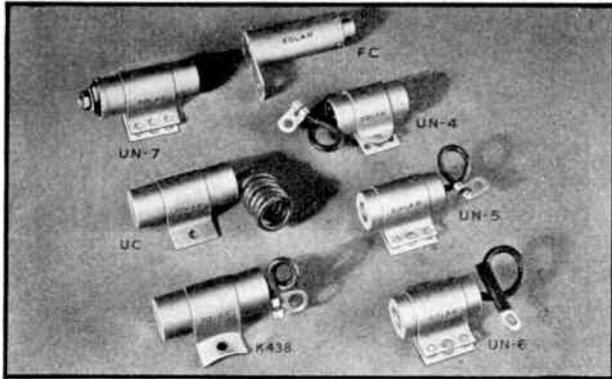

Two .5 mfd. 600 V.W.                      Five .05 mfd. 600 V.W.  
Two .25 mfd. 600 V.W.                      Three .02 mfd. 600 V.W.  
Nine .1 mfd. 600 V.W.                      Four .01 mfd. 600 V.W.

List Price .....

Order by Number S-25

# INDUSTRIAL PAPER CAPACITORS

## AUTO IGNITION CAPACITORS

These are standard replacement ignition condensers for automobile use under even extreme temperature conditions. For mechanical types, see illustration above.

## HEARING-AID CAPACITORS

Modern vacuum tube type Hearing-Aid Devices require very special small capacitors. Several commonly used types are listed.

**PAPER CAPACITORS**—Miniature "Tom-Thumb" construction with bare wire leads, one out each end. Nominal voltage rating 100 V. D.C.

Catalog Number	Capacity Mfd.	Size, Inches (approx.)
TTH-001	.001	$\frac{1}{8} \times \frac{5}{16} \times \frac{1}{8}$
TTH-002	.002	$\frac{1}{8} \times \frac{3}{8} \times \frac{1}{8}$
TTH-005	.005	$\frac{1}{8} \times \frac{3}{8} \times \frac{1}{8}$
TTH-01	.01	$\frac{5}{16} \times \frac{3}{8} \times \frac{1}{8}$
TTH-02	.02	$\frac{5}{16} \times \frac{1}{8} \times \frac{1}{8}$
TTH-05	.05	$\frac{1}{8} \times \frac{1}{2} \times \frac{1}{8}$
TTH-1	.1	$\frac{1}{8} \times \frac{1}{2} \times \frac{1}{8}$

**MICA CAPACITORS**—Mica and foil sections, dipped for protection, with bare wire leads. Nominal voltage rating 100 V. D.C.

MMA-0002	.0002	$\frac{1}{8}$ wide x $\frac{1}{8}$ long
MMA-0005	.0005	$\frac{1}{8}$ wide x $\frac{1}{8}$ long
MMA-001	.001	$\frac{1}{8}$ wide x $\frac{1}{8}$ long

## HIGH TEMPERATURE CAPACITORS

Special small capacitors, built to order, are available for continuous use over temperature ranges up to 250° F. These units are wound with synthetic film insulation, sealed in drawn cans or tubes. Especially designed for use with electric heating appliances, and other "hot-spot" installations.

PHT-1	.5 mfd. 600 v. d.c., 220 v. a.c. Special Hi-Temp Capacitor in 1" diam. x $2\frac{3}{8}$ " Generator type can with grounded bracket
PHT-2	1.0 mfd. 600 v. d.c., 220 v. a.c. Special Hi-Temp Capacitor in drawn can $1\frac{3}{4}$ " x $2\frac{1}{8}$ " x 1" high; one side grounded to can.

## POWER FACTOR CAPACITORS

FOR FLUORESCENT LIGHTING

Oil-impregnated, oil-filled units for standard fluorescent lighting applications. Excellent over-voltage and high-temperature characteristics.

Built to order, including mounting arrangements if specified.

### TYPES PFR & PF

Catalog Number	Capacity Mfd.	A.C. Volts	Dimensions, Inches
----------------	---------------	------------	--------------------

### ROUND CANS

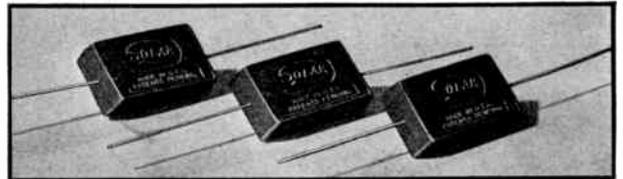

PFR-3-3	3.	330	2 diam. x $\frac{3}{4}$
PFR-3.5-3	3.5	330	2 diam. x $\frac{3}{4}$

### CANS WITH OVAL SIDES

PF-4.75-12	4.75	118-236	$1 \times 2 \frac{1}{8} \times 4 \frac{1}{2}$
PF-5.5-12	5.5	118-236	$1 \times 2 \frac{1}{8} \times 4 \frac{1}{2}$
PF-6.5-1	6.5	118	$1 \times 2 \frac{1}{8} \times 4 \frac{1}{2}$
PF-17-12	17.	118-236	$2 \frac{1}{8} \times 2 \frac{1}{8} \times 5$
PF-19.5-12	19.5	118-236	$2 \frac{1}{8} \times 2 \frac{1}{8} \times 5 \frac{1}{2}$
PF-3-3	3.	330	$1 \times 2 \frac{1}{8} \times 3 \frac{1}{4}$
PF-3.5-3	3.5	330	$1 \times 2 \frac{1}{8} \times 4 \frac{1}{2}$

## DOMINO

BAKELITE-MOLDED PAPER CAPACITORS

Molded in Bakelite, Domino capacitors meet Underwriters' requirements for units with a non-combustible case for use as a line bypass. Also used in instruments, electric fuel pumps and industrial applications. Dominoes are not designed for use as audio coupling capacitors or on A.C. voltages exceeding 250 volts. Bare leads are 2" long. Ten per carton.

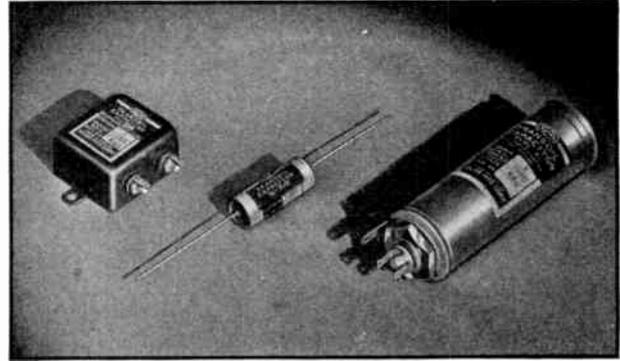

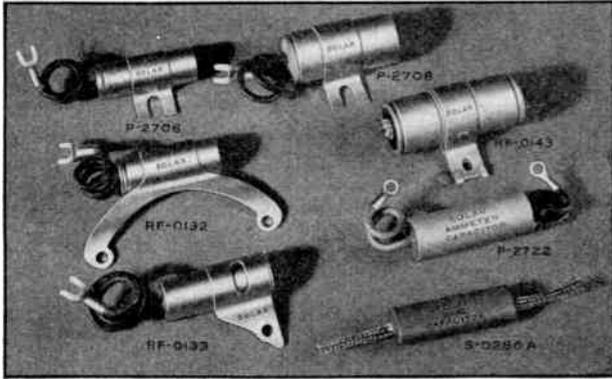

### DOMINO TYPE MPW

Catalog Number	Capacity Mfd.	D.C. Working Voltage	Dimensions, Inches
MPW-4103	.002	1000	$1 \frac{1}{8} \times \frac{3}{4} \times \frac{1}{8}$

### VIBRATOR CAPACITORS

For high voltage paper tubulars, see VIM series on page K20.  
For special oil tubulars sealed in metal, see Type XTC at right.

## TYPES XTC-XDC-XC

These hermetically-sealed units are popular for broadcast use, amateur transmitters, television and quality amplifiers. Transoil impregnation.

### TYPE XTC—TUBULARS

Oil Impregnated—Metal Cases

Catalog Number	Capacity Mfd.	Operating Volts D.C.	Size, Inches Diam.	Length
XTC-16-.0005	.0005	1600	$\frac{1}{8}$	1 1/4

# TRANSMITTING CAPACITORS

## "TRANSOIL" TYPE XLC

Type XLC Transoil Filter Capacitors are oil-impregnated and oil-filled, sealed under vacuum to prevent ionization due to trapped air bubbles. Sections are rigid within sturdy metal containers. Every metal part is rust-proofed. The stand-off insulators are of the wet-process type. Unusual safety margins permit operation without injury even at 10% over-voltage. Separable clamps are arranged for mounting upright or inverted. Every Transoil capacitor is individually tested and guaranteed.

### TYPE XLC—Rectangular Cans

Catalog Number	Capacity Mfd.	Can Size, Inches

## "SOLAREX" TYPE X

OIL-IMPREGNATED—OIL-FILLED

Solarex Filter Capacitors are the ideal type for advanced amateurs and general transmitting use where utmost value is a consideration. They are built of paper sections which are oil-impregnated under high vacuum; the carefully insulated assembly is rigidly held in round metal cans, oil-filled and hermetically sealed. Terminals are high quality porcelain stand-off insulators. Mounting is accomplished by detachable rings and the units may be used either upright or inverted. Each capacitor is individually tested and fully guaranteed.

# TRANSMITTING MICA CAPACITORS

## "TRANSMICA" TYPES

- High Q Characteristics
- Vacuum treated

Type XA is customarily employed in amateur equipment for intermittent use only; not designed for continuous duty.

For broadcast station use, and similar heavy-duty purposes, Types XR, XS and XH are highly recommended for complete dependability under the most difficult continuous operation.

### TYPE XA—Porcelain Cases

Case Size  $3\frac{1}{8}'' \times 2\frac{5}{8}'' \times 2\frac{1}{8}''$  — Mtg. Centers  $3\frac{1}{4}''$

Catalog Number	Capacity Mfd.	Maximum D.C. Voltage	Maximum Amperes Operating			
			15000 Kc.	7500 Kc.	3750 Kc.	1875 Kc.
XA-12-45	.00005	12500	3.5	2.5	1.7	1.
XA-12-21	.001	12500	10.	10.	11.	12.

## SILVER-MICA

TYPES MWS—MOS

Silver-mica molded in low-loss Bakelite. Marked with silver dot. List prices are for standard  $\pm 10\%$  tolerance. For  $\pm 5\%$  tolerance, add 10% to prices. For  $\pm 3\%$ , add 30%. For  $\pm 2\%$ , add 50%. 1000 V. D.C. Test.

# CAPACITOR ANALYZERS

## MODEL CE EXAM-ETER

Gives the whole condenser story at a glance! The only capacitor analyzer on the market having all these features—including Quick-Check dynamic testing.

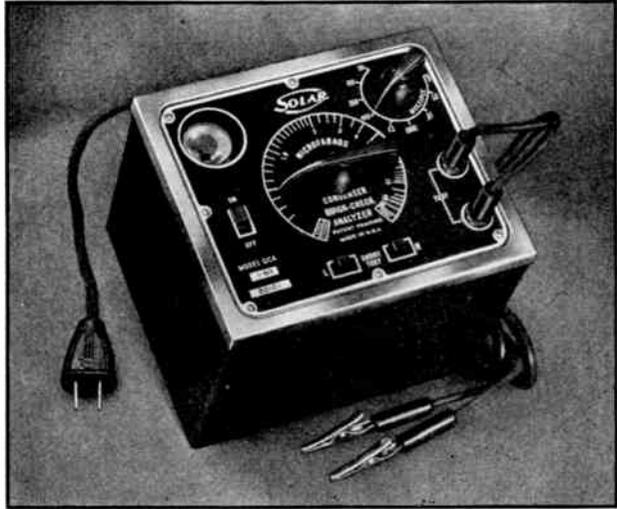

- **QUICK-CHECK DYNAMIC TEST:** For Shorts, Opens, High R.F. Impedance, Intermittents. Tests can be made without the bother of removing capacitors from the receiver. Most defectives will be quickly located this way. The few exceptions can be readily checked upon removal from chassis.
- **CAPACITY BRIDGE:** Measures from 10 mmf. to 2000 mfd.
- **RESISTANCE BRIDGE:** Measures resistance from 50 ohms to 7.5 megohms.
- **MEGOHM METER:** Measures insulation resistance directly from 2 to 10,000 megohms.
- **MILLIAMMETER:** Measures leakage to 50 milliamperes at 0-550 V. D.C.
- **POWER FACTOR:** Measures to 50% P.F.
- **D.C. VACUUM TUBE VOLTMETER:** Measures D.C. Voltage 0-600 volts.
- **A.C. VACUUM TUBE VOLTMETER:** Measures A.C. Voltage 0-30 V. A.C.
- **CONTINUOUSLY VARIABLE D.C. VOLTAGE SUPPLY:** Provides 0 to 550 V. D.C.
- **CONTINUITY CHECKER.**
- **TESTS A.C. MOTOR STARTING CAPACITORS.**
- **TESTS FENCE CONTROL CAPACITORS TO 2000 MFD.**  
Size, 8 1/2" x 11 1/2" x 5 1/2" high. Weight 12 lbs.

### CAPACITOR EXAM-ETERS

Catalog Number	Description
CE-1-60	CE Capacitor Exam-eter for 110 v., 60 cycles
CE-2-U	CE Capacitor Exam-eter for 110-220 v., 25-60 cycles

### SPARE PARTS AND ACCESSORIES

Catalog Number	Description
CE-6L6	Tube type 6L6
QC-J5G	Tube type 6J5GT
QC-465	Test leads adjusted for oscillator circuit
CE-300	Carrying case for either CE-1-60 or CE-2-U

## "QUICK-CHECK" MODEL QCA

Provides all usual tests—plus dynamic checking. A compact capacitor analyzer of unusual value.

- **QUICK-CHECK DYNAMIC TEST:** For Shorts, Opens, High R.F. Impedance, Intermittents. Tests can be made without the bother of removing capacitors from the receiver. Most defectives will be quickly located this way. The few exceptions can be readily checked upon removal from chassis.
- **CAPACITY BRIDGE:** Measures from .0002 to 70. mfd.
- **POWER FACTOR:** Indicates high and unsatisfactory P.F.
- **INSULATION RESISTANCE:** Tests made at 500 volts D.C. check insulation resistance of paper, mica and trimmers.
- **CONTINUITY METER:** Tests continuity of circuits, detecting opens in coils, transformers, etc. 5 1/2" x 6 1/2" x 4 3/4" high. 6 1/2 lbs.

### Catalog Number

QCA-1-60	Quick-Check Analyzer for 110 v., 60 cycles
QCA-2-U	Quick-Check Analyzer for 110-220 v. 50-60 cycles

## MODEL-QC

A valuable accessory where an older type capacitor analyzer is already in use. Incorporates the Quick-Check dynamic testing feature for detecting opens, shorts, intermittents, r.f. impedance and power factor—with capacitor in or out of circuit. Capacitance bridge and leakage test not included. Size, 5" x 6" x 4 1/2" high. Weight, 5 1/2 lbs.

QC-1-60	QC Quick-Check for 110 v., 60 cycles
QC-2-U	QC Quick-Check for 110-220 v., 50-60 cycles

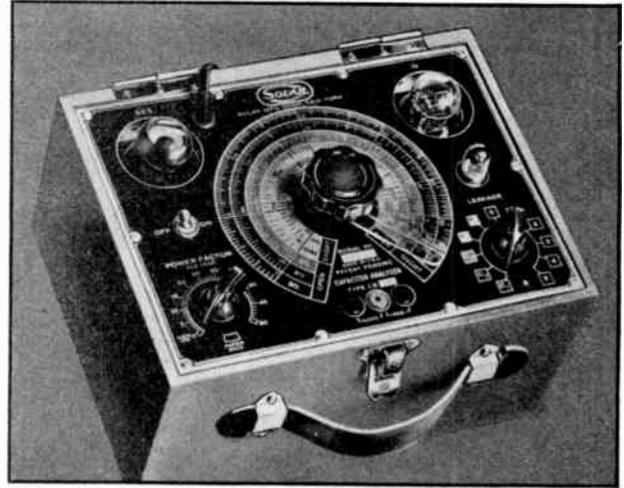

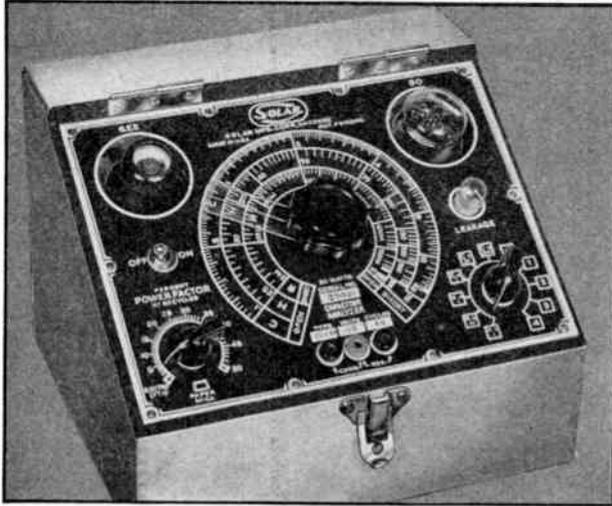

### SPARE PARTS AND ACCESSORIES

QC-301	Zipper Carrying Case for Model QCA
QC-300	Zipper Carrying Case for Model QC...
QC-450	Test bench mounting rim, for Models QCA and QC
QC-465	Test leads for Models QCA, QC
QC-6G5	Tube type 6G5/6U5
QC-J5G	Tube type 6J5GT
QC-Z6G	Tube type 25Z6GT

# SOLAR

# CAPACITOR ANALYZERS

## SPECIAL MODEL CC

Plus value! All features of Model CB—plus—

- High Capacity Scale
- High Test Voltage
- Simplified Scales
- Sloping Panel

1. **CAPACITY**—measures capacity of electrolytic, paper, mica and air condensers including Motor Starting Condensers. Range .00001 to 800 mfd.
2. **POWER FACTOR**—measures power factor of any standard electrolytic condenser, directly on a scale, in percentage. These measurements include those of A.C. Electrolytics.
3. **RESISTANCE**—measures resistance directly in ohms. A long scale covering two ranges 50 to 2,000,000 ohms.
4. **INSULATION**—measures insulation resistance of condensers and insulation. Tests are made at voltages up to 600 volts D.C. provided by built-in power supply.
5. **DETECTS DEFECTIVE CONDENSERS**—directly indicates leaky, shorted, wrong capacity units, and "intermittents." Test voltages to 600 D.C. are available.
6. **IS A USEFUL CONTINUITY METER**—for any circuits.
7. **COLOR-CODED SCALES**—three unusually legible scales are provided, the outer (red) for capacity measurements to 70 mfd.; the center (black) for A.C. electrolytic capacities to 800 mfd.; the inner (blue) for resistance.
8. **SIMPLIFIED READING**—the use of the open scales is quick and fool-proof, in connection with the multipliers marked on switch settings.
9. **CATHODE-RAY TUBE BALANCING**—the magic 6E5 tube gives sensitive visual balance "quick as a wink."
10. **SELF-CONTAINED—COMPACT—PORTABLE**—beautiful sloping panel. Size 9 $\frac{3}{4}$ " x 8 $\frac{1}{4}$ " x 6 $\frac{5}{8}$ ". Weight 8 pounds.

Catalog Number	Description
CC-1-60	CC Capacitor Analyzer for 110 v., 60 cycles
CC-2-U	CC Capacitor Analyzer for 110-220 v., 25-60 cycles

### SPARE PARTS

Catalog Number	Description
CB-6E5	Tube type 6E5
CC-80	Tube type 80
CB-N	Leakage neon tube

## STANDARD MODEL CB

First in the field—still the standard! Capacity, power factor, leakage, resistance readings directly on the panel. For simplified measurements, dials are color-coded to match settings. Portable case with detachable lid.

### FEATURES

1. **MEASURES CAPACITY** of electrolytic, paper, mica and air condensers. Range .00001 to 70. mfd.
2. **MEASURES POWER FACTOR** of any standard electrolytic condenser, directly on a scale, in percentage.
3. **MEASURES RESISTANCE**—directly in ohms, of resistors of all types. Range 50 to 2,000,000 ohms.
4. **MEASURES INSULATION RESISTANCE** of condensers and insulation. Tests are made at voltages up to 450 volts D.C., provided by built-in power supply.
5. **DETECTS DEFECTIVE CONDENSERS**—directly indicates leaky, shorted, wrong capacity units, and "intermittents."
6. **IS A USEFUL CONTINUITY METER**—for any circuits.
7. **COLOR-CODED SCALES** mean fool-proof operation. 45 linear inches of scales mean accuracy.
8. **DIRECT READING** of all measurements eliminates extra charts and annoyances.
9. **CATHODE-RAY TUBE BALANCING**—the magic 6E5 tube gives sensitive visual balance "quick as a wink."
10. **SELF-CONTAINED—COMPACT—PORTABLE**. Size 9 $\frac{1}{2}$ " x 7 $\frac{1}{8}$ " x 6 $\frac{1}{4}$ ". Weight 7 pounds.

### Catalog Number

CB-1-60	CB Capacitor Analyzer for 110 v., 60 cycles
CB-2-U	CB Capacitor Analyzer for 110-220 v., 25-60 cycles

### SPARE PARTS

### Catalog Number

Catalog Number	Description
CB-6E5	Tube type 6E5
CB-V	Tube type 1-V
CB-N	Leakage neon tube

# RADIO-NOISE SUPPRESSORS TRIMMER CONDENSERS

## ELIM-O-STATS

Solar maintains a complete interference laboratory where engineers solve radio-noise problems of all types. The Elim-o-stats listed below should take care of all ordinary cases of interference either at the appliance or at the radio receiver as noted. For exceptional cases write full details for engineering advice.

**TYPE RA—Universal Elim-o-stat**  
To eliminate interference of low intensity. It slips over the prongs of the line cord plug.

**TYPE RB—Universal Elim-o-stat**  
Plugs directly into the electrical outlet and the radio line cord plugs into the Elim-o-stat. Moderate price type for general use.

**TYPE AD—Appliance Elim-o-stat**  
Similar to Type RB, but with ground connection binding post. Use with household appliances.

**TYPE RN—Receiver Elim-o-stat**  
High efficiency capacitive-inductive type. Sectional band suppression construction with coils designed for both broadcast and short-wave bands.

**JUMBO—Universal Elim-o-stat**  
Capacitive-inductive type for use either at the radio receiver or at the offending appliance. A popular merchandising leader.

**TYPE AE—Shaver Elim-o-stat**  
Approved by the largest manufacturers of electric razors because of its superior effectiveness in suppressing radio noise. Capacitive-inductive type.

**TYPE AR—Shaver Elim-o-stat**  
Carefully designed capacitive type which is very convenient to use.

**TYPE AH—Appliance Elim-o-stat**  
Large capacitive-inductive type filter of the sectional band suppression type. Rated at 5 amperes 110 v. A.C., making it useful for larger appliances or with several at once.

**TYPE AL—Appliance Elim-o-stat**  
Especially designed for application to oil-burners and similar permanent installations. Sectional band suppression capacitive-inductive construction, in metal cut-out box with facilities for connecting BX. Rated at 5 amperes, 110 volts A.C.-D.C.

**TYPE AFL—Fluorescent Elim-o-stat**  
Capacitive-inductive type for fluorescent lighting application. Designed for channel mounting. Rated at 3 amperes, 110 v. A.C.-D.C. Dimensions, 6 1/2" x 2 1/4" x 1 1/4".

## TYPE T TRIMMERS

Solar engineering research and production care are reflected in the high quality and complete dependability of these trimmer capacitors. They are easily adjustable and feature excellent freedom from drift. Both Bakelite and ceramic base types are available.

Where quality is the prime consideration, use Solar trimmers for most satisfactory results.

**TYPE TB—Ceramic Base; Body Size**  
5/8" x 3/4"

Catalog Number	Capacity Range Mmf.
TB-30	3-30
TB-90	4-90
TB-180	35-180

**TYPE TC-D—Dual Ceramic Size** 5/8" x 3/4"

TC-D-30	3-30
TC-D-70	5-70
TC-D-140	50-140

**TYPE TP—Ceramic Base; Body Size**  
5/8" x 5/16"

TP-130	7-130
TP-260	15-260
TP-490	85-490
TP-750	160-750
TP-1140	330-1140
TP-1400	440-1400

**TYPE TYM—Flanged Bakelite Base;**  
Size 3/2" x 3/2"

TYM-10	1.1-10
TYM-20	2-20
TYM-30	3-30

**TYPE TR—Large Ceramic Base Size**  
1 1/8" x 1 3/8"

TR-70	4-70
TR-140	60-140
TR-220	90-220
TR-400	170-400
TR-600	300-600
TR-800	400-800
TR-1200	600-1200
TR-1600	1000-1600

**TYPE TSS—Ceramic Base; M't'g Stud**  
1 1/8" x 1 1/8"

TSS-70	40-70
TSS-140	60-140
TSS-220	90-220
TSS-600	300-600

**TYPE TD—Dual Ceramic Base**  
1 21/64" x 1 21/64"

TD-70	15-70
TD-220	35-220
TD-600	95-600

Most commonly used values are listed. Other ranges on special quantity orders.

# PYRANOL\* CAPACITORS

*For Amateur Radio Equipment*

## A COMPLETE LINE

### Outstanding Characteristics

Continuous operation at 10 per cent above rating

Long life, for low cost per service-year

Small size—means easy portability

Upright or inverted mounting

Round or rectangular cases

Hermetically sealed for permanence

G-E Pyranol capacitors for d-c communications equipment are filled with Pyranol, a non-inflammable dielectric developed and patented by General Electric. Pyranol has extraordinary dielectric qualities, and its use makes possible an unusually small and compact unit for all transmitter-capacitor ratings. Compare the size with that of a capacitor of conventional design.

The cases are hermetically sealed, assuring permanence of the characteristics of the capacitors, as contamination from air and moisture is impossible. Long life and ability to withstand temperatures as high as 75 C make these capacitors outstanding in their field.

\*Trade-mark reg. U. S. Pat. Off.

The high quality of General Electric Pyranol transmitter capacitors is the result not only of extensive research into the design and manufacture of capacitors, but also of wide application experience. Thousands of units are in service in broadcasting stations, in commercial transmitters on shipboard, on airplanes—all over the world. Materials closely controlled as to quality, manufacturing processes under careful engineering and laboratory supervision, years of tested application experience—all these combine to give the amateur an unexcelled capacitor—the same high-quality capacitor as those used in the largest General Electric transmitters.

## RECTANGULAR-CASE DESIGNS

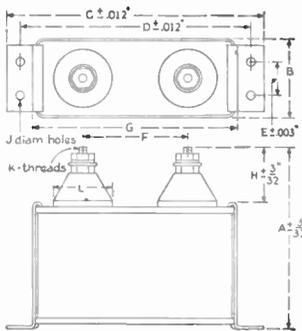

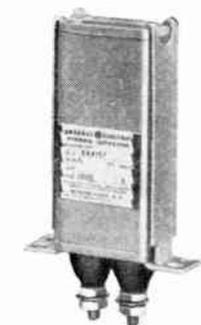

Fig. 1—Base-mounting assembly. See table on opposite page for specifications

1000-volt, 2-microfarad G-E Pyranol transmitter capacitor for inverted mounting

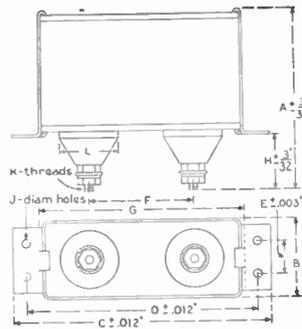

Fig. 2—Inverted-mounting assembly. See table on opposite page for specifications

2000-volt, 5-microfarad G-E Pyranol transmitter capacitor for base mounting

Electric Company. Dealers or distributors, however, should not use any list price suggested if it exceeds their ceiling price.

The rectangular-case-design Pyranol transmitter capacitors listed above and illustrated on opposite page, are hermetically solder-sealed and provided with ceramic insulators and mounting bracket as shown. The mounting bracket is rigidly attached to the

capacitor, before shipment, by mechanical means and cannot loosen. All ratings are furnished with a durable silver-gray finish.

These capacitors may be operated continuously at voltage up to 10 per cent above the rated value.

## CYLINDRICAL-CASE DESIGNS

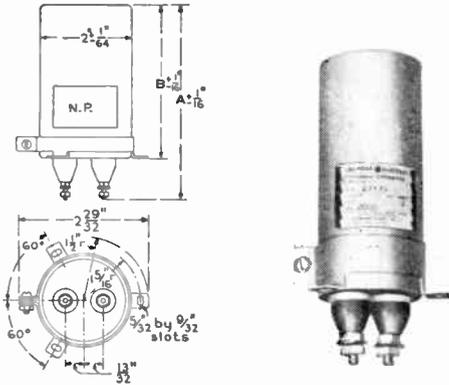

Fig. 3

G-E cylindrical-case Pyranol capacitors are hermetically solder-sealed and provided with ceramic insulators and an adjustable clamp-type mounting bracket, as illustrated. They may be mounted in any position. All ratings are furnished with a durable silver-gray lacquer finish.

These capacitors are built to the same high standard of quality that has gained such great favor with radio amateurs for the rectangular-case Pyranol design. They may be operated continuously at voltages up to 10 per cent above the rated value.

## UPRIGHT OR INVERTED MOUNTING CAPACITORS

### TYPE E

These units are widely used in highest-quality radio, communications, electronic and similar types of apparatus. Type E capacitors are hermetically-sealed. Ring-type clamp provides rigid and convenient method of mounting unit inverted or upright, beneath, on, or through mounting surface. Available with single or multiple elements, dual unit has three terminals, and triple unit has four terminals. Cathode connection is made through one terminal in cover.

## INSULATED SCREW-MOUNTING CAPACITORS

### TYPE G

These capacitors are highest quality hermetically-sealed aluminum can units, used in all quality electronic, radio and communications equipment. Constructed with threaded cover, provided with lock washer and hexagonal nut to provide simple means of mounting capacitor through hole in mounting surface. The capacitor may also be insulated from chassis by use of an insulating washer. Terminals are molded in cover. Single element units have two terminals; dual-element units have three terminals. Cathode connection is made through one terminal in the cover.

## SCREW-MOUNTING WIRE-LEAD CAPACITORS

### TYPE GL

These inverted mounting, aluminum can capacitors are made in single, double and triple section units with two separate color-coded leads 3 1/2" long brought out from each section. The threaded neck and palmot provide a simple means of mounting the unit through a hole in the mounting surface.

## MIDGET Screw-Mounting WIRE-LEAD CAPACITORS

### TYPE GLS

Colored polarity-indicating flexible leads. Inverted screw-mounting. Two 3 1/2-inch leads for each section. 1-inch diameter can and short length make for more compact assemblies, while retaining generous proportions for hard service. Otherwise, similar to Type GL.

## ULTRA-COMPACT BYPASS CAPACITORS

### TYPES E, MM, S

TYPE E Ring-Mounting  
TYPE MM Strap-Mounting  
TYPE S Stud-Mounting

A choice of three aluminum can capacitors especially suitable as bypass or filter units. All are 1" in diameter, hermetically-sealed, easily mounted. Units have two terminals; one positive, and other is cathode connection—both made through cover.

Type E has ring-type clamp providing rigid and convenient method of mounting unit inverted or upright, beneath, on, or through mounting surface. Type MM has an aluminum mounting strap riveted to side of can. Strap has hole in each end permitting unit to be securely mounted parallel to mounting surface. Type S has screw-stud and nut providing simple means of mounting through a small hole in the mounting surface. This mounting is integral with the bottom of the container.

## HIGH-CAPACITY LOW-VOLTAGE CAPACITORS

### TYPE HCLV

These high capacity low-voltage units are used in electric fence control and other applications requiring very high capacitance values at very low voltages. These capacitors are supplied with an outer insulating tube and mounting ring. Sizes given below are over the outside tube.

## DANDEES

### Miniature Tubular Aluminum Can DRY ELECTROLYTICS

TYPE PRS

**SINGLE-SECTION**  
Two Leads

**DUAL-ELEMENT**  
Three Leads

Tightly sealed aluminum-can dry electrolytics for use where money- and space-saving considerations are paramount. Smallest proportions consistent with full-rated capacity and voltage, operating under normal-duty conditions. Excellent for crowded assemblies. DANDEES are favorites for use in midget sets, AC-DC sets, auto-radios, etc. Also many servicing jobs where low cost is important.

Electrically insulated with special waxed paper jacket. Ends spun over can rim, eliminating possibility of shorts if leads are bent close to unit. Generous length tinned wire leads. DANDEES are thoroughly aged, ready for immediate use. Each unit is thoroughly tested. Individually packed with guarantee slip. Dual-element units have three leads (common negative).

## TWIST-PRONG BASE CAPACITORS

TYPE AF

These capacitors are tightly sealed round aluminum can units. They are mounted by means of prongs which extend through the mounting surface and are twisted to hold the unit in place. These are high-quality units especially suitable in compact assemblies where space is limited. All connections, except the cathode, are made through terminals in the cover. The cathode is connected to the container. Base prongs slip into fibre or metal elliptic washer that is riveted or eyeletted on chassis, and are bent over. Fibre washer provides insulated can; metal elliptic washer, grounded can. Metal or fibre washer supplied at 5c each net. The terminal lugs slip through holes in washers for soldered connections.

## PLUG-IN ELECTROLYTIC CAPACITORS

TYPE AEP

Quick change dry electrolytics. Facilitate testing and replacement in equipment where continuity of service is important. Install merely by plugging into standard octal socket. Unit can be inserted only the right way. Key of octal base fits octal socket. Ultra-compact due to use of etched foil for higher capacities in the small can sizes. Aluminum internal construction. Non-corrosive due to use of similar metals throughout. Fully vented for safety.

## TUBULAR CARDBOARD CONTAINER CAPACITORS TYPES PRS-V, PRS-A, PRS-B

Wax-sealed, tubular units in impregnated cardboard containers. Type PRS-V is single section capacitor with bare wire lead at each end. Type PRS-A is dual-element, common-cathode concentrically wound (CCCW) unit. Three insulated leads, negative lead at one end and two positive leads at other end. A riveted mounting strap is supplied as shown. Type PRS-B is a dual-section capacitor with positive and negative insulated lead for each section. Positive leads are at one end, negative leads at other. Leads are color-coded. Type PRS-B also supplied with riveted mounting strap.

## CLAMP-MOUNTING CARDBOARD TUBE CAPACITORS TYPE PRV

Substitute for Metal-Can Types E, F, G, GL, GLS, I, PG, PGM

Although originally designed as a substitute for those standard aluminum-can electrolytics that require a hole in the chassis for mounting, this Aerovox Victory Electrolytic has become immensely popular as a standard item. The unit is easily and rigidly mounted by means of the center screw and the metal clamp. These capacitors are separate section units provided with a positive and negative lead for each section, except for multiple-element units which are concentrically wound and are provided with common negative. Leads are color-coded.

## PAPER-WOUND REPLACEMENTS FOR ELECTROLYTIC CAPACITORS

TYPE PWP

TYPE PWC

High-grade paper sections in standard inverted screw mounting aluminum can (PWC) or cardboard case (PWP) similar in appearance to electrolytics. Used as replacements for standard electrolytics indicated; applications subjected to high AC component or ripple particularly in first stage of filter circuit; or where excessive surges are encountered. No polarity to be observed. Actual capacity indicated in each case. Capacity is less than electrolytic being replaced but will be found adequate in most filter circuits since filtering capacity in electrolytics is more than generous. PWP has cardboard mounting

flanges; PWC similar to the inverted dry electrolytic types.

800v. Surge Pk.—600v. D.C. Work.

# Mica Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

## "POSTAGE-STAMP" MOLDED-IN-BAKELITE MICA CAPACITORS

Wide choice of designs, sizes, mountings, terminals offer the correct Aerovox unit for every application, as listed. Units built of selected mica and foil; molded bakelite casing impervious to mois-

ture, heat, mechanical damage. Micrometer test for mica thickness maintains capacity values for long life. Capacity values indicated on units.

### Type 1467

Compact, size  $\frac{11}{16}$  in. square, provided with wire leads. 1000 volts D.C. Test—500 volts D.C. Working.

## PORCELAIN-CASED MICA CAPACITORS

Ideal for those higher-frequency applications. Encased and hermetically-sealed in glazed porcelain case. Heavy-duty terminals. Power loss due to dielectric absorption reduced to a minimum. Units operate at full load without heating up. Dimensions:  $3\frac{1}{2}$  between mounting holes,  $4$  overall by  $8$  high.

## HIGH-VOLTAGE MOLDED-IN-BAKELITE MICA CAPACITORS

### Type 1450

1000v D.C. Test—600v D.C. Work.

Intended for the more critical service of low-powered transmitting circuits, buffer stages, power amplifiers, and laboratory equipment, etc. Non-magnetic parts are used to reduce r.f. losses to minimum, and heavy terminals provide minimum r.f. and contact resistance. Intended for point-to-point wiring, being supported entirely by its soldered connections.  $1\frac{1}{4}$  x  $1\frac{1}{4}$  x  $\frac{3}{8}$  or  $\frac{3}{4}$  thick (see below).

### Types 1455-57

Size  $1\frac{1}{4}$  x  $1\frac{1}{4}$  x  $\frac{1}{2}$

Types 1455-57, have insulated mounting holes, independent of soldering lugs, for connections.  $1\frac{1}{2}$  spacing between mounting hole centers. If  $1\frac{1}{8}$  spacing is preferred specify Types 1455-47. Large meter-mounting brackets permitting use of this type of unit for shunting meter windings may be obtained at 45c added to list price. Specify by adding suffix (A) to type number. Small brackets are also available at 25c additional. Specify by suffix (E). Both brackets have universal slots for either mounting hole spacing.

### Types 1650-54

Heaviest-duty molded in bakelite mica capacitors of the AEROVOX line. Provided with threaded holes taking the roundhead screw terminals. Also available with plain holes through which screws or rods may be slipped. Same price as 1650 series, but specify 1650A, etc. when latter is desired.  $\frac{1}{4}$  or  $\frac{3}{8}$ " thick (see \* below). Types 1650, 1651 and 1652 are supplied in brown bakelite. Types 1653L and 1654L are supplied only in low-loss (yellow) XM Bakelite.

### Type 1650

1000v D.C. Test—600v D.C. Work. 700v A.C. Test—350v A.C. Work.

# AEROVOX

# Mica Capacitors

IF IT'S MARKED 'AEROVOX' IT'S A QUALITY CAPACITOR

## SILVERED MICA CAPACITORS

For most critical applications where precise capacity values must be attained and maintained, AEROVOX silvered mica units are generally available. Encased in red molded XM bakelite. Similar in external appearance to standard bakelite molded mica units.

Unique construction. Only plus .0022 per degree F.—a remarkably low temperature coefficient. Excellent retrace characteristics. Practically no capacity drift with time. Exceptionally high "Q". Mechanically protected against physical damage and changes in electrical characteristics due to varying atmospheric conditions. Wax impregnated externally. Ideal for use in circuits where inductance and capacity product must remain constant under all operating conditions. Specifically designed for use in push-button tuning, oscillator padding circuits, fixed tuned circuits, and as capacitance standards, etc., where accuracy and stability are of prime importance.

Standard tolerance  $\pm 5\%$ . For  $\pm 20\%$  deduct 10% from price. For  $\pm 10\%$  deduct 5%. For  $\pm 3\%$  add 10%. For  $\pm 2\%$  add 15%. For  $\pm 1\%$  add 25%.

## Commercial Grade MICA TRANSMITTING CAPACITORS

The self-same extra-heavy-duty capacitors Aerovox is supplying on high priority to the Army and Navy, to commercial communication companies and broadcasters, and to builders of quality radio and electronic equipment, will again be available to amateurs and experimenters as soon as war restrictions are removed.

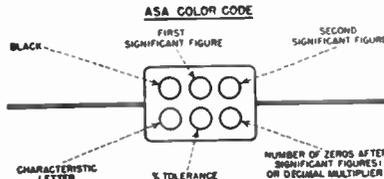

With these capacitors Aerovox is contributing its share towards narrowing still more the small remaining gap between professional and amateur radio practices.

Due to the normally limited demand for these extra-heavy-duty mica capacitors, as well as the considerable number of capacitance and voltage ratings in which they are made, this line is made to special order. However, your Authorized Aerovox Jobber will be in a position to order these commercial-grade capacitors for you whenever they again become available.

In the meantime, these capacitors are presently available for high-priority orders. Consult your Aerovox Jobber for specifications and quotations.

## Interference Filters and Auto-Radio CONDENSERS

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

### AEROVOX INTERFERENCE ANALYZER

#### TYPE ANL-37

Plugs between interfering device and outlet. Selector switch adjusted until noise is eliminated or minimized. Dial indicates which type filter to use. Hand-some, sturdy metal cabinet. Compartment contains necessary test leads and attachment plugs and clips. Size 5 1/2 x 5 1/2 x 8 inches.

TYPE ANL-37  
Dealers' and Servicemen's  
Net Price \$8.40

### AEROVOX Type IN-23

ers, etc.

Especially for elimination of interference caused by fractional horsepower motors. Mounting bracket for attaching to frame of motor. Flexible leads for connecting across motors such as in hairdriers, fans, mixers, etc. .5-.5 mfd. 1 x 2 1/2 in.

#### TYPE IN-23

List Price \$0.90...Net Price \$0.54

### AEROVOX Type IN-27

Keeps troublesome noises out of house wiring and power line. Size 1 1/2 x 1 1/2 inches.

#### TYPE IN-27

List Price \$0.80...Net Price \$0.48

when mounted directly on interfering device by bracket. Size 1 1/2 x 2 inches.

#### TYPE IN-28

List Price \$1.15...Net Price \$0.69

### AEROVOX Type IN-29

Provides additional filtering action over IN-27 and IN-28. Especially effective for local sources of interference of variable character but strong intensity. Very effective for electric razor and other vibrating devices. Plugs between device and line. Size 1 1/2 x 3 inches.

#### TYPE IN-29

List Price \$0.90...Net Price \$0.54

### AEROVOX Type IN-30

Similar to IN-29 but with additional inductance. Handles more severe interference. Plugs between set and outlet, or preferably between noisy appliance and outlet. Size 1 1/2 x 3 inches.

#### TYPE IN-30

List Price \$1.50...Net Price \$0.90

### AEROVOX Type IN-31

appliance. Size 1 1/2 x 3 inches.

#### TYPE IN-31

List Price \$1.80...Net Price \$1.08

### AEROVOX Type IN-42

Designed for use in the more serious cases of radio interference from power lines and appliances. Provided with inductance as well as capacitance for thorough filtering action. Plugs into electric outlet. Radio set or interfering device plugs into receptacle of the filter. Recommended for use between interfering device and power line. Size 2 1/2" x 3 3/4". Provided with mounting ring. Rated at 6 amps. for 110-220v. A.C..

#### TYPE IN-42

List Price \$5.70...Net Price \$3.42

## MIDGET TUBULAR METAL-CASED "HYVOL" CAPACITORS Type 38

These units are hermetically-sealed and are exceptionally compact. Originally designed as alternates for mica capacitors but have since become a standard item in the Aerovox oil-filled capacitor line. Not only used as replacements in existing equipment, but are especially suitable for newly-designed equipment, particularly where allowable weight of the finished assembly and allotted space is at a minimum. Despite unusual ultra-small size for oil-impregnated, oil-filled capacitors, constructional and electrical characteristics meet many of the exacting conditions to which molded-in-bakelite mica capacitors are normally subjected. Type 38 units are normally supplied with case insulated, and are provided with outer insulating tube.

## TUBULAR CAPACITORS OIL-IMPREGNATED OIL-FILLED Type 89

Immersion-proof, oil-impregnated, oil-filled units in handy, space-saving tubular form. Ideal for use in vibrator applications, coupling and by-pass functions in transmitters, high-voltage amplifiers, in r.f. by-pass circuits, interference eliminators for motors and generators, and in test equipment. Fully sealed against oil leakage or moisture penetration. Case is insulated, not connected to the capacitor section. Mounting strap and outer insulating tube are supplied.

## AEROVOX "HYVOL" VERTICAL-MOUNTING HIGH-VOLTAGE CAPACITORS Type 14

Particularly applicable for use in high-voltage filter circuits such as cathode-ray tube power supplies, high-voltage by-pass circuits in transmitters and high-power equipment. Type 14 units are made in the standard 1 1/2" diameter. Grounded can, with one-piece immersion - proof molded - bakelite pillar insulator which provides maximum spacing between live terminal and can. Mounting ring furnished for upright or inverted mounting.

## AEROVOX "HYVOL" OIL-IMPREGNATED OIL-FILLED CAPACITORS In Round Aluminum Cans —Inverted Mounting Type 10

This is an improved design, replacing the former single terminal type. This new design is physically interchangeable with the old. Ideal for crowded assemblies; a logical choice in filter circuits of power supplies, high-gain high-fidelity amplifiers, and small transmitters. Hermetically-sealed. Has one-piece molded bakelite terminal assembly. Both terminal lugs are insulated from container.

## AEROVOX "HYVOL" VERTICAL-MOUNTING HIGH-VOLTAGE CAPACITORS OIL-IMPREGNATED OIL-FILLED Type 12

This is an immersion - proof capacitor designed to meet high - voltage operating requirements. Suitable for such high - voltage circuit applications as in television, cathode-ray tube power supplies, high-voltage rectifiers, or, as a high - voltage by - pass capacitor. Recommended where long leakage path between terminals is required. Barrier in bakelite top increases insulation and creepage path between terminals. For certain applications, the ceramic insulators may be removed if desired. Supplied with adjustable mounting ring for vertical mounting.

## AEROVOX "HYVOL" OIL-IMPREGNATED OIL-FILLED CAPACITORS In Rectangular Metal Cans

### Type 09

Type 09 (Basic)

Type 09MB (Mounting Bracket)

Type 09MS (Strap Mounting)

Hermetically-sealed in sturdy can, leakproof and seepageproof. High tension pillar terminals fitted with locknuts and soldering lugs. Exceptionally compact dimensions for given capacity, working voltage—and safety factor due to use of "Ilyvol." Intended for heavy-duty continuous service in transmitters,

amplifiers, etc. Type MB bracket is normally supplied as standard equipment, unless otherwise specified, on all units having base sizes other than 3 3/4" x 3 3/4" and 3 3/4" x 4 3/4". Type MS is normally supplied as standard with these latter base sizes.

# AEROVOX

# Paper Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

## HIGH-VOLTAGE TRANSMITTER TYPE D.C. CAPACITORS

### Type 20

6,000v. D.C. Work. to 50,000v. D.C. Work.

These capacitors meet the exacting requirements of radio transmitter service and other applications requiring high-voltage, heavy-duty, transmitter-type oil capacitors. Available in ratings from 6000 volts to 50,000 volts D.C. working. These are single-section or parallel-section capacitors. Type 20 units are critically checked to close standards of physical and electrical perfection. Capacitor sections consist of multi-layered capacitor tissues and high-purity aluminum foil, uniformly and accurately wound under critically-controlled tension, then vacuum-impregnated with Aerovox Hyvol to insure stability of full-rated capacitance, even at zero temperatures. Welded steel containers finished in non-corrosive, dark grey lacquer. Heavy-duty porcelain insulator assembly is cork-gasketed and pressure sealed to prevent leakage of oil or entrance of moisture at the terminals. Single-section units rated at 30 KV or less are normally supplied with capacitor section insulated from ground. Additional information on Type 20 units rated at 37,500 volts and 50,000 volts, as well as voltage-doubler units rated at 25,000 volts output is available on application. All Type 20 units are built to special order—**not carried in stock.** Submit full application information when ordering.

## COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

### Type 16T

(Terminals on Top)

Compact, oil-filled, hermetically-sealed units for use where least space and minimum weight are essential. Corrosion-proof metal container. Special immersion-proof terminals designed for equipment subjected to severe atmospheric and climatic conditions. Suitable for bypass and filter applications in receivers and low-power transmitters.

### Type 416T 400v. D.C. Working

## COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

### Type 18B

(Terminals on Bottom)

Compact, oil-filled, hermetically-sealed units. Type 18 is smaller in height and depth than Type 16. However, greater width makes Type 18 adaptable for applications where small-sized dual- and triple-section capacitors with three terminals are required. Otherwise, similar to Type 16 with respect to construction and application.

## CUSTOM-BUILT PAPER CAPACITORS

### TO MEET YOUR SPECIAL NEEDS —

If your paper capacitor needs are most unusual, AEROVOX will work with you in designing and producing special types. With many basic types to draw upon—a wide choice of containers, terminals, mountings, sizes, etc.—we can quickly and economically produce out-of-the-ordinary capacitors to meet those extraordinary requirements. Address your inquiry to Aerovox Engineering Department, New Bedford, Mass.

During the present emergency, we reserve the right to make mechanical changes without notice in order to produce equally suitable substitutes whenever and wherever necessary. - Also, prices subject to change without notice.

# Vitreous-Enameled and Carbon RESISTORS

IF IT'S MARKED 'AEROVOX' IT'S A QUALITY CAPACITOR

## "SLIDEOHM" Wire-Wound Vitreous-Enameled ADJUSTABLE RESISTORS

Adjustable resistors combining adjustment to any resistance value within unit's range, with positive, permanent, non-fluctuating qualities of wire-wound resistor. Each Slideohm Resistor is provided with horizontal mounting brackets and one adjustable contact slider.

## "PYROHM JUNIOR"

### Wire-Wound Vitreous-Enameled FIXED RESISTORS

Types 931 and 933

Compact, genuine wire-wound units. Covered with vitreous-enamel. Highest quality materials used throughout. Correctly designed. Note these features:

1. Crack-proof refractory tubing for the support. Adequate heat dissipation.
2. Quality resistance wire precisely spaced wound under tension.

3. Copper terminal band clamped to tubing. Wire ends wrapped about raised ear and brazed to same.

4. Heavy vitreous-enamel coating for permanent seal against moisture, oxidation and mechanical damage.

5. Pig-tail of stiff wire 2 in. long soldered to terminal band for positive, non-breakable connection.

### Type 931—10 Watts Size—Ins. 1/8 x 1 3/8

Ranges	List	Net
1-10,000	\$0.45	\$0.27
12,000-50,000	.50	.30

30,000 to 50,000 ohms, rated at 5 watts.

## INSULATED MOLDED CARBON RESISTORS

Types 1097 and 1098

Small, noiseless, vibration-proof. Crack-proof molded casing around molded carbon resistance element. Tinned copper pig-tail leads 2 in. long. Resists humidity effects. Ideal for AVC circuits, high-gain amplifiers. RMA color-coded; stamped with resistance value. Precision tested. Standard tolerance 10%. These types may come thru for some time in slightly larger sizes until complete changeover is achieved.

# AEROVOX

## CAPACITY and RESISTANCE

# Bridge

● In the best interests of ALL users of condensers, AEROVOX engineers have developed this more critical checking means. Tests and readings, more than any claims and superlatives, best tell the true story of any and all condensers. Years of experience testing and checking condenser quality have been boiled down to provide this simple, portable, moderately-priced instrument. Do not confuse it with other bridges employing just an electric eye or neon lamps as indicators. Check the following features point by point with other type bridges, before you decide which one to buy. Remember, leading laboratories are using the AEROVOX Bridge, despite the fact that it is a serviceman's instrument, primarily.

### What It Does . . .

● **CAPACITY BRIDGE**  
Measures capacity, leakage, power factor, etc., of condensers under actual working conditions. 100 mmfd. (.0001) to 100 mfd. in 6 ranges.

● **RESISTANCE BRIDGE**  
Measures resistance values of resistors and electrical equipment and circuits. 10 ohms to 1 megohm.

● **INSULATION RESISTANCE**  
Measures this important factor in condensers and other devices. Meter calibrated directly in megohms. Reads up to 10,000 megohms at 500 volts.

● **VACUUM-TUBE VOLTMETER**  
Consists of amplifier stage and grid-leak detector. Measures minute values.

● **VOLTMETER**  
Available for voltage readings, 0-60 v., 0-300 v., 0-600 v., at 1000 ohms per volt. May be used externally.

● **MILLIVOLTMETER**  
Meter terminals brought out directly. Range, 60 mv. at 60 ohms, or 1 m.a. Can be used with external shunts.

● **MILLIAMMETER**  
Meter can be read in milliamperes. 0-6 ma., 0-60 ma. May be used externally.

● **VARIABLE POWER SUPPLY**  
Available directly at terminals. Supplying between 15 and 600 volts continuously variable over entire range.

only  
**\$35<sup>75</sup>**  
Incl. Tubes

### Specifications . . .

● Measures with sufficient practical accuracy all essential properties of condensers under actual working conditions. In addition, all components and circuits are utilized for other measurements and tests. ● Simple to operate. Neat layout of knobs and dials. Concise instructions for each control etched directly on panel. General directions on inside cover. ● Binding posts insulated with XXX Bakelite and accommodate banana plugs, spade terminals, phone tips and bare wires. ● Tubes mounted on shelf alongside panel. Space alongside .45 tube accommodates power cord. Tubes: 6C8G, 1V, -45. ● Red gumwood cabinet. Natural finish. Lock-corner construction. Leather handle. Heavy catch ● Two slip hinges permit removing cover. Rubber feet and bumpers, top and bottom. A fine instrument. ● Each instrument precisely calibrated and thoroughly factory tested. Serially numbered and registered in original owner's name for full protection. Elaborate manual supplied with each instrument. ● Dimensions: 10¾ x 7¾ x 8 inches. Weight: 11 lbs.

**1. Meter Range Switch.** "Brains" of the bridge. Provides external milliammeter first three positions; external voltmeter next three, ranging from 60, 300 and 600 v. at 1000 ohms per volt. "Bridge" indicates power on and balancing position. Also provides vacuum-tube voltmeter and insulation resistance test at "VTV"; leakage test through X terminals at "L 60 MA" and "L 6 MA" positions; and polarizing voltage readings on proper meter range at "PV" position.

**2. Polarizing Voltage Control.** Inner knob serves as transformer tap switch. Outer knob is vernier control indicating continuously variable voltage 15 to 600 volts in 3 steps. Voltmeter automatically switched to proper range 0-60, 0-300, 0-600. Variable voltage available between terminals X and Ground for meter calibration, load tests, amplifiers, etc.

**3. Power Factor Control and** Switch for insulation resistance test.

**4. Bridge Range Control** for reading capacity: .0001-.001 mfd.; .001-.01 mfd.; .01-.1 mfd.; 1-1.0 mfd.; 1.0-10 mfd.; 10-100 mfd. Multiplying factor for both capacity and resistance indicated on face of control.

**5. Zero Adjustment** for vacuum tube voltmeter and bridge detector.

**6. Push Button** for insulation resistance test.

**7. Main Dial,** linear calibration, for capacity and resistance readings.

Note the multiplicity of functions which this versatile instrument performs. High-grade meter movement is used in place of magic eyes and neon lamps generally found in bridges priced for the service trade. Resistors, tubes and other components are likewise of precision grade for accuracy first and last.

**BRIDGE MANUAL:** Covers theory and practice of all types of bridges. Covers all measurements and tests. Simply invaluable to radio and electrical worker. Supplied with Bridge. Available separately at 50¢ net.

# AEROVOX

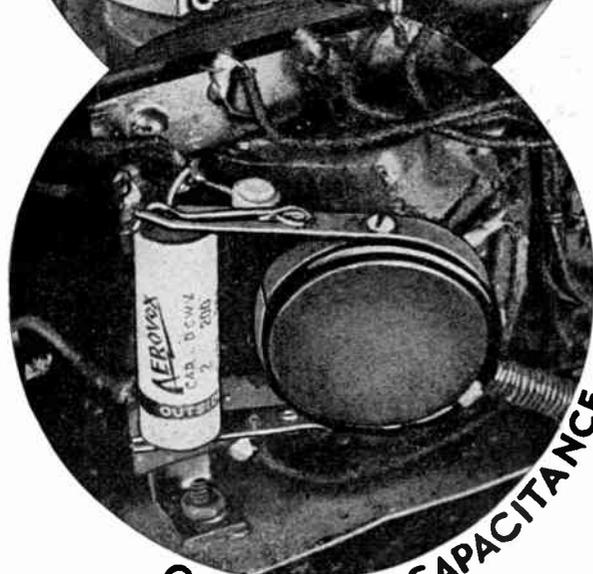

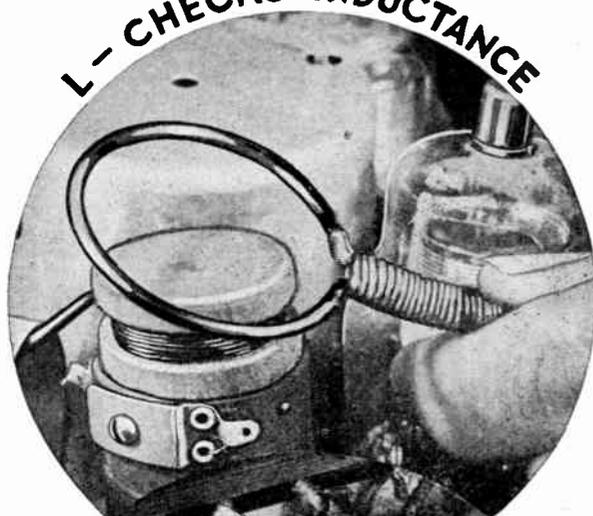

## L-C CHECKER

Model 95

● Designed to test condensers and inductances in the radio-frequency range, under conditions that simulate actual working conditions. Determines effectiveness of capacity or inductance while actually connected in its circuit. Under such conditions the efficiency of testing is greatly increased. In addition to testing radio components singly, it is possible to test combinations of inductance (L) and capacitance (C), thereby determining the resonant frequency of combinations and, by such means, the operating effectiveness of the circuit. Also, this instrument can be employed to adjust circuit or systems to proper operating efficiency.

Unique, up-to-the-minute, simple, inexpensive, the L-C Checker is truly indispensable to the serious radio worker.

L-CHECKS INDUCTANCE

C-CHECKS CAPACITANCE

Manufacture discontinued for duration. An improved model will be made when materials are available or war situation allows.

only  
\$29<sup>50</sup>  
Incl. Tubes

### What It Checks . . .

- ✓ Capacity of condensers at radio frequencies without removing them from circuit.
- ✓ Alignment of r.f. circuits. Tracking of super-het. oscillator.
- ✓ Alignment of both broad and narrow band u.f. amplifiers.
- ✓ Tuning of wave traps and of image-rejection circuits; frequency ranges of receivers; frequency ranges of signal generators; calibration of wave meters.
- ✓ Identifying harmonics of frequency standard in precision frequency calibration of radio equipment.
- ✓ Natural resonant points of r.f. chokes making sure they are beyond operating range.
- ✓ Tracing resonant absorption trouble in "all-wave" receiver circuits—locating dead spots, etc.
- ✓ Locating resonant points in shorted windings (unused coils in multi-range oscillators, etc.).
- ✓ Locating resonant frequency of r.f. coupling chokes, making sure of placement to secure enough gain balance over tuning range of r.f. stage.
- ✓ Checking natural period of antennae and transmission lines, to have resonant peaks at certain frequencies.
- ✓ Checking quartz crystals for frequency, false frequency, operation at harmonics, and for activity.
- ✓ Checking FM of i.f. transformers.
- ✓ Checking alignment of FM of i.f. channels.
- ✓ Checking many other functions when used with auxiliary equipment.

### Specifications . . .

**General:** Completely self-contained. Sturdy steel case. Crackle-finished baked enamel. Handsome front panel. Side compartment holds power cord, test leads, coupling link. **Operation:** 115-volt 60-cycle A.C. Will operate on D.C. and frequencies other than specified. **Frequency range:** Oscillator has six coil ranges, selected by panel switch—60-170, 170-490, 490-1500 kc.; and 1.5-4.6, 4.5-15, and 13-26 mc. **Indicator:** Type 6E5 magic eye, indi-

cating energy in oscillator circuit by widening of shadow angle. **Very critical. Tube Complement:** 6J5G, 6E5, 25Z5, VR105. **Accuracy:** Checks capacitance and inductance values well within 10% depending upon conditions. Indicates frequencies within 1% under satisfactory conditions. **Dimensions:** 10½ x 7½ x 5½ in. **Weight:** 6 lbs. Fully guaranteed. Serial numbered and registered in original buyer's name. Instruction manual included.

### L-C CHECKER MODEL 95

Complete, including tubes, power cord, coupling unit and capacity clip (shown at left) and spring clip leads,

together with explicit instructions on how to use instrument for widest variety of tests and checks.

**Dealer's-Serviceman's Net Cost. . \$29.50**

# AEROVOX MOTOR-STARTING CAPACITOR SELECTOR AND EMERGENCY CAPACITORS

**FIRST AID FOR THAT AILING CAPACITOR-  
START TYPE REFRIGERATOR MOTOR**

Refrigerator servicing is necessarily a rush job. Perishable food is at stake; more important still, the family's health. So if you're servicing electric refrigerators, by all means get them going promptly. Nine times out of ten, the trouble is a wornout capacitor. And here's the first-aid treatment:

## WHAT CAPACITOR DO YOU NEED?

By referring to the motor name-plate and then to AEROVOX listings, you can readily determine what exact-duplicate capacitor is required. But—time is precious. Every minute counts. You may not have time to run down to the jobber's and pick up the required replacement. What to do?

## USE THE CAPACITOR SELECTOR

Simple enough. Use the AEROVOX Capacitor Selector. Merely connect its clips in place of defunct capacitor. Try the various toggle switches starting with the 65 mfd. first. Note that each successive toggle throws in 17.6 mfd. more, for a wide range of capacities to 152½ mfd. Watch that the voltmeter reading doesn't exceed 138 volts. When adequate starting torque is obtained in less than three seconds, merely total the capacity from the "on" switches. That's the correct capacity required. Simple enough!

## CLIP ON AN EMERGENCY CAPACITOR

Now, having determined required capacity with the Selector, simply take an AEROVOX Emergency Capacitor and make up the necessary capacity by plugging in the respective colored leads and plugs into the grouping connector, as per directions on the Emergency Capacitor. With the proper capacity now made up, simply clip the rubber-sleeved connectors in place of the discarded capacitor and leave the Emergency unit, with its grouping connector, inside the refrigerator motor compartment. The motor will now operate normally. You have safeguarded that family's food—and health.

**FINALLY — INSTALL PERMANENT UNIT**  
But don't stop here. The Emergency Capacitor is not for permanent service. Such a unit necessarily costs more than an exact-duplicate unit. So at your convenience, pick up the right replacement at your AEROVOX jobber, and install it permanently in place of the Emergency unit. Thus you have our up-to-the-minute First Aid treatment for sick electric refrigerators. Likewise the means of gaining an outstanding reputation as the electric refrigerator serviceman who "gets 'em started in a jiffy."

These two aids . . . the Emergency Capacitor and the Capacitor Selector . . . permit prompt servicing of capacitor-type refrigerator motors. There's no guessing, fussing, stalling. You make the emergency replacement immediately, and install permanent replacement at your convenience. All of which spells greater good will, a growing reputation, and real servicing profits.

## Ask . . .

Get further facts regarding this amazing first-aid technique. Ask to see these items. Better still, order a kit TODAY . . . and cash in on this sure-shot refrigerator servicing.

## CAPACITOR SELECTOR

If in doubt regarding capacity required, use this simple instrument. Clip in place of discarded unit. Throw first toggle switch (65 mfd.), check starting time, and see that voltmeter reading doesn't exceed 138, red line on scale. Try other switches. When adequate starting torque, within 3 seconds' start, below 138 volt peak, is attained, total required capacity from "On" switches. Use capacitor of that value, for replacement.

## EMERGENCY CAPACITOR

A truly universal capacitor. Any capacity from 17½ to 152½ mfd. Determine required capacity—from discarded unit's label, from motor nameplate, from AEROVOX listings—then plug in required sections (see above). Clip in place. Presto! Motor gets going. Later, when convenient, install permanent AEROVOX replacement.

## Complete Kit

Model No. 87  
Comprising Capacitor Selector and two Emergency Capacitors, with latest replacement listings.

## AEROVOX MOTOR-STARTING CAPACITORS

FOR permanent replacements, AEROVOX offers the most extensive line of both standard and exact-duplicate capacitors now available.

These units are listed for ready identification and selection under motor manufacturer's name, including manufacturer's part number, Aerovox catalog number, capacity, AC voltage, dimensions, illustration, list price, and other essential data, in the AEROVOX INDUSTRIAL CAPACITOR CATALOG, copy of which will be sent to you on request, or given to you by your local jobber.

Also, for your convenience, these listings are available as a wall chart which you will find at your jobber's.

As pioneer of high-capacity electrolytics for motor-starting functions, and as the producer of the greater portion of the two million or more units in daily use, AEROVOX can best serve your replacement requirements with a thorough background of experience, the most extensive data available, and a product that is fully tried, tested and perfected. **ASK YOUR JOBBER FOR FURTHER DETAILS, OR WRITE AEROVOX DIRECT.**

# CENTRALAB CAPACITORS                      TRIMMERS

CRL capacitors are a thin wall ceramic tube spacing two tubular silver plates. Silver is electroplated on ceramic, wire leads are permanently soldered. NPO below means zero temperature coefficient and is used where no change with temperature is desired. N750 indicates negative temperature compensating capacitor. N750 = .00075 mmf/mm<sup>2</sup>/°C. Special type capacitors are also available, including SILVER MICAS.

CRL ceramic trimmers are interchangeable with air trimmers for most applications and have definite advantages in space requirements and mechanical stability. Types 823 and 822 have bases of strong, low dielectric steatite and may be mounted on a metal panel with little increase in minimum capacity. The upper surface is ground optically flat and fired with pure silver to form a stationary capacitor plate. The rotor is of high dielectric ceramic with lower surface ground optically flat to contact the stator with a uniform minimum air film. The top is silvered in a variable pattern to establish desired capacity range. Available in zero or negative temperature coefficient. Type 820 is more fragile and available in negative temperature coefficient only.

# SPRAGUE CONDENSERS

## SPRAGUE ATOMS

*They'll Handle Almost Any Job . . . Better, and at Less Cost!*

It took wartime shortages of other types to prove beyond all question that, if you have Sprague Atoms, you don't need any other capacitor types for modern service work! Atoms will handle just about any condenser replacement you're ever called upon to make. By following instructions in our Victory Line Bulletin (COPY

FREE) you can even use them to replace wet electrolytics! Atoms cost less—are much smaller in size—yet are fully reliable. They have low leakage and withstand exceptionally high surges. Hermetically sealed—yet absolutely protected against "blow-ups." Use Atoms universally! Save time—save money—save space!

### UNCONDITIONAL GUARANTEE

**Extremely Low Leakage—High Surge Voltage—Exceptionally Good Shelf Life**

### UNIVERSAL MOUNTING TYPE

#### Type LM

Equipped with rugged universal mounting lugs which can be soldered on top of chassis, anchored with screws, or be extended through holes in chassis and bent under. Mount in any position. All condenser sections have separate positive and separate negative

leads, which can be connected together to get common positive or negative replacements. Individual sections insure maximum convenience with safe performance. Lead ends are well sealed with high melting point compound, making units moisture proof.

### HANDY ATOM KITS

For your convenience, we have packed ATOMS in these handy kits, a few of which will equip you for almost any dry electrolytic replacement you'll ever be called upon to make.

Remember: "You Can Always Get at 'Em With Sprague ATOMS!"

#### KIT No. AK-1

Contains six of the popular UTS (8 mfd.) 450-volt ATOMS.....List \$4.35

#### KIT No. AK-2

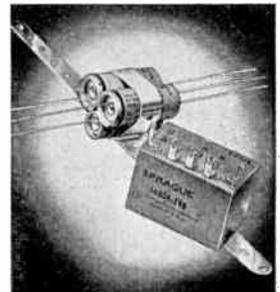

Twelve ATOMS as follows: Six UT-8; one UT-4; one UT-41; two UT-81 and two TA-10.....List \$7.50

### CONDENSER REPLACEMENTS

Make Up Your Own Hard-to-Get Combinations

The larger, exact-duplicate replacement in this photo costs \$1.20. Three ATOMS combined with ST straps give the same hard-to-get capacities—in smaller size and for only 96c. ST straps are supplied free on request with your ATOM purchase. Thus you can make up almost any condenser combination using standard Sprague ATOMS obtainable from jobbers' stocks.

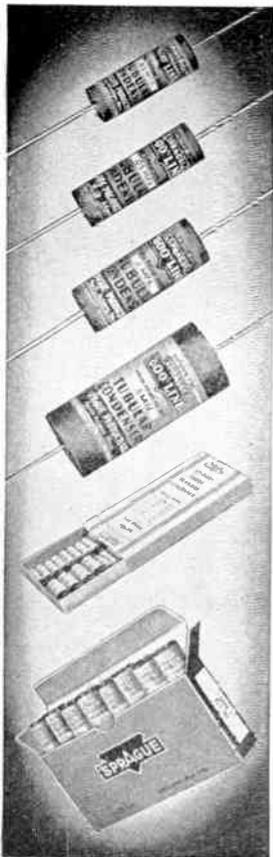

We reserve the right—during the present emergency—to change mechanical specifications without notice.

# SPRAGUE Condensers

## Famous SPRAGUE TUBULARS Type TC (Cartridge By-Pass Type)

"Not a Failure in a Million" is more than a slogan for Sprague Tubulars. It is a matter of record—convincing proof of the efficiency of the most popular condensers ever presented to the radio profession.

Test Voltage 1200 Working Voltage 600

### BUY THEM IN THESE HANDY KITS

Save trips to your jobber and save money by buying these fast-moving paper tubular condensers in handy kit form.

Catalog No.	Each Kit Contains	List Price
TK-55	Five TC-5 (.5 mfd.)	\$3.00
TK-62	Six TC-2 (.25 mfd.)	2.55
TK-81	Eight TC-1 (.1 mfd.)	2.40
TK-1515	Fifteen TC-15 (.05 mfd.)	3.60
TK-1511	Fifteen TC-11 (.01 mfd.)	2.70
TK-1512	Fifteen TC-12 (.02 mfd.)	2.70

CATALOG No. TK-330

LIST PRICE \$8.05

Each Kit contains 33 TC Tubulars as follows:

2 TC-21 (.001)	5 TC-11 (.01)	8 TC-1 (.1)
3 TC-22 (.002)	5 TC-12 (.02)	2 TC-2 (.25)
3 TC-25 (.005)	4 TC-15 (.05)	1 TC-5 (.5)

## SPRAGUE PINHEAD TINY MIKE

### Type PTM. (Rectangular).

Sprague offers a complete size range in dry electrolytic replacements, each one affording the utmost in reliability and bringing you the additional convenience feature of quick, easy mounting with the Sprague special metal mounting feet. See cut at left.

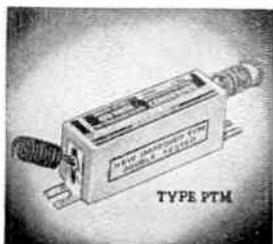

Type PTM is a rectangular condenser of outstanding reliability in convenient

small size. Universal for a wide variety of replacements. Conservatively rated at 525 volts, but will stand surges as high as 560 to 580 volts, and come back for more!

Working Voltage 450 Volts

Surge Voltage 525 Volts

Catalog No.	Capacity Mfd.	Working Voltage	Dimensions	List Price
PTM-1	1	450	$\frac{3}{4}$ x $\frac{3}{4}$ x $2\frac{1}{2}$	\$0.70
PTM-2	2	450	$\frac{3}{4}$ x $\frac{3}{4}$ x $2\frac{1}{2}$	.80
PTM-4	4	450	$\frac{3}{4}$ x $\frac{7}{8}$ x $2\frac{1}{2}$	.90
PTM-8	8	450	$\frac{3}{4}$ x $1\frac{1}{8}$ x $2\frac{1}{2}$	1.15
PTM-12	12	450	$1\frac{1}{8}$ x $1\frac{1}{8}$ x $2\frac{1}{2}$	1.60

PTM-48 (4 leads)	4-8	450	$1\frac{1}{8}$ x $1\frac{1}{8}$ x $2\frac{1}{2}$	1.65
PTM-88 (4 leads)	8-8	450	$1\frac{1}{8}$ x $1\frac{1}{8}$ x $2\frac{1}{2}$	1.80

## High Voltage CARDBOARD DRY ELECTROLYTICS

Sprague EC's are the finest, most reliable replacements on the market — designed for those who demand the very best it is possible to obtain, regardless of cost. Each condenser is DOUBLE TESTED. Each has a full 600-volt rating plus an EXTRA SAFETY FACTOR. Watch them build up to 650, 670 volts or even more without danger and with extremely low leakage. Double-seal, moisture-proof protection. When you use EC's you're sure the voltage is right—the highest for any job. Capacity is all you need consider.

### Type EC

Double Tested—Shortproof—No Need to Check Surges

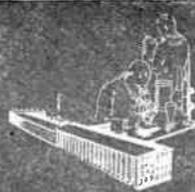

Continuous Working Voltage 475 Volts  
Maximum Surge Voltage 600 Volts

Catalog No.	Capacity Mfd.	Dimensions	List Price
EC-2	2	$2\frac{1}{2}$ x $\frac{9}{8}$ x $\frac{1}{2}$	\$1.15
EC-4	4	$2\frac{1}{2}$ x $1\frac{1}{2}$ x $1\frac{1}{2}$	1.40
EC-8	8	$2\frac{1}{2}$ x $1\frac{3}{8}$ x $1\frac{1}{2}$	1.65

We reserve the right—during the present emergency—to change mechanical specifications without notice.

# SPRAGUE Condensers

## SPRAGUE Miscellaneous PAPER CONDENSERS

Fully reliable and inexpensive, paper substitutes for dry electrolytics. The actual capacity is one-third to one-half that of a Dry Electrolytic in the same size container. Leakage and power factor are extremely low. No polarity has to be observed.

Types DR and RP are ideal for replacements in high voltage public address systems, power amplifiers and high voltage filter circuits.

### Type DR

Catalog No.	Replacem't Cap. Mfd.	Working Voltage	Dimensions	List Price
DR-4	4	600	4 3/8 x 1 3/8	\$1.65
DR-8	8	600	4 3/8 x 1 3/8	2.10
DR-8S	8-8	600	4 3/8 x 1 3/8	3.40

### Type RP

Catalog No.	Replacem't Cap. Mfd.	Working Voltage	Dimensions	List Price
RP-8	8	600	4 1/8 x 1 3/8 x 3/8	1.95
RP-8S	8-8	600	4 3/8 x 1 3/8 x 3/8	3.20

### Type UC

For Low Cost Xmitting Units and Many Other Uses Rugged, dependable yet truly economical high-voltage condensers for use up to 1000 volts. Oil Impregnated—wax filled—fully cased and sealed. Mounting flanges may be cut off when not needed. Unconditionally guaranteed at rated voltages.

Catalog No.	Capacity Mfd.	D.C. Volt.	Dimensions	List Price
UC-54	0.5	400	2 1/8 x 1 3/8 x 5/8	\$0.60
UC-14	1	400	2 1/8 x 1 3/8 x 5/8	.90
UC-24	2	400	2 1/8 x 1 3/8 x 1	1.40
UC-24L	2	400	3 1/8 x 1 3/8 x 5/8	1.40
UC-16	1	600	2 1/8 x 1 3/8 x 1	1.10
UC-26	2	600	3 1/8 x 1 3/8 x 1	1.65
UC-46	4	600	4 1/8 x 1 3/8 x 1 1/2	3.00
UC-18	1	800	3 1/8 x 1 3/8 x 1	1.50
UC-28	2	800	4 1/8 x 2 1/8 x 1 1/2	2.40
UC-11	1	1000	4 1/8 x 1 3/8 x 1 1/2	1.80
UC-21	2	1000	4 1/8 x 2 1/8 x 1 1/2	3.00
UC-21L	4	1000	4 1/8 x 2 1/8 x 3 1/2	5.40

## TYPE WR HIGH-VOLTAGE DRY ELECTROLYTIC CAPACITORS TO REPLACE WET ELECTROLYTICS

D.C. Peak Voltage—600 Volts

Catalog No.	Capacity Mfd.	Dimensions	List Price
WR-8	8	1 x 4 1/4	\$1.25
WR-16	16	1 1/2 x 4 3/4	1.70

## TYPE EL SELF-MOUNTING DRY ELECTROLYTICS

Type EL. These condensers are assembled in un-insulated, aluminum cans that have a self-mounting feature, wherein the mounting ear is bent back under

### SINGLE SECTION

Catalog No.	Capacity Mfd.	D.C. Working Voltage	Dimensions D. L.	List Price

EL-26	60-60	150	1 3/8 x 3	1.80

### Type BP

Enclosed in drawn metal case—proofed against heat and moisture by the special Sprague waxing process.

Test Voltage 1200 Working Voltage 600  
Peak Voltage 600

Catalog No.	Capacity Mfd.	Dimensions	Mtg. Dim.	List Price
BP-1	.1	1 3/8 x 1 x 3/8	2 1/8	\$0.80
BP-25	.25	1 3/8 x 1 1/8 x 3/8	2 1/8	.90
BP-50	.5	2 x 1 1/8 x 3/8	2 3/8	1.15
BP-10	1.0	2 x 1 3/8 x 1	2 3/8	1.50
BP-21	1-1	1 3/8 x 1 1/8 x 3/8	2 1/8	1.00
BP-225	25-25	2 x 1 1/8 x 3/8	2 3/8	1.20
BP-250	5-5	2 x 1 3/8 x 1	2 3/8	1.50
BP-31	1-1-1	2 x 1 x 3/8	2 3/8	1.30
BP-41	1-1-1-1	2 x 3/8 x 1 3/8	2 3/8	1.70

### Type SW

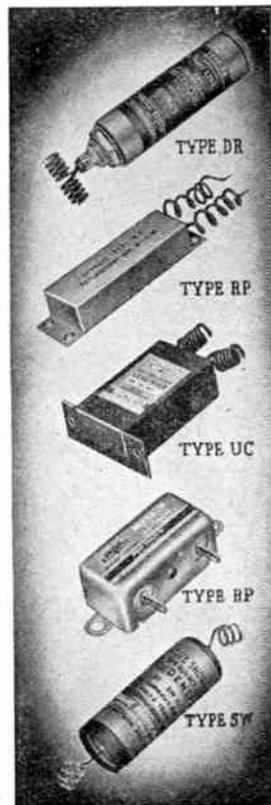

High Voltage - Short Wave High Frequency Oil Impregnated Condensers

Splendid mica substitutes when used as: (1) By-pass condensers; (2) Blocking condensers; (3) Antenna-coupling condensers; (4) Buffer condensers (Mercury Vapor Tubes); (5) in filter for phone use and (6) for grounding rotors.

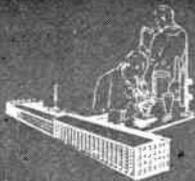

Metal encased - non-inductive - extremely low power factor—oil impregnated—1500 V. and 1000 V.D.C. rating.

Guaranteed Unconditionally When Used as Specified

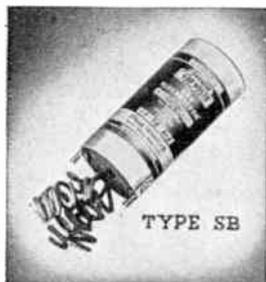

Catalog No.	Capacity	Working Voltage	Dimensions D. L.	List Price
SW-22	.002	1500	3/8 x 1 3/8	\$0.55
SW-25	.005	1500	5/8 x 1 1/2	.55
SW-11	.01	1500	1/2 x 1 1/2	.85
SW-12	.02	1500	3/8 x 1 1/2	.90
SW-15	.05	1000	3/8 x 2 1/4	1.00
SW-1	0.1	1000	3/8 x 2 1/4	1.17

We reserve the right—during the present emergency—to change mechanical specifications without notice.

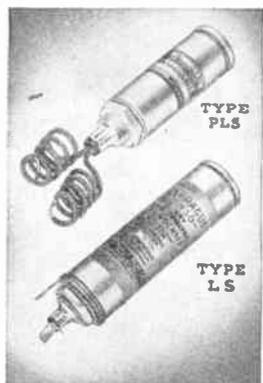

# SPRAGUE Condensers

## TYPE SB CARDBOARD TUBE CONDENSERS

**Type SB Cardboard Tube.** For the past few years, we have found set manufacturers using types similar to our SB series shown below. The four capacities shown are popular and will serve as excellent universal replacements where this type of condenser is encountered.

Catalog No.	Capacity Mfd.	Working Voltage	Surge Voltage	Dimensions	List Price
SB-88	8-8	450	525	1½ x 3½	\$1.65
SB-816	8-16	450	525	1½ x 3½	2.00
SB-216	16-16	450	525	1½ x 4¾	2.40
SB-1216	12-16	200	225	1½ x 3½	1.90

## Can Type DRY ELECTROLYTICS 450 VOLTS

**Type PLS "Tiny Mike".** Exceptional quality in extremely small size made possible by the use of the exclusive Sprague etched foil process. Mount in any position. Standard mounting by threaded bushing on can. Can is completely insulated. Working Voltage 450 V. Surge Voltage 525 V.

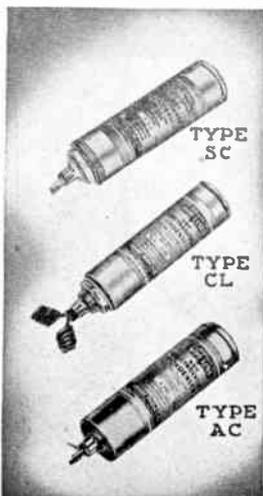

Catalog Number	Cap. Mfd.	Work. Volt.	Dimensions	List Price
PLS-4 (2 leads)	4	450	1 x 2¾	\$1.05
PLS-8 (2 leads)	8	450	1 x 3	1.30
PLS-12 (2 leads)	12	450	1 x 3	1.70
PLS-16 (2 leads)	16	450	1 x 3	1.90
PLS-48 (4 leads)	4-8	450	1¾ x 3	1.75
PLS-88 (4 leads)	8-8	450	1½ x 3	1.95
PLS-888 (6 leads)	8-8-8	450	1½ x 4¾	2.80
PLS-816 (4 leads)	8-16	450	1½ x 4¾	2.50
PLS-216 (4 leads)	16-16	450	1½ x 4¾	2.60

**Type LS** Popular for replacing older can type capacitors. Mount in any position. Standard mounting through chassis by threaded bushing on can. Packed with mounting hardware and insulating washers. Special ring mounting clamps provided for upright mounting, or for mounting with can partly extending through panels or chassis.

Type LS units have the can as negative terminal, and lug terminals for anode connections.

Working Voltage 450 Surge Voltage 525 V.

Catalog Number	Cap. Mfd.	Work. Volt.	Dimensions	List Price
LS-8	8	450	1¾ x 4 7/16	\$1.30
LS-16	16	450	1¾ x 4 7/16	1.90
LS-88 (2 lugs)	8-8	450	1¾ x 4 7/16	1.95

## Can Type DRY ELECTROLYTICS 600 VOLTS

Extremely durable can type dry electrolytics especially designed for the exacting requirements of public address and power amplifier work. High surge voltage rating provides extra safety in high current power supplies where high peaks often occur. Unexcelled for those "extra tough" service replacement uses.

**Type SC:** Inverted Screw Can Mounting. Provided with threaded bushing for standard mounting in any position. Can is the negative terminal in all units. Positive terminal is lug connection. Supplied with mounting nuts, and insulating washer to insulate can from chassis. Special ring clamps for upright mounting supplied.

Continuous Working Voltage 475 Volts  
Maximum Surge Voltage 600 Volts

Catalog Number	Capacity Mfd.	Dimensions	List Price
SC-8	8	1¾ x 4 7/16	\$1.80
SC-16	16	1¾ x 4 7/16	2.80
SC-88 (can neg.)	8-8	1½ x 4 7/16	2.90

**Type CL:** Inverted Screw Mounting. Can insulated from sections. Separate positive and negative terminal leads for each section.

Continuous Working Voltage 475 Volts  
Maximum Surge Voltage 600 Volts

Catalog Number	Capacity Mfd.	Dimensions	List Price
CL-8 (2 leads)	8	1¾ x 4 7/16	\$1.80
CL-16 (2 leads)	16	1¾ x 4 7/16	2.80
CL-88 (4 leads)	8-8	1½ x 5	2.90

**Type AC:** Aluminum Can—Upright Mounting. Standard mounting is by a ring clamp supplied with all units. Can be mounted in any position, without regard for old mounting holes or centers.

Can is common negative connection on all units. Extremely low power factor and low leakage.

Continuous Working Voltage 475 Volts  
Maximum Surge Voltage 600 Volts

Catalog Number	Capacity Mfd.	Dimensions	List Price
AC-8	8	1¾ x 4 7/16	\$1.80

## A Word of Explanation About Today's Condenser Types

The fact that the Sprague Army-Navy "E" flag carries three stars representing four separate citations for conspicuous performance in meeting critical Army-Navy capacitor and resistor requirements tells plainer than words just why it is temporarily impossible to list many of the capacitor types normally supplied for general use. However, the available types cataloged herein have proved their adaptability to meet

practically every requirement and can be relied upon for all recommended applications without reservation.

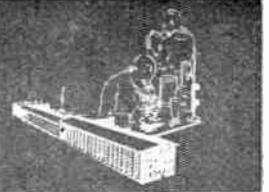

Meanwhile, you can count on it that general distribution of the complete Sprague line, including many important new types developed as a result of intensified wartime engineering, will be resumed at the earliest possible moment.

Sprague Products Co., North Adams, Mass.

We reserve the right—during the present emergency—to change mechanical specifications without notice.

# SPRAGUE Condensers

## SPRAGUE FIXED MICA CONDENSERS

Stamped with Capacity Ratings

Wartime shortages and restrictions on critical material make it impossible to supply the usual complete line of famous Sprague Mica Capacitors. However, should restrictions be lifted before this Catalog can be revised do not hesitate to ask for other types which, of course, will be produced at the earliest possible moment.

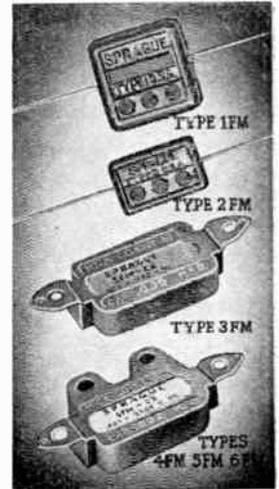

For safety selection of Mica Capacitor voltage rating the Sprague Color Code as follows has been adopted:

GREEN LABEL . . . . 1000 volts  
BLUE LABEL . . . . . 2500 volts  
RED LABEL . . . . . 5000 volts

Type 1FM - 2FM. Remarkably resistant to moisture. Power factor is extremely low and stable and voltage ratings are fully guaranteed. Wire leads can be looped for "eyelet" mounting.

### Intermediate Capacities Available

For several years past, Sprague Fixed Mica Capacitors have been meeting the most exciting demands as original equipment on the finest radio and electronic devices. They are now made generally available at standard prices and incorporating quality features unexcelled in the field. Units are carefully molded in low-loss phenolic and are scientifically protected against moisture.

We reserve the right—during the present emergency—to change mechanical specifications without notice.

# SPRAGUE Condensers

## Auto RADIO CONDENSERS

**Vibrator Condensers (Oil Impregnated).** These sturdy new oil-impregnated units are your guarantee against troubles due to broken-down vibrator condensers. Fully sealed in durable metal cans.

Working Voltage 1600 Volts D. C.

Catalog Number	Capacity Mfd.	Dimensions	List Price
AR-11	.01	1 1/4" x 1/2" x 1/2"	\$0.55

## Transmitting CONDENSERS

Play safe on high voltages the practical way! Insist on Spragues . . . the only Transmitting Condensers equipped with the new "lifeguard" Terminal Insulation Caps.

Terminals are insulated from cans for at least twice the working voltage; condensers are placed in complete metal cans which can be automatically grounded through the mounting clamps; and all condensers are oil impregnated—oil filled with SPRACOL, the famous Sprague 500 degree F. flash protection oil (not oil impregnated and wax filled)! Oil-FILLED units are essential for high voltage use.

**New Type CR With Universal Mounting.** To meet the demand for fully reliable, full quality Sprague Transmitting Condensers in small, rectangular size and with adjustable flanges for mounting in any position, we are pleased to announce the new Type CR. Like the famous Sprague Transmitting units of the past, they are oil impregnated and oil filled, cylindrically wound, perfectly sealed, and labelled with complete operating information based on A. R. R. L. standards. Ample safety factor is assured—no need to "play safe" by buying higher voltage units than required. Unconditionally guaranteed against breakdown when used as specified.

Catalog Number	Capacity Mfd.	D. C. Working Voltage	Can Size	List Price
CR-16	1	600	1" x 1 1/4" x 2 1/4"	\$4.20

**FREE!** Lifeguard Protective Caps are now supplied at no extra cost with every Sprague Transmitting Condenser—or, you can buy them for your old condensers. . . . LG-1—List Price Per Pair 30c

We reserve the right—during the present emergency—to change mechanical specifications without notice.

# SPRAGUE Condensers

## INTERFERENCE ELIMINATION CONDENSERS and CHOKES

**Type IF-15.** A triple section filter for application to all small motors or motor operated devices. Specially designed to prevent accidental shocks from discharge of filter condensers, in accordance with RMA recommendations.

**Type IF-25.** A double section filter for medium sized motors, and 1 Horsepower motors. Condenser and terminals completely enveloped in metal shield for safety.

**Type IF-G1.** A compact, metal encased, single section filter for application to each brush of multiple brush generators, rotary converters, etc. Can and mounting bracket form one terminal of the filter.

**Type IF-G10.** A high capacity, single section filter, with completely enclosed terminal construction for safety. Used in combination with IF-11 condenser on 3 wire systems, etc.

**Type IF-11.** A dual high capacity filter, with completely enclosed safety construction. For application to large motors, over 1 Horsepower. Also used on high current arcing or sparking devices. Used with IF-G10 on 3 wire power systems.

**Type IF-21 or IF-33.** A dual, compact, metal encased tubular filter for use across the brushes of fractional horsepower motors with can grounded to the motor frame. Also used across the line terminals of motors in conjunction with chokes to form a "brute force" filter for stubborn cases of interference.

**Type IF-S1.** A single, 2 lead, filter section with can completely insulated. For use across make and break contacts.

**Type IF-R1.** A special resistor-capacitor filter combination for use across arcing, or make and break contacts in inductive circuits where prolonged sparking takes place.

**Type IF-R2.** Same construction and applications as IF-R1, except used in very highly inductive circuits, where suppression provided by IF-R1 is not sufficient.

**Type CH-1, CH-2.** High quality, completely metal encased chokes of adequate inductance to provide real filtering action at radio frequencies CH-1 carries up to 10 amps and CH-2 up to 20 amps. CH-1 Mounting centers 2 1/8". CH-2 Mounting centers 3 1/8". Both types provided with 8" Pigtail Leads.

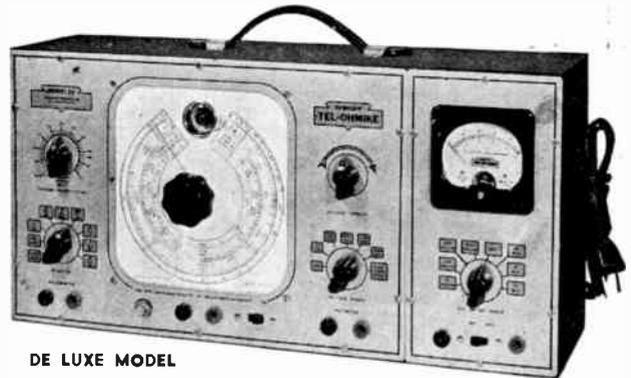

All condensers can be used at 110 volts AC or DC and 220 volts AC or DC.

All Leads 6 inches Long

Catalog Number	Can Size Diameter	List Price*
IF-G1	1 3/8" x 1 1/8"	\$0.80
IF-S1	2" x 3 1/8"	.90
IF-33	1 1/2" x 5/8"	.90
IF-21	2 3/8" x 1"	1.20
IF-15	2 1/2" x 1"	1.50
IF-R1	2 1/2" x 1"	1.70
IF-R2	2 1/2" x 1"	1.70
IF-G10	3 1/4" x 1 3/8"	2.40
IF-25	3 1/2" x 1 3/8"	2.70
IF-11	4 1/2" x 1 1/2"	3.45
CH-1	3 1/8" x 1 7/8" x 1 1/2"	1.65
CH-2	3" x 2 1/2" x 2 1/2"	3.30

## SPRAGUE De Luxe TEL-OHMIKE CONDENSOR-RESISTOR ANALYZER

The handiest, most complete instrument of its kind. Permits a complete, easy check on EVERY basic characteristic of EVERY type of condenser and resistor—on direct reading scales that eliminate guesswork. Measures capacity from .000010 to 2000 mfd. covering everything from minimum air condenser capacities to large motor-starting condensers. Measures DC resistance from .5 to 5,000,000 ohms and insulation resistance up to 10,000 megohms—the highest insulation resistance scale available on such an instrument. Thus, the insulation resistance of such components as Oil Condensers can be measured DIRECTLY on the Tel-Ohmike under high voltage up to 1000 volts! Power factor and leakage current of electrolytic condensers are also read directly. A built-in power supply permits measurement of ALL characteristics under DIRECT WORKING VOLTAGE CONDITIONS up to 1000 volts DC. A "magic eye" indicator shows bridge circuit balance. Condenser Characteristics Table included with complete instructions for use.

DE LUXE MODEL

Contains built-in DC volt-milliammeter. Switch and pin-jacks provided so meter may be used on measurements external to the Tel-Ohmike. Meter ranges selected through an 8-position switch include 15, 150, 500, 1500 volts DC, and 1.5, 15 and 50 ma. DC. "Off" position is provided between the voltage and ma. ranges. Ranges graduated downward on either side for maximum meter safety. A rugged, double pivot meter and a broad, easily-read meter scale are used. **Cat. No. TO-2**  
Dimensions: 17 1/2" x 9" x 6". Weight 14 lbs. **\$44.90 Net**

We reserve the right—during the present emergency—to change mechanical specifications without notice.

# SPRAGUE\* KOOLOHM RESISTORS

\*Trademark Reg. U. S. Pat. Office

## NO OTHER RESISTOR TYPE CAN EVEN CLOSE TO MATCHING THESE ADVANTAGES . . . Extra Humidity Protection Now Standard

The exclusive Koolohm construction utilizing a glazed ceramic outer shell and new moisture and fungus proof end seals eliminates the possibility of humidity and corrosion, even under tropical conditions. This EXTRA PROTECTION was formerly supplied only on special order. Now it is STANDARD on ALL Sprague Koolohms, being identified by the letter "T" added to the old type designation.

### "T" for Tropicalized

As always, all Koolohm designs are based on the use of insulated resistance wire. Every inch of wire is continuously and uniformly insulated before winding with an exclusive ceramic coating capable of standing red heat. This provides excellent insulation. No danger of shorted turns! Koolohms operate at lower surface temperatures than coated resistors of the same size and power rating.

This perfect high temperature ceramic wire insulation permits layer wound construction, making possible the use of larger diameter wire for the high resistance values. The exclusive use of progressive winding on high values permits use of wire sizes 2 1/4 TIMES GREATER IN CROSS SECTIONAL AREA than those in ordinary resistors of the same size. Koolohm windings need no overall insulation but, for extra mechanical protection, they are enclosed

in a rugged, moisture-proof ceramic shell which is also a high-voltage insulator. Koolohms can be mounted in direct contact with chassis or other grounded parts!

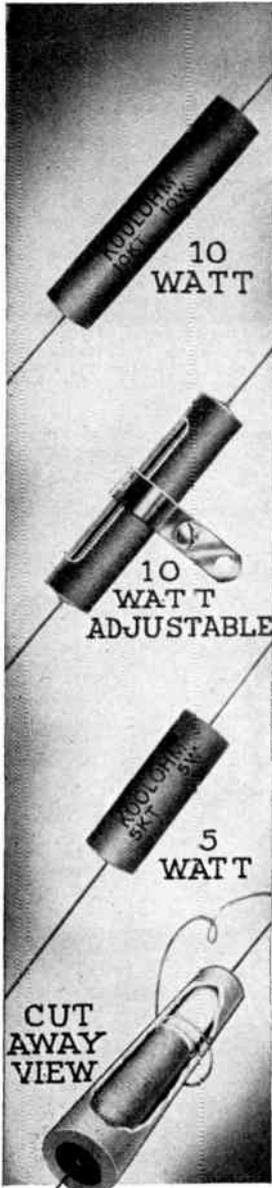

Koolohms dissipate full wattage ratings regardless of the resistance value. Use them at their full wattage ratings. They stand the gaff—because no fine wires or enamels are used.

### Non-inductive Resistors

The perfect ceramic wire insulation on non-inductive Koolohm resistors allows intricate layer and inter-laced windings and permits non-inductive windings to be produced with the lowest residual characteristics of any power resistors available. Each turn of wire has its inductance cancelled by an immediately adjacent turn carrying current going in the opposite direction.

### 5% Accuracy Guaranteed!

Where else can you get power resistors made to a standard tolerance of 5%—with an accuracy of 5% or better guaranteed? The perfect insulation on Koolohm ceramic-insulated resistance wire eliminates the possibility of shorted turns in manufacture and permits much better control of resistance accuracy.

**The ONLY Resistors Wound with CERAMIC INSULATED WIRE**

. . . doubly insulated and "Tropicalized" with a glazed ceramic outer shell and moisture-proof end seals.

# Condensers

P. R. MALLORY & CO. Inc.  
**MALLORY**

## DRY ELECTROLYTIC TUBULAR ALUMINUM-CASED TYPES WB

• Type WB capacitors are supplied in hermetically sealed aluminum tubes with waxed cardboard outer sleeves. They are suitable for all general applications within the specifications shown below. Particularly noteworthy are their excellent low-temperature characteristics. They may be obtained with radial strap for mounting, if desired, by specifying type WBR.

## DRY ELECTROLYTIC TUBULAR "VICTORY LINE" TYPES VEC

• This standardized line, approved by the War Production Board and produced in conformance with American Standards Association specifications, is of dependable Mallory quality. You can use "Victory Line" condensers for radio service replacement with complete assurance that they will give long, trouble-free performance. Similar to former Mallory BB types, except fewer in number and no aluminum cases.

## Dry Electrolytic "Bathtub" Types

• Types BS and BT capacitors are WB tubulars encased in steel "bathtub" containers for double seal and mechanical strength. The added safety factor obtained by this construction makes these units ideal for the toughest type of service, including high altitudes, vibration, and extreme temperature. Normally supplied with two side terminals and unit internally insulated from case.

## PAPER DIELECTRIC TUBULAR "VICTORY LINE" TYPES VPC

• Standardized paper by-pass line, resulting from the wartime necessity of reducing all lines of replacement parts to a minimum. Approved by the War Production Board, and produced in conformance with the American Standards Association specifications. Ratings have been reduced to a minimum, but Mallory quality and dependability remain the same.

### TYPES TP AND OW

Mallory tubular paper condensers are color coded for quick identification of voltage rating. Colored band at the "outside foil" or ground end tells the story.

- 200 volts—red
- 400 volts—yellow
- 600 volts—blue
- 1000 volts—gold
- 1600 volts—copper
- 2000 volts—silver

Mallory Type TP condensers are wax-impregnated and wax sealed at the ends, the accepted standard construction for maximum protection from atmospheric conditions.

Mallory Type OW condensers are oil-impregnated and wax sealed, providing extra safety factor for voltage applications higher than usually recommended for the wax impregnated type.

### DUAL TP CONDENSERS

Mallory Dual TP units are packed 5 to a carton. Outside foil is common and connected to mounting strap.

### METAL CASED OIL-IMPREGNATED CONDENSERS TYPE OT

Mallory OT tubular condensers represent the finest quality obtainable. Impregnated in oil and housed in hermetically sealed leak-proof metal tubes, they are ideal for vibrator buffers and high voltage coupling applications.

All OT units are externally insulated with cardboard tubes and supplied with a mounting strap which may be removed if not required. Wire leads 2 3/8 inches long. Packed in individual cartons.

### SIZE CHART

S No.	Size	Box	S No.	Size	Box
1	1 x 5/16	10	13	1 1/2 x 5/8	10
2	1 x 3/8	10	14	1 1/2 x 11/16	10
3	1 1/4 x 3/8	10	15	1 1/2 x 3/4	10
4	1 1/4 x 2 1/8	10	16	1 1/2 x 13/16	10
5	1 1/4 x 1 1/8	10	17	2 x 5/8	10
6	1 1/4 x 5/8	10	18	2 x 3/4	10
7	1 1/2 x 7/8	10	19	2 x 1 1/8	5
8	1 1/2 x 1 1/8	10	20	2 1/4 x 13/16	5
9	1 1/2 x 5/8	10	21	2 1/4 x 7/8	5
10	1 1/2 x 3/4	10	22	2 1/4 x 1	5
11	1 1/2 x 5/8	10	23	2 1/2 x 1	5
12	1 1/2 x 3/4	10	24	2 1/2 x 1 1/8	5

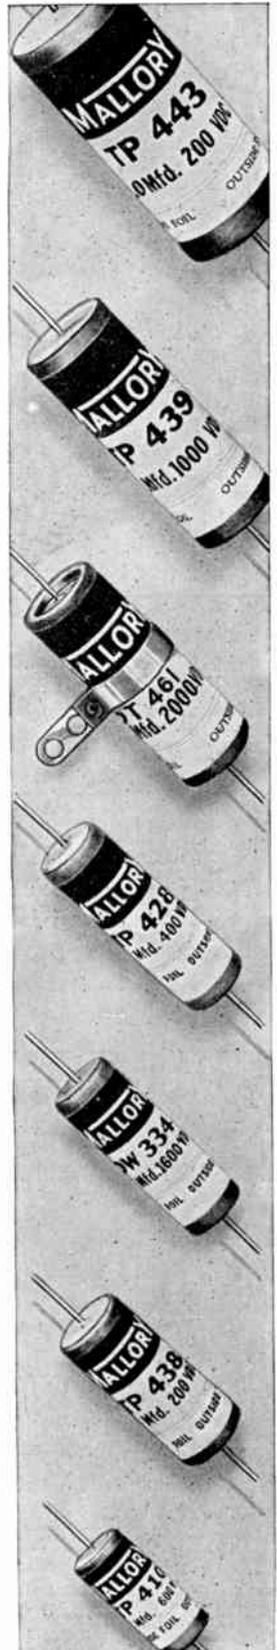

All diameters are plus or minus 3/32"

Listing gives rating, catalog number and list price. Column S refers to size and standard package quantity as outlined above. Wire leads approximately 2 3/8 inches long.

Certain capacities in 200 and 400-volt ratings are not listed because they are too small in size for practical manufacture. If such ratings are required, always use the next higher voltage rating. There is no premium in price.

## DRY ELECTROLYTIC COMPACT VERTICAL TYPES FP AND WP

• These capacitors, long considered standard for metal encased units, are ideal for many types of service.

Light in weight, compact, and provided with an integral mounting feature, they save assembly space and time. Mounting brackets or accessories are not required where the chassis has been punched with the characteristic FP slotted design.

Reference to the chart below provides all characteristics needed for design requirements. While thousands of these units have given excellent service under extreme conditions of high altitudes and humidity, from an acceptance test standpoint, the hermetical seal provided may not prove as dependable as that used in the type BS. The test specification is the limiting factor rather than the service.

While other ratings are available, those listed were carefully selected to cover a maximum number of requirements with a minimum of units. Note the following examples:

1. A dual 10 mfd. unit is listed in several instances rather than a single 20 mfd. unit, because of its greater flexibility—the dual sections to be paralleled when 20 mfd. is desired. The same procedure holds for triple units.
2. The dual and triple 50-volt units are listed in anticipation of 24-volt tube circuits. Physical dimension details are shown on the opposite page.

Special mounting wrench A-93436 is available for twisting the mounting ears when assembling to chassis or mounting wafers.

Individually packed in display cartons.  
 One bakelite mounting washer included.

## DRY ELECTROLYTIC COMPACT VERTICAL TYPES FP AND WP Hardware for Types FP and WP

Item	Description	Catalog Number	List Price	Item	Description	Catalog Number	List Price
Wrench	Special for FP Mounting	A-93436	\$0.75	Mounting Clip	For 3/4" FP	A-93434-1	\$0.10
Bakelite Washer	For 3/4" FP	A-93416-1	.05	Mounting Clip	For 1" FP	A-93443-1	.10
Bakelite Washer	For 1 1/8" FP	A-93410-1	.05	Mounting Clip	For 1 1/8" FP	A-93435-1	.10
Bakelite Washer	For 1 3/8" FP	A-93423-1	.05	Insulating Tube	For 3/4" x 2" FP	A-93280-6	.05
Metal Washer	For 3/4" FP	A-93431-1	.05	Insulating Tube	For 1" x 2" FP	A-93280-3	.05
Metal Washer	For 1 1/8" FP	A-93403-1	.05	Insulating Tube	For 1" x 3" FP	A-93280-2	.05
Metal Washer	For 1" FP	A-93401-1	.05	Insulating Tube	For 1 1/8" x 2" FP	A-93280-5	.05
Metal Washer	For 1 3/8" FP	A-93421-1	.05	Insulating Tube	For 1 3/8" x 3" FP	A-93280-4	.05

DESCRIPTION	3/4" CONTAINER	1" CONTAINER	1 1/8" CONTAINER
<b>Mounting End Detail and Important Dimensions</b> See elsewhere on this page for terminal lug sequence.			
<b>Perspective View of Container and Terminal Detail</b> Mounting ring is negative terminal in all cases. All multiple units are common cathode construction. Black cardboard insulating tubes are available for all container sizes and may be secured assembled to container when required.			
<b>Chassis Layout for Direct Mounting</b> Drawings show simplified punch and die design for direct mounting to chassis. If greater clearance is required design punch and die in accordance with metal plate layout below.			
<b>Metal Plate for Grounded Mounting</b> These plates are cadmium plated, and serve as an alternative mounting to a directly punched chassis. Part A-93403-1 for 1" containers fits standard 1 1/8" tube socket holes.			
<b>Bakelite Plate for Insulated Mounting (Similar to metal plates.)</b>	<b>Part A-93416-1</b> 3/4" thick. Punch Chassis 3/4" to 1"	<b>Part A-93403-1</b> 1" thick. Punch Chassis 1" to 1 1/8"	<b>Part A-93424-1</b> 1 1/8" thick. Punch Chassis 1 1/8" to 1 3/4"
<b>Horizontal Mounting Clip</b> These clips are similar to those used for cartridge fuses. They are cadmium plated and provided with a locating extrusion to prevent rotation.			
	<b>Part A-93434-1</b>	<b>Part A-93443-1</b>	<b>Part A-93435-1</b>

### TERMINAL LUG SEQUENCE

The location of terminals has been completely standardized. Unwanted terminals are deleted leaving a blank, though sealed, hole in the cover.

All 1" diameter containers have the following terminal lug sequence:

- Singles — lug (No. 3) (— Blank)
- Duals □ lug (No. 1) highest V.
- △ lug (No. 2) lowest V.
- Triples □ lug (No. 1) highest V.
- △ lug (No. 2) medium V.
- lug (No. 3) lowest V.

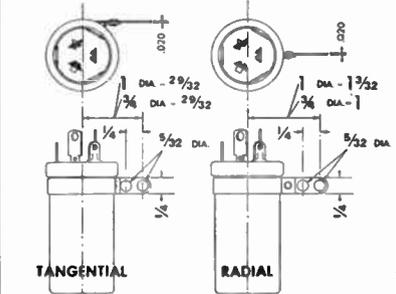

All 1 1/8" diameter containers have the following terminal lug sequence:

- Singles — lug (No. 4) (— Blank)
- Duals □ lug (No. 1) highest V.
- △ lug (No. 3) lowest V.
- Triples □ lug (No. 1) highest V.
- lug (No. 2) medium V.
- △ lug (No. 3) lowest V.
- lug (No. 4) highest V.
- △ lug (No. 2) near high V.
- lug (No. 3) next high V.
- lug (No. 4) lowest V.

For Identical Voltages the Above Sequence Will be Based on the Highest Capacity

### CIRCULAR MOUNTING STRAPS

3/4" Dia. Part A-91738-1    1/2" Dia. Part A-91737-1  
1" Dia. Part A-91738-2    1" Dia. Part A-91737-2

### Tangential and Radial Mounting Straps

Available assembled to the container for 3/4" and 1" diameter. The preferred location of the strap is against the base as shown.

## ROUND ALUMINUM CAN TYPES RS, RM, HD and HS

Type RS represents the single section type and RM the multiple separate section type where the units are not internally connected. Always use the Type RM when a common positive unit is desired by connecting the positive leads together.

Capacity Mfd.	Working Volts DC	Size	Catalog No.	List Price

## HEAVY DUTY TYPES HD AND HS

Type HD and HS condensers are ideal for all heavy-duty filter applications. Designed primarily for public address and theater applications, they may be used wherever extra safety factor is desirable.

Capacity Mfd.	Wkg. Volts DC	Max. Surge Volts	Size	Catalog Number	List Price
8	500	550	$\frac{11}{16}$ x $\frac{1}{8}$ x 2 $\frac{1}{16}$ "	HD682	\$1.80

8	600	700	1 $\frac{1}{4}$ x 1 $\frac{1}{2}$ x 3"	HS692	2.95

## DRY ELECTROLYTIC HEAVY-DUTY TYPES HC AND EPB

Type HC capacitors are high-capacity, low-voltage units supplied in round hermetically-sealed Bakelite containers. All units listed are stocked.

The Bakelite containers provide excellent insulation from bracket or ground.

Type EPB capacitors are supplied in Bakelite containers and are especially designed for high voltage applications where low temperatures will be encountered. These units are carried in stock for small quantity shipments.

## NOISE FILTERS — FOR RADIO INTERFERENCE SUPPRESSION

● Mallory Noise Filters are available in a number of specialized types, each type having its own field of application. For most effective noise elimination and for maximum economy, thought should be given to the selection of the correct Mallory Noise Filter type. The general application of Mallory filters is given in Form NF-100, available from your distributor. To assist you in securing the most effective and economical installation, the Engineering Department of P. R. Mallory & Co., Inc., will gladly analyze the essential facts covering your installation, and will recommend suitable equipment. Some devices are particularly difficult to filter and it should also be understood that no type of noise filter is effective where the interference is entering through the antenna system if the source cannot be reached, nor the antenna location changed.

TYPES X1, X3, Z2, Z4

Type X1 is for relatively slight interference. Use at radio or appliance cord plug. Size 1 3/8" x 1 3/4", rated 110 volts, 5 amps.

List Price each.....\$0.60

Type X3 is a capacitor type filter having greater efficiency than Type X1. Use at radio or appliance cord plug. Size 1 3/8" x 2 1/4", rated 110-220 volts, 5 amps.

List Price each.....\$0.90

Type Z2 is a capacitor-inductance filter for medium interference. Use with electric razor, radio or appliance cord plugs. Most effective on grounded line systems where reversal of plug will affect operation. Size 1 3/8" x 2 3/4", rated 110-220 volts, 3 amps.

List Price each.....\$1.40

Type Z4 is a dual inductance-capacity filter for severe interference on appliances where a return lead from the filter is inconvenient. Ideal for electric razor, vibrators and household appliances. Use at radio or appliance cord plug. Size 1 3/8" x 3", rated 110-220 volts, 3 amps.

List Price each.....\$1.65

TYPE X5

Type X5 is a triple capacity filter with provision for return lead to appliance. Special safety feature prevents possibility of shock and makes this unit ideal for use with vacuum cleaners, food mixers, etc. Size 1 3/8" x 2 3/8", rated 110-220 volts, 5 amps., and equipped with binding post for connection to appliance or motor frame.

List Price each.....\$1.50

TYPE ZA1

Type ZA1 is an antenna substitute using house wiring as antenna. Capacity and inductance combination, size 1 3/8" x 1 3/4".

List Price each.....\$1.20

TYPES Z6 and Z8

Type Z6 is a dual inductance-capacity filter with provision for return lead to ground. Recommended for suppressing severe interference. Use at radio cord plug or motor and appliance plugs. Size 1 1/8" x 3 3/8". Rated 110-220 volts, 3 amps.

List Price each.....\$2.10

Type Z8 is same as Z6 but with provision for return wire connection to motor or appliance frame rather than ground. An efficient filter equivalent to box type within 3 amp. rating.

List Price each.....\$2.10

Type Z8A is same as Z8 except provided with lead connections. Designed for mounting directly on appliance. Ideal for use with fluorescent lamps.

List Price each.....\$2.40

Type W7 is a dual capacity filter for use on motor brushes or rings and designed for mounting inside or on motor housing. For moderate interference. Size 7/8" x 1 1/8", rated 110-220 volts.

List Price each.....\$0.90

TYPES W7, W7A, W9, W11, W7SP, W9SP, W11SP

Type W7A is similar to W7, except smaller physical size. For 110-volt service only. Size 1 1/8" x 1 1/8".

List Price each.....\$0.75

Type W7SP is similar to W7 except provided with shock-proof feature to permit use with ungrounded appliances such as drink mixers, electric drills, etc. Size 7/8" x 1 1/8".

List Price each.....\$0.90

Type W9 is similar to Type W7 but for medium interference. Size 1" x 3". List Price each.....\$1.20

Type W9SP is similar to Type W7SP (except for medium interference, Size 1" x 2 5/8").

List Price each.....\$1.20

Type W11 is similar to Type W7, but for severe interference. Size 1 3/8" x 3". List Price each.....\$1.50

Type W11SP is similar to Type W7SP, except for severe interference. Size 1 3/8" x 3 1/4".

List Price each.....\$1.50

Type LC5 is an inductance-capacity filter for extremely severe interference. Has provision for return lead to frame of motor or appliance.

Rated 110-220 volts, 5 amps., supplied in rectangular housing with mounting flanges. Size 2 7/8" x 3" x 3 1/2" high. List Price each.....\$6.00

Type LC10 is identical in size to Type LC5, but is rated at 110-220 volts, 10 amps. List Price each.....\$9.60

TYPES LC-5 and LC-10

### HEAVY DUTY TYPES LB

● Mallory Type LB Noise Filters are for use with equipment that is permanently connected to the power line or which draws a minimum of 10 amperes or more.

Type LB Filters are furnished as complete units including capacity and inductance and supplied in standard type metal cut-out boxes. These units are available in various current ratings as listed below.

Type	Rating	Size	List Price Complete
LB-10	220V-10 Amps.	6 x 6 x 4	\$14.40
LB-20	220V-20 Amps.	10 x 10 x 6	33.60
LB-40	220V-40 Amps.	12 x 10 x 6	42.00

1.0	50	$1\frac{1}{8} \times 1\frac{3}{8}$	8	<b>RF482</b>	<b>.90</b>

● This group is designed for various car radio applications.

Types AG are for noise suppression at the generator, oil and gas gages, etc.

Type AM is for suppression at the ammeter and other instruments.

Types FM are especially designed for Ford generators.

Type DL is a dome light interference suppressor and includes an RF choke.

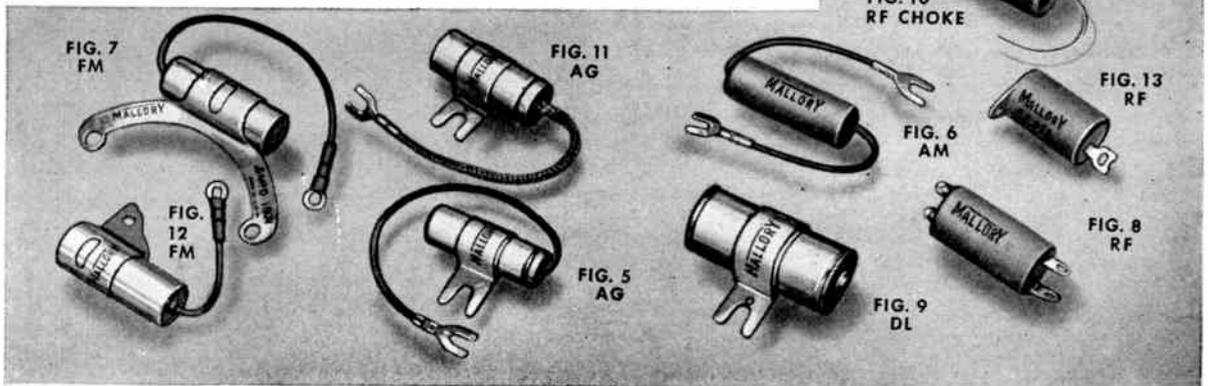

Types RF are for general vibrator hash and noise suppression and have a very low RF impedance.

### RF CHOKES

Turns	Wire	Size	Fig.	Cat. No.	List Price
90	16	$1 \times 1\frac{1}{2}$	10	<b>RF581</b>	<b>\$0.80</b>
55	16	$1 \times 1\frac{3}{8}$	10	<b>RF582</b>	<b>.60</b>
55	12	$1\frac{1}{8} \times 1\frac{3}{8}$	10	<b>RF583</b>	<b>.90</b>

● Mallory chokes, Type RF, are designed for use wherever RF chokes are needed for hash or other radio frequency suppression. Complete particulars and detailed instructions for their use will be found in the Mallory-Yaxley Radio Service Encyclopedia.

\* Has shielded lead.

## MYE TECHNICAL MANUAL

This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems.

### Table of Contents

1. Loud Speakers and Their Use
2. Superheterodyne First Detectors and Oscillators
3. Half-Wave and Voltage Doubler Power Supplies
4. Vibrator and Vibrator Power Supplies
5. Phono-Radio Service Data
6. Automatic Tuning—operation and adjustment
7. Frequency Modulation
8. Television—suggestions for the postwar boom
9. Capacitors—how to overcome wartime shortages
10. Practical Radio Noise Suppression
11. Vacuum Tube Voltmeters
12. Useful Servicing Information
13. Receiving Tube Characteristics—of all American tube types

Contains 392 pages of information, beautifully bound, with hard cloth covers. It's worth far more than its price.

## FOR A. C. MOTOR STARTING

• Mallery Motor Starting Capacitors incorporate the latest design improvements to provide long life and maximum efficiency in all motor starting applications. New universal mounting features reduce inventory—permit these modern compact capacitors to be used for replacing old-style large units. Complete instructions, replacement recommendations, test data and other valuable information given in Form M801 available without charge from your Mallery Distributor, or mailed on request.

SPECIFICATIONS.**

All units are rated at 500 Volts D.C. working and tested at 1000 Volts D.C. except on capacities higher than 6200 mmf. which are rated at 300 Volts D.C. working and 600 Volts D.C. Test. All are tested for accuracy of capacity according to tolerance requested and voltage breakdown.

# INDUSTRIAL

# CONDENSER

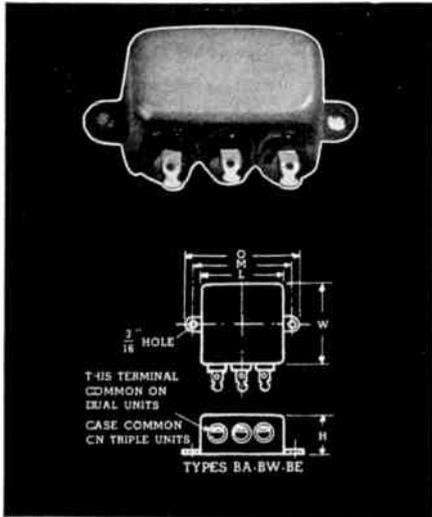

THE INDUSTRIAL CONDENSER CORP. was formed in 1940 in order to answer a definite need for a midwestern manufacturer of oil, wax, electrolytic and motor starting capacitors. During this time INDUSTRIAL has grown to a leading place in the industry.

In addition to the standard types of paper and electrolytic capacitors covered in these pages (see Bulletin 1031A for complete line) and carried in distributors' stocks throughout the country, a wide variety of other types are available on special order.

The display shown at the left is on the counter of every INDUSTRIAL distributor. Reference to this will be of assistance in selecting the proper unit for each application.

## Built to U. S. Signal Corps and Navy Specifications.

### DRY ELECTROLYTICS

Type "BE" electrolytic capacitor is the first commercially available unit of this type with the reliability of the total submersion type, oil filled capacitors.

Wound with the highest purity aluminum foil and cellulose separators available; impregnated in electrolyte having excellent temperature characteristics, these units will outlive their associated equipment.

### TYPE "BA" OIL FILLED

1. INCCO OIL "A" permits efficient operation of these compact units over the widest range of temperature.
2. The use of the HIGHEST GRADE CONDENSER TISSUE insures greater safety factor and longer life.
3. Specially PROCESSED RIVETED TERMINALS are designed to withstand total submersion in salt water and changes in temperature from 50° below zero Centigrade to 90° above zero Centigrade without loosening or losing their integrity.
4. CONDENSER MOUNTINGS form an integral part of these drawn shell containers insuring permanent and rigid fastenings.
5. All units are NON-INDUCTIVELY WOUND providing efficient operation over the widest range of frequencies.
6. HERMETICALLY SEALED, they are unaffected by time, temperature or humidity.
7. CONSERVATIVELY RATED for safe and continuous uninterrupted operation at 10% above rated voltage for the lifetime of associated equipment.
8. Tested at twice the rated voltage between terminals and twice the rated voltage plus 1000 from each terminal to case.

Above units also available in 200 V. D. C., 400 V. D. C. and 1500 V. D. C. on request.

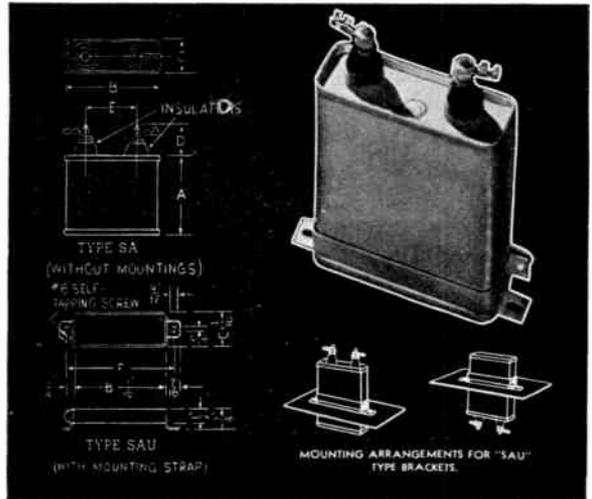

**NOTICE**—Most units are available with TERMINALS ON TOP, BOTTOM OR ENDS. When ordering, add "T" for top terminals, "B" for terminals on bottom or "E" for end terminals, i.e., 6BAT100 for terminals on top. Type "B" also available in WAX FILLED. When ordering, change catalog number A to W, i.e., 6BW100. STANDARD CAPACITY tolerance of plus 20 per cent minus 10 per cent furnished on oil filled and wax filled units unless otherwise specified when ordering. Can be furnished in plus or minus 1 per cent capacity tolerance on special request.

# INDUSTRIAL INCCO CONDENSER

## TYPE "SA" OIL FILLED

1. INCCO OIL "A" IMPREGNATED AND FILLED—permitting efficient operation over widest range of temperature.
2. HERMETICALLY SEALED CASE—is unaffected by time, humidity, or operating temperatures.
3. Use of HIGHEST GRADE CONDENSER TISSUES insures a long uninterrupted life.
4. HIGH-GLAZE PORCELAIN INSULATORS—insure low moisture absorption and high terminal to case flash over.
5. CONSERVATIVELY RATED—SAFE FOR CONTINUOUS OPERATION AT 10 PER CENT OVER-LOAD.
6. Use of "SPACE SAVER" UNIVERSAL MOUNTING BRACKETS provides adjustable capacitor heights.
7. LEAD COATED STEEL CASE—IS NON-CORROSIVE and lacquer finished.
8. TESTED FOUR TIMES BEFORE SHIPMENT—guarantees a 100 per cent perfect product electrically and mechanically.

If riveted terminal construction is wanted in place of porcelain stand-off insulators add "R" to catalog number. For example, 6SA50 changes to 6SAR50. Submersion proof terminal construction to meet Army and Navy specifications is optional; specify on order. Standard capacity tolerance plus or minus 10 per cent. Mounting brackets supplied in accordance with following catalog designations: TYPE SA—No mounting brackets. TYPE SAU—"Space Saver" universal bracket. TYPE SAJ—Soldered vertical mounting bracket. Type SAL—Reversible mounting foot bracket. TYPE SAH—Re-

versible spade bolt bracket. For example: The 8mfd. 600V. type with "Space Saver" bracket has catalog number 6SAU800.

NOTE: Due to national emergency and to facilitate delivery we have standardized on container heights. In many cases units can be supplied in shorter containers if required.

## TYPES "GA" and "HA" OIL FILLED

These inverted mounting capacitors fill a definite need where chassis space is the prime factor.

\* Types "GA" and "HA" are INCCO Oil "A" impregnated and filled.

The case is a one-piece metal extrusion with a "locked-in" molded neck. This construction meets and surpasses the Army and Navy requirements for a submersion-proof capacitor.

Type "GA" is available in the seven standard rating listed below, but can also be supplied in other capacities and/or voltages to manufacturers' specifications.

In the standard "GA" and "HA" types the container is insulated. A grounding lug can be supplied for connecting one terminal to the case. Fiber washers for insulating container from chassis, when case is grounded, and insulating cover for insulating the container from adjacent equipment, can also be supplied on special order.

Type "HA" differs from "GA" in container and mounting neck size, and also in the fact that it has three insulated terminals. Primarily, type "HA" is supplied to manufacturers' specifications, to meet special requirements of multiple-section and multiple-terminal capacitors, with either insulated or grounded container.

## CAPACITORS TO 100,000 V.D.C.W.

INCCO OIL "A" IMPREGNATED AND FILLED assures smaller size, low power factor, and widest range of operating temperatures.

ELECTRIC ARC WELDED HEAVY GAUGE HOT TINNED STEEL CASES are non-corrosive—finished in durable lacquer.

GLAZED WET-PROCESS PORCELAIN INSULATORS—low moisture absorption and high terminal to case flash over.

WOUND WITH HIGHEST GRADE CONDENSER TISSUES—insures a long, uninterrupted life.

CONSERVATIVELY RATED—Safe for continuous operation at 10 per cent overload.

HERMETICALLY SEALED STEEL CASE — unaffected by time, humidity or operating temperatures.

AVAILABLE TO MEET U. S. SIGNAL CORPS AND NAVY SALT WATER SUBMERSION REQUIREMENTS.

For the duration of the war it is necessary that we reserve the right to make slight changes in case dimensions, in order to fabricate with available material. We will, however, notify you of any changes before entering your order.

### MOTOR STARTING CONDENSERS

These motor starting condensers are all heavy duty three second start. Built of the finest materials obtainable, these capacitors are engineered to the Nth degree of perfection. They are used by all the leading manufacturers of high quality motors.

The listings shown will take care of 90% of all your replacement requirements.

## TUBULAR PAPER CONDENSERS

TYPE PT

Incco By-Pass Condensers are non-inductively wound and designed for maximum efficiency up to the highest radio frequencies. The units themselves are completely impregnated and sealed with a special non-hydroscopic sealing compound, thus preventing moisture penetration under the most humid conditions. The lead connected to the outside foil of the condenser is indicated by a black stripe around the end of the tube.

### INTERFERENCE ELIMINATOR

No. 7249

Designed for eliminating radio interference caused by fluorescent lights. By installing this unit directly in the fluorescent fixture, it eliminates all interference from the fixture. It is small enough to fit in any corner and is light enough so as not to require any special mounting. List Price.....\$1.00 each

## DIRECT REPLACEMENT

### For Aluminum Can Electrolytics—Wet and Dry Types No Drilling — No Changes

Literally thousands have asked for a condenser which would directly replace the now almost extinct aluminum can screw neck type.

INDUSTRIAL now has the right answer—No fuss or worry as to whether or not it will fit. This new unit has the same mounting dimensions as the old condenser. It will slip into the same chassis hole without any drilling or enlarging. A heavy fibre washer and three nuts are the only mounting hardware—it's just as easy as the sketch shows.

Electrically and mechanically this condenser is designed for heavy duty service. It incorporates the exclusive INCCO etched foil process of construction. Each unit is first embedded in a high grade wax and then sealed in its inner case of heavy impregnated tubing. This entire condenser is then mounted in a heavy kraft tube thus relieving the condenser itself from any mechanical strain. Likewise, this construction provides an excellent seal against changes in characteristics and prevents moisture absorption. Whether it's a wet or a dry this new type "US" is the right condenser for replacement use. Supplied with Underwriters Approved rubber covered leads. Mounting washer and locking nuts included with each condenser. Individually boxed in attractive carton with instructions.

#### To replace 1 3/8" diameter screw neck type

† SB551, SM602—8 leads.

An extremely popular type of condenser due to its exceptional high quality and midget size. Hermetically sealed in a small metal case and scientifically vented, to protect against adverse operating conditions of voltage, temperature and humidity. Container is insulated by a high grade tube which is spun over the ends of the can to eliminate shorts when wires are bent close to container. Easily mounted by their rigid wire leads.

All Type "MM" units are available with mounting strap. Recommended in cases of extreme vibration or when advisable to have unit solidly anchored. When ordering add the letter S before the catalog number.

Each unit is completely embedded in a high grade wax and then sealed in an impregnated carton to insure efficient operation under the most adverse conditions. New, high voltage formation, gives complete protection against surges and high peak voltages. Supplied with color coded, Underwriters' Approved, rubber covered leads. Universal lugs permit easy mounting in any position.

Type "C" is similar to type "MC" above. It is designated, however, for older type sets where space is not limited.

Spade bolt type "SB" of mounting has been very popular due to its wide use in many radio sets. Each unit is embedded in a high temperature wax and then sealed in a thoroughly impregnated cardboard tube, affording complete immunity to moisture penetration. New high voltage formation gives complete protection against surges and high peak voltages.

Type "SM" has identical characteristics as "SB". The addition of the strap mounting bracket has proved favorable in its use due to its wide application in AC-DC and portable sets in the replacement field. The strap can be moved to the best mounting position and then bolted or soldered.

Supplied with color-coded, Underwriters' Approved, rubber covered leads.

NEW YORK, N. Y.

**Dumont**  
QUALITY  
**CAPACITORS**

**Specially Designed for DC & AC  
FLUORESCENT LAMP FIXTURES**

A distinctive New Type unit . . . specially designed to meet today's Modern Market . . .  
Top Quality Engineering and Construction throughout.  
Essential for proper Starting Direct Current Fluorescent Fixtures . . .  
. . . Fully Guaranteed . . .

UNDERWRITERS' LABORATORIES  
APPROVED PRODUCTS  
for use with  
**FLUORESCENT  
LAMP CIRCUITS  
RADIO FILTERS**  
and other  
**ELECTRICAL  
APPLIANCES**

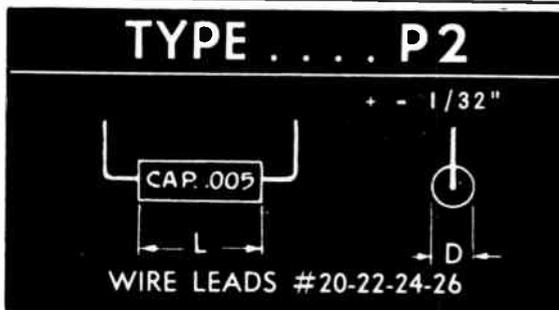

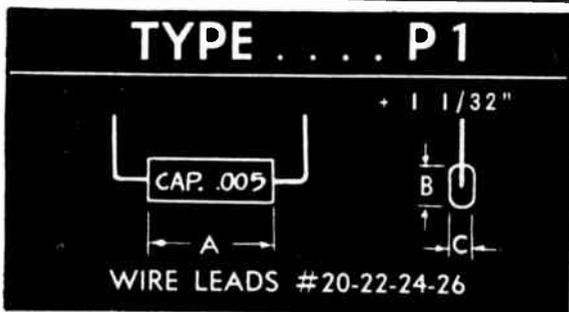

**ESSENTIAL FOR DC LAMPS**

For quick starting at high or low temperature.

Dumont capacitors assure starting of lamps due to low voltage retarding such starting.

**CAT. No. RU 1**

Dual capacitor unit for eliminating radio interference caused by fluorescent lamps and other electrical apparatus. List Price .....**\$1.00**

**FEATURES:** Type P1-P2 for use up to 95° Humidity. Type P1N-P2N for use up to 100° Humidity to 85° Centigrade. Sealed in DUMONT RESINOID cement. Leads will not pull out at high temperature. Excellent Q, high leakage resistance. Non-inductive—soldered leads brass or copper.

## FIXED MICA CAPACITORS

NOMA capacitors have been engineered and developed to suit the most exacting requirements of radio and electronic engineers. They are precision-made to the highest standards—to provide completely satisfactory operation both in test instruments and commercial products.

Every NOMA capacitor is tested for accuracy in capacity, stabilized to reduce capacitance drift, flash tested at 200% of the rated working voltage and inspected for mechanical defects to insure its high quality and reliability.

TYPE		PHYSICAL DIMENSIONS				CAPACITIES AVAILABLE	MAXIMUM WORKING VOLTAGE
NOMA	AWS-C-75.3	A	B	C	D		
M 1	—	1"	5/16	5/8	21/64	0 to .01 mfd.	1000
M 2	—	21/32	11/32	21/32	3/16	0 to .002 mfd.	500
M 3	cm 20	51/64	1-1/8	15/32	7/32	0 to .002 mfd.	500
M 4	cm 30	53/64	1-1/8	53/64	9/32	0 to .0033 mfd.	1000
M 5	cm 40	1-1/32	1-3/8	41/64	11/32	0 to .01 mfd.	1000
M 6	cm 35	53/64	1-1/8	53/64	11/32	0 to .01 mfd.	1000
M 7	—	11/16	1-1/8	7/16	3/16	0 to .0005 mfd.	500

When you plan your postwar products, why not mail a set of the capacitor specifications to Noma? NOMA will manufacture a complete line of Mica, Paper, and Electrolytic capacitors for use by the radio and electronic industries.

# SANGAMO CAPACITORS

## GENERAL INFORMATION Relating to All Sangamo Capacitors

All list prices are subject to change without notice. When possible ample notice of price changes will be given, but due to uncertainties with regard to prices of raw materials it may not always be possible to do this.

When ordering be sure to give complete designation, including catalog number, capacity, and voltage ratings. Where special characteristics are desired, specify these by adding proper suffix letter or by complete description of the characteristics desired.

In many instances capacities in addition to those listed are available in various type units. Inquiry should be made to the factory in those cases where capacities other than those listed are required for information as to their availability.

The various characteristic designations used throughout this catalog are in accordance with those specified in the American War Standard for Fixed Mica Dielectric Capacitors, C75.3-1942. Details of these characteristics are indicated in the Characteristic Table below. Color code markings are also those specified in the above standard, and will be used where customer does not specify a different color code marking. Wherever possible case type designations as indicated by the War Standard have been shown.

Shipping instructions should accompany all orders. If no shipping instructions are furnished, the method of transportation considered to be most satisfactory will be used. All shipments are insured against non-delivery, unless otherwise instructed.

### CHARACTERISTIC DESIGNATIONS

Characteristic	Q	Temperature Coefficient Parts/Million/Deg. C	Maximum Capacitance Drift (F-6)	Verification of Characteristics By Production Test
A	Not specified	Not specified	Not specified	Not required
B	(As specified in D-5c(1))	-200 to +200	0.5 percent	Not required
C	"	-100 to +100	0.2 percent	Not required
D	"	0 to +100	0.05 percent	Not required
E	"	0 to +50	0.025 percent	Required
F	"	0 to +50	0.025 percent <td Required	
G	"	0 to -50	0.025 percent	Required

H-5210	CM45	.001	5000	2500	1.50
H-5215	CM45	.0015	5000	2500	1.95
H-5220	CM45	.002	5000	2500	2.25
H-5225	CM50	.0025	5000	2500	2.50
H-5230	CM50	.003	5000	2500	2.75
H-5240	CM50	.004	5000	2500	3.15
H-5250	CM50	.005	5000	2500	3.30

For A characteristic use list price. For B characteristic use list price. For  $\pm 20\%$  tolerance use list price. For  $\pm 10\%$  add 10% to the list price. For  $\pm 5\%$  add 20% to the list price. For  $\pm 2\%$  add 75% to the list price. For Meter mounting brackets (add letter E to type designation) add 30 cents to the list price when assembled on Condenser. For Meter mounting brackets add 20 cents to the list price not assembled on Condenser (specify case size).

CM-55 Type A-2 \*CM-56

\*CM56—Furnished with .144" clearance holes. Designate as Type A-2-A.

CM-60 Type A-2 \*CM-61

\*CM61—Furnished with .144" clearance holes. Designate as Type A-2-A.

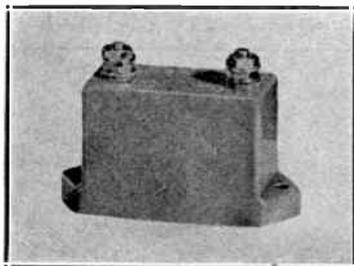

For B characteristic use list price. For C characteristic add 15c to the list price. For D characteristic add 75c to the list price. For  $\pm 20\%$  tolerance use list price. For  $\pm 10\%$  tolerance add 10% to the list price. For  $\pm 5\%$  tolerance add 20% to the list price. For  $\pm 2\%$  tolerance add 75% to the list price.

The following characteristics in CM60 cases only: For E characteristic add \$1.00 to the list price. For F characteristic add \$1.25 to the list price.

F2L-02025	.25	250	16.0	18.0	15.0	9.0	23.10

Types F-1 and F-2 Mica Capacitors:  
For B characteristic use list price. For C characteristic add \$.50 to the list price.  
For D characteristic add \$1.00 to the list price. For E characteristic add \$1.50 to the list price.  
For F characteristic add \$2.00 to the list price. For G characteristic add \$5.00 to the list price. For  $\pm 2\%$  add \$1.50 to the list price.  
Characteristics D, E, & F require 50% reduction in current rating. Characteristic G requires 50% reduction in voltage and current rating.

## TYPE F-3 MICA CAPACITOR

F3L-8325	00025	8000	7.5	5.0	1.5	.5	\$29.15

## ENGINEERED TO MEET NEEDS OF LARGE MAJOR INDUSTRY

Centralab Radiohms are a combination of hard-surfaced materials, patented design and skilled workmanship. Standards have non-rubbing contact bands and 3" aluminum shafts from end of 3/8" bushings. Cases are 1 7/16" diameter by 9/16" depth. Midgets have 1 3/64" diameter cases. Wall type resistor strips mounted on the inner circumference of the shell are a feature of both types. Round Shafts are equivalent to Standards with grooves every 1/2" for break-off purposes. Submidgets have 2 3/8" grooved shafts, with cases 3/4" in diameter and 3/8" in depth.

## ROUND SHAFT RADIOHMS, \$1.00

Resistance	Curve	Catalog Number
10M	1	AS-139
25M	1	AS-140
50M	1	AS-141

## STANDARD RESISTANCE CURVES . . .

Curve 1, linear taper, uniform resistance change from either end. Curve 2, right hand log taper used as "C" bias rheostat or in cases where only right and center terminals are used. Curve 3, tapered at both ends. Used where very slow resistance change from minimum volume end with smooth change from right end is required or as antenna shunt and "C" bias of 1 or 2 tubes without bleeder current. Curve 4, slow resistance change from maximum volume with short taper from left end for antenna shunt. Use where "C" bias change gives principal volume control effect. Curve 6, log curve with slow resistance change from left end. Use in audio grid or as tone control. S Curve, linear taper with uniform resistance change from either end but tapered at both ends.

# CENTRALAB CONTROLS

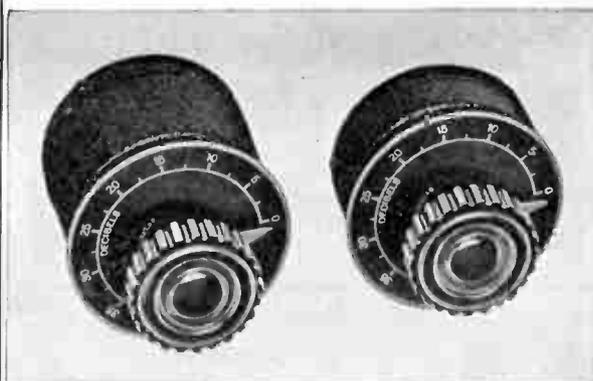

## SOUND PROJECTION SERIES I —

"L" Pads that are wirewound are available in the 10 watt or 50 watt sizes and carbon types are available in the 1 watt size.

The 10 watt size has a bakelite case  $3\frac{1}{2}$ " diameter x  $1\frac{3}{4}$ " deep in single or 3-hole mounting style.

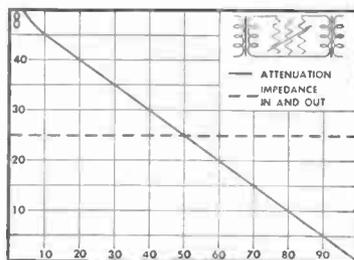

The 50 watt size is unmounted to provide free circulation of air around the resistance units. Dimensions are 2" dia. x  $2\frac{7}{8}$ " deep. Furnished with insulating washers for single-hole mounting.

The 1 watt size commonly used for multi-speaker installations is  $1\frac{7}{8}$ " dia. x  $\frac{1}{16}$ " deep, housed in a bakelite case with one-hole mounting. Priced without knobs or dials.

## SOUND PROJECTION SERIES II —

These controls are adaptable to input circuits in broadcasting stations, public address systems, and recording apparatus. Curve chart shows change in impedance and attenuation plotted against clockwise rotation for "T" pad attenuator. Impedance characteristic (dotted line) is substantially the same at any setting. Attenuation curve (solid line) varies from infinity at zero rotation to zero Db. at full rotation. There is no insertion loss. Electrostatic and electro magnetic shielding is provided by a black finished steel case. All resistance elements are insulated from shaft and bushing. Features are single hole mounting and bakelite screw-type terminal strip on back of case. Mounting bushing is  $\frac{3}{4}$ " long with 2 locknuts and lockwashers. Case diameter is  $2\frac{3}{4}$ ", depth back of panel, "T" pad  $2\frac{3}{8}$ ", gain control  $1\frac{3}{8}$ ". Maximum load dissipation is 1-watt. Priced with knobs and dials.

Impedance Matching Resistance	Part Numbers		
	1-watt "L" Pad \$3.00	10-watt "L" Pad \$5.00	50-watt "L" Pad \$5.00

8 ohms			

## ECONOMY P/A CONTROLS —

These controls are intermediate to Series II controls and older Series I types. They are designated primarily for inexpensive sound equipment including all types of fading and mixing systems, where original cost is a limiting factor. All units have metal shaft  $2\frac{1}{4}$ " from end of  $\frac{3}{8}$ " bushing. Small diameter bakelite case has same dimensions as Standard Radiohm. Non-rubbing contact is for smooth, quiet operation. Limited to input applications. Maximum power rating for all units is 1-watt.

SPECIAL GANG MOUNTING

SPECIAL BRACKET FOR DUAL MOUNTING

DeJur Rheostat-Potentiometers can be furnished mounted two or more in gang assembly for simultaneous operation of several circuits or circuit components, by means of one control. Two of these applications are illustrated above and many other arrangements are feasible. Our engineers will be glad to examine your requirements.

Other resistance ranges available to your specifications . . . off-position, tapered, dual and multiple combination units can be supplied. Length of shaft, slotted metal 1/4" insulated shaft, etc., can be provided to individual requirements.

## COMPOSITION "SERIES M" CONTROLS

Compact—only  $1\frac{1}{8}$ " dia. by  $\frac{1}{2}$ " (without switch) or  $\frac{13}{16}$ " with switch. Permanent, stabilized element. Clarostat Series "M" Controls are provided with the handy Ad-A-Switch feature.

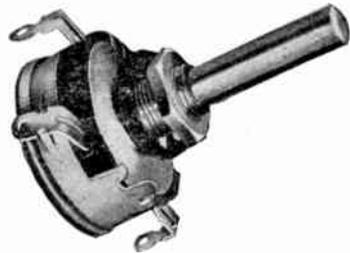

Plain metal cap readily slips off and switch member slips on in a jiffy. Choice of switches. Furnished with long shaft, lock-nut washer and hex nut.

## TAPPED SERIES "TCP" CONTROLS

These standard tapped controls permit replacement of tapped units with the assurance that the total resistance value and tap satisfactorily match the original.

Many uses can be found for tapped controls, such as the "diode bias" method of controlling volume where the resistance unit is used as a diode load resistor. The additional tap is used to provide an extra A.V.C. voltage of a lower value than the main A.V.C. source.

Cat. No.	Resistance	Tapped at
TCP-42	250,000	125,000

Attenuators, etc.  
Plug-in Resistors, Line-  
Voltage Regulators, etc.

### POWER RHEOSTAT

#### SERIES PW-25 AND PW-50

Designed for performance and durability. Constructed for extra long life at the rated current loads. Besides giving the maximum current at total resistance, CLAROSTAT also gives you the maximum current up to 1/3 total resistance.

PW-25 and PW-50 rheostats provide for single hole mounting. Adjustable locking pin, provides for anchoring against rotation of rheostat when mounting to panel.

Shaft and bushing are insulated from contact carrier arm; allows for mounting on metal panel without the use of insulating washers. Resistance wire (Bare and Bright) is wound on an insulated aluminum form which is firmly imbedded into gray ceramic case with special inorganic cement.

Rheostat has 300 degrees rotation • All stock rheostats have 3/8" bushing and 1/2" shaft • Diameter 1 1/8" • Depth behind panel 1 1/8".

These power rheostats can be furnished in tandem on special order. Complete information and prices on special types can be furnished upon request.

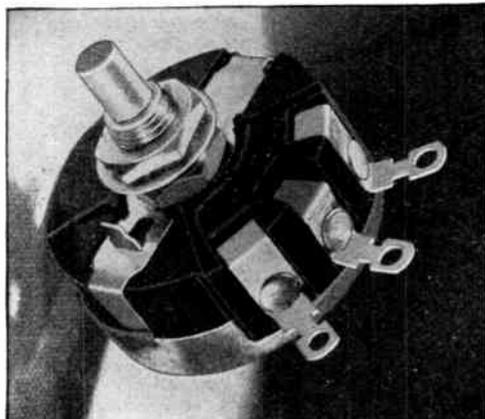

#### Series PW-25 Power Rheostats—25 Watt

### WIRE-WOUND SERIES "58" CONTROLS

CLAROSTAT is the logical choice. Particularly so for highly critical work—in electronic equipment, delicate instruments, amplifier and gain control, etc. Selected alloy wire precisely wound on thin bakelite strip.

Perfect sliding contact by means of special alloy contact shoe, together with use of exclusive winding lubricant.

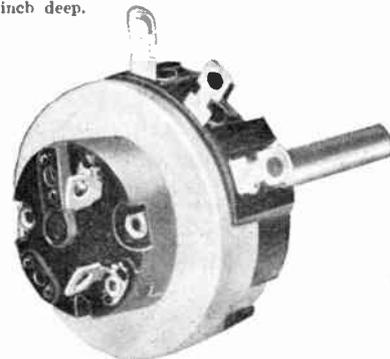

Humidity, temperature and age have but a negligible effect on these controls.

Stop to limit rotation is independent of sliding contact member, and is securely fastened to shaft. Bushing of brass. Shaft of special alloy. No tendency to "freeze" or bind.

Linear resistance controls rated at 3 watts.

Resistance	Taper		List Price	Net Price
5,000	S	Std. Pot.	\$1.00	\$0.60

## CONSTANT IMPEDANCE CONTROLS — "T" PADS, "L" PADS

When high quality reproduction of sound is required in public address, broadcast transmission, sound recording, projection and multiple outlet reproduction systems, care must be taken in the selection of volume controls or attenuators to eliminate distortion which arises from the mis-matching of impedances.

Volume controls or attenuators for this purpose must, therefore, be of the constant impedance type; that is, the input or output impedance, with the associated apparatus in the circuit, must remain within the limits of a required constant value.

For such requirements, Clarostat lists two types of controls, each designed for a particular usage.

## UNIVERSAL METAL-TUBE RESISTORS

LIST PRICE \$1.00

NET PRICE \$0.60

The Universal Resistor Tube will operate any AC-DC set within the voltage ranges specified on the tube, regardless of what pilot current is drawn or any pilot lamp combination. The tube will operate regardless of pilot lamp or lamps burning out, operating well within the .3 ampere range required for the filaments of the tubes. Should pilot lamps burn out, the current will still be within range for efficient operation of tubes. Regardless of line voltage variation, the tube will operate efficiently.

Plug-in Resistors, Line-Voltage Regulators, etc.

## AUTOMATIC LINE VOLTAGE REGULATORS

Designed for use with 110-volt socket power radio sets not equipped for line ballasts. At 110 volts, the resistance of the units is low and the voltage drop across them is negligible. As the line voltage increases, however, the resistance of the units increases with a consequent increase in voltage drop across

them, keeping the voltage across the primary of the power transformer of the set practically constant, even though the line voltage may increase up to 140 volts.

To install this unit, all that is necessary is to insert the usual attachment plug of the radio set into the slots provided in the top. Then insert the prongs of the unit into the slots of the usual screw type plug or convenience outlet of the electric light system.

LIST PRICE \$1.00

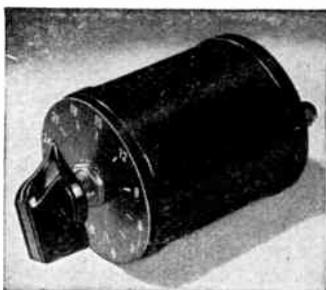

NET PRICE \$0.60

Dimensions are 1 3/4" in diameter, 1 1/2" in length; prongs are 3/8" long.

E*	100	60 to 100 Watts	

\*Note: For use with 120 volt receivers.

## CONSTANT IMPEDANCE OUTPUT ATTENUATOR Series CIB—10 Watts

A compact, inexpensive unit that will dissipate 10 watts in any position. Operates noiselessly without distortion. Recommended as an individual loud-speaker control.

Linear attenuation in 3 db steps up to 30 db and then final step to infinity. Insertion loss is zero. DB steps are 3 db, 6 db, 9 db, 12 db, 15 db, 18 db, 21 db, 24 db; a step of 6 db making total of 30 db.

Unit measures 2" in diameter and 2 3/4" long. 1 hole mounting 3/8" bushing, shaft, 1" length.

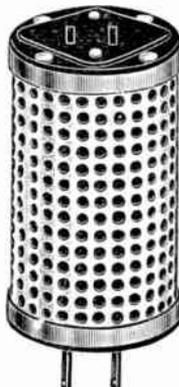

### Standard Impedances Available

8 ohms, 15 ohms, 50 ohms, 200 ohms, 250 ohms, 500 ohms.

Unit not equipped for switch; furnished with dial plate and knob.

NET PRICE: \$6.50

## CLAROSTAT REPLACEMENT LINE BALLASTS

Designed to meet the requirements of the old type receivers listed. These receivers have been designed to include a Line Ballast and are provided with sockets into which the Clarostat Line Ballasts can be inserted.

Clarostat Line Ballasts will maintain the normal voltage across the primary of the power transformers of these sets within the allowable limits for efficient operation in spite of line voltage fluctuations over a range from 95 to 135 volts.

The body dimensions are 1 3/4" in diameter and 3 1/8" in length.

## "The Famous Greenohms"

### WIRE-WOUND FIXED POWER RESISTORS

Only after studying all types of available power resistors, analyzing their advantages and drawbacks alike, have Clarostat engineers felt justified in presenting this line. It will be found to answer the demand for more rugged resistors for exceptionally severe service.

These units are manufactured and rated strictly in accordance with R. M. A. Standards and will operate at full wattage rating. Construction and conservative ratings make them the ideal replacement power resistors in radio servicing, and in broadcast and amateur service. Also ideal for electrical and industrial applications.

## POWER RESISTOR DECADE BOX

Intended primarily for laboratory use and development work generally—simplifies and expedites selection of correct resistance values. Many of these instruments are now being used in laboratories, engineering offices, plants, maintenance and service departments, and in schools.

**Application:** When accurately predetermined steps of resistance value are desired, as in calibrating or testing operations, in bridge circuits or experimental work, the Clarostat Power Resistor Decade Box provides a ready means for obtaining exactly the resistance value desired, under actual operating conditions.

Instead of lengthy mathematical calculations—with the usual guessing included—the power resistor decade box permits of trying out the actual resistance values.

**Resistance Range:** 1 ohm to 999,999 ohms in steps of 1 ohm.

**Tolerance:**

Decade No. 1	5%	Decade No. 4	2%
Decade No. 2	2%	Decade No. 5	2%
Decade No. 3	2%	Decade No. 6	2%

**Power Rating:** Each decade will dissipate 225 watts at a maximum of 1000 volts. A grille at bottom and louvres at sides and top provide adequate ventilation for heat dissipated by the resistors under load.

**Resistance Elements:** Clarostat "Greenohm" resistors are used throughout. Cement-coated power wire-wound resistors, wound with bare and bright special alloy resistance wire on non-hygroscopic ceramic tubes. Resistors mounted on rigid metal supports.

**Finish:** The heavy gauge metal case of the decade box is finished in frosted gray wrinkle, with etched black and aluminum front panel. Baffle plate protects the switch assembly from the heat.

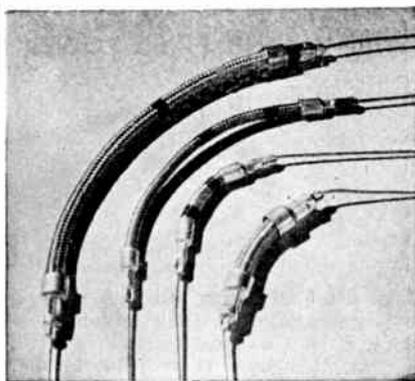

**Dimensions:** 13" long, 8½" deep, 5¾" high; weight 11 lbs.

**Suggested Uses:** Resistance Determination—Load Resistance—Meter Multiplier—Calibrating Meters.

**Maximum Current Rating: Per Decade:**

No. 1	5 Amp.	No. 4	.15 Amp.
No. 2	1.5 Amp.	No. 5	.05 Amp.
No. 3	.5 Amp.	No. 6	.005 Amp.

**NET PRICE \$70.00**

## GLASOHMS\* — FIBRE-GLASS RESISTORS

Clarostat Glasohms or fibre-glass power resistors are now available through the jobbing trade, in standard units to meet popular requirements.

Especially desirable in point-to-point wiring jobs where a handy, inexpensive, stable wire-wound resistor is required. Self-supporting. Bare wire terminals. Also ideal for building step-by-step rheostat or resistance box, attenuators, instruments in general, voltage-dropping banks and voltage dividers, etc.

Glasohms can be used as small heating elements for such applications as soldering irons, hair curlers, oscillating crystal oven heaters, etc. Unit can be wrapped closely around metal to be heated, or packed into tightly-fitting case. Contact with metal members, for greatest thermal efficiency.

# PRESENTS A STREAMLINED WARTIME LINE TO SPEED CRITICAL CIVILIAN SERVICING

Every IRC item cataloged on the following pages has been carefully selected with the welfare of the servicemen uppermost in mind.

While current critical material shortages and restrictions make it impossible to manufacture all of the IRC prewar products, this new compact line is a common sense answer to your service needs.

## The IRC "Streamline" Line gives you:

**1. BETTER DELIVERY**—By concentrating any available production on a few selected products IRC expects to provide more resistors and volume controls to the servicemen than at any time previously during the war.

**2. MORE UNIVERSAL USE**—The products listed have been carefully chosen because they may be used satisfactorily to service a wide variety of radio sets. Universal application means more satisfied customers—quicker servicing—more profits for you.

## Type W Wire Wound Controls

A dependable wire wound control of uniform resistance change for power requirements up to 2 watts. Tight, uniform windings assure utmost accuracy. Spiral Spring Connector between rotor arm and center terminal eliminates noise. Diameter  $1\frac{1}{4}$ " ; depth behind panel  $\frac{3}{16}$ " ; shaft length  $2\frac{1}{8}$ " from control face. Illustration shows cover removed, although covers are supplied with controls. Includes new IRC Control Tag.

## Type NAB Parasitic Suppressors

IRC Type NAB Non-Inductive Wire Wound Resistors are designed for use, one in each grid of audio driver or power amplifier tubes when paralleled, to prevent parasitic oscillations. 10 watts.

Type NAB—50 ohms. List 90c each. Net 54c each

## Center Tap Insulated Wire Wounds

Completely enclosed in molded bakelite and capable of standing high temperatures. Due to high power rating, these resistors may be used in balancing circuits for radio receivers or transmitters. They will carry up to five watts if mounted on chassis, using the detachable mounting bracket and heat-dissipating metal strip; or two and one-half watts if mounted in open air. May be mounted anywhere without danger to units from heat or grounding. Dimensions: Length of molded unit 2". With bracket mounting centers  $2\frac{1}{2}$ ". Six standard ranges: 10 ohms, 20 ohms, 50 ohms, 100 ohms and 200 ohms.

Type MW-2J—Center Tap Resistors. List 35c each. Net 21c each.

## Bleeder Resistor

Type M-1034—25,000 ohms, overall resistance, tapped at 7,500, 10,000, 12,500 and 15,000 ohms. 18 watts rating attached flat to chassis, 9 watts free air rating. Used as bleeder in any power supply up to 500 volts. Sealed in bakelite and insulated for 1,000 volts to ground. Bracket supplied.

M-1034—IRC Bleeder Resistor. List \$1.25 each. Net 75c each.

# INSULATED RESISTORS

*Preferred for Performance*

## NEW!...IMPROVED TYPES

**NEW!**

### Type BTS Insulated Metallized Resistor (1/2 Watt)

40% shorter in length!  
1/3 smaller in diameter!

1 1/4" x 1/8"—470 ohms to 22 meg-ohms. 350 volts maximum.

List 13c each, Net 8c each

### Type BT-2 Insulated Metallized 2-Watt Resistor

An industry favorite for dependability!

1 3/4" x 3/16"—470 ohms to 22 meg-ohms. 500 volts maximum.

List 25c each, Net 15c each

**NEW!**

### Type BTA Insulated Metallized Resistor (1 Watt)

42% shorter!  
A real space saver!

3/4" x 1/4"—330 ohms to 22 meg-ohms. 500 volts maximum.

List 17c each, Net 10c each

## AMERICAN WAR STANDARD QUALITY IN BT RESISTORS

For years famous "Metallized" BT resistors have been the standard of the industry and are used by our Army and Navy in all types of electronic war equipment. Although much smaller in size, the new BTS and BTA have all the excellent characteristics of the former Types BT-1/2 and BT-1.

Completely insulated with bakelite, Type BT Resistors are unexcelled in such essential characteristics as stability, low-noise level, low voltage coefficient, mechanical strength, moisture-proof protection and insulation. Insulation breakdown voltage of Type BTS is 750 volts to ground; all other BT's, 1000 volts. Standard tolerance  $\pm 10\%$ . Special  $\pm 5\%$  tolerance at higher cost.

## TYPE BW INSULATED WIRE WOUND RESISTORS

New low prices on BT resistors also extend to include the Insulated Wire Wound BW units. These resistors, furnished with same insulation as famous BT Resistors, are constructed with wire resistance element wound tightly around special insulated core. Unexcelled for jobs such as meter shunts and multipliers (where precision is not a factor); cathode biasing, decoupling, series air cell battery use. Standard tolerance  $\pm 10\%$ . Special  $\pm 5\%$  tolerance available at higher cost.

### BW-1/2—1/2 WATT

5/8" x 3/16". 0.47 to 820 ohms. List 15c ea. Net 9c ea.

### BW-1—1 WATT

1 1/4" x 1/4". 0.47 to 4,700 ohms. List 17c ea. Net 10c ea.

### BW-2—2 WATTS

1 3/4" x 2/16". 1.0 to 6,800 ohms. List 25c ea. Net 15c ea.

## NEW!...LOWER PRICES

New mass production methods applied to the manufacture, stocking and packaging of Types BT and BW Resistors for servicemen makes possible new lower prices on these types. This price reduction is consistent with IRC's progressive policy of offering, at all times, the best values on the market.

# INSULATED RESISTORS

*Preferred for Performance*

## NOW!...RMA RANGES

Standardizations pays dividends! It has proved its worth on both the fighting fronts and the home front. It can be an important profit factor for you, too.

The great majority of manufacturers were quick to see the advantages in standardization and adopted the RMA Preferred Ranges some years ago. IRC has pioneered standardization of resistors because close contact with the radio industry has convinced us that such standardization is not only desirable but absolutely essential to carry out the tremendous postwar development and production program of the industry.

This new IRC policy will speed service during the War and help servicemen prepare for better, faster

and more profitable business after the War.

Type BT and BW Resistors, in 10% tolerance, are carried in stock in the RMA ranges listed below. Figures in heavy type are the standard RMA 10% tolerance values. Using 10% tolerance BT's and BW's, these 93 ranges give complete coverage of all values with the smallest resistor stock. Standardization of your stock on these values is recommended for economical, complete coverage, faster turnover . . . more profit for you!

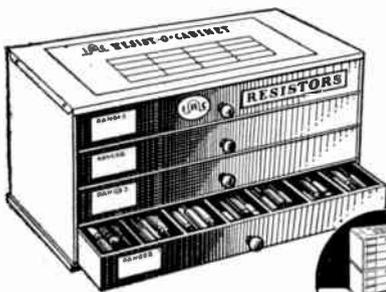

However, the intermediate values listed below also are carried in the IRC stockroom, so that every RMA value is available to servicemen when desired.

### JOBBERS' STOCK IN PREFERRED RMA RANGES

Subject to the minimum and maximum values for each of the various types of BT and BW Resistors.

### All Metal RESIST-O-CABINET

End Cigar Box Confusion—  
Keep Your Resistors In Order!

The sturdy, all-metal IRC Resist-O-Cabinet is specifically designed to hold resistors systematically and safely without the bending of leads. It puts an end to "cigar box confusion!" Its four "non-spill" drawers have seven ample-sized compartments in each which readily accommodate resistor sizes from 1/2 to 10 watts.

Attractively finished in blue, yellow and silver. Ohm's Law formulas neatly and permanently lithographed on top of cabinet for handy reference. Cabinet measures 11" long, 5 1/2" high and 5 1/2" deep. Bases of Resist-O-Cabinets are arranged for stacking so that several cabinets may be used to increase stock capacity. This handy Resist-O-Cabinet is FREE with the purchase of any of the three well-balanced IRC resistor assortments listed. (Cabinet is not sold empty.)

#### ASSORTMENT No. 1—59 Resistors

Type BTS—One each 1,000, 4,700, 10,000, 27,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type BTA—One each 39,000, 68,000 ohms; 0.15, 0.22 megs. Two each 1,000, 1,500, 2,200, 2,700, 4,700, 15,000, 27,000 ohms; 1.0, 2.2 megs. Three each 10,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type AB 10 Watt—One each 1,000, 1,500, 2,500, 5,000 ohms. Two each 10,000 and 25,000 ohms.

Type ABA, 10 Watt Adjustable—One each 1,000, 2,500, 5,000, 10,000.

List price of Resistors, \$15.03. Net Price \$9.02 (Cabinet Free)

#### ASSORTMENT No. 2—100 Resistors

Type BW-1/2—Two each 47, 100, 270 ohms.

Type BTS—Two each 3,300, 6,800, 33,000, 68,000, 82,000 ohms; 0.22, 0.33 megs. Three each 470, 1,500, 15,000, 22,000, 39,000 ohms; 0.15, 1.0, 2.2 megs. Five each 2,200, 2,700, 27,000 ohms; 0.27 megs. Six each 1,000, 4,700, 10,000, 47,000 ohms; 0.1, 0.47 megs.

List price of Resistors, \$13.12. Net Price \$7.87 (Cabinet Free)

#### ASSORTMENT No. 3—83 Resistors

Type BW-1—Two each 47, 100, 270 ohms.

Type BTA—Two each 470, 1,500, 2,700, 3,300, 6,800, 33,000, 39,000, 68,000, 82,000 ohms; 0.15, 0.22, 0.33, 1.0, 2.2 megs. Three each 15,000, 22,000, 27,000 ohms. Five each 1,000, 2,200, 4,700, 10,000, 47,000 ohms; 0.1, 0.27, 0.47 megs.

List price of Resistors, \$14.11. Net Price \$8.47 (Cabinet Free)

### IRC Resistor Color Code Chart

This new IRC Standard RMA Resistor Color Code Chart (handy 3" x 5" size) includes both old and new style codes, tolerance designation, ruler and the various Ohm's Law formulas—all on a handy, pocket-size Pyralin card. 5 cents Net or FREE with purchase of 5 IRC Resistors.

*Preferred for Performance*

## NEW!...THE "CENTURY" LINE

### 100 IRC CONTROLS FOR UNIVERSAL SERVICE

You can buy no better engineered—more dependable controls for your service needs than the IRC Type D. These universal precision units are small enough to fit most anywhere, husky enough to replace much more cumbersome, bulky types and embody all the features that make for satisfaction on the job. Only IRC controls bring you these four outstanding quality features:

1. METALLIZED ELEMENT—harder, smoother, moisture-proof, permanent.
2. FIVE FINGER CONTACTOR—assures positive, more uniform contact.
3. SILENT SPIRAL CONNECTOR—a positive connection between contactor and its terminal.
4. STEEL COIL SPRING THRUST WASHER—eliminates shaft wobble and end-play.

### 56 UNIVERSAL TYPE D CONTROLS

For miscellaneous service needs, 56 all-purpose controls are available for use with the popular IRC tap-in shafts. An A shaft is included with each control and shafts B, C, D, E, F and G may be had at slight extra cost as needs require.

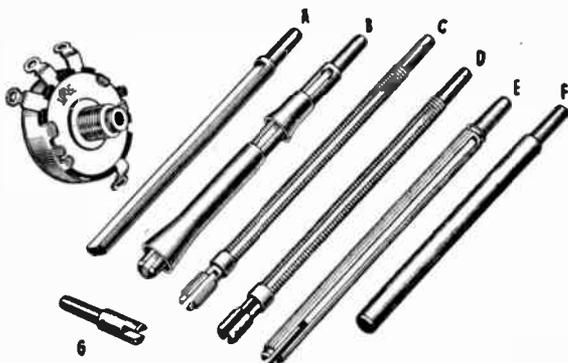

Each D Control accommodates any of the seven Tap-in Shaft types shown. Shaft flats may be located in any position. A few extra shafts greatly increase the utility of your D Control stock at a small investment. Of unusual convenience is the "Double-Flatted" A shaft, included with each D Control. Accommodates popular push-on knobs requiring either  $\frac{1}{8}$ " or  $\frac{3}{16}$ " flats and all set-screw knobs without filing of shaft or use of inserts. Dimensions:  $1\frac{1}{8}$ " x  $\frac{1}{2}$ ".

Single Control—Without switch .....List \$1.00 Net \$0.60  
Tapped Controls—Without switch .....List 1.50 Net .90

Prices include Shaft A packed with each control

#### Easily Installed "Tap-in" Shafts

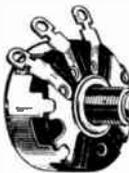

Type B—List \$0.85, Net \$0.21  
Types C, D, E, F, G—List \$0.25, Net \$0.15

### 16 POPULAR DS TYPES

With Fixed Shafts

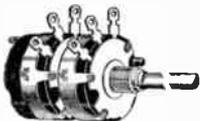

These sixteen numbers have been the most frequently called for and are furnished with fixed shaft for convenient, easy use. Dimensions:  $1\frac{1}{8}$ " x  $\frac{1}{2}$ ".

Single Control—Without switch, List \$1.00, Net \$0.60  
Tapped Controls—Without switch, List \$1.50, Net \$0.90

### 7 DUAL CONTROLS

Seven popular Dual Controls are included in IRC's new Century Line. Here is a small but carefully selected group of "duals" that will speed many an important repair job! Standard No. 20 series switches can be attached.  $1\frac{1}{4}$ " x  $1\frac{1}{4}$ ".

List price \$2.50 each, Net \$1.50 each

### 8 CLUTCH-TYPE DC CONTROLS

With Fixed Shafts

Practical for auto radio use and many other applications. Controls have friction clutch drive-arm and are equipped with a special shaft for use where either a slotted or tongued type shaft is required. Instructions tell how to cut shaft for either application. Switches cannot be used with friction clutch controls. Size same as Type D.

List Price \$1.50 each, Net \$0.90 each

### 2 TYPE S SPECIAL POWER CONTROLS

With Tap-in Shafts

Designed for power requirements of plate circuit tone controls, Type S Controls should be used where the audio output exceeds 2 watts.  $1\frac{1}{4}$ " in diameter, they employ the Tap-in Shaft feature. Use No. 20 series switches listed on the following page.

List price \$1.00 each, Net \$0.60 each

### 11 TYPE J CONTROLS FOR SPECIAL APPLICATIONS

For a wide variety of sets with specific requirements, you'll find these eleven numbers extremely useful. To play safe your stock should include at least one of each. (See list of Type J Controls, uses and prices on Page L-16.)

**THESE 100 CONTROLS TAKE CARE OF OVER 90% OF YOUR SERVICE REQUIREMENTS**

### 11 CONTROLS with FIXED SHAFTS for SPECIFIC SERVICE USE

See Page L-16 for complete list of Type J controls, uses and prices.

### 8 STANDARD TAPERS

A—Used as potentiometer or rheostat in any circuit where uniform resistance change is required.  
 B—A semi-logarithmic curve used as tone control or audio circuit control.  
 C—A logarithmic curve. Used as audio circuit control or antenna shunt control.  
 D—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is of prime importance in controlling volume.  
 E—Used as a rheostat in cathode circuit to control grid bias.  
 F—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is essential in controlling volume. Generally used where the control changes the

grid bias of only one or two tubes. Must not be used with heavy currents.  
 G—A logarithmic curve with very gradual change in resistance from left terminal. Used as audio circuit control or antenna shunt control.  
 H—A tapped logarithmic curve used as audio level control for automatic bass compensation.

## Master Radiotrician's CONTROL CABINET With Type D Universal Controls

The IRC Control Cabinet with its practical stock of Type D Controls, Switches and Shafts is the greatest step toward standardization of replacement controls ever introduced. Now popular among thousands of servicemen and dealers, it will save you time by furnishing required replacements when you need them. It saves you money by eliminating special trips for needed controls and often eliminates more costly exact duplicates. It enables you to reduce your inventory, step up your turnover, and increase your profits.

### Specified for Over 10,850 Models!

Definitely proved by IRC sales records to handle up to an average of 87% of all control replacements, you will find the control types included are recommended for over 10,850 models in the new IRC Volume Control Replacement Manual! The comprehensive replacement utility of this practical stock, together with the enviable reputation of Type D controls for quiet, trouble-free operation and lasting dependable service, will definitely solve your control problems.

### HERE IS WHAT YOU GET!

The IRC Master Radiotrician's Cabinet is factory-packed with the following 18 Type D Controls, switches and special shafts.

IRC Control Type No.	Resistance	Purpose	IRC Control Type No.	Resistance	Purpose
2—D13-133	500,000	A	1—D13-133X	500,000	F
1—D11-116	10,000	B	1—DC13-133X	500,000	G
1—D11-123	50,000	C	1—D13-137	1.0	A
1—D11-128	100,000	C	1—D13-137X	1.0	F
1—D11-133	500,000	C	1—D13-139	2.0	A
1—D13-123	50,000	D	1—D13-139X	2.0	F
1—D13-128	100,000	A	1—D14-116	10,000	H
1—D13-130	250,000	A	1—D16-119	20,000	B
1—D13-130X	250,000	E			

A—Tone or Audio Circuit Control. B—Antenna Grid Bias Control. C—Potentiometer Voltage Divider. D—Tone Control. E—Tapped for A.V.C. F—Tapped for Tone Compensation. G—Friction Clutch Auto Radio Type. H—Antenna Grid Bias of 2 Tubes.

Switches: 5—No. 41 S.P.S.T.; 1—No. 42 D.P.S.T. Shafts: 1—Type B Auto Radio; 2—Type C with slotted, knurled terminals; 2—Type D with slotted, unknurled terminals.

List price of 18 Controls, 6 Switches, 5 Special (extra) Shafts, \$24.95

**NET PRICE \$14.97 — THE CABINET IS INCLUDED FREE!**

## Attractive All-Metal Cabinet Included FREE

The IRC Control Cabinet is of sturdily-built all-metal construction and attractively finished in blue, yellow and silver. It provides individual compartments for 20 IRC Controls; 18 compartments indicate the control types included—you see at a glance what types should be reordered. Three handy drawers accommodate switches, special shafts, and spare parts. The hinged front cover snaps securely shut, so the cabinet may be carried in your car or truck, or may be removed entirely for shop use. Cabinet measures 14 1/2" long, 7 3/8" high, and 4 1/2" wide. Base is arranged for stacking where additional cabinets are required. This handsome cabinet is furnished FREE when packed with the IRC Type D Controls, Switches and Shafts indicated at the right.

## 11 IRC TYPE J CONTROLS FOR MANY SPECIAL REQUIREMENTS!

IRC sales records show that these 11 most popular special controls will handle nearly one-third of your requirements for exact duplicate controls. The group includes concentric duals, and special shaft units. For a more complete stock, carry at least one of each:

DJ-4—2.0 meg (tap 500M ohms)/1.0 meg. RCA: RC-351, A, B, C, D, E, F, M, R, RC-352, A, B, C, RC-386, B ch. Sears-Roebuck: 126.208 Ch. Westinghouse Elec. Supply: WR-264.  
List \$3.00, Net \$1.80

DJ-5—2.0 meg/1.0 meg. Zenith: 5637, 5803 Chassis (Dual Control).  
List \$3.00, Net \$1.80

J-15—32M ohms. Stewart-Warner: R-100A, B, E, (AC) (Note 15), 950 series (AC) (Note 15).  
List \$1.50, Net \$0.90

J-107—10M/50M ohms. General Electric: T-41 (Note 3). Graybar: GB-678 (Note 3). Pilot: K-117. RCA: R14, R15, RE17 (Note 3), 42 (Radiola), 48 (Radiola) (Note 3). Westinghouse Elec. & Mfg.: WR-4.  
List \$2.50, Net \$1.50

J-127—3800/3800 ohms. RCA: R32, RE45, R52, RE75, 145.  
List \$2.50, Net \$1.50

J-210—13M ohms (tap 3M ohms). General Electric: J-80, J-85, JZ-835, K-62, KZ-62P, K-82, S-132. Graybar: GT-8, GB-9, GC-14, GR-999. RCA: R8, R10, R11, R12, RE18, RE18A, RE19, R21, R023, RAE26. Westinghouse Elec. & Mfg.: WR-15. Westinghouse International WR15A, WR18.  
List \$1.50, Net \$0.90

J-296—225M/5M ohms. Philco: 70, 70A below B22,000, 90, 90A (Two 45's), 270, 270A, 370, 470, 470A, 570. List \$2.50, Net \$1.50

J-777—850M ohms. Chrysler: C1423. Ford: T9, FT9, FT9X, F1440, F1442. Graham: G1418, G1435. Lincoln: L1420, L1424, L1425, L1427, L1429, L1460. Studebaker: T12-ST12, T15-ST15, S1431, S1437, S1516. Willys Overland: W1419.  
List \$1.50, Net \$0.90

J-823—150M/250M ohms (Tap 125M ohms). General Elec.: A-82, A-86, A-87.  
List \$2.50, Net \$1.50

J-843—350M ohms (tap 75M ohms). Chrysler T10-CT10, T11-CT11, C1450, C1452. DeSoto: T10-CT10, T11-CT11. Dodge: T11-CT11. Hupmobile: HT11X. Lincoln: LT 14X3. Packard: T14-PT14, P1422, P1430, P1432 H, P1439. Pierce-Arrow: T14-MT14X4. Reo: T11-CT11, T14-R14X.  
List \$1.50, Net \$0.90

J-1002—2.0 meg (tap 5M ohms). General Elec.: F70, F75, F80 (Note 4), F81, F85 (Note 4), F86, F88 (Note 4), FE82, FE87 (Note 4), J-1002 (Note 4 and add switch). General Elec.: F63, F65, F66, F74, F77.  
List \$1.50, Net \$0.90

**List Price of 1 each of above controls \$23.50**

**YOUR NET COST—\$14.10**

(Order as "11—Group A, IRC Special Controls")

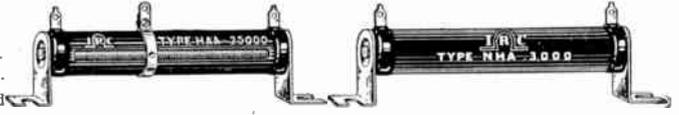

# POWER RESISTORS

*Preferred for Performance*

## "PREFERRED FOR PERFORMANCE"

Not only do these famous resistors excel electrically, but their "climate-proofed" cement coating provides the most dependable protection yet devised for resistors for heavy duty work. Both fixed and adjustable types are available. Mounting Brackets are packed with all resistors from 25 watts and up. One Adjustable Band is furnished with each adjustable resistor. The new Type X Band (described below) is included as standard on units of 25 watts and above. Extra bands supplied at prices indicated.

### FIXED TYPES

# RESISTORS

*Preferred for Performance*

## PRECISION Wire Wound RESISTORS

IRC Precision Wire Wound Resistors are scientifically designed and constructed of highest quality materials to combine the utmost in accuracy with dependability. Winding forms are of a non-hygroscopic ceramic having high insulation qualities, high mechanical strength and low-coefficient of expansion. Because of the special sectional construction which permits the winding of adjacent sections in opposite directions, a noninductive winding is made possible. This insures constant resistance at all frequencies up to 50,000 cycles.

These units are used by the leading instrument manufacturers for dependable precision meter multipliers and shunts, decade boxes and calibrated gain controls. 1% accuracy is standard. Closer tolerances available at slightly higher prices as follows: for 1/2% tolerance, add 10%; for 1/4% accuracy, add 15%; and for 1/10 of 1%, add 25% to list prices.

	WW-4		WW-1	
	List	Net	List	Net
0.1, 0.5, 1, 10, 25, 50, 100, 200, 250, 300 and 500 ohms	\$0.85	\$0.51	\$1.15	\$0.69

2.0 meg.			10.00	6.00
2.5 meg.			12.50	7.50

For list prices of odd ranges not shown, use same price as given for next higher range. Type WW-3 (1/8" x 1 1/4") with wire leads or lug terminals obtainable on special order at same price as WW-4. Made in all ranges from 1 ohm to 0.15 meg. WW-4 and WW-5 with wire lead terminals instead of lugs are available on special order at no increase in cost.

### Special Precision Resistor Types

In addition to those listed here, IRC offers a complete line of 14 Precision Resistor types in sizes, shapes and terminals for every need. See your distributor or write for details.

## IRC VOLUME CONTROL REPLACEMENT MANUAL

Edition No. 3 (With Supplement No. 1)

Large 8 1/2" x 11" size with 136 pages lists one-third more models. Includes original manufacturers' part numbers, Rider's schematic reference and special shaft requirements. Models and chassis cross-indexed. Trade and brand names in logical alphabetical order. Pages lettered for quick reference. The most comprehensive handbook of control replacement ever attempted.

Price 10 cents

## ALL-METAL RHEOSTATS

PR-25 (25 Watts)  
1 1/4" diam. Depth behind panel, 1 1/4"  
PR-50 (50 Watts)  
2 1/2" diam. Depth behind panel, 1 3/8"

Operating temperatures are cut almost in half by the unique, all-metal aluminum construction of these new IRC Rheostats. They dissipate heat more rapidly—give ample safety factor. Ratings based on hottest spot temp. rise of only 140 degrees C. with max. load distributed over entire element. With full load applied to as little as 25% of element, rise is only 160 degrees C. Exclusive IRC Spiral Connector gives positive contact between rotor arm and center terminal.

## ATLAS HEAVY-DUTY IRON-OXIDE COATED NON-INDUCTIVE TRANSMITTING BLEEDER RESISTORS WITH CENTER TAP

### 4 or 8 Sections

Ruggedly built, accurately made and procurable in a practical non-inductive winding. Atlas high voltage bleeder resistors are designed to improve the performance of your transmitter by functioning quietly and effectively.

A most important feature found only in Atlas heavy duty bleeder resistors is the non-inductive winding. Each side of the center tap has two to four oppositely wound sections of equal resistance. Therefore should only one section be used, that section will be purely non-inductive as well.

Used for Grid Leaks as Well as for Bleeders by  
**AMATEUR SHORT-WAVE AND BROADCAST STATIONS**  
 Specify whether you want Inductive or Non-Inductive Bleeders  
**EQUIPPED WITH HEAVY MOUNTING BRACKETS**

# ATLAS RESISTORS

## Atlas Heavy Duty Adjustable Voltage Dividers

### S-I-X OUTSTANDING REASONS W-H-Y

You Get Far More for Your Money When You Buy Atlas Variable Resistors . . .

- 1—Fully pack wire wound—not space-wound
- 2—Heavier wire and more of it—full safe wattage rating
- 3—Heavy duty iron-oxide coating—safely dissipating high heat
- 4—One band supplied free with every resistor
- 5—Accurately wound resistance values—well within 5% tolerance
- 6—Large, oversize non-hygroscopic tubing—affording plenty of area for heat dissipation

All Adjustable Resistors Are Supplied with

Mounting Brackets at No Extra Charge

# CONTINENTAL RESISTORS

## CONTINENTAL Carbon Composition Insulated Resistors

M2-2 WATT

M1-1 WATT

M 1/2 - 1/2 WATT

M 1/4 - 1/4 WATT

### CONTINENTAL M-Type

#### Insulated Composition Resistors

The M-Type resistor with axial leads consists of a solid molded carbon core with molded-in leads. An outer insulating shell surrounds the carbon core and is impregnated with a waterproofing compound to seal the unit against humidity. These resistors, being well insulated, can be mounted side by side or against any metal surface without shorting or grounding. They are recommended where space limits and insulating quality require a rugged reliable and small resistor capable of withstanding severe service. All sizes made in the standard stock values.

Type	Wattage	Size	List Price	
			±5%	±10%
M 1/4	1/4 Watt	1 3/32" x 5/32"	\$0.25	\$0.15
M 1/2	1/2 Watt	5/8" x 7/32"	.25	.17
M 1	1 Watt	7/8" x 9/32"	.30	.20
M 2	2 Watt	1 1/16" x 1 1/32"	.40	.30

Type M 1/4 supplied with No. 21 tinned copper wire leads 1 1/2" long; all other M types supplied with No. 20 wire.

D5ST2-5 WATT

D5-5 WATT

D3-3 WATT

### CONTINENTAL D-Type

#### Insulated Composition Resistors

The D-Type resistor with radial leads is made with solid molded carbon rods, copper sprayed on the ends to which are soldered No. 18 copper tinned leads. The soldered contact construction gives a resistor noise-free and stable. They are known as the heavy duty type units because of their size—having a larger radiating area they operate safely on overloads. A baked-on insulation is a protection against shorts to subpanel and wiring.

Type	Wattage	Size	List Price	
			±5%	±10%
D 3	3 Watt	2" x 3/8"	\$0.50	\$0.30
D 5	5 Watt	3" x 9/16"	.75	.50
D 5ST2*	5 Watt	3" x 9/16"	1.25	1.00

\*D5ST2 units have heavy copper eyeletted and soldered strap terminals 3/8" wide with holes of 2 1/8" spacing. The outer holes can be used with either 6-32 screw mounting or solder wire loops, while the inner holes are for 8-32 screw mounting. The outer section of the terminal can be cut off or bent to any angle desired.

One Large 4-Drawer Imitation Leather Cardboard Cabinet and One Valuable Resistor Chart that tells what resistor to use with purchase of 70 Continental Certified Resistors **FREE**

TOTAL VALUE COMPLETE \$15.95—YOUR PRICE \$7.77

You get a four-drawer resistor cabinet 10" x 6" x 7" finished in olive green with a big stiff cardboard wall chart which solves every problem in Ohms Law at a glance. The chart is an invaluable aid in resistor service problems as are Continental Certified Resistors.

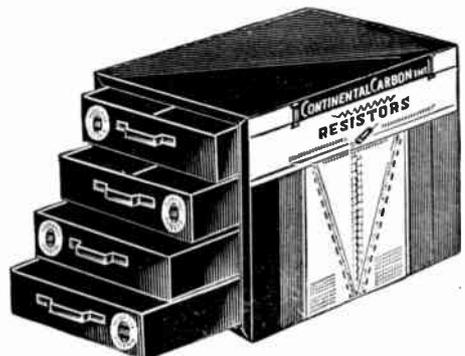

One each of these 35 resistors in 1 watt and 1 each in 1/2 watt supplied in the following values:

150	1,000	2,500	5,000	10,000	20,000	50,000	150,000

# CONTINENTAL RESISTORS

## X-Type Resistors

After several years of research work CONTINENTAL engineers have developed a new resistor involving the metal film principle, having the accuracy of a wire wound unit. Absolutely no carbon whatever is used in the fabrication of these resistors. The metallic resistance film is formed on the surface of a low loss ceramic tube using a patented pyro-chemical process.

The metal film thus formed is hermetically sealed by a layer of vitreous enamel specially developed and patented by CONTINENTAL. The ceramic tube with its associated film is then spiralled to give a long resistance path and to accurately calibrate the unit to value.

Since the ceramic tubes are hollow they allow a larger surface for heat radiation, thus permitting the resistor to withstand overloads of 200% or better.

The copper-tinned lead terminals are soldered to extremely low resistance metal contact films which in turn are integral with the resistance film, thereby reducing contact resistance to a minimum. This type of construction produces a resistor unit having not only excellent resistance stability but also a negligible noise characteristic.

### Electrical Characteristics of X-Type Resistors

The voltage coefficient, humidity and shelf life characteristics are practically zero and can be disregarded.

The temperature coefficient of resistance is minus 0.0005 per degree Centigrade.

The noise characteristic is very low, being equal to that of wire wound resistors. Noise tests made in accordance with the standard RMA procedure will show a noise level not exceeding one quarter microvolt per volt!

The change in resistance due to normal life load does not exceed more than 0.5% in 1000 hours.

### Fields of Application for the X-Type Resistor

The X-type precision resistor is ideally suited for vacuum tube voltmeters, oscillator and photo-electric circuits where stability of calibration is of utmost importance.

In the meter manufacturing field, where accuracy and stability consistent with low cost are desired, the excellent performance of the X-type resistor cannot be matched.

In high gain amplifier circuits where a low noise level is of paramount importance the X-type resistor, due to its inherent low noise characteristic, can be

relied upon to give unquestioned performance.

This newly developed resistor unit is ideal for high voltage applications. Where the wattage rating is not exceeded, the X $\frac{1}{2}$  type,  $\frac{1}{2}$  watt size, will stand as high as 500 volts AC; the X1, 1 watt size, 1000 volts; the X2, 2 watt size, 2000 volts; and the X5, 5 watt size, 2500 volts.

In the relatively new television field this resistor will be relied upon to perform a myriad of circuit functions in order to insure trouble free performance.

Type	Wattage	Size	Values	List Prices		
				$\pm 1\%$ Tolerance	$\pm 2\%$ Tolerance	$\pm 5\%$ Tolerance

No. 20 tinned copper leads  $1\frac{1}{2}$ " long.

### CONTINENTAL A-Type Precision Carbon Resistors MADE IN ALL STANDARD STOCK RESISTOR VALUES

Available in:

Type A $\frac{1}{2}$ — $\frac{1}{2}$  Watt—1" x  $\frac{1}{4}$ " dia.

Type A1—1 Watt— $1\frac{1}{2}$ " x  $\frac{1}{4}$ " dia.

	List Price
Types A1 and A $\frac{1}{2}$ —Tolerance $\pm 2\%$	\$0.50
Types A1 and A $\frac{1}{2}$ —Tolerance $\pm 5\%$	.30

Also made in Type D1—1 Watt—Ceramic—Tolerance  $\pm 5\%$  .30

A new type of carbon resistor, impregnated, hermetically sealed in glass, impervious to moisture, of the utmost stability. The A Type sets a new high standard of perfection for precision applications. Suitable for any 1-watt or  $\frac{1}{2}$ -watt application, the A type is particularly recommended for high resistance voltmeter multipliers, critical photo-electric circuits which must be extremely stable, and in military and naval applications where the dependability of each component is most vital.

# CONTINENTAL SUPPRESSORS

## AUTO-RADIO SUPPRESSORS AND FILTER UNITS

CONTINENTAL Suppressors have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor—yet do not in any way affect the motor car ignition system.

They have mechanical strength to stand the most severe service. The resistance value has been scientifically determined and is not changed after years of the most adverse conditions. Sparking across the terminals is eliminated by careful shaping of the electrodes and cases.

### Spark Plug Suppressors and Distributor Suppressors, Each—List Price \$0.30

Code S-21 Universal Spark Plug Suppressor— with "U" terminal. 5000 ohms.

Code S-20A Spark Plug Suppressor— For Buick, Packard and Chrysler cars. Takes place of terminal on ignition cable. 5000 ohms.

Code T-24 Distributor Suppressor — Is an angle type with screw in cable. The spring brass insert has two rolled bosses, one to hold suppressor rigid and the other to snap into the groove of the distributor well.

Code S-27 Suppressor—Thread will fit all spark plugs. Most universal type yet devised. Ferrule nut is removable. 5000 ohms.

Code S-19 Spark Plug Suppressor—Snaps on to spark plug. 5000 ohms. Vertical mounting.

### Ford Distributor Suppressor

Code C-11 Cable Suppressor—Meets requirements where it is necessary to cut ignition cable. 10,000 ohms.

Code T-20 Distributor Suppressor—Cable clip snaps into suppressor. 10,000 ohms. Not necessary to remove clip on cable and therefore suppressor can be quickly removed for ignition testing purposes.

Code T-17 Distributor Suppressor—For Ford V-Eights is a Universal Type. The resistor brush is fitted into a bakelite sleeve. The resistor brush can be used on some distributors without the sleeve.

## CONTINENTAL Auto-Radio Filter Condensers

GB05

GB05F

This line of equipment has been specially designed to give the serviceman a means of easily eliminating every cause of noise interference in auto-radio installation—at the actual source of interference.

## CONTINENTAL Paper Condensers FOR REPLACING ELECTROLYTICS IN CARDBOARD AND METAL CASES

CONTINENTAL Carbon Model E condensers are high quality, paper dielectric capacitors built in shapes and sizes equivalent to electrolytic capacitors commonly found in radio receivers. They are flash tested at 3 times their d-c working voltage and have the advantage of low power factor at 60 cycles. They are non-inductive, non-polarized, and are of permanent capacity. No active chemicals are used which could cause corrosion of the foil or leakage. The tabulations at right show the actual capacity in microfarad and the rated sizes of electrolytic condensers occupying the same dimensions. Recommended for use on d.c. and rectified a.c. only. Model E, d-c working volts, 600; peak volts, 1000.

### Data and Prices on Model E Condensers

#### Cardboard Containers Furnished with Six-Inch Wire Leads

# CONTINENTAL FILTERNOYS

## For Elimination of Electrical Radio Interference

Filternoys units reduce or eliminate man-made static! With the development of ultra sensitive receivers, the problem of interference elimination has become a major factor in the sale and servicing of these radios. Vacuum sweepers, electric refrigerators, cake mixers, and other kitchen gadgets, electric shavers, sewing machines, and a host of other items all contribute their share to spoiling good reception. Every buzz, snap, or crackle heard on a new radio lessens the chances of a sale, but these same disturbances open the path for the alert dealer to sell

"noise elimination service" along with the radio—and at a profit!

The offices of doctors, lawyers, dentists, and professional men—where radio provides entertainment and relaxation for waiting clientele—offer a lucrative market to radio servicemen who have the ability to locate man-made radio interference and quiet it with CONTINENTAL CARBON Filternoys devices. Filternoys are simple to install and profitable to sell. Never be without them in stock.

### Filternoys F01DH

**Most Popular and Universal Plug-in Type  
for Radios and Electric Razors**

F01DH

Handy plug-in type suppressor with two r-f chokes, two condensers, and a ground lead for use on electrical devices of 300 watts or less, creating interference of intermittent or temporary character, such as a sewing machine motor, small electric washing machines, electric shavers, drink mixers, cash registers, adding machines, or electric typewriters. Size 2 5/8" by 1 3/8" diameter. 300-Watt capacity on 120 volts, a.c. or d.c.

Filternoys F01DH..... List Price \$1.20

### Filternoys G01DH

**Suppression Type**

G01DH

A wire-in suppressor with dual chokes and two condensers with a grounded frame. Suitable for equipment having grounded frame or a connection to metal BX wiring conduit. For diathermy and dental machines where the G01DH unit may be mounted within the interfering device and for small motors of exhaust fans, pumps, and compressors. Size 2 1/4" by 1 1/4" diameter, 6-inch leads, 300 watts, a.c. or d.c., 110-130 v.

Filternoys G01DH..... List Price \$1.20

### Filternoys G01D and G14T

**Designed to Be Mounted Directly on Small Electrical Devices**

Filternoys Diverter G01D—Dual capacitors in a grounded container for any size electric motor operating on 120 v. or less. Through making use of the field coils as chokes, this is a most effective method to silence a noisy a.c. or d.c. motor. Size 2 1/8" by 3/4" diameter.

G01D..... List Price \$0.60

Filternoys Diverter G14T—Triple capacitors in a circuit which permits its use with all hand-operated motor driven devices without danger of shock. Particularly applicable to vacuum cleaners, flat-irons, etc. Size 1 1/2" by 5/8". Flexible leads for direct connection.

G14T..... List Price \$0.60

### Oil Burner Suppressor

Filternoys Suppressor OB15, carbon element type, intended for use only with the high tension spark ignition of oil or gas burning heating systems. Must be connected in series with each line to the spark gap. Size of the suppressor 3 1/2" x 1 1/8" diameter. Universal connections at both ends for solderless contact.

OB15..... List Price \$1.80

### FREE! Attractive Counter Display Card with 24-F18 Filternoys

Code 24-F18—List Price \$14.40

Filternoys Diverter F18 is a compact 0.1 mfd capacitor in a conveniently small bakelite plug-in coupler for use across domestic power lines in which the neutral wire is grounded. The capacitor diverts interference from the high potential side of the power line to the grounded neutral side. Use on floor or table lamps, cigarette lighters, and the radio.

F18..... List Price \$0.60

### EXPLANATION OF TAPERS

Taper Number 1 is a modified logarithmic left hand taper in the carbon type of control and an approximation to this logarithmic taper in the wire wound type. This taper should always be used in shunt circuits as in usual antenna and audio circuits, or where only the center and left hand terminals are used.

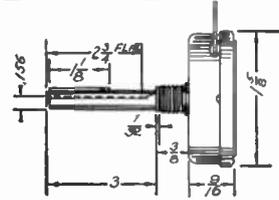

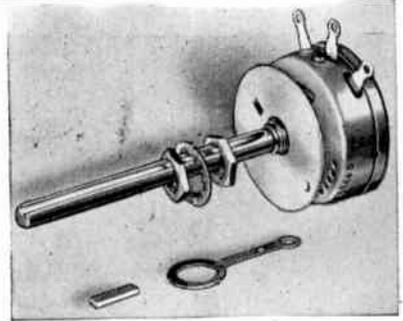

Taper Number 2 is a right hand logarithmic taper in the carbon and an approximation in the wire wound type. Used in series circuits, as in cathode voltage controls, or where only the center and right hand terminals are used.

Taper Number 3 is a combination left and right hand taper. Has a limited use in circuits where the control must perform both as a shunt and as a series circuit control as in combination antenna shunt plus bias circuits. This is the most common use for such a taper.

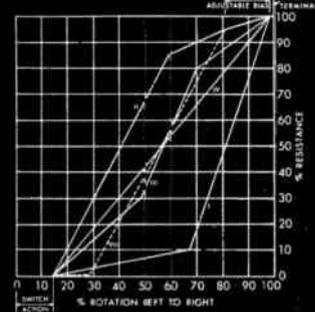

Taper Number 4 is a linear taper. Strictly speaking it is not a "taper" although commonly referred to as such. A linear "taper" is used wherever a control should be such that voltage is proportional to the degree of rotation.

Taper Number 4A is a modification of the regular linear taper Number 4.

Taper Number 7 is made only in the wire wound type of control and is a form of left hand taper. This taper is desirable for the antenna shunt plus bias control, wherein greater attenuation is obtained by increasing the bias voltage. The slight left taper then suffices to gradually reduce the signal to zero volume by the shunting action in the antenna circuit.

### WIRE WOUND TAPERS

## UNIVERSAL TAPPED REPLACEMENT CONTROLS

Plug-In Tapped Controls types TM and DTM are used with the proper SS shaft selected for the individual application. The Standard 1 1/2" diameter Tapped Controls (type TRP) are supplied with the universal channel shaft and insert. See pages M-44 and M-45 for complete information on plug-in shafts, attachable

switches and accessories. Prices do not include switch or accessories. Two No. 232 nuts, one No. 227 washer and a ground terminal are included.

## REPLACEMENT CONTROL ACCESSORIES

VOLUME CONTROL WRENCH

Marking	For Type of Control	Dia.	Cat. No.	List Price
<b>Etched Dial Plates for Controls, Rheostats and Potentiometers</b>				
0 to 10	For Standard Carbon Controls with switch type cover	2 1/4"	398	\$0.25
0 to 10	For Standard Carbon Controls with plain cover	2 1/4"	397	.25
0 to 10	For Standard Wire Wound Controls with switch type cover	2 1/4"	396	.25
0 to 10	For Standard Wire Wound Controls with plain cover; also "M" Type Rheostats and Potentiometers	2 1/4"	395	.25
0 to 10	For "C" Type Rheostats and Potentiometers	2 1/4"	393	.25
0 to 10	For "E" Type Potentiometers	2 1/4"	399	.25
0 to 100	All Rheostats and Potentiometers (compromise scale)	2 1/4"	369	.25
Increase Volume	All Rheostats and Potentiometers	1 1/2"	391	.15

### Universal Extension Shafts:

4" long x 1/4" dia. x 1/8" flat	RS242*	.30 ea.
4" long x 1/4" dia. x 3/16" flat	RS243*	.30 ea.
4" long x 1/4" dia. x 1/4" flat	RS244*	.30 ea.
2" long x 1/4" dia. with 1/8" slot (Enclosed in tight-fitting tube) For adapting Universal Controls to automobile receivers when slotted shaft is needed.	RS245*	.35 ea.
2" long x 1/4" wide x 3/8" thick (Tongue shape and fitted with tube) For adapting Universal Controls to automobile receivers where tongue-shaped shaft is needed.	RS246*	.35 ea.

\*Packed 5 to Envelope

### Universal Flexible Coupling Shafts:

For Universal replacement of all flexible wire shafts, coupling to 1/4" solid shafts	FS250	.60
Shaft Coupling has 1/8" hole, 1/2" deep, with transverse pin, and is for use (with the correct Mallory control) as a replacement for Philco Models 805, 806, 808, 809 and PHID and PHXD, Studebaker AC266, Pierce-Arrow MT-3, Reo RT-3, etc.	FS251	.60
Shaft Coupling has 5/8" hole, approximately 1/2" deep, and has 2 set screws opposite each other. It is used as a replacement for Philco Model D, Nash AC-989 (Code 122)	FS252	.60
Shaft Coupling has 1/4" dia. hole, 1/2" deep, equipped with 2 screws at 90 degrees. This is to be used with the correct Mallory Control as a replacement for Chevrolet No. 364441	FS253	.60

### Universal Combination Extension Shaft Coupling and Reducer:

Will couple two 1/4" shafts or one 1/4" shaft and one 3/16" shaft	EC240	.25
---	-------	-----

### Universal Insulated Shaft Couplers:

Designed to connect fixed shaft controls to remote drive couplings popular in automotive radio equipment.	EC256	.25
Slotted Insacup	EC257	.25
Square Insert Insacup (Motorola type)		

### Universal Extension Bushing:

Designed to screw on the present bushing of Mallory controls and switches, so that the body of the control or switch will be held 3/4" away from the mounting surface. For example, it is used with the correct Universal Control to service Philco Models 28, 29, 45 and 45C	EB247	.20
---	-------	-----

### Universal Bushing and Nut:

Designed to accommodate 1/4" shaft wherever a panel bushing is desired. Includes one No. 232 nut	UB241	.75 for 10
	Packed 10 in Envelope	

### Hexagon Shoulder Mounting Nuts:

For 3/8" Panels	255	.15
For 1/2" Panels	A11260-12	.20
For 3/4" Panels	A11260-2	.25

### Volume Control Wrench:

For all standard Volume Control Hexagon Nuts	178	.20
--	-----	-----

### Adjustable Mounting Brackets:

1 1/2" Mounting Centers	RB248†	.20 ea.
2 1/2" Mounting Centers	RB249†	.20 ea.

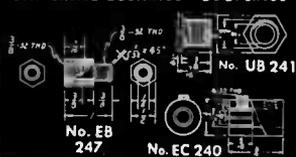

†Packed 5 to Box

### ADJUSTABLE MOUNTING BRACKETS

No. RB 248 No. RB 249

### UNIVERSAL BUSHINGS—COUPLINGS

### Attachable Switches for 1 1/2" Dia. Controls

For use with standard Universal Controls, Carbon and Wire Wound types, TRP Tapped Controls, and Universal Dual Controls.

Cat. No.	Circuit Arrangement	List Price
6-9	Single-Pole—Single-Throw	\$0.50
7	Single-Pole—Single-Throw	.60
8	Double-Pole—Single-Throw	.60
13	Single-Pole—Double-Throw	.60
14	Three-Pole—Single-Throw Shorting	.60
	Four-Pole—Single-Throw Shorting	.60

\*Has dummy terminal identified by copper rivet.

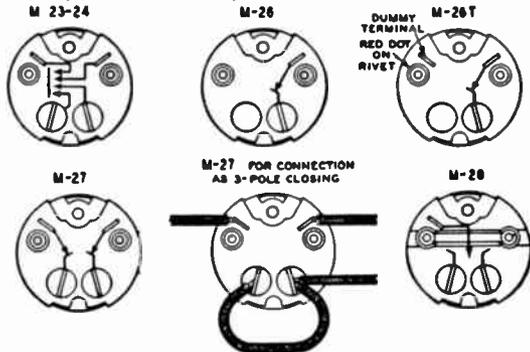

### Attachable Switches for 1 1/8" Dia. Controls

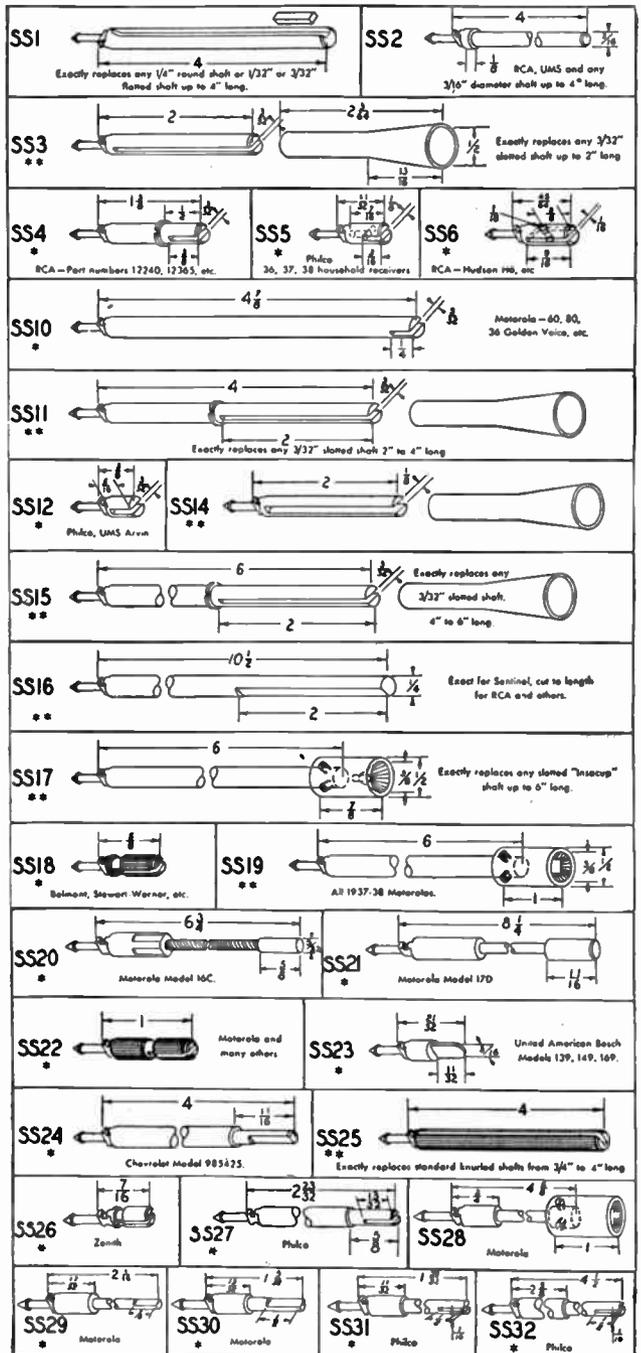

For use with MR, MK, UM, TM and DTM controls.

Cat. No.	Circuit Arrangement	List Price
M-26	Single-Pole—Single-Throw	\$0.50
M-26T	Single-Pole—Single-Throw	.60
M-27	Double-Pole—Single-Throw	.60
M-28	Single-Pole—Double-Throw	.60
M-23-24	Four-Pole—Single-Throw, Shorting	.60

\*Has dummy terminal identified by red dot.

## Universal Dual Replacement Controls

\*These Plug-In Shafts are designed as exact replacements for applications requiring a given predetermined length with special coupling slots or tongue or an insulated coupler. None of these require any cutting or special adjustment.  
\*\*These Plug-In Shafts are of universal length and designed for many applications.

## YARD-OHM RESISTANCE KITS

Each Yard-Ohm Resistance Kit consists of an envelope containing all necessary materials to construct flexible resistors of a wide range of values. The Yard-Ohm Kit provides a real solution to the odd-value resistor problem. In addition to replacement applications, resistors made from the Yard-Ohm Kit are ideal for meter shunts, and for use wherever a high quality flexible resistor is desired.

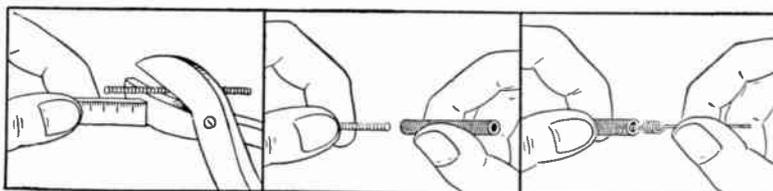

Each Mallory Yard-Ohm Kit consists of an envelope containing the following:

- 1 yard spiral wound resistance wire
- 1 yard insulated braid
- 24 spiral wire leads

The kit is available in eight resistance values

Cat. No.	Resistance Value (Ohms per Inch)	Carrying Capacity in Amperes	List Price
YO-1	1	.707	\$0.75
YO-5	5	.315	.75
YO-10	10	.223	.75
YO-25	25	.141	.75
YO-50	50	.100	.75
YO-100	100	.071	.75
YO-250	250	.044	.75
YO-500	500	.031	.75

Dissipation—all types: ½ watt per inch.

**FIRST**—Determine length by dividing "ohms per inch" into the resistance value desired. Add ¼ inch to this for terminals and cut.

**SECOND** — Cover element with the required length of insulating braid.

**THIRD** — Insert wire leads over ends of resistance elements and clinch tightly with pliers.

## GRID BIAS CELL—An Exclusive Mallory Development

(U. S. Letters Patent 1,920,151; 2,063,524; 2,116,091; Des. 106,163; et al.)

• The Mallory Grid Bias Cell is a small acorn-shaped, self-contained device. The metal container or cup is the negative electrode. The black disc is the positive electrode. Various styles of holders are shown at left.

Mallory Bias Cells are available in two types—the original 1-volt cells and the new 1¼-volt cells. For new installations, the choice of Bias Cell types will depend on the voltage desired. Replacements should be made with the type of Bias Cell used as original equipment.

The 1¼-volt Bias Cells may be distinguished from the 1-volt unit by the concave depressions in both the upper electrode and bottom of the shell case.

### Application

The principal use of Mallory Grid Bias Cells are in the biasing of the first audio amplifier tube in modern high-gain receivers. The bias cell does not need to be bypassed to ground.

Correspondence is invited regarding the application of Mallory Grid Bias Cells. Special Technical Bulletin No. B-303 may be obtained on request.

### Characteristics

The no-current potential of Mallory Grid Bias Cells is within plus or minus 10% of their rated voltage.

**Current**—The cell is strictly a potential or voltage cell for biasing class "A" amplifier tubes and should not be used for biasing power tubes or oscillators; or for

any circuit where an appreciable direct current may flow through the cell.

**Temperature**—The cells may be used in ambient temperatures from 40° below zero to 120° F. The voltage of the cell remains reasonably constant throughout this wide temperature range. It is recommended, however, that wherever possible the bias cell be placed in the coolest location.

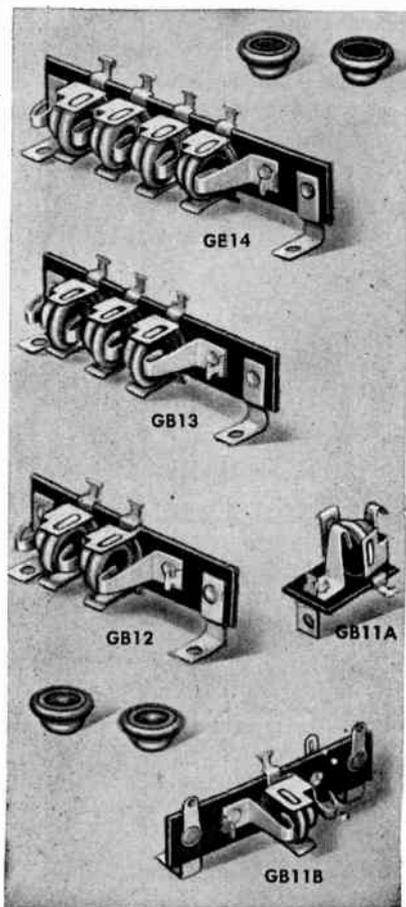

**Humidity**—The cell exhibits no change in characteristics when exposed to a relative humidity of 90% at 120° F.

**Impedance**—Mallory Grid Bias Cells are non-reactive at audio frequencies. For the 1-volt cell, the DC resistance ranges between 11,000 and 50,000 ohms. The DC resistance of the 1¼-volt cell ranges between 10,000 and 40,000 ohms.

**Noise**—The cells do not cause the development of any noise.

### PRICE LIST

Mallory Grid Bias Cells, 1-volt type (Packed 10 to the box).....	\$0.35 per cell
Mallory Grid Bias Cells, 1¼-volt type (Packed 10 to the box).....	.35 per cell
Mallory Grid Bias Cell Holder, Cat. No. GB11A, 1-cell capacity.....	.15 each
Mallory Grid Bias Cell Holder, Cat. No. GB11B, 1-cell capacity.....	.20 each
Mallory Grid Bias Cell Holder, Cat. No. GB12, 2-cell capacity.....	.25 each
Mallory Grid Bias Cell Holder, Cat. No. GB13, 3-cell capacity.....	.30 each
Mallory Grid Bias Cell Holder, Cat. No. GB14, 4-cell capacity.....	.40 each

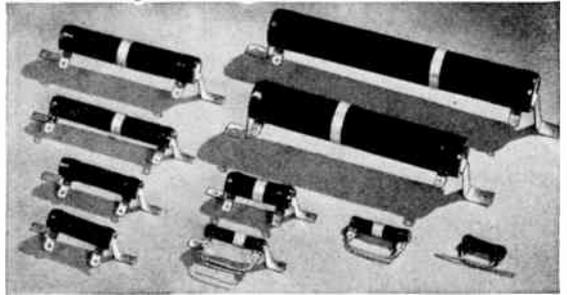

# LECTROHM *Vitreous Enameled* RESISTORS

Quality—Accuracy—Dependability—Long Life

## WIRE WOUND—FIXED TYPES

LECTROHM Resistors are manufactured from the highest quality materials obtainable and are rated according to R.M.A. standards. LECTROHM Resistors are rugged—dependable—accurate—quality components that will give long trouble-free service. (Mounting brackets available for 20, 50, 80, 100, 160 and 200 watt units.)

# LECTROHM *Vitreous Enameled* RESISTORS

Quality—Accuracy—Dependability—Long Life

## WIRE WOUND ADJUSTABLE TYPES

The same high quality and construction are used for LECTROHM Adjustable Resistors as are incorporated in LECTROHM fixed units.

These resistors are used for replacing voltage dividers in radio receivers, for radio transmitter power supply, and for general experimental work.

# Utah

## VITREOUS ENAMELED RESISTORS

**UTAH** Vitreous Enamelled Resistors are perfectly protected against corrosion from salt spray, moisture, acids and alkalis, as their coating is genuine Vitreous Enamel, applied by a wet process, then fired in a furnace at a high temperature which fuses it into a hard glassy enamel which adheres permanently to the rugged porcelain tube core, resistance wire and terminals. To be doubly protected, all Utah Vitreous Enamelled Resistors receive two generous coats, each of which is separately fired.

Utah terminals cannot tear loose, being securely eye-letted around the tube. Resistance wire joined to terminal on opposite side of tube from lug, so severe bending of soldering lugs cannot break the wire.

See reverse side for Adjustable Types.

### 10 WATT SIZES Type CC

RATING: 10 Watts up to 2000 ohms in free air. Higher resistance units rated as listed in table. 1 3/8" long, 3/8" overall diameter. Has 1 1/2" long No. 18 Ga. tinned wire pigtail leads.

# ADJUSTABLE VITREOUS ENAMEL RESISTORS

**U**TAH Adjustable Types have all the dependable features of the fixed units described on the reverse side; and in addition, the turns of the resistance wire are exposed in a narrow strip to make contact with the adjustable terminal band. Even in this partly exposed area, the wires are protected and anchored from shifting by an enamel which lies between the turns. The cadmium-plated steel adjustable terminal can be set at any desired value along the resistor, and clamped in place with a screw and nut. The wattage which may be safely dissipated at fractional settings is proportional to the effective length of the section being used. Thus an adjustable resistor rated at 50 watts overall, may safely take 25 watts over half of the winding.

## 10 WATT SIZES—Type CCX

RATING: 10 Watts up to 2000 ohms in free air, entire element. Higher resistance units rated as listed in table.  $1\frac{1}{4}$ " long,  $\frac{3}{8}$ " overall diameter. Equipped with tinned lug type terminals at each end and one adjustable terminal.

## "T" PAD AND "L" PAD WIREWOUND ATTENUATORS

For controlling volume in circuits and microphones, loudspeakers, phonograph pick-ups, mixers, audio and public address amplifiers and similar uses.

### 10-WATT "T" PADS OPEN FRAME TYPE

BODY:  $2\frac{1}{4}$ " diameter,  $\frac{3}{16}$ " deep.  
 BUSHING:  $\frac{1}{8}$ " diameter,  $\frac{3}{8}$ " long.  
 SHAFT:  $\frac{1}{4}$ " diameter,  $\frac{1}{8}$ " long, from bushing.  
 Mounts in single  $\frac{1}{8}$ " hole.  
 Supplied with one mounting nut and two insulating washers for  $\frac{3}{16}$ " hole.  
 10 watts (+32.2 DB level\*) for average program material.  
 5 watts (+29.2 DB level\*) steady tone, in infinite attenuation or "silent" position.  
 Effective rotation: 82 degrees.

### 15-WATT "L" PADS OPEN FRAME TYPE

BODY:  $2\frac{1}{4}$ " diameter,  $\frac{3}{16}$ " deep.  
 BUSHING:  $\frac{1}{8}$ " diameter,  $\frac{3}{8}$ " long.  
 SHAFT:  $\frac{1}{4}$ " diameter,  $\frac{1}{8}$ " long, from bushing.  
 Mounts in single  $\frac{1}{8}$ " hole.  
 Supplied with one mounting nut and two insulating washers for  $\frac{3}{16}$ " hole.  
 15 watts (+34.0 DB level\*) for average program material.  
 7 1/2 watts (+31.0 DB level\*) steady tone, in infinite attenuation or "silent" position.  
 Effective rotation: 142 degrees.

Stock No.	Impedance	List	Net
LA-8	8 Ohms	\$3.25	\$1.95
LA-16	16 Ohms	3.25	1.95
LA-50	50 Ohms	3.25	1.95
LA-200	200 Ohms	3.25	1.95
LA-500	500 Ohms	3.25	1.95
LA-1000	1000 Ohms	3.25	1.95

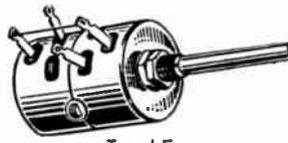

Type LA

### 8-WATT "L" PADS ENCLOSED DUAL TYPE

BODY:  $1\frac{1}{8}$ " diameter,  $1\frac{1}{2}$ " deep.—BUSHING:  $\frac{3}{8}$ " diameter,  $\frac{3}{8}$ " long.—SHAFT:  $\frac{1}{4}$ " diameter,  $1\frac{1}{2}$ " long from bushing.—Mount in single  $\frac{3}{8}$ " hole. Supplied with two hex. mounting nuts.—8 watts (+31.2 DB level\*) for average program material.—4 watts (+28.2 DB level\*) steady tone, in infinite attenuation or "silent" position.—Effective rotation: 276 degrees. All electrical parts insulated from housing.

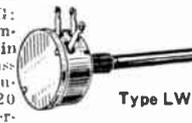

Type LE

Stock No.	Impedance	List	Net
LE-8	8 Ohms	\$2.50	\$1.50
LE-16	16 Ohms	2.50	1.50
LE-50	50 Ohms	2.50	1.50
LE-200	200 Ohms	2.50	1.50
LE-500	500 Ohms	2.50	1.50
LE-1000	1000 Ohms	2.50	1.50

### 4-WATT "L" PADS ENCLOSED SINGLE TYPE

BODY:  $1\frac{1}{8}$ " diameter,  $\frac{3}{4}$ " deep.—BUSHING:  $\frac{3}{8}$ " diameter,  $\frac{3}{8}$ " long.—SHAFT:  $\frac{1}{4}$ " diameter,  $1\frac{1}{2}$ " long from bushing. Mount in single  $\frac{3}{8}$ " hole.—Supplied with two brass hex mounting nuts. All electrical parts insulated from housing. Effective rotation 120 degrees. 4 watts (+28.2 DB level\*) for average program material. 1 1/2 watts (+24.6 DB level\*) steady tone, in infinite attenuation or "silent" position. Same connections as for Type LA Open Frame Attenuator.

Type LW

Stock No.	Impedance	List	Net
LW-8	8 Ohms	\$1.50	\$0.90
LW-16	16 Ohms	1.50	.90
LW-50	50 Ohms	1.50	.90
LW-200	200 Ohms	1.50	.90
LW-500	500 Ohms	1.50	.90
LW-1000	1000 Ohms	1.50	.90

\* Using Zero level of 6 milliwatts.  
 Some of the above items may not be available for the duration. Consult your local UTAH jobber.

## WIREWOUND POTENTIOMETERS AND RHEOSTATS

The many years of continued preference for these pioneers of the small variable resistor field proves their dependability and high quality. Resistance elements clamped permanently in place, in one-piece cadmium-plated all-metal frame. Open construction gives the maximum heat dissipation for their size. Contact arm grounded to bushing and frame.

### 3-WATT POTENTIOMETERS & RHEOSTATS

BODY:  $1\frac{1}{8}$ " diameter,  $\frac{1}{4}$ " depth behind panel.  
 BUSHING:  $\frac{3}{8}$ " diameter,  $\frac{3}{8}$ " long.  
 SHAFT:  $\frac{1}{4}$ " diameter,  $1\frac{1}{2}$ " long from bushing.  
 Pots: Three terminals, no off position.  
 Rheostats: 2 terminals, with off position.  
 Effective rotation: 285 degrees.  
 Mounts in single  $\frac{3}{8}$ " hole.  
 Supplied with one hex. mounting nut, one flat and one swdged insulating washer for  $\frac{1}{8}$ " hole.

Typ MP

## OHMITE RHEOSTATS

All-Porcelain — Vitreous-Enamelled

The design and construction of these sturdy, compact Ohmite Rheostats insure permanently smooth, gradual, close control. The wire is wound over a porcelain core, bonded to porcelain base, and permanently locked in place by special Ohmite Vitreous Enamel. Nothing to smoke, char, shrink, or shift. Dissipates heat rapidly. Insulated shafts and bushings. Copper graphite contacts. Ratings are for "free air" use. Time-proved through long trouble-free service in countless installations the world over. Underwriters' Laboratories Listed.

## OTHER OHMITE RHEOSTATS

Ohmite Rheostats are also available in Model G, 75 Watt; Model P, 225 Watt; Model R, 500 Watt; Model T, 750 Watt; and Model U, 1,000 Watt units, in many resistance values. Special Rheostats with tapered windings, etc., can be supplied; also Special Rheostats for Model Train Control. Cages and other accessories also available.

## OHMITE DIVIDOHM RESISTORS

All-Porcelain  
Vitreous-Enameled

## OHMITE FIXED RESISTORS

You can adjust the resistance or secure odd resistance values quickly with these Dividohms; easily put on more taps where needed. Ideal voltage dividers. With one adjustable lug and with mounting brackets.

Extra-sturdy, wire-wound, all-porcelain resistors with the permanent protection of Ohmite Vitreous Enamel. Widely used for heavy duty applications to assure continuous trouble-free service. With mounting brackets.

## OHMITE DUMMY ANTENNA

To Check R.F. Power and Tune Up to Peak Efficiency

For the first time, a compact, high-wattage resistor suitable for high radio-frequency measurements. Non-inductive, non-capacitive, constant in resistance. Provides a simple, accurate, direct means of measuring R. F. power in all transmitter stages for the purpose of tuning up to maximum efficiency. Used to determine transmission line losses—to check line to antenna impedance match—to keep signal off the air while tuning up—to eliminate unnecessary interference—and generally useful as a non-inductive resistor in other R. F. Circuits.

Space-wound resistance element of unusual design, mounted in a glass bulb, evacuated and gas filled. Four-prong steatite standard tube base. Several units can be connected in various ways for higher wattages.

**Model D-100.** 100 Watt rating. In popular 73 ohm and 600 ohm resistance values. Also in 13, 18, 34, 64, 100, 146, 219, 300, 400, 500 ohm values. Diameter 3 1/8". Height (from bottom of base) 4 3/8".

**List Price**.....\$6.50

**Model D-250.** 250 Watt rating. In 73 ohm and 600 ohm stock resistances. Diameter of bulb 2 1/2". Height 9 1/8" (from bottom of base).

**List Price**.....\$13.00

Non-Inductive Vitreous-Enameled Resistors also available. See Ohmite Catalog 18.

## OHMITE OHM'S LAW CALCULATOR

This handy calculator, designed by Ohmite engineers, solves Ohm's Law problems with only one setting of the slide. No decimal points to cause confusion—all values are direct reading. Requires no slide rule knowledge. Scales on two sides of the calculator cover both the range of currents, resistances, wattages, and voltages commonly used in the radio and electronic fields, and the higher current industrial range up to 100 amperes or 1000 watts. A convenient stock unit selector tells the stock number of the unit you may need. Size 4 1/8" x 9".

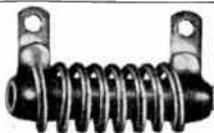

Ohmite Ohm's Law Calculator.....NET Price \$0.10

## OHMITE PARASITIC SUPPRESSOR

Designed to prevent unwanted ultra-high-frequency parasitic oscillations which occur in the plate and grid leads of push-pull and parallel tube circuits. The parasitics are suppressed, without loss of driving power.

The P-300 is a non-inductive, vitreous-enameled resistor combined with a choke into one small integral unit. Only 1 3/4" long overall and 5/8" diameter.

**Model P-300. List Price**.....\$1.50

## OHMITE R.F. PLATE CHOKES

Built to Carry 1,000 M.A.

High frequency solenoid chokes designed to avoid fundamental or harmonic resonance in the amateur bands. Single-layer wound on low power factor steatite core—insulated and protected by moisture-proof coating. No portion can resonate independently of any other portion. Designed also to prohibit breakdown from high R. F. potentials. Ample space allowed at the ends to prevent flashover to ground. Non-magnetic mounting brackets furnished with the three larger sizes. Rated at 1,000 milliamperes. May be used in diathermy and therapeutic equipment as well as in radio transmitters.

## OHMITE POWER LINE CHOKES

Prevents high-frequency currents of radio transmitters, diathermy and therapeutic equipment from going out over the power lines and interfering with nearby radio receiving sets. Used as a filter in connection with two grounding condensers of 0.1 microfarad capacity each. The Z-20 Choke is also used at radio receivers to keep out interference. All chokes consist of two single-layer windings on a single ceramic core—insulated and protected by moisture-proof coating. Recommended for use in suppressing radio (not audio) frequency interference.

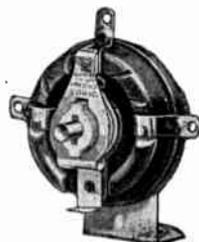

Stock No.	Micro-henries	Current Rating	Total D.C. Resistance Ohms	Lgth.	Tube Dia.	List Price
Z-20	14	5 Amperes	0.15	4"	1/2"	\$1.65
Z-21	15	10 Amperes	0.07	6 1/2"	3/4"	2.75
Z-22	18	20 Amperes	0.045	8 1/2"	1 1/8"	4.00

## TRANSMITTER BAND CHANGE AND HIGH VOLTAGE SWITCH

For the rapid, convenient change of transmitter frequency by front-of-panel knob control. Suitable for circuits up to 1 K. W. rating. Adaptable for general use requiring high voltage insulation.

**Model BC-3.** Complete with Knob and Mounting Bracket.

**List Price**.....\$3.30

### VITROHM RING TYPE RHEOSTATS

The core and base of Ward Leonard Ring Type Rheostats are made of the highest grade ceramic materials. The resistance wire is wound toroidally on the core, and is coated with a tough, heat resistant, acid resistant, crazeless vitreous enamel.

Type Number	Approx. Dimensions (In Inches)			
	A	B	C	D
1105	1 <sup>5</sup> / <sub>16</sub>	1 <sup>3</sup> / <sub>16</sub>	1	1 <sup>1</sup> / <sub>2</sub>
1106	2 <sup>5</sup> / <sub>16</sub>	1 <sup>5</sup> / <sub>16</sub>	1 <sup>1</sup> / <sub>8</sub>	1 <sup>1</sup> / <sub>2</sub>
1107	3 <sup>5</sup> / <sub>16</sub>	1 <sup>3</sup> / <sub>4</sub>	1 <sup>1</sup> / <sub>8</sub>	1 <sup>1</sup> / <sub>2</sub>
1108	3 <sup>13</sup> / <sub>16</sub>	2	1 <sup>1</sup> / <sub>8</sub>	1 <sup>1</sup> / <sub>2</sub>

The contact is a special alloy and is of large area to avoid sticking, pitting, local heating, or oxidation when setting remains fixed for a long period of time.

**Watt Ratings.**—Based on continuous operation in free air with a temperature rise not to exceed 300° C, which is within the limits specified by Underwriters' Laboratories and NEMA.

**Number of Steps.**—Each turn of resistance wire on the core of a Vitrohm Ring Type Rheostat constitutes a step of change in the resistance value.

Vitrohm Ring Type Rheostats are made with three terminals with no "off" position, and can be used as potentiometers or rheostats, as desired. Rheostats with an "off" position can be furnished, if specified.

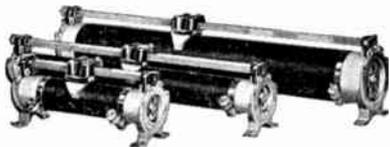

The resistance values shown in the accompanying table have been selected as standard values for stock purposes. They follow a definite pattern, and all resistance values up

to 10,000 ohms (up to 4,000 ohms for the 25-watt unit) are covered in steps that increase progressively as of about  $\pm 20\%$ . Intermediate values can be furnished as specified.

Order by Type Number and Resistance Value.

### SLIDING CONTACT RHEOSTATS

Ward Leonard Sliding Contact Rheostats are precision instruments for accurate control of currents up to 25

amperes and voltages within their ratings.

Cast aluminum end pieces; sturdy glazed porcelain tube used as the base for the resistance winding. Positive contact between slider and wire maintained by the use of laminated phosphor bronze brushes, assuring long, trouble-free life. All units arranged for potentiometer connection.

The resistance wire has a low temperature coefficient of resistivity and is heavily oxidized, making each turn of wire a step of control.

Prices on all Ward Leonard Sliding Contact Rheostats are available on request.

Sliding Contact Rheostats can be furnished in a wide variety of styles, sizes, and designs.

### Vitrohm Slider Resistors

Ward Leonard Vitrohm Slider Resistors are convenient and economical units for use in laboratory set-ups where accurate, continuous adjustment of relatively small loads is required. About one-fifth of the surface area of the vitreous enameled resistor is exposed to provide contact with a phosphor bronze slider that moves on a brass bar that is completely insulated from the pressed steel end pieces and mounting brackets.

One side bare to permit adjustment to desired resistance value.

Order by Type Number and Resistance Value.

Adjustohm Resistors are built of the highest grade low temperature coefficient materials, and are coated with Ward Leonard's tough crazeless Vitreous Enamel.

Mounting brackets are furnished with all Adjustohm Resistors, except the 10-watt size, Type 10A.

Price of resistor includes brackets and one adjustable band.

## RESISTORS RHEOSTATS RELAYS

### VITROHM PLAQUE RESISTORS—Non-Inductive—Non-Capacitive

Vitrohm Plaque Resistors are flat in form. The resistance wire is arranged on a rectangular ceramic base to give the lowest obtainable values of inductance and distributed capacitance. Inductance at frequencies up to 1000 kilocycles and distributed capacitance up to 5 megacycles are so low in value that they are negligible.

Vitrohm Plaque Resistors are rated 20, 40, and 125 watts with full ventilation. Since full ventilation is usually impossible to attain, the watt rating should be decreased to compensate for the reduction in ventilation. A single plaque resistor mounted on a panel should operate safely at about 80% of the full watt rating.

### VITROHM STRIP RESISTORS

Vitrohm Strip Resistors lend themselves readily to applications where space is limited, such as aircraft control circuits, radio instruments, and similar apparatus.

Vitrohm Strip Resistors are built on a strong flat reinforced core that has no sharp angular surfaces, providing a smooth continuous form for the resistance winding. The resistors are vitreous enamel coated.

Each unit is fitted with a self-sustained mounting bracket and spacer, the end pieces being riveted to a metal strip that passes through the core and serves as a conductor for the internal heat generated while the resistor is in service.

LENGTH (Inches)		RESISTANCE		Watt Rating
Resistor Body	Mounting Hojes	Min. Ohms	Max. Ohms	
1 1/4	2	0.45	6,300	30
2	2 3/4	0.50	15,800	40
3 1/2	4 1/4	0.70	35,000	55
4 3/4	5 1/2	1.00	50,000	65
6	6 3/4	1.40	66,000	75

Prices furnished on request.

### FLUORESCENT LAMP RESISTORS

Prices furnished on request.

Ward Leonard Fluorescent Lamp Resistors are designed for use in fluorescent lamps operating on direct current. They meet the requirements of lamp and fixture manufacturers, and are listed as standard by Underwriters' Laboratories, and by the New York City Department of Water Supply, Gas and Electricity.

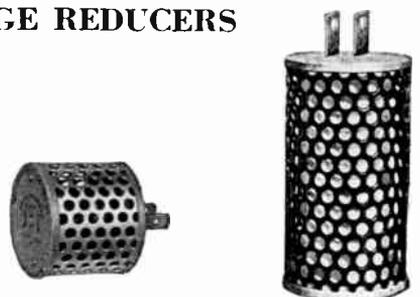

The resistors are made in two styles. One is in a rectangular metal enclosure for installation on standard fixtures; the other is a plug-in type unit for use with portable fixtures. The rectangular unit is made for use on 115-volt, 120-volt, and 240-volt circuits, and in various resistance values to meet the requirements of the lamps with which they are to be used. The plug-in type unit is made for use on 15-watt lamp fixtures and 20-watt lamp fixtures.

The standard plug-in units are designed to operate on 120-volt circuits, but adaptor units are available for voltages between 105 and 120 volts. The plug-in type unit requires no wiring. It is fitted with a plug on one end for inserting into the line receptacle, and a receptacle on the other end into which the plug on the fixture is placed.

### LINE VOLTAGE REDUCERS

These line voltage reducers protect radio sets, soldering irons, Christmas tree lamp strings, and other electrical appliances within the ratings of the reducers, from high line voltage.

Catalog Number	Length Inches	Resis. Ohms	Load	List Price
507-109	1 1/2	25.	For 35-65 watt 115 volt radio set on 115-140 volts	\$1.75
507-109A	1 1/2	10.	For 65-130 watt 115 volt radio set on 115-140 volts	1.75
507-109B	2 1/4	4.5	For 130-285 watt 115 volt radio set on 115-140 volts	2.10
507-109H	5 1/4	300.	For 60 watt 115 volt radio set on 230 volts	2.75

## WIRE WOUND FIXED RESISTORS

### WIRE WOUND FIXED RESISTORS

To satisfy the most exacting needs of the Radio and Electronic Industries, Wirt Fixed Wire-wound Resistors are regularly furnished in PHENOCOTE protective coatings, developed and steadily improved over a period of many years in the Wirt Laboratories. The resistor wire is space wound on low loss ceramic tubes. The PHENOCOTE covering is an exclusive organic cement coating offering maximum protection to the resistance winding against the detrimental effects of moisture, humidity and electrolysis. Absolutely inert chemically, it will not effect the most delicate windings. It is particularly recommended for fine wire sizes and all applications where the maximum temperature of the unit will not exceed 300° F. These Resistors are universally used in the Radio, Electronic, Instrument, Public Address and Test Equipment fields.

## WIRE WOUND ADJUSTABLE RESISTORS

### WIRE WOUND ADJUSTABLE RESISTORS

WIRT Adjustable Resistors are space wound on low loss ceramic tubes to which the resistance wire is bonded, resulting in dependability and long life. Protection of the windings is afforded by the PIENOCOTE covering which is described fully on the preceding page. One adjustable Slider Band, screw driver type, is furnished as standard. Bakelite knob type bands can be furnished on special order at slightly higher prices as shown below.

These bands are made with small contact buttons located on the inside of the band so that a number of taps may be made without shorting out excessive resistance.

## MINIATURE RHEOSTATS and POTENTIOMETERS

### MINIATURE RHEOSTATS AND POTENTIOMETERS

**General:** WIRT Metal Housed Rheostats and Potentiometers are rugged and compact affording high quality and dependability in operation. Due to size and construction these controls are moderately priced. Housings are made of tinned steel. Highest quality resistance wire is space wound on specially treated laminated phenolic strips. The Phosphor Bronze contact-arm is rounded to the metal casing and all terminals are silver plated. Switches cannot be furnished. These Rheostats and Potentiometers are adaptable to a wide variety of uses in the Radio Instrument, Electronic and Test Equipment fields. The types available are listed below:

**Cat. No. WC801**—Two Terminal Rheostat, 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance of  $\pm 15\%$ . Diameter is  $1\frac{1}{8}$ " and thickness  $\frac{1}{2}$ ". Shaft is Cadmium plated steel, grounded to housing.  $5/32$ " from end of bushing and slotted for screw driver adjustment. Brass mounting bushings,  $\frac{3}{8}$ "- $32 \times \frac{1}{4}$ " long are standard. Each control is equipped with one  $9/16$ " hex mounting nut. List Price..... \$0.75 Each

**Cat. No. WC802**—Three Terminal Potentiometer. 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance  $\pm 15\%$ . All other specifications are the same as those listed under the WC801 control shown above. List Price..... \$1.00 Each

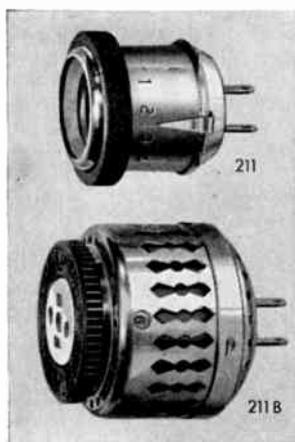

**Cat. No. WC803**—Sensitivity Control, 2 Watt rating. Resistance Range: 5 ohms to 12,000 ohms with linear winding and standard tolerance of  $\pm 15\%$ . Diameter is  $1\frac{1}{8}$ " and thickness is  $\frac{1}{2}$ ". A slot is provided in the Rotor mechanism allowing for screw driver adjustment from front only. List Price..... \$0.40 Each

**Cat. No. WC804**—Sensitivity Control. Identical with WC803 Control, except provided with an opening in back of control to permit screw driver adjustment from either front or back. List Price..... \$0.45 Each

**Cat. No. WC807**—Miniature Sensitivity Control, 1.5 Watt rating. Resistance Range: 5 ohms to 3000 ohms with uniform winding and standard tolerance of  $\pm 15\%$ . A slot is provided in the Rotor mechanism allowing for screw driver adjustment from either front or back. List Price..... \$0.40 Each

**Cat. No. WCB507**—Insulating Bushing for  $\frac{3}{8}$ " Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. List Price..... \$0.075 Each

**Cat. No. WCW508**—Insulating Washer for  $\frac{3}{8}$ " Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. List Price..... \$0.06 Each

### VARIABLE VOLTAGE REGULATOR

**Cat. No. 211** — Variable Voltage Regulator is wound with high quality alloy wire on an insulated metal core with the winding encased in Di-El-Ite. It can be used as a Radio Voltage Regulator where the Receiver draws not more than 65 watts. For industrial use it can be wound up to 600 ohms maximum and will dissipate up to 8 watts. It is adjustable to 5 positions.

List Price..... \$2.45 Each

**Cat. No. 211-B**—Regulator has air-cooling features which promote rapid heat dissipation. When used as a Radio Voltage Regulator the Receiver must not draw more than 150 watts. In industrial use for control of voltage and to regulate speed or heat it can be wound with a maximum resistance of 300 ohms and can dissipate up to 20 watts with maximum resistance setting. It is adjustable to 8 positions. List..... \$4.00 Each

### UTILITY CABINET

**Cat. No. UC**—Utility Cabinet is constructed of bass wood with corners dadoed and glued for strength; varnished and rubbed to give a beautiful finish. It has six drawers, each one having three removable partitions. The upper five drawers are 1" deep and the lower one is  $1\frac{1}{2}$ " deep. Overall dimensions of the cabinet are 7" wide by  $5\frac{1}{2}$ " deep by 9" high. Drawer guides, bottom and partitions are made of three ply laminated wood to prevent warping. Knobs are of wood and securely fastened. It is ideal for the storage of such parts as resistors, condensers, bolts, nuts, washers, small tools, etc. List..... \$8.00 Each

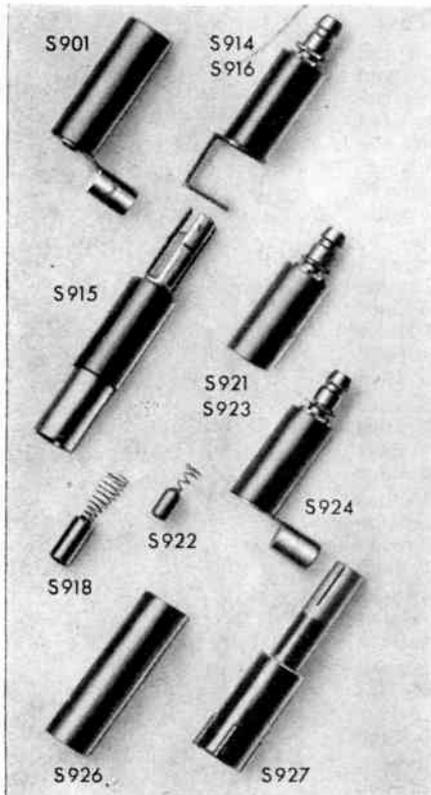

# WIRT

## SUPPRESSORS and SWITCHES

### AUTO RADIO IGNITION SUPPRESSORS

Wirt Suppressors are made with moulded black bakelite housings. All metal parts are made of rugged unfinished brass. Terminals are securely fastened to casings and sealed with special moisture and heat resisting dielectric cement. Resistor pills are sprayed with zinc and then double impregnated with a special moisture-proofing compound. Resistance value of all standard types is 10000 ohms  $\pm 20\%$ ; for FVS types 50000 ohms  $\pm 20\%$ . The distributed capacity is less than 1.5 mmf. Resistance values will not change more than 7% after being submerged in water for 100 hours. Test by sparking 1800 times per minute at 10,000 volts for 100 hours produces resistance change of not more than 3%. Wirt Suppressors are impervious to heat, oil, moisture and mild acids, and will not change in resistance more than 10% in 50,000 miles of operation.

Cat. No.	Type	List Price
S901	Elbow—Screw Fitting	\$0.30 Each
S914	Bracket—Standard	.30 Each
S916	Bracket—For FV-8	.30 Each
S915	Distributor—Slip Fitting	.40 Each
S918	FV-8 Brush—Years 1933-34-35	.30 Each
S922	FV-8 Brush—Years 1936 to 1940	.30 Each
S921	Universal Screw—Standard	.30 Each
S923	Universal Screw—For FV-8	.30 Each
S924	Snap-on Plug	.30 Each
S926	Cable—Screw Fitting	.30 Each
S927	Distributor—Screw Fitting	.30 Each

### WIRT ROTARY AND SLIDE SWITCHES

#### Rotary Switches

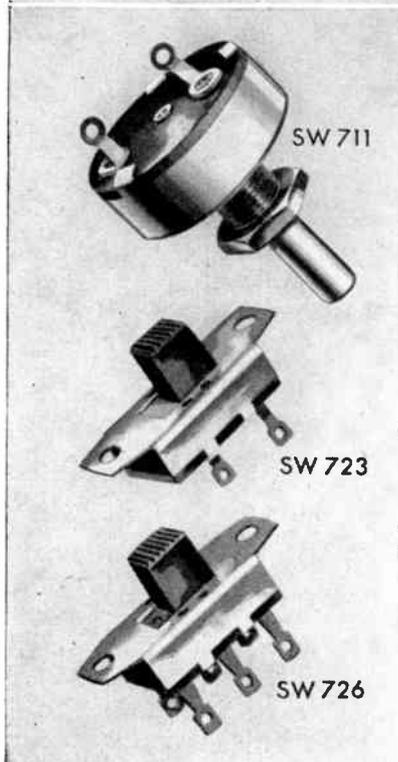

**General:** Wirt Rotary Switches are of the quick break type, have positive contact, are rugged and neat in appearance. They are constructed with tin plated steel housings. The outside diameter of the switch is  $1\frac{1}{8}$ " and thickness  $\frac{1}{2}$ ". Standard bushings are of brass,  $\frac{3}{8}$ "-32 x  $\frac{3}{8}$ " long. Steel shafts are  $\frac{5}{8}$ " from end of bushing, and made with a flat. Wiping contacts and terminals are silver plated. Terminals are securely fastened in place. Activating spring is positive in action. One  $9/16$ " hex. nut is furnished. These switches are successfully used in conjunction with Radio, Phonograph, Signal and Instrument Circuits.

Cat. No.	Type	List Price
SW711	—SPST Rotary Switch, 3A-125V-AC-DC 2 Terminals	\$0.40 Each
SW711A	—SPDT Rotary Switch, 3A-125V-AC-DC 3 Terminals	.45 Each

#### Slide Switches

**General:** All Wirt Slide Switches are compact and sturdy. Housings are made of steel and are cadmium plated. The physical dimensions of the switches have been standardized, width  $35/64$ ", length  $1-13/32$ " and mounting centers  $1\frac{1}{8}$ ". Standard buttons are of black bakelite. All contacts and terminals are silver plated. Switches SW723 and SW725 are supplied with a dot which indicates the "On" position. These switches are used in the Radio, Signal, Phonograph and Instrument industries.

Cat. No.	Type	List Price
SW723	—SPST Slide Switch, .75A-125V-AC-DC, 2 Terminals	\$0.25 Each
SW724	—SPDT Slide Switch, .75A-125V-AC-DC, 3 Terminals	.30 Each
SW725	—DPST Slide Switch, .50A-125V-AC-DC, 4 Terminals	.35 Each
SW726	—DPDT Slide Switch, .50A-125V-AC-DC, 6 Terminals	.45 Each

**AUTOMATIC**

# AMPERITE

**REGULATOR**

**BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE**

## 110 Volts—A.C. Sets

**AMPERITE IS A REAL REGULATOR**—its resistance automatically varies to compensate for supply voltage variations. It should not be confused with ordinary resistors.

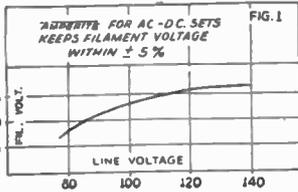

**For 110-V. A.C. Sets**—The proper Amperite is determined by the line current. A set drawing 0.7A requires Amperite 7A5, 1.2A requires Amperite 12A5, etc. Depending upon the line voltage, the voltage drop across an Amperite of — A5 series will vary from 8 to 30 volts and will control line voltages of 100 to 140 volts.

### HOW TO DETERMINE PROPER AMPERITE FOR A.C. SETS

Line Voltage	110 V	220 V
No. of Tubes in Set	Use Amperite No.	Use Amperite No.
4 or 5	5-A-5	2H-5
6 or 7	7-A-5	3H-5
8, 9 or 10	9-A-5	4H-5
11 or 12	11-A-5	5H-5

The line current drain of most 110 Volt A.C. Sets — except those using 6L6 or '50 tubes—average approximately 0.1 amp. per tube. A 7-tube set will draw 0.7A—use Amperite 7A5, etc. 220 Volt A.C. sets have half the current drain of similar 110 A.C. sets. For proper Amperite see Chart at left.

## A. C. - D. C. SETS

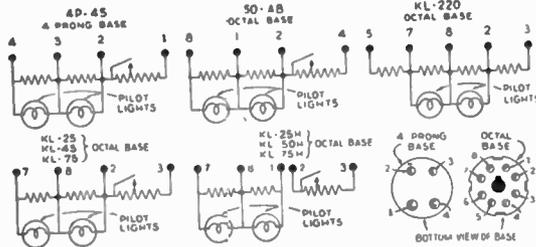

### For A.C.-D.C. Sets

The Amperite Regulators are designed to pass only 0.3A through tube filaments. Filament voltages will be kept within ±5% with line voltage variations of 85 to 140 volts. Due to the fact that Amperite is a real regulator, 2 types of Amperite with four prongs and 2 with octal bases will replace 150—90% of all—

so-called ballasts or resistors used in AC.-D.C. sets. No extra resistor required.

**Pilot Lights**—None, one or two of either 0.150A or 0.250A can be used with same Amperite. Should a pilot light burn out, the set will continue to operate properly without any damage to the Amperite, tubes or other parts. The patented starting resistor in the Amperite prevents overloading and premature burning-out of tubes and pilot lights. In some sets the ballast socket is purposely wired in such a way that the Pilot Light Resistors of standard ballasts would be burned out if inserted. In such sets special Amperites are required, as shown in table. Avoid burnouts—use proper Amperite.

### BASE WIRING OF AMPERITES FOR A.C.-D.C. SETS

## AMPERITES FOR 2-VOLT BATTERY SETS

Two-volt tube filaments are delicate and easily overloaded. Keeping the tube filaments at their proper voltage with a real regulator like Amperite invariably results in considerably more battery and tube life. The same Amperite can be used for dry cell, air cell, or 2 volt storage battery operation. The proper Amperite is determined by the total filament-current drain of the set. e.g.—for 0.5A use Amperite 5E1, etc.

### REPLACEMENT REGULATORS—A.C.-D.C. SETS. List \$1.00

# QUALITY COMPONENTS *for* RADIO *and* ELECTRONICS

*Products of science and industry with built-in dependability designed and produced for expanding fields of application.*

Today's Radio and Electronics "know-how" at Amphenol comes from pioneering research in keeping with growing needs and rapid development of Electronics. Radio and Electronic design, component functions, the best ways of precision, quantity production, wide distribution and prompt deliveries are the backbone of Amphenol service. Typical Amphenol products selected for listing in these pages from a full line and wide variety of Radio and Electronic supplies only partially indicate the complete line of products and services available for Radio and Electronic needs. Products are also made for special design projects and material specification according to customer's requirements. Inquiries will bring a prompt response with complete detailed information.

*The following twenty-five pages represent a condensed listing of Amphenol's well known and complete line of Radio-Electronic component parts. Illustrated and described are Radio Parts and Accessories, Synthetics for Electronics, High Frequency Cables and Connectors, "AN" Connectors and "AN" Fittings.*

## RETAINER RING "S" TYPE SOCKETS and "CP" TYPE PLUGS

— For quick easy assembly to chassis or panel from 19 gauge (.044") to 16 gauge (.062") using No. 4 Amphenol patented tempered steel retainer ring. High dielectric molded bakelite and cadmium plated contacts for easy soldering. Rotation feature for lining up contacts — wiring for short leads reduces chassis area required. Complete with retainer ring.

"S" Sockets	List Price	"CP" Plugs	List Price
78-84 — 4-Contact	11c	86-CP4 — 4-Prong	11c
78-85 — 5-Contact	11c	86-CP5 — 5-Prong	11c
78-86 — 6-Contact	11c	86-CP6 — 6-Prong	11c
78-87S — 7-Small	11c	86-CP7S — 7-Prong Small	11c
78-78L — 7-Large	11c	86-CP7L — 7-Prong Large	11c
78-87C — 7-Comb. for 7L and 7S	14c	86-CP8 — 8-Prong (Octal)	14c
78-88 — 8-Octal	14c	86-CP9 — 9-Prong (Octal style)	17c
78-89 — 9-Contact	17c	86-CP11 — 11-Prong (Octal style)	24c
78-S11 — 11-Contact	24c		
78-8L — Loktal	17c		

## U.H.F. LOW-LOSS POLYSTYRENE SOCKETS

— Extremely low losses even at the highest frequencies. Transparent body molded from "912-A" polystyrene with extra long contact soldering lugs to prevent possible soldering heat damage. High efficiency in operation for temperature ranges not exceeding 200° F. Mounts in 1 1/8" hole with 1 1/2" mounting centers.

54-8 — Octal Socket ..... 40c list

**LOKTAL SOCKET** — Made of Amphenol "912-A" pure polystyrene like the octal but with floating contacts for small loktal tube prongs. Takes full advantage of the high efficiency of the loktal tubes which do not have a loss-inducing insulating material base.

54-8L — Loktal Sockets ..... 45c list

**U.H.F. MINIATURE LOW-LOSS SOCKETS** — Amphenol "912-A" polystyrene 5 and 6 contact sockets for use with Miniature Amphenol polystyrene plug-in coil forms also listed. Greatly reduces U.H.F. circuit losses. Fits Hytron Bantam Jr. tubes.

54-5M — 5-Contact Miniature Socket ..... 35c list  
54-6M — 6-Contact Miniature Socket ..... 35c list

## No. 54-7P — MINIATURE POLYSTYRENE SOCKET.

An ultra-low loss socket to take full advantage of the newly developed seven prong miniature tubes. Molded from Amphenol 912-A polystyrene.

54-7P — 7-Contact Miniature Socket ..... 35c list

**U.H.F. TIP JACK OR BUSHING** — Contact accommodates .080" phone tip but contact may be removed and the transparent Amphenol "912-A" body used as a high frequency thru-panel bushing as well. Mounts in a plain round 5/8" hole, and is held in place with No. 2-9 retainer ring included.

64-1M — U.H.F. Tip Jack ..... 25c list

**CRYSTAL HOLDER SOCKET** — Same as 33-2 below except molded of ultra low-loss Amphenol "912-A" polystyrene. Contacts are of phosphor bronze, silver plated to keep resistance at a minimum. Contacts may be removed and the polystyrene body used as a two hole feed thru bushing.

64-2 Crystal Holder Socket ..... 30c list

**STANDARD CRYSTAL HOLDER SOCKET** — Of black or mica filled bakelite for crystal holders having two prongs on 3/4" centers. Easily mounted and requires minimum area on chassis or panel. Used extensively for crystal phasing in receivers, crystal control of transmitters and test equipment. May be used as dual tip jack on test panels. Cadmium plated contacts.

33-2 — For 1/8" Diameter Prongs (Black Bakelite)	8c list
33-3 — For 1/4" Diameter Prongs (Black Bakelite)	8c list
33-2T — For 1/8" Diameter Prongs (Mica Filled Bakelite)	14c list
33-3T — For 1/4" Diameter Prongs (Mica Filled Bakelite)	14c list

**MIP MOLDED-IN-PLATE SOCKETS** — World's strongest socket. Sturdy steel mounting plate molded directly into bakelite body, cannot come loose or vibrate. 1 1/8" Mounting centers. Mounts in 1 1/8" hole (MIP7L and MIP20 in 1 1/2" hole). Molded from high dielectric black bakelite.

77-MIP4 — 4-Contact MIP Sockets	10c list
77-MIP5 — 5-Contact MIP Sockets	10c list
77-MIP6 — 6-Contact MIP Sockets	10c list
77-MIP7L — 7-Large MIP Sockets	12c list
77-MIP7S — 7-Small MIP Sockets	10c list
77-MIP8 — 8-Octal MIP Sockets	12c list
77-MIP9 — 9-Octal Style MIP Sockets	15c list
77-MIP11 — 11-Octal Style MIP Sockets	20c list
77-MIP12 — 12-Octal Style MIP Sockets	25c list
77-MIP20 — 20-Octal Style MIP Sockets	50c list

**MIP LOKTAL** — Molded-in-plate socket for loktal tubes. Identical to standard MIP sockets but is smaller in size and has 1 1/8" mounting centers. Mounts in 1 1/8" hole.

88-8X — Loktal Socket ..... 17c list

**MIDGET OCTAL** — Has all the features of the standard MIP sockets, but is smaller in size. For building compact radios and as the companion socket for the above loktal. Mounting centers, 1 3/16". Mounts in 1 1/8" hole.

88-8 — Midget Octal ..... 12c list

**STEATITE SOCKETS** — Recommended for high frequency work where high temperatures are encountered such as in transmitters, amplifiers having high output and for extensive replacement service use. Plates have slotted mounting holes to fit riveting centers from 1 1/2" to 1 3/4".

Less Plate	List	With Plate	List
49-8S4	39c	49-RSS4	40c
49-8S5	39c	49-RSS5	40c
49-8S6	39c	49-RSS6	40c
49-8S7S	39c	49-RSS7S	40c
49-8S7L	49c	49-RSS7L	50c
49-8S8	39c	49-RSS8	40c

**MAGNAL STEATITE SOCKET** — Eleven contact socket of steatite as above. Has 1 1/4" pin circle to accept magnal 11-prong tubes. Has octal style locating keyway. Complete with No. 2-14 ring.

49-8S11L — Magnal Steatite Socket ..... \$1.00 list

**FLOATING OCTAL SOCKETS** — Completely cushioned. Has enlarged mounting holes in the plate into which live rubber grommets are placed for cushioning the socket to obtain vibration free operation. Eliminates most tube microphonics. Mounts in a 1 1/8" hole with two 3/8" screw holes on 1 1/2" centers. Complete with socket, four rubber grommets, two mounting screws, nuts and washers.

MIP8-FK — Socket With Kit ..... 32c list

**REPLACEMENT SOCKETS** — Regular "S" sockets and "CP" plugs (listed to the left, above) assembled with No. 4 retainer ring to nickel-plated steel mounting plate with slotted mounting holes to fit riveting centers from 1 1/8" to 1 3/4". Extensively used by servicemen as replacements.

Socket	Plug	List

78-RS-8L	Loktal	18c

## MICA FILLED BAKELITE SOCKETS

All bakelite sockets and plugs on this page are also available molded from low-loss mica filled bakelite. To order, add letter "T" to catalog number and 6c to list price. Especially desirable for high frequency applications as mica filled bakelite has lower power factor and better dielectric constant.

## MINIATURE SOCKETS

**78-7P RCA**— For 7-prong miniature tube series. Metal shell in socket center for grounding to chassis. Mounts firmly in place in  $\frac{3}{8}$ " hole with No. 2-9 retainer ring.

**78-7P — 7-Contact Miniature Socket**..... 17c list

For socket as above but molded in U.H.F. polystyrene see listing on another page.

**78-5P RAYTHEON** — For 5-prong miniature tubes of the Raytheon hearing aid tube types. Mounts firmly in  $\frac{1}{2}$ " hole with No. 2-10 retainer ring.

**78-5P — 5-Contact Miniature Socket**..... 17c list

**78-5H BANTAM JR.** — For 5-prong Hytron Bantam Jr. miniature tube types with  $\frac{3}{16}$ " diameter prongs. Also in 6-prong types for coil forms and plug connections.

**78-5H — 5-Contact**..... 17c list

**78-6H — 6-Contact**..... 17c list

For socket as above but molded in U. H. F. polystyrene see listing on another page.

**78-S3S PHOTOCCELL** — With contact spacing for practically all three prong miniature photocells—RCA Pee-Wee, Cetron, etc. Mounts firmly in  $\frac{3}{8}$ " hole with No. 2-9 retainer ring.

**78-S3S — 3-Contact**..... 14c list

## MINIATURE PLUGS

**CABLE TYPE** — Extremely compact plugs, used extensively for speaker connections in compact midgets. Also ideal for all plug-in connections where space is limited. Plated brass prongs are deeply recessed in individually molded pockets, preventing shorts due to insulation pulling back. With molded finger grip. Fit miniature sockets above.

**CHASSIS TYPE** — Mounts in a plain round hole,  $\frac{3}{8}$ " in diameter. No screws or rivets required.

Held firmly in place by the No. 2-9 tempered steel retainer ring. Use with female miniature connectors (MPF types) on preceding page.

Chassis	Cable	Prongs	
86-CP-38	71-38	3	18c list
86-CP-48	71-48	4	18c list
86-CP-58	71-58	5	17c list
86-CP-68	71-68	8	17c list

## RECEPTACLES AND PLUGS 110-250 VOLT

Compact receptacles. Molded from high dielectric black bakelite. Rated at 15 amperes, 110 volts, or 10 amperes, 250 volts. Female type has both soldering lugs and binding screws; male has binding screws. 2-Pole type accepts any standard electric plug.

**RETAINER RING TYPE (Receptacles)**  
 61-F — 2-Pole Universal..... 25c list  
 60-F — 3-Pole Polarized..... 35c list

**WITH MOUNTING PLATE (Receptacles)**  
 61-F1 — 2-Pole Universal..... 25c list  
 60-F1 — 3-Pole Polarized..... 35c list

**Retainer Ring Type (Plugs)**  
 61-M — 2-Pole Standard..... 25c list  
 61-MP — 2-Pole Polarized..... 25c list  
 60-M — 3-Pole Polarized..... 35c list

**With Mounting Plate (Plugs)**  
 61-M1 — 2-Pole Standard..... 25c list  
 61-MP1 — 2-Pole Polarized..... 25c list  
 60-M1 — 3-Pole Polarized..... 35c list

Style similar to 61F above except has molded in plate like MIP sockets.  $\frac{1}{2}$ " mounting centers.  
 MIP-61F Receptacle..... 25c list

## SHIELDED CABLE CONNECTORS

**110-250 VOLT CONNECTORS** — With 79-CC-4 cable clamps for cables up to  $\frac{3}{8}$ " in diameter. Clamp take up cable pull and relieves soldered connections of strain. Extremely practical for plug and cable connections of power lines. Fully shielded cable terminals in molded bakelite connection units encased in a tightly covered drawn steel cap—snaps on and fits securely—easily removed. Available without clamp also but with rubber grommets for protection against abrasion.

With Clamp	List Price	2-Pole Universal Receptacle	With Grommet	List Price
61-F11	40c	2-Pole Standard Plug	61-F4	35c
61-M11	40c	2-Pole Polarized Plug	61-M4	35c
61-MP11	40c	3-Pole Receptacle	61-MP4	35c
60-F11	60c	3-Pole Polarized Plug	60-F4	45c
60-M11	60c		60-M4	45c

**MULTI-WIRE CABLE CONNECTORS** — Made of regular Amphenol "S" type tube sockets and "CP" plugs, snugly covered by a steel cap that fits tightly but may be removed with an ordinary screw driver. Cover is 1" in height, black japanned. A rubber grommet protects cable from abrasions. Metal cover shields cable terminal. Small and sturdy. Accommodates cables to  $\frac{1}{4}$ ".

Female	Male		List Price

78-PF11	86-PM11	11-Contact	35c list

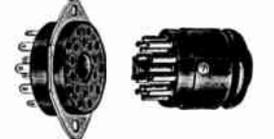

**ONE PIECE MOLDED SPEAKER PLUGS** — Have prongs securely molded into one piece body. Each prong is deeply set into individually molded pockets eliminating the possibility of shorts in case of wire insulation pull-back. Extensively used as speaker plugs, for intercommunication systems, public address, remote control, etc. Fit standard tube sockets.

**20-CONTACT SOCKET AND SHIELDED PLUG** — Molded bakelite plug encased in black japanned steel shells for cables with up to twenty No. 18 conductors. Rubber grommet accepts cables to  $\frac{1}{4}$ " in diameter. Prongs molded directly into bakelite body, eliminating possibility of working loose or getting out of alignment. Molded octal type polarizing stud prevents incorrect insertions. Socket has molded-in steel mounting plate. Mounts in a  $1\frac{1}{2}$ " hole, with riveting centers of  $1\frac{1}{2}$ ".

**79-PM-20 — 20-Prong Plug**..... 75c list  
**77-MIP-20 — 20-Contact Socket**..... 50c list

## ACCESSORIES FOR CABLE CONNECTORS

### CABLE CLAMP— PULL-PROOF LOCKING SHELLS

Designed primarily for cable strain relief. Used with 78-PF and 86-PM connectors and 60 and 61 series. Simply remove rubber grommet for connector and slip this grip into place. Relieves soldered connections of strain. Also used on panels and chassis, to anchor cables firmly in place. Slips easily into any shape hole from  $\frac{1}{8}$ " to  $\frac{3}{8}$ ". No screws or rivets required.

**79-CC-4 Cable Clamp**..... 10c list

**CABLE TYPE** — Cadmium-plated steel covers which can be slipped over "PF" and "PM" Connectors and 60 and 61 series 110-250 volt Connectors. Locks connectors firmly together, preventing accidental pull-aparts. Especially suited for public address work. Also used extensively in shops, etc., to pull proof connections in power cords. Set consists of one male and one female threaded shell.

CABLE SET 15-C-CAB

CHASSIS SET 16-C-CHA

**CHASSIS TYPE** — Similar to the cable type in design except that one section is a threaded shell which fits under "S" type socket or retainer ring type 60 and 61 series. The other shell slips over the cable connector.

**15-C-CAB — Per Set**..... 25c list  
**16-C-CHA — Per Set**..... 25c list

### MICA FILLED BAKELITE SOCKETS

All bakelite sockets and plugs on this page are also available molded from low-loss mica filled bakelite. To order, add letter "T" to catalog number and 6c to list price. Especially desirable for high frequency applications as mica filled bakelite has lower power factor and better dielectric constant.

Essential Quality Parts for the RADIO-ELECTRONIC Industry

# AMPHENOL Builds to the Future of ELECTRONICS

CABLES • CONNECTORS • SOCKETS  
PLASTICS • PLUGS

**PREFOCUSED LAMP RECEPTACLE**—For medium-base prefocused lamps as used in movie projectors. Also adaptable for using prefocused lamps in flood lights, beacons, searchlights, etc. and for experimental work. Molded from special high heat-resisting bakelite to withstand temperatures to 450° F. Special air cooled design. Conservatively rated at 1000 watts, 110-250 volts. Listed by underwriters laboratories. Heavy brass contacts assure minimum resistance for maximum light intensity. Can be installed in most movie projectors without drilling new holes. Heavy fiber insulator to cover terminals after wiring included with receptacle alone, not needed with cap.

Insulating cap for receptacle available for use when socket is suspended or to add 1/2" to height of socket or to insulate wire terminals from panel.

- 98-8 Receptacle only ..... \$1.75 list
- 98-8A Receptacle and cap ..... \$2.25 list

**MAGIC EYE ASSEMBLY**—For the easy adapting or replacing of a six prong magic eye tube in any radio having automatic volume control. Also for FM receivers, test instruments, signal tracers and as volume level and modulation indicators. Includes one-megohm target-plate resistor wired into socket and five wire color coded cable 22" long. Mounting bracket is slotted for tube adjustment. Complete as above with antique bronze escutcheon and necessary hardware for assembly. Tube not included.

- 58-MEA6 Complete Magic Eye Assembly ..... \$1.25 list

**OCTAL MAGIC EYE ASSEMBLY**—Similar to the above, but for octal type magic eye tubes. Has a shorter bracket for the smaller tube size. Complete with 6 wire 22" long color coded cable and full vision type antique bronze escutcheon and necessary hardware for assembly. Tube not included.

- 58-MEA8 Complete Octal Magic Eye Assembly ..... \$1.25 list

**CATHODE RAY ASSEMBLY**—Widely used for mounting 902, 913 and similar cathode ray tubes. Bakelite socket mounted in a protective metal shell, completely wired with eight wire 22" long color coded cable. Adjustable "L" bracket for mounting on panel front or base. Tube not included.

- 58-913 Complete Cathode Ray Assembly ..... \$1.00 list

**MAGIC EYE ESCUTCHEONS**—No. 10-1 hood type, large size for mounting over panel or cabinet hole. No. 10-2 Octal base full vision type. Brass with antique bronze finish.

- 10-1 — For 6-Prong Single Eye Tubes ..... 25c list
- 10-2 — For 8-Prong Double Eye Tubes ..... 30c list

**TAP CHANGE SWITCH**—An 8-position single pole continuous switch with white numerals clearly visible in window cap. Supplied with markings 1-2-3-4-5-6-7-8 or impedance markings 0-2-4-8-16-250-500. Side set screw locks switch-arm in position, preventing accidental tap changes.

- 38-1 — With Numerals 1 to 8 ..... 75c list
- 38-2 — With Impedance Markings ..... 75c list

**BULB TESTER SOCKET**—A standard 7-contact combination socket for large and small 7-prong tubes and has a large center contact for testing miniature bulbs, either screw or bayonet base types.

- 78-7CD — With Retainer Ring ..... 44c list
- 78-RS7-CD — With Mounting Plate ..... 45c list

**UNIVERSAL GRID CAP**—A grid cap of improved design, wired or unwired, for universal use with tube grid caps from 1/4" to 3/8" diameter including standard glass and metal tubes. Spring brass contacts in bakelite body.

- 63-1 — Unwired ..... 15c list
- 63-1W — Wired ..... 20c list

**UNWIRED ADAPTERS**—A simple way to make adapter units which may be used for modernizing tube checkers and analyzers, adapting new tubes to old circuits — for connections to output meter, phonograph pick-up, headphones, extra speakers, recorders and other adapter uses.

**ADAPTER SOCKET TOPS ONLY—20c list**

- 44-4 — 4-Contact — For Small Bases — 44-7S ..... 7 Small
- 44-5 — 5-Contact — For Small Bases — 44-8 ..... 8-Octal
- 44-6 — 6-Contact — For Small Bases — 44-L ..... Loktal
- 44-7L — 7-Large — Fit Large Bases Only — 44-7C ..... 7 Comb.

**LOKTAL ADAPTER BASES**—Similar to small bases above but have metal band and lock-in stud like loktal tubes.

- 44-13 Loktal Base (No side hole or side stud) ..... 55c list

**ADAPTER BASES ONLY in TWO STYLES**—With 3/16" side hole for lead out wiring or with a side stud accommodating a metal tube grid cap clip. Both tops (above) and bases are drilled for self tapping screws which are supplied with bases.

Number of Prongs	SMALL BASES	
	Side Hole List 20c	Side Stud List 30c
4-Prong	50-4D	50-4G
5-Prong	50-5D	50-5G
6-Prong	50-6D	50-6G
7-Small	50-7SD	50-7SG
8-Octal	50-8SD	50-8SG
<b>LARGE BASES</b>		
7-Large for 44-7L and 44-7C sockets only	50-7LD	50-7LG
8-Octal for 44-7L and 44-7C sockets only	50-8LD	50-8LG

**ADAPTER SHELL**—Of metal tubing, black japan finish, for snap in connection on either end of Amphenol "S" type sockets or "CP" type plugs. Connection is made quickly and socket or plug is held firmly but is easily removed. Combinations possible from 4-prong or contact to 11-prong or contact. May also be used with 110 volt plugs and receptacles for inserting small resistors or condensers in a line. In two types — blank or side hole with rubber grommet for bringing out leads.

- 3-14 — Without Side Hole ..... 16c list
- 3-14D — With Side Hole ..... 20c list

**MINIATURE TUBE ADAPTERS**—Unwired for testing miniature tubes. 44-17-8 Socket top for 7-prong miniature tubes, 44-12-8 socket top for Hytron Bantam Jr. 5-contact tubes, and 44-26-8 socket top for Raytheon 5-prong miniature tubes. All have octal bases.

- 44-17-8 for 7-Prong Miniature Tube ..... 50c list
- 44-12-8 for 5-Contact Hytron Bantam Jr. Tube ..... 50c list
- 44-26-8 for 6-Prong Raytheon Miniature Tube ..... 50c list

**BLANK SOCKET**—"S" type socket as listed on another page for mounting in the standard 1 1/4" "S" type socket hole. Used primarily as a dummy or spare socket on tube checkers and analyzers so a new "S" type socket can easily be added when a socket for new type tubes is required. May be used as a bakelite bushing by drilling a hole in the center.

- 78B Blank Socket ..... 6c list

**SINGLE CONTACT SOCKETS**—Of molded bakelite for mounting in 3/16" hole — held firmly in place by Amphenol Retainer Ring No. 2-11. Contacts recessed approximately 1/8" below the top of the tip jacks prevent accidental shorts from contact to chassis. The bakelite body may be used as a feed thru bushing by removing the contact. Seven colors and 4 prong diameters for quick wiring identification.

Red, green, blue, yellow, gray, walnut or black. If no color is specified, black will be furnished.

- 78-1P — For .080" Phone Tip ..... 7 1/2c list
- 78-1S — For 3/32" Plug ..... 7 1/2c list
- 78-1M — For 1/8" Plug ..... 7 1/2c list
- 78-1L — For 5/32" Plug ..... 7 1/2c list

**SINGLE PRONG PLUGS**—A small but extremely useful plug in colors, for connection with sockets listed above. Red, green, blue, yellow, gray, walnut or black. If no color is specified, black will be furnished.

- 71-1S — For 3/32" Socket ..... 6c list
- 71-1M — For 1/8" Socket ..... 6c list
- 71-1L — For 5/32" Socket ..... 6c list

PLASTICS

**AMERICAN PHENOLIC CORPORATION** Chicago 50 IN TORONTO AMPHENOL LTD.

# AMERICAN PHENOLIC CORPORATION

Chicago 50, Illinois

IN TORONTO • AMPHENOL LIMITED

**LOW-LOSS COAXIAL CABLE CONNECTORS** — for cables up to  $1\frac{3}{8}$ " O.D. May be reamed out for cable up to  $\frac{3}{4}$ " O.D. Shell machined from solid brass, plated in heavy polished chrome. Connector elements made of "912-A" Amphenol low-loss polystyrene. Male shells have threaded locking rings for tight connections. Cable units have metal clamp for tight cable grip and safe ground connection. CHASSIS UNIT mounts in  $1\frac{3}{8}$ " hole and has soldering lug, lock washer and nut.

- 93-M — Male Cable Connector ..... \$1.50 list
- 93-F1 — Female Cable Connector ..... \$1.50 list
- 93-F — Female Cable Connector ..... \$1.50 list
- 93-M1 — Male Cable Connector ..... \$1.50 list
- 93-C — Female Chassis Connector ..... \$1.25 list
- 93-C1 — Male Chassis Connector ..... \$1.25 list

## LOW-LOSS "912-A" COAXIAL CABLE END TERMINAL CAP

— For connection to Antenna Cable End Terminal as listed below. Molded in an umbrella like design, of pure polystyrene, Amphenol high dielectric, low-loss material. A coat of Amphenol "912-A" liquid polystyrene on the cap threads and wire opening will make the terminal connection weather-tight. Size —  $\frac{3}{4}$ " high and  $1\frac{1}{4}$ " across.

90-16 End Terminal Cap as above ..... 25c list  
For Liquid "912-A" See Synthetics Page.

## HEAVY DUTY POWER CONNECTORS

— Has four, flat, heavy brass blades in the male molded bakelite unit for connection with nut-back contacts of phosphor bronze in the molded bakelite female unit. Frequent use is possible over long periods without damage even with heavy current loads of 15 amperes at 125 volts or 10 amperes at 250 volts. Full, body-tight heavy brass shell — bright cadmium plate. Polarized with shell keys and keyways. Terminals of bakelite units are numbered for quick wiring. Strain is taken up by a strong cable clamp grip. Grounding screw in body for safe wiring. Threaded locking ring keeps connections tight.

- 92-M — Male ..... \$2.50 list
- 92-F1 — Female ..... \$2.50 list
- 92-F — Female ..... \$2.50 list
- 92-M1 — Male ..... \$2.50 list

**MINIATURE CABLE CONNECTORS** — For shielded or unshielded cables having up to six conductors. Molded bakelite elements are housed in cadmium plated brass shells, only  $1\frac{3}{16}$ " long and  $1\frac{1}{16}$ " O.D. Bakelite element held in place by side set screw. Staggered contact spacing polarizes elements so that incorrect insertions are impossible.

91-PCG6M	91-PCG6F	6-Contact	34c list

## LOW-LOSS COAXIAL CABLE END TERMINAL

— For connection of coaxial cable to antennas, open wires and matching stubs. For a suspended connection or for connection to bracket or insulator in  $\frac{3}{8}$ " hole without strain on the aerial. May be sweated on copper tube cable and body solder lug may be used for connection to dipole and doublet aerials. When used with terminal cap listed above, connection is weather-tight.

93-M5 Antenna Cable End Terminal ..... \$1.50 list

## HEAVY DUTY CHASSIS OR PANEL RECEPTACLE

— With male or female molded bakelite unit for use with Heavy Duty Power Connectors — Use 92-M with 92-C and 92-F1 with 92-C1. Mount in  $1\frac{1}{4}$ " hole in any material thickness up to  $\frac{3}{4}$ ". Complete with lock washer, spacer washer and hexagon nut. Can be covered with CCC8 cap and chain described below, when not in use.

- 92-C — Female ..... \$2.50 list
- 92-C1 — Male ..... \$2.50 list

## HEAVY DUTY FLUSH RECEPTACLES

— With male or female bakelite unit in strong steel body-frame. Used with Heavy Duty Power Connectors — 92-F1 with 92-M2 and 92-M with 92-F2 — in regular wall switch boxes. Full, open connection end will come thru wall plate  $\frac{3}{8}$ " for good connection to grip locking ring or for cap and chain described below for a closed outlet when not in use.

- 92-M2 — Male ..... \$2.60 list
- 92-F2 — Female ..... \$2.60 list
- 94-2CH — Wall Plate for use with above ..... 75c list

**CAP AND CHAIN** — Heavy Duty Chrome Plated Brass Cap with bead chain similar to CCC1 and CCC3 but larger in size, to be used with chassis and flush receptacles above and chassis units of heavy duty radio connectors below.

79-CCC8 Cap and Chain ..... 50c list

**RUBBER CUSHIONS** — Live rubber cushions for inserting in chassis or panel riveting holes to lessen vibration of an assembled part such as a tube socket. Molded from pure rubber.

- 22-8 — Rubber Cushion for  $\frac{3}{8}$ " Hole. 100 for \$3.00
- 22-10 — Rubber Cushion for  $\frac{1}{2}$ " Hole. 100 for 1.50

**BLACK RUBBER GROMMETS** — For protecting cables from abrasions when passing thru a chassis or panel hole.

- 22-1 — For  $\frac{3}{16}$ " hole,  $\frac{1}{16}$ " I.D. Grommet ..... 100 for \$1.25
- 22-2 — For  $\frac{1}{8}$ " hole,  $\frac{1}{16}$ " I.D. Grommet ..... 100 for 1.05
- 22-3 — For  $\frac{3}{16}$ " hole,  $\frac{1}{8}$ " I.D. Grommet ..... 100 for .50

**ANTI-MICROPHONIC KIT** — Socket cushions and all the necessary parts for making floating connections using Amphenol MIP sockets. Contents in an envelope with complete instructions consist of four live rubber cushions, metal washers, mounting screws and nuts. Used to overcome tube microphonics wherever cushioned sockets are necessary, especially in photo-cell work, ultra-sensitive circuits, and for some battery tubes.

11-3K Kit Less Socket ..... 20c list

Essential Quality Parts for the RADIO-ELECTRONIC Industry

# AMPHENOL Builds to the Future of ELECTRONICS

CABLES • CONNECTORS • SOCKETS  
PLASTICS • PLUGS

## Standard Group

**SINGLE CONTACT MICROPHONE CONNECTORS — SHIELOE CABLE TYPE** — Unbreakable machined brass shell chrome-plated; with coupling ring for tight connections. Spring cord protectors accommodate cables to 1/4" diameter.

- 75-MC1F — Female ..... 50c list
- 75-MC1M — Male ..... 40c list

**SIDE CABLE OUTLET** — Designed to be placed between a microphone and stand having 5/8" 27 standard threads. Its purpose is to provide an outlet for the microphone cable where it is not desired to run it through the stand tubing. Efficient cable grip relieves strain. Heavy metal castings, finished in polished chrome.

- 57-3C03 ..... 76c list

**CHASSIS UNIT** — Use in holes — .385" to ground to chassis or 1/2" for 2 independent circuits. Has extruded fibre washer, flat fibre washer, flat solder lug washer and locking nut. Use MC1F or MC1F-A cable connector.

- 75-PC1M — 1-Contact ..... 30c list

**CLOSED CIRCUIT CONNECTOR** — Same as PC1M but circuit closes when cable connector is removed, eliminating open circuit grid howls. Same thread and hardware supplied as on PC1M. Contact is spring-actuated. Use MC1F or MC1F-A as the cable connector.

- 75-CL-PC1M — Closed Circuit ..... 40c list

**PRESSURE CABLE CONNECTOR** — Like MC1M listed above but center insulated contact is enforced by a heavy coil spring at the back for positive connection. Used for any unit fitting MC1M. Supplied with spring cord protector for cables to 1/4".

- 75-SP-MC1M — Pressure Connector ..... 50c list

## ANGLE CONNECTOR UNIT

— For cable connection at right angles to chassis. Used on amplifiers, transmitters, and other apparatus with PC1M, SP-PC1M or CL-PC1M. No need for long bends in cable with this unit which prevents breakage of cable shields and center conductors. Shell portion, polished chrome. With spring cord protector for cables to 1/4".

- 75-MC1F-A — Female Angle Connector ..... 60c list

## PHONE PLUG ADAPTER

For MC1F and MC1F-A connectors and any standard phone jack — no soldering or wiring.

- 75-MC1P — Phone Plug ..... 45c list

## MICROPHONE SWITCH

Compact, unbreakable microphone switch. Male threads fit the MC1F and MC1F-A. Coupling ring fits any other 75 Series connector having coupling threads. No tools or wiring is required. May be connected directly to any mike which has the PC1M installed, also between amplifier and mike cable, or between two cables connected with MC1M and MC1F. PUSH-TO-TALK, and release the button for stand-by; or SLIDE SWITCH forward for permanent connection. Switch short-circuits mike. Shell machined from solid brass, chrome plated.

- 75-MC1S — Switch ..... \$1.00 list

## STAND CONNECTOR

Screws on to top of any standard microphone stand, Female thread is 5/8"-27. Finished in polished chrome brass. Permits easy removal of mike.

- 91-SC3F — 3-Contact Female ..... \$1.00 list
- 91-SC4F — 4-Contact Female ..... \$1.10 list

**LOW-LOSS MICA FILLED INSERTS** — Add "T" to catalog numbers and 6c to list for higher dielectric with improved power factor of low-loss mica filled bakelite inserts for connectors. NOTE: Not available in 75 Series.

## Special Group

**1 AND 2 CONTACT CONNECTORS — CABLE TYPE** — For small coaxial cables, microphone cables, speakers and other connections. Standard sleeve type contacts and male prongs for positive contact. Unbreakable brass shell, polished chrome finish. Molded element of high dielectric black bakelite. Screw type coupling ring for tight connections and spring cord protector for cables up to 5/16".

- 80-F — 1-Contact Female ..... 65c list
- 80-M — 1-Prong Male ..... 65c list
- 80-MC2F — 2-Contact Female ..... 80c list
- 80-MC2M — 2-Prong Male ..... 80c list

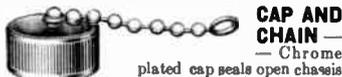

**FOR LARGER CABLES** — Male connectors like 80-M and 80-MC2M above except has larger back shell for use of a larger spring cord protector which accommodates cables to .410" diameter.

- 80-91 — 1-Prong Male ..... 65c list
- 80-95 — 2-Prong Male ..... 80c list

## CHASSIS UNIT WITH COUPLING RING

— For connection on chassis, panel or threading into microphone body with standard 5/8"-27 thread. Coupling ring engages 80-F or MC2F Cable Connector. Brass shell, chrome plated. With hex nut, lock washer, and flat washer. Mounts in 3/8" hole.

- 80-MSP — 1-Pole Male ..... 80c list
- 80-SP-MC2M — 2-Pole Male ..... 90c list

## CAP AND CHAIN

— Chrome plated cap seals open chassis units against dust, eliminating noisy connections. Used with any threaded 1 or 2-conductor chassis unit — PC1M, C1-PC1M, 80-C, 80-CR, PC2F, etc.

- 75-CCC-1 — Cap and Chain ..... 50c list

## CHASSIS UNITS — LOCK NUT MOUNTING

— Shielded chassis connectors. Complete with lock washer and hexagon locking nut. Mounts in 11/16" hole.

- 80-C — 1-Contact Female ..... 40c list
- 80-C1 — 1-Prong Male ..... 40c list
- 80-PC2F — 2-Contact Female ..... 45c list
- 80-PC2M — 2-Prong Male ..... 45c list

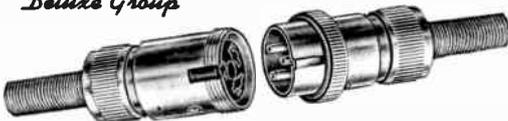

## RIVETING PLATE CHASSIS UNIT

For fast mounting with rivets or replacement where units listed above are too small. 11/16" dia. plate part of entire unit, machined from solid brass, chrome plated. 27 mounting centers.

- 80-CR — 1-Pole Female ..... 50c list
- 80-PC2-CR — 2-Pole Female ..... 65c list

## Deluxe Group

**3 AND 4 CONTACT MICROPHONE CONNECTORS** — Molded bakelite elements encased in unbreakable chrome-plated polarized brass shells. By removing cap and spring cord protector, connector can be screwed into microphone having 5/8"-27 thread, standard for this industry. Screw type coupling ring prevents accidental disconnections. 3-Contact connectors take cables up to 1/2" diameter; 4-contact to 3/8" diameter.

- | Male     | Female   | 3-Contact | List   |
|----------|----------|-----------|--------|
| 91-MC3M  | 91-MC3F  | 3-Contact | \$1.00 |
| 91-MC3M1 | 91-MC3F1 | 3-Contact | 1.00   |
| 91-MC4M  | 91-MC4F  | 4-Contact | 1.10   |
| 91-MC4M1 | 91-MC4F1 | 4-Contact | 1.10   |

## CHASSIS CONNECTORS

For 3/8" hole in any panel or chassis up to 1/2" thick. Permanently fixed element in plated-brass shell. Complete with mounting ring, lock washer, and hexagon lock nut.

- 91-PC3F — 3-Contact Female ..... 50c list
- 91-PC3M — 3-Prong Male ..... 50c list
- 91-PC4F — 4-Contact Female ..... 55c list
- 91-PC4M — 4-Prong Male ..... 55c list

## CAP AND CHAIN

— Chrome-plated cap seals open chassis units against dust, eliminating noisy connections. Used with any 3 or 4 contact chassis unit with threads.

- 91-CCC-3 — For PC3F, PC4F, etc. .... 50c list

## SPECIAL CHASSIS UNIT

— Similar to regular chassis connector but for use on thick panels. Female units fit panels to 3/4" thick. Recessed solder lugs prevents physical damage and danger of shock. Use MC3M or MC4M as cable connector.

- 91-SP-PC3F — 3-Contact Female ..... \$1.00 list
- 91-SP-PC4F — 4-Contact Female ..... \$1.10 list

Special male units fit panels up to 3/4". Front extends 1/2". Chrome plated shell with coupling ring. Use with MC3F or MC4F cable connector.

- 91-SP-PC3M — 3-Prong Male ..... \$1.00 list
- 91-SP-PC4M — 4-Prong Male ..... \$1.10 list

## AMPHENOL HIGH QUALITY—EXTRA EFFICIENT ACORN SOCKETS—WITH 5 AND 7 CONTACTS

The Amphenol Ultra High Frequency Acorn Tube Sockets illustrated are designed to meet the exacting, rigid Army-Navy and commercial specifications and are made of the best known materials available today for minimum electrical loss at ultra high frequencies.

Treatment of the ceramic support does not use the out-moded method of glazing for moisture protection which cannot be done all over due to mechanical difficulties. Scientific tests have proven that unglazed ceramic is a better

6 Contact Type Acorn Socket 1" x 1-3/8".

dielectric material when perfectly dry. To protect this condition Amphenol Acorn Sockets are silicone treated all over. Under this condition the electrical properties are improved over the ceramic alone. Moisture collecting on the surface is isolated into drops that are well insulated from each other, thus insuring high resistivity.

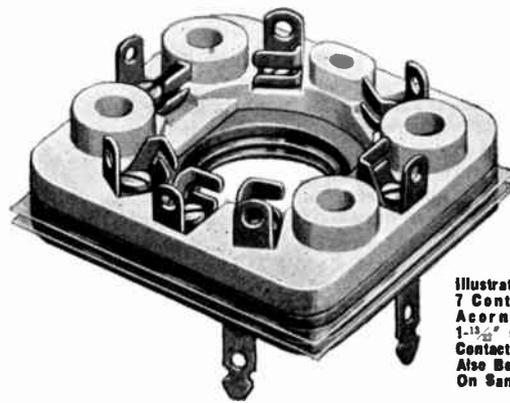

Special and exclusively designed contacts in Acorn sockets hold the tube without requiring high insertion and withdrawal pressures which normally would break the glass seal to the pins. Amphenol Acorn Sockets use a rotary insertion and withdrawal guided by barriers to insure centering and making contact in the same groove, thus eliminating any change in external capacitances. Construction is such that contact is assured although tube pins may be slightly misaligned.

The contacts are made of Grade A phosphor bronze, heavily silver plated. For the military services beryllium copper contacts heat treated and heavily silver plated are also available. The ceramic bases are made of Grade G steatite silicone treated.

By-pass condensers for cathode and screen are built into the socket to keep the lead inductance low. The 151-011 Amphenol Acorn Socket design lends itself to mounting on the variable condenser shield plate so as to get short connections for the U.H.F. bands. The by-pass condenser can also be mounted to this same plate for further efficiency.

151-011 Amphenol Acorn Socket is designed for mounting with screen and cathode by-pass condensers on chassis punched to fit (see detailed cross section). Overall dimensions 1" x 1-3/8", no mounting holes are provided in the ceramic part.

151-003, 151-017, 151-005 and 151-019 Amphenol Acorn Sockets have two mounting positions 60° apart on 13/16" centers and 5/32" diameter holes molded in raised bosses for strength. Underside of the socket is ground flat to insure perfect contact when self contained by-pass condensers are used integral with chassis. Size 1-13/32" x 1-13/32".

Illustrated is The 7 Contact Type Acorn Socket 1-13/32" square. 6 Contact Type Can Also Be Obtained On Same Base.

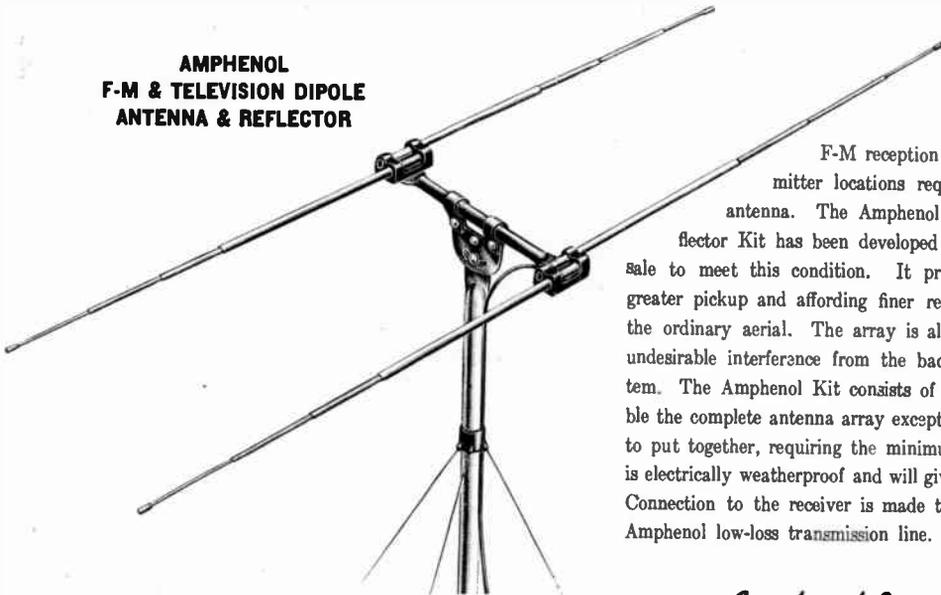

### LISTED STYLES OF ACORN SOCKETS

- 151-011 5 Contact cathode and screen by-pass Acorn Socket—bronze contact—grounding plate cannot be used. For mounting directly on chassis. Size 1" x 1-3/8".
- 151-003 5 Contact Acorn Socket—bronze contact—integral chassis mounting type. Size 1-13/32" x 1-13/32".
- 151-017 5 Contact cathode and screen by-pass Acorn Socket—bronze contact—complete with grounding plate. Size 1-13/32" x 1-13/32".
- 151-005 7 Contact Acorn Socket—bronze contact. Size 1-13/32" x 1-13/32".
- 151-019 7 Contact cathode by-pass Acorn Socket—bronze contact—complete with grounding plate. Size 1-13/32" x 1-13/32".

Essential Quality Parts for the **RADIO-ELECTRONIC** Industry

## BETTER F-M AND TELEVISION RECEPTION WITH AMPHENOL DIPOLE ANTENNAS

### AMPHENOL F-M & TELEVISION DIPOLE ANTENNA & REFLECTOR

F-M reception at some distances from transmitter locations requires a better than ordinary antenna. The Amphenol F-M Dipole Antenna and Reflector Kit has been developed for postwar requirements and sale to meet this condition. It provides high gain resulting in greater pickup and affording finer reception than is possible with the ordinary aerial. The array is also directional which eliminates undesirable interference from the back or reflector side of the system. The Amphenol Kit consists of the necessary parts to assemble the complete antenna array excepting the guy wires. It is easy to put together, requiring the minimum of experience and time. It is electrically weatherproof and will give years of trouble-free service. Connection to the receiver is made thru the special, high-efficiency Amphenol low-loss transmission line.

Any array that is erected must be able to withstand the forces of the elements to which it is subjected. In designing the Antenna, Amphenol Engineers incorporated the following features:

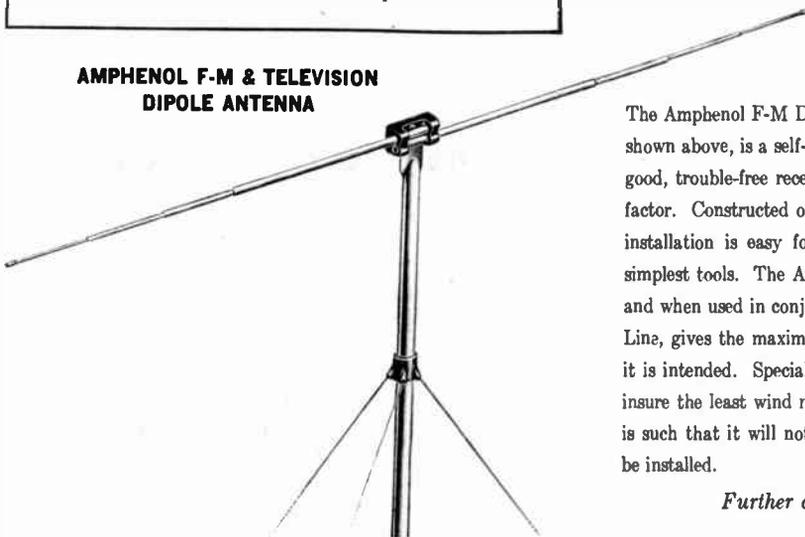

- High electrical efficiency thru use of high dielectric insulation.
- Lightness and superior strength in tubular steel construction resisting extreme wind velocity, sway and damage caused by birds.
- Swivel feature of both types of antenna for reduction or omission of undesirable reflections resulting in multipath distortion in television reception.

Antenna or arrays are available to cover effectively the entire range of television and F-M Frequencies.

### *Amphenol Provides Special Transmission Line*

*To match the Amphenol Dipole Antennas, a special low-loss transmission line has been developed which will bring in the signal to the receiver with minimum attenuation. Amphenol low-loss transmission line is available with the kit in convenient 75 foot lengths or can be ordered separately in longer lengths to meet insulation requirements.*

### AMPHENOL F-M & TELEVISION DIPOLE ANTENNA

The Amphenol F-M Dipole Antenna, as well as the Antenna-Reflector shown above, is a self-supporting array which is engineered to provide good, trouble-free reception in the F-M bands where losses are a big factor. Constructed of metal, it is very light weight, yet strong, and installation is easy for the average person who is handy with the simplest tools. The Amphenol Dipole Kit is electrically weatherproof and when used in conjunction with Amphenol Low-Loss Transmission Line, gives the maximum reception efficiency for the bands to which it is intended. Special precautions have been taken in the design to insure the least wind resistance. The overall appearance of the array is such that it will not act to deface any structure on which it is to be installed.

*Further details and price information  
upon request.*

### Characteristic Reference

**AMPHENOL 912A is POLYSTYRENE**  
**AMPHENOL 912B is ACRYLIC**  
**AMPHENOL 9746 is TRANSPARENT VINYL**

**AMPHENOL "912-A" SHEET STOCK** supplied in sizes per number listing below. 4" x 8" sizes have optical clarity suitable for dial window and gauge glass applications.

19-0624	4" x 4" x 1/8"	\$ .60
19-0934	4" x 4" x 1/4"	.83
19-1264	4" x 4" x 3/8"	.86
19-1874	4" x 4" x 1/2"	.77
19-2604	4" x 4" x 5/8"	1.00
19-0628	4" x 8" x 1/8"	1.03
19-0938	4" x 8" x 1/4"	1.11
19-1258	4" x 8" x 3/8"	1.19
19-1878	4" x 8" x 1/2"	1.41
19-2608	4" x 8" x 5/8"	1.76

**AMPHENOL "912-A" RODS** — Supplied in lengths up to 48" but if definite length is not specified, 12" lengths will be supplied per number listing below. For lengths shorter than 12" there is a small cutting charge. Also available in diameters — 1 1/8" to 4 1/2" — 12" lengths or in lengths up to 48". Prices on request.

Number	Diameter	List Price Per Foot
19R125	1/8"	\$ .15
19R187	1/4"	.20
19R260	3/8"	.40
19R312	1/2"	.43
19R375	5/8"	.45
19R500	3/4"	.80

# AMPHENOL Builds to the Future of ELECTRONICS

CABLES • CONNECTORS • SOCKETS  
PLASTICS • PLUGS

**A — PLUG-IN COIL FORMS** — Amphenol "912-A" polystyrene superior coil forms. Prong spacing fits standard tube sockets. Diameter of coil  $1\frac{1}{4}$ "; length of body  $2\frac{1}{4}$ ". Impregnate wound coils with Liquid "912-A".

24-4P — 4-Prong .....	50c list
24-5P — 5-Prong .....	55c list
24-6P — 6-Prong .....	60c list

**B — MINIATURE PLUG-IN TYPES** — Small plug-in coil forms of Amphenol "912-A" polystyrene. Only  $\frac{3}{8}$ " in diameter. For transceivers, low-power transmitters and receivers for UHF. For use with 54-5H and 54-6H Miniature sockets listed on socket page.

24-5M — 5-Prong .....	40c list
24-6M — 6-Prong .....	40c list

**C — MINIATURE COIL FORM** — Of Amphenol "912-A" polystyrene. Raised hole in center of base for self-tapping screw.  $\frac{3}{4}$ " O.D.,  $1\frac{1}{8}$ " long.

24 — Coil Form .....	15c list
----------------------	----------

**D — COMPLETE UNIVERSAL INSULATOR** — Of Amphenol "912-A" polystyrene with fittings, binding screws and soldering lugs. Over-all height of insulator is  $3\frac{1}{2}$ ". With assembled hardware, 4". Mounting holes on  $1\frac{1}{2}$ " centers.

66-60 .....	\$1.00 list
-------------	-------------

**E — UNIVERSAL INSULATOR "D" AS STAND-OFF — FEED-THRU — LEAD-IN** — Section construction for assembling insulators below or above surface. With additional insulating tubes, used as aerial lead-in thru walls for antenna feeders.

**UNIVERSAL INSULATOR HARDWARE AND PARTS**

- |   |     |
|---|-----|
| 66-167 — Center Rod $\frac{3}{8}$ " long, for stub insulator .....  | 15c |
| 66-168 — Center Rod $2\frac{5}{8}$ " long, for standard insulator with 1 tube .....   | 18c |
| 66-169 — Center Rod $4\frac{5}{8}$ " long, for insulator with 2 tubes .....   | 20c |
| 66-170 — Center Rod $6\frac{5}{8}$ " long, for insulator with 3 tubes .....   | 25c |
| 66-165 — Top Brass Bushing with screw and solder-lug .....  | 20c |
| 66-166 — Bottom Hex. Fitting with screw and solder-lug .....  | 15c |
| 66-60T — J — Insulator Tube as described above can be fitted together and cemented with Liquid "912-A" as feed-thru for H.F. and high voltage lines and as forms for R.F., Ant., and I.F. coils. Over-all length $2\frac{1}{4}$ ", diameter is $\frac{1}{2}$ " for 2" of the length and $\frac{3}{8}$ " for the remaining $\frac{1}{2}$ ". Has $\frac{1}{4}$ " hole thru center ..... | 25c |
| 66-60B — H — Insulator Base (Bushing) — Versatile type of feed-thru bushing for H.F. or high voltages. Used with tubes "J" and hardware above for assembling many types of insulators. Over-all length 1" .....   | 25c |

**F — STUB INSULATOR** — Similar to "D" No. 66-60 but length of insulator is only 1". For mounting coils, condensers, and other parts carrying H.F. or high voltage currents. Over-all length,  $1\frac{1}{8}$ ".

66-61 .....	80c
-------------	-----

**G — K — LARGE AND SMALL STAND-OFF U.H.F. INSULATORS** — Of Amphenol "912-A" polystyrene. For indoor or outdoor use. Non-hygroscopic. Large type  $\frac{3}{4}$ " in diameter. Small type  $\frac{1}{2}$ " in diameter. Wire held in place by screw or solder-lug. Hex. screw for binding wire in place.

Number	Length	Diameter	List
66-1 — Small .....	$1\frac{1}{2}$ "	$\frac{1}{2}$ "	50c
66-2 — Small .....	$2\frac{1}{2}$ "	$\frac{1}{2}$ "	60c
66-3 — Large .....	$2\frac{1}{2}$ "	$\frac{1}{2}$ "	1.10
66-4 — Large .....	$4\frac{1}{2}$ "	$\frac{1}{2}$ "	1.35
66-5 — Large .....	6"	$\frac{1}{2}$ "	1.50

**$\frac{5}{16}$ " POLYSTYRENE BEADS** — Widely used Amphenol insulating beads can be strung on wires up to No. 12 solid or No. 14 stranded. Hole diameter is .080"; length  $\frac{1}{2}$ "; over-all diameter is  $\frac{5}{16}$ ". When stringing cables figure 28 beads to the foot.

73 — Box of 250 Beads ..... \$2.50 per box list

**$\frac{3}{16}$ " POLYSTYRENE INSULATING BEADS**

A small bead for use in small transmission lines on wires up to No. 22 stranded or No. 20 solid wires.

Hole diameter, .040"; length  $\frac{3}{8}$ "; over-all diameter  $\frac{3}{16}$ ". When stringing cables figure 35 beads to the foot.

73-1 — Box of 500 Beads ..... \$4.50 per box list

**TWO-WIRE POLYSTYRENE BEADS** — A two hole bead for making balanced lines strung on wires up to No. 18 solid. Hole diameters, .050"; length,  $\frac{1}{2}$ "; over-all diameter is  $1\frac{1}{16}$ ". When stringing cables figure 27 beads to the foot.

73-2 — Box of 250 Beads ..... \$3.25 per box list

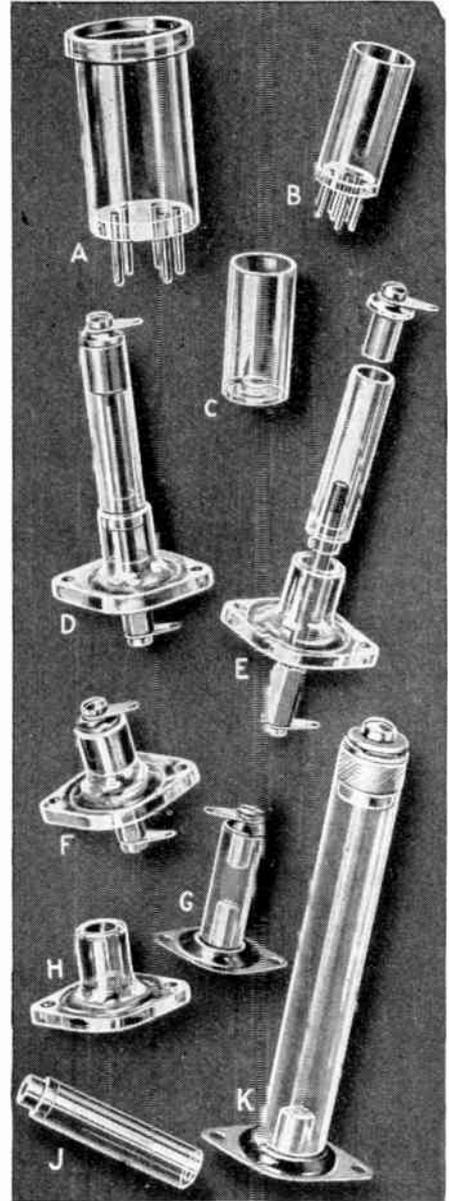

**$\frac{5}{16}$ " HIGH TEMPERATURE BEADS** — Like No. 73 listed above but of mica-filled bakelite for use up to temperatures of 285° F.

73-T — Box of 250 Beads ..... \$5.00 per box list

**$\frac{3}{16}$ " HIGH TEMPERATURE BEADS** — Like No. 73-1 beads above but of mica-filled bakelite for use up to temperatures of 285° F.

73-1T — Box of 500 Beads ..... \$8.50 per box list

Amphenol "POLYWELD" is the proven efficient coil dope and plastic cement and sealer—completely listed on a following page.

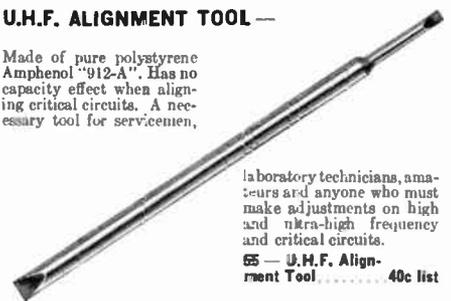

**U.H.F. ALIGNMENT TOOL —**

Made of pure polystyrene Amphenol "912-A". Has no capacity effect when aligning critical circuits. A necessary tool for servicemen,

laboratory technicians, amateurs and anyone who must make adjustments on high and ultra-high frequency and critical circuits.

65 — U.H.F. Alignment Tool ..... 40c list

# AMERICAN PHENOLIC CORPORATION

Chicago 50, Illinois

IN TORONTO • AMPHENOL LIMITED

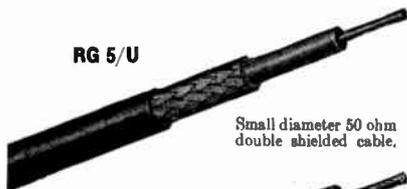

## HIGH FREQUENCY CABLES

**AMPHENOL COAX AND TWINAX RG CABLES** are fully approved and produced in accordance with Army-Navy specifications (JAN-C-17 July 1944). These specifications utilize the very fine dielectric properties of polyethylene, proven most efficient as a low-loss flexible mechanically stable dielectric. The outer jacket in most of Amphenol's approved types is a tough resistant vinyl protective, non-hygroscopic, and impervious to exposure of acids, alkalis, oils and gasoline. Polyethylene is also used as outer jacket for some of the types listed.

Polyethylene is processed in strict accordance with Bureau of Ships Specification RE-9172. It should be emphasized that unusually strict standards are applied to every processing operation of Amphenol's RG cable types. They are produced for "quality plus." Rigid laboratory tests and other process checking, plus Amphenol's "O.K." certification and notarized affidavit on every unit shipment, is final assurance of extra quality and dependability.

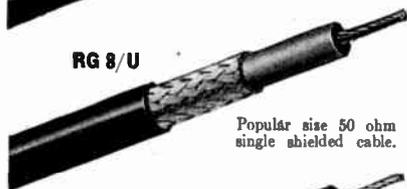

Also illustrated, but not approved for military use without specific authorization, are two of Amphenol's beaded type cables. This polystyrene and mica filled bakelite type of beaded cable is one of Amphenol's early developments in U.H.F. cables and for specific uses, is still in popular demand. The beads, too, may be ordered in bulk and are illustrated and priced on the Synthetics page.

Chart below represents the characteristics of all types of RG cable approved for manufacture by Amphenol. Further specifications and prices upon request.

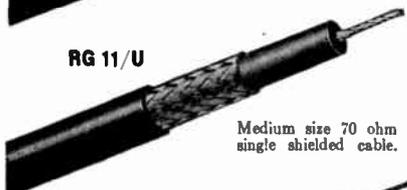

RG 5/U

Small diameter 50 ohm double shielded cable.

RG 8/U

Popular size 50 ohm single shielded cable.

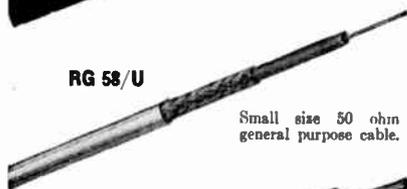

RG 11/U

Medium size 70 ohm single shielded cable.

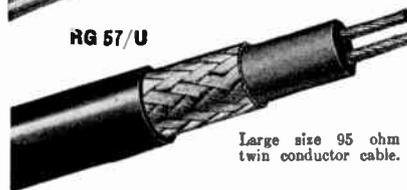

RG 22/U

Small size 95 ohm twin conductor cable.

RG 58/U

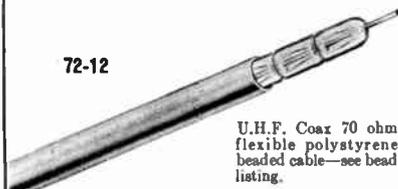

Small size 50 ohm general purpose cable.

RG 57/U

Large size 95 ohm twin conductor cable.

Amphenol also builds U.H.F. cables with polystyrene beads. These types are for non-military use or upon special authorized contracts.

72-12

U.H.F. Coax 70 ohm flexible polystyrene beaded cable—see bead listing.

81-18

U.H.F. Twinax 150 ohm flexible polystyrene beaded cable—see bead listing.

## LOW-LOSS 83 SERIES CONNECTORS — U.H.F.

This complete line of low-loss connectors and adapters for use with RG type cables serves all practical applications and they are made in both small and large sizes for coax and twinax cables. They are a very rugged construction, die cast zinc and machined brass shells, heavily silver plated. Low-loss inserts are of mica filled bakelite and polystyrene, and their construction provides for easy assembly and positive connection. Fully Army-Navy approved for use with U.H.F. cables.

Number	SMALL SINGLE CONTACT CONNECTORS	List
83-1SP	— STRAIGHT PLUG — With molded low-loss mica filled insert	\$1.63
83-1SPN	— 3-PIECE PLUG — Tapered back shell for .405" O.D. cables	2.00
83-776	— 3-PIECE PLUG — Like 83-1SPN for RG-58/U and 59/U cables	2.07
83-1R	— RECEPTACLE CHASSIS OR BOX TYPE — Low-loss mica filled insert	1.78
83-1AP	— ANGLE PLUG ADAPTER — Polystyrene insert — pin and socket	2.44
83-1T	— "T" CONNECTOR — For 83-1R — factory wired	2.44
83-1J	— JUNCTION — For use with 83-1SP or 83-1SPN — double contact	1.33
83-1F	— FEED THRU CONNECTOR — Polystyrene insert — pressure tight	2.67

Number	SMALL TWIN CONTACT CONNECTORS	List
83-22SP	— TWIN PLUG — With low-loss mica filled dielectric insert	\$1.74
83-22R	— TWIN RECEPTACLE CHASSIS OR BOX TYPE — For 83-22SP connector	1.37
83-22AP	— TWIN ANGLE PLUG ADAPTER — For straight 83-22SP plug	2.74
83-22J	— TWIN JUNCTION — Double end contact — for use with 83-22SP	1.96
83-22F	— TWIN FEED THRU ADAPTER — Pressure tight to 20 lbs. per sq. inch	2.63

Number	HOODS FOR SMALL CONNECTORS	List
83-1H	— HOOD — For RG cables 8/U, 10/U, 11/U, 12/U, 22/U, 63/U, 65/U	\$ .44
83-1HP	— HOOD — For use with double shield braid wire — RG9/U, 13/U	.56
83-786	— HOOD — For effective shielding of smaller diameter cables	.70

Number	CAPS and CHAINS and ADAPTERS	List
83-1AC	— CAP — For 83-1R, 83-1RY, 83-1RTY and 83-22R connectors	\$ .86
83-1BC	— CAP — For 83-1SP, 83-1SPN and 2 pole plug — 83-22SP connectors	1.00
83-168	— ADAPTER — For small cable — RG59/U, 83-1SP connector	.67
83-185	— ADAPTER — For small cable — RG-58/U, use with 83-1SP connector	.67

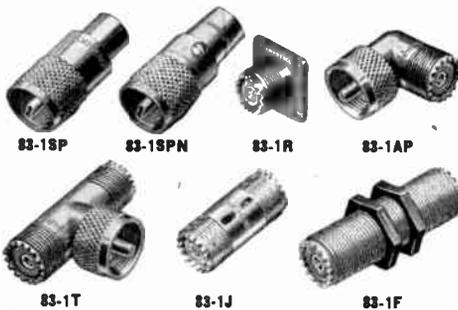

Number	LARGE SINGLE CONTACT CONNECTORS	List
83-21SP	— PLUG — With low-loss mica filled insert and rubber gasket	\$3.78
83-21R	— RECEPTACLE — With two piece low-loss mica filled insert	1.56
83-21AP	— ANGLE PLUG ADAPTER — With waterproofing rubber gasket	2.89
83-21J	— JUNCTION — Polystyrene insert — waterproof — dust tight	On Request

Number	LARGE TWIN CONTACT CONNECTORS	List
83-2SP	— TWIN PLUG — Low-loss mica filled insert — waterproofing gasket	\$3.82
83-2R	— TWIN RECEPTACLE — One piece flange — low-loss mica filled insert	2.63
83-2AP	— TWIN ANGLE PLUG ADAPTER — Polystyrene insert — used with 83-2SP	3.44
83-2J	— TWIN JUNCTION — For water and dirt tight connection to 83-2SP	2.67

Number	LARGE HOOD and LARGE CAP	List
83-2H	— HOOD — For effective shielding, used with 83-2R and 83-21R receptacles	\$ 4.8
83-2AC	— CAP — For sealing large 83-2R and 83-21R	1.11

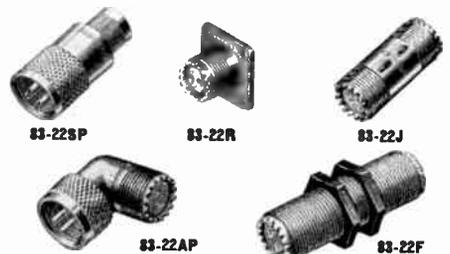

Number	BRITISH TYPE CONNECTORS	List
83-1M	— ADAPTER — 83-1SP — SO-153 (110H 585) to 83-1R — PL-P173 (110H 584)	\$3.63
83-764	— ADAPTER — 83-1SP — 10H 528 to 83-1R — 10H 529, 10H 701, 10H 702	3.52
83-1D	— ADAPTER — SO-153 (110H 585) — 83-1R to PL-P173 (110H 584) — 83-1SP	4.44

### SMALL SINGLE CONTACT CONNECTORS

Units above for RG cables — 8/U, 10/U, 11/U, 12/U, 22/U, 63/U, 65/U — and 58/U, 59/U using 83-168 and 83-185 with 83-1SP.

### SMALL TWIN CONTACT CONNECTORS

Units above for twinax cable — RG-22/U or any twin conductor cable of approximate .405" O.D.

### HOOD for SMALL CONNECTORS

### CAPS and CHAINS

## AMPHENOL POLYWELD "912" (Coil Dope) FOR R.F.-U.H.F & V.H.F. APPLICATIONS

Amphenol POLYWELD "912" is pure liquid Polystyrene. It is designed for "doping," coating, impregnating and sealing in most Radio Frequency applications in the *Ultra-High* and *Very-High* frequency ranges.

POLYWELD is moisture-repellent because it is non-hygroscopic and will not normally support fungus growth. It may therefore be used where these conditions are encountered with a resultant improvement in the performance of radio equipment.

**FAST-DRYING • STRONG-ADHERING • LOW-LOSS**  
**• UNIFORM IN APPLICATION**

Wherever critical components (coils, coil forms, capacitors, ceramics, bakelite, connectors, etc.) must be coated or sealed, Amphenol POLYWELD "912" can be accepted as the standard to obtain high dielectric functioning together with moisture-repellent qualities which will give excellent service within the temperature range of  $-70^{\circ}$  F. to  $160^{\circ}$  F. In addition, the low power factor of POLYWELD "912" is a distinct asset wherever it is used in radio frequency circuits.

### Will Not Harm Silk, Celanese, Enamel or Cotton Coverings

POLYWELD "912" has high density and a relatively heavy body with low viscosity which creates a substance easy to apply in both thin and thick coatings. Usually only a thin coating is required. It is heavily bodied and may be diluted 30 to 40% with No. 916 Thinner, thus making the use of POLYWELD extremely economical. It has high resistance and minimum surface leakage at *Ultra-High* and *Very-High* R.F. frequencies and can be used for almost all radio frequency applications. Its high potential breakdown makes it substantially puncture-proof while its unusual flexibility develops an ideal material for use in high-voltage R.F. circuits.

The use of POLYWELD "912" will not affect the electrical characteristics of coils within most frequency ranges.

### AMPHENOL POLYWELD "912" (Liquid Coil Dope) and AMPHENOL ACRYWELD "901" CEMENTS & THINNERS

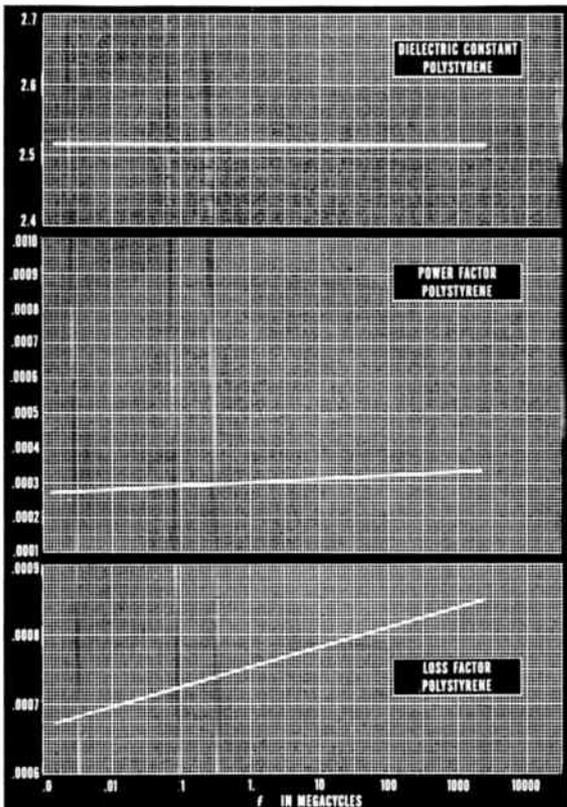

Non-Returnable Containers — Net Wt. per Gal. 7.85 Lbs. — Gross Wt.

1-Gal. Can: 8.75 Lbs. — 5-Gal. Can: 41.75 Lbs. — 30-Gal. Drum: 265 Lbs.

Number	List Price
53-912-2	2-oz. Bottle Polyweld ..... \$ .50
53-912-4	4-oz. Bottle Polyweld ..... .65
53-912-P	Pint Container Polyweld ..... 2.25
53-912-Q	Quart Container Polyweld ..... 4.00
53-912-G	1-Gallon Can Polyweld ..... 13.35
53-912-5G	5-Gallon Drum Polyweld ..... per gal. 12.26
53-912-30G	30-Gallon Drum Polyweld ..... per gal. 11.31
53-916-2T	2-oz. Bottle Thinner ..... .25
53-916-CT	1-Gallon Can Thinner ..... 2.00

\* For spigot use.

Add "901" in place of "912" and "916" in the above numbers for ACRYWELD "901" Cement and ACRYWELD Cement Thinner for quantities indicated at same list prices.

POLYWELD "912" when used in conjunction with "912-A" Polystyrene products, and ACRYWELD "901" with "912-B" Acrylic products (being specially designed for use with these materials), will actually "weld" the parts together so as to create a homogeneous unit.

## RECEPTACLES with external threads

## PLUGS with coupling ring

## "AN" and "97" CONNECTORS

Amphenol electrical connectors provide a means of quickly connecting or disconnecting one or many electrical circuits in aircraft, marine and other mechanized equipment where dependable weather-proof and vibration-proof service is required. All of the (AN) types are built to Army-Navy specifications. The Amphenol 97 Series connectors were developed for special applications and are built under the same general specifications, designed primarily to supplement the standard AN types.

The eight shell types shown in the left column are representative of the most popular types altho Amphenol builds these same connectors and others to special requirements of weather-proofing, pressurizing, tropicalization — all in accordance with the high quality specifications of the Army and Navy.

*Amphenol connectors are produced in a great variety of combinations of shells and inserts, dielectric materials and finishes and it will be found advisable to follow recommended procedure in ordering. To clarify specification, we break down a typical item order number explaining the reference of each digit or letter.*

### TYPICAL NUMBER

**AN 3100 - 16 - 11 PY (101 - 8M)**

**AN or 97.** The "AN" prefix applies to all units which have been assigned an official Army-Navy part number in the prevailing "AN" specification. The "97" prefix is used on all Amphenol items manufactured in accordance with Army-Navy specifications but not yet assigned official part numbers.

**3100.** This number designates the shell type with no relation to the insert. The eight basic shell types are shown at the left. Angle receptacle or plug may be had in split or solid shell. Designation is explained under type 101 below.

**16.** This dash number performs a double function. Coupled with the shell style designation — in this case AN3100 — it indicates the shell style and size. That is, AN3100-16 indicates that a receptacle shell in size 16 is required.

**11P.** As a second function, the above dash number "16" when coupled with the number immediately following — in this case 11PY — indicates the contact layout required. The letter "P" in this number indicates a pin (male) insert and the letter "S" indicates a socket (female) type insert. See copy and illustrations at bottom of page for detailed clarification.

**Y.** This letter designation after the standard insert is one of several suffix letters ordinarily employed to specify other than standard dielectric material.

**101.** Refers to the style shell. There are many variables in the complete Amphenol line, but in this condensation, use a designation here only when ordering angle plugs in which case 101 specifies the solid shell angle housing and 102 the split shell angle housing.

**8M.** This dash number indicates the type of finish required. Standard finish in accordance with specification is furnished unless otherwise specified.

A complete electrical connection requires a receptacle and a plug. Receptacles are usually mounted rigidly on the electrical equipment. Because of this they are designed with a solid base for mounting on a panel, bulkhead, wall, instrument, and so on. Plugs are usually used on the end of a flexible conduit or cable. The receptacle is always indicated as the shell with the external threads and the plug as the shell with the loose coupling ring. Standard shell plugs and receptacles are built to Army-Navy specifications. Receptacles for special applications are designed to accomplish various purposes such as preventing moisture entering instruments or equipment, pressure-proofing in high altitude flying, for use in hazardous locations, unusual space requirements, additional mounting holes for flush installations, vibration-proof for use on machines, instruments and other equipment, mounting on curved surface, light proof on aerial cameras and similar applications. Shell plugs are neat in appearance, simple and easy to assemble. Solid shell provides protection against moisture and dust. Split shells provide easy access for soldering, wire testing and are stocked in most sizes.

*Complete listing of inserts with shells sizes on the following ten pages.*

SOCKET  
INSERT  
(Female)

It should be clarified for the benefit of those ordering AN connectors for the first time that the classification receptacles and plugs have no relation to the insert classification of pin (male) and sockets (female). Either the receptacle or the plug can be specified with pin or socket inserts. All inserts listed on the following ten pages are interchangeable in any other shell types within the same size specification. Amphenol inserts comply in layout, contact sizes and use of dielectric materials with prevailing AN specifications.

## LISTING OF APPROVED SHELL AND INSERT COMBINATIONS

An insert is considered to be the contacts and the supporting dielectric element and as indicated may be ordered as plug (P) or socket (S) for use in any of the shell types. All Amphenol plug and socket inserts are interchangeable in the shells of same size with exception of 10SL-3, 10SL-4. Amphenol elements have heavier sections and are provided

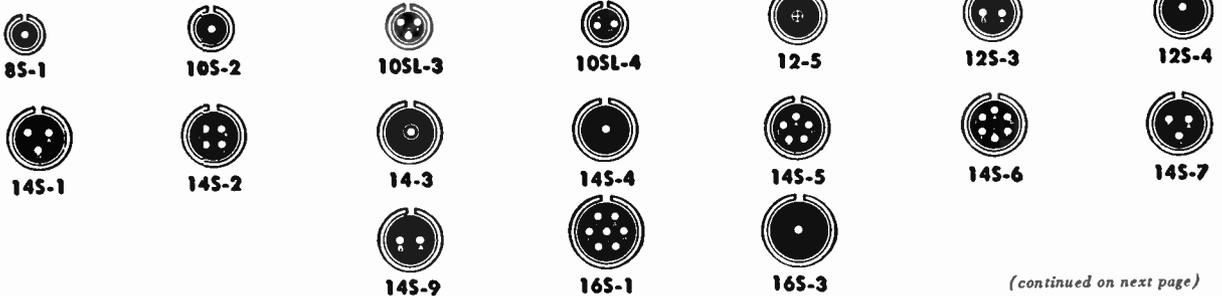

with barriers to further increase insulation between contacts. This listing consisting of ten pages is very comprehensive. For special requirements there are many more inserts available in alternate positioning and of the shorting and grounding types. The dielectric or insulation material is molded according to prevailing Army-Navy specifications.

All Prices are List.

### ASSEMBLY DATA "AN" CONDUIT FITTINGS

In accordance with Army and Navy Specifications AN-9534 and AN-W-C-591, electrical ("AN") connectors are required in the installation of electrical and radio equipment on aircraft, marine and other motorized units. In most cases the use of these connectors in the radio and electronic industries involve installation of rigid or flexible conduit. A comprehensive line of conduit fittings have been designed for use in properly joining connectors to conduit and provides for runs, turns, couplings and other devices needed in complete installations of radio and electrical equipment.

Amphenol "AN" Conduit Fittings are fabricated in accordance with Army-Navy specifications. The material is aluminum alloy of specified strength. Due to manufacturing process, parts are completely interchangeable and have the official Army-Navy "AN" part number stamped or cast on them. This facilitates easy handling, reduces errors, definitely saves time and labor in reordering fittings as well as making actual replacements.

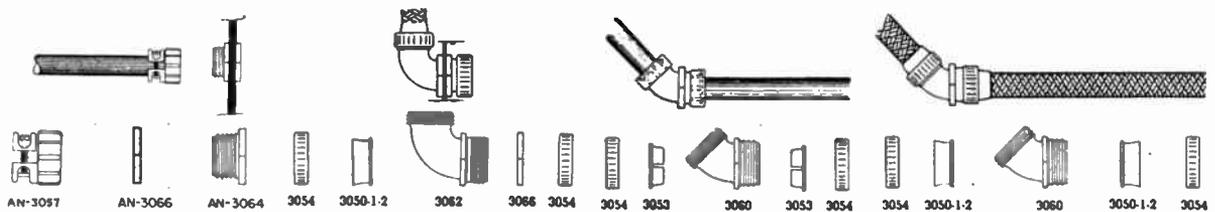

Threads are coated with Permalub to prevent binding of the coupled parts. Further lubrication on the threads at the time of assembly is unnecessary in that the adherent quality of Permalub to the aluminum is sufficient.

Ferrules for synthetic tubing are in common use today and are illustrated on the synthetics page in this catalog together with the tubing.

Altho more types are manufactured and stocked, this condensed presentation of the complete line represents all of the popular fittings commonly used and specified.

### TYPICAL ASSEMBLY CHARTS

Fitting assemblies are classified under four groups: Straight Terminations, Angle Terminations, Straight Couplings and Angle Couplings. Write for Section B of our Amphenol No. 70 Catalog which lists complete fitting assemblies approved by Army-Navy. Illustrations below are suggested applications and usages, typical of diagrams which will enable an engineer or production man to take off materials for each given junction with a minimum of time and effort. Further, the use of such charts promotes accuracy in ordering and maintaining stocks.

### SIZE INFORMATION

The following chart provides information as to associated sizes of connector shells and conduits in relation to fitting sizes.

Dash Number Size	Nominal I. D. of Conduit	For Use With Connector Size	Fitting Thread
AN-0000-3	3/16	8S, 10S	1/2 - 28

## "300" SERIES PLUGS AND SOCKETS

### General Specifications

2 Contacts to 33 Contacts. All plugs and sockets are polarized. 2 Contact Plugs and Sockets are round, others rectangular. Plugs of one size cannot fit into sockets of another size. Phosphor bronze "knife-switch" type socket contacts engage both sides of flat plug contacts—double contact area. Molded Bakelite insulation. Formed metal caps. Formed fibre linings in caps. Small size, with good separation between contacts. Plug or socket for panel mounting. Plug or socket with cap. Simple, fool-proof assembly. Finish on caps—Black Crystal. Plug prongs— $\frac{1}{16}$ " wide by  $\frac{3}{16}$ " thick. We suggest using the 300 series in circuits not exceeding 45 Volts and 5 Amps., although circuit characteristics may permit higher ratings.

## "400" SERIES PLUGS AND SOCKETS (Formerly "Heavy Duty")

### General Specifications

2, 4, 6, 8, 10 and 12 Contacts.  
 All plugs and sockets are polarized.  
 Phosphor bronze "knife switch" type socket contacts engage both sides of flat plug contacts—double contact area.  
 Molded Bakelite insulation.  
 Fibre linings in caps.  
 Plug or socket for panel mounting.  
 Plug or socket with caps.  
 Finish on caps—Black Crystal.  
 Plug prong cross section  $\frac{1}{4}$ " x  $\frac{1}{8}$ ".  
 Locking fittings available for panel types or extension cables as shown.  
 We recommend using the 400 series in circuits not exceeding 110 Volts and 10 Amperes, although circuit characteristics may permit higher ratings.

## LOCKS FOR 400 SERIES PLUGS AND SOCKETS (Formerly Heavy Duty)

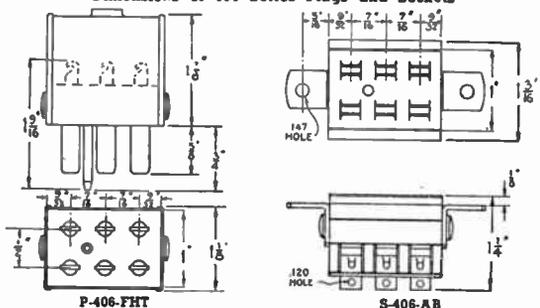

ILLUSTRATING No. 93 LOCK May be attached to any 400 Series plug for extension cables. If plugs are ordered with this lock, specify "with No. 93 locks."

No. 93 Lock when attached to plug, add to list per pair \$ .30  
 No. 93 Locks ONLY per pair .30

ILLUSTRATING No. 63 LOCK. May be used on all panel mount 400 Series plugs and sockets when surface is flush with top of panel. Cannot be used on type DB plugs.

No. 63 Locks ONLY, per pair \$ .30

### Dimensions of 400 Series Plugs and Sockets

## "300" SERIES PLUGS AND SOCKETS

### General Specifications

2 Contacts to 33 Contacts. All plugs and sockets are polarized.  
 2 Contact Plugs and Sockets are round, others rectangular.  
 Plugs of one size cannot fit into sockets of another size.  
 Phosphor bronze "knife-switch" type socket contacts engage both sides of flat plug contacts—double contact area.  
 Molded Bakelite insulation.  
 Formed metal caps. Formed fibre linings in caps.  
 Small size, with good separation between contacts.  
 Plug or socket for panel mounting.  
 Plug or socket with cap.  
 Simple, fool-proof assembly.  
 Finish on caps—Black Crystal.  
 Plug prongs— $\frac{3}{32}$ " wide by  $\frac{1}{8}$ " thick.  
 We suggest using the 300 series in circuits not exceeding 45 Volts and 5 Amps., although circuit characteristics may permit higher ratings.

### "400" SERIES PLUGS AND SOCKETS (Formerly "Heavy Duty")

#### General Specifications

2, 4, 6, 8, 10 and 12 Contacts.  
All plugs and sockets are polarized.  
Phosphor bronze "knife switch" type socket contacts engage both sides of flat plug contacts—double contact area.  
Molded Bakelite insulation.  
Fibre linings in caps.  
Plug or socket for panel mounting.  
Plug or socket with caps.  
Finish on caps—Black Crystal.  
Plug prong cross section  $\frac{1}{16}$ " x  $\frac{1}{8}$ ".  
Locking fittings available for panel types or extension cables as shown.  
We recommend using the 400 series in circuits not exceeding 110 Volts and 10 Amperes, although circuit characteristics may permit higher ratings.

### LOCKS FOR 400 SERIES PLUGS AND SOCKETS (Formerly Heavy Duty)

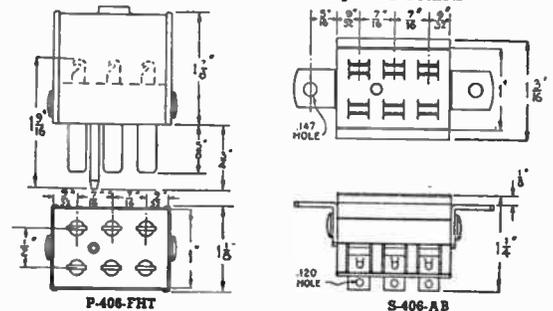

ILLUSTRATING No. 93 LOCK  
May be attached to any 400 Series plug for extension cables. If plugs are ordered with this lock, specify "with No. 93 locks."

No. 93 Lock when attached to plug, add to list per pair \$ .30  
No. 93 Locks ONLY per pair .30

ILLUSTRATING No. 63 LOCK. May be used on all panel mount 400 Series plugs and sockets when surface is flush with top of panel. Cannot be used on type DB plugs.

No. 63 Locks ONLY, per pair \$ .30

#### Dimensions of 400 Series Plugs and Sockets

### "500" SERIES PLUGS AND SOCKETS

For Complete Listing of 500 SERIES, Write for No. 500 Catalog

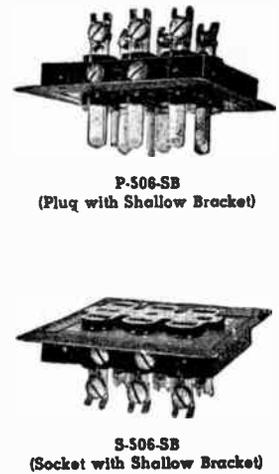

Designed for 5,000 volts and 25 amperes per contact. Circuit characteristics, however, may alter this rating one way or the other.

Long leakage path from terminal to terminal, and terminal to ground. Contacts are brass and phosphor bronze, silver plated. Metal parts of caps and brackets are steel, parkerized (rust-proofed). Plug and socket blocks are interchangeable in caps and brackets.

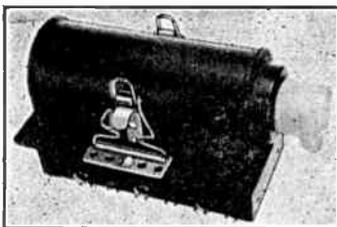

All sizes are polarized in a manner to prevent a smaller plug being inserted in a larger socket. Thus different sizes may be used on one installation without danger of making wrong connections.

Extreme care has been taken to make terminal connections under cap very accessible both for original wiring and subsequent inspection. The cap is insulated with canvas bakelite. Plug prong cross section  $\frac{5}{16} \times \frac{3}{8}$ ".

**IMPORTANT:** For safety with high voltages DEEP BRACKETS should always be used on one plug or socket, when the other plug or socket has a CAP. SHALLOW BRACKETS are for use only in connecting two units, each unit having plug or socket with SHALLOW BRACKET.

#### LOCKS FOR 500 SERIES PLUGS AND SOCKETS

Locks shown above are used in connection with any DEEP BRACKET and cap combination. The locks securely hold the units together, but they can be released instantly. The mounting plates are made to fit all DEEP BRACKETS, and are fastened by the same screws or rivets that hold the deep brackets to the panel. Can not be used on shallow brackets. Sold in pairs only.

## SERIES 101 PLUGS

The entire No. 101 Series of Plugs are identical with the exception of the cable ferrule which is furnished in four sizes as listed below. All metal parts are of brass. These Plugs fit all of the No. 101 Series Sockets. Assembly meets Navy Specifications. A low loss Plug and Socket ideal for high frequency connections.

Code No.	A	B	C	D	E	Ea.
P-101-1/4"	1-1/4"	3/4"	7/16"	1/4"	9/32"	\$0.45
P-101-5/16"	1-3/8"	7/8"	9/16"	5/16"	11/32"	.55
P-101-3/8"	1-3/8"	1 1/16"	3/8"	3/8"	13/32"	.55
P-101-1/2"	1-7/8"	1-3/8"	1-1/16"	1/2"	9/16"	.60

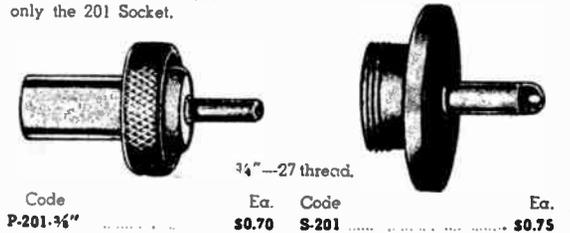

## SERIES 201

### PLUGS

The No. 201 Series Plugs are of the same design as the No. 101 but are of heavier stock and larger. Made in one size only with 3/8" ferrule. All metal parts are of Brass, same finish as No. 101 Series and Wax Impregnated Ceramic insulation. Overall length: 1 1/4" Prong diameter 3/8" Fits only the 201 Socket.

### SOCKETS

The 201 Socket is similar to the S-101-D except larger. Brass base is nickel plated with Chrome Flash. Brass contact is Silver Plated. Insulation is of low loss natural color XXX Bakelite. Both Plug and Socket meet Navy Specifications. Mounting holes—No. 30 drill on 1" centers.

Code	Ea.	Code	Ea.
P-201-3/8"	\$0.70	S-201	\$0.75

## SERIES 101 SOCKETS

The No. 101 Series Sockets are furnished in three types as shown below. Base is of Brass, Nickel Plated with Chrome Flash. Brass contact is Silver Plated. Insulation is of low loss natural color XXX Bakelite. Meets Navy Specifications. The S-101-D is similar to the S-101 except that the Bakelite is recessed in the base. S-101-D Mod. is the same as S-101-D except that two sides of the base are milled as shown. Mounting Holes No. 101—No. 41 drill on 1 1/8" centers. Mounting holes No. 101-D and 101-D Mod. No. 30 drill on 1 1/8" centers.

## SERIES 202

### PLUGS

The 202 Series Plugs and Sockets are made in two contacts only. Metal parts are of Brass with burnished Cadmium Plate. Insulation is of Moulded Bakelite. Phosphor Bronze "Knife Switch" type Socket Contacts engage both sides of flat Plug Contacts—double contact area. Formed Fibre linings in caps. Polarized. Knurled nut has 3/4"—27 thread.

### SOCKETS

## 1400 SERIES PLUGS AND SOCKETS

This series of "disconnect" plugs and sockets has the distinct advantage of low cost for a separable unit handling many circuits. Due to exposed metal parts, it is recommended for use when the complete unit is within a housing. Reduces costs of servicing units. Advantageous in shipping when fit is desirable to pack units separately. Polarized—assures correct

coupling. Spring temper brass sockets assure perfect contact. Standard units are listed below from 5 to 16 contacts. However, we can supply units having as many as 30 or more contacts. On No. 1420 or larger we recommend the plug be divided into two or more units, as a single long plug is not mechanically strong. The socket will be made in one assembly.

No. 1405	( 5 Contacts)	Ea. \$0.28	No. 1411	(11 Contacts)	Ea. \$0.52
No. 1406	( 6 Contacts)	Ea. .32	No. 1412	(12 Contacts)	Ea. .56
No. 1407	( 7 Contacts)	Ea. .36	No. 1413	(13 Contacts)	Ea. .60
No. 1408	( 8 Contacts)	Ea. .40	No. 1414	(14 Contacts)	Ea. .64
No. 1409	( 9 Contacts)	Ea. .44	No. 1415	(15 Contacts)	Ea. .68
No. 1410	(10 Contacts)	Ea. .48	No. 1416	(16 Contacts)	Ea. .72

For units with more than 16 contacts. add 4c to the No. 1416 price for each additional contact.

## Nos. 140 AND 150 SERIES SCREW TERMINAL BARRIER STRIPS

A new terminal strip that fills a long felt want. Has thousands of applications. Increased insulation is provided by having barriers placed between each terminal. These barriers follow around the edge of the strip and terminate with the base. The barriers not only make a long leakage path, but prevent direct shorts from frayed

wires at the terminals. Mounting holes are at the ends as illustrated. The terminals and binder screws are of brass, nickel plated. Insulation is molded Bakelite. White characters may be imprinted on the edges of the strip between the barriers and directly below the terminals.

140

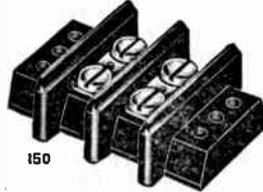

**MAXIMUM NUMBER OF TERMINALS—21**  
These terminal strips can be furnished with the W-140 solder terminals listed below, by adding the affix W to the code numbers at the right. Add price of W-140 terminals to the price of the terminal strip. For example: 4-140-W will cost 33c plus 12c or 45c each.

### No. 140 TERMINAL STRIPS

$\frac{7}{8}$ " wide by  $\frac{1}{2}$ " high. Terminals are mounted on  $\frac{3}{8}$ " centers. Screws: 5-40x $\frac{1}{8}$ " brass, burnished nickel plate. Metal to metal spacing over bakelite  $\frac{1}{4}$ ".

Code	Ea.

### NO. 1 TERMINAL STRIPS

Terminal  $\frac{1}{8}$ " Round Copper, Flattened at Ends, Tin Plated  
A convenient and compact strip where solder connections are desired.

Insulation: Canvas Base Bakelite,  $\frac{1}{2}$ " wide,  $\frac{3}{8}$ " thick. Terminals mounted on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-1 (2 Terminals)	\$ .07	No. 5-1 (5 Terminals)	\$ .10
No. 3-1 (3 Terminals)	.08	No. 6-1 (6 Terminals)	.11
No. 4-1 (4 Terminals)	.09		

For terminal strips with more than 6 terminals, add 1c to the No. 6-1 price for each additional terminal.

### NO. 3 TERMINAL STRIPS

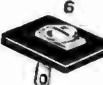

Terminal  $\frac{1}{8}$ " Round Copper, Flattened at Each End, Tin Plated

Similar to No. 1, except closer spacing and furnished with holes instead of hooks.

Insulation: Canvas base Bakelite,  $\frac{1}{4}$ " wide,  $\frac{3}{8}$ " thick. Terminals mounted on  $\frac{1}{4}$ " centers. Mounting holes  $\frac{1}{4}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-3 (2 Terminals)	\$0.09	No. 5-3 (5 Terminals)	\$0.12
No. 3-3 (3 Terminals)	.10	No. 6-3 (6 Terminals)	.13
No. 4-3 (4 Terminals)	.11		

For terminal strips with more than 6 terminals, add  $1\frac{1}{2}$ c to the No. 6-3 price for each additional terminal.

### NO. 6 TERMINAL STRIPS

Terminal .046" Brass, Cadmium Plated

Screw and solder terminal. Substantial and reasonably priced.

Screw: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{4}$ " wide,  $\frac{3}{8}$ " thick. Terminals spaced on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-6 (2 Terminals)	\$ .11	No. 5-6 (5 Terminals)	\$ .20
No. 3-6 (3 Terminals)	.14	No. 6-6 (6 Terminals)	.23
No. 4-6 (4 Terminals)	.17		

For terminal strips with more than 6 terminals, add 3c to the No. 6-6 price for each additional terminal.

### NO. 7 TERMINAL STRIPS

Terminal .046" Brass, Burnished Nickel Plate

A two screw insulated terminal strip that can be mounted directly on metal surface.

Screws: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{7}{8}$ " wide,  $\frac{1}{4}$ " thick (total). Terminals mounted on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-7 (2 Terminals)	\$ .16	No. 5-7 (5 Terminals)	\$ .37
No. 3-7 (3 Terminals)	.23	No. 6-7 (6 Terminals)	.44
No. 4-7 (4 Terminals)	.30		

For terminal strips with more than 6 terminals, add 7c to the No. 6-7 price for each additional terminal.

### NO. 10 TERMINAL STRIPS

Terminal  $\frac{1}{16}$ " Brass, Tin Plated

Sturdy screw and solder terminal with both screw and solder connections on top of bakelite panel. Solder terminal turned up.

Screw: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{4}$ " wide,  $\frac{3}{8}$ " thick. Terminals spaced on  $\frac{3}{8}$ " centers. Mounting holes  $\frac{3}{8}$ " from center of end terminals. Will take up to No. 15 B & S gauge wire (.057").

Code	Ea.	Code	Ea.
No. 2-10 (2 Terminals)	\$ .16	No. 5-10 (5 Terminals)	\$ .40
No. 3-10 (3 Terminals)	.24	No. 6-10 (6 Terminals)	.48
No. 4-10 (4 Terminals)	.32		

For terminal strips with more than 6 terminals, add 8c to the No. 6-10 price for each additional terminal.

### NO. 11 TERMINAL STRIPS

Terminal  $\frac{1}{16}$ " Brass, Tin Plated

Similar to No. 10, except larger in size and the solder tab is flat, but will be bent up, if specified.

Screws: 8-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{7}{8}$ " wide,  $\frac{1}{4}$ " thick. Terminals mounted on  $\frac{3}{4}$ " centers. Mounting holes  $\frac{3}{4}$ " from center of end terminals. Will take up to No. 12 B & S gauge wire (.080").

Code	Ea.	Code	Ea.
No. 2-11 (2 Terminals)	\$ .20	No. 5-11 (5 Terminals)	\$ .47
No. 3-11 (3 Terminals)	.29	No. 6-11 (6 Terminals)	.56
No. 4-11 (4 Terminals)	.38		

For terminal strips with more than 6 terminals, add 9c to the No. 6-11 price for each additional terminal.

### NO. 12 TERMINAL STRIPS

Terminal  $\frac{1}{16}$ " Brass, Tin Plated

Similar to No. 11, except larger. Solder tab is flat, but will be bent up, if specified.

Screw: 10-32 x  $\frac{3}{8}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1" wide,  $\frac{1}{4}$ " thick. Terminals mounted on  $\frac{7}{8}$ " centers. Mounting holes  $\frac{7}{8}$ " from center of end terminals. Will take up to No. 9 B & S gauge wire (.114").

Code	Ea.	Code	Ea.
No. 2-12 (2 Terminals)	\$ .29	No. 5-12 (5 Terminals)	\$ .68
No. 3-12 (3 Terminals)	.42	No. 6-12 (6 Terminals)	.81
No. 4-12 (4 Terminals)	.55		

For terminal strips with more than 6 terminals, add 13c to the No. 6-12 price for each additional terminal.

### NO. 16 TERMINAL STRIPS

Terminal .028" Brass, Cadmium Plated

A popular priced screw and solder terminal with many desirable features.

Screw: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{4}$ " wide,  $\frac{1}{4}$ " thick. Terminals spaced on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-16 (2 Terminals)	\$ .10	No. 5-16 (5 Terminals)	\$ .19
No. 3-16 (3 Terminals)	.13	No. 6-16 (6 Terminals)	.22
No. 4-16 (4 Terminals)	.16		

For terminal strips with more than 6 terminals, add 3c to the No. 6-16 price for each additional terminal.

### NO. 20 TERMINAL STRIPS

Terminal  $\frac{1}{16}$ " Brass, Burnished Nickel Plate

Strong two screw terminal with ears to hold wire securely under screw.

Screws: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{7}{8}$ " wide,  $\frac{1}{4}$ " thick. Terminals mounted on  $\frac{3}{8}$ " centers. Mounting holes  $\frac{3}{8}$ " from center of end terminals. Will take up to No. 13 B & S gauge wire (.071").

Code	Ea.	Code	Ea.
No. 2-20 (2 Terminals)	\$ .22	No. 5-20 (5 Terminals)	\$ .55
No. 3-20 (3 Terminals)	.33	No. 6-20 (6 Terminals)	.66
No. 4-20 (4 Terminals)	.44		

For terminal strips with more than 6 terminals, add 11c to the No. 6-20 price for each additional terminal.

### NO. 21 TERMINAL STRIPS

Terminal  $\frac{1}{16}$ " Brass, Burnished Nickel Plate

Similar to No. 20, except larger.

Screw: 8-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1 $\frac{1}{8}$ " wide,  $\frac{1}{2}$ " thick. Terminals mounted on  $\frac{3}{4}$ " centers. Mounting holes  $\frac{3}{4}$ " from center of end terminals. Will take up to No. 11 B & S gauge wire (.090").

Code	Ea.	Code	Ea.
No. 2-21 (2 Terminals)	\$ .29	No. 5-21 (5 Terminals)	\$ .68
No. 3-21 (3 Terminals)	.42	No. 6-21 (6 Terminals)	.81
No. 4-21 (4 Terminals)	.55		

For terminal strips with more than 6 terminals, add 13c to the No. 6-21 price for each additional terminal.

### NO. 22 TERMINAL STRIPS

Terminal  $\frac{1}{16}$ " Brass, Burnished Nickel Plate

Similar to No. 21, except larger.

Screws: 10-32 x  $\frac{3}{8}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1 $\frac{1}{4}$ " wide,  $\frac{1}{4}$ " thick. Terminals mounted on  $\frac{7}{8}$ " centers. Mounting holes  $\frac{7}{8}$ " from center of end terminals. Will take up to No. 8 B & S gauge wire (.128").

Code	Ea.	Code	Ea.
No. 2-22 (2 Terminals)	\$ .40	No. 5-22 (5 Terminals)	\$ .88
No. 3-22 (3 Terminals)	.56	No. 6-22 (6 Terminals)	1.04
No. 4-22 (4 Terminals)	.72		

For terminal strips with more than 6 terminals, add 16c to the No. 6-22 price for each additional terminal.

### No. 32 TERMINAL STRIPS

Terminal .050" Brass, Tin Plated

An ideal terminal strip (solder type) for medium heavy wiring. One or more wires may be connected to this terminal.

Insulation: XX Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{4}$ " thick. Terminals mounted on  $\frac{1}{4}$ " centers. Mounting holes  $\frac{1}{4}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-32 (2 Terminals)	\$ .16	No. 5-32 (5 Terminals)	\$ .37
No. 3-32 (3 Terminals)	.23	No. 6-32 (6 Terminals)	.44
No. 4-32 (4 Terminals)	.30		

For terminal strips with more than 6 terminals add 7c to the No. 6-32 price for each additional terminal.

### NO. 34 TERMINAL STRIPS

Terminal .062" Brass, Cadmium Plated

Very substantial and neat appearing terminal. Ample length solder terminal below panel, with screw connection above.

Screw: 8-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick.

Terminals spaced on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-34 (2 Terminals)	\$ .15	No. 5-34 (5 Terminals)	\$ .27
No. 3-34 (3 Terminals)	.19	No. 6-34 (6 Terminals)	.31
No. 4-34 (4 Terminals)	.23		

For terminal strips with more than 6 terminals, add 4c to the No. 6-34 price for each additional terminal.

### NO. 53 TERMINAL STRIPS

Terminal Spring Temper Brass, Cadmium Plated

A reliable socket type contact for many uses. Takes  $\frac{3}{32}$ " prongs. May be used with No. 98 terminal strips (same terminal spacing).

Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick. Terminals mounted on  $\frac{3}{8}$ " centers. Mounting holes  $\frac{3}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-53 (2 Terminals)	\$ .14	No. 5-53 (5 Terminals)	\$ .20
No. 3-53 (3 Terminals)	.16	No. 6-53 (6 Terminals)	.22
No. 4-53 (4 Terminals)	.18		

For terminal strips with more than 6 terminals, add 2c to the No. 6-53 price for each additional terminal.

### NO. 36 TERMINAL STRIPS

Terminal .031" Brass, Cadmium Plated

A popular priced screw and solder terminal with both screw and solder tab on same side of bakelite panel. Screw: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick. Terminals spaced on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-36 (2 Terminals)	\$ .10	No. 5-36 (5 Terminals)	\$ .19
No. 3-36 (3 Terminals)	.13	No. 6-36 (6 Terminals)	.22
No. 4-36 (4 Terminals)	.16		

For terminal strips with more than 6 terminals, add 3c to the No. 6-36 price for each additional terminal.

### NO. 54 TERMINAL STRIPS

Terminal .032" Brass, Cadmium Plated

Spade terminal for cable harness. Convenient to use in connection with No. 6 terminal strips. Insulation: XP Bakelite,  $\frac{1}{2}$ " wide,  $\frac{1}{8}$ " thick. Terminals mounted on  $\frac{1}{2}$ " centers.

Code	Ea.	Code	Ea.
No. 2-54 (2 Terminals)	\$ .05	No. 5-54 (5 Terminals)	\$ .11
No. 3-54 (3 Terminals)	.07	No. 6-54 (6 Terminals)	.13
No. 4-54 (4 Terminals)	.09		

For terminal strips with more than 6 terminals, add 2c to the No. 6-54 price for each additional terminal.

### NO. 42 TERMINAL STRIPS

Terminal Hard Brass, Silver Plated

Similar in construction to No. 53. Takes  $\frac{1}{8}$ " prong. May be used with No. 99 terminal strips (same terminal spacing).

Insulation: XP Bakelite,  $\frac{1}{2}$ " wide,  $\frac{3}{32}$ " thick. Terminals mounted on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-42 (2 Terminals)	\$ .19	No. 5-42 (5 Terminals)	\$ .25
No. 3-42 (3 Terminals)	.19	No. 6-42 (6 Terminals)	.28
No. 4-42 (4 Terminals)	.22		

For terminal strips with more than 6 terminals, add 3c to the No. 6-42 price for each additional terminal.

### NO. 59 TERMINAL STRIPS

Terminal .028" Brass, Tin Plated

An inexpensive solder terminal. One wire may be brought up through hole and soldered, leaving vertical tab for other connection.

Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick. Terminals mounted on  $\frac{1}{8}$ " centers. Mounting holes  $\frac{1}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-59 (2 Terminals)	\$ .06	No. 5-59 (5 Terminals)	\$ .12
No. 3-59 (3 Terminals)	.08	No. 6-59 (6 Terminals)	.14
No. 4-59 (4 Terminals)	.10		

For terminal strips with more than 6 terminals, add 2c to the No. 6-59 price for each additional terminal.

### NO. 43 TERMINAL STRIPS

Terminal Hard Brass, Silver Plated

Same as No. 42, except that it takes  $\frac{3}{32}$ " prongs. May be used with No. 100 terminal strips.

Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick. Terminals mounted on  $\frac{3}{8}$ " centers. Mounting holes  $\frac{3}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-43 (2 Terminals)	\$ .19	No. 5-43 (5 Terminals)	\$ .31
No. 3-43 (3 Terminals)	.23	No. 6-43 (6 Terminals)	.35
No. 4-43 (4 Terminals)	.27		

For terminal strips with more than 6 terminals, add 4c to the No. 6-43 price for each additional terminal.

### NO. 60 TERMINAL STRIPS

Terminal .050" Brass, Cadmium Plated

Screw terminal above panel—solder terminal below. Solder tab is notched.

Screw: 6-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick. Terminals spaced on  $\frac{1}{4}$ " centers. Mounting holes  $\frac{1}{4}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-60 (2 Terminals)	\$ .13	No. 5-60 (5 Terminals)	\$ .25
No. 3-60 (3 Terminals)	.17	No. 6-60 (6 Terminals)	.29
No. 4-60 (4 Terminals)	.21		

For terminal strips with more than 6 terminals, add 4c to the No. 6-60 price for each additional terminal.

### NO. 48 TERMINAL STRIPS

Terminal .028" Brass, Tin Plated

A low priced double solder terminal.

Insulation: XP Bakelite,  $\frac{1}{2}$ " wide,  $\frac{1}{8}$ " thick. Terminals mounted on  $\frac{1}{8}$ " centers. Mounting holes  $\frac{1}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-48 (2 Terminals)	\$ .08	No. 5-48 (5 Terminals)	\$ .12
No. 3-48 (3 Terminals)	.06	No. 6-48 (6 Terminals)	.14
No. 4-48 (4 Terminals)	.10		

For terminal strips with more than 6 terminals, add 2c to the No. 6-48 price for each additional terminal.

### NO. 66-S TERMINAL STRIPS

Terminal .032" Hard Brass, Cadmium Plated

A heavy solder terminal with large oval hole for several wires.

Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{2}$ " thick. Terminals mounted on  $\frac{3}{8}$ " centers. Mounting holes  $\frac{3}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-66-S (2 Terminals)	\$ .07	No. 5-66-S (5 Terminals)	\$ .13
No. 3-66-S (3 Terminals)	.09	No. 6-66-S (6 Terminals)	.15
No. 4-66-S (4 Terminals)	.11		

For terminal strips with more than 6 terminals, add 2c to the No. 6-66-S price for each additional terminal.

### NO. 50 TERMINAL STRIPS

Terminal .062" Brass, Cadmium Plated

One of the most popular screw and solder terminals. Made of heavy stock with ears to firmly hold wires under screw.

Screw: 8-32 x  $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{8}$ " thick. Terminals spaced on  $\frac{1}{2}$ " centers. Mounting holes  $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-50 (2 Terminals)	\$ .15	No. 5-50 (5 Terminals)	\$ .27
No. 3-50 (3 Terminals)	.19	No. 6-50 (6 Terminals)	.31
No. 4-50 (4 Terminals)	.23		

For terminal strips with more than 6 terminals, add 4c to the No. 6-50 price for each additional terminal.

### NO. 66-D TERMINAL STRIPS

Terminal .032" Hard Brass, Cadmium Plated

Two No. 66 terminals mounted on opposite sides of panel and riveted together by solid rivet. Ideal strip for heavy work.

Insulation: XP Bakelite,  $\frac{3}{8}$ " wide,  $\frac{1}{2}$ " thick. Terminals mounted on  $\frac{3}{8}$ " centers. Mounting holes  $\frac{3}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-66-D (2 Terminals)	\$ .08	No. 5-66-D (5 Terminals)	\$ .17
No. 3-66-D (3 Terminals)	.11	No. 6-66-D (6 Terminals)	.20
No. 4-66-D (4 Terminals)	.14		

For terminal strips with more than 6 terminals, add 3c to the No. 6-66-D price for each additional terminal.

## NO. 76 TERMINAL STRIPS

Terminal .028" Brass, Cadmium Plated

Cup shaped top holds wire securely under screw. A compact and good appearing terminal.  
Screw: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 3/4" wide, 1/8" thick. Terminals spaced on 1/2" centers. Mounting holes 1/2" from center of end terminals.

<table border="0"> <tr><td>Code</td><td> Ea.</td><td>Code</td><td> Ea.</td></tr> <tr><td>No. 2-76 (2 Terminals)</td><td> \$ .11</td><td>No. 5-76 (5 Terminals)</td><td> \$ .20</td></tr> <tr><td>No. 3-76 (3 Terminals)</td><td> .14</td><td>No. 6-76 (6 Terminals)</td><td> .23</td></tr> <tr><td>No. 4-76 (4 Terminals)</td><td> .17</td><td></td><td></td></tr> </table>	Code	Ea. No. 2-130 (2 Terminals)	\$ .12	No. 5-130 (5 Terminals)	\$ .30														
No. 3-130 (3 Terminals)	.18	No. 6-130 (6 Terminals)	.36														
No. 4-130 (4 Terminals)	.24																

AG 76

AG-76

Standard Antenna-Ground strip using No. 76 terminals. Insulation: XP Bakelite, 1 1/4" wide. Mounting centers 1 1/4". Ends rounded. Letters A and G are filled in white.

No. AG-76 ..... Ea. \$ .09

## NO. 131 TERMINAL STRIPS

Terminals Brass, Burnished Nickel Plate

Similar to No. 130, except larger. Screws: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1" wide, 1/8" thick. Terminals mounted on 3/8" centers. Mounting holes 3/4" from center of end terminals.

<table border="0"> <tr><td>Code</td><td> Ea.</td><td>Code</td><td> Ea.</td></tr> <tr><td>No. 2-131 (2 Terminals)</td><td> \$ .15</td><td>No. 5-131 (5 Terminals)</td><td> \$ .36</td></tr> <tr><td>No. 3-131 (3 Terminals)</td><td> .22</td><td>No. 6-131 (6 Terminals)</td><td> .43</td></tr> <tr><td>No. 4-131 (4 Terminals)</td><td> .29</td><td></td><td></td></tr> </table>	Code	Ea. No. 4-131 (4 Terminals)	.29																

## NO. 96 TERMINAL STRIPS

Terminal, Spring Temper Brass, Cadmium Plated

Perhaps the most popular socket terminal ever sold. Takes standard tube prongs (No. 99 or No. 100). Furnished for No. 99 prongs (1/8") unless otherwise specified. Insulation: XP Bakelite, 3/4" wide, 1/8" thick. Terminals mounted on 1/2" centers. Mounting holes 1/2" from center of end terminals.

<table border="0"> <tr><td>Code</td><td> Ea.</td><td>Code</td><td> Ea.</td></tr> <tr><td>No. 2-96 (2 Terminals)</td><td> \$ .07</td><td>No. 5-96 (5 Terminals)</td><td> \$ .13</td></tr> <tr><td>No. 3-96 (3 Terminals)</td><td> .09</td><td>No. 6-96 (6 Terminals)</td><td> .15</td></tr> <tr><td>No. 4-96 (4 Terminals)</td><td> .11</td><td></td><td></td></tr> </table>	Code	Ea. Code	Ea.	Code	Ea.														
No. 2-96 (2 Terminals)	\$ .07	No. 5-96 (5 Terminals)	\$ .13														
No. 3-96 (3 Terminals)	.09	No. 6-96 (6 Terminals)	.15														
No. 4-96 (4 Terminals)	.11																

## NO. 132 TERMINAL STRIPS

Terminals Brass, Burnished Nickel Plate

Similar to No. 131, except larger. Screws: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1 1/4" wide, 1/8" thick. Terminals mounted on 3/4" centers. Mounting holes 3/4" from center of end terminals.

## NO. 98 TERMINAL STRIPS

Terminal 3/32" Round, Brass, Silver Plated

Standard tube base prong of 1/8" diameter. To be used with No. 53 terminal strips. Insulation: XP Bakelite, 3/4" wide, 1/8" thick. Terminals mounted on 1/2" centers.

<table border="0"> <tr><td>Code</td><td> Ea.</td><td>Code</td><td> Ea.</td></tr> <tr><td>No. 2-98 (2 Terminals)</td><td> \$ .06</td><td>No. 5-98 (5 Terminals)</td><td> \$ .12</td></tr> <tr><td>No. 3-98 (3 Terminals)</td><td> .08</td><td>No. 6-98 (6 Terminals)</td><td> .14</td></tr> <tr><td>No. 4-98 (4 Terminals)</td><td> .10</td><td></td><td></td></tr> </table>	Code	Ea. ## No. 143 TERMINAL STRIPS

Terminal .040" Brass, Tin Plated

A strong two-way solder terminal. Solder tabs lie flat. Crimps securely around edges of panel.

**Special Strips**  
These strips can be made up special, with terminals mounted on any centers, from 3/8" up.

**Standard Strips**  
Insulation: XP Bakelite, 3/4" wide, 1/8" thick. Terminals mounted on 1/2" centers. Mounting holes 1/2" from center of end terminals. Terminals may be numbered or lettered in white, as illustrated. (See page 18 for imprinting cost.)

## NO. 99 TERMINAL STRIPS

Terminal 1/8" Round, Brass, Silver Plated

Similar to No. 98, except that it is 1/8" in diameter. To be used with No. 43 terminal strips, and also with No. 96 terminal strips. Insulation: XP Bakelite, 1/2" wide, 1/8" thick. Terminals mounted on 1/2" centers.

<table border="0"> <tr><td>Code</td><td> Ea.</td><td>Code</td><td> Ea.</td></tr> <tr><td>No. 2-99 (2 Terminals)</td><td> \$ .08</td><td>No. 5-99 (5 Terminals)</td><td> \$ .17</td></tr> <tr><td>No. 3-99 (3 Terminals)</td><td> .11</td><td>No. 6-99 (6 Terminals)</td><td> .20</td></tr> <tr><td>No. 4-99 (4 Terminals)</td><td> .14</td><td></td><td></td></tr> </table>	Code	Ea. ## NO. 100 TERMINAL STRIPS

Terminal 5/32" Round, Brass, Silver Plated

Similar to No. 99, except 5/32" in diameter. To be used with No. 43 terminal strip, and No. 96 terminal strip. Insulation: XP Bakelite, 3/4" wide, 1/8" thick. Terminals mounted on 1/2" centers.

<table border="0"> <tr><td>Code</td><td> Ea.</td><td>Code</td><td> Ea.</td></tr> <tr><td>No. 2-100 (2 Terminals)</td><td> \$ .12</td><td>No. 5-100 (5 Terminals)</td><td> \$ .24</td></tr> <tr><td>No. 3-100 (3 Terminals)</td><td> .16</td><td>No. 6-100 (6 Terminals)</td><td> .28</td></tr> <tr><td>No. 4-100 (4 Terminals)</td><td> .20</td><td></td><td></td></tr> </table>	Code	Ea. ## NO. 2000 TERMINAL STRIPS

Terminals .019" Brass, Tin Plated

Compact and sturdy junction terminal strip. Useful in assembling radio chassis, wiring, etc. Insulation: Bakelite. Brackets: Steel, cadmium plated. Terminals spaced on 1/8" centers.

Code	Mounting Hole Centers:	Ea.
No. 2002 (2 Terminals)	1"	\$ .05
No. 2003 (3 Terminals)	1-5/16"	.05

### FUSE MOUNTS

#### No. 800 SERIES

The 800 series fuse mounts provide solder tabs on the same side of the panel as the fuse clips. Mounts No. 3-AG fuses. An insulating strip of fibre, the same size as the bakelite panel, is furnished. Panels with clips for spare fuse have word "SPARE" imprinted on panel.

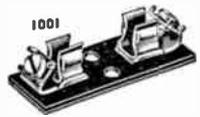

Code	No. of Fuses	Spare Fuse	Panel Size	Mounting Hole Centers	Price Each
No. 801	1	.....	3/4" x 1 1/8"	3/8"	\$.11
No. 802	2	.....	1 1/8" x 1 1/8"	3/8"	.18
No. 803	3	.....	1 3/8" x 1 1/8"	7/8"	.24
No. 801-S	1	1	1 1/8" x 2 1/8"	3/8"	.18
No. 802-S	2	1	1 3/8" x 2 1/8"	7/8"	.24
No. 803-S	3	1	2 1/8" x 2 1/8"	7/8"	.31

#### No. 900 SERIES

The 900 series fuse mounts provide solder tab on the opposite side of panel to the fuse clips. Mounts No. 3-AG fuses. Panels with clips for spare fuse have word "SPARE" imprinted on panel.

Code	No. of Fuses	Spare Fuse	Panel Size	Mounting Hole Centers	Price Each
No. 901	1	.....	3/4" x 1 1/8"	3/8"	\$.10
No. 902	2	.....	1 1/8" x 1 1/8"	3/8"	.17
No. 903	3	.....	1 3/8" x 1 1/8"	7/8"	.23
No. 901-S	1	1	1 1/8" x 1 1/8"	3/8"	.15
No. 902-S	2	1	1 3/8" x 1 1/8"	7/8"	.22
No. 903-S	3	1	2 1/8" x 1 1/8"	7/8"	.29

#### No. 1000 SERIES

The 1000 series fuse mounts provide screw terminals on the same side of panel as fuse clips. Clips are mounted so that screws face ends of panel. An insulating strip of fibre, the same size as the bakelite panel, is furnished. Panels with clips for spare fuse have the word "SPARE" imprinted on panel.

Code	No. of Fuses	Spare Fuse	Panel Size	Mounting Hole Centers	Price Each
No. 1001	1	.....	3/4" x 2 1/8"	3/8"	\$.17
No. 1002	2	.....	1 1/8" x 2 1/8"	3/8"	.30
No. 1003	3	.....	1 3/8" x 2 1/8"	7/8"	.42
No. 1001-S	1	1	1 1/8" x 2 1/8"	3/8"	.23
No. 1002-S	2	1	1 3/8" x 2 1/8"	7/8"	.36
No. 1003-S	3	1	2 1/8" x 2 1/8"	7/8"	.49

#### No. 1100 SERIES

The 1100 series fuse mounts provide screw terminals on the same side of panel as the fuse clips. Clips are mounted so the screws face side of panel. Mount No. 3-AG fuses. An insulating strip of fibre, the same size as bakelite panel, is furnished. Panels with clips for spare fuse have word "SPARE" imprinted on panel.

Code	No. of Fuses	Spare Fuse	Panel Size	Mounting Hole Centers	Price Each
No. 1101	1	.....	7/8" x 1 1/2"	3/8"	\$.17
No. 1102	2	.....	1 3/8" x 1 1/2"	7/8"	.30
No. 1101-S	1	1	1 3/8" x 1 1/2"	7/8"	.23
No. 1102-S	2	1	2 1/8" x 1 1/2"	7/8"	.36

### SPECIAL FUSE MOUNTS

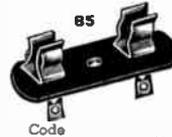

#### No. 84

The No. 84 fuse mount provides solder tab on the same side of the panel as the fuse clips. Mounts No. 3-AG fuses. Similar in design to the No. 801 except that bakelite panel is of special size. Mounting hole in center of panel.

Code No. 84 Single Fuse

Panel Size 3/4" x 1 3/4" Price Each \$.09

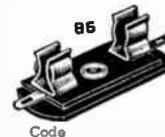

#### No. 85

The No. 85 fuse mount provides solder tab on the opposite side of panel to the fuse clips. Mounts No. 3-AG fuses. Similar to No. 901 except that bakelite panel is of special size and shape. Mounting hole in exact center of panel.

Code No. 85 Single Fuse

Panel Size 3/4" x 1 3/4" Price Each \$.10

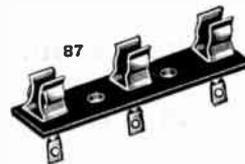

#### No. 86

The No. 86 fuse mount provides solder tabs on the same side of the panel as the fuse clips. Mounts No. 3-AG fuses. Bakelite strip is anchored to the terminal panel, enabling the fuse to be mounted direct on metal.

Code No. 86 Single Fuse

Panel Size 3/4" x 1 3/4" Price Each \$.11

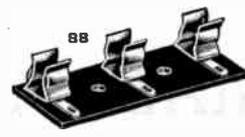

### VOLTAGE REGULATOR TYPE

#### No. 87

The No. 87 fuse mount provides solder tabs on the opposite side of panel to the fuse clips. Mounts No. 3-AG fuses. Mounting holes are on 7/8" centers.

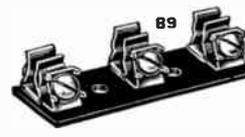

Code No. 87 Panel Size 3/4" x 2 1/2" Price Each \$.13

#### No. 88

The No. 88 fuse mount provides solder tabs on the same side of the panel as the fuse clips. Mounts No. 3-AG fuses. Mounting holes are on 7/8" centers.

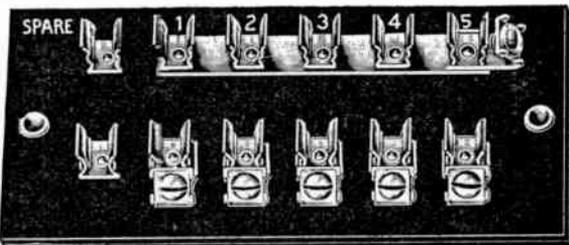

Code No. 88 Panel Size 7/8" x 2 1/2" Price Each \$.14

#### No. 89

The No. 89 fuse mount provides screw terminals on the same side of panel as fuse clips. Screws are mounted so that they face the side of panel. Mounting holes are on 7/8" centers.

Code No. 89 Panel Size 7/8" x 2 1/2" Price Each \$.23

1200

### No. 1200 SERIES MULTIPLE FUSE MOUNT PANELS

The No. 1200 series presents a very convenient fuse panel arrangement for multiple circuits. One side of all the fuse mounts is common, making it convenient for wiring. Screw terminals are provided on the same side of panel as fuse clips. Mounts No. 3-AG fuses. Each panel contains a pair of clips for mounting a spare fuse. The whole assembly has a bakelite insulating plate attached so that it can be mounted directly on metal.

Fuse	Spare	Panel Size	Price Each	Fuse	Spare	Panel Size	Price Each
1201-S	1	2 1/4" x 2 3/4"	\$.33	1209-S	9	2 1/4" x 7 3/4"	1.69
1202-S	2	2 1/4" x 3"	.50	1210-S	10	2 1/4" x 8"	1.86
1203-S	3	2 1/4" x 3 3/4"	.67	1211-S	11	2 1/4" x 8 3/4"	2.03
1204-S	4	2 1/4" x 4 1/4"	.84	1212-S	12	2 1/4" x 9 1/4"	2.20
1205-S	5	2 1/4" x 4 7/8"	1.01	1213-S	13	2 1/4" x 9 3/4"	2.37
1206-S	6	2 1/4" x 5 1/2"	1.18	1214-S	14	2 1/4" x 10 1/2"	2.54
1207-S	7	2 1/4" x 5 7/8"	1.35	1215-S	15	2 1/4" x 11 1/2"	2.71
1208-S	8	2 1/4" x 6 1/4"	1.52

# NATIONAL

# MOLDED OCTAL SOCKETS

The electronic essentials of National Fabricated Products are engineered to the highest technical standards, and designed for reliable, long-life performance. They have achieved universal acceptance over a period of long operating and manufacturing experience.

The molded socket series indicated on the illustrations of this page all employ the design incorporating an undercut groove that provides quick mounting either directly to chassis frame or to mounting bracket by means of a spring retainer ring. This design is obtainable with all specifications of molded bakelite as well as ceramic. No screws or rivets are required when this socket is mounted directly to the chassis. For direct mounting the socket is mounted directly to the chassis. For direct mounting the socket may be employed on chassis up to .093 in thickness. For thicknesses less than .093 spacer washers can be supplied to insure firm mounting.

**No. 35-1-EU**—This socket employs insulation of standard high dielectric black bakelite for mounting with spring retainer ring and employing in standard applications contacts of spring alloy brass, cadmium plated. The contact design in this socket is of the wrap-around type.

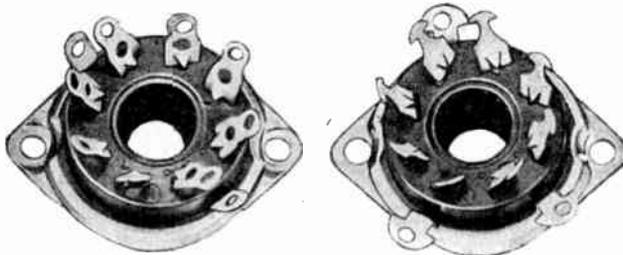

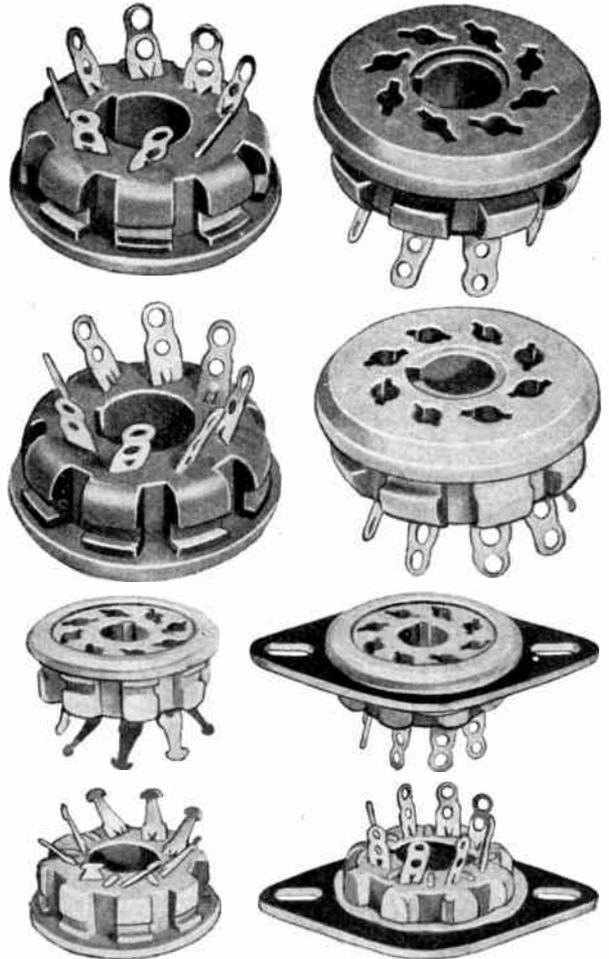

**No. 40-1-EU**—This socket is identical with type 35-1-EU with the exception of the contact which is of the cutting-edge design to provide minimum radio frequency resistance.

**No. 35L-1-EU**—This socket employs low-loss mica-filled bakelite for application in high frequency and ultra-high frequency design. The contact design in this socket is of the wrap-around type.

**No. 40L-1-EU**—This socket is identical with type 35L-1-EU with the exception of the contact which is of the cutting-edge design to provide minimum radio frequency resistance.

**No. 35C-1-EU**—This socket is of the same general design as the molded low-loss and standard black bakelite types. It employs steatite insulation that is able to withstand high temperatures, is non-hydroscopic, and has particularly low-loss factors. Due to its very high frequency and super high frequency applications, this socket is supplied in standard types with phosphor-bronze contacts, silver plated, although it may be specified with other alloy contact material. Similar to the 35L-1-EU and 40L-1-EU shown above, it is designed for mounting by spring retainer ring either directly to the chassis or to a mounting plate. The 35C-1-EU socket employs the wrap-around type contact.

**No. 40C-1-EU**—This is identical with the 35C-1-EU socket with the exception of the contact. In the 40C-1-EU socket the contact is of the cutting-edge type for minimum low frequency resistance between tube pins and contact.

**No. 535-1-E**—This socket is identical to the 540-1-E employing the crimped mounting saddle with the cutting-edge design contact instead of the wrap-around type. The illustration indicates two standard designs of solder lugs; one for threading and the spade type for wrapping of connecting wires.

**No. 540-1-E**—A socket of standard high dielectric black bakelite for mounting with crimped mounting saddle and employing in standard applications spring brass alloy. Contacts, cadmium plated. The contact design in this socket is of the wrap-around type and the solder lug illustrated is of spade design.

FULL DESCRIPTIONS OF ALL SOCKETS ARE AVAILABLE IN OUR GENERAL CATALOG

**National Fabricated Products, Chicago, Illinois, U. S. A.**

# NATIONAL

# MOLDED OCTAL SOCKETS

No. 535L-1-EG — The socket illustrated above is identical with the 535L-1-E shown below with the exception of the crimped-on mounting saddle providing ground lugs which are available. Crimped-on mounting saddles may be specified with one to four ground lugs to provide convenient grounding points to the chassis.

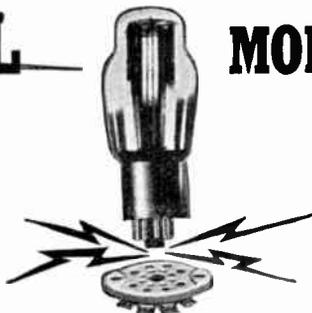

No. 35L-1-E—The 35L-1-E socket illustrated employs mica-filled low-loss insulation and may be specified with either the wrap-around or cutting-edge type contact. It is shown with pressed-on mounting plate which is available in  $1\frac{1}{2}$ ",  $1\frac{11}{16}$ ",  $1\frac{3}{4}$ " and  $1\frac{7}{32}$ " mounting centers.

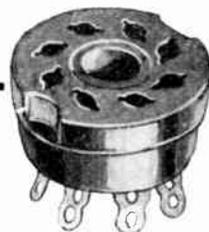

No. 535-1-EN—This type socket is identical with the 535-1-E socket shown except that it employs the crimped mounting saddle inverted so that it may be mounted on the top of the chassis for greatest economy of space in the wiring area underneath. It can be specified with either high dielectric black bakelite or mica-filled low-loss bakelite with either wrap-around or cutting-edge type contacts.

Numerous types of insulation not described in this catalogue may be employed for special applications. Those indicated here are considered standard for the low frequency, high frequency, and super-high frequency spectra. For complete socket information, refer to our general catalogue.

## SERIES 35

Series 35—The 35 series socket illustrated is the highly economic lug design which requires no mounting saddle or mounting plate and is secured firmly to the chassis by lugs pressed up from the chassis metal. The socket is assembled by use of a foot press or a power press, depending upon whether or not single or multiple locking of sockets is desired. Exact drawings of punches required will be sent upon request to provide the manufacturer with accurate dimensions for mounting this socket. This socket employs high dielectric black bakelite as standard insulation with wrap-around type contact in either spade solder lug or standard solder lug with holes for threading.

No. 35C-1-E—This socket is mounted in the crimped-on mounting saddle and employs steatite insulation and the wrap-around type contact. This socket comes in  $1\frac{1}{2}$ " mounting centers and is particularly designed for application in the high frequency and super-high frequency spectra. Where this socket is employed in other than radio frequency applications, steatite insulation affords exceptionally high voltage breakdown where operating conditions endanger insulation due to high humidity. Contacts employed in the 35C-1-E socket for super-high frequency channels are silver-plated unless otherwise specified.

No. 35-1-E—The 35-1-E socket is identical with the 530-1-E in type of insulation, contacts available, and contact lugs available. The 35-1-E socket is mounted with the pressed-on mounting plate and may be obtained with four standard mounting centers— $1\frac{1}{2}$ ",  $1\frac{11}{16}$ ",  $1\frac{3}{4}$ " and  $1\frac{7}{32}$ ". Two variations in mounting centers are illustrated.

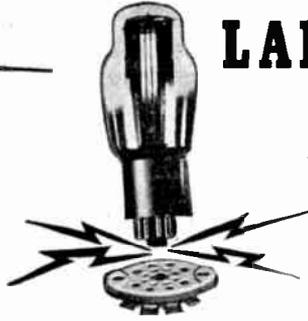

No. 535L-1-E—Is identical in design with the 535-1-E socket. Both sockets employ the same type of mounting and contact designs. The 535-1-E employs low-loss mica-filled bakelite for insulation for use in appropriate circuits. For such application the customary plating provided on contacts is silver. The crimped-on mounting saddle illustrated indicates ground lugs which may be provided for convenient chassis grounding.

# NATIONAL

# LAMINATED SOCKETS

It is a source of great satisfaction to National Fabricated Products that their essentials for Radio and electronic application have been used on every far-flung battle front — contributing in no small measure to uninterrupted communications so important in winning quick and decisive actions.

## FOR GLASS AND OCTAL BASE TUBES

**No. 43-1-A** — Standard type socket with cutting-edge contacts of spring alloy brass, cadmium plated. Top plate  $\frac{3}{64}$ " laminated insulation, XX specifications. Bottom plate  $\frac{3}{64}$ ", linen base laminated insulation, XX specifications.

**No. 43-1-D**—Standard type 43-1-D socket employing cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates are  $\frac{3}{64}$ ", laminated insulation, XX specifications.

**No. 43-1-B** — Standard type socket with cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications.

**No. 93-1-E**—Same as No. 93-1-E standard type wafer socket for octal base tubes with cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications. The 93-1-E type socket has been the standard octal base socket for commercial broadcast receiver application. It is rugged, requires little space, and is adaptable to chassis requirements of all designs. This socket has  $1\frac{1}{2}$ " mounting centers for standard application.

**No. 43-1-C** — Standard type 43-1-C socket employing cutting-edge contacts of cadmium plated spring alloy brass. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications.

**No. 893-1-E**—Identical in construction and adaptation to No. 93-1-E, except that its contours have been reduced to the absolute minimum, and its mounting center to  $1\frac{5}{16}$ " to provide greatest economy of space for compact chassis design.

**No. 56-1-E**—Standard type wafer socket for octal base tubes, with cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications. This socket is supplied in a mounting bracket of cadmium plated steel with mounting center of  $1\frac{1}{2}$ " or  $1\frac{5}{16}$ ". No. 556-1-E is same as No. 56-1-E, but with ground lugs on the mounting brackets. The mounting brackets may be specified with 1 to 4 ground lugs. Lugs are arranged to provide grounding and proper tube contacts by bending contact solder lug to the grounding lug without use of additional wire.

**No. 593-1-E**—Standard type wafer socket for octal base tubes with cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications. This socket is fitted with a center shield provided with ground connection at its lower end. This shield is of great aid in reducing inter-circuit couplings where compactness necessitates resistors and condensers closely adjacent and directly connected to socket contacts. Mounting centers are  $1\frac{5}{16}$ " for standard application requiring a minimum of surface space.

**No. 593-1-ES**—Standard type wafer socket for octal base tubes with cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications. This socket comes equipped with either 1, 2, or 3 contacts grounded through an external ground connection to provide economy of ground wiring for compact chassis construction, where the chassis frame is employed as the basic ground. The projecting ground lug is offset to lie flush with the chassis surface when the socket is riveted in place, and requires only solder to complete the connection. Mounting centers are standard  $1\frac{5}{16}$ ".

**No. 593-1-EG**—Standard type wafer socket for octal base tubes with cutting-edge contacts of spring alloy brass, cadmium plated. Bottom and top plates  $\frac{3}{64}$ ", laminated insulation of XX specifications. This socket comes equipped with either 1, 2, or 3 contacts grounded through an external ground connection to provide economy of ground wiring for compact chassis construction, where the chassis frame is employed as the basic ground. The projecting ground lug is offset to lie flush with the chassis surface when the socket is riveted in place, and requires only solder to complete the connection. Mounting centers are standard  $1\frac{5}{16}$ ".

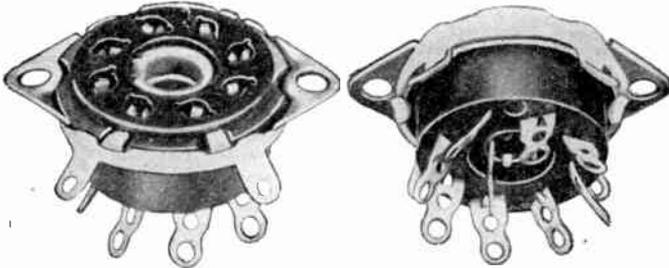

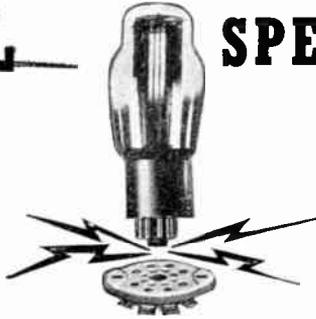

Socket No. 593-1-E same as No. 593-1-EG without ground lug.

# NATIONAL

# SPECIALIZED SOCKETS

Numerous types of insulation not described in this catalogue may be employed for special applications. Those indicated here are considered standard for the low frequency, high frequency, and super-high frequency spectra. For complete socket information, refer to our general catalogue.

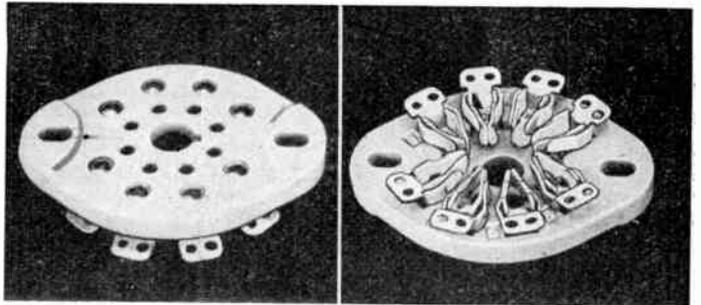

**NATIONAL'S POPULAR LOCTAL SOCKET  
USES A MINIMUM OF CHASSIS SPACE**

No. 585-1-E (Black Bakelite) and No. 585L-1-E (Low Loss Mica-filled Bakelite)—National Fabricated Loctal Sockets are designed to use a minimum amount of chassis space. The standard loctal socket is mounted in the crimped mounting saddle for  $1\frac{5}{16}$ " mounting centers. Contacts employed are self-aligning and float in the molded insulation. This provides the necessary safeguards against fracture of the glass seal of the tube resulting from misalignment of the tube pins.

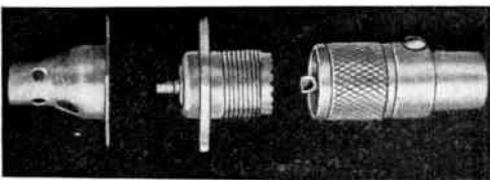

The general design of the National Fabricated loctal socket is similar to that of the molded octal socket and may be specified with the same types of insulation such as high dielectric black bakelite or mica-filled low-loss bakelite. The design of the loctal contact is such as to insure a firm grip on the tube pin by wrap-around contacts and at the same time provide a cutting edge for minimum radion frequency resistance. The center contact is formed of spring brass, cadmium plated, and is provided with an additional spiral wrap-around for more secure contact. The lower extremity has a solder lug.

**A CERAMIC SOCKET  
OF OUTSTANDING  
ENGINEERING DESIGN  
AND CONSTRUCTION**

Series 42—The socket illustrated is National Fabricated 42-1E, eight prong. Our four prong is 42-1A; five prong is 42-1B; six prong is 42-1C and seven prong 42-1D. This design of ceramic socket is constructed of steatite insulation top and sides glazed, bottom wax-impregnated. It is a specific design recommended for us in the VHF and SHF frequency spectra as well as for power supply and amplifier use. Contacts are normally of phosphor bronze cadmium plated. Silver plating on beryllium copper may be specified. In each instance, contacts are reinforced with cadmium plated steel springs that guarantee constant and uniform pressure on the tube pins. The molded steatite insulation is formed to provide mounting bosses and protection around all electrical parts to give maximum voltage breakdown. This Series 42 socket presents a distinct advance in the VHF field and provides a mechanically reliable and electrically efficient receptacle that has proven its merit under all operating conditions. Mounting centers are  $1\frac{5}{8}$ " with slotted holes for variation.

No. 43-1E-3—Laminated socket employing three insulating plates with adjacent contacts alternated above and below the center plate. This special construction provides a 50% increase in normal between-contact voltage breakdown. National Fabricated Products produced this particular design for high voltage applications in rectifier and amplifier circuits. Insulation may be specified in X, XX, or XXX bakelite and wax impregnated where high humidity operating conditions are contemplated.

**NATIONAL CO-AXIAL CONNECTORS**

THE ILLUSTRATED CONNECTOR is equivalent to Signal Corps PL-259 and Navy CZE-49195.

THE CHASSIS RECEPTACLE is equivalent to Signal Corps SO-239 and Navy CZE-49194.

THE HOOD is equivalent to Signal Corps M-360 and Navy CZE-49193.

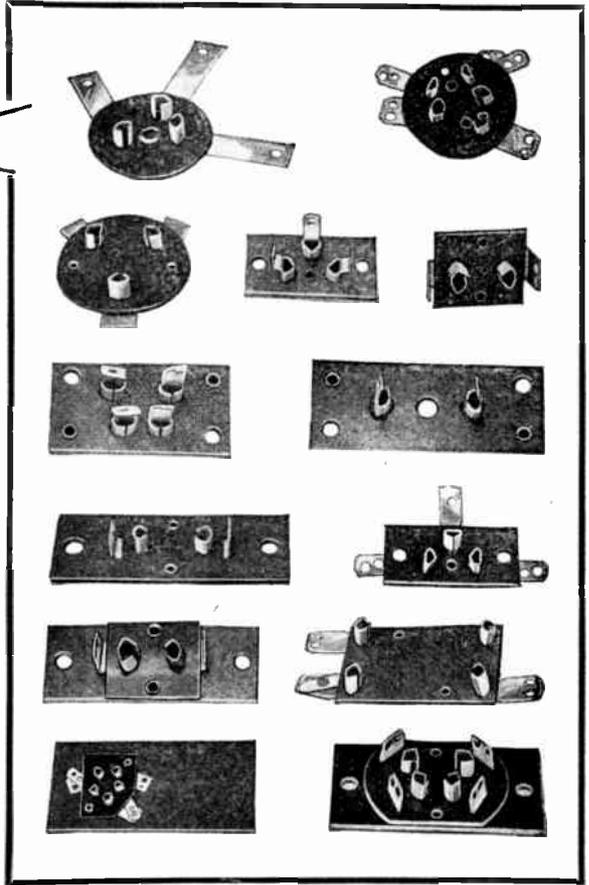

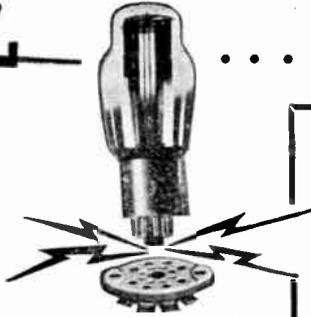

**National Fabricated Products, Chicago, Illinois, U. S. A.**

# NATIONAL

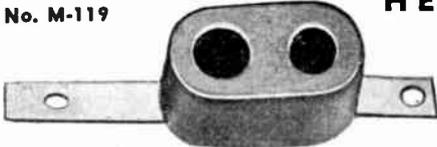

# ... BATTERY SOCKETS

National Battery Sockets illustrated on this page show some of the standard types which have been developed for battery manufacturers and indicate the variety of insulations and assembly styles that have been developed to fit some of the many battery assembly needs. National Fabricated Products' battery socket designs are all based on maintaining the necessary voltage breakdown, insulation, facility of soldering, and protection against searing mixtures for rapid assembly. The insulating materials which may be employed to fit the special requirement of the battery manufacturer range from Armite to XXX bakelite and may be provided in practically any desired shape to fit and properly seal the battery. Contacts are assembled with the necessary amount of float to insure proper orientation of the battery plug. Standard plate provided is heavy cadmium, although electro-tin plate may be specified if desired. National Fabricated Products has devoted extensive engineering development to the production of battery sockets that will stand up under the rugged requirements of high speed assembly methods, and will withstand without breakdown the rugged handling required in battery applications. The design and production of battery sockets is carried out in a separate department specially employed for this purpose, and National Fabricated Products feels that it has developed through quality of production and engineering service the finest design of battery sockets for the industry.

**SPECIAL NOTE:** Battery sockets are made in such a wide variety of styles, insulations and contacts, that it is possible only to illustrate a few of the more popular types. We solicit your inquiries. Samples will be submitted immediately on request. When sending your inquiry specify intended application and expected service with specification drawings.

No. M-119

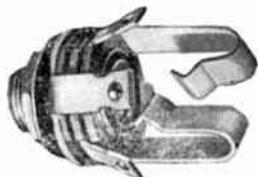

No. M-119—This special hearing-aid battery socket is a National Fabricated design in high dielectric molded black bakelite employing spring brass floating contacts cadmium plated. This socket has proven highly successful and is extensively used by all battery

## HEARING-AID BATTERY SOCKET

manufacturers producing this style of power supply. The contact and mold designs have been accurately engineered to provide the same degree of uniformity as larger sockets despite the miniature size. Due to the necessity of trouble-free performance of batteries in hearing aid applications, National has developed special assembly machinery to insure the precise manufacture of this socket. Particular attention has been paid in the contact design to absolutely insure positive electrical contact under all operating conditions and to eliminate any chance of noisy contact. A tremendous number of National Fabricated hearing-aid battery sockets well attest the excellence of this design.

No. JK-34-A

No. JK-33-A

## NATIONAL JACKS

The manufacture of high quality phone jacks has been one of the most important contributions of National Fabricated Products to the wartime requirements of both the Army and the Navy. Thousands of jacks have been manufactured to the exacting specifications required in military equipment, and National Fabricated Products have fulfilled these specifications uniformly and continuously. Special tooling to provide accurate forms of contacts, combined with rigid inspections and specification of contact alloys insure constant and proper contact pressure. National jacks are subjected to long-life tests, and humidity tests to insure electrical and mechanical performance. Jacks are supplied with washers and nuts in accordance with Signal Corps and Navy requirements. Red or black bakelite washers may be furnished in lieu of, or in addition to, metal washers, as required by the user. A slight charge is made for additional bakelite washers.

No. JK-34-A—Designed to receive Signal Corps plugs PL-47, 48, 55, 148, and 155. Supplied with metal washer and metal nut.

No. JK-33-A—Designed to receive Signal Corps plugs PL-46, 68, and 163. Supplied with metal washer and metal nut.

No. JK-44-A—This jack accommodates same plugs as JK-34-A, and is supplied with black bakelite washer, metal washer, and metal nut.

No. JK-43-A—This jack accommodates same plugs as JK-33-A, and is supplied with red bakelite washer, metal washer, and metal nut.

# NATIONAL

# BATTERY PLUGS . . .

National Battery Plugs are designed to fulfill the requirement of all battery applications and there are illustrated on this page some of the standard types manufactured and commonly employed. Numerous variations are in outside shape and type of insulation. The standard pin orientation most commonly used in commercial applications are illustrated only. Pins employed in all National Battery Plugs are fabricated brass cadmium plated and mechanically secured to the insulation by pening. Standard insulation employed in battery plugs is X laminated bakelite. Where requirements of mechanical strength exceed normal applications, fabric-base bakelite may be specified.

National Battery Plugs are available for standard portable "B," standard 1½-volt "A," standard six-volt "A," special portable "B," special 1½-volt "A," special six-volt "A," and 4½-volt and 7-½volt "A." In ordering battery plugs it is only necessary to specify the type of battery with which it is to be used.

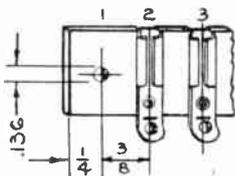

## TERMINAL STRIPS

**All Strips 3/8" Wide . . .  
All 1/16" Thick Strips  
Available in Any  
Combination**

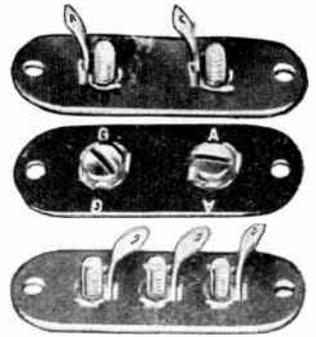

National Terminal Strips in standard specifications employ X laminated bakelite insulation and are mounted on 3/8" centers. Examples of Standard National Terminal Strips are illustrated below. All standard strips are 3/8" wide and 1/16" thick. They are available in any combination desired. National Fabricated Products assures not only design of terminal strip specified, but also the essential requirement of secure and rigid mounting, plating that affords ease of soldering and uniformity of assembly.

A "Plug-in type" terminal board. May be provided in lengths of from one to eight contacts. For connections which must be changed quickly and easily in chassis construction. Contacts of spring brass, cadmium plated, for use with .125" pins.

## SCREW TYPE TERMINAL STRIPS

The strips illustrated are for use with loud-speaker connections, antenna and ground connections, phonograph connections and television connections for chassis mounting. Lugs and screws are brass, cadmium plated and are mounted in X laminated bakelite insulation. Where special requirements call for additional strength, fabric base insulation may be specified.

Series No. 1700 — Multiple screw-type terminal strips for chassis mounting applications.

Fabricated of XX bakelite insulation 3/32" thick wax impregnated. Screw has shakeproof lock-washer plus a wafer washer — with captive end to prevent loss. Especially adapted to marine and aircraft installations where excessive vibration is a factor. These strips may be furnished in any length and with any number of contacts.

In post-war panning, we shall welcome an opportunity to assist you in developing special parts within the scope of our activities. Our engineering department is equipped to cooperate in the solution of difficult problems and will be available for prompt and efficient service at all times.

**National Fabricated Products, Chicago, Illinois, U. S. A.**

# ALDEN

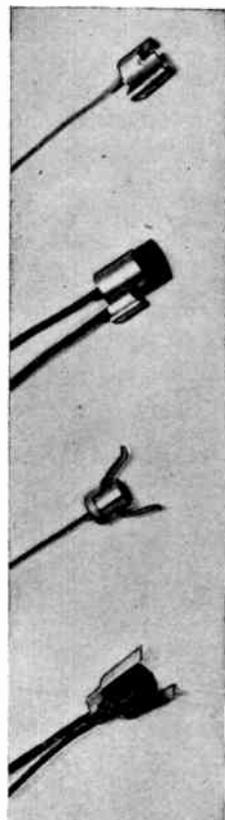

## QUALITY COMPONENTS

THE FOLLOWING IS NOT A COMPLETE COVERAGE OF ALDEN PRODUCTS BUT SOME IDEA OF THE SCOPE IS PRESENTED BELOW . . . FOR COMPLETE LISTING SEE ALDEN "BLUE BOOK."

### DIAL LIGHT SOCKETS

Here are the dial light sockets to standardize on all your new designs. Supplied with leads—single or double. Single wire socket made complete with minimum metal, one stroke of press. Center contact and insulation automatically assembled as lead is measured, cut to length, and stripped. Thus low cost and delivery schedules are met with leads to your specifications.

Standard leads are black, 18" free length, stripped  $\frac{3}{8}$ ". Special wire type and lengths on request.

#### 81L

One piece shell. For use on bracket  $\frac{1}{2}$ " wide,  $\frac{3}{32}$ " to  $\frac{1}{16}$ " thick.

No. 81L.....List \$0.14

#### 82L

Insulated type. Mounting same as 81L above.

No. 82L.....List \$0.24

#### 83UL

Tabs on end of "U" bracket spring into panel opening.

Width of mounting hole  $\frac{1}{8}$ ". Tabs  $\frac{1}{8}$ " wide.

No. 83UL.....List \$0.20

#### 85UL

Insulated type, two leads. otherwise same as 83UL above.

No. 85UL.....List \$0.25

### TUBE CAPS

Your every requirement of quality tube caps, insulated or not, supplied with leads to your specifications for every voltage requirement. Many made special, such as containing resistors to suppress oscillation, with tools for hundreds of different moldings, stampings, and all types of wire to draw from.

Leads supplied are 18" free length, stripped  $\frac{3}{8}$ ". Insulations will easily stand voltages encountered in normal use. Special types and lengths on request.

Lead brought through insulating pocket on top. Lead, eyelet and clip soldered together.

No. 90L—For  $\frac{1}{4}$ " dia. List \$0.20

No. 91L—For  $\frac{3}{32}$ " dia. List .20

No. 92L—For  $\frac{1}{16}$ " dia. List .35

Lead brought through side of cap. Strain relief provided by eyeletting lead, as well as soldering.

No. 90SL—For  $\frac{1}{4}$ " dia. List \$0.60

No. 91SL—For  $\frac{3}{32}$ " dia. List .75

No. 92SL—For  $\frac{1}{16}$ " dia. List 1.00

Combination of 90SL and 91SL (fits  $\frac{1}{4}$ " dia. on other end).

No. 90-91L.....List \$0.30

Reduce parasitic oscillation in critical circuits with this cap which provides space for a  $\frac{1}{2}$  watt resistor and/or a very small choke. Space provided  $\frac{7}{32}$ " dia. by  $\frac{3}{8}$ " long.

No. 92NL—For  $\frac{9}{16}$ " dia. List \$1.00

# ALDEN

## TUBE CAPS (Cont.)

Used especially for transmitter tubes operating at high temperatures. Molding can be unscrewed for inspection. Wire clamped in annular ring eliminates need for solder.

No.	List
91RL—For $\frac{23}{64}$ " dia.	\$1.50
92RL—For $\frac{9}{16}$ " dia.	2.00

Heavy molded skirt and phenolic disc prevent any possibility of coming in contact with high voltage, meeting Underwriters requirements.

No.	List
90TINL—For $\frac{1}{4}$ " dia.	\$1.50
91TINL—For $\frac{23}{64}$ " dia.	1.50
92TINL—For $\frac{9}{16}$ " dia.	2.00

Molded cap for the  $\frac{1}{8}$ " dia. pin on the No. 1851 and No. 1852 tube.

No. 201FL..... List \$0.25

May be used with 201FL above as circuit breaking connector for a single lead. Very compact.

No. 201ML..... List \$0.25

Uninsulated type cap. Extra flexible bare copper lead on all but smallest size which uses No. 22 stranded hook-up wire.

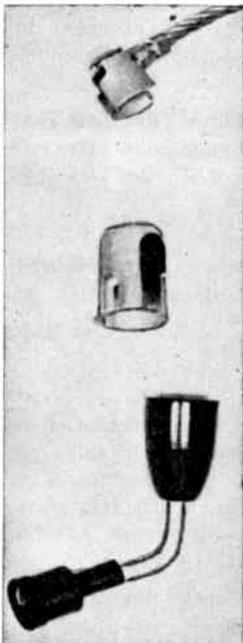

No.	List
CS90TL—For $\frac{1}{4}$ " dia.	\$0.75
CS91TL—For $\frac{23}{64}$ " dia.	.85
CS92TL—For $\frac{9}{16}$ " dia.	1.45
CS93TL—For $\frac{3}{4}$ " dia.	1.75

Patented grid cap shield for metal tubes with molded lining which prevents grounding and protects lead insulation.

No. 90TCIMS..... List \$0.35

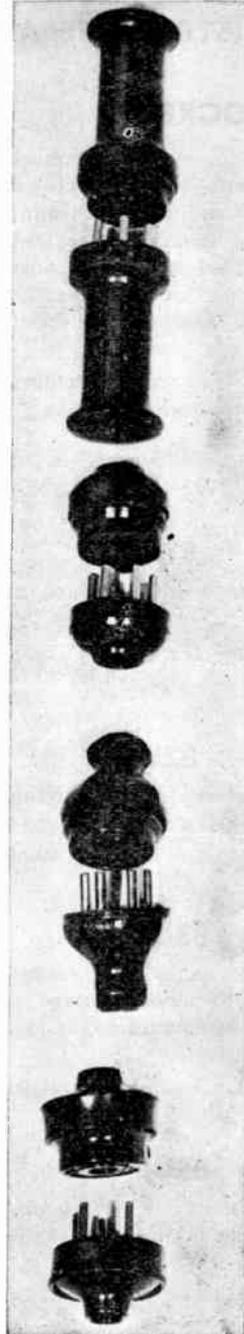

Transformer leads for any combination of tube boss and transformer stud supplied on request.

State tube boss size, type of transformer stud, and length of lead required.

## TWO-PIECE CONNECTORS

These are two-piece plugs with various covers that thread on the bases; base-prongs are the same as radio tubes and so fit the conventional tube sockets. Supplied with cables on request.

## MOLDED PLUGS

An inexpensive one-piece molded plug to fit conventional tube sockets—molded insulation surrounding insulation on leads, the ends of which protrude through the prongs and are soldered by dipping.

No.		List
104	4 prong	\$0.10
105	5 prong	.10
106	6 prong	.10
107	7 prong	.10
107A	7 prong (sm.)	.10
108	8 prong (oct.)	.15

The above plugs with rubber handle. Will accommodate cable up to 1/2" diam.

No.		List
104RS	4 prong	\$0.20
105RS	5 prong	.20
106RS	6 prong	.20
107RS	7 prong	.20
107RSA	7 prong (sm.)	.20
108RSA	8 prong (oct.)	.25

## MINIATURE PLUGS AND SOCKETS

The little miniature plugs and sockets are the sockets and plugs for all modern design. Compact metal seal socket with Underwriters' collar provides government spec. quality at commercial prices. Plug provides finger grip, long insulation protection for each lead, providing compact neatness on end of cable.

Choose the 121P to 125P series of plugs and associate sockets 411-445 wherever you wish to make chassis connections of one to five leads. The coming standards of quality and compactness indicate that these metal seal sockets must be chosen rather than anything previously available. Has integral Underwriters' collar, and associated neat plug has a finger grip, long protection for leads and provision for locking screw when required. Incorporates our usual design requisites to give you quality at low cost.

Sockets mount in 3/8" diameter hole, center distance of holes 1 3/8".

No.		List
121P	1 prong	\$0.10
122P	2 prong	.10
123P	3 prong	.10
124P	4 prong	.10
125P	5 prong	.10
441	1 contact	\$0.25
442	2 contact	.25
443	3 contact	.25
444	4 contact	.25
445	5 contact	.25

## HEARING-AID PLUGS AND SOCKETS

Designed particularly for hard-of-hearing aids, but have numerous other applications such as making a very inconspicuous a.c. cord connector for electric clocks, etc. Plugs supplied with flexible leads 12" long.

No.		List
HA902VPC	2 prong plug (illustrated)	\$0.25
HA903VP	3 prong plug	.30
HA402BT	2 cont. socket (illustrated)	.40
HA403BT	3 cont. socket	.45
HA907C	7 prong plug	1.30
HA407	7 cont. socket	.50

Above is standard miniature seven layout for portable radio and hearing-aid tubes.

## DETACHABLE TERMINAL CONNECTORS

Here are the two- to seven-wire Terminal Connectors that took the trailing cord and plug off speakers, did away with terminal strips, allowed for standardization of volume speaker production and met all Underwriters' requirements for a detachable connector. Further, they provided a most inexpensive, completely insulated contact with strain relief on each lead, using a minimum of material and labor. Thus, connectors with leads to any sets specification were provided by the millions—on exacting schedules—and at low cost—requiring a minimum of material and labor, the pooling of orders and purchase requirements to attain the highest procurement and factory efficiency. Female supplied with 18" leads.

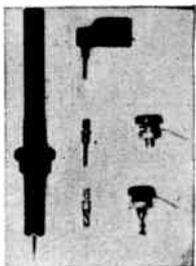

No.		List
202SH	2 prong	\$0.15
203SH	3 prong	.15
204SH	4 prong	.15
205SH	5 prong	.15
206SH	6 prong	.15
207SH	7 prong	.15

Center hole for No. 8 self-tapping screws in above.

No.		List
202FC	2 contact	\$0.14
203FC	3 contact	.15
204FC	4 contact	.16
205FC	5 contact	.17
206FC	6 contact	.18
207FC	7 contact	.19

## TEST PRODS AND JACKS

Long, easily held prod at left with hardened needle point.

No. 160N..... List \$0.50

Smaller right angle prod at top with hardened needle point.

No. 113N..... List \$0.25

Continuity tester with 2 prods, leads, neon lamp and plug-in socket (not illustrated).

Information on other points, jacks, etc., on request.

## TUNING EYE SOCKETS

**TUNING EYES**—Supplied by the millions to the radio industry. Basic design has three parts—molding, contacts, disc. Contact has minimum metal, minimum molding material; but provides protecting collar from live prongs. Complete insulation of each lead, individual strain relief and contact allows fast transfer of heat for perfect soldering. Built-in plate resistor on 6-contact supplied  $\frac{1}{2}$ ,  $\frac{1}{4}$  or 1 megohm as specified. Leads 18" long, color coded.

For standard six-prong tube; five leads.

No.	Resistor	List
206FESC25	$\frac{1}{4}$ meg.	\$0.75
206FESC50	$\frac{1}{2}$ meg.	.75
206FESC100	1 meg.	.75

Order above with 206H and 206B below for complete unit.

For octal-based tubes. No resistor. 8 leads supplied. Leads No. 1 and No. 6 can be removed when not required.

No. 208FESC.....List \$1.00

Mounting for tuning eye tubes. One slotted screw allows change of angle or movement along length.

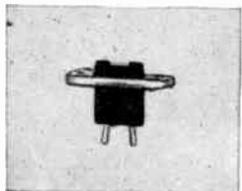

No. 206H.....List \$0.25

Molded escutcheon allows wide angle of view — excludes extraneous light.

No. 206B.....List \$0.15

## A.C. POWER OUTLET

Here is a power outlet using the smallest possible space, Underwriters' approved, and fitting your manufacturing assembly process of assembly-to-chassis by eyelets, rivets or screws, and soldering of leads.

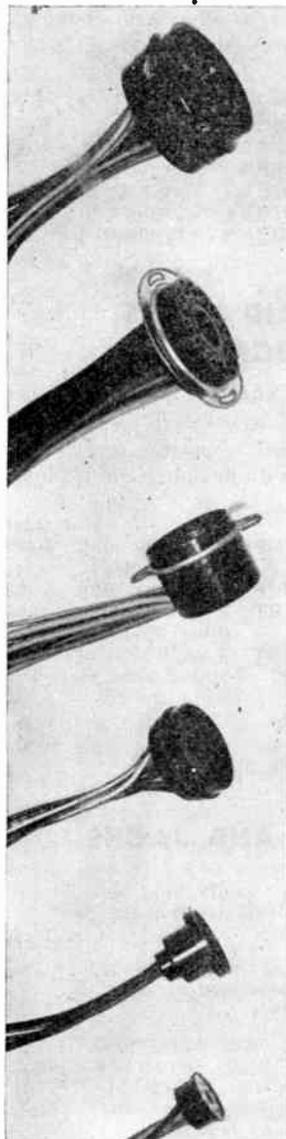

Takes standard outlet plug. Rated 10 a., 250 v.—15 a., 110 v. by Underwriters Labs.

Mounting centers  $1\frac{1}{2}$ ".

No. 402AC.....List \$0.22

## CATHODE-RAY TUBE SOCKETS

Do not make several problems of Cathode Ray Connectors and Sockets. Experience in supplying the first pioneers for the pilot runs to the latest radar, means the connectors with leads, compact, individual strain relief, individual insulation with safety factors and every type of wire to provide even in the smallest of quantity a connector with the proper insulation of leads, the lengths to your particular requirements, including shielding of any leads, lacing, overall braiding, intervening connectors or "what have you" on special order. Standard lead construction is 18" cable. Shorten to fit individual needs.

Connector-type, for diheptal-based tubes. (12 or 14 prong.)

No. 214FCC.....List \$5.10

Panel mounting type, for diheptal-based tubes. Mounting circle  $2\frac{3}{4}$ " diam. Four slots.

No. 214FPC.....List \$5.43

Panel mounting type, for 11-pin magal-based tubes. Mounting centers  $2\frac{1}{2}$ ".

No. 211FBVPC  
List \$6.68

Connector-type, for 11-pin magal-based tubes. Used in many commercial oscilloscopes.

No. 211FC.....List \$5.01

Connector type, for 6-prong tubes.

No. 206FITC.....List \$2.50

Connector-type, for octal-based tubes.

No. 208FESC.....List \$1.00

# ALDEN

## SOCKETS

Patented sockets for tube testers and aging racks. Designed with a minimum of flexing, and free floating, so that the metal in the contact will never crystallize and fail. Test runs indicate a life expectancy of a million and a half insertions.

Sockets to mount above or below panel. 1 1/8" mounting centers.

No.	Contacts	List

457V-1	7	1.50

## FUSEHOLDER

Here is a patented fuseholder that eyelets or screws in place, has spring to eject burned out fuse, prevent rattle, and open side contact for easy removal of fuse ends when glass breaks.

Mounts in 1/4" diam. hole. Mounting screw centers 1 3/8".

Fuse button molded in red. A dime can be used in slot to remove fuse.

No. 440FH..... List \$1.25

## MINIATURE CONNECTOR

Here is a most compact, inexpensive connector complete with leads. Using a minimum of material, these connectors provide complete insulation around each lead and the protecting collar required by Underwriters and yet occupy a very small space so that large openings are not required from one chamber to another. First used to connect turntable to set, these connectors now have universal application in connecting cables or units of all types. Leads supplied are color coded, 18" long, except on special order.

Female connector:

## MINIATURE SHIELD GROUNDING SOCKET

The new automobile set, or any requirement for shield grounding socket, demands this quality patented socket. Here's what it is and does: It's a metal seal socket with a rounded edge entrance that grounds the plug upon insertion. The plug has long insulated protection for each lead and meets all the cable manufacturers' problems of efficient use, as to ease of cutting leads, preparing ends, soldering shield, and applying overbraids. The shield cover seals the plug dust- fungus- and moisture-tight.

## ANALYZER KITS AND ADAPTORS

For years we have taken in the pencil stage the adaptor problems of the quality radio test equipment manufacturer and given him a quality product that always did the job and anticipated just how it would be used. To do this we have tools, molds, contacts, dies for producing hundreds of component parts which together with our specialized experience have over the years totaled in cost several hundred thousands of dollars. It was therefore natural that our 908 Analyzer Kit and Associate Adaptors found themselves in the Signal Corps standard radio test equipment supplied by the various manufacturers. Adaptors have also been made by us for unannounced tubes. Thus we have partially solved your adaptor problem even before it is presented to us, consequently can provide any new requirement promptly and at a minimum of expense.

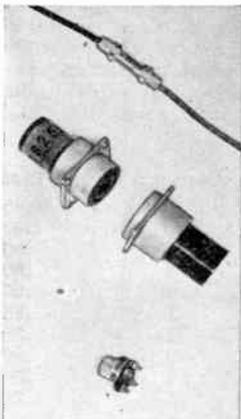

Standard replacements for Weston, Triplett and other analyzer adaptors.

Or make your own analyzer, using these proven adaptors.

## SPECIAL-PURPOSE SINGLE WIRE CONNECTORS

Each of the connectors below was designed for a special purpose for which there was no available product. Consult Alden on your connector problem.

Complete shielding through use of die castings. Maximum width only  $\frac{9}{16}$ ". Shielded cables supplied 24" long.  
No. 6004A.....List \$4.00

Extremely long leakage path and high-grade phenolic make this pair able to withstand 20,000 volts at sea level.  
No. 8001A.....List \$39.00

Aluminum connector held on equipment by screws and nuts. Screw cap holds spring tension on contact.  
No. 1401.....List \$0.45

## PLUGS, JACKS AND CORDS

Alden has probably made more PL-55 plugs for the Signal Corps than any other manufacturer. Cord sets of all types as well as harnesses have been continuously made for the Armed Forces during the war. We would like to quote on your cord set or harness job. All cordage listed below is Signal Corps type, overall rubber jacketed with No. 22 conductors. Jacket stripped back 1½" on free end. Wires stripped  $\frac{3}{8}$ ".

No.	List
1001A—PL54 plug only.....	\$0.90
3056A—PL54 plug assembled to 6 ft. cord.....	1.35
1000A—PL55 plug only.....	.95
3057A—PL55 plug assembled to 6 ft. cord.....	1.40
1003A—PL68 plug only.....	2.50
3058A—PL68 plug assembled to 6 ft. cord.....	2.95
2000A—JK26 jack only.....	1.25
3059A—JK26 jack assembled to 6 ft. cord.....	1.70
2001A—JK48 jack only.....	.85
3060A—JK48 jack assembled to 6 ft. cord.....	1.25

## TELEGRAPH KEYS

Our integrated departments have made us an excellent source for telegraph keys to government specifications. Since all important parts are molded, punched, or turned in our own plant, variations on the basic keys are easily made. When the Canadian Government needed production to their requirements, we modified American parts and produced the assembly so that contractors making sets who bought their keys from us met their schedules.

Basic J37 Key as made for the Signal Corps.

No. 7000A.....List \$3.00

Code Practice Key. Molded base, 33" cord and PL55 plug plus basic J37 key above, which uses solid coin silver contacts. Mounts with four screws on corners. Base 2¾" x 5".

No. 7009A.....List \$6.40

Basic J37 Key mounted on heavy steel hinge and heat-treated steel kneeband. All steel parts parkerized and black lacquered. Rubber jacketed cord 5 ft free length with PL55 plug. Signal Corps J45.

No. 7004ZA.....List \$8.00

## JEWEL LIGHT ASSEMBLIES

1/2" Polarized Pilot Light

### No. 80 TYPE

PATENT NO. 2220516  
Net Wt. 0.080 lb.

The patented No. 80 incorporates the use of polarized discs to regulate light intensity. A partial turn of the jewel dims the light. Supplied with three fibre washers which compensate for different panel thicknesses.

Type Number	Style Socket	Length A to B	Panel Thickness	List Price
80	Miniature Bayonet	1 1/8"	0" to 1/4"	\$ 1.40
80S	Miniature Screw	1 3/16"	0" to 1/4"	1.40

#### SPECIFICATIONS

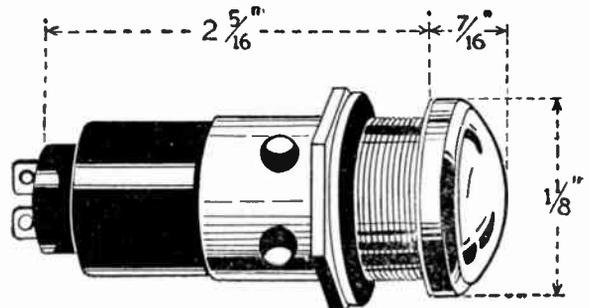

**COLORS:** Amber, Blue, Green Ruby, White, Yellow, Colorless. **TYPES OF JEWEL:** Regularly supplied with smooth glass, frosted on back only. Optional at no extra cost smooth glass frosted on face and back, symbol SFA; diamond cut (faceted) glass, symbol DC. Mounts in 1/8" hole. Lamp removable from front of panel. **LAMPS REQUIRED:** Any miniature bayonet or miniature screw based lamp with G 3/2 or T 3/4 bulb size. **PACKED** in bulk fully assembled. **FINISH:** Bright nickel. Extra charge for Chrome, Statuary bronze, or 200-hour salt spray protection.

1" Jewel—Horizontal Mounting  
Double Contact Candelabra Bayonet Socket

### No. 675 TYPE

Net Wt. 0.137 lb.

The No. 675 has a "slip fit" bezel. It is exceedingly neat in appearance. Very substantial and easy to install. All parts are burnished cadmium plated except the bezel (jewel holder) which has a highly polished chrome finish.

Type Number	Style Socket	Panel Thickness	List Price
575	D.C. Cadelabra Bayonet with screw terminals	0" to 1/2"	\$ 1.85
675	D.C. Cadelabra Bayonet with solder terminals	0" to 1/2"	1.85

#### SPECIFICATIONS

**COLORS:** Amber, Blue, Green, Red, White, Yellow, Colorless. **TYPES OF JEWEL:** Regularly supplied with smooth, colorless, frosted on back only glass and removable color disc. Optional at no extra cost colored glass diamond cut (faceted) symbol DC; or smooth, frosted on back only, symbol SFB. Mounts in 1" hole. Lamp removable from front of panel. **LAMPS REQUIRED:** Any double contact, candelabra sized, bayonet base lamp with G6 or T-4 1/2 bulb size. **PACKED** in bulk and fully assembled. Extra charge for 200-hour salt spray protection.

# Dial and Jewel PILOT LIGHT ASSEMBLIES

WORLD'S LARGEST EXCLUSIVE MANUFACTURER

## JEWEL LIGHT ASSEMBLIES

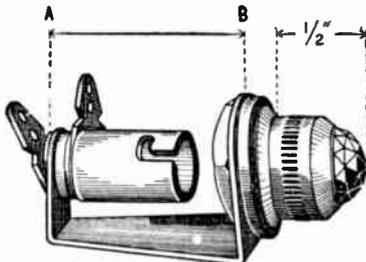

1/2" Jewel . . Horizontal Mounting

1/2" Jewel . . Horizontal Mounting

### No. 20 TYPE

### No. 50 TYPE

The original Drake Horizontal Mounting Lamp Assembly, and still a fast seller. When ordering please be sure to select the correct part number for the thickness of panel on which to be installed; otherwise lamp may not extend far enough forward for easy removal, or if too far, prevent bezel screwing all the way on collar.

PATENT NO. 2220515  
Net Wt. 0.036 lb.

Type Number	Style Socket	Length A to B	Panel Thickness	List
20	Min. Bayonet	1 3/16"	1/8"	\$.50 EA.
30	Min. Bayonet	1"	1/4"	.50 EA.
40	Min. Bayonet	1 3/32"	1/8"	.50 EA.
20-S	Min. Screw	1"	1/8"	.50 EA.
30-S	Min. Screw	1 3/16"	1/8"	.50 EA.

NOTE: Dimension A to B is overall length of mounting bracket.

#### SPECIFICATIONS

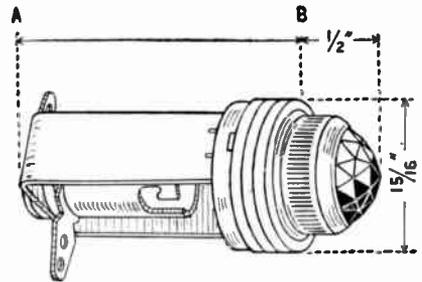

**LAMPS REQUIRED:** Miniature T 3/4 tubular, 6-8V, or other T 3/4 lamps of same over-all length. • Lamp removable from front of panel. • Mounts in 1 1/16" hole. • **JEWEL:** diamond cut (faceted); Amber, Blue, Crystal, Green, Ruby, White (Milk White) and Yellow. • **SPECIAL FINISHES:** Chrome, Black Nickel, Statuary Bronze. • **PACKED** in bulk with jewel, collar and nuts in bag. • **SPECIAL JEWELS:** SP—Smooth, plain; SFA—Smooth, frosted all over; SFB—Smooth, frosted back. • List Price SFA and SFB, 2c each extra.

## VARIABLE LIGHT INTENSITY 1-Inch Jewels

Uses Mazda 6S6 Bulb, 115 volt.

Cat. No.	Description	List Price
1504	Faceted Jewel .....	\$2.50
1505	Plain Jewel .....	2.50
1506	Frosted Jewel, Colored Disc.....	2.60

In the above Pilot Lights there are two metal discs each containing three triangular holes. The assembly is such that, in one position, the holes all register and the Pilot Light shows bright. A turn of the knurled jewel holder reduces the brightness. Clear lenses, sand blasted all over, are furnished. Transparent colored celluloid discs are placed underneath the jewels.

Specifications — Disc colors: Red, Green, Amber, Blue, White.

Jewel holders polished and chromium plated.

1-inch mounting holes. Bulbs removable from front.

## GOTHARD PILOT LIGHTS VARIABLE LIGHT INTENSITY ½-INCH JEWELS

½-In. Mounting Hole

Uses Short Bulb		Uses Long Bulb	
Mazda No. 51—	6-8 Volt	Mazda No. 44—	6-8 Volt
Mazda No. 53—	12-16 Volt	Mazda No. 1815—	12-16 Volt
Mazda No. 356—	28 Volt	Mazda No. 313—	28 Volt

Cat. No.	Description	List Price

1117	Shutter type, Plain Jewel .....	1.50
1120	Polarized type, Faceted Jewel .....	1.50
1121	Polarized type, Plain Jewel .....	1.50

In many cases it is desirable to vary the light intensity of a Pilot Light. Two methods are used. The first consists of two polarized discs mounted so that the lines of polarization can be either parallel or at right angles. When parallel, the jewel shows bright. When at right angles, the jewel is very dim. Various graduations of light intensity are possible.

In the second type two metal discs, each containing three holes, are substituted for the polarized discs. The assembly is such that in one position the holes all register and the Pilot Light shows bright, becoming dim when holes are turned out of register. Translucent Lucite lenses in the following colors: Red, Green, Amber, Blue, Opal.

## NEON GLO-LITE

Uses Mazda NE-45

1217	Colored Lucite Cap.....	2.00

Transparent colors: Red, Green, Amber

The Neon bulbs consume only ¼-watt current and their life is rated at 3000 hours. Note that the glow portion of the bulb sets up in the Lucite cap. The interior of the cap is covered with tiny hemispheres. This design diffuses the light so that the cap is readily visible from the side, as well as in front.

## WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

### SERIES "A"

61901

The Pilot Lights presented on this and the adjoining page are only representative of the extensive Dialco line of 1" and 1½" Pilot Lights. These units are in service in every conceivable Aircraft, Marine, Electronic, Radio, Electrical and Industrial application. Should you require a special unit, we can rapidly submit suggestions and samples to meet your specific requirements.

### GENERAL DATA

SERIES "A"—1½" Marine Cap Screw Pilot Lights.

SERIES "B"—1" Marine Cap Screw Pilot Lights.

SERIES "C"—1" Marine Cap Screw Full View Torpedo Pilot Lights.

SERIES "D"—1" Marine Cap Screw "Vari-Dim" Pilot Lights.

The following general features and specifications apply to all units in the Series presented on this page:

All units are water-tight, tested under 15 lbs. pressure per square inch. The Jewel Holder Cap screws on from front of panel. **All lamps are removable from front of panel. Require 1" panel hole for mounting.**

### SERIES "B"

51901

51410

Navy Specifications 17-P-4-CFG Moulded Bakelite Housing.

- Heavy terminals for soldering or terminal screw connection. Terminals are perfectly secured—so that they do not turn or become loose regardless of the severity of the tests to which they may be subjected.

- Material: Brass or Aluminum 17 S.T.

- Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, and Olive Drab Anodized Lusterless U.S.A. Signal Corps Specifications.

- Lenses: Series "A-B-D"—Smooth- or Diamond-faced. If smooth, specify clear color, Sandblasted-on-back or Sandblasted-over-all.

- Series "C"—Torpedo lens.

- Lens Colors: Red, Green, Amber, Blue, Yellow, Opal, White, Clear.

- Lamp Specifications: See page N-14 for 9 standard lamps applicable to these series of Pilot Lights.

### SERIES "C"

51901-5

51206-5

### SERIES "D"

71901

**Plus LAMPS...**  
To help speed production, Dialco offers Pilot Lights completely assembled with G.E. or Westinghouse Lamps—any type or voltage. Samples submitted on request.

### HOW TO ORDER

The choice of a Pilot Light is determined partly by the type and size of bulb to be used. On page N-14 are listed 9 standard bulbs. Select your Pilot Light from any Series in conjunction with the required bulb. Note: Prices quoted do not include the bulbs. Prices will be quoted on application. We are in a position to supply any standard or special General Electric or Westinghouse Bulb for any Dialco Pilot Light which you select.

# DIALCO

# WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

The units presented on this page are recommended for general applications other than marine. Precision engineered and ruggedly constructed, these Pilot Lights will give dependable and lasting service.

## GENERAL DATA

**SERIES "E"**—1" Lock-Tite Friction Bayonet-Lock Pilot Lights.

**SERIES "F"**—1" Lock-Tite Friction Bayonet-Lock, Full-View Torpedo Pilot Lights.

**SERIES "G"**—1" Standard Friction Fit Pilot Lights.

**SERIES "H"**—1" Standard Friction Fit Full-View Torpedo Pilot Lights.

**SERIES "R"**—1" Standard Friction Fit Pilot Light, Porcelain Base.

## SERIES "E"

41901

41206

41410

The following general features and specifications apply to all units in the Series presented on this page:

All "Lock-Tite" units are designed for service on vibrating panels. The positive "friction-lock" construction of the jewel holder prevents impairment of the unit even when subjected to severe vibration.

The "Friction Fit" units are designed for installation in which the vibration factor is of minor importance. The "friction-fit" Jewel Holder is inserted firmly and securely, assuring efficient, dependable service of the assembly.

**All lamps are removable from front of panel. A 1" panel hole is required for mounting.**

Navy Specifications: 17-P-5 FBG Bakelite Housing.

17-P-4 CFG Moulded Bakelite Housing.

- Heavy terminals for soldering or terminal screw connection. Terminals are perfectly secured — so that they do not turn or become loose regardless of the severity of the tests that they may be put through.
  - Dialco anchoring features of the lamp housing permanently seals the position of the bayonet shell so that the lamp is easily removed from front of panel.
  - Material: Brass or Aluminum S.T.
  - Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, and Olive Drab Anodized Lusterless U.S.A. Signal Corps Specifications.
  - Lenses: Series "E", "G", "R": — Smooth or Diamond-faced. If smooth, specify clear color. Sandblasted-on-back or Sandblasted-over-all.
  - Series "F", "H": — Torpedo lens.
  - Lens Colors: Red, Green, Amber, Blue, Yellow, Opal, White, Clear.
- **LAMP SPECIFICATIONS: See page N-14.**

Series "L"

## DIALCO "LIGHT SHIELD" PILOT LIGHT ASSEMBLY — Series "L"

This unit is designed to direct a beam of light within a rotation of 360 degrees. A turn of the knurled head casts the light on any localized spot, at any desired angle. The unit may be inserted in a panel mounting hole of  $\frac{1}{8}$ " diameter.

### FEATURES:

Socket Housing is made of Navy Specification 17P5FBG Bakelite. Sealed with Bakelite Varnish . . . Bulb is easily removable from front of panel . . . Housing and shield are made of brass or aluminum . . . Vibration-proof, friction-snap fit between shield and housing.

Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized Chrome, Ebinol, and Olive Drab Anodized Lusterless U.S.A. Signal Corps Specifications.

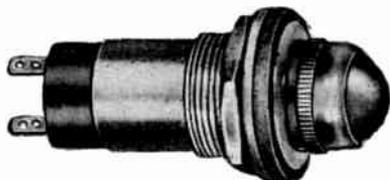

Silver-plated, or tinned, terminals are vibration-proof. Unit may be grounded or ungrounded.

DIALCO precision design and rugged construction qualifies this unit for service on important instrument panel installations.

### SERIES "L"

\*\*Prices quoted are for Brass. Prices for Aluminum on request.

FOR LAMP SPECIFICATIONS SEE PAGE N-14

Series "P"

## DIALCO "FULL-VIEW" NEON\* PILOT LIGHT ASSEMBLY — Series "P"

Combines the penetrating glow of Neon bulbs and visibility from all angles.

Neon bulbs have these special advantages: A distinctive orange-red glow. Dependable long life. Low current consumption. Resist vibration or shock. Operate direct on high voltage circuits. Emit practically no heat.

Series "P" units are especially effective with Neon bulbs, and feature a full-view plastic head which permits visibility of the glow from all angles. The head unscrews from front of panel, facilitating replacement of bulbs.

WE CAN SUPPLY ALL PILOT LIGHT ASSEMBLIES COMPLETE WITH ANY REQUIRED GENERAL ELECTRIC OR WESTINGHOUSE LAMP.

\*Also for Mazda panel lamps

## REMOVABLE $\frac{1}{2}$ " JEWEL PILOT LIGHT ASSEMBLY—Series 810

Have Exclusive "PERMALOCK" Anchoring Feature

Mounts in single  $\frac{1}{4}$ " hole . . . Designed for standard Mazda Miniature Bayonet or Miniature Screw Base lamps . . . Lamps are instantly removable from front of panel . . . Embossed Rib gives bracket added strength and assures perfect alignment . . . Screw-in type Jewel Holder, nickel-plated brass . . . Lenses: Smooth or facet-faced . . . Lens Colors: Red, Green, Amber, Yellow, Blue, Opal and Clear. Lamps: See page N-14.

# WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

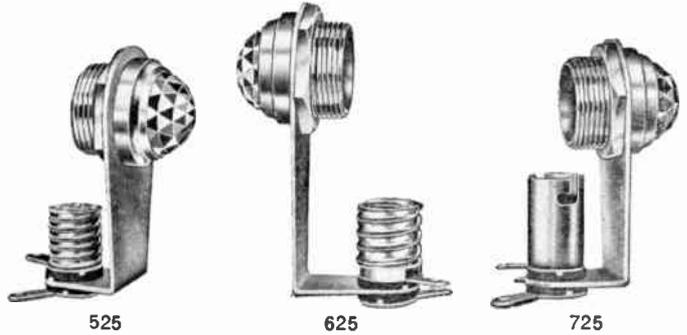

## THREE-QUARTER INCH PILOT LIGHT ASSEMBLIES — Series 525-625-725

### Exclusive "PERMALOCK" Anchoring Feature

All units shown on this page are absolutely fool-proof and "short-proof," thanks to the "Permalock" anchoring feature. Lugs, washers, bracket, and socket are permanently locked together, making a shake-proof, fool-proof unit.

- Fills need for a low priced large jewel pilot light assembly.
- Requires single  $\frac{1}{8}$ " hole for mounting.
- Available with Candelabra 110V, Miniature Bayonet and Miniature screw base sockets.
- Faceted or Smooth Faced Jewels.
- Jewel Colors: Red, Green, Amber, Blue, Opal and Clear.

Note: Specify Color of Jewel When Ordering.

## ONE INCH OPEN TYPE PILOT LIGHT ASSEMBLY—Series 910

Have Exclusive "PERMALOCK" Anchoring Feature

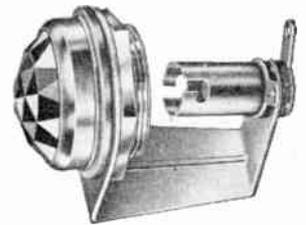

A low priced unit for most applications . . . Requires single one inch hole for mounting . . . Embossed rib in center of bracket gives added rigidity and strength; assures perfect alignment . . . Uses standard Mazda lamps, removable from front of panel through use of Panel Bushing with Jewel holder . . . Jewel holder of highly polished chrome plated brass . . . Available with Candelabra 110 Volt, Miniature Bayonet or Miniature screw base sockets . . . Faceted or Smooth Faced Jewels . . . Colors optional, Red, Green, Amber, Blue, Opal, White, and Clear Jewels . . . Frosted White Jewels can be furnished with removable colored discs color showing only when lamp is on.

## DIALCO SOCKET ASSEMBLIES

Have Exclusive "PERMALOCK" Anchoring Feature

Units shown here are only representative of our extensive line. For additional information, send specifications.

ALL UNITS ARE FOOL-PROOF and "SHORT-PROOF" . . . The exclusive Dialco "Permalock" Anchoring Feature permanently locks the lugs, washers, socket, and bracket. The result is a rugged, immovable, shake-proof, fool-proof assembly in which the danger of a short-circuit is eliminated.

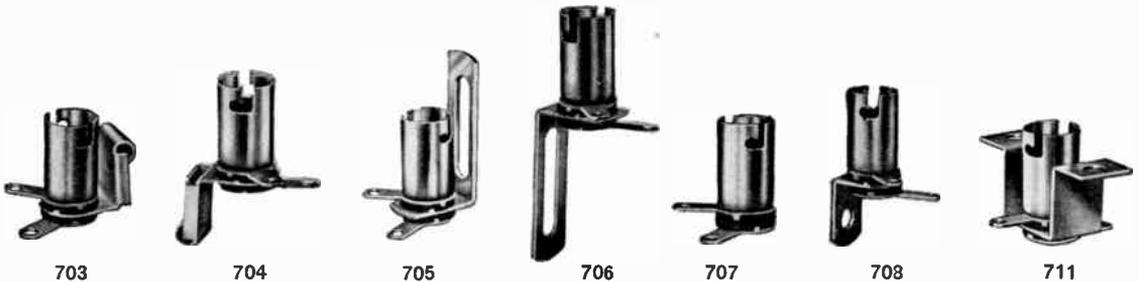

### MINIATURE SCREW BASE

### CANDELABRA 110 VOLT

### MINIATURE BAYONET BASE

- Cadmium Plating on all brackets.
- Terminal Lugs of tinned brass facilitate rapid soldering.
- Assemblies also available with single lug terminal, other connection effected through grounded bracket.
- Terminals can be supplied in any desired position.
- To assure positive contact, bayonet type sockets are furnished with approved coil spring construction.
- Highest grade insulating washers furnished with all assemblies.

# ALPHA-WIRE-PRODUCTS

## LACQUERED HOOK-UP AND LEAD-IN WIRE High Gloss Lacquered Braid

GENERAL PURPOSE: For point to point soldering connections on transformers, amplifiers, panel hook-up, etc., where a low loss dielectric is required. It is not a pushback wire but will strip easily.

CONSTRUCTION: Stranded tinned conductor, free stripping rubber, silk braid highly lacquered.

No.	Length Feet	Size	Tinned Strand	Rubber Thickness	Voltage Breakdown (60 Cycles)	D.C. Resistance Per Foot (Megohms)	O.D.	List Price

Size #18 Stranded 1/32" Stock Colors: Black, Red, Green, Yellow, Blue, Brown, White. Other sizes Stock Colors: Black and Red.

## "LACTIV" WIRE (Pushback)

GENERAL PURPOSE: Pushback hook-up wire in various colors for circuit identification.

CONSTRUCTION: Single conductor, solid or stranded tinned copper, served, .010" special rubber compound, colored cotton braid waxed.

## SHIELDED LEAD-IN AND GROUND WIRE

GENERAL PURPOSE: Eliminates interference caused by motors, high tension wires, X-Ray machines or other apparatus that radiate electrical impulses. Can also be used for grid and plate leads.

CONSTRUCTION: Stranded tinned conductor, free strip rubber, braided tinned copper shield overall. Frequency: 3000 K.C.

No.	Length Feet	Size	Strand	Thickness Rubber	Maximum Capacity Per Foot	Surge Impedance (Ohms)	Power Factor Percent	O. D.	List Price

## LACQUERED PRIMARY WIRE

GENERAL PURPOSE: For automobile head, tail, side, dashboard lamps, horn, spotlight, instrument leads and general primary voltage applications.

CONSTRUCTION: Stranded soft annealed tinned copper, insulated with rubber, over which is a highly lacquered braid. Oil, heat, and moisture-resistant.

No.	Spool	Size	Strand	Rubber	O.D.	List	No.	Spool	Size	Strand	Rubber	O.D.	List

## "SUPER HI-TENSION" KINKLESS TEST LEAD WIRE

GENERAL PURPOSE: As test leads in analyzers, oscillators and all other types of testing apparatus or wherever an EXTRA FLEX-IBLE insulated wire is required.

CONSTRUCTION: #20-41/36 tinned soft annealed copper, concentric strand, cotton wrap, 3/64" "Super Hi-Tension" rubber, satin finish.

No.	Spool	Voltage Breakdown (60 Cycles)	D.C. Resistance Per Foot (Megohms)	O.D.	List Price

1635	500	10,000 V.	710	.140"	8.00

STOCK COLORS: RED and BLACK

## Heavy Duty Type

GENERAL PURPOSE: For television therapeutic equipment, analyzers, oscillators, etc. or wherever a heavy duty high voltage line is required.

CONSTRUCTION: #18-66/36 tinned soft annealed copper wire, concentric strand, cotton wrap, heavy "Super Hi-Tension" rubber, satin finish.

1637	100	22,000 V.	Over 1,000	.248"	\$5.00
1638	500	22,000 V.	Over 1,000	.248"	22.50

STOCK COLORS: RED and BLACK

## AUTO RADIO SHIELDED LEAD-IN

GENERAL PURPOSE: As an antenna lead-in to reduce interference of ignition pick-up.

CONSTRUCTION: Single conductor, stranded tinned copper, insulated with rubber, jute filters, close tinned copper shield overall.

No.	Spool	Max. Capacity Per Ft.	O.D.	List
1239	100'	27.6 mmf.	.250"	\$7.50

## FLEXIBLE VARNISHED TUBING

**RADIO TUBING**—(Spaghetti). A sleeving with a heavy coat of varnish. In high gloss vivid colors. Average dielectric strength: 5,000 volts.

**SATURATED SLEEVING**—A fibre yarn sleeving saturated with high grade insulating varnish. Cuts clean and has a smooth interior wall. Average dielectric strength: 1,200 volts.

**MAGNETO TUBING**—The production of this type of tubing is under rigid control so as to insure a maximum in quality. It is thoroughly impregnated with a varnish of maximum insulating value. It is resistant to heat, oil, gas and acids. Colors are bright and vivid. Average dielectric strength: 7,000 volts.

Note: Sizes follow the B & S System of gauging wires. For instances, a #10 tubing will fit over a #10 bare wire or any wire with an insulation of which the O.D. is equivalent to #10 B & S gauge. In doubt, it is best to submit a sample of the wire or product to be covered.

### AC-DC ANTENNA WIRE

**GENERAL PURPOSE:** Ideal replacement wire for universal midgets, indoor aerials and loop antennae.

**CONSTRUCTION:** Single conductor #23-20/36 stranded bare copper, extra flexible, covered with a dark brown cotton braid overall.

Number	Length	Put-Up	List
1281	25 Ft.	Disc	\$0.18
1282	100 Ft.	Spool	.65
1283	500 Ft.	Spool	2.75
1284	1000 Ft.	Spool	5.25

### AC-DC RESISTANCE LINE CORDS

These line cords are built with a third element voltage drop resistor to take care of reducing line voltage and also increase life of coils and condensers as well as eliminate heat generated by the receiver. Equipped with a soft rubber unbreakable attachment plug.

#### INDIVIDUALLY BOXED FOR SETS WITH FOLLOWING TUBES

No.	Ohms	For Tubes
1174	135	4-6.3 Volt Tubes, 1-43, 1-25Z5
1175	160	3-6.3 Volt Tubes, 1-43, 1-25Z5
1175B	180	4-6.3 Volt Tubes, 1-43, 1-12Z3
		2-6.3 Volt Tubes, 1-43, 1-25Z5

		2-6.3 Volt Tubes, 1-12Z3
1179	360	1-6.3 Volt Tube, 1-12Z3
		3-6.3 Volt Tubes

List Price, each.....\$0.60

### HEAVY DUTY RUBBER INSULATION CORD SET

Best for extending power lines of motors, refrigerators, washing machines, electric drills, vacuum cleaners, etc. Construction 18-2 SJ service cord, rubber connector one end, other end rubber plug.

Number	Length	List
4139	9 Ft.	Extension Cord \$0.80
4142	12 Ft.	Extension Cord \$0.93

### E-Z STRIP POWER CORDS

Ideal power supply cord for replacement on radios, lamps, fans, etc. Made of E-Z strip all rubber parallel cord (UNDERWRITERS APPROVED).

AL) with a small unbreakable soft rubber attachment plug. Free end stripped and tinned ready to attach.

#### INDIVIDUALLY BOXED

1974	7 Lb. Spool..... 5.25

#### Twisted Pair

1975 7 Lb. Spool..... 5.80

### SPAGHETTI TUBING

Takes up to a No. 14 wire. Black, Yellow, Red, Green and Brown.

No. 2091—30" Lengths.....Each \$0.00 1/2

# ALPHA-WIRE-PRODUCTS

## SHIELDED DUPLEX SPEAKER CABLE

**GENERAL PURPOSE:** For PA systems, photo-electric cell circuits, master control sound systems, etc.  
**CONSTRUCTION:** Two conductors twisted, each #18-16/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, paper wrap over both conductors, close tinned copper shield overall.

No.	Ft. per Spool	Conductors	Maximum Capacity per Ft. Cond. to Shield	Bet. Cond.	O. D.	List Price
1265	500	2	65 mmf.	23 mmf.	.250"	\$27.50

## ARMORED DUPLEX SPEAKER CABLE Varnished Cambric Type

**GENERAL PURPOSE:** For PA systems, oil burner installations, automotive wiring, etc.  
**CONSTRUCTION:** Two conductors parallel, each #18-16/30 stranded tinned copper, varnished cambric wrapped, color coded waxed cotton braid, galvanized steel armor overall.

Number	Spool	O. D.	List Price
1272	500 Ft.	.132" x .182"	\$21.40

## Rubber Insulated Type

**GENERAL PURPOSE:** Loud speaker wiring in master control sound systems.  
**CONSTRUCTION:** Two conductors parallel, each #18-16/30 stranded tinned copper, color coded cotton serve, 1/64" 40% rubber, paper wrap over both conductors, galvanized steel armor overall.

Number	Spool	O. D.	List Price
1273	500 Ft.	.190" x .245"	\$21.40

## COMMUNICATION SYSTEM CABLE

**GENERAL PURPOSE:** For interior use designed for connecting inter-communication systems, annunciators, telephones, etc.  
**CONSTRUCTION:** Each conductor solid tinned copper wire, two cotton reverse serves paraffined, color coded, conductors twisted into pairs, then covered with an impregnated double paper wrap, and overall a cotton braid saturated with a moisture-proof, slow-burning, rodent-proof compound.

Number	Spool	Size	No. of Pairs	O. D.	List Price
1276	100 Ft.	22	6 (12 Conductors)	.310"	\$18.00
1277	100 Ft.	22	10 (20 Conductors)	.375"	16.25

## SHIELDED MULTIPLE CONDUCTOR CABLE

**GENERAL PURPOSE:** For indoor permanent or portable P.A. systems, photo electric cell circuits, sound recording and auto radios.  
**CONSTRUCTION:** Each conductor #20-10/30 stranded tinned copper, 1/64" rubber, color coded cotton braid, conductors twisted, tinned copper shield overall. #1262, #1263, #1264 same specifications except with glazed brown cotton braid over shield.

### TINNED SHIELD OVERALL

No.	Ft. per Spool	Conductors	Maximum Capacity per Ft. Cond. to Shield	Bet. Cond.	O. D.	List Price
1256	100	2	60.5 mmf.	32 mmf.	.215"	\$4.65
1257	100	3	54.0 mmf.	29 mmf.	.240"	5.75
1258	100	4	48.0 mmf.	26 mmf.	.270"	7.15

### COTTON BRAID OVER SHIELD

1262	100	2	60.5 mmf.	32 mmf.	.225"	\$5.25
1263	100	3	54.0 mmf.	29 mmf.	.245"	6.00
1264	100	4	48.0 mmf.	26 mmf.	.275"	9.40

## SHIELDED TRANSMISSION LINE

**GENERAL PURPOSE:** For inter-communication, short wave, PA systems, etc.  
**CONSTRUCTION:** Two conductors twisted, each #19 solid copper, heavy enamel coated, cotton serve, cotton braid waxed, color coded, bare copper shield overall.

No.	Spool	Maximum Capacity Per Foot	Frequency (KC)	Surge Impedance (Ohms)	Power Factor (Percent)	O. D.	List Price
1267	500 Ft.	27.3 mmf.	3,000	69.6	1.41	.145"	\$14.40

Surge Impedance is one-half the above when using shield as common conductor in dual transmission line.

## UNSHIELDED TRANSMISSION LINE

**GENERAL PURPOSE:** For short wave, inter-communication, annunciator systems, etc. where shielding is not required.  
**CONSTRUCTION:** Two conductors twisted, each #19 solid copper, heavy enamel coated, cotton serve, cotton braid waxed, color coded, conductors twisted.

No.	Spool	O. D.	List Price
1269	500 Ft.	.135"	\$7.50

## LEAD SHEATHED CABLE

**GENERAL PURPOSE:** For PA systems, communication, traffic control, mines, railroads and many other uses where severe moisture conditions are encountered.  
**CONSTRUCTION:** Two conductors twisted, each #19 solid tinned copper, 1/32" "Hi-Tension" rubber, color coded, overall is a pure lead sheath.

No.	Length	O. D.	List Price
1278	100 Ft. Spool	.325"	\$11.25
1271	1000 Ft. Reel	.325"	\$100.00

## SPEAKER AND BATTERY CABLE

**GENERAL PURPOSE:** For connecting speakers, analyzers, remote control units, PA systems or wherever a multiple 500 ohm circuit hook-up is required.  
**CONSTRUCTION:** Each conductor #20-10/30 stranded tinned copper, 1/64" rubber, color coded cotton braid, conductors twisted, glazed brown cotton braid overall.

Number	Spool	Conductors	Capacity Between Conductors	O. D.	List Price
1182	100 Ft.	2	31.5 mmf.	.200"	\$3.00
1183	100 Ft.	3	31.0 mmf.	.205"	3.50
1184	100 Ft.	4	30.0 mmf.	.250"	5.00
1185	100 Ft.	5	29.5 mmf.	.300"	6.00
1186	100 Ft.	6	29.2 mmf.	.320"	7.25
1187	100 Ft.	7	28.8 mmf.	.340"	8.25
1188	100 Ft.	8	28.5 mmf.	.370"	9.50
1189	100 Ft.	9	27.9 mmf.	.400"	11.50
1190	100 Ft.	10	27.6 mmf.	.410"	13.15
1192	100 Ft.	12	27.0 mmf.	.430"	15.00

## INTER-COMMUNICATION CABLE Braided Type

**GENERAL PURPOSE:** Designed for interior use for connecting inter-communication systems, annunciators, thermostat controls of oil burners, air conditioners, etc.  
**CONSTRUCTION:** Each conductor solid bare copper wire, two cotton reverse serves paraffined, color coded, conductors twisted then an overall cotton braid waxed.

Number	Spool	Size	No. of Conductors	O. D.	List Price
1274	500 Ft.	18	2	.150"	\$18.65
1275	500 Ft.	18	3	.175"	12.50

## Armored Type

**GENERAL PURPOSE:** Same as braided type but armored for heavy duty and grounding.  
**CONSTRUCTION:** Same specifications as braided type except galvanized steel armor overall.

Number	Spool	Size	No. of Conductors	O. D.	List Price
1278/2	500 Ft.	18	2	.150"	\$23.00
1278/3	500 Ft.	18	3	.175"	27.75
1278/4	500 Ft.	18	4	.185"	32.90

## CRYSTAL MICROPHONE CABLE

**GENERAL PURPOSE:** Low loss design for use with crystal, ribbon, dynamic and velocity microphones, photo-electric cells. Use #1248 for label microphones and phonograph pick-ups.  
**CONSTRUCTION:** Single conductor, extra flexible stranded tinned copper, cotton serve, insulated with special low loss SIC rubber compound, braided tinned copper shield, cotton serve, tough black rubber jacket overall.

No.	Spool	Size	Strand	Max. Capacity per Ft. Between Cond. and Shield	O. D.	List Price
1248	100 Ft.	20	26/34	45 mmf.	.175"	\$4.65
1249	100 Ft.	20	26/34	36 mmf.	.255"	5.65

## SHIELDED MICROPHONE CABLE

**GENERAL PURPOSE:** Adaptable for all indoor and outdoor crystal, carbon and condenser microphones as well as public address systems.  
**CONSTRUCTION:** Each conductor #20-26/34 stranded tinned copper, cotton wrap, 1/64" "Hi-Tension" low capacity rubber, color coded, conductors twisted, cushioned with cotton fillers, braided tinned copper shield, cotton wrap, tough black rubber jacket overall.

Number	Spool	Number of Conductors	Max. Capacity per Ft. Between		O. D.	List Price
			Cond. & Shield	Conds.		
1250	100 Ft.	2	70 mmf.	38 mmf.	.270"	\$7.15
1251	100 Ft.	3	65 mmf.	38 mmf.	.280"	8.00
1252	100 Ft.	4	65 mmf.	36 mmf.	.300"	9.40
1253	100 Ft.	5	60 mmf.	32 mmf.	.315"	11.75
1254	100 Ft.	6	60 mmf.	30 mmf.	.330"	13.75

## UNSHIELDED MICROPHONE CABLE

**GENERAL PURPOSE:** For indoor and outdoor speakers, permanent or portable PA systems, sound recording and auto radios.  
**CONSTRUCTION:** Each conductor #20-26/34 stranded tinned copper, cotton wrap, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cushioned with cotton fillers, cotton wrap, tough black rubber jacket overall.

Number	Spool	Number of Conductors	Capacity per Ft. Between Conductors	O. D.	List Price
1244	100 Ft.	2	22 mmf.	.250"	\$4.15
1245	100 Ft.	3	20 mmf.	.300"	5.25
1246	100 Ft.	4	18 mmf.	.315"	6.25
1247	100 Ft.	5	17 mmf.	.330"	8.40

# ALPHA - WIRE - PRODUCTS

## GENUINE EO1 TRANSMISSION CABLE

**GENERAL PURPOSE:** Standard feeder system for transmitter, frequency modulation, television, short wave, police, aircraft receivers, etc.  
**CONSTRUCTION:** Two conductors #12 solid bare soft annealed copper, paper separator, insulated to .175" low loss moisture resisting rubber compound, twisted, soft cotton braid overall, saturated pitch and mica finish.

No.	Length Feet	Capacity Between Condensers Per Foot	Frequency (K.C.)	Surge Impedance (Ohms)	Power Factor Percent	D. B. Loss Per 100 Feet	List Price
1153	100 Spool	23 mmf.	3,500	72	1	.36	\$10.00
1154	250 Reel	23 mmf.	3,500	72	1	.36	23.75
1155	500 Reel	23 mmf.	3,500	72	1	.36	47.50
1156	1000 Reel	23 mmf.	3,500	72	1	.36	95.00

## LO-Q CABLE (ULTRA HI-FREQUENCY)

**GENERAL PURPOSE:** An extremely low loss cable as feeder system for frequency modulation (F.M.) and television.  
**CONSTRUCTION:** 2 conductors #14 solid tinned copper, 1/32" moisture-resisting rubber, both conductors twisted under 3/64" 60% rubber jacket, cotton braid saturated with black flame-resisting finish overall.

No.	Ft. per Spool	Capacity Bet. Conds. Per Foot	Frequency (K.C.)	Surge Impedance (Ohms)	Power Factor	D. B. Loss Per 100 Ft.	Instantaneous Puncture Voltage	Maximum Load Cap. (Watts)	List Price
1152	100	17 mmf.	1,000	100	.03	.04 at 1000 K.C.	35,000 V.	500	\$18.25

## TRANSMITTING LINE CABLE

**GENERAL PURPOSE:** Standard feeder system for transmitter, short wave, etc.  
**CONSTRUCTION:** 2 conductors twisted #12 solid bare copper, paper serve, 3/64" code rubber, overall soft cotton braid, weatherproof.

No.	Ft. per Spool	Maximum Capacity Per Foot	Frequency (K.C.)	Surge Impedance (Ohms)	Power Factor	D. B. Loss Per 100 Feet	List Price
1157	100	28.5	3,500	72	2.34	.725	\$5.65

## SHIELDED PRIMARY HOOK-UP WIRE

**GENERAL PURPOSE:** To reduce interference caused by motors, high tension wire, X-Ray machines or other apparatus that radiates electrical impulses.

**CONSTRUCTION:** Stranded tinned copper, free strip rubber, highly lacquered braid, close tinned copper shield overall.

No.	Ft. per Spool	Size	Strand	Rubber Thickness	O.D.	List Price
1194	100	20	10/30	1/64"	.123"	\$2.75
1196	100	18	16/30	1/32"	.157"	3.25
1197	100	16	26/30	1/32"	.172"	3.65

## RUBBER SHEATHED SERVICE CORD

(UNDERWRITERS APPROVED)

**GENERAL PURPOSE:** For use on vacuum cleaners, electric tools, washing machines, refrigerators, appliances, trouble lights, garage lamps or wherever a rough power line is required.

**CONSTRUCTION:** Each conductor stranded bare copper, cotton separator, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cushioned with lute fillers, 40% tough rubber jacket overall.

No.	Length Feet	Size	Conductors	Type	Current Carrying Capacity	Voltage Rating	O.D.	List Price
1951	250 Spool	18	2	SV	5 amps	300	.250"	\$10.00

1956	250 Coil	14	2	S	15 amps	600	.540"	51.00

## FILAMENT AND HOOK-UP WIRE

**GENERAL PURPOSE:** Point to point wiring for all radio and electrical uses.

**CONSTRUCTION:** Single conductor #14-41/30 stranded tinned copper, served, rubber insulation and braid overall, wax impregnated.

No.	Length—Feet	Voltage Breakdown (60 Cycles)	D.C. Resistance Per Foot (Megohms)	O.D.	List Price
1641	25 Spool	2150	14.8	.130"	\$0.60
1645	500 Spool	2150	14.8	.130"	10.65

## SUPER "HI-TENSION" TEST LEADS

Can readily be connected for testing circuit defects and all devices such as meters, batteries, transformers, etc. An insulation of Alpha "Super Hi-Tension" heavy rubber is over an extremely flexible tinned copper wire (Alpha #1635 Test Prod Wire). Constructed to withstand rough usage and repeated bendings. Handles are of sturdy fibre. Overall length 50". Red and Black leads for easy identification.

### INDIVIDUALLY BOXED

No.	Description	List Price
2171	Needle Point Prods with Spade Terminals	\$0.80
2172	Needle Point Prods with Phone Tip Terminals	.60
2173	Needle Point Prods with Alligator Clips	.75
2175	Solderless Prods with Spade Terminals	.60
2176	Solderless Prods with Phone Tip Terminals	.60
2177	Solderless Prods with Alligator Clips	.75

## TYPE POSJ E-Z STRIP LAMP CORD (UNDERWRITERS APPROVED)

**GENERAL PURPOSE:** For line cord on radios, lamps, electric clocks, food mixers and other small devices.

**CONSTRUCTION:** Two conductors parallel, each conductor #18-42/34 extra flexible bare copper, color coded cotton serve, 40% tough rubber jacket overall. Slit in jacket to permit "E-Z" separation.

No.	Spool	O.D.	List Price
1966	100 Ft.	.235" x .130"	\$2.50
1967	250 Ft.	.235" x .130"	5.00

## FLEXIBLE LAMP CORD AND FIXTURE WIRE

For use on lamps, radio AC or DC lines, ground, aerial connections, etc.

No.	Ft. per Spool	Size	Type	List Price
1930	1000	18 1/64"	Single Conductor	\$8.25
1931	500	18 1/64"	Single Conductor	4.25

## BATTERY AND TEST CLIPS

For protection against rust and corrosion, these clips are completely cadmium plated. Strong spring jaw for permanent contact.

No.	Type	Amps.	Per Box	List Price
2071	Midget	5	50	\$6.25
2072	Pee-Wee	10	50	6.25
2073	Medium	25	50	9.00
2074	Large	50	30	15.00

## ALLIGATOR CLIP

These clips are nickel plated as protection against rust and corrosion. Strong spring jaw for firm contact.

Number	Per Box	List Price
2075	50	\$6.25

## UNBREAKABLE SOFT RUBBER PLUG

Made of sturdy live soft rubber. Brass blades. Unbreakable, easy to attach.

No.	Per Carton	List Price
1964	100	\$8.00

## BUS-BAR WIRE

This copper wire is tinned and receives several wipings to insure cleanliness and brightness. Is cut in uniform 2 ft. lengths.

Number	Size	List Price
2076	10 Round	\$5.00
2080	12 Round	3.40
2081	14 Square	2.90
2082	14 Round	2.50

## GLASS INSULATORS

Crystal clear, of great tensile strength, moistureproof, waterproof and weatherproof.

Number	Length	Per Carton	List Price
2020	3"	100	\$5.00
2021	3 1/4"	100	7.50

## PORCELAIN INSULATOR

Made of glazed porcelain. Will withstand great strain.

Number	Per Carton	List Price
2022	100	\$3.75

## SCREW EYES

A cadmium plated sharply pointed #6 gauge screw with glazed porcelain eye.

Number	Length	Per Carton	List Price
2052	3"	100	\$4.15
2056	7"	100	5.00
2058	12"	100	17.50

## NAIL KNOB

A 2-piece knob of glazed porcelain and a heavy nail for secure holding.

Number	Per Carton	List Price
2031	100	\$3.50

## STAPLES

Made of coppered steel with sharply pointed tips for easy tacking. Properly insulated. Furnished in standard construction and also in brown, white and buff.

No.	Per Box	List Price
2041	Standard Type	50 \$0.12
2043	Colors	40 .12

## LEAD-IN STRIP—CLIP TYPE

(SOLDERED)

Weatherproofed and fully covered with a heavily lacquered braid. Fahnestock clips riveted and soldered to strap for firm contact.

Number	Length	Per Carton	List Price
2002	12"	50	\$6.00

(UNSOLDERED)

Constructed exactly like our No. 2002 but the clips are unsoldered.

Number	Length	Per Carton	List Price
2003	12"	250	\$5.00

## LEAD-IN STRIP—SCREW TYPE

A heavily lacquered braid makes this strip weatherproof. The screws, nuts and washers are nickeled brass. Makes positive contact.

Number	Length	Per Carton	List Price
2005	12"	50	\$8.75

## LEAD-IN STRIP—DOUBLET TYPE

Same construction as No. 2005 but 2 strips laid parallel and staggered to prevent contact, held apart by riveted fibre pieces. Especially adaptable to doublet antennas.

Number	Length	Per Carton	List Price
2004	12"	50	\$16.75

## GROUND CLAMP

Heavy gauge strap, Fahnestock terminal and brass screw and nut. Makes a quick and positive connection. Fits 3/8" to 2" pipe.

Number	Strap Type	Per Carton	List Price
2012		50	\$5.00

## PIPE CLAMP

Cadmium plated. Is of neat appearance. Attaches the ground wire to the pipe easily and securely. Will last indefinitely.

No.	Per Carton	List Price
2011	"C" Type	50 \$6.25

# ALPHA - WIRE - PRODUCTS

Alpha Aerial Kits are designed to meet the requirements of the various types of radio installations. Each kit is complete and boxed attractively.

**No. 300**  
35 Ft. 7 Strand Copper Aerial Wire

## COPPERWELD ENAMEL AERIAL WIRE

**GENERAL PURPOSE:** Ideal for short wave and marine antennas, directional and doublet systems. Will not sag or stretch.  
**CONSTRUCTION:** A solid steel core, heavily covered with pure electrolytic copper over which is baked black insulating enamel.

Number	Size	Carton	Tensile Strength	O. D.	List Price
1158	10	100 Ft.	1050 Lbs.	.103"	\$2.50
1159	12	100 Ft.	670 Lbs.	.083"	1.65
1160	14	100 Ft.	420 Lbs.	.066"	1.15

## PHOSPHOR BRONZE AERIAL WIRE

**GENERAL PURPOSE:** Recommended especially for ship, short wave, and transmitting aeriels where high tensile strength is required.  
**CONSTRUCTION:** 7 strands #18 Phosphor Bronze.

Number	Length	Tensile Strength	O. D.	List Price
1162	100 Ft. Carton	1000 Lbs.	.122"	\$4.40
1163	500 Ft. Spool	1000 Lbs.	.122"	22.00

## DOUBLET TRANSMISSION LINE

**GENERAL PURPOSE:** Doublet style twisted lead-in designed for low loss coupling between antenna and receiver.

**CONSTRUCTION—Braided Type:** Two conductors #22-7/30 stranded tinned copper, 1/32" "Hi-Tension" Rubber, color coded, conductors twisted, cotton braid overall, saturated weather-proof finish.

No.	Length Feet	Capacity Bet. Conds. Per Foot	Frequency (KC)	Surge Impedance (Ohms)	Power Factor Percent	List Price
1146	500 Spool	21.8 mmf.	3,500	90.2	3.75	\$8.00
1148	100 Coil	21.8 mmf.	3,500	90.2	3.75	1.60
1149	50 Coil	21.8 mmf.	3,500	90.2	3.75	.80

**CONSTRUCTION—All Rubber Type:** Two conductors #22-7/30 stranded tinned copper, 1/32" "Hi-Tension" Rubber, color coded, conductors twisted, rubber jacket overall, black satin finish.

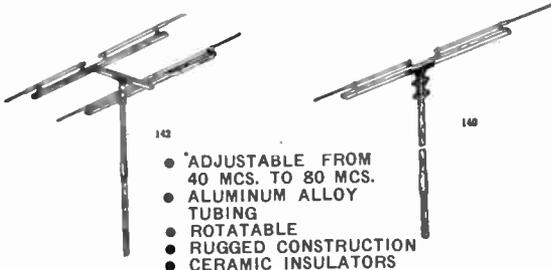

Number	Length	Capacity Bet. Conds. Per Foot	Frequency (KC)	Surge Impedance (Ohms)	Power Factor Percent	List Price
1135	500 Spool	21.8 mmf.	3,500	90.2	3.75	\$12.50

# Birnbach

## F-N and TELEVISION ANTENNAS

### F-M and TELEVISION DOUBLET ANTENNAS

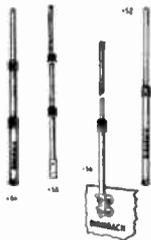

- ADJUSTABLE FROM 40 MCS. TO 80 MCS.
- ALUMINUM ALLOY TUBING
- ROTATABLE
- RUGGED CONSTRUCTION
- CERAMIC INSULATORS

A superior antenna construction for television reception. Consist of corrosion proof aluminum alloy tubes adjustable to all frequencies between 80 mcs. and 40 mcs. mounted on high grade low absorption glazed porcelain standoff insulators which maintains its efficiency under all weather conditions. Strong wooden supports. Adjustments can be made in the horizontal planes. This will permit the antenna to be properly adjusted in respect to the transmitted wave and the signal strength. There are two types available: No. 140 Doublet and the No. 142 Doublet with reflector to eliminate interference. Complete with mounting poles and steel coupling.

No.	List Price
140—Doublet .....	\$12.50
142—Doublet with reflector .....	22.50

### ULTRA HIGH FREQUENCY ANTENNAS (VERTICAL RODS)

They are constructed of hard drawn aluminum alloy tubing, telescoped together and adjusted by forcing down with a turning motion a specially designed brass nickel-plated taper lock bushing. They cover all requirements for stationary or portable use. Two types of mountings are available: stand-off mounting having 1/4" - 20 threaded bushing on No. 154 and 10-32 threaded bushing on No. 157, and binding post mounting consisting of a reinforced flattened end with two holes drilled 1" between centers. The frequency range listed is for 1/4 wave-length antenna.

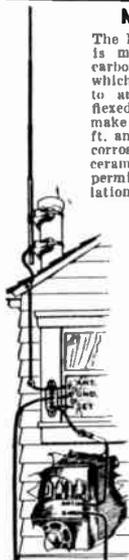

No.	Sections	Frequency Range in Mcs.		List Price
		Open	Telescoped	
154	3	55	145	\$3.30
155	3	55	145	3.30
156	2	112	200	2.00
157	2	112	200	2.00
161	2	40	75	2.20
164	Taper Lock Bushings 1/8 and 3/8			.15

### MAST AERIAL

The Birnbach Mast Antenna is made of four tempered carbon steel tube sections which will instantly go back to an erect position when flexed by the wind. They make an actual height of 12 ft. and are treated to prevent corrosion. Two heavy duty ceramic mounting insulators permit every type of installation to be made with ease.

The Safety Lightning Arrester protects the antenna from excessive static charges of atmospheric electricity. The accumulated charges bypasses the receiver and discharges to the ground.

No. 169—Includes: 1 12 ft. 4 section Mast Aerial and Clamps, 2 porcelain mounting insulators and securing clamps; 4 nailit knobs; 1 safety lightning arrester; 35 ft. leadin wire; 1-3/8" insulated screw eye; 1 ground clamp; mounting screws; and directions. List ..... \$5.00  
 No. 170—Includes: Everything contained in the No. 169 with the exception of 1 Safety lightning arrester. List ... \$4.75

### BASE INSULATOR

Ideal for replacement and well suited as a base insulator for ultra high frequency antennas as it permits a connection to be at the bottom of the insulator. Made of highly vitrified low absorption glazed porcelain.  
 No. 146—Base Insulator, Std. Pkg. 10.....List, \$0.60

SEE PAGE Q-58  
 for complete line of  
 TRANSMISSION  
 CABLE  
 suitable for  
 FM and  
 TELEVISION

### ADJUSTABLE DIPOLE ANTENNA For Television or Frequency Modulation

An adjustable antenna that can be used as a vertical or horizontal doublet. Can be rotated to any angle for any degree of polarization. Impedance at center 72 ohms, matched by EO1 Cable. Aluminum alloy tubing permits outdoor mountings. Special tapered lock bushings hold each section in place simply by turning and pushing down. The center mounting insulator is 4 1/2" high.

No.	Frequency Range in Mcs.		List Price
	Open	Telescoped	
158	82	155	\$5.50
160	40	75	6.60

### Wooden Mounting Poles

Made of straight grain ash and finished with a weatherproof varnish. With the use of the couplings, several poles can be joined together. The couplings are made of steel tubing and are cadmium plated.

No.	Std. Pkg. List
144—Coupling .....	10.....\$1.00
145—4 ft. Wooden pole.....	10..... 1.00

### MOUNTING STRAP

A very useful aid in securing poles of Television or mast antennas to vent pipes. It is made of cadmium plated steel and is 24" long.

No. 626—Mounting Strap.....	Std. Pkg. 25.....	\$0.30 List
-----------------------------	-------------------	-------------

### GUY WIRE

Constructed of high tensile strength galvanized steel wires. Ideal for guying up transmitter and receiver towers and poles.

No. 19—Guy Wire, 25 ft. Coll.....	each \$0.30 List
No. 20—Guy Wire, 50 ft. Coll.....	each .60 List

### No. 150 ALL WAVE ANTENNA

An efficient and low cost all wave antenna with noise reducing features. It will give efficient reception on both broadcast and short waves on every type of receiver. It has the newly designed all ceramic transfer unit. With this unit the antenna wire and the transmission line are firmly and securely anchored. There are no wire leads from the transfer unit to collect ice in the winter and to deteriorate in the summer. Comes complete with everything necessary for installation.

#### LIST OF PARTS

2—30 ft. coils 7/24 Bare Aerial Wire	2—Porcelain Insulators
1—50 ft. coil Stranded Transmission Cable	2—All Wave Lead-in Strips
1—All Wave Coupler	1—Ground Clamp
1—Transfer Unit	2—Glazed Nailit Knobs
Complete Instructions	
No.	List Price
150—Birnbach All Wave Antenna.....	\$4.00
152—Special All Wave Antenna.....	3.00

### No. 148 UNIVERSAL WAVE ANTENNA (FOR EVERY TYPE OF RECEIVER)

The No. 148 All Wave Antenna is the same as the No. 150, but is packed in a special attractive two color box imprinted to customer's specifications. This kit is designed for efficient operation with all types of receivers. Standard cartons of 20 kits.

No.	List Price
148—All Wave Kit with Receiver Coupler.....	each \$4.00
149—All Wave Kit without Receiver Coupler.....	each 3.50

# Birnbach AERIAL ACCESSORIES

## LEADIN STRIPS

Covered with a heavy cotton braid, weather-proofed, with numerous coats of lacquer. The clips are riveted and soldered at both ends. **List Price**

No.	Lgth.	Std. Pkg.	Each
611—Black	12"	50	\$0.07 1/2
612—Black	16"	25	.15
613—White	12"	50	.08

## DOUBLET LEADIN STRIPS

Two strips held parallel to each other by a piece of bakelite prevents them from moving back and forth. Available in black or white. **List Price**

No.	Std. Pkg.	Each
2611—Std. pkg.	25	Ea. \$0.17

## Screw Terminal Leadin Strip

Locks the wire together with the strip in a secure connection assuring perfect contact. Has weather-proof covering over a copper strip with cadmium plated terminals. Available in white or black. **List Price**

No.	Std. Pkg.	Each
617—Leadin Strip	50	\$0.14
2617—Doublet Leadin Strip	25	.25

## COPPER STRAP CLAMP

Will take 3/8" to 2" Pipe. Made of copper with Birnbach clip riveted and soldered to strap. Complete with nut and bolt. **List Price**

No.	Std. Pkg.	Each
600—Std. pkg.	50	Ea. \$0.07

## C-CLAMP

Attaches easily to a water or radiator pipe. The cone-pointed screw cuts through and makes positive contact. Cadmium finish prevents rusting. **List Price**

No.	Std. Pkg.	Each
615—Std. pkg.	25	Ea. \$0.10

## SADDLE GROUND CLAMPS

These ground clamps have a hard pointed screw which digs through rust and makes a positive contact. Fits a 3/8" to 2" pipe. **List Price**

No.	Std. Pkg.	Each
625—Heavy Saddle Clamp	50	\$0.12
630—Light Saddle Clamp	50	.08

## SOLID TINNED WIRE

SOFT DRAWN			No. 18		
No.	Std. Pkg.	List Price	No.	Std. Pkg.	List Price

## GLASS INSULATORS

Made of crystal clear glass and have a smooth surface which prevents dirt or ice to collect. **Std. List Price**

No.	Std. Pkg.	List Price
00—3"	100	C \$5.50
660—3 3/4"	100	C 8.25
661—3 3/4" Plat Type	100	C 8.80
662—3 3/4"	100	C 9.50
659—4 1/2"	100	C 14.30

## PORCELAIN INSULATORS AND NAIL-IT KNOBS

**Std. List Price**

No.	Std. Pkg.	List Price
666—Brown or White	100	C \$4.40
669—Glazed Nail-It Knobs	100	C 3.85

## GROUND RODS

The Ground Rod when driven into the ground will afford a highly efficient ground. **Std. List Price**

No.	Std. Pkg.	List Price
616—4 Ft.	12	ea. \$0.85
818—6 Ft.	12	ea. 1.25

## AERIAL SPRING ADJUSTER

Prevents swinging and swaying of antennas and eliminates the resultant fading of signals. Consists of two hooks with porcelain rings interconnecting with a powerful compression spring. Cadmium plated throughout. **List Price**

No.	Std. Pkg.	List Price
765—Birnbach Aerial Spring Adjuster	each	\$0.55

## PORCELAIN TUBES

To bring a leadin into a building, we advise our Porcelain Tubes, which require a 3/4" dia. hole. **List Price**

No.	Std. Pkg.	List Price
42—2"	100	C \$3.25

967—12 in.	25	21.00

## COPPERWELD ANTENNA WIRE (STRETCHLESS)

Has a steel core covered with copper and heavily enamelled. It will not elongate because of its high tensile strength—which is several times that of enameled copper wire. It has low R.F. resistance and is ideal for transmitting doublet and directional antenna systems as it will maintain the frequency characteristics of the antenna because of its stretchless qualities. **List Prices**

Feet	TENSILE STRENGTH		
	No. 10	No. 12	No. 14

## PA and COMMUNICATING SYSTEM CABLES

### Shielded Twisted Pair

Constructed of solid enameled wire with a cotton wrap color coded cotton braided twisted pair waxed, and bare copper braided overall.

No.	Size	O.D.	List Price
821-100 Ft.	22	.125	\$ 4.00
822-500 Ft.	22	.125	17.50
823-100 Ft.	19	.145	4.25
824-500 Ft.	19	.145	19.50

### Armored Speaker Cable

Constructed of 2 No. 18 stranded parallel conductors with a rubber color coded cotton braid waxed, paper wrap and closely armored.

No.	Size	O.D.	List Price
1110-100 Ft.	18 $\frac{1}{2}$	.155 x .260"	\$ 6.75
1111-250 Ft.	18 $\frac{1}{2}$	.155 x .260"	16.00
1112-500 Ft.	18 $\frac{1}{2}$	.155 x .260"	29.00
1113-1000 Ft.	18 $\frac{1}{2}$	.155 x .260"	55.00

### Rubber Shielded Microphone Cable

Consists of individual flexible tinned copper conductors, each insulated with a heavy wall of colored rubber for easy identification. A tinned copper shield is woven over all conductors, and then cotton wrapped.

A 1/32 wall of tough rubber is placed overall. It is a weatherproof cable, ideal for outdoor use, and will withstand hard and rough usage.

### EO1 Transmision Cable (GENUINE)

This cable has a surge impedance of 72 ohms which accurately matches the impedance at the center of the half wave Hertz Antenna. It is constructed of 2 No. 12 Bare Copper conductors having a paper wrap. A special high frequency rubber insulates each side of the line and accurately maintains the impedance. It has a special weatherproofed cotton braid overall with a mica finish.

No.	Ft.	List Price	Surge Imp. per 100'	Loss per 100'	D.B.

9.3-	1000 Coil	150.00			

### No. 12 Solid Twisted

For Television or Frequency Modulation (100 ohm)

Designed for use with television and Frequency Modulation (FM) receivers. It is constructed of 2 No. 12 bare conductors insulated with a paper wrap with a special grade of rubber insulation which separates and insulates the conductors and helps maintain the correct impedance. Over this is placed a cotton braid impregnated with a weatherproof finish.

No.	Ft.	List Price	Surge Imp. per 100'	Loss per 100'	D.B.

## BIRACO TUBING DIAL and MAGNET WIRE

NOTE: CODE "B" FOLLOWING CATALOG NUMBER INDICATES USE OF "BUNA-S"

### DIAL CABLE 42 Strand Phosphor Cable

Constructed of the finest phosphor bronze wire over a linen thread center. Due to its high tensile strength, it will not stretch.

- No. 1025—25' Spool List Price \$1.20 each
- No. 1050—50' Spool List Price 2.25 each
- No. 1051—100' Spool List Price 4.00 each
- No. 1052—1000' Spool List Price 33.00 each

### Phosphor Bronze (Light Cable)

A lower quality cable than No. 1025, but a cable that will give good service. This is a braided Phosphor Bronze cable.

- No. 1053—25' Spool List Price \$0.66 each
- No. 1054—50' Spool List Price 1.25 each
- No. 1055—100' Spool List Price 2.50 each
- No. 1056—1000' Spool List Price 18.50 each

### Extra Heavy Linen Dial Cable

Made of the finest linen for replacement on all receivers, same as used for Philco. It is extra heavy for exceptional long service.

- No. 1057—25' Spool List Price \$1.30 each
- No. 1058—50' Spool List Price 2.50 each
- No. 1059—100' Spool List Price 4.50 each
- No. 1060—1000' Spool List Price 36.00 each

### Heavy Linen Cable

This braided cable is used for replacement on all Philco Receivers.

- No. 2025—25' Spool List Price \$1.30 each
- No. 2050—50' Spool List Price 2.50 each
- No. 2051—100' Spool List Price 4.50 each
- No. 2052—1000' Spool List Price 36.00 each

### Light Linen Dial Cable (Silk Core)

High quality linen cable used on many receivers specially treated to prevent slipping.

- No. 3023—25' Spool List Price \$1.20 each
- No. 3050—50' Spool List Price 2.25 each
- No. 3051—100' Spool List Price 4.00 each
- No. 3052—1000' Spool List Price 25.00 each

### Extra Light Linen Cable

It is a strong extra thin linen cable for replacement. Braided of the finest black linen.

- No. 4025—25' Spool List Price \$0.75 each
- No. 4050—50' Spool List Price 1.40 each
- No. 4051—100' Spool List Price 2.50 each
- No. 4052—1000' Spool List Price 18.50 each

### SPRING WIRE CLIPS

They will hold a wire, up to No. 10 B&S Gauge, in a secure contact. All clips are brass nickel-plated.

- | No. | Length            | Std. Pkg. | Per C | List Price |
|-----|-------------------|-----------|-------|------------|
| 32  | Spring Clip .1"   | 100       |       | \$1.50     |
| 33  | Twin Clip .1 1/4" | 100       |       | 6.00       |

### ALL RUBBER LAMP CORD (BUNA-S)

This cord is an all rubber covered insulated parallel cord which can be separated by starting with a knife. Connects easily and cannot fray. Sanitary and neat.

COLORS: Black, White, Brown

### MAGNET WIRE Special Spools — \$4.0 List Price

On attractive spools, even sizes from 14 to 40 inclusive, in Double Cotton, Plain Enamel, and Double Silk. Here is a really sensational seller for the dealer who will put this display on the counter. It is a Silent Salesman which will bring you real profit year around! FREE DISPLAY! One Display is given with each initial order for 100 spools. Each Display made of strong, re-inforced steel, mahogany crackle finish with attractive 3 color Display at top. Space provided to indicate YOUR resale price.

Extra Display Racks available at \$1.25 each, Net.

59	9	.85
514	12	.95
515	15	1.00
511	20	1.10

### BIRACO TUBING (Extruded)

It is an extruded tubing made of the new synthetic plastic material. Extremely flexible and when stretched returns to its original form. Withstands the effects of heat and will not support combustion. Will only soften at 300°F and will not flow at 425°F. Its dielectric strength—750 volts per mil. when dry and 350 volts when wet. It is not affected by oil and is resistant to most coal tar solvents and petroleum solvents. Resists acids, alkalis in concentrations up to 30% by weight. Available in continuous lengths. Dielectric strength—10,000 volts.

COLORS: Black, Red, Green, White and Yellow

## TEST LEADS and ACCESSORIES

### High Voltage Test Leads

The high dielectric strength and low leakage resistance of these test leads recommend them for testing high voltage high sensitivity devices such as Meggers and Megohmmeters. They are particularly well suited for use in testing breakdown voltages up to 1200 volts. The prods and the tip handles are made of black and red bakelite with special designed tips for application. The prods are 6" long and 1/2" dia. and have a guard ring near the metal tip to prevent accidental touching of the exposed metal part. Extra heavy kinkless test lead wire 7/32" dia. is used throughout. The leads are 60" long.

No. 562—High Voltage Test Leads \$4.50

### DeLuxe Test Leads

Constructed with 5" long cast phenolic red and black handles with removable needlepoint chucks or solderless tips. Black and red heavy kinkless instrument 48" long is used to connect the prods with the insulated red and black cast phenolic solderless tips. Either needlepoint or solderless tip available.

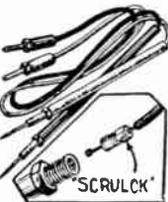

No. 560—Solderless prod test leads... \$1.35  
561—Needlepoint prod test leads. 1.35

### Bakelite Pencil Type Test Leads

Red and black bakelite handles, 6" long and 5/16" in dia. and red and black bakelite insulated phone tips. Heavy kinkless wire is used together with the Birnback Scrulok system of solderless wire connection. The Universal needle and phone tip prod have the same dimensions as the standard phone tip and are useful for piercing insulation without damage. The needlepoint is extra heavy to prevent breakage and should it become broken can be readily replaced. Available only in combination of needlepoint prods and insulated phone tips. Length overall 60".

No. 408—Bakelite Pencil Type Test Lead... \$2.00  
439—Needlepoint Prod Tip for Replacement... .17

### Test Leads (Bakelite Handles)

Have 4" red and black insulated handles. Needles can be replaced when broken simply by loosening the knurled collar. Available with either phone tips or spade lugs. Length overall 50".

No. 442—Phone Tip Test Leads... \$1.12/2  
441—Spade Lug Test Leads... 1.12/2

Standard Test Leads Same as above with a Sr. solderless phone tip.

No. 442—Phone Tip Test Leads... \$1.12/2  
443—Spade Lug Test Leads... 1.12/2

### Insulated Solderless Phone Tips

Insulated handles 3/8" dia. by 1" long fitted to solderless phone tips. The wire can be easily attached by threading through the hole in the handle and tightening the knurled nut. Colors:—red, black, green, and yellow.

No. 409—Insulated Sr. Solderless Tip—2 1/4" Long... each \$0.13  
415—Insulated Jr. Solderless Tip—1 1/4" Long... each .14

### Insulated Phone Tip

The insulated handle is 1" long, 3/8" dia. Connection is made by threading wire through the Scrulok threaded bushing (see drawing).

Colors: red, black, green and yellow.  
412—Scrulok Pin Tip... each \$0.17  
419—Scrulok Pin Tip... each .22

### Phone Tip

Ideal for replacement on headset, speaker and extension cords.

No. 402—Std. Pkg. 100 List Price \$1.90 per C.

### Solderless Phone Tips

Milled of solid brass and nickel-plated. Designed for easy insertion of the wire.

No. 24—Junior... per C \$8.00  
24—Senior... 9.00  
Std. Pkg. 100.

### No. 26 Phone Tip Jack

Milled of brass and nickel plated. The bronze springs are specially made to hold the phone tip tight and straight. Mounts in a 1/4" dia. hole.

No. 26—Std. Pkg. 100. List Price \$9.00 per C

### No. 407 Insulated Tip Jack

Has a 1/2" insulated top and mounts in a 3/8" dia. hole. The specially designed bronze springs hold the phone tip tight and straight.

Colors:—red, black, yellow, and green. Std. Pkg. 100. List Price \$9.00 per C

### No. 411 Bakelite Pencil Test Prods

These prods have the Birnback Scrulok solderless needlepoint tips. They are made of bakelite and are 6" long and 3/8" dia. The connection is made by threading the wire through the handle and securing to the needlepoint tip by locking the Scrulok. The tip is then screwed into the handle. Available in red or black only.

No. 411—Bakelite Pencil Test Prods List Price \$0.75

### Solderless Tip Prod

Made of highly polished cast phenolic resin. A solderless wire tip is threaded at end permitting replacement of tip. Available in red or black.

No. 340... 4" Handle... \$0.33  
413... 5" Handle... .40

### Needlepoint Test Prod

A threaded shank needlepoint is threaded into the end of handle. Made of highly polished cast phenolic handle. Available in red or black.

No. 344—Needlepoint Test Prod, 4" Handle... \$0.35  
345—Needlepoint Test Prod, 5" Handle... .40

### SCRULOCK Needlepoint Test Prods

These insulated prods have the Scrulok solderless system of wire connection. Wire is easily attached without soldering. An extra heavy needle is fitted into the tip. Colors:—black or red.

No. 417—Needlepoint Test Prod, 4" Handle... \$0.35  
418—Needlepoint Test Prod, 5" Handle... .40

### Headset Phone Cords

These cords are closely woven and are very durable and strong. They are used for replacement of worn headset cords. Standard cords are listed which will match practically all headsets manufactured. We will be glad to quote on cords having special terminal requirements.

No. 105—5 ft. Pin & Spade Tips... .75  
105—5 ft. Pin & Spade Tips... .75  
107—5 ft. Pin & Eye Tips... .75  
108—8 ft. Pin & Eye Tips... .95  
109—10 ft. Pin & Eye Tips... 1.40

### AC-DC Resistance Cords

Designed for replacement of the internal voltage dropping resistor on the present and older type of AC-DC sets. It consists of a line cord into which a third element has been incorporated. The voltage dropping resistor reduces the voltage to that needed for the filament of the tubes.

No.	Cord Rating	Sets Having Following Tubes	List Price Each

1012—100 ft. Spool	1/2"	22.00

### Ford V-8 Distributor Suppressor

Designed to be inserted in the distributor of Ford V-8. Unit consists of a resistor brush which replaces the regular brush.

No. 365.....List Price \$ .28

### AUTO ANTENNA CONNECTOR

Permits quick connection of the auto antenna lead-in to the receiver.

No. 366—Auto Connector.....per C \$7.50

### FUSED ANTENNA CONNECTOR

This connector takes a standard 3 AG automobile fuse. Used in auto radio power supply cables.

No. 367—Fused Connector.....per C \$11.00

### HIGH VOLTAGE LACQUERED WIRE

Recommended for use as leads for wiring high voltage devices, and transmitter power supplies. Constructed of tinned stranded copper conductor with a wall of rubber covered with a highly lacquered cotton braid.

No.	Ft.	Size	Puncture Voltage	O.D.	List Price
2810—100	10 1/2	.....	9500	.....	\$7.40

2818—100	18 1/2	.....	9500	.....	2.05

### Shielded Varnished Cambric Wire

Used where an oil and water resistant wire with a shielded covering is required. Constructed of tinned stranded conductor with 2 layers of varnished cambric and a lacquered cotton braid with a tinned copper shield overall.

No.	Ft.	Size	Ft. m.mfds.	O.D.	List Price
1800—100	.....	16	.....	.145	\$7.00
1818—100	.....	18	.....	.131	6.25
1820—100	.....	20	.....	.125	5.75

### SHIELDED GRID LEAD WIRE

High insulation of this wire will reduce the loss in shielded grid circuits. Constructed of tinned stranded conductor with a rubber insulation, waxed cotton braid with closely woven shield overall.

No.	Ft.	Size	Ft. m.mfds.	O.D.	List Price
818—100	.....	18 1/2	.....	.180	\$4.75
820—100	.....	20 1/2	.....	.150	4.25

### AUTO RADIO SHIELDED LEAD-IN

Consists of a stranded tipped copper conductor, insulated with rubber and filled with hemp and a tinned copper braid overall.

No.	Ft.	Capacity	mmfd per ft.	O.D.	List Price
799—100	.....	49	.....	.275	\$10.00
800—100	.....	34	.....	.500	14.00

### 7 MM HIGH TENSION CABLE

Useful in reducing interference from auto secondary circuits. Also used as photo electric cell leads and wherever a low loss shielded lead is required.

No.	List Price Per 100'
1600—7 MM. High Tension Cable	\$6.50
781—7 MM. Shielded Secondary Wire	10.00

### REPLACEMENT PARTS

No.	Description	List Price per C
368	Female Sleeve for Fuse Connector	\$5.50

370	Male Part of Antenna Connector	3.30
371	Spring for Antenna and Fuse Connector	1.10
372	Fibre Insulator for Fuse Holder	.80
373	Bakelite Eyelet Bushing	1.35

### RAYON BRAID LACQUERED WIRE

Constructed of stranded tinned copper conductor for easy soldering, with heavy wall of live rubber over which a rayon braid is woven. A high gloss lacquered finish over braid. Conductor consists of 16 strands of No. 30.

No.	Ft.	Coil	Voltage	Size	List Price
3425	25	.....	9000	18 1/2	\$ .55
3450	50	.....	9000	18 1/2	1.05
3460	100	.....	9000	18 1/2	2.10
3600	500	.....	9000	18 1/2	10.00

Colors: Black, red, green, yellow, brown, blue

### VARNISHED CAMBRIC WIRE

Widely used in automotive wiring because of oil and waterproof construction. Consists of tinned stranded conductor with two layers of varnished cambric over which a lacquered cotton braid is woven.

No.	Ft.	Size	Puncture Voltage	O.D.	List Price
3416—100	.....	16	.....	1000	.108 \$4.50
3418—100	.....	18	.....	1000	.107 3.75
3420—100	.....	20	.....	1000	0.94 3.00

### No. 340 Wheel Static Eliminator

An effective means of reducing static created by the front wheels. Installation is made by placing the broad base of the spring against the hub cap and the cone point into the hole of the axle.

No. 340—Std. Pkg. 50  
List Price.....\$8.60 per 100

### AUTO RADIO SHIELDING

Used for shielding leads of interference creating circuits; and for bonding motor block and other parts of the automobile to the chassis.

No.	Inside Dia.	List Price
858—50 ft. Spool	1/8"	\$1.75
859—50 ft. Spool	1/4"	1.90
863—50 ft. Spool	3/8"	2.35
864—50 ft. Spool	1/2"	2.75
865—50 ft. Spool	3/4"	5.50
857—50 ft. Spool	1 1/2"	8.80

No.	Inside Dia.	List Price
860—50 ft. Spool	1/4"	2.00
861—50 ft. Spool	3/8"	2.30
862—50 ft. Spool	1/2"	5.00

AVAILABLE IN SPECIAL LENGTHS

### BIRNBACH IGNITION FILTERS

These Ignition Filters completely eliminate all ignition and high tension circuit interference, making clear auto radio reception a certainty. The only ignition filters having a copper wound inductance, which accounts for the low resistance of 120 ohms for the Ignition Filter. Less gasoline is consumed than when high resistance filters are used.

No.	Description	List Price each
350	Ignition Filter—Bracket Type	\$.60
351	Ignition Filter—Cable Type	.60
352	Distributor Filter	.60
353	Ignition Filter—Screw Type	.60
359	Ignition Filter—Slip-on Type	.60

### BIRNBACH MASTER FILTER

Eliminates all ignition interference and does away with the necessity of having a separate filter for each spark plug. Available in two types, namely, the Distributor type for easy insertion into distributor head, and the Cable type to be placed into the distributor lead where it is impossible to insert it into the distributor head.

No.	List Price each
354—Cable or Distributor Type	\$2.50

### AUTO NOISE FILTER

These are especially designed for the elimination of noise created by generator commutator, electrical windshield wiper, horn, and especially dome, tail, and stop light cables. Connections made by bolting down the flange of container to chassis. The long insulated lead with a convenient screw lug is connected to the source of interference.

No.	List Price
355—Auto Noise Filter—1/2 Mfd.	\$.55
356—Auto Noise Filter—1 Mfd.	.65

# Birnbach PLUGS and JACKS

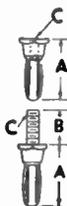

## GIANT PLUGS

Used for heavy current, they are rated at 25 amps. The long life nickel silver alloy spring is secured over a pin preventing a collapse of the spring and also maintaining the full action of the spring when inserted into the jack. The No. 398A plug has a hole in the threaded shank to permit soldering to it. It is used extensively on diathermy electrode pad cables. Standard Package 25.

No.	Plug	A	B	C	List Price
396	Plug	1 5/8"	—	10-32	each \$0.25
397	Plug	1 1/4"	—	1/4-20	each .30
398	Plug	1 5/8"	5/8"	1/4-28	each .25
398A	Plug	1 5/8"	5/8"	1/4-28	each .25

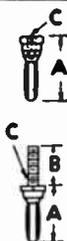

## BANANA PLUGS

Large area of contact is one of the outstanding features of these jacks and plugs. The No. 400 series of packages have a nickel silver contact spring secured over a full length central pin, making these plugs non-collapsible and assuring a low resistance contact. Capacity 5 amperes. Standard Package 100.

No.	Plug	A	B	C	List Price
400	Plug	3/4"	1/2"	6-32	each \$0.09
401	Plug	3/4"	—	6-32	each .10
404A	Plug	3/4"	3/4"	1/4-28	each .14

## No. 403 BANANA JACK

Accurately milled and has a precision reamed hole to help maintain the tight and smooth action of the plug. It is made of brass nickel plated and comes complete with nut and lug. Standard Package 100.

No.	Jack	A	B	C	List Price
403	Jack	1/2"	3/8"	1/4-28	\$0.09

## INSULATED BANANA JACKS

The No. 391 Jack is very popular with the electric therapeutic manufacturers. The 1/2" dia. insulated head admits all of the exposed metal part of the metal plug when inserted. Mounts in a 1/2" dia. hole on a panel up to 3/8" thick. The No. 406 Jack has a 1/2" dia. insulated top. It fits into a 1/2" dia. hole and takes up to a 3/8" panel. Both come complete with insulating shoulder washer, nut and lug.

No.	Jack	Std. Pkg.	List Price
391	Insulated Jack—red or black	50	\$0.14
406	Insulated Jack—red, black, yellow, or green	50	\$0.13

## SHAFT COUPLINGS, REDUCERS AND EXTENDERS

By the use of these units all 1/4" and 3/8" dia. shafts and knobs can be assembled together. The insulated units are for use where electrical isolation is desired. Furnished complete with set screws shown. Be sure to specify whether Brass or Insulated is desired.

Brass No.	Insulated No.	Shaft A	Hole B	List Price
534	634	1/4"	1/4"	each \$0.18
535	635	1/4"	3/8"	each .18
536	636	3/8"	3/8"	each .18
537—Reducer for 3/8" Dia. Hole to 1/4" Dia. Shaft.				each .12

Brass No.	Insulated No.	Shaft A	Hole B	List Price

541	1/4"	12" Long.	each .36
542	3/8"	3" Long.	each .36

No.	Dia.	Length	List Price
543	1/4"	6" Long.	each \$0.25
544	1/4"	12" Long.	each .50
545	3/8"	8" Long.	each .50

## GIANT JACKS

Milled with the central hole being reamed to size to insure a tight fit with all Giant Plugs. The No. 394 and No. 399A have a 10-32 thread tapped at the end permitting connection to be made. They are all made of brass and nickel-plated and come complete with nut and lug.

No.	Std. Pkg.	A	B	C	List Price
394....Jack	25	1 1/8"	1/2"	3/8-24	each \$0.25
395....Jack	25	1 1/8"	1/2"	3/8-24	each .20
399....Jack	25	1 1/8"	5/8"	1/2-20	each .25
399A....Jack	25	1 1/8"	5/8"	1/2-20	each .30

## No. 392 INSULATED GIANT PLUG

Made so that no projecting edges are exposed, thereby protecting the user from unnecessary contact. Connection is made by soldering into the hole at the end of the threaded shank of the plug. Handle is 1 1/2" long by 3/8" dia.; length overall 3". Colors: red or black.

No. 392—Insulated Giant Plug	List Price \$0.45
------------------------------	-------------------

## No. 393 INSULATED GIANT JACK

Designed to leave no metal part exposed on the panel. The 3/8-24 brass nickel plated sleeve has a 10-32 threaded hole at the end permitting a connection at the end of the jack or to the lug under the head. Either assembly available complete with nut, insulating shoulder washer, lock-washer and lug. Length overall 1 3/4". Colors: red or black.

No.	List Price
393 —Insulated Giant Jack under head lug	\$0.40
393A—Insulated Giant Jack end lug	.40

## HARD RUBBER INSULATED GIANT PLUG

Especially designed for use with diathermy cables. It has a 3/8" dia. hole in the handle to take the largest cable. It is made of polished black hard rubber. The handle is 3" long by 3/8" dia. Overall length is 4 1/8".

No. 342—Hard Rubber Insulated Plug	List Price \$1.25
------------------------------------	-------------------

## No. 341 Insulated Banana Plug

This plug consists of our No. 401A plug with a larger handle 1 1/2" long by 1/2" dia. Used on a therapeutic apparatus and test equipment. Overall length 2 3/4". Colors: red or black.

No. 341—Insulated Banana Plug	List Price \$0.35
-------------------------------	-------------------

## No. 404 Insulated Banana Plug

The plug is for experimental test leads because of its Serucok solderless connection and the non-collapsible special alloy springs assembled on a pin preventing collapse of the plug spring. The handle is made of phenolic resin and is 3/8" by 1" long. Colors: red, black, yellow and green.

No. 404—Insulated Banana Plug	Std. Pkg. 50	List Price \$0.18
-------------------------------	--------------	-------------------

## No. 604 BANANA PLUG

Made of solid brass nickel-plated, with the end being slotted. The cast phenolic handle is 1" long by 3/8" dia. and is held on by the screw that secures the wire to the plug. Colors: red, black, yellow and green.

No. 604—Plug	Std. Pkg. 50	List Price \$0.14
--------------	--------------	-------------------

## No. 605 HANDLE JACK

Consists of a banana jack inside an insulated sleeve. Connection is made by soldering to the end of the jack. Handle is made of cast phenolic resin 3/8" dia. by 1 1/2" long. Colors: red, black, yellow and green.

No. 605—Handle Jack	Std. Pkg. 50	List Price \$0.18
---------------------	--------------	-------------------

# Birnbach

# INSULATORS

### CONE STANDOFF INSULATORS

Made of low absorption high tensile strength porcelain with a smooth glaze. All heights except the No. 430 are available with a Jack or a threaded hole top. Range of sizes are adequate for all needs. They are available only in a white glaze and come complete with screws, metal and cork washers.

No.	Height		Std. Pkg.	Threaded Holes			Mounting Hole	List Price each
	A	B		C	D	E		
430	5/8"	100	5/8"	1/8"	6-32	6-32	3/8"	\$.12

### CORRUGATED FEEDTHRU INSULATORS

The six new corrugated type feedthru insulators have more than twice the leakage path of the straight type because of increased surface of the corrugations and recommends itself where a straight side insulator of equal height is not satisfactory because of its shorter leakage path. Brass nickel-plated hardware and cork mounting washers supplied.

No.	Height		Std. Pkg.	Mounting			List Price each

### HIGH VOLTAGE FEEDTHRU INSULATOR

This insulator has been designed to meet the demand for an insulator having high dielectric and mechanical strength. The extra long leakage path is made possible by the corrugations on the top insulator. The bottom sleeve taper from a base dia. of 1 1/8" where the electric stress is greatest.

Height 1 1/2" ... Base Dia. 2" ... Mounting Hole 1 1/4" ... Hardware 1/4-20  
No. 4233 ..... List Price \$0.55

### METAL BASE INSULATORS

Designed to replace conventional porcelain insulators where failure of the base is due to cracking when fastened down. Extremely long leakage paths due to the corrugated surface is one of the important characteristics. They are made from high tensile strength low absorption porcelain smoothly glazed all over. Supplied with nickel-plated brass screws and nuts and cadmium plated drawn steel bases.

Cat. No.	Height	Base Dimen.		Mounting Screw	Hardware	List Price

### "LUCITE" FEEDTHRU INSULATORS

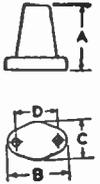

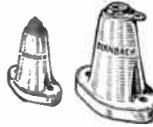

These feedthru insulators are ideal for bringing high frequency leads thru a panel. They are made of genuine Dupont Lucite. Because of its low loss at high frequency, it is well adapted to insulated elements of high frequency circuits. The 1/2" dia. insulators have brass nickel plated 6-32 hardware and the 3/4" have 10-32 hardware.

No.	Height above Panel		Dia.	Hole	Bottom Height	List Price

476	2"	2"	3/4"	1/8"	1/2"	.70

### STANDOFF INSULATORS

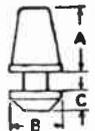

The sizes range from 5/8" to 4 1/2" high in five properly graduated heights. Made of highly vitrified low absorption glazed porcelain. No washers are necessary for mounting as the mounting surface is ground flat; but for the No. 405 and No. 966 Standoff insulators, it is advisable to use cork washers which are available as they will permit mounting securely without breakage. All brass nickel-plated hardware is supplied. Available in white or brown glaze.

### FEEDTHRU INSULATORS

Made of highly vitrified, low absorption porcelain smoothly glazed to prevent accumulation of dust or dirt. Maximum strength is achieved by the proper proportions and flat mounting surfaces. Long insulating sleeves on the lower part of the insulator contribute much to their performance on high voltages. Brass nickel-plated hardware.

to their performance on high voltages. Brass nickel-plated hardware.

### BEE-HIVE STANDOFF

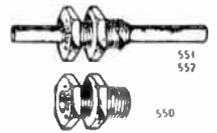

Base measures 2" dia. with 3 holes on a 1 1/8" circle, for No. 6 screws. Supplied complete with 12-24 nickel-plated brass screw and nuts. The No. 766J has a No. 403 Jack. Available white or brown glaze.

No.	Hardware	Std. Pkg.	List Price
766	12-24 Screw	10	\$0.17
766J	Jack Type	10	.22

### FRONT PANEL BEARING

The No. 550 Front Panel Bearing is cadmium plated brass for panels up to 3/8" in thickness and for 1/4" dia. shafts. The No. 551 and No. 552 are complete assemblies of the No. 550 and 1/4" dia. brass shaft cadmium plated.

Cat. No.	Hardware	Std. Pkg.	List Price
550	Front Panel Bearing	each	\$.18
551	Front Panel Bearing, 1/4" shaft, 3" long	each	.36
552	Front Panel Bearing, 1/4" shaft, 6" long	each	.50

### FLEXIBLE COUPLINGS

These flexible couplings cover all needs of the constructor. Tandem operation of two or more units is possible without having the shafts in exact alignment. Flexibility without back-lash is obtained by the cadmium plated phosphor bronze springs, which are rigidly riveted to the insulation. All units fit 1/4" dia. shafts.

No.	Dia.	Insulation	List Price
360	1 1/4"	Fibre	each \$ .35
361	1 1/4"	Bakelite	each .50
362	1 1/4"	Steatite	each .60

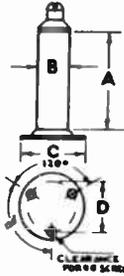

# Birnback INSULATORS

## STEATITE PILLARS

These (steatite) pillar insulators have great tensile strength with extremely low losses at very high frequencies and are glazed on the outside to decrease surface leakage. They are tapped on both ends and are supplied complete with nickel-plated mounting base and top hardware.

No.	Height	Std. Pkg.	B	Hardware	Base Dia. C	D	List Price

## STEATITE BUTTON

These specially designed steatite buttons are intended for use to simplify wiring and to be used as a binding post or a binding post insulator, or as a standoff insulator. Attention is called to the uniqueness of the design which prevents either section of the insulator from turning in respect to the special screw. The specially designed screw locks both sections.

A 1/8"	B 1/2"	C 3/8"	D 1/2"	F 6-32
No. 457	Std. Pkg. 25	List Price \$ .25		

## STEATITE PILLARS (Without Hardware)

In many constructions, these unmounted threaded steatite pillars will facilitate assembly because of the one hole mounting and parallel mounting surfaces. They are made of glazed Steatite with threaded holes on both sides.

No.	Height	Dia.	Threaded Hole	List Price

449	4"	3/4"	1/4-20	.95

## AIRPLANE INSULATORS

Used on mobile antenna installations, particularly on aircraft, as they are shaped for the least air resistance. They are made of white glazed low absorption porcelain.

No.	Length	Std. Pkg.	List Price
473	2"	100	each \$0.08
474	1 1/2"	100	each .07

## STEATITE AIRPLANE INSULATORS

A very small compression type insulator with small wind resistance. It is 1 1/2" long and 1/2" dia.

No. 463—Std. Pkg. 25, List Price \$.30 ea.

## LUCITE SPREADERS

They are made of Dupont Lucite rod which has a very low loss at radio frequencies. It is water clear and has very low water absorption. The holes are drilled to take a No. 12 wire. A screw at the end of the spreader locks the wire in position.

No.	Wire Spacing	Std. Pkg.	List Price Each

455	1/4"	\$0.50
459	3/8"	.60
460	1/2"	1.05
461	3/4"	1.88

Available in lengths up to 48 inches

## FEEDER SPREADERS

They have a cross section of 3/8" x 1/2". Made of highly vitrified, low absorption, high tensile strength porcelain with a smooth white glaze overall.

No.	Std. Pkg.	List Price
462—Spreader, 2" long	25	each \$0.14
464—Spreader, 4" long	25	each .19
469—Spreader, 6" long	25	each .24

## ANTENNA INSULATORS

These Antenna Insulators have exceptional low moisture absorption. The leakage path is long and the cross section is small and is consistent with the strength required. A smooth white glaze overall prevents the accumulation of dirt or ice.

No.	Std. Pkg.	List Price
668—4 1/4" long	25	each \$.17
470—7" long	10	each .68
471—12" long	5	each .85
468—4 1/2" long Center Insulator	10	each .30

## LEADIN INSULATORS

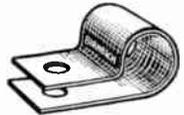

Each cone is 2 3/4" high and made of low absorption, highly vitrified glazed porcelain. The Nos. 4237 and 4238 Leadin Insulators have sufficient insulating bushings to insulate the rod that goes through the wall. In addition, 2 bushings are included, 1/4" and 1/2" long, allowing complete insulation of the threaded rod of any length in multiples of 1/4". They come complete with brass nickel-plated hardware and lead and cork washers to permit a water-tight seal.

No.	Description	List Price
4235	—10" Rod	\$1.15
4236	—15" Rod	1.30
4237	—10" Rod with bushings	1.50
4238	—15" Rod with bushings	1.90

## TUBE CLAMPS

These tube clips will be found extremely desirable when mounting resonant lines or elements of directive beam antennas. They are made of hard drawn aluminum and are available for 1/8", 3/8", 1/2", 3/4" and 1" dia. tubes. The 1/8", 3/8", and 1/2" have a clearance hole for No. 10 screw and the 3/4" and 1" dia. clamps have holes for 1/4" bolts.

Cat. No.	To Fit Tube	List Price
51—Clamp	1/4" Dia.	each \$0.15
52—Clamp	3/8" Dia.	each .15
53—Clamp	1/2" Dia.	each .15
54—Clamp	3/4" Dia.	each .15
55—Clamp	1" Dia.	each .25
56—Clamp	1 1/2" Dia.	each .25
57—Clamp	2" Dia.	each .30

## FLEXIBLE SHAFTS

At times there is difficulty getting the controls to the proper position on the panel. With couplings and these flexible shafts, locations can be made with ease on an offset and angles up to 90 degrees. The flexible shafts are made of phosphor bronze and fitted into 1/4" dia. hubs.

Cat. No.	List Price
553—Flexible Shaft, 3" long	each \$0.45
554—Flexible Shaft, 6" long	each .60

## TRANSMITTING TUBE SOCKETS

Improved design and additional features of the Birnback transmitting sockets has increased their popularity and are accepted as standard. The 50 watt socket has extra heavy side-wiping phosphor bronze contact spring with the filament spring having a double contact to safely carry the heavy current. The tube base is supported by the highly polished nickel-plated brass shell set in a highly vitrified low absorption porcelain base which is ground flat to prevent breakage. All brass nickel-plated screw and milled nuts are used.

Cat. No.	List Price
434—50 Watt Socket	each \$1.40
435—10 Watt Socket	each .95

**NOISE-MASTER**  
ALL-WAVE ANTENNA

**FOR EVERY SET AND LOCATION**  
Eliminates "man-made" static on broadcast as well as short wave bands.

There is a correct "NOISE-MASTER" antenna for every set and location. Radio reception is enjoyed to its fullest extent by installing one of these competent units. "NOISE-MASTER" is scientifically engineered to filter out the innumerable nuisance noises caused by electrical devices . . . assuring perfect reception over broadcast as well as short-wave frequency.

**No. 14 "NOISE-MASTER"**  
**\$6.75 LIST.** Code: CORAL, Wt. 2 lbs. 12 oz.

Recommended where there are sufficient "man-made" noises to interfere with radio reception over both the short-wave and broadcast bands. Licensed under Amy, Aceves & King patent No. Re. 19354. A highly engineered product which makes one aerial act electrically as two perfect

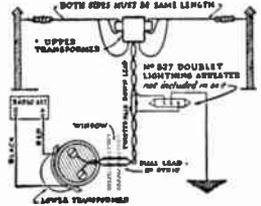

antennas. Two or more sets (preferably not more than 4) can be operated at the same time on the same antenna by using an additional lower transformer unit on each additional set. Assures highest efficiency over the entire receiving band.

**CONTENTS:**

- 2—30 foot coils of stranded copper antenna wire
- 1 upper transformer assembly
- 2 glass insulators
- 75 feet twisted pair down lead

- 3—6" screw eye insulators
- 1 No. 755 dual lead-in strip
- 1 lower transformer unit
- 1—4" porcelain tube
- 1 instruction sheet

- No. 14a (Code: CUTAT)—Kit containing upper and lower transformers only.....List \$5.00
- No. 127 (Code: CYTAT)—Extra lower transformers, each.....List 2.25
- No. 14b (Code: CATAW)—"EUROPEAN NOISE-MASTER." Same as No. 14 except that transformers are designed to operate on 15 to 2100 meters.....List 7.00
- No. 128 (Code: CYTAR)—European type lower transformer.....List 2.50

No. 14

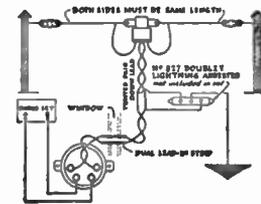

**No. 19 "NOISE-MASTER" . . \$4.95 LIST.** Code: CYRAX, Wt. 3 lbs. 13 ozs.

This antenna is a deluxe doublet employing an Amy, Aceves & King licensed Self-Selecting matching transformer and a junction box in the antenna line. Easy to install and factory fabricated. When properly erected it assures excellent all-wave reception.

**CONTENTS:**

- 2—30 ft. coils 7/23 aerial wire
- 2—No. 1 porcelain insulators
- 1 junction-box assembly
- 75 ft. No. 128 twisted pair down lead
- 8—6" screw eye insulators

- 1 No. 755 dual lead-in strip
- 1—4" porcelain tube
- 1 No. 129 Self-Selecting transformer
- 1 instruction sheet.

No. 19

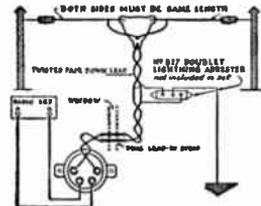

**No. 18 "NOISE-MASTER" . . \$3.75 LIST.** Code: CIRAM, Wt. 3 lbs. 12 ozs.

A licensed Amy, Aceves & King antenna at a popular price! Simple doublet type, featuring a high-grade Self-Selecting licensed matching transformer. Easy to install and completely factory fabricated. Recommended for locations where "man-made" static interferes with short-wave but not with ordinary broadcast reception.

**CONTENTS:**

- 2—30 ft. coils 7/24 "TRI-COR" all-wave aerial wire.
- 2 No. 2 glass insulators
- 1 triangular porcelain center insulator
- 50 ft. No. 117 stranded twisted "TU KOLOR" down lead (connected at our factory to the two coils of aerial wire at center insulator)

- 10 ft. coil stranded twisted pair brown inside lead-in wire
- 3—6" screw eye insulators
- 1 No. 755 dual lead-in strip
- 1—4" porcelain tube
- 1 No. 129 Self-Selecting transformer
- 1 instruction sheet

No. 18

**BROADCAST ANTENNA KITS**

These are popular priced broadcast kits of the "L" type. Each kit contains the necessary parts for the installation of the complete antenna. They are furnished in an attractive two-color box.

**Kit No. 3 THE MAJOR**

Code: CYTAM, Wt. 3 lbs.  
**CONTENTS:**

- 75 ft. No. 15 stranded aerial wire; 35 ft. rubber-covered lead-in wire; 1 No. 825 lightning arrester; 2 glass insulators; 2 glazed porcelain nail knobs; 1—3" screw eye stand-off insulator; 1 No. 760 high gloss lead-in strip; 1 No. 710 "C" type ground clamp; 15 ft. flexible rubber-covered wire; 6 insulated staples; 2 wood screws.

**\$1.55 List**

**Kit No. 4 THE CAPTAIN**

Code: CYTON, Wt. 2½ lbs.  
**CONTENTS:**

- 75 ft. 7/24 stranded aerial wire; 25 ft. rubber-covered lead-in wire; 1 No. 825 lightning arrester; 2 porcelain insulators; 2 glazed porcelain nail knobs; 1 No. 760 high gloss lead-in strip; 1 No. 712 "C" type ground clamp; 15 ft. flexible rubber-covered wire; 2 wood screws.

**\$1.25 List**

**Kit No. 5 THE LIEUTENANT**

Code: CYTAA, Wt. 2 lbs.  
**CONTENTS:**

- 75 ft. 7/27 stranded aerial wire; 25 ft. rubber-covered lead-in wire; 1 No. 825 lightning arrester; 2 porcelain insulators; 2 nail knobs; 1 No. 707 strap type ground clamp; 1 No. 770 lead-in strip; 2 wood screws.

**95c List**

# RADIO WIRE *products*

## AERIAL WIRE

The most careful attention has been given to those properties which make CORWICO aerial wire the most suitable for radio reception; viz., large surface area, high electric conductivity, and tensile strength.

## TWISTED PAIR DOWNLEADS

No. 122—List Mft. \$18.00

This is a popular-priced twisted pair down lead consisting of two conductors, each No. 22 stranded copper, 1/82" and rubber-covered (one black, one red), twisted and covered with overall black weatherproof braid.

No. 116—List Mft. \$35.00

This is a heavy twisted pair down lead especially designed for use in doublet type antennas. Each conductor consists of No. 16 (26/80) stranded tinned copper wire with a 1/82" rubber covering and a single white weatherproof braid. The two conductors are then twisted together.

No. 120—List Mft. \$20.00

This is a cheaper twisted pair down lead consisting of two conductors each No. 20 (10/80) stranded copper, 1/82" rubber covered twisted and covered with an overall black weatherproof braid.

## ANTENNA ACCESSORIES

### LIGHTNING ARRESTERS

Extreme care has been given to the design of these arresters to produce low-priced products of greatest possible value.

No.	List Price
No. 825—2 Pole	.25c
No. 827—3 Pole (Doublet)	.35c

### LEAD-IN STRIPS

All Strips 12" Long—Packed 50 to a Carton

No.	List per C
760— $\frac{1}{2}$ " Zinc, High Gloss, Soldered Terminals	\$5.85
761— $\frac{1}{2}$ " Zinc, High Gloss, not Soldered Terminals	5.35

750— $\frac{1}{2}$ " Copper, High Gloss, Soldered Terminals	6.75
751— $\frac{1}{2}$ " Copper, High Gloss, not Soldered Terminals	6.25

### SCREW END LEAD-IN STRIPS

Equipped with screw-type terminals, insuring positive and lasting contact. Length 12"—Packed 50 to a Carton.

No. 780—Copper, High Gloss	List per C \$7.00
No. 781—Zinc, High Gloss	List per C 6.40
No. 755—Doublet, Copper, High Gloss	List per C 18.00

### SCREW EYE INSULATORS

Packed 50 to a Carton

No.	List per C
795—Porcelain Eye, 8"	\$3.90
796—Porcelain Eye, 6"	4.50
797—Bakelite Eye, 8"	4.70
798—Bakelite Eye, 6"	5.70

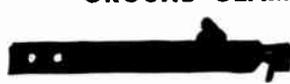

### BATTERY CLIPS

Spring jaw clips for instant connection to wet or dry batteries. Packed 30 to carton.

No.	List per C
1—50 amp	\$15.00
2—25 amp	8.75
3—10 amp	6.00
4—5 amp	5.00

## GROUND CLAMPS

We manufacture a complete line of ground clamps of all types, for every purpose.

### "C" TYPE GROUND CLAMP.

710 Hardened steel point, assures positive ground connection. Opening 1 $\frac{1}{2}$ ". Packed 50 to a carton.

No. 710—Cadmium Plated	List per C \$6.00
No. 713—Plain Finish	List per C 4.80

707 SADDLE TYPE GROUND CLAMP. Hardened steel point assures positive contact. Easily applied to any pipe or rod from  $\frac{1}{2}$ " to 2 $\frac{1}{2}$ " in diameter. Cadmium Plated. Packed 50 to a carton.

No. 700—Saddle Type	List per C \$5.50
---------------------	-------------------

700 STRAP TYPE GROUND CLAMP. Packed 50 to a carton. The No. 708 Clamps have a copper finish.

No. 707—Copper Strap Clamp	List per C \$4.25
No. 708—Steel Strap Clamp	List per C 3.80

785 GROUND RODS No. 785 Made of  $\frac{3}{8}$ " coppered steel, 4 ft. long. Has adjustable saddle with pointed screw for positive ground connection. Packed—12. Weight 20 lbs. Each.....50c

### GLASS INSULATORS

Substantially made of non-brittle crystal glass.

No. 1—8" length, 100 per carton	List per C \$6.00
No. 2—8 $\frac{3}{4}$ " length, 25 per carton	List per C 6.50

### PORCELAIN INSULATORS

Made of high grade glazed porcelain for long and short wave antennas.

No. 790	List per C \$3.90
---------	-------------------

## P-A WIRES and CABLES

### HOLLYWOOD MICROPHONE CABLES

(Shielded—Rubber Jacketed)

Substantially made to withstand rough usage. Special low capacity color coded rubber used on conductors. Braided with tinned copper shield. Tough weatherproof polished rubber jacket overall. Single conductor—unusually low capacity. Can be used up to 100 ft. with high impedance ribbon microphones and up to 50 ft. with crystal microphones.

Cat. No.	Conductors	Feet on Spool	Approx. Outside Diam.	List Price
1105	1	100	3/8"	\$ 7.00
2104	1	500	3/8"	27.00
2101	1	1000	3/8"	53.00
Two conductor, for low impedance microphones and transmission lines.				
1152	2	100	1 1/8"	7.60
1153	2	250	1 1/8"	18.50
2152	2	500	1 1/8"	36.00

### AUTO RADIO WIRES and CABLES

#### SHIELDED LOW CAPACITY CABLE

Extremely low capacity between conductor and shield used in auto radio for antenna lead-in and elsewhere where a low capacity wire is required.

Cat. No.	Put-Up	List Price
1100	50' Coil 1/2" O.D.	\$5.65
1101	100' Coil 1/2" O.D.	10.70
1102	50' Coil 1/4" O.D.	4.20
1103	100' Coil 1/4" O.D.	7.95

#### BRAIDED TINNED COPPER TUBULAR SHIELDING

Convenient shielding for auto radio installations. We recommend the 1/4" width for wires up to 1/8" O.D. and the 1/2" width for larger wires.

Cat. No.	Put-Up	Width	List Price
1108	50 Ft. Spool	1/4"	\$2.70
1109	100 Ft. Spool	1/4"	4.60
1110	250 Ft. Spool	1/4"	10.50
1111	50 Ft. Spool	1/2"	4.55
1112	100 Ft. Spool	1/2"	8.65
1113	250 Ft. Spool	1/2"	21.00

#### SHIELDED LOW CAPACITY LOOM

Frequently used in auto radio as a shield for the antenna lead-in. Inside Diameter 1/8" (Approx.). Outside Diameter 1/4" (Approx.).

Cat. No.	Put-Up	List Price
1106	50' Coil 1/8" I.D.	\$5.50
1107	100' Coil 1/8" I.D.	10.00

#### SHIELDED IGNITION CABLE

Consists of a No. 16 Stranded Conductor with high grade rubber wall with a lacquered braid and overall tinned copper shield. This wire is effectively used in secondary circuits in auto radio and also in photo electric cell leads.

Cat. No.	Type	Spool	List Price
1134	7MM R.W.—100'		\$ 9.80
1136	7MM R.W.—250'		24.00
1137	3/8" R.W.—100'		4.30
1139	3/8" R.W.—500'		18.50

#### FLEXIBLE CORDS

(Fixture Wires—Lamp Cords)

Fixture wires often used as all-purpose radio and lead-in wire. Lamp cords used for power supply and extension cords. Colors: Brown, Black, Ivory.

Cat. No.	Put-up	per M ft.	List Price
1133	No. 20 Single, Type F, Cotton	1000 ft.	\$ 8.50
1136	No. 18 Single, Type F, Cotton	1000 ft.	10.50
*138	No. 18 Parallel, Type PO, Rayon	250 ft.	24.00
*139	No. 18 Parallel, Type POSJ, All Rubber	250 ft.	21.00

#### TEST LEAD WIRE

A super flexible conductor covered with heavy live rubber. Will not wear, kink or crack. Made in Black and Red. Mention color when ordering.

Cat. No.	Put-Up	List Price
1140	100 Ft. Spools	\$ 2.75
1141	500 Ft. Spools	12.50
1142	1000 Ft. Spools	24.00

#### AC-DC Antenna Lead Wire

A replacement antenna wire for Universal Sets at a minimum cost. The type of wire used incorporates the well-known Corlac insulation between the copper conductor and the outside brown cotton braid which not only assures a moisture-proof product but also greatly tends to make the wire non-kinkable.

Cat. No.	Put-Up	List Price

## RADIO HOOK-UP WIRES

### "BRAIDITE" PUSH-BACK WIRE

These Hook-Up wires are the standard type of push back wires. They have a cotton serve and an impregnated braid which slides back easily from the tinned copper conductor, thus making it easy to solder.

### "CORLAC" HOOK-UP WIRE

For the discriminating service man who knows the importance of voltage break down and insulation resistance. Special under-insulation makes this hook-up wire moisture-proof and gives voltage break-down of 3100 volts (as per certified report of Electrical Testing Laboratory, N. Y. C.). Excellent push-back. Tinned copper conductors.

### COLORED RUBBER HOOK-UP WIRE

When a rubber covered hook-up wire is necessary the following products are recommended. They are made of Stranded Tinned Copper Wire covered with live rubber sufficient to withstand any voltage ordinarily used in radio. For circuit distinction these products are covered with colored rubber in Red, Green, Black and White.

### "NUCOR" HOOK-UP WIRE

By using a special soft rubber insulation this wire has the highest possible electrical properties of insulation resistance and voltage break-down for a push back wire (13,000 volts as per certified report of Electrical Testing Laboratory of New York City). Tinned Copper conductors.

### Solid Beldenamel

*8008	1000 spool	12
-------	------------	----

## All-Rubber Lead-in Wire

Easy stripping—easy soldering. All made of 7 strands of tinned copper wire with extra thick rubber sheath as indicated. (.031" = 1/32")

Number	Length in Feet on Spool	Size	Rubber Thickness	Outside Diameter of Wire
8200	1000	18	.040"	.126"

## Belden Shielded Lead-in Wire

Size 16 stranded, rubber thickness indicated, tinned copper shield. For any audio or radio frequency circuits.

Number	Length in Feet on Spool	Rubber Wall	Frequency (Kc.)	Surge Impedance (Ohms)	Power Factor (Per Cent)	Maximum Capacity mmf. per Ft.
8206	250	1/32"	1500	33.5	1.78	63.0
			10000	33.8	1.52	62.0

## Belden Arresters—Insulators

8896—Belden standard size bakelite resistor type arrester dissipates destructive charges induced in the aerial system. Listed as standard by Underwriters'. Furnished with \$100.00 guarantee.

8814—Glass insulators 3" over-all length.

# Belden \* TRANSMISSION LINE CABLES

14 Stranded (19 x 28) tinned, low-loss rubber compound, tinned copper shield, tough vulcanized rubber sheath. O.D. = .460"

12 Solid tinned, low-loss insulating bead, tinned copper shield, cotton wrap, vulcanized rubber sheath. O.D. = .475"

EO1 Type, 12 solid, cellophane wrap, .035" rubber, twisted pair, over-all cotton braid, weather-proofed.

For the majority of all-wave receivers and of any half-wave di-pole antenna. 18 Stranded tinned, cotton wrap, low capacity rubber, color coded, twisted pair, over-all white cotton braid, weather-proofed.

Recommended for lead-ins where interference is great. 18 Stranded tinned, cotton wrap, rubber covered, color coded, twisted pair; paper wrap and tinned copper shield over twisted pair—over-all white cotton braid, weather-proofed.

22 Stranded tinned, paper wrap, rubber covered, color coded, twisted pair, over-all black cotton braid, weather-proofed.

These Transmission Cables will meet the requirements for all the frequencies in the audio to and including the television or frequency modulation range.

## 72-Ohm Coaxial Cables

Designed for use as antenna receiving or transmitting cables; also for photoelectric or other circuits where characteristics fit the application.

## Soldering Irons

Three Belden soldering irons provide a range of sizes to take care of practically all radio service and communications work. Sturdy construction throughout assures long service life.

**8110**—80-Watt iron with  $\frac{3}{8}$ " tip. For light work. Complete with stand including tip cleaner.

**8113**—100-Watt iron with  $\frac{3}{8}$ " tip. For medium light service. Complete with stand including tip cleaner.

**8116**—150-Watt iron with  $\frac{1}{2}$ " tip. For medium heavy work, chassis spotting, etc. Complete with stand.

## Soldering Iron Replacements

**8111**—80-Watt element for 8110.

**8114**—100-Watt element for 8113.

**8117**—150-Watt element for 8116.

**8112**—Tip ( $\frac{3}{8}$ " for 8110 or 8113.

**8118**—Tip for 8116.

**8119**—Heater cord only. 6-Ft. Belden 3000-cycle heater cord with Belden Unbreakable Soft Rubber Plug. Opposite end stripped and tinned.

# Belden \* MICROPHONE CABLE

**8401** For ribbon or crystal and single-button carbon microphones—or low impedance transmission lines. Belden developed low capacity rubber core and special stranding give extra flexibility plus unusual tensile strength.

**8411** For lapel microphones.

**8431** For phonograph pick-ups—(over-all cotton braid).

For double-button carbon microphone circuits using the shield as the grounded connection and for low impedance, 50- to 500-ohm transmission lines—or for coupling a pre-amplifier to a power amplifier, employing the shield as a ground.

For double-button carbon microphones feeding a mixer panel or circuits in which the diaphragm of the microphone must be above ground potential, yet shielded from transient fields.

For double-button carbon microphone circuits in which the attenuation control is located at the microphone and employs two of the four conductors of the cable.

For condenser microphone transmission line and power supply to microphone head amplifier.

For condenser microphone circuit with remote control switch or pilot light at microphone.

For auto-radio test instruments and acid resisting analyzer cable.

For temporary indoor installations of low impedance or carbon microphone transmission circuits. 20 (Stranded tinned), paper wrap, 1/64" rubber, color coded treated cotton braid, cabled, with tinned copper shield over-all.

# Belden \* PA AND COMMUNICATING SYSTEM CABLES

## Shielded Twisted Pair Type FOR INSIDE USE

 19 Solid, double enameled, wrap cotton, color coded cotton braid, waxed, twisted pair, over-all bare copper shield. No. **8799**, 500 ft. spool, 2 conductors, .145" O.D.

Same construction as 8701, with over-all low-loss shield and cotton braid. No. **8702**, 500 ft. spool, 2 conductors, .165" O.D.

## Armored Speaker Cable FOR INSIDE OR OUTSIDE USE

 18 Stranded tinned, color coded cotton wrap, 2-conductors parallel, 1/64" rubber, paper wrap, over-all steel armor.

**8212**—500 Ft. spool, 2 conductors. **8204**—Unshielded Twisted Pair— see p. Q-1.  
**8209**—Shielded Twisted Pair— see p. Q-1.

\* New put-up or color. †Length may vary  $\pm$  10%.

Belden Manufacturing Company, Chicago, U. S. A.

# Belden \* MULTIPLE CONDUCTOR CABLE

## Rubber Sheathed

For permanent magnet dynamic speakers and general power supply cable. 18 (41x34) Cotton wrap, 1/64" rubber, color coded, cabled with fillers, cotton wrap—over-all rubber sheath.

Number	Length in Ft. on Spool	No. Conductors	Thickness Rubber Sheath	Outside Diameter
8452	500†	2	.035"	.245"

For electro-dynamic speakers in which one audio circuit serves also as the return lead of the field supply and for speakers with a center-tapped input transformer requiring a three-conductor cable. Construction same as 8452.

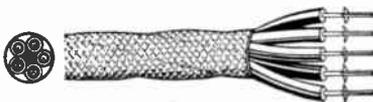

8453	500†	3	.040"	.265"
------	------	---	-------	-------

For four-wire a-c or electro-dynamic speaker lines. Two 18 (41x34) balance 20 (26x34). Size 18—for lower resistance—for speaker field—heavy applications.

8454	500†	4	.040"	.260"
------	------	---	-------	-------

## Over-all Glazed Cotton

### Abrasion-proof "Basket-Weave" Braid

For permanent installation of speakers, remote control equipment, and multiple circuit, 500-ohm transmission lines.

Number	Length in Ft. on Spool	No. Conductors	Description	Outside Diameter
8443	500†	3	20 (Stranded tinned) paper wrap, .020"	.190"
8444	500†	4	rubber, color coded, cabled, over-all brown braid.	.210"
8445	500†	5		.230"

For use where high current must be carried with a low potential drop.

8446	100	6	2—16 (Stranded tinned), 1/32" rubber	.290"
8447	100	7	balance, 20 (stranded tinned).	.310"

*8652	.140"	16	.022"	8656	.170"	

## Auto-Radio Shielded Low Capacitance Lead-In Wire

8663—100-Ft. 20 stranded tinned, cotton wrap, low capacity rubber, rayon braid, tinned copper shield over-all. Maximum capacity between conductor and shield 33 mmf. O.D. = .230".

8664—100-Ft. same as 8663 with rubber sheath over-all. O.D. = .290".

## Spark Plug Wires—PLAIN

8667—7 mm. Belden Pyro-Glaze.

### SHIELDED

8665—7 mm. Belden Pyro-Glaze spark plug wire with tinned copper shield.

## Extra Flexible Test Prod Wire

The outstanding feature of this wire is its great flexibility. 18 Stranded (65 x 36, tinned), cotton wrap, 3/64" rubber wall. O.D. = .140".

\*8899—500 Feet, red or black on spool.

## High Voltage Test Prod Wire

8898—500 Feet, red or black on spool.

## Tinned Copper Shielding

Tinned Copper—8661 fits 7 mm. spark plug wires.

## WARD LEADS THE WAY in the Antenna Field . . .

THE WARD PRODUCTS CORPORATION has long been the leader in the design and manufacture of antennas for automobiles and home radios. Since its beginning WARD has been the recognized pace-setter. Many important design changes, pioneered by WARD, have become accepted standards in the industry. All products bearing the WARD name are quality products, workmanship of craftsmen using modern equipment under ideal conditions. For finest antennas for all automobile and home applications, look to WARD!

# PREMAX TELESCOPING VERTICAL RADIATORS

## Aluminum Radiators

Meeting every demand for light weight combined with corrosion resistance and adequate strength for the most exacting conditions, Premax Aluminum Antennas are in popular use for mobile installations, such as pick-up trucks, etc., where light weight, convenience in extending and collapsing and attractive appearance are important considerations. They are ideal for radio telephone use on fresh water craft or inland locations, as well as for commercial installations.

For commercial use, for police, fire, forestry, public utility and similar services, as well as for amateur installations or home receiving sets, Premax Aluminum Antennas are convenient, dependable, attractive and extremely reasonable in cost. The solid taper rod (No. AM-106) makes an ideal element for FM or television di-poles.

The tubing is special drawn bright finish seamless aluminum, with diameters, gauges and temper engineered to withstand wind velocities up to 60 miles per hour without failure or permanent damage. Guying is not essential under normal conditions, but is recommended as an extra precaution against unexpected stresses.

The locking device between sections is of the clutch type, comprising a specially formed hexagon cap nut, engaging a tapered split compression sleeve. This construction is simple in operation and provides an efficient, low-resistance contact between sections.

A group of six different units is available, all excepting the tapered top section (No. AM-106) being fully telescoping and adjustable between the minimum and maximum lengths shown.

### HEAVY DUTY NON-ADJUSTABLE MASTS

To meet demands from various commercial services, Premax has designed Special Duty Non-Adjustable Masts (not illustrated), which can be depended upon for enduring performance under the most extreme conditions. In either the 17 1/2' or 35' lengths, this special aluminum alloy mast is designed to withstand wind velocities up to 100 M. P. H. The tubing is graduated in steps from a base diameter of 2" to a top of 1/2" on the 35' mast and a base diameter of 1 1/8" to a top of 1/2" on the 17 1/2' mast, and has a smooth, polished finish to resist corrosion or a collection of dirt. The joint on the 35' mast is ground to a fine fit for positive contact and maximum strength throughout.

Several masts of this type were in use without guying at W2USA on the Communications Building for the two years of the New York World's Fair and withstood extremely high gales and severe sleet storms with no evidence of damage in any respect.

## Monel Radiators

Outstanding for marine installations and those other commercial uses where high strength and unusual resistance to corrosion are prime considerations, Premax Monel Antennas have satisfactorily stood up under the most severe wind and shock strains, even when installed on the speedy boats of the navy and coast guard. Monel antennas have proven their ability to resist the action of sea air, salt spray and other corrosive agents.

The monel masts are built up of multiple sections of hard-drawn monel tubing which is a product of Superior Tube Company of Norristown, Pa. They are fully telescoping and adjustable. Their rich, highly polished appearance conforms perfectly with the equipment of even the finest craft, yet their cost is not excessive for the more modest installations when their indefinite life and operating efficiency is considered.

Monel is without doubt the perfect material for radio antennas, far more resistant toward more corrosives than either the nickels or coppers which are used in the formulation of monel. It has both the corrosion resistance and mechanical properties which enable it to withstand weather conditions, low temperatures and sudden shocks without affecting its toughness.

Monel is stronger and tougher than common steels and its fatigue strength exceeds the limits of mild steel or all brasses and bronzes. This means freedom from internal structural failures, season cracking and other weaknesses, which, in ordinary metals, result in poor contacts, increased resistance or mechanical breakdowns. The endurance of monel is well shown by the fact that a monel roof on the Pennsylvania Terminal in New York City is still practically perfect after more than 25 years of exposure.

Rigid tests by both government and private ship-builders have shown Premax Monel Antennas as the most dependable unit available for high efficiency and completely satisfactory service under the most exacting conditions.

Two types of Monel Antenna are offered, the MM which is standard for most installations and the USM which is a heavy duty antenna in 25-foot length only, developed especially for navy use. The MM type and the USM-525 are telescoping and fully adjustable within the maximum and minimum lengths shown. The USM-325 is a jointed non-adjustable antenna.

## Steel Radiators

### VERTICAL TYPE

Probably the most enviable reputation for dependable, efficient performance under the most severe conditions has been earned by Premax Tubular Steel Antennas which are in wide use for vertical radiators, home receiving antennas and countless commercial and public installations.

Premax Telescoping Steel Antennas are made of a high tensile, copper-nickel steel tubing, heavily plated in bright cadmium. They are not only highly resistant to corrosion but are extremely strong both in material and design.

Diameters and wall thicknesses have been engineered to provide ample strength against all ordinary stresses in the services to which they are adapted. While no positive guarantee can be offered against abnormal wind strains above 60 miles per hour, or extreme conditions encountered in heavy sleet storms and other unusual circumstances, many actual instances have been reported where Premax Telescoping Steel Antennas have weathered such punishment with perfect performance. Guying, while not generally considered necessary, is suggested as a reasonable precaution where possible.

Hundreds of amateur, public and commercial users are recommending Premax Telescoping Steel Antennas as dependable, low-cost equipment for a wide variety of radio services.

Premax Telescoping Steel Antennas are available in a range of sizes as shown below, for many different amateur and commercial services. All units are fully telescoping and adjustable between the maximum and minimum lengths shown. The locking device is simple in operation, positive in action and provides a secure, efficient contact between sections.

### METHODS OF MOUNTING VERTICAL ANTENNAS

There are several commonly used methods of mounting Vertical Antennas, of which the most popular is with Premax Type 1 Heavy Duty Base. Lighter antennas up to about 18 feet in height can be satisfactorily mounted on the Type 2 Base. Type IX Base is similar to the Type 1 excepting that it has a socket instead of a post, and is generally used as footing insulators for towers or where the entire weight is downward. Type 6 is used where the connections are made through a flat roof or deck. In some instances, a wall bracket is desirable in order to secure proper location, and for this purpose the Wall Bracket WB-1 is used with a type 1 or 2 Base. Complete details of the various base mountings and insulators will be found on page Q-49.

## Corulite Elements

### OF STEEL

For efficient performance in horizontal arrays and similar applications, the Premax Corulite Elements have a wide acceptance. These elements are exceptionally light in weight, yet provide the necessary extreme strength and rigidity so essential in the horizontal type of construction—and at a surprisingly low cost.

This Corulite type of steel tubing was developed by Premax in order to insure a metal structure which would possess unusual stiffness and strength in combination with light wall thickness and consequent low weight—all features essential in this type of array. Although many attempts have been made to imitate this construction, no other type has been able to equal Premax Corulite. A positive clamp, simple in its operation, insures rigid joints and perfect electrical contact between sections.

All Corulite Elements listed below (excepting No. 104-M) are fully telescoping and adjustable between the minimum and maximum lengths shown. These elements meet all requirements for the various 5, 10 and 20-meter arrays in general use, and will also be found ideal equipment for the experimenter on new combinations in the amateur, commercial, television or F. M. bands.

### PREMAX PROVIDES A SPECIAL "HAIRPIN" TUNING BAR

The performance of a definite antenna can, to a large extent, be improved or ruined by the adjustments. This difficulty is completely eliminated by the use of the Premax "Hairpin" Tuning Bar. This bar is inserted between the two halves of the element, and may be slid up or down so as to provide a variation in the overall length from tip to tip of the element without making any adjustment in the two halves of the element itself. In other words, the electrical length is measured from the outside end of one element through that portion of the "hairpin" that is in use to the outside end of the other half of the element. By this method it is possible to have all of the elements set at a single physical length and the variation in their electrical length may be provided by the "hairpin". Similarly, the variation from one end of a given band to another may be obtained by a similar adjustment.

Unit 118-M Unit 113-M Unit 108-M Unit 104-M

### SPECIFICATIONS AND LIST PRICES

No.	Description	Ext. Lgth.	Col. Lgth.	Base O.D.	Top O.D.	Recom. For	Wgt. Per Pr.	List Price Pair

(Premax Corulite Elements sold only in pairs, complete with Premax "Hairpin" Tuning Bar) (For Insulators and Mountings, see page Q-49)

### BRONZE MOUNTING CLIPS

Formed bronze clips or clamps for mounting horizontal elements or vertical antennas on standard stand-off insulators. Also used for connecting feed wires and transmission lines to antenna or elements. 3/4" wide, cadmium plated.

No.	Description	List Price Pair
218-C	Fits 1" tube	\$0.30
418-C	Fits 3/8" tube	0.30

## BASE INSULATOR TYPE 1

Heavy duty type, of heavy wet-process brown-glaze porcelain held in compression between hot galvanized malleable iron castings. A Lapp design with compression rating up to 10,000 pounds. Height to top of cone 7". Bolt circle 5 1/4". Weight 7 lbs. Complete with mounting bolts and nuts.

### SPECIFICATIONS AND PRICES

No.	Diameter Top Post	Fits Antennas	List Each
1P-24*	3/4"	318-M, MM-425	\$20.00
1P-26	1 1/8"	AM-124	20.00
1P-30	1 5/8"	224-M, MM-430, MM-435	20.00
1P-44*	1 3/8"	136-M	20.00
1P-45	1 1/2"	AM-336	20.00

\*—Can be used with adapters to fit other sizes of masts.

## BASE INSULATOR TYPE 2

Light design for up to 18' masts or longer lengths if guyed or supported with stand-off insulators. Brown glazed porcelain with galvanized malleable iron top post and base support cemented into insulator. Porcelain diameter 3 1/4". Height to top of porcelain 6". Flange diameter 3 1/4". Weight 4 pounds. Furnished complete with necessary mounting bolts and nuts.

### SPECIFICATIONS AND PRICES

No.	Diameter Top Post	Fits Antennas	List Each
2P-24*	3/4"	318-M, MM-425	\$5.50

\*—Can be used with adapters to fit other sizes of masts.

List Each \$5.50

## BASE INSULATOR TYPE 6

For marine, mobile unit, tower platform, roof-top, etc. Simple to install, neat and compact. Lead-thru construction permits antenna connections below deck. General construction sim. to Type 1. Flanges are 6" diameter with six bolt holes on 5" circle. Furnished with center stud and flange bolts for deck 1/2" to 3" thick. Total height above deck to base of post 4 1/2". Weight 11 1/2 lbs.

### SPECIFICATIONS AND PRICES

No.	Diameter Top Post	Fits Antenna	Galvanized	List Each
6P-24*	3/4"	318-M, MM-425	\$25.00	\$45.00
6P-26	1 1/8"	AM-124	25.00	45.00
6P-30	1 5/8"	224-M, MM-430, MM-435	25.00	45.00
6P-44*	1 3/8"	136-M	25.00	45.00
6P-45	1 1/2"	AM-336	25.00	45.00

\*—Can be used with adapters to fit other sizes of masts.

## ADAPTORS FOR BASE INSULATORS TYPES 1 AND 2

Short lengths of cadmium plated steel tubing fitted with connection clamp to permit use of standard Type 1, 2 or 6 Base Insulators with other sizes of tubular masts.

### SPECIFICATIONS AND PRICES

No.	Insulator No.	To Fit Antennas	Weight Each	List Each
A-20	1P-24, 2P-24, 6P-24	MM-313 or 5/8" O.D.	1/2 lb.	\$0.50
A-21	1P-24, 2P-24, 6P-24	112-M or 2 1/2" O.D.	1/2 lb.	0.50
A-24	1P-24, 2P-24, 6P-24	AM-518, MM-419, or 3/4" O.D.	1/2 lb.	0.50
A-40	1P-44, 6P-44	130-M or 1 1/4" O.D.	3/4 lb.	0.50
A-42	1P-44, 6P-44	AM-230, or 1 1/8" O.D.	3/4 lb.	0.50

## DECK BUSHING

Of brown-glazed porcelain cemented into hot galvanized malleable flange which bolts through rubber gasket to the deck or other surface. Provides additional support for antenna in lieu of guying.

### SPECIFICATIONS AND PRICES

No.	I.D.	Total Length	Above Deck	Flange Diameter	Weight Each	List Each
5D-24	3/4"	6"	3"	4"	2 lbs.	\$8.00
5D-40	1 1/2"	8"	4 1/2"	4 1/2"	3 1/2 lbs.	11.00
5D-56	1 3/4"	8 1/2"	4 1/2"	5 3/8"	4 1/2 lbs.	14.00

## WALL BRACKET

A heavy steel bracket designed for mounting Vertical Radiators on side walls, parapets or posts. Drilled to fit Premax Type 1 and Type 2 Base Insulators. Cadmium plated. Stand-off Type 3 or 4 suggested for use with this mounting, in order to give additional support.

No.	Weight	List Each
WB-1	7 lbs.	\$4.50

Insulator not included.

## WALL MOUNT INSULATOR

Firm, serviceable side mounting which fastens securely to wall or post. Brown-glaze porcelain insulator similar to Type 2. Metal parts hot galvanized malleable iron. Stand-off Insulator Type 3 or 4 suggested for use with this mounting.

No.	Post Diameter	Weight	List Each
2-WP	3/4"	5 lbs.	\$8.00

Type 3

## TYPE 3 INSULATORS

Heavy duty design for stand-off support of vertical antennas, etc., or for use in pairs as complete mounting of vertical or horizontal elements. Galvanized or brass fittings attached to threaded studs cemented in brown-glazed porcelain body. Porcelain 3" diameter. Height to top of porcelain 3". Weight 2 pounds each.

### SPECIFICATIONS AND PRICES

No.	Fits Tube O. D.	Galvanized	Polished Brass	Type 4
3S-16	1/2"	\$5.00	\$ 7.50	
3S-20	5/8"	5.00	7.50

3S-48	1 3/4"	5.00	10.00	
3S-52	1 7/8"	5.00	10.00	

## TYPE 4 INSULATORS

Similar in design to Type 3 but with double clamp. Top clamp sizes available in same range as Type 3. Bottom clamp made to fit all standard pipe sizes from 1/4" to 3". Available in galvanized or polished brass. Prices on request. State size of clamps desired, both top and bottom.

## TYPE 7 INSULATORS

A low-priced but substantial stand-off mounting with wide application. Galvanized malleable iron frame enclosing white porcelain split bushing. Height 6". Weight, each, 2 1/2 pounds.

### SPECIFICATIONS AND PRICES

No.	Fits Tube O. D.	List Price
7S-20	3/8"	\$3.00
7S-24	1/2"	3.00
7S-28	5/8"	3.00
7S-32	1"	3.00

## INSULATED MOUNTING CLAMP TYPE 8

A better-than-ordinary insulated mounting support for horizontal elements, verticals, etc., in many of the new arrays. Galvanized malleable iron frame with white porcelain split bushing. Overall width 3 1/2". Weight each, 1 pound.

No.	Fits Tube O. D.	List Price
8C-20	3/8"	\$2.00
8C-24	1/2"	2.00
8C-28	5/8"	2.00
8C-32	1"	2.00

(Other sizes available to order)

## INSULATED MOUNTING CLAMP TYPE 9

A simple, more compact mounting for horizontal elements, verticals, etc., as suggested for Type 8. Gray iron galvanized frame with white porcelain split bushing. Height to center 2". Weight each, 1 pound.

No.	Fits Tube O. D.	List Price
9C-20	3/8"	\$1.75
9C-24	1/2"	1.75
9C-28	5/8"	1.75
9C-32	1"	1.75

**PREMAX**

# POLICE ANTENNA — Receiving and Sending

Premax Police Antennas for police and commercial applications are of solid steel of extremely high carbon content, heat-treated and oil-tempered to carefully develop physical properties. Rods of varying diameters, cold-drawn to rigidly held tolerances, are joined securely and permanently into a single graduated length which provides high flexibility, minimum wind resistance and indefinite life. A cadmium plate finish of .001" minimum gives adequate protection against corrosion in all ordinary atmospheres, including marine or salt air exposures.

Where ordinary antennas bend or break under stress of striking tree branches, bridges, garage doors and similar obstructions, Premax Police Antennas merely flex under the stress and return immediately to normal position when the obstruction is passed. This eliminates the usual replacement costs and Premax Police Antennas may easily save their initial cost in a few months.

Premax Police Antennas are available with two styles of bases. Style A has a plain 1/4" end and fits Premax Mountings K, L, T, R and NA. Style B has a 7/16" threaded stud complete with hexagon nuts and lock washer and fits Premax Mountings G or N.

Due to the single piece construction, Premax Police Antenna Rods should be purchased in the nearest standard length for the desired frequency and then cut, if necessary, to the exact length required. Specific lengths can be supplied to order in reasonable quantities.

Premax Police Antenna Rods are also available in polished, hard-drawn Stainless Steel.

**TYPE N**

Bumper Mount is of heavy gauge steel with 1 1/4" high tension cone insulators. Fits Style B Rod. List, each . . . . \$4.50

**TYPE NA**

Adjustable Bumper Mount, otherwise similar to Type N but for Style A Rod. List, each \$5.50

**TYPE R**

Universal Adjustable Mount. Fits Style A Rod. List, each . . . . .

**TYPE L**

Is similar to Type K in adjusting feature. Has 6" spacing between insulators giving extra base support. Fits Style A Rod. List, each \$10.00

## ANTENNA MOUNTINGS

### TYPE TA

For attaching Type A Rod to trunk or car body. Lower support is solid brass rod securely jointed to 12" brass tube carrying antenna. Upper support is 24" brass rod and has adjustable lock permitting proper fitting to contour of car. All insulators are high-tension, white-glazed ceramic cones 1 1/4" high. Antenna tube provides maximum 10" adjustment in antenna height. All metal parts heavily cadmium plated List, each . . . . . \$15.00

**TYPE K**

Adjustable Bumper Mount, similar in design to Type NA but with longer socket tube which permits 10" adjustment in height of Style A Rod. List, each . . . . . \$6.50

**TYPE G**

Grounded Bumper Mount for Style B Rod for use on shunted or grounded systems. List each \$1.50

## PREMAX GROUND RODS FOR RADIO

Premax Ground Rods are made of copper plated or cadmium plated steel or copper-headed with bright steel shaft, in 3/8", 1/2", 5/8" and 3/4" diameters, and in 4', 5', 6' and 8' lengths. All rods have one end pointed for easy driving. They are made in four styles as illustrated: Style D with spring clamp; Style G with screw clamp; Style P with securely attached pigtail wire; Style H with drilled hole.

# TACO

ALL-WAVE  
SELF-SELECTING

# MASTER

ANTENNA  
SYSTEM

## TACO MASTER ROOF KIT

\*Cat. No. 340—For 1-25 outlets..... \$7.50

Consisting of:

- |  |  |
|--|--|
| 1 Transformer Unit (341)               | 1 Slewing                                |
| 1 16-ft. coil transmission cable (305) | 1 100-ft. 7/20 tinned copper aerial wire |
| 2 4" Navy Insulators                   | 1 25-ft. coil ground wire                |

## TACO HOME ROOF KIT

For a small apartment house or an individual home where a span of 65 feet is available. The antenna may be fully concealed in attic for maximum neatness of installation.

\*Cat. No. 342—For 1-8 outlets..... \$7.50

Consisting of:

- |  |  |
|--|--|
| 1 Transformer Unit (341)               | 2 50-ft. coils No. 14 tinned aerial wire |
| 1 16-ft. coil transmission cable (305) | 1 25-ft. coil ground wire                |
|  | 2 4" Navy Insulators                     |

\*No. 341—Transformer Unit only, incorporating the Underwriter's approved Lightning Arrestor..... \$3.50

The sensible and economical solution of the radio problem facing apartment houses, hotels, club houses, hospitals or private homes. One efficient aerial and transmission line carried down inconspicuously outside of building serves up to 25 sets. Each set connected through a coupler to the aerial. Eliminates usual jungle of unsightly poles, aerials and downleads constituting menace to life and property as well as an unsightly mess.

**EFFICIENCY** — TACO Master Antenna provides excellent broadcast, amateur and short-wave reception with modern all-wave sets. Matches all sets. Minimum background noise. The system covers all bands including the new FM band by the use of the proper coupler.

**SIMPLICITY**—All mysteries taken out of

installation work. Components available through the distributor in kit form. The Foundation Kit contains all parts necessary for the roof installation. Erect the TACO aerial as high as possible for best results and follow the instructions given in the specification booklet for a durable, successful installation. If additional information is desired we will gladly assist.

**LOW COST**—As inexpensive as efficient. Inconspicuous neutral tone transmission cable and neat exposed wiring outlets permit wiring any existing building. No objectionable wires. Nothing to mar inside or outside walls.

**SPECIFICATION DATA**—Complete specification data available in printed form giving full details both for layout as well as cost estimating.

## RECEIVER COUPLERS

The choice of Coupler depends on the frequency bands to be covered, the space available and the preference in Coupler finish. If only the Broadcast and S-W bands are required either Coupler may be used. If the new FM band is also desired use No. 343 Coupler.

\*No. 343 Coupler, FM and AM bands, for exposed wiring..... \$3.00

Coupler finished in baked IVORY. Bakelite terminal panel with screw posts for easy connections to radio set. Single hole mounting.

\*No. 344 Coupler, for exposed wiring..... \$2.50

Small, Neat, Finished in satin aluminum. Bakelite terminal panel with ANT. & GND. screw posts for radio set connections.

## ESSENTIAL TACO WIRING PARTS

Cat. No. 304—Aerial Wire 7/20 Tinned Copper Wire, per 80 ft..... \$2.25

Cat. No. 305—Transmission Line No. 18 Twisted-Pair Neutral Bufl-Covered, per 500-ft. roll..... 20.00

Cat. No. 306—Transmission Line No. 18 Twisted-Pair Black-Covered, per 500-ft. roll..... 20.00

Cat. No. 307—Solid knobs, white or brown, for supporting transmission cable. 100 to a carton. Per carton..... 4.00

Cat. No. 309—Double Lightning Arrestor, Underwriters Approved..... .75

Cat. No. 319—Heavy Duty, low-loss glazed porcelain insulators, 4" long, each..... .20

Cat. No. 330—Bracket for mounting Antenna Transformer..... 1.00

Cat. No. 186—Mast Bracket, for mounting 1" pipe mast. Complete with lag bolts, expansion shields, U-bolts, per pair..... 3.75

## TELEVISION AND FREQUENCY-MODULATION ANTENNAE

For the sure interception of F-M signals, a di-pole antenna similar to a television antenna is recommended. The installation of an F-M antenna is comparatively simple as reflections do not as a rule cause any noticeable interference with the reception.

For this reason, Reflectors are not required except in rare instances. However, the majority of the F-M receivers are also equipped for the reception of amplitude-modulated signals and therefore a transformer system is incorporated in some of our models to assure noise-free reception in the standard broadcast and short-wave bands.

The short rigid di-pole has the advantage over the longer wire antennae mentioned on the front page of this catalog in that it can more readily be erected much higher. A single mast is all that is required. It also has the advantage of being easily directed to intercept the favorite stations. With a long-wire antenna this cannot readily be accomplished, often resulting in a low signal strength on some weak station. Always erect the antenna as high as possible for best results.

The choice of the Antenna and the Transmission Line depends on the signal level in the area. If signal strength is low, use a rigid di-pole type antenna. If the length of the transmission line is over 60 ft. use the special No. 336 U-H-F transmission line.

### F-M ANTENNA SYSTEMS

\*No. 476-FM—Rigid di-pole Antenna using No. 480 and No. 218-FM transformers for coverage of broadcast and short wave bands in addition to the FM band. Complete with 60-ft. No. 152 transmission line..... \$14.50

\*No. 486-FM—Same as above, plus one 8-ft. wooden mast in two sections..... 17.50

\*No. 477-FM—Rigid di-pole Antenna, same as No. 476-FM, except using 60-ft. No. 336 U-H-F transmission line.....

\*No. 487-FM—Same as above, plus one 8-ft. wooden mast in two sections.....

\*No. 480—Antenna coupler with mounting bracket..... 3.50

\*No. 218-FM—Receiver Coupler, for connection of one additional receiver..... 3.25

\*No. 215-FM—Antenna, see front page..... 8.25

\*No. 225-FM—Antenna, see front page..... 8.00

### ACCESSORIES

No. 185—Television Mast, 10-ft. wood mast in two sections..... 2.75

No. 188—Galvanized 10-ft. iron mast in two sections.....

No. 186—Pipe Mast bracket, complete with expansion shields, lag bolts and "U" bolts, per pair..... 3.75

No. 152—Transmission line, 500-ft. rolls..... 30.00/M

### TELEVISION ANTENNAE

For the selection of the most suitable television antenna-reflector combination and for

No. 425—Featherweight Television Antenna complete with universal mounting brackets and 60-ft. transmission line..... \$8.75

No. 450—Featherweight Television Reflector for No. 425 or 426 Antenna, complete with crossarm..... 8.50

full detailed installation instructions see our special television catalog sheet.

No. 428—Double Di-pole Television Antenna complete with Reflectors and 60 ft. No. 152 transmission line..... \$33.00

### FM AND TELEVISION STORE DEMONSTRATION SYSTEM

The TACO Store Demonstration Antenna handles all wave bands from the Standard Broadcast band to the U-H-F FM bands with one antenna without any interaction between the sets. Full noise-reduction for all bands. No switching or fussing with connections after the set is once connected to the system. Each set requires its own No. 343 Master Coupler and six to eight sets may be operated from one antenna.

\*No. 481-FM — Di-pole Antenna, with No. 480 Transformer, 8-ft. mast, less wire..... \$13.50

\*No. 343 — Master Coupler, one used for each set connected to the system, each..... \$3.00

COMBINATIONS AND DETAILS OF FM AND TELEVISION ANTENNAE SHOWN IN SEPARATE CATALOGUE

## TACO DeLuxe Self-Selecting Antenna

The function of an efficient antenna is to bring to the receiver a clear signal free from all interference. This problem has taken on new importance with the introduction of the FM super-high-fidelity receivers as the antenna kits now have to cover a much wider frequency range without loss of fidelity. TACO engineers have solved this problem by introducing special iron dust core transformers into the circuits.

Each kit is designed to meet special requirements and each design is based on TACO's long experience in building high fidelity antennae with unexcelled noise reduction. Determine which type kit is needed to cover the range of the set and regardless of the kit selected you will get the finest instrument of its kind to feed the set the strongest and clearest signals even in locations heretofore considered hopeless for radio reception.

\*Cat. No. 215 TACO DeLuxe Antenna System. Uses No. 217 Set Transformer. Covers 150 kc - 25 mc.

\*Cat. No. 215-FM Antenna, covers FM and AM bands. Uses No. 218-FM Set transformer; 150 kc - 75 mc.

\*Cat. No. 200-V Antenna, especially designed for the short wave and broadcast bands.

\*Cat. No. 215L—DeLuxe Antenna, less Set Transformer. **\$5.50**

\*Cat. No. 216—TACO Antenna Transformer only. **2.75**

The array of electrically interconnected transformers automatically select the most efficient path for the signals and assure a perfect match to any radio set. A porcelain shell gives perfect weather-proofing and mechanical protection for the transformers. A 30-ft. - 30 ft. doublet aerial makes this kit easy to erect anywhere.

Separate terminals are available on the No. 218-FM set transformer for connection to the FM binding posts on the receiver.

The DeLuxe Antenna is complete, factory wired, soldered and tested under laboratory conditions, ready to be erected.

TACO DeLuxe Antenna is self-selecting and fully automatic and comparative tests indicate the greatest signal-to-noise ratio of any system on the market. Let your own test substantiate our claim.

**\$8.00**

**8.25**

**8.75**

\*Cat. No. 217—TACO Set Transformer only. **3.00**

\*Cat. No. 218-FM Set Transformer. Separate leads for the AM and FM bands. **3.25**

● **CONTENTS OF No. 215 KIT** ●  
No. 216 Antenna Transformer; No. 217 Set Transformer; 2-30 ft. coils Tinned Aerial Wire; 60 ft. Transmission Cable; 1 Screw Eye; 2 Nail Knobs; 2 Porcelain Aerial Insulators; Packed in Display Box with complete instructions.

● **CONTENTS OF No. 215-FM KIT** ●  
Same as above except using No. 218-FM Set Transformer. Separate leads for the FM and AM bands makes this kit adaptable to any type radio receiver.

For installations where a doublet is difficult to erect, this L-type kit with the transformer attached at one end of a 50-ft. aerial is the ideal solution. It covers the same frequency range as the kit above and has the same type iron core transformers guaranteeing the highest obtainable noise reduction.

Extensively used for homes where the transmission line must be inconspicuously arranged. The construction facilitates the grounding of the transformer unit for maximum noise reduction.

This TACO kit is Self-Selecting and with its durable porcelain shell assures a satisfactory trouble-free installation.

\*No. 225 Antenna, using 50-ft. aerial and 60-ft. trans. line. 150 kc - 25 mc. Uses No. 217 Set Transformer. **\$7.75**

\*No. 225-FM Antenna, covers FM and AM bands 150 kc - 75 mc. Uses No. 218-FM Set Transformer. **8.00**

\*No. 226 Antenna Transformer only. **2.75**

\*No. 217 Set Transformer only. **3.00**

\*No. 218-FM Set Transformer only. Separate leads for the AM and FM bands. **3.25**

Modern all-wave receivers are capable of reproducing the faintest radio signals brought to the receivers but to furnish an enjoyable program the signal must be free of outside interference.

The TACO Standard Antenna is designed to fulfill these requirements for the standard broadcast band as well as for the short-wave bands and the FM band.

This Antenna System with its weather-proof porcelain antenna unit housing matches all sets regardless of make or design. It is fully automatic, selecting the path of maximum efficiency for the different wave-bands. Iron cores assure the maximum signal transfer in all bands.

The simplicity of construction makes an installation possible where very limited space is available. For the best result the antenna proper should be erected on the roof out of the noise area.

**TACO No. 515 STANDARD ANTENNA**  
For the noise-free reception of standard broadcast and short wave bands.

**TACO No. 515-FM STANDARD ANTENNA**  
Covers all bands including the FM band with excellent clarity and fidelity.

● **CONTENTS OF No. 515 KIT** ●  
No. 516 Antenna Transformer; No. 517 Set Transformer; 2-30 ft. coils Aerial Wire; 60 ft. Transmission Cable; 1 Screw Eye; 2 Nail Knobs; 2 TACO Insulators; Attractively boxed complete with instructions.

● **CONTENTS OF No. 515-FM KIT** ●

\*No. 518-FM Set Transformer, FM and AM bands, separate leads for FM and AM. **2.25**

### CAT. No. 400 ALL-WAVE ANTENNA

The importance of a good antenna system for a modern radio set is generally underestimated. It is an integral part of a radio set and must be treated as such. For best results an antenna must be installed with the utmost care and the TACO No. 400 Antenna improves the all-wave reception in all locations.

This antenna is Self-Selecting, same as the higher priced TACO models. Easily erected in a very limited space on the roof. It is fool-proof and trouble-free—once erected—always functioning.

● **CONTENTS OF No. 400 KIT** ●  
No. 401 Transfer Unit; No. 402 Set Transformer; 2 30-ft. Coils Antenna Wire; 50-ft. Coil Transmission Cable; 1 Screw Eye; 2 Nail Knobs; 2 Porcelain Insulators. Attractively boxed with complete instructions.

\*Cat. No. 400 Kit. **\$4.50**

\*Cat. No. 402 Set Transformer. **1.50**

# RADIO INSULATORS

for

**BETTER RECEPTION - BETTER PROTECTION - BETTER TRANSMISSION**

The isolation of radio frequency currents and their confinement within definite circuits demand the use of non-conducting materials possessing an unusual combination of electrical and physical characteristics. Radio frequency currents tend to leak over to adjacent conductors, and materials which may offer a fairly effective barrier to the passage of currents of low frequency sometimes prove to be conductors, or at least inefficient insulators, at radio frequencies.

Essential properties for satisfactory radio insulation are low power loss, low surface conductivity, high electrical resistance, a hard smooth surface, stability against corrosive influences, and a high strength-to-weight ratio. These properties must remain permanent and unchanged by age, exposure to the elements, and the continued impact of radio energy.

Performance, which alone has won for PYREX Radio Insulators their present day supremacy, is the direct result of the inherent properties of the glass composition from which they are made. PYREX Radio Insulators are made of a material whose dielectric constant is 4.7 at 740,000 cycles, and whose power factor is 0.42% at 740,000 cycles. The surface conductivity is so low as to be practically negligible. The specific gravity is 2.23, so that in PYREX Radio Insulators the dual advantages of light weight and high electrical strength are combined.

The stability of PYREX Radio Insulators against corrosive influences renders them immune to the attack of acid fumes, smoke, fog and salt sprays. For this last reason, PYREX Insulators are widely used for marine communication systems.

PYREX Radio Insulators, because of their coefficient of expansion of 0.000032 between 19 deg. C. and 350 deg. C., are indifferent to heat shock and abrupt temperature changes. Tropical sunshine does not create strains within them. The sudden chill of a summer hailstorm does not affect them.

PYREX Insulators have played their part in many spectacular examples of extreme service. They have been with Commander Byrd at the North and South Poles. They were an important part of the radio equipment of the Louise A. Boyd and the MacGregor Arctic expeditions. The Atlantic Ice Patrol sends warnings of icebergs over antennae equipped with PYREX Radio Insulators. They are used by the United States Army Signal Corps, the Coast Guard, the Navy, and the Lighthouse Service. On your own equipment they will perform the same duties and provide the same unflinching service.

## PYREX ENTERING INSULATORS

67115-67116

### Amateur Type

Here are practical, convenient lead-in Insulators designed specifically for amateur use. The bowls are made of PYREX brand Electrical Glass which possesses high dielectric strength and low power loss. They will give clearer signals and better operation, particularly under adverse conditions. The flanges on these bowls are wide and flat, bringing a large enough surface in contact with the wall to minimize slipping. The ruggedness of the bowls together with the rubber gaskets permits a water-tight, permanent installation. The rods are threaded except for 2 1/2" in the center. All sizes are supplied with four brass jamb nuts, two brass washers, two rubber washers and two rubber gaskets.

67104-67105

67056-61

### Airplane Type

67056-88—Glass Bowl only, clear or opaque.\*  
 67075—Two 67056 Bowls with Brass Fittings but no guides. Has solid brass rod 1/4" diameter, 5 1/4" long.  
 67079—Two 67056 Bowls with Brass Fittings and guides. Has low brass rod 3/8" diameter, 6 1/2".  
 67056-61—One 67056 Bowl with Brass Fittings, as illustrated.

## PYREX ENTERING INSULATORS

### Navy Type

B-67071

Both types have flanges 8 3/4" in diameter with six 1/2" studs equidistantly spaced on 7 3/4" bolt circle and are approximately 6" high from bottom of lower flange to top of center pin. Center pin is 3/8" in diameter with 16 threads per inch at the ends.

Style B has studs 1 1/8" long and in the bottom flange three equidistantly spaced countersunk 1/4" holes on 7 3/4" center circle.

Style C is furnished with a template ring 1/8" thick for locating mounting holes for the 2 1/8" studs. This template can also be used as a backing ring or washer.

Both styles have two 3/8" jamb nuts for the lower end of the center pin and Style C has two 1/2" jamb nuts for each stud.

The 11 1/2" center pin is standard for both assemblies but any other length rod can be furnished at extra cost.

## MUELLER BATTERY AND TEST CLIPS

U.S. PATENTS: 1,521,903; 1,686,842; 1,779,442; 1,965,151; 1,994,251; 1,999,613

For use in making quick, temporary electrical connections. Packed 10 in a box, half marked + half plain to indicate polarity. Screw connections

### No. 45 PEE WEE

A very small test clip for radio, ignition, meter and similar work. 1 1/2" long. Jaw spread 3/8". Steel, bright finish.

EACH NET ..... \$0.05    LOTS OF 10 ..... \$0.033  
Use No. 47 Insulator

### No. 48-B TEST AND BATTERY CLIP

A small test and battery clip for radio use and general testing purposes. 2" long. Jaw spread 5/8". Steel, bright finish.

EACH NET ..... \$0.05    LOTS OF 10 ..... \$0.035  
No. 48C—Solid Copper. Same size as 48-B.  
EACH NET ..... \$0.10    LOTS OF 10 ..... \$0.07  
Use No. 49 Insulator for Clips 48-B and 48-C.

### No. 27

A high grade test clip with meshing teeth on three sides of jaws. For laboratory and shop test work. 2 1/2" long. Jaw spread 3/4". Steel, bright finish.

EACH NET ..... \$0.10    LOTS OF 10 ..... \$0.07  
No. 27-C—Solid copper. Same size as No. 27.  
EACH NET ..... \$0.17    LOTS OF 10 ..... \$0.12  
Use No. 29 Insulator for clips 27 and 27-C.

### No. 24-A

A medium sized battery clip. Stands erect on battery post. Lead coated, copper shunt protects spring. 2 7/8" long. Jaw spread 1". Steel, lead plated.

EACH NET ..... \$0.10    LOTS OF 10 ..... \$0.07  
No. 24—Solid copper. Same size as No. 24-A.  
EACH NET ..... \$0.20    LOTS OF 10 ..... \$0.14  
Use No. 26 Insulator for Clips 24-A and 24.

### LARGER SIZES OF CLIPS

	Each Net	Lots of 10
No. 21-A—Heavy Duty Steel, lead plated, 4" long	\$0.17	\$0.12
No. 11A—100 Amp. Steel, lead plated. 6" long	0.60	0.42
No. 11—200 Amp. Solid copper. 6" long	1.00	0.70
No. 33—300 Amp. Solid copper. 7 3/4" long	1.80	1.25

(Above furnished with lug connections.)

### RUBBER INSULATORS FOR CLIPS

A convenient protection against short circuit and electric shock. Packed 10 in a box, 5 red and 5 black to indicate polarity. Long tail prevents breakage of wire. Constructed so that clip is held in firmly.

Insulator No.	For Use with Clip No.	Each Net	Lots of 10
13	11, 11-A	\$0.52	\$0.36
23	21, 21-A	0.33	0.23
26	24, 24-A	0.19	0.13
29	27, 27-C	0.12	0.084
35	33	0.82	0.58
47	45, 45-C	0.08	0.056
49	48-B, 48-C	0.09	0.06
87	85	0.06	0.037
93	88	0.05	0.035

### CROCODILE CLIPS

U.S. Patent No. 1,999,613

No. 85 Clip with No. 87 Insulator

No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Teeth really mesh. Screw connection. 2 3/4" long.  
EACH NET ..... \$0.07    LOTS OF 10 ..... \$0.045  
No. 85-T—New Crocodile "Tip-Clip"—equipped with standard pin tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removable heads.  
EACH NET ..... \$0.14    LOTS OF 10 ..... \$0.095  
Use No. 87 Insulators for either clip. Red and Black. Cover entire clip except nose. Protects against short and shock. Helps to distinguish leads.

### ALLIGATOR CLIPS

#### No. 60—CONVENTIONAL TYPE

Accurately made, slim jaws, fine meshing teeth. Convenient, round thumb grip, screw connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Bright, non-corrosive finish. 2" long.

EACH NET ..... \$0.05    LOTS OF 10 ..... \$0.35

#### No. 60-S—SCREW CONNECTION

Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET ..... \$0.06    LOTS OF 10 ..... \$0.04

#### No. 60-CS—NEW COPPER R.F. ALLIGATOR CLIP

Same as No. 60 except made of solid copper. Has phosphor bronze spring and brass screw connection. Ideal for R.F. work. Will not heat up in H.F. circuits. Bright, natural copper finish. 2" long.

EACH NET ..... \$0.10    LOTS OF 10 ..... \$0.07

#### No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60 except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Bright, attractive finish. 2 1/4" long.

EACH NET ..... \$0.12    LOTS OF 10 ..... \$0.085

#### No. 60-CHS—COPPER ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-CS except equipped with red and black insulating sleeves on end. Entirely non-ferrous with brass screw connection, for H.F. work. 2 1/4" long.

EACH NET ..... \$0.17    LOTS OF 10 ..... \$0.12

### WEE-PEE-WEE No. 88

Entirely Non-ferrous. Smaller Than Ever! An extremely small clip for fine testing in radio and electrical work. Light-Weight; thin-nosed; spring-temper phosphor bronze. Ideal for close-wound coils. 1 1/8" long; jaw spread 1/4".

EACH NET ..... \$0.09    LOTS OF 10 ..... \$0.06

No. 93—Fiber-glas Insulators for No. 88 Clip.

EACH NET ..... \$0.05    LOTS OF 10 ..... \$0.035

### No. 45-C SOLID COPPER TEST CLIP

Solid copper radio frequency test clip. Phosphor bronze spring, brass screw. Will not heat up in high frequency test work, entirely non-ferrous.

EACH NET ..... \$0.08    LOTS OF 10 ..... \$0.055

No. 45-C Clip No. 47 Insulator

Use No. 47 Insulator.

### CLAMPIPE GROUND CLAMP

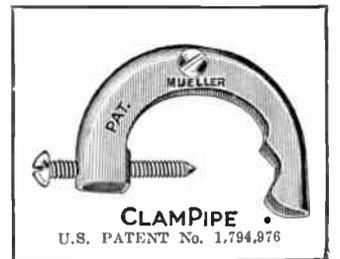

The exclusive patented feature of a U-shaped cross section in combination with a U-shaped clamp gives a rigidity and effectiveness that cannot be found in any other make.

The ClampPipe will not bend or lop over when applied to a pipe. The point of the large case hardened screw, cuts through rust, paint or corrosion into clean, fresh metal, insuring a good contact. The Clamp may be installed on a pipe lying flush against a wall. Will not spread open.

The best ground clamp value on the market. Applicable to pipe 3/8" to 1 1/2" outside diameter.

Packed 10 in a box

EACH NET ..... \$0.09    LOTS OF 10 ..... \$0.06

No. 58

CLAMPIPE  
U.S. PATENT No. 1,794,976

# Mueller Electric Co.

## THE SNAPPER

A Long Insulated Test Clip and  
A "Triple Threat" Radio Tool

U. S. Patent No. 2,074,324  
No. 99—7" Long Insulated

The long tube is of insulating material and is fitted with spring contact jaws on the far end. The jaws are operated by a push of the thumb on the near end. Wire is quickly and easily connected in a hole in the insulator knob binding post on the near end.

May be used as (1) A "Deep Sea" Electric Test Clip—test contacts with ease, deep in the recesses of radio chassis with no danger of short circuits; (2) An Electric Contact Prod—clip jaws may be used to make quick prod contacts, or clip one Snapper on ground circuit and prod with another; (3) A Retriever—start small screws and nuts or pick up odds and ends that may accidentally be dropped into inaccessible places.

Snappers are generally used in pairs—1 red and 1 black.

## INSULATED GRID CLIP ASSEMBLY

One Universal Clip That Fits Them All  
This assembly is made up of a Pee-Wee Clip with jaws specially constructed to give a firm grip on all sizes of grid caps, a rubber insulator over the clip, 10 inches of flexible, rubber-covered wire and a standard phone tip.

FEATURES: ● Will Never Weaken or Break ● Bull-Dog Grip—in either vertical or horizontal position, will not come off cap no matter how hard tube is pounded. ● Will Not Injure or Break Grid Cap—if clip itself is struck accidentally it will pull loose without damaging cap. ● Wire Will Not Pull Loose from Clip—soldered connection at both ends. ● Quick and Easy Application—fits all sizes of grid caps. No. 106—Insulated Grid Clip Assembly

## Dry Disc Rectifiers Battery Chargers

### REPLACEMENT RECTIFIERS

● Ask your distributor, or write for technical bulletin Form R-615 on copper sulphide rectifiers.

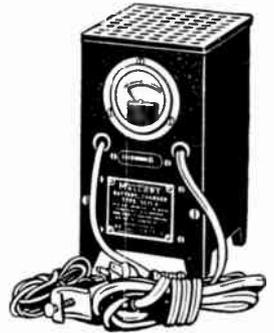

### BATTERY CHARGERS AND BOOSTERS

● Mallory Chargers and Boosters provide a simple, economical and dependable method of charging 6-volt storage batteries. They are designed to operate from 115 volts, 50-60 cycles, and to automatically provide a tapering charge; that is, a high charging rate into a discharged battery, the rate gradually decreasing as the battery becomes charged and a safe charging rate when the battery is fully charged.

Although designed especially for battery charging, Mallory Chargers and Boosters may be used for a wide variety of other applications, such as: electroplating, toy and model train operation, with or without a Mallory dry electrolytic condenser in shunt with the D.C. terminals of the rectifiers, in combination with a filter for operating loud speaker fields, as a dry battery substitute for operating coin machines, relays, solenoids, door bells, scientific apparatus, small generator and alternator fields and other applications requiring a low voltage direct current. Supplied complete with dash receptacle for easy attachment.

### AVIATION BATTERY CHARGERS

● Mallory aviation rectifier battery chargers have been designed and developed to answer the need for a practical and economical unit to charge 12 and 24 volt aircraft batteries and battery carts.

Featuring a tapering charge, these units supply a high charging rate for a discharged battery with a gradually decreasing rate as the battery becomes charged.

Mallory aircraft battery chargers employ the "tried and proven" Mallory magnesium-copper sulfide dry disc method of rectification. This method eliminates all moving parts and assures long life and dependability.

 VA4500 208 or 230 V. 3 phase 60 cycle  
 VA4500-A 460 V. 3 phase 60 cycle  
 DC Output for Both Types: 300 amps. to 10-16 volts or 150 amps. at 20-32 volts.

## MALLORY PORTABLE RECTOPOWER\*\*

The portable rectopower requires no special foundation, but may be rolled easily about the laboratory or assembly floor to the exact spots where it can be used most conveniently. Radio transmitters and receivers, and other electric and electronic equipment, may be tested while in the process of manufacture or after being installed.

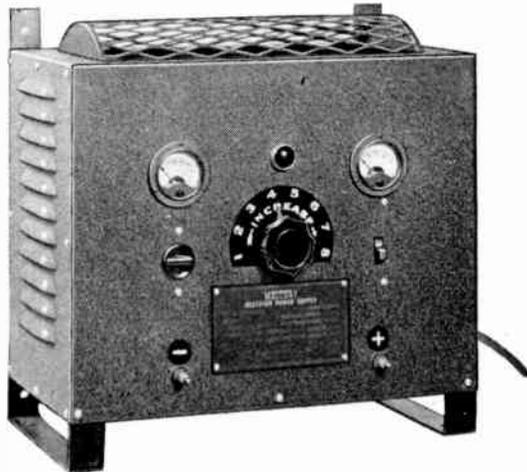

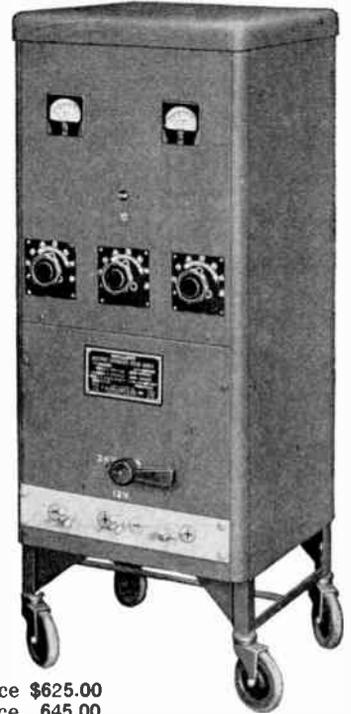

Rectopowers have variable voltage output to simulate actual operation under different conditions, good regulation, and low ripple characteristics—3% at full load, lower at light loads. Circuits are arranged to deliver both 12 and 24 volts simultaneously. A DC contactor prevents discharge of battery if AC starting switch is open when unit is used as a battery charger or in parallel with a battery for precision regulation.

Quiet operation—rectification provided by famous Mallory magnesium-copper sulphide rectifiers. Made in three types, and designed to operate from 208 and 230-volt or 460-volt, 3 phase, 60 cycle source.

## STATIONARY RECTOPOWER\*\*

Eight Rated Capacities . . . from . . .  
 6 to 32 Volts DC and 10 to 25 Amperes

A compact, heavy-duty Mallory Dry Disc Rectifier that furnishes constant and adequate AC power. The unit is particularly suited for testing and repairing electrical communications and electronic equipment in all applications employing voltage within specified ranges.

May also be used for the economical and efficient taper charging of batteries.

Requires no special foundation; may be quickly and easily mounted on wall or bench for the most convenient location.

Featuring a variable voltage output to simulate actual operation under different conditions, the power supply has low ripple characteristics—3% at full load, lower at light load. Send for catalog sheet R-659-A.

# Vibrapacks\*

P. R. MALLORY & CO. Inc.  
**MALLORY**

\*Reg. U. S. Pat. Off.

● Vibrapacks are flexible, HEAVY-DUTY vibrator power supplies designed for providing dependable and low cost high voltage direct current from a low voltage storage battery. Proved efficient and dependable by more than seven years of actual field service. Available in various types and sizes, with outputs up to 60 watts at 300 and 400 volts.

### Outstanding Advantages:

1. High efficiency—low battery drain.
2. Dependable—trouble free—time-tested in thousands of installations.
3. Low cost—low maintenance.
4. Compact—light in weight.
5. Ease of installation.
6. Flexibility. Single unit Vibrapacks can be adjusted to give 4 output voltage ranges each.

### Applications

Vibrapacks are widely used for furnishing "B" power in the following applications:

- Automobile receivers—police, sheriff, amateur short wave, etc.
- Aircraft and marine receivers and transmitters.
- Farm receivers.
- Police mobile two-way equipment.
- Automobile P. A. systems.
- Military, lighthouse, and forestry service radio communication apparatus.
- Miscellaneous electronic applications where commercial power is unavailable.

TYPE  
VP-552

TYPE  
VP-554

TYPE  
VP-557

Vibrapacks are equipped with complete, built-in noise suppression equipment. Type VP-555 also includes an efficient low-frequency hum filter. Type VP-557 incorporates the first input filter condenser only. Other Vibrapacks do not include the high voltage hum filter. High voltage filter requirements are similar to equivalent AC power packs.

Manufactured and sold under one or more of the following United States Letters Patent:

No. 1,943,240	No. 2,032,424	No. 2,030,957
No. 2,049,310	No. 2,186,638	No. 2,187,950
No. 2,190,685	No. 2,197,607	No. 2,223,516
No. 2,223,573 et al.		

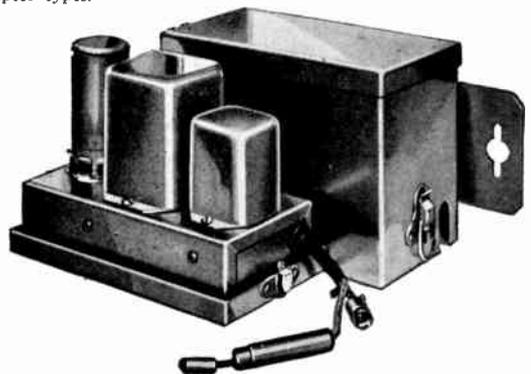

### VF-223 Filter

● A complete audio filter system for use with all single-unit Vibrapacks. Designed to give maximum suppression of hum with minimum voltage drop. Especially recommended for applications which are sensitive to hum, or where voltage regulation is important as in Class "B" audio amplifiers.

No. VF-223 Filter. List price.....\$8.00

VP-F558	32.	225-250-275-300	100 ma.	Tube-Rectifying	21.50

\*Special Dual Packs for high output. Tube rectifier types permit "B—" to be isolated from ground if desired. Output voltages indicated are nominal. Actual average output voltages at various loads will be found in the graphs of our Form No. E-555C, when operated at rated terminal voltage. Vibrapacks are supplied complete with special Mallory vibrator. Rectifier tubes included in the interrupter types.

### VP-540 Vibrapack—Completely filtered

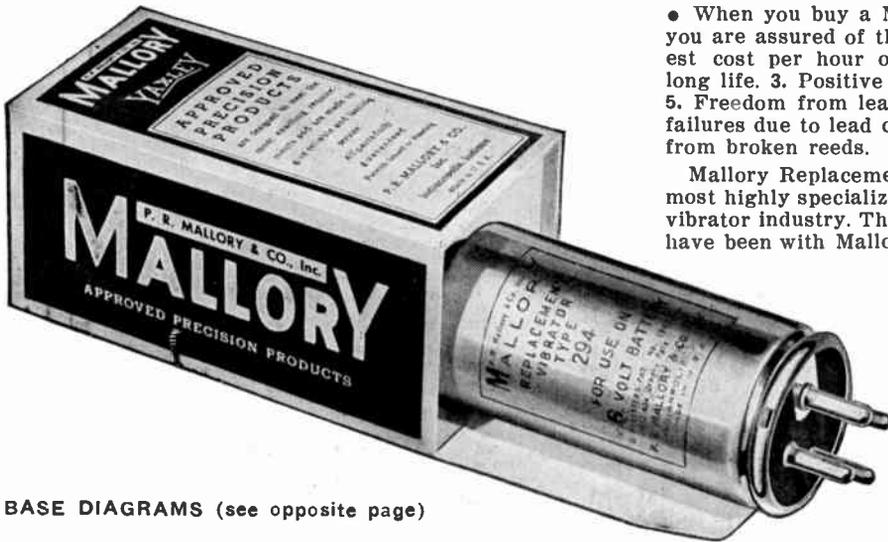

● Designed for use as a complete "B" power unit for automobile, airplane, and marine service. May be used to operate long wave, broadcast-band, and short wave receivers, or any electronic device within its load capabilities. Rigid anchorage of components permits satisfactory operation under conditions of considerable vibration. Completely filtered for both RF and audio so that the hum and hash level is extremely low.

Universal mounting, any position, with horizontal preferred. VP-540 is of the synchronous, or self-rectifying type. Nominal output, 250 volts at 60 m.a. Nominal input, 6.3 volts. Size 7 1/2 x 3 1/4 x 5 1/4" high, exclusive of mounting brackets and leads. Weight, 7 lbs., 14 oz.

No. VP-540 Vibrapack. List price.....\$22.50

# P. R. MALLORY & CO. Inc. MALLORY

# Vibrators

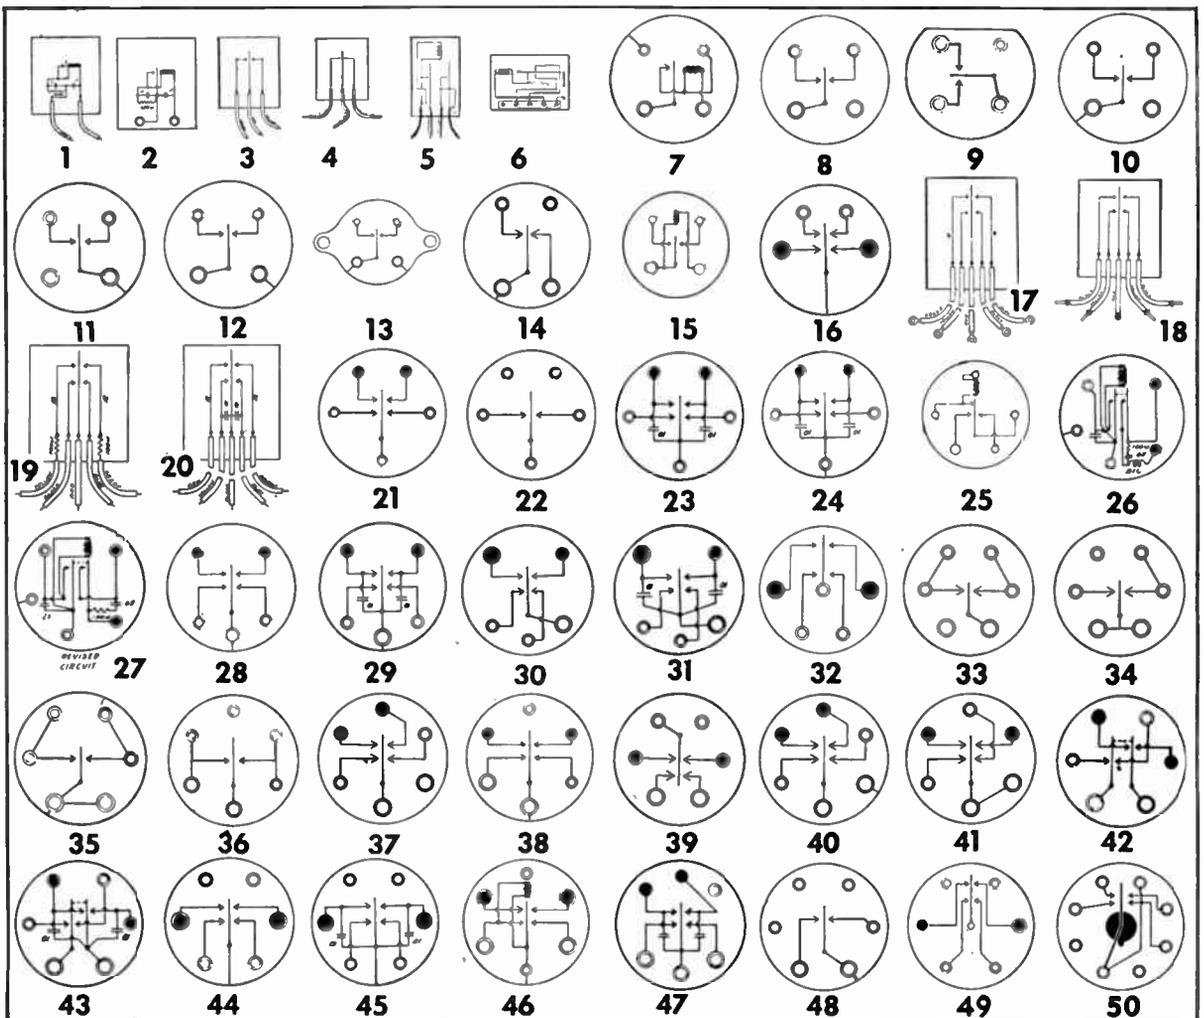

• When you buy a Mallory Replacement Vibrator you are assured of the following benefits: 1. Lowest cost per hour of actual use. 2. Trouble-free long life. 3. Positive starting. 4. Easy installation. 5. Freedom from lead breakage. 6. Freedom from failures due to lead corrosion. 7. Absolute freedom from broken reeds.

Mallory Replacement Vibrators are built by the most highly specialized group of technicians in the vibrator industry. The majority of these employees have been with Mallory since the beginning of the vibrator industry. Such a highly trained personnel can only assure the highest quality of workmanship possible.

For recommendations by receiver make and model number, see your distributor for the Mallory Vibrator Guide or consult the Mallory Radio Service Encyclopedia.

\*Requires Special Cup Adapter. Supplied at \$1.20 list.  
 †CAUTION! If the vibrator being replaced in one of these radio sets is a DeVry Carbon Point Vibrator, it will be necessary to replace the power transformer with one of a later type. This transformer is available from the Radio Set Manufacturer.  
 ‡Buffer capacity value must be changed to .015 mfd.  
 †Transfer plus from original vibrator.  
 The prefix letter "F" designates Vibrator designed for 32-volt Service.  
 The prefix letter "G" designates Vibrator designed for 12-volt Service.

## DC TO AC POWER CONVERSION

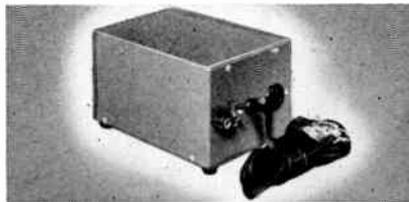

*For* **EFFICIENCY  
ECONOMY  
SERVICE**

Changing the characteristics of electric power is the job of E-L Vibrator Power Supplies. Available for applications up to 1500 watts, they have established an outstanding record of efficiency and economy in accomplishing these basic power conversions: Inverters for changing direct current to alternating current; Rectifier Packs for changing alternating current to direct current; Converters for increasing or decreasing DC voltages as desired, and Frequency Changers for changing frequency of alternating current.

E-L Vibrator Inverters have been designed to make possible the operation of standard 115-volt AC equipment and appliances from various DC voltages. Offered in an extensive line of standard models, there is an E-L Inverter for every popular application, such as the operation of radio receivers and transmitters, public address systems, intercommunication systems, coin-operated equipment, motors, electrical appliances, refrigerators, etc.

**434** A standard E-L vibrator inverter operating on 230 volts DC for radio receivers and transmitters and general purpose use. Input: 230 volts DC; Output: 115 volts AC; Output power: 350 watts; Dimensions:  $10\frac{3}{4}$ " x  $7\frac{1}{2}$ " x  $8\frac{1}{4}$ "; Weight: 24 pounds.

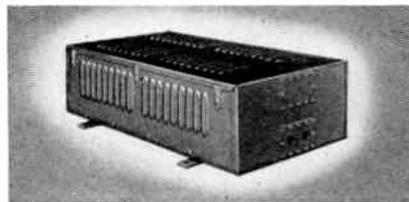

**303** A standard E-L vibrator inverter operating on 6 volts DC for powering electric motors and appliances. Input: 6 volts DC; Output: 115 volts AC; Output power: 25 watts; Dimensions:  $7\frac{1}{8}$ " x  $4\frac{1}{4}$ " x  $5\frac{1}{4}$ "; Wt.: 6 lbs.

**502** A typical E-L standard vibrator inverter operating on 12 volts DC for powering radio receivers and electric appliances. Input: 12 volts DC; Output: 115 volts AC; Output power: 100 watts; Dimensions:  $9\frac{3}{8}$ " x  $6\frac{3}{8}$ " x  $4\frac{7}{8}$ "; Weight:  $14\frac{1}{2}$  pounds.

**146** A standard E-L vibrator inverter operating on 32 volts DC for powering radio receivers and transmitters, coin phonographs and other equipment which demands 350 watts power. Input: 32 volts DC; Output: 115 volts AC; Output power: 350 watts; Dimensions:  $16$ " x  $10$ " x  $8\frac{3}{8}$ "; Weight: 48 pounds.

**269** A heavy-duty standard E-L vibrator inverter with output power of 1000 watts operating on 115 volts DC for powering radio transmitters, electric motors and appliances. Input: 115 volts DC; Output: 115 volts AC; Output power: 1000 watts; Dimensions:  $25\frac{1}{4}$ " x  $17\frac{1}{2}$ " x  $8\frac{3}{8}$ "; Weight: 120 pounds.

## VIBRATOR CONVERTERS RECTIFIER PACKS FREQUENCY CHANGERS

**601** A typical standard vibrator converter for power pack use. Input: 6 volts DC; Output: 300 volts DC; Output power: 30 watts; Dimensions: 4 $\frac{1}{4}$ " x 4" x 6"; Weight: 6 pounds.

**619** A typical E-L standard vibrator converter for transmitter application. Input: 6 volt DC and 115 volt AC; Output: 300 volts DC; Output power: 60 watts; Dimensions: 9 $\frac{1}{4}$ " x 5 $\frac{1}{4}$ " x 6"; Weight: 14 $\frac{1}{2}$  pounds.

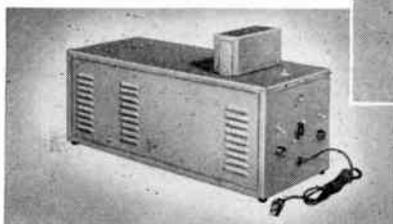

E-L Vibrator Converters have been designed to make possible the operation of equipment requiring high DC voltages from 6, 12 or 24 volt storage batteries. Offered in an extensive line of models, there is a Standard E-L Converter for every popular application, including the provision of plate and grid supply of radio receivers and transmitters in stationary, portable, or mobile applications, public address systems, communications equipment, electrical and electronic test equipment, and the like.

### RECTIFIER PACKS

The rectifier pack is a power supply with an AC input and DC output, and is useful in electrical and electronic laboratories as well as in radio service shops.

### FREQUENCY CHANGERS

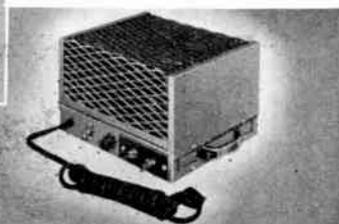

A frequency changer is a vibrator power supply with an AC input of one frequency, and an AC output of a different frequency. This makes possible the use of standard 110 volt 60 cycle AC equipment, such as amplifiers, public address systems, etc. from 110 volt AC of different frequency.

**801** A typical standard E-L frequency changer. Input: 115 volts AC, 25 cycle; Output: 115 volts AC, 60 cycle; Output power: 100 watts; Dimensions: 19 $\frac{3}{8}$ " x 8 $\frac{1}{4}$ " x 10"; Weight: 29 pounds.

**618** A standard E-L vibrator converter with tapped output for transmitter application. Input: 12 volts DC; Output: 600 volts DC; Output power: 200 watts; Dimensions: 11 $\frac{1}{4}$ " x 6 $\frac{1}{4}$ " x 7 $\frac{1}{16}$ "; Weight: 25 $\frac{1}{2}$  lbs.

**902** An E-L Rectifier Pack. This model may be used as a battery charger. Input: 115 volts AC; Output 6 volts DC; Output power: 60 watts; Dimensions: 9" x 8 $\frac{7}{8}$ " x 5 $\frac{1}{2}$ "; Weight: 19 pounds.

# VIBRATORS

## GIVE OUTSTANDING PERFORMANCE

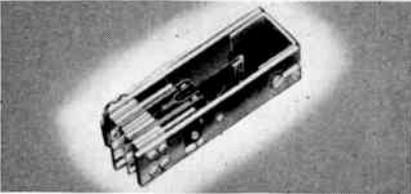

The E-L vibrator is the heart of ELECTRONIC's power supplies. It is the most efficient and flexible means yet found to change DC to AC. The new line of Low and Medium-Power Vibrators brings you, for the first time, 180 cycle vibrators, as well as conventional 115 cycle types. The new E-L high-frequency vibrator, plus many improvements in the 115 cycle type, represent the first important advances in the mechanical structure of small vibrators made anywhere in the last ten years. High-Power Vibrators are also available in 60, 100 and 115 cycle types. Electronic Laboratories has designed an extensive line of vibrators which meet all the standard power supply applications with complete satisfaction. These vibrators have been carefully engineered, sturdily built and mean substantial savings in size, weight, quantity and cost of components in the associated transformer and filter systems.

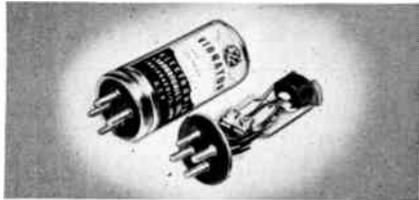

*Typical E-L Tandem Type Vibrator. Maximum input wattage 1000 watts at 110 volts in an approved circuit; average life is 1500 hours. Standard frequencies 60, 100 and 120 cycles.*

*Typical Tandem Type Vibrator shown enclosed in rectangular container; have rubber shock or rubber envelope type mounts.*

*Typical E-L Converter Type Vibrator: Generally enclosed in plug-in rectangular container. Maximum input wattage is 250 watts; average life is 1000 hours. Standard frequencies are 60, 100 and 120 cycles.*

*115 and 180 Cycle Low-Power Vibrator. Are generally enclosed in can; have maximum input of 75 watts and average life of 750-1000 hours.*

*Sponge rubber envelope mounting which cushions the high-power vibrator against shock. This mounting and the rubber shock mounts are used in the plug-in rectangular container.*

*Rubber shock mount for high-power vibrators. Low-power vibrators are mounted in the conventional rubber sock.*

*Electronic*

Insist on ATR Vibrators –  
*The Best by Test*

Write for Literature

ATR Vibrators, the heart of vibrator-operated power supplies, are proven units of the highest quality, engineered to perfection. They are backed by more than twelve years of vibrator design and research, development and manufacturing — ATR pioneered in the vibrator field.

# ● ATR INVERTER VIBRATORS

ATR Vibrators, the heart of vibrator-operated power supplies, are proven units of the highest quality, engineered to perfection. They are backed by more than twelve years of vibrator design and research, development and manufacturing—ATR pioneered in the vibrator field.

ATR Inverter Vibrators incorporate the following features:

- Large Oversized  $\frac{1}{4}$ " Diameter Tungsten Contacts having Full Wiping Action—for greater reliability and longer life.
- Highest Quality Spring Steel Reed—for uniform flexibility and prevention of reed breakage.
- Highly Efficient Magnetic Circuit with Formed Base—for greater accuracy and more uniform operation on both high and low voltages.
- Mica and Metal Stack Spacers with Bolted Stack Construction—for adjustment permanency under any operating condition.
- Highest Precision Construction and Workmanship—practically all parts used are held to within a tolerance of 0.0005 of an inch.
- When Ordering ATR Inverter Vibrators for replacement be sure to mention the type number, model number, and serial number of the ATR Inverter for which it is intended. Consult the ATR Inverter Vibrator Guide.

# ● ATR Low Power INVERTERS

Model  
LIB

For Operating Small A. C. Motors, Electric Razors, and Devices of Approximately 35 watts Consumption from 6, 12, 24, 32, 110, and 220 volt D. C. Lines.

This line of ATR Low Power Inverters was specially brought out to meet the insistent demand for a good, low power, inexpensive portable Inverter for operating phonograph and other A. C. motors and a host of small A. C. devices from D. C. voltage sources. These Inverters operate at an efficiency in excess of 90% and are designed for operation of loads having a power factor as low as 60%. They are ruggedly built and powered by a special ATR six-contact plug-in Inverter Vibrator utilizing four 1/4" diameter tungsten power contacts and two silver alloy driver contacts.

Illustrating all ATR Low Power Inverters except Types 6 and 12.

Type	Input D. C. volts	A.C. Output 60 cycles	Wattage		Code Word	List Price
			Intermittent	Continuous		
6	6	110 volts	50	35	ALIBM	\$18.50
12	12	110	50	35	BLIBN	18.50
24	24	110	50	35	FLIBR	22.00
32	32	110	50	35	CLIBO	22.00
110	110	110	75	35	DLIBP	19.50
220	220	110	75	35	ELIBQ	19.50

Radio frequency interference not suppressed. Built-in filter model available, \$6.95 additional.

Any of the above type Low Power Inverters are available with 220 volt A. C. output at prices 5% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Low Power Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "DLIBT".

Dimensions, 5 3/4"x4-3/16"x5 3/8"; shipping weight, 7 lbs.

Replacement Vibrators for any of the above Low Power Inverters are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.

Illustrating Types 6 and 12 Low Power Inverters only.

# ● ATR SHAVERPACKS

Model  
SPB

Specially Designed for Operating A. C. Razors from 6, 12, 32, 110, and 220 volt D. C. Lines. May Also be Used for Other Small A. C. Devices.

ATR Shaverpacks are midget D.C.-A.C. Inverters designed especially for the operation of A. C. razors in the car (6-volt type), on buses or aeroplanes (12-volt type), on trains (32-volt type), on boats, in hotels, and D. C. districts (110- and 220-volt types). They are ideally suitable for traveling salesmen, sportsmen, and all owners of electric shavers. By the use of ATR Shaverpacks with standard A. C. razors, electric razor operation can be had anywhere! ATR Shaverpacks deliver 60 cycle A. C. current so necessary for electric razor operation and utilize a new ATR type of six contact Vibrator construction having four 3/16" diameter tungsten power contacts and two silver alloy driver contacts, which unit will give many years of satisfactory service and outlast the electric razor.

Illustrating all type ATR Shaverpacks except Types 6 and 12.

TYPE	Input D. C. volts	A.C. Output 60 cycles	Wattage Output	Code Word	List Price
6	6	110 volts	15 watts	ASBPC	\$14.95
12	12	110	15	BSPBD	14.95
32	32	110	15	CSPBE	18.00
110	110	110	15	DSPBF	15.95
220	220	110	15	ESBPG	15.95

Radio frequency interference not suppressed.

The above Shaverpack types are also available with an output voltage of 220 volts A. C. at prices 15% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Shaverpack having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "DSPBT". ATR Shaverpacks are housed in metal cabinets having an attractive black-wrinkled finish, which is standard. Dimensions, 4 1/4"x3 1/2"x2 3/8"; shipping weight, 3 lbs.

Replacement Vibrators for any of the above Shaverpack types are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.

Illustrating Types 6 and 12 ATR Shaverpacks, fitted with receptacle (for dash mounting), which attaches direct to battery.

# ● ATR STANDARD AND HEAVY DUTY RADIO INVERTERS

Model RSB (Standard)  
Model RHB (Heavy Duty)

Specially Designed for Operating A. C. Radios, Battle Announce Systems, Television Sets, Amplifiers, Intercall Systems, and Radio Test Equipment from D. C. Voltages in Vehicles, Ships, Trains, Planes, and in D. C. Districts.

Illustrating all Standard Types ATR Radio Inverters except Types 6 and 12. For Heavy Duty Styles—see cut below.

This group of ATR Inverters is especially recommended for use with A. C. radios, amplifiers, and similar electronic equipment, being exceptionally well filtered to insure interference-free all-wave radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life radio operation. All models indicated are equipped with an ATR ten-contact plug-in Inverter Vibrator of new design and construction having dual arms and utilizing eight 1/4" diameter tungsten power contacts and two silver alloy driver contacts, insuring increased long life and reliable service. These Inverters also come equipped with four point voltage regulators, which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal; the operating efficiency is in excess of 85%.

Type	Model	Input D.C. Volts	A.C. Output 60 Cycles	Output Wattage		Code Word	List Price
				Intermittent	Continuous		
6	RSB	6	110 volts	85	75	ARSBQ	\$36.00

Illustrating Types 6 and 12 Standard Radio and Industrial Inverters only.

Radio frequency interference completely suppressed. Any of the above type Inverters are available with 220 volt A. C. output at prices 15% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "GRSBT".

atraactively finished black-wrinkled metal cabinets. Dimensions of Standard Model Radio Inverters, 7 7/8"x8-3/16"x4 1/2"; Shipping weight, 17 lbs. Dimensions of Heavy Duty Model Radio Inverters, 7 7/8"x9 5/8"x6 3/4"; Shipping weight, 26 lbs. For correct replacement vibrator, consult Inverter Vibrator Guide.

# ● ATR STANDARD AND HEAVY DUTY INDUSTRIAL INVERTERS

Model (Standard) ISO  
Model (Heavy) IHO

For Operating A. C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A. C. Electrical Appliances from D. C. Lines.

Illustrating Heavy Duty Models Radio and Industrial Inverters except types 6 and 12. Types 6 and 12 Industrial Inverters are illustrated by center cut above.

These units are specially designed for applications as indicated, permitting the use of standard A. C. equipment on D. C. lines. These Inverters operate at an efficiency in excess of 80% and are carefully built and equipped to give the longest possible life and operating satisfaction. All Inverters indicated utilize ATR ten contact plug-in vibrators, and are also equipped with four point voltage regulators as fully described above. These Industrial Inverters are recommended for use with loads having power factors as low as 60%, and as low as 50% for the "P" Inverters indicated. These Inverters should not be used with Neon signs.

Type	Model	Input D.C. volts	A.C. Output 60 cycles	Output Wattage		Code Word	List Price
				Intermittent	Continuous		
6	ISO	6	110 volts	85	75	AISOD	\$35.00

220P*	ISO	220	110	300	150	KISOM	45.00

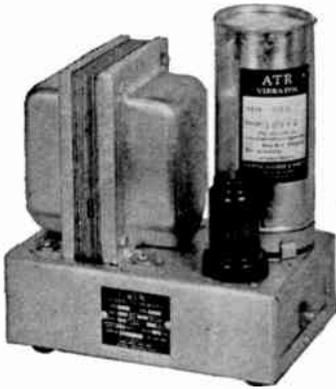

Dimensions of Heavy Duty Industrial Inverters, 7 7/8"x9 5/8"x6 3/4"; shipping weight, 26 lbs. For correct replacement vibrator, consult Inverter Vibrator Guide.

\*"P" Inverters are corrected for loads having power factors as low as 50%.

Built-in filter, \$9.00 additional.

# ATR HEAVY DUTY VIBRATOR PACKS

Model  
VPO

For Inverting Low Voltage D. C. to High Voltage D. C. for Operation of Portable Receivers and Transmitters, Aircraft Apparatus, Battle Announce Systems, Amplifiers, and Scientific Apparatus.

Here is a complete line of Heavy Duty Vibrator Packs for operation on 6, 12, 24, 32, 110, and 220 volts D. C. inverting same to an output of 325 volts D. C. at 125 milliamperes, adjustable in four steps as low as 250 volts D. C. at 50 milliamperes. ATR Vibrator Packs are available in two models: complete with audio filter and without audio filter. All models have built-in RF filters and come complete with rectifying tube and vibrator. The Vibrator used is an ATR ten contact Inverter type having eight 1/4" diameter tungsten power contacts and two silver alloy driver contacts for longest life and utmost reliability. The efficiency is in excess of 55%.

Illustrating ATR Vibrator Pack complete without audio filter. Style A.

Type	Input Volts D.C.	Output		Without Audio Filter		With Audio Filter	
		Volts D.C.	Current ma.	Code Word	List Price	Code Word	List Price
6	6	325-250	125-50	AVPOD	\$26.50	FVPOI	\$35.00

Style A—Attractively cadmium-plated finished as shown, dimensions 5 3/8" x 3 3/8" x 6 1/2"; shipping weight, 7 lbs.

Style B—Housed in an attractive black-wrinkled metal cabinet; dimensions 7 3/8" x 4" x 6 3/8"; shipping weight, 11 1/2 lbs.

ATR Vibrator Pack Replacement Vibrators are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.

Illustrating ATR Vibrator Pack complete with audio filter, Style B.

## ATR "A" BATTERY ELIMINATORS

Specially Designed for Testing D. C. Electrical Apparatus on Regular A. C. Lines, 105-125 Volts 50-60 Cycles.

- Eliminates Storage Batteries and Battery Chargers.
- Operates the Equipment at Maximum Efficiency at All Times.
- Delivers Pure Direct Current at the Correct Voltage for Proper Operation.
- Fully Automatic and Fool-Proof.

Illustrating Standard Model "A" Battery Eliminator.

### Suggested Uses:

As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D. C. voltages by simply using a rheostat in one side of the A. C. cord.

Equipped with Full-Wave Dry Disc Type Rectifier, Assuring Noiseless, Interference-Free Operation and Extreme Long Life and Reliability.

ATR STANDARD MODEL—Rated output 6.3 volts at 6.5 amperes.

Size 7 3/8" x 7 3/4" x 5 3/8"; shipping weight 18 1/4 lbs.

Code word "SELIO." List Price.....\$36.00

ATR HEAVY DUTY MODELS—Two models each using dual rectifiers. Size

8 3/8" x 13" x 5 1/4" Shipping weight 32 lbs.

Model B—6.3 volts at 14 amperes, code word HELIO. List Price.....\$59.00

Model T—14 volts at 7 amperes, code word HELIR. List Price.....\$55.00

Illustrating Heavy Duty Model "A" Battery Eliminator.

All ATR Eliminators have as standard equipment: On-Off Switch, Pilot Light Indicator, 10-Ampere Fuse, Rubber Mounting Feet, 6-ft. All-Rubber Cord Set, and Cabinet of heavy gauge metal having attractive black-wrinkled finish.

# P·L·U·G All GTC Porta-Power

Take advantage of the high lines — A necessity wherever rural electrification has come, or portable radios are owned.

**Convert Battery Radios to 105-125 volt, 50-60 cycle lines**

Supply all needed power to convert radios to ALL-ELECTRIC operation. Provide constant peak source of completely filtered, hum-free power at a small fraction of the cost of batteries

## Model "P"

FOR 6 VOLT RADIOS

"TWIN-POWERED"

**CONVERTS 98% OF ALL 6 VOLT RADIOS**

Vibrator disturbance is eliminated and high fidelity performance assured by sensational new design having two separate sources; one for the vibrator and one for the filaments.

Provides two sources of 6 volts at 1½ amps. or connected in parallel 3 amps—Screw type terminals.

Shipping weight approximately 8 lbs. (Size: 3¾" x 6½" x 5½")

## Model "U"

FOR 1½ VOLT PORTABLE OR FARM RADIOS of 4 or 5 TUBES

Universal sockets for all types of battery plugs. May be used in any position. Will fit the battery compartment of 99% of all portables.

Small enough to be installed permanently in many, in addition to the batteries.

Light weight for portable operation. Great economy for home use.

PROVIDES:

"A"—1.5v at 200 m.a.  
"B"—90v at 13 m.a.

Shipping weight approximately 4 lbs. (Size: 2" x 3½" x 6")

## Model "L"

for 2 VOLT RADIOS

Supplies "A", "B" and "C" Power to 4 to 8 tube sets designed for 3 volt Dry Battery, 2.5 volt Air Cell, or 2 volt Storage Cell "A" Power.

PROVIDES:

"A"—2v, D.C.  
"B"—67½, 90, 112½, 135v (Can be adapted for 45 volts)  
"C"—1½ to 22½v, (2 or 3 "C" voltages if necessary.)

Screw Type Terminals

Shipping weight approximately 6 lbs. (Size: 6 1/16" x 4" x 5½")

## Model "G"

for 1½ volt radios of 4, 5 or 6 tubes requiring more power than model "U" provides.

PROVIDES:

"A"—1.5v at 200 m.a.  
1.35v at 250 m.a.  
1.55v at 300 m.a.  
1.35v at 350 m.a.  
"B"—90v at 13 m.a.  
101v at 8.5 m.a.

Shipping weight approx. 5 lbs. (Size: 3 9/16" x 6 1/16" x 4 13/16")

## OPERATE 1½ VOLT BATTERY RADIOS FROM 6 VOLT STORAGE BATTERY

## Model "C"

**SUPPLIES 1.4 VOLTS "A" AND 90 VOLTS "B" FROM 6 VOLTS D. C. INPUT**

- Replaces "A" and "B" batteries in 1.4 volt portable or farm radios having 4, 5, or 6 tubes.
- Hum and hash free operation.

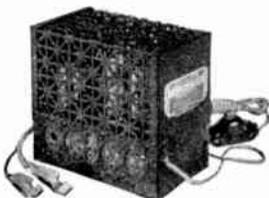

PROVIDES:

"A"—1.4v at 200, 250 and 300 m.a.  
"B"—90v at 10 m.a.

Six Battery Type Sockets

Shipping weight approximately 5½ lbs. (Size 3¾" x 6¼" x 6")

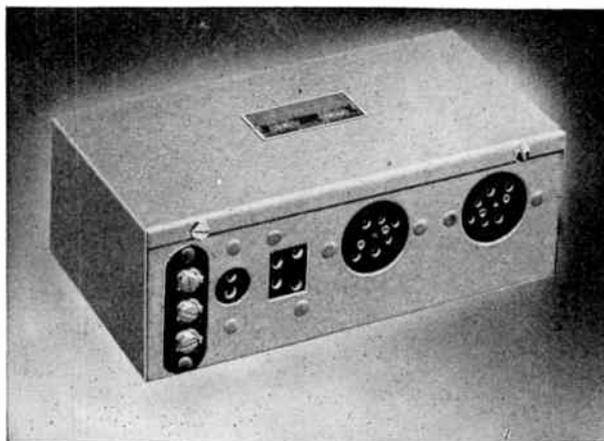

# BATTERY ELIMINATORS *of Distinction*

## ELECTRIFY with ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.

FOUR TYPICAL MODELS are shown here on pages

T-7 and T-8. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue crystallac.

### MODEL "Q" SYNCRO POWER

Operates Any 1.4 Volt—4, 5, or 6 Tube Battery Radio from 6 Volt D.C. Source

This Eliminator is to be used where 115 volt A.C. lines are not available. Will provide all "A" and "B" voltages more efficiently and at lower cost from 6 volt battery. Will operate a 4-tube radio three weeks at 3 hours a day on a single storage battery (100 A.H.) charge. Low battery drain—one-eighth that of ordinary auto radio—one-third that of 6-volt farm radio. Excellent for use at farm, summer cottage or camp, in automobile, motor boat, etc.

#### Technical Data

##### "A" Supply Output

5-6 tubes (average).....1.4 V. @ 320 ma.  
4 tubes .....1.4 V. @ 250 ma.  
4 tubes .....1.4 V. @ 200 ma.

##### "B" Supply Output

90 Volts D.C. @ 12 ma. (max.)

##### Primary

6 Volts D.C. @ 0.8 amp. (for 4 tube radio).

##### Specifications

Cord and battery clips on primary.  
On and Off switch in Eliminator turns power on.  
Size: 5" x 5" x 2 3/8".  
Weight packed: 3 1/2 pounds.

LIST PRICE \$16.50

### MODEL "R" SYNCRO POWER

Operates Any 2 Volt—4, 5, 6 or 7 Tube Battery Radio from 6 Volt D.C. Source

Ideal for use where 115 volt 60 cycle lines are not available. Provides "A" and "B" power for portable radios for 3 weeks at 3 hours per day from single 100 A.H. storage battery charge. For use with 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1G5, 1H4G, etc. Permits longer use of portable radios at less cost and with greater volume. Fine for use at the farm, summer cottage, camp, in motor boat, trailer or auto.

#### Technical Data

##### "A" Supply Output

7 tubes .....2 V. @ 480 ma.  
6 tubes .....2 V. @ 420 ma.  
4-5 tubes (average).....2 V. @ 325 ma.

##### "B" Supply Output

67, 90, 112, 135 volts @ 18 ma. (max.).

##### Primary

6 Volts D.C. @ 1.2 amps. (for 4 tube radio).

##### Specifications

Cord and battery clips on primary.  
On and Off switch in Eliminator turns power on.  
Size: 5 1/2" x 5" x 2 3/8".  
Weight packed: 3 1/2 pounds.

LIST PRICE \$17.70

### MODEL "P" COMPACT

Operates Any 1.4 Volt—4, 5, or 6 Tube Battery Radio from 115 Volt 60 Cycle Source

Designed for sets using 1A7, 1E4, 1N5G, 1N5G, 1Q5G, etc., tubes to convert battery radio to an efficient AC receiver with low operating cost. Fits in battery compartment of most radios. Ideal for use in home, hotel, camp or any place where normal AC is available.

#### Technical Data

##### "A" Supply Output

5-6 tubes (average).....1.4 V. @ 320 ma.  
4 tubes .....1.4 V. @ 250 ma.  
4 tubes .....1.4 V. @ 200 ma.

##### "B" Supply Output

90 Volts D.C. @ 12 ma. max.

##### Primary

115 Volts A.C. @ 60 cycles.

##### Specifications

Six foot card and plug—switch in cord.

Size: 2 $\frac{3}{8}$ " x 3 $\frac{1}{2}$ " x 6 $\frac{3}{4}$ ".

Weight packed: 3 $\frac{1}{2}$  pounds.

LIST PRICE \$14.10

### MODEL "F" COMPACT

Operates Any 2 Volt—4, 5, 6 or 7 Tube Battery Radio from 115 Volt 60 Cycle Source

For use in receivers employing 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1H4G, etc., tubes to change radio into an all-electric set giving maximum performance at all times. Inexpensive to operate. Excellent to use when AC current is available and save batteries for occasions when used as portable.

#### Technical Data

Size: 2 $\frac{3}{8}$ " x 4 $\frac{1}{2}$ " x 8 $\frac{1}{4}$ ".

Weight packed: 5 $\frac{1}{2}$  pounds.

LIST PRICE \$16.40

**ELECTRO PRODUCTS LABORATORIES**

# AUTO RADIO DEMONSTRATION PACKS

## STANCOR MASTER DELUXE PACK

A heavy duty auto radio demonstration and radio service pack.

An all-purpose heavy duty, well filtered unit with a multiplicity of applications. Delivers 16 amperes @ 6 volts continuously or 22 amperes @ 2.7 — 6.4 volts intermittently. Will power complete auto radio display boards and operate the largest push button tuning unit. It eliminates several smaller packs or the messy storage batteries. Because of its reserve power it will permit the operation of two or more radios simultaneously for comparison purposes (output will drop, momentarily when push buttons are operated.)

Provides 8 volts @ 9 amperes for testing vibrators by duplicating extreme conditions encountered in actual use. May also be used as a battery charger.

General laboratory, production or other industrial users will find this pack very handy to have around, as it will deliver a variety of voltages for tests and many other applications.

Excellent filtering reduces ripple to less than 5%. A fuse in the primary circuit, together with overload relay, protects the pack and the equipment it is operating.

All controls are mounted on front panel. Voltage is controlled by means of a tap switch in approximately one half volt steps. A high grade voltmeter indicates the output voltage

### SPECIFICATIONS

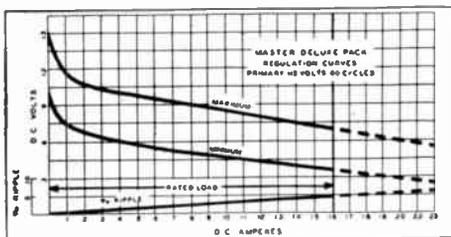

#### D. C. OUTPUT

No load.....11 to 15 volts  
 Cont. load...16 A., 3 to 6 volts  
 Max. inst. 22 A., 2.7 to 6.4 volts  
 Rectifier (2 used) BRIDGE Type  
 29 radiating 3½" fins.  
 Filter — heavy current choke —  
 4000 mfd. condenser  
 Ripple less than 5%.

#### POWER SOURCE

115 volts 50-60 cycles A.C.  
 Input 420 V. A. @ Max. Cont.  
 load  
 Electrostatic shield  
 Rotary tap switch  
 Overload relay protection  
 Six ft. cord and plug  
 Size H. 7" x W. 18½" x D. 11"  
 Weight in carton 50 lbs.

Stancor No. 133

## STANCOR MASTER PACK

Provides 6 Volts D.C. for Auto Radio and Accessories.

A compact power unit designed to meet numerous requirements for obtaining low voltage heavy duty D.C. from 115 volt A.C. lines.

Ideal for Auto Radio Sales demonstration, and service test work, effectively operating most push button tuning auto radios. Useful for industrial or laboratory purposes. May also be used as a battery charger, a magnetic field exciter, or for electroplating.

Delivers from 3 to 6 volts (see curve) of well filtered D.C. at 12.5 amperes on continuous duty, or 5 volts at 16 amperes instantaneous load.

Exceptionally well designed filter minimizes ripple to six percent. A fuse in the primary circuit, together with an overload relay, protects the pack and your equipment.

All controls and terminals easily accessible on an inclined front panel. Control switch varies the output voltage in approximately one-half volt steps.

### SPECIFICATIONS

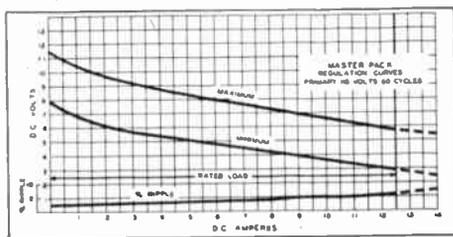

#### D. C. OUTPUT

No load.....8 to 12 volts  
 Cont. load 12.5 A....3 to 6 V.  
 Max. inst. load 16 A., 2 to 5 V.  
 Rectifier — full wave with twenty-five 3½" radiating fins.  
 Filter — heavy current choke with 4,000 mfd. condenser.  
 Ripple less than 6%

#### POWER SOURCE

115 volts 50-60 cycles A.C.  
 325 watts at continuous load.  
 Overload relay adjusted to 20 amperes.  
 Electrostatic shielded transformer.  
 Dimensions L. 13½"; W. 8¾"; H. 6".  
 Weight in carton 26 lbs.

Stancor No. 132

## STANCOR ECONOMY PACK

Provides Well Filtered 6 Volts D.C. from Power Line

The Economy 131 Pack is one of the lowest priced and most compact units having well filtered D.C. output. The output current is rated lower than the 132 Master Pack, but the quality of the output is the same.

Here is a powerful little pack without extra controls that will furnish plenty of amperes for most requirements.

Output terminals are conveniently located for connections. Protection from damage is assured by the easily replaced fuse. "On-off" toggle switch is within easy reach. A bright jeweled pilot light indicates whether power is "on" or "off".

The unit can be used wherever the adjustment of voltage is not necessary. It is well adapted to radio, auto and industrial use. The pack will normally operate one auto radio with remote control.

### SPECIFICATIONS

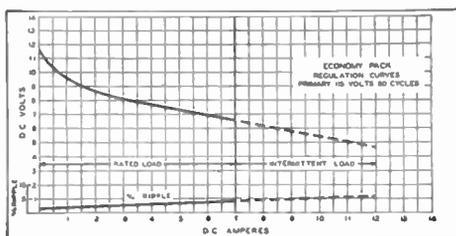

#### D. C. OUTPUT

No load .....11 volts  
 Continuous load 7A...6.5 V.  
 Max. inst. load 12A...4.5 V.  
 Rectifier—full wave with thirteen 2½" radiating fins.  
 Filter — heavy current choke with 4000 mfd. condenser.  
 Ripple less than 4.5%

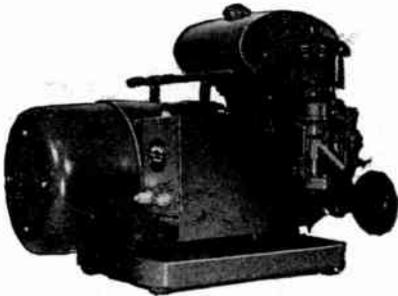

#### POWER SOURCE

115 volts 50-60 cycles A.C.  
 175 watts at continuous load  
 Electrostatic shielded transformer  
 Fuse connected in primary  
 Jeweled pilot light  
 Six foot cord and plug  
 Dimensions L. 8", W. 6¼", H. 7¼"  
 Weight in carton 16½ lbs.

Stancor No. 131

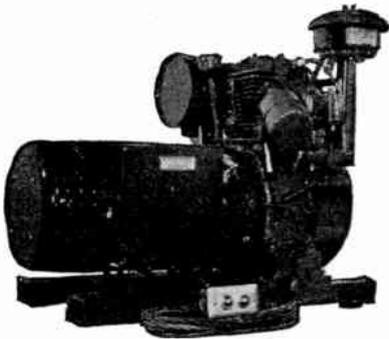

# 110 VOLT AC ANYWHERE WITH KATOLIGHT!

**Model 23HAJ4**

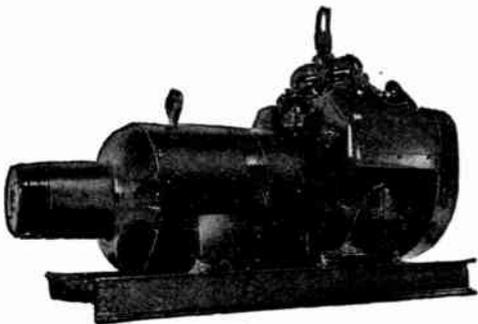

500 watt, 115-volt, 60-cycle, A.C. KATOLIGHT plant powered with a Johnson 1 h.p., single cylinder, 4 cycle, aircooled engine. Approximately 21" long x 16½" wide x 17½" high, net wt. 135 lbs., shipping wt. 170 lbs. As a special feature this model is furnished with start and stop button right on the generator, with cutoff, D.C. ammeter, charge control resistor and battery cables.

The above unit can be furnished as a 12- or 32-volt battery charging plant upon specification. Write for quotations.

**Model 28HAB4**

1500 watt, 115-volt, 60-cycle, A.C. KATOLIGHT plant powered with Briggs & Stratton 4 h.p., 1 cylinder, 4 cycles, aircooled engine. (Illustrated with 40-ft. Remote Control. Standard models are furnished with manual cranking arrangement.) 30½" long x 25¾" high x 20¾" wide, net wt. approximately 300 lbs., shipping wt. 365 lbs.

**Model 45MGW4**

5000 watt, 115/230-volt, 60-cycle, single phase, four wire, 1800 r.p.m., revolving field type Katolight A.C. generator powered with a Wisconsin, four cylinder, aircooled engine. 54½" long x 32¾" high x 21½" wide. Net wt. .... lbs.

## CONTINUOUS DUTY — ECONOMICAL RUGGEDLY CONSTRUCTED — PORTABLE

Designed for sound trucks, homes, cottages, trailers, farms or any place where plant is desired for running many hours daily and expected to give years of trouble-free service.

KATOLIGHT PLANTS are the result of actual experience in the light plant field; the result of much laboratory and actual field tests. The engine that will give the best performance is selected for each model. Engine manufacturers are known internationally and maintain service stations in key cities in U. S., Canada and foreign countries. The user is assured of service and parts from authorized service stations.

KATOLIGHT PLANTS are already to go by simply adding a little gasoline and oil and connecting to the lines; complete with engine, generator, base, fuel tank, instruction manual, hand crank.

### GAS ENGINE DRIVEN PLANTS

500 to 5000 Watts, Aircooled, 110-volt A.C., 60 Cycle, 1800 R.P.M.

### KATO KONVERTERS

Kato Konverters furnish standard 115-volt, 60-cycle A.C. from a source of 32, 115 or 230-volts direct current. Ideal for operating radio and electronic equipment, appliances, etc. All steel frames available. Send for bulletins and prices. (Model 5 KA43, 225-watt illustrated.)

A maneuvering fighting force can't wait for power line hook-up—they must provide their own current. Standard A.C. electricity, the same as you get from the power line, must be available on the spot when and where it is needed. Katolight Generators are producing this current right on the battle fields in every part of the world.

Manufacturers of A.C. & D.C. Generators, Rotary Konverters, A.C. & D.C. Power Plants, Motor-Generators, Frequency Changers, High Frequency Generators, Gas-Engine Driven Battery Chargers, etc. Write for quotations and specifications.

## CARTER SUPER DYNAMOTOR

The Carter Super Dynamotor is widely acclaimed as the finest and most reliable Power Supply by leading Communications Equipment Manufacturers, Engineers, Police Departments, Government Agencies, etc. Exact care in the selection and design of armature, brushes, commutators, bearings, and other component parts, assures trouble-free, efficient operation. Excellent regulation, minimum AC ripple, easy to filter and install.

CARTER SUPER CONVERTER

## CARTER SUPER CONVERTER

The Carter Super Converter is a small, compact, quiet running, two pole, 3600 RPM fan-cooled unit for changing direct current to alternating current. This long life double wound type unit is ideally suited for radio equipment, public address systems, musical instruments, testing devices, small signs, etc. Available in 85 to 100% Power Factor only, ball bearing equipped.

8 1/4" long, 4 1/2" wide, 4 3/4" high, weight 13 lbs.

CARTER MAGMOTOR

# CYCLOHM POWER PLANTS

## A light weight, portable gasoline engine driven D C GENERATOR UNIT

- for use . . .
- As a portable or fixed LIGHTING PLANT, in conjunction with suitable batteries, for farms, cottages, emergency equipment.
  - As a BATTERY CHARGER for mobile farms, cottages, emergency equipment.
  - As an ALL PURPOSE GENERATOR unit for applications such as motorized appliances, heaters, electrolysis, etc.

Inquiries are invited concerning your special requirements. Our engineering department will be glad to assist you in selecting a suitable power unit.

## GENERAL SPECIFICATIONS SERIES E

Model	Power Output Watts	Voltage	Max. Charg. Rate	RPM	Net Weight	Domestic Ship. Wt.	Export Ship. Wt.
E11A01	400	@ 6	67 amps.	3600	76 lbs.	86 lbs.	100 lbs.
E12A01	500 250	@ 12 @ 6	42 amps.	3600	79 lbs.	88 lbs.	102 lbs.
E13A01	500	@ 24	21 amps.	3600	79 lbs.	89 lbs.	103 lbs.
E14A01	500	@ 32	16 amps.	3600	79 lbs.	89 lbs.	103 lbs.

### STANDARD EQUIPMENT

Standard equipment includes: oil bath air cleaner—gasoline filter—special-ly designed dust and moisture proof high tension flywheel magneto—gasoline tank—screened blower housing—muffler—reverse current battery cutout—push button operated electric circuit for battery starting—starter rope—spark plug and oil filler cap wrench—instructions for operating—

### OPTIONAL EQUIPMENT

Special equipment available includes: ignition radio shielding—carry- ing handle—battery charging cables with terminals (in multiples of 3 feet)—con- nections and flexible hose for exhaust extension—remote control starting and stopping—vibration insulated sub-base—fungus proofing—stellite faced valves and seats for operation on highly leaded fuels—

## RADIO PRODUCTS

### ICA SHEARING PUNCHES

Now! No Hammering Necessary to Punch Chassis Holes.

Shearing is accomplished with a wrench which forces shear punch into die. Made of High Grade Steel.

No.	Size of Hole	Net
725	3/4"	\$2.55
726	1.70	3.00
727	1 1/8"	3.00
728	1 1/8"	3.00
729	1 1/4"	3.00
730	1 3/8"	3.30

### ICA Improved All-Purpose Circle Cutter

Will Cut Holes from 3/4 to 8 Inches

Cutting bar holder is 1" in diameter and also accommodates a centering drill or any size pilot pin. Cutting bar is 3/8" square and is arranged to hold a 1/8" high speed cutting bit.

No. 775 ..... Net \$3.96

### ICA Universal Multi-Purpose Cutting Tool

This handy tool can be used for counter-sinking, beading, drilling or cutting holes. Equipped with 1/8" holes from 1/16" diameter up to 3" diameter. Can be used either in drill press or hand brace. Also acts as a boring tool when used in a lathe.

No. 780 ..... Net \$2.40

### ICA SQUARE HOLE SHEARING PUNCH

This new punch permits the cutting of any size odd-shape hole (square rectangular, hexagon, oblong, etc.) on any size panel or chassis. Good for Enlarging or punching TRANSFORMER Holes.

No. 790 ..... Net \$9.90

### ICA RIVET AND EYELET PUNCH SET

A Universal Tool that can be used for either riveting or eyeletting. Holder is made of cast iron with hexagonal sides, thus permitting the tool to be placed in a vise without slipping.

No. 785—Complete with ample assortment of eyelets and rivets.

Net \$2.40

### RIVET & EYELET ASSORTMENT

Additional eyelets and rivets can be purchased separately.

No. 5265—(Assortment of 100) ..... Net \$4.48

### ICA SOLDERING IRONS

ICA Highest Quality Soldering Irons are "Best By Test". Each model is submitted to the most severe tests and results prove conclusively that ICA irons are equal, if not superior, to any soldering iron on the market today.

#### 60 WATT IRON

No. 1960-A—110-115 Volts ..... Net \$3.00

#### 85 WATT IRON

No. 1962-A—110-115 Volts ..... Net \$3.90

#### 115 WATT IRON

No. 1961-A—110-115 Volts ..... Net \$4.50

### ICA SOLDERING IRON TIPS

For American Beauty Irons

Made of special copper alloy. Ends are hot tinned. For replacement in American Beauty Irons and other makes that have the same specification for size.

No.	Length	Diam.	Net

### ICA DE LUXE NEUTRALIZING and ALIGNING TOOL KIT

Complete for Every Service Need

Consists of fourteen tools, most of which telescope into one another, forming six units when assembled into the attractive black leatherette case.

The complete kit in carrying case can be kept in the pocket. Tools complete with carrying case.

No. 994 ..... Net \$4.50

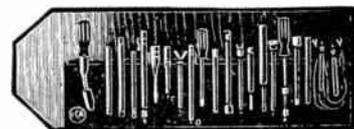

### ICA NEUTRALIZING AND ALIGNING TOOL KIT

The Kit consists of twelve separate and distinct parts, some of which can be employed for several operations. These units telescope into each other, forming four separate tools when assembled.

No. 998 ..... Net \$3.90  
Complete With Carrying Case

### ICA Complete Neutralizing Tool Kit

The kit consists of one of each of the following ICA tools, described herein:—No's 382, 1008, 987, 1015, 976, 996, 992, 985, 990, 1024, 1019, 1026, 1022, 1004, 1013, 1028, 1039, 1029, 1033, 985, 937.

Total list of tools if purchased individually \$18.50.

No. 995—Kit, Complete with Carrying Case \$12.00

### ICA LOCK SOCKET WRENCH and SCREW DRIVER SET

Actually a set that will take care of all socket wrench requirements, either radio or electrical, ignition or mechanical needs.

All parts are steel cadmium plated and are packed in an attractive box. The set includes the following:

- 1—Screw Drives and Handle
- 1—1/4" Hex Handle and Extension Ell Shaped—5" long
- 1—1/4" Hex Staright Extension—3" long
- 1—Socket which holds the extensions to screw drives
- 1—3/8" Socket
- 1—1/2" Socket
- 1—3/8" Socket
- 1—1/2" Socket
- 1—Internal Knurled Socket to fit any 12 point Double Hex nut between size 3/8" and 3/4"
- 1—1/4" Socket

No. 999 ..... Net \$1.50

### ICA AMBER COLORED UNBREAKABLE MIDGET SCREW DRIVER

Particularly shaped to fit into set screws of knobs. Complete with pocket clip. Length 4 5/8".

No. 1013 ..... Net \$1.15  
No. 1017—Length 6" ..... Net \$1.18

Made of Fenoline Fully Insulated

No.	Net
1019—Complete as shown	\$.60
1020—Majestic Attachment for #1019	.21
1021—Crosley Attachment for #1019	.21

## ICA 5-in-1 NEUTRALIZING AND COMPENSATING TOOL

Same features as the 4-in-1 tool described above with an additional all metal screw driver.

No. 1022 ..... Net \$0.90

## ICA 3-in-1 NEUTRALIZING TOOL

With Metal Nibs Made of Sturdy Fenoline Material, with Brass Nickel Plated Metal Nibs. Unbreakable.

No. 988 ..... Net \$0.75

## ICA Neutralizing Tools with Metal Nibs

Patent No. U.S. 83,321

Sturdy, unbreakable, will outlast all other type neutralizing tools.

No. 996 ..... Net \$1.05

## LO-LOSS ALIGNING TOOL

Transparent Lucite

Have extremely low capacity and high Q. Will not affect the most delicate electrical balance.

No. 1035 ..... Net \$0.30

## ICA BONE FIBRE SCREW DRIVER

Made entirely of  $\frac{1}{8}$ " bone fibre rod with a sturdy blade.

No. 1029 ..... Net \$0.48

## ICA BONE FIBRE SCREW DRIVER

Double Edged—No Metal—Fully Insulated Made of  $\frac{1}{8}$ " Bone Fibre Rod

No. 1039 ..... Net \$0.33

## ICA NEUTRALIZING TOOL For Push Button Tuners

The Socket is  $\frac{3}{8}$ " in diameter, and contains a screw driver blade.

No. 1003 ..... Net \$0.45

## ICA SET TRIMMER NEUTRALIZING TOOLS FOR PHILCO, ZENITH, RCA, Etc.

Fits the smallest size trimmer condensers. Trimmer end is  $\frac{3}{8}$ " diam. to fit  $\frac{1}{4}$ " hole.

No. 992—6" long ..... Net \$0.75  
No. 933—10" long ..... Net .90

## ICA ALIGNMENT WRENCH For RCA, PHILCO, etc.

Used on all makes Air Trimmer. Made of  $\frac{3}{8}$ " Fenoline Rod—8  $\frac{1}{2}$ " long—one end has hollow shaft hexagon wrench—other end has an especially shaped hook.

No. 1008 ..... Net \$1.05

## ICA BALANCING TOOL

Fits into No. 1019 Neutralizing Tool.

No. 1026 ..... Net \$0.36

## INSULATED NEUTRALIZING WRENCHES

Hexed—Full Length For Philco, Majestic and Other Receivers  $\frac{3}{8}$ " Diameter

No. 985—6" long	Net \$2.1
No. 986—8" long	Net .24

## ICA Alignment Tool for Philco Receivers For Air Trimmer Sets

Has specially designed metal clip for air trimmers. Made of narrow fine rod,  $\frac{1}{32}$ " diam. by 6" long.

No. 1033 ..... Net \$0.39

## ICA Insulated Adjustable Neutralizing Tools

Absolutely no metal parts. Screw driver slides into inside of neutralizing wrench.

No. 990—Extending from 6" to 11" Net \$0.60

No. 991—Extending from 10" to 18" Net .75

## ICA ALL PURPOSE ALIGNING TOOL

Handle is of  $\frac{3}{8}$ " Fenoline. End has Socket Screw Driver for neutralizing all iron core tuning systems.

No. 1002 ..... Net \$0.45

## ICA ALIGNMENT TOOLS For R.C.A. Receivers

Narrow shaft Neutralizing Tools made of Bone Fibre— $\frac{1}{2}$ " Wide. Has screw nib inserted in Brass Collar on end.

No. 1015 ..... Net \$0.57

## ICA NARROW SHAFT ALIGNMENT TOOL

RCA—Zenith—etc.  $\frac{1}{32}$ " Bone Fibre Rod.

No. 987 ..... Net \$0.51

## ICA MAGIC TUNING ALIGNMENT TOOL

Consists of a Bakelite rod with a Brass cylinder at one end, and a special finely divided iron core at the other end.

No. 977 ..... Net \$0.81

## ICA FORK TYPE NEUTRALIZING WRENCH and SCREW DRIVER For RCA and Other Sets

No. 1024 ..... Net \$0.36

## ICA Fenoline Neutralizing Screw Drivers

Made of Fenoline. Strong and sturdy, completely insulated for neutralizing and aligning coils, condensers, receivers, etc.

No. 1028 ..... Net \$0.30

## ICA ALL-PURPOSE TEST LEAD KIT COMPLETE FOR EVERY TESTING NEED

Equipped with one pair of test leads which have 60" of red and black kinkless live rubber wire. One end has insulated removable banana-type plugs.

Included in this test kit:  
1 pr. test leads.  
1 pr. insulated alligator clips—red and black.  
1 pr. insulated spade plugs—red and black.  
1 pr. insulated needle points—red and black.

No. 1005—Kit, complete \$2.10

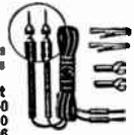

## ICA PHONO, NEEDLE POINT TEST LEADS

With Slim Bone-Fibre Handles and Flexible Wire

Flexible, rubber-covered, kinkless wire. 50" long. Fenoline handles  $\frac{1}{4}$ " long.

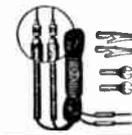

No.	Net
382—With Phone Tips	\$.60
381—With Spade Terminals	.60
379—With Alligator Clips	.66

## ICA DE LUXE EXTRA-FLEXIBLE TEST LEADS

Slim Handles & Solderless Plugs 50" Extra-Flexible Test Leads with 4" Bone Fibre handles. New non-kinking, rubber insulated wire.

No.	Net
355—With Phone Tips	\$.80
356—With Spade Terminals	.80

## ICA PENCIL TYPE TEST LEADS

Finger-Grip Molded Tips

All connections are properly soldered providing low resistance connections vital in all precision tests. The Molded Finger Grip Tips are provided with rivets for easy renewal of wire. Length of test leads is 65". Handles are 5" long.

No. 373 ..... Net \$1.05

## ICA HEAVY DUTY LABORATORY TEST LEADS

Long Slim Handles and Removable Phone Needle Chuck Extra long slim red and black handles knurled at end for finger grip ease. Handles 6" long. 50" of heavy duty kinkless, flexible rubber wire.

No.	Net
400—With knurled grip	\$.99

388—With alligator clip	\$.90
391—With spade lugs	.84
392—With non insulated phone tips	.84

## ICA Slim Handle Test Leads

Made of sturdy Bone-Fibre Handles. 50" of Kinkless Live Rubber wire. Handles 6" Long—Overall Length 7". Prods have pointed large phono tip plugs.

No.	Net
313—Phone Tips on end	\$.75
314—Spade Lugs on end	.75
315—Alligator Clips on end	.84

## ICA HIGH VOLTAGE HEAVY DUTY TEST LEADS

10,000 VOLTS

Made of large diameter Bakelite handles with guards to prevent fingers from slipping. Cable 18 gauge, 67/36 tinned copper, with heavy walled rubber covering. Prods 6" long with 50" red and black cable

No. 475 ..... Net \$2.40 per pair

## ICA Unbreakable Test Prods

Long Metal Prod with Shock-proof Rubber Handles

One end has standard needle point Tips. Other end has Insulated Solderless Plugs. Supplied with 50" Kinkless Rubber Wire.

No. 332—With Phone Tips	Net \$0.60
No. 331—Insulated Solderless Plug Ends	Net .69

## ICA ALL PURPOSE TEST LEADS

Made of sturdy Bone Fibre Tubing. Slim handles, 6" long. Over length 7  $\frac{1}{4}$ ". Rubber covered wire 50" long.

With Interchangeable Tips  
No. 312—Complete Kit ..... \$1.50

## ICA SMALL HANDLE INSULOID TEST LEADS

Equipped with phone tip inserted in black and red insuloid handle on one end.

No.	Net
368—Phone Tips	\$.42
367—Spade Lugs	.42

## ICA FLEXIBLE SCREW DRIVER For the Hard to Reach Spots

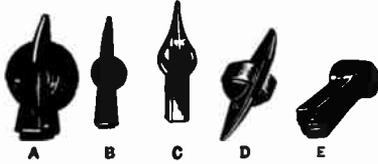

Allows access to screws in hard to reach and out of the way places. Can go under objects or around corners.

No. 935 ..... Net \$1.35

## ICA DELUYE SIGNA-TONE AUDIO OSCILLATOR — CODE PRACTICE SET — KEYING MONITOR

The ICA Signatone is a perfected Audio Oscillator, having 3 different output frequencies and a continuously variable volume control. The Audio notes are similar to those of high quality commercial CW stations.

No. 4300

No. 4301

- CODE PRACTICE SET**—A number of phones and keys may be connected for intercommunication or for classroom or radio club instruction in code.
- KEYING MONITOR**—An invaluable aid in improving any ham's "fist". Will follow the "bug" at all speeds. No well-equipped station should be without this keying monitor.
- MODULATION SIGNAL**—The steady note of the Signatone is ideal for adjusting both the Modulator and modulated stages of your transmitter for a maximum modulation percentage of not over 100.
- SIGNAL TRACER**—By feeding the output of the Signatone into each stage of your modulator and listening to the output of that stage, defects and "bugs" can easily be located. Complete with tube and self-contained speaker, for 110 V AC-DC.

No. 4300—Dealer Net Cost .....\$12.00  
No. 4301—Classroom Model (No Speaker)—Dealer Net Cost ..... 9.00

## LINGUAPHONE MORSE CODE RECORDS

Learn the International Morse Code Quickly, Easily—Uses EYE-EAR Method. The Complete Linguaphone Code Equipment consists of 5 Double-faced, electrically transcribed records in durable album. Contents: 3 Tables, 10 Lessons, 14 Exercises, 4 Appendices.

No. 1800—Complete .....Net \$9.00

## ICA "TRIPLEX"

Radio & Telegraph Code Practice Set  
Blinker Light  
Radio Signal—Telegraph

No. 70—Single Unit (less batteries) .....\$1.80  
No. 71—Double Unit (50 ft. wire) ..... 3.72

## CERAMIC BEAD INSULATORS

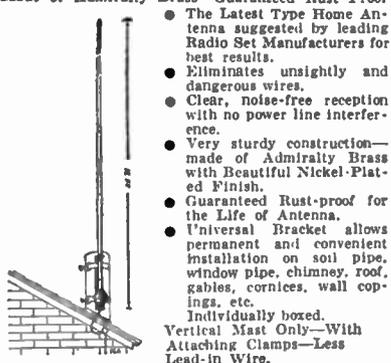

3/8" Diam. Used for construction of short concentric link lines.

No. 2315—(100 beads) .....Net \$6.00

## HOME ANTENNAS

12 FEET—4 SECTIONS  
Made of Admiralty Brass—Guaranteed Rust Proof

No. 4515 .....Net \$3.75  
10 to a Standard Carton—Weight 25 lbs.

## COMPLETE VERTICAL MAST ANTENNA

Vertical Mast with all accessories for Universal Mounting—including lead-in Wire, Ground Wire, Brackets, Lightning Arrestor, Screws, Insulators, etc.  
No. 4516 .....Net \$4.17  
10 to a Standard Carton—Weight 33 lbs.

## DE LUXE WINDOW ANTENNAS

8 FEET—12 FEET  
Made of Admiralty Brass—  
with Beautiful Nickel-Plated Finish

- For Homes, Apartments, Hotels, Office Buildings, and places where it is inconvenient to install outdoor aerials or to improve reception on indoor installations.
- Quickly and easily installed.
- Adjustable Bracket at base, permits the antenna to be focused in any position for best reception.
- Furnished completely assembled with mounting flange, insulator and lead-in strip. Individually boxed.

3 Section Telescopic Antenna Opens to 96" Total Length  
No. 4527B .....Net \$3.60  
10 to a Standard Carton—Weight 14 lbs.  
4 Section Extra Long Window Antenna 12 Feet Long  
Ideal for DX Reception and Rural sections where extra length is needed for best results.  
No. 4513 .....Net \$4.05  
10 to a Standard Carton—Weight 33 lbs.

# ICA INSULINE ICA

## RADIO PRODUCTS

### INDIVIDUAL RADIO HARDWARE ITEMS

The following sizes and types of hardware can be purchased in individual jars, either for refilling the assortment racks or as a refill for your own hardware stock. Each jar contains the amount mentioned.

Individual types and sizes. Packed in handsome glass display jars.

NET 39c PER JAR

#### Round Head Machine Screws

No.	Quantity	Size
5000	100	4-36 x 1/4" long
5001	100	4-36 x 1/2" long
5002	75	4-36 x 3/4" long
5007	90	6-32 x 1/4" long
5008	80	6-32 x 1/2" long
5009	70	6-32 x 3/4" long
5010	50	6-32 x 1" long
5014	75	8-32 x 3/8" long
5015	70	8-32 x 1/2" long
5016	65	8-32 x 3/4" long
5017	40	8-32 x 1" long
5022	60	10-32 x 1/2" long
5023	50	10-32 x 3/4" long
5024	35	10-32 x 1" long

#### Parker-Kalon Self-Tapping Screws

No Tapping Necessary—No Nut Required

No.	Quantity	Size
5051	50	No. 4 x 1/2"
5052	50	No. 6 x 1/4"
5053	45	No. 6 x 3/8"
5054	40	No. 7 x 1/2"
5055	35	No. 10 x 3/4"
5056	45	No. 10 x 3/8"

#### Nickel Plated Hexagon Nuts

No.	Quantity	Size
770	100	4-36 x 1/4" Diam.
J71	90	6-32 x 1/4" Diam.
J072	80	8-32 x 5/16" Diam.
5073	50	10-32 x 3/8" Diam.
5074	80	6-32 x 5/16" Diam.

#### Kant-Link Lock Washers

No.	Quantity	For
J080	125	For 6-32 Screws
5081	125	For 8-32 Screws
5082	100	For 10-32 Screws

#### Shakeproof Lock Washers

No.	Quantity	For
5085	100	For 6-32 Screws
5086	90	For 8-32 Screws
5087	80	For 10-32 Screws

#### Plain Steel Plated Washers

No.	Quantity	For
5090	100	For 6-32 Screws
5091	100	For 8-32 Screws
5092	100	For 10-32 Screws

#### Escutcheon Plate Screws

No.	Quantity	Size
5122	100	No. 1-1/4" length

#### Fahnestock Clips—Spring Brass N.P.

No.	Quantity	Size
5190	40	3/4" long
5191	40	1" long

#### Rack Screws and Washers

No.	Quantity	Size
5120	20 each	(10 32 x 3/8) Oval Bend Screw (10/32) Cup Washer

#### Flexible Rubber Grommets

No.	Quantity	Diam.	Thick.	Size	Hole
5120	15	1/2"	9/32"	7/64"	3/8"
5121	12	21/32"	1/4"	3/8"	3/8"
5122	15	1/2"	1/4"	1/4"	3/8"
5124	10	13/16"	3/8"	3/8"	3/8"
5125	10	3/4"	3/8"	3/8"	3/8"

#### Plain Fibre Washers

No.	Quantity	Diam.	Hole	Thick.
5100	125	5/16"	1/8"	1/32"
5101	100	3/8"	3/16"	1/16"
5102	90	1/2"	1/8"	3/64"

#### Shoulder Fibre Washers

No.	Quantity	Over-all Diam.	Shoulder Diam.	Height
5100	100	3/4"	1/4"	5/64"
5111	90	7/16"	13/64"	7/64"
5112	75	1/2"	3/8"	3/64"
5113	50	1/2"	3/8"	3/32"

#### Brass Tinned Terminal Lugs

No.	Quantity	Type	Length	Size of Hole
5135	125	Flat	1/4"	No. 6
5136	100	Flat	7/8"	No. 10
5141	75	Flat	1"	No. 8 or 5/16"
5137	75	Link	1"	No. 8
5138	100	Spade	3/8"	9/64 Slot
5139	75	Cord	7/8"	1/4"
5140	50	H.D. Battery Cable	1 1/4"	1/4"

#### Nickel Plated Rivets

No.	Quantity	Length	Diameter
5160	100	3/16"	1/8"
5161	80	1/4"	3/8"
5162	70	5/16"	3/8"

#### Nickel Plated Eyelets

No.	Quantity	Length	Size of Hole
5170	100	1/4"	3/16"
5171	90	5/16"	3/8"
5172	80	5/16"	7/64"
5173	75	5/16"	11/64"

#### Cable Clamps

No.	Quantity	Size
5200	35	3/4" long x 5/16" Bend
5201	30	1" long x 1/2" Bend

#### Angles and Brackets

No.	Quantity	Size
5207	25	7/16" x 7/16" x 5/16"
5205	16	5/8" x 1" x 3/8" wide
5206	15	1/2" x 1 1/8" x 3/8" wide

### ICA INSULATED AND BRASS SPACERS AND BUSHINGS

Used for raising sub panels, chassis, condensers, etc. For manufacturers, experimenters and laboratory use.

#### Made of High Quality Brass

No.	Diameter	Length	per C
5760	1/4"	3/8"	\$2.40
5761	1/4"	3/4"	3.00
5762	1/4"	1 1/2"	3.30
5763	1/4"	3"	3.60
5764	3/8"	1 1/2"	3.30
5765	3/8"	1 1/2"	3.90
5766	3/8"	3/4"	4.20

25 in Standard Package

#### Made of Fenoline Insulation

No.	Diameter	Length	per C
5775	1/4"	3/8"	\$2.40
5776	1/4"	3/4"	3.00
5777	1/4"	1 1/2"	3.30
5778	1/4"	3"	3.60
5779	3/8"	1 1/2"	3.30
5780	3/8"	1 1/2"	3.90
5781	3/8"	3/4"	4.20

25 in Standard Package

#### Threaded Brass Bushings—1/4" Diameter

No.	Size	Length	per C
5785	for 6/32 screw	3/8"	\$3.30
5786	"	1/2"	4.20
5787	"	1 1/2"	4.80
5788	"	3"	5.40
5790	for 8/32 screw	1/4"	3.30
5791	"	3/8"	4.20
5792	"	1 1/2"	4.80

25 in Standard Package

### ICA FUSE MOUNTINGS

No. 2340—Flush Mounting	Net \$1.15
No. 2341—Panel Type	Net .15

### ICA ANGLES AND BRACKETS

An assortment of Angles and Brackets commonly used in the radio and electrical fields.

No.	Size	Width	Description	per C
5702	7/16 x 7/16"	3/8"	Angle Bracket	\$1.50
5703	5/8 x 1"	3/8"	Angle Bracket	1.80
5704	1/2 x 1 3/8"	3/8"	Angle Bracket	3.60
5705	1/2 x 1 1/2"	1/2"	One hole tapped for 8/32—other plain	3.60

100 in Standard Package

### ICA MASTER SCREW AND NUT ASSORTMENT

Contains a substantial quantity of all the popular sizes machine screws, wood screws, Parker-Kalon self-tapping screws and nuts to match.

No. 5252 ..... Net \$3.30

### ICA ALL-PURPOSE RADIO HARDWARE AND ESSENTIAL EQUIPMENT

Packed in a handy indestructible metal utility case. This De Luxe assortment includes such items as knob set screws — escutcheon screws — Parker-Kalon self-tapping screws — rubber grommets — screws — nuts, etc.

No. 5251 ..... Net \$2.85

### ICA FIBRE WASHER ASSORTMENT

A representative assortment of fibre washers both plain and shoulder, to fit all popular size screws and bolts.

No. 5805 ..... Net \$5.11  
Contains 100 assorted washers

### ICA RUBBER GROMMET ASSORTMENT

Assortment contains popular sizes used in Radio and Electrical Work.

No. 5810 ..... Net \$5.11  
Contains 28 Rubber Grommets  
No. 5811 ..... Net \$9.00  
Contains 60 Rubber Grommets

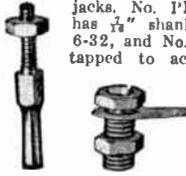

### ICA ANGLE AND BRACKET ASSORTMENT

A complete assortment of 30 popular angles and brackets, nickel plated finish.

No. 5800 ..... Net \$5.11

### BANANA PLUGS & JACKS

Intended for all purposes where it is desirable to make a coil, condenser, etc., easily removable. Plugs have heavy spring contacts which fit snugly into the jacks. No. PL-470 plug has  $\frac{1}{8}$ " shank, threaded 6-32, and No. PL-469 is tapped to accommodate a 6-32 screw. No. PJ-949 Jack fits into  $\frac{1}{4}$ " hole. All types packed 25 to a box.

Cat. No.	Your Cost
PL-470	\$0.09
PL-469	.09
PJ-949	.09

### INSULATED BANANA PLUG AND JACK

Positive spring action insures perfect contact.

Cat. No.	Type	Color	Your Cost
PL-477R	Plug	Red	\$0.12
PL-477B	Plug	Black	.12
PJ-478R	Jack	Red	.11
PJ-478B	Jack	Black	.11

### GIANT INSULATED BANANA PLUG AND JACK

Excellent Plug and Jack for all heavy duty purposes. Plug has large wiping area, positive spring action making perfect contact.

Cat. No.	Type	Color	Your Cost
PL-475R	Plug	Red	\$0.27
PL-475B	Plug	Black	.27
PJ-476R	Jack	Red	.21
PJ-476B	Jack	Black	.21

### MICROPHONE JACKS

These panel mounting jacks for control panels and similar applications where space is at a premium. Nickel plated finish, contacts of spring brass. Jacks come complete with insulated washers. Will accommodate standard plugs.

Cat. No.	Contacts	Your Cost
J-1038	2	\$0.24
J-1058	3	.36

### PHONE PLUGS

Metal parts machined from brass, and nickel plated. Unshielded plugs have handles of black bakelite, and shielded types brass knurled handles, nickel plated. No. FP-1946 Without Handle, is used as an adapter between a female microphone cable connector and a regular phone plug jack.

Cat. No.	Contacts	Handle	Your Cost
FP-230	2	Bakelite	\$0.30
FP-282	2	Shielded	.51
FP-1057	3	Bakelite	.57
FP-284	3	Shielded	.84
FP-1946	2	None	.21

### MIDGET JACK

This jack has applications where there's limited space behind panel. Spring brass contact assures a good connection. Supplied with insulating washers. Accommodates standard phone plugs.

Cat. No.	Type	Your Cost
J-232	Open Circuit	\$0.21
J-233	Closed Circuit	.27

### GENERAL PURPOSE JACKS

Although small in size, careful design and high quality materials assure dependable service. Spring is nickel silver; permits snap action and positive tension. Circuit opening contacts made of pure silver. Laminated bakelite insulation prevents breakdown between springs at all ordinary voltages. Supplied with panel insulating washers.

Cat. No.	Contact Arrangement	Your Cost
J-1324	Open circuit	\$0.27
J-1325	Closed circuit	.30
J-1326	3-contact open circuit	.36
J-1327	Break contact on tip and ring spring	.39
J-1328	Separate make contact springs	.39
J-1329	Break contact on tip spring—separate make contact spring	.45
J-1330	Break-make contact on tip spring	.39

### SINGLE CONTACT CABLE CONNECTORS

Unbreakable contacts for single-conductor microphone cable are provided by these shielded connectors. Made of brass, nickel plated. Accidental disconnections impossible by coupling ring which, when tightened, insures perfect contact between soldered connections. Cord protectors of steel spring wire will take cables up to  $\frac{1}{4}$ " in diameter.

CN-245

CN-244

Cat. No.	Description	Your Cost
CN-244	S. C. Female	\$0.30
CN-245	S. C. Male	.24

### CHASSIS UNITS

Male Connector designed for chassis mounting in connection with CN-244. Where ground to chassis is desired, mount in  $\frac{3}{8}$ " hole; for two circuits independent of chassis, mount in  $\frac{1}{2}$ " hole; insulating washers are furnished.

Cat. No. CN-246 Your Cost \$0.18

### JACK CONNECTORS

Used on the end of an extension cable for speakers, earphones, microphones, etc. Handle construction identical with Phone Plugs. Contacts are made of spring brass. Jack fits all regular Phone Plugs.

Cat. No.	Contacts	Handle	Your Cost
JP-1039	2	Bakelite	\$0.36
JP-279	2	Shielded	.66
JP-1059	3	Bakelite	.57
JP-283	3	Shielded	.84

### PUSH-BUTTON SWITCH

Two - circuit slow-make and quick-break momentary contact switch. One circuit is "ON" and the other is normally "OFF." Pushing the button reverses the position of the circuits. Same switch is used on a number of commercial test sets. Shank is  $\frac{1}{8}$ " long.

Cat. No. SW-743 Your Cost \$0.51

### TOGGLE SWITCHES

These standard type toggle switches. Underwriter approved. Rated at 3 amps. at 125 volts or 1 amp. at 250 volts. Heavy soldering connections. Made for BUD by H. & H. Nickel plated or bronze finish. Nickel supplied unless bronze is specified. Packed 5 to a carton. Contacts silver plated, bakelite insulation.

### POWER SWITCHES

Designed for interrupting heavy currents too great for ordinary switches. Both are double pole, single throw. Rated at 12 amps.

at 125 volts or 6 amps. at 250 volts. By paralleling the contacts, making the switch single pole single throw, these ratings may be doubled. Made for BUD by H. & H. No. SW-1269 is a regular toggle type switch for all standard applications. No. SW-1270 is a push-button type with both contacts normally in the open position. Intended as a safety switch to be used in an interlock connection on rack cabinets, etc., to interrupt the primary current whenever the door is opened. Both switches are  $1\frac{1}{4}$ " long,  $\frac{3}{8}$ " wide, and  $\frac{3}{8}$ " high and have a threaded shank  $\frac{1}{8}$ " in diameter and  $\frac{1}{4}$ " long. No. SB-1348 is a bracket for holding No. SW-1270 switch in position in any rack cabinet.

Cat. No.	Your Cost
SW-1269	\$0.90
SW-1270	1.50
SB-1348—Bracket	.36

### BAT-HANDLED TOGGLE SWITCHES

Identical with the regular line of toggle switches listed below except that handle is longer and shaped like a baseball bat. Available only in nickel plated finish with  $\frac{1}{8}$ " shank. Packed 5 to a carton. Contacts are silver plated.

Cat. No.	Description	Your Cost
SW-1115	S. P. S. T.	\$0.33
SW-1118	S. P. D. T.	.42
SW-1119	D. P. S. T.	.51
SW-1120	D. P. D. T.	.66

### ROTARY SWITCHES

Used where rotary action with a knob is desired instead of toggle action. Underwriter approved. Ratings same as for toggle switches. No. DP-1230 listed below is an OFF-ON plate especially intended for these rotary switches.

Cat. No.	Des.	L	L	Your Cost
SW-499	SPST	$\frac{3}{8}$ "	$1\frac{1}{8}$ "	\$0.36
SW-1070	SPST	$\frac{1}{2}$ "	$1\frac{1}{8}$ "	.42
SW-1071	SPDT	$\frac{3}{8}$ "	$1\frac{1}{8}$ "	.45

SW-1073	DPST	$\frac{3}{8}$ "	$1\frac{1}{8}$ "	.63
SW-1074	DPST	$\frac{1}{2}$ "	$1\frac{1}{8}$ "	.72
SW-1075	DPDT	$\frac{3}{8}$ "	$1\frac{1}{8}$ "	.72
SW-1076	DPDT	$\frac{1}{2}$ "	$1\frac{1}{8}$ "	.84
DP-1230	OFF-ON Plate			.08

### ROTARY SWITCH Off-On Plate

This plate serves as an indicator for a rotary type power switch when used with a small bar knob. Cat. No. DP-1230 Your Cost \$0.08

### ETCHED DIAL PLATES

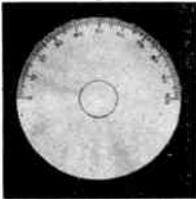

Raised polished markings on black enameled background. The plate material is aluminum, and the center holes are  $\frac{1}{2}$ " in diameter.

Cat. No.	Arc	Calib.	Markings	Your Cost
DP-1276	180°	0 to 100	Tracking	.18
DP-1179	300°	0 to 100		.18
DP-1224	300°	0 to 100	Record	.18
DP-1225	300°	0 to 100	Microph.	.18
DP-1226	300°	0 to 100	Gain	.18
DP-1227	300°	0 to 100	Tone	.18
DP-1275	300°	0 to 100	R. F. Gain	.18
DP-1228			Tone Cont.	.18
DP-1229		Arrow	Volume	.18
DP-1273		Marked 1 to 5 for Rotary Sw.		.18
DP-1274		Marked 10 to 160 for Band Sw.		.18

### DIAL PLATES

For making up special types of tuning and indicating equipment. Hand-some spun chromium finish. Numerals and divisions are die-stamped and filled with black enamel.

Cat. No.	Dia.	Arc	Calibrated	Your Cost
DP-716	2 3/4"	360°	0 to 100	.30
DP-719	2 3/4"	180°	0 to 100	.57
DP-720	2 3/4"	180°	100 to 0	.57
DP-721	4"	180°	0 to 100	.75
DP-722	4"	180°	100 to 0	.75
DP-562	3"	325°	0 to 10	.24

### UNIVERSAL DIAL PLATES

Black enameled background on aluminum, etched plates, popular for all types of installations. Universal application; calibration over the whole 360° in two divisions—clockwise over 180° from 0 to 100, and counter-clockwise from 0 to 100, over the other 180°. Center hole is  $\frac{1}{2}$ " in diam.

Cat. No.	Dia.	Arc	Calibrated	Your Cost
DP-714	2"	360°	0 to 100 to 0	\$0.18
DP-715	3"	360°	0 to 100 to 0	.24

### RECTANGULAR DIAL PLATES

These Etched Dial Plates, can be used when a more "streamlined" effect is desired. All plates are calibrated for 300° rotation, measure  $1\frac{1}{2}$ " x  $2\frac{1}{4}$ ".

Cat. No.	Marking	Your Cost
DP-978	Record	\$0.18
DP-979	Microphone	.18
DP-980	Gain	.18
DP-981	Tone	.18
DP-982		.18

### JACK NAME PLATES

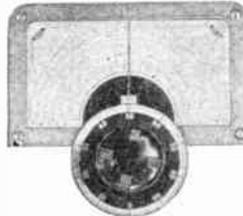

For identifying input and output circuits. Nos. DP-1262 and DP-1271 are toggle switch identification nameplates. Polished letters on black enameled background. Diameter of all plates  $1\frac{1}{2}$ ".

Cat. No.	Marking	Hole Size	Your Cost
DP-1180	Microphone	$1\frac{1}{8}$ "	\$0.12
DP-1181	Phono Pick Up	$1\frac{1}{8}$ "	.12
DP-1182	Phones	$1\frac{1}{8}$ "	.12
DP-1272	Key	$1\frac{1}{8}$ "	.12
DP-1271	On—Off	.475"	.12
DP-1262	High—Low	.475"	.12

### VERNIER DIAL—GEARED TYPE

This new and improved precision-built, vernier dial of attractive appearance, has been designed for industrial, laboratory and amateur radio applications. Many uses can be found for this gear-driven dial on electron-coupled oscillators, frequency meters, receivers and many other types of instruments and laboratory equipment which requires ease of tuning and accuracy of calibration.

Freedom from back-lash is obtained by the use of spring-loaded laminated steel gears which are of the ratio ten to one. Each dial comes furnished with three paper dial scales upon which calibration marks can be imprinted. These dial scales are printed with five calibration arcs for wave band identification and each arc is divided into five equal sections over 180 degrees, which makes each section the equivalent of one rotation of the circular dial or 100 dial divisions. This enables a calibration of 500 divisions over the entire scale.

The dial is furnished mounted, complete with all hardware, on a steel template from which the mounting holes can be easily scribed. An attractive gray crackle frame outlines the dial scale which is further protected by a "Plastaceal" window. The whole dial scale assembly mounts independent of the gear unit and may be removed any time desired without disturbing the dial drive. Mounting area of the dial is  $6\frac{1}{4}$ " x  $6\frac{3}{4}$ ". Depth behind panel is  $1\frac{1}{2}$ ".

Cat. No. D-1729 .....Your Cost \$2.70

### VERNIER DIALS—FRICTION TYPE

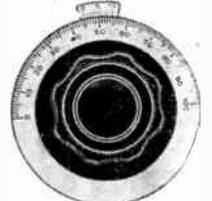

Friction drive gives smooth vernier action. Dials calibrated 0 to 100 clockwise over 360 degrees. The face of dial is glossy black enamel; rim and numerals are polished metal. Dials fit  $\frac{1}{4}$ " shafts. Included are a single line indicator and a black wheel knob on the vernier drive.

Cat. No.	Div.	Dial Dia.	Plate Height	Mtg. Holes	Your Cost
D-1944	0-100	2 3/4"	3 5/8"	1 1/8"	\$1.20
D-1945	0-100	4"	4 1/8"	2 1/4"	1.50
D-1919	Vernier Dial Drive				.13

### TUNING DIALS

Outstanding appearance; accurate calibration for transmitters, receivers, and instruments. Knobs are fluted for easy finger grip; made of bakelite. Spun finish chromium plated brass. Runs perfectly concentric with the shaft and is well insulated. Numerals, lines are die-stamped for accuracy and filled with black enamel. Dials cover 180° arc. Nos. D-1732 to D-1735 supplied with a single line indicator. Nos. D-1895 to D-1898 supplied with vernier indicators which enable readings of one part in 1000 to be made accurately.

### WITH VERNIER INDICATOR

Cat. No.	Dial Div.	Diam.	Your Cost
D-1895	0-100	2 3/4"	\$1.11
D-1896	100-0	2 3/4"	1.11
D-1897	0-100	4"	1.50
D-1898	100-0	4"	1.50

### WITH SINGLE LINE INDICATOR

Cat. No.	Dial Div.	Diam.	Your Cost
D-1732	0-100	2 3/4"	\$0.99
D-1733	100-0	2 3/4"	.99
D-1734	0-100	4"	1.50
D-1735	100-0	4"	1.50

### NAME PLATES

Made of aluminum with polished letters on black enameled background. Plates are  $\frac{5}{8}$ " x  $1\frac{1}{2}$ ". Shipping weight of 10— $\frac{1}{2}$  lb.

### CERAMIC TRANSMITTING TUBE SOCKETS

Efficient and sturdy mounting base for the larger types of transmitting tubes. Made of high grade glazed white ceramic on which are mounted the special close fitting nickel plated contacts and connection terminals.

No. S-226 accommodates all regular 4 prong tubes with standard 50 watt bases. No. S-227 is for transmitting pentodes such as the 803, RK-28, etc.

Cat. No.	No. of Contacts	Your Cost
S-226	4	\$0.66
S-227	5	.99

### LOW-LOSS TUBE SOCKETS

Each socket is constructed on a low loss glazed mold of white ceramic, with connections having a large contact area and a positive spring action. The molded step at each mounting hole eliminates any possibility of contacts shorting to chassis. Each socket is furnished with two mounting bushings and washers. Top grooved for easy tube insertion.

Cat. No.	Prongs	Width	Length	Your Cost
S-954	4	1 1/2"	2 1/4"	\$0.27
S-955	6	1 3/8"	2 1/2"	.27
S-956	6	1 3/8"	2 1/4"	.30
S-957	7 Sm.	1 3/8"	2 1/4"	.33
S-958	7 Med.	1 3/8"	2 1/4"	.33
S-959	8	1 3/8"	2 1/2"	.36

### MOLDED BAKELITE SOCKETS

The springs are of genuine phosphor bronze. Mounting hole centers are 1 1/4" apart, and the round portion of the socket extends 1/8" above base.

Breadboard Sub-panel

### BREADBOARD OR SUB-PANEL MOUNTING

Cat. No.	Prongs	Your Cost

S-380	7 Med.	.09
S-790	8 Octal	.11
S-239	8 Octal	.11

### SHIELDS

#### (A)—GLOVE TYPE TUBE SHIELDS

When space is at a premium, this line is the ideal solution to tube shielding. Shield attaches directly around tube and is ordinarily grounded by means of the clamp furnished with each unit. The grounding clip also included with each shield enables the shield to be grounded through the cathode pin should it be inconvenient to install the regular clamp.

Cat. No.	Description	Dia.	Hgt.	Your Cost
SH-943	Fits ST 12 bulb tubes	1 1/4"	4"	\$0.15
SH-944	Fits ST 14 bulb tubes	2"	4 1/2"	.15
SH-945	Fits T-9 Bantam tubes	1 1/4"	3 3/4"	.11
SH-946	Same as SH-945 with grid cap	1 1/4"	3 3/4"	.13

#### (B)—THREE-PIECE TUBE SHIELDS

The three-piece construction of these shields greatly facilitates the insertion and removal of tubes. The base mounts directly over the wafer socket on the chassis, assuring a good ground for the shield. Overall height is 4 1/2" and inside diameter is 1 1/2".

Cat. No.	Material	Mtg. Hole	Centers	Your Cost
SH-392	Aluminum	1 1/2"	1 1/2"	\$0.21
SH-391	Aluminum	1 1/2"	1 1/2"	.21

#### (C)—UNIVERSAL TUBE SHIELDS

These shields are intended for covering large diameter tubes and for all general tube shielding where space is not at a premium. Each unit is supplied with base and is 2 1/2" inside diameter. No. SH-292 is 4 1/2" high. No. SH-278 is 2 3/4" high, and makes an ideal shield for such tubes as RK-39, 807, etc.

Cat. No.	Material	Mtg. Hole	H	Your Cost
SH-292	Aluminum	1 1/2"	4 1/2"	\$0.21
SH-278	Aluminum	1 1/2"	2 3/4"	.21

#### (D)—ROUND SHIELD CAN

Perfect shielding is assured when using these aluminum cans around plug-in coils and other types of inductances. Each shield is supplied with mounting base and measures 3" in diameter and 3 1/2" high.

Cat. No.	SH-293	Your Cost
SH-293		\$0.33

#### (E)—SQUARE SHIELD CANS

The large size Aluminum Shield is well suited to house special I. F. transformers, fixed tuned tanks in exciters, etc. The small size Aluminum Shield is ideal for shielding chokes and small coils. Both are supplied with attached mounting bolts.

Cat. No.	D	W	H	Your Cost
CH-294	1 3/8"	1 3/8"	1 1/2"	\$0.18
SH-295	2"	2 1/4"	5"	.33

### HEAT RADIATING CONNECTORS

This connector has been designed to dissipate heat generated at the grid and plate terminals of transmitting tubes, thereby preventing damage to the glass seal. Nos. TC-488 and TC-489 are for wire leads. Nos. TC-1920 and TC-1921 are for cap type leads. Maximum diameter of lead accommodated by each type is indicated in "Tube Lead Size" column.

Cat. No.	For	Tube Lead Size	Lgth.	Dia.	Your Cost
TC-488	HK-24	.049"	1 1/2"	3/8"	\$0.30
TC-489	35-T, HK-54, etc.	.069"	1 1/2"	3/8"	.30
TC-1920	100-T, 807, etc.	.360"	1 1/2"	1 1/8"	.51
TC-1921	866, T-125, etc.	.560"	1 1/2"	1 1/8"	.51
TC-1923	450-TII, etc.	.110"	1 1/2"	1 1/8"	.51

### FORMED CHANNELS

In the building of skeleton R. F. Amplifiers and driver stages these channels will find uses at many points in the construction. They will also be found useful in mounting or supporting components of standard transmitters or receivers. Made of 1/8" Aluminum, they are easily drilled and cut to size.

Cat. No.	Width	Height	Length	Your Cost
AC-259	3/8"	1/2"	12"	\$0.30
AC-260	1 1/2"	3/8"	12"	.33
AC-261	2"	3/8"	12"	.39

NOTE: H—Denotes Height; D—Depth; W—Width; L—Length.

### TUBE CLIPS

Uses to which these clips may be put are clearly listed below. Made of heavy gauge spring brass, cadmium plated.

Cat. No.	Type Tube	Your Cost
TC-490	Transmitting	\$0.06
TC-107	Glass	per C 1.08
TC-108	Metal	per C 1.08

### SOLDERING IRON TIPS

This tip is made of a special copper base rod. It is 3/8" diameter x 4" long and is made particularly as a replacement for American Beauty Irons. However, it will fit many other types of irons that are designed to accommodate 3/8" dia. tips. Fits American Beauty No. 3183.

Cat. No.	IT-372	Your Cost
IT-372		\$0.36

### WALL LEAD-IN

This Lead-In is used to facilitate bringing antennas or feeders through a wall or window casing with ease and safety. Unit consists of a 12" threaded brass rod insulated with heavy fibre sleeving and two heavy ceramic insulators. Rod and insulation may be readily cut to any desired length.

Cat. No.	I-742	Your Cost
I-742		\$0.51

### INTERLOCK SWITCH-BRACKET

The Interlock Switch-Bracket is offered as a means of mounting the highly essential safety switch used in an interlock connection in rack cabinets, etc., to break the primary current when the cabinet is opened for inspection, alterations, or repairs.

The Switch-Bracket is drilled to take the 1/2" shank of a power switch. SW-1270 switch is recommended for this purpose.

Cat. No.	SB-1348	Your Cost
SB-1348		\$0.36

### SLOTTED MOUNTING BRACKET

This bracket is designed to permit the mounting of Midget Condensers, volume controls, etc., at any desired position under or on top of a chassis, at the proper distance from the chassis. Bracket is made of steel, cadmium-plated.

Cat. No.	AB-549	Approx. ship. wt. 100	Your Cost
AB-549			\$0.06

### ANGLES AND BRACKETS

A wide selection in sizes and dimensions of these angles provides for numerous uses as brackets in all types of radio transmitter and receiver construction, as well as many other pieces of electronic equipment.

C-t. No.	Type 1			Your Cost
	H	D	W	
AB-444	1/2"	1/2"	3/8"	\$1.65 C
AB-445	3/8"	3/8"	3/8"	2.31 C

AB-634	3"	3/8"	3/8"	5.28 C
AB-635	4"	3/8"	3/8"	6.60 C

### POLARIZED CONNECTORS

Where it is desirable to make dual connections readily without reversing polarity, these Connectors may be used. They are especially desirable in certain types of line terminations and microphone connections. Metal cap for shielding is supplied with plug and measures 1" in diameter and 1" long.

Two types of sockets are available. One is unshielded type designed for mounting directly on the chassis or cabinet. The other is a shielded type having the same type shell as the plug and is designed for inter-connecting microphone lines etc.

Cat. No.	Description	Contacts	Your Cost
PC-461	Plug	2	\$0.18
PC-463	Plug	3	.18
PC-462	Plain Socket	2	.15
PC-464	Plain Socket	3	.15
PC-1968	Sh. Socket	2	.18
PC-1969	Sh. Socket	3	.18

### ALLIGATOR CLIPS

Accurately made, supplied with or without insulated ends.

Cat. No.	Type	Your Cost
CL-485	Regular	\$0.06
CL-486R	Insulated Red	.12
CL-486B	Insulated Black	.12

### INSULATED MOUNTING STRIPS

Screw Type

Lug Type

### SCREW TYPE TERMINAL STRIPS

The screw-type terminals are made of cadmium plated brass and are mounted on  $\frac{1}{16}$ " thick bakelite strips. Ideal for either chassis or breadboard layouts. The screws are so made that they will lock in place and not drop out when open to their maximum length.

Cat. No.	Contacts	Mounting Centers	Your Cost
TS-1970	2	1 $\frac{1}{8}$ "	\$0.07
TS-1971	3	1 $\frac{3}{8}$ "	.08
TS-1972	4	2 $\frac{3}{8}$ "	.12
TS-1973	5	2 $\frac{5}{8}$ "	.13
TS-1974	6	3 $\frac{1}{4}$ "	.15
TS-1975	8	3 $\frac{1}{2}$ "	.21

### LUG TYPE INSULATED MOUNTING STRIPS

These strips are handy for neatly supporting resistors, condensers, etc., in circuit wiring.

Cat. No.	Lugs	Mounting Centers	Your Cost
TS-367	1		\$1.50 C
TS-368	2		2.25 C
TS-369	3		3.60 C
TS-370	4	1 $\frac{7}{8}$ "	4.50 C
TS-374	5	2 $\frac{1}{10}$ "	5.40 C
TS-375	6	2 $\frac{5}{8}$ "	6.60 C

### INSULATED ALIGNMENT TOOLS

Nos. AT-254 to AT-256 are hard fibre trimmer wrenches with  $\frac{1}{4}$ " hex. broaching through the entire length. Ends can be easily cut off as they become frayed or broken from wear.

No. AT-235 is a  $\frac{1}{4}$ " diameter rod of a special tough fibre, beveled at each end to form screw-driver blades.

Nos. AT-236 to AT-237 are combination tools consisting of No. AT-235 driver inserted in an extra-heavy fibre tube which is hex. broached the entire length. Tools may be held at any length between specified limits by set screw provided.

AT-254 to AT-256

Top illus., AT-235; bottom AT-236, AT-237

Cat. No.	Length	Your Cost
AT-254	5 $\frac{1}{2}$ "	\$0.18
AT-255	8"	.21
AT-256	12"	.27
AT-235	7"	.27
AT-236	7" to 10"	.51
AT-237	11" to 17"	.60

### ALIGNMENT TOOLS

No. AT-285 has a metal screw-driver tip at one end, and a metal alligator jaw at the other end for hex. head and knurled nuts.

No. AT-287 has a hard fibre handle with metal screw-driver at one end.

AT-285

AT-287

Cat. No.	Your Cost
AT-285	\$0.30
AT-287	.24

### 4-IN-1 TOOL

This handy alignment tool should be in the vest pocket of every service man. Consists of (1) insulated screw-driver, (2) Fin-type adjustment slot, (3)  $\frac{1}{16}$ " hex. wrench, and (4)  $\frac{1}{4}$ " hex. wrench.

Cat. No AT-118.....Your Cost \$0.51

### TEST PRODS

These tapered test prods are made of cast phenol resin. Tips screw into handle. Specify either Red or Black.

Cat. No.	Length	Your Cost
TL-187	5"	\$0.24
PT-188	2"	.11
PT-189	2 $\frac{3}{8}$ "	.11
PT-190	1 $\frac{1}{2}$ "	.11

### DE LUXE TEST LEADS

TL-620 TEST LEADS illustrated are the New BUD Superior type Test Leads made from the finest type of very flexible kinkless rubber covered wire, with polished plastic handles at both ends. Also supplied with this pair of Test Leads are two alligator clips that can be slipped on the end of the phone tips.

TL-621 TEST LEADS are supplied with two sets of prods so that the user can interchange from needle point to phone tip point.

TL-186—Same as TL-620 less Alligator Clips.

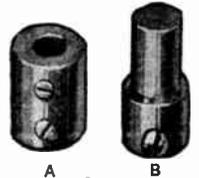

TL-397S and TL-397P. Have Plastic Handles with special chuck points holding removable needle tips for piercing through insulation.

TL-398S and TL-398P. Are supplied with Plastic Handles and Standard Phone Tip Plugs that can be removed from insulated handle in case of wire breakage.

Cat. No.	Prod End Phone Tip	Terminals Alligator Clip or Phone Tip	Your Cost
TL-620			\$0.90
TL-621	Needle Point or Phone Tip	Phone Tip	.90
TL-186	Phone Tip	Phone Tip	.81

SE-1979	$\frac{1}{4}$ " x 12" Bakelite Shaft		.54

### SPEAKER AND EARPHONE CORDS

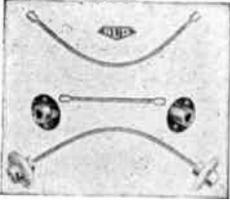

These cords are made of kinkless stranded wire covered by a double braid with interwoven tracers. Each cord is 5 feet long, and the set ends are terminated with phone tips. The other ends may be had with either phone tips or eyelets. No. SC-546 is for speaker or single earphone. No. SC-547 is for regular dual earphone headset.

Cat. No.	Type	Your Cost
SC-546 T	Tips	\$0.36
SC-546 E	Eyelets	.36
SC-547 T	Tips	.45
SC-547 E	Eyelets	.45

## FLEXIBLE SHAFT COUPLINGS

When construction necessitates the mounting of condensers or potentiometers away from the panel and at unusual angles, these Flexible Shafts simplify panel control problems. Nos. FS-859 and FS-860 have  $\frac{1}{8}$ " bushings sweated to each end. Nos. FS-862 and FS-863 have Steatite insulated couplings attached to each end to fit  $\frac{1}{4}$ " shafts.

Cat. No.	Overall Length	Your Cost
FS-859	3"	\$0.27
FS-860	6"	.36
FS-862	4"	.87
FS-863	7"	.99

## INSULATED FLEXIBLE COUPLINGS

Tandem operation of two or more units is readily accomplished through the use of these couplers. Direct shaft alignment is not essential, and all couplers are made to fit  $\frac{1}{4}$ " shafts.

Cat. No.	Diam.	Insulation	Cost
FC-845	$1\frac{1}{8}$ "	Bakelite	\$0.24
FC-855	$1\frac{1}{2}$ "	Bakelite	.27
FC-795	$1\frac{1}{8}$ "	Ceramic	.33

## HIGH VOLTAGE FLEXIBLE COUPLINGS

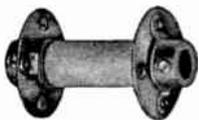

Permits unusual wide gap between shaft connections, freedom from backlash; flexibility. Springs are attached to glazed Steatite discs  $1\frac{1}{2}$ " in diam. and  $\frac{3}{8}$ " thick. Overall diameter of finished coupling is  $1\frac{1}{4}$ ". Coupling accommodates  $\frac{1}{4}$ " shaft. Springs also attached to Bakelite discs  $1\frac{1}{2}$ " in diameter.

Cat. No.	Insulation	Your Cost
FC-614	Steatite	\$0.45
FC-619	Bakelite	.33

## TRANSMITTER FLEXIBLE COUPLINGS

Will withstand exceptionally high voltage. Recommended for gauging of tuning units in R. F. or high potential circuits. The main body of these couplings is a glazed ceramic rod, and hubs are made to fit  $\frac{1}{4}$ " shafts.

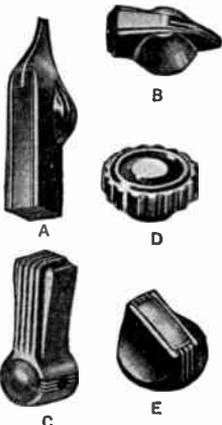

Cat. No.	Length	Your Cost
FC-740	$1\frac{1}{4}$ "	\$0.45
FC-741	$3\frac{1}{4}$ "	.54

## PANEL BEARING ASSEMBLIES

Nos. PB-530 and PB-531 consist of a regular  $\frac{1}{4}$ " shaft bearing with 6" and 3" length of  $\frac{1}{4}$ " brass rod inserted and held in place by washers to prevent shaft from shifting. These two numbers will be found very useful in facilitating the panel control of condensers, potentiometers, etc., which must be mounted a distance from the panel. Bearing fits in  $\frac{1}{8}$ " hole and on panels up to  $\frac{1}{8}$ " thick. No. PB-532 is bearing only without shaft.

Cat. No.	Overall Length	Your Cost
PB-530	6"	\$0.30
PB-531	3"	.24
PB-532	Bearing Only	.12

## RADIO KNOBS

Cat. No.	Type	Diam. In.	H. In.	Color	Your Cost
K-579	A	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Black	\$1.11
K-580	A	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Walnut	.11
K-174	A	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Red	.13
K-204	A	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Green	.13
K-581	A	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Black	.12
K-582	A	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Walnut	.13
K-175	A	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Red	.15
K-205	A	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Green	.15
K-575	B	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Black	.11
K-576	B	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Walnut	.11
K-559	B	$1\frac{1}{4}$ "	$\frac{1}{2}$ "	Red	.13
K-577	B	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Black	.13
K-578	B	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Walnut	.13
K-560	B	$2\frac{1}{4}$ "	$\frac{1}{2}$ "	Red	.15
K-521	C	2"	$\frac{1}{2}$ "	Walnut	.15

NOTE: All knobs fit standard  $\frac{1}{4}$ " shaft.

## JEWELS

Ideal for replacement purposes and many other signal indicating requirements. The jewel holders are nickel-plated brass and fit panels up to  $\frac{1}{4}$ " thick. Colors available are Red, Green, Amber, Blue, Opal and Crystal. Specify color of jewel desired. Packed 10 to a box.

Cat. No.	Jewel	Dia.	Dia. of Bezel	Mntg. Hole	Your Cost
JL-1696F	Facetted	$\frac{1}{2}$ "	$\frac{1}{8}$ "	$\frac{3}{8}$ "	\$0.12
JL-1696S	Smooth	$\frac{1}{2}$ "	$\frac{1}{8}$ "	$\frac{3}{8}$ "	.12
JL-1697F	Facetted	$\frac{3}{4}$ "	$\frac{1}{8}$ "	$\frac{1}{2}$ "	.33
JL-1691F	Facetted	1"	$\frac{1}{4}$ "	1"	.60

## ONE INCH JEWEL LIGHT ASSEMBLIES

Ideal indicators for Radio and Electrical Panel Switchboards, Amplifiers, Laboratory Equipment, Signal Devices, etc. Removable jewel provides instant access to bulb from front of panel. Available with miniature screw, miniature bayonet, or candelabra type sockets. Facetted and smooth-faced jewels can be supplied in Red, Green, Amber, Blue, Opal and Crystal. Specify color of jewel desired. The jewel holder is chrome plated. The mounting bracket depth is 2". A 1" diameter mounting hole is required.

Cat. No.	Type Socket	Jewel	Your Cost
JL-1698F	Candelabra 110 volt	Facetted	\$0.78
JL-1698S	Candelabra 110 volt	Smooth	.78
JL-1699F	Miniature Screw	Facetted	.78
JL-1699S	Miniature Screw	Smooth	.78
JL-1699FB	Miniature Bayonet	Facetted	.78
JL-1699SB	Miniature Bayonet	Smooth	.78

## $\frac{3}{4}$ " JEWEL LIGHT ASSEMBLIES

Supplied only with candelabra type sockets for 110 volt bulbs. Facetted jewels in Red, Green, Amber, Blue, Opal, and Crystal can be supplied. Specify color of jewel desired. Jewel holder is chrome plated. Overall height is 2"; depth behind panel is 1". An  $\frac{1}{4}$ " diameter mounting hole is required.

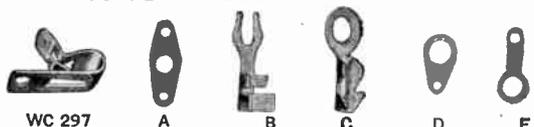

Cat. No. JL-1695F Type Socket: Cand. 110 V. Jewel: Facetted Your Cost \$0.45

## $\frac{1}{2}$ " JEWEL LIGHT ASSEMBLIES

Available with either miniature screw, miniature bayonet or candelabra type sockets. Red, Green, Amber, Blue, Opal, and Crystal can be supplied. Specify color of jewel. Jewel holders nickel-plated brass. Overall height is  $1\frac{1}{2}$ "; depth behind panel is 1". A  $\frac{1}{8}$ " diameter mounting hole is required. Packed 5 to a box.

Cat. No.	Type Socket	Jewel	Your Cost
JL-1692F	Miniature	Facetted	\$0.21
JL-1692S	Miniature	Smooth	.21
JL-1693F	Cand. 110 volt	Facetted	.21
JL-1693S	Cand. 110 volt	Smooth	.21
JL-1694F	Min. Bayonet	Facetted	.21
JL-1694S	Min. Bayonet	Smooth	.21

## SOLDERING LUGS AND TERMINALS

No. WC-297—Spring Wire Clips. For solderless connections. Holds up to No. 10 wire. Spring brass.  $\frac{3}{8}$ " x 1". Shp. wt. 100, 1 lb. Cat. No. WC-297.....Your Cost per C \$1.20

Cat. No.	Type	Length	Mounting Hole	Width	Wire Opening	Your Cost per C

## NEW BUD MICROPHONE STANDS

Bud Microphone Stands of the adjustable type, now incorporate a New Feature which does away with loosening and tightening of nut in order to change the height. Just what you and your customers have been looking for.

### STUDIO FLOOR STAND

MS-586

The Base is a three-legged casting with a spread of 17". The advantages of using a microphone stand with this type of base are apparent. Should the microphone stand be placed on a floor that is not level, this tripod will sit solid on the floor and eliminate any possibility of vibration which can be transmitted into the microphone. The cast base is painted with a durable Black Crackle Enamel and then baked to insure a lasting finish.

The two telescoping sections are made of heavy gauge seamless brass tubing, chrome-plated, adjustable height 35" to 67". Top of stem threaded  $\frac{1}{2}$ "-27 for the usual crystal, velocity and dynamic microphones.

NEW FRICTION CLUTCH (patent applied for), Exclusive Bud Feature, incorporated in this Microphone Stand.

Cat. No. MS-586—Ship. wt. 11  $\frac{1}{2}$  lbs.  
Your Cost .....\$6.60

### JUNIOR FLOOR STAND

MS-584

This Junior Floor Stand represents an unusual value in a high quality Microphone Stand. This Microphone Stand is ideal for all general-purpose uses. The same fine chrome-plated brass tubing is used in this stand as described above with the exception that the outer tubing is smaller in size.

The base, 10" in diameter, has a long extended boss which acts as a protection to the threads on the tubing. Height adjustment 33" to 60" with upper stem threaded  $\frac{1}{2}$ "-27 to fit all popular makes of microphones.

Cat. No. MS-584—Shipping weight 10 lbs.  
Your Cost .....\$5.61

### DE LUXE FLOOR STAND

MS-585

This De Luxe Floor Stand is the finest available in sturdy, heavy duty microphone stands. Base is a modernistic, massive 12" casting with an extended boss which prevents tubing from breaking off at the threaded part which screws into the base should the base be tipped or an excessive strain be put on tubing. Base is finished in Black Crackle Enamel.

The tubing is of heavy gauge seamless brass; finished in highly polished chrome plate. Outside stem is 1" in diameter and inside stem is  $\frac{1}{2}$ " in diameter. Height adjustments can be quickly and silently made, simply by raising or lowering the upper section.

The two telescoping sections can be adjusted from 35" to 67". Top section threaded  $\frac{1}{2}$ "-27 to fit crystal, velocity or dynamic microphones. NEW FRICTION CLUTCH Exclusive Bud Feature used in this Microphone Stand.

Cat. No. MS-585—Shipping weight 14 lbs.  
Your Cost .....\$7.92

### ADJUSTABLE BANQUET STANDS

MS-590, MS-591

Well constructed with six inch cast base finished in Black Crackle.

Seamless brass tubing, chromium-plated, makes these stands beautiful in appearance as well as durable. NEW BUD FRICTION CLUTCH embodied in the telescoping stems offers quick and reliable adjustments of the height. The brass stem is threaded  $\frac{1}{2}$ "-27 for standard crystal, velocity and dynamic microphones.

MS-590, adjustable 10" to 16". MS-591, adjustable 13" to 22".

Catalog No.	Shipping Weight	Your Cost
MS-590	4 $\frac{1}{2}$ lbs.	\$3.30
MS-591	5 lbs.	3.78

### MICROPHONE DESK STAND

MS-589

No. 589 Desk Stand is intended for use on desks, pulpits and pedestals. Base measures 6" diameter and is finished in Black Crackle Enamel. Tubing is brass chrome-plated. Height from bottom of base to top of stem is 8". Stem threaded  $\frac{1}{2}$ "-27 and will fit all microphones.

Cat. No. MS-589—Shipping weight 3  $\frac{1}{4}$  lbs.  
Your Cost .....\$1.50

### MICROPHONE DESK STAND

MS-588

This Stand suitable for use on pulpits, pedestals, desks, and with recording outfits. Base 5" in diameter. Modernistic design, tubing chrome-plated. Overall height without microphone 6". Stem is threaded  $\frac{1}{2}$ "-27 to fit all microphones.

Cat. No. 588—Shipping weight 2 lbs.  
Your Cost .....\$1.17

# AMERICAN RADIO HARDWARE CO., INC.

## STANDARD KEY with BASE (S.C. Key J-38)

For amateur use in code practice and code training classes. Mounted on a triple X bakelite base, 1/4" thick, 4 3/4" long, and 3" wide. Where necessary binding posts and contacts are insulated with a high grade bakelite washer. Fully adjustable, well balanced operating lever. All tension and adjusting screws are knurled. Polished nickel silver shorting spring for positive contact. The contacts are of high grade tungsten securely fastened to eliminate any chance of coming loose in operation. Also available with wood base.

No.	Type	Price
519	Key with Bakelite Base	\$5.00
467	Key Less Bakelite Base	3.50

## J-37 KEY

A sending key with molded phenolic base. Key lever is heavy phosphor bronze. Spring steel lever spring. All hardware finely machined brass. With stands voltage breakdown between contacts of 1000 volts raw A.C. and insulation of 1000 megohms.

No. 520	Price	\$5.00
---------	-------	--------

## PANEL BEARING ASSEMBLY

Useful in facilitating the panel control of condensers, switches, potentiometers, etc. Flexible coupling can be attached to assembly shafts. Each shaft is grooved and "C" washers are placed on each end to prevent shaft from moving in and out of the bearing.

No.	Type	Price Each
1625	6" long	\$0.50
1624	3" long	.47
1613	1 1/2" long	.60
1612	Bearing only	.20

## INSULATED GRID CAPS

Consist of a sturdy cadmium plated brass clip fastened within an ARH-COITE shell. 12" wire, with a solderless phone tip on one end. Fits standard glass tube cap.

No.	Type	Price Each
418	Glass tube cap	\$0.30

## BAYONET TYPE DIAL SOCKETS

For use with bayonet type pilot bulb. Shell is securely cycled to the bracket proper. Center contact permits constant and positive pressure on bulb contact. Slotted or clip-on type bracket.

No.	Type	Price per C
1538	Straight UP bracket	\$12.00
1539	Straight DOWN bracket	12.00
1540	UP clip-on bracket	12.00
1541	DOWN clip-on bracket	12.00

## BRACKET TYPE LIGHT SOCKETS

Socket can be used on practically all sets. Bracket is adjustable over a wide range, to set properly on any dial. Socket available for miniature base or Candelabra base bulb. UP or DOWN type. Adjustment hole is 7/8" long and 7/16" wide. Overall height is 1 1/4".

No.	Type	Price Each
36	Min. Base UP Bracket	\$12.00
37	Min. Base DOWN Bracket	12.00
272	Can. Base UP Bracket	12.00
273	Can. Base DOWN Bracket	12.00

## NEW METAL TUBE GRID CAPS

Spring steel in two models—one without a hole and one with a hole in the tail of the cap. Fits all standard miniature grid caps. Will take wire up to 3/8" diameter.

No.	Type	Price per M
114	Glass Tube Caps	\$5.50
121	Metal Tube Caps	5.00

## INSULATED GLASS TUBE GRID CAPS

Designed to accommodate the standard glass tube grid cap. Spring brass clip assures permanent wiping contact. 12" wire, shielded or plain. Stand lard colors.

No.	Type	Price Each
139	12" plain wire	\$0.18
140	12" shielded wire	.25

## DUAL GRID CAP

Standard glass tube cap or small metal tube grip cap. Cadmium plated brass clips, securely cycled together. 15" wire and standard phone tip or cap less wire. Cap made of ARH-COITE. Available in various colors.

No.	Type	Price Each
412	With 15" wire	\$0.35
413	Less wire	.30

## CLIP-IN SOCKETS

A radically new design, constructed so that it may be clipped into a dial directly. This facilitates maintaining and changing of bulbs. Requires mounting slot 3/4" long and 3/8" wide. Made of cadmium plated tempered steel to assure a permanent grip.

No.	Type	Price per C
1759	Screw shell type, 2 lugs	\$12.00
1760	Bayonet type, 2 lugs	12.00
1806	Candelabra type, 2 lugs	15.00

## GRID CAP SHIELD

Fits firmly over the grid cap completely shielding the tube. Cadmium plated or black finish.

No.	Type	Price Each
92	Cadmium plated	\$0.15
94	Black	.20

## PANEL INDICATOR

## DIM-E-ROID (Registered)

Suitable for use on instrument boards, signal systems, or any other apparatus, where it is required to adjust the intensity of the indicator light. Rough handling or usage will not affect the manual adjustment. Complete with a special designed clip bracket that won't jar loose or come apart; cannot be removed without unmounting the lamp. Bayonet base shell, which is insulated with a rice paper shell and two 12" leads of Underwriters' Approved wire—mounts in 5/8" diameter hole—projects 5/8" from front of mounted surface—3/8" diameter—1 1/4" overall. Red or green lens.

No. 1920	Price	\$4.00
----------	-------	--------

## GIANT PANEL INDICATORS

Each pilot light indicator can be individually marked, by writing in the desired copy on the card disc supplied with each unit. When pilot lamp is illuminated, the writing is able to be seen three feet away. Bayonet or miniature type screw shell sockets. Mounts in 3/4" hole in panels up to 3/8" thickness. Indicator is 1" in diameter and extends 1 1/2" behind panel. Green, red, blue and crystal.

No.	Type	Price Each
1872	Bayonet	\$1.00
1873	Miniature screw shell	1.00

## NEW PANEL LIGHT ASSEMBLY

Pilot light is accessible from front of panel. Assembly mounts in a single hole 5/8" in diameter extends behind the panel for a distance of 1/2", and projects from the front panel distance of 5/8" and may be used on panels up to 3/8" in thickness. Red, green or amber caps.

No.	Type	Price Each
1870	Miniature screw socket	\$0.60
1871	Bayonet base socket	.60

## PANEL INDICATOR BRACKET

For use on all types of test equipment, receivers, or transmitters, or wherever an indicator lamp is used. The indicator mounts in a single hole 7/16" in diameter and can be used on panels up to 5/16" in thickness. Red, blue, white, green or amber glass jewels.

No.	Type	Price Each
38	Miniature socket	\$0.45
93	Candelabra socket	.60
95	Bayonet socket	.45

## HORIZONTAL PANEL INDICATOR ASSEMBLY

This departure in design of panel indicators has many outstanding features. The bulb fits into the jewel so the maximum light is concentrated thru the jewel. Red, green, amber, blue and white jewels.

No. 88	Price Each	\$0.85
--------	------------	--------

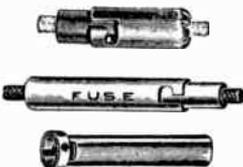

## GLASS JEWELS

Threaded shank or nut for force fit into the panel. Jewel is 3/4" in diameter and mounts in a 7/16" hole. Red, green, amber, white and blue.

No.	Type	Price Each
1545	Threaded	\$0.20
1546	Force	.18

## ANTENNA AND FUSE CONNECTORS

Made for automobile quick connections either on the antenna or ground line as well as for the standard three AG automobile fuses.

No.	Type	Price per C
221	Antenna connector	\$10.00
222	Fuse retainer	15.00
231	Reinforced ring	17.00
232	Reinforced ring	20.00

## HEAVY DUTY POWER SWITCHES

Made by H & H, for use in motors, transmitters, amplifiers, and other circuits where heavy current is carried. Three types with neutral off in center position. Rated at 10 amps, 125 volts, 2" long, 1" high, 1 1/4" wide, mounting sleeve diameter 3/4".

No.	Type	Price Each
1041	D.P.D.T.	\$5.00
1042	T.P.D.T.	7.50
1043	A.P.D.T.	11.00

## TOGGLE SWITCHES

Toggle switches by Hart and Hegeman. Capacity 1 amp, 250 volts—3 amps, 125 volts. Nickel plated.

No.	Type	Shaft Length	Price Each
1020	S.P.S.T.	15/32"	\$0.50
1021	S.P.S.T.	1"	.55
1022	S.P.D.T.	15/32"	.70
1023	S.P.S.T.	1"	.75
1024	D.P.S.T.	15/32"	.85
1025	D.P.S.T.	1"	1.00
1028	D.P.D.T.	15/32"	1.10
1027	D.P.D.T.	1"	1.20
1026	On and Off Name Plate		.05

## BAT HANDLE TOGGLE SWITCHES

Same as above with Bat shaped handle. Shaft length 15/32". Nickel plated.

No.	Type	Price Each
1029	S.P.S.T.	\$0.50
1030	S.P.D.T.	.70
1031	D.P.S.T.	.85
1032	D.P.D.T.	1.10

# RADIO ESSENTIALS, INC.

EXCLUSIVE DISTRIBUTORS OF ARHCO TO THE RADIO PARTS JOBBERS

### FLEXIBLE COUPLING

Flexible coupling with a square ceramic insulation  $5/32$ " thick. Couples standard  $3/4$ " shafts without necessity of close alignment. Springs of tough phosphor bronze, all other hardware brass. Overall length approximately  $3/4$ ". 1-3/16" square. No. 1922.....Price \$0.75

**ROUND TYPE COUPLING**  
Similar to No. 1922 except ceramic is 1" diameter round, and  $5/32$ " thick. Bushings of brass, spring of phosphor bronze. Overall length  $3/4$ ". No. 1921.....Price \$0.55

**LONG PIN BINDING POST**  
 $3/4$ " high without the threaded portion. Alongside the threaded portion, there is a small pin forced in the post so that it can be assembled in a set position on any type of apparatus. Stem is  $9/16$ " long threaded  $6/32$ ". Overall length 1-5/16". 1/16" soldering tip, polished or dull nickel finish. Also available with the following engraved heads:  
ANT GND TR CFI REC G A +  
No. 1756—Blank.....Price Each \$0.60

**SHORT PIN BINDING POST**  
 $3/4$ " high without threaded portion. Alongside the threaded portion is a small pin forced into the post so that it can be assembled in a set position on any type of apparatus. Stem is threaded  $6/32$ " x  $1/4$ " long. Overall length 1". Can also be furnished with the threaded portion in various lengths. Also available with the following engraved heads:  
ANT GND TR CFI REC G A +  
No. 1755—Blank.....Price Each \$0.55

**SPECIAL BINDING POST**  
 $3/4$ " overall. For use in any chassis where long screws, insulating washers, lugs or any combination of parts may be needed for mounting to Binding Post. Also available with the following engraved heads:  
ANT GND TR CFI REC G A +  
Engraved posts \$0.05 additional list.  
No. 1812.....Price Each \$0.40

**HEAVY DUTY ALL METAL BINDING POST**  
This binding post is all brass with a highly polished nickel finish, overall length  $1 1/2$ ". The stem of the post is  $3/4$ " long threaded 10-32. The knurled cap has a receptacle on top which can be used to accommodate standard banana plugs. Hole in body is .136" diameter to accommodate wire or phone tips. Stem is provided with a tin for soldering.  
No. 1751.....Price Each \$0.60

**COMBINATION INSULATED BINDING POSTS PLUG AND TIP JACK TYPE**  
Accommodates standard banana plugs through the top of post, a standard phone tip through side or, as more ordinarily used, with a wire through side. Suitable for test equipment and laboratory instruments. Standard colors.  
No. 143.....Price Each \$0.25

### SINGLE JACK (SC. Type JK-34A)

Made of special brass, heavy nickel plated. Will accommodate phone plugs Signal Corps type PL-55, PL-155 and all standard 2-circuit phone plugs.  
No. 1798.....Price Each \$0.60

### DOUBLE JACK (SC. Type JK-33A)

Made of brass, heavy nickel plated and can be used with plugs Signal Corps No. PL-68, PL-168 and all standard 3-circuit plugs.  
No. 1799.....Price Each \$0.75

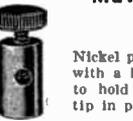

### NON-SEPARABLE HEAD POSTS

Brass nickel plated insert and brass nickel plated washer. The body of the post is drilled for the insertion of a phone tip or a solderless lug. Equipped with a solder insulating washer and a  $6/32$  nut for mounting.  $1/2$ " high and has a  $1/2$ " insulated head in red, black, blue, green, yellow, purple and white.  
No. 154.....Price Each \$0.22

### ALL METAL BINDING POST

For high amperage work or for test equipment where low resistance connections are imperative. Nickel plated brass. Approximately  $1/4$ " high.  
No. 32 Price per M \$25.00

### METAL BINDING POSTS

Nickel plated brass, supplied with a knurled  $6/32$ " screw to hold the wire or phone tip in place.  
No. 1910 Price per C \$10.00

### INSULATED BINDING POST

With a  $1/4$ " or a  $3/8$ " diameter head. Identification is made possible by the bright colored head.

No.	Dia.	Price Each
146.....	$1/4$ "	\$0.15
147.....	$3/8$ "	.15

### BINDING POST HEADS

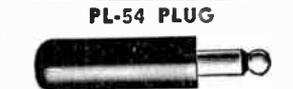

For use in noise eliminators, vibrators, etc. The heads are knurled and have a threaded portion which eliminates need for a brass insert. The head is completely insulated. Standard colors.

No.	Dia. of Head	Thread	Price per C
1817.....	$3/8$ "	6/32	\$6.00
1818.....	$1/2$ "	8/32	8.00

### PL-55 PLUG

PL-55 is standard telephone plug made in novel manner by molding internal insulation. A tenite shell serves as insulated handle. Ample accommodations for cordage serving on rear end. Distance from shoulder to center of ball contact is 1". Overall length of plug 2-13/16". handle  $2 1/2$ " long. Withstands breakdown of 1000 volts.  
No. 1782.....Price Each \$1.35

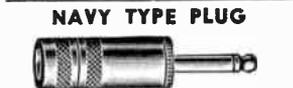

### PL-54 PLUG

PL-54 is shorter, made to mate with JK-26 jack. Overall length 2-7/16". Otherwise has same features as PL-55.  
No. 1781.....Price Each \$1.35

### JK-26 MATE OF PL-54

Overall length  $2 3/4$ ". Diameter of insulated shell  $1/2$ ". Three-leaf phosphor spring of spring temper reinforced bronze, mounted on a sturdy brass body. Bakelite sheet insulation  $1/16$ " thick. Two tinned lugs. Withstands 1000 volts A.C. breakdown across terminals.  
No. 1783.....Price Each \$1.25

### NAVY TYPE PLUG

Standard two-circuit telephone plug. heavy duty type, all brass except for insulation sleeve. Rubber retaining ring in cap at rear end holds cable firmly. Overall length approximately 3". Barrel diameter  $11/16$ ". Length of barrel  $1 1/4$ ". Plug withstands voltage breakdown of 500 volts A.C. between terminals. Fits in standard  $3/4$ " diameter jacks of long-frame two-circuit type.  
No. 1784.....Price Each \$1.45

### NAVY TYPE JACK

A sturdy 2-circuit, four spring type, long-frame, telephone jack. Brass frame,  $3/4$ " thick,  $1/2$ " wide. Heavily insulated between contacts and between frame and contacts. Mounts in a panel with  $3/8$ " diameter hole. Three brass washers of different thicknesses  $1/32$ ",  $3/32$ " and  $5/32$ " allow mounting on panels of various thicknesses. Contact springs have tinned lug ends for soldering.  
No. 1785.....Price Each \$0.70

### MIDGET PHONE JACKS

J-670—Open circuit jack midget type. Sturdy phosphor bronze spring. Heavily insulated  $1/16$ " thick bakelite. Mounts in  $3/8$ " hole in panels up to  $1/4$ " thick. Ground connection through lug forms part of the frame. All parts but spring and insulation of brass.  
No. 1795.....Price Each \$0.40

**DOUBLE JACKS**  
J-671—Same features as 1795 except it is 3-circuit microphone jack.  
No. 1796.....Price Each \$0.50

### PHONE PLUG

For use with all standard size jacks; available in a variety of solid colors. Will accommodate two phone cord tips or lugs which are held securely in place with two binding head screws.  
No. 128.....Price Each \$0.59

### SHIELDED PHONE PLUG

Designed for use with all standard size jacks. Brass finished with a heavy chrome plating. The barrel contains an insulating tube to prevent any possible loose strands of wire from shorting against the barrel. Accommodates two phone cord tips or lugs which are held securely in place with two binding head screws.  
No. 218—Shielded phone plug.....\$0.65

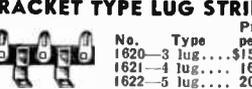

### JUNIOR SHIELDED PHONE LUG

Barrel contains an insulating tube which prevents any possibility of loose strands of wire shorting. Accommodates two phone cord tips or lugs which are held securely in place with two binding head screws. Overall length  $2 1/4$ ". Fits all standard size jacks.  
No. 219—Phone lug .....\$0.60  
1791—Barrel only ..... .30

### SELF-TAPPING SCREW ASSORTMENT

Parker Kalon self-tapping screw assortment of most popular sizes. Genuine replacements for AIL standard brand receivers.  
No. 1078.....Price Each \$0.65

### BRACKET TYPE LUG STRIPS

## TWIN PHONE TIP JACKS

Jacks in this assembly are our No. 138 type, mounted on a bakelite strip 1/2" and 2" long. Standard spacing between Jacks 3/8". Coded red and black for identification.

No. 406.....Price Each \$0.35

# RADIO ESSENTIALS, INC.

EXCLUSIVE DISTRIBUTORS OF ARHCO TO THE RADIO PARTS JOBBERS

### INSULATED BANANA PLUG

Set screw in side of barrel secures wire within plug without soldering. Full length center pin prevents spring from collapsing. Standard colors.

No.	Sleeve	Overall	Price Each
131	3/8"	1 1/2"	\$0.20
131A	1 1/8"	2 1/4"	.25

### SPLIT TYPE BANANA PLUG

Designed to snugly fit a standard type banana jack. Spring action is positive and durable. Length 1-7/16". The plug is 1/2" long. Standard colors.

No. 331.....Price Each \$0.20

### SOLDERLESS BANANA PLUGS

Made with three-pointed leaf spring; screw into insulated portion of plug. Overall length 1 1/4". All standard colors.

No. 207.....Price Each \$0.25

### ARCHOITE-SOLDERLESS INSULATED BANANA PLUG

All external set screws are eliminated, removing possibility of shocks or grounding. One-piece phosphor bronze spring and full length center pin assure good contact and long life. ARCHOITE barrel is 3/4" long, 3/8" diameter. Standard colors.

No. 332.....Price Each \$0.20

### INSULATED BANANA JACKS

Equipped with insulated shoulder washers, lug and a nut. Can be mounted in a 1/4" hole on a panel up to 3/8" in thickness. Standard colors.

No. 136.....Price Each \$0.15

### BANANA PLUG OR TIP JACK

So constructed that either phone tip or banana plugs fit interchangeably. Cap of ARCHOITE insulation, in standard colors. Mounts in a 3/8" diameter hole in panels up to 1/2" thick. With shoulder washer and nut. Overall length is 1 1/2".

No. 148.....Price Each \$0.20

### INSULATED SOLDERLESS PHONE TIP PLUG

Fits all standard tip jacks including such units as our No. 137, 138 Insulated Jacks, and No. 143 Binding Posts. Overall length is 1 1/4", sleeve is 3/4" long. All standard colors.

No.	Price Each
141	\$0.18
142	.15

### SOLDERLESS PHONE TIPS

So made that a wire fits through the body and is wrapped around the screw and tightened with the nut.

No.	Price per C
10-1 1/4" in length.....	\$10.00
9-1 1/4" in length.....	10.00

### INSULATED PHONE TIP JACKS

Accommodates all standard phone tips. Phosphor bronze springs make positive contact and hold phone tip straight and secure. Insulating washer and nut. Standard colors.

No.	Head	Price Each
1866.....	3/8"	\$0.14
138.....	7/16"	.15
1860.....	9/16"	.17
1861.....	1/2"	.16

### STREAMLINED PHONE TIP PLUG

The highly polished ARCHOITE handles are made to fit a standard non-insulated or insulated phone tip jack. By inserting the wire in the hole and screwing the tip in securely, a solid, solderless connection is made. 1 1/8" long and 1/2" high.

No. 1855.....Price Each \$0.40

### INSULATED BANANA PLUG JACK

For use with all our standard size Banana Plugs. The insulated head has a shoulder which extends into the mounting hole thus centering the jacks and preventing grounds. Mounts in 5/16" diameter hole. Can be used in panels up to 3/8" thick. Complete with second shoulder washer and nut. The overall length is 3/4". Available in all standard colors.

No. 336.....Price Each \$0.20

### PHONE TIP JACKS

Specially designed springs within the body hold the phone tips straight and grip firmly at all times. Mounts in a 1/4" diameter hole in panels up to 3/8" thick.

No. 137.....Price per C \$10.00

### BANANA TYPE PLUG JACK

Recommended for use with No. 1150 Banana Plug. Counterbore to fit tapered portion of plug shank. Heavy, nickel plated and furnished with nuts and soldering lug. Will fit panels up to 7/16" thick and mounts in 1/4" hole.

No. 1151.....Price per C \$12.00

### BANANA TYPE PLUG

6/32" female thread and 6/32" screw and soldering lug. One piece phosphor bronze spring assures positive, long lasting contact. Full length center pin prevents plug from collapsing when misaligned with jack.

No. 1150.....Price per C \$12.00

### BANANA TYPE PLUGS

Spring brass, nickel plated. Full length center pin prevents spring from collapsing. Supplied with two plated nuts.

No. Thread Price per C

120-6/32-1 1/2" long	\$12.00
1264-6/32-1" long	15.00
122-8/32-1 1/2" long	12.00

### FIBRE NEUTRALIZING TUBES

These tubes are made of specially treated hard fibre for durability. They are ideal for servicemen and production lines, for when the hexagon wears out it can be cut off and used again.

## G-C RADIO SERVICE SOLVENT

"CLEANS AND DISSOLVES"

Specially prepared for loosening cement on speaker cones, etc. Is also used as a thinner for G-C Service Cement.

No.	12 to display	List Price
31-2	—2 oz. bottle	\$.35
31-4	—4 oz. bottle	.50
31-6	—6 oz. economy bottle	.65
31-8	—8 oz. economy bottle	.75
31-16	—1 pt. economy bottle	1.25
31-32	—Quart	2.45
31-G	—1 Gallon	5.00
31-5G	—5 Gallons	23.25

## G-C RADIO SERVICE CEMENT

The Best Cement for Speaker and Radio Work. Especially suitable for cementing replacement cones and repairing rattling and torn cones. Also used on glass, to seal adjustments, hold wires in place, etc. Dependable, Vibration-Proof, Waterproof, and Fast-Drying.

No.	12 to display	List Price
30-0	—½ oz. bottle	\$0.20
30-2	—2 oz. bottle, brush attached to cap	.50
30-4	—4 oz. economy bottle	.90
30-6	—6 oz. economy bottle	1.25
30-8	—8 oz. economy bottle	1.60
30-16	—1 pt. bottle	3.00
30-32	—Quart	5.75
30-G	—1 Gallon	9.35
30-5G	—5 Gallons	42.00

New Type Wide Mouth Bottle

## G-C CEMENT THINNER

This thinner is made of same solvents as G-C Service Cement and makes the best thinner for thinning all cements.

No.	Size	List Price
No. 28-2	2 oz.	\$0.35
No. 28-4	4 oz.	.50
No. 28-8	8 oz.	.75
No. 28-16	16 oz.	1.25
No. 28-32	32 oz.	2.45
No. 28-G	1 Gal.	5.00
No. 28-5G	5 Gal.	23.25

## G-C CEMENT AND SOLVENT KIT

Kit consists of 1 bottle of our famous Service Cement, and 1 bottle of Service Solvent. Handy Kit to carry with you.

No.	List Price
343	\$0.50

## G-C SPEAKER REPAIR CEMENT IN TUBES

This is our regular service cement put up in a handy tube. Makes a good, general-purpose, waterproof glue. Also useful for speakers, cones, coils, etc.

No.	12 to display	List Price
34-2	—Large Size	\$0.42

## G-C ALL-PURPOSE CEMENT

Fast drying cement suitable for many uses. Excellent "Household Cement". Also an ideal "model-makers" cement for use on model airplanes, ships, toys, etc.

No.	Size	List Price
No. 45-2	2 oz.	\$0.42

## G-C BAKELITE CEMENT

Prepared for cementing Bakelite to Bakelite or Bakelite to other materials. Useful for broken knobs, molded cabinets, etc. 12 to display.

No.	List Price	
32-2	—2 oz. bottle	\$0.55
32-8	—Half Pint	1.25
32-16	—1 Pint	2.25
32-32	—Quart	4.25
32-G	—1 Gallon	12.50
32-5G	—5 Gallons	61.25

## G-C PLASTIC CEMENT

Best grade pyroxilin cement for cementing all types of plastics. Excellent for cementing broken cabinets, knobs, etc.

No.	Size	List Price
No. 32-2A	2 oz.	\$0.55
No. 32-8A	8 oz.	1.25
No. 32-16A	16 oz.	2.25
No. 32-32A	32 oz.	4.25
No. 32-GA	1 Gal.	10.00
No. 32-5GA	5 Gal.	48.00

## G-C FILM SPLICING CEMENT

High quality fast drying Cement specially prepared for splicing movie camera film.

No.	Size	List Price
33-1	—1 oz. size	\$0.25
33-2	—2 oz. size	.45

## G-C WOOD CABINET GLUE

Best quality wood glue for repairing cabinets. Strong and fast drying. Will not injure cabinet finish.

No.	Size	List Price
39-5	—2 oz. bottle with brush	\$0.35
39-4	—4 oz.	.42
39-8	—8 oz.	.75
19-16	—Pint	1.25

## G-C RUBBER TO METAL CEMENT

Specially prepared for cementing Rubber dial drives to metal shafts, rubber mountings to chassis, or for cementing any rubber material to metal.

No.	Size	List Price
35-0	—½ oz.	\$0.20
35-1	—1 oz.	.42
35-2	—2 oz. bot. with brush	.50
35-4	—4 oz.	.90
35-8	—8 oz.	1.60
35-16	—16 oz.	3.00
35-32	—32 oz.	4.50
35-G	—1 Gallon	9.35
35-5G	—5 Gallons	42.00

## G-C P-X PLASTIC ADHERING CEMENT

Cements station call tabs to Push Buttons and escutcheons. Keeps them from getting lost! Ideal for cementing paper, cloth, leather, etc. to plastics.

No.	Size	List Price
44-1	—1 oz.	\$0.42

## G-C RUBBER CEMENT

Best quality general purpose rubber cement for cloth, paper, rubber, etc. A necessity in every shop.

No.	Size	List Price
23-4	—4 oz.	\$0.42
23-8	—8 oz.	.75
23-16	—Pint	1.25

## G-C FABRIC TO METAL CEMENT

For cementing cloth and felt to metal. Ideal for cementing felt to phono turntables, grille cloth to metal cases, etc. Brush attached to cap.

No.	Size	List Price
22-4	—4 oz.	\$0.42
22-8	—8 oz.	.75
22-16	—Pint	1.25

## G-C GRILLE CLOTH FABRIC CEMENT

For cementing grill cloth, aeroplane luggage fabric, leather, etc. to wood radio cases, test equipment and cabinets.

No.	Size	List Price
38-4	—4 oz.	\$0.42
38-8	—8 oz.	.75
38-16	—Pint	1.25

General Cement Mfg. Co. is the leading Manufacturer of Radio Cements, Chemicals, Coil Dopes and Compounds for all Radio and Electronic uses.

Cements and Compounds are available in any quantity from small bottles to drums.

## G-C DIAL DRIVE CEMENT FOR CEMENTING RUBBER TO METAL

Specially prepared for cementing Rubber dial drives to metal shafts, rubber mountings to chassis, or for cementing any rubber material to metal.

No.	Size	List Price
35-0	—½ oz.	\$0.20
35-1	—1 oz.	.42
35-2	—2 oz.	.50

## G-C RADIO CHEMICAL LABORATORY

"Use G-C Chemicals for Radio Repairs and Save Time"

Here is a real professional Radio Chemical Laboratory that is complete in every respect. Twenty large 2 oz. bottles put up in permanent laboratory stand that can be placed on your bench or hung up on the wall. The stand is a permanent rack to hold all your Radio Service Chemicals and find them when you need them. Every needed chemical and cement is included in this Laboratory for all kinds of Radio Repairs, speakers, coils, contacts, dials, controls, etc. Every Radio Man, Radio Laboratory, Radio Engineer, and Radio Manufacturer should all have this complete Laboratory.

No. 997 Radio Chemical Laboratory contains the following Radio Chemicals in large wide mouth 2 oz. bottles

Cat. No.	List Price	Cat. No.	List Price
30-2—Service Cement	\$.50	917—Scratch Liquid	\$.35
31-2—Service Solvent	.35	1201—Non-Stick Iron Tip Compound	.35

Refills are available at the above prices.  
Jobbers cartons 12 each to carton

### G-C CONTACT & CRYSTAL CLEANER

Specially prepared for cleaning contacts and crystals. Cleans easily and will not injure delicate parts, crystals, etc. "Hams" and Radio Men will appreciate this item.

Size	List Price
127-0 — 1/2 oz.	\$.20
127-2 — 2 oz.	.30
127-4 — 4 oz.	.50
127-8 — 8 oz.	.75
127-16—Pint	1.10

### G-C CARBON TETRA-CHLORIDE

For Cleaning Electrical Controls and Contacts.

Size	List Price
No. 211-2 ..... 2 oz.	\$.50
No. 211-4 ..... 4 oz.	.90
No. 211-8 ..... 8 oz.	1.60
No. 211-16 ..... 16 oz.	2.50
No. 211-32 ..... 32 oz.	3.50
No. 211-G ..... 1 Gal.	9.00

### G-C RADIO CHASSIS CLEANER

Make extra money by returning your customer's set thoroughly cleaned from dirt, grease and grime. Chassis Cleaner cleans Radio Chassis, Panels, Test Equipment, etc., without injuring the surface. Buy in gallon quantities and save.

Size	List Price
123-8 — 8 oz. bottle	\$.50
123-16—16 oz. bottle	.75
123-G —gallon can	2.25

### NEW G-C ELECTRONIC CONTACT CLEANER

"Improved red color contact cleaner made with G-C Lube-Rex"

Special cleaner which cleans fast and dries fast. On drying it leaves a protective film of G-C Lube-Rex on the contact without affecting electrical characteristics.

Size	List Price
No. 210-0 ..... 1/2 oz.	\$.20
No. 210-2 ..... 2 oz.	.35
No. 210-4 ..... 4 oz.	.50
No. 210-8 ..... 8 oz.	.85
No. 210-16 ..... 16 oz.	1.65
No. 210-32 ..... 32 oz.	3.00
No. 210-G ..... 1 Gal.	7.50

### G-C CONTACT DOPE

Ideal contact cleaner for electronic switches, controls and contacts. Specially prepared to resist corrosion and oxidation on contacts. Eliminates noise on switches and contacts.

Size	List Price
No. 1214—2 oz. Bottle	\$0.50

### G-C CONTACT DOPE

Ideal new chemical for treating Electrical and Radio Contacts. Will prevent corrosion and eliminate noise on switches, contacts, relays, etc. Put in convenient long-neck tubes for easy application.

Size	List Price
No. 1213—Tube	\$.30
1213-D—Display—24 Tubes	7.20

### G-C GRAFOLINE

Specially made for noisy controls, switches, and wire wound controls. Will eliminate noises on controls and contacts and on tube prongs.

Size	List Price
No. 120-2 — 2 oz.	\$ .35
No. 120-16—pint	2.00

### G-C LUBE-REX "LUBRIPLATE"

"Prevents Corrosion"  
The best contact cleaner on the market. Fine for attenuators, push button switches, all wave switches, contacts, etc. Cleans contacts and prevents corrosion. The only acceptable lubricant for Philco Mystery controls. Moisture repellent and rust preventing—fine for use on locks, fishing reels, guns, dial mechanisms, phonograph equipment, etc. Is especially desirable since it clings to the metal.

Size	List Price
1203—1/2 oz.	\$.20
1209—2 oz.	.50
1268—pint	2.25

### G-C CONTACT & ATTENUATOR SERVICE KIT

"Eliminates Noise . . . Prevents Corrosion"  
Ideal kit for cleaning noisy attenuators, tuners, all-wave switches, variable contacts, etc. Consists of special contact cleaner and special corrosion-resistant lubricant. With this Kit you can easily clean those noisy controls and 9 times out of 10 without dismantling the chassis or control unit. It will pay to use this Kit.

Size	List Price
No. 777—Kit	\$.100

### G-C LIQUIDOPE

"Genuine All-Wave Coil Dope"  
Ideal coil dope for all-wave coil windings. Clear and fast-drying. Gives coils a tough protective film that insures firmness and prevents characteristic changes due to weather.

Size	List Price
36-2 — 2 oz. bot.	\$.35
36-8 — 1/2 pt.	1.05
36-16—Pint	2.00
36-32—1 Quart	3.75
36-G — 1 Gallon	9.35
36-5G—5 Gallons	42.00

### G-C Q-DOPE

"Made from Polystyrene"  
New Ultra Low Loss Compound that is recommended for high frequency work. Absolutely no loss in Q—fast-drying—maintains coil characteristics.

Size	List Price
37-2 — 2 oz. bot.	\$.35
37-4 — 4 oz.	.60
37-8 — 1/2 pt.	1.05
37-16—1 Pint	2.00
37-32—Quart	3.50
37-G — 1 Gallon	9.00
37-5G—5 Gallons	43.50

### G-C CARBON-X

"For Noisy Carbon Controls"  
Here is an item every Service Man has been looking for. A practical method to touch up those worn and noisy spots on carbon volume controls. You simply apply CARBON-X over the bad spots and the job is done. When you cannot sell a replacement control you can do the job with Carbon-X.

CARBON-X is an electrical conductor

Size	List Price
No. 1200—1/2 oz. bottle	\$.20
1204—1 oz. bottle	.50
1205—2 oz. bottle	.75

### G-C RADIO CHEMICAL KIT

A complete kit of 8 chemical necessities in a neat leatherette pocket case. The kit makes it easy for the Serviceman to always have his chemical needs with him on the job. Includes the following 8 necessities: Service Cement, Rubber Drive Cement, Carbon-X Lube-Rex, Scratch Polish, Non Slip Compound, Dial Oil, and Contact Cleaner. A handy applicator is attached to the cap of each container to make it easy to use. Servicemen should have this kit with them for every outside call.

Item	List Price
No. 999—Radio Chemical Kit	\$.25
Any type refill for Kit	.20

### G-C CHEMICAL KIT REFILLS

No. 30-0—Radio Cement	No. 1200—Carbon-X
No. 35-0—Dial Drive Cement	No. 1203—Lube-Rex

No. 923—Scratch Polish	No. 1246—Dial Oil
List Price—Any Type	.....\$0.20
Display 12 Bottles—Any Type	..... 2.40

## G-C DIAL LITE COLORING

Long lasting coloring for multi-colored dials. Instant drying. Bright colors of Red, Green, Blue, Amber, Purple, and Solvent. Earn extra money by selling colored dial lites.

Dress up those old sets.

No.	Quantity	List Price
66-6	— 8 bots.	\$.50
66-5	— 5 bots., no purple	.35
66-1	— Bot. of any color	.10
66-2	— 2 oz. Bot., any color	.35
66-16	— Pint of any color	1.75
66-32	— Quart, any color	2.25
66-G	— 1 Gal. any color	8.50

## G-C MICROPHONE CARBON GRANULES

Finest grade, polished carbon. No ash content, so can stand high currents without burning. Enough for several double button Microphones. 3 types.

No.	Quantity	List Price
1281	— No. 100 size—highest sensitivity, best quality reproduction, but packs easily	\$.80
1282	— No. 80 size—Best for general purpose work, Good quality reproduction and does not easily pack	.80
1283	— No. 60 size—Best for hard use—sound trucks, etc. Fair quality reproduction less packing	.80

## G-C RADIO DIAL OIL

Special oil for lubricating dial mechanisms. Treated with graphite to assure effective lubrication. You need this for the new complicated dials.

No.	Quantity	List Price
1245	— 4 oz.	\$.25

## G-C KROME-KOAT ALUMINUM PAINT

Fast drying ready mixed aluminum paint leaves chrome-like finish. For P.A. equipment, speakers, chassis, etc.

No.	Size	List Price
61-2	— 2 oz.	\$0.30
61-4	— 4 oz.	.60
61-8	— 8 oz.	1.10
61-16	— 16 oz.	2.00
61-32	— 32 oz.	3.25
61-G	— 1 Gal.	9.00

## TELEPHONE BLACK & GRAY

High grade enamel that covers well and dries fast. Black will produce an ebony black finish that is so familiar on telephone devices. Gray is a pleasing shade. Excellent for panel work and parts. Specify color.

No.	Quantity	List Price
62-2	— 1/2 pt.	\$0.35
62-8	— 1/2 pt.	1.05
62-16	— Pint	2.00
62-32	— Quart	3.50
62-G	— 1 Gallon	10.50
62-5G	— 5 Gallons	50.00

## G-C No. 10 THINNER

For Ruf-Koat, Krome-Koat, B-K Cement, Insulating Varnish, and Rubber Cements

No.	Quantity	List Price
67-2	— 2 oz.	\$.35
67-4	— 4 oz.	.50
67-8	— 8 oz.	.75
67-16	— pint	1.00
67-32	— quart	1.50
67-G	— gallon	3.25
67-5G	— 5 gallons	15.75

## G-C R.M.A. COLOR CODING KIT

Complete Kit of all of the standard R. M. A. colors: Black, Brown, Red, Orange, Yellow, Green, Blue, Purple, Grey and White. All colors are brilliantly alive. Brushes furnished and R. M. A. color chart is on box. Kit is necessary for complete color coding parts.

No.	List Price	
677	— Color Coding Kit	\$1.10

## G-C SOLDERING PASTE

New high quality, non-corrosive, soldering paste for radio and electrical work.

No.	List Price	
1207	— 2 oz. can	\$.17
	24 to Carton	

## G-C NON-SLIP COMPOUND FOR RADIO DIALS

Powder Compound for treating friction type dial drives such as corals, cables, and belts. Easy to use! Just apply freely to slipping parts.

No.	List Price	
1210	.....	\$3.30

## G-C INSULATING & DIPPING VARNISH

Clear Amber Insulating Varnish for noisy or buzzing transformers, chokes, field coils, etc. Requires no baking—air dries.

No.	Quantity	List Price
56-2	— 2 oz.	\$.35
56-4	— 4 oz.	.50
56-8	— 8 oz.	.80
56-16	— Pint	1.50
56-G	— 1 Gallon	9.80
56-5G	— 5 Gallons	45.00

## G-C KRystal KOAT CRYSTALIZING LACQUER

The famous GC Krystal Koat lacquer. Strictly Air-Drying; forms beautiful floral pattern when dry. For chassis, panels, etc. Can be used on metal, wood or paper. Colors: Black, Gray, Brown, Green, Blue, Red and Clear. Specify Color.

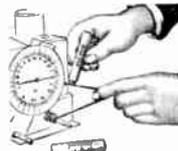

No.	Quantity	List Price
63-2	— 1/2 pt.	\$0.40
63-4	— 1/2 pt.	.75
63-8	— 1/2 pt.	1.25
63-16	— Pint	2.25
63-32	— Quart	3.50
63-G	— 1 Gallon	12.50
63-5G	— 5 Gallons	58.50

NOTE: Impenetro Sealer must be used for undercoat when Krystal Koat is applied over other finishes. Same price as black. CLEAR FROST-X for frosting window glass same price as Crystal Lacquer.

## NEW! G-C DIAL CORD DRESSING STICK

A new easy way to treat slipping cords on dial mechanisms. Simply rub the stick on cord and job is done! Prevents and stops slipping. Carry a stick with you.

No.	List Price	
1212	— Dressing Stick	\$3.20
1212-D	— Display—36 Sticks	7.20

## G-C NON-STICK IRON TIP COMPOUND

"Made with Graphite"  
A new development. Prevents iron tips from burning into soldering irons. Saves tips and irons.

No.	List Price	
1201	— 2 oz. bottle	\$.35
1216	— Pint	2.75

## G-C LIQUID NON-SLIP

"For Radio Drive Cables and Belts"  
Penetrating and fast drying liquid dressing. Shrinks fibres, prolongs life of cables and belts and prevents slipping.

No.	Size	List Price
1211	— 1/2 oz.	\$0.20
1215	— 2 oz.	.35

## G-C FUNGUS LACQUER

"Meets U. S. Army Signal Corps Specifications"

G-C Belts are the same type as used by manufacturers on the best sets.

List Price Each Belt.....\$0.25

Send for the new G-C Dial Belt and Cable Guide Book.

### INSTRUCTIONS — FOR MEASURING BELTS

To determine size of belt, if the old belt is available, cut the belt and measure for stretched out length. This will be "cut length" of belt. If old belt is not available or is worn out so that it cannot be properly measured, stretch a thin thread around belt pulleys on set. (Be sure to use thin thread as a thick cord will give an inaccurate reading.) Measure the thread. It will be our "circumference around pulleys." In measuring belts always remember that the circumference around pulleys is not the same as stretched out or cut length. A belt when cut, develops approximately 3/16" extra length when stretched out, depending on thickness of belt.

CEMENT

# Radio Alignment Tools

## G-C No. 5014 Alignment Tool

Made of Bone fibre, combination tool. Consists of Screw Driver with metal nib, 1/4" Hex Wrench slotted and 5/16" Hex Wrench on other end.  
No. 5014 ..... List Price \$1.00

## G-C No. 5015 Alignment Tool

Made of Bone Fibre, combination tool. Consists of Screw Driver with metal nib, 5/16" Hex Wrench, 1/4" Hex Wrench slotted, with metal screw driver on one end.  
No. 5015 ..... List Price \$1.35

## G-C No. 5016 Alignment Tool

Made of Bone Fibre combination tool that can be used for most purposes. Consists of Screw Driver with metal nib, 5/16" Hex wrench, 1/4" Hex side wrench and 1/4" hex end wrench slotted.  
No. 5016 ..... List Price \$1.35

## G-C Insulated Hex Wrench and Screw Driver

Combination hex wrench and insulated screw driver. The screwdriver may be extended from handle to provide extra long length.

No. 5005—extends from 7-13" ..... \$1.75  
5005-D—Display 12 Tools ..... 9.00  
5006—extends from 11-17" ..... .95

## G-C Duplex Insulated Wrench Alignment Tool

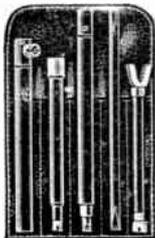

Made of Bone Fibre with 1/4" Hex Metal Wrench on one end and 5/16" Hex Metal Wrench on other end.  
No. 5017 ..... List Price \$1.25

## G-C Flexi-Driver

"Around the corner" Screw driver for Radio work. Insulated tips prevent "shorts" and guide the blade over screws for easy tuning. Approved by U.S. Army and Navy.  
No. 5019 ..... List Price \$2.25

## G-C NX-Aligning Kit

Approved by U.S. Army and Navy. Very Handy all purpose aligning and Neutralizing kit. Kit contains . . .

1 5004 screw driver  
1 5011 alligator wrench  
1 5017 Double end wrench  
1 5015 Combination Tool  
1 5016 Combination Tool  
1 Leatherette Case  
No. 5020—Kit ..... List Price \$6.50

## G-C No-Metal Insulating Adjustment Screw Driver

Made of Black Bone fibre. Indispensable for aligning all-wave sets. Will give long service. Ends can be re-ground.

No. 5004—7" long ..... List Price \$ .40  
5004-D—Display 12 Tools ..... 4.80

## G-C Alignment Screw Driver

Low Inductance Metal Tip screw driver made of Genflex material—strong, durable, completely insulated, 3/8" diameter x 6" long.

No. 5000 ..... List Price \$0.50  
No. 5000-D—Display 12 Tools ..... 6.00

## G-C Duplex Alignment Screw Driver

Low Inductance Metal Tip on both ends made of "Genflex" material. One end is 1/4" and other end is turned down to 7/32" diameter for small holes. Strong—Durable—completely insulated tool.

No. 5001 ..... List Price \$0.75  
No. 5001-D—Display 12 Tools ..... 9.00

## G-C RCA Aligning Tool

Made of 1/4" Bone Fibre, narrow screw driver on one end and screw nib inserted on other end. Used on RCA sets and others.

No. 5003 ..... List Price \$0.75  
No. 5003-D—Display 12 Tools ..... 9.00

## G-C "Strato" Tuning Wand

Made of "Genflex" rod with Brass cylinder on one end and Iron core on other end, used for adjusting and checking coils. By inserting iron core you increase the inductance and inserting brass end lowers inductance.

No. 5002 ..... List Price \$1.00  
No. 5002-D—Display 12 Tools ..... 12.00

## G-C Insulated Aligning Wrenches

Made of Bone Fibre Tubing, Hexed full length inside, so end of wrench can be cut off when worn out, and tool is as good as new again.

# WALSCO

## WALSCO RADIO CEMENT

**Vibration-Proof      Heat Resisting  
Unsurpassed Adhesive Power**

An elastic cement especially made for the manufacture and repairing of speakers and for general radio work. Unaffected by vibration, dries fast and will never become brittle with age. • The latest developments in synthetic resins and gums are incorporated in Walsco Radio Cement, which is one of the strongest adhesives ever developed. • In addition to its use for speaker repair, Walsco Radio Cement can be used for repairing cabinets, loose tube bases, grid caps, etc. It will provide a strong bond between almost any materials and is not affected by high temperature, moisture or oil. All bottles come with built-in brush and have an evaporation-proof cap liner.

Cat. No.	Net Price
50—½ oz. bottle	\$.015
51—1 ¾ oz. tube	.25
52—2 oz. bottle	.30
54—4 oz. bottle	.54
58—8 oz. bottle	.96

44—4 oz. bottle	.54
48—8 oz. bottle	.96
40-32—1 qt. can	3.00
40-GL—1 gal. can	7.50

## VINYLITE CEMENT (Thermoplastic)

For joining non-porous materials where ordinary cements will not do—the solvents can not evaporate. Highly recommended for cementing plastics, metals, etc. Parts to be joined are coated and the cement air or force dried. A bond is established by pressing parts together in a clamp or fixture and applying heat.

Cat. No.	Net Price
25 —2 oz. bottle	\$.042
25-32—1 qt. can	2.70
25-GL—1 gal. can	9.00

## RUBBER CEMENT

For cementing rubber parts to metal or wood, rubber mounts to chassis, rubber cushions to lids, etc.—gives an especially strong bond. A Radio Serviceman should always have a bottle on his work bench.

Cat. No.	Net Price
112—2 oz. bottle	\$.030
114—4 oz. bottle	.54

## CEMENT SOLVENT & THINNER

This Cement-Solvent is used for loosening cement on speaker cones, voice coils, and other parts where cement has been applied previously. Recommended also for thinning Walsco Radio Cement, Plastic Cement, and Fabric Cement.

Cat. No.	Net Price
62—2 oz. bottle	\$.021
64—4 oz. bottle	.30
68—8 oz. bottle	.45
69—1 pt. bottle	.75
60-32—1 qt. can	1.20
60-GL—1 gal. can	3.00

## CEMENT AND SOLVENT KIT

A handy kit, easy to carry in the tool box. Contains one 2-oz. bottle of Radio Cement and one 1-oz. bottle of Cement-Solvent-and-Thinner. One brush is built in the cement bottle cap. Extra brush is included. The most economical package for the servicemen and amateurs who do only occasional speaker repair work.

Cat. No. K-19 ..... Net Price \$0.39

## FABRIC CEMENT

**Does Not Penetrate the Fabric**

Especially made for attaching grille cloth, turntable felt, covering of portable radios, etc. Dries very fast; is unaffected by moisture, sunlight, and high temperature and does not become brittle. Indispensable to Radio Dealers and Servicemen—eliminates the danger of spoiling the outside of a grille cloth, turntable felt, or other fabrics, since it does not penetrate the material itself.

Cat. No.	Net Price
21 —1 ¾ oz. tube	\$.025
21-32—1 qt. can	3.00
21-GL—1 gal. can	7.50

## POLYSTYRENE CEMENT and COIL DOPE

**For Bonding Polystyrene Parts and Coil Coating in Radio and High Frequency Work**

A Polystyrene solution with a high solid content. Can be brushed on or parts can be dipped. Renders coils or other parts moisture-proof. Holds windings firmly in place due to a certain amount of shrinkage upon drying. Electrical losses due to coating with this cement are negligible—even if used for high or ultra-high frequency work.

Cat. No.	Net Price
154—4 oz. bottle	\$.036
158—8 oz. bottle	.66
159—1 pt. bottle	1.20
150-32—1 qt. can	2.40
150-GL—1 gal. can	7.20

## POLYSTYRENE SOLVENT AND THINNER

This thinner is especially designed for use with Walsco Polystyrene Cement where regular thinner cannot be used.

Cat. No.	Net Price
168 —2 oz. bottle	\$.045
160-32—1 qt. can	1.20
160-GL—1 gal. can	3.00

## COIL DOPE KIT

A handy kit containing one 2-oz. bottle of Polystyrene Cement and Coil Dope, and one 1-oz. bottle of Special Thinner. Two brushes are included. Polystyrene Cement is non-hygroscopic; and due to its low-loss factor, ideal for use on high frequency work. It insures the highest stability in receivers and other electronic devices. It does not affect the electrical characteristics of coil winding. This kit is made for amateurs and experimenters who use only small quantities. Cat. No. K-21 ..... Net Price \$0.39

**CLEANERS — LUBRICANTS  
DIAL OIL — LACQUER  
INSULATING VARNISH**

## WALSCO CONTACTENE

New Improved "Contact Cleaning Fluid"

- Cleans contacts and controls.
- Keeps controls and contacts noise-free.
- Lubricates and reduces friction.

A fast-evaporating combination of special solvents affording greatest cleaning power without affecting insulating materials. Contains liquified Walscolub B, which after evaporation of the solvents, forms a thin film that protects the contacts. Contactene is highly recommended for treating volume controls, band switches, tuning condensers, springs, etc., to eliminate noisy operation. Bottles come with built-in brushes.

## MOTOR & GEAR LUBRICANT

The latest development in chemicals for lubricating purposes. Much superior to greases because of its higher lubricating and lasting qualities. Its viscosity does not change with temperature. Used on phonograph motors, record changers, and all appliances that require a grease-type lubricant. In large handy "applicator" tube.

Cat. No. 23—1½ oz. tube.....Net Price \$0.27

## WALSCO ASSORTMENTS

### Utility Radio Service Kit

Radio Servicemen: Here is an article that, next to the screwdriver, is the most useful aid in radio repairing. Put up in a compact leather pocket kit are these items that the serviceman always needs on the job: one bottle each of Walsco Radio Cement, Contactene, Super Polish, Walnut Stain, No-Slip and Dial Oil. Brushes are "Built-in". The Kit fits any pocket.

Cat. No. K 25  
Net Price \$1.35

### Tube Assortment

A most convenient kit of Walsco chemicals put up in tubes. The sturdy box makes this assortment very handy to carry in the tool kit. Contains one tube each of Walsco Radio Cement, Fabric Cement, Plastic Cement, Walscolub B, and Motor- and -Gear Lubricant. You save more than 10% by purchasing these tubes in the assortment.

Cat. No. 115.....Net Price \$1.17

### Thrifty Chemo-Kit

An assortment of those chemicals every radio man must have. Contains one 2-oz. bottle each of Walsco Radio Cement, Cement-Solvent, No-Slip, and Contactene. Packed in solid container. Very handy to carry in toolbox—and a saving of more than 25%.

Cat. No. K-20.....Net Price \$0.81

## INSULATING VARNISH

Walsco "air-dry" varnish is fast-drying and produces excellent results when used on radio coils, transformers, solenoids, motors, and all electrical appliances. Withstands heat and is extremely resistant to acid, oil, and grease. It is non-corrosive and moisture-proof. An all-around clear, colored insulating varnish.

Cat. No.	Net Price
192—2 oz. bottle	\$0.21
193—1 pt. can	.90
194—1 gal. can	5.40

## WALSCOLUB - B

A recently-developed chemical compound in thin paste form. WALSCOLUB - B counteracts oxidation, prevents corrosion of metals and eliminates noise on band switches, push buttons, tuners, volume and other controls, as well as air-exposed electrical contacts, attenuators, etc. WALSCOLUB-B will not change electrical properties. It is superior to any graphite compound or liquid dope for this purpose. Ideal on metal surfaces to prevent rust. Servicemen: Its use will save you both time and money. Once you have tried it, you will never be without it! Large, handy applicator tube.

Available also in 1-lb., 5-lb. and 25-lb. containers for industrial users. Prices on request.

Cat. No. 22—1½ oz. tube  
Net Price \$0.27

## "NO-SLIP"

A newly developed chemical composition that greatly increases the friction of pulleys, cords or belts. Contracts, "sets" and shrinks the fibres at the same time. Stops instantly any slippage of Dial Belts, Dial Cords, etc. Easily applied with brush. Indispensable to any radio man.

Cat. No.	Net Price
401—½ oz. bottle	\$0.21
402—2 oz. bottle	.45
400—1 pt. bottle	2.70

## RADIO DIAL OIL

A light-bodied lubricating oil for all electronic and electrical appliances—absolutely free of acids or gummy substances. Also recommended as a rust preventative for radio chassis, tools, machinery, etc.

Cat. No.	Net Price
72—2 oz. bottle	\$0.15
74—4 oz. bottle	.24
73—8 oz. bottle	.46

## "UNIKLEAN"

Contains "Trichlorethylene," one of the most effective cleaning agents. Removes instantly dirty spots and grease from cabinets, chassis, panels, etc., without damaging the finish. "Uniklean" is economical and effective. Be thrifty—buy pints or gallons.

Cat. No.	Net Price
204—4 oz. bottle	\$0.24
209—1 pt. bottle	.72
200—1 gal. cans	2.85

## FUNGUS & MOISTURE-PROOFING LACQUER

The latest development in lacquer which meets U. S. Army Signal Corps Specification No. 71-2202-A. Its use eliminates the difficulties encountered in hot and humid climates in radio and communication equipment due to moisture absorption or fungus growth. Applied by brushing, dipping or spraying on coils, hook-up wires, solder connections, trimmer condensers, tube sockets, etc. This lacquer will "air-dry" in a few minutes and dries hard in less than one hour.

Cat. No.	Net Price
195—2 oz. bottles	\$0.21
197—1 pt. cans	.90
198—1 gal. cans	5.40

**SCRATCH REMOVERS  
POLISHES, PAINTS, LACQUERS  
RECORD CLEANERS**

# WALSCO

## WALSCO SCRATCH REMOVING POLISH

"Makes Scratches Disappear"

A blend of polishing and staining ingredients. Removes scratches from cabinets, radios, furniture, etc., and polishes at the same time. Very easy to apply. Will not change shade of finish. Comes in two shades: "Dark" for walnut, mahogany, etc., "Light" for light maple, light oak, etc. Packaged in attractive counter display of 12 bottles for Radio Dealers and Servicemen. A sure-fire repeater for housewives.

Cat. No.			Net Price

414	434	4 oz. bottle	\$0.21
416	438	8 oz. bottle	.30
420	430	1 gal. can	2.40

## SCRATCH REMOVER

Made of unbreakable plastic in the shape of a fountain pen. Minor scratches instantly disappear from radios, furniture, etc., when merely "brushed over" with the felt wick on one end. If the finish is marred, or the scratch is deep, it can be stained and filled with the special filler on the other end. Indispensable to Dealers, Service, and Delivery Men for their own use, and an extra-profit sales item for the retail trade. Packed in attractive 3-color display card, holding six Scratch Removers, for retail counters.

Cat. No.		Net Price
700		\$0.30
700-D	Display card of 6	1.80

## SUPER POLISH

"All the Name Implies"

Does two things: First, it removes any old polish, grease or dirt that may be on the cabinet or furniture. Second, it forms a hard, dry and durable film that will protect the object for a long time, giving it a "brand new" appearance. Requires very little rubbing. Indispensable for keeping stock sets in first-class condition. An extremely profitable retail sales item for the smart Dealer and Serviceman. Housewives who once try it will never be without it. Ask your jobber for special deal.

Cat. No.		Net Price
412	4 oz. bottle	\$0.21
418	8 oz. bottle	.30
419	1 gal. can	2.40

## CRYSTALLIZING LACQUER

Easily applied to metal, wood, cardboard, etc.—does not require experience. No spraying equipment or baking oven necessary. Brushed on, will dry in about thirty minutes, leaving an absolutely professional finish. Identical to finish found on commercial chassis, panels, speakers and transformers. WalSCO Lacquer Sealer, Cat. 142\*, should be used as undercoat if this lacquer is to be applied on porous materials or over other finishes. Available colors: Black, Green, Grey, Brown, Clear. Specify color when ordering.

Cat. No.		Net Price
122	2 oz. jar	\$0.24
129	16 oz. can	1.35
*142	Sealer, 2 oz. jar	.21

## WALSCO Recordene

**Improves Tone • Renews and Prolongs the Life of Records and Recordings • Reduces Surface Noise and Wear**

A wonder, scientific product for improving and preserving records and recordings. Removes dirt, dust or grease from grooves, and leaves a clean, clear plastic film that reduces surface noise and greatly increases record life. A special wool felt dauber is attached to each bottle cap for easy application. Attractive

display of a dozen bottles increases turn-over and profits from this fast-moving product. Perfectly safe for any recording except those made of Ethyl Cellulose.

Cat. No.		Net Price
92	2 oz. bottle	\$0.27
90	1 gal. can	4.20

## RECORD-EASE

Recording—With the Greatest of Ease

Record-Ease should be applied to all recording and transcription blanks BEFORE the cutting. It makes the shavings "fluffy" as they pile up in the center of the record and thereby prevents interference with the cutting point. By decreasing cutting-point friction, Record-Ease greatly prolongs the life of cutting needles. Indispensable for commercial recordings, schools, police and court recordings, broadcasting stations and home recordings.

Cat. No. 95		Net Price \$0.36
2 oz. bottle		

## LIGHT BULB COLORING

A transparent, heat and moisture-resisting dipping lacquer especially made for coloring bulbs such as used in radio dials, signal systems, auto dash lights, and fancy illumination. Big jars permit dipping of even larger bulbs.

Cat. No.		Net Price
116	Red—2 oz. jar	\$0.15
117	Blue—2 oz. jar	.15
118	Green—2 oz. jar	.15
119	Assorted—Kit of 3	.42
120	Any Color—1 pt. can	1.11

## CHROME-LUSTRE PAINT

An aluminum paint which leaves a satin chrome finish. Can be brushed on or sprayed. Will not leave brush marks. Dries in about one hour. May be used indoors or outdoors—will adhere to practically everything. Unsurpassed for finishing P.A. equipment, outdoor speakers, chassis, etc.

Cat. No.		Net Price
132	2 oz. jar	\$0.18
139	16 oz. can	1.05

## Black — TELEPHONE — Grey

Made for commercial and amateur use on cabinets, chassis, panels, meters, racks, etc. This "satin finish" lacquer dries very fast and produces the "original finish" of most standard telephone and communication equipment. It air dries. May be brushed or sprayed.

Cat. No.		Net Price
Black	Grey	
172	182	2 oz. jar \$0.21

REFINISHING and  
REPAIR KITS

## "SUPER-CHIEF" REFINISHING KIT

A "Must" Item

This is the most complete kit of its kind on the market. Designed by Walsco for radio dealers. It contains everything which is needed to make an old radio look like new—all handy in one box-type carrying case. Contents of kit can be used by either skilled or unskilled refinishers, to completely refinish old radios and trade-ins, or to quickly patch up scratches, mars, etc. This kit will pay for itself on the first or second job. Every first-class radio dealer should have one. Kit contains the following:

Spirit Stain Dark Walnut	Scratch Removing Polish (Light)
Spirit Stain Black	Scratch Remover
Spirit Stain Mahogany	Patching Lacquer
Spirit Stain Maple	Alcohol Lamp
Super Polish	Alcohol
Spirit Stain Light Walnut	Screw Driver
Blending Stain Light Brown	Spatula
Blending Stain Medium Brown	Felt
Lacquer Enamel Light Ivory	Polishing Cloth
Lacquer Enamel Dark Brown	Polishing Pad
Lacquer Enamel Dark Ivory	Garnet Paper (8 sheets)
Shellac Rubbing Fluid	Instruction Book
Stick Shellac (12 shades)	Brushes (3 different sizes)
Scratch Removing Polish (Dark)	
Cat. No. K-26	Net Price \$8.97

## FURNITURE REFINISHING KIT

Ideal for touch-up work on radios, furniture, pianos, etc. Scratches, mars, dents, broken edges can be repaired quickly and without previous experience in cabinet refinishing. An indispensable money-making item for any Serviceman, Radio, Furniture-and-Piano Dealer, which will pay for itself on the first job. It contains: Super Polish, Patching Lacquer, Alcohol, Spirit Stains in Walnut, Mahogany, Maple and Black; Shellac Rubbing Fluid, Plastic Wood, six colors Stick Shellac, Alcohol Lamp, Spatula, three brushes and eight sheets Garnet Finishing Paper. Complete Instruction Book is enclosed. Kit furnished in California Redwood case with a heavy hinged top. Built to last for many years. Cat. No. K-15...Net Price \$3.75

## RADIO CABINET PATCHING OUTFIT

"The Most Popular  
Kit on the Market"

A complete kit especially designed for radio men who have little experience in cabinet work. Over 95% of all cabinet-finish damages can be repaired with this kit. Contains sufficient material for approximately 120 repair jobs. The kit contains two shades of Spirit Walnut Stain, Dark Brown Lacquer, Plastic Wood, two shades of Ivory Spirit Enamel, Patching Lacquer and Super Polish. Also included in the kit are Alcohol (4 oz.), three Brushes, eight sheets of Garnet Finishing Paper, French Polishing Pad, and Steel Wool, together with complete Instruction Booklet describing how to repair various cabinet damages.

Cat. No.	Net Price
K-10—In sturdy box with hinged lid	\$2.85
K-10-W—In California redwood case	3.21

## RADIO CABINET REPAIR KIT

A very handy, compact and inexpensive kit that fills the requirements of many shops and stores. Especially useful for quick patching of damaged cabinets. Small brushes are built into the caps of all stain and enamel bottles. While this kit comprises items of the same high quality as those in the larger Walsco kits, it is designed primarily for the Dealer or Serviceman who has only occasional cabinet repairs; or it can be carried on the delivery truck for use of the outside man. The kit contains one bottle each of the following: Ivory Spirit Enamel—light, ½ oz.; Ivory Spirit Enamel—dark, ½ oz.; Lacquer Enamel—Dark Brown, ½ oz.; Spirit Stain—Walnut, ½ oz.; Super Polish, 4 oz.; French Varnish, 2 oz.; three sheets Garnet Finishing Paper; Steel Wool; and Polishing Cloth. An Instruction Booklet is enclosed, which explains simply how various cabinet or furniture damages can be repaired.

Cat. No. K-9.....Net Price \$1.17

### A WORD ABOUT WALSCO REFINISHING AND REPAIR KITS

These are the only kits on the market with all lacquers, stains and enamels specially prepared, ready mixed and soluble in alcohol. They have four outstanding advantages: 1. Drying time is reduced to approximately one-half. 2. The original finish of the cabinet cannot be lifted, as in the case of improperly applied ordinary lacquers. 3. An unsatisfactory patch can be washed off and the work started again. 4. No special thinners are required. Thinning, washing out brushes, etc., can be done with alcohol, readily obtainable anywhere.

### STICK SHELLAC KIT

An inexpensive kit for servicemen who have some experience in cabinet refinishing. Combined with Radio Cabinet Patching Outfit (K-10) it makes a most economical and completely professional kit for repairing radio cabinets. The shellac sticks match in color almost any cabinet on the market. The Walsco shellac rubbing fluid makes it possible to smooth the patch without any effort or skill. Kit includes: six colors Stick Shellac, Alcohol Lamp, Burn-in Spatula, bottle of Shellac Rubbing Fluid, Felt, Steel Wool, Alcohol and Instructions. Cat. No. K-11.....Net Price \$1.47

effort or skill. Kit includes: six colors Stick Shellac, Alcohol Lamp, Burn-in Spatula, bottle of Shellac Rubbing Fluid, Felt, Steel Wool, Alcohol and Instructions. Cat. No. K-11.....Net Price \$1.47

### GRILLE CLOTH

A high quality cloth, with perfect acoustic properties and beautiful patterns that harmonize with most sets. For use on trade-ins, public address and small and large radio speakers. Use non-penetrating Walsco Fabric Cement (Cat. No. 21) for easy and quick installation. Available in three popular sizes..

350-5 — For 3/4" hole, per 100	2.25
350-6 — For 1" hole, per 100	2.67

## VENTILATING HOLE PLUGS

For amplifiers, transmitters, portable radios, amateur equipment, etc., wherever ventilation of equipment is required. Fine wire screen permits free circulation of air. Standard size fits one inch hole.

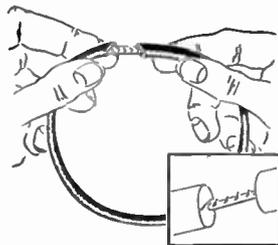

Cat. No.	Net Price
332 — 4 standard plugs	\$0.24
332-D — 20 bags on one display card	4.80
332-1 — 100 plugs, bulk pack	4.08

## "UNIBELT"

### Adjustable Dial Belt

(Available Post-War)

Designed to speed up dial repairs. Comes open and therefore can be installed without taking dial apart. The belt can be cut to required length with a diagonal cutter or a pair of scissors. The special latex covering prevents any slippage and the tempered, extremely flexible spring steel core prevents stretching.

## DIAL CABLES AND CORDS

WALSCO dial cables and cords are made of the finest raw materials obtainable and are manufactured especially for radio and electronic devices. Production is constantly controlled to supply a uniform product to meet the most rigid requirements of the Government, radio industry, laboratories, and radio service shops. Through constant research and laboratory work, WALSCO is able to supply dial cables and cords with an absolute minimum stretch factor; special treatment after fabrication increases their resistance to abrasion. WALSCO Dial Cables and Cords are the finest obtainable on the market.

The following cords cover over 80% of the replacement demand. With one spool of each kind on hand, the serviceman has the proper size for practically any set manufactured since 1934. Constructed with "Fiber-glass" core and "pre-stretched," these are the most efficient cords available.

## Standard Machine Screw Assortment

All the standard sizes used in electronic and similar work are combined in this handy, inexpensive assortment. It contains Nos. 6, 8, 10 screws— $\frac{1}{4}$  to 1" long.

Cat. No.	Description	Net Price
356	—50 assorted screws	\$0.24
356-D	—20 bags on one display card	4.80

## Small Machine Screw & Nut Ass'tm't

A special assortment of extra small screws (Nos. 2 and 4), and nuts so often needed in electronic and experimental work for fastening small parts, to replace rivets, etc.

Cat. No.	Description	Net Price
336	—40 assorted screws and 40 assorted nuts	\$0.24
336-D	—20 bags on one display card	4.80

## SET SCREW ASSORTMENT

A new assortment of precision, hardened steel set screws in all popular sizes for radio knobs, record changers, home and automobile radios, or wherever set screws are needed.

Cat. No.	Description	Net Price
348	—20 assorted screws	\$0.24
348-D	—20 bags on one display card	4.80

Cat. No.	Size	per 1000	Cat. No.	Size	per 1000
348-6-1	6-32x $\frac{1}{8}$	\$10.80	348-8-2	8-32x $\frac{3}{16}$	\$11.40
348-6-2	6-32x $\frac{3}{16}$	10.80	348-8-3	8-32x $\frac{1}{4}$	11.40

352-3	6-32	2.28			

## SHEET METAL AND SELF-TAPPING SCREWS

These screws cut their own threads in either metal or plastic, and "drive home" as accurately as a machine screw in a machine thread. Just drill a hole and drive in the screw—no nut or tapping required. Ideal for

mounting parts to chassis, replacing rivets and set screws, and numerous other purposes. All screws are hex head and slotted—type "Z" and Cadmium plated.

Cat. No.	Description	Net Price
347	—30 assorted screws	\$0.24
347-D	—20 bags on one display card	4.80

347-8-2	8x $\frac{1}{2}$	3.75			

## SMALL WOOD SCREW ASSORTMENT

This assortment contains all the extra small sizes of wood screws needed by radio men, model builders, etc., for fastening name plates, escutcheons and numerous other devices.

Cat. No.	Description	Net Price
355	—60 assorted screws	\$0.24
355-D	—20 bags on one display card	4.80

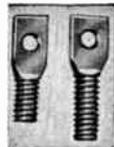

## RACK SCREWS AND CUP WASHERS

For mounting panels in racks and cabinets, fastening record-players and recording chassis, etc. Enhances appearance of any assembly. The oval head screws are nickel plated—so are the cup washers.

Cat. No.	Description	Net Price
354	—15 screws and washers	\$0.24
354-D	—20 bags on one display card	4.80
354-1	Screw 8-32x $\frac{5}{8}$ ", per 1000	6.00
354-2	Screw 10-32x $\frac{3}{4}$ ", per 1000	6.00
354-5	Cup washer No. 8, per 1000	3.45
354-6	Cup washer No. 10, per 1000	3.45

## SPADE BOLTS

Indispensable for attaching condensers, coils, cans, and similar items. For Experimenters, Servicemen and Manufacturers of electronic equipment. Stud size 6-32. Hole size for No. 6 screw.

Cat. No.	Description	Net Price
327	—30 assorted bolts	\$0.24
327-D	—20 bags on one display card	4.80
327-1	—Overall length approx. $\frac{5}{8}$ ", per 1000	6.00
327-2	—Overall length approx. $\frac{3}{4}$ ", per 1000	6.90

## SPECIAL MOUNTING NUT ASSORTMENT

An assortment of the various kinds of nuts used on volume controls, switches, jacks, potentiometers, etc. A "must" for every radioman and electrician.

Cat. No.	Description	Net Price
353	—15 assorted nuts	\$0.24
353-D	—20 bags on one display card	4.80

333-2—For cables from 3/16" to 1/4" diam.	6.30
333-3—For cables from 1/4" to 3/8" diam.	6.60

# WALSCO

**STAPLE DRIVER — TUBING  
SPRINGS — BUMPERS  
TERMINAL LUGS**

## WALSCO STAPLE DRIVER

**This Tool Pays for Itself on the First Job!**  
A real time and trouble-saving tool for stapling wire into corners, into moldings, behind pipes, and on to hard surfaces, such as plaster, cement, and even soft concrete. For Radio, Public Address, and Inter-Communication installation and service. Useful also for general stapling, sign-posting, refrigeration gasket work, etc. The WALSCO Staple Driver has met the test in the field and has proved itself a real aid to maintenance men. This handy device automatically positions the staple—then one or two strokes with the palm of the hand and the staple is driven home neatly, quickly, and accurately. A small trigger regulates the feeding mechanism to enable the operator

to strike the handle on hard surfaces as often as necessary before a second staple leaves the magazine. Staples come in strips, can be loaded in a few seconds and are large enough for cables and wires up to 1/4" diameter. An adjustable regulator controls the depth to which the staple is driven into surface, thus preventing damage to the insulation of the wire.

Cat. No. 500..... Net price \$3.70  
No. 505—Carrying Case—Handy carrying case for the WalSCO Staple Driver. To carry tool in the pocket or on the belt. Genuine cowhide leather..... Net Price \$1.25  
No. 507—Rubber Cap—Fits over the head of the stapler. Makes it easier to drive staples into hard surfaces..... Net Price \$0.19  
Carbon Steel Staples—Made of tool steel. Come in strips and are especially made for the WalSCO Staple Driver. Inside coated with special clear insulating lacquer; patented process.  
No. 550—250 staples..... Net \$0.29  
No. 552—1000 staples..... Net 1.10

## WALSCO FLEXITUBE

• A high grade synthetic tubing for electronic and electrical insulation. • Extremely flexible and resistant to abrasion. • High dielectric strength (average 8000 volt). • Resistant to cold or heat (minus 65° F. to plus 185° F.). • This new synthetic tubing is ideally suited for all insulation purposes in radio and communication assemblies. Attractively packaged in individual boxes. Easy to store. Usable to the last inch.

Cat. No.	Size B. & S. Gauge	Approx. I. D.	Length per Package	Net Price
600	18	.042"	20 ft.	\$0.48
601	16	.053"	20 ft.	.48
602	14	.066"	20 ft.	.48

621-D	—24 assortments of No. 621 in one display box.....12.96

## TERMINAL LUGS

Available in the five most popular sizes which meet all the requirements of the radio and electronic field. Surface is perfectly tinned over a brass body. Accurate forming facilitates easy handling.

Cat. No.	Net Price
328	—40 assorted lugs.....\$0.24
328-D	—20 bags on one display card..... 4.80

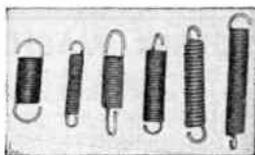

## RADIO KNOB SPRINGS

The modern method of fastening knobs to shafts. Available in all regular sizes and shapes. The assortment is most complete and is useful to radio shops.

Cat. No.	Net Price
345	—20 assorted springs.....\$0.24
345-D	—20 bags on one display card..... 4.80
345-1 to 345-9	—Knob springs (as illustrated) per 1000..... 6.60

## EXPANSION SPRINGS

Very handy for radio and electrical shops, laboratories, etc. The assortments contain various sizes of springs for untold applications: record changers—to name one out of a thousand.

Cat. No.	Net Price
329	—10 assorted large springs.....\$0.24
329-D	—12 bags on one display card..... 2.88
339	—10 assorted small springs......24
339-D	—20 bags on one display card..... 4.80

## RUBBER FEET

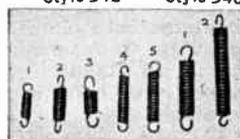

For use on bottom of cabinets, amplifiers, speaker boxes, instruments, etc. Recessed cavity of bumper prevents screw from scratching. Available in 2 sizes.

Cat. No.	Net Price
335	—16 assorted rubber feet.....\$0.24
335-D	—20 bags on one display card..... 4.80
335-1	—3/8" O.D. x 3/8" high, per 100......90
335-2	—1/2" O.D. x 3/8" high, per 100..... 1.05

## DIAL DRIVE SPRINGS

Made of fine music wire for greater flexibility and available in all standard sizes. Carefully looped at each end and rust-proofed.

Cat. No.	Net Price
340-1	—Dial drive springs, per 1000.....\$19.80
340-2	—Dial drive springs, per 1000..... 19.80
341-1	—Small drive springs, per 1000..... 12.60
341-2	—Small drive springs, per 1000..... 12.60
341-3	—Small drive springs, per 1000..... 12.60
341-4	—Small drive springs, per 1000..... 13.80
341-5	—Small drive springs, per 1000..... 13.80

### ASSORTMENTS

340	—Asst. of 10 springs, 5 sizes..... .24
340-D	—20 bags on one display card..... 4.80
341	—Asst. of 10 springs, small sizes only......24
341-D	—20 bags on one display card..... 4.80

## COMPRESSION SPRINGS

A hard-to-get item. The WalSCO assortments contain all of the springs often needed for repair work on radio and electronic equipment, motors, appliances, etc. Available in two assortments.

Cat. No.	Net Price
337	—20 assorted small springs.....\$0.24
337-D	—20 bags on one display card..... 4.80
338	—15 assorted large springs......24
338-D	—12 bags on one display card..... 2.88

# American Beauty

## ELECTRIC SOLDERING IRONS

Embodied in these Electric Soldering Irons are those features of construction and design that specialized experience—since 1894—has demonstrated to be desirable for efficient and lasting service. Hundreds of thousands are in use throughout the world in a wide variety of manufacturing plants; in service, maintenance and repair shops; Army and Navy Services; in telephone, telegraph and radio stations. Because of their proven efficiency and durability, they are preferred by those who measure the value of a tool by the service it renders.

### RELATIVE SIZES AND SPECIFICATIONS

**No. 3138**—Primarily adapted for light work—radio, telephone, telegraph, ignition, factory and production work of a light nature; for telephone installation and switchboard work, etc.

**No. 3158**—For the same purposes as No. 3138 and for work of a heavier nature. Used by electric starter and ignition manufacturers for repair work and other purposes where more heat is needed.

**No. 3178**—For use on still heavier work; for light commutators and service and production work. A very useful iron for general purposes.

**No. 3198**—For heavy work of all kinds. Supplies a very large volume of heat at high temperature. Used by manufacturers in many different lines; for shop, service, production work, etc.

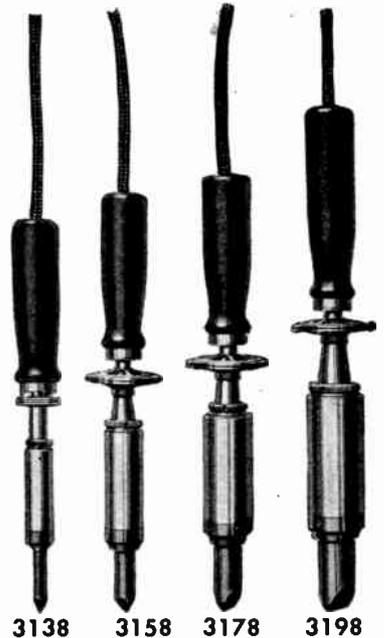

Each iron is equipped with a baffle plate, at the shank, to prevent free conduction of heat to handle.

Made in all standard voltages and for 32 volts. No. 3138 also made for 12 and 24 volts. All can be equipped with three-conductor cord, one wire grounded, at slight additional charge.

Separate heat-insulating stand supplied with each iron.

head, on which the tip screws with taper fit. An efficient and serviceable tool that will give satisfaction when used on the light work for which it is intended. Made in all standard voltages and for 6, 12 and 32 volts.

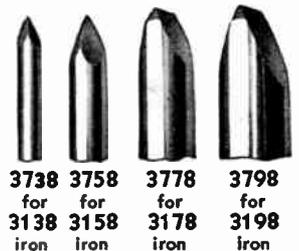

**No. S-76**—A special, light, compact iron designed for light work. It heats up quickly and consumes only 50 watts. Its construction is somewhat different from that of the standard irons, having a specially treated copper core, with light metal

### SPECIFICATIONS

## American Beauty COPPER TIPS

These copper tips are made of commercially pure, drawn bar, copper rod. Each tip is designed to fit into, and to the full length of, core of heating unit of the particular iron for which it is intended. Maximum area of contact between tip and heating unit is thus assured. Tips are of uniform diameter throughout their entire length and are not made with enlarged heads because this does not increase the capacity of a soldering iron. Tip is held in place in core of heating unit by a recessed set-screw. Removal for cleaning or replacement is therefore easy. Standard shaped tips with which the various models are equipped as shown in illustration but pyramidal, instead of chisel type, and vice versa, can be supplied when so specified without additional charge. For No. 3138 a special, long, semi-chisel shaped tip can also be supplied for telephone and switchboard work.

## American Beauty TEMPERATURE REGULATING STANDS

For use on (AC) Alternating Current Only

This is a thermostatically controlled device for the regulation of the temperature of an electric soldering iron while at rest. When placed on this stand, soldering iron is maintained at working temperature, ready for instant use or, if desired, at a lower temperature. Through an adjustment on bottom of the stand, thermostat may be set for the maintenance of any desired temperature—from very low, or warm, to full working temperature. Body of stand is of molded plastic. Soldering iron cradle proper is of metal. Stand is equipped with cord and attachment plug-cap for connection to current and with a receptacle for connection of the electric soldering iron. It is designed for use with electric soldering irons up to 660 watts capacity and on circuits up to 240 volts.

**INDUSTRIAL  
ELECTRIC SOLDERING IRONS**

**ESICO**

**GREEN LABEL  
ELECTRIC SOLDERING IRONS**

Reg. U. S.

Pat. Off.

**GENERAL INFORMATION FOR PLUG TIP IRONS**  
Esico prestige assures the fine quality of these soldering irons. For use on both A.C. and D.C. current. Wound in voltages ranging from 105 to 240 volts. Tips are plug type, held by a set screw. Elements and other parts are easily replaced. Rugged and durable, with a one-piece heavy gauge steel case, mounted element and positive grip handle. Equipped with a 6 ft. cord and attachment plug. Metal stand supplied with every tool.

General Information: Exceptionally fine tools. Packed in green label boxes to differentiate from Esico Industrial Irons. One-piece blued steel cases and richly-dark mahogany handles. Replaceable forged copper tips. Wound in voltages ranging from 32 to 250 volts. Can be used on both A.C. and D.C. current. (Nick Nacks 105-120 volts only.)

**No. 54A — 65 WATTS**  
Tip  $\frac{3}{8}$ " in Diameter  
Iron Complete \$5.00, Extra Tip 25¢, Element \$2.25  
Equal to copper of  $\frac{1}{2}$  lb. Length overall 10". Weight without cord, 8 oz. For light work, such as soldering fine wires, radio factory use, tool kits. Suitable where a light, short tool is required.

**No. 96A — 110 WATTS**  
Tip  $\frac{3}{8}$ " in Diameter  
Iron Complete \$5.50, Extra Tip 32¢, Element \$2.75  
Equal to copper of  $\frac{3}{4}$  lb. Length overall, 12". Weight without cord, 10 oz. For electrical and radio factories, telephone and switchboard repair, fuses, tool kits, light manufacturing, delicate instruments, radio and electrical laboratories.

**No. 126A — 130 WATTS**  
Tip  $\frac{1}{2}$ " in Diameter  
Iron Complete \$7.75, Extra Tip 65¢, Element \$3.50  
Equal to copper of 1 lb. Length overall, 12 $\frac{1}{2}$ ". Weight without cord, 16 oz. For light tin work, automobile repairs and general factory soldering. Very handy because of its shortness.

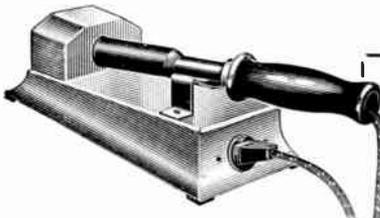

**No. 206A — 200 WATTS**  
Tip  $\frac{1}{2}$ " in Diameter  
Iron Complete \$8.75, Extra Tip 70¢, Element \$3.75  
Equal to copper of 1 $\frac{1}{2}$  lbs. Length overall, 14". Weight without cord, 24 oz. For medium tin work, automobile repairs, patterns, factory work, small branders.

**No. 355A — 310 WATTS**  
Tip  $\frac{5}{8}$ " in Diameter  
Iron Complete \$10.25, Extra Tip \$1.25, Element \$5.00  
Equal to copper of 3 lbs. Length overall, 14 $\frac{1}{2}$ ". Weight without cord, 11 oz. For heavy sheet metal work, tin-smiths, automobile radiators, refrigerators, branding.

**No. 505A — 500 WATTS**  
Tip 1 $\frac{1}{4}$ " in Diameter  
Iron Complete \$12.25, Extra Tip \$1.75, Element \$6.00  
Equal to copper of 5 lbs. Length overall, 14 $\frac{1}{2}$ ". Weight without cord, 34 oz. For heavy soldering, large tanks or cans, roofs, large area objects, large branders.

**ESICO THERMOSTATIC CONTROL STAND**

Temperature: Iron can be maintained at any desired temperature while in stand. Tip temperature is controlled. When removed from the control, full current is instantly applied to the iron. Save: Cost of electric current. Prolong: Element and tip life. Permits the use of high wattage elements in small irons as they cannot overheat.

Positively impossible for Iron to Overheat or to Burn Off Its Tin!

# ELECTRIC SOLDERING IRONS

**GENERAL INFORMATION**—Equipped with 6 ft. (10,000 cycle) approved heater cord (covered with twine braid for extra long wear) and rubber plug. European type plugs 25c extra list. Metal stand furnished with each iron. Heating elements made of best grade nickel-chromium resistance wire, insulated with finest mica obtainable. Elements in the plug tip irons are replaceable by the user and in the screw tip irons replaceable at the factory. Tips in

all irons are replaceable; made of hard drawn pure copper. Case is made from solid hexagon steel (except No. 50 and P-30), affording it great mechanical strength, preventing denting. Terminal easily accessible and constructed to relieve cord strain. Smooth, cool, comfortable handle—readily replaceable. Voltage range: 32 to 250. Standard voltages 110/120, 121/130, 220/250. All other voltages \$1.00 extra list.

## SCREW TIP IRONS

No. 50—For light soldering on radio, telephone and electrical apparatus. 50 Watts. Tip diam.,  $\frac{1}{16}$ ". Ship. wt., 1 lb. Equal to  $\frac{1}{2}$ -lb. old style copper.....each \$4.50

No. 60—Medium light soldering on telephone, radio, apparatus and linemen's kits. 60 Watts. Tip diam.,  $\frac{1}{8}$ ". Ship. wt., 1  $\frac{1}{2}$  lb. Equal to 1-lb. old style copper.....each \$6.25

No. 85—A high speed tool for telephone, radio and home use. 90 Watts. Tip diam.,  $\frac{1}{8}$ ". Ship. wt., 1  $\frac{1}{4}$  lb. Equal to 1  $\frac{1}{2}$ -lb. old style copper.....each \$7.00

No. 120—Light tinware, toys, typewriter, light auto, etc. A high speed iron. 120 Watts. Tip diam.,  $\frac{5}{16}$ ". Ship. wt., 1  $\frac{1}{2}$  lb. Equal to 2-lb. old style copper.....each \$8.00

No. 130—Same as No. 120 except has larger tip and 10 more watts capacity. 180 Watts. Tip diam.,  $\frac{3}{8}$ ". Ship. wt., 1  $\frac{1}{2}$  lb. Equal to 2-lb. old style copper.....each \$8.75

No. 170—Medium tinware, small cans, auto repairs, pipes, gutters, toys, small motors. 175 Watts. Tip diam., 1". Ship. wt., 2  $\frac{1}{4}$  lb. Equal to 2  $\frac{1}{2}$ -lb. old style copper.....each \$10.00

No. 225—Medium tinware, cans, auto repairs, metal patterns, light roofing, small branders. 250 Watts. Tip diam., 1  $\frac{1}{8}$ ". Ship. wt., 2  $\frac{5}{8}$  lb. Equal to 3-lb. old style copper.....each \$11.00

No. 350—Heavy tinware, large cans, autos, roofing, refrigerators, ship and airplane. 850 Watts. Tip diam., 1  $\frac{3}{8}$ ". Ship. wt., 3  $\frac{3}{4}$  lb. Equal to 4-lb. old style copper.....each \$13.00

No. 500—Auto repair, sinks, roofs, cans, armatures, large branders, tinsmiths, etc. 500 Watts. Tip diam., 1  $\frac{1}{2}$ ". Ship. wt., 4 lb. Equal to 5-lb. old style copper.....each \$15.00

No. 700—For extra heavy soldering and large branders. 700 Watts. Tip diam., 1  $\frac{3}{4}$ ". Ship. wt., 5 lbs. Equal to 7-lb. old style copper.....each \$27.50

## PLUG TIP IRONS

No. P-30—For extremely light soldering on finest wire and delicate instruments. 40 Watts. Tip diam.,  $\frac{1}{4}$ ". Ship. wt.,  $\frac{5}{8}$  lb. Equal to  $\frac{1}{4}$ -lb. old style copper.....each \$4.50

No. P-70—For light soldering on radio and telephone apparatus and electrical instruments. 80 Watts. Tip diam.,  $\frac{3}{8}$ ". Ship. wt., 1  $\frac{1}{8}$  lb. Equal to 1-lb. old style copper.....each \$6.00

No. P-100—A high speed tool for telephone switchboards, electrical instruments, etc. 100 Watts. Tip diam.,  $\frac{3}{8}$ ". Ship. wt., 1  $\frac{1}{4}$  lb. Equal to 1  $\frac{1}{2}$ -lb. old style copper.....each \$7.00

No. P-125—For light tinware, toys, typewriter type bars, small cans, auto, etc. 130 Watts. Tip diam.,  $\frac{5}{16}$ ". Ship. wt., 2 lb. Equal to 2-lb. old style copper.....each \$8.50

No. P-150—Extra high speed iron for radios, electrical apparatus and where a light iron with small diameter is required. 150 Watts. Tip diam.,  $\frac{5}{16}$ ". Ship. wt., 1  $\frac{3}{4}$  lb. Equal to 2-lb. old style copper.....each \$7.75

No. P-151—Same as No. 150, except where a larger tip is desired. 175 Watts. Tip diam.,  $\frac{1}{2}$ ". Ship. wt., 1  $\frac{1}{2}$  lb. Equal to 2  $\frac{1}{2}$ -lb. old style copper.....each \$8.25

No. P-200—For medium tinware, cans, auto repairs, light roofing, sheet metal, etc. 200 Watts. Tip diam.,  $\frac{5}{8}$ ". Ship. wt., 2  $\frac{1}{2}$  lb. Equal to 2  $\frac{3}{4}$ -lb. old style copper.....each \$9.50

No. P-250—Same as No. P-200, except where greater speed is required for manufacturing. 250 Watts. Tip diam.,  $\frac{3}{4}$ ". Ship. wt., 2  $\frac{3}{4}$  lb. Equal to 3-lb. old style copper.....each \$10.75

No. P-300—For heavy tinware, large cans, auto, roofing, refrigerator work, etc. 300 Watts. Tip diam.,  $\frac{7}{8}$ ". Ship. wt., 2  $\frac{7}{8}$  lb. Equal to 4-lb. old style copper.....each \$12.50

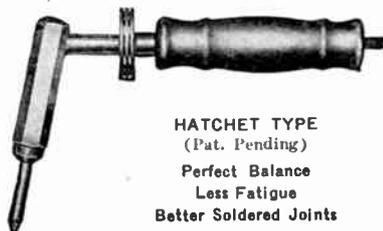

No. P-550—For auto radiators, copper sinks, roofs, heavy armatures, large branders, etc. 550 Watts. Tip diam., 1  $\frac{1}{2}$ ". Ship. wt., 4  $\frac{1}{4}$  lb. Equal to 5-lb. old style copper.....each \$15.00

## HEATS

READY TO USE IN ONLY

# 90 Seconds

FROM TIP TO PLUG . . . IN A CLASS BY ITSELF!

A built-in thermostat keeps the Vanatta Kwikheat Soldering Iron at correct temperature for most efficient work—can't overheat—saves retinning time. A Kwikheat Iron will do the soldering jobs of several ordinary irons and do them better because of a variety of interchangeable tip styles and controlled power. Check these exclusive advantages that put the Kwikheat Iron in a class by itself . . . it's *HOT*, ready to use only 90 seconds after plugging in . . . powerful, 225 watts, yet it's light (14 ozs.)—well balanced with a cool, safe, protecting handle. Six interchangeable tip designs enable a Kwikheat Iron to do most any soldering job. Ideal for radio work. Thousands of Kwikheat Irons now in use by some of largest precision manufacturers in the nation. Order your Kwikheat Soldering Iron and extra tip styles today.

✓ CONVENIENCE

### *For General Soldering*

RUBYFLUID FLUX OR PASTE (that meets government specifications) is easy and pleasant to use. It wets out freely and properly conditions the metals so that a strong, neat union is possible. No objectionable or dangerous fumes.

### *For Stainless Steel*

Ruby's Stainless Steel Flux eliminates the many problems that formerly arose from attempts to join stainless steel. Stainless Steel producers recommend this special flux because: (1) No special equipment or excessive heat required; (2) Discoloration is eliminated.

**Always  
Specify  
RUBY  
the fast-  
acting flux**

### RUBY Acid Core and Rosin Core SOLDER

Easy-to-use Rubyfluid Solder comes with acid or rosin core wound on spools weighing from a few ounces to 20 pounds.

1661	6 in.	Blue Temper	3½ lbs.	\$1.70
1671	Same without cutter		3½ lbs.	1.50
1662	6 in.	Polished Steel	3½ lbs.	1.90
1672	Same without cutter		3½ lbs.	1.65

Also Furnished in K Brand.

## LONG NOSE SIDE-CUTTING CHAIN PLIERS

The long slender jaws are milled inside, and the side-cutters are built to cut. An easy operating plier with sturdy joint.

No.	Length	Finish	Wt. per doz.	Price Each
1681	6 in.	Blue Temper	3¾ lbs.	1.75

## EXTRA LONG REACH FLAT NOSE PLIERS

The long, flat nose is nicely tapered and beveled. No cutter. Adaptable to all the uses of a flat nose plier with the added feature of an extremely long nose.

No.	Length	Finish	Wt. per doz.	Price Each
1741	6 in.	Blue Temper	3 lbs.	1.60
1751	Same with Cutter		3 lbs.	1.80

## FINE ROUND NOSE—EXTRA LONG PLIERS

Specially developed for radio and radio tube work. Long round nose jaws milled on the end. Extensively used by leading manufacturers.

No.	Length	Finish	Wt. per doz.	Price Each
2631	6 in.	Blue Temper	2¾ lbs.	\$1.65

## EXTRA LONG NOSE PLIERS

Very popular with auto mechanics and repair men. Especially good for radiator repair work and in places difficult to reach. Used on auto ignition work on generators, starters, switch work, etc., and on speedometer repair work. Length of jaw 2¾ in.

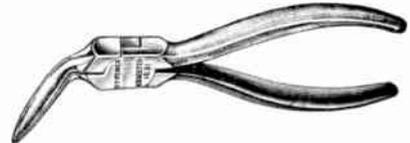

No.	Length	Finish	Wt. per doz.	Price Each
1781	7 in.	Blue Temper	3 lbs.	\$1.90
1771	Same without cutter		3 lbs.	1.60
1782	7 in.	Polished Steel	3 lbs.	2.20
1772	Same without cutter		3 lbs.	1.80

## LONG NOSE CHAIN PLIERS

Designed for use as a half-round nose, chain nose and flat nose plier. Made without cutter.

No.	Length	Finish	Wt. per doz.	Price Each
1691	6 in.	Blue Temper	2¾ lbs.	1.65

## CURVED NEEDLE NOSE PLIERS

Spring tempered, long curved nose pliers for unusual jobs. Used for any awkward job.

No.	Length	Finish	Wt. per doz.	Price Each
1631	5½ in.	Blue Temper	2¼ lbs.	1.85
1632	5½ in.	Polished Steel	2¼ lbs.	2.10

## LONG FINE NEEDLE NOSE PLIERS

This pattern is especially made for difficult and odd jobs where no other plier will answer. Especially useful for auto mechanics and vulcanizers. Its capacity for fine work is unusual. The long, fine nose is very carefully tempered.

No.	Length	Finish	Wt. per doz.	Price Each
1621	6 in.	Blue Temper	2¼ lbs.	1.75
1622	6 in.	Polished Steel	2¼ lbs.	1.90

## XceLite NUT DRIVERS

**DELUXE SET IN HANDY HOLDER . . . .**  
**Handles of Different Colors to Indicate Size**  
 (Pat. App'd For)

● A great set of tools—and a great time-saver. Each nut driver has a different colored handle to show at a glance its size—no fumbling—no squinting to read printed sizes. Handles are made of special plastic which is shatter-proof, shock-proof, fire proof. Shafts and sockets of high carbon steel, case hardened by special process insuring extreme depth of case. Sockets are precision formed, deep enough to handle two nuts.

Attractive, green finished, metal tool holder (Pat. App'd For) has two screw holes for attaching, and lock bar which covers the nut holders (and the attachment screws) and has eyelets for padlock. Over-all size of tool holder and nut drivers, 7 1/2" x 7 1/4" x 1 1/4". Finish of Deluxe Nut Drivers subject to government decree. List, complete set with holder.....\$6.10

## HOLLOW SHAFT NUT DRIVERS

This unique, time-saving tool was especially designed for general electrical and radio work. In radio, it is primarily useful in installing and removing volume control and other panel equipment. The nut is readily tightened or loosened without damage to the panel. On telephone or power switchboards, the Hollow Shaft Nut Driver is especially useful where nuts must be installed or removed over long protruding bolts or studs — made with or without insulated shafts. The former for use with high voltage work. Shafts insulated for protection up to 1000 volts; handles to 5000 volts.

## XCELITE "Combination Detachable" SCREWDRIVER

Here's convenience—and saving—combined in a mighty unique and useful tool. The XCELITE Combination Detachable Screwdriver has a genuine Xcelite Shockless Handle, hollow to receive the dual-blade screwdriver units listed below. With this practical Xcelite handle and, for example, a No. 2 Phillips blade on one end and a 1/4" Xcelite blade on the other, you have **two** screwdrivers for just about the price of one! What's more, you can buy blades of other sizes to fit the same handle. Note the unique ball fastener on the blade. This holds the screwdriver unit securely in place—yet readily slips out when desired.

### BLADE COMBINATIONS

(Order by Number)

- No. 1 — No. 1 Phillips and 3/16" Xcelite
- No. 2 — No. 2 Phillips and 1/4" Xcelite
- No. 3 — No. 3 Phillips and 5/16" Xcelite

### STUBBY TYPE (overall length 3")

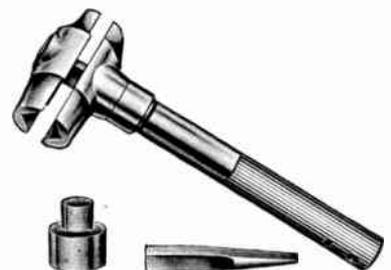

- No. S-1 Stubby — No. 1 Phillips and 1/8" Xcelite
- No. S-2 Stubby — No. 2 Phillips and 1/4" Xcelite

### PRICES

## 6" XCEL Adjustable SOCKET WRENCH (with Attachments)

A whole set of tools in one! Easy, light-weight tool to handle; yet super tough due to its drop-forged construction of special chrome nickel steel. Chrome finished. Fits any size nut, hexagon or square, round or odd shaped, from 1/4" to 1". Has two mighty useful attachments—hammer head of unbreakable XCELITE and an alloy steel screwdriver to insert in small end of wrench to form offset screwdriver.

List Price, complete, \$1.75

Individually boxed, packed 6 to a self-selling display carton.

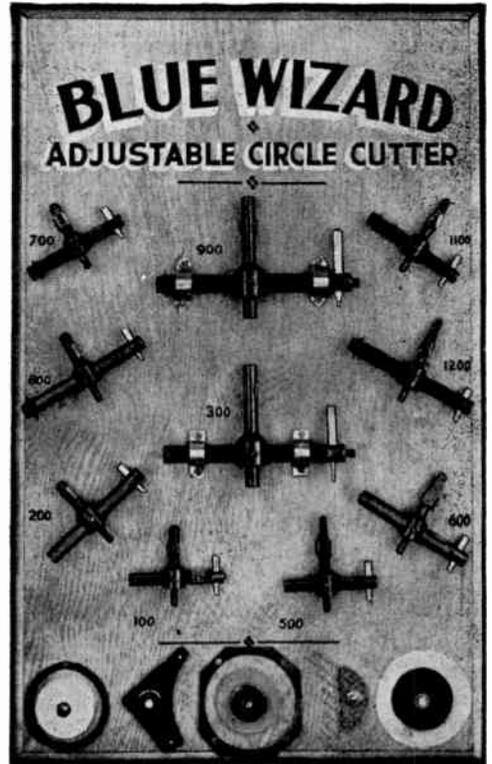

Weight, 6 lbs.

# Blue Wizard Adjustable Circle Cutters

Rugged improved circle cutters for making holes from 1" to 10" in diameter. Designed to cut accurately and quickly any materials listed below. May be used in slow-speed drill press or ordinary hand-brace. A practical tool priced so low that no shop can afford to be without it. Ideal for all kinds of radio construction work. All cutting bits are made of special high speed steel and are easily replaced with new ones or removed for sharpening.

## THE SILENT SALESMAN

A Display Board for the Dealer's store consisting of 10 different sizes and types of circle cutters with samples of materials that the tool is capable of cutting, will greatly stimulate sales in the store. See photograph of Display Board to the right.

Condenser-Resistor Analyzers	F-49, 52; K-28, 61		
Industrial Circuit Testers	F-10, 16, 30, 33, 36, 38		
Multimeters, Multitesters	Section F		
Oscillators, Signal Generators	F-1, 2, 14, 20, 30, 31, 38;		
	H-55, 65, 66		
Pocket "Tattletales"	F-54; R-34		
Set Analyzers	Section F; H-68		
Shunts	F-4, 34		
Socket Selector	F-11		
Television Testers	F-2, 9, 30, 34		
Temperature Testers	F-47		
Tube Testers, Checkers	F-1, 2, 10 to 14, 19, 29 to 36		
Vibrator Testers	F-2		
Voltage Breakdown Testers	F-51		
<b>THERMADOR ELECTRICAL MANUFACTURING CO.</b>	J-20, 21		
Thermo Ammeters	F-4, 8, 47		
<b>THORDARSON ELECTRIC MANUFACTURING CO.</b>	J-22 to 30		
"Time Signal" Coil Kit	H-69		
Toggle Switches	R-4, 9, 17, 35		
"TokFone" Call Systems, Amplifiers	C-33 to 36		
Tone Controls	L-1, 2, 5, 15		
Auto Tone Controls	L-2		
Tone Control Unit	L-2		
Tone Control Switches	I-1, 10; R-35		
Tool Cases, Pocket	R-38		
Tools and Tool Kits	Section R		
Neutralizing, Alignment	M-10; R 2, 3, 12, 20, 21, 38		
T-Pads	L 3, 7, 27, 39		
Transceivers, 2 1/2 Meter	H 16, 65		
Transceiver Transformers	J-12		
Transcription Players	C-9		
	E-29, 30		
Needles	E 28 to 44; R-30		
Pickups	E-13, 26, 27		
Transformers	Section J		
Audio, Driver, Input, Output	Section J		
Cathode Ray Tube	J-15, 30		
Crystal Recorder	J-7, 30		
Duplicate Replacement for Radios	J-39		
Fence Controller	J-11		
Filament	Section J		
Filter, Audio and Swinging Chokes	Section J		
Input	J-4, 10, 41, 43		
Microphone and Line	E-8, 10; J-4, 7, 10, 23, 31 to 35, 46		
Modulation	J-15, 27, 36		
Noise Isolation	J-11		
Output	Section J		
Photocell	J-31		
Pickup	J-4, 10, 31, 34, 35		
Plate	J-13, 17, 27, 31 to 38, 42, 43		
Plate-Filament Combined	J-33, 37, 41, 43		
Power	Section J		
Reactors	J-3, 12, 24, 35		
Speaker Field Supply	J-6, 28		
Stepdown	J-11, 30, 40		
Transceiver	J-12		
Tube-Checker	J-11		
Vibrator	J-3, 6, 28		
Voltage Adjuster and Control	J-11, 12, 18, 19, 30, 35, 38,		
	40, 47 to 50		
	O-3 to 10, 21		
Transmission Line Cable	H-8 to 11, 16, 19, 37		
Transmitters	H-11, 12		
Marine Radiophone Units	H-75 to 80, 87, 88		
Modulator Units	H-8, 19		
Racks, etc.	H-16		
Speech Amplifiers	H-85		
Transceivers, 2 1/2 Meter	H-62		
Trim for Cabinets	K-29		
TRIMM, INC.	R-36, 45		
Trimmer Condensers	H-27 to 42, 56, 57, 73, 96;		
Trimount Fasteners, Snap-In	Section D		
TRIPLETT ELECTRICAL INSTRUMENT CO.	F-1 to 4		
Trumpets and Horns	C-33		
Tube Adapters and Plugs	M-4, 50 to 52		
Tube Clips and Caps	H-32, 50, 57, 85, 86		
	M-4, 45, 46		
	O-16		
	P-6		
	R-5, 11, 17, 37		
Tubes	Section A		
Cathode Ray	A-2, 14, 16; F-24		
Diathermy	A-18 to 31		
Hearing Aid	A-9		
Industrial and Special Purpose	A-2, 8, 15, 16, 18 to 34		
Phototubes	A-2, 20, 33		
Receiving	A-1 to 17		
Resistor (Ballast)	A-13; L-55, 56		
Rectifier	A-1, 3, 9 to 34		
Television	A-2, 14		
Transmitting, Power, Amateur	A-2, 8, 15, 16, 18, 20 to 34		
Voltage-Regulating	A-7, 13, 35; L-55, 56		
Tube Shields	H-34, 57, 85		
	R-11		
Tube Sockets	H-32, 33, 42, 50, 57, 67, 73, 86		
	M-2, 3, 39, 40		
	R-11, 36		
	H-32, 42, 50, 57, 86;		
Transmitting, Acorn, Industrial, etc.	M-2, 7, 48; O-16;		
	R-11		
Tube Testers, Checkers	F-1, 2, 10 to 14, 19, 29 to 36		
Tube Tester Transformers	J-11		
Tubing, Flexible, Varnished	H-85		
	O-2, 11		
	R-35, 48		
	H-35, 68		
	H-69		
Tuner Kits, P. A.	A-11, 12		
Tuners, FM-AM	H-24, 56, 67, 73		
TUNG-SOL LAMP WORKS, INC.	R-4, 10		
Tuning Dials	H-9, 14, 31, 35, 41, 55, 67, 69		
Tuning Units, Assemblies, Tanks	R-38		
Tuning Wands	E-16 to 18		
TURNER COMPANY, THE	E-30, 33		
Turntables and Motors, Phonograph			

### — U —

UNITED ELECTRONICS COMPANY	A-27, 28
UNITED TRANSFORMER CORPORATION ("UTC")	J-31 to 42
UNIVERSAL MICROPHONE COMPANY	E-1 to 4
UNIVERSITY LABORATORIES	D-17, 18
UTAH RADIO PRODUCTS COMPANY	
Resistors, Rheostats, etc.	L 37 to 39
Speakers, etc.	D-11 to 15
Switches, Jacks, Plugs, etc.	I-5 to 7
Transformers	J-1 to 4
Vibrators	P-17, 18

### — V —

VACO PRODUCTS COMPANY	R-67 to 69
Vacuum Cleaner Belts	R-36
Vacuum Condensers	A-30
Vacuum Switches	A-30
Variable Receiving and Tuning Condensers	H-25 to 56,
	67 to 73, 94 to 98
Varnished Tubing (Spaghetti)	R-7
	H-85
	O-2, 11
	R-35, 48
Varnishes, Lacquers, Paints, Enamels	R-27, 29, 42, 43
Vernier Dials	H-24, 56
	R-4, 10
Vibration Pickups	E-12
Vibrator Power Supplies, Packs	H-37
	P-9, 19 to 27
Vibrators	P-10 to 24
Vibrator Testers	F-2
Vibrator Transformers	J-3, 6, 28

## GENERAL INDEX (Concluded)

VIBROPLEX COMPANY, INC., THE	I-21 to 24
"Videotron" tubes	A-14
Voltage Breakdown Testers	F-51
Voltage Dividers	Section L
Voltage Regulators, Reducers, Automatic	L-8, 48, 51, 55, 56
Voltage Regulator-Transformers, Controls	J-11, 12, 18, 19, 30, 35, 38 to 40, 47 to 50
Voltmeters, Volt-ohmmeters, Volt-ohm-milliammeters	Section F
Volume and Tone Controls	Section L
Auto	A-13
P. A., etc.	L-2, 14, 16, 28, 29
Volume Control Wrenches	L-3, 6, 7, 15, 27, 39
	L-30
	R-2

### — W —

Water Sockets	H-32, 42, 50, 86
	M-39
	R-11, 36
Wall Plates, Receptacles, Assemblies	Section M
"Walsco" Service Aids	R-41 to 48
<b>WARD LEONARD ELECTRIC COMPANY</b>	
Relays	I-25, 26
Resistors and Rheostats	L-45 to 48
<b>WARD PRODUCTS CORPORATION, THE</b>	O-24
Washers, Nuts, Screws	I-4
	R-8, 19, 36, 37, 46, 47
Wattmeters	F-4, 33
Wave Traps	H-57, 70
Wax, Floor	R-29
<b>WESTINGHOUSE ELECTRIC &amp; MFG. CO.</b>	A-20 to 22
<b>WESTON ELECTRICAL INSTRUMENT CO.</b>	F-8 to 12
Wheatstone Bridge	F-50
Wheel Static Eliminators, Auto	O-13
	R-6, 36
Window Antennas	R-7
Window Cleaner Compounds	R-29
Wire and Cable	Section O
Antenna Wire and Cable	Section O; H-51
Antenna for AC-DC Sets	O-2, 9, 19, 20

Army-Navy Spec. H. F. Cable	M-11
Auto Radio Wire and Cable	O-1, 2, 3, 13, 19, 23
Battery Cable	O-3, 10, 19
Bell Wire	O-2, 9, 20
Bus-Bar Wire	O-5, 11
Communicating System Cable	O-3, 10, 22
Co-axial Cable	M-11; O-21
Dial Cable, Belts	O-4, 11; R-32, 33, 45
Electrical Extension Cords, Sets	O-2, 11; R-35
Fixture, Service Wire	O-2, 4, 9, 11, 19, 20
Guy Wire	O-2, 7
Headphone Cords	O-12, 22; R-12
Hookup Wire	O-1, 2, 4, 9, 20, 23
Lead-in and Ground Wire	O-1, 2, 5, 9, 18 to 21
Magnet Wire	O-2, 11, 20, 23
Microphone Cable	O-3, 10, 19, 22
Multiple-Conductor Cable	O-3, 10, 19, 22, 23
Phosphor Bronze Aerial Wire	O-6, 8
Resistance Cords	O-2, 12
Shielding, Copper, Braid	O-1, 13, 19, 23
Speaker Cable	O-3, 10, 19, 22
Speaker Cords	O-12; R-12
Telephone Wire, Inside	O-4
Test Prod Wire	O-1, 9, 12, 19, 20, 23
Transmission Line Cable	O-3, 4, 6, 8, 10, 21
Tubing, Flexible Varnished (Spaghetti)	H-85; O-2, 11; R-35, 48
Wire Spring Clips	O-11
	R-13, 19, 37
Wire Stripping Tools	R-34, 38
<b>WIRT COMPANY</b>	L-49 to 52
World Time Indicator Gadget	G-2
<b>WORNER ELECTRONIC DEVICES</b>	B-1 to 4
Wrenches	
Hexagon Key	R-38, 45
Neutralizing, Alignment	R-3, 12, 21, 37, 38
Socket	R-2, 21, 63
Volume Control	R-2
