BUD ALUMINUM CHASSIS

The construction and design of these chassis is exactly the same as our steel chassis. The aluminum chassis are welded on government approved spot welders that are the same as used in the welding of aluminum airplane parts. The gauges specified in table below are aluminum gauges. As a result, you can depend on BUD Aluminum Chassis to do a perfect job for you. Etched Aluminum finish.

BUD SLOPING PANEL UTILITY BOXES

A metal box that can be used for numerous purposes. Finished in Black Wrinkle Enamel only.

Cat. No.	Height	Width	Depth	Dealer Cost
C-1578	4 1/2"	4"	4"	\$0.90
C-1579	4 1/2"	5"	4"	1.05
C-1580	4 1/2"	6"	4"	1.20
C-1581	4 1/2"	7"	4"	1.45

BUD BOX SHIELDS

This shield has many uses: Shielding power transformers and chokes, and for covering and protecting various other components in power supplies, transmitters, receivers and other electronic units.

Top and sides are one-piece steel. No. BS-1244 has perforated steel ends for ventilation. BS-1891 has solid ends. Flanges at bottom provide for mounting. Finished in Black Wrinkle Enamel only.

Cat. No.	Ends	Length	Depth	Height	Dealer Cost
BS-1244	Ventilated	7 1/2"	4 1/2"	5"	\$1.45
BS-1891	Solid	7 1/2"	4 1/2"	5"	1.35

TRUCK CASTERS

No. RC-7756—Heavy Duty type casters, recommended for our DeLuxe Relay Eacks and where weights of 400 lbs. or less are to be distributed on 4 casters. No. RC-7757 Casters are Light Duty and are recommended for lighter weights. Wheels are high grade, hard rubber composition and ball bearing.

Catalog No.	Height	Type	Dealer Cost
RC-7756	2 3/8"	Heavy Duty	\$.90
RC-7757	2"	Light Duty	.40

RELAY RACK SCREWS AND WASHERS

No. RS-7140 Machine Screws, 1/2" long, 13 threaded 10-32, Oval Head, finished in Nickel Plate.

No. RW-7161 Cup Washers, made to fit 10-32 Screws. Nickel plated finish.

These are available in packages of 100, 250, 500 and 1000.

Catalog No.	Description	Dealer Cost
RS-7140	Screw	\$.90 per 100
RW-7161	Washer	1.00 per 100

Where materials are specified Black Wrinkle Finish, and Grey is desired, a charge of 15% additional will be made.

BUD VARIABLE FREQUENCY OSCILLATOR

This efficient variable frequency oscillator enables you to set your transmitter at any desired amateur frequency and you can depend on it remaining "right on" until you intentionally make a change.

We list below the features that make this instrument desirable to every ham.

1. It is compact, entirely self-contained. The power supply is included in the complete unit and yet it measures only 12 1/2" by 8 1/2" by 8".
2. The stability is comparable to crystal.
3. Plug-in coils are used for highest efficiency and eliminate the fear of having an out-dated unit in the event that the bands should be changed.
4. It is a dual purpose unit, having Variable Frequency Oscillator operation and the provision for switching to crystal operation.
5. It is, in itself, a low-powered CW transmitter.
6. This unit has more than enough output to drive any of the low power or medium power beam tubes.

BUD V.F.O.-21, Complete with a set of 40 meter coils and operation instructions.....Dealer Cost **\$52.50**

Extra Coils for Other Bands are listed below.

- CK-22 — Set of three 10-meter coils Dealer Cost **\$4.00**
- CK-23 — Set of three 20-meter coils Dealer Cost **\$4.00**
- CK-24 — Set of three 40-meter coils Dealer Cost **\$4.00**
- CK-25 — Set of three 80-meter coils Dealer Cost **\$4.00**

BUD GIMIX

The Bud Gimix is a multipurpose unit requiring no batteries or power supply. It is calibrated for use on the 10, 15, 20, 40 and 80 meter amateur bands. No additional coils are needed as the one coil does the work on all bands. It can be used as a Wave-Meter, a Monitor, a Field Strength Indicator, a Carrier Shift Indicator and a sensitive Neutralizing Instrument. Operating instructions supplied with each unit.

BUD GX 79.....Dealer Cost **\$8.30**

BUD WAVE METER

This absorption type wave-meter is calibrated for the amateur bands from 5 to 160 meters. With this device the frequency to which each stage of a transmitter is tuned can be easily and quickly determined, thus eliminating the possibility of picking the wrong harmonic in a frequency multiplier or amplifier stage.

Since the Bud Wave-Meter will detect a weak R. F. field when coupled to a tank inductance, it is very useful as a neutralizing indicator. It can also be used to indicate standing waves on antenna feed lines.

Band switching is employed, thereby eliminating the need for plug-in coils.

Bud Catalog No. WM-78.....Dealer Cost **\$8.25**

BUD WIRELESS PHONOGRAPH OSCILLATOR

This compact unit is designed to enable any standard record player to be easily and simply converted to wireless operation. Record reproduction is then possible through a regular radio receiver without the necessity of cumbersome inter-connecting wires. It is very easily installed, according to the complete instructions furnished with each unit.

The circuit incorporated in this Wireless Oscillator makes use of only one tube, but is of such design that faithful reproduction is assured. Unit comes

completely wired and tested, including tube, and is finished in Black Wrinkle Enamel. Operates from 115 volts, A. C. or D. C. Frequency range, approx. 1100 - 2150 K. C.

Catalog Number WO-6.....Dealer's Cost **\$7.85**

BUD FREQUENCY CALIBRATOR

To comply with federal regulations, some means of accurately checking transmitter frequency must be available at every "ham" station. The BUD FCC-90 consists of a 100 kc. crystal oscillator that is *Completely Self-Powered*. It will give 100 kc. check points on all bands up to 30 megacycles. This enables the operator to determine exact band edges.

No extra wiring is required to install this unit. Plug the FCC-90 into a 110 volt receptacle, connect the pick-up lead to the antenna binding post of the receiver and the unit is ready for operation. An ON-OFF switch and a STANDBY switch are provided.

Catalog Number FCC-90.....Dealer Cost **\$14.25**

BUD CODE PRACTICE OSCILLATOR AND MONITOR

The BUD CODEMASTER is a real money-saver. No longer do you have to consider your code practice oscillator useless after you have learned the code. A flip of the switch and you have a good CW monitor. This is a really versatile instrument.

It has a 4" built-in permanent magnetic dynamic speaker and will operate up to twenty ear-phones.

A volume control and pitch control permit adjustments to suit individual requirements. Any number of keys can be connected in parallel to the oscillator for group practice.

This unit will operate on 110 volts A.C. or D.C. An external speaker may be plugged in without the use of an output transformer. All controls are placed on the front of the unit and all jacks are in the rear. The unit is 6 1/2" high, 5 1/2" wide and 3 1/2" deep. It is finished in black enamel with white lettering.

Catalog Number CPO-128

Dealer Cost **\$12.50**

BUD CODE PRACTICE OSCILLATOR AND MONITOR EARPHONE MODEL

This unit is similar to the CPO-128. The difference is that the 4" speaker is not included. The monitor feature, however, is included. A phone jack is provided for the output and as many as 20 pairs of phones and keys can be operated at one time for class-room operation. This model will also operate a permanent magnetic dynamic speaker.

Plug the voice coil leads into the phone jack — no output transformer is needed. Size of case is 5 1/2" wide, 4 1/2" high and 3 1/2" deep.

Catalog Number CPO-130.

Dealer Cost **\$10.15**

KEY AND PHONES OUTLET BOX

Here is a convenient means of terminating Key and Earphone connections in group or class-room practice. These outlet boxes can be placed at each operator's position and wired to the master oscillator. Keys and Earphones terminated in phone plugs can then be plugged into the outlet box. The entire box is made of bakelite, and is essential for a neat, fool-proof class-room installation.

Catalog No. CPO-127.....Dealer Cost **\$1.29**

RUBBER FEET

Use these rubber feet on metal cabinets, microphone stands, etc., to absorb shock and protect polished surfaces. No. F-7264A is 1" dia. x 3/8" thick and is made from high grade black rubber. It is supplied with complete mounting hardware. No. F-8038 is a sponge-rubber protection pad, 1/8" thick x 3/4" dia. To fasten it to any surface moisten the glue coating with gasoline or benzine, and press in place.

Catalog No.	Standard Package	Dealer Cost
F-7264A	100	\$5.25 per 100
F-8038	100	1.75 per 100

BUD BUTTERFLY TRANSMITTER CONDENSERS

These Butterfly condensers are unequalled for mechanical and electrical balance in push-pull amplifier circuits. Where space behind the panel will not permit the use of our Giant or Master condensers, these dual condensers are ideal.

Rotor and Stator plates are made from .062" thick, highly polished aluminum with all edges rounded and surfaces highly polished to minimize corona loss and danger of peak voltage flash-over. Steatite bars are used as insulators.

These condensers are so designed that a pair of single plate neutralizing condensers can be fastened to the end plate. Brackets for mounting coil jack bars are furnished with the condensers. All condensers that have an air gap of .35" are furnished with brackets for kilowatt coils and the condensers that have .3" air gap are furnished with brackets for the mounting of 500 watt coils. The height of the condensers is 6 1/4" and the width is 7".

BUD GIANT TRANSMITTER CONDENSERS—SINGLE SECTION

Modern design, plus precision production methods, makes BUD GIANT TRANSMITTER CONDENSERS the first choice of critical engineers for use in such applications as broadcast transmitters, high-power trans-oceanic communications equipment, and many other types of highly specialized electronic devices.

BUD GIANT TRANSMITTER CONDENSERS are built with a sturdy frame consisting of 3/16" thick aluminum end plates, connected by 5/8" diameter duraluminum rods. Formed brackets at top and bottom of end plates provide for mounting these units, and permit placing of associated inductances directly on the condenser.

Rotor and stator plates are accurately stamped from 0.064" thick highly polished aluminum with all edges rounded to minimize corona loss and danger of peak-voltage flash-over. The plates are separated by accurately machined duraluminum spacers that insure a constant air-gap throughout the entire length of the condenser.

The large two-finger rotor-contact spring, made from plated spring brass, assures positive contact with noise-free operation. Steatite bars insulate the stator, and are placed well outside the electrostatic field to keep dielectric losses at a minimum.

BUD GIANT TRANSMITTER CONDENSERS—DUAL SECTION

These GIANT DUAL-SECTION TRANSMITTER CONDENSERS compare in quality with the GIANT SINGLE-SECTION TUNING CONDENSERS described above, and have the same general constructional features. Insulated tie-roads in these split-stator units eliminate closed loops in the frame.

The rotor-contact consists of four fingers made from heavy-plated spring brass, placed in the center of the rotor assembly under heavy spring tension. This construction reduces series resistance and improves the efficiency of the unit at the higher frequencies.

When these dual condensers are used in split-stator circuits, the capacity is reduced to one-half the listed value and the voltage ratings are doubled.

Panel space for mounting Giant Condenser 6 3/4" wide by 8 1/4" high.

BUD MASTER TRANSMITTING CONDENSERS—SINGLE SECTION

Each condenser is built in a rigid and sturdy frame consisting of two highly polished 1/8" thick aluminum end plates connected by four 5/16" diameter tie-rods. The end-plates have formed angles on top and bottom to facilitate mounting and to enable the associated inductance to be attached directly to the condenser itself.

The rotors and stators are assembled with plates made from 0.051" thick aluminum on which the edges have been rounded and highly polished. These plates are separated by accurately machined spacers. Large surface cone bearings assure proper alignment and smooth running of rotor with correct tension. Laminated, phosphor bronze wiper springs are placed at each end of the condenser bracket to assure positive rotor contact and noise-free operation. The stator assembly is insulated from the unit by large Steatite bars which are placed outside the electrostatic field. Rotor shaft is 1/4" diameter.

BUD MASTER TRANSMITTING CONDENSERS—DUAL SECTION

While the general style and construction is identical with the single Master units, all tie-rods in this series are insulated by glazed Steatite pillars, thus completely eliminating all closed metallic loops in the condenser frame. A special outstanding feature, developed by BUD engineers, is that of placing the positive double wiping rotor contact between the two sections at the center of the rotor. These features contribute to perfect circuit balance and eliminate the majority of difficulties encountered in ultra-high frequency equipment due to parasitics, circulating currents and poor neutralization. Use BUD condensers throughout and be trouble free.

OHM'S LAW

$$E = IR \quad R = \frac{E}{I} \quad I = \frac{E}{R} \quad P = I^2R \quad P = EI \quad P = \frac{E^2}{R}$$

where:
 R = resistance in Ohms
 I = current in Amperes
 E = electro-motive force in Volts

where:

P = power in Watts
 I = current in Amperes
 R = resistance in Ohms
 E = electro-motive force in Volts

BUD JUNIOR SINGLE SECTION CONDENSERS

Construction of these condensers features BUD electro-soldered plate assemblies, assuring correct plate spacing, overall rigidity, and light weight. Losses are reduced to a minimum by this method of assembly. End-plates are rigidly constructed. Frame has formed angles on top and bottom for mounting the condenser in any position, allowing associated tuning inductance to be mounted in the condenser frame. The edges of the brass rotor and stator plates are rounded and the assemblies are finished in cadmium plating. Steatite insulation is used throughout. Large surface front sleeve bearing, and ball and cup rear bearings, provide consistently smooth operation. A two-finger spring brass pressure contact wiper assures noise-free and positive rotor contact at all times.

The low minimum capacities of these units make them especially suitable for multi-band applications where a high maximum-to-minimum capacity is desirable.

BUD MIDGET CONDENSERS TRIPLE SECTION

These mid-line plate type, three-gang condensers fill the need for a tuning unit suitable for short wave super-heterodyne receivers having an R.F. stage for gang-tuned exciters, and numerous other applications.

These condensers are mounted on a glazed ceramic base, assuring perfect rigidity. General construction is the same as other types of midget condensers. A shield plate is provided between each stator section. Base or panel mounting may be used.

Panel Space for mounting Junior Condensers, 2 3/4" wide by 2 1/4" high.

BUD MIDGET CONDENSERS

Small size, sturdy construction and high mechanical and electrical efficiency are the outstanding features. Insulation used is Steatite. Rotor and Stator plates are brass and are electro-soldered to their respective rods. All metal parts are cadmium plated.

These condensers have both front and rear bearings and are furnished in either mid-line type plates (straight line wave length), or semi-circular plates (straight line capacity).

BUD "CE" MIDGET CONDENSERS SINGLE SECTION DOUBLE BEARING

These Midget Condensers were designed to meet the rigid requirements in design of efficient ultra-high frequency electronic devices and precision laboratory equipment. Brass rotor and stator plate stacks are assembled into permanent units by means of electro-soldering, which assures long life and accurate plate spacing. End-plates of Steatite insulate the mounting bushings and angles from the rotor and stator assemblies. A large front sleeve bearing and rear ball thrust bearing provide for smooth rotation. Special wiper contact provides noise-free tuning. All metal parts are cadmium plated.

Rotator plates are semi-circular shaped. Provision for either panel or base mounting.

BUD "CE" MIDGET CONDENSERS SINGLE BEARING

Locking nuts on the rotors of these single-bearing condensers assure trouble-free, portable and mobile operation. A screw-driver slot in rotor provides means of adjustment. Either insulated panel mounting or bracket mounting can be used. General construction is same as "CE" double-bearing condensers.

Catalog Number	Max. Cap. MMFD.	Min. Cap. MMFD.	Air Gap	No. of Plates	Over-all Length	Dealer Cost

BUD "CE" TYPE DUAL MIDGET CONDENSERS

These well constructed dual condensers are similar in design to the double-bearing "CE" types. They feature a rotor wiping contact placed at center of the rotor assembly to assure maximum efficiency at ultra-high frequency. Opposed rotor construction assures perfect counterbalance and provides even torque at any position of rotation. Steatite insulation eliminates closed induction loop in frame.

BUD TINY MITE PADDERS

For applications requiring a constant padder capacity under all temperature and humidity conditions, these units are ideal. They lend themselves readily to I. F. transformer applications, fixed tuned circuits for excitors, ganged condenser air trimmers, and plug-in-coil padding as they fit inside of standard 1 1/2" diameter coil forms.

Bud Numbers CF-125, CF-126 and CF-310. Rotor and stator assemblies are made up of brass plates (0.015" thick) and rods electrically soldered into a solid unit and then are bright cadmium plated. Insulation is Steatite. Each unit may be adjusted in capacity by either a screw-driver or a 1/4" hex. wrench.

BUD TINY MITE TUNING CONDENSER SINGLE SECTION

This series of condensers has been designed for applications where space or weight are limiting factors and for tuning of ultra-high frequency circuits. Rigid construction, close fitting bearing, positive rotor contact and Steatite insulation are the outstanding features. Cadmium plated, soldered, brass plates and rods insure high frequency efficiency.

* Denotes double bearing.

BUD TINY MITE DUAL CONDENSERS

The construction of these units is similar to the regular Tiny Mite Tuning Condensers. The two end pieces are held together firmly with two tie-rods.

A separate round plate is soldered on rotor rod to shield the two stator sections. Large surface front-sleeve bearing, and ball and cup rear bearing, provide smooth rotation.

NEW BUD THREE-GANG TINY MITE CONDENSERS

Hams, Radio Constructors and Experimenters can find many uses for these compact, three-gang condensers. Designed particularly for high frequency use, they are adaptable for use in converters, preselectors and receivers covering the Amateur, Television and F.M. bands. Well constructed with soldered brass plates and ceramic brackets. Rotor shaft extended 1/4" at rear. Height 1 1/8". Width 1 1/8". Length behind panel 3 3/8". Mounting holes 2 3/16" apart.

BUD NEUTRALIZING AND HIGH FREQUENCY TUNING CONDENSERS

This line of condensers will fill every neutralizing and high frequency tuning requirement that modern circuits pose. The two-pillar construction makes this unit unusually sturdy and eliminates any possibility of capacity variation due to vibration. The movable plate is adjusted by means of the threaded shaft to which it is attached, and it is permanently locked in any position by the lock-nut provided. Any loose thread is taken up by a special nut and locked to give smooth operation. All metal parts are of aluminum. Plates have rounded edges. Steatite insulation is used.

give smooth operation. All metal parts are of aluminum. Plates have rounded edges. Steatite insulation is used.

BUD FEED-THROUGH AND BASE MOUNTED NEUTRALIZING CONDENSERS

In circuits utilizing tubes with the grid lead terminated in the base, feed-through type of neutralizing condenser is particularly suited. One hole is required for mounting of feed-through condensers. Neutralizing condenser illustrated is feed-through type. Plates are made of aluminum, rounded at edges to cut down losses. After proper tuning is attained, movable plate can be locked with the knurled nut.

No. 890 and No. 852 are ideal neutralizers for popular low power beam tubes. No. 890 condenser is base mounted only.

BUD STAT-AIR CONDENSERS

It is difficult to design a radio-frequency amplifier to cover any large frequency range and maintain a proper L/C ratio due to variable condenser limitations. By paralleling the proper Stat-Air condenser in this series with the tuning condenser, this difficulty is easily overcome.

The finish of these electro-soldered brass plate assemblies is cadmium plating, and Steatite insulation is used. They are furnished in either Junior or Senior types.

COMPACT NEUTRALIZING CONDENSERS

In applications where space is the prime factor, these units are ideal for neutralizing and high frequency tuning. Low loss Steatite is used for dielectric. These condensers feature either one hole mounting or fastening to solder lugs provided. All brass parts are nickel plated. A knurled lock-nut permits locking of movable plate.

PIE WOUND R. F. CHOKES

Each choke has a continuous winding of silk covered enameled copper wire and the pies constituting this winding are wound on a 1/4" diameter ceramic core. Chokes are made with both strap and wire leads. The CH-876 is a heavy duty choke intended for circuits, such as transmitter plate circuits, where high currents are present. All chokes in this series have an overall length of 1 1/2".

LATTICE WOUND R. F. CHOKES

For all general purpose applications requiring a high quality choke at a reasonable price, this line finds wide acceptance. Each choke is wound from silk-covered enameled copper wire on a white ceramic bobbin. Leads are terminated with two convenient soldering lugs. Chokes can be mounted with a 6-32 screw through the center of the form, and each winding is thoroughly impregnated against moisture. The wide range of sizes fills practically every choke requirement in standard radio circuits. Choke base diameter 1 1/8", distance between ends of leads 1 1/2".

TRANSMITTING CHOKES

Here are two heavy duty R. F. Chokes that can really take it in high powered transmitter plate circuits. Each choke is wound on 9/16" dia. Steatite rod, has connection lugs and a mounting foot.

All chokes have a heavy ceramic coating which prevents moisture absorption and enables them to withstand momentary overloads without collapsing the individual pies.

Consists of five graduated pies wound in continuous winding. Care has been taken to prevent any of the pies from being resonant on an amateur band and to keep the distributed capacity at a minimum. Overall height 3 1/4".

Catalog Number	Inductance	Current Capacity	D. C. Resistance	Dealer Cost
CH-568	2.2 mh.	1 amp.	5 ohms	\$1.65
CH-569	4.3 mh.	.6 amp.	12 ohms	1.50

ULTRA HIGH FREQUENCY R. F. CHOKES

These chokes were designed to meet the requirements of builders of ultra-high frequency receivers and transmitters. Consists of ceramic rod with a single layer winding terminated with strap leads at each end. Particularly suitable for use on 2 or 6 meters. CH-570 is supplied with a mounting foot and is sometimes used as a filament choke in certain types of high frequency oscillator and amplifier circuits.

Catalog Number	Inductance mh.	Max. Current	D. C. Resistance	Lengths	Dealer Cost
CH-925	5.7 uh.	750 ma	1.4 ohms	1 1/2"	\$.28
CH-570	1.5 uh.	1.7 a	0.2 ohms	2 3/4"	.95

IRON CORE R. F. CHOKES

The efficiency of any circuit requiring an R. F. choke will be definitely improved by utilizing one of these chokes with a finely divided molded metallic core. The improved "Q" possible with this construction results from the D. C. resistance of these chokes being from 40 to 50% less for a given inductance than for regular air-core types. Thus, the D. C. voltage drop through the choke is considerably less, yet the choking action is equally as good. Windings are made with silk-covered enameled wire terminated on convenient soldering lugs, and the chokes are mounted in small square shield cans measuring 1 3/8" x 1 3/8" x 1 1/16".

SINGLE CONTACT CABLE CONNECTORS

Positive unbreakable contacts for single-conductor microphone cable are provided by these shielded connectors. Body is made of brass, bright nickel-plated. Accidental disconnections are rendered impossible by coupling ring which, when tightened, insures perfect contact between soldered connections. Cord protectors of steel spring wire will take cables up to 1/4" diameter.

Catalog Number	Description	Length	Bushing Diameter	Dealer Cost
CN-244	Single Contact, Female	2"	23/32"	\$.33
CN-245	Single Contact, Male	1 3/4"	5/8"	.27

CHASSIS UNIT CONNECTOR

Male connector CN-246 is designed for chassis mounting in connection with CB-244. Where ground to chassis desired, mount in 3/8" hole; to insulate from chassis, mount in 15/32" hole; insulating washers are furnished.

Catalog Number	Description	Dealer Cost
CN-246	Chassis Connector Unit	\$.20

PHONO PLUG AND JACK

This is a pin plug and jack combination that will fit into a multitude of applications: Receivers, auto radio, recording and reproducing equipment, experimental units, etc.

Catalog Number	Description	Dealer Cost
PL-247	Plug	\$.06
JP-248	Jack	.09

PANEL BEARING ASSEMBLIES

Nos. PB-530 and PB-531 consist of a regular 1/4" shaft bearing with 6" and 3" length of 1/4" brass rod inserted and held in place by washers to prevent shaft from shifting. These two assemblies will facilitate the panel control of condensers, potentiometers, etc., which must be mounted a distance from the panel. Bearing fits in 13/32" hole and panel. Bearing fits in 13/32" hole and panel. Bearing fits in 13/32" hole and panel.

on panels up to 5/16" thick. No. PB-532 is bearing only without shaft.

Catalog Number	Overall Length	Distance in front of panels	Dealer Cost
PB-530	6"	4 3/4"	\$.30
PB-531	3"	1 3/4"	.25
PB-532	Bearing Only12

SOLDERING IRON TIPS

This tip is made of a special copper base rod. It is 3/8" diameter x 4" long and is made particularly as a replacement for American Beauty Irons. However, it will fit many other types of irons that are designed to accommodate 3/8" diameter tips.

Catalog Number	Fits American Beauty No.	Dealer Cost
IT-372	3138	\$.42

BUD PRONE PLUGS

All metal parts on these excellent phone plugs are machined from brass, and are nickel plated. Unshielded plugs have handles of black bakelite; shielded types have attractive brass knurled handles, bright nickel plated.

No. FP-1946 is supplied *Without a Handle*, and is used as an adapter between a female microphone cable connector and a regular plug jack.

Catalog Number	Contacts	Handle	Overall Length	Bushing Diam.	Dealer Cost
FP-230	2	Bakelite	2 3/4"	3/4"	\$.30
FP-282	2	Shielded	2 3/8"	3/4"	.54
FP-1057	3	Bakelite	2 3/4"	3/4"	.66
FP-284	3	Shielded	2 3/8"	3/4"	.85
FP-1946	2	None	1 1/4"	1 1/16"	.24

BUD MIDGET JACK

The construction of this jack allows its use in applications having limited space behind the panel. The spring brass contact assures a good connection. These jacks come with insulating washers and accommodate standard phone plugs.

Catalog No.	Type	Distance Behind Panel	Dealer Cost
J-232 A	Open Circuit	13/16"	\$.24
J-233 A	Closed Circuit	13/16"	.30

BUD SMALL JACKS

These panel mounting jacks are desirable for control panels and similar applications where space is at a premium. Parts are accurately machined, with nickel plated finish and contacts are formed from spring brass. Each jack comes complete with insulated washers and will accommodate standard plugs. Overall length 1 1/8".

Catalog No.	Contacts	Distance Behind Panel	Dealer Cost
J-1038	2	15/16"	\$.27
J-1058	3	15/16"	.42

BUD ALL PURPOSE JACKS

Although small in size, this is one of the finest lines of jacks available. The careful design and high quality materials used in these components assure long, dependable service. Circuit opening contacts are made of pure silver and the laminated bakelite insulation prevents breakdown between springs at all ordinary voltages. Supplied with panel insulating washers. Height 1 1/4", distance behind panel 7/8".

Catalog Number	Circuit Design	Contact Arrangement	Dealer Cost
J-1324		Open Circuit	\$.30
J-1325		Closed circuit	.36
J-1326		3-Contact open circuit	.39
J-1327		Break contact on tip and ring spring	.42
J-1328		Separate make contact springs	.42
J-1329		Break contact on tip spring — separate make-contact spring	.48
J-1330		Break-make contact on tip spring	.45

BAKELITE OUTLET BOX AND COVER

This bakelite outlet box is an ideal unit for housing numerous radio and electrical specialties in compact form. The box is 2 1/4" wide x 4 3/8" long x 1 1/2" high. A solid bakelite cover is available for this item.

Catalog No.	Item	Dealer Cost
RO-400	Box	\$.54
RO-401	Cover	.15

ALLIGATOR CLIPS

Accurately made; supplied with or without insulated ends. No. CL-485 Clip only. No. CL-486-R Alligator Clip with Red insulated end. No. CL-486-B Alligator Clip with Black insulated end.

Catalog No.	Type	Dealer Cost
CL-485	Regular	\$.06
CL-486	Insulated	.12

BUD 75-WATT TRANSMITTER COILS

These coils are distinguished by their rigid construction, attractive appearance and conservative power rating. The ceramic mounting base keeps the coil a safe distance from the chassis—it also permits easy coil removal without disturbing the winding. All coils are air-wound and mount in 5 prong tube sockets.

OEP and OCP Coils are designed for use in circuits using Pentode tubes with high output capacity such as 6L6, 807, etc.

OEL coils have fixed link and are not tapped.
 OCL have fixed center link with main winding center tapped.
 OLS have adjustable center link, main winding center tapped.
 OES have adjustable end link and are not tapped.
 OEP have adjustable end link and are not tapped.
 OCP have adjustable center link main winding center tapped.

BUD ADJUSTABLE LINK TRANSMITTER COILS

Listed are two types of Coils. CL type of coil has an adjustable CENTER link. ES type of coil has an adjustable END link. The CL and ES can be used where fixed links are specified. No additional cost is involved and more efficient coupling is assured because of this special adjustable link, an exclusive BUD feature.

BUD 50 WATT BAND SWITCH ASSEMBLY

ONS-1 — 50 watt, 10-15-20-40-80 meter band switch assembly, ideal for all low-power oscillators, buffer or amplifier stages where the input power does not exceed 50 watts and where capacity coupling is used. A 5-position dial plate with suitable marking is furnished.

Catalog Number	Width	Height	Depth	Dealer Cost
ONS-1	5 1/2"	2 1/2"	3"	\$4.75

BUD VARIABLE LINK TRANSMITTER COILS

The most effective method of varying the loading of an R. F. Stage is by the use of a variable link to the plate tank, a feature incorporated in all Bud Variable Link Coils. The link winding is connected to the jack bar into which the coils are plugged, and this link may be used with any of the coils regardless of the band being worked. The link winding is so arranged that it may be readily controlled from the panel by means of an extension shaft if required.

BUD 100 WATT BAND SWITCH ASSEMBLY

Made in two types, XCS-1 and XES-2. Each unit covers the 10-15-20-40 and 80 meter bands. XCS-1 is designed for use in push-pull plate or grid circuits or where plate neutralization is used. The coils in this assembly are center-tapped and center-linked. A dual section 200 mmfd. condenser is required to tune all bands. The JC-1569 condenser is especially recommended for circuit applications in order to obtain the highest possible efficiency on the high frequency bands.

XES-2 is designed for use in single-ended plate or grid circuits. The coils in this assembly are end-linked. A 100 mmfd. condenser such as Bud JC-1534 is required to tune all bands.

Catalog Number	Width	Height	Depth	Ship. Weight	Dealer Cost
XCS-1	8"	4 1/2"	5"	3 lbs.	\$10.00
XES-2	8"	4 1/2"	5"	3 lbs.	9.00

* Denotes tube plus circuit plus tank plus output coupling capacity required to resonate coil at low frequency end of band.

PLUG-IN COIL FORMS

Three sizes are available in these Plug-in Coil Forms to suit all requirements. The material used is a special bakelite having a very low loss factor. Eight ribs are molded on the walls of each form to hold the winding away from the form itself and give the coil higher efficiency. Each form has a molded flange at the top to aid in removing the coil from its socket, and the pins fit standard tube sockets.

AS EASY AS A-B-C
cup shape opening holds wire firmly. no solder necessary—change as often as you need.

NEW SENSATIONAL!
BUD "VISE-GRIP" TEST PRODS
(Pat. applied for)

No longer is it necessary to use a soldering iron or screw-driver to replace a broken or worn lead on a test prod or plug. To install a wire in this unique, patented prod, merely insert end of wire in hole, screw down handle to finger tightness and a positive contact is assured. By far the fastest, most efficient way of doing this job.

BUD VISE-GRIP TEST PRODS WITH 1" PLASTIC HANDLE

-  Prod is made of brass rod, and is nickel plated. 1" plastic handle is threaded at one end and prod screws into same. **Cat. No. 93**
-  Needle Chuck — Black or Red. **Cat. No. 94**
-  Phone Tip — Black or Red. **Cat. No. 477**
-  Banana Plug — Black or Red. **Cat. No. TP-93**.....Dealer Cost \$.15
-  Banana Plug — Black or Red. **Cat. No. TP-94**.....Dealer Cost \$.15
-  Banana Plug — Black or Red. **Cat. No. TP-477A**.....Dealer Cost \$.15

BUD VISE-GRIP TEST PRODS WITH 4" PLASTIC HANDLE

-  Prods are identical to those described on the left. Plastic handle is 4" long and made of the best material obtainable. **Cat. No. 95**
-  Needle Chuck — Black or Red. **Cat. No. 96**
-  Phone Tip — Black or Red. **Cat. No. TP-95**.....Dealer Cost \$.27
-  Banana Plug — Black or Red. **Cat. No. TP-96**.....Dealer Cost \$.25
-  Banana Plug — Black or Red. **Cat. No. TP-97**.....Dealer Cost \$.25

BUD SUPER TEST LEADS

All BUD Super Test Leads use BUD "Vise-Grip" Prods that screw into the highly polished 4" or 1" plastic handles on each end of the leads. The finest, flexible, kinkless, rubber covered wire obtainable is used on all BUD Test Leads.

- No. TL-178 is supplied with 4" handles at one end of the wires with removable needle points and on other end 1" handle with phone tips. **Cat. No. TL-178**.....Dealer Cost \$1.10
- No. TL-179—4" handles, one with removable needle point and the other with phone tip and removable alligator clip. 1" handles with phone tips. **Cat. No. TL-179**.....Dealer Cost \$1.25
- No. TL-180 have 4" plastic handles with phone tips on one end. Other end, 1" handles with phone tips as illustrated above. **Cat. No. TL-180**.....Dealer Cost \$1.00

BUD INSULATED FLEXIBLE COUPLINGS

Tandem operation of two or more units is readily accomplished through the use of these couplers. Direct shaft alignment is not essential, and all couplers are made to fit 1/4" shafts.

Catalog No.	Diameter	Height	Insulation	Dealer Cost
FC-795	1 1/16"	1 1/16"	Ceramic	\$.39
FC-845	1 1/8"	5/8"	Bakelite	.30
FC-855	1 1/2"	1 1/16"	Bakelite	.35

BUD HIGH VOLTAGE FLEXIBLE COUPLINGS

A new type spring construction in these couplings permits a wide gap between shaft connections, freedom from back-lash, and unusual flexibility. The springs are attached to glazed Steatite discs 1 1/2" in diameter and 3/16" thick, and the overall diameter of the finished coupling is 1 3/16". Coupling accommodates standard 1/4" shaft. Springs also attached to Bakelite discs 1 1/2" in diameter.

Catalog No.	Insulation	Dealer Cost
FC-614	Steatite	\$.54
FC-619	Bakelite	.39

BANANA PLUGS AND JACKS
(Brass Nickel Plated)

- Banana plug jack, threaded 1/4 - 28, supplied with nut and solder lug.** **Cat. No. PJ-949** Dealer Cost \$.09
- Banana plug Overall Length 1 1/4" Shank threaded 6-32, supplied with 6-32 nut.** **Cat. No. PL-470** Dealer Cost \$.09

-  **PL-470**
-  **PJ-478**
-  **PL-469**
- Insulated banana plug jack, complete with insulated washers, solder lug and nut.** **Cat. No. PJ-478** Dealer Cost \$.12
- Banana plug, Shank tapped for 6-32 screws. Nickel plated.** **Cat. No. PL-469** Dealer Cost \$.09

GIANT BANANA PLUGS AND JACKS FOR HEAVY DUTY APPLICATIONS

- Giant banana jack, complete with nut and solder lug. For mounting, drill 3/8" hole.** **Cat. No. PJ-963** Dealer Cost \$.15
- Giant plug, tapped 10-32. Positive spring action assures firm contact.** **Cat. No. PL-962** Dealer Cost \$.18
-  **PJ-963**
-  **PL-962**
-  **PJ-476A**
-  **PL-475A**
- Giant insulated banana plug jack, complete with insulated washers, solder lug and nut. To mount, drill 1/2" hole.** **Cat. No. PJ-476A** Dealer Cost \$.24
- High voltage insulated banana plug. Over all length 2 3/4". Excellent for heavy duty applications.** **Cat. No. PL-475A** Dealer Cost \$.30

BUD FLEXIBLE SHAFTS AND COUPLERS

When construction necessitates the mounting of condensers or potentiometers away from the panel and at unusual angles, these Flexible Shafts simplify panel control problems. Both lengths are remarkably free from back-lash and will turn at any angle up to 90°.

Nos. FS-859 and FS-860 have 1/4" bushings sweated to each end to fit either plain or insulated couplings. Nos. FS-862 and FS-863 have Steatite insulated couplings attached to each end to fit 1/4" shafts.

Catalog Number	Overall Length	Dealer Cost
FS-859	3 1/2"	\$.33
FS-860	6 1/2"	.42
FS-862	4 1/2"	1.00
FS-863	7 1/2"	1.15

BUD HEAT RADIATING CONNECTORS

These connectors have been designed to dissipate heat generated at the grid and plate terminals of transmitting tubes, thereby preventing damage to the glass seal. Nos. TC-1923, TC-488 and TC-489 are to be used for tubes with wire leads. Nos. TC-1920 and TC-1921 are for cap type tubes. Maximum diameter of lead type is indicated in "Tube Lead Size" accommodated by each type.

Catalog No.	Tube Lead Size	Length	Diameter	Dealer Cost
TC-488	.052"	13/16"	5/8"	\$.36
TC-489	.073"	13/16"	5/8"	.36
TC-1920	.375"	15/16"	15/16"	.60
TC-1921	.578"	15/16"	15/16"	.60
TC-1923	.110"	15/16"	15/16"	.60

BUD CERAMIC INSULATORS

Apparatus requiring a rugged insulated mounting can be readily accommodated by one or more numbers in this series of white glazed ceramic insulators. All metal parts are nickel plated brass and the jack type insulators are designed to fit standard banana plugs.

Catalog Number	Base Size	Type	Height	Description	Std. Pkg.	Dealer Cost

BUD LUCITE STAND-OFF INSULATORS

The Lucite pillar-type stand-off insulators listed below are made in a convenient number of sizes to fit a variety of applications. They are intended for chassis mounting in a single mounting hole. The 1/2" diameter insulators are supplied with 6-32 mounting screws. The 3/4" diameter insulators are supplied with 10-32 mounting screws.

Catalog Number	Height	Diameter	Standard Package	Dealer Cost
I-1904	1 1/4"	1/2"	25	\$.24 each
I-1890	2"	1/2"	25	.30 each

I-1908	6 1/4"	3/4"	25	.84 each

BUD LUCITE FEED-THROUGH INSULATORS

These Lucite feed-through insulators are made in two diameters, and five convenient heights. They are ideal for bringing high-frequency leads through a chassis or shield and superior to ceramic insulators for this purpose. The 1/2" diameter insulators are furnished with 6-32 hardware. The 3/4" diameter insulators are furnished with 10-32 hardware.

Catalog No.	Rod Diam.	Bottom Height	Top Height	Mouting Hole	Std. Pkg.	Dealer Cost

I-1913	3/4"	1/2"	2"	7/16"	25	.65 each

LUCITE FEEDER SPREADERS

Designed for all average feeder requirements. A 600 ohm line can be made with any size wire from No. 12 to No. 18 by using one of the spreaders listed below. The spreader used for this application depends on the wire size. Further data on this subject is available in any antenna handbook. These spreaders are furnished with locking screws to clamp the wire in place. All spreaders are 3/8" in diameter, and are drilled for No. 12 wire.

Catalog No.	Wire Spacing	Std. Package	Dealer Cost
I-1900	2"	25	\$.20 each
I-1901	4"	25	.25 each
I-1902	5"	25	.30 each
I-1903	6"	25	.33 each

CONE STAND-OFF INSULATORS

All applications requiring insulated mountings and supports are readily accommodated by these various types and sizes of ceramic insulators. Each unit is made from high grade glazed porcelain having good mechanical strength. Nos. I-300 to I-303 are tapped at each end and are supplied with necessary hardware. Nos. I-304 to I-306 are supplied with No. PJ-949 Banana Plug Jack and accommodate standard banana plugs.

CONE FEED-THROUGH INSULATORS

In bringing high voltage and R. F. leads through panels and chassis, and for numerous other uses, this line of two-piece insulators will be found indispensable. Made of the same ceramic material as the Stand-Off Insulators.

Nos. I-435 to I-438 are supplied with threaded rod and necessary hardware, while Nos. I-453 to I-455 are supplied with No. PJ-949 jack top attached to appropriate threaded rod.

FEED-THROUGH INSULATOR BUSHING

This new type Bud feed-through insulator bushing made from LUCITE, has been designed in two sizes to simplify insulation problems when high voltage wires are fed through chassis or panels.

If wires are insulated, it is not necessary to remove insulation as the center holes are large enough to pass it. If larger size hole is required, material can be easily drilled. Each bushing supplied with nut for mounting on material up to 1/8" thick. Hole sizes and other data given below.

Catalog No.	Description	Dealer Cost
I-456	Diameter 1/2" with 1/8" wire hole	\$.10
I-457	Diameter 3/4" with 3/16" wire hole	.14

TUBE CLIPS

These clips may be used for various types of tubes as shown below. Made of heavy gauge spring brass, cadmium plated.

Catalog Number	Type Tube	Std. Package	Dealer Cost
TC-490	Fits Tube Caps up to 5/8" dia.	10	\$.06 each
TC-107	Glass Tube Fits 3/8" dia. Cap.	100	1.25 per 100
TC-108	Metal Tube Fits 1/4" dia. Cap.	100	1.00 per 100

BAT-HANDLE TOGGLE SWITCHES

These toggle switches and all other switches illustrated are manufactured for Bud by H. & H. They all have silver contacts with bakelite insulation and are rated at 3 amps. at 125 volts. The shank on all Bat-handle switches is 7/16" long. No. SW-1115 is supplied with a No. SW-1036 on-off name-plate. All other switches in this series are supplied without name-plate. All switches are nickel plated.

Catalog No.	Description	Dealer Cost
SW-1115	S. P. S. T.	\$.35
SW-1118	S. P. D. T.	.45
SW-1119	D. P. S. T.	.57
SW-1120	D. P. D. T.	.69

BALL HANDLE TOGGLE SWITCHES

Construction is same as Bat-handle switches. Rating 3 amps., 125 volts. Requires 1/2" hole for mounting. Nickel plated finish. Switches No. SW-1003 and SW-1004 supplied with No. SW-1036 on-off plate.

Catalog Number	Description	Shank Length	Dealer Cost
SW-1003	S. P. S. T.	15/32"	\$.33

SW-1077	Closes 3 circuits for RCA, etc. ON-OFF Plate	1/4"	.60
SW-1036	ON-OFF Plate04

HEAVY DUTY POWER SWITCHES

Can be had in two types. Toggle switch is Catalog No. SW-1269, or push-button type, which is Catalog No. SW-1270. These switches are double pole, single throw. Each set of contacts is rated 12 amps. at 125 volts, and can be used as a single pole, single throw switch; when contacts are tied together, switch will carry higher current. SW-1270 push-button switch is for use in Relay Racks as a Safety Switch. The switch is normally off, and when door is closed, switch is turned on. Drill 1/2" hole for mounting. Size 1 3/4" long, 3/4" high, 3/4" wide.

Catalog Number	Dealer Cost
SW-1269	\$.90
SW-1270	1.50

ROTARY SWITCHES

Used primarily where a rotary action with a knob is desired. Each switch is housed in a steel case. Bakelite insulation and silver contacts are used. All switches carry underwriters' approval and are rated 6 amps. at 125 volts. Shank diameter is 3/8".

Catalog Number	Description	Threaded Shank Length	Shaft Excluding Shank	Dealer Cost

DP-1230	Rotary Switch Off-On Plate09

PUSH-BUTTON SWITCH

Two-circuit slow-make and quick-break momentary contact switch. One circuit is "ON" and the other is normally "OFF." Pushing the button reverses the position of the circuits. Shank is 5/8" long. Overall height 1 3/16", overall length 1 3/16".

Catalog Number	Dealer Cost
SW-743	\$.57

BUD INSULATED SCREW-DRIVERS

No. AT-235 is made from 1/4" bone fiber, beveled at each end to form screw-driver blades. Catalog No. AT-235. Dealer Cost \$.30.

AT-236 and 237 are combination tools, consisting of a No. 235 Screw-Driver inserted into an extra heavy fiber tube which is hex. broached the entire length. These tools can be held to any length between specified limits by set-screw provided.

Catalog No.	Length	Dealer Cost
AT-236	7" to 10"	\$.60
AT-237	11" to 17"	.72

BUD VERNIER DIAL—GEARED TYPE

This new and improved D-1729 precision-built, vernier dial of attractive appearance has been designed for industrial, laboratory and amateur radio applications. Many uses can be found for this gear-driven dial such as electron-coupled oscillators, frequency meters, receivers and any other type of instrument or laboratory equipment that requires ease of tuning and accuracy of calibration.

Freedom of backlash is obtained by the use of spring-loaded laminated steel gears with a ratio of ten to one. Each dial comes furnished with three paper dial scales on which calibration marks can be printed. These dial scales are printed with five calibration arcs for wave-band identification and each arc is divided into five equal sections over 180 degrees, which makes each section the equivalent of one rotation of the circular dial, or 100 dial divisions. This enables a calibration of 500 divisions over the entire scale. A feature of this dial is the automatic clutch and stop that prevents the pointer from being turned off scale and eliminates the possibility of damage to the gears.

The dial is furnished mounted, complete with all hardware. An attractive black crackle escutcheon outlines the dial scale, which is further protected by a "Plastacel" window. The entire dial scale assembly mounts independent of the gear unit, and may be removed when desired without disturbing the dial drive.

Mounting area of the dial 5 1/4" x 5 3/4". Depth behind panel 1 1/8".
D-1729 Dealer Cost \$3.00

BUD FRICTION-DRIVE VERNIER DIAL

These dials are made in 2 3/4" and 4" plate sizes and are driven at the rim by a friction device which gives very smooth and positive vernier action. Dials are calibrated 0 to 100 clockwise over 360 degrees. The face and calibration marks are in glossy black enamel, white rim and numerals are polished metal. All dials fit standard 1/4" shafts. Included are a single line indicator and a black wheel knob for the vernier drive.

Catalog Number	Dial Div.	Plate Diam.	Overall Height	Mtg. Hole Centers	Dealer Cost
D-1944	0-100	2 3/4"	3 5/8"	1 3/8"	\$1.45

D-1919	Vernier Dial Drive30

BUD PRECISION TUNING DIAL (Vernier Indicator)

The outstanding feature of these dials is that they can be used on condensers that rotate either clockwise or counter-clockwise. These dials are the perfect choice for general tuning dial requirements. The etched calibrations are graduated from zero to 100 clockwise and from zero to 100 counter-clockwise. The dial is equipped with a large finger grip flanged knob which fits 1/4" shaft and is supplied complete with vernier indicator which will enable readings of one-tenth of one division.

Catalog Number	Dial Diam.	Height, including Indicator	Calibration	Dealer Cost

IN-723	Vernier Indicator only, for 2 3/4" dial30
IN-725	Vernier Indicator only, for 4" dial30

BUD PRECISION TUNING DIAL (Single Line Indicator)

The construction of this dial is exactly the same as the one above except that a single line indicator is supplied with this dial instead of a vernier marker.

Catalog Number	Dial Diam.	Height, including Indicator	Calibration	Dealer Cost
D-1732	2 3/4"	3 1/16"	0-100-0	\$1.05
D-1734	4"	4 3/16"	0-100-0	1.40
IN-1736	Single Line Indicator only12

BUD DIAL LOCK

This dial lock is a dual purpose item, since it functions as both a dial lock and a position indicator. The problems of dial slippage and accidental movement of dials are absolutely eliminated by this inexpensive and precise lock. Made of brass, nickel plated. Catalog No. DL-1947..... Dealer Cost \$.18

WALL LEAD-IN

This Lead-In is used to facilitate bringing in antennas or feeders through a wall or window casing with ease and safety. Unit consists of a 12" threaded brass rod insulated with heavy plastic tubing, and two heavy ceramic insulators. Rod and insulation may be readily cut to any length.

Catalog Number	Dealer Cost
I-742	\$.75

DIAL PLATES

Markings on the black background of this line of plates are guaranteed on all types and the material is aluminum.

PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

TYPE "C" CABINET RACKS—for 19" Rack Panels

These are professional type racks that have been used on many commercial installations, and make a DeLuxe job of any amateur or broadcast transmitter. The racks are of all-steel construction, welded into an integral unit, to give a lifetime of service.

All panel mounting screws are concealed by means of a full length corner trim on each side at the front. In keeping with modern design, this front trim is rounded on the vertical corners. The rear corners are finished with regular angle trim. The front of the rack is trimmed with chrome moulding top and bottom. The door has a grille at top and bottom, and is hung on sturdy loose-joint hinges; it is held closed by two flush snap-action catches. Additional ventilation is provided

by louvres at the sides. The panel mounting angle irons are 3/16" thick, with mounting holes accurately drilled and tapped 12/24 thread on multiple 1 1/4"—1/2" spacings. The rack is made from 1/16" thick cold rolled steel, rigidly braced and reinforced throughout; the bottom is 3/4" thick steel. A rectangular opening is provided in the bottom for conduits, leads, etc. A duplex receptacle and outlet box are provided in the back under the door.

FINISHES: Either black ripple or slate grey ripple enamel. Corner trims are supplied in dull black, slate grey smooth enamel, or aluminum grey lacquer at extra cost.

RACKS WITHOUT LOUVRES: To permit racks to be set up in gangs or rows of two or more, the louvres at sides are omitted. Racks may be joined by a flat trim fastened to front of adjacent racks, overlapping both racks. Shipped with corner trim as illustrated; where specified, front joining trim will be substituted in place of corner trim at same price. Front joining Trims cannot be used on racks with front doors.

PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

TYPE "C" TRANSMITTER RACKS

STANDARD TYPE—for 19" & 30" Rack Panels

Similar to standard type "C" racks listed on page J-85 except that they have been reinforced at rear corners for use with heavier apparatus. At the rear, knockouts are provided for conduit and 4" square duct, as well as a double convenience outlet with receptacle. Knockouts are also supplied at sides for conduit, suitable for entry of cables when units are ganged. The rear door, which is removable, has ample louvres for ventilation, and is covered on the inside with mesh screening. Front trim rounded on vertical corners. Racks are regularly supplied with corner trim for use as a single unit, but will be furnished with suitable front connecting strips for ganging in rows of two or more without additional charge.

FINISH: Black ripple enamel with dull black corner trim is standard. Slate grey ripple enamel furnished without additional charge, if so specified. For aluminum grey lacquer finish, add 10% to prices.

PANELS: Type "C" panels to fit the G-2218 and G-2219 racks are listed on page J-89. For cost of 30" blank panels to fit the G-3024 rack, add 100% to prices of 19" panels on page J-89.

DELUXE TYPE—for 24" Rack Panels

This rack is undoubtedly the finest standard transmitter rack which we have ever made. It is constructed of 1/16" sheet steel, with a base of 1/8" steel, and is reinforced for use with heavy duty apparatus. The meter panel at the top is 7" high, has a glass front, and is provided with a blank bakelite sub-panel. The inner sides of the rack are reinforced with 1/8" steel channels, to which may be attached angle brackets to support the chassis. These channels may also be used as wiring ducts.

The rack will accommodate panels 24" wide; the front panel mounting angles are recessed to allow 2" clearance behind the front door for dials, knobs, etc. The front door is mounted on concealed hinges; the rear door has loose-joint hinges so that it may be removed. Both doors are equipped with handles, and the front door also has a lock. Blank panels 24" wide can be supplied at prices listed on page J-89 plus 50%.

No. G-8024

Overall dimensions: 83 $\frac{1}{8}$ " x 30 $\frac{1}{2}$ " x 27".

Available panel space: 70" x 24".

Clear inside width at front: 24"

Clear inside width at rear: 26 $\frac{1}{2}$ ".

Clear inside depth behind front panels: 23".

Shipping weight: 540 lbs.

Net Price: \$225.00.

Black ripple enamel finish is optional.

PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

TYPE "A" ENCLOSED RELAY RACKS FOR 19" RACK PANELS

All of the racks on this page are shipped "knocked-down" for easy assembly with all necessary bolts supplied. Made for standard 19" wide panels, they are substantially constructed from 1/16" cold rolled steel; panel mounting angles are of 3/8" steel, accurately drilled on universal centers for either "Amateur" or type "C" panels, tapped for 10/32

machine screws. Panels fit into a recess, so that edges are not exposed. Louvres in sides and screen sections in rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Ample panel mounting screws and washers supplied with each rack.

STANDARD TYPE

This completely enclosed rack will give your job the "professional appearance" so desirable on transmitters, test equipment, public address systems, etc. It is made in three heights in accordance with specifications below:

*BLACK RIPPLE ENAMEL

Cat. No.	Overall Size	Panel Space	Shpg.		Net Price
			Wt. lbs.	Net	
ER203	42 x 21 x 16 1/2"	36 3/4"	85	\$24.00

ER207	82 1/2 x 21 x 16 1/2"	77"	145	44.10	

*Slate grey ripple is optional

ROUNDED CORNER TYPE

The ideal streamlined rack for your next transmitter or P.A. system. The vertical corners at the front of the rack are rounded, and the top and bottom are nicely trimmed with red striped chrome finished mouldings. The uniform slate grey ripple finish gives the assembly a superb exterior appearance. Combines modern styling and an attractive price.

DELUXE TYPE

Produced in the new "streamlined" style, this rack is fully in keeping with modern design. The removable vertical corner mouldings are rounded and cover the panel mounting screws, the same as is used on our Type "C" commercial racks. The top, which has also been "streamlined," is perforated at the back to provide additional ventilation. The top and bottom are trimmed with red striped chrome finished mouldings.

PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

DELUXE TYPE "A" DESK PANEL CABINET RACKS

For Standard 19" Rack Panels
Black Ripple Finish

Streamlined styling. In keeping with our other Deluxe racks, the vertical front corners are rounded and the top and bottom are trimmed with chrome finished mouldings. Panels fit into a recess, so that the edges are not exposed. Panel mounting holes accurately drilled on universal centers, for either "Amateur" or type "C" panels; holes are tapped for 10/32 machine screws. May be used with any chassis up to 13" x 17" in size. All cabinets constructed of 1/8" thick sheet steel. Louvres provide ample ventilation through sides and back. Piano type hinges are used on the top doors, which are provided with snap catches. Panel mounting screws and washers are furnished. Black ripple enamel is standard. Slate grey is optional at same price.

TYPE "A" CHANNEL RELAY RACKS

For Standard 19" Rack Panels

Black Ripple Finish

Ideal for use on all types of transmitters and public address systems. Substantially constructed of 1/8" pressed steel. Vertical members and top cross-brace securely welded together. Base is 22" deep and extends both front and rear on the RR-195 rack; it is 19" deep on the RR-193 rack. Panel mounting holes accurately drilled on universal centers for either "Amateur" or type "C" panels, tapped for 10/32 machine screws. Ample supply of panel mounting screws and finishing washers supplied.

Cat. No.	Overall Size	Panel Space	Shpg. Wt.	Net Price
RR-195	73 1/2 x 20 x 20 3/4"	71 3/8"	85 lbs.	\$17.40
RR-193	38 1/2 x 20 x 18 3/4"	36 3/8"	57 lbs.	14.55

SLOPING FRONT CABINETS

Adaptable as instrument cases for studios, laboratories, etc. Top corner rounded and trimmed with chromemoulding. Slate grey ripple finish. A chassis may be mounted to front panel and removed as a unit. Rear of case ventilated, with opening for connections. Prices do not include chassis.

Cat. No.	H. W. D.	Size of Chassis	Net Price

SB-717	For 17" Base & larger	5 lbs.	1.86

STANDARD TYPE Amplifier Foundation Chassis

Rounded corners effectively streamline the covers on these units. Grille type ventilation gives them a modern appearance.

Chassis stamped from one piece of cold rolled steel, with corners securely spot welded. Covers finished in slate grey, chassis in black ripple enamel. Chassis are drilled for bottom plates.

Cat. No.	Size	Depth of Cover	Shpg. Wt.	Net Price
F-510	5x10x3"	6"	9 lbs.	\$2.25
F-515	6x14x3"	6"	10 lbs.	2.55

F-1317	13x17x3"	6"	15 lbs.	4.50

DELUXE TYPE Amplifier Foundation Chassis

For those who prefer a deluxe unit with Recessed Panel.

Panel slopes slightly and attaches to chassis with screws. Screen cover may be raised without disturbing the panel. Cover finished in slate grey ripple. Chassis finished in black ripple and is drilled for bottom plates.

Cat. No.	Chassis Size	Depth of Cover	Panel Size	Net Price
FC-510	5 x 10 x 3"	6"	4 x 7"	\$4.50
FC-615	6 x 14 x 3"	6"	4 x 10"	5.10

FC-1317	13 x 17 x 3"	6"	4 x 13"	7.35

SLOPING FRONT TYPE Amplifier Foundation Chassis

Latest trend in amplifier design. Combination of sloping front panel and streamlined cover enables you to build up a job similar to that used on commercial deluxe type amplifiers. All parts finished in slate grey ripple enamel trimmed with chrome moulding and handles. Front panel removable and protrudes 3" from face of screen cover. Chassis supplied complete WITH bottom plates.

Cat. No.	Chassis Size	Screen Cover	Net Price
F10120	10x12x3"	6 $\frac{1}{2}$ " high	\$5.70
F10170	10x17x3"	6 $\frac{1}{2}$ " high	6.60
F13170	13x17x3"	6 $\frac{1}{2}$ " high	7.35

ROUNDED CORNER TYPE Amplifier Foundation Chassis

Modern professional type. Rounded corners on screen cover. Chrome mouldings & handles. Cover finished in slate gray, with black ripple chassis.

Cat. No.	Chassis Size	Depth of Cover	Shpg. Wt.	Net Price

D.C. DELUXE CABINET RACKS—USE 19" RACK PANELS

Middletown D. C. Cabinets conform to the conventional design of streamlined cabinets used by builders of amateur and commercial equipment.

FEATURES

- ★ Constructed of heavy gauge 1/16" steel, electrically welded.
- ★ Adequate ventilation is provided by sufficient louvres in sides, and ventilation in back.
- ★ Front Vertical posts rounded.
- ★ Flush panel mounting (recessed).
- ★ Drilled and tapped for 10/32" screws on universal centers.
- ★ Flush door in top fitted with flush snap-lock and piano hinges.
- ★ Black Wrinkle finish. *Grey Wrinkle if desired.*

BLANK STEEL CHASSIS Heavy Duty

Middletown heavy duty Chassis are made from one piece of 1/16" sheet steel—Spot Welded at all four corners. Bottom edges are folded over on all four sides for additional rigidity and drilled to match bottom plates. Ends are drilled to fit standard Middletown brackets. Bottom plates are supplied with these Chassis.

AMPLIFIER FOUNDATIONS—DeLuxe Models

This unit is designed to meet the most critical requirements. It has rounded corners, special Middletown designed louvers on all 4 sides and elongated holes on top to give maximum ventilation. Chassis are finished in Black wrinkle. Covers are finished in Grey wrinkle. Chassis are drilled for bottom plates which are listed separately. Covers all have a depth of 6".

Cat. No.	Size	List Price
A.F.-5103	5 x 10 x 3"	\$3.70
A.F.-6143	6 x 11 x 3"	4.15

A.F.-13173	13 x 17 x 3"	7.35

SLOPING FRONT PANEL CABINETS

Sloping front panel cabinets have a wide application in the electronic field since they are adaptable for various uses. They are constructed of heavy gauge steel electrically spot-welded. Top corner is rounded, front panel is removable, and louvers on sides provide ventilation.

Back panel is ventilated on top and an opening is provided on the bottom so that connections can be made directly to the rear of the chassis. Finished in Grey wrinkle.

Cat.No.	H.W.D.	Chassis Size	List Price
S.F.-888	8 x 8 x 8"	7 x 7 x 2"	\$5.00

PASADENA 20,

CALIFORNIA

AMARON is a metal of marked superiority, replacing steel and aluminum advantageously in all non-magnetic applications of electronics. This unique material combines ideal characteristics of strength, durability, lightness, and machinability with exceptional thermal and electrical conductivity. Its surface properties are unsurpassed for easy soldering with our newly developed Amar-Flux and Amar-Weld. Amaron is basically a special aluminum alloy, chemically processed* for enhanced usefulness. Ensign chassis and cabinets of Amaron set new standards of dependability, convenience, efficiency and freedom from unexpected "bugs" in RF and AF circuits.

Amaron should not be confused with those common aluminum alloys which have come into disfavor because of poor strength or machinability. Users becoming accustomed to Amaron prefer it over steel or inferior alloys as overwhelmingly as they prefer copper over steel for hook-up wire! Insist upon Amaron — available exclusively in Ensign products. There is a substantial difference.

*Patents Pending

ENSIGN AMPLIFIER CABINETS

Ensign amplifier cabinets made from Amaron are neat and professional in appearance, light in weight, and rugged in construction. The effective ventilating grills are a part of their strikingly modern design.

These units are supplied complete with chassis equipped with handles. Outside surfaces are finished in gray satin wrinkle.

Over-all Size D. W. H.	Chassis Depth	Catalog Number
5x 9 1/8x7	2"	AC-2208
7x12 1/8x8	3"	AC-2242
8x17 1/8x9	3"	AC-2262

10x17 1/8x9	3"	AC-2272
13x17 1/8x9	3"	AC-2292

CHASSIS MOUNTING BRACKETS

Ensign chassis brackets are made from Amaron .051" thick. The 5/8" front flange is punched with panel mounting holes and is notched away so that the chassis may be mounted flush against the front panel. The two holes for the chassis ends are positioned for maximum

bracing. The brackets are supplied in pairs. Available in either natural or satin wrinkle finishes.

Size H. W.	Catalog Number

ENSIGN BLANK CHASSIS

The remarkable characteristics of Ensign chassis made from Amaron render steel chassis all but obsolete! Their rigidity and strength is comparable with that of steel, yet their weight is but a fraction that of the ordinary chassis. The inherent toughness of Amaron is supplemented by sturdy one-piece design. Unusually strong corners are the result of precise electronically controlled resistance welding and the unique surface properties of Amaron. Bottom plate mounting flanges along the chassis length add further reinforcement.

The superior electrical and thermal conductivity of Amaron (approximately 4 times that of the ordinary chassis) opens up new possibilities for higher efficiency and "Q," better heat dissipation, and greatly reduced common coupling troubles between grounds. Hum pickup in AF circuits is further minimized by lack of stray magnetic coupling in the chassis material.

Punching and drilling an Ensign chassis is a refreshing change after working with chassis of steel or ordinary alloys. Soldering to the natural Amaron surface is easy with Amar-Flux and Amar Weld. NO SPECIAL CLEANING OR SOLDERING TECHNIQUE IS NECESSARY.

Ensign chassis are available in a wide variety of sizes in the natural rust-proof Amaron finish and in durable gray or black satin wrinkle. The inside surfaces are left in the natural finish to facilitate soldering.

ENSIGN BOTTOM PLATES in the natural finish are available for each chassis size. They have punched mounting holes and embossed feet.

ENSIGN RACK PANELS

Ensign rack panels represent an outstanding application of the many advantages of Amaron metal. These panels are as rigid and strong as steel, yet are light in weight. With

Amaron, the machining and punching of a substantial panel need no longer be a formidable task. The superb electrical and thermal properties together with these characteristics of light weight, strength, and workability make Amaron the ideal panel material for all applications.

Ensign rack panels are made from Amaron metal in standard and heavy duty weights. The catalog numbers shown below refer to standard weight panels 1/8" thick. Heavy duty weight panels 3/16" thick may be specified by adding "H" to catalog numbers. Standard notching (1/4" or 1 1/2" from edges) is used. The beautiful satin wrinkle finish of these fine panels is not damaged by normal cutting, drilling, or punching operations.

ENSIGN CABINET RACKS

As with Ensign chassis and panels, the various Ensign cabinets made from Amaron metal represent a real forward step in modern functional design. Particularly in RF applications is the high conductivity of Amaron effective in reducing eddy current losses. Even in AF work, the low resistance bonding of cabinet and panels is often valuable. But whether in RF, AF, power, or control applications, the strength, light weight, heat conductivity, and beauty of these unusual cabinets is always appreciated.

Ensign cabinet racks are supplied in eight sizes for housing deluxe receivers, test equipment, transmitters, public address installations, etc. These cabinets accommodate all standard notched 19" panels. The rounded corners and neat trim add an ultra-modern touch. Supplied in gray or black baked satin wrinkle.

ing of cabinet and panels is often valuable. But whether in RF, AF, power, or control applications, the strength, light weight, heat conductivity, and beauty of these unusual cabinets is always appreciated.

ENSIGN BAKED FINISHES

Unsurpassed for beauty and durability. The unique natural surface of Amaron metal provides an ideal paint base comparable to the most expensively processed surface, yet without increased cost to you. Ensign finishes are applied and baked under precise automatic control. They stand up remarkably well during handling and machining. Comparison is invited. Ensign products are normally finished in gray or black satin wrinkle as well as in the natural Amaron finish. Beautiful modern "hammertone" tints may be supplied on special quantity orders where a distinctive effect is desired.

ENSIGN RECEIVER CABINETS

These beautiful cabinets are suggested where the best is desired in rugged, streamlined design for instrument or receiver. Amaron construction assures light weight, ease of machining, and electrical superiority.

The front panel is mounted with self-tapping screws. The recessed hinged lid affords easy access to components. A two-inch high opening in the rear is provided for necessary plugs and cables. Ample louvers at the rear are provided for ventilation. The thermal conductivity characteristics of Amaron also assure cooler operation. Outside surfaces are finished in gray satin wrinkle. Appropriate chassis are listed, and should be ordered separately.

Size H. W. D.	Catalog Number	Use Chassis Size

8x13x 8 1/2	RC-2213	8x12x2
8x15x10 1/2	RC-2215	10x14x3

ENSIGN INSTRUMENT CABINETS

The 6" sloping face of this fine cabinet provides ample room for a wide variety of instruments and controls. All the mechanical and electrical advantages of Amaron are incorporated in this neat design. Outside surfaces are finished in gray satin wrinkle. Chassis, 2 1/2" deep, of the open-

end natural-finish type, are listed for each size cabinet, and should be ordered separately.

Cabinet Size D. W. H.	Cabinet Number	Chassis Number
8x 8x8	IC-2208	OC-2008
8x11x8	IC-2211	OC-2011
8x14x8	IC-2214	OC-2014

HAM EQUIPMENT

TBS-50 TRANSMITTER — 50 Watts — 8 Bands — Phone or CW. Band switched — size 8" x 13" x 9". No plug-in coils — 2 meters to 80 meters — For fixed station or mobile operation. No oscillator or multiple tuning — crystal controlled.

Price, including tubes \$99.50

TBS-50A TRANSMITTER — for use with crystal microphone — includes 3 tube preamplifier.

Price, including tubes \$121.25

POWER SUPPLIES

Developed specially for use with the TBS-50 and TBS-50A.

APS-50

Delivers 425 volts at 275 ma. and 6.3 volts at 4 amps. With Hi-Lo switch. May be mounted on Rack Panel TBS-1A.

APS-50 — for 110 volt 50/60 cycle input. \$39.50

DPS-50

For portable operation. Delivers same voltages and current as APS-50.

DPS-50 for 6 volt operation. \$87.50

DPS-50 for 12 volt operation. \$54.30

MARINE RADIO TELEPHONES

MTR-3 — A compact, efficiently engineered unit — weighs 14³/₄ pounds. Highly sensitive, ruggedly constructed. 195-400 kc. 2000-3000 kc plus broadcast band. 5 to 10 watts output — operates on 6 to 12 volts — 7 tubes. Features include broadcast reception, and navigational aid by means of loop reception.

MTR-76 — Highly practical — 80 watt Radio Telephone. Covers frequencies 2000 - 6000 kc. 6 crystal controlled channels. Range 500 - 1000 miles. Special feature includes exclusive Harvey Wells Deck Calling System. Available for 110 volt or 32 volt D.C. operation.

MTR-26 — World's most beautiful and efficient Marine Radio Telephone. 25 watt unit — 4 crystal controlled channels — range of 75 to 200 miles. Plus features include broadcast reception, deck calling system — record playing provision. 6" speaker. Available for 12 volt D.C. or 32 volt D.C. operation.

hallicrafters RADIO

T-54 Television Receiver

Now . . . high-quality television at a low price! Hallicrafters Model T-54 is a perfected, practical set for use in the home, clubs, schools, offices and similar installations. Pictures are sharp, amazingly clear with a minimum of distortion. 7-inch tube gives 23 square inches of brightly lighted picture area. A special brightness control makes the picture easily visible even in a fully lighted room.

PUSH-BUTTON TUNING on all 12 channels, each channel pre-tuned before the set leaves the factory. Any desired station can be obtained by merely depressing the proper button. F.M. audio channel circuit eliminates man-made static, provides fine tonal fidelity.

DISTINCTIVELY STYLED, completely self-contained, the T-54 requires a minimum of space. Its modern steel cabinet blends equally well with period or contemporary surroundings.

CONTROLS: Front Panel — Combined power switch and contrast control turns set "on" and regulates picture for best definition; brightness control permits adjustment for best viewing brilliancy; volume control adjusts sound level; separate horizontal and vertical controls for easy synchronization; push buttons allow quick program selection on all 12 frequencies; fine tuning allows peaking each channel for maximum efficiency. Rear Panel — Focus control; vertical and horizontal position controls to properly center picture; width and height controls for correctly proportioned reproduction.

SPECIFICATIONS: 18 tubes plus picture tube and 4 rectifiers; 7 by 5 inch P.M. speaker, provision for external antenna using 300-ohm transmission line; all 12 channel frequencies 44-88 and 174-216 MC; permeability-tuned IF's; AGC on all RF and IF circuits; all RF and oscillator alignment adjustments at front of chassis. Cabinet power interlock for safety removes all voltages when lid of cabinet is opened. Operates from 105-125 volts, 50-60 cycles AC. Size 20 inches wide by 10 $\frac{1}{4}$ inches high by 16 inches deep.

T-54. Ship. wt. 52 lbs. Amateur net **\$189.50**

FEATURES OF T-54 AND 505

1. Push-button tuning gives quick program selection. 12 channels, covering all possible frequencies, already built in.
2. Easy on the eyes. No strain nor tired feeling. Clearer pictures, better focus.
3. Easy to operate — all controls are clearly marked.
4. Dependable performance assured by Hallicrafters' long experience and engineering "know how" in the high frequency field.
5. Picture tube doubly protected by rubber mountings and plastic safety shield.
6. Especially designed combination escutcheon and light-shield permit easy viewing even in fully lighted room.
7. Practical table size — ideal for den, living room, apartment.
8. Choice of modern steel or beautifully finished mahogany veneer cabinet.
9. Easy to install — you can do it yourself with the complete instructions included.

505 Television Receiver

Here, in a handsome mahogany veneer cabinet, is the same precision-engineered television receiver as shown above. Designed by Raymond Loewy, leading industrial stylist, Model 505 is ideal for apartment, den, or living room. Seven-inch electro-static picture tube brings a sharp, clear picture — 23 inches square. The 505 will prove a source of rich satisfaction, bringing you sports events, variety shows, newscasts. Easy to operate — controls are clearly marked; just push one of 12 pre-tuned buttons for instant channel selection.

ELECTRICAL SPECIFICATIONS same as for above model, including 18 tubes plus picture tube and 4 rectifiers. Size 20 $\frac{5}{8}$ " wide, 11 $\frac{1}{2}$ " high, 17" deep.

505. Ship. wt. 45 lbs. Amateur Net **\$199.50**

hallicrafters RADIO

T-61 10-in. Television Receiver

Hallicrafters latest addition to its line of precision-engineered television — a 10-inch direct-view receiver in a modern plastic cabinet. Picture is sharp, stable with plenty of contrast. Quick, convenient push-button tuning on all 12 television channels.

CONTROLS: Front Panel — Contrast control for best picture definition; brightness control for best viewing brilliancy; volume control; horizontal and vertical controls for synchronization; 12 push-button station selectors; fine tuning control. Rear Panel — Focus control, vertical and horizontal position controls; width and height controls; vertical linearity control.

SPECIFICATIONS: 19 tubes plus picture tube and 3 rectifiers; 12 push buttons covering all assigned TV frequencies; RF amplifier for improved signal-to-noise ratio; 3 IF amplifiers for proper band width and best picture definition; 2 video amplifiers to provide full picture contrast; AGC control-picture holds intensity despite variations in signal strength; automatic level; 6½" electrodynamic speaker. Size 17½ by 16¾ by 19¾ in. deep.

T-61. Ship. wt. 105 lbs. Amateur Net **\$289.95**

T-60 Projection Television

Hallicrafters Model T60 embodies the latest developments in projection television. A bright, flat, sharp image — 192 square inches of picture area . . . clear, steady, optically correct, eliminates all eye fatigue.

Basis of system consists of small cathode ray tube (2½" projection triode), an optical unit that magnifies, reflects and projects the image, and a high voltage unit to sustain brilliance and stability. A high quality FM sound system gives clear natural tone. System also includes 6-in. PM dynamic speaker mounted on baffle (not shown).

All elements go together in compact arrangements — permitting custom installations in book cases or small graceful cabinets. Sturdy wood frame is easy to install.

Excellent viewing day or night. No need to dim room lights. System provides 450 lines resolution — a contrast ratio of better than 30:1. Optical system is continually stable and remains in perfect adjustment.

CONTROLS: Front Panel — Contrast control for best picture definition; brightness control for best viewing brilliancy; volume control; horizontal and vertical controls for synchronization; 12 push-button station selectors; fine tuning control. Rear Panel — Focus control, vertical and horizontal position controls; width and height controls; vertical linearity control.

SPECIFICATIONS: 20 tubes plus projection triode and 5 rectifiers; 12 channel push-button selector switch; RF amplifier for improved signal-to-noise ratio; 3 IF amplifiers; 2 video amplifiers; improved synchronizing circuits; automatic gain control; automatic black level control; inter-carrier FM sound system. Size 45 in. high by 25 in. wide by 13 in. deep.

hallicrafters RADIO

SX-62 FM/AM All-Wave Radio

SWL VERSION OF FAMOUS SX-42 . . . COVERAGE 540 KC — 109 MC INCLUDING FM . . . BUILT-IN CRYSTAL CALIBRATOR.

The newest addition to Hallicrafters line and just what the all-wave listener has been waiting for. Will out-perform any ordinary broadcast receiver on any frequency — Standard Broadcast, Short-Wave or FM.

Having basically the same chassis as Hallicrafters best communications receiver, the SX-62 provides communications-receiver performance in simplified form. A single tuning control covers the wide-visibility dial. Only one band lights up at a time — you always know just where you are tuning.

In addition a crystal calibration oscillator is built in. A flip of the switch at any time will put test signals at 500 KC intervals across the dial. You just tune in the nearest one of these signals and then use the calibration-reset control to adjust the dial pointer to the exact frequency.

Continuous AM reception from 540 KC to 109 MC; FM reception 27-109 MC. Temperature-compensated oscillator with voltage regulator. Two RF and three IF stages; dual IF channels (455 KC and 10.7 MC). Audio flat 60-15,000 cycles; 8-watt push-pull output.

CONTROLS: Band Selector — #1 540-1620 KC, #2 1.62-4.9 MC, #3 4.9-15 MC; #4 15-32 MC, #5 27-56 MC, #6 54-109 MC; Receive/Standby, Crystal calibration On/Off, Noise Limiter, Tuning, AF Gain, Phono/FM/AM/CW, six-position Selectivity, four-position Tone, RF Gain, and Calibration Reset.

PHYSICAL DATA: Gray steel cabinet with satin chrome trim. Top opens on piano hinge. Size 20 in. wide by 10½ in. high by 15 in. deep.

EXTERNAL CONNECTIONS: Doublet or single wire antenna. 500 and 5000 ohm outputs. Phone jacks. Phonograph jack. Socket for external power. Remote standby connections. 105-125 volt 50-60 cycle AC line.

14 TUBES PLUS VOLTAGE REGULATOR AND RECTIFIER: two 6AG5's RF amps., 7F8 Conv., 6SK7 IF Amp., 6SG7 IF Amp., 7H7 IF Amp., 7H7 Limiter and AM Det., 6H5 Discriminator, 7A4 BFO, 6H6 ANL, 6SL7 AF Amp., two 6V6's Push-pull Output, 6C4 Calibration Osc., VR-150 Regulator, 5U4G Rectifier.

SX-62. Ship. wt. 65 lbs. Amateur Net **\$269.50**

S-47 FM/AM All-Wave Radio

TOP QUALITY STRAIGHT BROADCAST RADIO . . . AUTOMATIC FREQUENCY CONTROL . . . PUSH-BUTTON TUNING . . . HIGH-FIDELITY AUDIO

Hallicrafters best radio for conventional home reception . . . comparable to chassis found in consoles in the \$600-\$800 price class.

Push-button tuning for both Standard Broadcast and FM Bands — 5 buttons on each band. Long avoided by many manufacturers, push-button FM can now be yours . . . via Hallicrafters precision engineering.

Automatic frequency control gives unprecedented ease of tuning on FM . . . with unequalled accuracy. As a station is approached, this circuit "takes over" electronically, and holds the station in perfect tune, with knife-like precision, giving clearest reception.

Offers Standard Broadcast, Short-Wave, and FM. Two "band-spread" Short-Wave bands for easier tuning. Temperature compensated oscillator. One RF and three IF Amplifier stages; dual IF channels. 10-watt push-pull output; audio response 30-15,000 cycles.

CONTROLS: 5 push-buttons for AM and 5 for FM. Band Selector — FM 88-108 MC, AM 540-1720 KC, 5.9-18.2 MC, 9-12 MC, 15-18 MC. 3-position Bass Tone, 4-position Treble Tone, Volume, FM tuning, AM tuning.

PHYSICAL TUNING: Gray steel cabinet with satin chrome trim. Piano hinge top. 20 by 10½ by 16 in.

EXTERNAL CONNECTIONS: Doublet or single wire antenna. 500-ohm output. Phonograph jack. 110-volt outlet for phono motor. 105-125 v. 50-60 cycle AC.

14 TUBES PLUS RECTIFIER: 6BA6 RF Amp., 6BE6 Mixer, 6J6 Osc. and Auto. Freq. Control, two 6SG7's IF Amps., 6SG7 FM 3rd IF Amp. and AM Det., 6SH7 FM 4th IF Amp., 6AL5 FM Det., two 6J5's and two 6SQ7's AF Amps., two 6V6GT's output, 5U4G Rect.

hallicrafters RADIO

S-55 FM/AM Broadcast Radio

S-58 FM/AM Radio

A complete unit, with built-in speaker, for AC or DC use at an amazingly low price. Excellent performance with Hallicrafters precision engineering.

Standard Broadcast 540-1700 KC, FM 88-108 MC, or Phono; full-range Tone, Volume, Tuning. Modernly styled gray steel cabinet. Size 13¼ in. wide by 5¼ in. high by 6 in. deep. Doublet or single wire antenna. Phonograph jack. 105-125 v. 50-60 cycle AC or DC. 6 tubes plus Rectifier; 12BEC Converter, 6BJ6 IF Amp., 6BJ6 IF Amp. and AM Det., 12A15 FM Det., 12SQ7 AF Amp., 35L6 Output, 35Z5 Rectifier.

S-58. Ship. wt. 17 lbs. Amateur Net **\$59.50**

AUTOMATIC FREQUENCY CONTROL . . . PUSH-PULL OUTPUT. Top-performance on Standard Broadcast and FM in the medium price range. Comparable to chassis in consoles in \$400 to \$600 price class.

Automatic Frequency Control assures clearest possible reception on FM by eliminating the human error in tuning; as station is approached, this circuit "takes over" electronically, and holds the station in perfect tune, with knife-like precision. One RF, two IF stages of amplification. 7-watt push-pull output. Audio response 50-14,000 cycles.

CONTROLS: Band Selector — 540-1700 KC or 88-108 MC or Phono, Full-range Tone, Volume, Tuning.

PHYSICAL DATA: Gray steel cabinet, handsomely finished. 18½ by 8¾ by 12 in. deep.

EXTERNAL CONNECTIONS: Doublet or Single wire antenna. 500-ohm output (no speaker). Phonograph jack. 110 v. power outlet for phono motor. Power cord for 105-125 volt 50-60 cycle AC line.

10 TUBES PLUS RECTIFIER: 6AU6 RF Amp., 6BA6 Mixer 6J6 Osc. and Auto. Freq. Control, 6BAC IF Amp., 6SI17 IF Amp., 6SH7 Limiter, 6H6 Discriminator, 6SJ7 AF Amp., two 6K6GT's Output, 5Y3GT Rectifier.

S-55. Ship. wt. 33 lbs. Amateur Net **\$129.50**

CHASSIS ONLY. Model S-56. 12¼ in. wide by 7¾ by 8¾ deep. Ship. wt. 23 lbs. Net **\$110.00**

S-59 FM/AM Chassis

A separate chassis of the more powerful AC type (better than in radio at left). Comparable to chassis in consoles in the \$140 to \$190 price range.

Standard Broadcast 540-1700 KC, FM 88-108 MC, or Phono; full-range Tone, Volume, Tuning. 4-watt output. 13¼ in. wide by 5½ in. high by 6 in. deep. Doublet or single wire antenna. Phonograph jack. 500-ohm output for speaker. 105-125 volts 50-60 cycle AC. 7 tubes plus Rectifier; 6BE6 Converter, 6BA6 IF Amp., 6BA6 IF Amp. and AM Det., 6AL5 FM Det., 6SQ7 AF Amp., two 6K6GT's Output, and 5Y3GT Rectifier.

S-59. Ship. wt. 14 lbs. Amateur Net **\$49.50**

hallicrafters RADIO

SX-42 Communications Receiver

CONTINUOUS COVERAGE FROM 540 KC to 110 MC
IN 6 BANDS . . . FM RECEPTION ABOVE 27 MC.

Tops in performance and versatility . . . preferred by Amateurs, SWL's, and discriminating AM/FM broadcast listeners everywhere. AM reception 540 KC - 110 MC; FM 27-110 MC. Temperature-compensated oscillator with voltage regulator. Two RF and three IF stages; dual IF channels (455 KC and 10.7 MC). Audio flat 50-15,000 cycles; 8-watt output.

CONTROLS: Band Switch — #1 540-1620 KC, #2 1620-5000 KC, #3 5.0-15.0 MC, #4 15.0-30.0 MC, #5 27.0-55.0 MC, #6 55.0-110 MC. Main tuning dial with logging scale on knob. Band spread dial calibrated for 3.5, 7, 14, and 28 MC bands plus logging scale. Two-position dial lock secures either main or band-spread knobs. AF Volume Control with power switch, AVC, Noise Limiter and Receive/Standby switches. Crystal Phasing, AM/FM/CW/Phono, CW Pitch, six-position Selectivity, four-position Tone, and RF Gain Controls. "S" meter adjustment on rear. Control settings for Broadcast and FM Bands marked in color for simplified use by others in family.

HT-19 Medium Power Transmitter

The newest addition to Hallicrafters Amateur line . . . a completely self-contained unit for the modern-minded Ham. Offers both Narrow Band FM and CW, plus provisions for AM, to give maximum flexibility on 5 popular Bands. In addition its compact size and smartly styled cabinet make it ideal wherever appearance and space are to be considered.

Basically the HT-19 consists of a Variable Frequency Oscillator (used as ECO or Pierce crystal), a frequency modulator with its speech amplifier, and an RF Buffer and Final Amplifier. The 4-65A in the final, cooled by a 3-inch 3000-rpm fan, gets plate input of 185 watts for about 125 watts output. Extremely high

stability and extremely low FM distortion. Pilot lights for both filaments and plate power. Size overall 20 by 10 $\frac{1}{4}$ by 18 in. deep.

CONTROLS: 5-position Operation Switch — 3 crystals, VFO, or NBFM. Band Selector (3.5-4.0 MC, 7.0-7.3 MC, 14.0-14.4 MC, 21.0-21.45 MC, and 27.16-29.7 MC) changes oscillator only; final coils are changed inside the unit, all five coil assemblies remaining inside at all times (dummy positions provided for the four coils not in use). Check Switch turns on osc. for spotting signal on receiver. Plate Switch controls all "B" power and makes connections for remote control. Power Switch is in 110-volt line. Deviation Control maintains 0.4 ratio on all bands. Osc. Plate Tuning operates osc. gang and calibrated dial. Power Amp. Tuning tunes final plate. Push-button Meter Switch throws ma. meter from normal connection in cathode of final to final grid.

EXTERNAL CONNECTIONS: Microphone Connector. Keying Terminals (osc. keying). 50-600 ohm output. 6 terminals for remoting of either trans. or revr. 4 terminals in final screen and plate circuits for applying AM from external modulator — 90 watts audio required. Cord for 105/125 v. 50/60 cycle AC.

5 TUBES PLUS 2 VOLTAGE REGULATORS AND 3 RECTIFIERS: 3 6BA6's — oscillator, freq. modulator, and speech amp.; 6L6 Buffer; 4-65A Output; VR-150 and VR-105 Regulators; 5Y3GT and 2 866's Rectifiers.

HT-19. Ship. wt. 98 lbs. Amateur Net **\$298.00**

HT-18 Variable Freq. Oscillator

Complete exciter with calibrated band-switching and built-in power supply. Xtal or VFO, NBFM or CW on 5 Bands. Output 2.5-4.5 watts. Temperature compensated, voltage regulated. Built-in speech amp.

Chassis similar to HT-19 above, less final amplifier. Operation Switch, Band Selector (ranges like HT-19). Check, Plate, Power, and Deviation Switches. Single Tuning control. Mike, keying, remote control connections. 72-ohm output. 3 6BA6's, 6L6, VR-150, VR-105, 5Y3GT. Size 12 $\frac{3}{4}$ by 7 by 7 $\frac{3}{4}$ in. deep.

HT-18. Ship. wt. 25 lbs. Amateur Net **\$110.00**

HT-17 Low Power Transmitter

Versatility, compactness, and built-in power supply at low cost. 10-20 w. output. Quality construction.

CONTROLS: Osc. and Amp. Tuning, Ant. Loading; Meter, Power, and Carrier Switches. Pi-Section coupler for matching single wire or doublet ant. Keying and modulation terminals. Cord for 110 v. 60 cycle AC. 6V6 Osc. 807 Output. 5Y3GT Rect. Ship. wt. 25 lbs.

HT-17, with coils for 7 MC only.....Net **\$49.50**
Set of coils for 3.5 MC \$3.50; for 14 or 28 MC \$7.00 per set. Plate ma. meter (in place of bulb) \$6.50.

(Prices Slightly Higher West of Rockies)

FINE COMMUNICATIONS EQUIPMENT

RADIO MFG. ENGINEERS, INC.

Peoria 6, Illinois U. S. A.

THE RME 84
FOR HOME—PORTABLE OR MOBILE OPERATION

VHF-152A
3 BAND
CONVERTER

RME 84 at right, VP-2—6 volt power pack with cable attached, optional for RME 84 in center, CM-1—Carrier Level "S" Meter with cord and plug, optional for RME 84 at left.

The Coverage Is Complete .540 to 44 Megacycles

An important feature is the continuous coverage ranging from 540 kc to 44 megacycles. This coverage, in addition to providing for the regular broadcast band, takes in the 30, 40, 20, 15 and 10 meter amateur bands. The calibration is made on a 7 inch diameter scale. In addition, a smooth-running vernier dial gives band spread on any setting of the main scale. The vernier scale makes five complete revolutions for the 180 degree rotation of the tuning condenser.

Seven Tubes Have Been Chosen For The RME 84

1. A 7B7 local radio frequency amplifier is ahead of the first detector
2. A 7B7 local is used as a first detector and radio frequency oscillator
3. A 7B7 serves as the first IF operating at 455 kc
4. A 7B7 second IF further amplifies the signal.
5. A 7K7 local acts as second detector and first audio amplifier.
6. Another 7K7 provides the beat frequency and acts as noise limiter.
7. The 6AG6 provides the final audio frequency output.
8. A 5Y3GT is the power rectifier tube.

Portability Built Into The RME 84

Conscious of the fact that many thousands of amateurs want a receiver for portable operation, the new RME 84 is equipped with a special socket connection, making possible connections to either a B battery and an A battery supply or a similar source of power such as an external vibropack. 135 volts of B and 6 volts of A battery will operate the RME 84 at full power. The drain on the B battery is only 32 milliamperes at 135 volts and the 6 volt A battery provides 1.5 amps, including the two dial lights.

The new noise limiter, of the series type, performs exceptionally well. Also made available for future use with the RME 84 is a signal strength meter to be connected through the special socket located on the rear of the chassis apron.

SENSITIVITY: The average sensitivity of the RME 84 is of the order of 2 microvolts over the entire range of the instrument.

RME 84, CODE HANDY, complete for 115 volt, 60 cycle operation and for use with external battery supply. May also be had for 230 volt, 25 cycle operation at additional cost. f.o.b. Peoria, Illinois. Net Selling Price \$98.70

VP-2, CODE HOMER, A 6 volt power pack with cable attached, optional equipment for RME 84. f.o.b. Peoria, Illinois, Net Selling Price \$28.20

CM-1, CODE HURST, Carrier Level "S" Meter with cord and plug, optional equipment for RME 84. f.o.b. Peoria, Illinois, Net Selling Price \$14.00

Reception on the new high frequencies, 50 to 54 mc. and 144 to 148 mc. bands, and better reception on the 27 to 29.7 mc. band, using the double detection system, image free, at a cost which any amateur can afford—that is what the new VHF-152 is designed to give. . . . Every owner of a communications receiver can, with the acquisition of this new converter, do a much better job of working high frequency signals than is possible with most any higher priced, specially designed receiver.

This converter provides an order of stability at 50 mc. much higher than most communications receivers have when operating at 5 mc. New engineering design and construction make this possible.

Miniature tubes are used, a 6AK5 rf amplifier and a 6J6 detector and a 6J6 oscillator complete the converter proper. The built-in power supply uses a 5Y3GT rectifier tube and a VR150 voltage regulator. The three bands are calibrated to cover the full sweep of a seven-inch diameter scale, indirectly illuminated. . . . The tuning mechanism is of the same sturdy, positive construction characteristic of all RME units. Smooth, velvety operation of the large knob makes operation a pleasure.

The sensitivity of the VHF-152 is of the order of 2 microvolts. Its output frequency is 7000 kc.

Separate connections are provided for the 10, 6 and 2 meter antennas and for the antenna used with the receiver. Each band has its own especially designed antenna input circuit of approximately 300 ohms impedance. The input of the receiver is changed from the VHF-152 output to the receiver antenna by a front panel switch. Another front panel switch selects the 10, 6 or 2 meter band for VHF-152 operation.

Interconnecting plug and cord are also furnished, which permanently connect the VHF-152 direct to the input terminals of the receiver.

The cabinet is designed to match the RME-45 communications receiver, both in streamlined appearance and in two tone gray and black crinkle finish.

Dimensions are as follows: 11" high, 12" wide, 11" deep, with hinged lid. Standard operation is for 115 volt, 50-60 cycle power source.

Complete with tubes, interconnecting plug and cord. **CODE: HAMPY,** f.o.b. Peoria, Illinois, Net Selling Price \$86.60.

SINCE
1933

RME

FINE COMMUNICATIONS EQUIPMENT
RADIO MFG. ENGINEERS, INC.
Peoria 6, Illinois U. S. A.

1. 550 kc. to 33,000 kc. coverage in 6 bands.
2. Two speed tuning control mechanism.
3. Band spread dial an integral part of main dial, giving constant calibration.
4. 5 amateur bands calibrated on band spread dial: 3.5m., 7mc., 14m., 21mc., 28mc.
5. 0-100 added scale on bandspread dial to facilitate logging on all bands.
6. 5 position variable crystal selectivity with phasing control.
7. Decibel meter calibrated from 0 to R9— and past R9 to 96 decibels.
8. Automatic noise suppression.
10. High signal to noise ratio.
11. VR-150 voltage regulator tube.
12. 455 kc. intermediate frequency.
13. Antenna input terminals for single wire or transmission line.
14. Uniform audio response with headset of any impedance from 50 to 30,000 ohms.
15. Four watts of audio output.

RME-45 RECEIVER WITH CAL-O-MATIC TWO SPEED TUNING

Five amateur bands are calibrated on the band spread dial, with plenty of spread on each band. A station once logged can be quickly found again as there is no separated dial to adjust. . . . An additional scale of 0-100 is also incorporated on the band spread dial so that stations on any frequency within the tuning range of the receiver can be accurately logged.

Automatically calibrated over the entire tuning range—that's what Cal-O-Matic means.

Because of their high frequency tuning characteristics, loctal tubes were chosen to perform each rf, if, and af function in the critically balanced super-heterodyne circuit used.

Very high stability is obtained in the 45, and one of the reasons is the use of a double spaced rf oscillator and temperature compensated padders.

RME was the first to introduce a crystal filter circuit into a communications receiver many years ago. A variable selectivity crystal filter is a must in a receiver of the quality of the 45 and so is the DB meter, also introduced first in a communications receiver by RME.

Because of its overall sensitivity, its appearance and its ease of accurate tuning and logging, the RME-45, although designed for communications, is nevertheless also an excellent receiver for the home listener.

Tube line-up:

7B7—rf. ampl.	7A6—noise limiter	7C5—output
7S7—mixer & osc.	& 2nd det.	7C7—beat osc.
7B7—1st if	7C7—1st audio	5Y3GT—rectifier
7B7—2nd if	VR-150—Voltage Regulator	

The new RME-45 is a sensitive communications receiver which employs the new Cal-O-Matic two speed tuning mechanism to give continuous coverage from 550 kc. to 33,000 kc.

Cal-O-Matic tuning has won unqualified approval ever since it was introduced in the first RME receiver. This RME development gives to the user of a 45 the ability to log all stations accurately, since the bandspread dial and the main tuning dial operate from one control shaft.

There are two tuning knobs, concentrically mounted. The smaller knob turns approximately five times while the larger knob is turning once. A frequency band is quickly covered by using the large knob, and the critical adjustment necessary for finding a particular station is made with the smaller one.

The receiver is mounted on a relay rack panel measuring 19" wide by 10½" high with four correctly spaced mounting slots on each side. The unit can easily be taken out of the cabinet and is then ready for relay rack mounting.

Gray crinkle finish with black trim gives receiver and speaker a fine appearance.

Controls, from left to right across bottom of panel are: Off-on switch with tone control, headset jack, rf gain control and AVC, tuning control, band-switch, BFO pitch control, BFO off-on switch, audio gain control, transmit-on-standby switch.

RME-45 communications receiver in crinkle gray with black trim cabinet measuring 22¼" wide by 10¾" deep by 11" high overall, complete with ten matched tubes, including 8" PM speaker in crinkle gray, black trim cabinet, 19¼" wide by 9¾" deep by 10¾" high overall, for 115 volt 50-60 cycle operation. CODE: PINES, Net Selling Price, f.o.b. Peoria, Ill. . . . \$185.20
Speaker, 8" PM, mounted in two tone crinkle finish housing. CODE: LACER. Net Selling Price, f.o.b. Peoria, Illinois . . . \$13.50

Special transformer, other than 115 volt 50-60 cycle, for conversion to 230 volt and/or 25 cycle operation. CODE: FOURS. Additional net selling price, f.o.b. Peoria, Illinois \$5.10

THE HF 10-20 CONVERTER
For 10-11-15 and 20 Meters

Because of the double conversion system, the HF 10-20 provides outstanding and imageless reception on 10-11-15 and 20 meters. And it's an especially vital adjunct to those receivers that tune only up to 18 mc. or possess inadequate bandspread. The HF 10-20 provides an average of 7.8 linear inches of calibrated bandspread on each of the three bands. Images are non-existent. The output (I. F. frequency) of the HF 10-20 is 7 mc. It can be used with any all-wave or amateur receiver. Features include provision for separate antennae, self-contained power supply, antenna selector switch, band selector and high gain. The increase in gain, depending on the receiver and receiving conditions, is approximately 30 DB over the entire range of frequencies covered.

Tubes used are a 6BA6 RF amplifier and a 6J6 twin triode mixer. Built in power supply uses a 5Y3GT rectifier and a VR150 voltage regulator.

Model HF 10-20 Converter, Standard Model, CODE HORN, in cabinet to match RME 45 Receiver in appearance. Dimensions: 11" high, 12" wide, 11" deep.
Amateur Net Price\$77.00

Model HF 10-20 Type "S" Converter, CODE HILL, in cabinet to match RME 84 in appearance. Dimensions: 9 1/4" high, 10 1/4" wide, 10 1/4" deep.
Amateur Net Price\$77.00

THE NEW RATIO DETECTOR (NBF4)
For Optimum Narrow Band FM Performance

With this plug-in unit and an RME 45 receiver, the noise reducing advantages of NFM are fully realized.

NFM Signals that can't be heard with good AM communications receivers come in loud and clear against a noiseless background.

Equal sensitivity can be enjoyed on AM or NFM. It employs a highly efficient ratio-type detector and a limiter for noiseless reception of NFM signals. Only RME 45 receivers can employ the unit.

Amateur Net Price\$19.50

THE DB22A PRESELECTOR

Coverage .54 to 44 Mc. — Average Gain 30 DB

Here's the new DB22A completely redesigned for greater efficiency and higher signal to noise ratio. It uses new 6BA6 miniatures. Image ratio is better than 50 DB with a communications receiver having a single stage of RF. It's calibrated, has smooth planetary tuning, self contained power supply, antenna by-pass switch, gain control and many other features. Model DB22A Preselector, Standard Model, CODE BONNET, in cabinet to match RME 45 Receiver in appearance. Dimensions: 11" high, 12" wide, 11" deep.

Amateur Net Price\$71.00

Model DB22A—Type "S" Preselector, CODE CLEAR, in cabinet to match RME 84 Receiver in appearance. Dimensions: 9 1/4" high, 10 1/4" wide, 10 1/4" deep.

Amateur Net Price\$71.00

THE BOOMERANG (MB-3)

A Break-In & Monitoring Device for CW & Fone

The "Boomerang" is the solution to rapid and efficient break-in, and the avoidance of needless QRM. Dots and dashes are heard in the headphones or the speaker while sending—a great help in perfecting the fist and avoiding errors.

When the key is down, any signal normally going through the receiver is automatically suppressed. Raise the key and instantaneously the receiver functions.

The "Boomerang" can be used as a handy monitor for phone operation, as a code practice oscillator and a tone modulator. Tubes include a 7K7, a 6SL7 and a 6X4 rectifier. Cabinet is two-tone grey finish.

Amateur Net Price\$29.50

RADIO'S MASTER

Philmore RADIO KITS

"Supertone" RADIO Crystal Set Kit

Complete in every detail for quick and simple assembly. Crystal set kits are a great hit with youngsters and adults the world over.

Kits consist of moulded bakelite base with contact slider, crystal holder; crystal detector and cover, cats-whisker support, spring cats-whisker, ready wound tuning coil, binding posts, plus all necessary wire, hardware and "easy-to-follow" instructions.

Cat. No. 7001A —
List Price **\$3.15***

ONE TUBE (Plus Rectifier) Tube AC-DC RADIO KIT

Philmore radio kits have been designed purposely for easy construction and still use the most efficient types of circuits. Kits are replicas of parts and circuits used and thoroughly tested in master models and standardized. This permits anyone without previous knowledge or skill to obtain excellent results by following the simple instructions and diagrams.

Attractively packaged in a sturdy box. All parts are fitted in the inside, making a very presentable display.

No. 7001B — Complete, less tubes and headset.
List Price **\$9.90***

TWO TUBE (Plus Rectifier Tube) AC-DC RADIO KIT

The two-tube plus rectifier tube receiver kit is more elaborate than the one-tube and much greater in signal strength — permitting use of a 4" P.M. speaker. Simple instructions with pictorial as well as schematic diagrams make assembly simple and quick. Attractively packaged in sturdy box.

Here is a completely professional-type radio kit that is perfect for the beginner in radio. An excellent opportunity to learn the fundamentals of radio and at the same time build a radio that will be a high-quality unit, superior in tone and selectivity to many manufactured radios.

Completely assembled, you have a TWO-BAND set, covering standard broadcast (550-1700 Kc) and SHORT WAVE (6-18 Mc).

Cat. No. 7001C—Complete with Speaker, less tubes.....List Price **\$17.50***

*Plus Federal Excise Tax

Each Kit is attractively packaged in sturdy box.

**Glass Enclosed
CRYSTAL DETECTOR**

- Ideal for Crystal Reflex circuits.
 - Dust-proof.
 - Fixed at factory but delicately adjustable at all times.
 - Includes Supersensitive Crystal.
- Cat. No. 7008...List Price \$0.50

**Fixed
CRYSTAL
DETECTOR**

Will give renewed action to reflex or crystal sets. The sensitivity of the mineral is determined by laboratory methods and fixed permanently. Made to withstand high voltage. Small and enclosed in a bakelite case.

Cat. No. 7002.....List Price \$0.80

**Open Type
CRYSTAL
DETECTOR**

Universal joint on swivel arm provides quick, accurate adjustment on any point of crystal. Handsome polished metal finish. Completely assembled, ready for mounting.

Cat. No. 7003.....List Price \$0.38

Unmounted DETECTOR

Includes stand, crystal cup, arm with catswhisker and screws and nuts necessary for mounting.

Cat. No. 7010.....List Price \$0.20

**CRYSTALS and
CATSWHISKERS**

Mounted Galena Crystal on Display Card or Individually Boxed.

List Price

- Cat. No.
- 7001—Galena Crystal, indiv. box... \$0.125
 - 7005—Galena Crystal, disp. card... .125
 - 7006—Catswhiskers (2 on display card)..... .075

**HAND
MICROPHONE**

Ideal novelty for home parties. Cuts in on broadcasts and permits person to talk or sing through the radio speaker. Button switch cuts mike in and out of broadcast. Simple to install. Equipped with 9 ft. of cord.

Cat. No. 500H. List Price \$2.50

**Junior
MICROPHONE**

For home broadcasting; will operate efficiently from any radio set. It will help turn any dull house party into hilarious, enjoyable entertainment.

Equipped with push button switch for cutting off radio programs and bringing in the home broadcaster's voice very clearly. Sensitive, with excellent volume, any set without rewiring and can remain attached without interfering with regular broadcasting.

Cat. No. 500.....List Price \$1.65

Philmore

GUARANTEED RADIO PRODUCTS

**"Little Wonder" and "Supertone" RADIO SETS
Have These Outstanding Features!**

- Glass enclosed dust-proof detector, which is adjustable. (Supertone)
- Specially designed hook-up assuring reception within a radius of twenty-five (25) miles from a broadcasting station.
- Under favorable climatic conditions reception may be received as far as one hundred (100) miles from broadcasting station.
- Costs nothing for upkeep.
- No batteries, tubes or expensive accessories required.
- Manufactured in Genuine BAKELITE in 4 brilliant colored pastel shades of GREEN—ORANGE—RED and ROSE. The advantages of bakelite are well-known for its beauty and cleanliness. It will retain its color and can be kept clean for the life of the set which is practically infinite.

**"Little Wonder"
RADIO RECEIVING SET**

Compact in size but big in results. The open type detector permits adjustments to be made to the finest degree. This set includes the Philmore Supersensitive Crystal which assures quick results when "looking" for a station, because the entire surface of the crystal is sensitive.

Cat. No. 7000.....List Price \$1.65

**"Supertone"
RADIO RECEIVING SET**

A remarkable Radio Receiving Set built to give everlasting service. This set will bring in broadcasting loud and clear without distortion or noises. The Supertone Crystal Set is equipped with a Philmore Supersensitive Crystal which will give excellent results over an indefinite period of time.

Cat. No. 7001.....List Price \$2.00

**U. S. Army Signal Corps
DOUBLE HEADPHONES**

Made for the U. S. Army—built to meet strict army specifications and offered at a price far below what the government paid for them. We added a plastic 5-foot cord so they may be adapted for civilian use. These are high impedance phones of 2000 ohms and are equipped with a heavy leather covered adjustable headband.

Cat. No. 2260A.....List Price \$3.15

AERIAL KIT

A complete kit of parts for assembly of a professional antenna. Attractively packaged in a multi-colored display box.

- 1 coil 7-26-50 ft. stranded copper aerial wire.
- 1 coil 25 ft. rubber covered lead-in wire.
- 1 Ground Clamp.
- 1 Lead-in-strip.
- 2 Porcelain insulators.
- 2 Nail-it knobs.
- 1 Instruction sheet.

Cat. No. 2103.....List Price \$1.35

EVERY ONE A CHAMPION!

All Kits Professionally Engineered, Professionally Designed and Professional Looking

KIT MODEL S-5, A 1-BAND RECEIVER

This radio kit contains the following features: improved superheterodyne circuit, built-in loop antenna, PM Alnico speaker, streamlined airplane dial, wide tuning range 550Kc-1600Kc, 5 tubes (including rectifier), 115 V, AC-DC, 12SK7 IF 12SA7 converter, 12SQ7 Det. and 1st audio, 50L6GT output and 35Z5GT rectifier. Complete with tubes including beautiful bakelite cabinet, ready for assembly.

KIT MODEL S-6X, A 2-BAND RECEIVER

Model S-6X, a 6-tube, 2-band receiver kit equipped for 110 AC or DC . . . covers the following ranges: 550 Kc-1600 Kc, 6-16 Mc. Complete with tubes including beautiful bakelite cabinet ready for assembly. This kit uses the following tubes: RF Amp. 12SK7, Converter 12SA7, IF 12SK7, Det. and 1st Audio 12SQ7, 35L6 output and 35Z5 rectifier.

KIT MODEL FM-7, A SELF-CONTAINED TABLE MODEL FREQUENCY MODULATED RADIO RECEIVER KIT

Model FM-7, has a frequency range of 86-110 Mc, can also be used as a TUNER with a high quality amplifier. A phonojack is provided in the rear of the chassis with double pole, double throw switch for feeding signal to either the radio speaker or to the phonojack. An additional jack for connecting extra loud speaker is included. The R.F. section of the kit is pre-assembled at the factory. This kit uses 2 IF stages, 1 limiter and 1 discriminator. Miniature tubes used throughout. Complete with tubes including beautiful bakelite cabinet, ready for assembly.

KIT MODEL 3W10, A THREE WAY PORTABLE RECEIVER

Model 3W10 operates on either AC or DC or self-contained batteries . . . power switch conveniently located on front of set so that "battery" or "AC-DC" may be selected without opening case. Five-inch Alnico 5 permanent dynamic speaker, and case covered with fine grade leatherette material. Complete with tubes, ready for assembly.

KIT MODEL B-4, A FOUR-TUBE PORTABLE RECEIVER

Model B-4 is our new 4-tube portable receiver which operates on self-contained batteries. Approximate size: 8 x 6 $\frac{3}{4}$ x 4. Uses the following tubes: 1R5, 1U4, 1S5 and 3S4. Power switch is conveniently located on front of set. Alnico 5 permanent magnet dynamic speaker. Case covered with fine grade leatherette material. Complete with tubes, ready for assembly.

Service Guarantee

1. Set is guaranteed to operate satisfactorily if directions are followed exactly.
2. If set fails to operate satisfactorily it may be returned to the Service Center for repairs.

All kits accompanied by a detailed, illustrated instruction sheet.
Many Other Kit Models Available. Write for Catalog C.

RADIO'S MASTER

ESPEYMANUFACTURING CO. INC.
NEW YORK 21, NEW YORK

ESTABLISHED 1928

**Model 511 — AM-FM RADIO CHASSIS***A Low-Priced Replacement Chassis.
Fits All Types of Console Cabinets.***DEALER - SERVICEMAN Net \$98.00**

I. Model 511 is a Superheterodyne AM-FM Radio Receiver chassis designed to operate on: 105-125 volts AC; 50/60 cycles. Power consumption: 85 watts.

II. FEATURES: 1. AC Superheterodyne AM-FM receiver. — 2. Improved Frequency Modulation Circuit, Drift Compensated. — 3. 12 Tubes plus Rectifier and Tuning Indicator. — 4. 3 Dual Purpose Tubes give added performance. — 5. Treble Tone Control. — 6. 6-Gang Tuning Condenser. — 7. Full-range Bass Tone Control. — 8. High-Fidelity AM-FM Reception. — 9. Automatic Volume Control. — 10. 13-watt (maximum) Push-Pull Audio Output. — 11. 12-inch PM Speaker with Alnico V Magnet, 25 watts. — 12. — Indirectly Illuminated "Slide-Rule" Dial. — 13. Antenna for AM and Folded Dipole Antenna for FM reception. — 14. Provisions for external antennas. — 15. Wired for Phonograph Operations. — 16. Licensed under RCA patents. — 17. RMA listed. — 18. Multi-tap Output Transformer, 3.2, 8 and 500 ohms.

III. DESCRIPTION: Model 511 receiver features the latest in post-war engineering design. The FM circuit includes a tuned RF Amplifier stage, 2 stages of high gain Intermediate Frequency Amplification and an advanced design Ratio Detector circuit which provides low noise level between stations, freedom from AM interference, ease of tuning and ample gain for satisfactory operation with an indoor antenna in most urban locations. The AM circuit includes a Tuned RF Amplifier for improved selectivity and freedom from spurious responses. High Fidelity reproduction on FM and AM is insured through well-engineered circuits and the use of high quality parts. The tuning ranges are: Standard Broadcast — 535 to 1720 Kc. FM Band — 88 to 108 Mc.

The large easy-to-read "slide-rule" type dial is illuminated by two pilot lights which also provide illumination for the red plastic dial pointer. A high ratio flywheel drive on the tuning condenser provides smooth tuning throughout the range of the receiver.

The receiver has two antennas; a Loop antenna for Standard Broadcast and a Folded Dipole antenna for the FM band. Provision is made for connecting an external Phonograph Pickup to the high-fidelity audio amplifier system of the receiver. The Multi-tap output transformer will permit the use of Most Popular Type Hi-Fidelity Speakers and dividing networks, or to match a standard 500-ohm line for Remote installations.

IV. TUBE COMPLEMENT: 1 AM-RF Amplifier tube. — 1 FM-RF Amplifier tube. — 1 AM Oscillator, Mixer tube. — 1 IF Amplifier tube. — 1 FM Detector Driver tube. — 1 FM Detector tube. — 1 FM Oscillator tube. — 1 FM Mixer tube. — 1 AM Detector, Audio Amplifier tube. — 1 Audio Amplifier-Inverter tube. — 2 Push-Pull Power Amplifier tube. — 1 Rectifier tube. — 1 Electron Ray Tuning Indicator tube.

V. ACCESSORIES: The Model 511 chassis is supplied ready to operate, complete with tubes, antennas, speaker and all necessary hardware for mounting in a table cabinet or console, including escutcheon.

VI. CHASSIS DIMENSIONS AND WEIGHT: Chassis Dimensions: 13½" wide x 8½" high x 10" deep. Carton Dimensions: (2 units) 20" x 14¼" x 10¾". Net Weight: 16½ lbs. each.

**Model 512 — AM-FM TUNER***Outstanding AM-FM TUNER, self-powered
for use with all types of Audio Amplifiers.***DEALER - SERVICEMAN Net \$82.15**

I. Model 512 Superheterodyne AM-FM Radio Tuner chassis is designed to operate on: 105-125 volts AC; 50/60 cycles. Power Consumption: 66 watts.

II. FEATURES: 1. AC Superheterodyne AM-FM tuning circuit. — 2. Improved Frequency Modulation Circuit, drift compensated. — 3. 9 Tubes plus Rectifier and Tuning Indicator. — 4. 3 Dual Purpose Tubes give added performance. — 5. Automatic Volume Control. — 6. 6-Gang Tuning Condenser. — 7. High-Fidelity AM-FM Reception. — 8. Indirectly Illuminated "Slide-Rule" Dial. — 9. Antenna for AM and Folded Dipole Antenna for FM Reception. — 10. Provisions for external antennas. — 11. Wired for Phonograph Operations. — 12. Licensed under RCA patents. — 13. RMA listed. — 14. High and Low Level Audio Output. — 15. Utility Socket provides power for magnetic reluctance pickup pre-amplifier.

III. DESCRIPTION: Model 512 Tuner features the latest in post-war engineering design. The FM circuit includes the tuned RF Amplifier stage, 2 stages of high-gain Intermediate Frequency Amplification, and an advanced design Ratio Detector circuit which provides low noise level between stations, freedom from AM interference, ease of tuning and ample gain for satisfactory operation with an indoor antenna. The AM circuit includes a Tuned RF Amplifier for improved selectivity and freedom from spurious responses. High-Fidelity reproduction on FM and AM is insured through well-engineered circuits and high-quality parts.

Line Voltage is made available at two outlets at the rear of the tuner; these are actuated by the tuner on-off switch. To facilitate custom installations, B+ and Heater Voltages are made available at a utility socket mounted in the tuner. This is suitable for powering auxiliary pre-amplifiers as used with variable reluctance type pickups. Holes for 2 additional controls are available for the convenience of the user. The tuning ranges are: Standard Broadcast — 535 to 1720 Kc. FM Band — 88 to 108 Mc. The receiver has two antennas; a Loop antenna for Standard Broadcast and a Folded Dipole antenna for the FM Band. Provision is made for connecting an external phonograph pickup to the tuner audio system, for use with all types of amplifier installations. Two audio output channels are provided, one at high level, the other at low level; both are controlled by the tuner volume control.

IV. TUBE COMPLEMENT: 1 AM-RF Amplifier tube. — 1 FM-RF Amplifier tube. — 1 AM Oscillator, Mixer tube. — 1 FM Detector Driver tube. — 1 IF Amplifier tube. — 1 FM Detector tube. — 1 FM Oscillator tube. — 1 FM Mixer tube. — 1 AM Detector, Audio Amplifier tube. — 1 Electron Ray Tuning Indicator tube. — 1 Rectifier tube.

V. ACCESSORIES: Model 512 chassis is supplied ready to operate, complete with tubes, antennas, and all necessary hardware for mounting in a table cabinet or console, including escutcheon.

VI. CHASSIS DIMENSIONS AND WEIGHT: Chassis Dimensions: 13½" wide x 8½" high x 9" deep. Carton Dimensions: (2 units) 20" x 14¼" x 10¾". Net Weight: 14 lbs.

Model 513

I. FEATURES:

1. Superheterodyne AM-FM circuit.
2. Improved Frequency Modulation Circuit, stabilized against drift.
3. 10 Tubes plus Tuning Indicator.
4. Tuned RF Circuits on AM and FM.
5. 6-Gang Variable Tuning Condenser.
6. Automatic Volume Control.
7. Full Range Bass Boost Control.
8. Full Range Treble Control.
9. Indirectly Illuminated "Slide-Rule" Dial.
10. Fly Wheel Tuning Drive.
11. Antenna for AM and Folded Dipole Antenna for FM.
12. Provision for external antennas.
13. Wired for Phonograph Operation.
14. Utility Socket provides power for magnetic reluctance pickup pre-amplifier.
15. Licensed under RCA.
16. RMA listed.

II. Model 513 AM-FM Tuner employs 10 tubes plus a tuning indicator tube in a superheterodyne circuit. It is designed to operate from an external power supply and feed into an external audio amplifier. (Model 514 DeLuxe Power Supply-Audio Amplifier is specifically designed to work in conjunction with the Model 513 Tuner.) The power requirements for the tuner are 6.3 volts AC or DC at 3.5 amperes, and 200 volts DC at 60 milliamperes.

III. DESCRIPTION: The Model 513 Tuner incorporates the latest developments in engineering design. It is intended for the discriminating listener. Separate, Tuned RF stages are employed on both the AM and FM bands to provide extreme sensitivity and minimize spurious responses. The FM circuit also includes two stages of high-gain intermediate frequency amplification to drive a ratio detector circuit of advanced design. AM: 535 Kc. to 1720 Kc. — FM: 88 Mc. to 108 Mc.

IV. TUBE COMPLEMENT: 1 6BA6 AM-RF Amplifier tube. — 1 6BA6 FM-RF Amplifier tube. — 1 6BE6 AM Converter tube. — 1 6BE6 FM Mixer tube. — 1 6C4 Oscillator tube. — 1 6SG7 AM-FM IF Amplifier tube. — 1 6SH7 FM-Ratio Detector Driver tube. — 1 6J5 AM-Detector AVC tube. — 1 6SQ7 AM-FM 1st Audio tube. — 1 6AL5 FM Ratio Detector tube. — 1 6U5 Tuning Detector tube.

V. CHASSIS DIMENSIONS: 13½" wide x 8½" high x 9" deep. Weight: 9½ lbs.

Model 514 Amplifier & Power Supply.

Model 513 AM-FM Tuner.

Model 514

I. Model 514 DeLuxe Power Supply and Audio Amplifier contains 6 tubes, plus 2 rectifiers in a high gain push-pull amplifier circuit. It is designed specifically for use in conjunction with the Model 513 Tuner, but may be used wherever a high quality audio amplifier may be required. Power requirements are: 105/125 volts AC; 50/60 cycles; power consumption: approximately 15w watts.

II. FEATURES:

1. Parallel Push-Pull Output Circuit.
2. Self-Balanced Phase Inverter System.
3. Extended Range High-Fidelity Response.
4. Inverse Feedback Circuit.
5. 6 Tubes plus 2 Rectifiers.
6. Output Impedance selective for any speaker requirement (4 to 500 ohms).
7. License under RCA.
8. RMA listed.

III. DESCRIPTION: The Model 514 Power Supply-Audio Amplifier employs the best in proven engineering design. Six tubes are incorporated in a balanced phase inverter parallel push-pull amplifier. By the use of an inverse feedback circuit, high-fidelity performance is obtained.

IV. TUBE COMPLEMENT:
2 6J5 Audio Driver tubes. —
4 6V6 Audio Output tubes.
— 2 5Y3 Rectifier tubes.

V. 13½" wide x 7½" high x
7" deep. Weight 18 lbs.

TRANSVISION

TELEVISION and F.M. KITS and COMPONENTS

NEW... Sensational TRANSVISION Development offers LARGE-IMAGE DIRECT-VIEW TELEVISION at low cost!

BIGGEST VALUE in TELEVISION

Model 10BL TELEVISION KIT with F.M. Radio . . . Features Beautiful CABINET with BUILT-IN LENS . . . Gives LARGE 120 Square Inch Picture

Rotopicture effect: Picture "rotates," giving the appearance of being in focus and clearly visible from every angle! Uses 10" Electromagnetic Direct-view Picture Tube.

Features new-type cabinet with built-in lens which magnifies, clarifies and heightens contrast of the picture. The lens also creates the effect of apparent rotation of the picture, so that when the observer moves, the picture still seems to be in focus and clearly visible from any angle.

ECONOMICAL KIT, EASY TO ASSEMBLE. In point of value, this Television Kit provides the opportunity of acquiring a LARGE-IMAGE direct-view television set at a VERY LOW PRICE; also very economical from a tube replacement angle. This model is available in KIT FORM, for easy assembly; no technical knowledge required. Simple step-by-step instructions are included. Saves as much as 50% over the cost of receivers with similar picture magnitude.

MODEL 10BL

TECHNICAL DATA: Model 10BL uses a 10" Electromagnetic Direct-view Picture Tube; has complete F.M. Radio which comes completely factory-wired; receives all channels in any area; supplied complete with antenna and lead-in wire. The LENS is 15" x 11", giving a picture size of approx. 10" x 12" or 120 sq. in.; the highly-styled cabinet measures 26" wide x 17" high x 19" deep, available in Mahogany, Walnut, or Blonde finishes.

PRICE: Transvision MODEL 10BL Television Kit, with F.M., 10" tube, cabinet with built-in lens antenna, 60 ft. lead-in wire . . . NET \$299.00

Scoop!

New Revolutionary MODEL 7BL Television Kit with Specially Designed CABINET with BUILT-IN LENS

- Uses 7" Electrostatic Picture Tube
- Gives 50 square inch picture of superior quality

FEATURES: Though it has a 7" tube, the effect is equivalent to a 10" set because the built in lens magnifies the picture. Also picture performance is superior because the lens clarifies and heightens contrast of the image. Picture "rotates" apparently, as the observer moves, giving the effect of always facing the observer. This is effective to a very wide angle. Pre-tuned for 5 channels.

PRICE: Including cabinet with built-in lens, antenna, 60 ft. of lead-in wire. . . . NET \$189.00

MODEL 7CL — same as 7BL except that it is a Console/ette with Rotopicture feature. **PRICE:** including cabinet NET \$199.00

CRYSTALS AND CRYSTAL CONTROLLED OSCILLATORS

CCO — CRYSTAL CONTROLLED OSCILLATOR — MODEL 2A

For 2-6-10-11 Meters

With this basic oscillator, employing a 6AG7 tube, the advantages of VHF crystal control are easily achieved. Has direct output on 6-10-11 meters and ample output to drive tripler stage on 2 meters. Single tuning control, bandswitch and crystal socket are mounted on outside of painted metal subchassis with power and output

terminals at back. Uses Bliley AX2 20-meter crystals for output on 10 and 11 meters, new Bliley AX3 crystals for 6 and 2 meter operation. Ideal as nucleus for new construction or conversion of existing equipment.

Supplied less tube and crystal \$9.95

AMATEUR FREQUENCY CRYSTALS

TYPE AX2

These high stability advanced design crystals are plated to insure long term precision and reliability. Calibrated to $\pm .002\%$ with drift less than .0002% per degree Centigrade. Holder pins spaced on .486" centers.

Supplied	Range	Price
± 2 Kc	3500— 4000 Kc	\$2.80
± 2 Kc	7000— 7425 Kc	2.80
± 30 Kc	12500—13500 Kc	3.95
± 30 Kc	13580—13714 Kc	3.95
± 30 Kc	14000—14850 Kc	3.95

TYPE MC9 3105 Kc

This unit is suggested for use in private aircraft transmitters operating at 3105 Kc. The crystal is guaranteed to be within $\pm .02\%$ of 3105 Kc at any temperature between 0° C and 50° C and is factory tested for performance over this temperature range. Plug-in type holder is gasket sealed against moisture and humidity.

Price \$5.50

TYPE VX2 3105 Kc

Designed for applications where space is at a premium, this unit is recommended for private aircraft communication at 3105 Kc. Guaranteed to maintain frequency within $\pm .02\%$ at any temperature between 0° C and 50° C. Solder lug connections permit mounting under chassis and assembly is gasket sealed against moisture and humidity.

Price \$5.00

TYPE AX3

A new third overtone crystal unit produced for use in the Bliley CCO-2A. Has exceptionally high activity at operating frequency. Calibration accurate to $\pm .003\%$ in CCO-2A with drift less than .0002% per degree Centigrade. Plated crystal is mounted in gasket sealed holder with pins spaced .486" centers.

Supplied	Range	Price
± 5 Kc	24000—24333 Kc	\$3.95
± 5 Kc	25000—25500 Kc	3.95

TYPE KV3 100 Kc

A precision crystal designed for use in secondary standards. Crystal is silver plated and mounted between wire supports which are soldered to the plated surfaces. Exceptionally low drift crystal is adjustable to exactly 100 Kc at 25° C when used in recommended oscillator circuit.

Price \$6.95

TYPE CF6 455 Kc

Single signal filter crystal unit. Exceptionally low holder capacity permits sharp signal discrimination in filter network of general communications receivers. Frequency 455 Kc free from spurious responses within ± 7 Kc.

Price \$4.50

TYPE CF3 455 Kc

Single signal filter crystal unit. Frequency 455 Kc, ± 5 Kc—free from spurious responses within ± 7 Kc of fundamental. Designed for intermediate frequency filter in general communications receivers.

Price \$5.00

TYPE SMC100 100-1000 Kc

Dual frequency crystal provides either 100 Kc or 1000 Kc frequency source. When used in recommended oscillator circuit 1000 Kc frequency is within $\pm .05\%$ at 25° C and 100 Kc frequency can be adjusted to zero beat at 25° C. Suggested for signal generators used in alignment of radio receivers.

Price \$8.75

For complete dimensional information consult Bulletin 35 available at any Bliley distributor.

Bliley CCO

CRYSTAL
CONTROLLED OSCILLATOR

MODEL 1C

For instant channel selection and frequency accuracy, radio service technicians use this Bliley test instrument.

It provides direct crystal control for i-f alignment. Write for descriptive Bulletin 32.

Complete with 7 Bliley crystals, tubes and concentric output cable \$69.50

CHECK SUPERIORITY OF PR Crystals

Stability . . .

Drift characteristics of PR Crystals limited to less than 2 cycles per MC per degree. You get low drift, combined with high output, dependable frequency control. X-Ray orientation guarantees uniform cut for maximum low-drift performance.

Accuracy . . .

Guaranteed accurate within .01 per cent of specified frequency or better. When doubling and quadrupling accuracy is absolutely essential. You KNOW where you are with PRs.

Power Output . . .

PRs are designed to give maximum power output from the exciter stage when operating at the highest permissible voltages. PR Crystals can "take it."

Activity . . .

PRs give you high activity. They "come in" instantly on phone . . . key without chirps, even at high bug speeds, without excessive "backing off."

Unconditional Guarantee . . .

Every PR Precision CRYSTAL is guaranteed unconditionally, by the makers of fine crystals since 1934.

Crystals for the Critical

JK "Stabilized" Crystals are produced by the most modern methods known to the science of crystal manufacture. Our process known as "Stabilizing" absolutely prevents frequency shifts due to aging in use or on the shelf. "Stabilized" Crystals are thus your assurance of better and longer crystal performance.

FOR ALL APPLICATIONS

To meet your requirements—or wishes—The James Knights Company is completely equipped to cut crystalline quartz into any shape and size for any application.

For those who prefer to finish their own communications crystals, blanks can be supplied in any cut, size and thickness. For those who desire complete frequency control units, The James Knights Company specializes in custom built crystals manufactured to any specifications.

We can readily cut crystalline quartz to fit any application for supersonic equipment, measuring and testing instruments, no matter how intricate or difficult.

MALLORY ROTARY SWITCHES

1200L · 1300L Multi-Section Rotary Switches

APPLICATION—Ideally suited for test equipment, meter switching, and low current switching in industrial applications, including machine tool equipment. Also miscellaneous electronic devices, such as medical equipment, navigation instruments, and radar.

DESCRIPTION—All contacting members are silver plated, except rotor contact slugs, which are solid silver. This insures low contact resistance. The high lift of the contact springs provides a wiping and self-cleaning action to insure good electrical contact. The index spring, made of durable phosphor-bronze reinforced with web, prevents fracture failure and insures long-life operation.

An adjustable stop feature permits selection of the desired number of positions for extremely flexible use. The insulation used in all sections is high-grade phenolic resin. All switches supplied with $\frac{3}{8}$ " diameter, $\frac{3}{8}$ " long brass bushing, and 2" long shaft, grooved for easy cutting at popular lengths.

All switches have $\frac{1}{2}$ " spacing between sections, excepting the three and four-section, which have 1" spacing. If closer spacing is required between sections, the switch can be dis-assembled and spacers cut to proper length.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch. See Miscellaneous Items section for Dial Plates.

PACKAGING One switch and accessories per display carton.

*These switches are provided with an "off" position which is in addition to the number of positions listed in the fifth column.

3100J · 3200J Single Section Rotary Switches

APPLICATION—For use in small receivers as tone controls, band selector and antennae switching; also ideal for meter switching in test equipment and many other electronic devices where space is at a premium.

DESCRIPTION—Available in single section only, and in two sizes: $1\frac{1}{4}$ " diameter, 30° indexing, and $1\frac{1}{16}$ " diameter, 20° indexing. All combinations made in both shorting and positive non-shorting action. The $1\frac{1}{16}$ " base switch is available with the adjustable stop feature. High quality XXX grade of phenolic resin insulation conforming to JAN specifications is used. All switches supplied with $\frac{3}{8}$ " diameter, $\frac{3}{8}$ " long brass bushing and 2" long shaft grooved for easy cutting at popular lengths.

3100J-3200J SERIES

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch. See Miscellaneous Items section for Dial Plates.

PACKAGING—One switch and accessories per display carton.

MALLORY SELECTOR, TAP AND LEVER ACTION SWITCHES

170C Ceramic Section Selector Switches

APPLICATION—These switches are ideal for highly efficient critical radio frequency circuit applications. Suitable for radio receivers and low-power transmitter circuits. They find widespread use in laboratories, by manufacturers of transmitters, receivers, test equipment and other electronic apparatus, and by experimenters and amateurs.

DESCRIPTION—Ceramic insulation minimizes RF losses and retards moisture absorption. Indexing mechanism is the "hill-and-valley" type providing a definite "snap" indexing action. An adjustable stop feature is designed into the index assembly to permit a choice of 2 to 11 positions. All current-carrying parts are heavily silver-plated. The contacts are of the double-wiping, self-cleaning type, which insures low contact resistance over an extended temperature range. All switches supplied with $\frac{3}{8}$ " diameter, $\frac{3}{8}$ " long brass bushing and 2" long shaft grooved for easy cutting at popular lengths.

The two-section switch has $\frac{1}{2}$ " spacing between sections. The three-section switch has 1" spacing.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch.

PACKAGING—One switch and accessories per display carton.

5000 · 6000 · 7000 Lever Action Switches • Positive Indexing and Spring Return

APPLICATION—These switches are particularly adapted to centralized radio, sound distribution, public address equipment, and intercommunication equipment for school installations of loud-speaker systems and office communication systems.

DESCRIPTION—The housing and mounting bracket of these switches are one integral part, which assures rigidity, and the design lends itself to the support of the section, thus preventing warping of the section or distortion in alignment of contacts. A smooth contact surface is guaranteed by the use of the exclusive Mallory "wrap-around" method of securing the terminal through the holes in the phenolic resin section. The phenolic resin is high grade for maximum insulation. The 5000 series have elongated mounting holes in the bracket, spaced from $2\frac{3}{16}$ " to $2\frac{3}{8}$ " apart. The 6000 and 7000 series have mounting brackets with round holes spaced $1\frac{5}{8}$ " apart. Switches may be mounted singly or grouped in multiple mounting with $\frac{3}{4}$ " between lever arm centers to facilitate conventional rack and panel installations.

ACCESSORIES—One knob, two 6-32 bolts and nuts are furnished with each switch.

PACKAGING—One switch and accessories per display carton.

13124L

24-Point Non-Shorting Tap Switch

APPLICATION—This switch is particularly useful in test equipment applications where more than the conventional 12-point switch is required.

DESCRIPTION—The single circuit 24-point is accomplished through the use of two sections similar in design to the 1300L series switch. The indexing mechanism has no stops and is capable of continuous rotation with a 15° indexing action between positions. Furnished with $\frac{3}{8}$ " diameter, $\frac{3}{8}$ " long brass bushing and 2" long notched shaft.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, one No. 227 lock washer, and one No. 394 Mallory Dial Plate furnished with each switch.

PACKAGING—One switch and accessories per display carton.

MALLORY CIRCUIT-OPENING, "HAM", AND PUSHBUTTON SWITCHES

1400L Circuit-Opening Switch

APPLICATION—This switch has found wide application in the construction of test sets, tube checkers, analyzers, and other apparatus where it is desirable to use only one meter.

DESCRIPTION—This is a special design of the series 1200L switch to provide for wiring of multiplying resistors to the switch, so that the switch not only opens the line but also automatically cuts in the proper multiplying resistor. The switch employs the standard 30° index, and is supplied with 3/8" diameter, 3/8" long brass bushing and a 2" long shaft grooved for easy cutting to proper lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, one No. 227 lock washer, and one No. 382 Mallory etched Dial Plate.

PACKAGING—One switch and accessories per display carton.

151L "Hamswitch"* Two-Section • Five- Position Switch

APPLICATION—This switch provides a method of using a single meter to measure current or voltages up to and including 5 circuits of an amateur transmitter.

DESCRIPTION—This switch has the basic design of the 1200L series switch. It is of two-section construction with 2 1/4" spacing between sections to permit multiplying resistors to be soldered directly to the switch terminals. High insulating qualities and low loss construction permit a conservative rating of 1000 volts RMS AC or 1500 volts DC. 60° indexing between positions and provided with the adjustable stop feature, giving a maximum of 5 positions. Supplied with 3/8" diameter, 3/8" long brass bushing and 2" long shaft grooved for easy cutting at popular lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 237 nut and one No. 227 lock washer, furnished with each switch.

Refer to page 55 for special dial plate No. 487.

PACKAGING—One switch and accessories per display carton.

152L "Hamswitch" • Two- Section • Two-Circuit • Six-Position Switch

APPLICATION—Where all unused terminals are to be connected together and automatically shorted out.

DESCRIPTION—This switch is of the basic design of series 170C, excepting a phenolic resin insulation is used in the two-section assembly. Through the use of the 330° shorting shoes, all unused terminals are automatically connected. The spacing between sections is 1 1/2". Switch is supplied with adjustable stop feature for 2 to 6 positions. Supplied with 3/8" diameter, 3/8" long brass bushing and 2" long shaft grooved for easy cutting at popular lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lockwasher furnished with each switch.

PACKAGING—One switch and accessories per display carton.

*Reg. U. S. Pat. Off.

2100 Multiple Push-Button Switches

APPLICATION—This switch is ideal for applications requiring a device for making, breaking, or transferring multiple circuits in automatic station selector tuning, inter-office communication systems, telephone and annunciator systems, set analyzers, tube checkers, and multimeters.

DESCRIPTION—Available from four to eight buttons with 3/8" spacing between center lines of plungers. Each plunger actuates a phenolic resin slider supporting the various combinations of shoes which engage the stationary contacts. Arrangement of the plunger and latch bar mechanism provides an inter-locking action whereby one or more plungers may be pressed simultaneously, and will remain latched until released by depressing another plunger. Available in both shorting and non-shorting types, and with contact arrangement for both circuit closing and circuit transfer.

ACCESSORIES—Each switch furnished with brown phenolic resin knobs, one attractive statuary bronze escutcheon plate with blank designation inserts, and transparent strip for windows.

PACKAGING—One switch and accessories per display carton.

160C Ceramic Section • "Hamband" Switches

APPLICATION—For transmitter band switching of low power transmitter circuits.

DESCRIPTION—A special ceramic switch designed for transmitter plate circuits using up to 1000 volts DC with power up to 100 watts inclusive. Ceramic insulation is employed in both the section and spacers between sections to obtain highest insulation qualities, and to provide low losses at high frequencies. Available in one to five sections, with each section having one circuit, 90° indexing between positions, and capable of continuous rotation. Supplied with 3/8" diameter, 3/8" long brass bushing and 2" long shaft grooved for easy cutting at popular lengths.

ACCESSORIES—One Mallory No. 366 knob, one No. 232 nut, and one No. 227 lock washer furnished with each switch.

Refer to Mallory page 9, Special Components, for special dial plate No. 488.

PACKAGING—One switch and accessories per display carton.

MALLORY PUSH-BUTTON AND JACK SWITCHES

2000
Single Push-Button
Switches

STANDARD

JUNIOR

JACK SWITCHES Standard and Junior

APPLICATION—Ideally suited for use in laboratories, test panels, meter circuits, and other equipment where variable circuit combinations are accomplished through the leaf spring type assembly.

DESCRIPTION—The Standard Jack (or long frame type) may be used where space is no factor, as the frame extends straight back from panel mounting. The spring stack is assembled on a horizontal line with the frame. Constructed with knob and shaft that rotates through the bushing, operating a cam to actuate the spring which accomplishes the circuit switching.

The Junior Jack (or short frame type) is made with the frame supporting the spring stack at right angles. Because of the short springs used, it requires a minimum of space for mounting. The actuation of the springs is the same as for the Standard Switch. Frames on both Standard and Junior types are cadmium plated. Brass bushings and phosphor bronze springs are nickel plated. The fine silver contacts insure good electrical and low resistance contact. Both switch types are suitable for mounting in a single hole $\frac{7}{16}$ " diameter on panels up to $\frac{1}{4}$ " thick.

ACCESSORIES—One Mallory black phenolic resin knob, one No. 232 nut, and one No. 225 washer furnished with each switch.

PACKAGING—One switch and accessories per display carton.

Two Position		Circuit Arrangement
Standard	Junior

32	732	Single-Pole, Double-Throw Center off Position
62	762	Double-Pole, Double-Throw Center off Position
63	763	Three-Pole, Double-Throw Center off Position
64	764	Four-Pole, Double-Throw Center off Position

APPLICATION—These switches are ideal for a wide variety of applications requiring momentary or permanent contact. Especially adapted for use in laboratories, on test panels, in meter circuits, etc.

DESCRIPTION—Eight different circuit combinations available in either the locking or non-locking types. The locking types keep the circuit closed until the button is pulled out. The non-locking types maintain contact only while the button is held in the depressed position. Excellent electrical characteristics are achieved through the use of the phosphor bronze contact springs and the low resistance silver-plated contacts. The switch frame is steel cadmium plated, and the mounting bushing is nickel plated brass. Will mount in single hole $\frac{7}{16}$ " diameter on panels up to $\frac{1}{4}$ " thick.

ACCESSORIES—One polished phenolic resin knob, one Mallory 232 nut and one No. 225 washer furnished with each switch.

PACKAGING—One switch and accessories per display carton.

MALLORY JACKS

JACKS Long Frame, Junior, and Midget

APPLICATION—These jacks provide a conventional receptacle where it is desirable to open or close auxiliary circuits by use of a combination of spring assemblies actuated by insertion of connection plugs. Excellent for head sets, hand sets, or microphone cord and plug connections, for meter testing cord and plug connections, or as a receptacle for any device where desirable to connect or disconnect by cord and plug.

DESCRIPTION—The long frame jacks are provided with a variety of spring combinations. The spring stackups are mounted horizontally to the frame. The jack is designed to mount in a single $\frac{3}{8}$ " hole in panels up to $\frac{5}{16}$ " thick. Fits all standard Mallory plugs of two and three conductor types.

The Junior Jack (sometimes called "short frame" jack) is made with the frame supporting the spring stack at a right angle with the short springs requiring only $1\frac{5}{16}$ " space back of panel for mounting. Bushings are made to mount in single $\frac{3}{8}$ " diameter holes in panels up to $\frac{5}{16}$ " thick. Fits all standard Mallory plugs.

The Midget Jack is very compact (with shorter frame and springs than the Junior types), being extremely useful where bare minimums of space exist. Will mount in a single $\frac{3}{8}$ " diameter hole in panels up to $\frac{1}{4}$ " thick.

The Infant Jack (sometimes referred to as a "pup" jack) is the smallest single circuit jack manufactured to accommodate the conventional 2-way phone plug tip and sleeve connection.

All jacks are made with cadmium-plated frames. Brass bushings and phosphor bronze springs are nickel plated. Fine silver contacts provide a jack with excellent electrical contact and low-contact resistance.

ACCESSORIES—One Mallory No. 232 nut and one No. 225 washer furnished with each long frame Junior and A-1 (Infant) Jack. Two nuts and one washer furnished with all Midget Jacks.

PACKAGING—One switch and accessories per display carton.

MALLORY JACKS AND PLUGS

Cat. No.	Type
XP1	(Open Circuit)
XP2B	(Three-Circuit Microphone)
XP3B	(Single Circuit, Make before Break)

JACKS Type XP • Long Frame

APPLICATION—Ideal for telephone switchboard types of applications, as well as industrial applications where a more compact jack is required for close strip panel mounting.

DESCRIPTION—Although limited to three circuit combinations, these jacks serve the same purpose as the Mallory Standard Long Frame Jacks, but employ a special frame angle to provide greater support. The bushing is plain, unthreaded, and the jack is mounted by means of a screw through the panel mounting plate at the base of the bushing. Bushing fits all standard Mallory plugs of two and three conductor types. The springs are assembled horizontally to the frame. The frames are steel cadmium plated. Brass bushings and phosphor bronze springs are nickel plated. The fine silver contacts provide an excellent electrical contact and low contact resistance.

ACCESSORIES—None furnished.

PACKAGING—One jack per display carton.

SC JACKS Signal Corps Type

No. SC-1A Phone Jack—Equivalent of Signal Corps Jack No. JK-34A. Same spring arrangement as No. 1 Long Frame Jack. Designed to receive following plugs: Mallory No. 75, Western Electric Nos. 47A and 47B; Signal Corps Nos. PL-47, PL-48, PL-55, PL-148, PL-155.

No. SCA-2B Microphone Jack—Equivalent of Signal Corps Jack No. JK-33A. Same spring arrangement as No. 2B Long Frame Jack. Designed to receive following plugs: Western Electric No. 109 and Signal Corps Nos. PL-46, PL-68 and PL-168.

SMALL SWITCHES, LIMIT SWITCHES, AND MAGNETIC RELAYS

SMALL SNAP-ACTION SWITCH, G-E SWITCHETTE CR1070-C103

This new, lightweight switch mechanism lends itself especially to applications where space is limited and long life is required.

The Switchette is operated by movement of the spring-return button located in the housing. This button can be actuated by a lever, bellows, or other means. Snap-action, double-break-contact construction gives the G-E Switchette a high current rating and makes it suitable for applications where the vibration is severe.

FEATURES AND ADVANTAGES

1. Small (approximately 1 1/4 in. by 1/2 in. by 1/2 in.) and weighs only 9 grams (0.02 lb).
2. Resists vibration and corrosion.
3. Phenolic-resin operating button provides safety from live parts during operation.
4. Contact tips are 99.95 per cent pure silver.
5. Particularly suited to electronic applications because of negligible amount of contact bounce.
6. Two terminal arrangements are available, as shown above.
7. Wide variety of forms available, for example, three basic contact arrangements: single-circuit, normally open; single-circuit, normally closed; and two-circuit, normally open and normally closed. Also many special forms.

Switchettes are available in ratings up to 10 amperes at 115 or 230 volts a-c. Write for Bulletin GEA-4888.

Switchettes having two terminal arrangements

LIMIT SWITCH, CR1070-D112

This sturdy, open-type limit switch is operated by a plunger which provides 1/2-inch overtravel. The contact mechanism of this device is the G-E Switchette, which can be wired to control one normally open circuit and one normally closed circuit. Rated 10 amperes at 230 volts a-c. Write for Bulletin GEC-197.

Open-type limit switch with push-rod operation

MAGNETIC RELAY, CR2790-E

The CR2790 relay is a compact, attractively finished device for use either as a motor starter or a relaying unit. Available in either an open form or enclosed in a general-purpose housing. Three contact arrangements available: single-pole, single-throw; double-pole, single-throw; and double-pole, double-throw. In the open form, all three contact arrangements use the same base, which facilitates mounting. In the enclosed form, the U-shaped cover makes wiring and servicing convenient. Rated 10 amp. continuous, 110/120 volts a-c.

Applications

Control of pilot circuits in response to remote control switch or thermostat, or for direct control of small motors.

As a fractional-horsepower motor starter, or in conjunction with a magnetic switch controlling larger motors, heating or lighting circuits, and signal systems.

Enclosed magnetic relay

Enclosed relay with cover removed

CONTROLS

MIDGET LEVER SWITCH Model MCM

A compact, lightweight switch designed for long life and trouble-free service under heavy duty requirements. Any combination of the contact forms shown below can be furnished, with locking or non-locking action. Both 2 and 3-position action are available. Total weight with 12 contact springs is 3 1/2 ounces. Contact rating: 5 amps., 125 volts, 60 cycles (non-inductive load). Breakdown-tested to withstand 2500 volts, 60 cycles, between contact springs and frame.

FOOT SWITCH — Model MI

- Automatic Return
- Push on — push off
- Two-stage control

Provides any type of single-pole single-throw or double-throw switch action, in any of the three actions, with DPDT switching in the automatic return action. Adjustable throw. Cast iron case 4" wide by 6 3/8" long. Standard BX connection fitting at front of base. Ratings: motor load 1/3 HP at 115/230 volts a-c; lamp load 500 watts 115 volts a-c or 100 watts 115 volts d-c; heater load 10 amps., 115 volts or 5 amps., 230 volts a-c.

Automatic Return Push On — Push Off Two-Stage

MI-17HD	12.50				

MASTER PUSH-BUTTON SWITCH Model MPB

A single unit type push-button switch with high power handling ability to give direct push-button control without relays. Furnished in from two to a maximum of twelve positions. Standard frames are: (1) locking, (2) non-locking, (3) release-lock, and (4) accumulative locking with single-button release. Pure silver contacts, phosphor bronze springs. Rating: 5 amps., 125 volts a-c (non-ind.).

HEAVY DUTY ELECTRONIC TIMERS

Convenient and compact units for either full or semi-automatic control of industrial processes. Two or more timers control a number of individually timed operations in a pre-determined sequence with either self-recycling or manual recycling. Handle 10 amps. at 125 volts, 60 cycles, on DPDT power control contacts. Five

ranges: 0.06-1.2, 1/2-8, 3/4-15, 1.5-30, and 3-60 seconds. Plug-in capacitors give ready selection of timing range. Adaptable to use as photoelectric or sensitive relay in non-timing use.

"TOUCH-CONTROL" SWITCH START • STOP • RUN • JOG • SAFETY

Pressure anywhere on the top plate of this sensitive electric switch makes or breaks the control circuit. Operates by pressure of finger, foot, hand, elbow or knee . . . its positive, snap-action contactor works in any position and requires only 3/16" throw at four pounds pressure; contact returns to normal position on release. Standard BX connectors. Cast iron case 4" diam. x 2 1/8" high, 3/16" mounting holes on 3" centers in base. Circuits: SP normally open Model MC-1 list price \$5.00; SP normally closed Model MC-2 list price \$5.00; or SPDT Model MC-3 list price \$5.50. Ratings are the same as Model MI.

Advance RELAYS

GENERAL CIRCUIT CONTROL RELAYS Alternating and Direct Current

These sturdy, compact General Circuit Controls are available for operation on both alternating and direct current—Series 100 and 200 respectively—and incorporate many superior construction features not usually found in economically priced lines. "Full Floating" armature suspension, "wiping" contacts, and more than adequate insulation are but a few of their highly desirable qualities.

The switch stacks, composed of

Dimensions—3 1/4" x 2 1/4"

die-cut, spring phosphor-bronze blades, Bakelite spacers, and hard rubber sleeving, have a break-down test of 2500 volts, and will give a lifetime of service.

Each unit, mounted on a Bakelite base and equipped with binding posts for the coil connections, is entirely "above ground" and all current carrying screws and terminals are fully counter-sunk to prevent any possibility of "short-circuiting."

PRICE CHART—For Series 100 (A.C.) and Series 200 (D.C.) Relays

The above chart, listing A.C. Relays, may also be used when ordering D.C. Relays by changing the Series Number from 100 to 200. To avoid possible errors, always specify the correct A.C. or D.C. input voltage. The Series 100 Coils are obtainable for any voltage from 1 to 115 A.C.—Series 200 Coils for any Voltage from 2 to 60 D.C. Prices for other voltages will be furnished on request.

Advance RELAYS

Isolantite model Antenna Change-Over. Designed for use in Amateur Transmitters.

The contact system is Double Pole-Double Throw, using $\frac{1}{4}$ " Pure Silver contacts, with exceptional wiping action. Three and four pole arrangements are available on special order.

For high radio frequency control. Entirely hum-

TRANSMITTER RELAYS

Type 400

free where intended for A.C. operation, and highly efficient on D.C. supplies. All metallic parts are cadmium and chromium plated.

Standard coils are for 110V A.C. and may also be used for 24V D.C. However, they will also be supplied for lower A.C. or D.C. voltages at no increase in price.

List Price \$9.90

KEYING RELAYS

Type 101K—A.C.
Type 201K—D.C.

Type 300—N.C.
Type 350—N.C.

TIME DELAY RELAYS

Designed expressly for use in Keying Circuits where it is desired to use low voltage across the key to control high voltage transmission through the Relay contacts. The heavy duty coil and strong return spring makes possible an exceptional keying speed. Two sets of $\frac{1}{4}$ " Pure Silver contacts in series allow a carrying capacity of 2500 volts. The complete unit, mounted on a $\frac{3}{16}$ " Bakelite base with binding posts for coil connections, has over-all dimensions of 3" x 2" x $1\frac{3}{8}$ " and is obtainable for A.C. operation to 115 volts or D.C. operation to 60 volts.

List Price

\$5.50

Particularly suited for use where short time delays (10 sec. to 1 min.) are required, these Relays are available with both normally open and normally closed thermostats. Types 300 and 350 respectively, the former being widely used for pre-heating tube filaments, etc. The contact combination on both models is Double Pole Single Throw with $\frac{1}{4}$ " Pure Silver contacts. Mounted on $\frac{3}{16}$ " Bakelite bases measuring $3\frac{3}{4}$ " x $2\frac{3}{8}$ " x $1\frac{1}{2}$ " with binding posts for coil connections. Standard operating voltage is 110 A.C.

List Price \$8.25

Low voltage units are available on special order.

LATCHING RELAYS

These Relays are highly desirable for applications where it is impractical to have the holding coil in constant service. When the coil actuating the contact arrangement is momentarily energized, the armature is locked in the closed position, and may be released electrically (Type 600) or manually (Type 650).

Series 600

Series 650

Type	List			Type	List
Type 604B	\$9.60	Double Pole-Double Throw	Type 654B	\$7.15
Type 605B	9.35	Double Pole-Single Throw (N. O.)	Type 655B	6.85
Type 606B	9.35	Double Pole-Single Throw (N. C.)	Type 656B	6.85

The above list prices are for $\frac{1}{4}$ " contacts. For $\frac{3}{16}$ " points deduct 25c—for $\frac{1}{8}$ " points deduct 50c. When ordering these types SPECIFY THE VOLTAGE.

Advance RELAYS

Type 700

the safety setting, the Double Pole-Single Throw $\frac{1}{4}$ " Pure Silver contacts are opened, breaking the power supply circuit until reset.

Type 700—Base dimensions 3" x 2 $\frac{1}{2}$ "	List Price	\$10.15
Type 750—Base dimensions 1" x 2 $\frac{1}{2}$ "		13.20

Type 750

OVERLOAD RELAYS

These Relays are designed to provide accurate and positive protection against current surges and continuous overloads, and both the Manual Reset (Type 700) and Electrical Reset (Type 750) are divided into two classifications: Type "A" allows the Relay to attract on any current value between 250 and 500 mills, and Type "B" for any setting between 500 mills and 1 ampere. When the current flow passes

MIDGET RELAY

Of particular interest where size and cost are factors, this new series of Midget Relays, of improved design, incorporates all of the fine construction features typical of the ADVANCE line. This unit measures only 1 $\frac{1}{2}$ " x $\frac{3}{4}$ " x 1 $\frac{1}{4}$ " high. Pure Silver contacts are used, $\frac{1}{8}$ " in diameter. Standard coils are obtainable from 2 to 32 V D.C., and 1 to 115 V A.C. The following switch combinations can be supplied:

TYPE		CONTACT COMBINATION	LIST PRICES
A.C.	D.C.		
K1505	K1605	DP-ST NOR. OPEN	\$3.25
K1506	K1606	DP-ST NOR. CLOSED	3.25
K1504	K1604	DP-DT	3.50

Series K1500 and K1600

ELECTRONIC RELAY

An ultra-sensitive unit for use in electronic tube circuits, providing positive, dependable control on as little as 12 milliwatts. Adjustment screws to change the air gap between the armature and the pole face, allow operation on a voltage differential of 30%, a condition ideal for electronic applications. The contact combination is Single Pole-Double Throw, employing $\frac{1}{8}$ " Pure Silver points to safely handle 100 watt non-inductive loads. Obtainable in resistances of 2500, 3000, 5000 and 10,000 ohms at no increase in price

List Price \$7.15

Type 850

GENERAL PURPOSE RELAYS

Types 951B — 952B — 953B

These Relays afford maximum power and efficiency at very low cost. $\frac{1}{4}$ " Pure Silver contacts are standard on the Single Pole-Single Throw (N. O.) Type 951B—Single Pole-Single Throw (N. C.)—952B—and Single Pole-Double Throw—953B—switch combinations. Adequately insulated and entirely above "ground," these Relays may be mounted on any type of panel, quickly and easily, by means of the metal mounting bracket. Coils are obtainable to 115V A. C. or 60V D. C.

List Price \$3.85

GEN-E-MOTOR STARTING RELAY

Type 951C

An exceptionally sturdy power transfer Relay, easily capable of handling the heavy current surge encountered on "cold" starts in motor-generator systems. The contacts are $\frac{3}{8}$ " Pure Silver and have ample carrying capacity for the usual 200-500V converters. Heavy-duty in every phase of construction, this unit is not to be compared with the common five and ten ampere circuit controls. Base dimensions are 3" x 2" and each unit is complete with a braided generator-cable pig-tail and binding posts for all connections. Coils for 5 $\frac{1}{2}$ to 32V D. C. or 1 to 115 A. C.

List Price \$6.60

Advance RELAYS

MIDGET TYPE CIRCUIT CONTROLS

These Relays are designed for general circuit control applications where the space for mounting is limited, and measure only 2½" in length, 1½" in width, and 1¼" in height. A.C. operated Relays in this series require but 4 watts on 50/60 cycle current, and the D. C. models from 1.5 to 2 watts, affording maximum effi-

ciency without sacrifice of power and dependability. Metal brackets (not shown in the illustration) are supplied with all Relays of this type, and except on special order, these models are limited to the following contact arrangements and the usual standard operating voltages:

Contact Combinations
 Double Pole-Double Throw
 Double Pole-Single Throw (N. O.)
 Double Pole-Single Throw (N. C.)

The above chart lists type numbers for A.C. operated Relays. D. C. coils may be obtained by changing the series number from 100 to 200. Prices apply to both.

Type Numbers		Contact Sizes and List Prices	
	3/16"	1/4"	List
	104AM	104BM	\$6.05
	105AM	105BM	5.75
	106AM	106BM	5.75

INDUSTRIAL CONTROL RELAYS

Series 960

Designed mainly for industrial applications — air conditioning, lighting, and power transfer systems, the Series 960 Relays embody all of the rugged construction features demanded in units of this

type without sacrificing the desirable qualities of the midget style. Available in the following contact combinations, and to operate on standard A. C. and D. C. voltages.

Type 964B—Double Pole-Double Throw	List \$5.50
Type 965B—Double Pole-Single Throw (N. O.)	5.20
Type 966B—Double Pole-Single Throw (N. C.)	5.20

For smaller contacts, deduct 25c for 3/16" or 50c for 1/4" points, from the above list prices.

Having the same characteristics as the Series 960 Relays, these Three Pole units, Series 970, may be used for fractional h.p. 3-phase motor controls, etc. The area required for mounting 2½" x 1¾" for Type

Series 970

970 Relays, as against 2½" x 1¼" for the Type 960's is due to the slightly larger frame. The metal brackets are the same in both instances—2-5/16" long, and 2" between centers of the 6/32 mounting holes. Available in the voltages indicated in the preceding series, and in the following contact combinations:

Type 977B—Three Pole-Single Throw (N. O.)	List \$5.75
Type 978B—Three Pole-Single Throw (N. C.)	5.75
Type 979B—Three Pole-Double Throw	6.60

For smaller contacts, deduct 50c for 3/16" or 75c for 1/4" point from the above list prices.

IMPULSE RELAYS

Series 900

This is another type of Relay for use where it is not feasible to have the holding coil in constant service, but differs from the latching types in that it may be controlled with a single push-button. Coils to operate this type of unit are

extremely heavy-duty, and are for intermittent (impulse) use only. Available for standard A. C. and D. C. voltages in the following combinations:

	D.P.S.T. List	D.P.D.T. List
With 1/4" Pure Silver contacts	\$9.35	\$9.90
With 3/16" Pure Silver contacts	9.90	10.45
With 1/4" Pure Silver contacts	10.45	11.55

When ordering these type, be sure to specify the input voltage, contact combination, and size of points.

MIDGET TYPE R.F. RELAYS

These models are sturdy, compact Double Pole - Double Throw Transmitter Relays, designed expressly for use in all types of mobile-portable communications equipment

Series 1000—A.C. Series 2000—D.C.

where space is at a premium. The insulation on this, as on the Type 400's, is isolantite for both the cross-arm and end pieces, with all holes adequately well spaced to prevent structural weakness and possible "creepage." Coils are obtainable for all A. C. and D. C. voltages, and will operate in any position, the former consuming approximately four watts—the latter, two watts of power. Dimensions are 2¾" x 1½" x 1¼".

List Price \$8.25

*All AC coils available in 25 and 60 cycles.

SERIES 200—INTERCHANGEABLE

Two basic parts—a coil assembly and a contact assembly—comprise this simple, yet versatile, relay. Coil assembly consists of coil and field piece. Contact assembly consists of switch blades, armature, return spring and mounting bracket. The new midget contact assembly, which is interchangeable with the standard assembly, is also available in either single pole, double throw, or double pole, double throw. The standard contact assembly is 2 7/8" long, 1 3/4" high, 1" wide. The midget assembly is 1 5/8" long, 1 1/2" high, 1" wide. The four contact assemblies can be used with any one of 13 coils to make a required relay. Contact points are rated at 8 amps., 115 volts, 60 cycles AC, non-inductive load.

Dotted line shows comparative size of midget assembly

CONTACT PARTS KIT 200-3. Assortment of contact parts to make other switch combinations. May be used with SPDT or DPDT contact assemblies to make 3PST, 4PST, 4PDT combinations, etc. Either contact assembly takes any combination up to four pole double throw. Includes complete assembly and wiring information for all possible combinations. Complete with all necessary hardware. Shipping weight 4 oz.

List Price \$1.85 ea.

RC-100 REMOTE LOCKING CONTROL RELAY

A Guardian development of the momentary impulse locking control relay. The circuit to the coil needs to be energized only long enough to close armature; contacts lock automatically. Each impulse reverses position of contacts.

Standard coils operate on 115 volts, 50-60 cycles AC. Coils

for other voltage and currents on specifications.

Contacts, 1/4" fine silver metal rated at 1500 watts at 115 volts, 60 cycle, non-inductive. Can also be used in AC primary circuits of any inductive power supply delivering up to 1 KW. 3" long, 2 1/8" wide, 1 17/32" high.

Applications—break-in control and phone to CW switching. Any circuit control where locking circuits are used.

RC-100-AR—(4PST).....	8 oz.	\$7.15 ea.
RC-100-BF—(3PDT) (SPDT) (DPST).....	8 oz.	7.85 ea.

U-100 AND U-200 ADJUSTABLE UNDERLOAD RELAYS

Sensitive, precise, designed and constructed for long, trouble-free service. Relays are encased in attractive black finished metal containers, protecting them from dirt, dust and maladjustment. Normal current through the coil on the U-100 is 300 amperes with an adjustable range of 100 to 200 milliamperes DC. Normal current through the coil on the U-200 is 600 milliamperes with an adjustable range of 200 to 400 milliamperes. Oversize contacts of fine silver, rated on the AC primary of any power supply delivering up to 500 watts.

Radio Application—protection of class "B" audio equipment in case of class "C" load failure.

Industrial Application—Any DC circuit where it is desirable to maintain currents above a set value.

U-100 and U-200 are 3-5/16" in diameter, 2 1/4" high. Shipping weight 14 oz.

List Price \$10.75 ea.

T-100 AND T-110 TIME DELAY RELAYS

Standard coils operate on 115 volts, 50-60 cycles non-inductive AC. Coils available on other voltages on specification. Oversize contacts rated at 1500 watts on 115 volts, 50-60 cycles non-inductive. Can also be used in the AC primary of any inductive power supply delivering up to 1 KW. Adjustable time delay for any period between 10 and 60 seconds.

Applications—Radio. In transmitter circuits to prevent damage of rectifiers and tube filaments by application of plate current before filaments are sufficiently heated.

Industrial. Any control problem requiring the changing of circuits after a predetermined interval.

GUARDIAN SERIES T-110 TIME DELAY RELAY

T-100—5 1/4" long, 3" wide, 2 1/4" high. Shipping weight 1 1/4 lbs. Laminated construction.

List Price \$17.15 ea.

The T-110 is a compact, sturdy, economical time delay relay for use in applications not requiring the capacities of the T-100. Contact capacity—1250 watts on 110 volt, 60 cycle non-inductive AC. Can also be used in the AC primary circuit of any inductive power supply delivering up to, and including, 1 KW. Adjustable time delay between 10 and 60 seconds.

T-110—5 3/8" long, 3 1/8" wide, 2 1/8" high. Shipping Weight 8 oz. List Price \$10.75 ea.

RELAYS BY GUARDIAN

A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

**SERIES R-100
H.F. RELAY**

HIGH FREQUENCY RELAYS

The Series R-100, R-100B, and A-300 Guardian Relays are primarily designed for high frequency applications. They are low-loss insulated, compact, economical and sturdily constructed. The R-100 and R-100B are AlSiMag insulated, while the A-300 is mounted on a mycalex base with polystyrene contact mounting bar.

Radio Applications — Antenna changeover, break-in, high voltage keying, grid controlled rectifier keying, remote control of receiver and transmitter, and other high frequency applications.

Industrial Applications — Oven control, remote motor control, short wave therapy and diathermy, heating equipment.

X-300-ER ADJUSTABLE OVERLOAD RELAY

with Electrical Reset

This relay offers positive, precise protection against current surges and continuous overloads — remote panel installation of the control potentiometer simplifying adjustment of relay to operate on

any current value from 250 to 750 milliamperes — auxiliary contacts for pilot light indication of "overload" or "clear" position — reset relay can be operated from any convenient point. Voltage drop across coil is less than 10 volts at any current value. Insulation between coil and ground rated at 3000 volts.

X-300-ER—4³/₄" long, 1-15/16" wide, 2" high. Shipping weight 12 oz.

List Price.....**\$9.25 ea.**

B-100 BREAK-IN RELAY

Specially designed for break-in operation on amateur transmitters. Low current drain and compact construction, plus the use of a laminated field piece and armature insuring efficient operation, make the B-100 an ideal relay for this application. Standard coil operates on 110 50-60 cycle AC. Silver contacts rated at 1500 watts, 60 cycles AC non-inductive, and in AC primary circuits of any inductive power supply delivering up to 1 KW.

B-100—2³/₄" long, 2¹/₈" high, 2¹/₄" wide. Shipping weight 11 oz.

List Price.....**\$10.75 ea.**

K-320 KEYING RELAY

A standard coil operates on 6 volts AC. Coils for other voltages on specification at 10% additional to list price. Contacts — special over-size silver. Can handle 5,000 watts on 60 cycle non-inductive 115 volts AC and in AC primary circuit of any inductive power supply delivering up to and including 1 KW. Control capacity — up to 2,000 volts with clean make and break.

Applications—Control of filament center tap keying of any stage having up to 2,000 volts on plate; primary keying or control of power supplies up to and including 1,000 watts; and grid-controlled rectifier keying of 3,000 volt power supplies.

K-320—3" long, 1¹/₂" wide, 1-15/16" high. Shipping weight 4 oz.

List Price.....**\$4.50 ea.**

Potter & Brumfield

PR Series HEAVY DUTY POWER RELAYS

Relay contacts on PR3A, PR3D, PR4A and PR4D rated at 20 A, non-inductive load 110V AC or 1 HP, AC. All other relay contacts rated at 15 A, non-inductive at 110V AC. Size approximately 2⁵/₈" x 2 9/16" x 2 1/4" high. Specify coil voltage and frequency.

Designed for such power circuits as motor starting up to 1 HP., heater loads up to 20 amperes, remote break-in control of transmitters, electro plating devices, elevator controls, or any control circuit requiring fast positive switching. AC types operate on approximately 10 volt amperes. DC types require approximately 2 watts.

FR11D			

The newly developed electronic photo flash units using a high voltage discharge through a xenon gas filled bulb require a relay of extraordinary characteristics. When the bulb is flashed the contacts must carry an extremely high surge of current without sticking, burning or pitting. The repetitive accuracy must be as uniform as a precision built shutter on a fine camera. Unfailing positive contact is vital to synchronization of the shutter with the 2500 volt capacitor discharge.

The Potter and Brumfield FR relay has been tried and proven under the most severe conditions of temperature, humidity and shock. Special contact material and the finest quality of baked varnish impregnation of coil and other insulating parts combine to give a reliable relay at economy prices. The FR is available in all the contact combinations listed under the MR Series shown on this page up to and including Double Pole Double Throw. Coils are available in all AC voltages up to 220 volts and DC voltages up to 110. Power requirements for coil operation is 1.5 to 2 watts DC and 3 to 4 volt amperes AC. Overall dimensions for single pole types are 2 15/16" x 1 1/2" x 1 3/8" high. Double pole types 2 3/4" x 2 3/8" x 1 7/8" high.

MR Series MEDIUM DUTY POWER RELAYS

Sturdy, compact, highly efficient, for mounting in confined spaces. Particularly adapted to multiple panel mounting. Ideal for safety and signal devices, call systems, heater loads, radio protective circuits, transmitter keying circuits, burglar alarms, photographic applications, electric sign controls, etc. Available in all contact arrangements up to and including double pole double throw. AC types operate on approximately 4 volt amperes and DC types operate on approximately 2 watts. Contacts rated at 8 A, 110V, 60 cycles non-inductive load. Approximate size single pole units 2 15/16" x 1 1/2" x 1 5/8" high. Double pole units 2 3/4" x 2 1/8" x 1 7/8" high.

POTTER & BRUMFIELD SALES COMPANY

LM Series PLATE CIRCUIT RELAYS

Designed to meet demand for high grade medium cost plate circuit relays in both single and double pole contact arrangements. Large coils are particularly sensitive. The single pole LM operates on as low as .015 watts, the double pole types on .070 watts. Applicable to smoke control, packaging, counting and other electronic control circuits. Contacts supplied are 3/16" fine silver. Approximate size of single pole units 2 1/4" x 1 3/8" x 2 3/8" high. Double pole units 2 1/4" x 2 1/8" x 2 3/8" high. When ordering, specify coil resistance.

EL Series MULTIPLE CONTACT LATCHING RELAYS

The EL is recommended for applications which require multiple contacts to open or close circuits simultaneously. An added feature is the latching coil and locking mechanism. The armature of the latching coil serves to lock the contacts in the energized position. The actuating coil may be de-energized as soon as the contacts are locked in position. Contacts may then be electrically reset to their normal position by push button control of current to the latching coil. The EL relay is available in all contact combinations up to and including four pole double throw as shown under the SU Series in the adjoining column. Actuating and latching coils are available for DC voltages up to 110 or AC voltages up to 220. Actuating coils require an average of 1.5 to 2 watts on DC and 1.75 to 2.5 watts on AC operation.

Orders must specify the voltage and frequency for each of the coils on the EL relay.

Two 5/32" mounting holes are required spaced 1 3/8" center to center. Maximum dimensions, depending upon the number of contacts, are 2 3/8" H x 2 1/2" L x 1 7/16" W. The 3/16" fine silver contacts are rated at 4 amperes 110 volts AC non-inductive load.

KR Series Small Light Duty

A relay designed for application where size and weight are important. Sturdy and efficient. In applications where operating current is not too limited, the DC types can be adjusted to withstand the vibration encountered in most aircraft applications. Ideal for sub-chassis mounting and switching of RF or AF circuits. Contacts are rated at 3 amperes 110 volts, 60 cycle non-inductive. Approximate size of KR11D 1 3/16" x 1 11/16" x 1 1/4" high. When ordering, specify coil voltage and frequency.

SU Series MULTIPLE LEAF RELAYS

Unique construction provides many valuable features at low cost. Larger coil space permits most efficient winding for higher voltages and lower consumption. May be mounted either vertically or horizontally, terminals easily accessible in either mounting. Suitable for applications such as signal or alarm controls, remote indicators, temperature controls, overload or underload protective devices, etc. Contacts rated at 4 amperes 110 volts AC non-inductive load. Contact combinations up to and including 4-pole double throw. DC types require 1.5 watts actuating power. Dimensions of SU17A (illustrated) are 2 1/2" x 1 7/16" x 2 1/2" high. When ordering, specify coil voltage and frequency.

KR Series Small Light Duty

A relay designed for application where size and weight are important. Sturdy and efficient. In applications where operating current is not too limited, the DC types can be adjusted to withstand the vibration encountered in most aircraft applications. Ideal for sub-chassis mounting and switching of RF or AF circuits. Contacts are rated at 3 amperes 110 volts, 60 cycle non-inductive. Approximate size of KR11D 1 3/16" x 1 11/16" x 1 1/4" high. When ordering, specify coil voltage and frequency.

Description	A.C. RELAYS 6-12-24-110 Volts				D.C. RELAYS 6-12-24-60 Volts			
	Normally Open	Net	Normally Closed	Net	Normally Open	Net	Normally Closed	Net
SPST	KR1A	\$2.00	KR2A	\$1.95	KR1D	\$1.90	KR2D	\$1.85
DPST	KR7A	2.40	KR8A	2.35	KR7D	2.30	KR8D	2.25
SPDT	KR5A		2.00		KR5D		1.90	
DPDT	KR11A		2.50		KR11D		2.40	
A.C. coils up to 117 volts at above prices.					Add 25c to above prices for coils of 3500 to 5000 ohms. From 5001 to 6000 ohms add 35c.			

SU Series MULTIPLE LEAF RELAYS

Unique construction provides many valuable features at low cost. Larger coil space permits most efficient winding for higher voltages and lower consumption. May be mounted either vertically or horizontally, terminals easily accessible in either mounting. Suitable for applications such as signal or alarm controls, remote indicators, temperature controls, overload or underload protective devices, etc. Contacts rated at 4 amperes 110 volts AC non-inductive load. Contact combinations up to and including 4-pole double throw. DC types require 1.5 watts actuating power. Dimensions of SU17A (illustrated) are 2 1/2" x 1 7/16" x 2 1/2" high. When ordering, specify coil voltage and frequency.

Description	A.C. RELAYS 6-12-24-110-220 Volts				D.C. RELAYS 6-12-24-110 Volts

POTTER & BRUMFIELD SALES COMPANY

Department 250

LEACH RELAY CO.

These Leach Relays are considered standard items within the trade. These relays are maintained in shelf-stock supply in order to expedite shipment to jobbers throughout the United States.

For more than thirty years Leach has manufactured quality relays. This vast experience in engineering design and manufacturing ability is incorporated in these standard relay designs.

BASE DIMENSIONS: 1½" x 2-9/16", overall height 1-11/32"

WEIGHT: 4½ ounces.

RESISTANCES: 5,000 Ohms or 10,000 Ohms.
Type
No.

1037 Double Pole, Double Throw, 5,000 Ohms.
1037 Double Pole, Double Throw, 10,000 Ohms.

Be sure to specify coil resistance when ordering.

SENSITIVE METAL BASE RELAY

TYPE 1037 SERIES

This Relay is constructed for sensitive operation, and has ⅛" pure silver contacts mounted on screws to provide adjustments on top contacts which are capable of carrying 1 Ampere at 115 Volts, AC, Non-inductive. With these adjustment screws, the air gap can readily be adjusted so that the Relay can be set to pull in at some predetermined coil current. It is supplied at DPDT only. Nothing is grounded to the metal base. The minimum reliable coil consumption is .040 watts. It will operate on a good deal less, but the adjustment becomes fairly critical on these low values.

SENSITIVE DIRECT CURRENT RELAYS

TYPE 1032 SERIES

This Relay is used extensively in closed circuit burglar alarm systems, in the plate circuit of electron tubes, as secondary Relays for micro-ampere Relays, etc. It is a very fine all-around low current, high resistance Relay, capable of withstanding considerable vibration without affecting its operation. It is equipped with an adjustable spring and adjustable stationary contacts, fitted with set screws. All contacts are pure silver and capable of carrying 1 Ampere, 115 Volts, AC, Non-inductive. This Relay is pigtailed to prevent current passing through the hinge part. The contact system is SPDT, and minimum practical coil wattage is .015 watts.

BASE DIMENSIONS: 2" x 2¾", overall height 1-11/16"

WEIGHT: 6 ounces.

RESISTANCES: 5,000 Ohms or 10,000 Ohms.
Type
No.

1032 Single Pole, Double Throw, 5,000 Ohms.
1032 Single Pole, Double Throw, 10,000 Ohms.

Be sure to specify coil resistance when ordering.

Type Number

6-C 7-C Single Pole, Double Throw.
6-2C 7-2C Double Pole, Double Throw.
6-4C 7-4C 4-Pole Double Throw.

MULTIPOLE RELAYS

TYPE 6 & 7 SERIES

This Relay is the most versatile Relay for its size in the Leach line, and is ideal for industrial and radio applications where currents to be handled by the contact systems do not exceed 8 Amperes at 115 VAC, Non-inductive. By using the desired stationary contacts, many combinations are available. For example, on the 7-4C Relay one could have various combinations of double-pole, single-pole open, single-pole closed, etc., as required. All contacts are pure silver and are mounted on heavy-plated phosphor-bronze pole pieces, which are designed to give a wiping action and positive contact pressure. Relay provides solder lugs for connecting coil and contact systems.

COILS: 6 Volt Direct Current Coils consume approximately 3 watts, 6 or 115 VAC Alternating Current Coils consume 6V/A approximately.

CONTACTS: Heavy fine silver contacts ⅛" diameter. Will carry loads up to 8 Amperes at 115 VAC, Non-inductive.

LEACH RELAY CO.

MIDGET RELAYS

TYPE 223-227 & 323-327 SERIES

ENGINEERED in miniature to weigh less than 2 ounces and measures from one to $1\frac{1}{4}$ inches in length, Leach Midget Relays dependably handle contact loads of up to 2 Amperes at 115 Volts AC, Non-inductive. Because of their space and weight saving factors, Midgets expand the range of control by Relays in many products where previous methods are considered unprofitable.

Supplied in a variety of contact arrangements, with moving contact poles insulated from the armature and frame, and with coils for operation on either AC or DC. The high quality, well-known in our standard and larger size Relays, is used throughout.

STANDARD COILS: 6 Volt Direct Current Coils consume approximately .750 watts of Alternating Current 6 or 115 Volts, approximately 4 V/A.

CONTACTS: $\frac{1}{8}$ " diameter Fine Silver, rated 2 Amperes at 115 VAC, Non-inductive.

DIMENSIONS: SP — $1\frac{5}{16}$ " x $1\text{-}13/16$ "
DP — $1\text{-}3/16$ " x $1\text{-}13/16$ "

Overall height— $1\frac{1}{4}$ " not including mounting stud.

MOUNTING: Single No. 6-32 stud, $7/16$ " long.
WEIGHT: 1.5 ounces approximately.

Type Number		
DC	AC	
223	323	SPDT
227	327	DPDT

METAL BASE STYLE

TYPE 1057 & 1157 SERIES

THESE RELAYS are ruggedly built for industrial uses and are fitted with $\frac{1}{4}$ " fine silver contacts for handling heavier currents. Phosphor-bronze, nickel-plated, is used for the pole pieces. Nothing is grounded to the frame. All parts and pieces are so constructed that nothing can twist or turn out of alignment.

DIRECT CURRENT: Coil consumption 1.5 watts, 6 Volts.

ALTERNATING CURRENT: Coil consumption 50-60 cycles, 6 or 115 Volts, approximately 4 V/A.

CONTACTS: $\frac{1}{4}$ " diameter Pure Silver. 12.5 Amperes at 115 Volts AC, Non-inductive.

BASE DIMENSIONS: $1\frac{5}{8}$ " x $2\frac{3}{4}$ "; overall height $1\frac{3}{8}$ ".

WEIGHT: 5 ounces.

Type Number		
DC	AC	
1057	1157	DPDT

STANDARD SIZE CIRCUIT CONTROL RELAYS

TYPE 1257 & 1357 SERIES

This excellent Relay has many applications where it is not desirable to use solder terminal connections. They are highly insulated and made of the best materials obtainable. The magnetic circuit is exceptionally high grade of magnetic iron, heavily cadmium-plated. The contacts are $\frac{1}{4}$ -inch pure silver, slightly crowned, and are rated at 12.5 Amperes, 115 Volts AC, Non-Inductive.

AC coils consume 6 V/A, 6 or 115 Volts AC.

DC coils consume 1.5 watts, 6 Volts DC.

BASE DIMENSIONS: $\frac{1}{4}$ " black Bakelite, $2\text{-}3/16$ " x 3"; overall height, $1\text{-}7/16$ "

WEIGHT: 7 ounces.

Type Number		
DC	AC	
1257	1357	DPDT

RADIO AND HIGH FREQUENCY RELAYS—ANTENNA TRANSFER

TYPE 1623-S9 & 1723-S9

These Relays are exactly the same as above, except that a $\frac{1}{8}$ -inch fine silver SPST Normally Open auxiliary contact has been added. Usually one these relays is paired with one of the above types*, in order to provide the auxiliary contact for the power supply. This may also be used to close a power Relay, for grounding, or for controlling light power circuits.

AC coils consume approximately 6 V/A, 6 or 115 Volts, 50-60 cycles.

DC coils consume approximately 3.5 watts, 6 Volts DC.

DIMENSIONS: $1\frac{1}{2}$ " x $4\frac{5}{8}$ "; overall height, $1\frac{3}{4}$ ".

WEIGHT: $6\frac{1}{4}$ ounces, approximately (each relay).

Type Number

DC	AC	
1623	1723	SPDT
1623-S9	1723-S9	SPDT, with $\frac{1}{8}$ " Aux. Cont.

*Usually one No. 1723 and one No. 1723-S9 are paired for AC use or one No. 1623 and one No. 1623-S9 are paired for DC use.

MYCALEX AND ISOLANTITE

TYPE 1623 & 1723

This new idea for antenna change-over eliminates the major drawback of most Relays now used for this purpose. The spacing between leads, heretofore has been limited to the spacing between the Relay contact strips. A pair of the above matched Relays permits any desired spacing between antenna lead-out wires whether 6 inches, or 6 feet.

Maximum high frequency insulation is provided through the use of heavy Mycalex panels, and Isolantite insulators. The Relays are designed with a wide air gap, $\frac{1}{4}$ inch pure silver contacts with a SPST arrangement.

They will withstand over 4000 volts RMS, 60-cycle hi-spot test between contacts and between contacts and frame on ground.

RADIO AND HIGH VOLTAGE RELAYS CERAMICS

TYPE 1077 & 1177 SERIES

This is an AlSiMag insulated RF Relay designed for more or less universal service, such as police mobile radio, aircraft and amateur installations. Nothing has been left undone to make this Relay the best of its kind. The pole pieces are nickel-plated, phosphor-bronze. The main contacts are $\frac{1}{4}$ " pure silver. All iron parts cadmium plated. The tension spring is stainless steel.

No. 1077C and 1177C have Auxiliary $\frac{1}{8}$ " contacts which provide a third center pole on Relay. They are grounded to the frame, but not to the base of the Relay.

WEIGHT: 5 to $5\frac{1}{2}$ ounces.

Type Number

DC	AC	
1077	1177	DPDT
1077-C	1177-C	DPDT, with Aux. SPDT.

CONTACTS: $\frac{1}{4}$ " Pure Silver—Double Pole, Double Throw.

COIL DATA: 6 Volts DC, $2\frac{1}{2}$ watts, 6 or 115 Volts AC, 50-60 cycles, 6 V/A.

DIMENSIONS: $1\frac{1}{2}$ " wide by $2\frac{3}{4}$ " long by $1\frac{1}{2}$ " high.

Mounting hole centers, $2\frac{3}{8}$ ".

Center holes tapped 6-32.

Outer holes clear 6-32.

LEACH RELAY CO.

RADIO AND HIGH VOLTAGE RELAYS

MYCALEX

TYPE 1601-MX & 1701-MX

This Relay was designed to control a high voltage radio frequency circuit. Contacts are $\frac{1}{4}$ " pure silver, SPST normally open, double break. Metal spacers are supplied for mounting.

AC coils consume 6 V/A, or 115 Volts, 50-60 cycles AC.

DC coils consume approximately 3.5 watts, 6 Volts DC.

DIMENSIONS: $1\frac{3}{4}$ " x 3" overall height, not including studs or mounting spacers, $1\frac{1}{2}$ ".

WEIGHT: 8 ounces.

Type Number

DC AC

1601-MX 1701-MX SPST-DB Normally open.

BASE DIMENSIONS: $3\frac{1}{4}$ " x $2\frac{3}{4}$ ", overall height, 1-7/16".

Type Number

DC AC

1057-T 1157-T DPDT.

TIME DELAY RELAY

TYPE 1057 & 1157 T SERIES

This Thermo Element Time Delay Relay is primarily for use on vacuum tube transmitters, but may also be used for a wide variety of other applications. They are all made DP, which may be used as normally open, normally closed or DT. The contacts are $\frac{1}{4}$ " pure silver, rated $12\frac{1}{2}$ Amperes, 115 Volts AC, non-inductive. The center pole, as shown, always is used for controlling the thermo element, which provides a variable delay of from 20 seconds to 1 minute. After the coil is energized, the Thermo element drops out of the circuit, cooling for the next cycle.

STANDARD COILS: AC—6 and 115 Volts (6 V/A)

DC—6 Volts—(1.5 Watts)

LATCH TYPE ELECTRICALLY RESET

TYPE 2417

This type Relay fits many applications where it is not desirable to have current continuously on the coil. The mechanical arrangement is such that after the pull-in coil is energized the armature closes and locks, closed by a mechanical latch on the armature of the Relay coil. The pole pieces are phosphor-bronze, and canvas-base natural Bakelite is used for the end panels and the pole mounting strip. The entire Relay is mounted on a metal base. The contacts are $\frac{3}{16}$ " diameter pure silver rated 8 Amperes at 115 Volts AC. Non-inductive. This Relay is supplied with 2—6 or 115 Volt AC coils or with 2—6 Volt DC coils.

DIMENSIONS: $1\frac{5}{8}$ " x $3\frac{5}{8}$ "; height 2-1/16".

WEIGHT: 8 ounces.

Type Number

2417

DPDT.

Specify voltage and whether for AC or DC.

Type Number

1042 SPST Normally closed—double break. Contact rating 10 Amp., 115 Volts AC.

LIGHT DUTY OVERLOAD TRIP RELAYS

TYPE 1042 SERIES

The Relays shown are used as safety devices on electronic apparatus for the protection of the equipment against excessive currents. When current reaches a predetermined value the Relay is pulled in allowing the contacts to snap open and at the same time locking the armature closed. To reset the contacts, the coil circuit must be opened before pressing the Bakelite first finger. These Relays are supplied with the coil circuit highly insulated from the contacts; however, to use them as circuit breakers the coils and contacts may be connected in series.

Commonly used for the protection of power tubes. In this service the coil is put in series with the negative side of the plate supply and the contacts are in series with the transformer primary or the coil of the power contactor.

These Relays are all adjustable for the trip-out setting to approximately 20% plus or minus of their designated rating. In ordering it is necessary that you specify the approximate current on which they are to operate. Supplied in 2 standard coils: 250 MA or 500 MA.

WARD LEONARD • RADIO AMATEUR and INDUSTRIAL RELAYS

RELAYS FOR AUTOMATIC CONTROL

Representative samples of the comprehensive line of relays made by Ward Leonard. The ones illustrated are those particularly adaptable to electronic and the more common industrial applications.

MIDGET MAGNETIC RELAY — TYPE No. 106. —

For remote control of A.C. or D.C. circuits. Has wide application for use on power circuits or electronic circuits in which the currents to be controlled do not exceed the ratings of the contacts. May be energized from main line or from an independent circuit. Built on a molded Bakelite base. Front or back connected terminals.

Coil Voltages —

D.C. — 6, 8, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 8, 12, 24, 32, 115 volts, 115 volts.

Contract Arrangement —

Single Pole, Double Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole (Common Feed), Single Break, Normally Open, Normally Closed and Double Throw.

Contact Ratings, in Amperes —

Volts	D. C.		60-Cycle A.C.	
	Single Break	Double Break	Single Break	Double Break
0-24	4	3	4	6
25-115	1*	2	4	6

*0.7 Amperes if Double Throw.

Dimensions — 2" wide; 2 $\frac{3}{4}$ " high; 2 $\frac{3}{8}$ " deep.

Type No. 106 Relays for 3-wire control are also available. Details will be furnished on request.

HEAVY DUTY MIDGET RELAY — TYPE No. 105. —

A general purpose relay designed for remote control of the ordinary type of electrical appliances, such as electric heaters, electric signals, electric lights, electrically operated pumps, and most types of electronic equipments. The Heavy Duty Midget Relay is sturdily built on a molded

Bakelite base. Heavy, front connected terminals are provided. The Heavy Duty Midget Relay, as a standard unit, is of the open type, but it can be furnished with a steel knock-out box enclosure.

Coil Voltages —

D.C. — 6, 10, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 10, 12, 24, 32, 115, 230 volts.

Contact Arrangement —

Single Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.

Contact Ratings, in Amperes —

Volts	D. C.		60-Cycle A.C.	
	Normally Open	Normally Closed	Normally Open	Normally Closed
0-24	20	15	20	15
25-115	1	1	20	15
230	0.5	0.5	15	10

Dimensions — Single Pole: 1 $\frac{7}{8}$ " wide; 2 $\frac{3}{8}$ " high; 1 $\frac{1}{2}$ " deep. Double Pole: 2 $\frac{1}{2}$ " wide; 2 $\frac{3}{4}$ " high; 1 $\frac{3}{4}$ " deep.

SENSITIVE RELAY — TYPE No. 250. —

For use in applications where a high degree of sensitivity is required such as in electronic circuits. Built on a Bakelite base with large knurled heads and nuts to facilitate adjustment of the contacts and the spring tension on the armature. The use of nickel alloy in the magnetic circuits insures good contact torque at pull-up and crisp drop-out.

Contact Arrangement —

Single Pole, Double Throw.

Contact Rating, in Amperes —

Volts	D.C.	60-Cycle A.C.
115	0.75	2.0
230	0.5	1.5

Dimensions — 2 $\frac{5}{8}$ " wide; 2 $\frac{5}{8}$ " high; 1 $\frac{5}{8}$ " deep.

MIDGET METAL BASE RELAY — TYPE No. 104. —

For use in small radio transmitters, sound equipment, aircraft control circuits, and other similar applications. Available with Bakelite insulation or ceramic insulation. Small size permits installation in limited spaces. Built on a metal base. Vibration resistant up to 10 times gravity when energized. Front connected, solder type terminals.

Coil Voltages —

D.C. — 6, 10, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 10, 12, 24, 32, 115 volts.

Contact Arrangement —

Single Pole and Double Pole. Various combinations with or without auxiliary contacts.

Contact Ratings, in Amperes —

Volts	D.C.	50-Cycle A.C.
0-24	4	4
25-115	0.5	4

Dimensions — 1 $\frac{3}{8}$ " wide; 2 $\frac{1}{8}$ " high; 1 $\frac{1}{8}$ " deep.

HEAVY DUTY RELAY — TYPE No. 130. —

A relay that has heavy current carrying and rupturing capacities for use in A.C. or D.C. circuits. Contact fingers are heavy stiff metal blades with large stainless steel springs for pressure. Large gap contacts with adequate surfaces. As high as four separate circuits may be opened simultaneously with the closing of up to four other circuits.

Coil Voltages —

D.C. — 24, 32, 115, 230 volts.
A.C. (60 cycles) — 24, 32, 115, 230, 440 volts.
Other voltages and frequencies available on special order.

Contact Arrangement —

Various combinations of contacts from one to four poles.

Contact Ratings, in Amperes —

Volts	Direct Current	D.C. with Blowout	A.C. 25 Cycles	A.C. 60 Cycles
0-24	25	25	25	25
25-125	3	20	25	25
128-250	1	10	25	25
251-440			10	15

Note: Blowouts required for relays that control Direct Current circuits in excess of 23 volts or a current of 1 ampere.

Dimensions — Base dimensions vary according to size of relay. Maximum depth, 3 $\frac{1}{8}$ ".

WARD LEONARD • RADIO AMATEUR and INDUSTRIAL RELAYS

RELAYS FOR THE RADIO AMATEUR

A few examples of Ward Leonard's popular line of relays for use in radio circuits are illustrated here. Information on specifications and prices are detailed in Catalog D-11 which will be furnished on request made to Ward Leonard directly or through one of its agents or distributors.

R. F. BREAK-IN RELAYS. —

Otherwise known as "Push-to-Talk" Relay for phone transmitters. Pushing button in control circuit connects proper transmitter circuits and disconnects proper receiving circuits to transmit. Releasing button switches all circuits back to normal position for receiving. Furnished in two sizes, Midget Type for light duty and the Heavy Duty Type.

Midget Type

Heavy Duty Type

Low Voltage Type

High Voltage Type

KEYING RELAYS.—Low voltage type for center-tap or grid-bias keying. High voltage type for use with grid controlled high voltage rectifier tubes. Use of Keying Relays reduces length of circuit wiring and permits control of keying with key located in convenient position for operating. Capable of keying up to 40 words per minute.

UNDERLOAD RELAY. — Protects against damage to tubes and other components of amplifiers when load failures occur, due, for example, to inability of one or more vacuum tubes to hold the load because of loss of excitation. De-energizing of relay coil when load drops opens contacts and prevents damage to transformers or tubes. Available from stock with coil adjusted to pick up at 100 m.a. to 200 m.a. DC or with coil adjusted to pick up at 200 m.a. to 400 m.a. DC.

ROTARY RESET OVERLOAD RELAY. — For protection against overloading vacuum tubes of power amplifiers or transmitters. Current surge causes armature to be pulled in, breaking the rectifier primary circuit. A mechanical latch holds the contacts open until the operator closes them by turning the reset knob. Designed for panel mounting. Available from stock with 250 m.a. DC coil and 500 m.a. DC coil.

The use of Ward Leonard Relays in an Amateur Rig not only modernizes it, but also improves its efficiency and stability. Short r.f. leads prevent stray currents. Convenient control is provided.

type and motor driven type — are also available. Furnished with 110 volt, 60-cycle AC coil.

THERMAL TIME DELAY RELAY. — Delays the application of voltage to the plates of vacuum tubes until the filaments have heated. The relay illustrated is adjustable over a range of from 15 seconds to 45 seconds. Other time delay relays — thermal

Intermediate Type

Heavy Duty Type

Midget Type

ANTENNA CHANGE-OVER RELAYS. — Switches antenna to transmit or receive. May also be used to switch transmitter or receiver to either of two antennas. Available in three sizes — Midget Type, Intermediate Type, and Heavy Duty Type. Midget Type built on Mycalex base. Contacts and terminals on Intermediate and Heavy Duty Types (except coil terminals) supported by ceramic blocks. Lucite crossarm used on all types.

ANTENNA GROUNDING RELAY. — For grounding transmitting or receiving antenna when not in use. Contact arms supported on Lucite crossarm. Circuit contacts and terminals supported on ceramic insulation block. Coil terminals and grounding terminals mounted on Bakelite base. Double pole, double throw contacts, with fixed or adjustable normally closed contacts.

MIDGET LATCH-IN RELAY.—A multi-purpose relay especially useful in circuits where interference might be caused if relay coils were continually energized. Momentary energizing coil "pulls in" armature which is locked in position by mechanical latch. Momentary energizing reset coil releases latch allowing armature to drop to normal position.

Heavy Duty Type

Midget Type

BAND SWITCHING RELAYS.—Automatically changes frequency bands through two-wire control circuit. Installation on the relay in the set near the coils eliminates the need for long R. F. leads, such as are required when a panel-mounted switch is used. Mycalex insulation used for base and contact arms. Contacts and terminals spaced to insure against leakage or creepage of high frequency and high voltage in the circuit.

SAFETY RELAY. — A relay that should be installed in every amateur sig. It gives automatic protection against the hazards of high voltages in filter condensers when power supply unit is turned off. Furnished with resistor through which condensers are discharged. Furnished with normally closed contacts which open when transformer primary circuit is closed, energizing relay coil.

PROTECT • CONTROL

THE MODERN WAY

... with DETECT • O • RAY TWIN BEAM PHOTO ELECTRIC SWITCH

APPLICATIONS

- Safety Shut-off
- Automatic Counter
- Conveyor Control
- Production Control
- Traffic Control
- Water Control
- Remote Control
- Material Flow
- Illumination Control
- Shut-off Feed
- Stop, Start Paint Spray
- Record Production
- Container Filling
- Inspection for Size, etc.
- Display Lighting
- Door Opener
- Burglar Alarm
- Fire Alarm
- Entry Signal

Dimensions

- Size of unit — 5" x 6½" x 7"
- Size of adjustable mirror — 3" x 2½" x 1½"

This dependable single-unit control can be used for hundreds of applications in industry, businesses and homes wherever the automatic "throwing of a switch," on a motor . . . alarm . . . or any other device hooked to the circuit, is needed. Detect-O-Ray produces 6 volts, ¾ amperes, making it possible to operate low voltage devices without any added expense.

Detect-O-Ray Model L-162 for 110-120 volts, 50-60 cycles AC, List Price \$42.00
 Detect-O-Ray Model L-250 for 220-250 volts, 50-60 cycles AC, List Price \$44.00

FEATURES AND ADVANTAGES

- As easy to operate as a radio
- Operates in any position
- Effective range of white (visible) beam 60'
- Effective range of red (invisible) beam 35' — (Ranges increase with degree of darkness)
- AC current
- Selector knob for visible or invisible beam
- Radio-type dial regulates sensitivity
- Snap-switch for continuous or intermittent performance
- "On - Off" switch
- Terminal for connecting Power Relay and/or device to be operated

POWER RELAY for operation of motors, machinery, floodlights and other devices requiring more than 6 volts. ¾ amperes. Has input plug for 110 volt AC, output for connection to any device (up to 1000 watts, 110 volt, AC) and connecting lead for attaching to Detect-O-Ray output terminal.

Power Relay (Model L-205) List Price \$10.50

PONY RELAY

All the metal parts on this pony relay are brass with lacquer finish, excepting armature which is polished and plated steel. Magnets are non-adjustable. Mounted on a mahogany finished wood sub base and cast iron black enamel base.

	List
M-104—4 Ohm	\$8.95
M-105—20 Ohm	8.95
M-106—30 Ohm	9.20
M-107—75 Ohm	9.45

**R-43
KEY**

This key is recommended for rapid transmitting. The base and binding posts are brass with instrument lacquer finish. Key lever gun metal finish. Platinor contacts .072" diameter.
List \$3.65

R-68 PRACTICE SET

Set consists of a key and adjustable high frequency 2 ohm resistance buzzer. Key has cast iron black enamel base, key lever gun metal finish with .072" platinor contact. Buzzer and key mounted on a mahogany finished wood base with brass binding posts and rubber feet. Code appears on an etched plate attached to the base. Instruction manual packed with each instrument.
List \$5.20

R-60 BUZZER

This high frequency buzzer is mounted on a steel base with steel cover black crystallized lacquer finish. Adjustable frequency with standard resistance of 2 ohms.
1-15/16 in. diameter by 1 3/8 in. high.
List \$1.80

SOUNDER

Properly designed for accurate instant action. Aluminum sounder bar for clear resonant tone. Cast iron bar frame black enamel finish. Bridge and adjustment screws brass instrument lacquer finish. Black lacquered steel sounder plate. Instrument mounted on a mahogany finished wood base equipped with brass binding posts and rubber feet.

112-S—4 Ohm	\$5.10
113-S—20 Ohm	5.35

LEARNER SET

For two way operation learners will find this instrument accurate and with a clear resonant sounder tone. Bar frame cast iron black enamel. Bridge and adjustment screws brass with instrument lacquered finish, sounding bar aluminum. Black lacquered steel sounder plate. Key has cast iron black enamel base, key lever gun metal finish with .072" platinor contact, brass adjusting screws. Sounder and key mounted on mahogany finished wood base with brass binding posts and rubber feet. Instruction manual packed with each instrument.

M-110—4 Ohm	\$7.65
M-111—20 Ohm	7.90

STANDARD KEY

This standard wireless key is designed to carry heavy currents. All brass construction with lacquer finish. Furnished with 3 1/16, 1/4 or 3/8-inch coin silver contacts. Navy type key knob.

R-62—3/16" contacts	\$4.50
R-63—1/4" contacts	4.60
R-64—3/8" contacts	4.85

COMMERCIAL RELAY

The commercial relay is well designed and constructed for long, continuous service on commercial lines. Heel iron and armature are made of Norway iron. Has rubber covered adjustable coils. Mounted on mahogany finished wood sub base and cast iron black enamel base.

	List
916—150 Ohm	\$15.00
917—250 Ohm	15.50

**M-100
KEY**

This key is recommended for rapid transmitting. The base, binding posts and switch lever are brass with instrument lacquer finish. Key lever gun metal finish. Platinor contacts .072" diameter.

List \$3.95

**KEY
R-50**

This instrument is designed for the amateur interested in a well built carefully made wireless key. Cast iron base well insulated, back wrinkle finish. 1/8" coin silver contacts. Key lever gun metal finish. Binding posts and adjusting screws brass instrument lacquer finish.

SPEED-X

SPEED-X keys, formerly made by Les Logan Co. of San Francisco, Calif., have attained a pre-eminent position as the leading complete line. Now manufactured by JOHNSON, their reputation will be maintained, and improved wherever possible.

HIGH SPEED SEMI-AUTOMATIC KEYS

SPEED-X Semi-Automatic Keys are designed and constructed to rigid specifications and are approved by the experienced professional and amateur C. W. operators. They are fully adjustable from lowest to highest speeds. Manufactured in four distinctive and attractive models. Fully guaranteed against any defect in material or workmanship. Bases of all models drilled for stationary mounting.

STANDARD MODEL 114-500. New-Improved Standard Model Semi-Automatic Key mounted on extra heavy steel base $3\frac{1}{2}$ " x $6\frac{1}{4}$ " x $\frac{1}{2}$ " finished in attractive wrinkle baked enamel. Mounted on four rubber feet to insure stationary position at all times. The finish will not scratch or chip and will last indefinitely. The frame is finished same as base and has five adjustments with lock nuts, assuring dependable operations at all speeds. Vibrator arm, posts, switch and all machine parts heavily plated in beautiful satin chromium. Complete with adjustable weight, two sets $\frac{1}{8}$ " pure silver contacts, circuit-closing switch and two paddles adjustable to any desired height. Net weight $4\frac{1}{2}$ lbs.

114-500.....List Price \$17.50
114-500-L (Left-handed model).....List Price 19.50

MODEL 114-501. New-Improved Beautiful Chrome finish. Heavy steel base $6\frac{1}{4}$ " x $3\frac{1}{2}$ " x $\frac{1}{2}$ " with four non-slip rubber feet. Heavy brass connector strips mounted under base. Heavy die cast frame with same finish as base and with five screws for sensitive adjustments. Vibrator is designed to obtain slowest and fastest speeds required by high speed operators. Two sets of $\frac{1}{4}$ " pure silver contacts. Pigtail connections to vibrating arm. Perfectly aligned free acting vibrator bearings. Lock nuts on all adjustments. Paddles adjustable to any required height. All machine parts heavily chrome plated, which makes this the most outstanding semi-automatic key on the market. Furnished with circuit closing switch. Net Weight $4\frac{1}{2}$ lbs.

114-501.....List Price \$25.00
114-501-L (Left-handed model).....List Price 27.50

Nos. 500, 501

114-515

AMATEUR MODEL 114-515. Baked Black Wrinkle Enamel Finished Steel Base $6\frac{1}{4}$ " x 3 " x $\frac{3}{8}$ " with four rubber feet to prevent slipping or tilting. Heavy Brass connector strips. Die Cast Frame finished same as base with adjustable trunion screws. Chromium brass. Vibrator has main spring and U-spring made of clock spring for smooth snappy action. Adjustable weight. Two adjustable black fibre paddles. Two sets $\frac{1}{8}$ " pure silver contacts. Lock nuts for every adjustment. Deadener wheel, post screws, springs and terminals chrome plated. Packed in attractive carton. Net Weight $3\frac{1}{4}$ lbs.

114-515.....List Price \$12.50
114-515-L (Left-handed model).....List Price 15.00

JUNIOR MODEL 115-510. Die Cast Base $2\frac{3}{4}$ " x 6 " x $\frac{3}{4}$ " finished in black wrinkle baked enamel concealing heavy brass connector strips. Frame is same finish as base and all other parts are chromium plated. Vibrator Arm same as Standard Model with lots of pep. Adjustable from eight words per minute to as high a rate as desired. Two sets of $\frac{1}{8}$ " pure silver contacts adjustable weight and two adjustable paddles. Circuit closing switch mounted on base. Being small compact and streamlined this semi-automatic key is an outstanding value. A light-weight but sturdy built machine for clean-cut sending. Net Weight $2\frac{1}{2}$ lbs.

An assortment of the best selling parts for all makes of keys selected from the above list and packed in a beautiful display box.

LIST PRICE OF COMPLETE KIT, \$20.00

SPEED-X

MOULDED BAKELITE KEYS, BUZZERS, PRACTICE SETS

SPEED-X Moulded Bakelite and Metal Hand Keys, Practice Sets and Buzzers are used throughout the world as standard equipment in amateur and commercial work. Each unit is built according to rigid specifications and is fully guaranteed. All models have holes for stationary mounting. Code card supplied with each individually packed unit.

114-301

AMATEUR KEY 114-301—A general purpose key with moulded black bakelite base. Perfect insulation—adjustable smooth acting bearings—improved spring—nickel key arm—pigtail connections—no current on bearings— $\frac{1}{8}$ " pure silver contacts. Net Wt. 6 oz.

114-301.....List Price \$3.00

114-301-S—Same as Model 301 with circuit closing switch mounted on base.....List Price 3.50

Add "L" for $\frac{1}{4}$ " Contacts—Extra.....List Price .25

PRACTICE KEY 114-300—A well-built and inexpensive practice key for the beginner. Moulded Brown Bakelite base and knob. Spring bearings, perfect action, simple adjustments $\frac{1}{8}$ " pure silver contacts. All machine parts nickel plated. Standard Code card furnished. Net Wt. 5 oz.

114-300.....List Price \$1.75

Add "L" for $\frac{1}{4}$ " Contacts—Extra.....List Price .25

PRACTICE KEY 114-312—Heavy die cast base finished in Gray Wrinkled Enamel. Smooth adjustable contacts, $\frac{1}{8}$ " pure silver contacts. Has provision for plugging in our semi-automatic keys when desired. Net Wt. 9 oz.

114-312.....List Price \$3.25

114-312-S—Same as Model 114-312 with circuit closing switch mounted on base.....List Price 3.75

Add "L" for $\frac{1}{4}$ " Contacts—Extra.....List Price .25

PRACTICE SET 114-450—Consists of one constant frequency adjustable buzzer and a standard hand key with $\frac{1}{8}$ " pure silver contacts mounted on a moulded brown bakelite light-weight base 6" x 4". Adjusting screws, key arm and all machine parts nickel plated. Light Spring for perfect keying. A complete sending and receiving set. Three hook-up diagrams on carton show how this Practice Set may be used singly for code practice and in pairs for point to point communication. Standard Code Card included. Net Wt. 12 oz.

114-450.....List Price \$4.50

CONSTANT FREQUENCY BUZZER 114-400—Moulded Black Bakelite Base and Cap eliminates insulation problems. Large pure silver contacts—precision parts hold adjustments. Additional adjustment on vibrator. Resistance 2 ohms. Operates on two dry cells or one "C" battery. A high quality buzzer for all purposes. Net Wt. 3 oz.

The Vibroplex

A SEMI-AUTOMATIC TELEGRAPH AND WIRELESS TRANSMITTING MACHINE

Embodying the latest exclusive features

Prominent features which have been contributed to the success of the Vibroplex are:

- Simplicity • Durability
- Perfect control • Easy adjustment
- Strong carrier • Ease of manipulation
- Adaptability to changing wire conditions
- Ability to transmit perfect Morse and Continental signals at high speed

These features, which are found only in the genuine Vibroplex models illustrated on these pages, make for clear, rapid, easy transmission; relieve the arm of strain caused by sending on the ordinary key; rest

and strengthen the overworked muscles, and prevent telegrapher's paralysis.

CLEAR, RAPID SENDING MADE EASY

The Vibroplex transmits the same grade of Morse and Continental code as the strongest clearest hand sender, faster than is possible on the ordinary key, and with less than half the labor.

There is no tensing of the muscles, no nerve strain, no pounding on the key in order to make clear, rapid signals. You simply press the lever—the machine does the rest.

New SUPER DE LUXE "PRESENTATION" VIBROPLEX

Amateur Net Price

The Finest Bug Ever Built! 24K Gold-Plated Base Top, Patented Jewel Movement and Super-Speed Control! New patented adjustable main spring affords wider range of speed than ever obtained before in semi-automatic transmitting key. Beautifully designed with polished chromium machine parts mounted on a 24K gold-plated base top, colorful red switch knob, finger and thumb piece and precision-machined. This new Super-DeLuxe "Presentation" Vibroplex key at \$25 affords a life-time of sending enjoyment. Harder than metal, the jewels in this key reduce friction, maintain smoother, easier operation and prolong life.

\$25.00

THE Improved "ORIGINAL" VIBROPLEX

Suitable for All Classes of Transmitting work Where Speed and Perfect Morse Are Prime Essentials

This great new Vibroplex is a smooth and easy working BUG. It has won fame on land and sea for its clarity, precision and ease of manipulation. Can be slowed down to 10 words per minute or less or geared to its high rate of speed as desired. Maintains the same high quality signal at whatever speed, insuring easy reception under all conditions.

SPECIFICATIONS

The improved model single lever. Two pairs of contact points: one for dots, the other for dashes. Weight, 3 lbs. 8 oz. A handsome and efficient transmitting machine, with unlimited sending possibilities. Complete with cord and wedge.

Standard — Polished Chromium top parts, black base. Amateur Net Price.....
DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price

\$15.95

19.50

THE "LIGHTNING BUG" VIBROPLEX

High Quality Signals at All Speeds

SPECIFICATIONS

Single lever, with improved flat pendulum, instantly adjustable dot contact spring, circuit breaker parallel with pendulum. Two pairs of contact points, one for dots, the other for dashes. Complete with cord and wedge. Weight 3 lbs. 8 oz.

Standard—Polished Chromium top parts, black base.

Amateur Net Price

\$13.95

DeLuxe—Polished Chromium base and top parts, with jeweled movement.

Amateur Net Price

17.50

The

Vibroplex

Telegraph & Wireless Transmitting Machines

THE "ZEPHYR" VIBROPLEX

A Genuine Vibroplex. Slightly Lighter in Weight.
Having Plenty of "Pcp" and "Power"

Smaller and more compact but designed in most details the same as the "Lightning Bug" model. Planned to meet the demand for a low priced, efficient and high speed transmitter for telegraph use.

SPECIFICATIONS

Single lever with standard size contact points. Mounted on slightly smaller base. Weight 3 lbs. 2 oz. Equipped with circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price

\$12.50

THE "CHAMPION" VIBROPLEX

For Radio Use Only

The new "Champion" is an inexpensive transmitter having exceptional sending qualities . . . clarity . . . speed . . . sending ease, which will appeal alike to amateur and professional radio operators. Designed to meet the demand for a low priced Vibroplex in the radio field.

SPECIFICATIONS

Single lever with two pairs of contact points. Mounted on large standard size base. Weight 3 lbs. 8 oz. Without circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price

\$9.95

Designed to Fulfill the Demand for
a Low Priced Radio Transmitter

THE "BLUE RACER" VIBROPLEX

Small and compact, the "Blue Racer" Vibroplex can be carried around and never be in the way. Embodies the same sending possibilities, the same carrying qualities, the same strength and durability as the larger models. Built especially to meet the demand of telegraphers requiring a small, lightweight and efficient sending machine.

SPECIFICATIONS

Single Lever. Two pairs of contact points—one for dots, the other for dashes. Weight, 2 lbs. 8 ozs. Complete with cord and wedge.

Standard—Polished Chromium top parts, black base . . .

Amateur Net Price

\$15.95

DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price

19.50

Very similar to the Original Vibroplex except that it is only half the size. Suitable for all classes of telegraph work and in high favor with wireless men

VIBROPLEX CARRYING CASE

Keeps the Machine Free from Dust, Dirt and Moisture
Insures Safe-keeping When Not in Use

A cloth-lined case, finished in handsome simulated black moiré. Corners are reinforced, adding to its durability and attractiveness. A flexible leather handle makes it more convenient to carry. Has lock and key.

PRICE **\$5.50**

The JEWELS used in the DeLuxe Model Vibroplex are the same as placed in the world's finest precision made watches and instruments

A JEWEL bearing main lever insures a "LIFETIME" of service and an ease of operation that can only be referred to as "FEATHER TOUCH" sending.

GENERAL

DRY BATTERIES

General dry batteries contain many outstanding advancements such as extra heavy seamless extruded zinc cups, the famous paper thin separator permitting more mix and more active zinc area by utilization of the cell bottom. The curled rim lock seal which seals each cell individually. These features assure long shelf life as well as the maximum in dry battery performance.

GENERAL A & B RADIO FARM PACKS

General A-B packs are made with L size cells in the A section. These cells are 40% longer than the largest conventional 1 1/4" diameter cell. This construction assures the perfect balance between these "A" and "B" sections for current drains established by the Radio Industry.

GENERAL ABC HOME RADIO BATTERIES

All cells used in General batteries are filled with active mix by loading equipment developed by General which automatically puts the right amount of mix into each cell and packs it uniformly. General home radio batteries are accepted for their uniformity, dependability and long service.

GENERAL PORTABLE A&B PACKS AND A&B BATTERIES

The small size cells used in portable batteries greatly reflect the benefits derived from General's patented construction. General Batteries deliver more service hours per dollar, therefore you will find them used as original equipment in more battery radios than any other brand.

GENERAL FLASHLIGHT CELLS AND LANTERN BATTERIES

General Flashlight and Lantern batteries are designed to give brighter light and recuperate rapidly while idle. The Heavy Duty cells are made for moderate home use. The Industrial is to be used where light is needed frequently and for long periods.

Type	Voltage	Terminals	Std. Pkge.	Pounds Weight	Length	Width	Height	Price

4FB	6	Spiral Springs	10	15.5	2½	1½	8	.70

GENERAL IGNITION BATTERIES, MULTIPLE AND ELECTRIC FENCE

All General batteries are designed to use the most efficient cells available. The 4L1 Hywatt is far superior in service and shelf life to any other battery of comparable size because it consists of four L cells, the service being about double that secured from the conventional No. 6 dry cell. These same L cells are used in the Electric Fence and Multiple batteries and produce most satisfactory performance. GENERAL Electric Fence batteries have no equal.

For use in making quick, temporary electrical connections. Packed 10 in a box, half marked + half plain to indicate polarity. Screw connections

No. 45 PEE WEE

A very small test clip for radio, ignition, meter and similar work. 1 1/2" long. Jaw spread 3/8". Steel, cadmium plated.

EACH NET.....\$0.06 LOTS OF 10.....\$0.04

No. 45-C

Solid Copper R.F. Test Clip

Solid copper radio frequency test clip. Phosphor bronze spring, brass screw. Will not heat up in high frequency test work, entirely non-ferrous. 1 1/2" long.

No. 45-C Clip
No. 47 Insulator

EACH NET.....\$0.09 LOTS OF 10.....\$0.06

(Use No. 47 Insulator for clips 45 and 45-C.)

No. 48-B

A small test and battery clip for radio use and general testing purposes. 2" long. Jaw spread 1/2". Steel, cadmium plated.

EACH NET.....\$0.07 LOTS OF 10.....\$0.045

No. 48-C—Solid Copper. Same size as 48-B.
EACH NET.....\$0.11 LOTS OF 10.....\$0.075

No. 82 Needle Clip

Needle pierces insulated wire. Ideal for quick hookup of truck trailer lighting systems, telephone and signal work. Steel, cadmium plated. 2" long.

EACH NET.....\$0.14 LOTS OF 10.....\$0.10

Use No. 49 Insulator for Clips 48-B, 48-C and 82.

No. 27

A high grade test clip with meshing teeth on three sides of jaws. For laboratory and shop test work 2 1/2" long. Jaw spread 5/8". Steel, cadmium plated.

EACH NET.....\$0.10 LOTS OF 10.....\$0.07

No. 27-C—Solid copper. Same size as No. 27.
EACH NET.....\$0.17 LOTS OF 10.....\$0.12

Use No. 29 Insulator for clips 27 and 27-C.

No. 24-A

A medium sized battery clip. Stands erect on battery post. Lead coated, copper shunt protects spring. 2 3/4" long. Jaw spread 1". Steel, lead plated.

EACH NET.....\$0.12 LOTS OF 10.....\$0.085

No. 24—Solid copper. Same size as No. 24-A.
EACH NET.....\$0.22 LOTS OF 10.....\$0.16

Use No. 26 Insulator for Clips 24-A and 24.

LARGER SIZES OF CLIPS

	Each Net	Lots of 10

CROCODILE CLIPS

U.S. Patent No. 1,999,613

No. 85 or 85-C Clip with
No. 87 Insulator

No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2 1/4" long.

EACH NET.....\$0.07 LOTS OF 10.....\$0.045

No. 85-C—Same as No. 85, except solid copper. A radio frequency, entirely non-ferrous test clip.

EACH NET.....\$0.10 LOTS OF 10.....\$0.07

No. 85-T—New Crocodile "Tip-Clip"—equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removable leads. 2 5/8" long.

EACH NET.....\$0.14 LOTS OF 10.....\$0.10

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and black. Cover entire clip except nose. Protects against short and shock. Helps to distinguish leads.

ALLIGATOR CLIPS

No. 60—CONVENTIONAL TYPE

Accurately made, slim jaws, fine meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2" long.

EACH NET.....\$0.07 LOTS OF 10.....\$0.045

No. 60-S—SCREW CONNECTION

Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET \$0.08 LOTS OF 10 \$0.05

No. 60-CS—COPPER R.F. ALLIGATOR CLIP

Same as No. 60-S except made of solid copper. Has brass screw connection. Ideal for R.F. work. Will not heat up in H.F. circuits. Bright, natural copper finish. 2" long.

EACH NET.....\$0.10 LOTS OF 10.....\$0.07

No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2 1/4" long.

EACH NET.....\$0.11 LOTS OF 10.....\$0.08

No. 60-CHS—COPPER ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-CS except equipped with red and black insulating sleeves on end. Brass screw connection, for R.F. work. 2 1/4" long.

EACH NET.....\$0.14 LOTS OF 10.....\$0.10

WEE-PEE-WEE No. 88

Entirely Non-ferrous. Smaller Than Ever!

An extremely small clip for fine testing in radio and electrical work. Light-Weight; thin-nosed; spring-temper phosphor bronze. Ideal for close-wound coils. 1 1/4" long; jaw spread 1/4".

EACH NET.....\$0.15 LOTS OF 10.....\$0.10

Use No. 93-P R.F. Insulator.

Mueller Electric Co.

THE SNAPPER

A Long Insulated Test Clip and
A "Triple Threat" Radio Tool

U. S. Patent No. 2,074,324

No. 99—7" Long Insulated

The long tube is of insulating material and is fitted with spring contact jaws on the far end.

The jaws are operated by a push of the thumb on the near end. Wire is quickly and easily connected in a hole in the insulator knob binding post on the near end.

May be used as (1) A "Deep Sea" Electric Test Clip—test contacts with ease, deep in the recesses of radio chassis with no danger of short circuits; (2) An Electric Contact Prod—clip jaws may be used to make quick prod contacts, or clip one Snapper on ground circuit and prod with another; (3) A Retriever—start small screws and nuts or pick up odds and ends that may accidentally be dropped into inaccessible places.

PRICE...\$0.83 EACH Dealers' Wholesale Price, each...\$0.50 Net
Snappers are generally used in pairs—1 red and 1 black.

THE NEW No. 22 "TWIN-CLIP"

HAS JAWS ON BOTH ENDS
Something New and Different!

Both jaws may be opened at the same time by pressing the center of the clip, or either jaw may be opened separately without disturbing the grip of the other.

Two inches long, made of cadmium plated steel. Has screw connection.

The Twin-Clip is a real time-saver in many electrical and mechanical applications. May be used to make a quick splice, temporary repair hookup, hanging and racking various articles for display or industrial processing, holding identification and record cards, etc.

Packed 10 in a box

EACH NET \$0.10 LOTS OF 10 \$0.07

CLAMPIPE GROUND CLAMP

CLAMPIPE

U.S. PATENT No. 1,794,976

No. 58

The best ground clamp value on the market. Applicable to pipe 3/8" to 1 1/2" outside diameter.

Packed 10 in a box

EACH NET \$0.13 LOTS OF 10 \$0.09

BATTERY POST ADAPTER

For Making Non-Corrosive, Semi-Permanent
Connections to Storage Batteries

No. 103—Is simply pressed, not burned, on to battery post. The wire is quickly and easily connected under the thumb nut.

Made of non-corrosive antimonial lead. Ideal for use on battery operated home appliances.

No. 103

Packed 10 in a box

EACH NET \$0.24 LOTS OF 10 \$0.17

BATTERY CHARGING JUMPERS

No. 89—MUELLER CLIP JUMPER

A complete jumper, ready to use. Two No. 24-A clips and 14" of insulated wire.

EACH NET \$0.30 Packed 10 in a box LOTS OF 10 \$0.21

No. 57—MUELLER TAP-TITE SPIKE JUMPER

Hard, pointed steel pins soldered to ends of wire and held firmly in lead coated steel jackets. Drive into battery posts.

EACH NET \$0.28 Packed 10 in a box LOTS OF 10 \$0.20

No. 38—MUELLER PRES-TITE JUMPER

Is simply pressed over battery posts. Made of non-corrosive, antimonial lead.

EACH NET \$0.43 Packed 10 in a box LOTS OF 10 \$0.30

BATTERY CARRIERS

No. 73—MUELLER "COCKEYED CARRIER"

No. 73—A rugged carrier with heavy, rubber covered strap which will stand plenty of abuse. To use, drop the end pieces over the battery posts and lift up. This cocks the eyes and they grab hold. The heavier the battery the tighter the grip. 12" long. Packed 10 in a box.

EACH NET \$0.42 LOTS OF 10 \$0.30

NEW EXTRA LONG CARRIER

No. 73-EL—19" long. Ample length to take the new long batteries in some latest model cars. Same construction as No. 73. Packed 10 in a carton.

EACH NET \$0.53 LOTS OF 10 \$0.37

MALLORY VIBRAPACK* POWER SUPPLIES

Type VP-554 • VP-F558

Type VP-552 • VP-G556

Type VP-551

Type VP-553

NOISE SUPPRESSION

● Vibrapacks are equipped with built-in noise suppression equipment. Type VP-555 also includes an efficient low-frequency hum filter. Type VP-557 incorporates the first input filter condenser only. Other Vibrapacks do not include the high-voltage hum filter. High-voltage filter requirements are similar to equivalent AC power packs.

Type VP-555 • VP-557

Type VP-540

Type VF-223 Audio Filter

● A complete audio filter system for use with all single-unit Vibrapacks. Designed to give maximum suppression of hum with minimum voltage drop. Especially recommended for applications which are sensitive to hum, or where voltage regulation is important as in Class "B" audio amplifiers.

Catalog Number	Nominal Operating Voltage	Nominal Output Voltage	Maximum Output Current	Type
VP-540	6.3	250	60 ma.	Self-Rectifying
VP-551	6.3	125-150 175-200	100 ma.	Self-Rectifying
VP-552	6.3	225-250 275-300	100 ma.	Self-Rectifying
VP-553	6.3	125-150 175-200	100 ma.	Tube Rectifier
VP-554	6.3	225-250 275-300	100 ma.	Tube Rectifier
VP-555	6.3	300	200 ma.	Tube Rectifier
VP-557	6.3	400	150 ma.	Tube Rectifier
VP-G556	12.6	225-250 275-300	100 ma.	Self-Rectifying
VP-F558	32	225-250 275-300	100 ma.	Tube-Rectifying

*Includes complete audio filter.

MOTOR-DRIVEN POWERSTATS

Many applications require that POWERSTATS be controlled from remote push-button stations or by automatic controllers. For these requirements, a standard line of motor-driven POWERSTAT variable transformers is available in the same capacities as manually operated units. To offer the same control as obtained with handwheel adjustment, a special three-wire synchronous motor is used to drive the POWERSTAT. It consists of two windings with externally mounted capacitor and resistor. By employing the appropriate gearing combinations, various speeds can be obtained to suit each need.

TYPE MX1156

Standard speeds . . . 5, 6, 14, 19 and 45 seconds . . . for time of full range travel from zero to maximum output voltages. Motor assembly operates from a 115 volt single phase source . . . maximum current — 0.4 amps. Rotor shaft ball-bearing mounted . . . rapid starting . . . and practically instantaneous stopping.

TYPE MY1226-3

OIL-COOLED POWERSTATS

Space limitations and the atmosphere in which a POWERSTAT is to operate sometimes dictates the use of an oil-cooled unit. The capacity of POWERSTATS can be increased above normal air-operation when mounted in transformer oil . . . amount of increase depends on type of POWERSTAT . . . area of wetted surface . . . type of container. Most POWERSTATS can be adapted to oil mounting but since applications vary extensively only single phase O-116, O-216, O-1126 and O-1226 types are available as standard. Type O-1126 illustrated is typical unit. Refer all inquiries on use of oil-cooled POWERSTATS to the factory.

TYPE O-1126

POWERSTAT LINE CORRECTORS

Where the wide output voltage range of a POWERSTAT variable transformer is not necessary, but relatively large amounts of power must be controlled, a POWERSTAT Line Corrector is recommended. POWERSTAT type LC consists of a POWERSTAT, appropriately tapped, controlling the primary of a step-down fixed-ratio transformer. By rotating the brush element, different voltages are applied enabling the secondary, which is in series with one side of the line, to buck or boost the line voltage. Can be used for line voltage correction to obtain nominal output voltage from varying power lines . . . or on constant voltage line or furnish variable output voltage over a limited range at large current capacities.

TYPE 2106 LC

THE SUPERIOR ELECTRIC CO., 12 MEADOW STREET BRISTOL, CONN.
 POWERSTAT VARIABLE TRANSFORMERS • STABILINE VOLTAGE REGULATORS • VOLTBOX A-C POWER SUPPLY

NOTE 1. To make this substitution certain wiring changes are necessary. See instruction sheet packed with vibrator or installation note in the Mallory Vibrator Guide and the 5th Edition Radio Service Encyclopedia.

NOTE 2. An exact duplicate is no longer available. Every effort is being exerted to determine a satisfactory substitute. If a substitute can be made available, your Mallory Distributor will be advised.

NOTE 3. To make this substitution the six-prong socket must be changed to a 4-prong UX base socket and wired to match basic diagram 8.

Int.—Interrupter Syn.—Synchronous

*Hermetically Sealed Construction.

iA grounding cup for 1 1/2" dia. vibrators which makes a low r.f. ground connection between vibrator can and power supply chassis.

‡To be discontinued when supplies are exhausted.

1No ground strap.

MALLORY TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems.

Contains page after page of information profusely illustrated. It's worth far more than its price.

MALLORY VIBRATORS

These Mallory Vibrators Meet 90% of Your Replacement Needs

● The 12 basic vibrator types listed at right cover 90% of your replacement needs. The entire line of Mallory Vibrators has been simplified so that replacements can be made easily and quickly. By effecting substitutions, Mallory is materially reducing the number of vibrators needed to meet your requirements.

This Mallory standardization program means that your distributor stocks fewer vibrator types and more units of each—thus delivery is tremendously speeded up.

The vibrator replacement problem is being simplified but Mallory quality remains the same. Mallory precision vibrators, backed by years of outstanding performance, still offer the dependability, the long life and the trouble-free service that you and your customers expect. It pays to insist on Mallory Approved Precision Products.

MALLORY BATTERY CHARGERS

APPLICATIONS — Mallory Automotive Battery Chargers provide convenient, efficient and economical charging of any storage battery used in automobiles, buses, trucks, tractors, taxicabs, small boats, airplanes, and on the farm. Taper charging (an automatically decreasing charging rate) is designed into all Mallory chargers to prevent damage to battery plates and to insure maximum battery life. These chargers also are ideal for charging any 6 or 12-volt storage battery used in industrial applications, engineering and research laboratories, test equipment, and service benches, etc.

Although designed principally for storage battery charging, Mallory Automotive Battery Chargers may be used for numerous other applications. They provide an ideal power source for electroplating, model and toy trains, telegraph systems, relays and solenoids, vending machines, electric organs, generator fields, etc. In conjunction with an adequate filter they may be used as a power source for farm and portable radio filaments, telephone systems, loud speaker fields, exciter lamps, scientific apparatus, etc.

DESCRIPTION—The heart of these chargers is the Mallory Magnesium-Copper Sulfide all-metal rectifier. Unaffected by temperature and able to withstand phenomenal abuse, they provide stable output without adjustment over long life. With an exclusive self-healing feature, Mallory rectifiers have been time-tested and proved to be the most rugged dependable rectifier for battery-charging applications.

Mallory Automotive Battery Chargers are made in five models to cover the complete charging field from battery boosters

to fast chargers. All chargers are conservatively designed with circuit protection and meters where required, and large capacity battery clips for ready connection to battery posts. All models are designed for operation from 115-volt 60-cycle power lines and are equipped with ample lengths of both AC and DC cables.

MOUNTING—All chargers are readily portable. They may be placed anywhere: in the car, on the garage floor, on a bench, etc. The small models are equipped with two holes for wall mounting where desirable.

ACCESSORIES—Although equipped with battery clips, a readily attachable polarized dashboard plug and receptacle (No. R-652) is available as an accessory for simple installation in an automobile. The addition of this receptacle makes possible simple plug-in connection of the charger to the car battery. Extra battery clips (No. R-653) are available. Automatic timer control (No. R-654) is offered for use with battery chargers to control the charge. It may also be used with many household appliances.

PACKAGING—One charger per cardboard shipping carton.

No. R-652—Polarized Dashboard Receptacle.

No. R-654—Automatic Timer Control for 6AC60 Charger. Variable time setting up to 57 minutes. Contacts rated 20 amperes, 115 volts AC or 10 amperes, 230 volts, (suitable for light DC loads). Also ideally suited to control lights, sunlamps, radios, fans, heating devices and numerous other electrical household appliances.

MALLORY RECTIFIERS

F24H1P

IS16CB7

IS16B9

IB4R

IB8R

IB12C1J

APPLICATION—Mallory Magnesium-Copper Sulfide Rectifiers are time-tried and proved to be the most rugged, dependable rectifiers for those applications requiring low DC voltages at medium and high currents such as battery chargers and eliminators, electroplating, motion picture projector arcs, welding, engine starting, circuit breaker reclosing, solenoid and relays operation, etc.

DESCRIPTION — Mallory Magnesium-Copper Sulfide Rectifiers are all metal in construction, ruggedly assembled under high pressure to withstand severe vibrations and shock. There are no bulbs, liquids, moving parts or sparking contacts. Unlike all other types of rectifiers, they contain no temperature-sensitive films or layers, and have phenomenal ability to withstand abuse and extremes of temperature (-90° to $+265^{\circ}\text{F.}$). Constant output without circuit adjustments is assured over many years of useful life. Should an accidental voltage surge occur, the rectifying film will "self-heal."

SCOPE AND SIZES—Many sizes are available to supply low DC voltages from watts to kilowatts. A new rectifier engineering data folder is available upon request, covering other sizes for single phase and three phase applications, both convection and fan cooled. In addition to rectifier stacks, P. R. Mallory & Co., Inc. also manufacture a complete line of Rectoplatters (distributed exclusively by the UdyLite Corporation, 1651 East Grand Boulevard, Detroit 11, Michigan), Rectotruck Chargers (industrial electric truck chargers available through truck agents), Rectostarters (aircraft engine starters and electrical equipment testers) and Rectopower Sup-

plies for general laboratory use). Catalogs and additional information available upon request.

REPLACEMENT RECTIFIERS—The Mallory Magnesium-Copper Sulfide Rectifiers listed below are only those popular sizes regularly carried in stock, principally for replacement purposes. These same rectifiers, however, may be used for numerous other applications. For example, the IB4R and IB8R rectifiers are ideal for reversing the direction of HO and O gauge model train locomotives respectively, using wound field motors (as illustrated in the wiring diagram, page 7). IB12C1J, IS16CB7, and IS16B9 rectifiers may be readily used to assemble tapering battery chargers as illustrated in the wiring diagram, page 7. The IS24B9 rectifier may be used to make up a battery eliminator to operate and test modern automobile radio receivers as shown, page 7. Other applications immediately suggest themselves, such as electroplating, model and toy train DC power sources, radio filament supplies, chatter-free relay and solenoid operation, electric organ, automotive electrodynamic speaker field supplies, generator fields, telephone and telegraph system power supplies, etc.

MOUNTING—Rectifiers are available in either foot, bolt, or stud mounting, the latter two insulated from mounting means. Refer to note below table for type of mounting on replacement rectifiers.

HARDWARE—Wherever possible or practical, universal mounting hardware is included to assist in the ready replacement of old rectifier types.

PACKAGING—Rectifiers are packed one per display carton.

Mallory Page 6 (See Mallory Page 1 for List Prices)

NOTE: All rectifiers are single phase, full wave, bridge type.

Mounting Prefix: IB=Insulated Bolt; B=Grounded Bolt; F Grounded Foot; IF=Insulated Foot; IS=Insulated Stud.

P suffix designates reverse polarity stacking. Center terminal is DC positive.

J suffix designates universal construction with loose mounting feet for foot, bolt or stud mounting replacement.

†To determine AC Amps: Multiply the DC amps by the following factors:
Inductive load by 1.1; resistive load by 1.2; capacitive load by 1.4.

*Use base from old rectifier.

MALLORY SPECIAL COMPONENTS AND MISCELLANEOUS ITEMS

MALLORY Type 8301 INDUCTUNER*

● The Inductuner is a three-gang, infinitely variable inductance tuning device, designed to provide continuous frequency selection over a range of frequencies from approx. 50 to 240 megacycles, covering the 1 $\frac{1}{2}$, 2, and 6-meter bands, as well as all television and FM bands. Various tuning ranges can be selected by varying the circuit constants, as required. The ten-turn, or 3600° rotation, permits convenient selection of the frequency desired without the use of a bandspread by the use of a suitable bandpass circuit.

At the present time the Inductuner has acceptance as the tuning unit in television receivers that offer FM, police, aircraft and amateur reception, as well as the full 13 channels assigned for video transmission.

The complete assembly is substantially mounted in a die-cast frame, completely shielded. Size 7 $\frac{3}{16}$ " long x 1 $\frac{9}{16}$ " x 1 $\frac{13}{16}$ ".

A technical information bulletin is available on request, containing complete details, electrical characteristics, and suggested circuits.

Inductuner—Registered trade mark for Mallory variable inductance tuning devices. Manufactured and sold under one or more of the following Paul Ware and Mallory patents: 2,163644, 2,163645, 2,163646, 2,163647, 2,260877, 2,377789, 2,377790, 2,399060, 2,405890. Other patents applied for.

TYPE VC-101 VIDEOCOUPLER

● The Mallory VC-101 Videocoupler is a compact inter-stage coupling unit for use in the wide-band amplifiers commonly found in television, radar and oscilloscope equipment. It consists of peaking inductances and a load resistance which provide an essentially flat frequency response to 4 mc. per second. It is designed to work into a terminating capacity of 22.5 mmfd. When used with a 6AC7 tube in a proper circuit, a stage gain of approximately 25 may be realized. Mounting space required: 1 $\frac{3}{4}$ " long x $\frac{3}{4}$ " in diameter; max. dissipation 2 watts; finish, high-temperature enamel. Use a No. 6 bolt through the core for mounting.

(TYPE YO) YARD-OHM RESISTANCE KITS

● Each Yard-Ohm Resistance Kit consists of all necessary materials to construct flexible resistors of a wide range of values. The Yard-Ohm Kit provides a real solution to the odd-value resistor problem. In addition to replacement applications, resistors made from the Yard-Ohm Kit are ideal for meter shunts, and for use wherever a high quality flexible resistor is desired.

Each Mallory Yard-Ohm Kit consists of the following: 1 yard spiral wound resistance wire; 1 yard insulated braid; 24 spiral wire leads. The kit is available in eight resistance values.

Dissipation—all types: $\frac{1}{2}$ watt per inch.

Catalog Number	Resistance Value (Ohms per Inch)	Carrying Capacity in Amperes	Catalog Number	Resistance Value (Ohms per Inch)	Carrying Capacity in Amperes
YO-1	1	.707	YO-50	50	.100
YO-5	5	.315	YO-100	100	.071
YO-10	10	.223	YO-250	250	.044
YO-25	25	.141	YO-500	500	.031

GRID BIAS CELLS

● The Mallory Grid Bias Cell is a small acorn-shaped, self-contained device. The metal container or cup is the negative electrode. The black disc is the positive electrode. Available in two types—1-volt and 1 $\frac{1}{4}$ -volt cells. For new installations, the choice of Bias Cell types will depend on the voltage desired. Replacements should be made with the type of Bias Cell used as original equipment.

The 1 $\frac{1}{4}$ -volt Bias Cells may be distinguished from the 1-volt unit by the concave depression in the bottom of the shell case.

Application

The principal use of Mallory Grid Bias Cells is in the biasing of the first audio amplifier tube in modern high-gain receivers. Diagram of a typical circuit is shown at right. The bias cell does not need to be bypassed to ground.

Correspondence is invited regarding the application of Mallory Grid Bias Cells. Special Technical Bulletin No. GBC746 may be obtained on request.

Characteristics

The no-current potential of Mallory Grid Bias Cells is within plus or minus 10% of their rated voltage.

Current—The cell is strictly a potential or voltage cell for biasing class "A" amplifier tubes and should not be used for biasing power tubes or oscillators; or for any circuit where direct current may flow through, or be drawn from, the cell.

Temperature—The cells may be used at temperatures from 0°F to 140 F. The voltage of the cell remains reasonably constant throughout this wide temperature range. It is recommended, however, that wherever possible the bias cell be placed in the coolest location.

Humidity—The cell exhibits no change in characteristics when exposed to a relative humidity of 90% at 120°F.

Impedance—Mallory Grid Bias Cells are non-reactive at audio frequencies. For the 1-volt cell, the DC resistance ranges between 11,000 and 50,000 ohms. The DC resistance of the 1 $\frac{1}{4}$ -volt cell ranges between 10,000 and 40,000 ohms.

Noise—The cells do not cause noise.

Cat. No.	Description
BC-1	1-volt Grid Bias Cell (packed 10 to box)
BC-2	1 $\frac{1}{4}$ -volt Grid Bias Cell (packed 10 to box)

SOLDERING IRON TIPS

No. 311 Replacement tip for soldering irons that are turned on for short periods only. Heats quicker than No. 312, but is not as long wearing. Made of a special Mallory copper alloy long in use as a welding tip material. Nickel plated to resist corrosion. Size—3/8" diameter, 4" length. Plunger style with "screw driver" point.

No. 312—Replacement tip for soldering irons that are used continuously for long periods of time. Made of a special Mallory copper alloy of great hardness and high electrical conductivity. Nickel plated to resist corrosion. Size—3/8" diameter, 4" length. Plunger style, with "screw driver" point.

MOUNTING NUTS • HEXAGON TYPE

THESE 10 POPULAR ATR VIBRATORS MEET 90% OF YOUR SERVICE NEEDS

ATR • ELIMINATORS • ATR

AMERICAN TELEVISION & RADIO CO.

Illustrates Heavy Duty "A" Battery Eliminator, Type 620C-ELIP. Equipped with Voltmeter, Ammeter and Voltage Control.

- Fully Automatic and Fool-Proof.
- Eliminates Storage Batteries and Battery Chargers.
- Operates the Equipment at Maximum Efficiency at all Times.
- Delivers Filtered Direct Current at the Correct Voltage for Proper Operation.

SUGGESTED USES:

As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D. C. voltages.

Battery Eliminators may be treated as batteries in the sense that they can be connected in series for higher voltages at the same current output per unit or in parallel for the same output voltage per unit at higher currents.

Equipped with Full-Wave Dry Disc Type Rectifier, Assuring Noiseless, Interference-Free Operation and Extreme Long Life and Reliability.

TYPE 610 ELIB—Rated output 6 volts at 10 amperes. Size 6½" x 9¾" x 8½"; shipping weight, 22 lbs. Code word, "SELIB".

Net Price \$29.70

TYPE 620C ELIP—Uses dual rectifiers. Size 6½" x 12¾" x 8½". Shipping weight, 33 lbs. Code word, "HELIN".

Rated Output: 6 volts at 18 amperes or 12 volts at 9 amperes. Either output obtainable by means of simple output terminal switching arrangement.

Net Price \$45.90

All ATR Eliminators have as standard equipment: On-Off Switch, Voltage Control, Meters, Fuse Protection, Rubber Mounting Feet, 6-Ft. All-Rubber Cord Set, and Cabinet of heavy gauge metal having attractive grey-wrinkled finish.

ATR "A" BATTERY ELIMINATORS

Specially Designed for Testing and Operating Auto Radios and D. C. Electrical Apparatus on Regular A. C. Lines, 105-125 Volts 50-60 Cycles.

Illustrating Standard "A" Battery Eliminator, Type 610 ELIB. Equipped with Voltmeter and Voltage Control.

AMERICAN TELEVISION & RADIO CO.

ATR STANDARD AND
HEAVY DUTY

RADIO INVERTERS

Specially Designed for Operating A.C. Radios, Public Address Systems, Television Sets, Amplifiers, Intercall Systems, and Radio Test Equipment from D. C. Voltages in Vehicles, Ships, Trains, Planes, and in D. C. Districts.

Illustrates all Standard ATR Radio Inverters except types 6 and 12 RSB.

This group of ATR Inverters is specially recommended for use with A. C. radios, amplifiers, and similar electronic equipment, being exceptionally well filtered to insure interference-free radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life radio operation. All models indicated are equipped with an ATR ten-contact plug-in Inverter Vibrator of new design and construction having dual arms and utilizing eight 1/4" diameter tungsten power contacts and two silver alloy driver contacts, insuring increased long life and reliable service. These Inverters also come equipped with four point voltage regulators, which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal; the operating efficiency is in excess of 85%.

Type	Input D.C. Volts	A.C. Output 60 Cycles	Output Wattage		Code Word	List Price
			Inter- mittent	Con- tinuous		
6 RSC	6	110 volts	85	75	ARSCP	\$44.00
12 RSC	12	110	125	100	BRSCF	44.00
24 RSC	24	110	125	100	NRSCQ	48.50
32 RSC	32	110	150	100	CRSCF	45.50
32B-RHC	32	110	200	150	DRHCG	69.50
50 RSC	50	110	150	100	ERSCF	57.00
110 RSC	110	110	250	150	GRSCJ	45.50

ATR Low Power INVERTERS

For Operating Small A. C. Motors, Electric Razors, Radios, and Devices of Approximately 35 watts Consumption from 6, 12, 24, 32, 110, and 220 volt D. C. Lines.

This line of ATR Low Power Inverters was specially brought out to meet the insistent demand for a good, low power, inexpensive portable inverter for operating phonograph and other A. C. motors and a host of small A. C. devices from D. C. voltage sources. These inverters operate at an efficiency in excess of 90% and are designed for operation of loads having a power factor as low as 60%. They are ruggedly built and powered by a special ATR six-contact plug-in Inverter Vibrator utilizing four 1/4" diameter tungsten power contacts and two silver alloy driver contacts.

Type	Input D. C. volts	A.C. Output 60 cycles	Wattage		Code Word	List Price

110 LID	110	110	75	50	DLIDP	29.50
220 LID	220	110	75	50	ELIDQ	32.50

Radio frequency interference suppressed.
 Any of the above type Low Power Inverters are available with 220 volt A. C. output at prices 25% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Low Power Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "DLIDT". Dimensions, 5 3/4" x 4" x 6 3/4"; shipping weight, 7 lbs.
 Replacement Vibrators for any of the above Low Power Inverters are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.

ATR STANDARD AND HEAVY DUTY INDUSTRIAL INVERTERS

For Operating A. C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A. C. Electrical Appliances from D. C. Lines.

These units are specially designed for applications as indicated, permitting the use of standard A. C. equipment on D. C. lines. These inverters operate at an efficiency in excess of 80% and are carefully built and equipped to give the longest possible life and operating satisfaction. All inverters indicated utilize ATR ten contact plug-in vibrators, and are also equipped with four point voltage regulators as fully described above. These Industrial Inverters are recommended for use with loads having power factors as low as 60%, and as low as 50% for the "P" Inverters indicated. These Inverters should not be used with Neon signs.

Illustrating Heavy Duty Models Radio and Industrial Inverters except types 6 and 12. Types 6 and 12 Industrial Inverters are illustrated by small cut on page M-23.

Type	Input D.C. volts	A.C. Output 60 cycles	Output Wattage		Code Word	List Price
			Intermittent	Continuous

220P*-ISP	220	110	300	150	KISPM	57.00

Radio frequency interference not suppressed.
 Any of the above type Inverters are available with 220 volt A. C. output at slightly higher prices. In ordering, follow similar directions given above.
 ATR Standard and Heavy Duty Industrial Inverters are housed in attractively finished grey-wrinkled metal cabinets.
 Dimensions of Standard Model Industrial Inverters, 8 3/4" x 9" x 5 1/4".
 Shipping weight, 19 lbs.
 Dimensions of Heavy Duty Industrial Inverters, 6 1/2" x 11 1/8" x 8 1/2"; shipping weight, 30 lbs.
 For correct replacement vibrator, consult Inverter Vibrator Guide.
 "P" Inverters are corrected for loads having power factors as low as 50%.
 Built-in filter, \$10.00 additional.

ELECTRIFY with ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.

FOUR TYPICAL MODELS are shown on this and

the following page. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue hammerloid.

MODEL "S" COMPACT
With Selenium Rectifier

Operates Any 1.4 Volt — 4, 5 or 6 Tube Battery Radio from 115 Volt, 60 Cycle Source

Designed for sets using 1A7, 1E1, 1N5G, 1Q5G, tubes to convert battery radio to an efficient AC receiver with low operating cost. Fits in battery compartment of most radios. Ideal for use in home, hotel, camp or any place where normal AC is available.

Technical Data

"A" Supply Output

5-6 tubes (average) 1.4 V. @ 320 ma.
4 tubes 1.4 V. @ 250 ma.
4 tubes 1.4 V. @ 200 ma.

"B" Supply Output

50 Volts DC @ 12 ma. max.

Primary

115 Volts AC @ 60 cycles.

Specifications

Six foot cord and plug — switch in cord.

Size: 2 3/8" x 3 1/2" x 6 3/4".

Weight packed: 5 1/2 pounds.

On and Off switch for permanent mounting — becomes part of the radio.

LIST PRICE \$16.75

MODEL "P" COMPACT

Same as MODEL "S" except has tube rectifier. Also available for 220 Volt operation.

LIST PRICE \$15.00

MODEL "F" COMPACT

Operates Any 2 Volt — 4, 5, 6 or 7 Tube Battery Radio from 115 Volt, 60 Cycle Source

For receivers using 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1H1G, etc. tubes to change radio into an all-electric set. Inexpensive to operate.

Technical Data

"A" Supply Output

7 tubes 2 V. @ 480 Ma. — 500 ma. max.
6 tubes 2 V. @ 420 ma.
4-5 tubes (average) 2 V. @ 325 ma.

"B" Supply Output

67, 90, 1.2, 135 Volts DC @ 18 ma.

Primary

115 Volts AC @ 60 Cycles. Also available for 220 Volt Operation.

Specifications

Six foot cord and plug, switch in cord.

Size: 2 5/8" x 4 1/2" x 8 1/4".

Weight packed: 5 1/2 pounds.

LIST PRICE \$17.95

MODEL "R" SYNCRO POWER

Same as Model "F" but operates from 6 Volt DC source. Supplied with cord and battery clips. On and Off switch in eliminator turns power on.

LIST PRICE \$18.95

ELECTRO PRODUCTS LABORATORIES

ELECTRO

ELECTRICAL AND RADIO EQUIPMENT

BATTERY ELIMINATORS *of Distinction*

ELECTRIFY with ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.

FOUR TYPICAL MODELS are shown on this and

the preceding page. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue hammerloid.

MODEL "Q" SYNCRO POWER

Operates Any 1.4 Volt — 4, 5, or 6 Tube Battery Radio from 6 Volt DC Source

This Eliminator is to be used where 115 Volt AC lines are not available. Will provide all "A" and "B" voltages more efficiently and at lower cost from 6 Volt battery. Will operate a 4-tube radio three weeks at 3 hours a day on a single storage battery (100 A.H.) charge.

Technical Data

"A" Supply Output

5-6 tubes (average)	1.4 V. at 320 ma.
4 tubes	1.4 V. at 250 ma.
4 tubes	1.4 V. at 200 ma.

"B" Supply Output

90 Volts DC at 12 ma. max.

Primary

6 Volts DC at 0.8 Amp. (for 4-tube radio).

Specifications

Cord and battery clips on primary.

On and Off switch in Eliminator turns power on.

Size: 2 $\frac{3}{8}$ " x 3 $\frac{1}{2}$ " x 6 $\frac{3}{4}$ ".

Weight packed: 3 $\frac{1}{2}$ pounds.

LIST PRICE \$16.50

MODEL "A" POWER SUPPLY

Operates latest type auto radios with solenoid tuning and tone controls — also 12 Volt marine and aircraft radios from 115 Volt, 60 Cycle Source. In parallel supplies 6 Volts at 15 Amps. In series 12 Volts at 7 $\frac{1}{2}$ Amps.

Separately, 6 Volts at 7 $\frac{1}{2}$ Amps.

Designed especially to do away with the bother of old-fashioned storage batteries. Ideal for the radio service man. Two separately filtered DC output sources are provided for convenience. Heavy duty transformer and chokes; and two large capacity condensers provide excellent voltage regulation.

Technical Data

Output

6 Volts — 15 Amps. continuous.
6 Volts — 25 Amps. max. instantaneous.
12 Volts — 7 $\frac{1}{2}$ Amps. continuous.
6 Volts — 7 $\frac{1}{2}$ Amps. two sections continuous.

Primary

Taps on transformers for 105, 115, 125 Volts, 60 cycle AC. Each completely filtered section is separately fused for heavy overloads.

Specifications

Six foot rubber cord and plug.

Size: 7 $\frac{3}{4}$ " x 7 $\frac{3}{4}$ " x 11 $\frac{3}{4}$ ".

Weight packed: 31 pounds.

Electrostatic shield with R.F. line filter.

Large capacity bridge type rectifiers.

Two 2,000 M.F.D. condensers.

Terminals on front of panel with wing nuts.

LIST PRICE \$65.00

ELECTRO PRODUCTS LABORATORIES

POWERSTAT VARIABLE TRANSFORMERS

A POWERSTAT variable transformer is an auto-transformer of toroidal core design with a movable brush-tap which rotates to deliver a continuously adjustable output

voltage from a-c power lines. Incorporated into each POWERSTAT are superior qualities of top electrical performance, rugged mechanical construction, compact design, and durability.

TYPE 20

Input: 115 volts, 60 cycles, single phase.
Output: 0-135 volts, 3.0 amperes, 405 va.

THE 1/2 KVA SERIES — TYPE 20

Ideally suited for applications requiring small, compact variable transformer of relatively low electrical capacity . . . rated at 3.0 amperes . . . fits space 3 1/2" x 3 3/4". Five terminals permit clockwise or counter-clockwise rotation . . . increases voltage up to or above line voltage. Can be ganged for wye or open-delta operation to meet 3-phase requirements. Back-of-panel mounting.

TYPE 116U

Input: 115 volts, 50/60 cycles, single phase.
Output: 0-115/135 volts, 7.5 amperes.

THE 1 KVA SERIES — TYPES 116-216

Both units alike in physical appearance . . . type 116 for 115 volt application . . . type 216-230 volt operation. Bench or wall-mounted. Units have protective screening, output receptacle, "on-off" switch, input cord-plug, and output lead fused . . . standard units furnish output 17.5 percent above line. Back-of-panel mounting available . . . without above accessories. Clockwise or counter-clockwise rotation . . . can be mounted in tandem for two and three phase operation. Motor drives available.

TYPE 116

Input: 115 volts, 50/60 cycles, single phase.
Output: 0-135 volts, 7.5 amperes, 1 KVA.

THE 2 KVA SERIES — TYPES 1126-1226

Available in a number of models for single or poly-phase duty. Different types feature . . . exposed terminals . . . fuse protection . . . output receptacle . . . input cord-plug. All units with exposed terminal studs can be obtained with motor-operators. Type 1126 for 115 volts . . . type 1226 for 230 volt operation.

TYPE 1226

Input: 230/115 volts, 50/60 cycles, single phase.
Output: 0-270 volts, 9.0 amperes, 2.4 KVA.

TYPE 2PF1126

Input: 115 volts, 50/60 cycles, single phase.
Output: 0-135 volts, 15 amperes, 2.0 KVA.

THE 5 KVA SERIES — TYPES 1156-1256

High power units . . . type 1156 (115 volts) controls any load up to 25 amperes . . . type 1256 (230 volts) has a current rating of 28 amperes. Six parallel, ganged, type 1156 on a common shaft will deliver a variable voltage to load requirements up to 270 amperes . . . six parallel, ganged, type 1256 offers a variable output of 0-270 volts at 168 amperes. Motor drive available.

TYPE 1256

Input: 230/115 volts, 50 60 cycles, single phase.
Output: 0-270 volts, 28 amperes, 7.5 KVA.

THE **SUPERIOR ELECTRIC CO.**, 12 MEADOW STREET BRISTOL, CONN.
POWERSTAT VARIABLE TRANSFORMERS • STABILINE VOLTAGE REGULATORS • VOLTBOX A-C POWER SUPPLY

MOTOR-DRIVEN POWERSTATS

Many applications require that POWERSTATS be controlled from remote push-button stations or by automatic controllers. For these requirements, a standard line of motor-driven POWERSTAT variable transformers is available in the same capacities as manually operated units. To offer the same control as obtained with handwheel adjustment, a special three-wire synchronous motor is used to drive the POWERSTAT. It consists of two windings with externally mounted capacitor and resistor. By employing the appropriate gearing combinations, various speeds can be obtained to suit each need.

TYPE MX1156

Standard speeds . . . 5, 6, 14, 19 and 45 seconds . . . for time of full range travel from zero to maximum output voltages. Motor assembly operates from a 115 volt single phase source . . . maximum current — 0.4 amps. Rotor shaft ball-bearing mounted . . . rapid starting . . . and practically instantaneous stopping.

TYPE MY1226-3

OIL-COOLED POWERSTATS

Space limitations and the atmosphere in which a POWERSTAT is to operate sometimes dictates the use of an oil-cooled unit. The capacity of POWERSTATS can be increased above normal air-operation when mounted in transformer oil . . . amount of increase depends on type of POWERSTAT . . . area of wetted surface . . . type of container. Most POWERSTATS can be adapted to oil mounting but since applications vary extensively only single phase O-116, O-216, O-1126 and O-1226 types are available as standard. Type O-1126 illustrated is typical unit. Refer all inquiries on use of oil-cooled POWERSTATS to the factory.

TYPE O-1126

POWERSTAT LINE CORRECTORS

Where the wide output voltage range of a POWERSTAT variable transformer is not necessary, but relatively large amounts of power must be controlled, a POWERSTAT Line Corrector is recommended. POWERSTAT type LC consists of a POWERSTAT, appropriately tapped, controlling the primary of a step-down fixed-ratio transformer. By rotating the brush element, different voltages are applied enabling the secondary, which is in series with one side of the line, to buck or boost the line voltage. Can be used for line voltage correction to obtain nominal output voltage from varying power lines . . . or on constant voltage line or furnish variable output voltage over a limited range at large current capacities.

TYPE 2106 LC

THE SUPERIOR ELECTRIC CO., 12 MEADOW STREET BRISTOL, CONN.
 POWERSTAT VARIABLE TRANSFORMERS • STABILINE VOLTAGE REGULATORS • VOLTBOX A-C POWER SUPPLY

VOLTBOX A-C POWER SUPPLIES

VOLTBOX a-c power supplies are instruments which have many applications in the physical and chemical laboratory as the compact portable source of variable a-c voltage.

The new VOLTBOXES offer features of lightness, pleasing appearance and flexibility . . . contained in a cast-aluminum case are a POWERSTAT variable transformer; an easily read voltmeter accurate to two (2) percent; three (3) output receptacles, and a set of Superior Binding Posts; an "ON-OFF" switch and "LINE-LOAD" switch; renewable fuse; and six (6) foot cord-plug.

The new VOLTBOXES are type UC1M (115 volts) and type UC2M (230 volts) . . . both are alike in appearance. Operation is simple . . . input cord-plug is connected to 50/60 cycle single phase source . . . "ON-OFF" switch in "ON" position . . . "LINE-LOAD" switch at "LOAD" . . . rotation of knob produces a continuously adjustable output voltage from 0 to 17 percent above line voltage . . . line voltage is read by moving "LINE-LOAD" switch to "LINE" . . . renewable fuse offers overload protection.

For users who already have a POWERSTAT variable transformer type 116 or 216 in their possession, but require features of new VOLTBOX, the VOLTBASE is available . . . easily installed. VOLTBASE ratings are dependent on POWERSTAT used.

TYPE UC1M

Input: 115 volts, 50/60 cycle, single phase.
Output: 0-135 volts, 7.5 amperes, 1060 va.

TYPE UC2M with Powerstat Mounted

TYPE UC1M Voltbase

SUPERIOR 5-WAY BINDING POST

Offering complete insulation . . . current capacity of 30 amperes . . . working voltage of 1000 volts; the new Superior Binding Post type DF30 meets the need for a multi-purpose electrical connector.

Featuring FIVE connections:

1. Permanent clamping of wire up to #12 through the center hole.
2. Looping of wire around the center shaft and clamping.
3. Plug-in standard 3/4" banana plug.
4. Clip-lead by removing the hexagonal shaped phenolic head.
5. Spade lug connection.

TYPE DF30 Binding Post

Binding Post type DF30 is the ideal connector to use on all electrical instruments . . . installation is simple . . . a dead front provides instrument and user protection . . . a standard 1/2 inch socket wrench can be employed to tighten the extra strong phenolic head . . . and the five different methods of connection satisfy any requirement.

THE SUPERIOR ELECTRIC CO., 12 MEADOW STREET BRISTOL, CONN.
POWERSTAT VARIABLE TRANSFORMERS • STABILINE VOLTAGE REGULATORS • VOLTBOX A-C POWER SUPPLY

STABILINE VOLTAGE REGULATORS

STABILINE automatic voltage regulators deliver a constant output voltage regardless of variations in input voltage or load current. Two distinct types of STABILINE automatic voltage regulators are available . . . STABILINE Instantaneous Electronic regulator has no moving parts, and is completely electronic in operation . . . STABILINE Electromechanical regulator consists of an electronic detector circuit controlling a motor-driven POWERSTAT variable transformer. These basic differences in operation make it possible for STABILINE voltage regulators to meet the requirements of any problem in voltage regulation. Since the Electromechanical regulator has moving parts, its speed of correction of line voltage fluctuations cannot compare to the instantaneous correction offered by type IE. Another important difference is the design feature of extremely close control offered by the IE unit. The type EM has zero waveform distortion while the type IE produces a very small amount of waveform distortion. It is readily seen that the application will dictate what STABILINE unit is to be used . . . but either can solve all voltage regulation problems.

CARTER—the oldest name

in Rotary Power Supplies for mobile radio

THE ORIGINAL CARTER GENEMOTOR FOR THREE WAY POLICE — TAXICAB RADIO AND SMALL AIRCRAFT COMMUNICATIONS

OUTSTANDING FEATURES

- SMALL SIZE—**
Simplicity of design permits minimum mounting space.
- INSTANT POWER—**
Full output in less than 3 10 second, the fastest starting Dynamotor made.
- ARMATURE—**
Finest design, triple insulated winding, transformer grade laminations, static and dynamically balanced.
- FILTER—**
Complete filter and starting relay available.

The Original Genemotor is the recognized standard power supply of leading mobile communications manufacturers. Designed for Police, taxicab, marine and aircraft communications. Available in three frame sizes for receiver and transmitter requirements. In service over 14 years in many Police radio networks.

The 1 1/2" and 2" frame Genemotors are equipped with oil-less bronze bearings with sufficient lubrication for the life of the Genemotor. The 3" frame transmitter models are ball-bearing equipped and are the fastest starting Dynamotors made. Full 600 volt output in less than 3 10 second.

Complete filter and heavy duty starting relay available. Average output regulation 25%, efficiency 60%, ripple 1% unfiltered.

GENEMOTOR

1 1/2" frame, 5 1/16" long x 4 1/8" wide x 3 1/2" high, weight 7 lbs.

Code No.	DC Input Volts	DC Input Amps	DC Output Volts	DC Output MA	Duty	List Price
251A	6	7.9	250	100	Con.	\$47.00
351A	6	10.9	350	100	Con.	49.00

2" frame, 6 1/8" long x 4 1/8" wide x 3 1/2" high, weight 8 lbs.

The above models can be furnished with filter and starting relay. 1 1/2" and 2" frame models add \$24.00 to list price for filter and "X" to code number. 3" model, add \$25.00 to price for filter and "X" to code number. Starting relay for all models, add "R" to code number and \$12.00 to list. 12, 24, 28, 32, 64, DC input voltage available on all above models, add \$2.50 to list. 115 volt DC input add \$3.50 to list.

THE ORIGINAL CARTER MAGMOTOR FOR TAXICAB AND POLICE RADIO RECEIVERS — SMALL AIRCRAFT TRANSMITTERS — GEOPHYSICAL EQUIPMENT

OUTSTANDING FEATURES

- PERMANENT MAGNET FIELDS**
Eliminates field coils and increases efficiency.
- SMALL SIZE**
Original compact design.
- FLEXIBILITY—**
Also available as an AC or DC Generator.

The Carter Magmotor is the ideal Power Supply for Police and taxicab radio receivers. The Permanent Magnet field increases efficiency and contributes to the small, compact design. The intermittent duty models are designed for small, low power aircraft, taxicab transmitters, and geophysical equipment. Ball bearing equipped. Average output voltage regulation 20%. Efficiency 50 to 60%. AC ripple 1% unfiltered.

The Magmotor is also available in extended shaft models as AC or DC Generators for 30 watt continuous duty and 50 watt intermittent duty.

MAGMOTOR

5 5/8" long x 3 11/16" wide x 2 1/2" high, weight 4 3/4 lbs.

All of the above models can be furnished with filter and starting relay. Add "X" to code number for filter and \$24.00 to list. Add "R" to code number for receiver type relay and \$6.50 to list. Transmitter type relay, add \$12.00 to list. 5.5, 12, 24, 28, 32, 64 volt DC input available on above models, add \$2.50 to list. 115 volt input, add \$3.50 to list.

CARTER — the oldest name

in Rotary Power Supplies for mobile radio

OUTSTANDING CARTER SUPER DYNAMOTOR FOR AIRCRAFT — MARINE — POLICE AND RAILROAD RADIO EQUIPMENT

Preferred by leading communications manufacturers, specified by domestic and foreign airlines, State Police Radio patrols and for marine ship-to-shore radiotelephone. Designed especially for transmitters requiring 150 to 250 watt Dynamotor power. Exclusive features guarantee highest efficiency, long life and dependable operation. Armatures are wound with triple insulated wire and the core is insulated with laminated cambric and fishpaper slot insulation. Finest transformer grade armature laminations increase efficiency. Brushes, bearings, commutators and other component parts are carefully inspected and tested to assure finest electrical and mechanical performance.

Average output voltage regulation, approximately 25% or less. Efficiency 60%, 1% AC ripple unfiltered. Cast aluminum mounting base without grommets supplied. Easy to filter and install.

SUPER DYNAMOTOR

8 1/4" long x 4 1/2" wide x 4 3/4" high, net weight 11 3/4 lbs.

CARTER SUPER CONVERTER — CHANGES DC TO AC

FOR AMPLIFIERS — RADIO RECEIVERS

The Carter Super Converter is a small, compact, quiet running, two pole fan-cooled unit for changing direct current to alternating current. Of the same general construction as the Super Dynamotor, this long-life double wound type Converter is ideally suited for radio equipment. Public Address systems, musical instruments, amplifiers, testing devices, etc. CAUTION: Available for 85 to 100% power factor only, suitable for non-inductive loads. Will not satisfactorily operate low power factor inductive devices such as AC motors, low power factor transformers, etc. Ball bearing equipped, 3600 RPM at 60 cycle output. Cast aluminum base less grommets supplied.

Special long-life Converters can be supplied for marine and railroad applications possessing 2500 hour life without requiring maintenance. Extra long brushes and special windings permit maximum performance. Manual frequency controlled Super Converters are available on special order. Vibrating reed frequency meter filter and manual frequency control rheostat are contained in aluminum housing base. Constant 60 cycle output is maintained with a $\pm 10\%$ input voltage fluctuation. High power factor only, average efficiency 60%, output AC voltage regulation 15%.

CARTER SUPER CONVERTER

8 1/4" long x 4 1/2" wide x 4 3/4" high, weight 13 lbs.

D1025C	115	3.5	115	250	Con.	79.00

All of the above 115 volt DC input Converters can be furnished with radio filter in aluminum housing base. Add "X" to code number and \$25.00 to list. Built-in condenser type filter available on battery input models from 6 to 32 volts. Add "X" to code number and \$20.00 to list. Above Converters available in 6 volt input up to 150 watt capacity: 12, 24, 28, 32 and 64 volt input supplied on all models. Add \$2.50 to list. Special output frequencies and voltages available.

OUTSTANDING FEATURES

ONE PIECE FIELD RING—
Increases efficiency, simplifies construction.

ARMATURE—
Finest design, transformer grade laminations. Built-in fan, standard equipment. Static and dynamically balanced.

INSULATION—
Finest cambric laminated high dielectric slot insulation, double varnished. Ideal for marine installations.

OUTSTANDING FEATURES

SMALL SIZE
Simplicity of Design

OUTPUT RECEPTACLE—
Standard AC output receptacle furnished as illustrated.

ARMATURE—
Double wound, insulated, ungrounded windings. Transformer grade laminations. Static and dynamically balanced.

FILTER—
Standard filter in aluminum housing or built-in condenser filter available.

FREQUENCY CONTROL—
Manual frequency control with filter and frequency meter available on special order. Ideal for wire recorder applications.

VIBRATOR CONVERTERS

Complete New Line • New Design • New Engineering

For efficiency, dependability, and long-life these new CD Vibrator Converters bring you the finest power conversion equipment in 16 years of engineering leadership. The result of intensive research on vibrators and vibrator power supply circuits, the CD line meets with new satisfaction all of the standard ap

lications: Radio phonograph combinations, small power tools, fans and small appliances, P. A. Systems, wire-recorders, television, razors, communication receivers and transmitters, intercom systems, amplifiers, test equipment, etc. Specifications on representative models are shown below:

VIBRATOR BASE DIAGRAM CROSS INDEX

Symbols Used in Vibrator Base Diagrams

- A — Line into vibrator.
- B — Line pass for driving point.
- C — External coil lead in shunt vibrator.
- P₁ — Primary contact, usually, but not necessarily connected to the magnet coil in shunt vibrators.
- PP — Dual primary contact, closed when P₁ is closed.
- P₂ — Primary contact, may be the magnet coil connection instead of P₁.
- PP₂ — Dual primary contact, closed when P₂ is closed.
- R — Vibrating reed in single-reed vibrators.
- RP — Primary vibrating reed in split-reed vibrators.
- S — Secondary contact, closed when P₁ is closed.
- S₂ — Secondary contact, closed when P₂ is closed.
- All dimensions given are in inches.
- For other information as to Identifying Characteristics, see information given on Radiart Replacement Guide.

TRANSFORMERS

Altec Lansing has developed a complete line of transformers which have the necessary frequency range, power carrying capacity, low insertion loss, low phase shift, and ample electro-magnetic and electrostatic shielding, good balance of windings for push pull operation, and proper impregnation and treatment so that heat and moisture will not adversely affect their continued operation. Ability to handle the rated power at low frequencies insures that intermodulation products will be very low.

The use of negative feedback in amplifiers requires that the frequency range of the amplifier must be made much broader than the actual amplification characteristic needed. The required frequency range

over which the transmission characteristics of the feedback loop must be controlled is surprisingly high and represents the price that must be paid in order to obtain the benefits of negative feedback.

Altec Lansing transformers, unless otherwise specified, have a transmission range of 20-20,000 cycles (± 1 db) and this condition will hold over a range of 60 db in power. In most cases the transformers will have good transmission up to 50 KC so that it is not necessary to use special compensation in the feedback path when the transformer is part of it. The same is true at the very low frequencies since in general the transformers will not be down over 3 db at 10 cycles.

TRANSFORMERS AND REACTORS

For Radio, Television

and Other Electronic Devices

"PROMPT SHIPMENT ON UNITS BUILT TO YOUR SPECIFICATIONS!"

Three general types of transformers and a complete line of reactors all assembled from standard unit parts to meet specified requirements: **power**—with plate, and plate-and-filament units; **filament**—both conventional types and high-voltage units; **audio-frequency**—include microphone, input, interstage (or grid), modulation, and output types.

The line of reactors contains microphone, plate,

filter (conventional or swinging), and modulation units.

Rather than stock standard units, General Electric maintains standard parts from which virtually any unit can be built promptly according to your specifications. This method of production enables every transformer to be specially designed for its given application.

Hermetically Sealed Units

Compound-filled and hermetically sealed against the entrance of moisture. Designed to meet U. S. Navy salt water immersion tests. Standard hermetic case types range from very small up to units approximately 200 volt-amperes physical size. Special construction is employed for larger units.

Conventional compound-filled units

Core-and-coil Units

Usually applied where moisture resistance is not a factor, and where size and weight must be kept to the minimum. Standard core laminations are utilized in core-and-coil units 75 kva and smaller (physical size). Larger units are built up from special parts and ratings above 75 kva require special laminations.

Hermetically sealed units

Conventional Compound-filled Units

Not hermetically sealed. Moisture resistant, but not immersion-proof. Wide application in the Frequency-Modulation field. Top or bottom mounting for open or underdeck wiring. Standard case types include units up to 250 volt-amperes physical size. Larger units employ special construction.

Core-and-coil units

Power Transformers
New Universal Type

Stancor's Universal Power Transformers represent the last word in efficient transformer construction, they are designed for compactness without sacrificing efficiency.

Four universal brackets permit their being mounted in either vertical or horizontal position. Special studs* provide underwriters type mounting. Transformers equipped with 8" flexible RMA color coded leads and static shields.

Power Transformers (Fully Cased)

Vibrator Transformers Six Volt Universal

These units equipped with mounting brackets for universal replacement work.

Six Volt D.C. or 115 Volt A.C. Speaker Field Supply Transformers

Tube Checker Transformer

Especially designed for use in modernizing older types of tube checkers. Ideal for other testing equipment and laboratory. Packed with wiring instructions giving color coding of leads.

Interstage Transformers

Designed primarily as radio replacements, this group of transformers has a multiplicity of applications because of the wide range of sizes and types. Listed are units in channel frames, ranging from the smallest to the largest in common usage, a universal bracket universal winding transformer, large core heavy duty units for higher fidelity push-pull and universal interstage transformers and a fine grouping of drivers. Size for size, unit for unit, these transformers represent the finest offering by any manufacturer — and they're so easy to use.

A-4774	Universal	3:1	10	S	2 5/8"	2 7/8"	1 3/4"	2 3/8"	1.5	4.05
A-4775	Universal	3:1	10	S	2 5/8"	3 1/16"	2 1/4"	2 1/16"	1.8	5.25

May be used as plate to grid; push pull input or push-pull interstage replacement transformers. Have 3:1 over all ratio, however, primary is center-tapped and secondary has split winding, thus permitting ratios of 1:1, 3:1 and 6:1. Transformers may be used in either step-up or step-down applications.

Transceiver Transformers

Tone Control Unit

The necessary components for a dual tone control circuit to provide both bass and treble attenuation when used in conjunction with two dual 250,000 ohm potentiometers. Contained in Hi-Fi-type W-1 cast case for

shielding against hum pickup and provided with 12 Flexible Coded Leads for direct connection in the circuit. Dimensions H.3 $\frac{1}{2}$ " x W.2 $\frac{3}{4}$ " x L.3 $\frac{1}{4}$ ". Packed with complete instructions for installation and use.

STANCOR No. **C-2332-1** List **\$8.80**

Variable Line Autoformers

These transformers designed so that the associated equipment may be kept at a specific input voltage regardless of line voltage. Line regulating transformers continuously variable in 5 volt steps from 5-125 volts.

Special Autoformer

This Autoformer will deliver full output wattage at any secondary voltage specified below or can be used to supply any voltage in 5 volt steps from zero to 130 volts for special experimental applications.

Testing Autoformer

Incorporates a convenient tap switch to permit variable voltages from 90 to 150 volts. Primary equipped with 5 ft. approved cord and plug. Secondary connected to female receptacle. Locking screw mounted on switch.

Step-Down Autoformer

These transformers are excellent units to be used with standard apparatus on 220-250 volt lines. May also be wired to step up 110-125 volts to 220-250 volts for test purposes or other applications.

*Mounted in special can and equipped with cord, plug and receptacle.

Isolation Transformers

These transformers are designed with an electrostatic shield to isolate line noises and interference from the apparatus being used. They are suitable for screen test booths, electrical therapeutic machines, medical instruments, beauty parlor equipment, electric furnaces, amateur transmitters, etc. Each unit complete with a 6 ft. cord and plug and a female receptacle. Units in first group are straight Isolation types; second group are step-down isolation units. Tap switch controls primary voltage, except on Nos. P-6123, P-6125, P-6389 and P-6390.

Filter Chokes (REPLACEMENT TYPES)

These chokes include all commonly used ratings for units of their type. Since inductance varies with the amount of D.C. flowing through the coil these units have been tested under uniform conditions. Filter chokes are rated at 10 Volts 60 Cycles with maximum D.C. in winding. Swinging chokes are rated at 10 Volts 60 Cycles from maximum to 10% of maximum D.C. in windings. Audio chokes are rated at 2 Volts 200 Cycles with maximum D.C. in winding. Tolerance of plus 15% is maintained on all ratings.

Filter Chokes (HEAVY DUTY TYPES)

Swinging Chokes

A.C.-D.C. Chokes

Output Chokes

Audio Reactors

Plate Transformers

This group of transformers is designed primarily to deliver the rated D.C. voltage and current outputs when used with full-wave mercury vapor rectifier tubes in conjunction with a two section filter employing choke input and two 2 mfd. condensers working into a resistive load. Generous coil and core design result in a transformer with above average regulation and efficiency. Phenolic terminal boards and heavy duty ceramic insulators assure protection from voltage breakdown.

Above plate and bias transformers are for listed voltage 60 cycle operation. Other voltage and frequency combinations available on special order. Write for quotations.

STANCOR VOLT ADJUSTERS

STANCOR'S volt-adjuster is the answer to the fluctuating voltage problem. It is a compact unit containing a ruggedly constructed step-up; step down autoformer.

The primary winding accommodates various voltages in 10 volt steps. A 10 position tap switch with an off position permits changing of the primary winding when a voltage shift occurs, and through this switch the output may be changed and kept at 115 or 230 volts. A meter with 0-150 or 0-250 volt range indicates the output at all times. The nominal output is indicated on the meter face by a red line. Unit is housed in beautiful black wrinkle finish case. Available in eight sizes ranging from 150 V. A. to 5,000 V. A., in both 115 V. and 230 V., 50-60 cycle types.

Filament Transformers
Single Secondary
 This group of filament transformers represents a complete listing of all commonly used electrical and physical specifications for units of this type. All transformers except those especially indicated have center taps. They are designed to provide accurate voltage output at rated loads with good regulation. Generous insulation provides a safety factor over and above the test voltage as indicated. Each group of transformers by voltage ratings is available in several convenient mounting styles which lend themselves to most applications.

Multiple Secondary

*Windings not center tapped. Other voltage and frequency combinations available on special order. Write for quotations

Plate Modulation Transformers

Listings cover two distinct groups of transformers, universal or Poly-pedance and specific types. The latter group covers the most frequently used ratios, core sizes and mounting styles. They should be used in permanent installations whenever possible since their design permits the best efficiency and fidelity for units of this type. Poly-pedance transformers are ideally suited for use in experimental or temporary equipment, such as schools, laboratories, etc., since they are provided with a large number of taps to permit the user to secure the widest practical range of impedance match. All units represent outstanding values.

†P.P. primary ratio is 2:1. ‡Split Secondary.

Two distinct groups of driver transformers are shown. Tapped or Poly-pedance and specific or fixed ratio types. Poly-pedance units are especially designed for experimental and laboratory work where it is desirable to change the turns ratio to optimum value. Two power ratings one of which is applicable to circuits employing inverse feedback and two line drivers are available. Specific types are listed in the most frequently used ratios, core sizes and mounting styles. They should be used wherever possible in permanent installations because their design permits the best efficiency and fidelity for units of this type.

STANCOR'S ST-202-A TRANSMITTER KIT

A VERSATILE TRANSMITTER WITH EVERY FEATURE AN AMATEUR DESIRES

- 100-125 WATTS INPUT TO FINAL AMPLIFIER
- CW OPERATION
- ALL AMATEUR BANDS BETWEEN 3.5 and 30 MCS.
- BAND-SWITCHING OF EXCITER STAGES
- ONLY TWO TUNING CONTROLS (Exciter and Amplifier)
- SELECTION OF SIX CRYSTAL POSITIONS
- ADJUSTABLE LINE OUTPUT CIRCUIT
- TWO SEPARATE POWER SUPPLIES INCLUDED
- EASE OF CONSTRUCTION (Cable Wiring Harness Supplied)
- COMPACT DESIGN—APROX. 14" x 13" x 9"
- AMPLITUDE OR FREQUENCY MODULATOR MAY BE APPLIED
- AMATEUR NET PRICE OF ST-202-A KIT, LESS ACCESSORIES **User's Net \$92.80**

STANCOR'S POWER PACK MODEL 752

CONTINUOUS OUTPUT RATING—6 Volts @ 12.5 Amperes D.C.—5% max. ripple at full load.

INTERMITTENT OUTPUT RATING—25.0 Amperes D.C. For use with push-button or floor-switch magnetic tuning of all popular car radio receivers.

CONTINUOUS VOLTAGE CHECK—Built-in voltmeter for visual checking of output voltage.

ADJUSTABLE VOLTAGE CONTROL—Tap switch provides selection of proper output voltage for various loads.

CONSERVATIVE RATING—Built with heavy duty components throughout.

HIGH OVERLOAD CAPACITY—Low internal resistance—good voltage regulation provide high output current capability for intermittent loads.

CONTROL PANEL—Readily accessible at front of case.

STURDY STEEL CASE—Featuring mechanical strength—neat appearance.

User's Net \$43.90

FOR DEMONSTRATING AND SERVICING

- AUTO RADIOS AND OTHER AUTO ACCESSORIES
- BATTERY CHARGING
- OPERATING RELAYS AND SOLENOIDS
- REPLACING STORAGE BATTERIES
- LABORATORY TESTING
- BRUSH PLATING

Universal Replacement POWER TRANSFORMERS

FREED

TRANSFORMER CO., INC.

This group of units provides replacement for the majority of existing radio receivers. The design of special mounting angles permits mounting in flush, vertical and horizontal positions. Leads are R.M.A. color coded.

PARALLEL FEED AUDIO REACTORS

Designed to eliminate the direct current component in the primary of audio transformers to be used as plate coupling reactor where the use of a high resistance is objectionable. Low distributed capacity insures excellent high frequency response.

The mounting dimension 1 5/8 is given between centers across corners.

THE FREED MULTICHANNEL FILTER

The unit is a five channel interstage type narrow bandpass filter designed for frequency selective remote control applications. The five inputs are connected in parallel, the five outputs are available separately. The frequency characteristic of each individual filter is ± 1.5 DB for $\pm 10\%$ of the nominal frequency. The attenuation per octave ranges from 35 to 40 DB. Each individual filter provides a step up ratio of 6 DB. The units are designed for a 10,000 ohms input impedance. Filters of this type can be supplied for frequencies from 300 to 10,000 cps.

FREED TRANSFORMER CO., INC.

OUTPUT TRANSFORMERS H. O. T. Series

Designed for delivering the maximum audio frequency power from an amplifier to a load (voice coil or line). Good frequency response and low harmonic distortion are the quality factors of the H.O.T. output transformers. Fully enclosed shielded type with leads. All H.O.T. series transformers have multiple secondary impedances.

The 500 ohms secondary is designed in such a way that it can be used with a 600 ohm line.

FREED BAND PASS FILTER

This unit is designed for use in communication equipment to transmit speech frequencies only. The highly selective property of the filter makes possible the increase of power in the frequency band necessary for special communication work and eliminates undesirable frequency components in the high and low end of the audio spectrum.

THE FILTER HAS THE FOLLOWING CHARACTERISTICS:

10,000 ohms or 8000 ohms impedance	1.5 DB Insertion Loss
Low frequency cut-off at 300 cps	40 DB attenuation at 100 cps
High frequency cut-off at 3000 cps	Working Level — 0 DB
2.5 DB attenuation at the cut-off frequencies	Maximum Level — ±10 DB.
40 DB attenuation at 50% of the high frequency cut-off.	

FREED TRANSFORMER CO., INC.

AUDIO TRANSFORMERS

Receiver and Amplifier

CH-1

RECEIVER AUDIO TRANSFORMERS

Designed for use in receiver audio circuits where a reasonably good frequency response is required. To be used for Class A applications, i.e., where no great current is drawn.

AMPLIFIER AUDIO TRANSFORMERS

Designed for amplifier and transmitter audio circuits. To be used for Class "A" applications.

Fully enclosed shielded type construction, conservative design and good frequency response are the quality features of the amplifier audio transformers.

AUDIO TRANSFORMERS

C Series

FREED TRANSFORMER CO., INC.

A quality line of transformers used in Public Address amplifiers and transmitters. Uniform case design, universal mounting, conservative ratings, vacuum impregnation of coils and moisture proof sealing of all these transformers is one of the outstanding

features of the C Series Audio Transformers. Low level input and output transformers have a balanced hum bucking coil construction. The frequency response of all these units is flat within ± 2 db from 60 to 10,000 cps.

MODULATION TRANSFORMERS—THE "FIVE" SERIES

SNC universal modulation transformers are specifically designed to provide maximum application possibilities per type. All units are provided with two identical secondary windings, permitting series or parallel operation. Changes in the ratio can be readily accomplished, when desired, without removing the unit from the chassis. Most units available in either air cooled or compound filled cases.

S N C MANUFACTURING CO., INC., GLENVIEW, ILLINOIS

Skilful Engineering, latest production techniques and highest quality materials . . . backed by careful workmanship, exacting step-by-step inspection and rigorous final testing . . . are combined in every SNC transformer to provide a quality product that gives MORE in dollar value.

POWER TRANSFORMERS—THE "EIGHT" SERIES

All units conservatively rated for operation on either 50 or 60 cycles and contain an electrostatic shield between primary and all other windings

NOTE
 Basic mounting types are classified as "A," "B," "C," "D," "E," "F," "G," "H," "J," and Bx.
 Explanation of Suffix Symbols
 L = Leads
 T = Lugs
 P = Cord and Plug
 SP = Switch, Cord and Plug

PLATE TRANSFORMERS—THE "SEVEN" SERIES

All SNC plate transformers have dual secondary ratings. Most units available in either air cooled or compound filled cases. All units contain electrostatic shields between primary and high voltage windings.

Type Number	Primary Voltage	Pri. V.A.	Secondary R.M.S. Voltage	D.C. Voltage From Filter*	D.C. Current	Mtg. Style	Dimensions					Net Wt.	List Price

*All units may be operated with simultaneous loads—provided the total D.C. current of the two loads does not exceed the rating listed.

FILAMENT TRANSFORMERS—THE "FOUR" SERIES

Most SNC Filament Transformers are constructed to provide two identical center tapped secondary windings and offer a minimum of three applications. They provide three-fold the number of possible applications of ordinary filament types. A few are single secondary units and are so designated. All have 117 V. 50/60 cycle primary.

THORDARSON TRANSFORMERS

NEW STREAMLINED SERIES

This is the new Thordarson post-war series of Transformers and Chokes. Every unit has been designed for utmost efficiency and adaptability. Many of the engineering and production advancements developed by Thordarson during the war, are used in producing this line.

The new lamination alloys and insulating material, incorporated in this series, results in superior performance and a greater factor of safety without an increase in size or weight. Consequently, some types are smaller and more compact

without sacrificing efficiency or performance.

Finished in baked grey enamel and fitted with matched mounting styles, the units present a uniform appearance. This is especially desirable where several Transformers and Chokes are mounted on the same chassis.

Types for Radio Receiver Replacement, Amateur Radio, Sound Systems and allied applications, can be selected from this listing.

It is essential that the class C R.F. load be properly matched to the class B modulator tubes for a maximum transfer of speech energy with low distortion. Thordarson Multi-Match modulation transformers have sufficient flexibility to enable the engineer or amateur to adjust the impedance ratio of primary to secondary, to meet any practical condition of operation. This feature forestalls the possibility of the modu-

lation transformer becoming obsolete due to changing the modulator or class C tubes. The use of new tubes or a change in class C voltage and current will not necessitate the need of a new modulation transformer, providing the power capacity is adequate. Complete charts and instructions for proper matching are supplied with each unit.

PLATE TRANSFORMERS

The new Thordarson plate transformers are designed to deliver the rated D.C. voltage from a two-section filter which includes the voltage drop in the rectifier tubes and chokes. Two current ratings are indicated, "Continuous Commercial

Service" (CCS) and "Intermittent Commercial or Amateur Service" (ICAS). These dual ratings make it possible to select the plate transformer exactly suited for each application.

* Secondary voltages changed by means of primary taps.

† Designed for double rectifiers and will deliver both secondary ratings simultaneously. If only the lower voltage taps are used the current rating is equal to the current rating of both windings.

CHOKES—REACTORS

Universal Types—Swinging and Smoothing

Thordarson Universal Chokes are designed for use both in the input and smoothing positions. Where the current taken from the power supply is essentially constant (not varying more than a few percent) the chokes should be selected so as not to exceed the rated D.C.—M.A. If the current fluctuates considerably, as is the case where the power supply furnishes a class B modulator stage, the chokes should be selected so as not to exceed the rated D.C.—M.A. rating under the steady

state of operation, and not to exceed the Max. D.C.—M.A. rating when the modulator stage is fully excited.

These are truly universal chokes suitable for use in power supplies requiring either input, swinging or smoothing types.

The tapped Splatler Chokes are used between the modulator and Class C stage for eliminating objectionable side band splatler. Full instructions and circuit diagrams are supplied with each unit.

*Furnished with primary cord and secondary receptacle.

†Output is proportional to voltage applied to input.

THORDARSON LITERATURE

TRANSFORMER MANUAL: A complete book containing literature on Radio receiver replacement transformers, Sound amplifiers, amateur transmitters and current Thordarson catalogs. Bound in heavy blue and orange loose leaf cover permitting addition of future Thordarson releases. Manual No. 340—35 cents.

TRANSFORMER CATALOG: A complete listing of Thordarson transformers, chokes, voltage changers, and regulators for receiver replacement, amateur radio and sound amplifiers. Tables and curves give complete data on application and characteristics of output, modulation and other transformers and chokes. Catalog 400—Free.

TRU-FIDELITY TRANSFORMER CATALOG: Complete technical data on Thordarson broadcast units. Includes audio

transformers, filters, line equalizers, filament transformers, filter reactors, plate transformers, and modulation reactors and transformers. Highest quality units that satisfy the requirements of discriminating engineers, broadcast stations and laboratories. Catalog 500—Free.

AMATEUR RADIO: Carefully prepared and edited to make learning of Radio, by all beginners, easy and interesting. Presents fundamental theory and instructions for making code practice oscillators, receivers and transmitters. Has 160 pages and over 100 illustrations and drawings. Heavy book cover, finished in wear-resistant blue cloth and imprinted with gold lettering. Amateur net price—75 cents.

Literature prices are amateur net.

LINEAR STANDARD AUDIO TRANSFORMERS

The ever increasing use of wide range equipment for broadcast service has reached the point where the major limiting factor is the frequency range of the transformers employed. UTC Linear Standard components represent the closest approach to the ideal transformer from the standpoint of uniform frequency response, low wave form distortion, high efficiency, thorough shielding, and dependability.

LINEAR STANDARD AUDIO UNITS FEATURE:

UNIFORM FREQUENCY RESPONSE . . . at low frequencies, is effected through the use of HIPERM-ALLOY, a STABLE nickel iron alloy of very high initial permeability. Uniform high frequency response is the result of multiple section interleaved windings arranged in a semi-toroidal coil structure. This, plus special winding methods and insulations, assures a minimum of distributed capacity and leakage reactance.

UTC LINEAR STANDARD transformers are the ONLY audio units with a **GUARANTEED** uniform response . . . ± 1 . DB from 20 to 20,000 cycles.

MINIMUM HUM PICKUP . . . is accomplished through the use of a hum balanced, semi-toroidal, coil structure which affords maximum neutralization of external fields. In addition, all low level units employ an internal high permeability alloy case as well as the high conductivity outer case for maximum shielding. For very low level applications, units whose code numbers end in X employ quadruple alloy shielding, making possible a transformer with the lowest inductive pickup commercially available.

NEGLIGIBLE WAVE FORM DISTORTION . . . is a function of proper impedance matching, minimum phase shift, and low flux density. These elements have been given great attention in the design of Linear Standard units. It is interesting to note that an output transformer reasonably flat from 20 to 20,000 cycles may show serious distortion at 30 and 10,000 cycles. For this reason, UTC high level units have a frequency range better than guaranteed value in some instances up to 50,000 cycles.

MULTIPLE TAP WINDINGS . . . make possible a wide combination of impedance terminations without impairing fidelity or efficiency. Precision winding methods result in winding accuracy of .1% . . . perfect balance of inductance and capacity . . . exact impedance reflection. For all practical uses, 500 ohm termination may be used for 600 ohm requirements. For maximum efficiency and balance, 250 ohm lines are recommended to be connected to 200 ohm terminations.

DEPENDABILITY . . . is a function of external and internal structure. Linear Standard units are housed in rugged die cast cases of precise dimension with reversible mounting to permit above chassis or subchassis wiring. The solid terminal posts on low absorption bakelite are arranged in a circular layout so that a round chassis hole will clear all terminals. Coils are vacuum baked and impregnated. Semi-hermetic sealing is accomplished through the use of a high adhesion compound poured through the large opening opposite the terminal board after controlled preheating of the unit for full compound penetration.

LOW IMPEDANCE TO GRID TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC Case in prim'y No.
LS-10	Low impedance mike, pickup, or multiple line to grid	50, 125/150, 200, 250, 333, 500/600 ohms	60,000 ohms	In 20-20,000	+15 DB	-74 DB	5 MA LS-1
LS-10X	As above.	As above	50,000 ohms	20-20,000	+14 DB	-92 DB-Q	5 MA LS-1
LS-12	Low impedance mike, pickup, or multiple line to push pull grids	50, 125/150, 200, 250, 333, 500/600 ohms	120,000 ohms	20-20,000	+15 DB	-74 DB	5 MA LS-1
LS-12X	As above	As above	80,000 ohms overall, in two sections	20-20,000	+14 DB	-92 DB-Q	5 MA LS-1
LS-14	Low impedance mike, pickup or parallel mixer to grid	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	60,000 ohms	In 20-20,000	+15 DB	-74 DB	5 MA LS-1
LS-14X	As above	As above	50,000 ohms	20-20,000	+14 DB	-92 DB-Q	5 MA LS-1
LS-15	Three isolated lines or pads to one or two grids	30, 50, 200, 250 ohms each primary	60,000 ohms	20-20,000	+15 DB	-74 DB	5 MA LS-1
LS-15X	As above	As above	As above	20-20,000	+14 DB	-92 DB-Q	5 MA LS-1
LS-18	High level multiple line to push pull grids	50, 125/150, 200, 250, 333, 500/600 ohms	50,000 ohms	20-20,000	+30 DB	-50 DB	5 MA LS-2
LS-26	Bridging line to single or push pull grids	5,000 ohms	60,000 ohms	In 15-20,000	+20 DB	-74 DB	0 LS-1

The values of unbalanced DC shown will effect approximately 1.5 DB loss at 30 cycles.
 * Comparison of hum balanced unit with magnetic shielding to normal unbalanced type.
 Q Quadruple alloy magnetic shield.

LS-1 CASE

Length _____ 3 1/8"
 Width _____ 2 3/8"
 Height _____ 3 1/4"
 Mounting _____ 1 15/16" x 2 7/16"

INTERSTAGE AUDIO TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC in prim'y	Case No.
LS-19	Single plate to push pull grids like 2A3, 6L6, 300A. Split secondary	15,000 ohms	95,000 ohms; 1.25:1 each side	20-20,000	+17 DB	-50 DB	0 MA	LS-1
LS-20	Single plate to single grid	15,000 ohms	60,000 ohms; 2:1 turn ratio	20-20,000	+14 DB	-74 DB	0 MA	LS-1
LS-21	Single plate to push pull grids. Split primary and secondary	15,000 ohms	135,000 ohms; turn ratio 3:1 overall	20-20,000	+14 DB	-74 DB	0 MA	LS-1
LS-40	Single plate to push pull grids. Split secondary	15,000 ohms	135,000 ohms; turn ratio 3:1 overall	30-20,000	+20 DB	-74 DB	8 MA	LS-1
LS-22	Push pull plates to push pull grids. Split primary and secondary	30,000 ohms plate to plate	80,000 ohms; turn ratio 1.8:1 overall	20-20,000	+26 DB	-50 DB	.25 MA	LS-2
LS-25	Push pull plates to push pull grids. Medium level. Split primary and secondary	30,000 ohms plate to plate	50,000 ohms; turn ratio 1.3:1 overall	20-20,000	+17 DB	-74 DB	1 MA	LS-1
LS-26	Bridging line to 1 or 2 grids	5000	60,000 in two sections	15-20,000	+20 DB	-74 DB	0	LS-1

LS-2 CASE

Length 4⁷/₁₆"
 Width 3¹/₂"
 Height 4³/₁₆"
 Mounting 2¹/₁₆" x 3¹/₁₆"
 Screws 8-32
 Cutout 2³/₄" dia.
 Unit Weight 7.5 lbs.

MIXING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC in prim'y	Case No.
LS-30	Mixing, low impedance mike, pickup, or multiple line to multiple line	50, 125/150, 200, 250, 333, 500/600 ohms	50, 125, 200, 250, 333, 500/600 ohms	20-20,000	+17 DB	-71 DB	5 MA	LS-1
LS-30X	As above	As above	As above	20-20,000	+15 DB	-92 DB-Q	3 MA	LS-1
LS-31	Three isolated lines or pads to multiple line	30, 50, 200, 250 ohms each primary	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+15 DB	-74 DB	5 MA	LS-1
LS-31X	As above	As above	As above	20-20,000	+14 DB	-92 DB-Q	3 MA	LS-1
LS-32	Mixing, low impedance mike, pickup, or parallel mixer to multiple line	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	-15 DB	-74 DB	5 MA	LS-1

LS-3 CASE

Length 5¹/₁₆"
 Width 5"
 Height 4¹/₁₆"
 Mounting 4³/₁₆" x 5¹/₁₆"
 Screws 10-32
 Cutout 3³/₄" dia.
 Unit Weight 7.5 lbs.

PLATE, CRYSTAL, PHOTOCCELL, AND BRIDGING TO LINE TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC in prim'y	Case No.
LS-27	Single plate to multiple line	15,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	30-12,000 cycles	-20 DB	-71 DB	8 MA	LS-1
LS-50	Single plate to multiple line	15,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+17 DB	-74 DB	0 MA	LS-1
LS-51	Push pull low level plates to multiple line	30,000 ohms plate to plate	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+20 DB	-71 DB	1 MA	LS-1
LS-38	Crystal microphone pickup to multiple line, with internal equalizer	100,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	Equalized for crystal	-14 DB	-71 DB	0 MA	LS-1
LS-39	Photocell, high-mu triode, diode or overbiased detector to multiple line	100,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	20-20,000	+14 DB	-74 DB	0 MA	LS-1
LS-150	Bridging transformer from 50 to 500 ohm line to line	4,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	15-30,000	+20 DB	-74 DB	1 MA	LS-1
LS-151	Bridging transformer from 50 to 500 ohm line to line	10,000 ohms	50, 125/150, 200, 250, 333, 500/600 ohms	15-30,000	+22 DB	-74 DB	1 MA	LS-1

HYBRID AND REPEAT COILS

Type No.	Application	Pri. and Sec. Impedances	± 1 db from	Max. Level	Hum* Reduction	Max. Unbalanced DC in prim'y	Case No.
LS-140	Line to line for isolating balanced and unbalanced circuits; balanced for maximum reduction cross talk (70 DB)	500/600 ohms split 500/600 ohms split	30-30,000	+10 DB	-92 DB Quadruple alloy shield	0 MA	LS-1
LS-141	Three sets of balanced windings for hybrid service, center-tapped	500/600 ohms 500/600 ohms	30-15,000	+10 DB	-74 DB	0 MA	LS-1
LS-142	Line to line and to push pull grids for hybrid service	500/600 ohms 500/600 ohms 60,000 ohms	30-15,000	+10 DB	-74 DB	0 MA	LS-1
LS-143	High efficiency ring and talk repeat coil, for low frequency ringing	500/600 ohms 500/600 ohms	Efficient 15/12,000 cycles	+25 DB	-74 DB	5 MA	LS-2

SPECIAL LOW LEVEL LINEAR STANDARD UNITS

Where unusual impedance or frequency ranges are required, UTC can supply units to specific customer requirements.

For example, one special design, for bolometer service, has following characteristics:

Frequency Range 1 cycle to 20 cycles
 Secondary Inductance 250,000 Hys.
 Primary Impedance 10 ohms
 Impedance Ratio 75,000:1
 Shielding...for 100 DB operation

LS-6 CASE

Length 15 3/4"
 Width 13"
 Height 22"
 Mounting 7 3/8" x 1 1/4"
 Mounting Hole 3/8" dia
 Unit Weight 350 lbs

DRIVER TRANSFORMERS

Type No.	Application	Primary Impedance	Reflected Secondary Impedance	± 1 db from	Max. Level	Max. Unbalanced OC in Primary	Case No.
LS-5	Driver, multiple line to class B 838's, 805's, ZB-120's, 203A's and similar tubes	50, 125, 200, 250, 333, 500/600 ohms	2,000 ohms; 1:2 overall turns ratio	20-20,000	+36 DB	5 MA	LS-2
LS-6	Driver, push pull 45's, 59's, 2A3's, 6A5G's, etc., to push pull 845 or 211D grids	5,000 ohms plate to plate	2.25 primary impedance; turns ratio 1.5:1 overall	20-20,000	+33 DB	5 MA	LS-2
LS-7	Push pull 56, 6CG or similar plates to A prime 45's, 42's, 6P6's, 2A3's, 6L6's	30,000 ohms plate to plate	.45 primary impedance turn ratio 1.5:1 Pri. to Sec.	20-20,000	+27 DB	1 MA	LS-2
LS-47	Driver from push pull 2A3's, 6A5G's, or 300A's to class B 888's, 203A's, 805's, or ZR120's	5,000 ohms plate to plate	1 pri. impedance turns ratio, Pri./1/2 Sec. 3:2:1	20-20,000	+33 DB	6 MA	LS-2
LS-48	Driver transformer push pull 845's to 204 or 849 grids in class B.	12,000 ohms plate to plate to plate	.038 pri. impedance turns ratio, Pri./1/2 Sec. 5:1:1	20-20,000	+42 DB	15 MA	LS-3
LS-49	Push pull parallel 2A3, 6A5G, or 300A tubes to four 838, 203A, 805, or ZB120 tubes.	2,500 ohms plate to plate	Ratio Pri./1/2 Sec. 4:1 and 2.5:1	20-20,000	+39 DB	10 MA	LS-3

OUTPUT TRANSFORMERS

Linear Standard output and matching transformers employ large cores of high permeability steel and precisely balanced, highly interleaved coil structures. The frequency response and harmonic distortion are unequalled in commercially available material.

The multiple tap windings afford a wide range of impedances for every application. The impedance values given are for one load. Where it is desired to feed two loads simultaneously, with equal power, it is necessary to connect the loads to terminations of half the impedance value.

For example, if it is desired to split the output between a 500 ohm line and a 15 ohm voice coil, connect the 500 ohm line to 250 ohm termination and the 15 ohm speaker to the 7.5 ohm termination. If the bulk of the output is desired in one of the loads, connect this load to its correct termination and the other load to a termination of 20% rating or less. For example, if in the above case, the speaker were used solely for monitoring, connect 500 ohm line to 500 ohm termination and 15 ohm voice coil to 2.5 ohm termination.

OUTPUT TRANSFORMERS TO LINE AND VOICE COIL

Type No.	Primary will match following typical tubes	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Case No.
LS-52	Push pull 245, 250, 6V6, 42 or 2A5 A prime	8,000 ohms	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	15 watts	LS-2
LS-54	Same as above	8,000 ohms	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	15 watts	LS-2
LS-55	Push pull 2A3's, 6A5G's, 300A's, 275A's, 6A3's, 6L6's	5,000 ohms plate to plate and 3,000 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	20 watts	LS-2
LS-57	Same as above	5,000 ohms plate to plate and 3,000 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	20 watts	LS-2
LS-58	Push pull parallel 2A3's, 6A5G's, 300A's, 6A3's	2,500 ohms plate to plate and 1,500 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	40 watts	LS-3
LS-60A	Push pull 2A3's, 6A3's, 6B4G's fixed bias, cathode following drive	4,600 ohms plate to plate	15, 10, 7.5, 5, 3.75, 2.5, 1.2	20-20,000	30 watts	LS-3
LS-62A	Same as above	As above	500, 125	20-20,000	30 watts	LS-3
LS-61	Push pull 6B5, 6A8, 53, 6P6, 71A, 59, 79, 89, class B46, 59's	10,000 ohms plate to plate and 6,000 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	15 watts	LS-2
LS-63	Same as above	10,000 ohms plate to plate and 6,000 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	15 watts	LS-2
LS-6L1	Push pull 6L6's self bias AB1	9,000 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	30 watts	LS-3
LS-6L3	Same as above	9,000 ohms plate to plate	30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	30 watts	LS-3
LS-6L4	Push pull 6L6's fixed bias or push pull parallel 6L6's self bias	3,800 ohms plate to plate and 4,500 ohms plate to plate	500, 333, 250, 200, 125, 50, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	55 watts	LS-3

OUTPUT TRANSFORMERS TO HIGH IMPEDANCE (RF) LOAD

Type No.	Primary will match following typical tubes	Primary Impedance	Secondary Impedance	+ 1 db from	Max. Level	Case No.
LS-56	Push pull 2A3's, 6A5G's, 300A's, 275A's, 6A3's	5,000 ohms plate to plate and 3,000 ohms plate to plate	6000, 5000, 4000, 1500, 1500, 1000, 30, 20, 15, 10, 7.5, 5, 2.5, 1.2	25-20,000	20 watts	LS-2
LS-66	Class B 203A, 838, ZB120, 805	9,000 ohms plate to plate	5000, 4200, 4100, 3500, 3300, 2650, 2500, 2100, 1250, 600	25-20,000	200 watts	See chart next page
LS-67	Class B 203A, 838, ZB120, 805	9,000 and 6900 ohms plate to plate	10000, 2500	25-20,000	200 watts	See chart next page
LS-691	Class B 849, 833, 250TH	10,400 ohms plate to plate	4500, 4000, 3500, 2750, 2000	25-20,000	1000 watts	LS-6
LS-692	Class B push pull parallel 833's	3,650 ohms plate to plate	2500, 2000, 1750, 1500, 1250	25-20,000	2500 watts	LS-7
LS-693	To specifications			25-20,000	5000 watts	Spec.

HIGH LEVEL MATCHING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Case No.
LS-33	High level line matching	50, 125, 200, 250, 333, 500/600 ohms	1.2, 2.5, 5, 7.5, 10, 15, 20, 30, 50, 125, 200, 250, 333, 500/600	20-20,000	15 watts	LS-2
LS-34	High level line matching	50, 125, 200, 250, 333, 500/600 ohms	1.2, 2.5, 5, 7.5, 10, 15, 20, 30, 50, 125, 200, 250, 333, 500/600	20-20,000	30 watts	LS-3

LS-7 CASE

Length 20 3/8"
 Width 17 3/4"
 Height 26"
 Mounting 1 1/8" x 1 3/8"
 Mounting Hole 3/8" dia
 Unit Weight 500 lbs.

LINEAR STANDARD POWER EQUIPMENT

In choosing power components for broadcast and commercial equipment, the first factor to be considered is dependability. Linear standard power components are very conservatively designed for maximum reliability. Designs provide for low temperature rise 40°, and high insulation safety factors. Only the finest of materials and workmanship are used throughout.

The low power components of the Linear Standard series are housed in the familiar rectangular LS case with top or bottom mounting facilities. High power components are housed in end castings which completely protect the winding, while directly exposing the laminations for maximum heat transfer.

All units have a deep grey finish to obtain the highest heat radiation coefficient. Large components (up to 250 KVA) are housed in oil tanks.

PLATE TRANSFORMERS

Type No.	Application	Primary Voltage 50/60 cycles	High Voltage	Approximate DC Voltage Out of Filter	DC Current
LS-181	For push pull 845, 800, etc.	100, 110, 120, 220, 230, 240	1500-1250-0-1250- 1500	1250-1050	200 MA
LS-182	Class B 203, 838, ZB120, etc.	100, 110, 120, 220, 230, 240	1500-1250-0-1250- 1500	1250-1050	350 MA
LS-183	Class B 805 or push pull parallel 203A's, etc.	100, 110, 120, 220, 230, 240	1750-1500-0-1500- 1750	1500-1250	400 MA
LS-184	Class B 204A, 849, HF200, HF300, 250TH, HK354, 100TH, etc.	100, 110, 120, 220, 230, 240	3500-3000-2500-0- 2500-3000-3500	3000-2500-2100	500 MA
LS-185	For combined class B and class C stages as above	100, 110, 120, 220, 230, 240	3500-3000-2500-0- 2500-3000-3500	3000-2500-2100	1.2 amp.

Type No.	L	W	H	Mtg.	Wt.

UTC VARIABLE INDUCTORS

UTC type VIC variable inductors offer a revolutionary approach to the problem of tuned audio circuits. By adjusting a set screw in the side of the case, an inductance value of +90%, -50% from mean value is obtainable. Setting is positive. Effective Q for a wide frequency range and variation of inductance with applied AC voltage are shown on the illustrated curves, for a typical VIC unit.

The VIC inductor is housed in a rugged die cast case 1 1/2" long, 1 1/4" wide and 1 1/8" high with mounting centers on terminal board side 1 1/16" by 2 3/32". Weight is 5 1/2 oz.

TYPICAL VIC APPLICATIONS

UTC HIGH Q TOROID INDUCTORS

There are many applications in the audio, carrier, and supersonic field requiring inductors of high Q and great stability. The HQ series of units developed for these applications have remarkable characteristics as illustrated below. HQA coils have high Q (100 at 5000 cycles) and are available in inductances from 5 MHY to 2 henrys; HQB coils have very high Q (200 at 4000 cycles) and are available in inductances from 5 MHY to 12 henrys.

HUM PICKUP is low due to the toroidal winding structure, 70 and 140 microvolts per gauss respectively for the HQA and HQB at 60 cycles.

Stability is excellent. For the .14 Hy. HQA coil illustrated, inductance change is less than 1% for applied voltages from .1 to 25 volts 1000 cycles. For the .45 Hy. HQB coil illustrated, the inductance change is less than 1% for applied voltages from 1 to 50 volts 1000 cycles. Inductance variation from -55 to plus 86 degrees Centigrade is less than 1/3%. Change in inductance due to DC current is approximately 1% per 10 MA linearly for the HQA unit illustrated and 3/4% for the HQB. All units are hermetically sealed.

When ordering, specify type followed by inductance. For example a 250 MHY type HQB coil would be ordered as HQB-250 MHY. Standard inductance tolerance is 2%. For 1% tolerance price increase is 10%.

Diameter	1 13/16"
Height	1 3/16"
Mounting	1 1/8"
Screws	6-32
Cutout	9/16" x 1 3/16"
Weight	5 oz.

HQA-2.0 HY		2.00 HY.

UTC INTERSTAGE FILTERS

Interstage filters lend themselves to effecting gain simultaneously with their frequency discrimination. UTC manufactures three basic types of filters for such application with a nominal impedance of 10,000 ohms to be used in a circuit as illustrated.

Type BPI (band pass), LPI (low pass), and HPI (high pass) interstage filters are not carried in stock, but are available from standardized designs and components. They are available for any frequency from 200 to 10,000 cycles. Order by type followed by frequency as: LPI-2500, which designates a low pass filter—2500 cycles cutoff frequency. For low impedance circuits (500/600 ohms), order as BPL, LPL or HPL in similar manner.

All interstage filters are housed in hermetically sealed cases identical in dimensions to HQB, but cutout is 3/8 x 2 inches. Dual alloy shielding reduces hum pickup to 150 MV per gauss at 60 cycles.

BPI units have 2:1 gain. They are sharply peaked, having approximately 2 DB attenuation at plus or minus 3% from mean frequency and attenuations of approximately 40 DB per octave. They are adjusted to zero phase shift at mean frequency.

HPI units have loss of less than 6 DB at cutoff frequency. At .67 cutoff frequency the attenuation is 35 DB and at .5 cutoff frequency, 40 DB.

LPI units have loss of less than 6 DB at cutoff frequency. At 1.5 cutoff frequency the attenuation is 35 DB and at twice cutoff frequency, 40 DB.

EQUALIZERS and FILTERS

3AX UNIVERSAL EQUALIZER *

The universal characteristics of the UTC 3AX equalizer have made it the most popular item for broadcast and recording equalization. This unique unit, with which most communications engineers are already familiar, is an accurately calibrated, quickly adjustable, combined low and high frequency equalizer. The low frequency controls include a switch for adjusting the maximum equalization frequency to 25, 50, or 100 cycles and a calibrated T-pad for exact adjustment of the amount of equalization. The high frequency portion of this unit includes a switch to set maximum equalization point at 4000, 6000, 8000, 10,000 or 15,000 cycles, and a similar calibrated control reading directly in DB. Equalization up to 25 DB available at any frequency selected.

Through a unique arrangement of compensating pads, changes in adjustment of the 3AX equalizer do not affect the insertion loss (50 DB). This permits rapid changes in tone color, with negligible change in volume. Where rapid change-over is required in service from one line to another, or from recording to play back, it is merely necessary to predetermine the required setting. The actual adjustment of the controls can be taken care of almost instantaneously. The construction is of the depressed chassis, etched panel, rack mount type. Thoroughly shielded against inductive pickup with UTC Trialloy Shielding. Dimensions of panel 3 1/2" x 19" Depth 7 1/2". Weight 15 lbs.

3A UNIVERSAL EQUALIZER *

The 3A equalizer is identical to the 3AX described above, except that it does not incorporate the compensating pads for constant insertion loss. The insertion loss is roughly proportional to the amount of equalization employed. All other characteristics identical with the 3AX unit, this item weighs 10 lbs.

4C SOUND EFFECTS FILTER *

The use of filters to obtain unusual sound effects is now finding wide application in broadcast technique. The Model 4C Filter was originally developed for one of the large broadcast chains, and is now used extensively by most broadcast stations. Two controls are provided on the 5 1/4" x 19" panel, which is similar in appearance to the 3AX unit. The weight of the 4C unit is 20 lbs.

The low pass switch can be set for cutoff frequencies of 100, 250, 500, 1000, 2000, 3000, 4000, or 5000 cycles. The high pass switch has identical frequency points. The great number of cutoff frequencies provides for a wide latitude of tone control. If desired, though not normally necessary, external potentiometers may be inserted in the circuit for attenuation control.

* for 500/600 ohm circuits.

UTC VARITRAN CONTROL UNITS

For controlling: Rectifier output . . . motors . . . heaters . . . lights . . . line voltage

The UTC Varitran is a simple autotransformer whose turns are arranged on one layer with the insulation removed so that every exposed turn may be used as a tap of the winding. A special non-fusing contact can be moved to any position on the winding, permitting the exact voltage desired to be obtained. The regulation and efficiency are excellent and no distortion of wave form occurs. The output voltage is independent of load. In addition to its many laboratory uses, the Varitran is widely employed for controlling electric ovens, fans, soldering irons, furnaces and heaters, for photographic and enlarging lighting control, for life tests of lamps and for dimming illumination.

VARITRAN RATINGS

Standard Varitrans are designed for 115 or 230 volt service. The respective output voltages are 0-130 and 0-260 volts. The Varitran autotransformer current and wattage rating is based at 115 volts (115V models). As the voltage is reduced, the wattage output is reduced correspondingly. The maximum current can be taken at any point from 0 to 20 volts and from 95 to 130 volts. Between 20 and 95 volts the current capacity tapers off from the two ends to approximately 60% of the rated maximum current at the 65 volt point. The mounting facilities are at both top and bottom of each unit to assure ease of mounting on panel, chassis or for laboratory bench service.

Type	Input Voltage	Output Voltage	Watts	Max. Amps.	Figure	Approx. Dimensions	Weight

UTC HIPERM ALLOY TRANSFORMERS

The UTC Hiperm alloy audio and power transformers are specifically designed for portable and compact service. While light in weight and small in dimensions, neither dependability nor fidelity has been sacrificed. The frequency characteristic of the Hiperm alloy audio units is uniform from 30 to 20,000 cycles. These units are similar in general design and characteristics to the Linear Standard audio units, incorporating a Hiperm-alloy nickel iron core and a hum balanced coil structure. The rugged die cast case is of high conductivity alloy finished in grey, arranged for mounting with the terminals either up or down.

TYPE H-1 CASE

 Unit Weight 5 lbs.

UTC MICROPHONE CABLE TRANSFORMERS

UTC cable transformers are designed to be inserted in the cable circuit, and are ruggedly constructed to withstand mechanical abuse. The cable connections (supplied less cable) are made through the spring strain relief to terminal boards inside the end caps. These units may be located any place on the cable within twenty-five feet of the amplifier. 1 1/2" diameter . . . 2 1/2" long . . . 1/2" b.

LOW IMPEDANCE TO GRID AND MIXING TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Max. Unbal. DC in Prim'y	Case No.

UTC MICROPHONE CABLE TRANSFORMERS

Type MC-1—primary tapped 30/50 and 200/250 ohms, secondary to grid standard fidelity.

Type MC-2—primary tapped 30/50 and 200/250 ohms, secondary to grid, high fidelity.

ULTRA COMPACT AUDIO UNITS

The UTC Ultra compact audio units are small and light in weight, ideally suited to remote amplifier and similar compact equipment. High fidelity is obtainable in all individual units, the frequency response being ± 2 DB from 30 to 20,000 cycles.

All units except those carrying DC in Primary employ a true hum balancing coil structure, which combined with a high conductivity outer case, effects good inductive shielding. The die-cast (Type A) case provides for top or bottom mounting. Maximum operating level $+ 10$ DB.

Type No.	Application	Primary Impedance	Secondary Impedance	± 2 db from
A-10	Low impedance mike, pickup, or multiple line to grid	50, 125/150, 200/250, 333, 500/600 ohms	50,000 ohms	30-20,000
A-11	Low impedance mike, pickup, or line to 1 or 2 grids	50, 200, 500	50,000 ohms	50-20,000 multiple alloy shield for extremely low hum pickup
A-12	Low impedance mike, pickup, or multiple line to push pull grids	50, 125/150, 200/250, 333, 500/600 ohms	80,000 ohms overall, in two sections	30-20,000
A-14	Dynamic microphone to one or two grids	30 ohms	50,000 ohms overall, in two sections	30-20,000
A-16	Single plate to single grid	15,000 ohms	60,000 ohms, 2:1 turn ratio	30-20,000
A-18	Single plate to two grids. Split primary, can also be used for P.P. plates	15,000 ohms	80,000 ohms overall, 2.3:1 turn ratio overall	30-20,000
A-19	Single plate to two grids 8 MA unbalanced D.C.	15,000 ohms	80,000 ohms overall, 2.3:1 turn ratio overall	50-20,000
A-20	Mixing, low impedance mike, pickup, or multiple line to multiple line	50, 125/150, 200/250, 333, 500/600 ohms	50, 125/150, 200/250, 333, 500/600 ohms	30-20,000
A-21	Mixing, low impedance mike, pickup or line to line	50, 200/250, 500/600	50, 200/250, 500/600	50-20,000 multiple alloy shield for extremely low hum pickup
A-24	Single plate to multiple line	15,000 ohms	50, 125/150, 200/250, 333, 500/600 ohms	30-20,000
A-25	Single plate to multiple line 8 MA unbalanced D.C.	15,000 ohms	50, 125/150, 200/250, 333, 500/600 ohms	50-20,000
A-26	Push pull low level plates to multiple line	30,000 ohms plate to plate	50, 125/150, 200/250, 333, 500/600 ohms	30-20,000
A-27	Crystal microphone to multiple line	100,000 ohms	50, 125/150, 200/250, 333, 500/600 ohms	30-20,000 measured with non-inductive source
A-30	Audio choke, 300 henrys @ 2 MA 6000 ohms D.C., 75 henrys @ 4 MA 1500 ohms D.C. Inductance with no D.C.

PLUG-IN (P) CASE

Diameter	1 3/32"
Height	1 1/32"
Socket	Standard Octal

UTC OUNCER components represent the acme in compact quality transformers. These units, which weigh one ounce, are fully impregnated and sealed in a drawn aluminum housing 7/8" diameter . . . mounting opposite terminal board.

Ouncer items are ideal for portable broadcast, hearing aid, aircraft, concealed service, and similar applications. High fidelity characteristics are provided, uniform, from 40 to 15,000 cycles, except for O-14, O-15, and units carrying DC which are intended for voice frequencies from 150 to 4,000 cycles. Maximum operating level 0DB.

"P" series units are identical to the UTC OUNCER units but are sealed in bakelite housings with plug in base to fit standard octal socket. While of submersion proof design, these units weigh but two ounces. Oversize pins in the base make it impossible to dislodge these units from their sockets, even when used upside down in portable equipment.

SUBOUNCER UNITS

FOR HEARING AIDS . . . VEST POCKET RADIOS . . . MIDGET DEVICES

UTC Sub-Ouncer units weigh only 1/3 ounce. Through unique construction, however, these miniature units have performance and dependability characteristics far superior to any other comparable items. The coil is uniform layer wound of Formex wire . . . On a molded nylon bobbin . . . insulation is of cellulose acetate . . . leads mechanically anchored . . . core material Hiperm-alloy . . . entire unit triple (waterproof) sealed. The frequency response of these standard items is ± 3 DB from 200 to 5,000 cycles.

Type	Application	Level	Pri. Imp.	D.C. In Pri.	Sec. Imp.
SO-1*	Input	+ 4 V.U.	200 50	0	250,000 65,500
SO-2	Interstage/3:1	+ 4 V.U.	10,000	0	90,000
SO-3*	Plate to Line	+ 23 V.U.	10,000 25,000	3 mil. 1.5 mil.	200 500
SO-4	Output	+ 20 V.U.	30,000	1.0 mil.	50
SO-5	Reactor 50 HY at 1 mil. D.C.		3000 ohms	D.C. Res.	

* Impedance ratio fixed. Can be employed with any primary impedance between values shown.

SUB-OUNCER UNIT

Dimensions	3/16" x 5/8" x 7/8"
Weight	1/3 oz.

UTC COMMERCIAL GRADE COMPONENTS

The commercial grade series of transformers incorporate conservative design and rugged construction to assure dependability under continuous service operation in industrial and commercial grade communication equipment. These units are mounted in uniform drawn cases finished in light grey enamel, and intended for chassis mounting. All items are poured with special sealing compound in addition to vacuum impregnation of coil structures. The CG line was developed to replace our very popular PA series in a more rugged construction, with professional appearance. Type numbers are identical with the PA units except for the prefix "CG".

CG-134, 135 and 136 are of the hum-bucking type to assure low hum pick-up. All audio components are linear, $\pm 1\frac{1}{2}$ DB from 60 to 8,500 cycles (no unbalanced D.C.). Parallel feed low level interstage units with 50,000 ohms and .25 mfd. 200 ohm windings on input transformers are balanced and may be used for 250 ohm circuits.

INPUT, INTERSTAGE, MIXING AND LOW LEVEL OUTPUT TRANSFORMERS

(200 ohm windings are balanced and can be used for 250 ohms)

Type No.	Application	Primary Impedance Ohms	Secondary Impedance Ohms	Case No.
CG-131	1 plate to 1 grid	15,000	135,000 3:1 ratio	RC-50
CG-132	1 plate to 2 grids	15,000	135,000 center-tapped 3:1 ratio overall	RC-62
CG-133	2 plates to 2 grids	30,000 P to P	80,000 overall	RC-75
CG-134	Line to 1 grid hum-bucking	50, 200, 500	1.6:1 ratio overall	RC-50
CG-135	Line to 2 grids hum-bucking	50, 200, 500	120,000 overall	RC-50
CG-235	Line to 1 or 2 grids, hum-bucking; multiple alloy shielded for low hum pickup	50, 200, 500 ohms	80,000 overall	RC-75

CG VARIMATCH OUTPUTS FOR P. A.

Universal units designed to match any tubes within the rated output power, to line or voice coil. Output impedance 500, 250, 50, 16, 8, 5, 3, 1.5 ohms. Primary impedance 3000, 5000, 6000, 7000, 8000, 10,000, 14,000 ohms

Case No.	Audio Watts	Typical Tubes	Case No.
CVP-1	12	42, 43, 45, 47, 2A3, 6A6, 6F6, 25L6	RC-100
CVP-2	30	42, 45, 2A3, 6L6, 6V6, 6B5	RC-125
CVP-3	60	46's, 50's, 300A's, 6L6's, 801, 807	RC-150
CVP-4	125	800's, 801's, 807's, 4-6L6's, 845's	RC-152
CVP-5	300	211, 242A's, 203A's, 838's, 4-845's, ZB-120's	RC-175

CG VARIMATCH LINE TO VOICE COIL TRANSFORMERS

The UTC VARIMATCH line to voice coil transformers will match any voice coil or group of voice coils to a 500 ohm line. More than 50 voice coil combinations can be obtained, as follows:

2, 4, 5, 6, 1.25, 1.5, 2, 2.5, 3, 3.3, 3.8, 4, 4.5, 5, 5.5, 6, 6.25, 6.8, 7, 7.5, 8, 9, 10, 11, 12, 14, 15, 16, 18, 20, 25, 28, 30, 31, 40, 47, 50, 63, 69, 75.

Where speakers are to be connected in groups to one transformer, it is preferable that parallel connection be used to eliminate the possibility of multiple resonance. If two speakers of different impedances are connected in parallel, the lower impedance speaker will develop greater power. If connected in series, the higher impedance speaker will develop greater power.

Type No.	Audio Watts	Primary Impedance	Secondary Impedance	Case No.
CVL-1	15	500 ohms	.2 to 75 ohms	RC-87
CVL-2	40	500 ohms	.2 to 75 ohms	RC-125
CVL-3	75	500 ohms	.2 to 75 ohms	RC-150

CG VARIMATCH LINE AUTOFORMERS

UTC Varimatch Line Autoformer will match one to ten 500 ohm lines or CGL windings to the 500 ohm output of an audio amplifier. The CGA-10 to 12 autoformers have impedances of 50, 250, 167, 125, 100, 83, 71, 62, 50 ohms.

Type No.	Audio Watts	Case No.
CVL-10	15	RC-87
CVL-11	30	RC-125
CVL-12	60	RC-150

Ask for free detailed manual.

UNIVERSAL INTERSTAGE EQUALIZER

This new UTC unit is the ideal device for any application requiring frequency response correction. Designed to be connected between two triode audio stages or will match a high impedance (5000 to 30000 ohms) source to grid.

The CGE-1 equalizer is not a simple R-C tone control, but employs resonant circuits to permit low or high end equalization without affecting mid-frequencies. With controls in center, no equalization is effected. Moving one control to left increases bass; to right, drops bass. Moving other control to left increases highs; to right drops highs. Controls are independent so that bass may be raised and highs dropped simultaneously, etc. Amount of equalization is continuously adjustable, up to 15 DB. The insertion loss effected is equal to the combined low frequency and high frequency settings plus 6 DB, or a maximum of 36 DB. Unless existent gain of equipment to which CGE-1 is added is high, an additional audio stage may be required.

This unit comes complete so that controls with etched panel (calibrated in DB) can be mounted on a chassis (2 1/2 inch minimum) or a panel with case containing the electrical elements held by etched panel screws.

CGE-1 Panel Dim. 2 3/8 x 4. Wt. 2 Lb.

COMMERCIAL GRADE COMPONENTS

UTC CG power transformers, Varimatch units and chokes are designed to A.I.E.E. commercial standards. Ratings are conservative for continuous duty. Designs provide temperature rise less than 55 degrees C. Units are tested for breakdown at twice maximum working voltage plus 1000 volts. Plate transformers are given a surge test of 250% normal voltage at 200 cycles. All items are vacuum impregnated and sealed with special insulating compound.

The conservative design and manufacturing procedure of these units make them suitable for virtually all types of commercial equipment as well as ideally suited for quality amateur and public address service.

CG VARIMATCH MODULATION UNITS

Will match any modulator tubes to any RF load

The ever increasing number of vacuum tubes available for audio and RF applications has increased the difficulty of obtaining transformers suitable for matching to the various correct tube loads. If a standard transformer having a limited impedance range is purchased and used for a specific purpose as the "nearest thing" available, comparatively high distortion is inevitable. While a 20% mismatch caused by such an occurrence does not represent a serious loss in power, it greatly reduces the undistorted power available from a class B modulator because optimum plate load is not reflected to the tubes. The UTC Varimatch transformer eliminates this difficulty through the use of a combination of tapped windings affording an extremely wide range in impedance matching. Designs provide that for any load impedance employed, full class C plate current can be carried by secondary winding.

Primary impedances from 500 to 20,000 ohms
Secondary impedances from 30,000 to 300 ohms

Type No.	Max. Audio Watts	Max. Class C Input	Typical Modulator Tubes	Case No.

VARIPOWER AUTO-FORMERS

Designed for line voltage control, filament control and reduced power operation. Output voltage from 0 to 150 volts, 50/60 cycles. Vari power units permit control of filament voltage at the tube socket to within 2 1/2% of desired value simultaneously with line voltage control and plate voltage control. Can be used to reduce or increase voltages on filament transformers. Taps at 25, 55, 75, 95, 100, 105, 110, 115, 120, 125 and 130 volts permit output voltages from 0 to 150 volts in 5 volt steps.

S-22	250 watts	G-9

UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. The Special units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided permitting above chassis or breadboard wiring in addition to standard chassis type wiring. The universal windings provided on driver, matching and output transformers assure a maximum of flexibility. Modulator output units will carry the DC current of the class C stage for any of the impedances available and will match practically any audio tubes to any RF load within the power rating of the transformer. Large components are housed in formed cases with top or bottom mounting. All units are vacuum impregnated — compound filled.

TYPICAL MODULATOR COMBINATIONS

S-18 — 12 WATTS MAX.

DRIVER TUBES: In the combinations shown below, typical suitable driver tubes are: 27, 30, 37, 49, 53, 56, 76, 79, 89, 6A6, 6C5, 6C6 triode, 6E6, 6N7.

* Above manufacturers' rating, but frequently employed by amateurs.

UTC SPECIAL SERIES POWER EQUIPMENT

UTC Special Series power supply components are designed specifically for amateur and popular-priced PA service. The ratings are based on such applications and recommended for intermittent service. For commercial applications, CG or LS grade components should be employed. Tapped coil structures on power and bias supply transformers afford maximum flexibility, permitting a given transformer to be used with many circuits and types of tubes. Do not affect standby service by interrupting high voltage center tap.

The UTC replacement type transformers represent the culmination of years of development in this field. All units are vacuum sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Shells and brackets are finished in attractive high lustre black enamel.

The UTC shells and universal brackets employed make possible a latitude in mounting dimensions never approached heretofore. Using Varitap coil construction a minimum number of transformers have been developed to cover any requirement in the replacement field.

Through unique construction the five UTC VARITAP DUPLICATE replacement transformers will service as many types of radio receivers as the 15 or 20 units more customarily employed for such service. The universal feet may be used for upright or horizontal mounting, or eliminated for flush mounting.

UTC FLUSH TYPE transformers are husky units designed for low temperature use and good regulation. By employing a Varitap universal coil structure, the five units described are universal in application. The rugged solder terminals permit ease of circuit change for the experimenter.

UTC VERTICAL power transformers are unusually attractive in appearance, having smooth drawn cases finished in high lustre black enamel. The Varitap coil structure assures flexibility of application.

Channel frame chokes, audios, and filament transformers are conservatively designed. Standard black enamel mounting channels are employed. Coils are tropic-sealed by vacuum-pressure method.

Varitap Duplicate audio units are extremely attractive, the double shells and universal mounting brackets being finished in high lustrous black enamel. The figure A units use the UTC universal bracket. This bracket makes possible four hole horizontal or vertical mounting and two hole, channel type, horizontal or vertical mounting. The coils of these units, in addition to efficient design and mechanical shielding, are vacuum impregnated and sealed with a special compound to assure complete protection against adverse climatic conditions.

SHIELDED UNIVERSAL MOUNTING AUDIO TRANSFORMERS AND FILTER CHOKES

Type No.	Application	Description	Fig.	Wt. Lbs.
R-23	1 plate* to 1 grid	3 1/2:1 ratio	A	1
R-24	1 plate* to 2 grids	2:1 ratio	A	1
R-25	2 plates* to 2 grids	1.5:1 stepup for class A triodes, 1.5:1 stepdown for 6L6's, 2A3's, 2A5's, etc.	A	1 1/4
R-26	Driver, 1 plate to 2 grids	Single 12, 2A5, 6F6, 45, 46	A	1 1/4
R-27	15 watt Universal Output	All tubes up to 15 watts to any voice coil from .1 to 30 ohms	A	1 1/4
R-28	35 watt Universal Output	All tubes up to 35 watts to any voice coil from .1 to 30 ohms	B	2 1/4
R-29	Mike to grid	Single or double button mike or line to 1 grid	A	1 1/4
R-30	Filter choke	13 Hys—250 MA—100 ohms	C	7
R-31	Filter Choke	10 Hys—80 MA—250 ohms	A	2 1/4
R-32	Filter choke	10 Hys—150 MA—100 ohms	B	2 1/4

* Will match tubes like 27, 37, 56, 6C6 triode, 6C5. Can be used with high mu triodes with loss in low frequencies.

CHANNEL FRAME AUDIO TRANSFORMERS (D)

* Will match tubes like 27, 37, 56, 6C6 triodes, 6C5. Can be used with high mu triodes with loss in low frequencies.

STEP DOWN AUTO-TRANSFORMERS

With 6 foot cord and female receptacle
220-240 to 110-120 Volts—50/60 Cycles

Type No.	Application	Wgt. Lbs.
R-41	85 watt capacity	4
R-42	125 watt capacity	5
R-43	175 watt capacity	5 1/2
R-44	250 watt capacity	6 1/2
R-45	500 watt capacity	12
R-46	1200 watt capacity	18
R-64	2500 watts, no cord	30

N-52

ISOLATION TRANSFORMERS

Ideal for isolating line noise, AC-DC sets, etc. Excellent electrostatic shielding. 2000 volt breakdown test. Six foot cord and female receptacle.

Primary 110-120 volts, 50/60 cycles—Secondary 110-120 volts

Type No.	Rating	Wgt. Lbs.
R-72	10 watts	1
R-73	100 watts	6
R-74	250 watts	12
R-75	600 watts	20
R-76	1200 watts	30
R-77	2500 watts (no cord)	70

EXPORT VOLTAGE ADAPTER

Complete with cord and plug and special locking switch providing for line voltages of 105, 115, 125, 135, 150, 210, 230, 250 volts. 42 to 60 cycles Output voltage 115.

Type No.	Rating	Wgt. Lbs.
R-47	85 watts	4 1/2
R-48	150 watts	5 3/4

LINE VOLTAGE ADJUSTERS WITH METER

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage.

These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly.

The nine tap switch provides for line voltages of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output models. All units are designed for 50/60 cycle service and come complete with 6 foot input cord and plug and outlet receptacle.

Type No.	Primary Voltages	Sec. Volts	Watts	Wt. Lbs.

PHOTO FLASH TRANSFORMERS

Can be used for either standard (Amalg type) or trigger (Sylvania type) multiple flash bulbs. Circuit details included with transformer, or on request.

PF-1 Primary for 115 volts, 50/60 cycles. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. (30 Mfd. charges in 4 Sec.) Compound sealed in G-3 case 2 1/8 x 2 3/4 x 2 1/2 inches high. Weight 2 Lbs.

PF-2 For portable photoflash service Primary tapped for 4 volt or 6 volt battery (full wave vibrator). Secondary for power supply delivering 2200 volts DC to condenser up to 60 Mfd. (30 Mfd. charges in 8 sec. with 6 volts or 14 Sec. with 4 volts). Compound sealed in G-3 case. Weight 2 Lbs.

PF-3 Trigger Transformer 15 KV peak

TELEVISION TRANSFORMERS

These components are quality designs, vacuum impregnated and fully compound sealed in heavy steel cases affording a high degree of shielding.

Type No.	Application	Case	Wt. Lbs.
R-91	Horizontal oscillator (15750 cycles)	RC-50	1
R-92	Vertical oscillator (60 cycles)	RC-50	1

POWER LINE AUTO TRANSFORMERS

Type No.	Input	Output	Capacity Volt-Amperes	Case No.	Weight	List Price
T-219	88 to 130 volts	115 volts	500	5A	10 lbs. 1 oz.	\$21.00

All power transformers are designed for 115 volt, 50 to 60 cycle operation. For any other voltage 50 to 60 cycle operation add 25% to list prices. For 115 volt 25 cycle operation, add 60% to list prices. For any other voltage 25 cycle operation add 100% to list prices. Case sizes for 25 cycle application are different from those specified for standard 115 volt 50 to 60 cycle operation.

Thermador Transformers

Superior materials, workmanship and performance have established these Thermador transformers as America's finest. Designed, engineered and produced by the West's largest manufacturer of transformers, the name Thermador guarantees their rugged, precision construction and their longer life.

STUDIO QUALITY TRANSFORMERS

THE HI-FIDELITY series of audio equipment listed above represents probably the highest degree of quality yet attained in audio transformers. In addition to the absolute moisture elimination provided by "Thermatite" treatment THERMADOR hi-fidelity transformers have the following advantages:

Wide Frequency Range: Transformers of the SQ series are linear within one db. from 20 to 20000 cycles.

Balanced Winding: THERMADOR transformers are constructed to give the best practical magnetic, capacity and resistive balance. In designs where capacity balance is important, each winding is made up of two symmetrical coils. Input transformers are supplied with a static shield between primary and secondary.

Low Harmonic Distortion: THERMADOR transformers are designed to offer the proper load impedance to

the tubes with which they operate. Maximum primary inductance, low leakage reactance and low flux densities in the core permit unusually low harmonic levels.

REPLACEMENT TRANSFORMERS

Adaptable to a Particular Job: The transformer models listed have been engineered to cover the replacement field for both the old and new home radio receivers. The new line affords the widest range of application for use in receivers, amplifiers and small transmitters.

Thermatite Treated to Withstand Heat and Humidity: THERMADOR transformers are Thermatite treated, which is a well tested and approved form of vacuum impregnation. This treatment, proved on thousands of transformers under severe climatic conditions, gives these units the resistance to withstand extreme conditions of humidity and heat.

THERMADOR

THERMADOR ELECTRICAL MFG. CO., LOS ANGELES 22, CALIF.

"Seven Leagues Ahead"

Chicago POWER TRANSFORMERS & REACTORS

CHICAGO TRANSFORMER DIV. — ESSEX WIRE CORPORATION

POWER TRANSFORMERS

Ratings of Chicago Power Transformers have been selected to fit a wide range of modern electronic circuits and will supply the power requirements of from two to sixteen tubes with voltages and currents ample for the applications listed. They will provide the maximum in performance with the minimum in physical size. Built for minimum temperature rise in accordance with RMA standards.

REACTORS

The Chicago Filter Reactors listed below are designed with current ratings particularly suited for use with the power transformers above them, but will provide equally satisfactory service in any other correct application. They will give maximum inductance for given current rating in the smallest possible size of unit.

SEALED IN STEEL CONSTRUCTIONS

FEATURES — 1. "Steel wall" protection against corrosive moisture. 2. Efficient shielding. 3. Unsurpassed strength to withstand shock and vibration. 4. Mounting convenience. 5. Compactness. 6. Clean, streamlined appearance.

Units on this page are listed in either of the following two Sealed in Steel, drawn steel case constructions:

SEMI-SEALED— Precision-fitted steel base covers and phenolic terminal board, plus compound filling, keep moisture out. Convenient solder lugs have clear identifications engraved in terminal board.

COMPOUND-SEALED — Moisture-resistant compound surrounds the core and coil. Ten-inch, RMA color-coded leads are stripped and tinned for easy soldering.

FILAMENT TRANSFORMERS

Chicago Filament Transformers fit the requirements of a wide range of today's most widely used types of tubes. They are supplied in the Semi-Sealed, drawn steel case construction with steel base covers and phenolic terminal boards.

Those with secondaries rated for less than 6 amps. have standard solder lugs as shown

at left; those with secondaries rated at more than 6 amps. have screw-type terminals.

Filament Transformers Nos. F-210 and F-210H are specially designed for high voltage, rectifier filament supplies. They have screw-type terminals, insulated on the secondaries with ceramic bushings.

STEP-DOWN TRANSFORMERS

For operating 110-volt radios, amplifiers, and other low-wattage equipment where 220 volts is normal power supply. Autotransformer design.

Insulated, 7-foot cord on input side. Output side has female receptacle that takes any standard electric appliance plug. Locking slide switch adjusts for voltage variations from 215 to 235 volts.

Housed in drawn steel cases with press-fitted steel bases and compound filled to withstand corrosion in humid or other extreme climates.

PLATE TRANSFORMERS AND REACTORS

Chicago Plate Transformers and matching reactors are heavily insulated and quality constructed throughout. The five transformers and two of the reactors, Nos. R-105 and R-65, have heavy-duty shields and frames. See below left.

Terminals on the double primaries of the

plate transformers are screw-type binding posts. The high voltage secondary terminals, other side, are insulated with sturdy, ceramic bushings.

Reactors Nos. R-103 and R-63 are mounted in drawn steel cases with bushing-insulated terminals out the bottoms.

Chicago AUDIO TRANSFORMERS

CHICAGO TRANSFORMER DIV. - ESSEX WIRE CORPORATION

AUDIO TRANSFORMERS

Full Frequency Range — 30 to 15,000 Cycles

Uniformly high fidelity response within $\pm 1/2$ db. is provided by the input and output units in this outstanding series of Chicago Audio Transformers. The $\pm 1/2$ db. rating is conservative — only slightly greater loss applies past 15,000 and up to 20,000 cycles. Their percentage of distortion is very low, at low as well as high frequencies.

All of the input and output series are Solder Sealed, a Sealed in Steel construction with steel base covers bonded into

the cases by deep-seal soldering, for compactness, modern appearance and maximum protection of the delicate fine wire windings against corrosion. Solid steel, pin-type terminals, compact and easy to connect, are identified by numerals engraved in the phenolic terminal boards.

Input units have hum-bucking core construction and additional inner alloy shields for extra hum shielding.

	*Has tertiary winding to provide 15% inverse feedback.					

DRIVER AND MODULATION TRANSFORMERS

Full Frequency Range Driver and Modulation Transformers and Modulation Reactors are designed in matched sets for use in 250-watt, 1-Kw, and 5-Kw transmitters. Frequency response within ± 1 db. over the full 30 to 15,000-cycle range. Driver transformers are mounted in drawn steel cases, as are Modulation Transformer BM-1 and Reactor BR-1.

Transformers BM-2 and Reactor BR-2 have shield and frame mountings similar to the plate transformers, opposite page.

Dimensions: A and D — $11\frac{1}{4}$ ", C — $12\frac{3}{4}$ " for BM-2, 10 $\frac{1}{4}$ " for BR-2.

Transformers BM-3 and Reactor BR-3 are in large, oil-filled cases, made of heavy welded steel plates. (See below right).

Chicago AUDIO TRANSFORMERS

CHICAGO TRANSFORMER DIV. - ESSEX WIRE CORPORATION

Public Address Range — 50 to 10,000 Cycles

These Driver and Output Transformers provide uniform response within ± 1 db. over the entire range of 50 to 10,000 cycles. Designed for three general power levels with secondary impedances that match conventional 600 and 150 ohm lines, 16, 8, and 4-ohm reproducing systems. Out-

put units have tertiary windings for 10% inverse feed-back that provide extra gain of faithful watts per transformer dollar. Available in either the Semi-Sealed or Compound-Sealed drawn steel cases. See first page of Chicago Transformer listings for construction details.

FOR DIMENSIONS OF CASES IN THE ABOVE TWO CONSTRUCTIONS, SEE TABLE OPPOSITE PRECEDING PAGE.

Communications Range — 200 to 3,500 Cycles

Uniform frequency response is characteristic of this series of audio transformers, not exceeding ± 1 db. over the range of voice frequencies. Units are offered in two

variations of Chicago Transformer's *Sealed in Steel* construction, either Semi-Sealed or Compound-Sealed. See first page of Chicago Transformer listings for details.

- $\pm 1/2$ db 30-15,000 cps, all types
- Low transmission loss
- Excellent longitudinal balance
- Power ratings at 30 cycles
- Either top or bottom mounting
- Extremely low hum pickup
- Humbucking winding on all Impedance, Output & Bridging types

For AM & FM Broadcast Stations and Recording Studios

IMPEDANCE MATCHING TRANSFORMERS:

Type	Primary Impedance	Secondary Impedance	Description	Max. Level	Case	Code
114A	600/250 (150/62.5)	600/250 (150/62.5)	2 mu-metal shields	+16	14A	Kaaba
114B	600/250 (150/62.5)	600/250 (150/62.5)	Cast case only	+20	14AD	Kabay
114C	10,000/600 (2500/150)	600/250 (150/62.5)	Bridging & line to line. 2 mu-metal shields	+16	14A	Kaber
114D	10,000/600 (2500/150)	600/250 (150/62.5)	Bridging & line to line. Cast case only	+20	14AD	Kabet
114E	10,000 (2500)	600/150 (150/37.5)	Bridging to line. 2 mu-metal shields	+16	14A	Kalium
114F	600/150 (150/37.5)	600/150 (150/37.5)	2 mu-metal shields	+16	14A	Kaffir
114G	600/150 (150/37.5)	600/150 (150/37.5)	Cast case only	+20	14AD	Kaiser

NOTE: All Bridging transformers have built-in primary resistors. Bridging impedance is twice primary winding impedance as listed above due to series resistors.

STANDARD LINE IMPEDANCES:

Throughout this catalog you will note that impedances obtainable by paralleling windings of transformers are given in parentheses. Thus a listing "600 (150) ohms" indicates a total impedance of 600 ohms, with 150 ohms obtainable by paralleling the two windings. With either connection windings are well balanced, but center tap is available only when both windings are connected in series. These transformers can be used with good results in matching 500 ohm circuits since the small resulting mismatch will produce very little shift of frequency response.

PLATE TO LINE PREAMPLIFIER SERVICE:

Type	Primary Impedance	Secondary Impedance	Description	Pri. MA or Unbalance	Max. VU Level	Case	Code
314A	15,000	600/250 (150/62.5)	1 6J5, etc.	8	+23	14AD	Karos
314B	20,000	600/250 (150/62.5)	PP 6J5, etc.	1	+27	14AD	Karri

TUBE TO LINE AND V.C., POWER TYPE:

($\pm 1/2$ db response guaranteed on 600 ohm output only)

Type	Primary Impedance	Secondary Impedance	Description	Pri. MA or Unbalance	Max. VU Level	Case	Code
314C	5000/ 3000	600/16/8 (150/4/2)	AB ₁ , 2A3, 6A3, 6B4	5	+42	14D	Kasha
314D	8000	600/16/8 (150/4/2)	AB ₁ , 6F6 triode	1	+35	14D	Katub
314E	*10,000/ 8000	600/16/8 (150/4/2)	PP 6V6, 6F6 pentode	5	+43	14D	Katal
314F	*9000/ 6600	600/16/8 (150/4/2)	PP 6L6 pentode	5	+45	14D	Katha

***NOTE:** Feedback winding full 10% of primary turns.

INPUT TRANSFORMERS:

Type	Primary Impedance	Secondary Impedance	Description	Pri. MA or Un-balance	Max. VU Level	Case	Code
214A	600/250 (150/62.5)	80,000	Line to 1 grid 3 mu-metal shields	0	+20	14A	Kairu
214B	600/250 (150/62.5)	80,000	Line to 1 grid Cast case	0	+20	14AC	Kaise
214C	600/250 (150/62.5)	60,000 (15,000)	Line to PP grids 3 mu-metal shields	0	+20	14A	Kakem
214D	600/250 (150/62.5)	60,000 (15,000)	Line to PP grids Cast case	0	+20	14AC	Kakar
214E	10,000/600 (2500/150)	60,000	Bridging & line to grid. 3 mu-metal shields	0	+20	14A	Kalid
214F	10,000/600 (2500/150)	60,000	Bridging & line to grid. Cast case	0	+20	14AC	Kakul

NOTE: All Bridging transformers have built-in primary resistors. Bridging impedance is twice primary winding impedance as listed above due to series resistors. May be used with excellent results on 500 ohm line.

INTERSTAGE:

Type	Primary Impedance	Secondary Impedance	Description	Pri. MA or Un-balance	Max. VU Level	Case	Code
214H	10,000	80,000 (20,000)	Single plate to PP grids. Humbuck- ing. Cast case	0	+26	14AC	Kappa
214J	20,000 (5000)	80,000 (20,000)	PP plate to PP grids. Humbucking. Cast case	1	+30	14AC	Karuk

F-M FREQUENCY REQUIREMENTS:

The wide frequency transmission requirements that Federal Communications Commission have required of frequency modulated radio stations demands that the quality of audio components be maintained at the highest possible level. This is particularly true of transformers. The transformers listed on these pages have been designed with these requirements in mind. Your transmitter or high fidelity receiver has a better chance of staying within prescribed limits if you use **ADC** components.

REACTORS:

Type	Description	Inductance	DC MA Current	Approx. DC Resistance	Case	Code
414A	PP plate or grid coupling	1000 (250)	1	8400/ 2100	14AD	Ketuk
414B	Pre-amplifier filter } or plate } Pre-amplifier filter } coupling }	100 hy	20	3200	14AD	Ketch
414C		45 hy	30	1250	14AD	Kethu

MU-METAL SHIELDING:

Because of the difficulty experienced in reproducing test results on the various methods employed, no statements are made here regarding exact shield efficiencies. The use of high permeability mu-metal for shielding, the incorporation of certain features in the design of the alloy shields and in the transformer windings, together with special balanced terminal arrangements, make these transformers far superior to competitive makes.

We welcome tests comparing any of these units with the best shielded transformers of other makes, regardless of price or claims made.

For Quality P. A. Systems and High Fidelity Music Reproduction

- $\pm 1\frac{1}{2}$ db 50-10,000 cps
- Minimum insertion loss
- Dependable at lower cost
- Power ratings at 50 cycles

ADC PLUGS

PJ-1 PLUG

Type	No. Conductors	Code
PJ-1	3	Rabet

ADC PLUGS are interchangeable with similar standard plugs. They are designed for ease in cord replacement. Precision made from the finest materials, their safety features assure utmost dependability in service.

SINGLE ROW JACK PANEL

ADC JACK PANELS have standard spacing for use with any double plug. Mounting holes are drilled and tapped to fit all standard jacks. Pairs of holes are so spaced that plug cannot be inserted to connect one side of each of two circuits. Panels are made of solid bakelite reinforced with steel for greatest strength and rigidity, complete with slotted brackets for mounting on standard 19" relay rack. Improved designation strip eases removal and replacement of designation cards. Width of panel for double row of jacks is 2 1/8". Width of panel for single row of jacks is 1 3/4". 48 jacks mount on a double row panel, 24 on single row.

Type	Description	Code
PJ-31	Double row jack panel complete with designation strip and slotted mounting brackets, but without jacks.	Reder
PJ-33	Single row jack panel complete with designation strip and slotted mounting brackets, but without jacks.	Regal
PJ-141	Unit consisting of one PJ-31 jack panel and 48 type PJ-118 jacks assembled.	Reput
PJ-143	Unit consisting of one PJ-33 jack panel and 24 type PJ-118 jacks assembled.	Repor

DOUBLE ROW JACK PANEL

ADC PATCH CORDS

PATCH CORD WITH PJ-1 PLUGS

ADC PATCH CORDS are made from the finest stranded, tinned copper 2 conductor wire well shielded and insulated. Heavy overall braid insures long dependable service. Six inch reinforcement on both ends. Shield connects to sleeves on both plugs.

Type	Length	Code
------	--------	------

PJ-1 Plugs on each end:

PJ-11	1 ft.	Rafle
PJ-12	2 ft.	Raned
PJ-13	3 ft.	Rakin
PJ-14	4 ft.	Ranch
PJ-15	5 ft.	Randy
PJ-10	10 ft.	Ranks

ADC JACKS are of approved welded box type construction assuring rigid alignment of all parts. Non-aging, non-ferrous springs provide permanent, proper tension. Silver alloy contacts are riveted through blades. Other circuits can be furnished. Dimensions are standard. Interchangeable with any standard telephone type jacks using 1/4" plug. Heavy nickel plate to prevent corrosion. Can be supplied with plain brass sleeves on special order.

ADC JACK

Type	Fig. No.	Code
PJ-118	2	Riket

If you do not know which one of your local jobbers stocks **ADC** Audio components, send your order direct to us. We will forward it to the **ADC** distributor serving your area.

STACO Transformers are compact and modern in design. Only the highest quality silicon lamination steel is used which assures cool operating transformers. Each coil is layer wound with the best quality enameled wires, each layer is insulated with heavy insulating material, each coil is varnished impregnated and high temperature baked. High Voltage Breakdown Test is performed on each coil and transformer in accordance with existing RMA Specs. This combination of high quality materials plus the finest workmanship is assurance of better and lasting performance at highest operating efficiency, yet costs no more than average.

Finishes: Mount type #1, Black baked enamel, Mount type #2, Black baked enamel, Mount type #3, Natural Buffed Aluminum, Mount type #4, Black Wrinkle baked enamel.

RELAYS FOR AMATEUR AND INDUSTRIAL USES

MINIATURE RELAYS

These units are very compact and are especially designed for plate circuit and general purpose control application. Overall dimensions: MR 1 7/8" x 1 3/8" x 7/8"—MRD 1 7/8" x 1 3/8" x 1 1/4". Contacts are fine silver rated 5 amps at 115 V. All AC relays are free from hum and AC chatter. The MR-2 and MRD-2 have 2500 ohm coil, will pick up at 6 ma. and 12 ma. respectively. The MR-5 and MRD-5 have 5000 ohm coils, will pick up at 3 ma. and 7.5 ma. respectively. The drop out value of these relays is approximately 50% of the pick up value.

MRD

Type	A.C.	D.C.	Contacts	Net Prices
MR-2		Plate Circuit	SPDT	\$1.50
MR-5		Plate Circuit	SPDT	2.10
MR-6		6 V.	SPDT	1.50
MR-7	6 V.		SPDT	1.59
MR-11	110 V.		SPDT	1.59
MRD-2		Plate Circuit	DPDT	2.70
MRD-5		Plate Circuit	DPDT	3.60
MRD-6		6 V.	DPDT	2.70
MRD-7	6 V.		DPDT	3.00
MRD-11	110 V.		DPDT	3.00

OVERLOAD RELAYS

Adjustable overload relays provide accurate and positive protection against current surges and continuous overloads. Contact arrangements SPDT using 3/16" fine silver contacts. This allows the use of either audible or visual signal to aid in the electrical reset type which allows remote control resetting of the relay. Size—3 3/4" x 2" x 1 1/2".

Type	Current Range	Reset Coil	Net Prices
OA-2	250 500 ma.	110 V. A.C.	\$4.50
OA-5	500 1000 ma.	110 V. A.C.	4.50
OC-2	250 500 ma.	6 V. A.C.	4.50
OC-5	500 1000 ma.	6 V. A.C.	4.50
OD-2	250 500 ma.	6 V. D.C.	4.50
OD-5	500 1000 ma.	6 V. D.C.	4.50

LATCHING RELAYS

These relays are employed where it is not desirable to have current continuously on the coil. The latching arrangement is such that when the relay coil is energized the armature closes and locks in a closed position by mechanical latching. An electrical impulse on the reset coil releases the armature from the latch and allows the relay to assume its initial position. 3/16" fine silver contacts. Bakelite Base. Size—3 3/4" x 2" x 3/4".

Type	Reset Coil	Pull-in Coil	Net Prices
LEA	110 Volts A.C.	110 Volts A.C.	\$3.75
LEA-6	6 Volts A.C.	6 Volts A.C.	3.75
LED	6 Volts D.C.	6 Volts D.C.	3.75

COMMUNICATION RELAYS

Ideally suited for use in telephone, remote control, signaling, communications circuits etc. High speed operation plus high sensitivity with high contact pressure. Contacts will handle 4 amps at 115 V. non-inductive load. Each relay has one make and one break contact sets. Size—3 3/4" x 1 3/16" x 1 1/8".

Type	Res. of Coil Ohms	Volts Pick-up	M.A. Pick-up	Net Prices
T10G	10,000	31	3.2	\$3.30
T63F	6,300	24	4.0	3.30
T40F	4,000	19	5.0	3.15
T10F	1,000	10	10.0	2.85
T25E	250	5	20.0	2.55

ANTENNA CHANGE-OVER

Mycalex Insulation is satisfactory for operation up to 60 MC. Triple-X insulation for operation up to 15 MC. All models use 3/16" fine silver wiping action contacts rated at 4 amps. These relays are designed with ball-bearing armature pivot and have large contact spacing to assure minimum capacity between contact arms. The armature is designed so as to eliminate AC chatter. Size—3 1/4" x 3 1/8" x 2 3/16".

Type	Insulation	Coil Voltage	Net Prices
ABA	TRIPLE-X	110 V. A.C.	\$3.00
ABD	TRIPLE-X	6 V. D.C.	3.00
AMA	MYCALEX	110 V. A.C.	4.00
AMD	MYCALEX	6 V. D.C.	4.00

BREAK-IN RELAYS

Same type of relay as above only two additional poles are added, one normally open, one normally closed. This arrangement is perfect for PUSH-TO-TALK control. Contacts etc. identical with Antenna-Change-Over Relay. Size—4 1/2" x 3 3/8" x 2 3/16".

Type	Insulation	Coil Voltage	Net Prices
BBA	TRIPLE-X	110 V. A.C.	\$4.20
BBD	TRIPLE-X	6 V. D.C.	4.20
BMA	MYCALEX	110 V. A.C.	6.00
BMD	MYCALEX	6 V. D.C.	6.00

R.F. AND GENERAL PURPOSE RELAY

An excellent relay for R.F. or high voltage remote control. Contacts are 3/16" fine silver rated 4 amps. Designed with extremely short R.F. path. Ball-bearing armature pivot. All metal parts cadmium plated. RB Series are TRIPLE-X insulated for frequencies up to 15 MC., RM series are MYCALEX insulated for frequencies up to 60 MC. Size—2 1/4" x 3 3/8" x 2 3/16".

Type	Insulation	Contact Combination	Coil Voltage	Net Prices
RBA-1	TRIPLE-X	SPST (dble-break)	110 V. A.C.	\$2.10
RBD-1	TRIPLE-X	SPST (dble-break)	6 V. D.C.	2.10
RMA-1	MYCALEX	SPST (dble-break)	110 V. A.C.	2.55
RMD-1	MYCALEX	SPST (dble-break)	6 V. D.C.	2.55
RBA-2	TRIPLE-X	DPST (sngle-break)	110 V. A.C.	2.25
RBD-2	TRIPLE-X	DPST (sngle-break)	6 V. D.C.	2.25
RMA-2	MYCALEX	DPST (sngle-break)	110 V. A.C.	3.00
RMD-2	MYCALEX	DPST (sngle-break)	6 V. D.C.	3.00

KEYING RELAY

Same specifications as RB Series except that the coil and return spring are faster acting. Follows a "Bug" with ease.

Type	Coil Voltage	Contacts	Net Prices
KBA	110 V. A.C.	SPST (double-break)	\$2.10
KBD	6 V. D.C.	SPST (double-break)	2.10
KBA-6	6 V. A.C.	SPST (double-break)	2.10

MERCURY-SWITCH RELAY

This type relay is used for controlling inductive loads and may be safely used in the presence of explosive dust, gas and vapor. This unit will safely handle a 1/4 H.P. motor or its equivalent. This single pole single throw mercury relay can easily be changed from normally open to normally closed by reversing the mercury tube in the clip. In addition this relay is equipped with SPST double break 3/16" fine silver contact sets which can be used to electrically lock this relay, or other applications. Mounts vertically with adjusting screws. Size—3 3/8" x 2 5/8".

Type	Coil Voltage	Net Prices
MSA	110 V. A.C.	\$3.75
MSA-6	6 V. A.C.	3.75
MSD-6	6 V. D.C.	3.75

TIME-DELAY RELAY

Low cost Thermostatic Time delay relays designed for transmitting and industrial use. Prevents damage to tube filaments due to application of plate current before filaments are thoroughly heated. TD-11 is equipped so that it automatically compensates for ambient temperature changes. Time delay can be adjusted by means of screwdriver. Stock models are 110 V. A.C. Size—3 1/8" x 3 1/8" x 2 3/16". TD-11 (10-60 Sec.)—With compensator Net \$4.75

TUBULAR CAN-TYPE DRY ELECTROLYTIC CAPACITORS

"BLUE BEAVER"* CAPACITORS

Types BR and BRD "Blue Beavers" are the most popular electrolytic capacitors employed for all applications where units are required for convenient mounting in small spaces beneath a chassis or connected directly in the wiring assembly. They are small in physical size and self-supporting by means of strong, bare tinned-copper wire leads, while the larger sizes may be mounted with a metal strap.

Type BR capacitors employ seamless, drawn aluminum can construction encased in a tightly fitted insulated cardboard tube sleeve. A bare tinned-copper wire lead is riveted to the bottom of the can for negative connection while the positive terminal lead is riveted in the center of an insulated disc cover at the opposite end. Polarity of all units is clearly indicated on the cardboard tube casing.

ROUND CAN DRY ELECTROLYTIC CAPACITORS

TYPE QC

PLUG-IN TYPE CAPACITORS

Type QC Capacitors are hermetically sealed in round aluminum containers and provided with a four-pin octal base mounting in order to be readily removed and replaced in standard octal base tube sockets. They are ideally suited for experimental, testing uses and other applications where quick capacitor changes are required.

All units employ pure aluminum construction internally in order to preclude against corrosion of dissimilar metals. Connections to brass pin terminals of the octal base are imbedded in bakelite. Base pins are nickel plated to insure good electrical contact with socket terminals. The molded bakelite octal base construction is so designed that the container will not contact mounting surfaces.

A popular range of capacities and voltage ratings are listed below. Units are also available in other single and multiple section combinations upon special order. In special quad ripple section units a common negative ground connection is made to the can with a standard base mounting ring.

TYPE QC

TYPE KR

SCREW-NECK TYPE CAPACITORS

Types KR and KRC single hole mounting units are compact etched foil type dry electrolytic capacitors furnished in round (inverted mounting) aluminum cans. Available in single, dual and triple sections with color-coded leads. Made in all popular voltage ratings for use in A.C.-D.C. or voltage doubler midgets and A.C. operated sets.

REPLACEMENT DRY ELECTROLYTIC CAPACITORS

TYPE WR

REPLACEMENTS FOR WET-TYPE UNITS

These dry electrolytic capacitors furnished in round aluminum cans are offered as substitutes for replacement of wet electrolytic units which have been discontinued in manufacture during the war. The limited range of capacities listed below cover practically all applications in standard radio receivers and other equipment in which wet type electrolytic capacitors were originally employed.

WET ELECTROLYTIC REPLACEMENT
TYPE WR

450-Volt D.C. Replacement Capacitors

Cap. No.	Cap. Mfd.	Capacity—Mfd.	Size—Ins. Dia. x Lth.	List Price	Net Price
WR 10	10	1.50-20 mfd.	1 1/2 x 2 1/2	\$1.49	\$0.87
WR 20	20	1.50-30 mfd.	1 1/2 x 2 1/2	—	1.35
WR 30	30	1.50-30 mfd.	1 1/2 x 2 1/2	—	1.86
WR 40	40	1.50-30 mfd.	1 1/2 x 2 1/2	—	1.74

For one-to-one transfer you will find this replacement set of aluminum electrolytic C.D. Type WR capacitors an excellent source of units of equivalent capacity and voltage ratings.

TYPE EB

FILTER REPLACEMENT UNITS

Type EB electrolytic capacitors are especially suited for replacement purposes in radio receivers to replace units of larger physical sizes. They are identical in mounting hole dimensions and general construction to Type WR capacitors except they are provided with insulated color-coded wire leads 8" long brought through the threaded neck of the unit.

TYPE EB

INSULATED LEADS 8" LONG 1/2 OF ENDS SKINNED & TINNED

450-Volt D.C. Replacement Capacitors

"ELECTROLYTIC CAPACITORS"

By PAUL McK. DEELEY

Here in the "Electrolytic Capacitors" you will find a wealth of the most important information published on the subject of electrolytic capacitors.

Never before has the hobbyist been offered a manual so complete and so comprehensive at the price—\$1.00 net, formerly \$3.00. "Electrolytic Capacitors" should be in every radio hobbyist's personal library and technical file.

The author has provided the reader with specific information concerning the many factors involved in the design and construction of electrolytics. It is profusely illustrated with numerous applications of electrolytic capacitors. 300 pages, size 5 1/2" x 7 1/2" with bound-in index. Every page is a gold mine of facts and data.

This 300-page book is now available—paid—for only..... **\$1.00 net**

HIGH CAPACITY DRY ELECTROLYTIC CAPACITORS

TYPE BRH

METAL TUBULAR TYPE CAPACITORS

These compact C-D etched foil electrolytic capacitors have been especially designed for all applications requiring high capacity units operating in low voltage D.C. circuits. They are widely employed in portable radio power rectifying circuits, electric fence devices, telephone and D.C. timing circuits. Units are available in standard capacities and voltage ratings for all uses.

Hermetically sealed in pure aluminum cans with an external cardboard insulating sleeve, these units are provided with metal mounting strap and bare wire leads for convenient wiring into any circuit assembly. They are constructed identically the same as Type BR "Blue Beavers" except all units are provided with a mounting strap.

Cap. No.	Cap. Value	W. Voltage	Dimensions (Dia. x L)	Lead Length	Net Price

TYPE FA

INSULATED CAN CAPACITORS

Type FA capacitors in round aluminum cans are designed for high capacity, low voltage applications, and are especially popular as replacements in motion picture sound equipment, "A" battery power supplies and other low voltage circuits where hum-free operation is essential. All units are provided with lug terminals on a moulded bakelite cover and furnished with an external cardboard insulating sleeve for protection against short circuits.

Cap. No.	Cap. Value	D.C. W. Voltage	Dimensions (Dia. x L)	Lead Length	Net Price

CARDBOARD TUBE DRY ELECTROLYTIC CAPACITORS

TYPE EDL

TYPE EZ

CARDBOARD TUBE UNITS (Formerly Type BRL)

Type EDL Capacitors are dual and triple common negative units in cardboard tube containers with wax-filled ends. Capacities, voltages and polarity of the leads are clearly defined by color coding stamped on the cardboard tube casing. Units are provided with insulated wire leads brought out at both ends of the unit. A mounting strap around the center of the cardboard tube casing enables mounting the unit with one screw under the chassis assembly.

TYPE EDL

COLOR CODING OF LEADS STAMPED ON CARDBOARD TUBE CASING OF ALL UNITS

Color Coding Of Wire Leads

- BLACK — Common negative lead.
- RED — Positive, highest voltage or capacity.
- BLUE — Positive, next highest voltage or capacity.
- GREEN — Positive, next highest voltage or capacity.
- YELLOW — Positive, next highest voltage or capacity, or negative in units where two separate negative terminals are required.
- BROWN — Negative, in units where three separate negative terminals are required.

UNIVERSAL-MOUNTING UNITS

Type EZ capacitors are especially popular for radio servicing where low cost replacements are required. They are designed with mounting feet for upright mounting to replace inverted can-type units, spade-lug units, or may be mounted beneath the chassis by means of the mounting strap provided around the center of the cardboard tube casing. In any instance, the unused mountings may easily be cut off.

These units are without doubt the most practical all-around replacement capacitors available and incorporate C-D etched foil features in design and construction. They are completely sealed in moisture-proof cardboard tube casing, filled with special wax compound, and provided with insulated wire leads eight inches long. All units are clearly stamped with capacities, voltages and color code designation of leads.

*First section separate, others common negative.

Explanation of Terminal Connections

In all cases only a single common negative lead is provided to all sections in multiple section capacitors listed under the heading of Common Negative Units. Separate Section Units are provided with separate negative and separate positive leads.

In triple and quadruple section capacitors with separate sections, indicated with an asterisk (*), the very first capacity listed is a separate section, having separate negative and positive leads, while all other capacities shown are connected to a single common negative lead with separate positive leads to each section.

TUBULAR PAPER CAPACITORS

TYPE
ZZW

MINIATURE TUBULAR CAPACITORS

Types ZYW, ZZW, and flat type ZNW, tiny tubular paper capacitors are especially suited for use in very small electronic assemblies, such as hearing aids, pocket radios, etc., where minimum space and weight are essential. These capacitors are the result of Cornell-Dubilier developments for the VT radio proximity fuze for shells and bombs made for the Navy during the War and today find many applications in ultra compact electronic equipment of all kinds. All units are non-inductively wound, wax impregnated by special process, and sealed in a laminated paper wrapper with plastic compound ends. They are additionally protected against moisture with a complete wax coating.

*For units provided with insulating sleeve over metal tubes add 10c to list price. When ordering add ".6" to Cat. No. (Example TVC 4D5-6).

HIGH-SPEED PHOTO-FLASH ENERGY STORAGE CAPACITORS

Type HKGT capacitors are specially designed for use in high-speed photographic equipment, traffic light blinkers, light metal welding and other light-duty d.c. energy storage and discharge applications. They are compact and comparatively light-weight consistent with safe electrical ratings, operating characteristics and extra long life.

Multiple sections in these units are assembled in sturdy metal containers and provided with heavy-duty internal leads connected to bakelite-cup insulated terminals.

The watt-second energy storage capacitance of these units is shown below. Capacitors for this type of duty are rated by their energy storage capacity when fully charged at rated peak voltages. Watt-second rating equals 0.5 CE², where C = Capacity in Farrads, and E = charging volts.

Type HKGT capacitors are normally furnished without mounting brackets. Standard brackets such as supplied with type T capacitors can be supplied on request.

NOTE: Special units can also be furnished in other ratings or round can construction on special order upon request.

DRAWN METAL SHELL PAPER CAPACITORS

TYPES DA, DB and DC

WAX-FILLED CAPACITORS

Types DA to DC capacitors are non-inductively wound and wax-potted in drawn metal shell containers. They are available in a large variety of ratings for radio frequency bypass, audio frequency coupling and bypass functions. Lug terminals are amply insulated. Integral with casing, the mounting feet allow ease of assembly.

In the single and dual section capacitor units, the terminals are insulated from the container. The duals have three terminals, the common lug being on the left. In the triple section capacitors, the common terminal connection is grounded to the metal case.

All units are wound with the highest grade pure aluminum foil and multi-laminated kraft tissue, thoroughly dried under vacuum pressure, impregnated in the finest grade wax compound, oil-cooled, and potted in a special wax compound. Conservative D.C. ratings of these capacitors by triple testing assure dependable service in operation.

TYPES DA, DB, DC

TYPE DYR

DYKANOL-FILLED CAPACITORS

Type DYR Dykanol Bypass Capacitors are non-inductively wound and meet the need for dependable capacitors of fractional capacities that will operate efficiently in R.F. and A.F. bypass, audio frequency coupling and A.C. circuits under all humidity conditions and at temperatures up to approximately 85° C. (185° F.). They are built to stand an immersion test in hot water and have been specially designed to fill the severe requirements of aircraft, submarine, marine and tropical applications for maximum capacity and voltage in minimum space, where quality and reliability are of paramount importance. They are impregnated and filled with Dykanol "G" and sealed in metal cases with leakproof riveted terminals.

DRAWN METAL SHELL PAPER CAPACITORS

TYPE YAB **TYPE YAT**

COMPACT DYKANOL CAPACITORS

Types YAT and YAB are impregnated and filled with Dykanol "G" (chlorinated diphenyl) a synthetic, non-inflammable, non-oxidizable liquid compound which is unaffected by wide latitude of temperature changes or voltage stresses. They are especially suited for use in bypass, audio frequency coupling circuits and other applications where conditions of high humidity and temperatures are encountered.

Units are sealed in drawn metal shell containers and provided with leakproof terminals either on top or bottom of the can containers, designated as Types YAT and YAB accordingly. All units are provided with rugged metal mounting brackets which provide rigid mountings. Two or more units may be mounted close together in an assembly. Single section units are provided with two terminals while dual and triple section units have three terminals. In single and dual section units terminals are insulated from the metal container. The third terminal of dual section units is the common terminal and marked for identification. In triple section units the common terminal connection is grounded to the metal case.

Types WAT and WAB Capacitors are smaller size units of similar construction and electrical characteristics but only applied in single section units with two terminals. These units are ideally suited for use in assemblies where space is limited and multiple units may be mounted close together for compactness.

REPLACEMENT PAPER CAPACITORS

TYPE RMJ

UNCASED PAPER CAPACITORS

Type RMJ uncased capacitors are made available to repair paper dielectric filter blocks which were used in the early models of A.C. operated radio sets. Also useful in the elimination of electrical interference caused by pushbuttons, bells, buzzers, and similar applications in radio, electronic and electrical devices.

Special capacitor units can be made up and potted into suitable containers by servicemen to fulfill many requirements.

MOTOR GENERATOR AMMETER AND BUFFER CAPACITORS

The mechanical design of C-D Auto Radio Capacitors insures against damage by the high temperatures and excessive vibration existing under the hood of an auto. Special units such as these are designed for certain particular

installations. Thus, for instance, Ford generator capacitor, FC-2P5V, has a special mounting bracket while others are also provided with special mountings and terminals.

Metal cased oil-impregnated and processed tubular paper capacitors with cardboard insulating sleeve and mounting strap. 2000 V.D.C. Peak

For oil-impregnated and processed paper tubular capacitors, see Type MD listed on page 8.

DYKANOL TRANSMITTING CAPACITORS

TYPE T

TYPE TJH

TYPE TJL

TYPE TJU

TYPE T CAPACITORS WITH VARIOUS TYPES OF MOUNTINGS

Type T-series Dykanol transmitting capacitors are the finest and most dependable units obtainable for use in all amateur, broadcast and commercial equipment. Units are provided with well insulated terminals, and mountings desired as shown in the accompanying illustrations. These units are standard in thousands of broadcast and government stations all over the world, and also employed in all types of sound equipment, television receivers and transmitters, and other electronic apparatus.

Type T capacitors are thoroughly impregnated and filled with Dykanol "G" (chlorinated diphenyl), a non-inflammable, fireproof, non-oxidizable liquid compound which provides a high factor of safety and exceptionally long life at high temperatures.

In the past, organic oils, resins, and waxes were used as paper impregnants in electrical insulation. Because of the variation of these natural materials, uniformity of results could be desired only and not attained. The concentrated attention of chemists and electrical engineers was turned toward the development of non-organic, synthetic substitutes and new substances, the properties of which could be controlled and modified as desired. The chlorinated diphenyls were recognized as outstanding among the rapidly increasing number of synthetics available. Of these compounds, continued research pointed to one narrow group, that known as Dykanol "G," the characteristics of which were particularly suited to the capacitor art. This material, having the lowest power factor compatible with the highest dielectric constant, is used as the impregnant in Type T capacitors.

For the dielectric separator in Type T capacitors, only the highest grade of kraft paper is used, ranging in thickness

from .0003 to .001 of an inch for a single sheet. Three or more layers of paper dielectric as a separator between foil members are always used. The higher voltage units use as many as six or more layers. This multiple lamination builds a high safety factor into Type T capacitors.

All paper is manufactured to meet rigid specifications and is subjected to a series of tests at the C-D laboratories before acceptance for use in these capacitors. The paper must be of exceptionally high quality to pass the tests. In order to determine its many characteristics, tests are made for porosity, tensile strength, effect of heating, conducting particles, dielectric strength, ash content and ash analysis, acidity or alkalinity, soluble impurities, general appearance, and mechanical considerations such as yield, thickness, width, etc.

Due to the use of Dykanol "G" and multi-layer kraft capacitor tissue in these units, many outstanding advantages are thus gained, i.e., small size, light weight, low dielectric stress and long life at higher operating temperatures. The size is reduced due to the high dielectric constant of Dykanol "G" which also affords reduction in weight. A low dielectric stress is obtained as the result of efficient use of container volume, and the high specific inductive capacity of the impregnant. And since the dielectric stress is low, the life of the unit in operation is greatly increased. The synthetic liquid impregnant employed in these capacitors does not oxidize or deteriorate like commonly used organic oils. For complete listing of Type T-series, see next page.

For higher voltage units, ranging from 6000 to 25,000 v.d.c., write for data and prices on Type TK capacitors.

DYKANOL TRANSMITTING CAPACITORS

TYPE DESIGNATIONS—Type T (basic units) are without mountings. To order Types TJH, TJL or TJU with mountings as shown above, add letter symbols of type mountings desired to Cat. No. as follows:

TYPE T—(Basic unit) without mountings.
 TYPE TJH—With screw spade-lug brackets.

TYPE TJL—With mounting foot brackets.
 TYPE TJU—With universal mounting strap.

Prices below include mounting brackets or universal mounting strap when ordered according to these type numbers.

NOTES—* Type TJU units are not furnished in these larger sizes.
 † TYPES TJL and TJH units furnished with two mounting holes or spade-lugs 3/8" apart. All other units furnished with a single mounting hole or spade-lug centered on each bracket.

For higher voltage units, from 6000 to 25,000 v.d.c., write for data and prices on Type TK capacitors.

DYKANOL TRANSMITTING CAPACITORS

TYPE TQ

ROUND CAN-TYPE CAPACITORS

Cornell-Dubilier, Type TQ Dykanol Capacitors, in round metal containers are provided with two insulated terminals and universal mounting rings for mounting the unit in any position with terminals either above or below a subpanel assembly. These units are designed primarily for filter circuits in amateur, low-power broadcast and commercial transmitters. They are also adapted for high-power, high-fidelity public address systems and portable power amplifiers.

TYPE TQ

MOUNTING RING FOR TQ CAPACITORS

TYPE TLA

ONE-HOLE MOUNTING CAPACITORS

For compact high-voltage filter applications in high-fidelity P.A. amplifiers, power supplies for short-wave portable transmitters and transceivers, type TLA Dykanol filter units in round aluminum containers are ideal in every respect. One terminal is well insulated, the other being the metal can itself. Insulating washers, as well as a large spade lug, are provided so that the metal container may be insulated from the chassis.

Type TLA capacitors are thoroughly impregnated and filled with Dykanol "G" (chlorinated diphenyl), a non-inflammable, fireproof, non-oxidizable liquid compound which provides a high factor of safety and exceptionally long life at high temperatures.

Type TLAD Capacitors are similar in construction except that the capacitor section is insulated from the metal container and furnished with two soldering lug terminals instead of one.

Notes On Ordering Special Units

The listing above gives the range of capacities available from stock. Intermediate capacities, not exceeding the maximum as listed for each type, can also be furnished upon request.

Standard capacity tolerance is plus or minus 20%. Also available, on order, in plus or minus 10%, 5%, 3% and 2% tolerance ratings (or within 1 mmfd.—whichever is greater). For capacity tolerance of: 10% add 10% to list prices; 5% add 20% to list prices; 3% add 40% to list prices; 2% add 75% to list prices.

HIGH-STABILITY "SILVER-MIKE" UNITS

Types 1R, 1DR, 2R and 5R "Silver-Mike" silvered mica capacitors are designed for use in high Q electronic circuits where frequency stability and minimum loss must be maintained. They are ideally suited for use in circuits where the LC product must be maintained constant, and particularly adapted for use in tuning IF transformers, push-button tuning circuits and other similar applications. Standard units are moulded in low-loss red bakelite.

Cap. Mfd.	Type 5R Cat. No.	Type 2R Cat. No.	Type 1R & 1DR Cat. No.	List Price	Net Price

Notes On Ordering Special Units

The listing above gives range of capacities which are available from stock. Intermediate capacities, not exceeding the maximum as listed for each type, can also be furnished upon request.

Standard capacity tolerance is 5%. Also available, on special order, in tolerance ratings of plus or minus 3%, add 10% to list prices, 2% add 15% to list prices and 1% add 25% to list prices, (or within 1 mmfd.—whichever is greater). All types can also be supplied in plus or minus 10% and 20% tolerances at lower prices.

CORNELL DUBILIER

MOULDED MICA TRANSMITTING CAPACITORS

MOULDED BAKELITE MICA CAPACITORS

C-D Mica Capacitors Types 4 and 9 are designed to meet the requirements of power amplifiers and low-power transmitters. They are principally employed for grid and plate blocking purposes and for r. f. by-pass functions.

Notes on Ordering Special Capacitors

Type No. Suffix STANDARD TOLERANCE is plus or minus 10%. Also available on order in plus or minus 5% and 2%. For capacity tolerance of: 5% add 15c to list prices; 2% add 40c to list prices.

"L" MOULDED IN LOW-LOSS BAKELITE available on order. Add "L" to Cat. No. (example: 4L-22060; 9L-11010). Add 25c to list prices.

"S" SPECIAL SALT WATER IMMERSION SEAL AGAINST HUMIDITY. To order, add "S" to Cat. No. (example: 4S-53010; 9S-12050). Add 10c to list prices.

"T" HEAT AGEING TREATMENT for stabilizing capacity over extremely wide temperature changes, minus 40° C. to plus 70° C., furnished on special order. Add "T" to Cat. No. (example: 4T-12010; 9T-21020). Add 15c to list prices.

"LST" TO ORDER A COMBINATION OF ABOVE FEATURES, add letters specified to Cat. No. (example: 4LST-12040; 9LST-13020). Add 50c to list prices.

INSULATION RESISTANCE—Brown Bakelite, 20,000 megohms per unit—Low-Loss Bakelite, 40,000 megohms per unit. Low-Loss Bakelite provides higher Q and lowers the power factor.

"4E" SMALL METER BRACKETS adapted for Weston Model 301 meters, add "E" to Cat. No. (example: 4E-22050). Add 20c to list prices.

"9A" UNTAPPED MOUNTING HOLES. Standard units are tapped for 6-32 and furnished with round head screws. For untapped mounting hole, .144" diameter (No. 6 clearance), add "A" to Cat. No. (example: 9A-11030).

"9F" HIGHER VOLTAGE CONSTRUCTION, rated 6,000 v.d.c. test, 3,000 v.d.c.—1500 v.a.c. operating. Capacity range limited. Moulded in low-loss Bakelite, BM 262. The thickness of these units, or "A" dimension, is 1/16" for capacities up to .002 mfd. and 3/16" for capacities from .0022 to .005 mfd. max. To order, add "F" to Cat. No. (example: 9F-63050, the numeral "6" designating 6,000 volts test). Prices of "9F" units are double the list prices shown.

"9R" HIGH STABILITY UNITS—Special high stability units, comprising low-loss Bakelite, BM 262, temperature aged and sealed construction for use as low power master oscillator tank capacitors or accessory positions. These units are fixed and permanent in characteristics, having a capacity-temperature coefficient of approximately plus .003% (30 parts per million) per degree C. To order, add "R" to Cat. No. (example: 9R-52020). Prices of 9R units are double the list prices shown.

BAKELITE CASED MICA TRANSMITTING CAPACITORS

TYPE 6

TYPE 15L

TYPE 30B

BAKELITE CASED MICA CAPACITORS

TYPE 6

TYPE 15L

TYPE 30B

Types 6, 15L and 30B Mica Capacitors in moulded bakelite cases are designed for a wide variety of radio frequency applications where size and weight are at a premium, such as in aircraft, portable equipment, low-power transmitters and the earlier stages of high-power transmitters. They are specially suited for use as grid, plate, coupling, tank and by-pass functions. These units are among the smallest types employing the patented series-stack construction permitting their use on higher r.f. voltages.

Notes on Ordering Special Capacitors

Type 15L units are available only in low-loss Bakelite (BM-262 or equivalent) cases. Types 6 and 30B may be had in either standard (brown) or low loss (yellow) Bakelite cases. When ordering low-loss units, add "L" to Cat. No. (example: 217-6L; 604-30BL). Add \$1.00 to list price for Type 6. Add \$1.50 to list price for Type 30B.
STANDARD CAPACITY TOLERANCES—Plus or minus 5%. Tolerance of 2% can be furnished on special order. Add \$1.50 to list price for Types 6 and 15L. Add \$2.00 to list price for Type 30B.
OPERATING AMBIENT TEMPERATURE—Up to 60° C. maximum.
SALT WATER IMMERSION SEAL—To order, add "S" to Cat. No. (example: 246-5S; 726-15LS; 113-30BS). Add to list: \$.30 for Types 6 and 15L. Add to list: \$.50 for Type 30B.

"H" Type—These units have been developed for use where excellent retrace and low temperature coefficient are required. Over a range of -40° C. to +70° C., the capacity temperature coefficient is approximately +.003% per degree C. A limited range of capacity and voltage ratings is available. Made only in low-loss Bakelite and sealed for immersion test. To order, add "H" to Cat. No. (example: 6H, 15H, 30BH). Add to list: \$.40 for Type 6. Add to list: \$.20 for Type 15L. Add to list: \$.50 for Type 30B.

TYPE 6K—This unit is a still further refinement being a compensated unit which can be made with a positive, zero or negative coefficient within the limits of +.003% to -.005% per degree C. over a temperature range of from -40° C. to +70° C. Type 6K is available in a limited range of low capacities and voltage ratings. "K" Type includes low-loss Bakelite and immersion seal. When ordering Type 6K, temperature coefficient must be specified. (Type 6 only) Add to list Price: for plus or minus 5%—\$12.00; for plus or minus 3%—\$13.00; for plus or minus 2%—\$14.00; for plus or minus 1%—\$18.00.

TECHNICIANS

Get This Helpful
Magazine Every
Month!

tells you what to do
—how to do it—chock
full of latest servicing
information — simplifies
complicated and difficult jobs

Here's a magazine you can't afford to miss. Every month it is loaded with ideas—not impractical, day-dreamy schemes which look good only until you try using them—but down-to-earth, tested plans which have actually been used with success by other servicemen and technical men.

Its convenient, pocket size pages contain valuable technical data—latest dope on new type tubes—notes on trouble shooting—yes, and dozens of helpful hints which will help you to repair any radio ever made easier and better.

Accept "The Capacitor"—every month—with C.D.'s compliments. **Don't wait! Write for your FREE subscription today.**

Yours
Merely For The
Asking!

FREE ADVERTISING FOR SERVICEMEN READERS

Looking for a new signal generator? Want to sell that spare 'scope? Interested in swapping some equipment with other servicemen? **The Trading Post**—which appears every month in "The Capacitor" will carry your ad FREE. Write to Cornell-Dubilier Electric Corporation, Dept. 200, South Plainfield, N. J.

CAPACITOR TEST INSTRUMENTS

MODEL BF-50

CAPACITOR ANALYZER

The Model BF-50 Capacitor Analyzer quickly and accurately measures all important characteristics of all types of capacitors. It offers the most accurate and thorough capacitor test of any instrument of its type, and may be operated on any 110-volt, 50-60 cycle power line.

The analyzer will determine the true condition of all paper, mica and electrolytic capacitors, including A.C. motor starting types.

Features of Model BF-50 Analyzer

1. Measures Capacity—Accurately measures capacity of paper, mica, air, electrolytic and motor-starting capacitors from .00001 to 240 mfd.
2. Measures Power Factor—Measurement of power factor from zero to 50 percent on all types of electrolytic capacitors including motor-starting types.
3. Employs Wien Bridge—Assures permanent accuracy of capacity and power factor measurements. Readings not effected by line voltage variations.
4. Indicates Insulation Resistance—Insulation resistance measurements of paper and mica capacitors up to 1500 megohms. Also measures many types of insulation.
5. Indicates Leakage—Measurements of leakage of electrolytic capacitors by means of built-in direct current power supply.
6. Visual Eye Leakage Indicator—Provides simplified and reliable leakage tests on all types of capacitors. Enables measurements to be made rapidly.
7. Detects Defective Capacitors—Character measurements, such as leaky, shorted, open, high and low capacity, and high power factor on all capacitors.
8. High Sensitivity on All Measurements—Amplifier for capacity, power factor and leakage tests provides sharp and accurate readings. Amplifier built-in Analyzer.
9. Balance Sensitivity Control—Provides sharp or broad balances for quick and accurate readings. All readings are made simply and directly.
10. Direct Reading Linear Scale Calibration—Provides simplified measurements. All scales on panel uniformly spaced, easy to read, thus avoiding possible errors in using multipliers or charts.
11. Push-Button Switching—For convenient and simplified adjustments, all tests and circuit changes are made by means of modern push-button switches.
12. Visual Eye Bridge Balance—Visual detector gives positive indication of bridge balance for convenient, simplified and accurate capacity and power factor measurements.
13. Six Color-Coded Scales—Accurately calibrated, six color-coded scales. Uniformly spaced over total spacing of sixty inches. Easy to read. No "blind" spots.
14. General Purpose Instrument—May be used to check continuity capacity between circuits, insulation of transformer windings and other types of coils, etc.
15. Self-Contained—Portable—An instrument complete in itself, requiring no external standard, headphones, meters or accessories. A portable unit, for 110 volt, 50-60 cycle operation, supplied in walnut cabinet, removable cover, with carrying handle. Size, 6½ x 12 x 9¾ inches Weight, 9 pounds.

MODEL BN

CAPACITOR BRIDGE

Features of Model BN Capacitor Bridge

1. Measures Capacity—Accurately measures capacity of paper mica electrolytic and air capacitors from .00001 mfd. to 50 mfd.
2. Indicates Power Factor—Power factor of electrolytic capacitor indicated by means of visual eye detector tube.
3. Detects Defective Capacitors—Detects open and short circuits, high and low capacity, and high power factor.
4. Checks Circuit Continuity—May be used as continuity meter. A handy instrument for checking circuits, coils, transformers and many other uses. For operation on 110 volts, 60 cycles.
5. Employs Wien Bridge—Employs Wien Bridge circuit for all measurements. Accuracy independent of line voltage variations.
6. Visual Eye Bridge Balance—Dual type visual bridge balance for accurate measurements facilitates quick tests on service jobs.
7. Direct Reading Scale—Direct reading ranges with all scale markings directly in microfarads. Clear reading dial scale. All capacity calibrations marked on panel. No charts or multipliers required.
8. Self-Contained—The Capacitor Bridge is complete in itself and requires no headphones, standards, external meters, etc.
9. Extremely Compact—The unusually small size of this bridge makes it particularly handy for portable use—3¾" x 5" x 3" weight 2 pounds.
10. Attractive—Supplied in attractive walnut Bakelite case complete with detachable test leads and useful instruction booklet.

MODEL BN CAPACITOR BRIDGE

\$19.50

CDA

CAPACITOR DECADES

C-D Capacitor Decades provide accurate standards over a wide range of capacity. May be used in groups of the three decades, shown above, or used individually for maximum flexibility. Each decade is furnished with calibration chart giving exact capacity values for all scale markings, extending use to more precise measurements.

Rated Voltage—600 D.C.—220 A.C.

QUIETONE INTERFERENCE FILTERS

RADIO AND APPLIANCE QUIETONES

Most satisfactory results are obtained when Quietones are installed at the source of the interference. A Quietone installed in connection with an offending appliance corrects the noise caused by that appliance.

Where source of interference cannot be located a Quietone connected in the electric supply line of the radio receiver will alleviate, if not fully correct, the condition. When a Quietone is installed, interference will be greatly reduced. Remaining interference usually enters receiver through the antenna system.

Quietones for Use at the Radio Receiver

TYPE IF-4—For use on small radio receivers, such as A.C.-D.C. midget sets, etc., where noise level is not too severe. Connects in power line between the radio receiver plug and wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut, or green finish.
List Price \$1.10 Net Price **\$0.66**

TYPE IF-18—For use in connection with all radio receivers where noise level is severe. Furnished in Bakelite case (see colors). Employs highly effective all-wave capacitive-inductive type filter. Ratings: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory or walnut Bakelite.
List Price \$8.35 Net Price **\$5.01**

Quietones for Use at Appliances

TYPE IF-5—For small electrical appliances such as food mixers, hair dryers, etc., where radio interference is of low intensity. Plug type filter. Convenient to install. Rating 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish.
List Price \$1.10 Net Price **\$0.66**

TYPE IF-6—For all types of home electrical appliances where interference is of moderately low intensity. Installed between appliance and power supply line with short return lead which reduces radiation. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish.
List Price \$1.75 Net Price **\$1.05**

TYPE IF-18—An efficient all-wave capacitive-inductive sectional band type filter for use in connection with all types of electrical appliances where interference conditions are severe. Provided with frame connection for reduction of radiation. Furnished in Bakelite case (see colors). Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case, walnut finished.
List Price \$8.35 Net Price **\$5.01**

TYPE IF-19—Capacitive-inductive type filter for use where interference is severe. Frame connection provided. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish.
List Price \$7.00 Net Price **\$4.20**

TYPE IF-20—For use on small electrical appliances where interference is very low. Simply connected to cord plug of appliance and plugged into wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish.
List Price \$0.75 Net Price **\$0.45**

TYPE IF-21—All-wave capacitive-inductive type filter for use on appliances where return lead to the frame of appliance cannot be made, such as shaver, barber clippers, etc. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 1.6 amps. Colors—Bakelite case. Ivory or walnut finish.
List Price \$4.00 Net Price **\$2.40**

TYPE IF-22—For use in connection with electric shavers of all standard types. Line cord and plug provided with Schick and Packard type adapters which fit practically all type shavers. (Specify type desired when ordering.) Type IF-22A for Schick, Knapp Monarch, and similar type shavers. Type IF-22B for Packard, Zephyr, Remington-Rand and Ronson type shavers. Rating: 110 V.A.C. 5 amps. Colors—Bakelite case. Ivory or black finish.
List Price \$2.75 Net Price **\$1.65**

INDUSTRIAL QUIETONES

The development of radio receiving and broadcasting equipment has been perfected to a degree where complete enjoyment of programs is within the reach of all. However, only too frequently is radio reception marred by disturbing noises commonly referred to as "man-made static." This condition does not have to be endured. It is unnecessary to tolerate the majority of these offending noises. Quietone Filters enable you to enjoy quiet, noise-free reception.

Although atmospheric disturbances in many instances cause radio noises, this condition is not chronically annoying. With the average radio receiver, noise is generally caused by the operation of electrical appliances or apparatus which create high frequency oscillations. Many types of equipment cause minute sparks as a result of a change in electrical conditions within the device, which are essential to its operation. In effect these appliances act as miniature radio transmitters, setting up a disturbance which may affect radio receivers at a considerable distance.

It is highly desirable to correct noise conditions at the source as one filter properly installed at this point may eliminate the noise in a number of radio receivers. Where it is impossible to locate the equipment which is causing the interference a Quietone installed at the receiver will correct the noise in that receiver.

The Quietones listed below will correct radio noise conditions caused by motors, generators, elevators, stokers and many other types of industrial electrical apparatus. They are designed for convenient mounting, and contain highest quality capacitors, with lowest possible impedance internal connections. There are no current limitations for (CP) Capacitive Quietones.

Fluorescent Light Quietones

Among the Quietone Interference Filters especially suited to correct noise conditions caused at fluorescent lights, as well as other electrical appliances, are types IF-6, IF-24 and IF-54, the former being a very convenient plug-in arrangement that fits the receptacles of floor and table lamps.

Type IF-24 Quietone is a dual capacitive type filter for use on fluorescent light and other electrical equipment where noise conditions are not too severe. It is contained in a round metal casing $\frac{1}{8}$ " diameter by 2" long and provided with insulated wire leads 8" long.

Type IF-54 Quietone is a capacitive-inductive filter which provides extremely high attenuation over a wide range of frequencies. This unit is housed in a drawn metal container 2" x 2" x 1 $\frac{1}{8}$ " high, and is provided with insulated wire leads 6" long. It is rated at 2 amps. 110-220 V.A.C. or D.C.

Fluorescent Light Quietones

Type	Volts A.C.— D.C.	Connections	Housing	List Price	Net Price
IF-6	110	Plug-in	Metal	\$1.75	\$1.05
IF-24	110	Flex-Leads	Metal	1.10	.66
IF-54	110-220	Flex-Leads	Metal	2.25	1.35

Capacitive (CP) Quietones

Type	Volts A.C.— D.C.	Connections	Housing	List Price	Net Price
IF-25	110-220	Flex-Leads	Metal	\$4.50	\$2.70
IF-26	110-220	Flex-Leads	Metal	6.00	3.60
IF-11	110	BX	Cutout Box	12.00	7.20
IF-12	220	BX	Cutout Box	16.50	9.90
IF-14**	110-220	BX	Cutout Box	22.50	13.50

** All Quietones listed above with exception of IF-14 are for single phase circuits. IF-14 is for 2 or 3 phase circuits.

The Quietones listed below are for the more severe radio noise conditions caused by motors, generators, elevators, diathermy, oil burners, etc. They are designed for convenient mounting and quick connection to these machines. They consist of low-loss coils and highest quality capacitors which correct noise conditions in both broadcast and short wave receivers. They are the most efficient filters available for heavy duty application. All capacitive-inductive (CI) Quietones are for single phase circuits.

Capacitive-Inductive (CI) Quietones

Type	Volts A.C.— D.C.	Max. Amps.	Connections	Housing	List Price	Net Price

* For use on oil burners.

A. C. MOTOR STARTING CAPACITORS

TYPE JDS

TYPE ETB

TYPE ETBCB

A.C. MOTOR STARTING REPLACEMENT CAPACITORS

Types ETB and JDS Electrolytic Motor-Starting Capacitors are universal replacement units for use in standard makes of oil-burners, refrigerators and other motor driven equipment. The list of units below simplifies the selection of the capacitor required when the capacity, voltage rating, and size are known.

In many cases where a round can-type unit is to be replaced a smaller size capacitor of the same capacity and voltage rating may be selected as a replacement. The smaller size unit may be wrapped tightly with ordinary corrugated paper and fitted into the capacitor housing on the motor. While only the most widely used range of capacities are listed below, Type ETB 110 V.A.C. capacitors can be supplied in intermediate capacities from 10 mfd. to 480 mfd.

Write for complete A.C. Motor Starting Replacement Capacitors, Catalog No. 163.

TYPE JDS 110 VOLTS A.C. 50-60 CYCLES

Cat. No.	Cap. Mfd.	Dimensions—Ins. L. x W. x T.	List Price	Net Price
JDS70	70	3 1/2 x 3 1/2 x 2	\$3.20	\$1.92

JDS130	130	3 1/2 x 3 1/2 x 2	3.79	2.27

All units are furnished with tightly fitted insulating cardboard tube or paper box casings with screw terminals on Type ETB or with terminal board on Type JDS capacitors. Type ETB units are available with black lacquered steel end caps, designated as Type ETBC, or with both end caps and black lacquered steel mounting bracket designated as Type ETBCB (see illustration above). Units must be designated accordingly upon ordering. (See note below.)

ETB-450	432-480	2 1/2 x 4 1/4	7.59	4.55

NOTE—For units with metal end caps, Type ETBC, add 60c to list price. For units with metal end caps and mounting bracket, Type ETBCB, add \$1.00 to list price.

SENIOR AND JUNIOR "SERVICE MIKES"

These capacitors are designed for emergency replacements of A. C. motor starting electrolytic capacitors from 18.75 to 300 mfd. They enable the motor repair man to determine correct capacity required for a given motor and eliminate necessity of carrying stock of assorted sizes. Each capacitor provides a range of twelve separate capacities by means of changing external connections at four terminals, two at each end. Both units are for 110-120 V.A.C. 60 cycle duty.

JUNIOR "SERVICE MIKE", 18.75 to 150 mfd., size 1 1/8" dia. x 3 3/4" long. Complete with leads, clips and jumpers. Net Price \$4.65

SENIOR "SERVICE MIKE", 37.5 to 300 mfd., size 2 1/8" dia. x 4 3/4" long. Complete with leads, clips and jumpers. Net Price \$5.50

MALLORY DRY ELECTROLYTIC CAPACITORS

TC Dry Electrolytic • Single Tubular Capacitor
Aluminum Encased • External Insulating Sleeve

TCD • TCS Dry Electrolytic • Dual Tubular Capacitor • Aluminum Encased
• External Insulating Sleeve

APPLICATION—For under-chassis mounting in filter and audio bypass circuits where long life and small size is desirable.

DESCRIPTION—Single section dry electrolytic type encased in hermetically sealed aluminum tube with external insulating sleeve. For extreme dependability at high voltage, types TC82 and TC92 employ the special Mallory balanced series unit construction.

TERMINALS—One 3" bare solid tinned copper lead at each end. Positive lead marked (+) on insulating sleeve.

MOUNTING—Designed for mounting by its own leads or with applicable hardware listed on page 17.

PACKAGING—25, 50, or 100 capacitors per display carton.

APPLICATION—For under-chassis mounting in filter and audio bypass circuits where long life and small size is desirable.

DESCRIPTION—Dual section dry electrolytic type encased in hermetically sealed aluminum tube with external insulating sleeve. Type TCD is dual common negative, TCS dual separate section.

TERMINALS—Type TCD is supplied with 3" bare solid tinned copper leads, both positive leads at one end and common negative lead at opposite end. Type TCS is supplied with soldering lugs, positive and negative of one section at one end and the other section at the opposite end.

MOUNTING—Type TCD is designed for mounting by its own leads or with applicable hardware shown on page 19. Type TCS is supplied with the Mallory TH clips for mounting, further described on page 17.

PACKAGING—Individual display carton.

MALLORY DRY ELECTROLYTIC CAPACITORS

FP Fabricated Plate Dry Electrolytic Capacitor • Aluminum Encased

WP Dry Electrolytic Capacitor • Aluminum Encased

APPLICATION—For top chassis mounting in filter and audio bypass circuits. Extremely dependable under heavy ripple current, high surge voltage and high temperature up to 185 F. conditions.

DESCRIPTION—Single, dual, triple and quad section units encased in compact hermetically sealed aluminum cases with self-contained mounting feature. Type FP is supplied with famous Mallory Fabricated Plate (metallized cotton gauze) anodes, type WP with etched plate anodes. Special internal design provides low RF impedance and minimum coupling between sections. Case at negative potential.

TERMINALS—Solder lug type all at one end. Positive terminals identified by symbols in terminal board corresponding to case marking. Mounting ring provides negative terminal connection.

MOUNTING—Primarily designed for twist prong mounting through suitable chassis slots and may also be mounted as follows:

1. Type MP metal wafer providing the necessary slots without actually punching the chassis for grounded negative circuits.
2. Type BP bakelite wafer for insulated mounting, otherwise similar to Paragraph No. 1.
3. Type TH clip for horizontal mounting.
4. Type PS socket for plug-in mounting. (Remove blank ear with diagonal pliers to polarize unit in relation to socket.)

See page 17 for applicable hardware.

PACKAGING—Individual display carton.

MALLORY TECHNICAL MANUAL

Simply written, practical book that bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter. 392 pages of valuable information that you should have.

Surge Voltage Data

● Due to the many multiple section listings on FP capacitors, it is not practical to show surge voltage ratings without consuming considerable space in the chart. The surge voltage ratings are, therefore, given separately in the small chart.

Wkg. V.D.C.	Surge Volts
6	10
10	15
15	20
25	40
150	200
200	275
250	325
300	375
350	425
400-450	525

MALLORY DRY ELECTROLYTIC CAPACITORS

FP · WP Special Television Capacitors Dry Electrolytic • Aluminum Encased

APPLICATION—For use in television applications where special frequencies are encountered.

Type WP520 for bypassing in the audio and synchronizing amplifier stages, and the deflecting amplifier cathodes.

Type FP550 for filtering the low voltage power supply. The 10 mfd. 450-volt section is input, and the 80 mfd. 400-volt section is output.

Type WP505 for Video amplifier cathode bypass.

Type WP510 for horizontal centering control bypass.

Type WP540 for vertical centering control bypass.

DESCRIPTION—Similar to regular FP and WP units except in impedance value at the applicable frequency. Note that some are rated in "Impedance" rather than capacity since this is the important characteristic.

TERMINALS—Solder lug type all at one end. Positive terminals identified by symbols in terminal board corresponding to case marking. Mounting ring provides negative terminal connection.

MOUNTING—Primarily designed for twist prong mounting through suitable chassis slots and may also be mounted as follows:

1. Type MP metal wafer providing the necessary slots without actually punching the chassis for grounded negative circuits.
2. Type BP bakelite wafer for insulated mounting, otherwise similar to Paragraph No. 1.
3. Type TH clip for horizontal mounting.
4. Type PS socket for plug-in mounting. (Remove blank ear with diagonal pliers to polarize unit in relation to socket.)

See page 17 for applicable hardware.

PACKAGING—Individual display carton.

Mallory Cat. No.	Capacity or Impedance	Wkg. Volts	Max. Surge Voltage	Size

WP510	.5Z @ 15750 cycles	3 NP	4	1 x 2
WP540	1.0Z @ 60 cycles	3 NP	4	1 3/8 x 3

RS · RM · HD · HS · SR

Dry Electrolytic • Threaded Neck Capacitors • Aluminum Encased

APPLICATION—Designed for replacement of wet or dry electrolytic threaded neck type filter capacitors originally employed in any type of electronic filter for bypass circuit.

DESCRIPTION—Type RS are single section, RM multiple separate section capacitors encased in aluminum cans equipped with threaded necks for mounting. Both types are internally insulated from their aluminum can. Type HD is for heavy duty, type HS for high surge voltage conditions. Type SR638 is lug type dual. Type SR645 has special internal connections, one terminal common anode, one terminal negative to one section and case negative to the other section.

TERMINALS—RS, RM and HS have 8" flexible insulated stranded copper leads all out through the threaded neck part of the case. Type HD has one solder lug terminal for positive and case is negative. Type SR has two positive lug terminals with case common negative.

MOUNTING—Types RS, RM, HD and HS have threaded necks (5/8 x 16 for 1" dia.—3/4 x 16 for 1 3/8" dia.) supplied with polnut and special washer providing installation in various chassis hole sizes. All 1" diameter units in these types are also supplied with a special turned-over washer for 1 3/8" clamp mounting. Type SR has 7/8-16 thread molded necks with solid nut. See page 17 for other hardware.

PACKAGING—Individual display carton.

MALLORY DRY ELECTROLYTIC CAPACITORS

2N · 2S · 3N · 3S · 4S · ST · TN · UR Dry Electrolytic • Cardboard Tubular Capacitors

APPLICATION—Low cost filter and bypass units for above or below-chassis mounting where humidity conditions are not extreme.

DESCRIPTION—Single, dual, triple and quad section units in cardboard tubes with extra inner seal and ample wax seal at ends. Dual, triple and quad section units are common negative or separate section type, as indicated in chart.

TERMINALS—All types (except TN111, which has bare leads) are supplied with 8" flexible covered leads out one end except those marked (*) which have negative lead out opposite end.

MOUNTING—All units (except TN111) are supplied with an adjustable horizontal mounting strap (MS-1) and all units with leads out one end have special feet for vertical mounting in addition to the strap. For other hardware, see page 17.

PACKAGING—Individual display carton.

MSF · MSG Dry Electrolytic Rectangular Case • Motor Starting Capacitor

APPLICATION—For replacement of rectangular case type motor starting capacitors.

DESCRIPTION—Dry electrolytic intermittent duty AC capacitors housed in rectangular cases and provided with terminal arrangement similar to the design of the original capacitors they replace.

TERMINALS—Equipped with two capacitor terminals and two dummy terminals. The L and unmarked terminal are the capacitors, while T and TL are dummies for convenience in wiring.

MOUNTING—Designed to mount in the original clamps or boxes used for the original capacitors.

PACKAGING—Individual display carton.

MALLORY DRY ELECTROLYTIC CAPACITORS

HC · NP Dry Electrolytic • High Capacity— Low Voltage • Non-Polarized Capacitors • Plastic Insulating Case

APPLICATION—Type HC are for filtering dry disc rectifiers and for electric fence controls, talking picture equipment, and other high-capacity low-voltage applications. Type HC1060A is especially designed for replacement in fence control equipment.

Type NP are non-polarized units for use where polarity may be applied in either direction, but are not suitable for continuous AC applications. Useful in welding and control equipment as a stored energy device.

DESCRIPTION—High quality etched plate electrolytic capacitors supplied in moisture-proof plastic cases requiring no external insulation. Type HC are polarized, and NP are non-polarized type.

TERMINALS—Two solder lug terminals at one end.

MOUNTING—Supplied with type VR bracket for vertical mounting, and design permits horizontal mounting with protector end cap (sold separately). See page 17 for hardware details.

PACKAGING—Individual display carton.

*This unit in Aluminum Case

BS Dry Electrolytic • Bath Tub Capacitor • Steel Case

APPLICATION—For filter and bypass circuits in marine, aircraft, geophysical and other applications where extreme operating conditions are encountered. BS81 and BS91 are ideal for power amplifier and other high voltage applications.

DESCRIPTION—Dry electrolytic capacitors where cartridges are first sealed in aluminum tubes and then encased in sturdy corrosion-resistant, hot-tinned steel cases providing complete hermetical seal under all weather conditions. All units internally insulated from outer case. BS81 and BS91 employ the special Mallory balanced series unit construction for extreme dependability at high voltage. Temperature range, -40 F. to +185 F.

TERMINALS—Two solder lug terminals on one side

MOUNTING—Provided with mounting flanges at each end having 3/16" holes.

PACKAGING—Individual display carton.

MALLORY VIBRATOR GUIDE

Long recognized as one of the most useful publications in the radio service field. Up-to-date, completely organized for quick, accurate reference. Contains all available information through 1947 automobile and battery-operated home radio receivers as well as vibrator power supplies. See your Mallory Distributor.

MALLORY DRY ELECTROLYTIC CAPACITORS

P-MSU Dry Electrolytic • Motor Starting Capacitor • Non-Polarized • Round Plastic Case

APPLICATION—For intermittent duty in starting AC capacitor motors in any application where round type cases are required.

DESCRIPTION—Dry electrolytic non-polarized type capacitors housed in round cases. Rated at the minimum capacity value with a plus tolerance of 20% unless otherwise indicated by reference to old minimum-maximum capacity rating. Type P furnished in moisture-proof plastic containers, and type MSU in aluminum cases with external insulating sleeve.

TERMINALS—Two solder lug terminals at one end.

MOUNTING—Both type P and MSU may be mounted interchangeably in any original mounting for units of equivalent size. Type P may also be mounted by means of a plastic end cap (type PL) and sturdy metal snap-in type bracket (type HB) furnished separately when desired. See page 17 for these and other mounting hardware.

PACKAGING—Individual display carton.

MSS-100

Dry Electrolytic • Adjustable Capacitor

For Selection of Proper Motor Starting Capacity

APPLICATION—For determining correct capacity to use in making replacement of defective motor starting capacitors which have lost their identity.

DESCRIPTION—A special adjustable capacitor provided with flexible leads and clips for connections while checking for proper capacity. Capacity range from 26 to 161 mfd.

TERMINALS—Two flexible insulated leads provided with spring clips.

MOUNTING—Not intended for permanent installation.

PACKAGING—Individual display carton.

OT Oil Filled • Metal Tubular Capacitor

APPLICATION—For vibrator buffer, coupling, and other circuits where highest quality tubular type capacitors are required.

DESCRIPTION—Mineral oil impregnated hermetically sealed aluminum tubulars with external insulating sleeves.

TERMINALS—Two bare tinned copper leads, one at each end.

MOUNTING—Designed for mounting by its own leads, may also be mounted by use of the TH clip furnished with each capacitor. See page 17 for description of the TH clip and other hardware.

PACKAGING—10 capacitors per display carton.

9	$\frac{5}{8} \times 1\frac{9}{16}$	18	$1\frac{1}{4} \times 2\frac{1}{2}$

TP · OW Cardboard Tubular Capacitors

APPLICATION—For use in radio and electronic circuits, especially RF bypassing, where low cost and small size are paramount. Well protected from moisture but not hermetically sealed.

DESCRIPTION—Both TP and OW are compact paper tubular construction. Type TP is wax impregnated and filled. Type OW is oil impregnated and wax filled.

TERMINALS—Two bare tinned copper leads, one at each end.

MOUNTING—By means of their lead wires or TH clips of applicable size. See page 17 for mounting hardware.

PACKAGING—Type TP—25, 50 or 100 capacitors per display carton. Type OW—5 or 10 capacitors per display carton.

(For Type OW)

MALLORY RADIO SERVICE ENCYCLOPEDIA

● The most complete Mallory Radio Service Encyclopedia of all—listing radio sets never before included—bringing your service information up to date on every pre-war and post-war model.

Complete tube complements. I. F. Peaks. Original part numbers and recommended replacements that are readily available. Circuit references. In short, everything you need to know to do a thorough service job—quickly and profitably.

MALLORY METAL TUBULAR, SUPPRESSION & OIL FILLED CAPACITORS

MT Miniature Metal Tubular Capacitors

APPLICATION—For hearing aid, personal radio, and other uses where very small size tubulars are desirable.

DESCRIPTION—Oil impregnated tubular capacitor in minute hermetically sealed metal tubes with insulating sleeve.

TERMINALS—Two bare tinned copper leads, one at each end.

MOUNTING—By means of its own leads.

PACKAGING—Individual display carton.

AG · AS Automobile Generator Noise Suppression Capacitor

APPLICATION—For suppressing radio interference emanating from auto generators, oil gauges, ammeters, etc., or for general contact spark reduction.

DESCRIPTION—Type AG is round type with flexible lead, well protected from moisture but not hermetically sealed. Type AS is hermetically sealed, provides lower impedance, and is ideal for extreme climatic conditions.

TERMINALS—AG has one flexible covered lead with spade lug, the case being grounded to other side of section. AS has one screw type terminal, other side grounded to case.

MOUNTING—By means of self-contained tangential flange.

PACKAGING—Individual display cartons.

CB Oil Filled • Steel Cased Bypass Capacitors

APPLICATION—For general use in aircraft, marine, geophysical and industrial electronic equipment where extreme dependability under severe conditions is desired.

DESCRIPTION—Oil impregnated single, dual, and triple section units housed in rugged, hermetically sealed, hot-tinned steel cases.

TERMINALS—Single section has two terminals. Dual section units have three terminals with center terminal common, and both are internally insulated from case. Triple units have three terminals with common grounded to case. All terminals protrude in a row on one long side of case.

MOUNTING—By means of flanges at each end.

PACKAGING—Individual display carton.

MALLORY SUPPRESSION, WAX, & BUFFER CAPACITORS

Types: (Top Row) FM441; FM442; RF481-RF482; RF480. (Bottom Row) CA275X; AM454; DL445.

AM · FM · DL · RF · CA

Automotive Noise Suppression Capacitors

APPLICATION—For radio interference suppression from auto or marine motors and other similar equipment.

AM—For ammeter and gauge suppression.

FM—For Ford generator suppression.

DL—For domelight suppression.

RF—for vibrator hash suppression.

CA—For general suppression in aircraft and marine application.

DESCRIPTION—Wax impregnated cartridges assembled in various style housings, as pictured.

TERMINALS—Various, as pictured.

MOUNTING—AM454 and RF481 are held in place by the connecting wires or with TH clips. Others have own self-contained mounting features. See page 17 for mounting hardware if desired.

PACKAGING—Individual display cartons.

Mallory Cat. No.	Cap. Mfd.	Working Volts DC	Size	
			D	L

RF482	1.0	50	1 5/16 x 1 3/8	
CA275X	4.0	50	2 x 2 x 1	

UB

Uncased Wax Capacitors

APPLICATION—Designed for replacement of defective sections in large paper capacitor blocks or other applications where sealing pitch is applied for final seal.

DESCRIPTION—Wax impregnated section wrapped in varnish paper for moisture protection until finally potted when installed.

TERMINALS—Two flexible insulated leads out one end.

MOUNTING—Held in place by pouring with hot pitch.

PACKAGING—Individual display carton.

Fig. 3

VB · VD · VO

Vibrator Buffer Capacitor

APPLICATION—Intended for replacement of original vibrator buffer and hash suppressor capacitors of similar design.

DESCRIPTION—Type VB is oil impregnated and housed in small rectangular metal case. Section is insulated from case. Type VD is dual wax impregnated unit in small rectangular waxed cardboard case. Type VO is wax impregnated and filled in oval waxed tube.

TERMINALS—VB has two bare tinned copper leads out one end. VD has two bare tinned copper leads out one end and one similar common lead out the other end. VO has heavy copper braid at each end.

MOUNTING—In recess or clamp used in the original equipment.

PACKAGING—Individual display carton.

MALLORY TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems.

Contains 408 pages of information profusely illustrated. It's worth far more than its price.

Mallory Page 11 (See Mallory Page 2 for List Prices)

MALLORY CHOKE COILS AND FILTERS

RF Radio Frequency Choke Coils

APPLICATION—General purpose radio frequency choke coils for all circuits.

DESCRIPTION—Hour-glass wound for low distributed capacity and housed in compact insulating tubes.

TERMINALS—Two bare tinned copper wire leads, one at each end.

MOUNTING—By means of its leads or with TH clips, as described on page covering hardware.

PACKAGING—Individual display carton.

Mallory Cat. No.	Turns	Wire	Size
RF581	90	16	1 x 1½
RF582	55	16	1 x 1¾
RF583	55	12	1¾ x 1¾

General Noise Elimination Information

● All radio noise suppression devices should be applied at the source of the noise. Filters inserted in radio receiver cords are usually ineffective.

The filters described herein are, therefore, designed for insertion at the offending device. They incorporate many improvements accomplished through the extensive research and war production experience of the P. R. Mallory Company. While there will be some exceptions, most of the types of interference found in the home can be effectively reduced by the Mallory filters described. Unusual cases should be referred to the Mallory Engineering Department for advice.

Each filter is supplied with a complete instruction sheet for proper installation.

W Motor Brush Filters

APPLICATION—Type W filters, while primarily designed for installation on motor brushes, may be used wherever a permanently installed dual capacity filter is desired. Where un-grounded motor frames or appliance cases are involved, type WSP is recommended for elimination of possible shock hazard.

DESCRIPTION—Dual wax impregnated capacitors housed in sealed metal tubes and specially designed to have low RF impedance. Case is grounded to common terminal of the included sections except in SP type where a shock limiting capacitor is employed between the common lead and case.

TERMINALS—Two flexible covered leads, case common ground.

MOUNTING—By means of attached tangential strap.

PACKAGING—Individual display cartons.

Type W7—115-220 Volts AC-DC for Light Interference

Type W9—115-220 Volts AC-DC for Medium Interference

Type W11—115-220 Volts AC-DC for Severe Interference

Type W7SP—115-220 Volts AC-DC for Light Interference

Type W9SP—115-220 Volts AC-DC for Medium Interference

X Appliance Filters

APPLICATION—For use with plug-in type appliances where straight capacity type filters are sufficient to produce desired noise suppression.

DESCRIPTION—Single and dual type capacitor filters in round metal housings designed for insertion between appliance cord and wall outlet. X-6 is furnished in attractive compact brown plastic case.

TERMINALS—Male prongs for insertion into wall outlet and slots for appliance plug.

MOUNTING—Self-supporting by its prongs.

PACKAGING—Individual display carton.

Type X1 is for relatively slight interference. Size 1¾" x 1¾", rated 110 volts, 5 amperes.

Type X3 is a capacitor type filter having greater efficiency than Type X1. Size 1¾" x 2¼", rated 110-220 volts, 5 amperes.

Type X5 is a triple capacity filter with provision for return lead to appliance. Special safety feature prevents possibility of shock and makes this unit ideal for use with vacuum cleaners, food mixers, etc. Size 1¾" x 2½", rated 110-220 volts, 5 amperes, and equipped with binding post for connection to appliance or motor frame.

Type X6 for medium interference. Furnished in an attractive, compact, rectangular brown plastic case. Size 1¼" x 2¼" x 1". Rated at 110 volts AC-DC, 5 amperes.

Mallory Page 12 (See Mallory Page 2 for List Prices)

MALLORY FILTERS

Z Appliance Filters

APPLICATION—For use with plug-in type appliances where inductance-capacity continuation filters are necessary to accomplish desired noise suppression.

DESCRIPTION—Single and dual inductance-capacity filters housed in round metal containers designed for insertion between appliance cord and wall outlet.

TERMINALS—Male prongs and female receptacles. Types Z4, 6 and 8 have extra provision for return lead to ground or appliance frame.

MOUNTING—Self-supported by its prongs.

PACKAGING—Individual display carton.

Type Z2 is a capacitor-inductance filter for medium interference. Use with electric razor or small appliances. Most effective on grounded line systems where reversal of plugs will affect operation. Size 1 $\frac{3}{8}$ " x 2 $\frac{3}{4}$ ", rated 110-220 volts, 3 amperes.

Type Z4 is a dual inductance-capacity filter for severe interference on appliances where a return lead from the filter is inconvenient. Ideal for electric razor, vibrators and household appliances. Size 1 $\frac{3}{8}$ " x 3", rated 110-220 volts, 3 amperes.

Type Z6 is a dual inductance-capacity filter with provision for return lead to ground. Recommended for suppressing severe interference. Size 1 $\frac{1}{2}$ " x 3 $\frac{3}{8}$ ". Rated 110-220 volts, 3 amperes.

Type Z8 is same as Z6 but with provision for return wire connection to motor or appliance frame rather than ground. An efficient filter equivalent to box type within 3 ampere rating.

LC5 · LC10

Heavy-Duty Appliance Filters

APPLICATION—For portable plug-in applications where severe interference is involved and ampere rating exceeds that of type Z.

DESCRIPTION—Combination inductance-capacity filter housed in rectangular metal case.

TERMINALS—Ample line cord with male plug for insertion in wall outlet. Female receptacle for appliance cord plug. Binding post for return wire lead to appliance or motor frame.

MOUNTING—Two metal flanges (when permanent mounting is desired).

PACKAGING—Individual carton.

Type LC5 rated 115-220 volts AC-DC, 5 amperes.

Type LC10 rated 115-220 volts AC-DC, 10 amperes.

Z8A Fluorescent Lighting Filters

APPLICATION—Specially designed for fluorescent lights where permanent installation on or in the light fixture is desired.

DESCRIPTION—Dual inductance-capacity filter housed in round metal tubes. Contains shock limiting capacitor.

TERMINALS—Flexible covered wire leads, two at one end for input—three at other end for output of which the red lead is for grounding to light frame.

MOUNTING—By means of attached tangential strap.

PACKAGING—Individual display carton.

Type Z8A, 115-220 volts, AC-DC, 3 amperes. For fluorescent lights

LB Heavy-Duty Appliance Filters

APPLICATION—For permanent installation wherever heavy-duty filters are required, such as outdoor signs, large motors, or at house meter board.

DESCRIPTION—Heavy-duty choke-capacity combination filters sealed in rectangular case and housed in standard heavy gauge metal cut-out boxes.

TERMINALS—Heavy, flexible insulated wire leads for splicing with house or motor wiring.

MOUNTING—Mounts by means of screws through bottom of cut-out box.

PACKAGING—Individual carton.

Type	Rating	Size
LB-10	220V-10 Amp.	6" x 6" x 4"
LB-20	220V-20 Amp.	10" x 10" x 6"
LB-40	220V-40 Amp.	12" x 10" x 6"

Mallory Page 13 (See Mallory Page 2 for List Prices)

MALLORY MICA CAPACITORS

MC Mica Receiver Capacitors

APPLICATION—Designed primarily for radio receiving applications, they may be used in television and other electronic circuits within their voltage range.

DESCRIPTION—Made with carefully selected mica and foil and housed in high quality compact rectangular bakelite case with standard RMA color coding for identification.

TERMINALS—Bare tinned copper leads.

MOUNTING—By means of its leads.

PACKAGING—10 capacitors per display carton.

Case Size— $\frac{7}{16}$ " x $\frac{25}{32}$ " x $\frac{7}{32}$ " with $\frac{1}{8}$ " Wire Leads

New RMA Color Code

● The new RMA color code, shown below, permits positive identification of the mica capacitors listed.

Reading across the top from left to right with the arrow pointing to the right, the first dot shall always be white to indicate standard RMA molded mica capacitor. The second and third dots become the first two significant figures in the capacitance. The second row is read from right to left. The lower right dot should be the multiplier. The lower second dot indicates the tolerance and the lower left dot indicates the class.

The key to color significance is as follows:

Example shown above = 1300 mmfd. ±2%, 500 V.W.

Note: When any Mallory mica capacitor has a white dot in the upper left hand corner (when the arrows point to the right) that capacitor is coded under the new RMA color code, as shown above. Any other color in the upper left hand corner indicates the old color code, which may be found in Catalogue No. 467-A.

Color	Sig. Fig.	Mult.	Tol.	Class.*
Black	0	1	±20%	A
Brown	1	10		B
Red	2	100	±2%	C
Orange	3	1000	±3%	D
Yellow	4	10000		
Green	5		±5%	
Blue	6			
Violet	7			
Gray	8			I
White	9			J
Gold		0.1		
Silver		0.01	±10%	

*Denotes various electrical characteristics.

Voltage ratings vary with capacitance as shown in RMA Specification—April, 1946.

MALLORY MICA CAPACITORS

MH Mica Transmitting Capacitors

APPLICATION—For use in transmitting and power amplifier circuits where voltage exceeds the 500-volt rating of type MC.

DESCRIPTION—Made with accurately gauged high-quality India mica in bakelite molded case providing insulated mounting. Capacity tolerance $\pm 20\%$. Only size variation for various ratings is the thickness as shown in the chart.

TERMINALS—Short, heavy tinned copper solder lugs for minimum RF and contact resistance.

MOUNTING—Insulated mounting by means of screws through holes molded in case.

PACKAGING—Individual display carton.

MX Mica Transmitting Capacitors

APPLICATION—Ideal for amateur transmitting equipment. They may also be used in coupling, tank, and bypass circuits at radio frequencies within their rating. (Note that the maximum amperes for several radio frequencies are given in the chart. The operating current should be kept within these limits.)

DESCRIPTION—Heavy-duty mica construction, supplied in attractive rectangular porcelain cases.

TERMINALS—Two screw type with complete washer and nut assembly.

MOUNTING—Two flanges with ample holes for machine screw mounting.

PACKAGING—Individual display carton.

MALLORY OIL FILLED AND IMPREGNATED CAPACITORS

TX Oil Filled • Rectangular Can Capacitors

APPLICATION—For radio, television, transmitting, and all circuits requiring high voltage capacitors.

DESCRIPTION—Compact rectangular oil filled capacitors of sturdy construction.

TERMINALS—Suitable standoff insulated terminals at one end to safely cover maximum voltage rating of each unit.

MOUNTING—Base dimensions less than 3 1/2 x 5 1/8, by rectangular clamp providing either upright or inverted position. Base sizes of 3 1/2 x 5 1/8 and above, by permanent flanges at the unit base.

PACKAGING—Individual carton.

TZ Oil Impregnated • Round Can Capacitors

APPLICATION—For filter and bypass circuits in power amplifiers, television and transmitting equipment where compact round can units are desired.

DESCRIPTION—Oil impregnated type capacitor furnished in round containers for upright or inverted mounting. All units internally insulated from case.

TERMINALS—The 1 3/8" diameter units have two solder lug terminals with ample insulation for the voltage ratings involved. The 2" diameter units have special standoff insulated terminals.

MOUNTING—Supplied with type VR bracket for inverted or upright mounting.

PACKAGING—Individual carton.

MALLORY TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems. Contains page after page of information profusely illustrated. It's worth far more than its price.

MALLORY CAPACITOR HARDWARE

Mallory Cat. No.	Type "MSU" Hardware Description	Size
115-1	Top Cap.	1 ³ / ₈
116-1	Top Cap.	2
118-1	Bottom Cap.	1 ³ / ₈
119-1	Bottom Cap.	2
121-1	Bracket	1 ³ / ₈ x 3 ¹ / ₄
122-1	Bracket	1 ³ / ₈ x 4 ¹ / ₄
123-1	Bracket	2 x 3 ¹ / ₈
124-1	Bracket	2 x 4 ¹ / ₈

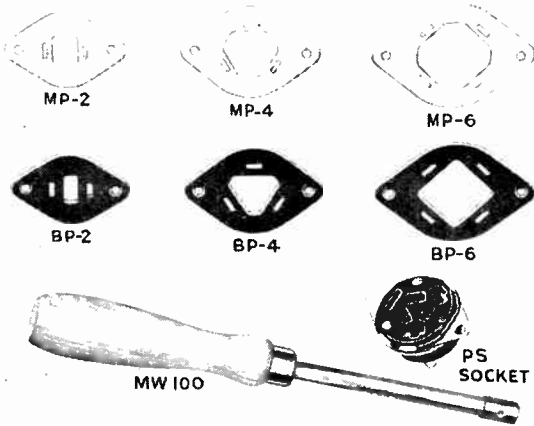

Type "P" Hardware

Type PL—Plastic end cap to protect terminals on HC or NP units when desired.

Type HB—Horizontal bracket for mounting HC and NP units complete with end cap type PL.

Cat. No.	Description	Size
PL-3	Plastic end cap	1 ⁷ / ₁₆
PL-6	Plastic end cap	1 ¹³ / ₁₆
PL-8	Plastic end cap	2 ¹ / ₁₆
HB-4	Horizontal bracket plastic cases	3 ³ / ₈
HB-8	Horizontal bracket plastic cases	4 ³ / ₈

Type MP—Metal plates for grounded mounting of FP and WP capacitors.

Type BP—Bakelite plates for insulated mounting of FP and WP capacitors.

Type PS—Molded plastic sockets for plug-in mounting FP or WP capacitors. (Blank ear on capacitor should be removed to permit polarization with respect to socket.)

Type MW-100 Special wrench for twisting mounting ears on FP or WP capacitors.

Type TH Special clips for horizontal mounting of any tubular or FP unit within the diameter range shown. Designed primarily to mount without tools under special chassis lances in original equipment, they may also be attached to chassis with 5-32 screw and nut in any 1/8" hole.

Type VR—Brackets for vertical mounting round units.

Type 104-1—Special bracket with spade bolt for mounting RS and RM units where spade bolt mounting was used.

Cat. No.	Description	Size
TH-13	Spring clip for TC	3/8
TH-15	Spring clip for TC	1/2 to 9/16
TH-17	Spring clip for TC	5/8 to 11/16
TH-19	Spring clip for TC and FP	3/4 to 13/16
TH-21	Spring clip for TC	7/8 to 15/16
TH-23	Spring clip for TC and FP	1 to 1 1/16
TH-25	Spring clip for TC and FP	1 3/8 to 1 7/16
VR-1	Clamps for vertical mounting	1 to 1 1/16
VR-3	Clamps for vertical mounting	1 3/8 to 1 7/16
VR-4	Clamps for vertical mounting	1 1/2 to 1 9/16
VR-6	Clamps for vertical mounting	1 3/4 to 1 13/16
VR-8	Clamps for vertical mounting	2 to 2 1/16
VR-10	Clamp for vertical mounting	2 1/2
104-1	Spade bolt mounting for neck type cans	Variable

Cat. No.	Description	Size
MP-2	Metal mounting wafer for FP	3/4
MP-4	Metal mounting wafer for FP	1
MP-6	Metal mounting wafer for FP	1 3/8
BP-2	Bakelite mounting wafers for FP	3/4
BP-4	Bakelite mounting wafers for FP	1
BP-6	Bakelite mounting wafers for FP	1 3/8
PS-4	Plug-in socket for FP	1
PS-6	Plug-in socket for FP	1 3/8
MW-100	Mounting wrench for FP	Var.

Type MS-1—Adjustable metal strap for horizontal mounting tubular types up to 1 3/8" diameter.

Type A-016—Terminal connector or anchor strap for general use where required.

Type O15-1—Washer for RS type "a" neck when used in over-size chassis hole.

Type O15-2—Washer for use with RS, RM or HS units where chassis hole is too large for regular mounting. Use two washers, one above and one below chassis.

Type A-017—Special washer with turned-over edge for ring clamp mounting 1" RS type in 1 3/8" ring clamp.

Cat. No.	Description	Size
O15-1	Washer for 5/8" neck in 7/8" hole	Var.
O15-2	Washer for 3/4" neck in 1" hole	Var.
MS-1	Adjustable mounting strip	Var.
A-016	Terminal connector	Var.
A-017	Washer for clamp mounting neck cans	Var.

OE and CE Insulating Sleeve

Cat. No.	Description	Size
OE-1	Open end FP insulating sleeves	3/4 x 2
OE-3	Open end FP insulating sleeves	1 x 2
OE-4	Open end FP insulating sleeves	1 x 3
OE-5	Open end FP insulating sleeves	1 3/8 x 2
OE-6	Open end FP insulating sleeves	1 3/8 x 3
CE-1	Closed end FP insulating sleeve	3/4 x 2
CE-3	Closed end FP insulating sleeve	1 x 2
CE-4	Closed end FP insulating sleeve	1 x 3
CE-5	Closed end FP insulating sleeve	1 3/8 x 2
CE-6	Closed end FP insulating sleeve	1 3/8 x 3

SANGAMO CAPACITORS

TYPE 30 PLASTIC MOLDED PAPER TUBULAR CAPACITORS

"Molded Like Micacs"

Here is an entirely new concept in paper tubular construction: capacitors which are molded in plastic—just like micacs! The immediate results are obvious: more stable capacity values, excellent seal characteristics, and application at higher ambient temperatures. In the long run, too, the result is obvious: a new standard of permanence. Halowax impregnation, identified by tan coloring of the molded plastic, is suitable for operation in ambient temperature ranges from -55°C . to $+55^{\circ}\text{C}$. Diacolor impregnated capacitors, identified by a red plastic case, are recom-

mended for operation at higher voltages or temperatures. A chlorinated dielectric, diacolor possesses a high dielectric constant, dielectric strength, volume resistivity and low power factor. The great chemical stability of diacolor permits prolonged operation at elevated temperatures with little change in capacity, breakdown characteristics or other properties. For 1000 or 1600 volt applications or for temperatures as high as 85°C ., diacolor is definitely superior to wax as a capacitor impregnant.

SANGAMO CAPACITORS

TYPES 20 AND 21 METAL CASED MINERAL OIL PAPER CAPACITORS

TYPES 20 AND 21

Designed for by-pass and coupling applications, types 20 and 21 are non-inductively wound paper capacitors impregnated in mineral oil of greatest stability and housed in metal tubes. Type 21, having terminals insulated from the case, is covered with a cardboard sleeve. Type 20, having one terminal grounded to the case, is similarly covered unless specified without sleeve, in which case for all ratings the diameter and length are reduced by 1/16 and 3/16 inches respectively. The Type 20 is the same price as the Type 21.

TYPES 50 AND 59 BYPASS PAPER CAPACITORS

TYPES 50 AND 59

Types 50 and 59 paper capacitors are non-inductively wound paper dielectric sections sealed in seamless containers. Primarily intended for by-pass applications, their characteristics are excellent for R.F. and A.F. bypass, audio frequency coupling and A.C. circuits. The Type 50 capacitors are vacuum impregnated and filled with the finest mineral oil available for use; the Type 59 capacitors are vacuum impregnated and filled with diaclor; a chlorinated dielectric providing maximum capacity and voltage in minimum space.

Standard tolerance +20% -10%. Types 50 and 59 standard capacitors supplied with side terminals or to customer spec. When ordering non-standard terminals specify design, R—Bivet, S—Screw, F—Glass; specify position, T—Top, B—Bottom, E—End.

Inquiries should be directed to the factory for capacities and voltages other than those listed above.

Prices subject to change without notice.

SANGAMO CAPACITORS

TYPE 71 DIACLOR IMPREGNATED TRANSMITTING CAPACITORS

Sangamo Diacolor impregnated capacitors have the advantage of longer life, lighter weight, and smaller size. Diacolor is a specially compounded, chemically purified chlorinated liquid dielectric. This synthetic impregnant, whose characteristics can be controlled with great uniformity, assures a high dielectric constant, high volume resistivity, low power factor, high dielectric strength, and is non-inflammable and non-explosive.

Type 71 Diacolor impregnated capacitors are supplied with Type A universal bracket, Type B footed bracket, or Type C spade lug bracket. Mounting dimensions of these brackets are given from center to center, in inches, in column "F" below. Terminals: composition rivet or screw; pyrex glass; or, stand-off porcelain. Prices include choice of brackets and terminals.

SANGAMO CAPACITORS

TYPE 75 DIACLOR IMPREGNATED A.C. CAPACITOR

TYPE 75

Type 75 Sangamo Diacolor Impregnated Capacitors are designed for continuous A.C. duty in ambient temperatures up to 75 degrees centigrade. These capacitors are recommended for use with capacitor motors—as power factor correction capacitors—and other similar A.C. applications. They are supplied with either the composition rivet or screw terminal, with pyrex glass terminals, or with stand-off porcelain terminal. Type mounting bracket desired should be specified when ordering.

TYPE 80 DIACLOR IMPREGNATED A.C. CAPACITOR

TYPE 80

Sangamo Type 80 Diacolor Impregnated capacitors are especially recommended for fluorescent use but can be employed for numerous A.C. applications. These units are designed to operate continuously at 75 degrees centigrade.

TYPE F1

TYPES F1 AND F2 MICA CAPACITORS

Types F1 and F2 capacitors, the smallest of the Sangamo line of transmitting types, possess a range of voltage and current ratings suitable for many applications. They are housed in low loss molded bakelite cases. The mica and foil sections are permanently clamped, vacuum impregnated, and installed in the case in such a manner as to provide stable characteristics and adequate moisture proofing.

SPRAGUE CAPACITORS

SPRAGUE ATOMS THE UNIVERSAL MIDGET DRY ELECTROLYTICS

Sprague Atom Capacitors—"Mightiest Midgets of All"—are the answer to 90% or more of all radio service requirements for replacement dry electrolytic units. A small stock of different capacities and voltages equips you for quick, dependable service on practically every job.

Sprague atoms will fit anywhere. The smaller units can be mounted by means of their sturdy, tinned-copper leads. Metal mounting straps are provided with all dual units and are available for the larger single units. (See Hardware page P-61.) Or if desired, you can mount them by any other suitable means. Despite their extremely small size, Atoms will last longer and stand far more punishment than much larger, old-style dry electrolytics.

Atoms are guaranteed to have low leakage, to withstand high surge voltages, and to have exceptionally long shelf life. They are fully sealed against moisture and blow-ups by an exclusive Sprague process.

SPRAGUE LM UNIVERSAL MOUNTING REPLACEMENTS

Sprague Type LM are the handiest, most convenient dry electrolytics yet developed for vertical chassis mounting. Mount them in any position to replace inverted can or spade-leg capacitors, or any other type. Their special mounting arrangements are designed to replace screw type can mounting and will fit any chassis hole from 3/8" to 7/8" diameter. All Type LM units have separate positive and separate negative leads, which can be connected together to get common positive or negative sections. They are particularly recommended to replace old common positive capacitors since they eliminate the possibility of section to section electrolysis, which causes common positive sections to fail. Units are of famous Sprague etched foil construction completely sealed and moisture-proofed.

SPRAGUE CAPACITORS

SPRAGUE 68P MIDGET TUBULARS WHERE SPACE IS AT A PREMIUM

Sprague 68P type capacitors are the ultimate in extra small paper tubular capacitors. These midget capacitors are especially designed for miniature radio applications where space saving is a prime

factor. These units are of fundamentally new engineering design and construction. The outstanding humidity performance which these capacitors exhibit is a result of this new construction.

SPRAGUE UHC HIGH-CAPACITY, LOW-VOLTAGE TUBULARS

These miniature high-capacity, low-voltage tubular dry electrolytics are specifically constructed for use as cathode by-pass capacitors and as smoothing filters for low-voltage, high-current power supplies. Whereas ordinary high-capacity, dry electrolytics have high leakage current and relatively high power factor, Type UHC provides exceptionally low leakage current and low power factor. In by-pass applications, this means unusually high filtering action,

without the introduction of shunt resistance across low-resistance bias units, and it is particularly important in controlled feedback amplifiers.

Catalog No.	Mfd.	Voltage		Dimensions		List Price

SPRAGUE CAPACITORS

SPRAGUE EL SELF-MOUNTING MIDGET CAN TYPE

The popularity of EL units is proved by their wide-spread use by leading manufacturers. They are easy to mount, and no other dry type gives so much dependability in such compact size. EL Capacitors are of highest quality etched-foil construction, hermetically sealed in aluminum cans and have twist-prong tabs for washer or direct to chassis mounting. Tabs have holes and are tinned for easy soldering. Each unit is supplied to you with Bakelite and metal washers, making them ideal for above-chassis mounting. The mounting tab ring, formed by the end of the metal container and serving as the negative terminal, is electrically welded to the capacitor cathode. Multi-Section EL Capacitors are concentrically wound and have common cathode construction.

SPRAGUE CAPACITORS

SPRAGUE PLS "TINY MIKE" 450V

Type PLS Capacitors can be used with complete dependability on applications where much larger, old-style can-type dry electrolytics were previously necessary. Their exceptional quality and dependability in minimum size are made possible by the exclusive Sprague etched foil process which permits high capacity with very small leakage currents and low power factor. Aluminum cans have threaded bushing and locknut at one end for mounting. Cans are completely insulated from the capacitor sections.

Special ring clamps are available for upright mounting. (See Hardware, page P-61.)

SPRAGUE LS ALUMINUM CAN TYPES, 450V

Popular units for replacing older can type capacitors. May be mounted in any position. Standard mounting through chassis by threaded bushing on can. Packed with mounting hardware and insulating washers for use where can must be insulated from chassis. Special ring mounting clamps are available for upright mounting with can partly extending through panels or chassis. (See Hardware, page P-61.)

TYPE LS UNITS have the can as negative terminal, and lug terminals for anode connections.

SPRAGUE SC INVERTED SCREW CAN MOUNTING TYPE, 475V

(WITH CAN AS NEGATIVE TERMINAL)

Can type dry electrolytics especially designed for the exacting continuous duty requirements of public address and power amplifier work. High surge voltage rating provides extra safety in high-current power supplies where high peaks often occur. Unexcelled for "extra tough" service replacement uses. Provided with threaded bushing for standard mounting in any position. Can is the negative terminal in all units. Positive terminal is lug connection. Supplied with mounting nut, and insulating washer to insulate can from chassis. Special ring clamps are available for upright mounting. (See Hardware, page P-61.)

SPRAGUE CAPACITORS

SPRAGUE CL INVERTED SCREW CAN MOUNTING TYPE, 475V (WITH CAN INSULATED FROM SECTIONS)

These can-type dry electrolytics are similar to Type SC Capacitors except that the can is insulated from the filter sections. Separate positive and negative terminal leads for each section. Especially recommended for high gain, high power amplifiers where minimum inter-stage coupling through power supply is desired. Special ring clamps are available for upright mounting. (See Hardware, p. P-61.)

CL-88	8-8	475	600	1 1/2	4 1/8	3.65

SPRAGUE AP HIGH-VOLTAGE CAN TYPES, 600V

These sturdy can-type units are outstandingly popular for all public address and theater applications where the working voltage is high and surges run well over 600 volts. These high capacities and high voltage ratings are obtained by use of balanced dry electrolytic sections connected in series, assuring long, trouble-free performance. Full capacity, full working voltage and low power factor are GUARANTEED.

SPRAGUE WR WET ELECTROLYTIC REPLACEMENTS

Sprague Type WR Capacitors are NOT SUBSTITUTES. Instead they are dry electrolytics of very high voltage formation specifically designed for use whenever wet electrolytic capacitors may have been used in the past. Not only will they stand high peak voltages, but they'll handle a-c ripple that might cause ordinary 450 volt dries to break down. Diameter is the same as standard wet mounting holes.

Catalog No.	Mfd.	Voltage		Dimensions		List Price
		DC working	Surge	D	L

SPRAGUE RC HIGH-VOLTAGE METAL CONTAINER TYPE, 800V

These units are for use in portable public address and theater equipment applications where space is limited and working voltages are high and surges may run well over 600 volts. Operation at full rated working voltage, low leakage and low power factor are FULLY GUARANTEED. Type RC-88 is recommended for use on equipments for capacities up to and including 8 mfd.

SPRAGUE CAPACITORS

MOLDED TM TUBULARS, 600V Greatest Paper Tubular Advance in 20 Years!

Highly Heat Resistant
Moisture Resistant
Non-Inflammable

Conservatively Rated
Small in Size
Mechanically Rugged

Completely Insulated

The new Sprague Molded Tubulars listed here are the result of more than four years' intensive research — and one of the largest retooling programs in Sprague history! The unique high-temperature molded

construction of these units assures maximum dependability, even under extremes of heat, humidity, and physical stress. They're especially recommended for use in auto radios, in small ac sets that get hot, or for any application which is "tough" on normal, waxed paper units. Soldered lead designates outside foil.

SPRAGUE MB HIGH-VOLTAGE MOLDED PAPER TUBULARS, 1600V

These Sprague high-temperature MOLDED paper tubulars are especially designed for use as buffers and other high-voltage applications such as automobile radio, vibrator power supplies, etc. They are constructed throughout for long life under extreme conditions of vibration and heat. Soldered lead designates outside foil.

SPRAGUE PX HERMETICALLY-SEALED OIL-IMPREGNATED METAL TUBULARS, 600V AND 1000V DC

Here is your answer to every need calling for higher-voltage tubular capacitors in the smallest possible size for real dependability under difficult operating conditions. Sprague Type PX Capacitors consist of specially wound sections, impregnated with an exclusive Sprague oil and hermetically sealed in metal containers for long trouble-free service. Each unit is supplied with an external sleeve to insulate it from the chassis and other metal parts. Mounting may be made by means of the tinned copper leads 2 1/2" long, or by standard Sprague mounting straps (see Hardware P-61).

OIL-FILLED TRANSMITTING CAPACITORS

Filled with

KVO

(KILO-VOLT-OIL — The Sprague wartime research oil development)

SPRAGUE CR

(With Universal

Mounting Feature)

An oil-filled transmitting capacitor is no better than the oil with which it is filled—and Sprague brings you the best! KVO*—Kilo Volt Oil—is the result of extensive Laboratory research and engineering tests and has proved its excellence throughout the world during the war in capacitors used on practically every type of equipment. KVO retains its dielectric efficiency at low temperatures to a greater extent than any other type of oil in common use. High insulation resistance and low power factor are maintained over a very broad range of operating temperatures. Oil-filled capacitors are essential for high-voltage use, and you can rely upon Sprague KVO units under all conditions. Terminals are insulated from the cans for AT LEAST TWICE the working voltage. Capacitor sections are hermetically sealed in sturdy rectangular metal cans which can be automatically grounded through the mounting clamps.

For special industrial applications, where extremely high insulation resistance requirements must be met, Sprague can supply special dielectric materials.

CR Capacitors are of convenient rectangular shape and have handy adjustable universal flanges for mounting in any position. Each unit is labelled with operating information based on A.R.R.L. standards and, in accordance with Sprague custom, ALL RATINGS ARE CONSERVATIVE. No need to "play safe" by buying most costly, higher-voltage transmitting capacitors than you actually need.

Unconditionally guaranteed against breakdown when used as specified.

*Trademark applied for.

FREE! LIFEGUARD PROTECTIVE CAPS

Don't run any chance of getting hold of a "hot one!" Each Sprague Type KVO Capacitor comes to you equipped with the famous Sprague "Lifeguard" Protective Insulating Caps at no extra charge. They afford maximum protection at all times.

Long a favorite with amateurs, broadcasters, etc., throughout the world, impregnated and filled with KVO. Rated to conform with tube and circuit design requirements. As with other Sprague high-voltage transmitting types, each unit is equipped with ceramic terminals and LIFEGUARD Safety Caps. Mounting clamp is provided. Unconditionally guaranteed when used as specified.

SPRAGUE PC INVERTED ROUND SCREW CAN TRANSMITTING TYPES, 600V TO 1500V

These popular Sprague TYPE PC inverted round screw can capacitors are filled (NOT just impregnated) with KVO, the famous Sprague 500°F. flash protection oil that has the added advantage of retaining its dielectric efficiency at low temperatures. The PC Capacitors find a wide field of usefulness in such applications as public address systems, medium-voltage transmitters, television and high-gain amplifiers. THEY ARE RATED CONSERVATIVELY and labelled according to A.R.R.L. standards. Ample safety factor is assured. Units include spark washer and insulating lug to insulate the round metal can containers from the chassis. Ring clamp is available for upright mounting. (See page P-61.)

Sprague Type UC cardboard-cased capacitors cost only about one-third the price of conventional high-voltage units—and you can count on them fully for tip-top service for practically any transmitting or similar use up to 1000 volts as rated. They are equally popular with beginners as well as old-time amateurs who want to save money on their rigs without interfering with reliability. These capacitors are oil impregnated, wax filled, fully cased and sealed in durable cardboard containers. Handy mounting flanges may be cut off when not needed. Unconditionally guaranteed when used at rated voltages.

SPRAGUE DR CAN-ENCASED PAPER DIELECTRIC TYPE, 600V (FOR DRY ELECTROLYTIC REPLACEMENTS)

The steady demand for Paper Dielectric Capacitors of the same sizes and shapes as Dry Electrolytics to serve as replacements for Dry Electrolytics has prompted us to bring you this line of capacitors. The actual capacity is one-third to one-half that of a Dry Electrolytic in the same size container. The leakage and power factor are extremely low. No polarity has been observed. Ideal for replacements in high-voltage public address systems, power amplifiers and high-voltage filter circuits.

SPRAGUE CAPACITORS

SPRAGUE CAB, CAT, CNB & CNT WITH CHANNEL BRACKET MOUNTINGS

These oil-impregnated paper dielectric Capacitors meet many special needs where the call is for sturdy, small-size units to withstand severe operating conditions. Extreme care is exercised to assure hermetic sealing of the metal containers. Channel bracket mountings, firmly soldered to the containers, are supplied as standard.

These units are specifically designed for chassis and relay rack mounting, and are mechanically constructed to withstand severe vibration in automotive, aircraft, or industrial use.

The capacitor sections are oil impregnated and the units are oil filled with specially processed KVO². All units are flash tested at twice rated voltage, and ground tested from terminal to container at twice rated voltage. Standard capacity tolerance for single and dual units is -10%, +20%, and for triple units is ±20%.

SPRAGUE MICA CAPACITORS

Twice Tested for R-F Characteristics

Sprague Mica Capacitors provide maximum quality for R-F applications where exacting requirements involving low-power factor and high-insulation resistance at high frequencies must be met. The line includes types for every requirement ranging from the tiny "toothpick" IFM types to the giant ceramic-jacketed types 40C. Each type incorporates outstanding developments based on far-reaching Sprague wartime engineering.

Mica units are perhaps the most critical of all capacitor types to produce properly—and it is in the handling of these essential details that Sprague engineering and production excels. Beginning with selection and handling of the mica itself, extreme care is taken in every operation to assure completed units which, although they look like conventional units on the surface, will far surpass ordinary mica capacitors in actual service.

Stocks of raw mica are carefully selected. So critical are Sprague requirements that far more mica is rejected than is actually selected for use. The selected mica is then hand split and each piece electrically graded by exclusive Sprague methods.

Particular care is exercised in the interleaving of section foils and in connecting them to terminals through specially designed low-resistance R-F bonds. Perhaps most important of all is the fact that each and every Sprague Mica Capacitor section receives a painstaking radio frequency test before being encased in its mold. After this test, each section is carefully impregnated and moisture-proofed prior to the molding operation.

Upon completion, all Sprague Mica Capacitors required to carry large R-F currents are actually R-F current tested for their peak ratings. This test combined with thorough testing before molding assures the serviceman, amateur, experimenter or industrial user of units of utmost dependability for any application or any condition of use.

SPRAGUE HARDWARE

Sprague Mounting Clamps and Straps provide quick, dependable means for securing a wide variety of capacitors and resistors to a mounting surface. All clamps and straps are made from plated steel.

CMC Vertical Mounting Clamps for Cylindrical Capacitors (Figs. 1 and 2) are ideally suited for vertical or "above chassis" mounting of Sprague capacitor types AP, CL, BB, EL, HL, V, LM, LS, OT, PC, PLS, RW, S, or other round can units.

The RMC Wrap Around Clamps for Rectangular Capacitors (Fig. 3) are designed for mounting Type CR Capacitors or other rectangular units.

Type TMS Mounting Straps for Tubular Capacitors (Fig. 4) fit any tubular capacitor or resistor having a diameter of between 1/4" and 1 1/2", inclusive. They may be used with Sprague Types AP, PA, SW, TA, TC, TH, TR, TMC, TP or other tubular units as well with Standard Radio Shack Types 5KT 50T, 6KT 100T, 25KT 250T, 50KT 500T and 125KT 1250T.

SPRAGUE KOOLOHMS

THE RESISTORS WITH THE CERAMIC-COATED WIRE INSULATION

Sprague Koolohm Wire-Wound Resistors are wound with wire that is insulated before it is wound with a flexible, ceramic coating that is impervious to heat as high as 1000° C. In addition, each resistor is doubly protected by a glazed ceramic coating and new type of end seals which guard it effectively against any moisture or other climatic conditions. Ordinary resistors may be designed to provide some degree of "tropicalized" protection at extra cost. STANDARD Koolohms give FULL protection at regular prices!

No Other Resistors Have These Features

Because of the complete protection afforded by both their wire insulation and outer ceramic shells, Koolohms may be mounted anywhere, even flat against a chassis or against grounded parts. They can safely be used at full wattage ratings, even on the high-resistance values because of the excellent insulation at high temperatures. No danger of shorts

or current leakage! Thanks to their ceramic wire insulation, Koolohms can be wound in layers. This means higher ratings in much smaller physical sizes. Even more important, larger, sturdier wire sizes can be used. Actually, the wire sizes in Koolohm Resistors average 2 1/4 times greater in cross-sectional area than those in ordinary resistors of the same size!

High Insulation Resistance

Also standard Koolohms have the high insulation resistance to ground required for television and other high-voltage uses—10,000 volts from the surface of their sturdy ceramic jackets to their resistance elements!

The following listings include only the Sprague Koolohm Wire-Wound Resistor types commonly supplied for radio repair service and amateur radio applications. Various other types are also regularly produced in large quantities and to the most exacting standard or special applications. All have been thoroughly proved and tested for the most exacting military, naval and aircraft applications.

†Adjustable resistors are not of tropicalized construction.

*Type KT only.

Other types not listed in this catalog include: **Hermetically-Sealed, Ferrule Terminal, Power Wire-Wound Resistors**, with power ratings of 15, 20, 40, 50, 90, 120 and 150 watts. These are the famous Sprague Koolohm "Grade 1, Class 1" resistors that are impervious to salt water, thermal shock, and corrosive atmospheres.

Precision Meter Multiplier Resistors, Wire-Wound, Hermetically-Sealed. Resistance values up to 7.5 megohms per unit. Three types, MFA, MFB, and MFC. Resistance tolerances of $\pm 0.5\%$ and stability of $\pm 0.1\%$. The most rugged meter multipliers in the world!

Voltage Divider Resistors. Wire-wound power resistors with ratings of 10, 15, and 25 watts. Designed for through bolt mounting as individual units, or in multiple sections of any size to provide tapped voltage dividers.

***MEGOMAX. High-resistance, High-Voltage, Resistors.** Ferrule terminal, hermetically-sealed, composition resistors of pressed and sintered ring construction, capable of high-temperature operation to 150° C. Three types with resistance values to 1000 megohms; power ratings of 6, 12 and 25 watts and voltages up to 20,000 volts.

BOBBIN Wire-Wound, Semi-Precision Resistors. Wound with ceramic-insulated wire on high-temperature plastic forms. Five high stability types with

power ratings of 1, 2, 2.5, 3 and 5 watts, and resistance values to 500,000 ohms. Resistance tolerance down to $\pm 0.5\%$.

Complete details on the above and other new types are contained in the Sprague Koolohm Industrial Resistor Catalog No. 100K, copy of which will gladly be sent on request by industrial users. Sprague engineers welcome the opportunity to be of assistance regarding industrial resistor applications.

Cut-away view of Sprague Koolohm Resistor showing unique construction. Ceramic-coated wire simplifies layer winding.

SPRAGUE FILTEROL

INTERFERENCE FILTERS

Sprague FILTEROL Radio Interference Filters are a direct outgrowth of highly successful Sprague wartime engineering research, and offer for civilian use a war-tested, practical filter that suppresses man-made radio noises and television "scrambles" on practically any application. They are small, completely self-contained, and easily installed. Applicable to any electrical device within their current and voltage ratings, they provide maximum noise suppression on radio broadcast bands. A study of the Attenuation Curve (available on request) illustrating typical FILTEROL noise suppression performance will show that this surpasses anything normally available in the past.

SPRAGUE FILTEROL TYPES 1, 2 and 3 are designed for connection in series with power supply lines to interference-producing devices. Their basic circuit is a special three-terminal network of which the can is one terminal. The filter selected should have a rating higher than the continuous running current of the device. A single FILTEROL connected in one side of the line is usually sufficient. However, in severe interference cases a FILTEROL in each power line may be necessary. For three-or-four wire systems, a FILTEROL in each wire is necessary.

FILTEROL TYPE 4 is a new, exclusive Sprague invention incorporating a Sprague HYPASS capacitor and provides exceptionally high attenuation at frequencies above 5MC. It is effective up to 150 MC or more. Intended for all small devices with continuous current ratings up to 20 amperes. Applied by mounting directly on the frame of the device to be filtered, and connecting the power supply line in series through the filter. In severe cases, a FILTEROL may be necessary in each line wire.

SPRAGUE IF TYPES

IF-15—A TRIPLE-SECTION FILTER for all small motor-operated devices. Especially designed to prevent accidental shocks from discharge of filter capacitors.

IF-21—COMPACT DUAL METAL-ENCASED TUBULAR FILTER for use across brushes of fractional horsepower motors with can grounded to motor frame. Also across line terminals of motors.

IF-11—A DUAL HIGH-CAPACITY FILTER with completely enclosed safety construction. Designed for motors over 1 horsepower and up to 220 volts AC or DC. Also used on high-current arcing or sparking devices.

IF-S1—SINGLE 2-LEAD FILTER SECTION with can completely insulated. For use across make-and-break contacts.

IF-37—3-SECTION DELTA-CONNECTED FILTER. Only one IR-37 required for each fluorescent lamp fixture. Also effective on make-and-break governor-type motors.

NEW! SPRAGUE TO-3 DELUXE TEL-OHMIKE

Universal Capacitance and Resistor Analyzer with Built-in DC Volt-milliammeter

\$59.70 net

This fast, simplified operation is the keynote of the new TO-3 Deluxe Tel-ohmike. "Speedy check" locates open, intermittent, or shorted condensers WITHOUT REMOVING THEM FROM THE CIRCUIT. One pair of plainly marked binding posts and a total of only five controls assure quick, effective operation on all tests. Dial is of direct-reading, calibrated type, color coded to correspond to selector switch. It is easy to see, easy to read. In addition to all of its uses in radio work, Tel-ohmike checks motor-starting condensers, and measures insulation resistance of motors, transformers, etc.

SPECIFICATIONS

Capacity: 0.0001-2,000 MFD. in 4 ranges. measured with rated polarizing voltage applied.

Power Factor: 0-50% at 60 cycles. Resistance: 2.5 Ohms-25 Megs. in 5 ranges.

Insulation Resistance: 0-2500 Megohms (Direct reading on the meter). D.C. Meter Range: 0-15, 150, 750 volts — 0-1.5, 15, 75 V.A.

Electrolytic Leakage: Measured in M.A. at rated D.C. voltage. Capacity and power factor of electrolytic condensers. Size: 13 1/4" wide, 10 1/2" high, — 5" deep.

Power: 35 watts at 115 volts — 60 cycles. Shipping Weight: 15 lbs.

Case styles CP 53, 54, 55—Bathtub Style CP 70—Large Rectangular CP 61, 63, 65—Miniature Rectangular

All case styles are available in characteristic E and F. Single-section units are supplied with a capacitance tolerance of ± 10 per cent (K), and two- and three-section units with a capacitance tolerance of ± 20 per cent. ± 10 per cent (V). Spade-lug and footed mounting brackets are available for use with capacitors on which the mounting bracket is not an integral part.

Write for Bulletin GEA-4357.

Energy-storage discharge capacitors

GE light-duty energy-storage capacitors are made in a wide range of ratings to fit practically every requirement of high-speed flash photography, as well as home and industrial welders for light metals. Careful construction, high-quality materials, and skillful design contribute to long life and efficient operation.

Capacitor networks

General Electric pioneered in the development of mineral-oil-treated paper dielectric capacitor networks for air, sea, and land radar, and was a prime supplier for the government services. The products supplied varied from the miniature types used with aircraft radar to the large land station designs.

All of the general facilities and the highly specialized test equipment involved are being retained for further work in this field and inquiries on new requirements are solicited.

Case Style 70

Case style 70 units with various types of terminals.

Case style 70 units with various types of removable mounting brackets.

These Pyranol fixed-paper-dielectric capacitors in case style 70 are hermetically sealed in rectangular cases. This line includes standard ratings, ranging from very small units weighing only three ounces to large high-voltage units weighing up to 175 pounds. All are of single-section construction, with a capacitance tolerance of ± 10 per cent. Cases are isolated and the two bushings are brought out through the cover. Units are available with either solder-lug terminals or with pillar-insulator terminals in 690-, 1000-, and 1500-volt ratings. All higher-voltage ratings have pillar-insulator terminals. These units may be operated in altitudes up to 7500 feet.

* Solder lug. † Pillar insulator.

Bushings with solder-lug terminals are made of molded Textolite, and those which have pillar-insulator terminals are of the highest-quality porcelain. All bushings are thoroughly bonded to the container to provide a permanent liquid-tight seal.

All units can be supplied with removable mounting brackets, as illustrated above. In addition to the screw-spade-lug brackets, two types of footed brackets are also available—one with a straight "L"-shaped foot and the other with a "U"-shaped foot that grips the bottom of the unit. The brackets can be attached to either the top or bottom of the unit, permitting either upright or inverted mounting.

Case styles 50, 51, and 52

These fixed-paper-dielectric "bathtub" capacitors are of small and compact construction, and will fit into very restricted places in radio and electronic equipments.

All three case styles are constructed with solder-lug terminals, and are available in single-section, two-section, or three-section construction for all circuit diagrams.

The hermetically sealed metallic containers are of drawn construction and include two integral mounting lugs.

The only difference in construction of the three case styles is in the location of the bushings, which are brought out through the side for case style 50 units, through the top for case style 51 units, and through the bottom for case style 52 units.

Write for Bulletin GEA-2621.

STANDARD RATINGS

Type of Construction	Nominal Direct Voltage Rating	Capacitance Ratings Microfarads*	Capacitance Tolerance

Three-section units	600	.25, .10, .25, .50	±20% ±10%
	1000	.25, .10, .25	

* Capacitance per section of two- and three-section units.

Case styles 60, 62, and 64

These small rectangular-case fixed-paper-dielectric units are of narrower width than the "bathtub" units, and will fit into a very restricted panel surface, where case height is not the limiting dimension. Mounting lugs, of either the removable or attached type, are of very sturdy construction.

All three case styles are constructed with solder-lug terminals, and are available in either single-section or two-section construction for all circuit diagrams.

The metallic containers are hermetically sealed, and of deep-drawn construction.

Case style 60 units have no brackets, but removable brackets of either the footed or screw-spade-lug type can be supplied, while the case style 62 and case style 64 units have soldered-on brackets for upright or inverted mounting, respectively.

STANDARD RATINGS

Type of Construction	Nominal Direct Voltage Rating	Capacitance Ratings Microfarads*	Capacitance Tolerance

	600	.25, .10, .25, 50, 1.0	
	1000	.01, .02, .25, .10, 25, 50	
Two-section units	600	.25, .10, .25, .50	±20%
	1000	.01, .02, .25, .10, 25, 50	

* Capacitance per section of two-section units.

Case styles 66-68

Case styles 66 and 68 units are similar to the case style 62 and 64 designs but slightly greater in width to accommodate three terminals.

Both case styles are constructed with solder lug terminals and are available in single-section, two-section, or three-section units. The metallic containers are deep-drawn construction and are hermetically sealed.

Case style 66 units have integral mounting brackets for base mounting, and case style 68 units integral mounting brackets for inverted mounting.

The metallic containers are deep-drawn construction and are hermetically sealed.

STANDARD RATINGS

Type of Construction	Nominal Direct Voltage Rating	Capacitance Ratings Microfarads*	Cap. Tol.

	1000	0.01, 0.02, 0.05, 0.10, 0.25	

* Capacitance per section of two- and three-section units.

PYRANOL* CAPACITORS

*Trade mark reg. U. S. Pat. Off.

FOR GENERAL-PURPOSE A-C APPLICATIONS

Small size Pyranol capacitors are recommended for use with motors, luminous-tube transformers, industrial control, and other equipment.

The use of Pyranol as a treating material, because of its high dielectric strength, high permittivity, and exceptional stability, has made possible a marked reduction in physical size, as well as a capacitor superior to those formerly available.

Design advantages

- (1) Small and compact units, because of the use of Pyranol.
- (2) Wide range of ratings available in rectangular, cylindrical and oval cases.
- (3) Three styles of mounting brackets are available and supplied separate from the units. Units may be operated in any position.

Write for Bulletin GEA-2027

CAPACITORS FOR OSCILLATOR TANK CIRCUITS

This line of fixed-paper-dielectric capacitors has been developed primarily for grid and plate blocking service in the electronic oscillator circuits of high-frequency induction-heating equipments. They can also be used to advantage in other high-frequency oscillator circuits of a similar nature.

GE high-voltage paper-dielectric capacitors are of relatively high capacitance (0.01 mu f) for high-frequency units, and yet they are more economical than conventional high-frequency units of considerably smaller capacitance values. They can, therefore, be applied with savings in cost as well as reduced losses and lower voltage drop across the capacitor.

features

- Hermetically sealed in metallic cases.
- Single-bushing construction for minimum size.
- Removable mounting brackets.
- Internal lead connections arranged for minimum inductance.

EL-MENCO CAPACITORS

TELEVISION — TRANSMITTING — INDUSTRIAL

Designed to meet the requirements for TELEVISION, POWER AMPLIFIERS, LOW POWER TRANSMITTERS and various INDUSTRIAL uses. Moulded in low loss bakelite, tested at double the branded voltage. Tests for dielectric strength, insulation resistance, temperature co-efficient and capacitance

drift, humidity and life tests according to RCM STANDARDS. All units are wax dipped for salt water immersion seal. These capacitors are manufactured in accordance with "B" CHARACTERISTIC requirements. STANDARD TOLERANCE $\pm 10\%$.

TYPE 50 DUAL PADDER

Type 50 Dual Padders provide two variable trimmers mounted on a single base. This unit is designed as a tuning component for I. F. transformers; and as such, may be snap-in mounted along with the transformer coil in any size shield having dimensions exceeding 1-1/16" x 1-1/16".

TYPE 30 PADDER

El-Menco Padding Condensers have been acclaimed by engineers as the finest development in adjustable mica condensers.

The construction is such as to completely enclose and protect the delicate edges of the mica films, made of the finest quality clear India ruby mica.

The phosphor bronze adjusting plates assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated to resist corrosion.

The adjustable screw advances 1/64 inch for one complete rotation thus insuring accurate adjustment of the capacity setting.

TYPE AHB-PAPER DIELECTRIC (BATH-TUB) CAPACITORS

Units are non-inductively wound, wax impregnated, oil cooled, wax sealed and encased in drawn metal container, well tinned to prevent corrosion. Exclusive AMCON Terminals (combination one-piece bushing) give high voltage rating between terminals and can. Tested at three times rated voltage.

AMCON ELECTROLYTIC CAPACITORS

All AMCON Electrolytic Capacitors measure up to the highest standards for consistent uniformity in electrical characteristics and for dependable long life in service. Inquiries for specific needs are invited.

ELECTROLYTIC CAPACITORS IN PLASTIC CONTAINERS

Type PL

Type PLL

Inverted type plastic casing can be used on a top chassis mounting with a nut. 100% moisture proof, withstands extreme heat or cold. Type PL with 4 1/2" insulated wire leads; PLL with soldering lugs.

TYPE PL—WORKING VOLTAGE 450 V.D.C. PEAK 600 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
PL5-8	8	1 3/8 x 3 1/2	\$1.20
PL5-10	10	1 3/8 x 3 1/2	1.50
PL5-12	12	1 3/8 x 3 1/2	1.60
PL5-16	16	1 3/8 x 3 1/2	1.75
PL5-20	20	1 3/8 x 3 1/2	1.95
PL5-24	24	1 3/8 x 3 1/2	2.05
PL5-30	30	1 3/8 x 3 1/2	2.25
PL5-35	35	1 3/8 x 3 1/2	2.35
PL5-40	40	1 3/8 x 3 1/2	2.65
PL5-88	8-8	1 3/8 x 3 1/2	1.90

Condensers listed above are also available with lugs (Type PLL) instead of wire leads.

TYPE LPL

... for ULTRA

TYPE LPLL

COMPACT INSTALLATIONS

The same ease and speed of assembly as the famous AMCON PL Type—the same improved performance and added beauty of plastic cases, plus new compactness!

WORKING VOLTAGE 25 V.D.C.

LPL5-20	20	1 3/8 x 2 1/4	1.95
LPL5-88	8-8	1 3/8 x 2 1/4	1.90

Condensers listed above are also available with lugs (Type LPLL) instead of wire leads.

TYPE IC FILTER BLOCKS

Concentrically wound units with all sections having a common negative. High voltage sections are rated 150 working V., 200 peak V. Low voltage sections are 25 working V., 50 peak V. Also available on special order with separate negatives.

Cat. No.	Cap. Mfd.	Size	List
IC2-101	16-12 & 10-10	1 3/8 x 3 1/2	\$2.15
IC2-102	16-8 & 5-5	1 3/8 x 3 1/2	2.00

TYPE KT CAPACITORS

Kraft tube unit with center mounting bracket for use in assemblies where space is limited. 4 1/2" insulated wire leads. Dual units made with four or three leads and common negative. Other capacity combinations available on request.

THREE LEADS — COMMON NEGATIVE Working Volts*150 D.C. — Peak V. 200 D.C.

Cat. No.	Cap. Mfd.	Size	List
KT3-20-20	20-20	1 x 2 3/8	\$1.25
KT3-30-20	30-20	1 x 2 3/8	1.40
KT3-40-20	40-20	1 x 3	1.60

ILLINOIS CONDENSERS

"TIME TESTED QUALITY"

"ILLINI HYCAPS" are now manufactured in a new and modern plant designed especially for the manufacture of capacitors. Our thorough engineering, plus old manufacturing skills and a rigid policy of quality control enables us to produce a product that is of unexcelled quality.

"ILLINI HYCAPS" are again available, and you will agree after using them that they meet every requirement a superior condenser should have for long life and dependable service.

"ILLINI HYCAPS" are guaranteed unconditionally for a period of one year, from date of purchase.

1. Short proof—ample separation of foils by highest purity cellulose separator plus tough anodic film—will withstand the highest surge voltages.
2. Condenser hermetically sealed and anchored in an aluminum shell. Completely resistant to changes due to temperature and humidity. Built to withstand all kinds of vibrations and shocks.
3. Attractive kraft tube spun over condenser ends . . . prevents shorting of pig tail leads to condenser or other components. Aluminum lock-washers hold leads securely in place, will not loosen or break off.
4. Low power factor, low leakage, excellent shelf life.
5. Extremely longer life—due to our use of C. P. chemicals and highest purity foils and insulation materials available. A balanced non-corrosive electrolyte contributes to quiet stable operation.

Clamp Mounting Tubulars

"ILLINI-HYCAPS"

Through careful selection of high temperature sealing compounds and superior engineering design, these completely hermetically sealed, compact tubular electrolytic condensers are the acme of dependability. They operate efficiently under high temperatures and will give long life under all climatic conditions.

The small size and convenient mounting features of our type IHC "ILLINI-HYCAPS" make them popular in both manufacturing and replacement work.

Leads are color coded and securely anchored in the hard wax seal. Dual units have four leads for universal replacement work and are completely insulated.

Clamp may be moved to any position on tube for rapid mounting.

"TIME TESTED QUALITY"

TYPE UMP

Illinois standard, twist prong mounting condensers offer a wider range of voltage and capacity types than have heretofore been possible in units of comparable size. They are designed to give maximum efficiency, both in operating characteristics and ease of mounting and wiring.

The electrical characteristics of our type UMP are superb. Capacities are always plus. This, coupled with low power factor and low leakage, makes them ideal for use in all electronic circuits.

Units are hermetically sealed in seamless drawn aluminum cans. Mounting and soldering lugs are sturdy and heavily tinned. Cathode tabs are electrically welded to mounting ring. Each unit is vibration proof—and they will stand up in any climate.

Arranged in a variety of can sizes and capacity combinations, the attached listing represents the majority of condenser types in use today.

SINGLE UNITS

'TIME TESTED QUALITY'

TYPE LN Inverted Screw Mounting ALUMINUM CAN CONDENSERS

Type LN aluminum can condensers are manufactured to operate satisfactorily under the severest conditions. Units are completely sealed in an inner impregnated tube then resealed. Correct design has allowed for maximum heat dissipation with resultant ability of the condensers to operate at higher temper-

atures and higher voltage surges.

Separate negative and positive leads for each section for universal replacement work. Pal Nut furnished with each condenser. Individually packaged in attractive, varnished outer box. These units are ideal for long life and continuous service.

INDUSTRIAL

CONDENSER

TYPE "SA" OIL FILLED

1. INCCO OIL "A" IMPREGNATED AND FILLED—permitting efficient operation over widest range of temperatures.
2. HERMETICALLY SEALED CASE—is unaffected by time, humidity, or operating temperatures.
3. Use of HIGHEST GRADE CONDENSER TISSUES insures a long uninterrupted life.
4. HIGH-GLAZE PORCELAIN INSULATORS—insure low moisture absorption and high terminal to case flash over.
5. CONSERVATIVELY RATED—SAFE FOR CONTINUOUS OPERATION AT 10 PER CENT OVER-LOAD.
6. Use of "SPACE SAVER" UNIVERSAL MOUNTING BRACKET provides adjustable capacitor heights.
7. LEAD COATED STEEL CASE—IS NON-CORROSIVE and lacquer finished.
8. TESTED FOUR TIMES BEFORE SHIPMENT—guarantees a 100 per cent perfect product electrically and mechanically.

If riveted terminal construction is wanted in place of porcelain stand-off insulators add "R" to catalog number. For example, 6SA50 changes to 6SAR50. Submersion proof terminal construction to meet Army and Navy Specifications is optional; specify on order. Standard capacity tolerance plus or minus 10 per cent. Mounting brackets supplied in accordance with following catalog designations: TYPE SA—No mounting brackets. TYPE SAU—"Space Saver" universal bracket. TYPE SAJ—Soldered vertical mounting bracket. Type SAL—Reversible mounting foot bracket. TYPE SAH—Re-

versible spade bolt bracket.

For example: The 8mid, 600V, type with "Space Saver" bracket has catalog number 6SAU800.

NOTE: To facilitate delivery we have standardized on container heights. In many cases units can be supplied in shorter containers if required.

are supplied on each bracket.

TYPES "GA" and "HA" OIL FILLED

These inverted mounting capacitors fill a definite need where chassis space is the prime factor.

Types "GA" and "HA" are INCCO Oil "A" impregnated and filled.

The case is a one-piece metal extrusion with a "locked-in" milled neck. This construction meets and surpasses the Army and Navy requirements for a submersion-proof capacitor.

Type "GA" is available in the seven standard rating listed below, but can also be applied in other capacities and/or voltages to manufacturers' specifications.

In the standard "GA" and "HA" types the container is insulated. A grounding lug can be supplied for connecting one terminal to the case. Fiber washer for insulating container from chassis, when case is grounded, and insulating cover for insulating the container from adjacent equipment, can also be supplied on special order.

Type "HA" differs from "GA" in container and mounting neck size, and also in the fact that it has three insulated terminals. Primarily, type "HA" is supplied to manufacturers' specifications, to meet special requirement of multiple-section and multiple-terminal capacitors, with either insulated or grounded container.

DRY ELECTROLYTICS

Type "B" electrolytic capacitor is the first commercially available unit of this type with the reliability of the total submersion type, oil filled capacitors.

Wound with the highest purity aluminum foil and cellulose separators available; impregnated in electrolyte having excellent temperature characteristics, these units will outlive their associated equipment.

NOTICE—Most units are available with TERMINALS ON TOP, BOTTOM, OR ENDS. When ordering, add "T" for top terminals, "B" for terminals on bottom, or "E" for end terminals, i.e., 6BA100 for terminals on top. Type "B" also available in WAX FILLED. When ordering, change catalog number A to W, i.e., 6BW100. If terminal position is not designated, side terminals are furnished. STANDARD CAPACITY tolerance of plus 20 per cent minus 10 per cent furnished on oil filled and wax filled units unless otherwise specified when ordering. Can be furnished in plus or minus 1 per cent capacity tolerance on special request.

Built to U. S. Signal Corps and Navy Specifications TYPE "BA" OIL FILLED

1. INCCO OIL "A" permits efficient operation of these compact units over the widest range of temperature.
2. The use of the HIGHEST GRADE CONDENSER TISSUE insures greater safety factor and longer life.
3. Specially PROCESSED RIVETED TERMINALS are designed to withstand total submersion in salt water and changes in temperature from 50° below zero Centigrade to 90° above zero Centigrade without loosening or losing their integrity.
4. CONDENSER MOUNTINGS form an integral part of these drawn shell containers insuring permanent and rigid fastenings.
5. All units are NON-INDUCTIVELY WOUND providing efficient operation over the widest range of frequencies.
6. HERMETICALLY SEALED, they are unaffected by time, temperature or humidity.
7. CONSERVATIVELY RATED for safe and continuous uninterrupted operation at 10% above rated voltage for the lifetime of associated equipment.
8. Tested at twice the rated voltage between terminals and twice the rated voltage plus 1000 from each terminal to case.

MOTOR STARTING CONDENSERS

These motor starting condensers are all heavy duty three second start. Built of the finest materials obtainable, these capacitors are engineered to the Nth degree of perfection. They are used by all the leading manufacturers of high quality motors.

The listings shown will take care of 90% of all your replacement requirements.

SEND FOR BULLETIN No. 1075 WHICH LISTS OUR OIL FILLED MOTOR RUNNING CAPACITORS

CAPACITORS TO 250,000 V.D.C.W.

INCCO OIL "A" IMPREGNATED AND FILLED assures smaller size, low power factor, and widest range of operating temperatures.

ELECTRIC ARC WELDED HEAVY GAUGE HOT TINNED STEEL CASES are non-corrosive—finished in durable lacquer.

GLAZED WET-PROCESS PORCELAIN INSULATORS—low moisture absorption and high terminal to case flash over.

WOUND WITH HIGHEST GRADE CONDENSER TISSUES—insures a long, uninterrupted life.

CONSERVATIVELY RATED—Safe for continuous operation at 10 per cent overload.

HERMETICALLY SEALED STEEL CASE — unaffected by time, humidity or operating temperatures.

AVAILABLE TO MEET U. S. SIGNAL CORPS AND NAVY SALT WATER SUBMERSION REQUIREMENTS.

ET SERIES ELECTROLYTIC CAPACITORS

"ET" series capacitors have been designed for ease in installation and reliability. They are constructed to withstand the most severe operating conditions encountered in industrial and electronic equipment. Especially controlled manufacturing processes insure that the equipment in which these capacitors are used will function without interruption. Capacitors can be supplied for operation at temperatures ranging from minus 40 to plus 85 degrees Centigrade. Mounting is effected by inserting the capacitor through the slots in either the chassis or mounting plate, and twisting the mounting prongs 90 degrees.

INDUSTRIAL

CONDENSER

TELEVISION AND TUBULAR PAPER CONDENSERS

TYPE PT

INDUSTRIAL By-Pass Capacitors are non-inductively wound and designed for maximum efficiency up to the highest frequencies. The units themselves are completely impregnated and sealed with a special non-hygroscopic sealing compound, thus preventing moisture penetration under the most humid conditions.

* Vibrator capacitor

RADIO INTERFERENCE ELIMINATORS

INDUSTRIAL CONDENSER CORP. has made a special study of the suppression of noises caused by fluorescent lighting. No. 7249 capacitor is designed with three leads, two leads to be connected across the 110 volt line and the single lead to be grounded. No. 4219 is housed in a metal container and is self grounding. It is supplied with strap mounting for easy installation. No. 4252 and No. 4253 are flat type units designed to mount on the ballast support of circline ballasts. The convenient mounting flap grounds the unit when the stem of the lamp is placed through the mounting hole.

Catalog Number	Dimensions in Inches	List Price
7249	1 1/2 x 1 3/8	\$1.00
4219	3/4 x 2	1.35
4252	2 3/8 x 5/8 x 1 1/4	1.50
4253	2 3/8 x 5/8 x 1 1/4	1.50

DIRECT REPLACEMENT

For Either Dry or Wet Types
No Drilling — No Changes

The "IL" type capacitor is a dry electrolytic assembled in an aluminum container having a threaded mounting neck which is an integral part of the container.

Our "IL" type capacitors may be used as replacements for the old type wet or dry electrolytic capacitors and will mount in the same mounting hole as the part replaced, eliminating the use of adaptors or auxiliary workmanship.

Electrically and mechanically this condenser is designed for heavy duty service. It incorporates the exclusive INDUSTRIAL etched foil process of construction.

Although these capacitors are not hermetically sealed, they are highly superior to the paper type units generally used for this kind of replacement.

These units are supplied with Underwriters Approved 75° C rubber covered leads.

Individually boxed in attractive carton with instructions.

To replace 1 3/8" diameter screw neck type

* SM600, SM605, SM601, SM608, SM607, SM610:

3 leads.

† SM606, SM609, SB550, SB552: 4 leads.

An extremely popular type of condenser due to its exceptional high quality and midget size. Hermetically sealed in a small metal case and scientifically vented, to protect against adverse operating conditions of voltage, temperature and humidity. Container is insulated by a high grade tube which is spun over the ends of the can to eliminate shorts when wires are bent close to container. Easily mounted by their rigid wire leads.

Type MM

All Type "MM" units are available with mounting strap. Recommended in cases of extreme vibration or when advisable to have unit solidly anchored. When ordering add the letter S before the catalog number.

Type MMS

Each unit is completely embedded in a high grade wax and then sealed in an impregnated carton to insure efficient operation under the most adverse conditions. New, high voltage formation, gives complete protection against surges and high peak voltages. Supplied with color coded, Underwriters' Approved, rubber covered leads. Universal lugs permit easy mounting in any position.

Type MC

Spade bolt type "SB" of mounting has been very popular due to its wide use in many radio sets. Each unit is embedded in a high temperature wax and then sealed in a thoroughly impregnated cardboard tube, affording complete immunity to moisture penetration. New high voltage formation gives complete protection against surges and high peak voltages.

Type SB

Type "SM" has identical characteristics as "SB". The addition of the strap mounting bracket has proved favorable in its use due to its wide application in AC-DC and portable sets in the replacement field. The strap can be moved to the best mounting position and then bolted or soldered.

Type SM

Supplied with color-coded, Underwriters' Approved, rubber covered leads.

TYPE EN-184 ELIM-O-STAT*

This wide-frequency range filter is especially recommended for oil burners, small neon signs, and small machinery requiring that both sides of the line be filtered to remove severe interference to radios and television sets. Underwriters' approved. Maximum current 2.5 amperes, 125 volts a-c/d-c.

List Price: \$3.80 Dealer Net Price: \$2.28
*T. M. Reg. U. S. Patent Office

MODEL CF EXAM-ETER* WITH FAMOUS QUICK-CHECK* CIRCUIT

Most comprehensive of all capacitor analyzers, this sturdy, reliable instrument is designed to simplify electronic servicing.

- Has exclusive, patented "Quick-Check" circuit for qualitative tests and intermittent checks without unsoldering capacitor leads
- Capacitance bridge—10 mmf to 2000 mf
- Power Factor range—0 to 50 percent
- Insulation Resistance—3 to 10,000 megohms
- Leakage Current—Reads electrolytic leakage current directly on recessed 4 1/2" meter
- Continuously Adjustable 0-550-volt D-C power supply for electrolytic tests
- 0-600 volt, 3-range D-C vvm
- 5-50 volt, A-C vacuum-tube voltmeter
- 100 ohm to 7.5 megohm A-C resistance bridge
- Clear, step-by-step, 20-page Technical Manual
- Attractive, gray metal case
- Size: 12 3/4" high by 10" wide by 5 1/2" deep
- Weight: Only 12 3/4 lbs. for CF-1-60

MODEL CF CAPACITOR EXAM-ETER

Catalog Number	For use on	Dealer Net Price
CF-1-60	115 volts a-c, 50-60 cycles	\$59.70*
CF-2-U	115-230 volts a-c, 25-60 cycles	70.45†

ELIM-O-STAT* FILTERS FOR FLUORESCENT LAMPS

TYPE EF-100

Exceptionally effective over the wide range of frequencies used for radio and television entertainment and communications, the EF-100 is the Elim-O-Stat for fixtures in laboratories, radio salesrooms, rural homes, and wherever else sensitive receivers are used or station signal strengths are weak. Installed in series with the line leads within the fixture at the point where the power leads enter. Only one unit is needed per fixture. Housed in metal container. Rated Voltage: 125 volts A-C. Maximum Current: 2.7 Amperes. Will handle up to six 40-watt tubes. Underwriters' Approved.

List Price: \$3.80 Dealer Net Price: \$2.28

TYPES EF-101 AND EF-102

These Elim O Stats, electrically identical delta-capacitor networks, are about 80% as effective as Type EF-100. Small size and low cost favor them for most applications. Sealed in metal containers. Only one Elim-O-Stat needed for any fixture or lamp. Simply connect across line leads entering fixture. Underwriters' Approved.

Catalog Number	Line Volts	List Price	Dealer Net Price
EF-101	125	\$1.25	\$.75
EF-102	125	1.20	.72

MODEL CBC CAPACITOR ANALYZER

An up-to-the-minute version of the famous Solar Model CB, long-time standard analyzer of the radio service industry.

- "Magic Eye" tube for "Quick As A Wink" bridge balance indication
- Capacitance bridge—10 mmf to 800 mf
- Power Factor range—0 to 50 percent
- Simplified Mean-Lamp circuit for visual check of insulation resistance and leakage
- Resistance Bridge—100 ohms to 7 megohms
- Easy-to-read clear scales.
- Size: 9 1/2"x7 1/8"x6 1/4". Weight: 7 lbs for CBC-1-60
- Portable case with detachable cover has hand-rubbed finish

MODEL CBC CAPACITOR ANALYZER

Catalog Number	For use on	Dealer Net Price
CBC-1-60	115 volts a-c, 50-60 cycles	\$39.80*
CBC-2-U	115-230 volts a-c, 25-60 cycles	46.90†

† Dealer Net Prices for Denver and West of Denver are 5 percent higher.

PLUG-THROUGH ELIM-O-STAT*

This compact, simple plug-through filter is used between set and outlet or appliance and outlet for eliminating low intensity interference.

Type ED 101 List Price: \$1.25 Dealer Net: \$.75

NEW "JUMBO" ELIM-O-STAT*

Standard design capacitive inductive filter in large attractive container. Popular as a merchandising leader. Used with radios or appliances. New high rating of 5 amps. max., 125 volts a-c/d-c. Replaces both old Jumbo and Type RN filters.

Jumbo—List Price \$7.98 Dealer Net Price: \$4.79

PLUG-IN SOCKET ELIM-O-STAT* FILTERS

These efficient twin-pi capacitive-inductive filters effectively attenuate interference on the new television frequencies as well as on the regular and short wave broadcast bands. All incorporate war-time developments in filter design. Solar plug-in Elim-O-Stats are furnished with an exclusive three-wire line cord which incorporates the filter grounding lead. No unsightly extra wire to ground is needed. Each filter is also provided with a binding post for return lead to motor or appliance frame when required. Attractive maroon-wrinkle finish.

DURANITE MOLDED TUBULAR CAPACITORS

Type P 88

Toughest capacitors ever offered critical operators of radio-electronic equipment. Not just another plastic tubular. DURANITE capacitors are entirely new — in design, impregnation, processing, and casing. New technique provides glove-fitting contact and seal throughout. No danger of voids.

DURANITE provides a permanent, non-varying, rock-hard casing. Smooth clean surface. DURANITE does not dry out, does not develop cracks or fissures. Pigtail leads firmly imbedded, won't pull out, won't work loose. Pull tests no longer are a problem. Wire will break before it can be loosened.

DURANITE capacitors are really moisture-proof. They stand up at high temperatures. Operation from sub-zero to over 212°F. Exposure to temperatures of 250°F will not impair life or performance. Temperature coefficient of capacitance similar to wax and oil capacitors. The new AEROL-ENE impregnant eliminates necessity of stocking and using both wax and oil capacitors. One impregnant does the work of both. DURANITE capacitors show no deterioration in stock, may be stored in advance of actual use, with corresponding economy and convenience. Smaller dimensions than the usual paper tubulars.

HIGH-VOLTAGE TUBULAR PAPER CAPACITORS OIL-IMPREGNATED WAX-SEALED

Type 84

These Type 84 capacitors, rated from 2500 to 10,000 volts D.C. Working, are designed to meet the elevated peaks and transients encountered in television and other cathode-ray tube applications, and to reduce the effects of corona.

This series of high-voltage, oil-impregnated units is an extension of the wax-impregnated, lower-voltage Type 34 line described on Page 9, rated up to 1500 volts d.c. working.

Although these high-voltage units are similar in general appearance — with impregnated capacitor sections encased in tubular paper jackets and supplied with bimetal leads — they have an improved wax end-seal for longer life under the operating conditions to which they are subjected.

Type 84 is obtainable with a radial mounting band at no extra cost.

HIGH VOLTAGE HERMETICALLY SEALED OIL-FILLED TUBULARS

Type 89

Type 89 capacitors are immersion-proof, oil-impregnated, oil filled units in handy space-saving tubular form. They are ideal for use in vibrator applications, coupling and by-pass functions in transmitters, high-voltage amplifiers, in r.f. by-pass circuits, radar, television, sonar, broadcast transmitters, interference eliminators for motors and generators, and in test equipment.

The oil-impregnated paper section is enclosed in a corrosion-proof metal case filled with oil and hermetically sealed against oil leakage or moisture penetration.

For voltages above 3500 to 6000 volts inclusive DCW, special terminals are used to provide the necessary creepage distance without increasing the length.

High-Capacitance Low-Voltage Capacitors in Miniature Tubular Aluminum Cases

Type PRS*

These high-capacitance low-voltage units of the Type PRS miniature tubular aluminum-cased line are especially suitable in electric fence control and similar applications.

They are compact units, tightly sealed, and provided with a vent which operates to relieve excessive gas pressure. An external wax-impregnated cardboard insulating tube is supplied.

Type PRS is available with either etched or plain foil, although it is normally constructed with etched foil — Type PRS-EP. High-purity aluminum is used throughout the internal construction to avoid corrosion which may be caused by contacts between dissimilar metals.

Radial or taugible mounting bands for rigidly mounting the capacitor can be supplied.

AEROVOX

Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

UPRIGHT OR INVERTED MOUNTING CAPACITORS

TYPE E

These units are widely used in highest-quality radio, communications, electronic and similar types of apparatus. Type E capacitors are hermetically-sealed. Ring-type clamp provides rigid and convenient method of mounting unit inverted or upright, beneath, on, or through mounting surface. Available with single or multiple elements. Single unit has two terminals, dual unit has three terminals, and triple unit has four terminals. Cathode connections made through one terminal in cover.

INSULATED SCREW-MOUNTING CAPACITORS

TYPE G

These capacitors are highest quality hermetically-sealed aluminum can units, used in all quality electronic, radio and communications equipment. Constructed with threaded cover, provided with lock washer and hexagonal nut to provide simple means of mounting capacitor through hole in mounting surface. This capacitor may also be insulated from chassis by use of an insulating washer. Terminals are molded in cover. Single element units have two terminals; dual-element units have three terminals. Cathode connection is made through one terminal in the cover.

SCREW-MOUNTING WIRE-LEAD CAPACITORS

TYPE GL

These inverted mounting, aluminum can capacitors are made in single, double and triple section units with two separate color-coded leads 3 1/2" long brought out from each section. The threaded neck and palnut provide a simple means of mounting the unit through a hole in the mounting surface. *Suitable for replacement of wet electrolytics.

MIDGET Screw-Mounting WIRE-LEAD CAPACITORS

TYPE GLS

Colored polarity-indicating flexible leads. Inverted screw-mounting. Two 3 1/2-inch leads for each section. 1-inch diameter can and short length make for more compact assemblies, while retaining generous proportions for hard service. Otherwise, similar to Type GL.

525v Surge Pk.—450v D.C. Work.

Electrolytic Capacitors

IF IT'S MARKED AEROVOX IT'S A QUALITY CAPACITOR

DANDEES

Miniature Tubular Aluminum Can DRY ELECTROLYTICS

TYPE PRS

SINGLE-SECTION Two Leads

DUAL-ELEMENT Three Leads

Tightly sealed aluminum-can dry electrolytics for use where money and space-saving considerations are paramount. Smallest proportions consistent with full-rated capacity and voltage, operating under normal-duty conditions.

Excellent for crowded assemblies. DANDEES are favorites for use in mid-set, AC-DC sets, auto-radios, etc. Also many servicing jobs where low cost is important.

Electrically insulated with special waxed paper jacket. Ends spun over can rim, eliminating possibility of shorts if leads are bent close to unit. Generous length tinned wire leads. DANDEES are thoroughly aged, ready for immediate use. Each unit is thoroughly tested. Individually packed with guaranteed slip. Dual-element units have three leads (common negative).

TWIST-PRONG BASE CAPACITORS* TYPE AF

These capacitors are tightly sealed round aluminum can units. They are mounted by means of prongs which extend through the mounting surface and are twisted to hold the unit in place. These are high-quality units especially suitable in compact assemblies where space is limited. All connections, except the cathode, are made through terminals in the cover. The cathode is connected to the container. Base prongs slip into fibre or metal elliptic washer that is riveted or eyeletted on chassis, and are bent over. Fibre washer provides insulated can; metal elliptic washer, grounded can. Metal or fibre washer supplied at 5c each net. The terminal lugs slip through holes in washers for soldered connections.

Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

PLUG-IN ELECTROLYTIC CAPACITORS TYPE AEP

Quick change dry electrolytics. Facilitate testing and replacement in equipment where continuity of service is important. Install merely by plugging into standard octal socket. Unit can be inserted only the right way. Key of octal base fits octal socket. Ultra-compact due to use of etched foil for higher capacities in the small can sizes. Aluminum internal construction. Non-corrosive due to use of similar metals throughout. Fully vented for safety.

PAPER-WOUND REPLACEMENTS FOR ELECTROLYTICS

TYPE PWP

TYPE PWC

High-grade paper sections in standard inverted screw mounting aluminum can (PWC) or cardboard case (PWP) similar in appearance to electrolytics. Used as replacements for standard electrolytics indicated; applications subjected to high AC component or ripple particularly in first stage of filter circuit; or where excessive surges are encountered. No polarity to be observed. Actual capacity indicated in each case. Capacity is less than electrolytic being replaced but will be found adequate in most filter circuits since filtering capacity in electrolytics is more than generous. PWP has cardboard mounting flanges; PWC similar to the inverted dry electrolytic types.

800v. Surge Pk.—600v. D.C. Work.

TUBULAR CARDBOARD CONTAINER CAPACITORS

In wax-sealed cardboard tubes. PRS-A is multiple-element, common-cathode concentrically-wound, with insulated positive leads at one end, and common negative at other. PRS-B, separate-section dual units with separate positive and negative leads for each section. Both types supplied with riveted mounting straps.

AEROVOX

Mica Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

"POSTAGE-STAMP" MOLDED-IN-BAKELITE MICA CAPACITORS

Wide choice of designs, sizes, mountings, terminals offer the correct Aerovox unit for every application, as listed. Units built of selected mica and foil; molded bakelite casing impervious to mois-

ture, heat, mechanical damage. Micrometer test for mica thickness maintains capacity values for long life. Capacity values indicated on units.

Type 1467

Compact, size $\frac{3}{16}$ in. square, provided with wire leads. 1000 volts D.C. Test—500 volts D.C. Working.

PORCELAIN-CASED MICA CAPACITORS

Ideal for those higher-frequency applications. Encased and hermetically sealed in glazed porcelain case. Heavy-duty terminals. Power loss due to dielectric absorption reduced to a minimum. Units operate at full load without heating up. Dimensions: $3\frac{1}{2}$ " between mounting holes, 4 " overall by 3 " high.

HIGH-VOLTAGE MOLDED-IN-BAKELITE MICA CAPACITORS

Type 1450

1000v D.C. Test—600v D.C. Work. Intended for the more critical service of low-powered transmitting circuits, buffer stages, power amplifiers, and laboratory equipment, etc. Non-magnetic parts are used to reduce r.f. losses to minimum, and heavy terminals provide minimum r.f. and contact resistance. Intended for point-to-point wiring, being supported entirely by its soldered connections. $1\frac{1}{4}$ x $1\frac{1}{4}$, $\frac{3}{4}$ or $\frac{3}{8}$ " thick (see below).

Types 1650-54

Heaviest-duty molded in bakelite mica capacitors of the AEROVOX line. Provided with threaded holes taking the roundhead screw terminals. Also available with plain holes through which screws or rods may be slipped. Same price as 1650 series, but specify 1650A, etc. when latter is desired. $\frac{1}{2}$ " or $\frac{3}{4}$ " thick (see * below). Types 1650, 1651 and 1652 are supplied in brown bakelite. Types 1653L and 1654L are supplied only in low-loss (yellow) XM Bakelite. Standard tolerance $\pm 20\%$; for $\pm 10\%$ add 10% to list price; $\pm 5\%$ add 20%; $\pm 2\%$ add 75%.

AEROVOX

Mica Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

SILVERED MICA CAPACITORS

For most critical applications where precise capacity values must be attained and maintained, AEROVOX silvered mica units are generally available. Encased in red molded XM bakelite. Similar in external appearance to standard Dukelite molded mica units.

Unique construction. Only plus .0022 per degree F.—a remarkably low temperature coefficient. Excellent retrace characteristics. Practically no capacity drift with time. Exceptionally high "Q". Mechanically protected against physical damage and changes in electrical characteristics due to varying atmospheric conditions. Wax impregnated externally. Ideal for use in circuits where inductance and capacity product must remain constant under all operating conditions. Specifically designed for use in push-button tuning, oscillator padding circuits, fixed tuned circuits, and as capacitance standards, etc., where accuracy and stability are of prime importance.

Standard tolerance $\pm 5\%$. For $\pm 20\%$ deduct 10% from price. For $\pm 10\%$ deduct 5%. For $\pm 3\%$ add 10%. For $\pm 2\%$ add 15%. For $\pm 1\%$ add 25%.

Commercial Grade MICA TRANSMITTING CAPACITORS

- Extra-heavy-duty Capacitors for Commercial Communication Companies
- Broadcasters
- Builders of Quality Radio and Electronic Equipment
- Amateurs, Experimenters

With these capacitors Aerovox is contributing its share towards narrowing still more the small remaining gap between professional and amateur radio practices.

Due to the normally limited demand for these extra-heavy-duty mica capacitors, as well as the considerable number of capacitance and voltage ratings in which they are made, this line is made to special order. However, your Authorized Aerovox Jobber is now able to order these commercial-grade capacitors for you.

Consult your Aerovox Jobber for specifications and quotations.

AEROVOX

Interference Filters and Auto-Radio CONDENSERS

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

AEROVOX INTERFERENCE FILTER SELECTOR

TYPE ANL-37

Plugs between interfering device and outlet. Selector switch adjusted until noise is eliminated or minimized. Dial indicates which type filter to use. Handsome, sturdy metal cabinet. Compartment contains necessary test leads and attachment plugs and clips. Size 5 1/2 x 5 1/2 x 8 inches.

TYPE ANL-37
Dealers Net Price..... \$17.50

AEROVOX Type IN-23

For elimination of interference caused by neon lamps or fractional horsepower motors. Mounting bracket for attaching to neon fixture cone eliminator needed for each fixture or for attaching to frame of motor. Flexible leads for connecting across motors such as in hair-driers, fans, mixers, etc. 5-5 mfd. 1 x 2 1/2 in.

TYPE IN-23
List Price \$1.50 Net Price \$0.90

AEROVOX Type IN-27

Simple, inexpensive noise filter. Inserted between set and outlet when interference is slight. Also used with appliance causing low-intensity interference. Keeps troublesome noises out of house wiring and power line. Size 1 3/8 x 1 1/2 inches.

TYPE IN-27
List Price \$1.50 Net Price \$0.90

AEROVOX Type IN-28

Intended for cases where ground is considerable distance from point of application. Most efficient when mounted directly on interfering device by bracket. Size 1 3/8 x 2 inches.

TYPE IN-28
List Price \$1.00 Net Price \$1.20

AEROVOX Type IN-29

Provides additional filtering action over IN-27 and IN-28. Especially effective for local sources of interference of variable character but strong intensity. Very effective for electric razor and other vibrating devices. Plugs between device and line. Size 1 3/8 x 3 inches.

TYPE IN-29
List Price \$1.75 Net Price \$1.05

AEROVOX Type IN-30

Similar to IN-29 but with additional inductance. Handles more severe interference. Plugs between set and outlet, or preferably between noisy appliance and outlet. Size 1 3/8 x 3 inches.

TYPE IN-30
List Price \$2.50 Net Price \$1.50

AEROVOX Type IN-31

Plugs in between attachment cord and electric outlet, either of set or preferably at appliance. Additional inductance for better filtering. Works best mounted by bracket directly on interfering appliance. Size 1 3/8 x 3 inches.

TYPE IN-31
List Price \$3.00 Net Price \$1.80

AEROVOX Type IN-42

Designed for use in the more serious cases of radio interference from power lines and appliances. Provided with inductance as well as capacitance for thorough filtering action. Plugs into electric outlet. Radio set or interfering device plugs into receptacle of the filter. Recommended for use between interfering device and power line. Size 2 1/2" x 3 3/4". Provided with mounting ring. Rated at 6 amps. for 110-220v. A.C..

TYPE IN-42
List Price \$7.50 Net Price \$4.50

DRAWN-CASE OIL FILLED "HYVOL" CAPACITORS TYPE 30

For applications requiring a compact superior grade oil-impregnated, oil-filled capacitor. Non-inductive paper sections encased in a one-piece drawn metal case with soldered bottom plate for hermetic seal. Absolutely immersion-proof terminal assembly. Meets severe operating conditions encountered in aircraft, police, broadcast, p.a., and other types of communications equipment.

UNCASED PAPER CAPACITORS Type UC

Non-inductively wound high grade, ultra-compact, uncase sections, neatly shaped and wrapped in black varnished paper with ends sealed with pitch and provided with insulated wire leads, eight inches long. Designed for replacement use in filter block repair work.

TYPE UC200-200 V.D.C.W.

MIDGET TUBULAR METAL-CASED "HYVOL" CAPACITORS Type 38

These units are hermetically-sealed and are exceptionally compact. Originally designed as alternates for mica capacitors but have since become a standard item in the Aerovox oil-filled capacitor line. Not only used as replacements in existing equipment, but are especially suitable for newly-designed equipment particularly where allowable weight of the finished assembly and allotted space is at a minimum. Despite unusual ultra-small size for oil-impregnated, oil-filled capacitors, constructional and electrical characteristics meet many of the exacting conditions to which molded-in-bakelite mica capacitors are normally subjected. Type 38 units are normally supplied with case insulated, and are provided with outer insulating tube.

TUBULAR CAPACITORS OIL-IMPREGNATED OIL-FILLED Type 89

Immersion-proof, oil-impregnated, oil-filled units in handy, space-saving tubular form. Ideal for use in vibrator applications, coupling and by-pass functions in transmitters, high-voltage amplifiers, in r.f. by-pass circuits, interference eliminators for motors and generators, and in test equipment. Fully sealed against oil leakage or moisture penetration. Case is insulated, not connected to the capacitor section. Mounting strap and outer insulating tube are supplied.

COMPACT ENERGY-STORAGE CAPACITORS TYPE PX

For high-speed flash photography, capacitor discharge welding, flash signaling equipment, pulsing and other energy storage uses requiring extremely high currents during short discharge periods. Compact, minimum weight, solder lug terminals, term plate containers.

AEROVOX "HYVOL" VERTICAL-MOUNTING HIGH-VOLTAGE CAPACITORS

Type 14

Particularly applicable for use in high-voltage filter circuits such as cathode-ray tube power supplies, high-voltage by-pass circuits in transmitters and high-powered public address equipment. Type 14 units are made in the standard 1 3/8" diameter. Grounded can, with one-piece immersion-proof molded bakelite pillar insulator which provides maximum spacing between live terminal and can. Mounting ring furnished for upright or inverted mounting.

AEROVOX "HYVOL" OIL-IMPREGNATED OIL-FILLED CAPACITORS

In Round Aluminum Cans
—Inverted Mounting
Type 10

This is an improved design, replacing the former single terminal type. This new design is physically interchangeable with the old. Ideal for crowded assemblies; a logical choice in filter circuits of power supplies, high-gain high-fidelity amplifiers, and small transmitters. Hermetically-sealed. Has one-piece molded bakelite terminal assembly. Both terminal lugs are insulated from container.

AEROVOX "HYVOL" VERTICAL-MOUNTING HIGH-VOLTAGE CAPACITORS OIL-IMPREGNATED OIL-FILLED

Type 12

This is an immersion-proof capacitor designed to meet high-voltage operating requirements. Suitable for such high-voltage circuit applications as in television, cathode-ray tube power supplies, high-voltage rectifiers, or, as a high-voltage by-pass capacitor. Recommended where long leakage path between terminals is required. Barrier in bakelite top increases insulation and creepage path between terminals. For certain applications, the ceramic insulators may be removed if desired. Supplied with adjustable mounting ring for vertical mounting.

AEROVOX "HYVOL" OIL-IMPREGNATED OIL-FILLED CAPACITORS In Rectangular Metal Cans

Type 09

Type 09 (Basic)

Type 09MB (Mounting Bracket)

Type 09MS (Strap Mounting)

Hermetically-sealed in sturdy can, leakproof and seepage-proof. High tension pillar terminals fitted with locknuts and soldering lugs. Exceptionally compact dimensions for given capacity, working voltage—and safety factor due to use of "Hyvol." Intended for heavy-duty continuous service in transmitters,

amplifiers, etc. Type MB bracket is normally supplied as standard equipment, unless otherwise specified, on all units having base sizes other than 3 3/4" x 3 1/2" and 3 3/4" x 4 1/2". Type MS is normally supplied as standard with these latter base sizes.

Paper Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

HIGH-VOLTAGE TRANSMITTER TYPE D.C. CAPACITORS

Type 20

6,000v. D.C. Work. to 50,000v. D.C. Work.

These capacitors meet the exacting requirements of radio transmitter service and other applications requiring high-voltage, heavy-duty, transmitter-type oil capacitors. Available in ratings from 6000 volts to 50,000 volts D.C. working. These are single-section or parallel-section capacitors. Type 20 units are critically checked to close standards of physical and electrical perfection. Capacitor sections consist of multi-layered capacitor tissues and high-purity aluminum foil, uniformly and accurately wound under critically-controlled tension, then vacuum-impregnated with Aerovox Hyvol to insure stability of full-rated capacitance, even at zero temperatures. Welded steel containers finished in non-corrosive, dark grey lacquer. Heavy-duty porcelain insulator assembly is cork-gasketed and pressure sealed to prevent leakage of oil or entrance of moisture at the terminals. Single-section units rated at 30 KV or less are normally supplied with capacitor section insulated from ground. Additional information on Type 20 units rated at 37,500 volts and 50,000 volts, as well as voltage-doubler units rated at 25,000 volts output is available on application.

All Type 20 units are built to special order—not carried in stock. Submit full application information when ordering.

COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

Type 16T (Terminals on Top)

Compact, oil-filled, hermetically-sealed units for use where least space and minimum weight are essential. Corrosion-proof metal container. Special immersion-proof terminals designed for equipment subjected to severe atmospheric and climatic conditions. Suitable for by-pass and filter applications in receivers and low-power transmitters.

COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

Type 18B (Terminals on Bottom)

Compact, oil-filled, hermetically-sealed units. Type 18 is smaller in height and depth than Type 16. However, greater width makes Type 18 adaptable for applications where small-sized dual- and triple-section capacitors with three terminals are required. Otherwise, similar to Type 16 with respect to construction and application.

CUSTOM-BUILT PAPER CAPACITORS TO MEET YOUR SPECIAL NEEDS —

If your paper capacitor needs are most unusual, AEROVOX will work with you in designing and producing special types. With many basic types to draw upon—a wide choice of containers, terminals, mountings, sizes, etc.—we can quickly and economically produce out-of-the-ordinary capacitors to meet those extraordinary requirements. Address your inquiry to Aerovox Engineering Department, New Bedford, Mass.

AEROVOX

Vitreous-Enameled and Carbon RESISTORS

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR.

"SLIDEOHM" Wire-Wound Vitreous-Enameled ADJUSTABLE RESISTORS

Adjustable resistors combining adjustment to any resistance value within unit's range, with positive, permanent, non-fluctuating qualities of wire-wound resistor. Each Slideohm Resistor is provided with horizontal mounting brackets and one adjustable contact slider.

"PYROHM JUNIOR"

Wire-Wound Vitreous-Enameled FIXED RESISTORS

Types 931 and 933

Compact, genuine wire-wound units. Covered with vitreous-enamel. Highest quality materials used throughout. Correctly designed. Note these features:

1. Crack-proof refractory tubing for the support. Adequate heat dissipation.
2. Quality resistance wire precisely space wound under tension.

3. Copper terminal band clamped to tubing. Wire ends wrapped about raised ear and brazed to same.

4. Heavy vitreous-enamel coating for permanent seal against moisture, oxidation and mechanical damage.

5. Pre-tail of stiff wire 2 in. long soldered to terminal band for positive, non-breakable connection.

Type 931—10 Watts Size—Ins. 1/8 x 1 3/4

Ranges	List	Net

INSULATED MOLDED CARBON RESISTORS

Types 1097 and 1098

Small, noiseless, vibration-proof. Crack-proof molded casing around molded carbon resistance element. Tinned copper pig-tail leads 2 in. long. Resists humidity effects. Ideal for AVC circuits, high-gain amplifiers. RMA color-coded; stamped with resistance value. Precision tested. Standard tolerance 10%. These types may come thru for some time in slightly larger sizes until complete changeover is achieved.

AEROVOX

TEST INSTRUMENTS

AEROVOX CAPACITANCE AND RESISTANCE BRIDGE

AEROVOX MODEL 76 Resistance-Capacitance Bridge is the new post-war general utility instrument combining simplicity of operation, remarkable degree of accuracy, and modest price.

Extreme ruggedness makes it equally suitable out on the job, in the shop, or in the laboratory.

Sloping panel 10" x 6". Aluminum, etched and anodized. Steel cabinet, black crackle finish. All readings taken from main 1" dial. Same calibrated scale eliminates trouble and chances for errors in reading. Linear scale, also an exclusive feature, means no crowding at high end to make readings difficult and inaccurate. Both the resistance and the capacitance readings are covered by six overlapping ranges, as against two or three in usual service instruments, for maximum sensitivity and accuracy. Positive "magic eye" indicator.

Here is what Model 76 bridge does: (1) Measures capacitance from 100 muf. to 200 mfd. in six ranges. (2) Measures resistance from 10 ohms to 20 megohms in six ranges. (3) Measures power factor from 0 to 50%. (4) Provides D.C. polarizing potential for leakage measurements, from 0 to 600 V. D.C., continuously variable and calibrated in volts. (5) Checks leakage or insulation resistance.

Instrument is provided with shockproof, color-coded test leads fitted with banana plugs for panel jacks, and with clips. Instructions. Measures 10" x 7 3/4" x 8 1/4". Weight 8 lbs. 3 oz.

AEROVOX MOTOR-STARTING CAPACITOR SELECTOR

★ Determine the necessary capacitance to replace the worn-out motor-starting capacitor, at the mere flip of a switch or two! That's the idea of the Aerovox Motor-Starting Capacitor Selector. In the absence of label, nameplate or other identification means of the original equipment being serviced, this simple, inexpensive, handy instrument provides the immediate answer.

The Capacitor Selector, by throwing a series of toggle switches, provides a choice of capacitance ratings: 17 1/2, 35, 52 1/2, 65, 70, 82 1/2, 100, 117 1/2, 135 and 152 1/2 mfd. A voltmeter indicates the maintenance of safe starting voltage. The instrument is merely clipped to the motor in place of the defective capacitor. Capacitance readings are made from the total of open switches directly from the selector. The 0-150V AC voltmeter can be used independently.

Complete Kit, Model No. 87, comprising Capacitor Selector and two Emergency Capacitors. Dealer's, servicemen's net cost \$20.95
Capacitor Selector, Model No. 85 \$11.64
Emergency Capacitor, Model No. 86, each \$4.65

EMERGENCY CAPACITORS

★The RIGHT capacity value is determined by the Capacitor Selector in a jiffy. That's half the job.

The other half is to have that RIGHT capacity immediately available. And that's where the Aerovox Emergency Capacitors come in to round out this Aerovox "Jiffy Way" of handling motor-starting capacitor jobs.

The Aerovox Emergency Capacitors are truly universal units. Each provides any capacity value from 17 1/2 to 152 1/2 mfd., simply by cutting in one or more sections. The unit then clips on to the motor. The refrigerator gets going without delay. Later, at the serviceman's convenience, the usual replacement is installed.

Emergency Capacitor, Model No. 86, \$4.65 Net, each

AEROVOX L-C CHECKER

★ This exclusive Aerovox development has no counterpart, much less an equal. Basically, it determines the effectiveness of any capacitance or inductance while actually connected in its circuit. Testing efficiency is greatly increased. Components may be tested singly or in combinations whereby to determine resonant frequency and effectiveness of given circuits. Circuit or systems may be adjusted by this checking means for proper operating efficiency. Certainly a "must" instrument for the radio worker.

HERE'S A PARTIAL LISTING OF WHAT THE AEROVOX L-C CHECKER DOES:

It checks capacitance of capacitors at radio frequencies without removing them from circuit. • It checks alignment of r.f. circuits; also tracking of super-het. oscillator. • It checks alignment of broad or narrow band i.f. amplifiers. • It checks the tuning of wave traps and of image-rejection circuits; frequency ranges of receivers; frequency ranges of signal generators; calibration of wave meters. • Identifies harmonics of frequency standard in precision frequency calibration of radio equipment • It checks natural resonant points of r.f. chokes making sure they are beyond operating range. • It traces resonant absorption trouble in "all-wave" receiver circuits—locating dead spots, etc. • It locates resonant points in shorted windings (coupled coils) in multi-range oscillators, etc. • Locates resonant frequency of r.f. coupling chokes, making certain of placement to secure enough gain balance over tuning range of r.f. stage • It checks natural period of antennae and transmission lines in order to have resonant peaks at certain frequencies. • It checks quartz crystals for frequency, false frequency, operation at harmonics, and for activity. • Checks FM i.f. transformers. • Checks alignment of FM i.f. channels. • Checks leakage of paper capacitors. And it checks many other functions when used with auxiliary equipment. This checker operates from AC or from DC 120 volt source. It has a frequency range from 100 KC to 14 MC as follows:

Range: A — 75 — 225 KC | D — 1.5 — 5 MC
B — 200 — 600 KC | E — 4.5 — 14.5 MC
C — 550 — 1650 KC | F — 13 — 44 MC

Capacitance Range: .00025 mfd. — 1 mfd.

Inductance Range: 0 — 500 MH

Tube Complement: 6J5G, 25Z5, 6E5, VR105

Accuracy: Capacitance and Inductance \pm 10%

Frequency Ranges A, B, C: \pm 1%

Other ranges: \pm 2.5%

Dimensions: 10 1/2 x 7 1/2 x 5 1/2

This new model L-C Checker has provisions for determining the insulation resistance of capacitors in addition to the measurements described in bulletin 995A.

Weight: (shipping) 6 lbs.

Watch for the announcement of the new
model Aerovox L-C Checker!

Standard Universal Electrolytic Motor-Starting Replacement Capacitors

Many of these Standard Universal replacements are also Exact Duplicate replacements. They have the same AEROVOX catalog numbers shown in the special Motor-Starting Capacitor Catalog devoted to the AEROVOX complete line. This list is intended to simplify the selection of required capacitor when manufacturer's part number and AEROVOX catalog number are not known. Information given: capacity range, voltage rating, dimensions and type of container may help determine capacitor required in absence of original unit or name-plate data. This listing also ideal for use with the AEROVOX Capacitor Selector.

Standard Universal Replacement Oil Capacitors

The following Universal Replacement Oil Capacitors are arranged according to types of containers, and capacitance and voltage ratings. The listing is intended to simplify the selection of required capacitors when manufacturers' part numbers and Aerovox catalog numbers are not known. The required standard Aerovox capacitor may be determined from the information given below.

DRAWN CONTAINER—Type RS—4 3/8" Square (Terminals on Side)

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

P. S.

● This is a postscript. This page contains several new Aerovox products recently introduced and not as yet cataloged. These special-duty capacitors are of particular interest to advanced radio workers, builders of special equipment, experimenters and engineers.

Other new products are being announced from

time to time. Aerovox engineering is keeping abreast of the rapid advances of the radio-electronic art. Therefore, if you do not see what you need in these pages, tell us about your unusual needs. Aerovox either has a type already developed and in production, or will consider an entirely new type if warranted by the anticipated demand.

LOW-INDUCTANCE MICA CAPACITOR

AEROVOX SERIES 1699 is a molded-in-bakelite mica capacitor designed for exceptionally low loss operation at ultra high frequencies. External evidence of its efficiency is offered by the rounded hardware—round nuts, round washers and spherical lock nuts eliminating sharp edges and corners that cause corona losses. The use of fine threads for the terminal studs insures maximum contact and minimum i.f. resistance. Silver plating of all conducting members minimizes skin resistance. The body is of XM or yellow low loss bakelite. Internally, the mica stack is designed for a straight-line path for high frequencies.

This type is several times larger than the conventional molded-in-bakelite transmitting

micas. Body dimensions are 2 3/8" wide x 2 3/16" deep x 1 3/8" high, and 1 3/4" overall between rounded terminal tips.

Units are available in ratings up to 20,000 volts P.C. Test or 10,000 volt operating, and in capacitance values up to .001 mfd. at the highest voltage rating.

This type has been developed specifically for lower i.f. resistance and impedance, thereby providing increased KVA ratings for given size. Such units can be advantageously applied as blocking capacitors in transmission lines, as tank capacitors for high frequency oscillators, as by-pass capacitors for ultra high frequency energy, and as coupling or by-pass capacitors in induction heating circuits.

WATER-COOLED MICA CAPACITOR

AEROVOX SERIES 1780, water-cooled mica capacitor is available for extra heavy duty service, such as high-power transmitters and induction furnaces. The water-cooling feature boosts the KVA rating by a factor of five or more, or conversely, greatly reduces the bulk for given rating.

The higher KVA ratings are obtained in two ways: First, by a structural design such as critical arrangement and location of mica sections; critical selection of materials; specially-plated parts; large cross-section of conductors; attention to details. Second, by the use of a water-cooling system so designed as to provide maximum heat transfer from capacitor to cooling coils.

The mica stacks are mounted both. Cooling coils in the oil bath provide for the efficient transfer of heat. When this cooling system means may be judged from the fact that a unit handling 200 KVA for

air-cooled operations steps up to 1000 KVA with water-cooling.

The series-parallel mica stack is designed for uniform current distribution throughout. There is a large factor of safety. Silver-plated hardware minimizes skin resistance. Terminals are furnished with large radii of curvature to minimize and even eliminate corona. The ceramic insulator is shaped to hold gradients below corona limits.

Heavy non-ferrous welded metal case, hermetically sealed and grounded. Side-mounted nipples for connecting water-cooling hose. Sturdy mounting flanges. Provisions for making connections with high current-capacity conductors. Four-lead terminal for low-loss connections.

Available in ratings up to 25,000 V R.S. A.C. Test, and in capacitances up to .01 mfd.

ULTRA-HIGH-FREQUENCY CAPACITORS

AEROVOX SERIES 1860 and 1865 are engineered and especially recommended for use in ultra-high-frequency radio equipment such as television and FM transmitter, as well as other miscellaneous applications in the i.f. field. In such applications they are readily adaptable for use as fixed-tuning capacitors, by-pass, blocking, coupling, neutralizing and antenna-coupling capacitors.

Losses are extremely low, due to the highly refined sulphur dielectric. Corona losses are avoided by the unique construction design, the grounded case and the terminal on each type.

Series 1860 (not illustrated) is the smaller unit in an aluminum can, intended more for the radio amateur and experimenter, and for low-cost assemblies. It has a suitably plated brass terminal mounted on a mica insulating plate. Available in four types: .0001 mfd., 10,000 v.; .000025 mfd., 10,000 v.; .00005, 5000 v.; .00005, 10,000 v. Voltage is Peak Working Volts.

Series 1865 (illustrated) is the larger unit, in a cast aluminum case with ceramic insulator supporting the higher-voltage terminal. Available in capacitances from .00002 to .000125 mfd., at 10,000 v.

ATLAS HEAVY-DUTY IRON-OXIDE COATED NON-INDUCTIVE TRANSMITTING BLEEDER RESISTORS WITH CENTER TAP

4 or 8 Sections

Ruggedly built, accurately made and procurable in a practical non-inductive winding. Atlas high voltage bleeder resistors are designed to improve the performance of your transmitter by functioning quietly and effectively.

A most important feature found only in Atlas heavy duty bleeder resistors is the non-inductive winding. Each side of the center tap has two to four oppositely wound sections of equal resistance. Therefore should only one section be used, that section will be purely non-inductive as well.

Used for Grid Leaks as Well as for Bleeders by

SERIES "T" TAPPED CONTROLS

(Formerly Series TCP)

With the Original Ad-A-Switch Feature

★ There are many circuits in which the use of a tapped control affords special functional operation not possible or attainable with any other type of control. These standard units listed herewith permit replacement of tapped units with the assurance that the total overall resistance value as well as the taps satisfactorily substitute for the original.

SERIES "M" COMPOSITION-ELEMENT CONTROLS

★ Compactness—yet without sacrificing operating efficiency and long service life. Only 1 1/8" dia. by 1 1/2" deep (with switch, 7/8" deep).

Utilizes the exclusive Clarostat stabilized element, insuring the control's constancy in all weather and in all climates. Many years of painstaking research and experience are incorporated into the design of Clarostat Series "M" controls, assuring the user of the best results at all times.

The original Clarostat "Ad-A-Switch" feature makes it possible to adapt any of the Series "A" switches quickly to any of the "M" controls. Furthermore, for high-voltage television, oscillograph or other electronic circuits, the new Clarostat Series 55-110 High-Voltage Coupling Unit can be attached to all Clarostat controls (illustrated below) to assure safety at elevated voltages. The cost of this added feature is quite moderate. High-voltage couplers are installed at factory only. List price 3000v. \$1.25; 10000 v. \$1.85.

CLAROSTAT

SERIES 58 WIRE-WOUND CONTROLS

★ Sturdy and reliable in construction yet capable of use for delicate control work. Series 58 Controls are without equal. Noiseless in operation, these units are standard equipment in laboratories, fine instruments, electronic equipment, and especially in the control rooms of radio stations and networks.

The switch is located to operate at extreme counter-clockwise rotation of the shaft. Moving element is insulated from mounting bushing and shaft, and is tested at 500 volts A.C. There is no danger of accidental shock or short-circuit.

Rotary Switches

Compact, positive contact, bakelite molded Underwriter's approved. Rated 1 Amp. 250 volt., 3 Amp. 125 volt. The physical dimensions of the switch are as follows:

Diameter $1\frac{3}{32}$ ", body depth $\frac{9}{16}$ ", lug protrusion $\frac{1}{4}$ ", locking projection on a $\frac{1}{32}$ " radius, rotation for actuation 30 degrees.

All standard stock numbers have $\frac{3}{8}$ " bushing, $1\frac{1}{2}$ " length shaft, and one locking projection.

Cat. No.	Switch Description	List Price
S590	Single pole Single Throw	\$0.60
S591	Single Pole Bushing Lug	.60
S592	Double Pole Single Throw	.75
S593	Single Pole Double Throw	.75
S594	Single Pole Reversed Action	.60
S595	Four Wire Single Throw	.75

Individual Packing 10 (ten) per carton.

SERIES 43 MIDGET WIRE-WOUND CONTROLS

★ A space-saving control of the wire-wound type. Similar in mechanical details and dimensions to the composition-element Series M control (page R-6). Precision-wound alloy wire on bakelite strip. Rotor sweeps over inside face of winding. Special lubricant for minimized frictional drag and wear. Molded bakelite casing—high resistance to leakage. Protective metal cover (as shown in illustration). Only $1\frac{1}{8}$ " dia. Body Depth, $\frac{3}{16}$ " to $\frac{7}{8}$ " deep with switch, $\frac{3}{8}$ " bushing. Shaft $1\frac{1}{2}$ " long.

CLAROSTAT

SERIES "AM" AND "AT" UNIVERSAL PICK-A-SHAFT CONTROLS

Standard and Tapped for Every Service Need

★ These universal controls are built to the same exacting specifications as Series "M" and "T". However, instead of having the usual integral shaft, these controls include the Clarostat "Pick-A-Shaft" feature whereby a choice of shafts may be used with any of these controls. This ingenious feature eliminates the stocking of special-shaft units. Instead, the Series "AM" or Series "AT" (tapped unit) takes the particular type of shaft desired by merely inserting such a shaft and holding it permanently and firmly in place with a C-washer supplied for the purpose.

Choice of Pick-A-Shafts

★ A choice of four types of Pick-A-Shafts covers all requirements, as follows:

Cat. No.	Description	List Price
FS-3	Flattened shaft, 3" long	\$0.30
RS-3	Round shaft, 3" long	0.30
KSS-3	Knurled, split shaft, 3" long	0.30
DFS-1/2	Double Flattened Philips Type, 1/2" long	0.30
KSS-5	Knurled, split shaft, 5" long	0.30
RS-5	Round shaft, 5" long	0.30
FS-5	Flattened shaft, 5" long	0.30
RS-3/8" dia.	Round shaft, 3" long	0.30
SS-3/8" length	(Male) To take female fitting	0.30

One selected shaft furnished FREE with each Pick-A-Shaft control.

LIST PRICE \$1.85 (Without Switch)

Standard Packing—10 (ten) per carton.

For Power Switch, see Series "SW" listings on Page R-1.

Finish: Heavy-gauge metal case finished in frosted gray wrinkle, with etched black-and-aluminum front panel.

Dimensions: 13 in. long; 8 1/2 in. deep; 5 3/4 in. high. Weight, 11 lbs.

Suggested Uses: Resistance determination, Load Resistance, Meter Multiplier, Calibrating Meters, Providing any desired ohmage as a universal power resistor.

NET PRICE **\$90.00***

POWER RESISTOR DECADE BOX

★ A "Must" for Every Laboratory. Power resistance measurements under actual load conditions. Just imagine being able to obtain ANY VALUE OF RESISTANCE from 1 ohm to 999,999 ohms IN STEPS OF ONE OHM, and at a POWER RATING OF 225 WATTS using a maximum of 1000 volts DC (660 volts AC)!

Intended primarily for laboratory use and development engineering. Simplifies and expedites the selection of correct resistance values for given circuits and functions. These instruments are in daily use in laboratories, engineering offices, plants, maintenance and service departments, and in schools.

CLAROSTAT

CONSTANT IMPEDANCE CONTROLS

Series CIT-58 T-pads are connected as here shown.

★ To provide for the highest quality of sound reproduction, whether in broadcast transmission, sound recording, or public address systems in which a multiplicity of loudspeakers are employed it is essential that the proper type of self-compensating volume controls or attenuators be used in eliminating the distortion that would arise from the mismatching of impedances.

Therefore, volume controls or attenuators for this purpose must be of the so-called "constant-impedance" type. By the use of these "T" and "L" pads it is possible to keep the input or output impedance of associated equipment in a

circuit within the limits of a constant required value.

Safely rated at a maximum power dissipation of 2.5 watts, these "T" and "L" pads have a continuous range from 0.5 to 30 decibels attenuation in 90% of rotation, the last 10% affording infinite attenuation. Employable at either the source or the load in a circuit, these units are readily mounted by a one-hole mounting, and afford a wide range of use as mixers, faders, multiple-speaker controls, etc. Such controls can be used as individual volume controls for multiple speakers without affecting or changing the source impedance.

Series CIL-58 L-pads are connected as here shown.

CONSTANT IMPEDANCE OUTPUT ATTENUATORS

db steps are 3, 6, 9, 12, 15, 18, 21, 24 and 30. Absolutely noiseless and distortion.

★ Developed to meet the need for a constant-impedance attenuator capable of handling considerable power without measurable insertion loss, Series CIB attenuators provide linear attenuation with ample power-handling capacity. Compact. Safely dissipate 10 watts at any dial setting. Recommended as output level control for power

amplifiers or as an input attenuator for loudspeakers in P-A system. Unit furnished in black baked-enamel metal casing 2" in dia. by 2 3/4" long, equipped with dial plate and bar knob. Not available with power switch. One-hole mounting. 3/8" dia bushing. Shaft 1" long.

★ Clarostat developed and pioneered the tube-type resistor for voltage-reducing purposes, as used in AC-DC radios. Strictly non-flammable. Resistance element wound on mica form encased in metal tube and connected with base prongs.

Clarostat has selected the most popular values for so-called Universal numbers. Also the most popular types of Standard units.

Prefixes: K denotes 0.1 volt 150 ma. No. 49 pilot lamp; L, 0.3 volt 250 ma. No. 16; M, 0.3 volt 200 ma. No. 51. Numerals indicate total voltage drop across resistor tube.

Suffixes: A, no pilot lamp taps;

GLASOHMS* Glass-Insulated Flexible Resistors

★ This is a new development in resistors which has found instant acceptance in widespread applications.

Glasohms consist of a wire winding on a fibre-glass core, with a covering of braided fibre-glass. Each strand of glass is no thicker than usual

cotton thread and just as flexible, so that the complete units can be bent or twisted and even knotted without breakage or weakening. Clarostat is the only manufacturer of Glasohms. These units are ideal for resistance boxes, attenuators, voltage-dividers, multipliers, step-by-step rheostats, and for use in point-to-point wiring jobs. Handy, inexpensive and very durable, these units can withstand heavy overloads without damage. There is nothing in them to burn or char. Glasohms are also suitable for use as miniature heating elements serving in hair curlers, immersion heaters, soldering irons, electrically-heated ovens for crystal oscillators, etc., especially in longer lengths obtained on special orders.

*Registered trade-mark.

AUTOMATIC LINE VOLTAGE REGULATORS

★ To maintain constant line voltage and thus prevent burning out the tubes of a radio receiver or other tube-using device, this handy unit, operating effectively on 110-volt A.C. or D.C. by simply plugging into the usual socket or outlet, safeguards against line voltage surges or increases even up to 140 volts. At the normal 110-volt, the resistance of the unit is low and the voltage drop across it is negligible. However, as the line voltage increases the resistance of the unit increases proportionately, with a constant increase in voltage drop across it. This automatic voltage control or ballast action insures a steady, practically constant and always safe operating potential.

Type No.	Rating Watts	For Use With Sets Consuming	No. of Tubes Used
O	50	Up to 60 watts	4
A	100	60 to 100 watts	5, 6, 7
B	150	100 to 150 watts	8, 9, 10
C	200	150 to 200 watts	11, 12
D	250	200 to 250 watts	2 Type 50
E*	100	60 to 100 watts	

*Note: For use with 220-volt receivers

List Price \$1.25
Standard Packing — 10 (ten) per carton

CLAROSTAT

FAMOUS GREENOHMS — WIRE-WOUND FIXED POWER RESISTORS

★ The toughest power resistors made. Will dissipate heat without change in resistance value. Will withstand heavy overloads, humidity, high heat and severe heat shock (frequent on-and-off operation). Due to the exclusive Clarostat organic-cement coating, these resistors can be given

the toughest assignments and will come through with flying colors. Greenohms are found today in the finest electrical, electronic, radio and industrial assemblies — in equipment that must stand up — for functions where failure cannot be tolerated.

SERIES A-5-F—5-WATT

Dimensions: $\frac{1}{2}$ " dia. x 1" long.

The tiny member of the famous Clarostat Greenohm family. Available in standard resistance values from 1 ohm to 7500 ohms. (See exact values in listings for Series A-10-F up to 7500).

All ohmages — List Price \$0.40
Standard Packing — 10 (ten) per carton.

Series A-10-F—10-Watt

Dimensions: $\frac{3}{8}$ " dia. x 1 $\frac{3}{4}$ " long

CLAROSTAT

FAMOUS GREENOHMS - WIRE-WOUND ADJUSTABLE POWER RESISTORS

★ These power resistors feature the exclusive (Claro-stat inorganic cement coating and are similar in rugged construction to the fixed types on page 11, except for the bared section of the winding contacted at any ohmage by the adjustable slider band. This band is permanently locked in place at the required resistance value by simply tightening a screw with a screwdriver.

DIMENSIONS

★ Fixed and Adjustable Greenohms are of the same dimensions, wattage for wattage, as follows:

Rating	Length	Dia.
10-watt	1 3/4" x	5/16"
20-watt	2 " x	1/2"
25-watt	2 1/2" x	1/2"
40-watt	3 1/2" x	3/4"
50-watt	4 1/2" x	3/4"
80-watt	6 1/2" x	3/4"
100-watt	6 1/2" x	1 1/8"
160-watt	8 1/2" x	1 1/8"
200-watt	10 1/2" x	1 1/8"

"CARBOMITE" M-TYPE RESISTORS

(Actual size as illustrated)

M1-1 WATT

M2-2 WATT

M $\frac{1}{2}$ - $\frac{1}{2}$ WATT

- Meet JAN-R-11 Army-Navy Specification
- Low Noise Level; Low Voltage Coefficient
- Stamped With Value
- Extra Small Size
- High Insulation 1000 volt Breakdown

Continental's New "CARBOMITE" bakelite insulated carbon composition resistors are now the standard of Electronic components used in the Radio and Electronic Industries. They meet all specifications of the joint Army-Navy-Jan-R-11 including the toughest of all tests the "Salt water immersion cycling." The "CARBOMITE" M type resistor consists of a solid molded carbon core, outer molded bakelite insulated shell and molded in leads. These resistors being well insulated can be mounted side by side or against any metal surface without shorting or grounding. They are recommended where space limits and insulating quality require a rugged reliable and small resistor capable of withstanding severe service. The lead wires are straight and are tinned with a tin composition heavy enough to give instant soldering with the touch of the heated soldering iron tip. The resistor values are easily identified by the bright non-rubbing off color code bands and the white ink stamped numbers of the value on the body of the resistor.

The M2-2 watt, M1-1 watt and the M $\frac{1}{2}$ - $\frac{1}{2}$ watt are made in all the standard preferred RMA values as listed in the table below and are packed in quantities of 10 or 50 of each value to the box. Order in these quantities or multiples thereof.

Type	Size	List Price	Tolerance
M $\frac{1}{2}$	$\frac{3}{16}$ " x $\frac{3}{16}$ " Dia.	\$0.17	5%
M1	$\frac{1}{8}$ " x $\frac{1}{8}$ " Dia.	.23	10%
M2	$\frac{11}{16}$ " x $\frac{1}{8}$ " Dia.	.30	.25

- Heavy Duty Carbon
- Operate safely on overloads
- Non-inductive

The D-Type resistor with radial leads is made with solid molded carbon rods, copper sprayed on the ends to which are soldered No. 18 copper tinned leads. The soldered contact construction insures a noise-free and stable resistor. They are known as the heavy duty type units because of their size—having a larger radiating area they operate safely on overloads. A baked-on insulation is a protection against shorts to subpanel and wiring.

Type	Wattage	Size	List Price	Tolerance
D3	3 Watt	2" x $\frac{3}{8}$ "	\$0.50	$\pm 5\%$ $\pm 10\%$
D5	5 Watt	3" x $\frac{3}{8}$ "	.75	.50
D5ST2	5 Watt	3" x $\frac{3}{8}$ "	1.25	1.00

* D5ST2 units have heavy copper eyeleted and soldered strap terminals $\frac{3}{16}$ " wide with holes of 2 $\frac{1}{8}$ " spacing. The outer holes can be used with either 6-32 screw mounting or solder wire loops, while the inner holes are for 8-32 screw mounting. The outer section of the terminal can be cut off or bent to any angle desired.

"Nobleloy" X-Type Resistors

Trade Mark Reg.

- A new Continental Development!
- Not Wire Wound
- Not carbon!
- Stability of Wire Wound and Equivalent

After several years of research work CONTINENTAL engineers have developed a new resistor involving the metal film principle, having the accuracy of a wire wound unit. Absolutely no carbon whatever is used in the fabrication of these resistors. The metallic resistance film is formed on the surface of a low loss ceramic tube using a patented pyro-chemic process.

The metal film thus formed is hermetically sealed by a layer of vitreous enamel specially developed and patented by CONTINENTAL. The ceramic tube with its associated film is then spiraled to give a long resistance path and to accurately calibrate the unit to value.

Since the ceramic tubes are hollow they allow a larger surface for heat radiation, thus permitting the resistor to withstand overloads of 200% or better.

The copper-tinned lead terminals are soldered to extremely low resistance metal contact films which in turn are integral with the resistance film, thereby reducing contact resistance to a minimum. This type of construction produces a resistor unit having not only excellent resistance stability but also a negligible noise characteristic.

ELECTRICAL CHARACTERISTICS OF CONTINENTAL "NOBLELOY X" TYPE RESISTORS

Voltage

The recommended voltage rating of Continental "NOBLELOY X" type resistors is the maximum r.m.s. voltage which the resistor is expected to withstand in continuous use and is determined from the formula:

$$E = \sqrt{WR} \text{ Where } E = \text{rated D.C. or r.m.s. A.C. Voltage, } W = \text{watts rating, } R = \text{resistance.}$$

In no case shall the D.C. or r.m.s. A.C. voltage be greater than the maximum voltage shown in the table.

Load Characteristics

Irrespective of value, Continental "NOBLELOY X" type resistors will not change more than 5.0% when the load is increased from 2% of rated wattage to 200% of rated wattage, and on cooling to room temperature returns to the original value. This is practically the temperature coefficient effect.

Voltage Characteristics

Voltage coefficient does not exceed 1%.

Normal Load Life Characteristics (All Values)

The permanent change in resistance will not be more than 1.0% when the resistor is subjected to a normal life test of 1000 hours.

Overload Life Characteristics (All Values)

The permanent change in resistance will not be more than 2.0% when the resistor is subject to 200% of rated wattage for a period of 1000 hours.

Temperature Coefficient (All Values)

The temperature coefficient of resistance will not exceed 0.0005 (.05 per degree Centigrade) Negative.

Humidity Characteristics (All Values 1.0 Ohm to 15 Megohms)

Continental "NOBLELOY X" type resistors will not change more than 1.5% when conditioned in an atmosphere of 100% relative humidity at 40° C. ambient, for a period of 1000 hours.

Shelf Life

When stored under normal conditions, the resistance will not change more than 0.1% during a period of 2000 hours. This is a negligible change.

Noise Characteristic

When tested for noise according to standard R.M.A. procedure, the inherent noise level will not exceed 1/4 microvolt per volt, irrespective of resistance value. This level is equal to wire wounds.

Finish

All "X" type resistors possess a smooth, uniform coating of a special rubberized enamel capable of resisting deterioration up to and including 400° F.

Type	Wattage	Size	Values	Recommended		List Prices	
				Voltage	Max. Voltage	1%	5%
X-1/2	1/2 Watt	3/16" x 5/8"	1/2 ohm to 5 megohm	500	700	\$1.00	\$.85
X-1	1 Watt	3/8" x 1"	1 ohm to 10 megohm	700	1000	1.00	.85
X-2	2 Watt	3/8" x 1 1/4"	2 ohm to 20 megohm	1000	1500	1.20	1.05
X-5	5 Watt	1/2" x 2"	3 ohm to 30 megohm	1250	2000	1.40	1.25

No. 18 tinned copper leads 1 1/2" long.

FILTERNOYS

FILTERNOYS

Filternoys for Direct Mounting on Electrical Appliances such as Fluorescent Lights, Radios, Refrigerators, Small Motors and Appliances

All Rated 115-230 Volts AC or DC 5 amperes

	Plug-In Types		
P02GH	2 1/2" x 1 3/8"	P09GH	5" x 1 3/8"
	Wire-In Types		
G02GH	2 1/2" x 1 3/8"	G09GH	5" x 1 3/8"

Filternoys G02GH, G09GH, P02GH and P09GH are made very compact and have extremely high filtering efficiency for their size. The G09GH and P09GH types have two 70 turn chokes of No. 18 wire and two 0.45 Mfd condensers, one across each end of the chokes. A ground lead connected through a small condenser to the choke system, when properly grounded to the appliance, increases the efficiency.

Filternoys G02GH and P02GH are similarly designed, about one half the size with less turn chokes and lower capacity. These smaller Filternoys are used where space is limited and a lower cost is desired.

Type	Connections	Size	List Price
P02GH	Plug-In	2 1/2" x 1 3/8"	\$2.50
G02GH	Wire-In	2 1/2" x 1 3/8"	2.50
P09GH	Plug-In	5" x 1 3/8"	1.50
G09GH	Wire-In	5" x 1 3/8"	4.50

Oil Burner Suppressor

Filternoys Suppressor OB15, carbon element type, intended for use only with the high tension spark ignition of oil or gas burning heating systems. Must be connected in series with each line to the spark gap. Size of the suppressor 3 1/2" x 1 1/8" diameter. Universal connections at both ends for solderless contact.

OB15 List Price \$1.80

Most Popular and Universal Plug-in Types FOR ELECTRIC RAZORS and RADIOS

Filternoys F01DH

Filternoys F02GH

Size 2 5/8" x 1 3/8"
Without Ground Lead
Filternoys F01DH
List Price \$1.75

Size 2 5/8" x 1 3/8"
With Ground Lead
Filternoys F02GH
List Price \$2.00

Filternoys F01DH and F02GH have two chokes and two 0.1 microfarad condensers, one each across the ends of the chokes. The F02GH Filternoys has a .006 to .01 microfarad condenser in series with the ground lead and connected in the winding of one of the condensers across the chokes. This small capacity to ground allows a very small current to flow and even if the end of the ground wire were touched, no shocking would result. If the electric system is not grounded as required by most codes, the grounded Filternoys connection is necessary in order to get efficient radio interference elimination. The advice is "Use the Filternoys F02GH for very severe interference and make a good ground connection with the ground lead." F01DH and F02GH Filternoys are the best filters made for all plug-in appliances rated at 115 to 230 volts AC or DC and 5 amperes maximum current-carrying capacity.

Filternoys Diverter G01D - Dual capacitors in a grounded container for any size electric motor operating on 120 v. or less. Through making use of the field coils as chokes, this is a most effective method to silence a noisy a.c. or d.c. motor. Size 1 7/8" x 3/4" diameter. Shock Proof.
G01D List Price \$0.75

Filternoys Diverter G14T - Triple capacitors in a circuit which permits its use with all hand-operated motor driven devices without danger of shock. Particularly applicable to vacuum cleaners, flat irons, etc. Size 1 1/2" x 3/4". Flexible leads for direct connection. Shock Proof.
G14T List Price \$0.75

FILTERNOYS F18

Filternoys Diverter F18 is a compact 0.1 mfd capacitor in a conveniently small bakelite plug-in coupler for use across domestic power lines in which the neutral wire is grounded. The capacitor diverts interference from the high potential side of the power line to the grounded neutral side. Use on floor or table lamps, cigarette lighters, and the radio.

F18 List Price \$0.75

SUPPRESSORS

SUPPRESSORS

ALL SPARK PLUG SUPPRESSORS AND DISTRIBUTOR SUPPRESSORS EACH LIST PRICE \$0.30

CONTINENTAL SUPPRESSORS have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor—yet do not in any way affect the motor car ignition system.

They have mechanical strength to stand the most severe service. The resistance value of 10,000 ohms has been scientifically determined. Sparking across the terminals is eliminated by careful shaping of the electrodes and cases.

SPARK PLUG SUPPRESSORS

TYPE SPARK PLUG CONNECTION

- S-19 Vertical - Snaps on to spark plug.
- S-19-A Vertical - Rajah special terminal.
- S-19-D Vertical - Snaps on to spark plug same as S-19.
- S-27 Vertical - Screws on.
- S-27-D Vertical - Screws on.
- S-21 "U" bracket type.
- S-21-D "U" bracket type.
- S-23 Elbow - Flexible, snaps on.
- S-23-D Elbow - Flexible, snaps on.
- S-20-A Elbow - Snaps on spark plug.
- S-25 Elbow - Snaps on spark plug and also fits distributor. A universal suppressor.

CABLE CONNECTION

- Cable terminal snaps on.
- Cable terminal snaps on.
- Cable terminal snaps on and with a removable ferrule nut for spade terminal.
- Cable terminal snaps on.
- Cable terminal snaps on and with a removable ferrule nut for spade terminal.
- Cable terminal snaps on.
- Cable terminal snaps on and with a removable ferrule nut for spade terminal.
- Cable terminal snaps on.
- Cable screws into suppressor, making a moisture proof insulated joint.
- Cable screws into suppressor, making a moisture proof insulated joint.

DISTRIBUTOR SUPPRESSORS

FORD DISTRIBUTOR SUPPRESSOR

Brush

Sleeve

T-17: Brush and Sleeve Supplied Together
Distributor Type Brush Suppressor of the right resistance to suppress interference from the spark at the rotor.
 Universal Type: the brush can be inserted in the bakelite sleeve to fit models using the larger size brush.

GENERATOR CONDENSERS

GB05F

GB05

ALL SPARK PLUG AND DISTRIBUTOR SUPPRESSORS EACH LIST PRICE \$0.30

Type	Application	Capacity	Size	List Price
GB05	Generator and coil	.5 mfd.	2 1/2" x 3 1/2"	\$0.60
GB05F	Ford V-8 coil	.5 mfd.	2 1/2" x 3 1/2"	.75

TYPE DISTRIBUTOR CONNECTION

- C-11 Vertical - Snaps in distributor well.
- T-13 Vertical - Snaps in distributor well.
- T-20 Vertical - Snaps in distributor well and has a rubber skirt for moisture proof connection.
- T-24 Elbow - Snaps in distributor well.
- T-25 Elbow - Snaps in distributor well and fits both spark plug or distributor on Chevrolet and other makes.

CABLE CONNECTION

- The ignition cable can be cut at any point and the two ends screwed into the suppressor.
- Cable screws into suppressor, making a moisture proof insulated joint.
- Cable with terminal lisp snaps easily into suppressor.
- Cable with terminal lisp snaps easily into suppressor.
- Cable screws into suppressor.
- Cable screws into suppressor.

WIRT

WIRE WOUND FIXED RESISTORS

WIRE WOUND FIXED RESISTORS

To satisfy the most exacting needs of the Radio and Electronic Industries, Wirt Fixed Wire-wound Resistors are regularly furnished in PHENOCOTE protective coatings, developed and steadily improved over a period of many years in the Wirt Laboratories. The resistor wire is space wound on low loss ceramic tubes. The PHENOCOTE covering is an exclusive organic cement coating offering maximum protection to the resistance winding against the detrimental effects of moisture, humidity and electrolysis. Absolutely inert chemically, it will not effect the most delicate windings. It is particularly recommended for fine wire sizes and all applications where the maximum temperature of the unit will not exceed 300° F. These Resistors are universally used in the Radio, Electronic, Instrument, Public Address and Test Equipment fields.

TABLE OF SPECIFICATIONS OF FIXED RESISTORS

Cat. No.	Watts	Sizes Phys.	Resistance Limits (Ohms)	List Price (Ea.)	Accessories Terminals	Mounting Brackets	Mounting Centers	Packing

WIRT

WIRE WOUND ADJUSTABLE RESISTORS

WIRE WOUND ADJUSTABLE RESISTORS

WIRT Adjustable Resistors are space wound on low loss ceramic tubes to which the resistance wire is bonded, resulting in dependability and long life. Protection of the windings is afforded by the PHENOCOTE covering which is described fully on the preceeding page. One adjustable Slider Band, screw driver type, is furnished as standard. Bakelite knob type bands can be furnished on special order at slightly higher prices as shown below.

These bands are made with small contact buttons located on the inside of the band so that a number of taps may be made without shorting out excessive resistance.

TABLE OF SPECIFICATIONS OF ADJUSTABLE RESISTORS

Cat. No.	Watts	Sizes Phys.	Resistance Limits (Ohms)	List Price (Ea.)	Accessories			Mounting Centers	Packing
					Terminals	Brackets Mounting	Slider Bands		
AR 3	10	3/8"x1 3/4"	1 to 10000	\$0.98	Soldering Lugs	None	1		Individual

WIRT

MINIATURE RHEOSTATS and POTENTIOMETERS

MINIATURE RHEOSTATS AND POTENTIOMETERS

General: WIRT Metal Housed Rheostats and Potentiometers are rugged and compact affording high quality and dependability in operation. Due to size and construction these controls are moderately priced. Housings are made of tin-plated steel. Highest quality resistance wire is space wound on specially treated laminated phenolic strips. The Phosphor Bronze contact-arm is grounded to the metal casing and all terminals are silver plated. Switches cannot be furnished. These Rheostats and Potentiometers are adaptable to a wide variety of uses in the Radio Instrument, Electronic and Test Equipment fields. The types available are listed below:

Cat. No. WC801—Two Terminal Rheostat, 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance of $\pm 15\%$. Diameter is $1\frac{1}{8}$ " and thickness $\frac{1}{2}$ ". Shaft is Cadmium plated steel, grounded to housing. $5/32$ " from end of bushing and slotted for screw driver adjustment. Brass mounting bushings, $\frac{3}{8}$ "- $32 \times \frac{1}{4}$ " long are standard. Each control is equipped with one $9/16$ " hex mounting nut. **List Price**..... \$0.90 Each

Cat. No. WC802—Three Terminal Potentiometer, 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance $\pm 15\%$. All other specifications are the same as those listed under the WC801 control shown above. **List Price**..... \$1.25 Each

Cat. No. WC803—Sensitivity Control, 2 Watt rating. Resistance Range: 5 ohms to 12,000 ohms with linear winding and standard tolerance of $\pm 15\%$. Diameter is $1\frac{1}{8}$ " and thickness is $\frac{1}{2}$ ". A slot is provided in the Rotor mechanism allowing for screw driver adjustment from front only. **List Price**..... \$0.50 Each

Cat. No. WC804—Sensitivity Control. Identical with WC803 Control, except provided with an opening in back of control to permit screw driver adjustment from either front or back. **List Price**..... \$0.55 Each

Cat. No. WC807—Miniature Sensitivity Control, 1.5 Watt rating. Resistance Range: 5 ohms to 3000 ohms with uniform winding and standard tolerance of $\pm 15\%$. A slot is provided in the Rotor mechanism allowing for screw driver adjustment from either front or back. **List Price**..... \$0.50 Each

Cat. No. WCB507—Insulating Bushing for $\frac{3}{8}$ " Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. **List Price**..... \$0.095 Each

Cat. No. WCW508—Insulating Washer for $\frac{3}{8}$ " Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. **List Price**..... \$0.75 Each

VARIABLE VOLTAGE REGULATOR

Cat. No. 211 — Variable Voltage Regulator is wound with high quality alloy wire on an insulated metal core with the winding encased in Di-El-Itc. It can be used as a Radio Voltage Regulator where the Receiver draws not more than 65 watts. For industrial use it can be wound up to 600 ohms maximum and will dissipate up to 8 watts. It is adjustable to 5 positions.

List Price..... \$3.00 Each

Cat. No. 211-B—Regulator has air-cooling features which promote rapid heat dissipation. When used as a Radio Voltage Regulator the Receiver must not draw more than 150 watts. In industrial use for control of voltage and to regulate speed or heat it can be wound with a maximum resistance of 300 ohms and can dissipate up to 20 watts with maximum resistance setting. It is adjustable to 8 positions. **List**... \$5.00 Each

WCB 507

WCW 508

UTILITY CABINET

Cat. No. UC—Utility Cabinet is constructed of bass wood with corners dadoed and glued for strength; varnished and rubbed to give a beautiful finish. It has six drawers, each one having three removable partitions. The upper five drawers are 1" deep and the lower one is $1\frac{1}{2}$ " deep. Overall dimensions of the cabinet are 7" wide by $5\frac{5}{8}$ " deep by 9" high. Drawer guides, bottom and partitions are made of three ply laminated wood to prevent warping. Knobs are of wood and securely fastened. It is ideal for the storage of such parts as resistors, condensers, bolts, nuts, washers, small tools, etc. **List**..... \$8.00 Each

WIRT

SUPPRESSORS and SWITCHES

AUTO RADIO IGNITION SUPPRESSORS

Wirt Suppressors are made with moulded black bakelite housings. All metal parts are made of rugged unfinished brass. Terminals are securely fastened to casings and sealed with special moisture and heat resisting dielectric cement. Resistor pills are sprayed with zinc and then double impregnated with a special moisture-proofing compound. Resistance value of all standard types is 10000 ohms $\pm 20\%$; for FV-8 types 50000 ohms $\pm 20\%$. The distributed capacity is less than 1.5 mmf. Resistance values will not change more than 7% after being submerged in water for 100 hours. Test by sparking 1800 times per minute at 10,000 volts for 100 hours produces resistance change of not more than 3%. Wirt Suppressors are impervious to heat, oil, moisture and mild acids, and will not change in resistance more than 10% in 50,000 miles of operation.

Cat. No.	Type	List Price
S914	—Bracket—Standard	\$0.30 Each
S916	—Bracket—For FV-8	.30 Each
S915	—Distributor—Slip Fitting	.30 Each
S918	—FV-8 Brush—Years 1933-34-35	.30 Each
S922	—FV-8 Brush—Years 1936 to 1940	.30 Each
S921	—Universal Screw—Standard	.30 Each
S923	—Universal Screw—For FV-8	.30 Each
S924	—Snap-on Plug	.30 Each
S926	Cable—Screw Fitting	.30 Each

WIRT ROTARY AND SLIDE SWITCHES

Rotary Switches

General: Wirt Rotary Switches are of the quick break type, have positive contact, are rugged and neat in appearance. They are constructed with tin plated steel housings. The outside diameter of the switch is $1\frac{1}{8}$ " and thickness $\frac{1}{2}$ ". Standard bushings are of brass, $\frac{3}{8}$ " \times $\frac{3}{8}$ " long. Steel shafts are $\frac{5}{8}$ " from end of bushing, and made with a flat. Wiping contacts and terminals are silver plated. Terminals are securely fastened in place. Activating spring is positive in action. One $\frac{9}{16}$ " hex. nut is furnished. These switches are successfully used in conjunction with Radio, Phonograph, Signal and Instrument Circuits.

Cat. No.	Type	List Price
SW711	—SPST Rotary Switch, 3A-125V-AC-DC 2 Terminals	\$0.50 Each
SW711A	—SPDT Rotary Switch, 3A-125V-AC-DC 3 Terminals	.55 Each

Slide Switches

General: All Wirt Slide Switches are compact and sturdy. Housings are made of steel and are cadmium plated. The physical dimensions of the switches have been standardized, width $\frac{35}{64}$ ", length 1-13 $\frac{32}{64}$ " and mounting centers $1\frac{1}{8}$ ". Standard buttons are of black bakelite. All contacts and terminals are silver plated. Switches SW723 and SW725 are used in the Radio, Signal, Phonograph and Instrument industries.

Cat. No.	Type	List Price
SW723	—SPST Slide Switch, .75A-125V-AC-DC, 2 Terminals	\$0.31 Each
SW724	—SPDT Slide Switch, .75A-125V-AC-DC, 3 Terminals	.37 Each
SW725	—DPST Slide Switch, .50A-125V-AC-DC, 4 Terminals	.44 Each
SW726	—DPDT Slide Switch, .50A-125V-AC-DC, 6 Terminals	.55 Each

THE MALLORY 1485 CONTROL DEAL

gives you these advantages

- 15 popular controls—9 switches
- Services 90% of your replacement needs
- Fast-moving controls at your fingertips
- Simplified inventory control
- Handy assortment of AC "off-and-on" switches
- Compact and lightweight for your workbench or wall
- Extra space for flexible inventory
- Built-in rack for your Mallory Radio Service Encyclopedia
- Attractive design helps dress up your shop
- Sturdy cabinet built for long use

and you get the Cabinet FREE with purchase of controls and switches at your regular discount!

APPLICATION—The Mallory 1485 Control Deal Cabinet is designed for workbench accessibility to simplify and speed up your volume control replacement work. It is ideal for more accurate inventory control. The controls and switches included in the cabinet are fast movers; selected to give you maximum coverage with minimum stock.

GENERAL DESCRIPTION—The cabinet contains 15 individual compartments for packaged controls. Twelve of these compartments are clearly labeled with Mallory Catalog numbers. Three compartments are designed to be labeled by you to meet your own individual requirements. A roomy drawer holds 9 AC switches for the entire control selection. There is a special built-in rack attached to the back of the cabinet to hold your Mallory Radio Service Encyclopedia. A hinged lid on the front of the cabinet snaps shut to hold the controls firmly in place during service calls. The cabinet is constructed of 28-gauge sheet steel, attractively finished in white, and labeled in Mallory orange and blue.

USE IN INVENTORY CONTROL—Since each compartment is clearly labeled with a Mallory Catalog

number, you can see at a glance which controls you immediately need to re-order. This assures you of an adequate, up-to-date supply of popular replacement models. Your simplified system of inventory control guarantees that, in more than 9 out of 10 service jobs, you will have **on hand** the control you need. Use of the Mallory cabinet gives you an accurate check on the faster-moving items in your locality.

CONTENTS—(Complete descriptive information on each of the following controls may be found in this catalog.)

MALLORY MIDGET CARBON CONTROLS

MR Midget Control • Fixed Shaft

APPLICATION—For volume or tone control in audio circuits.

DESCRIPTION— $1\frac{1}{8}$ " carbon control, available in a wide range of resistances and tapers. Has an excellent safety factor in current-carrying capacity. Uses Mallory's special resistance element insuring a long, quiet life.

SHAFT DESCRIPTION—An accurately finished 3" channel shaft is permanently attached.

ACCESSORIES—One hex nut, one lock washer, and one shim is furnished with each control. An external adjustable resistor is furnished where required, as indicated below. AC switches are available as a special item. (See page 8).

PACKAGING—One control, plus accessories and complete instructions per display carton.

MK Midget Control • Fixed Knurled Shafts • No Taps

APPLICATION—For volume or tone control in audio circuits.

DESCRIPTION— $1\frac{1}{8}$ " carbon control using same element as type MR.

SHAFT DESCRIPTION—Furnished with a 3" accurately finished, permanently attached knurled shaft for use in replacing original controls of this shaft construction.

ACCESSORIES—One hex nut and one lock washer furnished with each control. AC switches available as a special item. (See page 8).

PACKAGING—One control, plus accessories and complete instructions per display carton.

MRT Midget Control • Fixed Shaft • Single Tapped

APPLICATION—For control of volume with tone compensation in audio circuits.

DESCRIPTION— $1\frac{1}{8}$ " carbon controls with a single tap. Available in a wide range of resistances. Taps are accurately located. Uses Mallory's special resistance element insuring quiet, long life and an excellent safety factor in current-carrying capacity.

SHAFT DESCRIPTION—A 3" accurately finished channel shaft is permanently attached.

ACCESSORIES—One hex nut, one lock washer and one shim furnished with each control. AC switches available as a special item. (See page 8).

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY MIDGET CARBON CONTROLS

SM Midget Single Controls • Fixed Shaft • Special Applications

APPLICATION—Special controls to be used as recommended in the Mallory Radio Service Encyclopedia.

DESCRIPTION— $1\frac{1}{8}$ " carbon controls for use as exact replacements, as recommended in the Mallory Radio Service Encyclopedia. Use is made of Mallory's special resistance element to insure satisfactory service in replacement.

SHAFT DESCRIPTION—A fixed shaft is provided. Each shaft varies according to the requirements of the control and its recommended application.

ACCESSORIES—One hex nut and one lock washer furnished with each control. AC switches available as a special item. (See page 8).

PACKAGING—One control, plus accessories and complete instructions per display carton.

SMD Midget Dual Controls • Fixed Shaft • Special Applications

APPLICATION—For special applications as recommended in Mallory Radio Service Encyclopedia.

DESCRIPTION— $1\frac{1}{8}$ " dual carbon controls made in a wide range of resistances and tapers and with taps for special applications. A fixed concentric shaft and switch is provided. They are designed to meet exact physical and electrical requirements for special applications, as recommended in Mallory Radio Service Encyclopedia.

SHAFT DESCRIPTION—Fixed concentric shafts, each of the proper length and contour to duplicate the original installation.

ACCESSORIES—One hex nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY MIDGET CARBON CONTROLS

UM Midget Controls • Plug-In Shaft • No Taps

APPLICATION—For volume or tone control in audio circuits.

DESCRIPTION—1½" carbon control, available in a wide range of resistances and tapers. Has an excellent safety factor in current-carrying capacity accomplished by the use of Mallory's special resistance element, which also insures a long, quiet life.

SHAFT DESCRIPTION—The control is provided with a socket which will take 30 different types of shafts insuring maximum flexibility of stock. One SS-1 4" channel shaft furnished with each UM control. (See page 7 for other universal and special plug-in shafts available.)

ACCESSORIES—One hex nut, one lock washer, one shim, one lock ring, and one SS-1 shaft furnished with each control. An external variable resistance is furnished where required, as indicated below. AC switches available as a special item. (See page 8.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

*Clutch type controls—no provision for attachable switch.

§External adjustable resistor included.

†Right hand switch action.

NO WOBBLE—this ring prevents it!

All Mallory plug-in shafts are now made with a small ring as shown in the drawing above. That's why they can't wobble or work loose—why they fit as securely as a fixed shaft.

TM Midget Control • Plug-In Shaft • Single Tapped

APPLICATION—For use as a volume control with tone compensation in audio circuits.

DESCRIPTION—1½" carbon controls with a single tap. Available in a wide range of resistances. Taps are accurately located. Uses Mallory's special resistance element insuring quiet, long life and an excellent safety factor in current-carrying capacity.

SHAFT DESCRIPTION—The control is provided with a socket which will take 30 different types of shafts insuring maximum flexibility of stock. One SS-1 4" channel shaft furnished with each TM control. (See page 7 for other universal and special plug-in shafts available.)

ACCESSORIES—One hex nut, one lock washer, one lock ring, one shim, and one SS-1 shaft furnished with each control. AC switches available as a special item. (See page 8.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY MIDGET CARBON CONTROLS • PLUG IN SHAFTS

Universal and Special Plug-In Shafts for Use with Types UM, TM, and DTM Controls

DTM Midget Controls • Plug-In Shaft • Double Tapped

APPLICATION—For use as a volume control with tone compensation in audio circuits.

DESCRIPTION— $1\frac{1}{8}$ " carbon controls with double taps. The basic resistance element of this control is the same as the element in MR controls. Taps are accurately spaced.

SHAFT DESCRIPTION—The control is provided with a socket which will take 30 different types of shafts insuring maximum flexibility of stock. One SS-1 4" channel shaft furnished with each DTM control. (See this page for other universal and special plug-in shafts available.)

ACCESSORIES—One hex nut, one lock washer, one lock ring, one SS-1 shaft, and one shim furnished with each control. AC switches available as a special item. (See page 8.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

SRP Standard Single Controls • Fixed Shaft • Special Applications

APPLICATION—For special applications, as recommended in Mallory Radio Service Encyclopedia.

DESCRIPTION—1½" carbon or wire-wound controls, as indicated, available in a variety of resistances and constructions to meet the special requirements necessary in replacement, as recommended in Mallory Radio Service Encyclopedia.

SHAFT DESCRIPTION—A special shaft is permanently attached. It is machined to the exact dimensions necessary to meet replacement requirements.

ACCESSORIES—One hex nut, and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY STANDARD CARBON AND WIREWOUND CONTROLS

DRP Standard Dual Controls • Special Applications

APPLICATION—For special applications, as recommended in Mallory's Radio Service Encyclopedia.

DESCRIPTION—1½" Standard Controls of wire-wound and or carbon construction available in a range of resistances and types as required by recommendations of Mallory Radio Service Encyclopedia. They are designed to provide exact physical and electrical characteristics of the original control.

ACCESSORIES—One hex nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

STANDARD Wire-Wound Controls • Fixed Shafts • No Taps

APPLICATION—Used as bias controls and voltage dividers in bridge circuits and test instruments.

DESCRIPTION—Rugged resistance strip and contactor assemblies are completely enclosed in a dust-proof case. Will carry 4 watts of power.

SHAFT DESCRIPTION—Furnished with a 3" fixed channel-type shaft.

ACCESSORIES—Mallory Dial Plate No. 396 is available for use with these controls. One hex nut, one lock washer, and one shim furnished with each control. An external variable resistor is furnished where required, as indicated below. Has adjustable stop plate for bias feature, as indicated below. AC switches available as a special item. (See page 11.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

Drawing Showing Dimensions of Standard Carbon Controls

Dimensions—Standard Wire-Wound Controls

NOTE: Controls having taper numbers 1, 2 and 7 are intended primarily for replacement in radio receivers. Be sure to check the taper curve and its effect (see chart at left) before ordering for other uses.

MALLORY STANDARD SWITCHES AND UNIVERSAL CONTROLS

TAPERS for Standard Controls

Explanation of Tapers

● Taper Number 1 is a modified logarithmic left hand taper in the carbon type of control and an approximation to this logarithmic taper in the wire-wound type. This taper should always be used in shunt circuits as in usual antenna and audio circuits, or where only the center and left hand terminals are used.

Taper Number 2 is a right hand logarithmic taper in the carbon and an approximation in the wire-wound type. Used in series circuits, as in cathode voltage controls, or where only the center and right hand terminals are used.

Taper Number 3 is a combination left and right hand taper. Has a limited use in circuits where the control must perform both as a shunt and as a series circuit control as in combination antenna shunt plus bias circuits. This is the most common use for such a taper.

Taper Number 4 is a linear taper. Strictly speaking it is not a "taper" although commonly referred to as such. A linear "taper" is used wherever a control should be such that voltage change is proportional to the degree of rotation.

Taper Number 4A is a modification of the regular linear taper Number 4.

Taper Number 7 is made only in the wire-wound type of control and is a form of left hand taper. This taper is desirable for the antenna shunt plus bias control, wherein greater attenuation is obtained by increasing the bias voltage. The slight left taper then suffices to gradually reduce the signal to zero volume by the shunting action in the antenna circuit.

UNIVERSAL Dual Controls

APPLICATION—See "General Use" column below.

DESCRIPTION—Consists of two 1 1/2" wire-wound or carbon controls driven by a single shaft.

SHAFT DESCRIPTION—Shaft and insert fit all type knobs.

ACCESSORIES—One hex nut and one lock washer furnished with each control. AC switches available as a special item. (See this page.)

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY VARIABLE RESISTORS AND POTENTIOMETERS

M Variable
Wire-Wound Resistors •
Stub Shafts

E Wire-Wound Potentiometers • Stub Shaft

APPLICATION—Used on bias controls and voltage dividers in bridge circuits and test instruments.

DESCRIPTION—Precision wire-wound potentiometers and rheostats with a 4-watt rating for use in instruments where reliability is paramount. Rugged construction. Rheostats feature “off” position (no connection) type of construction, saving the cost of a switch. Furnished with insulated contact arm. Potentiometers have three terminals. Rheostats have two terminals. Total rotation 294°; effective electrical rotation 279°.

APPLICATION—Suitable for precision instruments such as resistance bridges and where a control of medium currents or voltages is required.

DESCRIPTION—Supplied with grounded contact arm. 310 total rotation; 299 effective electrical rotation. Will dissipate 7 watts.

SHAFT DESCRIPTION—A short shaft with a milled screw-driver slot is provided for easy adjustment. Shafts will also take standard knobs.

SHAFT DESCRIPTION—A short shaft is provided with a slot for easy screw-driver adjustment. Shafts will take standard knobs.

ACCESSORIES—No. 395 Dial Plate is available for use with these controls. One hex nut and one lock washer furnished with each control.

ACCESSORIES—No. 399 Dial Plate is available for use with these controls. One hex nut and one lock washer is furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY VARIABLE RESISTORS • T & L PADS

B Carbon Type Variable Resistors

APPLICATION—For use in test and other instruments, and special applications.

DESCRIPTION—1½" heavy-duty carbon-type control with a nominal one-watt rating. Furnished in linear taper.

SHAFT DESCRIPTION—A short shaft is provided with a milled screw-driver slot for easy and quick adjustment. Shaft will also take standard knobs.

ACCESSORIES—One hex nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

C Wire-Wound Variable Resistors • Small Size

APPLICATION—For use in test and special instruments, bias control and bridge circuits, etc.

DESCRIPTION—1⅛" diameter small resistor that will dissipate 2 watts over the entire element for continuous operation. Available only in linear taper. Contact arm is grounded. Total rotation 284°; effective electrical rotation 266°.

SHAFT DESCRIPTION—A short shaft with a milled screw-driver slot is provided for quick and easy adjustment. Shaft will also take standard knobs.

ACCESSORIES—Dial Plate No. 393 is available for use with these controls. One hex nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

T AND L PADS ATTENUATORS

APPLICATION—For controlling the level of low impedance audio circuits and for volume control of microphones, talking picture amplifiers, and many varied sound amplifying and audio distribution systems.

DESCRIPTION—A high quality "T" and "L" pad that may be used with audio amplifiers having a peak audio rating of 15 watts. These attenuators have a continuous DC dissipation rating of 4 watts in any position.

SHAFT DESCRIPTION—Physical dimensions of shaft and bushing specifications are the same as for type M controls in dual and triple unit construction.

ACCESSORIES—No. 366 Bar Knob, No. 395 Dial Plate with matched rotation, one nut and one lock washer furnished with each control.

PACKAGING—One control, plus accessories and complete instructions per display carton.

MALLORY CONTROL HARDWARE

WRENCH For Volume Control Nuts

Cat. No.	Description
178	For all standard Volume Control Hexagon Nuts, 1/2-inch and 3/16-inch diameters.

EC · EB · UB Shaft Couplers and Bushings

EC240—Universal Combination Extension Shaft Coupling and Reducer:
Will couple two 1/4" shafts or one 1/4" shaft and one 3/16" shaft.

Universal Insulated Shaft Couplers:
Designed to connect fixed shaft controls to remote drive couplings popular in automotive radio equipment.

EC256—Slotted Insacup.
EC257—Square Insert Insacup (Motorola type).

EB247—Universal Extension Bushing:
Designed to screw on the present bushing of Mallory controls and switches, so that the body of the control or switch will be held 5/8" away from the mounting surface. For example, it is used with the correct Universal Control to service Philco Models 28, 29, 45 and 45C.

UB241—Universal Bushing and Nut:
Designed to accommodate 1/4" shaft wherever a panel bushing is desired. Includes one No. 232 nut.
Packed 10 in Envelope.

FS Universal Flexible Coupling Shafts

Cat. No.	Description
FS250	For Universal replacement of all flexible wire shafts, coupling to 1/8" solid shafts.
FS251	Shaft Coupling has 3/32" hole, 1/2" deep, with transverse pin, and is for use (with the correct Mallory control) as a replacement for Philco Models 805, 806, 808, 809 and PHD and PHXD, Studebaker AC266, Pierce-Arrow MT-3, Reo RT-3, etc.
FS252	Shaft Coupling has 3/32" hole, approximately 1/2" deep, and has 2 set screws opposite each other. It is used as a replacement for Philco Model D, Nash AC-989 (Code I22).
FS253	Shaft Coupling has 1/4" dia. hole, 1/2" deep, equipped with 2 screws at 90 degrees. This is to be used with the correct Mallory Control as a replacement for Chevrolet No. 364441.

THE MALLORY INDUCTUNER*

A continuously and infinitely variable inductance unit that supplies the need for a method of tuning the wide range of frequencies covered by the television-FM band. Provides unequalled simplicity, performance, and stability in service. For more complete information turn to Page 8, Mallory Special Components, of this catalog.

Inductuner*—Registered trade mark for Mallory variable inductance tuning devices. Manufactured and sold under one or more of the following Paul Ware and Mallory patents: 2,163,644, 2,163,645, 2,163,646, 2,163,647, 2,260,877, 2,377,789, 2,377,790. Other patents applied for.

MALLORY FIXED RESISTORS

DIMENSIONAL DRAWING OF ALL TYPES OF RESISTORS

Key to Resistor Dimensions

Type	Rtg Watts	A	B	C	D	E	F	G	H	I	J	K

GENERAL ELECTRIC

CONSTANT IMPEDANCE ATTENUATORS

These rugged controls provide linear attenuation with ample power handling capacity, and will safely dissipate 10 watts power at any setting.

By using a compensated ladder-type network, input and output impedances are practically constant throughout the entire range of the control.

Attenuation is linear up to 30 decibels in ten steps, beginning with absolute zero and progressing in 3 db steps up to 24 db, followed by infinity. Absolute zero insertion loss for the unit.

Construction features include a resistance element of high grade resistance wire wound on a fiber glass core and covered with a braided fiber glass insulation. Circuit elements are insulated from all metal parts to withstand 500 volts. The attenuator switch is the shorting type having 11 steps for selecting the desired attenuation value. "In between" positions have been eliminated with the use of a special detent action.

The unit is designed for single hole mounting by means of its 3/8" diameter bushing which extends 3/8" beyond the mounting surface.

L-PADS AND T-PADS

DESIGNED ESPECIALLY FOR CONTROL OF AUDIO SIGNAL LEVEL IN AMPLIFIERS AND EXTENSION LOUDSPEAKERS

Consisting basically of the G-E Series URC Wire Wound potentiometers, these T-Pads and L-Pads employ proper tapers and combinations to provide the necessary impedance and attenuation characteristics. T-Pads are used as variable attenuators in circuits where the line impedance to and from the control must not be appreciably disturbed with attenuation level changes. L-Pads are employed as attenuation controls when a constant impedance is desired at either the source or the load, but not both. L-Pads are also used as individual volume controls for multiple speakers without effecting the source impedance. Safely rated at a maximum power dissipation of 2.5 watts, these T-Pads and L-Pads have a continuous range from 0.5 to 30 decibels attenuation in 90° of rotation, the last 10% affording infinite attenuation.

G-E T-Pads and L-Pads are available in the following impedances:

TUBE TYPE RESISTORS

General Electric Tube Type Resistors were developed for voltage-reduction purposes and the supplying of needed voltages for pilot lamp operation in AC*DC receivers. They are noted for many new improvements. Similar in size and appearance to the 25Z6 or 25A6 metal tubes, these tube type resistors plug into a standard octal socket.

Exceedingly high leakage resistance between the resistance element and chassis permits use in the most sensitive circuits without the introduction of AC hum. To insure against overheating of other components beneath the chassis the G-E Tube-Type Resistor provides connections to the "hot" leads under the chassis and yet dissipates the heat above it. The resistance element is composed of a firmly supported high grade mica form on which a helical resistance winding is carefully located. This rugged design insures against shorts and makes the G-E Tube-Type Resistor strictly

non-inflammable. A maximum safe power dissipation of 20 watts exceeds the ordinary power reduction need. Terminal connections and leakage resistance of the G-E Tube-Type Resistor meet Underwriter's requirements.

For ease and simplification in the servicing of receivers using the tube-type resistor, G.E. has selected the most popular values for Universal numbers serving most replacement needs.

In connection with the above listing, the following nomenclature applies.

PREFIXES:
K—Denotes 6.3 volt 150 ma. No. 40 pilot lamp.
L—Denotes 6.3 volt 250 ma. No. 46 pilot lamp.
M—Denotes 6.3 volt 200 ma. No. 51 pilot lamp.
 The numeral indicates total voltage drop across plug-in resistor tube resistance unit.

SUFFIXES:
A—Denotes no pilot lamp taps.
B—Denotes 1 pilot lamp tap for 1 lamp.
C—Denotes 1 pilot lamp tap for 2 lamps.
D—Denotes 2 pilot lamp taps for 2 lamps.
E—Denotes 3 pilot lamp taps for 3 lamps.

F—Denotes 1 pilot lamp tap for 1 lamp.
G—Denotes 1 pilot lamp tap for 2 pilot lamps. (Tapped sections isolated from main reducing body.)
H—Denotes 2 pilot lamp taps for 2 pilot lamps. (Tapped sections isolated from main reducing body.)

• General Electric Power Wire-wound Resistors are composed of a winding of special alloy resistance wire, wound on a high-strength ceramic tube. The ends of the winding are welded to sturdy terminals of excellent electrical conductivity. The welded joint at the junction of the resistance element and the terminal insures maximum mechanical strength coupled with low and uniform contact resistance. The ceramic form and resistance winding are coated with vitreous enamel. This enamel coating is fired at high temperature bringing out its excellent mechanical, electrical and thermal characteristics. The terminals are carefully cleaned after firing of the resistor and coated with hot tin to permit easy soldering. This method of construction provides a unit that is inherently capable of long life under conditions of high ambient temperature and humidity. Power ratings of General Electric Resistors are conservative; a generous measure of safety factors has been incorporated in these units. G-E fixed power wire-wound Resistors are supplied in 10- and 20-watt sizes.

General Electric adjustable power wire-wound Resistors are similar to the fixed units with the exception of a narrow path along the side of the resistor which is left free of the vitreous enamel coating. This permits an adjustable contact to make connections at any point along the length of the resistance element. These adjustable resistors, as the name implies, may be adjusted to any value from zero to the maximum value of the unit. It also permits an adjustable tap for use in voltage divider circuits. Adjustable resistors are made in 10, 25, 50, and 100 watt ratings.

GENERAL ELECTRIC

COMPOSITION RESISTORS SMALL IN SIZE — GIANT IN STABILITY

Meeting the rigid B7 characteristics (most exacting requirements) of the Joint Army-Navy specification JAN-R-11, these resistors add that extra "plus" to the servicing of any electronic equipment.

The allowance of a generous safety factor, a combination of small size, sturdy construction, excellent stability, high resistance to humidity, and more than ample insulation, make these General Electric resistors first choice on any list. GE Composition Resistors

may be operated safely at full rating in ambient temperatures up to 70° C (158° F.) 350 volts RMS may be applied to the 1/2 watt unit, 500 volts RMS to the 1 watt unit and 1000 volts RMS to the 2 watt unit, provided the wattage is not exceeded.

Drawing with switch attached.

These sturdy, compact composition controls are exceptional for their sturdy and quiet operation qualities. Incorporating a newly improved composition element which provides extreme resistance to temperature and humidity changes insures noiseless operation throughout the life of the control. The resistance coating of the element is a special compound securely bonded to a phenolic ring. Double contact fingers are rounded to insure smooth action and at the same time provide positive control and minimum noise throughout the life of these controls. Resistance values of G-E Composition Controls has been held within ±20% of the nominal value.

POWER SWITCHES for the control are also available as listed. Power switches are Underwriters' approved and rated at 1 amp., 250 volts; 3 amps., 120 volt. SPST switches are mounted to operate at extreme counter clockwise rotation of shaft. Mechanical rotation for these controls with or without switch is 300°; electrical or effective rotation for controls with switch 265°. Linear taper on all controls.

ATTACHABLE POWER SWITCHES are available in the five types listed below.

GENERAL ELECTRIC

WIRE-WOUND CONTROLS

These controls are interchangeable mechanically with the G-E type URC Composition Controls, and can be ordered with or without the G-E SPST Power Switch.

The sturdy resistance element of copper nickel or nickel chromium alloy is precision wound on a textolite strip. The contractor sweeps the inside face of the winding, giving smooth positive action. To insure noise-free action, and to prolong the life of these controls, a special lubricant has been applied to the resistance element minimizing frictional drag. A moulded textolite case provides high resistance to leakage. Terminals are hot-tinned for ease of soldering, and so located that molten solder cannot flow to the inside of the casing, causing malfunctions. The center terminals and moving member are insulated from the mounting bushing and case and have been subjected to a 1000-volts a-c breakdown test. Maximum recommended operating voltage 300.

Mechanical rotation for these controls is 300° with or without switch; electrical rotation 280° without switch; 260° with switch. These controls are available in a variety of resistances from 1 ohm to 10,000 ohms, as listed. All total resistance values within ±10% of the specified value. G-E Wire-wound Controls are supplied with linear resistance tapers.

Ruggedness of design enables these controls to withstand extreme vibration and other mechanical abuse. Utilization of a high-grade textolite casing minimizes corrosion and electrolytic action when controls are operated on DC. These controls are available in 3 and 4 watt power ratings dependent upon resistance range, these ratings to apply only to maximum resistance.

POWER RHEOSTATS

Smooth action and close control, under conditions of high ambient temperature and humidity, are the results of the many new improvements incorporated in the design of these G-E Power Rheostats. These units provide an excellent variable resistor for applications involving dissipation of appreciable power. They are supplied with bakelite knobs.

Elements are carefully wound with a special alloy wire on a sturdy ceramic frame providing for excellent insulation and heat resistance. Winding form and mounting are fused together with vitreous enamel into one integral unit and fired at high temperature. Tempered steel contact arm gives uniform contact pressure at all times. Contact brush rides on a large flat surface thus assuring good contact with minimum wear on the wire. These construction features assure the user of G-E Power Rheostats long lasting service. These G-E Power Rheostats have been thoroughly tested for safety factors and performance against flash-overs or breakdowns from the live parts to bushing or shaft. The range of values supplied is in line with the accompanying rating chart.

List 25¢

TYPE BT INSULATED FILAMENT RESISTORS are completely insulated with bakelite and unexcelled for stability, low-noise level, low voltage coefficient and mechanical strength. Insulation breakdown of Type BT's, 1000 volts. Standard tolerance $\pm 10\%$. Special tolerance $\pm 5\%$ at slightly higher cost.

TYPE BW INSULATED WIRE WOUND RESISTORS are furnished with the same bakelite insulation as BT resistors. The wire resistance element is wound tightly around a special insulated core. Standard tolerance $\pm 10\%$. Special tolerance $\pm 5\%$ at slightly higher cost.

STANDARD RANGES

Standardization pays dividends! It can be an important profit factor for you, too.

The great majority of radio parts manufacturers were quick to see the advantages in standardization and adopted the RMA Preferred Ranges some years ago. IRC has pioneered standardization of resistors because close contact with the radio industry has convinced us that such standardization is not only desirable but absolutely essential to carry out the tremendous development and production program of the industry.

This IRC policy will help servicemen prepare for better, faster and more profitable business.

Type BT and BW Resistors, in 10% tolerance, are carried in stock in the RMA ranges listed below. Figures in heavy type are the standard RMA 10% tolerance values. Using 10% tolerance BT's and BW's, these 93 ranges give complete coverage of all values with the smallest resistor stock. Standardization of your stock on these values is recommended for economical, complete coverage, faster turnover . . . more profit for you!

However, the intermediate values listed below also are carried in the IRC stockroom, so that every RMA value is available to servicemen when desired.

JOBBERS' STOCK IN PREFERRED RMA RANGES

Subject to the minimum and maximum values for each of the various types of BT and BW Resistors.

INSULATED RESISTORS

Preferred for Performance

BASIC KIT

Designed to meet your day-to-day resistor requirements, the IRC Basic Kit provides a wide variety stock in carefully selected values. Assortments are so arranged that a shortage of stock in one range can usually be compensated for by using two other ranges in series or parallel. Additional adjustable bands are included for use in making up bleeder sections.

The Basic Kit is sturdily constructed of heavy-gauge steel, and beautifully finished in blue and yellow. Hung on your wall or set on your service bench, the Basic Kit saves countless trips for supplies and provides your shop with a neat, carefully selected general purpose resistor stock.

The IRC Basic Kit is factory-packed with the following wide-variety resistor stock:

- BTS —10 each—1,000, 2,200, 4,700, 10,000, 15,000, 22,000, 27,000, 47,000, 75,000 ohm; 0.1 meg, 0.22 meg, 0.47 meg, 1.0 meg, 2.2 meg, 10.0 meg, 5.0 meg.
- BTA —5 each—470, 1,000, 1,500, 2,200, 3,600, 4,700, 22,000, 36,000, 75,000 ohm.
10 each—10,000, 15,000, 47,000 ohm; 0.1 meg, 0.24 meg, 0.47 meg, 1 meg.
- BW- $\frac{1}{2}$ —10 each—100, 150, 220, 330, 470, 560 ohm.
- BT-2 —5 each—1,000, 2,200, 4,700, 10,000, 22,000, 47,000 ohm; 0.1 meg.
- BW-1 —5 each—47, 82, 100, 270 ohm.
- BW-2 —5 each—47, 82, 100, 270 ohm.
- AB —2 each—100, 250, 500, 750, 1,000, 1,500, 2,500, 5,000, 10,000 ohm.
2 each—15,000, 25,000 ohm.
- ABA —2 each—100, 250, 500, 1,000, 1,500, 2,500, 5,000, 10,000 ohm.
- EPA —1 each—1,000, 1,500, 2,500, 5,000 ohm.
1 each—10,000, 25,000 ohm.
- ESA —1 each—1,000, 1,500, 2,500, 5,000 ohm.
1 each—10,000, 25,000, 50,000 ohm,
6 "X-3" Bands.
- MW-2J —2 each—10, 20, 50, 100 ohm.
- M1034 —2 each.

All-Metal Cabinet Furnished at No Extra Cost
List Price: \$138.68

Serviceman's Special Assortment Available in Basic Kit

The Basic Kit is also available stocked with a special "Serviceman's Assortment." This assortment contains a complete stock of $\frac{1}{2}$, 1 and 10 watt resistors, plus a selection of controls, shafts and switches. The heavy-duty power wire-wound resistors are not furnished in this assortment—leaving space in the compartments and drawers for capacitors, lamp bulbs, solder, small tools and spare parts.

The "Serviceman's Assortment" is factory-packed with the following:

- 160—BTS resistors
- 115—BTA resistors
- 60—BW- $\frac{1}{2}$ resistors
- 20—BW-1 resistors
- 22—AB power resistors

RESIST-O-CABINET

**End Cigar Box Confusion—
Keep Your Resistors in Order!**

The sturdy, IRC Resist-O-Cabinet is specifically designed to hold resistors systematically and safely without the bending of leads. It puts an end to "cigar box confusion!" Its four "non-spill" drawers have seven ample-sized compartments in each which readily accommodate resistor sizes from $\frac{1}{2}$ to 10 watts.

Attractively finished in blue, yellow and silver. Ohm's Law formulas neatly and permanently lithographed on top of cabinet for handy reference. Cabinet measures 11" long, 5 $\frac{1}{2}$ " high and 5 $\frac{1}{2}$ " deep. Bases of Resist-O-Cabinets are arranged for stacking so that several cabinets may be used to increase stock capacity. This handy Resist-O-Cabinet is FREE with the purchase of any of the three well-balanced IRC resistor assortments listed. (Cabinet is not sold separately.)

ASSORTMENT No. 1—59 Resistors

Type BTS—One each 1,000, 4,700, 10,000, 27,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 meg.

Type BTA—One each 39,000, 68,000 ohms; 0.15, 0.22 megs. Two each 1,000, 1,500, 2,200, 2,700, 4,700, 15,000, 27,000 ohms; 1.0, 2.2 megs. Three each 10,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type AB 10 Watt—One each 1,000, 1,500, 2,500, 5,000 ohms. Two each 10,000 and 25,000 ohms.

Type ABA, 10 Watt Adjustable—One each 1,000, 2,500, 5,000, 10,000.

List price of Resistors, \$16.91
(Cabinet furnished at no extra charge)

ASSORTMENT No. 2—100 Resistors

Type BW- $\frac{1}{2}$ —Two each 47, 100, 270 ohms.

Type BTS—Two each 3,300, 6,800, 33,000, 68,000, 82,000 ohms; 0.22, 0.33 megs. Three each 470, 1,500, 15,000, 22,000, 39,000 ohms; 0.15, 1.0, 2.2 megs. Five each 2,200, 2,700, 27,000 ohms; 0.27 megs. Six each 1,000, 4,700, 10,000, 47,000 ohms; 0.1, 0.47 megs.

List price of Resistors, \$13.12
(Cabinet furnished at no extra charge)

ASSORTMENT No. 3—83 Resistors

Type BW-1—Two each 47, 100, 270 ohms.

TYPE BTA—Two each 470, 1,500, 2,700, 3,300, 6,800, 33,000, 39,000, 68,000, 82,000 ohms; 0.15, 0.22, 0.33, 1.0, 2.2 megs. Three each 15,000, 22,000, 27,000 ohms. Five each 1,000, 2,200, 4,700, 10,000, 47,000 ohms; 0.1, 0.27, 0.47 megs.

List price of Resistors, \$14.11
(Cabinet furnished at no extra charge)

VOLUME CONTROLS

Preferred for Performance

IRC VOLUME CONTROL CABINET

For the Modern Service Shop

This handy stock of IRC Type D Universal Controls, quickly attached switches and easily installed shafts is factory-packed in an attractive all-metal cabinet. Proved by IRC Service Records to be a selection of the most popular controls—you can actually service over 87% of all replacements right from this cabinet. Here is your answer to speedier, more efficient servicing—reduction of costly exact-duplicate inventories and modern appearance for your shop.

Cabinet measures 14½" long, 7¾" high and 4½" wide. It is handsomely finished in yellow, blue and silver and provides separate compartments for controls and three handy drawers for switches, special shafts and spare parts. Each compartment and drawer is individually marked for identification. The hinged front cover snaps securely shut. The cabinet is furnished at no extra charge when factory-packed with the IRC controls, switches and shafts listed on the left. It is not sold separately.

Check this fast-selling stock!

The IRC Volume Control Cabinet is factory-packed with the following 18 Type D All-Purpose Controls, switches and special shafts.

IRC Control Type No.	Resistance	Purpose	IRC Control Type No.	Resistance	Purpose
2 D13-133	500,000	A	1 D13-133X	500,000	F

- F—Tapped for Tone Compensation
- G—Friction Clutch Auto Radio Type
- H—Antenna Grid Bias of 2 Tubes

Switches: 5—No. 41 S.P.S.T.; 1—No. 42 D.P.S.T.
 Shafts: 1—Type B Auto Radio; 4—Type E knurled and slotted—with thin web

ORDER YOUR IRC VOLUME CONTROL CABINET TODAY

List Price: \$30.90

NEW IRC ALL-PURPOSE KIT

Here's how to sharpen the appearance of your shop without an additional outlay of cash! 9 "hot-number" IRC ½, 1 and 2 meg. controls are available pre-packed in the All-Purpose Kit with 4 switches and 4 special shafts. Every one a fast mover . . . and you pay only the standard net cost of the merchandise. At no extra cost you receive this attractive 12 compartment utility cabinet.

Buy your "hot-number" controls this way each week and accumulate a shelf of these neat cabinets—each pre-packed with the following IRC merchandise:

IRC Control Type No.	Resistance	Purpose
5 D13-133	500,000	A
1 D13-133X	500,000	B
1 D13-137	1.0	A
1 D13-137X	1.0	B
1 D13-139	2.0	A

SWITCHES

- 3 = 41 S.P.S.T.
- 1 = 42 D.P.S.T.

SHAFTS

- 1 Type "A" double-flatted tap-in shaft is included with each control—plus:
- 3 Type "E" with universal knurl for special type push-on knobs,
- 1 Type "H" with universal groove for many Decca, RCA, Sears-Roebuck and Westinghouse models.

Purpose: A—Tone or Audio Circuit control; B—Tapped for tone compensation.

Sturdy utility card-board cabinet measures 7¾"x7¾"x4½". It is attractively finished in yellow, blue and silver, and provides 4 drawers with 12 compartments. Ideal stocking arrangement for miscellaneous parts—hardware, knobs, capacitors, shafts and dial fittings.

Cabinet furnished at no extra cost.

THE IRC "CENTURY" LINE

114 IRC CONTROLS THAT SOLVE 90% OF YOUR REPLACEMENT PROBLEMS

For miscellaneous service needs, 71 all-purpose controls are available for use with the popular IRC tap-in shafts. An A shaft is included with each control and shafts B, E, F, G, H, J, K, L, M and N may be had at slight extra cost. Each D Control accommodates any of the eleven Tap-in Shaft types shown. Shaft flats may be located in any position. A few extra shafts greatly increase the utility of your D Control stock at a small investment. Of unusual convenience is the "Double-Flatted" A shaft, included with each D Control. Accommodates popular push-on knobs

requiring either $\frac{1}{8}$ " or $\frac{3}{16}$ " flats and all set-screw knobs without filing of shaft or use of inserts. Dimensions: $1\frac{1}{4}$ " x $\frac{1}{16}$ ".
 Single Control—Without switch List \$1.25
 Tapped Control—Without switch List 1.85
 Prices include Shaft A packed with each control

8 CLUTCH-TYPE DC CONTROLS

With Tap-in Shafts

Practical for auto radio use and many other applications. Controls have friction clutch drive-arm and are equipped with a special shaft for use where either a slotted or tongued type shaft is required. Instructions tell how to cut shaft for either application. Switches cannot be used with friction clutch controls. Size same as Type D.

8 STANDARD TAPERS

A—Used as potentiometer or rheostat in any circuit where uniform resistance change is required.

B—A semi-logarithmic curve used as tone control or audio circuit control.

C—A logarithmic curve. Used as audio circuit control or antenna shunt control.

D—Tapered at both ends to provide control of grid bias and antenna circuit.

Used where control of grid bias is of prime importance in controlling volume.

E—Used as a rheostat in cathode circuit to control grid bias.

F—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is essential in controlling volume. Generally used where the control changes the

grid bias of only one or two tubes. Must not be used with heavy currents.

G—A logarithmic curve with very gradual change in resistance from left terminal. Used as audio circuit control or antenna shunt control.

H—A tapped logarithmic curve used as audio level control for automatic bass compensation.

VOLUME CONTROLS

Preferred for Performance

TYPE W WIRE WOUND CONTROLS

A dependable wire wound control of uniform resistance change for power requirements up to 2 watts. Tight, uniform windings assure utmost accuracy. Spiral Spring Connector between rotor arm and center terminal eliminates noise. Diameter $1\frac{1}{4}$ " ; depth behind panel $\frac{3}{16}$ " ; shaft length $2\frac{15}{16}$ " from control face. Illustration shows cover removed, although covers are supplied with controls.

POWER RESISTORS

Preferred for Performance

"PREFERRED FOR PERFORMANCE"

Not only do these famous resistors excel electrically, but their "eli-mate-proofed" cement coating provides the most dependable protection yet devised for resistors for heavy duty work. Both fixed and adjustable types are available. Mounting Brackets are packed with all resistors from 25 watts and up. One Adjustable Band is furnished with each adjustable resistor. The new Type X Band (described below) is included as standard on units of 25 watts and above. Extra bands supplied at prices indicated.

RESISTORS

Preferred for Performance

PRECISION Wire Wound RESISTORS

IRC Precision Wire Wound Resistors are scientifically designed and constructed of highest quality materials to combine the utmost in accuracy with dependability. Winding forms are of a non-hygroscopic ceramic having high insulation qualities, high mechanical strength and low-coefficient of expansion. Because of the special sectional construction which permits the winding of adjacent sections in opposite directions, a noninductive winding is made possible. Minimum temperature coefficient of .002% per degree C. now available on all IRC Resistors at no extra cost.

These units are used by the leading instrument manufacturers for dependable precision meter multipliers and shunts, decade boxes and calibrated gain controls. 1% accuracy is standard. Closer tolerances available at slightly higher prices as follows: for 1/2% tolerance, add 10%; for 1/4% accuracy, add 15%; and for 1/10 of 1%, add 25% to list prices. Tolerances of 1/10 of 1% are measured to new International Ohm, and so indicated on label.

ALL-METAL RHEOSTATS

PR-25 (25 Watts)
1 1/2" diam. Depth
behind panel, 3/4"

PR-50 (50 Watts)
2 3/8" diam. Depth
behind panel, 1 3/8"

Operating temperatures are cut almost in half by the unique, all-metal aluminum construction of these new IRC Rheostats. They dissipate heat more rapidly—give ample safety factor. Ratings based on hottest spot temp. rise of only 140 degrees C. with max. load distributed over entire element. With full load applied to as little as 25% of element, rise is only 160 degrees C. Exclusive IRC Spiral Connector gives positive contact between rotor arm and center terminal.

Type NAB Parasitic Suppressors

IRC Type NAB Non-Inductive Wire Wound Resistors are designed for use, one in each grid of audio driver or power amplifier tubes when paralleled, to prevent parasitic oscillations. 10 watts.

Type NAB—50 ohms.
List \$1.20 each

Bleeder Resistor

Type M-1034—25,000 ohms, overall resistance, tapped at 7,500, 10,000, 12,500 and 15,000 ohms. 18 watts rating attached flat to chassis, 9 watts free air rating. Used as bleeder in any power supply up to 500 volts. Sealed in bakelite and insulated for 1,000 volts to ground. Bracket supplied.

M-1034—IRC Bleeder Resistor..... List \$1.25 each

Center Tap Insulated Wire Wounds

Completely enclosed in molded bakelite and capable of standing high temperatures. Due to high power rating, these resistors may be used in balancing circuits for radio receivers or transmitters. They will carry up to five watts if mounted on chassis, using the detachable mounting bracket and heat-dissipating metal strip; or two and one-half watts if mounted in open air. May be mounted anywhere without danger to units from heat or grounding. Dimensions: Length of molded unit 2". With bracket mounting centers 2 1/2". Six standard ranges: 10 ohms, 20 ohms, 50 ohms, 75 ohms, 100 ohms and 200 ohms.

Type MW-2J—Center Tap Resistors..... List 35c each

Type MC and MCB Suppressors

IRC Suppressors are designed for the elimination of ignition noise in automobile and motorboat radio installations—and oil burner interference in home receivers.

OHMITE RHEOSTATS

All-Porcelain — Vitreous-Enameled

The design and construction of these sturdy, compact Ohmite Rheostats insure permanently smooth, gradual, close control. The wire is wound over a porcelain core, bonded to porcelain base, and permanently locked in place by special Ohmite Vitreous Enamel. Nothing to smoke, char, shrink, or shift. Dissipates heat rapidly. Insulated shafts and bushings. Copper graphite contacts. Ratings are for "free air" use. Time-proved through long trouble-free service in countless installations the world over. Underwriters' Laboratories Listed.

DIRECTION INDICATOR POTENTIOMETER—MODEL RB-2

A compact, low cost unit which is used in a simple 6 volt potentiometer circuit as a transmitting element, to indicate, remotely the position of a rotary beam antenna, or other device. The indicating meter can be any ordinary 0-1 M.A., 0-1.5 M.A., or 0-2 M.A. direct current milliammeter (with marked scale). The potentiometer is 2-5/16" in diameter and extends 1 3/8" behind the mounting surface. Single hole mounted by means of a 3/8-32 threaded bushing. Complete 360° rotation.

Stock No. RB-2, Potentiometer

List Price\$8.13

For more complete information on OHMITE PRODUCTS, ask for Ohmite Stock Catalog.

OTHER OHMITE RHEOSTATS

Ohmite Rheostats are also available in Model G, 75 Watt; Model P, 225 Watt; Model R, 500 Watt; Model T, 750 Watt; and Model U, 1,000 Watt units, in many resistance values. Special Rheostats with tapered windings, etc., can be supplied; also Special Rheostats for Model Train Control. Cages and other accessories also available.

RHEOSTATS ♦ RESISTORS ♦ TAP SWITCHES

OHMITE DIVIDOHM RESISTORS

All-Porcelain
Vitreous-Enameled

OHMITE FIXED RESISTORS

You can adjust the resistance or secure odd resistance values quickly with these Dividohms; easily put on more taps where needed. Ideal voltage dividers. With one adjustable lug and with mounting brackets.

Extra-sturdy, wire-wound, all-porcelain resistors with the permanent protection of Ohmite Vitreous Enamel. Widely used for heavy duty applications to assure continuous trouble-free service. With mounting brackets.

 †Type 84-B 4 Pie—1 Watt Size 3/4" x 1/4"
 All others Type 842-A 2 Pie—1/2 Watt Size 3/8" x 3/8"

High quality, small size, wire-wound resistors ideal for voltage dropping, bias units, bleeders, etc. They're extra-sturdy, all-ceramic, vitreous enameled. They give time-proved protection against shock, vibration, heat and humidity. Their long record of continuous trouble-free service—their wide use in all climates of the world—prove their complete reliability and economy. All units can be conveniently mounted by means of their 1 1/2" tinned wire leads. The standard resistance tolerance is ±10%.

The all-welded construction of the 5 watt unit makes it possible to extend the resistance range to 10,000 ohms, an unusually high value for a vitreous enameled stock unit.

OHMITE "LITTLE DEVIL" RESISTORS INDIVIDUALLY MARKED

Ohmite "LITTLE DEVILS" are full 1/2 Watt, 1 Watt and 2 Watt Insulated Composition Resistors and can be used at their full wattage ratings at 70° C. (158° F.) ambient temperature. They meet requirements of specification JAN-R-11. All units are color coded. Each resistor is marked with the resistance value, wattage rating and the Ohmite trade-mark. "LITTLE DEVILS" are available from stock in 1/2 and 1 watt sizes with ±5% tolerance and 1/2, 1 and 2 watt sizes with ±10% tolerance. The standard RMA values, 10 ohms to 22 megohms can be furnished. In the 1 watt size, ±10% tolerance, values as low as 2.7 ohms are available from stock.

2 WATT MOLDED COMPOSITION POTENTIOMETER—TYPE AB

The Type AB Potentiometer is an exceptionally high quality unit designed especially for industrial, laboratory, radio service and other uses where reliability is particularly important. Because the resistor element is molded, the unit has an exceptionally large safety factor. The power rating of 2 watts is unusual for a unit of such small size. The unit has a very low noise level and low voltage coefficient. It will pass the Army-Navy 200 hour salt spray test, specification AN-QQ-S-91. The unit is 1 1/16" diameter and extends 9/16" behind the panel. The standard shaft length is 2" including the 3/8" long mounting bushing. A SPST switch, to be attached to the back of the control, can be supplied extra.

OHMITE R.F. PLATE CHOKES

The new series of seven Ohmite single layer wound solenoid radio frequency plate chokes covers the entire frequency range of 3 to 520 megacycles. The new chokes replace the former series of chokes, Z-0, Z-1, Z-2, and Z-3 with units that accomplish

the same results but are much smaller in physical size with one exception, the new Z-7 choke, which is identical to the former Z-3, the number only having been changed.

The four highest frequency chokes are wound on low power factor plastic cores while the other three units are wound on steatite tubes. Windings are insulated and protected by a moisture-proof coating. The single layer winding is designed to avoid adverse harmonic effects within the recommended operating range and also prevents breakdown from high r.f. potentials.

Stock Number	Operating Range Megacycles	Micro-henries	Core Dimension	List Price
Z-7	3 to 20 Mc.	84.0	6" x 9/16"	\$1.56
Z-14	7 to 35 Mc.	14.0	2" x 1 1/2"	.68
Z-28	20 to 60 Mc.	21.0	1 3/4" x 3/8"	.44
Z-50	35 to 110 Mc.	7.0	1 3/4" x 3/8"	.33
Z-144	80 to 200 Mc.	1.8	3/4" x 3/8"	.33
Z-235	160 to 350 Mc.	0.84	3/4" x 3/8"	.33
Z-460	320 to 520 Mc.	0.20	1 1/2" x 5/8"	.33

Non-magnetic Brackets Furnished with Z-7. All chokes 1000 ma. rating except Z-14 and Z-28. These are rated at 600 ma.

OHMITE POWER LINE CHOKES

Prevents high-frequency currents of radio transmitters, diathermy and therapeutic equipment from going out over the power lines and interfering with nearby radio receiving sets. Used as a filter in connection with two grounding condensers of 0.1 microfarad capacity each. The Z-20 Choke is also used at radio receivers to keep out interference. All chokes consist of two single-layer windings on a single ceramic core—insulated and protected by moisture-proof coating. Recommended for use in suppressing radio (not audio) frequency interference.

Stock No.	Micro-henries	Current Rating	Total D.C. Resistance Ohms	Length	Tube Dia.	List Price

SHALLCROSS MANUFACTURING CO.

COLLINGDALE, PENNSYLVANIA

SHALLCROSS AUDIO ATTENUATORS

**These Shallcross Features Mean
BETTER PERFORMANCE — BIGGER VALUE!**

- ✓ Off position attenuation well in excess of 100 db.
- ✓ 25% to 50% fewer soldered joints.
- ✓ Noise level ratings that are factual. (130 db or more below zero level).
- ✓ Non-inductive Shallcross precision resistors used throughout assure flat attenuation to and beyond 30 kc.
- ✓ Types and sizes engineered for all needs. Attenuation accuracies of 1%; Resistor accuracies of 0.1% on special order.

Shallcross Audio Attenuators are available in either variable or fixed units, the former often being referred to as a "control" and the latter, as a "pad".

The variable attenuator or control consists of a rotary switching device so designed that the element or elements in a resistance network can be simultaneously varied in steps to provide known steps of attenuation in decibels. These controls are as small as is consistent with good design and are provided with removable shields for mechanical inspection and servicing.

Although an attenuation network usually has four terminals, it is common practice to use only three, the design being such that there exists no difference in potential between the input and output ground terminals.

Controls are available with as few as 5 steps or as many as 52 steps with an attenuation as small as 0.1 db per step. The total attenuation for a single control does not exceed about 125 db since such high attenuation approaches the noise level of the switching mechanism.

The "pad" or "fixed pad" consists of a resistance network of wirewound or composition resistors in as small a shielding container as is practical, with three terminals for input, output, and ground, the latter being designated in most cases as "C".

Most attenuators are designed for 1:1, or 1:2 impedance ratio use but special controls and fixed pads are available for any impedance ratio. A variation of the usual control is the multi-impedance matching attenuator which is designed to match an input impedance to any of several output impedances depending upon the control setting, with either minimum loss or constant 20 db loss. Other special units available include zero insertion loss ladder circuits, cueing attenuators, and dual turntable faders.

**Quiet, Outstandingly
Dependable for
exacting uses**

Specifications and prices are given below for a few of the most popular variable attenuators. The complete story of Shallcross attenuators may be found in Shallcross Interim Attenuator Catalog #3, copies of which are available on request.

IMPEDANCE: 150, 500, 250/500, 600 ohms, except potentiometers, which are 100,000 and 250,000 ohms.

RESISTORS: All non-inductively wirewound. $\pm 5\%$ tolerance except types preceded with "C" which are composition selected to $\pm 5\%$.

ATTENUATION: Increases for counter-clockwise rotation of shaft (knob end).

FREQUENCY RESPONSE: Flat over entire audio range.

SWITCH MECHANISM: Multi-leaf wiper arms collector rings and contacts available in tarnish resistant silver alloy or brass. Noise level -130 db.

DETENT: Indexing mechanism available on any unit for \$0.50 list. Back of panel depth is then increased 5/16".

KNOBS AND DIALS: \$0.80 list each additional.

For BX Process up to 101,000 Ohms—add	.40	.40	.15	.25

SPECIAL TOLERANCE
 Resistors to closer tolerances can be supplied at higher prices. Add to list prices as follows:
 ± 1/2%, add 5% ± 1/10%, add 25%
 ± 1/4%, add 10% ± .05%, add 50%
 ± 2-10%, add 15%

Prices shown are for Manganin Wire used in resistances to 1,000 ohms and for Nickel-Chromium-Iron Wire used in resistances above 1,000 ohms.

TYPES 183 AND 193 - ±1% IN COMMON VALUES—IN STOCK

In addition to the popular standard types listed here, Shallcross Akra-Ohm Resistors are made in a complete line of standard and special designs for precise electronic equipment demanding great stability and long life even under difficult conditions of temperature and humidity.

Shallcross achievements include the development of really practical hermetically-sealed

units; BX processed resistors "tropicalized" against moisture and fungus; the use of spun glass insulated wire for applications where considerable power must be dissipated; bifilar wound resistors, 1000 ohms or less, for exacting instrument use; heavy-duty surge resistors; accurate heavy-duty power resistors, and various others. Write for the Shallcross "Engineering Data" wall and file Chart.

ACCURATE FIXED WIRE-WOUND TYPES (JAN R93) PRICES ON REQUEST.

Shallcross Type	** JAN Style	Wattage	* Maximum Ohms	Std. Terminal	Mounting	Dimensions Length—Diam.
100	RB21	1	750,000	#8 screw	5 amp. fuse clip	2 1/16" x 9/16"
110	RB22	2	2 Meg.	#8 screw	5 amp. fuse clip	2 7/8" x 3/8"
116	RB14	1	2 Meg.	Solder lugs	#6 screw	2 5/8" x 3/8"
140	RB41	0.5	350,000	Solder lugs	#6 screw	1 1/2" x 11/16"
160	RB42	1	500,000	Solder lugs	#6 screw	1 9/16" x 11/16"
183	RB11	0.5	300,000	Solder lugs	#6 screw	5/8" x 1 1/2"
193	RB12	1	400,000	Solder lugs	#6 screw	1" x 1 1/2"
196	RB13	1	1 Meg.	Solder lugs	#6 screw	1 1/2" x 3/4"
Δ1196	RB13	1	1 Meg.	Solder lugs	#6 screw	1 1/2" x 7/8"

* Based on use of .0014" diameter nickel chromium wire. Smaller wire sizes will greatly increase maximum allowable resistance on any form.
 ** JAN style refers to Joint Army-Navy Specification R93. Price depends on wire size and specification.
 Δ Hermetically sealed. Other sizes available.

SHALLCROSS DECADE RESISTANCE BOXES

The large assortment and wide range of resistance available makes the Shallcross line of Resistance Boxes unique in the instrument

field. They are used extensively as laboratory standards, AC and DC Bridge and ratio arms, voltage dividers, etc.

Accuracy adjustment of Resistors as follows:
0.1 ohm..... 1%
1 ohm..... 0.25%
all others..... 0.1%

UNMOUNTED DECADE RESISTANCES

In response to a demand from engineers, manufacturers and physicists who design and construct their own electrical measuring instruments, we have made the Shallcross Unmounted Decade Resistances available. They are of the same construction as those used in the popular Shallcross Resistance Decades described above and consist of ten Shallcross Resistors mounted on a ceramic instrument switch.

SPECIFICATIONS

Type No.	Total Resistance Ohms	Unit Resistance Ohms	Switch No.	Accuracy	Price
435	1.0	1	536	1.0%	\$9.00
436	10	1.0	531	0.25%	9.00
437	100	10	531	0.1	9.00
438	1,000	100	531	0.1	9.00

441	1 Meg.	100,000	531	0.1	22.50
442	10 Meg.	1 Meg.	531	0.1	45.00

Mounting: Single 3/8" Hole Mounting—Panels Up to 3/16" Thick. Any of the above may be obtained with aluminum dust cover and shield at \$1.50 additional cost.

SHALLCROSS AKRA-OHM PRECISION RESISTORS

for "Miniaturization" applications

UNUSUAL ACCURACY IN SMALL SPACE

These new Shallcross Okra-Ohm Wire-Wound Precision Resistors have been designed to meet the needs of modern, miniature equipment. Standard tolerance is 1%. Closer tolerances can be furnished on special order.

The units offer unusually high and accurate resistance values in small space and are light enough to be suspended by their own tinned copper leads, or may be secured with mounting screw.

Type	Sections	Size	Watts	Maximum Resistance per section Ohms	Minimum Resistance per section Ohms
136	1	13/32" x 1/4"	0.25	150,000	1.
137	2	45/64" x 3/8"	0.25	150,000	1.
133	3	15/32" x 3/8"	0.25	550,000	1.
134	4	1 1/2" x 3/8"	0.25	375,000	1.

Prices on application.

SHALLCROSS ROTARY SELECTOR SWITCHES

Like other Shallcross instrument components, these Rotary Selector Switches are designed to cover a very wide field of application in both shorting and non-shorting types, and can be modified to control a variety of circuits. Details on any type for practically any application on request. Suffixes B and S denote Brass and Silver contacts and contact arms.

SHALLCROSS D-C BRIDGES

**No. 638-2
KELVIN
WHEATSTONE
BRIDGE**

Resistance range 0.0001 ohm to 11.11 megohms

SPECIFICATIONS

ACCURACY—0.3% between 1.0 ohm and 11.11 megohms. Below 0.1 ohm, 3%.
GALVANOMETER—Built-in—sensitivity 0.25 micro-ampere per millimeter division.
RHEOSTAT ARM—Four decades—1.0 ohm steps in Wheatstone and 1.0 micro-ohm steps in Kelvin ranges.
RESISTANCE BOX—Binding posts allow using rheostat as Resistance Box.
SEPARATE KEYS—Provided for battery and galvanometer circuits.
CASE—Carrying type with removable cover (not illustrated) and compartment for 4½ volt battery (not supplied) for Wheatstone range measurements.
DIMENSIONS—Length 12¼", width 10¼", height 6¼".
WEIGHT—Approx. 9 lbs. Price \$175.00.

**No. 630
WHEATSTONE
BRIDGE**

Resistance range from 0.1 ohm to 11.1 megohms

SPECIFICATIONS

ACCURACY—1.0% between 10 ohms and 1.0 megohm—2% over 1 megohm.
COMPONENT RESISTORS—0.1% accurate except 1 ohm, which are 0.25%.
RHEOSTAT ARM—Three decades—variable in 10.0 ohm steps.
RESISTANCE BOX—Binding posts allow using rheostat as Resistance Box.
CAM SWITCH—Provided for battery and galvanometer circuits.
CASE—Carrying type with removable cover and compartment for batteries and leads (not supplied).
DIMENSIONS—Length 10", width 9¾", height 5¼".
WEIGHT—Approx. 6 lbs. Price \$90.00.

**No. 637
KELVIN
WHEATSTONE
BRIDGE**

Resistance range 0.001 ohm to 11.1 megohms

SPECIFICATIONS—Same as No. 638-2 except:
ACCURACY—1.0% between 1.0 ohm and 1.0 megohm; 2.0% above 1.0 megohm; and 3.0% below 0.1 ohm.
GALVANOMETER—Sensitivity 1.0 micro-ampere per millimeter division. Built-in.
RHEOSTAT ARM—Three decades—10 ohm steps in Wheatstone, and 10 micro-ohm steps in Kelvin ranges.
CANNOT be used as Resistance Box.
DIMENSIONS—Length 10", width 9¾", height 5¼".
WEIGHT—Approx. 7 lbs. Price \$120.00.

**No. 629
FAULT
LOCATION
BRIDGE**

Resistance range 0.1 ohm to 11.11 megohms

SPECIFICATIONS

ACCURACY—**COMPONENT RESISTORS**—0.1% accurate except 1.0 ohm, which are 0.25%.
GALVANOMETER—Built-in—sensitivity 1.0 micro-ampere per mm. division.

LECTROHM *Vitreous Enameled* RESISTORS

Quality—Accuracy—Dependability—Long Life

WIRE WOUND ADJUSTABLE TYPES

The same high quality and construction are used for LECTROHM Adjustable Resistors as are incorporated in LECTROHM fixed units.

These resistors are used for replacing voltage dividers in radio receivers, for radio transmitter power supply, and for general experimental work.

LECTROHM Enameled Vitreous RESISTORS

Quality—Accuracy—Dependability—Long Life

WIRE WOUND—FIXED TYPES

LECTROHM Resistors are manufactured from the highest quality materials obtainable and are rated according to R.M.A. standards. LECTROHM Resistors are rugged—dependable—accurate—quality components that will give long trouble-free service. (Mounting brackets available for 20, 50, 80, 100, 160 and 200 watt units.)

WARD LEONARD • VITROHM RESISTORS and RHEOSTATS

VITROHM RING TYPE RHEOSTATS

The core and base of Ward Leonard Ring Type Rheostats are made of the highest grade ceramic materials. The resistance wire is wound toroidally on the core, and is coated with a tough, heat resistant, acid resistant, crazeless vitreous enamel.

The contact is a special alloy and is of large area to avoid sticking, pitting, local heating, or oxidation when setting remains fixed for a long period of time.

Watt Ratings

Based on continuous operation in free air with a temperature rise not to exceed 300° C., which is within the limits specified by Underwriters' Laboratories and NEMA.

Number of Steps

Each turn of resistance wire on the core of a Vitrohm Ring Type Rheostat constitutes a step of change in the resistance value.

Vitrohm Ring Type Rheostats are made with three terminals with no "off" position, and can be used as potentiometers or rheostats, as desired. Rheostats with an "off" position can be furnished on special order.

Heavy Duty Rheostats Pressed steel plate type.

300 watts — 1 to 2500 ohms, 20 steps, 6" diameter.
500 watts — 1 to 5000 ohms, 33 steps, 8" diameter.

VITROHM PLAQUE RESISTORS

Vitrohm Plaque Resistors are flat in form. The resistance wire is arranged on a rectangular ceramic base to give the lowest obtainable values of inductance and distributed capacitance. Inductance at frequencies up to 1000 kilocycles and distributed capacitance up to 5 megacycles are so low in value that they are negligible.

Vitrohm Plaque Resistors are rated 20, 40, and 125 watts with full ventilation. Since full ventilation is usually impossible to attain, the watt rating should be decreased to compensate for the reduction in ventilation. A single plaque resistor mounted on a panel should operate safely about 80% of the full watt rating.

WARD LEONARD • VITROHM RESISTORS and RHEOSTATS

ADJUSTABLE RESISTORS -- ADJUSTOHMS

Adjustohm Resistors are for use in any application where it is necessary or desirable to have one or more intermediate resistance values; or in circuits that need to be changed from time to time to meet varying electrical conditions.

Adjustohm Resistors are built of the highest grade low temperature coefficient materials, and are coated with Ward Leonard's tough crazeless Vitreous Enamel.

WATT RATINGS

Nominal watt ratings for Adjustohm Resistors apply when the entire resistor is in the circuit. For most practical purposes the watt rating for each part of the resistor is approximately proportional to the amount of the resistance that is in the circuit.

Mounting brackets are furnished with all Adjustohm Resistors, except the 10-watt size, Type 10A.

Price of resistor includes brackets and one adjustable band.

WARD LEONARD • VITROHM RESISTORS and RHEOSTATS

DISCOHM RESISTORS

18 WATTS

Type 18D

Discohms are flat refractory discs having resistance wire arranged to minimize the values of inductance and distributed capacitance.

Discohm Resistors are especially useful in equipments where space is limited and where a power resistor having low value of inductance and distributed capacitance is required.

They are mounted by means of $\frac{1}{8}$ No. 8 wood screw or bolt through the counter-bank hole cast in the refractory base. Two or more units can be mounted together to obtain various resistance values and watt ratings.

Discohm Resistors are rated at 18 watts with free ventilation. A single Resistor mounted on a panel should operate safely at 80% of the full watt rating or 90% of the full current rating.

VITROHM STRIP RESISTORS

Vitrohm Strip Resistors lend themselves readily to applications where space is limited, such as aircraft control circuits, radio instruments, and similar apparatus.

Vitrohm Strip Resistors are built on a strong flat reinforced core that has no sharp angular surfaces, providing a smooth continuous form of the resistance winding. The resistors are vitreous enamel coated.

Each unit is fitted with a self-sustained mounting bracket and spacer, the end pieces being riveted to a metal strip that passes through the core and serves as a conductor for the internal heat generated while the resistor is in service.

LENGTH (Inches)		RESISTANCE		Watt Rating

FLUORESCENT LAMP RESISTORS

by the Underwriters' Laboratories, Inc., and by the New York City Department of Water Supply, Gas and Electricity.

Ward Leonard Fluorescent Lamp Resistors are mounted in well-ventilated metal enclosures for installation on standard fixtures. They are made for use on 115-volt, 120-volt and 220-volt circuits and in various resistance values to meet the requirements of the lamps with which they are to be used.

Ward Leonard Fluorescent Lamp Resistors are designed for use in fluorescent lamps operating on direct current. They meet the requirements of lamp and fixture manufacturers and are listed as standard

Long, flexible asbestos covered leads facilitate connections.

Plug-In Type

For Portable Fixtures

Ward Leonard also provides a Fluorescent Lamp Resistor in a metal enclosure for use with portable lamps operating on 120-volt circuits. It is fitted with a plug on one end for inserting into the line receptacle and a receptacle on the other end into which the plug on the figure is placed.

The Plug-In Resistor is made for use on 15-watt and 20-watt lamp fixtures.

LINE VOLTAGE REDUCERS

Ward Leonard Line Voltage Reducers protect radio sets, soldering irons, Christmas tree lamp strings, and other electrical appliances within the ratings of the Reducers, from high line voltage.

Line Voltage Reducers consist of a resistor network encased in a perforated metal enclosure provided with standard parallel prongs on one end and a standard receptacle on the other. Connection is made by plugging the Reducer into a receptacle and then inserting the plug on the appliance in the receptacle on the enclosure.

Catalog Number	Length Inches	Resis. Ohms	Load	List Price

507-109B	2 1/4	4.5	For 130-285 watt 115 volt radio set on 115-140 volts . . .	2.73
507-109H	5 1/4	300.	For 60-watt 115 volt radio set on 230 volts	3.58

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AMPERITE is an automatic rheostat designed to keep the current in a circuit at a definite value, for example, 0.5 amps. Should the supply voltage increase, the Amperite will automatically increase in resistance enough to take up the increase in supply voltage — keeping the voltage on the load constant.

PRICES: The proper AMPERITE Replacement may be determined by looking up the number under column "FOR" and noting corresponding Amperite in the column "USE AMPERITE". Numbers in "FOR" column run consecutively and then alphabetically.

★The letter code in the center column is interpreted as follows:

- a—For 110V. A.C.-D.C. Sets.....List Price \$1.25
- b—For 2V. Battery Sets..... 2.25
- c—For 110V. A.C. Sets..... 2.25
- h—For 220V. A.C.-D.C. Sets..... 2.25
- r—For 110V. A.C. Sets having 70-95V. Primary..... 1.25
- s—For special apparatus..... 3.00

A. C. - D. C. SETS

For A.C.-D.C. Sets
The Amperite Regulators are designed to pass only 0.3A through tube filaments. Filament voltages will be kept within $\pm 5\%$ with line voltage variations of 85 to 110 volts. Due to the fact that Amperite is a real regulator, 2 types of Amperite with four prongs and 2 with octal bases will replace 150—90% of all

so-called ballasts or resistors used in AC-D.C. sets. No extra resistor required.

Pilot Lights—None, one or two of either 0.150A or 0.250A can be used with same Amperite. Should a pilot light burn out, the set will continue to operate properly without any damage to the Amperite tubes or other parts. The patented starting resistor in the Amperite prevents overloading and premature burning-out of tubes and pilot lights. In some sets the ballast socket is purposely wired in such a way that the Pilot Light Resistors of standard ballasts would be burned out if inserted. In such sets special Amperites are required, as shown in table. Avoid burnouts—use proper Amperite.

BASE WIRING OF AMPERITES FOR A.C.-D.C. SETS

AMPERITES FOR 2-VOLT BATTERY SETS

Two-volt tube filaments are delicate and easily overloaded. Keeping the tube filaments at their proper voltage with a real regulator like Amperite invariably results in considerably more battery and tube life. The same Amperite can be used for dry-cell, air cell, or 2 volt storage battery operation. The proper Amperite is determined by the total filament-current drain of the set, e.g.—for 0.5A use Amperite 5E1, etc.

PRICES

The proper AMPERITE Replacement may be determined by looking up the number under column "FOR" and noting corresponding Amperite in the column "USE AMPERITE". Numbers in "FOR" column run consecutively and then alphabetically.

*The letter code in the center column is interpreted as follows:

- a For 110V. A.C.-D.C. Sets List Price \$1.25
- b For 2V. Battery Sets 2.25
- c For 110V. A.C. Sets 2.25
- r For 220V. A.C.-D.C. Sets 2.25
- h For 110V. A.C. Sets having 70-95V. Primary 1.25
- s For special apparatus. 3.00

RESISTORS by RESISTORS, INC.

Chicago 16, Illinois

Resistors by RESISTORS, INC. — the choice of engineers and hams alike — enjoy wide acceptance because they are wound right — rated right — merchandised right. The complete range of fixed and adjustable resistors assures you maximum profits and service. Resistors are attractively

packaged for eye appeal, a decided sales aid. Silver soldered connections — selected materials — precision fabrication. RESISTORS' Resistors are designed and produced under close personal supervision.

FIXED RESISTORS

5 WATT
TYPE 1 1/4 F - FIXED
 1 thru 10,000 Ohms
 \$.50

10 WATT
TYPE 1 1/4 M - FIXED
 1 thru 50,000 Ohms
 \$.56

10 WATT
TYPE 1 1/4 M - CENTER TAPPED
 10 to 200 Ohms
 \$.72

Prices do not include mounting brackets

20 WATT - TYPE 2K - FIXED
 1 thru 15,000 Ohms..... \$.91
 20,000 thru 50,000 Ohms..... 1.07
 *60,000 thru 100,000 Ohms..... 1.42

25 WATT - TYPE 2B - FIXED
 1 thru 5,000 Ohms..... \$1.04
 6,000 thru 15,000 Ohms..... 1.17
 20,000 thru 50,000 Ohms..... 1.42

Manufactured by RESISTORS, INC., Chicago 16, Illinois

Rex Rheostat Co.

BALDWIN, L. I., N. Y.

VITREOUS ENAMELED ROUND RHEOSTATS 7 SIZES FROM 50 TO 500 WATT

- Rigid **SPRING HINGED CONTACT ARM** assures unchangeable, constant contact pressure and makes the **REX ROUND RHEOSTAT** easy and smooth to operate.
- Self-adjusting **CONTACT BLOCK** is of copper graphite, and for higher currents, of silver graphite. A pigtail connects it directly to the center of the arm.
- Self-lubricating **POWDERED METAL WASHER** between the stationary and the movable part of the center contact, prevents "freezing" of these parts. This feature preserves continual smoothness of operation during the entire life of the Rheostat.

- **RESISTANCE WINDING** is uniformly distributed around its ceramic core and is kept securely in position by a protective coat of **VITREOUS ENAMEL**.
- All parts are of heat-resisting **CERAMIC** and **METAL** eliminating any possible shrinkage and loss of insulation. **SHAFT** and **MOUNTING** parts are insulated from the live parts in accordance with **UNDERWRITERS LABORATORIES** standard requirements.
- **COOLING** of all types is improved by recessing the base so that air can circulate freely on all sides of Rheostat. Listed maximum current values are applicable only with free air circulation.

RADIO'S MASTER

ALPHA WIRE PRODUCTS

CONSTRUCTION: Single conductor, extra flexible stranded tinned copper, cotton serve, insulated with special low loss SIC rubber compound, braided tinned copper shield, cotton serve, tough black rubber jacket overall.

CRYSTAL MICROPHONE CABLE

GENERAL PURPOSE: Low loss design for use with crystal, ribbon, dynamic and velocity microphones, photo-electric cells. Use No. 1248 FOR LAPEL MICROPHONES and phonograph pick ups.

No.	Put-up	Size	Mox. Copocity Per Ft. Between Cond. & Shield	O.D.
1248	100 Ft. Spool	20 Flexible Stranded	40 mmf.	.175"
1249	100 Ft. Spool	20 Flexible Stranded	30 mmf.	.245"

Longer Lengths Available.

CONSTRUCTION: Each conductor flexible stranded tinned copper, cotton wrap, 1/64" "Hi-Tension" low capacity rubber, color coded, conductors twisted, cushioned with cotton fillers, braided tinned copper shield, cotton wrap, tough black rubber jacket overall.

SHIELDED MICROPHONE CABLE

GENERAL PURPOSE: Adaptable for all indoor and outdoor crystal, carbon and condenser microphones as well as public address systems.

No.	Put-up	Size	Conduc- tors	Mox. Copocity Per Ft. Between Cond. & Shield	Conds.	O.D.
1250	100 Ft. Spool	20	2	70 mmf.	38 mmf.	.270"
1250 18	100 Ft. Spool	18	2	75 mmf.	40 mmf.	.300"
1251	100 Ft. Spool	20	3	65 mmf.	38 mmf.	.305"
1252	100 Ft. Spool	20	4	65 mmf.	36 mmf.	.345"
1253	100 Ft. Spool	20	5	60 mmf.	32 mmf.	.380"
1254	100 Ft. Spool	20	6	60 mmf.	30 mmf.	.405"
1255	100 Ft. Spool	20	7	60 mmf.	30 mmf.	.480"

Longer Lengths Available.

CONSTRUCTION: Each conductor No. 20-10.30 stranded tinned copper, 1/64" rubber, color coded cotton braid, conductors twisted, tinned copper shield overall.

SHIELDED MULTIPLE CONDUCTOR CABLE

GENERAL PURPOSE: For indoor permanent or portable P.A. systems, photo electric cell circuits, sound recording and auto radios.

No.	Put-up	Conduc- tors	Moximum Copocity Per Ft. Between Cond. & Shield	Conds.	O.D.
1256	100 Ft. Spool	2	60.5 mmf.	32 mmf.	.215"
1257	100 Ft. Spool	3	54.0 mmf.	29 mmf.	.240"
1258	100 Ft. Spool	4	48.0 mmf.	26 mmf.	.270"

COTTON BRAID OVER SHIELD

1262	100 Ft. Spool	2	60.5 mmf.	32 mmf.	.225"
1263	100 Ft. Spool	3	54.0 mmf.	29 mmf.	.245"
1264	100 Ft. Spool	4	48.0 mmf.	26 mmf.	.275"

Longer Lengths Available.

1262—1263—1264—Same specifications except with cotton braid over shield.

CONSTRUCTION: Two conductors twisted, each No. 20 solid tinned copper, insulated, color coded, shielded braid overall.

SHIELDED TRANSMISSION LINE

GENERAL PURPOSE: For inter-communication, short wave, P.A. systems, etc.

No.	Put-up	Mox. Copocity Per Ft.	O.D.
1267	500 Ft. Spool	25 mmf.	.135"

Surge impedance is one-half the above when using shield as common conductor in dual transmission line.

Longer Lengths Available.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

ALPHA WIRE PRODUCTS

CONSTRUCTION: Two conductors twisted, each No. 18-16/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, paper wrap over both conductors, close tinned copper shield overall.

SHIELDED DUPLEX SPEAKER CABLE

GENERAL PURPOSE: For P.A. systems, photo-electric cell circuits, master control sound systems, etc.

No.	Put-Up	Conductors	Maximum Capacity Per Ft.		O.D.
			Cond. & Shield	Between Conds.	
1265	500 Ft. Spool	2	65 mmf.	23 mmf.	.250"

Longer Lengths Available.

CONSTRUCTION: Two conductors parallel, each No. 18-16/30 stranded tinned copper, rubber insulated, color coded, lacquered cotton braid, galvanized steel armor overall.

ARMORED DUPLEX SPEAKER CABLE

GENERAL PURPOSE: For P.A. systems, oil burner installations, automotive wiring, etc.

No.	Put-up	O.D.
1272	500 Ft. Spool	.132" x .182"

Longer Lengths Available.

CONSTRUCTION: Three conductors, each conductor No. 22 stranded tinned copper wire, vinyl plastic insulation, color coded; one conductor tinned copper shield and two conductors unshielded; cotton braid overall.

INTER-COMMUNICATION CABLE 3 CONDUCTORS

(1 SHIELDED — 2 UNSHIELDED)

GENERAL PURPOSE: This cable is ideal for general wiring from station to station where a shielded single conductor is essential to eliminate cross talk.

No.	Put-up	O.D.
1242	500 Ft. Spool	.155"

Longer Lengths Available.

CONSTRUCTION: Two conductors twisted, each No. 19 solid tinned copper, 1/32" "Hi-Tension" rubber, color coded; overall is a pure lead sheath.

LEAD SHEATHED CABLE

GENERAL PURPOSE: For P.A. systems, communications, traffic control, mines, railroads and many other uses where severe moisture conditions are encountered. For all outdoor use including underground and underwater.

No.	Put-up	O.D.
1271	1,000 Ft. Reel	.325"

CONSTRUCTION: Two conductors twisted, each No. 20 solid tinned copper, insulated, color coded.

UNSHIELDED TRANSMISSION LINE

GENERAL PURPOSE: For short wave, inter-communication, annunciator systems, etc., where shielding is not required.

No.	Put-up	O.D.
1269	500 Ft. Spool	.125"

Longer Lengths Available.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

ALPHA WIRE PRODUCTS

CONSTRUCTION: Each conductor solid tinned copper wire, two cotton reverse serves paraffined, color coded, conductors twisted into pairs, then covered with an impregnated double paper wrap, and overall a cotton braid saturated with a moisture-proof, flame retarding, rodent-proof compound.

BRAIDED COMMUNICATION CABLE (TWISTED PAIRS)

GENERAL PURPOSE: For interior use designed for connecting inter-communication systems, annunciators, telephones, etc.

No.	Put-up	Size	Pairs	O.D.
1276/2	1,000 Ft. Reel	22	2 (4 Conductors)	.185"
1276/3	1,000 Ft. Reel	22	3 (6 Conductors)	.210"
1276	1,000 Ft. Reel	22	6 (12 Conductors)	.240"
1277	1,000 Ft. Reel	22	10 (20 Conductors)	.300"
1277/15	1,000 Ft. Reel	22	15 (30 Conductors)	.380"
1277/25	1,000 Ft. Reel	22	25 (50 Conductors)	.445"

CONSTRUCTION: Similar to Communication System Cable above, but with lead antimony sheath instead of cotton braid over the twisted pairs.

LEAD-COVERED COMMUNICATION CABLE (TWISTED PAIRS)

GENERAL PURPOSE: For use indoors, outdoors, underground and in pipes for connecting inter-communication systems, annunciators, telephones, etc.

No.	Put-up	Size	Pairs	O.D.
1289	1,000 Ft. Reel	22	6 (12 Conductors)	.375"
1291	1,000 Ft. Reel	22	10 (20 Conductors)	.450"
1293	1,000 Ft. Reel	22	15 (30 Conductors)	.510"
1295	1,000 Ft. Reel	22	25 (50 Conductors)	.560"

CONSTRUCTION: Each conductor solid bare copper wire, thermo-plastic insulation, color coded, conductors twisted, waxed cotton braid overall.

INTER-COMMUNICATION CABLE (BRAIDED)

GENERAL PURPOSE: Designed for interior use for connecting inter-communication systems, annunciators, thermostat controls of oil burners, air conditioners, etc.

No.	Put-up	Size	Conductors	O.D.
1274	500 Ft. Spool	18	2	.150"
1275	500 Ft. Spool	18	3	.165"
1275/4	500 Ft. Spool	18	4	.180"
1275/5	500 Ft. Spool	18	5	.200"
1275/6	500 Ft. Spool	18	6	.220"

CONSTRUCTION: Same specifications as 1274 through 1275/6 series shown above, except galvanized steel armor overall.

INTER-COMMUNICATION CABLE (ARMORED)

GENERAL PURPOSE: Similar to 1274 through 1275/6 series shown above, but armored for heavy duty and grounding.

No.	Put-up	Size	Conductors	O.D.
1278/2	500 Ft. Spool	18	2	.170"
1278/3	500 Ft. Spool	18	3	.180"
1278/4	500 Ft. Spool	18	4	.200"

CONSTRUCTION: Each conductor 19 solid tinned copper, 1/64" telephone compound rubber, heavy cotton braid with specially treated compound to make it weather-proof for resistance against rain, snow, hail and cold.

OUTDOOR INTER-COMMUNICATION WIRE

GENERAL PURPOSE: For outdoor and indoor use or in any damp location, for connecting communication systems, telephones, etc.

No.	Put-up	Size	Conductors	O.D.
1279	500 Ft. Spool	19	2	.200"
1280	500 Ft. Spool	19	3	.300"

Longer Lengths Available.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE

ALPHA WIRE PRODUCTS

CONSTRUCTION: Each conductor flexible stranded tinned copper, cotton wrap, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cushioned with cotton fillers, cotton wrap, tough black rubber jacket overall.

MULTI-CONDUCTOR FLEXIBLE CABLE (RUBBER JACKETED)

GENERAL PURPOSE: For indoor and outdoor speakers, permanent or portable P.A. systems, sound recording and auto radios.

No.	Put-up	Conductors	Capacity Per Ft. Between Conductors	O.D.
1244	100 Ft. Spool	2	22 mmf.	.250"
1245	100 Ft. Spool	3	20 mmf.	.300"
1246	100 Ft. Spool	4	18 mmf.	.320"
1247	100 Ft. Spool	5	17 mmf.	.370"
1247 6	100 Ft. Spool	6	16 mmf.	.400"
1247 8	100 Ft. Spool	8	16 mmf.	.460"

Longer Lengths Available.

CONSTRUCTION: Each conductor No. 20-10 30 stranded copper, 1/64" thermoplastic insulation, color coded, conductors twisted, glazed brown cotton braid overall.

MULTI-CONDUCTOR FLEXIBLE CABLE (COTTON BRAID)

GENERAL PURPOSE: For connecting speakers, analyzers, remote control units, P.A. systems or wherever a multiple circuit hook-up is required.

No.	Put-up	Conductors	Capacity Between Conductors	O.D.
1182	100 Ft. Spool	2	31.5 mmf.	.135"
1183	100 Ft. Spool	3	31.0 mmf.	.170"
1184	100 Ft. Spool	4	30.0 mmf.	.180"
1185	100 Ft. Spool	5	29.5 mmf.	.205"
1186	100 Ft. Spool	6	29.2 mmf.	.225"
1187	100 Ft. Spool	7	28.8 mmf.	.240"
1188	100 Ft. Spool	8	28.5 mmf.	.255"
1189	100 Ft. Spool	9	27.9 mmf.	.275"
1190	100 Ft. Spool	10	27.6 mmf.	.310"
1192	100 Ft. Spool	12	27.0 mmf.	.340"

Longer Lengths Available.

CONSTRUCTION: Each conductor stranded bare copper, cotton separator, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cushioned with jute fillers, 40% tough rubber jacket overall.

RUBBER SHEATHED SERVICE CORD (UNDERWRITERS APPROVED)

GENERAL PURPOSE: For amplifiers, sound systems, speakers, vacuum cleaners, electric tools, washing machines, refrigerators, appliances, trouble lights, garage lamps or wherever a rough usage power line is required.

No.	Put-up	Size	Conductors	Type	Current Carrying Capacity	Voltage Rating	O.D.
1951	250 Ft. Spool	18	2	SV	5 amps	300	.250"
1952	250 Ft. Spool	18	2	SJ	5 amps	300	.310"
1953	250 Ft. Spool	16	2	SJ	7 amps	300	.340"
1954	250 Ft. Coil	18	2	S	5 amps	600	.390"
1955	250 Ft. Coil	16	2	S	7 amps	600	.410"
1956	250 Ft. Coil	14	2	S	15 amps	600	.540"
1957	250 Ft. Coil	12	2	S	20 amps	600	.605"
1958	250 Ft. Coil	10	2	S	25 amps	600	.640"

Also Available with Additional Conductors.

CONSTRUCTION: Two conductors parallel, each conductor No. 18-41/34 extra flexible bare copper, color coded cotton serve, 40% tough rubber jacket overall. Slit in jacket to permit "E-Z" separation.

TYPE POSJ-E-Z STRIP LAMP CORD (UNDERWRITERS APPROVED)

GENERAL PURPOSE: For line cord on radios, lamps, electric clocks, food mixers and other small devices.

No.	Put-up	O.D.
1966	100 Ft. Spool	.235" x .130"
1967	250 Ft. Spool	.235" x .130"

Standard Colors: Brown, Black, Ivory and Green
Longer Lengths Available.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

ALPHA WIRE PRODUCTS

CONSTRUCTION: Very flexible tinned soft annealed copper, concentric strand, cotton wrap, 3/64" "Super Hi-Tension" rubber, satin finish.

KINKLESS TEST LEAD WIRE

GENERAL PURPOSE: As test leads in analyzers, oscillators and all other types of testing apparatus or wherever an EXTRA FLEXIBLE insulated wire is required.

No.	Put-up	Size	Strand	Voltage Breakdown (60 Cycles)	D.C. Insulation Resistance Per Ft. (Megohms)	O.D.
1633	100 Ft. Spool	20	41 36	10,000 V.	710	.140"
1635	500 Ft. Spool	20	41 36	10,000 V.	710	.140"
1636	500 Ft. Spool	18	65 36	12,000 V.	800	.150"

CONSTRUCTION: No. 18 - 65/36 tinned soft annealed copper, concentric strand, cotton wrap, 7/64" "Super Hi-Tension" rubber, satin finish.

Heavy Duty Type

GENERAL PURPOSE: For television, therapeutic equipment, analyzers, oscillators, etc., or wherever a heavy duty EXTRA FLEXIBLE high voltage line is required.

No.	Put-up	Voltage Breakdown (60 Cycles)	D.C. Insulation Resistance Per Ft. (Megohms)	O.D.
1637	100 Ft. Spool	22,000 V.	Over 1,000	.245"
1638	500 Ft. Spool	22,000 V.	Over 1,000	.245"

Stock Colors: Red and Black
Longer Lengths Available.

CONSTRUCTION: Composed of very fine soft annealed tinned copper wires braided and rolled flat.

TINNED COPPER SHIELDING

GENERAL PURPOSE: For shielding speaker leads, lead-ins, amplifier wires, auto radio installations. Also for bonding.

No.	Put-up	I.D.
1229	50 Ft. Spool	1/8"
1230	50 Ft. Spool	3/16"
1231	50 Ft. Spool	1/4"
1232	50 Ft. Spool	3/8"
1233	50 Ft. Spool	5/8"
1234	50 Ft. Spool	3/4"
1235	50 Ft. Spool	1"

Longer Lengths Available.

CONSTRUCTION: 24 gauge flexible stranded copper conductor, vinyl plastic insulation, close tinned copper shielded braid overall.

No. 1202 Same as above except 2-conductor with shield overall.

SHIELDED PHONO AND GRID WIRE

GENERAL PURPOSE: Extreme flexibility and limppness make this an ideal wire for phonograph pick-up arm cable and grid wire.

No.	Put-up	Insulation	O.D.
1200	1000 Ft. Spool	.010"	.080"
1202	1000 Ft. Spool	.010"	.080" x .115"

CONSTRUCTION: Single conductor No. 20 - 10/30 stranded tinned copper, insulated with low loss rubber compound, white silk braid, tinned copper shield overall.

SHIELDED LOW LOSS CABLE

GENERAL PURPOSE: For auto radios, lead-ins, short wave receivers and for grid leads in the input stages of P.A. amplifiers.

No.	Put-up	Capocity Per Ft.	O.D.
1241	100 Ft. Spool	26.6 mmf.	.225"

Longer Lengths Available.

CONSTRUCTION: Stranded tinned copper, low loss insulation, highly lacquered braid, close tinned copper shield overall.

SHIELDED HOOK-UP AND LEAD-IN WIRE

GENERAL PURPOSE: To reduce interference caused by motors, high tension wires, x-ray machines or other apparatus that radiates electrical impulses. Ideal for grid-lead use.

No.	Put-up	Size	Strand	O.D.
1194 22	1000 Ft. Spool	22	7/30	.105"
1194	1000 Ft. Spool	20	10/30	.110"
1196	1000 Ft. Spool	18	16/30	.145"
1197	1000 Ft. Spool	16	26/30	.160"
1198	1000 Ft. Spool	14	41/30	.180"

Longer Lengths Available.

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

NOTE: See Page S-10 for ALL ALPHA Prices and Other Information.

ALPHA WIRE PRODUCTS

"CL" PUSHBACK WIRE

GENERAL PURPOSE: Pushback hook-up wire in various bright colors for circuit identification; radio, radar, electronics, electrical toys, etc.

STRANDED

SOLID

CONSTRUCTION: Single conductor, stranded and solid tinned copper, heavy wrap of cellulose acetate, cotton braid with flame-retarding lacquer.

Standard Colors: Black, Red, Green, Yellow, Blue, Brown, White and Orange

No.	Put-up	Size	Strand	Volt. Break-down (60 cycles)	D.C. Insulation Resistance per ft. (Megohms)	O.D.

Longer Lengths Available

STRANDED

SOLID

CONSTRUCTION: Single conductor, stranded and solid tinned copper wires with thermoplastic (Vinylite) insulation. High dielectric strength; 80 C (176 F) acid, alkali, oil and moisture resistant. Underwriters approved.

Standard Colors: Black, Red, Green, Yellow, Light Blue, Brown, White, Orange, Slate, Purple, Tan, Pink and Dark Blue

PLASTIC SRIR HOOK-UP WIRE

GENERAL PURPOSE: For radio, radar, electronic devices, transmitters, aircraft instruments, fluorescent fixtures, rectifiers, electrical toys, etc.

No.	Put-up	Size	Strand	Insulation (60 cycles)	Volt. Break-down (60 cycles)	D.C. Insulation Resistance per ft. (Megohms)	O.D.

LACQUERED HOOK-UP AND LEAD-IN WIRE (HIGH GLOSS LACQUERED BRAID)

GENERAL PURPOSE: For point to point soldering connections on transformers, amplifiers, panel hook-up, etc., where a low loss dielectric is required. It is not a pushback wire but will strip easily.

No.	Put-up	Size	Strand	Insulation (60 cycles)	Volt. Break-down (60 cycles)	D.C. Insulation Resistance per ft. (Megohms)	O.D.
1513	100 Ft. Spool	20	10/30	1/64"	7000	290	.090"

Longer Lengths Available

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

ALPHA WIRE PRODUCTS

CONSTRUCTION: Stranded soft annealed tinned copper, insulated with rubber, over which is a highly lacquered braid. Oil, heat, and moisture resistant.

LACQUERED PRIMARY WIRE

GENERAL PURPOSE: For automobile head, tail, side, dashboard lamps, horn, spotlight, instrument leads and general high voltage and primary voltage applications.

No.	Put-up	Size	Strand	Rubber	O.D.
1989	100 Ft. Spool	18	16/30	1/64"	.110"
1991	100 Ft. Spool	18	16/30	1/32"	.125"
1995	100 Ft. Spool	16	26/30	1/32"	.140"
1997	100 Ft. Spool	14	41/30	1/32"	.170"

1983	100 Ft. Spool	10	19/23	1/32"	.208"

Longer Lengths Available.

CONSTRUCTION: Single conductor No. 16-19/29 stranded tinned copper, rubber insulated, cotton braid highly lacquered.

7 MM LACQUERED CABLE

GENERAL PURPOSE: For high voltage leads in television receivers, cathode-ray tubes, oscilloscopes, etc.

No.	Put-up	O.D.
1981	100 Ft. Spool	.275"

Longer Lengths Available.

CONSTRUCTION: Single conductor No. 14-41/30 stranded tinned copper, celanese serve, lacquered braid. Colors: red and black.

FILAMENT AND HOOK-UP WIRE

GENERAL PURPOSE: Point to point wiring for all radio and electrical uses.

No.	Put-up	Volt Breakdown (60 cycles)	D.C. Insulation Per Ft. (Megohms)	O.D.
1643	100 Ft. Spool	1000	200	.105"
1645	500 Ft. Spool	1000	200	.105"

Longer Lengths Available.

SOLID TINNED COPPER WIRE

GENERAL PURPOSE: Winding of coils, antennas, point to point, bus bar, etc.

No.	Put-up	Size	O.D.
292	1000 Ft. Spool	10	.103"
289	1000 Ft. Spool	12	.082"

297	1000 Ft. Spool	20	.033"
298	1000 Ft. Spool	22	.025"

Longer Lengths Available.

FLEXIBLE VARNISHED TUBING AND SLEEVING

RADIO VARNISHED TUBING — (Spaghetti). A sleeving with a heavy coat of varnish, in high gloss vivid colors. Average dielectric strength: 5,000 volts.

SATURATED SLEEVING — A fibre yarn sleeving saturated with high grade insulating varnish. Cuts clean and has a smooth interior wall. Average dielectric strength: 2,000 volts.

MAGNETO VARNISHED TUBING—The production of this type of tubing is under rigid control so as to insure a maximum in quality. It is thoroughly impregnated with a varnish of maximum insulating value. It is resistant to heat, oil, gas and acids. Colors are bright and vivid. Average dielectric strength: 7,000 volts.

Tolerances: Sizes:

0 to 2—plus or minus .005"
3 to 13—plus or minus .004"
14 to 20—plus or minus .002"

Standard Colors: Black, Red, Yellow, Green and Brown
Sizes follow the B & S System of gauging wires. For instance, a No. 10 tubing will fit over a No. 10 bore wire or any wire with an insulation of which the O.D. is equivalent to No. 10 B & S gauge. If in doubt, it is best to submit a sample of the wire or product to be covered.

SPAGHETTI TUBING

A superior varnished tubing for radio work. It will retain its dielectric and flexibility indefinitely. Takes up to No. 14 wire.

Colors: Black, Red, Yellow, Green and Brown

No. 2091 — 30" Lengths

ALL PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

ALPHA WIRE PRODUCTS

TWISTED PAIR TRANSMISSION LINE (WEATHERPROOF BRAID)

CONSTRUCTION: Two conductors No. 22-7/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cotton braid overall, saturated weather-proof finish.

CONSTRUCTION—1135: Two conductors No. 18-16 30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, conductors twisted, cotton braid overall, saturated weather-proof finish.

GENERAL PURPOSE: For inter-com. hook-up. Also suitable for low loss coupling between antenna and receiver as doublet style twisted lead-in.

No.	Put-up	Capacity Bet. Conds. Per Ft.	Frequency (KC)	Surge Impedance (Ohms)	Power Factor Per Cent	O.D.
1146	500 Ft. Spool	21.8 mmf.	3,500	90.2	3.75	.175"

1152	1000 Ft. Spool	75	20.0 mmf.	.070" x .120"

Longer Lengths Available.

CONSTRUCTION: Single conductor No. 22 solid copperweld, polyethylene insulation, bare copper shield, black vinyl plastic jacket overall.

CO-AXIAL CABLE (RG-59U)

GENERAL PURPOSE: Co-axial cable is ideal for television, FM and facsimile reception. Is suitable for very high frequency and ultra high frequency ranges.

No.	Put-up	Nom. Imp. (Ohms)	Nom. Cap.	Max. Oper. Volts RMS	O.D.
1157	1000 Ft. Reel	73	21 mmf./F+	2300	.242"

CONSTRUCTION: Single conductor extra flexible No. 14-104 34 copper, paper serve, 3/64" ASTM performance grade rubber, double cotton braid, .040" oil resistant neoprene rubber jacket.

DIATHERMY CABLE

GENERAL PURPOSE: Its extreme flexibility and tough rubber jacket give it long life. This cable is used as a lead on therapy apparatus, charging cable, battery lead, underground cable, etc.

No.	Put-up	O.D.
1623	100 Ft. Spool	.300"
1625	1000 Ft. Reel	.300"

PHOSPHOR BRONZE DIAL CABLE

CONSTRUCTION: Made of 42 strands (6 x 7 x .004) genuine phosphor bronze wire with a linen center for extra flexibility. Is guaranteed not to warp or stretch.

No.	Put-up	Tensile Strength	O.D.
1689	25 Ft. Spool	50 lbs.	.036"
1691	100 Ft. Spool	50 lbs.	.036"
1692	500 Ft. Spool	50 lbs.	.036"

Longer Lengths Available.

BRAIDED LINEN DIAL CABLE

CONSTRUCTION: Made of the finest linen obtainable. Composed of a very strong linen center over which is a smooth black braid.

ALPHA WIRE PRODUCTS

CONSTRUCTION: Single conductor No. 23-20/36 stranded bare copper, extra flexible, covered with a dark brown cotton braid overall.

AC-DC ANTENNA WIRE

GENERAL PURPOSE: Ideal replacement wire for universal midjets, indoor aeriels and loop antennas.

No.	Put-up
1281	25 Ft. Disc
1282	100 Ft. Spool
1283	500 Ft. Spool
1284	1000 Ft. Spool

Longer Lengths Available.

CONSTRUCTION: Stranded tinned or solid tinned copper conductor, insulated with live free stripping rubber, jet black waxed finish overall.

LEAD-IN AND GROUND WIRE

GENERAL PURPOSE: Lead-in, ground, hook-up, all purpose wire.

Belden FM antenna systems

- Highly efficient
- Broad response
- Low standing wave ratio
- Perfect matching
- Mechanically strong
- Light in weight
- Factory assembled
- Weather resistant
- Wind resistant

Trade Number	†Pkg.	Description	Net Weight in Lb	Contents
FM DIPOLE ANTENNA				
8320	1K	The Belden FM Dipole Antenna System is scientifically engineered and may be used on all FM radios. It can be used for Standard Broadcast as well as FM reception. Its performance has been proven in laboratory and field service tests. Careful electrical design has resulted in excellent response over the entire FM band. Maximum signal and trouble-free reception are assured.	2.5	1 - 65' 300-OHM Transmission Line 8225 1 - Aluminum Antenna Element 1 - Porcelain Junction Block 1 - 5' Aluminum Standard 2 - Stand-off Insulators 8126 2 - Mounting Straps 1 - Instruction Sheet
FM REFLECTOR				
8321	1K	For greater radio signal strength, use the Belden FM Reflector with the No. 8320 Belden FM Dipole Antenna to form an antenna-reflector array. The addition of a reflector improves FM reception for any installation and is necessary in locations where the radio signal is weak, for example, due to its distance from radio stations or its location among buildings. Also, a reduction in interference may be effected to the rear or reflector side of the antenna.	.8	1 - Aluminum Reflector Element 1 - Porcelain Junction Block 1 - Aluminum Cross Member 1 - Instruction Sheet

*Complete installation instructions accompany each Belden System.

Fig. 1

FIGURE 1. FIELD PATTERNS. Using the field pattern for the dipole antenna as a reference, the gain and attenuation are shown with the reflector added. The forward gain is 1.8 db., and the attenuation to the rear is 4.2 db. or a directivity improvement of 6 db. over the dipole antenna alone.

Fig. 2

FIGURE 2. STANDING WAVE RATIOS. The graph indicates that almost perfect impedance matching exists between the dipole antenna and the transmission cable. The minimum standing wave ratio for both the dipole antenna alone and the dipole an-

Fig. 3

tenna with reflector lies between 1.1 and 1.2. **FIGURE 3. OUTPUT VOLTAGE - PER CENT OF PERFECT MATCH.** The output voltage is expressed as per cent of perfect match. The graph indicates a high order of efficiency over the entire FM band.

Belden • auto and aircraft radio wires and shielding

Belden supplies a complete line of auto radio wires and shielding to handle every wire requirement in installation and servicing.

In installations of this type, the use of the correct wire is particularly important. Applications are indicated in the listings below.

Belden • microphone cables

Performance and appearance are the outstanding features built into Belden microphone cables. Polyethylene insulation is used for outstanding dielectric properties and vinyl plastic jackets for protection.

Dielectrically, Belden microphone cables have low capacitance, high insulation resistance, and low attenuation at audio frequencies. In addition, they provide resistance to physical abuse, aging, and moisture.

shielded multiple conductor cables

Belden multiple conductor cables are developed for long service life, excellent mechanical and electrical characteristics, and uniform quality. These cables are used for a multitude of applications including power and interconnecting cords on radio receivers, electronic devices, speakers, analyzer test equipment, remote control circuits, and press-to-talk microphone circuits.

Belden transmission cables are available for every receiving and low power transmitting antenna application. Coaxial, twisted pair, and parallel type lines are represented.

These cables are designed to meet exacting electrical requirements and are mechanically strong, weather re-

sistant, and give long service life. Cables constructed with polyethylene insulation are especially suitable for very high frequency (VHF) and ultra high (UHF) ranges where the losses in ordinary types of transmission line cables are excessive.

TRANSMISSION LINE CABLE APPLICATIONS

	Lengths and Package	A W G.	Trade Number	ILLUSTRATION AND TYPE
72-Ohm cable for use with receiving and low power transmitting antenna at low frequencies. Also for heavy-duty high-voltage leads.	50' S 250' S	14	8216	 Coaxial
72-Ohm cable for use with doublet receiving antenna at low frequencies.	500' S	18	8204	 Twisted Pair
72-Ohm shielded cable for use with doublet receiving antenna at low frequencies to reduce noise pick-up. Also used for long runs in extension speaker installations.	500' S	18	8209	 Twisted Pair (Shielded)
Inexpensive cable for use with doublet receiving antenna at low frequencies. Also used for extension speaker and control circuits.	500' S	22	8205	 Twisted Pair
72-Ohm cable for use with receiving antenna at high frequencies.	100' S 500' S	20	8222	 Parallel
100-Ohm cable for use with receiving antenna, matching transformer, connecting link between electronic units, and experimental applications at high frequencies.	100' S 500' S	20	8223	 Parallel
150-Ohm cable for use with receiving antenna, matching transformer and experimental applications at high frequencies.	100' S 500' S	20	8224	 Parallel
300-Ohm cable especially recommended for use with television and FM receiving antenna. Exceptionally low losses at high frequencies.	100' S 500' S 1000' S	20	8225	 Parallel
300-Ohm heavy-duty cable especially recommended for use with television and FM receiving antenna. Also for low power transmitting antenna. Exceptionally low losses at high frequencies.	100' S 500' S	18	8235	 Parallel
72-Ohm cable for use with low power transmitting antenna at high frequencies.	100' S 500' S	13	8210	 Parallel
100-Ohm shielded cable for use with television and FM antenna to reduce noise pick-up.	100' S 500' S	20	8226	 Parallel (Shielded)
100-Ohm shielded cable for use with television and FM antenna in extremely noisy locations.	100' S 250' S	20	8227	 Twisted Pair (Shielded)
72-Ohm cable for use with television antenna.	100' S 500' S	22	8229	 Coaxial
52-Ohm cable for radio frequency transmission, video, test equipment, and pulse transmission.	100' S 500' S	20	8228	 Coaxial

Belden • hook-up and lead wires

There is a Belden hook-up and lead wire construction for every service requirement—for receivers, transmitters,

amplifiers, rectifiers, aircraft radio, geophysical instruments, and in all other types of electric equipment.

PLASTIC INSULATED

General-use hook-up wire and as leads for radio components such as transformers, chokes, and controls. Furnished in the eight following colors: **Black, Blue, Green, Red, Yellow, White, Brown, and Orange. SPECIFY COLOR.**

Wires with $\frac{1}{16}$ " plastic insulation are designed for use within the chassis of radio receivers, amplifiers, instruments, controls, and other electronic devices. Wires with .025" plastic insulation are designed for use inside or outside the chassis but within the radio cabinet. The operating temperature limit for these wires is 80 C (176 F).

test prod wire

High-voltage lead wire for use with portable testing equipment, instruments, and other radio units where excellent dielectric properties of the insulation and extreme flexibility and limpness of the cable are essential considerations. Furnished in either red or black.

headphone cords

ILLUSTRATION AND APPLICATION	Trade Number	Package	Length and Color	DESCRIPTION
	8872	1 K	5 Ft Brown	Headphone Set, Pin tips all ends. 5 Ft of extra-flexible moisture-resistant rubber insulated tinsel cord. Over-all durable brown cotton braid. "Y" arm sections 15", coupled in series.
	8873	1 K	5 Ft Brown	Headphone Set, Spade tips 4 phone ends. Pin tips plug end. 5 Ft of extra-flexible moisture-resistant rubber insulated tinsel cord; over-all durable brown cotton braid. "Y" arm sections 15", coupled in series.

AC•DC resistance cord

To determine the proper ac-dc line cord, add the filament voltages of the individual tubes in the receiver. From the chart at right, select the nearest figure under the heading SUM OF TUBE VOLTAGES in the column headed by the available power supply. Length 6 ft. Size 18.

Trade Number	Resistance (ohms)	Color Marker	Voltage Drop at 0.3 Amps	*Sum of Tube Voltages for		
				110 Volt Line	115 Volt Line	120 Volt Line
8920	1K	Green	40.5	69.5	74.5	79.5
8921	1K	Yellow	49.5	60.5	65.5	70.5
8976	1K	Orange	54	56	61	66
8929	1K	Blue	66	44	49	54
8977	1K	Grey	75	35	40	45
8922	1K	Black	87	23	28	33
8923	1K	Brown	99	11	16	21
8924	1K	White	**84	26	31	36
8925	1K	Red	***72	38	43	48

*When line voltages other than those shown must be used, subtract sum of tube voltages from available line voltage to obtain voltage drop. The nearest figure in "Voltage Drop" column gives proper ac-dc cord to use.

**Voltage drop at 0.175 amps.

***Voltage drop at 0.75 amps.

soldering irons

Belden soldering irons take care of practically all radio service and communications work. Sturdy construction throughout assures long service life.

Features include:

1. High-quality Nichrome heating element.
2. Machined copper tips extend into element for faster heating.

3. A 6-ft Belden "Corditis-free" 3000-cycle heater cord.

4. Easy replacement of tips or elements.

5. "Easy-Grip" handle.

6. Hexagonal baffle plate prevents rolling.

7. Portable soldering iron stand as indicated.

8. Approved by Underwriters' Laboratories, Inc.

8110	1K	80-Watt iron with $\frac{3}{8}$ " tip. For light work. Complete with stand including tip cleaner.
8113	1K	100-Watt iron with $\frac{3}{8}$ " tip. For medium light service. Complete with stand including tip cleaner.

soldering iron replacement parts

8111	1K	80-Watt element for 8110
8114	1K	100-Watt element for 8113
8112	5K	Tip ($\frac{1}{4}$ ") for 8110 or 8113
8119	1K	Heater cord only. 6-Ft Belden 3000-cycle heater cord with Belden Unbreakable Soft Rubber Plug. Opposite end stripped and tinned.

RADIO HOOK-UP WIRE

"CORLAC" HOOK-UP WIRE

For the discriminating service man who knows the importance of voltage break down and insulation resistance. Special under-insulation makes this hook-up wire moisture-proof and gives voltage break-down of 3100 volts (as per certified report of Electrical Testing Laboratory, N. Y. C.). Excellent push-back in waxed finish. Tinned copper conductors.

Birnbach

F-M and TELEVISION ANTENNAS

F-M and TELEVISION DOUBLET ANTENNAS

- ADJUSTABLE FROM 40 MCS. TO 80 MCS.
- ALUMINUM ALLOY TUBING
- ROTATABLE
- RUGGED CONSTRUCTION
- CERAMIC INSULATORS

A superior antenna construction for television reception. Consist of corrosion proof aluminum alloy tubes adjustable to all frequencies between 80 mcs. and 10 mcs. mounted on high grade low absorption glazed porcelain stand-off insulators which maintains its efficiency under all weather conditions. Strong wooden supports. Adjustments can be made in the horizontal planes. This will permit the antenna to be properly adjusted in respect to the transmitted wave and the signal strength. There are two types available; No. 110 Doublet and the No. 112 Doublet with reflector to eliminate interference. Complete with mounting poles and steel coupling.

No.	List Price
140-B—Doublet	\$12.50
142-B—Doublet with reflector	22.50

ULTRA HIGH FREQUENCY ANTENNAS (VERTICAL RODS)

They are constructed of hard drawn aluminum alloy tubing, telescoped together and adjusted by forcing down with a turning motion a specially designed brass nickel-plated taper lock bushing. They cover all requirements for stationary or portable use. Two types of mountings are available; stand-off mounting having 1/4-20 threaded bushing on No. 151 and 10-32 threaded bushing on No. 157, and binding post mounting consisting of a reinforced flattened end with two holes drilled 1" between centers. The frequency range listed is for 1/4 wave-length antenna.

Frequency Range in Mcs.

161	2	40	75	3.10
164	Taper Lock Bushings 5/8 and 3/8			.25

MAST AERIAL

The Birnbach Mast Antenna is made of four tempered carbon steel tube sections which will instantly go back to an erect position when flexed by the wind. They make an actual height of 12 ft. and are treated to prevent corrosion. Two heavy duty ceramic mounting insulators permit every type of installation to be made with ease.

The Safety Lightning Arrestor protects the antenna from excessive static charges of atmospheric electricity. The accumulated charges bypasses the receiver and discharges to the ground.

No. 169—Includes: 1 12 ft. 4 section Mast Aerial and Clamps, 2 porcelain mounting insulators and securing clamps; 1 nutit knob; 1 safety lightning arrester; 35 ft. leadin wire; 1-6" insulated screw eye; 1 ground clamp; mounting screws; and directions. List \$7.00

No. 170—Includes: Everything contained in the No. 169 with the exception of 1 Safety lightning arrester. List. . \$6.75

WOODEN MOUNTING POLES

Made of straight grain ash and finished with a weatherproof varnish. With the use of the couplings several poles can be joined together. The couplings are made of steel tubing and are cadmium plated.

No.	Std. Pkg. List
144—Coupling 10	\$1.40
145—1 ft. Wooden Pole 10	1.40

SEE PAGE S-32 for complete line of TRANSMISSION CABLE suitable for FM and TELEVISION

FLEXIBLE FOLDED DIPOLE ANTENNAS

For Television (TV)

The flexible folded dipole antenna for Television is perfect for indoor use. This antenna can be placed in attics or in apartment houses; it can be placed under rugs, behind large couches, behind drapes covering windows, etc. This aerial can be oriented for best reception over all television stations. The new Birnbach indoor Television Antenna should prove a real seller for you.

Transition loss measures 2.85 DB in television band.

No. 7027—Flexible Folded Dipole Antenna for Television (TV).	List Price (Individually Boxed) \$1.75 ea.
--	--

For Frequency Modulation (FM)

The flexible folded dipole antenna for FM is excellent for all FM receivers. With the new FM Converters and Timers now on the market you can enjoy a very lucrative sale on this low-priced antenna. Losses in line measure .85 DB per 100 feet at 100MC.

No. 7026—Flexible Folded Dipole Antenna for Frequency Modulation (FM).	List Price (Individually Boxed) \$1.50 ea.
--	--

For above antennas with 50 ft. lengths of 300 ohm Transmission Line add \$2.00 to the list price.

An attractive display card furnished to aid you in the sale of our two new products.

ADJUSTABLE DIPOLE ANTENNA For Television or Frequency Modulation

An adjustable antenna that can be used as a vertical or horizontal doublet. Can be rotated to any angle for any degree of polarization. Impedance at center 72 ohms, matched by 50Ω Cable. Aluminum alloy tubing permits outdoor mountings. Special tapered lock bushings hold each section in place simply by turning and pushing down. The center mounting insulator is 4 1/2" high.

No.	Open	Frequency Range in Mcs.	Telescoped	List Price
158	82	155		\$8.00
160	40	75		9.50

MOUNTING STRAP

A very useful aid in securing poles of television or mast antennas to vent pipes. It is made of cadmium plated steel and is 21" long.

No. 626—Mounting Strap. Std. Pkg. 25. \$0.45 List

GUY WIRE

Constructed of high tensile strength galvanized steel wires. Ideal for guying up transmitter and receiver towers and poles.

No. 19—Guy Wire, 25 ft. Coil each	\$0.40 List
No. 20—Guy Wire, 50 ft. Coil each	.80 List
No. 220—Guy Wire, 500 ft. Spool	7.50 List

No. 148 UNIVERSAL WAVE ANTENNA (FOR EVERY TYPE OF RECEIVER)

The No. 118 All Wave Antenna is the same as the No. 150, but is packed in a special attractive two color box imprinted to customer's specifications. This kit is designed for efficient operation with all types of receivers. Standard cartons of 20 kits.

No. 149—All Wave Kit without Receiver Coupler. each	\$5.00

Birnbach AERIAL ACCESSORIES

LEADIN STRIPS

Covered with a heavy cotton braid, weather-proofed, with numerous coats of lacquer. The Clips are riveted and soldered at both ends. List Price—No. 611—Black 12".....50.....\$0.11
612—Black 16".....25......25
613—White 12".....50......12

DOUBLET LEADIN STRIPS

Two strips held parallel to each other by a piece of bakelite prevents them from moving back and forth. Available in black or white. No. 2611—Std. Pkg. 25 Ea. \$0.25 List

Screw Terminal Leadin Strip

Locks the wire together with the strip in a secure connection assuring perfect contact. Has weather-proof covering over a copper strip with cadmium plated terminals. Available in white or black. List Price—No. 617—Leadin Strip.....50.....\$0.17
2617—Doublet Leadin Strip.....25......35

COPPER STRAP CLAMP

Will take 1/2" to 1" pipe. Made of copper with Birnbach clip riveted and soldered to strap, complete with nut and bolt. List Price—No. 600—Std. pkg. 50. Ea. \$0.10 List

C-CLAMP

Attaches easily to a water or radiator pipe. The cone pointed screw cuts through and makes positive contact. Cadmium finish prevents rusting. List Price—No. 615—Std. Pkg. 25 Ea. \$0.25 List

SADDLE GROUND CLAMPS

These ground clamps have a hard pointed screw which digs through rust and makes a positive contact. Fits a 1/2" to 2" pipe. List Price—No. 625—Heavy Saddle Clamp.....50.....\$0.18
630—Light Saddle Clamp.....50......15

GLASS INSULATORS

Made of crystal clear glass and have a smooth surface which prevents dirt or ice to collect. Std. List Price—No. 600.....100.....\$8.00
660.....100.....11.50
661—Flat Type.....100.....12.50
612.....100.....13.50
650.....100.....25.00

PORCELAIN INSULATORS AND NAIL-IT KNOBS

Std. List Price—No. 606—Brown or White.....100.....\$8.75
609—Nail It Knobs.....100.....7.50

GROUND RODS

The Ground Rod when driven into the ground will afford a highly efficient ground. Std. List Price—No. 616—1 Ft.....12.....\$1.25
818—6 Ft.....12.....2.00

AERIAL SPRING ADJUSTER

Prevents swaying and swaying of antennas and eliminates the resultant fading of signals. Consists of two hooks with porcelain rings interlocking with a powerful compression spring. Cadmium plated throughout. List Price—No. 765—Birnbach Aerial Spring Adjuster.....each \$0.80

PORCELAIN TUBES

To bring a lead-in into a building, we advise our Porcelain Tubes, which require a 1/2" dia. hole. Std. List Price—No. 42.....100.....\$5.00
43.....100.....6.00
44.....100.....7.50
46.....100.....10.50
48.....100.....15.00

PHOSPHOR BRONZE

It has about twice the strength of copper. It is used extensively on Master Antenna Systems where strength and reliability are demanded. List Price—No. 499.....100.....\$8.50
524.....100.....5.00
526.....100.....4.75

COPPERWELD ANTENNA WIRE (STRETCHLESS)

Has a steel core covered with copper and heavily enameled. It will not elongate because of its high tensile strength—which is several times that of enameled copper wire. It has low R.F. resistance and is ideal for transmitting doublet and directional antenna systems as it will maintain the frequency characteristics of the antenna because of its stretchless qualities.

The above items meet all requirements of Army-Navy joint specification JAN-C-76. Type SRIR for plain resin construction where highest resistance to fungus growth is required.

SPECIFICATIONS FOR THE JAN-C-76

- I—Electrical Properties:
 - A—Dielectric strength
 - B—Insulation resistance
 - C—Creepage resistance
- II—Mechanical Properties:
 - A—Low temperature flexibility
 - B—High temperature stability
 - C—Resistance to heat deformation
 - D—Abrasion resistance
 - E—Low moisture absorption
- III—Chemical and Other Properties:
 - A—Resistance to common solvents
 - B—Flame resistance
 - C—Fungus resistance

SHIELDED LEAD-IN WIRE

Used to prevent the pickup of interference or man-made static. Consists of a stranded tinned copper conductor with a wall of live rubber over which a tinned copper braid is woven.

RADEX SLIPBACK HOOKUP WIRES

It has a covering of rubber over a cotton wrap and is then covered with a bright color cotton braid and dipped into paraffin. This construction will not cause the cotton insulation to fray or bunch up when pushed back. It has a high dielectric strength and will withstand all climatic changes without breakdown.

RUBBER S. J. CABLE

Consists of individual flexible tinned copper conductors, each insulated with a heavy wall of colored rubber for easy identification. A 1/32 wall of tough polished rubber is placed overall. It is a weatherproof cable, ideal for outdoor use, and will withstand hard and rough usage.

FM and TELEVISION TWIN LEAD 300 OHM TRANSMISSION WIRE

This transmission line is designed to maintain top performance for FM and Television Receivers under the most rigorous conditions. Has full thickness insulation

throughout the cable. Smooth solid polyethylene insulation resists water, alkalies, oil, acids and abrasion—will not get brittle or age in sunlight.

The Birnbaach 300 ohm line minimizes the effects of attenuation and impedance mismatch—providing maximum freedom from distortion. **R.M.A. STANDARD:** Conductors: 2 C Bare Copper 7 #28 Awg—Insulating Material: Polyethylene—Weight: 17 lbs. per 1000 ft. Mutual Capacitance: 4.8 mmfd. per ft.—Characteristics: Impedance: 300 ohms—Attenuation 50 MC: 0.68 Decibels per 100 ft.—Attenuation 100 MC: 0.85 Decibels per 100 ft.

No.	List Price

7029—100 ft. Coil, indiv. boxed	4.50
7030—1000 ft. Spool	42.00

(* Also available in 75 ohm and 150 ohm impedances—prices on request.)

EOI Transmission Cable (GENUINE)

This cable has a surge impedance of 72 ohms which accurately matches the impedance at the center of the half wave Hertz Antenna. It is constructed of 2 No. 12 Bare Copper conductors having a paper wrap. A special high frequency rubber insulates each side of the line and accurately maintains the impedance. It has a special weatherproofed cotton braid overall with a mica finish.

73 OHM COAXIAL CABLE RG-59/U

Constructed of No. 22 solid plain copperweld with .146 O.D. Dielectric insulation, then with copper inner shield and Black Vinyl jacket. Overall O.D. is .242. Nominal impedance 73 ohms. Nominal capacitance 21 mmf. per ft. These characteristics permit peak receiver performance without distortion from locally induced interference—will meet all requirements for all frequencies including the Television and FM range.

Birnbach

BIRACO TUBING DIAL and MAGNET WIRE

DIAL CABLE 42 Strand Phosphor Cable

Constructed of the finest phosphor bronze wire over a linen thread center. Due to its high tensile strength, it will not stretch.

- No. 1025—25' Spool List Price \$1.20 each
- No. 1050—50' Spool List Price 2.25 each
- No. 1051—100' Spool List Price 4.00 each
- No. 1052—1000' Spool List Price 33.00 each

Phosphor Bronze (Light Cable)

A lower quality cable than No. 1025, but a cable that will give good service. This is a braided Phosphor Bronze cable.

- No. 1053—25' Spool List Price \$0.66 each
- No. 1054—50' Spool List Price 1.25 each
- No. 1055—100' Spool List Price 2.50 each
- No. 1056—1000' Spool List Price 18.50 each

Extra Heavy Linen Dial Cable

Made of the finest linen for replacement on all receivers, same as used for Philco. It is extra heavy for exceptional long service.

- No. 1057—25' Spool List Price \$1.30 each
- No. 1058—50' Spool List Price 2.50 each
- No. 1059—100' Spool List Price 4.50 each
- No. 1060—1000' Spool List Price 36.00 each

Heavy Linen Cable

This braided cable is used for replacement for all Philco Receivers.

- No. 2025—25' Spool List Price \$1.30 each
- No. 2050—50' Spool List Price 2.50 each
- No. 2051—100' Spool List Price 4.50 each
- No. 2052—1000' Spool List Price 36.00 each

Light Linen Dial Cable (Silk Core)

High quality linen cable used on many receivers specially treated to prevent slipping.

- No. 3025—25' Spool List Price \$1.20 each
- No. 3050—50' Spool List Price 2.25 each
- No. 3051—100' Spool List Price 4.00 each
- No. 3052—1000' Spool List Price 25.00 each

Extra Light Linen Cable

It is a strong extra thin linen cable for replacement. Braided of the finest black linen.

- No. 4025—25' Spool List Price \$0.75 each
- No. 4050—50' Spool List Price 1.40 each
- No. 4051—100' Spool List Price 2.50 each
- No. 4052—1000' Spool List Price 18.50 each

SPRING WIRE CLIPS

They will hold a wire, up to No. 10 B&S Gauge, in a secure contact. All clips are brass nickel-plated.

- | No. | Length | Std. Pkg. | List Price |
|-----|----------------|-----------|------------|
| 32 | Spring Clip 1" | 100 | \$2.00 |
| 33 | Twin Clip .13" | 100 | 8.50 |

ALL RUBBER LAMP CORD

This cord is an all rubber covered insulated parallel cord which can be separated by starting with a knife. Connects easily and cannot get hot. Sanitary and neat.

COLORS: Black, White, Brown

BIRACO TUBING (Extruded)

It is an extruded tubing made of the new synthetic plastic material. Extremely flexible and when stretched returns to its original form. Withstands the effects of heat and will not support combustion. Will only soften at 300°F and will not flow at 425°F. Its dielectric strength—750 volts per mil, when dry and 350 volts when wet. It is not affected by oil and is resistant to most coal tar solvents and petroleum solvents. Resists acids, alkalies in concentrations up to 30% by weight. Available in continuous lengths. Dielectric strength—10,000 volts.

Birnbach

TEST LEADS and ACCESSORIES

High Voltage Test Leads

The high dielectric strength and low leakage resistance of these test leads recommend them for testing high voltage high sensitivity devices such as Meggers and Megohmmeters. They are particularly well suited for use in testing breakdown voltages up to 1200 volts. The prods and the tip handles are made of black and red bakelite with special designed tips for application. The prods are 6" long and 1/2" dia. and have a guard ring near the metal tip to prevent accidental touching of the exposed metal part. Extra heavy knickless test lead wire 7 3/4" dia. is used throughout. The leads are 60" long.

No. List Price
562—High Voltage Test Leads \$5.00

DeLuxe Test Leads

Constructed with 5" long cast phenolic red and black handles with removable needlepoint or solderless tips. Black and red heavy knickless instrument 18" long is used to connect the prods with the insulated red and black cast phenolic solderless tip. Either needlepoint or solderless tip available.

No. List Price
560—Solderless prod test leads...\$1.75
561—Needlepoint prod test leads 1.75

Bakelite Pencil Type Test Leads

Red and black bakelite handles, 6" long and 5/16" in dia. and red and black bakelite insulated phone tips. Heavy knickless wire is used together with the Birnbach Serulok system of solderless wire connection. The Universal needle and phone tip prod have the same dimensions as the standard phone tip and are useful for piercing insulation without damage. The needlepoint is extra heavy to prevent breakage and should it become broken can be readily replaced. Available only in combination of needlepoint prods and insulated phone tips. Length overall 60".

No. List Price
408—Bakelite Pencil Type Test Lead...\$2.50
439—Needlepoint Prod Tip for Replacement...25

Test Leads (Bakelite Handles)

Have 4" red and black insulated handles. Needles can be replaced when broken simply by loosening the knurled collar. Available with either phone tips or spade lugs. Length overall 50".

No. List Price
4420—Phone Tip Test Leads...\$1.12 1/2
4421—Spade Lug Test Leads...1.12 1/2

Standard Test Leads

Same as above with a Sr. solderless phone tip.

No. List Price
422—Phone Tip Test Leads...\$1.00
423—Spade Lug Test Leads...1.00

Insulated Solderless Phone Tips

Insulated handles 3/4" dia. by 1" long fitted to solderless phone tips. The wire can be easily attached by threading through the hole in the handle and tightening the knurled nut. Colors:—red, black, green, and yellow.

No. List Price
409—Insulated Sr. Solderless Tip—2 1/4" Long...each \$0.20
415—Insulated Jr. Solderless Tip—1 1/2" Long...each .18

Insulated Phone Tip

The insulated handle is 1" long, 3/8" dia. Connection is made by threading the Serulok threaded bushing (see drawing). Colors: red, black, green and yellow.

412—Serulok 1 1/4" Tip, 1 1/8" Long...each \$0.24
419—Serulok 1 1/4" Tip, 1 1/8" Long...each .30

Phone Tip

Ideal for replacement on headset, speaker and extension cords. No. 402—Std. Pkg. 100 List Price \$2.25 per C

Solderless Phone Tips

Milled of solid brass and nickel-plated. Designed for easy insertion of the wire.

No. List Price per C
24—Junior...\$11.50
24—Senior...12.50
Std. Pkg. 100.

No. 26 Phone Tip Jack

Milled of brass and nickel plated. The bronze springs are specially made to hold the phone tip tight and straight. Mounts in a 3/8" dia. hole.

No. 26—Std. Pkg. 100. List Price \$12.50 per C

No. 407 Insulated Tip Jack

Has a 3/8" insulated top and mounts in a 3/8" dia. hole. The specially designed bronze springs hold the phone tip tight and straight. Colors:—red, black, yellow, and green. Std. Pkg. 100.

407—Insulated Phone Tip Jack...\$0.18

Knickless Test Lead Wire

Abrasion resisting live rubber that will not kink or break down in service. No. 20 has 41 strands and No. 18 has 66 strands of No. 36 tinned annealed copper wire.

COLORS:—Red and Black.

No. 411 Bakelite Pencil Test Prods

These prods have the Birnbach Serulok solderless needlepoint tips. They are made of bakelite and are 6" long and 1/4" dia. The connection is made by threading the wire through the handle and securing to the needlepoint tip by locking the Serulok. The tip is then screwed into the handle. Available in red or black only.

No. List Price
411—Bakelite Pencil Test Prods...\$1.10

Solderless Tip Prod

Made of highly polished cast phenolic resin. A solderless phone tip is threaded at end permitting replacement of tip. Available in red or black.

No. List Price
410—...4" Handle...\$0.50
343—...5" Handle...50

Needlepoint Test Prod

A threaded shank needlepoint chuck is threaded into the end of handle. Made of highly polished cast phenolic handle. Available in red or black.

No. List Price
344—Needlepoint Test Prod, 4" Handle...\$0.45
345—Needlepoint Test Prod, 5" Handle...50

SCRULOK Needlepoint Test Prods

These insulated prods have the Serulok solderless system of wire connection. Wire is easily attached without soldering. An extra heavy needle is fitted into the tip. Colors:—black or red.

No. List Price
417—Needlepoint Test Prod, 3" Handle...\$0.45
418—Needlepoint Test Prod, 5" Handle...50

Headset Phone Cords

These cords are closely woven and are very durable and strong. They are used for replacement of worn headset cords. Standard cords are listed which will match practically all headsets manufactured. We will be glad to quote on cords having special terminal requirements.

Ford V-8 Distributor Suppressor

Designed to be inserted in the distributor of Ford V-8. Unit consists of a resistor brush which replaces the regular brush.

No. 365 List Price \$0.35

AUTO ANTENNA CONNECTOR

Permits quick connection of the auto antenna lead-in to the receiver.

No. 366—Auto Connector per C \$20.00

FUSED ANTENNA CONNECTOR

This connector takes a standard 3 AG automobile fuse. Used in auto radio power supply cables.

No. 367—Fused Connector per C \$25.00

HIGH VOLTAGE LACQUERED WIRE

Recommended for use as leads for wiring high voltage devices, and transmitter power supplies. Constructed of tinned stranded copper conductor with a wall of rubber covered with a highly lacquered cotton braid.

Constructed of tinned stranded copper conductor with two layers of varnished cambric and a lacquered cotton braid which is woven over which a lacquered cotton braid is woven.

No.	Ft.	Size	Puncture Voltage	O.D.	List Price
2810—100	10 1/2	16	9500	2.25	\$10.50

AVAILABLE IN SPECIAL LENGTHS

BIRNBACH IGNITION FILTERS

These Ignition Filters completely eliminate all ignition and high tension circuit interference, making clear auto radio reception a certainty. The only ignition filters having a copper wound inductance, which accounts for the low resistance of 120 ohms for the Ignition Filter. Less gasoline is consumed than when high resistance filters are used.

No.	List Price each
350—Ignition Filter—Bracket Type	\$0.85
351—Ignition Filter—Cable Type	.85
352—Distributor Filter	.85
353—Ignition Filter—Screw Type	.85
359—Ignition Filter—Slip-on Type	.85

BIRNBACH MASTER FILTER

Eliminates all ignition interference and does away with the necessity of having a separate filter for each spark plug. Available in two types, namely, the Distributor type for easy insertion into distributor head, and the Cable type to be placed into the distributor lead where it is impossible to insert it into the distributor head.

No.	List Price each
354—Cable or Distributor Type	\$3.50

AUTO NOISE FILTER

These are especially designed for the elimination of noise created by generator commutator, electrical windshield wiper, horn, and especially dome, tail, and stop light cables. Connections made by bolting down the flange of container to chassis. The long insulated lead with a convenient screw lug is connected to the source of interference.

No.	List Price
355—Auto Noise Filter—1/2 Mfd.	ea. \$0.75
356—Auto Noise Filter—1 Mfd.	ea. .75

Birnbach PLUGS and JACKS

GIANT PLUGS

Used for heavy current, they are rated at 25 amps. The long life nickel silver alloy spring is secured over a pin preventing a collapse of the spring and also maintaining the full action of the spring when inserted into the jack. The No. 398A plug has a hole in the threaded shank to permit soldering to it. It is used extensively on diathermy electrode pad cables. Standard Package 25.

No.	A	B	C	List Price
396 Plug	1 1/2"	—	10-32	each \$0.30
397 Plug	1 1/2"	—	1/4-20	each .35
398 Plug	1 1/2"	5/8"	1/4-28	each .30
398A Plug	1 1/2"	5/8"	1/4-28	each .30

Large area of contact is one of the outstanding features of these jacks and plugs. The No. 400 series of packages have a nickel silver contact spring secured over a full length central pin, making these plugs non-collapsible and assuring a low resistance contact. Capacity 5 amperes. Standard Package 100.

No.	A	B	C	List Price
400 Plug	3/4"	1/2"	6-32	each \$0.12
401 Plug	3/4"	—	6-32	each .13
404A Plug	3/4"	5/8"	1/4-28	each .18

BANANA PLUGS

No. 403 BANANA JACK

Accurately milled and has a precision reamed hole to help maintain the tight and smooth action of the plug. It is made of brass nickel plated and comes complete with nut and lug. Standard Package 100.

No.	A	B	C	List Price
403 Jack	1/2"	3/8"	1/4-28	\$0.12

INSULATED BANANA JACKS

The No. 391 Jack is very popular with the electric therapeutic manufacturers. The 1/2" dia. insulated head admits all of the exposed metal part of the metal plug when inserted. Mounts in a 3/8" dia. hole on a panel up to 3/8" thick. The No. 406 Jack has a 3/8" dia. insulated top. It fits into a 3/8" dia. hole and takes up to a 3/8" panel. Both come complete with insulating shoulder washer, nut and lug.

No.	Std. Pkg.	List Price
391—Insulated Jack—red or black.	50	\$0.19
406—Insulated Jack—red, black, yellow, or green.	50	.18

SHAFT COUPLINGS, REDUCERS AND EXTENDERS

By the use of these units all 1/4" and 3/8" dia. shafts and knobs can be assembled together. The insulated units are for use where electrical isolation is desired. Furnished complete with set screws shown. Be sure to specify whether Brass or Insulated is desired.

No. 392 INSULATED GIANT PLUG

Made so that no projecting edges are exposed, thereby protecting the user from unnecessary contact. Connection is made by soldering into the hole at the end of the threaded shank of the plug. Handle is 1 5/8" long by 3/8" dia.; length over all 3". Colors: red or black.

No. 392—Insulated Giant Plug..... List Price \$0.50

No. 393 INSULATED GIANT JACK

Designed to leave no metal part exposed on the panel. The 5/8-24 brass nickel plated sleeve has a 10-32 threaded hole at the end permitting a connection at the end of the jack on to the lug under the head. Either assembly available complete with nut, insulating shoulder washer, lock washer and lug. Length overall 1 1/2". Colors: red or black.

No.	List Price
393—Insulated Giant Jack under head lug.....	\$0.45
393A—Insulated Giant Jack end lug.....	.45

HARD RUBBER INSULATED GIANT PLUG

Especially designed for use with diathermy cables. It has a 3/8" dia. hole in the handle to take the largest cable. It is made of polished black hard rubber. The handle is 3" long by 3/8" dia. Overall length is 4 1/2".

No. 342—Hard Rubber Insulated Plug..... List Price \$2.00

No. 341 Insulated Banana Plug

This plug consists of our No. 404A plug with a tapered handle 1 3/4" long by 1/2" dia. Used on a therapeutic apparatus and test equipment. Overall length 2 5/8". Colors: red or black.

No. 341—Insulated Banana Plug..... List Price \$0.45

No. 404 Insulated Banana Plug

The plug is for experimental test leads because of its Serulok solderless connection and the non-collapsible special alloy springs assembled on a pin preventing collapse of the plug spring. The handle is made of phenolic resin and is 3/8" by 1" long. Colors: red, black, yellow and green.

No. 404—Insulated Banana Plug..... Std. Pkg. 50..... List Price \$0.20

No. 604 BANANA PLUG

Made of solid brass nickel-plated, with the end being slotted. The cast phenolic handle is 1" long by 3/8" dia. and is held on by the screw that secures the wire to the plug. Colors: red, black, yellow and green.

No. 604—Plug..... Std. Pkg. 50..... List Price \$0.19

No. 605 HANDLE JACK

Consists of a banana jack inside an insulated sleeve. Connection is made by soldering to the end of the jack. Handle is made of cast phenolic resin 3/8" dia. by 1 1/4" long. Colors: red, black, yellow and green.

No. 605—Handle Jack..... Std. Pkg. 50..... List Price \$0.25

CORRUGATED FEEDTHRU INSULATORS

The six new corrugated type feedthru insulators have more than twice the leakage path of the straight type because of increased surface of the corrugations and recommends itself where a straight side insulator of equal height is not satisfactory because of its shorter leakage path. Brass nickel-plated hardware and cork mounting washers supplied.

HIGH VOLTAGE FEEDTHRU INSULATOR

This insulator has been designed to meet the demand for an insulator having high dielectric and mechanical strength. The extra long leakage path is made possible by the corrugations on the top insulator. The bottom sleeve taper from a base dia. of 1 1/2" where the electric stress is greatest.

Height 1 5/8" Base Dia. 2" Mounting Hole 1 1/4" Hardware 1 1/2-20 No. 4233 List Price \$0.80

METAL BASE INSULATORS

Designed to replace conventional porcelain insulators where failure of the base is due to cracking when stressed down. Extremely long leakage paths due to the corrugated surface is one of the important characteristics. They are made from high tensile strength low absorption porcelain smoothly glazed all over. Supplied with nickel-plated brass screws and nuts and cadmium plated drawn steel bases.

"LUCITE" FEEDTHRU INSULATORS

These feedthru insulators are ideal for bringing high frequency leads thru a panel. They are made of genuine Dupont Lucite. Because of its low loss at high frequency, it is well adapted to insulated elements of high frequency circuits. The 1/2" dia. insulators have brass nickel plated 6-32 hardware and the 3/4" base 10-32 hardware.

STANDOFF INSULATORS

The sizes range from 5/8" to 4 1/2" high in five properly graduated heights. Made of highly vitrified low absorption glazed porcelain. No washers are necessary for mounting as the mounting surface is ground flat; but for the No. 405 and No. 966 Standoff Insulators, it is advisable to use cork washers which are available as they will permit mounting securely without breakage. All brass nickel-plated hardware is supplied. Available in white or brown glaze.

LEADIN INSULATORS

Each cone is 2 3/4" high and made of low absorption, highly vitrified glazed porcelain. The Nos. 4237 and 4238 Leadin Insulators have sufficient insulating bushings to insulate the rod that goes through the wall. In addition, 2 bushings are included, 1/4" and 1/2" long, allowing complete insulation of the threaded rod of any length in multiples of 1/4". They come complete with brass nickel-plated hardware and lead and cork washers to permit a water-tight seal.

No.	Description	List Price
4235	—10" Rod	\$1.75
4236	—15" Rod	2.00
4237	—10" Rod with bushings	2.25
4238	—15" Rod with bushings	2.85

STEATITE BUTTON

These specially designed steatite buttons are intended for use to simplify wiring and to be used as a binding post or a binding post insulator, or as a standoff insulator. Attention is called to the uniqueness of the design which prevents either section of the insulator from turning in respect to the special screw. The specially designed screw locks both sections.

A 1/2"	B 1/2"	C 3/4"	D 1 1/2"	E 6-32
No. 457		Std. Pkg. 25		List Price \$0.30

STEATITE PILLARS

(Without Hardware)

In many constructions, these unmounted threaded steatite pillars will facilitate assembly because of the one-hole mounting and parallel mounting surfaces. They are made of glazed Steatite with threaded holes on both sides.

No.	Height	Dia.	Threaded Hole	List Price

449	4"	3/4"	1/4-20	.95

AIRPLANE INSULATORS

Used on mobile antenna installations, particularly on aircraft, as they are shaped for the least air resistance. They are made of white glazed low absorption porcelain.

No.	Length	Std. Pkg.	List Price
473	2"	100	each \$0.15
474	1 1/2"	100	each .21

STEATITE AIRPLANE INSULATORS

A very small compression type insulator with small wind resistance. It is 1 1/2" long and 1/2" dia.

No. 463—Std. Pkg. 25, List Price \$0.35

TUBE CLAMPS

These tube clips will be found extremely desirable when mounting resonant lines or elements of directive beam antennas. They are made of hand drawn aluminum and are available for 1/4", 3/8", 1/2", 3/4" and 1" dia. tubes. The 1/4", 3/8", and 1/2" have a clearance hole for No. 10 screw and the 3/4" and 1" dia. clamps have holes for 1/4" bolts.

Cat. No.	To Fit Tube	List Price
51—Clamp	1/4" Dia.	each \$0.18
52—Clamp	3/8" Dia.	each .18
53—Clamp	1/2" Dia.	each .18
54—Clamp	3/4" Dia.	each .18
55—Clamp	1" Dia.	each .30
56—Clamp	1" Dia.	each .40
57—Clamp	7/8" Dia.	each .40

FLEXIBLE SHAFTS

At times there is difficulty getting the controls to the proper position on the panel. With couplings and these flexible shafts, locations can be made with ease on an offset and angles up to 90 degrees. The flexible shafts are made of phosphor bronze and fitted into 1/4" dia. hubs.

Cat. No.	List Price
553—Flexible Shaft, 3" long	each \$0.60
554—Flexible Shaft, 6" long	each .85

TRANSMITTING TUBE SOCKETS

Improved design and additional features of the Birnbach transmitting sockets has increased their popularity and are accepted as standard. The 50 watt socket has extra heavy side-wiping phosphor bronze contact spring with the filament spring having a double contact to safely carry the heavy current. The tube base is supported by the highly polished nickel-plated brass shell set in a highly vitrified low absorption porcelain base which is ground flat to prevent breakage. All brass nickel-plated screw and milled nuts are used.

Cat. No.	List Price
434—50 Watt Socket	each \$1.70
435—10 Watt Socket	each 1.25

RCA ELECTRONIC COMPONENTS

TELEVISION AND FM ANTENNAS

Bright Picture Antenna

For TV Sight and Sound reception on all 13 channels (44-88 and 170-216 Mc) as well as on FM.

Available with or without reflector. Tubular steel, non-sagging elements are plated with zinc. Water-resistant wooden cross-arms. Antenna rods cut to exact length; no trimming necessary regardless of frequency used.

Stock # 226A1 (bi-directional). Sugg'd List Price: \$10.00
Stock # 225A1 (uni-directional). Sugg'd List Price: \$13.50

STOCK NO.
225A1

FM Folded Dipole & Reflector

Signal response unusually flat over entire 88-108 Mc FM band with standing-wave ratio of less than 3. Ideal for use in areas of weak signals.

Price includes 5' wooden mast and coated-steel mounting brackets.

Elements made of lightweight, durable aluminum. No special tools required for installation. Complete instructions included with each assembly. Stock # 228A1. Sugg'd List Price: \$13.50.

STOCK NO.
228A1

ANTENNA ACCESSORIES

Bright Picture Transmission Line

Especially designed for Television and FM. Special chemical-resistant plastic finish insures continued flexibility even in extreme heat or cold. Ultralow loss—less than 0.8 db per 100' at 50 Mc; less than 1.2 db per 100' at 100 Mc. 4.5 μ mf per foot capacitance. Propagation velocity 83%. Extra strong—supports a mile of its own weight (75 lbs.) before breaking. Stock No. 201A1. Sugg'd List Price: \$47.50 per 1000'.

STOCK NO. 201A1

Antenna Mounting Brackets

For use with RCA Antennas Stock # 225A1 and # 226A1. Readily adjustable to permit mounting on any roof—regardless of overhang. Can be attached to brick, stone or wood. Entire bracket is plated with bright zinc, preventing rusting and subsequent staining of building surfaces. Special angular supports eliminate sagging. Stock No. 227A1. Sugg'd List Price: \$7.50 per pair.

STOCK NO.
227A1

Twin-Lead Lightning Arrester

For use with FM and TV antennas. Easy to install—cutting or stripping of transmission line is unnecessary. Fits any 1/2"-2" pipe. Continually dissipates static surges. Does not unbalance line. Brown plastic case. Stock No. 206X1. Sugg'd List Price: \$1.50.

STOCK NO.
206X1

All prices in effect 6-1-48.

GENERAL ELECTRIC

FM AND TELEVISION ANTENNAS

Designed to Match 300 OHM Impedance

Extremely light in weight, General Electric FM and Television Antennas are mechanically rugged, directional both front and rear broadside to transmitter and prove very effective in areas of low signal strength. Both antennas are easy to erect and orient in the desired direction, to obtain maximum signal strength.

The dipoles are constructed of high quality reinforced aluminum tubing. A terminal block of textolite, formed under pressure to insure uniform structure throughout, is supported on sturdy mast with suitable clamps for mounting the complete assembly. All metal parts are either painted or electroplated to insure all weather protection.

FM Antenna UKA-001 List \$ 9.00
Television Antenna UKA-002 List 14.95

LOW LOSS LEAD-IN CABLES

Polyethylene—insulated twin conductor cable designed to RMA standards. Gives years of service with minimum electrical loss and generous resistance to various forms of deterioration.

Standard 300 ohm Transmission Cable—UWT-002: Lightweight, easy-to-install cable, intended particularly for home or indoor installations where runs extend under carpets or windows. May be used outdoors for vertical, protected runs of 20 feet or less.

Deluxe 300 ohm Transmission Cable—UWT-003: This line of heavy construction is designed for long spans indoors or outdoors such as is required in showrooms, hotel, etc. Because of the extra-thick insulation against the effects of rain or moisture, it is especially fine for outdoor use.

Dielectric constant of polyethylene 2.30
 Capacitance 5.8 mmf per ft.
 Velocity of propagation 82% (approx.)
 Power factor of polyethylene 0.0003—0.00045
 List—UWT-002—1000 ft. reel \$48.50
 UWT-003— 500 ft. coil \$82.45

TELEVISION ANTENNAE

The selection of the right antenna for any television installation is of utmost importance and usually requires the experience of a trained service engineer. After all, without a good strong clear signal, the entire television program will fail to provide the enjoyment and entertainment of which it is capable. Outlined below are the general rules:

Single Dipole Antennae with or without reflector, in the immediate vicinity of the transmitter; Folded Dipole Antennae with or without reflector, within the normal service area; Double-Doublet Antenna with reflector, is a "must" in the outlying areas 25-75 miles away from the transmitters, the distance depending on the power of the transmitter and local conditions.

For fringe areas or in poor reception areas, Stacked Dipoles, such as the No. 490 Stacked Folded Dipole or an array constructed by stacking two No. 435 Double Dipole Antennae, are the only reliable answer to a satisfactory television installation.

Impedance matching and the selection of the proper transmission lines are solved automatically with TACO laboratory and field-tested antennae. If in doubt, our engineers will help out with free advice. TACO antennae cover all 13 channels. They are shipped from the factory, complete with all parts for a quick, satisfactory field installation. Complete installation instructions, containing many time-saving hints, are packed with each antenna. Mounting brackets for attachment to the side of a building as well as a swivel base mounting socket is standard equipment with all TACO television antenna.

STACKED FOLDED DIPOLE ANTENNA

Catalog No. 490 Stacked Folded Dipole Antenna with reflectors is a high-gain, highly-directive array designed for low-signal-strength areas. It has a gain over a single dipole of $3\frac{1}{2}$ to 1, and front-to-back ratio of about 15 to 1. The general horizontal field pattern is shown in the graph, the dotted line giving the pattern of a single dipole antenna for comparison purposes. The vertical pattern of a stacked array is also flat or same as the horizontal pattern shown in graph. This flat field eliminates many bothersome ground reflections. The high-noise-rejection factor of this antenna, combined with its high gain, makes it the ideal type in hard-to-receive localities. The antenna must be placed high above the ground for best result. The antenna is designed for channels 3, 4, 5. Covers channels 7 - 13 equally well. See separate catalog for details.

CAT. No. 490-3 is designed for maximum reception in the three lower channels. Complete less mast and transmission line. Shipping weight 11 lbs. List Price \$39.50.

CAT. No. 490-4 tuned for channel 4. List Price \$39.50.

CAT. No. 490-5 tuned for channel 5. List Price \$39.50.

Same as above antenna but including 3 section 15 ft. aluminum mast and one pair No. 190 mast bracket.

CAT. No. 495-3. ANTENNA. List Price \$47.00.

CAT. No. 495-4. ANTENNA. List Price \$47.00.

CAT. No. 495-5. ANTENNA. List Price \$47.00. Shipping weight 17 lbs.

DOUBLE-DOUBLET ANTENNA

The Double-Doublet Antenna is probably the best known and undoubtedly the most dependable television antenna developed to date. It covers both the low and the high television band equally well. Due to its high directivity in the horizontal as well as the vertical plane, it has a high discrimination factor giving a cleaner picture than is possible with single-dipole antennae. Its flat vertical field practically eliminates ground reflections and troublesome ghosts.

For reception beyond the normal service range of the television station, a couple of No. 435 antennae, stacked one above the other, similar to No. 490 antennae, will increase the gain further and improve the discrimination factor. A Transmission Line Adapter (Cat. No. 448) will assist in this stacking. Specify the channels to be received. Order 193-(3) for reception of channels 2-3-4 and order 448-(5) for reception of channels 4-5-6.

CAT. No. 435. DOUBLE-DOUBLET ANTENNA-REFLECTOR. Combination of Double-Doublet Antenna with reflector. Consists of four high-strength aluminum dipole rods; four reflector rods; two reflector extender rods; two jumpers with terminal posts; two dipole supports with terminals and neoprene grommets; 60 ft. 300-ohm ribbon type transmission line; 5 ft. aluminum mast, three stand-offs mounting hardware, complete instructions. Shipping weight 10½ lbs. List Price \$27.00.

CAT. No. 435L. DOUBLE-DOUBLET ANTENNA-REFLECTOR. For channels 2 - 13. Same as above but less the 60 ft. transmission line. Shipping weight 10 lbs. List Price \$24.00.

CAT. No. 436. H-TYPE ANTENNA. Consists of 4 aluminum dipole rods; 2 rod supports with terminals and neoprene grommets; a spacer post with mounting clamps for mast; 60 ft. of 300-ohm high-frequency transmission line; 2 jumpers with terminal screws; 5-ft. aluminum mast; 3 special standoffs; mounting hardware; complete instructions. Shipping weight 6½ lbs. List Price \$18.50.

CAT. No. 436L. H-TYPE ANTENNA, LESS TRANSMISSION LINE. List Price \$15.50.

CAT. No. 437. H-TYPE REFLECTOR. Consists of 4 dipole rods with connectors; 1 crossarm (heavily enameled steel); 1 spacer post; mounting hardware. Shipping weight 5 lbs. List Price \$10.50.

CAT. No. 448-(). STACKING ADAPTER for stacking two No. 435 antennae for increased gain in low signal areas. Consists of two transmission line rods; 1 bakelite terminal panel; 1 brace for terminal panel; hardware; complete instructions. Specify channel when ordering. List Price \$5.75.

Prices will be those in effect at date of shipment

TELEVISION FOLDED ANTENNA-REFLECTOR

This combination provides a natural impedance match for the 300-ohm transmission line. Recommended in areas with medium to strong signal strength. Adjusting bars permit split-hair tuning to eliminate ghosts in difficult installations. Packed complete with hardware and 5 ft. aluminum mast as well as TACO strain insulator for securing ribbon type transmission line.

CAT. No. 440. FOLDED DIPOLE ANTENNA-REFLECTOR: For unidirectional reception. Complete with aluminum mast, 60 ft. 300-ohm transmission line; folded dipole elements; reflector elements; crossarm; standoff insulators; mounting clamps and hardware. Shipping Weight 8 lbs. List Price \$19.50.

CAT. No. 440L. FOLDED DIPOLE ANTENNA-REFLECTOR: Same as above less transmission line. List Price \$16.50.

CAT. No. 441. FOLDED DIPOLE ANTENNA, without reflector, including 60 ft. transmission line, 5 ft. aluminum mast and all hardware. Shipping Weight 5 lbs. List Price \$13.50.

CAT. No. 442. REFLECTOR FOR ABOVE: Complete with crossarm; reflector rods; hardware; instructions. Shipping Weight 4 lbs. Price List \$7.50.

SINGLE DIPOLE ANTENNA-REFLECTOR

CAT. No. 455. ANTENNA-REFLECTOR COMBINATION is a packaged unit complete with 5 ft. aluminum mast; 60 ft. 300-ohm transmission line; 3 standoff insulators; mounting hardware; instructions. Shipping Weight 8 lbs. List Price \$17.50.

CAT. No. 455L. ANTENNA-REFLECTOR COMBINATION same as above less transmission line. List Price \$14.50.

CAT. No. 453. ANTENNA—LESS REFLECTOR for areas free from ghosts where pickup from two directions is not objectionable. Complete, including 60 ft. transmission line; 5 ft. aluminum mast; hardware; instructions. List Price \$12.50.

CAT. No. 454. REFLECTOR FOR ABOVE. Complete with crossarm and hardware. List Price \$7.00.

Other types of television antennae are designed for specific purposes. The X-type antenna has a very flat response curve with the other general features similar to Cat. No. 455 described above. Completely packaged with aluminum elements, 5 ft. aluminum mast and 60 ft. transmission line.

CAT. No. 459 X-TYPE ANTENNA-REFLECTOR complete with 60 ft. transmission line, mast, mounting hardware. List Price \$19.00.

CAT. No. 457 X-TYPE ANTENNA, LESS REFLECTOR complete with 60 ft. transmission line, mast mounting hardware. List Price \$15.50.

CAT. No. 458. REFLECTOR FOR ABOVE complete with hardware. List Price \$7.00.

HI-LO BAND ANTENNA

The Type 465 HI-LO Band Television Antenna handles Television Channels 7 to 13, as well as the easier 1 to 6. Separate top section adjustable for any direction does the trick. Reliable tapered coupling joint employed. Includes 9 foot mast for necessary clearance over obstacles. Connecting link designed to eliminate interference between the two elements.

CAT. No. 465. HI-LO ANTENNA. Complete with 9' mast and connecting link. List Price \$26.00.

CAT No. 445. ADAPTER. For high-band reception when reflections prevent directing the low-band antenna for best results. Attachable to any make antenna. Complete with 4' mast section and connecting link. May be used as antenna proper in areas with high-band stations only. List Price \$8.75.

CAT. No. 444. STACKED HIGH-BAND ANTENNA. Stacked High-Band Antenna for use in low signal areas as the antenna. Usable as High-Band adapter in conjunction with No. 495 antenna or with any make antenna. List Price \$17.75.

Prices will be those in effect at date of shipment

FM OMNIDIRECTIONAL ANTENNA

TACO Omnidirectional Antenna or "S" design folded dipole, is another form of a circular field pattern antenna at a lower cost. The folded dipole type insures a correct impedance match to the 300-ohm ribbon-type transmission line over the FM band. The antenna is intended for communities which have stations located in several directions and where the signal level is fair. It can be erected on any roof and no special orientation is needed.

CAT. No. 624. OMNIDIRECTIONAL ANTENNA. Complete with 5 ft. aluminum mast; corrosion-resistant aluminum antenna element, 60 ft. transmission line; 3 stand-off insulators for ribbon type line; mounting hardware; instructions. Shipping Weight 5 lbs. List Price \$11.50.

CAT. No. 624ST. STACKED OMNIDIRECTIONAL ANTENNA. For increased gain in low signal areas. Complete with 10' mast, less transmission line. List Price \$20.00.

FOLDED DIPOLE ANTENNAE

CAT. No. 620. FOLDED DIPOLE ANTENNA-REFLECTOR combination for unidirectional reception of FM. Corrosion-resistant aluminum elements with enameled steel crossarm; 60 ft. 300-ohm transmission line; 5 ft. aluminum mast. Complete mounting hardware and instructions. Shipping Weight 6 lbs. List Price \$14.00.

CAT. No. 620L. FOLDED DIPOLE ANTENNA-REFLECTOR same as above less transmission line. List Price \$11.00.

CAT. No. 621. FOLDED DIPOLE ANTENNA LESS REFLECTOR same as above. List Price \$11.00.

CAT. No. 622. REFLECTOR FOR ABOVE to make up antenna-reflector combination. List Price \$5.50.

SINGLE DIPOLE ANTENNA-REFLECTOR

The single dipole antenna-reflector combination is a unidirectional antenna of same general characteristics as the folded dipole. TACO unique matching circuit for dipole termination insures perfect impedance match over the entire FM band.

CAT. No. 650. SINGLE DIPOLE ANTENNA-REFLECTOR COMBINATION: Complete with 5 ft. aluminum mast; 60 ft. transmission line; accessories. List Price \$17.00.

Complete with transmission line and mast. List Price \$11.00.

CAT. No. 652. REFLECTOR FOR ABOVE ANTENNA. List Price \$6.00.

ACCESSORIES and SUPPLIES

***CAT. No. 625. FM-AM SET TRANSFORMER.** Provides both FM and AM reception with usual FM antenna. Normally, this is impractical since most FM-AM receivers have separate terminals for both bands. With this transformer both bands are automatically available to the receiver. Shipping Weight 1½ lbs. List Price \$3.25.

CAT. No. 196. MAST SECTION. 5 Foot heavy wall aluminum tubing with one No. 189 mast coupling. Also acts as guy anchor. List Price \$4.50.

CAT. No. 851. RIBBON TRANSMISSION LINE. Especially for FM and television use. 300-ohm surge impedance. Two stranded conductors insulated with polyethylene ribbon between. 500 ft. coil. List Price \$45.00/mft.

CAT. No. 853. HIGH-FREQUENCY SPLICING TAPE. Indispensable for splicing high-frequency transmission lines. Ordinary tape may actually short-circuit such conductors. 12" length in envelope. List Price \$0.35.

CAT. No. 189. MAST COUPLING. Joins together two sections of 1¼" dia. List Price \$1.00.

CAT. No. 195. MAST 12' ALUMINUM MAST: Three telescoping 4' sections. Sturdy and light. Fulfills all fire and building department regulations for height. Guy anchor and base mounting bracket included. Retatable for television. List Price \$8.00.

CAT. No. 854. GUY WIRE: High-tensile strength steel wire, hot galvanized for long outdoor service life. 100 ft. coil. List Price \$1.30.

CAT. No. 855. TURN BUCKLE: High-tensile strength, galvanized for outdoor use. Screw-eye on both ends. 4" takeup. Packed three to one package. List Price \$0.90 for 3.

CAT. No. 856. STRAIN INSULATOR: Heavy-duty, interlocking type eliminates danger from broken insulator. Used for guys on television antenna installations. List Price \$9.00/c.

CAT. No. 380. ANTENNA INSULATOR: Solid porcelain, glazed low-loss. List Price \$10.50/c. **PORCELAIN NAIL KNOBS:** Used for anchoring antenna transmission line or securing electric fences. Complete with nail.

CAT. No. 375. SOLID PORCELAIN NAIL KNOB. List Price \$10.00/c.

CAT. No. 376. SPLIT PORCELAIN NAIL KNOB. List Price \$10.00/c.

CAT. No. 190-7. MAST BRACKETS (shown at left). For mounting 1½" dia. mast on side of house or parapet, where clearance is not over 7". Heavy steel, galvanized. Pair. List Price \$3.00.

CAT. No. 190-14. MAST BRACKET. Same as above except with 14" clearance for mast. List Price \$3.75.

CAT. No. 409. LIGHTNING ARRESTER. Carbon-pile type Double-pole, Underwriters' Labs. approved. List Price \$1.25.

CAT. No. 383. C-TYPE GROUND CLAMP. For pipes from ¾" to 1½" dia. Hard screw point makes positive contact. Cadmium-plated to resist corrosion. List Price \$16.00/c.

CAT. No. 392-3. STANDOFF FOR RIBBON TYPE LINES. (Illustrated). Slotted low-loss rubber insulator with metal screweye. List Price \$13.50/c.

CAT. No. 392-7. STANDOFF FOR RIBBON TYPE LINES. Same as above except 7" long metal screw eye. List Price \$17.50/c.

CAT. No. 384. SINGLE WINDOW-STRIP LEAD-IN. Readily bends to accommodate closed window. Fully insulated. List Price \$11.50/c.

CAT. No. 377. SCREW-EYE 3" with round hole bakelite insulator. List Price \$3.00/c.

CAT. No. 378. SCREW-EYE 7". List Price \$16.50/c.

CAT. No. 394. DIPOLE RODS. For replacement use. Supplied in pairs for any antenna replacement. Specify antenna type. List Price \$2.00.

Prices will be those in effect at date of shipment

BETTER ANTENNAE for BETTER RADIOS

TACO antenna systems provide the most favorable signal-to-noise ratios. The selection of any one of the several types depends on these considerations:

(1) If standard broadcast and shortwave are to be received; (2) If combination of standard broadcast AM and FM must be received; (3) If the location is quiet; and (4) If the location is noisy.

For condition (1), any one of the kits listed is recommended. For (2) or AM-FM reception, kits Nos. 220-V-FM, 220-FM or 228 FM.

In quiet localities, any one of the kits is recommended. But regardless how quiet the location may be, the TACO noise-reducing antenna system,

due to its impedance matching transformers, will always improve signal-to-noise ratio.

TACO transformers match recommended standards for receiving set input circuits. Such standards are 2000 ohm impedance, with tap for 50 ohms, which is a common input where external antenna impedances or supplements the loop. For FM, the input impedance is 300 ohms.

All TACO kits are attractively packaged and include all components, insulators, antenna wire, downlead cable, and complete instructions.

NOISE-REDUCING ANTENNA SYSTEMS

CAT. No. 228 FM. L-type antenna system (above left). Recommended where inconspicuous installation is desired. Full noise reduction. Covers standard broadcast, shortwave and FM bands. Shpg. Wt. 4 lbs. **List Price \$13.00.**

CAT. No. 228. Broadband and shortwave only. Shpg. Wt. 4 lbs. **List Price \$12.50.**

CAT. No. 520. Economy system (above right). Broadcast and shortwave only. Ideal for low-noise level locations. Set transformer has leads for both hi- ω and low impedance input for standard broadcast band. Shpg. Wt. 4 lbs. **List Price \$10.25.**

CAT. No. 520L. Same as foregoing but less set transformer. Shpg. Wt. 4 lbs. **List Price \$7.50.**

CAT. No. 220-V-FM. Covers standard broadcast AM and FM bands, and shortwave. Noise-reducing all bands. Automatic frequency selection. Doublet antenna rig, high frequency transmission line, antenna and set transformers. Shpg. Wt. 5 lbs. **List Price \$15.00.**

CAT. No. 220-V-L. Same as foregoing but less set transformer. Used with communication receivers having 100-200 ohm input. Shpg. Wt. 5 lbs. **List Price \$12.00.**

CAT. No. 220-FM. Balanced doublet covering broadcast, shortwave and FM. Set transformer has FM terminals; also high and low impedance AM input. Fully noise-reducing in all bands. Shpg. Wt. 4 lbs. **List Price \$13.50.**

CAT. No. 220. Doublet. Same as foregoing but for broadcast and shortwave only. Shpg. Wt. 4 lbs. **List Price \$12.75.**

CAT. No. 85. Farm special. Built for service. Recommended for rural installations where noise level is low. Antenna wire, lead-in wire, storm clamps, window strip, nail knobs, insulators, lightning arrester. **List Price \$2.00.**

ANTENNA AND SET TRANSFORMERS. Unless system includes both antenna and set transformers, it cannot be true noise-reducing system. Therefore these components are made available separately for addition to any system, at list prices ranging from \$2.50 to \$4.00. Also for concentric cable lines.

TACO MASTER ANTENNA SYSTEM

For apartment houses, hotels, radio stores and other installations calling for simultaneous operation of several sets on single aerial. Because of wartime developments, the TACO post-war system now attains a high degree of noise reduction and covers a frequency range heretofore not believed possible in the standard broadcast, shortwave and FM bands.

System consists of roof kit, transmission line, and a coupler for each connected radio. Single antenna and transmission line can feed 15 to 20 radios, depending on height of antenna and reception conditions.

Installation guide furnished with each roof kit. TACO engineers are ready to provide engineering aid for any particular layout.

ROOF KIT

CAT. No. 345. Basic kit for Master Antenna System. Takes care of aerial or roof installation. To this antenna transformer (left) should be connected one or several transmission lines, depending on layout of building to be wired. The Underwriters' Labs. approved lightning arrester built into transformer shell requires grounding of the ground wire connected to the transformer. Kit comprises 17 ft. transmission line, 2 ft. aerial wire, 80 ft. aerial wire, 2 heavy duty insulators. Shpg. Wt. 10 lbs. **List Price \$12.75.**

CAT. No. 850. TWISTED-PAIR TRANSMISSION LINE. Two No. 22 stranded twisted pair conductors. Surge impedance 100 ohms. **List Price \$38.00/m ft.**

CAT. No. 305. BUFF TRANSMISSION LINE. Two No. 18 stranded conductors, twisted. Surge impedance 100 ohms. **List Price \$50.00 m ft.**

CAT. No. 306. BLACK TRANSMISSION LINE. Same as No. 305 but with black braid for use against dark walls. **List Price \$50.00 m ft.**

Other Components

CAT. No. 346. Master Antenna Transformer as used in roof kit. Shpg. Wt. 2 lbs. **List Price \$5.75.**

CAT. No. 347. Master Coupler (left) covering standard broadcast, shortwave and FM bands. **List Price \$3.50.**

CAT. No. 348. Master Coupler (right) covering broadcast and shortwave only. **List Price \$3.00.**
For other needs, see Accessories and Supplies.

Telescoping Vertical Antennas

Premax Adjustable Tubular Antennas have been widely used in radio fields for a long period of years and have shown exceptionally efficient, dependable performance under most severe climatic and shock conditions, both in continental United States and abroad. They are available in various lengths to meet all requirements, in monel, aluminum and steel. Mountings and insulators will be found on page S-48.

MONEL ANTENNAS

Premax Monel Antennas have an outstanding combination of strength and corrosion resistance that is vital to trouble-free communications, whether at land or at sea . . . in the tropics or the arctic. The monel used in these Premax Antennas . . . two-thirds nickel and one-third copper . . . is twice as stiff as bronze, strong as structural steel. Yet it will not corrode or lose its strength in salt-water installations. The toughness and stiffness of these Antennas minimizes the danger of breaking or permanent bending when the Antenna is extended to its maximum height . . . either in a stiff, gusty gale or on a pitching boat at sea. Being corrosion-proof, they have excellent transmission and reception qualities. Polished chrome-plated finish on all sizes.

Premax Monel Antennas are built up of multiple sections of hard-drawn monel tubing of a tensile strength exceeding 125,000 pounds per square inch. They are available in five standard units, fully telescoping and adjustable to any height between the minimum and maximum shown. The locking device employs a special knurled thimble and split friction clutch sleeve and holds the sections firmly at any desired height, also providing perfect electrical contacts.

ALUMINUM ANTENNAS

Premax Adjustable Type Aluminum Antennas are designed to provide light-weight with corrosion resistance and adequate strength to meet the most exacting conditions, for marine, mobile and commercial installations where convenience in erection and dependable performance are important considerations. They are ideally adapted for use in radio telephone installations on fresh water craft and commercial installations where convenience in extending and collapsing are important considerations.

These Antennas are built up of tubing that is specially drawn seamless tempered aluminum with diameters, gauges and temper engineered to withstand wind velocities up to 60 m.p.h. The locking device is simple and positive and provides low-resistance contact between sections. Six units are available, all fully telescoping.

STEEL ANTENNAS

The low initial cost and general satisfaction of Premax Tubular Steel Antennas have made this equipment within all budget requirements for commercial, municipal, amateur and other types of installations. In construction these Antennas are made of high-tensile, copper-nickel steel tubing of carefully engineered diameters and wall thicknesses, heavily cadmium plated and highly resistant to corrosion. When properly mounted, they will withstand all ordinary stresses without guying, but it is generally advisable to support them by guys or standoff insulators against abnormal winds or extreme strains.

Standard Premax Adjustable Tubular Steel Antennas are available in two, three, four, five and six-section models as shown in the specifications at the right. All units are fully telescoping and adjustable within the lengths shown for the particular type. The locking device is simple in operation, positive in action and provides a secure and efficient electrical contact between the sections. While these Antennas possess unusual tensile strength, they are light in weight and easily portable. They have widespread use in fixed and mobile installations. NOT recommended for marine use on salt water.

Rotary Beams—FM and TV

CORULITE ADJUSTABLE ELEMENTS

Premax Corulite Elements are designed to meet the need for lightweight but sturdy elements for use in horizontal arrays and similar applications. They are unusually light in weight and their special corrugated or reeded design provides exceptional strength and rigidity so essential in horizontal types of installations. All parts are heavily electro-plated to provide corrosion resistance and high electrical conductivity. A positive clamp, spot-welded to the tubing, permits adjustment in length and assures rigid joints and positive electrical contact between the telescoping sections. Ease of adjustment between the two halves of each component element is provided by the Premax "Hairpin" Tuning Bar. By its use it is possible to have all of the elements set at a single physical length and the variation in their electrical length may be accomplished by the "Hairpin."

Corulite Elements are available in one, two, three or four-section units as shown in the specifications at the right. These elements meet all requirements for the various five to twenty-meter arrays in general use and are ideal for combinations in commercial, FM, television or amateur bands.

ALSO AVAILABLE IN COMPLETE KITS

Premax Corulite Elements are also available in kits containing Elements, Hairpin Tuning Bars, Porcelain Mounting Clamps and complete bill of materials and detailed working drawings for wood frame and support. Four types are provided, as listed at the right.

COVERS ALL TELEVISION & FM CHANNELS

FM-130

FM and TV ADJUSTABLE "V" ANTENNAS

Designed for maximum response for FM and TV bands. Dipole arms of heat-treated aluminum with wire terminals for lead-in connections. 50" tubular steel support mast. Arms may be locked at any designed angle. Simple, light-weight design is simple to erect and install. Provides better reception than any straight dipole in congested areas.

No. FM-130—FM Antenna complete with mounting, less transmission line.

No. FML-130—Same as FM-130 but with 75' 300-ohm twin-lead transmission line.

No. FM-230—Same as FM-130 but with reflector, less transmission line.

No. FML-230—Same as FM-230 but with 75' 300-ohm twin-lead transmission line.

FM-230

Simpler! Lower in cost! Easy to erect! Oversize elements! Adjustable V Dipole design! Two completely separate arrays on one mast, each of dipole and reflector. Provides maximum signal pickup for all channels in HF and LF bands as well as for FM. Fully adjustable in both horizontal and vertical planes. Interconnected by patented AAK divider coil system. Can also be had in individual antennas for either HF or LF. Then, at any time, the other array may be added to give full two-hand coverage.

T-448

Lic. AAK, Inc.
Pats. 2,282,292
2,422,458

T-448—LF-HF Antenna complete, less transmission line.

TL-448—LF-HF Antenna complete with 75' 300-ohm transmission line.

TA-4481—LF Antenna and reflector only, including mast, less transmission line.

TAL-4481—Same as TA-4481 but with 75' 300-ohm transmission line.

TB-4481—HF Antenna and Reflector only, including mast, less transmission line.

TBL-4482—HF Antenna and Reflector only, including mast and 75' line.

TC-4483—HF Conversion Unit, less mast, less transmission line.

ROTARY BEAM ANTENNA FOR 6-10-11 METER BANDS

RB-6309

A high-gain directive Antenna with many distinctive features and high degree of flexibility for use on 6, 10 or 11 meter bands. Aluminum supporting frame finished. Seamless duraluminum tubing elements readily adjust-

able in length for operation at optimum efficiency in any band listed. Light in weight with slight wind resistance.

RB-6309 Kit includes frame, 3 pr. Elements with necessary insulators and hardware including T-match accessories but no transmission line. Weight 30 pounds.

309-A Extra Elements only, no frames, insulators or hardware included. Packed in pairs. Weight 2 lbs. per pair.

HAND-OPERATED TURNTABLE

Will support the largest type of Rotary Beam Assembly and permits rotation for full 360° in either direction. Formed of heavy sheet steel, spot welded. Steel angles spot-welded inside housing for additional strength. Platform or turntable is 10" x 12" formed of extra heavy sheet steel, is supported by 7" ball thrust bearing. Main shaft supported by two bearings to prevent side-play. 5/8" opening through center shaft for lead-in wires. Duraluminum control cable pulleys and 6' galvanized flexible steel cable. Shipping weight 17 pounds.

BM-46

CENTER-LOADED TUBULAR TELESCOPING MARINE ANTENNA

Gives a remarkable gain over the signal produced by a base-loaded type of same overall length. At high-frequency end of its 2000 to 3000 kc range it gives a measured effective signal power of 6 decibels when compared with a base-loaded antenna of similar length. This is equivalent to that produced by quadrupling the transmitter power output. For example, with this new Antenna, a 10w transmitter will produce a signal equal to that of a 40w transmitter using a base-loaded antenna and tuning system.

The base of this Antenna presents such a low impedance that less loss is experienced with leaky base insulators due to icing, wet weather or water spray. The line feeding the base is a low impedance line and is not critical as to length and body-capacity effects as is the case of the base-loaded antenna where the loading coil is housed in the transmitter cabinet.

The Antenna consists of two telescoping, adjustable base sections on which the loading coil is mounted, with a tapered top whip section. Each tubular section and the top whip is approximately 6½' long, providing a total extended length of about 19'. The base sections collapse to a single unit and the top whip section telescopes through the coil into the lower sections, making a collapsed length of only about 7½'.

Available in monel for salt-water installations or in aluminum for fresh water use.

CLM-519—Monel type

Base O.D. .893" I.D. .799"

CLA-619—Aluminum type

Base O.D. 1.000" I.D. .834"

Solid Stainless Steel Tapered Antennas

Recommended for use where extreme durability and great corrosion resistance are necessary. One-piece solid hard-drawn stainless steel rod, swaged or step-tapered from ¼" base to ½" top. A tough, durable Antenna that will take it. Available in three standard lengths, to fit all standard mountings shown on page S-48.

No. SP-472—Stainless Steel Tapered Antenna, 72" long.

No. SP-484—Stainless Steel Tapered Antenna, 84" long.

No. SP-496—Stainless Steel Tapered Antenna, 96" long.

Solid Steel "Whip Type" Graduated Diameter Antennas

Made of solid steel of extremely high carbon content, heat-treated and oil-tempered to carefully develop physical properties. Rods of varying diameters cold-drawn to rigidly-held tolerances, are joined securely and permanently into a single graduated length Antenna of high flexibility, minimum wind resistance and long life. Available in cadmium-plated with plain ¼" end (Style A) or ⅝" threaded stud end complete with hexagon nuts and lock washers (Style B). Also available in stainless steel.

CADMIUM-PLATED STEEL

(Mountings for Mobile and Police Antennas Shown on Page S-48)

Center Loaded Antenna

Type A

Type B

160 Mc. Roof Antenna—1 Man Mount

The most improved, easiest to install Roof Antenna made! One man makes the installation without cutting or ripping car upholstery. Single hole 1 3/4" diameter in metal roof is all that is necessary. Mounting grounds coaxial sheathing of lead-in line. Rubber gasket insures against leakage. Transparent plastic insulator makes inspection easy. The antenna is stainless steel wire, 18" long with ball-tip and threaded fitting. Suitable for all frequencies in the 152 to 162 megacycle band.

No. DSH-118—Complete Assembly, less transmission line.

No. DS-118—Antenna only.

No. DSJ-118—Antenna with one-hole mounting and porcelain insulator.

Motorcycle Antennas and Mounts

Overcomes weaknesses and defects commonly found in other types! In this Premax, the coaxial line is grounded to same portion of mounting bracket that carries the antenna support itself. Hence no flexing of cable between ground and antenna connection. A spring-tension joint permits entire antenna including insulator support and grounded cable to be deflected 90° without injury. Spring tension is sufficient to prevent accidental deflection. Cadmium-plated steel bracket fits 3/4" tubing frame in either vertical or horizontal position as shown at right. Antenna is high-carbon, heat-treated tempered steel 34" long mounted in high-strength porcelain cone insulator. Antenna may be changed without disturbing insulator assembly.

Fig. 1

No. CCY-134—Complete Assembly, Antenna and Mounting, less cable.

No. CC-134—Antenna only with Adaptor.

Fig. 2

Type NA

TYPE NA Insulated Bumper Mounting. Plates heavily cadmium-plated steel; insulation white glazed ceramic cones. Fits Style A or 1/4" antenna.

Type K

TYPE K Insulated Bumper Mounting. Antenna rod fits into section of heavy brass tubing attached to the insulator and permits 10" adjustment in height of antenna. Nut and compression sleeve lock antenna in place. Fits Style A or 1/4" antenna. White glazed ceramic insulator.

Type R

TYPE R Insulated Universal Mounting of split-ball type. Solid cast bronze, which bolts directly to car panel or other surface thru heavy plastic disc insulation with waterproof gasket and steel backplate. Baked black enamel finish. Fits Style A or any 1/4" antenna.

Type TA

TYPE TA Trunk or Panel Mounting. for Premax Style A or any 1/4" Antenna. Fastens to car body or trunk or to any horizontal surface such as roof. Lower support is solid brass rod joined to 12" brass tube carrying antenna. Upper support is 24" brass rod adjustable on antenna tube and also in insulator assemblies to fit contour of car. High-tension white-glazed ceramic cone insulators. Maximum 10" antenna adjustment. All metal parts heavily cadmium plated.

Type S

TYPE S Insulated Roof Mounting for auto or any flat surface. Special plastic insulation disc carrying heavy tempered steel spring with retaining nut and tapered split bushing to fit Premax Style A or any 1/4" antenna. Overall height about 5"; diameter of base about 3". Fittings are solid brass electroplated.

Type SA

TYPE SA Spring Adaptor Mounting, similar to Type S described above except that a base plug is provided with an adaptor stud to fit any Premax Mounting shown in this column. Fits Premax Type A or any 1/4" Antenna. Overall height about 4 3/4"; base diameter about 1 3/4".

Type 1 Base Insulator; heavy-duty with compression rating up to 10,000 lbs. Galvanized malleable iron or bronze. Available in three styles:

Type 1

RIGID POST TYPE (illustrated)

Type 10-S Insulated Mounting Clamp, heavy-duty type. Chrome-plated bronze base and head-caps, porcelain insulator. Has solid clamp or hinged clamp for use with hinged-base insulator.

WARD **Magic Wand* Antennas for FM and Television

TV STACKED ARRAY MODEL TVS-6

Two of WARD'S finest assemblies stacked one above the other to produce the extra forward gain needed for good TV reception in remote installations and poor signal locations.

FEATURES

- Sturdy design and extra-strong construction assures permanently secure mounting in worst weather.
- Correct $\frac{1}{2}$ wave spacing proven by exhaustive tests to achieve greater forward gain, much more than with the $\frac{1}{8}$ or $\frac{1}{4}$ wave spacing of ordinary "stacked arrays."
- Almost

complete elimination of signals from the rear — thus removing ghost images caused by rearward reflections.

- Strong signal pick-up throughout wide angle of acceptance to the front, bringing in scattered stations.
- Use of folded dipoles in scientifically calculated arrangement to provide broad response and maximum energy transfer.
- Little assembly time required due to pre-assembly of component parts.
- Ingenious method of allowing complete adjustability for orienting even though bays are stacked.

CONTENTS

- 15-foot metal mast in three weather-resistant self-locking sections.
- All-angle WARD mounting base of exclusive box-type construction.
- Folded Dipole and reflector assemblies with corrosion-proof aluminum elements.
- Re-inforced aluminum tubes connecting the two bays.
- 2 guy wire rings for attachment of guy wires.
- 4 rubber stand-off rods and 6 plastic stand-off insulators of exclusive WARD design to guide transmission line and prevent losses on the line.
- Solder lug for attachment of ground wire to insure protection against lightning.

Model TVS-6 — 54-88 mc. List Price \$42.50
Individually boxed, 22 lbs.

NEW TV HIGH-LOW ARRAY MODEL TVH-9

Here's another "first" by WARD in the rapidly expanding field of television reception. Advanced WARD design and engineering makes receivers work to their highest degree of efficiency. That's the opinion of satisfied set owners, service installers, and major set manufacturers, who are all directly interested in the improved performance of television.

As a result of months of exhaustive scientific research and field testing, WARD now makes available a high-brand TV array which can be stacked above the standard television elements, and independently oriented! Also new is a kit for stacking two of WARD'S finest television assemblies into a two-bay array for a greater gain than ever before.

ORIENTING AND GAIN. Each bay tilts in any plane, can be oriented in any direction to give sharpest focus possible. Eliminates awkward or tricky installations. Permits hairline adjustments for utmost gain on both the high and low band stations.

ADAPTABILITY. Ease of combination of assemblies in basic kits makes "Magic Wand" Aerials more adaptable than ever to the varying requirements of each installation.

All major parts pre-assembled. Saves costly installation time.

Model TVH-9 Range: 54-88 mc.; 174-216 mc. List Price \$26.50

TV HIGH-BAND ADAPTER MODEL TV-28

Can be easily applied to any WARD antenna, or any standard dipole using a one-inch O.D. mast. This combination makes possible high signal reception in the 174-216 mc. band.

FEATURES

- All metal rust-proof construction.
- Partially pre-assembled for easy and quick application.
- Hair line adjustments can be made to produce finest results from high and low band stations, which may not be in the same direction, by independent orienting.
- Carefully engineered spacing insures maximum signal gain on both bands with negligible inter-action between bays.
- May be used separately as a high-band antenna only.

CONTENTS

- Aluminum folded dipole element with bakelite insulator.
- Corrosion-proof aluminum spacer arm and reflector.
- 5' metal mast, completely weatherproof — inside and out.
- Guy wire ring, polarizer bracket and wrap around clamp.
- Connecting stub of 300-ohm colinear line.

Model TV-28 — 174-216 mc. List Price \$9.50
Individually boxed, 5 1/4 lbs.

TV HIGH-BAND KIT MODEL TV-A-28

Compact kit for close spaced high and low band antenna providing best TV reception. Mounts on the same mast with a low-band dipole or array.

FEATURES

- All metal rust-proof construction.
- Partially pre-assembled for easy and quick application.
- Independent orienting.
- Mounts easily on any 1" O.D. mast.

CONTENTS

- Reinforced aluminum folded dipole element.
- Aluminum spacer arm and reflector.
- Scientifically determined connecting stub.

Model TV-A-28 — 174-216 mc. List Price \$6.95
Individually boxed, 2 1/4 lbs.

FM FOLDED TURNSTILE MODEL FMT-56

FEATURES

- Exceptional signal gain from ALL DIRECTIONS.
- Requires absolutely no orienting.
- Packed complete, partially pre-assembled components for quick and simple installation.

CONTENTS

- Five-foot vertical mast completely weatherproofed inside and out.
- Universal mounting base adjustable to any angle.
- Folded aluminum dipole elements with two molded bakelite insulators.
- 60 feet of colinear transmission line and $\frac{1}{4}$ wave length phasing loop.
- 4 rubber stand-off pads and 6 plastic stand-off insulators to guide transmission line to set.
- Guy wire ring and conduit clamp.

Model FMT-56 — 88-106 mc. List Price \$18.50
Individually boxed, 8 lbs.

SELF-SUPPORTING BASE MODEL C-11

Heavy, weather-proofed metal base for sturdy installation on any angle. The self-supporting base eliminates the need for guy wires on most installations.

Model C-11 List Price \$1.95
Individually boxed,
1 lb. 10 oz.

WARD AERIALS

WORLD'S FINEST FOR CAR AND HOME

Feature

- ✓ SIMPLIFIED ONE MAN INSTALLATION
- ✓ UNIVERSAL DESIGNS TO FIT EVERY CAR
- ✓ RUGGED, LASTING CONSTRUCTION with —
 - Heavy wall brass tubing
 - Weather resistant triple chrome
- ✓ GREATEST SIGNAL PICKUP with —
 - High "Q" low loss lead cables
 - Positive coaxial connections
 - 100% shielding
- ✓ PATENTED FLUID TYPE ANTI-RATTLE
- ✓ HEAVY CARTONS READY FOR RESHIPMENT

SIDE COWL MOUNTS

Two stanchions for sturdy installation. Smartly designed insulators with chrome caps. Conversion kit for torpedo bodies included.

LONG RANGER

4 section, 100 inch, EZ-on installation. A favorite in low signal areas where its extra length provides fine reception.

Model SC-8.....List Price \$6.95
Ind. boxed 1 lb. 10 oz.—12 to a master carton 22 lbs.

AIR KING

3 section, 66 inch, EZ-on installation.

Model SC-6.....List Price \$4.95
Ind. boxed 1 lb. 5 oz.—12 to a master carton 17 lbs.

SIDE COWL OR FENDER

FLEX-ANGLE

3 section, 68 inch, EZ-on installation.

Model CF-6.....List Price \$5.45

Ind. boxed 1 lb. 8 oz.—12 to a master carton 18½ lbs.

CHALLENGER

3 section, 66 inch, shield can type installation. Two smart, bakelite stanchions, coaxial lead without vinylite jacket.

Model SB-3.....List Price \$2.95
Ind. boxed 1 lb. 4 oz.—12 to a master carton 15 lbs.

Tops in popularity because of trim styling and a flexible adjustment so rod can be locked in a vertical position, regardless of body contour. Ideal design for new revolutionary body styles.

TOP COWL OR FENDER

8 BALL

3 section, 56 inch, collapses to 22 inches.

Model TCF-3.....List Price \$5.35

Ind. boxed 1 lb.—12 to a master carton 14 lbs.

Smart looking "8 Ball" design developed and engineered by WARD in answer to every installer's dream. Secure installation! Easy to mount! Perfect fit on every car!

DISAPPEARING, Cowl or Fender PHANTOM

3 section, 56 inch, 3/2" exposed when collapsed.

Model DCF-3.....List Price \$6.95

Ind. boxed 1 lb. 4 oz.—12 to a master carton 17 lbs.

At last—a disappearing antenna that is 100% shielded from engine noises and completely water sealed. Unique universal split ball design plus popular disappearing feature gives that smart built-in appearance.

EACH MODEL COMPLETE WITH A WARD COAXIAL LEAD CABLE

Made of the finest insulating materials—Polyethylene, wire shield braid, oil and abrasion proof Vinylite.

WARD'S exclusive lead connector fitting provides an easy coaxial connection 100% shielded. Bayonet adapter for pin plug included so lead will fit every car radio.

For models mounted on fender a 12 inch lead extension is required.

Model C-8 List \$0.75

A WARD Development to fit every antenna need !

WARD ANTENNAS FOR SPECIAL COMMUNICATION

UNIVERSAL SWIVEL MOUNT

This popular short wave and FM antenna withstands hardest mobile use. Separate components may be combined to meet all operating requirements.

SPP-3

Cast iron SWIVEL BASE may be mounted on any car at point desired and rod locked permanently in a vertical position. Ind. packed 3 lb. 4 oz. List Price \$13.25

SPP-3A

SHOCK MOUNTING SPRING provides rod with fullest protection against impact damage at high speeds.

Ind. packed 2 lb. 12 oz. List Price \$7.90 WHIP ROD is made of special alloys developed by WARD engineers for maximum resilience, greatest durability and finest weather proofing. There are two types:

SPP-3B SINGLE ROD List \$11.50

Length 84" Ind. packed 2 lbs.

SPP-12 ADJUSTABLE 2 SECTION ROD List \$22.50

Length 85 to 103"

Ind. packed 2 lbs. 10 oz.

WARD SILENT SALESMAN

Striking, colorful display board comes completely assembled, ready to go to work bringing in easy, extra sales.

Model CD-4

Packed one to a carton 11 lbs.

DISPLAY FREE!

You pay only for the four fast moving models mounted on the board.

- 1 SC-6 . . . \$4.95

WARD ANTENNAS FOR THE HOME

Are vertical, the same as broadcasting antennas, for greatest signal pick-up, finest reception.

HOUSE MAST

4 SECTION, 12 FOOT, COLLAPSIBLE TO 47 INCHES.

FEATURES . . . Easy installation. Universal mounting brackets, Heavy weather-proof cadmium plating, Built-in lightning arrester.

Model HM-4 List \$7.45

Ind. boxed 4 lbs.—12 to a master carton 51 lbs.

Complete Installation Fittings Included

- 60' Lead Wire — Ground Clamp — 4 Wood Screws — 2 Nail-it-Knobs — 1 Porcelain Tube — 1 Lead-in Strap — 2 Soil Pipe Straps.

WINDOW FRAME

SOIL PIPE

WINDOW MAST

3 SECTION, 8 FOOT, COLLAPSIBLE TO 42 INCHES.

FEATURES . . . Simple 3 part, 3 minute installation for apartments, homes, office buildings. Two way mounting bracket, 12 inch lead-in strap, and heavy weather proof cadmium plating.

Model WM-3 List \$3.25

Ind. boxed lbs.—12 to a master carton 14 lbs.

Camco

AUTO ANTENNAS

"for top performance"

Camco antennas are rattle proof, rustproof and precisely engineered to prevent moisture and dirt from entering tubes. Tested for perfect mechanical performance.

"Swivel" FENDER OR SIDE COWL MOUNT

Fits all body contours by simple adjustment. Beautifully designed chromed casting, nested in a special compound rubber cushion . . . (NOT breakable porcelain). Installation therefore is made moisture and rain proof. Two-hole mounting.

Cat. No. List Price
S-683—3 Section Extends
o 68" \$6.25

Packed 12 to a carton.

SIDE COWL MOUNT

Insulators—Bakelite and Brass Chromed Combination. Individual in design.

Low Loss Lead—Last word in science and plastics. Vinylite jacketed moisture and corrosion proof. Aircraft type fittings insuring positive ground of lead, shield prevents shorts to car body. Installation simplified.

Conversion Kit—Adaptor supplied for curved cowls.

Construction — Rattle Proof. Swaged part of tube prevents entry of dust and moisture.

Camco Featherlite 13-1 ALL CHANNEL TELEVISION ANTENNAS

Scientifically designed to provide the ultimate in television reception on all channels. The 13-1 series permit the utmost flexibility of installation, regardless of the geographic location of the television transmitters or the channel upon which they operate. The electrical and mechanical features permit optimum adjustment for both low and high bands individually. By proper choice of antenna, either bidirectional or unidirectional characteristics are obtained.

OUTSTANDING FEATURES

- Covers complete television and F.M. bands from 44 to 216 Mc.
- Only one forward or rear lobe of response.
- High and low frequency elements individually adjustable—eliminates ghosts.
- Pre-tuned, pre-assembled, reduces installation time.
- Can use 72 to 300 ohm transmission lines.
- No standing waves on transmission line with properly terminated receiver.
- All metal construction.
- Low loss dielectric — high impact strength.
- Will withstand high winds, snow, ice and rain without deformation or water absorption.
- Equipped with guy wire supports and rubber stand-offs for transmission line.
- High gain on both high and low bands.
- Universal mounting bracket supplied — mounts anywhere.
- Mast extensions available for versatile installation.

Dipole

MODEL T-41

Where bidirectional characteristics are indicated, locations where stations are 180° apart.

List Price \$15.00

Model T-41X—Above with 60 ft. 300 ohm Twin-Lead.

List Price \$18.00

Folded Dipoles

MODEL T-42

Where stronger signals are required, yet with bidirectional response characteristics.

List Price \$17.00

Model T-42X—Above with 60 ft. 300 ohm Twin-Lead.

List Price \$20.00

Dipoles and Reflectors

MODEL T-43

Where unidirectional characteristics are required and discrimination against interfering signals is required. 5 DB forward gain, 15 DB front to back ratio. List Price \$24.00

Model T-43X—Above with 60 ft. 300 ohm Twin-Lead. List Price \$27.00

Folded Dipoles and Reflectors

MODEL T-44

Provides unidirectional response and 15 DB of interfering signal rejections with increased forward gain.

List Price \$25.00

Recommended for locations at the limits of the service range.

Model T-44X—Above with 60 ft. 300 ohm Twin-Lead. List Price \$28.00

MODEL T-35

Manufactured by
CAMBURN, INC.,

ELECTRONIC INDICATOR CORP.

BROOKLYN, NEW YORK

AUTOMATIC SELECTING • NOISE REDUCING • ALL WAVE RECEIVING ANTENNAS

Models 80, 100, and 500 shown below are furnished with multi-winding *patented transformer couplers which automatically tune the antenna to the same frequency as the receiver. The antenna coupler is mounted in a porcelain transformer housing which acts as the center insulator of the doublet antenna. The radio energy is picked up by the antenna, passed through the antenna trans-

former and down the transmission line, through the receiver coupler to the receiver. This balanced 2 wire isolated transmission system reduces noise pickup to a minimum. Each antenna is furnished complete with tested transformer couplers, antenna wire, transmission line, nail it knobs antenna insulators, lead strips and easy to understand instructions.

*Model 100 ALL WAVE. Covers Standard Broadcast Band and Shortwave Bands. Freq. Range 540 kc. to 20 Mc. Consists of 2-30 ft. coils 7/22 antenna wire—50 ft. Twinax transmission line—2 transformer couplers. Wt. 3 lbs. List \$10.00

*Model 80 ALL WAVE Amateur Communications. Freq. Range 540 kc. to 30 Mc. Consists of 2-30 ft. coils 7/22 antenna wire—60 ft. twinax transmission line. The transformer couplers in this kit are designed to work into a communications type receiver. Wt. 3 lbs. 4 ozs. List \$13.50

*Pat. under license A. A. & K.

*Model 500 ALL WAVE. Covers Broadcast Band—Shortwave—Frequency Modulation Band. Uses 7/22 copper wire for antenna and twinax high frequency low loss transmission line for maximum efficiency. Furnished with 2 transformer couplers plus specially designed frequency dividing network for FM reception. Wt. 3 lbs. 8 ozs. List \$14.00

Model 1000 All Wave Doublet—Covers Broadcast and Shortwave. Consists of 2-30 ft. coils 7/24 copper antenna wire—50 ft. twisted pair transmission line—For use in noise free locations. Wt. 2 lbs. 4 ozs. List \$3.50

AMATEUR BEAM ANTENNAS

MODEL 400-EA

Model 400 Series

The 400 Series of antennas are designed for the amateur 10 meter band. They are rigidly constructed of 3/4" aluminum tubing telescoping to 5/8". The elements are mounted on 1" aluminum angle and supported by 2 1/2" seatite standoff insulators. Elements are adjustable over a range of several feet

Model 400-EA 3 element 10 meter beam with folded di-pole driven element. Uses .1 wavelength spacing for the director and .15 wavelength spacing for the reflector. Furnished complete with aluminum ladder. The folded di-pole gives a much broader response than the regular single di-pole beams and allows this beam to be fed directly with 50 ohm coaxial cable. Weight 19 lbs. 3 ozs. List \$52.00

Model 400-RA 3 element 10 meter beam using .1 wavelength spacing for the director and .15 wavelength spacing for the reflector. Designed to be fed with 300 ohm twinax. Furnished complete with all aluminum ladder. Elements are 3/4" aluminum tubing telescoping to 5/8". Adjustable from 14 to 18 ft. Weight 16 lbs. List \$15.00

Model 400-BA 2 element 10 meter beam with .2 wavelength spacing. Furnished complete with 7 ft. aluminum ladder. Designed to be fed directly with 50 ohm coaxial cable, RG8/U or equivalent. Weight 13 lbs. List \$34.00

Model 400-AA 10 meter di-pole with adjustable elements. All aluminum with seatite insulators. Weight 5 lbs. List \$13.00

Model 405-CA 10 meter folded di-pole .5 inch spacing. Aluminum supporting angle and adjustable elements. Designed to be fed directly with 300 ohm twinax line. Weight 6 lbs. 13 ozs. List \$22.00

Model 401-AA Set of 10 meter director and reflector elements with aluminum supporting angles. Elements are adjustable over a range of several feet. Can be used with either the 405-CA or the 400-AA to make up a 3 element beam. Ideal for the ham who wants to build his own ladder. Weight 6 lbs. 12 ozs. List \$22.00

FIVE ELEMENT FOLDED DI POLE BEAMS

These Hi-Gain Broad Band parasitic arrays use a folded di-pole driven element with 3 directors and 1 reflector. The directors are spaced .1 wavelength while the reflector is spaced .15 wavelength. Furnished with the standard Elincor swivel bracket these beams can be mounted either in the vertical or horizontal plane. Both beams may be fed with RG8/U 52 ohm coaxial cable. Furnished complete with hardware and instructions.

Model 200 EA for 2 Meters

The 2 meter beam is precut for the middle of the 144 to 148 mc. band. The boom is 1" aluminum tubing. All the elements are 3/8" tubing.

Shipping weight 3 lbs. List \$14.00

Model 300 EA for 6 Meters

All elements and spacings on the 6 meter beam are adjustable to cover the 50 to 54 mc. band. The boom is 1" aluminum tubing. All elements are 5/8" aluminum tubing telescoping to 1/2"

Shipping weight 12 lbs. List \$41.50

Five Foot heavily enameled steel mast for either of the above antennas. Shipping weight 2 lbs. List \$3.50

**A Leader in Price!
A Leader in Quality!**

WE ALSO MANUFACTURE

ELECTRONIC INDICATOR CORP.

BROOKLYN, NEW YORK

QUALITY TELEVISION & FM ANTENNAS

CHECK THESE FEATURES!

- 5 foot steel mast — heavily enameled.
- Corrosion resistant — aluminum di-pole elements supported on black glazed ceramic.
- All elements reinforced with aluminum sleeve at point of maximum strain.
- Transmission lines supported by low loss rubber standoff insulators.
- Mast mounting allows antenna to be rotated in any direction to improve reception.

- Extra strong clamping bracket on all reflector models to tilt antenna to any angle.
- Furnished with or without 60 ft. of 300 ohm low loss polyethylene dielectric transmission line.
- Provision for guy wires.
- Each antenna packed individually with complete set of hardware and "easy to understand" instructions.

ALL FM MODELS IN 200 SERIES

Di-pole elements $\frac{3}{8}$ " aluminum tubing — non-adjustable

ALL TELEVISION MODELS IN 300 SERIES

Di-pole elements $\frac{5}{8}$ " aluminum tubing telescoping to $\frac{1}{2}$ " adjustable to improve reception from the weaker stations.
Model 310-FDR—Di-pole Elements— $\frac{1}{2}$ " aluminum tubing non-adjustable.

"H" TYPE STACKED ARRAY

The Elincor H type stacked array gives very high gain and is especially recommended where television signals are weak. This antenna incorporates all of the mechanical features of our standard television antennas and is made in 2 models. The di-pole elements of the 350-SA are constructed of $\frac{5}{8}$ " aluminum tubing telescoping to $\frac{1}{2}$ " and are adjustable to improve the picture from the weaker stations. The 310-SA uses $\frac{3}{8}$ " aluminum tubing elements and is non-adjustable.

ALL CHANNEL ANTENNA!

The Elincor Model 250 is designed to receive all 13 television channels plus FM. It is without a doubt the best television antenna available today. Consists of 2 di-pole and reflector combinations, one for TV channels 1 to 6 and the other for channels 7 to 13. The upper and lower di-poles are electrically separated by built in dividing networks. These networks automatically select the group of channels to which your receiver is tuned.

- This antenna incorporates all the mechanical features of our standard television antennas. The di-pole elements are ruggedly constructed of $\frac{5}{8}$ " aluminum tubing telescoping to $\frac{1}{2}$ ".

as new as
to-morrow!!

After long years of intensive research, Vertrud Corporation announces, in addition to its standard antennas, its newest developments in the field of AM, FM and Television antennas.

All Vertrud antennas are constructed of tempered aluminum alloy parts, resistant to the most adverse weather conditions. Maintenance costs are virtually non-existent and the life of the antenna for practical purposes, is unlimited.

Costly experimentation is eliminated when an antenna is available for every specific requirement. Whether it is AM, FM or Television, Vertrud has the antenna which will most efficiently do the job.

VERTROD'S 13 CHANNEL FM-TV ANTENNAS These models are available with and without reflectors. The high frequency and low frequency arrays are electrically separated by a patented divider network which eliminates any interaction between the two arrays. The high frequency and low frequency sections are individually rotatable for maximum signal from stations regardless of direction. Each element may be oriented to eliminate ghosts, images and interference. These models are constructed of tempered aluminum alloy cutting down on weight and retaining maximum rigidity. The smaller assembly offers higher resistance to wind and accumulation of snow.

ALL VERTROD ANTENNAS ARE DESIGNED FOR SIMPLICITY AND EASE REQUIRING ONLY A MATTER OF MINUTES FOR ASSEMBLY

makes an antenna for every purpose!!!

Vertrud antennas are carefully designed for noise-free reception on FM, TV, Standard Broadcast and Communications Frequencies. All models are engineered for maximum efficiency, meeting requirements for any specific application. All Vertrud antennas are packed complete with all necessary hardware and full instructions.

VERTROD STANDARD SERIES: AM antennas recommended for noise-free areas. Mounted on a patented Rotatory base. Can be rotated in an arc of 180 degrees. All Standard models may be used alone or in conjunction with a loop aerial already built into a radio set. The Standard Series antennas are available in three models, all covering the entire broadcast bands.

VERTROD NOISE REDUCER SERIES: This antenna covers the entire broadcast and short wave bands. Frequency range: 500 KC to 30 MC. Vertical antennas similar to Standard series models. Antenna transformer is hermetically sealed in the rotatory base of these models. The radio set coupler, another transformer, sealed in a plastic shell, matches the impedance of the transmission cable to that of the radio set in-put. Available in models with or without 35' of transmission cable.

VERTROD SENTINEL SERIES: FM-TV antennas, pre-tuned to the middle of the band, assuring strong, noise-free reception on either side of the band. The dipole series are recommended for non-directional reception in areas free from shadows and interference from adjacent stations. The dipole reflector arrays are recommended where stronger directional signals are required. Dipole reflector arrays may be oriented to eliminate ghosts and interference. Vertrud Sentinel models are mounted on Universal, adjustable angle brackets.

FOLDED DIPOLE SERIES: Folded dipole and dipole reflector arrays are similar in performance to the straight dipole series with the exception that these provide for broader band response with 300 ohm impedance at its junction. Folded dipole models are mounted on Universal, adjustable angle brackets.

VERTROD CONTINENTAL SERIES: The only adjustable antenna calibrated directly in megacycles and adjustable to any frequency in the FM and TV bands. This series is available in dipole and dipole reflector arrays.

Your Antenna Requirements Met Precisely By Vertrud

STANDARD SERIES:

- MODEL 10 — Equipped with 9-foot rod in three 3-foot sections of tempered aluminum alloy. Recommended for noise-free areas close to broadcast stations. (Fig. H) List Price \$5.30
- MODEL 210 — Equipped with 12-foot rod similar to Model 10. Recommended for areas further removed from broadcast-stations. (Fig. H) List Price \$6.30
- MODEL 810 — Heavy duty antenna for maximum sensitivity. Equipped with heavy duty 18-foot mast and heavy duty rotory base for greatest rigidity in high winds. (Fig. J) List Price \$17.00

NOISE REDUCER SERIES:

- MODEL 102 — Equipped with 9-foot rod and matched transformers to eliminate noise and static. Less transmission cable (Fig. H) List Price \$11.75
- MODEL 122 — Equipped with 12-foot rod and matched transformers to eliminate noise and static. Less transmission cable. (Fig. H) List Price \$13.00
- MODEL 182 — Equipped with 18-foot heavy duty mast with matched transformers to eliminate static and noise. Less transmission cable. (Fig. J) List Price \$24.25
- MODEL 103 — Equipped with 9-foot rod and matched transformers to eliminate noise and static. Including 35 feet of transmission cable. (Fig. H) List Price \$14.75
- MODEL 123 — Equipped with 12-foot rod and matched transformers to eliminate noise and static. Including 35 feet of transmission cable. (Fig. H) List Price \$16.00
- MODEL 183 — Equipped with 18-foot heavy duty mast with matched transformers to eliminate noise and static. Including 35 feet of transmission cable. (Fig. J) List Price \$27.25

SENTINEL SERIES:

- MODEL 632 — FM, Frequency range 88-106 MC Pre-tuned dipole antenna. (Fig. C) List Price \$7.90
- MODEL 642 — TV, Frequency range 44-88 MC Pre-tuned dipole antenna. (Fig. C) List Price \$8.50
- MODEL 744 — FM, Frequency range 88-106 MC Pre-tuned dipole reflector array. List Price \$12.10
- MODEL 764 — TV, Frequency range 44-88 MC Pre-tuned dipole reflector array. List Price \$13.25

FOLDED DIPOLE SERIES:

- MODEL FD — FM, Frequency range 88-106 MC. (Fig. E) List Price \$10.50
- MODEL TD — TV, Frequency range 44-88 MC. (Fig. E) List Price \$12.00
- MODEL FDR — FM, Frequency range 88-106 MC. With reflector. (Fig. D) List Price \$13.75
- MODEL TDR — TV, Frequency range 44-88 MC. With reflector (Fig. D) List Price \$16.50

CONTINENTAL SERIES:

- MODEL 332 — FM-TV Dipole, Frequency range 44-106 MC. (Fig. A) List Price \$10.40
- MODEL 444 — FM-TV Dipole reflector combination. Frequency range 44-106 MC. (Fig. B) List Price \$14.80

VERTROD — MEANS SKILLED ANTENNA ENGINEERING

- 300-D:** 300 ohm clear polyethylene covered parallel twin lead, "Dumb-Bell" shaped. Has the lowest losses of all 300 ohm transmission lines, containing the least amount of dielectric material. This type approaches the ideal condition of two conductors separated by air. Specially designed for FM and TV. List Price \$44.00 M
- 300-H:** 300 ohm brown polyethylene covered parallel twin lead. Heavy duty recommended for use where greatest tensile strength is required. Has a slightly larger capacity than type 300-D. Specially designed for FM and TV. List Price \$48.50 M
- 150-U:** 150 ohm clear polyethylene covered parallel twin lead for special purposes in addition to FM and TV use. Recommended for use where this different impedance is required. List Price \$34.00 M
- 75-U:** 75 ohm clear polyethylene covered parallel twin lead for special use where particular impedance characteristics are required in high frequency work. List Price \$32.00 M
- RG 59/U:** 72 ohm coaxial type cable using #22 AWG plain copperweld inner conductor in polyethylene cone. Bare copper single braid outer conductor with black polyvinyl chloride outer jacket. This coaxial cable is specially designed for use in television where interference, due to power disturbances, is to be subdued. The copper braid outer conductor produces a perfect shield for signals in the 100 megacycle range, ideal for interference-free television pictures. Manufactured in conformance with latest JAN-C-17 specifications. List Price \$160.00 M
17.50 C

ICA INSULINE RADIO PRODUCTS ICA

ICA PRECISION TELEVISION AND FM ANTENNAS

Featuring the most advanced engineering research — emphasizing complete interchangeability of principal elements.

Simple Dipole with Reflector

Folded Dipole with Reflector

SPECIAL FEATURES

- ★ Uniform construction permits addition or substitution of further elements as desired; for example: Simple Dipole element may be replaced by Folded Dipole element, etc.
- ★ DIPOLES OF NON-CORROSIVE ALUMINUM.
- ★ 5-FOOT STURDY STEEL MAST TO WITHSTAND EXTREME WEATHER CONDITIONS.
- ★ Adjustable swivel base for flat or angular mounting.
- ★ Provision for attaching guy wires.
- ★ Stand-off insulators.

SIMPLE INSTALLATION

All antennas and parts compactly designed for simple, easy installation. Complete instructions included with necessary hardware.

300 ohm twin lead transmission line (60 feet) included with each antenna

INDOOR FM AND TELEVISION ANTENNAS

(Consists of two folded dipole elements, spliced to standard 300 ohm twin lead transmission line. (Length of lead-in: 10 feet.) Designed especially for INDOOR use. flattened end insulators permit use under carpet; on room molding, etc. Insulator to insulator: 55". Losses in line measure only .85 DB per 100 ft. at 100 MC. Easy installation instructions included.

REFLECTOR KIT

For increase in signal gain. Can be easily added to the Folded or Simple Dipole (FM or Television). Completely adjustable along mast for further signal gain. May be located up to quarter wave length of lowest frequency used in Television band. Illustration shows enlarged view of adjustable bracket.

FM AND TELEVISION WIRE

Quality 300 ohm twin-lead transmission line . . . 2 conductors each composed of 7 strands No. 29 copper wire, separated by low loss polyethylene insulation. Losses only .85 DB per 100 ft. at 100 MC. Mutual capacitance: 4.8 mmfd per foot. Supplied in 100-foot coils.

Catalog Number 6020

Dipoles:	For Television	For FM
Insulation:	94 Inches	57 Inches
Frequency Range:	Polyethylene	Polyethylene

MAST ANTENNAS FOR STANDARD RECEPTION

DE LUXE WINDOW ANTENNAS 3 Feet—12 Feet

Made of Admiralty Brass with Beautiful Nickel-Plated Finish

- For Homes, Apartments, Hotels, Office Buildings, and places where it is inconvenient to install outdoor aerials or to improve reception on indoor installations.
- Quickly and easily installed.
- Adjustable Bracket at base, permits the antenna to be rotated in any position for best reception.
- Furnished completely assembled with mounting flange, insulator and lead-in strip.

Individually boxed.

3 Section Telescopic Antenna Opens to 96" No. 4527B List \$4.45
No. 4529—3 Sec., Opens to 75" List \$3.25
to a Standard Carton—Weight 14 lbs.

4 Section Extra Long Window Antenna 12 Feet Long

Ideal for DX Reception and Rural Sections where extra length is needed for best results.
No. 4513 List \$6.75
to a Standard Carton—Weight 33 lbs.

HOME ANTENNAS 12 Feet—4 Sections

Made of Admiralty Brass—Guaranteed Rust Proof

- The Latest Type Home Antenna suggested by leading Radio Set Manufacturers for best results.
- Eliminates unsightly and dangerous wires.
- Clear, noise-free reception with no power line interference.
- Very sturdy construction—made of Admiralty Brass with Beautiful Nickel-Plated Finish.
- Guaranteed Rust-proof for the Life of Antenna.
- Universal Bracket allows permanent and convenient installation on soil pipe, window pipe, chimney, roof, gables, cornices, wall copings, etc.
- Individually boxed.

Vertical Mast with all accessories for Universal Mounting — including Lead-in Wire, Ground Wire, Brackets, Lightning Arrester, Screws, Insulators, etc.

No. 4516 List \$6.95
to a Standard Carton—Weight 33 lbs.

ICA INSULINE RADIO PRODUCTS ICA

ICA "DE LUXE" AUTO RADIO ANTENNAS

The Latest, Improved ICA Auto Antennas

For over a quarter-century, ICA has pioneered in the field of radio-electronics. A leading manufacturer of receiving antennas of all types since the industry's earliest days, ICA now presents its newest, improved, complete line of auto radio antennas, incorporating extensive precision manufacturing facilities with the latest engineering features, including:

- Noiseless Performance
- Rattleproof Engineering
 - Lifetime Rustproof Guarantee
 - Triple-Chrome-Plated Admiralty Brass
- Vinylite Insulated Lo-Loss Cable
 - Weatherproof, Dustproof Joints
 - Easy, One-Man Installation
- Equipped with BOTH Delco and Motorola Fittings

ICA Disappearing ANTENNAS

For Fender and Cowl Mount
Suitable for all cars, old and new

56" of exposed antenna telescopes to 57".
Does not obstruct vision.
Plastic and chrome-plated insulator
hugs flat or convex surfaces.

Generous length cable . . . 48"

No. 4570 List \$6.45

Three-Section
Packed 10 to a standard carton
Weight 11 lbs.

PEERLESS MODEL

Designed especially for 1948 and
earlier model cars. Improved streamlined
appearance.

Features unique swivel base permitting
easy angle adjustment to match contours
of new cars.

No. 4571—Three-Section . . . List \$6.95
10 to standard carton—Weight 11 lbs.

ICA "TOPPER" ANTENNA

For variable angle mounting on
tops of fenders and cowls of
newest streamlined cars.

- Patented brass shim contacts prevent rattling or vibration.
 - Dust and Moisture-Proof.
 - Snug-fitting tapered telescopic joints.
 - Varied mounting positions to harmonize with contour of car.
 - Generous length (48") shielded loom Lo-Loss cable . . . Vinylite covered insulation.
- No. 4575 List \$5.45
Three-Section
Extends from 20" to 63"

"PIVOT TOPPER"

New development in variable
angle mountings. Special type
pivot permits universal angle
mounts. Easily installed. Merely
set rod to desired angle and
tighten securing nut. III-Q loss
cable. 48" lead-in.

No. 4576 List \$4.95

Three-Section
Extends from 20" to 63"
10 to stand. carton. Wt. 10 lbs.

"ROCKER" ANTENNA

A Variable Angle Antenna
to Fit the Contours of
All Car Bodies

- Suitable for all cars.
 - Easily adjusted to desired angle.
 - Weatherproof joint construction.
 - Easy, one-man installation.
 - Streamlined design to harmonize with latest cars.
 - High-luster bakelite insulator tamper-proof.
 - 48" Lo-Loss cable.
 - Completely assembled, ready for installation.
- No. 4541 List \$5.25

Three-Section
Extends from 23½" to 72"
10 to standard carton.
Weight 16 lbs.

UNI-MOUNT ANTENNAS

The Universal Aerial. Fits All
Types of Cars . . . Old and New.
For Underhood Mounting

- Streamlined modern design.
- Equipped with inter-changeable brackets for either side-hood or alligator hood mountings.
- No drilling of holes into car body necessary.
- Sturdy bakelite and chrome-plated brass insulator.
- Shielded loom Lo-Loss cable . . . vinylite insulated.

No. 4801 List \$4.45

Three-Section
Extends from 20" to 63"
10 to standard carton. Wt. 11 lbs.

No. 4803 List \$5.45

Three-Section
Extends from 31½" to 96"
10 to standard carton. Wt. 14 lbs.

SIDE COWL ANTENNA

A Series of Side Cowl Antennas
for Wide Application

- Includes patented brass shim
contacts for noiseless performance;
brass swivel coupling for
easy installation; shielded Lo-
Loss cable.
- No. 4566 (10 lbs. *) List \$4.45
3-Section, Extends 20" to 63"
No. 4553 (11 lbs. *) List \$5.45
3-Section, Extends 31½" to 93"

HEAVY DUTY AERIAL

- Made of extra large diameter
brass tubing. Ideal for long dis-
tance reception and rugged
wear.
- No. 4568 (14 lbs. *) List \$4.75
3-Section, Extends 29" to 68"
No. 4569 (15 lbs. *) List \$4.95
4-Section, Extends 30" to 80"
No. 4559 (15½ lbs. *) \$6.45
4-Section, Extends 36" to 110"

"PACEMAKER"

- Has most of the features of
above antennas but priced low
for quick sales.
- No. 4567 (10 lbs. *) List \$3.35
3-Section, Extends 25" to 62"
*10 antennas in standard pkg.

Spirling NEW PERMA-TENSION

PAT. PENDING

TELESCOPING

AUTO RADIO ANTENNAE

In Antennae its "SPIRLING"— In Silver its "Sterling"

- SIDE COWL MOUNTING**
- Delco adapter supplied
 - Motorola plug
 - Low loss extra long Polyethylene coaxial Hi Q cable
 - Plug-in cable fitting with lock washer—cannot loosen
 - Pressed bakelite insulation
 - Contact pin making perfect contact with cable
 - Sharp toothed lock washer assures perfect grounding
 - Straight eyebolt—direct positive contact from rod to cable
 - Rubber form fitting cushions
 - Shielding cup to eliminate noise
 - Special fine thread hex nut
 - Beautiful streamlined insulators

"PERMA-TENSION"
TELESCOPING ROD
E-Z ONE MAN INSTALLATION
Cable will fit all models.

FREE Three color 18" x 24" display card for mounting 4 antennae.

- Colored static discharge ball—small and neat appearing
- Stainless steel, precision ground top section—cannot rust
- Durable Admiralty Brass—Copper-nickel and brite chrome finish; rust-proof

PATENTED "PERMA-TENSION" CONSTRUCTION.

- A. Provides positive electrical contact
- B. Smooth non-stick rods, guarantees perfect telescoping for life of car
- C. Patented "Perma-Tension" guarantees against rattling

Hole in bottom of plug for perfect drainage

MODEL UMC 3

Streamlined Upper Mount Top Cowl or Fender Antennae

Perma-Tension Telescoping, self-aligning rocker which insures a snug fit with either flat or convex surface with a wide variation of angle. Easily installed, waterproof, Vinyl-Plasticized, Polyethylene, Lo-Loss shielded coaxial Cable. Individually packed in carton.

Three sections, extending 25" to 66", including 48" cable.

List Price \$6.95
MODEL UMC 3A — Three sections, extending 21" to 56", including 36" cable.
List Price \$5.95

SIDE COWL ANTENNAE

Perma-Tension Telescoping

Model	List Price
Model 1366	\$3.45
3 section, extends 25" to 66"	
Model SC-366	\$4.95
Extends from 25" to 66"

FEATURES

- All aluminum (TV antennas all 94" long).
- 1/2" weather-proofed elements.
- Element ends pressure-sealed to insure long life, prevent interior corrosion.
- Terminal ends of elements are reinforced with pressure-sealed aluminum insert.
- Standardized components permit interchangeability of models from single dipole to any other "Rig-Fast" model.
- "Rig-Fast" collar clamp assures quick, automatic alignment of elements on crossarm or mast.
- Self connecting reflector elements.
- All antennas complete with heavy duty rubber lead-in standoffs, guy ring and mounting brackets. Same rubber standoffs are designed for use with RG 59-U or 300 ohm lead-in cable.
- Individually boxed, with instructions.

OAK RIDGE ANTENNAS
239 EAST 127th STREET • NEW YORK 35, N. Y.

WORKSHOP TELEVISION ANTENNAS and ACCESSORY EQUIPMENT

In many locations, the ordinary television antenna does not provide enough "signal strength" for even the finest receivers. Workshop custom-designed Receiving Systems, because of their "high-gain," will bring you pictures with brilliant clarity — even at places far beyond the normal range.

Features of the Workshop Receiving System

Choice of 8 different 3-element high-gain arrays to cover all channels and FM.
Each array can be independently oriented for maximum gain and minimum ghosting.
Rugged construction throughout — elements of one-half inch aluminum tubing.

Never becomes obsolete! As new stations go on the air, additional arrays can be added.

Each 3-element array is matched to its own low-loss coaxial transmission line — man-made static and noise pickup are negligible. Simple coaxial switch changes from one channel to another conveniently at the receiver.

HOW TO CHOOSE THE WORKSHOP RECEIVING SYSTEM FOR YOUR AREA

Two or three arrays properly chosen will normally take care of most situations. However, the system is designed to ordinarily accommodate up to four arrays and more if necessary when properly spaced.

Select the antenna array (specifying model numbers) for the channels to be received in your area.

For example: Suppose channels 2, 4, 5, 8 and 9 are active in your area, with channel 4 the weakest. From Table A you would select a 57LM for channel 2, a 69LM for channels 4 and 5, and a 183LM for channels 8 and 9. This system would be designated as Model No. TVS-3, with arrays as selected above.

RECEIVING SYSTEMS

(less transmission line and accessories)

Model No. TVS-2—Workshop Antenna Receiving System with any 2 arrays selected from Table A, complete with Mast and Mounting Brackets. Approximate shipping weight 15 lbs.

List Price\$55.00

Model No. TVS-3 Workshop Antenna Receiving System with any 3 arrays selected from Table A, complete with Mast and Mounting Brackets. Approximate shipping weight 20 lbs.

List Price\$80.00

Please specify Model No. of antennas desired when ordering Models No. TVS-2 and -3.

WORKSHOP MAST EQUIPMENT AND ACCESSORIES

Model No.	Description	Shpg. Wt. Lbs.	List Price
M-1	Mast Extension (length 4 ft.). For insertion between existing mast sections	2 lbs.	\$2.25
M-3	Bottom Mast Section (length 4 ft.). Cable port at bottom.	3 lbs.	3.25
M-5	Special Top Mast Section (length 4 ft.). For mounting 2 arrays from Table A. Used with M-3.	3½ lbs.	7.00
M-6	Special Middle Section (length 4 ft.). For mounting 3 arrays from Table A. Used with M-3 and M-5	3½ lbs.	7.50
M-7	Base Mounting Bracket. Designed to attach M-3 to flat or inclined surface. Hardware furnished.	1 lb.	1.75
M-2	Tri-Point Mast Mount. Bolts to M-3 and attaches to side of wood structures. Heavy gauge galvanized steel. Supplied with complete hardware including clamp brackets	5½ lbs.	8.50

SP-18 Clamp Brackets. Additional clamp brackets, complete with hardware and wood screws for attaching to wood surfaces. Made of galvanized steel. 1 lb. \$2.25

G-3 Guy Wire Plate. Slips over mast. Permits guying in cases where elevation with rigidity is a prerequisite for good signals. ¼ lb. .50

ANTENNA DEALERS

In addition to its primary use, this new switch is the answer to the television sales demonstration problem. By simply using additional switches any number of television sets can be demonstrated from one convenient location.

THE NEW WORKSHOP COAXIAL SWITCH

This unit is designed for use with Workshop Television Receiving Systems. It switches any one of four arrays to a receiver.

Model No. R-4 Four-position switch. List Price \$15.00
(Additional positions available on special order; price on request.)

ACCESSORIES

Model No.	Description	List Price
W-50	Silver-plated Solderless Cable Plug for use with RG-59 U coaxial cable. Mates directly with coaxial switch.	\$.60
W-60	Silver-plated Receptacle for chassis mounting. Mates with W-50.	1.00
W-80	Silver-plated Cable Junction. Both ends mate with Cable Plug W-50.	1.50
RG-59/U	72 Ohm Coaxial Cable. Matches Workshop 3-element arrays directly. Neutral color with convenient marks indicating five foot intervals.12 per ft.
W-100	Adapts RG-11 U or RG-8 U to small coaxial cable connectors	2.50
T-72	Broad-band Impedance Matching Transformer. Matches 72 ohm unbalanced coaxial line to 300 ohm balanced line.	3.50

WORKSHOP "100-MILE" HIGH-GAIN TELEVISION ANTENNA

A 6-element, high-gain highly directional antenna for use in low signal strength localities adjacent to fringe areas. Forward gain is 7.6 db., ½ power angle in the vertical plane is 68 degrees, ½ power angle in the horizontal plane is 64 degrees. Negligible response at rear and sides. Three-way connector available on special order for RG-59 U. Mounts on standard 1" threaded pipe (not supplied). Should not be used with Workshop mast equipment.

CTC Expands Line of Electrical and Electronic Components and Hardware

TURRET LUGS (All Lugs silver-plated brass). With 2 soldering spaces for 2 or more connections. Stocked in $\frac{1}{32}$ ", $\frac{1}{16}$ ", $\frac{3}{32}$ ", $\frac{1}{8}$ ", $\frac{3}{16}$ " sizes for standard phenolic terminal board thicknesses.

SPLIT LUGS (Knurled). For potted units where later soldering is advisable, as well as standard applications. Hole through shaft allows top or bottom wiring. To fit $\frac{3}{32}$ " or $\frac{1}{32}$ " boards.

DOUBLE END LUGS
Provide terminal posts on both sides of board with through connection for easy wiring. For board thicknesses from $\frac{3}{32}$ " to $\frac{1}{4}$ ".

SHORT LUGS
For low "headroom" applications. Available in shank lengths for 6 board thicknesses, starting with $\frac{1}{64}$ ".

SWAGERS
H.S. (Hand) Swagers are sold outright in sizes for any CTC Terminal lug.

Pressure Swagers. Supplied with dies for one type terminal on loan basis. Extra dies or unit with dies may be bought outright.

INSULATED TERMINALS
Two sizes in rivet or stud type, for high electrical stresses over broad humidity range. Phenolic insulator with midjet single or double lug. Voltage breakdown X1719, X1718, 11,000V at 60 cycles RMS. X1581, X1580, 6000V.

HARDWARE
Miscellaneous hardware as shown.

TERMINAL BOARDS

Of approved laminated phenolic, $\frac{3}{32}$ ", $\frac{1}{8}$ ", $\frac{3}{16}$ " thick in 4 widths — $\frac{1}{2}$ ", 2", 2 $\frac{1}{2}$ ", 3". Five-section, separable units with each section drilled for 14 lugs.

SLUG TUNED COILS

Miniature variable inductors. LSM $2\frac{7}{32}$ " high, LS3 $1\frac{1}{4}$ " high when mounted. Both in 5 standard windings (1, 5, 10, 30, 60 mc) also special windings or as unwound high quality phenolic coil forms. Performance charts available.

R.F. CHOKES

LHC — high Q iron core choke with 6-32 mounting stud, in 8 standard values from 2.5 mh to 125.0 mh.
LAB — Pie wound on phenolic core with cotter pin terminals in 8 windings from .75 mh to 15.0 mh. Current rating for both — 125 ma.

*Custom or Standard
The Guaranteed
Components*

CUSTOM ENGINEERING

CTC Engineers will design Boards, Coils and Terminal Lugs for production in quantity to fulfill whatever need may arise.

ZIP-IN Sockets, Ethylon-A

Easy Mounting . . . High Electrical Efficiency . . . No Breakage

Loktal

Molded of low-loss Ethylon-A, ZIP-INS are rated for operation with R.F. and A.F. amplifier tubes, mixers and detectors. ZIP-INS can be easily pushed or pressed in place and the design is such that the socket is then firmly locked in the chassis. No screws, rivets or retainer rings are required. ZIP-IN Sockets have a "Q" factor many times higher than sockets of conventional dielectrics. Tools for chassis hole in next column.

Octal

Number	Description	List
59-302	Loktal	\$.24
59-305	Octal	.20

Tube Shields No. 5-405, 5-408 and 5-409 are used with Sockets No. 59-369, 59-406 and 59-407.

Laboratory Punch and Dies

For punching mounting holes for Amphenol connectors, plugs and receptacles. Made of tool steel, properly hardened. For regular production of chassis use the Punch Press Dies listed below.

For Amphenol Retainer Ring Mounting Tube Sockets, Radio Plugs, etc.

Drill 1/2" hole for pilot punch.

No.	Size of Hole	List
25-LD-1	1-11/64" keyed	\$12.00
25-LD-2	1-21/64" keyed	12.00

For Miniature Sockets and Microphone Connectors

Drill 3/8" pilot hole for 25-LD-3, 5 and 6 and 1/4" hole for 25-LD-4.

25-LD-3	13/16" round	\$3.60
25-LD-4	5/8" round	3.60
25-LD-5	5/8" "D" hole	6.00
25-LD-6	1/2" "D" hole	6.00

For Amphenol ZIP-IN Sockets

25-101	.687" keyed for Miniature 7 Pin	\$27.00
25-102	1.062" keyed for Loktal and Octal	27.00
25-103	.796" keyed for Miniature 9 Pin	27.00

Punch Press Production Dies

Oil-hardened tool steel dies for heavy service. Die ring is accurate on outside diameter; dowel holes and threaded screw holes in the bottom make its inclusion into a die block simple and inexpensive.

Punch has a 1" shank to fit small presses. When necessary to fit into larger presses a split shave should be used. Rubber stripper fitted over punch strips chassis from punch after piercing operation.

Number	Description	List
25-PP-1	For 1-11/64" keyed hole	\$40.00
25-PP-2	For 1-21/64" keyed hole	40.00

Retainer Ring Hand Tools

51-5

51-1

Convenient for assembling miniature sockets, plugs and tip jacks to panels or chassis. Designed for hand operation.

Number	Description	List
51-5	For No. 2-9 Rings	\$1.20
51-6	For No. 2-11 Rings	1.20
51-7	For No. 2-10 Rings	1.20
51-1	For "S" type sockets and "CP" type plugs except 7C and 7L sizes. Required where socket spacing is very close.	6.66
51-2	For "S" type sockets 7-large and 7-combination	6.66
51-3	For "SS" steatite sockets and "60" and "61" receptacles. Of two-piece construction . . . somewhat easier but slower to use than 51-1 (above) for "S" sockets and "CP" plugs	6.66

Acorn Tube Sockets

Positive contact . . . designed for minimum losses at ultra-high frequencies. Base is silicone treated, unglazed steatite. Amphenol's exclusive design eliminates most tube insertion and withdrawal pressure, reducing cracking and breaking of glass.

Number	Description	List
151-001	5 Contact. Complete with cathode and by-pass assembly for mounting directly on chassis. Bronze contacts. Size 1 x 1-3/8"	\$2.20

ZIP-IN, Ethylon-A

ZIP-IN Sockets, molded of low-loss Ethylon-A are used for R.F. and A.F. amplifier tubes, mixers and detectors. "Q" factor is many times higher than sockets of conventional dielectric and ZIP-INS won't chip or break. Sturdy steel mounting plate cannot come loose or vibrate. Mounts above or below chassis in 1-3/16" round hole. Mounting plate has 5/32" holes on 1-1/2" centers.

Number	Description	List Price
59-352	8 Contact, Loktal	\$.27
59-355	8 Contact, Octal	\$.23

MIP Molded-In-Plate Sockets

Molded of high dielectric black Bakelite, sturdy, steel mounting plate molded directly into the solid body, cannot come loose or vibrate. Contacts grip tube prongs firmly and retain their resiliency indefinitely. Mount in 1-5/32" round hole. Two 5/32" screw holes on 1-1/2" centers.

Number	Contacts	List	Number	Contacts	List

For 110-250 Volt Plugs and Receptacles

Compact in design, molded from high dielectric black Bakelite. Rated at 15 amp., 110 v. or 10 amp., 250 v. Two-pole type accepts any standard electric plug. Retainer ring type mounts in 1-11/64" keyed hole as punched by Tools 25-LD-1 or 25-PP-1 (page 4). Mounting plate type requires 1-9/32" D. chassis hole; has slotted screw holes on 1-1/2 to 1-7/8" centers. Mounting plate type is similar to Type "RS" Replacement Sockets shown on page 5.

AMPHENOL

AMERICAN PHENOLIC CORPORATION

1830 SOUTH 54TH AVENUE, CHICAGO 50, ILLINOIS

Heavy Duty Power Plugs

Male unit has four heavy brass blades; female has heavy phosphor bronze contacts. For use with current loads up to 15 amperes at 125 volts or 10 amperes at 250 volts. Molded black Bakelite unit is enclosed in tight, heavy brass shell... bright cadmium plated. Polarized with shell keys and keyways. Strain is taken up by concealed cable clamp. Grounding screw in body for safe wiring. Threaded locking ring keeps shells tight. Chassis or panel receptacle mounts in 1 1/4" hole in any material up to 1/2" thick. Complete with lock washer, spacer washer and nut.

Plug

AMPHENOL

Duodecal and Diheptal Tube Sockets

Designed for television viewing tubes, oscilloscopes and other cathode-ray tubes. Provides means of grouping leads within the socket housing and bringing them out radially in a neat, unit-cable form, reducing the space required to a minimum. Grouping of the wires in the enclosed raceway eliminates flexing at solder terminals, minimizing breakage.

Removable socket cap provides complete enclosure for all connections, eliminating shock hazard, yet the cap is easily removed for wiring or servicing. Opening for the lead

wire harness can be positioned in any of 61 locations. Contacts are seated in individual wells, the walls of which form efficient creepage barriers. Socket cap and body molded from high quality electrical bakelite. Contacts are Amphenol exclusive "clover-leaf" design featuring four full lines of contact on each tube pin.

The socket is designed for easy assembly and disassembly... requires no special tools.

Duodecal Socket for a maximum of 12 equally spaced pins on a circle diameter of 1.063".

No. 59-402.....List \$1.56

Diheptal Sockets for a maximum of 14 equally spaced pins on a circle diameter of 1.750".

No. 59-417 Medium—for 2.250" D. Tube base.....List 1.67

Angle Octal Socket

For applications where the sockets are used with supported tubes such as Lighthouse tubes assembled in cavity resonators, Cathode-Ray, Klystron and Strahotron tubes. The protruding lead channel is designed to take the strain of the leads. Removable socket cap provides complete enclosure for all wiring connections. Provides a means of grouping leads within the socket housing and bringing them out radially in two neat, unit-cables.

No. 38 Black Bakelite.....List \$.78

Magic Eye Assembly

For easily adapting or replacing a 6 prong magic eye tube in any radio having automatic volume control. Also for FM receivers, test instruments, signal tracers, and as volume level and modulation indicators. Includes 1 megohm target plate resistor wired into socket and 5 wire, color coded cable 22" long. Mounting bracket is slotted for tube adjustment. Complete as illustrated, with escutcheon and hardware for assembly. Tube not included.

No. 58-MEA6 Complete Magic Eye Assembly.....List \$1.51

Octal Magic Eye Assembly

Similar to No. 58-MEA6 shown above, but for octal type magic eye tubes. New universal short bracket for the smaller tube sizes permits use of any of the octal magic eye tubes including the dual pattern and the new multi-pattern types. Complete with 8 wire, color coded cable.

22" long, full vision escutcheon and hardware for assembly. Tube not included.

No. 58-MEA8 Complete Octal Magic Eye Assembly.....List \$1.51

Magic Eye Escutcheons

Hood type is of sturdy plastic with beautiful antique bronze finish. Full vision type for octal dual-pattern and new octal multi-pattern types is brass with antique bronze finish.

Number	Description	List
10-102	Hood Type. For 6 prong tubes.	\$.15
10-2	Full Vision Type. For octal tubes.	.36

Alignment Tool

Made of Amphenol 912-A polystyrene. Has no capacity effect when aligning critical circuits. A necessary tool for anyone who must make adjustments on high frequency circuits.

No. 55 U.H.F. Alignment Tool (minimum order 24).....List \$.25

AMERICAN PHENOLIC CORPORATION

1830 SOUTH 54TH AVENUE, CHICAGO 50, ILLINOIS

Microphone Cables

Low Capacitance . . . Flexible Plastic Jackets

Amphenol Microphone Cables with polyethylene dielectric are of unusually low capacitance for their small diameter. Designed for use by P.A. system service men and for manufacturers of sound equipment and the complete range of similar applications.

Amphenol and any other standard microphone connectors may be used with them as shown below. The vinyl type jacket is suggested for heavy duty applications.

Amphenol Number	Jacket	Dielectric Diameter	Capacitance mmf. per ft.	Use Connectors	List per ft.

21-147	.195 D. Poly.	.116	25	Series 75	.15

Series 75 Microphone Connectors—Single Contact

Fit almost every microphone. Standard with leading manufacturers for many years. Compact, rugged, neat. Chassis receptacles are integral parts of microphones using single conductor cable. Widely used in amplifiers, transmitters, photoelectric devices, home recorders, and similar equipment. They are also suitable for connecting various units such as P.M. speakers, headphones, and for theft alarms or wall type coin-operated devices, etc.

In the 75 Series, plugs mate with all cable jacks and receptacles. The pressure contacts are spring actuated to assure positive electrical connection. Circuit closing contacts are the same except that they close the circuit when plug is disengaged, eliminating open circuit grid howls. Locknut Receptacles mount in .385" holes when grounding to chassis and 1/2" holes for ungrounded 2 circuit applications.

Phone Plug Adapter

Screws into coupling ring of 75-MC1F and 75-MC1F-A plugs, permitting the cable to be plugged into any standard phone jack. No soldering or wiring.

75-MC1P.....List \$.49

Cap and Chain

Seals open chassis units against dirt and dust. Used with any threaded 1 or 2 conductor chassis unit.

75-CCC1.....List \$.55

Microphone Switch

Threaded on one end, coupling ring on the other end. For 75 Series Connectors. May be connected directly to any mike equipped with 75-PC1M or similar receptacle. Push-to-talk or slide button for permanent connection.

75-MC1S.....List \$1.10

Series 80 Microphone Connectors—Single and Double Contacts

Series 80 Cable Connectors are designed for shielded cables; for single and two conductor coaxial cables, microphone cables; for twisted pairs, concentric lines, photo cell leads, patch cords and similar uses. Suitable for connecting model railroad equipment, pin ball games and other small electrical apparatus. Elements are high dielectric black Bakelite.

Chassis connectors are of the same precision construction as cable connectors assuring positive connections. Free from noise, leaks or shorts.

Male chassis units have coupling rings. The chassis receptacles have coupling threads. All mount in 5/8" chassis holes. Maximum chassis thickness for locknut type receptacle and coupling ring chassis unit is 11/32".

Plugs, cable jacks and chassis receptacles are supplied with male or female contacts as listed below.

Mating families of connectors are listed in horizontal lines.

COAXIAL CABLES AND CONNECTORS • INDUSTRIAL CONNECTORS, FITTINGS AND CONDUIT • ANTENNAS • RADIO COMPONENTS • PLASTICS FOR ELECTRONICS

Series 91 Microphone Connectors—3 and 4 Contacts

Extensively used on all types of portable apparatus, these connectors were designed primarily to use with microphones. Some of the advantages of Amphenol Microphone Connectors . . .

- Accidental disconnections are eliminated by a positive screw-type connection.
- Incorrect insertions are impossible because connectors are polarized.
- Pulling and twisting strain on soldered contacts is eliminated because a squeeze-type clamp grips cable securely after assembly.

Series 91 male chassis units have coupling rings. Chassis and panel receptacles have coupling threads. All mount in 27/32" chassis tabs. Maximum chassis or panel thicknesses are as follows: chassis receptacle, 1/8"; panel receptacle, 5/8"; coupling ring chassis unit, 3/8".

Plugs, cable jacks and chassis receptacles are supplied with male or female contacts as listed below.

Mating families of connectors are listed in horizontal lines.

Cap and Chain

For 91 Series Connectors. Same construction and material as No. 75-CC1.

No. 91-CCC3 List \$.55

Stand Connectors

For attaching microphones to stands with provisions for quick disconnection. Threads on any microphone and having 5/8"-27 male threads. Mates with microphones equipped with No. 91-MC3M type connector. Finished in polished chrome plated machined brass.

91-SC3F 3 Contact, Female List \$1.10

91-SC4F 4 Contact, Female List 1.20

Twin-Lead Transmission Line

Convenient, efficient Amphenol Twin-Lead is the first choice of amateurs for construction of antennas and transmission lines. It transmits signals with minimum losses . . . it's durable . . . inexpensive . . . simple to install . . . repels water . . . is unaffected by acids, alkalis and oils because the dielectric is Amphenol Polyethylene. Remains flexible at -70°C. and after continuous aging in sunlight.

Full Thickness . . . Edge to Edge

The extruded polyethylene dielectric of Amphenol Twin-Lead is full thickness from one conductor to the other, minimizing impedance change caused by collecting of moisture on the surface of the dielectric between the conductors.

Receiving Twin-Lead

14-056 300 ohm, for most FM receivers \$48.50
 14-079 150 ohm, for experimental work 40.37
 14-080 75 ohm, for applications requiring lower impedance 33.45

Transmitting Twin-Lead

14-023 75 ohm, for amateur transmitting systems. Rated at 1000 watts for 30 mc. List per foot 12c

Below: Actual size cross-section views of the four types of Twin-Lead.

Screw Eye Stand-Off Insulators

66-201 66-202

The low-loss polyethylene insert in Amphenol Screw Eye Insulator No. 66-202 fits the 3 types of Receiving Twin-Lead. No. 66-201 is designed to be used with coaxial cable and other types of leads with diameters not exceeding 1/2". The No. 14 wood screw is 3" long.

66-201 For Coaxial Cable, List each \$.15
 66-202 For Twin-Lead, List each .15

Polystyrene Line Spreaders

Used for separating feeder lines and for construction of folded dipole antennas from wire. Molded of low-loss, crystal-clear polystyrene, light-weight and easy to use. Set screws keep the spreaders firmly in place and the transmission line wires evenly spaced. Wire holes .085" D. Standard package 25.

66-205 Length 2" List each \$.15
 66-206 Length 4" List each .20
 66-207 Length 6" List each .25

Polystyrene Stand-Off Insulators

Molded of low-loss polystyrene for perfect insulation of Twin-Lead transmission lines. Offset mounting hole permits easy mounting to all surfaces. Long spring base for retainer arms insures permanent, strong grip on Twin-Lead. Spaces 1-5/16" from mounting surface. Standard package 100.

66-909 For 300 ohm Twin-Lead, List ea. \$.15

AMERICAN PHENOLIC CORPORATION

1830 SOUTH 54TH AVENUE, CHICAGO 50, ILLINOIS

Amphenol Television Antenna Array Brilliant Reception on All Channels in Both Bands

The added gain of the Amphenol Folded Dipole Television Antenna results in brighter pictures and its highly directional pattern eliminates "ghosts" caused by multipath pickup.

Two broadbanded folded dipoles and a low band reflector, with a common transmission line, provide reception over both television bands . . . 174-216 mc and 54-88 mc. The unique design of this new Amphenol antenna permits the large folded dipole (for the 54-88 mc band) to be used as a reflector for the small folded dipole which is tuned to the 174-216 mc band. Exhaustive tests show that gain is greater than for a cut dipole not only over the entire high frequency band but also over practically all the low frequency band. Thus the new antenna eliminates the need for individual antennas cut for each channel or band.

Genuine Amphenol Twin-Lead transmission line and rigid, low-loss stand-off insulators prevent loss of signal between antenna and receiver.

Antenna elements and supports are sturdy aluminum. The 5 foot mast is rust proof steel tubing. Easily assembled with ordinary tools. Swivel mounting plate and guy clamp permit installation on flat or slanted roofs.

No. 114-005 Packaged complete with 75 feet Amphenol Twin-Lead transmission line, and installation instructions. List \$27.50

Folded Dipole and Reflector FM Antenna

For Suburban Installations and General Long Distance Reception

Specifically engineered for finest FM performance . . . to produce the best reception and optimum gain. Gives brilliant reception all across the FM band . . . not just the center. Impedance is efficiently matched with the genuine Amphenol Twin-Lead transmission line furnished.

Rigid low-loss stand-off insulators and genuine Amphenol Twin-Lead transmission line prevent loss of signal between antenna and receiver. Swivel bracket permits installation on flat or peaked roofs.

Mast and elements are high strength, tubular aluminum. Rugged construction makes this antenna practically weather-proof . . . withstands severe winds, ice, snow. Simple, lightweight, easy to install.

Packaged complete with 75 feet of Amphenol Twin-Lead transmission line and installation instructions.

No. 114-008 FM Folded Dipole and Reflector. List \$16.25

Amphenol Folded Dipole FM Antenna

For General Use in Areas of High and Medium Signal Strength

Engineered and manufactured to meet the exacting requirements of good FM reception, this antenna is broadbanded over the entire FM range (88 to 108mc). Impedance is efficiently matched with the genuine Amphenol 300 ohm Twin-Lead transmission line furnished.

Major electrical components . . . the Twin-Lead transmission line, the polystyrene stand-off insulators and the main dipole insulator . . . are all designed for minimum transmission loss. Streamlined, functional design, rugged construction and top quality materials assure maximum durability and weather resistance. Mast and elements are high strength, tubular aluminum. Lightweight, simple construction makes the Amphenol FM Antenna easy to install . . . a fast, one man job. A swivel bracket permits installation on flat or peaked roofs.

Supplied in a sturdy carton, complete with 75 feet of Amphenol 300 ohm Twin-Lead and installation instructions.

No. 114-001 FM Folded Dipole Antenna. List \$12.25

All-Direction Double Folded Dipole Antenna

Amphenol's double folded dipole antenna receives FM broadcasts from all directions. It does not require any rotation and will give even, crystal-clear reception all over the FM band . . . not just the center. Provided with a quarter-wave phasing stub, the two folded dipole elements are properly matched to give essentially a circular radiation pattern and gain equal to an efficient folded dipole.

Antenna is sturdy, lightweight aluminum, constructed to withstand the most severe wind and icing. Genuine Amphenol Twin-Lead transmission line and rigid, low-loss stand-off insulators at precise intervals prevent loss of signal between antenna elements and your receiver. Swivel mounting plate permits mounting on flat or sloping roofs.

Packaged complete with 75 feet of Amphenol Twin-Lead transmission line and installation instructions.

No. 114-010 All-Direction Double Folded Dipole FM Antenna. List \$16.25

Amphenol All-Wave Antenna Standard Broadcast, Short-Wave and FM

Amphenol All-Wave Antennas provide interference-free reception on FM, standard broadcast and short-wave bands. In actual comparative tests over a wide range of frequencies, the Amphenol All-Wave proved to be far superior in gain to the best double doubler.

The FM section of the antenna consists of a horizontally polarized dipole. A 65 foot length of Amphenol polyethylene covered copper wire comprises the antenna for standard broadcast and short-wave bands. A special filter automatically switches the energy from the proper antenna to the input of the receiver. Amphenol 52 ohm coaxial transmission line connects the antenna to the receiver reducing electrical interference to a minimum.

Packaged complete. Shipping weight, 9 lbs.

No. 124-001 All-Wave Antenna, 500 kc thru 108 mc List \$29.75

Reflector for Amphenol Folded Dipole FM Antenna

The Amphenol FM Reflector Kit is designed for installation on Folded Dipole FM Antenna No. 114-001 in low signal areas to improve distance coverage - provides additional gain over the entire 88-108 mc band. Easy to attach, it may be installed at the time the antenna is set up or later.

Packaged in a kit consisting of reflector element, tubular aluminum braces and installation hardware.

No. 114-003 Reflector Kit for use with FM Folded Dipole Antenna. List \$5.50

Side Mounting Bracket

When it is advantageous to mount an antenna on a chimney, side of building, etc., use this sturdy bracket. The antenna mast slides through the socket and is held securely at any point by 2 set screws in the bracket.

No. 107-110 Fits Amphenol antenna masts. List \$1.50

**ROTARY BEAM
SIGNAL SQUIRTER**

10 and 20 Meter Band Antenna

Amateurs around the world have established records for DX communications with the Signal Squirter. Advanced engineering, simple construction, high efficiency and its durable, dependable rotator give full, uninterrupted performance.

The simple inductostub method of coupling the transmission line to the antenna insures excellent performance without the complicated adjustments usually required to reduce the transmission line standing wave.

- Other important features are . . .
- Unlimited rotation
 - High forward directivity
 - Rigid, low-loss elements
 - Non-resonant transmission line
 - Positive position lock
 - High front-to-back ratio

Complete information on the Amphenol Rotary Beam Signal Squirter will be furnished on request.

Signal Squirter Kits include rotator with mounted inductostub assembly, direction indicator, center section, elements, insulators and installation hardware.

- Kits**
 140-005 Dual three 10 and 20 Meter Deluxe Kit Amateur Net Price \$458.00
- Rotator**
 160-003 Deluxe Rotator with Inductostub Rings for 10 and 20 Meters Amateur Net Price \$224.00
- Direction Indicator**
 160-947 For Rotators listed above Amateur Net Price \$28.00

Literature describing the Signal Squirter in detail is available on request.

Amphenol Antennas are easy to assemble and install.

2 Meter Antenna

Versatile, three-element array designed by Amphenol for use on the 2 meter band. This modern, high-gain directional antenna features a folded dipole for the driven element, 2-plane polarization and maximum front to back ratio. Adjustable spacing and tuning of the parasitic elements permits maximum efficiency. Shipped complete with mounting hardware and installation instructions.

No. 140-001 Shipping weight 7 1/2 lbs. List \$22.00

Features

Strong, Light Rotator weighs only 56 lbs. Unlimited rotation in either direction.

Direction Indicator synchronized with array, indicating direction of beam at all times.

Three Element Signal Squirter extremely effective in reception as well as transmission . . . better than 30 DB attenuation over more than 180° to the rear and approximately 40 DB front-to-back ratio.

Clear, Plastic Window Pane

This clear polystyrene window pane makes an easy job of bringing in leads . . . ends broken glass and drilling thru sash. It is easy to cut to size and drill . . . ordinary wood working tools will do the job. Polystyrene's dielectric properties make it ideal for the job.

Number	Sheet Size	List
19-093	3/32x12x16 in.	\$3.70

Silicone Compound

A thin coating of Amphenol Silicone Compound on radio transmission lines causes surface moisture to break up into isolated drops, preventing formation of a continuous film of moisture thereby eliminating changes of impedance and maintaining high surface resistivity. It is chemically inert; non-corrosive; effective up to 400° C.

No. 53-307 1 ounce tube. List \$2.00

SERIES 146 AMPHENOL INDUSTRIAL TYPE TUBE SOCKETS

Designed for top performance and long tube life. First to comply with NEMA and Underwriters' specifications for industrial equipment.

- The majority have screw type terminals to facilitate speedy servicing thereby reducing costly shut-downs. Sockets in older equipment more readily replaced.
- Cloverleaf contacts — an Amphenol exclusive — provide four full lines of contact with the tube pin to carry the required heavy current loads.
- Long insulating surfaces assure safety at high voltages.

Number	Description	List
146-118	2-PIN SOCKET for G.E. No. KC-4 and similar based tubes. Moulded of low-loss Bakelite with Underwriters' shield.	\$7.20
146-117	4-PIN SOCKET for G.E. No. FG-41 and similar based tubes. Design and construction similar to 146-118.	9.90
146-105	SUPER JUMBO 4-PIN ANGLE SOCKETS moulded of low-loss Bakelite. Back of panel terminal block provides long creepage. Bottom plate totally encloses wiring. Screw type terminals. For tubes having RMA bases A4-15, 16 or 18, maximum base diameter 2.219". With bottom plate, no terminal block.	4.95
146-106	Same as 146-105 less bottom plate, no terminal block.	4.65
146-107	Same as 146-105 with bottom plate and terminal block.	8.65
146-108	Same as 146-105 less bottom plate, with terminal block.	8.30
146-116	SUPER JUMBO 4-PIN SOCKET for top or bottom horizontal mounting. Moulded of low-loss Bakelite, staggered creepage pattern to prevent arc-over to chassis.	4.05
146-115	JUMBO 4-PIN SOCKET , similar to 146-116. For RMA A4-29, 28 and similar based tubes. Safety shield is 1-7/8" I.D., depth 1-3/8".	3.95
146-109	MEDIUM 4-PIN ANGLE SOCKETS moulded of low-loss Bakelite. Screw type terminals. For RMA A4-10 and similar based tubes. Safety shields are 1.377" I.D., depth 1-1/8". With safety shield for tubes with or without bayonet.	3.90
146-110	Same as 146-109 less safety shield.	3.90
146-122	MEDIUM 4-PIN HIGH VOLTAGE SOCKET WITH SAFETY SHIELD for high temperature applications. Mounting plate is solder-tused to steatite body. Mounting holes .156" D. on 2.428" centers.	2.30
146-123	MEDIUM 4-PIN HEAVY DUTY SOCKET WITH SAFETY SHIELD for horizontal rack mounting. Moulded of low-loss Bakelite.	2.25
146-124	Same as 146-123 without safety shield.	1.75
146-111	7-PIN MINIATURE BUTTON SOCKET for tubes such as 3Q4, 3S4 etc. Moulded of arc-resisting melamine, designed for top or bottom mounting. Has provisions for attaching tube shield base.	2.39
146-103	OCTAL INDUSTRIAL SOCKET accommodates all tubes passing RMA Gage No. GB8-1. Moulded of arc-resisting melamine for mounting above and below chassis.	1.58
146-104	Same as 146-103 with 4 moulded-in, threaded inserts for tie points.	2.16
146-101	OCTAL HIGH VOLTAGE SOCKET with mounting plate moulded into melamine body. Mounting holes .136" D. on 2 1/32" centers. Safety shield 1.377" I.D., Depth 1 1/8". Solder terminals.	1.12
146-119	SPECIAL SOCKET FOR GL-592 TUBE , a high RF Triode for industry and amateurs. Steatite insulation. Free floating contact bushings, solder type terminals.	2.10
146-121	SOCKET FOR CARTRIDGE TYPE PHOTOTUBE , 921, 922, or similar tubes. Moulded of mica-filled Bakelite. Angle bracket furnished for mounting in any of ten positions. Solder type terminals.	1.35

* Illustrated

SERIES 146 (Continued)

COMBINATION TUBE MOUNT AND STAND-OFF INSULATOR used as a tube mount for 6G-172 Thyratron and similar tubes, also as a stand-off insulator. Available with feed-thru panel bushing for above applications when thru mounting panel wiring is required.

Number	Description	List
146-120*	With bushing, 1/4" terminal screw	1.90
146-125	With bushing, 3/16" terminal screw	1.90
146-126	Without bushing, 1/4" terminal screw	1.52
146-127	Without bushing, 3/16" terminal screw	1.52

ANODE CAPS

Enclosed to prevent accidental touching of anode. Designed to prevent loosening usually caused by vibration. Cloverleaf contact assures full conductivity.

Number	Description	List
63-201	Anode cap for .800" D. anode	\$1.50
63-202*	Anode cap for .360" D. anode	.68

PREFOCUSED LAMP RECEPTACLES

For movie projectors, floodlights, beacons, searchlights using medium base prefocused lamps. Conservatively rated at 1000 watts 110-250 v. Listed by Underwriters' Laboratories. Heavy brass contacts assure minimum resistance for maximum light intensity. Can be installed in most movie projectors without drilling new holes. Heavy fiber insulator to cover terminals after wiring is included with receptacle. It is not needed when insulating cap is used on applications where socket is suspended.

Number	Description	List
98-8*	Bakelite receptacle only	\$1.93
98-9	Bakelite cap only	.55
98-1	Steatite receptacle for high temperature applications	1.93
98-2	Steatite cap only	.55

SERIES 148 AMPHENOL TRANSMITTING TYPE TUBE SOCKETS

Specially designed to bring out the best in tubes developed for transmitting and similar electronic circuits.

- Silicone moisture-proofed steatite body provided with tube cooling air vents assures maximum tube performance.
- Amphenol cloverleaf contacts—four full lines of contact with tube pin—for maximum conductivity.
- Barriers increase surface resistivity to prevent arcing at peak voltages.

RG-11/U
21-007

70 ohm Coax Cable with medium size, stranded tinned-copper conductor, single copper shield and black vinyl jacket.

RG-22/U
21-038

95 ohm Twinax Cable with two small size, stranded copper conductors, single tinned-copper shield and black vinyl jacket.

RG-57/U
21-039

95 ohm Twinax Cable with two medium size stranded copper conductors, single tinned-copper shield and black vinyl jacket.

RG-58/U
21-024

50 ohm general purpose Coax Cable with a small size, solid copper conductor, single tinned-copper shield and black vinyl jacket.

Fully approved and produced in accordance with Army-Navy specifications (JAN-C-17A). These specifications utilize the very fine dielectric properties of polyethylene, proven most efficient as a low-loss, flexible, mechanically stable dielectric. The outer jacket in most of Amphenol's approved types is tough, resistant vinyl . . . protective, nonhygroscopic, and impervious to exposure to acids, alkalis, oils and gasoline. Polyethylene is also used as outer jacket for some of the types listed.

Polyethylene is processed in strict accordance with Bureau of Ships Specification RE-9172. It should be emphasized that unusually strict standards are applied to every operation in the processing of Amphenol's RG cables. Rigid laboratory tests and process checks, plus Amphenol's "OK" certification and notarized affidavit on every unit shipment is final assurance of extra quality and dependability.

Polyethylene Characteristics

Specific Gravity	0.92
Water Absorption	.005% C
Cold-Brittleness	-70° C.
Dielectric Constant, 60 cycles to 100 mc	2.29
Power Factor, 60 cycles to 100 mc	.0004
Volume Resistivity, ohm-cm	10 ¹⁴
Softening Temperature, transparency point	103-105° C.

RG Cables

Chart shows characteristics and dimensions of RG Cables manufactured by Amphenol. Further specifications and prices on request. Impedance subheads below are approximate . . . for the purpose of grouping. Nominal impedance is shown in the third column.

Abbreviations used in chart: C—Copper
CW—Copperweld
S—Nichrome
Poly.—Polyethylene
S—Silvered Copper
T—Tinned Copper

AMPHENOL

Polystyrene, Acrylic and Transparent Vinyls

BECAUSE of its low-loss factor, Amphenol POLYSTYRENE is used extensively for sockets, insulators and dielectrics in the very-high, ultra high and super high frequency fields. Further, it is colorless and transparent and does not deteriorate with age. Continuous exposure to sunlight affects its clarity only slightly.

The outstanding colorless transparency of Amphenol ACRYLIC makes it ideal for dial and meter faces and as an electrical insulating material where radio frequencies are not involved. The surface will not burn or carbonize when subjected to an electrical flash over its surface.

"90" Series Transparent Vinyl Flexible Tubing—"Spaghetti"

Small sizes of Amphenol clear vinyl Flexible Synthetic Tubing may be used as "spaghetti". The larger sizes provide the newest type all-purpose conduit. Resists tearing and abrasion; but may be cut. Very flexible and when stretched or flexed, readily returns to original form. Superior dielectric strength; resists heat, concentrated acids and alkalis.

MICROPHONE PLUGS • JACKS • CONNECTORS

that will eliminate noise, shorts, and leakage in your Public Address systems.

M-140 Y connector — 2 male and 1 female—for use where more than one mike or speaker from single circuit. ***

M-151 Female connector Solid silver plated contact. Coupling can be removed completely for soldering.

M-161 Chassis mounting, solid silver-plated contact. Milled flat, prevents turning in chassis.

M-162 Shorting male with solid silver-plated contact and milled flat to prevent turning in chassis. Circuit closes when female connector removed — eliminating open circuit grid howl.

M-180 Phone plug. Mates M-150 or M-151 for insertion in standard phone jack.

M-190 Solid silver plated contacts, double tone. Mates M-151 or M-150.

M-192 Double Female with twin coupling nuts. Ideal for stereo cable connections. Mates all male connectors.

M-150 Standard solder contact. Mates with models M-170, M-161, M-160.

M-170 Mates with Model M-151 and M-150. Standard solder contact.

M-160 Chassis mounting — standard solder contact.

M-163 Standard chassis mount, nickel-solder contact with milled flat preventing turning in chassis.

M-164 Standard shorting male with eyelet and milled flat to prevent turning in chassis. Circuit closes when female connector removed, eliminating open circuit grid howl.

M-171 Male connector solid silver-plated contact mates with M-151, M-192, M-191, M-150 and all standard female connectors.

M-191 Double female coupling. Mates M-150, M-160, M-161.

M-130 Cap and chain assembly. Eliminates dust and noise by keeping open chassis units sealed.

M-181 Stubby Phone plug with nickel plated brass shell for shielding purposes. Especially suitable for Public Address Systems, Portable Radios, Telephone work, etc. Special size grip connecting lug.

***Buy combination cap by Model M-130 in conjunction with M-191 or M-192.

KINGS CO-AXIAL CABLE CONNECTORS

Kings is one of the largest manufacturers of co-axial connectors in the country. We carry most types in stock for immediate delivery, but we welcome your inquiries on any and all types.

A comprehensive chart listing our co-axial connectors is available on request. Write for your copy today.

KINGS REMOTE CONTROLLED TELEVISION ANTENNA

Now you can have pin-point selectivity for your television set. A flip of the switch at your set turns your antenna to the station you want. You're assured the best type reception to make your television receiver function at its best.

Kings manufactures three other models of fixed television and FM antennas. Catalogs and complete details on request.

KINGS VARIABLE CONDENSER

MODEL 200

452 M. M / F D CAPACITY

Kings engineering skill gives you this precision-made variable condenser. Prices and delivery available upon request. Write for details.

WHATEVER YOUR PROBLEM . . . bring it to KINGS. Our engineering department is always at your service with complete details and data. Please feel free to consult with us at any time.

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

TYPE DP FITTINGS

TYPE DPD (Socket Insert Assembly)

CANNON ELECTRIC

In design, this series of connectors differs from the majority of Cannon Connectors. Type DP Fittings are rectangular in shape, and polarization is affected by the arrangement of the contacts within the connectors. A wide variety of contact arrangements is available with contacts ranging from 10-amp. to 40-amp. capacity and with low impedance Coaxial contacts of 10-amp. capacity providing for continuous shielding available in some types. Standard shells are aluminum finished in sand blast and clear lac-

quer; some types are available in zinc, sand blast and clear lacquer finished. Contacts are brass, silver-plated. Insulation is phenolic, with specially treated low moisture absorption ceramic insulation used in coaxial contacts. Leading uses of the Type DP connectors are in rack and panel instrument and radio equipment where weight and space saving are important factors. A BULLETIN ON DP CONNECTORS IS AVAILABLE ON REQUEST.

TYPE "DPD" RECEPTACLES (With Socket Insert)

Mounting flange is $3\frac{3}{8}$ " x $1\frac{1}{8}$ " and shell extends $\frac{1}{8}$ " from the mounting surface forward. Coaxial contacts extend

$\frac{1}{4}$ " to the rear from the mounting surface. Shells provide for mounting with four No. 6 oval head machine screws. Material is aluminum.

TYPE "DPD" PLUGS (With Pin Insert)

Mounting flange is $3\frac{3}{8}$ " x $1\frac{1}{8}$ " and shell extends $\frac{1}{8}$ " from the mounting surface forward and $\frac{1}{4}$ " from the mounting surface to the rear. The coaxial contacts extend $\frac{1}{4}$ " from the rear of the shell. Shells provide for mounting with four No. 6 oval head machine screws. Material is aluminum.

TYPE "DPB" RECEPTACLES (With Socket Insert)

The DPB Receptacles are similar to the Type DP D differing only in the mounting flange which is reduced to $2\frac{1}{8}$ " x $1\frac{1}{8}$ " shell material, zinc or aluminum. Standard coaxials with ceramic insulation. Six insert arrangements available, one having twinax contacts and two having coaxial contacts.

TYPE "DPB" PLUGS (With Pin Insert)

The DPB Plugs are similar to the Type DPD, differing in the same respect as the DPB Receptacle differs from the DPD. They are mounted with four No. 6 Oval Head Machine Screws. Standard finish on all DPB shells is tinplate and clear lacquer. Other finishes by special order.

"DPR" Rack Type—Complete Unit

Four Insert Arrangements

Rack type fittings are used where large numbers of contacts must be repeatedly coupled and uncoupled, the coupling and uncoupling being performed by means of a geared movement operated by a bail type handle. The dimensions over all measure $5\frac{1}{2}$ " x 3 " x $2\frac{1}{2}$ " (including swing of bail). Has four holes for No. 8 Mounting Screws.

TYPE DPD-2

Special Instrument Panel Disconnect

The DPD2 has a two-gang shell holding 2 standard DPD inserts. Screw jack extraction means is available in straight or angle take-off. The purpose of the fitting is the standardization of such equipment so that it may be interchangeable between assemblies of various aircraft.

"DPB" and "DPD" JUNCTION SHELLS

Type DPB-33

Used with DPB-33S shells, having socket insert assemblies. Made of diecast aluminum alloy with tin plate and clear lacquer finish.

Type DPB-34

Used with DPB-34P shells, having pin insert assemblies. Same material and finish as above.

Type DPD-33

Used with DPD-33S shells, having socket insert assemblies. Made of diecast aluminum alloy with tin plate and clear lacquer finish.

Type DPD-34

Used with DPD-34P shells, having pin insert assemblies. Same material and finish as above.

DPB with twinax contact on program monitor for radio.

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

The cutaway view of Type DP plug and receptacle, both mounted, illustrates the method of application in rack equipment for radios and general instrument equipment. The use of this type of connector makes it possible to easily and quickly remove the rack portion without losing time in disconnecting all the wires. Although coaxials are not available in panel-type connectors now tested, the design is adaptable to their use.

TYPE "DP-12-33" RECEPTACLE

Socket Panel Assembly

Socket Panel Assembly is 2 1/4" x 2" x 3/8" with a solder pot extension of 1/8" from rear insulator mounted with 4 No. 4 Flat Head screws.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
12 30-amp. .135 387-1 2.68

TYPE "DP-12-34" PLUG

Pin Panel Assembly

2 7/8" x 2" x 1 1/8" overall, contacts extend 3/8" from insulation on engaging end and 3/8" on solder pot end. Has four mounting holes for No. 4 Flat Head Machine Screws.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
12 30-amp. .128 387-2 2.67

TYPE "DP-S10-33" RECEPTACLE (Socket Insert)

Socket Panel Assembly

Dimensions: Length 2 1/2"; width 7/8". Max. solder pot extension 1/8". 30-amp. contacts use No. 10 B & S stranded wire with 1/8" clearance. Insulation: phenolic. 4 mounting holes countersunk for No. 4 flat head machine screws.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
10 10-30-amp. .104 1596 2.72

TYPE "DP-S10-34" PLUG

Pin Panel Assembly

Dimensions: 2 1/8" x 7/8" x 3/8", with 3/16" max. pin extension and 3/16" max. solder pot extension. Insulation is phenolic. Four mounting holes countersunk for No. 4 flat head machine screws.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
10 10-30-amp. .065 1597 2.81

TYPE DP FITTINGS

TYPE "DP-30-57" RECEPTACLE (Socket Panel Assembly)

7 1/4" x 1 1/2" x 1 1/8" overall, solder pots extend approximately 3/8" from rear insulator. Fitting designed for mounting on panel with six No. 6 Flat Head Machine Screws.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
30 30-amp. .337 807 8.44

TYPE "DP-30-58" PLUG

Pin Panel Assembly

7 1/4" x 1 1/2" x 1 1/8" overall, contacts extend 3/8" from insulation on engaging end and 3/8" on solder pot end. Has six mounting holes for No. 6 Flat Head Machine Screws.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
30 30-amp. .225 808 5.34

TYPE "DP-N26-33" RECEPTACLE

Socket Panel Assembly

2" x 1 1/4" x 1 1/8" overall, maximum solder pot extension from rear insulator is approximately 1/8". Receptacle

has four mounting holes for No. 4 Flat Head Machine Screws.

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

TYPE "DPL-92-34" PLUG (Pin Contacts)

Rack or panel type connector, having wing nut center post extraction means. Two guide pins, 82 contacts accommodating No. 16 B&S stranded wire; 6 for No. 12, and 4 for No. 8. Phenolic insulation.

Contacts	Capacity	Wt. Lbs.	Cat. No.	List Pr.
92	{ 10-amp. 6-amp. 40-amp. }	.3901	4424-2	15.26

TYPE "DPL-92-33" RECEPTACLE (Socket Contacts)

Socket insert assembly, mating fitting for the above plug. Threaded center post, and 6 long spacer posts for mounting in rack or panel. Cannon full-floating socket contacts.

Contacts	Capacity	Wt. Lbs.	Cat. No.	List Pr.
92	{ 10-amp. 6-amp. 40-amp. }	.5312	4424-1	26.35

TYPE "DP-C6" and DP-C8" SWITCHING CONNECTORS

A switching connector for switching from 12 volts to 24 volts or vice versa. Pin contacts are bussed at the solder pot end. Shell material of the pin contact assembly is drawn steel; insulation melamine. DP-C8 is used for switching from positive ground to negative ground.

Contacts	Capacity	Wt. Lbs.	Cat. No.	List Pr.

TYPE DPF MASTER ENGINE DISCONNECT

This master engine disconnect has the cam-type extraction means. The complement of contacts is as follows: 4 No. 0, 1 No. 12 iron, 1 No. 12 constantan, and 69 No. 16, with two guide pins. The shell is aluminum alloy, insert insulation melamine. Cam nut is operated with a wrench for connection and disconnection. Pin insert assembly has the catalog number of DP-P-87-34P; socket insert assembly, DP-P-87-33S. Contact factory for prices.

Radio control panel for aircraft has new DPD2, 2 gang connector with radio tubing shaft.

PR. ENG. DIV. BENDIX AVIATION

MISCL. FITTINGS

TYPE "270-1" (AN3116) PLUG

This small and rugged single contact fitting is used for lighting circuits, instruments, cameras, etc. Its low (15-amp.) amperage contact accommodates No. 14 B&S stranded wire. The ferrule assembly is equipped with a flexible conduit nut. Material is steel, cadmium plated.

List Price \$1.84

TYPE "272" RECEPTACLE

Mating fitting for above Type 270-1. Overall dimensions are 1 1/2" x 7/8" with 1/8" maximum solder pot extension. Mounting holes of .120" diameter are spaced .625" apart, center to center.

List price \$1.10

Y6 MULTIPLE-TO-SINGLE DISCONNECT

BASIC UNIT

A terminal block for radio and other low amperage equipment, the Y6 handles single-to-single for multiple-to-multiple circuits. Vertical or horizontal units may be added easily. Contacts accommodate No. 16 B&S stranded wire for 5 amperes. Basic unit, Y6-1F-1H, List. 89c. Y6-6 plug, List. 86c.

Y6-6 Plug

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

TYPE X FITTINGS

CANNON "TYPE X" PLUGS AND RECEPTACLES—The "Type X" Series of small connectors offers inexpensive fittings of reliable quality for sound service, radio, public address systems and geophysical research. In addition to compactness, many exclusive Cannon features are embodied in this series, such as full floating contacts in all socket inserts. Solder pot cable connections are easily accessible. Cable glands are removable. Contacts are so positive that no latching device is needed for ordinary uses.

The arrow shows spring clip on full-floating socket contact which gives a positive pressure fit connection.

TYPE "X-11" CORD PLUG (With Socket Insert)

Sturdily built for dependable service. Light in weight. Shell is die-cast zinc, nickel finish. Will take $\frac{3}{16}$ " to $\frac{1}{4}$ " cable. Used in conjunction with the following: X-11 Wall Receptacle, X-12 Straight Cord Plug, and X-42 Microphone Receptacle X-44L Receptacle.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
1 15-amp.	0.081	X-1-11	\$1.75
3 15-amp.	0.083	X-3-11	1.75
4 {3-10-amp.} {1-15-amp.}	0.085	X-4-11	3.25

TYPE "X-12" CORD PLUG (With Pin Insert)

For use in conjunction with X-11 Straight Cord Plug (Socket Insert) or X-13 Wall Receptacle (Socket Insert). Shell is die-cast zinc, nickel finish. Will take $\frac{3}{16}$ " to $\frac{1}{4}$ " cable.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
1 15-amp.	0.061	X-1-12	\$1.25

TYPE "X-42" MICROPHONE RECEPTACLE (With Pin Insert)

Has all the features of "Type X" Straight Cord Plugs and Wall Receptacles but it is mounted on a flat base. Shell is die-cast zinc, nickel finish. Use with X-11 straight Cord Plug (Socket Insert) Mounting holes are $.144$ " in diameter and $1\frac{1}{4}$ " apart.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
3 15-amp.	0.063	X-3-42	\$1.25

(Type X-3-11 Plug and X-3-42 Receptacle)

TYPE XK FITTINGS

CANNON "TYPE XK" PLUGS AND RECEPTACLES—A quality line of Connectors, similar in design and construction to the "Type X" Series, but equipped with the fast-acting, sturdy Acme Threaded Coupling Ring and, therefore, ideal for use on equipment which is subjected to considerable vibration and tension on cables, such as on sound trucks and other portable units.

TYPE "XK-11" STRAIGHT CORD PLUG (With Socket Insert)

Shell is of die-cast zinc, cad. plated finish. Equipped with quick-acting coupling ring. Solder pot connections are easily accessible. Takes $\frac{3}{16}$ " to $\frac{3}{32}$ " cable. Built for long, dependable service. Used with XK-12, XK-14.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
1 15-amp.	0.081	XK-1-11	\$3.50
3 15-amp.	0.083	XK-3-11	3.50
4 {3-10-amp.} {1-15-amp.}	0.085	XK-4-11	5.00

TYPE "XK-12" STRAIGHT CORD PLUG (With Pin Insert)

For use in conjunction with Straight Cord Plug (Socket Insert) or Wall Receptacle (Socket Insert) with Coupling Ring. Provided with Shell is made of die-cast zinc, cad. plated finish. Takes $\frac{3}{16}$ " to $\frac{3}{32}$ " cable.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
1 15-amp.	0.081	XK-1-12	\$2.00
3 15-amp.	0.083	XK-3-12	2.00
4 {3-10-amp.} {1-15-amp.}	0.085	XK-4-12	3.00

TYPE "XK-13" WALL RECEPTACLE (With Socket Insert) (For replacement only)

TYPE "XK-14" WALL RECEPTACLE (With pin insert)

Body fits in a $\frac{3}{4}$ " hole and extends $\frac{3}{8}$ " behind a $1\frac{1}{2}$ " flange. Flange is $1\frac{1}{2}$ " in diameter, drilled for four #4-40 oval-head mounting screws on a $\frac{5}{8}$ " radius, 90° apart. Shell is made of brass, nickel finish. Solder pots extend $\frac{3}{8}$ " beyond body. Has external acme thread on shell and is used in conjunction with straight cord plug XK-11.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
1 15-amp.	0.045	XK-1-14	\$2.00
3 15-amp.	0.047	XK-3-14	2.00
4 {3-10-amp.} {1-15-amp.}	0.049	XK-4-14	3.00

TYPE "XK-13L" WALL RECEPTACLE (With Socket Insert)

Body fits in $1\frac{1}{4}$ " hole and extends $1\frac{1}{2}$ " behind flange. Flange is $1\frac{1}{2}$ " in diameter and drilled for four #4-40 oval-head mounting screws on a $\frac{5}{8}$ " radius, 90° apart. Shell is made of brass, nickel finish. Solder pots on contacts extend $\frac{1}{4}$ " beyond body.

Use in conjunction with a straight cord plug (Pin Insert) XK-12.

Contacts Capacity	Wt. Lbs.	Cat. No.	List Pr.
1 15-amp.	0.144	XK-1-13L	\$3.75
3 15-amp.	0.146	XK-3-13L	3.85

Raytheon's 3-channel Remote Amplifier and power unit use two types of Cannon Plugs: "X" and "P". Three receptacles on amplifier at right are Type P3-13.

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

TYPE XL FITTINGS

(XL-3-14N" Receptacle and "XL-3-11" Plug engaging position. Compare small size of plug with hand.

The new Cannon Electric Type "XL" connector combines various features found in other Cannon types into a small fitting comparable only in size to the Type "X" for low level sound transmission circuits. Among the leading features are the following: (1) convenient latchlock device to hold connector tight. (2) lightweight. (3) polarizing means (4) compression gland with relief spring or integral clamp, if desired. (5) streamlined design. (6) tapped metal for insert retaining screw. (7) provision for special grounding contact. Contacts are 5-amp. for No. 14 B&S stranded wire. Shell is zinc or steel, with various finishes available, bright nickel being standard. Satin-chrome finish available on steel shells. Min. flashover voltage, 1500 (250 working voltage). Packaged in boxes of 10 identical fittings.

XL-3-12 and XL-3-11 Mating Plugs. May be used for cable extension.

XL-3-11 with compression gland removed, showing rubber reducer bushing.

ZINC SHELL TYPES

TYPE "XL-12" STRAIGHT CORD PLUG (Pin Insert)

Type XL-12 plug has alignment rib in addition to polarizing groove. Cable accommodation is $\frac{1}{8}$ ". Insert is removable for soldering or inspection. Overall dimensions: length, $1\frac{1}{2}$ ". with cable relief spring, $2\frac{1}{2}$ "; max. diameter $\frac{3}{4}$ ". Insert dia. $\frac{5}{8}$ ".

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .0792 XL-3-12 1.20

TYPE "XL-11" STRAIGHT CORD PLUG (Socket Insert)

Type XL-3-11 is equipped with latch lock device and has raised polarizing boss. No. 1 contact engages before Nos. 2 and 3, and may be used for grounding purposes, if desired. $\frac{1}{8}$ " cable accommodation. Overall dimensions: length, 2 $\frac{1}{2}$ ", with relief spring, 2 $\frac{3}{4}$ " approx.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .0992 XL-3-11 1.25

TYPE "XL-14" RECEPTACLE (Pin Insert)

This wall mounting receptacle has three mounting holes having .136 diameter. Overall dimensions: flange diameter, $1\frac{1}{8}$ "; width flange, $\frac{3}{8}$ "; length behind flange to solder pot extension, $1\frac{1}{2}$ "; barrel diameter, $\frac{3}{4}$ ". Material zinc, bright nickel finish.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .0592 XL-3-14 1.00

TYPE "XL-13" RECEPTACLE (Socket Insert)

A wall mounting receptacle similar to XL-14 except that it has socket insert assembly and latch locking device. Overall Dimensions: flange diameter, $1\frac{1}{8}$ "; flange thickness $\frac{3}{8}$ "; rear of flange to solder pot extension $1\frac{1}{2}$ "; dia. barrel, $\frac{11}{16}$ "; three mounting holes drilled .136

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .132 XL-3-13 1.25

TYPE "XL-14N" RECEPTACLE (Pin Insert)

Designed to be mounted in a panel and has lock nut, accommodating up to $\frac{1}{8}$ " inch panel. Two fittings may be mounted on a single gang plate. Overall Dimensions: flange diameter, $1\frac{1}{8}$ "; barrel diameter, $1\frac{1}{2}$ "; width flange to barrel, $\frac{11}{16}$ ". with $\frac{1}{4}$ " max. solder pot extension; flange thickness, $\frac{3}{8}$ ".

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .2048 XL-3-14N 1.15

TYPE XL-3-12 PLUG (engaged with Type XL-3-13N Receptacle)

TYPE "XL-13-N" RECEPTACLE (Socket Insert)

Similar to XL-14N except has socket insert assembly, with latch-lock device, and polarizing boss on insert barrel. No. 1 contact engages before Nos. 2 and 3 and may be used for grounding circuit, if desired. Overall dimensions: flange and barrel length from face of flange including solder pot extension, $1\frac{1}{2}$ ".

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .2112 XL-3-13N 1.25

INTEGRAL CLAMP TYPES STEEL SHELL PLUGS

TYPE XL-3-11SC PLUG (Socket Insert)

The steel shell type is built for rugged service and has cable entry of $1\frac{1}{2}$ " min., $5\frac{1}{16}$ " max. $6\frac{1}{32}$ " shorter overall shell than zinc type. Otherwise same construction, mating with regular XL receptacle.

Bright nickel finish standard.
Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .1333 XL-3-11SC 2.80

TYPE XL-3-12SC PLUG (Pin Insert)

Corresponds to XL-3-12 except that shell is steel with integral clamp. For $5\frac{1}{16}$ " max. entry. Shell is $7\frac{1}{32}$ " shorter in overall length than corresponding zinc shell.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 15-amp. .1250 XL-3-12SC 2.75

TYPE "XL-3-50" ADAPTER RECEPTACLES

SINGLE GANG WALL RECEPTACLES

Type XL-3-35 (Socket Insert)
Face plate similar to type used in P-35. Takes an XL-3-13N Receptacle. Wt. 0.3479.

Cat. No. List Price
XL-3-35 \$4.93

Type XL-3-36 (Pin Insert)

Takes an XL-3-14N Receptacle. Bright nickel finish.

Cat. No. List Price
XL-3-36 \$5.43

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

TYPE P FITTINGS

REVISED PRICES

CANNON "TYPE P" FITTINGS. Universally used in sound and allied applications. "Type P" Fittings include a size and type for every requirement, with a high standard of quality. All 90° Plugs have split-shell construction for quick, easy access for wiring or inspection. Splash-proof but not weather-proof. Plug and receptacle dust caps are available. Laboratory tests show an average voltage-drop of not more than 10 millivolts, with current flowing at the rated capacity. Insulating material is black phenolic which has a 0.7% absorption in 24 hours of immersion in water and a dielectric strength of 550 volts per mil at 60 cycles. Two to 6 contact inserts accommodate No. 10 B&S stranded wire; 8 contact insert No. 14 wire.

New shell designs of the P-CG-115 and P-CG-125, cord plugs, replace both old type shells of zinc and steel, and such improvements as shorter length, new rubber bushing, improved latch and spring, integral clamp. Shell material is steel, integral clamp zinc.

NEW TYPES WILL MATE WITH CORRESPONDING FITTINGS, SAME AS OLD DESIGN

TYPE P-CG-115 CORD PLUG COMBINATION STEEL & ZINC (With Socket Insert)

This new type plug with steel shell and integral zinc clamp is $\frac{1}{8}$ " shorter than the old type and has an overall length of 2 1/2". The new rubber bushing allows a $\frac{1}{8}$ " D. cable entry, and on P1, P5, P6 and P8 $\frac{1}{2}$ " D. max. cable entry. Satin chrome finish.

Poles	Capacity	Wt. Lbs.	Cat. No.	List Price

TYPE "P-17" PANEL RECEPTACLE (With Socket Insert), SURFACE MOUNTING

P-17 has Latch Locking Device and all other "Type P" features. Made of die-cast zinc. Satin chrome finish. Flange is 2" in diameter, drilled and countersunk at four points $\frac{1}{8}$ " apart on $\frac{1}{4}$ " radius for four $\frac{1}{4}$ "-40 oval head M.S. Body extends $\frac{1}{2}$ " in front of $\frac{1}{8}$ " mounting flange.

Contacts	Capacity	Wt. Lbs.	Cat. No.	List Pr.

CANNON CONNECTORS

CANNON ELECTRIC DEVELOPMENT COMPANY • 3209 HUMBOLDT STREET, LOS ANGELES 31, CALIFORNIA

TYPE O FITTINGS

CANNON "TYPE O" PLUGS AND RECEPTACLES. This series consists of a line of 3-contact oval-shaped plugs and receptacles, equipped with Latch Locking Device. Contacts are silver-plated, full-floating, non-twisting, carry 30-amp. capacity. Solder terminals are tinned for ease of wiring. 30-amp. contacts accommodate No. 10 B&S stranded wire.

TYPE "03-42" MICROPHONE OR PANEL RECEPTACLE (With Pin Insert)

Has flat base, with two lugs for mounting with $\approx 1-10$ oval-head screws. Made of die-cast zinc, and cadmium plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 30-amp. 0.271 03-42 \$4.50

TYPE "03-41" 90 MICROPHONE OR PANEL RECEPTACLE (Socket Insert)

Flat base is flanged and is attached to microphone or panel by means of two $\approx 1-10$ oval-head mounting screws. Made of die-cast zinc, cad. plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 30-amp. 0.274 03-41 \$4.50

TYPE "03-11" STRAIGHT CORD PLUG (With Socket Insert)

Has Integral Clamp for $\frac{1}{8}$ " or smaller cable. Made of die-cast zinc, cadmium plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 30-amp. 0.113 03-11 \$4.50

TYPE "03-12" STRAIGHT CORD PLUG (With Pin Insert)

Corresponds with No. 03-11 "Type O" Straight Cord Plug (Socket Insert). Has integral cable clamp, for $\frac{1}{8}$ " or smaller cable. Made of die-cast zinc, cadmium plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 30-amp. 0.104 03-12 \$4.50

TYPE "03-13" FLUSH WALL RECEPTACLE (With Socket Insert)

Flange is 2" in diameter, drilled with four holes to take $\approx 1-10$ oval-head mounting screws, 90° apart on a radius of $\frac{1}{2}$ ". Made of die-cast zinc, cadmium plated. Latch Locking Device is operated from panel front.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 30-amp. 0.148 03-13 \$4.50

TYPE "03-14" FLUSH WALL RECEPTACLE (With Pin Insert)

The flange is 2" in diameter, drilled with four holes to take $\approx 1-10$ oval-head mounting screws, 90° apart, on a radius of $\frac{1}{2}$ ". Made of die-cast zinc, cadmium plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
3 30-amp. 0.107 03-14 \$4.50

TYPE "O" CONNECTORS ARE USED ON STANDARD RADIO BROADCAST MICROPHONES

TYPE TQ FITTINGS

CANNON TYPE "TQ" COAXIAL FITTINGS. Type "TQ" Coaxial Fittings provide continuous shielding with constant impedance. Each fitting contains 1 standard Cannon style silver-plated contact, rated at 10-amp. and accommodating #16 stranded or #14 solid, or smaller B&S stranded wire. Solder pots are tinned for ease of wiring. Insulation is ceramic.

CANNON TYPE "TQ" COAXIAL CORD PLUG (With Socket Insert) For Continuous Shielding

ONE-HALF ACTUAL SIZE

A tapered skirt is provided on this Plug, to which the shielding is easily soldered. Accommodates $\frac{1}{2}$ " cable, but can be supplied for $\frac{5}{8}$ " cable if specified with order. Body is brass, silver plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
1 10-amp. 0.106 TQ-1-12 \$2.00

TYPE "TQ13BC" FLUSH RECEPTACLE (With Pin Insert)

For Mounting Behind Panel

Same construction as No. TQ-1-13C, except that the flange is mounted on back of panel. Body is brass, zinc plated.

Contact Capacity Wt. Lbs. Cat. No. List Pr.
1 10-amp. 0.039 TQ-1-13BC \$2.00

ONE-HALF ACTUAL SIZE

TYPE "TQ-13B" RECEPTACLE For Continuous Shielding

Designed for mounting behind panel. Accommodates $\frac{1}{2}$ " cable. Body is brass, zinc plated.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
1 10-amp. 0.057 TQ-1-13B \$2.00

ONE-HALF ACTUAL SIZE

TYPE "TQ-13" RECEPTACLE (With Pin Insert)

For Continuous Shielding

Provided with a tapered skirt to which the shielding is easily soldered. Also has a removable solder pot shield, which snaps into place. Ceramic insulation is used in all Type "TQ" Connectors, silver plated. Accommodates $\frac{1}{2}$ " cable, but can be supplied for $\frac{5}{8}$ " cable if specified with order. Two holes— $\frac{1}{16}$ " in diameter, $\frac{1}{8}$ " apart.

Contacts Capacity Wt. Lbs. Cat. No. List Pr.
1 10-amp. .043 TQ-1-13 \$2.00

ONE-HALF ACTUAL SIZE

TYPE "TQ-13C" RECEPTACLE (With Pin Insert)

Similar to TQ-1-13, except that it is not provided with solder pot shield and is not designed for continuous shielding. Uses Ceramic insulation. For mounting on front of panel. Body is brass, silver plated. Two holes— $\frac{1}{16}$ " in diameter, $\frac{1}{8}$ " apart for mounting.

RNK

SPLIT SHELL
CONSTRUCTION

HALF-TURN
LOCKING
RING

The Type "K" Series was designed especially for use in the aircraft field and is used almost universally for aircraft radio, instrument and electrical circuits. Although light in weight, units are rugged and durable. The "K" Series is made in 3 basic types: (1) Straight Type, (2) 90° Type, (3) Wall Mounting Unit, for which either straight or right angle junction shells are provided. Inserts of laminated and molded phenolic are removable.

The cable entry is regularly threaded for various sizes of aircraft flexible conduit, but there are fittings also available with cable clamp for special applications. The "K" Series is comprised of 8 diameters, with a great variety of contact arrangements covering a range of from 1 to 82 contacts, depending, of course, upon the diameter, 188 insert arrangements.

A key and groove arrangement makes it possible to connect fittings easily and quickly without the necessity of fumbling to match pins and sockets. This eliminates any

possibility of forcing together in improper alignment and thus bending or breaking pins. Large contacts may be removed for soldering, thereby eliminating the possibility of damaging the insert with excessive heat.

Quick, easy access to solder pots at back of contact is made possible simply by removing either 3 or 4 Shake-proof Sems, depending upon the size of the fitting. Since these screws are equidistant, the barrel and insert may be rotated to accommodate 3 or 4 different positions. This is also true of the flanges on wall mounting units, making it easy to rotate these fittings to facilitate cable installation and avoid sharp bends in conduit.

Plugs and receptacles are locked together by means of a quick-acting threaded nut which holds both members firmly together and prevents shaking or accidentally pulling them apart. 10 to 250-amp. contacts.

NOTE: Detailed Catalog Bulletin and Wall Chart for K Connectors available on request.

SPLIT SHELL CONSTRUCTION

INTERCHANGEABLE INSERTS

16

18

20

22

MORE THAN 200 INSERT ARRANGEMENTS AVAILABLE

CANNON "Type AN" Series of plugs and receptacles was designed especially to meet Army-Navy Specifications for aircraft electrical connectors. While the AN Series retains all the basic features of the Type K Series—features which have established conclusive proof of their effectiveness as applied to aircraft—numerous changes in design and construction have been made to conform to latest Army-Navy Specifications.

Type AN Plugs are made in three basic shapes or styles. These are: 1. Straight cord connectors. 2. Right angle or 90° cord connectors. 3. Flanged connectors for wall mounting. An almost unlimited combination of circuits and current capacities can be handled with AN connectors and their interchangeable inserts.

Removable and interchangeable inserts make it possible to change any fitting from a pin to a socket, or vice versa, and also to change the number of circuits

handled through any fitting provided the inserts are of the same diameter. The split shell, a feature pioneered by Cannon, makes it easy to install wiring or to solder contacts.

An important feature of the Type AN Series is the means provided for coupling the members together. This consists of a coupling nut which serves to draw the parts together and to release them, while it also prevents plugs and receptacles from being jarred apart by excessive vibration. No special tools are required to lock or unlock plugs and receptacles, to separate split shells or to remove inserts. This feature is invaluable, since it eliminates delay in servicing in the field and also because there are so many combinations possible with Type AN Series.

ALL FITTINGS ON THIS PAGE ARE SLIGHTLY MORE THAN ONE-QUARTER ACTUAL SIZE

"300" SERIES PLUGS AND SOCKETS

General Specifications

2 Contacts to 33 Contacts. All plugs and sockets are polarized. 2 Contact Plugs and Sockets are round, others rectangular. Plugs of one size cannot fit into sockets of another size. Phosphor bronze "knife-switch" type socket contacts engage both sides of flat plug contacts—double contact area. Molded Bakelite insulation. Formed metal caps. Formed fibre linings in caps. Small size, with good separation between contacts. Plug or socket for panel mounting. Plug or socket with cap. Simple, fool-proof assembly. Finish on caps—Black Crystal. Plug prongs— $\frac{3}{32}$ " wide by $\frac{3}{64}$ " thick. We suggest using the 300 series in circuits not exceeding 45 Volts and 5 Amps., although circuit characteristics may permit higher ratings.

"400" SERIES PLUGS AND SOCKETS

(Formerly "Heavy Duty")

General Specifications

2, 4, 6, 8, 10 and 12 Contacts.
 All plugs and sockets are polarized.
 Phosphor bronze "knife switch" type socket contacts engage both sides of flat plug contacts—double contact area.
 Molded Bakelite insulation.
 Fibre linings in caps.
 Plug or socket for panel mounting.
 Plug or socket with caps.
 Finish on caps—Black Crystal.
 Plug prong cross section $\frac{1}{8}'' \times \frac{1}{8}''$.
 Locking fittings available for panel types or extension cables as shown.
 We recommend using the 400 series in circuits not exceeding 110 Volts and 10 Amperes, although circuit characteristics may permit higher ratings.

LOCKS FOR 400 SERIES PLUGS AND SOCKETS

(Formerly Heavy Duty)

ILLUSTRATING No. 93 LOCK. May be attached to any 400 Series plug for extension cables. If plugs are ordered with this lock, specify "with No. 93 Locks."

ILLUSTRATING No. 63 LOCK. May be used on all panel mount 400 Series plugs and sockets when surface is flush with top of panel. Cannot be used on type 2B plugs.

No. 93 Lock when attached to plug, add to list per pair \$.35
 No. 63 Locks ONLY, per pair \$.35

Dimensions of 400 Series Plugs and Sockets

"500" SERIES PLUGS AND SOCKETS

For Complete Listing of 500 SERIES, Write for No. 500 Catalog

Designed for 5,000 volts and 25 amperes per contact. Circuit characteristics, however, may alter this rating one way or the other.

Long leakage path from terminal to terminal, and terminal to ground. Contacts are brass and phosphor bronze, silver plated. Metal parts of caps and brackets are steel, parkerized (rust-proofed). Plug and socket blocks are interchangeable in caps and brackets.

All sizes are polarized in a manner to prevent a smaller plug being inserted in a larger socket. Thus different sizes may be used on one installation without danger of making wrong connections.

Extreme care has been taken to make terminal connections under cap very accessible both for original wiring and subsequent inspection. The cap is insulated with canvas bakelite. Plug prong cross section $\frac{1}{16}$ " x $\frac{3}{32}$ ".

IMPORTANT: For safety with high voltages DEEP BRACKETS should always be used on one plug or socket, when the other plug or socket has a CAP. SHALLOW BRACKETS are for use only in connecting two units, each unit having plug or socket with SHALLOW BRACKET.

P-506-CE
(Plug with Cap)
(BX Clamp shown
but not furnished)

S-506-DB
(Socket with Deep Bracket)

S-506-CE
(Socket with Cap)

P-506-DB
(Plug with Deep Bracket)

P-506-SB
(Plug with Shallow Bracket)

S-506-SB
(Socket with Shallow Bracket)

Cable entrance: Because of the great variation in type and size of cables, we have considered it best not to supply cable clamps of any kind. The cap end is made to accommodate standard BX clamps which may be obtained at any electrical jobbing house. The cap end will be furnished with round hole from $\frac{1}{2}$ " diameter and $1\frac{1}{4}$ " diameter in steps of $\frac{1}{8}$ ", if the size required is given on order. If no size is given, plain cap end with center punch locating center will be shipped.

LOCKS FOR 500 SERIES PLUGS AND SOCKETS

Locks shown above are used in connection with any DEEP BRACKET and cap combination.

The locks securely hold the units together, but they can be released instantly.

The mounting plates are made to fit all DEEP BRACKETS, and are fastened by the same screws or rivets that hold the deep brackets to the panel. Can not be used on shallow brackets. Sold in pairs only.

SERIES 101 PLUGS

The entire No. 101 Series of Plugs are identical with the exception of the cable ferrule which is furnished in four sizes as listed below. All metal parts are of brass. These Plugs fit all of the No. 101 Series Sockets. Assembly meets Navy Specifications. A low loss Plug and Socket ideal for high frequency connections.

Code, No.	A	B	C	D	E	Ea.

SERIES 101 SOCKETS

The No. 101 Series Sockets are furnished in three types as shown below. Base is of Brass, Nickel Plated with Chrome Flash. Brass contact is Silver Plated. Insulation of low loss natural color XXX Bakelite. Meets Navy Specifications. The S-101-D is similar to the S-101 except that the Bakelite is recessed in the base. S-101-D Mod. is the same as S-101-D except that two sides of the base are milled as shown. Mounting Holes No. 101 - No. 41 drill on 1 1/4" centers. Mounting Holes No. 101-D and 101-D Mod. No. 30 drill on 1 1/8" centers.

SERIES 201

PLUGS

The No. 201 Series Plugs are of the same design as the No. 101 but are of heavier stock and larger. Made in one size only with 3/8" ferrule. All metal parts are of Brass, same finish as No. 101 Series and Wax Impregnated Ceramic insulation. Overall length 1 1/4". Prong diameter 3/16". Fits only the 201 Socket.

SOCKETS

The 201 Socket is similar to the S-101-D except larger. Brass base is nickel plated with Chrome Flash. Brass contact is Silver Plated. Insulation is of low loss natural color XXX Bakelite. Both Plug and Socket meet Navy Specifications. Mounting holes—No. 30 drill on 1" centers.

Code	1/4"-27 thread	Code	Ea.

1400 SERIES PLUGS AND SOCKETS

This series of "disconnect" plugs and sockets has the distinct advantage of low cost for a separate unit handling many circuits. Due to exposed metal parts, it is recommended for use when the complete unit is within a housing. Reduces costs of servicing units. Advantageous in shipping when it is desirable to pack units separately. Polarized—assures

correct coupling. Spring temper brass sockets assure perfect contact. Standard units are listed below from 5 to 16 contacts. However we can supply units having as many as 30 or more contacts.

On No. 1420 or larger we recommend the plug be divided into two or more units, as a single long plug is not mechanically strong. The socket will be made in one assembly.

No. 1405 (5 Contacts)	Ea. \$0.32	No. 1411 (11 Contacts)	Ea. \$0.62
No. 1406 (6 Contacts)	Ea. .37	No. 1412 (12 Contacts)	Ea. .67

No. 1408 (8 Contacts)	Ea. .47	No. 1414 (14 Contacts)	Ea. .77
No. 1409 (9 Contacts)	Ea. .52	No. 1415 (15 Contacts)	Ea. .82
No. 1410 (10 Contacts)	Ea. .57	No. 1416 (16 Contacts)	Ea. .87

For units with more than 16 contacts, add 5c to the No. 1416 price for each additional contact

BARRIER TYPE TERMINAL STRIPS

Increased insulation is provided by having Barriers placed between each Terminal. These Barriers follow around the edge of the Strips and terminate at the base. They not only make a long leakage path but prevent direct shorts from frayed wires at the terminals. Mounting holes are at the ends as illustrated.

The base is molded Bakelite. The Terminals and Binder Screws are of brass, nickel plated. **Marker Strips** may be ordered and imprinted to supply terminal designations. These Marker Strips mount beneath Terminal Strips and also afford insulation from metal mounting surface.

For Right Angle Mounting

Illustration at right shows a No. 3-162 A-R Fanning Strip connected to a No. 3-142 Barrier Strip.

JONES FANNING STRIP wired and in position on Jones No. 141 Barrier Strip

Jones Fanning Strip Terminals are of .032" Brass, Cadmium Plated. The Bakelite strips are furnished with a hole in either the right or left end for fastening the cable with a cable clamp or lacing twine. Simplifies cable or harness wiring assuring positive connections. Makes replacement of units an easy matter and assures correct connections after servicing.

In many instances where there is not sufficient room for the standard Fanning Strips we can supply those listed formed for right angle mounting permitting use when Barrier mounts flush with the side of the chassis. Specify Series 160A, 161A and 162A instead of 160, 161 and 162. Prices slightly higher.

6-161-L (Cable Clamp on Left)

6-161-R (Cable Clamp on Right)

CABLE CLAMPS

Cable Clamps are available for the Fanning Strips listed in the 160 and 162 series and for 6 different sizes of standard cable. They are made of Brass Nickel Plated with a round inner Cable Pinned Brass Spring. For convenience the Cable Clamps are furnished unassembled.

CABLE CLAMP SIZES AVAILABLE

Code	Size
CC-161-4	1/4"
CC-161-6	3/8"
CC-161-8	1/2"
CC-161-10	5/8"
CC-161-12	3/4"
CC-161-14	7/8"

List price 10c each.

Be sure to give code number when ordering.

On small sizes Lacing Twine can be used for anchoring cable to the Fanning Strip instead of Cable Clamp.

THE 160 SERIES

The following Fanning Strips fit the 140 Series Barrier Strips. Terminals are mounted on a Bakelite .78" wide and on 3/8" centers.

NO. 1 TERMINAL STRIPS

Terminal $\frac{1}{8}$ " Round Copper, Flattened at Ends, Tin Plated
A convenient and compact strip where solder connections are desired.

Insulation: Canvas Base Bakelite, $\frac{1}{2}$ " wide, $\frac{3}{16}$ " thick.
Terminals mounted on $\frac{1}{2}$ " centers. Mounting holes $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-1 (2 Terminals)	\$.11	No. 5-1 (5 Terminals)	\$.14
No. 3-1 (3 Terminals)	.12	No. 6-1 (6 Terminals)	.15
No. 4-1 (4 Terminals)	.13		

For terminal strips with more than 5 terminals, add 1c to the No. 6-1 price for each additional terminal.

NO. 12 TERMINAL STRIPS

Terminal $\frac{1}{16}$ " Brass, Tin Plated

Similar to No. 11, except larger. Solder tab is flat, but will be bent up, if specified.
Screw: 10-32 x $\frac{3}{8}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1" wide, $\frac{1}{4}$ " thick. Terminals mounted on $\frac{7}{8}$ " centers. Mounting holes $\frac{7}{8}$ " from center of end terminals. Will take up to No. 9 B & S gauge wire (.114").

Code	Ea.	Code	Ea.
No. 2-12 (2 Terminals)	\$.40	No. 5-12 (5 Terminals)	\$.88
No. 3-12 (3 Terminals)	.56	No. 6-12 (6 Terminals)	1.04
No. 4-12 (4 Terminals)	.72		

For terminal strips with more than 6 terminals, add 16c to the No. 6-12 price for each additional terminal.

NO. 3 TERMINAL STRIPS

Terminal $\frac{1}{8}$ " Round Copper, Flattened at Each End, Tin Plated

Similar to No. 1, except closer spacing and furnished with holes instead of hooks.
Insulation: Canvas base Bakelite, $\frac{1}{2}$ " wide, $\frac{3}{16}$ " thick.
Terminals mounted on $\frac{3}{8}$ " centers. Mounting holes $\frac{3}{8}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-3 (2 Terminals)	\$.13	No. 5-3 (5 Terminals)	\$.16
No. 3-3 (3 Terminals)	.14	No. 6-3 (6 Terminals)	.17
No. 4-3 (4 Terminals)	.15		

For terminal strips with more than 6 terminals, add $1\frac{1}{2}$ c to the No. 6-3 price for each additional terminal.

NO. 16 TERMINAL STRIPS

Terminal .028" Brass, Cadmium Plated

A popular priced screw and solder terminal with many desirable features.
Screw: 6-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $\frac{3}{4}$ " wide, $\frac{1}{8}$ " thick. Terminals spaced on $\frac{1}{2}$ " centers. Mounting holes $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-16 (2 Terminals)	\$.12	No. 5-16 (5 Terminals)	\$.24
No. 3-16 (3 Terminals)	.16	No. 6-16 (6 Terminals)	.28
No. 4-16 (4 Terminals)	.20		

For terminal strips with more than 6 terminals, add 4c to the No. 6-16 price for each additional terminal.

NO. 6 TERMINAL STRIPS

Terminal .046" Brass, Cadmium Plated

Screw and solder terminal. Substantial and reasonably priced.
Screw: 6-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $\frac{3}{4}$ " wide, $\frac{1}{8}$ " thick. Terminals spaced on $\frac{1}{2}$ " centers. Mounting holes $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-6 (2 Terminals)	\$.14	No. 5-6 (5 Terminals)	\$.26
No. 3-6 (3 Terminals)	.18	No. 6-6 (6 Terminals)	.30
No. 4-6 (4 Terminals)	.22		

For terminal strips with more than 6 terminals, add 4c to the No. 6-6 price for each additional terminal.

NO. 20 TERMINAL STRIPS

Terminal $\frac{1}{16}$ " Brass, Cadmium Plated

Strong two screw terminal with ears to hold wire securely under screw.
Screws: 6-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $\frac{7}{8}$ " wide, $\frac{1}{8}$ " thick. Terminals mounted on $\frac{5}{8}$ " centers. Mounting holes $\frac{5}{8}$ " from center of end terminals. Will take up to No. 13 B & S gauge wire (.071").

Code	Ea.	Code	Ea.
No. 2-20 (2 Terminals)	\$.28	No. 5-20 (5 Terminals)	\$.70
No. 3-20 (3 Terminals)	.42	No. 6-20 (6 Terminals)	.84
No. 4-20 (4 Terminals)	.56		

For terminal strips with more than 6 terminals, add 14c to the No. 6-20 price for each additional terminal.

NO. 7 TERMINAL STRIPS

Terminal .046" Brass, Cadmium Plated

A two screw insulated terminal strip that can be mounted directly on metal surface.
Screws: 6-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $\frac{7}{8}$ " wide, $\frac{1}{8}$ " thick (total). Terminals mounted on $\frac{1}{2}$ " centers. Mounting holes $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-7 (2 Terminals)	\$.20	No. 5-7 (5 Terminals)	\$.47
No. 3-7 (3 Terminals)	.29	No. 6-7 (6 Terminals)	.56
No. 4-7 (4 Terminals)	.38		

For terminal strips with more than 6 terminals, add 9c to the No. 6-7 price for each additional terminal.

NO. 21 TERMINAL STRIPS

Terminal $\frac{1}{16}$ " Brass, Cadmium Plated

Similar to No. 20, except larger.
Screws: 8-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $1\frac{1}{4}$ " wide, $\frac{1}{8}$ " thick. Terminals mounted on $\frac{3}{4}$ " centers. Mounting holes $\frac{3}{4}$ " from center of end terminals. Will take up to No. 11 B & S gauge wire (.093").

Code	Ea.	Code	Ea.
No. 2-21 (2 Terminals)	\$.40	No. 5-21 (5 Terminals)	\$.88
No. 3-21 (3 Terminals)	.56	No. 6-21 (6 Terminals)	1.04
No. 4-21 (4 Terminals)	.72		

For terminal strips with more than 6 terminals, add 16c to the No. 6-21 price for each additional terminal.

NO. 10 TERMINAL STRIPS

Terminal $\frac{1}{16}$ " Brass, Tin Plated

Sturdy screw and solder terminal with both screw and solder connections on top of bakelite panel. Solder terminal turned up.
Screw: 6-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $\frac{5}{8}$ " wide, $\frac{1}{8}$ " thick. Terminals spaced on $\frac{3}{8}$ " centers. Mounting holes $\frac{3}{8}$ " from center of end terminals. Will take up to No. 15 B & S gauge wire (.057").

Code	Ea.	Code	Ea.
No. 2-10 (2 Terminals)	\$.21	No. 5-10 (5 Terminals)	\$.51
No. 3-10 (3 Terminals)	.31	No. 6-10 (6 Terminals)	.61
No. 4-10 (4 Terminals)	.41		

For terminal strips with more than 6 terminals, add 10c to the No. 6-10 price for each additional terminal.

NO. 22 TERMINAL STRIPS

Terminal $\frac{1}{16}$ " Brass, Cadmium Plated

Similar to No. 21, except larger.
Screws: 10-32 x $\frac{3}{8}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $1\frac{1}{4}$ " wide, $\frac{1}{8}$ " thick. Terminals mounted on $\frac{3}{4}$ " centers. Mounting holes $\frac{3}{4}$ " from center of end terminals. Will take up to No. 8 B & S gauge wire (.128").

Code	Ea.	Code	Ea.
No. 2-22 (2 Terminals)	\$.53	No. 5-22 (5 Terminals)	\$ 1.13
No. 3-22 (3 Terminals)	.73	No. 6-22 (6 Terminals)	1.33
No. 4-22 (4 Terminals)	.93		

For terminal strips with more than 6 terminals, add 20c to the No. 6-22 price for each additional terminal.

NO. 11 TERMINAL STRIPS

Terminal $\frac{1}{16}$ " Brass, Tin Plated

Similar to No. 10, except larger in size and the solder tab is flat, but will be bent up, if specified.
Screws: 8-32 x $\frac{1}{4}$ " brass, binder head, burnished nickel plate. Insulation: XP Bakelite, $\frac{7}{8}$ " wide, $\frac{1}{8}$ " thick. Terminals mounted on $\frac{3}{4}$ " centers. Mounting holes $\frac{3}{4}$ " from center of end terminals. Will take up to No. 12 B & S gauge wire (.080").

Code	Ea.	Code	Ea.
No. 2-11 (2 Terminals)	\$.28	No. 5-11 (5 Terminals)	\$.61
No. 3-11 (3 Terminals)	.39	No. 6-11 (6 Terminals)	.72
No. 4-11 (4 Terminals)	.50		

For terminal strips with more than 6 terminals, add 11c to the No. 6-11 price for each additional terminal.

No. 32 TERMINAL STRIPS

Terminal .050" Brass, Tin Plated

An ideal terminal strip (solder type) for medium heavy wiring. One or more wires may be connected to this terminal.
Insulation: XX Bakelite, $\frac{5}{8}$ " wide, $\frac{1}{4}$ " thick. Terminals mounted on $\frac{1}{2}$ " centers. Mounting holes $\frac{1}{2}$ " from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-32 (2 Terminals)	\$.20	No. 5-32 (5 Terminals)	\$.47
No. 3-32 (3 Terminals)	.29	No. 6-32 (6 Terminals)	.56
No. 4-32 (4 Terminals)	.38		

For terminal strips with more than 6 terminals add 9c to the No. 6-32 price for each additional terminal.

NO. 34 TERMINAL STRIPS

Terminal .062" Brass, Cadmium Plated

Very substantial and neat appearing terminal. Ample length solder terminal below panel, with screw connection above.

Screw: 8-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 3/8" wide, 1/8" thick. Terminals spaced on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-34 (2 Terminals)	\$.20	No. 5-34 (5 Terminals)	\$.35
No. 3-34 (3 Terminals)	.25	No. 6-34 (6 Terminals)	.40
No. 4-34 (4 Terminals)	.30		

For terminal strips with more than 6 terminals, add 5c to the No. 6-34 price for each additional terminal.

NO. 53 TERMINAL STRIPS

Terminal, Spring Temper Brass, Cadmium Plated

A reliable socket type contact for many uses. Takes 3/8" prongs. May be used with No. 98 terminal strips (same terminal spacing).

Insulation: XP Bakelite, 3/8" wide, 1/8" thick. Terminals mounted on 3/8" centers. Mounting holes 3/8" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-53 (2 Terminals)	\$.17	No. 5-53 (5 Terminals)	\$.26
No. 3-53 (3 Terminals)	.20	No. 6-53 (6 Terminals)	.29
No. 4-53 (4 Terminals)	.23		

For terminal strips with more than 6 terminals, add 3c to the No. 6-53 price for each additional terminal.

NO. 36 TERMINAL STRIPS

Terminal .031" Brass, Cadmium Plated

A popular priced screw and solder terminal with both screw and solder tab on same side of bakelite panel. Screw: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 3/8" wide, 1/8" thick. Terminals spaced on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-36 (2 Terminals)	\$.12	No. 5-36 (5 Terminals)	\$.24
No. 3-36 (3 Terminals)	.16	No. 6-36 (6 Terminals)	.28
No. 4-36 (4 Terminals)	.20		

For terminal strips with more than 6 terminals, add 4c to the No. 6-36 price for each additional terminal.

NO. 54 TERMINAL STRIPS

Terminal .032" Brass, Cadmium Plated

Spade terminal for cable harness. Convenient to use in connection with No. 6 terminal strips. Insulation: XP Bakelite, 1/2" wide, 1/8" thick. Terminals mounted on 1/2" centers.

Code	Ea.	Code	Ea.
No. 2-54 (2 Terminals)	\$.10	No. 5-54 (5 Terminals)	\$.16
No. 3-54 (3 Terminals)	.12	No. 6-54 (6 Terminals)	.18
No. 4-54 (4 Terminals)	.14		

For terminal strips with more than 6 terminals, add 2c to the No. 6-54 price for each additional terminal.

NO. 42 TERMINAL STRIPS

Terminal, Hard Brass, Cadmium Plated

Similar in construction to No. 53. Takes 1/8" prong. May be used with No. 99 terminal strips (same terminal spacing).

Insulation: XP Bakelite, 1/2" wide, 3/8" thick. Terminals mounted on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-42 (2 Terminals)	\$.20	No. 5-42 (5 Terminals)	\$.32
No. 3-42 (3 Terminals)	.24	No. 6-42 (6 Terminals)	.36
No. 4-42 (4 Terminals)	.28		

For terminal strips with more than 6 terminals, add 4c to the No. 6-42 price for each additional terminal.

NO. 59 TERMINAL STRIPS

Terminal .028" Brass, Tin Plated

An inexpensive solder terminal. One wire may be brought up through hole and soldered, leaving vertical tab for other connection. Insulation: XP Bakelite, 3/8" wide, 1/8" thick. Terminals mounted on 1/8" centers. Mounting holes 1/8" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-59 (2 Terminals)	\$.07	No. 5-59 (5 Terminals)	\$.16
No. 3-59 (3 Terminals)	.10	No. 6-59 (6 Terminals)	.19
No. 4-59 (4 Terminals)	.13		

For terminal strips with more than 6 terminals, add 3c to the No. 6-59 price for each additional terminal.

NO. 43 TERMINAL STRIPS

Terminal, Hard Brass, Cadmium Plated

Same as No. 42, except that it takes 3/8" prongs. May be used with No. 100 terminal strips. Insulation: XP Bakelite, 3/8" wide, 3/8" thick. Terminals mounted on 3/8" centers. Mounting holes 3/8" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-43 (2 Terminals)	\$.25	No. 5-43 (5 Terminals)	\$.40
No. 3-43 (3 Terminals)	.30	No. 6-43 (6 Terminals)	.45
No. 4-43 (4 Terminals)	.35		

For terminal strips with more than 6 terminals, add 5c to the No. 6-43 price for each additional terminal.

NO. 60 TERMINAL STRIPS

Terminal .050" Brass, Cadmium Plated

Screw terminal above panel—solder terminal below. Solder tab is notched. Screw: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 7/8" wide, 1/8" thick. Terminals spaced on 1/4" centers. Mounting holes 1/4" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-60 (2 Terminals)	\$.17	No. 5-60 (5 Terminals)	\$.32
No. 3-60 (3 Terminals)	.22	No. 6-60 (6 Terminals)	.37
No. 4-60 (4 Terminals)	.27		

For terminal strips with more than 6 terminals, add 5c to the No. 6-60 price for each additional terminal.

NO. 48 TERMINAL STRIPS

Terminal .028" Brass, Tin Plated

A low priced double solder terminal. Insulation: XP Bakelite, 1/2" wide, 1/8" thick. Terminals mounted on 1/8" centers. Mounting holes 1/8" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-48 (2 Terminals)	\$.07	No. 5-48 (5 Terminals)	\$.15
No. 3-48 (3 Terminals)	.10	No. 6-48 (6 Terminals)	.19
No. 4-48 (4 Terminals)	.13		

For terminal strips with more than 6 terminals, add 3c to the No. 6-48 price for each additional terminal.

NO. 66-S TERMINAL STRIPS

Terminal .032" Hard Brass, Cadmium Plated

A heavy solder terminal with large oval hole for several wires. Insulation: XP Bakelite, 3/4" wide, 3/8" thick. Terminals mounted on 3/8" centers. Mounting holes 3/8" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-66-S (2 Terminals)	\$.08	No. 5-66-S (5 Terminals)	\$.17
No. 3-66-S (3 Terminals)	.11	No. 6-66-S (6 Terminals)	.20
No. 4-66-S (4 Terminals)	.14		

For terminal strips with more than 6 terminals, add 1c to the No. 6-66-S price for each additional terminal.

NO. 50 TERMINAL STRIPS

Terminal .062" Brass, Cadmium Plated

One of the most popular screw and solder terminals. Made of heavy stock with ears to firmly hold wires under screw. Screw: 8-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 7/8" wide, 1/8" thick. Terminals spaced on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-50 (2 Terminals)	\$.19	No. 5-50 (5 Terminals)	\$.34
No. 3-50 (3 Terminals)	.24	No. 6-50 (6 Terminals)	.39
No. 4-50 (4 Terminals)	.29		

For terminal strips with more than 6 terminals, add 5c to the No. 6-50 price for each additional terminal.

NO. 66-D TERMINAL STRIPS

Terminal .032" Hard Brass, Cadmium Plated

Two No. 66 terminals mounted on opposite sides of panel and riveted together by solid rivet. Ideal strip for heavy work. Insulation: XP Bakelite, 3/4" wide, 1/2" thick. Terminals mounted on 3/8" centers. Mounting holes 3/8" from center of end terminals.

Code	Ea.	Code	Ea.
No. 2-66-D (2 Terminals)	\$.10	No. 5-66-D (5 Terminals)	\$.22
No. 3-66-D (3 Terminals)	.14	No. 6-66-D (6 Terminals)	.26
No. 4-66-D (4 Terminals)	.18		

For terminal strips with more than 6 terminals, add 4c to the No. 6-66-D price for each additional terminal.

NO. 76 TERMINAL STRIPS

Terminal .028" Brass, Cadmium Plated

Cup shaped top holds wire securely under screw. A compact and good appearing terminal.
Screw: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 3/4" wide, 1/4" thick. Terminals spaced on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Qty	Each	Code	Qty	Each
No. 2-76	(2 Terminals)	\$.14	No. 5-76	(5 Terminals)	\$.26
No. 3-76	(3 Terminals)	.18	No. 6-76	(6 Terminals)	.30
No. 4-76	(4 Terminals)	.22			

For terminal strips with more than 6 terminals, add 3c to the No. 6-76 price for each additional terminal.

NO. 130 TERMINAL STRIPS

Terminals Brass, Burnished Nickel Plate

An inexpensive terminal strip with two screw terminals. Screws: 5-40 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 7/8" wide, 1/4" thick. Terminals mounted on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Qty	Each	Code	Qty	Each
No. 2-130	(2 Terminals)	\$.15	No. 5-130	(5 Terminals)	\$.39
No. 3-130	(3 Terminals)	.23	No. 6-130	(6 Terminals)	.47
No. 4-130	(4 Terminals)	.31			

For terminal strips with more than 6 terminals, add 8c to the No. 6-130 price for each additional terminal.

AG 76

AG-76

Standard Antenna-Ground strip using No. 76 terminals. Insulation: XP Bakelite, 1 1/4" wide, 1/4" thick. Mounting centers 1 1/4". Ends rounded. Letters A and G are filled in white.

No. AG-76..... Ea. \$.12

NO. 131 TERMINAL STRIPS

Terminals Brass, Burnished Nickel Plate

Similar to No. 130, except larger. Screws: 6-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1" wide, 3/8" thick. Terminals mounted on 3/8" centers. Mounting holes 3/8" from center of end terminals.

Code	Qty	Each	Code	Qty	Each
No. 2-131	(2 Terminals)	\$.19	No. 5-131	(5 Terminals)	\$.46
No. 3-131	(3 Terminals)	.28	No. 6-131	(6 Terminals)	.55
No. 4-131	(4 Terminals)	.37			

For terminal strips with more than 6 terminals, add 9c to the No. 6-131 price for each additional terminal.

NO. 96 TERMINAL STRIPS

Terminal, Spring Temper Brass, Cadmium Plated

Perhaps the most popular socket terminal ever sold. Takes standard tube prongs (No. 99 or No. 100). Furnished for No. 99 prongs (1/8" wide, 1/4" thick) unless otherwise specified. Insulation: XP Bakelite, 3/8" wide, 1/4" thick. Terminals mounted on 1/2" centers. Mounting holes 1/2" from center of end terminals.

Code	Qty	Each	Code	Qty	Each
No. 2-96	(2 Terminals)	\$.08	No. 5-96	(5 Terminals)	\$.17
No. 3-96	(3 Terminals)	.11	No. 6-96	(6 Terminals)	.20
No. 4-96	(4 Terminals)	.14			

For terminal strips with more than 6 terminals, add 3c to the No. 6-96 price for each additional terminal.

NO. 132 TERMINAL STRIPS

Terminals Brass, Burnished Nickel Plate

Similar to No. 131, except larger. Screws 8-32 x 1/4" brass, binder head, burnished nickel plate. Insulation: XP Bakelite, 1 1/4" wide, 1/4" thick. Terminals mounted on 3/4" centers. Mounting holes 3/4" from center of end terminals.

Code	Qty	Each	Code	Qty	Each
No. 2-132	(2 Terminals)	\$.23	No. 5-132	(5 Terminals)	\$.53
No. 3-132	(3 Terminals)	.33	No. 6-132	(6 Terminals)	.63
No. 4-132	(4 Terminals)	.43			

For terminal strips with more than 6 terminals, add 10c to the No. 6-132 price for each additional terminal.

NO. 98 TERMINAL STRIPS

Terminal 3/32" Round, Brass, Cadmium Plated

Standard tube base prong of 3/8" diameter. To be used with No. 53 terminal strips. Insulation: XP Bakelite, 3/8" wide, 1/4" thick. Terminals mounted on 3/8" centers.

Code	Qty	Each	Code	Qty	Each
No. 2-98	(2 Terminals)	\$.07	No. 5-98	(5 Terminals)	\$.16
No. 3-98	(3 Terminals)	.10	No. 6-98	(6 Terminals)	.19
No. 4-98	(4 Terminals)	.13			

For terminal strips with more than 6 terminals, add 3c to the No. 6-98 price for each additional terminal.

NO. 143 TERMINAL STRIPS

Terminal .040" Brass, Tin Plated

A strong two-way solder terminal. Solder tabs lie flat. Crimps securely around edges of panel.

Special Strips

These strips can be made up special, with terminals mounted on any centers, from 3/8" up.

Standard Strips

Insulation: XP Bakelite, 3/8" wide, 3/8" thick. Terminals mounted on 1/2" centers. Mounting holes 1/2" from center of end terminals. Terminals may be numbered or lettered in white, as illustrated. (See page 18 for imprinting cost.)

Code	Qty	Each	Code	Qty	Each
No. 2-143	(2 Terminals)	\$.10	No. 5-143	(5 Terminals)	\$.19
No. 3-143	(3 Terminals)	.13	No. 6-143	(6 Terminals)	.22
No. 4-143	(4 Terminals)	.16			

For terminal strips with more than 6 terminals, add 3c to the No. 6-143 price for each additional terminal.

NO. 99 TERMINAL STRIPS

Terminal 1/8" Round, Brass, Cadmium Plated

Similar to No. 98, except that it is 1/8" in diameter. To be used with No. 42 terminal strips, and also with No. 96 terminal strips. Insulation: XP Bakelite, 1/2" wide, 1/4" thick. Terminals mounted on 1/2" centers.

Code	Qty	Each	Code	Qty	Each
No. 2-99	(2 Terminals)	\$.10	No. 5-99	(5 Terminals)	\$.22
No. 3-99	(3 Terminals)	.14	No. 6-99	(6 Terminals)	.26
No. 4-99	(4 Terminals)	.18			

For terminal strips with more than 6 terminals, add 4c to the No. 6-99 Price for each additional terminal.

NO. 2000 TERMINAL STRIPS

Terminals .019" Brass, Tin Plated

Compact and sturdy junction terminal strip. Useful in assembling radio chassis, wiring, etc.

Insulation: Bakelite. Brackets: Steel, cadmium plated. Terminals spaced on 1/4" centers.

Code	Qty	Mounting Hole Centers:	Per C.
No. 2002	(2 Terminals)	1"	\$ 6.40
No. 2003	(3 Terminals)	1-5/16"	7.00
No. 2004	(4 Terminals)	1-5/8"	7.60
No. 2005	(5 Terminals)	1-15/16"	8.20
No. 2006	(6 Terminals)	2-1/4"	8.80
No. 2007	(7 Terminals)	2-9/16"	9.40
No. 2008	(8 Terminals)	2-7/8"	10.00
No. 2009	(9 Terminals)	3-3/16"	10.60
No. 2010	(10 Terminals)	3-1/2"	11.20
No. 2011	(11 Terminals)	3-13/16"	11.80
No. 2012	(12 Terminals)	4-1/8"	12.40
No. 2013	(13 Terminals)	4-7/16"	13.00

NO. 100 TERMINAL STRIPS

Terminal 5/32" Round, Brass, Cadmium Plated

Similar to No. 99, except 5/32" in diameter. To be used with No. 43 terminal strip, and No. 96 terminal strip. Insulation: XP Bakelite, 3/8" wide, 1/4" thick. Terminals mounted on 3/8" centers.

Code	Qty	Each	Code	Qty	Each
No. 2-100	(2 Terminals)	\$.16	No. 5-100	(5 Terminals)	\$.31
No. 3-100	(3 Terminals)	.21	No. 6-100	(6 Terminals)	.36
No. 4-100	(4 Terminals)	.26			

For terminal strips with more than 6 terminals, add 5c to the No. 6-100 price for each additional terminal.

SOCKETS

MINIATURE SHOCK SHIELD TYPE:

7 pins, 1/8" mounting centers

Cat. No.	Description	List Price each
102M	Ceramic, beryllium copper contacts, JAN-SO-10C	\$1.15
103M	Mea-filled bakelite, beryllium copper contacts, JAN-SO-10M	.85
8322	Black bakelite, phosphor bronze contacts	0.35
8328	Ceramic, phosphor bronze contacts	0.60
8329	Mea-filled bakelite, phosphor bronze contacts	0.40

MINIATURE SADDLE TYPE:

7 pins, 7/8" mounting centers

Cat. No.	Description	List Price each
E323	Black bakelite, phosphor bronze contacts (with center grounding shield)	\$0.22
E539	Black bakelite, phosphor bronze contacts (no center grounding shield)	0.20
8326	Ceramic, phosphor bronze contacts (with center grounding shield)	0.45
8327	Mea-filled bakelite, phosphor bronze contacts (with center grounding shield)	0.25

SHIELDS FOR MINIATURE SHOCK SHIELD TYPE SOCKETS:

Steel, cadmium plated with inner spring

Cat. No.	Description	List Price each
7797	Height 1 3/4"	\$0.20
7798	Height 1 1/2"	0.20
8694	Height 2 1/2"	0.45

FOR MINIATURE SADDLE TYPE SOCKET:

Cat. No.	Description	List Price each
8757	Height 1 3/4". Steel, cadmium plated	\$0.10
8758	Shield holder	0.05

LAMINATED MINIATURE SOCKETS:

Cat. No.	Description	List Price each
47-1	7 pin, laminated bakelite, spring brass contacts, no center grounding shield	\$0.10
47-2	7 pin, laminated bakelite spring brass contacts, with center shield and ground strap	0.11
47-9	9 pin, laminated bakelite, spring brass contacts, with center shield, no ground strap	0.25

CRYSTAL SOCKET

Cat. No.	Description	List Price each
CR-7	For crystals having .050 diameter pins and .050 spacing between pins. Suitable for JAN-1-10. Contacts: Phosphor bronze, cadmium plated, or beryllium copper, silver plated with tabs tinned. Phosphor Bronze Contact.....\$0.40 Beryllium Copper Contact.....0.60	
SO-200	For crystals having 3/4" centers and .150 diameter. Suitable for or .150 hole type pins. Insulation: Low Loss Phenolic. Contacts: Beryllium Copper, Silver Plated.....0.60	

TYPE 12 SOCKETS:

Phosphor bronze contacts, 1/4" mounting centers

Cat. No.	Description	List Price each
12-4	\$0.40
12-5	0.45
12-6	0.45
12-7	N-O.....	0.50
12-8	0.50

OCTAL SADDLE TYPE:

Cat. No.	Description	List Price each
8459	Black bakelite, phosphor bronze contacts, cadmium plated. Mounting centers 1 1/2". Phosphor bronze contacts, cadmium plated. List Price \$0.15 ea.	

LOCTAL SADDLE TYPE:

Cat. No.	Description	List Price each
E451	Black bakelite, phosphor bronze contacts, cadmium plated with center grounding shield. Mounting centers 1 1/2". Phosphor bronze contacts, cadmium plated. List Price \$0.18 ea.	

OCTAL ALL-MOLDED TYPE:

Cat. No.	Description	List Price each
8490	Phosphor bronze contacts, mounting centers 1 1/2". Phosphor bronze contacts, cadmium plated. List Price \$0.14 ea.	

LOCTAL ALL-MOLDED TYPE:

Cat. No.	Description	List Price each
8191	Black bakelite, phosphor bronze contacts, cadmium plated. Mounting centers 1 1/2". Phosphor bronze contacts, cadmium plated. List Price \$0.17 ea.	

MAGNAL TYPE TELEVISION SOCKET:

Cat. No.	Description	List Price each
S-20-11	Black bakelite, phosphor bronze contacts, cadmium plated. 11 contacts. Spring brass contacts, 1/4" mounting centers, cadmium plated. List Price \$0.90 ea.	

DUO DECAL TYPE TELEVISION SOCKET:

Cat. No.	Description	List Price each
47-12A	Aluminum contacts, 10 pins. Top diameter 1 1/2". Overall depth is 65/16". Contacts recessed to avoid shorting. List Price \$1.55 ea.	

DI HEPTAL TYPE TELEVISION SOCKET:

Cat. No.	Description	List Price each
47-14A	Heavy-duty type accommodates up to 14 pins. Top diameter is 1 7/32". Overall depth is 1 1/4". Contacts recessed to avoid shorting. List Price \$2.00 ea.	

OCTAL TYPE:

Cat. No.	Description	List Price each
46-5-E	3 pins Dimensions: Mounting Centers.....1 1/2" Overall Width.....1 1/2" Overall Length.....1 1/2" List Price \$0.10 ea.

BINDING POSTS

Cat. No. 37. ENSIGN: Knobs and base are molded Bakelite. Metal inserts are plain brass. Knurled base prevents post turning.

Knob: ½" diam. x 7/16" high.
Base: ½" diam. x ¼" thick.
Solid Stem: 6/32" x ¾" long.
Drilled Neck Diameter: 3/16".
Width of contact flanges: ¾".

List Price \$0.38 ea.

Cat. No. 38. ENSIGN: Same as No. 37 except that it has a molded insulating boss on base.

List Price \$0.38 ea.

Cat. No. 39. ENSIGN: Same as No. 37 except that it has molded dowel pin on base.

List Price \$0.38 ea.

Cat. No. 40. COMMANDER: Knobs and base are molded Bakelite. Metal inserts are plain brass. Knurled base prevents post turning.

Knob: 9/16" diam. x ½" high.
Base: ¾" diam. x ¼" thick.
Solid Stem: 8/32" x 7/8" long.
Drilled Neck Diameter: 13/64".
Width of contact flanges: 7/16".

List Price \$0.50 ea.

Cat. No. 41. COMMANDER: Same as No. 40 except that it has a molded insulating boss on base.

List Price \$0.55 ea.

Cat. No. 42. COMMANDER: Same as No. 40 except that it has a metal dowel pin on base.

List Price \$0.55 ea.

Cat. No. 43. ADMIRAL: Knobs and base are molded Bakelite. Metal inserts are plain brass. Knurled base prevents post turning.

Knob: 5/8" diam. x 17/32" high.
Base: 23/32" diam. x ¼" thick.
Solid Stem: 8/32" x ¾" long.
Plain Neck: 13/64" diameter.
Width of contact flanges: 7/16".

List Price \$0.55 ea.

Cat. No. 44. ADMIRAL: Same as No. 43 except that it has a molded insulating boss on base.

List Price \$0.55 ea.

Cat. No. 45. ADMIRAL: Same as No. 43 except that it has a molded dowel pin on base.

List Price \$0.55 ea.

Cat. No. 43-S. ADMIRAL: Same as No. 43 except that it has elongated slot in neck.

List Price \$0.60 ea.

Cat. No. 21-R. All-molded Bakelite, non-removable tops. Both posts completely insulated. Center mounting screw 6/32" x ¼" long. Base is 2" long, 11/16" wide and 3/16" thick. Center distance between posts is ¾".

List Price \$0.70 ea.

Cat. No. 21-S. All-molded Bakelite, non-removable tops. One post is completely insulated. One mounting screw 6/32" x ¼" long. Ground post is second mounting screw. Base is 2" long, 11/16" wide and 3/16" thick.

List Price \$0.70 ea.

TIP JACKS

Cat. No. 49. Top diameter ½" x 5/32" thick. Threaded brass body 5/16"-32 x ¾" long. One hexagon nut and two insulating washers furnished. Hole for washers is 19/64". Red or Black Bakelite top.

List Price: Red\$0.19 ea.
Black ... 0.18 ea.

Cat. No. 52. Top diameter ½" x 1/8" thick. Body is 5/16" x ¾" long. Special steel assembly washers, cadmium plated, are furnished. Red or black Bakelite.

List Price: Red\$0.10 ea.
Black ... 0.09 ea.

Cat. No. 76. Top diameter 5/8" x 5/32" thick. Body is .495" x 5/8" long. Special steel assembly washers, cadmium plated, are furnished. Red or black Bakelite.

List Price: Red\$0.18
Black... 0.15

Cat. No. 17. This twin jack with molded Bakelite base, is provided with two terminals 1 3/8" apart and has a 6/32" x ¼" mounting screw at center.

List Price \$0.65 ea.

Cat. No. 18. Twin jack, is provided with two terminals 7/8" apart and has two .140" diameter holes, 1-11/16" centers. Bottom plate is 1/16" thick, top plate 1/32" thick. 5/8" wide x 2-1/16" long.

List Price \$0.13 ea.

Cat. No. 18-T. Triple jack is provided with three terminals 9/16" apart and has two .140" diameter mounting holes, 1-15/16" centers. Bottom plate is 1/16" thick, top plate 3/64" thick. 5/8" wide x 2 3/8" long.

List Price \$0.19 ea.

American Beauty

ELECTRIC SOLDERING IRONS

These Irons embody features that specialized experience—since 1894—has demonstrated to be desirable for efficient and lasting service. Hundreds of thousands in use throughout the world in manufacturing plants, service, maintenance and repair shops, Army and Navy Services, telephone, telegraph and radio stations.

No. 3138—Designed primarily for production and maintenance in radio, telephone, telegraph, ignition switchboard and telephone installation work and similar industrial applications.

No. 3158—For the same purposes as the No. 3138 but for work requiring an iron of greater capacity.

No. 3178—For use on still heavier work; for light commutators and service and production work. A very useful iron for general purposes.

No. 3198—For heavy work of all kinds. Supplies a large volume of heat at high temperature. Used by manufacturers in many different lines; for shop, service, production work, etc.

Each of the above irons is equipped with a baffle plate, at the shank, to prevent free conduction of heat to the handle.

No. 3128—Designed for lighter work than the No. 3138 in similar applications. Has plug-type $\frac{1}{4}$ "-diameter tip with a heating element of chrome nickel but without compression winding as used in the higher-wattage No. 3138-3198 series. Element and casing with handle springs and terminal assembly built as a unit.

No. S-76—Designed for work of the same kind as the No. 3128 but has a screw-type $\frac{7}{16}$ " diameter tip which screws on the metal head of the core of the chrome nickel heating element. Element with casing and handle springs and terminal assembly built as a unit.

3138 3158 3178 3198

Made in standard voltages and for 32 volts. No. 3138 also made for 6, 12, 24 and 55 volts. Nos. 3138-3198 can be equipped with three-conductor cord, one wire grounded, at slight additional charge. Separate heat-insulating stand supplied with each iron.

Top No. 3128 Bottom No. S-76

American Beauty COPPER TIPS

These copper tips are made from commercially pure, drawn bar, copper rod. Except for the No. 3734 screw-on type tip for the No. S-76 iron, each tip is designed to fit into, and to the full length of, core of heating unit of the particular iron for which it is intended. Maximum area of contact between the tip and heating unit is thus assured. Tips are of uniform diameter throughout their entire length. Each tip is held in place in core of heating unit by a recessed set-screw. Removal for cleaning or replacement is therefore easy. Standard shaped tips with which the various models are equipped are shown in the illustration; but pyramidal, instead of chisel type, and vice versa, can be supplied when so specified without additional charge. For No. 3138 a special, long, semi-chisel shaped tip No. 3738-S can be supplied for telephone and switchboard work.

3798 for 3198 Iron
3778 for 3178 Iron
3758 for 3158 Iron
3138S for 3138 Iron
3738 for 3138 Iron
3728 for 3128 Iron
3734 for S-76 Iron

American Beauty TEMPERATURE REGULATING STANDS

For use on (AC) Alternating Current Only

This is a thermostatically controlled device for the regulation of the temperature of an electric soldering iron while at rest. When placed on this stand, soldering iron is maintained at working temperature, ready for instant use or, if desired, at a lower temperature. Through an adjustment on bottom of the stand, thermostat may be set for the maintenance of any desired temperature—from very low, or warm, to full working temperature. Body of stand is of molded plastic. Soldering iron cradle proper is of metal. Stand is equipped with cord and attachment plug-cap for connection to current and with a receptacle for connection of the electric soldering iron. It is designed for use with electric soldering irons up to 660 watts capacity and on circuits up to 240 volts.

ELECTRIC SOLDERING IRONS FOR HOME, PROFESSIONAL MECHANIC AND FACTORY

● GREEN LABEL LINE

For intermittent duty. Meets all requirements of the home craftsman.

No. 415—List \$1.95— $\frac{3}{8}$ " Tip—55 Watts

No. 416—List \$2.95— $\frac{1}{4}$ " Tip—60 Watts

No. 417—List \$3.95— $\frac{3}{8}$ " Tip—100 Watts

No. 418—List \$4.95— $\frac{1}{2}$ " Tip—130 Watts

● ORANGE LABEL LINE

For Professional Mechanics—light or heavy soldering where iron must withstand operation for eight hour periods or more on frequent occasions.

No. 62—List \$4.95— $\frac{1}{4}$ " Tip—60 Watts

No. 63—List \$5.95— $\frac{3}{8}$ " Tip—100 Watts

No. 64—List \$6.95— $\frac{1}{2}$ " Tip—130 Watts

No. 65—List \$7.95— $\frac{5}{8}$ " Tip—200 Watts

No. 67—List \$8.95— $\frac{7}{8}$ " Tip—300 Watts

No. 69—List \$10.95—1 $\frac{1}{8}$ " Tip—500 Watts

● RED LABEL LINE

For Production Line Continuous Operation. These Irons are of most rugged construction.

No. 38—List \$6.95— $\frac{3}{8}$ " Tip—100 Watts

No. 58—List \$8.95— $\frac{5}{8}$ " Tip—200 Watts

No. 78—List \$10.95— $\frac{7}{8}$ " Tip—300 Watts

No. 98—List \$12.95—1 $\frac{1}{8}$ " Tip—550 Watts

● Thermostatic Temperature Control Stand

The iron can be maintained at any desired temperature while in the stand. This is the only way to control the tip temperature of an iron. Control of element temperature is not satisfactory. There is too much of a lag between element and tip temperature.

Years ago we developed a thermostatically controlled iron, which regulated the element temperature (just as presently marketed thermostatically controlled irons do) but we discarded the iron as it would permit the tip to cool.

When the stand is properly adjusted, it is impossible for the iron to overheat or to burn off its tin.

List Price

Cat. No. 5 Irons up to 1" dia. tip \$ 6.50
 Cat. No. 6 Irons up to 1 $\frac{1}{8}$ " dia. tip 6.50

● Soldering Pots

Ruggedly constructed, cast iron pots for production work. Elements are easily replaced even while pots are hot.

Net Price

Drake Solder Pots For Production Line

Model No. 200—300 Watt Unit

An ideal electric solder pot for production use. Used in factory production of tinned wire ends, terminal tinning and countless other volume tinning applications. Holds 2 lbs. of bar solder in 2 1/2" diameter 2" deep cast iron well. Complete with detachable Underwriters' Approved cord and plug, and bale type carrying handle. Genuine nichrome element. Shipping weight 6 lbs.

No. 200	List Price \$6.50
---------------	-------------------

Model No. 100—150 Watt Unit

Designed for light tinning. Ideal for occasional jobs. Suited especially for tinning ends of stranded wires to prevent fraying. Can also be used for soldering cord tips to cables. One piece cast iron construction holds heat longer. Size of pot 1 1/2" diameter 1" deep. Holds 1 lb. of bar solder. Complete with Underwriters' Approved cord and detachable plug. Shipping weight 3 lbs.

No. 100	List Price \$5.00
---------------	-------------------

All Drake Irons are listed as standard with the Underwriters Laboratories and the Canadian Power Commission.

CALROD[®] SOLDERING IRONS

FOR EVERY RADIO REQUIREMENT

MANUFACTURING — SERVICE

*Reg. U. S. Pat. Off.

- **HIGH-SPEED SOLDERING.** You can solder as fast and continuously as the nature of the work will allow.
- **UNIFORM PERFORMANCE.** Operating characteristics remain constant day after day. No appreciable decrease in efficiency even after months of service.
- **LONG LIFE AND LOW MAINTENANCE.** Long

life is assured and over-all costs are kept low because sturdy construction eliminates need of frequent repairs.

- **EASY, LOW-COST REPAIR.** Assembling and disassembling are easy.
- **THEY NEED NOT BE RETURNED TO THE FACTORY FOR REPAIR.** Irons can be repaired on the job without special tools or skill.

MIDGET SOLDERING IRONS

FOR MANUFACTURING AND SERVICE
OF RADIO AND ELECTRONIC EQUIPMENT

APPLICATION

This 8-inch, 1¾-ounce featherweight iron for close-quarter soldering with pin-point precision is used where conventional irons might cause damage . . . be clumsy to handle . . . be more expensive to operate. The Midget literally goes places with greater efficiency and less power . . . with no sacrifice in heat or speed. With its fingertip operation, this iron will help make an expert out of any solderer in a short time.

The Midget has chisel-shaped ironclad copper tips either ⅛- or ¼-inch diameter, as desired.

THIS MIDGET DOES A BIG JOB IN

- Boosting Production Rates
 - Increasing Operator Efficiency
 - Cutting Down Employee Fatigue
 - Saving on Repair and Maintenance
 - Reducing Rejects
 - Manufacturing and Repairing:
 - Radios and other electronic equipment
 - Meters
 - Instruments
 - Jewelry
 - Appliances
- . . . and many other products requiring precision soldering

RATING: 6 VOLTS, 25 WATTS

SPECIAL TRANSFORMERS (OPTIONAL) FOR G-E MIDGET SOLDERING IRONS

Single-tap. Cat. No. 84G392

Four-tap. Cat. No. 84G370

Specially designed 115-volt transformers are available as optional equipment in two types:

1. Single-tap 115/6 volts—for use where only one soldering heat is required
2. Four-tap 115/6.3/6/5.7/5.4 volts — gives wide range of heats (from 20 to 30 watts) for close temperature control of tips

Transformers are small, lightweight, but sturdy. Their 6-foot extension cords can be plugged in any 115-volt a-c circuit.

Description	Cat. No.	List Price GO-14
Single-tap	84G392	\$7.25
Four-tap	84G370	8.90

Publication Reference GENS-3488

THE MIDGET OFFERS MAJOR ADVANTAGES

Low-cost soldering—Solders more efficiently, using only approximately one-fourth wattage normally used.

Fingertip operation—Only 8 inches long, weighs but 1¾ ounces. Styled for fingertip grip.

Quick, continuous heat—Famous G-E Calrod* heater built into ironclad copper tip for rapid heat transfer.

Easy renewal—Ironclad tip and heater can be replaced as a unit merely by unscrewing from handle.

Long life, low maintenance—Low voltage permits use of heavy, long-lasting resistant wire. Reduced servicing with long-lasting Ironclad copper tip.

* Registered U.S. Patent Office.

HEXA CON

C.S.A. APP. No. 6699

ELECTRIC SOLDERING IRONS

GENERAL INFORMATION—Equipped with 6 ft. (10,000 cycle) approved heater cord (covered with twine braid for extra long wear) and rubber plug. Continental or English type plugs 25c extra list. Metal stand furnished with each iron. Heating elements made of best grade nickel-chromium resistance wire, insulated with finest mica obtainable. Elements in the plug tip irons are replaceable by the user and in the screw tip irons replaceable at

the factory. Tips in all irons are replaceable; made of hard drawn pure copper. Case is made from solid hexagon steel (except No. 50 and P-30), affording it great mechanical strength, preventing denting. Terminal easily accessible and constructed to relieve cord strain. Smooth, cool, comfortable handle—readily replaceable. Voltage range: 32 to 250. Standard voltages 110/120, 121/130, 220/250. All other voltages \$1.00 extra list.

SCREW TIP IRONS

No. 50—For light soldering on radio, telephone and electrical apparatus. 50 Watts. Tip diam., $\frac{1}{16}$ ". Ship. wt., 1 lb. Equal to $\frac{1}{2}$ -lb. old style copper each **\$4.50**
No. 60—Medium light soldering on telephone, radio, apparatus and linemen's kits. 60 Watts. Tip diam., $\frac{1}{8}$ ". Ship. wt., $1\frac{1}{8}$ lb. Equal to 1-lb. old style copper.....each **\$6.25**

No. 85—A high speed tool for telephone, radio and home use. 90 Watts. Tip diam., $\frac{1}{8}$ ". Ship. wt., $1\frac{1}{4}$ lb. Equal to $1\frac{1}{2}$ -lb. old style copper.....each **\$7.00**

No. 120—Light tinware, toys, typewriter, light auto, etc. A high speed iron. 120 Watts. Tip diam., $\frac{5}{16}$ ". Ship. wt., $1\frac{1}{8}$ lb. Equal to 2-lb. old style copper.....each **\$8.00**

No. 130—Same as No. 120 except has larger tip and 10 more watts capacity. 130 Watts. Tip diam., $\frac{7}{16}$ ". Ship. wt., $1\frac{1}{2}$ lb. Equal to 2-lb. old style copper each **\$8.75**

Better Soldered Joints

SOLDERMASTER Royal Blue Line ELECTRIC SOLDERING IRONS

GENERAL INFORMATION—Replaceable elements. Best grade of Madagascar mica for insulation. No. 55 has brass-sheathed cartridge element. Best grade nickel-chrome resistance wire. Replaceable hard drawn copper tips. All one piece swaged cases

CHROME PLATED. Equipped with 6 ft. Underwriters' Approved heater cord, rubber plug. Continental or English type plug 25c extra list. Stand for resting iron furnished.

VOLTAGES 110/120 220/250 A.C. or D.C., ANY CYCLE
SPECIFY VOLTAGE WHEN ORDERING

SCREW TIP IRONS

No. 55B—For light soldering, radio apparatus, etc. 55 Watts. Tip diam., $\frac{1}{16}$ ". Ship. wt., 13 oz. each \$2.50

No. 76B—For light work, electrical instruments, etc. 75 Watts. Tip diam., $\frac{1}{8}$ ". Ship. wt., 15 oz. each \$4.00

No. 100B—Same as No. 76B except used where more speed is required and heavier work is done. For home use. 90 Watts. Tip diam., $\frac{1}{4}$ ". Ship. wt., 16 oz. each \$4.50

No. 150B—Ideal size for garage and repair work. For home use. 170 Watts. Tip diam., $\frac{7}{8}$ ". Ship. wt., 24 oz. each \$7.00

No. 300B—For heavy steel metal, auto radiators, etc. 275 Watts. Tip diam., $1\frac{1}{8}$ ". Ship. wt., 38 oz. each \$10.00

PLUG TIP IRONS

No. 71B—For light work, radio repairs, etc. 75 Watts. Tip diam., $\frac{3}{8}$ ". Ship. wt., 16 oz. each \$4.00

No. 101B—For same work as No. 71B, but where more speed is required or heavier work is done. For home use. 100 Watts. Tip diam., $\frac{3}{8}$ ". Ship. wt., 18 oz. each \$4.50

No. 121B—High speed iron for radio and electrical repairs. 125 Watts. Tip diam., $\frac{3}{8}$ ". Ship. wt., 13 $\frac{1}{4}$ lbs. each \$5.50

No. 201B—For same work as No. 150B, except where plug tip is desired. 200 Watts. Tip diam., $\frac{5}{8}$ ". Ship. wt., 34 oz. each \$8.00

No. 301B—For same work as No. 300B, except where plug tip is desired. 300 Watts. Tip diam., $\frac{7}{8}$ ". Ship. wt., 46 oz. each \$10.00

DISPLAYS

Increase your sales with these silent salesmen. Irons securely mounted, but readily removable for sale. Individually packed in cartons ready for shipment. Catalog number and wattage shown on front of display. Complete catalog information and price list on back.

ERSIN MULTICORE SOLDER

SEVEN POUND REELS

ONE POUND CARTONS

The Solder containing 3 cores of extra active non-corrosive flux giving high speed soldering.

Our claim is a simple one: We believe that ERSIN MULTICORE is the finest cored solder in the World!

Ersin Multicore is solder in the form of wire containing three cores of non-corrosive Ersin Resin Flux. No extra flux is required. The use of Ersin Multicore guarantees that the correct proportion of flux to solder is used and maximum fluxing action occurs at the correct melting point of the solder. Only by using solder

wire with three cores of flux is it possible to be sure the flux is always present—that there will not be lengths of wire without flux which result in “dry” or high-resistance joints.

In addition to this advantage, Ersin Multicore is the *only* cored solder in the world containing ERSIN, an extra-active non-corrosive flux. It is high grade rosin homogeneously activated by a process which confers on the rosin the vigorous fluxing action characteristic of the more active fluxes.

You enjoy speedy and a consistently high precision standard of soldering and attain just that extra rapidity which guarantees economy of operation. Ersin Flux not only removes surface oxides prior to soldering, but prevents formation during the soldering period. You can satisfactorily solder components which are highly oxy-

dized—ones on which it would be necessary to undertake additional mechanical or chemical cleansing processes when using any other type of flux.

In Ersin Flux, the protective qualities of the original rosin are preserved. Joints made with Ersin Multicore Solder will not corrode even after prolonged exposure to any degree of humidity. The flux residue is impervious to moisture. It is hard and not sticky. It avoids accumulation of dirt and impurities on the joint.

Every reel or carton of Ersin Multicore is clearly marked both as to Gauge and Alloy, showing the actual content of Tin and Lead. You know exactly what you are getting when you buy Ersin Multicore Solder! Multicore costs a fraction more initially, but is unquestionably most economical in the long run.

Ersin Multicore Solder is available in all Tin/Lead alloys and in standard wire gauge from 10 to 22. (14, 16 and 18 s.w.g. are most popular.)

Ersin Multicore is the only solder which offers you these two fundamental advantages: (1) Multicore construction, providing three cores which assure perfect joints; (2) Ersin Flux, our *exclusive* fast non-corrosive flux.

Ersin Multicore is the answer for those who seek the finest Cored Solder in the World!

The Solder containing 3 cores of extra active non-corrosive flux giving high speed soldering.

Six New WELLER Soldering Guns with Solderlite

FOR FASTER
EASIER SOLDERING
AND TO PROTECT YOUR
WELLER SOLDERING GUN....
ALWAYS USE

Genuine Weller Flexitips

5 SECOND HEATING

No waiting time
Saves power

SOLDERLITE

Prefocused Spotlight

BUILT-IN TRANSFORMER

Produces current for heating loop tip

EXTRA LENGTH

Gives greater reach

TRIGGER SWITCH

Insulated plastic
Comfortable to hold

FASTER SOLDERING . . .

Time savers include 5 second heating; Solderlite to see where you work; loop tip gets in between wiring readily—can be formed to get in corners.

POWER SAVINGS . . .

Cost of power reduced up to 90% by intermittent 5-second heating.

SAVES RETINNING TIME . . .

Loop tip heats only when in use.

CHECK These Profit

Making Features . . .

5-Second Heating!

Soldering heat in 5 seconds saves waiting time. Saves power—used only when switch is closed.

Flexitip!

Long life tip. Can be formed to meet job needs. Replaceable quickly at low cost.

Easy to Hold!

Comfortable pistol grip and good weight distribution. Non-tiring and easy to hold.

Solderlite!

Locates the work fast. Spotlights the job. You see what you're doing.

Longer Reach!

Greater terminal length gets down farther in chassis wiring. Reaches through to the soldered joint.

Dual Heat!

Models D-207, DX-8 and DX-12 have 100 watts normal heat on first switch position, and 135 watts instantaneous heat on second position for soldering to chassis, etc.

WELLER MFG. CO.

ALPHA tri-core solders

An American Solder for American Production Methods

INSURE PERFORMANCE—SPECIFY ALPHA TRI-CORE

TRI-CORE ROSIN-FILLED SOLDER

Craftsmen prefer this faster, easier sequence solder. It provides more uniform fluxing and stronger joints for Radio, Electrical, and Automotive work. Saves time, money and labor for manufacturing or repair service.

WHY TRI-CORE ROSIN-FILLED IS THE IMPROVED SOLDER:

- three independently filled cores assure flux continuity, eliminate risk of empty flux sections.
- thinner solder walls speed melting, cut soldering time by 25% or more.
- no activating chloride agent to produce acid conditions and toxic vapors.
- forms a clean, smooth, strong joint without carbonizing.
- three cores instead of one at no premium in price.
- all gauges from 1/4" and heavier down to 0.020" and finer.

TRI-CORE "LEAKPRUF" ACID-FILLED SOLDER

Why put up with old-fashioned, leaky acid-cored solders? Mechanics acclaim Tri-Core's cleaner job, long shelf life, and guaranteed leakproof feature. Now you can protect yourself as well as your reputation for better craftsmanship with this development in the field of acid-cored solders!

WIDELY PREFERRED FOR BETTER SOLDERING:

- The only three cored acid-filled solder.
- No solder waste due to fluxless areas.
- Highly soluble flux washes off with water.
- Non-toxic, and emits no offensive odors.
- Virtually non-sputtering, reduces hazards.
- Readily solders stainless steel, monel, nickel, etc.
- Leakproof; drip-proof; chalk-like flux will not leak to damage tools.
- The only acid core solder that can be formed into rings and other shapes, or cut to lengths without flux loss.

ALPHA SOLID SOLDER WIRE

Alpha's specialized know-how in lead and tin metallurgy and completely modern production facilities assures you of the finest solder wire available. Alpha's unique extrusion process assures a completely homogenized and uniform solder wire throughout. Supplied in any diameter and composition for your needs.

ALPHA PREFORMS

Alpha's preformed solders, in any shape or diameter required, cut many hours from your production time. Whether you use induction heating, flame jigs or heating ovens, we can swiftly supply your requirements in washers, rings, cut shapes, drops, pellets, solder foil, or other special shapes.

HANDY CAN PACKAGING

Alpha tri-core, rosin-filled, handy-cans: retail list 25c, packed in eye-appealing, sales-compelling, self-selling, safety flange tins. 12 cans per metal-edged display carton. 12 cartons per shipping container. Weight: 1 gross—25 pounds.

Alpha tri-core, "Leak-Pruf" acid-filled handy-cans: retail list 25c, packed in multiple color lithographed safety flange tins. 12 cans per metal-edged display carton. 12 cartons per shipping container. Weight: 1 gross—25 pounds.

STANDARD PACKING

1 LB. SPOOLS packed in individual cartons; 50 cartons per shipping container. 20 LB. SPOOLS packed 2 or 3 spools per shipping container. 5 LB. SPOOLS packed 10

SPECIAL ALLOYS

STANDARD ALPHA TRI-CORE SOLDERS ARE 40/60.

Also available in 25/75—35/65—45/55—50/50—60/40.

ALPHA SOLID SOLDER wire in all alloy ratios.

Available in all diameters from 1/4" and heavier, down to 0.020" and finer.

KRAEUTER

The choice of skilled mechanics

"GRIPTITE" COMBINATION PLIERS

The finest quality combination pliers. Designed for heavy duty. Slightly tapered nose, sharp deep milled teeth and grooved jaws for gripping cotter pins and wire. Knurled handles. The 8" and 10" sizes have three slip joint adjustments which give a wide range of parallel grips.

No.	Length	Finish	Wt. per doz.	Price
				Each
356	5 1/2 in.	Full Nickel	3 1/2 lbs.	\$1.50
356	6 in.	Full Nickel	5 1/4 lbs.	1.60
356	8 in.	Full Nickel	8 3/4 lbs.	2.00
356	10 in.	Full Nickel	14 lbs.	2.50

THIN NOSE COMBINATION PLIERS

The tapered jaws and thin nose of these pliers enable the mechanic to grip objects difficult to reach in tight, narrow working spaces. Knurled handles, milled gripping teeth and wire cutters.

No.	Length	Finish	Wt. per doz.	Price
				Each
40	5 in.	Nickel Plated	2 1/4 lbs.	\$
40	6 in.	Nickel Plated	4 1/4 lbs.	\$1.25

MECHANICS' SIDE CUTTING PLIERS

Gripping pliers with side cutters. Tapered nose, milled teeth and grooved jaws for gripping cotter pins and wire. Knurled handles. The cutters are very hardy for light wire work.

No.	Length	Finish	Wt. per doz.	Price
				Each
1973	5 1/2 in.	Full Nickel	3 1/2 lbs.	\$2.20
1973	7 in.	Full nickel	7 1/4 lbs.	2.50

LINEMEN'S SIDE CUTTING PLIERS

Designed for heavy work to meet the requirements of linemen. Drop forged from selected plier steel, skillfully hardened and tempered. Powerful wire cutters, a well balanced head and deep milled gripping jaw surface for holding and bending wire.

No.	Length	Finish	Wt. per doz.	Price
				Each
1801	6 in.	Blue Temper	5 1/4 lbs.	\$2.45
1801	7 in.	Blue Temper	7 1/2 lbs.	2.75
1801	8 1/2 in.	Blue Temper	11 1/4 lbs.	3.75

ELECTRICIANS' SIDE CUTTING PLIERS

Used extensively in electric wiring of fixtures, appliances and other general repair work. Very popular with mechanics on production work where electric wiring is required in the finished product.

No.	Length	Finish	Wt. per doz.	Price
				Each
1830	4 in.	Blue Temper	1 1/2 lbs.	\$1.75
1830	5 in.	Blue Temper	2 1/4 lbs.	1.90
1830	6 1/2 in.	Blue Temper	4 3/4 lbs.	2.10
1830	7 in.	Blue Temper	6 3/4 lbs.	2.35
1830	8 in.	Blue Temper	8 1/4 lbs.	2.75

IGNITION PLIERS

Very narrow head, serrated gripping teeth and well shaped handle grips. Three slip joint positions. Generally used on distributor, generator, magneto and carburetor work.

No.	Length	Finish	Wt. per doz.	Price
				Each
643	5 in.	Blue Temper	1 lb.	\$1.60

SHORT CHAIN NEEDLE NOSE PLIERS

Short tapered jaws for bending and looping wire. The short nose gives these pliers extra leverage and gripping strength. Used for wiring switches and other open electric work.

No.	Length	Finish	Wt. per doz.	Price	
				Each	Each
1641	5 in.	Blue Temper	2¾ lbs.	\$2.00	
1643	Same without Cutter		2¾ lbs.	1.75	

LONG CHAIN NEEDLE NOSE PLIERS

Long tapered jaws and needle nose. Used extensively in all industries . . . from switchboard, electric fixture and appliance wiring . . . to motor ignition, aviation and general manufacturing work.

No.	Length	Finish	Wt. per doz.	Price	
				Each	Each
1661	6 in.	Blue Temper	3½ lbs.	\$2.30	
1671	Same without Cutter		3½ lbs.	1.80	

EXTRA LONG CHAIN NOSE PLIERS

Extra long tapered jaws with narrow pointed nose. Used extensively in automotive . . . electric . . . aviation and general production and repair work.

Length of jaw 2¾ in.

No.	Length	Finish	Wt. per doz.	Price	
				Each	Each
1781	7 in.	Blue Temper	3¾ lbs.	\$2.65	
1771	Same without Cutter		3¾ lbs.	2.15	

LONG FLAT NOSE PLIERS

Adaptable to many uses where a tool with long flat sturdy jaws is required. Jaws are scored to give a good gripping and holding surface.

No.	Length	Finish	Wt. per doz.	Price	
				Each	Each
1751	6 in.	Blue Temper	3 lbs.	\$2.40	
1741	Same without Cutter		3 lbs.	1.90	

LONG NEEDLE OR SNIPE NOSE PLIERS

Especially designed for difficult and awkward jobs where no other tool will serve. The long slender jaws make it adaptable to many uses. A very popular plier for fine work.

2¾ in. Jaw

No.	Length	Finish	Wt. per doz.	Price	
				Each	Each
1621	6 in.	Blue Temper	2¼ lbs.	\$2.10	

CURVED NEEDLE OR SNIPE NOSE PLIERS

To reach that place down in under or around an obstruction. Very useful where greater visibility is required in holding small objects at an angle.

No.	Length	Finish	Wt. per doz.	Price	
				Each	Each

No. 41 • Electricians' Diagonal Pliers—

Hardened and tempered in oil. Special narrow nose for radio and electrical work.

No. 41 4 inches, 5 inches and 6 inches
Can be furnished with insulation stripper.

No. 654 • Utica Long Needle Nose Side Cutting Plier

This is a long, fine, spring-tempered nose side cutting plier, drop forged and with hand-honed cutting knives.

Utica Finish Size 6 inches and 7 inches

No. 1033 • Utica Long Chain Needle Nose Plier

This is a long needle nose type of plier without a side cutter. It has a spring-tempered needle nose with a fine balance for delicate work.

Utica Finish Size 6 inches and 7 inches

No. 622 • Utica Short Chain Nose Mechanic's Plier

This plier is a Short Chain Nose Side Cutting Plier, hand-honed cutting knives. It makes an all around Electrical Mechanic's plier.

Utica Finish Size 5 inches

No. 44S—Special Diagonal Pliers with Spring

A slim nose cutting plier designed especially for radio and electrical work. Extra fine hand honed edges permit nearly flush cuts.

Utica Finish Size 5 inches and 6 inches

No. 50 • Utica Standard Side Cutting Plier

An ideal tool for electrical work. Drop forged and skillfully tempered. Its cutting qualities are unsurpassed by any side cutting plier.

Utica Finish Size 5, 6, 7, 8 inches

No. 777 • Utica Long Needle Nose Plier

This plier has a long, half-round, spring-tempered nose for very fine work in assembling small electrical apparatus.

Utica Finish Size 6 inches

No. 888 • Curved Needle Nose Pliers—

This is a long curved spring-tempered Needle Nose Plier for use in deep and narrow places. It may be used without turning or twisting the hand in the assembling of small fixtures, electrical apparatus, etc.

Utica Finish Size 6 inches

No. 22 • Utica Chain Nose Plier

This is a Short Chain Nose Plier forged from a fine quality of steel with fine points particularly adapted for the use of Jewelers, Opticians, Telephone Installers, Electricians and Radio Assemblers.

Utica Finish Size 4, 4½, 5, 6 inches

No. 82 • Utica Chain Nose Wiring Plier

This is a special Radio Repair man's plier, new in design, having a chain nose for those who prefer this type of construction.

Utica Finish Size 8 inches

No. 46 • Midget Diagonal Plier

A small Diagonal for radio and electrical work. Hand honed edges with a slim nose for use in cramped quarters.

Utica Finish Size 4 inches

No. 91 • Thin Adjustable 22½° Angle Wrenches, Alloy Steel

Both the handle and jaw are drop forged from a high grade Alloy Steel, hardened and tempered in oil. Will not break or wear in the gear teeth and allow play in the wrench, permitting the jaw to slip off the nut.

It will give better service and last longer than any other wrench.

Size 4, 6, 8, 10, 12 inch

No. 895 Utica Radio Plier

This is a General Radio Repair Man's Plier. It has a center cutter and flat scored nose for looping and bending.

Utica Finish Size 6 inches

No. 517 Utica Ignition Plier

This ignition Plier with its unique design will fit all ignition units, spring tempered. A great little tool for the hard to get at adjustments.

No. 517 5 inches

No. 65 • Utica Jeweler's End Cutting Nipper

This Nipper is forged from a fine grade of steel, carefully tempered. A light, strong End Cutting Nipper, used by Electricians and Machinists. The keen cutting edges and "Perfect Fit" handles make this a very popular tool.

Utica Finish Size 4½ and 5 inches

No. 100BX • Utica-Smith Pocket Armor Cutters

No. 100BX—Utica-Smith Pocket Armor Cutters 7" Alloy Steel

The easiest, quickest tool made for cutting armored cable. Fully illustrated instructions packed with each tool.

S-184 S-3166 S-388
X-102 S-5166

No. 4—Polished Finish \$8.60
No. 4C—Chrome Plated \$9.35
SHIPPING WEIGHT 2 LBS.

HOLLOW SHAFT NUT DRIVERS

This unique, time-saving tool was especially designed for general electrical and radio work. In radio, it is primarily useful in installing and removing volume control and other panel equipment. The nut is readily tightened or loosened without damage to the panel. On telephone or power switchboards, the Hollow Shaft Nut Driver is especially useful where nuts must be installed or removed over long protruding bolts or studs — made with or without insulated shafts. The former for use with high voltage work. Shafts insulated for protection up to 1000 volts; handles to 5000 volts.

Nut Size	Depth of Hole	No. and Length Overall	Weight per Box	Insulated List	
				List	List
¼"	2¼"	HS-10 6"	1 lbs.	\$1.05	\$1.30

1"	5"	HS-20 7"	1¾ lbs.	1.50	1.75

STUBBY NUT DRIVERS

These tools have all the features of the regular XCELITE Nut Drivers, plus the advantage of a short shank for working in close or difficult quarters where a powerful grip is required. The Stubby Nut Driver is a mighty practical tool for installing car radios, working around carburetors, fuel pumps, shock absorbers, etc. Made in ¼", ⅜", and ½" sizes, with extra-deep hexagon sockets to handle two nuts at once.

Sockets are truly formed and free of burrs. They are tempered and fully finished. Handles are genuine shock-proof XceLite.

Handle, 1¼" diameter
Overall Length 3¼"
Shaft, 1¼" hollow
Weight per doz., 1½ lbs.

XCELITE "Combination Detachable" SCREWDRIVER

Here's convenience—and saving—combined in a mighty unique and useful tool. The XCELITE Combination Detachable Screwdriver has a genuine XceLite Shockless Handle, hollow to receive the dual-blade screwdriver units listed below. With this practical XceLite handle and, for example, a No. 2 Phillips blade on one end and a 1/4" XceLite blade on the other, you have two screwdrivers for just about the price of one! What's more, you can buy blades of other sizes to fit the same handle. Note the unique ball fastener on the blade. This holds the screwdriver unit securely in place—yet readily slips out when desired.

6" XCEL Adjustable SOCKET WRENCH (with Attachments)

A whole set of tools in one! Fits any size nut, hexagon or square, round or odd shaped, from 1/8" to 1".

List Price, \$3.50

Individually boxed, packed 6 to a self-selling display carton.

Weight, 6 lbs.

SCREW-HOLDING SCREWDRIVER

The Xcelite Screw-Holding Screw Driver is a tool for which electricians, radio men and mechanics everywhere have long searched. It is a genuine Xcelite product with a unique attachment that instantly and rigidly holds and starts any screw, even one without a head. Spring holder remains in place either above, below or exactly at the driver point. Grasps the screw at the head or 3/8" below giving three point suspension for greater rigidity. Can also be used for removing screws. Comes in 3/8" square blade, 3", 4" and 5". Packed 12 assorted lengths on metal display.

JUMBO SPINTITES

A rugged special Spintite for use on all types of hardened or self tapping cap screws. Shanks and sockets are made of alloy tool steel with a very high degree of hardness. Plastic grip is oversize for greater leverage. Depth of broach is less than thickness of screw heads to prevent marring panels.

Number	Size	Length	Handle Size	List Price

VACO DUPLEX REVERSIBLE SCREW DRIVERS with Ambery^l S/B (Slo-Burn) Plastic Handle

A Phillips bit on one end

A regular bit on other end

TWO SIZES

DU2 Light Duty — Chrome vanadium steel blade. Long lasting. Ambery^l handle of high dielectric and impact strength. Shock and break resistant. Impervious to most alkalis and acids.

Stock Number	Handle Diameter and Length	Blade Diameter and Length
DU 2	1" x 3 5/8"	1" x 3 5/8"
DUH 4	1 1/16" x 4"	1 1/16" x 4"

A Flip of the Wrist Does It . . . From Phillips to Regular.

Precision engineered blade may easily be inserted or removed and reversed to provide either a regular or Phillips bit. Ideal for automobiles, radios, retractors, household utilities, toys, etc., where straight slot screws and cross slot screws are frequently used in combination.

VACO MEANS SAFETY WITH AMBERYL S/B FIRE SAFE SHOCK AND BREAK PROOF HANDLES

RADIO CHASSIS PUNCHES

KNOCKOUT PUNCHES AND CUTTERS

No. 730 RADIO CHASSIS PUNCH

Quickly cuts clean, accurate holes in radio chassis for sockets, plugs, and other receptacles. Operates simply with ordinary wrench for drive power. Just insert the punch in a

$\frac{3}{8}$ -inch or $\frac{1}{2}$ -inch drilled hole and turn the drive nut. No reaming or filing—hole is smooth, perfect. Each size tool consists of the punch for cutting the metal, the die for supporting the metal, and the cap screw for providing the drive action. All parts are of high-grade tool steel carefully heat-treated and ground for clearance. Individually packed in a tube container and furnished complete with operating instructions. Odd-size holes for meters can be made with other punches and cutters listed at right.

No. 735 KNOCKOUT PUNCH SET

For fast, easy cutting of holes in metal up to $\frac{1}{8}$ -inch or 10-gauge thickness. Insert in small opening and drive with an ordinary wrench. Speeds radio set work, cuts cleanly, no reaming and filing. Set includes four punches for making $\frac{7}{8}$, $1\frac{1}{2}$, $1\frac{1}{4}$, $1\frac{1}{8}$ inch holes. Packed in leather case.

No. 737 KNOCKOUT PUNCH SET

Similar to the No. 735 set, but consists of two punches . . . for cutting holes $1\frac{5}{8}$ and $2\frac{3}{8}$ inch diameter. Packed in leather case.

Nos. 738 and 739 KNOCKOUTS PUNCHES

For cutting holes $2\frac{7}{8}$ inch diameter (No. 738) and $3\frac{1}{2}$ inch diameter (No. 739) in metal up to $\frac{1}{8}$ inch or 10 gauge thickness. Similar in design and operation to that of smaller GREENLEE Knockout Punches. Packed and sold individually.

No. 740 KNOCKOUT CUTTER

Excellent tool for making meter openings and other large holes needed in radio work. Quickly cuts holes $1\frac{1}{8}$, $2\frac{3}{8}$, $2\frac{7}{8}$, $3\frac{1}{2}$ -diameter. Operation is simple . . . driven with ordinary wrench. Special discs can be furnished for cutting odd-size

holes from $1\frac{1}{8}$ to $3\frac{1}{2}$ -inch diameter. Packed in leather case.
 No. 740 Knockout Cutter \$15.00 $\sqrt{t.}$ (lbs.) $4\frac{1}{2}$

T·A·C PLUGS · JACKS · CONNECTORS

— TELEGRAPH APPARATUS CO. —

INSULATED SOLDERLESS PHONE TIP PLUG

A standard insulated solderless phone tip plug which fits our parts 101, 106, 108 and 109 phone tip jacks. Metal parts are nickel plated brass. Overall length 2-3/16". The high lustre insulated handle is 1" long. Available in red, black, green and yellow.

No. 202 LIST PRICE 18c

SOLDERLESS PHONE TIP PLUG

No. 203 LIST PRICE 10c

A standard solderless phone tip plug. Identical to No. 202 above, except for insulated handle.

INSULATED SOLDERLESS JR. PHONE TIP PLUG

A standard insulated solderless junior phone tip plug made to fit our parts 101 and 106 phone tip jacks. Metal parts are nickel plated brass. The high lustre insulated handle is 1" long. Available in black, red, green and yellow. Overall length 1 7/8".

No. 204 LIST PRICE 18c

SOLDERLESS JR. PHONE TIP PLUG

No. 205 LIST PRICE 10c

A standard solderless junior phone tip plug identical to No. 204 above except for insulated handle.

Insulated Solderless SPRING BANANA PLUG

This insulated non-collapsible solderless spring banana plug is designed to give the greatest area of contact. Connection is made by a side set screw.

Metal parts are nickel plated brass except the four leaf banana spring which is nickel plated phosphor bronze. The high lustre insulated handle is 1" long. Available in red, black, green and yellow. Overall length 1-11/16".

No. 208 LIST PRICE 20c

Giant Banana Plug & Jack

Designed to handle heavy high frequency currents. Made of nickel plated spring brass.

No. 225—Jack LIST PRICE 30c
226—Plug with threaded shank LIST PRICE 35c
227—Plug with 10-32 hole with screw LIST PRICE 35c

SPRING BANANA PLUG INSULATED

In this spring banana plug no metal parts are exposed around the insulated handle. Connection is made by soldering to special type tubular lug which is an integral part of metal body. Non-collapsible four leaf banana spring gives maximum area of contact. Metal parts are nickel plated brass except banana spring which is nickel plated phosphor bronze. The high lustre insulated handle is 1" long. Available in red, black, green and yellow.

No. 209 LIST PRICE 18c

INSULATED SOLDERLESS SPRING BANANA PLUG

(INTERNAL SOLDERLESS FASTENER)

An insulated spring banana plug identical in appearance to our part No. 209 except that connection is made to an internal solderless fastener. The high lustre insulated handle is available in red, black, green and yellow.

No. 210 LIST PRICE 20c

Insulated Phone Tip Jack

An insulated phone tip jack which makes very positive contact. Contact springs are made of phosphor bronze. Metal parts are nickel plated brass. The high lustre insulated head is 3/8" in diameter. Available in red, black, green and yellow.

Fits 1/4" hole in panels up to 1/4" thick. Supplied with nut and insulating washer.

No. 101 LIST PRICE 15c

PHONE TIP JACK

A phone tip jack identical to our part No. 101 above except that it has a non-insulated 5/16" hex head. Metal parts are nickel plated brass.

Fits 1/4" hole in panels up to 3/8" thick.

No. 106 LIST PRICE 10c

Open Circuit Phone Jack

Made to fit all stand-phone plugs. Contact spring made of nickel plated phosphor bronze and body made of nickel plated brass. Highest quality insulating material used. Fits 3/8" hole in panels up to 3/16" thick. Supplied with one metal washer.

No. 100 LIST PRICE 30c

SPRING BANANA PLUG

This spring banana plug is used extensively for plug-in coils, etc. Greater surface contact gives low RF resistance. Threaded shank is 6-32 thread, 3/8" long. Overall length 1-3/16". All metal parts are nickel plated brass except the four leaf banana spring which is nickel plated phosphor bronze. Supplied with soldering lug.

No. 206 LIST PRICE 11c

SPRING BANANA PLUG

Identical to our part No. 206 above except that threaded shank is 3/4" long.

No. 207 LIST PRICE 12c

SPRING BANANA PLUG

Identical to No. 206 spring banana plug except that instead of threaded shank it has a female 6-32 thread. Supplied with soldering lug and 6-32 screw.

No. 212 LIST PRICE 12c

BANANA JACK

A standard banana jack made of nickel plated brass. Overall length 5/8". Fits 1/4" hole in panel. Supplied with solder lug and nut.

No. 105 LIST PRICE 9c

INSULATED BANANA JACK

All metal parts are nickel plated brass. The high lustre insulated head is available in red, black, green and yellow. Fits 1/4" hole in panels up to 3/8" thick. Supplied with solder lug, insulating washer and nut.

No. 107 LIST PRICE 15c

Insulated Combination Banana Plug & Phone Tip Jack

An insulated combination banana plug and phone tip jack made to fit our parts Nos. 206, 207, 202, 203, 208, 209, 210, 212, 219 and 220. The phosphor bronze contact springs assure positive contact. Fits 1/4" hole in panels up to 5/8" thick. The high lustre insulated head is available in red, black, green and yellow.

No. 108 LIST PRICE 20c

STANDARD PHONE TIP

A standard phone tip made of nickel plated brass. Used extensively for connections on head phone cords.

No. 220 LIST PRICE, Per 100 \$1.50

T·A·C

PLUGS · CONNECTORS · CLIPS SWITCHES · KNOBS

DOUBLE PHONE PLUG

A two way phone plug. Will accommodate 2 sets head-phone tips

or lugs. Fits all standard jacks. Handle is molded bakelite. Metal parts are nickel plated brass. Available in red and black.

No. 211 LIST PRICE 50c
No. 224—Barrel only LIST PRICE 20c

SHIELDED TWO-WAY PHONE PLUG

Identical to our part No. 211 phone plug except that barrel is made of nickel plated brass for shielding purposes.

No. 221—Plug LIST PRICE 85c
No. 222—Barrel only LIST PRICE 50c

MOMENTARY CONTACT PUSH BUTTON SWITCH

This switch is designed to use a minimum of panel space. It is made with the finest insulating material. The contacts are fully enclosed. The button is black. The housing is made of brass with an all over nickel plated finish. It is SPST, normally open. Fits in $\frac{5}{8}$ " hole in panels up to $\frac{1}{4}$ " thick. Supplied with mounting nut.

No. 600 LIST PRICE 60c

SLIDE SNAP SWITCH

A very popular switch used in many radio circuits—tone—B.F.O.—phono, etc. Ribbed black bakelite handle. Housing is cadmium plated steel. High quality insulating material. Mounting centers $\frac{1}{8}$ "

No.	Type	LIST PRICE
601	SPST	26c
602	SPDT	33c
603	DPST	38c
604	DPDT	49c

3AG FUSE MOUNTINGS

Very sturdily constructed on $\frac{1}{8}$ " black bakelite. Bottom rivets are recessed to permit mounting on metal. Clips are made of spring tempered nickel plated brass. Have center holes for mounting.

No.	Type	LIST PRICE
700	Single	20c
701	Double	30c
702	Clips Only Per C	\$1.75

Single Contact Female Microphone Connector

This microphone connector assures a completely shielded connection. All metal parts are chrome plated brass except spring. Used extensively for making connections from microphone to amplifier. When used with our part No. 505 and 500, any combination of connection can be arranged. Equipped with coupling ring. No. 506 LIST PRICE 50c

Single Contact Male Microphone Connector

Similar to microphone connector No. 506 above except that it has a male thread $\frac{5}{8}$ -27 and no coupling ring. LIST PRICE 40c

No. 505 LIST PRICE 40c

Single Contact Male Chassis Connector

This microphone connector is used on chassis or in the microphone. Made of nickel plated brass. The thread is $\frac{5}{8}$ -27 and $\frac{3}{8}$ " hole required for mounting. Supplied with washers, soldering lug and nut. Highest quality insulating material used. No. 500 LIST PRICE 30c

No. 500 LIST PRICE 30c

Shorting Type Single Contact Male Chassis Connector

Used with amplifiers for a microphone chassis connection to prevent open circuit hum when volume control is on and microphone is disconnected. Ideal for use with multiple mixer amplifiers. LIST PRICE 40c

No. 501 LIST PRICE 40c

PHONE PLUG ADAPTER

For use with the connector 506 shown at the top. Fits any standard phone jacks. No wiring or soldering necessary to make connection. Made of nickel plated brass. LIST PRICE 45c

No. 223 LIST PRICE 45c

FAHNESTOCK CLIPS

Millions of these spring binding posts clips have already been used. Grips wire with just enough pressure for good electrical contact. Made of spring tempered brass. *Bronze

No.	Fig.	Length	Width	Max. Wire	Mtg. Hole	Price Per C

WALSCO STAPLE DRIVER "NEW IMPROVED GUARANTEED MODEL"

Patent No. 2,285,384

PAYS FOR ITSELF ON THE FIRST JOB

- A sensational tool for installing wires and cables, that saves time and money.
- Pays for itself on the first job.
- Used by Radio, Public Address and Intercom Technicians.
- Staples into corners and other inaccessible places.
- Staples on hard surfaces such as plaster, hardwood, etc.
- Can be loaded in 10 seconds.

A real time and trouble-saving tool for stapling wires in Public Address, and Inter-Communication installation and service. Useful also for general stapling, sign-posting, refrigeration gasket work, etc. The WALSCO Staple Driver has met the test in the field and has proved itself a real aid to maintenance men. This handy device automatically positions the staple—then one or two strokes with the palm of the hand and the staple is driven home neatly, quickly, and accurately. A small trigger regulates the feeding mechanism to enable the operator to strike the handle on hard surfaces as often as necessary before a second staple leaves the magazine. Staples come in strips, are large enough for cables and wires up to 3/4" diameter. An adjustable regulator controls the depth to which the staple is driven into surface, thus preventing damage to the insulation of the wire.

STAPLE DRIVER COMPLETE

Including box of staples:

Cat. No.	List Price	Dealers' Net

WALSCO UNIBELT

A NEW UNIVERSAL DIAL-DRIVE BELT ADJUSTABLE TO FIT ANY DIAL DRIVE

Covered by Patent No. 2,300,706

- Eliminates need for stocking 96 different sizes of belts.
- Unibelt gives the Radio Man the correct size belt for every make and model set.
- Easily installed in a few minutes. No need for taking dial mechanism apart.
- Put up on spools in continuous lengths which will make five or more average belt replacements.
- New patented construction incorporates special stainless steel core and pure latex covering.
- Belts cannot stretch, and when properly installed will not slip, fray or break.
- Unconditionally guaranteed.

The ingenious construction of the New WALSCO Unibelt makes it possible to assemble any size belt by merely cutting the desired length and joining the ends with a simple "zipper-like" connector. The connected belt cannot stretch and has a breaking strength of over 60 lbs. ONLY ONE SIZE NEEDED for any belt replacement job.

Cat. No.	List Price	Dealer's Net
303—5-ft. spool Unibelt (with 10 connectors and instructions).....	\$2.75	\$1.65

WALSCO DIAL DRIVE BELTS

- Precision Made.
- No Stretch — No Slip.
- Smooth and Uniform.
- Exceptionally Strong.

Available for any type of radio set. Specially constructed to give long lasting, trouble-free service. Treated for maximum friction and to provide accurate tuning. WALSCO Dial Belts are uniformly thick throughout the entire length and are precision made and guaranteed to fit perfectly.

All Sizes	List Price Each	\$0.25
Also put up in Kits of 25, 50, 100 and 150 Belts		

WALSCO STANDARD TEST RECORD

For immediate, audible adjustment of record changers and coin-operated phonographs . . . solves the problem of adjusting the set-down position of the pick-up, and checks for proper tripping THROUGH SOUND.

- Accelerated Pitch, saves time, as playing time for record is less than 40 seconds.
- Five cycle changes obtained in the same time it takes to play one regular 10" record.
- Proper tripping action is indicated by tone signals.
- Lead-in grooves are modulated with a series of three consecutive tones. If three tones are heard, pick-up is setting too close to edge of record . . . one tone indicates pick-up is setting down "too far in" . . . if two tones are heard, adjustment is correct.
- Stroboscope on rim of label indicates proper motor speed (78 r.p.m. at 60 cycles).
- Highest quality material is used, making records suitable for thousands of tests.
- Records are scientifically designed to R.M.A. and N.A.B. standards and are precision-checked for perfect flatness, concentricity, thickness, and correct groove depth.

WALSCO Standard Test Records are indispensable to Radio Dealers for checking combination sets, and for Radio and Coin Machine Technicians in testing, repairing and adjusting record changers.

Cat. No.	List Price	Dealer's Net
710-6—Set of six 16" test records.....	\$8.15	\$4.90
712-4—Set of four 12" test records.....	8.15	4.90

WALSCO DIAL CABLES AND CORDS

WALSCO Dial Cables and Cords are manufactured to meet the most rigid standards of the Government, Radio Industry and Engineering Laboratories. The finest raw materials are used and production is controlled to supply a uniform product with an absolute minimum stretch factor. All standard Cords are made with NYLON braid, known to have the highest abrasion resistance. These selected materials, plus special chemical treatment after fabrication, make WALSCO Cords the finest on the market. WALSCO Dial Cords are used by leading manufacturers as a standard component.

HEAVY CORD—Diameter .062"—Same as used on many Philco and Majestic sets. Very durable, and treated to prevent slipping.

No. 33 25 ft. List Price \$1.75
No. 33-1C 100 ft. List Price 4.60

BRONZE CABLE—16-Strand Braided—Diameter .039"—Breaking Strength 50 lbs.—A braided cable with good flexibility and abrasion resistance. "Fiber-glass" is used as core material and the braid is constructed of special hard Cadmium bronze. Does not unravel.

No. 31 25 ft. List Price \$1.20
No. 31-1C 100 ft. List Price 3.45
No. 31-5C 500 ft. List Price 14.00

PHOSPHOR BRONZE CABLE—42-Strand—Diameter .032"—Breaking Strength 60 lbs.—A very flexible metal cable constructed of 42 strands of hard Phosphor bronze over a "Fiber-glass" core. Extremely durable. Used for replacement of dial cables and many special applications where a strong, stranded cable is required.

No. 30 25 ft. List Price \$1.50
No. 30-1C 100 ft. List Price 5.00
No. 30-5C 500 ft. List Price 20.00

SPECIAL THIN BRONZE CABLE—Diameter .022"—An extra-thin cable for dial drives, flexible connections, pigtails, and many other applications—wherever a thin, but strong cable is required.

No. 32 25 ft. List Price \$1.20
No. 32-1C 100 ft. List Price 3.45
No. 32-5C 500 ft. List Price 14.00

The following cords cover over 80% of the replacement demand. With one spool of each kind on hand, the serviceman has the proper size for practically any set manufactured since 1934. Constructed with "Fiber-glass" or linen core and "pre-stretched," these are the most efficient cords available. The braided sleeves are made of Nylon.

†3495—50 Felt Feet (Discs—3/4" Diam. 1/8" Thick) 0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO SPADE BOLTS

Indispensable for attaching condensers, coils, cans, and similar items. For Experimenters, Servicemen and Manufacturers of electronic equipment. Stud size 6-32. Hole size for No. 6 screw.

Cat. No.	Size	Approx. No. of bolts per pkg.	List Price per pkg.
†3270	Assorted	25	\$0.40
*3271	5/8" overall length (approx.)	25	0.40
*3272	7/8" overall length (approx.)	25	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO RIVET ASSORTMENT

Various sizes of hollow, solid and split rivets in brass, copper and aluminum as used in everyday repair and experimental work. Sizes range approximately from 1/16" to 3/8" in diam. and up to 3/4" in length.

Cat. No. †2620—Approx. 60 asstd. rivets, per pkg. List Price \$0.40

WALSCO EYELET ASSORTMENT

Brass eyelets of various diameters and lengths. A handy item for every repair shop.

Cat. No. †2630—Approx. 55 eyelets, per pkg. List Price \$0.40

WALSCO SMALL COTTER & HAIR PINS

Package contains an assortment of most popular sizes of cotter and hair pins. A valuable aid in the repair of radios and phonograph mechanisms.

Cat. No. *2650—Approx. 50 assorted cotter and hair pins List Price per pkg. \$0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO SPEAKER CONE PATCHES

A quick and inexpensive means for patching tears and holes in speaker cones. Made of specially flexible material and backed with an adhesive which forms a permanent bond with the cone.

Cat. No. †2553—10 assorted patches, per pkg. List Price \$0.40

WALSCO SPEAKER DUST FELTS

Special, thin felt disks to keep metal particles and dust out of voice coils. Use Walsco Radio Cement to attach to cone.

Cat. No. 2775—Approx. 25 assorted sizes List Price \$0.40

WALSCO SNAP-HOLE PLUGS

A round, flat head, metal button with spring flanges that snap right into the hole. Used to seal adjustments, cover unused holes, etc.

Cat. No.	List Price per pkg.
†3500—8 assorted plugs	\$0.40
*3501—For 1/4" hole, 8 plugs	0.40
*3502—For 3/8" hole, 8 plugs	0.40
*3503—For 1/2" hole, 6 plugs	0.40
*3504—For 5/8" hole, 6 plugs	0.40
*3505—For 3/4" hole, 5 plugs	0.40
*3506—For 1" hole, 4 plugs	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO VENTILATING HOLE PLUGS

For amplifiers, transmitters, portable radios, amateur equipment, etc., wherever ventilation is required. Fine wire screen permits free circulation of air. The assortment contains plugs for 1/2" and 1" holes.

Cat. No.	List Price per pkg.
†3320—Assorted plugs	\$0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO CABLE CLAMPS

Heavy gauge steel, Cadmium plated, 3/8" wide. Perfectly punched and formed with No. 6 or No. 8 mounting holes. Available in 3 sizes for cables from 1/8" to 5/16" in diameter.

Cat. No.	For cables	Approx. No. of Clamps per pkg.	List Price per pkg.
†3330	Assorted clamps	20	\$0.40
*3331	1/8" to 3/16" Diam.	24	0.40
*3332	3/16" to 1/4" Diam.	20	0.40
*3333	1/4" to 5/16" Diam.	15	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO GRID CAP ASSORTMENT

An assortment of Grid Caps for all standard metal and glass tubes. Made of high quality spring brass, or steel and plated.

Cat. No.	List Price per pkg.
†2600—Approximately 20 assorted caps	\$0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO SPRING CONNECTOR CLIPS (FAHNESTOCK TYPE)

For fast connection and good electrical contact. No tools required for connecting or disconnecting. Made of spring brass or phosphor bronze.

Cat. No.	List Price per pkg.
*2730—Approx. 12 assorted clips	\$0.40
*2731—Approx. 20 small clips (for wire gauges of #16 & smaller)	0.40
*2732—Approx. 12 clips (for wire gauges of #12 to #18)	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO FUSE CLIPS

Made of spring brass, nickel plated for single hole mounting.

Cat. No.	List Price per pkg.
*2720—10 assorted clips	\$0.40
*2721—12 clips for 1/4" diameter fuses	0.40
*2722—8 clips for 3/32" diameter fuses	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO TERMINAL LUGS

Available in the six popular sizes which meet most of the requirements of the radio and electronic field. Accurate forming facilitates easy handling. Made of tinned brass.

Cat. No.	Figure No.	Approx. No. of Lugs per pkg.	List Price per pkg.
†3280	Assorted	40	\$0.40

WALSCO RETAINING RINGS & 'C' WASHERS

A necessity in the servicing of volume controls, record changers, etc. The rings are tempered spring steel. The washers are annealed. The assortment contains sizes for shafts from 1/8" to 5/8" Diam.

Cat. No.	Description	Picture Number	Approx. No. of units per pkg.	List Price per pkg.
†3420	Asst. Rings & Washers		35	\$0.40
*3421	Ring for 1/4" Shaft	C	40	0.40
*3422	'C' Washer for 1/4" Shaft	B	25	0.40
*3423	'C' Washer for 3/8" Shaft	A	25	0.40

(For Bulk Quantity Prices on these, see WalSCO Pages 16 and 17)

WALSCO STEEL MACHINE SCREWS

Round head, cadmium-plated, steel machine screws. Available in assortments or individual sizes, conveniently packaged for experimenters, servicemen and amateurs.

WALSCO Standard Machine Screw Ass'tm't

All the standard sizes used in electronic and similar work are combined in this handy, inexpensive assortment. It contains Nos. 6, 8, 10 screws— $\frac{1}{4}$ to 1" long.

Cat. No. List Price
 †3560—Approx. 40 assorted screws, per pkg. \$0.40

WALSCO Small Machine Screw & Nut Ass'tm't

A special assortment of extra small screws (Nos. 2 and 4), and nuts so often needed in electronic and experimental work for fastening small parts, to replace rivets, etc.

Cat. No. List Price
 †3360—Approx. 30 assorted screws and 30 assorted nuts, per pkg. \$0.40

PACKAGES OF SCREWS — INDIVIDUAL SIZES

Cat. No.	Size	Approx. No. of screws per pkg.	List Price per pkg.

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO SMALL ESCUTCHEON AND WOOD SCREW ASSORTMENT

This assortment contains the extra small sizes of hard-to-get wood screws as needed by radio men, model builders, etc., for fastening name plates, escutcheons and numerous other devices.

Cat. No. List Price
 †3550—Approx. 30 assorted screws, per pkg. \$0.40

WALSCO Standard Wood Screw Assortment

Handy assortment for workshop or home. Contains round and flathead screws of popular sizes in brass and steel.

Cat. No. List Price
 †3553—Approx. 30 screws, per pkg. \$0.40

WALSCO THREADED STEEL RODS

These rods have many uses in service and repair work and are made from the finest cold rolled steel to give maximum strength. Each package contains one each

of 6-32 and 8-32 threaded rod. Both 8 inches long.

Cat. No. List Price
 †2640—1 each 6-32 and 8-32 threaded rod \$0.40

WALSCO SHEET METAL AND SELF-TAPPING SCREWS

These screws cut their own threads in either metal or plastic. Just drill a hole and drive in the screw—no nut or tapping required. Ideal for mounting parts to chassis, replacing rivets and eyelets, etc.

Cat. No.	Size	Approx. No. of screws per pkg.	List Price per pkg.
†3470	Assorted	30	\$0.40
†2910	6 x $\frac{1}{4}$	30	0.40

*3237	$\frac{10}{32}$ x $\frac{1}{4}$	12	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO MACHINE SCREW NUTS

Walsco nuts are "Small Pattern" as preferred in the electronic and electric trade. Precision made and plated.

Cat. No.	Size Assorted	Approx. No. of nuts per pkg.	List Price per pkg.
†3520	Assorted	40	\$0.40
†3180	6/32	40	0.40
†3190	8/32	35	0.40
*3195	10/32	30	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO SPECIAL MOUNTING NUTS

Various kinds of nuts used on volume controls, switches, jacks, potentiometers, etc. A "must" for every radioman and electrician. All nuts are cadmium or nickel plated.

Cat. No.	Description	Approx. No. of nuts per pkg.	List Price per pkg.
†3530	Assorted	15	\$0.40
*3531	3/4" x 32 Volume Control Hex Nut	12	0.40
*3532	1/2" x 32 Toggle Switch Hex Nut	12	0.40
*3533	1/2" x 32 Toggle Switch Ring Nut	10	0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO ACORN NUTS

Greatly improves the appearance on panel assemblies, test instruments, cabinets, etc. These PAL type steel nuts

are self-locking and bright cadmium plated.

Cat. No.	Description	List per pkg.
*2960	—12 assorted nuts	\$0.40
*2961	—15 nuts, 6-32	0.40
*2962	—15 nuts, 8-32	0.40
*2963	—10 nuts, 10-32	0.40

WALSCO KNURLED THUMB NUTS

Precision made, Brass Nuts.

Cat. No.	Description	List Price per pkg.
*2971	—Approx. 15 nuts, 6-32	\$0.40
*2972	—Approx. 12 nuts, 8-32	0.40
*2973	—Approx. 6 nuts, 10-32	0.40

WALSCO WING NUTS

Handy for experimental work and hobby craft. Made of Steel and plated.

Cat. No.	Description	List Price per pkg.
*2975	—10 Nuts, 6-32	\$0.40
*2976	—10 Nuts, 8-32	0.40
*2977	—8 Nuts, 10-32	0.40

WALSCO SPEED NUTS

Self-locking and easy to install. Often required for replacement on many record changers, tuning units, etc.

Cat. No.	List Price per pkg.	
*2980	—Approx. 30 assorted speed nuts	\$0.40

WALSCO ESCUTCHEON PIN ASSORTMENT

Brass finished pins in various sizes and lengths from 1/4" to 1".

Cat. No.	List per pkg.	
†3555	—Approx. 100 asstd. pins	\$0.40

WALSCO DIAL DRIVE SPRINGS

Made of fine music wire for greater flexibility. Available in all standard sizes. Carefully looped at each end, rust-proofed and cadmium plated.

Cat. No.	Description	List per pkg.
†3400	—Assortment of 10 springs (lg. and small)	\$0.40
†3410	—Assortment of 10 small springs	0.40

*3458	8	20	0.40
*3459	9	20	0.40

(Bulk Prices Upon Request)

WALSCO PHONE TIPS

Fits all standard tip jacks. Easy to solder. Made of brass, nickel-plated. These are the conventional tips so often needed by

both experimenters and service men.

Cat. No.	List Price per pkg.	
†2725	—Approximately 12 tips per pkg.	\$0.40

(For Bulk Quantity Prices on these, see Walsco Pages 16 and 17)

WALSCO EXPANSION SPRINGS

Very handy for radio and electrical shops, laboratories, etc. The assortments contain various sizes of springs for many applications: record changers—to name one of a thousand.

Cat. No.	List per pkg.	
†3290	—10 assorted large springs	\$0.40
†3390	—10 assorted small springs	0.40

WALSCO COMPRESSION SPRINGS

A hard-to-get item. The Walsco assortments contain all of the springs often needed for repair work on radio and electronic equipment, motors, appliances, etc. Available in two assortments.

Cat. No.	List per pkg.	
†3370	—20 assorted small springs	\$0.40
†3380	—15 assorted large springs	0.40

CEMENTS—SOLVENTS COIL DOPE

WALSCO RADIO CEMENT

**Vibration-Proof Heat Resisting
Unsurpassed Adhesive Power**

An elastic cement especially made for the manufacture and repairing of speakers and for general radio work. Unaffected by vibration, dries fast and will never become brittle with age. • The latest developments in synthetic resins and gums are incorporated in Walsco Radio Cement.

• In addition to its use for speaker repair, Walsco Radio Cement can be used for repairing cabinets, loose tube bases, grid caps, etc. It will provide a strong bond between almost any materials and is not affected by high temperature, moisture or oil. All bottles come with built-in brush and have an evaporation-proof cap liner.

Cat. No.	List Price
51—1 1/4 oz. tube.....	\$0.55
52—2 oz. bottle.....	0.60
54—4 oz. bottle.....	1.00
58—8 oz. bottle.....	1.60
59—1 pt. bottle.....	3.00
50-GL—1 gal. can.....	12.50

Also available in 5, 15, 50 gal. containers.

WALSCO PLASTIC CEMENT

Especially made to repair broken plastic cabinets, knobs, etc. Waterproof, heat-resisting, and heavier in substance than Walsco Radio Cement. Unexcelled as "Household Cement," "Model Airplane Cement," etc. Cements Plastics, Metal, Wood, Glass, etc. Dries fast and forms an exceedingly strong bond.

Cat. No.	List Price
41—1 1/4 oz. tube.....	\$0.55
42—2 oz. bottle.....	0.60
44—4 oz. bottle.....	1.00
48—8 oz. bottle.....	1.60

WALSCO VINYLITE CEMENT

This adhesive uses the new Vinylite plastic resin as a base and has remarkable properties such as high tackiness, extreme flexibility when dry and excellent adhesion to metals, plastics, leather, cardboard and paper. Fast drying. Also an excellent thermoplastic cement for joining nonporous materials (e.g. metals). In this case the cement is applied to both surfaces and dried after which the parts are pressed together and bond established by heating with flatiron; soldering iron, etc.

Cat. No.	List Price
25—2 oz. bottle.....	\$0.70

WALSCO ALL-PURPOSE RUBBER CEMENT

For cementing rubber parts to metal or wood, rubber mounts to chassis, rubber cushions to lids, etc.—gives an especially strong bond. A Radio Serviceman should always have a bottle on his work bench.

Cat. No.	List Price
112—2 oz. bottle.....	\$0.60
114—4 oz. bottle.....	1.00

WALSCO FABRIC CEMENT

Does Not Penetrate the Fabric

Especially made for attaching grille cloth, turntable felt, covering of portable radios, etc. Dries very fast; is unaffected by moisture, sunlight, and high temperature and does not become brittle. Indispensable to Radio Dealers and Servicemen—eliminates the danger of spoiling the outside of a grille cloth, turntable felt, or other fabrics, since it does not penetrate the material.

Cat. No.	List Price
21—1 1/4 oz. tube.....	\$0.55

WALSCOBOND

A truly universal cement. Fast drying and easy to use. Bonds practically every material except rubber. Excellent as model airplane and general household cement. Has exceptional adhesiveness and strength. Not affected by heat and cold. Water, oil- and alcohol-proof.

Cat. No.	List Price
225—2 oz. bottle.....	\$0.60
226—4 oz. bottle.....	1.00

WALSCO WOOD GLUE

An "extra strength" adhesive incorporating the latest chemical developments and resins. A "must" item for every repair shop. Bottle caps have non-sticking rubber gaskets.

Cat. No.	List Price
222—2 oz. bottle.....	\$0.60
224—4 oz. bottle.....	1.00

WALSCO CEMENT SOLVENT AND THINNER

This Cement-Solvent is used for loosening cement on speaker cones, voice coils, and other parts where cement has been applied previously. Recommended also for thinning Walsco Radio Cement, Plastic Cement, and Fabric Cement.

Cat. No.	List Price
62—2 oz. bottle.....	\$0.45
64—4 oz. bottle.....	0.60
68—8 oz. bottle.....	0.85
69—1 pt. bottle.....	1.30

WALSCO POLYSTYRENE CEMENT AND COIL DOPE

For Bonding Polystyrene Parts and Coil Coating in Radio and High Frequency Work
A Polystyrene solution with a high solid content. Can be brushed on or parts can be dipped. Renders coils or other parts moisture-proof. Holds windings firmly in place due to a certain amount of shrinkage upon drying. Electrical losses due to coating with this cement are negligible—even if used for high or ultra-high frequency work.

Cat. No.	List Price
154—4 oz. bottle.....	\$1.00
158—8 oz. bottle.....	1.60

Larger Sizes on Request

WALSCO Polystyrene Solvent and Thinner

This thinner is especially designed for use with Walsco Polystyrene Cement where regular thinner cannot be used.

Cat. No.	List Price
164—4 oz. bottle.....	\$0.60

CLEANERS — LUBRICANTS "CONTACTENE"—"NO SLIP"

WALSCOLUB - B

A recently-developed chemical compound in thin paste form. WALSCOLUB-B counteracts oxidation, prevents corrosion of metals and eliminates noise on band switches, push buttons, tuners, volume and other controls, as well as air-exposed electrical contacts, attenuators, etc. WALSCOLUB-B will not change electrical properties. It is superior to any graphite compound for this purpose. Ideal on metal surfaces to prevent rust. Servicemen: Its use will save you both time and money. Once you have tried it, you will never be without it! Large, handy applicator tube.

Available also in 1-lb., 5-lb. and 25-lb. containers for industrial users. Prices on request.

Cat. No.	List Price
22—1 3/4 oz. tube	\$0.55

WALSCO CONTACTENE

New Improved "Contact Cleaning Fluid"

- Cleans contacts and controls.
- Keeps controls and contacts noise-free.
- Lubricates and reduces friction.

A fast-evaporating combination of special solvents affording greatest cleaning power without affecting insulating materials. Contains liquified Walscolub B, which after evaporation of the solvents, forms a thin film that protects the contacts. Contactene is recommended for treating volume controls, band switches, tuning condensers, springs, etc., to eliminate noisy operation. Bottles come with built-in brushes.

Cat. No.	List Price
82—2 oz. bottle	\$0.50
84—4 oz. bottle	0.65
88—8 oz. bottle	0.90
89—1 pt. bottle	1.65

WALSCO Motor and Gear Lubricant

The latest development in chemicals for lubricating purposes. Much superior to greases because of its higher lubricating and lasting qualities. Its viscosity does not change with temperature. Used on phonograph motors, record changers, and all appliances that require a grease-type lubricant. In large handy "applicator" tube.

Cat. No.	List Price
23—1 3/4 oz. tube	\$0.55

WALSCO "NO-SLIP"

A newly developed chemical composition that greatly increases the friction of pulleys, cords or belts. Contracts, "sets" and shrinks the fibres at the same time. Stops instantly any slippage of Dial Belts, Dial Cords, etc. Easily applied with brush. Indispensable to any radio man.

Cat. No.	List Price
401—1/2 oz. bottle	\$0.45
402—2 oz. bottle	0.75

WALSCO "NO-OX"

"The Miracle Electronic Contact Fluid"

Fast-acting liquid chemical formulated with a neutral, non-gumming special lubricating base. The answer to the radio man's need for an outstanding contact and control cleaner. Contains no solvents; its corrosion-dissolving action is entirely chemical. Cleans, lubricates and preserves. Proved in tens of thousands of applications by radio laboratories, service shops, broadcasting companies, motion picture, sound and recording studios, etc. "NO-OX" is highly recommended for treatment of volume and tone controls, attenuators, mixers, relay contacts and similar equipment.

Cat. No.	List Price
101—1 oz. bottle	\$0.85
102—2 oz. bottle	1.60
100-16—1 pt. bottle	12.50

* Mfd. under exclusive licensing agreement with NO-OX Laboratories. Trade mark registered.

WALSCOFLUX

A non-corrosive flux. Quick acting, easy to apply. May be safely used for all electrical, radio and telephone work. Helps to keep the iron tip clean.

Cat. No.	List Price
220—2 oz. bottle with applicator	\$0.60

WALSCO CARBON TETRACHLORIDE

For general cleaning and spot removing. Dissolves dirt and grease instantly. May be used on most delicate parts. Chemically pure, rapid drying, non-explosive and non-inflammable. A safe cleaning fluid.

Cat. No.	List Price
214—4 oz. bottle	\$0.55
219—16 oz. bottle	1.50

WALSCO RADIO DIAL OIL

A light-bodied lubricating oil for all electronic and electrical appliances—absolutely free of acids or gummy substances. Also recommended as a rust preventative for radio chassis, tools, machinery, etc.

Cat. No.	List Price
72—2 oz. bottle	\$0.45
74—4 oz. bottle	0.60

WALSCO "UNIKLEAN"

Contains "Trichlorethylene," a most effective cleaning agent. Instantly removes dirty spots and grease from cabinets, chassis, panels, etc., without damaging the finish. "Uniklean" is economical and effective.

Cat. No.	List Price
204—4 oz. bottle	\$0.50
209—1 pt. bottle	1.20

WALSCO products

Help The Radio Man

WALTER L. SCHOTT COMPANY, BEVERLY HILLS, CALIFORNIA

SCRATCH REMOVERS, RECORD CLEANERS, POLISHES, PAINTS, LACQUERS

WALSCO SCRATCH REMOVING POLISH

"Makes Scratches Disappear"

A blend of polishing and staining ingredients. Removes scratches from cabinets, radios, furniture, etc., and polishes at the same time. Very easy to apply. Will not change shade of finish. Comes in two shades: "Dark" for walnut, mahogany, etc., "Light" for light maple, light oak, etc.

Cat. No.	Dark	Light	4 oz. bottle	List Price
414	434			\$0.50
416	438		8 oz. bottle	0.75

Standard Package:
4 oz. bottles 1 doz.
8 oz. bottles 2 doz.

WALSCO SUPER POLISH

"A Concentrated White Cream Wax Polish"

Does two things: First, it removes any old polish, grease or dirt that may be on the cabinet or furniture. Second, it forms a hard, dry and durable film that will protect the object for a long time, giving it a "brand new" appearance. Requires very little rubbing.

Cat. No.	1 oz. bottle	List Price
412		\$0.50
418	8 oz. bottle	0.75

Standard Package: 4 oz. bottles 1 doz.
8 oz. bottles 2 doz.

WALSCO Recordene

Improves Tone • Renews and Prolongs the Life of Records and Recordings • Reduces Surface Noise and Wear

A wonder, scientific product for improving and preserving records and recordings. Removes dirt, dust or grease from grooves, and leaves a clean, clear plastic film that reduces surface noise and greatly increases record life. A special wool felt dauber is attached to each bottle cap for easy application. Attractive display of a dozen bottles increases turn-over and profits from this fast-moving product.

is attached to each bottle cap for easy application. Attractive display of a dozen bottles increases turn-over and profits from this fast-moving product.

Cat. No.	2 oz. bottle	List Price
92		\$0.50
90GL	1 gal. can	7.00

WALSCO RECORD-EASE

Recording—With the Greatest of Ease

Record-Ease should be applied to all recording and transcription blanks BEFORE the cutting. It makes the shavings "fluffy" as they pile up in the center of the record and thereby prevents interference with the cutting point. By decreasing cutting-point friction, Record-Ease greatly prolongs the life of cutting needles. Indispensable for commercial recordings, schools, police and court recordings, broadcasting stations and home recordings.

Cat. No.	95—2 oz. bottle	List Price
		\$0.75

WALSCO AIR-DRY WRINKLE VARNISH

Easy to apply in one coat. WALSCO Air-Dry Wrinkle Varnish provides a film that is hard, tough, and very resistant to wear. Repairs and replaces original wrinkle finish of manufactured equipment. No baking required. WALSCO Wrinkle Varnish will air-dry at room temperature.

Standard colors: grey and black. Other colors upon request.

Cat. No.	145—2 oz. jar (specify color)	List Price
		\$0.60
147	16 oz. can (specify color)	3.00

WALSCO CRYSTALLIZING LACQUER

Easily applied to metal, wood, cardboard, etc.—does not require experience. No spraying equipment or baking oven necessary. Brushed on, will dry in about thirty minutes, leaving an absolutely professional finish. Identical to finish found on commercial chassis, panels, speakers and transformers. WalSCO Lacquer Sealer, Cat. No. 142, should be used as undercoat if this lacquer is to be applied on porous materials or over other finishes. Available colors: Black, Green, Grey, Brown, Clear. Specify color when ordering.

Cat. No.	122—2 oz. jar	List Price
		\$0.60
129	16 oz. can	3.00
142	Sealer, 2 oz. jar	0.50

WALSCO SATIN FINISH LACQUER (TELEPHONE)

Made for commercial and amateur use on cabinets, chassis, panels, meters, racks, etc. This "satin finish" lacquer dries very fast and produces the "original finish" of most standard telephone and communication equipment. It air dries. May be brushed or sprayed.

Cat. No.	Black	Grey	2 oz. jar	List Price
172	182			\$0.50
179	189		1 pt. can	2.50

WALSCO INSULATING VARNISH

WalSCO "air-dry" varnish is fast-drying and produces excellent results when used on radio coils, transformers, solenoids, motors, and all electrical appliances. Withstands heat and is extremely resistant to acid, oil, and grease. It is non-corrosive and moisture-proof. An all-around clear insulating varnish.

Cat. No.	192—2 oz. bottle	List Price
		\$0.60
193	1 pt. can	2.00

WALTER L. SCHOTT COMPANY, BEVERLY HILLS, CALIFORNIA

REFINISHING and REPAIR KITS

WALSCO RADIO CABINET PATCHING OUTFIT

"The Most Popular Kit on the Market"

A complete kit especially designed for radio men who have little experience in cabinet work. Over 95% of all cabinet-finish damages can be repaired with this kit. The kit contains two shades of Spirit Walnut Stain, Dark Brown Lacquer, Plastic Wood, two shades of Ivory Spirit Enamel, Patching Lacquer, Super Polish, Alcohol, Brushes, Garnet Finishing Paper, French Polishing Pad, and Steel Wool, together with complete Instruction Booklet.

Cat. No.	List	Dealer's Net
K-10—In sturdy box with hinged lid.....	\$6.50	\$3.90
K-10-W—In California redwood case.....	7.50	4.50

WALSCO RADIO CABINET REPAIR KIT

A very handy compact and inexpensive kit that fills the requirements of many shops and stores. Especially useful for the Dealer or Serviceman who has only occasional cabinet repairs. The kit contains one bottle each of the following: Ivory Spirit Enamel—light and dark; Lacquer Enamel—Dark Brown; Spirit Stain; Super Polish; French Varnish; Finishing Paper; Steel Wool; Polishing Cloth; Instruction Booklet.

Cat. No.	List	Dealer's Net
K-9	\$3.00	\$1.80

WALSCO STICK SHELLAC KIT

An inexpensive kit for servicemen who have some experience in cabinet refinishing. Combined with Radio Cabinet Patching Outfit (K-10) it makes a most economical and completely professional kit for repairing radio cabinets. The shellac sticks match in color almost any cabinet on the market. The WalSCO shellac rubbing fluid makes it possible to smooth the patch without any effort or skill. Kit includes: six colors Stick Shellac, Alcohol Lamp, Burn-in Spatula, bottle of Shellac Rubbing Fluid, Felt, Steel Wool, Alcohol and Instructions.

WALSCO "SUPER-CHIEF" REFINISHING KIT

A "Must" Item

This is the most complete kit of its kind on the market. Designed by WalSCO for radio dealers. It contains everything which is needed to make an old radio look like new—all handy in one box-type carrying case. Contents of kit can be used by either skilled or unskilled refinishers, to completely refinish old radios and trade-ins, or to quickly patch up scratches, mars, etc. This kit will pay for itself on the first or second job. Every first-class radio dealer should have one. Kit contains the following:

Spirit Stain Dark Walnut	Scratch Rem. v. Fine Polish (Dark)
Spirit Stain Black	Scratch Rem. v. Fine Polish (Light)
Spirit Stain Mahogany	Patching Lacquer
Spirit Stain Maple	Alcohol Lamp
Super Polish	Alcohol
Spirit Stain Light Walnut	Screw Driver
Blending Stain Light Brown	Spatula
Blending Stain Medium Brown	Felt
Lacquer Enamel Light Ivory	Polishing Cloth
Lacquer Enamel Dark Brown	Polishing Pad
Lacquer Enamel Dark Ivory	Garnet Paper (8 sheets)
Shellac Rubbing Fluid	Instruction Book
Stick Shellac (12 shades)	Brushes (3 different sizes)

WALSCO INSULATING TUBING (SPAGHETTI)

WALSCO RAYOFLEX

A new type "spaghetti tubing" made of heavily lacquered rayon braid. More flexible and superior in many other respects to the conventional varnished tubing. Good dielectric strength (4,000 to 5,600 volts). RAYOFLEX has a smooth and tough surface inside and out. Meets ASTM and VTA Specifications #B2. Sizes up to #6 are packed in handy boxes.

WALSCO FLEXITUBE

A high grade synthetic extruded vinylite tubing for electronic and electrical insulation. Extremely flexible and resistant to abrasion. High dielectric strength (average 12,000 volt). Resistant to cold or heat from minus 65°F to plus 135°F. (Minus 54°C to 85°C). This tubing is impervious to water, oil, alcohol and most acids and alkalis.

WALSCO PLASTIC DIAL CRYSTALS

The New Universal, Unbreakable Crystal, Available in Round and Flat Styles
This innovation in replacement crystal design makes it possible to use one basic crystal to fit any dial. A special template supplied with each crystal is used to cut a circle of any desired diameter, using ordinary scissors. The crystal is made of unbreakable plastic and has the further advantage over glass that it can be cemented firmly in place. Can be used for radio dials, clocks, instruments, dash board dials, etc.

Cat. No.	Size	List Price
990	6" Maximum Diameter	\$1.10
992	9" Maximum Diameter	1.80
994	8" x 10" Flat Sheet	1.65

WALSCO ALIGNMENT TOOLS

1 2 3 4 5

These tools have won wide acceptance among radio men everywhere. They are precision made of the highest quality materials. Indispensable for work bench or tool kit. With a set of these tools the radio technician has the proper instruments to align almost any set.

Most of the tools are available either in sturdy bone fibre or in special Polystyrene plastic. The fibre tools are tougher than the plastic tools and are recommended for alignment of broadcast and intermediate band circuits, whereas the Polystyrene tools are for adjustments on high and ultra-high frequency circuits. Polystyrene is recognized by the radio profession as one of the finest low-loss insulating materials available today. Definitely needed on FM and television sets.

WALSCO 1/4" HEX I. D. NEUTRALIZING WRENCH.

This tool is very durable and can last out if corners become rounded from wear as the internal hex shape extends through the entire length. Overall length—7 1/2", O. D.—3/4" round.

Cat. No.	Picture No.	List Price
\$2500—Bone Fibre Wrench	2	\$0.40
\$2503—Polystyrene Wrench	2	0.40

WALSCO 5/16" HEX I. D. NEUTRALIZING WRENCH.

Same construction as 1/4" wrench listed above. Overall length—7 1/2", O. D.—3/8".

Cat. No.	Picture No.	List Price
\$2505—Bone Fibre Wrench	1	\$0.40
\$2508—Polystyrene Wrench	1	0.40

WALSCO COMBINATION FIBRE HEX WRENCH AND SCREW DRIVER.

Standard 1/4" hex wrench combined with a fibre screw driver to fill the need for a handy combination tool in factories and radio repair shops.

Cat. No.	Picture No.	List Price
\$2510—Combination Tool	3	\$0.50

WALSCO DUPLEX ALIGNMENT SCREWDRIVER.

Precision made tool accurately ground or milled to fit large or small screws. Width of blade on large end—1/4"; on small end—1/8". Thickness to conform to standard slot dimensions. Overall length of tool—6".

Cat. No.	Picture No.	List Price
\$2520—Fibre Screwdriver	5	\$0.50
\$2521—Polystyrene Screwdriver	5	0.40

WALSCO METAL TIP ALIGNMENT SCREWDRIVER.

Made with Polystyrene handle in which a small metal screwdriver blade is rigidly inserted, thereby making the effect of inductance negligible. This tool combines the low capacity effect of an alignment tool with the mechanical strength of a metal screwdriver. Diameter—1/4"; overall length—6".

Cat. No.	Picture No.	List Price
\$2525—Alignment Screwdriver	4	\$0.40

WALSCO TUNING WAND.

For checking alignment of tuned circuits without disturbing the setting of the trimmer condensers. Made from Polystyrene rod with inductance increasing powdered iron core on one end and inductance reducing brass piece on opposite end. Overall length—6".

Cat. No.	List Price
\$2540—Tuning Wand	\$0.40

(Picture not shown, but similar to Picture #1.)

WALSCO SERVICE TWEEZERS

These handy holding tools are made of fine spring steel and are polished nickel-plated. They have numerous uses in the shop and laboratory, such as starting screws and nuts in difficult places, holding wires and small parts together when soldering, clamping cemented items, installing dial cord and record-changer springs, looping and untying knots on drive cord, etc.

Cat. No.	Description	List Price
570	Self-Closing Tweezer with cross-over action, 6 1/2" long, serrated, blunt points	\$0.80
(Standard Package: Display card with 10 tweezers . . . Cat. No. 570D)		
571	Heavy-Duty Tweezer with slide-lock feature, Length 6 1/2", serrated, blunt points	\$1.20
(Standard Package: Display card with 10 tweezers . . . Cat. No. 571D)		
572	Precision Tweezer with narrow, pointed ends especially suitable for delicate work. Overall length 4 1/2"	\$0.55
(Standard Package: Display card with 20 tweezers . . . Cat. No. 572D)		
575	Tweezer Kit, made of durable leatherette, containing one each of the above listed tweezers	\$3.25

WALSCO TIRE STATIC NEUTRALIZING KIT

- Reduces or Eliminates Automobile Radio Tire Static.
- Dissipates Body Contact Shock (Door-handle Sparks).

This kit contains a special injector gun and 5 packages of WALSCO Static Neutralizing Powder (one for each tire incl. spare). The powder is blown into each tire in a very simple operation, which takes just a few minutes and lasts for the life of the tire.

Cat. No.	Description	List Price
980	Tire Static Neutralizing Kit, complete with injector, powder and instructions	\$2.50
982	Injector gun only	1.50
985	Powder only (enough for 5 passenger-car tires)	1.00

WALSCO PROTECTO-TUBE

A new synthetic tubing especially designed for insulating handles of pliers, screwdriver blades, cable connector ends, test prods, etc. This tubing is highly abrasion-resistant for long wear, and will not crack or shatter. Special Expanding Solution is furnished as part of the kit and "swells" tubing to permit easy application. Upon drying, tubing shrinks on tight.

Protecto-Tube Kit, containing approx. 12 ft. assorted sizes and colors of WALSCO Protecto-Tube, jar of Expanding Solution, and instructions.

Cat. No. K-18 List Price \$1.65

- ✓ **G. A. Kit**—"16 tools in One". Consisting of a No. 129 SpeedWay Electric Hand Grinder with both 3/32" and 1/8" collets; 4 mounted stones; 3-steel cutting burrs; 4 mounted brushes and/or abrasive wheels, 1 mandrel and 4 abrasive discs all fitted and linged blue leatherette case. Net weight 2 1/4 lbs. Packaged in standard package of 6, shipping weight 17 lbs. \$13.95 List Price
- ✓ **No. 129 Hand Grinder**—Special SpeedWay 110-120 v. AC-DC tool motor operates at 20,000 R.P.M. Comes equipped with 3/32" and 1/8" collets. Complete with sliding thumb switch, rubber cord and plug. Net weight of grinder 1 1/4 lbs. Packed in standard package of 10, shipping weight 16 lbs. \$8.25
- ✓ **No. 89 and 89-J 1/4" Drills**—The last word in 1/4" capacity drills. Features Specially wound high torque SpeedWay motor, streamlined die cast housing, natural grip direct thrust breast plate handle, movable side handle for close quarter drilling, self-aligning oilless bronze bearings, 500 R.P.M. operating speed, sliding thumb switch, two-tone finish. Ideal for intermittent drilling at its rated capacity. No. 89 equipped with Snap-action chuck. \$29.95 List Price
No. 89-J equipped with 33B Jacobs key chuck. \$34.95 List Price
No. 89-J 220 v. AC-DC. \$36.45 List Price
No. 89-J 32 v. DC. \$36.45 List Price
NOTE: Both 89 and 89-J Drills are Underwriter Laboratories Approved and are equipped with 3 wire (ground) cord. Net weight of either 1/4" drill is 9 1/2 lbs. Packed in standard package of 3, shipping weight 32 lbs. \$29.95
- ✓ **No. 209 Drill Stand (for 1/4" Drills)**—The 209 Drill Stand is lever operated, sturdily built with machined and ground base, and has ears for bolting to bench. Cast drill bracket, line bored, holds drill rigidly and accurately in all positions. Drill and bracket can be instantly adjusted for height. With this stand a No. 89 Drill makes a convenient and accurate drill press. Stand only. \$12.95 List Price
Net weight of stand 16 lbs. Packed in standard package of 3, shipping weight 54 lbs. \$12.95
- ✓ **No. 229 Stand (for No. 69 Drill only)**—Invaluable for accurate alignment or close-limit bench work. Drill becomes an accurate lever fed drill press. This dependable stand increases the value of the 69 drill by 50%. \$5.25 List Price
Net weight of stand 6 lbs. Packed in standard package of 5, shipping weight 32 lbs. \$5.25
- ✓ **No. 69 1/4" Drill**—Here is a light duty 1/4" drill, the handiest and most valuable tool in anyone's kit. Designed to give maximum torque through three steps of precision cut gears, the 69 drill makes straight drilling easier and permits use of either carbon steel or high speed steel bits. Equipped with self-aligning porous bronze bearings; long life thumb switch; die-cast gear case and pistol grip handle. Here's quality at low price. Free speed 1000 R.P.M. Normal load speed 600 R.P.M. 1/4" capacity snap release chuck. 6 ft. flexible lead cord and plug. High-torque SpeedWay motor 110-120 volts AC-DC. \$11.80 List Price
Net weight of tool 2 1/4 lbs. Packed in standard package of 8, shipping weight 20 lbs. \$11.80
- ✓ **No. 117 Bench Grinder**—The new 117 SpeedWay Portable Bench Grinder has 3 times the power of the Pre-war model. It is beautifully balanced, operates smoothly, silently without creeping. Its light, strong, 1-piece cast aluminum case, completely houses motor, shaft and bearings. It is functional. Length 8" x 6", 1/15 H.P. Shaded Pole Motor. This efficient grinder can be bolted permanently to the shop bench, or easily taken to the job—plugs into any 110-120 v. AC 50 or 60 cycle outlet; has rubber feet that prevent marring of fine surfaces. Finished in SpeedWay Blue crackle, complete with two 4 1/2" x 3 1/2" wheels—1 "coarse" and 1 "fine"; built-in thumb switch, and 6 ft. rubber covered cord with unbreakable plug. \$14.95 List Price
No. 117 Bench Grinder is also available for 220 v. 50 or 60 cycle AC operation. \$16.45 List Price
Weight 7 lbs. Shipping weight 7 1/2 lbs. Shipped in standard cartons of 4, shipping weight 32 lbs. \$14.95
- ✓ **No. 128 1/2 H.P. Bench Grinder**—This new SpeedWay Electric Bench Grinder is sensational not only in appearance but in its capacity, power, convenience, features, performance and price. It has industrial size (6" x 3 1/2") grinding wheels, and operates at 3,500 R.P.M. 110-120 v. AC 1/2 H.P. 2-pole shaded pole motor. Its unique tool rests are not only fully adjustable to compensate for wheel wear but have built-in side guides of pre-set angles that simplify proper grinding of tools. Over-all cast aluminum housing. Self-aligning impregnated bearings, 6 ft. S-J 3-conductor lead cord with ground. Underwriter Approved. Built-in switch, rubber feet. \$29.95 List Price
Weight 25 lbs., shipping weight 28 lbs. Shipped in standard cartons of 3, shipping weight 84 lbs. \$29.95

SPECIAL MANUFACTURERS' SERVICE

We provide an extensive manufacturing service on contract basis, comprising Engraving, Machining, Stamping, Drilling, Finishing, Etching and Assembling; Screw Machine Work, in any material of metal or plastic composition.

SPECIAL SIZE TERMINAL STRIPS, TEST PRODS AND PLASTIC INSULATED PARTS MADE TO SPECIFICATIONS. . . SEND US PRINTS FOR QUOTATIONS.

ICA INSULINE RADIO PRODUCTS

ICA ETCHED DIAL PLATES

RECTANGULAR TYPES

Made of brass finished in black with etched silver markings. Calibrated for 300 degree rotation. Marked 0 to 10. Will fit on 3/4" bushing. Size 2 1/4" x 1-11/16".

No.	Marking	List
2244	Record	\$.30
2245	Microphone	\$.30
2246	Gain	\$.30
2247	Tone	\$.30
2248	Plain (Calibrated but not worded)	\$.30

ICA INDICATING PLATES

Made of heavy brass with black satin background. Silver "Etcho Gravure" numerals and lettering. 1/2" center mounting hole. 1 1/8" Diameter.

No.	Marking	Degrees	List
2259	Marked 1 to 6	180	\$.35

1549—3" x 3 1/2" High	.75

ICA HI-POWER SWITCH

Push Button Type

Designed to break primary circuit when rack door is open. D.P.S.T. Made by H & H for ICA. Capacity 12 Amp. 125 Volt. Overall size 7 3/4" long, 3/4" wide, 3/4" high, 7/16" shank.

No. 1280 List \$2.25

ICA PUSH BUTTON SWITCH

Single pole 2 circuit momentary switch. One circuit is "ON"; other normally "OFF." One Amp., 125 Volt, made by H & H for ICA. Shank 5/8" long.

No. 1282 List \$9.50

ICA EXTRA HEAVY DUTY SWITCH

D.P.D.T. With Neutral Center

An extra large heavy duty, Double Pole, Double Throw Switch with neutral position in the center for use in heavy current circuits such as transmitters, power amplifiers, motors, etc. Contacts have fast "break" which reduces the tendency to arc. Rated at 10 Amps., 125 Volts. Size of switch case, 2 1/2" long, 1" high, 1 1/4" wide. Mounting sleeve diameter 3/4".

No. 1283 List \$5.50

'ON-OFF' PLATE

BAKELITE AND FENOLINE TUBING

ICA tubing is strong mechanically, has extremely low electrical absorption and is highly resistant to moisture. Absolute perfection in winding of coils is assured by the use of ICA tubing—thus affording relief from complaints or failure in performance.

Finished in Natural and Black Colors. Small sizes up to one inch in Black only. 1/4" Wall Thickness, Full Lengths. Approximately 36 to 48"

ICA INSULINE ICA

RADIO PRODUCTS

FILTERVOLT NOISE FILTER

An efficient filter for disturbances caused by electrical appliances. For use with any all-wave or broadcast receiver.

Rated conservatively at 250 watts for 32, 110 and 220 volt AC or DC circuits. Can be installed either at the radio or at the source of disturbance.

Contains heavy duty R.F. chokes, large filter capacitor, and has a "PI" Filter circuit arrangement.

No. 338 List \$7.50

ICA FILTERVOLT

Improves extremely noisy radio reception due to interruptions in power line caused by electrical appliances, lights, etc.

No. 394
List \$4.50

DUPLIX FILTERVOLT

Eliminates Radio Noises Caused By—

- Electric Shavers
- Refrigerators
- Fans • Elevators
- Motors, etc.

Unit is equipped with Dual outlet, both sides being altered for noise elimination. Packed 25 to a standard carton.

No. 90 List \$1.50

UNIVERSAL VOLTAGE REGULATOR

Voltage fluctuation often occurs not gradually but suddenly, thus bringing a tremendous strain on the tubes. This regulator protects tubes through scientific regulation of current fluctuations. Housing body and end rings are neatly constructed and of perforated japanned metal. For all Radio Sets, AC, DC.

No. 92 List \$1.50

ICA 3-IN-1 RADIO TUNER

Functions as either an Antenna Tuner, Wave Trap, or Aerial Eliminator. Operates on any make or model radio set.

As an Antenna Tuner, it will improve the reception of a weak station. As a Wave Trap, it will separate interfering stations and improve selectivity. As an Aerial Eliminator, it makes unnecessary the outdoor aerial. Easily installed within a few minutes.

No. 95—Complete with instructions List \$1.00

ICA DELUXE SIGNA-TONE

AUDIO OSCILLATOR — CODE PRACTICE SET — KEYING MONITOR

The ICA Signatone is a perfected Audio Oscillator, having 3 different output frequencies and a continuously variable volume control. The Audio notes are similar to those of high quality commercial CW stations.

1. CODE PRACTICE SET—A number of phones and keys may be connected for intercommunication or for classroom or radio club instruction in code.

2. KEYING MONITOR—An invaluable aid in improving any ham's "fist". Will follow the "bug" at all speeds. No well-equipped station should be without this keying monitor.

No. 4300

No. 4301

3. MODULATION SIGNAL—The steady note of the Signatone is ideal for adjusting both the Modulator and modulated stages of your transmitter for a maximum modulation percentage of not over 100.

4. SIGNAL TRACER—By feeding the output of the Signatone into each stage of your modulator and listening to the output of that stage, defects and "bugs" can easily be located. Complete with tube and self-contained speaker, for 110 V AC-DC.

No. 4300—*Dealer Net Cost \$12.00
No. 4301—Classroom Model (No Speaker)—Dealer Net Cost 9.00

ICA EAR PHONES

Complete With Head Bands

Made of molded Bakelite and light-weight nickel-plated metal. 2000 ohms.

No. 23—Double Head Phone List \$4.50

EAR CUSHIONS

Made of soft rubber. Ideal for the amateur wireless operator, etc. Used by all leading air lines.

No. 195 List \$1.10 pr.

DOUBLE PHONE CORDS

No. 192—Tips on both ends List \$.95
193—Spades on one end, tips on other 95

ICA TENNA-SCOPE LOOP

For Midgets or Portables

Eliminates necessity of outdoor or indoor antenna. Replaces the antenna coil in portable or midget sets. Easily assembled.

No. 4385 List \$1.25

ICA TENNA-SCOPE

A new style built-in tuned radio antenna. Easily connected. Eliminates use of outside aerial and ground. Features: Better selectivity — Higher signal to noise ratio — Easily connected, no soldering.

No. 4380 List \$3.00

LINGUAPHONE MORSE CODE RECORDS

Learn the International Morse Code Quickly, Easily — Uses EYE - EAR Method. The Complete Linguaphone Code Equipment consists of 5 Double-faced, electrically transcribed records in durable album. Contents: 3 Tables, 10 Lessons.

No. 1800—Complete Dealer Net \$9.00

ICA "TRIPLEX"

Radio & Telegraph Code Practice Set
Blinker Light
Radio Signal—Telegraph

No. 70 List

70—Single Unit (less batteries) \$3.25

71—Double Unit (50 ft. wire) 6.85

ICA RECORD-PLAYER SWITCH

Replacement for RCA Switch 9824A

Recommended for quickly connecting Record Players, F.M. attachments, Television attachments, Microphones and similar devices into the audio amplifier of existing radio receivers.

No. 1740 List \$2.25

RESISTOR CORDS

A series of replacement resistor cords for practically all AC-DC requirements.

TELEVISION ACCESSORIES

CARBIDE TIPPED MASONRY DRILLS

These drills are carbide tipped and have a spiral fluted body. It penetrates freely and easily, giving clean accurate holes. Individually packed complete with operating instructions.

No.	Size	Each
1234	1/4"	\$3.75
1236	3/8"	4.75
1235	1/2"	6.00

LAG SCREEN EXPANSION SHIELD

This expansion shield is extensively used in television antenna installations. Made of a special alloy — 100% rust proof. Newly designed threads hold greater load and external corrugations (ribs) give additional strength on masonry. This shield is 1" long x 1/2" O.D. and takes our standard 1/4" x 1 1/4" lag screw.

No. 1230 \$18.00 per C

STUD ANCHORS

Stud Anchor consists of Cone-Headed Bolt, Lead Alloy Sleeve-Metal Cone and Square Nut completely assembled as above.

The bolt has two fins on its tapered section to lock into lead sleeve after the anchor has been set. This prevents the bolt from turning when the square nut is tightened. Fits into a 1/2" hole and is 2" long overall. Instructions for installation: Drill hole proper diameter and depth — place Star Stud in anchor into hole, head of the bolt first — remove the square nut — place setting tool or piece of pipe over bolt and hammer anchor solidly.

No. 1232 \$18.00 per C

DRIVE IN EXPANSION SHIELD

This is an expansion shield which uses nails as an expansion on locking pin. Drill 1/4" hole in the masonry and pass shield through mounting hole of object being attached so that top flange remains above fixtures. The nail, under the hammer blow, forces the lead into all the irregularities of the masonry

hole, then passes through and locks anchor flange of bottom under the lead. The length of the shield is 1 1/2".

No. 1233 \$15.00 per C

LEAD ANCHORS FOR WOOD SCREWS

This is a new design anchor which gives greater holding power; requiring a smaller installation hole for the corresponding size screws. It takes more sizes of screws grouped in a more convenient series than other designs. It also has a larger range of holding power through various sizes of hole diameters. These anchors are 1/8" O.D., take a 10-12-14 wood screw and are forced into a 1/8" or 1/4" hole.

No. 1231 1" long \$ 7.00 per C
 No. 1239 1 1/2" long 10.00 per C

PIPE STRAPS

These pipe straps are made of galvanized iron and are available in two sizes to fit over 1" and 1 1/2" pipes.

No.	Size	Per C
1211	1"	\$ 8.00
1212	1 1/2"	14.00

SCREW EYE

This screw eye has a special low-loss polyethylene insert and is specially designed for use in 300-ohm line television installations.

No. 1210	3 1/2"	\$11.00 per C
No. 1240	7 1/2"	15.00 per C

LAG BOLT

No. 1213 1/4" x 1 1/4" \$6.00 per C

MIDGET TURNBUCKLES

1220	3/8"	7 1/2"	10 1/2"	.75

SOLDERLESS TERMINAL LUGS

These lugs are easily applied and do not require the use of any special tool. They are designed to give a trim appearance to an otherwise unsightly wire connection.

They fold neatly over the stranding and confine it directly under binding screw or nut and automatically insure greatest possible contact.

The cushion-like construction of these lugs, when closed, permits binding nut or screw to sink into the soft copper and so serves the purpose of a lock nut and is therefore vibration proof. Packed 100 per box.

No.	Wire Size	Type	Length	Per C
1459	18 to 14	Double Cup	1 1/16"	\$3.50
1460	18 to 10	" "	1 3/16"	3.75

SMITH

Electronic Components
HERMAN H. SMITH, INC.

BAKELITE FLAT PULL CAP

Approved and listed with U. L. This handy unit consists of two halves of bakelite held together by a screw and nut. The prongs are of heavy brass and have screw terminals for connecting wire leads. Attractively designed for visible use and with an "easy-grip" shape to facilitate insertion and removal from any receptacle. Colors: brown and ivory.

No.	Color	Per C
854	Brown	\$17.00
855	Ivory	21.00

BAKELITE PONY CAP

Bakelite Pony Cap with Brass Prongs.

No.	Color	Per C
858	Brown	\$13.00
859	Ivory	17.00

ATTACHMENT PLUG BASE

A snug-fitting, sturdy, bakelite base designed for use with standard attachment plug caps. Has slot finding features on its face and heavy spring contacts for positive and lasting electrical contact. 660 watts — 250 volts.

No. 857 \$17.00 per C

AMERICAN-FOREIGN PLUG ADAPTER

British Type

Streamlined bakelite plug adapter, which adapts from American to foreign type plugs. The plugs will fit snugly into the adapter. Prongs are made of brass and are of the BRITISH TYPE spacing.

No. 856 \$30.00 per C

RUBBER FEET BUMPER

Rubber Bumper— $\frac{5}{8}$ " diameter x $\frac{3}{16}$ " thick. Recessed to accommodate a self-tapping screw, machine screw, wood screw or a tack.

No. 2184 \$4.00 per C

Insert Rubber Bumper—O.D. of shoulder $\frac{1}{2}$ " x $\frac{3}{16}$ " thick. Insert $\frac{1}{8}$ " long tapered from $\frac{1}{8}$ " to $\frac{1}{4}$ ".

No. 2183 \$3.00 per C

FELT FEET

Available in two types, either with a 6-32 x $\frac{3}{8}$ " machine screw or with an "Anchor Fast" nail, which will stay in place, and will not back up, pull out, or "pop."

No.	Type	Per C
2181	With Machine Screw	\$6.50
2182	With Stronghold Nail	7.00

TERMINAL BOARDS

Screw Type

Brass hot tinned lugs mounted on $\frac{1}{16}$ " bakelite. Lugs are spaced $\frac{1}{16}$ " center to center.

No.	Terminals	Mounting Center	Per C
872	2	1 $\frac{5}{16}$ "	\$10.00
873	3	1 $\frac{3}{4}$ "	15.00
874	4	2 $\frac{1}{16}$ "	25.00
875	5	2 $\frac{5}{8}$ "	30.00
876	6	3 $\frac{1}{16}$ "	35.00
877	7	3 $\frac{1}{2}$ "	40.00

PHONO TIP JACK

Brass nickel plated jacks with positive contact springs mounted on $\frac{1}{16}$ " bakelite. Jacks are $\frac{1}{16}$ " center to center. Jacks will accommodate standard phone tips of either solderless or solder types.

No. 878 \$20.00 per C

CLOSED CIRCUIT CHASSIS CONNECTOR

Same as No. 117 Connector except that circuit closes when female microphone connector (our No. 116) is removed. Supplied complete with washers, soldering lug and nut.

No. 114 \$0.40 each

INSULATED SPADE LUG

Insulated sleeve $\frac{3}{8}$ " diameter, $\frac{3}{4}$ " long and available in Black and Red colors. The barrel of the insulated sleeve will accommodate all standard type banana plugs.

No.	Type	Per C
218	Insulated Lug	\$15.00
129	Lug only	2.00

MINI-MAX CONNECTING STRIP

This fastening connecting strip is spaced so that it will snap into all 67 $\frac{1}{2}$ -volt mini-max "B" batteries such as Eveready Nos. 455, 466 and Burgess Nos. XX30, XX45.

No. 1205 \$25.00 per C

LEAD-IN ADAPTER

Lead-in adapter converts Motorola pin plug to Delco type plug.

No. 1204 \$11.00 per C

MOTOROLA SHIELDED JACK

Shielded Jack for Automobile Chassis which takes standard Motorola Plug.

No. 1207 \$18.00 per C

H AND H TOGGLE SWITCHES

Rated 1 Amp. 250 Volts, 3 Amps. 125 Volts. Switches are nickel plated and supplied with mounting nut.

No.	Type	Shaft	Each
500	S P S T	1 5/32"	\$0.60

576	4PDT	13.25

MOLDED BAKELITE SWITCHES

Made by H & H, rated at 3 amps 250 volts, 6 amps 125 volts. Bat Lever type with silver plated contacts. 15/32" slotted sleeve.

No.	Type	Shaft	Each
520	S.P.S.T.	15/32"	\$1.05
521	S.P.D.T.	15/32"	1.20
522	D.P.S.T.	15/32"	1.40
523	D.P.D.T.	15/32"	1.70

PUSH BUTTON MOMENTARY SWITCH

Two circuit slow make and break Momentary Switch made by H & H. Solder lug, one circuit normally "ON", one circuit normally "OFF". 5/8" slotted sleeve, rated at 75 watts, 125 volts.

No. 580.....\$1.05 each
Casein buttons in black and red colors can be obtained for the above switch.

ANTENNA CONNECTOR

For use as connection of auto radio antenna lead-in to auto radio receiver.

No. 1300.....\$10.00 per C

FUSE RETAINER

Recommended for use in auto radio power supply cables.

No. 1301.....\$14.00 per C

Parts for Connector and Retainer

No.	Item	Per C
1305	Male Cap for No. 1300 and No. 1301	\$1.50
1306	Female Shell for No. 1300	1.50
1307	Contact for No. 1300 and No. 1301	2.00
1308	Spring for No. 1300 and No. 1301	.50
1309	Washer for No. 1300 and No. 1301	.40
1310	Insulating Tube for No. 1301	.60
1311	Female Shell for No. 1301	2.50

JUMBO FUSE HOLDER

This Jumbo Fuse Holder is 2" long, 1/2" diameter and is for use with Philco and Motorola auto receivers. All parts comprising bushings, springs, contacts, etc., are furnished unassembled, packed in individual envelopes.

No. 1302.....Each \$0.25

HEAVY DUTY BAKELITE BARRIER TERMINAL STRIPS

This latest type of construction of bakelite strip is made of molded bakelite of very high tensile strength. The barriers between each terminal prevent any possibility of short circuits and leakage between terminals. The terminals and screws are brass, nickel plated. These strips are manufactured by the KULKA ELECTRIC MFG. CO. INC., Design Patent No. 136,762 and are exclusively distributed by us to the Radio Parts Distributors.

All the Barrier Terminal Strips enumerated in the columns below for the 1500, 1600 and 1700 series are made with screw type terminals exactly as the illustration at top of page.

All the Barrier Strips enumerated in the columns below for the 1500, 1600 and 1700 series are supplied with the two solder connection lug illustrated above.

All the Barrier Strips enumerated in the columns below for the 1500, 1600 and 1700 series are supplied with the one solder connection lug illustrated above.

All the Barrier Strips enumerated in the columns below for the 1500, 1600 and 1700 series are supplied with the bottom type connection lug illustrated above.

No. 1500 Series

Height 13/32", Width 7/8", Thickness 1/4". Terminals are 3/8" on centers. Screws 5-40x1/4" long Binding Head.

PANEL INDICATOR 1/2 INCH JEWEL

These panel indicator assemblies are available in the candelabra, miniature screw, or bayonet base type sockets. Jewel holder is made of brass, nickel plated. Jewel mounts in a single $\frac{1}{16}$ " dia. hole. Candelabra and bayonet base types can also be secured with a universal adjustable bracket for use where more accurate focus of the jewel to lamp filament is required. Facetted jewel available in red, green, amber, blue, opal and clear colors.

No.	Type	Each
1900	Miniature Screw Socket	\$0.35
1901	Candelabra 110 Volt	.35
1902	Candelabra 110 Volt with Universal Bracket	.40
1903	Bayonet Base	.40
1904	Bayonet Base with Universal Bracket	.45

PANEL INDICATOR 3/4 INCH JEWEL

Available with candelabra 110 volt, miniature bayonet base, and miniature screw type sockets. Jewel holder is made of brass nickel plated. Jewel mounts in a single $\frac{1}{16}$ " dia. hole. Facetted jewels available in red, green, amber, blue, opal and clear colors.

No.	Type	Each
1905	Min. screw socket	\$0.75
1906	Min. bayonet base	.75
1907	Candelabra socket	.75

PANEL INDICATOR 3/8 INCH JEWEL

Available with miniature screw type socket, min. bayonet base, or candelabra type sockets. Jewel holder made of brass nickel plated. Jewel mounts in a single $\frac{1}{16}$ " dia. hole. Facetted jewels available in red, green, amber,

blue, opal and clear colors.

No.	Type	Each
1908	Min. screw socket	\$0.40
1909	Min. bayonet base	.40
1910	Candelabra socket	.40

1 INCH OPEN TYPE PANEL INDICATOR

Jewel Removable from Front of Panel

This type of panel indicator has the added feature of being able to remove the bulb from the front of the panel. Jewel holder made of brass, chromium plated finish. Jewel mounts in a single 1" dia. hole. The embossed rib in the center of the bracket

supplies additional strength assuring perfect alignment. Available in three types: Miniature screw socket, Miniature bayonet socket and Candelabra type socket. Facetted jewels available in the following colors: red, green, amber, blue, opal, clear.

No.	Type	Each
1917	Min. screw socket	\$1.45
1918	Min. bayonet base	1.50
1919	Candelabra	1.50

1/2 INCH OPEN TYPE PANEL INDICATOR

Jewel Removable from Front of Panel

Jewel holder made of brass, nickel plated. Mounts in a single $\frac{1}{16}$ " dia. hole. The embossed rib in the center of the bracket gives additional strength and assures perfect alignment. The bulb is easily removable from the front

of the panel. Available with Miniature screw type or Miniature bayonet base type sockets, with facetted jewels in the following colors: red, green, amber, blue, opal, clear.

No.	Type	Each
1920	Min. screw socket	\$0.65
1921	Min. bayonet base socket	.65

GLASS JEWELS

1/2 INCH JEWEL WITH MOUNTING NUT

Jewel holder made of brass nickel plated. Mounts in a single $\frac{7}{16}$ " dia. hole. Jewels are available in red, green, amber, blue, opal and clear colors in smooth or facetted types.

No.	Type	Each
1911	Smooth	\$0.25
1912	Facetted	.25

3/4 INCH JEWEL

Jewel holder made of brass nickel plated. Mounts in a single $\frac{1}{16}$ " dia. hole. Jewels are available in red, green, amber, blue, opal and clear colors in smooth or facetted types.

No.	Type	Each
1913	Smooth	\$0.60
1914	Facetted	.60

1 INCH JEWEL

Jewel holder made of brass, dull white nickel finish. Mounts in a 1" dia. hole. Length of thread behind jewel holder $\frac{3}{16}$ ". Jewels are available in smooth or facetted types, in red, green, amber, blue, opal, white and clear colors.

No.	Type	Each
1915	Smooth	\$1.10
1916	Facetted	1.10

SMITH

Electronic Components
HERMAN H. SMITH, INC.

CLIP-ON TYPE PILOT LIGHT SOCKETS

This type of socket is available with the clip up or down, and can be used by clipping on to the variable condenser or the chassis. This design socket is made with the miniature

screw base, miniature bayonet base, or candelabra 110 volt types. All brackets are cadmium plated.

No.	Type	Per C
1922	Min. Screw Up Clip	\$13.00
1923	Min. Screw Down Clip	13.00
1924	Min. Bayonet Up Clip	15.00
1925	Min. Bayonet Down Clip	15.00
1926	Candelabra Up Clip	17.00
1927	Candelabra Down Clip	17.00

BRACKET TYPE PILOT LIGHT SOCKETS

Available with an up or down type of bracket for the miniature screw type, miniature bayonet base, and for the candelabra 110 volt type sockets. Brackets are made of steel, cadmium plated.

No.	Type	Per C
1928	Min. Screw Up Bracket	\$13.00
1929	Min. Screw Down Bracket	13.00
1930	Min. Bayonet Up Bracket	15.00
1931	Min. Bayonet Down Bracket	15.00
1932	Candelabra Up Bracket	17.00
1933	Candelabra Down Bracket	17.00

UNMOUNTED TYPE SOCKETS

These unmounted sockets can be secured for the miniature screw shell, miniature bayonet base or for the candelabra 110 volt types of sockets.

No.	Type	Per C
1934	Min. Screw Base	\$13.00
1935	Min. Bayonet Base	12.00
1936	Candelabra 110 volt	14.00

CLIP-IN SOCKET

This clip-in socket is of the bayonet base type construction, and is assembled with two solder lugs. The special clip in bracket is made of steel, cadmium plated, and is so designed that it clips into the dial directly.

No. 1938. \$14.00 per C

MICROPHONE CONNECTOR Single Contact Male

A completely shielded single contact connector. Made of brass and heavily chrome plated. Mate for No. 116 female connector.

No. 115 \$0.40 each

MICROPHONE CONNECTOR Single Contact Female

Mate for our No. 117 chassis connector. This connector is used extensively for making connections from microphone to amplifier. Comes equipped with coupling ring. All metal parts are made of brass, heavily chrome plated, except the spring.

No. 116 \$0.50 each

CHASSIS CONNECTOR Single Contact Male

This type connector is recommended for use on the chassis or in the microphone. Made of brass, heavily nickel plated. Threaded $\frac{3}{8}$ "-27, and mounts in a $\frac{3}{8}$ " hole. Supplied complete with washers, soldering lug and nut.

No. 117 \$0.30 each

CAP AND CHAIN

Made of brass, heavily nickel plated. The cap seals open end units against dust, eliminating noisy connections. Used with any threaded one or two conductor chassis unit.

No. 118 \$0.50 each

BAKELITE HANDLE PLUG Foreign Type

Moulded bakelite handle foreign type plug. Blades are made of brass, and of the Continental Type spacing.

No. 851. \$25.00 per C

AMERICAN - FOREIGN PLUG ADAPTER

Streamlined bakelite plug adapter, which adapts from American to foreign type plugs. The plugs will fit snugly into the adapter. The foreign type plugs are made of brass, and are of Continental Type spacing.

No. 852. \$30.00 per C

RUBBER ATTACHMENT—PLUG

Rubber handle attachment plug; Cord Hole $\frac{3}{8}$ " (.375). Rated at 15 Amps, 125 Volts. Blades are made of Brass.

No. 850. \$15.00 per C

BANANA TYPE PLUG

This plug is hexed brass, nickel plated. The spring is made of phosphor bronze assuring positive and lasting contact. Plug is constructed with a 6-32 female thread inside and is supplied with a 6-32 screw and soldering lug.

No. 100 \$12.00 per C

SPLIT TYPE BANANA PLUG

Made of hexed brass, heavily nickel plated overall. Will fit all standard banana type jacks. Overall length 1 1/4". Threaded portion 6-32 x 1/2" long. Supplied with two 6-32 hexagon nuts.

No. 104 12.00 per C

BANANA TYPE PLUG

Spring Type

Plug and spring are made of brass, nickel plated. The spring type of construction assures positive and lasting contact. Plug is threaded 6-32 and the threaded portion is 1/2" long. Supplied with two 6-32 hexagon nuts.

No. 103 \$12.00 per C

MIDGET PLUGS AND JACKS

Banana Type

Midget banana type plugs and jacks, for use where a minimum amount of space is available. Both plugs and jacks made of brass, nickel plated. A hexagon nut is provided with each plug and jack.

No.	Item	Per C
111	Plug	\$9.00
112	Jack	9.00

PHONE TIP JACK

Will accommodate all standard phone tip plugs of insulated and non-insulated types. Made of brass, nickel plated. Mounts in a 1/4" dia. hole in panels up to 3/8" thick, and is supplied with hexagon nut.

No. 107 \$10.00 per C

BANANA PLUG JACK

Recommended as the mate for the No. 100 Banana type plug, but will accommodate all standard banana type plugs. Jack is made of brass, heavily nickel plated overall. Mounts in a 1/4" hole and will fit in panels up to 1/8" thick. Jack is furnished with 1/4-32 nut and soldering lug.

No. 101 \$12.00 per C

BANANA PLUG JACK

Will accommodate all standard banana type plugs and specially recommended as the mate for Nos. 103 and 104 banana plugs. Made of brass nickel plated, and mounts in 1/4" hole in panels up to 3/8" thick. Supplied with nut and soldering lug.

No. 109 \$10.00 per C

MIDGET PHONE JACK

Signal Corps type J 670—Single open circuit midget phone jack. Mounts in 3/8" hole in panels up to 1/4" thick. Bushing is brass, nickel plated. Springs made of phosphor bronze, and the springs are insulated from the frame by heavy duty bakelite washers.

No. 122 \$35.00 per C

ALLIGATOR CLIP

Clips are made so that the jaws match accurately, permitting them to grip all sizes wire securely. The barrel of clip will accommodate all standard banana type plugs. Made of steel, cadmium plated. Overall length 2".

No. 300 \$10.00 per C

METAL BINDING POST

Made of brass, heavily nickel plated overall. Supplied complete with screw and lockwasher.

No. 110
\$25.00 per C

SOLDERLESS PHONE TIPS

These tips are constructed so that the wire fits through the body of the tip, and is wrapped around the screw portion, and tightened with the knurled nut provided, making soldering unnecessary.

No.	Length	Per C
105	1 5/8"	\$10.00
106	1 1/4"	10.00

SOLDER TYPE PHONE TIPS

Made of brass, nickel plated. Overall length 1". Dia. of tip will fit all standard phone tip jacks.

No. 108 \$20.00 per M

LARGE DIAMETER PHONE TIP

Material of Brass and Nickel-plated finish. The barrel is drilled extra large to accommodate heavy wire. Diameter hole 1/4"—length of barrel 1/2" and overall length 1".

No. 123 \$30.00 per M

THREADED PHONE TIPS

Available in either the Solderless Phone Tip type, or the Phono Needle Point type. The chuck is threaded 1/4 - 32.

No.	Type	Per C
124	Solderless tip	\$15.00
128	Needle Point	15.00

INSULATED BINDING POSTS

Insulated head posts available in 3/8" and 1/2" diameter in Black and Red colors. Each binding post complete with screw and lockwasher.

No.	Head Dia.	Per C
207	3/8"	\$15.00
208	1/2"	15.00

BINDING POST HEADS

The insulated heads are knurled and are the same as used on our Nos. 207-208 Binding Post. Knurled insulated head is threaded, eliminating the necessity for using a brass bushing. Available in Black and Red colors. Specify colors.

No.	Head Dia.	Per C
209	3/8"	\$6.50
210	1/2"	7.00

INSULATED PHONE TIP JACK

Will accommodate all standard phone tip plugs, of the insulated and non insulated types. Recommended for use with our Nos. 200 and 201 phone tip plugs. Insulated head $\frac{3}{8}$ " dia. available in Black and Red colors. Mounts in a $\frac{1}{4}$ " hole. Supplied complete with insulating shoulder washer and nut. Specify color.

No. 202 \$15.00 per C

INSULATED BANANA JACK

Will accommodate all standard banana type plugs. Mounts in a $\frac{1}{4}$ " hole in panels up to $\frac{3}{8}$ " thick. Insulated head $\frac{3}{8}$ " dia. available in Black and Red colors. Supplied complete with insulated shoulder washer, soldering lug, and nut. Specify color.

No. 205 \$15.00 per C

INSTRUMENT BANANA JACK

Made of brass nickel plated. Jack receptacle is countersunk and will accept all standard Banana type plugs for a snug and positive contact. Insulated head is $\frac{1}{2}$ " diameter and supplied complete with insulating washer, lock washer, heavy duty soldering lug and nut. Available in Black, Red, Yellow and Green. Specify color.

No. 219 \$19.00 per C

INSULATED COMBINATION JACK

This combination jack will accommodate all standard plugs, of the phone tip type or banana type construction. Mounts in a $\frac{1}{4}$ " hole in panels up to $\frac{1}{2}$ " thick. Overall length $1\frac{3}{8}$ ". Supplied complete with insulating shoulder washer and nut. Insulated head available in Black and Red colors. Specify color.

No. 206 \$20.00 per C

INSULATED SOLDERLESS BANANA PLUGS

Spring type construction, and will fit all standard banana jacks. Tapped hole is provided in rear of plug and small screw machine stud is provided so that wire can be wrapped around and tightened without the need of soldering. Insulated handle is $\frac{3}{4}$ " long and available in Black, Red, Yellow and Green colors. Specify color.

No. 211 \$20.00 per C

This plug constructed the same as No. 211 described above, but the plug portion is made of hexagon brass. Plug is also supplied with screw machine stud. Insulated handle 1" long and available in Black, Red, Yellow and Green colors. Specify color.

No. 212 \$25.00 per C

INSULATED SOLDERLESS PHONE TIP PLUGS

Insulated sleeve $\frac{3}{4}$ " long, and available in Black and Red colors. Will fit all standard phone tip jacks and specially recommended for use with our No. 202 insulated jack. The wire fits through the sleeve of plug, and is wrapped around the screw portion, and then tightened with the knurled nut provided, making soldering unnecessary. Specify color.

No.	Type	Per C
200	Plug with No. 105 Tip	\$18.00
201	Plug with No. 106 Tip	17.00

INSULATED PHONE TIP PLUG

Insulated sleeve $\frac{3}{4}$ " long, available in black and red colors. The phone tip will plug into all standard phone tip jacks, and the insulated sleeve is so designed to accommodate all standard banana type plugs.

No. 215 \$15.00 per C

Phone tip only—less insulated sleeve.

No. 125 \$8.00 per C

INSULATED PHONO NEEDLE TIP PLUG

Insulated sleeve $\frac{3}{4}$ " long, available in black and red colors. The body of the plug will accommodate all standard banana type plugs. The sharp needle point phone tip will pierce through corrosion for positive contact.

No. 216 \$20.00 per C

Needle tip only—less insulated sleeve.

No. 217 \$12.00 per C

INSULATED SHORT PHONE TIP

Will fit all standard phone tip jacks of the insulated or non-insulated types. Insulated sleeve $\frac{3}{4}$ " long, and available in Black and Red colors. Specify color.

No. 203 \$15.00 per C

INSULATED BANANA PLUG Spring Type

Will fit all standard banana type jacks. A set screw is provided in the side of the plug to secure the wire to the plug without soldering. Insulated sleeve $\frac{7}{8}$ " long available in Black, Red, Yellow and Green colors. Overall length $1\frac{5}{8}$ ". Specify color.

No. 204 \$20.00 per C

INSULATED BANANA PLUG Split Type

The banana plug is of the split type construction. Insulated handle $\frac{7}{8}$ " long. A set screw is provided in the side of the plug, to secure the wire to the plug without soldering. Available in Black, Red, Yellow and Green colors. Specify color.

No. 213 \$20.00 per C

INSULATED ALLIGATOR CLIP

Embodies our No. 300 Alligator Clip. Insulated handle $\frac{3}{4}$ " long and will accommodate all standard banana type plugs. Insulated handle available in Black and Red colors. Specify color required.

No. 301.....\$20.00 per C

ALLIGATOR CLIP PHONE TIP JACK

Insulated phone tip jack with No. 300 alligator clip. The jack portion will accommodate all standard phone tip plugs. Insulated handle 1" long available in Black and Red colors. Overall length 2 $\frac{3}{8}$ ". Specify color.

No. 304.....\$45.00 per C

ALLIGATOR CLIP COMBINATION JACK

The insulated jack portion will accommodate all standard phone tip or banana type plugs. Insulated handle 1 $\frac{1}{4}$ " long available in Black and Red colors. Overall length 2 $\frac{1}{2}$ ". Specify color.

No. 305.....\$50.00 per C

BANANA PLUG AND PHONE TIP JACK COMBINATION

Insulated banana type plug of the spring type construction will fit all standard banana type jacks, and the top of the insulated sleeve of the plug will accommodate all standard phone tips. Insulated handle 1" long. Available in Black and Red colors. Specify color

No. 214.....\$45.00 per C

SOLDERLESS TEST PROD HANDLES

Insulated handles, available in Black and Red colors. The wire is fed through the insulated handle, and is wrapped around the screw portion of the plug, and then tightened with the knurled nut provided, making soldering unnecessary. Specify color.

No.	Overall length	Each
302	5 $\frac{1}{4}$ "	\$0.40
303	6 $\frac{3}{4}$ "	.50

PHONO NEEDLE TEST PROD HANDLES

Insulated handles available in Black and Red colors. Wires can be assembled to the metal chuck by unscrewing the chuck from the prod handle. Specify color.

No.	Overall length	Each
317	5"	\$0.40
318	6 $\frac{3}{8}$ "	.50

TEST LEADS WITH SOLDERLESS TIPS

Fibre handles colored red and black 4" long x $\frac{3}{8}$ " diameter. Flexible rubber covered wire leads 50" long also colored red and black. Available with standard phone tips, spade lugs or alligator clips.

No.	Type	per Pr.
600	Phone tips	\$1.10
601	Spade lugs	1.10
602	Alligator clips	1.25

PHONO NEEDLE TEST LEADS

Fibre handles colored Red and Black, 4" long x $\frac{3}{8}$ " diameter. Tips are very sharp phonograph needles. Flexible rubber covered wires 50" long also colored red and black. Available with standard phone tips, spade lugs, or alligator clips

No.	Type	per Pr.
613	Phone tips	\$1.10
614	Spade lugs	1.10
615	Alligator clips	1.25

ALL SOLDERLESS TEST LEADS

The insulated handles and the insulated plugs are both of the solderless type construction. Insulated handles Red and Black are our Nos. 302, and the plugs are our No. 200. Flexible rubber covered leads 50" long.

No. 603.....\$1.65 per pair

ALLIGATOR CLIP TEST LEADS

Made of very flexible Red and Black wire with alligator clips at each end.

No.	Wire length	per Pr.
604	12"	\$0.75
605	24"	.85
606	36"	.95
607	48"	1.05

HEAVY DUTY TEST LEADS

Heavy duty fibre handles $\frac{1}{2}$ " O.D. x 5 $\frac{3}{8}$ " long, with fibre guard between handle and metal tip to prevent any possibility of shocks. Flexible wire leads 50" long, colored Red and Black. Test leads are available with standard phone tip, spade lugs or alligator clips.

No.	Type	per Pr.
620	Phone tips	\$2.25
621	Spade lugs	2.25
622	Alligator clips	2.50

FIBRE TEST PROD HANDLES

Handles are made of fibre and can be obtained with either solderless tips or phono needle tips. Constructed same as our numbers 302 and 317. Handles available in Black and Red colors. Specify color.

No.	Type	Length	Each
323	Solderless tip	5 $\frac{1}{4}$ "	\$0.30
324	Needle Point	5 $\frac{1}{8}$ "	.30

SMITH

Electronic Components
HERMAN H. SMITH, INC.

NEUTRALIZING AND ALIGNMENT TOOL

A complete, fully insulated neutralizing tool, screw driver and wrench combination. The fibre wrench portion has a $\frac{1}{4}$ " hexed socket on one end and a $\frac{5}{16}$ " hexed socket on the other end. A $\frac{1}{4}$ " metal screw driver nib on the inside portion of the tool fits into the fibre tube itself.

No. 320.....\$0.85 each
No. 700—Display of 12 No. 320 tools.....10.20 each

ALIGNMENT SCREW DRIVER

Fibre handle $\frac{3}{8}$ " dia. x 6" long, and fitted with a screw driver nib for aligning of coils, padding condensers, etc.

No. 321.....\$3.40 each
No. 776—Display of 24 No. 321 Drivers..... 9.60 each

ALIGNMENT TOOL FOR PUSH-BUTTON RECEIVERS

This tool is especially designed for aligning push-button receivers and for adjusting iron core I.F. transformers and R.F. coils. There is a recessed screw driver nib on one end and a screw driver blade on the other end. Both ends knurled for easy grip.

No. 325.....\$0.75 each
No. 777—Display of 24 No. 325 Tools.....13.00 each

FIBRE ALIGNMENT SCREW DRIVERS

Made of bone hard fibre and supplied in two sizes.

No.	Screw driver	Length	Each
307	7/32"	7"	\$0.40
308	5/16"	6"	.50
701—Display of 24 No. 307 Drivers..... 9.00			
702—Display of 18 No. 308 Drivers..... 9.00			

HEXED FIBRE TUBES

Made of bone hard fibre, and constructed so that if the hex wears out, it can be cut off and the balance of the tube can be used.

No.	Each	Size	No.	Each
309	\$0.20	6"	313	\$0.30
310	.35	8"	314	.35
311	.45	10"	315	.45
312	.50	12"	316	.50

GRID CAP SHIELD

Shield is slotted on the side, for passage of the grid lead wire. The shield fits snugly over the grid cap of the tube, completely shielding same. Shield is cadmium plated finish.

No. 527.....\$10.00 per C

BRASS AND INSULATED COUPLINGS

These couplings are drilled through to accommodate $\frac{1}{4}$ " shafts. Available in both brass and insulated material. Overall length $\frac{3}{4}$ ", O.D. 7/16". Set screws are provided in coupling for tightening to shaft.

No.	Type	Each
120	Brass	\$0.20
140	Insulated	.20

BRASS AND INSULATED EXTENDERS

Extra long extenders suitable for use on amplifiers, television receivers, radio receivers or wherever a $\frac{1}{4}$ " shaft extender is required.

No.	Type	Shaft Length	Overall Length	Each
130	Insulated	1 $\frac{1}{8}$ "	1 $\frac{3}{4}$ "	\$0.30
150	Brass	1 $\frac{1}{8}$ "	1 $\frac{3}{4}$ "	.30

BRASS AND INSULATED RODS

These rods are available in both brass and insulated material.

No.	Type	Length	Dia.	Each
1404	Brass	6"	$\frac{1}{4}$ "	\$0.20
1405	Brass	12"	$\frac{1}{4}$ "	.40
1406	Insulated	6"	$\frac{1}{4}$ "	.20
1407	Insulated	12"	$\frac{1}{4}$ "	.40

We are also in a position to supply brass and insulated rods of various diameters and will gladly quote upon receipt of inquiry.

THREADED BRASS RODS

Rods ordinarily supplied in 2 foot lengths; if one foot length is required, please specify.

No.	Size	Per Foot
1400	6-32	\$0.30
1401	8-32	.30
1402	10-32	.40
1403	$\frac{1}{4}$ "-20	.45

BEARING FOR PANEL ASSEMBLY

Made of brass, and fits in $\frac{3}{8}$ " diameter hole in panels up to $\frac{1}{4}$ " thick. Bearing is made to accommodate $\frac{1}{4}$ " shafts.

No. 119.....\$0.20 each

PANEL BEARING ASSEMBLY

This panel bearing is accurately machined and is specially recommended for use as dial drives, or for mounting volume controls, switches, etc. Overall length 1 $\frac{1}{8}$ ". Supplied with nut. Drive Shaft $\frac{1}{4}$ " O.D.

No. 126.....\$25.00 per C

STEEL SPADE BOLTS

Steel cadmium plated finish, threaded 6-32, thread length $\frac{5}{8}$ ", length overall $\frac{3}{4}$ ".

No. 1500.....\$8.45 per M

MINI-SHIELDS

The Perfect Shield For Mini-Tubes

These new Mini-Shields are formed to fit snugly and yet expand to a constant snug fit on larger tubes to automatically compensate for the considerable variation in physical dimensions of miniature tubes as commercially produced.

Special shaped serrations spaced to engage the lower mini-shield ribs catch and hold the shield firmly which actually tightens against vibrations or other forces tending to jiggle the tube loose.

These shields are made so that three rows of dimples pressing against the tube provide a gentle but firm snug fit. The three prong spring base clip grips the shield positively, cradling the tube within the shield and retaining it firmly in the socket secure against vibration. These Mini-Shields are available in two sizes to accommodate tubes 1 1/2" long and 2" long.

No.	Type	Overall length	Per C
550	for 2" tube	1 3/4"	\$12.00
551	for 1 1/2" tube	1 1/4"	10.00

MINI-SPRING FOR MINI-TUBES

For Tables Radios • Electronic Equipment Radio Receivers

The Mini-Tube guard gives support to the Mini-Tube in two ways. It maintains a direct axial pressure downwards plus a sideways support that keeps the tube upright and perpendicular to the chassis. The spring action is constant and resilient permanently. If your radio equipment has an inclined chassis . . . or the tubes are mounted upside down or horizontal . . . or if it is subject to any vibration . . . or if your demand is constantly superior trouble-free reception, Mini-Tube

guards are the one way to insure that tubes stay in place forever.

No.	Type	Per C
560	Short	\$12.00
561	Medium	12.00
562	Long	12.00
563	9 Prong	12.00

FUSE MOUNTING BASES

Black bakelite, panel mount type. Will accommodate the 3 A G Auto type cartridge fuse.

No.	Type	Each
530	Single	\$0.20
531	Double	.30

FUSE CLIPS

Clips made of spring brass, nickel plated. Will accommodate the 3 A G Auto type cartridge fuse. Clips 1/4" wide x 3/8" high.

No. 532 \$1.75 per C

INSULATED BANANA PLUG

Set screw in side of barrel secures wire within plug without soldering. Full length center pin prevents spring from collapsing. Standard colors.

No.	Sleeve	Overall	Price Each
131	3/8"	1 5/8"	\$0.30
131A	1 1/2"	2 1/4"	.35

SPLIT TYPE BANANA PLUG

Designed to snugly fit a standard type banana jack. Spring action is positive and durable. Length 1-7/16". The plug is 1/2" long. Standard colors.

No. 331.....Price Each \$0.20

SOLDERLESS BANANA PLUGS

Made with three-pointed leaf spring; screw into insulated portion of plug. Overall length 1 7/8". All standard colors.

No. 207.....Price Each \$0.25

ARCHOITE-SOLDERLESS INSULATED BANANA PLUG

All external set screws are eliminated removing possibility of shocks or grounding. One piece phosphor bronze spring and full length center pin assure good contact and long life. ARCHOITE barrel is 3/4" long. 5/8" diameter. Standard colors.

No. 332.....Price Each \$0.20

INSULATED BANANA JACKS

Equipped with insulated shoulder washer, lug and a nut. Can be mounted in a 1/4" hole on a panel up to 3/8" in thickness. Standard colors.

No. 136.....Price Each \$0.15

BANANA PLUG OR TIP JACK

So constructed that either phone tip or banana plugs fit interchangeably. Cap of ARCHOITE insulation in standard colors. Mounts in a 1/4" diameter hole in panels up to 1/2" thick. With shoulder washer and nut. Overall length is 1 3/8".

No. 148.....Price Each \$0.20

INSULATED SOLDERLESS PHONE TIP PLUG

Fits all standard tip jacks including such units as our No. 137, 138 Insulated Jacks, and No. 143 Binding Posts. Overall length is 1 7/8". Sleeve is 3/4" long. All standard colors.

No.	Price Each
141\$3.15
14214

SOLDERLESS PHONE TIPS

So made that a wire fits through the body and is wrapped around the screw and tightened with the nut.

No.	Price per C
10-1 1/8" in length.....	\$9.00
9-1 1/4" in length.....	8.00

INSULATED PHONE TIP JACKS

Accommodates all standard phone tips. Phosphor bronze springs make positive contact and hold phone tip straight and secure. Insulating washer and nut. Standard colors.

No.	Head	Price Each
1866.....	3/8"\$0.14
138.....	7/16"15
1861.....	1/2"16

STREAMLINED PHONE TIP PLUG

The highly polished ARCHOITE handles are made to fit a standard non insulated or insulated phone tip jack. By inserting the wire in the hole and screwing the tip in securely, a solid, solderless connection is made. 1 3/8" long and 1/2" high.

No. 1855.....Price Each \$0.40

INSULATED BANANA PLUG JACK

For use with all our standard size Banana Plugs. The insulated head has a shoulder which extends into the mounting hole thus centering the jacks and preventing grounds. Mounts in 5/16" diameter hole. Can be used in panels up to 5/8" thick. Complete with second shoulder washer and nut. The overall length is 7/8". Available in all standard colors.

No. 336.....Price Each \$0.20

PHONE TIP JACKS

Specially designed springs within the body hold the phone tips straight and grip firmly at all times. Mounts in a 1/4" diameter hole in panels up to 3/8" thick.

No. 137.....Price per C \$9.00

BANANA TYPE PLUG JACK

Recommended for use with No. 1150 Banana Plug. Counter sunk to fit tapered portion of plug shank. Heavily nickel plated and furnished with nuts and soldering lug. Will fit panels up to 7/16" thick and mounts in 1/4" hole.

No. 1151.....Price per C \$12.00

BANANA TYPE PLUG

6/32" female thread and 6/32" screw and soldering lug. One piece phosphor bronze spring assures positive, long lasting contact. Full length center pin prevents plug from collapsing when misaligned with jack.

No. 1150.....Price per C \$12.00

BANANA TYPE PLUGS

Spring brass, nickel plated. Full length center pin prevents spring from collapsing. Supplied with two plated nuts.

No.	Thread	Price per C
120-6	32-1/2" long\$12.00
1764-6	32-1" long 16.50
122-8	32-1/2" long 12.00

FIBRE NEUTRALIZING TUBES

These tubes are made of specially treated hard fibre for durability. They are ideal for servicemen and production lines, for when the hexagon wears out it can be cut off and used again.

ALLIGATOR CLIP COMBINATION JACK

Embodies our No. 129 insulated alligator clip and No. 148 insulated phone tip jack. It is possible to insert any test prod equipped with phone tips, directly into Alligator Clip for temporary connection to any part or wire of radio receivers, public address systems, or electrical appliances, leaving the other test lead and both hands free to test any part of the circuit. Overall length 2 3/8". Length of insulated handle 1". All standard colors.

No. 338.....Price Each \$0.50

ALLIGATOR CLIP PHONE TIP JACK

Incorporates our No. 129 insulated alligator clip and No. 138 insulated phone tip jack. It is possible to insert any test prod, equipped with phone tips, directly into the Alligator Clip for a temporary connection to any part or wire of radio receivers, public address systems or electrical appliances, leaving the other test lead and both hands free to test any part of the circuit. Overall length 2 3/8". Insulated handle 1". All standard colors.

No. 337.....Price Each \$0.45

INSULATED ALLIGATOR CLIPS

No. 130 Clips are made so that the attached ARCHOITE handle will receive any male banana type plugs. No. 129 has a round ARCHOITE handle and is made for wire assembly. No. 152 Clip is similar to the No. 130 but larger.

No.	Handle	Overall	Price Each
129	1 1/4"	2 3/4"	\$0.22
130	3/4"	2 1/4"	.20
152	1 1/2"	3 1/4"	.25

ALLIGATOR CLIPS

For use in all types of testing equipment; designed with a long thin nose to fit into confined areas and hard to get at places. Steel or brass, nickel plated.

No.	STEEL	Price per C
45AT-2"	long\$10.00
242-2 3/4"	long 20.00
BRASS		
80-2"	long\$12.00
84-2 3/4"	long 17.50

FIBRE NEUTRALIZING TOOLS

3 in 1 combination. A 3/8" diameter screw driver on the inside and 3/16" and 5/16" sockets at each end of the tool. Completely insulated.

No. 2501.....Price Each \$0.85

NEUTRALIZING TOOLS METAL TIPS

With brass nickel plated metal tip at both ends. Metal tips are hexagon broached for 3/8" and 5/16" nuts. Screw driver inside is 7/32" diameter to fit inside of coils for compensating. 3 in 1 combination.

No. 2500.....Price Each \$1.25

TEST PRODS Solderless Type

Designed so that the phone tip screws right into the handle itself. Handles in various lengths made in ARHCOITE.

No.	Handle Overall	Price Each
145	5"	\$0.40
149	6 3/4"	.45

Phonographic Needle Type

These test prod handles are standard photograph needles to fit into the chuck. Can be tightened with nut.

No.	Handle	Overall	Price Each
153	3 1/2"	4 3/4"	\$0.40
155	4"	5 1/2"	.45

SOCKET HEAD ALIGNMENT WRENCH

6" long with a brass 3/8" socket head that fits over trimmer screws on various types of receivers. Outside diameter is 3/8". Has a hardened screw driver bit for adjusting trimmer screws. Insulated diameter shaft fits 1/4" holder. Available in assorted colors.

No. 820.....Price Each \$0.70

HEAVY DUTY TEST PRODS

For rough usage in production testing lines and large service shops. ARHCOITE prod handles, 7/16" diameter and 5" long. Prods equipped with 60" heavy duty flexible wire; choice of attachments. Handles and leads are colored red and black for identification.

No.	Type	Price per Pair
300	Taper lugs	\$1.25
310	Phone tips	1.25
320	Alligator clips	1.35

PENCIL TYPE SHARP POINT TEST PRODS

Long and thin. Ideal for testing in tight places in receivers and amplifiers. Handles and 60" leads Overall length 7", diameter 1/4".

No.	Type	Price per Pair
330	Spade lugs	\$1.15
340	Phone tips	1.15
350	Alligator clips	1.25

TEST PRODS Solderless Tip Type

Test leads run through prod handles into tip where connection is securely made by means of a knurled collar. Fibre handles and leads colored red and black for identification. Handles are four inches long and 3/8" diameter. Wire length 50".

No.	Type	Price per Pair
210	Spade lugs	\$0.85
200	Phone tips	.85
260	Alligator clips	1.00

Phono Needle Tip Type

Prod handles are equipped with chucks for securely holding standard phonograph needles, which are quickly replaceable. Fibre handles and leads are colored red and black for identification. Handles are 4" long and 3/8" in diameter. Wire length 50".

No.	Type	Price per Pair
230	Phone tips	\$0.85
240	Spade lugs	.85
259	Alligator clips	1.00

ALLIGATOR CLIP TEST LEADS

Made with Alligator Clips at each end and red and black flexible wire for easy identification. Ideal as temporary connections. Clips have a firm grip and will make a perfect contact at all times.

No.	Wire Length	Price per Pair
400	12"	\$0.70
420	21"	.80
430	38"	.90
440	48"	1.00

ALLIGATOR ALIGNMENT WRENCH

Fits various sizes of knurled or hexagon nuts up to 3/4" diameter. Has hardened screw driver on the other end for adjusting trimmer screws. Overall length is 6" and diameter of shaft is 1/4". Assorted colors.

No. 805.....Price Each \$0.50

SOCKET WRENCHES Spin Type

Made with a deep hollow hole in the end of socket. Takes a long screw any size up to No. 10 diameter. Wooden handle for firm grip and the socket is hardened for durability and service.

No.	Hex. Nut Size (6" LONG)	Price Each
48	3/16"	\$0.45

RADIO ESSENTIALS, INC.

EXCLUSIVE DISTRIBUTORS OF **ARHCO** TO THE RADIO PARTS JOBBERS

AMERICAN RADIO HARDWARE CO., INC.

FLEXIBLE COUPLING

Flexible coupling with a square ceramic insulation $5/32''$ thick. Couples standard $1/4''$ shafts without necessity of close alignment. Springs of tough phosphor bronze, all other hardware brass. Overall length approximately $3/8''$. $1-3/16''$ square. No. 1922.....Price \$0.40

ROUND TYPE COUPLING

Similar to No. 1922 except ceramic is $1''$ diameter round, and $5/32''$ thick. Bushings of brass, spring of phosphor bronze. Overall length $3/4''$. No. 1921.....Price \$0.40

LONG PIN BINDING POST

$3/4''$ high without the threaded portion. Alongside the threaded portion, there is a small pin forced in the post so that it can be assembled in a set position on any type of apparatus. Stem is $9/16''$ long threaded $6/32''$. Overall length $1-5/16''$. $1/16''$ soldering tip, polished or dull nickel finish. Also available with the following engraved heads: + No. 1756—Blank.....Price Each \$0.30

SHORT PIN BINDING POST

$3/4''$ high without threaded portion. Alongside the threaded portion is a small pin forced into the post so that it can be assembled in a set position on any type of apparatus. Stem is threaded $6/32''$ x $1/4''$ long. Overall length $1''$. Can also be furnished with the threaded portion in various lengths. Also available with the following engraved heads: + No. 1755—Blank.....Price Each \$0.25

SPECIAL BINDING POST

$3/4''$ overall. For use in any chassis where long screws, insulating washers, lugs or any combination of parts may be needed for mounting to Binding Post. Also available with following engraved heads: + No. 1812.....Price Each \$0.20

HEAVY DUTY ALL METAL BINDING POST

This binding post is all brass with a highly polished nickel finish, overall length $1 1/2''$. The diameter of the body and cap $1/2''$. The stem of the post is $3/4''$ long threaded 10/32. The knurled cap has a receptacle on top which can be used to accommodate standard banana plugs. Hole in body is $1/32''$ diameter to accommodate wire or phone tips. Stem is provided with a tip for soldering. No. 1751.....Price Each \$0.60

COMBINATION INSULATED BINDING POSTS PLUG AND TIP JACK TYPE

Accommodates standard banana plugs through the top of post, a standard phone tip through side or, as more ordinarily used, with a wire through side. Suitable for test equipment and laboratory instruments. Standard colors. No. 143.....Price Each \$0.25

SINGLE JACK (SC, Type JK-34A)

Made of special brass, heavy nickel plated. Will accommodate phone plugs Signal Corps type PL-55, PL-155 and all standard 2-circuit phone plugs.

No. 1798.....Price Each \$0.60

DOUBLE JACK (SC, Type JK-33A)

Made of brass, heavy nickel plated and can be used with plugs Signal Corps No. PL-68, PL-168 and all standard 3 circuit plugs.

No. 1799.....Price Each \$0.75

NON-SEPARABLE HEAD POSTS

Brass nickel plated insert and brass nickel plated washer. The body of the post is drilled for the insertion of a phone tip or a solderless plug. Equipped with a solder insulating washer and a 6/32 nut for mounting. $1/2''$ high and has a $1/2''$ insulated head in red, black, blue, green, yellow, purple and white.

No. 154.....Price Each \$0.22

ALL METAL BINDING POST

For high amperage work or for test equipment where low resistance connections are imperative. Nickel plated brass. Approximately $1''$ high.

No. 32 Price per C \$25.00

METAL BINDING POSTS

Nickel plated brass, supplied with a knurled 6/32" screw to hold the wire or phone tip in place.

No. 1910 Price per C \$10.00

INSULATED BINDING POST

With a $1/2''$ or a $3/8''$ diameter head. Identification is made possible by the bright colored head.

No.	Dia.	Price Each
146.....	$1/2''$	\$0.13
147.....	$3/8''$.15

BINDING POST HEADS

For use in noise eliminators, vibrators, etc. The heads are knurled and have a threaded portion which eliminates need for a brass insert. The head is completely insulated. Standard colors.

No.	Dia. of Head	Thread	Price per C
1817.....	$3/8''$	6/32	\$6.00
1818.....	$1/2''$	8/32	8.00
1819.....	$5/8''$	10/32	9.00

PL-55 PLUG

PL-55 is standard telephone plug made in novel manner by molding internal insulation. A tenite shell serves as insulated handle. Ample accommodations for cordage serving on rear end. Distance from shoulder to center of ball contact is $1''$. Overall length of plug $2-13/16''$. Handle $2-5/8''$ long. Withstands breakdown of 1000 volts. No. 1782.....Price Each \$2.25

PL-54 PLUG

PL-54 is shorter, made to mate with JK-26 Jack. Overall length $2-7/16''$. Otherwise has same features as PL-55. No. 1781.....Price Each \$1.35

JK-26 MATE OF PL-54

Overall length $2-3/4''$. Diameter of insulated shell $1/2''$. Three leaf reinforced spring of spring temper phosphor bronze, mounted on a sturdy brass body. Bakelite sheet insulation $1/16''$ thick. Two lined lugs. Withstands 1000 volts A.C. breakdown across terminals. No. 1781.....Price Each \$2.00

NAVY TYPE PLUG

Standard two-circuit telephone plug, heavy duty type, all brass except for insulation terminals made to accommodate either phone tips or wire. Barrel has insulating sleeve. Rubber retaining ring in cap at rear end holds cable firmly. Overall length approximately $3''$. Barrel diameter $1 1/16''$. Length of barrel $1 1/2''$. Plug withstands voltage breakdown of 500 volts A.C. between terminals. Fits into standard $1/2''$ diameter jacks of long-form two-circuit type. No. 1783.....Price Each \$2.00

MIDGET PHONE JACKS

J-670—Open circuit jack, midget type. Sturdy phosphor bronze spring. Heavily insulated $1 1/16''$ thick bakelite. Mounts in $3/8''$ hole in panels up to $1/4''$ thick. Ground connection through lug forms part of insulation of brass. No. 1795.....Price Each \$0.30

DOUBLE JACKS

J-671—Same features as 1795 except it is 3 circuit microphone jack. No. 1796.....Price Each \$0.50

PANEL BEARING ASSEMBLY

Useful in facilitating the panel control of condensers, switches, potentiometers, etc. Flexible coupling can be attached to assembly shafts. Each shaft is grooved and washers are placed on each end to prevent shaft from moving in and out of the bearing

No.	Type	Price Each
1623—6"	long	\$0.50
1624—3"	long	.40
1613—12"	long	.60
1612—Bearing only		.20

PHONE PLUG

For use with all standard size jacks; bakelite shell, available in a variety of solid colors. Will accommodate two phone cord tips or lugs which are held securely in place with two binding head screws.

No. 128.....Price Each \$0.50

SHIELDED PHONE PLUG

Designed for use with all standard size jacks. Brass finished with a heavy chrome plating. The barrel contains an insulating tube to prevent any possible loose strands of wire from shorting against the barrel. Accommodates two phone cord tips or lugs which are held securely in place with two binding head screws.

No. Type Price Each
218—Shielded phone plug.....\$0.85

JUNIOR SHIELDED PHONE PLUG

Barrel contains an insulating tube which prevents any possibility of loose strands of wire shorting. Accommodates two phone cord tips or lugs which are held securely in place with two binding head screws. Overall length $2 1/8''$. Fits all standard size jacks.

219—Phone plug.....\$0.70
1791—Barrel only......40

SELF-TAPPING SCREW ASSORTMENT

Parker Kalon self-tapping screw assortment of most popular sizes. Genuine replacements for ALL standard brand receivers. No. 1078.....Price Each \$0.65

BRACKET TYPE LUG STRIPS

No.	Type	Price per C
1620—3 lug.....		\$15.00

"ARHCO" DISPLAY AND STOCK CABINET

Made of heavy gauge steel—Gray Crackle Finish!

Furnished in two models: One model has sloping back and is provided with a pictorial display-board illustrating 77 popular parts; drawer markers are furnished with this model. The second model has a straight steel back and is ideal for use as a small parts stock cabinet.

Spring steel in two models—one without a hole and one with a hole in the tail of the cap. Fits all standard miniature grid caps. Will take wire up to 3/8" diameter.

No.	Type	Price per M
114	Glass Tube Caps	\$5.50
121	Metal Tube Caps	\$10.00

INSULATED GRID CAPS

Consist of a sturdy cadmium plated brass clip fastened within an ARHCO shell. 12" wire, with a solderless phone tip on one end. Fits standard glass tube cap.

418	Glass tube cap	Price \$0.30
-----	----------------	--------------

SPECIAL Manufacturers Service

The products featured in this catalog represent those items we manufacture for the general trade and which we normally carry in stock. We have exclusive facilities for the production of parts in special form to take care of manufacturers' requirements. We have facilities for the handling of all kinds of stampings, punchings, drilling, screw machine work, engraving and assembly.

We have personnel available to cooperate with you in the design and development of special parts and will submit estimates on request.

NOTE!

The products featured in this catalog represent only a part of the "ARHCO" line. A more complete listing will be found in our General Catalog.

INSULATED GLASS TUBE GRID CAPS

Designed to accommodate the standard glass tube grid cap. Spring brass clip assures permanent wiping contact. 12" wire, shielded or plate. Standard colors.

No.	Type	Price Each
139	12" plain wire	\$0.18
140	12" shielded wire	.25

DUAL GRID CAP

Standard glass tube cap or small metal tube grid cap. Cadmium plated brass clips, securely cycled together. 15" wire and standard phone tip or cap less wire. Cap made of ARHCO shell. Available in various colors.

No.	Type	Price Each
412	With 15" wire	\$0.35
413	As wire	.30

CLIP-IN SOCKETS

A radically new design, constructed so that it may be clipped into a dial directly. This facilitates maintaining and changing of bulbs. Requires a mounting slot 3/4" long and 1/2" wide. Made of cadmium plated tempered steel to assure a permanent grip.

No.	Type	Price per C
179	Screw shell type, 2 lugs	\$12.00
170	Bayonet type, 2 lugs	12.00
1806	Candleabra type, 2 lugs	15.00

GRID CAP SHIELD

Fits firmly over the grid cap completely shielding the tube. Cadmium plated or black finish.

No.	Type	Price Each
92	Cadmium plated	\$0.15
92	Insulated	.40
94	Black	.20

PANEL INDICATOR

DIM-E-ROID (Registered)

Suitable for use on instrument boards, signal systems, or any other apparatus where it is required to adjust the intensity of the indicator light. Rough handling or usage will not affect the manual adjustment. Complete with a special designed clip bracket that won't jar loose or come apart; cannot be removed without unmounting the lamp. Bayonet base shell, which is insulated with a rice paper shell and two 12" leads of Underwriters' Approval wire—mounts in 5/8" diameter hole—projects 5/8" from front of mounted surface—3/4" diameter—1 1/2" overall. Red or green lens.

No. 1920	Price \$1.00
----------	--------------

GIANT PANEL INDICATORS

Each pilot light indicator can be individually marked, by writing in the desired copy on the card disc supplied with each unit. When pilot lamp is illuminated, the writing is able to be seen three feet away. Bayonet or miniature type screw shell sockets. Mounts in 3/4" hole in panels up to 3/4" thickness. Indicator is 1 1/2" in diameter and extends 1 1/2" behind panel. Green, red, blue and crystal.

No.	Type	Price Each
1872	Bayonet	\$1.00
1873	Miniature screw shell	1.00

NEW PANEL LIGHT ASSEMBLY

Pilot light is accessible from front of panel. Assembly mounts in a single hole 5/8" in diameter extends behind the panel for a distance of 1 1/2" and projects from the front panel distance of 5/8", and may be used on panels up to 3/4" in thickness. Red, green or amber caps.

1870	Miniature screw socket	\$0.60
1871	Bayonet base socket	.60

PANEL INDICATOR BRACKET

For use on all types of test equipment, receivers, or transmitters, or wherever an indicator lamp is used. The indicator mounts in a single hole 7/16" in diameter and can be used on panels up to 5/16" in thickness. Red, blue, white, green or amber glass jewels.

39	Miniature socket	\$0.30
93	Candleabra socket	.30
95	Bayonet socket	.30

HORIZONTAL PANEL INDICATOR ASSEMBLY

This departure in design of panel indicators has many outstanding features. The bulb fits into the jewel so the maximum light is concentrated thru the jewel. Red, green, amber, blue and white jewels.

No.	Type	Price Each
88	Indicator Assembly	\$0.60
1545	Threaded Glass Jewel	.20
1546	Force Fit Glass Jewel	.18

ANTENNA AND FUSE CONNECTORS

Made for automobile quick connections either on the antenna or ground line as well as for the standard three AG automobile fuses.

No.	Type	Price per C
221	Antenna connector	\$10.00
222	Fuse retainer	14.00
231	Reinforced ring, Ant.	17.00
232	Reinforced ring, Fuse	21.00

HEAVY DUTY POWER SWITCHES

Made by H & H. for use in motors, transmitters, amplifiers, and other circuits where heavy current is carried. Three types with neutral off in center position. Rated at 10 amps, 125 volts. Rated high 1 1/2" wide, mounting sleeve diameter 5/8".

1041	D.P.D.T.	Price Each \$5.50
1042	T.P.D.T.	8.25
1043	A.P.D.T.	12.00

TOGGLE SWITCHES

Toggle switches by Hart and Hegeman. Capacity 1 amp, 250 volts—3 amps, 125 volts. Nickel plated.

No.	Type	Shaft Length	Price Each
1020	S.P.S.T.	15/32"	\$0.55
1021	S.P.S.T.	1"	.60
1022	S.P.D.T.	15/32"	.70
1023	S.P.D.T.	1"	.80
1024	D.P.S.T.	15/32"	1.00
1025	D.P.S.T.	1"	1.10
1026	H.P.D.T.	15/32"	1.10
1027	H.P.D.T.	1"	1.20
1028	On and Off Name Plate		.05

BAT HANDLE TOGGLE SWITCHES

Same as above with Bat shaped handle. Shaft length 15/32". Nickel plated.

1029	S.P.S.T.	Price Each \$0.55
1030	S.P.D.T.	.70
1031	D.P.S.T.	1.00
1032	D.P.D.T.	1.10

BRACKET TYPE LIGHT SOCKETS

Socket can be used on practically all sets. Bracket is adjustable over a wide range, to set properly on any dial. Socket available for miniature base or candleabra base bulb. 1 1/2" or DOWN type. Adjustment hole is 5/8" long and 7/16" wide. Overall height is 1 1/2".

No.	Type	Price per C
36	Min. Base UP Bracket	\$ 9.00
37	Min. Base DOWN Bracket	17.00
72	Can. Base UP Bracket	17.00
273	Can. Base DOWN Bracket	9.00

BAYONET TYPE DIAL SOCKETS

For use with bayonet type pilot bulb. Shell is securely cycled to the bracket proper. Center contact permits constant and positive pressure on bulb contact. Slotted or clip-on type bracket.

1538	Straight UP bracket	\$10.00
1539	Straight DOWN bracket	10.00
1540	UP clip-on bracket	10.00
1541	DOWN clip-on bracket	10.00

2-prong Plug, with Fahnestock Clips, for STANDARD and PORTABLE 1 1/2 volt "A" batteries.

717

No. 717.....List, \$0.12 ea.
4-prong large Plug, for combination 6V "A" and 75V "B" battery packs such as Zenith Z-675, Burgess G4B50, etc.

718

No. 718.....List, \$0.15 ea.
5-prong large Plug, for combination 6V "A" and 90V "B" battery packs such as Zenith Z-650, Burgess F4B60, etc.

719

No. 719.....List, \$0.12 ea.
4-prong small Plug (has three thin pins and one thick pin) for combination 6V "A" and 90V "B" battery packs such as Philco P60ASF4, Burgess 2F4A60, etc.

721

No. 721.....List, \$0.20 ea.
8-prong Octal plug, for combination 1 1/2 volt and 90-volt Portable "AB" Packs, such as Burgess 4FA60, General P60A4L, Zenith Z-9 B, etc.

722

No. 722.....List, \$0.20 ea.
2-prong plug with Fahnestock Clips, for STANDARD 3-volt "A" batteries such as Rayovac P9403, etc.

723

No. 723.....List, \$0.10 ea.
2-prong plug without clips, for STANDARD 3-volt "A" batteries such as Rayovac P9403, etc.

724

No. 724.....List, \$0.10 ea.
3-prong plug (has two thin pins and one thick pin), for STANDARD 4 1/2 volt "C" batteries such as Eveready 771, etc.

725

No. 725.....List, \$0.20 ea.
7-prong large plug for combination 135 volt "B" and 9 volt "C" batteries such as used on Philco 37-33, 37-38, 38-33, and 38-38 battery receivers and type 9068, etc.

726

No. 726.....List, \$0.25 ea.
Special 8-prong large plug for combination 135 volt "B" and 13 1/2 volt "C" batteries, such as used on Philco Models 34, 34A, 39 and 39A battery receivers, etc.

727

No. 727.....List, \$0.20 ea.
5-prong plug for standard 22 1/2 volt "C" battery (Eveready 763, etc.) Same as our catalog No. 703, except without Fahnestock clips.

728

No. 728.....List, \$0.10 ea.
Two prong plug with large pins, one thin and one thick. Used extensively in portable batteries.

729

No. 729.....List, \$0.20 ea.
5-prong small plug, including guide pin, for combination 1 1/2 volt "A" and 75 volt or 90 volt "B" portable batteries.

730

HANDY SERVICEMEN'S KIT

Contains 100 Battery Plugs—Sturdy Metal Container. Supplies with reference chart giving full information on each plug.

For portable and farm radios, test equipment and countless other present-day devices using plug-in batteries.

Model BP, 100 MC—Servicemen's Net Cost.....\$7.33

50 ASSORTED PLUGS IN CARDBOARD CONTAINER KIT

Contains 50 fast moving battery plugs in handy cardboard container. Useful technical data included. A necessity for every radio serviceman!

MODEL BP-50
SERVICEMEN'S NET COST.....\$3.25

New Enlarged Line of AC-DC RESISTANCE LINE CORDS

STANDARD 3 TERMINALS AC-DC RESISTANCE CORDS

FLEXIBLE, STURDY CORDS, 3-TERMINAL TYPE, WITH COLOR-CODED, TINNED LEADS

2450	450 (High Resist.)	1.72

Attractive individual
Cartons

*Note: 135, 160, 180, and 200 ohm cords can also be used for single light 20 and 15 watt fluorescent fixtures.

HIGH RESISTANCE CORDS

No. List Price

2197 For 3-way portable radios. AC-DC battery. New high resistance type cord, has 560 ohms resistance. Many thousands of sets using this identical cord are now in use. This popular replacement cord should be stocked by every serviceman! Individually packaged \$1.72

TAPPED 4 TERMINAL AC-DC RESISTANCE CORDS

Pilot light resistor shunt built into the line cord. Used on Emerson, Zenith, Sparton, R. C. A., General Electric, Wells-Gardner, Sears Roebuck, Fada, Admiral, Air King, Detroit, Crosley, Garod, and others.

No.	List, Ea.	No.	List, Ea.
2176—160 OHMS—TAPPED AT 24 OHMS		2174—280 OHMS—TAPPED AT 40 OHMS	
For sets using tubes having a voltage drop of approximately 69 volts as 2-25 volt tubes and 3-6.3 volt tubes plus single pilot light or similar combination	\$1.38	For sets using tubes having a voltage drop of approximately 32 volts as 2-12 volt tubes and 1-6.3 volt tube or 5-6.3 volt tubes or similar combinations using 2 pilot light in series	\$1.38
2195—165 OHMS—TAPPED AT 30 OHMS		2164—360 OHMS—TAPPED AT 80 OHMS	
There is a large demand for this tapped line cord	1.38	Used in Garod Model BP-20. See No. 2196 for specifications	1.72
2177—180 OHMS—TAPPED AT 25 OHMS		2166—430 OHMS—TAPPED AT 80 OHMS	
For sets using tubes having a voltage drop of approximately 63 volts as 2-25 volt tubes and 2-6.3 volt tubes plus a single pilot light or similar combination	1.38	For Farnsworth Model CD59. See No. 2196 for specifications	1.72
2178—200 OHMS—TAPPED AT 25 OHMS		2156—510 OHMS—TAPPED AT 80 OHMS	
For sets using tubes having a voltage drop of approximately 57 volts as 1-25 volt tube, 1-12 volt tube and 3-6.3 volt tubes and a single pilot light. May also be used for sets using tubes having a voltage drop of 63 volts, (2-25 volt and 2-6.3 volt tubes) if high line voltage (125 volts) is encountered....	1.38	For Fada. See No. 2196 for specifications	1.72
2179—200 OHMS—TAPPED AT 40 OHMS		2196—560 OHMS—TAPPED AT 80 OHMS	
For sets using tubes having a voltage drop of approximately 57 volts as 1-25 volt tube, 1-12 volt tube and 3-6.3 volt tubes and two pilot lights in series	1.38	Tapped at 80 ohms for plate of rectifier. Designed with voltage dropping resistor to plate of rectifier. Avoids necessity of using B+ resistor. This cord used extensively	1.72
		2158—960 OHMS—TAPPED AT 80 OHMS	
		For G. E. Model L622. See No. 2196 for specifications	1.72
		2165—1950 OHMS—TAPPED AT 360 OHMS	
		Used extensively in sets such as Crosley Model 27BD, Admiral Model 28-G-5, and other sets with similar circuits	2.06

2157—For AC-DC Sets.

This cord has 960 ohms resistance, and is used wherever 45Z3 rectifier tube is employed. (For pocket type radios, such as: Admiral, Fada Sentinel, Sonora, Motorola, Detroit, Farnsworth, etc.) Individually packaged 1.72

REPLACEMENT LINE CORD FOR MOTOROLA SETS

No. List Price

2198—8 ft. cord containing 2 resistance elements—1100 and 280 ohms. Has 4 terminals. Essential replacement for all Motorola portables. Nos. 41D, 51D, 52D, 41H. \$2.05

COMBINATION ANTENNA WIRE and STRAIGHT AC CORD

No. List Price

2168—3-wire cord with special female socket to fit sets which have three prong male plug, used in Sentinel, Admiral, Belmont, Sonora, etc. Individually packaged \$1.72

UNIVERSAL AC-DC RESISTANCE LINE CORDS

No. List Price

2175—This line cord replaces AC-DC cords from 220 ohms to 300 ohms. Can be used for either standard three terminal or tapped cord..... \$1.72

STEP-DOWN — AC-DC RESISTOR LINE CORDS

(Step-Down from 220 V. to 110 V.)

2181FL	165 ohm, for 20 watt bulb, 117 volts, 6 feet long	\$1.17
2181FL-2	Two 165 ohm windings, for two 20 watt bulbs, 117 volts, 6 feet long	2.00
2182FL	180 ohm, for 15 watt bulb, 117 volts, 6 feet long	1.17
2200FL	Two 180 ohm windings, for two 15 watt bulbs, 117 volts, 6 feet long	2.00

DIAL DRIVE NYLON CORD and CABLE

HANDY SPOOL FOR DIAL CABLE AND CORDS

The finest line of nylon dial cables and cords on the market, put up and packaged in a truly modern manner. All length spools come on metal spools, housed in transparent plastic containers which permit simplicity of

handling, renders cable weather-proof, prevents cable from rotting, becoming brittle, or losing its original strength or color.

Empty Plastic Container Makes A Handy All-purpose Kit for Small Parts, Washers, etc.

JFD 42 STRAND PHOSPHOR BRONZE CABLE

42 Strand Phosphor Bronze Cable with a linen thread center. This is the best flexible bronze cable obtainable. Wound on metal spool.

No.	Spools	List
901—25	25 ft.	\$1.26
901—50	50 ft.	2.46
901—100	100 ft.	4.38
901—500	500 ft.	17.52
901—1000	1000 ft.	35.04

JFD LIGHT NYLON CORD

This light Nylon Cord has ample reserve strength and is now popularly used in original radio sets. Will adequately replace the cords of older type receivers. Wound on metal spool.

No.	Spool	List
904—25	25 ft.	\$1.26
904—50	50 ft.	2.46
904—100	100 ft.	4.38
904—500	500 ft.	16.43
904—1000	1000 ft.	27.38

JFD THIN NYLON CORD

Extra Special Thin Nylon Cord. Made of the finest braided black nylon. Wound on metal spool.

No.	Spool	List
908—25	25 ft.	\$1.25
908—50	50 ft.	2.40
908—100	100 ft.	4.50
908—500	500 ft.	13.00
908—1000	1000 ft.	25.00

JFD FINE BRAIDED PHOSPHOR BRONZE CABLE

Very fine braided Phosphor Bronze Cable with a fiberglass center. This is a very popular cable. Wound on metal spool.

No.	Spools	List
901D—25	25 ft.	\$1.26
901D—50	50 ft.	2.46
901D—100	100 ft.	4.38
901D—500	500 ft.	17.52
901D—1000	1000 ft.	35.04

JFD SPECIAL NYLON HEAVY CORD

This special heavy Nylon Cord was designed to replace many cords in the older model receivers such as Kolster and Grebe sets, etc. Readily adaptable for many other applications where great strength is required.

No.	Spools	List
905—25	25 ft.	\$2.19
905—50	50 ft.	3.83
905—100	100 ft.	7.39
905—500	500 ft.	37.23

JFD SPECIAL THIN NYLON CORD

Extra Special Thin Nylon Cord. Made of white braided linen. Very strong. Suited for replacements where very thin cord is required.

No.	Spools	List
908B—25	25 ft.	\$1.25
908B—50	50 ft.	2.40
908B—100	100 ft.	4.50
908B—500	500 ft.	13.00
908B—1000	1000 ft.	25.00

JFD 18 STRAND PHOSPHOR BRONZE CABLE

18 Strand knitted Phosphor Bronze Cable, will give good service.

No.	Spools	List
902—25	25 ft.	\$0.93
902—50	50 ft.	1.81
902—100	100 ft.	3.45
902—500	500 ft.	14.78
902—1000	1000 ft.	27.38

JFD 8 STRAND PHOSPHOR BRONZE CABLE

Special Thin Phosphor Bronze Knitted Cable, 8 strands. Strong, flexible and especially made to replace cables on RCA and G.E. 1936 to 1938 receivers. Wound on metal spool.

No.	Spool	List
906—25	25 ft.	\$1.25
906—50	50 ft.	2.40
906—100	100 ft.	4.50
906—500	500 ft.	13.00
906—1000	1000 ft.	25.00

JFD FLAX BRAIDED HEMP

Flax Braided Hemp. Pre-stretched, diameter .062 and used in late models of Emerson, G.E., Sparton, Crosley, etc. Tensile strength more than sufficient for these and other receivers.

No.	Spools	List
909—25	25 ft.	\$1.26
909—50	50 ft.	2.46
909—100	100 ft.	4.38
909—500	500 ft.	16.43
909—1000	1000 ft.	27.38

JFD HEAVY NYLON CORD

This Heavy Nylon Cord will adequately replace old cables used in Silver-Marshall, Philco, Brunswick, and many other sets where heavy linen cable was formerly used. This heavy cord is also used in some of the modern receivers. Has great pulling strength. Wound on metal spool.

No.	Spool	List
903—25	25 ft.	\$1.42
903—50	50 ft.	2.74
903—100	100 ft.	4.60

List Price, Ea. \$0.25

No. 3-41 Phone tips, solid brass (nickel-plated). A perfect replacement on headset, speakers, and extension cords.

List Price, Ea. \$0.02

WIRE & CABLE FOR RADIOS and ELECTRICAL APPLIANCES

AC-DC ANTENNA WIRE (Cotton Covered)

AC-DC antenna wire, stranded, woven cotton covered, flexible, brown.
 2150—25' hank (100 to carton)
 2151—100' hank 2153—1000' spool

AC-DC ANTENNA WIRE (New Unkinkable Vinylite)

AC-DC antenna wire, stranded, new vinylite, flexible, durable, unkinkable.
 2154R—25' hank 2155R—1000' spool

(Soft Flexible Rubber)

Stranded, rubber-covered AC-DC antenna wire. Extremely flexible, unkinkable.
 2154R—25' hank 2155R—1000' spool

STRANDED HOOK-UP WIRE No. 22

Stranded hookup wire, 22 gauge, easy push-back, tinned, covered with special LAC-QUERED braid. Five colors: black, red, yellow, blue, green.
 914-H

STRANDED HOOK-UP WIRE No. 20

Stranded hookup wire, 20 gauge, cotton covered.
 935-C—1000' spool
 936-C—3000' spool

STRANDED HOOK-UP WIRE No. 18

Stranded hookup wire, 18 gauge.
 913-H

STRANDED HOOK-UP WIRE No. 16

Stranded hookup wire, 16 gauge, covered with durable cotton braid. Five colors.
 915-H

STRANDED HOOK-UP WIRE No. 14

Stranded hookup wire, 14 gauge, as above.
 916-H

SOLID HOOK-UP WIRE No. 22

Solid hookup wire, 22 gauge, easy pushback, tinned, woven fabric covered. Five colors: black, red, yellow, blue, green.
 920-C—1000' spool
 921-C—3000' spool

7/24 BARE COPPER AERIAL WIRE

937—50' coil (standard carton 100 coils)
 938—100' coil (standard carton 50 coils)
 939—1000' metal spool

SHIELDED PHONOGRAPH WIRE

Single conductor shielded wire, 22 gauge, very flexible, for phono pickups, and phono switches.
 940-A—100' coil
 941-A—1000' spool

EXTRA FLEXIBLE THIN SHIELDED PHONO WIRE

Extra flexible, special thin, shielded phono wire. Same as used by Webster, Astatic, Brush, etc. in their new type lightweight pickup arms.
 Cat. No. 942—1000' spool
 Cat. No. 943—100' spool

TEST LEAD WIRE

Kinkless flexible soft rubber covered test lead wire, 18 gauge, red or black.
 2170—25' hank 2172—500' spool
 2171—100' hank 2173—1000' spool

SHIELDED LEAD-IN WIRE (Single Cond.)

Single conductor shielded wire, stranded, tinned, 22 gauge, durable cotton braid covered.
 911-H

WEATHERPROOF 2 COND. SHIELDED WIRE

Two conductor shielded wire, stranded, tinned, 22 gauge, durable cotton braid covered. Weatherproof—excellent for indoor or outdoor use. Extremely popular.
 912-H

TRANSMISSION WIRE

Two conductor transmission wire, 20 gauge, cotton braided, weatherproof impregnated.
 945-C

JFD INTER-COMMUNICATION CABLE, BRAIDED TYPE

GENERAL PURPOSE: Designed for interior use for connecting intercommunication systems, etc.
 CONSTRUCTION: Each conductor stranded copper wire, two rayon reverse serves paraffined, color coded.

No.	Description	No.	Description
992	2 conductor	996	6 conductor
993	3 conductor	997	7 conductor
994	4 conductor	998	8 conductor
995	5 conductor	999	10 conductor

3-CONDUCTOR INTERCOM CABLE

2 Wires Plain, 1 Wire Shielded
 Extremely successful on intercommunication systems. The shielding on one wire can be used as a ground for break-in onto the line switch. The shielding can also be used as an extra conductor—which can make this cable a 4-conductor wire.
 Cat. No. 965—1000' spools

LAPEL MICROPHONE CABLE (.180 diam. Thin Gauge, Single Cond.)

Single conductor shielded microphone cable, 20 gauge. Smaller OD than standard type
 960-C

MICROPHONE CABLE (Single Cond.)

Single conductor shielded microphone cable OD .250, 20 gauge.
 961-C

MICROPHONE CABLE (Two Cond.)

Two conductor shielded microphone 20 gauge cable.
 962-C

MICROPHONE CABLE (Three Cond.)

Three conductor shielded microphone 20 gauge cable.
 963-C

SV (Vacuum Cleaner Service Cord) No. 18/2 .180 OD Thin Gauge

Two conductor No. 18 gauge SV cord, OD .180, for use with light electrical appliances such as vacuum cleaners and blowers.
 974-C

U. L. Approved

SJ (Service Cord) No. 16/2

Two conductor, No. 16 gauge SJ cord, 26-30, OD .325. U. L. Approved.
 976-C

VERTICAL NON-DIRECTIONAL HOME ANTENNAS

JFD Vertical Non-Directional Home Antennas are easily and quickly installed on flat roofs, walls, eaves, windows, ridge poles, parapets or anywhere else. Improves short-wave and broadcast reception on new and old model sets. These antennas use the improved adjustable brackets to simplify installations. Approved by leading manufacturers.

4 SECTIONS

Extends to 12 ft. With single bracket and 60 ft. of durable lead-in wire.

No. 3072RA DE-LUXE

Large diameter admiralty metal tubing. Heavily plated, beautiful finish, rust-proof.

No. 3072RA List Price \$7.45

No. 3073RA

Admiralty metal—Heavily plated, beautiful finish, rust proof.

No. 3073RA List Price \$6.30

5 SECTIONS

Extends to 16 ft. 4 in. With double bracket, and 40 ft. of durable lead-in wire.

No. 3075RA

Admiralty metal—Heavily plated, beautiful finish, rust proof. With 40 ft. durable lead-in wire.

List Price \$12.00

Ask your jobber for JFD's complete FM & Television Master Catalog.

No. 3070B WINDOW ANTENNA

FOR APARTMENT HOUSES, HOTELS, ROOMING HOUSES, ETC.

Three piece telescopic. First two sections Admiralty metal tempered seamless tubing, chromium plated — third section polished stainless steel. Extends to 96 inches. Easily attached to any window sill. Complete with mounting bracket and screws.

Individual Cartons

List Price \$4.29

DE LUXE No. 3040B BUMPEROD ANTENNA

Three piece telescopic. . . . First two sections Admiralty metal tempered seamless tubing, chromium plated — third section polished stainless steel. Extends to 96 inches. Easily attached to front or rear bumpers. No drillings. Fits all cars.

Individual Cartons

JFD COMB. AC CORD and ANTENNA WIRE

Combination straight AC cord and antenna wire. This cord has three wires—2 wires for AC and one which acts as antenna. Used in many AC-DC sets, phonoscanners, record changers, and wireless phonographs. Made in 6' 6" lengths, complete with molded rubber plugs.
No. 2167..... List Price \$1.25

MINIATURE WAFER SOCKET

Miniature wafer socket with spring-type phosphor bronze constant contacts which hold tubes securely. No need for locking devices. Soldering is easier because of longer and wider spaced contacts. Used with following miniature tubes: 1R5, 1S5, 1T4, etc.

No. 85-1..... List Price \$0.15

Auto Antennas

JFD CUSTOM BUILT DELUXE STAR AUTO RADIO ANTENNAS

The JFD Star and Standard Antennas are built of antimonial-admiralty brass tubing, stainless steel type rods, of high tension flexible strength—rattle-proof construction—heavily chrome plated.

By direct comparison, the JFD STAR antenna is actually 50% heavier than other makes, with proportionately greater signal capacity and rigidity.

Every JFD Star and Standard Antenna is equipped with a full length of Q.H.F. low-loss Polyethylene air-gap type shielded cable to prevent noise pickup, together with necessary mounting brackets designed to give a custom-built appearance. All antennas come individually packed—10 to the master carton.

JFD ANTENNA FEATURES

1. NOISELESS
2. RUSTPROOF
3. WILL NOT JAM
4. ONE-MAN INSTALLATION
5. FITS ALL CARS
6. ATTRACTIVE
7. ANTISTATIC BALL TIPS
8. MOLDED BAKELITE INSULATORS

No. 618—Complete KitList \$1.75

JFD AUTO MOTOR SPARK NOISE SUPPRESSORS AND CONDENSERS

Maximum efficiency for both radio and motor is insured by the use of JFD Suppressors. They are designed with long resistors, minimum capacity and have the best possible ratio of RF to DC resistance. Adequate noise suppression is given by a resistance of only 10,000 ohms and with this low DC resistance, full motor efficiency is assured. Very strong mechanically, they will withstand high voltage, vibration, heat and every weather condition.

With the exception of the Ford special which has a resistance of 200,000 ohms, the standard resistance is 10,000 ohms.

280 281 282 283 284 285 286-87

ST722	—2 oz.	\$.50
ST724	—4 oz.	.65

BOTTLES PACKED 12 TO STANDARD CARTON

Feather-Touch Playback Needles

Long Life — Fine Tone — Full Record Protection

JFD FEATHER-TOUCH PHONOGRAPH NEEDLES will give you COMPLETE satisfaction. The JFD FEATHER-TOUCH NEEDLES possess fine tone, long life, and full record protection. There is nothing more that a fine needle can offer!

The sale of good needles is profitable. Each year more and more phonographs, records, discs, and needles are sold. Last year's sales reached an all-time high, with more than 200,000,000 rec-

ords and discs being sold. The sale of needles has increased to astounding proportions; the new JFD needles should greatly stimulate these sales.

ALL JFD FEATHER-TOUCH PHONO NEEDLES are shadow-graphed and mounted on attractive, colorful, self-selling displays. Each individual needle is mounted on an attractive card, individually wrapped in cellophane.

PN-060 This feather-touch needle is guaranteed for a minimum of 2000 playings. It has excellent tone, unusual in the low class field. It will outplay, and give finer performance than any needle on the market in its class. The PN-060 is shadow-graphed, made of fine alloy metals, with precious metal point.

PN-060—Each \$0.60 list. 24 individually wrapped needles on beautiful display card.

\$14.40 List

PN-100 This feather-touch needle is guaranteed for a minimum of 4000 playings. It is truly a de-luxe needle, containing a long life highly polished precious metal point, cushioned shaft, clear bell shank to produce balanced tone. For record performance and protection, this needle is tops in its field. Each needle is shadow-graphed and mounted on an attractive three-color card, individually wrapped in cellophane.

PN-100—Each \$1.00 list. 12 individually wrapped needles on beautiful display card.

\$12.00 List

PN-150 This JFD feather-touch needle is guaranteed for a minimum of 6000 playings. Will not scratch or scrape records and will produce fine tone quality. The clarity of this needle is due to its highly polished curved shank construction and bell-like precious metal alloy tip. Each needle is carefully shadow-graphed and mounted on a beautiful three-color graphed and mounted on a beautiful three-color display card, individually wrapped in cellophane.

PN-150—Each \$1.50 list. 12 individually wrapped needles on beautiful display card.

\$18.00 List

(15¢ RETAIL PKGE.)

(25¢ RETAIL PKGE.)

Here is an excellent, all-around playback needle of highly polished steel. This needle is made to give clear reproduction of tone and to eliminate all surface noises. Each needle is scientifically designed so that it fits precisely into the grooves of the record, thus reducing record wear. Will give 12 or more plays. Packed in gold and silver-colored envelopes mounted on an attractive 3-color display card. Packaged in two different popular assortments, as follows:

PN-015—Display card of 50 envelopes, each containing 12 needles (15¢ per envelope).
List Price per card **\$7.50**

PN-025—Display card of 50 envelopes, each containing 25 needles (25¢ per envelope).
List Price per card **\$12.50**

TUBE SHIELDS

JFD Standard ST-12 and ST-14 "Form Fit" Tube Shields

Cat. No.	Description	Assembly Consists of	For Use with Following Tubes	List Per Assembly
3537	For ST12 long tubes, with grid cap shielding.	1 half shield plain 1 half shield notched 1 clamping ring	6C6, 6D6, 6D7, 6E7, 6U7G, 25B5, 57, 58, etc.	\$0.45
3538	For ST12 short tubes, with grid cap shielding.	1 half shield plain 1 half shield notched 1 clamping ring	1A4P, 1A6, 1C7G, 1F6, 2A7, 2B7, 6A7, 6A8G, 6C8G, 6F5G, 6F7, 6F8G, 6J7G, 6J8G, 6K7G, 1Q7G, 38, 39, 55, 77, 78, 79, 85, 88, etc.	.45
3539	For ST12 short tubes without grid cap shielding.	2 half shields 1 clamping ring	1E7G, 1H6G, 1J6G, 1V, 6H6G, 6J5G, 6P5G, 27, 30, 31, 37, 41, 56, 76, 84, 485, etc.	.45
3540	For ST12 long tubes without grid cap shielding.	2 half shields 1 clamping ring	6AB6G, 25N6G, etc.	.45
3541	For ST14 tubes without grid cap shielding.	2 half shields 1 clamping ring	11A, 1F4, 1F5G, 1G5G, 2A5, 6B5, 6F6G, 6N6G, 6N7G, 26, 33, 40, 42, 43, 45, 53, 71A, etc.	.25
3542	For ST14 tubes with grid cap shielding.	1 half shield plain 1 half shield notched 1 clamping ring	22, 24A, 32, 34, 35, etc.	.25
3543	For ST12 small tubes with grid cap shielding.	1 half shield plain 1 half shield notched 1 clamping ring	1A6, 1C6, 2A6, 2A7, 2B7, 6A7, 6B7, 6C6, 6D6, 6F7, 12A5, 12A7, 36, 38, 39, 55, 57, 58, 75, 77, 78, 79, 85, 89, etc.	.25

JFD "GLOVE FIT" TUBE SHIELDS-New ST-12 Bulb Series

A new, improved type of tube shield assembly that fits the tube "like a glove." The body of the shield is composed of two identical half shields which slightly overlap to insure complete enclosure. When the two half shields are fitted to the tube, they can easily be slipped into the base. The half shields are then pressed together near the top and the cap snapped on. The shoulder of the bulb acts as a pivot and the halves are forced outward at the bottom, tightening the shield in the base. This insures positive contact between shield and base, and also tends to hold tube tightly in socket. Especially desirable for auto and portable radios. Caps, bodies and bases can be used interchangeably.

For Tubes with Short ST-12 Body

Assembly consists of four pieces as illustrated at left: two identical half-shields each $3\frac{1}{2}$ " long, together with high cap for tubes with top grid, plus base for wafer sockets, having slotted mounting holes $1\frac{1}{2}$ to $1\frac{3}{4}$ " center to center. Suitable for following tubes:

1A4	2A6	6A8G	5K5G	85
1A6	2A7	6B8G	6K7G	6Q7G
1B4	2B7	6D8G	6L7G	6R7G
1C6	6A7	6F5G	55	6S7G
1D5G	6B7	6J7G	75	6T7G
1E5G	6F7	38	77	etc.
1F6	15	39	78	
1F7G	36	44	79	

No. 3554—Four-piece tube shield assembly as described..... List Price \$0.55

For Tubes with Long ST-12 Body

Assembly comprises four sections as illustrated at right: two identical half-shields each $3\frac{1}{2}$ " long, together with one low cap, for tubes requiring no top grid cap shielding, plus one base for wafer type sockets having $1\frac{1}{2}$ " to $1\frac{3}{4}$ " mounting centers. Suitable for following type tubes:

1E7G	6J5G	6C6
1H4G	6K6G	6D6
1H6G	6L5G	57
1J6G	6N5G	58
6H6G	25Z6G	etc.

No. 3555—Four-piece tube shield assembly as described..... List Price \$0.55

RADIO TUBE DEALERS' & SERVICEMEN'S PACKAGE 100 Complete Tube Shield Assemblies and 40 Extra Accessories

An essential for every radio tube dealer and serviceman! This package contains 100 fast moving assorted tube shield and 40 accessories. A convenient way of carrying a complete tube shield stock to meet the ever-growing demand!

No. TS 100—Servicemen's assortment of one hundred tube shields and accessories..... List Price \$25.00

Tube Shields

JFD "T-9 SERIES" TUBE SHIELDS

FOR T-9 BULB BATTERY TUBES
(having .050 amp fil.)

FOUR-PIECE "HIGH COVER" ASSEMBLY

For the new Bantam type battery tubes, where complete shielding including grid cap, is required. Shield fits snugly over base of tube, and grounding lug automatically grounds shield to ground pin of tube. Overall length of shield with grid cap cover is 3 3/4". For use with following tubes:

1A7G 1H5G 1N5GT 1P5GT
1A7GT 1H5GT 1P5G ETC.

No. 3545—complete assembly (illustrated).
List Price \$0.25

FOUR-PIECE "LOW COVER" ASSEMBLY

For new battery type bantam tubes having "T-9" bulb, same as above, except has low cover. Overall length with cover, 3 1/2". Can be used with battery type bantam tubes having grid cap, where shielding of cap is not necessary (1A7G, 1H5G, 1N5GT, etc.) or with battery tubes having no top cap, such as 1E4G, 1G4G, etc.

No. 3544-N—complete assembly (illustrated).
List Price \$0.25

THREE-PIECE "COVERLESS" ASSEMBLY

For Battery type bantam "T-9" tubes, without grid cap. Length of shield is 2 1/2". Fits snugly around base of tube. Grounding clip is provided, to permit connecting shield to ground pin of tube as illustrated. Clamping ring included affords

tight fit for severe vibration service. Suitable for following tubes:

1E4G 1G4GT ETC.
1G4G 1G4GT/G

No. 3550 complete assembly (illustrated).
List Price \$0.20

FOR GT/G AND GT TUBES ONE-PIECE TUBE SHIELD

For Metal Base Tubes

One-piece tube shield for "T-9" GT and GT/G tubes having METAL BASE. Shield fits snugly around base, automatically grounding. Overall length of shield 2 3/4". Can be used with following tubes:

1A7GT 6J7GT 12J7GT
1H5GT 6K7GT 12Q7GT
6C5GT/G 6Q7GT ETC.
6H6GT/G 12K7GT

No. 3551—Tube ShieldList Price \$0.13

THREE-PIECE ASSEMBLY For Bakelite Base Tubes

For GT and GT/G tubes with "T-9" bulbs, having BAKELITE BASE. Overall length of shield 2 3/4". Shield fits snugly around base of tube and additional tightness is secured by means of clamping ring. Grounding clip automatically connects shield to ground pin of tube.

For use with:

1A5GT 6H4GT 6B6GT/G
1C5GT 6J5GT/G 12F5GT
1D8GT 6K5GT 25A6GT/G
1G4GT/G 6K6GT/G ETC.
6F5GT 6SA7GT/G

No. 3552—Complete assembly.
List Price \$0.20

ONE-PIECE TUBE SHIELD FOR LOKTAL TUBES

One piece tube shield, for all Loktal Tubes. Tube shield fits tightly around tube and grounds to metal base which is connected internally to ground pin. Length of shield 2 1/2". For use with following tubes:

1LA4 1LN5 7B5
1LA6 7A4 7B6
1LH4 7A5 7C5
ETC.

No. 3553—One-piece shield.
List Price \$0.13

MINIATURE TUBE SHIELDS

New two-piece shield for all miniature size tubes. Permits easy installation. Overall length 1 7/8" high. Can be used with all miniature tubes.

No. 3565List Price \$0.25

JFD "SINGLE SHELL SERIES" TUBE SHIELDS

FOR GT/G — GT LOKTAL TUBES
HAVING METAL BASES

Open Top Shields

Attractive new one-piece shields. Vertical grooves provide flexible positive fit. Shield automatically grounds to metal base of tube, eliminating any necessity for additional connector. Overall length 2 1/8". Has open top for grid cap lead. Suitable for following tubes:

1A7GT 6Q7GT 12K7GT
6K7GT 12Q7GT 12J7GT
1H5GT 6J7GT ETC.

No. 3546—Small base open top shield.
For GT/G tubes with 1.165" diameter base.
List Price \$0.12

No. 3548—Large base open top shield.
For GT tubes with 1.218" diameter base.
List Price \$0.12

Closed Top Shields

New one-piece shield, similar to shield above. Shield fits tightly over metal base of tube, thus automatically grounding and eliminating need for additional connector. Overall length 2 1/8". Has closed top. Suitable for following tubes:

6C5GT/G 7A8 7A5 1LN5
1LA6 6H6GT/G 7B5 7B4
7A4 1LB4 1LA4 7B8
ETC.

No. 3547—Small base closed top shield.
For GT/G and Loktal tubes with 1.165" diameter base.
List Price \$0.12

No. 3549—Large base closed top shield.
For GT tubes with 1.218 diameter base.
List Price \$0.12

ACCESSORIES FOR JFD TUBE SHIELDS

No. 3556

No. 3556—Grid Cap Cover, fits No. 3545 and 3544 tube shields listed above, as well as No. 3554 and No. 3555 tube shields. Height 7/8". Notched.

List Price \$0.08

No. 3557—Grid Cap Cover same as above, except has clearance hole in top for Grid Cap Clip.

List Price \$0.08

No. 3557

No. 3558—Low Cap, for tubes without grid cap, or where shielding of grid cap is not considered necessary. Height 3/4". Hole in top, ID 7/8".

List Price \$0.06

No. 3559—Clamping Ring for any above type "T-9" tube shield.

List Price \$0.04

No. 3558

No. 3559

No. 3560

No. 3560—Ground Clip Base, for above type "T-9" tube shields. Has slotted holes for mounting on wafer sockets with 1 1/2" to 1 3/4" mounting centers.

List Price \$0.10

No. 3561—Single Ground clip for wafer type sockets, with 1 1/2" mounting centers.

List Price \$0.05

No. 3562—Ground Clip for sockets with 1 1/8" mounting centers.

List Price \$0.06

No. 3561

No. 3562

No. 3563

No. 3563—Base for all "T-9" series tube shields listed above. For sockets with mounting centers of 1 1/2" to 1 3/4".

List Price \$0.10

No. 3564—Grounding clip, fits over octal key and ground pin of bakelite base octal tubes, and makes contact with tube shield.

List Price \$0.05

No. 3564

Switches and Radio Essentials

JFD TOGGLE SWITCHES

Popular switches for radio construction and replacement, for controlling small motors and appliances, etc. Made especially for JFD by H&H in a nickel plated or Statuary bronze finish. Rated at 3 amps. at 125 v., these switches are Underwriter approved. Solder connections are heavy. will not break off.

No.	Description	Shank	List Price
11-1	S.P.S.T.	1/2"	\$0.60

11-8	D.P.D.T.	7/8"	1.35

JFD PUSH BUTTON SWITCH

Employed on many analyzers and testers, this two circuit slow make and quick break momentary contact switch is made for JFD by H&H. One circuit is cut off while the other is normally on. Circuits may be reversed by merely pushing button. Shaft 3/8" long. U. L. Approved

No.	Description	List Price
12-1	Switch	\$0.85
12-2	W. Red Plastic But.	1.15
12-3	W. Black Plastic But.	1.15

JFD EXTRA HEAVY DUTY POWER SWITCH

Rated 10 amps. 125 v., 3 types, with neutral position in center. Size 2" x 1" x 1 1/2" sleeve 3/4" dia. Made specifically for use in projectors, motors, amplifiers, transmitters, and movie equipment where heavy currents are used. Made for JFD by H&H. U. L. Approved

No.	Description	List Price
13-1	D.P.D.T.	\$5.50
13-2	3.P.D.T.	8.15
13-3	4.P.D.T.	11.50

JFD HEAVY DUTY POWER SWITCH

Made by H&H for JFD. Adaptable as safety switch for transformers, high frequency work, etc., available in toggle or push button types. This D.P.S.T. power switch has a capacity of 22 amps. at 125 volts. U. L. Approved

No.	Description	List Price
14-1	Toggle Type	\$1.50
14-2	Push button type	2.15

JFD SNAP SWITCHES

Used as a tone control, phono switch, circuit switch, etc., in many of the new sets. 1/2" wide — 1 1/8" between center mounting holes. Cadmium plated steel housing; Bakelite buttons. Contacts and terminals are silver plated. U. L. Approved

No.	Description	List Price
17-1	S.P.S.T.	\$0.35
17-2	S.P.D.T.	.40
17-3	D.P.S.T.	.45
17-4	D.P.D.T.	.60

JFD ROTARY SWITCHES

Underwriter approved, this well-constructed rotary switch is especially made for replacements, or in original sets. Rated at 3 amps. 125 volts. Made for JFD by H&H. 1 1/2" long shaft. Heavy solder contacts.

No.	Description	Shank	List Price

JFD PLASTIC SPEAKER SHIMS

Indispensable to every serviceman for the rapid and accurate adjustment of any type dynamic speaker. Made of a very tough and flexible plastic. Five sizes in an attractive, silver-lettered, partitioned snap case. Genuine leather pouch. No. ST1806—Set of 20 color coded shims in kit, complete. List Price \$0.60

JFD SPRING STEEL SPEAKER SHIMS

For quick, precise adjustment of any type dynamic speaker. Made of highest grade, extremely flexible spring steel. Four sizes in an attractive, silver-lettered, partitioned snap case. No. ST1807—Set of 16 color coded shims, complete. List Price \$0.65

JFD HEXAGON AND BRISTO KEY WRENCHES

A "must" in every serviceman's tool kit. Used on knobs, dials, motors, pulleys, etc. Only toughest hardened steel is used in both the Hex and Bristo Wrench.

HEX KEY WRENCHES

No.	Description	List Price
9-1	Kit of 6 Hex Key Wrenches for No. 4 to 1/4" Set Screws and No. 2 to 8 Cap Screws in Genuine Leather Pouch	\$0.75
9-2	Env. 4 Hex Key Wrenches for 1 1/4" to 7/16" Set Screws and No. 8 to 5/16" Cap Screws	\$0.40

Insulated Test Tools

JFD INSULATED SCREW-DRIVER

Made of $\frac{1}{4}$ " rod—sturdy, durable bone fibre. No metal parts. Perfect for neutralizing and adjusting radio sets, coils, condensers, etc. Ends can be reground when necessary. 7 inches long.

No. 5-50 List Price \$0.40

JFD INSULATED SCREW-DRIVER AND HEX WRENCH

Durable bone fibre combination insulated screw-driver and hex wrench. Screw adjustment permits screw-driver to be extended from 7" to 13".

No. 5-51 List Price \$0.75

JFD ALLIGATOR WRENCH AND SCREW-DRIVER

Sturdy, tough $\frac{3}{8}$ " bone fibre. Combination strong metal wrench and metal screw-driver tip.

No. 5-52 List Price \$0.50

JFD ALIGNING SCREW-DRIVER

Metal tip screw driver made of tough bone fibre. $\frac{1}{4}$ " diameter x 6" long, completely insulated.

No. 5-53 List Price \$0.40

JFD ALIGNMENT TOOL FOR PHILCO RECEIVERS

Air Trimmer condensers on all model sets can be easily neutralized with this specially designed metal clip. Other end has screw-driver with metal nib. Made of $\frac{3}{8}$ " bone fibre.

No. 5-54 List Price \$0.60

JFD WRENCH AND SCREW-DRIVER

One end has $\frac{1}{4}$ " metal hex wrench; other end has metal screw-driver nib made of $\frac{1}{2}$ " bone fibre.

No. 5-55 List Price \$0.75

JFD INSULATED ALIGNING WRENCH

Made of tough bone fibre. Hexed its full length inside, so that end of wrench can be cut off when necessary, and neutralizing wrench is ready for more use.

No. 5-56 6" long ($\frac{1}{4}$ " hex; $\frac{3}{8}$ " dia. List Price \$0.35

No. 5-57 8" long ($\frac{1}{4}$ " hex; $\frac{3}{8}$ " dia. List Price \$0.40

JFD WRENCH ALIGNMENT TOOL

Sturdy bone fibre with $\frac{1}{4}$ " metal hex wrench on one end and $\frac{1}{8}$ " metal hex wrench on the other end.

No. 5-58 List Price \$1.25

JFD ALIGNMENT WRENCH FOR RCA, PHILCO, etc.

Ideal for neutralizing and adjusting air trimmers of all models of Philco, Victor, and ROA. One end has $\frac{1}{2}$ " metal hex wrench; other end has an especially shaped metal hook for adjusting trimmers. Durable bone fibre.

No. 5-60 List Price \$1.50

JFD "4-In-1" ALIGNMENT TOOL

Contains four handy tools— $\frac{1}{4}$ " hex wrench with key slot on one end, $\frac{1}{8}$ " hex wrench on other end, screw-driver with metal nib comprises insert. Sturdy bone fibre.

No. 5-61 List Price \$1.00

JFD "5-In-1" ALIGNMENT TOOL

Contains five handy neutralizing tools— $\frac{1}{4}$ " hex wrench with key slot, $\frac{1}{8}$ " hex wrench, screw-driver with metal nib insert and heavy metal screw-driver nib on one end. Durable bone fibre.

No. 5-62 List Price \$1.35

JFD ALL-PURPOSE TOOL

Made of tough bone fibre. Combination tool contains $\frac{1}{4}$ " hex wrench with key slot, $\frac{1}{8}$ " hex wrench, $\frac{1}{4}$ " metal hex side wrench with key slot, inserted screw-driver with metal nib.

No. 5-63 List Price \$1.35

JFD BALANCING TOOL

No need to remove set from cabinet when using this tool. Neutralizing and balancing can be done easily and quickly in even the closest quarters.

No. 5-64 List Price \$0.50

JFD WRENCH AND ALLIGATOR ALIGNING TOOL

Made of $\frac{3}{8}$ " bone fibre—alligator wrench on one end, $\frac{1}{4}$ " slotted metal hex wrench on other end.

No. 5-65 List Price \$0.50

JFD POCKET ALIGNING KIT

Here is a handy aligning kit that will fill most servicemen's requirements! Kit contains:

- 1 No. 5-53 Aligning Screw-driver
- 1 No. 5-50 Insulated Screw-driver
- 1 No. 5-52 Alligator Wrench and Screw-driver
- 1 No. 5-55 Wrench and Screw-driver
- 1 Leatherette Case

No. 5-75 List Price \$3.00

JFD JUMBO ALIGNING KIT

Here is a single kit that will take care of practically every aligning tool need! These eight tools have 24 different usable ends. The kit contains:

- 1 No. 5-51 Tool
- 1 No. 5-52 Tool
- 1 No. 5-53 Tool
- 1 No. 5-54 Tool
- 1 No. 5-56 Tool
- 1 No. 5-57 Tool
- 1 No. 5-60 Tool
- 1 No. 5-62 Tool
- 1 No. 5-63 Tool

1 Roll-Type Leatherette Case

No. 5-77. List Price \$8.75

JFD ALL-PURPOSE ALIGNING KIT

Here is a handy, compact kit containing five JFD sturdy bone fibre aligning tools.

The kit contains:

- 1 No. 5-50 Insulated Screw-driver
- 1 No. 5-52 Alligator Wrench and Screw-driver
- 1 No. 5-56 Aligning Wrench

1 No. 5-58 Metal Wrench

1 No. 5-64 Balancing Tool

1 Leatherette Case

No. 5-76. List Price \$4.25

JFD ASSORTED RADIO PRODUCTS

JFD DURABLE STOCK CABINETS

For parts, hardware, etc., with sliding drawer. Sturdier, heavier metal than average.
No. 25-1 List \$2.50

JFD RADIO CABINET SPEAKER GRILLE CLOTH

Highest quality. Blends with any shade cabinet.

44-700	100 trimounts 5/8" long	1.92

MICROPHONE CONNECTORS

Non-shorting chassis mounting and mike connector. Standard solder contact. Used with ST164.

No. ST167	List \$0.33
-----------	-------------

Standard shorting male with eyelet; milled flat to prevent turning. Prevents open circuit noise when microphone is disconnected, grounding automatically.

No. ST168	List \$0.44
-----------	-------------

Standard chassis mount male solder contact with milled flat preventing turning in chassis.

No. ST190	List \$0.35
-----------	-------------

Cap and chain assembly. Eliminates dust and noise by keeping open chassis units sealed.

No. ST191	List \$0.50
-----------	-------------

Double female coupling. Fits ST165 and ST167.

No. ST192	List \$0.25
-----------	-------------

JFD RADIO INTERFERENCE FILTER

An exceptionally effective filter for the most serious cases of radio interference from power lines and appliances. Filter plugs into electric outlet and radio set or noise-producing device plugs into receptacle on filter. For use on 110 volts AC or DC, up to 5 amps.

Thorough filtering action is obtained by use of inductance as well as capacitance. This filter is especially desirable for connection between interfering device and power line. Housed in hand some brown wrinkle-finish case, with 6 1/2 ft. cord.

No. ST1040	List, ea. \$8.50
------------	------------------

JFD FLUORESCENT LIGHT NOISE SUPPRESSORS

Approved by Underwriters' Laboratories

Designed to suppress noises caused by fluorescent lamps. Also efficient for correcting radio interference caused by electrically operated machines and appliances. Easy to install.

No. ST1030	List \$1.50
------------	-------------

JFD BAKELITE SOCKETS

Highest quality molded bakelite sockets. High dielectric. Have plated non-corroding bronze sockets. Three grounding lugs on metal base of each socket are automatically grounded when socket is installed, 1 1/2" mounting centers, 1-3/32" mounting hole.

No.	Prongs	List

JFD REPLACEMENT PHONO-RADIO SWITCH

For quickly connecting Record Players, Microphones, F.M. or Television Attachments, etc., to the audio amplifier of radio receivers... Also replaces R.C.A. Part No. 9824A.

No. ST145.....List \$2.25

(Complete with Midget Tip Plug)

JFD PHONOGRAPH PICKUP ADAPTERS

Completely assembled and wired on a sturdy steel frame... easily and quickly mounted in any cabinet.

"G", "GT" METAL TUBE OCTAL BASE ADAPTER

For use with detector (2nd detector Superhet.) for audio amplifying tubes with an octal (8 prong) base without top grid cap and with basing similar to 6AC5G, 6AE5T, 6C5, 6C8G, 6F6, 6F8G, 6G6G, 6H6, 6J5, 6K6G, 6L6G, 6N6G, 6N7, 6T7G, 6Y6G, 6Z7G, 12J5GT, 25A6, 25A7G, 25AC5GT, 25B6G.

No. ST181—Complete with Standard Plug, Jack and Wired Tube Socket Adapter.

List Price \$3.00

STANDARD GRID CAP ADAPTER

For use with tubes used as detector or amplifier such as 2A6, 2B7, 6B7, 6C6, 6D6, 6F7, 2A4, 36, 39, 56, 57, 58, 75, 77, 78, 79, 85.

No. ST182—Complete with Standard Plug and JackList Price \$2.25

5-PRONG UY BASE ADAPTER

For use with 5 prong tubes used as detector or audio amplifier such as 27, 37, 49, 56, 76.

No. ST183—Complete with Standard Plug, Jack and Wired Tube Socket Adapter.

List Price \$3.00

"SINGLE-ENDED" DIODE-TRIODE BASE ADAPTER

For use with single ended "S" series tubes used as detector or amplifier with basing similar to 6SQ7, 6SR7, 12SQ7, 12SR7.

No. ST184—Complete with Standard Plug, Jack and Wired Tube Socket Adapter.

List Price \$3.00

"SINGLE-ENDED" TRIODE-PENTODE BASE ADAPTER

For use with single ended "S" series tubes used as detector or amplifier with basing similar to 6SC7, 6SF5, 6SJ7, 12SC7, 12SJ7, 12SF5.

No. ST185—Complete with Standard Plug, Jack and Wired Tube Socket Adapter.

List Price \$3.00

"G", "GT" METAL TUBE GRID CAP ADAPTER

For use with metal "G" or "GT" type tubes having top control grid cap such as 6B6G, 6B8G, 6C8C, 6F5, 6F8G, 6J7, 6J7GT, 6K5G, 6K7, 6Q7, 6Q7GT, 6R7, 6T7G, 12C8, 12F5GT, 12J5GT, 12J7GT, 12K7GT, 12Q7GT.

No. ST186—Complete with Standard Plug and JackList Price \$2.25

Radio Hardware and Essentials

JFD SPEAKER SPIDERS

A full selection of speaker spiders as originally used on 5", 6", 8", 10", 12" speakers by all leading speaker manufacturers. Made of finest and best strength tensile fibre.

Catalog No.	Outside Diameter	List Price Each
6-1	1 1/4"	\$0.15
6-2	1 1/2"	.20
6-3	1 3/4"	.25
6-4	2 1/2"	.40

JFD Twin-Lead 300 Ohm Wire for Television & FM

Extruded parallel ribbon-type lead-in wire. Polyethylene insulation—300 ohm surge impedance. Will withstand severe weather and use. Highly recommended for FM, Television receivers.

TW-1—100' Reels (as shown)		
List Price		\$4.85/C'
TW-1—1000' Reels		
List Price		\$41.75/M'

JFD TEN KV TEST LEADS

A—For checking high voltages in TV units. Safety, non-slip feature prevents contact. No. 3-20—List Price Per Pair \$4.00

B—Leads made of heavy-duty, heavy-gauge, rubber-insulated wire. High insulation factor.

No. 3-25—List Price, Per Foot \$0.06

JFD 9-PIN ADAPTERS

To adapt all octal tube testers—fixed and 3-point or selective type testers.

A—To test 12AU7 and 12AT7 (fixed).

No. 88-1 List Price \$2.25

B—To test 6TS and 19TS (fixed).

No. 88-2 List Price \$2.25

C—For all 9-pin noval tubes in 3-point or selective type testers.

No. 88-3.....List Price \$2.50

JFD Insulated SCREWDRIVER

Same as No. 5-50—only 3/8" rod. Sturdy, durable bone fibre. No metal parts. Ends can be reground. 7" long.

No. 5-72.....List Price \$0.40

JFD SPECIAL WAFER SOCKETS

Used in battery construction and other applications. Made of fine grade Phenolic laminated materials (with or without wax impregnating). Contacts are spring metal finished in Cadmium, Silver or Hot Tin. Come in wide range of size and layout to meet any and all requirements.

No.	Prongs	List Price
62-2	2	\$0.11
62-3	3	.16
62-4	4	.20
(Used with Burgess G6B60; Willard WZ3)

(Used with Burgess G4B501 Willard WZ2)		

DETROLA RECORD CHANGER DRIVE SPRING AND RUBBER

Detrola part No. 59137 for Detrola Model No. 626, etc. This is the same spring used by the manufacturer in his original equipment. Elastic tension spring with core.

No. 63-1—Original Spring List Price \$0.50

No. 63-2—Original Rubber..... " " .60

JFD COMPRESSION SPRINGS

Used for repair work on radio dials, push buttons, phonograph motors, electronic appliances, etc. Assortments contain all needed springs.

No. 55-20—Bag of 20 Small Springs. List Price \$0.40

No. 55-15—Bag of 15 Large Springs. List Price \$0.40

JFD VACUUM CLEANER BELTS

Made of finest grade five rubber. Here is an item that has a tremendous market. These belts can be sold to every radio customer. Carry a JFD assortment with you when making calls. Display them in your shop—it will mean profits for you.

No. 56-1—Flat Belt, 2 1/8" I.D. x 1/2" wide x 1/8" thick. Fits Premier Duplex Jr.; G.E.; AMC; Bee Vac; Eureka, G. Models; Hamilton Beach, 8, 12, 14; Kenmore, BV Types; Universal; Westinghouse \$0.20

No. 56-2—Flat Belt, 2 3/8" I.D. x 1/2" wide x 1/8" thick. Fits Premier Duplex, G.E.; Westinghouse; Royal; Universal; Hamilton Beach; AMC, Airway; Apex; Eureka; Graybar; Kirby; Regina; Scott-Fitzer; Sweeper Vac \$0.20

No. 56-3—Flat Belt, 3 1/2" I.D. x 1/2" wide x 3/8" thick. Fits Airway; Apex; G.E.; Kenmore; Premier; Singer \$0.25

No. 56-4—Flat Belt, 3 3/4" I.D. x 1/2" wide x 2 1/2" thick. Hoover large flat type \$0.25

No. 56-5—Round Belt, 3" diam. x 1/8" thick. Fits Hoover, 25, 26, 27, 80, 103, 150, 360, 305, 450, 475; Apex, 129. \$0.25

No. 56-6—Round Belt, 3 3/4" diam. x 1/4" thick. Fits Hoover models, 102, 105, 541, 543, 961, N. Special \$0.25

No. 56-7—Round Belt, 3 3/4" diam. x 3/8" thick. Fits AMC; Kenmore Commander; Hoover models 60, 90, 575, 700, 725, 750, 800, 925, 930 \$0.25

JFD FIBRE SHOULDER WASHERS

Finest insulating material. Ideal for use on metal panels wherever insulating washers are used.

- A: Inside Diameter
- B: Outside Diameter
- C: Thickness Overall
- D: Height of Shoulder
- E: Diameter of Shoulder

Radio Hardware and Essentials

ADAPTER HARNESSES

For sets using 1½V "A" and 90V "B". Permits using separate batteries 4-pin socket on harness fits plug from set. Other end of harness has tinned ends for convenient connection under the terminals of the batteries where screw terminals are used. Can be used with packs listed under harness No. 503.

No. 503SP..... List Price 0.65

JFD BATTERY CABLE

All-around harness to be used as replacement on farm and portable radio battery sets. On Philco and others. 24" long.

No. 707SP
List Price\$0.65

67½ VOLT "B" Battery Snap-On

Snap-on has + and - terminal connections. Gives you an effective, positive connection to a 67½ volt "B" portable battery.

No. 734
List Price \$0.30

ADAPTER HARNESS

For Zenith Sets
Using 1½V "A" and 90V "B"

This harness is designed particularly for Zenith battery-powered sets, and similar sets having standard octal battery cable plug.

The purpose of this harness is to permit the use of

easily available combination "AB" packs such as: Burgess 17GD60, Eveready 748, etc. In place of hard-to-get Zenith packs, tubes 7-9-B, Z-28, etc. The standard octal socket at one end of this adapter takes the plug from radio set. The other end of the adapter plugs into the socket on the Burgess 17GD60, Eveready 748, etc., packs.

No. 526..... List Price \$1.25

ADAPTER HARNESS Using 1½V "A" and 90V "B" Battery

This harness is the reverse of our type No. 526. Permits the use of Zenith packs that use a standard octal socket, to adapt to any battery, radio equipped with 4-prong male plug.

No. 526-R..... List Price \$1.25

JFD PHONOGRAPH PICKUP ADAPTER FOR FARM RADIOS

To connect a phonograph to a farm radio which is not wired for a record-player, simply plug adapter in tube socket. Used with spring-wound motors, and crystal pickups or high impedance pickups with volume control mounted on motor box. For use with detector (2nd detector Supermet) for audio amplifying tubes

No. 88-14—With a lock-tal base, used with following tubes: 1LA4, 1LB4.
List Price \$3.00

No. 88-15—With octal (8 pin) base, used with following tubes: 1A5, 1C5, 1E7, 1F5, 1G5, 1J5, 3Q5..... List Price \$3.00

JFD REPLACEMENT PHONO-RADIO SWITCH WITH VOLUME CONTROL

For quickly connecting Record players, Microphones, FM, or television attachments, etc., to the audio amplifier or radio receivers where no means of controlling the volume of the Phono Pickup is supplied. Also replaces R.C.A. part No. 9824A.
No. ST145VC..... List Price \$3.50

Twin-Lead Lightning Arrestor

The only 300 ohm lightning arrestor that does not destroy the impedance of a 300 ohm transmission line. Can be attached anywhere, even after installation is complete. No wirestripping necessary! Simple provision for grounding.

No. AT102 — JFD 300 Ohm Lightning Arrestor.
List Price \$2.25

JFD AUTOMATIC LINE VOLTAGE REGULATOR

Prevents burning out of radio set tubes by keeping line voltage at constant level. Operates on 110 volts AC or DC. Simply plug into socket — safeguards against surges or increases up to 140 volts. The voltage drop

across the JFD Automatic Regulator is negligible at 110 volts but increases proportionately as the line voltage increases. Insures a steady, practically constant and safe operating potential.

Cat.	Rating	For Use With	Tubes Used	List Price

No. G-50—Kit of 50 popular belts ... 13.40
No. G-100—Kit of 100 (includes every size) 25.00

INSTRUCTIONS — FOR MEASURING BELTS

To determine size of belt, if the old belt is available, cut the belt and measure for stretched out length. This will be "cut length" of belt. If old belt is not available or is worn out so that it cannot be properly measured, stretch a thin thread around belt pulleys on set. (Be sure to use thin thread as a thick cord will give an inaccurate reading.) Measure the thread, it will be our "circumference around pulleys." In measuring belts always remember that the circumference around pulleys is not the same as stretched out or cut length. A belt when cut, develops approximately 3/16" extra length when stretched out, depending on thickness of belt.

Set screw type. $\frac{3}{4}$ " and 1" diam., $\frac{1}{4}$ " shaft.
No. List
1109 $\frac{3}{4}$ " Wln. \$0.16
1110 1" Walnut .16
1109-I $\frac{3}{4}$ " Ivory .20
1110-I 1" Ivory .20

MODERN LARGE KNOB
Knurl shaft or set screw types. $1\frac{1}{8}$ " diameter.
No. List
Knurl Shaft Type
1176 Walnut \$0.12
Set Screw Type
1177 Walnut .16

NEW LARGE KNOB
Knurl shaft or set screw types. $1\frac{1}{8}$ " diameter.
No. List
Knurl Shaft Type
1178 Walnut \$0.12
Set Screw Type
1179 Walnut .16

POPULAR LARGE KNOB
Knurl shaft or set screw types. $1\frac{1}{8}$ " diameter.
No. List
Knurl Shaft Type
1180 Walnut \$0.12
Set Screw Type
1181 Walnut .16

MIDGET BAKELITE KNOBS
Set Screw Type
For small sets. $\frac{11}{16}$ " diam., $\frac{1}{8}$ " shaft.
No. List
Pointer Type
1115 Walnut \$0.12
1116 Ivory .13
1117 Red .13
1118 Black .12

MIDGET BAKELITE KNOBS
Non-Pointer Type
For small sets. $\frac{11}{16}$ " diam., set screw $\frac{1}{8}$ " shaft.
No. List
1111 Walnut \$0.12
1112 Ivory .13
1113 Red .13
1114 Black .12

STREAMLINE POINTERS
The most popular pointer knob. $\frac{1}{4}$ " shaft, set screw type $1\frac{1}{4}$ " long.
No. List
1136 Black \$0.15
1136-W Walnut .16
1137 Red .18
1137-I Ivory .20

STREAMLINE POINTERS
A very popular pointer knob. $\frac{1}{4}$ " shaft, set screw type, 2" long.
No. List
1135 Black \$0.20
1135-W Walnut .24
1138 Red .24
1138-I Ivory .26

MODERN POINTER BAR KNOBS
Brass Bushing
For intercomms and instruments. Black finish. Set screw, $\frac{1}{4}$ " shaft, $1\frac{1}{8}$ " long.
No. List
1130 Black \$0.38
1130-W Walnut .38

MODERN POINTER BAR KNOBS
Brass Bushing
For intercomms and instruments. Black finish. Set screw, $\frac{1}{4}$ " shaft, $1\frac{1}{8}$ " long.
No. List
1131 Black \$0.35
1131-W Walnut .35

INSTRUMENT KNOB
A heavy duty knob for communication equipment. Instruments. $\frac{1}{4}$ " brass insert, set screw. $1\frac{3}{4}$ " O.D. x $\frac{7}{8}$ ".
No. List

1173-I Ivory .36

POPULAR BAR KNOB
For intercomms, instruments, appliances. Bakelite with set screw. $\frac{1}{4}$ " hole. $1\frac{5}{8}$ " long.
No. List
1132 Walnut \$0.20

POPULAR PLASTIC KNOB
 $1\frac{1}{8}$ " diameter with $\frac{1}{8}$ " shank extension for $\frac{1}{4}$ " knurled shaft.
No. List
1153 Walnut \$0.12
1154 Ivory .13

ATTRACTIVE PLASTIC KNOB
 $1\frac{1}{8}$ " diameter, flush type for $\frac{1}{4}$ " knurled shafts.
No. List
1155 Walnut \$0.12
1156 Ivory .13

MIDGET TYPE PLASTIC KNOB
 $\frac{3}{8}$ " diam., $\frac{3}{8}$ " shank for $\frac{1}{4}$ " knurled shafts.
No. List
1157 Walnut \$0.12
1158 Ivory .13

MIDGET TYPE PLASTIC KNOB
 $\frac{3}{8}$ " diam. flush type for $\frac{1}{4}$ " knurled shafts.
No. List
1159 Walnut \$0.12
1160 Ivory .13

ACORN PLASTIC KNOB
 $\frac{3}{8}$ " diam., $\frac{1}{4}$ " shank for $\frac{1}{4}$ " knurled shafts.
No. List
1182 Walnut \$0.12
1183 Ivory .13

PUSH-ON KNURL KNOB
 $1\frac{1}{8}$ " diam. flush type for $\frac{1}{4}$ " knurled shafts.
No. List
1184 Walnut \$0.12
1185 Ivory .13

PUSH-ON KNURL KNOB
 $1\frac{1}{8}$ " diam., $\frac{1}{2}$ " shank for $\frac{1}{4}$ " knurled shafts.
No. List
1186 Walnut \$0.12
1187 Ivory .13

POINTER TYPE PLASTIC KNOB
 $1\frac{1}{8}$ " diam., $\frac{1}{2}$ " shank for $\frac{1}{4}$ " knurled shafts.
No. List
1188 Walnut \$0.12
1189 Ivory .13

MIDGET TYPE PLASTIC KNOBS
 $\frac{3}{8}$ " diam., $\frac{1}{2}$ " shank for $\frac{1}{4}$ " knurled shafts.
No. List
1197 Walnut \$0.12
1198 Ivory .13

MIDGET TYPE PLASTIC KNOBS
 $\frac{3}{8}$ " diam., flush shank for $\frac{1}{4}$ " knurled shafts.
No. List
1193 Walnut \$0.12
1194 Ivory .13

SPRING AND D-SHAFT KNOBS
Spring type, $1\frac{1}{2}$ " diam. Fits $\frac{1}{4}$ " flat shafts.
No. List
1151 Walnut \$0.12
1152 Ivory .13

SPRING AND D-SHAFT KNOBS
D- or flat shaft type. $\frac{5}{8}$ " diam.
No. List
1161 Walnut \$0.12
1162 Ivory .13

SPRING AND D-SHAFT KNOBS
D- or flat shaft type. $\frac{3}{4}$ " diam.
No. List
1163 Walnut \$0.13
1164 Ivory .14

SPRING AND D-SHAFT KNOBS
D- or flat shaft type. 1" diam.
No. List
1165 Walnut \$0.14
1166 Ivory .15

G-C RADIO KNOB KITS

Popular plastic knobs in assorted kits, all kinds of knobs included.

G-C AUTO RADIO KNOBS
 $1\frac{1}{2}$ " diam. x $\frac{1}{2}$ " high. For $\frac{1}{4}$ " and $\frac{3}{8}$ " shafts. Brass bushing with set screw.
No. List
 $\frac{1}{4}$ " Shaft
1191 Pearl Gray \$0.30
1192 Maroon .30
 $\frac{3}{8}$ " Shaft
1167 Pearl Gray .30
1168 Maroon .30

G-C AUTO RADIO KNOBS
Set screw type auto radio knob. $1\frac{1}{2}$ " diam. x $\frac{1}{2}$ " high. For either $\frac{1}{4}$ " or $\frac{3}{8}$ " shafts with bushing.
No. List
1195 Pearl Gray \$0.30
1196 Maroon .30

G-C AUTO RADIO KNOBS
Chrome plated. For $\frac{1}{4}$ " and $\frac{3}{8}$ " shafts. Set screw mounting.
No. List
1169 $\frac{1}{4}$ " \$0.30
1174 $\frac{3}{8}$ " .30

G-C KNOB SET SCREW ASST.
Handy set screw assortments for radio knobs, shafts, pulleys, 6-32, 8-32, and 10-32.
No. List
1060 50 Asst. \$1.00
1061 100 Asst. 1.80
1062-E 20 Asst. .40
6605 30 Asst. .65

No. Quantity List
1140 35 Asstd. Push-on Buttons \$3.95
1141 28 Asstd. Spring Knobs 3.95
1142 24 Asstd. Set Screw Knobs 3.95
1143 30 Asstd. All Type Knobs 3.95

CEMENT

PHONO NEEDLES and ACCESSORIES

G-C MASTER POINT PHONO NEEDLES

G-C CATHEDRAL TONE

Long life, excellent tone needle made with osmium alloy tip to insure uniform reproduction and long life. Will save the records and give excellent reproduction for a long time.

No.	Each	List
1430		\$0.75
1431-D Display		
12 # 1430,		9.00

G-C SYMPHONIC NEEDLE

Superior quality long life needle designed to give excellent tone. Special osmium alloy tip gives true reproduction with less pressure on the records. Will last indefinitely.

No.	Each	List
1435		\$1.00
1435-D Display		
12 # 1435,		12.00

G-C CONCERT GRAND

Very finest "long life" curved "spring action" needle that will bring out the finest tones in music. Special osmium alloy tip insures long life. Tip is perfectly formed to fit record grooves. The best.

No.	Each	List
1436		\$1.50
1436-D Display		
12 # 1436,		18.00

G-C RECORD-LIFE LUBRICANT

Simply wipe record with "Record-Life" and the needle will glide over the record smoothly. Prevents record and needle wear; also eliminates noises and scratching sounds. Use also for making records.

No.	1-oz.	List
125-1		\$0.25
125-2	2-oz.	.50
125-4	4-oz.	.75
125-6	6-oz.	.90

G-C REK-O-DOPE

Required lubricant when recording and cutting records. All purpose, it cools, cleans, lubricates, and hardens grooves when cut. Rek-O-Dope will give better tone and longer life.

No.	1-oz.	List
126-1		\$0.25
126-2	2-oz.	.50
126-4	4-oz.	.75
126-6	6-oz.	.90

G-C CORD CONNECTOR

Handy cord connector to connect phono motors to radio sets, for appliances, vacuum cleaners, sewing machines, etc.

No.	List
868	\$0.65

G-C JUKE SPECIAL PHONO NEEDLE

Long life needle. Preferred by operators on coin machines, automatic records, etc. Precious osmium tip will give long, hard service and tone quality, even when used with heavy pick-ups. Will give thousands of plays.

No.	Each	List
1437		\$1.00
1437-D Display		
12 # 1437,		12.00

G-C RECORDING STYLUS

The best cutting stylus made from alloy steel will give several hours of good cutting. Make your own recordings.

No.	Each	List
1433		\$0.50
1434-D Display		
12 # 1433,		6.00

G-C SERVICEMAN'S NEEDLE PACKET

Handy package containing ten assorted high quality G-C Master-Point Needles. Packaged in attractive folder which protects the needle packages so that they are fresh and new when you make your sale.

No.	List
1432 Packet	\$9.50

G-C RECORD TURNTABLE FELT

Re-cover phono turntables with ready cut felts. Dark brown.

No.	Dia.	List
1292	7 7/8"	\$0.40
1296	8 7/8"	.55
1293	9 7/8"	.60
1294	11 7/8"	.70
1295	15 7/8"	1.20
Brown Felt — By The Yard		
1298	36" Wide, per yd.	5.00

G-C DETROLA SPRING DRIVE

Genuine replacement for Detrola turntables. Spring drive with core inside. Used on Detrola, Utah, and Trela models, etc.

No.	List
20-1-E Detrola Spring	\$0.50

G-E — RCA PHONO DRIVES

Special V and Rim drives for RCA, RP-176 and G-E, 809-J turntables.

No.	List
22 Large Tire, each	\$1.00
23-E Env. 2 Rim Drives	.40

G-C PHONO NEEDLE STYLUS SCREWS

Here's the hard-to-get replacement thumb set screws for pick-up arms and recording heads!

No.	List
1052 15 Asst. Stylus Screws	\$ 1.50
1052-E Env. 7 Asst. Screws	.40
1053 100 Asst. Stylus Screws	10.00

GENERAL

CEMENT

SWITCHES - SPAGHETTI TUBING

G-C TOGGLE SWITCH

S.P.S.T. Radio and appliance switch. Open housing, underwriters approved. Made by Cutler-Hammer, 3 amp. 125 volt. Nickel Plated.

No.	List
1339 S.P.S.T.	\$0.40

G-C PUSH-ON PUSH-OFF SWITCH

For vacuum cleaners, appliances, test equipment. Made by H & H for G-C. Rated at 3 amps., 125 volts. Nickel Plated.

No.	List
1338 S.P.S.T.	\$1.30

G-C BAT HANDLE SWITCH WITH WIRE LEADS

For vacuum cleaners, appliances, radio sets, etc. Made by H & H for G-C. Rated at 3 amps., 125 volts. Nickel Plated.

No.	List
1335 S.P.S.T.	\$0.85

G-C ON-OFF PLATE

Will fit the G-C, H & H, Cutler - Hammer, and other makes of standard switches.

No.	List
1329 On-Off Plate	\$0.05

G-C BAT HANDLE TOGGLE SWITCH

Tear drop handle general purpose switch. Made by H & H for G-C. 3 amps., 125 volts. Nickel Plated.

No.	List
1330 S.P.S.T.	\$0.60
1331 S.P.D.T.	.70
1332 D.P.S.T.	1.20
1333 D.P.D.T.	1.30

G-C TOGGLE SWITCHES

Ball handle general purpose switch. Made by H & H for G-C. 3 amps., 125 volts. Nickel Plated.

No.	List
1300 S.P.S.T.*	\$0.60

* ¾" Shank Length.
† 1" Shank Length.

G-C NEUTRAL CENTER SWITCH

Handy radio, appliance and tester switch with 3 positions, On-Off-On. Rated 15 amps., 110 volts; ¼" shank. Nickel Plated.

No.	List
1308 S.P.D.T.	\$1.25
1309 D.P.D.T.	2.00

G-C EXTRA HEAVY DUTY POWER SWITCH

Three position for motors, projectors, transmitters, movie equipment, etc. Made by H & H for G-C. 10 amps., 125 volts. Neutral off in center. Size 2" x 1" x 1½", shank ¾" diameter.

No.	List
1352 D.P.D.T.	\$5.50
1353 S.P.D.T.	8.25
1354 A.P.D.T.	12.00

G-C HEAVY DUTY POWER SWITCH

Push button, D.P.S.T. safety switch for transformers, racks, transmitters, refrigerators and high frequency work. Made by H & H for G-C. 12 amps., 125 volts. Nickel Plated.

No.	List
1351 D.P.S.T.	\$2.20

G-C HEAVY DUTY POWER SWITCH

D.P.S.T. toggle power switch for motors, appliances, projectors, etc. Made by H & H for G-C. 12 amps., 125 volts. Nickel Plated.

No.	List
1350 D.P.S.T.	\$1.50

G-C SLIDE SWITCHES

For phonographs, tone controls, auto lights, electric trains, etc. ½" wide x 1½" center mounting.

No.	List
1355 S.P.S.T.	\$0.35
1357 S.P.D.T.	.40
1358 D.P.S.T.	.45
1359 D.P.D.T.	.50

G-C RADIO FRICTION TAPE

This narrow ¾" tape was particularly made for radio work. It eliminates waste and tearing of tape. It saves time and is handy to carry with you.

No.	Roll	List
870	65 ft.	\$0.55

G-C PLASTIC TUBING KITS

Handy kits of assorted colors and sizes. Ideal for experimenters and servicemen.

G-C 860 CAP

Spring action flat brown bakelite cap. Approved brass blades.

No.	List
860 Cap	\$0.25

G-C 861 CAP

Spring action, finger grip rubber caps. Approved, screw terminal brass blade.

No.	List
861 Cap	\$0.25

G-C 865 CAP

Modern flush type rubber cap. Easy to assemble. No exposed screws or wires.

No.	List
865 Cap	\$0.25

G-C 867 PLUG

Popular screw plug for standard sockets.

No.	List
867 Plug	\$0.17

G-C CUBE TAP

New type spring action cube tap with 3 outlets always available.

No.	List
862 Brown	\$0.30

G-C CORD CONNECTOR

Brown bakelite with bronze contacts.

No.	List
863 Brown	\$0.25

G-C SURFACE BLOCK

3-plug. Bakelite outlet for extension cords. Can fasten to wall or base.

No.	List
866 Brown	\$0.50

G-C AUTO ANTENNA PLUG

Shielded connector plug as used on Motorola and other auto radios.

No.	List
1740	\$0.15

G-C ANTENNA CONNECTOR JACK

Shielded jack to fit the 1740 plug for auto antenna and phonograph connection.

No.	List
1741	\$0.25

G-C PHONO PLUG

For all phonographs and auto radio connections; RCA, Zenith, Philco and others.

No.	List
1742	\$0.10
1742-E Env. of 4	.40

G-C PHONO JACK

Used for phonograph attachments. To be used with 1742 plug.

No.	List
1743	\$0.15
1743-E Env. of 3	.40

G-C EXTENSION JACK AND CONNECTOR

For extending radio ant. cables and phono attachments. Fits 1740 or 1742 plugs.

No.	List
1744	\$0.20

G-C MOTOROLA LEAD ADAPTER

Adapter plug used to adapt bayonet type connector to Motorola type.

No.	List
1745	\$0.35

G-C ADAPTER SHELL

Used to change the Motorola fitting to bayonet type connector.

No.	List
1746	\$0.10

G-C ANTENNA CONNECTOR

Used for connections on auto antenna and ground lines.

No.	List
1747	\$0.15

G-C JUMBO FUSE HOLDER

14 amp. fuse holder, 2 1/2" long x 1/2" diameter.

No.	List
1748	\$0.30

G-C FUSE CONNECTOR

Regular Type Used on auto radios and other equipment. Completely assembled.

No.	List
1749	\$0.20

G-C ANTENNA CONNECTOR END

To be used with regular antenna connectors. With bushing.

No.	List
1750	\$0.10

ALIGNMENT COMBINATION TOOLS

G-C COMBINATION ALIGNMENT TOOL

Popular bone fibre tool. Consists of screwdriver with metal nib, 1/8" slotted hex wrench and 1/16" hex wrench on other end.

No.	List
5014	\$0.85

G-C No. 5015 ALIGNMENT TOOL

Popular combination tool. Bone fibre. Includes metal screwdriver tip to fit hex wrench, 1/8" hex wrench, 1/4" slotted hex wrench and fibre screwdriver with metal nib.

No.	List
5015	\$1.35

G-C DELUXE COMBINATION ALIGNMENT TOOL

Most useful tool designed to use in cramped quarters. Bone Fibre. Consists of short screwdriver with metal nib and 1/4" hex side wrench with slotted 1/4" hex end wrench, 3/8" hex wrench and heavy metal screwdriver tip.

No.	List
5016	\$1.35

G-C INSULATED HEX WRENCH AND DRIVER

Combination insulated 1/4" hex wrench and screw-driver. Screw-driver can be extended for extra length. Made of bone fibre.

No.	Extends	List
5005	7"-13"	\$0.75
5006	Extends 11"-17"	1.00

ALIGNMENT SCREWDRIVERS

G-C NON-EXTENSION INSULATED WRENCH AND DRIVER

Combination tool 1/4" hex wrench on one end and screwdriver on other. 6" overall length. Made of bone fibre.

No.	List
5007	\$0.40

G-C ALIGNMENT SCREWDRIVER

Popular insulated tool. New low inductance material with metal nib. Strong and flexible. Two sizes.

No.	Size	List
5000	1/4" x 6"	\$0.40
5088	3/8" x 6"	.40

G-C BONE FIBRE ALIGNMENT SCREWDRIVER

Indispensable for all sets. Tough black bone fibre resists chipping. Can be reground. 1/4" blade on each end.

No.	List
5004	7" \$0.40

G-C POLYSTYRENE ALIGNMENT SCREWDRIVER

For U.H.F. sets. Best low loss material. 1/4" blades on both ends. Blades easily reground.

No.	Length	List
5008	7"	\$0.40

G-C DUPLEX NO-METAL ALIGNMENT SCREWDRIVER

In polystyrene or hard bone fibre. 1/4" blade on one end and 1/8" blade on other. 6" long. Tips easily reground.

No.	Material	List
5009	Bone Fibre	\$0.40
5010	Polystyrene	.40

G-C DUPLEX ALIGNMENT SCREWDRIVER

Made of Genflex low-loss material. Especially strong. 1/4" driver on end and 3/8" on other. Metal tips for extra strength.

No.	List
5001	\$0.75

G-C RCA TYPE ALIGNING SCREWDRIVER

Especially for push button adjustments. Narrow screwdriver on one end and recessed screw nib on other. 1/4" Bone Fibre.

No.	List
5003	\$0.75

G-C PHILCO, RCA TYPE TRIMMER TOOL

For neutralizing air trimmers. 3/8" bone fibre. Special clip-on end, metal tip on other.

No.	List
5086	\$0.60

G-C BALANCING TOOL

For adjustments in close quarters. Two 1/4" hex wrenches; one on side and other on end. Fibre screwdriver with metal tip.

No.	List
5084	\$0.50

G-C DUPLEX TUBE TAPPER

Handy soft rubber mallet on one end and insulated 1/4" bone fibre screwdriver on other.

No.	List
5081	\$0.65

G-C MULTI-PURPOSE TOOL

For neutralizing padding condensers and iron core tuners. One end metal screwdriver, other sleeve socket screwdriver. Best steel, fibre handle.

No.	List
5091	\$0.75

G-C NEUTRALIZING TOOL

U.S.A. type TL-138-B. Special short tool. Bone Fibre.

No.	List
5066	\$1.50

G-C U.S.A. TYPE TL-138-A ALIGNING TOOL

To Government specifications. Sturdy. For tuning and aligning. 6" long. Bone Fibre.

No.	List
5098	\$1.00

G-C CABLE EYELET TOOL

For eyelets and rivets on dial cables, part assemblies, etc. Includes clincher punch and base. Tempered steel.

No.	List
741	\$1.00

G-C DIAL CABLE TOOL

Makes it easy to replace dial cords and springs. A necessity in cramped quarters.

No.	List
5096	Dial Cable Tool \$0.75

G-C FLEXIDRIVER

Flexible shaft for "hard to get places." Insulated guide for tip. Army-Navy approved. 7" overall length.

No.	List
5019	\$2.90

G-C DELUXE ALIGNMENT KIT

Fourteen most popular tools including Flexible Shaft Screwdriver and Tuning Wand, designed into seven basic tools, some of which telescope together. Contains one each Nos. 5002, 5004, 5011, 5014, 5016, 5017, 5019. In leatherette roll-type case.

No. 5026 Kit List \$7.50

G-C NX ALIGNING KIT

Popular approved Army - Navy Kit for all sets. Fourteen tool applications, some telescoping together, to form five basic tools. Contains Nos. 5004, 5011, 5017, 5015, 5016, and leatherette case.

No. 5020 Kit List \$6.50

5052	5"	1 1/8"	.25
5053	6"	1 1/4"	.35
5054	8"	1 3/8"	.40
5055	12"	1 3/4"	.50

G-C PHILCO TYPE ALIGNMENT WRENCH

5/8" Hex Wrench on one end, metal hook for air trimmers on other. For RCA, Victor, Philco, etc. Bone fibre handle.

No. 5085 List \$1.50

G-C DUPLEX WRENCH ALIGNMENT TOOL

Long life 1/4" hex wrench on one end and 3/8" hex wrench on other. Brass nickel-plated. Tapered bone fibre handle.

No. 5017 List \$1.25

G-C DUPLEX ALLIGATOR WRENCH

RCA, Philco type. Metal alligator wrench on one end, alignment screwdriver with metal tip on other. 3/8" shaft. Insulated bone fibre.

No. 5011 List \$0.50

G-C DOUBLE ALLIGATOR ALIGNING WRENCH

5/8" bone fibre handle with alligator wrench on one end and 1/4" brass hex wrench on other. Popular.

No. 5012 List \$0.50

G-C INSPECTION MIRROR

New! For close inspection of parts in hard-to-get-at quarters, under chassis, etc. Long handle.

No. 5090 List \$0.50

G-C WRENCH AND SCREWDRIVER ALIGNING TOOL

Popular 1/4" hex wrench on one end, 3/8" metal nib screwdriver on other. Bone-fibre-insulated handle.

No. 5013 List \$0.35

G-C BAKELITE 5/16" WRENCH

Molded 5/8" hex wrench with reinforced brass collar. Metal screwdriver tip included.

No. 5083 List \$0.50

G-C "STRATO" TUNING WAND

Chrome brass cylinder, iron core on ends of low loss girthflex rod. Inserting core in coil increases inductance, brass end decreases inductance. Checks tuning fast.

No. 5002 List \$1.00

G-C TEST PROBE

Checks loose connections and parts. Metal hook on one end and insulated fibre tip on other.

No. 5082 List \$0.50

G-C SCREWDRIVER

Insulated. One size for knobs, other for small parts. Best tempered steel.

No. 5056 1/8" x 3" List \$0.25
No. 5057 3/8" x 3" .75

G-C BAKELITE ALIGNMENT TOOL

U. S. Army type TL-207. Combination 3/8" Hex Wrench with telescoping screwdriver. Moulded bakelite, reinforced with metal.

No. 5027 List \$2.25

G-C ARMY-NAVY TYPE NEUTRALIZING TOOL

Approved. Double end bakelite tool 3/2" diam, x 6" long.

No. 5099 List \$1.25

G-C ZENITH PUSH-BUTTON WRENCH

5/8" hex on one end, slotted on other. Tempered steel, nickel-plated. Necessity for Zenith sets.

No. 5094 List \$0.17

G-C CONTACT ADJUSTER

Handy for contacts on switches, jacks, condenser plates, relays, pinball-coin machines, radios. Tempered steel, nickel-plated.

No. 5095 List \$0.17

G-C TELEVISION AND F-M WRENCH AND SCREWDRIVER

Adjusts smallest trimmer condensers. Small 3/8" screwdriver on one end, reinforced 5/8" hex wrench on other. 6" long. Bone fibre.

No. 5067 List \$1.00

G-C TELEVISION AND F-M TOOLS

G-C TELEVISION ALIGNING WRENCH

New Television Tool! 1/4" socket wrench, 3/8" steel shaft with insulated handle. Approx. 6" overall length.

No. 5080 List \$0.75

G-C T-V AND F-M ALIGNING TOOL

Socket-type screwdriver of tempered steel. Bone fibre handle.

No. 5018 List \$0.75

G-C BENDIX-RCA TELEVISION SCREWDRIVER

For push buttons, television and F.M. Small diameter. Metal tip on one end and recessed tip on other. Insulated bone fibre.

No. 5087 List \$0.75

G-C K-TRAN ALIGNING TOOL

Special bone fibre screwdriver one end, reinforced 3/8" hex wrench driver on other. Especially for F-M and television sets.

No. 5097 List \$0.75

3W-G	Blades for parallel No. 18 P.O.S.J. or similar	1.50
3W-H	Blades for the new 300-ohm television and FM twin transmission line	1.50

G-C SPEEDEX STRIPPER BENCH HOLDER

Bench type holder for any model Speedex Wire Stripper. Converts a hand operated tool to a bench type and increases production up to 2,500 wire strippings per hour. Steel.

No.	Description	List
755	Bench Holder	\$3.75

G-C SPEEDEX TRIG-O-MATIC PLATE (Patent Pend.)

Converts any standard model Speedex Stripper to an Automatic Model. Easy to install.

No.	Description	List
756	Trig-O-Matic Plate, only	\$2.00

G-C SOLDER IRON TIPS

Best grade hard-drawn copper, bright plated to resist corrosion. Heats fast and holds heat.

No.	Description	List
724	$\frac{3}{4}$ " x 3"	\$0.45
725	$\frac{1}{2}$ " x 4 $\frac{1}{2}$ "	.55
726	$\frac{3}{8}$ " x 4 $\frac{1}{2}$ "	.60
727	$\frac{3}{16}$ " x 4"	.75

G-C INSPECTION LITE

Portable type, lights up those "hard-to-see" spots. Operates on 110-120 volts AC or DC. Cord approx. 6 ft. long. Molded handle and non-inflammable clear plastic shield over bulb.

No.	Description	List
705	Inspection Light	\$1.75
704	Replacement Bulb for No. 705	.15
704-S	Clear Plastic Shield	.15

G-C LO-VOLT TESTER

For 0-15 volts AC or DC. For all low voltage testing on cars, generators, batteries, bell circuits, etc. Shielded bulb easily replaced. Molded plastic handle and insulators.

No.	Description	List
5125	Lo-Volt Tester	\$1.25
5126	Bulb for No. 5125	.25
5127	Shield for No. 5125	.15

G-C THERMO-VOLT CIRCUIT TESTER

Tests from 15 to 60 volts AC or DC on thermostats, aircraft, trains, marine lighting, 28-32 volt light plants, etc. Molded plastic case and insulated tips.

No.	Description	List
5150	Thermo-Volt Circuit Tester	\$1.75

GC CARBON BRUSH KIT

Complete assortment replacement brushes, for vacuum cleaners, washing machines, ironers, pumps, fans, etc. Contains 92 brushes and 18 springs.

No.	Description	List
7000	Carbon Brush Kit	\$8.25

GENERAL CEMENT SERVICE AIDS—TOOLS—SHIMS

G-C CHASS-EZ (Pat. Pending)

New wonder tool makes the Serviceman's job easier. Its simplicity is its chief merit. Chassis can be installed on "Chass-Ez" in five seconds. All one unit — no extra bolts or nuts to adjust. Heavy steel, riveted construction, nicely plated.

No. 5207
List \$3.65
Dealer's Net Only 1.95

G-C PHONO TURNTABLE STAND

New improved model, adjustable and inexpensive. Adaptable to all turntables. Raises the turntable 15 inches above bench and can be pivoted on the swivel joints for easy examination or repairs. Sturdy steel construction. Plated.

No. 5205
List \$6.65
Dealer's Net Only 3.99

G-C RADIO JACKS

Permanent type adjustable jacks. All metal construction. Adjustable to fit any set or conditions. Easily and quickly adjusted. Two jacks supplied with three extension rods — one extra long. You need several sets in your shop.

No. 711
List \$1.95
Dealer's Net Only 1.17

G-C RADIO CHASSIS GUARDS

Inexpensive guards that protect the chassis and tubes when servicing. Set can be turned in any position. Easily applied and adjustable to all sets. Permanent plated metal construction.

No. 709
List \$2.25
Dealer's Net Only 1.35

G-C MINIATURE TUBE PIN STRAIGHTENER

Saves tubes! Straightens without damage the pins on the fragile miniature tubes such as 1A5, 6AK5, 9002, etc. Just insert tube between guide pillars into precision base die and tube prongs are straightened and properly spaced. All metal.

No. 5191
List \$1.00

G-C TUBE AND PARTS EXTRACTOR

U. S. Signal Corps part No. T1. 201. Handy prong tool for extracting tubes and picking up parts. Rubber cushions on prongs.

No. 5092
List \$1.00
Tube Extractor

G-C NE-O-LITE

Simple, safe, electrical circuit tester. Uses neon glow lamp which varies in brightness according to voltages. Tests cords, appliances, automotive ignition circuit, fuses, radios, electric fences, etc. For 60-volts AC to 550 volts AC or DC. Molded plastic, handy vest pocket size. Buy a display and sell your customers.

No. 5100
List \$0.50
5112-D Display 12 No. 5100 6.00

G-C NE-O-LITE WIRE

Wire same as used on Ne-O-Lite Testers. #18 stranded, rubber covered with a red or black braid, varnished. For ignition wiring, motor wiring, etc. Red or Black — Specify color.

No. 5113 100 Ft. List \$4.00

G-C RESISTOR FOR NEON LAMP

Required resistor when using No. 717 neon lamp on voltages of 60 to 550 volts AC or DC. Connect in series.

No. 718 List \$0.10

G-C NEON GLOW LAMPS

NE-T2 lamp as used in testers, appliances, as pilot light, etc.

No. 717 List \$0.20

G-C AMO MINIATURE TUBE PULLER (Pat. Pending)

Prevents burned fingers and broken tubes. Makes it easy to remove and install tubes such as 6AG5, 50B5, etc. Works on suction and vacuum principle. Operates just by pressing on the tube and to release, just press the release button. Tube protected by rubber sleeve. Gets where your fingers can't reach. Permanent metal.

No. 5093 List \$1.65

G-C FIBRELOID SPEAKER SHIMS

Shims made of tough and flexible fibreloid. Non-magnetic. 4 each of 5 sizes — twenty in all: Sizes, .005", .0075", .010", .0125", and .015". Color coded. Supplied in gold lettered leatherette snap case with instructions.

No. 702 Kit List \$0.60

G-C SWEDISH STEEL SPEAKER SHIMS

Makes it easier to center speaker voice coil. Permanent flexible Swedish steel. 4 shims each of 4 sizes coded for identification: .004", .006", .008" and .010" thick. Supplied in gold stamped leatherette partitioned snap case. Complete with instructions.

No. 701 Kit List \$0.65

NEW! G-C SPEAKER SHIM KIT

For every type of speaker adjustment. A generous supply of Fibreloid and bronze shim stock in the various widths and thicknesses needed for speakers. Non-magnetic material. Stock can be cut to exact requirements. A long-lasting assortment. Complete instructions.

No. 7720 Kit List \$2.00

GENERAL

CEMENT

**RECORDING WIRE
STATIC CHASER — TOOL KITS**

G-C RECORDING WIRE

For all wire recorders. Includes plastic leads. Permanent recordings which can be replayed indefinitely. Finest quality reproduction on stainless steel wire. Standard RMA spool fits Webster, Air King, Sears Roebuck, etc.

Aerovox Corporation	P-97 to 114
AIM Industries	E-21
Aircraft Antenna Insulators	J-24; S-38; U-57
Aircraft Connectors, Plugs	L-7; T-27
Aircraft Crystals	K-9, 10
Aircraft Dynamotors	M-31, 35
Aircraft Electrical System Tester	F-94
Aircraft Fuses	G-25
Aircraft Wires and Shielding	S-15, 20
"Akra-Ohm" Resistors	R-54, 55
Alarm Relays	L-8 to 25
Alarms—Burglar, Fire, Electronic Radio	F-105
Albums, Record	E-24
Alignment, Neutralizing Tools	T-7; U-25, 28, 46, 53, 54, 78, 84, 110, 119, 133, 134
Alliance Manufacturing Co., The	E-17, 13
Alligator Clips	J-79; M-9; S-34; U-32, 52, 75, 77, 83, 131
Alpha Metals, Inc.	U-12
Alpha Wire Corporation	S-1 to 10
Altec Lansing Corporation	
Amplifiers	B-1 to 3
Speakers	C-3, 4
Transformers	N-1, 2
Aluminum Paint	U-121
"Amaron" Metal Cabinets, Racks, etc.	J-93 to 95
AMATEUR EQUIPMENT—See specific headings, such as Frequency Calibrators, Communication Receivers, Transmitters, etc.	
Amateur Type Tubes	A-3 to 8, 14, 20, 24 to 38
"Amcon" Capacitors	P-75 to 77
"American Beauty" Soldering Irons	U-1
American Condenser Co. (Amcon)	P-75 to 77
American Electrical Heater Co.	U-1
American Microphone Co.	D-1 to 6
American Phenolic Corp. (Amphenol)	T-2 to 17
American Radio Hardware Co. (ARHCO)	U-83 to 87
American Radio Relay League (ARRL)	H-1, 2
American Television & Radio Co.	M-21 to 24
Ammeters	F-13 to 16, 27, 28, 58 to 68, 93, 101
Amperex Electronic Corp.	A-27, 28
Amperite Company	
Ballasts (Resistor Tubes)	R-63, 64
Microphones and Stands	D-7, 8
AMPLIFIERS AND SYSTEMS	Section B
Cases, Cabinets, Racks	J-72, 87 to 95; U-65, 66
Foundation Chassis	J-72, 90, 92; U-66
Industrial Paging Systems	B-16 to 18, 29
Mobile Amplifiers	B-8, 27, 39, 42
Noise Level Meters, Indicators	E-6; F-15, 27, 35
Phono Amplifiers, Systems	B-13, 28, 31, 42, 44; E-21
Portable Amplifiers	B-10 to 14, 26, 34 to 38
Pre-amplifiers, Boosters	B-2, 32, 42
Recording Amplifier	E-2
Tone Equalizers	D-12; E-7, 9, 19, 49
Transmitter Power Amplifiers	J-45
Analyzer Adapters	F-2; T-6; U-113, 114
ANALYZERS (See also Testing Instruments)	Section F
Angles and Brackets	J-70 to 72; U-37, 63, 64, 79, 85, 86, 115, 141
Annunciator (Bell) Wire	S-31
Anode Caps	T-13
ANTENNA ACCESSORIES	S-13, 26 to 30, 39 to 43, 48, 64; U-68, 69, 130
Aerial Eliminators	U-61
Coils	C-40; J-56 to 64
Insulators	J-40; S-13, 30, 38, 40, 43, 48, 52; U-68, 118
Lead-in Strips, Ground Clamps	M-10; S-13, 26, 30, 43; U-68, 118
Lightning Arresters	S-13, 26, 30, 39, 40, 43; U-68, 115
Spring Adjusters	S-30
Spring Wire Clips	J-79; S-33; U-31, 37, 81, 85
Tuning Unit	U-51
Wire and Cable	S-7 to 31; U-94, 118
Wood Mounting Poles, Straps	S-29
Antenna Changeover Relays	L-12, 16, 21, 24; N-80
Antenna Manuals	H-2, 4
ANTENNAS AND SYSTEMS	J-40; S-12, 29, 39 to 63; T-10, 11; U-95, 96
Automobile Antennas	S-47, 50, 51, 56, 57, 66, 67; U-95, 96, 138
F-M, Dipole Antennas	S-12, 29, 39 to 65; T-10, 11

	Section & Page
ANTENNAS AND SYSTEMS (Cont.)	
F-M Reflectors and Kits	S-41, 42, 43, 52, 56, 65
Home Receiver Antennas, A-M	S-44, 51, 65; U-95
Impedance Transforming Device	D-34
Indoor Aerials, Eliminators	S-14; U-61
Kits	K-2; S-9, 13, 26, 29, 30, 43; T-11; U-68, 118
Loop Antennas	J-56, 61; U-61, 109
Master Systems for Houses, Hotels, etc.	S-44
Masts, Radiators	S-29, 43, 51, 65
Mobile Transmitter, Police Antennas	S-47, 51
Q-Beam Antenna System	J-40
Rotary Beam Antennas	S-46; T-11
Telescoping Antennas	S-29, 45, 69
Television Antennas	K-8; S-29, 39 to 70; T-10, 18
Appliance Testers	F-11, 15, 25, 27, 51, 54, 95
Arco Electronics, Inc. (El-Menco)	P-69 to 74
Arcturus Receiving Tubes	A-22
Astatic Corporation, The	D-9 to 12
Atlas Resistor Company	R-1 to 3
Atlas Sound Corporation	C-5 to 6E
Attenuators, Audio	R-7, 31, 37, 53
Mutual Inductance Type	F-35
Audak Co., Inc. (Audax)	E-19, 20
Audio Attenuators	R-7, 31, 37, 53
Audio Chokes	Section N; also J-69, 70
Audio Communication Mfg. Co.	B-48
Audio Development Co.	N-71 to 74
Audio Devices, Inc. ("Audioidisc", "Audiopoint")	E-25, 26
Audio Oscillators	F-3, 29, 39, 81, 83, 106; J-44, 54; U-61
Audio Reactors	Section N
Audio Transformers	Section N
Automatic Line Voltage Regulators (Ballasts)	A-16, 18, 34; R-8, 37, 63, 64; U-102
Automatic Voltage Regulators, Controls, Reducers	M-27, 30, 32; N-10, 12, 21, 29, 36, 44, 52, 70, 76
AUTO RADIO ACCESSORIES:	
Antenna Accessories	S-35; U-31, 32, 68, 81, 87, 98, 130
Antenna and Fuse Connectors	S-26, 28; S-35; U-32, 68, 70, 71, 87, 130
Auto Antennas	S-47, 50, 51, 56, 57, 66, 67; U-95, 96, 138
Battery Eliminators	G-32; M-22, 25, 26
Cable Fittings, Gear, Couplers	U-104
Capacitors, Filters	Section P; also R-74; U-68, 98
L.F. Transformers	C-40
Knobs	U-104, 127
Mountings for Antennas	S-48, 51, 54; U-98
Panel Lamps	A-11, 16, 18; G-9
Pin Plug and Jack Sets	J-79; U-31, 52, 68, 70, 81, 105, 112, 130, 132
Power Supplies, Packs	M-12, 20, 22, 25, 26, 37; N-16
Shaft Cutting and Fitting Machine	U-103
Shafting, Casings for Remote Controls	U-103, 105
Shielding	S-5, 15, 28, 35; U-59, 105
Suppressors, Ignition	R-14, 18, 48; S-35; U-68, 98, 105, 138
Tire Static Neutralizing Kit	U-46, 138
Vibrators	A-15; M-13, 14, 21, 37, 38
Volume and Tone Controls	Section R
Wheel and Hood Static Eliminators	S-35; U-68, 98, 138
Wire and Cable	S-5, 7, 15, 35; U-98, 105
Autotransformers, Autoformers	Section N

— B —

Baffles, Enclosures for Speakers	C-4, 12, 34, 37, 42; J-26, 72, 73; U-66
Ballasts (Plug-in Resistors)	A-16, 18, 34; R-8, 37, 63, 64; U-102
Banana Plugs, Jacks	J-19, 39, 81; S-36; U-30, 51, 52, 75, 76, 77, 83, 131
Band Expanders for Communication Receivers	J-105, 107
Band Switches and Assemblies	J-42, 43, 62, 80; L-4
Band Switching Relays	L-24
Barker & Williamson, Inc.	J-42 to 44
Bases, Bottom Plates for Metal Chassis	J-71, 90, 91, 94; U-67
BATTERIES, DRY	A-16; M-1 to 8
Battery Cable, Harness	S-27, 31; U-115
Battery Carriers, Jumpers, Post Adapters	M-10
Battery Chargers, Boosters	G-32; M-15; N-16
Battery Clips	M-9; U-114, 131
Battery Eliminators	G-32; M-22, 25, 26
Battery Plugs	T-40; U-89, 135
Battery Testers	F-14, 17, 20, 29, 59, 68, 96
Beat Frequency Audio Oscillators	F-29, 81
Beat Frequency Generator	F-80
Belden Manufacturing Co.	S-11 to 25
"BELphone" Intercommunicating Systems	B-21
Bell Sound Systems, Inc.	B-5 to 34
Bell Wire	S-21
Binding Posts	J-19; M-29; T-40; U-51, 75, 86
Birnbach Radio Co., Inc.	S-29 to 38
Bleeder Resistors	R-1, 48, 51
Biiley Electric Co.	K-14
Bogen Co., Inc., David	B-25 to 30
BOOKS AND MANUALS	Section H; also J-58; K-4A; P-4; R-46; U-119
Boonton Radio Corp.	F-77 to 80
Box Shields, Metal	J-73

"Masco" Sound Systems	B-37 to 40
Masonry Drills	U-69
Master Antenna Systems for Houses, etc.	S-44
Masts and Radiators, Antenna	S-29, 43, 51, 65
"Max Mixer" for Microphones	F-98
Measurements Corporation	F-33 to 36
MEASURING INSTRUMENTS	Section F
Megacycle Meter	F-36
"Mega-Marker" & "Mega-Sweep" Oscillators	F-103
"Mega-Pipper" Alignment Instrument	F-108
Megohmmeters and Bridges	F-22, 71, 72
Meissner Mfg. Division, Maguire Industries	J-57, 68
Mercury-Switch Relay	N-86
Merit Coil & Transformer Corp.	N-63 to 70
Metal Cabinets, Racks, Panels	J-69 to 72, 85 to 95; U-65, 66
Metal Ornamental Grille	U-34
Metal Trim, Moulding	U-66
Meter Cases	J-72, 92, 93; U-66
METERS AND INSTRUMENTS	Section F
Meters, Frequency	F-27, 56, 57, 71, 75 to 78; J-44, 46
Meters, Geiger-Mueller Counting	F-104, 106
Meters, Pocket	F-11 to 14, 28, 81, 58, 68, 108
Meters, Recording Level	E-6; F-15, 27, 35
Meters, Switchboard	F-93
Metertester	F-64
Mica Capacitors	P-17 to 20, 38, 39, 46 to 48, 58 to 61, 69 to 74, 90, 101, 102, 114
Mica Capacitors, Silvered	P-17, 46, 58, 71, 84, 90, 102
Microammeters	F-1, 14, 16, 28, 62, 65, 67, 93, 101
MICROPHONES—Crystal, Dynamic, Velocity, Contact, Lapel, etc.	Section D; also K-2
Adapters, Connectors, Swivels	C-6B; D-10, 40; T-8, 9, 25, 26; U-31, 32, 51, 74, 112, 131
Cable and Wire	S-1, 15, 27, 31; T-8; U-94
Call Letter Plates	D-40
Carbon Granules	U-122
Mixer ("Max-Mixer")	F-98
Plugs and Jacks	L-7; T-8, 9, 18; U-51, 52
Stands	Section D; also C-6A, C-6B, C-24, 38; F-98
Switches	D-15, 24; T-8
"Third Hand"	D-24, 40
Transformers	Section J; also D-8, 15, 20
Microphone-Speaker Combination	D-31
"Micro-Testers"	F-11, 12
Middletown Mfg. Co.	J-91, 92
Midget Relays	L-13, 14, 18, 20, 23
Millen Mfg. Co., Inc., Jamea	J-45 to 50
Miller Company, J. W. (Coils)	J-59 to 64
Miller Mfg. Co., Inc., M.A. (Needles)	E-22, 23
Milliammeters, Millivoltmeters	F-14 to 16, 28, 58, 62, 65, 67, 93, 101
Miniature Lamps	A-11, 16, 18; G-9, 10
Modulation Monitors	F-27; J-107
"Monoset" Earphones	D-41
Morse Code Learner's Phonograph Records	U-61
Motorola Replacement Line Cord	U-90
Motors, Fractional Horsepower	E-18
Motors, Turntables for Phonographs	E-11 to 17

	Section & Page
Motor-Starting Capacitors	P-23, 30, 32, 45, 109 to 113
Motor-Starting Capacitor Selectors	P-32, 108
Motor-Starting Relays	L-8, 13, 14
Mueller Electric Company	M-9, 10
Multimeters, Multitesters	Section F
Multiple Conductor Cable	S-1, 4, 16, 17, 27, 81
Murdock Co., Wm. J.	D-86
Murray Hill Books, Inc., Technical Div.	H-9 to 12
Mutual Conductance Tube Testers	F-6, 17, 18, 45, 46, 86

— N —

Nail-it Knobs	S-13, 30, 43; U-118
Name Plates	U-56
National Company, Inc.	J-1 to 34
National Union Radio Corp.	A-13 to 16
Needle Cups for Phonographs	U-111
Needle Point Nose Pliers	U-16, 17
Needles, Cutting, Recording	E-4, 23 to 33, 39; U-101, 128
Needles, Playback, Phone	D-12, 16; E-4, 22 to 33, 40; U-100, 101, 128
Neon Glow Lamps	G-10
Neon Pocket Testers	G-24; U-187
Neon Screw Drivers	G-24
Neutralizing, Aligning Tools	T-7; U-25, 28, 46, 58, 54, 78, 84, 110, 119, 133, 134
Neutralizing Capacitors	J-30, 36, 43, 45, 54, 67, 78
Newcomb Audio Products Co.	B-31 to 36
"Nobleboy" Metallic Film Resistors	R-12
Noise Filters, Silencers	J-59, 60; M-12; P-22, 23, 36, 37, 64, 86, 92, 94, 102, 103; R-13; U-61, 112
Noise Suppressors, Auto Ignition	R-14, 18, 48; S-35; U-68, 98, 105, 138
Nut Drivers, Wrenches	U-20 to 27
Nuts, Screws, Washers	J-73; M-19; U-35 to 40, 62 to 64, 80, 81, 85, 111, 112, 140, 141

— O —

Oak Ridge Antenna Co.	S-68
Ohmite Manufacturing Co.	R-49 to 52
Ohmmeters	Section F
Oil and Gas Gauge Filter Capacitors, Auto	P-34, 35, 56, 103; U-98
Oil Burner Suppressor	R-13
Oscillator Coils	C-40; J-20, 42, 57 to 63, 80
OSCILLATORS, AUDIO	F-3, 29, 39, 81, 83, 106; J-44, 54; U-61
Code Practice	J-74; U-61
Marker	F-103
Phono, Wireless	B-44; J-74
Test	F-3, 26, 40, 103; K-14
Variable Frequency	J-74, 104
OSCILLOGRAPHS, OSCILLOSCOPES	F-1 to 4, 29, 30, 43, 49, 74, 82, 102, 106; J-32, 46
Accessories	F-44
Cathode Ray Tubes	A-7, 8; F-44
Output Meters	E-6; F-15, 27, 35
Output Transformers	Section N
Oven Temperature Testers	F-54
Overload and Underload Relays	L-13, 15, 16, 18, 22, 24; N-80
Oxford Electric Corp.	C-41

— P —

P.A. Controls	Section R
P.A. Systems, Units	Section C
Padding Capacitors	J-30, 63, 77; P-72 to 74; U-57
Paging and Call Systems	B-16, 18, 21, 29, 30, 40, 45 to 48
Paints, Enamels, Lacquers, Varnishes	U-43, 44, 121 to 124
Panel Bearings, Assemblies	J-36, 79; S-87; U-32, 58, 78, 86
Panel Boring Tools	U-25, 29, 52
Panel Indicators	Section G; J-40, 84; U-73, 87
Panel Instruments	Section F
Panel Lamps	A-11, 16, 18; G-9
Panel Marking Transfers	J-45
Panels, Aluminum	U-64, 130
Panels, Bakelite	U-64, 130
Panels, Desk, Door and Grille	J-69, 70, 89
Panels, Jack	N-74
Panels, Masonite	J-70; U-67
Panels, Metal Rack	J-69, 70, 89, 92, 94; U-67
Panels, Meter	J-70, 89, 92; U-67
Panels, Plastic	T-17; U-119
"Para-Flux" Reproducers	E-9
Parasitic Suppressors	R-48
Park Metalware Co., Inc. (Xcelite)	U-19 to 22
Par-Metal Products Corp.	J-85 to 90
Patch Cords	N-74
Permanent Magnet Speakers	Section C
Petersen Radio Co., Inc.	K-15 to 17
Phase Sequence Indicator	F-94
Philco Auto Radio Replacement Cable	U-105
Philmore Mfg. Co., Inc.	K-1, 2
Phone Cords	S-25, 34; U-61
Phone Headsets	D-30 to 34, 41; K-2; U-61
Phone Plug Adapters	L-10; T-8; U-31, 51, 112
Phone Plugs, Connectors, Jacks	J-79; L-7, 10; N-74; T-8, 9, 18; U-30, 31, 37, 51, 52, 55, 75 to 77, 83, 86, 131
Phone Tips, Jacks	J-79; S-34; U-30, 40, 51, 55, 70, 75 to 85, 131

Shields and Shield Cans:	
Box Shields	J-73
Coil Shields	J-21, 24; U-58
Interstage Shields	J-71
Jack Shields	J-21
Tube Shields	J-21, 47, 49, 79; T-2, 39; U-58, 82, 87, 107, 108
Shims, Speaker	U-35, 109, 137
Shock Absorbers for Mike-Stands	D-40
Shunts, Switchboard Type	F-91
Shur-Antenna-Mount, Inc.	S-53 to 55
Shure Brothers, Inc.	D-13 to 16
Shurite Meters	F-58
Signal Calibrators	F-1, 44, 70 to 74, 87; J-46, 58, 74
Signal Electric Mfg. Co.	L-26
Signal Generators	Section F; also J-44
Signal Indicators	Section G; J-40, 84; U-73, 87
Signal Tracer Testers	F-47, 83, 90, 97, 107; J-58
Silicone Compound	T-11
Silver Mica Capacitors	P-17, 46, 58, 71, 84, 90, 101
Silver Paint for Printed Circuits	U-121
Silver Plating Liquid	U-121
Simpson Electric Company	F-5 to 16
Simpson Mfg. Co., Inc., Mark (Masco)	B-37 to 40
Sleeping, Coated, Saturated, etc.	S-28; U-59, 111, 129
Slide Rule Dials	J-62
Slide-Type Switches	R-18; U-31, 58, 71, 109, 129
Smith, Inc., Herman H.	U-69 to 82
Snap-Action Switches	L-3, 8
SNC Mfg. Co., Inc.	N-27 to 30
Socket Punches	T-2; U-29
SOCKETS AND PLUGS	Section T; also J-21, 22, 38, 49; S-38; U-55, 74, 87, 89, 95, 112, 114, 130
For Batteries	T-40; U-89, 114
For Crystal Holders	J-21; T-5, 39
For Dial Lights	G-1, 17 to 23; J-40; U-74, 87, 131
For Panel and Sub-Panel Assemblies	J-79; U-55, 112
For Prefocused Lamps	T-13
For Receiving Tubes	J-79; T-2, 3; U-95, 130
For Television Tubes	T-7, 89
For Transmitting, Acorn, Industrial, Special Purpose Tubes	J-22, 38, 49; S-38; T-2, 7, 12, 13; U-67
Socket Wrenches	U-21, 26, 35, 53, 84, 109
Sola Electric Company	M-32, 33
Solar Capacitor Sales Corp.	P-89 to 92
Solder, Solder Flux, Solder Paste	U-9, 12, 50, 121, 122
Soldering and Terminal Lugs	J-27, 84; S-11, 36; T-1; U-37, 60, 63, 69, 72, 79, 81, 85, 86, 109, 141
SOLDERING IRONS	K-10; S-25; U-1 to 11, U-52
Coolant and Flux Attachment	U-136
Heater Cords	S-25
Replacement Elements	S-25; U-53
Replacement Tips	J-79; M-19; S-25; U-1 to 8, U-53, 136
Stands, Pots, Heat Controls	U-1 to 8
Tip Compound	U-122
Soldering Wire Couplers	U-135
Solvents, Thinners	U-41, 99, 120, 121
Sound Level Indicators	E-6; F-15, 27, 35
SOUND SYSTEMS	Section B
Spacers, Metal and Insulating	U-38, 64, 189
Spade Lugs, Bolts	U-36, 52, 70, 78, 140
Spaghetti Tubing	S-7, 33; U-45, 59, 111, 129
Spark Plug Suppressors, Auto	R-14, 18, 48; S-35; U-68, 98, 105
SPEAKERS, HORNS, PROJECTORS, TRUMPETS	Section C; also D-36; E-10
Baffles, Cabinets, Enclosures	C-4, 12, 34, 37; J-32, 72, 73; U-66
Cable, Wire	S-1, 27, 31
Carrying Cases	J-72, 88; U-66
Cement, Repair	U-41, 99, 120
Cone Patches	U-36
Cones, Replacement	C-39
Cords, Extension	S-34
Field Coils and Supplies	C-39
Field Substitute Chokey	N-10
Grille Cloth	U-34, 109, 124
Networks	C-11, 13
Plugs	T-6, 40
Reproducers	C-10, 13
Shims	U-35, 109, 137
Spiders	U-114
Stands, Supports	C-6, 9, 20, 23, 37
Test Speakers	F-84
Transformers	Section N
Volume Controls, Power	C-6, 7
Special Products Co. ("Speco")	F-97, 98
Speed-X Division, E. F. Johnson Co.	L-27, 28
Speedway Mfg. Co.	U-49
"Spintite" Wrenches	U-23 to 26
Spirling Products Co., Inc.	S-67
Sprague Products Company	P-49 to 64
Springs, Friction, Washers	U-38
Spring Maker Machine	U-138
Springs, Expansion and Compression	U-40, 114, 142
Square Wave Generators	F-38, 83; J-44
"Stanco" Transformers	N-4 to 16

— U —	
Underload and Overload Relays	L-13, 15, 16, 18, 22, 24; N-80
Ungar Electric Tool Co., Inc.	U-10
United Transformer Corp.	N-37 to 52
Universal Microphone Co.	D-27 to 29
University Loudspeakers, Inc.	C-25 to 28
Utah Radio Products, Div. International Detrola	C-43, 44
Utica Drop Forge & Tool Corp.	U-17, 18
— V —	
Vaco Products Company	U-27, 28
Vacuum Cleaner Belts	U-114, 138
Vacuum Tube Frequency Meters	F-57
Vacuum Tube-Type Capacitors	A-28, 30; P-115
Vacuum Tube Voltmeters	F-9, 22, 36, 41, 71, 83, 88, 89
Valpey Crystal Corp.	K-20
Variable Frequency Oscillators	J-74, 104
Variable Receiving and Tuning Capacitors	J-30 to 34, 51, 66 to 78; T-18; U-57
Variable Reluctance Phono Pickups, Reproducers	E-21; F-87
Variable Resistors, Rheostats	Section R; also F-100
Variable Transmitting Capacitors	J-26 to 75; U-57
Variable Voltage Transformers	M-27, 28; N-10
Varnished Tubing, Spaghetti	S-7, 33; U-45, 59, 111, 129
Varnishes, Lacquers, Paints, Enamels	U-43, 44, 121 to 124
Velocity Microphones	Section D
Ventilating Louvres for Metal Cabinets	U-64
Vernier Dials	J-17
Vertrod Corporation	S-61 to 64
VHF Converters for Communication Receivers	J-105
VHF Oscillator Kit	J-54
"Vibrapak" Power Supplies	M-12
Vibrating Reed Frequency Meters	F-56, 57
Vibration Pickups, Microphones	D-8, 18, 24, 31
Vibrator Buffer Capacitors, Auto	P-13, 35, 56, 75, 91, 103
Vibrator Power Supplies, Packs	M-12, 36, 37
VIBRATORS, AUTO RADIO	M-13, 14, 21, 37, 38; also A-15
Vibroplex Co., Inc., The	L-29, 30
Vinylite Cement	U-41
V-M Corporation	E-38
Voice Coil Dust Felts	U-36, 142
Voice Coil Lead Wire	S-14; U-119
"Volometer" Test Instruments	F-85, 86
Voltage Adapters, Foreign, Export	N-52
Voltage Breakdown Tester	F-72
Voltage Calibrator	J-22, 38, 79; T-13; U-57, 95, 112, 114
Voltage Dividers, Resistors	Section R
Voltage Regulators, Reducers, Controls—Automatic	M-27 to 32; N-10, 12, 21, 29, 36, 44, 52, 70, 76 to 99
Voltage Regulator Transformers	Section N
Voltmeters, Voltohmmeters, etc.	Section F
Volume and Tone Controls	Section R; also A-16
Volume Control Hardware	R-32, 33, 46; U-38
Volume Control Wrenches	U-53
Volume Level Indicators	E-6; F-15, 27, 35
— W —	
Wafer Sockets	J-22, 38, 79; T-13; U-57, 95, 112, 114
"Walco" Needles	E-39, 40
"Walden Worcester" Tools	U-23 to 26
Wall Plates, Receptacles	T-22 to 26
"Walco" Service Aids	U-33 to 48
Ward Leonard Electric Co.	
Relays	L-23, 24
Resistors and Rheostats	R-59 to 62
Ward Products Corp., The	S-49 to 52
Washers, Nuts, Screws	J-72; M-19; U-35 to 40, 62 to 64, 80 to 85, 111, 112, 127, 140, 141
Wattmeters	F-11, 15, 26, 27, 51
Wave Meters	J-46, 74
Wave Traps	C-40; J-62
Wax, Floor	U-123
Webster-Chicago Corporation	E-13, 14
Webster Electric Co.	D-25, 26
Weller Mfg. Co.	U-11
Westinghouse Electric Corp.	A-31 to 34
Weston Electrical Instrument Corp.	F-60
Wheatstone Bridges	F-72; R-56
Wheel and Hood Static Eliminators, Auto	S-35; U-68, 98
Wilcox-Gay Corporation (Recordio)	E-33
Window Antennas	S-51, 65; U-95
Window Corp. of America	K-13
Window Pane, Clear Plastic—for Lead-ins	T-11
WIRE AND CABLE	Section S
Antenna Wire and Cable	S-7, 9, 14, 15, 26, 30, 31; U-94, 118
Antenna Wire for AC-DC Sets	S-9, 28, 31; U-94
Auto Radio Wire and Cable	S-5, 7, 15, 35; U-98, 105
Battery Cable	S-27, 31; U-115
Bell Wire	S-31
Bus-Bar Wire	S-7, 9, 14, 33
Cathode Ray Tube Cable	S-23
Coaxial Cable	S-8, 31, 63; T-16
Dial Cable, Cords	S-8, 33; U-33, 34, 82, 92, 97, 119, 125, 126
Diathermy Cable	S-8, 32
Electrical Extension Cords, Sets	S-24, 33; U-116, 130
Fixture Wire, Lamp Cords	S-4, 24, 28, 31, 33; U-94
Guy Wire	S-29, 43, 64
Headphone Cords	S-25, 34; U-61
Hookup, Pushback Wire, etc.	S-5, 6, 20, 21, 31; U-94, 118
Indoor Aerial Wire	S-14
Intercommunication System Cable	S-1, 2, 22, 28, 31; U-94
Lead-in and Ground Wire	S-5, 6, 9, 14, 20, 21, 26, 27, 28, 31, 64; U-94, 118
Litz Wire	S-13
Magnet Wire	S-11, 33
Microphone Cable	S-1, 15, 27, 31; T-8; U-94
Multiple-Conductor Cable	S-1, 4, 16, 17, 27, 31
Phono Pickup and Grid Wire, Shielded	S-5, 23, 35; U-94, 118
Phosphor Bronze Aerial Wire	S-9
Photo Electric Cell Cable	S-23
Recording Stainless Steel Wire	U-138
Resistance Cords	S-25, 34; U-61, 90, 119
Shielding—Copper, Braid	S-5, 15, 28, 35; U-59, 105
Solid Tinned Copper Wire	S-7, 9, 14, 30, 33
Speaker Cable	S-1, 27, 31
Speaker Cords	S-34
Test Prod Wire	S-5, 23, 28; U-55, 94, 118, 131
Transmission Line Cable	S-1, 8, 18, 19, 31, 62, 64; T-9; U-94
Tubing, Spaghetti—Flexible Varnished	S-7, 33; U-45, 59, 111, 129
Twin-Lead Wire for Television and FM	S-8, 32, 64, 65; U-114
Voice Coil Lead Wire	S-14; U-119
Wire Couplers, Soldering	U-135
Wire Measuring Outfit	U-116
Wire Recorder Units	E-12, 14, 34, 35
Wire Spring Clips (Fahnestock)	J-84; S-33, U-31, 37, 81, 85, 131, 141
Wire Stripping Tools and Pliers	U-15, 18, 136, 139
Wire Wound Resistors	Section R; also P-107
Wirt Company	R-15 to 18
Workshop Associates, Inc., The	S-69, 70
WRENCHES	
Hexagon Key, Socket	U-21, 26, 35, 53, 84, 109, 133, 134, 139
Neutralizing Alignment	U-25, 46, 54, 78, 84, 110, 119, 134
Nut	U-20 to 25
Steel	U-18, 186
Volume Control	U-53
WWV Standard Frequency Calibrator	F-73
— X —	
"Xcelite" Tools	U-19 to 22
