Price of 13th Edition, \$5.50 in U. S. A. — \$6.00 outside of U. S. A.

THIRTEENTH EDITION

Second Printing

FOREWORD

RADIO'S MASTER is compiled with the approval of and in cooperation with the ASSOCIATION of ELECTRONIC PARTS & EQUIPMENT MANUFACTURERS and the SALES MANAGERS CLUB, EASTERN DIVISION. It is the official buying guide and reference book of radio parts and electronic equipment for the industry. The distribution of this buying guide is not a representation by the person or firm distributing the same that all of the lines and all of the products contained herein are necessarily carried by such person or firm.

•

Every precaution is taken to insure accuracy in the preparation of display pages and indexes, but the publishers cannot guarantee against the possibility of error or omission, nor can they be held responsible for price changes or withdrawal of items during or after publication.

•

Enrolled manufacturers reserve the right to make mechanical changes in specifications necessitated by emergencies over which they have no control, and to change prices or withdraw items without notice.

•

List prices are furnished only for information—they are not offered as quotations.

•

IMPORTANT

When ordering from this book please mention RADIO'S MASTER, 13th EDITION, also page number on which the item appears and specific catalog or code number, if any. This will help to expedite your order and lessen the chance of error.

RADIO'S MASTER

NUMERICAL INDEX OF MANUFACTURERS' DISPLAY PAGES

By Section and Folio

NOTE: This is a bare outline of the eighteen sections of RADIO'S MASTER. It will serve for speedy reference and for the purpose of familiarizing yourself quickly with its general contents. Regular use of the Master will reveal many additional items too numerous to list here—you may also discover an item in a section to which it does not directly relate. For more complete and precise information, consult the exhaustive detailed General Index at the back of book.

SECTION A

RECEIVING, TRANSMITTING, INDUSTRIAL TUBES— SPECIAL PURPOSE TUBES—PANEL LAMPS

<i>Section & Page</i>	<i>Name of Manufacturer</i>
A-1	Cunningham (RCA)
A-2 to 4	General Electric Company
A-5 to 8	Radio Corporation of America
A-9 to 12	Sylvania Electric Products, Inc.
A-13 to 16	National Union Radio Corp.
A-17, 18	Tung-Sol Lamp Works, Inc.
A-19 to 21	Raytheon Manufacturing Co.
A-22	Standard Arcurus Corp.
A-23	Ken-Rad (General Electric Co.)
A-24	Hytron Radio & Electronics Corp.
A-25, 26	Taylor Tubes, Inc.
A-27, 28	Amperex Electronic Corp.
A-29, 30	Eitel-McCullough, Inc.
A-31 to 34	Westinghouse Electric Corp.
A-35	Electrons, Inc.
A-36	General Electronics, Inc.
A-37, 38	Continental Electric Co.

SECTION B

PUBLIC ADDRESS: AMPLIFIERS, PHONO P.A. EQUIPMENT, SOUND SYSTEMS —INTERCOMMUNICATION SYSTEMS

B-1 to 3	Altec Lansing Corporation
B-5 to 24	Bell Sound Systems, Inc.
B-25 to 30	David Bogen Co., Inc.
B-31 to 36	Newcomb Audio Products Co.
B-37 to 40	Mark Simpson Mfg. Co.
B-41, 42	Thordarson Electric Mfg. Div.
B-43, 44	Adaptol Company
B-45, 46	Talk-A-Phone Company
B-47	Lyman Electronic Corp.
B-48	Audio Communication Mfg. Co.

SECTION C

SPEAKERS, PROJECTORS, HORNS, TRUMPETS

C-1, 2	Radio Corporation of America
C-3, 4	Altec Lansing Corporation
C-5 to 6B	Atlas Sound Corporation
C-7 to 14	Jensen Manufacturing Co.
C-15, 16	Quam-Nichols Company
C-17	General Electric Co.
C-19 to 24	Racon Electric Company
C-25 to 28	University Loudspeakers, Inc.
C-29, 30	Kainer & Company
C-31 to 34	Stephens Manufacturing Corp.
C-35, 36	Cinaudagraph Speakers Div.

SECTION C (Cont'd)

<i>Section & Page</i>	<i>Name of Manufacturer</i>
C-37, 38	Emco Sound Equipment Corp.
C-39, 40	Carron Manufacturing Co.
C-41	Oxford Electric Corp.
C-42	Jackson Industries, Inc.
C-43, 44	Utah Radio Products

SECTION D

MICROPHONE—MICROPHONE STANDS—HEADPHONES PICKUPS—CARTRIDGES

D-1 to 6	American Microphone Co.
D-7, 8	Amperite Company
D-9 to 12	The Astatic Corporation
D-13 to 16	Shure Brothers, Inc.
D-17 to 20	Electro-Voice, Inc.
D-21 to 24	Turner Company
D-25, 26	Webster Electric Co.
D-27 to 29	Universal Microphone Co.
D-30 to 32	Brush Development Co.
D-33, 34	Trimm, Inc.
D-35	C. F. Cannon Co.
D-36	Wm. J. Murdock Co.
D-37 to 40	Eastern Mike-Stand Co.
D-41	Telex, Inc.

SECTION E

RECORDERS AND RECORDING EQUIPMENT—PHONO MOTORS—TURNTABLES—RECORD-CHANGERS— PHONO & TRANSCRIPTION UNITS—DISCS—NEEDLES

E-1 to 4	Presto Recording Corporation
E-5, 6	Rek-O-Kut Company, Inc.
E-7, 8	Pickering, Inc.
E-9, 10	Radio Music Corporation
E-11, 12	The General Industries Co.
E-13, 14	Webster-Chicago Corporation
E-15, 16	Garrard Sales Corporation
E-17, 18	The Alliance Manufacturing Co.
E-19, 20	Audak Company, Inc.
E-21	General Electric Company
E-22, 23	M. A. Miller Mfg. Co., Inc.
E-24	AIM Industries
E-25, 26	Audio Devices, Inc.
E-27, 28	Jensen Industries, Inc.
E-29	The Recordisc Corporation
E-30 to 32	Duotone Company, Inc.
E-33	Wilcox-Gay Corporation
E-34 to 37	Crescent Industries, Inc.
E-38	V-M Corporation
E-39, 40	Electrovox Co., Inc.

(For Detailed General Index of Specific Items and Their Page Numbers, Refer to Back of Book)

NUMERICAL INDEX OF MANUFACTURERS' DISPLAY PAGES (Cont'd)

SECTION F

TESTING, MEASURING, INDICATING INSTRUMENTS—
ANALYZERS—PANEL METERS—TEST EQUIPMENT

<i>Section & Page</i>	<i>Name of Manufacturer</i>
F-1 to 4	Radio Corporation of America
F-5 to 16	Simpson Electric Company
F-17 to 22	Precision Apparatus Co., Inc.
F-23 to 28	Triplet Electrical Instrument Co.
F-29 to 32	Supreme, Inc.
F-33 to 36	Measurements Corporation
F-37 to 42	Jackson Electrical Instrument Co.
F-43, 44	Allen B. Dumont Laboratories, Inc.
F-45 to 51	Hickok Electrical Instrument Co.
F-52	General Electric Company
F-53 to 57	J-B-T Instruments, Inc.
F-58	Shurite Meters

Figures in bold type are ICAS ratings.

*Heater-type cathode.

★Lower prices apply when new tube is purchased and radiator in good condition is returned prepaid, to Schenectady.

**Credit for return, prepaid, to Schenectady—carton \$5.00; tube \$10.00.

§Single-, three-, or six-phase filament. Voltage is per strand, current is per terminal.

⊙Forced-air cooled type.

⊙Water-cooled type.

There's a G-E Electronic Tube for Every Purpose:

- Pliotrons
- Thyatrions
- Phanotrons
- Kenotrons
- Ignitrons
- Phototubes
- Lighthouse Tubes
- Phasitron
- Ballast Tubes
- Cathode-Ray Tubes
- Glow Tubes
- Vacuum Capacitors
- Vacuum Switches

ΔSurge-limiting diode operation.

IGNITRONS—HIGH-PEAK CURRENT, POOL-CATHODE TUBES

Type No.	Price	Supply Volts	MAXIMUM RATINGS			
			Kva Demand	Corresponding Average Anode Current, Amps.	Maximum Average Anode Current, Amps.	Corresponding Kva Demand
GL-5550/GL-415*	\$ 41.00	250-600 rms	300	12.1	22.4	100
GL-5551/FG-271*	73.50	250-600 rms	600	30.2	56.0	200
GL-5552/FG-235-A*	110.00	250-600 rms	1200	75.6	140	400
GL-5553/FG-258-A*	241.00	250-600 rms	2400	192	355	800
GL-5554/FG-259-B†‡	173.00	2400 rms	1200	75	113	600
GL-5555/FG-238-B†‡	336.00	2400 rms	2400	135	207	1105

*Ratings are for voltages of 600 volts rms and below. Ignitor requirements for all welding-control types are 200 volts and 30 amperes.

†Typical ignitor requirements for power-rectifier ignitrons are 75-125 volts, 15-20 amperes. Maximum

requirements are 150 volts, 40 amperes.

‡In addition to ratings given above for welder-control service the FG-238-B and FG-259-B may be used as power-rectifiers in the 125 to 900 d-c voltage fields (ratings will be supplied upon request).

Prices and other data subject to change without notice.

RCA AMATEUR-TYPE TUBES

THERE'S AN RCA TUBE FOR EVERY AMATEUR SERVICE

New Tubes are Your Best Buy! Specify RCA Power Tubes and you get the advantages of new ratings, longer life.

Tubes represent only a fraction of the total cost of your rig. But they play a vital part in determining your operating results.

Every new RCA Tube is sold with a warranty from the Radio Corporation of America.

RCA Headliners for Hams (HAM-103). Get your copy of this important new publication at your RCA Distributor's today. It contains new ratings, new operating conditions, new data on modulators, and lists many of RCA's most popular Amateur types.

NATIONAL UNION RADIO CORP. - - - - ORANGE, NEW JERSEY

Precise engineering techniques and rigid quality control under skillful technical supervision make National Union Transmitting and Special Purpose Tubes the "preferred" tubes for replacement and initial equipment service. "War-born know-how" through National Union Research continues to assure the reputation that National Union Tubes enjoy for long life, economy and reliability.

Effective Jan. 15, 1948

The Transmitting and Special Purpose Tubes here listed represent the faster moving types in demand by Industrial, Communication, Ham, Military and Experimental Users. Stocks are maintained for prompt delivery. This list is continually being supplemented and inquiries are therefore invited on any types not shown in this list.

N. U. BASIC REPLACEMENT

CAPACITORS

are especially selected for the Radio Serviceman's everyday needs.

131 TYPES

- ★ **"NUMITES"** —Dry Electrolytic—Sealed Metal Tube—Cardboard Sleeve
SINGLES & DUALS
53 Sizes—from 4 Mfd. to 100 Mfd.
4-4 Mfd. to 80-40 Mfd.
at Working Voltages 25 to 525
- ★ **"NUCARMITES"** —Dry Electrolytic—Wax Super-Seal Tubulars—Mounting Strap
DUALS
Common Negative or Separate Section
9 Sizes—from 16-16 Mfd. to 40-80 Mfd.
at Working Voltages 150
- ★ **"NUPAMITES"** —Paper Capacitors — Super-Seal Wax Filled — Cardboard Tubular
15 Sizes—from .0001 Mfd. to .5 Mfd.
at 600 W.V.D.C.
- ★ **"THREDMOUNT"** —Dry Electrolytic — Aluminum Can — Threaded Screw Base
SINGLES & DUALS
Common Negative or Separate Section
21 Sizes—from 4 Mfd. to 40 Mfd.
8-8 Mfd. to 20-20 Mfd.
at Working Voltages 450 to 600
- ★ **"TWISTAB"** —Dry Electrolytic — Aluminum Can — Twist Tab Mount
SINGLES, DUALS, TRIPLES & QUADRUPLES
33 Sizes—from 10 Mfd. to 500 Mfds.
(Single) to 10-10-10-10 (Quadruple)
at Working Voltages 25 to 450

Average 24% SMALLER and more COMPACT—yet more rugged and durable.

LONG-LIFE performance to protect Serviceman's "Customer Repair Guarantee".

Extra long SHELF LIFE to protect Serviceman's stock investment.

WIDE RANGE of types, capacities and working voltages for complete repair service requirements.

Clear, legible RATING IMPRINT.

PRICED for full profit on every Service job. Competitively advanced Distributor pricing structure.

Complete Data and Pricing information on request.

NU 500M-CB	500,000	Special Tone Control—Audio Grid

SPECIFICATIONS: Max. Diameter (not including terminals) 1 1/8" approx.—Max. Length (not including terminals) 1 1/2" approx.

NOTES: Each Control is supplied with SWITCH. TAPPED Controls indicated by letter "T" in Catalog Number. Special TONE Control indicated by letter "C" in Cat. No.

UNIBALLASTS •

The National Union UNIBALLAST is a metal shell plug-in type LINE VOLTAGE DROPPING RESISTOR designed to supply Filament and Pilot Light voltages to Radio Sets operating from A.C. or D.C. 117 (Mean) Volt Power Supply Lines. The Voltage Dropping Range is indicated on every Uniballast.

ONLY TEN UNIBALLASTS are required to provide adequate replacement for over 875 types of ordinary ballasts.

ALL TYPES \$1.25 LIST, EA., Individual Carton Packed.

ELECTRONIC AND RADIO TUBES

SUBMINIATURE TUBES

Here they are—and here's why more Raytheon Subminiature Tubes are on the job than all other makes combined—five million of them for commercial applications.

1. REDUCED PRODUCT SIZE . . .

INCREASED PRODUCT SALABILITY.

Raytheon filamentary Subminiatures are flat. Batteries can be little instead of big because of extremely low filament drain.

2. PLUG INTO STANDARD SOCKETS.

All Raytheon Subminiatures can either be soldered in or plugged into sockets available from a number of manufacturers.

3. AS RELIABLE AS A FINE WATCH.

The result of Raytheon's unique precision assembly methods backed by eight years' continuous production of long-life Subminiature Tubes.

4. READILY AVAILABLE FROM STOCK.

Over half a million of the Tubes described below are on tap at all times. They are standard throughout the world.

5. AT YOUR LOCAL DISTRIBUTOR.

Over three hundred Raytheon Special Purpose Tube Distributors stand ready to serve you quickly and intelligently.

KEN-RAD RADIO TUBES

metal - glass - miniature
ALL TYPES AND RATINGS

Ken-Rad's complete line of tubes is widely known and highly regarded by service men and owners of radio sets. Top quality means outstanding performance and long life. With Ken-Rad tubes your radio plays better! . . . Some of the many popular types in the Ken-Rad line are listed below: Ask for complete prices and ratings!

KEN-RAD TUBES ARE A PRODUCT OF GENERAL ELECTRIC COMPANY

TO HELP YOU PICK THE BEST

Here are a few facts to help you choose the best: In approximately 90% of the new commercial mobile transmitter designs, you will find Hytron instant-heating tubes. Over 2,500,000 Hytron gaseous voltage regulators speak for themselves. Ratings of Hytron vhf tubes are CCS and based on actual equipment performance which you can duplicate. No other transmitting triode can touch the new all-purpose 5514 for economical versatility. Famed for transmitting tubes, Hytron also originated the popular "GT", and is the oldest manufacturer specializing in receiving tubes. You pick the best when you pick Hytron.

New data sheets: 2E25, 2E30, HY31Z, HY69, HY75A, HY1231Z, HY1269, 5514, 5516. Free.

*Both sections of twin triode. NOTE: Special pulse tube, not recommended for c.w., consult Hytron Commercial Engineering Dept. for data. †5514 supplants the HY30Z, HY40, HY40Z, HY51A, HY51B, and HY51Z, the HY75A the HY75, and the 2E25 the HY65. *Current for full wave. †Instant-heating.

Keep up to date with the Hytron Reference Guide for Miniature Electron Tubes. Free.

New transmitting and special purpose tube catalogue. It's yours for the asking.

Simple, sure-fire vfo for 1 1/2 or 2 meters. HY-Q75 kit: unassembled, \$9.95; assembled, \$11.95.

For better reception, it's also Hytron — GT, G, lock-in, or miniature.

DIFFUSION PUMP

HV-1 Diffusion Pump	\$125.00
An air-cooled, oil diffusion type, vacuum pump. Ultimate vacuum, 4x10 ⁻⁷ mm of mercury. Speed (without baffle) approx 67 liters/seconds.	
100 IG, Ionization Gauge	\$22.50
An electronic vacuum pressure gauge. Filament voltage 3.5 to 7.5 volts.	
Eimac Pump Oil A	\$5.00 qt.

AIR-SYSTEM SOCKETS

4-400A-4006	6.00
4-1500A-4006	7.50

EIMAC VACUUM SWITCHES

Type	General Data	Price
VS-2	Single pole double throw switch within a high vacuum adaptable for high voltage switching. Contact spacing 0.15". Switch will handle R.F. potentials as high as 20 kv. in DC switching will handle approximately 1.5 amps at 5 kv.	\$12.00
VS-1	Same as above except for slightly smaller glass tubulation.	\$12.00

Long the criteria of good design in any electronic equipment, Eimac tubes are today the undisputed leaders of their field. Complete data on any of the Eimac products listed is available by writing direct.

EITEL-McCULLOUGH, Inc.

** Max. C.C.S. ratings in Class C oscillator service.

† Two filament strands in series with large post at neutral junction; operate in series at 22 volts or two phase with 11 volts per strand.

‡ This rating applies only with forced air cooling.

Per unit, heater can be arranged to operate from either a 6.3 or 12.6 volt supply.

† Six filament strands connected from each post to floating neutral. See individual data sheets for connections.

‡ Three filament terminals Y-connected in 3 phase.

¶ Three filament terminals Y-connected in 3 phase with neutral center terminal.

#&R Indicates forced air-cooled radiator.

ELECTRON TUBES**

General Electronics electron tubes have been designed by a well known electronic engineer, who was an early pioneer in the development of the tube industry.

Many induction heating applications and diathermy

oscillators and rectifiers have been designed by General Electronics, which means that we are constantly designing tubes for special applications in these various fields.

Inquiries are invited on types not listed, which may be required for special applications.

GENERAL ELECTRONICS, INC. • 101 Hazel St., Paterson, N. J.

CETRON ELECTRONIC TUBES

Engineered and Manufactured by Continental Electric Co., Geneva, Ill.
CETRON PHOTOTUBES

CETRON phototubes are either of the gas-filled or of the vacuum type. With the gas-filled type, greater effective response is obtained, particularly in low impedance circuits, while the vacuum type is recommended where maximum stability is desired.

CETRON phototubes are selected as to their sensitivity and priced accordingly. Phototubes of the Super Class A/B are generally used for experimental purpose where very high sensitivities are required; Class C mostly for motion picture equipment; Class D for relay work, etc.

CETRON BLUE SENSITIVE TUBES

CETRON blue sensitive tubes comprise the most complete line of phototubes designed for sound reproduction work from dye recorded film.

Continental Electric also manufactures a complete line of special purpose phototubes such as: CE-5, CE-7, CE-8, CE-10, CE-15, CE-18, CE-20, CE-26, etc. We will be happy to work with you on design and development problems. Full data, prices, etc., will be forthcoming upon request.

GAS-FILLED PHOTOTUBES

The rated sensitivity for Super Class A/B is 200 microamperes per lumen and up (average 300); Class C, 125-200 microamperes per lumen (average 160); Class D, 75-125 microamperes per lumen (average 100). These sensitivities are measured at recommended operation and test voltage as specified in our technical chart.

VACUUM PHOTOTUBES

The rated sensitivity for Super Class A/B is 30 microamperes per lumen and more (average 35); Class C, 22-30 microamperes per lumen (average 25); and Class D, 12-22 microamperes per lumen (average 16); all are measured at 250 Volts.

Engineering bulletins giving detailed specifications on all tubes listed here are available and may be had upon request. The extensive engineering and manufacturing facilities which we have, make possible the development and production of many types of special tubes. If you have a problem involving the use of any CETRON tubes you are invited to consult with us. We are also prepared to make special tubes to your specifications.

WARRANTY

We guarantee all products manufactured by us to be free from all material and manufacturing defects and to give satisfactory service when operated in accordance with instructions indicated for their use.

TRANSFORMERS

1161 N. VINE ST., HOLLYWOOD, CALIFORNIA • 250 WEST 57 STREET, NEW YORK, N. Y.

Altec Lansing A-126, A-127 and A-255 series beam power amplifiers have been designed for the most exacting demand of high quality audio frequency power. Particularly, they are adaptable for broadcasting, wired music studio equipment, premium quality public address and music distribution use, and for disc recording where particular stress is placed on having full power available at all frequencies up to 10,000 cycles for orthoacoustic pre-emphasized recording and where outside-inside high frequency equalization is used.

These amplifiers will deliver POWER within 1 db of rating from 40 to 10,000 cycles thus assuring against intermodulation distortion; when operating 3 db below rating their frequency response is uniform within 1 db from 20 to 20,000 cycles, more than adequately spanning the FCC requirements for FM transmission. Input

transformers have 90 db of shielding to allow operation near high external magnetic fields without danger of hum pickup.

These beam power amplifiers, finished in blue-grey baked enamel, are assembled on relay rack panels of recess pan construction making them adaptable for either rack or cabinet mounting. The front mat is readily removed exposing all wiring, terminals and components for quick servicing. A plate meter permits speedily checking the current of each vacuum tube, and a screw driver adjustment is provided for balancing the output tubes for optimum operation.

The A-125 amplifier has a built in equalizer with terminals which can be strapped to provide either low or high frequency boost or droop to compensate for pick-up deficiencies, transmission line losses and auditorium acoustics.

A-255 AMPLIFIER

SPECIFICATIONS

	A-126	A-127	A-255
GAIN	90 db (all models) fixed attenuation in steps of 4, 8 and 12db.	A-127 Max. 66 db for 100,000 ohm input A-127 A-B Max. 66 db for all impedances without fixed pad. A gain control of 40 db range in steps of 2 db is provided on the input.	65 db 500 ohm input. An additional input terminal is available which provides a bridging input of approximately 20,000 ohms. The gain on this tap is 37 db. A gain control of 40 db range in 2 db steps is provided on the input.
FREQUENCY RANGE	20-20,000 cycles within 1 db. Without equalization.	20-20,000 cycles within 1 db.	20-20,000 cycles within 1 db.
POWER OUTPUT	15 watts with not more than 8% intermodulation or 2% total harmonics.	15 watts with not more than 8% intermodulation or 2% total harmonics.	40 watts with not more than 8% intermodulation or 2% total harmonics. When strapped for reduced plate voltage power output 30 watts.
NOISE LEVEL	-27 dbm (ref. 0.01 watt)	-42 dbm (ref. 0.01 watt)	28 dbm (ref. 0.01 watt)
INPUT IMPEDANCE	30, 250 or 500, 600 ohms (all models)	A-127 Grid input 100,000 ohms. A-127 A-B 600, 500, 300, 250, 36, 30 ohms.	600, 500, 250, or 30 ohms (all models).
OUTPUT IMPEDANCE	10 or 20 ohms A-126 A 11, 54, 125, 220, 500 ohms. *A-126 B 500, 750, 2900, 3000 ohms.	A-127 and A-127 A, 10 or 20 ohms. *A-127 B, 3300, 2000, 750, 500 ohms.	A-255, 10 or 20 ohms. *A-255 A, 3000, 2000, 750, or 500 ohms.
POWER SUPPLY	105, 117, or 130 volts, 50-60 cycles—110 watts. Separately fused.	105, 117, or 130 volts, 50-60 cycles—110 watts. Separately fused.	105, 117, or 130 volts, 50-60 cycles—200 watts. Separately fused.
EXTERNAL SUPPLY	Provision is made to furnish 6.3 volts A.C. at 2 amps for pre-amplifier filaments and 340 volts at 8 milliamps for plate supply.	Delivers for external use 6.3 volts A.C. at 2.5 amp and 350 volts D.C. for plate supply for one pre-amplifier.	Delivers 6.3 volts A.C. for filament and 350 volts D.C. for plate supply for one pre-amplifier.
P. E. C. SUPPLY	Provides regulated and separately filtered current of 1 milliamp at 85 volts.

* Particularly suitable for driving A-287W 250 watt Class B amplifier provided by output transformer with tertiary winding for feed back voltage.

ALTEC

LANSING CORPORATION

SPEAKERS AMPLIFIERS TRANSFORMERS

1161 N. VINE ST., HOLLYWOOD, CALIFORNIA • 250 WEST 57 STREET, NEW YORK, N. Y.

The Altec Lansing A-287 series of amplifiers are available for use where very high audio power is required. They are of the single stage push pull type with self contained power supplies and, in general, are constructed on the same lines as the A-126, A-127 and A-255 series amplifiers. Since these are strictly power amplifiers, having only 12 to 15 db gain, they must be operated from a driver amplifier such as one of the Altec Lansing A-126, A-127 or A-255 series.

These amplifiers, which are finished in blue-grey baked enamel and designed for rack mounting, are ideally suited for large auditoriums, electric organs, church chimes, skating rinks, sports fields and large industrial public address applications where audio power up to ¼ kilowatt is desired in one package.

A-420 PRE AMPLIFIER

A-287 F OR W AMPLIFIER

The Altec Lansing A-420 is a two stage fixed gain low level pre-amplifier designed to operate into the Altec Lansing A-126, A-127 and A-255 series of amplifiers from which it obtains its filament and plate supply. It is intended as a pre amplifier for microphone, photograph pick-ups and other low level signals. The input transformer has 90 db of

magnetic shielding so as to permit hum free operation when mounted on racks in close proximity to power equipment having high tray magnetic fields. This amplifier, which is finished in blue-gray baked enamel, is assembled on a relay rack panel of recess construction so that it can be readily mounted on a rack or in a cabinet.

SPECIFICATIONS

	A-287F	A-287W	A-420
GAIN	15 db from all input impedances.	Approximately 12 db from 3,000 ohm impedance driver	Normal 12 db, High 49 db.
FREQUENCY RANGE	20-20,000 cycles within 1 db.	100-10,000 cycles within 1 db.	20-20,000 cycles within 1 db.
POWER OUTPUT	75 watts with less than 5% intermodulation (2% total harmonic distortion). When strapped for reduced plate voltage power output 50 watts.	250 watts (5% total harmonics) Class B.	2 dbm (0.01 watt ref.)
NOISE LEVEL	22 dbm (0.01 watt ref.)	21 dbm (0.01 watt ref.)	77 dbm (0.01 watt ref.)
IMPEDANCE	Input 11, 55, 125, 220 and 500 ohms. The internal output impedance of the amplifier is 18, 9, 4.5 and 2.25 ohms depending upon input impedance. These impedances are intended to work into loads of 24, 18, 12, 24, 6, 12, and 3 ohms. Maximum power is obtained when the amplifier works into 30, 18, 9 and 4.5 ohms.	Input Use driver amplifier having minimum undistorted output of 15 watts and having an output impedance of 3,000 ohms with center tap output. Taps to work into loads from 2.25-40 ohms.	Input -30, 36, 250, 300, 500, 600 ohms. Output -500, 500, 300, 250, 150, 125, 75, 62.5 ohms.
POWER SUPPLY	195-117-130 volts - 50-60 cycles - 100 watts internally fused.	195-117-130 volts - 50-60 cycles - 700 watts - internally fused.	Requires 6.3 volts at 0.6 amp, 325 volts D.C. at 6 ma.

SPEAKERS AMPLIFIERS TRANSFORMERS

1161 N. VINE ST., HOLLYWOOD, CALIFORNIA • 250 WEST 57 STREET, NEW YORK, N. Y.

A-323B AMPLIFIER

The A-323B is a portable conventional chassis type general-purpose amplifier designed for high quality reproduction of sound, music, and speech from records, radio and microphone. It is engineered and manufactured to meet the high quality standards required of an amplifier when used in conjunction with Altec Lansing speakers.

The outstanding features are: (1) Full rated POWER output within 1 db from 35 to 12,000 cycles. (2) Hum balancing potentiometer to eliminate necessity of careful selection of tubes for quiet operation. (3) Two inputs with selector switch for high and low gain. (4) Continuously variable low frequency tone control. (5) High frequency equalization through use of a stepped controlled low pass filter which gives sharp cutoff of noise frequencies yet allows full reproduction of usable high frequencies. Operation of this low pass filter is quite different from customary treble tone control and is only available generally on the most expensive amplifiers. (6) Equalization for phonograph pickup in the first amplification stage designed primarily for the new General Electric variable reluctance or Pickering pickup but which also meets the requirements of other types of reproducers for the reproduction of commercial recordings. This phonograph equalization which is not in the low gain input circuit for radio, can be removed by unsoldering a strap when a microphone is used on high gain phonograph input for P.A. work. This leaves a flat frequency response that can be varied by means of the bass and treble tone controls.

A-324 AMPLIFIER

The Altec Lansing A-324 Amplifier is a portable 15 watt Public Address amplifier designed for use in high quality public address and music systems.

The outstanding features of this amplifier are: (1) FLAT frequency response ± 1 db from 20 cycles to 20,000 cycles (when tone controls are set for flat response). (2) Delivers full rated POWER within 1 db from 35 cycles to 12,000 cycles. (3) TWO high gain low impedance microphone inputs with individual volume controls on each input for mixing purposes. (4) TWO low gain high impedance inputs for AM or FM tuner, crystal phonograph pickup or high impedance microphone. These two inputs have a dual "fade" type volume control which allows fading smoothly from one input to the other. (5) Bass control gives flat bass response or continuously variable bass boost of 12 db at 50 cycles. When set at "FA" position, the bass response of the low impedance microphone inputs is attenuated to eliminate "boominess" due to improper microphone technique. (6) Continuously variable treble attenuator from flat response. (7) Microphone input transformers have electrostatic shield between primary and secondary, and 90 db of magnetic shielding—eliminating hum pickup from stray magnetic fields. (8) Extra AC power socket on chassis for connecting radio tuner or record player. (9) Pilot lamp jewel indicates when amplifier is in operation.

The Altec Model A-324 Amplifier is a professional amplifier, constructed of heavy duty parts and is designed for continuous service. Finish is grey crackle with chrome operating control panel.

BELL SOUND EQUIPMENT

Through years of satisfactory performance, recorded throughout the world by all classes of users, Bell Sound Equipment has proved its own high standards of quality and design leadership. A reputation for "sound" advancement that continues to grow.

As typified by the latest equipment described in the following pages, Bell Engineers have not only made effective utilization of the newest advances in the science of sound control, but also have offered technical advances resulting from their own research.

... ingenuity that enabled Bell to lead the way in modern sound equipment styling—to introduce improvements in circuit design that have enriched the quality and fidelity of amplified sound—to play a leading roll in introducing inexpensive, high-quality recording equipment—and to be one of the first to bring dependable inter-communication equipment into the low-price ranges.

Every Bell Sound System is designed to make sound amplification universally practical; to bring quality sound equipment

well within the reach of everyone who needs it. Bell Systems feature such remarkable ease, convenience, and simplicity of operation that excellent results can be obtained by any novice without special instruction or technical knowledge.

As the finished product readily reveals, Bell Equipment is built to the highest standard of precision in one of the most modern, best-equipped plants in the industry. Every unit is thoroughly tested and certified by expert technicians. Distribution is then made through jobbers and dealers known to be thoroughly reliable, capable of making correct recommendations, and fully equipped to offer complete service.

Although the extensive line of Bell Equipment covered in this catalog meets most requirements, Bell is prepared to build a wide range of special or tailor made equipment—either for industrial use or in quantities for other manufacturers to use as part of their product. Therefore, if you desire sound or amplification equipment of practically any description, write for detailed, special recommendations. They will be furnished promptly without obligation.

Bell has the "Sound" Answer

10 WATT AMPLIFIER

Model 3710

An ultra-modern 10 watt Amplifier ideal for many uses! It has incorporated in its construction, beam power, push-pull output tubes and has a rated output of 10 watts, with a peak of 12 watts. Harmonic distortion is decreased and the Amplifier is stabilized by inverse feedback. Three inputs are provided; microphone, phonograph and musical instrument such as an electrical guitar. Two volume controls are provided that permits the operator to mix the microphone and phonograph or instrument. The modern design of the cabinet with its large "man size" plastic handle provides the maximum in portability.

- Extremely Portable.
- Three Input Circuits.
- Modern Compact Design.
- Rugged Construction.
- Push-Pull Output.
- Easily Removable Top.
- Inverse Feedback Stabilizer.

SPECIFICATIONS Model 3710

Power Output: 10 Watts at Less than 8%. Peak Power 12 Watts.
Freq. Response: Plus or Minus 2 db. 40 to 15000 cycles.
Overall Gain: Microphone Channels 108 db; Phono Channel 70 db.
Hum Level: —60 db Below Rated Output.
Inputs: 1 Microphone; 1 Phonograph; 1 Instrument.
Input Imped: Micro & Inst. Channels 10 Megs.; Phono Channel 1 Meg.
Controls: 1 Micro. Vol. Cont.; 1 Phono Vol. Cont.; 1 Tone Cont. W/AC SW.
Output Imp: 4; 8; 15 ohms.
Power Cons: 80 Watts, 117 Volts, 50-60 Cycles.
Tubes: 1—6SJ7; 1—6SL7GT; 2—6V6GT; 1—5Y3GT.
Dimensions: 14" Deep; 7¾" High; 6¼" Wide.
Shipping Weight: 14 lbs.

BELL AMPLIFIERS

15 WATT AMPLIFIER

Model 3715

- Three Input Circuits.
- Illuminated Control Panel.
- Beam Power Output Tubes.
- Simplified Operation.
- Exceptional Tone Quality.

This amplifier is as fine in performance as it's functional and modern design suggests. The beautiful gray and silver case, with it's illuminated, full-view control panel, is high lighted by distinctive red plastic control knobs. The amplifier has an undistorted output of 15 watts with a peak of 18 watts. It utilizes push-pull beam power output tubes, inverse feedback that reduces harmonic distortion, and has three input channels with separate volume controls that permit mixing of two microphones and a phonograph simultaneously.

SPECIFICATIONS

Model 3715

Power Output: 15 Watts at less than 5% Peak Power 18 Watts.
Freq. Response: Plus or Minus 1 db. 30 to 13,000 Cycles.
Overall Gain: Microphone Channels 120 db.; Phono Channel 87 db.
Hum Level: -63 db. Below Rated Output.
Inputs: 2 Microphone; 1 Phonograph.
Input Imped: Microphone Channels 10 Megs; Phono Channel 1/2 Meg.

Controls: 2 Microphone Volume Controls; 1 Phono Volume Control; 1 Tone Cont. W/AC Switch.
Output Imp: 2.5; 4; 8; 15; 250; 500 ohms.
Power Cons: 100 Watts; 117 Volts; 50-60 Cycles.
Tubes: 2-7B7; 1-6SF5; 1-6N7; 2-6V6G; 1-5U4G.
Dimensions: 11 1/2" Deep; 8" High; 16 1/2" Wide.
Shipping Weight: 32 lbs.

25 WATT AMPLIFIER

Model 3725

An ideal Amplifier of medium wattage. This seven tube model has proven to be one of the most popular units that Bell has ever manufactured. For a good all around amplifier of medium price it cannot be beaten. Experienced engineering and time proven circuits has made it one that thousands of users rely on day in and day out for continuous satisfactory service. The Model 3725 is truly the "Work Horse" of Bell's entire amplifier line.

SPECIFICATIONS

Model 3725

Power Output: 25 Watts at Less than 5%. Peak Power 33 Watts.
Freq. Response: Plus or Minus 2 db. 50 to 18,000 Cycles.
Overall Gain: Microphone Channels 122 db.; Phono Channel 89 db.
Hum Level: -65 db. Below Rated Output.
Inputs: 2 Microphone; 1 Phonograph.
Input Imped: Micro. Channels 10 Megs; Phono Channel 1/2 Meg.
Controls: 2 Microphone Volume Con-

trois; 1 Phono Vol. Control; 1 Bass Tone Cont.; 1 Treble Tone Cont. W/AC Sw.
Output Imp: 2.5; 4; 8; 15; 250; 500 ohm.
Power Cons: 150 Watts; 117 Volts; 50-60 Cycles.
Tubes: 2-7B7; 1-6SF5; 1-6N7; 2-6L6G; 1-5U4G.
Dimensions: 11 1/2" Deep; 8" High; 16 1/2" Wide.
Shipping Weight: 38 lbs.

- Treble and Bass Boost.
- Ultra-Modern Design.
- Three Input Circuits.
- Illuminated Control Panel.
- Built to Last—Easy to Service.

50 WATT AMPLIFIER

Model 3750

This unit offers "powerhouse" performance with sufficient wattage to cover 90% of all commercial sound requirements. It has power to spare and has been designed for the ultimate in flexibility and operation. Three microphones and a phonograph can be simultaneously mixed by the operator. New tone control circuits, operating in an inverse feedback network, provide extremely wide tone adjustments with greatly reduced distortion. For example, the Bass Control is adjustable from flat response to plus 10 db or to minus 20 db and the treble control from plus 8 db to minus 22 db, 30 db overall.

SPECIFICATIONS

Model 3750

Power Output: 50 Watts at Less than 5%. Peak Power 88 Watts.
Freq. Response: Plus or Minus 1 db., 30 to 15,000 Cycles.
Overall Gain: Microphone Channels 125 db.; Phono Channel 90 db.
Hum Level: -67 db. Below Rated Output.
Inputs: 3 Microphone; 1 Phonograph.
Input Imped: Microphone Channels 10 Megs; Phono Channel 1/2 Meg.
Controls: 3 Microphone Volume Controls; 1 Phono Volume Control, 1 Bass Tone Cont; 1 Treble Tone Cont. W/AC Switch.

Output Imp: 2.5; 4; 8; 15; 250; 500 ohms.

Power Cons: 260 Watts; 117 Volts; 50-60 Cycles.

Tubes: 3-7C6; 3-6SC7; 1-6SN7; 2-6L6G; 1-5U4G; 1-5R4GY; 1-5V4G.

Dimensions: 16 1/2" Deep; 8" High; 16 1/2" Wide.

Shipping Weight: 62 lbs.

Model 3750-R same as above but provided with a relay to permit remote operation of "B" supply.

- Rugged Construction.
- Four Inputs.
- Bass and Treble Boost.
- Available for Remote Standby Operation.
- Excellent Frequency Response.

BELL MOBILE AMPLIFIERS

6 WATT MOBILE AMPLIFIER Model 3706-M

- Phono & Micro Inputs.
- Chassis Removable for Servicing.
- Fits under most dashboards.
- Battery Stand-by Switch.

Here is a brand new addition to the time-proven Bell line of amplifiers. A compact, rugged and amazingly efficient low wattage mobile amplifier. It was especially designed for use by Municipal Police and Fire Departments, Safety Patrols, Traffic Control and outdoor audible advertising. The tubes and vibrator can be inspected or changed without disturbing the installation because the chassis and front panel are so constructed that they easily slide out of the case. In an emergency a whole new spare unit can be inserted in the case. It will operate on 6 volts DC or 117 volts 60 cycles and is provided with a standby switch to conserve battery drain. It comes complete with two cables. Any high impedance microphone can be used with this amplifier.

SPECIFICATIONS Model 3706-M

Power Output: 6 Watts at Less than 5%
Peak Power 8 Watts.
Freq. Response: Plus or Minus 2 db., 60 to 15,000 Cycles.
Overall Gain: Microphone Channel 112 db.; Phono Channel 75 db.
Hum Level: -60 db. Below Rated Output.
Inputs: 1 Microphone; 1 Phonograph.
Input Imped: Microphone Channel 10 meg.; Phono Channel 1 meg.

Controls: 1 Microphone and Phono Volume Control with Power Switch; 1 Battery saver stand-by switch.
Output Imp: 4; 8; 15 ohms.
Power Cons: 45 Watts; 117 Volts; 60 Cycles; 8 Amperes; 6 Volts D.C.
Tubes: 1-6SJ7; 1-6SN7; 1-6L6; 1-6X5GT.
Dimensions: 10" Deep; 6½" High; 5½" Wide.
Shipping Weight: 15 lbs.

25 WATT MOBILE AMPLIFIER Model 3723-M

This unit is another new member of the Bell line of Amplifiers. It is a medium wattage mobile Amplifier of the most modern design. It has a microphone input and a built-in phono unit. The volume of both the microphone and phono are individually controlled and in addition, a tone control is provided to permit individual selection or adjustment of the bass or treble response. There is also a stand-by switch provided to turn off the "B" supply while the filaments remain heated. This permits economical operation and extends the life of the battery power supply.

SPECIFICATIONS Model 3723-M

Power Output: 25 Watts at Less than 5%. Peak Power 38 Watts.
Freq. Response: Plus or Minus 2 db. 30 to 15,000 Cycles.
Overall Gain: Microphone Channel 115 db.; Phono Channel 82 db.
Hum Level: -60 db. Below Rated Output.
Inputs: 1 Microphone; 1 Phonograph.
Input Imped: Microphone Channel 10 meg.; Phono Channel ½ meg.
Controls: 1 Microphone Volume Control; 1 Phono Volume Control; 1

Tone Control W AC Switch, 1 Standby Switch, 1 Phono motor off-on switch.
Output Imp: 2.5; 4; 8; 15; 250; 500 ohms.
Power Con: 115 Watts; 117 Volts 60 Cycles; 19 Amperes; 6 Volts D.C.
Tubes: 1-7B4; 1-6C5; 1-6SN7; 2-6L6; 2-6X5GT.
Dimensions: 11½" Deep; 10" High; 16½" Wide.
Shipping Weight: 40 lbs.

- Built in Phono unit.
- Standard Bell Cabinet.
- Illuminated Control Panel.
- Remote Drive on Controls.
- Heavy Steel Construction.

30 WATT MOBILE AMPLIFIER Model 3728-M

- Astatic AB-8M Mobile Pickup.
- Circuit Breaker Protection on 6 volts.
- Bass Boost and Treble Compensators.
- Power Economizer Switch.
- Three Input Channels.
- Heavy Duty Dual Vibrator.

One of the most completely satisfying mobile Amplifiers ever offered for general use. The "Moto-Master" combines a 30-watt amplifier of tone and quality, with a phono pickup of new design, that plays all 12" and smaller records. Market research proves it's capacity is more than ample for the majority of needs.

This high gain unit operates on either a 6 volt DC storage battery or 117 volt 60 cycle AC line current. Conversion from one type of current to another is achieved by simply removing one plug and inserting the other. Current consumption on battery is reduced by a power economizer switch. High fidelity; improved wide range tone controls; beam power output tubes; and two microphones inputs and one phono input, each with separate volume controls are features of the "Moto-Master".

Turntable speed of 78 r.p.m. New type crystal pickup stays "in the groove."

SPECIFICATIONS Model 3728-M

Power Output: 30 watts at Less than 5%.
Peak Power 45 Watts.
Freq. Response: Plus or Minus 2 db. 50 to 14,000 Cycles.
Overall Gain: Microphone Channels 120 db.; Phono Channel 84 db.
Hum Level: -60 db. Below Rated Output
AC: -58 db. on DC.
Inputs: 2 Microphone; 1 Phonograph.
Input Imped: Microphone Channels 10 Meg.; Phono Channel 1 Meg.
Controls: 2 Microphone Volume Controls;

1 Phono Volume Control; 1 Bass Tone Cont; 1 Treble Tone Cont. with Power Switch; 1 Stand by Switch; 1 Phono OFF-ON Switch.
Output Imp: 2.5; 4; 8; 15; 250; 500 ohms.
Power Cons: 22 amp., 6 volts DC; 120 watts; 117 volts; 60 Cycles.
Tubes: 1-7Y4; 2-7Z4; 3-7B4; 1-6SL7; 2-6L6GA.
Dimensions: 16½" Deep; 10" High; 16½" Wide.
Shipping Weight: 60 lbs.

BELL P.A. SYSTEMS

10 WATT PHONO-PA SYSTEM Model PA-3710-P

The Bandmaster

- A truly complete P. A. System.
- Self-contained Phono Unit.
- 10 Watts Undistorted Output.
- Musical Instrument Input.
- All in one three piece case.
- Inverse Feedback Stabilizer.
- Beam Power Output Tubes.
- Three Input Channels.
- Portable and easy to carry.

In quality, performance and economy, the Bell "BAND-MASTER" is one of the most completely satisfactory phono P.A. systems ever offered for general use. It will delight the emcee whether he be professional or amateur and is the neatest "package" of "sound value" ever offered in the low price field. One compact, easily carried system provides all the facilities for covering any medium-sized auditorium with public address, recordings or original music by voice or instrument for all occasions.

Design flexibility allows for simultaneous use of all 3 inputs when wanted. Exceptionally fine tone is provided by the 10 watt amplifier which utilizes beam power push-pull output tubes. Inverse feedback minimizes distortion and stabilizes the amplifier. The phono-motor and crystal pickup are of high quality.

The tone control assures pleasing reproductions of all recordings.

The complete system consists of three sections—the amplifier-phono unit and the two 10" heavy duty speaker housings—which, when assembled for transportation form a single, compact carrying case. The case is covered with attractive Bell-gray simulated leather.

The phono turntable is protected from harm when carrying or when not in use by being cleverly concealed, out of range of the curious, on the bottom side of the amplifier base, as pictured below. It is instantly available by simply reversing the amplifier base, even while in operation. Another pioneering achievement by Bell!

Showing how the turn-table is protected in the bottom portion of the carrying case when not being used.

SPECIFICATIONS Model PA-3710-P

- Amplifier: 3710 See Page 2.
- Speakers: 2-10" Heavy Duty P.M.
- Cables: 2-25' Type SV with Plugs.
- Phono Equipment: 78 RPM Turntable with Crystal Pickup.
- Microphone: JT-30 (see page 18) with desk type stand.
- Microphone Cable: 15' Shielded Rubber with Connector.
- Microphone Stand: Furnished with Micro.
- Case: Model 3710, 3 piece Portable.
- Dimensions: 12" Deep; 18½" High; 15¾" Wide.
- Shipping Weight: 50 lbs.

BELL P.A. SYSTEMS

15 WATT Single Case PA SYSTEM

Model PA-3715-E

The Speech - Master

- Three Input Channels.
- 15-Watts Undistorted Output.
- Illuminated Control Panel.
- Twin Heavy Duty Speakers.
- Complete System in One Case.
- Modern Design.
- Soundly Engineered.
- Inverse Feedback Network.
- Convenient Angle-Set Dials.

Traditionally accepted as the outstanding Public Address "sound" value in the medium wattage class, the Bell "Speech-Master" is winning new friends with its remarkable quality of performance, fidelity of tone, refined appearance, package-portability and simplified operation.

Ingenious design permits the incorporation of such features as: Bell amplifier with undistorted 15-watt output, peak 18 watts; push-pull beam power output tubes; inverse feedback that reduces harmonic distortion, three input channels with separate volume controls that permit mixing of two microphones and a phono pickup.

The beautiful gray and silver amplifier case with its illuminated, full-view control panel is high-lighted by distinctive red plastic control knobs. The two 10-inch high quality permanent magnet speakers, amplifier, microphone and necessary cables are all housed in a compact three-piece case. The dark gray simulated leather-covered case pleases the most exacting users.

Bell's true-rating of 15 watts is conservative to the point of modesty. The "Speech-Master" challenges comparison with any contemporary product in or near its price range. See and hear for yourself the superior features of the "Speech-Master."

This system is truly a portable system. Everything is complete in one package. The unit can be set up and ready to operate in an extremely short time. Just plug in the speakers, attach the microphone and insert the power plug into any 117-volt, 50-60 cycle AC socket and you are ready to operate. So simple that the most inexperienced person can set up the system and operate it with professional results.

SPECIFICATIONS

Model PA-3715-E

Amplifier: 3715 (See page 3).
Speakers: 2-10" Heavy Duty P.M.
Cables: 2-25' Type SV with Plugs.
Built-in Phono Equipment: None.
Microphone: JT-30 with desk-type stand (See page 18).
Microphone Cable: 15' Shielded Rubber with Connector.
Microphone Stand: Furnished with Micro.
Case: Model 15 Three pc. (See page 18).
Dimensions: 13 $\frac{3}{4}$ " Deep; 19 $\frac{3}{4}$ " High; 17 $\frac{3}{4}$ " Wide.
Shipping Weight: 62 lbs.

Model PA-3715

Same as Model PA-3715-E except with Model 20 Micro Stand (See page 18) and choice of Models T-3, D-8-T, or DN-HZ microphones with 25' cables and connector. Unless specified Model T-3 will be supplied.

Model PA-3715-D

Same as Model PA-3715-E except with Model 20 Micro Stand and Model 950 microphone with 25' Cable and Connector.

25 WATT Duo-Case PA SYSTEM

Model PA-3725-E

The Old-Master

- Bell True-Rated 25 Watt Output.
- Electronic Bass Boost.
- Electronic Treble Boost.
- Inverse Feedback.
- Inclined Illuminated Dials.
- Indirect Driven Dial Pointers.
- Three Separate Input Controls.
- Smart, Modern Design and Finish.
- Compact and Rugged Construction.

Here is an amplifying system in a very popular wattage, with an impressive list of the most desirable features. Though inexpensive, compact and light in weight, it provides ample distortion-free volume to serve a wide range of applications.

Push-pull beam power output tubes in a highly efficient, thoroughly proved circuit, permit an undistorted output of 25 watts, with peak power of 30 watts. Through an inverse feedback stabilizer, harmonic distortion is minimized, the amplifier is well stabilized, and wave form is improved on low frequencies. Also, by properly adjusting the bass boost and treble compensators, feedback difficulties caused by varying acoustics in different locations, are greatly reduced.

The two electronic tone controls afford a wide range of tone selection, and separate controls for all three channels permit any combination or mixture of volume between two microphones and a phono pickup. A tap impedance switch is another feature, and a wide choice in microphones are offered.

The gray finished amplifier housing is striking in design, and contrasts effectively with the deep red of the Control knobs. The illuminated dial panel is set at an angle, for easier view, and the pointers are operated by indirect drive.

Model PA-3725-U
Left: Illustrates Model PA-3725-U closed into single carrying case. Same as Model PA-3715-E (See page 6) except with Model 3725 amplifier instead of Model 3715. Shipping Weight, 68 lbs.

SPECIFICATIONS

Model PA-3725-E

- Amplifier:** 3725 (See Page 3).
Speakers: 2-12" Heavy Duty P.M. with Line Matching Trans.
Cables: 2-50' Type SV with Plugs.
Built-in Phono Equipment: None.
Microphone: JT-30 with desk type stand (See Page 18).
Microphone Cable: 15' Shielded Rubber covered with Connector.
Microphone Stand: Furnished with Micro.
Case: 1 Model 95. 1 Model 14-A (See Page 18).
Dimensions: Model 14-A, 13½" Deep; 10¼" High; 18" Wide.
Model 95, 10¼" Deep; 19¾" High; 19" Wide.
Shipping Weight: Complete System, 90 lbs.

Model PA-3725

Same as Model PA-3725-E except with Model 20 Micro Stand (See page 18) and choice of Models T-3, D-8-T, or DN-HZ microphone with 25' cable and connector. Unless specified Model T-3 will be supplied.

Model PA-3725-D

Same as Model PA-3725-E except with Model 20 Micro Stand and Model 950 microphone with 25' Cable and Connector.

BELL P.A. SYSTEMS

50 WATT Duo-Case PA SYSTEM

Model PA-3750-E

The Sound-Master

- Four Inputs—Separate Controls.
- Electronic Bass Boost.
- Electronic Treble Boost.
- Inverse Feedback.
- Available for remote stand-by operation.
- Inclined Illuminated Control Panel.
- Infinite Baffle Type Speaker Case.
- Exceptional Tonal Qualities.
- Sturdy—Built to Last.

This is one of the finest and most powerful portable public address systems on the market today. It has been designed to meet every type of application for indoor or outdoor use where high fidelity and dependable operation are a must! Whenever you have a high noise level to overcome, such as a roller skating rink or a small stadium, this unit, is ideal and has more than ample power or output to give complete coverage.

The extra heavy duty twelve inch P.M. Speakers are mounted in a separate carrying case which is a diagonally split case of the infinite baffle type. The amplifier is our famous "Soundmaster" Model 3750. Complete specifications on the Model 3750 are shown on page 3. The speakers used are Jensen P-12-Q or equal with universal line matching transformers. Plug-in fifty foot speaker cables connect the speakers to the ampli-

fier or one speaker may be plugged into the amplifier and the other speaker or additional speakers may be plugged into the outlet provided on each speaker housing. This permits connecting a number of speakers in parallel with only one speaker cable entering the amplifier. Both male and female receptacles or sockets are provided on each half of the speaker case for this purpose. The fifty foot cables have a plug on one end and a socket on the other and are carried in the speaker housings by means of a strap that is provided.

All of the 50 watt systems are available for remote operation. In other words, only the filaments are energized while the amplifier is idling. By use of a "grip to talk" micro stand or a foot pedal switch, the "B" supply can be turned on from a remote point or at the amplifier.

SPECIFICATIONS

Model PA-3750-E

Amplifier: 3750 (See page 3).
Speakers: 2-12" P-12-Q PM or equal with Line Matching Trans.
Cables: 2-50' Type SV with plugs.
Built-in Phono Equipment: None.
Microphone: JT-30 with desk type stand (See page 18).
Microphone Cable: 15' Shielded Rubber covered with Connector.
Microphone Stand: Furnished with Micro.
Case: 1—Model 14-B; 1—Model 93 (See page 18).
Dimensions: Model 14-B, 18 $\frac{1}{4}$ " Deep; 12 $\frac{1}{4}$ " High; 18" Wide.
Model 93, 14 $\frac{3}{4}$ " Deep; 18" High; 22" Wide.
Shipping Weight: 109 lbs. complete.

Model PA-3750

Same as Model PA-3750-E except with Model 20 Micro Stand (See page 18), and choice of Models T-3, D-8-T, or DN-HZ microphones with 25' cable and connector. Unless specified Model T-3 will be supplied.

Model PA-3750-D

Same as Model PA-3750-E except with Model 20 Micro Stand and Model 950 microphone with 25' Cable and Connector.

Note: If amplifier in above systems is to have remote stand-by operation, add the letter R to model number.

BELL PHONO-P.A. SYSTEMS

25 WATT PHONO-PA SYSTEM Model 2078 The School-Master

The Bell "Schoolmaster" has been received with great public acclaim. This unit has proven extremely popular with institutions and schools throughout the country. One city school system has over one hundred of these units in operation.

Practically every need for high quality public address and music coverage is met with this system. With its governor-controlled, two speed motor and professional type tone arm, it will give excellent reproduction of lateral cut records from 6" to 16".

For auxiliary equipment, the Model 98 (see page 18) speaker has been designed. This unit is identical with the speaker portion or top half of the model 2078 and comes complete with a P-12-Q speaker or equal, line matching transformer, fifty foot speaker cable and plug. Bell models 93 and 95 (See page 18) complete with speakers are also recommended for use with this equipment.

SPECIFICATIONS Model No. 2078

Amplifier: 3725 (See page 3).
Speakers: 1—12" P-12-Q or equal Heavy Duty P.M.
Cables: 25' Type SV with plug.
Phono Equip: Built-in 2-Speed (78-33½ RPM) Motor; Type HP-16 Tone Arm.
Microphone: JT-30 with desk type Stand (See page 18).
Microphone Cable: 15' Shielded Rubber covered with Connector.

Microphone Stand: Furnished with Micro. Case: Model 2078.
Dimensions: 19" Deep; 13¼" High; 19¾" Wide.
Shipping Weight: 73 lbs.

Model 2078-CH

Same as Model 2078 except with Webster 56 Changer in place of transcription unit.

5 WATT PHONO-PA SYSTEM Model 2079

The Model 2079 transcription phono and public address system is the ideal unit for Schools, Broadcasting Stations, Advertising Agencies, Sales Meetings, Training Programs and numerous other uses. This convenient portable unit is complete with dual speed (33½—78 RPM) governor controlled, heavy duty motor and professional type tone arm. It will reproduce with excellent clarity and fidelity all records from 6" to 16".

The unit has two microphone input connections wired in parallel. One control adjusts the volume of both. Any high impedance microphone may be used with excellent results with this system.

The Model 2079-CH is identical with the Model 2079 except that in place of the two speed motor and transcription tone arm, a Webster Model 56 record changer is supplied. This changer will play 10" or 12" records at 78 RPM only. A special locking bracket is provided to lock the tone arm for carrying.

SPECIFICATIONS

Model 2079 Amplifier
Power Output: 5 Watts at Less than 5% Peak Power 7 Watts.
Freq. Response: Plus or Minus 1 db. 70 to 12,000 Cycles.
Overall Gain: Microphone Channels 115 db.; Phono Channel 78 db.
Hum Level: —62 db. Below Rated Output.
Inputs: 2 Microphones.
Input Imped: Microphone Channels 5 Mex.
Controls: 1 Microphone Volume Control; 1 Phono Volume Control; 1 Tone Cont. W/AC Switch; 1 Motor Off-On Switch.
Output Imp: 4 Ohms.
Power Cons: 57 Watts; 117 Volts; 60 cyc.
Tubes: 1—5V4G; 1—6SC7; 1—7F7; 1—6V6GT.

Model 2079 System
Amplifier: Model 2079.
Speakers: 1—8" Heavy Duty P.M.
Cables: 1—25 ft. Type SV with plug.
Built in Phono Equip: 2 Speed (78-33½ RPM) Motor; Type HP-16 Tone Arm.
Microphone: None furnished.
Microphone Cable: None furnished.
Microphone Stand: None furnished.
Case: Model 2079.
Dimensions: 19" Deep; 10¼" High; 19¾" Wide.
Shipping Weight: 48 lbs.

Model 2079 CH

Model 2079 CH, same as Model 2079 except with Webster 56 Changer in place of Transcription Unit.

BELL PHONO-RECORD PLAYERS

78 RPM RECORD PLAYER

Model 10-R

The Model 10-R is a high quality general purpose record player for use with portable public address systems. All of Bell's standard models, portable public address systems, have a phono input for use with this record player. In addition, a 117 volt A.C. receptacle is provided on the back of Bell models 3715, 3725 and 3750, to plug into.

This unit is equipped with the well known and highly favored offset head, Astatic AB-8 pickup which provides wide-range performance with full bass and brilliant highs, free from distortion and objectionable surface noise.

The Model 10-R will play all size records up to 12" with the lid closed.

SPECIFICATIONS Model 10-R

Motor: High Quality, Rim Drive 78 RPM only.	Control: Motor Off-On Switch.
Turntable Size: Nine Inches.	Power Cons: 16 Watts Input; 117 Volts; 60 Cycles AC.
Tone Arm: Astatic Type AB-8.	Case: Model 10-R.
Power Cord: Seven ft. with Standard Plug.	Dimensions: 14½" Deep; 8½" High; 16¼" Wide.
Phono Cord Conn: Amphenol MC1F.	Shipping Weight: 20 lbs.

DUO-SPEED 16" RECORD PLAYER Model 10-T

This unit is a high quality, deluxe, portable transcription record player. It consists of a heavy duty, governor controlled, two-speed motor (33½—78 RPM) and an Astatic Professional HP-16 pickup mounted in a sturdy carrying case. It will play lateral cut 16" transcriptions and standard 10 or 12" records. Two lever controls permits selection of either speed and their adjustment to within 5%.

The Astatic HP-16 pickup is a long, slender, straight-arm crystal pickup of the Low Pressure Type, for use with all lateral transcriptions. This pickup is made with a ball-bearing swivel base, accurately counter balanced arm for one ounce needle pressure.

SPECIFICATIONS Model 10-T

Motor: General Industries, governor controlled, two speed (33½-78 RPM) heavy duty.	Phono Cord Conn: Amphenol MC1F.
Turntable Size: Twelve Inches.	Controls: Motor Off-On switch; Speed Regulator lever; Speed Change Lever.
Tone Arm: Astatic Type HP-16.	Power Cons: 36 Watts; 117 Volts; 60 Cycles AC.
Power Cord: Seven ft. with Standard Plug.	Case: Model 10-T.
Phono Cord: Four ft. shielded Rubber covered with connector.	Dimensions: 18½" Deep; 8¾" High; 21¾" Wide.
	Shipping Weight: 30 lbs.

PA SYSTEM

Model PA-3705

This unit is a remarkable compact, quality-toned amplifier that gives excellent results at a very economical cost. It is the ideal unit for window and store demonstrators, auctioneers, lecturers, entertainers, electric guitar players, bingo game operators, pitchmen and for use as a phono amplifier.

The amplifier and speaker are housed in a very attractively finished carrying case. The case is constructed of reinforced plywood and has an attractive brown with gold trim plastic carrying handle. The case is covered in cream and dark brown simulated leather and provisions are made for carrying a microphone.

Showing the remarkable compactness of this efficient little unit. Also note space at right provided for carrying microphone.

SPECIFICATIONS

Model PA-3705 Amplifier	Power Cons: 55 Watts; 117 Volts; 50-60 Cycles.
Power Output: Peak Power 5 Watts.	Tubes: 1-6AC7; 1-6SL7; 1-6F6G; 1-5Y3GT.
Freq. Response: Plus or Minus 2 db. 125 to 7500 Cycles.	Model PA-3705 System
Overall Gain: Microphone Channel 100 db; Phono or Inst. Channel 71 db.	Amplifier: 3705.
Hum Level: -59 db. Below Rated Output.	Speakers: 1-8" Heavy Duty.
Inputs: 1 Microphone; 1 Phonograph or Inst.	Cables: None.
Input Imped: Microphone Channel 10 Meg.; Phono or Inst. Channel 1 Meg.	Built in Phono Equip: None.
Controls: 1 Microphone Volume Control; 1 Phono or Inst. Volume Control; 1 Tone Control w/AC Switch.	Microphone: None furnished.
Output Imped: 4 ohms.	Microphone Cable: None furnished.
	Microphone Stand: None furnished.
	Case: Model 3705.
	Dimensions: 5" Deep; 11½" High; 19" Wide.
	Shipping Weight: 13 lbs.

BELL RECORDING EQUIPMENT

DUAL-SPEED DISC RECORDER Model RC-47

RE-CORD-O-fone

- Recording and Immediate Play-Back of Any Sound Event.
- Recording and Play-back speeds of both 78 and 33 $\frac{1}{3}$ RPM.
- Complete, Compact, Self-Contained, Easily Portable—Single Carrying Case.
- Can record direct from any Radio.
- Serves as a Public Address System.
- Separate Channel for Copying Records or Dubbing in Sound Effects.
- Visual Recording—Level Indicator.
- Headphone Monitoring Jack.

This attractive Bell Model RC-47 RE-CORD-O-fone is the Recorder of wide appeal.

Featuring simple, easy operation, it provides for permanent recording of sound from any source. PLUS immediate playback facility. The RE-CORD-O-fone records 12 minutes on a 10-inch disc at 33 $\frac{1}{3}$ RPM (the equivalent to four 12-inch commercial records). It copies a 12-inch commercial record on a 10-inch blank at 78 RPM.

One central control permits instant selection of all functions: recording, playback and P.A. use. Easy connection to your radio permits excellent recording of your favorite radio programs. Dubbing in your own comments or singing while recording a radio program or re-recording from another record is possible by a control on the convenient sloping panel. Plugging in a pair of headphones allows operator to judge every setup. The unit is entirely self-contained in a two-piece, portable case covered with artistic tan leatherette which blends with the rich tone of the unit.

The play-back and amplifying features of RE-CORD-O-fone render it especially adaptable as an instruction aid in all types of speech and language classes, voice, dramatics and training schools. The unit is also effectively used by sales groups, churches and lodges, hobbyists, night clubs, orchestras and entertainers, politicians and speakers.

SPECIFICATIONS

Model RC-47 Complete

Amplifier: RC-47.
Speakers: 1—6" Heavy Duty P.M. Alnico Five.
Cables: None.
Built in Phono Equip: Two-speed recording mechanism with cutting head and crystal Phono pick-up.
Microphone: Astatic HEB and stand.
Microphone Cable: 7 ft. shielded Rubber Covered with PL-55 plug.
Microphone Stand: Furnished with Micro.
Case: RC-47.
Dimensions: 18" Deep; 10" High; 16" Wide.
Shipping Weight: 41 lbs.

Model RC-47 Amplifier Only

Power Output: 3 Watts at Less than 5% Peak Power 5 Watts.
Overall Gain: Microphone Channel 108 db. Phono Channel 63 db.
Hum Level: —58 db. Below Rated Output.
Inputs: 1 Microphone; 1 External Phono; 1 Direct Radio Recording.
Input Imped: Microphone Channel 10 Meg.; Phono Channel $\frac{1}{2}$ Meg.
Controls: 1 Microphone or Phono Volume Control; 1 Tone Control with AC Switch; 1 Four position selecto Switch; 1 Motor Off-On Switch; 1 Speed Change Switch.
Output Imped: 4 ohm.
Power Cons: 75 Watts; 117 Volts; 60 Cycles.
Tubes: 1—7F7; 1—7C5; 1—7Y4.

PORTABLE RECORD PLAYER

Model 2075—Comparison of the "Portrola" Portable Electric Phonograph with any other on the market today—regardless of price—is convincing evidence that it rivals the best in all-round performance and popular appeal. It has remarkable tone quality and through the use of a newly developed dual-purpose tube circuit, it attains four-tube results with two tubes.

The "Portrola" is an attractive buy for teachers, students, record collectors, and a host of music lovers who want a light, easy-to-carry electric phonograph embodying performance features of the most expensive console models.

SPECIFICATIONS Model 2075

Speaker: 6" Heavy Duty P.M. Alnico Five.
Controls: Phono Vol. Control with AC Switch.
Tubes: 2—117L7GT.
Power Consumption: 50 Watts; 117 Volts; 60 Cycles.
Dimensions: 15 $\frac{1}{4}$ " Deep; 9" High; 14 $\frac{1}{2}$ " Wide.
Shipping Weight: 20 lbs.

BELL INDUSTRIAL EQUIPMENT

SYSTEMS FOR INDUSTRIAL BROADCASTING --BOTH MUSIC & VOICE PAGING

Bell Industrial equipment is the finest industrial equipment that can be purchased. This equipment utilizes in its construction heavy duty oil filled condensers, hermetically sealed and potted transformers, and transmitting type tubes.

Increases Efficiency

With today's high speed production, every emphasis possible is being placed on efficiency. Plant broadcasting over amplifying equipment is becoming more and more important—filling a vital and indispensable role in industrial operations. It not only increases the efficiency of industrial workers by broadcasting music to workers on the job or during rest and lunch periods, but also is the fastest and most efficient method of locating important key personnel through its voice paging feature. It can also be used to advantage by management in making plant-wide announcements or talks.

Improves Worker Morale

Actual tests have shown that music in industry, regardless of whether it is light or heavy manufacturing, actually increases the workers' output, decreases early departures and absenteeism, lessens fatigue, decreases accidents and rejects.

SPECIFICATIONS Model 1475 BELL "PLANT-MASTER"

A Standard unit consists of the following:

- A. Standard Rack
- B. Monitor Section
- C. Pre-Amplifier Section
- D. Phono Section
- E. Power Amplifier Section

Output: Full 80 Watts with less than 5% distortion.

Output Impedances: 31.2; 62.5; 125; 250 and 500 Ohms.

Input Impedances: Two low impedance (50 Ohms) for microphones and one high impedance for use as phono or microphone.

Input Switching: Relays provided for energizing any of three input circuits either at the main equipment or remote points.

Overall Gain: 126 db.

Frequency Response: Plus or Minus 1½ db from 30 Cycles per second to 15,000 Cycles per second.

Phono: Webster Changer Model 56-1 furnished as standard equipment. Two-speed transcription turntable with Astatic Model 400 pickup with QT cartridge optional at no extra cost.

Tubes: (a) Power Amplifier. (b) Pre-Amplifiers.

- 2 6SJ7
- 2 6F6
- 2 807
- 2 VR-150
- 2 5R4GY
- 1 5U4G
- 6 6N7
- 2 6F6
- 1 5U4G

Power Requirement: 117 Volts; 60 Cycles. Full output 375 Watts; idling 165 Watts.

Finish: Bell Gray Wrinkle with Red Control Knobs and etched aluminum Dial Plates.

Dimensions: 66¾" High; 22" Wide; 18" Deep.

Net Weight: Approximately 350 Pounds.

Shipping Weight: Approximately 500 Pounds.

BELL INDUSTRIAL EQUIPMENT

DETAILED SPECIFICATIONS

Model 1475

Monitor Section Model 54-M

Speaker: Heavy Duty 8" permanent magnet speaker with adjustable pad volume control.

Level Indicator: Large 4" x 5" Volume Unit Meter Mounted in center of Speaker Grill.

Speaker Grill: Heavy, perforated, chrome plated steel. Extends across entire width of Rack panel.

Controls: Heavy Duty Main Power Switch, Monitor Speaker Volume Control, Monitor Selector Switch.

Dimensions: Panel Size 10 $\frac{1}{2}$ " x 19".

Finish: Control Panel, Grey wrinkle grill-chrome plated.

Function: Provides audible monitoring of any one of several outgoing program lines according to setting of selector switch. Permits continuous visual check on signal level feeding power amplifiers. Also contains master power switch for entire rack.

Pre-Amplifier and Driver Unit Model 54

Power Output: 1 Watt at less than 1% Distortion; 2 Watts at less than 5% Distortion; 5 Watts Peak Power.

Overall Gain: 73 db.

Hum Level: -65 db. Below Rated Output (1 watt).

Input: 1 Low impedance microphone.

Input Imped: 50 ohms

Controls: 1 Microphone Volume Control.

Output Imped: 500 ohms balanced to ground.

Tubes: 2-6N7; 2-6F6G.

Dimensions: 5 $\frac{1}{2}$ " Deep; 7" High; 14" Wide.

Weight: 11 lbs

Pre-Amp Power Supply Model 54-P

Voltage Output: 305 Volts D.C. 150 M.A.; 6.3 Volts A.C. Heaters.

Circuit: Relay Controlled.

Power Input: 117 Volts; 50-60 Cycles.

Tubes: 1-5U4G.

Connector: Jones S-2412-SB Connects to Model 52-C Input Switching Unit.

Function: Supplies filament and plate power to Model 54 Pre-amplifier, Model 54-A Pre-amplifier, and Model 54-B Pre-amplifier.

Dimensions: 5 $\frac{1}{4}$ " Deep; 9" High; 17" Wide.

Weight: 34 lbs.

Construction: Heavy Duty Oil filled capacitors, sealed transformers and choke.

Finish: Chassis is constructed of 1 $\frac{1}{2}$ gauge cold rolled steel zinc plated with chromate finish.

Input Switching Unit and Relay Power Supply Model 52-C

Voltage Output: 48 Volts D.C. 600 M.A.

Relays: 3 Input Channel Control Relays; 1 Plate Relay.

Connectors: Jones P-2412-SB plugs into Model 54-P Power Supply.

Function: Input relays control input channel switching. Priority can be established on these three channels. Plate Relay applies plate voltage to Model 80-B power amplifier.

Dimensions: 6" Deep; 8" High; 17" Wide.

Net Weight: 15 lbs.

Construction: Oil filled capacitors in sealed metal containers. Heavy Duty Relays, and sealed Power transformers.

Finish: Chassis is constructed of 1 $\frac{1}{2}$ gauge Cold Rolled Steel zinc plated with chromate finish.

Phono Section Model 54-X (Record Changer) Model 54-Z (Transcription Unit)

Controls: Motor "Off-On" Control Switch; Phono Volume Control.

Panel Size: 14" High by 19" Wide. This includes phono rack opening and phono control panel.

Phono Equip: Standard Equipment Webster Model 56, Record Changer. Single-post floating spindle type. Plays ten 12" or twelve 10" records in one loading. Heavy duty 78 RPM Cushion mounted motor. Has reject button and also can be operated manually. Shuts off automatically after last record has been played.

Note: Transcription phono unit consisting of 2 speed (33 $\frac{1}{3}$ -78 RPM) motor and Astatic Model 400 pickup for playing all commercial records and lateral transcriptions up to 16" in diameter can be supplied as optional equipment at no additional cost.

Pre-Amplifier Model 54-A

Output: Feeds output Section of Model 54 Pre-amplifier.

Overall Gain: 73 db. Including Model 54 output stage.

Hum Level: -60 db. Below Rated output Maximum Hum Including Model 54 output stage.

Input: 1 Microphone (Low Impedance).

Input Imped: 50 ohms.

Control: 1 Microphone Volume.

Output Imped: Feeds output section of Model 54 Pre-amplifier.

Tubes: 2-6N7.

Dimension: 5 $\frac{1}{2}$ " Deep; 7" High; 14" Wide.

Weight: 9 lbs

Pre-Amplifier Model 54-B

Output: Feeds output Section of Model 54 Pre-amplifier.

Freq. Response: Plus or Minus 1 $\frac{1}{2}$ db. 30 to 10,000 Cycles.

Overall Gain: 47 db.

Hum Level: -70 db. Below Rated Output.

Inputs: 1 Phonograph or Radio.

Input Imped: 500,000 Ohms.

Controls: 1 Phonograph Volume Control.

Output Imped: Feeds Output Section of Model 54 Pre-amplifier.

Tubes: 2-6N7.

Dimension: 5 $\frac{1}{2}$ " Deep; 7" High; 14" Wide.

Weight: 9 lbs.

Power Amplifier Model 80-B

Power Output: 80 Watts at less than 5% Peak Power 100 watts.

Freq. Response: Plus or Minus 2 db. 75 to 20,000 Cycles.

Overall Gain: 57 db.

Hum Level: -70 db. Below Rated Output.

Input: Bridging. Balanced to ground.

Input Imped: 20,000 Ohms.

Controls: 1-Overall gain control.

Output Imped: 31.2; 62.5; 125; 250; 500 ohms.

Power Cons: 300 Watts; 117 Volts; 50-60 Cycles AC.

Tubes: 2-68J7; 2-6F6G; 2-807; 2-VR150; 2-5R4GY; 1-5U4G.

Dimensions: 17 $\frac{1}{2}$ " Deep; 9" High; 17" Wide; Panel Size: 19" Wide by 21" High.

Shipping Weight: 97 lbs.

Model VH-20, Projector for speech and music reproduction where principal requirement is for speech. Frequency range 140 to 6000 cps. Developed acoustic path 52". Coverage angle 80 degrees. Mouth diameter 20 $\frac{3}{4}$ "; length 20 $\frac{1}{4}$ ". Power capacity 25 watts. Voice coil impedance 16 ohms. Shipping weight approximately 25 lbs.

Model VH-21, same as VH-20 except with 58 inch acoustical path length; Mouth diameter 21 $\frac{3}{4}$ "; length 22 $\frac{3}{4}$ " and shipping weight of approximately 30 lbs.

Model VH-91 Speech Master Projector meets a real need for paging and intercommunication applications. Particularly efficient in the voice frequency range, it delivers clear, intelligible speech with maximum "punch" to override high noise levels. By an extremely clever mounting bracket, projector can be pointed in any direction and securely locked into position with a single wing nut. Nominal voice coil impedance, 8 ohms. Power handling capacity, 15 watts. Mounting facilities are also provided on bracket for a $\frac{5}{8}$ x $\frac{5}{8}$ " transformer. Because of the Hypex formula, useful output is attained for a 100-degree total angle. Dimensions: Bell diam., 8 $\frac{7}{8}$ ", length of bell, 7 $\frac{3}{4}$ ".

Model 2111 Remote Control Console permits Input and Output Switching from a remote location. These consoles are custom built to the customers' specifications. Unit illustrated contains V.U. meter; two Pre-Amplifier switches; 2-Micro Input switches; Phono Input Switch; telephone line switch; 6-output or areas switches and pilot light indicator.

The Model 2111 is constructed of walnut and is 11 $\frac{1}{2}$ " High; 21" Wide; and 11" Deep. Telephone type of lever switches are incorporated for all switching. Shipping weight approximately 25 lbs.

BELL INDUSTRIAL EQUIPMENT

Model 1451

The Model 1451 Industrial Type Pre-amplifier is recommended as the ideal unit to drive one or more 80-B Industrial Power Amplifiers. It has capacity to drive up to 20 of the Model 80-B Power Amplifiers. Its heavy duty and rugged construction utilizes oil filled capacitors and sealed transformers. It is constructed and engineered for long life, continuous duty, service. It comes complete, mounted in an industrial Rack Cabinet with db Level Meter; Model 54-P Power Supply (see page 13); Master Power Switch; and two low and one high impedance pre-amplifiers with individual controls.

SPECIFICATIONS Pre-Amplifier Model 1451

Power Output: 1 Watt at less than 1% distortion. Maximum Power output 4 Watts.
Freq. Response: Plus or Minus 1½ db. from 30 to 10,000 Cycles. Measured in high impedance channel.
Overall Gain: 73 db.
Hum Level: Low impedance. —65 db. below rated output of 1 Watt. High impedance. —71 db. below rated power.
Input Imped: Two low impedance (50 or 500 ohms) for microphones (50 ohms furnished unless otherwise specified). One high impedance (500,000 ohms) for phono or radio.
Controls: 3 Volume Controls; Master Power Switch.
Output Imped: 500 Ohms.
Tubes: 6—6N7; 2—6F6; 1—5U4G.
Finish: Grey Wrinkle—Satin Chrome Trim.
Dimensions: 15" Deep; 28" High; 22" Wide.
Shipping Weight: Approximately 100 lbs.

Model 80-B Power Amplifier, illustrated at right, was designed with today's rigid requirements for industrial sound equipment in mind. It is the result of two years of development by Bell's Audio engineering specialists.

Dependability of operation and long life under continuous operating conditions is assured by the use of quality components. Transformers and chokes are potted, sealed and fully shielded in heavy steel housings; they are designed with ample electrical safety factors. Mica and oil-filled capacitors are utilized, sealed in metal containers and conservatively rated. Tubes are operated well within the manufacturers' maximum ratings of voltage, current, plate and screen dissipation for long life. Automatic relay overload protection is provided in case of failure of bias or screen regulation on the transmitting type 807 output tubes. Provision is made for stand-by operation in which plate power is applied only during announcements or during actual operation, further prolonging tube life.

Use of push-pull stages throughout and overall inverse feedback, results in an extremely stable amplifier with regard to tube and voltage fluctuations, good frequency and transient response and low distortion—results in low output driving impedance having excellent regulation against load impedance variations and mismatch.

The 807 output tubes with separate plate and bias supplies and regulated screen voltage provide a clean 80 watts of output signal. The specially designed oversize output transformer has four separate 125 ohm output windings which permit a wide choice of output impedances by proper series, parallel and series-parallel

connections. By this method the correct copper-iron ratio is held fixed regardless of the output impedance used, and the transformer is always working at maximum efficiency.

The bridging type balanced input circuit and high overall gain permits operation of the amplifier from a zero level telephone line; or, up to 10 of these amplifiers may be operated from a single Bell Model 54 Pre-amplifier.

Construction of the amplifier is extremely rugged. Chassis is 16 gauge steel of welded construction; protected against rust and corrosion by zinc plating which has been treated to provide an extremely inert zinc chromate surface, far superior as a protective coating to zinc alone. A coat of clear lacquer over the chromateed zinc approximately doubles its life under salt spray tests, and the process conforms to Government specifications.

Ease of maintenance and servicing was an important consideration in the design. Standardized dimensions and mounting permit this amplifier to be vertically mounted in a standard rack cabinet. In addition to providing excellent air flow for ventilation purposes, vertical mounting makes accessible the tubes, control and cable terminals from the rear, while the components and under-chassis wiring are easily accessible by removing the front panel. Complete operational checks may be made while amplifier is in operation and without removing it from rack.

Rack mounting accessories are available for mounting the 80-B Power Amplifier in any standard 19" rack cabinet.

Model 1480 (right) consists of a Model 80-B power amplifier mounted in a small industrial type rack. It measures 15" Deep by 28" High by 22" Wide. Cabinet is finished in Grey wrinkle and contains two one-inch indicator lamps: one red, to show that the plate supply is on, and one white to show that only the filaments are heated. A Master Gain Control is located on the chassis and is available for adjustment through the rear door of the cabinet. All connections are made to barrier terminal strips in the floor of the rack. Amplifier has a balanced-to-ground bridging input suitable for operation from a zero level telephone line or from Bell Model 54 Industrial Pre-Amplifier.

The shipping weight is approximately 125 lbs. For detailed specification of the 80-B amplifier, refer to page 13.

Model 1490 consists of two Model 80-B power amplifiers mounted in a standard 66 1/2" rack panel cabinets. This model has a total undistorted output of 160 Watts and can be used with the Model 1451 or to supplement the power output of Model 1475. It can also be used to augment existing installations. Each amplifier has its own Master gain control and pilot light indicators. Cabinet is finished in grey wrinkle. Approximate shipping weight 300 lbs. For detailed specifications of the 80-B power amplifier refer to page 13.

Model 1500 illustrated at left consists of three Model 80-B power amplifiers mounted in a standard 66 1/2" industrial Rack Cabinet. This model has total undistorted power output of 240 watts and was designed to be used with Model 1451 Pre-Amplifier or to augment the power output of Model 1475. Cabinet is finished in grey wrinkle and each amplifier has its own Master Gain Control and Pilot light indicators. Indicators show at a glance when plate supply is on or when unit is idling with only the filaments of the tubes heated. Approximate shipping weight 400 lbs.

For detailed specifications of the 80-B power amplifier refer to page 13.

BELL CONSOLE SOUND SYSTEM

ZEPHYR SOUND SYSTEM

Model 701

Complete Console with AMPLIFIER CALL-REPLY - RADIO and PHONO - PICKUP

The Bell Zephyr provides the many facilities required of a central sound distribution system. Expertly engineered for distribution of microphone, radio or phonograph programs to any one or a number of rooms or remote loud speakers. Secretive two way communication is provided to any of the remote speakers. The central control operator can not listen in on a remote loud speaker unless their talk switch is depressed. The use of two amplifiers makes possible two way communication to remote loud speakers while a program is being sent to other speakers. Two microphones and radio or phonograph may be simultaneously mixed.

The Model 701 Zephyr Sound System comprises two units: the Model 701A Console unit and the Model 701B base unit.

The 701A Console is a complete sound distribution console less radio tuner. The 701B Base serves as a table for the console and can be supplied less radio tuner or with a combination A.M.-F.M. tuner.

Illustration at right is the Model 701A Console Zephyr Sound System—a complete sound distribution system with exception of radio tuner.

- Secretive two-way communication —control operator can not listen in on remote speakers.
- May be wired for non secretive two-way communication if desired.
- Auditorium or remote pickup to any or all rooms.
- All-Call emergency switch.
- Separate Talk Back Amplifier.
- Automatic Record Changer or 16" transcription player (optional).
- D.B. Volume level meter.
- Monitor loud speaker
- A.M. - F.M. Radio Tuner.
- Entire amplifier power output readily switched to single group of loud speakers, Auditorium, Cafeteria or Stadium.
- All Station Selector Switches Resistor Loaded.
- Constant impedance match regardless of number of loud speakers in use.
- Locked cabinet prevents tampering with controls.
- Record storage space.
- All-Call indicator lamp.

BELL CONSOLE SOUND SYSTEM

Zephyr SYSTEM Model 701

AMPLIFIER SPECIFICATIONS

TALK-BACK AMPLIFIER, used in all console units:

Power Output: 3.5 watts.

Output Imped: 500 ohms.

Input Imped: 4-5 ohms.

Power Req.: 117 volts 60 cycles A.C.

Tubes: 1—6SL7GT; 1—6V6GT; 1—5Y3GT.

MODEL 3725-Z AMPLIFIER, used in Consoles 701A-20 and 701A-40.

Power Output: 25 watts at less than 5% distortion.

Freq. Response: Plus or Minus 2 db 45 to 18,000 cycles.

Output Imped: 12.5; 16.6; 25; 50; 500 ohms.

Inputs: Three—2 micro; 1 Phono or radio.

Input Imped: Micro 10 Megs; Phono or Radio ½ meg.

Controls: 2—Micro Vol. Cont.; 1—Phono or Radio Vol. Cont.; 1—Base Tone Cont.; 1—Treble Tone Cont. W/AC Switch.

Power Req.: 117 volts; 60 cycles AC.

Tubes: 1—7C7; 1—7B7; 1—6SF5; 1—6N7; 1—5U4G; 2—6L6G.

MODEL 3750-Z AMPLIFIER, used in Consoles 701A-60 and 701A-80.

Power Output: 50 watts at less than 5% distortion.

Freq. Response: Plus or Minus 1 db, 30 to 18,000 cycles.

Output Imped: 6.25; 8.3; 12.5; 16.6; 25; 50; and 500 ohms.

Inputs: Four—3 Micro; 1 Phono or Radio.

Input Imped: Micro 10 megs; Phono or Radio ½ meg.

Controls: 3 Micro Vol. Cont.; 1—Phono or Radio Vol. Cont.; 1—Bass Tone Cont.; 1—Treble Tone Cont. with AC Switch.

Power Req.: 117 volts; 60 cycles AC.

Tubes: 1—7C7; 2—7C6; 3—6SC7; 1—6SN7; 2—6L6G; 1—5U4G; 1—5R4GY; 1—5V4G.

CABLE REQUIREMENTS: *Three-conductor shielded cable from control console to each room loud speaker. Where intercommunication is not required, two-conductor un-shielded cable.*

BELL CONSOLE SOUND SYSTEM

GENERAL DESCRIPTION OF CONSOLE UNITS

Model 701A-20 Console Unit: Standard equipment comprises: Walnut finished cabinet size 35½" Wide, 17" High, 18½" Deep; 25 watt amplifier, model 3725-Z; 3.5 watt talk back amplifier; 20 room switches for speaker selection; Automatic record changer; D.B. meter for visual volume level indication; Monitor speaker with volume control; All-call switch for paging through all loud speakers; Other controls as illustrated in drawing of console on opposite page.

Model 701A-40 Console Unit: Same as Model 701A-20 except 40 room switches.

Model 701A-60 Console Unit: Same as Model 701A-20 except 60 room switches and 50 watt amplifier

instead of 25 watt. Provides 3 microphone and 1 radio or phono input channels.

Model 701A-80 Console Unit: Same as Model 701A-20 except 80 room switches and 50 watt amplifier instead of 25 watt. Provides 3 microphone and 1 radio or phono input channels.

Base Units

Model 701B Base Unit only (less radio tuner): Size 35½" Wide; 29" High; 18½" Deep.

Model 701B-AM-FM Base Unit with high quality A.M.-F.M. radio tuner. Tuning ranges, A.M. 540 KC to 1700 KC: F.M. 88 MC to 108 MC.

LOUD SPEAKERS

Model 88 WS, a moderately priced, good quality speaker suitable for the average classroom, hotel room, tourist cabin etc. metal housing beautifully finished in walnut, equipped with a high quality 6" Alnico Five Permanent Magnet Dynamic Speaker with line matching transformer. A push switch is provided to answer calls from the central control console (contacts are provided to operate an annunciator circuit where desired). Overall size: 10½" x 10½" x 4½".

Model 88, same as above except less the push to answer switch.

Model 87-WS, a high quality 8" P.M. Dynamic speaker housed in an attractive wood cabinet (similar in appearance to Model 91), finished in walnut brown, supplied with line matching transformer and with a push switch to answer calls from the central control console (contacts are provided to operate an annunciator circuit where desired). Overall size: 10½" x 11" x 6½".

Model 87, same as Model 87-WS except less the push to answer switch.

Model 91, an excellent speaker for large rooms or auditoriums. A 12" high fidelity permanent magnet dynamic speaker with line matching transformer. Attractive walnut finish—wood construction. Overall size: 16" x 18" x 10".

Model SW-10, not illustrated, room answer switch, for installations where it is impractical to use a room answer switch mounted on the speaker housing. A small compact switch unit that is easily mounted on wall or desk. Contacts are provided to operate an annunciator circuit where desired. Overall size: 2¼" x 2¼" x 2".

Model 88-WS

Model 88

Model 91

BELfone INTERCOMMUNICATION SYSTEMS

WE offer the finest and most complete line of inter-office communicating equipment in the world today.

Four entirely different series of BELfones are available. The 350 Series, the 374-SS Series, the 440 Series and the 460 Series. There is a BELfone System that will meet every need; and for clarity of tone, appearance, low operating cost and maintenance, the Bell line has no peer.

The Bell Sound Systems, Inc., was the first company to design and produce reasonably priced electronic inter-office communication equipment commercially.

The complete line of BELfone equipment and accessories are shown in our special catalog for inter-office communicating equipment. Write for it today.

BELL ACCESSORIES

MICROPHONE STANDS -- MICROPHONES

Model 20—Desk Type. An attractive stand having a chrome-plated stem and a heavy, level-standing base finished in gray wrinkle. Overall height 9", diameter of base 6 1/4", weight 4 lbs. Furnished on all Standard and DeLuxe P.A. Systems.

Model 21—Banquet Type. A stand with a wide range of uses. Attractively finished in chrome and gray wrinkle. Adjustable from 13 1/2" to 24". Free of mechanical noise when being adjusted. Base is sufficiently large and heavy to prevent tipping. Weight 6 lbs.

Model 22—Pedestal Type. A deluxe stand; attractively finished in chrome and gray wrinkle and priced right. Adjustable from 38" to 69". A firm, stable-sitting, tripod base. A handy locking nut insures positive adjustment. Because of its mechanical perfection, adjustment can be made without noise or danger of stem accidentally dropping and damaging microphone. Weight 14 lbs.

NOTE: Because of space limitations in this catalog, many available Bell Accessories are not listed or illustrated. Therefore, when requiring items not shown, write BELL for prices and information.

Model JT-30. High Impedance Crystal Diaphragm Type

A wide range, excellent performing microphone for home recording or public address systems. Unit comes complete with convenient handle, interlocking metal base and 15 feet shielded cable. Can be used with any floor stand by removing handle.

Model T-3. High Impedance Crystal Diaphragm Type

A high quality microphone for studio use, voice paging, recording or public address systems. Swivel head permits operation as a semi or non-directional type. Supplied with 25 feet shielded cable.

Model DN-HZ. High Impedance Dynamic Type

Has very good frequency response, neat appearance and desirable size. This unit has excellent pick-up or sensitivity for general public address use, especially where high temperature or humidity is encountered. Ideal for outdoor use. Supplied with 25 feet shielded cable.

Model 950. High Impedance Cardioid Crystal Type

A new Cardax microphone that provides true cardioid unidirectional performance and relatively high output. Wide angle front pickup. Dead at rear. The Cardax is especially valuable in overcoming acoustic feedback. Simplifies speaker placement. Permits greater operating volume levels. Supplied with "Off-On" switch and 20 feet shielded cable.

Model DY-11. Adjustable Impedance Dynamic Type

A new super-cardioid microphone of the multi-impedance type. Has impedance switch that permits selection of 30-50 ohms; 150-250 ohms or high impedance. Microphone is supplied with 25 feet 2 conductor shielded cable.

LOW IMPEDANCE MATCHING UNITS

Here is a new series of units designed by Bell that will convert any standard amplifier with high impedance microphone inputs to low impedance. These units are so designed that no soldering or wiring changes are necessary in the amplifier. They are available in either single or Dual Channel and contain shielded, potted, matching transformers with three foot, single conductor, shielded microphone cables. The cables have Amphenol MC1F Standard Microphone connectors attached for connecting to the amplifier, and Amphenol MC3F connectors are utilized for connecting the microphones. Models 2105 and 2106 come wired for 50 ohms. But may be converted very easily to 200 ohms. Models 2107 and 2108

come wired for 500 ohms, but can be converted to 200 ohms. Complete diagrams showing how to make this conversion are supplied with each unit. Size 3 1/4" Deep; 5" High; 7 1/2" Wide. Weight: single channel 5 lbs.; Dual channel 9 lbs.

Model	Description	Impedance
2105	Single Channel	50 ohms
2106	Dual Channel	50 ohms
2107	Single Channel	500 ohms
2108	Dual Channel	500 ohms

PORTABLE SPEAKER and AMPLIFIER CASES

Model 14-A—Two piece portable amplifier case for Model 3725 amplifier. Constructed of reinforced 3/8" Fir plywood covered with heavy dark gray simulated leather with single carrying handle. Size 18" Wide; 13 3/4" Deep; 10 1/4" High. Weight 10 lbs.

Model 15—Three piece portable case for all PA-3715 Systems and PA-3725-1. Constructed of reinforced 3/8" Fir plywood and covered with heavy dark gray simulated leather. Double carrying handles. Speaker openings for 10" speakers. Size 22" Wide; 13 3/4" Deep; 19 3/4" High. Weight 17 lbs.

Model 93—Two piece De Luxe portable speaker housing. Furnished with all PA-3750 Systems. This is a diagonally split case of the infinite baffle type. It is constructed of reinforced 3/8" Fir plywood covered with a heavy dark gray simulated leather. Double carrying handles. Speaker openings for 12" speakers. Size 22" Wide; 14 3/4" Deep; 18" High. Weight 20 lbs.

Model 95—Two piece portable speaker case used to house the speakers for all PA-3725 Systems. It is constructed of reinforced 3/8" Fir plywood and covered with heavy dark gray simulated leather. Double carrying handles. Speaker openings for 12" speakers. Size 18" Wide; 14 1/2" Deep; 20" High. Weight 17 lbs.

Model 14-B (not illustrated)—Two piece portable amplifier case (similar to Model 14-A) for Models 3750 or 3728-M. Constructed of reinforced 3/8" Fir plywood covered with heavy dark gray simulated leather, with double carrying handle. Size 18" Wide; 18 1/4" Deep; 12 1/4" High. Weight 12 lbs.

Model 98 (not illustrated)—One piece portable speaker case. This unit is identical with the speaker or top half of the 2078 or 2078 CH case and was designed especially as an auxiliary speaker case for these two models. Size: 19 1/4" Wide; 7 1/4" Deep; 19" High. Weight 8 lbs.

BOGEN HIGH POWER SOUND EQUIPMENT

MODEL E75

70 WATTS

SPECIFICATIONS

POWER OUTPUT: 70 watts (2 - 35 watt power amplifiers) at less than 4%. PEAK POWER: 100 watts.

FREQUENCY RESPONSE: 30-14,000 cycles, ± 1 db.

HUM: Fund.: -70 db. Mic.: -59 db.

OUTPUT IMPEDANCE: Each power amplifier tapped at 4-8-15-500-1000 ohms.

POWER CONSUMPTION: 290 watts, 117 V, 50-60 cycles AC.

TUBES: Total 14: 2-6SF5, 2-6SL7GT, 2-6F6G, 2-7Z4, 4-6L6G, 2-5U4G.

DIMENSIONS: 17 $\frac{1}{8}$ " long, 10" high, 12 $\frac{1}{2}$ " deep.

EXCLUSIVE DUAL-OUTPUT CONSTRUCTION — TWO MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — BASS-TREBLE TONE CONTROL — TWO MASTER GAIN CONTROLS.

The E75 amplifier has two separate power amplifiers, driven by a common preamplifier. Each power amplifier has its own separate power supply, inverse feedback circuit and master gain control.

E75 HIGH IMPEDANCE AMPLIFIER:
Complete with tubes.
List Price.....\$223.75

EL75 LOW IMPEDANCE AMPLIFIER:
Same as E75, but first microphone input is low impedance 200 ohms. 50 or 500 ohms available is specified.
List Price.....\$252.25

Model E75

MODEL GX50

50 WATTS

SPECIFICATIONS

POWER OUTPUT: 50 watts at less than 5%.

PEAK POWER: 90 watts.

FREQUENCY RESPONSE: 30-20,000 cycles ± 2 db. TONE CORRECTOR RANGE: bass control: -20 to +10 db at 60 cycles; treble control: -7 to +8 db at 10,000 cycles.

HUM: Fund.: -65 db. Mic.: -58 db.

OUTPUT IMPEDANCE: 4-8-16 ohm and 2 constant voltage taps (70 and 140 V).

POWER CONSUMPTION: 240 watts, 117 V, 50-60 cycles AC.

TUBES: Total 11: 4-6SC7, 1-6SL7, 1-6SJ7, 1-6SN7, 1-5R4GY, 2-807, 1-5Y3.

DIMENSIONS: 17" long, 9" high, 13 $\frac{1}{2}$ " deep.

THREE MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — ELECTRONIC TONE CORRECTOR — CONSTANT VOLTAGE OUTPUT.

The proudest achievement in Bogen's 15 years of sound leadership. Push-Pull 807 output with constant voltage output taps, oil filled high voltage filter condenser. Cable and harness wiring and terminal board assembly throughout.

Model GX50

GX50 HIGH IMPEDANCE AMPLIFIER:
Complete with tubes.
List Price.....\$216.25

GXL50 LOW IMPEDANCE AMPLIFIER:
Same as GX50 but first microphone input is low impedance 200 ohms. 50 or 500 ohms available if specified.
List Price.....\$244.75

MODEL H50

50 WATTS

SPECIFICATIONS

POWER OUTPUT: 50 watts at less than 5%. PEAK POWER: 90 watts.

FREQUENCY RESPONSE: 30-20,000 cycles, ± 2 db.

GAIN: Microphone inputs (2): 120 db. Phono input (1): 80 db.

HUM: Fund.: -74 db. Mic.: -59 db.

OUTPUT IMPEDANCE: 4-8-16 ohms and two constant voltage taps (70 V and 140 V).

POWER CONSUMPTION: 240 watts, 117 V, 50-60 cycles AC.

TUBES: Total 9: 3-6SC7, 1-6SL7, 1-6SN7, 2-807, 1-5R4GY, 1-5Y3.

DIMENSIONS: 17" wide, 11 $\frac{1}{2}$ " deep, 9 $\frac{1}{4}$ " high.

TWO MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — BASS-TREBLE TONE CONTROL — CONSTANT VOLTAGE OUTPUT — UNDERWRITERS' LABORATORIES APPROVED.

Push-Pull 807 output with constant voltage output taps to simplify line matching transformer calculations.

H50 HIGH IMPEDANCE AMPLIFIER:
Complete with tubes.
List Price.....\$183.75

HL50 LOW IMPEDANCE AMPLIFIER:
Same as H50 but first microphone input is low impedance, 200 ohms. 50 or 500 ohms available if specified.
List Price.....\$212.25

Model H50

MODEL EX35

35 WATTS

SPECIFICATIONS

POWER OUTPUT: 35 watts at less than 5%. PEAK POWER: 50 watts.

FREQUENCY RESPONSE: 30-14,000 cycles, ± 1 db.

GAIN: Microphone inputs (3): 120 db. Phono input (1): 80 db.

HUM: Fund.: -64 db. Mic.: -59 db.

OUTPUT IMPEDANCE: 4-8-15-500 and 1000 ohms.

POWER CONSUMPTION: 190 watts, 117 V, 50-60 cycles AC.

REMOTE CONTROL PROVISION: Built-in — permits mixing and fading two of the 4 available inputs from a remote point.

TUBES: Total 12: 4-6SF5, 2-6SL7GT, 1-6SJ7, 1-6F6G, 1-7Z4, 2-6L6G, 1-5U4G.

DIMENSIONS: 16 $\frac{1}{2}$ " wide, 8 $\frac{1}{2}$ " high, 10 $\frac{1}{4}$ " deep.

THREE MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — ELECTRONIC TONE CORRECTOR — REMOTE CONTROL OF GAIN — 6L6 PUSH-PULL OUTPUT

Model EX35

EX35 HIGH IMPEDANCE AMPLIFIER:
Complete with tubes.
List Price.....\$167.25

EL35 LOW IMPEDANCE AMPLIFIER:
Same as EX35 but first microphone input is low impedance, 200 ohms. 50 or 500 available if specified.
List Price.....\$195.75

DAVID BOGEN CO., INC., NEW YORK 12, N. Y.

BOGEN MEDIUM POWER SOUND EQUIPMENT

MODEL E30

30 W ATTS

SPECIFICATIONS

POWER OUTPUT: 30 watts at less than 5%.
 PEAK POWER: 40 watts.
 FREQUENCY RESPONSE: 40-12,000 cycles, ± 1.5 db.
 GAIN: Microphone: 120 db. Phono: 78 db.
 HUM: Fund.: -68 db. Mic.: -59 db.
 OUTPUT IMPEDANCE: 4-8-15-250-500 ohms.
 POWER CONSUMPTION 180 watts, 117 V, 50-60 cycles AC.
 TUBES: Total 7: 2-6ZF5, 1-6SC7, 1-6SN7GT, 2-6L6G, 1-5U4G.
 DIMENSIONS: 15" long, 7 $\frac{3}{4}$ " deep, 9 $\frac{1}{4}$ " high.

TWO MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — BASS-TREBLE TONE CONTROL — 6L6 PUSH-PULL OUTPUT.

E30 HIGH IMPEDANCE AMPLIFIER:
 Complete with tubes.
 List Price \$112.25

EL30 LOW IMPEDANCE AMPLIFIER:
 Same as E30 but first microphone input is low impedance, 200 ohms. 50 or 500 ohms available if specified.
 List Price \$133.00

Model E30

MODELS F30M F30V and F30A

30 WATT AMPLIFIERS
 With Built-in Phonographs

Model F30A

The perfect answer to a general duty portable amplifier with built-in phonograph. F30M has a built-in single speed phonograph. F30A uses an automatic record changer and F30V is equipped with dual speed motor and speed regulator.

F30A — List Price \$186.50
 F30M — List Price 158.75
 F30V — List Price 183.75

MODEL E14

14 W ATTS

SPECIFICATIONS

POWER OUTPUT: 14 watts at less than 5%. PEAK POWER: 25 watts.
 FREQUENCY RESPONSE: 40-12,000 cycles, ± 1.5 db.
 GAIN: Microphone channels (2): 115 db. Phono channel (1): 75 db.
 HUM: Fund.: -64 db. Mic.: -57 db.
 OUTPUT IMPEDANCE: 4-8-15-250 and 500 ohms.
 POWER CONSUMPTION: 90 watts, 117 V, 50-60 cycles AC.
 TUBES: Total 7: 2-6SF5, 1-6SN7GT, 1-6SC7, 2-6L6G, 1-5Y3GT.
 DIMENSIONS: 14" long, 7 $\frac{3}{4}$ " deep, 8" high.

TWO MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — BASS-TREBLE TONE CONTROL — 6L6 PUSH-PULL OUTPUT — SEVEN TUBES.

E14 HIGH IMPEDANCE AMPLIFIER:
 Complete with tubes.
 List Price \$95.00

EL14 LOW IMPEDANCE AMPLIFIER:
 Same as E14 with first microphone input in low impedance, 200 ohms. 50 or 500 ohms available if specified.
 List Price \$115.75

Model E14

MODEL E10

10 W ATTS

SPECIFICATIONS

POWER OUTPUT: 10 watts at less than 5%. PEAK POWER: 17 watts.
 FREQUENCY RESPONSE: 60-10,000 cycles, ± 1.5 db.
 GAIN: Microphone channel (1): 115 db. Phono channel (1): 80 db.
 HUM: Fund.: -64 db. Mic.: -57 db.
 OUTPUT IMPEDANCE: 4-8-15-500 ohms.
 POWER CONSUMPTION: 75 watts, 117 V, 50-60 cycles AC.
 TUBES: Total 5: 2-6SC7, 2-6V6GT, 1-5Y3GT.
 DIMENSIONS: 7" deep, 11" wide, 7-5/16" high.

ONE MICROPHONE CHANNEL — ONE PHONOGRAPH CHANNEL — FULL RANGE TONE CONTROL — FIVE TUBES — PUSH-PULL OUTPUT.

Model E10

E10 HIGH IMPEDANCE AMPLIFIER:
 Complete with tubes.
 List Price \$61.50

EL10 LOW IMPEDANCE AMPLIFIER:
 Same as E10 but microphone input is low impedance, 200 ohms. 50 or 500 ohms available if specified.
 List Price \$82.25

DAVID BOGEN CO., INC., NEW YORK 12, N. Y.

BOGEN MOBILE SOUND EQUIPMENT

MODEL EX326

32 WATT MOBILE SYSTEM

SPECIFICATIONS

POWER OUTPUT: 32 watts at less than 5%.
PEAK POWER: 40 watts.
FREQUENCY RESPONSE: 30-12,000 cycles, ± 2 db.
GAIN: Microphone 120 db. Phono: 70 db.
HUM: AC: -70 db; 6 volt DC: -60 db.
OUTPUT IMPEDANCE: 4-8-15-250-500 ohms.
POWER CONSUMPTION: ± 20 watts, 117 V AC; 28 amps, 6 V DC.
TUBES: Total 8: 3-6SF5, 2-6SL7GT, 2-6L6G, 1-5U4G.
DIMENSIONS: 16" long, 16" wide, 10 $\frac{1}{4}$ " high.

TWO MICROPHONE CHANNELS — ONE PHONOGRAPH CHANNEL — ELECTRONIC TONE CORRECTOR — BUILT-IN PHONOGRAPH — STANDBY SWITCH — 110 VOLT AC OR 6 VOLT DC OPERATION.

Model EX326

EX326 AMPLIFIER: Complete with phono and tubes. List Price \$250.00

EX326TU OUTDOOR SYSTEM: Includes: EX326 amplifier with tubes; 2 Bogen-University PH trumpets and SAH units; 1 Astatic N30 crystal microphone with 12 $\frac{1}{2}$ ' cable and plug. List Price \$399.25

EX326TJ OUTDOOR SYSTEM: Same as EX326TU substituting 2 Jensen H20 trumpets and U20 units. List Price \$405.25

MODEL E1620

23 WATT MOBILE SYSTEM

SPECIFICATIONS

POWER OUTPUT: AC: 23 watts at 5%; DC: 19 watts at 5%. **PEAK POWER:** AC: 39 watts; DC: 30 watts.
FREQUENCY RESPONSE: 30 - 14,000 cycles ± 2.5 db.
GAIN: Microphone channel: 109 db. Phono channel: 67 db.
HUM: AC: Fund: -66 db; Mic: -55 db. DC: Fund: -69 db; Mic: -58 db.
OUTPUT IMPEDANCE: 4-8-15-250-500 ohms.
POWER CONSUMPTION: 90 watts, 117 V AC; 17.5 amp, 6 V DC.
TUBES: Total 6: 1-6SJ7, 1-6SL7GT, 2-6L6G, 2-6X5GT.
DIMENSIONS: 15 $\frac{1}{2}$ " long, 10" deep, 12 $\frac{1}{2}$ " high.

UNIVERSAL OPERATION 6 VOLT DC OR 110 VOLT AC — ONE MICROPHONE CHANNEL — ONE PHONOGRAPH CHANNEL — BASS-TREBLE TONE CONTROL — BUILT-IN PHONOGRAPH.

E1620 AMPLIFIER: Complete with phono and tubes. List Price \$167.50

E1620TJ OUTDOOR SYSTEM: Includes: E1620 amplifier with tubes; 1 Jensen H20 trumpet and U20 unit, 1 Astatic JT30 crystal microphone with handle, interlocking base, 15' cable and plug. List Price \$252.75

E1620TU OUTDOOR SYSTEM: Same as E1620TJ, substituting Bogen-University PH trumpet with SAH unit. List Price \$249.75

Model E1620

MODEL E66

6 WATT MOBILE SYSTEM

SPECIFICATIONS

POWER OUTPUT: 6 watts at 5%. **PEAK POWER:** 8 watts.
FREQUENCY RESPONSE: 60-9,000 cycles, ± 2 db.
GAIN: Microphone channel (1): 110 db. Phono channel (1): 75 db.
HUM: AC: -50 db, DC: -62 db.
OUTPUT IMPEDANCE: 4-8-15 ohms.
POWER CONSUMPTION: 50 watts, 117 V AC; 7 amps, 6 V DC.
TUBES: Total 4: 1-6SJ7, 1-6SL7GT, 1-6L6GA, 1-6X5GT.
DIMENSIONS: 5 $\frac{3}{4}$ " wide, 7 $\frac{3}{8}$ " deep, 6 $\frac{3}{4}$ " high.

ONE MICROPHONE CHANNEL — PHONOGRAPH JACK — STANDBY POSITION ON POWER SWITCH — 110 V AC OR 6 V DC OPERATION.

Model E66

MODEL E66 AMPLIFIER: Complete with tubes. List Price \$71.50

MODEL E66F SYSTEM: Includes: 1-E66 amplifier with tubes, 1 University 1B8 trumpet, 1 Astatic JT30 microphone with handle, interlocking base, 15' cable and plug. List Price \$121.75

MODEL E66J SYSTEM: Same as above but trumpet is Jensen VH-91. List Price \$121.75

PRICES SLIGHTLY HIGHER IN ZONE 2 • ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE

DAVID BOGEN CO., INC., NEW YORK 12, N. Y.

BOGEN HIGH FIDELITY EQUIPMENT

MODEL PV15 15 WATT PHONO AMPLIFIER

SPECIFICATIONS

POWER OUTPUT: 15 watts at less than 2% distortion. PEAK POWER: 30 watts.
 FREQUENCY RESPONSE: 30 - 15,000 cycles $\pm 1/2$ db.
 TONE CORRECTOR RANGE: Bass control: -10 db to +10 db at 60 cps. Treble Control: -7 db to +8 db at 10,000 cps.
 GAIN: Maximum Gain: 106 db.
 HUM: -65 db. (referred to rated output).
 OUTPUT IMPEDANCE: 4-8-15-250-500 ohms.
 POWER CONSUMPTION: 117 V, 50-60 cycles, 105 watts.
 TUBES: Total 9: 1-6SK7, 3-6SJ7, 1-6SL7GT, 1-6SN7GT, 2-6L6G, 1-5Y3GT. (For PV15M, add 1-6SJ7).
 DIMENSIONS: 15" x 8" x 9 1/4".

BOGEN CONTROLLED EXPANDER — ELECTRONIC TONE CORRECTOR — 15 WATTS AT LESS THAN 2% — SEPARATE INPUTS FOR (a) GE VARIABLE RELUCTANCE PICKUP, (b) AMERICAN DYNAMIC OR PICKERING PICKUP, (c) HIGH IMPEDANCE MAGNETIC PICKUP, (d) LOW LEVEL CRYSTAL PICKUP, (e) HIGH LEVEL CRYSTAL PICKUP (OR TUNER OUTPUT).

THE MODEL PV15M has one microphone control in addition to the controls provided in the PV15. In the Model PV15L, the microphone channel is low impedance.

MODEL PV15 AMPLIFIER: Complete with tubes.

List Price \$140.25

MODEL PV15C AMPLIFIER: Same as PV15 with 4 foot extension controls for cabinet mounting.

List Price \$151.25

MODEL PV15M AMPLIFIER: Same as PV15 plus one high impedance microphone input.

List Price \$167.75

MODEL PV15MC AMPLIFIER: Same as PV15M with 4 foot extension controls for cabinet mounting.

List Price \$182.90

MODEL PV15L AMPLIFIER: Same as PV15M but microphone input is low impedance.

List Price \$195.75

Model PV15

MODEL PV10 10 WATT PHONO AMPLIFIER

MODEL PV10 AMPLIFIER: Complete with tubes.

List Price \$75.75

MODEL PV10C AMPLIFIER: Same as PV10 but with 4 ft. extension controls.

List Price \$85.25

STRAIGHT LINE EXPANDER — FULL RANGE TONE CONTROL — SEPARATE INPUTS FOR (a) HIGH IMPEDANCE MAGNETIC PICKUP, (b) HIGH LEVEL CRYSTAL PICKUP (OR TUNER OUTPUT), (c) LOW LEVEL CRYSTAL PICKUP.

SPECIFICATIONS

POWER OUTPUT: 10 watts at 5%. PEAK POWER: 17 watts.

FREQUENCY RESPONSE: 30-18,000 cycles ± 2 db.

GAIN: Magnetic pickup: 76 db., High Level Crystal: 50 db. Low Level Crystal: 60 db.

HUM: -60 db. (referred to rated output).

OUTPUT IMPEDANCE: 4-8-15-500 ohms.

POWER CONSUMPTION: 78 watts, 117 V, 50-60 cycles AC.

TUBES: Total 6: 2-6SL7GT, 2-6V6GT, 1-6SA7, 1-5Y3GT.

DIMENSIONS: 11" long, 7" wide, 7 1/4" high.

Model PV10

MODEL PH10 10 WATT MULTI-RANGE PHONO AMPLIFIER

MODEL PH10 AMPLIFIER: Complete with tubes.

List Price \$48.75

MODEL PH10C AMPLIFIER: Same as PH10 but with 4 ft. extension controls.

List Price \$53.75

MULTI-RANGE TONE SWITCH WITH FOUR LABORATORY SELECTED RESPONSE CURVES — VIRTUALLY HUMLESS PERFORMANCE IN ANY TONE POSITION — PUSH-PULL OUTPUT.

SPECIFICATIONS

POWER OUTPUT: 10 watts at 5%.

PEAK POWER: 14 watts.

FREQUENCY RESPONSE: (Full Range) 40-15,000 cps ± 1 db.

GAIN: 72 db.
 INPUT IMPEDANCE: (1) 500,000 ohms.

OUTPUT IMPEDANCE: 3.2 and 8 ohms.
 HUM: -80 db. (referred to rated output).

POWER CONSUMPTION: 60 watts, 117 V, 60 cycles.

TUBES: Total 4: 1-6SL7GT, 2-6V6GT, 1-5Y3GT.

DIMENSIONS: 5" x 11" x 3" (overall height 6").

Model PH10

MODEL R601 AM - FM TUNER

Model R601

GROUNDING GRID RF AMPLIFIER — FIRST MIXER-DOUBLE HIGH FREQUENCY CONVERSION — PERMEABILITY TUNED, CERAMIC COIL FORM FM-IF AND DISCRIMINATOR TRANSFORMERS — BUILT-IN POWER SUPPLY — ONE STAGE OF AUDIO OUTPUT — 6AL7 VOLTAGE RATIO TUNING EYE.

SPECIFICATIONS

SENSITIVITY: AM — 5 microvolts
 FM — 25 microvolts

RANGE: AM — 540 KC to 1630 KC
 FM — 88 MC to 108 MC

INT. FREQUENCY: AM — 455 KC
 FM — 10.7 MC

POWER CONSUMPTION: 60 Watts, 117 V AC.
 TUBE COMPLEMENT: 2-7F8, 2-6AC7, 1-6H6, 1-6SL7GT, 2-6SK7, 1-6SA7, 1-6SJ7, 1-6AL7GT, 1-5Y3GT.

OUTPUT VOLTAGE: 3 volts.

DIMENSIONS: 8 1/4" wide x 7" high x 1 1/2" deep.

R601 List Price \$162.50

Available on panel for rack mounting List Price 184.50

PRICES SLIGHTLY HIGHER IN ZONE 2 • ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE

DAVID BOGEN CO., INC., NEW YORK 12, N. Y.

BOGEN CENTRALIZED SOUND EQUIPMENT

MODE SA ECONOMY SCHOOL SYSTEM

MODEL SA10 — For 10 Rooms.	List Price.....	\$122.50
MODEL SA20 — For 20 Rooms.	List Price.....	145.00
MODEL SA30 — For 30 Rooms.	List Price.....	167.50
MODEL SA40 — For 40 Rooms.	List Price.....	190.00

Model SA

TWO WAY COMMUNICATION WITH CLASSROOMS — PUSH BUTTON CLASSROOM SELECTION — NO MICROPHONE NECESSARY AT MASTER — MASTER SWITCH TO CALL ALL ROOMS SIMULTANEOUSLY — CLASSROOM INITIATION OF CALLS — ANNUNCIATOR INDICATION OF ROOM CALLING (OPTIONAL) — BUILT IN 15 WATT AMPLIFIER — PROVISION FOR CONNECTING EXTERNAL RADIO AND PHONOGRAPH.

DIMENSIONS: 13 1/4" long, 11 1/2" deep, 9 1/2" high.

MODEL SB50 SOUND BROADCASTER

SPECIFICATIONS

SB50 DIMENSIONS: 31 1/2" high, 19 1/2" wide, 16 7/8" deep.

POWER OUTPUT: 50 watts at less than 5% PEAK POWER: 90 watts.

AMPLIFIER TUBES: Total 9: 3-6SC7, 1-6SL7, 1-6SN7, 2-807, 1-5R4GY, 1-5Y3.

TUNER RANGE: 540 KC to 1630 KC.

TUNER TUBES: Total 6: 2-6SK7, 1-6SA7, 1-6H6, 1-6X5, 1-6U5.

For music and voice distribution in hotels, hospitals, industrial plants, funeral homes, restaurants, stadia, resorts, large stores.

Model SB50

MODEL SB50 incorporates a broadcast band superheterodyne radio receiver, automatic record changer with silenced change function, bank of six area selector switches and all call switch plus monitor speaker and 50 watt amplifier. Cabinet is drawn steel, blue-grey hammerloid finished. List Price.....\$461.25

MODEL MS microphone unit consists of crystal microphone mounted on flexible gooseneck to 6 lb. cast base with Press-To-Talk Switch. List Price.....\$31.50

MODEL PS is optional plug-in unit to provide plate supply control and priority to microphone over music. List Price.....\$35.00

MODEL OS is optional plug-in oscillator for alarm or dismissal signals. List Price.....\$22.50

DELUXE MODEL SM SCHOOL SOUND SYSTEM For Up to 60 Rooms

SM15 — For 15 classrooms, less speakers and microphones List Price, \$647.25

SM30 — For 30 classrooms, less speakers and microphones. List Price, \$685.25

SM45 — For 45 classrooms, less speakers and microphones. List Price, \$723.25

SM60 — For 60 classrooms, less speakers and microphones. List Price, \$761.25

The Bogen SM is the complete school system. It actually provides two channels for use simultaneously — one for intercommunication with any room; the other for distribution of radio phonograph or microphone programs to any or all other rooms.

TWO MICROPHONES AND PHONOGRAPH USABLE SIMULTANEOUSLY. PROGRAM CAN BE PICKED UP FROM ANY ROOM AND RETRANSMITTED TO OTHERS. Available with AM-Short Wave or AM-FM Radio. Built-in Single Speed Phonograph Player. Available with Transcription Player or Automatic Change at slight cost increase. SM DIMENSIONS: 40 3/4" wide, 21" deep, 16 1/4" high.

SM15F — Same as SM15 but with AM-FM Radio. List Price, \$746.00

SM30F — Same as SM30 but with AM-FM Radio. List Price, \$784.00

SM45F — Same as SM45 but with AM-FM Radio. List Price, \$822.00

SM60F — Same as SM60 but with AM-FM Radio. List Price, \$860.00

Model SM

MODEL HT16 TRANSCRIPTION PLAYER

Model HT16

IDEAL PORTABLE TRANSCRIPTION PLAYER WITH BUILT-IN DUAL SPEED MOTOR FOR 78 OR 33 1/3 RPM — GOVERNOR SPEED CONTROL — 8 WATT BUILT-IN AMPLIFIER — HEAVY DUTY ALNICO V 8" SPEAKER IN REMOVABLE COVER.

SPECIFICATIONS

POWER OUTPUT: 8 watts at less than 5%. PEAK POWER: 11 watts.

FREQUENCY RESPONSE: 60-8,000 cycles, ±2 db.

GAIN: HT16: 72 db. MT16 — Phonograph channel: 70 db. Microphone channel: 103 db.

HUM: HT16: —64 db. MT16: Phonograph channel: —64db. Microphone channel: —55 db.

OUTPUT IMPEDANCE: 8 ohms.

POWER CONSUMPTION: 85 watts (with motor), 117V, 50-60 cycles AC.

TUBES: HT16: Total 4: 1-6SL7GT, 2-6V6GT, 1-5Y3GT.

MT16: Total 5: 1-6SJ7, 1-6SL7GT, 2-6V6GT, 1-5Y3GT.

DIMENSIONS: 19 1/4" deep, 17 1/2" wide, 10" high.

MODEL HT16—TRANSCRIPTION PLAYER.....List Price \$142.50

MODEL MT16—Same as HT16 plus one microphone input. List Price \$173.00

DAVID BOGEN CO., INC., NEW YORK 12, N. Y.

BOGEN COMMUNO-PHONES

THE NEW UNIVERSAL MODEL "X"

ONE MODEL TO SOLVE EVERY AC INTERCOMMUNICATION PROBLEM

DELUXE SERIES FOR 110V-125V 60 CYCLE AC UNDERWRITERS' LABORATORIES APPROVED

The new Model "X" Communophones represent the furthest advance in the design of electronic intercommunication equipment:

1. BOGEN MODEL "X" IS COMPLETELY UNIVERSAL. The one model will serve installations requiring a single master and several remote stations — installations requiring several master stations — or installations requiring several master stations and several remote stations. Remote stations are available to permit selective initiation of calls to master stations.
2. HAND-RUBBED FURNITURE-FINISHED CABINETS to complement the furnishings of the nation's best offices.
3. TYPEWRITER KEYBOARD ACTION for push button selection of stations.
4. TYPEWRITER BAR PRESS-TO-TALK SWITCH.
5. AUTOMATIC BUSY SIGNAL.
6. 3 WATTS AUDIO OUTPUT — reserve power to take noisy installations in stride.
7. PROVISION FOR PLUG-IN CONNECTION OF HANDSETS — permitting complete privacy of conversation, without need to operate the press-to-talk bar.
8. PROVISION FOR QUICK DISCONNECT OF MASTER STATIONS for ease of installation or transfer.
9. BALANCED LINES: 50 ohms.

MODEL 11X: MASTER can select up to 10 stations (masters or remotes in any combination)

MODEL 21X: MASTER can select up to 20 stations (masters or remotes in any combination)

MODEL RS50: REMOTE can reply when called by master and can also initiate calls to one master.

MODEL RS30: REMOTE can reply when called by master and can also initiate calls to one master.

MODEL RS110: REMOTE can reply when called by master and can also initiate calls to one master.

MODEL UX HANDSET plugs into any X, U or D master.

MODEL JU JUNCTION BOX is used in all X, U or D systems.

List Price	\$90.00

THE NEW UNIVERSAL MODEL "U"

ONE MODEL TO SOLVE EVERY AC-DC INTERCOMMUNICATION PROBLEM

STANDARD SERIES FOR AC-DC 105V-130V UNDERWRITERS' LABORATORIES APPROVED

The new — completely universal Model "U" Communo-Phone is the AC-DC version of the Model "X." It incorporates most of the functional and style features of the deluxe unit. Hand-rubbed cabinets — typewriter keyboard action for push button station selection — typewriter bar press-to-talk switch — provision for plug-in handset — provision for quick disconnect of the master station — 50 ohm balanced lines — Output Power is 1½ watts — no busy signal.

MODEL 11U: MASTER can select up to 10 stations (masters or remotes in any combination) List Price.....\$75.00

MODEL 21U: MASTER can select up to 20 stations (masters or remotes in any combination) List Price..... 98.75

MODELS RS50, RS30 and RS110: REMOTE STATIONS are used with models 11U and 21U.

MODEL UX PLUG-IN HANDSET and MODEL JU JUNCTION BOX are used with Models 11U and 21U.

TUBE COMPLEMENT MODELS 11U and 21U: 1-4F7, 1-50L6, 1-selenium rectifier.

Illustrated: Model 21X, 21U or 21D MASTER STATION

Model UX HANDSET

THE NEW DUAL-FUNCTION MODEL "D"

MODERATELY PRICED FLEXIBLE AC-DC COMMUNO-PHONE
UNDERWRITERS' LABORATORIES APPROVED

The new Model "D" Communo-Phone is designed to serve installations requiring either a single master and several remote stations or several master stations only. It will not serve systems requiring a combination of several master and several remote stations, and it operates on voice coil lines. In all other respects the Model "D" is the equivalent of the Model "U."

MODEL 11D: MASTER can select up to 10 stations (exclusively masters or remotes)

MODEL 21D: MASTER can select up to 20 stations (exclusively masters or remotes)

MODEL RS5: REMOTE can reply when called by master and can also initiate calls to master (for use with 11D or 21D masters)

MODEL UX HANDSET plugs into any master.

MODEL JU JUNCTION BOX.

DAVID BOGEN CO., INC., NEW YORK 12, N. Y.

NEWCOMB PHONOGRAPH AMPLIFIERS

For the finest phonograph performance ever achieved

Logical culmination of years of electronic research and engineering development continuously carried on in Newcomb laboratories, these new phonograph amplifiers, used in conjunction with suitable accessories, will produce unbelievable realism from recorded music or from AM-FM radio tuners. Their improved response at low volume, their beautifully clear, undistorted treble tones and the exclusive new "Magic Red Knob" control, which virtually eliminates surface noise and distortion from records in any condition, make these two amplifiers the best possible choice for fine custom phonograph installations.

THE "MAGIC RED KNOB"
 For a new enjoyment of recorded music . . . simply turn the Magic Red Knob to one of the four positions, beginning at "A" for perfect records, beginning at very noisy records.

KXLP-30 DELUXE PHONOGRAPH AMPLIFIER

In the KXLP-30, Newcomb offers a phonograph amplifier unsurpassed by any other in the field, regardless of price. The ample power of the KXLP-30 permits use of the famous KX-Series dual tone control circuit, which provides tonal range and balance unattainable in less costly circuits. This circuit provides controlled emphasis of the desirable but power-consuming fundamental base tones, avoiding emphasis of harmonic bass—the "boomy" or one-tone bass so unacceptable to true music lovers. **KXLP-30 SPECIFICATIONS:** POWER OUTPUT: 30 watts at less than 5% distortion with flat power output versus frequency curve. FREQUENCY RESPONSE: 20 to 20,000 cycles within 1 db. Response of magnetic and variable reluctance inputs corrected for requirements of these pickups. INPUTS: For radio and choice of phonograph pickup from crystal to low level magnetic or variable reluctance types. GAIN: Crystal input, 90 db. at 1/2 meg. input impedance. Magnetic or variable reluctance input, 112 db. at 1/2 meg. input impedance or 95 db. at 10,000 ohms. Signal required at radio input to fully load amplifier to rated output is 6.6 volts. TONE COMPENSATION: Bass tone control 0 to +22 db. with special curve shape for maximum emphasis of fundamental bass tones and minimum emphasis of harmonic bass. Treble tone control -25 db. to +25 db. Automatic bass compensation of volume control from 0 db. bass boost at full volume to +10 db. at lowest volume. Fixed bass compensation (magnetic or variable reluctance input only) +10 db. RECORD CONDITION COMPENSATOR Five positions: #1, radio; #2, records, condition "A" (Perfect); #3, records, condition "B"; #4, records, condition "C"; #5, records, condition "D" (badly worn, very noisy).

KXLP-30. The "Magic Red Knob" virtually eliminates record noise and distortion from records in any condition.

CONTROLS (5): Power switch, bass tone control, Magic Red Knob control, treble tone control, volume control. **CONTROL PANEL:** Genuine etched metal. **HUM BALANCER CONTROL:** To correct for variations in tubes. **OUTPUT IMPEDANCES:** 3, 4, 6, 8, 16 and 500 ohms to octal socket. **POWER CONSUMPTION:** 150 watts, 129 volts, 60 cycles A.C. For use on 105-129 volts. **TUBES (7):** One 6SC7, three 6J5, two 6L6G, one 5U4G. **DIMENSIONS:** Chassis: 13 1/2" x 9 1/2" x 3". Height over-all, 7 7/8". **SHIPPING WEIGHT:** 26 lbs. **LIST: (with tubes) \$225.00. Plug Kit, \$60.**

HLP-14 PHONO AMPLIFIER

This new phonograph amplifier by Newcomb brings to music lovers an entirely new listening pleasure in a unit somewhat less expensive than the superb new KXLP-30. It, too, features the "Magic Red Knob" record condition compensator and its built-in pre-amplification and equalization, required for new low level pickups, make the HLP-14 ideal for the lower cost home installation.

Exceptional tonal balance at whisper volumes is an outstanding feature of the HLP-14 . . . a truly remarkable value in the custom phonograph field.

HLP-14 SPECIFICATIONS: POWER OUTPUT: 14 watts at less than 5% distortion with wide flat power output versus frequency curve. PEAK POWER OUTPUT: 19 watts. FREQUENCY RESPONSE: 30 to 15,000 cycles within 1 db. for crystal pickup and radio inputs. Magnetic and variable reluctance inputs have response adjusted to requirements of these pickups. INPUTS: for radio and choice of phonograph pickup from crystal to low level magnetic or variable reluctance types. GAIN: Crystal input 90 db. at 1/2 meg. input impedance. Magnetic or variable reluctance input 109 db. at 1/2 meg. or 92 db. at 10,000 ohms impedance. Signal output from radio required to load amplifier to rated output is 4.2 volts. TONE COMPENSATION: Variable: Bass tone control 0 to +16 db. Treble tone control -29 db. to +12.5 db. Automatic bass compensation on volume control from 0 db. at maximum volume to +16 db. at lowest volume. Fixed bass compensation (magnetic or variable reluctance input only) +10 db. RECORD CONDITION COMPENSATOR: (same as KXLP-30). **CONTROLS (5):** Power switch, bass tone control, record condition compensator and radio selector, treble tone control, volume control. **CONTROL PANEL:** Etched metal **OUTPUT IMPEDANCES:** 3, 4, 6, 8, 16 and 500. **POWER CONSUMPTION:** 75 watts, 129 volts, 60 cycles A.C. for use on 105-129 volts. **TUBES (6):** One 6SC7, one 6SJ7, one 6J5, two 6V6GT and one 5Y3GT. **DIMENSIONS:** Chassis, 13 1/4" x 8 1/8" x 3". Height over-all, 6 3/4". **SHIPPING WEIGHT:** 14 1/2 lbs. **LIST: (with tubes) 139.50 Plug Kit, \$62.**

(Prices and Specifications Subject to Change Without Notice)

HLP-14. The "Magic Red Knob," and other exclusive Newcomb features make this model ideal for the smaller custom installation.

RACK ASSEMBLIES

For all the varied sound applications of schools, industry, churches, fairs, stadiums, Newcomb offers the basic elements for custom cabinet type rack systems. Designed for flexibility, the Newcomb rack equipment enables the engineer to assemble and install public address equipment of the highest quality, tailored to each customer's exact needs. Write for literature.

NEWCOMB DELUXE K-SERIES AMPLIFIERS

KX-30

KX-60

KX-6

Model A Power Supply

A compact, convenient power supply for use with the KX-6 Pre-amplifier when the power cannot be conveniently obtained from a K-60P Booster. Power consumption: 65 watts for 105-129 volts, 50-60 cycles A.C. DIMENSIONS: 3 1/2" x 6" x 8". SHIPPING WEIGHT: 8 lbs. LIST: \$49.50.

K-60P BOOSTER AMPLIFIER . . . A deluxe 60 watt Booster for the most particular installations. Use of four 6L6 tubes provides performance and dependability impossible with two tube designs. Ample inverse feedback minimizes effects of speaker load variations. Regulated screen voltage and improved plate circuit regulation and other circuit refinements insure lowest distortion at all levels. Provides power for KX-6 Pre-amplifier. Overload and volume indicators provide needed operating information at all times.

SPECIFICATIONS . . . POWER OUTPUT: 60 watts at less than 5% distortion. RESPONSE: 1 db., 20 to 20,000 cycles. INPUT to .1 meg. VOLUME CONTROL convertible to balanced line or bridging input by exclusive Newcomb plug-in transformers. GAIN 66 db. OUTPUT IMPEDANCES: 3, 4, 6, 8, 16 and 250 ohms to terminal strip and four bakelite moulded sockets. PLUG-IN FILTER CONDENSERS. SEPARATE PLATE AND FILAMENT POWER TRANSFORMERS, individually fused, brought out to 3 contact male A.C. receptacle. TUBES (11): one 6SJ7, one 6SN7, one 6SQ7, one 6V6GT, four 6L6G, one 6AF6G, two 5Z4. POWER CONSUMPTION: 193 watts, 129 volts 60 cycles A.C. for use on 105-129 volts. DIMENSIONS: 8 5/8" x 8 5/8" x 20 1/4". SHIPPING WEIGHT: 44 lbs. LIST: (with tubes) \$215.00. Plug Kit, \$2.69.

(Prices and Specifications Subject to Change Without Notice)

KX-30 AMPLIFIER . . . Flexibility, dependability, outstanding performance and many superior operating features characterize the KX-30, bringing new quality to the school auditorium, church, theatre, night club, dance bands, etc. Its versatility and ability to handle a greater variety of acoustic conditions makes it the ideal instrument for the rental engineer or traveling group. An ideal recording amplifier. Custom testing of each unit with attached performance certificate assures the purchaser of laboratory perfection in each instrument. Superior individual bass and treble tone controls in a more costly circuit greatly enhance listening quality.

SPECIFICATIONS . . . POWER OUTPUT: 30 watts, distortion 5% or less. RESPONSE: 1 db., 20 to 20,000 cycles. THREE MICROPHONE INPUTS (2 megs. input impedance), Gain 126 db. LOW IMPEDANCE by means of exclusive plug-in transformer. TWO PHONO INPUTS (1/2 meg. impedance), Gain 78 db. MASTER VOLUME CONTROL VOLUME INDICATOR calibrated in actual watts output. OVERLOAD INDICATOR. Bass TONE RANGE: -17 db. to +24 db. TREBLE TONE RANGE: -24 db. to +24 db. OUTPUT IMPEDANCES: 3, 4, 6, 8, 16 and 500 ohms to terminal strip and two molded bakelite sockets. PLUG-IN FILTER CONDENSERS. MULTISTAGE INVERSE FEEDBACK and regulated screen voltage. Illuminated control panel protected by locking cover. WELDED STEEL CABINET, beautifully finished in silver gray hammertone baked enamel. TUBES (13): four 6J7, two 6J5, one 6SN7, one 6SQ7, one 6AF6G, one 6V6GT, two 6L6, one 5V4G. POWER CONSUMPTION: 136 watts, 129 volts 60 cycles A.C. for use on 105-129 volts. DIMENSIONS: 8 5/8" x 8 5/8" x 20 1/4". SHIPPING WEIGHT: 36 lbs. LIST: (with tubes) \$269.50. Plug Kit, \$3.20.

KX-60 AMPLIFIER . . . All the deluxe operating and circuit features of the KX-30 but with twice the power, for stadiums, church towers, large auditoriums or wherever high power with quality is desired. Conservative operation using four 6L6 tubes offers greater dependability, less distortion and more uniform power output at all frequencies than two tube designs. Compact for easy portability. Includes the same deluxe dual tone control circuits as the KX-30, assuring best performance under all acoustical conditions. Custom testing of each unit with attached performance certificate assures the purchaser of laboratory perfection in each instrument. Key locking cover protects control settings. Microphone inputs readily converted to low impedance by exclusive, hum-free plug-in transformers.

SPECIFICATIONS . . . for KX-60 exactly the same as KX-30, except as follows: POWER OUTPUT: 60 watts, distortion less than 5%. OUTPUT IMPEDANCES: 3, 4, 6, 8, 16 and 250 ohms to terminal strip and four bakelite molded sockets. TUBES (15): four 6J7, two 6SN7, one 6SQ7, one 6V6GT, one 6AF6G, four 6L6, two 5Z4. POWER CONSUMPTION: 240 watts, 129 volts 60 cycles A.C. for use on 105-129 volts. SHIPPING WEIGHT: 42 lbs. LIST: (with tubes) \$309.00. Plug Kit, \$4.26.

KX-6 MIXER PRE-AMPLIFIER . . . Five microphone and two phonograph inputs make the KX-6 mixer pre-amplifier ideal for large auditoriums, theatres, large church installations, large orchestras, etc. The advanced KX-Series bass and treble tone controls as used in all KX models, a Master Volume Control and Volume Indicator make tough jobs easy and operating a pleasure. Locking control cover prevents unauthorized tampering with adjustments. Ample power output for connection to an almost unlimited number of boosters or several telephone lines or both. Plenty of gain for distant pickups and extremely low hum. Filament and Plate Power obtained from Model A Power Supply or K-60P Booster. Used in conjunction with the K-60P, the combination makes the finest multiple input, 60 watt, amplifying unit obtainable.

SPECIFICATIONS . . . POWER OUTPUT: +22 db. at less than 5% distortion. FREQUENCY RESPONSE: 20 to 20,000 cycles within 1 db. FIVE MICROPHONE INPUTS (2 megs.) Gain 97 db. LOW IMPEDANCE by means of exclusive Newcomb plug-in transformers. TWO PHONO INPUTS (1/2 meg.), Gain 47 db. MASTER VOLUME CONTROL VOLUME INDICATOR, Electric Ray type. BASS TONE CONTROL RANGE: -17 db. to +24 db. TREBLE TONE RANGE: -24 db. to +24 db. OUTPUT IMPEDANCES: 500 or 125 ohms. PLUG-IN FILTER CONDENSERS. PUSH-PULL OUTPUT TUBES. ILLUMINATED control panel protected by locking cover. WELDED STEEL CABINET, beautifully finished in silver gray hammertone baked enamel. TUBES (11): six 6J7, three 6J5, one 6SN7, one 6E5. POWER CONSUMPTION: 310 volts D.C. at 27 ma. 6.3 volts A.C. at 3.3 amps from Model A Power Supply or K-60P. DIMENSIONS: 8 5/8" x 8 5/8" x 20 1/4". SHIPPING WEIGHT: 25 lbs. LIST: (with tubes) \$239.50. Plug Kit, \$3.34.

K-60P

Newcomb AUDIO PRODUCTS COMPANY
6824 LEXINGTON AVENUE, HOLLYWOOD 38, CALIFORNIA

NEWCOMB IMPEDANCE MATCHING TRANSFORMERS

LS-2: (not shown) High Power Impedance matching auto-transformer having 28 impedance from 580 ohms to 1.21 ohms. Capacity 100 watts. Shipping weight, 5¼ lbs. **List: \$19.50**

LS-4: Multi-winding general purpose transformer. Range of impedances from 3,000 to 18,000 ohms in steps of 1,500 ohms. Capacity 8 watts. **List: \$6.50**

LS-5 TRANSFORMER: Similar to LS-4 with range of impedances from 500 to 3,000 ohms in steps of 250 ohms. Capacity 20 watts. **List: \$8.50**

TC-3: Weatherproof housing for use with all three transformers. Box size: 3¼" x 4" x 5¾". **List: \$5.00**

PLUG-IN INPUT TRANSFORMERS

TR-91: A distinct contribution to high quality p-a. systems. Features sextuple alloy and copper shielding for quiet operation right in amp. proper; alloy core and specially designed windings for extended frequency response from 20 to 20,000 cycles; plug base for easy installation without tools in any H or K series Newcomb amp. For use between 50 or 200 ohm mikes and grid. Shipping weight, 1¼ lbs. **List: \$23.50**

TR-92: Input impedance 5,000 ohms to grid for bridging a 500 ohm line. Alloy shielded for minimum hum. When plugged into the socket provided on K60-P, it converts this amp. for use as bridging amp. Shipping weight, 1¼ lbs. **List: \$19.50**

TR-100: Identical to TR-91 but designed for use between 125 or 500 ohm microphones and grid. **List: \$23.50**

THE ABOVE CHARTS SHOW ACTUAL RESPONSE AND DISTORTION CURVES FOR THE KX-60 AMPLIFIER

MODEL LP-1 SCRATCH FILTER

Another contribution by Newcomb to improved record response for the most critical and demanding listener. Simple to install in commercial or professional systems or home phonographs. Can be connected easily by any serviceman. Wired between a crystal pickup and an amplifier, it greatly improves the response of the pickup and provides a remarkably effective control of needle scratch. Unlike other methods the LP-1 retains excellent brilliance of response. Four steps of adjustment provide adequate control for all records, regardless of quality. **List: \$25.00**

NEWCOMB K-SERIES PORTABLE SYSTEMS

KX-6012A: 3-case port. system built around KX-60 amp. Genuine plywood, fabricoid cases. One carries amp. with space for mikes, cable and stand. Other houses two 12" speakers of finest, efficient type. Fifty ft. of cable with each speaker. No mikes or mtgs. included. Shipping weight, 185 lbs.

List: (with tubes and plugs) \$655.88

KX-660-12A: 4-case, 60 watt port. system combining KX-6 Pre-amp. with K60-P Booster. 4 top quality 12" speakers, each with 50 ft. cable. KX-6 and K60-P carried in separate cases. Space in each for mikes, cable and stand. Mikes and mtgs. not included. Shipping weight, 221 lbs.

List: (with tubes and plugs) \$834.42

KX-3012A: 2-case port. system with KX-30 amp. Smart genuine plywood cases give protection and excellent response. One case carries amp. with space for mikes, cable and stand; other, 2 of best quality 12" speakers, facing inside. No mikes or mtgs. included. Shipping weight, 118 lbs.

List: (with tubes and plugs) \$459.87

KX-30R12A: Superb 3-case comb. of 2 new RS-12 wide range speakers and KX-30 amp. Case has space for stand, mikes, accessories. Each speaker with 50 ft. of cable. No mikes or mtgs. included. Shipping weight, 147 lbs. **List: (with tubes and plugs) \$533.62.**

(Prices and Specifications Subject to Change Without Notice)

Newcomb-AUDIO PRODUCTS COMPANY
6824 LEXINGTON AVENUE, HOLLYWOOD 38, CALIFORNIA

NEWCOMB TR-16 TRANSCRIPTION PLAYER

MODEL TR-16: Portable Transcription Player & P.A. System

The TR-16 brings a new standard of reproduction to the field of portable record playing. Truly economical, yet characteristically Newcomb in quality of workmanship, performance and fresh originality of design. Never before has so much distortion-free power, quality of tone, and ruggedness been placed in such light, convenient, compact form. Weighs only 38½ lbs. Provides the best answer yet to the needs of schools, colleges, broadcast studios, theatrical agencies, lecturers, dance studios, music teachers, sales and advertising agencies, for more rugged equipment that would give more dependable service, yet provide better performance than heretofore. Useful not only as a very fine transcription player, but makes a splendid P.A. System by merely connecting a microphone to the input provided for this purpose. Tested and approved by the National Board of Fire Underwriters Laboratories. Every attempt has been made to make this unit simple, easy and foolproof in operation, with great emphasis on dependability and tone quality. Plays all records up to 17¼" in diameter at either 33-1/3 or 78 R.P.M. Handy vernier speed adjustment lever varies basic speed to meet pitch or tempo requirements. Heavy General Industries governor controlled motor with 12" turntable. Large 12" heavy weight Alnico V permanent magnet dynamic speaker protected by push-proof punched metal grill and connected with a 25 ft. cable permitting the speaker to be placed most conveniently for best coverage. Full 10 watt, push-pull 6V6 inverse feedback, low distortion amplifier. Response within 2 db from 50 to 10,000 cycles. Separate microphone and phonograph volume controls permit mixing of microphone speech with recorded music. Individual record bass boost tone control and separate high frequency tone control give effective control of all tonal requirements. Special circuit avoids excessive bass on voice when bass is emphasized on records. Design retains excellent bass even at low volumes.

Famous "Featherweight" Astatic Model "QT" crystal cartridge in deluxe tone arm for better tone quality, long record life, low distortion, and minimum tracking error. Semi-permanent, easily replaceable needle of new design eliminates direct needle talk, avoids nuisance of constant needle replacement and lengthens life of records. Rubber pad between turntable and pickup rest

protects cartridge if dropped in this area. Needle further protected by close fitting guard. Tubes, motor, and motor wiring are instantly accessible by merely turning two airlock fasteners ¼ turn each, using a dime or a penny. Inspection and ventilating plate beneath amplifier provides quick access to under-chassis wiring without need to remove amplifier. All steel motor board and front panel. Sloping amplifier control panel. Four controls consisting of: Combination Treble Tone Control and Amplifier A.C. Switch; Phonograph Bass Boost Control; Combination Phonograph Volume Control and Turntable Switch; Microphone Volume Control. Panel includes microphone jack, loudspeaker jack, and pilot lamp. Tubes: (5) 1-6SC7, 1-6SJ7, 2-6V6GT, 1-6X5GT. Power consumption: 70 watts, 117 volts 60 cycles A.C. Dimensions: 16¾" x 16¾" x 11¾". Shipping weight: 43½ lbs. **List: \$159.50 complete. Microphone extra.**

TR-16

H-1010C

SEE OTHER NEWCOMB PORTABLE SYSTEMS IN OTHER SERIES

H-1412C — H-3012H

H-1010C: 2-speaker, 10 watt system, with H-10 amp. 2 quality heavy duty 10" speakers, cable. Plywood case, 11" x 20¾" x 15¾". No mike or stand included. Shp. Wt.: 43 lbs. **List: (with tubes and plugs) \$184.97.**

H-1412C: Built around H-14 amp. 2 full 12" speakers with amp. in plywood case, 11" x 23¼" x 18½"; comp. for mikes, cable, stand. No mikes, mtgs. included in price. Shipping weight: 53 lbs. **List: (with tubes and plugs) \$222.44.**

H-3012H: H-30 amp. with 2 high efficiency 12" speakers, 50 ft. of cable, each in case 11" x 23¼" x 18½"; space for mikes, cable, stand. No mikes, mtgs. included in price. Shipping weight: 63 lbs. **List: (with tubes and plugs) \$277.04.**

Newcomb-AUDIO PRODUCTS COMPANY
 6824 LEXINGTON AVENUE, HOLLYWOOD 38, CALIFORNIA

NEWCOMB H-SERIES AMPLIFIERS

H-10 AMPLIFIER: Compact, lightweight, dependable, the H-10 is the perfect answer for the better quality, low power jobs. A wide range tone control, multi-stage inverse feedback, careful design and certified custom testing assure superior performance.

SPECIFICATIONS . . . POWER OUTPUT: 10 watts at less than 5% distortion with excellent power output at all frequencies and low distortion at all output levels. **FREQUENCY RESPONSE:** 40 to 10,000 cycles within 2 db. **INPUTS (2):** 1 mike (2 meg.) gain 112 db, 1 phono (1/2 meg.) gain 74 db. (Microphone input instantly convertible to low impedance input by use of TR-91 transformer). **OUTPUT IMPEDANCES (6):** 3, 4, 6, 8, 16 and 500 ohms to terminal strip and 2 bakelite molded sockets. **CONTROL PANEL:** Etched metal, illuminated. **CONTROLS (4):** 1 mike, 1 phono, 1 bass-treble, 1 A.C. power switch. **ALL RESISTANCE CAPACITY COUPLING; PUSH-PULL OUTPUT; THOROUGHLY IMPREGNATED HEAVY DUTY TRANSFORMERS. POWER CONSUMPTION:** 50 watts, 129 volts, 60 cycles A.C. for use on 105-129 volts. **TUBES (5):** 1-6SC7, 1-6SJ7, 2-6V6GT/G, 1-6X5GT. **DIMENSIONS:** 6-1/16" deep x 6 5/8" high x 12 3/4" long. **SHIPPING WEIGHT:** 14 lbs. **List: (with tubes) \$89.50. Plug Kit, \$1.83**

H-10

H-14 AMPLIFIER . . . An outstanding general-purpose amplifier designed for high quality performance and long life. This 14-watt amplifier has inputs for two microphones and one phonograph, two tone controls for individual control of bass and treble, a fully illuminated panel and many other features that make it a top value among all amplifiers in its power range. Plus certified custom testing assuring perfection in each unit.

SPECIFICATIONS . . . POWER OUTPUT: 14 watts at less than 5% distortion with excellent power output at all frequencies and low distortion at all output levels. **FREQUENCY RESPONSE:** 30 to 15,000 cycles within 2 db. **INPUTS (3):** 2 mikes (2 meg.) gain 112 db, 1 phono. (1/2 meg.) gain 75 db. **OUTPUT IMPEDANCES (6):** 3, 4, 6, 8, 16 and 500 ohms. **CONTROL PANEL:** Etched metal. **CONTROLS (5):** 1 mike, 1 mike-phonograph, 1 bass, 1 treble, 1 A.C. power switch. **POWER CONSUMPTION:** 75 watts, 129 volts, 60 cycles A.C. for use on 105-129 volts. **TUBES (6):** 1-6SC7, 1-6SJ7, 1-6J5, 2-6V6-GT/G, 1-5Y3-GT. **DIMENSIONS:** 7" deep x 8 1/8" high x 15" wide. **SHIPPING WEIGHT:** 19 lbs. **List: (with tubes) \$119.50. Plug Kit, \$2.43.**

H-14

H-30 AMPLIFIER . . . For extremely faithful reproduction, for portability, for power, for complete dependability. The H-30 is an ideal unit for dance bands, school auditoriums, cafes and similar applications. Answers the majority of requirements in any sound field. Its outstanding features include individual tone controls, easily selected output impedances, plug-in filter condensers, linear mixer response, superb frequency response at any output power, remarkably low distortion, plus certified custom testing insuring perfection in each unit.

SPECIFICATIONS . . . POWER OUTPUT: 30 watts at less than 5% distortion with excellent output power at all frequencies and low distortion at all output levels. **FREQUENCY RESPONSE:** 30 to 15,000 cycles within 2 db. **INPUTS (3):** 2 mikes (2 meg.) gain 121 db, 1 phono (1/2 meg.) gain 78 db. **OUTPUT IMPEDANCES (6):** 3, 4, 6, 8, 16 and 500 ohms. **CONTROL PANEL:** Etched metal. **CONTROLS (5):** 1 mike, 1 mike-phonograph, 1 bass, 1 treble, 1 A.C. power switch. **CIRCUIT FEATURES:** multi-stage inverse feedback, all resistance capacity coupling, multiple winding output transformer. **POWER CONSUMPTION:** 144 watts, 129 volts, for use on 105-129 volts, 60 cycles A.C. **TUBES (7):** 2-6SF5, 1-SJ7, 1-6J5, 2-6L6-G, 1-5U46. **DIMENSIONS:** 7" deep x 8 1/8" high x 15" wide. **SHIPPING WEIGHT:** 23 lbs. **List: (with tubes) \$153.00. Plug Kit, \$2.43.**

H-30

H-60 AMPLIFIER: Utilizing the most advanced circuit techniques for higher power, lower distortion and wider range of response, the Model H-60 offers a full 60 watts of clean, distortion-free power. Use of four 6L6 tubes provides performance and dependability impossible from 2-tube designs. Simplicity of design, precision assembly, and certified custom testing assure a superior product. For use in a great variety of applications where moderate cost is a factor, the basic amplifier superiority of the H-60 makes it a continuing favorite.

SPECIFICATIONS . . . POWER OUTPUT: 60 watts at less than 5% distortion with excellent power output at all frequencies and low distortion at all output levels. **FREQUENCY RESPONSE:** 2 db, 30-15,000 cycles. **INPUTS (4):** 2 microphone (2 meg.) gain 126 db, 2 phonograph (1/2 meg.) gain 85 db. **OUTPUT IMPEDANCES (6):** 3, 4, 6, 8, 16 and 250 ohms. **CONTROL PANEL:** Etched metal. **CONTROLS (5):** 2 microphone-phonograph, 1 bass, 1 treble, 1 A.C. power switch. **CIRCUIT FEATURES:** All resistance capacity coupling, multistage inverse feedback, plus regulated screen power for lower distortion and multiple winding output transformer. **POWER CONSUMPTION:** 228 watts, 129 volts, 60 cycles A.C. for use on 105-129 volts. **TUBES (11):** 2-6SF5, 1-6SJ7, 1-6SN7, 4-6L6G, 1-6V6GT, 2-5Z4. **DIMENSIONS:** 13 3/8" x 8 1/2" x 19". **SHIPPING WEIGHT:** 38 lbs. **List: (with tubes) \$190.00. Plug Kit, \$3.66.**

Newcomb-AUDIO PRODUCTS COMPANY
6824 LEXINGTON AVENUE, HOLLYWOOD 38, CALIFORNIA

NEWCOMB E-SERIES AMPLIFIERS

A LOW-PRICED LINE OF SUPERIOR UTILITY AMPLIFIERS

The same fine workmanship and materials as the incomparable KX- and H-Series. Designed to lead the low-price field. For performance, dependability and economy the E-Series is today's best combination of high quality and low cost.

E-10 AMPLIFIER . . . Delivers full 10 watts from push-pull 6V6 tubes. Inputs for mike and phono.

SPECIFICATIONS . . . POWER OUTPUT: 10 watts at less than 5% distortion. FREQUENCY RESPONSE: 50 to 10,000 cycles within 2 db. INPUTS (2): 1 mike (2 meg.) gain 116 db, 1 phono (1/2 meg.) gain 77 db. TONE CONTROL: range 0 to 24 db. MULTI-STAGE INVERSE FEEDBACK CIRCUIT. OUTPUT IMPEDANCES: 4, 8 and 16 ohms to octal socket. TUBES (5): 1-6SC7, 1-6SF5, 2-6V6GT and 1-6X5GT. FINISH: Two-tone gray hammertone baked enamel. PANEL: Genuine etched metal. DIMENSIONS: (incl. cover) 5 3/4" x 10 3/8" x 6 3/4" high. POWER CONSUMPTION: 60 watts at 117 volts; 60 cycles A.C. SHIPPING WEIGHT: amplifier only, less cover, 9 lbs. Including cover, 10 1/2 lbs. LIST: (with tubes, less cover) \$49.50. Cover, \$4.50. Plug Kit, \$1.10.

E-17 AMPLIFIER . . . For medium power applications, 17 watts of undistorted audio to easily selected impedances for matching various speakers. Mixed controls for one mike and a phono input.

SPECIFICATIONS . . . POWER OUTPUT: 17 watts at less than 5% distortion. FREQUENCY RESPONSE: 2 db, 50 to 10,000 cycles. INPUTS: 1 mike (2 meg.) gain 117 db, 1 phono (1/2 meg.) gain 79 db. TONE CONTROL: range 0 to -29 db. OUTPUT IMPEDANCES: 4, 8, 16 and 500 ohms. MULTI-STAGE INVERSE FEEDBACK CIRCUIT. TUBES (5): 1-6SC7, 1-6SJ7, 2-6L6G, 1-5Z4. PANEL: etched metal, illuminated. FINISH: Two-tone gray hammertone baked enamel. DIMENSIONS: (incl. cover): 8 3/8" x 14 1/8" x 8" high. POWER CONSUMPTION: 75 watts at 117 volts 60 cycles A.C. SHIPPING WEIGHT: 18 lbs. LIST: (with tubes and cover) \$79.50. Plug Kit, \$1.50. **E-17P PHONO TOP MODEL**. Shipping Wt: 21 lbs. List: (with tubes) \$102.50. Plug Kit, \$1.50.

E-25 AMPLIFIER: Delivers a full 25 watts. Multi-stage inverse feedback assures low distortion. Provision for two mikes to be mixed together, or one mike and one phono, with easy matching to various speakers.

SPECIFICATIONS . . . POWER OUTPUT: 25 watts at less than 5% distortion. FREQUENCY RESPONSE: 2 db, 50-10,000 cycles. INPUTS (3): 2 mikes (2 meg.) gain 119 db, and 1 phono (1/2 meg.) gain 78 db. TONE CONTROL: range 0 to -30 db. OUTPUT IMPEDANCES: 4, 8, 16 and 500 ohms. TUBES (6): 1-6SJ7, 1-6SC7, 1-6J5, 2-6L6G and 1-5Z4. FINISH: Two-tone hammertone baked enamel. PANEL: etched metal, illuminated. POWER CONSUMPTION: 90 watts at 117 volts; 60 cycles A.C. SHIPPING WEIGHT: 19 lbs. LIST: (with tubes and cover) \$99.50. Plug Kit, \$2.10. **E-25P PHONO TOP MODEL**. Shipping Wt: 22 lbs. List: (with tubes) \$122.50. Plug Kit, \$2.10.

E-25MP Phono Top Mobile Amplifier . . . A full 25 watts from either 6 V. Storage Battery or 117 V. A.C. at new low price. Ideal for sound trucks, political gatherings, picnics, missionary work, camps, resorts, beaches, carnivals, parades, etc. Ruggedly built to stand hard usage. Consumes least possible battery power per watt output. "Stand-by" switch reduces battery consumption, keeps tubes warm for instant use. Separate A.C. power and turntable switches. Heavy duty Jones plugs and receptacles provide dependable connections to battery or A.C. power source.

SPECIFICATIONS . . . POWER OUTPUT: A full 25 watts at less than 5% distortion from either 117 volts A.C. or a 6-volt storage battery. RESPONSE: Within 2 db, 50-10,000 cycles. INPUTS for two mikes (2 meg.) gain 119 db, and one phono (1/2 meg.) gain 78 db. HIGH FREQUENCY ATTENUATOR range, 28 db. CIRCUIT FEATURES: multi-stage inverse feedback, resistance capacity coupling, phase correction for phono motor, 2000 volt oil buffer condenser. OUTPUT IMPEDANCES: 4, 8, 16 and 500 ohms to two octal speaker sockets and impedance selector. PHONOGRAPH MOTOR: Constant speed 78 R.P.M. PICKUP: Low pressure crystal. TUBES (7): 1-6SC7, 1-6SJ7, 1-6J5, 2-6L6, 2-6X5GT. POWER CONSUMPTION: 107 watts at 117 volts, 60 cycles A.C. Input 20.5 amps. including phono motor from 6-volt storage battery. FINISH: Two-tone gray hammertone baked enamel. PANEL: etched metal, illuminated. DIMENSIONS: (including cover) 8 3/4" x 14 1/8" x 10" high overall. SHIPPING WT: 30 lbs. List: (with tubes and power cables) \$169.50. Plug Kit, \$2.10.

E-25M Mobile Amplifier Unit only, with cover and tubes, less phono unit. Power consumption: 91 watts. Dimensions: 8 3/8" x 14 1/8" x 8" high. Shipping Wt: 27 lbs. List \$154.50. Plug Kit, \$2.10.

E-50 AMPLIFIER . . . The 50 watt leader in its price class. Multi-stage inverse feedback and push-pull paralleled 6L6 tubes assure low distortion. Two mikes may be mixed, or one mike and one phono. Impedance selector simplifies speaker matching.

SPECIFICATIONS, same as E-25 except as following: POWER OUTPUT: 50 watts at less than 5% distortion. Mike gain 122 db.; phono gain 81 db. OUTPUT IMPEDANCES: 4, 8, 16 and 250 ohms TUBES (6): 1-6SJ7, 1-6SC7, 1-6J5, 4-6L6G and 2-5Z4. DIMENSIONS: (including cover) 11 1/4" x 8 3/4" x 14 3/4". POWER CONSUMPTION: 170 watts at 117 volts; 60 cycles A.C. SHIPPING WT: 31 lbs. List: with tubes and cover, \$154.50. Plug Kit, \$2.10.

E - SERIES PORTABLE SYSTEMS

(All Prices and Specifications Subject to Change Without Notice.)

E-1010C . . . 10-watt basic port. system with 10" speaker, 25 ft. cable and plug; and 1 E-10 Amplifier. Mike and stand not included in price as requirements vary. Size: 12 1/4" x 15 3/4" x 8 3/4". Shp. Wt.: 25 lbs. List: \$99.95.

E-1712C . . . 17-watt dual 12" speaker port. system with 2 efficient speakers, each with 25 ft. cable and plug, and 1 E-17 amplifier. Mikes and stands not incl. Size: 12 1/8" x 17 1/4" x 13". Shp. Wt.: 48 lbs. List: \$163.00.

E-2512H . . . 25-watt basic port. system with two heavy duty 12" speakers, each with 25 ft. cable and plug and 1 E-25 amplifier. Mikes and stand not included. Size: 21 1/8" x 17 1/4" x 13". Shp. Wt.: 58 lbs. List: \$206.00.

E-2512C . . . 25-watt dual speaker basic port. system, similar to E-2512H, but with medium wt. speakers. Shp. Wt.: 49 lbs. List: \$183.60.

Newcomb AUDIO PRODUCTS COMPANY
6824 LEXINGTON AVENUE, HOLLYWOOD 38, CALIFORNIA

FOR BEST RESULTS SELECT

Masco manufactures a complete line of amplifiers and sound systems ranging in power output from 8 to 75 watts, including phono-top, mobile, high fidelity and musical instrument amplifiers and recorders, transcription players, school systems, plant broadcasting and intercommunication systems.

MA-8N 8-Watt Amplifier and MAS-8N 8-Watt Portable System

FEATURES: Microphone and phono input separately controlled • Bass-treble tone control • Hammertone-finish chassis • Light, compact and sturdy • U L Approved.

APPLICATION: Is the ideal unit for paging systems for bus and railroad stations and is recommended for side shows, auction rooms, sales meetings, small taverns and clubs.

MA-8N

AMPLIFIER SPECIFICATIONS MODEL MA-8N

POWER OUTPUT 8 Watts, Class A, at less than 5% distortion
PEAK POWER 13 watts
INPUTS Two: 1 microphone and 1 phono
FREQUENCY RESPONSE ± 2 DB 50 to 10,000 CPS
POWER GAIN Microphone 128.5 DB; Phono 75 DB
CONTROLS Three: Microphone, Phono, Tone (On-Off Switch)
TUBES 1-6SF5, 1-6SJ7, 1-6L6G, 1-5Y3GT (Rectifier)
OUTPUT IMPEDANCES 3, 2, 8 and 500 Ohms
HUM LEVEL 60 DB below output level of 8 Watts
POWER CONSUMPTION 75 watts at 117 volts
VOLTAGE 105-125 Volts 60 CPS
DIMENSIONS 10" x 6" x 7 1/2" high

PRICES List Price

MA-8N Amplifier (less cover, less tubes) \$47.75
Shipping Weight: 14 lbs.
Cover for MA-8N 4.50
Kit of Matched Tubes for MA-8N 7.25
Kit of Matched Plugs and Connectors 2.00
MAS-8N Portable System 110.45
Shipping Weight: 30 lbs.
Consists of: 1—MA-8N Amplifier with Cover (less tubes)
1—Jensen P10-S 10" PM Speaker, or equal
1—25 ft. Speaker, Cable and Plug
1—Model 303 Portable Carrying Case
1—Astatic JT-30 microphone with 12' cable and connectors.
(If microphone is not desired, deduct \$14.00 from above list price.)
(Note: If cover is not desired with system deduct from list price \$1.50.)

MAS-8N

MA-17N 17-Watt Amplifier

MAS-17N 17-Watt Portable System

FEATURES: Two microphone inputs • One phono input • Separate bass and treble tone controls • Tapped line and voice-coil impedances • U L Approved.

APPLICATION: Suitable for small orchestras, lecturers, ballyhoo, store demonstrations, night clubs and ballrooms.

AMPLIFIER SPECIFICATIONS, MODEL MA-17N

POWER OUTPUT 17 Watts, Class A, at less than 5% distortion
PEAK POWER 26 Watts
INPUTS Three: 2-microphone, 1-phono
FREQUENCY RESPONSE ± 2 DB 50 to 12,000 CPS
POWER GAIN Microphone, 132 DB; Phono, 78 DB
CONTROLS Five: 2-microphone, Phono, Bass, Treble, Separate Power On-Off Switch
TUBES 1-6SJ7, 1-6SL7GT, 1-6SC7, 2-6L6G, 1-5V4G (rectifier)
OUTPUT IMPEDANCES 4, 8, 15, 125, 250, 500 Ohms
HUM LEVEL 62 DB below output level of 17 Watts
POWER CONSUMPTION 125 Watts at 117 Volts
VOLTAGE 105-125 Volts, 60 CPS
DIMENSIONS 13" x 8" x 8 3/8" high

MAS-17N

PRICES

MA-17N Amplifier (Less Tubes) \$75.75
Shipping Weight: 45 lbs.
Kit of Matched Tubes for MA-17N 14.25
Kit of Matched Plugs and Connectors 2.95
MAS-17N Portable System 170.65
Shipping Weight: 47 lbs.

Consists of: 1—MA-17N Amplifier (less tubes)
2—Jensen P10-S 10" PM Speakers, or equal
2—25 ft. Speaker Cables and Plugs
1—Model 304 Portable Carrying Case
1—Astatic JT-30 microphone with 12' cable and connectors.
(If microphone is not desired, deduct \$14.00 from above list price.)

MODEL MA-17PN. Same Specifications as MA-17N but includes phono-top (less tubes) (chassis size 11" x 11" x 8 3/8" high) \$105.25
Shipping Weight: 28 lbs.
Kit of Matched Tubes 14.25
Kit of Plugs and Connectors 1.90

MA-17PN

These amplifiers may be obtained with low impedance microphone input. Add \$29.95 list per input.

MA-50N 50-WATT AMPLIFIER

FEATURES: Five input channels • Four microphone and one phono input • Individual bass and treble equalizers • Fifty watts of undistorted power • Negative feedback • Fully fused • U/L Approved.

APPLICATION: MA-50N has multi-tapped line and voice-coil impedances to match any speaker, or speaker groups and lines. Suitable for rack mounting for larger auditoriums, theatre re-inforcement, indoor and outdoor rinks, stadia, wherever numerous speakers are required. Excellent for church chime applications.

With suitable speakers and horns, the power can be concentrated where needed at points of high noise level, as at the starting line of an auto race, or in steel mills. Other speaker arrangements permit uniform coverage of large areas, such as football fields or circuses. Ideal as the basic unit for paging and fire-alarm systems in hotels.

Models MA-25NR and MA-50NR are respectively 25- and 50-watt remote control amplifiers which follow closely all specifications of above models, but have, in addition, built-in circuits for remote control of two of the microphone channels when used with Model RCB Remote Control Box.

These amplifiers may be obtained with low impedance microphone input. Add \$29.95 list per input.

MASCO MOBILE AMPLIFIERS

6-VOLT DC AND 117-VOLT AC

The only complete line of U/L Approved Mobile Equipment. Available in 7 different models.

MC-10 10-WATT MOBILE AMPLIFIER

FEATURES: Two inputs, microphone and phone • Push-pull output • Low battery drain • Separate microphone and phono control • U. L. Approved.
APPLICATION: The MC-10 is a compact Mobile Amplifier built expressly for operation in police safety and traffic work, transportation systems, ambulance service, fire departments and other emergency work. Universal mounting; it fits under the dashboard. Metal casing is finished in a two-tone gray and blue Hammettone.

MODEL RCM REMOTE CONTROL FOR MODEL MC-10

Clamps to steering-post of car, handy to the driver. By plugging the RCM unit into amplifier, it permits within-reach adjustment of controls, simplifying operation while driving. Individual control of the microphone and phono channels is provided.

25-WATT MOBILE AMPLIFIERS

FEATURES: Battery-saver stand-by switch • Low battery drain • Double-fused circuit • Hum- and ripple-free operation • Heavy-duty dual vibrator • Low-pressure pick-up • Push-pull output • U. L. Approved.

Built by the company which originated the Mobile Unit, the new Model MC-25PN is an outstanding achievement in this field. It operates as efficiently from 6-volt batteries as from the 117-volt a-c supply. It is a rugged, powerful phono top amplifier expressly designed for sound truck and outdoor applications. The battery-saver switch, which shuts off the vibrator during intermissions, reduces battery drain to a minimum. The extra-heavy-duty dual vibrator maintains steady voltage and frequency. The amplifier is provided with separate cables fitted with rugged heavy-duty plugs and receptacles, for each voltage supply.

The MAC-25PN Mobile Portable System is ideally suited for picnics and barbecues, outdoor gatherings, bathing beaches, traveling road shows, open-air theatres, and other locations where a-c power is unavailable.

The Model MCO-25PN outdoor mobile system is ideal for sound trucks and all other mobile applications. It is used in election campaigns and charity drives, by traveling evangelists, for outdoor classes, camp meetings, beach patrol, and police and fire-department rescue work.

FOR BEST RESULTS SELECT

School System Amplifier

FEATURES: 28-watt amplifier • Two-way conversation • Simultaneous or selective paging • Provides for up to 24 rooms • External phono provision • Volume-level indicator • Input selector switch • External microphone provision • Provision for radio input • U/L Approved.

APPLICATION: May be used with up to 24 rooms. It assures ample power for each speaker, and ample gain is provided for external microphone and phonograph pick-up. Speaker switches are connected for group or selective paging. A master switch permits simultaneous paging. Calls may originate from any room. Separate volume controls for level adjustment of incoming and outgoing calls, and a Volume-Level indicator are incorporated.

Invaluable aid to the efficiency of an educational institution. Announcements of general interest, time signals, and other notices may be given to all at once. Control of fire drills or other emergencies is facilitated. The two-way conversation feature permits easy communication. Provision is made for connecting an external phonograph to the system, which enables the distribution of music. Any standard radio may be adjusted for use with this system. Many of these advantages apply with equal force to hospitals, institutions, clubs, hotels, and passenger ships.

SPECIFICATIONS:

POWER OUTPUT.....28 Watts, Class AB-1 at less than 5% distortion
 PEAK POWER.....10 Watts
 INPUTS.....External microphone, phono and radio provision. Built-in intercommunication speaker
 FREQUENCY RESPONSE.....2 DB 50 to 15,000 CPS
 POWER GAIN.....Microphone 130 DB; Phono 85 DB
 CONTROLS.....Separate incoming and outgoing volume controls. Function selector switch. "Talk-Listen" switch. Master call switch. Station selector switches. Power on-off switch. Eye level control.

TUBES.....1-6NC7, 1-6SL7GT, 1-6SN7GT, 2-6L6G, 1-6U5, 1-5Y4G (rectifier)
 OUTPUT IMPEDANCES.....80 ohm balanced line, constant voltage output
 HUM LEVEL.....64 DB below output level of 28 watts
 POWER CONSUMPTION.....115 Watts at 117 Volts
 VOLTAGE.....105-125 Volts, 60 CPS
 CABINET.....Metal, finished in brown Hammertone
 DIMENSIONS.....16" x 9 1/2" x 13" high

MODEL
JR
REMOTE

FEATURES: Master Station equipped with Volume Control with an off switch • Separate "press to talk" switch • Remote Station has "press to talk" switch to originate call to master station if desired and allow for privacy • Remote Station can be used for two-way conversation without manual operation • Natural Voice reproduction • Ample Sensitivity • Matching Master and Remote Stations • Unbreakable Cast-aluminum housings • Finished in attractive Walnut Hammertone • U/L Approved.

SPECIFICATIONS FOR IM-5, JM-5 & JMR MASTER:

VOLTAGE.....117 Volts AC or DC
 POWER OUTPUT.....2.5 Watts
 POWER CONSUMPTION.....30 Watts
 TUBES.....14F7 Dual Voltage Amplifier
 50L6 Beam Power Amplifier
 50Y6 Rectifier
 SPEAKER.....4" ALNICO V. Magnet 13 ohm voice coil used in Master and Remotes
 DIMENSIONS.....L 6 5/8", W 7 1/8", H 5 1/4"
 SHIPPING WEIGHT.....JM-5, 6 lbs.; JR, 3 1/4 lbs.
 IM-5, 6 lbs.; JMR System, 9 1/4 lbs.

	List Price
MODEL JMR—Two-station system. One master with tubes, one remote, and 50-ft. cable.....	\$42.50
MODEL JM5—Master, with tubes. Communication between it and 5 remote stations; master can converse with all 5 stations or can select any one remote station. Master has press-to-talk and station selector switch and volume control with on-off switch.....	37.50
MODEL JR—Remote. "Press-to-talk" switch allows remote to originate call to JM5 Master, permitting privacy. JR can be used as two-way paging system. Use of switch may be omitted.....	12.50
3-Wire Vinylite covered cable.....	per foot .05
MODEL IM-5—All master, with tubes. Communication between it and 5 other masters. Each master can converse two-way with any or all masters in system. Has press-to-talk and station selector switches and volume control with on-off switch.....	37.50
7-Conductor cable.....	per foot .25
5-Conductor cable.....	per foot .20

THORDARSON AMPLIFIERS

THORDARSON 8 WATT AMPLIFIER — T-31W08

This amplifier combines maximum performance with minimum size. It is ideal for ballyhoo installations, carnivals, or inter-phone applications. The quality is such that it may be used for reproduction of the finest records. Individual controls for phono and microphone provide electronic mixing. The treble attenuation tone control has sufficiently smooth operation for satisfactory elimination of needle scratch or objectionable highs; or with the control in a normal position the highest treble tone can be clearly reproduced.

POWER OUTPUT—8 Watts (+31.25 Db) at less than 9% distortion.
TWO INPUT CIRCUITS—

One high impedance microphone channel—115 Db gain (based on 100,000 ohms input impedance).
One high impedance phono channel—72 Db gain (based on 100,000 ohms input impedance).

All input circuits may be mixed.
Low impedance microphone input optional at slight additional cost (50, 250, or 500 ohms).

IMPROVED TONE CONTROL—(high frequency attenuator type). Maximum position attenuated 1,000 C.P.S. 4 Db, 5,000 C.P.S. 17 Db, 10,000 C.P.S. 22 Db.

FREQUENCY RESPONSE—Flat within 1 Db from 50 to 10,000 C.P.S.
CHASSIS TYPE CONSTRUCTION—Attractive three-tone control panel.

INVERSE FEED-BACK CIRCUIT.
OUTPUT IMPEDANCES—4, 8, 15, 250, 500 ohms—all available at an 8-prong receptacle.

HUM LEVEL—60 Db below rated output.

TUBES—1-6J7; 1-6SJ7; 1-6L6; 1-5Y3.

DIMENSIONS—10" x 6" x 7½" high.

POWER CONSUMPTION—70 watts, 110-120 volts, 50-60 cycle (other primary voltages on special order).

(WEIGHT NET—14½ pounds; shipping 16 pounds.)

THORDARSON 25 WATT AMPLIFIER — T-31W25AX

Sufficient undistorted power is available from this unit for large auditorium or night club installations. Two low level inputs and one high level input will allow the use of two microphones with low impedances or high impedances to be satisfactorily mixed with a phono input for musical background. The attractive front panel is supplied with three gain controls and two tone controls. The tone controls provide individual bass or treble attenuation to eliminate undesirable highs in recordings or undesirable lows for crisp speech output. When the tone controls are in the normal position—Tru-Fidelity output is available.

POWER OUTPUT—25 watts (+36.2 Db) at less than 3% distortion.

THREE-INPUT CIRCUITS—

Two high-impedance microphone channels—116 Db gain (based on 100,000 ohms input impedance).

One high impedance phono channel—72 Db gain (based on 100,000 ohms input impedance).

Low impedance microphone input optional at slight additional cost (50, 250, 500 ohms).

All input circuits may be mixed.

IMPROVED TONE CONTROLS (Treble and bass attenuators).

Maximum attenuation positions.

Bass—50 C.P.S.—20 Db, 100 C.P.S.—12 Db.

Treble—1,000 C.P.S.—4 Db, 5,000 C.P.S.—15 Db, 10,000 C.P.S.—

23 Db.

FREQUENCY RESPONSE—Flat within 1 Db from 30 to 15,000 C.P.S.

FULLY ENCLOSED CONSTRUCTION—All steel streamlined cabinet—Attractive three-tone control panel.

MULTIPLE INVERSE FEED-BACK CIRCUIT.

OUTPUT IMPEDANCES—4, 8, 15, 250, 500 ohms—all available at 8-prong receptacles, selected by means of a switch.

HUM LEVEL—65 Db below rated output.

TUBES—2-6J7; 1-6SJ7; 1-6N7; 2-6L6; 1-5X4G

DIMENSIONS—15½" x 10" x 9" high.

POWER CONSUMPTION—137 watts—110-120 volts, 50-60 cycles (other primary voltages on special order).

WEIGHT NET—28 pounds; shipping 32 pounds.

THORDARSON 50 WATT AMPLIFIER — T-31W50AX

This amplifier employs 4-Beam Power tubes; is conservatively rated at 50 watts and will supply over 65 watts of peak power. The unit is ideal for large stadium or roller-rink applications. The three low-level microphone and two high-level phono inputs will satisfactorily handle the most elaborate mixing applications. Dual tone controls will attenuate individually either the bass or treble or individually boost the bass or treble. Either low or high impedance inputs may be accommodated. The range of output impedances provided will accommodate multiple speaker applications.

POWER OUTPUT—50 Watts (+39.6 Db) at less than 5% distortion.

FIVE INPUT CIRCUITS—

Three input microphone channels—115 Db gain (based on 100,000 ohms input impedance).

Two phono fader inputs—75 Db gain (based on 100,000 ohms input impedance).

Low impedance microphone input optional at slight additional cost (50, 250, 500 ohms).

TWO TONE CONTROLS—

One bass control providing a bass boost of 9½ Db at 80 C.P.S. to a bass attenuation of 25 Db at 80 C.P.S.

One treble control providing a boost of 11½ Db at 8,000 C.P.S. to an attenuation of 25 Db at 8,000 C.P.S.

Nine extreme individual response curves available with the two tone controls.

FREQUENCY RESPONSE—Flat within 1 Db from 30 to 15,000.

CHASSIS TYPE CONSTRUCTION—All-steel streamlined cabinet—attractive three-tone control panel.

INVERSE FEED-BACK CIRCUIT.

OUTPUT IMPEDANCES—4, 6, 8, 15, 125, 250 and 500 ohms—selected by means of a selector switch.

HUM LEVEL—70 Db below rated output.

TUBES—2-5X4; 1-6X5; 4-6L6; 1-6V6; 3-6J7; 1-6SJ7; 1-6J5.

DIMENSIONS—17" x 11¾" x 8¾" high.

POWER CONSUMPTION—250 Watts at 110-120 volts, 50-60 cycles (other primary voltages on special order).

WEIGHT NET—44 pounds; shipping 50 pounds.

 **TRANSFORMER SPECIALISTS SINCE 1895 THORDARSON**

THORDARSON AMPLIFIERS

T-31W26A PRE-AMPLIFIER

This pre-amplifier, booster combination unit is exactly like the T-31W25AX amplifier but is constructed for rack and panel mounting. As both voice coil and line impedances are available, this unit may be used as a source of power and an exciter for T-31W27 booster amplifiers. If the unit is used only as a pre-amplifier a 500-ohm secondary must be loaded with a 500-ohm, 50-watt resistor. An unlimited amount of booster amplifiers may be connected in parallel across the output of this unit. Low impedance inputs are available and for further technical data see those accompanying the T-31W25AX.

This combination unit will satisfy the requirements for permanent installations. In addition to being used as a mixer, it will also deliver 25 watts of undistorted output for speaker installations in the vicinity of the pre-amplifier.

DIMENSIONS—19" x 8 $\frac{3}{4}$ " x 10 $\frac{3}{4}$ " behind back of panel,

WEIGHT NET—28 pounds; shipping 32 pounds.

T-31W10AX TRU-FIDELITY PHONO-AMPLIFIER

Unique in design the Thordarson 10 Watt Phono Amplifier combines versatility of application with Tru-Fidelity performance. Both microphone and phono input channels allow the 31W10AX to be used in conjunction with the High-Fidelity Meissner AM-FM Tuner and other tuners of comparable performance; as a speech amplifier in amateur transmitters; or as the amplifier section in a recording set-up. Little is left to be desired in naturalness and brilliance of tone.

Separate bass and treble controls with both boost and attenuation action assure complete adaptation of the output to all acoustical conditions, plus the pleasure of listening to music the way it is desired to be heard. Production cost is lowered by the mounting of this unit on a simple chassis inasmuch as the amplifier is usually installed in cabinet, no cover is required.

T-31W10AX Specifications

POWER OUTPUT—10 Watts at less than 5% distortion (50 to 10,000 cycles).

TWO INPUT CIRCUITS—

One high impedance microphone channel—107 Db gain (based on 100,000 ohms input impedance).

One high impedance phono channel—71 Db gain (based on 100,000 ohms input impedance).

TWO TONE CONTROLS—

One bass control providing a bass boost of 12 Db at 80 C.P.S. to a bass attenuation of 13 Db at 80 C.P.S.

One treble control providing a treble boost of 12 Db at 8000 C.P.S. to an attenuation of 18 Db at 8000 C.P.S.

FREQUENCY RESPONSE—Flat within 1 Db from 40 to 15,000 C.P.S.

CHASSIS TYPE CONSTRUCTION—Attractive three-tone control panel.

INVERSE FEED-BACK CIRCUIT

OUTPUT IMPEDANCES—4, 8, 15, 125, 250, 500 ohms—all available at an eight-prong receptacle.

HUM LEVEL—60 Db below maximum rated output.

TUBES—1-6J7; 1-6SJ7; 1-6J5; 1-6SN7; 2-6B4; 1-5U4G.

DIMENSIONS—14" x 8" x 7 $\frac{1}{2}$ " high.

POWER CONSUMPTION—117 Watts full signals—110-120 volts, 50-60 cycles (other primary voltages available on special order).

WEIGHT NET—19 pounds; shipping 22 pounds.

T-31W20AX 20 WATT MOBILE AMPLIFIER

Conservatively-rated, this universal mobile amplifier furnishes sufficient undistorted power for sound truck, picnic, carnival and similar installations that require the versatility of 6 volts D.C. volts and 115 volts A.C. operation.

The electric turntable and pick-up mounted on top of the amplifier operates practically in any position, whether tilted vertically or horizontally. Shock-mounted for smooth operation over rough terrain,

it is truly versatile. With all connections on the back of the chassis, simplification of hook-up is provided, leaving trimness of style for the front panel.

Treble attenuation tone compensation makes allowance for correcting to acoustical conditions and reducing record scratch. Mixing procedure is completely controlled with the coupled phono and microphone input channels.

T-31W20AX Specifications

POWER OUTPUT—20 Watts at less than 6% distortion (50 to 10,000 cycles).

TWO INPUT CIRCUITS—

One high impedance microphone channel—110 Db gain (based on 100,000 ohms input impedance).

One high impedance phono channel—72 Db gain (based on 100,000 ohms input impedance).

Both input circuits may be mixed.

FREQUENCY RESPONSE—Flat within 1 Db from 40 to 15,000 C.P.S.

IMPROVED TONE CONTROL—(high frequency attenuator type). Maximum position attenuated 1,000 C.P.S. 1 Db; 5,000 C.P.S. 10 Db; 10,000 C.P.S. 16 Db.

FULLY ENCLOSED CONSTRUCTION—Trim light grey wrinkle cabinet with three-tone control panel.

CRYSTAL PICK-UP—Specially-designed pick-up arm. Spring-action holds arm in place.

INVERSE FEED-BACK CIRCUIT.

OUTPUT IMPEDANCES—4, 8, 15, 125, 250, 500 ohms—all available at two 8-prong receptacles, selected with switch.

HUM LEVEL—66 Db below maximum rated output.

TUBES—1-6J7; 1-6SJ7; 1-6N7; 2-6L6; 2-6X5.

DIMENSIONS—15 $\frac{1}{2}$ " x 10" x 11" high.

POWER CONSUMPTION—140 Watts full signal—110-120 volts, 50-60 cycles; 6 volts D.C. 23 Amp. (6 volts standby current—5.15 Amps.).

WEIGHT NET—34 $\frac{1}{2}$ pounds; shipping 39 pounds.

T-31K09 COVER

A trim grey wrinkle finish cover, perforated for complete ventilation; for use on the T-31W08 amplifier.

TRANSFORMER SPECIALISTS SINCE 1895 THORDARSON

ADAPTOL COMPANY

MANUFACTURERS OF RADIO ELECTRONIC PRODUCTS

ADAPTOL MINIATURE AM SUPERHET TUNER—540 to 1700 KC.

HUNDREDS OF USEFUL APPLICATIONS:

1. With guitar amplifiers
2. Public address systems
3. Custom-built amplifiers
4. Amplified record players
5. Wire recorders
6. Tape recorders
7. Motion picture sound projectors

MODEL CT-1

List, complete with tubes.....\$20.00

CIRCUIT FEATURES:

1. 3 tube AM superhet tuner (540-1700 KC) with self contained power supply.
2. Uses 12BE6 dual purpose oscillator and mixer, 12SF7 high gain I.F. stage, diode detector and A.V.C., 50B5 rectifier.
3. Permeability tuned drift-free I.F.'s.
4. Approximately .5 volt audio output across internal .5 megohm internal load resistor on average B.C. signal with five foot antenna.
5. Individually tracked at FOUR POINTS thru tuning range of 540-1700 KC.
6. Compact: 4 1/2" x 3 1/2" x 3 3/4".
7. Floating chassis.
8. 5 ft. antenna, output cable, line cord connection.
9. For 110 Volts AC-DC.

• ADAPTOL HI-FIDELITY AMPLIFIER •

FEATURES:

1. Exceptional quality high gain 3 tube AC-DC amplifier.
2. Inverse feed back.
3. Good high and bass response.
4. On-off switch volume control.
5. Variable tone control.
6. Permits boosting high's to three times normal flat response.
7. Tubes used—12SQ7, 50L6, 35Z5.
8. Size: 5" x 3 1/2" x 7".

MODEL AM-3

List, complete with tubes.....\$11.95

ADAPTOL COMPANY

MANUFACTURERS OF RADIO ELECTRONIC PRODUCTS

ADAPTOL PHONO AMPLIFIER

MODEL AM-2

List, complete with tubes
\$8.50

FEATURES :

1. Compact, quality 2 tube AC-DC amplifier specially designed for limited space.
2. Good fidelity.
3. On-off switch, volume control.
4. Tubes used—50B5, 35W4.
5. Size: 4 1/2" x 2" x 3".

ADAPTOL 2-TUBE WIRELESS PHONO OSCILLATOR

Permits playing of records thru any radio without any wired connection between radio and record player.

FEATURES :

1. Acts as a miniature broadcasting station playing records thru any radio up to 75 feet away without any wire connections.
2. Can be used with automatic record changer or single record player.
3. Has leads for connecting phono motor, phono pickup.
4. 5 Ft. antenna.
5. Strong signal, good frequency stability.
6. Tunes from 1100 to 1700 KC.
7. Tubes used—50B5, 35W4.
8. Open chassis, ideal for mfg. purposes.
9. Size: 4" x 2" x 4".
10. For 110 Volts AC-DC.

MODEL MF-2

List, complete with tubes.....\$7.95

ADAPTOL 1-TUBE WIRELESS PHONO OSCILLATOR

Operation identical to Model MF-2 as above. NO WIRES TO CONNECT!

MODEL OS-1

List, complete with tube....\$9.75

FEATURES :

1. One tube closed chassis, excellent for external application.
2. Can be used with any radio and record player.
3. 5 Ft. antenna, line cord with plug.
4. Tunes from 1100 to 1700 KC.
5. Tube used—117L7.
6. Size: 4 1/2" x 2" x 4 1/4".

TALK-A-PHONE

The World's Most Complete Line of
INTER-COMMUNICATION
Has Everything

"Elsie"
(LC-2)
"Has Everything"
**TWO-STATION
INTER-
COMMUNICATION
SYSTEM**

Complete with tubes, easy to follow instructions and 50 ft of cable.
List Price each system complete

\$39⁹⁵

"Take It Easy—Tell It to 'Elsie'"

- "Elsie" carries messages with the speed of sound.
- An eager little helper that gives and gets information quicker than you can say "scat."
- Always ready to serve you instantly.
- Works willingly for a fraction of a cent a day.

- Simple to install — As easy as hanging a picture.
- "Elsie's" house is a handsome Bakelite cabinet of walnut hue, streamlined with that stunning "new look."
- Guaranteed by the makers of the world's most complete and highly perfected line of inter-communication.

The ideal communication system for the home. Saves thousands of steps and saves time — keeps you tuned in on baby's every move in the nursery through the "Supervisory Feature." No more getting up and down to see if baby is all right. You can rest at ease with "Elsie" on the job. Designed also for use in the farm, in professional offices, stores, and other commercial and private applications. Affords private or supervisory use. Supervisory use carries every sound to Master even though originating as far as forty feet from Sub-Station. When connected privately, Master cannot listen in on Sub-Station and

by the TALK-A-PHONE "Silent Feature," shuts out at the Master Station all sounds originating at the Sub-Station, yet permits the Sub-Station to originate calls. The volume can be adjusted from a whisper to full room volume. System consists of one Master unit, a Sub-Station and fifty feet of cable, with tube and instructions. Additional cable may be obtained in lengths up to 2,000 feet. Operates Universally on 110-115 AC-DC. The Sub-Station does not consume current and can be installed most anywhere. Cabinets measure 8 1/4" x 6 1/4" x 7 1/2". Weight packed, 9 lbs.

LM-5; LM-10 MASTER SELECTIVE SYSTEMS

Consists of one Master Unit which can be connected with one or more (up to ten) Sub-Stations. The Master Station can talk "privately" to any one of the Sub-Stations or to all at one time. Sub-Stations can be connected "privately" or "non-privately". Has the TALK-A-PHONE "Silent Feature". Sub-Stations, whether connected "privately" or "non-privately", can originate calls to the Master Station. The Sub-Stations can be at considerable distances from the Master unit. Once a conversation has been initiated, with a "non-private" system, persons at Sub-Station locations need operate no control and can reply from a distance. The Sub-Stations do not consume electric current and can be installed most anywhere. Cabinets measure 8 1/4" x 6 1/4" x 7 1/2". Weight packed — Master, 8 lbs., Sub-Stations, 5 lbs. Master Station operates universally on 110-115 volts, AC-DC.

Ordering LM-5; LM-10 Master Selective Systems

- MODEL LM-5** Master Selective Station for five Sub-Stations, complete with tubes and easy-to-follow instructions. List Price ea. \$38.00
- MODEL LM-10** Master Selective Station for ten Sub-Stations, complete with tubes and easy-to-follow instructions. List Price ea. \$51.00
- MODEL LR-3** Sub-Station unit for LM-5 or LM-10 Master Station. List Price ea. \$12.75

No. 5303 (three-conductor) Cable. For use between each LR3 Sub-Station and the LM-5 or LM-10 Master unit. List Price per foot 5c

LS-5; LS-10 SUPER SELECTIVE SYSTEMS

Consists of all Master units. Extreme flexibility of inter-communication whereby any station in the system can call any other and carry on a two-way conversation. You can begin with two Masters and add up to a total of five in the case of the LS-5 units, or up to a total of ten in the case of the LS-10 units. As many as five private two-way conversations can be held at the same time with ten LS-10 Masters. Two private two-way conversations can be accommodated at the same time with the LS-5 system. All Master Stations are private. Stations cannot listen in on each other, nor can a third unit listen in on a conversation of two others. Variable volume, adjustable at each unit, provides for the incoming voice to be adjusted from a bare whisper to full volume that can be heard easily at a considerable distance. Stations can be located even 1000 or 2000 feet apart. Six-conductor cable providing for a total of five units is used with the LS-5 system and is run from the first unit to the second only, from the second to the third only, etc., until the last unit in the system is reached. Similarly, an eleven-conductor cable, providing for a total of ten units, is used for inter-connecting the LS-10 system. It is not necessary to run cable between the first and last units in the system. Cabinets measure 8 1/4" x 6 1/4" x 7 1/2". Weight packed, 8 lbs. Operates Universally on 110-115 volts, AC-DC.

Ordering LS-5; LS-10 Super Selective Systems

- MODEL LS-5** Super Selective unit for five stations, complete with tubes and easy-to-follow instructions. List Price ea. \$38.00
- MODEL LS-10** Super Selective unit for ten stations, complete with tubes and easy-to-follow instructions. List Price ea. \$51.00
- No. 5506** (six-conductor) Cable. For inter-connecting LS-5 units as outlined above. List Price per foot 17c
- No. 9911** (eleven-conductor) Cable. For inter-connecting LS-10 units as outlined above. List Price per foot 34c

CHICAGO **TALK-A-PHONE CO.** ILLINOIS

TALK-A-PHONE

"Chief Forty Niner"
DOES EVERYTHING—HAS EVERYTHING
THE FINEST IN INTER-COMMUNICATION

Work faster, more efficiently, more economically — use the "Chief Forty-Niner." Eliminate "getting up and down," "going through" a busy switchboard, "waiting" to see your man. Touch of button gives you instant and direct two-way communication with sales, engineering, stockroom, shipping — without anyone leaving work. Direct that non-productive effort into productive results — add 20% to your day.

ONE MODEL DOES EVERYTHING

The SAME UNIT may be used for EVERY TYPE OF APPLICATION, whether it be as all Master Stations, or a Master and Staff Stations, or a number of Masters inter-mixed with Staff Stations. The Master Stations may talk with any other Master in the system as well as with all Staff Stations. Six, twelve, twenty, and thirty capacity Master Stations can be used within the same system. The Staff Station may answer the Master Station and originate calls, to one, two or six Master Stations, depending on its capacity. Staff Stations are not connected to electrical outlet. Staff Stations converse with Master Stations only.

Only TALK-A-PHONE, through its exclusive DIFFERENTIAL STAFF feature, permits any Staff Station to be used as either "private" or "non-private," and also permits some Staff Stations to be "private" and others "non-private" in the same system. "Private" Staff Stations have COMPLETE PRIVACY and no other station can listen in. "Non-private" Staff Stations can answer FROM A DISTANCE up to 50 feet from the unit WITHOUT LEAVING WORK. Volume individually controlled at each station — Staff as well as Master — from whisper to full room power. All Master and Staff Stations are assured of privacy, except where by choice, Staff Stations are designated as "non-private."

BEAUTIFULLY STYLED: The Bakelite walnut cabinet of the "CHIEF FORTY-NINER" is unsurpassed in simplicity of design and appearance.

TRANSLUCENT LIGHTING further enhances its beauty as well as indicating whether the unit is "on" or "off."

MULTI-MATIC SELECTOR: A patented exclusive TALK-A-PHONE feature. Twelve, twenty, thirty station capacity in SAME BEAUTIFUL CABINET with only TWELVE PUSH BUTTONS. Six-station Master has six push buttons.

HOLD-A-MATIC CONFERENCE CONTROL: TALK-A-PHONE "HOLD-A-MATIC" feature ALLOWS CONFERENCE between THREE or a GROUP of STATIONS by merely selecting desired buttons.

UNI-TRANS: Gives you "DICTATION CONTROL."

VOICE RANGE POWER: The powerful, rugged amplifier gives you amazing, brilliant "voice range" power. Stations may be up to 3000 feet apart.

DEPENDABILITY: PROVED IN BILLIONS OF HOURS OF ACTUAL USE.

PRIVACY EARPHONE: Optional equipment on Master Stations. Provides listening privacy; and conversation with other Masters without continuous operation of touch bar.

POWER PAGING: Optional Booster for high power paging. May be added at any time.

UNIVERSAL UNFAILING OPERATION: Designed to withstand continuous day and night use. Operates anywhere on 110-120 volts, alternating current, 60, 50, 40 and 25 cycles; and 110-120 volts, direct current, at a cost of but a fraction of a cent a day.

UNDERWRITERS' LABORATORIES APPROVED!

COMPLETE PACKAGE UNIT: The "CHIEF FORTY-NINER" is complete with junction box — ready to plug in. Easy-to-follow instructions permit "anybody" to install TALK-A-PHONE.

All Master Stations and C-46 Staff Stations — 12" W x 9" D x 7" H.
C-41 and C-42 Staff Stations — 8 1/4" W x 7 1/2" D x 6 1/4" H.

C-4906 Push button Master for six-station capacity, complete with tubes, junction box, and easy-to-follow instructions. Wt. 13 lbs. **List Price ea. \$72.50**
6212 CABLE — For inter-connecting C-4906. **List Price per foot 30c**

C-4912 Push button Master for twelve-station capacity, complete with tubes, junction box, and easy-to-follow instructions. Wt. 13 lbs. **List Price ea. \$89.50**

C-4912X Same as C-4912 except equipped with privacy earphone. Wt. 13 lbs. **List Price ea. \$109.50**

6224 CABLE — For inter-connecting C-4912; C-4920; and C-4930. **List Price per foot 60c**

C-41 Staff Station for origination of call to one Master. Wt. 5 lbs. **List Price ea. \$18.70**

6204 CABLE — For connecting C-41 Staff Station. **List Price per foot 10c**

C-42 Staff Station for origination of calls to two Masters. Wt. 5 lbs. **List Price ea. \$28.00**

C-46 Push button Staff Station for origination of calls to six Masters. Wt. 9 lbs. **List Price ea. \$51.00**

6004 CABLE — For connecting C-42 and C-46. **List Price per foot 16c**

Master Stations also available for twenty and thirty station capacities. Write for full details.

HOW TO DETERMINE CABLE REQUIREMENTS: To interconnect Master Stations, measure from first Master to second Master only, from second to third Master only, etc., and total. For C-4920 use two lengths of 6224 Cable, and for C-4930 use three lengths of 6224 Cable. To connect C-41 Staff Station, measure from Staff Station to the one Master to which Staff Station originates calls. To connect C-42 and C-46 Staff Stations, measure a separate length of cable from Staff Station to each Master Station to which Staff Station originates calls (for each C-42 or C-46, follow same procedure).

Manufactured under exclusive TALK-A-PHONE Patents. Licensed under U. S. Patents of A. T. & T. Co. and Western Electric Co. Inc.

Callmaster INTERCOMS

LYMAN ELECTRONIC CORPORATION

ONLY

Callmaster
ELECTRONIC INTERCOMS

have ALL these features:

- * Rugged shock proof cabinet of molded Phenolic plastic. High lustre mahogany finish.
- * High gain circuit producing 2 watts power output — full volume control.
- * Pilot light — paging switch, 3 standard General Electric radio tubes.
- * Compact—uses less desk space than a telephone—7" x 5½" x 3½".

Model CM-20

- * Attractive design — real eye appeal rivaling highest priced models of other makes.
- * Simplicity of installation — no shielded wires—no technical knowledge required.
- * Designed for continuous trouble free operation—constructed of best materials—full RMA guarantee.

* PRICE: LOWEST IN THE ENTIRE FIELD—COMPARE!

Available as follows:

CM-10

A kit comprising a master and sub-station with 50 feet connecting wire — complete in packaged form — both cabinets same as above except no selector switch. Designed for operation to one sub-station only — privacy switch on sub-station.

CM-20

Master station only (illustrated) — has station selector switch so that up to six sub-stations may be connected — all subs may be paged at once. Subs may call master at any time, but cannot "eavesdrop". Subs cannot call each other.

CM-30

Same in appearance as CM-20 but designed for master to master operation. Up to 7 CM-30's can be used in one system. Any station can talk with any other station or it may page all other stations at one time. Up to three separate conversations may be carried on simultaneously. Not designed for use with sub-stations.

LUXURIOUS WALNUT CABINETS

SIMPLIFIED INSTALLATION

DeLuxe Communicator for 1 to 5 Sub Stations

MASTER STATION MSS

SUB STATION SS5

Here is CONVERSAFONE'S deluxe high efficiency intercom, featuring 5 SELECTOR PUSHBUTTONS and housed in an attractive cabinet of CHOICE WALNUT WOODS. A high gain, high quality amplifier produces over TWO WATTS of clear natural audio. The SILENT FEATURE eliminates unwanted sub-station hub-bub. Sub-stations are equipped with CALL IN SWITCH to originate calls. Tubes used: 2-12SJ7, 1-50L6, 1-35Z5. NOTE: Use 3-wire cable to connect each sub-station to the master station.

List Price Master Station Model MS5.....\$37.50
List Price Sub-Station Model SS5..... 11.95

1 to 3 SUB STATIONS

MASTER STATION MS3

SUB STATION SS3

Conversafone presents a LOW COST Communicator designed specifically for the "SMALL INSTALLATION". STURDY CONSTRUCTION, POWERFUL AMPLIFIER, and COMPACT SIZE make this model ideal for stores, garages, homes, farms, and small business organizations. A 4-POSITION ROTARY SWITCH selects any of the sub-stations, or the SILENT POSITION. When in silent position, the sub-stations may ORIGINATE CALLS to the Master Station. A compact unit, smartly styled in a handsome walnut cabinet, and built to give dependable, efficient service. NOTE: Use 3-wire cable to connect each sub-station to Master Station. Tubes used: 1-12SL7, 1-50L6, 1-35Z5.

List Price Master Station Model MS3.....\$29.95
List Price Sub-Station Model SS3..... 11.95

4-STATION MASTER TO MASTER

A low priced Master to Master set, using the same HIGH QUALITY AMPLIFIER and SMARTLY STYLED CABINET as model MS3. Up to four stations may be connected in the system and conversations held between any stations. NOTE: Use cable with one more wire than number of stations used.

List Price Master Station Model MM4.....\$32.50

SIX STATION MASTER TO MASTER

This model has the same high efficiency of performance and SMART STYLING as Model MS5 but is for use in an all-master system. Conversations may be held between any stations in the system. NOTE: Use cable having one more wire than number of stations used.

List Price Master Station Model MM5.....\$39.95

2-WAY, PERSON TO PERSON

MODEL MS1

MODEL SS1

The unbeatable answer to the tremendous demand for a LOW PRICED, COMPACT, EFFICIENT and ATTRACTIVE 2-WAY COMMUNICATOR. An ideal system for use between BABY'S ROOM AND BEDROOM. The high gain amplifier, VOLUME CONTROL, and attractive cabinet leave nothing to be desired where two-way communication is necessary. Tubes used: 1-12SL7, 1-12A6, 1-35Z5. NOTE: Use two-wire cable between master station and sub-station.

CRYSTAL PICKUPS

MAGIC TONE CELL

Replaces crystals in RCA Victor radio-phonographs and record players (1938 and later). Permanent-type jewel point stylus. At 400 cycles, it has approximate impedance of 200,000 ohms and an output of approximately 1 1/2 volts. When used as

replacement for needle-type pickups, slight adjustment of phono input circuit may be required for best tone and volume. Installation data included. Stock No. 211X1. Sugg'd List Price: \$7.00.

SILENT SAPPHIRE

Interchangeable with 70 different phonograph crystals. Similar to Magic Tone Cell in design and characteristics, but smaller in size. Comes complete with crystal, mounting plate, screws, and complete electrical and mechanical installation data. (For additional information see RCA Crystal Pickup Data sheet, Form 2F479.) RCA Silent Sapphire, Stock No. 212X1. Sugg'd List Price: \$7.00.

RCA ELECTRONIC COMPONENTS

TELEVISION PARTS

CONTROLS

- # 201R1 **Width Control.** Screwdriver-adjusted variable reactor. Powdered iron core. For use with RCA 211T1 where kinescope anode potential not over 9 KV. \$0.80
- # 201R2 **Projection Width Control.** Features same as 201R1. For use with RCA 211T2 in circuits with kinescope anode potentials up to 27 KV design center. \$2.20
- # 201R3 **Horizontal Linearity Control.** Features spring clip mounting. For deflection circuits using RCA 211T1 and 201D1 \$0.85

TRANSFORMERS

- # 201T6 **Power Transformer.** For use in 30-tube TV receivers requiring rectified current of 250 ma. at voltage of approx. 385 volts \$30.00
- # 204T1 **Horizontal Output Transformer.** Moisture-resistant. For deflection circuits with 50° mag. deflection kinescopes using RCA 201D1 or 201D2 \$23.00
- # 204T2 **Vertical Output Transformer.** Quiet operation. For use with RCA 201D1 or 201D2 where kinescopes require 50° magnetic deflection \$7.00
- # 204T3 **Horizontal Output Transformer.** Powdered iron core. For use where electro-magnetic deflection kinescopes with RCA 201D1 yokes are employed \$11.50
- # 208T1 **Horizontal Output Transformer.** Powdered iron core. For use where electro-magnetic deflection kinescopes with RCA 201D1 yokes are employed \$4.50
- # 208T2 **Vertical Blocking-Oscillator Transformer.** Generates 60 cps pulses required to drive the grids of horizontal discharge tubes \$3.60
- # 208T3 **Horizontal Blocking-Oscillator Transformer.** Similar to 208T1 except that bracket mounting is used in place of potted can construction \$3.20
- # 208T8 **Horizontal Sync-Discriminator Transformer.** Provides automatic horiz sweep freq control. Couples horiz-sweep oscillator to horiz-sync discriminator. \$2.75
- # 211T1 **Horizontal Output Transformer.** For use with RCA 201D1 and directly-viewed kinescopes requiring 50° magnetic deflection using typical circuits \$11.50
- # 211T2 **Horizontal Output Transformer.** Designed for use in recommended circuits employing projection kinescope RCA 5TP4. Powdered iron core \$22.75

YOKES

- # 201D1 **Deflection Yoke.** For use with directly-viewed kinescope requiring 50° magnetic deflection such as RCA 7DP4 and 10BP4 \$9.00
- # 201D2 **Deflection Yoke.** For use with projection kinescopes requiring 50° magnetic deflection such as RCA 5TP4. \$14.90
- # 201D77 **Deflection Yoke.** For use with RCA 2F21 and 1699 Monoscopes \$82.00*

COILS

- # 201D75 **Deflecting Coil Assembly.** (Includes jumbo annular 7-pin socket.) For use with RCA-2P23 and 5655 Image Orthicons \$186.50*
- # 201D76 **Deflecting Coil Assembly.** For use with RCA-1850-A Iconoscope \$96.50*
- # 202D1 **Focus Coils.** For magnetically focused kinescopes with deflection angles up to 50°, such as 10BP4. Utilizes large conductor size for long life \$9.10
- # 202D75 **Focusing Coil Assembly.** For use with RCA 2P23 and 5655 Image Orthicons \$106.50*
- # 204L1 **Filament Choke.** Eliminates undesirable RF currents from filament circuit. Consists of self-supported 16-turn coil on 1/4" inside diameter \$0.30
- # 204X1 **Television I-F and Video Coil Kit.** Contains all the coils for building a high quality receiver. 15 individual items \$22.00

MISCELLANEOUS

- # 201B1 **Spherical Mirror.** For use in reflective optics employing RCA-5TP4 kinescope in projection-type TV receivers \$150.00
- # 201E1 **Television Tuner** incorporating RF amplifier, converter and heterodyne oscillator, with 13-channel station selector and fine tuning control. Includes 3 RCA 6J6 tubes \$75.00
- # 201P2 **Correcting Lens.** For use in reflective optics employing kinescope in projection-type TV receivers. \$32.00
- # 201X1 **Yoke Mounting Hood.** Holds deflection yoke RCA 201D1 on kinescopes such as RCA 7DP4, 10BP4 \$1.60
- # 202B1 **Optics Aligner.** Can be substituted for RCA-5TP4 kinescope in TV projection receiver to facilitate accurate adjustment and alignment of reflective optics. \$66.00*
- # 202P1 **"Bright Picture" Viewing Screen.** For use in projection-type receivers employing reflective optics \$36.00
- # 202X1 **Optical Barrel Kit.** Includes Correcting Lens (201P2), Spherical Mirror (201B1), supports for RCA 5TP4 kinescope, noise, hardware, and mounting barrel for entire assembly \$370.00
- # 203D1 **Ion-Trap Magnet. (Coil Type).** Required for RCA-7DP4 and 10BP4. Eliminates ion spot on kinescope screen \$6.50
- # 203D2 **Ion-Trap Magnet. (PM Type).** Required for RCA-7DP4 and 10BP4. Eliminates ion spot on kinescope screen \$2.10
- # 203P2 **Television Picture Magnifier.** Enlarges pictures 1.5 times when used with TV receivers employing 7" or 10" kinescopes. Accurately made to assure freedom from distortion \$36.95**
- # 203P3 **Television Picture Magnifier without brackets** \$32.95**

All prices in effect 6/1/48.

ALTEC

LANSING CORPORATION

SPEAKERS AMPLIFIERS TRANSFORMERS

1161 N. VINE ST., HOLLYWOOD, CALIFORNIA • 250 WEST 57 STREET, NEW YORK, N. Y.

The Altec Lansing Model 604B Duplex and associated N-1000B Network represents the finest loudspeaker on the market. Manufactured by the same company which makes the famous "Voice of the Theatre" loudspeaker systems used by leading motion picture theatres, this compact unit has all of the fine design principles and construction that has heretofore been available only in the most costly loudspeakers offered for professional use and laboratory standards. Price has not been spared to make the Duplex the peer of all loudspeakers.

The unusual features are: (a) Two way operation utilizing separate diaphragms and voice coils for high and low frequencies. (b) Multicellular horn to provide uniform sound distribution over a wide area. (c) Alnico No. 5 permanent magnets designed for total absence of external stray fields. (d) Both the high and low frequency voice coils made of edge-wise wound ribbon to provide 22% greater efficiency. (e) Large 3" low frequency voice coil for high power capacity. (f) Frequency response of 30 to 16,000 cycles more than spans FM range. (g) Low crossover of 1,000 cycles to assure that the cone will operate as a stiff piston. (h) Overall acoustic efficiency 3 to 5 db greater than the ordinary loudspeaker.

The Model 604B Duplex Loudspeaker and associated N-1000B Network are available separately, or can be supplied together in a number of specially constructed baffle cabinets as illustrated. The cabinet combinations are known as Duplex Loudspeaker Systems.

The Duplex Loudspeaker particularly meets the critical requirements of broadcast and recording studio monitoring, high quality public address and music distribution systems, and when used with 16 mm. sound equipment will increase the audience coverage many fold. Music lovers and discerning people require the Duplex for home use with fine phonograph records and FM reception.

The new Model 604B Duplex Speaker and its associated N-1000B Network incorporates a number of improvements over earlier models. The lower crossover frequency, improved low frequency cone technique and redesigned high frequency diaphragm chamber has extended the frequency range and provided the smoothest frequency characteristic yet offered by any loudspeaker manufacturer.

MODEL 604B
DUPLIX SPEAKER

N-1000-B
Dividing Network

SPECIFICATIONS—604B DUPLIX SPEAKER

Area of Horizontal Distribution	60°
Area of Vertical Distribution	40°
Voice Coil Impedance	16 ohms
Dividing Network Impedance	16 ohms
Dividing Network Crossover	1000 cycles
Power Rating	30 watts
Weight (including network)	40 lbs.
Diameter	15 1/16"
Depth	11 1/2"
List Price, see Network	\$210.00
The N-1000-B network associated with the 604B Duplex must be ordered as a separate item. List Price \$24.06.	

MODEL 603B
DIAZONE SPEAKER

The Altec Lansing 603B Multicell Diacone is now available to meet the tremendous demand for an economical high quality speaker for customers who desire a speaker priced lower than the "professional" Model 604B Duplex. This unit has the advantages of a 2-way multicellular speaker system, and its performance, efficiency, high frequency distribution, frequency response, and absence of distortion are surpassed only by the 604B Duplex. It is designed for the discriminating customer who appreciates the quality sound in his home AM or FM radio, phonograph, music system, and for the manufacturer who earnestly attempts to meet these home requirements.

This speaker which is an Alnico 5 permanent magnet unit, incorporates a metal high frequency diaphragm and a low frequency cone coupled together by a mechanical dividing network and driven by a single 3" voice coil. The metal high frequency diaphragm operates into a multicellular horn to assure uniform sound distribution over a wide area.

A completely new cone technique has extended and smoothed out the frequency response of the new 603B Multicell Diacone to the point where this model represents a vast improvement over the earlier 603 model.

SPECIFICATIONS—603B MULTICELL DIAZONE SPEAKER

Area of Horizontal Distribution	60°
Area of Vertical Distribution	40°
Voice Coil Impedance	8 ohms
Voice Coil Diameter	3"
Power Rating	25 watts
Weight	18 lbs.
Diameter	15-3/16"
Depth	6 5/8"
List Price	\$84.00

The Altec Lansing Model 600B Diacone Speaker is similar in design to the Model 603B Diacone, using the exclusive Diacone principle. It meets the needs of those who do not wish to invest in more expensive speakers, yet whose training, musical education, sound consciousness and discriminating hearing, demand faithful reproduction of sound.

The Model 600B Diacone speaker has a Alnico V permanent magnet and is mounted in a 12" frame. It uses a 3" edge-wise wound aluminum voice coil to which is mounted a domed aluminum alloy metal diaphragm and a seamless molded paper cone. The cone vibrates with the voice coil as a piston up to approximately 2,000 cycles. Above this frequency, the domed metal diaphragm, with its high mass stiffness, continues to operate as a piston with the voice coil, resulting in true reproduction of the higher frequencies.

Because of its efficiency, small space requirements, light weight and superior quality of reproduction, the Model 600 Diacone Speaker is an ideal unit in the lower priced speaker field.

A completely new cone technique has extended and smoothed out the frequency response of the new 600B Multicell Diacone to the point where this model represents a vast improvement over the earlier 600 model.

SPECIFICATIONS—600 DIAZONE SPEAKER

Voice Coil Impedance	8 ohms
Voice Coil Diameter	3"
Power Rating	20 watts
Weight	12 lbs.
Diameter	12 1/2"
Depth	5 1/2"
List Price	\$60.00

MODEL 600B
DIAZONE
SPEAKER

MODEL 400B
DIAZONE SPEAKER

The Altec Lansing Model 400B Diacone 8" speaker has been designed especially for uses where the benefits of a larger speaker can not be taken advantage of because of space and weight limitations.

The Model 400B Diacone is a low-priced, high-quality unit of very high efficiency—a much greater efficiency than is found in the ordinary 8" speakers. Its light weight and small size make it ideally adaptable for portable uses such as 16MM sound, magnetic recorders, and in installations such as airplanes, buses, etc.

SPECIFICATIONS—MODEL 400B DIAZONE SPEAKER

Voice Coil Impedance	8 ohms
Voice Coil Diameter	1 3/4"
Power Rating	12 watts
Required Amplifier Output Impedance	4-8 ohms
Weight	4 lbs.
Speaker Diameter	8 1/2"
Speaker Depth	3 5/8"
List Price	\$24.00

CABINETS

Altec Lansing offers a variety of baffle cabinets which are engineered for high quality sound reproduction. Construction is of heavy ply-wood, with all joints screwed and glued to eliminate spurious rattles. The interior of the cabinets are well padded with fibreglass to prevent side reflections. The following cabinets are available for Altec Lansing speakers listed in this catalogue. Note

carefully the code numbers of the cabinets when ordering. The suffix letter indicates the size of the hole in the baffle necessary to accommodate the required speaker. For example: the 620A Cabinet will accommodate a 15" speaker; the 620B Cabinets will accommodate a 12" speaker; the 620C Cabinet will accommodate an 8" speaker. There is no other difference in the three types of cabinet.—

MULTICELLULAR HORNS

Altec Lansing multi-cellular horns are constructed from exponential horn cells grouped in different configurations to meet various sound distribution requirements. Each cell is a true exponential horn.

The large multi-cellular horn provides the best way of covering long distances and large areas with high levels of quality acoustic power in the frequency range above 200-300 cycles. By choosing the proper configuration of cells, the sound output can be directed for even distribution over any horizontal and vertical area desired; and conversely, to a large degree the sound can be kept from unwanted areas such as walls and ceiling which might produce echoes, slaps, reverberations, etc. These horns find particular application in large buildings with high noise levels, reverberant cathedrals, ball parks, skating rinks, stadia, race tracks, airports, church carillons, sports arenas, etc.

The chart shows multicellular horns available. Note that a throat is not supplied as part of the multi-cellular horn and must be ordered separately according to the type required.

Horn Code	Cell Configuration	Sound Distribution		Dimensions (L-W-H)	Net Weight (Less Speakers)	LIST PRICE	Code No., Throat Required			Throat Code No.	LIST PRICE

* overall length of horn including throat and 2SS unit. † 1/2"

288 SPEAKER

The Altec Lansing 288 speaker unit is designed to fit on the throats of various Altec Lansing multi-cellular horns. Using Altec Lansing permanent magnets, its efficiency when mounted on a multi-cellular horn

is such that a sound level of 98 db (ref. 10⁻⁶ watts per square centimeter) is produced at five-foot distance for an electrical input of 0.1 watt at 100 cycles.

The use of tangential conductance in the diaphragm and zig-zag wound ribbon wire in the voice coil provide maximum power handling capacity and acoustic output. Beryllium copper lips, specially shaped to the voice coil, provide heavy duty connections which will not fatigue under use. The entire diaphragm and voice coil assembly, coded 20221, which is mounted in a cast baffle ring, is fold replaceable.

When using the 288 speaker unit for all range reproduction, it is necessary to attenuate the frequencies below 300 cycles which would otherwise damage the diaphragm and voice coil assembly. This attenuation may be accomplished by the proper sized condenser either in the input or output circuit of the final power amplifier.

288 SPECIFICATIONS

Signal Capacity—40 watts for frequencies above 300 cps
V.C. Impedance—21 ohms when operating under normal horn loading conditions
Dimensions—6 1/2" Diameter x 1 1/2" Deep
Weight—2 1/2 lbs.
List Price—\$200.00

ATLAS SOUND CORPORATION

NEW ATLAS "ALNICO-V-PLUS" MAGNETIC CIRCUIT

MODEL PD-V DRIVER UNITS with Full-Phenolic Unbreakable Diaphragms

MODEL PD-8V

Power 25 watts
 Impedance 16 ohms
 Frequency 90 to 9000
 List Price \$42.50

MODEL PD-5V

Power 25 watts
 Impedance 16 ohms
 Frequency 90 to 3000
 List Price \$32.50

MODEL PD-3V

Power 12 watts
 Impedance 8 ohms
 Frequency 100 to 6000
 List Price \$22.50

All models include the new ATLAS Alnico "V-PLUS" super-efficient magnetic assembly with its energy per unit volume over three times as great as any used before . . . Magnetically Shielded . . . Hermetically Sealed . . . One piece, unbreakable, high-temperature and fatigue-proof full phenolic diaphragm. All models 1 3/8"-13 thread size.

"DR" RE-ENTRANT — REFLEX — PROJECTORS

Non-resonant - Stormproof - Uniform response - Rugged construction

The utmost in performance can be obtained from these new, non-resonant reflex projectors. All resonance is eliminated by fibre gasket seals and special rubber rim which dampens rim vibration. The bracket mounting assembly is securely fastened to a main body steel casting which guarantees long life under extreme conditions of mechanical strain. All spinings are of weather-resistant, heavy gauge aluminum, finished in a high lustre gray enamel.

MODEL	Air Column	Dispersion	Low Frequency	Length	Diameter	LIST PRICE
DR-32	2 1/2 ft.	75°	175 c.p.s.	12 in.	14 in.	\$23.50
DR-42	3 1/2 ft.	80°	135 c.p.s.	15 in.	21 in.	28.00
DR-54	4 1/2 ft.	90°	105 c.p.s.	18 in.	26 in.	40.00
DR-72	6 ft.	100°	85 c.p.s.	25 in.	31 in.	60.00

NEW ATLAS "ALNICO-V-PLUS" PAGING & TALK-BACK SPEAKERS

Complete with unbreakable super-efficient "V-PLUS" Driver Unit

These speakers include the newly developed, unbreakable, hermetically-sealed driver units using the Alnico "V-PLUS" magnetic circuit. They offer a maximum of efficiency as a reproducer, and the utmost in performance as a microphone, in talk-back circuits. The new improved ball swivel mounting bracket permits quick and simple directional adjustment in every position, horizontal and vertical. All aluminum construction, finished in high lustre gray enamel.

MODEL HU-15V

Power 12 watts
 Impedance 8 ohms
 Frequency 300 to 7000
 Length 1 in.
 Diameter 8 1/2 in.
 Air Column 5 in.
 List Price \$29.75

MODEL HU-24V

Power 12 watts
 Impedance 8 ohms
 Frequency 200 to 7000
 Length 1 1/2 in.
 Diameter 10 in.
 Air Column 24 in.
 List Price \$32.75

NEW ATLAS "ALNICO-V-PLUS" DUAL PROJECTORS

Two-way Projector complete with Driver Unit

This two-way speaker projects sound of equal intensity in a dual manner. Also excellent for talk-back application. Reduces cost of installation and offers installation advantages when used in critical locations of long corridors, industrial plants, and similar locations. All aluminum construction finished in gray lustre enamel. Universal mounting bracket. Power: 12 watts. Impedance: 8 ohms.

MODEL	Overall Length	Bell Diameter	LIST PRICE
TP-15V	15 1/2 in.	8 1/2 in.	\$47.00
TP-24V	22 in.	10 in.	53.00

ATLAS SOUND CORPORATION

SPEAKER SUPPORT STANDS

MODEL SS-2

Both models extend from five to ten feet. Heavy steel construction finished in gray enamel and cadmium plating. PS-1 top fitting supplied. The HM-2 permits the use of three "DR" Projectors on a single support stand.

MODEL	LIST PRICE
SS-2	\$37.50
SS-3	30.00
HM-2	15.00

MODEL SS-3 with HM-2

MARINE Midget PROJECTOR for 5" Cone Speakers

- Re-entrant.
- Weatherproof.
- Efficient.
- Compact.

Will accommodate any standard 5" cone speaker. The efficient means of loading the cone diaphragm greatly increases the normal efficiency of any cone speaker. Offers protection against weather and mechanical abuse. Universal steel mounting bracket supplied. Bell diameter 10 inches . . . Overall length 8 inches . . . Finish: Gray enamel. Supplied less cone speaker unit.

MODEL WX-5

LIST PRICE \$13.50

TWO-WAY ENCLOSURE for 8" Cone Speakers

The front and back wave of the speaker is utilized to assist in good sound coverage in long corridors and central locations. Adjustable wall or ceiling mounting brackets supplied. All steel finished in gray enamel. Cloth screens on both sides. Speaker mounting screws included. Outside diameter 10" . . . Depth 5".

MODEL TW-8

LIST PRICE \$8.25

PIPE STANCHION FITTING

"DR" re-entrant or "RC" radial "U" brackets adapted to 3/4" pipe fittings. This steel adaptor has holes properly located to match holes in "U" bracket. All mounting bolts supplied. Female 3/4" pipe thread.

MODEL PS-1

LIST PRICE \$2.00

RADIAL DRIVER UNIT PROJECTOR

- Non-resonant.
- Dual Rubber Rims.
- 100% Storm-Proof.
- Uniform 360° Coverage.

The advantage of 360° coverage often permits the use of one speaker where normally a multiple of directional projectors may be required. The radial projectors are of all-aluminum construction finished in a weather-proof gray enamel. Thread size 1 3/8"-18. The use of the H-2U two-unit adaptor will double the power output for single projector high power application.

MODEL	RC-36	RC-48
Air Column	3 ft.	4 ft.
Bell Diameter	24 in.	28 in.
Overall Height	18 in.	21 in.
LIST PRICE (horn only)	\$40.00	\$50.00

TWO UNIT TO ONE PROJECTOR ADAPTOR

When it is found necessary to obtain the greatest possible power output from a single projector the H-2U is recommended. This device permits the use of two driver units with any type of projector. Construction: Cast aluminum. All threads 1 3/8"-18.

MODEL H-2U

LIST PRICE \$10.00

SPEAKER POWER VOLUME CONTROL

For adjusting volume of individual speakers. Power handling: 10 watts constant. Complete as illustrated.

MODEL RC-1

LIST PRICE \$5.25

PARABOLIC Baffles

for 8" and 12" Cone Speakers

All steel construction, waterproof interlock seal between sections. All mounting bolts and hanging loops supplied. Finished in gray enamel.

Model . SM-8 SM-12
Diam. 18 in. 20 in.
Bell
Length 14 in. 18 in.
Speaker
Size 8 in. 12 in.
List Price \$14.50 \$15.50

BAFFLE MOUNTING FIXTURE

Offers convenient mounting for Parabolic Baffles. Complete adjustable saddle fixture and base pedestal as illustrated.

MODEL ST-8

LIST PRICE \$5.25

RADIAL CONE SPEAKER PROJECTOR

for 12-inch Cone Speakers

360° Coverage

This radial projector offers an excellent baffle for any standard 12" diameter standard cone speaker and produces smooth and uniform 360° coverage. With a good grade of cone speaker it will adequately load the reproducer down to 60 cycles. The enclosure is designed to shed water and can, therefore, be used indoors and out. Finished in gray enamel . . . Outside diameter 29 inches . . . Overall height 13 inches

MODEL L-360

LIST PRICE \$35.00

ATLAS SOUND CORPORATION

"FULL GRIP — VELVET ACTION" Microphone Stands No slipping - No rattle - No noise - No scratching - No wear

Illustrating "Full Grip" Oversize Clutch

The "Full Grip" Clutch offers an extended length clutch body, permitting a secure, full-hand grip. The clutch mechanism is inner-lined with a wear-proof bakelite locking collet which grips without jamming, slipping, or sudden dropping. All bases are functionally designed to offer maximum stability for a given base weight. The maximum base mass is located at the outer periphery of the casting where the concentrated

weight is most useful. All bases include self-leveling, shock-absorbent base pads, plus three additional "anti-tip" points located between the base pads. All models, except the MS-10C "Leader" are constructed of heavy brass tubing. The complete tube assemblies of all models are "super-chrome" plated, assuring "life-time" wear. All models terminate in a $\frac{3}{8}$ "-27 carefully machined thread.

MODEL	Weight	Base Finish	Tube Finish	Height Adjst.	Base Diam.	LIST PRICE
*MS-10C	12 lbs.	Gray Shrivel	Full Chrome	35" to 64"	10"	\$ 8.50
MS-12C	12 lbs.	Gray Shrivel	Full Chrome	35" to 65"	10"	9.60
MS-11C	12 lbs.	Full Chrome	Full Chrome	35" to 65"	10"	11.40
†MS-20	15 lbs.	Gray Shrivel	Full Chrome	42" to 72"	12"	14.00
†MS-24	24 lbs.	Chrome & Gray Shrivel	Full Chrome	42" to 72"	17"	19.50
§CS-1	5 lbs.	Cadmium Plated	Full Chrome	23" to 62"	Collapsible	17.00

*The MS-10C "Leader" tube sections — seamless steel, chromium plated.

†The MS-20 and MS-24 use large diameter, oversize, telescoping brass tube assemblies ($\frac{7}{8}$ " telescoping tube — $1\frac{1}{8}$ " base tube)

resulting in a handsome and fine-appearing stand that supplements the professional appearance of large-size high quality microphones.

§Collapsible to a minimum overall length of 23 inches.

NEW AUTOMATIC "Sleeve Action" MICROPHONE STAND Quiet . . . No Rasp . . . Smooth . . . No Jolt or Jar

This amazing new automatic "Sleeve Action" clutch mechanism is a fully automatic means of adjusting the height of a microphone stand. A slight downward pressure on the "Sleeve Action" control permits the telescoping section to be lowered. To raise the stand, the telescoping tube can be grasped at any point and simply extended. The new "Sleeve Action" is built

for life-time use. It cannot creep or change position without a deliberate pressure on the actuating sleeve control.

The quality of materials, plating, and general specifications are identical to the "Full Grip" models described above. The "Sleeve Action" stand is available in two models; either full chrome or shrivel base.

MODEL	Weight	Base Finish	Tube Finish	Height Adjst.	Base Diam.	LIST PRICE
MS-12S	12 lbs.	Gray Shrivel	Full Chrome	35" to 65"	10"	\$15.60
MS-11S	12 lbs.	Full Chrome	Full Chrome	35" to 65"	10"	17.40

ATLAS SOUND CORPORATION

PROFESSIONAL BOOM STAND

Finger-Tip Control by "Floating Action"
Precision Built
Attractively Styled
For Every Application
Professional Studio Microphone Support

Precision Built . . . "Floating Action" Stand . . . All moving parts and locking adjustments are "velvet smooth" in operation. By simple and quick removal of the boom arm, the stand is similar to the MS-24. The BS-35 is adjustable vertically and horizontally. The counterweight and boom extension can be adjusted for all microphone weights and various extensions.

Specifications . . . Dimensions: Maximum vertical extension 72", minimum 48" Length of horizontal boom arm 63". Base Diameter, at floor contact points, 17". Total weight 35 lbs. Tube diameters 1 1/8" and 7/8" brass, triple "super-chrome" plated . . . Base finished in chromium and gun-metal shrivel, rubber shock-absorbing bumpers. Snap-on hangers for holding cable to boom section supplied.

Model BS-35

List Price \$55.00

ADJUSTABLE BANQUET STAND

This stand incorporates the "Full Grip Velvet Action" principle of adjustment. The tube and base are completely finished in "super chrome" offering a fine appearing stand suitable for use on a banquet table. Adjustable for use on 18" to 32". Base diameter 8". Weight 5 lbs.

Model TS-6

List Price \$8.50

FLEXIBLE GOOSE NECK

Can be attached to any microphone stand so that some amount of overhang can be accomplished. Ends have 5/8"-27 male and female threads. Finished in bright chrome. Length 13".

Model GN-13

List Price \$2.00

SPEAKER'S or ORCHESTRA DESK ATTACHMENT

This desk attachment can be applied to any type of microphone stand. This is an item which has long been required in many permanent as well as rental installations. It offers the speaker facilities for holding notes or other reference material. A microphone can be directly attached to the desk by using the BC-1 Bracket Clamp. The DA-1 is complete with 5/8"-27 thread attachment and tilt adjustment. Sturdy construction finished in bright aluminum.

Model DA-1 (less floorstand))

List Price \$10.00

MODEL DA-1
(shown with
MS-20 floor
stand)

"BABY BOOM" ATTACHMENT

Easily attached to any type of microphone stand. Can be locked in any position. Length of tube 32", chrome plated; castings in gray shrivel. 5/8"-27 thread size.

Model BB-1

List Price \$7.00

"VELVET ACTION" DESK STANDS

ATLAS Desk Stands employ the same fine finish and workmanship as embodied in the floor models. The adjustable Model DS-7 uses heavy duty 5/8" and 7/8" tubing. Felt base pads included. Base diameter 6", finish gray shrivel; tube chromium plated.

Model	Height Adj.	List Price
DS-5	Fixed 6"	\$2.75
DS-7	8" to 13"	4.50

MODEL DS-7

BRACKET CLAMP

A multitude of useful applications. Can be used with Boom Arm, Goose Neck, etc. Chrome tube 6" long. Castings finished in gray shrivel. Can be clamped or permanently screwed or bolted in position. Thread size 5/8"-27".

Model BC-1

List Price \$3.00

Jensen

"Standard Series" speakers, in both PM and Field Coil models, are exceptionally good in performance and are highly recommended for radio receivers, low-power public address systems, intercommunication equipment, and similar applications. Completely redesigned in every feature, this postwar line embodies the highly efficient Alnico 5 magnets which insure unlimited life. All "Standard Series" speakers are completely dustproof and all field coil models have bucking coils.

No transformers are regularly furnished with these speakers but mounting facilities are provided for easy attachment of transformers. If transformers are desired mounted at the factory, add to the list price of speaker and transformer an installation charge of 75¢ list. Special field resistances are available on order. Write for prices, mentioning specific resistance required.

SPECIAL EXTENDED RANGE — HIGH FIDELITY SPEAKERS

For those applications where high fidelity performance extending to 10,000 cps. is required, these Special Extended Range High Fidelity Speakers are recommended. Power handling capacity is limited by permissible distortion. They are designed for home and studio use and will accommodate indoor audiences on the order of 100 people. They are highly qualified for monitoring in broadcast stations and for high fidelity reproduction of voice at relatively low levels.

"AUDITORIUM SERIES" SPEAKERS†

JENSEN Auditorium speakers are undeniably the best known and most respected high-quality single-radiator loud speakers available. Model PMM-15 is recommended as a general purpose unit while Model PMJ-18 was designed with greatest emphasis on reproduction of voice although in accomplishing this, bass response has not been sacrificed.

Jensen

Hypex PROJECTORS

with *Annular Diaphragm Unit*

"Hypex" Projectors consist of a Type H "Hypex" Horn and Type U "Annular" Driver Unit. The "Hypex" Horn (Patents Pending) is a Jensen development—not "exponential," but with an entirely new flare formula that gives increased efficiency in the region above acoustic cut-off. Two horn sizes give nominal cut-off values of 165 cps. and 140 cps., either of which can be used with any Type U "Annular" Driver Unit below.

Type U "Annular" Driver Units (U. S. Pat. 1,845,768), offered in PM design, employ the exclusive Jensen "Annular" principle in which the diaphragm is clamped at periphery and center. This gives extra stability, greater freedom from harsh "breakup" sometimes encountered with "dome" diaphragms.

"Hypex" Projectors are especially suitable for speech reproduction, since response extends from the vicinity of acoustic cut-off to the 5,000 cycle region with greatest emphasis on middle highs that add "punch" and "carrying power." Commercially acceptable music reproduction, within the limitations of all small reflex horns, is also provided. Sturdy steel encased unit, plus reflex horn construction insures dependable operation indoors and out, under all weather conditions. Finish is durable baked two-tone gray lacquer.

STANDS AND SUPPORTS

EA-6. Adjustable Stand, Sturdy cast fitting with three-leg base, for mounting projector on wall or other surface. Horizontal and vertical adjustment.

ST-728—List Price..... \$3.00

EA-7. Adjustable Support. Provides adjustment when projector is mounted on pipe mast 3/4 inch pipe thread both ends.

ST-729—List Price..... \$2.00

ANTI-CORROSION TYPE

The anti-corrosion type Hypex Projectors, similar to the regular series, are distinguished by their ability to withstand the corrosive and other deteriorating effects of continued exposure to salt-laden atmosphere, highly humid climates and other severe weather conditions. Their use is therefore specifically recommended where there is exposure of the units to atmospheric and climatic conditions of the seacoast, the tropics and semi-tropics and they are obviously recommended for all installations in the open.

Mechanical and acoustical specifications are identical to those of the standard Hypex series except that protective screens, nuts, bolts, washers and clamps are brass, stainless steel or approved equivalents. Gaskets and grommets are rubber or approved rubber equivalents. All surfaces of steel parts are bonderized, after which two coats of

primer are applied and baked and one coat of gray enamel applied and baked. All parts not inherently proof against corrosion, rust, etc., are nickel plated and/or suitably treated. When separately tested, each complete projector, horn, driver unit and diaphragm is guaranteed to withstand a 100-hour salt spray test. Sound chamber, driver unit and re-entrant horn sections are provided with suitable drains to remove condensate or water seepage when projector is mounted in proper position.

U-201 Driver Unit, ST-732	List Price	\$52.00
H-201 Horn, ST-733	List Price	35.80
EA-61 Stand, ST-734	List Price	5.00
EA-71 Support, ST-735	List Price	3.50

TYPE U "Annular" DRIVER UNITS

U-20. "Annular" Driver Unit. Permanent Magnet type. Rated at 15 watts average, 25 watts maximum, with normal voice or music input. 16-ohm voice coil. Internal screw terminals. Dustproof, screened sound chamber. Diameter, 6 1/8". Depth, 3 3/8". Shipping weight, 11 lbs. Specify ST-630.

List Price \$41.00

Type H "Hypex" PROJECTOR HORNS

H-20. "Hypex" Horn only. Bell diameter, 20 3/4". Depth, 16 3/8". Acoustical length, 4 feet. Nominal acoustic cut-off, 165 cps. Stand coupling flange tapped for 3/4" pipe thread. Net weight, 11 1/4" lbs. Shipping wt., 18 1/4 lbs. List Price..... \$28.00

H-24. "Hypex" Horn only. Bell diameter, 24 3/4". Depth, 20 1/8". Acoustical length, 5 feet. Nominal acoustic cut-off, 140 cps. Net weight, 14 3/4 lbs. Shipping wt., 21 3/4 lbs. List Price..... \$35.80

JENSEN Type "S" Peri-Dynamic Projector ... 15-25 WATTS CAPACITY

These Projectors are complete assemblies of specially designed Driver Speaker and acoustic system utilizing the Peri-dynamic principle and correctly designed projector horn. Unusually good response is obtained in the 100-cycle region and high frequency response at good efficiency is maintained to 5500 cycles, thus especially qualifying these projectors for applications emphasizing music reproduction and naturalness in speech quality. Except for opening into horn, projector is completely weatherproofed, suitable for use indoors and out. Power rating is 15 watts average, 25 watts maximum, with normal voice or music input. Voice coil impedance, 8 ohms. Bell diameter, 24 3/4". Overall length, 30". Shipping weight, 30 lbs. Complete with plugs for voice coil and field connections.

SPH-81—Projector, complete, PM Type, ST-633 List \$82.50
EA-5—Adjustable Stand, ST-730.....List 5.00

All above Projectors are furnished complete with Driver Speaker, but LESS stand.

Jensen

MODEL VH-91—HYPEX SPEECH MASTER PROJECTOR

Model VH-91 Speech Master Reproducer meets a real need for paging and intercommunication applications. Particularly efficient in the voice frequency range, it delivers clear, intelligible speech with maximum "punch" to override high noise levels. By reason of an extremely clever mounting bracket, this projector can be pointed in any direction and securely locked into position with a single wing nut. Two holes in the bracket are provided for mounting on table, wall, ceiling or a post. The diaphragm is cloth base, phenolic impregnated. Nominal voice coil impedance, 8 ohms. Power handling capacity, 15 watts maximum speech signal input. Two-wire RC cable is provided for connections. Mounting facilities are also provided on the bracket for a $5\frac{1}{2} \times 5\frac{1}{2}$ " transformer. Because of the Hypex formula, useful output is attained for a 100-degree total angle. Dimensions: Bell diam., $8\frac{3}{8}$ ", length of bell, $7\frac{3}{8}$ ".

Model VH-91—Reproducer, ST-171.....\$32.50

JENSEN *Speech Master* REPRODUCERS

5-Watt "AP-10, 11" for DESK AND PANEL

AP-10

The truly remarkable performance of these new "Speech Masters" is due to the Peri-Dynamic principle and special radiating system. Normal room level requires less than 0.5 watt input; maximum rating of 5 watts on speech in-urses dependability. Speech reproduction is especially clear, crisp, intelligible . . . yet if required, music can be reproduced with better quality than that of the average "midget" radio.

Extra-sturdy construction, overall mechanical protection, double dust-proofing, beautiful streamlined design, exceptional acoustic performance . . . all these combine to set AP-10 and AP-11 "Speech Masters" entirely apart from conventional speakers.

AP-10 Desk Type "Speech-Master." Permanent Magnet design. For desk or wall mounting. Complete with "tilt" adjustment and base. Double dust-proofed, fully enclosed and protected. Internal mounting bracket for $\frac{1}{2}$ " x $\frac{1}{2}$ " transformer. R.C. cord 36" long. Height $6\frac{3}{4}$ "; depth $5\frac{1}{8}$ "; diameter 5". Shipping weight, $5\frac{1}{4}$ lbs. Attractive Hammered Gray finish.

AP-10. ST-590. (4 ohm v.c.) List.....\$13.90

AP-10. ST-591. (45 ohm v.c.) List..... 14.50

AP-11 Panel Type "Speech-Master." Similar to AP-10 less base and swivel bracket. Has clearance eyelets for mounting screws. Mounts in 4 27/64" cut-out, extends $4\frac{1}{2}$ " inside panel (from front surface). Screws and drilling template included. Shipping weight, $3\frac{3}{4}$ lbs.

AP-11. ST-592. (4 ohm v.c.) List..... \$11.30

AP-11. ST-593. (45 ohm v.c.) List..... 11.90

AP-11

Phone Communication: For amateur, commercial, police, aviation, as separate unit or integral equipment.

C W Telegraph: Aids selectivity, helps signals override QRM and QRN. Husky voice-coil to withstand keying transients.

Intercom and PA: For modern Intercom, Paging and PA at moderate levels. Good "talk-back" performance.

Short-Wave Listening: Better than your regular speaker. Can be used on any receiver.

6-Watt "AR-10" REFLEX SPEECH MASTER PROJECTORS FOR GENERAL APPLICATIONS

This new Jensen reflex type "Speech Master" has many applications for paging, intercom and call systems operating at medium levels under moderate noise conditions. Specially designed reflex horn increases efficiency in mid-frequency range, giving added effectiveness and "punch" to speech quality. Though not classified as a strictly weatherproof device, reflex construction prevents direct access of rain and snow to speaker diaphragm. Voice coil impedance, 4 ohms or 45 ohms. Power rating, 6 watts. Internal space for $\frac{1}{2}$ " by $\frac{1}{2}$ " transformer (designs stocked for 4-ohm v.c. only). Overall diameter 10". Depth, 8". Complete with mounting bracket, P.M. design.

AR-10. "Speech Master." 4 ohm v.c. ST-643. List Price.....\$20.00

AR-10. "Speech Master" 45 ohm v.c. ST-644. List Price..... 20.75

JENSEN COAXIAL SPEAKERS

The four JENSEN Coaxial speakers shown here represent a wide range of performance and price and are recommended for FM-AM receivers, reproduction of transcriptions and commercial phonograph records, and recording and broadcast studio monitoring. Two speakers in a unitary assembly cover the entire frequency range, each speaker giving smooth, efficient response in that portion of the frequency range which it reproduces. Only "two-way" systems such as employed in JENSEN Coaxial speakers can give such excellent response and spatial distribution over the

wide frequency range required in advanced sound reproduction.

Two types of dividing networks are used in JENSEN Coaxial speakers: "Roll-off" network in Models HNP-51, JAP-60 and JHP-52 and "Shelving" type in Model JCP-40. The H-F Range Control, furnished with Models HNP-51, JAP-60 and JHP-52, provides a choice of four cut-off frequencies to match the program material: 15,000, 10,000, 7,500 and 5,000 cps. H-F Level Control ST-606 may be added to Model JCP-40 if desired.

MODEL HNP-51 (15-Inch)

An articulated Coaxial speaker recommended for FM receivers, playback of transcriptions, and recording and broadcast studio monitoring where smoothest performance, minimum distortion and unusually good polar distribution and "presence" are required. Combines a cone-type h-f speaker with a horn-type l-f unit, both with Alnico 5 magnets. O.D. 15 1/4", Depth 10 3/8", Baffle 13 1/2".

Frequency Range: 50 to 15,000 cps. Maximum Input: 25 watts. Efficiency: Substantially higher than other 15-inch speakers. Fields: Alnico 5 magnets. Input Impedance: 500-600 ohms. Net-

work: Integral two-channel type. H-F Control: "Roll-off" type with 4-position switch.

Model HNP-51, ST-122, with H-F Range Control \$125.00

MODEL JAP-60 (15-Inch)

For FM-AM receivers, high quality phonographs, reproduction of commercial phonograph record and similar applications where smoother response and better balanced characteristics are required than offered by Models JHP-52 or single, direct-radiator speakers. O.D. 15 1/4"; Depth 8 3/4"; Baffle opening 13 3/4".

Frequency Range: 50 to 15,000 cps. Maximum Input: 17 watts. Field: PM. Input Impedance: 500-600 ohms. Network: Integral two-channel type. H-F Control: "Roll-off" type with 4-position switch.

Model JAP-60, ST-600, with H-F Range Control \$85.00

MODEL JHP-52 (15-Inch)

MODEL JHP-52 (15-Inch)

For FM-AM receivers and high quality phonographs where slightly less smooth response throughout the entire frequency range than available with Models JAP-60 and HNP-51 can be tolerated.

Frequency Range: 50 to 15,000 cps. Maximum Input: 14 watts. Field: PM. Input Impedance: 500-600 ohms. Network: Integral two-channel type. H-F Control: "Roll-off" type with 4-position switch. O.D. 15 1/4"; Depth 7 1/2"; Baffle opening 13 3/4".

Model JHP-52, ST-601, with H-F Range Control \$72.00

MODEL JCP-40 (12-Inch)

For FM-AM receivers and reproduction of commercial phonograph records where minimum space is an important factor. Excellent modernizing unit for replacement of single radiator, 12-inch speakers in radio receivers and phonographs. Can be mounted above the baffle for 10-inch speakers.

Frequency Range: 50 to 12,000 cps. Maximum Input: 10 watts. Field: PM. Input Impedance: 6-8 ohms. Network: Simple "Bridging" type. H-F Control: Furnished only in complete reproducer; "Shelving" type control, ST-606, may be added if desired. O.D. 12 1/8"; Depth 5 1/2"; Baffle opening 11".

Model JCP-40, ST-603 \$30.00

Q8P HIGH-FREQUENCY SPEAKER†

As used in 15" coaxials. Designed to reproduce the high frequencies from 4,000 to 15,000 cps., when used with dividing network (such as A40-1) and suitable low frequency speaker. Impedance, 16 ohms. Overall diameter, 5 1/2". Depth, 3 5/8". P.M. design.

Q8P—H-F. Speaker, ST-589. List Price \$13.00

ST-605—Mounting Arms. Set of 4 as used on 15" coaxials. List Price \$1.40

A40-1 NETWORK†

This uniquely designed two-channel network is offered to those who wish to assemble their own two-way speaker systems, or add a high-frequency speaker to an existing single speaker. Frequency division is at 4,000 cps., with an attenuation outside pass band of 10-12 db per octave. Low frequency

channel will accommodate any suitable 8 ohm 12" or 15" speaker. High channel takes one to four Q8P High Frequency Speakers (16, 8 and 4 ohm taps). Input, 500 ohms. High Frequency Range Control Switch feature included. Specify ST-604—List Price \$35.00

ACCESSORY H. F. LEVEL CONTROL FOR JCP-40

A simplified system of fidelity control which can be added by the purchaser to the JCP-40 Coaxial Speaker has been developed. This consists of a properly designed continuously variable resistance network which is easily connected to terminals provided for this purpose on the speakers. The control permits the user to adjust the level contributed by the high frequency speaker, thus permitting instant accommodation to program quality and listener preference. Control can also be used as general purpose 16-ohm 15-watt level control, 3/8" bushing 1" long for mounting on heavy cabinets. Complete with antique bronze escutcheon and brown bakelite knob.

ST-606—High Frequency Level Control. List Price \$3.00

Jensen

BASS REFLEX CABINETS

Type "D" Bass Reflex cabinets are handsomely styled, and are well constructed of beautifully striped satin finish veneer walnut, with interlaced bronze strip grille over matching fabric.

Type "B" cabinets, inexpensive but durably built enclosures, are well constructed of impregnated composition board and finished in hammered brown lacquer.

Type "D"

Model No.	Stock No.	Speaker Size	Dimensions			Shipping Wt., Lbs.	List Price

TYPE "H" CABINETS

Type "H" cabinets are sturdily built and incorporate the famous Bass Reflex principle. With front curved to a 14 $\frac{1}{8}$ inch radius, they are admirably shaped to fit into corners but may be placed in any number of positions as suggested by the accompanying sketches. Type "H" cabinets are finished in brown opaque lacquer but may be refinished by the purchaser to match the locale of the installation. Brackets are furnished for mounting on wall or post. Only one size is offered—for 8-inch speakers—and JENSEN Model P8-SH speaker is recommended for optimum performance although any 8-inch speaker may be used.

BASS REFLEX REPRODUCERS

Type RD Jensen Bass Reflex reproducer is comprised of a combination of any one of the 4 models of Coaxial, with Type D Cabinet. Cabinet is beautifully styled, all walnut satin finished, Bass Reflex design. RD Reproducers all have program quality selector switches neatly installed on upper right hand side. "RB" Reproducer cabinets are heavily framed with solid lumber, and exterior panels of cabinet are shaped of high quality wood composition material. Finish is baked on, dark tan color in a new hammerlaid design. Trim is chromium and aluminum. Jensen built-in Bass Reflex.

TRANSFORMERS FOR JENSEN SPEAKERS

ADJUSTABLE IMPEDANCE TRANSFORMERS

Jensen loud speakers are priced without input transformers but are available with transformer attached at the factory when so specified. In every case, specify the transformer wanted by model number. When transformers are attached at the factory, a charge is added to the total cost of speaker and transformer: 75c for "Standard Series"; all others \$1.25.

Type "ZX"

For matching conventional "plate" impedance values. Adjustments are easily made with flexible lead and pin tip jack. Impedance values: voice coil, 4,500, 7,000, 10,000 and 14,000 ohms. All except voice coil are center-tapped for push-pull tubes.

SPEAKERS

QUAM ELECTRO-DYNAMIC SPEAKERS

These speakers manufactured under Quam patents Nos. 2,020,211 and 2,020,212 are the result of the vast experience gained through the manufacture of millions of this type of unit. Field coils are made from carefully selected constantly tested materials and by time proven methods, guaranteeing long life. 3", 4", 5", 5 1/4", 4x6" and 6 1/2" speakers are furnished with tapped holes in the base of the pot for chassis mounting and universal mounting brackets.

*Not an Adjust-a-Cone speaker.

DESCRIPTIVE PART NUMBERS—Each part number conveys the essential specifications of each unit. The first digit indicates the size; the following single or double letter indicates the type of speaker, i. e., E indicates Electro-Dynamic, A Alnico Permanent Magnet. The last numbers of the Electro-Dynamics indicate the

field resistance. The last numbers of the Permanent Magnets indicate the approximate size of the magnet. For example, a 5E45 speaker is a 5" model of the Electro-Dynamic line with a 450-ohm field. A 46A1 is a 4 x 6 Alnico Permanent Magnet speaker with a medium-sized magnet.

SPEAKERS

QUAM PERMANENT MAGNET SPEAKERS

Originally designed for applications where no current was available for field excitation, these speakers have found a widespread use for replacements and original equipment where electro dynamics were formerly specified. All models

use the Alnico V magnet, providing maximum performance with minimum weight and size. 3", 4", 5", 5 1/4", 4x6", and 6 1/2" units are furnished with drilled and tapped pots for chassis mounting and universal mounting brackets.

QUAM OVAL SPEAKERS

ELECTRO-DYNAMIC AND PERMANENT MAGNET

2 SIZES: 4 x 6" AND 6 x 9"

Designed for radios, record players, combinations, inter-office communicators and Auto Sets. Meet RMA electrical and mechanical standards. . . Available both in Permanent Magnet and Electro-Dynamic types.

THE QUAM ADJUST-A-CONE FEATURE

THE QUAM-ADJUST-A-CONE feature, consists of a clamping ring securely fastening the spider to the basket by means of two machine screws, instead of cementing or otherwise permanently affixing the spider. Thus the QUAM spider can be moved if necessary. To recenter a voice coil, merely loosen the two screws and move the spider and voice coil assembly laterally. This will relocate the voice coil concentrically around the pole piece.

In many cases, a rubbing coil may be adjusted by means of the QUAM ADJUST-A-CONE feature without removing the speaker from the chassis, or the chassis from the cabinet. Such repairs can be made in a matter of minutes with every assurance that they will be complete.

GENERAL ELECTRIC

ALINCO 5 P. M. LOUDSPEAKERS

All component parts of the new Alnico 5 Loudspeakers are made to the rigid specifications of G-E quality control. These features, in addition to highly efficient manufacturing skill combined with the "know-how" of G-E engineers, have made these new superb speakers possible — unsurpassed in fidelity, dependability and durability.

4"

GENERAL ELECTRIC'S new 4-inch speakers are the result of years of intensive engineering research to produce units of reduced size with maximum efficiency for use in small portable and table model receivers. In addition to having the "stay-bright" finish and the aluminum foil base voice coil, the new 4-inch speakers are considerably lighter in weight and more compact. This reduction in weight and space has been accomplished through the use of Alnico V magnet material, all-weld construction, and smaller yoke assembly.

5 1/4"

GENERAL ELECTRIC'S 5 1/4-IN. PM speakers have all been designed and developed to provide full, true, low notes and excellent high frequency definition for voice or music reproduction. Skillful d-signing has been applied to all details to assure the best possible results.

6 1/2"

GENERAL ELECTRIC 6 1/2-inch loudspeakers are the result of years of persistent development to improve performance. Never were ideas introduced and combined with better quality materials. Greater sensitivity and power capacity in more compact space was achieved by these methods.

8"

The NEW ALNICO 5 PERMANENT MAGNET material was chiefly responsible for maintaining the excellent performance of the G-E 8-inch speakers and still keeping the over-

all size smaller. The speakers are capable of handling full audio power with very little distortion. These speakers are recommended for quality in design and faithful reproducing characteristics.

10"

GENERAL ELECTRIC'S new 10-inch P.M. speakers are the result of application of latest developments in scientific laboratory tone reproduction. Especially designed for brilliant reproduction of voice and music. They represent a perfect balance in relative factors of performance ability, cost, and appearance.

12"

GENERAL ELECTRIC'S powerful 12-inch permanent magnet loudspeakers are designed to provide faithful tone reproduction at high levels. They equal or surpass the performance of electro-dynamic speakers of the same size. All weld construction has minimized distortion at maximum operation levels by eliminating vibration.

G-E LOUDSPEAKER FEATURES

ALNICO 5 MAGNET MATERIAL is one of the great wartime engineering developments. Its energy per unit volume — approximately three times as great as other magnets — has enabled G-E engineers to design a new line of smaller speakers with better performance characteristics.

ALL WELD CONSTRUCTION of the newly designed G-E Alnico 5 Loudspeakers not only reduces the weight and size but also increases the rigidity necessary for perfect alignment of all parts. It also eliminates the possibility of dust and moisture accumulation and simplifies the replacement of damaged cones.

ALUMINUM FOIL BASE VOICE COILS only are used in all G-E permanent magnet speakers. Exact concentric location with the collar of the spider assembly insures excellent alignment. Humidity or excessive temperature variations do not affect the aluminum foil voice coils, making this type of speaker ideal for receivers designed for use in export markets.

PERMANENT MAGNET HORN UNITS

UNITS WITHOUT WATERTIGHT CASES

UNITS WITH WATERTIGHT CASES

Latest improvements as developed during the war are now included in all units. Higher watt-handling capacity, greater efficiency and practically lifetime operation. All Permanent Magnet units use the finest grade of Alnico steel magnets and Armco iron throughout. All steel parts plated to prevent corrosion. Units are magnetized, using an electromagnetic cutout switch which gives the maximum flux density obtainable in the gap. All magnets are measured for flux density and each unit is tested with special machines for power handling capacity as well as 300 volt ground-test, making for uniformity and ability

to withstand all types of service. All units are supplied with corrosion-proof metal diaphragms or plastic diaphragms on request, without extra charge. Voice coil impedance on all units: 15 ohms. Special ohmages on request. Supplied blastproof to withstand explosion and gunfire, when requested.

All units from Junior size to Giant size can be supplied with heavy aluminum case spun over them making for an hermetically sealed housing, watertight and useable outdoors in all kinds of weather. Additional List Price cost \$2.50 each.

Permanent Magnet High Frequency Speaker

An efficient and precision built speaker, to meet the latest requirements for wide-range reproduction. Designed to cover the frequency band from 1000 to 12000 cycles. Supplied with horn. Designed to operate in conjunction with a suitable low frequency speaker (cone or horn type) in order to give high fidelity reproduction in the wide-range audio frequency band. Voice Coil impedance 15 ohms.

PERMANENT MAGNET HORN UNITS

UNITS WITHOUT WATERTIGHT CASES

UNITS WITH WATERTIGHT CASES

Latest improvements as developed during the war are now included in all units. Higher watt-handling capacity, greater efficiency and practically lifetime operation. All Permanent Magnet units use the finest grade of Alnico steel magnets and Armco iron throughout. All steel parts plated to prevent corrosion. Units are magnetized, using an electromagnetic cutout switch which gives the maximum flux density obtainable in the gap. All magnets are measured for flux density and each unit is tested with special machines for power handling capacity as well as 300 volt ground-test, making for uniformity and ability

to withstand all types of service. All units are supplied with corrosion-proof metal diaphragms or plastic diaphragms on request, without extra charge. Voice coil impedance on all units: 15 ohms. Special ohmages on request. Supplied blastproof to withstand explosion and gunfire, when requested.

All units from Junior size to Giant size can be supplied with heavy aluminum case spun over them making for an hermetically sealed housing, watertight and useable outdoors in all kinds of weather. Additional List Price cost \$2.50 each.

DOUBLE RE-ENTRANT MARINE SPEAKERS

THE LATEST SPEAKERS IN MARINE PRACTICE!

A double re-entrant type of horn. The Regular, Midget and Miniature Marine speakers are approved by the Bureau of Marine Inspection and Navigation, Department of Commerce, for all Emergency Loud-speaker Systems on ships, under the 53rd Supplement of the Bureau, after tests made by the Bureau of Standards, Washington, D.C. These Marine Speakers are used both as Loudspeakers and as Microphones. The driving Unit and connections are

all enclosed, making a completely waterproof speaker not affected by temperature or weather, including use on sea. Made from a heavy aluminum spinning, having a base of heavy aluminum casting. Has special non-corrosive Aluminum casting; baked chromatic Undercoat Finish plus outside lacquer finish. Uses latest type of driver units. Supplied with three-legged flush type mounting or U-bracket mounting. All Speakers have waterproof boxes for interior mounting of transformers. Regular and Midget marine speakers supplied blastproof to withstand gunfire and explosion, when requested, at additional charge.

Bull Marine: For long range reproduction and pick-up.

Regular and Midget Marine: For long range reproduction and pick-up. Delivers 100 DB of sound 10 feet from horn with 1 watt input. Will pick up sound up to 100 feet. For Marine, General Public Address and Railroad work.

Miniature Marine: Has higher cut-off. Excellent for speech work in monitoring system, outdoor and indoor paging, intercom systems and railway work.

DWARF RE-ENTRANT

A small re-entrant speaker designed for speech reproduction only. Very highly efficient, using dwarf unit for DW-9-R, and the baby unit for DW-11-R. Flange around bell for flush mounting. Complete with unit and transformer housing. Can be supplied with ratchet mounting.

UNITS

RACON

TRUMPETS

STRAIGHT TRUMPETS

- **RACON STRAIGHT TRUMPETS** are the most efficient horns obtainable. Output from any straight trumpet is approximately 2 DB higher than any re-entrant type with the same input. This is because straight trumpets lack the attenuation from resistance and reflection which is inherent in all re-entrant horns. Will override extremely high noise level, indoors or outdoors.
- **RACON PATENTED ACOUSTIC TRUMPETS** are made of Racon Acoustic cloth processed by a patented method which gives a non-vibratory wall, thereby increasing the output of the horn without

loss due to wall vibration. Supplied for indoor use (DeLuxe type) and for outdoor use (Stormproof type)—guaranteed for life in all kinds of weather and temperature.

- **METAL TRUMPETS** are made of heavy gauge aluminum spinning and cast aluminum throat sections with rolled beaded edge.
- **UNBREAKABLE TRUMPETS** are made of heavy gauge aluminum spinning, reinforced and damped with Patented Racon Acoustic Material to prevent wall vibration.

RADIAL TYPE

Speaker is designed to project sound over a complete circumference of 360 degrees, distributing the sound with even intensity and bringing out the high response lacking in direct cone horns. Particularly adapted for use on trucks and in auditoriums where complete coverage is desired. Can be camouflaged to blend with ceiling architecture.

IN ALL RACON RADIAL CONE HOUSINGS the upper deflector is made of heavy gauge steel, back cone cover of steel, and lower deflector of RACON ACOUSTIC material to prevent resonant effects prevalent in all metal reflecting surfaces. Stormproofed for all weather conditions. These cone housings are furnished without speakers.

MARINE TYPE

A re-entrant speaker housing of the Marine type for cone operation. Owing to construction this housing can be used outdoors, as well, in all weather and temperatures without damage. Cone diaphragm is protected not only from direct contact of rain, but also from physical damage. Can be used for voice or music reproduction.

IN ALL RACON CONE MARINE SPEAKER HOUSINGS bell is made of heavy gauge aluminum; cone mounting is made of aluminum casting; centre bullet is made of Patented Racon Acoustic material to prevent resonant effects. Material is stormproofed for all weather conditions. Housings are supplied without Cone Speakers.

SPECIAL TYPE SPEAKERS

BALL TYPE CONE SPEAKER HOUSING

DESIGNED FOR 6" OR 8" CONE

A new type ball speaker to be used where directional sound is required and where the standard type of cone projections clash with the surrounding furnishings or architecture.

Will project a beam at an angle of 45°.

Will operate with 6" and 8" cone speakers, and can be used for paging systems (voice reproduction) as well as for musical reproduction.

Made of steel, with hanging lamp fixture. Finished as desired.

Code	Stock No.	Type	Ball Diameter For 6" Cone 14"	Weight	List Price

CELLULAR HORN

A new type of cellular horn for operation between 195 and 12,000 cycles, with an angular distribution of 60°.

Made only in blocs of 4 cells—of Racon unbreakable material, having heavy aluminum throat castings and unbreakable bell sections.

Code	Stock No.	Type	Overall Length	Bell Opening	Weight	List Price
RAGIN	QB-641-C	A	42"	14" x 14"	18 lbs.	\$135.00

NEW! RACON MICROPHONE STANDS

All floor models have heavy cast iron base finished in black crinkle. All tubing of brass with heavy wall thickness and burnished chromium plated finish. Uses 5/8" inner tubing and 7/8" outer tubing. Table and banquet models use loaded heavy spun steel bases with special turned in beading so as not to scratch the finest polished table top.

RACON LATEST IMPROVED CLUTCH ACTION

A TOUCH to move the extension tubing up or down. Set in any position. No slipping, no wearing of fibre bushings, no turning and tightening of clutches, no turning of thumb screws to hold position of mike.

Special Improved Clutch supplied as part of mike stand or supplied as extra part to be added to old or new microphone stand to convert to latest type; merely remove old clutch arrangement and screw latest device to outer tubing for permanent adjustment.

SPEAKERS

MODEL LH

REFLEX LOUDSPEAKERS

The reflex horns pioneered by University represent the most efficient method of converting electrical power into acoustic energy. When used with University driver units, they are capable of conversion efficiencies up to 50% and in addition, provide compactness and weather protection without any sacrifice in performance.

Heavy gauge metal and corrosion resistant finishes on horn and hardware are assurance of trouble-free performance regardless of changes in temperature and humidity. Each speaker is equipped with a rubber damping rim which prevents vibration and mechanical resonance. Adjustable UNIVERSITY "U" bracket mounting simplifies installation and holds the speaker firmly locked in any position.

Four models cover every public address requirement. Model GII has the longest air column and is ideal for the reproduction of symphonic music. The model LH with a higher cutoff is designed as a general purpose speaker and is recommended for music transmission where economy without sacrifice of quality is essential. In installations where a smaller horn is required, the Model PH will render excellent service for both speech and music. The Model SMH will find its widest application in the reproduction of speech where clarity and a high degree of intelligibility are necessary. Accessories include Model PMA adapter and 2YC connector.

MODEL	SMH	PH	LH	GH
DISPERSION	75°	80°	90°	90°
AIR COLUMN	2½ FT.	3½ FT.	4½ FT.	6½ FT.

LENGTH	12 INCHES	15 INCHES	18½ INCHES	25 INCHES
WEIGHT	6 LBS.	10 LBS.	15 LBS.	22 LBS.
PRICE (Horn only)	\$24.50	\$29.00	\$44.50	\$69.50

BREAKDOWN PROOF DRIVER UNITS

University driver units are breakdown proof and guaranteed for one year. Ratings are conservative and operation over long periods is assured. They are of the PM dynamic type, incorporate highest quality Alnico magnets and one-piece molded phenolic diaphragms. Unique "rim centering" construction eliminates aligning pins and permanently centers the voice coil and head assembly in a much closer magnetic gap. This results in a higher conversion efficiency and misalignment due to shock or vibration is virtually eliminated.

Hermetically sealed housings provide complete protection from outdoor exposure and corrosion fumes.

The model PAH is recommended for extreme low frequency response. Its larger magnetic structure provides a 35% higher conversion efficiency than the SA-HF. Use the PAH or SA-HF for high power installations or where occasional overload is a problem. Model MA-25 offers the most economical service where power requirements do not exceed 25 watts. Note model 2YO connector.

ACCESSORIES

Model PMA Adapter

For mounting any UNIVERSITY "U" bracket speaker on standard ½" pipe.

PRICE \$1.50

Model 2YC Connector

Use with two driver units to provide up to 50 watts for any UNIVERSITY trumpet or projector.

PRICE \$10.00

Unit Adapter

For adapting Western Electric horns for use with any UNIVERSITY driver unit.

PRICE \$2.50

SPEAKERS

INDUSTRIAL PAGING SPEAKERS

These speakers are reflex air column horns with built-in hermetically sealed driver units. Models CR, IB8, and MIL are directional and models RCR and IBR have radial deflectors for uniform 360° dispersion. They are capable of continuous use for intercommunication and paging on shipboard, docks, loading platforms, terminals and industrial plants.

Models CR and RCR can handle 18 watts of input power continuously, so that they are useful for high power alarm or announcing systems. Models IB8 and IBR have a continuous power

handling capacity of 12 watts, which recommends them for paging or announcing in noisy industrial areas. The models MIL and MIS with a 3 watt continuous power capacity are efficient intercommunication speakers. The model MIS is designed for flush panel mounting.

While capable of producing adequate volume with low power, these speakers can handle more power than any other speaker of comparable size and weight. Modernization of old sound systems is easily accomplished by replacement of obsolete speakers with these models. Standard voice coil impedances permit installation without changes in the existing line or amplifier.

RADIAL REFLEX PROJECTORS

Air column horns with radial deflectors for uniform 360° sound distribution cover large areas and override high noise-levels, without blasting. Both rims rubber loaded to minimize mechanical resonance. The long air column of the RLH and its low frequency cutoff make it well suited for music and general applications. The smaller model RPH, with a somewhat higher cutoff, will serve for both music and speech. The RSH finds wide application for high clarity reproduction of speech. Shipped complete with hardware but less driver unit.

	MODEL RLH	RPH	RSH

DIAMETER	27 INCHES	18 INCHES
HEIGHT	11 INCHES	9 INCHES
WEIGHT	19 LBS.	9 LBS.
PRICE	\$35.00	\$19.60

These compact projectors consist of an acoustic chamber for housing a cone speaker and a radial deflector for uniform 360° dispersion. Of all metal, rubber cushioned construction, the model RBP-12, designed for a 12" cone speaker, provides uniform response down to 50 cycles and model RBP-8, designed for an 8" speaker, has a low frequency limit of 80 cycles. Any standard make of 8" or 12" cone speaker can be installed in these baffles. Both models are watershedding and may be used indoors or out. They are shipped complete with hardware but less cone speaker.

SPEAKERS

SUPER POWER SPEAKERS

UNIVERSITY super power speakers are the answer to every public address installation where tremendous amounts of concentrated power must be transmitted over long distances.

The Model 4A4 incorporates 4 PM driver units mounted on the back of a heavy cast mounting plate. Each driver opens into a reflexed air column on the front of the mounting plate. The four air columns feed into a common bell. Compactness makes them ideally suited for aeroplane broadcasting and use in Church towers.

In the Models B-6 and B-12, the PM driver units are mounted circumferentially on a rugged "tone chamber" casting which provides individual acoustic paths from each driver unit to a mixing chamber at the center of the casting. The patented design of the mixing chamber and the acoustic paths minimizes high frequency cancellation.

All speakers are completely waterproof and characterized by their ruggedness. Power ratings are conservative and projection ranges are often exceeded in actual operation. Speakers of this type were recently heard 15 miles in a carillon installation at the Empire State Building in New York City. "T" brackets permit a vertical swing of approximately 120° and locking in any position. Longer horns are available with B6 or B12 for music. For B6, diameter 30 inches, length 48 inches. For B12, diameter 30 inches, length 32 inches. Response 85 - 6000 cps. Prices on request. NOTE: Models 4A4, B-12, B-6 are sold and shipped less driver units. Standard driver units Model SA-HF may be used.

RAILROAD AND MARINE TYPES

UNIVERSITY marine and railroad speakers are submergence, explosion, shock and vibration proof and are unaffected by live steam. Their reflex air columns are built of rugged castings and are equipped with Alnico V PM dynamic units.

Models MSC, MM-2TC, MM-2 and MM-2F have hermetically sealed housings and built-in driver units. Models MSR and MM-2TC have space for volume control and line matching transformer. Tapped

holes provide access to volume control and for receiving a conduit. All are designed for bulkhead mounting — the Model MM-2F may be flush mounted.

These speakers will operate efficiently under the most arduous conditions — on ships, docks, in railroad yards or locomotive cabs, — in mines, laundries and mills — wherever dirt, salt spray, humidity, explosive dusts and vapors constitute a hazard.

SPEAKERS

HIGH FREQUENCY TWEETER SPEAKERS

The UNIVERSITY tweeter is designed to complement the conventional 12-15" cone speaker, providing an extended range to 15,000 cycles. No complicated wiring or networks are required. It can be connected to the voice coil terminals of an existing cone speaker through a simple, inexpensive high pass filter without creating any electrical imbalance. The shape of the die-cast dual horn provides wide distribution of the high frequencies and compact dimensions offer a variety of mounting methods. Where space does not permit the use of the dual unit, the model 4401 single tweeter is suggested. The model 4404 is housed in a walnut finished cabinet and incorporates the 4402 dual tweeter and the 4405 high pass filter.

The UNIVERSITY tweeter makes possible a high fidelity speaker system capable of reproducing every frequency audible to the human ear at a price considerably lower than comparable wide range speakers.

PRICE	\$60.00	\$10.00

High pass filter unit for use with model 4401 and 4402 — includes high frequency volume control. Cutoff frequency approximately 2000 cycles. Die cast container dimensions: 3 1/2" wide x 2 1/4" deep x 2 1/2" high.

WIDE RANGE WEATHERPROOF COAXIAL SPEAKERS

The Model WLC is a high fidelity co-axial speaker with a response range essentially flat from 50-10,000 cycles. It includes a 12" Cone speaker, a unit-driven tweeter and a built-in crossover network. Corrosion-resistant, all metal construction permits constant exposure regardless of temperature and humidity. Ideally suited for concert band-shells, drive-in theatres and all indoor or outdoor installations where high quality reproduction of music and voice are essential. A sturdy mounting bracket facilitates installation and permits tilting and locking the speaker in any desired vertical plane.

MODEL WLC

WEATHERPROOF AND INDOOR LINE MATCHING TRANSFORMERS

The new UNIVERSITY line of matching transformers is designed for use with UNIVERSITY loudspeakers in indoor and outdoor installations. Excellent performance is assured throughout the useful audio frequency range at rated output. The models 5401, 5402, 5409 and 5410 are housed in watertight enclosures and incorporate die cast mounting brackets. They may be fastened to any surface with two screws or bolts or may be fastened to the brackets of the models MIL, 1B8 or CR. When used in the latter manner, the mounting bracket of the transformer acts as a combined mounting support for both the transformer and speaker. The model 5402 may be mounted on the U bracket of any loudspeaker by means of a simple clamp which is supplied or on any surface with two screws or bolts. The uncased transformers for indoor use may also be fastened to any surface with two screws or bolts.

Model No.	DESCRIPTION	IMPEDANCE - OHMS		LIST PRICE
		PRIMARY	SECONDARY	
5401	12 Watt, waterproof case	500, 1000, 1500, 2000	4, 8	\$12.50
5402	25 Watt, waterproof case	250, 500, 1000, 1500, 2000	4, 8, 16	20.00
5409	12 Watt, waterproof case	45	8	12.00
5410	20 Watt, waterproof case	500, 1000, 1500, 2000	16	13.50
5403	12 Watt, uncased, for indoor use	500, 1000, 1500, 2000	4, 8	3.50
5403-1	12 Watt, uncased, for indoor use	45	8	3.00

KAINER SOUND PROJECTORS

NEW KAINER "High Intensity" REFLEX TRUMPETS

These NEW IMPROVED KAINER REFLEX TRUMPETS are unique in design and construction. Spun of a special steel alloy with attractive offsets adding extra strength, ruggedness and durability with improvement to the acoustic properties.

The Reflex Trumpets are beautifully finished with a gray hammerloid baked on enamel assuring increased acoustic value and durability.

The mounting fixture furnished with both the RT-26 and RT-21 Trumpets is constructed of cast malleable iron highly finished and adjustable to all practical angles. This fixture includes a handle for ease in carrying.

An optional feature is the back which encloses the driver unit adding a streamline effect to the contour of the Trumpet and protection for the unit.

As standard equipment, a moulded rubber rim attached to the beading on the edge of the bell is supplied. Both models are equipped with a threaded attachment 1 3/8" x 18 thread which will take a KAINER P. M. Driver Unit or any other standard unit.

The RT-16 Trumpet is very similar to the larger horns. It is a new addition to the KAINER line and various tests have proven it will meet every requirement for its purpose.

Permanent Magnet Driver Units—Manufactured to the highest of electrical and mechanical standards and of the finest available materials. Two models designed to take care of all public address work, rated at the same handling capacity in watts. The chief difference is in the increased efficiency in power output and in total range evident in the larger models. Diaphragms are breakdown proof at the rated capacity of 25 watts continuous operation and the unit is waterproof from all angles.

All units are equipped with 1 3/8" by 18 thread connection to fit either the R-T21 or the R-T25 Trumpet models.

Model No. DU-2

All Steel Exponential Sound Projector for 12" Speakers

Model J-12 all steel sound projector is the result of severe laboratory and field tests. It will accommodate all types of 12" speakers with or without matching transformers, including those with extra heavy permanent magnets.

Sturdily constructed of heavy spun steel alloy, it is light in weight yet strong enough to stand the abuse of heavy vibration under load as well as rough handling.

Breather opening is screened. Entire projector is beautifully finished with high lustre, baked-on, weatherproof art enamel. The malleable iron fixture to which the lower bracket can be attached is welded to the baffle and extends up the sides to include two of the speaker bolts which assures the minimum of vibration in the entire instrument.

The malleable iron base and bracket carries a tilting dog-toothed adjustment with a swivel and lock nut.

Model J-12

Overall Length 20"
 Circular Mouth Opening 17"
 Flare Extension 11"
 Shipping Weight 16 lbs.
 J-12—Horn
 List Price, Complete \$25.40

All Steel Exponential Sound Projector for 8" Speakers

Model J-8 is specially designed to accommodate all types of 8" speakers and is very similar in construction to Model J-12 above.

The sturdy spun steel alloy construction is light in weight yet very strong. The baffle is spun in only two pieces, with the exclusive KAINER wedge fit feature which overcomes vibrations under extreme load.

Built with perforated breather opening. Both baffle and bracket are attractively finished with a new high lustre, weatherproof, baked-on art enamel.

The malleable iron fixture to which the lower bracket extension can be attached is firmly welded to the baffle, and is tapped so that any distance from the floor, wall or ceiling may easily be obtained by using 1/2" pipe, nipples, couplings, etc.

Bracket attachment furnished consists of flange base with length of pipe and elbow for either wall or upright mounting.

Model J-8

Overall Length 17"
 Circular Mouth Diameter 14"
 Flare Extension 9"
 Shipping Weight 8 lbs.

J-8—Baffle
 List Price, Complete \$15.85

All Steel Exponential Sound Projector for 6" Speakers

Model J-6 is used extensively in parking lots, garages, small playgrounds, hallways, stock rooms, hotels, hospitals, warehouses and other places where call system are needed. A perfect accessory to installations where 6" speakers must withstand all weather conditions and heavy service. Severe tests have proved that the Model J-6 Baffle produces clearer and more perfectly projected speech than when unprotected speakers or flat type speaker housings are used.

Has perforated breather opening. The shell is built to accommodate any 6" P.M. speaker with matching transformer.

Constructed of heavy spun steel alloy all parts attractively finished in the new high lustre, weatherproof, baked-on art enamel. The malleable iron fixture is welded to the baffle and tapped so that any distance off the wall or ceiling may be obtained by attaching required length of 1/2" pipe, nipples, couplings, etc., thus insuring a permanent and rigid installation.

Model J-6

KAINER SOUND PROJECTORS

A New KAINER DEFLECTOR TYPE Ceiling Baffle

360° Disbursement of Sound

A baffle designed to offer even distribution of sound for low ceiling restaurants, lounges, meeting rooms, etc., where an attractive unit is welcome. Baffle plates are cast aluminum—apron or speaker housing is spun of heavy high grade aluminum alloy sheets and vibration is held to a minimum with a full circular gasket. Installation is very simple. A metal bracket, furnished with unit, is fastened to the ceiling—an 8" speaker is bolted to largest baffle plate and with apron, is then bolted to bracket. Balance of plates are then locked in place by turning up small bottom baffle plate. Finished in a gray hammerloid baked on enamel.

Model DT-8

Overall Height 8"
 Diameter 17"
 Weight 8 1/2 lbs.
 List Price **\$32.50**
 Speaker.....any 8" standard

Without Apron

Should the unit be installed in a false ceiling where the speaker may be recessed, the unit can be furnished without the apron and the largest baffle plate may be fastened directly to the ceiling. Overall Height 3"
 Diameter 15"
 Weight 6 lbs.
 List Price **\$20.50**

CHANDELIER BAFFLES FOR UNIFORM COVERAGE

CB-12

A KAINER development in speaker baffles for uniform coverage. The construction of this horn affords 360° disbursement of sound with lower deflector reducing feed back and areas of concentrated sound. This design of horn is ideal for Restaurants, Clubs, Cabarets and Dance Halls where the necessity of projecting sound close to the performers is important. It will replace multiple wall speaker installations eliminating large installation cost with a minimum of maintenance. It is spun of heavy gauge steel and finished in a beautiful baked-on enamel. It is simple to install, suspended from the ceiling with link chain. Accommodates any heavy duty 12" P. M. speaker. A moulded rubber rim is used on both bells eliminating vibrations.

Diameter 32"
 Height 19"
 Weight 25 lbs.
 List Price, Complete.....**\$37.75**
CB-8

The CB-8 is constructed of the same quality materials and design of the larger CB-12. Made to take any standard 8" speaker it offers maximum uniform coverage at minimum cost. A horn that has everything—beauty in appearance—strength—uniform sound distribution—all at a low cost.

Diameter 20"
 Height 17"

AIR COLUMN HORN Model A-C-8

Specially effective for all outdoor work: Baseball Parks, Circuses, Athletic Fields, and all installations where power and direction of sound are particularly required. (The A-C-8 Air Column Horn is well suited for applications where sound must be projected great distances and with the minimum of feedback. When using a microphone under conditions where ordinary baffles would be unsatisfactory, this horn with its uni-directional qualities will allow in most cases double or more power to be used before the feed back point is reached. (The back of this horn is completely closed, eliminating to the best possible extent, interference to person or persons using a microphone, and allowing the best possible placement of speakers either directly above and slightly forward of the microphone, or to the left or right of the microphone and slightly forward. Both of these positions eliminate bothersome "double talk" and "lag" which is objectionable to audiences. This method of placement gives the best illusion that the sound is coming directly from the person using the microphone. (The bracket attachment is welded to the horn, properly balanced, and mounting fixtures with base can be furnished as a complete unit, permitting exceptionally convenient means for installation. (THE KAINER AIR COLUMN HORN is constructed of heavy spun steel alloy, light in weight, yet very strong. All parts finished with durable baked art metal enamel. Designed for 8" HEAVY DUTY Speaker—Bell Opening 24"—Overall Length 36".

Horn Complete with Mounting Fixture, Base and Adjustable Attachment List **\$44.80**

KAINER WEATHERPROOF HORNS

Model WH-8

Construction similar to Model WH-8 except size is for 6" speaker. (Used for all unsheltered outdoor and Fire Cars, Stadiums, etc., etc. (Exceptionally sturdy construction—Possible physical damage to the cone speaker is overcome due to its inverted position. The speaker faces the inside of the horn. (This construction will withstand exposure to rain, snow and wind. (The bell and housing are spun of heavy gauge steel alloy, light in weight, yet very strong; and all parts are heavily finished with a durable baked art metal enamel. (Bracket attachment is welded to the horn, properly balanced, and mounting fixture with base can be furnished as a complete unit, permitting exceptionally convenient means for installation on Sound Trucks, Wall, or Portable Use. (Designed for 8" HEAVY DUTY Speaker. Bell Opening 22 3/4". Over all Length 17 3/4"—Height from Base 27".

\$33.85

Horn Complete With Base and Fixture.

Model WH-6

Construction similar to Model WH-8 except size is for 6" speaker. (Used for all unsheltered outdoor and indoor installations, factories, airports, sound trucks, police and fire cars, stadiums, etc. (The bell and speaker housing are of spun heavy gauge steel alloy, all parts finished with a durable art baked enamel. (Heavy aluminum casting firmly holds speaker. Mounting is attached to casting on which the speaker is mounted. (Very sturdy construction throughout. Designed for 6" Heavy Duty P.M. Speaker.

SPECIFICATIONS
 Over All Length 12".
 Shipping Weight—11 lbs.
 mounting fixture..... List **\$18.50**

Horn complete with base and

baked art metal enamel. The bell and cone are mounted on an aluminum alloy casting to which the base fixture is also attached. This insures a rigid assembly and makes it convenient to install 5" cone speaker direct to the aluminum casting.

SPECIFICATIONS
 Over All Length—8".
 Shipping Weight—5 1/2 lbs.
 Horn complete with base..... List **\$12.60**

Model WH-5—FOR 5" SPEAKERS— COMPACT AND EFFICIENT

The inverted reflex design is similar to that used in the WH-6 and WH-8 models, which aids materially to the performance of any good cone speaker. (For all purpose use, including use as a microphone in Talk-Back installations—wide frequency range, good for both music and voice. (The very substantially constructed bell and reflex cone are of spun steel alloy, finished with gray

Speaker Systems for

Theater and Home

SPEAKERS

MODEL P-52A Coaxial Speaker

Combines in a single assembly a Low-Frequency unit of the cone type, a High-Frequency unit of the multicellular type and the complementary 2-channel crossover. Ideal for AM and FM reception, broadcast station monitoring and sound-motion picture reproduction. *Electrical Characteristics:* (1) Power input: 20 Wctts; (2) Crossover Frequency: 1200 C.P.S.; (3) High-Frequency distribution: 80° x 40°; (4) Field Excitation: 6½ lb. Alnico 5; (5) Input impedance: 16 Ohms; (6) Frequency response: ± 5 db from 40 to 14,000 C.P.S.; (7) Cone resonance: 55 cycles.

Physical Characteristics: (1) Overall Diameter: 15½"; (2) Baffle Opening: 13½"; (3) Depth behind mounting panel 10"; (4) Net Weight: 30 Pounds.

Licensed under Western Electric Patents. **Price \$205 List.**

MODEL P-52FR and P-22FR Co-Spiral Speakers

Subdues deficiencies both in the set itself and in source material. Built with the same precision limits and same engineering skill found in all Tru-Sonic units. Especially designed as a replacement speaker . . . Full 15 watts of power handling capacity. Seamless molded curvilinear cone of new design. Two acoustic sections, one for reproducing lowest bass, and one for extended high tones. Reproducing range 40 to 14,000 cycles. Powerful Alnico 5 magnet. Greatest electro-acoustic transfer efficiency and widest range of any speaker utilizing one voice coil. 90° High-Frequency dispersion. Silver Spiral differential diffuser. *Specifications:* (1) Power Input: 15 Watts; (2) 2½ lb. Alnico 5; (3) Input Impedance: 8 or 16 Ohms; (4) Overall Diameter: 15½"; (5) Net Weight: 23 lbs. . . . Licensed under Western Electric Patents.

Price, Model P-52FR, 15" dia. \$80; Model P-22FR, 12" dia. \$70 List.

MODEL P-52HF Separate 2-Way System

In order to provide a de luxe presentation for the most discriminating audience, Stephens engineers have designed the Tru-Sonic Separate 2-Way Speaker System. Space requirements are greater than for the Tru-Sonic Coaxial unit, for in order to extend the tone range and permit the ultimate in realism, larger physical proportions are necessary. The P-52HF is standard in the Tru-Sonic Model 52U Utility Cabinet. Components consist of a Tru-Sonic Type P-15 High-Frequency Driver, a Model P-52L Low-Frequency Driver, a Series 800 High-Frequency Cellular Horn and a Model 800X Crossover. *Electrical Characteristics:* (1) Power input: 20 Watts; (2) Crossover frequency: 800 cycles; (3) Number of high-frequency cells: 8, 10 or 12 (See below); (4) 6½ lb. Alnico 5; (5) Input impedance: 16 Ohms; (6) Cone resonance: 55 cycles; (7) Frequency response: ± 5 db from 40 to 14,000 cycles. Weight: 130 lbs. Licensed under Western Electric Patents. . . .

Price, with 2x4 horn \$320, with 2x5 horn \$332.50, with 2x6 horn \$345, with 2x4 horn in 52SD Cabinet \$440 List.

MODEL P-52L and P-22L Low-Frequency Drivers

Low-Frequency driver components for Tru-Sonic Separate 2-Way Systems. (Model P-52L illustrated and described. P-22L same as P-52L except 12" cone diameter and 2½-lb. magnet.) Powerful 15" speaker with curvilinear-designed, highly efficient seamless moulded and moisture-resistant cone. Suspension compliance has been carefully calculated to promote ideal piston-like action of the diaphragm. Effective driving area is approximately 125 sq. inches. Voice coil is 2 inches in diameter, treated with a refined temperature-resistant varnish, and wound with highly conductive copper wire. *Electrical Characteristics:* (1) Power Input: 20 Wctts; (2) 4 lb. Alnico 5; (3) Input Impedance: 8 or 16 Ohms; (4) Cone Resonance: 55 cycles. *Physical Characteristics:* (1) Overall Diameter: 15½"; (2) Baffle Opening: 13½"; (3) Depth behind Mounting Panel: 8½"; (4) Net Weight: 25 Pounds; (5) Mounting Dimensions: RMA Standard. Licensed under Western Electric Patents. . . .

Price, Model P-52L \$80; P-22L \$70 List.

STEPHENS MANUFACTURING CORPORATION

Speaker Systems for

Theater and Home

Components for 2-Way Speaker Systems

Several systems of different crossover frequency and size may be assembled from the components shown here. However the same series of horns must be used with crossover networks of the same series number. For example, P-30 and P-40 Drivers should be used only with Series 400 and 600 Horns and Crossovers. The P-15 Driver is used with the Series 800 Horns and Crossovers only. It is desirable to use the lowest crossover and complementary components that the individual's space limitations and economy will permit. On the Series 400-600 Crossovers 2 L-F, 8 ohm drivers, preferably Model P-52L, are recommended.

HIGH-FREQUENCY HORNS

In order for the listener who is off the axis to receive his balanced proportion of high to low tones, the high-frequency beam must be properly deflected. This is accomplished in Tru-Sonic standard High-Frequency Horns by utilizing multiple cells nested together so as to provide coverage through a large horizontal angle and a smaller vertical angle. The normal listening area is entirely served in this manner with high frequencies. The High-Frequency Horn serves an additional important purpose: its design provides proper acoustic loading on the high-frequency unit without which it cannot operate efficiently.

SERIES 400

Model 425H Horn. Takes P-30 or P-40 Driver. 400 cycle, 2 x 5 configuration, 40° x 100° dispersion. 43"W x 17½"D x 31½"H overall. Weight: 65 lbs. Price, \$200 List.

Model 436H Horn and Y Throat. For larger theaters. Takes 2 P-30 or P-40 Drivers. 400 cycle, 3 x 6 configuration, 60° x 120° dispersion. 56"W x 28½"D x 33"H overall. Weight: 135 lbs. Price, \$340 List.

Both Model 425H and 436H Horns take Model 400X Crossover. Size of each 400 cycle cell: 8" x 8" x 29". Intercepts 20° solid angle.

SERIES 600

Model 625H Horn. Takes P-30 or P-40 Driver and Model 600X Crossover. 600 cycle, 2 x 5 configuration, 40° x 100° dispersion. 23½"W x 16½"D x 11½"H overall. Size of each 600 cycle cell: 5" x 5" x 15". Intercepts 20° solid angle. Weight: 35 lbs. Price, \$110 List.

SERIES 800

Model 824H Horn. 800 cycle, 2 x 4 configuration, 40° x 80° dispersion. 16"W x 10"D x 11½"H overall. Weight: 15 lbs. Price, \$50 List.

Model 825H Horn. 800 cycle, 2 x 5 configuration, 40° x 100° dispersion. 18"W x 10"D x 11½"H overall. Weight: 18 lbs. Price, \$67.50 List.

Model 826H Horn. 800 cycle, 2 x 6 configuration, 40° x 120° dispersion. 20"W x 10"D x 11½"H overall. Weight: 20 lbs. Price, \$75 List.

All Series 800 Horns take a P-15 Driver and Model 800X Crossover. Size of each 800 cycle cell: 4" x 4" x 11". Intercepts 20° solid angle.

Components for 2-Way Speaker Systems

HIGH-FREQUENCY DRIVERS

As generators of acoustic power in the upper end of the audible spectrum, the Tru-Sonic High-Frequency units present a perfect blend of sound-engineered design and listener preference. Acoustic response, in combination with Low-Frequency units, has been adjusted to levels picked as being most pleasing to a large majority of selected listeners. Actual listening tests on scores of representative groups of people have dictated the design of the acoustic proportions in the critical compression chamber.

TYPE P-40

40-Watt PM. Range: 350-16000 cycles.
16 Ohms. Dia. 6 1/4", Depth overall 5 1/2".
Weight: 35 lbs.

Price, \$200 List

TYPE P-30

30-Watt PM. Range: 350-16000 cycles.
16 Ohms. Dia. 5", Depth overall 4".
Weight: 25 lbs.

Price, \$120 List

TYPE P-15

20-Watt PM. Range: 500-16000 cycles.
16 Ohms. Dimensions: 4" x 6" x 3 3/4"
overall. Weight: 12 lbs.

Price, \$70 List

LOW-LOSS CROSSOVERS

By means of the Tru-Sonic Dividing Network, or electrical crossover, the Low-Frequency reproducer receives the lower portion of the audible spectrum. The High-Frequency reproducer receives the energy carrying the treble tones and distributes them throughout the entire listening area without loss of level. Enclosed in non-metallic containers to eliminate distortion with varying frequency, the design of these crossovers allows 12 db attenuation per octave, the standard in universal practice. Attenuation is 3 db at crossover frequency; phase rotation is 270°. Low insertion loss through perfected construction is 1/2 db. Input impedance 16 ohms, low output impedance 16 ohms, high output impedance 16 ohms on all models.

MODEL 400X

400 cycle, up to 80 watts. 6"W x 4"D
x 4"H overall. Weight: 10 lbs.

Price, \$95 List

MODEL 600X

600 cycles, up to 80 watts. 5"W x 3 3/4"D
x 3 3/4"H overall. Weight: 8 lbs.

Price, \$67.50 List

MODEL 800X

800 cycle, up to 40 watts. 5"W x 3 3/4"D
x 3 3/4"H overall. Weight 6 lbs.

Price, \$45 List

De Luxe 2-Way Systems and Cabinets

MODEL P-63HF: Specially designed for reproduction of the very highest quality source material; ideal for theaters and auditoriums up to 1750 seats. Over-size components make possible low level operation with negligible distortion for the de luxe FM station monitor room.

Conservatively rated at 30 watts to permit full dynamic impact at high levels of operation, it employs a 600 cycle crossover to relieve the two Model P-52L, 15", 20-watt low frequency drivers of high frequencies and consequent inter-modulation and cone breakup. Radical design permits horn loading down to 60 cycles. Special chamber behind drivers reinforces bass to 30 cycles. 2 x 5, 10 cell, 100° x 40° H-F dispersing horn. Model P-30, 30-watt H-F driver extends range beyond 15,000 cycles with efficiency over 50%. Total Alnico 5 magnet over 11 pounds. Equipped with H-F attenuator to perfectly balance room acoustics. Size, 25" deep by 36" wide by 45" high, allows this unit to be employed under practically any space limitation. Input: 16 ohms. Wt.: 245 lbs. **Price, \$675 List.**

MODEL P-63HF

MODEL P-63HF-SD

2-Way System in Period Cabinet, mahogany or bleached blonde (please specify). 30 cycle, 36"W x 25"D x 45 1/2"H. Wt.: 245 lbs. **Price, \$807.50 List.**

MODEL 52SD

Period De Luxe Cabinet, mahogany or bleached blonde (please specify). 8 cu. ft., 37 cycle, 15" baffle. 28 3/4"W x 19"D x 36 1/2"H. Weight: 80 lbs.

Price, \$180 List.

With P-52A Coaxial Speaker,

\$385 List.

With P-52HF 2-Way System,

PUBLIC ADDRESS SERIES

These units are primarily engineered for heavy duty public address service. They are conservatively rated, and are designed to give years of trouble-free service. The efficiency and the tone quality of these units are such that they are recommended for all purposes requiring heavy duty units.

Size	Model	Magnet Alnico-5	VOICE COIL			List Price
			Impedance	Diameter	Watts

EXTENDED RANGE SERIES

Designed expressly for F.M. and Television use, these units are also suitable for all installations requiring good performance to 10,000 c.p.s. CINAXIAL Models illustrated at left extend to 15,000 c.p.s. Especially recommended for high quality name phonograph reproduction, studio monitoring and similar wide range installations. These speakers are not recommended for general public address use because of limited power handling capacity. Models P8JHF1 and P12JHF1 are single cone speakers; CIN-12A consists of 12" low frequency speaker and 3" high frequency speaker. CIN-15B and CIN-15C have 15" low frequency speaker and 5" high frequency units. Bridging networks are built-in, require no controls.

Manufactured and distributed by EMCO SOUND EQUIPMENT CORP., BROOKLYN, N. Y.

NEW! ARMORED ALL STEEL WEATHERPROOF MARINE STEEL

• FOR 6" — EASY MOUNTING

These weatherproof marine horns will withstand direct driving rain without damage to the cone speaker, constructed entirely of heavy gauge steel to withstand extreme hard use. The speaker dome is lined with acoustic felt to absorb back pressure and eliminate extra high frequencies and metallic resonance. Ideal for use in all indoor and outdoor installations. The special construction of these horns enables the reproduction of both voice and music with excellent fidelity of tone. Finished in a beautiful and durable weather resisting slate gray baked wrinkle enamel. Supplied with a unique and convenient mounting bracket which enables the speaker to be focused in any direction.

For 6" speakers.....Model MM-6.....List Price \$14.50

MARINE MIDGET BAFFLE

Designed for indoor and outdoor use. Inverted reflex design corresponds in effect to air column of 15 inches. Speaker housing is lined with a heavy acoustic felt to eliminate extra high frequencies and metallic resonance. Made of extra heavy gauge aluminum, finished in a beautiful battle ship gray. Adjustable bracket is supplied for mounting. Overall size 8", bell diameter 10".

Model MM-15List Price \$10.50
5" permanent magnet speaker ideally suited for use with above baffle. Output rating 5 watts.

Model PM-5List Price \$4.00

ARMORED ALL STEEL BAFFLE

This new armored all steel baffle is made to withstand the severest service, the all steel construction makes it impossible to dent or damage any part of this baffle. Resonance effects are eliminated due to the modern design incorporated in the construction. All holes for mounting speaker are punched, hardware for mounting speaker and hanging loops are supplied. Speaker dome large enough to accommodate all types of 12" P.M. and Dynamic speakers with sufficient room for transformer. Finished in a handsome and durable weather resisting slate gray wrinkle baked enamel.

Model No. AB-12List Price \$13.50

TRUCK MOUNTING BRACKET

Designed especially for our AB-12 baffles. A convenient fixture for mounting these baffles on sound trucks. Has four way swivel joint adjustment for tilting these baffles on sound trucks. Made of extra heavy malleable steel casting, finished in gray crinkle.

Model MT-8 List Price \$5.00

Saddle & Swivel

A convenient bracket for AB-12 baffles. Made of extra heavy malleable steel casting. Has four way swivel joint adjustment finished in gray crinkles with positive grip locks.

Model SS-7 List Price \$3.00

MOUNTING STAND

A heavy stand designed especially for AB-12 baffles. Extends from 5 to 9 ft. Weighs 40 lbs. Has 18 inch diameter base. A special bracket and clamp permit the tilting of baffle at any angle. Two locking collars prevent slipping. These stands are very excellent for temporary and permanent installations.

Model HS-40List Price \$25.00

Symphonic MUSIC BOX FOR 12" SPEAKERS

A beautifully designed cabinet made of choice Walnut Veneers, and handsomely finished. Heavily constructed and reinforced throughout. Cleverly designed grill adds to the beauty of this cabinet. The slope front gives the proper directional effect to the speaker. Supplied complete with

hardware for mounting speaker.

Model SM-12List Price \$12.00

For 8" speakers, general construction and appearance same as above, physical size smaller to accommodate 8" speakers.

Model SM-8List Price \$9.00

EMCO • MICROPHONE STANDS

Manufactured and distributed by EMCO SOUND EQUIPMENT CORP., BROOKLYN, N. Y.

EMCO now introduces a new and more complete line of microphone stands, incorporating the latest features that modern engineering could produce. EMCO presents **smooth action**, a means for raising and lowering the microphone easily, smoothly and noiselessly. EMCO brings you the new **wear-ever, sure grip** automatic friction clutch lock, for locking the stand at any

desired height. Due to the hardened fibre bushing incorporated in the clutch construction of these stands, all possible wear is eliminated, and will allow them to last for an indefinite period of time. All EMCO stands incorporate heavy gauge brass tubing throughout, which is extra heavily chrome plated. All have $\frac{5}{8} \times 27$ thread for all crystal or velocity microphones.

MODEL	BASE FINISH	TUBE FINISH	BASE DIAMETER	HEIGHT	WEIGHT	LIST

NOTE: Bases finished in gray crinkle are available in black crinkle on request

BANQUET STANDS

BS30—A modern banquet stand, incorporates **SMOOTH ACTION** and the new **SURE GRIP** automatic friction clutch lock, tubing of extra heavy gauge brass, heavily chrome plated. Base finished in beautiful gray crackle. Has rubber bumpers on base to eliminate scratching of table top. Base diameter 7", opens from 18 to 33 inches, has $\frac{5}{8} \times 27$ thread to fit all standard crystal and velocity mikes.
List Price \$6.00

BS5—An economically priced stand, base finished in gray crackle, tubing chrome plated. Base diameter 6 inches, height 9 inches. Has $\frac{5}{8} \times 27$ thread for microphone. Net weight 2½ lbs.
List Price \$2.25

BS6—A de luxe stand, all features same as model BS5, except base and tubing are both beautifully finished in chrome.
List Price \$3.50

BS7—A low priced stand. Has 6" diameter, base beautifully finished in gray crackle, tubing heavily chrome plated. Has automatic friction clutch lock for adjusting height. Opens from 10 inches to 15 inches. Has $\frac{5}{8} \times 27$ microphone thread, net weight 3 lbs.
List Price \$3.75

BS8—De luxe adjustable stand. All features same as model BS7, except base and tubing are both finished in chrome.
List Price \$4.75

BS10—A stand designed for use on desk with heavy velocity microphones. Base finished in beautiful gray crackle. Thread $\frac{5}{8} \times 27$ to accommodate microphone. Net weight 2 lbs.
List Price \$2.00

BS11—All features same as BS10 except the base is beautifully finished in chrome. $\frac{5}{8} \times 27$ thread for accommodating microphone.
List Price \$3.10

CARRON UNIVERSAL FIELD COILS

Check maximum and minimum dimensions carefully. The winding must be physically close to the original. We have allowed a maximum variation of 1/8 inch spacing from coil to core, a variation in width of 1/4 inch and we suggest that the universal coil selected should have a diameter as close to the original as possible. 3/8 inch

smaller is the limit for safe operation. All of the wire in our universal field coils is in use at all times. Two resistance ranges are possible. One with the windings in parallel and the other with the winding connected in series. Complete directions furnished with each coil.

CARRON MANUFACTURING CO.

CARRON COILS

ANTENNA AND R.F. COILS Important! Read This Before Ordering

The coils in the following list are so grouped that a selection may easily be made. Coils of the same group may be tracked together, and where used in a superheterodyne, choice of an oscillator coil having the same color code dot will result in proper tracking over the desired range.

Two general ranges are covered—1715-560 K.C. and 1500-540 K.C. In each case, some overlap is obtainable. The coils for the 1715-550 K.C. range (coded red dot) are usually tuned with a 410 mmfd. gang condenser, while the latter (coded green dot) are tuned with 365 mmfd. condenser.

MIDGET COILS

Furnished shielded or unshielded, these coils represent the latest trend in the design of small air core inductances. "Universal Progressive" bank wound with "litz" wire on impregnated tubes, high impedance primaries of silk enamel wire, and careful design make these coils exceptionally "hot." Even gain is obtained over the broadcast band due to the use of "litz" wire and the choice of winding type. Oscillator Code "Green Dot."

Unshielded Type		
S370 Ant.	\$0.69
S371 R.F.69

Shielded Type		
Can size 1 1/8" x 1 1/4" long. Mounting centers 1 1/4".		
S372 Ant.	\$0.87
S373 R.F.87

PEE-WEE COILS

Designed for the experimenter and for use in service replacement for the miniature sets which have become so popular. Secondaries are "progressive" wound with litz wire on a 1/2" x 1 1/2" impregnated form, high impedance primaries and coupling turns are provided to give maximum response throughout the broadcast band. "Ear" lug mounting is provided on the Antenna Coil and a bent bracket on the R.F. Coil. RMA color coded for ease in connection, mounting space (maximum over primary) 7/8" x 1 1/2". Green dot oscillator code.

S407 Antenna, List	\$0.69
S408 R.F. List	.69

ECONOMY TYPE UNSHIELDED UNIVERSAL ADJUSTABLE COILS

For use in sets for which no exact duplicates are available. The secondary is adjustable with an iron core slug for all values of inductance usually encountered in replacement work. The primary is wound on a slip-over adjustable collar.

Color coded with Universal bracket for mounting in a can up to 2 1/8" O.D. or may be used unshielded and mounted in a single hole. Complete instructions furnished.

Cat. No.	Type	List

FOR OUR COMPLETE COIL LINE

OSCILLATOR COILS

Designed for operation with any tube using conventional feedback methods. Color coded for connection. Paddder values furnished. In choosing an oscillator coil be sure to choose the proper code to agree with the R.F. and antenna code, "red" or "green" dot. Wound on a special new form which we have developed, with cotton covered enamel wire thoroughly dehydrated, treated with Carron HQ711, and flash dipped in a high melting point wax.

Tapped Oscillator Coil for "Electron Coupled" Converter Tubes
Designed particularly for use with converter tubes such as the 6SA7. These coils are for operation with 455/6 K.C. I.F. frequencies only.
S416 Green Dot \$0.94

MIDGET I.F. TRANSFORMERS

Mica Tuned, Ceramic Base Trimmer—1 1/8" x 1 1/8" x 2 1/2" Overall Wound with the most suitable wire and winding for its particular frequency. A stable, non-warping, ceramic base trimmer is employed, impregnated winding forms and overall "flash" d.p. Coupling and gain are set to the optimum value for "universal" application. May be used in either one or two stage amplifiers.

Cat. No.	Freq. K.C.	Midget Standard I.F. Position	List
S356	455	Input—Int.	\$1.55

Midget Iron Core I.F.			List
S362	455	Input—Int.	2.20
S364	455	Output	2.20

"CARTWHEEL" UNSHIELDED I.F.'s

Designed for unshielded operation in midget radios. Should not be employed in cases where the original was furnished in a shield can nor should they be placed in a shield.

Cat. No.	Freq.	Position	List
S466	455	Input—Int.	\$1.35
S429	455	Output	1.35

FM I.F. TRANSFORMERS

- S-775 10.7 MC I.F. TRANSFORMER—Band width plus or minus 150 KC, preloaded, mica trimmer, tuned from top—in 1 1/8" x 1 1/8" x 2 1/2" can. For F.M. broadcast receivers. 1st, 2nd, and 3rd stage. Spade lug mounting. List \$1.55
- S-777 10.7 MC I.F. DISCRIMINATOR—Band width plus or minus 150 KC, preloaded, mica trimmer, tuned from top—in 1 1/8" x 1 1/8" x 2 1/2" can. For FM, broadcast receivers. Companion coil for S-775. Spade lug mounting. List \$2.00
- S-774 10.7 MC I.F. TRANSFORMER—Band width, preloaded for plus or minus 75 KC, which can be increased to plus or minus 200 KC by additional loading. Mica trimmer, tuned from top. In 1 1/8" x 1 1/8" x 1 1/2" can. For amateur and communication F.M. receivers. Also for Broadcast F.M. receivers when additional loading is used. Spade lug mounting. 1st, 2nd, 3rd I.F. List \$1.55

STANDARD WAVE TRAPS

Additional Coils Not Shown In Our 1946 Catalog

Standard wave traps, mica trimmed tuned, in 1 1/8" x 1 1/8" x 2 1/2" can. Iron core coils. Ear lug mounting permits wood screw mounting to cabinets, etc.

S-399—3500 KC to 4000 KC	S-382—600 KC to 800 KC
S-627—1600 KC to 1800 KC	S-381—500 KC to 600 KC
S-398—1400 KC to 1600 KC	S-628—400 KC to 500 KC
S-395—1200 KC to 1400 KC	S-629—225 KC to 285 KC
S-396—1000 KC to 1200 KC	S-360—165 KC to 185 KC
S-397—800 KC to 1000 KC	

List \$1.75 each

NOTE: The can size has been changed on the above wave traps from the previously catalogued round can.

SPEAKERS BY OXFORD

Oxford Speakers are one of the oldest lines in the radio industry. Literally millions of these fine speakers have been sold to manufacturers, radio servicemen, amateurs, P. A. specialists, sound equipment operators, broadcast stations, experimenters, etc.

From the 2- to the 15-inch speaker, the Oxford line is complete and every unit is built with the same painstaking care and engineering skill. Each unit is individually tested, and voice-coils are conservatively rated, assuring the buyer of a superior product.

To the left is the famous 12" OXFORD Speaker such as is used in fine radio consoles.

The supreme speaker of them all, the OXFORD 15".

The well-known and widely-used smaller type of OXFORD Speaker with the transformer.

SOME FACTS ABOUT OXFORD SPEAKERS

Only Oxford Speakers are equipped, optionally, with the patented, pressure thread device which makes a more sensitive speaker than one with the usual magnetic assembly. Actual tests have shown this to be a fact. At Oxford, speakers are carefully tested individually to insure complete freedom from raps, rattles and chips. The production at Oxford is so arranged that it is impossible for a speaker to reach the packing stage without this test having been made. At Oxford a complete experimental engineering laboratory is maintained for the exploration of novel and untried means for the improvement of the general subject of loudspeakers. Many problems are tackled here, and while many are discarded for one reason or another, still the purchaser of an Oxford Speaker may rest assured that the unit he buys is entirely up to the minute in design.

SP-6	3/4 x 3/4	Push-Pull Output	Leads
U-43	3/4 x 3/4	Universal Output	Lugs*

* Six secondary taps brought out to solder lugs. All transformers have 3.2-ohm nominal secondaries.

The Home of the World's Finest Custom-Built Cabinets

Announces the production of a new quality console cabinet line

MODEL 700

To the already great line of quality cabinets JACKSON has added Model #700, the WINDSOR, which has two large record storage spaces, hand-rubbed piano finish and beautiful carved molding. Made of one-inch or heavier lumber core plywood. Will hold any standard record changer and almost every standard radio chassis. ALSO ADAPTABLE FOR TELEVISION. CAN BE USED WITH MOST TABLE MODEL TELEVISION SETS AS WELL AS MOST 7" AND 10" KITS.

MODEL 450

An ideal console in the lower-priced line. Lift-up type. High quality piano finish and genuine veneer. Will hold any standard record changer and most standard radio chassis.

MODEL 500

Another fine console from JACKSON. Two large record storage spaces, beautifully carved molding and hand-rubbed piano finish. Will hold any standard record changer and most standard radio chassis.

Space does not permit illustrations of the two other fine radio-phonograph console cabinets which are now available. However, both conform to the style set by the models shown above. They, too, will hold any standard record changer and most standard radio chassis.

ALL OF THESE CABINETS ARE AVAILABLE IN WALNUT, MAHOGANY AND BLONDE

Full information on these as well as all other JACKSON products, including table model radio replacement cabinets, speaker baffles, speaker and amplifier cases, portable phonograph cases, etc., can be obtained by writing to us for special cabinet catalogue.

It's JACKSON for QUALITY...WORKMANSHIP...ECONOMY

VR2 DYNAMIC MICROPHONE

A Microphone with a NEW IDEA and a NEW USEFULNESS

For the first time, the many desirable characteristics found only in several different types of microphones have been combined in a single unit. The VR2 has an easily accessible external adjustment of the most important acoustical reactors in the dynamic microphone. A smooth change from a communication-type response, with a cutoff below 500 c. p. s., through a flat response to an augmented bass, attained by a simple, positive adjustment.

The response adjustment on the VR2 has a very broad effect and does not introduce narrow peaks. It is different from anything previously introduced.

Complete with 12½' cable and plug at microphone providing balanced line. Dull chrome finish. Net wt. less cable, 15 ozs. Hgt. 4". Greatest diameter 3".

VR2T Dynamic (38,000 ohms), Code: VARIT. List \$42.15

Available on order in 200 or 500 ohms. List \$42.15
(Complete with 12½' cable)

VRT Dynamic (30-50 ohms), Code: VARIA. List \$39.15

(Complete with 12½' cable)

The above graph illustrates the average response characteristics for the various settings, as indicated on the scale.

D8T DYNAMIC MICROPHONE

THE D8T DYNAMIC MICROPHONE has been carefully designed to have a consistent, well-balanced response. It is exceptionally rugged and assures the user of trouble-free service over a long period of time.

The D8T is particularly useful for all types of public address installations, orchestra pick-up, as well as solo work and straight announcing.

The D8T is 3¼" long, 2" in diameter, weighs only 13 ozs. A swivel mounting permits either nondirectional or semidirectional pick-up. Comes complete with 12½' cable and plug at microphone and 5/8" x 27 thread for suspension or stand mounting. Platinum Chrome Finish.

D8T Dynamic (38,000 ohms), Code: DATAH. List \$30.00
Available on order in 200 or 500 ohms. List \$30.00

D8 Dynamic (30-50 ohms), Code: DATAL. List \$27.00

D5T DYNAMIC MICROPHONE

IN FOURTH YEAR PRODUCTION

THE D5T DYNAMIC MICROPHONE is well known. An excellent, diversified-purpose microphone. The dynamic is the most rugged type microphone and its life of trouble-free operation is indefinite. Being a pressure-operated instrument, the response is unaffected by either a close or distant sound source. The D5T approaches the ideal microphone for general use due to its versatility and dependability. Sensitivity: 52 db below 1 V/bar.

D5T Dynamic, 38,000 ohms, Code: DYHIM. List Price \$39.00

Available on order in 200 or 500 ohms. List Price \$39.00

D5 Dynamic, 30-50 ohms, Code: DYLOM. List Price \$33.00

Moving-Coil Permanent Magnet Dynamic • Semidirectional • Close or Distant Pick-up • Excellent Frequency Response • Freedom from Wind Noises • High Output, Low or High Impedance • Immune to Temperature Changes • Minimum Feed-Back (Flat Response) • Low-Level Mixing • Exceptionally Rugged.

Insures Minimum Record Wear. Performance not affected by climatic conditions. Standard cartridge mounting holes. Semi-permanent stylus.

.003 volt open circuit output at 1000 cps, using Columbia Test Record 10003-M. Transformer TMC (Sub-motorboard mounting) develops 0.1 volt into high impedance amplifier "Phono" input under above test conditions.

TRANSFORMER TMC, Code: CADET.....List Price \$2.50

C6 CRYSTAL MICROPHONE

EXTREME SENSITIVITY. New crystal driving lever twice as efficient as previously used, produces twice the voltage output with equal sound pressure.

BROADER RESPONSE. Results of new construction include extension of both low and high end.

BASS END IMPROVED. Naturalness insured by improvement in low frequency response.

LONGER LINES. By increasing the voltage output the cable length may be increased proportionately. In laboratory tests, regular cables 250 feet in length have been used with a net voltage sufficient to operate any standard high gain amplifier.

MECHANICAL NOISE REDUCED. Mechanical and stand noise is no longer a factor. The C6 method of crystal mounting reduces mechanical noises by 12 db.

LESS AMPLIFIER AND INDUCED NOISE. The high output of this microphone assures a very desirable signal-to-noise ratio.

SWIVEL HEAD. All carries for semidirectional and nondirectional pick-up are provided by the 5/8" x 27 (standard) mounting connector.

Complete with 7' cable and plug at microphone. Polished chrome finish. Net weight 6 oz.

Over-all height 3" Diameter 2 3/8" 1/4x27 thread provided for suspension or stand mounting.
C6 Crystal, Code CESIX.....List Price \$18.00

D9A Unidirectional MICROPHONE

GUARANTEED to produce 30% MORE VOLUME (power) than any microphone at twice the list price. UNIDIRECTIONAL, True CARDIOID pattern pickup, frequency response good to 10,000 c. p. s. Actual Tests are Convincing Arrange for Test with your Jobber

THE D9A DYNAMIC, a pressure-velocity combination microphone, with pick-up from front only, broad frequency response and high output, plus the usual dynamic microphone qualities of ruggedness, immunity to weather conditions, and circuit adaptability, should fill the majority of requirements.

The D9A Microphone is recommended for public address and general sound installations because its energy response field (cardioid of revolution) excludes extraneous pick-up and reduces feed-back by two-thirds. May be used for close talking due to the modified velocity section which also reduces wind noises to a minimum.

The above graph illustrates the average response characteristics for the D9A and D9AT. Voltage output levels, for 1 bar sound pressure (1 bar=1 dyne per sq. cm.) of the high and low impedance models. For 10 bar signal the output will be 20 db. higher.

Net weight, 2 1/2 lbs. Packed weight, 4 lbs. Height, 7 1/2" depth, 2 1/4"; breadth, 2 1/2". Standard 3/8-27 thread provided for suspension or stand mounting. Finish: Satin Chrome.

25' Shielded Rubber-jacketed Cable Supplied with each Microphone.

D9A. Low Imp. (50 ohms). Code: LOWEL.....List \$42.00

D9AT. High Imp. (38,000 ohms). Code: HIWEL.....List \$45.00
Available on Order in 200 or 500 ohms.....List \$45.00

D4T DYNAMIC MICROPHONE

A QUALITY, LOW-PRICED, MOVING-COIL MICROPHONE. For general use where clear speech and natural music reproduction is required. This new AMERICAN microphone is a very efficient instrument, having a broad range, from 60 to 7500 c.p.s., and high output of -56 db (0 db=1 v/bar). The utility value lies not only in the quality and type of response but also in mechanical features, such as light weight (approximately 10 1/2 oz), a full 180° vertical angular setting, and positive friction lock at the swivel.

The D4T, high impedance, is equipped with a single-contact, shielded plug. The 50, 200 and 500 ohm models are equipped with a two-conductor plug and have a balanced line out.

The D4 model is of voice-coil impedance, approximately 30 ohms. Lines up to several hundred feet may be used on all models except the high impedance, where line should be restricted.

The complete assembly includes 12 1/2 feet of shielded, rubber-covered cable and shielded plug. Finished in platinum chrome. Standard mounting, 3/8" x 27 thread.

D4T Dynamic (38,000 ohms), Code: DFORT.....List Price \$24.00

Available on order in 200 or 500 ohms.....List Price \$24.00

D4 Dynamic (30-50 ohms), Code: DEFOR.....List Price \$21.50

D6T DYNAMIC MICROPHONE

Ideal for general public address including stage sound-reinforcement, both permanent and portable installations. It is entirely suitable for playground and athletic field direction, police and amateur broadcasting, and recording.

Net weight, 1 3/4 lbs. Packed weight, 2 lbs. Height, 3 3/4", diameter 2 1/2". Standard 3/8-27 thread provided for suspension or stand mounting. Finish: Polished Chrome. 12 1/2' Shielded Rubber-jacketed Cable supplied with each microphone.

characteristics may be had by varying the angle of the microphone to the source of sound. For non-directional horizontal pick-up, the response is substantially flat.

D6T Dynamic (38,000 ohms), Code: DIXIT.....List \$33.00

THREE TYPES OF RESPONSE FOR ALL PURPOSES

HIGH—For all purposes requiring richness in the higher frequencies. Slightly rising characteristic. (From 150 to 10,000 cps.)

FULL—For high fidelity requirements where smooth, flat response and broad range are necessary. (30 to above 10,000 cps.)

LOW—For pickup systems requiring embellished lows and good intermediate range. (25 to 5000 cps.)

C7 CRYSTAL MICROPHONES

The development of the new American Crystal Microphones, Model C7H and Model C7L, represents many features which have been available only in several previous types. The response characteristics have been chosen so that the C7 can be used equally well for recording with a minimum amount of amplifier equalization and also for public address. **A new system of coupling the crystal element to the diaphragm is employed which produces a smoother response and 100% greater efficiency equivalent to double the output of usual direct drive type of coupling.** High or low impedance may be had in the Model C7. An efficient transformer is used to reduce the inherent high impedance of the crystal generator to standard line impedances. Long lines with negligible losses may be used.

Complete with 12½ ft. cable

- C7H** High Impedance Code: CSEVN LIST **\$24.50**
C7L Available in 50 ohm or 200-250 ohm or 500 ohm. Code: CSEVL LIST **\$29.00**

DHT DYNAMIC HAND-HELD MICROPHONE

Shock-proof Diaphragm - Press-to-talk Locking Type Switch Retractable Hanger

This compact, sturdy microphone was designed for all applications requiring a dependable hand microphone for voice communication. Small and lightweight, it can readily be concealed in the palm of the hand. An Alnico V magnet, efficient magnetic circuit and newly developed diaphragm and voice coil assembly combine to generate the high output of 56 db below 1 volt per bar for the high impedance model.

Other desirable features are: convenient hanger which retracts into the case of the microphone when not in use; molded plastic diaphragm not affected by heat, moisture or mechanical shock; supplied with five feet of low loss cable; press-to-talk locking type switch for operation of the microphone unit. Additional switch contacts on request.

The curved arm with off-set head was designed to provide optimum tracking for both ten and twelve inch records with minimum wear of record and stylus. Base of the arm is designed for single hole mounting. Assembly includes CR-1A Crystal Cartridge, twenty-four inch single conductor shielded wire, arm rest, mounting hardware and complete mounting instructions.

CR1A CRYSTAL CARTRIDGE

CR-1A Cartridge is a high output, wide range unit, which incorporates a number of new developments in cartridge design. High output and improved response are obtained by a unique method used to drive the crystal element. The cartridge is supplied with pin plug connectors for ease of

assembly into the arm—no soldering iron is required. The needle chuck design incorporates a "locked-in" feature whereby the chuck is prevented from moving when tension or pressure is applied to the needle screw. This feature also insures that the needle socket will remain centrally located in its opening in the cartridge. High needle point compliance and minimum record chatter are thereby guaranteed. The cartridge will operate satisfactorily with any conventional needles; however, its high-frequency response will vary somewhat with the type needle used. Best operation will be obtained with off-set needles using sapphire or precious metal styli.

New STUDIO "Ribbon" MICROPHONE

Models R80H—R80L

A "Blastproof" Velocity

Eliminates Feedback Troubles

The finest in microphones, regardless of price. Reproduction is of the very highest type. Excellent for broadcasting, recording and public address. Eliminates feedback troubles. Will not become "boomy" on close talking. An entire orchestra can be faithfully reproduced.

Pick-up angle 120° front and back with practically no frequency discrimination. In spite of the wide pick-up angle, feedback is reduced to a minimum.

Not affected by temperature, altitude or humidity. Will operate under any climatic conditions—indoors or outdoors. Not affected by wind.

Frequency range 40-14,000 cps. Output—56 db. Complete with switch, (optional), cable connector, and 25' cable. Finish—Chrome. Stand thread, Standard 5/8"—27.

R80H—High impedance	80.00
Shipping Weight 10 lbs.	

New "RIBBON" MICROPHONE, RBHG—RBLG

Automatically Adjusted for Close or Distant Pick-Up
A "Blastproof" Velocity

Studio reproduction—low feedback. A "ribbon" microphone that brings broadcast quality within everyone's reach. Perfectly natural reproduction on close talking—you can even shout into it. Will also faithfully reproduce an entire orchestra.

Pick up angle front and back—120° with practically no frequency discrimination. In spite of wide pick-up angle—feedback is reduced to an absolute minimum. Low feedback is due to flat response of the microphone.

Excellent for studio—P. A. or recording. Not affected by temperature, altitude or humidity. Can be used under all climatic conditions, and will withstand rough handling. Not affected by wind.

Frequency range 50-11,000 cps. Output—62 db. Complete with switch, cable connector, and 25' cable. Finish—Chrome. Stand thread—Standard 5/8"—27.

Model RBHG—High impedance	\$42.00
Model RBLG—200 ohms output	42.00
50 ohms available.	
Shipping Weight 8 lbs.	

COMPACT VELOCITY, ACH—ACL

The smallest complete velocity ever made

Compact—yet a complete Amperite "Ribbon" Microphone including transformer, switch and cable connector. Recommended wherever a compact microphone is a necessity. Can be used either as a hand microphone or on a stand. Frequency range 120 to 8,000 cps. Output—65 db.

Complete with switch—cable connector—12' cable. Stand thread—Standard 5/8"—27.

Model	List
Model ACH—High impedance	\$32.00

(Available with ON-OFF Switch at \$2.05 extra.)

The CONNEAUT

● The "Conneaut," Model No. 600, is a new, streamlined, semi-directional crystal microphone with relatively high output and wide frequency range. Ideal for public address and paging systems, amateurs' rigs and other communication uses. Overall frequency response is exceptionally smooth up to 10,000 c.p.s. and will satisfy the most critical demands for high fidelity performance. The Conneaut is of modern, streamlined design and beautifully finished with bright chrome housing and grille. Standard equipment includes 25 ft. cable and spring or detector. Three models are available.

	List Price
600—Code ASUFZ	\$30.00
600-S—Code ASIFY, with S-Switch	32.70
G-600—Code ASIFX, with G-Stand	35.45

"CARDINAL" CRYSTAL

● A sparkling, low-cost beauty with performance comparable to high-priced units. Lifts from its streamlined, dark brown plastic desk stand for hand use. Wide range response, adaptable to standard AC or DC circuits.

	List Price
	(For Microphone only)
CX—Substantially flat—Code ASAOA	\$9.75
CX-1—Rising characteristics—Code ASAPZ	9.75

(Available with switch, \$1.50 extra. Hang-up hook, \$0.25 extra. "Cardinal" Base only, \$1.00. Stand Adapter, \$0.35 extra.)

"CARDINAL" DYNAMIC

● Duplicate of Model CX in appearance, but equipped with dynamic unit, available in 500 ohm and high impedance models.

	List Price
	(For Microphone only)
CD-5—(500 ohms)—Code ASAOE	\$19.50
CDH—(High Impedance)—Code ASAOE	19.50

(Available with switch, \$1.50 extra. Hang-up hook, \$0.25 extra. Stand adapter, \$0.35 extra.)

The WR-SERIES

● The WR-Series, Multi-Unit Microphones, are highly recommended for studio, public address and high quality recording purposes. Substantially flat frequency response up to 10,000 cycles. Due to their special interior assembly design, the WR-Series Microphones are practically transparent to sound waves and cannot be acoustically overloaded. Model WR-20 may be used on cable up to 100 ft. with negligible loss of output and Model WR-40 is more than able to handle cable twice this length. Output level—56 db. Finish, bright chrome with satin chrome grille. Cable length, 25 ft.

	List Price
WR-20—Code ASVGZ	\$32.30
WR-40—Code ASVAL	43.25

(Available with S-Switch or G-Stand)

MODEL D-104

● For close talking applications, such as radio amateur communications and similar uses. With high output level—48 db, it possesses definitely reduced R.F. feedback tendencies. Yoke-driven, bridge-mounted Graphite crystal element, shock-proof mounting and barometric compensation. Speech range frequency response from 30 to 7,500, rising 500 to 4,000 c.p.s. Chrome finish. Standard equipment includes interchangeable plug and connector, spring cable protector.

	List Price
D-104—Code ASUPA	\$24.60
GD-104—Code ASVAX, with G-Stand	30.10
D-104-S—Code ASUPB, with S-Switch	27.35

ASTATIC

MICROPHONES AND STANDS

The JT-SERIES

• Because of its wide range of usefulness, excellent performance and low price, Astatic JT-Series Crystal Microphones are used extensively for amateur, public address and home recording. JT-Series Microphones are available in both wide and voice range models and, in addition to standard equipment, are furnished complete with concentric cable connector, convenient wood handle, interlocking metal base and 15-ft. shielded cable. Wood handle may be removed and microphone used on floor stand. Output level —52 db provides ample reserve for use with high gain amplifiers. Opalescent gray with bright chrome grille.

List Price

JT-30—Substantially flat,
Code ASVLG \$16.95
JT-40—Rising characteristics,
Code ASVLD 16.95

The DYNAMIC

• Model "DN" is a semi-directional, all-purpose dynamic microphone incorporating a new unitary moving coil system, and carefully proportioned acoustic circuit to highly damp the natural resonance of the moving system and provide a response characteristic substantially flat from 50 to 7,000 cycles. The "DN" design employs all features necessary for wide applicability, including Astatic's tilting-head, swivel mount, permitting semi- or non-directional positions. Opalescent gray and bright chrome finish.

List Price

DN-50 —(50 ohms)
Code ASVNI \$21.90
DN-200—(200 ohms)
Code ASVNI 24.60
DN-500—(500 ohms)
Code ASVNI 24.60
DN-HZ —(5 Meg.)
Code ASVNG 24.60
All Models available with G-Stand

The N-SERIES

• N-Series Crystal Microphones are especially desirable for modern public address installations. Swivel joint, tilting head permits adjustment to either semi-directional or non-directional position. Four models are available. N-30 Models with output level —52 db, are high fidelity, wide range microphones, 30 to 10,000 cycles. N-80 Models are voice range microphones, output level —49 db, with rising response to 3,000 cycles. Finished in opalescent gray with bright chrome grille. Complete with 15-ft. cable and spring protector.

List Price

N-30 —Wide Range,
Code ASVJR \$19.15
N-80 —Voice Range,
Code ASVJP 19.15
N-30-S—with S-Switch,
Code ASVJN 21.90
N-80-S—with S-Switch,
Code ASVJL 21.90

The MODEL T-3

• Definitely established by long and continued popularity, Model T-3 Crystal Microphone is highly practical for many and varied applications. Its use is suggested for studio set-ups, with amateur rigs, intercommunicating systems, public address installations and for high class recording purposes. Microphone head may be tilted with ease on unique swivel mounting and pickup pattern made semi- or non-directional, as desired. Output level —52 db. Frequency response substantially uniform from 30 to 10,000 cycles. Equipped with interchangeable plug and socket connector and 25 ft. cable. All chrome finish.

List Price

T-3 —Code ASVIX \$27.35
T-3-S—Code ASVCW,
with S-Switch 30.10
GT-3—Code ASUZD,
with G-Stand 32.85

MODEL K-2

• Because of its smooth, undistorted reproduction and the fact that it cannot be acoustically overloaded, Astatic Model K-2 crystal Microphone is favored and extensively used. In this model, Astatic provides a small size, dual-diaphragm type crystal microphone for studio use, recording, dance bands, public address installations and general applications where quality performance is required. With dual crystal unit design, Model K-2 has twice the capacitance of the usual crystal microphone and correspondingly longer cable lengths may be used. Standard equipment includes plug and socket connector and 25-ft. cable. Bright chrome finish.

List Price

K-2 —Code ASURX \$30.10
K-2-S—Code ASURW,
with S-Switch 32.85
GK-2—Code ASUZA,
with G-Stand 35.55

LAPEL TYPE MODEL L-1

• This very small dual-diaphragm crystal microphone was developed to meet especially difficult pickup conditions. Equipment includes lapel-type spring clip and over-shoulder cord to permit wide latitude of movement. Output level —62 db. Frequency response uniform from 30 to 10,000 c.p.s. Finish, statuary bronze. Furnished with 25-ft. cable.

List Price

Model L-1—Code ASUSN \$27.35

DYNAMIC MICROPHONES

SHURE

SHURE MULTI-IMPEDANCE SUPER-CARDIOIDS

"UNIDYNE" SUPER-CARDIOID DYNAMIC
(For General Purpose)

The new Shure Super-Cardioid Dynamic Microphones are Multi-Impedance Microphones—giving you three microphones in one. Gives you a choice of low, medium, or high impedance in one unit. Model "556" is specially designed for Broadcasting. Held within extremely close tolerances in frequency response. Features internally isolated cartridge and external vibration absorbing unit. Model "55" is a "General Purpose," high-quality dynamic. It has the same mechanical properties as "556" with the exception of the external vibration absorbing unit.

Following is technical data covering both models: Reduces reflections and reverberation—decreases random noise pickup by 73%. Smooth response from 40 to 10,000 cycles over wide angle at front—dead at rear. Single unit construction accomplished through Shure "Uniphase" principle (Patented). Floating moving coil system. Swivel head. Standard $\frac{5}{8}$ "—27" thread. "556" has convenient terminals for attaching longer length cables. "55" has built-in connector. Case $\frac{1}{4}$ " high, $\frac{3}{4}$ " wide, $\frac{3}{2}$ " deep.

"556" SUPER-CARDIOID
(For Broadcast)

MODEL	CABLE	SHPG WEIGHT	CODE	LIST PRICE
556	7 ft.	4½ lbs.	RUMUB	\$87.50
55	25 ft.	4½ lbs.	RUMUL	\$62.50

Multi-Impedance Switch on Models "55" and "556"

IMPEDANCE TABLE	OUTPUT LEVEL
L—35-50 ohms	58.1 db below 1 Milliwatt per 10 bar signal
M—150-250 ohms	58.8 db below 1 Milliwatt per 10 bar signal
H—High	59.5 db below 1 volt per bar

"SONODYNE"

The Model 51 Sonodyne is a high-output pressure-type dynamic microphone with wide-range frequency response and typical semi-directional pickup characteristics. It features the Shure Multi-Impedance Switch. You may select the proper operating impedance by merely changing the position of the impedance switch. The "Sonodyne" operates on the principle of a moving-coil element in a magnetic field. A high-flux magnet is used in the magnetic circuit, which together with a specially designed moving system and associated acoustic network, provides high efficiency and smooth, peak-free response. Each microphone is provided with a built-in receptacle and a two-conductor shielded functional cable with microphone plug attached. The rich Pearl-Gray case is functionally designed for improved acoustical performance and modern appearance. Frequency response 60-10,000 c.p.s.

Applications: The "Sonodyne" is ideal for all general purpose use, including public address, recording, communications, and similar applications.

IMPEDANCE TABLE		OUTPUT LEVEL		
L—35-50 ohms		53.0 db. below 1 Milliwatt for 10 bar signal		
M—150-250 ohms		52.5 db. below 1 Milliwatt for 10 bar signal		
H—High Impedance		52.0 db. below 1 volt per bar

51	20 ft.	4½ lbs.	RUSON	\$37.50

"SONODYNE"

"ECONODYNE"

The "Econodyne" is a sturdy dynamic microphone that offers high-quality performance for low cost. It is a pressure dynamic microphone with smooth frequency response and semi-directional pickup characteristics. Frequency response 60-8000 c.p.s. The microphone is provided with a single-conductor shielded attached cable.

Applications: The "Econodyne" is the ideal microphone for low-cost public address, recording, communications and similar installations.

MODEL	CABLE	OUTPUT	IMPEDANCE	SHPG WEIGHT	CODE	LIST PRICE
52	15 ft.	52 db below 1 volt per bar	High Impedance	2½ lbs.	RUMIN	\$25.00

"ECONODYNE"

CRYSTAL MICROPHONES

“MONOPLEX”

A high-output, unidirectional microphone that ranks far, far above ordinary crystal microphones. The "Monoplex" is a SUPER-CARDIOID microphone. This means that the "Monoplex" is twice as unidirectional as the Cardioid. It has wide angle pickup across the front of the microphone but it reduces sound pickup from the rear by 15 db—over a broad range of frequencies, and reduces pickup of random sound by 73%! The "Monoplex" employs the same type of acoustic phase-shifting network used in the highest-cost Shure Broadcast microphones. New "Metal Seal" crystal. The case is pivoted at the rear and can be pointed toward desired sound or upwards for horizontal plane pickup. The "Monoplex" is excellent for high-quality public-address, communications, recording and similar applications. It will operate under adverse conditions of background noise and reverberation where a conventional microphone would be practically useless. Built-in cable connector. Standard $\frac{5}{8}$ "-27 thread. Height 4". Width 3 $\frac{1}{2}$ ". Thickness 1 $\frac{7}{8}$ ". Shipping weight 2 $\frac{7}{8}$ lbs.

MODEL	CABLE	OUTPUT	IMPED.	CODE	LIST PRICE
737A	20 ft.	54 db below 1 volt per dyne per sq. cm.	High Impedance	RUMON	\$35.50

VERSATEX

The "Versatex," versatile crystal microphone: fits the palm of your hand; needs no desk stand, as it rests on its own base; fits on a floor stand. Features high-output, specially-engineered voice response, frequency of 60-8000 c.p.s., moisture-proof Crystal, shock-proof plastic case, R-F filter. Eliminates mechanical noise pickup. High Impedance. Shpg. weight 1 $\frac{1}{2}$ lbs. Ideal for Ham communications. Also fine for recording and low cost P.A. systems. Code RUTEX.

MODEL	CABLE	OUTPUT	LIST PRICE
718A	7 ft.	53 db below 1 volt per bar	\$11.50

LAPTEL MICROPHONE

707A CRYSTAL

Designed to give good-quality performance at low cost. Has good response characteristics, is free from peaks, has typical semidirectional pickup. Uses moisture-proof Bimorph Crystal. Ideal for voice and music reproduction. Suitable for low-cost P. A. systems, call systems, amateur phone transmitters and similar applications.

Pearl Gray finish with high-polished plating on front grille. The case is a heavy die casting, is simple in design and in excellent taste. Standard $\frac{5}{8}$ "-27 thread. Diameter 2 $\frac{3}{8}$ ". Shipping weight 1 $\frac{1}{4}$ pounds. High Impedance.

707A. Code RUDOFF.
707A-20. Code RUDOK.

707A	7 ft.	-53 db	\$13.50
707A-20	20 ft.	-56.5 db	\$15.00

STRATOLINER

An expensive-looking microphone for applications where low cost is an important factor. Wide-range response (free from undesirable peaks) for good reproduction of either voice or music. Bimorph Crystal. Placed horizontally, the 708A is semidirectional; used vertically (microphone pointed straight up) it becomes non-directional in the horizontal plane, and performers may be placed all around it without frequency discrimination. A swivel permits 90° tilting of the microphone. Case dimensions: diameter 2 $\frac{1}{2}$ ", length 4 $\frac{1}{8}$ ". Stand thread $\frac{5}{8}$ "-27. Shipping weight 2 $\frac{1}{2}$ pounds. Frequency response is 60-8000 c.p.s. Pearl Gray finish. High Impedance.

708A. Code RUDUM.
708A-20. Code RUVAT.

SHURE 76B LAPEL MICROPHONE

Designed for Public Address, lecturing, portable transmitters, and all general uses for intelligible reproduction of speech. Pressure-actuated diaphragm-type crystal microphone. Graphoil Bimorph crystal, moisture-sealed. Microphone is inconspicuous, weighs only 1 $\frac{1}{2}$ ounces. Response from 40 to 6,000 c.p.s. High frequency response accentuated for maximum intelligibility. 1 $\frac{7}{8}$ " diameter. Gray finish. Lapel clip. 25-foot shielded single-conductor cable. Shipping weight 1 pound. Output level: 57 db below 1 volt per bar. Code RULOP.

Model 76B List Price \$27.00

CARBON MICROPHONES AND ACCESSORIES

SHURE

MODERN DESK STAND

Model S36A. Beautiful, stream-lined Desk Mount with stable support at correct height. Fits Shure connector-type Microphones, concealing plug in base. Adapter plate and tubing provided for other type microphones. Removable button at front for installation of 3/8" standard bushing switch or volume control. Pearl Gray finish. Base: 2 1/2" high, 5" wide, 7" long. Shipping weight 1 1/2 pounds. Model S36A.

Code: RUSEF List Price \$4.50

MILITARY CARBON—100 SERIES

High-quality, carbon microphones specially designed for military and police equipment and other uses where ruggedness and dependability are vital factors. Clear, crisp voice response. High output. Easy to use, fits snugly into palm of hand. Heavy duty furnished for push-to-talk performance. Furnished with hook for suspension and bracket for wall mounting, plus functional "Koilord" cable. Adopted as standard microphone by leading manufacturers of police transmitters. Output level: 32 db below 1 volt for 10 bar speech signal. Net weight 14 oz. Shipping weight 1 pound. Case dimensions: 3 3/4" high, 1 3/4" deep, 2 3/4" wide.

TAKE-APART STAND

Model S34B. Handy low-cost stand for desk or hand use. One twist of handle locks it securely in base for use as a table stand, or releases handle for use in hand. Metal base, wood handle. Metal top threaded 3/8"—Z7. Height over all 6 1/2". Base diam. 4 1/2". Length of handle 5 7/8". Shipping weight 1 lb.

CABLE TYPE TRANSFORMER

Model A86A. Ideal for use with Multi-Impedance microphones. Cable-Type Transformer. Matches 35 to 50 and 150 to 250 ohm microphones to high impedance amplifier input. Compact, sturdy. Case diameter 1 5/8", length 2 7/8". 7 foot cable. Shipping weight 1 1/2 pounds.

Code: RUDEB..... List Price \$15.25

MICROPHONE "ON-OFF" SWITCHES

In many microphone applications a switch is not wanted at the microphone. Therefore switches are not built into Shure Microphones. But, whenever a switch is needed these "On-Off" switches plug into the microphone quickly and conveniently. You can depend on them. No soldering necessary. Model A83B. Quickly attached to any cable-connector type Shure Microphone. Internal plug establishes connections. Bakelite arrow knob.

Code: RUNIM..... List Price \$6.00
Model A84B. Momentary "On-Off" Switch. Press-to-talk. Bakelite disc.
Code: RUH1D..... List Price \$7.00
Model A85C. Momentary Relay-Type Switch. Normally-open switch closes circuit comprising one conductor and shield of outgoing cable for operation of relay or other device; remaining conductor and shield of cable carry microphone output. Must be used with two-conductor shielded cable, and only with crystal and high impedance dynamic microphones. Standard Shure cable-connector receptacle. Satin Chrome finish. Bakelite disc. 1 3/4" high x 1 1/2" wide x 2" deep. Furnished without cable. Shipping weight 3/4 pound.
Code: RUNAT..... List Price \$10.00

The new Shure Floor Stands have been designed to look smart and work perfectly. They will fit into any type of installation because of their design and rich hammered finish. Stabilized base cushioning reduces floor noise pickup by 10 to 18 db. Color: Pearl Gray.

PHONOGRAPH PICKUPS AND CARTRIDGES

Model "900". Code: RUZUM
List Price \$11.50
Model "900-PN". Code: RUZUB
List Price \$15.50

SHURE "MUTED STYLUS" PICKUPS AND "MUTED STYLUS" CARTRIDGES

The "Muted Stylus" Crystal Pickups play with amazing needle quietness. A needle force of only 1 oz., high output, and smooth frequency response give the pickups a reproduction never before achieved.

The "Muted Stylus" Pickup Cartridge has a unique specially designed metal needle for longer record and needle life, faithful tracking, and marked reduction of surface noise.

The "Muted Stylus" Pickups are ideal for high-quality home phonographs, coin-operated machines, and all similar applications where shellac or Vinylite records are used. They can be used as direct replacements for many of the old-fashioned heavy-weight crystal pickups. Available with Rochelle Salt or PN crystal.

The Shure W60 Cartridges fit all standard flat-type pickup mountings—and directly replace the Shure P30. The location of the needle point is similar to that of the standard cartridge when the latter is provided with a full-tone needle.

Model W60B (Osmium). Code: RUSID List Price \$7.50
Model W60A (Sapphire). Code: RUSIS List Price \$8.50

SHURE "GLIDER" PICKUPS AND LEVER TYPE CARTRIDGES

The Shure "Gliders" are lightweight crystal phonograph pickups with a needle force of only 1 1/8 oz. They have extremely low needle-point stiffness but still have sufficient output to replace old-fashioned, heavy-weight arms. Shure "Gliders" save records and needles, have smooth response, reduce surface noise, and reproduce the full tone qualities of the record with natural life-like clarity.

SHURE CARTRIDGE PACK

Solves service problems with phonographs and record changers . . . builds new profits! 5 crystal cartridges have been "standardized" to replace 58 different popular types of all makes. The "Pack" contains the 5 Shure Lever-Type Cartridges, including Model W60B with the "Muted Stylus." Specific cross-reference chart for exact cartridge replacement is enclosed in carton. The Shure Lever-Type Cartridges offer more than a replacement line—five cartridges, that feature low needle force . . . super moisture proofing . . . longer needle and record wear . . . high needle compliance (flexibility) . . . high output . . . crystal shock immunity . . . lightweight cases (aluminum and steel) . . . pin-tip terminals.

Model W50A. Code: RUPAC
List Price \$30.80

SHURE "MUTED STYLUS" NEEDLES

Shure "Muted Stylus" needles can be used only in the Shure "Muted Stylus" Cartridges. They are ideal for high quality phonographs, coin-operated machines, and in all other applications where shellac pressings are commonly used. Both the sapphire-tipped and the osmium-tipped needles were designed exclusively for use with the Shure "Muted Stylus" Cartridges, MODELS W60 and P30. These two needles bring record playing to a new unmatched standard of performance, greatly reducing the noise and distortion caused by ordinary needles. Surface noise, needle talk, and needle hiss are practically eliminated. These needles are so soft riding, so smooth working, so silent tracking that they permit unhampered fidelity of tone.

No finer choice than

Electro-Voice

Microphones

Cardioid Unidirectional Microphones

IMPROVED CARDYNE BROADCAST DYNAMIC

True Cardioid with New Impedance Selector, New Dual-Type External Shock Mount, Smooth Wide Range Response, High Output.

Better than ever for high quality sound pick-up and reproduction. Response is improved . . . output increased. New impedance selector on rear of case instantly gives you high impedance (25,000 ohms) or match to all low impedances. New dual-type external shock mount prevents reproduction of external shocks and stand vibration, reduces side sway of microphone. Exclusive Acoustalloy diaphragm withstands severest service.

E-V Mechanophase* principle gives wide angle front pick-up, dead at rear . . . cuts reverberation and random noise pick-ups . . . stops feedback . . . nearly doubles conventional pick-up range . . . provides clear, natural close-up response . . . permits increased loudspeaker volume . . . gives users more freedom of movement. Used in studio and remote broadcasting, disc and film recording, public address and communications.

Output level: 50 db below 1 volt/dyne/cm². Frequency response, substantially flat, 30-12,000 c.p.s. Highest quality die cast case beautifully finished in satin chromium. Tiltable head. 3/8"-27 thread, Cannon XL-3 connector. Internal shock absorber. "On-off" switch, 20 ft. shielded cable. Size 2 1/2" x 3 1/2" x 9" including stud. Net wt. 2 1/2 lbs.

CARDYNE II Model 731. List Price **\$80.00**

(Also available without "On-Off" switch or with 50-250 ohm impedance selector.)

POPULAR CARDYNE DYNAMIC

CARDYNE I. Model 726. Performance characteristics similar to Model 731 above. Has Impedance Selector, but does not include external shock mount. Frequency response, substantially flat, 40-10,000 c.p.s. Output level -53 db. Has Amphenol MC-3 connector.

CARDYNE I. Model 726. List Price **\$59.50**

(Model 345 External Shock Mount also available separately. List Price \$11.50)

MODERN CARDAX CRYSTAL

The First and Only High Level! Cardioid Crystal Microphone with Dual Frequency Response.

Favorite of thousands! Easily solves everyday sound problems. E-V Mechanophase* principle provides *true cardioid* unidirectivity. Wide angle front pick-up—dead at rear. E-V *Dual Frequency Response Selector* gives wide range flat response for high fidelity pick-up of voice and music, or rising characteristic for extra crispness of speech.

The CARDAX overcomes background noise, reverberation, feedback. Simplifies microphone and speaker placement. Permits greater loudspeaker volume levels. Highly recommended for public address, recording, remote broadcast, paging, dispatching, and communications.

Output level: -57 db for high fidelity; -48 db for rising response. Smart, compact, easily portable. Rich satin chromium finish. High capacity Metal Seal crystal—fully enclosed for greater moisture protection. Tiltable head. 3/8"-27 thread. Built-in cable connector. "On-Off" switch. Size 2 1/2" x 2 3/8" x 6 1/4" including stud. Net wt. 1 3/4 lbs.

Cardax Model 950. List Price **\$39.50**
*Patents Pending.

Electro-Voice

Microphones

Dynamic Microphones

Model 635—High Fidelity Broadcast Dynamic

Used on important radio network programs. Substantially flat response from 60-13,000 c.p.s. ± 2.5 db. Conforms to modern FM as well as AM broadcast standards. Essentially omni-directional, becoming directional at higher frequencies. Output -53 db. Can be used on a stand or in the hand—indoors and outdoors. Recessed switch in microphone stud gives selection of 50 or 250 ohms impedance. Excellent for studio, remote, audience participation, applause pick-up, recording; also high quality sound systems. Exclusive Acoustalloy diaphragm. Cannon XL-3 connector. Swivel head. $\frac{3}{8}$ "-27 thread. Highest purity pressure-cast case. Rich, durable satin chromium finish. 20 ft. shielded cable. Size 2" x $4\frac{1}{4}$ " x $4\frac{1}{2}$ " including stud. Net wt. $1\frac{1}{2}$ lbs.

Model 635. List Price\$60.00

Model 630—High Fidelity, High Output Dynamic

Finer performance than ever . . . in a moderately priced moving-coil dynamic! E-V Acoustalloy diaphragm provides exceptionally smooth response from 40-9000 c.p.s. Assures high quality reproduction of speech and music, indoors and outdoors. Compact, rugged . . . withstands heat, humidity and other severe operating conditions. Tilting head for directional or non-directional use. Built-in cable connector. $\frac{3}{8}$ "-27 thread. "On-Off" switch. Widely used in all types of applications. Highest purity pressure-cast case, finished in lustrous satin chromium. Output level 53 db below 1 volt/dyne/cm². Equipped with 20 ft. shielded cable. Net weight, $1\frac{1}{2}$ lbs. Available in Hi-Z (direct-to-grid, 25,000 ohms), 50, 200, 250, or 500 ohms impedance. Low impedances balanced to ground.

Model 630. List Price\$36.50

Model 600-D—Widely Used Dynamic Mobil-Mike

Specially designed for clear, crisp speech transmission in communications, public address, call systems, and recording. Frequency response, substantially flat, 100-6000 c.p.s. Gives higher articulation, provides more usable power level, and is less fatiguing to the listener. Output level: 55 db below 1 volt/dyne/cm². High impact black phenolic case. E-V Acoustalloy diaphragm. Extremely rugged, for indoor and outdoor use. Press-to-talk switch controls relay. Panel mounting bracket. Equipped with 6 ft. shielded cable. Size $2\frac{1}{4}$ " x 2" x 4". Net weight, 8 ounces. Available in Hi-Z (direct-to-grid, 25,000 ohms), 50, 200, 250 or 500 ohms impedance. Low impedances balanced to ground.

Model 600-D. List Price\$35.00

Model 600-DL. With switch lock. List Price\$36.50

Model 605—Durable, General-Utility Dynamic

A natural leader in the low-priced field. Attractive—dependable—highly satisfactory for general sound work, paging and call systems, dispatching, recording, communications. Frequency response 50-7500 c.p.s., substantially flat. Output level 57 db below 1 volt/dyne/cm². Exclusive E-V Acoustalloy diaphragm. Pressure cast case, with 22° fixed tilt. $\frac{3}{8}$ "-27 thread. Built-in cable connector. Satin Chromium finish. Net weight, 12 ounces. Available in Hi-Z (direct-to-grid, 25,000 ohms), 50, 200, or 250 ohms impedance. Low impedances not balanced to ground.

Model 605-8. With 8 ft. cable. List Price\$24.50

Model 605-20. With 20 ft. cable. List Price\$26.00

Model 610—Modern, Low-Priced Dynamic

Outstanding quality and value. Adds smartness to economical public address and paging systems, ham rigs, or similar installations. Fine reproduction of voice and music. Compact, convenient to use. Upright pressure cast case has 15° fixed tilt. Finished in rich satin chromium. Ruggedly built for durable service, indoors and outdoors. E-V Acoustalloy diaphragm. Frequency response, substantially flat 50-8000 c.p.s. Output level 53 db below 1 volt/dyne/cm². Built-in cable connector. $\frac{3}{8}$ "-27 thread. Net weight $1\frac{1}{4}$ lbs. Available in Hi-Z (direct-to-grid, 25,000 ohms), 50, 250, or 500 ohms impedance. Low impedances not balanced to ground.

Model 610-8. With 8 ft. cable. List Price\$29.50

Model 610-20. With 20 ft. cable. List Price\$31.00

Crystal

Model 910—Modern High Quality Crystal Microphone

Smooth, wide-range response, and high output assure fine reproduction of voice and music for public address, paging, amateur communications. Ruggedly built for durable service. Upright pressure cast case has 15° fixed tilt. Satin chromium finish. Built-in cable connector. $\frac{3}{8}$ "-27 thread. High capacity, moisture-sealed crystal. Frequency response, substantially flat, 50-8000 c.p.s. High impedance. Output level 48 db below 1 volt/dyne/cm². Net weight $1\frac{1}{2}$ lbs.

Model 910-8. With 8 ft. cable. List\$22.50

Model 910-20. With 20 ft. cable. List\$24.00

Model 902 COMET—Combination Crystal Microphone and Stand

Modern, air-flow design functionally integrated into one unit. Made of high impact, non-breakable molded plastic, in deep lustrous gray. Light weight. Easy to use as a hand microphone . . . or stands firmly on its base. Smooth, wide-range response and high output. Excellent for home recording, small public address systems and amateur radio communications. High capacity, moisture-sealed crystal. Frequency response, substantially flat, 70-7000 c.p.s. Hi-Z. Output level: 48 db below 1 volt/dyne/cm². 7½ ft. shielded cable. Net weight, 15 ounces.

Model 902. Comet. List Price\$13.25

Model 905—Crystal Microphone

Same design as the Model 605 Dynamic. Gives quality reproduction for low-cost public address, paging and amateur communications. Frequency response, substantially flat, 50-7500 c.p.s. High impedance. Output level: 54 db below 1 volt/dyne/cm². High capacity moisture sealed crystal. 22° fixed tilt. $\frac{3}{8}$ "-27 thread. Built-in cable connector. Satin chromium finish. Net weight 11 ounces.

Model 905-8. With 8 ft. cable. List\$16.50

Model 905-20. With 20 ft. cable. List\$18.00

Model 805—Contact Microphone

For guitar, banjo, mandolin, violin or any vibrating musical instrument. Increases natural sound volume, enriches tonal effects. Easily installed. Frequency response 40-8,000 c.p.s. High impedance. Inertia type crystal, sealed against moisture and acoustic feedback. 15 ft. shielded cable. Size $2\frac{1}{4}$ " x 1" x $7/16$ ". Net wt. 2 ounces.

Model 805. List Price\$15.00

Mobil Mikes

Model 210—Carbon Mobil-Mike

Gives high intelligibility speech transmission. Used in police, fire, taxi, aircraft marine and amateur communications, mobile public address, paging, dispatching and speech recording. Extra rugged, high impact black phenolic case. Withstands severest service indoors and outdoors. Frequency response substantially flat 100-4000 c.p.s. for high articulation. Output level: 10 db. below 1 volt/100 dynes cm². Single button. Press-to-talk switch. 5 ft. cable. Standard dash mounting clip. Size 2 1/4" x 2" x 4". Net wt. 7 ounces.

Model 210. List Price \$25.00

Model 210-L. List Price \$26.50

(Also available for exact replacement in Motorola, RCA, G. E. and similar equipment.)

Model 205—Hand-Held DIFFERENTIAL* CARBON

Close-talking, noise-cancelling microphone designed for maximum intelligibility under intense noise. Used in police, aircraft, marine, industrial and other communications applications; also in high power sound projection. Fits in the hand. Operates in all positions. High impact phenolic case, with panel mounting bracket on back. Blast proof, waterproof, shock resistant. Withstands temperatures from -40° to +185° F. Frequency response, substantially flat from 100-4000 c.p.s. Output level: 10 db below 1 volt/100 dynes cm². 10-50 m. a. button current. Press-to-talk switch actuates button and relay. Equipped with 5 ft. cable. Size 2 1/4" x 2 1/4" x 4". Net weight 7 ounces.

Model 205. List Price \$30.00

Model 205-L. With switch lock. List Price \$31.50

Model 602—Hand-Held DIFFERENTIAL* DYNAMIC

Close-talking, noise-cancelling speech microphone for use where ambient noise is 100 db or more. Assures high articulation. Especially suitable for marine, industrial and emergency communications, high power sound projection, and for speech in any windy wet or extremely hot or cold location. Frequency response, substantially flat, 100-6000 c.p.s. Output level: 55 db. below 1 volt/dyne cm². E-V Acoustalloy diaphragm. High impact phenolic case. Press-to-talk switch controls relay. Panel mounting bracket, size 2 1/4" x 2" x 4". Net weight, 8 ounces. Equipped with 6 ft. shielded cable. Available in Hi-Z (direct-to-grid, 25,000 ohms), 50, 200, 250, or 500 ohms impedance.

Model 602. List Price \$40.00

Model 602-L. With switch lock. List Price \$41.50

Model 606 DIFFERENTIAL* DYNAMIC

Effectively used in airport control towers, police dispatching, special events broadcasting, close-talking public address, and high noise industrial applications. Through exclusive E-V DIFFERENTIAL principle, surrounding or distant sounds are cancelled out. Transmitted speech gets through clearly and completely. Frequency response, substantially flat 100-6000 c.p.s. Output level: 57 db below 1 volt/dyne cm². E-V Acoustalloy diaphragm. Withstands severe service. Built-in cable connector. Pressure cast metal case, finished in satin chromium. Head at 22° fixed tilt. 3/8"-27 thread. Net wt., 12 ounces. Available in Hi-Z (direct-to-grid 25,000 ohms), 50, 200, or 250 ohms. Low impedances not balanced to ground.

Model 606-B. With 8 ft. cable. List Price \$36.50

Model 606-20. With 20 ft. cable. List Price \$38.00
Patent Number 2,350,010

Velocity

Proved E-V design makes the most of the ribbon velocity's high fidelity, bi-directional characteristics. It provides superb pick-up and reproduction of voice and music, for indoor public address, broadcasting and recording. That's why these Velocity Microphones are favorites of well-known orchestras and sound engineers. Response is substantially flat over a wide frequency range. Bi-directional polar pattern gives equal front and back pick-up and longer pick-up range; zero pick-up at sides, top and bottom. Proper tilting and placement of microphone reduces feedback and random noise—permit increased volume levels. Open-type, reflection-free housing. Internal shock absorber mounting. One-piece frame and internal mounting structure give extra ruggedness. Pole pieces scientifically designed to insure adequate high frequency reproduction, and yet provide ample output.

Model V-3 All Impedance Velocity

Combines all popular impedances in one microphone. Vari-Z selector on back gives ready choice of 50, 250, 500 ohms, or Hi-Z (35,000 ohms). Permits the use of short cables up to 30 feet direct-to-grid, or long lines with matching transformer. Low impedances balanced to ground. Substantial flat response 40-10,000 c.p.s. Output -58 db. Locking cradle for tilting microphone. Built-in cable connector. 3/8"-27 thread. Bronze gun metal finish. Size 3 1/2" x 2 1/4" x 8" including stud. Equipped with 20 ft. shielded cable. Net weight, 2 1/2 lbs.

Model V-3. List Price \$60.00

Model V-2 Velocity Microphone

Similar to the V-3, but without Vari-Z selector. Choice of single standard impedance: 50, 250, 500 ohms, or Hi-Z (35,000 ohms). Frequency response, substantially flat, 40-10,000 c.p.s. Output -62 db. Locking cradle mounting. Built-in cable connector. 3/8"-27 thread. Bronze gun metal finish. Size 3 1/2" x 2 1/4" x 8" including stud. Equipped with 20 ft. shielded cable. Net weight, 2 1/2 lbs.

Model V-2. List Price \$45.00

Model V-2A. Same as V-3, but in choice of one standard impedance, without Vari-Z selector switch. Output -58 db.

List Price \$50.00

Model V-1

Compact, Smaller Size Velocity

Unsurpassed for excellence of design and performance at such moderate cost. Gives you high fidelity, bi-directional advantages in a compact, smaller size velocity microphone. Highly satisfactory for public address, recording and remote broadcasting. Substantially flat response 40-9000 c.p.s. Output -65 db. Locking cradle mounting. Built-in cable connector. 3/8"-27 thread. Satin chromium finish. Size 2 3/4" x 2 1/8" x 6 1/2" including stud. Equipped with 20 ft. shielded cable. Net weight, 2 lbs. Available in Hi-Z (35,000 ohms), 50, 250 or 500 ohms impedance. Low impedances not balanced to ground.

Model V-1. List Price \$36.50

Model V-1A. Similar to V-1, but with higher output level (-59 db). List Price \$40.00

Multi-Purpose CENTURY Microphone

DESIGNED FOR ALL
LOW COST APPLICATIONS

CRYSTAL • DYNAMIC • CARBON

Brilliantly engineered and superbly styled low-cost microphones. Complete adaptability permits widest use in public address, paging, recording, communications. Choice of crystal, dynamic or carbon types. Can be used in any position—stands by itself on table or desk—rests on its back—can be comfortably hand-held, mounted on a stand or suspended overhead. Highest purity pressure-cast case is finished in lustrous gray-brown. Rugged. Light weight. Size 3" x 2-3/16" x 1".

Model 915—Century Crystal

Combines excellent frequency range, high level and mounting flexibility. Case provides ample shielding and stability. Moisture-sealed crystal. High impedance. Output —50 db. Frequency response 60-7500 c.p.s. 7 1/2 ft. black glazed cloth covered, shielded cable and 3/8"-27 thread stand adapter. Net wt. only 6 ounces. **Model 915.** List Price **\$10.00**
Model 915-S. With slide-to-talk switch. List Price **\$11.50**

Model 215—Century Carbon

Provides high output high articulation—exceptionally low hiss level (50 db below normal speech)—low distortion. Responds well in all positions. Positive Fiberglass carbon retention (E-V Patent). Normalized diaphragm seat (E-V Patent). Output —26 db using input transformer. Voltage developed by normal speech (100 dynes): .56. Speech response 200-4000 c.p.s. Single-button. 48" cable and 3/8"-27 thread stand adapter. Net wt. only 6 ounces. **Model 215.** List Price **\$8.25**
Model 215-S. With slide-to-talk switch. List Price **\$9.75**

Model 615—Century Dynamic

Has exclusive non-crushable Acoustalloy diaphragm. Withstands severe service. Output —57 db. Frequency response 55-7500 c.p.s. High impedance. 7 1/2 ft. black glazed cloth covered, shielded cable and 3/8"-27 thread stand adapter. Net wt. only 8 ounces. **Model 615.** List Price **\$16.50**
Model 615-S. With slide-to-talk shorting switch. List Price **\$18.00**

Century Mobil-Mikes

Designed for high articulation in radio amateur communications. Equipped with slide-to-talk relay control switch, 48" cable, and hang-up hook for dash mounting. **Model 215-SR.** Carbon. List **\$10.00**
Model 615-SR. Dynamic. List **\$20.00**

Model 415. Reclining Desk Stand. Mounts Century at 15° tilt. Gray-Brown finish. Size 2 1/2" x 2 3/8" x 1". Net wt. 4 oz. List Price..... **\$1.50**

ELECTRO-VOICE FLOOR AND DESK STANDS

Model 425—Deluxe Floor Stand

In this unique floor stand, all dead weight is eliminated, but full stability retained. Simply press red button to raise or lower shaft with same one hand. Locks automatically by releasing button. Shaft can be rotated without any adjustment device. Adjustable legs permit placing flush against wall or speaker's table. Easy to assemble or take apart. Folds into small, compact, portable package. Highest purity pressure-cast base. Satin chromium finish. Height adjustment 37" to 66". 3-leg spread 17". Net wt. 7 1/2 lbs. Shipping, wt., 9 lbs.

Model 425. List Price **\$24.50**

Model 430—Utility Floor Stand

Gives solid support, yet light in weight. Single button gives instant control of shaft height. Shaft may easily be rotated. Modern, sturdy, high-pressure-cast base. One bolt locks 3 legs in position. Comes apart to make small, compact package. Attractive Gray finish. Extension shaft finished in satin chromium. Height adjustment 36" to 67". 3-leg spread 17". Net wt. 7 1/2 lbs. Shipping wt., 9 lbs.

Model 430. List Price **\$15.00**

Model 424—Desk Stand

Small, light weight. Designed for use with E-V Models 210, 205, 600-D and 602. Made of aluminum. Easily lifted with microphone in hand. Very stable on desk or table. Rubber base buttons. Satin finish. Size 4 1/2" x 4 1/2" x 3 3/4". Net wt., 4 oz.

Model 424. Desk Stand. List Price **\$4.00**

Model 423—Desk Stand

Modern, sturdy, round die cast base. Rests firmly. Satin chromium finish. Rubber base buttons. 3/8"-27 thread. Base diameter 5 1/8". Net wt. 1 lb. Choice of 3" or 6" stem riser.

Model 423. List Price **\$4.00**

Model 427—Desk Stand

Attractive pressure-cast round base rests stably on desk or table. 6" stem riser. Lustrous gray-brown finish. 3/8"-27 thread. Base diameter 4 3/8". Net wt. 5/8 lb.

Model 427. List Price **\$2.50**

MICROPHONE ACCESSORIES

Low Impedance Microphone-to-Grid Matching Transformers

The windings of these transformers have low distributed capacity and are amply shielded against inductive hum by a high permeability shield, inside a pressure cast case. Designed for mounting on amplifier chassis or in series with the microphone line.

Model 500—A small, shielded carbon microphone transformer with universal mounting.

Finest silicon core. Tapped primary for single or double button. Three wire lead input (no connector). 36" shielded lead output. List Price **\$5.00**

Model 502—Designed for 50 and 250 ohm (500 ohms optional) microphones. Broadcast fidelity. Frequency response 40-20,000

c.p.s. —1 db, for either speech or music. MC-4 input connector. List Price **\$13.50**

Dynamic Microphone Baffle—Increases directivity at high frequencies. Available for microphone Models 630 and 605. Chromium finish. **Model 330-C.** List Price **\$2.50**

Suspension Bracket—Convenient for suspending microphone in inverted position (stage or orchestra installation). Standard 3/8"-27 thread. **Model 340.** List Price **\$.55**

Microphone Handle—Easily converts light weight microphone to a hand type. Turned from hard maple. Gun metal finish. Standard 3/8"-27 thread coupling.

Model 320. List Price **\$.75**

BUCHANAN, MICHIGAN

Microphones BY TURNER

GENERAL PURPOSE MICROPHONES

The Famous Turner 22X — 22D Crystal or Dynamic — Tops in value — tops in performance. Accurate pickup and faithful reproduction have made these units the most popular general purpose microphones on the market. $\frac{3}{4}$ " — 27 standard coupler.

22X CRYSTAL gives clear reproduction. Smartly engineered design cuts feedback to minimum. 90 degree tilting head. Built-in wind-gag permits outdoor operation. Crystal impregnated against moisture in mechanical shock proof mounting. Automatic barometric compensator. Level 52 db below 1 volt/dyne/sq. cm. Response: ± 5 db from 50 — 9000 c.p.s. Complete with 7 ft. removable cable set. Satin chrome finish. List\$20.00

22D DYNAMIC. Same appearance as 22X but has high level dynamic cartridge. Dependable indoors and out. Reproduces smoothly at all frequencies. Level: 54 db below 1 volt/dyne/sq. cm. at high impedance. Response: ± 5 db from 50 — 9000 c.p.s. Complete with tilting head, 7 ft. removable cable set.

200 ohms, 500 ohms, or high impedance. List\$25.50

50 ohms. List 23.50

High performance at moderate cost

33X — 33D CRYSTAL OR DYNAMIC — Recommended for quality P.A., recording, and communications work, the Turner 33X Crystal has a high quality 2-element crystal. Built for indoor or outdoor use with crystal impregnated against moisture, automatic barometric compensation, and mechanical-shock proofing. Will not blast from close speaking. Level 52 db below 1 volt/dyne/sq. cm. Response: ± 5 db from 50 — 9000 c.p.s. Handsome streamline case finished in satin chrome. Complete with tilting head, and 20 ft. removable cable set.

List\$24.50

33D DYNAMIC. Same appearance as 33X but with smooth high level dynamic circuit. Level: 54 db below 1 volt/dyne/sq. cm. at high impedance. Response: ± 5 db from 30 — 9000 c.p.s. Complete with 20 ft. cable set.

200 ohms 500 ohms, or high impedance. List\$27.00
50 ohms. List 25.00

Attractive, high fidelity semi-directional crystal microphone

34X CRYSTAL. — A microphone whose beauty is exceeded only by its performance. The 34X is the ideal all around semi-directional crystal microphone for use where feedback and acoustic conditions are unusually difficult. Advanced engineering design with full 90 degree tilting head permits tilting to most advantageous position to reduce audience noise and background disturbances. The 34X utilizes a moisture proof crystal, automatic barometric compensator, and is blast- and mechanical-

shock proofed. Level: 52 db below 1 volt/dyne/sq. cm. Response: ± 5 db from 50 — 10,000 c.p.s. Satin chrome finish. Complete with 20 ft. removable cable set.

List\$29.00

Broadcast Quality Dynamic

MODEL 211 — Precision engineered for outstanding performance the Turner 211 Dynamic utilizes a new type magnet structure and acoustic network. The high frequency range is extended and the extreme lows raised 2 to 4 decibels. Unique diaphragm structure results in extremely low harmonic and phase distortion without sacrifice of high output level. A sensitive unit yet ruggedly built for dependable use indoors or out under the most difficult acoustic and climate conditions. Withstands rough handling. For quality recording, P.A., sound system, and broadcast work, including FM. Level: 54 db below 1 volt/dyne/sq. cm.

at high impedance. Response: ± 5 db from 30 — 10,000 c.p.s. Equipped with tilting head, balanced line output connection, and 20 ft. 2-conductor, heavy duty removable cable set. Satin chrome finish.
200 ohms, 500 ohms, or high impedance. List\$47.50

THE TURNER COMPANY

Microphones BY TURNER

MODEL 77 CARDIOID (Left)

New Super-Cardioid microphone of advanced design

Impressively styled, the new Turner Model 77 is brilliantly engineered with a combination 2-element interior structure. Improved circuit design utilizes both pressure and velocity operated units in series. Sound is effectively controlled to produce the true Super-Cardioid pickup pattern which reduces feedback to the minimum. The Model 77 features a wide range pickup at the front and a sharply attenuated output at the rear . . . with approximately 15 db discrimination between front and rear at all frequencies. Response: ± 5 db from 70 — 10,000 c.p.s. Level: 62 db below 1 volt/dyne/sq. cm. at high impedance. Built-in switch giving 50, 200, 500 ohms, or high impedance output permits use with any standard equipment. Smooth tilting action and quick-disconnect plug. Standard $\frac{5}{8}$ " — 27 mounting. Finished in gun-metal gray and/or chrome. Complete with 20 ft. balanced line removable cable set.

Model 77 Cardioid. List\$77.00

Model 77

MODEL 87 VELOCITY (Right)

High fidelity response and bi-directional pickup

Developed to bring world famous Turner dependability to the velocity microphone field. Exceptional quality and trouble-free operation. Engineered with single element ribbon and Alnio V magnet for maximum sensitivity. Well shielded output transformers exclude hum pickup. Bi-directional figure 8 pickup pattern with smooth response within ± 5 db from 80 — 10,000 c.p.s. for most exacting studio work. Level: 62 db below 1 volt/dyne/sq. cm. at high impedance. 4-position output switch permits use with any 50, 200, 500 ohm, or high impedance input. Equipped with universal swivel mounting, $\frac{3}{8}$ " — 27 thread. Richly finished in gun-metal gray with satin chrome screen. Complete with 20 ft. attached balanced line cable.

Microphones BY TURNER

MODEL 35X FIREBALL

A new crystal desk microphone with instantly detachable base

Handsome, convenient and low priced. Model 35X is as easy to use as a fountain-pen desk set. It can be used as a desk microphone or a hand-held unit. A quarter turn releases handle from base instantly or locks it securely. The Model 35X is engineered with a high quality crystal circuit to give smooth performance to both voice and music pickups. Response: 70 — 7000 c.p.s. Level 52 db below 1 volt/dyne/sq. cm. Unit includes microphone with handle, base, and 7 ft. attached cable.

Model 35X, List \$13.25

Model 35

THE TURNER "Hand-D"9X or 9D Crystal or Dynamic

A rugged, all around multi-purpose microphone

One of the handiest and most useful microphones made. Hang it, hold it, or mount on any standard desk or floor stand. Especially engineered for maximum response to voice, "Hand-D" also delivers smooth, natural response to music pickups. Ideal for stage, paging, public address, amateur, police car, and traveling mike applications. Positive contact slide switch permits on-off operation.* Complete with 7 ft. removable cable set.

Model 9

* Also available with precision heavy duty push-to-talk switch at \$2.50 list additional. Specify: "With H.D. Push-Talk Sw."

9D DYNAMIC

Recommended for more severe service conditions and extremes of climate and temperature. Level: 52 db below 1 volt/dyne - sq. cm. at high impedance. Response: ± 8 db from 60 — 7000 c.p.s. 200 ohms, 500 ohms or high impedance. List \$27.00

TURNER CHALLENGERS

Turner Challengers offer performance, quality, and appearance usually found in microphones selling at twice their low cost. Engineered with a substantially flat response they give clear cut reproduction of both voice and music. Crystal models are complete with shock proof mounting, barometric compensation, moisture sealed crystal, and wind-gag to prevent blasting. Dynamic units are built to give dependable service indoors or out. You can rely on Turner Challengers — they are fully guaranteed.

Model
BD — BX

Model
CD — CX

BD DYNAMIC — Same appearance as BX. Equipped with dynamic cartridge. Works equally well indoors or out. Level: 52 db below 1 volt/dyne/sq. cm. at high impedance. Response: ± 8 db from 50 — 6000 c.p.s. Complete with 7 ft. attached cable. 50 ohms 200 ohms, 500 ohms, or high impedance. List..... \$15.75

CD-DYNAMIC — Same style and finish as CX. High quality magnets. 7 ft. removable cable set. Level: 52 db below 1 volt/dyne/sq. cm. at high impedance. Response: ± 8 db from 50 — 7000 c.p.s. 50 ohms 200 ohms, 500 ohms, or high impedance. List..... \$19.50

BX CRYSTAL — Ideal for recording, P.A., and amateur work. Brown enamel finish. Level: 52 db below 1 volt/dyne/sq. cm. Response: ± 5 db from 50 — 6000 c.p.s. Complete with 7 ft. attached cable. List..... \$10.85

CX CRYSTAL — Satin chrome finish with 7 ft. removable cable set. $\frac{3}{8}$ " — 27 standard coupler mounting. Level: 52 db below 1 volt/dyne/sq. cm. Response: ± 5 db from 50 — 7000 c.p.s. List..... \$16.25

MODEL VT-73

New improved crystal desk microphone engineered for quality speech

A world-wide favorite with amateurs for crisp, clear reports, the Turner VT-73 is also recommended for quality speech recording and public address work. Highest quality humidity sealed crystal. Rising curvature of response between 500 — 4000 c.p.s. increases intelligibility at effective voice frequencies without overmodulation. Shielded 2-conductor cable reduces R.F. pickup and harmonic resonance problems. Head is adjustable through 60° to almost any position. Level: 52 db below 1 volt/dyne/sq. cm. Response: ± 5 db from 50 — 7000 c.p.s. Complete with ball swivel head, stand, and 7 ft attached cable. Finished in black crinkle and chrome.

List..... \$21.50

L40 LAPEL MICROPHONE

Small, lightweight and inconspicuous the L40 can be worn in the lapel used with the 3H, or concealed. Highest quality moisture sealed crystal produces high signal level. Engineered for crisp, clear speech reproduction. Chest sounds damped out. Comfortable to wear. Alligator clip secures unit to clothing. Level: 52 db below 1 volt/dyne/sq. cm. Response ± 8 db from 50 — 8000 c.p.s. Complete with 20 ft. attached cable. List..... \$25.00

TURNER "THIRD-HAND" MODEL 3H

Slips over your head in a jiffy and holds microphone close to your mouth, where you get excellent volume without feedback. As natural to wear as a necktie, and lets you use both hands elsewhere. Stays out of your line of vision. Talk close without craning your neck; cuts down background noises.

Can be used with long line, as traveling microphone. Ideal for window demonstrations. Has $\frac{3}{8}$ " — 27 thread. Recommended for use with Turner microphones, as they will not blast from close speaking. Can be furnished with microphone switch when ordered with Turner microphone.

List..... \$5.00
For switch when ordered with Turner Microphone, add \$1.00 list.

MICROPHONES HEARING AID

Small compact, lightweight crystal microphone cartridges for new hearing aids or replacement. Exceptionally high signal level and smooth response. Flush to panel mounting. Send for details.

Model HA-7L. List..... \$8.00
Model HA-12S. List (shown) 8.00

MAGNETIC CONTACT PICKUPS FOR MUSICAL INSTRUMENTS

MODEL MM

Standard magnetic pickup. Provides uniform response over entire musical range. High impedance output. Easily and quickly attached. Complete with 20 ft. cable and finish.

With built-in volume control. List..... \$18.00

Without volume control. List 15.75

With phone plug attached to cable, add \$1.00 list.

"MIP" DELUXE

Turner's newest pickup. High level ALNICO V circuit. Gives immense volume and improved tone from any string instrument. Easily installed without tools or adhesives. High impedance output. Works directly into the grid circuit of any two-stage or larger amplifier. Polished chromium finish. Complete with built-in volume control, 20 ft. shielded cable, and mounting device for attaching to any string instrument. Built to stand abuse. List..... \$23.50
With phone plug attached to cable add \$1.00 list.

Tone Arms

In keeping with the Webster Electric tradition for fine design, precise construction and dependable performance, these pickup arms are now being produced for modernization or repair of standard record-playing equipment. Each is a series of precisely-matched components built into an integral unit. All are designed to minimize track-

ing error, and are coupled to resonate at a very low frequency. Resonance distortion and microphonic feedback tendency have been reduced to the minimum. They will accommodate 10" or 12" records. Single-hole mounting. All models are supplied with arm rests and mounting base brackets

S SERIES

A new die-cast zinc alloy tone arm designed for use with F series cartridges, giving very low tracking pressure. Modern design complements the appearance of any record-player. Currently produced with cartridge models F2 and F5 (see reverse side for response characteristics). Model SF2 LIST PRICE \$ 7.70 Model SF5 LIST PRICE \$ 8.45

T SERIES

A lightweight, low-inertia tone arm constructed of stamped aluminum, attractively fluted and internally braced for required rigidity. Designed for use with N series cartridges; currently produced with N8, N10 and N11 (see reverse side for response characteristics). Grey-tan enameloid finish. LIST PRICE \$6.50

V SERIES

The latest Webster Electric tone arm. Combines beautiful styling with exceptional rigidity, incorporating a high lateral ridge as an integral feature of the design. Currently available with N7 and F7 high fidelity cartridges, tracking at 1 oz. or less (see reverse side for response characteristics). Model VN7 LIST PRICE \$15.95 (with Sapphire needle) Model VF7 LIST PRICE \$15.95 (with offset needle and guard)

THE NEW WEBSTER ELECTRIC Featheride RETRACTABLE

The "V" series arm shown at the left is now available with the new retractable cartridge, Webster Electric Company's latest development. If the arm is accidentally dropped or scraped across the record, there is no damage to record, crystal or needle. Finest response in normal playing, exceptionally quiet, low tracking pressure. Supplied with Q1 and Q2 cartridges (see reverse side for detailed specifications) complete with osmium-tipped offset needle and guard.

Model VQ1 LIST PRICE \$17.65

Model VQ2 LIST PRICE \$16.70

Recorder Heads

Webster Electric Recorder Heads are unique and outstanding in performance. They are of extreme simplicity in mechanical and electrical design. No "peaks" or "valleys" in the entire frequency range. Recordings are distinguished by their clean quality and remarkable musical detail.

MODEL R-84

A magnetic cutting head for professional and semi-professional use. 8 ohms impedance at 400 cps. Frequency range 30-6000 cps. Less than 1 1/2% distortion at 400 cps. Input power 1 watt nominal for maximum recording level. Standard 1 1/8 inch spacing between mounting holes. LIST PRICE...\$27.50

MODEL R-84G

Similar to above but with 500 ohms impedance at 400 cps. LIST PRICE.....\$27.50

Crystal Cartridges

Webster Electric Crystal Cartridges are supplied in four general styles having universal replacement application. They are manufactured under exceptionally high standards of precision, and each cartridge is individually tested before release, assuring flawless performance and maxi-

mum customer satisfaction. The range of characteristics described below permits exact replacement of original cartridges found in the majority of record-players, record-changers and radio-phonograph combinations.

C SERIES

Cartridges of this series were incorporated as original equipment in many thousands of phonographs in use today. Model C2 equipped with flange for mounting, as shown. Model C3 supplied without flange for clamp-mounting. Model C4 equipped with special mounting stud. Solder terminals.

D SERIES

For tone arms designed for side-hole mounting. This style is also widely used for reconditioning of equipment now in use. Solder terminals.

N SERIES

Cartridges in this series have been standard in new equipment for several years. Models N6 through N11 were recently introduced and are being incorporated in leading postwar makes of record-playing equipment, thereby assuring a growing replacement market. All models are available with solder terminals or pin type terminals, and with choice of self-ground or separate ground lug.

F SERIES

A new series of cartridges of very light weight, designed to track at low needle pressure. High fidelity models have a uniform drop of 6 D B per octave up to 10,000 cps. Pin-type terminals. Choice of self-ground or separate ground lugs.

Y N SERIES

Cartridges of this type incorporate P. N. crystals and are to be used only for replacement in equipment designed for their use. Cartridge case similar to N series.

Q SERIES

Models Q1 and Q2 are the new retractable cartridges, designed to protect record, needle and cartridge from accidental injury due to rough handling of the tone arm. Mounted by means of a bracket that fits standard-make arms. Supplied with osmium-tipped offset needle and protective guard.

UNIVERSAL MICROPHONE CO.

INGLEWOOD, CALIFORNIA

New Improved UNIVERSAL D20 SERIES DYNAMIC MICROPHONE

Handsome! Combines modern lines with a stability of design which suits it to all settings. Sturdy metal case is finished in lustrous satin chrome.

Smooth Positioning! Exclusive Micro-Adjust Swivel responds in a velvet-smooth manner yet stays put in any desired position within a 60° angle.

New Switch Convenience! "On" or "Off" at the flick of a finger with new slide type switch. The switch is mounted on swivel housing and connects across microphone circuit. Wiping type contact surfaces assure positive operation.

Applications: Transmitters, recording, p.a., and all uses where a full ranged, stable indoor or outdoor microphone is needed.

Specifications: Level: -54 DB (1v/bar). Range: 50-8000 cps. Complete with 20' cable, detachable connector, and dust-proof cover. Standard 1/8"-27 thread stand coupling. Shipping weight: 3 3/4 lbs. Various impedance models:

MODEL D20A	50 Ohms	List Price \$32.50
MODEL D20B	200 Ohms	List Price \$32.50
MODEL D20C	500 Ohms	List Price \$32.50
MODEL D20H	40,000 Ohms	List Price \$32.50

"308" DYNAMIC MICROPHONE

New and improved design. Ideal for general public address installations, recording, orchestras, dramatic presentations. Well built 15mm voice coil and substantial suspension provides the excellent reproduction of this reliable instrument. Its small size gives it "Artist Appeal." Well built for dependable service. Unaffected by temperature or humidity.

Frequency Response: 50-8000 cycles per second.
Output level: 60 db below one volt per bar.
Satin Chrome plated. Microphone size: 2 1/4 inches in diameter, depth: 2 3/8". Stand coupling: 1/8 inch 27 thread. Locking type connector at housing. Complete with 20 foot low capacity rubber covered cable. Shipping weight: 3 pounds.

MODEL 308. High Impedance (40,000 Ohms)
List Price \$26.80

"CU" CARBON MICROPHONE

Communications Type

For private aircraft, police and all types of mobile and marine applications. Frequency Response characteristics restrict pick-up to essential voice frequencies rejecting unwanted background noise. Single button type carbon microphone. Button impedance 100 Ohms. Output level 30 volts RMS across secondary of microphone input transformer. Double pole, single throw, press-to-talk switch connects microphone and relay control circuit. Complete with heavy duty "Push-in" mounting bracket. Moisture proof, flexible 3 1/2 foot cord. Rich black plastic housing. Strong, durable. No finish to wear off.
Microphone size: Diameter 2 1/4 inches, 1 1/2 inches thick. Net weight: 6 1/2 ounces. Shipping weight: 3/4 pound.
Available in two models:

MODEL CU-1, with 3-way phone plug.
List Price \$10.50

MODEL CU-2, (illustrated) with 3-way switchboard type plug.
List Price \$12.50

"808" VELOCITY MICROPHONE

For use where a smooth responding microphone with a smart design is required. Suitable for stage presentations, orchestras and general public address applications indoors. Bi-directional response allows for pick-up of audience reaction without "feed-back." This microphone does not pick-up sound from the sides, thus it eliminates much of the feed-back difficulty encountered with other types of microphones.

Uses sensitive 5mm ribbon element designed to reduce phase shift at high frequencies. This feature improves the high frequency response over the conventional velocity microphone.
Frequency Response: 43-8000 cycles per second.
Output level: 63 db below one volt per bar.
Satin chrome plated. Complete with locking type connector at housing and 20 foot rubber covered, low capacity cable. Stand coupling: 1/8"-27 thread. Microphone size: 1 1/4 inches square by 4 1/2 inches high. Shipping weight: 2 pounds.

MODEL 808. High Impedance (40,000 Ohms.)
List Price \$26.80

New and Improved A174 CARBON MICROPHONE

Replaces "W" Cartridge Type

Highly sensitive, single button carbon microphone. Light in weight and compact. Ideal for field use. An experimenter's favorite. Clear cut response to voice frequencies. Excellent for midjet transmitters. Smallest complete microphone of its kind.

Ideal for student's electronics study kits, etc.
Button Impedance: 200 Ohms.
Output level 12db below 6 milliwatts for 100 bar signal.

Black plastic case with metal suspension eye. Screw terminals. Complete with circuit diagrams, application suggestions, etc. Microphone size: Diameter 7/8 inches, thickness 1/2 inch. Net Weight 24 ozs. Shipping weight: 2 ozs.

MODEL "A 174" Impedance 200 Ohms.
List Price \$14.00

UNIVERSAL MICROPHONE CO.

INGLEWOOD, CALIFORNIA

HANDI-MIKES CARBON MICROPHONE SERIES

A hand microphone whose popularity has been won by trustworthy performance and rugged dependability. Well balanced all-metal construction. For call systems, small transmitters; for use wherever a close-talking microphone with clear crisp voice reproduction is required. Single button carbon type with impedance of 200 Ohms.

Output level: 12 db below 6 milli-watts for high signal-to-noise ratio. Satin Chrome plated. Complete with snap switch on standard

Model 200-A 6 foot flexible cord included. Microphone size: 8 inches overall with 2 1/4 inch head. Shipping weight: 1 1/4 pounds.

MODEL	List Price
200-A. 200 Ohms with Snap Switch	\$13.65
200-TA. 200 Ohms with Push to Talk Switch	\$13.65
200-TC. With Push to Talk Switch; 3 Wire cord	\$14.65

DYNAMIC MICROPHONE SERIES

Built with the ruggedness of a carbon type microphone, this dynamic hand microphone represents the best in proven performance. Well built 15MM voice coil; substantial suspension and construction throughout. Internal spring return of switch button eliminates possibility of microphone being left "on."

Response characteristics provide extremely clear speech response

without over-emphasis of high frequencies. Available in various impedances listed below.

Frequency Response: 50-7500 cycles per second.

Satin Chrome plated. Complete with 6 foot flexible cord. Cord strain relief at handle. Microphone size: length overall 8 inches, diameter of head 2 1/4 inches. Shipping weight: 2 pounds.

Model	Impedance	Output	Level	Operating	Into	Input of	Price
204-TA	35-50 Ohms	-44DB;	0=6 mw/100 Bars	50 Ohms			\$24.60
210-TA	200 Ohms	-42DB;	0=6 mw/100 Bars	200 Ohms			\$26.80
211-TA	500 Ohms	-42DB;	0=6 mw/100 Bars	500 Ohms			\$26.80
212-TA	40,000 Ohms	-60DB;	0=1V/Bar	Grid			\$26.80

"KD" DYNAMIC MICROPHONE

New and improved design.

An economy microphone for home recording, amateurs, carnivals. Slightly rising frequency characteristics provides increased clarity. Unaffected by temperature and humidity.

Frequency Response: 50-7500 cycles per second.

Output level: 63 db below one volt per bar.

Deep brown housing with polished chrome grille front. Microphone size 3 1/4 inches in diameter; depth 2 3/8 inches. Stand coupling: 5/8 inch 27 thread. Spring steel, cable strain relief at housing. Complete with 10 foot rubber covered cable. Shipping weight 1 3/4 pounds.

MODEL "KD." High Impedance (40,000 Ohms).	
List Price	\$17.75

MICROPHONE STANDS

A195 PROFESSIONAL STUDIO DESK STAND

Model A195

Ideal for broadcasting, banquets, paging and all desk level microphone use. Modern all-metal styling with satin chrome finish. Extra heavy base for added stability. Provision for wiring through upright. Size: 7" high, 5" diameter. Thread: 5/8" - 27. Shipping weight: 2 1/4 pounds.

List Price \$4.95

ST-3 NEW STUDIO FLOOR STAND

This three legged stand styled by Schaeffer of Hollywood is ideal for broadcasting, theatre productions, night clubs, etc. It is designed with low center of gravity for added stability and rubber cushioned vibration-absorbing feet to minimize floor noises. Smooth responding clutch provides noise-free action and positive-assurance against sudden dropping. Ruggedly built to stand

abuse. Minimum height: 40"; maximum height: 72". Satin chrome plated two-section upright. Three legged base has platinum gray wrinkle finish. Diameter: 18". 5/8" - 27 microphone coupling. Packaged in two containers. Shipping weight: 14 pounds.

List Price \$18.00

ST-R DELUXE FLOOR STAND

Same as ST-3, Studio Floor Stand, except the round base is slightly heavier. Platinum gray wrinkle finished base, diameter: 12". Rubber cushioned. Packaged in two containers. Shipping weight: 13 1/2 pounds.

List Price \$18.00

Model ST-3

Model ST-R

A31 COMBINATION DESK STAND

Two-piece desk stand with demountable upright (may be used as handle for converting desk into hand microphone). Upright is mounted into base with "push and twist" of wrist . . . to remove . . . simply "pull and turn" in reverse. Complete with rubber feet. Durable brown finish. All metal base with hardwood upright in matching finish.

Assembled height: 6". Upright 5 3/4" long, 5/8" - 27 thread on brass ferrule. Base 4 1/2" in diameter, 1 1/8" high. Shipping weight 1 1/4 pounds.

List Price \$3.00

A63 FLOOR STAND

Three-section type. Ideal for portable equipment. May be knocked down in two parts. Collapsed length 24". Base 9 1/2" in diameter, approximately 2" high. Fits all microphones with 5/8" - 27 thread. Rattle proof construction. Easy to operate. Adjustable height, 26" to 64". In low adjustment makes ideal banquet table stand.

Stand uprights are satin chrome plated. One-piece iron base is black wrinkle finished.

Base weight: Approximately 7 pounds. Floor Stand shipping weight 12 pounds. Packed in two cartons.

List Price \$12.50

UNIVERSAL MICROPHONE CO.

INGLEWOOD, CALIFORNIA

UNIVERSAL RC RECORDING CHASSIS

The Universal RC is the only home recording unit with these exclusive advantages: (1) Records extremely close to tangency. (2) Patented pantographic movement makes possible equally spaced cutting. (3) Groove depth adjustment is visible and adjustment can be made in recording position. (4) Pantographic action keeps guide shoe at correct angle in lead screw thread. Records inside to outside. (5) Lift lever at side of head allows operator to locate stylus in the exact location after the lead screw has been engaged. (6) Records at commercial levels and loudness. (7) Recording head automatically lifted at end of 10" record.

Specifications: 10" turntable. 110 volt, 60 cycle, 78 RPM motor (easily converted to 50 cycle operation). Audio Power: 1/2 w. for home recording, 3 w. for commercial levels. Complete with crystal pick-up to play back 12" records. Motor bearing dimensions: 14" x 20". Shipping weight: 24 lbs.

List Price.....\$59.50

UNIVERSAL A132A RECORDING HEAD

FOR HOME RECORDING

An especially designed magnetic Recording Head Cartridge for replacement in popular national makes of home recorders, such as: Wilcox-Gay, General Industries, etc. Uses spring temper phosphor bronze knife edge and steel spring attachment plate. The home recording version of Universal's patented Professional Recording Head—the first time our design and engineering skill has made a replacement recording head cartridge available to the general public.

Response range extends from 50 to 5000 cycles per second with a rise in the higher frequencies to offset loss in record materials, high frequency cut off of R.F. Tuners, etc.

Sensitivity: It requires only 1/2 watt to make a fine home recording. A feature of

the A132A patented design is that in addition it takes only 3 watts to make a record of commercial level or loudness. Most recording heads in this price class cannot make a record at this level under any condition.

Unaffected by high temperatures. Has powerful alnico magnet. Available in one standard impedance for matching the 3.2 Ohms adopted by the R.M.A. as a standard for loud speakers. Dimensions: 1 3/8" x 2 1/4" x 1 1/8".

MODEL A132A Recording Head Replacement Cartridge. Complete with spring temper phosphor bronze knife edge, steel attachment plate and mounting screws. Shipping weight: 8 ounces.

D61B CONSTANT VELOCITY FREQUENCY RECORD

For Direct Checking of Response Characteristics of Phonograph Pick-ups, Complete Lateral Disc Recording Systems and Complete Lateral Disc Reproducing systems.

For Indirect Checking of Response Characteristics of Recording Heads, Loud Speaker Installations, Theatre Sound Equipment, Public Address Sound Equipment, and Almost any Component of Audio Frequency Equipment.

For Quick Checking of Equipment without Resorting to use of Complicated Calibration Equipment and Procedures.

A Handy Tool in the Hands of Technician, Engineer, and Student Alike. Data sheet includes output levels of popular pickups.

TECHNICAL DATA

A 12-inch Recording at 78 RPM. Duplicate recording on each side of record. Disc is "pressed" in the new high grade flexible recording stock. (Will not break in shipment or handling.)

Recorded in three parts.

- (1) A continuously rising tone of 50 to 10 000 cycles per second. Frequencies are voice announced in 15 "breaks." Range of frequencies is recorded at Constant Velocity in steps of 50 to 200 c.p.s. at +7 DB, 200 to 500 c.p.s. at +14 DB, and 500 to 10,000 c.p.s. at +21 DB.
- (2) A 1000 cycle tone recorded in steps of 2 DB from +8 to +18.
- (3) A 400 cycle tone recorded at +18 DB.

Zero reference is established at an arbitrary level.

D61B FREQUENCY RECORD with Data Sheet.

\$3.50

A178 PICK-UP WEIGHT SCALE

This small, vest-pocket size scale checks pick-up for proper needle pressure, checks pick-up arm bearings, measures stylus pressures and spring and lever control tension. Readings in half ounce steps from zero to eight ounces. Durable plastic case with screw-on cap.

List Price \$4.25

A176 STROBOSCOPE

Shows at a glance whether the turntable speed is accurate, fast or slow. Measures both standard 78 RPM and transcription 33-1/3 RPM turntables under light sources of 25, 50 or 60 cycles. Cardboard disc packaged in protective folder.

List Price..... \$0.25

Brush

CRYSTAL PRODUCTS

Each application of headphones requires some special qualification for satisfactory performance. Brush has a most complete line of crystal operated headphones, and each model is designed for a specific group of applications. Brush crystal phones possess the following outstanding features:

1. BIMORPH* crystal drive element of such high impedance that line or circuit characteristics are not affected when monitored by Brush phones.
2. Wider range response with more uniform output.
3. Compensation for ear coupling.
4. Light-weight, rugged, shock-proof construction.

MODEL "BA-303" HUSHATONE*

A miniature, molded plastic extension speaker for under pillow use. Disc shaped ($4\frac{3}{16}$ " dia. by $1\frac{1}{16}$ " thick). Makes no uncomfortable lump beneath the pillow. Tone quality comparable to cone-type speaker because of specially designed plastic diaphragm. Speaker gives ample output with low power consumption (.001 watt). Hermetically sealed, can be dipped into disinfecting solution (temperature not above 120°F). Light weight BIMORPH* crystal drive element insures uniform response and high sensitivity. No parts to wear, loosen, or become detached. Furnished in maroon with satin chrome trim.

HUSHATONE* with 10' cord. Fair Trade Retail Price . . . \$9.75
 Net Wt. 8 oz. Shipping Wt. 2 lbs. Code Sepim

HIGH FIDELITY MODEL "A-1"

For use where HIGH FIDELITY and extended frequency response are of paramount importance. (60 to 10,000 cps. Corrected for rising response below 200 cps.) Especially suited to monitoring, sound measurement, audiometry, and similar exacting headphone applications. Sensitivity approx. 1.5 bars per volt at 1,000 cps. Impedance over 80,000 ohms at any frequency.

Headset complete with 5' cord and headband. List Price . . . \$18.00
 Net Wt. 6 oz. Shipping Wt. 2 lbs. Code Mihii

BRUSH MODEL "A" LORNETTE PHONE

The "A" lorgnette phone is designed for use in group hearing aid sound systems installed in churches, concert halls, theatres and auditoriums. Telescope extension from 12" to 17". Attractively finished in satin black. Light weight, easy to handle, and comfortable at the ear.

Single phone complete with 5' cord and lorgnette handle. List Price . . . \$8.20
 Net Wt. 5 oz. Shipping Wt. 1 lb. Code Milme

COMMUNICATIONS MODEL "BJ"

Developed for COMMUNICATIONS work where light weight, durability, and uniform response are required. Soft rubber housing insures good ear seal and wearing comfort over long hours of constant use. High output impedance .008 mfd. (40,000 ohms at 500 cps.), response 100 to 10,000 cps. Headset complete with 5' cord and adjustable lock-type headband.

List Price . . . \$15.85
 Net Wt. 6 oz. Shipping Wt. 2 lbs. Code Micom

BRUSH MODEL "A" GENERAL PURPOSE

Designed for GENERAL PURPOSE applications including laboratory, studio and skilled amateur home use. The BIMORPH* crystal drive element insures wide range, uniform response (100 to 10,000 cps.) and high sensitivity. High impedance; ideal for multiple installations.

Headset complete with 5' cord and adjustable lock-type headband. List Price . . . \$12.00
 Net Wt. 6 oz. Shipping Wt. 2 lbs. Code Millo

BRUSH MODEL "A" SINGLE PHONE

Particularly adapted to individual or group hearing aid and radio applications. Light weight, good ear seal, and comfortable to wear. Spring steel headband with soft rubber and cushion to eliminate slipping.

Single phone complete with 5' cord and headband. List Price . . . \$6.45
 Net Wt. 3 oz. Shipping Wt. 1 lb. Code Milod

BRUSH MODEL "B" SINGLE PHONE

Excellent for hearing aid applications because of extreme light weight. Has very low power consumption and high quality reproduction. Hermetically sealed against ear moisture and adverse humidity conditions. Same general characteristics as Communications Model BJ phones. Single phone complete with 5' cord and headband.

List Price . . . \$6.65
 Net Wt. 3 oz. Shipping Wt. 1 lb. Code Mibor

THE BRUSH DEVELOPMENT CO.

Brush

CRYSTAL PRODUCTS

The Brush PL-20 crystal phonograph pickup is a high quality instrument for use with all lateral cut records including broadcast transcriptions. Low stylus force (30 grams—approximately 1 ounce) virtually eliminates record wear and background noise. Permanent sapphire stylus has shown no measurable wear after 250 hours of continuous use—about 5,000 playings.

BRUSH MODEL "PL-20" CRYSTAL PICKUP

High impedance equalizers No. 3761-B at List Price **\$2.75**

For low impedance applications No. 3761-A equalizer for 50, 200, 500 ohm line available. List Price **\$15.00**
Net Wt. 5 oz. Shipping Wt. 1 lb. Code Laped

Designed for records up to 17 1/4 in dia. Black molded plastic arm with satin chrome metal parts. Pickup complete with 3761 B equalizer and arm rest.

List Price **\$50.00**
Net Wt. 2 lbs. 4 oz. Shipping Wt. 3 lbs. Code Payle.

PL-2Z CARTRIDGE heart of PL-20 crystal pickup.

Response: Flat within 25 db. up to approx. 6,000 cps; slight rise to 10,000 cps.

Output Voltage: .3 volts per .001" stylus displacement at 400 cps. to "Constant Velocity" recordings (with No. 3761-B equalizer). Sufficient to drive conventional two stage amplifier. 1.7 volts per .001" stylus displacement for "Constant Amplitude" recordings. List . . . **\$16.70**

BRUSH MODEL "RC-20" CRYSTAL CUTTER

The Brush RC-20 Crystal Cutter has been designed to satisfy the demand for high quality, low cost recordings in the home, school and studio. Due to its inherent stiffness, the RC-20 will cut lateral type records in virtually all hard or soft disc materials. Being of simple and compact design, it is readily adaptable to all types of transcription equipment. A three watt amplifier is sufficient to satisfactorily drive the RC-20 cutter. Frequency response flat within plus or minus 3 db. from 50 to 9,000 cps.

Cuts "Constant Amplitude" without equalization, and "Constant Velocity" or other desired frequency characteristics with suitable equalization. Complete technical data sent on request.

Cutter (less stylus)

List Price **\$25.00**
Net Wt. 4 oz. Shipping Wt. 2 lbs. Code Reco

BRUSH MODEL "BR2S" MICROPHONE

A non-directional, high quality microphone incorporating the well-known floating crystal SOUND-CELL.

Performance is unaffected by vibration, shock, or low frequency wind noise. Output level 65 db. (based on 1 volt per bar reference level).

Flat from 30 to 2,000 cps. with gradual rise to 4 db. maximum.

Especially suitable for public address systems, monitoring, recording, amateur radio, and industrial or institutional applications. Microphone complete with plug and socket. List Price **\$29.50**
Net Wt. 7 oz. Shipping Wt. 2 lbs. Code Maple

BRUSH MODEL "VM-1" "VIBROMIKE"

The VM-1 or "Vibromike" is a miniature CONTACT-TYPE microphone with high sensitivity and unusually wide-range frequency response (30 to 6,000 cps.) Output voltage from .05 to .1 volt or higher. Size of microphone 7/8" x 3/4" x 5/8".

Designed for a broad field of reproduction applications through direct contact. Adaptable to musical instruments, industrial uses detecting mechanical vibrations. Hermetically sealed in black rubber covered case.

Microphone complete with mounting clamp and 25' of cable. List Price **\$17.50**
Net Wt. 6 oz. Shipping Wt. 2 lbs. Code Music

BRUSH MODEL "BL-2" LAPEL MICROPHONE

The improved Model BL-2 lapel microphone features virtually flat response and extremely high output for a microphone of this type. Small and rugged (1 1/2" x 2 1/4") the BL-2 can be used in hand or as instrument pickup as well as in lapel.

Microphone complete with 25' of cable. List Price . . . **\$25.00**
Net Wt. 8 oz. Shipping Wt. 2 lbs. Code Maize

BRUSH SM-37 MICROPHONE-SPEAKER

For use in cases where one unit serves as microphone and speaker. Natural and faithful reproduction. Microphone response from 200 to 5,000 cycles output level approx 35 db. (zero reference one volt per sq. cm.)

Speaker range from 1,500 to 5,000 cycles. Sensitivity in order of 5 volts for conversational level. Impedance is capacitive reactance. Size 3 3/4" in diameter 1 1/2" deep overall. Case finished in cadmium.

List Price **\$8.25**
Net Wt. 7 oz. Shipping Wt. 12 oz.

Brush Crystal Microphones

Model BA-106

The Brush Model BA-106 is a high quality microphone incorporating the hermetically sealed Acoustical. This microphone offers unexcelled response in microphones of this type and price range.

Vibration, shock or low frequency wind noise do not affect the performance of this microphone.

Unexcelled for home recording, public address systems, ham shacks, monitoring and institutional and industrial applications.

Special Features of the BA-106 Microphone are:

Flat from 40 to 6000 c. p. s.

Non-directional.

Load resistance recommended: 5 megohms.

Output impedance equivalent to approximately .002 mfd. (0.8 megohms @ 100 cycles).

Output level Minus 50 db below 1 volt bar.

Microphone shipped complete with 8' shielded cable and plug, and desk stand with removable base.

List Price . . . \$16.75

GROUP HEARING AID COMPONENTS

SINGLE EARPHONES — "FEATHERWEIGHT" SERIES

LOZNETTE HANDLE AND HEADBAND TYPES

The most widely used earphones, for group hearing aid systems in churches, theatres, mortuaries, etc., are of the "Featherweight" series. The acoustic response of these has been found, over a period of years, to be especially suitable for this class of service. The unit is molded of high strength black plastic material, measures 2 1/4" in diameter, has a maximum thickness of 3/4" and weighs approximately 1 1/4 ounces. A variety of ohmage are available, but most users will find the following table useful.

D.C. RESISTANCE	IMPEDANCE	APPLICATIONS
76 ohms	300 ohms	Low Impedance Lines (up to 50 ohms)
1000 ohms	4500 ohms	High Impedance Lines (200-500 ohms)
2000 ohms	9000 ohms	Large Installations or High Impedance Lines (500 ohms)

- No. 120 \$ 6.50
- No. 110—Single Earphone, non-adjustable headband type No. 685 (Specify ohmage)..... \$ 6.50
- No. 112—Single Earphones, adjustable headband type No. 688 (Specify ohmage)..... 6.50
- No. 115—Single Earphone, non-adjustable headband type No. 685, with No. 450 volume control in cord..... 11.00
- No. 120—Single Earphone, loznette handle type No. 670 (Specify ohmage)..... 7.50
- No. 125—Single Earphone, loznette handle type No. 670, with No. 450 volume control in cord (Specify ohmage)..... 12.00

No. 110

Phone plugs, although not included as part of these earphones, in the listing above, are required in most applications. These can be supplied attached to the units if so ordered. (See No. 512.)

VOLUME CONTROLS AND OUTLET BOXES

No. 460

Outlet Boxes 460 and 461 are recommended for the majority of installations, combines in a single unit volume control, phone jack, and terminal strip for incoming circuit. No. 460 has brown wrinkle finish to harmonize with woodwork. No. 461 has a glossy ivory finish to improve visibility in theatres. Standard ohmage, 1000 ohms for low impedance lines and 10,000 ohms for high impedance lines (up to 500 ohms). On special orders 25,000 and 50,000 ohms can be supplied at slight additional cost.

TRIMM QUIET RADIO ATTACHMENT KITS

No. 640

Essentially, the TRIMM Headset Attachment Kit consists of a device designed to be connected to the loudspeaker voice coil circuit in such a manner that the user may have either the headset or loudspeaker operate alone, or the two may be operated simultaneously.

Ideal for . . .

The bedside radio, providing reception without disturbing others.

The short wave listener, bringing many new and interesting programs.

The hard of hearing, bringing countless interesting radio programs that they have been missing in the past.

HEADPHONES By C. F. CANNON

THE "CHIEF" — Cannon-Ball Bakelite Headset

The "Chief" is a new addition to the Cannon-Ball family of headsets. There is a demand for a high grade bakelite phone, reasonably priced, and The "Chief" meets this requirement in every respect. It is an inside terminal type. The diameter of the diaphragm is $2\frac{1}{8}$ ". Bakelite cases and caps. Double coils, two in each receiver. Laminated Chrome Magnets. Braid covered headbands with permanent adjustment and having no removable parts. Cotton covered cord four and one-half feet long.

No.	List Price
CC-2—2000 ohms D.C.	\$4.00
CC-3—3000 ohms D.C.	4.50
CC-5—5000 ohms D.C.	5.50

Leather covered headband in place of the braid band, List 45c extra

THE CHIEF

THE BRANDES "SUPERIOR" MATCHED TONE HEADSET

The Brandes "Superior" headset has been on the market since 1908. It was one of the first headsets available to amateurs. It is the outside terminal type. The diameter of the diaphragm is $2\frac{1}{8}$ ". Aluminum cases. Black bakelite caps. Double coils, two in each receiver. Magnets made of chrome magnet steel. It has a steel headband with permanent adjustment and having no removable parts. Cotton covered cord four and a half feet long.

No. BS-2—2000 ohms D.C. List \$3.50

THE SUPERIOR

THE "MASTER" CANNON-BALL That Old Reliable Headset

The "Master" Cannon-Ball headset is of exceptional high quality and rugged construction. It is used extensively in institutions, hospitals and prisons, and by radio servicemen and amateurs everywhere. It is of the concealed terminal type. The diameter of the diaphragm is $2\frac{1}{8}$ ". Aluminum cases. Bakelite caps. Double coils, two in each receiver. Magnets made of chrome magnet steel. It has a steel headband with permanent adjustment and having no removable parts. Cord is cotton, four and a half feet long.

No.	List Price
MC-2—2000 ohms D.C.	\$3.50
MC-3—3000 ohms D.C.	4.00
MC-5—5000 ohms D.C.	5.50

THE BRANDES "ADMIRAL" MATCHED TONE HEADSET

The Brandes "Admiral" phone is of the same general construction as the Brandes Superior but has the terminals on the inside.

No. BA-2—2000 ohms D.C.	List \$3.75
No. BA-3—3000 ohms D.C.	List 4.25
No. BA-5—5000 ohms D.C.	List 5.75

THE "DIXIE" CANNON-BALL

The "Dixie" Cannon-Ball is the same general construction as the Master Cannon-Ball except that the terminals are on the outside.

No.	List Price
CD-2—2000 ohms D.C.	\$3.00
CD-3—3000 ohms D.C.	3.25

THE "EMPIRE" CANNON-BALL New Lightweight Headset

The "Empire" Cannon-Ball is a lightweight, low priced headset, high in efficiency and attractive in appearance. Although it weighs less than six ounces, including headband and cord, it has a large magnet and double coils. It reproduces with clarity and volume equal to most of the larger, heavier and more expensive sets now on the market. It is of the concealed terminal type. The diameter of the diaphragm is $1\frac{3}{8}$ ". Aluminum cases. Black bakelite caps. Double coils, two in each receiver. A round chrome magnet of substantial size insures powerful magnetism. Cotton cords four and a half feet long. Headband is spring steel with adjustable yokes.

No. EC-2—3000 ohms D.C.	List Price \$2.75
No. EC-3—3000 ohms D.C.	List Price 3.00

Braid covered band in place of the plain steel 25c extra

THE MASTER

THE GRAND

CANNON-BALL "GRAND"—The Single Head Phone

The Single "Grand" Cannon-Ball headphone is a very fine piece of apparatus and is equal in volume and clarity of reproduction to most of the low priced inferior quality double headsets. Many people prefer the single headphone because they can hear a conversation addressed to them without removing the phone from the ear. It is the concealed terminal type. The diameter of the diaphragm is $1\frac{3}{8}$ ". Cases aluminum. Black bakelite caps. Double coils. Heavy bar magnets $\frac{1}{4}$ " square. Cotton cords four and a half feet long. The headband is spring steel permanently attached to the back of the phone.

No. SG-1—1000 ohms D.C.	List Price \$1.85
-------------------------	-------------------

MURDOCK

Wm. J. Murdock Co. began making communication components for the telephone industry in 1896, and wireless equipment in 1904. Such equipment included crystal detectors, transmitting helixes, transmitting micro condensers, variable condensers, meters, loose couplers, loading coils, headphones, loud speakers, resistors and even complete receiving sets up until 1928. Converted from military production, MURDOCK is supplying many communication items including the following:

No. 111 HEADPHONES

These standard communication "solid built" headphones include precision bakelite case and cap, concealed terminals, stainless steel and nickel plated brass headbands with leather covering. Highly recommended for rugged service. In addition to radio, many are used in hospital service. Complete with pin tip cords, 10,000 ohm impedance.

No. 100 HEADPHONES

The "atom" weight might be applied to the MURDOCK No. 100 headphones. The lightest practical headphones on the market — only 2. ounces with headband! This is designed around a hearing aid type receiver which has good frequency characteristics. No. 100 comes complete with PL-55 plug rated at 2000 ohms impedance.

No. 131 HEADPHONES

For general communications — especially CW (Code) — the MURDOCK No. 131 is tops, due to useful 1000 cycle peak. "Solid built" for fine performance. Headbands are all stainless steel and plated brass with proper leather covering. Supplied with wafer-thin ear cushions. No. 131 is complete with PL-55 Plug, 10,000 ohm impedance.

No. L-401 SPEAKER

MURDOCK Speaker No. L-301 (3 in.) and No. L-401 (4 in.) are PM loud speakers of quality design and construction. They are designed for clean reproduction of full frequency and dynamic ranges. Audition verifies the laboratory curves. Other impedances available for special applications.

Specifications for No. L-401

FORM: Square 4 1/8"
MOUNTING: Square or Round
BAFFLE OPENING: 3 3/4"
DEPTH: 2 1/8"
WEIGHT: 12 oz.

MAGNET: Alnico V, 1.47 oz.
TRANSFORMER MOUNTING: Lug Type
IMPEDANCE: RMA 3.2 ohms
POWER: Normal, 2 1/2 Watts
Maximum, 4 Watts

Specifications for No. L-301

FORM: Square 3 1/2"
MOUNTING: Square or Round
BAFFLE OPENING: 3"
DEPTH: 2-1/16"
WEIGHT: 11 oz.

MAGNET: Alnico V, 1.47 oz.

IMPEDANCE: RMA 3.2 ohms
POWER: Normal, 2 Watts
Maximum, 3 1/2 Watts

No. 200 HANDI-SPEAKER

MURDOCK No. 200 Bakelite speaker mount is made available for the MURDOCK No. L-301 speaker. Meets the demand for a good but inexpensive baffle. There is room for a standard transformer (commercial 1/2" x 1/2") and a switch or volume control if desired. This unit may be wall mounted if desired. Baffle is available in Black, Brown, and Mahogany, with or without MURDOCK L-301 loud speaker.

Other MURDOCK products include hearing aid receivers, electrical door chimes, buzzers, push buttons, and similar devices.

EF161	ROUND	12"	25 lbs.	44"-68"	32.50

STANDARD STUDIO FLOOR STANDS WITH "BRAKE-LOCK"

In addition to "SLIDE-LOCK" stands, EASTERN also features a line of studio models utilizing regular friction "BRAKE-LOCK" method of height adjustment. Same heavy bases as above with heavy 1" by $\frac{3}{4}$ " upright.

Model	Base	Diameter	Weight	Height	List
EF167	TRIPOD	15"	16 lbs.	35"-63"	\$20.00
EF168	ROUND	12"	17 lbs.	37"-65"	17.50
EF169	ROUND	12"	24 lbs.	37"-65"	22.50

STANDARD TWO AND THREE SECTION FLOOR STANDS

TWO SECTION

EF97 — A popular type full weight 2 section floor stand with "BRAKE-LOCK" grip upright. Adjustment is by knurled collar which can be adjusted for required tension. 10" modernistic grey wrinkle base has six bumpers. Upright in polished chromium. Height 35"-64". $\frac{5}{8}$ "-27 thread. Net weight 10 lbs. List Price \$14.50.

EF92 — A light weight compact stand, similar to above but with compact 9" by 3" base for portability. Height 34"-63". $\frac{5}{8}$ "-27 thread. Net weight 8 lbs. List Price \$12.50.

THREE SECTION

EF98 — A general purpose full weight three section stand with "BRAKE-LOCK" telescopic upright having non-removable sections. Requires only $20\frac{1}{2}$ " of space when demounted from base. Grey wrinkle base is 10" by $3\frac{3}{4}$ " high and has six floor bumpers. Instant height adjustment from 24" to 57". $\frac{5}{8}$ "-27 thread. Net weight 10 lbs. List Price 15.50.

EF94 — A three section stand similar to above but with compact 9" by 3" base for inclusion in carrying case. Upright requires only $20\frac{1}{2}$ " of space. Non-removable sections give instant height adjustment from $22\frac{1}{2}$ " to 56". Net weight 8 lbs. List Price \$13.50.

EF97

EF94

PORTABLE FOLDING STANDS

To take care of the varied demand for folding stands in the broadcast and public address fields, EASTERN has expanded its line to meet all possible minimum and maximum height re-

quirements in compact and standard height models. That "NEW LOOK" we've added to the tripods, makes them the most attractive line of folding stands in the microphone field.

THREE, FOUR AND FIVE SECTION COMPACT MODELS

EF76

EF76 — A three section folding stand equipped with EASTERN'S popular "BRAKE-LOCK" telescopic upright as supplied with round base stands described on bottom of page D-38. Sections do not disengage but stand is ready for instant height adjustment from 26¼" to a maximum of 58¼". When not in use, folds to 21⅝" by 2½". Tripod legs are rubber insulated and base spread is 24". Has standard ⅝"-27 thread and ⅛" Pipe thread if fitting is removed. Chromium finish. Net weight 3½ lbs. List Price \$16.50.

EF73 — A three section folding stand with somewhat larger tubing on the two upper sections than furnished with EF76 above, but has thumbscrew adjustment. Sections are non-removable and height adjustment is from 26" to 60". When not in use, folds to 21½" by 2½". ⅝"-27 thread. Chromium finish. Net weight 3½ lbs. List Price \$17.50.

EF73

EF74 — A four section folding stand, same as EF73 but addition of fourth section increases height range from 27" to 79", yet requires only 22½" by 2½" of space when not in use. Tripod legs are rubber tipped and base spread is 24". ⅝"-27 thread. Chromium finish. Net weight 4 lbs. Adjustment is by thumbscrews. List Price \$19.00.

EF77 — A five section folding stand same as EF74 but with fifth section added, increasing height range from 28" to 98". When not in use, takes only 23½" by 2½" of space. Tripod legs are rubber tipped and base spread is 24". Finished in Chromium and net weight is 4½ lbs. ⅝"-27 and ⅛" Pipe threads. List Price \$21.00.

EF74

TWO SECTION STANDARD MODELS

EF79 — A two section folding stand, designed for broadcast field work. Utilizes the ⅞" by ¾" upright equipped with internal "SLIDE-LOCK" and "SLEEVE-GRIP" release. To increase height, simply lift tube by taking hold at any point. Automatically locked when hand is removed. To lower, push "SLEEVE" downward, thereby actuating lock. Adjustment is from 43½" to 65½". When not in use folds to 39" by 2½". Tripod legs are rubber insulated and base spread is 24". ⅝"-27 thread. Chromium finish. Net weight 5 lbs. For RCA ½" Pipe thread, specify EF79P. List Price \$25.00.

EF81 — A two section folding stand with standard ⅞" by ⅝" "BRAKE-LOCK" upright. Adjustment is by friction collar. Height range is 37½" to 66½". When not in use, folds to 33" by 2½". Base has rubber bumpers and spread is 24". ⅝"-27 thread. Chromium finish. Net weight 3¾ lbs. List Price \$16.50.

EASTERN "NECK SUSPENSION"

For switchboard and applications calling for a chest mounting, the EASTERN "THIRD HAND" leaves your two hands free for required manipulations. Made from cast metal and supplied with 7" flexible gooseneck. An integral part of the casting is a caller letter plate for engraving your own letters. Fitted with neck and body straps which prevent shifting of microphone when leaning forward. Finished in fine black wrinkle.

Cat. No. ES160

List Price \$5.00

FLEXIBLE GOOSE NECKS

FL83 — Has extra stiff coil spring, to maintain rigidity. Standard 5/8"-27 threads. Overall length 12". Chromium finish. List Price \$2.50.

EXTENSION ARM

BA82 — Horizontal extension arm with 18 1/2" tube ... 5/8"-27 threads. Swivels listed above can be added for tilting effects. List Price \$4.75.

CALL LETTER PLATES

Call letters plates made to order in plastics or metals with special shapes and designs.

Plastics can be furnished with black letters on white background, white letters on black background, white letters on red background, white letters on blue background as well as mahogany background.

Metal plates can be made from copper, brass or stainless steel.

Furnish blueprint or sketch with complete details for estimate. We do not have standard designs but make to order only.

Successor to the Headset . . .

Stethoscope design eliminates headchy ear pressure—swings lightly under the chin. Wear for hours without fatigue! Delivers sound directly *into* the ear—blocks out background noise, aids weak signals. Built-in volume control—adjust from where you sit or as you move about. Magnetic receiver—sensitivity 88 d.b. above .00024 dynes per sq. cm. for 10 microwatt input. Weight: 1.2 oz.—durable polished Tenite. 5-foot tinsel cord and standard plug.

RADIO'S MASTER

RECORDING CORPORATION

WORLD'S LARGEST MANUFACTURER OF INSTANTANEOUS SOUND RECORDING EQUIPMENT AND DISCS

PRESTO 8D and 8D-G RECORDERS

The Presto 8D and 8D-G recorders represent a marked improvement in the design of equipment for the most exacting requirements. Broadcast stations, recording studios, laboratories, and educational institutions offering courses in radio, will find this type of equipment adequate for the finest instantaneous and master recordings. The equipment has proven its ability to stand up under continuous operation for long periods of time. Its design provides the operator with unusual flexibility and easy manipulation of controls.

The 8D and 8D-G are identical except the former is a rim driven type and the latter is directly gear driven at both 33-1/3 and 78.26 rpm. The 8D may be purchased without a cabinet but a cabinet is always included with the 8D-G because the drive mechanism is mounted at the factory as an integral part of the whole assembly. The 8D recorder consists of a heavy cast iron base containing the motor and driving rollers, the turntable bearing and the multiple grooved pulleys controlling the cutting pitch. The overhead is a cantilever firmly supported at its right end and arranged to swing to the rear when changing records. No contact with the turntable is required. The feed screw driven by a shaft passing up through the support casting at the right hand end of the overhead assembly has a built-in reversing gear for changing direction of feed.

The 8D-G is equipped with a direct gear drive in place of the rim drive of the 8D. Separate motors are employed for 33-1/3 and for 78.26 rpm and selection of speed is made by actuating a special double-throw mercury switch. The design of the drive has completely eliminated the need for a mechanical speed change. Both motors are always engaged mechanically but only one motor at a time is in operation — the other motor remains at rest and is not carried along by the rotating mechanism. Adequate isolation of the drive mechanism from the turntable is accomplished by a mechanical filter. The design and construction of the transmission unit produces a mechanism of extreme accuracy which is, nevertheless, very rugged and composed of unusually few parts.

8 D Recorder (less Cabinet) List Price, \$1992.00
8 D-G Recorder List Price, \$2644.00

SPECIFICATIONS

Speed Accuracy: For 8D-G, no deviation from 33-1/3 and 78.26 rpm. For 8D, within 0.5% at both 33-1/3 and 78.26 rpm.

Pitch: Adjustable to cut 88, 96, 104, 112, 120, 128 or 136 lines per inch, inside-out or outside-in with the same feed-screw.

Noise Level: Mechanical noise originating in the 8D-G equipment over 50 db below program level; in the 8D equipment over 40 db below program level.

Impedance: 1-D cutting head 500 ohms; 15 ohms available.

Frequency Response: 50 - 10,000 cps. Refer to 1D circular.

Power Requirements: Approximately 180 watts from a 115 volt, 60 cycle, single phase line. Motors are of the 1800 rpm synchronous type and are available for other voltages and frequencies at additional cost.

Microscope: Magnification 40 power, area 5 in focus—7 grooves, equipped with rigid cast aluminum mounting bracket and a special lamp for illumination of the grooves.

Operating Clearances: 8D-G overall clearance 45 x 25 x 35 inches (89 x 58 x 135 cm); 8D without cabinet 31 x 18 x 19 3/4 inches (79 x 46 x 49 cm).

Twin Motor Drive

PRESTO 64-A TRANSCRIPTION TURNTABLE

The Presto 64-A transcription turntable offers the following features which are of major importance to the owner and operator: Unusual mechanical simplicity . . . low mechanical disturbance . . . maximum speed accuracy . . . extreme ruggedness for long continuous operation . . . instantaneous selection of desired speed . . . and no requirements for mechanical adjustments.

This transcription turntable is directly gear driven and employs two separate motors, one for 33-1/3, and the other for 78.26 rpm. There is no friction device of any kind in the mechanism and no mechanical shift is required to change speeds. To select 33-1/3 rpm, 78 rpm or "off," the operator merely throws a three position switch. These changes may be made as rapidly as desired while the turntable is in motion with no damage to the mechanism. Only one motor at a time is in operation. The transmission "over runs" the motor which is not turning and thus does not carry it along in rotation although the stationary motor is never disengaged from the mechanism.

SPECIFICATIONS

Standard Equipment: The 64-A transcription turntable includes the electro-mechanical gear drive, turntable and cabinet. A reproducer and network is not included.

Speed Accuracy: No deviation from 33-1/3 and 78.26 rpm.

Noise Level: Mechanical noise originating in the equipment over 50 db below program level.

Power Requirements: Approximately 75 watts from a 115 volt, 60 cycle line. Motors are of the 1800 rpm synchronous type and are available for other voltages and frequencies at additional cost.

Mounting: Turntable and gear drive mounted in heavy wood cabinet with in-laid Inoleum top is 24 x 24 x 33 inches (61 x 61 x 84 cm.) List Price, \$495.00

A reproducer of any make may be installed on the 64-A Transcription Turntable

RECORDING CORPORATION

WORLD'S LARGEST MANUFACTURER OF INSTANTANEOUS SOUND RECORDING EQUIPMENT AND DISCS

PRESTO TYPE 90-A RECORDING AMPLIFIER

The Presto 90-A recording amplifier is a portable console containing all the facilities necessary for operation on remote assignments, but with an overall performance found only in high fidelity studio equipment.

The 90-A consists of three preamplifiers, mixer, master gain control and recording amplifier.

A selector switch provides: A flat response, 30 to 15,000 cps \pm 1 db—NAB 33-1/3 RPM recording — playback characteristic complementing NAB recording — and, the present day 78 RPM recording characteristic. The flat response can be modified by variable bass and treble controls giving emphasis up to 20 db at 100 and 7,500 cycles per second or 20 db de-emphasis at 7,200 cycles per second.

Noise is 60 db below recording level. Distortion at maximum output is less than 1.5%.

The use of input and output selectors makes the 90-A amplifier unusually flexible. It permits combining the signals of three microphones or of two microphones and either one of two pickups. By using the "Line" position, recordings can be made from an incoming program line. The output selector has playback (public address), continuous recording and simultaneous recording positions. While recording, the line jack provides a monitoring outlet or permits feeding a program line at the correct level.

The recording level is monitored by means of a Weston Type 30 VU indicator with illuminated scale and its closely controlled electrical and dynamic characteristics make it an ideal volume indicator for recording.

90-A Recording Amplifier List Price, \$595.00

PRESTO 8-N RECORDER

A precision instrument embodying the finest materials and workmanship throughout, designed in collaboration with engineers of the largest recording studios to include all of the operating conveniences necessary to produce consistent, high quality work.

The 8-N turntable records the widest frequency range with the lowest background noise obtainable on lateral recording. It is particularly recommended to studios making master recordings for the production of commercial pressings.

Standard Equipment: The 8-N recorder consists of a turntable, motor drive system and overhead cutting mechanism mounted on a cast iron base equipped with shockproof mountings. The cutting mechanism includes the high fidelity cutting head, spiraling feed screw, time scale, vertical damper and automatic equalizer. Also included are the microscope and pickup. Accessories necessary to operate the 8-N table include recording amplifier, microphone, discs and needles.

List Price, \$1683.00

PRESTO 6-N RECORDER

The Presto 6-N recorder is outstanding in its suitability for broadcast stations because it offers all the qualifications for good recordings, including master records, at the most economical price. It is ideal for the station requiring delayed broadcast of network programs, and for reference recordings.

The 6-N is the best type of unit for remote recordings because of the manner in which it packs so as to withstand transportation and yet is ready for operation within a few minutes. The overhead mechanism lifts off the table and is stored in a specially fitted compartment.

Standard Equipment includes the Presto cutting head, spiraling feed screw, vertical damper, time scale and pickup.

Accessory Equipment, which may be added to the 6-N Recorder if desired, includes the 160-A automatic equalizer and the 125-A microscope. A wood cabinet may be substituted in place of a carrying case at additional cost.

List Price, \$735.00

PRESTO

RECORDING CORPORATION

WORLD'S LARGEST MANUFACTURER OF INSTANTANEOUS SOUND RECORDING EQUIPMENT AND DISCS

PRESTO MODEL "Y" RECORDER

The PRESTO model Y recorder fills the need for a 16" transcription recording and playback equipment which is extremely portable and yet capable of producing high grade recordings. It makes continuous 15 minute, 33 1/3 RPM electrical transcriptions of sufficiently good quality to be used by broadcasting stations. It also makes 78 RPM recordings on 6", 8", 10" or 12" discs and may be used to cut 11 1/2", 13 1/2" and 17 1/4" master recordings from which commercial pressings are produced. In addition to recording, the model Y gives excellent reproduction of both electrical transcriptions and phonograph records and is widely used for auditioning recorded radio programs to prospective sponsors. As a public address system it will provide sound for audiences up to 1000 persons.

Among the important features of the model Y recorder are:

1. The exclusive Presto rubber-rimmed-turntable driven directly by a steel pulley on the motor shaft, a simple, foolproof drive system that eliminates vibration and holds the turntable speed absolutely constant. Maintenance is negligible. There are only two moving parts which need replacement about once a year.
2. A lever changes the turntable speed instantly without stopping the table or removing the record.
3. A lever adjusts the cutting mechanism to cut either from the outside of the disc toward the center or from the center out.
4. A cam lever lowers the cutting head gently on the record preventing accidental damage to sapphire needles.
5. A vibration damper attached to the cutting head suppresses vertical modulation in the record groove and eliminates variation in groove depth due to surface irregularities in

the disc. The damper also eliminates flutter when the records are played with pickups having a resonant peak in the low frequency range.

6. The cutting arm may be unlocked from the feed mechanism to cut spiral starting and runout grooves.
7. A time scale on the cutting arm shows the starting point for each size record and elapsed recording time at both 78 and 33 1/3 RPM.
8. The cutting head feed mechanism is located beneath the turntable where it is protected from dust or accidental damage. The parts of this mechanism are hand finished and fitted and its performance is equal in every way to the overhead lathe type mechanism commonly used.
9. The recording amplifier includes a two microphone mixer, high and low frequency equalizers and a change-over switch for continuous recording or re-recording. The amplifier and loudspeaker fit together to carry in a single case.

Y-2 Recorder List Price, \$741.00
Y-4 Recorder (low impedance inputs) 771.00

PRESTO MODEL "K" RECORDER

The Presto model K is a portable sound recorder, record player and public address system complete in a single carrying case. Exceptionally light and compact, it is ideally suited to the needs of sales training and industrial schools, teachers of speech, music and dramatics, as well as professional actors and musicians who require an instrument that can be carried easily and set up for operation in a few minutes time.

The model K records 15 minutes continuously at 33 1/3 RPM on one side of a 13 1/4" disc. It may be connected to any home radio set to record complete radio programs. It also makes 6, 8, 10 and 12 inch records, and plays all makes of phonograph records. As a voice amplifying system it will serve audiences of about 500 persons.

Although it is the lowest priced complete Presto recorder, it contains many valuable features of the more expensive instruments such as:

1. A magnetic cutting head and pickup, the design used in the highest grade equipment.
2. A full sized, 6 tube amplifier having push-pull triodes in the power stage.
3. A high frequency equalizer for 33 1/3 RPM recording and a tone control for suppressing needle scratch when commercial records are played.
4. A safety cam lever for lowering the cutting head to prevent accidental damage to sapphire needles.
5. A detachable, dynamic loudspeaker which may be operated at any desired distance from the recorder.
6. A cutter feed mechanism located beneath the turntable where it is protected from dust or accidental damage.
7. Provision for quick change from cutting outside-in to inside-out.
8. The exclusive Presto rubber-tired turntable driven directly by a pulley on the motor shaft, a drive system that eliminates rubber pulleys and belts which are subject to rapid wear. Turntable speed may be changed in 5 seconds from 78 to 33 1/3 RPM by removing a brass pulley on the motor shaft.

These features, not found in any other low-priced recorder enable the user to make high quality recordings, consistently. They simplify the operation of the instrument for non-technical owners and reduce operating costs by preventing spoilage of discs and needles. As a result of its excellent performance, more Presto model K recorders are now used by schools, industrial concerns and in the home than any other recorder in a similar price range.

K-8—Complete Recorder less microphone and stand . . . List, \$348.00

PRESTO MODEL "L" TRANSCRIPTION PLAYBACK

This equipment is designed for radio stations, advertising agencies and program producers, who demonstrate recorded programs at the offices of prospective clients.

Salesmen who use the Model L Playback will particularly appreciate its attractive, workman-like appearance, its small size and light weight which make it extremely easy to carry, its simplicity which makes it possible to set up for operation within a few seconds and the remarkably

clear, wide range reproduction . . . far superior to that ordinarily expected from portable equipment.

The Model L Playback was developed to meet an insistent demand among the larger broadcasting stations and agencies for "something better" in portable reproducing equipment. Those who use the Model L Playback in connection with important sales of station time and programs will consider its exceptional performance well worth its cost.

L-2—Portable Transcription Playback . . . List, \$290.00

Type 300-A Re-Recording Equipment

The type 300-A re recording equipment consists of an auxiliary turntable, which mounts on top of the recording turntable and an external pickup mounted on a pedestal. For re-recording or dubbing the 300-A equipment has several important advantages over a separately driven turntable. 1) The rotation of the recording and playing turntable is locked together so that the playing time and pitch of the duplicate record are identical with the original. 2) No waxes or wavers can be introduced during the re-recording since any variation in speed will occur simultaneously on both tables. 3) It is less expensive than a second complete turntable.

The 300-A equipment may also be used with the Presto model K-8 recorder to play 16", 33-1/3 RPM electrical transcriptions.

Standard Equipment: The complete 300-A equipment consists of a 140-A turntable, 141-A magnetic pickup and 142-A pickup pedestal. **Frequency Response:** Pickup 70 to 7,500 cycles. **Impedance:** Pickup 2,000 ohms. **Finish:** Gray enamel. **Shipping Weight:** 25 lbs. (11 kg.).

NEW PACKING

Six Needles Per Carton

Each Presto cutting needle is packed in an individual Lucite container having a chunk that holds it tightly in place to prevent damage. An addressed mailing bag is furnished for sending the needle to Presto for resharpener. Standard shipping cartons contain six cutting needles.

Type 75-A Recording Turntable

The lightest 16" dual speed recording turntable made. Recommended for all services requiring a high grade portable recorder. Widely used by broadcasting stations that record local news events for delayed broadcasts; a rugged, compact recording installation for mobile pick-up units.

Standard Equipment: The equipment consists of a 16" cast aluminum turntable, carefully machined to dynamic balance, weighing 10 lbs. It revolves on a single ball bearing at the base of a bronze shaft well. A heavy live rubber tire on the rim of the turntable engages with a steel, step-pulley on the motor shaft to drive the table. The motor is suspended by rubber grommets in a carriage which is moved up or down by a lever to change the turntable speed. The motor drive and turntable are mounted in a cast aluminum base designed to combine extreme rigidity with light weight. The cutting mechanism consists of a fan gear, worm and pinion driven by a worm on the turntable shaft. The 1-C high fidelity cutting head, 171-A vertical damper, 21-A time scale and 150-C lateral pickup are included as standard equipment. The 75-A table is mounted in the 2A carrying case. The 75-B turntable is mounted in the 3-A cabinet.

MODEL M-5S Description
MASTER PRO 16" OVERHEAD CUTTING MECHANISM with Spiraling Device

The "Master-Pro" is a universal machine that can be readily attached to any make recording turntable that has a standard centerpin.

Model M-5S \$215.00 Net **Model M-5 (less Spiral) \$175.00 Net**

Equipped with 8 ohm magnetic cutter & 120 O.I. leadscrews. Optional, 500 ohm cutter, 90-105-120-135 lines, O.I. or I.O. at no extra cost.

MODEL V Description
RECORDING TURNTABLE

Designed to be used with the REK-O-KUT M-5S or M-5 Overhead Recording Mechanism.

MOTOR: Hysteresis Synchronous capacitor start and run. Built to Rek-O-Kut rigid specifications.

IDLERS: Special neoprene compound. Resists oil and wear.

TURNTABLE: Aluminum alloy casting.

CHASSIS: Cast iron, ribbed, L Beam construction.

Model V De Luxe \$195.45 Net **Model V Standard \$165.45 Net**
equipped with Mastermatic Speed Shift

MODEL G-2 Description
TRANSCRIPTION TURNTABLE

CONSTRUCTION: Similar to Model V . . . Above.

STARTING: Accelerates from standing start to 78 RPM in $\frac{3}{4}$ turn. Accelerates from standing start to 33 $\frac{1}{3}$ RPM in $\frac{1}{4}$ turn.

CUEING: 15 $\frac{1}{2}$ " Turntable allows transcription record to overlap $\frac{1}{4}$ of inch permitting cueing from rim of disc.

SPEED: Meets all Broadcast Network tolerances in time limits.

Model G-2 De Luxe \$155.00 Net **Model G Standard \$125.00 Net**
Equipped with synchronous motor and mastermatic speed shift With constant speed induction motor

MODEL C-7 Description
CONSOLE CABINET

CONSTRUCTION: Beautifully finished in metallic gray. Record holder stores 100 transcriptions. 4 adjustable screw jacks for quick easy leveling. Built-in electrical outlets. Cutout for instantaneous mounting of Model "V" and "G" Turntables.

DIMENSIONS: 32" high x 24" wide x 26" deep.

VENTILATION: Ventilated compartment for self-contained amplifier.

Price \$129.00 Net

THE PICKERING PICKUP

THE QUALITY UNIT THAT EXCELS THEM ALL!

Model 161 with Diamond Stylus. A professional magnetic type reproducer for lateral-cut phonograph records and transcriptions. It has virtually no intermodulation nor harmonic distortion at any amplitude capable of being recorded. There is no frequency discrimination over the range from 30 to 15,000 cycles per second and is completely free from any vertical response. Tracking pressure is 18 grams. Diamond stylus has .0025 inch radius for use with all 88 to 136 lines-per-inch recordings. Withstands practically any shock through unique guard into which stylus recedes. Arm is supported on frictionless hardened steel alloy cone pivots for perfect tracking, even on badly warped discs. Diamond stylus life is approximately 5,000 hours, at least ten times the life of sapphire. Overall length of arm, 14 $\frac{3}{4}$ " height, 2 $\frac{3}{4}$ ". Supplied with arm rest. Shipping weight, 2 lbs.

MODEL 161 L—500/600 ohms output, —40 db. List price \$165.00
MODEL 161 M—10,000 ohms output, .05 volt. List price \$165.00

Model 165L Equalizer-Amplifier Designed for use with Model 161M Pickup. Five-position equalizer switch compensates for American, European, N.A.B., Orthacoustic, etc., record characteristics. Supplied with output impedances of 30, 250 and 500/600 ohms at "0" db. Uses 6SJ7, 6SN7 and 6J5 tubes. Size 5 x 6 x 10 inches. Requires 250 volts D.C. at 15 ma. and 6.3 volts A.C. or D.C. at 1.2 Amperes. Supplied with tubes and input cable. Shipping weight, 9 lbs.
List price \$200.00

Model 163A Equalizer A loss-type equalizing network for use with the Model 161M Pickup. It is designed to compensate for most of the commonly encountered record characteristics. Position 1 — flat high frequency response to over 15,000 cps. Low frequency rise to give full compensation from 500 to 40 cycles. Position 2 — flat high frequency response. Low frequency response approximately 5 db. below position 1. Position 3 — for NAB or Orthacoustic transcriptions. Position 4 — Low frequencies same as position 2. High frequencies sharply attenuated to reduce surface noise. Attenuation starts at 4000 cycles. Position 5 — low frequencies same as position 1. High frequencies same as position 4. 250/600 ohms output, —60 db. Size 3 $\frac{1}{2}$ x 3 $\frac{3}{4}$ x 5 inches. Shipping weight 2 lbs.
List price \$70.00

EACH PICKERING PICKUP AND CARTRIDGE IS UNCONDITIONALLY GUARANTEED

Pickering reproducing equipment, with the exception of the stylus point, is fully covered by an unconditional guarantee provided that the units have not been tampered with, nor subjected to extraordinary abuse. Replacement styli can be installed in cartridge reproducers for the following net charges: .0027" sapphire — \$2.50; sapphire stylus of special radius \$5.00; diamond stylus \$15.00. Replacement diamond styli for the Model 161 transcription pickup can be installed for \$22.50 net. Unless otherwise specified diamond styli will be supplied with a radius of .0025". Other diamond stylus radii can be supplied at no additional charge. All returns should be sent direct to factory at Oceanside, L.I., N. Y.

Equipment returned to the laboratory for service will be reshipped within 24 hours after receipt. All frequency ranges indicated above denote region of response flat within 2 db. Voltage and db levels (6 mw/500 ohms) based on 10 cm./sec. stylus velocity.

Pickering Reproducing Equipment is Sold by All Principal Distributors

Pickering & Company Inc.

Audio Laboratories, Oceanside, Long Island, New York

THE PICKERING CARTRIDGE

Every Pickering Cartridge which leaves our laboratory has been carefully tested for the following characteristics, the allowable limits for which are shown:

FREQUENCY RESPONSE — plus or minus 2 db, 40 - 10,000 cps.

WAVEFORM DISTORTION — 1 per cent maximum.

OUTPUT LEVEL — 70 millivolts, plus or minus 2 db.

TRACKING PRESSURE — 15 grams max. at 40 and 10,000 cps.

In addition, optical inspection of the stylus polish and shape, mechanical inspection of the moving parts, and electrical inspection of the pickup coil has been made on each unit. Regular sampling tests reveal absolute stability, amazing ruggedness and complete insensitivity to the effects of temperature and humidity.

NO OTHER PICKUP CAN QUITE MATCH THIS PERFORMANCE

The Model 120M Cartridge will fit practically any arm which will accommodate a crystal cartridge. The ingenious "Keystone Clip" mounting permits adaptation to a wide variety of arm shapes and sizes, and permits adjustment of the stylus position for minimum tracking error.

Model S-120M with .0027" Sapphire stylus.
List price \$16.50

Model D-120M with .0025" Diamond stylus.
List price \$41.50

Model D-140S with .001" Diamond stylus for new MICROGROOVE type recordings.
List price \$60.00

Model 120M Cartridges are supplied in a standard impedance of 27,000 ohms. Units of special impedances can be supplied on order for a 10% additional charge.

The frequency response at a constant velocity of the stylus tip is shown in the curves below. The cartridge is assumed to be mounted in an arm of good construction. Production units fall within 2 db of these curves.

Model 125-H Preamplifier Expressly designed for use with the Model 120M Pickering Cartridge Reproducer. It compensates for the average recording characteristic, and raises the output voltage to a level at least as high as that obtainable from crystal pickups. It operates from the power supply of the amplifier or radio set with which it is used, saving the cost of a separate power supply. Normal high-frequency characteristic to play new records flat to 15,000 cps; filter cuts off above 4,000 cps at 20 db per octave. Furnished complete with 6SL7GT tube, power input cable and simple installation instructions.

List price \$32.50

PARA-FLUX

(Trade-Mark)

REPRODUCERS

Specifically Designed For . . .

- ★ AM-FM BROADCAST STATIONS
- ★ RECORDING STUDIOS
- ★ WIRED MUSIC COMPANIES
- ★ THEATRES AND FACTORIES THAT UTILIZE RECORDINGS
- ★ HIGH FIDELITY HOME SETS

The PARA-FLUX reproducer with interchangeable heads, illustrated below, for vertical, lateral or universal, uses only one arm and equalizer. All possess the same impedance matching to the equalizer. High output level affords an important advantage in broadcasting as to value of signal level to background noise. Response, all models, linear from 40 to beyond 11,000 c.p.s.

Universal Reproducer

Vertical Only Reproducer

Lateral Only Reproducer

Over 2,500 PARA-FLUX REPRODUCERS are now in service by FM and AM Stations.

PARA-FLUX reproducers set a new high standard for performance, flexibility and dependability. They are well suited for use wherever the most realistic reproduction of transcriptions is necessary. Among the outstanding design and construction features are found:

HIGH OUTPUT:	1 MW Ref. Level	6 MW Ref. Level
Vertical Head	—43 db	—50 db
Lateral Head	—53 db	—60 db
Universal Head	—53 db	—60 db

PLUG-IN HEAD: Vertical, lateral and universal heads use same arm and equalizer. Head can be removed and replaced in a few moments by means of plug connection.

LONG RECORD LIFE: Extremely low mass of moving element (only 18 milligrams) insures longer record life. Stylus pressure, all models, is under 20 grams (carefully factory adjusted).

DIAMOND STYLUS: Selected hard African diamond points, highly polished and finished to tolerances of 1/10,000 inch.

VARIABLE OUTPUT IMPEDANCE: 30, 250 and 500/600 ohms.

DESIGNED FOR CUING: "Hair-Line" indicator on head and precise stylus construction make accurate cuing possible and permit "back-tracking" without damage to record or head.

RUGGED CONSTRUCTION: So designed that no damage will result if reproducer is accidentally pushed across recording. A graceful finger lift prevents reproducer from slipping when lifted off the transcription.

The PARA-FLUX reproducer is delivered completely assembled, ready for use. It comprises the head (your choice of lateral, vertical or universal), arm and equalizer and switch.

UNIVERSAL HEAD MODEL UL-1DA: For superior performance where both lateral and vertical reproduction is required from the same unit. Selected hard African diamond stylus has 2 mil. radius. Design is such as to permit useful output should lateral transcription

be started while equalizer is accidentally left in vertical switch position, and vice-versa. For best results on shellac records, use LL-1D Head.

VERTICAL HEAD MODEL VL-1DA: Provides maximum in quality of reproduction from vertical ("hill and dale") recordings, while discriminating against lateral response. The selected hard African diamond stylus has a 2 mil. radius.

LATERAL HEAD MODEL LL-1DA: Designed to provide the most advanced quality in lateral reproduction, while discriminating against vertical response. Selected hard African diamond. Stylus has a 2.5 mil. radius.

REPRODUCER ARM MODEL A-16: Die-cast aluminum arm, swinging on a radius for 16" records, makes use of unique and exclusive (patent pending) friction-free bearings that insure less side-of-groove wear; no oiling, cleaning or adjusting necessary. Counterbalance keeps stylus pressure at under 20 grams. Height adjustment permits adapting arm to any turntable platters in use. Arm (with stand) is finished in attractive blue-gray and polished aluminum center.

EQUALIZER AND SWITCH MODEL EL-3: Since PARA-FLUX reproducers are all linear in response, an equalizer is required to correct any frequency pre-emphasis used in recording. Model EL-3 equalizer is effective with all three types of PARA-FLUX heads. It provides constant equalization over the full amplitude range of any recording. Equalizer switch, providing five positions (two for vertical and three for lateral recordings). The newly designed Equalizer, in one complete package, embodies double housing which gives double shielding against hum pickup. Combines the switch mechanism as well as impedance matching and correct equalization for the switch positions.

By means of an adjustable shank, the switch can be adapted to wood or metal panels of various thicknesses. Equalizer requires only single 3/8" diameter hole for mounting. Accommodates any panel thickness from 1/8" to 3/4".

16" TRANSCRIPTION PLAYER 2-SPEED MODEL TP-16C

FEATURES

- ★ Finest reproduction for superior recorded entertainment.
- ★ Switch output impedance: 30, 250, and 500/600 ohms.
- ★ Fully Portable.
- ★ Small overall size: in carrying position 23" w., 17½" h., 8" d.
- ★ Light in Weight, 38 lbs. gross.
- ★ Compact for Convenient Carrying.
- ★ For Records up to 16".
- ★ 2-Speeds, 78 and 33-1/3 R.P.M.
- ★ Constant speed heavy duty motor, silent, smooth operation.
- ★ Easy installation.

Supplied with or without professional broadcast station reproducers. See details on preceding page.

Model TP-16C—TRANSCRIPTION RECORD PLAYER, precision built and expertly engineered, fills a long-felt need for an efficient, trouble-free unit at a reasonable price. It is especially well suited for use by wired music studios, broadcast stations, and in homes where superior recorded entertainment is required. Records up to and including those 16" in diameter can be played at either 78 or 33-1/3 r.p.m. Free of wow and rumble. Black leatherette covered case.

MOTOR: Constant speed type, incorporating oversize bronze bearings. Runs cool (temperature rise only 10° over ambient). Underwriters Approved. Full "floating mount" panel so that no metal touches metal. Drive wheel and idler have special formula neoprene "tires" that are precision ground for concentricity. These "tires" have natural adhesive properties that result in the turntable being driven with absolutely no slippage. Longer life is assured.

SPEED-CONTROL on panel permits instant selection of 78 or 33-1/3 r.p.m. Switch has center "off" position; when in "off" position, drive wheel and idler are auto-

matically disengaged—this means that no flat spots can develop on the wheels.

16" TURNTABLE—Platter is of cast aluminum, balanced and machine-finished to give "wowless" performance. Table fits snugly over a specially formed spindle assembly.

TP16C—Turntable and Case only.....	\$124.50 Net

MODEL MX Rim drive, 2-pole motor with novel idler arrangement assuring quiet operation. Motor is insulated from mounting plate to further eliminate vibration. Turntable shaft revolves with turntable, and is grooved for turntable clip. Novel bearing construction insures rigid and permanent alignment of motor shaft. Oilless bearings. Furnished complete with 9" turntable and mounting plate ready for installation. Packed in individual cartons. Shipping weight: 4 lbs.

MODEL LX Rim drive, 2-pole motor. Rubber insulated from both mounting plate and turntable for quiet operation. Turntable shaft revolves with turntable, and is grooved for turntable clip. Furnished complete with 9" turntable and mounting plate ready for installation. Packed in individual cartons. Shipping weight: 4 lbs.

MODEL RX Rim drive, 4-pole motor. Rubber insulated from both turntable and mounting plate for quiet operation. Driving pulley, idler and turntable positively aligned in one plane for efficient performance. Turntable shaft revolves with turntable and is grooved for turntable clip. Furnished complete with 9" or 10" turntable and mounting plate ready for installation. Packed in individual cartons. Shipping weight: 5 lbs.

MODEL GI-RM4 Heavy-duty, rim drive, 4-pole motor. Rubber insulated from both mounting plate and turntable for exceptionally quiet operation. Turntable shaft revolves with turntable and is grooved for turntable clip. Retractable record drive pin in turntable permits playing standard records without adjustment. Efficient performance is assured by positive alignment of driving pulley, idler and turntable in one plane. Furnished complete with 10" weighted turntable and mounting plate. Packed in individual cartons. Shipping weight: 9 lbs.

PHONOGRAPH MOTORS, RECORDERS AND RECORD CHANGER-RECORDERS

COMBINATION RECORD CHANGER-RECORDER

MODEL GI-RC-130L 78 R.P.M.
... 115 volts AC — 60 cycles

Dimensions: Base plate — 14" x 14" x 3/8"; height above lower edge of base plate — 5 1/4"; depth below lower edge of base plate — 2 1/4". Packed in individual cartons. Shipping weight: 24 1/2 lbs.

Cuts records up to 10" diameter. Plays twelve 10" or ten 12" records automatically. Only necessary to lower cutting arm over record disc to start recording operation. Convenient depth-of-cut adjustment driving pin. Self starting, dynamically-balanced, recording type motor. One lever to move when changing from 10" to 12" records, removing records or to set for manual operation and recording. With lever in extreme position, all sizes of records can be removed from the turntable without interference. In manual position, tripping mechanism is inoperative. Non-jamming record handling fingers which do not extend past record lead-in space. Pressing reject button drops the first record onto the turntable and automatically positions the pickup on the record. Records may be rejected instantly. Handles records with either run-in or oscillating trip grooves. Means provided for guiding pickup needle into the playing grooves on records without lead-in grooves. Pickup arm supported at all times when not resting on record. Changing mechanism is positive and quiet in operation. Shock mounting provided which permits isolation of the entire assembly from the cabinet. Brown iridescent finish, streamline plastic trim on pickup and cutter arms attractively engraved with legends "Reproducer" and "Recorder". Furnished with crystal pickup, 10" weighted turntable, on and off switch and spring mounting hardware.

List price \$72.50*

Above price includes the X-26 Crystal Cutter. For M-41-10 Magnetic Cutter add \$2.00 each. *NOTE: Price includes Federal Excise Tax.

HOME RECORDING and PHONOGRAPH ASSEMBLIES

MODEL GI-R90L 78 and 33 1/3 R.P.M.
... 115 volts AC — 60 cycles

Cuts records up to 10" diameter at 78 R.P.M. or 33 1/3 R.P.M. Plays records up to 12" diameter at 78 R.P.M. or 33 1/3 R.P.M. To shift motor from one speed to the other, merely turn the speed change dial. Beautiful walnut wood grain finish on steel base plate. Streamline plastic trim on pickup and cutter arm attractively engraved with legends "Reproducer" and "Recorder". Turntable recessed into well in base plate. Merely lower cutter arm over record disc to start recording. Convenient depth-of-cut adjustment. Dynamically-balanced, 4-pole, rim drive motor. Compensating switch operated by speed change dial. Assembly includes dual speed motor; 10" weighted turntable; cutting mechanism; crystal pickup; compensating switch; pickup and cutter arm rests; drawn steel base plate with formed down edges. Dimensions: Base plate — 15" wide, 11 1/2" front to back; height above lower edge of base plate — 2 3/4"; depth below lower edge of base plate — 3 3/8". Packed in individual cartons. Shipping weight: 17 lbs.

List price \$48.25*
Above price includes the X-26 Crystal Cutter. For M-41-10 Magnetic Cutter add \$2.00 each. *NOTE: Price includes Federal Excise Tax.

MODEL GI-R70L 78 R.P.M.
... 115 volts AC — 60 cycles

Cuts records up to 10" diameter. Plays records up to 12" diameter. Simple cutter feed mechanism requires merely lowering the cutter arm over the record disc to start the recording operation. Convenient depth-of-cut adjustment on top of cutting arm. Retractable record driving pin in the turntable permits playing standard records without adjustment. Heavy-duty, dynamically-balanced, 4-pole, rim drive induction motor. Self-starting and uniform in speed. Brown iridescent finish. Assembly includes motor; 10" weighted turntable; cutting mechanism; crystal pickup; pickup and cutter arm rests; drawn steel base plate with formed down edges. Dimensions: Base plate — 15" wide; 10" front to back with tone arm extending 1 1/2" at back of plate; height above lower edge of base plate — 2 1/4"; depth below lower edge of base plate — 2 5/8". Packed in individual cartons. Shipping weight: 15 3/4 lbs.

List price \$40.85*

Above price includes the X-26 Chystal Cutter. For M-41-10 Magnetic Cutter add \$2.00 each. *NOTE: Price includes Federal Excise Tax.

WIRE, TAPE and DISC RECORDING MOTORS

Heavy duty, 4-pole, shaded pole induction motors, 1/70th H.P. Free speed: 1740 R.P.M. Maximum running torque: 12 ounce-inches. Features include: A locating and locking arrangement for both top and bottom covers which assures high accuracy in alignment of rotor within the stator bore; new air intake; dual cooling fans and self-aligning, oil-impregnated sleeve bearings. These high torque motors are used in practically all tape, wire and disc recorders now being manufactured. Dimensions: Length — 3 3/8"; width — 3 3/8"; depth — 3" below mounting surface; shaft diameter — 1/8".

NOTE: Prices vary in accordance with different recorder requirements — i.e., shaft length, direction of rotation, etc. State model of recorder for which replacement motors are needed when requesting prices.

SINGLE SPEED

... for standard 78 R.P.M. or Microgroove 33½ R.P.M. records

DUAL SPEED — Webster-Chicago Dual-Speed Record Changers have these outstanding features:

- *Tilt-O-Matic Arm* . . . gives proper balance and weight distribution for standard or Microgroove records with a simple finger-tip control.
- *Tandem-Tip Nylon Needle* . . . provides in one needle a Microground tip for Microgroove records and standard-ground tip for standard records. The TILT-O-MATIC finger-tip control automatically makes the proper needle tip selection.
- *Velocity-Trip Record Change Mechanism* . . . requires no "lead-in" springs, hence has no lateral pressure to injure the delicate record grooves. The tone arm tracks easily for maximum tone pick-up and moves freely in either direction. It is the only record changer mechanism which allows the playing of inside-out recordings. Change is fast, positive and easily adjusted.
- *Webster-Chicago Dual-Speed Record Changers* play 10 twelve-inch or 12 ten-inch records of either standard or Microgroove types at one loading.

Model 256 is the deluxe favorite of the Webster-Chicago Dual-Speed line. Design, workmanship and performance are unexcelled. Model 256 is ideal for custom or service installation.

Model 246 is a splendid model, similar to the Model 256. Slightly smaller, it will fit any radio console.

Model 156 . . . is the deluxe Webster-Chicago single-speed record changer . . . for standard 78 R.P.M. records.

SINGLE SPEED — Webster-Chicago Single-Speed Automatic Record Changers are the choice of over a million users and nationally-known manufacturers of radio-phonograph combinations.

- Plays 10 twelve-inch or 12 ten-inch records automatically at one loading.
- Change cycle is quiet and fast—approximately 4 seconds.
- Simple, foolproof—cannot be jammed.
- Velocity-Trip Mechanism assures perfect tracking.
- Stops automatically after last record has been played.
- Available with either standard crystal cartridge or low-pressure magnetic pick-up.

MODEL 146, for standard 78 R.P.M. records, is small enough to fit into any cabinet where space may be a problem.

Webster-Chicago

MODEL 78 WIRE RECORDER

... for service installation in radio consoles

MODEL 78 Webster-Chicago Wire Recorder is designed specially to be installed in existing radio consoles for increasing the user's enjoyment of radio, records or microphone-recorded material.

Model 78 is compact and attractive in an all-metal case finished in silver-gray gloss enamel. The popular Webster-Chicago Wire transport mechanism is controlled by an easy-to-operate, positive-acting lever which brakes the spool and wind-up drum automatically when shifting from run to rewind. Circuits for "record-radio," "record-microphone" and "listen" through radio are push-button controlled. Recording volume level indicator is a Db type meter which permits the user to record accurately while the radio or record changer volume is at its lowest setting. This "silent" recording feature is especially popular.

On-off-tone control and volume control provide all desirable combinations.

All cables and plugs required for installation in the radio console are furnished with the Model 78 and a fine quality crystal microphone and a spool of Webster-Chicago pre-tested recording wire are included with the unit.

Model 78 is easy to install. Webster-Chicago SD-30 slide drawer kit is available for the purpose, and drawings showing these methods may be procured through Webster-Chicago distributors everywhere.

GARRARD

GARRARD

New GARRARD RC65 Record Changer

Radically improved in design and in mechanical operating features. Incorporates all the scientific and technical knowledge acquired through many years of critical testing, experimentation and manufacture.

Through the years, discriminating music lovers have learned to depend on this superior mechanism as the World's Finest in record playing equipment. They know that they can rely on a GARRARD to give them consistently quiet, efficient performance. The GARRARD RC65 is built to rigid standards and is fastidiously machined and assembled to assure trouble-free performance.

GARRARD's speed regulated, governor-controlled motor, using a steel governor disc, is fashioned to give powerful and regulated running at all times. The motor runs silently at maximum record loads without vibration, rumble or speed variations. The speed regulator feature permits adjustment of motor speed to 78 rpm or to retard or accelerate the tempo of any any record to suit individual tastes or to adjust for varying line voltages. The motor has a positive automatic stop which shuts the motor off after the last record is played. The on-off switch is located on the mounting plate in such a position as to prevent interference with the free movement of the tonearm.

The RC65 is a "mixer" Changer. It accommodates both 10" and 12" records intermixed in any assortment and in any combination. There are no buttons or switches to throw. It is entirely automatic.

GARRARD's exclusive true-tangent tone arm is jewel-mounted and equipped with ball-bearings. It is constructed to give perfect parallel lift, to set down on records gently, to track silently and to give genuine "floating" response.

GARRARD offers the unique advantage of having a replaceable pickup head which can accommodate any of the popular cartridges available. It is also initially offered to you with your choice of either a low-pressure Crystal with permanent needle OR Crystal for use with replaceable needles OR with the GARRARD Standard Magnetic Pickup OR with the GE Variable Reluctance Pickup. There is no change in price in any case. Simply specify which is preferred when ordering.

Minimum cabinet dimensions are 15" wide x 13" deep x 5 1/2" clearance above the unit plate and 4 1/2" clearance below the unit plate.

Model 65/D — AC Model, Dual Voltage Motor for 110/130 and 200/250 volts, 50/60 cycles; furnished with your choice of pickup as described above. Net price \$69.50

Model 65/U — Universal AC-DC Model; 25/60 cycles; 110/130 and 200/250 volts; furnished with your choice of pickup as described above. Net price \$89.50

Both the GARRARD Record Changer and the GARRARD Phono Assembly are available fully mounted, ready for operation (a) on a sturdy wooden box or (b) in a carrying case or tall-model cabinet, as illustrated on next page. Ask for prices.

GARRARD Type V Phono Assembly

The newest unit of a long line of high quality phono assemblies for playing single records.

Here again, GARRARD has spared no effort or expense to produce the finest possible player for those who demand the best in record reproduction.

The entire assembly is typically GARRARD in that it features the finest type of phono motor—speed-regulated and governor-controlled. This exclusive feature makes it possible to adjust to perfect speed (78 rpm) or to accelerate or retard the tempo to suit the listener.

The Type V Assembly features an entirely new, unique mounting arrangement which represents the first genuine forward step in mounting design. This "bow" mounting is so efficient that even a blow struck on the motor board will not cause the tone arm to skip or repeat a groove. This is another exclusive feature and another GARRARD "first."

Available with your choice of quality pickups: (a) high fidelity Crystal pickup with permanent stylus, (b) Crystal pickup for use with replaceable needles, (c) GARRARD Magnetic Pickup, (d) G.E. Variable Reluctance Pickup.

Minimum cabinet dimensions are 15" wide x 13" deep x 4" clearance below the motorboard and 3 1/2" clearance above.

Type V/D — AC Model, for 110/130 and 200/250 volts, 50/60 cycles; furnished with your choice of pickup as described at left. Net Price \$33.50

Type V/U — Universal AC-DC Model; 25/60 cycles; 110/130 and 200/250 volts; furnished with your choice of pickup as described at left. Net price \$45.00

NOTE: ALL OF THE ABOVE PRICES INCLUDE FEDERAL EXCISE TAX.

GARRARD

GARRARD

The new GARRARD 201-V two-speed motor is the new and improved model of our internationally famous 201T. It is now offered in its latest trouble-free form exactly as produced for the U. S. Navy and British Admiralty during the War.

The governor-controlled motor operates at either 33-1/3 or 78 rpm with absolute constancy and without waver or rumble. It is ideally suited for use where truly superior reproduction is desired.

Because of its extra-heavy rotor, which is slow-running, the resulting torque makes this motor amazingly smooth and silent. In sheer performance, it is the finest we have to offer. It is a self-starting induction type unit and is fitted with the patented GARRARD governor to insure perfect regularity.

The 201-V is equipped with Speed Regulator by means of which a wide range of speeds is possible—as well as perfect adjustment at 33-1/3 or 78 rpm. This regulator is on an extension arm so that 16" records can be speed-controlled.

MODEL 201-V—Two speeds, 33 $\frac{1}{3}$ and 78 rpm; dual voltage, AC-110/130 and 200/250 volts, 40/60 cycles.
Net Price \$65.00

GARRARD Carrying Cases and GARRARD Table Model Cabinets are made especially for us, to our standards.

The Carrying Case is of solid wood throughout and is covered with finest procurable parchment type material. Sewn leather edges run completely around the case. The Hardware used is the very finest and it has two locking snaps, with keys.

The Table Model Cabinet is a hand-finished case finished in striking mahogany. Its appearance is that of a high quality piece of furniture, and it makes possible the easy creation of "Combinations."

PRICES

- MODEL CC1—Carrying Case with Motor Board uncut. Net Price \$19.50
- MODEL CC6—Carrying Case with Motor Board cut out to accommodate GARRARD Model RC65 Record Changer. Net Price \$19.50
- MODEL TM1—Table Model Cabinet with Motor Board uncut. Net Price \$25.00
- MODEL TM6—Table Model Cabinet with Motor Board cut out to accommodate Model RC65 Record changer. Net Price \$25.00

GARRARD SALES CORPORATION

alliance PHONOMOTORS

Motors for driving turntables, record changers, tuning devices

MODEL 80

The famous Model 80 Alliance phonomotor, operating on 110 or 220 volts, is made for 40, 50 or 60 cycles, 16 watts input, 78 RPM. The Model 80 has no gears—runs at an even speed—has a smooth, quiet, positive friction-rim drive. Amply proportioned bearings with large reservoirs assure long life. Motor and idler plate are shock mounted to minimize vibration trans-

fer to turntable and motor board. Forced ventilation gives cool operation—the slip-type fan avoids any possible injury. Mounting plate maintains correct turntable height, regardless of mounting board thickness. Available with 8, 9 or 10-inch turntable tops. Maximum depth below base mounting plate, $2\frac{1}{16}$ inches.

New $33\frac{1}{3}$ r.p.m. Motors for Record Players

The successful playing of the new **slow-speed, long-play** records (Micro-groove) requires a lower "wow" tolerance. Alliance has developed this new $33\frac{1}{3}$ r.p.m. turntable drive motor which actually meets previous requirements normally prescribed for fine quality commercial transcription work.

This record player motor has improved vibration mountings which will reduce rumble and hum transferred to the turntable. The motor drive is ground on the motor assembly to eliminate all run-outs. The idler tires are precision ground to extremely close limits, virtually eliminating all "wow". The turntable bearing has been greatly improved to insure a smoother functioning part. **Here is an excellent motor for the slower record speeds!**

alliance

Powr-Pakt MOTORS

NEW DUAL SPEED PHONOMOTOR

Optional $33\frac{1}{3}$ r.p.m. or 78 r.p.m.

The new Dual-Speed Phonomotor is in reality a dual version of the famous Model 80. Two motors, instead of one, are mounted below the standard 12" turntable. This new unit is a complete record player assembly and will handle any existing records from the large transcriptions down to the "kid discs" or toy sizes.

A single control in the form of a manual lever changes the turntable speed to $33\frac{1}{3}$ or 78 r.p.m. Only one motor is in the circuit at a time. Idler tires are disengaged from drive pulley when that motor is out of service. The entire dual assembly requires hooking up only two wires with the power source — is simple to operate, and is designed for high quality, long life and "wow" free performance. It can be furnished in any voltage from 220 to 110 volts at frequencies of 50 or 60 cycles and takes the same wattage as Model 80.

MODEL MS

The Alliance Powr-Pakt Model MS Motor is for 110 volt, 60 cycle operation. Here is a truly miniature power plant, so compact and light in weight that it can be used where many designs call for "tailored power". The Model MS has been developed to fill the growing need for small power units to increase the motion and utility features of thousands of new products!

SPECIFICATIONS—Draws about 25 watts at 3000 R.P.M. no load. The speed is 2500 to 3000 R.P.M. depending on frequency and load. Develops about .006 h.p., $\frac{5}{32}$ inch diameter, centerless, round steel shaft. Has latest type graphite bronze oilless bearings, self-aligning and amply proportioned. Motor measures: $\frac{3}{4}$ inches x 2 inches x $3\frac{1}{8}$ inches.

Audax TUNED-RIBBON

"The Standard by Which Others Are Judged and Valued"

reproducers

New . . .

R-55

For recordings up to 12".

OUTPUT, high enough for most amplifiers (about -20 db). Response, FLAT within about 2½ db from 50 cycles to 8000 cycles. Other details identical with R-61 below.

Listed at \$33.00

R-56

For recordings up to 18".

Performance identical with R-55.

Listed at \$48.00

R-61 . . . For recordings up to 12"

Response linear 50 cyc. to over 8 k.c. Point Pressure about 28 grams. Genuine Sapphire Stylus, EASILY REPLACED BY USER. Output about -25 db (connected to matching load). Standard impedance 200 ohms. May be made any imp. including high. Quick plug-in connectors. Arm is Tangent-Tracking, ball-thrust and pivot-point bearings. Bronze finish. Turntable center to rear end of arm 10". Listed at \$49.75

R-62 . . . For recordings up to 18"

Performance identical with R-61. French Grey and Chrome finish. Turntable center to rear end of arm 13 $\frac{9}{16}$ ". Listed at \$64.75

Because a "permanent-point" — be it diamond, sapphire or metal — will maintain its original shape for only a limited number of plays, after which it progressively erodes the record grooves, the importance of being able to replace it has always loomed big. Heretofore such replaceability carried with it a severe penalty in range, compliance, point-pressure, etc., etc. . . . important factors with modern discs. Most of the TUNED-RIBBON Models were designed to satisfy these factors. (For technical details on this remarkable development, send for editorial reprint.)

73-A . . . For recordings up to 12"

Response linear 50 cyc. to 10 k.c. Point Pressure about 24 grams. Genuine Sapphire Stylus, EASILY REPLACED BY USER. Output about 30 db (connected to matching load). Impedance 200 ohms. May be made in any imp. up to 500 ohms. Vibratory Momentum very low. Quick plug-in connectors. Arm is Tangent-Tracking, ball-thrust and pivot-point bearings. Bronze and Chrome finish. Turntable center to rear end of arm 10". Listed at \$66.50

74-A . . . For recordings up to 18"

Performance identical with 73-A above. French Grey and Chrome finish. Turntable center to rear end of arm 13 $\frac{9}{16}$ ". Listed at \$83.00

SA-79—STUDIO ARM, identical with Model 81 (at right). Linear 40 cyc to 10 k.c. Point-pressure about 24 grams. Genuine Sapphire replaceable stylus. Output about -30 db. Imped. 200 to 500 ohms. Listed at \$115.00

Bringing to Recorded Music Something That Was Not There Before

STUDIO - 81

For LATERAL recordings up to 18".

For use in Radio Stations, Studios and wherever superb-quality performance is paramount. Response Linear 20 cyc. to about 15 k.c. Point Pressure about 14 grams. Diamond Stylus. Output about -35 db (connected to matching load). Impedance 200 ohms. Moving Mass Near Zero. Quick plug-in connectors. Arm is Special Studio Design, aluminum, Tangent-Tracking, ball-thrust and pivot-point bearings in gimbal mounting—eliminating side-thrust and drag. French Grey and Chrome finish. Turntable-center to rear end of arm 18½". Listed at \$165.00 (less equalizer)

STUDIO - 99

For VERTICAL recordings up to 18".

For use in Radio Stations, Studios and wherever superb-quality performance is paramount. Response Linear 20 cyc. to about 15 k.c. Point Pressure about 25 grams. Diamond Stylus. Output about -40 db (connected to matching load). Impedance 200 ohms. Moving Mass Near Zero. Quick plug-in connectors. Arm is Special Studio Design, aluminum, Tangent-Tracking, ball-thrust and pivot-point bearings in gimbal mounting—eliminating side-thrust and drag. French Grey and Chrome finish. Turntable-center to rear end of arm 18½". Listed at \$195.00 (less equalizer)

AUDAX EQUALIZER FILTER — 200 ohms input — five positions, covering NAB Orthocoustic, Vertical, and 78 RPM—also includes Filter positions. Listed at \$83.00

AUDAX REPLACEMENT STYLUS—Genuine Sapphire Jewel—Designed expressly for TUNED-RIBBON reproducers. Listed at \$3.00

Any model TUNED-RIBBON head may be had for replacement on automatic changers or other machines.

PICK-UP UNITS

AUDAX

RECORDERS

The Standard by which Others are Judged and Valued

Audax PICKUPS using conventional needles

L-17—For records up to 12". FLAT within about ± 3 db to about 6500 cycles, with slightly rising bass curve reaching about 6 db at 50 cycles. Point-pressure about $1\frac{7}{8}$ oz. Output approx. —20 db. Black and Silver finish. Overall length from turntable center to rear end of arm $9\frac{1}{16}$ ". High impedance or 200 or 500 ohms. Listed at...\$27.50

L-18—For records up to 16". Performance identical with L-17 above. Overall length from turntable center to rear end of arm $12\frac{7}{16}$ ". High impedance or 200 or 500 ohms. Listed at...\$39.50

NEW AUDAX HIGH FIDELITY CUTTERS

AUDAX CUTTER H-5—Substantially FLAT to 10,000 cycles. Distortion about 1.2% at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 500 ohms. Listed at...\$185.00

AUDAX CUTTER H-4—Substantially FLAT to 8,000 cycles. Distortion about 1.7% at 1000 cycles. Fully modulates groove with input of about 16 db with 96 lines. Impedances up to 500 ohms. Listed at...\$125.00

AUDAX CUTTER H-3—Substantially FLAT to about 7500 cycles. Distortion about 2.1% at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 4000 ohms. Listed at...\$83.00

AUDAX CUTTERS are magnetically powered—their characteristics are not affected by temperature or atmospheric changes. They are readily interchangeable on most recording machines.

AUDAX instruments are NOT affected by temperatures or atmospheric changes.

There Is No Substitute for *EXPERIENCE*

When you are buying a motor car, washing machine or refrigerator, etc., almost instinctively you know that of first consideration is the experience of the manufacturer behind the product. Has he the all-important KNOW-HOW that comes only with years of experience? In no other field of endeavor is this KNOW-HOW more important than in the field of ELECTRONIC Sound Apparatus, where AUDAX has set the pace for over twenty-five years.

GENERAL ELECTRIC

VARIABLE RELUCTANCE PICKUP

- LOW NEEDLE TALK
- LOW NEEDLE SCRATCH
- LOW TONE ARM RUMBLE
- LOW DISTORTION
- LOW RECORD WEAR

General Electric sound engineers have developed the variable reluctance magnetic type phonograph record reproducer to fulfill the latest requirements for high quality reproduction of lateral records in commercial, studio, and home recording.

Catalog Number	Stylus	Stylus Radius in Inches	List Price
RPX-010	Sapphire	.003	\$ 7.95
RPX-025	Diamond	.0025	39.50
RPX-029	Diamond	.003	39.50

Also available in precious metal tips.

HIGH FIDELITY REPRODUCTION

At last, science has developed a pickup whose stylus recreates only the music—doesn't add harmonic vibrations of its own.

When the music recorded in the record grooves vibrates the stylus from side to side, currents are set up in the magnetic poles on each side. Unlike most other pickups, these currents are generated in the G-E Variable Reluctance Pickup at the record. Thus the resulting tone is free from non-musical foreign vibrations which in other pickups result from the generation of the current at a distance from the record. The stylus and cantilever arm are the only moving parts. Their entire weight and size is less than half of a "needle alone" on a conventional pickup. They are so small that their tiny area radiates scarcely any sound in the form of needle talk. Because the stylus is so mounted that it is insensitive to vertical vibration practically all surface noise automatically is eliminated. The result—pure tone—just as it originally was recorded in the studio. Flexible needle suspension plus low record pressure (between $\frac{3}{4}$ and $1\frac{1}{4}$ ounce—just enough pressure to assure dependable record changing) results in very low record wear. Rugged mechanically, this unit can take abuse and is not affected by high temperatures or humidity.

Accidental dropping or skidding of the tone arm head on the record normally will not damage the stylus or the record. This is due to the high vertical compliance of the cantilever in which the stylus is mounted. It retracts instantly to a position of safety.

MECHANICAL IMPEDANCE—

Dynamic mass of stylus 8 X 10^{-3} gm
Suspension compliance 87×10^{-6} cm/dyne

ELECTRICAL IMPEDANCE—The d-c resistance of the windings is approximately 360 ohms, and the inductance is approximately 240 millihenries. The equivalent circuit is the open circuit voltage in series with this resistance and inductance.

ELECTRICAL OUTPUT—Open circuit voltage of approximately 11 millivolts under stimulation of 4.8 cm/sec. This is the approximate velocity of the 1000-cycle band on the Columbia 10003-M frequency record.

FREQUENCY CHARACTERISTIC—This pickup has a uniform velocity-frequency characteristic, since the voltage output is proportional to the stylus velocity. Hence, measurements on frequency records indicate more nearly the characteristics of the records rather than those of the pickup. Characteristics of the open circuit voltage output, tracing the Columbia 10003-M record, are available on request.

STYLUS—Has an included angle of 45° to 50° .

PHONO PREAMPLIFIER

General Electric engineers have designed a new and compact phono preamplifier to be used with the sensational G-E Variable Reluctance Pickup.

This new preamplifier employs a 6SC7 dual triode tube, shock mounted on rubber grommets.

The General Electric Phono Preamplifier is a low voltage audio amplifier with an equalization circuit. Its plate and filament power are obtained from the associated receiver or amplifier.

An RMA standard female phonograph receptacle is mounted on the chassis. A 12" shielded cable with a standard phonograph plug is provided for connecting to amplifier of receiver. Fifteen inch leads are provided for obtaining electrical connections to the chassis.

SPECIFICATIONS

Gain—approx. 40DB at 1000 cycles.

Chassis— $3\frac{5}{8} \times 3\frac{5}{8} \times 1\frac{1}{4}$.

Overall height does not exceed $4\frac{1}{2}$ ".

Weight—12 ozs.

Finish—G-E Staybrite Lusteron finish.

Tube—1 type 6SC7.

Carillon Dynamic NEEDLES

COIN MACHINE NEEDLES

RIGID TYPE
Loud. A rigid needle especially adapted for the HEAVY pickups. Plays to 4000 records.
No. 544.....List \$1.00

MEDIUM
A semi-flexible type needle for HEAVY or LIGHTWEIGHT pickups, giving a medium tone and designed for the average juke installation. Up to 4000 plays.
No. 549.....List \$1.00

SOFT
A flexible type needle giving a high fidelity reproduction. Especially recommended for the LIGHTWEIGHT pickups. Unsurpassed for reproducing beautiful music. Plays up to 5000 records.
No. 547.....List \$1.00

SAPPHIRE POINT
The peak of quality in coin phonograph needles, especially designed for the new lightweight pickups. Tipped with sapphire, this needle cannot be excelled for true economical operation. Up to 7,500 plays per needle.
No. 1003.....List \$1.50

PLAYBACK NEEDLES

ALUMINUM SHANK
Osmium-alloy tip for high fidelity reproduction is carried on .020 needle shaft for low scratch level. The aluminum sleeve reduces vibration and needle-talk, minimizes record wear. One of the newest needle types.
No. 590.....List \$1.50

OSMIUM ALLOY
Scientific construction gives highest possible fidelity and full tone with lowest possible distortion and scratch. 1/8" offset. Precision shaped osmium alloy tip for long playing life.
No. 570.....List \$1.50

SAPPHIRE POINT . . . RUBY POINT
Our finest permanent type full tone needle with 1/8" offset Duraluminum shank and precision ground point set with finest quality long wearing jewel, good for 10,000 plays.
No. 571-S (Sapphire).....List \$2.00
No. 571-R (Ruby).....List \$2.50

OSMIUM ALLOY
Similar in all respects to our No. 570 needle, but has 3/16" offset shank which gives a softer tone. A very high fidelity needle with a minimum of scratch and noise.
No. 580.....List \$1.50

SAPPHIRE POINT . . . RUBY POINT
In all respects similar to our No. 571, but has 3/16" offset shank for softer tone. You cannot obtain a finer jeweled needle anywhere, regardless of price. Good for 10,000 plays.
No. 581-S (Sapphire).....List \$2.00
No. 581-R (Ruby).....List \$2.50

CUTTING NEEDLES

ALLOY TOOL STEEL
Made of the finest alloy tool steel, microscopically ground and polished with diamond dust. Recommended for amateur home use. Will cut approximately twenty-five six-inch records.
No. 543.....List 35c

PRECIOUS METAL ALLOY
A high grade recording stylus, for the advanced amateur and professional use. Electrically welded precious metal alloy tip, microscopically ground, and polished with diamond dust. Hand finished tip cuts smooth, clean groove for best possible results. Will cut approximately five hundred six-inch records.
No. 541.....List \$1.50

STELLITE
This patented Stellite recording stylus, when used by the advanced amateur or professional, will give results closely approximating the finest Sapphire. Hand-finished tip, cuts quiet smooth groove. Will cut approximately five hundred six-inch records.
No. 542.....List \$1.50

RECORDING BLANKS

AIM

MANUFACTURED BY

Where **QUALITY** Counts

Yes, where quality counts — where success is measured by the faithful reproduction of the human voice — "AIM" Recording Blanks lead the field. Uniform cut and heavier coating mean successful cutting even by amateurs. The low needle wear and high degree of permanence mean they can be played back many, many times with clarity, fidelity and lack of surface noise.

Recording Blanks

audiodiscs

ALUMINUM BASE RECORDING DISCS

First produced in 1939, Audiodiscs quickly won the acceptance of both professional and amateur recordists. Because of their many superior qualities, these instantaneous recording discs have gained a place of eminent leadership in the recording world.

AN AUDIODISC FOR EVERY RECORDING NEED

RED LABEL AUDIODISCS are standard throughout the recording profession exceeding the professional demands of broadcasting stations, sound and movie studios and other exacting applications when top quality and dependability are essential requirements. Their many exclusive features have given new meaning to high fidelity recording and life-like reproduction. They are the finest discs obtainable.

SINGLE FACE RED LABEL AUDIODISCS have exactly the same fine qualities as standard Red Label and bring real economy to applications requiring but one side. Both sides are coated with the recordable side identified with embossed label.

YELLOW LABEL AUDIODISCS are the popular choice for all general purpose recording. Of high uniform quality, they are designed primarily for commercial recording studios, educational institutions, home recordists and other applications where the super quality Red Label Audiodiscs are not required.

REFERENCE LABEL AUDIODISCS are especially adapted for making test cuts, filing and reference recordings, auditions and equipment adjustments. Their unusually low price gives maximum economy.

BLUE LABEL AUDIODISCS offer the very best in recording quality for schools, homes, amateur and demonstration work. Made of exactly the same materials used in the manufacture of professional type Audiodiscs—except on a thinner aluminum base—these discs have brilliant tone, long-playing life, no audible needle scratch and are of consistent quality.

MASTER AUDIODISCS are the outstanding choice where copies of recordings (pressings) are to be made by the electroplating process. The excellence and consistent quality of these discs are well known to all record processors.

PROPERTIES THAT MAKE FOR AUDIODISC LEADERSHIP

UNIFORM COATING

Audiogram's exclusive machine process produces a smooth flat coating seven thousandths of an inch thick, free from swirls, waves and "orange peel" effect. The depth of the coating is consistent within one-half thousandth of an inch.

LONGER STYLUS LIFE

The homogeneous coating is free from microscopic abrasive materials and surface imperfection which, in inferior discs, damage cutting points and cause extraneous noises in playback.

SILENT BACKGROUND

Audiogram, cut under good recording conditions, are entirely free from audible "background scratch."

LONG PLAYBACK LIFE

With correct playing equipment an Audiogram can be played for more than a hundred times with no noticeable increase in surface noise.

BRILLIANT FREQUENCY RESPONSE

These discs are noted for their brilliant high frequency response. Audiogram "speak for themselves" with quality performance that pleases the most critical recordist.

NO DETERIORATION WITH AGE

A special curing process removes from Audiogram the last trace of volatile constituents. Discs made over six years ago still cut easily and play back perfectly.

CONSISTENT QUALITY

Audiogram are manufactured by a unique automatic precision-machine process which assures consistent quality. This uniformity is a feature that helps engineer and amateur attain the highest degree of recording excellence.

GENERAL NOTE:

All Audiogram are manufactured on aluminum base. Red Label discs are embossed. Yellow and Reference discs have paper labels—Master Audiogram have no labels. All Audiogram have center-pin holes and three drive-pin holes except Master discs, which have one drive-pin hole. Lint-free envelopes are supplied in the packages of Red Label and Master discs. Other discs are packaged in their envelopes.

audiopoints

MICROSCOPICALLY MATCHED RECORDING AND PLAYBACK STYLI

THE NEWLY EXPANDED LINE of Audiopoints now covers the full range of recording and playback needs. There are Audiopoints that fully meet the requirements of the most exacting professional recordists. There are also Audiopoints which these engineers unhesitatingly recommend to the non-professional and the general public. Made by skilled craftsmen and conveniently packaged in cards, boxes or envelopes, Audiopoints are available in four types of recording styli and four types of playback points.

RECORDING AUDIPOINTS

SAPPHIRE No. 14. Long recognized by recording engineers as the best recording stylus obtainable. Manufactured to rigid specifications, the jeweled point with 87° included angle, correct radius and fine polish, cuts a silent, shiny groove for many hours. Disc-tested on a recording machine just before packaging. Also supplied with 70° included angle. List price \$7.25 (Resharp-ening cost \$3.25)

SAPPHIRE No. 202. A fine quality brass shank stylus, ideally suited for those recordists not requiring the super quality of Sapphire Audiopoint No. 14. List price \$5.25 (Resharp-ening cost \$2.60)

STELLITE No. 34. A favorite recording stylus with many professional and non-professional recordists. Though moderately priced, it is the very best stellite stylus produced. List price \$1.75 (Resharp-ening cost \$.85)

DIAMOND-LAPPED STEEL No. 50. Most practical stylus for home recordists when "first cost" is important. Being diamond-lapped, it cuts a quiet, shiny groove and gives from 15 to 30 minutes actual recording time. List price 3 for \$1.00

PLAYBACK AUDIPOINTS

SAPPHIRE No. 113. Materials, workmanship and design make this playback point the finest made for original recordings and vinyl transcriptions. For years the outstanding choice of professional recordists. (Should not be used on shellac pressings.) List price \$6.50 (Resharp-ening cost \$2.25)

"RED CIRCLE" SAPPHIRE No. 103. With straight dural shank and fine polished jewel point. Excellent for original recordings, vinyl pressings and phonograph records. List price \$2.00 (Resharp-ening cost \$1.00)

"RED CIRCLE" SAPPHIRE No. 303. Bent dural shank sapphire needle that is tops for phonograph records. For the first time a phonograph needle with a resharp-ening feature. List price \$2.00 (Resharp-ening cost \$1.00)

STEEL TRANSCRIPTION NEEDLE No. 151. The ideal all-purpose transcription needle for original recordings, vinyl pressings and phonograph records. Quality performance is assured since each point undergoes a shadowgraph test. List price 100 for \$1.25—20 for \$.25

RESHARPENING SERVICE

Established years ago, our Resharp-ening Service gives real economy in the use of Audiopoints No. 14, No. 202, No. 34, No. 113, No. 103 and No. 303. (When returning points, care should be taken to package them individually. For this purpose the original protective package cards are strongly recommended.)

AUDIPOINT PACKAGING

All Audiopoints except the No. 151 Steel Transcription needles are packaged in attractive cards. No. 151 are packaged 20 to the envelope and 100 to the box. Cards containing points No. 34, No. 50, No. 103 and No. 303 are mounted on colorful display cards—some dozen package cards to each display card. The package cards are cellophane wrapped and mounted in slots in the display cards. A strip of Scotch Tape on the back holds these cards in place and permits easy, neat removal that does not tear the cellophane wrapper. Envelopes containing No. 151 points are similarly mounted on display cards—50 envelopes per card or 1,000 needles. Package cards containing points No. 14, No. 202 and No. 113 are shipped in small boxes. **NOTE:** Points No. 14, No. 202 and No. 34 are supplied in standard short shank and long shank.

"HOW TO MAKE GOOD RECORDINGS"

"How to Make Good Recordings" is an authoritative handbook on all phases of recording equipment, materials and technique. Now in its fourth printing, the new edition has been completely revised and expanded to 133 pages. Prominently illustrated with scores of photographs, charts and drawings, this book is written in non-technical language that all can understand. List price \$2.00.

AUDIODISC CHIP-CHASER

When making a disc recording, with outside in tool, it is necessary to have some way of brushing the thread out of the way of the styli. The AUDIODISC Chip-Chaser is a perfect solution to this problem. It has a heavy base which is placed beside the turntable and requires no fastening down or adjusting. The Chip-Chaser automatically and intelligently brushes the thread toward the center, winding it up on the overhead post or drive pins, as the case may be. Available in two sizes: for 16" turntables and up to 12" turntables. List prices \$6.25 and \$5.00.

Jensen

"For the **WORLD'S FINEST Music**"

PHONOGRAPH NEEDLES

JENSEN INDUSTRIES, INC.

329 South Wood St., Chicago 12, Ill.

The famous Jensen Royal Jewel phonograph needle with the natural Sapphire tip and the original Jensen spring construction. Here's the long life needle that is so widely imitated but never equalled. Designed by Peter L. Jensen, the Royal Jewel incorporates latest developments of acoustical science. It absorbs vibration, minimizes surface hiss, prolongs the life of valuable records. Attractively packaged in a rich gold tray.

List Price

\$2.50

Catalog No. 25

The Jensen Classic—the newest member of Jensen's complete line of fine phonograph needles—designed especially for brilliant reproduction of instrumental and vocal recordings. The Classic has a wide tonal range and longer life with fidelity all the way. Its new spring construction absorbs "hiss" and scratch—delivers a "Stradivarius tone." Packaged in red and gold.

List Price

\$1.50

Catalog No. 15

The Jensen Concert phonograph needle is the most popular \$1 needle ever offered. Its full tonal range and long wearing qualities are assured by its flanged design. The spring action preserves the surface of records, lengthens their service life, provides clear, undistorted reproduction. Well over a million needles are in use. Packaged in a circular red and gold container.

List Price

\$1.00

Catalog No. 10

The Jensen Sweet—an outstanding Jensen needle at a low price. Rapidly becoming the popular choice of the teen age trade. Particularly designed for playing popular music. Remarkable tonal qualities, however, make it ideal for all good records. Individually packaged in green and black cards.

List Price

75c

Catalog No. 75

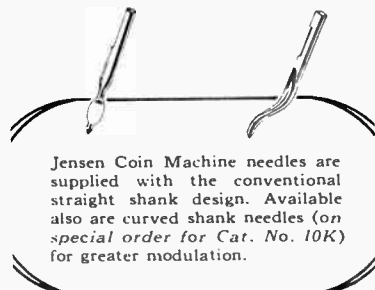

The Jensen Coin Machine Needle Sales Kit is a handy, pocket-size holder with note pad for reference notations. Supplied with 100 coin machine needles on interchangeable card units of 10 needles. Each needle card has space for a record of needle's playing history.

Jensen COIN MACHINE NEEDLE

Recent improvements in design and construction make the Jensen Coin Machine needle the outstanding and exclusive preference of many operators. Its locked-in osmium tip assures a definite saving in operating cost—fewer service calls—increased profits. Packaged two needles to a card, five cards to a unit.

Cat. No. 10J. 100 straight shank needles in units of 10 . . . Price on application

Jensen Coin Machine needles are supplied with the conventional straight shank design. Available also are curved shank needles (on special order for Cat. No. 10K) for greater modulation.

COUNTER DISPLAYS

Colorful, point-of-sales, Royal Jewel Display with 12 Genuine Sapphire needles. Attractive backboard printed in full color with convenient tray holding 12 beautiful individual red and gold oval packages.

Cat. No. 25D List price \$30.00

The new, Miniature Jensen Concert Needle display—the type that was introduced by Jensen and is so popular among dealers everywhere. Now supplied as standard display with Concert needles.

Cat. No. 10M. Unit of 1 Display and 12 individually packaged needles List price \$12.00

The familiar Jensen Counter display for Concert needles, holds twelve individual circular packages. Available on special order.

Cat. No. 10D List price \$12.00

The Jensen Sweet Display Card, a colorful green and black holder for 24 individual Jensen Sweet needle packages. Punched for hanging on wall. Has easel for counter display.

Cat. No. 75D . . . List price \$18.00

The Jensen COMBINATION Display Card, known as the 4-4-4 card because it holds 12 individually packaged Jensen needles, 4 each of the Jensen Royal Jewel, Jensen Classic and Jensen Concert needles. Definitely advantageous where space is limited and dealer prefers to show several needles.

Catalog No. 444 List price \$20.00

The Jensen Classic Miniature Display, small enough to fit nicely under glass counters or stand on top of counters as preferred. A new departure in display technique and another "Jensen first."

Cat. No. 15M. Unit of 1 Display and 12 individually packaged needles List price \$18.00

The Jensen Sales Kit for the Radio Serviceman. This compact kit is just the thing for slipping into pocket and taking on service calls, a definite aid in demonstrating fine phonograph needles. It's a real sales help. Descriptive copy printed alongside needles. Kit holds 3 each of the Jensen Royal Jewel and Jensen Classic. Catalog No. 612 List price \$12.00

ORANGE LABEL

BOND BASE

Designed primarily for the home recording fan, these discs are admirably suited to the average type of amateur transcription, where low price is required. Heavy and firm, with a compo base that is thick, these recording blanks are carefully coated with our standard Recordisc surface compound. Because of their low cost, they are a "party" favorite. Professional nitrate coated.

PURPLE LABEL

ALUMINUM BASE

A lighter weight, economical disc with .012 aluminum base. Priced to meet and beat competition.

RED LABEL

ALUMINUM BASE

These aluminum base discs, made on heavy .021 aluminum, are coated with the famous Recordisc flawless compound to assure high fidelity reproduction over wide frequency ranges. Comparable in quality to those used by broadcasting stations and professional recording studios, "Red Label" discs have been reduced in size for universal adaptation by those who want professional discs for equipment of non-professional size. "Red Label" discs are created for critical users who require the finest discs available in small sizes. Professional nitrate coated.

"GM" LABEL

ALUMINUM BASE

These discs, of heavy .021 aluminum base, represent the most critical selection and inspection standards of manufacture. Built to micrometric precision, they can receive the widest frequencies from the most sensitive recording equipment. Guaranteed not to age, dry out or deteriorate—capable of hundreds of bright, crisp playbacks. In the three largest sizes only.

ALSO AVAILABLE ON SPECIAL ORDER— Recordisc perfected ethyl cellulose coated discs, U/L approved.

YELLOW LABEL

Same quality and price as ORANGE LABEL

BROWN LABEL

Same quality and price as RED LABEL

PROFESSIONAL

Proven precision-perfect during years of laboratory research. Guaranteed to give flawless reproduction, even thread flow and frequency response in excess of 10,000 cycles. Produced under controlled conditions to make each disc absolutely uniform. Same-day shipments assured.

RECORDING AND PHONOGRAPH STYLI, NEEDLES AND ACCESSORIES

SAPPHIRE STYLUS

While this type of cutting needle represents a greater initial investment, it has the longest life and produces superior instantaneous recording. The specially lapped sapphire point cuts a clean shiny groove with the lowest surface noise. Ordinarily, these styli can be used for ten hours of recording time. In addition, they may be resharpened, periodically, as many as 15 times. Used extensively in professional recording as well as by the semi-professional and the advanced amateur. Packed in plush lined, individual jewel boxes. List price, each \$6.50

STELLITE STYLUS

Carefully machined, of a special metal alloy, these needles produce results almost as good as those obtained from the sapphires. Not as fragile as more expensive sapphire styli. Recommended for less experienced recording operators. Packed one to a protective card. List price, each \$2.00

Sapphire Phonograph Needles

Preferred by the most critical music lovers and discerning artists—for both phonograph records and recording discs. Advanced Recordisc design and features result in higher fidelity, bell-like clarity, greater listening enjoyment, uniform performance throughout playing life, and less wear on the record surface. It has been acclaimed as one of the best needles available today. 7000 plays. List price \$2.50

TRANSCRIPTION NEEDLES

Scientifically designed to fit perfectly into the grooves of recording and transcription blanks. They have a wide frequency response and unusual tonal brilliance. Wear on records reduced to minimum. 25 in envelope. List price..... per pkg. 25c

RECORD PRESERVER

This lubricant not only cleanses and preserves the fresh surface but lubricates the groove to a degree where the improvement in tonal qualities is readily discernible to the ear. List price..... 2 oz. bot., 45c

TURNTABLE LUBRICANT

This Recordisc lubricant is recommended for smooth operation of all parts subject to friction wear. List price per jar, 40c

RECORDISC

"Special QX-5" Recording Stylus

Here is a recording stylus which presents an unbeatable combination in tonal reproduction, top performance, long life and unusual value. Made to our exacting laboratory specifications, it has a filter cutting point and recessed shank for smooth and easy cutting. Precision made of processed and tempered steel, and especially designed for those who seek a very fine but not fragile recording tip. List price, each75c

HAND LAPPED STEEL STYLUS

Carefully hand lapped for greater fidelity. Packed one to the protective card. List price, each50c

STEEL STYLI (Nickel Plated Shank)

Recording life of approximately 1 hour each. Packed 3 to a card. List price, 3 for \$1.00

"Coronet" Phonograph Needles

Clear, clean brilliant reproduction throughout each musical note. Made from precious metal alloys, with a satin-smooth, non-corrosive tip. Your ears will convince you of the superiority of these needles, and tell you why they are the choice of juke box and record changer owners. May be used on any type of phonograph—electrical or mechanical. 3000 plays. List price.....\$1.00

"Imperial" Phonograph Needles

Made to our own special formula, Recordisc "Imperial" Needles provide full tonal range, less scratch and hiss, minimum needle "talk," and longer record life. Uniformly excellent in quality, these needles become an integral part of automatic record changers for which they are an especial favorite. 5000 plays. List price..... \$1.50

MAILING ENVELOPES

Heavy brown Kraft; lined with high test corrugated board; may be sent via Parcel Post or Express with absolute safety. Printed with provision for return address of sender.

DUOTONE NEEDLES

FILTER POINT No. 6

The Filter Point needle is a newly developed needle which actually filters surface noise, yet retains the brilliance of your recordings. The highly polished and rounded point assures smooth movement in the record groove, reducing record wear to a minimum. The needles are hand picked and will play from 12 to 15 records without frequency loss or distortion. The specially designed point is guaranteed not to break when used with any type of record changer.

Cat. No. 9-C—Display card of 12 needles.....	24.00

LAPPED STEEL CUTTING SYLUS No. 10

This new hand-made lap on the cutting edge of the needle makes a much smoother cut, thereby reducing surface noise and adding to the life of the needle. Especially recommended for making vocal recordings. List Price, 5 Needles on card.....\$1.50
Cat. No. 10-B—Carton of 10 cards.....\$15.00
Cat. No. 10-C—Display card of 10 cards..... 15.00

SAPPHIRE SYLUS No. 12

Available in Long and Short Shank. The sapphire Professional cutting stylus is the finest available. The cutting jewel is very highly polished and has a patented hand-lapped edge, which cuts and polishes the groove, making a record with the lowest surface noise. With proper handling will give 10-15 hours of cutting and can be re-sharpened many times.

DO NOT DIP
Packed in plastic container.
Cat. No. 12—Needle, list price, each.....\$5.50
(Re-sharpening—Each \$2.00)

DURAL SHANK No. 11
Available in Long and Short Shank
This needle is similar to No. 12, and in addition is held to more exacting specifications, as established by leading engineers. Mounted in Dural shank. Packed in plastic container. Each \$7.25
(Re-sharpening—Each \$2.00)

RECORDING FLUIDS

DUOTONE RECORD PRESERVER

A newly developed fluid that helps make phonograph records (Victor, Columbia, Decca, etc.) last much longer. Duotone Record Preserver not only cleans the record, but actually puts a thin protective coating on it. This coating protects the record against excessive wear and in addition enables the needle to glide smoothly, thus reducing surface noise.

Each Bottle List \$0.50

Cat. No. 105-B

Attractive display carton of twelve 2-oz. bottles 6.00

PRE-RECORDING FLUID

For use on the disc before cutting. When applied to the surface with a piece of soft cotton, it allows the needle to cut smoothly, thus reducing surface noise and needle wear. Will not harm ANY kind of coating.

Each Bottle List \$0.50

Cat. No. 101-B

Carton of 12 Bottles 6.00

HARDENING FLUID

For use on home recorded records after cutting. Apply to surface with piece of soft cotton, covering entire surface of record. Preserves groove structure and record life. Materially reduces surface tension. Restores original tone quality on older records.

Each Bottle List \$0.50

Cat. No. 102-B

Carton of 12 Bottles 6.00

DUOTONE VAN EPS CUTTING HEAD

A new improved recording head of the finest quality for professional and semi-professional use. Very low distortion, especially on complex waves. Extended frequency range, peak practically negligible.

Used by leading recording studios in New York and broadcasting studios and motion picture companies, as well as many government agencies.

Especially designed for recording on cellulose-coated discs making possible instantaneous recordings that conform with high fidelity broadcast transmissions. Requires only 20 DB level (6 milliwatts and 500 ohms) for normal amplitude. Head has reed armature which acts as its own damper, eliminating rubber and other deteriorating materials. Normal response extended from 6500 cycles to 8000 and can be extended up to 10,000 with proper equalization.

Can be easily installed. Head comes equipped with extra mounting plate for instant mounting on standard recording machines. All moving parts are machined with watchmaker's precision. The Head is hermetically sealed and guaranteed if the seal is not broken.

Net Price \$150.00*

Recordio Discs

Designed for **DOUBLE DUTY...**

COMBINATION WIRE RECORDER MECHANISM

Note: The C-1000 Series Wire Recorder Mechanism is a basic mechanism not suitable for use except in combination with proper associated equipment.

THE
C-1000
SERIES

*Quality Built
Throughout!*

This mechanism is a product of the famous Crescent Tool and Die shops and is equipped with the new Crescent-engineered Recording Head. Many exclusive features of design built into this head give recordings the "Front Row" realism so much desired in this type of equipment.

- Records magnetically on a stainless steel wire—up to one full hour program from any input source that can be fed into the associated amplifier equipment.
- Plays back magnetically with a fidelity, dynamic range, and absence of background noise that accounts for the present heavy demand for Crescent Wire Recorder mechanisms.
- Plays or records on the wire from phonograph records much better than most single purpose record players... because the heavy duty recording motor and the heavy, accurately machined, die cast take-up drum are used as a phonoturntable. The new Crescent tone arm, originally designed for Crescent Automatic Record Changers, adds its share to listening and recording pleasure.
- Rewinds at fast speed... 5 times as fast as recording speed... so that it takes only a short time to reach any part of the wire to Record, Play, Erase, or Re-record.
- One single knob controls the mechanism... because a special control assembly combines the electrical and mechanical control functions. Wire recorder automatically shuts itself off, at end of wire, in all positions of operation... recording, playing, or rewind.

A New Combination Record Player and Magnetic Recorder-Reproducer

Combined with proper associated equipment, the new Crescent Wire Recorder Mechanism becomes one of the most interesting devices now available to amateurs, experimenters, sound men, service men, or anyone else interested in the field of electronic equipment. There are at least a dozen practical uses for a good wire recorder in every home and office in America.

The current public demand for wire recorders is directly traceable to the last war. War production helped materially to expand the plant, personnel, machinery and engineering facilities of Crescent Industries to a position of leadership in the design and manufacture of wire recording equipment. The Crescent Recording Head is a specific example of Crescent engineering and manufacturing skill.

This is not the whole story behind Crescent's dominant position in the field, however. It remained for the men who originally made famous the name Crescent Tool and Die Co., to turn Crescent engineering developments and specifications into reality. Their experience, skill and precision workmanship achieved a steady, day-by-day production of wire recorder mechanisms that perform so fine they enhance the value and prestige of any other equipment with which they are combined to make up a complete system.

4 Types Available!
 C-1000A for 115 Volt, 60 Cycle A. C.
 C-1000B for 115 Volt, 50 Cycle A. C.
 C-1000E for 220 Volt, 60 Cycle A. C.
 C-1000F for 220 Volt, 50 Cycle A. C.

TECHNICAL DATA

ELECTRICAL

- Power, Input See Types Listed Above
- Motor Underwriters' Approved
Heavy duty, even speed recording motor
- Motor Switch Underwriters' Approved
- Erase Current Switch S. P. D.T.
- Crescent Recording Head Type No. WR45-C
- Voice Coil Impedance
 - At 10,000 Cycles Approx. 12,000 ohms
 - At 5,000 Cycles Approx. 7,600 ohms
 - At 1,000 Cycles Approx. 2,240 ohms
 - At 100 Cycles Approx. 500 ohms
- Input to Voice Coil (Recording)
Peak recording level 0.6 volt rms at 1000 cycles.
- Output from Voice Coil (Playback)
Recording at a level of 0.6 volt rms 1000 cycles, on standard recording wire will give approximately 2 millivolts output on playback.
- Recording Wire
Uses .004 or .0036 stainless steel wire, spools, and leaders conforming to proposed R. M. A. standards.
- Wire Speed
 - Recording and playback 2 feet per second
 - Rewind Average of 10 feet per second
- Erase and Bias Coil Designed to operate at 30,000 cycles
Impedance at 30,000 cycles Approx. 64 ohms
Requires 700 milliamps at 4.5 volts 30,000 cycles
- Compensation Simplest form
Shunt a .001 mfd condenser across a 100,000 ohm resistor and connect this combination in series with the voice coil.

An input of 15 volts rms at 1000 cycles to the circuit mentioned above will give 0.6 volts rms across the voice coil. Total audio power required is less than 2 1/4 milliwatts. If additional compensation is desired, it should be included in the amplifier circuit, as any substantial reduction of the value of the series resistance will materially reduce the signal to noise ratio.

Phono-Record Player

Take Up Drum
Also serves as a turntable for records. The turntable is rim driven from the powerful recording motor and operates at 78 RPM. Accommodates either 10 or 12 inch records.

Phono Pick Up
Lightweight, scientifically designed arm equipped with L70 or P92B crystal cartridge accommodates all standard types of modern needles.

PHYSICAL

- Dimensions Mounting Plate 9" x 13"
Requires inside cabinet space of 12 1/2" x 15 1/4" to play 12" record with lid closed.
Requires 3" above cabinet mounting board and 5" below surface of cabinet mounting board.
- Mounting Floating
Mechanism "floats" on four live rubber "Borry" mounts. Mounting centers 7 1/2" x 11 1/2".
- Finish Mounting plate finished in beautiful mahogany Hommerloid with cream colored plastic shield and chrome trim.
- Weight
Actual weight of wire recorder mechanism 14 lbs.
Shipping weight 16 lbs.

Operating and Hookup, Service, and Application Data Packed With Each Unit.

MANUFACTURERS OF

RECORD CHANGERS • WIRE RECORDERS • LOUD SPEAKERS • TOYS • METAL STAMPINGS • TOOLS & DIES

For S-m-o-o-t-h TROUBLE-FREE Performance...

Simplicity of Adjustment—Sit-down position for 10 and 12 inch records...and position at which tone arm trips the change cycle mechanism...are all indexed to a single, stamped control plate which does not vary. One simple screw driver adjustment synchronizes the tone arm to this control plate...one of the reasons why Crescent Changers are Trouble-Free.

AVAILABLE IN
STANDARD C-350
SERIES and AUTOMATIC
SHUT-OFF C-400 SERIES

FREE-FLOATING—

It Floats...on 4 live rubber "Barry Mounts" that reduce transfer of vibration and motor rumble to a minimum! Easy to Mount...Drill 4-19/32" holes, then push the "Barry Mounts" into the holes (just try to get them out without tools).

No Shipping Bracket Required...After changer has been installed in its cabinet, "Barry Mounts" help protect it during transportation.

CONTROLS—

Single Knob...controls ON-OFF and AUTOMATIC or MANUAL operation. Knob moves in four directions and is clearly marked.

Reject Button...is conveniently located on top of the tone arm support. Operated by pushing down on the tone arm when the tone arm rests on the support, or by pushing the button itself when record is being played.

CHILD-PROOF — JAM-PROOF

Tone arm may be moved to any position at any time without jamming machine and without any danger of changing adjustments.

AUTOMATIC RECORD CHANGERS

You'll like this practical, precision built, high quality record changer. It's Trouble-Free! Ideal both as original or replacement equipment. Simplicity of design and durability of construction assure a minimum of trouble after installation...cut profit losses due to extra servicing.

Changer is of the single post type to avoid chipping or cracking of records. Center post is scientifically shaped to guide the records down, on an air cushion, to the thick, velvet-like coating on the turntable which runs on a shock absorbing cork washer.

Tone arm design is such that it trips and functions perfectly with no more needle pressure than that required by any of the modern, high grade crystal cartridges. This means reduced needle scratch, reduced "needle talk", and longer record life.

Plays, automatically, 12 ten inch or 10 twelve inch records. (Not intermixed). Plays, manually, home recordings and single records. Less than 5 second change cycle for greater continuity of music.

Powerful even speed motor, special turntable bearing design, smooth rim drive and many other Crescent-engineered features combine to reduce noise, wobble and wow in this changer, and to lengthen its life.

Beautiful mahogany Hammerloid finish with deep maroon turntable, tone arm, record shelf support casting, and plastic trim, gives just the right color contrast for plenty of eye appeal.

V-M *Automatic* RECORD CHANGERS

MODEL 402

MODEL 403

MODEL 400C

MODEL 401C

FEATURES OF THE V-M 400 SERIES RECORD CHANGERS

- **Positive Intermix:** Will play ten 10" and 12" records intermixed in any sequence. Also plays ten 12" or twelve 10".
- **Records Protected From Wear and Breakage:** Records are gently lowered on step in spindle — not dropped as in other changers. Records will not crack around center hole, edges cannot be chipped, and records will not crack due to uneven drop because they are handled from just one point, and dropped horizontally, creating an air cushion between records, virtually eliminating any slap or jarring stops.
- **Automatic Shut Off:** After last record has been played tone arm returns to rest and control knob turns to "off" position automatically.
- **Single Knob Control:** Controls are simple and easily understood. Only control settings necessary are "OFF," "ON" and "REJECT" on single knob.
- **Plays All Records:** Records are handled entirely from the center hole. Dropping mechanism is unaffected by variations in record diameter, uneven edges, and warped records.
- **Manual Operation:** Home recording of all sizes up to 12" of either the "Outside In" or the "Inside Out" type may be played manually.
- **Adjustments Eliminated:** There are no adjustments in the mechanism under the base to slip or vibrate out of adjustment. Parts are pinned or riveted together. The only adjustment on the machine is for needle height and set-down and is made from above the base plate.
- **Completely Jam-Proof:** Tone Arm may be held and Control Knob may be turned to any position during cycle. Records cannot jam in ejecting mechanism. If trouble occurs the current is automatically shut off and the control knob turns to the "OFF" position.
- **Solid One Piece Die Cast Base:** Construction assures uniformity of manufacture, great strength and ability to withstand unusual abuse.
- **Simple Design:** Mechanism is extremely simple with even fewer parts than most changers which do not have the intermix and automatic shut-off features.
- **Fast Cycle:** Total time required to change records is less than four seconds.
- **Resonance-Free Tone Arm:** Special design of tone-arm breaks up resonance and reduces distortion.
- **Depressed Turntable:** Improved appearance is achieved by setting the turntable in a depression in the baseplate.
- **Shipping Bolts Hidden:** Shipping Bolts are out of sight beneath turntable. Bolts need never be removed from changer but are merely turned down and left in place to be used again whenever necessary.
- **Ball-Bearing Tone Arm:** Tone arm turns on friction-free ball bearings, greatly improving tracking and tripping action.
- **Minimum Mounting Space Required:** 13 $\frac{1}{2}$ " wide, 12 $\frac{1}{4}$ " long. Overall height, 7 $\frac{1}{4}$ ".
- **Powerful, Rumble-Free Motor:** Special motor with less than 2% total rumble.

The beautifully styled plastic tone arm on the 400 series changers will take all standard makes of cartridges and all of the new magnetic pick-ups.

BENTON HARBOR, MICHIGAN

WALCO

Cutting

NEEDLES

Trade Mark

STANDARD OF THE RECORDING INDUSTRY

WALCO needles are made only by Electrovox Company, the original makers of jewel and precious metal tipped phono needles. WALCO cutting needles and WALCO playback needles for home and professional use are individually in-

spected for flaws in material and workmanship prior to shipment. WALCO users are thus assured of complete satisfaction on every needle purchased.

Walco SAPHIRE PROFESSIONAL RECORDING STYLUS

Hand lapped and polished genuine sapphire cutting needle. Standard 87 degree included angle on cutting edge. Highest professional recording quality guaranteed. Available in short shank ($\frac{3}{8}$ ") and long shank ($\frac{11}{16}$ ").

Resharpener charge \$1.25 each
Resharpener charge — 12 or more \$1.00 each

RCA TEST EQUIPMENT

for SERVICE • LABORATORIES • INDUSTRY • SCHOOLS

MASTER VOLTOHMYST ELECTRONIC METER (WV-95A)

DC Ammeter: 7 Ranges to 10 amp.
 DC Voltmeter: 6 Ranges to 1000 volts
 Input Resistance.....11 megohms, all ranges
 Ohmmeter.....6 ranges to 1000 megohms
 AF Voltmeter...7 ranges to 1000 RMS volts
 Freq. Response Flat from 30 to 20,000 cycles
 RF Voltmeter (using RCA Diode Probe
 MI-8275 as accessory)
 4 Ranges...0.5, 0-10, 0-50, 0-100 RMS volts
 Freq. Response.....Flat to 250 Mc.
 (Crystal probe MI-8263 used for peak indica-
 tion)
 Capacitance Meter...6 ranges, 4 μ f to 1000 μ f.

Virtually a universal test instrument in itself, this electronic meter has high input impedance and is practically "burn-out" proof. It measures ac, af, and rf voltages, dc voltage and current, capacitance, and resistance. Two probes can be provided for measuring RMS, peak-to-peak, or \pm peak voltages to 250 Mc; complex waveform voltages can be measured. Suggested User Price: \$152.50.

TELEVISION CALIBRATOR (WR-39A)

Tunable Oscillator Freq. Range:
 4 bands, 19-110 Mc;
 2 bands, 17-240 Mc.
 Scale Accuracy:
 0.25 Mc from 19-120 Mc
 0.5 Mc from 170-240 Mc
 Output Voltage.....0.1 volt RMS
 Maximum Output Attenuation Ratio...100:1
 Output Impedance.....10 ohms
 Primary Crystal Standard.....Freq. 2.5 Mc
 Accuracy 0.1%
 Modulating Crystal Standard...Freq. 0.25 Mc
 Accuracy 0.03%

A precision signal source for accurate alignment of TV and FM receivers. Asymmetrical i-f pass bands are quickly determined when calibrator is used in conjunction with a suitable sweep generator and oscilloscope. Traps can be peaked precisely, and r-f circuits quickly aligned to proper frequency limits. Suggested User Price: \$250.00.

TELEVISION SWEEP GENERATOR (WR-59A)

Frequency Ranges:
 Video.....0.10 Mc
 Picture Intermediate,
 3 bands.....5-15, 20-30, 25-40 Mc
 FM Intermediate.....10-11.5 Mc
 TV Sound Intermediate.....20.25-22.25 Mc
 Television Radio.....Channels 1-13
 Output voltage, RMS, all freq ranges...0.1 volt
 RF Ranges—Output Impedance:
 (Bal. or Unbal.).....300 ohms
 Phase Control Range.....0°-160°
 Amplitude Variation Over
 Any Range.....less than 1 db

Sweep signal generator for visual alignment of television and FM receivers in conjunction with a suitable oscilloscope such as RCA WO-55A or RCA WO-58A. 13 television r-f ranges, 5 i-f ranges, and a video sweep range are provided to meet general shop and field requirements. Piston-type attenuator has a maximum ratio of 20000/1. Suggested User Price: \$325.00.

OSCILLOSCOPE (WO-58A)

Vertical Amplifier:
 Deflection—0.5 p-to-p volts/inch
 Sine-Wave Frequency Response:
 Flat within \pm 20% from 5 cycles to 2 Mc
 Frequency response curve has no positive slope above 1 kc
 Square-Wave Response:
 Tilt and overshoot less than 2% from 30 to 50,000 cycles
 Rise time less than 0.15 sec from 10% to 90% of total rise
 Horizontal Amplifier:
 Sine-Wave Frequency Response:
 Flat within \pm 10% from 6 to 100,000 cycles

5" oscilloscope affording accurate presentation of synchronizing pulses, deflection waveforms, and composite video signals. Peak-to-peak voltages of waveforms can be read during operation. Defective waveforms can be traced step-to-step. The crystal probe can be plugged into the kinescope socket of the receiver under test to observe video-amplifier response. Sugg'd User Price: \$345.00.

OSCILLOSCOPE (WO-55A)

Vert. Amplifier Sensitivity...1.3 p-to-p v/in.
 Horiz. Amplifier Sensitivity...1.5 p-to-p v/in.
 Deflecting Electrode Sensitivity
 Horiz. 135, Vert. 120 p-to-p v/in.
 Input Resistance and Capacitance
 0.5 megohm shunted by 55 μ f
 Sine-Wave Frequency Response:
 Upper Limit of Ver. & Hor. Amp.....200 kc
 Max. Input Voltage to Amp...750 p-to-p volts
 All prices in effect 6/1/48.

General purpose, portable 3" oscilloscope for radio servicing. . . Useful for observing visual response curves during alignment, tracing audio distortion and hum, measuring frequency, determining percentage of modulation, and measuring peak-to-peak voltages. Suggested User Price: \$129.50.

RCA TEST EQUIPMENT

for SERVICE • LABORATORIES • INDUSTRY • SCHOOLS

VOLTOHMYST (195-A)

The ideal instrument for radio servicing. In one instrument, at one price, you get 6 testing devices: DC Voltmeter; Ohmmeter; AC Voltmeter; A-F Voltmeter; Outputmeter; FM Indicator. New features include diode for AC measurements, linear AC scale for all ranges; plastic meter case with unbreakable front; shielded AC cable and probe. Sugg'd User Price: **\$79.50.**

Electronic DC Voltmeter Range 0-3; 10; 50; 100; 500; 1000 volts
Input Impedance 10 megohms constant
Electronic Ohmmeter Range 0-1,000; 10,000; 100,000 ohms; 0-1; 10; 100 megohms
Internal Source 3 volts
Electronic AC Voltmeter Range 0-5; 10; 50; 100; 500; 1000 volts
Power Supply 105-125 volts; 50-60 cycles
Dimensions 6 3/4" w; 9 5/8" h; 6 1/4" deep
Weight 14 lbs.
Finish Grey wrinkle, brush chrome panel

BATTERY VOLTOHMYST (WV-65A)

Portable electronic voltmeter-ohmmeter and ammeter combination for mobile, industrial or rural use. Works anywhere without AC power source thereby extending famous Volt-Ohmyst features to places remote from power lines. Neon panel lamp lights when battery is used. Unusually long battery life with normal use. Sugg'd User Price: **\$87.50** (Less batteries).

DC Ranges 0-3; 10; 30; 100; 300; 1000 v
Input Resistance 11 megohms constant
AC Ranges 0-100; 30; 100; 300; 1000 v
Sensitivity 1000 ohms per volt
Ohmmeter Ranges 0-1000; 10,000; 100,000 ohms; 0-1; 10; 100 megohms
DC Ammeter Ranges 0-3; 10; 30; 100; 300 millamp; 0-10 amp
Batteries Four 1 1/2 "A"; two 45v "B"
Dimensions 6 1/4" w; 9 1/2" h; 5 1/2" deep
Weight (incl. batteries) 9 lbs.

ISOTAP ISOLATION TRANSFORMER (WP-24A)

Eliminates shock hazard between ac-dc chassis and ground, speeds detection of receiver faults with high-low line tests, and facilitates testing of receivers at the design-center value of 117 volts. A six-position switch and three secondary receptacles afford maximum flexibility and operating convenience. Sugg'd User Price: **\$8.95**

Primary:
Line Voltage Range 105-130 volts
Switch Positions 105, 110, 115, 120, 125, 130 volts
Frequency 50-60 cycles
Secondary:
Output Voltages (approx.) 105-117-130
Power Output at unity power factor (Max.):
Cont. Oper. (30°C Amb.) 100 watts
Intermit. Oper. (30°C Amb.) 150 watts
Regulation (at 100 volt-amperes) 10%

CRYSTAL PROBE (MI-8263)

Makes any VoltOhmyst a VHF Voltmeter. Reads flat to 100 Mc. Adapts VoltOhmyst for HF, FM or TV test needs, within sensitivity range of the instrument. Withstands DC loads of 250 volts. Sugg'd User Price: **\$8.95.**

Input Voltage 22 rms volts (max)
Frequency Range 1000 cycles to 175 Mc
Frequency Response ± 10% from 1 kc to 100 mc
Overall Accuracy ± 7.5% at full scale
Input Capacity 3.5 μf

TESTPOINT ADAPTERS (MI-18760)

Set of 7 useful and versatile signal-tracing and voltage-checking aids. Ideal for quickly localizing trouble where socket contacts are inaccessible. Simplifies point-to-point signal tracing. Makes dynamic circuit test possible before chassis is removed from cabinet. Tube base types include

4-pin; 5-pin; 6-pin; 7-pin (small); 7-pin (large); octal and loctal adapters. Sugg'd User Price **\$7.50** per set including durable hardwood rack.

Miniature Tube Testpoint Adapter MI-8265 (not shown). Sugg'd User Price: **\$1.50.**

All prices in effect 3/1/48.

VU METERS

Two types of scales are available with all VU Meters. Both meet the standards set up by Bell Laboratories. The "A" scale stresses the level in VU and is primarily used in monitoring wire lines. The "B" scale stresses percent use of the transmitter output and is the standard for broadcast service.

VOLUME LEVEL INDICATORS

10-54-P

CIRCUIT TESTING FEATURES

A complete, wide-range, high speed, push-button operated, super-sensitive test set without any additional panel controls. Self-contained.

- * Six D.C. Voltage Ranges
- * Six A.C. Voltage Ranges
- * Six Output Ranges at 100 ohms per volt.
- * Seven D.C. Current Ranges:
- * Four-Self-Contained Resistance Ranges:
- * Six Decibel Ranges
- * Automatic Interlocking Push-Button
- * 1% Wirewound and Metallized Resistors.
- * Only 2 Polarized Tip Jacks

Series 10-54 Electronamic Test Master

Combination Tube Performance Tester, Battery Tester, and 35 Range, Push-Button Operated, Supersensitive, A.C.-D.C. Set Tester. Ranges to 6000 Volts, 60 Microamps, 12 amps, +70DB, 60 Meg. 20,000 Ohms per Volt D.C.—1000 Ohms per Volt A.C.

More than just Mutual Conductance: (Technical details in main catalog)

The Series 10-54 affords to the discriminating instrument purchaser, a COMPLETE PORTABLE SERVICE LABORATORY; engineered to meet the rapidly developing needs of the electronics art; provides every necessary facility for high speed, reliable tube and circuit testing associated with Industrial, Electronics, Communications, Radio (A.M.-F.M.), Television, Laboratory, etc. . . .

TUBE AND BATTERY TESTING FEATURES

- * A TUBE "PERFORMANCE" TESTER "Precision" ELECTRONAMIC circuit, effectively tests all tubes over a complete "Path of Operation" not just at one arbitrary operating point or for just one inconclusive characteristic
- * TESTS ALL MODERN TUBE TYPES: Noval Button 9 pin, 5 and 7 pin Acorn, dual cased H.F. tubes, Single Ended TV, and F.M. amplifiers, low power transmitting tubes, subminiature types, etc. including direct facilities up to twelve element prongs!
- * ABSOLUTE FREE POINT LEVER ELEMENT SELECTION: Highest possible, practical order of insulation against back-charge. Locks every tube element to prevent displacement at the next test.
- * ABSOLUTE FREE POINT, INTER-ELEMENT SHORT CIRCUIT and Variable Filament Controlling System
- * DUAL SHORT CIRCUIT SENSITIVITY: At any test position, sensitivity is doubled for normal special applications.
- * INDIVIDUAL TUBE OPERATION TEST: of most test tubes with 100 hours of normal tube test record.
- * A.M. and F.M. CATHODE RAY TUNING INDICATORS directly tested
- * BALLAST UNIT TESTS.
- * NOISE and CONDENSER TESTS
- * MICRO-LINE ADJUSTMENT via continuously variable line voltage control
- * PILOT AND SIGNAL LIGHT TESTS
- * ACCURACY of test circuits closely maintained by use of individual, internal calibrating controls.
- * ROLL TUBE CHART BUILT-IN.
- * EXTRACTOR FUSE POST.
- * Test circuits completely isolated from power line
- * TELEPHONE-TYPE, CABLED, plastic insulated, non-ferrous wire.
- * 4 1/2" FULL VISION METER 50 microamps, 100 microamps
- * TESTS RADIO A, B and C DRY BATTERIES with a "PRECISION" engineered circuit which performance tests each battery under actual load conditions. Battery quality read directly on a 3-color scale.

10-54-P (illustrated) most Handy, rugged, portable, case, 12 1/2" x 19" x 6 3/4". With chrome plated, dual in-line voltage test terminals. Code: Habit. Complete: NET PRICE \$134.40

10-54-C (see 10-12-C) Color, rugged, portable, case, 12 1/2" x 19" x 6 3/4". With chrome plated, dual in-line voltage test terminals. Code: Handy, Complete: NET PRICE \$137.70

10-54-PM (see 10-12-PM) rugged, portable, case, 12 1/2" x 19" x 6 3/4". With chrome plated, dual in-line voltage test terminals. Code: Harem, Complete: NET PRICE \$137.70

Series 10-12 Electronamic Tube Master.

Truly Free-Point Tube and Battery Performance Tester.

More than just Mutual Conductance: (Technical details in main catalog)

The 10-00 Series of TUBE and TEST MASTERS represent the culmination of many years' development of tube testing equipment to meet the exacting needs of the rapidly advancing field of electronics.

Incorporating the exclusive ELECTRONAMIC tube performance testing circuit, plus an advanced, "PRECISION" developed, multiple element, master lever selector system, it truly can be said that the MASTER 10-00 Series offers, to the discriminating equipment purchaser, the highest possible practical order of: test results and anti-obsolescence insurance.

TUBE AND BATTERY TESTING FEATURES

The Series 10-12 Electronamic Tube Master incorporates the same circuit and exacting performance details described for the Series 10-54, above, under the heading "Tube and Battery Testing Features."

* 10-12-P (see 10-54-P illustration above) Handy, rugged, portable, case with cool compartment. Code: Facit. Complete: NET PRICE \$96.16

Series 10-20 *Electronamic Test Master*

Combination Master Electronamic Tube Performance Tester, Battery Tester and 34 Range A.C.-D.C. Push-Button Operated Circuit Tester. 1000 Ohms per Volt A.C. and D.C.

10-20-P

- 10-20-P (illustrated) In Full Range 34 Range A.C. and D.C. with tool compartment. Size 24" x 12" x 10". Complete with ohmmeter batteries and test leads. Code: Daily. Complete: NET PRICE \$119.80
- 10-20-C (see 10-15-C illustration and description on page 1) In the form of a carry case with tool compartment. Code: Dance. Complete: NET PRICE \$123.10
- 10-20-PM (see 10-15-PM illustration and description on page 1) In standard rack mount. Code: Dandy. Complete: NET PRICE \$123.10

More than just Mutual Conductance:

A complete, rugged service laboratory incorporating the exclusive "PRECISION" ELECTRONAMIC Tube Performance Tester, combined with full 1000 ohms per volt A.C. and D.C. Multi-Range features; plus a complete radio A, B and C Battery Tester.

Ideally suited and particularly engineered for general purpose radio-electronic maintenance, service and installation.

TUBE AND BATTERY TESTING FEATURES

The Series 10-20 TEST-MASTER provides the identical tube and battery performance testing features as outlined for the Series 10-54 on page 1.

CIRCUIT TESTING FEATURES

Wide-range, high speed, push-button operated set testing functions provide ranges to: 3000 volts, 600 microamperes, 12 amperes, 10 megohms, +70 DB. ALL SELF-CONTAINED AND WITHOUT ANY ADDITIONAL PANEL CONTROLS.

- SIX D.C. VOLTAGE RANGES
1000 ohms per volt
- SIX A.C. VOLTAGE RANGES
1000 ohms per volt
- SIX OUTPUT RANGES
1000 ohms per volt
0.6-1-2-3-30-3000 volts
- SIX D.C. CURRENT RANGES
600 microamperes
0.001-100MA and 100mA
- FOUR SELF-CONTAINED RESISTANCE RANGES:
0-1000-100,000 ohms 0-100 meg.
- SIX DECIBEL RANGES
from -10 to +4 DB
- 4 1/2" WIDE VISION METER
470 mm. material, +20
- 1% WIREWOUND AND METALLIZED RESISTORS
- 2 POLARIZED TIP JACKS
serve all standard ranges
- AUTOMATIC INTERLOCKING PUSH BUTTON RANGE SELECTION
- ALL CIRCUITS ISOLATED FROM POWER LINE

Series 10-15 *Electronamic Tube Master*

Ultra-Modern, De Luxe Tube and Battery Merchandiser with large 9" meter.

Series 10-22 *Electronamic Test Master*

De Luxe Tube-Battery Merchandiser and Circuit Tester with large 9" Meter. 1000 ohms per volt A.C. and D.C.

10-15

- 10-15 Tube and Battery Merchandiser. (Illustrated) Heavy gauge steel cabinet in line, dull black ripple finish with chrome trim and reflector. Size 24" high 17 1/2" wide base depth 10" mounting to 4" at top. Code: Gable. Complete: NET PRICE \$132.65

More than just Mutual Conductance:

(Technical details in main catalog)

- Incorporates the advanced Electronamic tube performance and battery testing circuit described for Series 10-54 on page 1
- Designed particularly for equipment conscious, progressive radio service, sales organizations, and tube selling sections of department stores.
- PROMOTE CUSTOMER CONFIDENCE and tube sales via this impressive "Precision" Tube Merchandiser
- 9" RECTANGULAR METER.
- DIRECT READING non-confusing tube performance indications in large easy reading terms of *Best Case Work Good*.
- ILLUMINATED by built-in, large chromium reflector fixture.
- The Series 10-22 De Luxe Electronamic Service Laboratory is electrically identical to the Series 10-20 described above.
- Incorporates every customer-incident, and offers a tremendous advantage over the Series 10-15, at less plus a complete, rugged 34 range A.C.-D.C. push button operated, Multi-Range Test Set.
- Tube and Service Facilities no brighter, the foreground with the modern impressive "Precision" engineered instrument.
- Ideal for behind-the-counter flash instrument display also a highly suited for insertion into the center of tube rack-display shelving.
- 10-22-PM (see 10-22-PM illustration at right) On heavy gauge steel panel with dust cover. Panel: 22 1/2" x 19" for standard rack mount. Fine, dull black ripple finish. Code: Gavot. Complete: NET PRICE \$127.50
- 10-22 Combination Tube and Battery Merchandiser plus A.C.-D.C. Multi-Range Set Tester. In same cabinet plus-tered for the model 10-15 (at left). Complete with test leads and ohmmeter batteries. Code: Gauge. Complete: NET PRICE \$155.15

10-22-PM

- 10-22-PM (illustrated) On heavy gauge steel panel with dust cover. Panel 22 1/2" x 19" for standard rack mount. Fine, dull black ripple finish. Code: Gamut. Complete: NET PRICE \$150.00

Series 858 High Sensitivity *Multi-Master*

Dual-Range Sensitivity

High Speed, A.C.-D.C. Multi-Range Test Set. 24 Ranges to 6,000 Volts, 60 Microamperes, 12 Amps, 600 Megs. +70DB. 20,000 and 1,000 Ohms per Volt D.C. 1,000 Ohms per Volt A.C.

The Series 858 MULTI-MASTER features a "Precision" designed Push-Button Range and Function selection system, affording the ultimate in positive operational efficiency.

Designed for reliable measurements in modern T.V., F.M., A.M. and other critical electronic circuits where only minute current drain of the measuring instrument can be tolerated.

The dual-range sensitivity feature provides the equivalent of another instrument at standard 1000 ohms per volt sensitivity, in conformance with many point to point voltage readings listed by receiver service manuals.

858-P

- * 858-P (illustrated) In hardwood, portable case, with tool compartment. Size 9"x10"x4 1/2". Complete with ohmmeter batteries and high voltage test leads. Code: Judge. NET PRICE \$57.35
- * 858-L In modern bakelite case (as illustrated for Series 847-L below). Complete with ohmmeter batteries and high voltage test leads. Code: Jetty. NET PRICE \$54.10

SPECIFICATIONS

- * EIGHT D.C. VOLTAGE RANGES both 20,000 and 1000 ohms per volt.
- * EIGHT A.C. and OUTPUT VOLTAGE RANGES at 1000 ohms per volt. 0-3-6-12-60-300-600-1200-6000 volts.
- * EIGHT D.C. CURRENT RANGES: 0-60-120 microamperes. 0-1-2-12-120-600 MA. 0-1-2-12 amps.
- * SIX RESISTANCE RANGES self-contained to 60 megohms. 0-6000-60,000-600,000 ohms. 0-6-60-600 megohms.
- * EIGHT DB RANGES --25 to +70DB.
- * Only two polarized pin jacks serve all standard ranges.
- * 4 3/8" 50 microampere wide angle meter. +2% accuracy.
- * 1% Wire and Metallized Resistors.
- * Safety Jacks for 6000 volt ranges.
- * CALIBRATION All instruments individually calibrated and sealed against laboratory standards.
- * HIGHEST GRADE MATERIALS and plastic insulated telephone type cabling employed.
- * ETCHED AND ANODIZED, heavy gauge aluminum panels: resistant to moisture and wear.

Series 847 Dual Sensitivity *Multi-Master*

High Speed, A.C.-D.C. Multi-Range Test Set
5000 and 1000 Ohms per Volt D.C.
1000 Ohms per Volt A.C.

The Series 847 MULTI-MASTER is a rugged, moderately high sensitivity, general purpose, A.C.-D.C. test set.

The same "Precision" Automatic Push-Button Range and Function selection system is employed as for the series 858 above. Ideally suited to continuous usage associated with electronic maintenance and service; classroom instruction; production testing, etc. . . . Incorporates all desirable features, assuring "Precision" quality, workmanship and performance standards.

847-L RANGE SPECIFICATIONS

- * 8 D.C. VOLTAGE RANGES at 5000 and 1000 ohms per volt.
- * 8 A.C. VOLTAGE and OUTPUT RANGES 1000 ohms per volt. 0-3-6-12-60-300-600-1200-6000 volts.
- * 8 D.C. CURRENT RANGES: 0-3-12-30-300-600 MA. 0-1-2-12 amperes.
- * 6 RESISTANCE RANGES: self-contained to 20 megohms. 0-200-1,000-1,000,000 ohms. 0-2-20-200 megohms.
- * 4 3/8" 20 microampere METER: 2% accuracy.
- * 1% Wire-wound and Metallized Resistors.
- * All standard measurements at only two polarized tip jacks. 6000 volt ranges at specially insulated, sub panel mounted jacks.
- * 847-L (illustrated) In modern bakelite case. Size 7 1/2"x8 1/2"x3". Complete with ohmmeter batteries and high voltage test leads. Code: Index. NET PRICE \$47.65
- * 847-P In hardwood, portable case per Series 858-P (illustration above). Complete with ohmmeter batteries and high voltage test leads. Code: Ivory. NET PRICE \$50.90

Series 866 De Luxe *Multi-Master*

Panel-Mounted, A.C.-D.C. Test Set, 9" Meter and Remote-Control Selector Unit. 5000 and 1000 Ohms per Volt D.C. 1000 Ohms per Volt A.C.

866

The Series 866 De Luxe Multi-Master is a laboratory type of high sensitivity test set indispensable to the well equipped, modern radio service laboratory and electronics classroom.

The extra-large 9" meter and remote-control selector unit afford unparalleled operational efficiency with maximum physical meter protection via permanency of panel mounting above the work level.

The 9" meter permits the ultimate in direct, easy reading of all scale-plate indications.

ELECTRICAL and RANGE SPECIFICATIONS OF SERIES 866 are identical to those described for Series 847-L at left.

- * 866 (illustrated) In standard panel mount, size 19"x12 1/4" with rear dust cover 6" deep. Complete with high voltage test leads and ohmmeter batteries. Code: Novel. NET PRICE \$71.65

All prices are subject to change without notice

612-P

Series 612 Cathode Conductance Tube Tester

A Modern, Free Point, Lever Operated
Tube and Battery Tester.

The new Series 612 represents the culmination of extended and intensive development in the field of modern tube checking requirements. *Combining the highest practical order of obsolescence insurance with utmost simplicity of operation*, "Precision" is pleased to meet the ever-present need for positive tube testing results at moderate cost. This goal has been achieved with full conformity to the accepted and self-imposed "Precision" high standards of workmanship, performance and quality components.

With tube testing parameters based upon the well established, time-proven emission testing principles as have been recommended by both tube manufacturers and R.M.A., the new "600" line affords advanced design features and performance which render it incomparable amongst instruments in its category and price range.

- * 612-P (illustrated) In hardwood, portable case. Size 12"x13"x6". Code: Bison. Complete: \$69.50
- * 612-MCP (illustrated) Open style Metal Case Portable. Fine black ripple finish. Size 10 1/2"x12"x6". Code: Brine. Complete: \$66.65
- * 612-C (illustrated) In modern, chrome plated counter cabinet. Fine black ripple finish. Size 16"x13 1/2"x7", slopes to 3" at front. Code: Bison. Complete: \$71.90
- * 612-PM (illustrated) In standard size panel mount 12 1/4"x19" with dust cover. Fine black ripple on heavy gauge steel. Code: Blaze. Complete: \$69.50

TUBE AND BATTERY TESTING FEATURES

- * TESTS ALL MODERN TUBE TYPES including 7 pin Acorns, button 7 and Noval 9 pin types, dual-capped H.F. tubes, FM and TV amplifiers, etc.
- * FILAMENT VOLTAGES 3/4 to 117 volts.
- * ABSOLUTE FREE-POINT 10 element and short-check lever selection regardless of varying or multiple basing terminations.
- * 4 1/2" METER, 2% accuracy.
- * DUAL SHORT CHECK SENSITIVITY.
- * INDIVIDUAL TESTS OF MULTI-SECTION TUBES including tuning indicators, mix rectifiers, oscillator-converter, etc.
- * BALLAST UNIT TESTS.
- * MICRO-LINE ADJUSTMENT.
- * PILOT and SIGNAL LIGHT TESTS.
- * NOISE and CONDENSER TEST pin jacks.
- * DYNAMIC "UNDER-LOAD" TEST for all popular range A, B, and C dry batteries.
- * Built-in brass geared roll chart.
- * Anodized, deep etched, heavy gauge aluminum panel resistant to wear.
- * Panel mounted Fuse Extractor Post.
- * Telephone type cabled, plastic insulated, moisture resistant hook-up wire.
- * DUPLICATE PERFORMANCE of each instrument insured via use of internal, sealed calibrating controls.

612-MCP

612-C

612-PM

Series 620 Tube, Battery and Set Tester

Ranges to 3000 Volts, 12 Amperes, +64DB, 10 Megohms.

A complete, portable, service laboratory providing every essential feature for general purpose test and check of modern radio and electronic equipment. The Series 620 incorporates the identical tube test circuit and battery testing features of the Series 612 (described above), plus a complete A.C.-D.C. Multi-Range Circuit Tester of 1000 ohms per volt sensitivity.

CIRCUIT TESTING FEATURES

- * 5 A.C.-D.C. and OUTPUT VOLTAGE RANGES: 0-12-60-300-1200-3000 volts.
- * 5 D.C. CURRENT RANGES: 0-1-2-12-120MA, 0-1.2-12 amperes.
- * 3 RESISTANCE RANGES self-contained: 0-1000-100K-10 megohms.
- * 5 DECIBEL RANGES from -12 to +64DB.
- * Full rotary Range and Function Selectors.
- * ONLY 2 PIN JACKS serve all standard ranges.
- * 1% Wire and Metallized Resistors.
- * 400 microampere Rectangular 4 1/2" Meter, 2% accuracy.
- * All Circuits isolated from power line.

The Series 620 is available in the same four model types as described and illustrated for the Series 612 above and at left.

- * 620-P Code: Local, Net Price \$94.10
- * 620-MCP Code: Luffy, Net Price \$91.25
- * 620-C Code: Loyal, Net Price \$96.50
- * 620-PM Code: Legal, Net Price \$94.10

Series 614 DE LUXE TUBE AND BATTERY MERCHANDISER

Modern, Counter Type Tube and Battery Tester
with Large 7" Chrome Trimmed Meter.

614

The Series 614 is designated for the progressive tube and battery department wherein an exceptionally attractive instrument is desired to step-up tube and battery sales. The 7" meter provides a full view of test results to both operator and customer.

Employs the same circuit described for Series 612 above, assuring accurate and reliable performance.

- * 614 Tube and Battery Merchandiser (illustrated) is attractive, modern, chrome trimmed, fine black ripple finished cabinet. Offset mounted meter. Cabinet size 16"x13 1/2"x7", slopes to 3" at front. Code: Early. NET PRICE \$89.30

PRECISION

TEST EQUIPMENT

STANDARD OF ACCURACY

* Series 40 (illustrated) In molded bakelite case with plastic handle. 3 3/4" x 6 1/2" x 2 1/2". Complete with ohmmeter, batteries and test leads. Code: Visit. NET PRICE \$24.75

Series 40 Compact Wide-Range Circuit Tester

31 Range A.C.-D.C. Test Set ... Self-Contained to 6000 Volts, 600MA, +70DB, 5 Megohms with Full Size 3" Rectangular Meter, 1000 Ohms per Volt A.C. and D.C.

In a compact molded bakelite carrying case, the Series 40 is an unparalleled instrument of its type and size. Ideally dimensioned and engineered to meet the need for a portable, compact, yet rugged, accurate test set to withstand hard, long term usage as is imposed by the radio amateur, service technician, maintenance engineer, production inspector, trouble-shooter, etc.

The Series 40 offers every advanced design feature and full-bodied components as are regularly incorporated in "Precision's" larger multi-range test sets, including: Rotary Range Selection—1% shunts and multipliers—heavy duty insulated pin jacks—Large numerals, easy reading meter.

ALL RANGES, including 6000 volts and 5 Megohms, are SELF-CONTAINED and ready to operate. NO EXTERNAL BATTERIES OR MULTIPLIERS ARE REQUIRED.

RANGE SPECIFICATIONS

- * 6 A.C.-D.C. OUTPUT VOLTAGE RANGES: 1000 ohms per volt. 0-3-12-60-300-1200-6000 volts.
- * 4 D.C. CURRENT RANGES: 0-6-60-600 MA.
- * 3 RESISTANCE RANGES: self-contained batteries. 0-5000-500,000-5 megohms.
- * 6 DECIBEL RANGES: -22 to +70 DB
- * FULL SIZE 3" METER: 400 microamperes ±2%.
- * 1% WIRE & METALLIZED RESISTORS.
- * ONLY 2 PIN JACKS serve all standard functions.
- * Recessed 6000 volt safety jack.
- * Anodized, etched aluminum panel: resistant to moisture and wear.

Series 85 High Sensitivity Test Set

20,000 Ohms per Volt D.C. 1,000 Ohms per Volt A.C. 34 Self-Contained Ranges to 6000 Volts, 120 Microamperes, 12 Amperes, +70DB, 60 Megohms.

The Series 85 is a bakelite cased, laboratory styled, portable instrument. Compactly dimensioned, it affords every substantial physical and electrical refinement associated with the name "Precision." Its 4 5/8" meter, with large numerals, affords utmost visibility.

Combining high sensitivity with small overall size, Series 85 is "Application Engineered" for production, lab., school and service-maintenance phases of modern electronics: A.M., F.M., and TV.

SPECIFICATIONS

- * 6 D.C. Voltage Ranges: 20,000 ohms per volt.
- * 6 A.C.-Output Voltage Ranges: 1000 ohms per volt. 0-3-12-60-300-1200-6000 volts.
- * 6 D.C. Current Ranges: 0-100 microamps. 0-1-2-12 MA on 11, 12-12 amps.
- * 4 Resistance Ranges: Self contained. 0-6000-600,000 ohms. 0-6-60 megs.
- * 6 Decibel Ranges: -25 to +70DB
- * 4 5/8" Rectangular Meter. 50 Microampere 2% accuracy.
- * 1% Wire & Metallized Resistors.
- * Rotary Range Selectors afford all standard functions at only 2 tip jacks.
- * Recessed 6000 volt safety jacks.
- * Anodized, heavy gauge, etched aluminum panel resistant to moisture and wear
- * Series 85 (illustrated) in molded bakelite carrying case with plastic handle. 5 1/2" x 7 1/8" x 3". Complete with ohmmeter batteries and test leads. Code: Waist. NET PRICE \$38.75

Series 80 Wide Range Test Set

1000 Ohms per Volt A.C. and D.C. 34 Self-Contained Ranges to 5000 Volts, 12 Amperes, +70DB, 50 Megohms.

The Series 80, laboratory styled, rotary selective, multi-range circuit tester has been designed to meet the same high calibre performance standards as the Series 85 (at left) but is specifically intended for use where greater resistance to electrical and physical overload is of more importance than extremely high sensitivity.

"Application Engineered" for general purpose industrial and radio service-maintenance-test requirements.

SPECIFICATIONS

- * 6 A.C.-D.C.-Output Voltage Ranges: 1000 ohms per volt. 0-3-12-60-300-1200-6000 volts.
- * 6 D.C. Current Ranges: 0-6-60-300 MA and 0-1-2-12 amps.
- * 4 Resistance Ranges: Self Contained. 0-1000-100,000 ohms. 0-1-10 megohms.
- * 6 Decibel Ranges: from -20 to +70DB.
- * 4 5/8" Rectangular Meter: 500 microampere, 2% accuracy.
- * 1% Wirewound and Metallized Resistors.
- * Recessed 6000 volt safety jack.
- * Anodized, etched aluminum panel resistant to moisture and wear.
- * Series 80 (illustrated) In molded bakelite carrying case with plastic handle 5 1/2" x 7 1/8" x 3". Complete with ohmmeter batteries and test leads. Code: Weave. NET PRICE \$32.70

Series 85

Series 80

Series LC-1

LEATHER INSTRUMENT CASE

The LC-1 case is custom designed exclusively for the Series 80 and 85 test sets. It affords the convenience of hand or shoulder carry with utmost protection to the instrument PLUS a tool and test lead compartment.

Genuine top-grain heavy cowhide with waterproof-lined inside interior. Adjustable hand or shoulder strap. Positive snap lock. Richly finished in dark brown. Code: Yearn. NET PRICE \$8.75

★ SERIES RF-10 VACUUM TUBE R.F. PROBE

An accessory item to Series EV-10, the RF-10 Vacuum Tube Probe provides direct means for measurement of superaudio, R.F. and U.H.F. voltages. Consists of flexible, rubber-shielded cable connecting directly to Series EV-10 panel, make-up probe tube housing with an extremely probing tip type 902 tube probe receiver. All operating voltages are applied through connecting cable. Complete with complete instructions. Code: Probe. NET PRICE \$14.40

Precision Series EV-10 VTVM - Megohmmeter with 7" Full-View Meter

Plus standard 1000 Ohms per Volt Functions.

Ranges to 6000 Volts • 2000 Megs. • 12 Amps. • +70 DB.

A WIDE-RANGE ELECTRONIC MEASURING INSTRUMENT, stressing the utmost in performance, accuracy, and ease of manipulation. Combining both VTVM as well as standard 1000 ohms per volt functions. Series EV-10 permits rapid, accurate check of voltage, current, and resistance conditions encountered in modern A.M., F.M., and TV. Networks, without materially disturbing the circuit under analysis.

IMPORTANT FEATURES

- **VOLTAGE REGULATED** — BRIDGE TYPE CIRCUIT: direct reading VTVM, with practical freedom from tube and line voltage variations.
- **ZERO-CENTER VTVM** — Provides both resistance and polarity at any test point, without reversal of test leads.
- **MASTER RANGE SELECTOR**
- **SHIELDED COAXIAL TEST PROBES** — Voltage measurement without disrupting performance.
- **DJO BALANCED ELECTRONIC-BRIDGE OHMMETER** — Providing unusually high accuracy throughout scale length.
- Each instrument individually calibrated.
- **TELEPHONE CABLED**, plastic insulated, hook-up wire.
- **7" RECTANGULAR METER** 400 microampere, $\pm 2\%$.
- 1% wire and metallized resistors.

RANGE SPECIFICATIONS

- Eight Zero-Center VTVM Ranges: $\pm 3, \pm 6, \pm 12, \pm 60, \pm 300, \pm 600, \pm 1200, \pm 6000$ volts D.C.
- Input Resistance:
13 1/3 megohms at 600 volts.
27 1/3 megohms at 1200 volts.
133 1/3 megohms at 6000 volts.
- Six Ohmmeter-Megohmmeter Ranges: (self contained).
0-200-200-600 ohms
0-2-20-200-2000 megohms
- Eight A.C.-D.C. and Output Voltage Ranges at 1000 ohms per volt:
0-3 • 12-60-300-600-1200-6000 v.
- Seven D.C. Current Ranges:
0-600 microamperes
0-3-12-60-300-1200 MA 0-12 amps.
- Eight Decibel Ranges: 0-10 to -70 DB

Precision Series E-200-C Signal Generator

A Modern Multi-Band Signal Generator for A.M., F.M., and Television Alignment:

Featuring "Servicing by Signal Substitution." The Dynamic Speed Approach to Receiver Alignment and Adjustment Problems.

SPECIFICATIONS

1. FREQUENCY COVERAGE 80 KC. to 100 MC. on fundamental 100 direct reading in 8 bands to 1.0 MC. No charts required.
2. ACCURACY — CONSTANCY OF CALIBRATION: MAXIMUM of 1% DEVIATION on all bands, insured by use of the "PRECISION" developed "UNIT-OSCILLATOR" construction, which eliminates need to incorporate costly useless, single frequency reference crystals.
3. LARGE FULL VISION 6 1/2" INCH NO-GLARE DIAL.
4. 0-1000 POINT VERNIER SCALE, direct reading to one part in 1000.
5. THE CIRCUIT—single-ended 6SJ7 in stable E.C.O. circuit—modulated by a 6CS sine-wave audio oscillator. 5Y3 Full wave rectifier.
6. 400 CYCLE SINE WAVE AUDIO OSCILLATOR — provides both modulation and external test signal from 20 to over 50 volts.
7. DUAL R.F. ATTENUATORS—smooth stepless control of R.F. intensity.
8. SHIELDING—Compartment shielding of vital components—Power transformer electrostatically shielded. A.C. line is R.F. filtered.
9. SHIELDED COAXIAL OUTPUT CABLE and (LO-HI) cable connectors.
10. FOUR TYPES OF SIGNALS—"Unmod. R.F.", "400 cycle Mod. R.F.", "EXTERNALLY Mod. R.F.", (F.M. or A.M.) "400 cycle Audio Output."
11. DIRECT READING VARIABLE MODULATION—0-100%—triples signal utility as against obsolete fixed modulation of only 30 or 40.
12. DIRECT READING A.V.C. SUBSTITUTION SYSTEM—Overcomes alignment troubles arising from receiver A.V.C. Supplies ITS OWN A.V.C. VOLTAGE.
13. HAND CALIBRATED—Each instrument is INDIVIDUALLY calibrated.
14. FULLY LICENSED under patents of A. T. & T. and W. E. Co's.
15. Not only an efficient Signal Generator for purposes of alignment but also SPECIFICALLY DESIGNED for "Servicing by Signal Substitution." Yet priced within the reach of every progressive radio service engineer.

• **Series E-200-C** — (illustrated) in black triple finished, portable steel case. Size 10 1/2" x 12 1/2" x 6". Complete with tubes, output cable and FREE copy of "Servicing by Signal Substitution". Code: Trade. NET PRICE \$67.25

• **E-200-C-PM** Consists of Series E-200-C on steel panel size 12 1/4" x 19", for standard rack mount. Code: Trace. NET PRICE \$69.70

"SERVICING BY SIGNAL SUBSTITUTION" 9th Edition . . . The modern, ECONOMICAL solution to your daily service problems . . . Nothing complex to learn, no extraneous equipment to purchase . . . A systematic method of DYNAMIC SIGNAL ANALYSIS based entirely on fundamentals . . . Fully described in a bound illustrated text "Servicing by Signal Substitution." This highly valuable book is supplied with Series E-200-C at no charge. Additional copies available at your Precision distributor or directly from factory at 40c per copy.

SIMPSON ELECTRIC CO.
CHICAGO, ILLINOIS

INSTRUMENTS THAT STAY ACCURATE

Model 374 D.C. Microammeter

RANGES: 0-50, 100, 250, 500, 1000 Microamperes.

Incorporates a basic movement of 50 microamperes sensitivity with self-contained shunts for all other ranges. Usually available only in expensive laboratory instruments, costing many times the price of this one. Conduct your experiments with one of these instruments. It's surprisingly accurate. Can be used with external resistors or multipliers for high sensitivity voltmeter at 20,000 ohms per volt. Of particular value in photoelectric cell ex-

perimental work. Meter may be shorted out of circuit by setting to "short" position.

SIZE: 3" x 5 $\frac{1}{8}$ " x 2 $\frac{1}{2}$ ". WEIGHT: 1 $\frac{1}{2}$ LBS.
SHIPPING WEIGHT: 2 $\frac{1}{2}$ LBS.

Dealer's Net Price.....\$20.90

Test leads with Alligator clips
and insulated sleeves..... 1.25 extra

MODEL 374

MODEL 375

Model 375 D.C. Ammeter

(Self Contained)

RANGES: 0-1, 0-2.5, 0-5, 0-10, 0-25 Amperes.

A new multi-range instrument which is extremely useful in testing the current in D.C. circuits. Provides a complete range from a fraction of an ampere to 25 amperes without the necessity of using auxiliary external shunts. A good instrument for checking auto

radio sets, D.C. motors, etc. Excellent for school use and experimental work in D.C. circuits.

SIZE: 3" x 5 $\frac{1}{8}$ " x 2 $\frac{1}{2}$ ". WEIGHT: 1 $\frac{1}{2}$ LBS.
SHIPPING WEIGHT: 2 $\frac{1}{2}$ LBS.

Dealer's Net Price.....\$18.70
Test leads with prods..... 1.25 extra
Test leads with Alligator clips,
and insulated sleeves..... 1.25 extra

Model 376 A.C. Voltmeter

(Rectifier Type)

RANGES:

0-5, 10, 25, 50, 100, 250, 500, 1000 A.C. Volts

An A.C. Voltmeter, especially useful in circuits where a limited amount of current is present. Makes an excellent output meter when used with proper condenser. The wide

variety of ranges covers both primary and secondary voltage ranges of transformers used in radio sets, toys and appliances.

SIZE: 3" x 5 $\frac{1}{8}$ " x 2 $\frac{1}{2}$ ". WEIGHT: 1 $\frac{1}{2}$ LBS.
SHIPPING WEIGHT: 2 $\frac{1}{2}$ LBS.

Dealer's Net Price.....\$18.25

Model 378 A.C. Milliammeter

(With self-contained current transformer)

RANGES: 0-5, 0-25, 0-100, 0-250, 0-1000 M.A.

Here is the instrument that answers a big need—a low cost, handy size milliammeter that combines a current transformer and an indicating instrument in one case. It offers

five separate ranges, making it suitable for a wide variety of testing jobs.

SIZE: 3" x 5 $\frac{1}{8}$ " x 2 $\frac{1}{2}$ ". WEIGHT: 1 $\frac{1}{2}$ LBS.
SHIPPING WEIGHT: 2 $\frac{1}{2}$ LBS.

Dealer's Net Price.....\$20.50

Model 370 A.C. Ammeter

(With self-contained current transformer)
(For use on 60 cycles)
RANGES: 0-1, 0-2.5, 0-5, 0-10, 0-25 Amps.

For the first time, a current transformer and indicating instrument have been combined in one small case to meet the consistent demand for a small multiple range A.C. ammeter, at a price that even a student can afford. Providing a complete range, from a fraction of an ampere to 25 amperes, it deserves a place in

MODEL 370

the equipment of every manufacturing establishment, every school, service organizations and all other branches of the electrical industry. Its many uses include the measurement of current draw by all types of electric appliances and motors, heating elements, lamps, radio sets, etc.

SIZE: 3" x 5 $\frac{7}{8}$ " x 2 $\frac{1}{2}$ ". WEIGHT: 1 $\frac{1}{2}$ LBS.
SHIPPING WEIGHT: 2 $\frac{1}{2}$ LBS.
DEALER'S NET PRICE.....\$18.50

Model 371 A.C. Voltmeter

RANGES: 0-150, 0-300, 0-600 Volts.

Particularly adaptable to testing line voltage. When servicing motors, electric appliances, etc., it is most essential to know if line voltage is normal. High voltage may damage or burn out motors, heater elements, etc. Low speed in motors or improperly heated elements in appliances may be due to low line voltage. A very desirable unit for any industrial test kit or laboratory.

MODEL 371

INSTRUMENTS THAT STAY ACCURATE

MODELS 240 and 230 Volt-Ohm-Milliammeters

These two "Micro-Tester" portables, famous for their ruggedness and in-built accuracy, are typical of the construction features and utility that distinguish the entire line shown on the previous page and the pages following.

Both instruments are self-contained, need no external resistors and have a sensitivity of 1000 ohms per volt. Both are shock-proof and incorporate the celebrated Simpson movement with its bridge-type construction and soft iron pole pieces. Resistors are in matched pairs to provide greatest possible accuracy for all ranges.

Model 230, with maximum voltage of 1000 volts A.C. or D.C., is ideal for most industrial testing. Its ranges are adequate for various line voltages, for telephone, teletype, and general purpose testing.

Model 240—the "Hammeter"—was designed for additional voltage and sensitivity demanded in radio testing. In fact, with its maximum voltage range of 3000 A.C. or D.C., it was the first self-contained pocket portable built expressly to check high voltage and all component parts of transmitters and receivers.

Both models are housed in heavily molded bakelite cases, with all numbers and symbols recessed in the panel and filled with white enamel for greatest legibility and ease of reading. Both have full size 3" meters. Both are furnished with test leads. Model 240's leads are insulated against 3000 volts and fitted with rubber guarded alligator clips.

Simpson

SIMPSON ELECTRIC CO.
CHICAGO, ILLINOIS

INSTRUMENTS THAT STAY ACCURATE

SIMPSON'S Famous "Micro-Tester" Portables

The Simpson Model 390 is the first appliance tester ever made that gives you volt, ampere and wattage readings all in one compact instrument of its size. It embraces two ranges each of voltage and current, providing four wattage ranges which cover practically all types and makes of appliances. It is extremely rugged in construction and will stand up under full load, continuous operation.

The panel has volt-ampere combinations clearly indexed to the proper sectors on the scale to make the instrument quick, simple, and sure to use. The Break-In plug, furnished with the instrument, has 4-color coded leads which are first attached to the instrument. Then the plug is placed in an electrical outlet and the appliance to be tested is plugged into it. All readings are shown on one meter; in normal position the meter indicates volts; ampere and watt readings are obtained by depressing buttons on the panel. Because of the way binding posts are separated, the Model 390 can also be used as an individual voltmeter to check line voltages, or as an ammeter.

The accuracy of the Model 390 is 5% of full scale reading, or better. The errors due to phase angle error and frequency are so small that they can be disregarded within the normal frequency range of 50 to 133 cycles. For 25 cycle current, 2% can be added to readings. Loss is very low and has no appreciable effect on the readings.

Model 390 has a molded black bakelite case, with all figures recessed in the panel and filled in white, for greater legibility. In spite of its compact size, meter is full 3" with large scale for accurate reading.

MODEL 390 Volt-Amp-Wattmeter

RANGES: A.C. Current, 60 Cycles

Shipping weight: 2 1/2 lbs.
Price, with Break-in plug and leads \$39.50

Leatherette covered carrying case, with compartment for Break-in plug and leads..... \$5.00

Genuine leather carrying case, with compartment for Break-in plug and leads..... \$8.00

Here are two Simpson A.C.-D.C. Volt Wattmeters with all the compactness and sturdiness of the Model 390 (described above) and all the construction characteristics of the entire line of Microtester portables.

Each instrument consists of two separate full-size 3" square meters, one for volts and one for watts. This arrangement permits reading volts and watts simultaneously. The separate, uncrowded scales make quick and accurate readings an easy matter.

Each meter has two ranges, selected by separate toggle switches with positions clearly indicated by white figures recessed in the molded bakelite case. The low power consumption of these instruments and their high efficiency result in negligible loss and error in reading.

These volt-wattmeters can be used on all appliances and motors within their ranges. Each has built-in cord and plug for connecting to line outlet and female receptacle for connecting the appliance under test.

RCA TEST EQUIPMENT

for SERVICE • LABORATORIES • INDUSTRY • SCHOOLS

AM-FM DYNAMIC DEMONSTRATOR (WE-82A)

Frequency Range 550 to 1800 kc
 AM i-f 455 kc
 FM i-f 10.7 Mc
 AM Sensitivity 200 microvolts
 Power Supply 105/125 volts, 50/60 cycles
 Dimensions 45" w; 33" h; 6" deep
 Weight 25 lbs.

A working schematic diagram of a typical 5-tube superheterodyne radio. Parts are mounted near proper symbols; wired to operate. Pin jacks on 5 color sections make experiments, described in instructions, easy to perform. Additional tube and discriminator circuit included to show FM. Sugg'd User Price: \$149.50.

FM SWEEP GENERATOR (WR-53A)

I-F Oscillator:
 Frequency Range 8.3 to 10.7 Mc
 Output 1 microvolt to 0.1 volt
 R-F Oscillator:
 Frequency Range 85 to 110 Mc
 Output 5 microvolts to 0.1 volt
 Power Supply 105/125 volts, 50/60 cycle
 Finish (Case) Blue-Gray
 (Panel) Anodized Aluminum
 Dimensions 13 1/2" w; 9 1/4" h; 7 1/2" deep

Designed especially for rapid and accurate alignment of FM receivers. Produces an i-f sweep frequency of 0 to 200 kc adjustable band width, which can be centered on any i-f from 8.3 to 10.7 Mc. Also has CW or AM signal in 85 to 110 Mc range for oscillator and mixer alignment. Sugg'd User Price: \$162.50.

AUDIO OSCILLATOR (WA-54A)

Frequency Range 20 to 17,000 cycles
 Distortion under 5% (rms) entire range
 Hum Level 60 db. below max. output
 Power Output 125 milliwatts
 Power Supply 105/125 volts, 50/60 cycles
 Finish (Case) Blue-Gray
 (Panel) Anodized Aluminum
 Dimensions 13 1/2" w; 9 1/4" h; 7 1/2" deep
 Weight 22 lbs.

Continuous tuning 20 cycles to 17 kc with practically constant output. Output matches 250, 500 ohm line, or high impedance circuit. Ideal for testing speakers, acoustical response, measuring modulation, receiver fidelity, or audio amplifier frequency response. Sugg'd User Price: \$152.50.

TEST OSCILLATOR (WR-67A)

Frequency Range 100 ke to 30 Mc
 R-F Output up to 1 volt
 Modulation Frequency 400 cycles
 A-F Output 25 volts
 Power Supply 105/125 volts, 50/60 cycles
 Dimensions 13 1/2" w; 9 1/4" h; 7 1/2" deep
 Finish (Case) Blue-Gray
 (Panel) Anodized Aluminum
 Weight 15 lbs.

Three fixed frequencies, 455, 600, 1500 kc in addition to tuning range, enable fast alignment. Signal injection probe permits use of r-f, i-f or audio test signals to any part of a set with maximum speed and simplicity. Dual attenuation from minimum leakage low output up to 1 volt eliminates changing cable connections. Sugg'd User Price: \$89.50.

RIDER CHANALYST (162-C)

R-F, I-F range 100 ke to 1700 kc
 attenuation 10,000 : 1
 Osc. channel range 60 kc to 15 Mc
 attenuation 10 : 1
 A-F range 0.1 volt to 1000 volts
 DC range ± 5, 25, 125, 500 volts
 Wattage indicator 30-250 watts
 Power supply 105/125 volts, 50/60 cycles
 Dimensions 16" w; 9" h; 10 1/4" deep
 Weight 28 lbs.

Can be used to quickly check presence, absence or character of signal at any point in any AM receiver. Enables serviceman to determine wattage, voltage and signal level thruout the set. All tests can be made simultaneously for monitoring intermittent receivers. Sugg'd User Price: \$162.50.

All prices in effect 3/1/48.

RCA LABORATORY MEASURING EQUIPMENT

AUDIO VOLTMETER (WV-73A)

Voltage (AC) 0.001 to 1000 volts
 Frequency Range 20 to 20,000 cycles
 Input Impedance 1 megohm and 25 μ ohm
 Power Supply 105/125 volts; 50/60 cycles
 Dimensions 13 1/2" w; 9 1/2" h; 7 1/4" deep
 Weight 15 lbs.
 Finish (Case) Blue-Gray
 (Panel) Anodized Aluminum

Ideal for measuring voltages in high-impedance circuits. Logarithmic scale and overlapping attenuator assure accuracy even when pointer is at either end of scale. Excellent frequency response. Sugg'd User Price: \$175.00.

ADVANCED VOLTOHMYST (WV-75A)

DC (6 ranges) 0 to 1000 volts
 AC (6 ranges)
 Using probe directly 0 to 100 volts
 Using probe and multipliers 0 to 1000 volts
 Frequency Response:
 Using probe directly 30 cycles to 250 Mc
 Using probe and multipliers 30 cycles to 15 kc
 Input Impedance (using probe directly):
 At 1 Mc 625 Kilohms; 15.6 μ ohm
 Resistance (6 ranges) 0 ohms to 1000 megohms
 Power Supply (AC) 105/125 volts; 50/60 cycles
 Dimensions 6 1/2" w; 9 1/2" h; 6 1/4" deep

For High-Frequency, FM and TV measurements. Newly developed diode probe permits peak-to-peak AC voltage readings to 250 Mc. WV-75A is really 6 instruments: VHF Voltmeter, Audio Voltmeter, AC Voltmeter, DC Voltmeter, Ohmmeter, FM Indicator. Meter is burn-out proof. The WV-75A employs a push-pull DC Vacuum Tube Voltmeter circuit characterized by excellent linearity and stability. Sugg'd User Price: \$125.00.

ULTRA-SENSITIVE DC MICROAMMETER (WV-84A)

Readings 0.001 μ a to 1 μ a full scale
 Six Ranges 0.01; 0.1; 1.0; 10; 100; 1000 μ a
 Voltage Drop full scale 0.5 volts
 Power Supply (Batteries) 2-1 1/2 volts A (RCA VS100)
 2-2 1/2 volts B (RCA VS102)
 Dimensions 6 1/4" w; 9 1/2" h; 5 1/2" deep
 Weight (including batteries) 9 1/2 lbs.

Reads from 0.001 to 1000 microamperes in six separate ranges. Useful for measuring high values of resistance; may be used as high resistance voltmeter. Approaches galvanometer sensitivity. Electronic protected non-burn-out meter. Accuracy, 0.01 range, \pm 5% of full scale reading; other ranges \pm 4%. Ideal for weak-current measurements in phototubes, multiplier phototubes, etc. Sugg'd User Price (less batteries): \$100.00.

INDUSTRIAL OSCILLOSCOPE (WO-60C)

Deflection Sensitivity:
 Vertical Amplifier 0.056 p-to-p volts/inch
 Horiz Amplifier 0.67 p-to-p volts/inch
 Input Impedance:
 Vert or Horiz Amp 1 meg shunted by 22 μ ohm
 Frequency Response:
 Sine Wave Flat \pm 10%; 5-80,000 cycles
 Flat \pm 20%; 2-100,000 cycles
 Square Wave No tilt or overshoot 20-5000 c
 Sawtooth Time Base 3 to 30,000 cycles/sec
 Power Supply 105/125 volts; 50/60 cycles
 Dimensions 9 1/2" w; 14" h; 19 1/2" deep

Portable scope with wide variety of uses. Excellent phase-shift characteristics, 1-f response. Holds high sensitivity even with violent shock. Designed for fast changeover from one type persistence C-R tube to another. Useful range 0.5 to 300,000 cycles. Sugg'd User Price: \$345.00.

PORTABLE OSCILLOSCOPE (WO-79A)

Frequency Range:
 Vertical Amplifier 10 cycles to 5 Mc
 Horizontal Amplifier 10 cycles to 500 kc
 Deflection Sensitivity:
 Vert. Amplifier 0.5 peak-to-peak volts/in
 Horizontal Amplifier 1.3 peak-to-peak volts/in
 Sawtooth Time Base 20 cycles to 250 kc/sec
 Triggered Time Base Repetition to 50 kc/sec
 Blanking Return trace blanked on triggered definition
 Power Supply 105/125 volts; 50/60 cycles
 Dimensions 8 1/4" w; 14 1/2" h; 16 1/4" deep

For detailed observation and accurate measurement of voltages produced by TV synch. and deflection circuits, ignition systems, pulse generators, etc. Wide horiz. deflection—up to twice screen diam. Calibrated meter for voltage measurements. Built-in delay line. Triggered sweep. Sugg'd User Price: \$550.00.

LABORATORY OSCILLOSCOPE (715-B)

Vertical amplifier flat to 11 Mc. Triggered and linear sweep. One microsecond markers. Sugg'd User Price: \$2400. Write for catalog.

DC OSCILLOSCOPE (WO-27A)

Both vertical and horizontal amplifiers flat from 1000 to 100,000 cycles. 5" C-R tube, quickly interchangeable. Sugg'd User Price: \$1150.

All prices in effect 3/1/48.

★ Simpson

SIMPSON ELECTRIC CO.

INSTRUMENTS THAT STAY ACCURATE

MODEL 260 Set Tester

World's Most Popular
High Sensitivity Set Tester
For Radio and Television

The popularity of this famous high sensitivity set tester is increasing every day. And it has always out-sold every similar test instrument in the field. As always, you cannot today touch its useful ranges, its precision, or its sensitivity in any other instrument of equal price or selling for substantially more.

You need only remove Model 260 from its handsome case of black, molded bakelite to see how it differs from other set testers. Look at the sub-panel—here are a score of small recesses, each holding a separate resistor or pairs. All connections are short and direct, eliminating the need for cable wiring. Here is a kind of strength and firmness of assembly you will not see elsewhere. The finest of insulation to reduce chances of shorts, the highest degree of accessibility of components. The front panel shows similar refinements: pin jacks firmly set into molded recesses so that there are no exposed metal parts; all figures and symbols molded into the heavy bakelite panel, then filled with white, so that they have greatest legibility and long wearing qualities.

At 20,000 ohms per volt, this instrument has no equal in its price class or in many instruments of much higher price. Its practically negligible current consumption assures remarkably accurate full scale voltage readings. It provides D.C. current readings as low as 1 micro-ampere and up to 10 amperes. Resistance readings are equally dependable. Tests up to 20 megohms and as low as 1/2 ohm can be made. With this super sensitive instrument you can measure automatic frequency control diode balancing circuits, grid currents of oscillator tubes and power tubes, bias of power detectors, automatic volume control diode currents, high-mu triode plate voltage and a wide range of unusual conditions which cannot be checked by ordinary servicing instruments

RANGES

◆ MODEL 260 Set Tester In Roll Top Safety Case

We take Model 260, place it inside a housing of heavily molded bakelite, and permanently faster: it there. Instrument and case become one unit. Beneath the instrument is a compartment for test leads. Over instrument's face a roll top (of molded bakelite, too) slides up to open, down to close, the case. A flick of the finger rolls the top up and out of sight and instrument is ready to use. A downward flick, and the instrument is closed, ready to carry, and fully protected.

Simpson

INSTRUMENTS THAT STAY ACCURATE

MODEL 330 Mutual Conductance Tube Tester

Tube manufacturers consider that a radio tube has reached the end of its usable life when it falls to a certain percentage of its rated value.

The new Simpson Model 330 tests tubes in terms of percentage of rated dynamic mutual conductance—a comparison of the tube under test against the standard rate micromho value of that tube. The colored zones on the dial coincide with the micromho rating or the percent of mutual conductance, indicating that the tube is good, fair, doubtful or definitely bad. Thus, at a glance, you can check the tube against manufacturers' ratings. If it becomes desirable to know the actual value in micromhos, the percentage reading may be easily converted.

Tubes are tested with voltage applied automatically over the entire operating range, reproducing more completely than ever before the actual conditions under which a tube functions in a radio set.

Besides this revolutionary new method, Simpson offers you an equally revolutionary switching arrangement. The circuit is so arranged that, even though there are numerous combinations possible, very few switches require moving to test any one tube. Many of the popular tubes are tested in the "normal" position without moving any of the nine tube circuit switches.

Ten push button switches and nine rotating switches of six positions each provide infinite combination in tube element and circuit selection. Only a few settings are necessary for the most complicated tube. The tube chart provided is arranged for quickly identifying the tube and setting the controls.

When you have finished a tube test, the Automatic Reset takes over to speed and simplify the next test. Just press the reset button and instantly all switches, both push button and rotary, return to normal automatically!

Dealer's Net Price \$118.50

- Panel—Molded bakelite, satin grained finish. Characters, numerals, and dial divisions engraved and filled in white, insuring long wearing qualities.
- Meter—4½" w/h four-colored dial indicating good, fair, doubtful, and bad—also "Percentage of Mutual Conductance" scale.
- Sockets provided for all types of tubes including acorn tube, 9-pin miniature, also sub miniature.
- Neon glow tube to indicate shorted tubes.
- New simplified switching arrangement (see above).
- Tube chart arranged for quickly identifying the tube and setting controls.
- Tests tubes with voltage applied automatically over the entire operating range, under conditions approximating actual operation in radio set.
- Case—sturdy fabricoid covered plywood. Removable cover with slip type hinges.

Dealer's Net Price .. \$137.50

MODEL 330 RCP (Roll Chart, Portable)

Dealer's Net Price .. \$132.50

MODEL 335 Plate Conductance Tube Tester

Another Simpson innovation, the Model 335 tests tubes today's way—under conditions simulating actual use in a radio set. The dial indicates percentage of rated plate conductance. With a minimum of settings a percentage reading is quickly obtained which, for all practical purposes, is a true percentage of the tube's rated value.

Regardless of tube load, filament voltages are maintained practically constant automatically. Each tube element is individually connected to proper potential. Reliable short test is provided. Diodes tested on low voltage. Automatic reset switch clears way quickly for the next test.

All standard tube sockets are available, and additional space is provided for new sockets. Every socket connection, and all grid leads, are connected through separate switches to provide for future tubes.

Model 335 is housed in a handy portable case, with panel and switches of molded bakelite. Meter proper is large 4½" size for easy reading.

With Simpson "No Backlash" Roll Chart

Simpson

INSTRUMENTS THAT STAY ACCURATE

MODEL 555 Tube Tester

Here is a tube tester Simpson engineered to test all tubes for today's radio receivers and any that may come to market within the foreseeable future. It is outstanding in its simplicity of operation and its attractive appearance.

Using the basic RMA recommended circuit, it is possible to test any tube regardless of its base connections or the internal connections of its elements through the use of the new exclusive Simpson three-position lever-operated toggle switches. These new Simpson toggle switches use a molded rotor carrying silver plated contacts which are self-cleaning through their wiping action. Switches snap firmly into each position, yet move easily, due to inset spiral-spring-and-ball-bearing.

The Model 555 will test all receiving tubes, including the latest nine pin miniature tubes and the subminiatures as used in hearing aids, etc. Extra sockets are provided and the flexible individual element switching arrangement takes care of any future tube developments. The special Simpson acorn tube socket with floating contacts assures positive contact with insurance against damage to the delicate prong construction of acorn tubes. Tests can also be made on gaseous rectifiers, pilot lamps and continuity of ballast tubes.

No adapters or special sockets are required. Damage to tubes by plugging into the wrong socket is elim-

inated through the use of only one socket for each tube base type. This tube tester is properly fused and provides for line adjustment from 100 to 230 volts with smooth vernier control.

The Panel of Model 555 is distinguished by beautiful modern styling in the shining silver and black of highly polished, enduring, anodized aluminum. Case of handsome leatherette.

The SIMPSON "NO-BACKLASH" Roll Chart

The Simpson "No-Backlash" Roll Chart is so exactly everything a roll chart should be that we are proud to place it on our tube-testers. It is truly a precision chart.

The exclusive "No-Backlash" feature automatically takes up the slack in the paper chart and, by keeping the chart in constant tension, makes it impossible to turn the selector wheel without moving the chart. This results in precision selection at all times. The "No-Backlash" feature also prevents the paper chart from tearing and getting out of alignment, and presents at all times a neat, flat reading surface. Because of the ratio to which the selector wheel is geared up, tube selections can be made with a minimum of effort.

The whole Roll Chart mechanism is securely fastened to the instrument panel. Easy removal of the panel screws gives quick access to the chart so that new information may be written on the roll sheet easily and conveniently. Also, when the time comes for

the substitution of an entirely new chart, this may be done in a matter of minutes.

Further than this, the ingenious way in which the chart is fastened to the rollers adds to the ease of replacement and prevents the chart from getting out of alignment.

Everything has been done to make the tube-settings as easy to read as possible. In addition to the neat, flat reading surface made possible by the "No-Backlash" feature, the Lucite window is just wide enough to show 2 tube settings or both settings on a multi-purpose tube. Letters and figures are in clear, bold-face type.

Throughout, of course, the Simpson "No-Backlash" Roll Chart is manufactured to Simpson precision standards. Lightweight, rigid construction; gear driving mechanism that incorporates heavy duty precision gears and parts; roll chart paper of high tensile strength - all these contribute to making this the finest roll chart ever to be built for a tube tester.

SIMPSON MODEL 445 Tube and Set Tester with the famous Simpson "No-Backlash" Roll Chart

SIZE: 16" x 12¹/₂" x 6³/₄". WEIGHT: 9 LBS.
 SHIPPING WEIGHT: 12 LBS.

Dealer's Net Price.....\$128.50

Model 445 combines a 20,000 ohms per volt Set Tester and a Plate Conductance Tube Tester. The tube tester dial indicates percentage of rated plate conductance which can also be considered as percentage of mutual conductance since, in most cases, the amplification factor remains constant. When a tube test is finished the Simpson Automatic Reset mechanism clears the meter for the next test, returning all switches, both push button and rotary, to normal automatically. Sockets for all types of tubes are provided, including the new 9-pin miniature; also the sub-miniature as used in hearing aids, etc.

The volt-ohm-milliammeter set tester provides the ranges that have made the Simpson Model 260 the most famous set tester in the world.

RANGES

Volts (20,000 ohms per volt D.C., 1000 ohms per volt A.C.): 0-2.5, 10, 50, 250, 1000, 5000.	Output (A.C.) volts: 2.5, 10, 50, 250, 1000, 5000.
Milliamperes (D.C.): 0-10, 100, 500.	Ohms: 0-2000 (12 ohms center); 0-200,000 (1200 ohms center); 0-20 megohms (120,000 ohms center).
Microamperes (D.C.): 0-100.	

Simpson

INSTRUMENTS THAT STAY ACCURATE

All the functions of over 60 separate instruments combined in one unit!

SIMPSON MODEL 1005 ELECTRICAL LABORATORY

Here is a complete test unit for use by radio, electronic, and electrical technicians in laboratories, shops, or service departments. It consists of six individual 4 1/2" rectangular instruments, each with a complete set of ranges.

In addition to the wide variety of A.C. and D.C. voltage and current ranges, a multi-range ohmmeter and a signal phase wattmeter have been incorporated. Also, to meet the need for extreme sensitivity required in testing circuits where only a small amount of current is available, an instrument is provided with a sensitivity of 50 micro-amperes, providing 20,000 ohms per volt on all D.C. voltage ranges. The Electrical Laboratory incorporates a rectifier type instrument for measuring A.C. voltage with a resistance of 1,000 ohms per volt on all

ranges. This latter instrument also has in combination a complete coverage of DB ranges from minus 10 to plus 54 for volume indications.

The Electrical Laboratory is adaptable for testing all electrical appliances, small motors, circuits, radio sets, etc. All of the instruments are indirectly illuminated, and all lights are controlled by one switch located at the right side of the panel. The panel is of lustrous, long-wearing anodized aluminum. Cabinet is natural finish birch, with lock-joint construction. Two compartments for accessories and instructions, with hinged doors, are located at the base of the cabinet. All connections are made to binding posts located on the panel. Test leads and Break-in plug are furnished.

MODEL 321 Giant Set Tester A New and Better Version of An Old Favorite

A giant in size and in performance, the Model 321 Set Tester incorporates 50 ranges. It's an old favorite among radio service men, further refined by Simpson to make it more useful than ever. It is ideally suited for either bench use or panel mounting.

The meter proper is large 7" size, housed in an attractive molded bakelite case. All D.C. scales are in black and A.C. scales in red, to simplify reading. Knife edge pointer insures correct determination of values. The panel is of black anodized aluminum, with silver etched characters, excellently arranged for quick selection of ranges. The range selector is fitted with a large, easy-to-operate bakelite handle. Cabinet is of steel with black wrinkle finish.

Test leads, insulated for 3000 volts, are furnished with each instrument. All voltage ranges both A.C. and D.C. have a resistance of 1000 ohms per volt.

RANGES

Volts: (Both A.C. and D.C.) 0-3, 7.5, 30, 75, 150, 300, 750, 1500, 3000
 All A.C. volt ranges available for output measurement
 Milliampers: (D.C. only) 0-1.5, 7.5, 15, 75, 300, 750
 Amperes: (D.C. only) 0-15

Ohms: 0-2000 (22 ohms center)
 0-20,000 (220 ohms center)
 0-200,000 (2200 ohms center)

MODEL 266 Vacuum Tube Voltmeter

Here is a vacuum tube voltmeter that offers the extreme accuracy modern electronic engineering demands. It is another new development—another new triumph of Simpson designing and manufacturing skill. It covers a wide range, and the high accuracy at 100 megacycles makes this instrument wholly suited for the new FM band.

The D.C. input circuit is well filtered so that the presence of superimposed alternating currents does not affect the D.C. measurements. A zero center switch is provided for discriminator circuit alignment, a feature which embraces all D.C. voltage ranges. The D.C. volt input resistance ranges from 50 megohms to 200 megohms; A.C. volts input impedance at 60 cycles is 40 megohms.

Special probe furnished for work on RF voltages has been designed to reach hard-to-get-at connections more easily; probe has input capacitance of approximately 4 micro-microfarads. Primary of the power transformer is well regulated, holding close control over filament as well as plate voltage.

Model 266 is housed in a handsome hardwood case, with sloping panel of anodized aluminum. Compartment for leads in rear of case. Large meter provides quick, accurate reading.

RANGES

Volts: (A.C. and D.C.) 0-1, 5, 10, 50, 100, 250, 500, 1000, 5000
 Milliampers: (D.C.) 0-1, 5, 10, 50, 100, 250, 500
 Amperes: (D.C.) 0-10

SIMPSON ELECTRIC CO.

INSTRUMENTS THAT STAY ACCURATE

New! Simpson Wide Range Signal Generator for A.M. and F.M. MODEL 415A WITH BUILT-IN SWEEP CIRCUIT

Model 415A Signal Generator incorporates all of the features of Model 415 and in addition has a built-in sweep circuit for alignment of FM receivers. The AM bands cover a complete frequency range 75 KC to 130 MC and the FM bands, 75 KC to 115 MC. A wide sweep of 1 MC is provided, which is more than adequate for FM alignments with synchronization potential for locking in scope trace. Used with an oscilloscope, Model 415A is the correct answer to FM servicing.

General Specifications of MODELS 415A and 415

1. Direct reading dial with continuous coverage from 75 Kilocycles to 130 Megacycles in the following ranges: 75-200; 200-600; 550-1800 Kilocycles and 1.7-4.2; 5-16.51; 16-32; 31-65; 62-130 Megacycles. Fundamental to 65 MC.
 2. Model 415 is practically independent of line voltage fluctuation. Calibration is stable regardless of wide variations in line voltage.
 3. RF output is controlled through its entire range, eliminating the necessity of a separate connection for high uncontrolled output as found in other signal generators.
 4. RF Output Voltage is practically constant throughout the entire frequency range.
 5. Modulation from 0 to 100% using either the 400 cycle internal sine wave or an external source. A range from 0 to over 9 volts of 400 cycle sine wave is available for external use.
 6. High fidelity modulation up to 100% from below 60 cycles per second to over 10 Kilocycles per second.
 7. No unwanted frequency modulation present.
 8. Each Signal Generator is individually calibrated against a crystal controlled frequency standard.
 9. Substantial construction assures maintenance of calibration accuracy indefinitely.
- PANEL**—Lustrous black anodized aluminum. Dial is encased in a molded bakelite escutcheon with glass covering for protection against damage and dirt. Fundamental switches and controls are mounted on engraved molded bakelite panels.
- CASE**—Steel, copper plated for shielding effect and finished in gray durable wrinkled enamel. Leather carrying handle.
- SHIELDING**—In addition to the overall shielding offered by the case and panel, the coils and tuning condenser are individually shielded, then an additional shield is placed over these two assemblies. This series of shields together with other factors reduce leakage to an absolute minimum.

COILS—Low loss RF coils are individually calibrated by means of variable inductance and variable minimum capacitance. These adjustments provide the means for greatest possible accuracy in calibration.

BAND SELECTOR—The rotating turret coil assembly permits the use of shortest possible wiring, resulting in minimum circuit capacitance and permits quick selection of any frequency range.

CONDENSER—A two section tuning condenser using either one section or the other provides for ideal inductance to capacity ratio on all bands. Smooth vernier tuning permits accurate adjustment of the selected frequency.

For 105-130 volts, 50-60 cycle

MODEL 340 Signal Generator . . . 75 Kilocycles to 120 Megacycles

The Model 340 Signal Generator is designed down to the most minute detail for highest accuracy, greatest stability, minimum leakage and good wave form. Big nine-inch meter type dial, with knife edge pointer, gives high readability. Smooth vernier control permits close settings.

CIRCUIT—Electron coupled circuit assures extreme stability and output uniformity throughout the band. Three tubes are utilized in the circuit—full wave rectifier, modulator and oscillator. Standard 30% modulation at 400 cycles is used.

OUTPUT—Signal is controlled through an ingenious step attenuator of the ladder type. Volume level of each step is regulated by a smooth non-inductive control. Special jack is provided for high output specially desirable on the 120 MC band.

BANDS—RF coils provide ranges of 75-220; 200-600; 550-1700; and 1.5-4.5; 4.2-14; 9-30; 36-120 megacycles. Fundamentals to 30 MC. Direct reading dial to 120 MC. Coils designed to retain original inductance regardless of temperature or humidity changes. Special switch automatically eliminates "dead spots."

SHIELDING—Coils, attenuator and signal selector, individually shielded. Oscillator and modulator assemblies sealed in rigidly welded, entirely enclosed chassis. Effective line filter used. Even line cord is shielded. Result: leakage is negligible.

CALIBRATION—Each coil individually calibrated to close tolerances against crystal standards by means of variable inductance and variable minimum capacitance. Tests show negligible changes over long periods of time with extreme temperature and humidity variations.

PANEL—Lustrous black anodized aluminum. Dial is encased in a molded bakelite escutcheon with glass covering for protection against damage and dirt.

CASE—Steel, copper plated for shielding effect and finished in gray durable wrinkled enamel. Leather carrying handle.

For 105-130 volts, 50-60 cycle

Model 630

MODEL 630 VOLT-OHM-MIL-AMMETER

A Beautiful, streamlined Tester that is simple to operate. Only one switch—selects both circuit and range. A really new selector switch, completely enclosed and protected. Eliminates loss between contacts. Retains contact alignment permanently. Molded construction keeps dirt out. Unit construction—resistors, shunts, rectifiers, batteries—all housed in a molded base integral with the switch. All resistors are Precision Film or Wire-wound types—sealed for permanent accuracy, each in separate molded compartment. Large 5½" meter (RED • DOT Lifetime Guaranteed), black and red scale markings. Batteries easily replaced—double-spring tension grip assures permanent contact. Pre-calibrated rectifier. Molded black case, 3⅞" x 5½" x 7½", with removable leather strap handle. Black molded panel with white markings.

MIRROR SCALE VOLT-OHM-MIL-AMMETER

Widest range tester of its type with additional brand new features: Long 5" mirror scale for better reading accuracy; Resistance ranges to 40 Megohm; Low Ohm Range 0-2000 (12 ohms center scale); D. C. Volt ranges with dual sensitivity (10,000/20,000 Ohm/Volt) provide double the number of full scale readings of average testers. A. C. Volt ranges at 10,000 Ohm/Volt permit checking many audio and high impedance A. C. circuits where a vacuum tube voltmeter usually is required. Low voltage ranges permit direct measurement of many bias and output voltages. Special film type resistors provide greater stability on all ranges.

6" RED • DOT Lifetime guaranteed meter. Long mirror scale guarantees greater reading accuracy. Insulated, black molded case with removable strap handle, 2½" x 5½" x 6". Molded black panel with white markings. Leads and instructions furnished.

Weight: Approx. 3 lbs.

POCKET-SIZE VOLT-OHM-MILLIAMMETER

A precision-manufactured marvel of compactness that provides a complete miniature laboratory for D. C. and A. C. voltage, Direct Current and Resistance analyses. Its many ranges, attractive appearance and other unique features provide an answer to the Volt-Ohm-Milliammeter requirements of radio service-men and amateurs, industrial engineers, laboratory technicians, etc. Refinements in design feature:

Greater scale readability on the 3" RED • DOT Lifetime guaranteed instrument with black and red scale markings.

Simplified switching provides greater ease in changing ranges.

Lower jack contact resistance and trouble-free plug-in connections by use of banana-type jacks. Banana jacks at top of panel reduce possibility of connecting leads over panel controls or meter scales.

Greater stability on voltage ranges by use of special resistors throughout and on current ranges by use of 250 M. V. instrument.

TUBE TESTER

CONCLUSIVE tube tests for value, inter-element shorts and leakage. FULLY-BALANCED, MULTI-PURPOSE CIRCUIT: with accurately calibrated values for all makes of tubes—more than an emission test in the special switching flexibility.

AN APPLIANCE CHECK lead permits "short" and "continuity" test of motors, leads, resistance elements, etc. NEON SHORT TEST shows slightest inter-element short or leakage while cathodes are hot. NEW 3-POSITION LEVER SWITCHES give individual control for each tube element. (See center panel.)

TUBES TESTED—All receiving types, gaseous rectifiers, resistor and ballast tube continuity, and pilot lamps. SOCKETS: 4, 5 and 6 prong; 7 prong large and small with combination for pilot lights and flashlight bulbs; 8 prong octal; 8 prong octal; 5 prong bantam; 7 prong miniature; 7 prong subminiature; and 9 prong. Only one socket used for each tube base type eliminating possibility of plugging into the wrong socket.

LINE VOLTAGE INDICATOR permits observation and adjustment for line fluctuations. FILAMENT VOLTAGES (Full Range)—0.75 to 110 Volts in 19 steps. 6" meter with RED • DOT Lifetime guarantee, has 3-color GOOD-?-BAD scale. Brightly illuminated SPEED ROLL TUBE CHART located with markings below switches for convenience in testing. New tubes can be calibrated without manufacturers' data.

COUNTER-PORTABLE Type Case, metal, 15 1/2" x 11 1/2" x 6 1/2", finished in attractive baked-on "hammered" tan enamel. Panel with brown markings. Power supply—115 Volt, 50-60 cycle A. C.

- MEG OHMS: 0-1-50 (10,000-500,000 Ohms at center scale)
- OUTPUT: Output Jacks, condenser in series with A. C. ranges.

TUBE TESTER-VOLT-OHM-MIL-AMMETER—A Combination Tester for conclusive tube testing and complete voltage, current and resistance analyses. Tube Tester has a fully-balanced, multi-purpose test circuit for emission, short and open element tests. See Model 3413 for complete details. GOOD-?-BAD tube testing and Volt-Ohm-Mil-Ammeter ranges are easily readable on the 6" RED • DOT Lifetime Guaranteed meter with multi-color scale. Volt-Ohm-Mil-Amp. markings are black on white except A. C. are red and 0-1000 Ohms are green.

Triplet lever switching makes possible an exclusive combination of tube testing advantages including: maximum circuit flexibility, simplicity of operation and anti-obsolescence design.

1. Thorough test of all tube elements.
2. Individual control of each tube element.
3. New tube test data can be set up without delay.
4. Lever switching is faster and more accurate.
5. No plugging into wrong socket.
6. Minimum number control settings needed.

COUNTER-PORTABLE Type Case, metal, has highly attractive two-tone "hammered" baked-on enamel finish, 15 1/2" x 11 1/2" x 6 1/2". Detachable hinged cover, strap handle.

Weight: 25 lbs.

SENSITIVE VOLT-OHM-MIL-AMMETER

20,000 OHMS PER VOLT

Model 2405 A

- D. C. VOLTS: 0-10-50-250-500-1000, 20,000 Ohm Volt
- D. C. AMPS: 0-10, at 250 Millivolt
- D. C. MILLIAMPS: 0-1-10-50-250, at 250 Millivolt
- D. C. MICROAMPS: 0-50, at 250 Millivolt
- A. C. VOLTS: 0-10-50-250-500-1000, 1000 Ohm Volt
- A. C. AMPS: 0-0.5-1.5-10, at 1 Volt-Amp
- OHM-MEGHOM: 0-1000-40,000 Ohms — 0-4-40 Meg. (Self-contained batteries.)
- OUTPUT: Condenser in series with A. C. Volt ranges
- DECIBELS: -10 to +15, +20, +33, +49, +55. (Reference Level "0" DB at 1.73 V. on 500 Ohm line.)
- CONDENSER TEST: Capacity check of Paper condensers

A perfect combination—ultra sensitive, extra large meter, impressively cased for either shop or portable use. Incorporates the ultimate sensitivity, 20,000 ohms per volt in a conventional meter of extreme accuracy.

6" Meter, RED • DOT Lifetime guarantee. 5 1/4" long scale enables easy reading. Plug-in, pre-calibrated rectifier simplifies replacement. Ruggedly constructed selector switch, "OHMS ADJUST" provides adjustment for all resistance ranges with maximum accuracy. Connections made through low contact resistance banana jacks, "SQUARE LINE" case, 10" x 10" x 5 1/4", tan enamel finish has detachable, hinged cover. Leads and instructions furnished.

Weight: Approx. 11 lbs.
MODEL 2405-A.....\$59.75

HIGH VOLTAGE PROBES

For measuring the high voltage employed in television receivers and in other applications, external probes are available for ranges from 10,000 to 30,000 D. C. Volts for Models 625-NA, 630, 666-HH, 2405-A and 2451. Specify Tester Model when requesting quotations or ordering.

The completely insulated Polystyrene test probe contains the voltage dropping resistors high stability composition type, protected from moisture with a sealed-in covering of Silicone high voltage insulating compound. An additional safe-guard is the guard-type handle. Each lead consists of a 3/8-inch high voltage wire with probe at one end and banana plug on the tester end. Probe is 11 3/4" long.

PORTABLE V-O-MA SHUNTS

Portable, external shunts as high as 120 Amps. are available to extend the current ranges of testers including Models 625-NA, 630, 666-HH, 2405-A and 3480. Shunt must be ordered for the specific tester with which it is to be used because of spacing and millivolt drop. Plug-in type connections are made by plugging shunt into the tester MA terminals. Connections for Portable shunts are made by using 12" leads. Quotations upon request.

TO EXTEND OHMMETER RANGE MODEL 666-HH

A plug-in ohmmeter multiplier for Model 666-HH. Compact tubular insulator with resistor, battery and plug. Will extend Model 666-HH Ohmmeter range to 4 megohms.

No. 9467..... DEALER NET \$3.85

APPLIANCE TESTERS

VOLTS - AMPS - WATTS

ELECTRICAL CIRCUIT ANALYZER of new advanced design for measuring the power wattage, current consumption, and line voltage of all household appliances and small motors under actual operating conditions. Just the tester for watt, current and volt analyses of electric refrigerators, washers, radios, ironers and other appliances, including ranges operating on 220-Volt single phase three-wire and three phase three-wire systems. Power used by the smallest appliance is readily checked on the extremely low scale

Model 2470

range of 0-20 watts (fused to prevent damage from accidental overload). All switches and leads are ample to carry full load continuously.

RANGES

- A. C. WATTS: Single-Phase, 130 V.—0-10-20 50-500-1000-2000 Single-Phase, 260 V.—0-20-40 500-1000-2000-4000 Three-Phase, 260 V.—0-80-7000-4000-0-000

DUAL-METER TESTERS

Models

2002 and 2000-A are real helpers for installations and servicing. Show power consumption of industrial equipment, radios, electric ranges, refrigerators, washers and other household appliances under actual running conditions, on either D. C. or A. C. between 25 and 133 cycles. Checks Watts and Volts simultaneously! Shows if voltage remains within limits under operating loads. Simple operation, clearly marked switches, easy reading long Twin meter scales. Leather carrying case, 6 1/2" x 4 1/2" x 3 1/4", with strap handle, has flap cover to protect meter which is fixed in the case. Space for leads. Leather case eliminates possibility of scratching enamel appliance finishes.

TEST OSCILLATOR

Model 3432

RANGES

A—165-525 KC	E—18-40 MC	Harmonics to 120 MC
B—500-1750 KC	E2—36-80 MC	
C—1700-6200 KC	E3—54-120 MC	
D—6-18.5 MC		

A wide-range oscillator with uniformly illuminated dial. Seven long scales with widely separated divisions easily read, have five fundamental ranges—165 KC to 40 MC, and two harmonic ranges directly calibrated 36 to 120 MC.

Unique new feature is the brightly illuminated dial providing distinct illumination of scale markings without the least possibility of glare. Lighting also provides an "ON-OFF" indicator.

The dial is big (330°) with seven scales quickly readable at a glance. It has 10 to 1 ratio vernier tuning for ease of adjustment.

RANGE SELECTOR — 5 position follow-up coil switching with complete shielding.

R. F. SELECTOR — Provides High and Low R. F. Output.

OUTPUT ATTENUATOR — Provides fine control of R. F. Output to Coaxial output cable connector.

CIRCUIT SELECTOR — Provides for internally modulated signal (Variable 0 to 100% at 400 cycles). Variable amplitude of external modulation 40 to 15,000 cycles, unmodulated signal or variable audio 0-10 Volts at 400 cycle.

DOUBLE SHIELDING—All R. F. and audio circuits are double shielded with copper plated steel shields.

Metal case, 15 $\frac{1}{2}$ " \times 11 $\frac{1}{2}$ " \times 6 $\frac{1}{4}$ ", with tan enamel finish. Has leather strap handle for ease in carrying. Power: 115 volt, 50-60 cycle A. C. (electrostatic shielded transformer).

Weight: 14 $\frac{1}{2}$ lbs.

MODEL 3432.....U. S. A. DEALER NET \$69.50

A.M.-F.M. SIGNAL GENERATOR

FM-AM Signal Generator with frequency coverage from 100 KC to 120 MC in 10 bands; plus additional 50 MC from fixed oscillator giving fundamental coverage continuously variable to 170 MC.

OUTPUT — 1 volt on low ranges from 100 KC to 20 MC and approximately 250,000 Microvolts on the high ranges.

SWEEP WIDTH VARIABLE IN THREE RANGES
60KC (+30 KC) 300KC (+150KC) 600KC (+300KC)

Other outstanding engineering features include: (1)—Deviation control of a fixed frequency reactance modulated oscillator. (2)—Output Meter for measuring relative R. F. output of generator. (3)—Double copper plated steel shielding throughout greatly minimizes R. F. leakage. (4)—Co-axial cable output lead with shielded impedance coupler for direct capacitance or balanced doublet connection. (5)—110 Volt A. C. line filter prevents leakage through power supply. (6)—Ladder attenuator with coarse and fine R. F. output adjustment. (7)—High R. F. Voltage output jack. (8)—High A. F. output available. (9)—Built-in provision for crystal oscillator calibration reference. Crystal not supplied. (10)—Air trimmer capacitor and permeability adjusted oscillator coils. (11)—Voltage regulated power supply for oscillator stability. (12)—Heterodyne Detector for frequency measurement. (13)—External A. M. modulation may be used. (14)—Attractive and easily read dial. (15)—Horizontal synchronized sweep voltage available. (16)—Best available components used throughout.

Metal case, 15 $\frac{1}{2}$ " \times 11 $\frac{1}{2}$ " \times 8 $\frac{1}{4}$ ", finished in lustrous black suede enamel with red and white panel markings. Power: 115 Volt, 50-60 cycle A. C. Weight: 25 lbs.

RADIO AMATEUR EQUIPMENT

MODULATION MONITOR

Model 3296

With this new MODULATION MONITOR for radio amateur, police and Marine radiophone use, you've solved the problem of getting maximum efficiency from your transmitter. Four separate circuits for measuring amplitude modulation: (1) Percent Modulation (average). (2) Peak Flash Percent Modulation. (3) Carrier Shift. (4) Audio Output for Headphone. Unique advantages of this new model include the following: Peak Indicator may be preset for any percent of modulation from 20-120, and provides instantaneous flash when predetermined modulation level is reached. Percent modulation meter provides rapid up and slow down swing. Plug into your A. C. line—make simple coupling to the transmitter output and the monitor is ready for operation. R. F. and A. F. stages are isolated and separated by ample shielding. Tuned input circuit is coupled to R. F. source by a variocoupler. R. F. power requirements are small.

TUNING RANGES: 1550-2950 KC (Police Band) 14,000-14,400 KC
3500-4000 KC 28,000-30,000 KC
7000-7300 KC Audio Frequency
60-10,000 CPS

CASE: Metal, with dark gray "hammered" enamel finish; overall dimensions: 15 1/2" X 9" X 8". Weight: 20 lbs. Power: 115 Volt, 50-60 cycle A. C.

MODEL 3296..... U. S. A. DEALER NET \$109.75

VU METER

DB METER

Volume Unit and Decibel Meters are used to measure sound or noise levels in amplifiers for Public Address, Theatres, Broadcasting Studios, Broadcasting Static Equipment, etc.

VU meters are used for volume level measurements — including broadcast monitoring. Internal impedance 3900 Ohms. Steady state reference 1 Milliwatt. For 600 Ohm line, 0-100% scale also —20 to +3 VU. Specify Type "A" or "B" scale.

MODEL 426 VU..... \$23.10
MODEL 426 (Illuminated). 25.10

DB Meter permits the operator to make instant adjustments to prevent sound blasting or distortion. Up 6, down 10 DB. Zero DB at 1.73 volt, 560 ohms, 6 milliwatts. Standard damping furnished unless highly damped is specified.

426 DB (Dealer Net) \$15.20
321-T, 327-T " " 13.60

HIGH RANGE D.C. VOLTMETERS FOR AMATEURS

Designed particularly for radio amateurs. High range 3" D. C. Voltmeters—1000 ohms per volt. Provided with special external metalized multipliers mounted on bakelite strip. Specify this type when ordering, or standard voltmeters will be furnished. Available 3" case, Models 321-T, 327-T:

0-2000.....	11.90	0-5000.....	12.80
0-3000.....	11.90		

FREQUENCY METER

A new band-switching, tuned Absorption type Frequency Meter covering five amateur bands. Incorporates the new germanium crystal and a D. C. Milliammeter indicator for greater sensitivity. Direct calibration on panel—no coils to change; switching permits instantaneous band change. Audio Jack is provided for monitoring of phone signals—another new feature. Fully shielded. Calibration is in megacycles in the following bands: 3.5-4 MC; 7-7.3 MC; 14-14.4 MC; 20-21.5 MC; 28-30 MC. Coil is removable and other coils may be substituted for special bands, if desired.

USEFUL FOR CHECKING: (1) Fundamental frequency of oscillating circuits. (2) Presence, order and amplitude of harmonics. (3) For parasitic oscillations. (4) Neutralization of R. F. amplifiers. (5) Standing wave ratio on transmission lines. (6) Presence of undesirable or small quantities of R. F. (7) Monitoring of phone signals.

A fully shielded unit of compact pocket size. Overall height, including coil, 7 1/2"; width 2 1/2"; depth 2 1/4". Attractive gray "hammered" enamel finish with black trim.

WATTMETERS — ELECTRODYNAMOMETER

These instruments can be used on single phase A. C. or D. C. as Wattmeters. On special order they can be made up as Voltmeters or ammeters. Instruments are self-contained to 300 Volts—10 Amperes. Over that external connection can be made. For use on frequencies up to 133 cycles per second. Available in three-inch model 361. Case dimensions same as 321-T, except for depth, 2" back of the flange (2 1/2" over studs). Wattmeters can be combined in the Triplet Twin case with a voltmeter or Ammeter. Accuracy within ±2%. Standard ranges as follows:

SENSITIVE RELAYS

Highly sensitive Triplet relays are of the D'Arsonval Moving Coil type, carefully designed to give dependable, satisfactory performance. Since relays cover such a wide field and most of them are made to special order, no standard models are listed. Each application should be accompanied with information specifying maximum and minimum currents and voltages which will pass through relay coil and contact points, etc.

R.F. AMMETERS

Triplet R. F. Ammeters are the same case size and appearance as corresponding D. C. Models. Internal couples normally furnished at prices shown. If external couples are required, please specify on order, adding \$3.70 net to price of instruments listed below. External couples only (less meter), with 2 ft. leads are \$4.70 net each.

MODEL 589-A
TUBE AND BATTERY TESTER

MODEL 564

DELUXE 5" OSCILLOSCOPE

MODEL 589-A TUBE AND BATTERY TESTER has a completely modernized circuit. The tube test sockets are not wired directly to the circuit, but, instead, pass through the patented Supreme Double Floating Filament Return Selector system which automatically re-connects all tube elements to any possible tube base arrangement. Due to the fact that any or all elements of each socket can be rotated to any desired position, only one socket of each type is necessary. Tests every type of tube from 3/4 volt to full line voltage at its correct anode potential under proper load. Tests separate sections in multi-purpose tubes. Checks all leakage, shorts, open elements and filament continuity with a neon lamp. A circuit insert is provided for checking noise, leakage, loose and bad connections.

The battery testing circuit of the Model 589-A provides the proper load at which each battery is to operate, plainly marked on the panel, for all 1.5, 4.5, 6.0, 4.5 and 90 volt portable radio types. The condition of the battery is indicated on an English reading scale.

This is the fastest and easiest tester to operate. Just "follow the arrows"—you can't go wrong. Roller type tube chart with brass gear mechanism lists tubes in logical numerical order. Each tester carries a one year free tube setting service. SUPREME engineering and construction PLUS the best materials the market affords, make the 589-A your biggest dollar value. You will be proud to own this instrument.

MODEL 563 AUDIO OSCILLATOR

The SUPREME Beat Frequency Audio Oscillator has many important service applications. It provides three output impedances of 250, 500, and 5,000 ohms; output frequency of 30 to 15,000 cycles \pm 1 db. from 30 to 10,000 cycles. Down 2 db. at 15,000 cycles; power output is 125 milliwatt; distortion less than 5% RMS over entire range; hum level—60 db. below maximum output; large ratio dial, calibrated scale 1" in length; tube complement of 2 type 6SK7, 2 type 6C5, and 1 6X5; power consumption 35 watts—fuse protection. Shipping weight 20 lbs.

MODEL 504-B COMBINATION TESTER

Model 504-B is radio's finest quality combination tube tester, battery tester, condenser leakage tester, and a 31 range push-button operated multimeter. Correctly tests all types receiving tubes with filaments from 3/4 volt to full line voltage. Uses patented Double Floating Filament Return Selector System which automatically re-connects each tube socket for any possible tube base arrangement. Due to this special circuit only one socket is required for each tube base. Tests all standard type tubes, including octals, locals, miniatures, Bantam, Jr., pilot lamps, etc. Speedy operation. Set controls from left to right—just "follow the arrows". Neon lamp checks for leakage, shorted elements, open elements and filament continuity. Pressing a button increases the sensitivity of the neon lamp to 2 meg. Circuit insert for noise test. Fast roll chart—free tube setting service for one year. Checks portable radio batteries under proper load. Checks leakage of electrolytic and electrostatic by-pass condensers. Quality of tubes, batteries, and electrolytic condensers all indicated on English reading "good-bad" scale. Multimeter section completely automatic with instantaneous push-button finger-tip control—7 ranges 0.1-5/25/100/250/500/1000/2500 D.C. volts; 5 ranges 0.1-5/10/50/250/1000 A.C. volts and output; 7 ranges 10-500 microamperes/2.5/10/50/250 mills., 1/10 amperes; 5 ranges 0.1 200/2000/20,000/2 meg./20 meg.—3.5 ohms center scale. Rectifier guaranteed—temperature compensated circuit. No external condenser required on output volts. Accuracy of calibration 2% on D.C. and 3% on A.C. Complete with batteries and detailed instructions.

SUPREME INSTRUMENTS

MODEL 576 SIGNAL GENERATOR

In the Model 576 SUPREME offers the radio service man a Signal Generator which represents the ultimate in simplicity of operation. No longer is it necessary to have an isolating capacitor dangling from the lead connected to the receiver, nor to worry about "burning out" the output transformer when using the audio output since each of these sections is isolated from damage by DC voltages by isolating capacitors. Only two dial scales—but five bands.

DESCRIPTION

Simple Operation—All ranges read on two basic scales, accurately calibrated at both ends. **Dual Tuning Ratio**—One for speed—one for vernier adjustments. **Stability**—Electron coupled circuit, impregnated iron tuned inductors and air dielectric trimmers provide the maximum frequency stability. **Guards against shift** due to line voltage, aging, temperature, and humidity. **Ladder Multiplier**—Four steps from minimum to maximum. Also, continuously variable control. **Double shielding** minimizes leakage. **Shielded line cord**. **Illuminated Hair Line Dial**.

SPECIFICATIONS

R. F. Ranges—65-205 KC; 650-2050 KC; 2050-6500 KC; 6.5-20.5 MC. **Harmonics** to 82 megacycles. **Audio Frequency**—400 cycles—voltage output continuously variable from minimum to maximum. **Internal Modulation**—R. F. Carrier modulated at approximately 50% at 400 cycles. Can be cut off to provide unmodulated signal. **External Modulation**—Jack provided for external audio modulation. **Professional Appearance**—Housed in heavy steel case; gray wrinkle finish. Supplied complete with shielded test leads and instructions. **Power Supply**—110-125 volts 50/60 cycles. Special voltage and frequency on request. **Dealer Net Cash Price** **\$68.95**

MODEL 546-A OSCILLOSCOPE

Model 546-A has merited the endorsement of servicemen, radio set manufacturers in research and production, industrial laboratories, factories and colleges for more than four years. A complete oscilloscope incorporating a cathode ray scope, vertical and horizontal amplifiers and linear sweep generator. Uses a high vacuum 3" cathode ray tube of the medium persistence type. All controls are on the front panel including special terminals for direct connection to deflecting plates. Can be used with or without the specially designed sensitive linear amplifiers. Both vertical and horizontal amplifiers have high impedance input and wide frequency response. Has built-in linear sweep generator for providing timing axis from 15 to 30,000 cycles. Positive, stable synchronization, internal or external. Observations may be made using external or internal sweep. Ideal for checking alignment of radio receivers, percentage of modulation on transmitters, waveforms. Extremely flexible design makes applications unlimited. Complete with detailed instructions. **Dealer Net Cash Price** **\$89.75**

Dealer Net Cash Price

MODEL 561 Combination A.F. & R.F. Metered Signal Generator

SPECIFICATIONS

Meter—Large three-inch round meter used to set the desired amount of amplitude modulation. Variable from 0 to 80%. **Simplicity**—All frequencies on the R. F. Oscillator read on two scales. Both A.F. and R.F. push-button operated. **Attenuator**—R.F. Oscillator has ladder type four position resistor push-button attenuator. Also, vernier control from maximum to minimum on either of the four steps of the multiplier. A.F. output is controlled from minimum to maximum with continuously variable control. **Laboratory Appearance**—This fine instrument is housed in beautiful golden tone, lock cornered, natural finish oak case. Black ribbed steel panel with silver and red highlights. **Tube Line Up**—6X5 Rectifier. 6SK7 A.F. Beat Oscillator. 6SK7A.F. Beat Oscillator. 6SK7 R.F. Oscillator. 6C5 A.F. Oscillator Mixer. 6C5 A.F. Amplifier. 6F8 Audio Vacuum Tube voltmeter-frequency modulation control tube. 6F8 R.F. vacuum tube voltmeter-I.M. Oscillator. 6K6 Buffer Mixer.

DESCRIPTION R.F. OSCILLATOR

Ranges—5 band 65/205 KC, 205/650 KC, 650/2050 KC, 2050/6500 KC, 6.5/20.5 MC. **Harmonics** above 50 MC. **Tuning Mechanism**—Dual ratio from tuning knob to dial. One direct for speed, a second about 5 to 1 for vernier settings. **Accuracy**—Low end of band tuned with iron core inductors. High end of band tuned with air dielectric trimmers providing for greatest accuracy possible with printed scales. Meter used to set carrier level at a predetermined value, aligned for an accurate and variable per cent of modulation by the A.F. Oscillator. **Frequency Modulator**—F.M. signal available over range of R.F. Oscillator. Frequency modulated approximately plus or minus 15 KC. Rate of frequency modulation 120 cycles per second. 60 cycle time base provides for automatic positive synchronization.

A.F. OSCILLATOR

Range—15 to 15,000 cycles. **Output Impedances**—Center tap transformer of 50/500/5,000 ohms. High impedance resistor of 50,000 ohms. **Distortion**—Approximately 5%. **Voltage Output**—Open circuit 35 volts. **Frequency Characteristics**—Plus or minus 1 db between 30 and 10,000 cycles. 15 cycles and 15,000 cycles down approximately 2 db. **Attenuator**—Controls voltage output from 0 to maximum. **Power Output**—Approximately 150 milliwatts. **Power Supply**—110-125 volts—50/60 cycles. Special voltages and frequencies on request. **Dealer Net Cash Price** **\$136.60**

Dealer Net Cash Price

MODEL 562 AUDOLYZER

This is a quick, easy, inexpensive test instrument for DYNAMIC TESTING of every radio receiver using the Signal Tracing method. Easy to operate. You always HEAR the demodulated signal instead of watching a meter or magic eye. You can find the dead portion of any receiver by connecting your modulated signal generator to the receiver and touching the SUPREME AUDOLYZER'S probe first to the antenna post, then the grid of the R.F. tube, the R.F. tube plate, etc., right back through the complete receiver. You will hear a signal in the AUDOLYZER'S speaker (which has a volume control) until you hit the dead stage. You can use the AUDOLYZER'S vacuum tube volt meter to measure all D.C. voltages without disturbing receiver's normal operations. 7 D.C. voltage ranges of 0/1/3/10/30/100/300/1000 at 15 megs input. Meter is center-reading type with 'plus' and 'minus' readings to each side of center eliminating reversing test leads for polarity changes. You can measure resistance from 0.1 ohm to 20 megohms. 5 ranges give you perfect overlap as the 0/200 is the low range with 3.5 ohms center scale. Total ranges are 0/200/2000/20,000 ohms and 2/20 megohms. Next, you can check receiver's oscillator. If oscillator cuts out or is weak when receiver dial is rotated, AUDOLYZER meter immediately indicates it. To determine unknown frequency of oscillator, I.F., or R.F. signal, use tuning portion of SUPREME AUDOLYZER and AUDOLYZER'S V.T.V.M. as frequency meter.

For receiver's oscillator place probe on oscillator output and tune AUDOLYZER for greatest meter swing. Read frequency on AUDOLYZER'S direct-reading dial. For R.F. determination, connect your signal generator to receiver's input and place AUDOLYZER probe on antenna post. Stage under test. Adjust signal generator and AUDOLYZER for maximum meter swing. Adjust receiver trimmer until meter indicates correct frequency. To determine actual signal feed to I.F. or R.F. stage, place AUDOLYZER probe to first Det. output, feed a

signal into receiver and adjust AUDOLYZER dial until you get maximum swing of its meter needle. Read actual I.F. signal's frequency on AUDOLYZER. Relative gain or loss of signal strength in any stage, tube or transformer can be determined. You can check A.V.C. circuits for correct applied voltage under actual operating conditions. You can adjust A.V.C. circuits. Distortion is easily noted by ear. **Dealer Net Cash Price** **\$127.00**

Supreme by Comparison

MODEL 567 SPEED SET TESTER

DESCRIPTION AND SPECIFICATIONS

OPERATION—All ranges (with the exception of the A-C and D-C, 10 and 50 ampere ranges) are selected by push-button operation. **DOUBLE METER SENSITIVITY**—1000 ohms per volt for regular D-C measurements and 20,000 ohms per volt for measurements in high resistance circuits. **DIRECT CURRENT RANGES**—9 ranges consisting of 0/100 microamperes, 1/5/25/100/500 milliamperes, 1/10/50 amperes. **A-C CURRENT RANGES**—3 ranges of 0/1/10/50 amperes. **D-C VOLT RANGES**—Total of 14 ranges, 7 ranges at 1000 ohms per volt, and 7 ranges at 20,000 ohms per volt, 0/5/25/100/250/500/1000/5000 volts. **A-C VOLT RANGES**—7 ranges at 1000 ohms per volt, 0/5/100/250/500/1000/5000. **OUTPUT VOLT RANGES**—7 ranges of 0/5/25/100/250/500/1000/5000. No external capacitor required. Covers all necessary ranges to provide indications for aligning receivers with Signal Generator. **DECIBELS**—5 ranges of -10/+9, 0/+23, 0/+35, 0/+43, 0/+49. Calibrated for 500 ohm line. **RESISTANCE RANGES**—7 total ranges. Low Ohms—(linear scale) two ranges of 0/5 and 0/5 full scale. A minimum reading of .01 ohms is indicated by one full division on meter scale. High Ohms—(non-linear scale) 0/500, 5000, 500M, 5 megohms, 50 megohms. All ranges are operated with self-contained batteries. Note the extremely wide range of .01 ohms to 50 megohms without additional power supply. **POWER SUPPLY**—Battery operated on all batteries supplied. **CARRYING CASE**—Sturdy steel carrying case finished in grey wrinkle. Panel grey wrinkle, white letters and markings; red highlights.

MODEL 584

MODEL 542

MULTI-METERS

A POPULAR COMPACT POCKET LABORATORY

MODEL 584 MULTI-METER

The New Model 584 is a fitting companion to the extremely popular Model 542 which is so well known to radio servicemen wherever electronic equipment is used. The Model 584 uses a 50 microampere movement which has a sensitivity of 20,000 ohms per volt. All ohmmeter ranges including the 20 megohm range are operated by batteries furnished with the instrument and contained in its sturdy metal carrying case.

D-C VOLT RANGES—(20,000 ohms per volt), 0/5/25/100/500/1000/5000 (first scale division .1 volt). **D-C VOLT RANGES**—(1000 ohms per volt), 0/5/25/100/500/1000/5000. **A-C VOLT RANGES**—(1000 ohms per volt), 0/5/25/100/500/1000/5000. **DECIBEL RANGES**—-10/+9, 0/+23, 0/+35, 0/+49. **D-C CURRENT RANGES**—0/100 microamperes, 0/10/100/500 milliamperes. **RESISTANCE RANGES**—3 ranges, 0/2000/200M/20 megohms. **OUTPUT VOLT RANGES**—6 ranges, 0/5/25/100/500/1000/5000.

CARRYING CASE—Sturdy steel case with hinged cover to protect meter. Finished in grey wrinkle. Panel grey wrinkle, white letters and markings; red highlights.

Size: 5" x 7 1/2" x 3". Shipping Weight: 4 pounds.

MODEL 542 POCKET MULTI-METER

A regular little pocket laboratory with a case only 3 x 5 3/4 x 2" in size, weighing but 23 ounces—24 ranges—just as accurate and even more convenient than you would expect to find in an instrument twice its price. 4 DC mil ranges (with first scale division 5 microamperes) of 0/0.3/6/30/150; 4 DC volt ranges (with first scale division 0.1 volt) of 0/6/150/300/1500; 4 ohms ranges (with 1 ohm first scale division and 25 ohms center scale) of 0/2,000/20,000/200,000/2 meg; 4 AC volt ranges (with first scale division 0.1 volt) of 0/6/30/150/600; 4 output ranges of 0/6/30/150/600; 4 decibel ranges of -6/+10, +8/+24, +22/+38, +34/+50. The Model 542 is not a toy—it uses a full size 3" square meter with a rugged, accurate 200 microampere movement and a knife edged pointer. This movement has a sensitivity of 5000 ohms per volt. All ohmmeter ranges, including the megohm ranges, are operated by batteries furnished with the instrument and contained within its durable black molded bakelite case.

Dealer Net Cash Price.....

\$23.65

MODEL 548 MULTI-METER

SUPREME Model 548 gives the radio serviceman a large, easily read, seven inch SUPREME meter together with a total of 34 ranges. It makes an ideal instrument for installing in a work bench or for portable use. It requires no "squinting" to read this meter. **D-C VOLT RANGES**—0/5/25/100/250/500/1000/5000, at 1000 ohms per volt. **A-C VOLT RANGES**—0/5/25/100/250/500/1000/5000, at 1000 ohms per volt.

OUTPUT VOLT RANGES—0/5/25/100/250/500/1000/5000, at 1000 ohms per volt. Provides the proper ranges for indications when aligning receivers. **DECIBEL RANGES**—-10/+9, 0/+23, 0/+35, 0/+43, 0/+49. **D-C CURRENT RANGES**—6 ranges provided, 0/5/25/100/250/500/1000 milliamperes. Two ampere ranges of 0/10/25 are provided. **CAPACITANCE RANGES**—For convenience in reading capacitances of electrolytic capacitors and the larger paper capacitors three capacitance ranges of .1/4, 1/40, and 10/400 microfarads are provided. **RESISTANCE RANGES**—A total of 5 ranges, 0/2000/20M/200M, 2 megohms, 20 megohms provide facilities for reading most any resistor found in electronic equipment.

CARRYING CASE—Heavy steel case finished in grey wrinkle. Panel grey wrinkle finish, white letters and markings; red highlights.

Size: 11 3/4" x 8 3/4" x 4 3/4". Shipping Weight: 16 pounds

SUPREME INSTRUMENTS

Supreme by Comparison

MODEL 574 ELECTRONIC SET TESTER

In presenting the Model 574, SUPREME offers to the electronic technician a complete electronic Multimeter and Set Tester. For the repair man who does not have the requirements of measuring radio frequency voltages, means are provided to measure AC voltages through the audio range. If the technician desires to measure AC voltages through the radio frequency spectrum, he can do so by the use of the newly designed hand-fitting probe incorporating a small high frequency diode. With this device AC voltages can be measured with negligible frequency error up to 100 mc.

METER—Large, rugged 4" open face D'Arsonval movement. **METER REVERSING SWITCH**—Not necessary to change leads in reverse polarity measurements. **STABILITY**—Very small error due to change in line voltage of 10%. Practically no shift in zero setting when changing from range to range. **CARRYING CASE**—Steel with grey wrinkle finish. Panel steel with grey wrinkle finish, white letters and markings; red highlights.

Laboratory Standards MEASUREMENTS CORPORATION

STANDARD SIGNAL GENERATORS

MEASUREMENTS

MODEL 65-B

A leader in its field, this soundly designed and expertly manufactured instrument will greatly increase the efficiency of any laboratory.

SPECIFICATIONS

FREQUENCY RANGE: 75 kilocycles to 30 megacycles in 6 push button ranges.

FREQUENCY CALIBRATION: The frequency dial is direct reading and individually hand calibrated for each range. It is accurate to $\pm 1/2\%$.

OUTPUT VOLTAGE: Continuously variable from 0.1 microvolt to 2.2 volts.

OUTPUT IMPEDANCE: 5 ohms to 0.2 volt, rising to 15 ohms at 2.2 volts.

MODULATION: Continuously variable from 0 to 100%. Modulation depth is indicated directly by a meter on the panel. Modulation may be obtained either from an internal source of 400 or 1000 cycles or from an external source.

ENVELOPE DISTORTION: Less than 4% at 100% modulation at 1 megacycle.

LEAKAGE AND STRAY FIELD: Less than 0.1 microvolt leakage with attenuator set for 0 output. Less than 1 microvolt per meter stray field at any frequency.

POWER SUPPLY: 117 volt AC, 60 cycle.

DIMENSIONS: 11" high x 20" long x 10 1/4" deep, overall.

WEIGHT: Approximately 50 pounds.

MEASUREMENTS MODEL 80

SPECIFICATIONS

FREQUENCY RANGE: 2 to 400 megacycles in 6 bands, individually calibrated direct reading dial.

FREQUENCY ACCURACY: $\pm .5\%$

OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.

OUTPUT IMPEDANCE: 50 ohms.

MODULATION: Amplitude modulation is continuously variable from 0 to 30%. Modulation depth is indicated by a meter on the panel. An internal 400 or 1000 cycle audio oscillator is provided. Modulation may also be applied from an external source. Pulse modulation may be applied to the oscillator from an external source through a special connector. Pulses of 1 microsecond can be obtained at higher carrier frequencies.

LEAKAGE IN STRAY FIELDS: Attenuator leakage less than 0.1 microvolt. Power line leakage less than .5 microvolt. Stray fields less than two microvolts.

POWER SUPPLY: 117 volts, 50 to 60 cycles.

DIMENSIONS: 10 3/4" high x 19" wide x 9 1/2" deep, overall.

WEIGHT: Approximately 35 pounds.

ACCESSORIES: (Order with instrument) Recommended — 80-ZH4 Cable; 80-ZH3 Pad. Available — 80-ZH1 Pad; 84-Z2-1 Cable; 84-Z2-2 Cable; 84-Z2-3 Cable; UG-201/U Adapter.

MEASUREMENTS

PULSE GENERATOR MODEL 79-B

This instrument is specially adapted for plate pulsing of the Model 80 Standard Signal Generator; this combination will provide pulses down to one microsecond at the higher carrier frequencies.

SPECIFICATIONS

FREQUENCY RANGE: 60 to 100,000 cycles.

PULSE WIDTH: Continuously variable from .5 to 40 microseconds.

OUTPUT VOLTAGE: Approximately 150 volts positive with respect to ground.

"SYNC" OUTPUT: 75 volts positive with respect to ground. Displaced by 1/2 period from pulse output.

"SYNC" INPUT: May be synchronized with as little as 2 volts peak from an external source.

POWER SUPPLY: 117 volts, 60 cycles AC.

DIMENSIONS: 10" high x 13 3/8" wide x 10 1/2" deep, overall.

WEIGHT: Approximately 31 pounds.

MEASUREMENTS CORPORATION BOONTON · NEW JERSEY

Laboratory Standards MEASUREMENTS CORPORATION

STANDARD SIGNAL GENERATORS

MEASUREMENTS MODEL 84

SPECIFICATIONS

FREQUENCY RANGE: 300 to 1000 megacycles, individually calibrated direct reading dial.

FREQUENCY ACCURACY: $\pm .5\%$.

OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.

OUTPUT IMPEDANCE: 50 ohms.

AMPLITUDE MODULATION: Continuously variable from 0 to 30% indicated directly on panel meter. An internal sine-wave oscillator choice of 400, 1000, or 2500 cycles is provided. External modulation up to 30 kilocycles may be applied.

PULSE MODULATION: Repetition rate continuously variable from 50 to 100,000 cycles. Pulse width continuously variable from 1 to 50 microseconds indicated on directly calibrated dial. Pulse delay (with respect to synchronizing output) continuously variable from 0 to 50 microseconds indicated on directly calibrated dial. May be synchronized with an external sine-wave or pulse source.

POWER SUPPLY: 117 volts, 60 cycles.

DIMENSIONS: 12" high x 26" wide x 10" deep, overall.

WEIGHT: Approximately 125 pounds, including external line voltage regulator.

ACCESSORIES: Included with each instrument are four connecting cables, external voltage regulator, spare oscillator tube.

TELEVISION SIGNAL GENERATOR MODEL 90

This instrument is the first commercial wide-band, wide-range, standard signal generator ever to be developed. It is the master oscillator, buffer-amplifier, modulated power-amplifier type, and the output circuits are of the double-tuned, over-coupled, band-pass type, permitting modulation frequencies up to 5 megacycles. The excellent isolation between final amplifier and oscillator completely eliminates incidental frequency modulation. The carrier range of 20 to 300 megacycles is covered in eight

coil ranges. Video modulation is obtained from a built-in video modulator having a band width of 5 megacycles designed to operate from a standard R.M.A. television signal. Continuous monitoring is provided by a built-in oscilloscope. Audio modulation up to 100 percent may be obtained from a suitable external audio oscillator.

The Model 90 fills a long felt need for a real standard signal generator applicable to high definition television use.

MEASUREMENTS MODEL 78-FM

SPECIFICATIONS

FREQUENCY RANGE: 86 to 108 megacycles, individually calibrated dials. Accurate to $\pm .5\%$.

OUTPUT VOLTAGE: 1 to 100,000 microvolts.

LEAKAGE: Less than 1 microvolt.

MODULATION: Deviation continuously variable from 0 to 300 kc. Indicated on directly calibrated dial. 400 cycle internal audio oscillator can be modulated from an external source providing 6 volts across 5000 ohms.

FIDELITY: Flat within two db from DC to 15,000 cycles. Distortion is less than 1% at 75 kilocycles deviation. Transient response is excellent.

POWER SUPPLY: 117 volts, 50 to 60 cycles.

DIMENSIONS: 10" high x 13" wide x 7" deep, overall.

WEIGHT: Approximately 25 pounds.

MEASUREMENTS MODEL M-275 I.F. CONVERTER

This instrument is designed to be used with the Model 78-FM Standard Signal Generator to provide output frequencies in the I.F. range.

CARRIER FREQUENCIES: 4.5, 10.7, 21.7 Mc. plus provision for one extra frequency.

OUTPUT VOLTAGE: 10 microvolts to 1.0 v., variable with Model 78-FM attenuator.

BAND WIDTHS: 5% down, 250 Kc. from center frequency.

AMPLITUDE MODULATION: Provision for external AM up to approximately 80%, combined with, or exclusive of, FM. There is negligible spurious FM due to AM. The envelope distortion is less than 10% at 80% modulation.

DIMENSIONS: 10" x 13" x 7". 15 pounds.

POWER SUPPLY: 117 v., 50-60 cycles. 45 watts.

MEASUREMENTS CORPORATION BOONTON · NEW JERSEY

RADIO-FREQUENCY TEST INSTRUMENTS

MEASUREMENTS

U.H.F. RADIO NOISE and FIELD STRENGTH METER MODEL 58

This versatile, portable instrument is useful in measuring signal-to-noise ratios, noise levels and for field strength surveys on television and FM transmitters.

SPECIFICATIONS

FREQUENCY RANGE: 15 to 150 megacycles in five bands—dial directly calibrated in megacycles.

INPUT VOLTAGE RANGE: 1 to 100,000 microvolts across 72 ohm balance line. 1 to 100 microvolts on semi-logarithmic output meter, balanced resistance attenuator with ratios of 10, 100 and 1000 ahead of all tubes.

GAIN STANDARDIZATION: Internal "shot noise" diode provides calibration standard. Special dial eliminates need for charts.

CIRCUIT: Superheterodyne circuit with tuned RF amplifier eliminates image response.

BAND WIDTH: 150 kilocycles @ 2X down.

POWER SUPPLY: Built-in regulated dual power supply for operation from either 115 volts AC or 6 volts DC.

STANDARD EQUIPMENT: Power cables, 15 foot antenna cable, 9 inch loop antenna, carrying strap, and complete instruction book.

DIMENSIONS: 16" wide x 2" high x 11" deep, overall.

NET WEIGHT: 27 pounds.

R. F. MODULATOR: 5 volts maximum carrier input. Translation gain is approximately unity—Output impedance is 600 ohms.

POWER SUPPLY: 117 volts, 60 cycles.

DIMENSIONS: 7" high x 15" wide x 7½" deep, overall.

WEIGHT: Approximately 15 pounds.

MEASUREMENTS

SQUARE WAVE GENERATOR

MODEL 71

Recommended for television testing and many different applications in the development of AM and FM equipment where square-wave analysis is of great importance.

SPECIFICATIONS

FREQUENCY RANGE: 5 to 100,000 cycles.

WAVE SHAPE: Rise time less than 0.2 microseconds with negligible overshoot.

OUTPUT VOLTAGE: Step attenuator giving 75, 50, 25, 15, 10, 5 peak volts fixed and 0 to 2.5 volts continuously variable.

SYNCHRONIZING OUTPUT: 25 volts peak.

CAPACITANCE BRIDGE

The MODEL 101 has been designed to measure capacitance from 0.1 mmfd. to 1 mfd. in five ranges, with power factors from 0.1 percent to 10 percent. Small size, ease of operation and convenient grouping of all controls make this an extremely useful and necessary instrument for production-line or laboratory use.

R.F. ATTENUATOR

The M-234 is a co-axial attenuator of the mutual inductance type, operating on the transverse magnetic field as a wave guide type below cut-off. A rack and split gear drive assure long life and smooth operation. This attenuator is well suited to many specialized operations such as AM, FM and television receiver production test equipment, stage gain test sets, filter test sets, etc.

ACCURATE MEASURING INSTRUMENTS

MEASUREMENTS
**VACUUM TUBE VOLTMETER
MODEL 62**

A very compact, light instrument for either laboratory or field use where a zero current voltmeter is required. Its range selector push buttons and easily-read meter give it an ease of operation that has made it the most popular vacuum tube voltmeter with engineers.

SPECIFICATIONS

RANGE: Push button selection of 5 ranges—1, 3, 10, 30 and 100 volts full scale AC or DC.

ACCURACY: $\pm 2\%$ of full scale on each range, both DC and sine-wave AC.

INDICATION: Linear for DC and calibrated to indicate RMS values of a sine-wave or 71% of the peak value of a complex wave on AC.

FREQUENCY ERROR: Less than 10% from 30 cycles to over 150 megacycles. Resonant frequency of the probe with input terminals shorted is 350 megacycles.

INPUT IMPEDANCE: The input capacitance is approximately 7 mmf. The input resistance is a function of frequency.

POWER SUPPLY: 115 volts AC, 50 to 60 cycles.

DIMENSIONS: 4 $\frac{3}{4}$ " wide x 6" high x 8 $\frac{1}{2}$ " deep overall.

WEIGHT: Approximately 6 pounds.

**MEGACYCLE METER
MODEL 59**

Radio's newest multi-purpose instrument. A grid-dip oscillator designed for many applications in television, FM, taxi radio, aircraft radio and other electronic work.

SPECIFICATIONS

FREQUENCY: 2.2 Mc. to 400 Mc.; seven plug-in coils.

MODULATION: CW or 120 cycles; or external.

DIMENSIONS: Power Unit, 5 $\frac{1}{8}$ " wide; 6 $\frac{1}{8}$ " high; 7 $\frac{1}{2}$ " deep. Oscillator unit, 3 $\frac{3}{4}$ " diameter; 2" deep.

POWER SUPPLY: 110-120 volts, 50-60 cycles; 20 watts.

MEASUREMENTS PEAK VOLTMETER MODEL 67

True peak values of complex wave forms encountered in radio and allied electronic work may be measured accurately with the Model 67. It indicates the true peak-to-peak value of symmetrical and asymmetrical waveforms varying from low frequency

square waves to pulses of less than five microseconds duration. Full scale values of .03 to 300 volts peak-to-peak or .01 to 100 volts r.m.s. of a sine-wave in five decade ranges are indicated on semi-logarithmic scales.

JACKSON*Radio Testing Equipment*
THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

UNIVERSAL SIGNAL GENERATOR — MODEL 641

AM FREQUENCIES 100 KC TO 120 MC — FM FREQUENCIES 100 KC TO 160 MC

This instrument has been specifically designed to meet the requirements of the modern radio and electronic service-repair laboratory. Amplitude modulated, frequency modulated and television receivers are all within the scope of this entirely new instrument.

Model 641

FEATURES

FREQUENCY RANGE — Amplitude modulation 100 KC to 120 MC while the frequency modulation extends from 100 KC to 160 MC.

AMPLITUDE MODULATION percentage continuously variable 0-80 percent.

FREQUENCY MODULATION Two full frequency sweep ranges are provided, narrow band 0-40 KC and wide band 0-160 KC deviation (800 KC sweep).

AUDIO MODULATION FREQUENCY A built-in variable RC tuned audio oscillator is incorporated in the instrument independent of the RF oscillator, covering the audible frequency range of 100 to 10,000 cycles in two ranges. The audio modulation of either the AM or the FM signal output can be varied throughout the entire range of 100 to 10,000 cycles and is available externally for audio testing.

METERED OUTPUT The output is continuously read directly in microvolts on the meter dial of the high quality RF voltmeter section of the instrument. This RF voltmeter constantly monitors the output level (for constant reference) of the RF voltage and is adjustable by the attenuator controls. There is no reference adjustment required, eliminating tedious pre-adjustments.

OUTPUT IMPEDANCE — The output impedance is constant for all ranges. The carefully designed and excellently constructed attenuator circuit, coupled to the powerful oscillator, develops the rated output voltage with 30 ohms output impedance. This is a feature found only in laboratory standards costing three to four times more.

FULL VISION DIAL glass enclosed, providing quick accurate frequency settings, also protects scale from disfigurement.

COMPLETE RF & AF TESTS — Since the audio modulation frequency of both the amplitude and frequency modulated signal is variable throughout the audio range (100 to 10,000 cycles) the audio section including speaker of a receiver can be checked with a single connection to the instrument to the receiver antenna post and sweeping the band.

MULTIPLE RF SHIELDING and LINE FILTERS are featured to minimize stray RF and line leakage.

SPECIFICATIONS

AMPLITUDE MODULATION

- (1) Frequency Range 100 KC to 120 MC (ALL FUNDAMENTAL) in 8 ranges.
- (2) Accuracy: $\pm 1\%$ on all ranges.
- (3) Audio Modulation Frequency: 100 to 10,000 cycles adjustable. Can also be modulated with 60 cycles or externally if desired.
- (4) Calibrated Output: 0-100,000 microvolts, with a jack provided for high output.

FREQUENCY MODULATION

- (1) Frequency Range: 100 KC to 160 MC.
- (2) Narrow Band: 0-40 KC adjustable. Fixed oscillator 1000 KC.
- (3) Wide Band: 0-160 KC adjustable. Fixed oscillator 40 MC.
- (4) Modulation Frequency: 100 to 10,000 cycles adjustable. Can also be modulated with 60 cycle or externally if desired.

AUDIO OUTPUT

- (1) Variable Range: 100 to 10,000 cycles available from external (high impedance) jack.

VISUAL RESONANCE

- (1) A 60 cycle sweep frequency is provided for visual resonance analysis. Phase voltage is also furnished for CRO timing. The two ranges 0-40, 0-160 KC furnish any desired range for either AM, narrow or wide band frequency modulation analysis.

MECHANICAL SPECIFICATIONS:

- (1) Construction: Ruggedly assembled using finest material arranged for best electrical efficiency.
- (2) Multiple shielding on RF oscillator unit.
- (3) Dials and controls grouped for maximum operating convenience.
- (4) Designed to mount in any standard relay rack, such as Jackson's "Service Lab" or "Branch Lab" units.

ACCESSORIES

- (1) Furnished complete with tubes and coaxial output cable.
- (2) Instrument is protected by a fused line plug.

DIMENSIONS

16 $\frac{3}{4}$ " long x 9 $\frac{1}{2}$ " high x 7" deep.

POWER SUPPLY

105 to 125 volts, 50-60 cycle

MODEL 641.....\$159.50

JACKSON

Radio Testing Equipment

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

Model 648-B

MODEL 648 DYNAMIC* TUBE TESTERS

With Built-In Rotary Tube Chart

The newest of DYNAMIC* TUBE TESTERS -- the most important engineering advancement in 10 years of Tube Tester research. Simplified operation is accomplished by **sequence switching**, another exclusive Jackson feature.

COMPLETE DYNAMIC TESTING — SIMPLIFIED OPERATION

THE NEW JACKSON MODEL 648 incorporates all of the finest features of Dynamic* tube testing (first perfected by JACKSON over 10 years ago) **Plus** new features engineered to meet all of today's needs for accurate, up-to-date, simplified tube testing.

THE JACKSON DYNAMIC test circuit applies separate element voltages to each tube element. Separate load circuits are also used. These voltages and loads have been carefully selected for each tube to meet most ideally the normal operating condition of the tube. The current flowing only in the plate circuit of the tube under test is indicated on the meter in easy-to-read terms.

SEQUENCE SWITCHING, a new JACKSON engineering achievement makes possible **SIMPLIFIED OPERATION**, formerly unattainable in Dynamic* test methods. There are actually **only three control units** to be set according to chart listing for each tube. These are: Heater voltage (upper left), Plate Control (upper right) and the Sequence Switch (center). The only other adjustments are line voltage control and shorts test.

FAST, ACCURATE SHORTS TEST Lamp indicates only when tube is shorted. The shorts test control moves only through 4 positions -- yet completely tests each tube element for possible shorts or leakage. Tube under test cannot be damaged by shorts test voltage, yet even very high resistance leakage between elements is detected. The tube is tested under a heated cathode condition.

*Trademark Registered U.S. Patent Office

CORRECT TEST VOLTAGES AND LOAD CIRCUITS Proper test voltages protect tubes under test against damage by overload. Even low voltage battery types are provided with suitably low operating potentials. The full GOOD-BAD scale of the meter is used for each test. The meter is sufficiently sensitive that special "Low scale" readings are not required (such as for diodes, etc.).

HEATER VOLTAGE CONTROL shows actual voltage applied to tube filament or heater.

TEST SOCKETS FOR ALL TUBE TYPES 4, 5, 6, 7s-7L, Octal, Loctal, Noval, Acorn, Miniature and sub-miniature. Blank spare sockets on panel provide for future types.

ROLLER TUBE CHART is simplified, easier to read, is triple indexed for rapid location of test settings.

All existing commercial receiving tube types now listed on chart with correct test procedure for each. Includes recently released types, all generally used types and many "hard-to-find" older types. **Free chart and supplement service** for one year after purchase.

LARGE 4" METER ruggedly constructed, easy-to-read dial. Beautifully lettered 3 tone gray panel. Finest materials and construction throughout. Dimensions: 648-B Bench Style, 15 1/2" x 10 1/2" x 4 1/4" Gray Morocco Steel Case. For operation on 100-125 Volts, 50-60 Cycles.

PRICE: NET TO DEALERS AND SERVICEMEN

JACKSON

Radio Testing Equipment

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

DYNAMIC OUTPUT TUBE TESTER WITH COMPLETE UNIVERSAL METER RANGES

MODEL 637

IN THE SHOP OR OUT ON THE JOB here's the ideal tester for modern servicing. Combines 27 ranges and 10 functions including:

- (1) Dynamic output tube tester of the same type and quality as the Mod. 1616 series.
- (2) Multi-range AC Voltmeter 0-10/100 250 500 1000 2500.
- (3) Multi-range DC Voltmeter 0-10 100 250 500 1000 2500.
- (4) Decibel meter-ranges from minus 10 to plus 14/10 to 24 30 to 54.
- (5) Multi-range DC Milliammeter 0-1 10 100 250.
- (6) Ammeter range—0 to 10 amperes DC.
- (7) Triple range Ohmmeter 0-3000/300,000 0-100 ohms.

FEATURES

AUTOMATIC PUSH BUTTON SELECTOR provides for instant use of any meter range; the new selector is marked directly in volts and ohms position. This feature eliminates guess work and bears the operator to avoid mistakes.

REMARKABLY EASY TO USE—Notice the simplicity of panel and controls. The engineering is all BENEATH THE PANEL. You don't lose valuable time figuring out the next move.

FULL VISION Jackson meter is an exclusive feature on this tester. Meter measures 6 inches over diameter.

CASE is of finest material and construction, has removable hinged lid.

Model 637

ACCESSORIES—Furnished complete with self contained battery (or ohmmeter) and test leads.

DIMENSIONS Overall 14 3/4" x 13 3/4" x 6".

MODEL 637\$97.50

AUDIO OSCILLATOR MODEL 655

The Model 655 provides an audio frequency voltage DEVELOPED AT ITS FUNDAMENTAL FREQUENCY. The basic design of this instrument is entirely different from the "beat frequency" type of Audio Oscillator.

FEATURES

RESISTANCE CAPACITY TUNED CIRCUIT DESIGN, engineered for improved operating characteristics of audio measurements.

NO ZERO ADJUSTMENT—Tuned Fundamental Frequency method provides permanently locked calibration.

OUTPUT CHARACTERISTICS—A choice of either transformer-coupled or resistive output is available. The Model 655 meets the most exacting requirements as to WAVEFORM-UNIFORM FREQUENCY CHARACTERISTICS and OUTPUT LOAD IMPEDANCE SELECTION. A special feature of the output system is the 10 ohm tap for low impedance circuits such as speaker coils, etc.

VARIABLE FREQUENCY SELECTION throughout the four bands. There are over 33 inches of scale length making EXACT settings possible.

COMPLETE STABILITY—The stability of frequency calibration is constant throughout the entire range. The stabilized circuit permits large changes in line voltage to occur without affecting frequency or waveform and having negligible effect on output voltage.

SIMPLIFIED OPERATION—It is only necessary to select desired FREQUENCY and OUTPUT. THERE ARE NO OTHER CONTROLS—The possibility of errors in operation are therefore eliminated.

HIGH OUTPUT POWER—More than THREE TIMES the output usually available from ordinary audio oscillators.

CONSTRUCTION—Frequency dial is glass enclosed so that calibrations cannot become disfigured. Rugged mechanical features assure trouble free operation under service conditions.

SPECIFICATIONS

FREQUENCY RANGE—20 Cycles to 200,000 cycles in 4 ranges: 20-200 cycles/200-2000 cycles/2000 to 20,000 cycles/20,000 cycles to 200,000 cycles.

Model 655

CALIBRATION—Logarithmic variation of frequency over the scale provides constant percentage accuracy at all frequencies.

SCALE LENGTH—Over 33 inches.

OUTPUT IMPEDANCE—Five values of output impedance: 10 ohms, 250 ohms/500 ohms/5000 ohms/RESISTIVE. Controlled by selector switch.

OUTPUT POWER—500 Milliwatts (20 to 20,000 cycles transformer coupled).

OUTPUT CONTROL—Continuously variable from zero to maximum.

WAVEFORM—Less than 5% distortion at all frequencies between 30 and 15,000 cycles.

FREQUENCY CHARACTERISTICS—Plus or minus 1 DB 30-15,000 cycles using transformer coupled output.

HUM LEVEL—Down more than 60 DB at maximum.

ACCURACY—3% or 1 cycle whichever is greater.

TUBES—1—6G6G, 1—6SL7G7, 2—5V6GT, 1—5Y3GT furnished installed.

DIMENSIONS—13" wide x 9 1/2" high 9 1/2" deep.

MODEL 655\$125.00

JACKSON

Radio Testing Equipment

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

Test Oscillator—Model 640

TEST OSCILLATOR — MODEL 640

A complete test oscillator for all general purpose work. Has full range direct reading dial from 100 KC up to 30 Megacycles, all fundamental. For added convenience there are Two Harmonic bands, 28 MC to 60 MC and 56 MC to 120 MC.

FEATURES

PUSH-BUTTON selection of all ranges makes speedy and accurate operation possible.

GLASS ENCLOSED DIAL—prevents dust and avoids possibility of damage to pointer.

TWO CIRCUIT ATTENUATOR provides variable ratio and also vernier control.

HAS POWERFUL SIGNAL OUTPUT which may be used either as pure R.F. or Modulated R.F. Carrier is modulated at approximately 30%. The A.F. voltage is available for external use.

ACCURACY GUARANTEED to 1/2 of 1% on all ranges. Operates from 100 volt 60 cycles. Uses three tubes (rectifier, oscillator and modulator).

MODEL 640.....NET CASH PRICE \$62.50

CONDENSER TESTER — MODEL 650-A

The Model 650 is a modern, accurate and complete instrument for detecting faulty condensers—ELECTROLYTIC, PAPER or MICA. Uses a new method for Leakage Test which will reveal otherwise unnoticed condenser defects.

FEATURES

AUTOMATIC PUSH BUTTON CONTROLLED—Amazing in speed and simplicity of use. Capacity readings almost instantaneous! Leakage test by just pressing a button.

SCALE IS GLASS ENCLOSED and is equipped with the new Jackson SCALE EXPANDER indicating pointer—doubles effective scale length.

MEASURES ALL VALUES direct reading in Microfarads

RANGES. .00001 to .001 mfd. .1 to 100 mfd.
.001 to .1 mfd. 50 to 1000 mfd.

MEASURES POWER FACTOR on direct reading dial. Power Factor range calibrated from 0 to 60%.

COMPLETE SELECTION OF TEST VOLTAGE. 20 volts to 500 volts.

ELECTRON RAY TUBE indicates exact balance or shows if leakage is present

INSTANTANEOUS LEAKAGE INDICATION—counting of flashes eliminated. No other guess-work with this modern tester. Has special built-in amplifier stage which actually responds to slightest leakage, if present. Thus all leakage defects may be located.

MODEL 650-A.....NET CASH PRICE \$54.50

Condenser Tester—Model 650-A

COMPACT VOLT-OHM-MILLIAMMETER — MODEL 615

An excellent general purpose instrument, compact in size but unusually complete in ranges. Panel is finished in attractive two-tone grey with white lettering.

FEATURES

RANGE SELECTION—Rotary switch method saves time and reduces errors.

HIGH QUALITY METER—Three inch square type meter with two jewelled bearings.

RANGES—

Two Ohms Ranges—0-1000/0-500,000

Five D.C. Volts Ranges—0-5/50/100/250/1000

Four D.C.M.A. Ranges—0-1 1/5/50/250

Five A.C. Volts Ranges—0-10/100/200/500/2000

Additional High Voltage D.C. Range—0-2500 v.

Each instrument supplied complete with self-contained battery for ohms ranges.

Test leads not included. Dimensions—7" x 4 1/4" x 3".

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

VACUUM TUBE VOLTMETER

AC-DC Vacuum Tube Voltmeter—Model 645

Model 645 is an ultra-modern high sensitivity instrument, with all of the famous Jackson features, including exceptional accuracy and simplicity of use.

FEATURES

BOTH A.C. AND D.C. VOLT RANGES ARE ELECTRONIC. This provides the maximum of sensitivity and overload protection for all A.C. ranges as well as D.C. and ohms ranges.

MEASURES RESISTANCE UP TO 1 BILLION OHMS (1 thousand megohms)—and as low as 2 10 ohms

3 MILLION OHMS PER VOLT SENSITIVITY on 0.4 volt D.C. range. Constant input resistance 12 megohms on all D.C. volts range.

Over 4 million ohms per volt sensitivity on 0.1 volt A.C. range. Input resistance of 4.4 megohms on all A.C. ranges. Flat frequency response between 50 cycles and 200,000 cycles.

METER CANNOT BE DAMAGED BY ACCIDENTAL OVERLOAD on any electronic range. Electronic overload-protection on all A.C. and D.C. volts, and ohms ranges. Variations in line voltage do not affect accuracy within the range of 100 to 125 volts. Instrument is equipped with ballast control tube and compensating circuits.

Contains 3 tubes (6X5GT/6K6GT/7N7); 1—4½ volt battery and ballast; all self-contained and furnished with the instrument.

METER RANGES—

A.C. Volt: 0-1/4/10/40/100/400/1000.

D.C. Volt: 0-4/10 40 100/400/1000.

Ohms: 0-1000/10,000 100,000 1 meg/10 meg/100 meg/1000 meg.

M.A.: 0-1/4/10/40/100/400/1000.

Decibels: Minus 30 to minus 5/minus 10 to plus 15/10 to 35/30 to 55.

Either positive or negative D.C. voltmeter indications instantly by means of reversal switch. Signal Tracing type test lead with isolation resistor in probe furnished.

MODEL 645..... **NET PRICE \$59.50**

CRYSTAL PROBE

Using this high frequency crystal probe with the Model 645 high frequencies of 200 KC to 200 MC can be read directly on the 4, 10 and 4C volt DC scales. Ideal for FM and Television testing.

Model 645P

MODEL 645P..... **\$9.85**

UNIVERSAL VOLT-OHM-MILLIAMMETER—MODEL 642 (20,000 Ohms Per Volt)

Universal Volt-Ohm-Milliammeter—Model 642

A valuable and necessary instrument for all measurements of sensitive circuits such as A.V.C. voltages, etc. Many measurements may be made with current drain as low as 2 microamperes.

AUTOMATIC RANGE SELECTION — PUSH BUTTON CONTROLLED. Instant selection of any meter range is made simple with the eleven key push button selector.

TWENTY-THREE RANGES—SEVEN FUNCTIONS AC/DC volts—ohms—decibels—milliamperes—microamperes and amperes. Has special built-in shunt and 10 ampere range.

OHMS RANGES from ½ ohm up to thirty megohms. No external batteries or line power required.

METER RANGES—

A.C. Volts: 0-10/100/250/500/1000/5000. D.C. Volts: 0-10/100/250/500 1000 5000. Decibels: Minus 10 to plus 14/10 to 34/30 to 54. D.C. M.A.: 0-10/100/250. Microamps: 0 100. Amperes: 0-10.

Ohms: 0-3000/300,000/30,000,000. All D.C. volts ranges are 20,000 ohms per volt. A.C. ranges 1000 ohms per volt.

CONSTRUCTION is of the finest in materials and workmanship. Case is welded steel finished in grey morocco. Fitted with removable hinged steel cover. Protects meter and controls. Case dimensions: 8½" x 8½" x 6". Weight 6 lbs. Complete with self-contained battery. Furnished with test leads.

MODEL 642..... **NET CASH PRICE \$59.50**

UNIVERSAL VOLT-OHM-MILLIAMMETER—MODEL 643 (1000 ohms per volt)

MODEL 643..... **NET CASH PRICE \$45.00**

Same ranges as the Model 642 except micro-amps range is 0-1000 and ohms ranges are 0-3000/300,000/3,000,000.

THE JACKSON ELECTRICAL INSTRUMENT CO., DAYTON, OHIO

MODERN "SERVICE LAB" UNITS

Jackson Laboratory units are designed to fill the need for attractive service benches.

STREAMLINED Angled front panel for easy visibility of each instrument. This type styling makes the Service Lab more convenient in use and attractive in appearance.

EXTRA ACCESSORY PANEL—Every Lab unit is equipped with this feature. The accessory panel (see illustration) is already machined for easy installation of any special test features you might wish to add. This is actually a "custom built" feature—yet is included at no extra cost with each Jackson Service Lab.

INTERCHANGEABLE PANELS —Standard Relay Rack Size Panels— a feature originated by Jackson years ago in the first "Service Labs."

CUSTOMER APPEAL—Your well equipped modern shop will attract more customers and instill customer confidence. Test equipment mounted in these units will accelerate your volume of work, increase your accuracy, enabling you to obtain higher prices per job.

A.C. SWITCH and OUTLETS— Each lab is completely wired, ready for use. Two AC outlets and master switch on front panel. Also three AC outlets for installed instruments.

MODEL 805

Illustrated at left is one of the many combinations of instruments that may be installed in the Service Lab units. This unit Model 805 contains three separate instruments. Each is a complete portable instrument in itself and may be removed easily.

- Model 655 Audio Oscillator
- Model 640 RF Oscillator
- 650-A Condenser Tester

Start modernizing your shop today by ordering a Jackson Service Lab. Additional instruments may be added at any later date. Finished in attractive two tone grey mottro matching all Jackson instruments.

Model 805

SERVICE LAB RACKS AND PANELS

- 1401—Bench Lab rack only.
- 1400—Service Lab rack only. Completely assembled, wired with master AC switch and two outlets.
- 1403—Panel for single units such as 650, 642, etc.
- 1404—Panel for dual mounting of units such as 650, 642, etc.
- 1407—Panel for 637.

- 1408—Blank panel.
- 1409—Accessory panel 5'4" high.
- 1410—Panel for 655.
- 1411—Panel 636.
- 1412—Panel 641.

THE JACKSON ELECTRICAL INSTRUMENT COMPANY

Dayton, Ohio

DU MONT

Cathode-Ray TUBES ★ OSCILLOGRAPHS ★ EQUIPMENT

DU MONT TYPE 164-E 3" CATHODE-RAY OSCILLOGRAPH

★ A compact, portable instrument especially suitable for laboratory, shop, or field work. The 3" cathode-ray tube operates at an accelerating potential of 1,100 volts, thus providing brilliant, well-defined traces. Both amplifiers have uniform frequency response over their operating range: the single-stage vertical

amplifier has a voltage gain of approximately 43; the horizontal amplifier, which serves to amplify either sweep or externally applied signals, has a voltage gain of approximately 55. For added convenience, deflection signals may be applied directly to the cathode-ray tube without removing the cabinet.

DU MONT TYPE 208-B 5" CATHODE-RAY OSCILLOGRAPH

★ A moderately priced 5" instrument embodying many recent improvements that facilitate its application to the great majority of laboratory and production requirements. The Type 208-B is furnished with a 5" intensifier-type, high vacuum tube which operates at an accelerating potential of 1,400 volts, thus insuring trace brilliance. Freedom from

origin distortion, sharp focus at all deflecting frequencies, and a high deflection sensitivity that permits the viewing of moderately low-potential signals without the use of amplifiers, are additional features. The wide-band amplifiers provide symmetric deflection, and are direct-coupled to eliminate "electrical backlash" in the position-control circuits.

DU MONT TYPE 224-A 3" CATHODE-RAY OSCILLOGRAPH

★ The wide-range response of this instrument provides faithful reproduction of all wave-forms with steep fronts and resultant large-harmonic content, thereby permitting the study of signals such as pulses and square waves involving

frequency components as high as 5 megacycles. Numerous combinations of signal-input connections at the front panel provide added flexibility and convenience of operation. A special feature is the provision for intensity modulation of the grid of the cathode-ray tube. Included is a test probe with cable shielded to eliminate stray pickup for high-frequency work.

DU MONT TYPE 274-A 5" CATHODE-RAY OSCILLOGRAPH

★ The Du Mont Type 274-A Cathode-ray Oscillograph was developed as an inexpensive, general-purpose instrument for laboratory, radio service, and educational applications. The Type 274-A serves as an excellent null-indicator on inductance-

capacitance bridges, as a means of viewing voltage waveforms, as an output meter, as a means for measuring time and amplitude of pulses, as an indicator in studies of sound, light, electricity, and electronics, and many for other general applications.

Cathode-Ray TUBES ★ OSCILLOGRAPHS ★ EQUIPMENT

DU MONT OSCILLOGRAPH ACCESSORIES

DU MONT TYPE 185-A ELECTRONIC SWITCH

★ The Du Mont Type 185-A Electronic Switch may be used in conjunction with any oscillograph to observe two related or unrelated signals simultaneously on the screen of the cathode-ray tube. The zero axes of the two signals may be displaced for individual study of either pattern. The two patterns may also be superimposed for comparative studies. A typical application is the use of one channel for the signal to be studied while using the second channel for a timing signal.

SPECIFICATIONS

Switching rate: 10 to 2000 times/sec.
Frequency response: d-c to 5 kc.
Voltage gain: 10.
Input resistance: 0.1 meg.
Output resistance: 50,000 ohms.
Maximum input voltage: 150 v.

Maximum signal output: 75 v. peak-to-peak.

Dimensions: 11 $\frac{1}{4}$ " h., 7 $\frac{3}{4}$ " w., 13" d.

PRICE: Cat. #1072-A, 115 v, 40-60 cps.....\$105.00

PRICE: Cat. #1073-A, 230 v, 40-60 cps.....\$105.00

DU MONT TYPE 215 LINEAR TIME-BASE GENERATOR

★ The Du Mont Type 215 Linear Time-base Generator is used to extend the low-frequency time base of most five-inch, balanced-deflection, Du Mont oscillographs for the study of continuous low-frequency phenomena or transients. Its balanced-output signal voltage is adjustable to a maximum undistorted output of approximately 400 volts peak-to-peak, and supplies sweep frequencies from 0.2 to 125 cycles per second with a return-trace blanking signal of either positive or negative polarity. The single sweep may be initiated either manually or by the observed signal. The excellent linearity of the sweep is assured by a compensating circuit.

SPECIFICATIONS

Frequency: 0.2 to 125 cps, recurrent or single.

Output: Balanced, 400 x d-c max.

Positioning voltage: 300 v d-c.

Blanking output: Positive or negative.

Synchronization: External. Dimensions: 14 $\frac{1}{2}$ " h., 8 $\frac{13}{16}$ " w., 19 $\frac{1}{2}$ " d.

PRICE: Cat. #1189-A, 115 or 230 v, 40-60 cps. \$215.00

DU MONT TYPE 264-A VOLTAGE CALIBRATOR

★ The Du Mont Type 264-A Voltage Calibrator is designed to measure the peak-to-peak voltage of any signal viewed on a cathode-ray oscillograph. It may be used with any commercial cathode-ray oscillograph. Its square-wave output is continuously variable from 0 to 100 volts in 4 ranges. By throwing a selector switch, the signal to be measured or any of 4 ranges of calibrating voltage is applied to the input of the oscillograph, eliminating the need to switch leads between signal and

calibrating voltage. Amplitude measurements of any part of a complex, composite waveform may be made with the Type 264-A.

Range: 0-0.1; 0-1.0; 0-10; 0-100 volts.

Accuracy: $\pm 5\%$ of full scale on each range.

Input impedance: 20 uuf (signal connected through calibrator).

Size: 4 $\frac{1}{2}$ " x 8" x 5 $\frac{3}{4}$ "; wt. 5 lbs.

PRICE: Catalog #1240-A.....\$39.50

DU MONT TYPE 276 RUBBER VIEWING HOOD

★ The Type 276 Rubber Viewing Hood offers a practical method for shielding the eyes and the tube screen when observation of oscillographic patterns is to be made under unfavorable ambient-light conditions. Since it is made of durable soft rubber, it is readily adaptable to any oscillograph equipped with a 5" cathode-ray tube. Its overall length is 10 $\frac{1}{2}$ inches.

PRICE: Cat. #1210-A.....\$2.00

DU MONT TYPE 277 MICROPHONE

★ The Du Mont Type 277 Microphone is a bullet-shaped crystal microphone of unusually high output impedance, which makes it readily adaptable for direct connection to cathode-ray oscillographic input circuits. Its directional response is practically circular at all audio frequencies.

SPECIFICATIONS

Frequency response: Uniform to 10,000 cps.

Output impedance: Greater than 0.5 meg.

Output level: At 1000 cps: 50 db below 1 v/bar effective sound pressure, or 31.6 mv for 10-bar sound pressure.

PRICE: Cat. #1212-A.....\$23.95

HICKOK

TEST EQUIPMENT

NEW DYNAMIC MUTUAL CONDUCTANCE DISPLAY TUBE MERCHANDISER . . . WITH 9-Inch Illuminated Meter

**Most Outstanding
and Customer Convincing
Display Tube Tester
Ever Designed**

ROLL CHART COVERS MANY HUNDREDS OF TUBE TESTS—INCLUDING NEW NINE PIN TYPES. EMPLOYS THE FAMOUS HICKOK PATENTED DYNAMIC MUTUAL CONDUCTANCE METHOD. LARGE ENGLISH READING DIAL—AND MICROMHO RANGES ARE THERE—WHERE YOU NEED THEM.

Let your customers see for themselves the condition of their tubes. The DM532 builds customer confidence—helps you sell—makes more profit for you on over-the-counter sales. It is a quality built, accurate testing unit—and looks it. It's a sure-fire sales booster. Panel is modern, legible and lasting, with satin chrome finish.

Easy to read scales have MICROMHO ranges of 0-3,000, 0-5,000, 0-15,000 and English legends reading "Replace," "Doubtful" and "Good."

In selector switches complete flexibility has been provided to take care of all base pin connections; but in routine testing seldom more than one or two manipulations are necessary. It is easy to use.

Roll chart in the panel makes tube data easy to find.

Gas test provision quickly detects gassy tubes (which ruin AVC and IF stages).

Tests diodes separately with low voltage to prevent paralysis of the tube elements.

Tests all present-day tubes including Octal, Loktal, Miniature, Ballast, Magic Eye Tubes, and Nine Pin Tubes.

Will remain up-to-date for years and years. Provision for new tube designs is made.

Pure rectified D.C. current is used to energize plates and grids using two rectifiers.

Has all latest filament voltages. Dial is marked in voltage.

Tested and approved by the leading tube users in the country. Choice of high grade engineers.

Tests grid controlled rectifier tubes.

Size—26 $\frac{3}{4}$ " high, 17" wide, 11" deep.

Shipping Weight—50 lbs.; net, 32 lbs.

Power Supply—100-130 Volts, 50-60 Cycles.

Tube Complement—1 No. 83, 1 No. 5Y3GT.

**Model 532DM
Net Price \$139.00**

SPECIAL "D" SERIES DISPLAY EQUIPMENT

**To Sell and Safeguard
Your Service**

**Start to build your business
this sure-fire way NOW!**

**Separate Display Cases Available for Any
of These Hickok Testers You Already Have!**

Most Convenient "Fit All Space" panels that are possible to design.

Makes a Most Magnificent, Solid and "Stay Put" Layout.

Can be arranged in Sections or Multiples of Associated Units for Specialized Service. Rearrangement may be made as desired. Show Your Service "Know-How." Put it out where your customers can see it.

"D" SERIES WILL SELL IT—OWN IT—SAFEGUARD IT. The following instruments are available in display cases—Models 290—288X—195—156—534—191X—505—532.

Size, each case: 18 $\frac{1}{2}$ " high, 17" wide, 11" deep. (Oscilloscope cases: 18 $\frac{1}{2}$ " deep.)

Weights: Approximately same as regular models.

NEW DESIGN ALL-PURPOSE TUBE AND SET TESTER — Model 534

In addition to the many tube tester features of the 532, the Model 534 tube and set tester measures volts, ohms, milliamperes, capacitance, inductance, leakage and decibels. Specific features are as follows: Voltage Ranges: 0-20-200-500-1,000-5,000V A.C. and D.C. Resistance—0.1 ohm to 100 megohms in three overlapping ranges. No batteries needed. Capacitance—0.0001 to 100 microfarads in overlapping ranges. Checks leakage of electrolytic or paper condensers. Inductance up to 100 henries (or higher by simple calculation) with or without D.C. component. Decibel ranges —10 to ± 50 D.B. (or higher by simple calculation). Checks hum in any stage of the receiver. Meter scale 4½" long clearly marked for easy reading. Portable carrying case, black imitation leather covered hardwood with detachable cover.

TEST EQUIPMENT

Crystal Controlled

Microvolt Signal Generator

Model 191X

Model 191-X

Net Price, \$160.00

Model 191X is an accurate and dependable source of calibrated, modulated or unmodulated, radio frequency test voltages ranging in frequency from .25 kc to 120 mc, on fundamentals. Precision tests such as receiver sensitivity and selectivity tests are possible, as a vacuum tube voltmeter has been incorporated to accurately control the calibrated output voltages. Rapid and exact calibration and alignment of IF tanks of a receiver can be made by using the crystal controlled output at 100 kc, or 1000 kc, and its harmonics. Alignment and resonance may be very conveniently checked with a standard meter. Permits direct calibration of radio frequency output from .2 microvolts to 100,000 microvolts at all ranges.

SPECIAL FEATURES

Internal vacuum tube vacuum permits direct calibration of radio frequency output to 100,000 microvolts on all ranges. All output available from 0 to 2 volts. Minimum signal leakage as a result of complete shielding and newly developed cast aluminum attenuator housing, .01% accurate crystal controlled outputs. Both fixed and variable percent of amplitude modulation. Provision for external amplitude modulation from 10 to 10,000 cycles. Silicon-tuned double output meter, calibrated from 10 to 238.142, 5" and with over 100" of scale.

SPECIFICATIONS

- Dimensions—11" x 16 1/2" x 8"
- Weight—20 lbs.
- Meters—Model 51
- Scale—Over 100"
- Stainless-steel finish panel
- Blue bakel crackle lacquer finished case.
- Power—105-125V, 50-70 cycles, A-C
- Power Consumption: 20 watts at 115 volts

INDICATING TRACEOMETER

MODEL 156

The Model 156 rapidly locates troubles in radio and television receivers and facilitates the alignment and provides a means of checking the overall or individual stage performance of such electronic equipments. Five precision meters make possible seven simultaneous measurements with no interfering with the normal operation of the receiver. The RF signal can be traced and measured as well as local oscillator frequency and voltage, A-V-C and A-E-C voltages, etc., so that with this instrument any possible trouble in radio receivers can immediately be located and isolated.

SPECIAL FEATURES

Built-in speaker for monitoring either i-f, rf or af channels. Vacuum tube voltmeters cannot be damaged by overload. Four 12" low capacity shielded cables are supplied. DC voltmeter with zero center to permit measurement of voltages positive or negative with respect to ground.

SPECIFICATIONS

- Dimensions—11" x 16 1/2" x 11"
- Weight—22 lbs.
- Meters—Four Model S16
- One—Model S17
- Stainless-steel finish panel
- Blue bakel crackle lacquer finished case.

Power Supply Required: 105-125V, 50-70 cycles, A-C. Power Consumption: 25 watts at 115 volts. Frequency Range: RF-IF—Low Freq.—25-210 kc., 210,000 kc., 600-1,700 kc., OSC—High Freq.—250-1500 kc., 1.5-1.5 mc., 1.5-1.5 mc. AF Voltmeter—20-20,000 cycles, ± 20%. Voltage Ranges: DC Volts: 0 to 2.5, 5, 25, 50, 250, 500. RF-IF Volts—Microvolts: 0.5K-25K 100K. Volts: 0.5-2.5-10-25. OSC High Freq.—0.5-1.5-7.5-50-150-750. AF Volts: 0.1-10-100-1,000. Wattage Range: 0-150 watts. Input Impedance: DC Volts—18 megohms, RF-IF Volts—Microvolts—0.85 mmf, OSC High Freq. 1.2 mmf, AF Volts—2.0 megohms. Tube Complement: 3 6SK7—rf amplifiers, 3 6SQ7—af detectors and voltmeter tubes, 1 6SQ7—af amplifier, 1 6V67—audio amplifier and oscillator input amplifier, 1 6J5—dc voltmeter, 1 5Y3—power rectifier, 1 OD3 VR150—voltage regulator.

Net Price, \$195.00

HICKOK

TEST EQUIPMENT

UNIVERSAL CRYSTAL CONTROLLED SIGNAL GENERATOR Models 277, 277X and 288X

The Universal Crystal Controlled Signal Generators, Models 277, 277X and 288X, are specifically designed to meet the many and varied needs of the radio engineer and service man working with frequency and amplitude modulated receivers and with television equipment. The wide range in radio-frequencies and audio-frequencies available, with the many choices of type of modulation, makes these Models most versatile and practical instruments.

All three models are the same except for the following features: 0.01% accurate crystal controlled outputs, both amplitude modulated at 400 cycles and unmodulated, offered in Models 288X and 277X only. Self-contained decibel meter with 42" cable. Model 288X only.

SPECIAL FEATURES

Complete frequency modulation coverage with three variable bandwidths of sweep: 0-30 kc, 0-150 kc, 0-450 kc. Frequency modulation at two self-contained modulating frequencies: 60 cycles and 400 cycles. Provisions for external amplitude and frequency modulation to 15,000 cycles. Self-contained amplitude modulation at 400 cycles. Continuously variable audio frequency from 0-15,000 cycles. Audio frequency and radio frequency outputs are continuously variable from zero to maximum. 60 cycle synchronized sweep voltage is available for use with an oscillograph.

Model 288-X

Net Price, \$169.20

Dimensions—14" x 16½" x 8"

Weight—28 lbs.

Meter—Model 51X, Model 288X only

SPECIFICATIONS

Scale—over 100"

Satin-chrome finish panel

Blue baked Hammertex finished case.

POWER SUPPLY: 105-125 V. 50-70 cycles, A-C. Power Consumption: 20 watts at 115 volts. Amplitude Modulated, Pure R-F Frequency Range: 100 kc-110 mc. Frequency Modulated R-F Frequency Ranges: Narrow Band (0-30 kc Sweep): 100 kc to 110 mc in 7 ranges; Wide Band (0-150-450 kc Sweep) 1 mc to 160 mc in 7 ranges. Modulation: Amplitude Modulation—400 cycles; Frequency Modulation—0-450 kc variable sweep, 50 mc. modulating frequency 60 cycles; 0-150 kc variable sweep, 50 mc. modulating frequency 400 cycles; 0-30 kc variable sweep, 1000 kc. modulating frequency 60 cycles; External Modulation—Amplitude or frequency modulation, variable 0-15,000 cycles A-F Range: Fixed at 400 cycles, variable from 0-15,000 cycles. Crystal Controlled Output (Models 277X and 288X only)—100 kc. Unmodulated: 100 kc-15 mc. utilizing harmonics; 100 kc. 400 cycle amplitude modulated; 100 kc-15 mc. utilizing harmonics; 1000 kc. Unmodulated; 1000 kc-125 mc. utilizing harmonics; 1000 kc. 400 cycle amplitude modulated; 1000 kc-125 mc. utilizing harmonics. Output: R-F, continuously variable from 0 to maximum (with multipliers X1, X10 and X100); A-F, continuously variable from 0 to maximum, linear control, for both 400 cycle and variable frequency outputs. Synchronized Sweep Voltage: for horizontal deflection of oscillograph (60 cycles.) DB Meter Range (Model 288X only): -10 to +6, +6 to +22, +22 to +38. Tube Complement—1 6C4, 2 6SN7, 1 6SJ7, 1 6X5G.

TEST EQUIPMENT

NEW F.M. OSCILLOGRAPH Model 505

Model 505

Net Price: \$179.00

Power Supply: 105-125 V., 50-70 cycles, A.C. Deflection Sensitivity: Vertical—0.09 volts (rms)/inch. Horizontal—0.3" in. (rms)/inch. Horizontal, Direct—45 volts (rms)/inch. Input Impedance: Vertical—1 megohm, 25 mm. (H.F. Direct)—3 megohm. Tube Complement: 1 5UP1—cathode ray tube, 1 6SN7—r-f oscillator and mixer, 1 6J5, 1 6AG7—vertical amplifier, 1 6J7—horizontal amplifier, 1 6X5—rectance tube, 1 5Y3—high voltage rectifier, 1 5Y3—low voltage rectifier, 1 8S4—sweep circuit oscillator.

Specifically designed for use with frequency modulated, amplitude modulated and television equipment. Permits a complete visual analysis of the electrical and electronic circuits of the i-f and r-f bands as well as the audio frequency stages. The effectiveness of a tube or circuit as an amplifier, rectifier, or source of special wave shapes may be readily determined.

Interprets modulation, phase relations, voltage amplitudes, distortion, etc. Responds accurately to voltages in wide ranges of both frequencies and amplitudes.

SPECIAL FEATURES

Wide band, high gain vertical amplifier, 30 cycles to 1 megacycle. Self-contained wide-band frequency modulated oscillator with variable sweep width, 0-450 kc. Self-contained narrow-band frequency modulated oscillator with variable sweep width, 0-30 kc. Signal tracer jack is incorporated so that, when used in conjunction with a speaker or ear phones, the signal may be simultaneously seen and heard. Provisions for modulation by an external audio frequency source to provide the equivalent of a frequency modulated transmitter for receiver checks. Self-contained mixer circuit provided so that when used in conjunction with any good external oscillator, wide band or narrow band frequency modulated outputs may be produced within the frequency limits of the external oscillator. High sensitivity amplifiers. Calibrated screen. Has self-contained frequency modulated oscillator. Can be used with any signal generator for servicing FM or AM sets.

NEW 5" HIGH SENSITIVITY OSCILLOGRAPH

Model 195

With this oscilloscope you can align I. F. transformers, trace trouble, analyze wave shape of signal, determine unknown frequencies, amplify and view very weak signals. Has big 5" screen, extra high gain vertical amplifiers, sinusoidal sweep circuit and phasing control for proper I. F., R. F. and discriminator alignment.

TECHNICAL CHARACTERISTICS

- Power supply required: 105-125 V., 50-70 cycles A.C.
- Power Consumption: 50 Watts at 115 Volts
- Deflection Sensitivity:
 - Vertical—0.3 Volt (rms) per inch
 - Vertical, Direct—15 V (rms) per inch
 - Horizontal—0.15 Volt (rms) per inch
 - Horizontal, Direct—20 Volts (rms) per inch
- Input Impedance:
 - Vertical—1 meg, 25 mmf
 - Vertical, Direct—2.2 meg
 - Horizontal—4 meg, 35 mmf
 - Horizontal, Direct—2.2 meg
- Frequency Range:

Amplifier, Vertical—30 cycles to 50 kc
Amplifier, Horizontal—10 cycles to 50 kc
- Tube Complement:

Tube	Function
1 6J7	Horizontal Amplifier
1 8S4	Sweep Circuit Oscillator
1 6AG7	Vertical Amplifier
1 6X5	Low Voltage Rectifier
1 5Y3	High Voltage Rectifier
1 5UP1	Cathode Ray Tube
- Size: 8½" wide x 18½" deep x 13" high
Weight: Approximately 25 lbs.

Model 195

HICKOK

TEST EQUIPMENT

ELECTRONIC VOLT-OHM-CAPACITY MILLIAMMETER

Model 203

Model 203

A universal test instrument for all radio and electronic service work. Accurately and easily measures wide ranges of inductances, capacitances, resistances, currents and voltages, both A.C. and D.C.

Net Price
\$84.60

Model PR-203 — Same as above except with probe as shown below on Model 209.

Net Price \$94.20

High input impedance prevents loading when making voltage tests. Measurement of inductances are possible with the use of a conversion chart supplied in the instruction book. Damage due to overload is

impossible in all except current measurements. Regulated power supply incorporated permits normal operation and accuracy with wide line voltage fluctuation.

HICKOK

TEST EQUIPMENT

VOLT OHM MILLIAMMETER

Model 435

The Model 435 is built to the highest Hickok standards of engineering design, workmanship and material. The meters used in these Volt-Ohm-Milliammeters are especially built by Hickok for this service. The movement is large and rugged and the very high torque weight ratio gives lively, instantaneous pointer action. The movement is curve-corrected by an exclusive Hickok process which gives a higher accuracy at all points on the scale.

SPECIAL FEATURES

20,000 ohms per volt sensitivity on A.C. and D.C.
A-c power is not required for operation—especially convenient in many areas. Microampere, milliampere and ampere measurements provide an extremely wide range in current measurements. A.C. voltage output with D.C. components may be measured. Decibel power output measurements from -20 to +29 db may be made. Wide ranges in A.C. and D.C. voltage and resistance values may be measured.

Mod-1 435

Net Price, \$37.50

Weight—5 lbs.
Meter—Model S48
Satin-chrome finished panel
Blue baked Hammertex finished case.

Ranges—AC Volts and DC Volts: 0-2.5, 10, 50, 250, 1000, 5000; Ohms 0-10 megohms (4 ranges); Microamperes: 0-50; Milliampere: 0-2.5, 10, 50, 250, 1000; Amperes: 0-10; Decibels: -20 - +3, -8 - +15, +6 - +29; Output Volts: 0-2.5, 10, 50, 250, 1000, 5000. Sensitivity: AC Volts: 20,000 ohms/volt; DC Volts: 20,000 ohms/volt; Meter: 40 microamperes. Battery Complement: 1 Dry Battery, Radio C, 4.5 volts.

VOLT-AMPERE WATTMETER

Model 900A

Electrical Appliance Tester and Circuit Analyzer.
True to the Finest Hickok Tradition

For Measuring Actual Values of Volts, Amperes and Watts.
Ranges: A.C. Watts: 0-100-500-1000-2000. A.C. Amperes: 0-1.3-6.5-13-26. A.C. Volts: 0-130-260. A.C. Milliampere: 0-260.

Scale is 3¾" long, clear and legible. The Model 900A Volt-Amp-Wattmeter has been designed for all A.C. appliance-testing, from bell transformers and clocks to electric ranges operating on the 220-volt three-wire Edison system. The extremely low range of 0-20 watts will measure the power consumed by the smallest of appliances and is protected from accidental overload by a fuse. For measuring electric ranges the Number 9A and 9B special leads are available with standard three-wire range connectors. It tests appliances while in actual operation, indicating wattage consumption, amperes, and line voltage.

Mounted in a durable welded steel case with strap handle and rubber bumpers. Detachable leads, for small appliances, are furnished. Test leads with prods also included.

Service men will find a wattmeter especially handy for checking all A.C. sets.

Part No. C-105—This external current transformer is designed to give ranges of 5,000 and 10,000 watts and 65 and 130 amperes when used with Model 900A. Part No. C-105 transformer may be installed in lead compartment of carrying case. When transformer and carrying case are ordered together, transformer will be installed before shipping.

Model 900A—Size: 9½" high, 6¼" wide, 3" deep.
Shipping Weight: 8½ lbs.

Net Price, \$59.07

Model 900A

ELECTRIC INDICATING INSTRUMENTS

For Panel Mounting

Internal-pivot Direct-current and Radio-frequency Types

Type DW-51 voltmeter in a metal (brass) case

Type DW-52 ammeter in a molded Textolite case

These small panel instruments are particularly suitable for use in radio and other communications equipment where compactness, especially minimum depth behind the panel, is essential. Thinness is obtained by the use of a unique single-unit, high-torque element of the permanent-magnet, moving-coil type. In this element, the pivots, instead of being secured to the outside of the armature winding, are solidly mounted on the inside of the armature shell.

G-E internal-pivot instruments are available in a variety of standard ratings to measure direct current and voltage (Type DW-51), and radio-frequency current (Type DW-52). They are of the 2½-inch classification. The depth behind the panel is 0.89 inch for the molded Textolite case; 1.03 inches for the metal case.

OTHER TYPES

Many other types of G-E indicating instruments are available for panel mounting. They include 3½ inch a-c, d-c, r-f, and rectifier types in standard round cases as well as in rectangular cases, such as the one shown below. Also 2½-inch alternating-current instruments. Still other types can be supplied to meet unusual requirements.

INSTRUMENT AND TESTER SWITCHES

Rotary Selector — Single and Multi-Gang — Non-Shorting and Shorting*

The switch that's IN LAST PLACE on the trouble-shooter's check list . . . AND PROUD OF IT!

SS-14-2

SS-20-2

J-B-T Instrument Type Rotary Selector Switches were designed and developed to meet the need for trouble-free, dependable performance in hard service. These superior switches are used extensively in high quality test equipment, portable instruments, inspection setups and experimental circuits. Available in two basic types—14 and 20 position—the design gives extra contacts in minimum space. One to six decks.

FEATURES:

Reliability—Rigid, 3-post deck suspension, instead of the usual 2; all parts heavily coin silver plated to meet 200 hour salt spray test; ball bearing action, beryllium-copper spring, and special design detent wheel assure positive indexing. Laminated plastic decks and rotors selected for maximum mechanical and dielectric strength.

Exceptional Compactness—14-position switch takes 13 circuits and "off" in 2" circle, 20-position switch handles 19 circuits and "off" in 2-23/32" circle. Additional decks require only 5/16" spacing per section.

Low Contact Loss—Double-grip collector arms, and large-area contacts, silver to silver, result in on average contact resistance of .007 ohms or less during the useful life of the switch.

Ample Dielectric—Normal make-and-break with resistance load, 25 Ma. at 300 volts AC or DC; normal carrying capacity (not

make-and-break), 1 amp.; maximum momentary capacity (not make-and-break), 5 amp.; maximum voltage between contacts and ground, 1000 volts R.M.S.; between decks and ground, 2000 volts R.M.S.

* Standard items, but not regularly stocked; check with your distributor.

BASIC 14-POSITION: Knob supplied only on individually packed units—not on bulk orders unless specified. Collector arm placed directly opposite to flut of shaft, unless otherwise specified. Contact lugs and common lugs positioned as shown, 13 contacts per deck. One to six decks; for each additional deck (or gang) add 5/16" to depth. Continuous rotation type supplied unless otherwise specified. Adjustable Stop supplied when requested. Panel Locator available on special order. Special stabilizing end ring used on switches with three or more decks.

BASIC 20-POSITION: Knob supplied only on individually packed units—not on bulk orders unless specified. Collector arm placed directly opposite to flat on shaft, unless otherwise specified. Contact lugs and common lug positioned as shown, 19 contacts per deck, continuous rotation types. One to six decks; for each additional deck, add 5/16" to depth. Continuous rotation type supplied unless otherwise specified. Panel locator positioned as shown unless otherwise specified on bulk orders.

APPLIANCE TEMPERATURE TESTERS

A NEW IDEA IN TESTERS — The need for scientific but sturdy portable test equipment in the appliance service field is met by this exclusive line. Here the user profits from J-B-T's wide experience in building field test sets for many well-known manufacturers of ranges, irons, refrigerators, deep freeze units, and similar equipment. All J-B-T testers include the principle of remote reading of temperature,—and temperature measures the real usefulness of the appliance.

OVEN TEMPERATURE TESTERS

MODEL 32-JP-3. Checks oven temperature of gas and electric ranges and other appliances. Ideal for testing and setting thermostats. Has 5½' thermocouple, clip for attaching to grill, and convection shield for steady readings. Exceptionally fast, continuous response; automatically compensates for ambient temperature. Range 0—650° F; black leatherette case 6" x 3¾" x 3¾", including SA-116 5½' calibrated thermocouple, clip and shield.....\$22.75

MODEL 32-JP-4. An oven temperature tester same as Model 32-JP-3, plus binding posts and leather carrying strap. Permits quick attachment of

other thermocouples to check irons, toasters, waffle-bakers, roasters, etc. Complete with SA-116 5½' calibrated thermocouple, clip, and shield.....\$23.75

ALL-PURPOSE TESTER

MODEL 61-JRT. This 9-in-1 tester is the very latest for accurate temperature adjustment and precise electrical circuit analysis. For ranges, refrigerators and many other appliances. Rapidly reads four cold zones, —100° to +80° F, up to 14' distant; two heat zones, 0—600° F, up to 5½' distant; one voltage range, 0—300 A.C.; and, with transformer, two current ranges, 0—30 and 0—60 amps., A.C. Sturdy, polished walnut case 15½" x 10-3/16" x 4¾" with handle and slip hinges. Two-color etched metal panel. Separate switches protect bulb and ammeter circuits. Requires one standard flash-light cell, easily replaceable in the field. Temperature scale accuracy ±2% of full scale. A.C. readings ±5% (±3% for rectifier). Space for four SA-162 Resistance Bulbs with 14' polyethylene lead, two SA-116 thermocouples with clip and shield, one pair of 4' electrical leads with prods and plugs, and enclosed transformer. Other accessories, listed below, may be

ATTACHMENTS AND SPARE PARTS

THERMOCOUPLES

SA-116 with SHIELD and CLIP. Flexible No. 22 gauge iron constantan, asbestos insulated, 5½', with attachment clip and convection shield; for use with Models 32-JP-1, 32-JP-2, 32-JP-3 and 32-JP-4 oven testers; also 60-JRT and 61-JRT all-purpose testers.\$1.65

SA-170 (REPLACEMENT THERMOCOUPLE for IRON TESTERS 32-JIT and IT-1). Thermocouple and lead, including aluminum plate and special tip, quickly installed in the field.....\$1.90

SA-175 (PLAIN TIP). For roasters, waffle irons, etc., 5½' iron constantan flexible No. 22 gauge, asbestos insulated, with small ball tip; used where clip and shield of SA-116 not suitable; for Models 32-JP-2, 32-JP-4, 60-JRT, and 61-JRT.....\$1.30

SA-176 (for TOASTERS, etc.) 5½' iron constantan No. 22 gauge, asbestos insulated, with special disc to collect heat; easily attached to 32-JP-2 and 32-JP-4 oven testers, also 60-JRT and 61-JRT.\$2.25

added for testing irons, grills, roasters, toasters, etc. As described, except including two SA-162 resistance bulbs, two SA-116 thermocouples, one pair electrical leads, and AS-TR-2 built-in transformer.\$97.50

MODEL 61-JRT (less transformer). Same unit, same scales, except does not read in amperes; AS-TR-2 transformer assembly omitted.....\$85.00

COLD ZONE TESTER

MODEL 50-50. Designed for cold testing in refrigerators, deep-freeze units, locker plants, dairies, etc. Temperature range of —50° to +50° F., 2° divisions, also —45° to +10° C., 1° divisions (for laboratory and export purposes). Black metal case 8" x 5¾" x 3½". To test, simply put the bulb wherever desired, close the door, make one adjustment, and read temperatures continuously. Requires no pressure measurement nor spraying of refrigerant and does not have to be connected into refrigerant lines or other mechanisms. Complete with one SA-162 resistance bulb and 14' polyethylene lead.\$42.95

IRON TESTER

MODEL 32-JIT. Checks all makes; measures thermostat temperatures; and shows open or short circuits. Sturdily constructed, no thermocouple springs, no glass thermometers; automatically compensated for room temperature. Bench type basic tester, companion to the oven and cold zone testers. Also indicates operating temperature of the sole plate (working surface) on non-electric or cordless irons. 10" x 12" x 5½", scale 0—650° F, 15 amp. fuse, 6' cord, 110 volt, 50-60 cycles.....\$28.75

IRON TESTER THERMOCOUPLE, MODEL IT-1. This attachment is identical with the 32-JIT, except there is no meter. It is easily connected to Models 32-JP-2, 32-JP-4, 60-JRT and 61-JRT. Shows open circuits and shorts, checks sole plate temperatures and thermostats on all types of irons.\$14.75

RESISTANCE BULBS (FOR COLD TESTING)

SA-162. For use only with Models 50-50 and 61-JRT; identified by embossed part number.....\$5.00

SA-142. For use only with Model 60-JRT; calibration is not interchangeable with SA-162; has no embossed number.....\$5.00

TRANSFORMERS

AS-TR-2. Attachment for compartment of 61-JRT all-purpose tester, completely housed, with jumper lead and panel; reads 30 and 60 AC amp. scales on tester.....\$15.00

AS-TR-3. Attachment for increasing usefulness of 60-JRT all-purpose tester. Includes side rails for attaching inside compartment; fully housed. Reads 30 and 60 AC amp. by dividing volt scale by 10 or 5.....\$16.50

TEMPERATURE INDICATORS

WHERE TO USE: To check heat rise of motors, transformers and coils; for laboratory furnaces, inspection set-ups, for remote indication of infra-red and other oven temperatures; and to maintain controlled industrial processes such as heat treating and annealing. When used with selector switch, permits centralized reading of one to ten thermocouples, as in Diesel exhaust manifold applications.

MODEL 32-J

MODEL 32-J PYROMETER IN SN-3 STAND. Mounted in sloping front black metal stand, 4 1/4" high x 4 1/8" deep x 4 1/8" wide. Compensated for ambient temperature. Medium resistance system, damped for quick reading on 2 3/8" scale, assures ruggedness and pointer stability. To retain the accuracy of the installation: use only the type and resistance of thermocouple and lead which are provided, do not cut extra lead—coil it—change in length changes calibration. A protection tube is not generally required. Many users find it convenient to keep an extra couple and lead on hand.

MODEL 32-J IN SN-3 STAND

0°—650° F—350° C, includes SA-81 thermocouple, SA-84 lead, and CB-1 connector block **\$27.50**
 0°—1200° F—650° C, includes SA-87, SA-82, and CB-1 **\$27.50**
 0°—2000° F—1100° C, includes SA-87, SA-82, and CB-1 **\$27.50**

MODEL 32-J IN SN-5 STAND (not illustrated). With 3 binding posts to accommodate flexible extra lead and thermocouple for hard-to-reach locations.

0°—650° F with SA-91 thermocouple, SA-84 lead, CB-1 connector block, and SA-96 flexible lead and thermocouple **\$31.00**

TEMPERATURE

LEAD WIRES. To bring the reference junction within the pyrometer, compensating or extension lead wires should always be used. See the instrument dial for (1) the kind of lead and (2) combined resistance of lead and thermocouple. Standard leads include:

SA-82 6' compensating lead for chromel-alumel couples; duplex, stranded; asbestos-insulated, cotton-braid impregnated with moisture-proof and flame-proof compound; terminals at instrument end; other end tinned for connector block **\$1.40**

SA-83 26' compensating lead for chromel-alumel as above **\$4.40**

SA-84 6' extension lead for iron-constantan, 1938 calibration; duplex; moisture-proof and flame-proof; prepared as above **\$1.40**

SA-85 26' extension lead for iron-constantan, 1938 calibration; similar to above **\$4.40**

SA-86 7' iron-constantan thermocouple and lead combined; twisted pair No. 20 Ga., asbestos-insulated—for intermittent use on 600° F scales; terminals at instrument end; other end welded; (resistance is not interchangeable with SA-84 nor with SA-85) **\$1.70**

THERMOCOUPLES. For pyrometers and leads above, J-B-T thermocouples are carefully selected, standardized, and tested.

SA-87 12" No. 14 Ga. chromel-alumel, 2-hole ceramic beads, fits 5/16" hole; welded tip **\$2.80**

SA-88 same except 24" No. 14 Ga. **\$3.50**

SA-89 12" No. 8 Ga. chromel-alumel, 2-hole ceramic beads, fits 7/16" hole; welded tip **\$2.80**

SA-90 same except 24" No. 8 Ga. **\$3.50**

SA-91 12" No. 14 Ga. iron-constantan, 1938 calibration; 2-hole ceramic beads, fits 5/16" hole; welded tip **\$2.35**

Flexible Thermocouple, 7' length, see SA-86 lead wire.

MODEL 60-JPS

MODEL 60-JPS. This portable makes it easy to know temperatures at one to ten locations. Excellent for study of heat in various parts of the same equipment, or in a battery of units. Knife-edge pointer, 5.6" scale. Heavily-duty thermocouple switch has average contact resistance of .00075 ohms or less. Automatically compensated for ambient temperature, indoors or outdoors. To retain accuracy of 1% full scale, use leads and thermocouples equal to resistance and e.m.f.s-temperature characteristics for which instrument is calibrated. Medium resistance system assures portability. Housed in natural-finish wood case 1 13/16" x 8 5/8" x 4 5/8" over rubber feet. A "must" for inspection, maintenance, and engineering.

60-JPS—0°—600° F with SA-86, 7' thermocouple and lead for small apertures **\$92.60**

60-JPS—0°—1200° F with SA-88, SA-82, and CB-1 **\$5.00**

60-JPS—0°—2000° F with SA-38, SA-82, and CB-1 **\$5.00**

60-JP—For one thermocouple only, furnished with thermocouple and lead same as 60-JPS but without selector switch **\$67.60**

0°—600° F, with SA-86 **\$70.00**

60-JP—0°—1200° F, with SA-88, SA-82, and CB-1 **\$70.00**

60-JP—0°—2000° F, with SA-88, SA-82, and CB-1 **\$70.00**

Note: When ordering additional thermocouples, specify couples and leads as above. Centigrade equivalent scales available on order.

Model 70-J

MODEL 70-J PYROMETER, for accurate reading at a distance, has full 6" scale and spade pointer, with accuracy of 1% of total scale deflection. Automatically compensated for ambient temperature. Molded case mounted in metal protecting shell 7 7/8" x 8 1/8" x 1 1/2". Connections through bottom of case for wall or front-of-board mounting. When ordering, specify which standard scale range: 0°—600° F for 1938 std. I-C; 0°—1200° F for C-A; 0°—2000° F for C-A thermocouples.

PRICE, including 24" thermocouple and 26' lead **\$60.00**

Note: Centigrade equivalent scales available on order.

ACCESSORIES

CONNECTOR BLOCK Model CB-1. Lava connector block, withstands high temperatures, accommodates all thermocouples up to No. 6 Ga. Heavy brass connectors keep contact resistance low. Can be used independent of connector head. **\$1.50**

CONNECTOR HEAD Model CH-6. Connector head encloses connector block and rigidly supports protection tube around thermocouple. Opens for thermocouple inspection without disconnecting circuit. Normally supplied with reducing bushing for 1/2" i.p.s. Composition bushing at top can be removed for permanent 1/2" conduit installation. Including block **\$2.50**

PROTECTION TUBES protect and support "base-metal" thermocouples such as above. Used in permanent installations at higher temperatures, or in damaging atmospheres. One end is closed, other end normally threaded for 1/2" i.p.s. Proper quality of tubing is very important.

No. 1 Wrought Iron—For temperatures to 1200° F in oil baths, brazing, and general intermittent duty.

TU-11 No. 1—12 inches **\$1.50** **TU-12** No. 1—24 inches **\$2.00**

No. 7 Alloy—27% chromium, iron; drilled tube; for cyanide pots, salt baths with cyanide, open fire with sulphurous content; to 2300° F.

TU-5 No. 7—12 inches **\$9.00** **TU-6** No. 7—24 inches **\$13.50**

No. 9 Alloy—62% nickel, 13% chromium, seamless drawn; for salt baths without cyanide; for gas and oil open fire furnaces and general use, except sulphurous atmospheres; to 2300° F.

TU-2 No. 9—12 inches **\$5.00** **TU-3** No. 9—24 inches **\$8.50**

Note: For temperatures above 2300° F, platinum, platinum-rhodium thermocouples are available.

VIBRATING REED FREQUENCY METERS (PATENTED)

J-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone, and television service, on engine generator sets, in laboratories, in many types of electronic equipment, on panel and control boards in central stations and industrial plants—wherever constant or known frequency is important to efficient operation of equipment.

PRINCIPLE OF OPERATION:

Simple in design, the J-B-T Meter consists of a case, base, dial and central mounting frame, with a series of spring steel reeds screwed to a reed mounting bar, individual driving coil surrounding each bank of reeds, permanent magnet, series resistor and terminal studs.

Each reed is adjusted to respond by resonance to but one frequency. As the alternating current (or interrupted direct current) excites the driving coil, the one reed "in tune" with the frequency in the coils will respond by vibrating rapidly because of permanent magnet polarization and induced magnetism from the coil. The instrument is adapted to specified operating voltage by a series resistor. Frequency of the current is read on the graduated face of the instrument.

ADVANTAGES:

Some standard models are available in either half cycle or full cycle steps, as shown below on two meters indicating a frequency of 60 cycles.

Both response patterns are extremely easy to read. In the half cycle instrument the response is broad; in the full cycle instrument, the response is sharp.

Guaranteed accuracy of $\pm 0.3\%$ or better, depending on the model—not an overall percentage based on the maximum scale reading, but applied to each frequency being measured.

High fatigue safety factor for continuous operation, and outstanding temperature stability. Temperature compensators are not required.

All meters are permanently calibrated at the factory and do not require subsequent adjustment. Accuracy is not affected by wave form or external magnetic fields.

These meters are rugged. Built with no pivoted parts and with lock washers at every critical point, they can take rougher treatment than many instruments.

CAUTION:

If a meter plugged in on a 60 cycle AC power line does not indicate a frequency of exactly 60 cycles, trust the meter! Power supply may momentarily be off-frequency due to changing load conditions beyond the control of Utility. All J-B-T Vibrating Reed Frequency Meters are accurately calibrated at the factory, entirely independent of frequency of power supply.

MODEL 30-F

Range: 48-52 and 58-62 cycles.
Double window for ease of reading frequency in either range. Often specified for export. 100-130 volts; 130 ohms per volt; 1 watt power consumption. Accuracy $\pm 0.3\%$. Flush panel mounting.

30-F, 48-52 and 58-62 cy., $3/4$ " Metal Case \$25.00
30-FX, 48-52 and 58-62 cy., $3/2$ " Molded Case, AWS mtg. \$25.00

MODEL 30-F

MODEL 31-F

Used in standby power equipment. Handy for accurately measuring frequency of power source. Five reeds, 58-62 cycles. Other characteristics same as Model 30-F.

31-F, 58-62 cy., $3/4$ " Metal Case \$21.50
31-FX, 58-62 cy., $3/2$ " Molded Case, AWS mtg. \$21.50

MODEL 31-F

MODEL 34-FX

Used where a broader frequency band is desirable. Nine reeds, 56-64 cycles, or in half-cycle steps (accuracy $\pm 0.2\%$) 58-62 cycles. 100-130 volts; 130 ohms per volt; 1 watt power consumption. Flush panel mounting.

34-F, 56-64 cy., $3/4$ " Metal Case \$24.75
34-FX, 56-64 cy., $3/2$ " Molded Case \$24.75
34-F, 58-62 cy., $3/4$ " Metal Case \$26.25
34-FX, 58-62 cy., $3/2$ " Molded Case, AWS mtg. \$26.25

MODEL 34-FX

Above: Models 30-F, 31-F, 33-F, 34-F; Metal Case

Below: Models 30-FX, 31-FX, 33-FX, 34-FX; Molded Case

MODEL 33-F

400-cycle. Used for measuring frequency of high-cycle power sources, including new heavy aircraft. Accuracy $\pm 0.3\%$. Nine reed, 380 to 420-cycle range. 100-300 volts; 70 ohms per volt; 1.75 watts power consumption. Flush panel mounting.

33-F, 380-420 cy., $3\frac{1}{4}$ " Metal Case \$31.00
 33-FX, 380-420 cy., $3\frac{1}{2}$ " Molded Case, AWS mtg. \$31.00

MODEL 21-FX

Smallest frequency meter manufactured. Meets ASA (AWS) C39.2-1944 in depth of case as well as in mounting dimensions and mounting hardware. Matches other $2\frac{1}{2}$ " panel instruments. Weighs only $4\frac{1}{2}$ oz. 100-130 volts; 5 reeds; 58-62 cycles; 190 ohms per volt; 0.6 watt power consumption. Also 116 to 124 cy.; 160 ohms per volt; 0.7 watt power consumption. 390 to 410 cy.; 85 ohms per volt; 1.3 watt power consumption. Flush panel mounting.

21-FX, 58-62 cy., 2-11/16" Molded Case \$20.50
 21-FX, 116-124 cy., 2-11/16" Molded Case, AWS mtg. \$23.00
 21-FX, 390-410 cy., 2-11/16" Molded Case \$25.00

PORTABLE FREQUENCY TESTERS

MODEL 33-FP-9. Handy, compact, portable instrument of exceptional accuracy even under poor wave-form conditions, fluctuating voltage or external magnetic disturbances. Meets exacting test requirements of aviation, signal and communication equipment. Treated against fungus and moisture. Housed in sturdy metal case $6'' \times 3\frac{3}{4}'' \times 3\frac{3}{8}''$. Hinged top compartment provided for the 4' leads which are supplied complete with sharp 5" insulated test picks and banana plugs. Electrical characteristics identical with 400 cycle 33-F. Model 34-FP-9 electrical characteristics identical with 60 cycle 34-FX.

33-FP-9, 380-420 cy., \$38.00
 34-FP-9, 58-64 cy., \$31.75

ELAPSED TIME COMBINATION

MODEL 31-FE. A unique panel instrument which combines the elapsed time meter or running time meter with frequency reeds. It is especially useful on motor generator sets and on electrical equipment where maintenance routine calls for periodic servicing. Reads 9,999.9 hours; 58-62 cycles at 100-130 volts.

31-FE \$30.00

VACUUM TUBE FREQUENCY METERS

(PATENTS PENDING)

PRINCIPLES OF OPERATION: J-B-T Models 33-VTF and 39-VTF Vacuum Tube Frequency Meters are designed to provide the maximum degree of accuracy in measuring frequencies located within definite bands. A special multi-vibrator circuit in the electronic unit divides the incoming frequency by two or three or even higher integers, then permits the use of a vibrating reed frequency meter in measuring the resultant frequency.

WHERE USED: J-B-T Models 33-VTF and 39-VTF are especially useful for checking audio oscillators, frequency converters, radar equipment, and for standardizing less accurate frequency measuring units.

ADVANTAGES: **Extreme Accuracy:** Measurement within $\pm 0.25\%$ for any indicated frequency. **Permanent Accuracy:** Calibrated at factory—no subsequent calibration or standardization required at any time. **Temperature Drift Eliminated:** No initial stabilization period required. **Burn-Out Proof:** No protection needed against accidental frequencies above the range being measured. **Few Controls:** Requires no complicated controls for operation. **Stability of Circuit:** Accuracy of reading is independent of line voltage variation. No voltage regulator, external or internal, is required.

Model 33-VTF with cover removed. Vacuum tube unit attaches to rear of panel, meter is flush.

MODEL 33-VTF, FIELD TYPE

Frequency ranges: 380-420 cycles; 760-840 cycles; 1140-1260 cycles; available singly or in combination. (See Model 33-F for single range 380-420 cycle meters). Voltage range: 100-130 volts. Power to operate

the units is obtained from an inverter or other source of frequency being measured. Power consumption: approximately 20 watts. This model requires no power supply other than the source whose frequency is being checked. Input impedance: approximately 650 ohms. Tubes used: 1—6N7-GT/G multi-vibrator; 1—6V6-GT/G amplifier; 1—6X4-GT/G rectifier. Size $4\frac{5}{8}'' \times 5\frac{1}{2}'' \times 6''$; weight: approximately 6 lb. Black wrinkle finish. Frequency meter is $3\frac{1}{2}''$ standard flush panel mounting. Connecting leads included.

MODEL 33-VTF

Single range 760-840 cy. \$110.00
 Single range 1140-1260 cy. 117.50
 Double range 760-840; 1140-1260 cy. 125.00

MODEL 39-VTF, LABORATORY TYPE

Frequency ranges: Basic range, 380-420 cycles. Multiplier switch permits use in ranges of 2, 3, 4, 6 and 9 times the fundamental range. (400, 800, 1200, 1600, 2400 and 3600 cycle bands). Voltage range: 100-350 volts. Power consumption: Approximately 25 watts at 115 volts, 60 cycles. Input sensitivity: 500,000 ohms. Size: housed in metal cabinet $8'' \times 10'' \times 8''$ with sloping panel.

Model 39-VTF, Series A— \$257.00

Model 39-VTF, Series A, showing portability

Shurite PANEL METERS

Model 550-AC

Model 550-DC with Zero Adjuster

Model 650-AC

Model 950-DC(or AC)

Model 450

Shurite panel meters are attractive, rugged, dependable instruments with accuracy well within 5%. All models are black enameled brass, all require 2 3/32" hole. DC meters are polarized vane solenoid type, AC meters are double vane repulsion type.

Advantages of this new and complete line:

All-metal dials, age and moisture resistant, lithographed in black on white for high visibility.

Improved design, with new coil frames and attached insulators for greater rigidity, yet interchangeable in other respects with similar type of instrument formerly available.

Improved appearance, with concealed coils, full view scales, and attractive styling and finish.

Guarantee: All Shurite meters are guaranteed to users against defective workmanship and material, and will be repaired or replaced if sent to the factory postpaid with 25¢ handling charge within one year after date of purchase.

Model 550-DC, flush case, narrow ring, round, has long U-bracket.

Model 550-AC, flush case, narrow ring, round, has ring clamp.

Models 650-DC and 650-AC, flush case, wide round flange, have screw holes for mounting, hardware included.

Models 950-DC and 950-AC, flush case, square flange, have screw holes for mounting, hardware included.

IMPORTANT—How To Order:

For all standard models, give: (1) Model Number, (2) Range, (3) Stock Number. If Model number and stock number are not stated, Model 550 will be supplied.

ZERO ADJUSTERS(Z)

Zero Adjusters are available only on Models 550-DC and 650-DC. No zero adjuster on Model 950. When ordering, add Z to stock number. Example: Stock number for Model 550-DC voltmeter, 0-1 volt range—without zero adjuster is 5101. With zero adjuster, it is 5101-Z.

PANEL CALIBRATION(S)

Meters are calibrated for non-magnetic panels. If for magnetic (steel) panel mounting, specify thickness and overall size of panel, and add-S to stock number when ordering, as 5101-S. If thickness of panel is not specified, meter will be supplied for .040 panel.

(Prices shown are net for individually boxed meters)

RESISTANCE METERS

RANGE	MODEL 550		MODEL 650		MODEL 950	
	Stock No.	Net Each	Stock No.	Net Each	Stock No.	Net Each
Ohms. Volts	57C*	\$1.80	6701	\$1.90	9701	\$1.95

*Requires 3 flashlight cells for resistance readings but does not require resistor for voltage readings.

FLANGE ADAPTER RING

A sturdy flange ring for use with any Model 550 (round) Shurite meter where a flange mount is preferred. Makes appearance similar to Model 650. Wide flange, 2 3/8" dia. Telephone black finish. Screws, lockwashers and nuts included.

Model 5-A, NET.....\$0.18

POCKET TYPE METERS

As this catalog goes to press, a series of Shurite pocket meters is being put into production. They will be made in ranges suitable for pre-war and post-war dry batteries, portable radio batteries, and many other low-voltage electrical applications, including polarity indication types.

Special attention is being given to test load requirements.

The Model 450 designates the pocket meter case. For example, a 0-3 D.C. ammeter, as illustrated, becomes Stock Number 4202 when in the pocket meter case.

For details, request Bulletin "Shurite Pocket Types".

TYPE NF-2C

EMICO PRECISION INSTRUMENTS

FOR
PANELS AND TEST SETS

Electro Mechanical Instrument Co.
813 Chestnut Street, Perkasie, Pa.

TYPE RF-2C

EMICO panel and test meters are rugged and reliable instruments. Cases are of steel and finished in durable black. DC meters have the new HI-TORQ magnetic movements and are accurate to well within 5%. AC meters are of the moving iron type and are also accurate to within 5%.

MOUNTING—All model NF-2C and RF-2C meters will fit into a 2 1/4" diameter hole and are mounted by means of a U. clamp.

DESIGN—EMICO meters are designed to give satisfactory service under the most severe conditions. They are styled to add to the prestige and appearance of electrical equipment.

CALIBRATION—Since the instruments are calibrated in steel cases, their accuracy is not affected by panels made of magnetic materials of nominal thickness.

GUARANTEED—All EMICO instruments are guaranteed against defective material and workmanship for a period of one year after date of purchase, and will be repaired or replaced if sent to the factory postpaid with a 50c handling charge.

EMICO instruments are available in quantities to jobbers or manufacturers in the following sizes: NF-2", RF-2", RF-2 1/2", and RF-4 1/2" at 3% accuracy. We invite your inquiries on instruments for special application.

PRICES—Prices listed are net and include all hardware and individual boxing.

EMICO HEARING AID BATTERY TESTER

MODEL 103A

Note These Features:

- Unbreakable Metal Case
- Beautifully Finished Case
- Powerful Mechanism
- Color-Fast Metal Dial
- Easily Read Dial
- Reliably Accurate
- Will Not Drain Batteries

Designed to Test
All Types of
2 Volt "A" Batteries
and 22 1/2, 30 and 45 Volt "B" Batteries

Available also in
0-9 and 0-90 Volt Range —

WESTON INSTRUMENTS

THROUGHOUT the radio and electronic industry—as well as all other industries where precise measurements are essential—maintenance men and engineers have long associated WESTON instruments with accuracy and dependability through experience with them. The following list indicates the broad scope of the WESTON line—all units of which are giving long service in a far-reaching variety of installations.

Portable Indicating Instruments. Ammeters, Voltmeters, Wattmeters, Galvanometers, Microammeters, Ohmmeters, Microfarad meters.

Panel Mounting Instruments. Ammeters, Voltmeters, Wattmeters, Galvanometers, Microammeters, Ohmmeters, Microfarad meters.

Instrument Transformers. Potential and Current.

Relays. Sensitive and Power Uses—Current and Voltage Types.

Aircraft Instruments. Tachometers, Temperature Indicators, Radio Compass Indicators, Ammeters, Voltmeters, etc.

Electric Tachometers. A.C. and D.C. Types Remote Indicating.

Standard Cells.

Laboratory Standards. Voltmeters, Ammeters, Wattmeters.

Specialized Testing Equipment. Power Analyzer, Photoelectric Potentiometer, Industrial Analyzer, Clamp Ammeter, Battery Testing Instruments.

Service Equipment. Tubecheckers, Analyzers, Ohmmeters.

Photoelectric Cells. "Photronic" Cells—Dry Disc Type.

Photoelectric Control Devices. "Photronic" Cell Controls, Illumination Controls, Industrial Controls.

Light Measuring Devices. Illumination Meter, Foot Candle Meters, Sight Meter, Exposure Meters, Densitometers, Light Integrators.

Temperature Indicating Instruments. ELECTRICAL TYPE—Remote Indicating. BIMETALLIC DIAL TYPE—Industrial Temperature Gauges.

Instrument Accessories and Parts. Shunts, Cables, Resistors, Switches, Binding Posts, Leads, Multipliers, Adapters, Radio Plugs, etc.

WESTON ELECTRICAL INSTRUMENT CORPORATION
617 Frelinghuysen Avenue, Newark 5, New Jersey

PRECISION MOVEMENTS

Burlington PANEL INSTRUMENTS

AC and DC types are accurate to within 2% of full scale value at any point on the scale.

DC instruments combine extremely light weight moving elements and powerful alnico magnets to produce a torque to weight ratio which reduces frictional error to a minimum. This high torque to weight ratio permits use of pivots with ample pivot bearing surface to overcome effects of rough handling, shock, and vibration.

AC instruments are accurate over entire range of commercial power frequencies (25 to 125 cycles). These instruments are of repulsion vane type using carefully aged and impregnated field coils and multipliers which are wound with conductors of ample size so that temperature rise of the windings may be maintained at a minimum, even though instrument is subjected to continuous use in the circuit.

MARION TRULY HERMETICALLY SEALED 2 1/2" AND 3 1/2" ELECTRICAL INDICATING INSTRUMENTS... 100% GUARANTEED!

Sealed like a vacuum tube

Marion Glass-To-Metal Truly Hermetically Sealed Electrical Indicating Instruments are guaranteed for six months. You get top performance . . . critical accuracy . . . at a price no higher than that of most competitive unsealed instruments.

Additional economy is offered in Marion's special replacement offer. After the initial six-month guarantee expires, any 2 1/2" and 3 1/2" type, ranging from 200 microamperes upward, will be replaced, regardless of whether the instrument has been overloaded, burned out, or mistreated . . . provided the seal has not been broken, for a flat fee of \$1.50. Instruments with sensitivity greater than 200 microamperes will be replaced for \$2.50.

SPECIFICATIONS

Model HM2 — 2 1/2" Model HM3 — 3 1/2"

- There are no rubber gaskets, and no cement seals.
- Can withstand all extremes of temperature and humidity, required by any service, or test specification, without deterioration to the seals, or harm to the efficiency of the moving system.
- Windows are of double thickness tempered glass processed for solder sealing, and are highly resistant to shock.
- Instruments are completely dehydrated and are filled with dry air at sea level pressure.
- A newly designed crowned crystal permits greater scale length, reduces shadows, and makes for better visibility.
- Magnetic shielding permits interchangeability on any type of panel without affecting calibration; can be supplied silver plated for extra R.F. shielding.
- Silver clad beryllium copper hair springs reduce zero shift at all temperatures.
- Standard Kovar glass bead type terminals with solder lugs.

MARION "4 FOR 1" FEATURE

Interchangeable Round and Square Colored Flanges . . . one instrument can thus fill four different needs:

1. ROUND

2. ROUND FOR STEEL PANEL

3. RECTANGULAR

4. RECTANGULAR FOR STEEL PANEL

- Instruments manufactured in accordance with AWS Spec. C.39.2 1944 and JAN 1-6 plus hermetic sealing.
- They are positively interchangeable—Type HM2 with AWS Types MR24 and 25; Type HM3 with AWS Types MR 34 and 35.

MARION ELECTRICAL INSTRUMENT COMPANY

Manchester, New Hampshire

EXPORT DIVISION 458 BROADWAY NEW YORK 13 U. S. A. CABLES MORHANEX

IN CANADA: THE ASTRAL ELECTRIC COMPANY, SCARBORO BLUFFS, ONTARIO

Model 52N

Models 52N and 52S are standard 2 1/2" class instruments, the 52N meeting JAN 1-6 physical dimensions for MR 25 round series and the 52S meeting commercial standards for the 2 1/2" rectangular types. These instruments have gained popularity in portable radio equipment, pocket test equipment and general electrical service where space is at a premium.

Model 52S

Model 53RN

Model 57S

Model 57S is an 8 1/2" x 7" instrument with a large open face and an extra long scale. It is constructed with enlarged pole shoes, and with a higher torque movement than other Marion types in order to give maximum performance in an instrument of its size. This instrument is supplied with a very high damping factor and is not just an overgrown 3" meter. Overall accuracy of 1%, and can be supplied with mirror scales. The 57S finds wide application in large vacuum tube voltmeters, in multimeters, and as an easily read production instrument in many of the measuring and testing operations that are performed in any electrical or electronic manufacturing plant. It is commonly used, too, as a production ohm-meter, limit bridge indicator, and in such varied applications as vibration amplitude measurements and automotive tire balancing.

MARION ILLUMINATED DIALS . . . EASILY SEEN! QUICKLY READ!

Marion's new design of instrument-dial illumination insures brilliance without glare. The technique employs a transparent lucite cavity and an especially developed alnico magnet with a reflector shaped front face that concentrates the rays on the warp-free, permanent translucent dial.

This dial illumination feature is available on all, except Marion Glass-To-Metal Truly Hermetically Sealed Meters.

MARION STANDARD INSTRUMENTS

The most important ingredient of Marion design, engineering and construction is simplicity. Our instruments, in special and unusual types as well as conventional models, employ a minimum of parts, each selected for quality and durability. Combined with simplicity of design and engineering, this makes for better performance, under severe conditions, over longer periods of time. Whether your requirements demand custom-built or standard instruments, you can depend upon the functional simplicity of Marion designs to provide the most in service and value.

MARION MULTI-RANGE METERTESTER

With self-contained power supply and control equipment for operation on 110 volts, AC, 60 cycles . . . for production testing, and calibration of DC instruments.

The MARION METERTESTER is designed with many operational features which will definitely improve the production rates of any meter inspection department. Moreover, its accuracy is such that it may be used for checking purposes in any department and all laboratories employing instruments. It may also be used as a precise source of DC current and voltage. Overall accuracy is better than 1/2 of 1%. Basic sensitivity of the Mirror Scale Standard Instrument is 10 milliamperes. The complete unit is housed in a hand-rubbed, solid walnut carrying case.

For use in any department and all laboratories where instruments are employed and their performance must be carefully checked.

With self-contained power supply and control equipment for operation on 110 volts, AC, 60 cycles . . . for production testing and calibration of DC instruments. No additional accessories are required. Merely connect the two clips to the instrument under test, and proceed to analyze its accuracy and general performance.

INCLUDES . . .

- Regulated Power Supply.
- Stepless Vacuum Tube Voltage Control.
- Large 8 1/2" Mirror Scale Standard Instrument, Hand Calibrated.
- Decade of .1% Accurate Manganin Wire Wound Resistors.

Model 55

Model 55 is a popular test equipment item, having a large case—4 1/2" x 4 1/2"—and long 100% scale. It is well suited for use in vacuum tube voltmeters, bridges and volt-ohm-milliameters. The internal construction is identical with that of the 53RN. Can be supplied with mirror scales for special applications.

A SPECIAL SERVICE FOR YOUR INDUSTRIAL CUSTOMERS

Marion has opened a Short Run Shop for the production of "special" instruments to meet your specifications . . . precision-built units that you can buy in *sample* lots.

You'll appreciate the savings in time, money and materials that this modern, completely equipped Short Run Shop can achieve for you. The high degree of functional simplicity and critical accuracy Marion "Special" offer, improve product performance . . . make it unnecessary for users to develop their own makeshift instruments with Special characteristics.

Your Marion specials will give the utmost in satisfaction, service and value . . . the same high standard of performance that has identified the regular line of Marion instruments for years.

Send us your specifications, we will send you a quotation.

AVAILABLE IN ZERO CENTER AND OTHER RANGES ON SPECIAL ORDER

Model 56—6 1/2"

Model 56 is a 6 1/2" x 5 1/4" bakelite cased instrument of entirely new design with heavy cross sections to stand the most rugged use. It fills the need for an instrument between Models 55 and 57S which are 5 and 8 inch meters. It has a 100°, 5 1/2 inch arc and a large open face readily adaptable to multi arc dials. Supplied with large Alnico II magnets in milliammeter ranges and Alnico V in the more sensitive microammeter ranges. Employs a Marion Bulldozer bracket which assures rugged construction and long, dependable service. Ideal for equipment which needs a large dial easily read from a distance or with plenty of space for a multi-range scale.

NULL INDICATORS

Marion Null Indicators are extremely sensitive shaded pole piece D'Arsonval type galvanometers. They are used primarily as bridge and potentiometer balance indicators and in any application where an instrument with very high sensitivity about the zero or balance point is desired. We particularly recommend Types HM2 and HM3 because they are hermetically sealed instruments which completely shield the galvanometers from the effects of moisture and dirt, and external factors. Ideal for use in discriminator alignment of FM receivers and as general laboratory balance indicators.

Model 53SN

Models 53RN and 53SN are standard 3/4" class instruments, the 53RN meeting JAN I-6 physical dimensions for MR 35 round series and the 53SN meeting commercial standards for the 3 1/2" rectangular types. Applications include radio and electrical test equipment, radio, radar, telegraph and telephone switchboards and general laboratory usage.

Model MC1—4"

Model MC1 features the rugged Alnico construction of the Types 53RN, 54S, 54S, etc., plus the magnetic shielding which a steel case affords. Has a much longer scale than the standard 3 1/2" type. Normal accuracy is 1%, may be ordered to an accuracy of 1/2%, with hand-marked mirror scales. Every type MC1 includes a shatterproof glass window. Applications include finer type of test equipment, switchboards and marine use where great precision and extreme ruggedness are required. Available at prices that are unusually economical for an instrument of this quality.

Model 53R

Model 53R features the sintered soft iron pole shoes, heavy Alnico magnet, and excellent overall accuracy. An enlarged face opening permits inclusion of more information on the scale when used for special applications. Applications include radio and electrical test equipment, radio, radar, telegraph and telephone switchboards, and general laboratory assignments.

Model 52RM

Model 52RM is a narrow flange, brass cased instrument. (The brass case offers R. F. shielding for many applications.) It contains the same rugged Alnico movement and the same scale length that are common to the 52S and the 52N.

**MARION
MULTI-RANGER
METER**

- ACCURATE!
- DURABLE!
- DEPENDABLE!
- A GREAT VARIETY OF SIZES!

When it comes to TEST EQUIPMENT build your own with Marion Multi-Ranger Meters. They will solve your problem of finding reasonably priced instruments with the critical accuracy you demand for test equipment or other auxiliary equipment with multiple functions.

These Multi-Ranger Meters permit you to assemble a highly accurate instrument for use as a voltmeter, milliammeter, high and low resistance ohmmeter, AC voltmeter and decibel meter. — Build As Many Ranges As You Desire.

All instruments use Alnico Magnets, have full 100° three-color scales, feature the new, tough Marion "Bulldozer" moving system that insures long life under severe operating conditions plus the highest degree of accuracy.

STERLING PANEL METERS

AMMETERS, VOLTMETERS, MILLIAMMETERS

FOR USE ON DIRECT AND ALTERNATING CURRENT

A COMPLETE MODERN LINE

These improved STERLING Panel Meters while retaining the accuracy, beauty and ruggedness which have always characterized STERLING instruments, show a modern trend in the gracefully unique arrangement of the broader and more clearly defined scales. The meters for alternating current and direct current are perfectly matched and therefore suitable for mounting on the same panel. Both the A.C. and D.C. meters are of the permanent magnet, iron vane, solenoid type. This affords positiveness of action and breadth of movement suggestive of those of the D'Arsonval type. The large needle-tipped pointers and wide clearly marked scale divisions of these panel meters make them easily read.

STERLING Panel Meters may be had in any of the types illustrated.

SPECIAL COMBINATION A.C.-D.C. METERS WITH HAIR-SPRING REPULSION TYPE MOVEMENT FITTING SAME CASES, ARE ALSO AVAILABLE.

Standard package, 100 meters, Shipping weight 30 lbs.

ALL STERLING Panel Meters are guaranteed accurate within 5%.

Dia. case 2 3/8". Depth case 3/8".

Type 68 square flange case furnished for any range of meter at an additional list price of 40 cents each.

Sterling

STERLING POCKET METERS

STANDARD LINE

Direct Current Pocket Ammeters, Voltmeters and Voltammeters for all Purposes

STERLING Pocket Meters are useful in all kinds of battery testing, in railroad signal work, and in telephone and low-voltage electrical work generally. They are polarity indicators.

No. 24A Ammeter

No. 45 Voltammeter

- No. 24 Ammeter, for testing No. 6 dry cells. 0-35 ampere scale, 1 ampere divisions. List Price\$1.85
- No. 24A Ammeter for testing dry cells including the heavy-duty Ignition type of cell. 0-50 ampere scale, 1 ampere divisions. List Price, \$2.10

- No. 23 Ammeter, for photo-flash dry batteries. 0-20 amp. scale, 1/2 amp. div. List Price, \$2.25
- No. 33 Voltmeter for ordinary single cells and "Flashlight" cells, 0-3 v. scale, 1/10 v. div. List Pr., \$2.10
- No. 34 Voltmeter for "Hot Shot" and Radio batteries. 0-10 volt scale, 1/5 volt div. List Price, \$2.10
- No. 34A Voltmeter for 12 volt batteries. 0-16 volt scale, 1/2 volt divisions. List Price, \$2.30
- No. 34B Voltmeter for ordinary 22½ v. radio "B" batteries. 0-30 v. scale, 1 v. divisions. List Price, \$2.30
- No. 34C Voltmeter for testing ordinary 45 v. radio "B" batteries. 0-50 v. scale, 1 v. div. List Price, \$2.60
- No. 44 Voltammeter for "Hot Shot" and Radio batteries and No. 6 dry cells, 0-35 ampere scale, 1 ampere divisions; 0-10 volt scale, 1/5 volt divisions List Price, \$2.50
- No. 44A Voltammeter for 12 volt batteries and No. 6 dry cells. 0-35 ampere scale, 1 ampere divisions; 0-16 volt scale, 1/2 volt divisions. List Price, \$2.75
- No. 45 Voltammeter for testing No. 6 dry cells and ordinary 45 volt radio "B" batteries. 0-35 ampere scale, 1 ampere divisions; 0-50 volt scale, 1 volt divisions. List Price, \$3.60
- No. 45A Voltammeter for testing dry cells including the heavy-duty Ignition type and ordinary 45 v. radio "B" batteries. 0-50 amp. scale, 1 amp. div.; 0-50 v. scale, 1 v. div. List Price, \$3.85
- Meters 2¼" in diameter and 5/8" thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

STERLING SPECIAL-PURPOSE POCKET METERS—NEW SERIES

Testers for Portable Radio Batteries

The special "A" and "B" dry batteries built for the operation of Portable Radio sets cannot be satisfactorily tested with ordinary battery testers. The new STERLING double voltmeters are designed for testing with correct loads the special "A" and "B" dry batteries used on Portable Radio sets. The new STERLING flexible plugs of these meters fit easily into the small closely spaced socket holes.

No. 38A Voltmeter

- No. 37A Voltmeter for 45 v. "B" batteries and 1.5 v. "A" batteries. Scale 0-50 v., 1 v. div. Scale 0-2 v., 1/10 v. div. Tests 45 v. "B" and 1½ v. "A" batteries List Price, \$3.00
- No. 38A Voltmeter for 90 v. "B" batteries and 1.5 v. "A" batteries. Scale 0-100 v., 5 v. div. Scale 0-2 v., 1/10 v. div. Tests 45 v. and 90 v. "B" batteries and 1½ v. "A" batteries. List Price, \$3.25
- No. 39A Voltmeter for 90 v. and 135 v. "B" batteries and 1.5 v. "A" batteries. Scale 0-150 v., 5 v. div. Scale 0-2 v., 1/10 v. div. Tests 90 v. and 135 v. "B" batteries and 1½ v. "A" batteries. List Price, \$3.25
- No. 40A Voltmeter for 90 v. and 135 v. "B" batteries and 4.5 v., 6 v. and 7.5 v. "A" batteries. Scale 0-150 v., 5 v. div. Scale 0-10 v., 1/5 v. div. Tests 90 v. and 135 v. "B" batteries and 4½ v., 6 v. and 7½ v. "A" batteries List Price, \$3.50
- No. 42A Graphic General Tester. Red and Green color chart for all standard batteries including 45 v. and 90 v. "B" batteries and 1.5 v., 4.5 v., and 7.5 v. "A" batteries. 0-100 v. scale for special sizes of "B" batteries, 5 v. div. Tests all Portable Radio batteries. List Price, \$6.00

No. 531 Plug-In Safety Type Double Voltmeter

Testers for Hearing Aid Batteries

- No. 31A Double voltmeter for special 30 or 45 v. "B" batteries and 1½ v. "A" batteries, scale 0-50 v., 1 v. div., scale 0-2 v., 1/10 v. divisions. Carefully engineered to impose the correct loads on the small delicate batteries used to operate vacuum tube hearing aids. Equipped with new STERLING flexible plugs List Price, \$3.50
- No. 531 Plug-in—Safety type double voltmeter for testing hearing aid batteries. This new tester has the same capacity and scales as the No. 31A. No cord is necessary because the rigid plug-in type terminals are designed to fit hearing aid batteries having accessible keyed sockets. This arrangement makes it impossible to overload the No. 531 instrument or reverse the polarity while it is being used for testing hearing aid batteries List Price, \$3.50
- No. 35A Voltmeter for batteries used on carbon type hearing aids, also "C" batteries, scale 0-5 v., 1/10 v. divisions List Price, \$2.25
- Meters 2¼" in diameter and 5/8" thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

STERLING PANEL METERS

TYPE 50 METERS

TYPE 50

THE Type 50 meters were designed for use on installations where a somewhat larger instrument in the small-panel-meter class is required. **Furnished in all of the Sterling standard scales**, they are housed in Bakelite cases and may be had for measuring either alternating or direct current. The A.C. movements are of the hair-spring repulsion type and the D.C. movements of the permanent magnet iron vane type.

DIMENSIONS OF THE TYPE 50 METER

Diameter of Flange.....	3 $\frac{1}{4}$ Inches
Diameter of Case.....	2 $\frac{5}{8}$ Inches
Depth of Case.....	1-13/32 Inches

Metal Dial—Bakelite Case

The Sterling Type 50 Meters are guaranteed accurate within 5%.

BRADSHAW TEST EQUIPMENT

INSTRUMENTS GO

Every Radioman needs "RANGE MASTER" MODEL 10 The 8-in-1 Service Instrument

Radiomen need—and prefer—"Range Master" because it offers a greatly simplified system of range selection. "Range Master" reduces to a minimum the cumbersome test lead changes required by other wide range analyzers, and PROVIDES RANGES NOT FOUND IN ANY OTHER COMPARABLE INSTRUMENT.

"Range Master" is the ideal instrument for RADIO TESTING, Appliance Repairing, Service Calls, Amateur and Experimental Work

TELEVISION SERVICEMEN . . . why guess, measure! "Range Master" is the only instrument in its class that can be used as an OSCILLOSCOPE CALIBRATOR. A standard bleeder will deliver 1-10-100 accurate RMS volts from A.C. line.

RANGE MASTER MODEL 10

"Range Master" Combines Sensitivity with Accuracy

- A high order of accuracy is maintained for each of the 25 RANGES, thus permitting precise measurements of Voltages, Currents, Resistances, and Capacitors.
- Alternating Current ranges are ideal for dynamic performance testing of Radios, Electrical Appliances, Motors, Electric Refrigerators, etc.
- The one volt A.C. range serves as a sensitive output indicator, which permits broad or narrow band receiver alignment.
- The Ohmmeter is powered by a 4½ volt self-contained battery.
- Condenser ranges operate from the standard 60 cycle 110-120 volt power lines.
- Accuracy 3% D.C., 6% A.C.
- Sensitivity 1000 ohms per volt.

Portable Model RANGE MASTER has polished oak case with handy tool compartment \$26.95 net

An 8-in-1 INSTRUMENT, "Range Master" covers these 25 ranges:

1. CAPACITY—0.001-.1, .01-1, .1-10 Mfd.
2. A.C. CURRENT—0-.15, 0-.15, 0-15 amps.
3. A.C. VOLTAGE—1 10 100 500 1000 volts
4. D.C. VOLTAGE—10 100 500 1000 volts
5. D.C. CURRENT—1 10 100 1000 milliamps.
6. RESISTANCE—0 to 10,000 100,000 1 meg-ohm.
7. Special High range ohmmeter to 2 megs and 20 megs without external battery.
8. Sensitive A.C. microammeter to 1100 microamps.

The "Range Master" Model 10 — Fused, was designed for schools and industrial organization, interested in keeping repair bills low. A standard "Littelfuse" protects the rectifier, meter movement, and shunt against overload on all ranges.

VALUABLE FEATURES:

- Carefully engineered and **sturdily constructed**.
- Attractively designed with a two-color engraved bakelite panel.
- Three-inch clear view meter with specially designed scales give **maximum readability**.
- Compact, light, and rugged.
- Size: 5¼" x 6¾" x 2¼".
- Shipping Weight: Approx. 4½ lbs.
- Housed in an attractive bakelite case complete with internal battery and operating instructions.

LABORATORY TEST EQUIPMENT

← No. 1030 LOW FREQUENCY "Q" INDICATOR

Direct reading "Q" indicator for frequencies from 50 cycles to 50,000 cycles. "Q" range from 0.5 to 500 with up to 50 volts across the coil.

No. 1010 COMPARISON BRIDGE

An invaluable instrument for precision laboratory adjustment and incoming inspection of resistors, capacitors and inductors. . . . Entirely self-contained, A.C. operated and includes a three frequency oscillator, an A.C. bridge and a null detector.

No. 1020 DIRECT READING MEGOHMMETER

Measures insulation resistances up to 2,000,000 megohms . . . 500 volt D.C. potential included in the instrument. . . . Entirely self-contained and A.C. operated.

No. 1110 INCREMENTAL INDUCTANCE BRIDGE →

Inductance range from 1 Mhy to 1000H. . . . Frequency Range from 60 to 400 cycles. . . . D.C. range from .5 Ma to 1 Amp.

No. 1040 VACUUM TUBE TYPE VOLTMETER →

Voltage range from .001 volt to 100 volts .25 db from 10 cycles to 200,000 cycles. Logarithmic voltage scale giving 2% accuracy at any point on the scale.

← No. 1060 VACUUM TUBE VOLTMETER

The 1060 wide range voltmeter can be used at audio, supersonic and radio frequencies. Frequency range from 10 cycles to 1.6 megacycles. Input impedance 50 megohms. Input capacity 15 mmf. Range from .001 to 100 volts in five steps. Logarithmic voltage scale giving 2% accuracy at any point on the scale.

Electrical Test Equipment

WHEATSTONE BRIDGE

● Sturdy, carefully engineered instrument for use in lab, plant or field. Both models self-contained with 4½ v. battery and galvanometer. Provision for external galvanometer and batteries if desired. Both models have ratio dial settings of .001, .01, .1, 1, 10, 100 and 1000, as well as built-in resistance standards of 1, 10, 100 and 1000 ohm decades. Ratios guaranteed to .05% tolerance. Resistance dial resistors to .1%. Self-cleaning, four-leaf phosphor-bronze wiper switches with detent mechanism mounted below panel. Galvanometer of well-known moving-coil type. Separate binding posts for external galvanometer if desired, and for use of bridge as resistance decade. Hardwood case with removable cover. 9¼ x 7½ x 6¼" h. Wt. 9¼ lbs. net; 12¼ lbs. shipping.

Model RN-1. Standard Portable Wheatstone Bridge complete with batteries. Net Price \$100.00

Model RN-2. Standard Portable Wheatstone Bridge with Murray & Varley Loops. Net Price \$125.00

RESISTANCE DECADES

● In standard models with resistance ranges of 0 to 999,999 ohms total. ±1% of nominal. Self-cleaning, four leaf phosphor-bronze wiper switches with detent mechanism mounted below panel. Hardwood case. Models DR-1 to DR-4, 5¼ x 8 x 4" h.; wt. 4 lbs. net, 6 lbs. shipping. Models DR-10 to DR-14, 4¼ x 6 x 4" h.; wt. 3 lbs. net, 5 lbs. shipping. Models DR-50 to DR-52, 6¼ x 9 x 4¼" h.; wt. 5 lbs. net, 7 lbs. shipping.

Model No.	Total Resistance Ohms	Decade Steps	Accuracy	Price
DR-1	999,000	9x(1,000 - 10,000 - 100,000)	±1%	\$ 50.00
DR-2	99,900	9x(100 - 1,000 - 10,000)	±1%	50.00
DR-3	9,990	9x(10 - 100 - 1,000)	±1%	45.00
DR-4	999	9x(1 - 10 - 100)	±1%	44.00
DR-10	9	9x1	±1%	20.00
DR-11	9	9x1	±1%	20.00
DR-12	90	9x10	±1%	20.00
DR-13	900	9x100	±1%	20.00
DR-4	9,000	9x1,000	±1%	22.00
DR-50	9,999.9	9x(.1+1+10+100+1,000)	±1%	65.00
DR-51	99,999	9x(1+10+100+1,000)	±1%	70.00
DR-52	999,990	9x(10+100+1,000+10,000+100,000)	±1%	100.00

CAPACITANCE DECADES

● Calibrated directly in capacitance readings from left to right. Progressive adjustment in .01 or .001 mfd. steps depending on model. .001 to 11.1 mfd. can be obtained by group as-sembly. All units employ paper or mica capacitors of highest quality and stability. Hardwood case with hinged cover and snap lock. DK-3, DK-1 and DK-2A, 7 x 8 x 5½" h.; wt. 8 lbs. net, 12 lbs. shipping. DK-10 and DK-11, 11 x 8¼ x 7" h.; wt. 10 lbs. net, 12 lbs. shipping.

Model	Mfd. Steps	Accuracy	Dielectric	P.F.	Peak Volts	Price

MEGOHM METER

● For high-speed testing of capacitor leakage resistance, insulation resistance and insulation measurements. Extra charging terminals charge capacitors prior to test. Broad scale meter. Self-contained source applies 200 volts. External battery voltage up to 1000 volts if desired. Internal checking standard to check and adjust calibration. Stable operation. Accuracy within ±2% of full scale. Range of 1 megohm to 100,000 megohms on four multiplier ranges of 1, 10, 100 and 1,000. Highest range can be extended to 500,000 megohms with external 1,000 v. supply. Hardwood case. Sloping bakelite panel. 15 x 8 x 10" h. Wt. 19 lbs. net, 23 lbs. shipping.

Model L-2A Megohm Meter with tubes. Net Price \$145.00

Model L-2AU Universal Model for use on 110-220 v. A.C. power line, available on special order. Net Price \$160.00

MEGOHM BRIDGE

● Wheatstone Bridge but with "magic eye" indicator in place of costly and delicate galvanometer. Operates entirely from A.C. power line. Self-contained D.C. supply. Accuracy within 5% from 1 to 15 on scale; as close as readable on remainder of scale. Hardwood case with slipping removable cover. Wt. 6¼ lbs. net, 8¼ lbs. shipping.

Model MB-4. 100 to 100,000 megohms. 500 v. D.C. Bridge source. Net Price \$60.00

Model MB-6. 100,000 ohms to 100 megohms; 10 megohms to 10,000 megohms. Net Price \$60.00

Model MB-8. 1 megohm to 1,000 megohms; 100 megohms to 100,000 megohms. Net Price \$75.00

Model MB-11. 1 megohm to 1,000 megohms; 10 megohms to 10,000 megohms; 100 megohms to 100,000 megohms. Net Price \$120.00

VOLTAGE BREAKDOWN TESTER

● Simple, positive, safe and quick means of testing voltage breakdown of materials or components. Stepup transformer accurately controlled by Variac. Load limited to 5 milli-amperes over full range for safety. Also safety switch if chassis is removed from case. Operates on A.C. line. Green light flashes when instrument is operative. Red light indicates voltage breakdown. Direct reading from meter.

Model P-1 Voltage Breakdown Tester, with tubes. 15 x 8 x 10". Wt. 29 lbs. net, 32 lbs. shipping. Net Price \$150.00

Model P-2 Voltage Breakdown Tester with tubes, and with added 0-3000 v. A.C. outlet. 15 x 8 x 10". Wt. 29 lbs. net, 32 lbs. shipping. Net Price \$200.00

Model P-3 Voltage Breakdown Tester (not illustrated) with tubes. Upright metal cabinet. 15 x 21 x 28" h. Wt. 150 lbs. net, 195 lbs. shipping. Net Price \$350.00

BROWNING WWV STANDARD FREQUENCY CALIBRATOR — MODEL RH-10

Specifically designed for receiving transmissions from radio station WWV on either 5 or 10 megacycles and employing these as primary frequency standards. Provisions are made so that secondary standards which are in subharmonic relation with WWV transmissions may be accurately compared. Filters are employed so that the 440 or 4000 cycle modulation may also be used as primary standards.

ELECTRICAL FEATURES

- Pre-tuned for 5 and 10 megacycles per second reception of radio station WWV. Either frequency may be selected by switch. On special order, pre-tuned frequencies of 2.5 and 5 or 10 and 15 megacycles per second may be substituted.
- Sensitivity better than 1/2 microvolt on any band. Antenna input impedance is high to permit use of single wire antenna. Tuned coupler may be used if desired.
- Selectivity 10 db down at 5 KC off resonance.
- Excellent image rejection minimizes interference. Rejection ratio is more than 50 db.
- Front panel provisions are made for coupling secondary standard or other RF sources and comparing their fundamentals or harmonics with WWV transmission.
- Cathode ray audio indicator permits comparison between RF source and WWV transmission within 1/10 cycle per second using zero beat method.
- A dual inverter system allows the selection at will of either the 440 or 4000 cycle modulation of WWV. Either may be employed as a primary frequency standard. Output voltage adjustable from 0 to 5 volts.
- Voltage supplied to stable local oscillator is regulated to reduce to a minimum frequency drift.
- Panel speaker has a separate control which allows the output to be varied at will.
- 100-125 volts AC operation. 85 volt-amperes input.
- Tube complement: one Type 6SJ7, three 6SK7, one 6SA7, one 6SN7, one 6J5, one 6SQ7, one OD3 VR-150, one 5Y3, one 6U5.

Net Price \$250.00 F.O.B. Winchester, Mass.

MECHANICAL FEATURES

- Supplied in either standard rack panel with dust cover or in a steel cabinet.
- Aluminum panel finished in black leatherette with engraved labels.
- Large fluted knobs are provided.
- Panel connectors are standard universal band type posts which will also accommodate banana-type plugs.
- Dimensions: Cabinet Mounting Height 9", Width 19", Depth 11". Rack Mounting Height 8 3/4", Width 19", Depth 10 1/2".
- Weight: Cabinet Mounting 30 lbs., Shipping Weight 35 lbs. Rack Mounting 25 lbs., Shipping Weight 40 lbs.

BROWNING POWER SUPPLY AND SQUARE WAVE MODULATOR — MODEL TVN-7

MECHANICAL FEATURES

- Unit designed for rack mounting.
- Heavy steel panel with black wrinkle finish.
- All labels engraved into panel surface.
- Dimensions: Height 9 3/4", Width 19", Depth 11".
- Weight: 33 lbs. Shipping weight: 50 lbs.

Designed as the basic unit of a signal generator in the super high frequency range, the TVN7 consists of a regulated power supply and square wave modulator for low powered velocity modulated tubes such as the 417A, 2K28 (formerly 707A and 707B), 2K25 (formerly 723A and 723B).

ELECTRICAL FEATURES

- Range of cathode voltage is 28 volts to 480 volts continuously variable. Provision is made for reduction to 180 to 300 volt range.
- Range of reflector voltage is 15 volts to 160 volts. Controlled from panel.
- Provision is made for grid pulse modulation or reflector pulse modulation. Amplitude of grid pulse is 60 volts while the reflector pulse voltage is 100 volts maximum.
- Square wave modulation frequency is variable from 100 to 100,000 cycles.
- Provision is made for external modulation.
- Electronically tube regulated.
- 110-115 volts, 60 cycles AC operation. 170 volt-ampere input.
- Tube complement: one Type 80, two OD3 VR-150, one 6SN7, one 6Y5, one 6A3, one 5R4GY, one 6SJ7.

Net Price \$210.00 F.O.B. Winchester, Mass.

BROWNING CAPACITANCE RELAY MODEL DD-20

Designed to detect and translate small capacitance changes into action. Has direct application as intrusion alarm or as indicator of small changes in capacitance.

ELECTRICAL FEATURES

- Operates alarm circuit on changes in capacitance of the order of 0.25 mmfd.
- Panel meter will indicate changes in capacitance as small as .005 mmfd.
- Mechanical movements as small as .00001 of an inch can be readily indicated on the meter.
- As indoor intrusion alarm, boundaries up to 200 feet may be protected.
- Output provisions are flexible, relay operation will provide: closed circuit, open circuit, or 115 volts AC at 10 amperes.
- Electronically regulated power supply for maximum stability.
- Operation frequencies variable from 50 kilocycles to 150 kilocycles.
- 105-125 volt, 60 cycle AC operation. 80 volt-amperes input.
- Tube complement: three Type 6V6GT, one 6SA7, three 6SJ7, one 6H6, one 6N7, one VR-90, one 80.

Net Price \$225.00 F.O.B. Winchester, Mass.

MECHANICAL FEATURES

- Supplied in 8 3/4" rack panel mounted in a steel cabinet finished in black wrinkle.
- Aluminum panel finished in black leatherette.
- All labels engraved into panel surface.
- Antennae or capacitance leads enter through top of chassis.

BROWNING OSCILLOSYNCHROSCOPE — MODEL OL-15B

MECHANICAL FEATURES

- Steel cabinet finished in black wrinkle with 1/8" aluminum panel.
- Panel finished in black leatherette with all labels engraved directly on panel.
- Copper-plated steel chassis with lacquer finish.
- Controls grouped according to function for convenience of operation.
- Components arranged for electrical efficiency and ease of servicing.
- Dimensions: Height 15 3/4", Width 12 3/4", Depth 19 3/4".
- Weight: 95 lbs. Shipping weight: 150 lbs.

A laboratory instrument designed for the observation of wave forms and transient phenomena requiring a variety of time bases, triggers, phasing and delay circuits, and extended range amplifiers. It may be used for work on laboratory applications where extremely short pulses or phenomena of irregular occurrence rate must be studied. It is also designed for television, communication, radar, and facsimile work. The special features are combined with the functions of a standard oscilloscope with greater ease and convenience of operation as a result of improved design.

ELECTRICAL FEATURES

- Five-inch 5JP1 cathode-ray tube with 4000V accelerating potential for improved intensity and definition of images.
- Sawtooth sweep with range of 5 cycles per second to 500 kilocycles per second permitting observation of radio frequency wave forms.
- Single sweep triggered time base for observation of transient phenomena or phenomena of varying repetition rates.
- Internal trigger generator and built-in phasing circuit for use with single sweep time base.
- Extended range amplifiers. The vertical amplifier is flat within 3 db. from 10 cycles per second to 6 megacycles per second. The horizontal amplifier is flat within 1 db. from 5 cycles per second to 1 megacycle per second. Maximum vertical deflection sensitivity is .05 R.M.S. volts per inch.
- The response curve of the vertical amplifier which is linear and without positive slope from 10 cycles to 4 megacycles has transient response such that a 100 kilocycle square wave with rates of rise and fall in the order of 500 volts per microsecond is faithfully reproduced.
- Low-capacitance, high-impedance probe for use with vertical amplifier. Voltage attenuation of probe is 10:1.
- Provisions for direct connection to all deflection plates.
- Internal or external blanking of beam for timing purposes and for elimination of retrace.
- Voltage regulation of all low-level stages for stability of operation under varying line voltage conditions.
- Built-in voltmeter and calibrating circuit for determining deflection sensitivity at any setting of the gain controls.
- Tub complement: three 6C4, one 6AC7, one 6AG5, five 6AG7, two 807, five 6SN7, two 6SJ7, three 6SH7, three 6V6GT, one 864, two 6X4 or 5R4GY, one 6X5GT, one VR-105.

Net Price \$1275.00 F.O.B. Winchester, Mass.

BROWNING SWEEP CALIBRATOR — MODEL GL-22

Designed for use with oscilloscopes and synchroscopes as a source of timing markers for the measurement of sweep intervals.

ELECTRICAL FEATURES

- Provides markers of 0.1, 0.5, 1.0, 10, 100 microseconds either positive or negative with variable amplitude to 50 volts.
- Generates variable width, variable amplitude gate for blanking or timing purposes.
- Contains own trigger generator with positive and negative triggered outputs.
- Markers may be initiated from external trigger or from internal generator. May be synchronized with triggers up to 100 KC. repetition rate.
- Voltage regulation to timing circuits.
- 115 volt, 50 cycle operation. 1.0 volt-ampere input.
- Tube complement: one Type 6BE6, one 2D21, one 6JF, one 6V6GT, two 6SN7, one 5Y3GT, one VR-105, one 6AL5, one 6AQ5, one 6X5GT.

Net Price \$290.00 F.O.B. Winchester, Mass.

MECHANICAL FEATURES

- Provided with steel cabinet finished in black wrinkle.
- Panel finished in black leatherette with labels engraved into surface.
- All output connections on front panel.
- Insulated universal binding posts used for output connections.
- Dimensions: Height 7", Width 14", Depth 8".
- Weight: 20 lbs. Shipping weight: 28 lbs.

BROWNING FM-AM TUNER — MODEL RJ-12A

Engineered for high fidelity reception in the FM band. The AM section provides high sensitivity and selectivity as well as quality reception in the broadcast band.

ELECTRICAL FEATURES

- Receives both the new FM band (88 MC to 108 MC) and the standard broadcast band (530 KC to 1650 KC).
- Less than 10 microvolts needed to produce 30 db. noise reduction in the FM band. Sensitivity of 5 microvolts in the AM broadcast band.
- Separate RF and IF systems on both bands for maximum performance. No coil switching.
- Drift compensated. No drift on FM after 2 minutes warm-up.
- FM audio response flat from 20 cycles to 15,000 cycles within $\pm 1\frac{1}{2}$ db.
- AM audio response flat from 20 cycles to 6,600 cycles within ± 3 db.
- TRIPLE TUNED IF'S.
- Miniature tubes used as FM RF and IF amplifiers assure maximum gain.
- FM utilizes 2-stage cascade limiting to insure maximum noise rejection.
- RF stage employed on both bands.
- High impedance output for connection to any high quality audio amplifier.
- PHONO position is included in the channel selector switch so as to provide volume control directly on the tuner. Phono input connector is provided in back of the tuner.
- FM antenna input is 300 ohms for use with new twin lead cables. FM antenna also serves AM. No separate antennas required.
- Available with or without power supply. Requirements are for 250 volts DC at 65 MA and 6.3 volts AC at 4 amperes.
- Employs Major Armstrong's circuit on FM.
- Tuning eye indicates correct tuning on either band.
- 115 volt, 60 cycle operation. 80 volt-amperes input, when used in conjunction with Browning model PF-12 power supply.
- Tube complement: three 6AU6, one 7F8, one 6SK7, one 6SG7, two 6SJ7, one 6H6, one 6SA7.
- One 3J5 (tuning eye), one 1N34 crystal detector.

Model RJ-12A

MECHANICAL FEATURES

- Proportioned for easy mounting in book-cases, drawers, shelves and cabinets.
- Dial escutcheon supplied with unit.
- Formal edged dial - easily read—slide-rule type.
- Can be supplied with engraved black leatherette finished aluminum panel for rack mounting (Model RJ-14).
- Rugged construction, all components of highest quality.
- Power supply is a small separate unit facilitating mounting in confined quarters. Uses one 6YGT.
- Dimensions: Height 7 $\frac{3}{4}$ ", Width 12 $\frac{1}{2}$ ", Depth 8". Power Supply: Height 6", Width 3 $\frac{1}{2}$ ", Length 6". Rack type Tuner: Height 8 $\frac{3}{4}$ ", Width 19", Depth 3".

Model	Weight	Shipping Weight	Net Price
RJ-12A	12 lbs.	16 lbs.	\$123.65
RJ-14A	24 lbs.	30 lbs.	164.45
PF-12	8 lbs.	9 lbs.	15.78

BROWNING FM TUNER — MODEL RV-10

Designed for high-fidelity reception in the new high-frequency FM band.

ELECTRICAL FEATURES

- Receives signals in the FM band extending from 88 to 108 megacycles.
- Less than 10 microvolts needed to produce complete limiting.
- Newly developed miniature tubes used for RF section and IF amplifier.
- Two-stage cascade limiting used to ensure freedom from noise.
- Tuned RF stage used to increase gain and reduce image interference.
- High impedance output to feed any high-fidelity amplifier.
- PHONO-FM switch permits instant transfer of input signals.
- Power supply self contained.
- Employs Armstrong FM circuit.
- Tuning eye indicates correct tuning.
- 115 volt, 60 cycle AC operation. 65 volt-amperes input.

- Tube complement: three Type 6AU6, one 7F8, two 6BY, one 6H6.
- Tuning eye indicator (6U5 or 6E5). Type 3A rectifier tube.

MECHANICAL FEATURES

- Physically small. Can be easily mounted on shelves, shelves, bookcases, drawers, and the like.
- Dial escutcheon knobs, shielded interconnecting wire and connectors supplied with each unit.
- Attractive edged dial calibrated in megacycles and channel numbers.
- Rugged construction, all components of the highest quality.
- Also available with standard rack panel (Designation Model RV-11).
- Dimensions: RV-10 -Height 6 $\frac{1}{2}$ ", Width 11", Depth 3 $\frac{1}{4}$ ". RV-11 -Height 8 $\frac{3}{4}$ ", Width 19", Depth 3 $\frac{1}{4}$ ".

Model RV-10

Model	Weight	Shipping Wgt.	Net Price
RV-10	10 $\frac{1}{2}$ lbs.	14 lbs.	\$89.50
RV-11	15 lbs.	21 lbs.	110.50

BROWNING AMATEUR FREQUENCY METER — MODEL MJ-9

Designed for checking the frequencies of amateur transmitters operating in any amateur band from 3.5 to 148 megacycles on either FM or AM. Furnishes RF of known frequency to replace crystal oscillator in transmitters.

ELECTRICAL FEATURES

- Dial reads directly in frequency on seven amateur bands.
- May be used in place of a crystal to furnish RF voltage to exciter or transmitter.
- Accuracy of .05% at all frequencies.
- Secondary standard is 500 kilocycle crystal whose frequency may easily be checked with WWV of the National Bureau of Standards.
- Stable electron-coupled oscillator used, covering the 3.5 to 4.0, 7.0 to 7.3, 14.0 to 14.4, 20.5 to 21.5, 28.0 to 29.7, and 50.0 to 54.0 megacycle bands with separate coils. The 144 to 148 megacycle band is covered by harmonics of 20.5 to 21.5 megacycle band.
- Audio detection of zero beat.

- Low power consumption. 40 volt-amperes. 110-120 volt, 25 to 60 cycle AC-DC operation.
- Tube complement: one Type 63K7GT, one 6SL7GT, one 25Z6GT.

MECHANICAL FEATURES

- Steel cabinet with 1 $\frac{1}{2}$ " aluminum panel.
- Black leatherette panel finish with black wrinkle cabinet.
- 5 $\frac{1}{2}$ inch dial for ease of reading.
- Labels engraved into panel.
- All operating controls on front panel.
- Crystal check points are marked on dial for all bands.
- Dimensions: Height 7", Width 10", Depth 6 $\frac{1}{2}$ ".
- Weight: 7 lbs. Shipping weight: 11 lbs.

Net Price \$89.50

BROWNING FREQUENCY METER — MODEL S-4

Specifically designed for checking the frequencies (as required by the Federal Communications Commission) of police and fire department, marine, and other special-service transmitters for either AM or FM, operating in the 1.5 to 100 megacycle range.

ELECTRICAL FEATURES

- Custom-built and hand-calibrated for up to five specified frequencies in the range from 1.5 to 100 megacycles.
- Accuracy: $\pm .0025\%$ of the specified frequency.
- Stable electron-coupled oscillator used in special circuit.
- Extreme accuracy in frequency adjustment with 100 kilocycle crystal as secondary standard, using WWV as primary standard.
- Visual determination of zero beat with cathode ray indicator.
- Audio detection of zero beat.
- Voltage regulation employed in crystal and electron-coupled oscillators.
- 110-115 AC-DC operation, 40 volt-amperes input.
- Telescoping antenna at side of cabinet for easy coupling to transmitter.
- Tube complement: one Type 6SC7, one 6SA7, one

- 6J5, one 6SK7, one 6U5, one 25Z6. One special voltage regulator.

MECHANICAL FEATURES

- Rugged steel cabinet and $\frac{1}{8}$ " aluminum panel
- Accurate reading assured by machined and engraved main dial, graduated to 100 divisions over 180 degrees. Vernier allows readings to 1/10 of dial division, or readability of one part in one thousand.
- Panel finished in black leatherette.
- Dial in instrument black for ease of reading.
- New, non-jamming vernier dial drive for fine adjustment.
- All labels engraved into panel surface.
- Telescoping antenna forms convenient carrying handle.
- Dimensions: exclusive of telescoping antenna—Height 13 $\frac{1}{2}$ ", Width 7 $\frac{3}{8}$ ", Depth 6 $\frac{1}{8}$ ".
- Weight: 15 lbs. Shipping weight: 18 $\frac{1}{2}$ lbs.

MODEL S-4

BROWNING FREQUENCY METER — MODEL S-6

Designed as a general coverage frequency meter for measuring any radio frequency signal in the range between 100 kilocycles and 50 megacycles.

ELECTRICAL FEATURES

- Covers fundamental range of 1.0 to 2.0 megacycles in five bands.
- Accuracy: $\pm .025\%$ of the frequency measured.
- 100 kilocycle crystal used as secondary standard. Provision is made to accurately set the oscillator using WWV as a primary standard.
- Both crystal and electron-coupled oscillators are voltage regulated.
- Harmonic amplifiers permit use of harmonics up to 50 megacycles.
- Visual determination of zero beat with cathode ray indicator.
- Audio detection of zero beat.
- 110-115 AC operation. 40 volt-amperes input.
- Hand calibrated to ensure greatest accuracy.
- Telescoping antenna at side of cabinet for easy coupling to transmitter.
- Tube complement: one Type 6SK7, one 6SL7, one 6SF5, one 6U5, one 5Y3GT, and one VR-90.

MECHANICAL FEATURES

- Rugged steel cabinet and $\frac{1}{8}$ " aluminum panel.
- Accurate reading assured by machined and engraved main dial, graduated to 100 divisions over 180 degrees. Vernier allows readings of 1/10 of a dial division or readability of one part in one thousand.
- Panel finished in black leatherette.
- All labels engraved into surface of the panel.
- Non-jamming vernier dial drive for fine adjustment.
- Telescoping antenna forms convenient carrying handle.
- Dimensions: exclusive of telescoping antenna—Height 13 $\frac{1}{2}$ ", Width 7 $\frac{3}{8}$ ", Depth 6 $\frac{1}{8}$ ".
- Weight: 15 lbs. Shipping weight: 18 $\frac{1}{2}$ lbs.

BROWNING FREQUENCY METER — MODEL S-7

Specifically designed for checking the frequencies of police, fire department, truck and taxi fleet, marine and other special service transmitters operating in the 72-76 and 152-162 megacycle bands.

ELECTRICAL FEATURES

- Custom built and hand calibrated for one or two frequencies in the 72-76 and/or 152-162 megacycle bands permitting a single instrument to be used to check central transmitter and satellite mobile units operating on different frequencies.
- Accuracy: .005% of the specified frequency; .0025% by observing certain operating precautions.
- Deviation chart supplied for instant determination of deviation from assigned frequency.
- 100 KC crystal used as secondary standard which is easily compared with WWV radiations

for extreme accuracy.

- Cathode ray indicator permits highly accurate setting of E.C.O. calibration against crystal standard.
- Aural indication of zero beat.
- Voltage regulation employed in crystal and electron-coupled oscillators.
- 105-115 volt, AC-DC operation. 40 volt-amperes input.
- Telescoping antenna at side of cabinet for easy coupling to transmitter.
- Tube complement: one Type 6SL7, one 6SA7, one 6J5, one 6SK7, one 25Z6, one VR-90, and one tuning indicator 6U5.

MECHANICAL FEATURES

- Same as Browning Frequency Meter — Model S-6 (see above).

1 Band	\$195.00
2 Bands	220.00

BROWNING FREQUENCY METER — MODEL S-5

Designed for checking the frequencies of police, fire department, railroad, marine and other special-service transmitters operating between 30 and 500 megacycles.

ELECTRICAL FEATURES

- Custom-built and hand-calibrated for one, two, or three frequencies between 30 and 500 megacycles.
- Accuracy: .0025% of the specified frequency.
- Deviation chart supplied for determination of deviation from assigned frequency.
- 100 KC crystal in temperature regulated oven is used as secondary standard with long time frequency stability.
- Temperature compensated electron-coupled oscillator uses precision split-stator variable condenser with no moving contacts.
- Voltage regulated supply for crystal and electron-coupled oscillators.
- 105-115 volt, 60 cycle AC operation. 65 volt-amperes input.
- Telescoping antenna for easy coupling to transmitter.
- Tube complement: one Type 6C4, two 9001, two 6SJ7, three 6J5, one 5Y3GT, one VR-90.

MECHANICAL FEATURES

- Rugged steel cabinet and $\frac{1}{8}$ " steel panel.
- Electron-coupled oscillator built on 3.16" aluminum sub-chassis.
- Worm drive to tuning condenser with dual indicators provides 5000 dial divisions for tuning range.
- Panel finished in black leatherette.
- Labels engraved into panel surface.
- Standard rack panel used. Unit may be incorporated in a rack with other equipment if desired.
- Dimensions: Height 8 $\frac{3}{4}$ ", Width 19", Depth 9".
- Weight: 35 lbs. Shipping weight: 50 lbs.

PRECISION
FOR THE RADIO AND

INSTRUMENTS
ELECTRONIC INDUSTRY

Q-METER

TYPE 160-A

Radio frequency circuit design often requires the accurate measurement of Q , inductance, and capacitance values. For this application, the 160-A Q-Meter has become the universal choice of radio and electronic engineers throughout the country.

Each component part and assembly used in the manufacture of this instrument is designed with the utmost care and exactness. Circuit tolerances are held to values attainable only in custom built instruments.

The 160-A Q-Meter is designed specifically for the accurate and rapid measurement of Q , inductance, and capacitance. The basic method of measurement consists of measuring the voltage developed across a variable air capacitor connected as an element in a series resonant circuit. Essentially the Q-Meter is comprised of an 8 range RF oscillator, a Q measuring circuit with a main and vernier section tuning condenser, a vacuum tube voltmeter of special design which reads the voltage across the tuning condenser, and a voltage injection circuit which applies an accurately known voltage to the terminals of the series resonant circuit. In operation the Q circuit is resonated by means of the variable Q tuning capacitor and the voltage developed across this capacitor is indicated by means of the vacuum tube voltmeter which is calibrated directly in terms of Q . This method of measuring Q is simple, accurate, and requires only a single operation—resonating the circuit—to measure Q . Variations of this basic method of measurement are employed to determine effective inductance and capacitance as well as the dielectric properties of insulating materials

SPECIFICATIONS

Oscillator Frequency Range: Continuously variable from 50 kc. to 75 mc. in eight self-contained ranges. (In conjunction with an external oscillator the frequency range of the Type 160-A Q-Meter may be extended from 50 kc. to 1 kc. for coil measurements).

Oscillator Frequency Accuracy: Generally better than $\pm 1\%$, except the 50-75 mc. range which is approximately $\pm 3\%$.
Range of Q Measurements: The Q voltmeter is calibrated directly

in Q , 20-250. The "Multiply- Q -By" meter, which measures the oscillator voltage injected in the Q measuring circuit, is calibrated from $\times 1$ to $\times 2$ and also at $\times 2.5$. The reading of the Q voltmeter scale is multiplied by the setting of the "Multiply- Q -By" meter. Hence, the total range of circuit Q measurements is from 20 to 625. Condensers, dielectrics, etc., which are measured by placing these in parallel with the measuring circuit, may have Q 's as high as 5000.

Accuracy of Q Measurements: The accuracy of the direct reading measurement of circuit Q (for Q voltmeter readings between $Q=50$ and $Q=250$) is approximately 5% for all frequencies up to the region of 30 mc. and decreases with increasing frequency. Correction may be made for the error above 30 mc. as it is principally a frequency effect. The accuracy of the measurement of condensers, dielectrics, etc. is generally better than 10% for Q 's below 5,000 and up to 30 mc.

Capacitance Calibration Range: Main tuning condenser 30-450 mmf. calibrated in 1 mmf. divisions from 30 to 100 mmf. and in 5 mmf. divisions from 100 to 450 mmf. Vernier condenser, plus 3 mmf., zero, minus 3 mmf., calibrated in 0.1 mmf. divisions.

Accuracy of Capacitance Calibration: Main tuning condenser, generally better than 1% or 1 mmf., whichever is the greater. Vernier tuning condenser, ± 0.1 mmf. The internal inductance of the tuning condenser at the binding posts is approximately .015 microhenry.

Voltmeter: The Q voltmeter is also calibrated in volts. A specially calibrated tube, Type BRC 105-A tube, is used. Replacements may be made without recalibration.

Power Supply: 105-120 volts, 50-60 cycles. Also 210-240 volts, 50-60 cycles. Power consumption 50 watts.

Dimensions: Height 12.5", length 20", depth 8.5".

Weight: 25 lbs.

Price: \$625.00 F.O.B. Boonton, N. J., U.S.A.

BOONTON RADIO

BOONTON · N · J · U · S · A ·

Q-METER

TYPE 170-A

The Type 170-A Q-Meter utilizes the same general operating principles and characteristics as the Type 160-A Q-Meter, but incorporates such structural modifications and design refinements as are required for accurate performance at the higher frequencies. This instrument is intended to supplement the low frequency Q-Meter by extending the range of measurement up to 200 mc.

SPECIFICATIONS

Oscillator Frequency Range: Continuously variable from 30 mc. to 200 mc. in three ranges—Calibration accuracy $\pm 1\%$.

Range of Q Measurements: The Q voltmeter is calibrated directly in circuit Q, from 80 to 300. The "Multiply-Q-by" meter is calibrated from x1 to x4, hence the range of circuit Q measurements is from 80 to 1200.

Accuracy of Q Measurements: The accuracy of the direct reading measurement of circuit Q is $\pm 10\%$ up to 100 megacycles and decreases with increasing frequency.

Capacitance Calibration of Q Capacitor: Range 11-50 mmfd. calibrated in unit mmfd. divisions. Accuracy: 1% or 0.5 mmfd., whichever is greater. Micrometer dial divided into 100 divisions.

Power Supply: 110-120 volts, 50-60 cycles. Also 220-240 volts, 50-60 cycles. Power consumption 50 watts. Dimensions: 17" x 10 1/2" x 8 3/4".

Weight: 21 lbs.

Price: \$550.00, F.O.B. Boonton, N. J., U.S.A.

QX CHECKER TYPE 110-A

The QX-Checker is a production type test instrument specifically designed to compare reactance and relative Q of RF components with approved standards. The two factors, reactance and relative Q, are separately indicated, one on a meter and the other on a condenser dial, so that the deviation of either from established tolerances is immediately shown. Built to laboratory standards, the QX-Checker is a sturdy, fool-proof instrument for use in production work by factory personnel.

SPECIFICATIONS

Oscillator Frequency Range: 100 kc. to 25 mc. in 6 ranges using accessory plug-in coils (two coils furnished with each instrument).

Accuracy of Coil Checks: Coils may be checked against a standard to within about 0.2% with inductance values of 10 microhenries to 10 millihenries and Q of 100 or greater.

Capacitance Range: Capacitance values ranging between approximately 2-1000 mmf. may be checked against a standard to an accuracy of a few tenths of one mmf. if the Q of the capacitor is high.

Power Supply: 110-125 volts, 50-60 cycles, also 200-250 volts, 50 cycles.

Dimensions: Width 12 1/4", Depth 18", Height 8".

Weight: 26 lbs.

Price: \$340.00, F.O.B. Boonton, N. J., U.S.A.

PRECISION
FOR THE RADIO AND

INSTRUMENTS
ELECTRONIC INDUSTRY

FM SIGNAL GENERATOR

TYPE 202-B

The type 202-B FM Signal Generator has been developed to meet the needs of engineers engaged in the design of FM and television receivers for operation within the frequency range of from 54 megacycles to 216 megacycles.

This instrument has been proportioned for maximum conservation of laboratory bench space, with frequency dial, modulation and output meters positioned at eyelevel for maximum readability. The unit is finished in grey wrinkle enamel with engraved panel and is supplied complete with tubes and standard output cable.

SPECIFICATIONS

RF Range: Frequencies from 54 mc. to 216 mc. are covered in two ranges, 54-108 mc. and 108-216 mc.

Main Frequency Dial: The two RF ranges are calibrated directly in megacycles to an accuracy of within $\pm 0.5\%$. The dial is also divided in 24 equal divisions for use with the vernier frequency dial.

Vernier Frequency Dial: The vernier frequency dial is divided in 100 divisions and is geared to the main dial through a gear train having a 24:1 ratio. The approximate frequency change per vernier division is 26 kc. on the low range and 52 kc. on the high range.

Frequency Modulation (Deviation): The FM deviation is continuously variable from zero to 240 kc. The modulation meter is calibrated in two FM ranges (1) zero to 80 kc. and (2) zero to 240 kc. deviation.

Amplitude Modulation: The modulation meter is calibrated at 30% and 50% amplitude modulation. AM is continuously variable from zero to 50%.

Modulation Controls: Separate potentiometers are provided for continuous control of FM and AM levels.

Modulating Oscillator: The internal AF oscillator may be switched to provide either frequency or amplitude modulation; it may also be switched off. External binding posts permit the use of an external AF oscillator for either FM or AM. Both internal and external AF oscillators may be used simultaneously, thus providing either FM or AM at two modulation frequencies simultaneously or simultaneous FM and AM. The internal AF oscillator provides eight fixed frequencies which may be selected by a rotary type switch—50, 100, 400 cycles and 1, 5, 7.5, 10 and 15 kilocycles, accurate to within 5%. The output voltage of the internal AF oscillator is available at the external binding posts for synchronizing or other purposes.

RF Output Voltage: The RF output voltage is continuously variable over a range from 0.1 microvolt to 0.2 volts at the terminals of the output cable. The impedance at the RF output jack, looking into the instrument, is 53 ohms resistive. The output cable has a 53 ohm resistance termination at the terminal end hence the output impedance of the unit with cable attached is 26.5 ohms.

Distortion: FM distortion at 75 kc. deviation is less than 2% when modulated with the internal AF oscillator or an external AF oscillator having 0.5% distortion or less. At 50% amplitude modulation the distortion is less than 5% using the internal AF oscillator and decreases as the modulation percentage is reduced. An external AF oscillator may be employed for amplitude modulation if desired.

Spurious RF Output: All spurious RF output voltages are at least 30 db. below the desired fundamental. The RF leakage is very low.

Fidelity Characteristics: The deviation sensitivity of the FM modulation system as a function of frequency is constant from dc. to over 10 kc. At 15 kc. the deviation as indicated on the modulation meter is 0.5 db. higher than the true value. The amplitude modulation system is also flat from dc. to 10 kc., and departs from nominal by 1.0 db. at 15 kilocycles.

Power Supply: The power supply is self-contained in the instrument for use on 60 cycles, 110 volts.

Accessories: 203-A Frequency Converter (frequency range 0.4 mc. to 25 mc.).

Dimensions: H: 17" W: 13½" D: 11½".

Weight: 35 lbs.

Price: \$975.00, F.O.B. Boonton, N. J., U.S.A.

Corporation

UNIVERTER TYPE 203-B

The Type 203-B Univerter, a frequency converter accessory having unity gain, is designed for use with the Type 202-B FM Signal Generator to provide additional frequency coverage of from 0.4 mc. to 25 mc. Since the 202-B FM Signal Generator covers a frequency range from 54 to 216 megacycles, the 203-B Univerter offers a simple means whereby the additional coverage of commonly used Intermediate and radio frequencies may be obtained. This instrument also enables the frequency and amplitude modulation features of the 202-B instrument, as well as the attenuator calibration, to be utilized at these lower frequencies without causing any appreciable distortion.

The 203-B Univerter matches the 202-B FM Signal Generator in styling and finish, and is supplied complete with tubes and instruction book.

SPECIFICATIONS

RF Range: The Univerter, in combination with the 202-B FM Signal Generator, covers from 0.4 mc. to 25 mc. (0.1 mc. to 25 mc. with no carrier deviation). The RF voltage at the X1 OUTPUT jack is uniform within ± 1 db. over the frequency range of the instrument.

Frequency Increment Dial: This dial is calibrated in increments of 10 kc. from plus 250 kc. through zero to minus 250 kc.

RF Output: The RF output voltage at the X1 panel jack is continuously variable from 0.1 microvolt to 0.1 volt by means of the 202-B Signal Generator attenuator. For 0.2 volt input to the Univerter, the output is approximately 0.18 volt. The impedance at the RF output jack, looking into the instrument is approximately 60 ohms resistive. The RF output voltage at the 2 VOLT MAX. pin jack is uncalibrated but may be controlled from the attenuator of the 202-B FM Signal Generator. At this pin jack the internal impedance is approximately 470 ohms.

Power Supply: The 203-B Univerter is designed for use on 50-60 cycles, 115 volts.

Dimensions: H: 11 1/2" W: 7 3/8" D: 10 1/2"

Weight: 11 lbs.

Price: \$300.00, F.O.B. Boonton, N. J., U.S.A.

BEAT FREQUENCY GENERATOR TYPE 140-A

This instrument has found universal acceptance because of its wide frequency coverage from 20 cycles to 5 megacycles. A five step decade attenuator provides a means by which extremely small output voltages can be accurately set and a six position switch enables any one of a variety of output impedances to be quickly selected.

SPECIFICATIONS

Frequency Range: 20 cycles to 5 megacycles in two ranges.

Low Range: 20 to 30,000 cycles.

High Range: 30 kc. to 5 mc.

Frequency Calibration: Accuracy ± 2 cycles up to 100 cycles, $\pm 2\%$ above 100 cycles.

Stability: About 5 cycles drift below 1000 cycles. On low range, drift becomes negligible percentage with increasing frequency. On high range, drift is 3% or less.

Adjustment: High and low ranges have individual zero beat adjustments. Low range may be checked against power line frequency with front panel 1 inch cathode ray tube.

Output Power and Impedances: Rated power output: One watt, available over the low frequency range from output impedances of 20, 50, 200, 500, 1000 ohms, and over both high and low frequency ranges from an output impedance of 1000 ohms.

Distortion: 5% or less at 1 watt output, 2% or less for 1/2 voltage output.

Voltmeter Accuracy: $\pm 3\%$ of full scale reading.

Power Supply: 110-120 volts, 50-60 cycles, also 220-240 volts, 50-60 cycles.

Power Consumption: About 120 watts.

Dimensions: Width: 21 1/2", Depth: 15", Height: 19 1/2".

Weight: 86 lbs.

Price: \$1,050.00, F.O.B. Boonton, N. J., U.S.A.

GENERAL ELECTRIC

SIGNAL GENERATOR TYPE YGS-3

POWER SUPPLY:

105-125 volts, 50-60 cycles power source, 65 watts

RF OSCILLATOR:

RANGE: Fundamental: 100 kc to 150 mc in 7 bands, continuously variable

MODULATION (Internal): Amplitude: continuously variable from 0 to 100%, calibrated at 30%. Modulating frequencies available: power line, 400 cycles and 100 to 12,000 cycles continuously variable

MODULATION (External): 50 to 12,000 cycles

FM OSCILLATOR:

RANGE: 100 kc to 200 mcs

FIXED FREQUENCIES:

1 mc; deviation 0 to ± 20 kc.

50 mc; deviation 0 to ± 300 kc.

50 mc; deviation 0 to ± 750 kc.

FREQUENCY MODULATED OUTPUT:

Any combination possible by mixing RF and FM oscillators internally.

MODULATION: Same as RF oscillator

CRYSTAL CALIBRATOR:

FREQUENCY: 1 mc, fundamental. Harmonics available to 150 mcs.

ACCURACY: $\pm 0.5\%$ (0 to 50° C)

MODULATION: Same as RF oscillator except not calibrated in percentage amplitude

AUDIO OSCILLATOR:

RANGE: 100-12,000 cycles continuously variable in one band.

Fixed frequencies: power line, 400 cycles

TYPE: Wein Bridge, resistance tuned

DISTORTION: Less than 7% (into 20K ohm load or higher)

ATTENUATOR: Calibrated, 0 to -60 DB

OUTPUT VOLTAGE: 4.5 volts in 20K ohm load ± 2 DB variation throughout frequency range

OUTPUT IMPEDANCE:

RF High: 100 ohms

RF Low: 50 ohms

LIST PRICE

\$195.00*

AUDIO OUTPUT: Optimum load 20K ohms. Lower resistance loads at reduced output.

OUTPUT LEVEL INDICATOR:

TYPE: Dual electron-ray tube

FUNCTION:

Shadow No. 1 (RF)—shadow angle 0° at 25,000 microvolts on low output jack

Shadow No. 2 (AF)—shadow angle 0° at 30% amplitude modulation or at indicated FM deviation

RF ATTENUATOR:

DECADE: Five step resistor network

VERNIER: Continuously variable 50 ohm "L" pad

AMBIENT TEMPERATURE RANGE:

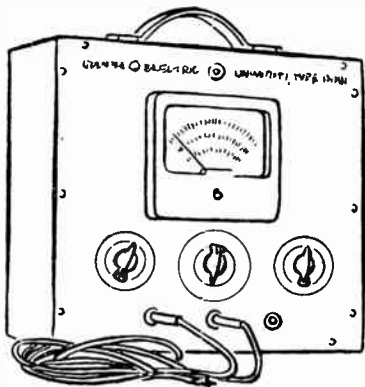

10° C to 40° C

CASE:

Fabricated steel copper-plated, outside gray wrinkle finish. Removable cover with compartment for output cables. Leather carrying handle. Dimensions: 17 1/8 in. long x 9 3/4 in. high x 9 1/4 in. deep including cover.

WEIGHT: 33 pounds

UNIMETER TYPE YMW-1A

A-C and D-C Volts: 0-2.5, 10, 50, 250, 1000.

Sensitivity: D-C volts, 20 K ohms per volt. A-C volts, 1 K ohm per volt.

Output Meter: Same as A-C volts through .5 mfd 600 volt capacitor.

Decibels: -4 to +10, 8 to 22, 22 to 36, 36 to 50, 48 to 62.0 level is 1 mw in 600 ohms.

Resistance: 3 ranges, total coverage 1 ohm to 20 megohms.

R x 1, 20 ohms center, 2 K ohms maximum.

R x 100, 2 K ohms center, 200 K ohms maximum.

R x 10 K, 200 K ohms center, 20 megohms maximum.

Current: DC only. 0-.5, 5, 50, 500 ma.

0-50 microamps.

Controls: Three. Range and function switch selects range of volts, ohms, milliamperes. A-C/D-C switch selects type of voltage measurement. Ohms adjust sets ohmmeter zero on each range.

Meter: 50 microamps $\pm 2\%$, 2500 ohms terminal resistance $\pm 2\%$, 4 in. x 4 1/2 in. case.

Batteries: 1—No. 2 flashlight cell. 2—7.5 volt C batteries.

Test Leads: One pair, 48 in. long. Two slip-on alligator clips supplied for prods.

Portable Carrying Case: Fabricated steel, finished in grey wrinkle. Size, 10 1/4 in. x 9 3/4 in. x 4 in.

Weight: 9 pounds.

The FERRET Model 730 is the ultimate in a combined Signal Tracer and Vacuum Tube Volt Ohm Meter that incorporates features not found in competitor's lines at any price.

Proximity Fuse Type
Lightweight Probe.

A Germanium Crystal probe, developed during the war and recently released for commercial use, is provided with the instrument. This probe is light in weight and because no tube is required, only measures $\frac{1}{4}$ " in diameter, and can therefore reach spots that are inaccessible to the ordinary probe.

Accurate direct R. F. measurements up to 300 Megacycles for F. M. and television receivers are easily obtained. The same probe is used for the Signal Tracer and operates a hum-free rectifier.

In addition to the advanced type probe, the Model 730 offers improved features that make this combination instrument the most important single unit on the service bench.

SPECIFICATIONS:

- Power: 110-120 volts, 50-60 cycles.
- Range: AC-DC 0-1, 3, 30, 100, 300, 1000, 3000.
- Ohms: Mid-scale 10 x 1 x 10 x 100 x 1000 x 100,000 x 1 megohm.
- Frequency: Audio to 300 megacycles.
- Tubes: 6X4, 2-12AU7, 6AQ5, 5AQ6, 6AL5, 6K4.
- Input Impedance: DC 10 megohms; AC 10 megohms.
- Probe: 6K4 Diode.
- Case: Aluminum, blue-gray Hammertone finish with leather handle.
- Size: 10 $\frac{1}{4}$ " high, 10 $\frac{1}{4}$ " wide, 5 $\frac{1}{2}$ " deep. Weight 13 $\frac{1}{2}$ lbs. packed.

FEATURES:

- AC-DC volt scale 0-1, 3, 30, 100, 300, 1000 and 3,000.
- Ohm scale 10, 100, 1000, 10,000, 100,000, 1 megohm and 10 megohm center scale.
- High impedance input 10 megohms DC, 10 megohms AC.
- Extremely accurate for all AC measurements to 300 megacycles.
- 3000 volt scale (sufficient for television receivers).
- Four stage amplification for signal tracing. Sufficient gain for tracing signal from antenna without using receiver as amplifier with good tone and with enclosed Speaker.
- All resistors calibrated to $\pm 1\%$.
- Accuracy within 3% to 250 megacycles; 5% above 350 megacycles.
- All miniature tubes.
- 8" illuminated meter with multi-colored, easy to read scale.
- Special 1 volt R. F. scale.

AUDIO OSCILLATOR SINE WAVE — SQUARE WAVE MODEL 710

The FERRET Model 710 audio oscillator incorporates recently developed features that make this precision-engineered instrument outstanding in its field. This unit incorporates two units in one; a Sine Wave R.C. type oscillator with low distortion on all bands and a Square Wave generator with the same frequency range. Provides a laboratory standard for all audio application and frequency response measurements in both designing and practical applications.

Three-colored dial, glass enclosed for protection against damage and dirt, encased in a molded bakelite escutcheon. Front panel of 3-color iridescent blue-gray finish. Housed in an attractive blue-gray Hammertone finished aluminum case with leather carrying handle. Light in weight, durably constructed.

FERRET—The Feature Line.

SPECIFICATIONS:

- Power: 110-120 volts, 50-60 cycles.
- Range: 20 to 24,000 cycles, 3 bands.
- Tubes: 6X1, 6AQ5, 6AU6, 12AU7.
- Output: High impedance 15 volt sine wave or square wave.
- Dial: 3 to 1 Vernier, red and black scale on white background, hairline pointer.
- Panel: 3-color iridescent blue-gray finish.
- Test Leads: Coaxial cable, RG/59U.
- Size: 10 $\frac{1}{4}$ " x 10 $\frac{1}{4}$ " x 5 $\frac{1}{2}$ "
- Weight: 12 lbs. packed.

FEATURES:

- R. C. type oscillator—does not use beat frequency circuit.
- Range 20 to 24,000 cycles—3 bands.
- All new type miniature tubes.
- Accuracy within 2% on all bands.
- True sine wave throughout range, with special feed-back circuit for each band.
- Sine or square wave obtained by merely rotating panel switch.
- Transformers electrostatically shielded.
- Laboratory precision construction throughout.
- Vernier Drive—3 to 1 ratio.

COASTWISE ELECTRONICS COMPANY, Inc.

SIGNAL GENERATOR WIDE RANGE F.M.-A.M.-TELEVISION

MODEL 701

ALL MINIATURE TUBES

\$74⁹⁵

DEALER PRICE
*Slightly Higher
Eastern States*

The Model 701 FERRET Signal Generator is a crystal calibrated unit for AM, FM and Television receivers operating on fundamental frequencies to 110 Megacycles. Output voltage of 1 volt, which is relatively constant from 170 K.C. to 110 M.C.

This generator is so universal in scope, it serves the needs of modern radio servicing in both low and high frequency receivers. 9" dial—each band has the equivalent of 41" of calibrated dial.

The Model 701 Signal Generator is housed in an attractive, blue-gray Hammertone finished aluminum case with leather handle. 10 $\frac{1}{4}$ " high, 10 $\frac{1}{4}$ " wide, 5 $\frac{1}{2}$ " deep. Weight 11 lbs. packed.

FEATURES:

- Range 170 K. C. to 220 M. C.—Fundamentals to 110 M. C.
- Completely shielded for minimum radiation.
- Crystal calibrated, low loss, permeability tuned R. F. coils.
- Internal 400 cycle sine wave modulation—0 to 100%. Calibrated directly on dial.
- 20 to 10,000 cycle external modulation for frequency response measurements.
- Turret coil construction with shortest possible leads for minimum leakage and maximum R. F. stability. Follow-up shorting type switch—no dead spots.
- Electron coupled combination Hartley and Colpitts oscillator for high I.C. ratio, low drift and maximum stability to line voltage fluctuations.
- Low loss, low impedance, coaxial cable output.
- Ladder attenuator.
- Vernier drive—3 to 1 ratio.
- Accuracy: 1% on all bands.

SPECIFICATIONS:

- Range: 170 K. C. to 220 M. C.
- Fundamentals to 110 M. C.
- Power: 110-120 volts, 50-60 cycles.
- Tubes: 6C4, 6AU6, 6X4.
- Dial: Large 9" 3-colored scale, glass covered with molded escutcheon.
- Output: 1. volt R. F., low impedance. Coaxial cable, 15 volt. Audio high impedance.

DE LUXE TEST SPEAKER and UNIVERSAL SUBSTITUTOR MODEL 721

\$29⁹⁵

DEALER PRICE
*Slightly Higher
Eastern States*

The FERRET Model 721 De Luxe Test Speaker was designed primarily to eliminate the necessity of removing set speaker from midget radios, consoles or auto radios for servicing.

A compact, portable, light weight unit, housing a specially constructed 6" P. M. speaker with exceptional tone quality and sufficient current rating to test any radio.

Attractive 3-color iridescent easy to read front panel. Housed in an attractive blue-gray Hammertone finished aluminum case with leather handle.

In addition, this ingeniously designed unit incorporates the following outstanding features:

FEATURES:

- Provides a substitution for choke, electrolytic condensers, coupling, by-pass condensers and a wide range of resistors.
- Speeds servicing—eliminates soldering until all defective parts are located and substituted.
- Voice coil connection permits substitution of any output transformer.
- Rotating input and field switches on front panel permits matching to any single or push-pull output tubes.

SPECIFICATIONS:

- Field Impedance: 500, 1000, 1500 and 2500 Ohms.
- Current: 175 Milliampers Maximum.
- Input: Universal, for single ended or tubes in push-pull.
- Speaker: 6" P. M. Dustproof, of special construction; low resonant point.
- Size: 10 $\frac{1}{4}$ " x 10 $\frac{1}{4}$ " x 5 $\frac{1}{2}$ ".
- Weight: 8 $\frac{1}{2}$ lbs. packed.

Electronic Measurements Corporation

* VOLOMETER

*Trade Name for Volt-Ohm-Milliammeter

Here is an unusually attractive, EXCEPTIONALLY LOW-PRICED volt-ohm-milliammeter. It is a rugged, flexible instrument, combining features which are not available in competitive models selling for more than double this price.

You will be convinced when you read the "Specifications" and "Special Features" that MODEL 101 VOLOMETER is just the instrument to have around the shop or lab whenever the type of measurement does not justify the use of expensive, complicated, highly sensitive equipment.

The fact that resistances between 1/20 OHM and 20 MEGS and AC voltages between 25 CYCLES and 1 MEGACYCLE in frequency can be measured with this unit, makes it a handy and very valuable instrument. In short, when it comes to value and versatility, MODEL 101 really sets the pace.

MODEL 101B

Open face as shown.

Price \$20.95

Size: 5 5/8" x 8 5/8" x 2 3/4".
In portable case.

Price \$24.95

Size: 7 1/4" x 8 5/8" x 3 1/4".
Complete with test leads.

MODEL 101A

Open face as shown.

Price \$17.50
Size: 4 1/2" x 7 1/2" x 3 1/4".

In portable case.

Price \$21.50
Size: 6 1/4" x 7 1/2" x 3 1/4".
Complete with test leads.

SPECIFICATIONS

- 5 DC VOLTAGE RANGES (approx. 1000 ohms per v.): 0 to 6-60-300-600-3000 volts.
- 4 AC VOLTAGE RANGES: 0 to 12-120-600-1200 volts.
- 3 DC CURRENT RANGES: 0 to 6-60-600 milliamperes.
- 4 RESISTANCE RANGES: 0 to 200-2000-200,000 20 megohms.

SPECIAL FEATURES

Resistances from 1/20 ohm to 20 megohms. Low ohm scale is low drain back-up type. First 10 divisions are 1/20 ohm each.

AC volts from 25 cycles to 1 megacycle with no temperature error. No external source of power

required.

Battery and rectifier replaceable without use of soldering iron.

Matched-pair multiplier resistors accurate within 1%. Meter accurate within 2%.

* VOLOMETER MODEL 100

*Trade Name for Volt-Ohm-Milliammeter

A new pocket size volt-ohm-milliammeter with features never before available in an instrument of this size and price. Quality engineered both electrically and mechanically this instrument will satisfy the exacting requirements of the electronics engineer, laboratory worker or service man. Employing a special rectifier circuit, this unit will accurately measure AC voltages from 25 CYCLES to 1 MEGACYCLE with no temperature errors and without the necessity of plugging into any external source of power. For this reason it is invaluable for Audio, I. F. or low R. F. voltage measurements. In addition, the instrument can be used to measure resistances from 1/2 ohm to 30 megohms.

Bakelite panel and wooden case prevent any voltage breakdowns to either the panel or case when measuring high voltages.

SPECIFICATIONS:

- 6 D. C. VOLTAGE RANGES (1000 ohms per volt) 0 to 2-12-60-300-1200-6000 volts.

Open face model, Size: 6 3/8" x 3 1/2" x 3". Price **\$21.95**

Portable Model. Complete with set of test leads. Size: 6 3/8" x 4 1/2" x 4 1/4". Price **\$25.95**

- 6 A. C. VOLTAGE RANGES (1000 ohms per volt) 0 to 3-12-60-300-1200-6000 volts.
- 4 D. C. CURRENT RANGES 0 to .6-6-60-600 milliamperes.
- 3 RESISTANCE RANGES 0 to 3000-300,000 ohms; 0 to 30 megohms.
- 4 DB RANGES —10 to plus 8-20-34-48.

SPECIAL FEATURES:

A. C. volts from 25 cycles to 1 megacycle with no temperature errors. No external source of power required.

Bakelite panel.

Battery and rectifier replaceable without soldering iron.

Resistances from 1/4 ohm to 30 megohms.

Voltages to 6000 volts.

0-400 Microampere Meter.

All multipliers are matched within 1%.

MODEL 100

MODEL 400 ELECTRONIC LIMIT BRIDGE

MODEL 400

Here is an Electronic Limit Bridge that has ALL the features you've been looking for:

SIMPLICITY OF OPERATION—No adjustments to be made. Just plug into any 115 Volt A. C. line.

NO BATTERIES TO BE REPLACED—Model 400 is completely A. C. operated and contains no batteries.

WIDE RANGE—Resistance from 1 ohm to 3 megohms can be measured.

STABILITY—Zero does not shift every time the unit is turned on. Special push-pull circuit as-

ures constancy of readings in spite of changing tube characteristics.

ACCURACY—Standard internal resistors are accurate to ±0.1%.

PROTECTION AGAINST OVERLOAD—Meter can't be damaged even if resistor to be measured is open or shorted.

DIRECT READING IN % DEVIATION—Available with either 5% or 10% full scale deflection. Specify which is desired.

INDICATES WHETHER PLUS OR MINUS DEVIATION—Each division represents 0.2%.

QUALITY WORKMANSHIP—Bus bar wiring used.

Model 400A with 3" meter as illustrated Low Price **\$75.00**

Model 400B with 4 1/4" square meter Low Price **\$85.00**

Model 400C with 7 1/2" square meter Low Price **\$99.50**

ELECTRONIC MEASUREMENTS CORPORATION ANNOUNCES THE

E.M.C. Model 120 VOLOMETER*

Compare

Model 120 is the ONLY 20,000 ohms per volt instrument that gives you:

1. **WIDEST** resistance range (.2 ohm to 300 megs.)
2. **HIGHEST AC** voltage sensitivity (10,000 ohms per volt)
3. **LOWEST PRICE** — \$29.95, open face model; \$34.95 for Model 120-P (portable)

Other Features Include:

1. AC voltage frequency range 30 cycles to 1 megacycle.
2. Rectifier and battery replaceable without soldering iron.
3. No external source of power needed for AC voltage measurements.
4. Special precision voltage multipliers accurate to 1%.

Specifications:

- DC volts at 20,000 ohms per volt: 0-3v, 0-15v, 0-60v, 0-300v, 0-1500v, 0-6000v.
- AC volts at 10,000 ohms per volt: 0-6v, 0-30v, 0-120v, 0-6000v, 0-3000v, 0-6000v.
- DC current: 0-60 microamps, 0-6ma, 0-60ma, 0-600ma, 0-6 amps.
- Resistance: 0-3000, 0-300,000, 0-3 megs, 0-300 megs.
- Decibels: -4 to +11, +10 to +25, +22 to +37, +36 to +51, +50 to +65, +62 to +77.

. . . AND the E.M.C. 200 Mutual Conductance TUBE TESTER

Check These Features

- ✓ Checks mutual conductance on a calibrated micromho scale, as well as an a "Reject-Good" scale.
- ✓ Checks 5 element tubes as pentodes.
- ✓ Checks tubes for gas content.
- ✓ Sufficient plate current to check both emission and mutual conductance.
- ✓ Detects both shorted and open elements.
- ✓ Complete switching flexibility allows all present and future tubes to be tested regardless of location of elements on tube base.
- ✓ Tests tubes for radio frequency and other noise.
- ✓ Tests all tubes from .75 volts to 117 filament volts.
- ✓ Tests all loctal, octal, and miniature tubes.
- ✓ Tests cold cathode, magic-eye, voltage regulator tubes, ballast resistors.
- ✓ Instrument is fused, and fuse is easily replaceable from front of panel.
- ✓ Individual sockets for each tube base type eliminates possible errors.
- ✓ Checks individual sections of multi-purpose tubes.
- ✓ Attractive four-color panel with plenty of eye-appeal. Hard wrinkle finish for durability.

SWEEP FREQUENCY GENERATOR

Model 125

The Clarkstan Sweep Frequency Generator is an electronic device used to determine quickly the behavior of audio and other alternating electrical apparatus with respect to frequency and associated phenomena.

The complex signal is produced by scanning photo-electrically a synchronously rotating disc. The modulation on the disc is the photographic reduction of a precision pattern.

The accuracy of the original disc assures a positive signal which limits anomalous distortion, frequency and other discriminations which could be introduced by non-stable reactive components of more complex circuits.

The Model 125 Sweep Frequency Generator is recommended for use in production testing, development laboratories, schools and colleges, motion picture sound equipment, magnetic recorder development, radio stations and maintenance and service technicians.

SPECIFICATIONS — Model 125 S.F. Generator

OUTPUT — 7 volts, open circuit; 50 milliwatts or 5 volts into 500 ohms. **IMPEDANCE** — Internal impedance 200 ohms. **POWER CONSUMPTION** — 25 watts, 115 v., 50 & 60 cycles. **CABINET MOUNTED** — 15³/₁₆" x 8" x 8³/₁₆" deep. **WEIGHT** — 18½ lbs. **FINISH** — Dark Maroon Burlene baked enamel. All tubes supplied. 2 - 7C7; 1 - 7C5; 1 - 5AZ4; 1 - 927. Will operate with any standard oscilloscope.

FREQUENCY RANGE — 40 cps. to 10 KC with 60 cycle AC. **MARKER PULSES** — at 1, 3, 5, 7, and 10 KC. **SWEEP FREQUENCY** governed by 20 synchronizing pulses per second. (With 50 cycle AC current, the range is 23 cps. to 8333 cps. with frequency markers at 833, 2500, 4170, 5840, and 8333 cps.)

Model 125 Clarkstan Sweep Frequency Generator complete with scanning disc. Net Price \$195.00

Model 130.1 Scanning disc, 40 cps. to 10 KC, disc only. Net Price \$12.20

SWEEP FREQUENCY TRANSCRIPTIONS (20 SPS) RECORDS AND FILM

— By Wayne R. Johnson

No. 1000A—12" Vinylite record, 78 RPM, 70 to 10,000 cps., recorded flat plus or minus 1 db. Net Price	\$6.60

WIDE RANGE RV PICKUP

The Clarkstan RV Wide Range Pickup is a variable reluctance reproducer featuring a removable stylus, and offering Flat Response, Low Distortion, in addition to featherweight needle force.

SPECIFICATIONS: TYPE—Magnetic, variable reluctance with removable stylus. **ARMATURE**—Stylus is the armature; weight 31 mg. (.031 g.) **RESPONSE** — Exactly velocity responsive to 15,000 cps. **STYLUS** — Sapphire with standard .003" radius ball point, 50° cone angle. Other sizes available. **NEEDLE FORCE** — 20 grams optimum for commercial pressings. **OUTPUT** — 60 millivolts at 1000 cps with lateral displacement of .001". **IMPEDANCE** — Standard cartridge, high impedance. May also be had in impedances of 5, 50, 250 and 500 ohms. **RECOMMENDED TERMINATION** — High impedance.

ELECTRICAL CHARACTERISTICS — Inductance 350 millihenries at 1000 cps.; "Q" 1.05; DC Resistance 1450 ohms. **MOUNTING** — Standard mounting holes, ½" between centers 3-48 screws. **WEIGHT** — 30 grams.

No. 211 RV Wide Range Pickup & Transcription Tone Arm complete with standard sapphire stylus. Net Price \$31.50

TEST EQUIPMENT

EICO MODEL 113A—MULTI-ANALYST

EXCLUSIVE! NO OTHER INSTRUMENT HAS ALL THESE FEATURES

A compact, multi-purpose utility instrument that stands alone as a unique, dependable test instrument. This one unit can outperform a panelful of expensive separate instruments. Each function carefully designed for maximum performance and dependability with exceptional accuracy. Includes a complete vacuum tube voltmeter, a broad range audible signal tracer, a very high resistance D.C. VTVM, a wide range electronic ohmmeter, a high impedance, accurate and linear A.C. VTVM, and a wide range DB scale for gain measurements.

Degenerative cathode follower bridge type circuit assures greater linearity, accuracy and stability than heretofore possible. Set the meter once and it's stable on all scales. No danger of meter burn out with automatic overload circuit. Extra high gain signal tracer amplifier so sensitive it can pick up signals at the antenna. Broad band signal tracing probe follows signals throughout the receiver without adjustments. Perfect reproduction with a 4" speaker monitor. Perfect for accurate and rapid checking of fading, phono crystals, microphones, etc. Fastest method of trouble shooting.

Electronic AC ranges 0-5, 10, 100, 500, and 1000 volts with 3 megohms input impedance. Electronic ohms range measurements from .2 ohms to 1000 megohms in 5 convenient ranges. Accuracy of 2% on all ranges. Acclaimed by all who use it.

Dealer Net Price

\$89.50

MODEL 221-VACUUM TUBE VOLTMETER

A feat of engineering design was accomplished in this compact 4 1/2" meter VTVM at this unusually low price. A masterpiece in overall usefulness. It includes a very high resistance D.C. VTVM, a wide range electronic ohmmeter, a high impedance, accurate and linear electronic A.C. VTVM and a wide range DB scale.

Has exceptional stability, accuracy, and linearity. Stable on all ranges. No outmoded inaccurate copper oxide rectifier. No danger of meter burn out. 2% accuracy on all ranges. Each instrument individually calibrated. 26 megohms input resistance. Electronic AC and DC ranges 0-5, 10, 100, 500, 1000 volts. Electronic ohmmeter measures from .2 ohms to 1000 megohms in 5 ranges. Just the instrument for laboratories, schools and service shops. Dealer Net Price

\$49.95

MODEL 406 TRANS-CONDUCTANCE TUBE TESTER

The most modern method of testing tubes. Measures the actual trans-conductance of the tube as well as shows it on a good or bad scale. A speed roll chart has all the latest tubes listed. A speed roll chart has all the latest tubes listed. Can check all modern tubes including the new 9" prog television and FM tubes. Resists obsolescence because of its point to point switching system. Easy to operate. Tops in the field. In a handsome wood cabinet that will be the pride of any shop.

EICO MODEL 315 SIGNAL GENERATOR

Has Micro-Cycle Band Spread Vernier Tuning. Vitally important for tuning and aligning FM and Television receivers where tuning is very sharp and critical. The extreme wide range and accuracy afforded by the micro-cycle vernier band spread dial assures accurate frequency adjustment for test or alignment of broadcast FM or Television receivers. Vernier dial divided into 100 divisions. Any frequency can be tuned and repeated within .02% accuracy. Extremely accurate and stable throughout its range. Window casing encloses dial and fine pointer, protecting the pointer against being accidentally bent or jarred out of calibration. Range 75kc to 150mc. Complete broadcast band from 550kc to 1700kc is covered on one range without switching. Unused coils are automatically shorted out to eliminate dead spots and absorption. Linear dial calibration. DOES NOT CROWD UP on the high frequency end of the dial. Accuracy better than .5% throughout the broadcast band and 1% on the higher frequencies. Just as accurate at high end of dial as the low end. Dealer Net Price

\$64.50

EICO MODEL 210—DELUXE VACUUM TUBE VOLTMETER

Another unique instrument in the amazing EICO line is this giant VTVM with a huge 8 1/2" meter. A knife edge pointer gives this meter laboratory accuracy. Careful engineering gives it maximum flexibility with maximum stability. Measures 5000 volts DC, and can be extended to 10,000 volts. Perfect for Television receivers. The AC-RF probe contains a UHF tube that measures RF voltages from 0.3 cycles to 300 megacycles. Giant meter can be easily seen from a distance. Has shift compensating circuit for stability on all ranges. Cathode follower, bridge type circuit gives the instrument exceptional stability and accuracy. Only one scale for the DC, AC and RF readings. A DB scale is included for gain measurements. DC ranges are 0-5, 10, 100, 500, 1000, 5000 volts; AC-RF ranges are 0-5, 10, 100, 500, 1000 volts. Electronic ohmmeter reads from .2 ohms to 1000 megohms in 6 ranges. Outstanding value. Dealer Net Price

The New Model 680 5,000 Ohms per Volt VOLT - OHM MILLIAMMETER

The Model 680 measures:
 D.C. VOLTAGES TO—1,500 Volts
 A.C. VOLTAGES TO—1,500 Volts
 RESISTANCE TO—2 Megohms
 OUTPUT VOLTS TO—1,500 Volts
 D.C. CURRENT TO—150 Ma.
 DECIBELS TO—+58 D.B.

SPECIFICATIONS:

4 D.C. Voltage Ranges: 0 to 15/75/300/1,500 Volts; 4 A.C. Voltage Ranges: 0 to 15/75/300/1,500 Volts; 4 Output Meter Ranges: 0 to 15/75/300/1,500 Volts; 4 D.C. Current Ranges: 0 to 150 Microamperes—0 to 15/75/150 Ma.; 4 Resistance Ranges 0 to 2,000/20,000/200,000 Ohms—0 to 2 Megohms; 4 Decibel Ranges: -10 to +18 D.B. +4 to +32 D.C. +16 to +44 D.B. +30 to +58 D.B.

Model 680 comes housed in a hand-rubbed oak portable cabinet complete with cover, self-contained battery, test leads and instructions. Measures 4" x 6 1/2" x 7". Net Price

\$1950

The New Model 450 TUBE TESTER

Speedy operation — assured by the newly designed rotary selector switch which replaces the usual snap, toggle, or lever action switches.

SPECIFICATIONS

- Tests all tubes up to 117 volts.
- Tests shorts and leakages up to 3 Megohms in all tubes.
- Tests both plates in rectifiers.
- New type line voltage adjuster.
- Tests individual sections such as diodes, triodes, pentodes, etc., in multi-purpose tubes.
- Noise Test detects microphonic tubes or noise due to faulty elements and loose internal connections.
- Uses a 4 1/2" square rugged meter.
- Works on 90 to 125 volts 60 cycles A.C.

EXTRA SERVICE—May be used as an extremely sensitive condenser Leakage Checker. A relaxation type oscillator incorporated in this model will detect leakages even when the frequency is one per minute.

\$3950 NET

SUPERIOR INSTRUMENTS CO.

SUPERIOR TEST EQUIPMENT

The New Model 650 Signal Generator

Ranges: 100 Kilocycles to 35 Megacycles on Fundamentals; 25 Megacycles to 105 Megacycles on Harmonics.
 • RF obtainable separately or modulated by the Audio Frequency.
 • Audio Modulating Frequency—400 cycles pure sine wave—less than 2% distortion.

- Attenuation—3-step ladder type of attenuator (T pad).
 - Uses a Hartley Excited Oscillator with a Buffer Amplifier.
 - Tubes: 6J5 as R.F. Oscillator; 6SA7 as modulated Buffer and Mixer; 6SL7 as audio oscillator and rectifier.
- Complete with coaxial cable, leads, instructions.

\$39⁹⁵

The New Model CA-11 SIGNAL TRACER

Simple to operate . . . because signal intensity readings are indicated directly on the meter!

- Simple to operate—only 1 connecting cable—no tuning controls.
 - Highly sensitive—uses an improved Vacuum Tube Voltmeter circuit.
 - Tube and resistor-capacity network are built into the Detector Probe.
 - Completely portable—weighs 5 lbs. and measures 5" x 6" x 7".
 - Comparative signal intensity readings are indicated directly on the meter as the Detector Probe is moved to follow the Signal from Antenna to Speaker.
 - Provision is made for insertion of phones.
- The Model CA-11 comes housed in a beautiful hand-rubbed wooden cabinet. Complete with probe, test leads and instructions.

\$18⁷⁵ NET

The New Model 600 Tube and Set Tester

A New Combination Tube Tester and Multimeter. A complete testing laboratory all in one unit. Test tubes. Reads A.C. Volts, D.C. Volts, D.C. Currents, Resistances and Decibels.

- Tube Tester Specifications:**
- Speedy operation—assured by newly designed rotary selector switch.
 - Tests all tubes up to 117 Volts.
 - Tests shorts and leakages up to 3 Megohms in all tubes.
 - Tests leakages and shorts of any one element against all elements in all tubes.
 - Tests both plates in rectifiers.
 - Tests individual sections such as diodes, triodes, pentodes, etc., in multi-purpose tubes.
 - New type line voltage adjuster.

Multi-Meter Specifications:

- D.C. VOLTS: (At 1,000 Ohms Per Volt) 0 to 7.5/15/75/150/750/1,500 Volts.
- A.C. VOLTS: 0 to 15/30/150/300/1,500/3,000 Volts.
- D.C. CURRENT: 0 to 1.5/15/150 Ma., 0 to 1.5 Amperes.
- RESISTANCE: 0 to 2,000/20,000/200,000 Ohms, 0 to 20 Megohms.
- DECIBELS: (Based on zero decibels equals .006 Watts into a 500-Ohm line.) —10 to +18 D.B., +10 to +38 D.B., +30 to +58 D.B.

\$52⁶⁰

Now you can SEE and HEAR The Signal SIGNAL TRACER

Always ready for instant use it takes less than five seconds to begin using this versatile unit. No maze of special cables—the Model CA-12 use only one connecting cable. No line cord on self-contained batteries. No tuning controls of any kind are needed—no tuning cable—no tuning.

- FEATURES:**
- Comparative intensity of the signal is read directly on the meter—Quality of the signal is heard in the speaker.
 - Simple to operate—only one connecting cable—no tuning controls.
 - Highly sensitive—uses an improved vacuum-tube voltmeter circuit.
 - Tube and resistor capacity network are built into the detector probe.
 - Built-in high gain amplifier—Alnico V. speaker.
 - Completely portable—weight 8 pounds—measures 5 1/2" x 6 1/2" x 9".
 - The Model CA-12 comes complete with Detector Probe, test leads, self-contained batteries and instructions. Comes housed in heavy gauge crystalline cabinet with beautiful two tone etched front panel. Net Price...

\$29⁹⁵

The New Model 777 20,000 Ohms Per Volt!! TUBE and SET TESTER

Tube Tester Specifications:

- Tests all tubes including 4, 5, 6, 7, 7L, Octals, Octals, Television, Magic Eye, Thyratrons, Single Ended, Floating Filament, Mercury Vapor Rectifiers, New Miniatures, etc. Also Pilot Lights.
- Tests by the well-established emission method for tube quality, directly read on the scale of the meter.
- Tests leakages and shorts of any one element against all elements in all tubes.
- Tests both plates in rectifiers.
- Tests in individual sections such as diodes, triodes, pentodes, etc., in multi-purpose tubes.
- New type line voltage adjuster.

Model 777 operates on 90-120 Volts 60 cycles A.C. Housed in beautiful hand-rubbed cabinet. Complete with test leads, tubes, charts and detailed operating instructions. Size 13" x 12 1/2" x 6".

V.O.M. Specifications:

- D.C. VOLTS: (at 20,000 Ohms Per Volt) 0 to 7.5/15/75/150/750/1,500 Volts.
- A.C. VOLTS: (At 10,000 Ohms Per Volt) 0 to 15/30/150/300/1,500/3,000 Volts.
- D.C. CURRENT: 0 to 1.5/15/150 Ma.
- RESISTANCE: 0 to 5,000/50,000/500,000 Ohms 0 to 50 Megohms.
- DECIBELS: (Based on zero decibels equals .006 Watts into a 500-Ohm line.)
- 10 to +18 db., +10 to +38 db., +30 to +58 db.

SHUNTS - SWITCHBOARD TYPE

111547

FIG. 1

FIGS. 2 & 3

FIG. 4

All lug blades are 1/4" thick and spaced 1/4" apart to receive 1/4" bus bar.
 Switchboard shunts consist of special alloy strips, the ends of which are fitted into terminal blocks provided with means for connecting the shunt in circuit with the main conductor and with the instrument.

IMPORTANT: Shunts below 25 amperes must be adjusted to the instrument with which they are to be used.

Prices are F.O.B. Los Angeles and subject to change without notice, and will be billed at prices prevailing at time of shipment.

All shunts listed are adjusted to 50 millivolt drop. 75 millivolt shunts are one and one-half times the above prices. 100 millivolt shunts are two times the above prices.

Ring or multiple range shunts can be supplied in any range combination. Prices can be determined by totalling the price of each individual shunt plus a calibration charge of \$7.50.

Shunt leads are normally included with the ammeters for use with external shunts. If leads are required, standard 5-foot leads are \$1.75 each, and for additional lengths add 35¢ per foot.

- QUIET

Up to four separate designations or messages may be placed on a single lamp assembly. Prices include any messages up to a total of 12 letters (not to exceed two lines) engraved on the front plate and are quoted less standard S-6 light bulbs. Additional letters or lines take special quotation.

STOCK NUMBER	ITEM	NET PRICE *
4001	Single light unit and front plate	\$4.10
4002	Double light unit and front plate	4.40
4003	Three light unit and front plate	4.70
4004	Four light unit and front plate	5.00

*Prices subject to change without notice, and will be billed at prices prevailing at time of shipment.

The multiple lamp unit housing is molded bakelite and each is slotted to hold the light isolation barriers. If a lamp annunciator requiring more than 4 messages is desired the holders may be mounted one above the other, alignment being accomplished by a slot and a tip on the bottom and top edges of the units respectively. Terminals are provided on the rear of the case for pilot light connections. The housing measures 3-1/8" wide x 2-5/16" deep and 1-1/4" high; the mounting flange being 3-3/4" x 1-1/2".

Front plates are 3-3/4" x 1-1/2" and the overall light area is 3" x 1-1/16". These plates are laminated black-faced plastic with engraving in white; other colors can be furnished at additional cost.

SWITCHBOARD INSTRUMENTS

MODEL 8A6 GROUP (5 1/2" x 5 1/2")

12547

Scale length: 5.12 inches. Accuracy: 1%. These instruments can be supplied at 1/2% accuracy at additional cost. Sqaure, surface type, back connected with cast aluminum cases, dull black finish. 5-foot leads are furnished for use with external shunts. High torque to weight ratios are maintained throughout the series. DC instruments are of permanent magnet moving coil type. AC instruments are moving iron type for use on frequencies from 25 to 135 cycles and can be supplied for use on higher frequencies, including 400 and 800 cycles at additional cost. Extremely low range millivolt meters are extra heavily damped. PRICES SHOWN BELOW ARE NET.

*500 volts and higher ranges are supplied complete with external resistor boxes. The prices shown for 750 to 10,000 AC volts include resistor multipliers. However, above 750 volts potential transformers are recommended. For prices with potential transformers add to the AC instrument base price of \$40.89 the price of the potential transformer required.

For internal illumination add \$10.00 to the above net prices. All instruments can be supplied in other ranges than those listed. All ranges of zero center meters can be furnished as ground detector meters. Suppressed scale instruments can be supplied to order in any range desired. Multiple range instruments can be supplied in any range combination. Black scales with white divisions and figures can be supplied. Prices upon application. High range voltmeters can be furnished with scales reading in kilovolts rather than volts.

Prices are F.O.B. Los Angeles and subject to change without notice, and will be billed at prices prevailing at time of shipment.

AIRCRAFT ELECTRICAL SYSTEM TESTER

MODEL 520

14814

RANGES:

Volts: DC 0-50. AC 0-50, 0-125.
 Ohms: 0-500 (33 ohms center scale).
 Continuity test light (utilizing internal battery).
 28-volt test light (for quick check of live circuits).

SENSITIVITY:

DC range 200 ohms per volt.
 AC ranges 110 ohms per volt.

SCALE LENGTH: 2.6"

ACCURACY:

DC volts 2% of full scale.

AC volts 3% of full scale.

Ohms within 3% of indicated value.

AC voltage ranges are calibrated for use on any frequency between 25 and 1000 cycles.

ADDITIONAL FEATURES: A light continuity test utilizing the internal battery is provided for quick circuit tests, which is extremely useful at night or in dark portions of the aircraft. Also a 28-volt test light is provided to check for hot circuits and the continuity of the ship's electrical systems.

APPLICATION: The Model 520 Tester is designed especially to meet the requirements of the aircraft industry and to specifications of leading aircraft manufacturers. It is used by the aircraft industry in installation, assembly and testing of electrical systems and equipment in air frames, and all types of aircraft assemblies and is normally included as standard aircraft equipment. It is utilized by field service personnel in repair and routine check of aircraft electrical systems. It is used by aircraft component manufacturers on their production lines for production testing.

HEAVY DUTY CONSTRUCTION: This unit is designed throughout for heavy duty commercial use and is equipped with a high torque instrument of our own manufacture designed especially for this application. However, the overall weight has been kept to a minimum for its use as aircraft equipment.

NO SWITCHING NECESSARY: A special circuit was developed for the Model 520 which eliminates all switching, thus simplifying its use and operation and allowing the most inexperienced workman to use the instrument without errors.

OPERATION: The operation is very simple. It is only necessary to insert the test leads into the jacks above and below the range desired, as shown on the instrument panel. On the DC voltage range the red jack is positive. To accurately read ohms it is only necessary to insert the test leads above and below the designation "ohms," and by shorting the test leads together, adjust the instrument pointer to zero on the ohms scale by the "adj. ohms" knob which compensates for any variations that occur in the internal battery voltage. The instrument is then ready to read directly in ohms as indicated on the scale.

DESCRIPTION: Instrument is mounted in a sturdily designed molded black bakelite case and is provided with a polished black bakelite panel permanently engraved in white with all necessary ranges and designations. On the panel is mounted the indicating instrument, ohm adjustment knob, test lights and heavy duty jacks. All internal components are mounted on a sub-panel which is a part of the panel assembly, thus allowing the unit to be withdrawn from its case in one assembly for servicing or the replacement of batteries.

ACCESSORIES: Extra flexible rubber covered 4 ft. test leads provided with heavy duty test prods and insulated right angle pin plugs are available at an additional net cost per pair of \$1.20.

DIMENSIONS: 5 7/8" long, 3 1/8" wide, 2 7/8" overall height including knob.

WEIGHT: 1.3 pounds.

NET PRICE: \$38.00.

Prices are F.O.B. Los Angeles and subject to change without notice, and will be billed at prices prevailing at time of shipment.

PHASE SEQUENCE INDICATOR

MODEL 540

12847

APPLICATION: The Phase Sequence Indicator has been designed into a small, compact, extremely light weight, readily portable unit which will save many man hours and eliminate costly repairs due to wrong connections. It is used by construction and maintenance men, meter men, trouble-shooters, testers and engineers in industrial, generating and distribution plants to predetermine the direction of rotation of polyphase motors and the proper connections for paralleling generators, transformer banks, power bus circuits, watt hour meters, instruments and relays, etc. These are only a few of the many uses of the instrument.

RATING: The Phase Sequence Indicator is designed to be used on 110, 220 or 440 volt polyphase circuits of frequencies from 25 to 60 cycles.

SELF-CONTAINED: No moving parts — all equipment is contained within the one compact portable unit which is provided with suitable insulated binding posts for connections to various ratings. No damage is done to indicator if over-voltage is applied, as any range will withstand 2 times normal voltage for short periods of time, since indicator lamps are of the Neon type and there are no filaments to burn out. Also a special test switch is provided to check for open circuits and correctness of connections to the indicator.

OPERATION: Binding posts are provided at each end of the panel plainly marked in voltage ratings and also single binding posts in the center. Connect polyphase circuit to be tested to the binding post with proper voltage rating at each end and to the center binding post which is common to all voltage ratings. Above these rows of binding posts and middle post will be noted "1-2-3" which refers to phase 1-2-3. After the proper connections are made, press push-button test switch and if connections are proper and no phases are open, both lights will glow. If light marked 1-2-3 does not glow, phase 1 is open. If light marked 3-2-1 does not glow, phase 3 is open. Release push-button and if both lights continue to glow, phase 2 is open or connection has been made to a lower voltage range than the voltage of the circuit under test. If all connections are good and all phases are

functioning, upon release of the test push-button one light will glow and the phase sequence as indicated by the numbers below it will be the phase sequence of the circuit under test as connected to phases 1-2-3.

DESCRIPTION: Instrument is mounted in a sturdily designed molded black bakelite case and is provided with a polished black bakelite panel permanently engraved in white with all necessary ratings and designations. Upon the panel is mounted fully enclosed and protected Neon indicating lamps, a heavy duty push-button test switch and insulated binding posts to which the circuit under test is connected.

DIMENSIONS: 5 7/8" long by 3" wide, 3" overall height including binding posts.

WEIGHT: Net .93 pound.

NET PRICE: \$25.00.

Prices are F.O.B. Los Angeles and subject to change without notice, and will be billed at prices prevailing at time of shipment.

APPLIANCE TESTING PYROMETER

MODEL 101

14815

RANGE: 0-1000° Fahrenheit.

COLD END COMPENSATION:
Manual.

SCALE LENGTH: 2.6"

ACCURACY: 2% of full scale value.

DIMENSIONS: 3½" long, 3⅜" wide, 2½" high. Thermocouple length: 20".

WEIGHT: 1.08 lbs.

DESCRIPTION: This instrument is mounted in a sturdy, cast aluminum case with durable black finish. The thermocouple is permanently attached within the instrument and may be readily replaced if necessary; thus the instrument may be carried with other servicing equipment and is always ready for immediate use.

APPLICATION: The Model 101 Appliance Testing Pyrometer is designed to meet the requirements of all branches of the appliance industry. It is used by manufacturers for production testing, by dealers and distributors for demonstration purposes to customers, and by repair and service organizations in repair and maintenance, by accurately measuring the temperatures of such products as electric irons, mangles, toasters, broilers, waffle irons, hot plates, ovens, grills and other appliances heated by either electricity or gas.

HEAVY DUTY CONSTRUCTION: The instrument is equipped with a high torque pyrometer movement of our own manufacture, designed especially for this application, utilizing rugged construction throughout to withstand the rough usage in production or service operations.

SPECIAL THERMOCOUPLE: The instrument is equipped with a special iron constantan thermocouple with woven glass insulation which is extremely durable, maintaining very small physical dimensions of .095" x .060" which allows the insertion of the thermocouple into appliances that require temperatures to be read while closed, such as grills, ovens, waffle irons, mangles, etc. The thermocouple can be easily kept clean.

OPERATION: For accurate measurements, the instrument pointer should be first adjusted to correspond to the room temperature by means of the adjustment screw provided in the center of the lower portion of the instrument. Operation of the instrument is extremely simple. It merely requires the insertion of the thermocouple into the appliance to be tested or the application of the thermocouple directly to the surface of the appliance, as in the case of an electric iron or hot plate. The temperature of the appliance is directly indicated on the scale of the instrument which responds very rapidly to the temperature under test.

NET PRICE: \$33.00.

Prices are F.O.B. Los Angeles and subject to change without notice, and will be billed at prices prevailing at time of shipment.

PISTOL GRIP PROD TYPE PYROMETER

MODEL 103

14817

APPLICATION: The Model 103 Pyrometer has been designed as an extremely rugged and portable instrument for quick and accurate measurement of surface and sub-surface temperatures. The instrument has numerous commercial applications, such as measurement of temperatures of ovens, kilns, molten metals, type metal and linotype mouthpieces, die cast metal and die cast molds, plastic molds, processing plates, compounds, tire molds, phonograph record presses, engine temperatures, bearing temperatures and metallic surface temperature readings. It is also used for measuring the temperature of steel rails, non-ferrous and ferrous bars, billets, sheets, etc.

ADDITIONAL FEATURES: The Model 103 Pyrometer may be used to check the accuracy of other pyrometers of similar range and using thermocouples of the same metal combinations. This is done by using a Model 103 with open prod type thermocouples and applying the prods to the exposed thermocouple terminals of the pyrometer under test from which one of the connecting leads has been disconnected, and comparing the reading obtained with the reading of the pyrometer under test when connected to its thermocouple.

HEAVY DUTY CONSTRUCTION: The instrument is equipped with a high torque pyrometer movement of our own manufacture designed especially for this application, utilizing rugged construction throughout to withstand the jar and vibration of industrial usage.

OPERATION: The Model 103 Pyrometer is completely self-contained and is extremely simple to operate. When equipped with the open prod type thermocouple it is only necessary to press the prod points firmly against the surface of the metallic object to be measured; the moment a good contact is made the indicator will show the correct temperature instantaneously, and in this manner the unit is used to measure the temperature of all metallic surfaces including dies, plates, molds, bearings, rods, bars, etc.

The Model 103 equipped with closed welded type thermocouple is used for the measurement of kiln and furnace temperatures and the temperatures of molten metals at the surface and below surface by direct insertion into the area or materials to be measured. Diesel engine exhaust temperatures are measured by inserting the thermocouple through the open ports in the exhaust manifold; hardening and

heat treating baths and other general temperature measurements in non-conducting media which require the use of a closed circuit thermocouple are measured by direct insertion into the material.

DESCRIPTION: The handle and case of the instrument are sturdily designed of cast aluminum which provides the necessary light weight for ease of handling in continuous use. The instrument is provided with an extremely long and easily read scale indicating directly in degrees of temperature. It is equipped with a thermocouple connector which is so designed that the thermocouple can be readily removed for replacement or changed from one type to another, and provision is made so that the thermocouple cannot be inserted incorrectly. Set screws are provided to securely hold the thermocouple in place to eliminate any errors caused from poor connection. Although the instrument is pictured with both types of thermocouples, it is supplied with only one thermocouple of either type.

SPECIAL FEATURE: The instrument is provided with a pistol grip handle which allows it to be held with ease and in the proper position for taking measurements and at the same time reading its temperature indication. This handle is provided with an open section which can be utilized to hang the instrument on a convenient hook when not in use.

DIMENSIONS: The instrument proper, from thermocouple mount to end of pistol grip handle, is 7¾" long, 3⅜" wide, with an overall height including pistol grip handle of 4½". The thermocouple length is 15".

WEIGHT: 1.55 pounds. **SCALE LENGTH:** 2.6".

ACCURACY: 2% of full scale value.

COLD END COMPENSATION: The Model 103 is furnished with automatic cold end compensation in the lower ranges and in the higher ranges manual compensation is normally provided. If automatic compensation is required in the higher ranges, it will be supplied at an additional net cost of \$7.50.

RANGES AND PRICE:

Ranges in Degrees Fahrenheit*	Degrees per Division	Manual Compensation	Automatic Compensation
0-300°	5		\$67.50
0-400°	10		57.50
0-500°	10		57.50
0-600°	10		57.50
0-750°	10	\$52.50	
0-800°	20	47.50	
0-1000°	20	47.50	
0-1200°	20	47.50	
0-1500°	20	47.50	
0-2000°	50	48.50	
0-2500°	50	48.50	

* Furnished in equivalent Centigrade calibration upon request without extra charge.

EXTRA THERMOCOUPLES:

Open prod type, iron-constantan, for ranges including 1500 degrees	\$4.50
Closed welded type, iron-constantan, for ranges including 1500 degrees	4.50
Open prod type, chromel-alumel, for ranges 2000 and 2500	5.50
Closed welded type, chromel-alumel, for ranges 2000 and 2500	5.50

Prices are F.O.B. Los Angeles and subject to change without notice, and will be billed at prices prevailing at time of shipment.

SPECOILS STANDARDIZED SMALL SIZE FOR FM AND TELEVISION

NEW ELECTRONIC DEVELOPMENT

The SPECOIL double-tuned miniature IF transformer marks a new development in the field of electronics. This new feature is introduced in the design of Television and FM transformers for high frequencies which results in a high degree of performance with uniform band-pass characteristics and simultaneously allows for a great reduction in the size of the component.

SMALL SIZE — SHORT LEADS

The small size SPECOIL allows for substantial savings in space and provides superior performance as compared with transformers of larger size. The fact that SPECOILS are small enables the builder to place related components much closer together so that leads are short and thus the tendency toward regeneration is eliminated when three or more successive IF tuned stages are employed.

CONSTRUCTION

The 'rugged' construction of SPECOIL transformers insures dependable and stabilized performance under adverse conditions of temperature, humidity and vibration. Soldering terminals are securely riveted to a moulded

base of high dielectric material with consistent mechanical strength and heat resisting qualities to remove any danger of terminals becoming loose at soldering iron temperatures

TUNING FEATURES

SPECOILS are substantially dustproof. They are designed so that aligning can be accomplished from the top side of the transformer. This feature permits complete shielding of the equipment and obviates the necessity of getting on the underside of the chassis for any tuning adjustments. Iron core slugs as they are employed for tuning are 'stone cold' for RF thereby eliminating capacity effects, radiation and all foreign noise during any period of alignment or vibration.

MAX MIXER

— Adds Microphone Input to any Amplifier (MODEL MIX)

FOR HILL-BILLY BANDS, ORCHESTRAS, INSTRUMENTALISTS, VOCALISTS, ENTERTAINERS, DRAMATIC CLUBS, NIGHT CLUBS, CONCEPTIONS, SOUND MEN.

The "MAX-MIXER" provides a low-cost method of adding to and mixing up to two or more microphones than provided for by regular input of any amplifier. By plugging the "MAX-MIXER" cable into the microphone input of an amplifier and then plugging one, two or three high impedance microphones into the "MAX-MIXER", the user can regulate each by a separate volume control. "MAX-MIXER" eliminates necessity for using contact microphones which incorporate a volume control. The controls on the "MAX-MIXER", itself, serve the purpose.

\$18.95 list

SHOCK PROOF PLASTIC PLIERS (MODEL PRP-A)

Not a substitute for metal pliers but a necessity for specialized jobs on radios, electrical appliances, etc. to avoid shocks. Weight only 1 1/2 ounces. Absolutely shock-proof. Non-magnetic. Heat resistance 240 degrees to 300 degrees. 6,000 volt breakdown. Pick up nuts, screws and washers without danger of shorting. For relocation of wiring without introducing a magnetic field while equipment is in operation.

MANUFACTURERS OF PRECISION INSTRUMENTS FOR OVER A QUARTER OF A CENTURY

1 1/2" MINIATURE—External pivots for greater accuracy. Highest-grade Alnico magnets. Waterproof sealing. Metal (round) or plastic (square) case.

2 1/2" Model S-210 in the 2 1/2" size and Model S-310 in the 3 1/2" size are built to comply with American Standards Association specifications.

Model S-112 Square

Model 120 Round

Model S-210 Round

Model S-212 Square

Superior magnetic materials—Alnico and Cobalt, used in conjunction with soft iron pole pieces, assure high torque, fast response, improved performance.

Large pivot axis permits more accurate adjustment of jewels and pivot assembly and greater accessibility for servicing.

Better balancing and uniform magnetic flux around moving coil eliminate possibility of calibration error.

Highest-grade Alnico magnets. Laminated magnets are protected by Cadmium and tin platings. Movement supported by aircraft-type bracket. Beryllium copper balance weights and anodized coil frame. Every meter rigidly inspected, electrically and mechanically, in air-conditioned rooms.

Knife-edge or pear shaped pointers, shatter-proof glass, rear-illumination and special scales supplied on order.

3 1/2" Similar in construction to the 4" Model. Easy legibility at a distance. Multi-scales in combination up to 3 colors supplied on order.

4" Maximum scale areas permit multi-scale combinations in 2, 3 or 4 colors, with no crowding of graduations. Lance pointer standard; others to order.

Model S-310 Round

Model S-322 Square

Model S-422 Rectangular

DeJUR FEATURES: Designed for maximum ruggedness, durability, dependable accuracy. Tested for resistance to vibration, heat, humidity. Every DeJUR Potentiometer undergoes a severe 24-hour test. Units with special resistance values and tolerance can be supplied. Also tapered units, of both straight and logarithmic types. Available with side or edge contacts.

Types 260 and 275 are ideally suited in high impedance vacuum tube circuits where high resistance values and a minimum noise level are required. Five wiping fingers, self-aligning, assure continuous contact and low noise level for any position. Shaft may be extended through either or both ends.

Other resistance ranges are available. "Off" position, tapered resistance, center-tapped, dual and multiple tandem units can also be supplied. Shaft lengths, slotted metal 1/4" insulated shaft and other mechanical changes are available.

Special Gang Mounting

Special Bracket for Dual Mounting

DeJUR Rheostat-Potentiometers can be furnished mounted two or more in gang assembly for simultaneous operation of several circuits or circuit components, by means of one control. Two of these applications are illustrated above and many other arrangements are feasible. Our engineers will be glad to examine your requirements.

TEKTRONIX TYPE 511 Cathode-Ray Oscilloscope

GENERAL DESCRIPTION

The Tektronix Type 511 is a portable, wide band oscilloscope, providing features formerly found only in very expensive, cumbersome "tea wagon" instruments.

SWEEP CIRCUIT

Hard tube, radar type, provides either sawtooth or triggered sweeps continuously variable from .1 second to 1 microsecond (10 cm deflection).

A trigger selector switch enables the sweep to be initiated by the observed signal as well as externally generated impulses of either polarity.

Thus use of the triggered sweep is not confined to aperiodic or transient signals, but may be used to observe any signal in the frequency range of 10 cycles to 10 mc. Since each triggered sweep is started independently of the preceding one a stationary pattern is obtained regardless of the relationship between the sweep speed and signal frequency.

Single sweeps may be initiated by pulses as short as .05 microsecond.

Calibrated controls indicate the time for 10 cm sweep within $\pm 10\%$.

Sweep magnifier control permits any selected 20% of trace to be expanded five times.

FEATURES

The instrument operates with a 3 kv accelerating potential and is normally supplied with the 5CP1A cathode ray tube. For special applications the Type 511 will be supplied with either the 5CP7A or the 5CP11A at no extra cost.

An edge-lighted plastic scale provides reference lines of controllable brightness which aids in making quantitative measurements. A green filter is provided which effectively increases the contrast under high ambient light conditions.

A terminal plate accessible through the side of the cabinet allows direct connection to all four deflection plates.

As a result of extensive use of lightweight, strong, electrically welded alloys, the total weight of the instrument has been reduced to 65 pounds. The overall dimensions are: 15 $\frac{1}{2}$ " H, 12 $\frac{1}{2}$ " W, 21 $\frac{1}{2}$ " D.

SIGNAL CHANNEL

A unique feature of the Type 511 is the Input Channel Selector switch connecting the signal input binding post to the deflection plates in four ways: directly, via condenser, via 1 or 2 stage wide band amplifier. This gives three basic sensitivities; .25, 2.5, and 25 peak to peak volts per centimeter.

An RC compensated attenuator having ratios of 1, 2, 4, and 8 can be used with any of the Input Channel Selector positions, thus providing deflection sensitivities as low as 200 volts per cm.

The input impedance of the instrument varies less than 1% for any position of the Attenuator or Input Channel Selector.

The signal amplifiers of the Type 511 are individually adjusted to provide optimum transient response as shown in the actual photographs.

1 mc. square wave response
of two stage amplifier

60 cycle square wave response
of two stage amplifier

The bandwidth for one stage is 10 mc and 8 mc for two stages (3DB down from 1 mc).

A calibrated potentiometer provides 60 cycle sine wave calibration voltages in three ranges: 0-1, 0-10, and 0-100 volts peak to peak, with an accuracy of $\pm 5\%$ of full scale.

Continuous frequency coverage up through the color television bands.

• THE MEGA-SWEEP ...

WIDE RANGE

SWEEPING

OSCILLATOR

Shows at a glance the response of any network or amplifier. Eliminates the tedious point to point analysis. Saves engineering time and stimulates research. Valuable for television production alignment.

USES:

- Testing Television Systems and Components.
- Testing Radar Systems and Components.
- Instructional Purposes in Schools and Universities.
- Designing Wide-Band i.f. Amplifiers.
- Designing Filter Networks.
- Production Testing of FM and Television Equipments.
- As a Signal Source of Extraordinary Range (Unmatched by any existing commercial signal generator).
- As a cw high frequency oscillator.
- Self-contained, Regulated, Power Supply — 117 Volt, 60 Cycle.
- Operation — Size 10" x 17" x 12"
- Weight 45 Pounds.
- Price \$395 F.O.B. Factory

The Mega-Marker Sr. is a newly-developed electronic instrument for the generation of marker frequencies. Provides a precise source of frequencies throughout the television spectrum for all thirteen television channels. Each of these frequencies is controlled by a crystal whose accuracy is 0.01%. Such accuracy is more than adequate for all needs of television.

Mega-Marker Sr. may be used for the alignment of the local oscillator for all thirteen channels. This is accomplished by using the sound channel to furnish an indication of discriminator output.

The single-dial control gives a rapid and efficient means of frequency selection without the necessity of consulting charts or calibration curves.

The Mega-Marker Sr. facilitates the alignment of the r.f. channels in the same manner that the Mega-Pipper and Mega-Marker facilitate easy i.f. alignment.

MISC.: 117 Volt, 60 Cycle — Size 8" x 16" x 8". Weight 15 Pounds.
Price \$195.00 F.O.B. Pine Brook, N. J.

THE MEGA-MARKER SR.

The ONLY 13-CHANNEL CRYSTAL-CONTROLLED MARKER OSCILLATOR. For Rapid and Accurate Alignment of Television Receivers.

- CRYSTAL Accuracy 0.01%.
- Single Dial Operation.
- Provides Sound Carrier Frequencies.

THE MEGA-MARKER

Precision variable marker oscillator having a range of 19 to 29 megacycles for the television i.f. band.

Crystal oscillator for the FM i.f. band (10.7 mc.).

A large, easily read dial provides over 12 inches of calibrated scale length. Thus it may be read to accuracies of 0.02 megacycles.

Included in the Mega-Marker is a crystal controlled oscillator which provides accurate check points.

The Mega-Marker is a valuable accessory for FM and television applications of the Mega-Sweep and Mega-Match. For absolute stability the regulated power supply of the Mega-Sweep or the Mega-Match is used.

Weight 5 Pounds. Size 7" x 10" x 6".
Price \$60.00 F.O.B. Pine Brook, N. J.

• THE MEGA-PIPPER

The Mega-Pipper is a new production and service alignment instrument. By the use of this unit in conjunction with the Mega-Sweep or Mega-Match it is possible to quickly and accurately align television receivers.

The Mega-Pipper gives four precise crystal controlled pips which are independent of the circuit under test. These pips establish the picture, sound carrier, and also the adjacent

channel points. Thus the Mega-Pipper is an instrument which will save many hours of time spent in alignment. No switching or adjustment is necessary for frequency control.

Inasmuch as the pips are fed directly into an oscilloscope the pips are visible at all times, even in the traps where the highest precision is desired.

Self-contained power supply.

Weight 15 Pounds. Size 8" x 16" x 8".
Price \$150 F.O.B. Pine Brook, N. J.

Manufacturers OF SPECIALIZED ELECTRONIC APPARATUS

Finest in Transmitting Equipment

When you buy—AE-30, El-Tronics transmitting set—you're not getting just another "ECO", but the finest—the most complete equipment. It has 30 watts output on five bands—and is single dial tuned and band switching. Simple in operation:—

1. Set band switch
 2. Set dial to frequency
 3. Turn on power—and YOU'RE ON THE AIR
- Send for descriptive Bulletin No. 481.

GEIGER-MÜLLER Laboratory Counting Rate Meter

MODEL RM 4

Direct reading counting rate meter with FOUR full scale ranges of 5, 50, 500 and 5000 pulses per second. Provision for connection of external 5 m. a. recording milliammeter. Recorder circuit for operation of impulse register (recording clock). Regulated high voltage power supply for counter tube. Built-in loudspeaker for aural monitoring. Pulse equalizing and sharpening stages. Operates with self-quenching OR non-self-quenching counter tubes. Provision for connecting scaling circuit, impulse register, oscilloscope, recording milliammeter and calibrating input signal. Price only \$350 less counter tubes and recording clock. For complete description send for Bulletin No. 471.

Portable GEIGER-MÜLLER Radiation Survey Instrument MODEL RS 3

A complete portable battery operated instrument for the measurement of radiation intensities—incorporating precise reliable circuits such as usually found only in elaborate laboratory apparatus.

Direct reading—three full scale ranges of .25, 2.5 and 25 milliroentgens per hour.

4" indicating meter conveniently located on top of case for ease in taking reading.

Only the correct meter scale can be seen—correct scale moves into position as range switch is rotated.

Highly stable electronic high voltage power supply for counter tube, adjustable from approx. 500 to 1500 volts—eliminates necessity of special counter tubes.

Detects and measures both beta and gamma radiation.

Meter indicates exact voltage applied to counter tube—also checks battery voltages.

Send for complete descriptive Bulletin No. 482.

GEIGER-MÜLLER
LABORATORY SET
MODEL LS 64
CONSIDER THESE SPECIFICATIONS

All of the newest circuits—simplified and modernized—reliable and foolproof. Uses the famous Higinbotham Scaling circuit.—SCALE OF 64 (Used under license agreement with U. S. Atomic Energy Commission). Built-in recorder clock of zero reset—counts up to 9999 before recycling. Regulated high voltage power supply for counter tube, with front panel voltmeter. Suitable for use with self-quenching or non-self-quenching counter tube. Bank of neon indicator lamps for interpolation of count and indication of proper scaler operation. Small, compact, light in weight—constructed completely on one 13"x17" chassis with 8-3/4" rack type front panel. **PRICE ONLY \$360.00** complete with tubes and built-in recording clock. Send for descriptive Bulletin No. 472.

A GEIGER-MÜLLER COUNTER SET

Designed for the Class Room
Lecture Demonstrations
Inexpensively Priced at **ONLY \$69.50**

Our DS-7 Model illustrates the use of the Geiger-Müller Counter in detecting and measuring radiation from radioactive materials.

Indicates the presence of and relative intensity of radioactive materials. Each ionization event taking place in counter tube causes loud clicks in built-in loudspeaker and flashes light on front panel. Will operate with any self-quenching counter tube not requiring over 1000 volts. Completely A. C. operated. Send for Descriptive Bulletin No. 473.

THE COUNTER TUBE TESTER

Here's the last word in tube testers made for discriminating distributors, retailers and radio servicemen. Besides the special features noted below, they have been provided with extra sockets and switch contacts for newly-developed tube types. Size: 5³/₈" x 14³/₈" x 14³/₄"; weight: 17 lbs.

Type 139

Dynamic Conditions

All tube elements tested under dynamic conditions.

Fingertip Controls

make settings easy.

DeLuxe Design

builds prestige for serviceman or retailer.

Shorts Test

at voltage low enough to prevent tube damage or faulty indications — high enough for full brilliancy on Shorts indicator.

Tests Standard, Lock-In, Acorn Tubes.

Large Meter

4¹/₂" size for high legibility. Sensitive but rugged.

Legible Dial

Markings—

lines and numerals in white against green panel.

8-Ft. Line Cord—

extra long for extra convenience.

Provision for

Noise Test.

PORTABLE TUBE TESTER

Type 140

Retains the same electrical characteristics and special features as the Counter Model above left, plus steel carrying case, strong leather handle. Size: 5¹/₂" x 12" x 16¹/₄"; weight: 17 lbs.

THE POLY (MULTI-PURPOSE) METER (Type 134Z)

Just the answer for AM-FM-TV servicing. Tests receivers, transmitters. Highly accurate. New circuit provides superior stability. New easy to understand operating manual free with each Polymeter. All essential accessories no extra charge.

SPECIAL FEATURES

Tests audio, A.C. and R.F. voltages from 20 cps to 300 mc. Uses proximity fuze-type tube built into handy probe. Full scale range of 3, 10, 30, 100, 300.

Measures D.C. from .1 to 1,000 volts in full scale ranges of 3, 10, 30, 100, 300, 1,000.

Measures D.C. current from .1 milli-ampere to 10 amperes in full scale ranges of 3, 10, 30, 100, 300, 1,000 milliamperes and 10 amperes.

Measures resistance from 1/2 ohm to

1,000 megohms in full scale ranges of 1,000, 10,000, 100,000 ohms and 1, 10, 1,000 megohms.

INPUT IMPEDANCES

R.F. ranges — 2.3 megohms resistance shunted to approximately 3 mmf. capacity.

A.C. ranges — 2.7 megohms resistance shunted to approximately 40 mmf. capacity.

D.C. ranges — 16 megohms resistance.

OSCILLOSCOPE (Types 131 and 132)

OSCILLOSCOPE TYPE 131

Flexible in its many applications and priced within reach of every pocketbook. High input impedances, excellent sensitivity and amplifier response.

OSCILLOSCOPE TYPE 132

Giant 7" tube and special push-pull amplifiers place this sensational instrument in a class by itself. Check wide response, high input impedances, low amplifier distortions. Priced as low as many smaller oscilloscopes. Provides for intensity modulation. Widely used by service dealers and industrials for AM-FM-TV testing.

AUDIO OSCILLATOR (Type 145)

Wide range—20-20,000 cycles, flexible, accurate. Large amount feedback prevents output distortion. Ideal for receivers, transmitters, PA servicing. High output permits testing speakers direct. Stabilized R-C circuit.

RADIO CITY PRODUCTS CO., Inc.

NEW YORK 1, N. Y.

TEST EQUIPMENT

POCKET SIGNAL GENERATORS MODEL 710 AM — MODEL 720 FM

For "On The Job" service work both of these popular generators are a "must," and is an answer to the needs of thousands of servicemen, experimenters, and is ideal for production testing.

Model 710AM generator provides broadcast band alignment by fixed frequencies of 550 Kc and 1500 Kc. Intermediate frequency alignment is provided for by fixed frequencies of 456 Kc and 465 Kc. Trimmers are provided for the purpose of recalibrating. Safe AC or DC operation. Isolation of case and chassis prevents any chance of shock, short circuit or burn-out.

Complete with tubes. Shielded output, cable and plug ready to operate. Housed in attractively designed case. Size 3" x 6" x 2 3/4".

Weight 2 lbs.
Dealer Net Price **\$17.95**

Model 720FM generator is a companion unit and is actually FREQUENCY modulated sufficient for radio detectors and covers the entire FM band. All needed frequencies for FM servicing are instantly available at accurate calibration. Switch provides fixed frequencies of 9.1 megacycles and 10.7 megacycles for IF and 88 and 108 megacycles for the low and high ends of the band. Continuously variable attenuation is provided to prevent overloading.

Complete with tubes, shielded output, cable line cord and plug ready to operate. Housed in attractively designed case. Size 3" x 6" x 2 3/4". Weight 2 lbs.

Dealer Net Price **\$19.95**

NEW 450 SERIES HI-MEG MULTITESTERS

Accurate HIGH MEGOHM RANGE requires NO batteries and NO tubes. Uses germanium crystal rectifier for AC measurements.

Rectangular 4 1/2" meters provide excellent readability and are accurate within 2%. Output ranges correspond to the AC voltage ranges. Hi-megohm ranges are accomplished with an external AC cord.

All bench type or open face models have dimensions 8 7/8" x 5 1/2" x 3 3/4". Weight 3 lbs. All portable models are designated by letter "P" and are furnished in attractive natural finish oak cases with leath.

and leather handle. Dimensions, 8 7/8" x 7 1/2" x 4 3/4". Weight 1 1/2 lbs.

MODEL 450A — 1000 Ohms per volt

Ohmmeter: 0-5000-500,000-50 Meg.
DC Volts: 0-5-50-125-500-2500.
AC Volts: 0-10-100-250-1000.
DC Milliamps: 0-0.1-10-100-1000.
Decibels: —9 to +55 DB.

Dealer Net Price **\$20.95**

Model 450AP—Same as Model 450A except in portable case with leads.

Dealer Net Price **\$24.95**

MODEL 450C — 20,000 Ohms per volt

Ohmmeter: 0-5000-5 Meg.-1000 Meg.
DC Volts: 0-5-50-125-500-2500.
AC Volts: 0-10-100-250-1000.
DC Milliamps: 0-0.1-10-100-1000.
Decibels: —9 to +55 DB.

Dealer Net Price **\$28.50**

Model 450CP—Same as Model 450C except in portable case with leads.

Dealer Net Price **\$32.50**

Here are fine instruments that provide immediate measurements of high resistance values without the use of expensive bridges.

SIGNAL GENERATOR MODEL 705A

BOTH 30% AND 80% MODULATION

R. C. P. Model 705A Test Oscillator brings you a feature ordinarily found only in high-priced instruments—high and low percent modulation. Low harmonic output on low frequency bands. High percentage harmonics on high frequency band only. IDEAL FOR ALIGNMENT OF FM RECEIVER IF'S BY THE ZERO DISCRIMINATOR CURRENT METHOD.

Dial calibration provides fundamental frequencies from 100 Kc to 25 Mc. Band "F" has been included to provide calibrated output using third harmonic of Band "E" to give direct frequency readings from 25 to 75 Mc. Band "F" harmonic output is sufficient for alignment of all present day FM receivers. Calibration is accurate within 2% per band for broadcast bands and within 3% for high frequency and FM bands. Ideal for direct-reading calibration of receivers.

Automatic shorting of coils not in use. Individual shielding of RF circuits, coil assembly and attenuator. Overall steel case, chassis and panel. Pused line supply.

Planetary drive condenser, double-ended indicator—Output can be modulated or unmodulated. Sinusoidal modulation frequency of 100 cycles also available for external application. Five step-ladder attenuator with vernier.

Model 705A—Complete, ready to operate. Size 8" x 11 3/4" x 3". Weight 11 lbs.

Dealer Net Price **\$49.50**

DYNATRACER MODEL 777

A new signal tracer that establishes a new high in performance records — covers all AM - FM - TELEVISION receivers

Astonishing new design at economical cost that gives high amplification available only in the expensive tuned channel types. Operation is most simple.

TESTS MICROPHONES AND PHONOGRAPH PICKUPS directly through terminals provided

Negligible outside pickup of noise or hum. Extremely high sensitivity enables this instrument to pick up broadcast signals when connected to a short lead.

Checks noise pickup at antenna—checks operation of AVC MEG link and filter circuits. Detailed instructions give full information for checking all types of receivers and their components.

With this revolutionary signal tracer really near the signal and any variation directly from antenna through each stage of r.f.-i.f.-a.f. step by step without operating any switch or changing to different channels in the instrument. You get readings of signal strength and directly measure gain per stage. Gain measurements made by accurate meter not possible with magic eye indicators.

Negligible Disturbance to circuit under test as input capacity is only 5 mmfd.

Attenuation of 10,000 to 1 by a ladder type of step attenuator with vernier control.

Sensitivity extremely high—10,000 microvolts full scale.

Traveling Detector—Convenient, insulated probe housing detector and amplifier at end of 50" lead.

Frequency coverage up through 150 megacycles.

Model 777—Beautiful hammertone grey finish — 4" Alnico V speaker, sensitivity control, microphone-phonograph input jack — traveling detector probe, sensitive milliammeter with associated switching control — ladder type step attenuator, vernier control — automatic control switch for speaker or meter or both or standby. Includes 6AT6, 7A7, 7R5, and 6X5 tubes. Complete, ready to operate, 105-135 volts. Weight 9 1/2 lbs. Size 6 5/8" x 5 1/8" x 1 1/2".

Dealer Net Price **\$41.50**

Model 776—Same signal tracer performance as 777 except that meter and attenuator with associated controls are omitted. Same tube complement. Weight 7 3/4 lbs. Size 5 3/4" x 7 1/4" x 9 1/2".

Dealer Net Price **\$29.95**

RADIO CITY PRODUCTS CO., Inc.

NEW YORK 1, N. Y.

TEST EQUIPMENT

COMBINATION DYNOPTIMUM TUBE AND SET TESTER MODEL 802N

— EASY OPERATION — UP TO DATE —

— Only 5 simple switches to operate both Tube and Set Tester —

tests new and old types of tubes as well as all ballast tubes.

Tube Tester gives speedy leakage short tests between all elements. Separate noise test for tubes that otherwise test "good." Large scale 4 1/2" rectangular meter protected against burn-out by special meter fuse for both multitester and tube tester. Complete instrument is also protected against burn-out by line fuse immediately replaceable at extractor post on panel. AC voltage measurements are free from temperature and frequency errors with the use of a germanium crystal rectifier. Tube Tester

RANGES

DC Voltmeter: 0-10-50-500-1000 at 1000 Ohms per Volt.
 AC Voltmeter: 0-10-50-500-1000.
 DC Milliammeter: 0-1-10-100-1000.
 DC Ammeter: 0-10 Amperes.
 Ohmmeter: 0-500-5000-1 Meg.-10 Meg. low center scale.
 DB Meter: —8 to +55 decibels in four ranges.
 Four range output meter: Same as AC volts.

Model 802N—supplied in handsome hardwood case, with special compartment for small tools, test leads (included), etc. Size: 12 3/4" x 12" x 5 1/4". Weight: 11 1/2 lbs. Complete with self-contained batteries, ready to operate.

Dealer Net Price **\$59.50**

POCKET MULTITESTER MODEL 449A

Versatile multi-tester remarkably accurate. It's tops for general circuit testing and for speed in troubleshooting. Uses a 3" square meter at 5,000 ohms per volt with a basic movement of 200 microamperes. Batteries are mounted in special spring clips readily accessible for replacement—no wires to solder. Combines 6 instruments in one small unit.

RANGES

DC Volts: 0-5-50-250-1000 Volts.
 AC Volts: 0-5-50-250-1000 Volts.
 DC MA: 5-10-100-1000 MA.
 Ohms: 0-2000-20,000-200,000-2 Meg-ohms.
 Decibels: —6 to +52 DB in four ranges.
 Output Meter: 0-5-50-250-1000.

Model 449A—Pocket Multitester supplied in black metal case complete with self-contained batteries. Ready to operate. Size 5 7/8" x 3 1/2" x 2 1/4". Weight 1 3/4 lbs.

Dealer Net Price **\$24.50**

Model 449AP—Same as 449A but supplied in portable oak case with leads.

Dealer Net Price **\$28.50**

ROLLINDEX

Model 105 Roll chart unit to be used in conjunction with Tube Tester Models 322, 322P and 802N. The unit is in a grey hamametic finish metal case with plastic window, designed to fit the test lead compartment.

Model 105—Dealer Net Price..... **\$7.50**

DYNOPTIMUM TUBE TESTER MODELS 322 AND 322P

— Simple operation — only 4 switches used —

R. C. P. again demonstrates leadership in the design of this Tube Tester. Special noise test for tubes that otherwise test "good," gives a speedy leakage short test between all elements, tests new and old types of tubes, individual sections of multi-purpose tubes, and has provisions to check all miniature and sub-miniature tubes.

Complete instrument is protected against burn-out by line fuse immediately replaceable at front of panel.

This Model Features simplicity, speed of operation and compactness, in addition to its economical price.

Counter Model 322 (steel case—sloping panel). Size 5 1/4" x 12 1/2" x 8". Weight 8 1/2 lbs.

Dealer Net Price **\$37.95**

Portable Model 322P. Size 4 7/8" x 12 1/8" x 11 3/8". Weight 14 1/2 lbs.

Dealer Net Price **\$41.95**

Model 322P

AC-DC MULTITESTER MODELS 447 AND 447P

The exceptional value in the 447 Model is made possible by the tremendous quantities produced. The resulting very low price is responsible for its great popularity. These units are in a class with other makes of testers that sell for considerably more.

A 3" square D'Arsonval meter is used, having an accuracy of 2%. Ring type shunt circuits are employed. Germanium crystal rectifier is used eliminating frequency and temperature errors.

Model 447

RANGES

DC Voltmeter: 0-5-50-500-2500 Volts at 1000 Ohm per Volt.
 AC Voltmeter: 0-10-100-500-1000 Volts.
 Output Voltmeter: 0-10-100-500-1000 Volts.
 DC Milliammeter: 0-1-10-100-1000 MA.
 Ohmmeter: 0-500-100,000 Ohms 1 Megohm.
 Decibel Meter: —8 to +55 decibels.

Model 447—Open face instrument supplied in hardwood case. Size 7" x 8 1/2" x 3". Weight 21 oz. Complete with batteries, ready to operate.

Dealer Net Price..... **\$17.95**

Model 447P—Portable type supplied in hardwood case with carrying handle, cover and test leads. Size 6 1/2" x 8 1/2" x 4 1/2". Weight 24 oz. Complete with batteries, ready to operate.

Dealer Net Price **\$21.95**

DIALCO

WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

DIALCO JEWELS: Complete with Turned Brass Holders for Mounting in Panels

Jewels presented here are merely representative of our general line. We manufacture the most extensive line. For additional information on other types, or special jewels, send specifications.

TS97-01

TS97-02

910-JHS

1" Jewel with Bushing & Mounting Nut

Single 1" hole for mounting . . . Allows removal of lamp from front of panel through use of panel bushing with Jewel Holder . . . Highly polished chrome plated brass Jewel Holder . . . Faceted or Smooth-Faced Jewels . . . Colors optional: Red, Green, Amber, Blue, Opal, White and Clear Jewels . . . Frosted White Jewels can be furnished with removable colored discs, color showing only when lamp is on.

910-JHF—Jewel Holder with Panel Bushing and Mounting Nut, Faceted Jewel	List Price	\$1.00
910-JHS—Jewel Holder with Panel Bushing and Mounting Nut, Smooth Jewel		1.00
910-JHD—Jewel Holder with Panel Bushing and Mounting Nut, Frosted White Jewel with Removable Colored Disc		1.00

1" Torpedo Jewel Screw Type Assembly — Series TS97-01

Features: Water Tight . . . 1" Hole Mounting . . . Length of thread behind Jewel Holder $\frac{1}{2}$ " . . . Furnished with washer, lockwasher, and nut . . . Material: Brass or 17 S.T. Aluminum Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, or Ebonol. Lens Colors: Red, Green, Amber, Blue, Yellow, Opal, White, Clear.

1" Jewel Assembly Series TS97-01 . . . List Price \$1.00

1" Torpedo Jewel Friction Type Assembly — Series TS97-02

This model has the same features as the TS97-01 except that it is of the Friction Type, which makes possible the removal of lamp from front of panel . . . Panel bushing is available in any length from $\frac{1}{4}$ " to 2" depending on the thickness of the panel. 1" Jewel Assembly Series TS97-02 . . . List Price \$1.00

Jewel holders can be furnished with special finishes other than listed. NOTE: Specify color of Jewel or Disc when ordering.

1" Screw Type Jewel Assembly — Series S97-03

This unit has the same features as Model TS97-01 illustrated above, except for the difference in the lens which is as shown. May be had in either Smooth or Diamond-faceted jewel. Specify when ordering. 1" Jewel Assembly Series S97-03 . . . List Price \$1.00

$\frac{3}{4}$ " Jewel with Mounting Nut

Used where low priced large Jewel is needed . . . Single $\frac{1}{2}$ " hole for mounting . . . Highly polished chrome plated brass Jewel Holder . . .

Faceted or Smooth-Faced Jewels. Colors optional: Red, Green, Amber, Blue, Opal and Clear Jewels. 25-F—Jewel Holder and Mounting Nut, Faceted Jewel . . . List Price \$2.40
25-S—Jewel Holder and Mounting Nut, Smooth Jewel . . . List Price .40

NOTE: Specify color of Jewel when ordering.

$\frac{1}{2}$ " Jewel and Mounting Nut

Low Cost—All Purpose . . . Single $\frac{1}{4}$ " hole for mounting. Nickel plated brass Jewel Holder. Faceted or Smooth-Faced Jewels. Colors optional: Red, Green, Amber, Blue, Opal and Clear Jewels.

List Price

10-F—Jewel Holder & Mounting Nut, Faceted Jewel . \$0.21

10-S—Jewel Holder & Mounting Nut, Smooth Jewel .21

NOTE: Specify color of Jewel when ordering.

DIALCO SOCKET ASSEMBLIES

Have Exclusive Anchoring Feature

Units shown here are only representative of our extensive line. For additional information, send specifications.

All units are fool-proof and "short-proof" . . . The exclusive Dialco Anchoring Feature permanently locks the lugs, washers, socket, and bracket. The result is a rugged, immovable, shake-proof, fool-proof assembly in which the danger of a short-circuit is eliminated.

Cadmium Plating on all brackets . . . Terminal lugs of tinned brass facilitate rapid soldering . . . Assemblies also available with single lug terminal, or connection effected through grounded bracket . . . Terminals can be supplied in any desired position . . . To assure positive contact, bayonet type sockets are furnished with approved coil spring construction . . . Highest grade insulating washers furnished with all assemblies.

Series	List Price
500—Miniature Screw Base Socket Assemblies . . .	\$0.09
600—110 Volt Candelabra Socket Assemblies17
700—Miniature Bayonet Socket Assemblies12

We are equipped to manufacture any type of bracket to specifications, and supply any type of finish and insulation.

For Lamp Specifications see page G-8

DIALCO LAMP INSTALLER

For All Lamps

made of rubber; takes all types of miniature, neon and candelabra lamps . . . Designed to expedite mass production, this device makes lamp installation extremely simple and rapid. Especially effective in places that are hard to reach or constricted.

Manufacturers who use Dialco assemblies will receive, on request, a sufficient quantity of Dialco Lamp Installers to meet their production requirements. Dialco Lamp Installer No. L-73 . . . List Price \$0.40

DIALCO

WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

SERIES "A"

61901

The Pilot Lights presented on this and the adjoining page are only representative of the extensive Dialco line of 1" and 1½" Pilot Lights. These units are in service in every conceivable Aircraft, Marine, Electronic, Radio, Electrical and Industrial application. Should you require a special unit, we can rapidly submit suggestions and samples to meet your specific requirements.

GENERAL DATA

SERIES "A"—1½" Marine Cap Screw Pilot Lights.

SERIES "B"—1" Marine Cap Screw Pilot Lights.

SERIES "C"—1" Marine Cap Screw Full View Torpedo Pilot Lights.

SERIES "D"—1" Marine Cap Screw "Vari-Dim" Pilot Lights.

The following general features and specifications apply to all units in the Series presented on this page:

All units are water-tight, tested under 15 lbs. pressure per square inch. The Jewel Holder Cap screws on from front of panel. **All lamps are removable from front of panel. Require 1" panel hole for mounting.**

SERIES "B"

51901

51410

Navy Specifications 17-P-4-CFG Moulded Bakelite Housing.

● Heavy terminals for soldering or terminal screw connection. Terminals are perfectly secured—so that they do not turn or become loose regardless of the severity of the tests to which they may be subjected.

● Material: Brass or Aluminum 17 S.T.

● Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, and Olive Drab Anodized Lusterless U.S.A. Signal Corps Specifications.

● Lenses: Series "A-B-D"—Smooth- or Diamond-faced. If smooth, specify clear color, Sandblasted-on-back or Sandblasted-over-all.

Series "C"—Torpedo lens.

● Lens Colors: Red, Green, Amber, Blue, Yellow, Opal, White, Clear.

● Lamp Specifications: See page G-8 for 9 standard lamps applicable to these series of Pilot Lights.

SERIES "C"

51901-5

51206-5

SERIES "D"

71901

Plus LAMPS...
To help speed production, Dialco offers Pilot Lights completely assembled with G.E. or Westinghouse Lamps—any type or voltage. Samples submitted on request.

HOW TO ORDER

The choice of a Pilot Light is determined partly by the type and size of bulb to be used. On page G-8 are listed 9 standard bulbs. Select your Pilot Light from any Series in conjunction with the required bulb. **Note:** Prices quoted do not include the bulbs. Prices will be quoted on application. We are in a position to supply any standard or special General Electric or Westinghouse Bulb for any Dialco Pilot Light which you select.

ALL DIALCO PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

DIALCO

WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

The units presented on this page are recommended for general applications other than marine. Precision engineered and ruggedly constructed, these Pilot Lights will give dependable and lasting service.

GENERAL DATA

SERIES "E"—1" Lock-Tite Friction Bayonet-Lock Pilot Lights.

SERIES "F"—1" Lock-Tite Friction Bayonet-Lock, Full-View Torpedo Pilot Lights.

SERIES "G"—1" Standard Friction Fit Pilot Lights.

SERIES "H"—1" Standard Friction Fit Full-View Torpedo Pilot Lights.

SERIES "R"—1" Standard Friction Fit Pilot Light, Porcelain Base.

SERIES "E"

41901

41206

41410

The following general features and specifications apply to all units in the Series presented on this page:

All "Lock-Tite" units are designed for service on vibrating panels. The positive "friction-lock" construction of the jewel holder prevents impairment of the unit even when subjected to severe vibration.

The "Friction Fit" units are designed for installation in which the vibration factor is of minor importance. The "Friction-fit" Jewel Holder is inserted firmly and securely, assuring efficient, dependable service of the assembly.

All lamps are removable from front of panel. A 1" panel hole is required for mounting.

Navy Specifications: 17-P-5 FBG Bakelite Housing.

17-P-4 CFG Moulded Bakelite Housing.

• Heavy terminals for soldering or terminal screw connection. Terminals are perfectly secured—so that they do not turn or become loose regardless of the severity of the tests that they may be put through.

• Dialco anchoring features of the lamp housing permanently seals the position of the bayonet shell so that the lamp is easily removed from front of panel.

• **Material:** Brass or Aluminum S.T.

• **Finishes:** Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebonol, and Olive Drab Anodized (asterless U.S.A. Signal Corps Specifications).

• **Lenses:** Series "E", "G", "R": — Smooth or Diamond-faced. If smooth, specify clear color, Sandblasted-on-back or Sandblasted-over-all. Series "F", "H": — Torpedo lens.

• **Lens Colors:** Red, Green, Amber, Blue, Yellow, Opal, White, Clear.

• **LAMP SPECIFICATIONS:** See page G-8.

DIALCO

WARNING & SIGNAL

PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

SERIES PLN PILOT LIGHT ASSEMBLIES . . . designed for Ne-51 NEON LAMP . . . Features BUILT-IN RESISTOR for 110 and 220 VOLT CIRCUITS. Has these design features:

In the PLN-849 series Dialco introduces an important advance in the functional design of indicator light assemblies. These new pilot lights are the product of intensive development work and the cooperation of a number of leading manufacturers. In one compact unit are combined these features:

1. Integral housing of the resistor necessary for operating the NE-51 lamp. (See sketch at left for detail.)
2. The safety afforded by heavy molded bakelite socket and adequate electrical clearances.
3. Rugged construction to match the shock and vibration resistance of the neon lamp.
4. Full view jewel plastic cap giving wide angle visibility and brilliant color.
5. Simple one hole mounting, easy wiring to screw or solder terminals.

BUILT-IN RESISTOR HOUSED IN SPRING CONTACT EYELET

Patent Pending

SPECIFIC DATA: MODELS 951308-851308 INCLUSIVE

No. 951308—A compact, versatile unit fitted with a Jewel Plastic Cap which may be had in a choice of 5 colors: Red, Amber, Opal, White, and Clear. Jewel Cap is male-threaded and is readily unscrewed from front of panel, facilitating replacement of bulb. Terminals may be screw type, or permanent soldering type. Specify terminals desired when ordering.

*No. 911308—This unit is the same as the above except that the Plastic Jewel Cap is longer. This unit is recommended for installations where space behind the panel is limited; also where greater visibility of the light is desired.

No. 811308—Has metal Jewel Head with screw-type (male threaded) collar. Fitted with 1/2" smooth or faceted lens. If smooth, the lens may be had in clear color, sand-blasted-on-back, or sand-blasted over-all. Recommended for frontal "on-off" signal indication.

**No. 881308—This unit is the same as the above, except that the Jewel Head is longer. This unit is recommended where a more forward on-off signal is desired; also where space behind the panel is limited.

No. 871308—This unit is the same as the No. 811308 shown above, except that the collar of the Jewel Head is of the push-in snap-fit type. When snapped into position, Jewel Head and body of assembly form one vibration-proof friction-tight unit.

No. 821308—This unit features a Jewel Head assembly 1 1/8" in diameter with 1/2" lens. The collar of the Jewel Head is female-threaded, easily unscrews from front of panel, facilitating replacement of bulb. The lens may be smooth or faceted; if smooth, it may be clear color, sandblasted-on-back, or sandblasted over-all.

No. 851308—This unit features a 1 1/8" Jewel Head with 3/4" lens. The collar of the Jewel Head is female-threaded. Lens may be smooth or faceted; if smooth, it may be clear color, sandblasted-on-back, or sandblasted over-all. This unit is recommended where a large lens is desired on a unit mounting into an 1 1/8" panel hole.

TERMINALS: In all cases be sure to specify Binding Screw Type, or Soldering Type Terminals.

DIALCO

WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

GENERAL CHARACTERISTICS applying to ALL UNITS IN THIS SERIES

- **LAMPS:** Removable from front of panel. (All Dialco assemblies can be supplied complete with lamps.)
- **MATERIAL:** Body is machined of Brass or Aluminum and may be plated with any one of these finishes: White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, Black Alumalite on Aluminum.
- **SOCKET:** Moulded bakelite housing.
- **LENSES:** Plastic or glass. Smooth or faceted. If smooth, specify clear color, sandblasted-on-back, or sandblasted over-all.
- **FLAT LENSES** may be had with or without Etched Numbers, Letter or Words.
- **LENS COLORS:** Red, Amber, Yellow, Opal, White, Clear, Also Green, Blue and Yellow for use with incandescent lamps.
- **MOUNTING:** All units mount in $\frac{1}{4}$ " hole on panels of any standard thickness. Mounting hardware (lock washers, space washer, and nut) supplied.
- **TERMINALS:** Binding Screw Type, or permanent soldering type. Plated or unplated brass. Specify type when ordering. . . . All terminals are permanently secured and cannot turn or loosen under severe stress or vibration.

22408

SPECIFIC DATA: MODELS 12408-20138

No. 12408—A "Vari-Dim" unit containing a built-in Mechanical Shutter. A 60° turn to the right reduces the light from a full glow to a complete blackout. Collar of head is female-threaded, readily unscrews from body of assembly. Terminals may be either screw type or permanent soldering type.

No. 201308—Another "Vari-Dim" unit. Similar in function to the units shown above. In this case, however, the head of the unit has a male-threaded collar and a flat lens. This type lens may be had with or without etched Numbers, Letters, or Words.

SPECIFY COMPLETE or SEMI-BLACKOUT

"LIGHT-SHIELD" PILOT LIGHT ASSEMBLIES

The following units are designed on the "light-shield" principle—to direct a beam of light within a rotation of 360 degrees. A turn of the knurled head directs the light on to any localized spot, at any desired angle. Housing and shield are made of brass. The head is a friction fit to the body permitting full rotation. It is secured by a snap lock and will not loosen under vibration but is easily removed. Units with different sizes of openings in the shields are provided as follows:

No. 21408—Has opening $\frac{1}{2}$ " wide x $\frac{1}{2}$ " long; provides maximum illumination.

No. 89408—Has opening $\frac{3}{16}$ " wide x $\frac{3}{16}$ " long.

No. 90408—Has opening $\frac{1}{2}$ " wide x $\frac{3}{16}$ " long.

No. 22408—Has opening $\frac{1}{2}$ " wide x $\frac{3}{32}$ " long.

PLUS LAMPS: DIALCO PILOT LIGHTS will serve you best if they are equipped with correct lamps. For your convenience we carry large stocks of genuine General Electric Neon Glow and Miniature Incandescent Lamps of all voltages. Prompt delivery can be made in large or small quantities.

All Units Shown Herein Are Also Available Without Resistors

This series of Pilot Lights may be ordered without resistors for use on low voltage circuits with the following T-3/4 Incandescent Lamps: 44, 47, 313, 1488, 1815 and all other available voltages. The model numbers of the resistor-less units end with 10 instead of 08. For example:

No. 951308, with resistor No. 951310, without resistor

UNDERWRITERS' LABORATORIES LISTED Pilot Light Assemblies and Warning & Signal Lights are a major feature of the extensive Dialco line.

WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING & SIGNAL PILOT LIGHT ASSEMBLIES

THREE-QUARTER INCH PILOT LIGHT ASSEMBLIES — Series 525-625-725

Exclusive Anchoring Feature

All units shown on this page are absolutely fool-proof and "short-proof," thanks to the anchoring feature. Lugs, washers, bracket, and socket are permanently locked together, making a shake-proof, foolproof unit.

- Fills need for a low priced large jewel pilot light assembly.
- Requires single 1/4" hole for mounting.
- Available with Candelabra 110V, Miniature Bayonet and Miniature screw base sockets.
- Faceted or Smooth Faced Jewels.
- Jewel Colors: Red, Green, Amber, Blue, Opal and Clear.

Note: Specify Color of Jewel When Ordering.

GENERAL ELECTRIC

RADIO DIAL LAMPS

Designed and engineered for the job

BECAUSE of the vibration conditions under which G-E radio dial lights must operate, General Electric devotes special care to their design and manufacture. Filaments are designed to vibrate without damage and are secured by a shake-proof joint.

General Electric research is constantly at work to assure the quality and serviceability of G-E radio dial lamps. Shock tests, vibration tests and base torsion tests are used in the laboratory to make certain your customers will get good service from the G-E bulbs you install.

Features like these make it worthwhile for you to sell and install G-E miniature lamps:

1. Dependable, trouble-free performance.
2. High level of maintained light output.
3. Low current consumption.
4. Long life.
5. Profitable to handle.
6. Preferred by both dealers and customers.

NEON GLOW LAMPS

THE unique characteristics of General Electric Neon Glow Lamps recommend them for a variety of uses in radio and electronic devices . . . as indicators, voltage regulators, pilot lights and test lamps.

1. Distinctive orange-red glow—no colored cover glass needed.
2. Dependable performance and long life—rated at 3,000 hours. (In excess of 25,000 hours for NE-2.)
3. Very low current consumption—less than 1/2 milliamperes for smallest lamp.

4. Variety of sizes and wattages.
5. High resistance to vibration, shock.
6. Normally usable on a-c or d-c.
7. Screw base lamps with internal resistors; bayonet base lamps available without internal resistors.
8. Produce practically no heat.
9. Nearly flat volt-ampere characteristics.
10. Lamp life not seriously effected by voltage variations.

Screw Base Lamps

Required series resistor mounted within base. See values marked "IN" in column "Series Resistance." Lamps may be applied to higher circuit voltages by use of suitable external resistors.

Bayonet Base Lamps

External means must be provided to limit current to normal amount. External resistors, to be supplied by user, should be of the values marked "EX" in column "Series Resistance" for rated volts.

Dial and Jewel PILOT LIGHT ASSEMBLIES

JEWEL LIGHT ASSEMBLIES

11/32" Jewel... Vertical Mounting

No. 5 TYPE

The No. 5 type is unique in its field because it can be adapted to the focal lengths of any miniature screw or bayonet lamp. The opening in the shank of this jewel is so small, it is necessary to have the filament of the lamp directly behind the jewel. The slotted jewel mounting on the No. 5 makes this feature possible. This is an inexpensive unit, and it presents a neat appearance on small instrument panels.

STANDARD TYPES

Type Number	Style Socket
5	Miniature Screw
5B	Miniature Bayonet

SPECIFICATIONS

MOUNTING: Mounts in 9/32" diameter hole on panels up to 1/4" thick.

RATING: Tested on 110 volts. Can be supplied to withstand 1000 volts AC for a period of one minute.

LAMPS: Designed to house any filament type miniature screw or miniature bayonet lamp.

COLORS: Amber, blue, colorless, green, ruby, white or yellow.

FINISHES OF GLASS: Standard unit is equipped with faceted glass. Smooth glass may be obtained upon request.

PLATING: Panel hardware is bright nickel, other parts cadmium.

SPECIAL PLATING: Panel hardware can be supplied with statuary bronze or chrome plating for small extra charge.

PACKING: Packed in bulk unassembled.

Dial and Jewel PILOT LIGHT ASSEMBLIES

JEWEL LIGHT ASSEMBLIES

1/2" Jewel... Vertical Mounting
No. 10C TYPE
UNDERWRITERS' APPROVED

The No. 10C is an inexpensive candelabra screw base jewel light assembly that is Underwriters' Approved for 75 watt-125 volt service. It is particularly suited to applications where there is a minimum of depth behind the panel, and lamp replacement from the front of the panel is not necessary. The mounting bracket has a slotted hole to facilitate adjustment for placing the lamp filament directly behind the jewel giving maximum illumination of the jewel.

SPECIFICATIONS

MOUNTING: Mounts in 7/16" hole on panels up to 1/4" thick. For panels between 1/4" and 3/8" specify No. 16L jewel.

RATING: 75 watts, 125 volts.

LAMPS: Will house any candelabra screw base lamp.

COLORS: Amber, blue, colorless, green, ruby, white and yellow.

1/2" Jewel... Horizontal Mounting
No. 20 TYPE

The original Drake Horizontal Mounting Lamp Assembly, and still a fast seller. When ordering, please be sure to select the correct part number for the thickness of panel on which to be installed; otherwise lamp may not extend far enough forward for easy removal, or if too far, prevent bezel screwing all the way on collar.

PATENT NO. 2220515
Net Wt. 0.036 lb.

STANDARD TYPES

Type Number	Style Socket	Length A to B	Panel Thickness
20	Min. Bayonet	1-13/32"	0" to 7/64"
30	Min. Bayonet	1- 7/32"	1/4"
40	Min. Bayonet	1-11/32"	1/8 to 15/64"
20S	Min. Screw	1- 1/16"	0" to 15/64"
30S	Min. Screw	15/16"	1/4"

NOTE: Dimension A to B is overall length of socket assembly with lamp installed. Can be furnished with same plastic caps as No. 51 and 51N. Specify by using Nos. 31C or 31SC.

SPECIFICATIONS

LAMPS REQUIRED: Miniature T3/4 tubular, G3 1/2 globular or other lamps of same over-all length. Lamp removable from front of panel. • Mounts in 11/16" hole. • **JEWEL:** Diamond cut (faceted); Amber, Blue, Crystal, Green, Ruby, White (Milk White) and Yellow. • **SPECIAL FINISHES:** Chrome, Black Nickel, Statuary Bronze. • **PACKED** in bulk with jewel, collar and nuts in bag. • **SPECIAL JEWELS:** SP—Smooth, plain; SFA—Smooth, frosted all over; SFB—Smooth, frosted back.

Plastic Dome... Horizontal Mounting
Lamp Replaceable from Front of Panel
No. 51 TYPE

NET WEIGHT 0.045 lbs.

PATENT NO. 2220516

The No. 51 is a patented Drake assembly featuring a plastic dome indicator which fosters wide angle observation. The whole dome is illuminated, therefore it can be easily seen from the side. It is a good eye-catcher because of its brilliant glow, and for this reason, it makes a wonderful warning light. The unit is supplied with three 1/16" thick fibre spacing washers, so that when the unit is mounted on a thick panel, these washers can be removed making the lamps as accessible for replacement as when mounted on a thin panel.

Part No.	Length			Style Socket	Number of Spacing Washers Required			
	A to B	C to D			Panel thickness	Washers		
51	1 3/8"	1 1/2"	Min. Bay.	Panel thickness	1/16"	1/8"	3/8"	1/4"
				Washers	3	2	1	0
51.5	1"	1 1/4"	Min. Bay.	Panel thickness	1/4"	5/16"	3/8"	
				Washers	2	1	0	
51S	1 1/8"	1 1/4"	Min. Screw	Panel thickness	1/16"	1/8"	3/8"	1/4"
				Washers	2	1	0	0

Length A to B is overall length of socket assembly with lamp installed.

SPECIFICATIONS

MOUNTING: Mounts in 1 1/16" diameter hole. RATING: Tested on 110 volts. Can be supplied to withstand 1,000 volts AC for a period of one minute. LAMPS: Designed to house the miniature bayonet or miniature screw base T3 1/4 lamp. Will also house G3 1/2 bulb, but lamp is not quite as accessible for replacement. COLORS: Amber, colorless, green and red. PLATING: Regularly supplied with nickel plated panel hardware, all other parts cadmium plated. SPECIAL PLATING: Panel hardware can be supplied with chromium, statuary bronze, or black nickel plating. Extra charge for these finishes. PACKING: The units are packed in bulk and fully assembled.

Dial and Jewel PILOT LIGHT ASSEMBLIES

MECHANICALLY SECURE TERMINALS USED ON 110 VOLT CANDELABRA ASSEMBLIES

3/4" Jewel... Horizontal Mounting **No. 60 TYPE**

PATENT NO. 2220516
Net Wt. 0.068 lb.

This patented item is similar to the No. 50, but has a 3/4" jewel in a polished chrome "slip-fit" bezel. Supplied with three fibre washers which compensate for panel thickness. Its sturdy construction, ease of mounting, and small size make it an ideal assembly.

Part Number	Style Socket	Length A to B
60	Min. Bayonet	1-9 16"
60N	Cand. Screw for NE45 lamp	1-13 16"
60S	Min. Screw	1-5 16"
60T	Cand. Screw for 115v, 6W, T4 1/2 lamp	2"

NOTE: Dimension A to B is overall length from front of panel with lamp installed.

SPECIFICATIONS

MOUNTING: Mounts in 13/16" diameter hole on panels 0" to 1 1/4" thick. For panels 17/64" to 5/8" thick use parts 60.75, 60.75N, 60.75S, or 60.75T.

RATING: Miniature bayonet and screw types are tested on 110 volts. Candelabra screw types will withstand a voltage breakdown of 1,000 volts.

COLORED DISCS: The No. 60 types are regularly supplied with colorless, smooth glass frosted on back behind which is placed a colored disc. The advantage of this method is that the glass appears white until the lamp is lighted.

COLORS: Amber, blue, colorless, green, red, white, or yellow.

OTHER FINISHES OF GLASS	SYMBOL
Faceted (Diamond Cut)	FAC
Smooth Plain (Smooth face and no frosting)	SP
Smooth, frosted on back (Smooth face frosted on back only)	SFB

Colored glass is furnished when any of the above types are specified. We recommend smooth plain glass for use with neon glow lamps.

1" Jewel... Horizontal Mounting **No. 75 TYPE**

Net Wt. 0.107 lb.

PATENT NO. 2192345

The patented No. 75 type has a "slip-fit" bezel. It is exceedingly neat in appearance. Very substantial and easy to install. All parts are burnished cadmium plated except the bezel which has a highly polished chrome finish.

Type Number	Style Socket	Length A to B
75	Candelabra	2 1/8"
175	Min. Screw	1 3/4"
275	Min. Bayonet	1 7/8"
375	S.C. Cand. Bayonet or Bay.	2-1 32"

NOTE: Dimension A to B is over-all length. Overall diameter of mounting nut 1 3/8".

SPECIFICATIONS

MOUNTING: Mounts in 1" diameter hole on panels up to 1/2" thick.

RATING: Nos. 175 and 275 are tested on 110 volts.

Nos. 75 and 375 will withstand a voltage breakdown of 1,000 volts.

LAMPS: The No. 75 is designed to house Mazda 115 volt 6 watt. S6 or C7 candelabra screw base lamps. Will house any other candelabra screw base lamp up to 1 7/8" long and 7/8" diameter. The Nos. 175 and 275 are designed to house any miniature lamp up to 1-3 16" long and 7/8" diameter.

The No. 375 is designed to house any single contact candelabra bayonet base lamp up to 1 1/2" long and 7/8" diameter.

COLORS: Amber, Blue, Colorless, Green, Red, White, or Yellow.

COLORED DISCS: The No. 75 types are regularly supplied with colorless, smooth glass frosted on back behind which is placed a colored disc. The advantage of this method is that the glass appears white until the lamp is lighted.

OTHER FINISHES OF GLASS	SYMBOL
Faceted (Diamond Cut)	FAC
Smooth Plain (Smooth face and no frosting)	SP
Smooth, frosted on back (Smooth face frosted on back only)	SFB

Dial and Jewel PILOT LIGHT ASSEMBLIES

1" JEWEL LIGHT ASSEMBLIES LAMPS REPLACEABLE FROM FRONT OF PANEL

No. 75AP TYPE UNDERWRITERS' APPROVED

Net Weight 0.110 lbs.

The No. 75AP is a heavy duty candelabra screw base assembly designed to be used on rugged equipment. The panel hardware (jewel holder) is attractively finished with a highly polished chrome plate. All other parts are cadmium plated. The No. 75AP is Underwriters' approved for 125 volt, 75 watt service. The socket assembly and mounting tube are one piece and so constructed that they need never be replaced. Electrical connections are made to solder terminals. No danger of vibration loosening the connections as with screw terminals.

SPECIFICATIONS

MOUNTING: Mounts in 1" diameter holes on panels up to 1/2" thick.

RATING: 125 volts, 75 watts. Can be operated on 220 volt circuits if connected in series with a 2000 ohm, 10 watt wire wound resistor. In this case a 115 volt, 6 watt lamp must be used.

LAMPS: Designed to house the Mazda 115 volt, 6 watt, S6, candelabra screw base lamp.

Will house any other candelabra screw base lamp which has an overall length of less than 1 3/8" and a diameter of less than 7/8".

NOTE: Will not house a C7 bulb.

COLORS: Amber, blue, colorless, green, ruby, white or yellow.

FINISHES OF GLASS	SYMBOL
Faceted (Diamond Cut)	FAC
Smooth Plain (Smooth face and no frosting)	SP
Smooth, frosted on back (Smooth face frosted on back only)	SFB

For Mazda lamps we recommend faceted or smooth glass frosted on back. For neon glow lamps, we recommend smooth plain glass.

NOTE: If no other finish is specified, faceted glass will be furnished.

PACKING: The units are packed in individual boxes for the jobbing trade; in bulk, and fully assembled for the manufacturing trade.

Dial and Jewel PILOT LIGHT ASSEMBLIES

JEWEL LIGHTS WITH WIRED LEADS

MINIATURE BAYONET

These units are designed for use on high quality equipment where it is essential that the signal lights be infallible. There can be no shorting of terminals, and also eliminates two electrical connections at the terminals of the pilot light which might become loosened.

No. 520

See No. 20 Type for dimensions

No. 550

See No. 50 Type for dimensions

No. 560

See No. 60 Type for dimensions

No. 5275

See No. 275 under 75 Type for dimensions

Standard unit is equipped with 10" of No. 22 stranded wire insulated with .025" of 80°C plastic, black to center contact and white to the shell.

On orders for more than 500 units other lengths and types of wire can be furnished. See wire table.

Terminals can be furnished upon request.

Double Contact Candelabra Bayonet UNDERWRITERS' APPROVED No. 975 TYPE

PATENT No. 2192345

The No. 975 is a heavy duty double contact, candelabra, bayonet base assembly designed to be used in rugged equipment. The panel hardware (jewel holder) is attractively finished with a highly polished chrome plate. All other parts are cadmium plated. The No. 975 is Underwriters' approved for 125 volt, 75 watt service. The mounting tube and socket are detachable; therefore the wire leads of the socket assembly can be connected to the terminal block before the socket assembly is clipped into the mounting tube which is already installed in the panel. This feature facilitates quicker assembly of panels. The built in lead wires can be attached directly to screw or solder terminal blocks; thereby eliminating two soldering operations. Units are carried in stock with both 10 inch and 20 inch leads. On orders of 500 or more units the wires can be cut to your specifications. See wire table.

Part Numbers	Length of Leads
975-10	10 inches
975-20	20 inches

SPECIFICATIONS

MOUNTING: Mounts in 1" diameter holes on panels up to 1/8" thick.

RATING: 125 volts, 75 watts.

LAMPS: Designed to house the double contact, candelabra, bayonet base, C7, S6 or T6 1/2, 110 volt lamp. Will house any other D C, candelabra based lamp which is no larger than 3/8" in diameter and no longer than 2 3/8". Lamps can be purchased from Drake Manufacturing Co.

LEADS: No. 18 gauge (16 strands No. 30) with 1/32" of black Synthol plastic insulation.

COLORS: Amber, blue, colorless, green, red, white or yellow.

COLOR DISCS: The No. 975 is regularly supplied with colorless, smooth glass frosted on back behind which is placed a colored disc. The advantage of this method is that the glass appears white until the lamp is lighted.

OTHER FINISHES OF GLASS	SYMBOL
Faceted (Diamond Cut)	FAC
Smooth Plain (Smooth face and no frosting)	SP
Smooth, frosted on back (Smooth face frosted on back only)	SFB

Dial and Jewel PILOT LIGHT ASSEMBLIES

DOUBLE CONTACT CANDELABRA BAYONET

Underwriters' Approved for General Purpose

No. A900 SERIES

UL File No. E17786

MOUNTING BRACKETS FOR 900, A900, 1000 SERIES ASSEMBLIES

This socket assembly is a 110 volt unit designed specifically for use in Underwriters' approved equipment. It has built in lead wires and is sturdily constructed befitting 110 volt application. In spite of its ruggedness it requires less space with lamp installed than does the candelabra screw type. In addition the bayonet type lamps will not loosen from vibration.

This socket can be supplied mounted to any one of the brackets shown on this page and the next. If they do not meet your requirements, we have the facilities to build them to your specifications.

The A900 type assembly is equipped with No. 18 (16 strands No. 30) tinned copper wire insulated with 1/32" of plastic insulation. See wire table. Units can be wired in series.

The Underwriter's Laboratories have approved the use of this socket with No. 22 gauge wire leads for application in radio only. With the lighter gauge wire the assembly is designated as the No. 900 Series. It can be wired in series or parallel. See wire table.

NOTE: On orders for less than 500 assemblies, no choice of leads is given. Assemblies will be supplied with 10" of black wire stripped 1/2".

LAMPS: 110 volt, 10 watt can be purchased from Drake Manufacturing Co.

FORMULATION OF PART NUMBERS

The part number is composed of three parts, the series number, the bracket number, and the bracket position. The series number is expressed in hundreds plus the letter prefix if there is one. For example: The part number of an A900 Series Socket (fig. 1) with a No. 50H bracket (fig. 4) in the "A" position (fig. 2) would be No. A950H-A. Similarly a unit with No. 22 wire (900 series) and a No. 50J bracket (fig. 5) in the "C" position (fig. 3) would be 950J-C. Part numbers of sockets without brackets are designated as 917, A917, and 1017 respectively.

NOTE: Please do not fail to specify length of lead wire and stripping when ordering more than 500 units.

Dial and Jewel PILOT LIGHT ASSEMBLIES

MINIATURE BAYONET LIGHT SOCKET ASSEMBLIES

No. 500 SERIES

For Underwriters' Approved AC-DC
Radio Receivers

In this socket assembly the bayonet shell is protected from outside contact by a sturdy fishpaper insulating shield. The lead wires are an integral part of the unit and both are secured within the socket so that they will withstand a tension over 25 pounds.

Rounded edges on the opening at the base prevent cut and frayed lead wire insulation.

The assembly will withstand a minimum breakdown voltage of 1000 volts between contacts and to ground.

All parts are fitted so that there can be no rotation of one part with respect to another. This means that there is absolute rigidity from the mounting bracket to the bayonet shell which supports the lamp. The center contact cannot protrude from the socket when the lamp is removed.

The standard assembly is equipped with No. 22 gauge wire, however No. 20 wire can be used.

No. 700 SERIES

For Underwriters' Approved AC
Radio Receivers

In this socket assembly the bayonet shell is electrically connected to the mounting bracket. It is secured in such a way that it cannot rotate. The lead wire is an integral part of the unit and is secured tightly enough to withstand a tension of over 25 pounds. The center contact cannot protrude when the lamp is removed.

The assembly will withstand a minimum breakdown voltage of 1,000 volts between the center contact and ground.

The assembly is customarily built with No. 22 gauge wire; however any other gauge up to and including No. 16 wire can be used.

No. 800 Series

In this socket assembly the bayonet shell is insulated from the bracket. The shell is bridged to provide a good solder connection for one lead wire. The center lead wire is built-in, and the center contact cannot protrude when the lamp is removed. Upon request the assembly can be furnished with two lead wires or no lead wires.

COMMENTS ON ALL ASSEMBLIES ILLUSTRATED HERE

The 500 and 700 types can be wired in series or parallel, but the 800 type can only be wired in series. See wire table for various lengths, color and insulation of lead wires.

NOTE: On orders for less than 500 assemblies, no choice of leads is given. All assemblies will be supplied with 10" of No. 22 plastic insulated wire stripped 1/2" long.

The assemblies can be attached to any of the mounting brackets shown in the listing of dial light assemblies. We also have approximately 900 other mounting brackets that are not listed. If you will submit your lighting problem to us, we are certain that we can offer you a satisfactory solution.

Dial and Jewel PILOT LIGHT ASSEMBLIES

SOCKET ASSEMBLIES AND JEWELS

No. 300 SERIES

Candelabra Screw Base
Underwriters' Approved for General Use

The No. 300 socket assembly is a candelabra screw socket, Underwriters' approved for 75 watt, 125 volt service. It can be attached to any of the brackets shown in the listing of dial light assemblies. We also have approximately 900 other mounting brackets that are not listed. If you will submit your lighting problem to us, we are certain that we can offer you a satisfactory solution.

No. 1000 Series

Single Contact Candelabra Bayonet
Automotive Type

This unit is an inexpensive assembly suitably adapted for use in 6 to 115 volt circuits. It has a built in center lead wire and the socket and bracket form the ground connection. The unit is sturdily constructed and designed so that the center contact cannot protrude when the lamp is removed.

This socket can be supplied mounted to any one of the brackets illustrated with the 900 and A900 socket assemblies. If they do not meet your requirements, we have the facilities to build them to your specifications.

The standard Number 1000 type Assembly is equipped with 10 inches of No. 18 (16 strands No. 30) tinned copper wire insulated with 1/32" of plastic insulation. See wire table. Assemblies can be wired in parallel.

On orders of more than 500 units No. 22 to No. 16 gauge wire is available.

NOTE: Can be sold knocked down into extruded shell, spring, and pigtail with center contact and washer attached.

1/2" Jewels

THREADED TYPE

SLOTTED TYPE

THREAD TYPE WITH NUTS

- | | |
|------------|------------------------------|
| 16CSP | Shank 3/8" long, 1 1/8" O.D. |

| 24CSP, slotted type, | Shank 1/4" long, 1 1/4" O.D. |

1" Threaded Jewel Assembly

No. 75A3

Mounts in 1" diameter hole on panels up to 1/4" thick by removing washers. The assembly is supplied complete with fibre washer, lock washer, and hex nut. The unit is water tight when mounted to the panel with a rubber gasket.

Gothard INDICATOR LIGHT ASSEMBLIES

Gothard Indicator Light Assemblies were for many years made by the Gothard Manufacturing Co. of Springfield, Illinois, who established a reputation for sound engineering design, excellent material and workmanship, a well rounded line, and fair aggressive merchandising. With its purchase by Johnson, continuance and improvement on these factors at every possible point are assured.

This listing includes most of the standard units in greatest demand, but many other types are readily available. Inquiries are solicited for any not shown. Special assemblies can be furnished in production quantities.

Think of Johnson-Gothard first for Pilot Lights.

1 INCH—CAND. SCREW BASE

Underwriters' approved. Porcelain insulation. Solder terminals. Fits 1 inch hole. 1 inch jewel in friction type holder with polished chrome bezel. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
For S6 bulb, candelabra screw base	
147-1000 Faceted Jewel	\$1.40
147-1001 Smooth Jewel	1.40
147-1002 Colored Disc*	1.50
For NE-45 Neon (T 4 1/2) bulb. No resistor required for 110 volts.	
147-1003 Faceted Jewel	1.40
147-1004 Smooth Jewel	1.40
147-1005 Colored Disc*	1.50

1 INCH—CAND. BAYONET BASE

Hard rubber and fiber insulation. Set screw type terminals. Fits 1 inch hole. 1 inch jewel in friction type holder with polished chrome bezel. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Single contact, for G6 bulb, bayonet base.	
147-1006 Faceted Jewel	\$1.60
147-1007 Smooth Jewel	1.60
147-1008 Colored Disc*	1.70
Double contact, for G6 bulb, bayonet base.	
147-1009 Faceted Jewel	1.60
147-1010 Smooth Jewel	1.60
147-1011 Colored Disc*	1.70
Double contact, for NE-48 Neon (G6) bulb, requires 30,000 ohm external resistor for 110-115 volts.	
147-1012 Faceted Jewel	1.60
147-1013 Smooth Jewel	1.60
147-1014 Colored Disc*	1.70

Jewel Holders all on this page have slotted sleeves which snap in place and hold by friction. All have polished chrome bezels. See next pages for similar units with threaded jewel holders.

1 INCH—CAND. SCREW BASE

Underwriters' approved. Molded phenolic insulation. Binding screw terminals. Fits 1 inch hole. 1 inch jewel in friction type holder with polished chrome bezel. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
For S6 bulb, candelabra screw base.	
147-1032 Faceted Jewel	\$1.65
147-1033 Smooth Jewel	1.65
147-1034 Colored Disc*	1.75
For NE-45 Neon (T 4 1/2) bulb. No resistor required for 110-115 volts.	
147-1035 Faceted Jewel	1.65
147-1036 Smooth Jewel	1.65
147-1037 Colored Disc*	1.75

1 INCH—CAND. BAYONET BASE

Underwriters' approved (except single contact styles). Molded phenolic insulation. Binding screw terminals. Fits 1 inch hole. 1 inch jewel in friction type holder with polished chrome bezel. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Single contact, for G6 bulb, bayonet base.	
147-1050 Faceted Jewel	\$1.75
147-1051 Smooth Jewel	1.75
147-1052 Colored Disc*	1.85
Double contact, for G6 bulb, bayonet base.	
147-1053 Faceted Jewel	1.75
147-1054 Smooth Jewel	1.75
147-1055 Colored Disc*	1.85
Double contact, for NE-48 Neon (G6) bulb, requires 30,000 ohm external resistor for 110-115 volts.	
147-1056 Faceted Jewel	1.75
147-1057 Smooth Jewel	1.75
147-1058 Colored Disc*	1.85
Double contact, for NE-48 Neon (G6) bulb, with built-in 30,000 ohm resistor for 110-115 volts.	
147-1076 Faceted Jewel	2.00
147-1077 Smooth Jewel	2.00
147-1078 Colored Disc*	2.10

1 INCH—DETACHABLE SOCKETS

This series permits installing bulbs from rear, by detaching the spring bracket, as well as from the front. Fits 1 inch hole. 1 inch jewel in friction type holder with polished chrome bezel. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Min. screw socket, for G3 1/2 and T3 1/4 bulbs.	
147-800 Faceted Jewel	\$1.05
147-801 Smooth Jewel	1.05
Candelabra screw socket, for S6 bulbs.	
147-802 Faceted Jewel	1.10
147-803 Smooth Jewel	1.10
Min. bayonet socket, for G3 1/2 & T3 1/4 bulbs.	
147-804 Faceted Jewel	1.10
147-805 Smooth Jewel	1.10

* COLORED DISCS

Where this designation appears, a colored plastic disc is placed behind a clear sandblasted (frosted) smooth jewel, to conceal color until lit. Also prevents external light from giving appearance of bulb being lit.

In addition, lettering, numerals, or insignia may be printed on a plastic disc back of the jewel, and arranged to be invisible either continuously or only after lamp is lit.

Bulbs used on all pilot lights may be identified from these illustrations, but are not included in a prices.

DO NOT FAIL TO SPECIFY COLOR OF JEWELS. PRICES DO NOT INCLUDE BULBS.

JOHNSON-GOTHARD PILOT LIGHTS

1 INCH—CAND. SCREW BASE

Underwriters' approved. Threaded jewel holder, otherwise similar to Nos. 147-1000, etc., on previous page. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
147-1200 Faceted Jewel	\$1.85
147-1201 Smooth Jewel	1.85
147-1202 Colored Disc*	1.75

1 INCH—CAND. BAYONET BASE

Underwriters' approved. Threaded jewel holders, otherwise similar to Nos. 147-1032, etc., on previous page.

Cat. No.	List Price
Single contact, for G6 bulb, bayonet base.	
147-1203 Faceted Jewel	\$1.85
147-1204 Smooth Jewel	1.85
147-1205 Colored Disc*	1.95
Double contact, for G6 bulb, bayonet base.	
147-1206 Faceted Jewel	1.85
147-1207 Smooth Jewel	1.85
147-1208 Colored Disc*	1.95

Variable light intensity, controlled either by shutters or polarized discs, can be obtained in most styles of Johnson-Gothard pilot lights.

1 INCH—CAND. SCREW BASE

Threaded jewel holders, otherwise similar to Nos. 147-1006, etc., on previous page. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
For S6 bulb, candelabra screw base.	
147-1209 Faceted Jewel	\$1.90
147-1210 Smooth Jewel	1.90
147-1211 Colored Disc*	2.00
For NE-45 Neon (1 1/2) bulb. No resistor required for 110-115 volts.	
147-1212 Faceted Jewel	1.90
147-1213 Smooth Jewel	1.90
147-1214 Colored Disc*	2.00

1 INCH—LUCITE CAP

Underwriters' approved. Transparent Lucite caps providing forward mounting of bulb for maximum light visibility, especially suitable for neon glow lamps. Fits 1 inch hole. Polished chrome bezel. -1218 has solder terminals, others binding screw terminals. Specify color desired: Red, Green, Amber, Blue, Opal, Clear. Do not use blue or green with neon glow lamps.

Cat. No.	List Price
147-1217 For NE-45 Neon. No resistor required.	\$1.90
147-1218 For miniature bayonet (T3 1/4) bulbs, filament or neon. NE-51 requires external 200,000 ohm resistor.	1.60
147-1219 Double contact cand. bayonet base NE-48 bulb requires external 30,000 ohm resistor.	2.10
147-1220 Same as 147-1219 but with built-in 30,000 ohm resistor.	2.25

1 1/4 INCH "BEEHIVE" LENS

Underwriters' approved (except single contact style). High visibility is obtained by the beehive shape placing light source in front of panel. Molded phenolic insulation, Navy Spec. 17P5-FBG. Fits 1 inch hole. Polished chrome bezel. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
147-1600 Candelabra base, S6 bulb	\$2.00
147-1604 S.C. bay. base, G6 bulb	2.00
147-1605 D.C. bay. base, G6 bulb	2.00

For neon glow lamps use red, amber or clear lenses only. No blue or green light is emitted from these lamps.

*See previous page, column 3, for description of items designated with *

1/2 INCH JEWEL

Fits 1/2 inch mounting hole. Removable (threaded) jewel holder for installing bulb from front. Solder terminals. Specify color desired: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
For T3 1/4 miniature bayonet bulbs.	
147-1110 Faceted Jewel	\$1.15
147-1111 Smooth Jewel	1.15
For G3 1/2 miniature bayonet bulbs.	
147-1112 Faceted Jewel	1.15
147-1113 Smooth Jewel	1.15

LUCITE CAP

Underwriters' approved. Fits 1/2 inch hole. Transparent Lucite cap permits bulb to extend far forward for maximum light visibility. Especially suitable for NE-51 neon glow lamp. Solder terminals. Specify color desired: Red, Green, Amber, Opal, Clear (Green is not recommended for neon lamps.)

Cat. No.	List Price
147-1142 For T3 1/4 bulbs (filament)	\$1.10
147-1143 For NE-51 neon (T3 1/4) bulb, with built-in 20,000 ohm resistor.	1.25
147-1144 Same as -1143 but 100,000 ohm resistor for brighter glow but decreased life.	1.25

PANEL LIGHT

For front panel illumination. Has polished nickel hood, easily removable for lamp replacement; can be rotated to any position. Fits 1/2 inch mounting hole. Made for miniature bayonet or screw base, T3 1/4 or G3 1/2, bulbs.

Cat. No.	List Price
147-330 Miniature Screw Base	\$0.80
147-329 Miniature Bayonet Base	.90

DO NOT FAIL TO SPECIFY COLOR OF JEWELS. PRICES DO NOT INCLUDE BULBS.

JOHNSON-GOTHARD PILOT LIGHTS—BRACKET TYPE

1 INCH REMOVABLE JEWEL

Fits 1 inch hole. Polished chrome bezel. Colors: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Min. screw socket, for G3 1/2 and T3 1/4 bulbs.	
147-100 Faceted Jewel	\$0.80
147-101 Smooth Jewel	.80
Min. bay. socket, for G3 1/2 and TA 1/4 bulbs.	
147-106 Faceted Jewel	.85
147-107 Smooth Jewel	.85
Candelabra screw for S3 bulb.	
147-103 Faceted Jewel	.85
147-104 Smooth Jewel	.85

3/4 INCH JEWEL—HORIZONTAL

Fits 3/8 inch hole. For G3 1/2 bulbs. Colors: Red, Green, Amber, Blue, Opal, Clear.

Fits 3/8 inch hole. For G3 1/2 bulbs. Colors: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price

Fits 3/8 inch hole. Colors: Red, Green, Amber, Blue, Opal, Clear.

Fits 3/8 inch hole. Colors: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Min. screw socket for G3 1/2 bulb.	
147-200 Faceted Jewel	\$0.60
147-201 Smooth Jewel	.60
Min. bay. socket for G3 1/2 bulb.	
147-203 Faceted Jewel	.65
147-204 Smooth Jewel	.65
Candelabra screw for S3 bulb.	
147-206 Faceted Jewel	.65
147-207 Smooth Jewel	.65

VARIABLE LIGHT INTENSITY

Pilot lights similar to 147-400 thru 147-404 can be furnished with either polarized or shutter type variable light intensity jewel holders. Information on request.

See Pages J-64 to J-70 for additional listings of the Johnson line of Variable Condensers, Inductors, Chokes, Tube Sockets, Insulators, Antenna Equipment, and miscellaneous hardware.

1/2 INCH JEWEL—VERTICAL

Fits 7/8 inch mounting hole. Colors: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Min. screw socket for G3 1/2 bulb.	
147-300 Faceted Jewel	\$0.40
147-301 Smooth Jewel	.40
Min. bay. socket for G3 1/2 bulb.	
147-306 Faceted Jewel	.45
147-307 Smooth Jewel	.45
Candelabra screw for S6 bulb.	
147-303 Faceted Jewel	.45
147-304 Smooth Jewel	.45

3/8 INCH JEWEL—VERTICAL

Fits 3/8 inch mounting hole, otherwise similar to 1/2 inch vertical types listed above. Colors: Red, Green, Amber, Blue, Opal, Clear.

Fits 3/8 inch mounting hole, otherwise similar to 1/2 inch vertical types listed above. Colors: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Min. screw socket for G3 1/2 bulb.	
147-500 Faceted Jewel	\$0.33
147-501 Smooth Jewel	.33
Min. bay. socket for G3 1/2 bulb.	
147-503 Faceted Jewel	.37
147-504 Smooth Jewel	.37

JEWEL ASSEMBLIES

Colors, all types: Red, Green, Amber, Blue, Opal, Clear.

1 inch jewel, polished chrome bezel, with mounting sleeve to fit 1 inch hole, fiber washer and nut.

Cat. No.	List Price
147-110 Faceted Jewel	\$0.70
147-111 Smooth Jewel	.70
147-112 Colored Disc*	.80

3/4 inch jewel in polished chrome holder, fits 1/2 inch mounting hole.

147-210 Faceted Jewel	.40
147-211 Smooth Jewel	.40

1/2 inch jewel, nickel plated, threaded holder and mounting sleeve to fit 1/2 hole.

147-410 Faceted Jewel	.40
147-411 Smooth Jewel	.40

1/2 inch jewel, nickel plated holder and nut, fits 1/8 inch mounting hole.

147-310 Faceted Jewel	.25
147-311 Smooth Jewel	.25

1/2 INCH—REMOVABLE JEWEL

Horizontal type. Fits 1/2 inch mounting hole. For G3 1/2 and T3 1/4 bulbs. Colors: Red, Green, Amber, Blue, Opal, Clear.

Cat. No.	List Price
Min. screw socket.	
147-400 Faceted Jewel	\$0.55
147-401 Smooth Jewel	.55
Min. bayonet socket.	
147-403 Faceted Jewel	.60
147-404 Smooth Jewel	.60

LUCITE CAP—REMOVABLE

Fits 1/2 inch mounting hole. Bulb sets well forward in Lucite cap for maximum visibility. Colors: Red, Green, Amber, Opal, Clear.

(Avoid green with neon glow lamps.)

Cat. No.	List Price
147-406 Min. bayonet T3 1/4 bulb	\$0.55
147-407 Same as 147-406 but with 200,000 ohm built-in resistor for NE-5 neon bulb	.70
147-408 Same as 147-407 but 100,000 ohms. Brighter glow with reduced lamp life	.70

BULB REMOVER

Rubber tool makes easy removal or insertion of bulbs. Double ended, for both miniature and candelabra sizes.

UNDERWRITERS' APPROVED 3 AG "LITTELFUSES"—250 Volts

"SLO-BLO"—thru 1/4 Amp. STANDARD—1/2 to 3 Amp. SLEEVE TYPE—4 to 8 Amp.

Littelfuse is the first manufacturer to receive Underwriters' approval of 3 AG fuses (1/4" x 1/4" dia.) in current ratings over 3 amps. at 250 volts. Following list gives standard approved ratings carried in stock. However, the Underwriters' approval to Littelfuse is a blanket approval from 1/4 to 6 amps. Intermediate ratings can be furnished without separate approval, at a small extra charge. Littelfuse name, the amperage and

voltage rating must appear on the fuse caps of approved-fuses. Many new fields are opened up by the extension of approval from 3 to 6 amps., where formerly bulky cartridges or plug fuses and their mountings were used. This applies specially to electrical appliances, heavy duty power supplies, amplifiers, radios, communication equipment, electronic devices, motors, etc.

METER BACK MOUNTING

Cat. No. 383002 (1059)—Mounts directly on meter binding post. Will not touch other posts on smallest standard meter. Linen bakelite base, 1" x 1 1/4". Length over screw terminal, 1 1/2". Std. Pkg. 20. Wgt. 1/2 lb. List Price Each.....\$0.20

FUSE MOUNTINGS (3AG)

Hinged Cover Type (Meets Underwriters' Requirements)

Cover fibre-lined. Metal shielded cover hinged to bakelite base. Terminal mounting extends through insulated base. Nut lightly staked to cover to prevent loss. Requires 1 1/2" x 1 1/4" knockout hole in panel.

Two 6-32" x 5/16" mounting studs at 2 1/2" centers. Base 2 1/2" x 1 1/4". 3/4" high above panel. Std. Pkg. 20.

Cat. No. List Price Each
35 008 (1237A)—Double Pole.....\$0.75
351005 (1379)—Single Pole......50

NEON TESTERS

Low Voltage tester (illustrated) for 5 to 50 V AC or DC. For automotive, heating and vent., telephone, aircraft, battery service, radio service (low volt. filament circuits, "A" batteries), for testing polarity. Test-lead leads with alligator clips. Full directions. No. 202002 Low Volt. Tattelite tester (5-120)

List Price, Each \$1.50

High Voltage "Tattelite" tester (not shown) 60-500V AC, 90-500V DC. Molded casings, insulated test probes—unusually sensitive. For testing live lines, polarity, for detecting blown fuses, open circuits, grounded wires, approximate voltage (110, 220, 440, etc.). Detailed instructions. No. 201002 High Volt. Tattelite tester (5076)

List Price, Each \$1.00

"FIRE DEVIL" NEONIZED SCREW DRIVERS

Dual-purpose screw drivers for mechanics, electricians, radio repair men, etc. Sensitive long-life neon tube in handle, glows when blade contacts voltage of 1000V or more. Tests spark plugs, ignition cables, high voltage lines—indicates RF fields, static electricity. Amber-colored plastic handle, hardened tool steel blades, chromium finish.

203001 (Former 5210) Baby "Fire Devil." Overall length, 4 1/4 in. Range 1000V-5000V. Std. pkg. 12.

List Price, Each \$0.40

203002 (Former 5220) Mama "Fire Devil." Overall length, 7 in. Range to 15,000V. Std. pkg. 12.

List Price, each \$0.80

"POST-LITE"

Neon indicating light for radio, television, radar control panels and other electrical equipment. For 65-130V AC, 90-130V DC. For 230V, 100,000 Ohm resistor may be added. Molded, clear plastic—head, 5/8" square, overall length 2 1/4". Under panel length 1 1/2"—1/2" clearance hole. Wt. 11 gms. Std. pkg.—100.

No. 201005 Post-Lite—

List Price, Each \$0.80

LITTELFUSE "Quicker than a Short Circuit"

AIRCRAFT LITTELFUSES—ANTI-VIBRATION TYPE

Especially designed for Aircraft Service. Characteristics: High Mechanical Strength—Resistance to Fatigue—Long Vibration Life

4 AG Aircraft Fuse showing reinforced twisted element

Bakelite-enclosed 4 AB Fuse

CONSTRUCTION: Glass-enclosed, Littelfuse Locked Cap Assembly (no cements) prevents loosening of caps. High visibility transparent label for amperage. Elements mechanically depolarized by twisting at 90° (see illustrations) are braced against extreme vibration. "Gooseneck" non-crystallizing fuse element takes up expansion and contraction. Ratings 5 amps, or less use Spring and Link. Service life six times simple wire. The 4 AG and 5 AG sizes are supplied for Aircraft Services or their strength and greater carrying capacity than 3 AG fuses.

BAKELITE-ENCLOSED: 4 AB and 5 AB fuses recommended where severe overloads might shatter glass.

CURRENT RATING: Rated to NEC specifications to carry 10% overload indefinitely, to blow on 35% overload within 1 hr., and 100% overload within 2 min.

VOLTAGE RATING: Voltage at which fuses will break without arcing over, or bursting under short circuit conditions.

VIBRATION FACTOR: Minimum hours these fuses endure our Magnetic Vibrator operating 120 cycles a second, while carrying the rated current. Acceleration is 10 times the worst field conditions.

Vibration Factor	4AG "LITTELFUSES" 1 1/8" x 3/8" Dia. Unit Wt.—3.5 Gms.						4AB "LITTELFUSES" 1 1/8" x 3/8" Dia. Unit Wt.—3.75 Gms.						5AG "LITTELFUSES" 1 1/8" x 3/8" Dia. Unit Wt.—8.5 Gms.

LITTELFUSE "Quicker than a Short Circuit"

LITTELFUSE BERYLLIUM COPPER AND PHOSPHOR BRONZE FUSE CLIPS

Littelfuse fuse clips are available in three standard styles: "X," with "ears" or fuse stops; "XX," earless; and "XXX," "Lug-Clips," a new Littelfuse clip having a lug or solder terminal made as an integral part of the clip. All styles are furnished in either Phosphor-Bronze or Beryllium Copper.

Test specification—carry 100%, open at 200% in 5 seconds.

Listed as approved by Underwriters' Laboratories.

Voltage	Type	Amperes
250 or less	AGX	$\frac{1}{8}$, $\frac{1}{4}$, $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{2}$ or 2

BUSS FUSES — SFE STANDARD

All cuts actual size. Fuses of different amperages are of different lengths — to make it impossible to insert too large a size — thereby preventing over-fusing.

Glass tube — diameter $\frac{1}{4}$ inch. Length as per table below.

Test specification—carry 100%, open at 125% in $\frac{1}{2}$ hour.

Listed as approved by Underwriters' Laboratories.

Made according to specifications of Society of Automotive Engineers.

Voltage	Type and Amperes	Length Inches	Pounds per 100
32 or less	SFE 4	$\frac{5}{8}$.70
"	SFE 6	$\frac{3}{4}$.71
"	SFE 9	$\frac{7}{8}$.72
"	SFE 14	$1\frac{1}{16}$.77
"	SFE 20	$1\frac{1}{8}$.83
"	SFE 30	$1\frac{1}{16}$	1.05

BUSS GLASS TUBE FUSES, $\frac{1}{4}$ x $1\frac{1}{4}$ Inch

Type AGC and MTH 4, 5 and 6

Type MTH 8

Formerly called 3AG

Test specification—carry 110%, open at 135% in 1 hour.

Listed as approved by Underwriters' Laboratories.

Shipping weight 0.8 lbs. per 100.

Voltage	Type	Amperes
250 or less	AGC	$\frac{1}{8}$, $\frac{1}{4}$, $\frac{3}{8}$, $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{2}$, 2 or 3
"	MTH	4, 5, 6 or 8

Formerly called 3AG

Test specification—carry 110%, open at 135% in 1 hour.

Shipping weight 0.8 lbs. per 100.

Voltage	Type	Amperes
32 or less	AGC	5, 6, $7\frac{1}{2}$, 10, 15, 25 or 30

20 ampere size is an SFE 20 fuse.

Sizes larger than 30 ampere are not recommended as clips or fuse holders would not permit fuse to carry such high currents. If surges or starting currents make heavier fuse necessary, use type MDL Fusetrons.

BUSS BAKELITE TUBE FUSES, $\frac{1}{4}$ x $1\frac{1}{4}$ Inch

Formerly called 3AB

Test specification—carry 110%, open at 135% in 1 hour.

Shipping weight 1 lb. per 100.

Voltage	Type	Amperes
250 or less	ABC	10, 12 or 15

BUSS FUSETRONS, $\frac{1}{4}$ x $1\frac{1}{4}$ Inch

$\frac{1}{100}$ and $\frac{1}{32}$ amp.

$\frac{1}{16}$ to 2 amp.

$2\frac{1}{2}$ to 30 amp.

Glass tube

A FUSE WITH A LONG TIME-LAG

Fusetrons avoid needless blows from starting currents or surges. They have a fuse link which operates only on very high overloads or short-circuits — they have a thermal cutout which functions on low overloads — the thermal cutout cannot operate quickly at any load, hence long time-lag is obtained. Yet protection is afforded against short-circuits or continued overloads.

Test specification—carry 110%, open at 135% in 1 hour.

Approximate blowing time: at 200% load 25 seconds

at 300% " 8 "

at 500% " 3 "

125 and 250 volt sizes listed as approved by Underwriters' Laboratories.

Shipping weight 0.9 lbs. per 100.

Voltage	Type	Amperes
250 or less	MDL	$\frac{1}{100}$, $\frac{1}{32}$, $\frac{1}{16}$, $\frac{1}{10}$, $1\frac{1}{100}$, $\frac{3}{10}$, $\frac{3}{10}$, $\frac{1}{10}$, $\frac{1}{2}$, $\frac{3}{10}$ or $\frac{3}{10}$

125 or less MDL 1, $1\frac{1}{4}$, $1\frac{1}{10}$, 2, $2\frac{1}{2}$,

32 or less MDL $3\frac{1}{10}$, 4, 5, $6\frac{1}{4}$, 8, 10, 15, 20, 25 or 30

BUSS Fuses • Fusetrons • Holders

for Protection of Radios, Instruments and Electronic Equipment

BUSS FUSE CLIPS for 1/4 inch Fuses

(SFE4, 6, 9, 14, 20, AGX, AGC, ABC, MDL, MJB, MTH fuses)

Spring bronze clips are made of Herculoy — a bronze of distinctly superior quality for spring clips. This metal gives clips great gripping strength and ability to retain spring under adverse conditions.

Beryllium copper clips combine low electrical resistance with great gripping strength. This means maximum electrical conductivity and results in cooler operation of clips and fuse.

Size of mounting hole; .130 to .135 inch.
Center of hole to back-stop; .125 to .135 inch.
Min. length of contact surface; 3/32 inch
Maximum height; 1 1/32 inch
Maximum width; 1 1/32 inch
Shipping weight; 3 lbs. per 100

4548 Spring bronze clip, Nickel plated.
4592 Beryllium copper clip, Silver plated.

BUSS CLIP ASSEMBLIES for 1/4 inch Fuses

(SFE4, 6, 9, 14, 20, AGX, AGC, ABC, MDL, MJB, MTH fuses)

Clips as described above. Brass terminal. 3/16 inch 6-32 washer head terminal screw. 1/4 inch 4-40 flat head iron mounting screw.
Shipping weight; 1 lb. per 100

4431 includes No. 4548 spring bronze clip, terminal screw, terminal and mounting screw.
4432 includes No. 4592 beryllium copper clip, terminal screw, terminal and mounting screw.

BUSS FUSE BLOCKS

Bakelite base blocks 3/16 inch thick. Countersunk mounting holes for No. 6 flat head screws. Brass No. 6 terminal screws. No. 4548 spring bronze clips.

Full base, Screw terminal Blocks

For Fuses	One Pole	Two Pole	Three Pole
SFE4	4511	4521	4531
SFE6	4516	4526	4536
SFE9	4517	4527	4537
SFE14, AGX, MJB	4514	4524	4534
SFE20, ABC, AGC, MDL, MTH	4512	4522	4532

Small base, Solder Terminal Blocks

For Fuses	One Pole	Two Pole	Three Pole
SFE14, AGX, MJB	4520	4485	4403
SFE20, ABC, AGC, MDL, MTH	4405	4408	4411

Other standard fuse blocks and special fuse blocks

If blocks shown do not fit your requirements ask for information on other standard types and sizes.

If special fuse block is required, send description or sketch, showing type of fuse to be used, number of circuits, type of terminals, etc. We welcome such inquiries.

BUSS FUSE HOLDERS

Make it convenient to mount fuse on any equipment. Changing or inspection of fuse is easy and quick.

Holder has removable knob. Fuse projects beyond body of holder and is not held tight on other end when knob is removed.

Fuse and contacts are protected from dirt and fumes.

Good contact on fuse is made certain by strong coil spring pressure. Poor contact heating that often causes fuse to blow needlessly is eliminated.

Holder bodies are made of black bakelite. All current carrying parts are of brass or copper. Terminals and all contact parts are bright alloy plated.

Panel Mounted Holders for 1/4 inch Fuses

Holder is inserted through hole in panel and are locked in place by nut on holder. They can be used on panels up to 5/16 inch thick.

Bayonet type knob requires only quarter turn to remove fuse. No screw driver is needed.

Side terminal is held mechanically as well as by solder. Heat of soldering wire to it will not cause it to loosen or come off.

Vibration will not cause failure of terminals as they are designed to stand severe service.

Neoprene washer and steel locking nut (zinc plated, chromate dipped) furnished with each holder.

Wire hole in terminals; .115 inch.

Normal current carrying capacity; 15 amperes.

Listed as Approved by Underwriters' Laboratories.

Shipping weight; 4 lbs. per 100

HJM for 1/4 x 1 inch fuses (AGX, MJB, SFE 14)

HKP for 1/4 x 1 1/4 inch fuses (ABC, AGC, SFE20, MDL, MTH)

IN-THE-LINE HOLDERS for 1/4 inch fuses

These holders are for mounting fuse in wire. Holders consist of body and bayonet type knob — two terminal contacts ready to be crimped on ends of wire — a pressure spring that is used under contact in base of holder.

Holder can also be mounted in panel up to 3/8 inch thick by means of a No. C-1437-018-27 Tinnerman nut (Nut not furnished). Flat spot on holder permits it to be locked against rotation.

Normal current carrying capacity; 15 amperes.

Shipping weight, holders: 4 lbs. per 100.

Type

HDI for 1/4 x 1 inch fuses (AGX, MJB, SFE 14)
Takes No. 18 or smaller wires.

HDI-A for 1/4 x 1 1/4 inch fuses (ABC, AGC, MDL, MTH, SFE 20)

Takes No. 18 or smaller wires.

HDI-B for 1/4 x 1 1/4 inch fuses (as above)
Takes No. 14 or 16 wires.

Always Dependable!

The above ratings for 35°C ambient continuous duty resistive inductive load. Other combinations manufactured to meet your requirements.

For AC-DC conversion where minimum maintenance costs and maximum efficiency are required, circuit designers write SELETRON into their specifications . . . right at the start!

These advanced type selenium rectifiers built on aluminum are engineered for long life, minimum weight, compactness and maximum heat dissipation. Ten standard sizes of discs provide outputs ranging from 50 milliamps to thousands of amperes. Arrangement of discs in infinite series and parallel combinations makes possible stacks to meet specific requirements for voltage and current.

Consultation with our engineers on any problem is invited. Their services and advice are yours without any obligation. Write TODAY for our informative bulletin on SELETRON Selenium Rectifiers and for the SELETRON application data sheet. Address Dept. T-

THE

BRADLEY

LINE

SELENIUM RECTIFIERS

Bradley selenium rectifiers for medium voltage power applications are processed to allow good efficiency and stability at D. C. ratings up to 24 volts per plate. For continuous operation in Full Wave Circuit cooled by naturally circulating air at 35°C ambient, current density is conservatively fixed at 0.333 amperes per square inch of plate.

For power applications, square plates allow a maximum ratio of rating to space factor.

For high voltage electronics applications, Bradley selenium rectifiers are rated up to 70 volts peak inverse per plate. Current ratings are available as low as 500 microamperes with special designs available with even lower current ratings for high frequency applications.

Rectification problems in instruments, electronic devices, control devices, and power applications have been readily met by Bradley engineers, who can quickly specify the proper selenium or copper oxide rectifier for your application.

• Above, SE-11 series. Power rectifier stacks rated from 0.100 amperes up. Plate size starts at 1" x 1".

COPPER OXIDE RECTIFIERS

BRADLEY "COPROX" INSTRUMENT RECTIFIERS have vacuum processed pellets with gold contacts.

Exhaustive laboratory and field tests have proved our process produces rectifiers with maximum efficiency and minimum temperature errors. Even under severe conditions of use, aging is practically eliminated.

Electrical instruments with better accuracy are being built with "Caprox" rectifiers.

BRADLEY "COPROX" POWER RECTIFIERS, designed for low voltage applications, are rugged, compact and conservatively rated. Long service life is combined with low operating cost.

All lead wires on Bradley "Caprox" rectifiers are pre-soldered and other types of terminals are specially designed to prevent overheating during assembly. Perfect sealing is achieved by wax potting or plastic impregnating. Mountings are exceptionally adaptable. All "Caprox" rectifiers have conservative ratings.

Bradley's applications experience can help you use rectifiers to advantage and can be called upon for the development and production of special designs for special jobs. Use of Bradley "Caprox" rectifiers will result in more efficient equipment that will stand up longer in service.

• Above (A) CX-4D series. High conversion ratio rectifier for electronic control and instrument work, rated from 25 milliamperes to 100 milliamperes, and up to 12 volts, A. C. Supplied with 3" flexible leads. Completely enclosed housing-size 7/8" x 3/4", from 1/2" long to 2" long. Mounts on a single 6/32" screw, 1/2" long.

• Above (B) CX-2E series. Instrument rectifiers rated up to 4.5 volts A. C., 3 volts D. C., 5 milliamperes D. C. Available for all conventional circuits and for special current control applications. Size 7/16" x 1/4" x 3/8", 3" flexible leads. Two 3/32" diameter mounting holes.

PHOTO ELECTRIC CELLS

Bradley's Luxtron[®] photocells efficiently convert light into electric energy sufficient to operate meters and sensitive relays without any external power source. Lightweight, rugged and true to rating, they give long life under the most strenuous operating conditions.

Luxtron photocells are, so far as we have been able to determine, the very finest on the market although priced with inferior grades.

Shapes of Luxtron photocells vary from circles to squares, with every in-between shape desired. In size they range from the diminutive to the largest sizes required.

For precision control of light into electric energy, specify Luxtron photocells. Write Bradley today for samples and engineering assistance on any photocell problem you have in mind.

• Above, the pigtail contact model shown here is only one of a series of standard mountings. Others include housed models with plug-in contacts, tube socket and nut-and-bolt types.

Makers, since 1930, of high-quality, dry disc rectifiers.

ELECTROX "Master" BATTERY ELIMINATOR

Today's Outstanding D.C. Power Supply Unit, the ELECTROX, Model AR-2, provides the ultimate in humless Direct Current for all-around servicing and demonstrating automobile radios and for all similar applications.

It will operate practically any type or size of automobile radio—whether push button or manually tuned.

It delivers 6 volts of Direct Current free of hum; (less than 3% ripple).

Its D.C. output is adjustable—smooth, humless Direct Current, at the correct voltage is delivered to the individual radio being operated.

Turning the rheostat adjusts the output to 6 volts for any load current between 3 and 15 amperes. This is indicated by the easily read voltmeter located on top of the case. Made by instrument craftsmen to give dependable, trouble-free service.

Model AR-2

Overall Dimensions—11½" long, 7¼" wide, 6⅝" high.

Weight—20 pounds.

A.C. Input—115 volts, 1 phase, 60 cycle.

D.C. Output—6 volts, at from 3 to 10 amperes, continuous rating; and from 10 to 15 amperes, intermittent; selectively determined. Negligible hum level, (less than 3% ripple).

Voltmeter—accurate; mounted on top of case for visibility.

Cartridge-type Fuse—easily accessible from outside of case.

Toggle Switch—for A.C. current supply.

Long-life Selenium Rectifier; Condenser; Transformer; Filter Choke.

6 ft. A.C. cord one plug. Wing nut binding posts for connecting D.C. leads. Rubber feet.

Steel case—attractive, metallic-brown finish.

Model AR-1

ELECTROX "Standard" BATTERY ELIMINATOR

ELECTROX, Model AR-1, is a practical, low-cost D.C. power-supply unit for servicing and demonstrating automobile radios. It is an exceptionally high-grade battery eliminator—compact, rugged, dependable. It delivers Direct Current with very low ripple component, but does not have the adjustable output features embodied in the ELECTROX "Master", Model AR-2.

Overall dimensions—11½" long by 7¼" wide by 6⅝" high.
Weight—20 pounds.

A.C. input—115 volts, 1 phase, 60 cycle.

D.C. output—6 volts at approximately 15 amps, low ripple component.

Equipped with six foot A.C. cord and plug. Heavy binding posts are provided for connecting D.C. leads.

Toggle switch for "ON and OFF."

Cartridge type fuse—easily accessible from outside of case.

Equipment—Condenser, transformer, filter choke, Selenium rectifiers, rubber feet.

Finish—Attractive, well ventilated steel case.

ELECTROX BATTERY BOOSTERS

Designed for safely recharging single storage batteries—small, compact, light in weight but strong. Can be set on floor, shelf or counter or hung on wall. Under ordinary conditions, will recharge battery overnight.

Rectifiers are rugged, long-life Selenium. Ammeter is located in front of case and is easily read. A circuit breaker is supplied to protect against shorts and overloads, having a reset button conveniently located in the front of the case. Complete with 6 ft. A.C. cord and plug, and 5 ft. cord with battery clips for easy connection to batteries. Size: 6¼" x 6" x 7¼".

MODEL BX ELECTROX BATTERY BOOSTER, capacity 6 amperes.

MODEL CX ELECTROX BATTERY BOOSTER, capacity 10 amperes.

MODEL CX has 2/3 more charging capacity than the Model BX at less than 1/3 higher cost.

Model BX

Over ninety per cent of all rectifier requirements are served by 12 types—4 basic assemblies in 3 series. These 3 series are the three primary units of Conant rectifiers. Special types, however, can be developed as needed, and you'll find Conant ready to cooperate.

SERIES 500 UNITS are for general applications requiring greater output current for meters, relays or other apparatus requiring more than 1 milliamperes. Recommended for all such applications at commercial and the lower audio frequencies. Will also operate up to 30,000 c.p.s. in special applications wherein accuracy of readings is not essential.

SERIES 160 and 160-C are for applications requiring good frequency response over the entire commercial and audio range and especially when the meter, relay or other apparatus requires less than 1 milliamperes for operation. In some special applications these units may be operated at frequencies up to 15,000,000 c.p.s. with special circuit treatment.

SPECIAL TYPES are available in both series 500 and 160-C. When requesting a quotation on a special type include a sketch of the rectifier required or a circuit diagram showing source and frequency of the input voltage, resistance

and kind of load, required load current and the ambient temperatures.

SERIES 500 Disc diameter .500 inch. Area each disc .15 square inch. Furnished with 3" braided, tinned copper leads. Finished in clear lacquer. Nickel plated end plates.

SERIES 160 Disc diameter .160 inch. Area each disc .02 square inch. Furnished with 3" stranded, tinned double silk covered copper leads. Nickel plated case. Assembly sealed with specially developed moisture proof compound.

SERIES 160-C Disc diameter .160 inch. Disc area, lead wire and length and moisture proof seal are identical with Series 160. Dimensions of the nickel plated case have been reduced to the most compact size. These units may be mounted in a standard midget fuse clip.

Conant Instrument Rectifiers are available from leading radio jobbers everywhere—consult your local jobber.

RADIO'S MASTER

The Radio Amateur's Handbook

Over a period of twenty years the Radio Amateur's Handbook has grown from a small manual of amateur operating to the world's most valuable and widely-used radio book. Just as amateur techniques and developments have often been forerunners of professional engineering, and the amateur body itself become a training ground in providing executives, engineers and technicians for the radio industry, so has this standard manual of amateur communication become the all purpose volume of radio.

The 1948 edition retains the material on theory, principles and design which made the Handbook so valuable in the government's wartime training programs, but it has been revised and integrated with constructional data, in the light of postwar needs. This is not only of value to the practicing radioman but to the student as well, for it gives him practical applications and examples of the theory he is learning. As a text, the Handbook is probably more used in radio schools and colleges than any other single volume.

In constructional material, no publication equals the Handbook in practical utility, its treatment of radio communications problems in terms of how-to-do-it rather than by abstract discussions and abstruse formulas. There are few radio manufacturers, schools, engineering firms, experimental laboratories and military communications units which do not possess at least one copy of this valued and modern reference work.

Text, data book, constructional manual, operating reference book — it is all these and more. Its annual rewriting assures a modern up-to-date text, so necessary in a science so fast moving and progressive as radio. Yet in this virtually continuous modification there has always been the objective of presenting the soundest and proved aspects of current engineering practice rather than the merely new and novel.

Learning the Radiotelegraph Code

This booklet is designed to train students to handle code skillfully and with precision. Employing a novel system of code-learning based on the accepted method of *sound* conception, it is particularly excellent for the student who does not have the continuous help of an experienced operator or access to a code machine. It is similarly helpful home-study material for members of code classes. Adequate practice material is included for classwork as well as for home-study. There are also helpful data on high-speed operation, typewriter copy, general operating information — and an entire chapter on tone sources for code practice, including the description of a complete code instruction table with practice oscillator. Price 25c

The A. R. R. L. Antenna Book

A comprehensive manual of antenna design and construction. Sixteen chapters, profusely illustrated. Both the theory and the practice of all types of antennas used by the amateur, from simple doublets to multi-element rotaries, including long wires, rhomboids, vees, phased systems, u.h.f. systems, etc. Feed systems and their adjustment. Construction of masts, lines and rotating mechanisms. The most comprehensive and reliable information ever published on the subject. Price 50c

AMERICAN RADIO RELAY LEAGUE, INC.,

How To Become A Radio Amateur

Universally recognized as the standard elementary guide for the prospective amateur. Features equipment which is simple in construction. The apparatus is of a thoroughly practical type capable of giving long and satisfactory service — while at the same time it can be built at a minimum of expense. The design is such that a high degree of flexibility is secured, making the various units fit into the more elaborate station layouts which inevitably result as the amateur progresses. Complete operating instructions and references to sources of detailed information on licensing procedure are given.

Price 25c

The Radio Amateur's License Manual

To obtain an amateur operator's license you must pass a government examination. The License Manual tells how to do that — tells what you must do and how to do it. It makes a simple and comparatively easy task of what otherwise might seem difficult. In addition to a large amount of general information, it contains questions and answers such as are asked in the government examinations. If you know the answers to the questions in this book, you can pass the examination without trouble.

Price 25c

Hints & Kinks

Amateurs are noted for their ingenuity in overcoming by clever means the minor and major obstacles they meet in their pursuit of the chosen hobby. An amateur must be resourceful and a good tinkerer. He must be able to make a small amount of money do a great deal for him. He must frequently be able to utilize the contents of the junk box rather than buy new equipment. *Hints & Kinks* is a compilation of hundreds of good ideas which amateurs have found helpful. It will return its cost many times in money and savings—and it will save hours of time. *Price 50c*

Lightning Calculators

Radio Type A

This calculator is useful for the problems involving frequency, wavelength, inductance, capacity, etc. It has two scales for physical dimensions of coils from one-half inch to five and one-half inches in diameter and from one-quarter to ten inches in length; a frequency scale from 400 kilocycles through 150 megacycles; a wavelength scale from two to 600 meters; a capacity scale from 3 to 1,000 micromicrofarads; two inductance scales with a range of from one microhenry through 1,500; a turns-per-inch scale to cover enameled or single silk covered wire from 12 to 35 gauge, double silk or cotton covered from 0 to 36 and double cotton covered from 2 to 36. Using these scales in the simple manner outlined in the instructions on the back of the calculator, it is possible to solve problems involving frequency in kilocycles, wavelength in meters, inductance in microhenrys and capacity in microfarads. Gives the direct reading answers for these problems with accuracy well within the tolerances of practical construction.

Price \$1.00

Ohm's Law Type B

With this concentrated collection of scales, calculations may be made involving voltage, current, and resistance, and can be made with a single setting of a dial. The power or voltage or current or resistance in any circuit can be found easily if any two are known. This is a newly-designed Type B Calculator which is more accurate and simpler to use than the justly-famous original model. It will be found useful for many calculations which must be made frequently but which are often confusing if done by ordinary methods. All answers will be accurate within the tolerances of commercial equipment.

RADIO'S OUTSTANDING PRACTICAL TEXT

The greatest RADIO HANDBOOK ever published. The greatest array of practical radio equip-
ment ever shown between the covers of one book—all brand-new. All newly-designed, and
newly-built by practical men, for practical men; all tested in our own shop in actual use.

Featured in
this edition

- Dozens of transmitters for all bands, and all powers up to 1 kw.
- Six chapters on Antennas, Transmission Lines, and Propagation.
- One chapter devoted entirely to rotary array construction and feed methods.
- One large chapter on the conversion of widely-distributed military surplus equipment to amateur and other practical use.
- New constructional data on beam-tetrode amplifiers.

- One chapter on determining the operational characteristics of all types of amplifiers.
- New, simple FM exciter designs.
- New data on transmitter control by improved methods.
- New V-F-O design.
- Simplified antenna tuning device and stand-wave meter.
- The most extensive tube tables of any book not devoted entirely to such data.

Clothbound, Gold Stamped

IN U. S. A.

Shipping weight 3½ pounds

NOW READY...

The only comprehensive book for the beginner!

YOU need no other book to get your license and get on the air. Ideal for those just getting started, or getting interested, in amateur radio.

ABSOLUTELY COMPLETE

- How-to-build simple equipment for a complete station on all newcomers bands.
- Operating instructions.
- Simple theory.
- Complete section of study questions, including those needed to pass the license exams.
- U. S. A. Amateur radio regulations. Written by those masters of making-it-plain, the editors of the "Radio Handbook" and the pre-war "Radio."

ANTENNA MANUAL

• The most comprehensive antenna book yet published, with all the old tried-and-true standards, and many a new one.

Among the new, "hot" antennas described in this book are:

- ✓ The **BOBTAIL CURTAIN** and the **VERTICAL TRIAD**, a couple of dx-dandies for 75 and 40.
- ✓ The **OCTAPUSH**, a single array for 40, 20, and 10!
- ✓ The **X-CURTAIN**, an improved "Lazy-H."
- ✓ The **ELECTROTATOR**, an electrically rotated broadside curtain.

WRITTEN BY **W. W. SMITH, W6BCX**, Editor of the pre-war "Radio" and "Radio Handbook." Many of you know him as the developer or first popularizer of the *Lazy-H* array, the *Plumber's Delight* three-element rotary, the *Bi-Square* array, the link-coupled universal antenna coupler, and various other little gems which after many years are still helping hams

snag dx, save money, avoid pink tickets for harmonics, and otherwise keep them contented.

The **ANTENNA MANUAL** has the same happy combination of practical how-to-build-it data and simple underlying explanations that make the "Radio Handbook" one of the largest-selling radio texts in existence.

Sugar-coated radiation, propagation, antenna, and transmission theory help you understand what's going on.

Comprehensive practical data (including dimensions of course) on all the more popular antennas—and on some brand-new ones which have never before appeared in print, but about which you are going to hear a lot on the air in the near future.

A general antenna text, not exclusively for the ham. Antenna techniques and propagation data are given for all frequencies between 16 kc and 1000 Mc., regardless of application.

Of the previous, smaller edition, *Electronics* said, "Here at last is the radio tube handbook radio engineers have dreamed of . . . in many carefully prepared tables and charts." "Probably the most complete and authoritative set of tube-data in existence," said *Radio Craft*.

COMPLETE—In Twelve Languages

So extensive is the sale of this book, and so thorough is the coverage of tubes made in all nations, that this book is published in twelve languages!

RIDER MANUALS

**The Greatest
Compilation of Radio
Servicing Data
Ever Assembled!**

A Sign of Successful Servicing

It is more than coincidence that practically every successful servicing shop has a complete set of Rider Manuals. It is the direct result of their profit-making value. Here you will find data on alignment, I-F peaks, operating voltages, parts lists and parts values, voltage ratings of condensers, wattage ratings of resistors, coil resistance data, gain data, and all other necessary information.

- VOL. XVII.** Takes up where Vol XVI leaves off. Over 115 manufacturers. "How It Works" book and index for Volumes XVI and XVII included.
1,648 pages, Net Price \$16.50
- VOL. XVI.** Contains diagrams of sets manufactured late in 1946 and early in 1947. 94 Manufacturers. "Clarified-schematics." Separate "How It Works" book at no additional cost.
768 pages, Net Price \$8.40
- VOL. XV.** First of the postwar Rider Manuals. Over 134 manufacturers. "Clarified-schematics" break down multi-band sets. Separate 181-page "How It Works" book-supplement on theory of new circuits; also index.
2,000 pages, Net Price \$19.80
- VOL. XIV.** Contains servicing data on the receivers among the last produced in April, 1942. Every effort was made in compiling these data to bring them up to date for all manufacturers.
1,376 pages, Net Price \$16.50
- VOL. XIII.** Contains servicing data on receivers manufactured during the latter part of 1941 and early 1942. Cumulative index for Volumes XI, XII, and XIII.
1,672 pages, Net Price \$16.50
- VOL. XII.** Covers receivers manufactured up to April, 1941. . . . Clarified schematics give breakdowns of complicated r-f and a-f switching circuits.
1,648 pages, Net Price \$16.50
- VOL. XI.** Covers receivers manufactured up to June, 1940. Includes vest pocket manual containing push-button frequency ranges of all automatically tuned receivers and other handy servicing data.
1,652 pages, Net Price \$16.50
- VOL. X.** Complete information on receivers manufactured up to August, 1939.
1,664 pages, Net Price \$16.50
- VOL. IX.** Contains installation and servicing instructions on 1889 models manufactured up to October, 1938.
1,672 pages, Net Price \$16.50
- VOL. VIII.** Receivers manufactured up to October, 1937, will be found in this volume. Contains installation and servicing instructions on many types of intercommunication systems.
1,650 pages, Net Price \$16.50

- VOL. VII.** In this volume will be found sets manufactured up to October, 1936, together with data on older receivers hitherto unavailable.
1,600 pages, Net Price \$16.50
- VOL. VI.** In this volume will be found sets manufactured up to November, 1935. Data on more than 950 models.
1,240 pages, Net Price \$12.50
- VOLS. I TO V. (Abridged Manual).** A compilation of the most widely distributed receivers released after 1929 that formerly appeared in individual Volumes I to V.
2,000 pages, Net Price \$19.80

TELEVISION MANUAL VOL. 1

All the information you need to service complete television receivers and kits of 34 leading manufacturers. New "giant" schematic pages that open to 440 square inches. Over 1400 pages of circuit data; traps, trimmers, transformers adjustments; voltage-resistance tables; schematics, chassis views, waveforms, patterns, parts lists—everything necessary. Separate 203-page "How It Works" book. Complete Index.
List Price \$18.00

TELEVISION "HOW IT WORKS"

Available Separately.
Even if television is not yet in your area, it will be soon. Here is the tie-up between theory and practice you have been wanting.

FM TRANSMISSION AND RECEPTION

by John F. Rider and Seymour D. Uslan

This new Rider book covers its subject "going and coming," embracing in detail a thorough explanation of all manufacturers' products — both transmitting and receiving, regular broadcasting, railroad, police and "ham" equipment, wide medium and narrow band.

For radio servicemen, who can look to FM as a big part of their future profits—for the "ham" who is considering narrow band FM—for the student who is grooming himself for activity in the electronic field—this new book explains both the theory and servicing of FM receivers. It will serve as a valuable hand-book for engineers. **Order Today!**

CHAPTER HEADS

- Fundamental Considerations
- Frequency Modulation
- Essentials of F-M Transmitters
- Transmitters of Today (Wide Band and Narrow Band)
- The Transmission of F-M Signals
- F-M Receiving Antennas
- The F-M Receiver
- Alignment of F-M Receivers
- Servicing F-M Receivers

UNDERSTANDING VECTORS AND PHASE

by John F. Rider and Seymour D. Uslan

Considering the importance of vector presentations as a short-hand method of conveying technical information in the radio field, also the gradually increasing complexities of the developments being offered for public consumption, it behooves every man who plays a part in the technical branch of the radio industry to possess a general appreciation of the significance of vectors. This book develops the subject step by step, finally illustrating its application to everyday radio problems.

160 Pages, Paper Cover 99c, Hard Back Cloth Cover \$1.89

INSTALLING AND SERVICING LOW POWER P-A SYSTEMS

Here is a book that provides the answers to characteristic problems met in low power public address installations. . . . In short it tells what to do and what not to do with microphones, amplifiers, loud speakers, connecting cables—also how to service such PA systems. This book is all embracing in scope, will prove a boon to all who have occasion to work with such equipment.

Over 160 Pages Hard Back Cloth Cover \$1.89

SERVICING BY SIGNAL TRACING

Signal Tracing is rapidly becoming the most universally applied method of locating defects in communication systems, no matter what the nature of the system if it is a home broadcast receiver, auto-radio receiver, police receiver, commercial, marine, navy or army receiver. Every public address system, every centralized radio system comes within the capabilities of signal tracing. . . . Television receivers, facsimile receivers and other systems intended for special application can be serviced with equal ease. . . . Signal Tracing, founded upon the signal itself, is the most basic, most fundamental method of trouble shooting ever devised. . . . It is free of every limitation which in the past has hindered speedy service operations. . . .

You can't afford to be without this book. . . . We mean every word of this statement. . . . It is vital to your immediate welfare—to your future. . . . Get your copy today—NOW!

Chapter I—Introduction to Signal Tracing. Chapter II—Amplifier Operation and the Signal. Chapter III—Diode Detector Tube Systems. Chapter IV—Multi-Element Detector Systems. Chapter V—Oscillator Tube Systems. Chapter VI—Mixer Tube Systems. Chapter VII—Control Circuits and Voltages. Chapter VIII—Coupling Devices. Chapter IX—The T-R-F Receiver. Chapter X—The Superheterodyne Receiver. Chapter XI—Television and Facsimile Receivers. Chapter XII—Public Address Systems. Chapter XIII—Localizing Defects by Signal Tracing. Chapter XIV—Signal Tracing in Receiver Design.

360 Pages 188 Illustrations \$4.00
Spanish Edition \$4.00

BROADCAST OPERATORS HANDBOOK

by Harold H. Ennes, Engineer WIRE

Here are co-ordinated facts that result in a general set of rules that can serve as standards of good operating practice—a new approach to modern operating technique and a discussion and clarification of existing facts that should lead to a better understanding between studio and transmitter personnel.

Mr. Ennes, an operator, writes in the operators' language. Intended not alone for the newcomer but the "oldtimer" as well.

Mr. Ennes book will take the engineer or station operator into the control room and studio, discussing every phase of how, when, where and why of a broadcast operator's problems.

CONTENTS

PART I: Operating in the Control Room and Studio. Chapter 1, What You're Up Against; Chapter 2, Are Mechanical Operations Apparent?; Chapter 3, Keeping Sound "Out of the Mud"; Chapter 4, You're Often a Producer Too!; Chapter 5, Put That Mike There; PART II: Operating the Master Control: Chapter 6, Where Split Seconds Count. PART III: Operating Outside the Studio: Chapter 7, Remote Control Problems; Chapter 8, Remote Versus Studio Pickups; Chapter 9, Remote Musical Pickups; Chapter 10, Eye-Witness Pickups and Mobile Transmitters; Chapter 11, The Live Symphony Pickup. PART IV: Operating the Transmitter: Chapter 12, Operator's Duties; Chapter 13 Programs ARE Entertainment; Chapter 14, Measuring Noise and Distortion. PART V: We're Off the Air: Chapter 15, Emergency Shutdowns; Chapter 16, Why Preventive Maintenance; Chapter 17, Preventive Maintenance Instructions. PART VI: Technically Speaking: Chapter 18, Control Room and Studio Equipment; Chapter 19, The Broadcast Studio; Chapter 20, Transmitter and Transmission. Bibliography, Appendix.

288 Pages Well-Illustrated \$3.30

The prices listed on these John F. Rider, Publisher, pages are subject to revision.

LEARN RIGHT WITH "RIDER"

INSIDE THE VACUUM TUBE

No other book explains so simply and clearly the theory of the vacuum tube and its operation. In plain language—with fascinating pictures and diagrams that really tell a story—you get a solid grounding in theory and a good working knowledge of basic tube types.

The slight use of mathematics is "painless," says QST. Easily understood are the development and meaning of characteristic curves, and their associated load lines, power amplifiers, use of pentodes as triodes, etc. The final chapter describes the "acorn" type tube, cathode-ray tubes, photo-electric cells, gas-filled tubes, etc.

CONTENTS

Introducing the Electron . . . Electron Emission . . . Movement of Charges . . . Space Charge and Plate Current . . . Fundamentals of Tube Characteristics . . . The Diode . . . The Triode . . . Static Characteristics of Triodes . . . Triode Dynamic Characteristics and Load Lines . . . Dynamic Transfer Characteristics . . . Voltage Amplification . . . Tetrode and Pentode Vacuum Tubes . . . The Cathode Circuit . . . Power Amplifiers . . . Miscellaneous Vacuum Tubes (Indexed).

424 Pages . . Profusely Illustrated . . \$4.50

VACUUM TUBE VOLTMETERS

The vacuum-tube voltmeter has been rapidly forging to the front as a favorite tool of engineers, research workers and servicemen. By its proper use, dynamic measurements can be made under any and all conditions with a minimum of effort and time. Here is a book that is a perfect mine of information for everybody who wants to know all about these important instruments. Not only is the theory explained upon which the functioning of the different types of v-t voltmeters is based, but the practical applications of these instruments are completely described. Like nearly all types of voltmeters, multipliers and shunts are employed with vacuum-tube voltmeters to extend their ranges. These and their uses are explained, as is the calibration of the different types.

For those men who are interested in the construction of v-t voltmeters, adequate information will be found for v-t voltmeters were built in the author's laboratory, and constants are given for the components of many types, as well as a wealth of other useful data.

CONTENTS

Chapter I. Fundamentals of Vacuum-Tube Voltmeter. Chapter II. Diode Vacuum Tube Voltmeters. Chapter III. Triode Vacuum-Tube Voltmeters. Chapter IV. Slide-Back Vacuum-Tube Voltmeters. Chapter V. Rectifier-Amplifier Vacuum-Tube Voltmeters. Chapter VI. Tuned Vacuum-Tube Voltmeters. Chapter VII. Audio-Frequency and Logarithmic Vacuum-Tube Voltmeters. Chapter VIII. Vacuum-Tube Voltmeters for D-C Voltage, Current, and Resistance Measurements. Chapter IX. Design and Construction of Vacuum-Tube Voltmeters. Chapter X. Calibration and Testing of V-T Voltmeters. Chapter XI. Applications of V-T Voltmeters. Bibliography.

180 Pages
111 Illustrations
\$2.50

THE METER AT WORK

Here is a practical book for all who employ electric meters in radio and the allied electronic arts.

It is only through knowledge of the principles underlying the functioning of any piece of apparatus that a man can get the utmost from it. To that end, it will be found that the subject matter of this book is treated from an entirely new angle—the theory upon which each meter is based is separate and distinct from any other type and complete in itself. Inasmuch as some types of meters can do several jobs, the practical aspects of the meter are confined to the latter portion of the book. Thus you can cover whichever phase of the subject you are interested in, and with the new construction of the book—the separation of text and illustrations—you will be able to obtain the information quickly and with the minimum of effort.

CONTENTS

I—General Considerations. II—Moving-Iron Meters. III—Moving-Coil Meters. IV—Electrodynamometer Meters. V—The Electrostatic Meter. VI—Thermal Meters. VII—Components of Meters. VIII—Characteristics of Meters. IX—Rectifiers and Thermocouples. X—Practical Applications of Meters.

152 Pages 138 Illustrations \$2.00

THE OSCILLATOR AT WORK

Do you get your money's worth out of your present-day oscillator? Do you derive maximum utility from that unit? Do you know how to test your oscillator and establish if it is working properly? Would you know how to repair it if it went bad? Do you know how many different types of oscillators can be used in the servicing field?

Here is your opportunity to get the true facts about oscillators. Rider's "The Oscillator at Work" is worth many times the price asked because it helps protect the investment you have made in oscillator equipment.

CONTENTS

I—How an oscillator works. II—Alternating Currents. III—Triode Oscillators. IV—Electron-Coupled Oscillators. V—Ultra-High Frequency Oscillators. VI—Negative-Resistance Oscillators. VII—Electro-Mechanical Oscillators. VIII—Relaxation Oscillators. IX—Superheterodyne Oscillators. X—R-F Signal Generators. XI—Audio-Frequency Oscillators. XII—Modulation of Oscillators. XIII—Wobblers. XIV—Adjustment of Transmitters. Bibliography.

256 Pages 167 Illustrations \$2.50

UNDERSTANDING MICROWAVES

By Victor J. Young,

Senior Project Engineer, Sperry Gyroscope Company

Foundation for understanding microwave radio and radar. Explained simply enough to profit servicemen as well as engineers. Young discusses basic problems and how they are overcome, design and operation of waveguides, magnetrons, klystrons, antennas, etc. Section I covers theory; Section II, terms, ideas, and theorems.

2 Frequency-Spectrum Charts

385 Pages Liberally Illustrated \$6.00

A.C. CALCULATION CHARTS

By R. Lorenzen

146 charts 7" x 11" printed in two colors, covering all alternating current calculations from 10 cycles to 1000 megacycles. A tremendous time saver for all engineers and others who work on power, audio, supersonic, high frequency and ultra high frequency problems. Eliminates the slide rule.

160 Pages . . 9 1/2 x 12 inches . . Cloth Binding . . \$7.50

HIGH FREQUENCY MEASURING TECHNIQUES USING TRANSMISSION LINES

By E. N. Phillips, W. G. Sterns, N. J. Gamara

The authors, members of the Collins Radio Company Research Laboratory, develop the thesis that a shielded transmission line with a continuous slot along its axial length is the most convenient tool for measurements in the frequency spectrum above 100 megacycles per second. Properly equipped with a scale along its axial length and an index to show the position of a probe for the exploration of the field between the conductors, the equipment described in this monograph can be used to measure wavelength, velocity of propagation, impedance, electrical length and attenuation in four-terminal networks.

64 Pages 8 1/2 x 11 Illustrated with Photographs, Charts, Tables \$1.50

RIDER Publications

THE CATHODE-RAY TUBE AT WORK

A new era in the servicing of radio receivers, public-address systems, transmitters, etc., is here. By learning the proper use of the cathode-ray tube, the efficient servicing of modern radios and electronic equipment is assured.

The theory underlying the functioning of the cathode-ray tube and the circuits that accompany it receives full consideration in this book.

The second half of the volume is devoted to specific and practical applications of oscilloscopes to servicing problems.

CONTENTS

I—The Theory of the Tube. A complete explanation of the different types of cathode-ray tubes. How the spot is focused and how the beam of electrons is deflected. II—Sweep Circuits. How and why the spot moves across the screen and forms the image. III—A.C. Voltages on Both Sets of Plates. An explanation of the patterns formed on the cathode-ray tube screen when a.c. voltages are applied. IV—Commercial Cathode-Ray Oscillographs. A detailed description of the various cathode-ray oscillographs that are on the market. V—Practical Application of the Cathode-Ray Oscillograph. General directions of adjusting the cathode-ray oscillograph for all tests. VI—Alignment of Tuned Circuits. Understandable explanation of the theory of the frequency modulated oscillator and how it is used in testing with the cathode-ray oscillograph. VII—The A-F Frequency Modulator. How overall a-f response curves of audio units are developed and what they mean. VIII—Auto Radio Vibrator Testing. The connections for testing vibrators with the cathode-ray tube oscillograph. IX—Transmitter Adjustment. How the modulation of a wave is measured and the trapezoidal pattern is developed on the screen. X—Other Applications of the Cathode-Ray Oscillograph. Beat patterns, c-w. reverberation and detection.

338 Pages . . . Profusely Illustrated . . . Net Price \$4.00

SERVICING SUPERHETERODYNES

No other circuit in the radio field has undergone all the changes that have been incorporated in the superheterodyne. In order to service these receivers with profitable speed, you must be able to analyze the different portions of the circuit quickly and this is just what Rider tells you how to do in this book. Not only is the theory of all types of Superhets thoroughly covered, but actual servicing details are most complete.

CONTENTS

I—The Principles Underlying the Operation of the Superheterodyne Receiver. II—The Generation of and the Relation Between Harmonics. III—Explanation of the different Types of Superheterodyne Circuits. IV—Function and Characteristics of Individual Parts of the Superheterodyne Receiver. V—Special Circuits and Tube Applications. VI—Troubles and Symptoms Encountered in Superheterodynes. VII—Application of Test Oscillators. VIII—Vibrator Units. Appendix—Intermediate Peak Frequencies of Commercial Receivers with Model Numbers.

288 Pages . . . Profusely Illustrated . . . Net Price \$2.00

SERVICING RECEIVERS BY MEANS OF RESISTANCE MEASUREMENT

Take the guesswork out of servicing by using an ohmmeter in your trouble shooting. This book tells you how to make and correctly interpret point to point resistance measurements. It will simplify your servicing problems and enable you to use the resistance data furnished in RIDER MANUALS to the best advantage. Now that more and more manufacturers are supplying resistance data, you need this book to speed up your servicing with greater accuracy. Let Rider show you how to use a modern servicing procedure on the complicated receivers—you will find in this book the usual Rider clarity of explanation of how theory is applied to practice.

203 Pages . . Net Price \$2.00

back and forth is eliminated completely in this radically new style of presenting alignment data.

Vol. I — 1929 to 1936 — 176 Pages — \$2.00
Vol. II — 1937 to 1941 — 200 Pages — \$2.00

ALIGNING PHILCO RECEIVERS

Two Volumes

Everything you need for aligning Philco receivers . . . I.F. peaks—adjustment frequencies—trimmer and padlock locations—complete and detailed information for aligning every Philco model from 1929 to 1941. These two volumes, prepared with the cooperation of the engineering staff of the Philco Radio & Television Corp., are the authentic source of alignment information and the data are presented in a brand new way that makes alignment easier and quicker. You will find all the necessary data arranged so that every step in the alignment procedure is carried out in a definite systematic time-saving manner. The necessity for re-trying

AUTOMATIC FREQUENCY CONTROL SYSTEMS

From the simplest type of A.F.C. circuit to the most complicated push pull control circuit . . . you will find them all clearly explained in Rider's book. The first part of the book is devoted to a review of the combination of D.C. voltages, the phase relations in inductive, capacitive, and transformer circuits, with particular reference to the manner in which these principles appear in A.F.C. circuits. The remaining chapters cover the operation of all types of discriminator circuits, the operation of the various types of control tube circuits, including the push-pull type, the reflected reactance type, and the mutual inductance type. Let Rider tell you all about A.F.C. in this up-to-the-minute book that combines theory and practice.

144 Pages . . Net Price \$1.75

AN-HOUR-A-DAY WITH RIDER SERIES

96 Pages Each . . Hard Covers . . \$1.25 Each
ALTERNATING CURRENTS IN RADIO RECEIVERS

Are you familiar with the different forms of alternating currents which are present in a radio receiver? When once you understand the basic facts relating to the cycle—frequency—sine waves—harmonics—complex waves—modulated waves—phase relations—you will have no trouble in understanding the servicing problems which involve these factors.

D.C. VOLTAGE DISTRIBUTION

Only a casual glance at the schematics of any of the multi-tube sets will convince you that the distribution of the D.C. voltage to the tube elements is complicated. The many different forms these systems take should be recognized and understood. You should know thoroughly how the value of resistance and wattage rating of each resistor is calculated and why.

RESONANCE AND ALIGNMENT

Do you know what happens when you tune a circuit to resonance? In order to align a receiver, oscillator, or transformer properly, so that maximum efficiency is attained, you must be familiar with more than just the mechanical operation. Are you familiar with I.F. oscillator, R.F. and detector alignment for all types of circuits—single, double and triple tuned systems?

AUTOMATIC VOLUME CONTROL

Automatic volume control has now become a standard feature of every well made receiver. Are you familiar with every type in use and can you recognize one system from another by examining the schematic? Do you know how various types of tubes are used in each circuit? Noise suppression systems, time delay circuits—audio-frequency volume expander systems and other such networks have greatly increased servicing problems.

RADAR: What it is.

Easy-to-Grasp Explanation for Only \$1.00

by John F. Rider and G. C. Baxter Rowe

No tangling with technicalities! It's easy to understand what radar is and how it works, when Rider and Rowe unravel this knotty subject.

Cartoon sketches, diagrams and photos—sometimes three illustrations to a page—help make the story clear. Rider and Rowe describe different types of gear used by ground, sea, and air forces, and the different uses made of each.

CHAPTER HEADINGS

Underlying Principles of Radar . . . The Basic Radar Set . . . Antennas and Indicators . . . How Ground Troops Used Radar . . . How Radar Is Used at Sea . . . How the Air Forces Used Radar . . . Radar IFF (Identification of Friend or Fo) and Countermeasures . . . Future of Radar.

GHIRARDI RADIO BOOKS

TECHNICAL DIVISION of MURRAY HILL BOOKS, INC., 232 Madison Ave., New York 16, N. Y.

The equivalent of **36** Radio books

All in one big \$5 volume

Ghirardi's Famous RADIO PHYSICS COURSE

The world's greatest collection of radio knowledge gathered together in one huge 972-page inexpensive volume. A complete radio course so head-and-shoulders above anything in the field that it is used as the basic text by thousands of students and schools in 82 different countries.

Ghirardi gives you everything you want to know—the most simple, complete and comprehensive book published on the fundamentals of radio, electricity and sound. Everything is explained clearly, and is easy to understand for quick study and reference.

EVERYTHING about RADIO, SOUND and ELECTRICITY

1. Radio Broadcasting System.—2. Sound, Speech and Music.—3. Electron Theory; Electric Current.—4. Electrical Units; Ohm's Law; Resistance.—5. Electrical Circuits; Batteries.—7. Electromagnetism. 8. Electro-magnetic Induction. — 9. Inductance and Inductors.—10. Capacitance and Condensers.—11. Alternating Current Circuits.—12. Electric Filters.—13. Electrical Measuring Instruments.—14. Electro-magnetic Radiations.—15. Radio Transmission; The Broadcasting Station.—16. The Receiving Station.—17. Elementary Study of the Vacuum Tube.—18. Vacuum Tube Characteristics.—19. Construction Features of Vacuum Tubes.—20. Vacuum Tube Detector and Amplifier Action. 21. Radio Frequency Amplification.—22. Superheterodyne Receivers.—23. R.F. Amplifier and Tuning Coils.— 24. Audio Amplification. 25. Loud Speakers.—26. Battery-operated Receivers.—27. Power Supply Units.—28. Electric Receivers.—29. Auto-radio and Aircraft Receivers.—30. Phonograph Pickups and Public Address Systems.—31. Short-wave Receivers.—32. Vacuum Tube Applications and Photoelectric Cells.— 33. Television.— 34. The Antenna and Ground.—35. Testing and Servicing.— 36. Sound Motion Pictures.— Appendixes.— 856 Review Questions for Self-Study.

Your Service Work with GHIRARDI'S GADGETS

You'll marvel at these ingenious "TWIN GADGETS." Handiest little time-savers you ever saw! They'll "trouble-shoot" radio sets with lightning speed—just a flip of a card and there before you are the "remedies" and "tests" to make for whatever "trouble" symptoms you find. They'll cut your trouble-shooting time in half and earn back their small cost on a couple of calls. ORDER THEM TO-DAY!

Ghirardi's Amazing

POCKET TROUBLE SHOOTERS

Only 50c Each—\$1 for the Pair

HOME RADIO GADGET

AUTO-RADIO GADGET

Diagnoses 300 different "troubles" in Power Unit, Receiver Circuits, Proper, Tubes, Loudspeaker, Antenna, Ground, "A" Battery, "B" Battery, etc. for such symptoms as "Hum"; "Wak"; "Noisy"; "Inoperative"; "Intermittent Reception"; "Padding"; "Oscillation"; and "Distortion." It not only tells you exactly what test to make to definitely locate each trouble, but actually suggests the "Remedy" for it.

Spies 117 special auto-radio "troubles" in all possible trouble sources for 11 common symptoms: 1. "Hum"; 2. "Wak"; 3. "Noisy" when both car and engine are at rest; 4. "Noisy" when car is at rest with engine idling; 5. "Noisy" when car is driven normally; 6. "Noisy" when car is coasting with ignition off; 7. "No Reception"; 8. "Intermittent Reception"; 9. "Padding"; 10. "Distortion"; and 11. "Oscillation."

The Fascinating Story of HOW RADIO GREW UP...

and the men who helped it grow

RADIO'S CONQUEST OF SPACE

by Donald McNeal

No story of scientific progress is more thrilling than this one. None has ever been told in more fascinating style than Donald McNeal's RADIO'S CONQUEST OF SPACE. It is the story of men—amateurs, tinkers, and scientists—who branched from the obscure one of its greatest secrets. In short, it is a book written in terms of the individuals—many of whom are still living—who pieced the gigantic Radioigsaw puzzle together. You'll thoroughly enjoy reading it—and you'll find that it contains a wealth of knowledge that is invaluable to all radio men and experimenters. Donald McNeal, the author, is widely known as past president of the Institute of Radio Engineers.

MURRAY HILL BOOKS, Including

GHIRARDI RADIO BOOKS

TECHNICAL DIVISION of MURRAY HILL BOOKS, INC., 232 Madison Ave., New York 16, N. Y.

SHOWS EXACTLY HOW TO REPAIR OVER 4800 RADIO RECEIVER MODELS

Ghirardi's "Radio Troubleshooter's Handbook"

Over 400 pages in Ghirardi's big manual-size RADIO TROUBLESHOOTER'S HANDBOOK contain specific common Trouble Symptoms, their causes and remedies for practically every radio receiver in use today. This feature alone means that it enables modern service shops to eliminate useless testing, save time all along the line, and double their output of work! Not a "study" book. You simply refer to it when you need specific help on a specific problem. Goes right to work for you the minute you get it!

In addition, there are hundreds of other pages of essential service data including I-f alignment peaks for over 20,000 superhets; a big data section on I-f transformer troubles; the most up-to-the-minute tube chart you've ever seen; dozens of tips on tube substitutions; auto radio data; plug-in and ballast resistor replacement charts; condenser charts; coil, transformer, and wire data—and a wealth of other material to save you time and help you make more money.

CAPACITOR QUESTIONS Answered!

THE ELECTROLYTIC CAPACITOR
by Alexander M. Georgiev

Don't buy, specify, use, or replace Capacitors blindfolded! Save time, save money, and increase your service efficiency by really knowing all about this vital subject. Actually, no Radio-Electronic component is more important or less understood than the Electrolytic Capacitor. Modern equipment now being produced employs more Capacitors than ever before—in new, improved types with which you will want to be fully familiar. This new book by Alexander M. Georgiev, a leader in capacitor research, at last explains the entire subject—where, when and how to use the different types; replacement and emergency repairs; operation at low and high voltages and frequencies—and dozens of other essential features. Contains over 200 pages and 80 illustrations. Price only \$3.

A COMPLETE RADIO-ELECTRONIC SERVICING EDUCATION Ghirardi's "Modern Radio Servicing"

Once in a blue moon a technical book is written that is so important, so complete, and so easy to understand that it is used almost universally by members of a profession—and Ghirardi's MODERN RADIO SERVICING is that kind of a book!

It is the only single, inexpensive book giving a complete course in modern Radio repair work in all its branches. Written so simply you can understand it without an instructor. Read from the beginning, it takes you step by step through all phases of the work. Used as a reference book by busy service-men, it serves as a beautifully cross-indexed volume for "brushing up" on any type of work that may puzzle you.

Included is a thorough explanation of Test Instruments, how they should be used and why—and even how to build your own; Receiver Troubleshooting Procedure and Circuit Analysis; Testing & Repair of Components; Installations; Adjustments, etc., etc.—also How to Start a Successful Radio-Electronic Service Business. 1300 pages; 706 helpful illustrations, only \$5 (\$5.50 foreign).

THE AMAZING STORIES BEHIND MODERN ELECTRICAL PROGRESS

3 famous books by ALFRED STILL

SOUL OF AMBER—This, the first of three related books by Alfred Still, tells in an intensely human manner the fascinating story of the development of modern Electrical Science from its earliest beginnings when the electrical properties of amber were first noticed. It is an absorbing tale to be read for relaxation as well as for a helpful, easily understood introduction to modern Electricity. 274 pages. \$2.50.

SOUL OF LODESTONE—Here Mr. Still tells how centuries of superstition and scientific research have combined to help man harness one of Nature's most useful forces—Magnetism as first evidenced in lodestone. His interesting style and far-reaching knowledge of the subject make for some of the most interesting reading in the entire field of semi-scientific literature. 233 pages. \$2.50.

COMMUNICATION THROUGH THE AGES—The thud of native drums through jungles—smoke signals puffing skyward—mental telepathy—even modern Television—are all evidences of man's desire to communicate with those around him. Mr. Still reviews the entire field of communication in an interest-grIPPING account that has proved tremendously popular wherever semi-scientific books are read. 201 pages. \$2.75.

ELECTRIC MOTOR REPAIR

**Ideal Training for Beginnings or for Actual Shop Use
Teaches Every Step of the Work . . . only \$5 complete**

Based on what can be learned quickly at home from this big 553-page book, **ELECTRIC MOTOR REPAIR**, you can train for prompt, profitable installation, servicing, repairing and even complete rewinding of practically any motor.

Every subject is clearly and simply explained in text and ALSO by more than 900 clear-cut illustrations. You read what to do. You actually SEE how it is done. Quick reference guides tell how to handle specific jobs on specific motor types.

ELECTRIC MOTOR REPAIR book is fully complete, intensely practical. It covers the entire motor field—from A-C to D-C motors and generators to mechanical, electrical and electronic control systems. Unique Duo-Spiral Binding divides book into two sections so that both text and related illustrations can be seen together. An instructor standing by your side could hardly do better! Right down the line, this big book explains every detail of the work in a way you can easily understand. Thousands already in use in motor repair shops and for home study!

**What to do —
How to do it!**

Complete repair, rewinding and maintenance data on:

- Split-phase motors
- Capacitor motors
- Repulsion-type motors
- Polyphase motors
- Alternating-current motor control
- Direct current motors
- Direct-current armature winding
- Direct-current motor control
- Universal motors
- Shaded-pole motors
- Fan motors
- D-C generators
- Synchronous motors and generators
- Motor Control—mechanical, electrical and electronic
- Essential motor data, etc., etc.

A "Natural" for Radio Men . . . Opportunities Everywhere

There are more motors in use than any other type of electrical equipment! Statistics show that the average small home has 11 motor-driven appliances — in washers, ironers, fans, oil burners, radio-phonographs, clocks, refrigerators, mixers and dozens of other appliances.

Large homes have many more—and there are millions of motors used daily throughout industry. The expert who can install and repair them is a valuable man in this Electrical Age! **ELECTRIC MOTOR REPAIR** tells what to do, how to do it . . . every step of the way.

ELECTRICIAN'S POCKET COMPANION

Have the data you need — when you need it!

By Benjamin Goldberg. No handier, more genuinely useful manual for the electrical worker (or even for the home "tinkerer") has ever been written than this one! Printed in convenient pocket-size, it contains a completely new and up-to-date selection of data all carefully indexed for fast, on-the-job reference. Included is exactly the kind of working facts, tables, data, diagrams, etc. you need on almost any electrical subject from electrical fundamentals, circuits and wiring to tools, methods, meters and lighting. Coming early in 1943. Price \$2.50.

TELEVISION PROGRAMMING and PRODUCTION By Richard Hubbell

TELEVISION PROGRAMMING and PRODUCTION, an authoritative book by one of the best known programming directors, gives you the answers to the many questions and problems that are constantly arising in this fast-growing field. Not only does the book describe the most advanced program techniques

and methods, but also discusses television technical problems and many other subjects of front rank importance and value. Over 50 special illustrations provide a unique visual review of production and telecasting processes. 207 pages. \$3.

MURRAY HILL BOOKS, Inc.

THE MURRAY HILL MANUALS IN APPLIED ELECTRICITY

Practical guides to industrial electrical equipment — installation — operation — repair — maintenance

By E. S. LINCOLN

Formerly published by Essential Books, these famous manuals have now been added to the Murray Hill technical book list. As long as the present small supply containing the previous publisher's imprint lasts, we offer the books at the following reduced prices.

1. **INDUSTRIAL ELECTRIC WIRING** — Construction, operation and maintenance data on a-c and d-c wiring systems. 336 pp., over 100 illus.
Was \$3. **Now only \$2.75**
2. **CONDUCTORS and WIRING LAYOUTS** — A handbook of wires, conduits, insulations, etc. with instructions for wiring motors, switchboards, lighting systems and other industrial equipment. 342 pp., over 175 illus., etc.
Was \$3. **Now only \$2.75**
3. **INDUSTRIAL ELECTRIC CONTROL** — All about control equipment for all industrial electrical apparatus. 374 pp., over 200 illus.
Was \$3. **Now only \$2.75**
4. **SWITCHBOARDS and PANELBOARDS** — Construction, operation and maintenance "know how" for all types in common industrial use. 150 pp., profusely illustrated.
Was \$3. **Now only \$2.25**
5. **INDUSTRIAL ELECTRICAL HEATING and ELECTRICAL FURNACES** — Resistance, infra-red and induction heating principles with complete data on selection, installation and operation. 192 pp., profusely illustrated.
Was \$3. **Now only \$2.25**
6. **ELECTRICAL PROTECTIVE EQUIPMENT and POWER FACTOR CORRECTION** — A handbook of electrical protective and power factor correction circuits with handy tables and codes. 242 pp., over 200 illus.
Was \$3. **Now only \$2.50**
7. **PRIMARY and STORAGE BATTERIES** — Selection, use, maintenance of all types; also details of charging generators, rectifiers and control equipment. 168 pp., profusely illustrated.
Was \$3. **Now only \$2.25**
8. **ELECTRICAL MEASURING INSTRUMENTS** — (Measurements and surveys). Operating principles and details of all industrial types including quick reference guides to instrument selection and use. 284 pp., over 200 illus.
Was \$3. **Now only \$2.50**
9. **INDUSTRIAL ELECTRIC LAMPS and LIGHTING** — An on-the-job handbook covering all types, including fluorescent, black light and bactericidal. 342 pp., over 200 illus.
Was \$3. **Now only \$2.75**
10. **ELECTRIC MOTORS and GENERATORS and RELATED DRIVES** — Completely covers both d-c and a-c motors of every type. 382 pp., over 200 illus.
Was \$3. **Now only \$2.75**

SERVICING THE MODERN CAR RADIO

By A. L. HURLBUT

2nd edition, 702 pages, 220 illus., over 500 circuit diagrams, \$7.50

SERVICING THE MODERN CAR RADIO contains a wealth of practical, how-to-do-it servicing information on all American car radios on which data is available from mid-1930's to the present day. Over 500 pages of circuit diagrams are included as well as chapters on how to start and operate a radio repair shop, how to select and lay out the necessary equipment, trouble-shooting techniques and service short cuts, etc.

Here, in one handy, easily understood volume is the data you've been wanting to have at your finger-tips on **FREQUENCY MODULATION, PRINCIPLES and PRACTICE**. The book includes engineering and practical aspects of F-M circuits, design techniques, etc. with practical data on trouble-shooting and servicing.

FREQUENCY MODULATION, PRINCIPLES AND PRACTICE

By NATHAN MARCHAND

(Lecturer in Electrical Engineering, Columbia University)
Coming in 1948; probable price \$5.50

MODERN OSCILLOSCOPES AND THEIR USES

By JACOB H. RUITER, Jr.

(Dumont Television)
Coming in 1948; probable price \$5.00

One of the handiest, most valuable and far-reaching of modern instruments, the oscilloscope is one of the least generally understood. This book covers the subject fully and understandably. Profusely illustrated. Tells all about using oscilloscopes in the electronic industry, radio servicing, and in many other applications.

Anyone who manufactures, installs or maintains modern fluorescent lighting will find this book invaluable. Included are complete discussions of basic theory, lamp characteristics, component parts, practical discussions of the advantages and disadvantages of lamps of different types, delayed phosphorescence, fluorescence and television, short duration discharge, etc.

FLUORESCENT AND OTHER GASEOUS DISCHARGE LAMPS

By W. E. FORSYTHE and E. Q. ADAMS

304 pages, 152 illus., \$5.00

HOWARD W. SAM'S PUBLICATIONS

THE RADIO INDUSTRY RED BOOK REPLACEMENT PARTS BUYER'S GUIDE

Now—one single volume—the indispensable RED BOOK, tells you everything you need to know about replacement parts for approximately 17,000 sets made between 1938 to 1948. You get complete, accurate listings of all 9 major replacement components—not just one. Lists correct replacement parts made by 17 leading manufacturers—not just one. Covers original parts numbers, proper replacements and valuable installation notes on: Capacitors, Transformers, Controls, IF Coils (including Peak Frequencies), Speakers, Vibrators, Phono Cartridges—plus Tube and Dial Light data and Battery coverage. Now you can stop wasteful hunting through dozens of incomplete reference manuals. Get ALL the right answers in the RED BOOK!

440 PAGES—8½" x 11"; Sewed Binding—\$3.95

AUTOMATIC RECORD CHANGER MANUALS

You'll be a record changer expert with these indispensable volumes in your service library. Absolutely accurate, completely authoritative data—based on actual analysis of the equipment in the Sams' laboratories. Each volume shows exclusive "exploded" views and photos of top, side, bottom and rear views. Gives full change-cycle data, complete information on adjustments, valuable service hints and kinks, complete parts lists. Each piece of equipment is treated uniformly. Shows you how to overcome any kind of changer trouble quickly. Every modern service shop needs these time-saving, money-making manuals. Bound in hard covers; open flat.

VOLUME 1 (1947). Covers more than 40 different post-war changer models. Includes for the first time, complete data on leading Wire, Ribbon, Tape and Paper Disc Recorders.

400 PAGES—Profusely Illustrated—PER COPY, \$4.95
VOL. 2 (1948). Available Dec. 1948—PER COPY, \$4.95

PHOTOFACT—THE SUPERIOR RADIO DATA SERVICE

DIAL CORD STRINGING GUIDE

There's only one right way to string a dial cord, and only Howard W. Sams' Dial Cord Stringing Guide shows you how. Here, in one handy pocket-size volume, are all available dial cord diagrams and data covering 1938 to 1948 receivers. Licks the knottiest dial cord stringing problems in just seconds. You know from experience that if you get started the wrong way, you can waste valuable hours. You'll say goodbye to wasted time when you use this guide. There's nothing like it—packed with clear, easy-to-use diagrams. Order two copies today—one for your tool kit and one for your shop bench.

112 PAGES—PER COPY, \$1.00

TUBE PLACEMENT GUIDE

The book you'll use every single day—that shows you exactly where to replace each tube in over 5,500 radio receiver models produced from 1938 to 1948! Each tube layout is illustrated by a clear, accurate diagram, with tubes identified by easy-to-read type numbers. Saves valuable time—especially where tubes have been removed from the set. No more risky hit-and-miss methods—you'll work faster, more profitably. A handy, pocket-sized volume, completely indexed for quick, accurate reference. You'll want several copies—for your bench and for outside jobs. Order today.

192 PAGES—PER COPY, \$1.25

"THE SERVICE PUBLICATIONS THAT PAY FOR THEMSELVES OVER AND OVER AGAIN"

MALLORY LITERATURE

6th EDITION RADIO SERVICE ENCYCLOPEDIA

● It's the book you insisted on . . . the most complete Mallory Radio Encyclopedia ever published. You'll find over 600 pages of pre-war and post-war service data, up-to-date in every detail. And you'll find it all in *one handy volume!* You get complete tube complements, I.F. Peaks, circuit references, and original part numbers at your fingertips. Bigger and better than ever before—that's the 6th Edition Mallory Radio Service Encyclopedia! It will help you do a more thorough service job—more quickly—more profitably. Get your copy now from your nearby Mallory Distributor.
DEALER NET \$2.00

MALLORY VIBRATOR DATA BOOK

● Shared with you in this book are sixteen years of the most highly specialized power supply experience in the trade. *It cannot be duplicated anywhere else.* The Mallory Vibrator Data Book helps solve *your* problems; answers *your* questions about vibrators and vibrator power supplies. Explained are basic principles of vibrator power supply, along with background in the designing of vibrator equipment. It's complete information . . . original . . . easy to read. And it's produced by the country's largest makers of vibrators —*for you!* So get your copy without delay. Your Mallory Distributor has one for you now!
DEALER NET \$1.00

MALLORY TECHNICAL MANUAL

● Here is the latest in radio theory and technical information, presented the way you want it—written so you can apply it to your everyday problems. Yet it is used today as a textbook in many leading colleges and universities! Here's what you get:

- Loud Speakers and Their Use
- Superheterodyne First Detectors and Oscillators
- Half-Wave and Voltage Doubler Power Supplies
- Vibrators and Vibrator Power Supplies
- Phono-Radio Service Data
- Automatic Tuning
- Frequency Modulation
- Fundamentals of Television
- Dry Electrolytic Capacitors
- Practical Radio Noise Suppression
- Vacuum Tube Voltmeters
- Useful Servicing Information
- Receiving Tube Characteristics

Mallory Catalog 747

Colorful, profusely illustrated, indexed for easy reference. Ample application data and descriptions for each item. There's a separate price list so your catalog will always be up-to-date.

Mallory Vibrator Guide

One of the most useful publications in the radio service field. Up-to-date, completely organized for quick, accurate reference. Contains all available information through 1947 automobile and battery-operated home radio receivers as well as vibrator power supplies.

RCA TECHNICAL LITERATURE

AUTHORITATIVE REFERENCES OF THE RADIO INDUSTRY

"RECEIVING TUBE MANUAL." (RC-15)

Replaces RC-14. Completely new and brought up-to-date. Features tube theory written for the layman, expanded section on tube and circuit theory; formulas and examples for calculation of power output, load resistance, and distortion for A1, AB1, AB2, and B classes of service; augmented section on resistance-coupled amplifiers; latest data on RCA receiving tubes including miniatures and kinescopes. Price: 35 cents each.

RC-15

"HEADLINERS FOR HAMS." (HAM-103)

Four pages containing technical information, terminal connections, and prices on RCA Ham Preference Types: Class 3 Modulators, Class C Amplifiers and Oscillators, Frequency Doublers, Rectifiers, Thyratrons and Voltage Regulators. Features new ratings on the 807, 808, 810, 813 and 829-B; new operating conditions for frequency doublers; new data on modulators—DC grid current and effective resistance values. Free.

HAM-103

"RECEIVING TUBES FOR AM, FM, AND TELEVISION BROADCAST." (1275-D)

Gives characteristics and socket connection diagrams for all RCA receiving tubes—Rectifiers, Detectors, Oscillators, Converters, Mixers, Voltage and Power Amplifiers and Kinescopes. Also includes identification of miniature and metal types; discontinued types are keyed for the benefit of radio servicemen. 24 pages. Price: 10 cents each.

1275-D

"POWER AND GAS TUBES FOR RADIO AND INDUSTRY." (PG-101)

16 colorful pages of tabulated technical data, base diagrams, photographs, and "thumb-nail" sketches of the current RCA line of power and gas tubes for communication and industrial use. Includes more than 150 RCA Vacuum Power Tubes, Voltage Regulators, Rectifiers, Thyratrons, and Ignitrons in easy-to-read, tabular form. Price: 10 cents each.

PG-101

"PHOTOTUBES, CATHODE-RAY TUBES AND SPECIAL TUBES." (CRPS-102)

Sixteen pages packed with authentic, detailed technical information and descriptions of more than 100 RCA Single-Unit, Twin-Unit, and Multiplier Phototubes; Cathode-Ray Tubes; Camera Tubes; Monoscopes; and Lower-Power Types for special applications. Spectral response curves are given for all phototubes. Price: 10 cents each.

CRPS-102

"QUICK REFERENCE CHART, MINIATURE TUBES." (MNT-30B)

Four-page folder containing descriptions, dimensions, ratings, socket connection diagrams, uses and other detailed technical information on 64 RCA miniature tubes. Listed are Rectifiers, Diode Detectors, Triode Amplifiers, Diode-Triode Amplifiers, Pentode Voltage Amplifiers, Pentode Power Amplifiers, Beam Power Amplifiers, Pentagrid Converters, Thyratrons, and Voltage Regulators. Free.

MNT-30B

"RCA TUBE HANDBOOK." (HB-3)

The "bible" of the industry. Over 2000 pages of data on uses, ratings, characteristics, operating conditions, dimensions, terminal connections and curves for RCA Receiving and Transmitting Tubes, Cathode-Ray Tubes and Phototubes, Thyratrons, Ignitrons and Special types. Supplied in three, deluxe, loose-leaf binders. Available on subscription basis. For details see Bulletin HBF-1-47. Handbook price: \$10.00 each.

HB-3

"RADIOTRON DESIGNER'S HANDBOOK"

Edited by F. Langsford Smith of Amalgamated Wireless Valve Company Pty Ltd. in Australia. Of value to anyone interested in fundamental principles of practical circuit design. Discusses audio- and radio-frequency application, rectification, filtering and hum, components, tests and measurements, tube characteristics, general theory and miscellaneous data. Copiously illustrated. 356 pages. Price: \$1.25 each.

RCA Technical Publications are available at your local RCA Distributor's or from Commercial Engineering, RCA Tube Department, Harrison, N. J. Prices shown apply in USA and are subject to change without notice.

RADIO'S MASTER

NATIONAL TELEVISION

MODEL TV-7M

\$189⁵⁰

COMPLETE

designed and built to **OUTPERFORM**

Just out of the testing laboratories this television receiver, National's latest engineering triumph, incorporates 11 outstanding design features. Pictures are brighter, steadier, clearer — Dual-speaker FM sound is amazingly realistic. Built with world-renowned National craftsmanship and quality components, National Television operates perfectly, dependably — every time you turn it on! Automatic station selector makes accurate tuning easy. Covers all 13 channels. 21 tubes (including 3 rectifier tubes) plus 7" picture tube.

Also available in handsome mahogany cabinet. Model TV-7W

\$199.50 complete

BRIGHTER

- Full 4,000 volts on the picture tube.
- Coil switching assures equivalent of separate, high Q tuned circuits for each channel to improve sensitivity, stability.
- Automatic Gain Control — like AVC in your radio — corrects for variations in signal strength.

STEADIER

- Extra-stable synchronizing circuit locks picture in place. No need for constant re-tuning. Just set controls once and relax!

CLEARER

- Uses 37 mc IF instead of conventional 21 mc — minimizing picture interference caused by other radio services.
- Specially designed, double-tuned RF bandpass circuits improve selectivity and image ratio.
- Fine tuning adjustment provided.
- Two speakers and hum-free power supply provide clearer, life-like binaural sound.

**SEE AND HEAR
THE DIFFERENCE!**

NFM-07 Adapter

Table Model HRO-7

MCR 8" Speaker

Detail of Coil Set

Tuning Range — 50-430 Kcs. and 480-30,000 Kcs.

HRO-7

The first HRO was built by National in 1934; it was a product unique in commercial receiver design. Fourteen years of severe use in government, commercial and amateur services have proved that many of the original features of that first HRO are essential to dependability in communications. Modern circuitry and cabinet design have been added to produce the HFO-7, a custom-built receiver using components of our own design and manufacture. Above all, the HRO-7 has that downright stability which has been characteristic of the entire HRO series.

The required complement of operating controls is on the panel, plus a head-phone jack and an S-meter. New features include automatic adjustable-threshold noise limiting — improved high frequency oscillator with regulated plate voltage — lever handles for coil-set changing — slide rule calibration on all coil sets — bandspread at 11 meters — accessory connector socket and phono-graph switch on rear apron — tone switch on panel.

The circuit of the HRO-7 comprises two tuned r.f. stages, separate miniature tube h.f. oscillator, two stages of i.f. at 456 kc., combined 2nd detector — a.v.c., series valve a.n.l., 1st audio amplifier and audio output stage designed essentially for communications service, b.f.o. coupled to the 2nd detector, crystal filter network between 1st detector and 1st i.f. and voltage regulator for the high frequency oscillator.

The tuning system retains the time-proven micrometer-type dial with linear calibration from zero to 500 and an

effective scale length of approximately twelve feet. A National PV type gear drive unit drives the four gang precision tuning condenser to eliminate backlash (see page 31).

The HRO-7 is supplied with four coil sets covering 1.7 to 30.0 Mc. while six additional coil sets are available to cover frequencies from 50 to 430 kc., 480 to 2050 kc. and 30.0 to 35.0 Mc. Each of the four coil sets normally supplied covers two amateur bands and the spectrum between. By a simple change-over operation the amateur band at the high frequency end of each coil set can be expanded for bandspread operation to cover approximately 400 divisions of the dial. The limiter clips noise on both positive and negative peaks and provides a.v.c. for code reception as well as noise pulse limiting.

Two miniature tubes are employed in the HRO-7, a 6C4 high-frequency oscillator and an 0A2 voltage regulator, to give a high order of oscillator stability. An accessory connector socket is mounted at the rear of the receiver to permit connection of various accessories such as the NFM-07 narrow band F.M. adaptor, crystal calibrator or high-frequency converter. A 5 position switch provides a means of adjusting selectivity from broadcast to single-signal requirements. The new calibration charts on each coil set make correlation between dial reading and frequency accurate and speedy.

The HRO-7 is far more than a fine receiver: it is the best HRO type receiver ever built.

HRO-7C DELUXE RECEIVER INSTALLATION

The HRO-7C is a Deluxe Receiving Installation consisting of an HRO-7R Receiver combined with the SPC-1 Unit (speaker, power supply and coil compartment) in an MRR-1 Table Rack. Chrome panel joint cover strips and side trim strips are included as shown. The receiver we have used in this assembly is the rack model of the latest and finest of a long line of National HRO receivers. Thus, the HRO-7C incorporates all the refinements covered in the complete specifications on pages 2 and 3 of this catalog.

NFM-83 Adapter

10" PM Speaker

Accessory socket for NFM-83 Adapter inside on chassis.

Frequency Range 540 kc. to 31 mc. plus 48 to 56 mc. — calibrated electrical bandspread for 6, 10-11, 20, 40 and 80 meter amateur bands.

Two RF stages on all bands; Image rejection 40 db at 28 mc.

NC-183

Designed particularly for the discriminating radio amateur, the brilliant new National NC-183 is also ideal for the short wave listener who appreciates top-notch performance and skillful engineering. Sixteen tubes (including rectifier and voltage regulator) are employed in a modern high-gain superheterodyne circuit. The main tuning and bandspread dials are calibrated directly in frequency and both have auxiliary logging scales. Two stages of signal frequency amplification provide that extra measure of sensitivity and image rejection so often needed when receiving conditions are unfavorable and a panel controlled trimmer allows the operator to compensate for variations in antenna loading at any frequency.

The push-pull audio stage delivers 8 watts of undistorted audio power to an efficient ten-inch PM speaker. The wide range crystal filter with prasing control, adjustable-threshold automatic noise limiter, tone control and C.W. oscillator pitch control affords exceptional flexibility of performance characteristics, enabling the operator to cope with a wide variety of receiving conditions. Other features include: i.f. oscillator temperature-compensated on all bands; phonograph pick-up jack; accessory connector socket; illuminated signal strength meter with adjustable sensitivity; self-contained output transformer with 500 ohm and 8 ohm terminals; operates from 115 or 230 volts 50/60 cycles or, in emergency, from batteries or vibrator power supply; narrow band FM adaptor available (plugs into accessory socket inside the cabinet). Frequency coverage: 540 kc. to 31 Mc. and 48 to 56 Mc.

TUNING SYSTEM: The main tuning and bandspread capacitors are connected in parallel on all bands. This

permits bandspread tuning at any frequency within the tuning range. Two r.f. stages are used on all bands and the trimmer for the 1st r.f. stage is controlled from the front panel. Dial calibration is as follows:

Band	General Coverage	Bandspread
A		48 — 56 Mc.
B	12 — 31 Mc.	14.0 — 14.4 Mc. 27 — 30 Mc.
C	4.3 — 12 Mc.	7.0 — 7.3 Mc.
D	1.6 — 4.3 Mc.	3.5 — 4.0 Mc.
E	0.54 — 1.6 Mc.	

CRYSTAL FILTER: A new highly flexible crystal filter provides an adjustable selectivity characteristic with a wide range from broad-band broadcast requirements to sharp single-signal code reception. A phasing control permits attenuation of interfering signals.

NOISE LIMITER: A new concept in noise limiter design is included in the NC-183 Receiver. This new limiter could be termed "double action plus" and the noise limiting action is equally effective on either phone or code reception. A panel-mounted threshold control permits adjustment of the level at which limiting action starts.

NARROW BAND FM ADAPTER: The NFM-83 Adaptor pictured above makes the NC-183 an excellent receiver for narrow band FM. A 6H6 tube is employed as a noise suppressing ratio-type discriminator and a 6SK7 i.f. coupling stage eliminates undesirable loading of receiver circuits. Instant selection of AM or NFM by phono-radio switch.

CONTROLS: Main tuning; bandspread tuning; band switch; RF gain — AC on/off; AF gain; send/receive switch; AVC/MVC switch; tone; CWO switch; CWO pitch; limiter; selectivity; phasing; RF trimmer; radio/phono switch.

SPECIFICATIONS OF NC-183

SELECTIVITY: The selectivity switch of the wide range crystal filter permits a choice of six progressively narrower i.f. pass-bands. Maximum and minimum selectivity characteristics are as follows:

	BANDWIDTH	
	6 db. down	20 db. down
Selectivity Switch "OFF"	3.9 kc.	8. kc.
Selectivity Switch "5"	80 cycles	400 cycles

SENSITIVITY: Measured with a standard 300 ohm dummy antenna, sensitivity of the NC-183 is better than 1.5 microvolts for a 6 db. signal/noise ratio throughout the entire frequency range.

IMAGE REJECTION: Signal/image better than 40 db. at 30 megacycles.

TUBE COMPLEMENT: 4-6SG7 1st and 2nd r.f. Amplifiers, 1st and 2nd i.f. Amplifiers; 6SA7 1st Detector; 2-6J5 h.f. Oscillator and Phase Inverter; 2-6H6 2nd Detector-A.V.C. and Noise Limiter; 6AC7 A.V.C. Amplifier; 2-6SJ7 B.F.O. and 1st Audio; 2-6V6GT/G Audio Output; OD3/VR-150 Voltage Regulator and 5U4G Rectifier.

POWER INPUT: Approximately 125 watts at 115 v., 50/60 cycles, 1 phase a.c. (easily adaptable to 230 v. service as well as emergency operation from batteries).

AUDIO SYSTEM:

Undistorted Power Output — 8 watts.

Frequency Response;

Tone Control at 10 — 60 to 12,000 C.P.S.

Tone Control at 0 — 60 to 1,000 C.P.S.

Output Impedance;

Speaker Socket — 8 or 500 Ohms

Phone Jack — Not Critical

A high impedance phono input jack is provided at the rear of the receiver and the phono-radio switch and phone jack are on the front panel.

NC-173

Frequency Range 540 kc. to 31 mc. plus 48 to 56 mc. — calibrated electrical bandspread for 6, 10-11, 20, 40 and 80 meter amateur bands.

Instant selection of AM or NFM from front panel when using the NFM-73 Adapter.

PM Speaker

NFM-73 Adapter

The National NC-173 is the best all-around receiver in the moderate price field. It is engineered for the host of applications for which one stage of high gain r.f. amplification and 3.5 watts of audio output power are adequate. The Amateur will find this receiver chock-full of features to widen his scope of activity. The NC-173 has proved itself thoroughly dependable in a great many applications. Short wave listeners can now enjoy true world wide reception; all users can be proud of owning a mighty attractive piece of equipment, an excellent example of modern product design.

The frequency range of the NC-173 is exceptional in that it includes the conventional 540 kc. to 31 Mc. range plus the 48 to 56 Mc. portion of the spectrum which covers the Amateur six meter band. The tuning system employs separate directly-calibrated dial scales with associated control knobs for General Coverage and Bandspread tuning. Both dials are well-illuminated and have auxiliary linear scales for logging purposes. Calibrated bandspread tuning is provided for the main Amateur bands, i.e., 6, 10-11, 20, 40 and 80 meters. Band changing is accomplished by means of a highly efficient band-switch system.

Essentially, the circuit consists of one stage of radio frequency amplification, a first detector and a separate stabilized high frequency oscillator, two intermediate frequency amplifier stages, a diode type second detector, an audio limiter, a high gain type audio stage and an audio output stage plus a separate AVC amplifier, a stabilized beat frequency oscillator plus voltage regulator and rectifier stages. A crystal filter is connected between the first detector and first i.f. stage. Highlighted

in the above line-up are:

CRYSTAL FILTER: A new highly flexible crystal filter provides an adjustable selectivity characteristic with a wide range from broad-band broadcast requirements to sharp Amateur single-signal CW reception.

NOISE LIMITER: A new concept in noise limiter design is introduced in the NC-173 Receiver. This new limiter could be termed "double action plus" and the noise limiting action is equally effective on either phone or CW reception. A panel-mounted threshold control permits adjustment of the level at which limiting action starts.

VOLTAGE REGULATOR: A voltage regulator tube efficiently minimizes frequency drift in the high frequency oscillator and also in the beat frequency oscillator. This voltage control, plus temperature compensation, assures frequency stability for both phone and CW reception.

NARROW BAND FM ADAPTER: The NFM-73 Adapter shown below utilizes the same circuit as the NFM-83 described on page 6. This matching unit plugs into the accessory socket at the rear of the receiver.

CONTROLS: Main Tuning; Bandspread Tuning; Bandswitch; RF Gain — AC ON/OFF; AF Gain; Send-Receive; AVC-MVC; Tone; CWO; CWO Switch; Limiter; Phasing; Selectivity; RF Trimmer.

Additional refinements include an S-Meter with adjustable sensitivity, a continuously variable tone control and a phono input jack for connection to external apparatus such as a turntable pickup and the NFM-73 narrow band FM Adapter

Net

SPECIFICATIONS OF NC-173

The AVC system, crystal filter network, noise limiter and tuning system are identical to those used so satisfactorily in the NC-183 (see pages 6 and 7). The panel of the NC-173 contains an illuminated S-meter calibrated in S units from 1 to 9 at approximately 5 db. per unit and above S9 from 0 to 40 db. There is also a pick-up jack on the panel which feeds into the high gain 6SJ7 1st audio stage; audio gain and tone controls are operative with this connection through the audio system which is essentially flat from 75 to 6000 c.p.s. Power output is about 3.5 watts with terminals for 8 and 500 ohm impedance loads on the rear apron. Inverse feedback is used to reduce audio hum to an exceptionally low level. The antenna input circuit of the NC-173 is arranged for single wire, balance feed or low impedance concentric line; average input impedance being roughly 500 ohms. The panel TRIMMER control readily compensates a wide range of antenna loading. The panel also contains a full complement of operating controls.

SELECTIVITY: The selectivity switch and characteristics of the NC-173 are identical to the NC-183 (see page 7 for complete details).

SENSITIVITY: 2.0 microvolts or better for a 6 db. signal/noise ratio throughout the frequency range.

IMAGE REJECTION: Signal/image 25 db. or better at 30 megacycles.

TUBE COMPLEMENT: 3-6SG7 r.f. Amplifier, 1st and 2nd i.f. Amplifiers; 6SA7 1st Detector; 6J5 h.f. Oscillator; 2 — 6H6 2nd Detector — A.V.C. and Noise Limiter; 6AC7 A.V.C. Amplifier; 2 — 6SJ7 B.F.O. and 1st Audio; 6V6GT/G Audio Output; OD3/VR150 Voltage Regulator and 5Y3GT/G Rectifier.

POWER INPUT: Approx. 80 watts at 115 v., 50/60 cycles, 1 phase a.c. (easily adaptable to 220/240 volt service as well as emergency operation from batteries).

PHYSICAL DATA: Table Model, 19 $\frac{3}{4}$ " x 10 $\frac{1}{8}$ " x 12 $\frac{1}{2}$ ", 46 lbs., Gray Enamel Finish.

SM-57 Signal Strength Meter.

The NC-57 is a compact superheterodyne receiver with self-contained speaker and power supply. This recent addition to the National line sets a new high for performance-per-dollar in the moderate price field. The frequency range is continuous from 540 kc. to 55 Mc. with bandspread tuning available throughout the entire range, a feature which is indispensable in the crowded high frequency bands. Front panel controls are held to a minimum consistent with ease of operation and full utilization of the circuit features of the NC-57.

Details of the NC-57 found only in larger and more expensive communications receivers:

1. Ample power output for the average room (3 watts into a 5" P.M. type speaker) with three position control for tone adjustment.
2. A separate RF GAIN control for adjustment of receiver sensitivity.
3. PITCH control to adjust beat note on CW (code) signals.
4. Voltage stabilized oscillator circuit which makes it possible to hold a short wave signal without regard to line voltage changes.
5. Automatic threshold noise limiter to minimize interference due to ignition noise, lighting, static, etc.
6. Band switching made easy by means of simple 5 position switch.
7. Receiver includes all necessary wiring to the accessory socket for plugging in the SM-57 Signal Strength Meter.
8. R.F. TRIMMER control on front panel provides means of matching receiver to various types of antennas for most efficient operation.

TUNING SYSTEM: The frequency range .54 to 55.0 Mc. is covered in five bands: A Band 35.0 — 55.0 Mc., B Band 13.5 — 35.0 Mc., C Band 4.65 — 13.5 Mc., D Band 1.6 — 4.65 Mc., and E Band 0.54 — 1.6 Mc. (standard A.M. broadcast band).

The main dial has five scales calibrated directly in megacycles. Amateur, Police and Foreign Broadcast Bands are identified by let-

ters A.M., P. and F., respectively. The amateur bands covered by the NC-57 are listed below with their respective receiver band locations and are spread on the 360°, 0-100 bandspread dial by means of the band-spread capacitor approximately as follows:

Amateur Band	Frequency	Divisions
A	6	50.0 — 54.0 Mc.
B	10, 11	27.16 — 29.7 Mc.
	15	21.0 — 21.5 Mc.
	20	14.0 — 14.4 Mc.
C	40	7.0 — 7.3 Mc.
	D	80

TUBE COMPLEMENT: 3 — 6SG7 r.f. Amplifier, 1st and 2nd i.f. Amplifiers; 6SB7-Y Converter; 6H6 2nd Det. — a.v.c. — a.n.l.; 6SN7GT/G 1st Audio — C.W.O.; 6V6GT/G Audio Output; OD3 Voltage regulator and 5Y3GT/G Rectifier.

ACCESSORY CONNECTOR SOCKET: An octal type socket is mounted at the rear of the NC-57 to permit convenient connection of external accessories. The following connections are available at this socket: B+ 250 v. unregulated, B+ 150 v. regulated, 6.3 v. a.c., audio input and ground.

POWER REQUIREMENTS: Approximately 70 watts, 105/130 v., 50/60 cycles a.c. The NC-57 is adapted for battery operation by means of a socket on rear apron, and from 6 volt storage battery when used with National 686S vibrator power supply.

The NC-57 measures 16 9/16" x 8 3/4" x 10 1/2" deep and weighs 25 lbs. (31 lbs. packed for shipment). The finish is an attractive and durable light gray enamel.

The SM-57 Signal Strength Meter has been designed as an accessory to be used in conjunction with the NC-57 in amateur stations or as a tuning indicator for short wave listeners.

NC-57

Net

The NC-33 is a reel communications receiver covering all frequencies from 500 kc. to 35 Mc. It comes complete with speaker and AC/DC power supply in an attractive light-weight metal cabinet — carefully produced from components of good quality. It is simple to install and a pleasure to operate. This economical superheterodyne will serve well and reliably. The NC-33 is the perfect choice for your living room, playroom or den.

Here are some of the features of the NC-33 — details common to the larger communications receivers:

1. Choice of two audio output circuits, the efficient 5" PM speaker mounted behind the metal grille at the left of the panel and the PHONES jack. The latter is wired to silence the speaker when the plug is inserted, thus enabling the listener to enjoy reception without disturbing others in the same room.
2. Automatic noise limiter which can be switched in from the front panel to minimize objectionable interference originating from auto ignition systems, household appliances, static and the like.
3. Bandswitching from panel by means of a positive four-position lever-type switch knob.
4. Send/Receive switch — removes plate voltage when in SEND position thus silencing the receiver without allowing the tube heaters to cool.
5. CW oscillator built in for reception of code signals with PITCH control for adjustment of the beat note.
6. Ample selectivity for separating stations.
7. Calibrated electrical bandspread on all bands thus affording bandspread operation at any point within the frequency range of the receiver (see following paragraphs).

TUNING SYSTEM: The tuning range of the NC-33 is continuous from 500 kc. to 35 Mc. and is covered in four bands as follows:

Band	Frequency Coverage
A	12.0 — 35.0 Mc.
B	4.0 — 12.0 Mc.
C	1.42 — 4.2 Mc.
D	0.5 — 1.42 Mc.

The main dial has its four scales calibrated directly in megacycles with amateur, police and foreign broadcast bands clearly identified. Main tuning and bandspread tuning capacitors are connected in parallel on all bands. By this means, the 360°, 0-100 bandspread dial can be used to tune any portion of the frequency spectrum to which the main dial is set and stations can be separated and logged quite readily.

TUBE COMPLEMENT: A stage outline of the circuit employed in the Receiver is given below, together with the tube type associated with each stage.

Converter	12SA7
I.F. Amplifier (455 kc.)	12SG7
Second Det. A.V.C.-A.N.L.	12H6
First Audio-C.W.O.	12SL7GT/G
Audio Output	35L6GT/G
Rectifier	35Z5GT/G

POWER REQUIREMENTS: Approximately 24 watts, 105/130 v., 50/60 cycles a.c. or 105/130 volts d.c.

The NC-33 measures 16 9/16" x 8 3/4" x 8 1/2" and weighs 17 lbs. (23 lbs. packed for shipment). The finish is durable gunmetal gray enamel.

Operates from 110-120 volts AC or DC.

Frequency range continuous from 500 kc. to 35 mc. Bandspread on all bands — BC, amateur, police and foreign are plainly marked.

A compact five tube superhet with built-in 5" PM Speaker — in trim metal cabinet.

NC-33

The NC-2-40D is a professional communications receiver in every sense. Sturdy and dependable, it uses a cast aluminum coil set carriage for all tuned stages and a positive drive mechanism. All coils are on polystyrene forms with air trimmers used throughout. It is truly stable and selective.

NC-2-40D

Designed for the radio amateur, the NC-2-40D receiver is also suitable for general communications service in the 490 to 30,000 kc. range. Calibrated electrical bandspread tuning is provided for the 80, 40, 20, 11-10 meter Amateur bands. Features included are a full vision, easy to read, calibrated dial with 6 general coverage and 4 bandspread scales, a single tuning and band switching control knob, a stable high frequency oscillator circuit, a flexible crystal filter, a series valve noise limiter and an auxiliary numerical logging dial. These outstanding features plus conventional items such as a signal strength meter, phonojack or high level microphone pick-up jack, an automatic volume control circuit, a beat frequency oscillator for CW reception, a tone control, a phono jack, and a 115-230 volt a.c. change-over switch provide the operator with a means for coping with a wide variety of receiving conditions and requirements.

CONTROLS: Band Tuning and Band Switching; RF Gain Control; and Signal Strength Meter Switch; Audio Gain; B+ ON/OFF; Selectivity; Limiter; Tone; CW Oscillator; Phasing.

TUBE COMPLEMENT: 6SK7 r.f. Amplifier; 6K8 1st Det.; 6J5 h.f. Oscillator; 6SK7 and 6K7 i.f. Amplifiers; 6SN7 C.W. Osc.; 3-6V6, AVC and push-pull Audio Output; 5Y3G Rectifier.

Net

The NC-46 is a reliable radio receiver covering all frequencies from 540 to 30,000 kc., especially suitable for use in D.C. districts and on ships where 115 volts is available. This is an excellent quality AC-DC set employing 9 tubes plus rectifier. Electrical bandspread is provided for vernier tuning. The circuit consists of a 6K8 converter-oscillator stage, two 6SG7 IF stages, 6H6 detector limiter stage, 6SF7 AVC amplifier, 6SJ7 CW Oscillator, 6SC7 Audio-Inverter, push-pull audio output stage with two 25L6GT tubes, and a 25Z5 Rectifier.

CONTROLS:

Main Tuning Dial; Bandspread Tuning Dial; Sensitivity Control; Volume Control; Tone Switch; C.W. Oscillator Switch; AVC Switch; Limiter Switch; Band Selector Switch; B+ Switch and Power Switch.

TERMINALS:

On Rear Panel; Phone Jack; B+ Terminals; 8 Ohm Spkr. Terminals; Ant. Terminal; Fuse extractor post.

FREQUENCY RANGE:

The Frequency Range of the NC-46 Receiver is 540. Kc. to 30. Mc. covered in four bands.

Band	General Coverage	Band Spread
A	11.5 -30.0 Mc.	3.5- 4.0 Mc; 70 dial div.
B	4.4 -12.0 Mc.	7.0- 7.3 Mc; 50 dial div.
C	1.55 - 4.6 Mc.	14.0-14.4 Mc; 55 dial div.
D	0.540- 1.6 Mc.	27.0-30.0 Mc; 60 dial div.

SENSITIVITY:

Approximately 5 microvolts input provides a 50 Milliwatt output over the entire range.

SELECTIVITY:

The total bandwidth is approximately 4.5 Kc. at 6 db. down and approximately 70 db. attenuation 10 Kc. off resonance is obtained.

POWER INPUT:

Operation from 110/130 volts A.C. or D.C. Normal power consumption 65 watts.

POWER OUTPUT:

Approximately 4 watts undistorted.

PHYSICAL DATA:

NC-46 Receiver: 9 7/16" high by 17 3/8" wide by 12 1/8" deep, Weight 32 lbs., Gray Wrinkle Finish.

NC-46TS 6" PM Speaker: 8 7/8" high x 10-7/16" wide x 7 1/2" deep, Weight 8 lbs., finish matches receiver.

PRICES:

NC-46 Table Model Complete with Tubes Net \$97.50
 NC-46TS Table Model SpeakerNet \$ 9.90

ANTENNA SUGGESTIONS: When contemplating the purchase of a communications receiver such as the NC-46 it is well to keep in mind that a suitable antenna can help considerably in getting the most out of the reception of foreign stations. In general, the most practical antenna for use where the receiver is to be used over its entire frequency range is a single wire from 50 to 75 feet in length. If reception on one frequency or a narrow band of frequencies is contemplated, best results will be obtained by the use of a folded doublet or half-wave dipole type designed for the operating frequency.

The NC-46 is a reliable radio receiver which will operate on either AC or DC. Its wide frequency range, 540 kc. to 30 mc., and full 4 watts of audio output from nine tubes makes this an exceptional general purpose receiver and a favorite on ship-board.

NC-46

Power Pack

HFS Frequency Range - 27-250 Mc.

A worthy successor to the famous National 1-10, the new model HFS Receiver/Converter is a unique and extremely versatile instrument. The unusual frequency range of 27 to 250 megacycles, selectivity characteristics particularly suited to the constantly increasing occupancy of these frequencies, and high usable sensitivity are but a few of the features which make model HFS the logical choice for amateurs, laboratories, news services, public utility and airline personnel, or any application requiring compact, dependable VHF receiving equipment.

The circuit of this new receiver/converter is basically superheterodyne-superregenerative with its i.f./converter output channel at 10.7 megacycles. Thus, it is equally adaptable for use as a complete VHF receiver for AM, FM (by slope detection) and CW signals or as a converter in conjunction with any conventional superhet receiver capable of tuning 10.7 mc. When used in the latter manner, the result is dual conversion type operation with excellent image rejection at all frequencies from 27-250 megacycles; all features of the receiver to which the HFS is connected become operative for VHF reception. The HFS will also serve as the front end of a high fidelity FM broadcast

(wide-band) installation simply by connecting the converter output to a 10.7 mc. FM i.f. channel and suitable amplifier-speaker system.

For maximum stability and flexibility, power for the HFS is furnished by a separate unit and where a 115/230 volt 50/60 cycle source is available, the National 5886 Power Supply is employed. The HFS may also be powered by the National 686S Vibrator Power Supply and a storage battery or a combination of "B" batteries and storage battery. The 686S operates from 6 volts D.C. and provides all voltages required.

A storage rack for the complete complement of coils is provided inside the receiver cabinet.

The HFS can be used for AM, FM and CW reception. It can also be used as a VHF converter with receivers tuning to 10.7 Mc. The HFS is a quality VHF receiver for fixed-station AC use — or from a 6 volt battery in portable or mobile service.

HFS

SPECIFICATIONS OF THE MODEL HFS

TUNING SYSTEM:

A two-gang main TUNING capacitor, a panel-controlled TRIMMER capacitor and six sets of plug-in coils are used to tune the Receiver in six bands as follows:

Band	Frequency Coverage
A	178 — 250 Mc.
B	120 — 178 Mc.
C	80 — 120 Mc.
D	56 — 80 Mc.
E	41 — 60 Mc.
F	27 — 42 Mc.

(See pages 31 and 33 for details of the type PW-O drive and HFS front end assembly.)

CONTROLS:

TUNING Dial, TRIMMER Control, REGEN Control, AUDIO GAIN Control, INT-EXT (external position connects the i.f. output to the output receptacle and disconnects the second

detector and audio stages) Switch, Converter-Output Control (on rear apron) and B+/OFF Switch.

TUBE COMPLEMENT:

6AK5 1st Det.; 9002 h.f. Osc.; 6SG7 i.f. Amp.; 6SK7 2nd Det.; 6J5 1st Audio; 6V6GT/G Audio Output and 6J5 Converter Output.

PHYSICAL DATA:

The HFS measures 16-9/16" x 8 3/4" x 8 1/2", weighs 19 lbs. (25 lbs. packed for shipment) and the finish is smooth gray enamel.

NC 108R

The new National NC 108 FM Receiver/Tuner is a nine-tube plus rectifier and tuning indicator (the rack model employs a tuning meter) superheterodyne with ratio type FM detector. The frequency range is 87-109 mc. and the dial is calibrated in both megacycles and channels. There is a built-in 5" PM speaker for monitoring and VOLUME and TONE controls are operative on both self-contained and external audio systems. The NC-108 is designed primarily to serve

as the nucleus of a high fidelity installation for the reception and reproduction of FM broadcast entertainment. It can be used in conjunction with any public address or other audio amplifier-loud speaker system or with any conventional broadcast or short wave receiver. The built-in speaker can be switched on or off from the front panel as desired. The NC-108 may also be used as an FM receiver complete in itself—the monitoring speaker affords thoroughly enjoyable listening.

SPECIFICATIONS OF NC-108

TUBE COMPLEMENT:

6BA6 r.f. Amplifier; 6AG5 Mixer; 6C4 Heterodyne Osc.; 3-6SG7 1st, 2nd and 3rd i.f. Amplifiers; 5H6 Ratio discriminator; 6SJ7 1st Audio; 6VEGT/G Monitor power amplifier; 6U5/6G5 Tuning indicator (on table model only) and 5Y3GT Rectifier.

SENSITIVITY:

With 22.5 kc. deviation, a 7 microvolt signal gives 8 volts of audio at output terminals with less than 2% distortion.

SELECTIVITY:

I.F. bandwidth 150 kc. at 3 db. down and 600 kc. at 60 db. down.

IMAGE REJECTION:

Approximately 40 db.

FIDELITY:

Overall response flat within ± 2 db. from 50

to 18,000 cycles. Standard RMA de-emphasis can be cut in or out as desired.

AUDIO OUTPUT:

Maximum audio voltage delivered to output terminals is approximately 10 volts. Input circuit of the following amplifier should be high impedance.

POWER REQUIREMENTS & PHYSICAL DATA:

Both the NC-108R and NC-108T operate from 110/125 V. 50/60 cycles A.C.

NC-108R panel height 8 $\frac{3}{4}$ ", 25 lbs. net (31 lbs. packed for shipment), depth behind panel 8 $\frac{3}{4}$ " overall, Black Wrinkle finish.

NC-108T 16-9/16" x 8 $\frac{3}{4}$ " x 8 $\frac{1}{2}$ ", 24 lbs. net (30 lbs. packed for shipment), smooth Gray Enamel finish.

CONTROL KNOBS

HRT (gray or black) Net \$.75
 HRT Knobs — in light gray plastic with chrome appearance circle — also available in black. This new knob combines with the HRS series shown below to produce a modern panel layout. The HRT is 2 1/8" in dia. and fits 1/4" shafts.

R Net \$.60
 This small dial has a 1 5/8" dia. German silver scale calibrated 0-10 in 180° for increased reading with clockwise rotation. These little dials have been seen on National receivers in every corner of the world. Black bakelite knob. Fits 1/4" shaft.

HRS-1 Knob ON-OFF through 30° rotation Net \$.50

HRP-P Net \$.24

HRS-2 Knob 5-0-5 through 180° rotation Net \$.50

Black bakelite knob 1 1/4" long and 1/2" wide. Equipped with pointer. Especially suitable for use on wafers and other rotary switches on laboratory equipment and the like. (Fits 1/4" shaft).

HRS-3 Knob 0-10 through 300° rotation Net \$.50

HRP Net \$.18

The HRS series knobs are essentially military type with just the right feel for operational controls on electronic equipment. They are molded of high quality plastic and have 1 3/8" dia. chrome plated bevel skirts. HRS Knobs fit 1/4" dia. shafts, black or gray—specify when ordering.

The Type HRP knob has no pointer, but is otherwise the same as the knob above. Recommended for uncalibrated or hard-turning controls. Fits 1/4" shaft.

HR (gray or black) Net \$.30

HRK Net \$.57

An HRS type knob without the chrome plated skirt but with a white dot for spotting relative control settings.

Black bakelite knob 2 3/8" dia.—extremely rugged. This is the knob used on National type O and type L dials. Also useful as a replacement band changing knob for NC-100 series receivers. Fits 1/4" shaft.

HRB Net \$.45

HRT-M Net \$.50

Ideal for bandswitching or other applications where a switch is turned to several index positions, the new HRB lever knob has just the right feel — a bright zinc alloy die casting. This first appeared on the NC-173 Receiver.

This is a smaller version of the HRT and was designed originally for use on the NC-57 Receiver — now available in choice of gray or black — is 1-7/16" in diameter

ACCESSORIES

SB Net \$.18
 A nickel plated brass bushing 1/2" dia. (Fits 1/4" shaft).

RSL Net \$.57
 Rotor Shaft Lock for AMT, TMA, TMC and similar condensers. (Fits 1/4" shaft).

ODL Net \$.33
 A locking device which clamps the rim of O, K, L and M Dials. Brass, nickel plated.

ODD Net \$.42
 Vernier pinch drive for O, L, or other plain dials.

Net

N Dial Net \$4.50

AD Dial Net \$3.00

The four-inch N and AD Dials have engine divided and die stamped scales respectively. The N Dial has a decimal vernier; the AD Dial employs a pointer. The planetary drive has a ratio of 5 to 1, and is contained within the body of the dial. 2, 3, 4 or 5 scale. Fits 1/4" shaft. Specify scale.

B Dial Net \$2.70

"Velvet Vernier" Dial, Type B, has a compact variable ratio 6 to 1 min., 20 to 1 max. drive that is smooth and trouble free. The case is black bakelite. 1 or 5 scale. 4" dia. Fits 1/4" shaft. Specify scale.

BM Dial Net \$2.10

The BM Dial is a smaller version of the B for use where space is limited. The drive ratio is fixed. Although small in size, the BM Dial has the same smooth action as the larger units. 1 or 5 scale. 3" dia. Fits 1/4" shaft. Specify scale.

AM Dial Net \$2.25

The original "Velvet Vernier" mechanism in a metal skirted dial 3" in dia. ratio 5 to 1. It is available with 2, 3, 4, 5 or 6 scale and fits 1/4" shaft.

P Dial Net \$1.00

The new P dial is the same as the AM except direct drive.

Type O, 3 1/2" dia., scale 2, with HRK knob, fits 1/4" shafts. Net \$1.00

Type L, same as O except 5" dia., scale 2 only. Net \$1.95

Type K, same as O except less knob, complete with ODD vernier drive, scale 2 only. Net \$1.50

Type M, same as K except 5" dia., scale 2 only. Net \$2.25

The dials at the right are for individual calibration: all four employ the noted 5:1 drive ratio Velvet Vernier mechanism and are of excellent quality.

MCN Dial Net \$2.70

The MCN dial has been scaled down to lend itself ideally to mobile installations and small converters and tuners. It may also be mounted on the standard 3 1/2" rack panel where such mounting may be desirable. The dial provides three calibrating scales and a 0-100 logging scale. On the rear side of the dial, the mechanism extends 1/4" below the dial frame. 2 3/4" H. x 3 7/8" W.

SCN Dial Net \$3.00

The SCN dial provides the same dial scales as the ACN dial but in a reduced size. It is used where economy of panel-mounting space is desirable and where a smaller dial would be out of proportion with the size of the panel. 4-7/16" H. x 6 1/4" W.

ICN Dial Net \$6.00

The ICN dial meets those hundreds of requests from amateurs the world over for an illuminated ACN dial. Two dial lights mounted on the top corners of the dial provide efficient and even illumination on all bands. The dial window has been blanked out in semi-circular shape to prevent shadow casting. Dial scales are the same as those used on the ACN dial. 5 1/8" H. x 7 1/4" W.

ACN Dial Net \$3.30

The ACN is the original of this type dial, a National design for the benefit of experimenters who "build their own" and desire direct calibration 5" H. x 7 1/4" W.

DIAL SCALES			
Scale	Divisions	Rotation	Direction of Condenser Rotation for increase of dial reading
1	0-100-0	180°	Either
2	0-100	180°	Counter Clockwise
3	100-0	180°	Clockwise
4	150-0	270°	Clockwise
5	200-0	360°	Clockwise
6	0-150	270°	Counter Clockwise

These RF chokes are identical electrically, but differ in mounting provisions. The R-100 employs pigtail leads; the R-100U has pigtail leads and a removable stand-off insulator; the R-100S has cotter-pin lug terminals and a non-removable stand-off insulator; the R-100ST has a 6-32 threaded stud at each end. These chokes are available in 2.5, 5 and 10 millihenry sizes and are rated at 125 milliamperes.

R-33 Net \$.35
The R-33 series chokes are 2-section RF chokes available in 10, 50, 100 and 750 microhenry sizes. Also available in this series is a single layer solenoid choke of 1 microhenry inductance. All are rated at 33 milliamperes. The chokes are wound on a 5" long form and range in diameter up to 5/16" maximum.

R-50 Net \$.35
R-50-1 Net \$.53
The R-50 series chokes are 3 and 4-section RF chokes and available in 0.5, 1, 2.5, and 10 millihenry sizes. They are rated at 50 milliamperes. The chokes are wound on a 1" long form and have a maximum diameter of 15/32". The 10 millihenry R-50-1 choke is wound on an iron core.

R-33G Net \$3.60
The R-33G choke is a 2-section 750 microhenry RF choke hermetically sealed in glass with a current rating of 33 milliamperes. The choke body is 1" long by 5/8" diameter.

R-60 Net \$.35
The R-60 choke is a high current RF choke (500 milliamperes) available in 2 and 4 microhenry sizes. The choke is 1 1/8" long by 5/16" diameter.

- R-300Net \$.38
- R-300UNet \$.42
- R-300SNet \$.42
- R-300STNet \$.40

These RF chokes are similar in size to R-100 series but have higher current capacity. The R-300U is provided with a removable stand-off insulator at one end. The R-300S has a non-removable stand-off insulator and cotter-pin lug terminals. The R-300ST has a 6-32 threaded stud at each end. Inductance values of 0.5, 1.0, 2.5 and 5.0 millihenries are available with a current rating of 300 milliamperes. R-300, R-300U, R-300S and R-300ST are identical electrically.

R-152 Net \$1.75
For use in the range between 2 and 4 Mc. Ideal for high power transmitter stages operated in the 80 meter amateur band. Inductance 4 m.h., DC resistance 10 ohms, DC current 600 ma. Coils honeycomb wound on steatite core.

R-154 Net \$1.75
R-154U Net \$1.40
For the 20, 40 and 80 meter bands, Inductance 1 m.h., DC resistance 6 ohms, DC current 600 ma. Coils honeycomb wound on steatite core. The R-154U does not have the third mounting foot and the small insulator, but is otherwise the same as R-154. See illustration.

R-175 Net \$2.25
The R-175 Choke is suitable for parallel-feed as well as series-feed in transmitters with plate supply up to 3000 volts modulated or 4000 volts unmodulated. Unlike conventional chokes, the reactance of the R-175 is high throughout the 10 and 20 meter bands as well as the 40 and 80 meter bands. Inductance 225 μh, distributed capacity 0.6 mmf., DC resistance 6 ohms, DC current 800 ma., voltage breakdown to base 12,500 volts.

SA-4842

Net \$4.50

A 456 kc. discriminator transformer for narrow band frequency modulation. This unit is the nucleus of the NFM adapter described by Harrington and Bartell in November 1947 QST. Two slug-tuned secondaries are employed and discrimination is accomplished by resonating one at approximately 10 kc. above, the other at approximately 10 kc. below the center frequency of the i.f. channel.

CD-1, 1/4 pint can Net \$.95
Liquid Polystyrene Cement — is ideal for windings as it will not spoil the properties of the best coil form.

OSR

Net \$1.80

A shielded oscillator coil which tunes to 100 kc. with .00041 mfd. Two separate inductances, closely coupled. Excellent for interruption-frequency oscillator in super-regenerative receivers.

XO A-C-7 (ceramic) Net \$**.50**

XO R-7 (mica-filled bakelite) Net \$**.50**

XO R-C-7 (ceramic) Net \$**.50**
These high quality sockets for the 7 pin miniature tubes have silver plated beryllium copper contacts that correctly grip the tube pins close to the base of the tube to provide the short leads and low inductance so necessary in ultra-high frequency design.

A novel feature of these new sockets is the interchangeability of the contacts, which are easily removed for replacement. This permits the use of a mixture of axial (XO A) and radial (XO R) type contacts in the same socket to obtain the shortest possible leads, or minimum size in tight places. The above sockets all mount with two 4-40 screws on .875" centers. Chassis cutout should be 3/4" dia. Shields for use with these sockets are on page 21.

XO A-C-9 (ceramic) Net \$**.57**

XO R-C-9 (ceramic) Net \$**.57**
These sockets are for the new 9-pin miniature tubes. The XO R-C-9 (not illustrated) has radial contacts. Both have all of the features described above for the 7-pin types

and they also mount with 4-40 screws. Mounting center dimension is 1/8", the chassis cutout should be 13/16" dia.

CIR SERIES SOCKETS

Any Type Net \$**.30**

Always a popular National component, type CIR Sockets feature low-loss steatite insulation, a contact that grips the tube prong for its entire length, and a metal ring for six position mounting.

XC-4, 5, 6, 7S, 7L and CIR-4, 5, 6, 7S and 7L all have 1-27/32" mounting centers. CIR-8E has slotted holes in plate but will mount on 1-27/32" center. CIR-8 and XC-8 have 1/2" mounting centers.

(see XM-10 for style)

A heavy duty metal shell socket for tubes having the Jumbo 4-pin base ("fifty watters").

HX-100S Net \$**1.65**

With Standoff Insulators
A low loss wafer socket suitable for the type 4-125-A, 4-250-A and other tubes using the Giant 5-pin base. Shield grounding clips are supplied which mount on the chassis with the socket mounting screws to ground the tube shield at three points. Air holes are provided in the socket to permit forced air cooling.

HX-100 Net \$**.99**

Same as above less standoff insulators.

Net

SHAFT COUPLINGS

TX-19 Net \$1.25

A steatite insulated flexible coupling for 1/4" shafts. Conservatively rated at 5000 volts peak. Diameter 1 3/8", length 1". Length and flashover voltage can be increased by turning collars outward.

TX-11 Net \$4.42

The flexible shaft of this coupling connects shafts at angles up to 90 degrees, and eliminates misalignment problems. Fits 1/4" shafts. Length 4 1/4".

TX-12, Length 4 5/8" Net \$.90

TX-13, Length 7 1/8" Net \$1.05

These couplings use flexible shafting like the TX-11 above, but are also provided with steatite insulators at each end.

TX-1, Leakage path 1" Net \$.65

TX-2, Leakage path 2 1/2" Net \$.75

Flexible couplings with glazed steatite insulation which fit 1/4" shafts.

TX-20 Net \$1.25

A small bakelite insulated flexible coupling of the "Hooke's joint" type. Accommodates up to five degrees angular misalignment as well as 1/64" offset of centers. For 1/4" shafts.

TX-8 Net \$.60

A non-flexible rigid coupling with steatite insulation. 1" diam. Fits 1/4" shaft.

TX-10 Net \$.40

A very compact insulated coupling free from backlash. Insulation is canvas bakelite. 1-1/16" diam. Fits 1/4" shaft.

TX-10F (Not illustrated) Net \$.45

A new version of the TX-10 which employs thin canvas bakelite strips for flexibility.

TX-22 (not illustrated) Net \$.40

A non-insulated coupling identical to TX-10 except of all metal construction. Makes good electrical connection between coupled shafts.

TX-9 Net \$.75

This small insulated flexible coupling provides high electrical efficiency when used to isolate circuits. Insulation is steatite. 1 3/8" diam. Fits 1/4" shaft.

TX-21 (not illustrated) Net \$.40

Similar to TX-10 except 13/16" long and couples 1/4" shaft to 5/32" shaft.

SAFETY GRID AND PLATE CAPS

SPP-9 Net \$.21

Ceramic insulation. Fits 9/16" diameter.

SPP-3 Net \$.21

Ceramic insulation. Fits 3/8" diameter.

National Safety Grid and Plate Caps have a ceramic body which offers protection against accidental contact with high voltage caps on tubes.

GRID AND PLATE GRIPS

Type 12, for 9/16" Caps Net \$.06

Type 24, for 3/8" Caps Net \$.03

Type 8, for 1/4" Caps Net \$.03

National Grid and Plate Grips provide a secure and positive contact with the tube cap and yet are released easily by a slight pressure on the ear.

RIGHT ANGLE DRIVES

ACD-1Net \$3.75

ACD-2Net \$3.90

ACD-3Net \$3.90

These sturdy drives were developed for use with the new National AMT condensers (see page 26). They are as compact as the torque requirements will allow and have nickel plated cast frames and bronze gears which operate smoothly without chatter or binding. The ACD-1 has 32 pitch gears and a 1/4" dia. dial shaft and drives 1/4" shafts. ACD-2 has 24 pitch gears (for heavier service) and 1/4" dia. shaft driving 1/4" shafts. ACD-3 is the same as ACD-2 except that it drives 3/8" diameter shafts.

AIR WOUND EXCITER COILS

The small coils illustrated above and tabulated with the original AR-16 exciter coils (on page 25 facing) make the AR line complete in that these new units are ideal for use where the r.f. wiring goes below chassis. The new AR-17s plug into standard 6 contact sockets such as National CIR-6 or XC-6 (see page 22). Both types, ruggedly constructed, have steatite and polystyrene insulation and are for use in stages where the plate power input does not exceed 90 watts. All have center tapped link coupling coils which may be grounded for harmonic reduction.

PB-10-6, PB-10A-6 and FXTB-6 require National XC-6C socket (see page 21).

Net

TRANSMITTER COIL FORMS

The Transmitter Coil Forms and Mounting are designed as a group, and mount conveniently on the bars of a TMA condenser. The larger coil form, Type XR-14A, (not illustrated) has a winding diameter of 5", a winding length of 3 3/4" (30 turns total) and is intended for the 80 meter band. The smaller form, Type XR-10A, has a winding length of 3 1/4" and a winding diameter of 2 1/2" (26 turns total). It is intended for the 20 and 40 meter bands.

Either coil form fits the PB-15 plug. For higher frequencies, this plug may be used with a self-supporting coil of copper tubing. The XB-15 Socket may be mounted on breadboards or chassis, as well as on the TMA Condenser.

NEW CONDENSERS — AMT

Introducing a new line of condensers designed for modern tubes and modern circuits, National announces the AMT series. The AMT is a larger and sturdier model of the TMK condenser. The frame is extremely rigid, with mounting feet a part of the end plates. Heavy steatite insulation is used throughout.

A solid aluminum tie bar runs across the top of the condenser for added rigidity and acts as a mounting for AR-18 series coils in the double stator models. Carefully rounded and polished .064" thick aluminum plates are used throughout.

The double stator models are available in either standard end drive (D series) or center-drive (DG series) with 1/4" dia. shaft extension. The center drive condenser allows maximum flexibility in circuit layout and makes an ideal drive for rack panel mount and "dish" type construction.

NEW COILS — AR-18

Air-wound 500 watt coils designed to mount on the split stator models of the new National AMT condensers. The AR18-C coils have fixed center links and require the XB18-C socket. The AR18-S coils are designed to accommodate the swinging link furnished with the XB18-S socket. Link windings of both models have a center tap which may be grounded for harmonic reduction. Plugs and jacks are silver plated to insure low contact resistance. Insulation, steatite. The sockets are 7/4" in length.

TYPE TMA

is a larger model of the popular TMC. The frame is extremely rigid and arranged for mounting on panel, chassis or stand-off insulators. The plates are of heavy aluminum with rounded and buffed edges. Insulation is steatite located outside of the concentrated field.

TYPE TML

is a heavy duty job throughout. The frame structure (rugged aluminum castings with dural tie bars) and precision bearings assure permanent rotor alignment. All plates are extra thick with rounded and polished edges. This, plus specially treated steatite insulators and a husky self-cleaning rotor contact, provides high flasover, current and voltage ratings.

MINIATURE CONDENSERS:

Type PS variable condensers are compact silver plated units of soldered construction for use as semi-fixed bandsets or padders. Base is steatite — bearing is "snug" but smooth. PSR models are screwdriver adjust type; PSE have 1/4" diameter shafts both ends; PSL are similar to PSR but include rotor shaft lock.

Type M-30 Net \$2.22

The M-30 is a tiny (13/16" x 9/16" x 1/2") mica trimmer — 30 mmf. max. — steatite base.

Type W-75, 75 mmf. Net \$1.60

Type W-100, 100 mmf. Net \$1.76

Small air-dielectric padding condensers having a very low temperature coefficient. They are mounted in 1/4" diameter aluminum shields and have 1/4" hex heads for socket-wrench adjustment.

NEUTRALIZING CONDENSERS:

NC-600U Net \$3.38

With standoff insulator

NC-600 Net \$3.32

Without insulator

For neutralizing low power beam tubes requiring from .5 to 4 mmf., and 1500 max. total volts such as the 6L6. The NC-600U is supplied with a GS-10 standoff insulator screwed on one end, which may be removed for pigtail mounting.

STN Net \$2.07

The Type STN has a maximum capacity of 18 mmf. (3000 V), making it suitable for such tubes as the 809. It is supplied with two standoff insulators.

The UM condensers are low-loss, aluminum plate staked construction miniature variables designed for UHF converters, VFOs and the like — minimum capacity is exceptionally low. The UMs can be mounted in PB-10 or RO shield cans and have 1/4" dia. shafts front and rear for ganging (see pages 21, 23 and 24 for shield cans and couplings). Plates: straight-line-cap., 180° rotation. Dimensions: Base 1" x 2 1/4", mtg. holes on 5/8" x 1-23/32" centers, 2-5/16" max. length.

The UMB-25 and UMB-50 are differential (balanced stator) models. UM-10D and UMA-25 are double-spaced and the latter is bolted construction for experimental capacity reduction. Hardware for panel or chassis mounting is supplied with all UM condensers.

Originally developed for the famous HRO and NC-100 receivers, National PW and NPW condensers and drive units are well known to professional and amateur radio men throughout the world. Sturdily constructed of the finest materials and carefully adjusted by skilled hands, they have become "standard specifications" for applications requiring smooth, precise control and high re-set accuracy.

The Micrometer Dial reads direct to one part in 500. Division lines are approximately 1/4" apart. The dial revolves ten times in covering the tuning range, and the numbers visible through the small windows change every revolution to give consecutive numbering by tens from 0 to 500. The condenser is of extremely rigid construction, with four bearings on the rotor shaft. The drive, at the mid-point of the rotor, is through an enclosed preloaded worm gear with 20 to 1 ratio. Each rotor is individually insulated from the frame, and each has its own individual rotor contact. Stator insulation is steatite. Plate shape is straight-line frequency when the frequency range is 2:1.

PW Condensers are available in 1, 2, 3 or 4 sections, in either 160 or 225 mmf per section. Larger capacities cannot be supplied.

PW-1R	Single section right	Net \$13.50
PW-1L	Single section left	Net \$13.50
PW-2R	Double section right	Net \$18.00
PW-2L	Double section left	Net \$18.00
PW-2S	Single section each side	Net \$18.00
PW-3R	Double section right; single left	Net \$24.00
PW-3L	Double section left; single right	Net \$24.00
PW-4	Double section each side	Net \$27.00

NPW-3 Three sections, each 225 mmf.Net \$24.00
 Similar to PW models, except that rotor shaft is perpendicular to panel. Three sections, each 225 mmf.

NPW-O Net \$9.00
 Uses parts similar to the NPW condenser. Drive shaft perpendicular to panel. One TX-9 coupling supplied.

PW-O Net \$9.90
 Uses parts similar to the PW condenser. Drive shaft parallel to panel. Two TX-9 couplings supplied.

PW-D Net \$5.25
 The Micrometer Dial used on the condensers and drives above is available separately. It revolves ten times in covering the complete range and as there is no gear reduction unit furnished, the driven shaft will revolve ten times, also. The PW-D dial fits a shaft 5/16" in diameter.

NDC-07

NDC-83

These metal cases are the same as those used to house the latest National receivers. They are supplied in blank form, are made of heavy gauge steel with rounded corners and the light gray enamel finish is sprayed and baked; see table for sizes and National distributor for prices.

SPEAKER CABINETS

NDC-07 Net \$6.60
NDC-83 Net \$7.50

These speaker cabinets were designed to match the cases described above: corner contour and baked enamel finish are the same. NDC-07 takes 8" speakers and NDC-83 takes the 10" size. Both are of welded construction, are lined with acoustic material complete with attractive grille over the speaker opening.

OSCILLOSCOPES

CRU — Table Model Oscilloscope, with tubes. Net \$39.90
CRU-P — Rack Panel and Control Plate (to rack mount CRU Scope). Net \$ 2.85

The National CRU Oscilloscope is a compact inexpensive instrument for the progressive amateur or experimenter. It uses a 2" screen tube and has INTENSITY, FOCUS and SWEEP controls in addition to the A.C. ON/OFF and 60 cycle/external sweep switches. See your distributor for further details.

PSG (including mounting hardware) Net \$1.05

This metal grille measures 7 $\frac{1}{2}$ " x 3 $\frac{1}{2}$ " and is ideal for use over a large panel cut-out in all type power supplies.

CFA Net \$0.35

The National chart frame is blanked from one piece of metal, and includes a celluloid sheet to cover the chart. Size 2 $\frac{1}{4}$ " x 3 $\frac{1}{4}$ ", with sides $\frac{1}{4}$ " wide. Durable finish.

PH-1 (chrome plated handle) Net \$0.45

An attractive and rugged pull handle of cast zinc alloy with 10-32 tapped holes on 3 $\frac{3}{4}$ " mounting centers. Right size and finish for dressing up equipment around the station.

PH-2 (telephone black handle) Net \$0.25

Same as PH-1 but with black finish.

CP-1, dark gray Net \$0.40

CP-2, black Net \$0.40

A high quality air-drying paint that may be applied with a brush.

CP-3, light gray, matches newest National receivers — for spraying and baking. Net \$0.50

**HFT-1
FRONT END
ASSEMBLY**

FRONT END ASSEMBLY

For the experimenter who likes to build his own receivers, HFT-1 is the complete "front end" for a VHF super-heterodyne. This is the tuning assembly used in the National HFS Receiver-Converter described on Page 14—frequency coverage and coil sets available are the same. Cutout of the HFT-1 is at 10.7 megacycles and National IFM or IFN transformers are recommended for the i.f. channel.

The ideal oscillator-mixer unit for the FM broadcast receiver. Build your next VHF receiver around the HFT-1 and save tedious hours of coil pruning and tracking adjustments.

HFT-1 (with one set of coils—specify range)
Net \$39.50

Additional coils (per pair—specify range)
Net \$3.24

MULTI-BAND TANK ASSEMBLY

Designed to meet amateur requirements for greater simplicity in multi-band transmitters, the unique MB-150 Multi-Band Tank illustrated below tunes all amateur bands from 80 through 10 meters with 180° rotation of the shaft; the coils are never changed. The unit is built around an essentially "multiple-tuned" circuit, i.e. a circuit which tunes to two harmonically unrelated frequencies at the same time. Thus, it becomes possible to cover a wide frequency range and yet maintain a reasonably constant L/C ratio. Three coils, four capacitors and an RF choke are combined to make up a compact tank 3" wide x 8 1/4" high (including the GS-10 standoffs) x 9" long overall including the 1/4" dia. shaft and output terminals. Features of the MB-150 are as follows:

- (1) For use as the all-band plate tank in push-pull or balanced single-ended stages running up to 150-watts input (1500 volts peak). It is ideal for a pair of 8Q7s or 8Q9s or a single 829B.
- (2) Separate link coupling coil has special clips which adjust to match impedances up to 600 ohms directly. Output couples into a higher powered amplifier, an antenna or an antenna tuning network.
- (3) Fast band changing is accomplished without handling coils, thus removing one of the danger points in the amateur station.

VARIABLE CONDENSERS

Type C Dual Type D Single

Type	T	S	W	H
C	2 1/2	3 1/2	5 1/2	5 1/2
D	1 3/8	2 3/8	4 1/4	4
E	1 3/8	1 3/8	2 3/8	2 3/8
F	1 1/2	1 1/2	2 1/4	2

Type E Dual Type F Single

JOHNSON C and D condensers are sturdily constructed to give trouble-free operation under the most severe service. Only the finest materials are employed yet these units are lower in price than any other quality condensers.

All dual models have center rotor connections, to insure balanced operation at ultra-high frequencies. Heavy laminated phosphor bronze contact springs insure low resistance circuits.

Important features include: Heaviest aluminum plates of any similar condenser, .051" thick—Sinterite insulation—Large laminated rotor brushes—Center rotor contacts on all dual condensers—Heavy 5/16" diameter aluminum tie rods for frame strength and rigidity—1/4" stainless steel shafts.

Supplied with single hole mounting brackets which fit either top or bottom of end plate so that stators may be mounted to top or bottom as preferred.

Designed as rugged, compact units for medium and low power transmitters, type E and F condensers are in a class by themselves. They have more capacity per cubic inch and occupy less panel space for their rating than any other condenser on the market. Their rapid adoption by manufacturers of high grade equipment and discriminating amateurs is ample proof of their excellence.

Points of superiority: Heavy aluminum plates, .032" thick with rounded edges for maximum voltage rating—Heavy aluminum tie rods 1/4" diameter for frame strength and rigidity—Sinterite insulation—Stator mounted above to reduce capacity to ground—heavy phosphor bronze contact springs, cadmium plate—Center contact on dual models—Chassis or panel mounting—Stainless steel shafts.

In addition to mounting foot shown, removable single hole brackets are furnished so that condenser may be inverted from position shown, or other components mounted above.

DEPARTURES FROM STANDARD

Special plate spacings, capacities, shaft extensions, insulation, mounting brackets, terminals, etc., can be furnished to specifications for commercial applications.

CONDENSERS FOR HIGHER VOLTAGES

The JOHNSON line includes heavy duty pressurized or air dielectric fixed and variable condensers for high voltage commercial applications. Data sheets furnished on request.

EXPLANATION OF TYPE NUMBERS

The first part of the type number indicates the capacity per section in mmfd. The following letter indicates the frame size: type A second letter D indicates a two section type. The line number multiplied by 100 is the approximate peak breakdown voltage. Capacity measurements of the E and F types are made with the condensers in the position shown in the above illustration. The C and D types are measured in inverted position.

TYPE H CONDENSER

Two End Plates Single End Plate

The Type H condenser was designed for aircraft transmitters and combines a minimum of weight and size with simple but rugged construction. Capacities and spacings are provided for low and medium power stages. Use of steatite for end plates avoids any possibility of "short circuit loops" and permits panel mounting with both rotor and stator insulated from ground. Has aluminum plates .020" thick. End plate 1 1/2" square. Capacity measurements are taken with condenser in position shown above.

TYPE J CONDENSER

The Type J condenser is a midget with big condenser characteristics. It has wider spacing than most small types, yet occupies little more space and is ideal for oscillator and low power stages. It can be used in conjunction with JOHNSON tube socket type inductors to provide an extremely compact tank unit. The spacing is .025" and universal type mounting brackets make possible a variety of mountings including chassis, panel, or inside tube socket type inductors. Steatite end plate is 1 1/8" wide.

100J12	157-6	3.50	102	7	.025"	36

TYPE G CONDENSER

The Type G condenser is extremely popular as a neutralizing condenser for medium and low power stages. It is also widely used for grid and plate tuning at high and ultra-high frequencies. A wide range of capacities and spacing make it adaptable to many applications. It has a single end plate of steatite and low minimum capacity. .032" rounded aluminum plates, universal mounting bracket locking nut, and front and rear shaft extension are among outstanding features.

Cat. No.	Part No.	List Price	Cap. per Sect.	Spacing Plates	Number	L

12G70	165-7	4.15	12	6	.225"	7

COUPLINGS

All JOHNSON insulated shaft couplings are characterized by best steatite insulation properly proportioned for electrical and mechanical strength, by accurate metal parts heavily plated, by advanced design, and by skillful manufacture.

The phosphor bronze springs of the -250 and -251 series couplings provide flexibility without backlash and adjust to minor shaft misalignments.

The hub assemblies of the new -260 and -263 coupling move freely on their supporting posts, accommodating misalignment and strain without dependence upon a flexing metal, and yet are well secured to prevent accidental disassembly. Rigid types -252, -262 and -261 meet the requirements of accurate shaft alignment and high torque.

The -259 and -2593 are bar type couplings recommended for high voltages or very high frequencies.

PANEL BEARINGS

Nickel plated brass for 1/4" shaft and up to 3/8" panels. Also with 3" and 6" nickel plated brass shafts

Cat. No. 115-255 Panel bearing only List Price \$0.17
 Cat. No. 115-256 Bearing and 3" shaft List Price .40
 Cat. No. 115-2562 Bearing and 6" shaft List Price .50

FLEXIBLE SHAFTS

Phosphor bronze, non-rusting with 1/4" hubs. Permit out of line or up to 90 degree angular control.

Cat. No. 115-253 3" flexible shaft List Price .45
 Cat. No. 115-254 6" flexible shaft List Price .50

TYPE N CONDENSER

Small mounting space requirements, extremely high voltage rating in proportion to size, fine adjustment with uniform voltage breakdown rating throughout the full capacity range, and low cost, make these neutralizing condensers ideal for the modern transmitter. "Plates" are aluminum cups supported on a steatite frame with cast aluminum mounting bracket. Because of the design these condensers will withstand much higher voltage than conventional flat plate condensers of the same spacing. The N375 has been improved and now features a bushing for the guide shaft for greater stability and a beaded lower cup for high voltage rating. Peak R.F. Breakdown Ratings at 2 Mc.: N125 8,500, N250 11,500, N375 14,500.

235-647	.85	Form only	5 prong

Inductors plug into 3 prong tube socket. Numbers 640 through 654 have link at center, 650 through 655 link at bottom. Those with center link are center tapped to split stator circuits. Power rating is 100 watts. All sizes use coil from 1 1/2" diameter and 3 3/4" high and have dual-terminal top.

EDGEWISE WOUND "HI-Q" INDUCTORS

Design improvements and mycalex insulation are new features in this inductor. They are widely used in commercial equipment and will safely handle more than 1000 watts in continuous service. Other sizes and types of inductors are manufactured for commercial broadcast and industrial electronic applications. More information available on request.

RADIO FREQUENCY CHOKES

Uniformly flat in response, JOHNSON R.F. chokes are equally effective over the entire range for which they are designed. Coils are of enameled silk-covered wire impregnated with high grade R.F. lacquer and are wound on steatite cores. Current ratings are of continuous service and may be increased for intermittent use.

119-843
119-855

JOHNSON tube cap connectors are carefully designed, specifically for transmitting and industrial uses. Numbers 119-853 and 119-855 have steatite covers as embled with 12" and 15" high voltage insulated leads. They are particularly recommended for rectifier and high voltage service. The 119-856 and 119-857 are similar to 119-852 and 119-854, but have copper strips for low-loss R.F. uses. Col. 119-838 through 119-841 are recommended for heavy current industrial uses. The outside diameter is 7/8" and connectors may be tightened with a inner wrench listed below. The 119-843 is a part of the 124-212 socket for 833A tubes and is recommended for other tubes having 500 ohm-ohm caps and requiring resistor type inductors for high R.F. currents. The outside diameter is 5/8" long and 3/8" wide.

TUBE SOCKETS

"The World's Most Famous Tube Sockets," a title earned over years of top quality in material, workmanship, and design, cover nearly every transmitting tube requirement. "JOHNSON" sockets are specified by exacting users.

123-209
-210, -211, -216

Nos. -209, -210, -211 and -216 all have heavy phosphor bronze, side wiring type contact, aluminum shells and clear white, glazed porcelain bases.

No. -209 is similar to No. -210, but provides greater spacing between contacts and shell, for higher voltages. No. -211 the standard "50 watt" socket has double filament contacts for carrying heavy currents. Terminals are permanently and plainly marked with identifying letters molded in base both top and bottom.

No. -216 is for tubes having a GIANT 5 pin bayonet base such as the 803, RK23, etc. -210F and -211F are enclosed in lustrous black finished aluminum housing for front of panel mounting.

"S" dimension -209, -210 series 1.386" -211 series 1.886" -216 series 2.198"

Suffix letter "B" identifies sockets with beryllium copper contacts, suffix letter "S" sockets with steatite bases.

Cat. No.	List Price	D	H	M	B Base
123-209	\$1.15	2 1/8	1 7/8	2 1/2	Medium

124-213

124-214

No. -213 takes Eimac 152TL and 304TL. Contacts arranged for either series or parallel filaments.

No. -214 takes Eimac 1500TH and similar tubes. Has air jet tube for cooling filament tube seals.

No. -215 is for "250 watt" tubes such as 204A, 849 etc. The plate terminal has a "safety cup" which prevents accidental dislodgement of the tube.

Cat. No.	Price	Base
124-213	\$2.00	"Eimac"
124-214	2.75	"Eimac"

MINIATURE SOCKETS

Cat. No.	Description	List Price
120-267	Miniature socket, all ceramic	\$0.50
120-277B	Miniature socket with shield base	.75
133-277S	Miniature socket, shield base only	.15
133-278A	1 3/8" shield for 277 B or S	.20
133-278B	1 3/4" shield for 277 B or S	.20

Sockets for 9000 series and miniature series such as 1S4, 1S5, 1T4, 1R5, etc. No. -267 all steatite type. No. -277B steatite base with metal mounting ring which extends upward to form a shield. No. -277S is shield base only as used on No. -277B and can be used with No. -267 or other similar sockets. Nos. -278A and B are shield caps to fit No. -277B or No. -277S. Available in two sizes, they include an inside coil spring to hold the tube firmly in position.

ACORN SOCKETS

Cat. No.	Price	Mtg. Cen.
121-265	\$1.25	1 1/2"
121-235	1.10	1 1/2"
121-245	2.00	1 1/2"

Nos. -235, and -265 were all designed for new "acorn" tubes. Nos. -235 and -265 are similar except for size. No. -235 is more rugged but requires slightly more mounting space. No. -245 is a plated metal base and includes built-in by-pass condensers as an integral part of each contact. Contacts insulated by mica. All contacts silver plated beryllium copper.

121-235

121-245

JOHNSON wafer sockets are insulated with grade L 4 steatite or better, top and sides glazed, underside impregnated in conformance with latest Army Navy specifications. Contacts are brass with steel spring, cadmium plated and are mounted against phenolic washers in molded recesses to prevent movement. Rivets are countersunk and mounting holes bossed to permit sub-panel mounting. Locating grooves facilitate tube insertion.

Cat. No.	List Price	Base
122-224	\$.55	4 pin
122-225	.60	5 pin
122-226	.65	6 pin
122-227	.70	7 pin med.
122-217	.70	7 pin small
122-228	.75	Octal

No. -237 is a 7 pin large steatite wafer socket for transmitting tubes having a GIANT 7 pin base such as the HK257, and RCA 813.

No. -247 is a 7 pin steatite wafer socket for transmitting tubes such as the 826. It is furnished with etched aluminum base shield.

No. -248 is the same as the No. -247 except for its small "L" dimension, is also furnished with shield and has the same mounting dimensions.

Cat. No.	List Price	Dimension L
122-237	\$1.10	2 5/8"
122-247	1.25	2 5/8"
122-248	1.25	2 3/8"

The 122-101 is a 7 pin steatite wafer socket of special design incorporating a base shield, retainer springs and provision for mounting button mica capacitors directly to the socket. Socket is specially designed for UHF use with tubes such as the 826, 829 and 832. Contacts and spring are silver plated and recessed to prevent movement. Grid terminals are designed so connecting wires may be isolated from other circuits and permit small grid coils to be mounted on the terminal ends. Four mounting holes are equally spaced 2.312 inches between centers.

Cat. No.	List Price
122-101	\$3.00

The 122-275 is a 5 pin steatite wafer socket for transmitting tubes having a GIANT 5 pin base such as the 4-125A and RK18. Contacts are of a superior construction, brass clip and steel spring, both cadmium plated and are designed for high currents. Stray capacitance, each contact to ground, 2.1 mmf. (socket mounted on metal chassis). Adequate ventilation for tubes is provided by five 1/4" holes spaced between contacts. Four mounting holes are equally spaced 2 1/4" between centers.

Cat. No.	List Price
122-275	\$1.75

The 122-244 is a 4 pin wafer socket or steatite insulation, for transmitting tubes having a SUPER JUMBO base such as the 8008. Brass clip contacts and reinforcing steel springs are cadmium plated and are designed for high currents. Stray capacity contacts to ground, 1.25 mmf. Four mounting holes spaced 1 1/8" between centers.

Cat. No.	List Price
122-244	\$1.50

The No. 212 socket for RCA833 or 833A Base of steatite. Filament clamps incorporate "springs" which minimize strains on the glass tube seals and prevent breakage. Plate leads include laminated phosphor bronze strips for flexibility. Regularly supplied with 5 1/2" plate leads. Other lengths available on special order.

Cat. No.	List Price
124-212	\$10.00

No. -234 for Western Electric 5D21, 705A, 15A, 715B Raytheon, RKR72 and RK72 includes heavy steatite base and special locking device for retaining tube in socket.

E. F. JOHNSON Company

WASECA, MINNESOTA

MULTIPLE WIRE CONNECTORS

JOHNSON cable connectors provide a most efficient means of quickly connecting or disconnecting multiple electrical circuits in low-voltage control audio and instrument service. Contacts accommodate No. 16 stranded wire, or No. 14 solid. Minimum surface creepage path for 12 connector types $\frac{1}{8}$ " for 7 connector types $\frac{1}{4}$ ". Body material of molded black bakelite back shells are brass dull black unfinished, shell liners are fibre. Plug and receptacle polarized for quick accurate insertion. The cadmium plated steel mounting yokes fit standard switch boxes and cover plates and are supplied with necessary hardware.

The multiple wire connectors, tip plugs and jacks appearing on this page are former Mallory-Yaxley products.

PLUGS AND JACKS

"BANANA SPRING" TYPE

Nickel-silver springs and high grade nickel plated brass screw machine parts with accurate threads and milled nuts. Studs extend full length of springs for added support.

75D is designed for riveting. Spring is peryllium copper. 75BB has $\frac{1}{8}$ " black plastic handle; 75ER same but red. 77BB has $\frac{1}{4}$ " black plastic handle; 77ER same but red.

75 or 75A can be furnished with beryllium copper spring on special order, and all plugs can be furnished with nickel, cadmium or silver plating if required.

108-7451 is a red plastic insulated jack similar to the 108-74 and furnished with fibre washers. 108-7452 same but black.

If washers used for insulated mounting fits $\frac{1}{16}$ " holes, $\frac{3}{32}$ " maximum panel thickness.

E. F. JOHNSON Company

WASECA, MINNESOTA

THE JOHNSON "Q" AND JOHNSON "Q" BEAM COMPLETE "Q" SYSTEMS

Cat. No.	Band (Meters)	List Price
137-2Q	2	\$ 7.00
137-6Q	6	10.50
137-10Q	10	9.75
137-20Q	20	16.50
137-40Q	40	28.00

The consistent results obtained by the thousands of users of the JOHNSON Q antenna system are due to the extremely high efficiency of this famous antenna. Applications include half-wave doublet, either horizontal or vertical, harmonic or "long wire" radiator, radiator-reflector, radiator director, "V" Beam, JOHNSON Q Beam and others.

The JOHNSON Q Beam is a special application of the Q system. It consists of two half-wave Q antennas spaced 1.5 wave and Q sections connected in parallel at the bottom. In ordering specify two Q antennas for the lower frequency of the two bands desired. For example if you want a Q Beam to operate on 10 and 20 meters, order two JOHNSON Qs for 20 meters.

The -2Q and -6Q use aluminum tubing for the radiating portion as well as for the matching section. They may be suspended overhead in the conventional manner or are self supporting with their end terminal plugs plugged into a 136-35 Jack Strip mounted on the transmitter. The 136-35 Jack Strip and 136-36 Plug Strip make an ideal feeder connection at the transmitter when the antenna is suspended.

Mycalex insulated fittings for use as described in "Q" antenna discussion above.

Cat. No. 136-35—Mounting Jack Strip List Price \$2.00
Cat. No. 136-36—Double Plug Strip List Price 1.00

FEEDER INSULATORS

Nos. 136-122, -124 and -125 are conventional feeder spreaders of high grade low absorption porcelain. Silicone impregnated for finest water repellent characteristics. No. 136-122 is provided with notches for 1/2" line spacing. All have 3/8x1/2" cross section. No. 136-31 is a glazed porcelain transposition insulator which permits crossing transmission lines at frequent intervals to prevent radiation and provide 2" line spacing.

"Q" SPACING BARS

Made of dense, highly vitrified white glazed porcelain, with aluminum tubing clamps. Used for spacing tubing in matching transformer applications. Clamps are arranged so that spacing is continuously variable from 7/8" to 35/8" center to center.

No. 136-33—Spacing Bar..... List \$0.45

ENAMELLED COPPERWELD ANTENNA WIRE

JOHNSON Enamelled Copperweld Antenna Wire is the ideal material for any system where the wire must not stretch nor sag. The steel core provides almost three times the strength of ordinary copper wire, the copper coating provides a low RF resistance and the enamel prevents corrosion. Prices are per 100 feet. Carried by most suppliers in bulk, it is available from the factory in any specified length.

Cat. No.	B&S Gauge	Ft. per lb.	Breaking Strength	List Price per C'
144-348	10	34 1/2	1130 lbs.	\$3.62
144-350	12	54	720 lbs.	2.49
144-352	14	85	400 lbs.	1.64

ANTENNA INSULATORS

These insulators are of genuine WET PROCESS porcelain, with smooth white glazing. The all-porcelain types are 1" in diameter. Their long leakage path, low capacity, and freedom from moisture absorption result in exceptional efficiency. The Commercial Type is 1 1/2" in diameter, for uses where much greater strength is necessary. End fittings are of non-corrosive aluminum alloy. No. 136-104 is a dry process 4" antenna insulator, 3/8" square for service where the strength of the 1" types is not required.

Cat. No.	Break Strength	Lgth.	List Price

PILOT LIGHTS

Brackets are cadmium plated steel, assembled with faceted jewels in your choice of colors and miniature bayonet or miniature screw bases. Pilot lights accommodate number 50 and 52 miniature screw base and numbers 51, 53 and 356 miniature bayonet base panel lamps. Screw base supplied with two lug terminals, bayonet base with one lug and one rivet terminal. Both types supplied with center grounding lug. Pilot lights with smooth jewels available on special order.

147-318

JOHNSON insulators were introduced in the early twenties, and soon established the sort of dominance that occurs occasionally when one line offers more in choice of style and size; in advanced but practical design; and in mass production economy than others. This position has been maintained through the years by careful attention to the product, the line, and the needs of the user.

JOHNSON insulators are specifically designed for high R.F. Insulating materials were selected after exhaustive laboratory tests. Superior grade, low absorption, well glazed electrical porcelain, and Grade L 4 or better steatite are used.

Of the insulators appearing under the headings "Steatite" all but the 500 series and the 135-55 are offered in this finer material for the first time. Their dielectric losses are but a fraction of those for the same parts in porcelain, and they are particularly recommended for high frequency work.

In addition to fine quality insulating materials the JOHNSON line distinguishes itself with a perfection of ceramic design; logical proportions; clean-cut accurate molding; and high grade nickel plated brass hardware, with milled (not stamped) nuts.

STAND-OFF AND CONE INSULATORS

The stand-off insulators feature heavy, breakage-resistant bases and adequate "glaze grooves" around mounting screw holes. Numbers 135-65, 135-66, 135-67 and 135-68 have unbreakable, cadmium plated, drawn steel bases. Brass bases are optionally available and indicated by suffix "B" behind catalog number.

The No. 500 cone insulator series are steatite for better high frequency insulation. Threads are tapped directly into the ceramic. Furnished complete with machine screws, brass and cushion washers.

135-867	.20	135-67

THRU-PANEL INSULATORS AND BUSHINGS

In the thru-panel and bushing series special attention has been given to obtaining high mechanical strength through heavier construction and at the same time increasing the breakdown voltage. Flat mounting surfaces with cushion washers eliminate breakage. Bottom pieces have long internal and external portions for higher breakdown voltage rating, and grooved surfaces to increase leakage path. Jack types have terminals permitting connection above as well as below the panel.

JOHNSON lead-in bushings are designed to have even greater mechanical strength and long leakage path in proportion to size. Numbers 135-53 and 135-54 are supplied as single porcelain parts including cushion washers.

Nos. 135-50 and 135-55 are steatite and have a special interlocking feature which permits mounting on thin panels without extra spacing washers.

Nos. 20, 20J, 22, 22J and 24 are now also steatite with heavily plated brass hardware.

JUNIOR INDUCTORS

For Powers Up to 75 Watts Input

Fitted with standard five-prong stearite base. Small size for compact construction. May be used in the oscillator, buffer or final amplifier stage with input powers up to 75 watts and plate voltages up to 850. Three different assemblies provided, any of which may be used in capacity-coupled circuits by omitting connection to the links.

AMATEUR NET \$1.38 ea.

B & W TURRET ASSEMBLIES

Makes possible fast, positive band switching. Unique switching assembly allows unused coils to be shorted, thus eliminating absorption effects. All units cover 80, 40, 20, 15 and 10 meter bands.

B & W 75 WATT 2A "BAND HOPPERS"

Uses same coil design as B & W Juniors. Unusually compact panel controlled unit. It may be used for inter-stage coupling between two beam power tubes or between beam power tubes and triodes.

Stock No. 3121 Amateur Net \$4.81

B & W 75-WATT TURRETS—provide a means for link coupling single ended or push-pull low power stages. Complete assembly is mounted on a positive action switch arranged for panel mounting through a single 3/8" hole. Turrets may be used with tubes operating at voltages up to 850.

Stock No. 3810—Type JTCL—Center linked, center tapped coils. Amateur Net \$9.38

Stock No. 3811—Type JTEL—End linked, untapped coils. Amateur Net \$9.38

B & W 150-WATT TURRETS—Supplied in both center and end link models for both single- and double-ended circuits. Operation is by a positive action switch arranged for panel mounting through a single 3/8" hole. Turrets may be used with tubes operating at voltages up to 1000 volts.

Stock No. 3812—Type BCL—Center linked, center tapped coils. Amateur Net \$11.69

Stock No. 3813—Type BEL—End linked, untapped coils. Amateur Net \$11.69

3400 SERIES INDUCTORS

FOR POWERS UP TO 500 WATTS

Give the utmost in sturdy construction and electrical flexibility. Same as those supplied by B & W to the armed forces during the war. Each coil has an individual internal center coupling, adjustable over 360°—permitting precise impedance matching up to 600 ohms, thus providing flexibility far in excess of any installation requirements.

Amateur Net \$7.50 each

AIR INDUCTORS

BARKER & WILLIAMSON • UPPER DARBY, PA.

TYPE HD1
(Fixed Link)

- MINIMUM DIELECTRIC IN THE FIELD OF THE COIL
- EXTREMELY LOW LOSSES
- RUGGED CONSTRUCTION
- EXCELLENT APPEARANCE
- LOW COST

Each AIR INDUCTOR is a completely finished unit. All coils are equipped with banana type plugs . . . Type "B" is for use in oscillator and buffer—doubler stages developing up to 100 Watts power. Type "T" is especially suited for high powered neutralized buffer and final tank stages where powers of 500 Watts are developed. Type "HD" is for maximum power — handles a Kilowatt with ease.

TYPE CX CONDENSER

Superior design! Only half the length of conventional units. Perfect electrical and mechanical symmetry. Designed for built-in neutralization. Integral mounting of B & W coils reduces lead lengths and resulting lead inductance to an absolute minimum.

Stock No. 3722-1—Type HD Jack Bar and SL assembly mounted on any type of condenser.
Stock No. 3721-1—Type HD or HDL Jack Bar mounted on condenser.
Stock No. 3507-1—Type TVH Jack Bar and SL mounted on condenser.
Stock No. 3930-1—Single Vacuum Condenser mount.
Stock No. 3930-2—Twin Vacuum Condenser mount.

NEUTRALIZING PLATES AVAILABLE IN FOUR TYPES, DESIGNATED N1, N2, N3, and N4.

N1—will neutralize the HY114, HK24, RK31, HK51, TW75, and similar tubes.
N2—will neutralize the 75T, 35T, 808, RK35, 852, and similar tubes.
N3—will neutralize the 801, T-7Z20, T-TZ40, RK18, HK154, 811, 812, T55, 100TH, 100TI, 806, 810, and similar tubes.
N4—will neutralize the 833, T200, 805, GL152, 838, 203A, RK52, and similar tubes.

Standard plate thickness in all models, 1/16". • Available on special order, 3/32" plates at 10% additional. • Special features. • Explanation: The type of each condenser designates its capacity and plate spacing as follows: CX100 indicates 100 mmfd. per section. • Letters A, B, C, or D denotes plate spacing: A—500", B—375", C—250", D—187". Following N# denotes Neutralizing plates.

"BABY" AIR INDUCTORS

(25 WATT RATING)

Just the thing for crowded layouts, portables, field transmitters! The smallest, most efficient, most practical 25-Watt coils ever available to amateurs. "BABIES" measure only 1 1/2" x 1 1/4", are made by a special B&W process which insures perfect air-spacing, maximum strength, fine appearance and ultra-high efficiency with an absolute minimum of insulating material. Available in five types, from 10 to 160 meters. Conservatively rated. Universal 5-prong Alsimag 196 bases. Net Any Type \$1.04

10M	MC	MEL	MCL	1.1	30

*Total effective capacity required to effect resonance on low frequency end of specified band.

"BABY" TURRETS

35-WATT RATING

These compact 5-band switching units cover amateur bands from 10 to 80 meters. They may be tuned in all types of service with any of the 50 mmfd. midjet condensers. Their sturdy construction and unique design assure permanent coil alignment and maximum efficiency with a minimum number of tubes. Four types—BTM, straight untapped BTCL, center tapped; BTPL, and linked and BTCL, center linked—provide vastly improved band-switching efficiency in low-power transmitters and exciter stages. Net, Any Type \$8.44

B & W PLUG AND JACK BARS

Made of high quality steatite. Ample size to insure excellent strength. They provide experimenters with the same units that are used in B & W Inductors. (Can also be used as spreaders for feeders and other parts of the antenna system.)

TEST EQUIPMENT

BARKER & WILLIAMSON • UPPER DARBY, PA.

B & W VFO EXCITER Model 500

Height: 10 1/2 inches.
Width: 22 inches. Depth:
17 inches. Weight: 62 lbs.

The result of two years of intensive development work! Now available to the discriminating amateur only because inherent weaknesses of variable frequency oscillators have been solved to a point of complete operating satisfaction. Output coupling reactance completely eliminated. Oscillator stability virtually unaffected by changes in line voltage of 25%. The B & W Exciter is in itself a low-powered transmitter and a deluxe exciter unit for the amateur who appreciates the highest degree of mechanical and thermal stability.

Model 502 VFO Available as Separate Unit

For the amateur who does not require the complete unit, the B & W model 502 VFO with calibrated dial is available separately and comes complete with full instructions for installation and operation. The VFO is capable of driving a 6L6 or similar tube to normal output as a straight amplifier or doubler.

FEATURES

- ±50 cycle stability and re-settability on calibrated logging scale.
- Logging scale calibrated in 24 divisions over 360 degrees. 2400 degrees band spread on log scale. All amateur bands accurately calibrated.
- Perfect keying, free from chirps and thumps.
- Maximum drift 2 cycles per megacycle per degree Fahrenheit.
- Multiplier unit provides output on 80, 40, 20, 15, 11 and 10 meter amateur bands. 807 stage provides maximum of 25 watts fundamental output on all bands.
- Oscillator reset for absolute frequency track.
- Relay equipped for remote operation.
- Self-contained power supply for VFO multiplier and 807 output stage.

MODELS

- Model 500—VFO Exciter as described, complete with power supply, cabinet and full instructions.
Model 501—VFO Exciter for rack and panel mounting.
Model 502—VFO complete with dial assembly and full instructions.
Model 503—VFO voltage regulated power supply.
Model 504—All band multiplier for use either with crystal or VFO.
PRICE ON APPLICATION

B & W SINE WAVE CLIPPER Model 250

Equipped with a pair of input terminals, a pair of output terminals, an output volume control and a selector switch.

Net Price: \$10.00.

Dimensions: 2" x 4" x 5 1/2".

SPEEDS ACCURATE ANALYSIS OF AUDIO CIRCUITS. SIMPLIFIES SELECTIONS OF COMPONENTS. SAVES VALUABLE TIME. Here's an instrument that will do most of the jobs usually assigned to a square wave generator costing about 10 times as much! The B & W Sine Wave Clipper provides a test signal particularly useful in examining the transient and frequency response of audio circuits. Designed to be driven by an audio oscillator, the clipper provides a clipped sine wave—hence the name "Sine Wave Clipper." Used in engineering work, repairs, or with equipment under development, it will quickly pay for itself many times over.

B & W FREQUENCY METER Model 300

Net Price: \$96.00.
Dimensions: 13 3/4" x 7 1/4" x 9 1/2".

An accurate and convenient means of making direct measurements of unknown audio frequencies up to 30,000 cycles. Integral power supply. Extremely useful for routine checking of audio oscillators or tone generators. Housed in an attractive black crackle finished steel cabinet with carrying handle and rubber feet.

FEATURES

- Frequency Range: 20 to 30,000 cycles in 6 ranges.
Sensitivity: minimum .5 volts input.
Wave Form: will operate on any wave form with peak ratios of less than 8 to 1.
- Calibration: when referenced against 60 cycle line frequency, all other frequencies will fall within 2%.

B & W NEW, SMALL BUTTERFLY VARIABLE CAPACITORS

TYPE JCX

Now — the popular B & W split stator, butterfly type of variable condenser construction has been adapted to small, compact units for general ham and other uses!

Having just 25% of the frontal area of CX types, these new B & W JCX Variable Capacitors are ideal for medium powered triode or tetrode stage plate circuit applications.

Featuring stainless steel shafts, heavy rounded aluminum plates and high quality insulating materials, the B & W Midget Butterfly will be a welcome addition for the amateur who is looking for peak efficiency in low and medium power transmitter stages.

"E" TYPE .125" AIRGAP

Type	Catalog Stock No.	Capacity Section in Series Max. Min.	Capacity Per Section Max. Min.	Mounting Length	Net Price

JCX50E	101	25 10	42 13	3 3/8"	6.75
JCX25E	102	16 8	25 10	2 3/4"	5.50

B & W AUDIO OSCILLATOR Model 200

Net Price: \$102.00.

Dimensions: 13 3/4" x 7 1/4" x 9 1/2".

Ideal for use in distortion measurements, frequency measurements or in any application where a stable, accurately calibrated source of frequencies between 30 and 30,000 cycles is required. No zero reset or line calibration is required. Self-contained power supply. Housed in an attractive black crackle finished steel cabinet with carrying handle and rubber feet. Panel is of 1/8" reverse etched aluminum.

FEATURES

- Voltage Output: 12.5 volts open circuit. 11 volts output on 500 ohm load.
Wave Form: RMS harmonics at 5 volts output on 500 ohm load, less than 1%. On open circuit (10,000 ohms up) approximately .5% on all frequencies between 50 and 15,000 cycles.
Frequency Response: better than ±1 D.B. from 30 to 30,000 cycles.
Stability: better than 1%.
Calibration: ±2.5%.

B & W DISTORTION METER Model 400

Net Price: \$127.50.
Dimensions: 13 3/4" x 7 1/4" x 9 1/2".

A sensitive instrument having a wide range of applications in the audio frequency measurements field. Ideal for measuring low level audio voltage and determining noise and harmonic content of same. Variable frequency selective filter provides a single frequency suppression circuit for the frequency range of 50 to 15,000 cycles. Small size, light weight and out-standing performance make this instrument an ideal unit for either laboratory or field work.

FEATURES

- Frequency Range: (a) Distortion meter. For fundamentals from 50 to 15,000 cycles, measuring harmonics up to 45,000 cycles. (b) As voltmeter and D.V. meter from 30 to 30,000 cycles.
- Sensitivity: (a) Noise and distortion measurements, minimum input .3 volts. (b) Voltmeter, full scale readings of .3, .1, .03, .01, .003 volts.
- Calibration: For distortion measurements: ±10%. For noise measurements: ±1 D.B. For voltage measurements: ±5%.

JAMES M MILLEN

MALDEN • MASSACHUSETTS

INSTRUMENT DIALS

The No. 10030 is an extremely sturdy instrument type indicator. Control shaft has 1 to 1 ratio. Veeder type counter is direct reading in 99 revolutions and vernier scale permits readings to 1 part in 100 of a single revolution. Has built-in dial lock and $\frac{1}{4}$ " drive shaft coupling. May be used with multi-revolution transmitter controls, etc., or through gear reduction mechanism for control of fractional revolution capacitors, etc., in receivers or laboratory instruments.

The No. 10035 illuminated panel dial has 12 to 1 ratio; size, $8\frac{1}{2}$ " x $6\frac{1}{2}$ ". Small No. 10039 has 8 to 1 ratio; size, 4" x $3\frac{1}{4}$ ". Both are of compact mechanical design, easy to mount and have totally self-contained mechanism, thus eliminating back of panel interference. Provision for mounting and marking auxiliary controls, such as switches, potentiometers, etc., provided on the No. 10035. Standard black finish, either size, flat black art metal.

No. 10039 \$ 2.70
 No. 10030 25.00
 No. 10035 6.00

PANEL MARKING TRANSFERS

The panel marking transfers have $\frac{1}{8}$ " black letters. Special solution furnished. Must not be used with water. Equally satisfactory on smooth or wrinkle finished panels or chassis. Ample supply of every conceivable word or marking required for amateur or commercial equipment.

No. 59001, white letters \$1.25
 No. 59002, black letters 1.25

R9'er MATCHING PREAMPLIFIER

The Millen 92101 is an electronic impedance matching device and a broad-band preamplifier combined into a single unit, designed primarily for operation on 6 and 10 meters. Coils for 20 meter band also available.

No. 92101, less tubes \$24.75

HIGH FREQUENCY TRANSMITTER

The No. 90810 crystal control transmitter provides 75 watt output (higher output may be obtained by the use of forced cooling) on the 10-11, 6 and 2 meter amateur bands. Provisions are made for quick band shift by means of the new 48000 series high frequency plug-in coils.

No. 90810, less tubes and crystals \$69.75

HIGH VOLTAGE POWER SUPPLY

The No. 90281 high voltage power supply has a d.c. output of 700 volts, with maximum current of 250 ma. In addition, a.c. filament power of 6.3 volts at 4 amperes is also available so that this power supply is an ideal unit for use with transmitters, such as the Millen No. 90800, as well as general laboratory purposes. The power supply uses two No. 816 rectifiers and has a two section pi filter with 10 henry General Electric chokes and a 2-2-10 mfd. bank of 1000 volt General Electric Pyralon capacitors. The panel is standard $8\frac{3}{4}$ " x 19" rack mounting.

No. 90281, less tubes \$84.50

NEUTRALIZING CAPACITOR

Designed originally for use in our own No. 90881 Power Amplifier, the No. 15011 disc neutralizing capacitor has such unique features as rigid channel frame, horizontal or vertical mounting, fine thread over-size lead screw with stop to prevent shorting and rotor lock. Heavy rounded-edged polished aluminum plates are 2" diameter. Glazed Steatite insulation.

No. 15011 \$3.15

RF POWER AMPLIFIER

This 500 watt amplifier may be used as the basis of a high power amateur transmitter or as a means for increasing the power output of an existing transmitter. As shipped from the factory, the No. 90881 RF power amplifier is wired for use with the popular RCA or G.E. "812" type tubes, but adequate instructions are furnished for readjusting for operation with such other popular amateur style transmitting tubes as Taylor T240, Eimac 35T, etc. The amplifier is of unusually sturdy mechanical construction, on a $10\frac{1}{2}$ " relay rack panel. Plug-in inductors are furnished for operation on 10, 20, 40 or 80 meter amateur bands. The standard Millen No. 90800 exciter unit is an ideal driver for the new No. 90881 RF power amplifier.

No. 90881, with one set of coils, but less tubes \$89.50

MALDEN · MASSACHUSETTS

SECONDARY FREQUENCY STANDARD

A precision frequency standard for both laboratory and production uses, adjustable output, provided at intervals of 10, 25, 100 and 1000 kc, with magnitude useful to 50 mc. Harmonic amplifier with tuned plate circuit and panel range switch, 800 cycle modulator with panel control switch. In addition to oscillators, multivibrators, modulators and amplifiers, a built-in detector with phone jack and gain control is incorporated. Self-contained power supply.

Model 90505, with tubes \$155.00

ABSORPTION WAVEMETERS

The 90600 series of absorption wavemeters are available in several styles and many different ranges. Most popular is kit of four units, covering range of 3.0 to 140 mc.

Model 90600 \$18.00

FREQUENCY CALIBRATORS

The cavity type frequency calibrator covers a range of 200 to 700 mc., with a maximum error of not over 0.25%. This range is covered by two plug-in cavity type tuning units, which may be easily interchanged. The calibrator consists of an accurately calibrated cavity-type tuning unit, a crystal detector, a two-stage video amplifier and a peak reading VT voltmeter.

Model 90630, with tubes \$375.00

SYNCHROSCOPES

The 5" synchrosopes are available with and without detector-video strips.

Model P-4, with tubes \$300.00

Model P-4E, with tubes 395.00

OSCILLOSCOPES

The basic type 2" oscilloscope is complete with power supply, focusing and centering controls and 60 cycle sweep, for use in normal form for transmitter monitoring or as basic unit for addition of specially designed external sweeps, amplifiers, etc., for specialized applications.

Model 90902, less tubes \$42.50

REGULATED POWER SUPPLIES

A compact, uncased, regulated power supply, either for table use in the laboratory or for incorporation as an integral part of larger equipments. 50 watts, with regulated voltage from 0 to 200 volts.

Model 90201, less tubes \$100.00

FREQUENCY SHIFTER

A favorite frequency shifter, plugs in, in place of crystal, for instant finger-tip control of carrier frequency. Low drift, chirpless keying, vibration immune, big band spread, accurate calibration.

Model 90700, with tubes \$42.50

50 WATT TRANSMITTER

Based on an original Handbook design, this flexible unit is ideal for either low power amateur band transmitter use or as an exciter for high power PA stages.

Model 90800, less tubes \$42.50

SHAFT LOCKS

In addition to the original No. 10060 and No. 10061 "DESIGNED FOR APPLICATION" shaft locks, we can also furnish such variations as the No. 10062 and No. 10063 for easy thumb operation as illustrated above. The No. 10061 instantly converts any plain $\frac{1}{4}$ shaft" volume control, condenser, etc. from "plain" to "shaft locked" type. Each to mount in place of regular mounting nut.

No. 10060	\$.36
No. 1006136
No. 1006245
No. 1006345

TRANSMITTING TANK COILS

A full line—all popular wattages for all bands. Send for special catalog.

DIAL LOCK

Compact, easy to mount, positive in action, does not alter dial setting in operation. Rotation of knob "A" depresses finger "B" and "C" without imparting any rotary motion to Dial. Single hole mounted.

No. 10050	\$.45
-----------------	--------

RIGHT ANGLE DRIVE

Extremely compact, with provisions for many methods of mounting. Ideal for operating potentiometers, switches, etc., that must be located, far short leads, in remote parts of chassis.

No. 10012	\$ 3.75
-----------------	---------

THRU-BUSHING

Efficient, compact, easy to use and neat appearing. Fits $\frac{1}{4}$ " hole in chassis. Held in place with a drop of solder or a "nick" from a crimping tool.

No. 32150	\$.05
-----------------	--------

FLEXIBLE COUPLINGS

The No. 39000 series of Millen "Designed for Application" flexible coupling unit includes, in addition to improved versions of the conventional types, also such exclusive original designs as the No. 39001 insulated universal joint and the No. 39006 "slide-action" coupling (in both steatite and bakelite insulation).

The No. 39006 "slide-action" coupling permits longitudinal shaft motion, eccentric shaft motion and out-of-line operation, as well as angular drive without backlash.

The No. 39005 is similar to the No. 39001, but is not insulated and is designed for applications where relatively high torque is required. The steatite insulated No. 39001 has a special anti-backlash ball and socket grip feature, which, however, limits its serviceable operation to torques of six inch-pounds, or less. All of the above illustrated units are for $\frac{1}{4}$ " shaft and are standard production type units.

No. 39001	\$.42
No. 3900242
No. 3900321
No. 3900542
No. 3900642

CATHODE RAY TUBE SHIELDS

For many years we have specialized in the design and manufacture of magnetic metal shields of nicoloi and mu-metal for cathode ray tubes in our own complete equipment, as well as for applications of all other principal complete equipment manufacturers. Stock types as well as special designs to customers' specifications promptly available.

BEZELS FOR CATHODE RAY TUBES

Bezel of cast aluminum with black wrinkle finish. Complete with neoprene cushion, green lucite filter scale and four "behind the panel" thumb screws for quick detachment from panel when inserting tube.

12000 and 16000 SERIES TRANSMITTING CONDENSERS

Rigid heavy channeled aluminum end plates. Isolantite insulation, polished or plain edges. One piece rotor contact spring and connection lug. Compact, easy to mount with connector lugs in convenient locations. Same plate sizes as 11000 series above.

The 16000 series has same plate sizes as 04000 series. Also has constant impedance, heavy current, multiple finger rotor contactor of new design. Both 12000 and 16000 series available in single and double sections and many capacities and plate spacing.

THE 28000-29000 SERIES VARIABLE AIR CAPACITORS

"Designed for Application," double bearings, steatite end plates, cadmium or silver plated brass plates. Single or double section .022" or .066" air gap. End plate size: 19, 16" x 11 16". Rotor plate radius: 3/4". Shaft lock, rear shaft extension, special mounting brackets, etc., to meet your requirements. The 28000 series has semi-circular rotor plate shape. The 2900 series has approximately straight frequency line rotor plate shape. Prices quoted on request. Many stock sizes.

DIALS

Just a few of the many stock types of small dials and knobs are illustrated herewith. 10007 is 1 5/8" diameter, 10009 is 2 1/2" and 10008 is 3 1/2".

I.F. TRANSFORMERS

The Millen "Designed for Application" line of I.F. transformers includes air condenser tuned, mica condenser tuned and permeability tuned types for all applications. Standard stock units are for 465, 1600 and 5000 kc. B.F.O. and Crystal Filter units also available.

JAMES M. MILLEN

MALDEN MASSACHUSETTS

TUBE SOCKETS DESIGNED FOR APPLICATION

MODERN SOCKETS for MODERN TUBES! Long Flashover path to chassis permits use with transmitting tubes, 866 rectifiers, etc. Long leakage path between contacts. Contacts are type proven by hundreds of millions already in government, commercial and broadcast service, to be extremely dependable. Sockets may be mounted either with or without metal flange. Mounts in standard size chassis hole. All types have barrier between contacts and chassis. All but octal and crystal sockets also have barriers between individual contacts in addition.

The No. 33888 shield is for use with the 33008 octal socket. By its use, the electrostatic isolation of the grid and plate circuits of single-ended metal tubes can be increased to secure greater stability and gain.

The 33087 tube clamp is easy to use, easy to install, effective in function. Available in special sizes for all types of tubes. Single hole mounting. Spring steel, cadmium plated.

Cavity Socket Contact Discs, 33446 are for use with the "Lighthouse" ultra high frequency tube. This set consists of three different size unhardened beryllium copper multi-finger contact discs. Heat treating instructions forwarded with each kit for hardening after spinning or forming to frequency requirements.

Voltage regulator dual contact bayonet socket, 33991 black Bakelite insulation and 33992 with low loss high leakage mica filled Bakelite insulation.

JAMES MILLEN

MALDEN · MASSACHUSETTS

CERAMIC PLATE OR GRID CAPS

Soldering lug and contact one-piece. Lug ears annealed and solder dipped to facilitate easy combination "mechanical plus soldered" connection of cable.

No. 36001—9/16".....	\$.21
No. 36002—3/8".....	.21
No. 36004—1/4".....	.21

SNAP LOCK PLATE CAP

For Mobile, Industrial and other applications where tighter than normal grip with multiple finger 360° low resistance contact is required. Contact self-locking when cap is pressed into position. Insulated snap button at top releases contact grip for easy removal without damage to tube.

No. 36011—9/16".....	\$.60
----------------------	--------

SAFETY TERMINAL

Combination high voltage terminal and thru-bushing. Tapered contact pin fits firmly into conical socket providing large area, low resistance connection. Pin is swivel mounted in cap to prevent twisting of lead wire.

No. 37001, Black or Red.....	\$.40
No. 37501, Low loss.....	.55

TERMINAL STRIP

A sturdy four-terminal strip of molded black Textolite. Barriers between contacts. "Non turning" studs, threaded 8-32 each end.

No. 37104.....	\$.60
----------------	--------

POSTS, PLATES and PLUGS

Designed for Application! Compact, easy to use. Made in black and red regular bakelite as well as low loss brown mica filled bakelite for R.F. uses. Posts have captive head.

No. 37202 Plates.....	\$.30
No. 37212 Plugs.....	.70
No. 37222 Posts.....	.40

STEATITE TERMINAL STRIPS

Terminal and ug are one piece. Lugs are Navy turret type and are free floating so as not to strain steatite during wide temperature variations. Easy to mount with series of round holes for integral chassis bushings.

No. 37302.....	\$.60
No. 37303.....	.70
No. 37304.....	.80

GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C.

FRAME: End Plates of 5/32" thick Isolantite.

SHAFT: 1/4" diameter, nickel plated brass.

PLATES: .020" thick aluminum, specially treated to remove burrs.

FINISH: Spacers, bushing nuts and screws nickel plated brass.

MOUNTING: Singles require one 3/8" hole in panel; Duals provided with four No. 4-36 screws in square brass tie rods. Trim-Air mounting posts or brackets fit both single and dual types. Singles are fitted with tapered nuts acting on split bushing for locking rotor shaft for fixed tune. Duals have rear shaft extension for coupling to other units and have a removable inter-section shield, on airgaps of .020 and .030.

Note: Single section Trim-Airs normally stocked with full length shaft for knob or dial. Stub shaft equivalents, with slot for screw driver adjustment only, available to order. "ZS" type singles have .040" thick plates with rounded buffed edges.

A NEW LINE OF CARDWELL MIDGET CONDENSERS FOR V.H.F.

PL-6113

PL-6076

Cardwell offers a new line of 90 degree condensers with butterfly rotor plates, fulfilling a demand created by engineers and amateurs since the publication of an article "Stabilizing The 144 Megacycle Transmitter" in April, 1946 "QST." Also see pages 351 to 353 inclusive in the 1946 ARRL Radio Amateurs Handbook. PL-6113 and PL-6076 are specified in these articles. Features of these 90 degree midget condensers are as follows:

Electrical Symmetry
Low Distributed Inductance.

Non-Moving Contacts.

Plates easily removable to change capacity range.

Isolantite Insulation.

Single Hole Mounting.

Small Size; 1 7/16" x 1 13/32" per general outline dimensions

for differential "Trim-Airs" as shown on Page 6 of Catalog No. 46.

These condensers are made to fit all standard Cardwell "Trim-Air" hardware.

Note maximum and minimum capacity values shown are measured from stator-to-stator and are effective values as used when a coil is connected stator-to-stator, with rotor floating.

CARDWELL CONDENSERS

THE ALLEN D. CARDWELL MANUFACTURING CORPORATION

STANDARDS OF COMPARISON

MIDWAY TRANSMITTING CAPACITORS

The Midway is ideal for low and medium power transmitters for portable Mobile and aircraft equipment, due to its light weight, compact size and extremely sturdy construction. Incorporates original patented features of the larger "X" type standard transmitting condenser.

MT-100-GD PL-7030
with PL-5051 Mtg. Brackets

GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C.

FRAME: All aluminum end plates and tie rods.

SHAFT: 1/4" C.R. steel, cadmium plated.

PLATES: .025" aluminum. On sizes having airgap of .070" or over, plates have rounded edges, buffed to minimize corona loss.

BEARINGS: Brass, nickel plated shoulder type front bearing with ball thrust rear bearing.

INSULATION: Mycalex.

MOUNTING: 3 point front panel mounting by means of 3 screws and hex. posts. Two aluminum mounting feet with screws, Cardwell Part List No. 5052 for regular chassis mounting, provided instead, if so ordered. Type "M" special brackets (Part List No. 5051) permit inverted mounting.

"N" TYPE TRANSMITTING CAPACITORS

Designed for medium power high frequency transmitters and short wave therapy apparatus, the Cardwell "N" series maintains the customary high standard of Cardwell construction, yet eliminates closed circuit loops completely.

NP-35-DD
PL-7107

GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C.

FRAME: Improved aluminum end plates support heavy lateral ceramic insulating bars which carry the stators.

SHAFT: 1/4" diameter cadmium plated steel.

PLATES: Aluminum, .040" thick, with rounded edges. PL-7106 and 7116 have buffed and polished edges. PL-7105 has .025" thick plates, buffed and polished edges.

BEARINGS: Cordwell shoulder type front bearing, with ball thrust rear bearing.

MOUNTING: Can be single hole mounted, or by three mounting posts and screws, to front panel. Chassis mounting on feet which form part of end plates, or use Cardwell "M" brackets, Cardwell part No. 301, for inverted mounting, for lowest stator-to-ground capacity.

CARDWELL CONDENSERS

THE ALLEN D. CARDWELL MANUFACTURING CORPORATION

STANDARDS OF COMPARISON

V.H.F. OSCILLATOR KIT

PL-20,024

LIST PRICE

\$18.00

Less 6-F-4 Tube

This kit includes 3 sets of coils covering 144-148 mc., 220-225 mc., 420-450 mc. bands. (The 6F4 tube is not included.) Ideally suited for local oscillator, for super-heterodyne receiver,

as plate modulated oscillator for low power transmitter or transceiver, driver unit for amplifier tube in higher powered transmitter, V.H.F. signal generator, etc., etc.

CARDWELL PRECISION CAPACITOR

Type PL-24,050

Designed for frequency meters requiring maximum mechanical and electrical precision. Type No. 4,080 gear and worm driven capacitor incorporates special design features representing years of research and usage of this component in special measurement equipment which has successfully withstood most rigorous usage our armed forces could give it.

Frequency Meter Condenser
PL-24,050

CAP. RANGE: Max. Cap. 220 mmfd., Min. Cap. 21 mmfd.
PLATE SHAPE: S.L.F.
DI-ELECTRIC SUPPORTS: Steatite.
BACKLASH: Negligible.
RESETTABILITY: To 10 parts in one million.
GEAR DRIVE: Precision split worm gear, equipped with precision ball bearings. Ratio—100 : 1 over 360 degrees.
DIALS: 3" DRUM: 50 divisions over 180° condenser rotation. 3" FAST RUNNING DIAL: Graduated 100 divisions, makes 1 revolution for each drum division. VERNIER RING: Divides each division on fast running dial into 10 parts.
DIMENSIONS: 5 5/8" lg. (over drum dial) x 3 1/8" deep x 3 1/8" high.
WEIGHT: 1 3/4 lbs. (with cast aluminum frame).
ROTOR CONTACT: Silver plated phosphor bronze spring, with 2 silver contacts bearing on silver plated disc.
MOUNTING: 3 point, to bottom of main casting.
PRICE: Capacitor, PL-24,050, Type 4,080, only.....List \$95.00
Drum DialList \$ 5.95
Fast Running DialList \$12.75
Vernier RingList \$ 2.50

TYPE "P" LIGHT HEAVY WEIGHT TRANSMITTING CAPACITORS

Designed to accommodate capacitance values up to 150 mmfd. per section in a dual section type having an airgap of .500", the "P" type construction permits higher capacity for a given airgap, and therefore a shorter frame than the "T" type construction. Typical Cardwell sturdiness is built-in, and the "P" type is probably the lightest transmitting condenser built for its size, yet completely satisfactory for heavyweight use. No single section types are catalogued; parallel or series connect for double or half single section capacity listed in table.

PK-125-QD
Special

GENERAL SPECIFICATIONS:

FRAME: End plates are 1/8" thick formed aluminum, satin finish.
SHAFT: 3/8" diameter, non-magnetic stainless steel, extended both front and rear end.
PLATES: .064" thick, rounded and buffed edges. Rotor plates are 3/4" in diameter.
BEARINGS: Heavy nickel plated brass front and rear shoulder bearings.
ROTOR CONNECTION: Heavy, two finger N.P. phosphor bronze wiper bears on 1/8" thick N.P. brass contact ring, at each end.
STATOR CONSTRUCTION: Plates permanently staked into slotted, rounded edge aluminum stator blocks.
INSULATION: Mycalex (glass bonded mica).
MOUNTING: 3 clearance holes for No. 10 screws in each side of each end plate permitting mounting on any side, as well as provision for mounting associated components such as inductance coil mountings, etc.

STANWYCK COILS

I.F. - ANT. - R.F. - F.M. - OSCILLATOR COILS

"Precisely made for Precision Performance"

Mfrd. by STANWYCK WINDING CO. •

No. S-102—This is a standard 455 kc. I.F. transformer, compression tuned for general replacement and new set construction — particularly suited for small receivers. Coils wound of 3/41 Litz wire. It is also ideal for experimental work because good design and careful engineering provide greater I.F. gain. Double tuned with low-loss steatite base trimmers. Aluminum shield can is 1 1/4" x 1 1/4" x 2 1/2". Generous leads RMA color coded. Wax impregnated.
List Price \$1.60

I.F. TRANSFORMERS

No. S-103—455 kc I.F. transformer, same as S-102 except with iron core underneath windings. This has greater gain and sensitivity than No. S-102, air core.
INPUT \$1.80

No. S-104—455 kc I.F. transformer, same as S-103.
OUTPUT \$1.80

No. S-115—Tapped regenerative I.F. transformer 455 kc. For use where the application calls for a single I.F. coil with high sensitivity and good selectivity. Sensitivity of 140 MV and band widths of 7.5 kc at 2 times in a normal operating condition. Mounted in standard aluminum cans, 1 1/4" sq. x 2 1/2" long.
List Price \$1.80

No. S-108—455 kc I.F. (solid wire). Where the requirements call for economy plus moderate gain these coils give ample performance. Wound with solid wire they are extremely stable and may be interchanged as first or second I.F. Mounted in aluminum cans 1 1/4" sq. x 2 1/2". Wax impregnated.
List Price \$1.40

IRON CORE TUNED OSCILLATOR COILS

No. S-230 Broadcast Oscillator. An unusual type of midget coil with many desirable features. Iron core tuned, it permits adjustment of any one condenser section used in commercial variables. High range of inductance variation permits use of coil in a variety of equipment. Low distributed capacity allows for excellent tracking and also for overlapping both high and low ends of the band, providing extended coverage. Mounts with either threaded bushing or bracket. Tinned lugs, thoroughly protected against humidity by wax. Coil from 1 1/2" long x 7/8" O.D. List Price \$1.00

BROADCAST R.F. COILS

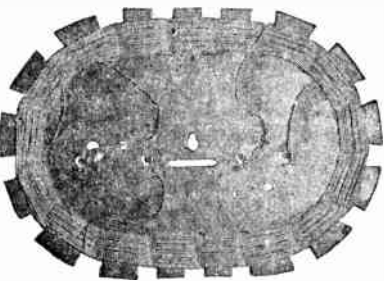

No. S-302 R.F. Coil with adjustable iron core. High impedance primary matches the plate impedance of most R.F. tubes providing maximum gain. Selectivity and sensitivity are excellent throughout the entire range. High "Q" iron core permits adjustment for most commercial variable condensers. Range of coil sufficient to allow for excellent tracking with other coils in the set. Range 535 to 1720 kc.
List Price \$1.00

BROADCAST ANTENNA

No. S-409 Broadcast Antenna with adjustable iron core. An unusual type of miniature coil both mechanically and electrically of superior construction. The heavy duty threaded bushing allows for mounting in any position where a hole is available, allowing for flexibility of set design. Bracket mounting is also available. "Q" is unusually high for a coil so small. Gain is excellent throughout entire range and may also be adjusted for any size variable condenser. Multi-Strand Litz wire is used for maximum reception 535 to 1720 kc. Coil form 1 3/4" long x 7/8" O.D. List Price \$1.00

BROADCAST LOOPS

No. S-501—A basket wound loop antenna of excellent design wherein the leads may be rearranged in various positions for adjustment and balancing of capacity. Overall dimensions 3 1/2" to 6". For 365 mmfd variable condenser.
List Price \$0.85

MIDGET LOOP

No. S-513—Size 4" x 5 1/4".
List Price \$0.75

NEW MIDGET I.F.

for SMALL RECEIVERS AND PORTABLES

No. SM-107—Standard iron core 455 kc Midget I.F. transformer, compression tuned. For general replacement and new set construction. Exceptionally high gain due to specially designed powdered iron cores. Particularly suitable for the new, very small receivers and portables. In cans 3/4" sq. x 1 7/8" long.

List Price \$1.65

F.M. COILS

FM DISCRIMINATOR. No. SFM-601—The electrically centered secondary results in perfect symmetry between positive and negative peaks.
List Price \$3.65

FM I.F. COILS. No. SFM-602—Mechanically and electrically they are the ultimate in present day FM design. List Price \$3.25

• Send for COMPLETE Catalogue •

UNIVERSAL ADJUSTABLE COILS

These Adjustable - Inductance Ferrocart (iron-core) coils will replace the Broadcast band coils in practically any receiver. It is no longer necessary to order hard-to-get "exact duplicates" when an Antenna, R.F., or Oscillator coil requires replacement.

Continuously variable in inductance over a wide range, these coils will accurately "track" with the other coils in the receiver when properly adjusted. The exact inductance of the old coil is easily matched by a simple screwdriver adjustment, regardless of the value of the tuning condenser. Ferrocart iron cores used in these coils add gain and selectivity to the receiver. The oscillator coil provides complete adjustment for intermediate frequencies between 175 and 520 kc. May be used in either "cut-plate" tuning condenser or padded circuits. Available shielded or unshielded, furnished with complete instructions. Shields are black crackle finish, 1 3/4" square by 2 1/2" high.

14-8418	For 1/2" O.D. Coil	.28

STANDARD ANTENNA R. F. COILS

Standard type air-core coils of superior construction, designed to cover the Broadcast band from 545 to 1580 kc (190 to 550 meters) with a 365-mmfd. tuning condenser. These coils make excellent replacement units and are used as original parts by discriminating set-builders and experimenters in the design and construction of Broadcast receivers.

All coils have high-impedance primaries, wound with Litz wire, fully protected against humidity. Shielded coils are in black crackle-finished non-magnetic cans, 1 3/4" diameter by 2 1/2" high.

DOWEL TYPE PRIMARY

Popular replacement for burned out primaries in high impedance antenna coils. Universal wound on 1/2" diam. by 1/2" long dowels moisture protected. Inductance 1700 uh.

No. 14-6865 List Price..... .42

MAJESTIC REPLACEMENT

Exact duplicate of original assembly. Coil only, without can or trimmer. Exactly replace defective burned-out units. Used in 2nd I. F. Number 10233 or 11014 of the popular Majestic model 460.

No. 20-3457 List \$1.39

STANDARD OSCILLATOR COILS

High-quality Broadcast band oscillator coils designed for use with any of the Antenna and R. F. coils listed above, using a 365-mmfd. tuning condenser. Frequency coverage is 545 to 1580 kc; units are provided for all popular intermediate frequencies.

Coils are mounted on bakelite base with tinned soldering lugs for connections. Unshielded coils have single-hole stud mounting. All coils are thoroughly impregnated to resist severe climatic conditions. Shielded coils are in cans, 1 1/2" diameter by 1 3/4" high, black crackle finish.

"PLASTIC" I. F. TRANSFORMERS

Particularly suitable for use in small receivers, where space is at a premium and yet superior performance is required, these remarkable transformers are only 1 1/4" square and 2 1/2" high! Made in a complete series of frequency ranges and positions, they will provide results second to none in any type of receiver.

The one-piece molded plastic coil-form and trimmer-base eliminates many separate parts that were required with other types of construction. The assembly is, therefore, simpler and more rigid. The iron core series are highly recommended for use in compact receivers and auto sets where only one I-F stage is permitted. It is not recommended that they be used in a two-stage system because of their high-gain which would cause instability and oscillation.

Iron-Core "PLASTIC" I-F Transformers, List Price Each \$2.08

CARTWHEEL I. F. TRANSFORMER

A brand new, ultra-compact, unshielded I-F Transformer, complete with dual trimmers; finds useful application in many types of compact AC-DC or Midget type receivers. Only 1 3/8" by 1 1/2" by 1 1/4" high; one-piece molded plastic trimmer base; for 456-kc only.

No. 16-6661 List Price \$1.39

STANDARD I. F. TRANSFORMERS

The Meissner series of Air-Core I. F. Transformers has been accepted as "standard" for general replacement purposes. Gain characteristics have been designed to correspond closely with average values found in the majority of commercial receivers. All transformers are double-tuned with ceramic-base, mica-dielectric trimmers. Windings of high-grade Litz wire are fully impregnated. Well-insulated RMA color-coded lead wires. Black crackle-finish shield is 1 3/8" square by 3 1/2" high.

No.	Freq. Range	Peak Factory Setting	Use
16-5700	121-235	175	Input
16-5702	121-235	175	Output
16-3731	121-235	175	Output C. T.
16-5704	220-360	262	Input

16-5712	425-650	456	Input
16-6133	435-1000	456	Interstage
16-5714	425-650	456	Output
16-3736	255-550	456	Output C. T.

List Price Each \$2.08

FERROCART I. F. TRANSFORMERS

Designed primarily as original parts in high-gain receivers of superior quality, these transformers find consistent application in stepping up the performance of old receivers. The special powdered-iron "Ferrocart" core used in the coils permits higher "Q" with resultant increase in selectivity and gain. All units are double-tuned with ceramic-base, mica-dielectric trimmers. Windings are of high-grade Litz wire, thoroughly impregnated. Shield is black crackle finish, 1 3/8" square by 3 1/2" high.

No.	Freq. Range	Peak Factory Setting	Use
16-5728	127-206	175	Input
16-5730	127-206	175	Output
16-5740	360-600	456	Input
16-5742	360-600	456	Output

List Price Each \$2.78

The result of years of engineering experience in designing high grade transformers for the finest commercial receivers! The exacting requirements of modern high-fidelity and communications type receivers demand units that can be depended upon under any and all conditions. They must be absolutely stable under temperature and humidity variation and unaffected by vibration. These requirements are all met by

the "Align-Aire" I-F Transformer! Provides 3600 degrees of micrometer smooth trimmer adjustment instead of the usual 180 degree rotation! Accurate trimming can thus be readily accomplished. Available with special "Iron-core" design for maximum gain and selectivity. Double-tuned and offered in a complete range of frequencies for any application. Shield cans are black crackle finish, 2"x2"x1 3/4".

No.	Frequency Range (kc)	Gain		Selectivity Band Width			Use

16-6139	415-510	456	100	9.5	23.2	33.5	Output C.T

LIST PRICE, EACH \$6.95

AIR-CORE R-F CHOKES

Accurately wound and individually tested; coils wound on specially treated forms, mounted on bakelite terminal base and thoroughly moisture proofed. Available in shields or without, both single-hole mounting. Shielded chokes have terminals thru top of can so unit may be mounted on inside wall of chassis. Shields are black crackle finish, 1 1/2" dia.

PHONO-OSCILLATOR COIL

For use in building either wireless or direct-connected phonograph-oscillator units for record reproduction through the radio receiver. Knob adjustment permits selection of clear frequency in the broadcast band. Coil is in black crackle shield, 1 3/8" square by 3 1/2" high.

No. 17-9373 List \$2.78

B. F. O. COIL

For use with standard I. F.'s in superhet receivers. They supply the "beat" note necessary to reception of C. W.;

materially aid in tuning and locating weak stations. Mica trimmed. Freq. Range 290-650 KC. Peaked at 456 KC. in 1 3/8" sq. x 3 1/2" h. can with knob for pitch control.

No. 17-6753 Net Price \$1.47

F. M. COILS—I. F. TRANSFORMER

Permeability tuned; designed for use on newly assigned F. M. Frequencies. Mounted in 1-7/16" x 7/8" x 1-29/32" can. Tuned to 10.7 mc.

No. 16-6665 List Price \$3.75

DISCRIMINATOR TRANSFORMER

Mounted in same size can as I.F. Transformer listed above. Permeability tuned to 10.7 mc.

No. 17-3484 List Price \$5.00

NEW MEISSNER "ANALYST"

THE MODERN SERVICE INSTRUMENT—Undoubtedly the most modern complete servicing instrument on the present day market. Handles the re-works of yesterday, today and tomorrow — with equal efficiency and facility! Entirely fundamental in its testing procedure. Will never become obsolete. **SAVES TIME — SAVES MONEY**—The use of the new Meissner ANALYST will not only permit you to make more money by handling a greater number of service jobs in a given time but it will give you additional assurance that these jobs will "stay sold." **SERVICES BY "SIGNAL TRACING"**—The new Meissner ANALYST tests receivers and locates faults by the "Signal tracing" method — proven to be the fastest and most reliable method known at the present time. It is NOT, however, just another signal tracer! It is completely equipped with all devices that might be needed to make simultaneous checks on various parts of the receiver circuit; provide as many different functions; all controls are accurately calibrated with functions clearly indicated.

Five separate and distinct "channels" provide as many different functions; all controls are accurately calibrated with functions clearly indicated.

Complete—Ready to Go to Work

The new Meissner ANALYST is completely wired, aligned and laboratory tested. Furnished complete with a full set of 12 tubes, it is all ready to be put into service the minute it is unpacked and connected to the 110 volt line! No alignment or adjustments are necessary—just read the instructions, hook it up and go to work!

Complete Book of Instructions, supplied with the new Meissner ANALYST, gives detailed directions for use of this instrument in locating all kinds of radio troubles. No. 9-104#—New Meissner ANALYST, complete with tubes, prods, and Instruction Book; ready to operate. Net Price.....\$113.85

MANUALS

I. F. REPLACEMENT MANUAL

This manual has 254 pages listing 9,981 models made by 224 manufacturers. Every superheterodyne made on which data could be obtained is listed by name, model number, original part number and factory peak frequency, and recommended replacement. Will be a great help to any service man.

I-F Replacement Manual. Price \$0.35

"HOW TO BUILD MANUAL"

Contains 168 pages of material including Charts, formulas, Theory of coils and circuit applications, Treatise on Frequency Modulation, Schematic and Pictorial wiring diagrams of Receivers, P. A. Tuners, Test equipment, Amateur Gear.

Instruction Manual Price \$0.50

SIGNAL CALIBRATOR Precision Frequency Standard

100 KC, 50 KC and 10 KC "markers" up to 20,000 KC — Push-button control of frequency — Delivers modulated or unmodulated signal — Easily set . . . Instantly checked — Well ventilated cabinet — Precision accuracy

The Model 9-1076 Signal Calibrator is designed to operate from a 115 volt, single phase, 50/60 cycle AC power source. The power required is approximately 40 watts. The Model 9-1076 Signal Calibrator is a portable self-contained unit designed to

generate extremely accurate "marker" signals over the RF range of 10 KC to 20,000 KC. The "Signal Calibrator" is a secondary frequency standard against which unknown frequencies may be checked and accurately determined. The Signal Calibrator provides the means for checking and adjusting radio transmitters, radio receivers, laboratory equipment etc., as follows:

A. To accurately adjust the radio transmitter to a desired frequency.

B. To accurately adjust the radio receivers to a desired frequency.

C. To accurately measure and determine the unknown frequency of an incoming signal.

The Model 9-1076 Signal Calibrator may also be used as a signal source for work on the test bench in servicing radio receivers and associated equipment. Component parts are mounted on a single chassis to which the front panel is attached. Located on the front panel are all controls required in the operation of the unit. The function of each control is clearly designated on the front panel.

The Signal Calibrator is housed in a steel cabinet, 8 1/4" wide, 8 1/4" high and 12 1/4" deep. The cabinet is finished in durable black wrinkle enamel.

The instrument incorporates a precision type, quartz crystal operating on 100 KC. This crystal is easily adjusted, by front panel control, to exact frequency as determined by "beat" against the Bureau of Standards station, WWV, or against other stations of known accuracy in frequency. Two multi-vibrators provide output on 50 KC, 10 KC and multiples thereof up to 20,000 KC.

The output signal, produced by the Signal Calibrator, may be amplitude-modulated if desired. Modulation, at 60 cycles per second, is controlled by the front panel "Modulation" control.

The tube complement of the Model 9-1076 Signal Calibrator is as follows: 3 type 6XJGT, 2 Type 6N7GT, 1 Type 6BK7GT and 1 Type 6X5GT.

No. 9-1076—Signal Calibrator, Complete with tubes.....Net Price \$78.75*

Miller

ALL WAVE INTERFERENCE FILTER

These filters are designed to eliminate radio interference caused by small household appliances such as sewing machines, vacuum cleaners, food mixers and other similar devices requiring less than 150 watts. Inductive-capacitive circuit assures maximum attenuation of interference.

Dimensions: 2 1/2" square x 4" long.

Cat. No.	Volts	Watts	List Price
7818	115	150	\$7.00

APPLIANCE FILTER

Similar to the Cat. No. 7818, except would with larger wire to be used with all types of plug-in devices with power requirements up to 550 watts.

Dimensions: 2 1/4" square x 4" long.

Cat. No.	Volts	Watts	List Price
7815	115	550	\$7.00

GENERAL PURPOSE FILTER

This filter is recommended for use with marine and D.C. appliances and radios. It is also for use with extremely noisy A.C. appliances. A good, permanent connection to ground should be used with this filter.

Dimensions: 2 1/2" square x 5" long.

Cat. No.	Volts	Watts	List Price
7813	115	200	\$7.50

INDUSTRIAL FILTERS

Miller industrial filters are designed for use with all types of radio interference producing devices. Duo lateral wound chokes and non-inductive condensers result in a high degree of noise attenuation. Completely sealed in metal cases having provision for standard junction boxes at each end of the case.

Dimensions: 9-3 42" x 6-1/2" x 5" high.

Weight: 16 lbs. Approx.

Cat. No.	Volts	Amps.	List Price
7841	220	5	\$30.00
7842	220	10	32.50
7843	220	20	35.00
7844	220	30	37.50
7845	220	40	40.00

LINE FILTER CHOKES

All Miller line filter chokes are duo-lateral wound on ceramic forms (except #7825 & D-7825 are on bakelite). They are for installation in noise producing equipment such as flasher signs, farm lighting plants, motor generators, etc. Also used with radio transmitters to prevent r.f. energy feed-back into the power circuits. Typical circuit diagrams are supplied with each choke. Always select chokes having a current rating at least as high as the maximum current load of the circuit to be filtered.

SINGLE LINE FILTER CHOKES

For use in filtering individual and branch circuits.

Dimensions: #7825 1-7/8" x 1-3/4"

Others: 2-1/2" x 4"

Cat. No.	Amps.	Ohms.	MH	List Price
7825	2	.75	.60	\$1.50

D-7828	20	.08	.20	8.00
D-7829	30	.05	.13	9.00

Specifications are for each winding.

TOWER LIGHTING CHOKES

Similar in construction and size to the D-7825, except of 2-pi construction and recommended for use in the circuits of obstruction and warning lights of antenna towers.

Cat. No.	Amps.	Ohms.	MH	List Price
7870	5	.56	1.20	\$6.00
7871	10	.30	.75	7.00
7872	20	.17	.45	8.00

RECTIFIER HASH FILTER CHOKES

Duo-lateral wound chokes for use in series with the plate loads of mercury vapor rectifiers to prevent r.f. hash feed-back.

The single chokes are insulated for use up to 10,000 volts to ground. The dual choke is insulated for 2500 volts plate to plate. Wound on Alsimag forms with two hole mounting brackets.

Dimensions: 2" dia. by 2-3/8" high.

Cat. No.	MH	Ohms	MA	List Price
7867	4.50	4.5	500	\$2.00
7868	2.75	2.3	1000	2.50

Dual Choke Dimensions: 1-1/4" Dia. x 1-3/4" high

7865	3.25 (per Coil)	15	250	1.50
------	-----------------	----	-----	------

HIGH TENSION FILTER CHOKES

These chokes are used to prevent radio interference caused by high tension (secondary) circuit neon sign animators and lead radiation of border tubing. The chokes are sectional wound and enclosed in weatherproof bakelite cases. They are insulated for 15,000 volts and continuous current operation up to 100 milliamperes. Designed for ease of installation and trouble-free service.

Circuit diagram supplied with each choke.

Dimensions: 1-3/8" dia. x 3-1/4" high.

Cat. No.	Volts	Amps.	List Price
7875	15,000	.1	\$2.50

ELECTRIC SHAVER FILTER

Carefully designed and constructed, this filter is the inductive-capacitive type and requires no ground connection.

Shock-proof moulded rubber construction. For use with all electric shavers. Fully guaranteed.

Dimensions: 1-1/8" dia. x 3" long.

Cat. No.	Volts	Watts	Finish	List Price
7817	115	50	Black	\$2.50
7817-1	115	50	Ivory	2.50

RADIO INTERFERENCE FILTER CONDENSERS

Highest quality non-inductive wound paper dielectric condensers manufactured for use with Miller Filters and Filter chokes. These condensers are rated at 220 volts AC or DC and are designed to withstand surges up to 1000 volts. Uncased type for installation within the equipment. Wax impregnated and sealed.

Maximum operating voltage—220 AC.

Cat. No.	Capacity	Dimensions	List Price
7803	2 x 2. Mfd.	1-7/8" x 1-1/4" x 4-1/2"	\$4.50
7804	2. mfd.	1-7/8" x 3/4" x 3-1/2"	2.50

FLUORESCENT LIGHT FILTER CHOKES

Radio interference generated by fluorescent lights and tubing may be prevented from getting into the supply line by the use of these filter chokes. Chokes are installed as close to the ballast as practical. Complete instructions are supplied with each choke.

Dimensions: 1-1/4" dia. x 1-1/2" long.

Cat. No.	Volts	Watts	List Price
7876	220	20	\$1.50
7877	220	40	1.50
7878	220	80	1.50
7879	220	160	1.50

FILAMENT CHOKE

Enclosed solenoid wound chokes for use in the filament and vibrator circuits of battery operated receivers, transmitters, etc.

Dimensions: 3/4" Dia. x 1-7/8" long, plus 3" leads.

Cat. No.	uH	Ohms	Amps.	List Price
5221	10	.02	8	\$.60

PHONO SCRATCH FILTER

The Miller Phono Scratch Filter is designed to reduce needle and surface noise and may be used with any type of high impedance phonograph pick-up. The resonant frequency of the parallel tuned circuit is adjustable between 2000 and 3000 cycles. The attenuation is approximately 22 db. Assembled in an aluminum shield with two mounting brackets.

Dimensions: 1-3/8" x 1-7/8" x 3" high.

Cat. No.	Item	List Price
EL-59	Scratch Filter	\$7.50

TV POWER TRANSFORMER (R.F.)

These R.F. power supply transformers for use with television receivers and cathode ray oscilloscope make it possible to construct an inexpensive source of high voltage D.C. Two types are available, the #4525 for voltages to 4000 DC and the #4526 for voltages to 10,000 DC (or 30,000 DC in a voltage rectifier tripler circuit). Type 1B3-GT tubes are used as rectifiers and the R.F. oscillator circuit uses one or more type 6V6 or 6Y6 tubes connected in parallel.

The high frequency AC source permits use of simple and inexpensive resistive capacitive filters with low ripple content in the output. Typical circuit diagrams are supplied with each coil.

Cat. No.	Item	List Price
4525	H.V. R.F. Trans. (to 4 KV)	\$7.50

10 K. C. FILTERS

This filter is used to eliminate the 10 KC heterodyne 'whistle' present in high fidelity broadcast receivers. It is used in the detector load circuit of a diode or infinite impedance detector. The 10,000 cycle attenuation is approximately 30 db. The filter consists of a parallel resonant circuit with an iron core coil and a variable condenser providing a tuning range from 7500 to 12,000 cycles.

Dimensions: 1-3/8" sq. x 2-1/4" high.

Cat. No.	Use	List Price
EL-58	10 KC Filter	\$6.00

This band elimination circuit 10,000 cycle filter has sharper cut-off characteristics than our type EL-58. It should be connected in the plate circuit of a triode audio stage. The cut-off frequencies are 9000 and 11,000 cycles. The load resistance R is 10,000 ohms. The attenuation is approximately 30 db. Recommended for general use with any high fidelity broadcast band receiver.

Dimensions: 1-3/8" x 1-7/8" x 2-7/8" high.

Cat. No.	Use	List Price
EL-60	10 KC Filter	\$12.50

PHONO-OSCILLATOR COIL

The Miller Phono-Oscillator coils are permeability tuned and are assembled in an aluminum shield, together with the grid coupling condenser and resistor. The tuning range of the coil is from 540 to 700 KC, by core adjustment. A typical circuit diagram is supplied with each coil.

Dimensions:	Use	Freq. Range	List Price
1-7 16" square	x 2-1/2" high.		
522 Phono-Oscillator	540-700 KC		\$3.00

Miller

REPLACEMENT I. F. TRANSFORMERS

(Double Tuned)

These transformers are an essential part of the stock of every serviceman and dealer. In many cases they will give better performance than the original transformer. All have been pretuned and should require only slight adjustment after installation. Leads are color coded, and the transformers are assembled in aluminum shields. These transformers may be used as replacements in most makes of receivers using transformers of the same physical size. Be sure to order a transformer of the correct frequency.

Dimensions: 1-3/8" square x 2-5/8" high.

UNIVERSAL REPLACEMENT COILS

(Permeability Tuned)

This series of variable inductance iron core coils are well suited for general replacement use and new designs. The inductance may be adjusted to cover the standard broadcast band with tuning condensers having a maximum capacity of between 250 and 450 mmfd. The oscillator coils may be used with any I.F. amplifier operating in the 100 to 550 KC range. Complete instructions are supplied.

UNSHIELDED

DE-LUXE BROADCAST COILS

These coils are used in the finest quality receivers for lasting performance and stability. All coils are wound on XXX grade bakelite tubing and the secondaries are Litz wire wound (except oscillator coils) for maximum "Q". The antenna and R.F. coils are inductive-capacitive coupled for uniform gain. For use with standard 365 mmfd tuning condensers.

SHIELDED COILS

LOOP ANTENNA

Using the patented "Air Loop" construction, the No. 705-A Loop Antenna provides high "Q" on 1 mechanical rigidity. The loop as supplied has a secondary inductance of 253 microhenries, which may be reduced as needed. Instructions are supplied. May be used in older sets to replace the antenna coil for local reception without an antenna.

Dimensions: 8-1/8" 5-3/8" x 1/8" thick.
*Mfg. under Franklin Airloop Co. Pat. = 2,401,472

Cat. No.	Use	Frequency	List Price
703-A	Loop Antenna	540-1700 KC	\$1.75

STANDARD BROADCAST COILS

High gain general purpose coils featuring high impedance coupled antenna and R.F. units with progressive wound Litz wire secondaries (except oscillator coils). For use with standard 365 mmfd. tuning condenser. All windings are thoroughly impregnated with tropicalized R.F. lacquer.

SHIELDED COILS

ALL WAVE TEST OSCILLATOR COILS

A set of high quality coils for use in building an electron coupled test oscillator. A 2-gang 365 mmfd. condenser with sections connected in parallel is required. The fundamental frequency range, in five bands, is from 50 KC to 20 MC. The low frequency coil is unshielded, the other coils are in two shields measuring 1-3/4 square x 3" high.

Cat. No.	Use	Frequency	List Price
T-550	Test Oscillator	50-20,000 KC	\$7.50

LOOP ANTENNA WAVE TRAPS

These traps are designed especially for use with receivers having built-in loop antenna. Similar in construction to our Series 811, except with a separate low inductance winding which is to be connected in series with the loop antenna of the receiver. Slight readjustment of the loop tuning circuit after the trap has been installed is desirable. Trap circuit is parallel connected.

Dimensions: 1-3/8" square x 1-3/4" high.

Cat. No.	Band	KC Range	List Pr.
815-X1	I.F. & Commercial	250-500	\$1.50

815-B	Amateur	80 Meters	1.50

SHIELDED WAVE TRAPS

Parallel resonant wave traps assembled in aluminum shields are well suited for use in older types of radio receivers and in locations where the signal strength of the interfering station is high in relation to the signal to be received. Screw-driver frequency adjustment from top of shield. Two mounting brackets are attached to the shield.

Dimensions: 1-3/8" square x 2-1/2" high.

BAKELITE TERMINAL PLATES

These terminal plates, provided with securely riveted solder type terminal lugs, are particularly adaptable to the assembly of groups of resistors

and by-pass condensers. Lugs are on 1/16" thick bakelite sheet stock and the terminal spacing is 7/16".

Cat. No.	Dimensions	Lugs per Side	List Pr.

470	1-3/4" x 8-3/8"	19	1.00

BAND SELECTOR SWITCHES

Miller band switches will make positive noise-free contact through an indefinite period of operation. These switches are positive self-cleaning type with silver plated contacts. Switches have an adjustable stop to be set for your requirements. Single hole mounting through a 3/4" diameter hole. Supplied with nut and lockwasher. Switches are 1-7/8" diameter.

Cat. No.	Circuits	Positions	Length	List Price

SLIDE RULE DIALS

Miller Series No. 152 Slide Rule dials are designed for top-of-chassis mounting. The dimension from top of chassis to center of dial shaft bushing is 1-13/16". Dials are supplied with hubs for 3/8" diameter shafts. Two screw type dial light sockets are packed with each dial. The attractive escutcheon plate is finished in antique bronze with a protective lacquer coating. The dial scales are calibrated for use with condensers having counter-clockwise rotation. The escutcheon requires a panel cut-out measuring 1-7/8" high by 5-1/4" wide.

Dimensions:
6-5/8" wide by 4-1/8" high (plus 1/2" for dial lights), 1/4" diameter shaft extends 1-1/4" beyond front of dial. The dial tuning ratio is approximately 5-1/2 to 1 and the effective scale length is 4-3/8".

MIDGET I.F. TRANSFORMERS

These mica compression tuned intermediate frequency transformers are well suited for use in small receivers of all types. They measure only 1-1/8" square and 2" high. In spite of their small size, only the highest quality of parts and workmanship

has been used in the construction of the Miller Midget transformers.

Dimensions: 1-1/8" square x 2" high.

PERMEABILITY TUNED TRANSFORMERS

Miller permeability tuned intermediate frequency transformers are recommended for all applications where a high degree of frequency stability and operation under humid conditions are used. The two iron core adjusting screws are accessible from the side of the aluminum shield. These transformers have excellent gain and selectivity characteristics. An internal spring clip prevents

vibration from affecting the adjustment.

Dimensions: 1-3/8" square x 3-1/4" high.

MINIATURE I.F. TRANSFORMERS*

Designed for experimental and custom receivers as well as replacements for 'personal' radios, these transformers are precision-tuned and comparable in performance to standard size components. Expressly designed for use with the new miniature tube. Place installation through-out. Screw driver adjustment of primary and secondary from top and bottom of shield. Suitable with spring clip for mounting to the chassis.

Dimensions: 3/4" square x 2" high.

*Mfg. under R-Trans. Patts. and Patts. Pend.

UNIVERSAL I.F. TRANSFORMERS

This new series of Miller transformers is used for general replacement purposes and in new designs. High gain and excellent stability are combined in a small transformer designed for use in both home and auto radio receiver. The ceramic mica compression trimmers have been heat cycled for temperature stability. All transformers are assembled in aluminum shields with screw-driver adjustment accessible at the top of the shield.

Dimensions: 1-1/4" square x 2-1/2" high.

612-RW	1500	1400-1600	2.50

CONVERTER OUTPUT TRANSFORMERS

Used in a simple high frequency converter to existing radio receiver and using the receiver as an intermediate frequency amplifier.

Dimensions: 1-3/8" square x 3-1/4" high.

Cat. No.	Frequency	KC Range	List Price
512-QT	525	500-550 KC	\$2.00
512-WT	1500	1400-1600 KC	2.00
512-XT	3000	2900-3100 KC	2.00
512-YT	5000	4500-5500 KC	2.00

IRON CORE TRANSFORMERS

The iron core transformer provides higher gain and selectivity than the conventional air core transformers of similar size. The mica compression trimmer, adjustable from the top of the shield have been heat cycled for capacity stability. Gain and selectivity of a single stage using iron core transformer is often equal to two stages of air core transformers.

Dimensions: 1-3/8" square x 3-1/4" high.

Cat. No.	Use	Freq.	KC Range	List Price

HIGH FIDELITY TUNER KIT

Essential parts for the construction of a band pass T.R.F. broadcast receiver which, with a good amplifier and speaker system will enable you to really appreciate some of the fine high fidelity programs being broadcast by the better stations. Band width is 20 KC and a 10KC adjacent channel filter is included with the kit. Form #11241 gives complete details, it's yours for the asking.

The Coil Kit consists of the following:

Cat. No.	Quantity	Item	List Price
472-UA	1	Untuned Ant. Coil	\$1.75
242-RF	2	Interstage Coil	3.00
242-BP	2	Band-Pass Coils	2.50

SKIP BAND COIL KIT

This new 2-Band coil kit covers the standard Broadcast band and the popular international short wave band. Shielded coils are used throughout. High frequency trimmer are incorporated in the coils. Requires a 2 gang 365 mmdf tuning condenser.

Frequency range: 540-1500 5500-18,000 KC

The kit contains the following:

Cat. No.	Quantity	Item	List Price
3997-A	1	Antenna Coil	\$3.50
3999-C	1	Oscillator Coil	3.50
612-C2	1	455 KC Input I.F.	2.75

MILLER #3997		Coil Kit	List Price \$18.35

ADJUSTABLE PADDER CONDENSERS

These adjustable oscillator padder condensers are of the finest quality mica compression type with ceramic body. Capacity adjustable from both top and bottom of condenser.

Dimensions: 7/8" x 1" x 3/32" thick.

Cat. No.	Capacity Range	List Price
160-A	360-1000 mmdf.	\$7.75
160-B	50- 400 mmdf.	.75

Miller

TWO BAND COILS

High quality 2-band shielded coils provided with built-in high frequency trimmers, accessible from the top of the shield. Solenoid and universal windings on XXX grade bakelite tubing, thoroughly impregnated against moisture, make these coils suitable for marine and tropical use as well as for general home receiver use. For use with standard 365 mmfd. tuning condenser.

Dimensions: 1-3/8" square x 3" high.

BROADCAST & MARINE 540-1600 1600-4500 KC

Cat. No.	Use	I.F. Freq.	Osc. Pad	List Price

3999-C	Tapped Oscillator			

THREE BAND COILS

Communications receiver type coils especially designed for fine quality custom built entertainment receivers and commercial marine and aircraft use. These coils are all wound on XXX grade bakelite tubing and thoroughly impregnated against moisture. Individual high frequency trimmers for

each band are adjustable from the side of the aluminum shield. All coil terminals are connected to solder lugs at the bottom of the coil form for under chassis wiring.

Dimensions: 2" square x 4-1/4" high.

ALL WAVE COILS 540 KC to 18. MC

F. M. TUNER KIT

This Kit contains the R.F. components to construct the finest FM tuner for home and professional use. Uses 8 miniature tubes in a circuit using cascade limiters ahead of the discriminator. Requires separate power supply and audio amplifier. The copper plated chassis measures only 7-1/2" deep x 8" wide x 2" high. All Miller Parts in the Kit may be purchased separately, if desired.

Frequency Range: 88-108 MC. The Kit contains the following:

[F1] For a Complete Listing of MILLER PRODUCTS ask for a copy of our Latest General Catalog.

DOWELL TYPE COILS

Single section Litz wound secondary coils wound on 1/2" Dia. lo-loss ceramic dowels, these coils are provided with solder lugs on a bakelite terminal plate and with a #6-32 threaded stud for single hole chassis mounting. For use with standard 365 mmfd. tuning condenser.

Dimensions: 3/4" square base x 1" high.

(ABP & RF types 2-1/8" high)

NOTE: * For 175 KC I.F. with 1000 mmfd. series pad
** For 262 KC I.F. with 600 mmfd. series pad
*** For 455 KC I.F. with 400 mmfd. series pad

MIDGET R.F. COILS

This series of compact shielded coils is provided with an adjustable powdered iron core permitting approximately plus or minus 30% secondary inductance deviation from nominal values. Particularly recommended for aircraft, marine and mobile equipment and general custom receiver construction. Core is adjustable from top of aluminum shield. Coils are designed for use with standard 365 mmfd. tuning condenser.

Dimensions: 1-1/8" square x 2" high. (All Types)

HAMMARLUND

SINCE 1910

"HQ-129-X" AMATEUR RECEIVER

The Hammarlund "HQ-129-X" amateur communications receiver is designed to meet the demands of the most critical amateurs. Its design includes every feature essential to finest performance.

The "HQ-129-X" has a continuous range from .54 to 31 megacycles in six separately calibrated bands with continuous bandspread throughout the entire range. In addition, the bandspread dial is calibrated for each of the four most important amateur bands—3.5 - 4 mc, 7 - 7.3 mc, 14 - 14.4 mc and 28 - 30 mc.

The "HQ-129-X" has the Hammarlund patented variable wide-band crystal filter which works exceptionally well on phone or short wave broadcast signals.

There are many other features: Variable antenna compensator, beat oscillator, voltage regulator, series noise limiter, send-receive switch, automatic volume control, calibrated "S" meter, audio gain control, sensitivity control—plus all that goes into a receiver built by engineers who have spent a lifetime designing commercial communication equipment.

The "HQ-129-X" is available complete in a two-tone gray finish including tubes and a 10 inch P. M. dynamic speaker.

"HQ-129-X" Less Speaker. Amateur Net Price \$177.30
SC-10—Speaker in cabinet finished to match

Amateur Net Price \$ 11.85

SERIES 600 "SUPER-PRO"

DESCRIPTION

Cheers from the experts — The new Series 600 SUPER-PRO is the finest communications receiver that money can buy. No "warmed over" model, the Series 600 is entirely new in electrical concept and mechanical design—truly "years ahead" of present day receivers. When you check this entirely new SUPER-PRO for such things as image rejection, stability, calibration accuracy, etc. . . . you will find performance that you would not have thought possible. You'll find that "years ahead" in design mean "years ahead" in performance.

Band changing in the new SUPER-PRO is accomplished by means of an ingeniously designed rotary turret which places the coil assemblies of the two R.F., Mixer and Oscillator stages directly adjacent to their respective sections of the four gang tuning condenser where they are electrically most efficient.

By means of the mechanical system used in the SUPER-PRO 600-X both the main and band spread dials are tuned simultaneously with one control and the need for first setting the main dial is eliminated. The dial drive mechanism is entirely gear coupled to the main tuning condenser, producing the kind of calibration accuracy usually associated only with costly laboratory standards.

**Technical Information will be
Available Late Fall of 1948**

HAMMARLUND

SINCE 1910

"MC" MIDGET CAPACITORS

Ideal variable for high and very high frequency tuning, laboratories, etc. Isolantite Insulation. All contacts riveted or soldered. Vibration proof. New improved Hammarlund split type rear bearing, and noiseless wiping contact. Cadmium plated soldered brass plates. Shaft— $\frac{1}{4}$ ".

Code	Capacity	Net
MC-20-S	20 mmf.	\$1.80
MC-35-S	35 mmf.	1.86
MC-50-S	50 mmf.	1.92
MC-50-M	50 mmf.	1.92
MC-75-S	80 mmf.	2.04
MC-75-M	80 mmf.	2.04
MC-100-S	100 mmf.	2.16
MC-100-M	100 mmf.	2.16
MC-140-S	140 mmf.	2.34
MC-140-M	140 mmf.	2.34
MC-200-M	200 mmf.	2.58
MC-250-M	260 mmf.	2.70
MC-325-M	320 mmf.	2.94

"M"—Midline Plates.

"S"—Straight Line Cap. Plates.

"MCD" SPLIT-STATOR CAPACITORS

Like single midgets, these incorporate every requirement imperative to highest quality. Specifications identical to single types except that shield plate is located between stator sections. Also equipped with new Hammarlund noise-less wiping contact and split type rear bearing. Overall length behind panel— $3\frac{3}{4}$ ". Strong Isolantite base. Single hole panel mount.

Code	Capacity	Net
MCD-50-M	50 mmf. per sect.	\$3.60
MCD-100-S	100 mmf. per sect.	3.90
MCD-100-M	100 mmf. per sect.	3.90
MCD-140-M	140 mmf. per sect.	4.20

"M"—Midline Plates.

"S"—Straight Line Cap. Plates.

"MCDX" DOUBLE SPACED CAPACITORS

Identical to split stator capacitors except that plates are widely spaced—actual air gap between rotor and stator plates—.0715". No shield between stators. Equipped with new Hammarlund noiseless wiping contact, and split type rear bearing. This capacitor is ideal for high and very high frequency transmitters using up to 1000 volts.

Code	Capacity	Net
MCD-35-MX	31 mmf. per sect.	\$4.08
MCD-35-SX	31 mmf. per sect.	4.08

"MX"—Midline Plates.

"SX"—Straight Line Cap Plates.

"MCX" DOUBLE SPACED CAPACITORS

Exceptional unit for ultra-s.w. receivers and transmitters particularly compact transmitters. Plate spacing—.0715". Great for tuning crystal controlled transmitter amplifier stages or for neutralizers up to 1000 volts. In midline (MX) and straight line cap. types (SX).

Code	Capacity	Net
MC-20-SX	20 mmf.	\$2.04
MC-20-MX	20 mmf.	2.04
MC-35-SX	32 mmf.	2.22
MC-35-MX	32 mmf.	2.22
MC-50-SX	50 mmf.	2.52
MC-50-MX	50 mmf.	2.52
MC-100-SX	100 mmf.	2.94

"RMC" CAPACITOR

The new "RMC", Rugged Midget Capacitor, is particularly designed for use in applications where strength and solid construction is as important as sound electrical design. Its sturdy frame consists of $\frac{3}{8}$ " aluminum end plates reinforced by three horizontal bars or pillars which hold the assembly absolutely rigid.

Two low loss silicone treated ceramic insulated bars are used to support the stator. Bearings are hand-fitted sleeve in the front and single ball thrust in the rear—torque is smooth and uniform. Contact to the rotor is made through a silver-plated beryllium forked spring bearing on a wide disk on the rotor shaft. Brackets are provided for mounting either side down, or to a front panel with spacing pillars—threaded mounting holes are provided for panel mounting. Voltage rating—1000 V.

Code	Capacity	Net
RMC-50-S	50. mmf.	\$2.22
RMC-100-S	105. mmf.	2.55
RMC-140-S	143.5 mmf.	2.70
RMC-325-S	327. mmf.	3.39

"VU" UHF CAPACITOR

The capacitors listed below are available for use by manufacturers, engineers and amateurs for all types of communications equipment having tuned circuits operating as high as 500 mc. The many advantages of these new capacitors are of course due to the silent electrical operation made possible through the use of pyrex glass ball bearings. These new bearings completely eliminate sliding or wiping contacts and metal sleeve, or ball type bearings, commonly used in ordinary variable capacitors.

Elimination of the rotor contact further precludes the possibility of noise and permits a more symmetrical design of the capacitor itself and consequently allows better circuit layout. Two sets of contacts are provided, so that the vacuum tube can be mounted on one side and the inductor on the other side of the capacitor. Voltage rating—700 V.

Code	Capacity	Net
VU-20	22.5 mmf.	\$6.45
VU-30	31.5 mmf.	6.90
VU-45	45.0 mmf.	7.62

HAMMARLUND

SINCE 1910

"HFBD" TRANSMITTING CAPACITORS

High efficiency, high frequency dual capacitors with isolated rotor. Both mounting brackets and control shafts are insulated. DC can be applied to rotor as well as stator. Isolantite end plate, soldered brass construction, cadmium plated. End plate size $1\frac{1}{2}$ ". Type "E" has rounded edge plates.

Code	Capacity	Length	Air Gap	Net
HFBD-50-C	50 mmf.	2 $\frac{7}{8}$ "	.050"	\$5.40
HFBD-100-C	100 mmf.	4 $\frac{1}{8}$ "	.050"	6.36
HFBD-35-E	35 mmf.	3 $\frac{1}{4}$ "	.070"	4.77
HFBD-65-E	65 mmf.	4 $\frac{1}{8}$ "	.070"	5.46

"HFB" CAPACITORS

Same as above but single stator types. Stator is mounted at top to reduce capacity to chassis. The "HFB" has insulated mounting brackets and control shaft.

Code	Capacity	Length	Air Gap	Net
HFB-50-C	50 mmf.	1 $\frac{7}{8}$ "	.050"	\$4.20

"HFA" AND "HFAD" CAPACITORS

"HFAD" has the same general construction as "HFBD" except that it is smaller in size and does not have the insulated control shaft. Ideal for high frequency operation. End panels $1\frac{3}{4}$ " square. "HFA" same construction, except end panel $1\frac{1}{2}$ " x $1\frac{1}{2}$ ". Both can be single hole panel mounted or can be mounted to the panel with stand-off bushings. Plain edge plates.

Code	Capacity	Type	Length	Air Gap	Net
HFAD-25-B	25 mmf	Dual	1 $\frac{3}{8}$ "	.030"	\$3.60
HFA-100-A	100 mmf	Single	1 $\frac{3}{8}$ "	.020"	1.98
HFA-140-A	140 mmf	Single	1 $\frac{3}{4}$ "	.020"	2.31
HFA-10-B	10 mmf	Single	$\frac{3}{16}$ "	.030"	1.53
HFA-15-B	15 mmf.	Single	$\frac{7}{16}$ "	.030"	1.62
HFA-25-B	25 mmf	Single	$\frac{1}{4}$ "	.030"	1.68
HFA-50-B	50 mmf.	Single	1 $\frac{1}{8}$ "	.030"	1.86
HFA-100-B	100 mmf.	Single	2 $\frac{1}{16}$ "	.030"	2.46
HFA-15-E	15 mmf.	Single	1 $\frac{3}{16}$ "	.070"	1.68

"NZ-10" NEUTRALIZING CAPACITOR

Rounded edges. Isolantite. Fine adjusting screw. Positive lock. Horizontal adjustment. Dimensions: 2 $\frac{1}{2}$ " high x 1 $\frac{1}{2}$ " deep.

Code	Net
NZ-10—(2.3—1.9 mmf.)	\$3.15

MIDGET "APC" CAPACITORS

This new midget variety of the well known APC condenser is designed for use where space is limited. Size of 100 mmf., $\frac{1}{16}$ " x $\frac{1}{16}$ " x $1\frac{1}{8}$ ". Mounting holes $\frac{1}{16}$ " apart. Ideal for H.F. circuits. Isolantite insulation. Nickel plated soldered brass plates.

Code	Capacity	Net
MAPC-15	15 mmf.	\$0.99
MAPC-25	25 mmf.	1.02
MAPC-35	35 mmf.	1.08
MAPC-50	49 mmf.	1.14
MAPC-75	75 mmf.	1.26
MAPC-100	99 mmf.	1.38

"APC" MICRO CAPACITORS

For H.F. and very H.F. For I.F. tuning, trimming R.F. Coils or tuning capacitors, general padding, etc. Constant capacity under any condition of temperature or vibration. Size 100 mmf., $\frac{1}{16}$ " x $\frac{1}{16}$ " x $1\frac{1}{8}$ ". Isolantite base. Cadmium plated soldered brass plates.

Code	Capacity	Net
APC-25	25 mmf.	\$1.02
APC-50	50 mmf.	1.14
APC-75	75 mmf.	1.26
APC-100	100 mmf.	1.38
APC-140	140 mmf.	1.62

FLEXIBLE COUPLINGS

These flexible couplings are designed for both insulated and non-insulated applications. The FC-46-S is insulated for 6000 volts with silicone treated ceramic, will compensate for considerable shaft misalignment, but will not give springy action. Overall depth $\frac{1}{2}$ ", diameter $1\frac{1}{4}$ ". The FNC-46-S is a non-insulated coupling for use where insulation is unnecessary. The general design is the same as the FC-46-S but has a heavy metal body instead of ceramic. Overall depth $\frac{3}{16}$ ", diameter $1\frac{1}{4}$ ".

Code	Net
FC-46-S—Insulated	\$0.66
FNC-46-S—Non-insulated	.66

BUTTERFLY CAPACITOR

The new butterfly capacitor is designed for use in VHF and UHF applications where the butterfly design is indispensable. Can be used as a single series unit or as a split stator with grounded rotor. This new butterfly capacitor is ideal for use in transmitters as well as receivers. Has soldered rotor and stator assembly; is plated to resist corrosion; silver plated rotor contact; sleeve type bearing, low-loss ceramic end panel. Approximately $1\frac{3}{4}$ " square. Depth behind panel depends on number of plates. Insulated mounting studs prevent rotor from being grounded when mounted to metal.

HAMMARLUND

SINCE 1910

"TC" TRANSMITTING CAPACITORS

A moderately priced, heavy duty transmitting capacitor, featuring heavy aluminum end plates. Isolantite insulation, non-inductive, self-cleaning silver plated beryllium contacts, full floating rotor bearing, non-magnetic rotor assembly, polished heavy aluminum plates accurately spaced. All, except type "L", have round edge plates of .040"

thickness. Type "L" has .025" plates with plain edges. Type "H" .171", 600 V. Type "J", .100" 4250 V. Type "K", .084" 3750 V. Type "L", .070", 2000 V. air gap. Available in a wide variety of capacities and working voltages, these capacitors are ideal for modern up-to-date transmitters with power output ranging from 200 watts to 1 kw.

Type	Capacity	Overall Length	Net
TC-440-L	465 mmf.	5 7/8"	\$6.99
TC-220-K	225 mmf.	4 5/8"	6.15
TC-240-J	250 mmf.	6 1/2"	7.80
TC-50-H	53 mmf.	4 1/2"	4.59
TC-110-H	115 mmf.	6 1/2"	6.90
TC-100-G	110 mmf.	7 1/2"	8.58

"TCD" SPLIT STATOR TYPES

These split-stator transmitting capacitors are identical to the singles shown above, except that the stator sections are individual. Ideal for push-pull power amplifiers ranging in power up to 1 kw. They are of convenient size and lend themselves to construction of

compact apparatus. Overall dimensions in back of panel are given in the accompanying table. The capacity values listed are for each section. The last letter in the code represents plate spacing and working voltage and are identical to those given above. Type "M"—plain plates, .030" air gap.

Type	Capacity	Overall Length	Net
TCD-110-H	115 mmf.	11 1/8"	\$7.92
TCD-500M	505 mmf.	4 7/8"	8.01
TCD-210-L	215 mmf.	5 7/8"	15.69
TCD-325-K	325 mmf.	11 1/2"	14.70
TCD-240-J	250 mmf.	11 1/8"	12.30

"HF" MICRO CAPACITORS

For tuning or trimming on high and very high frequencies. Cadmium plated soldered brass plates. Isolantite. Base mounting, single hole panel mount, or panel mounting with bushings, 140 mmf. size 1 1/2" high x 1 1/2" behind panel.

Code	Capacity	Net
HF-15	17.5 mmf.	\$1.02
HF-35	35 mmf.	1.17
HF-50	50 mmf.	1.23
HF-100	100 mmf.	1.53
HF-140	140 mmf.	1.74
*HF-15-X	15 mmf.	1.23
*HF-30-X	30 mmf.	1.38

*Double spaced.

"MTC" TRANSMITTING CAPACITORS

Compact types. Isolantite insulation. Base or panel mounting. Polished aluminum plates. Stainless steel shaft. Size of 150 mmf. with .070" plate spacing only 4 5/8" behind panel. "B" models have rounded plates. "C" types have plain plate edges. Self-cleaning wiping contact.

Code	Capacity	Net
MTC-20-B	20 mmf.	\$4.05
MTC-100-B	100 mmf.	5.25
MTC-150-C	150 mmf.	5.85
MTC-250-C	260 mmf.	4.65
MTC-350-C	365 mmf.	4.80

"MTCD" SPLIT-STATOR TYPES

Same outstanding features as MTC singles except that stator sections are separate. Model 100-B with .070" plate spacing, only 5 3/8" behind panel. "B" models have rounded plates.

Code	Capacity	Net
MTCD-20-B	20 mmf. per sect.	\$5.25
MTCD-45-B	35 mmf. per sect.	6.00
MTCD-100-B	100 mmf. per sect.	7.50

"HFD" MICRO DUAL CAPACITORS

A compact dual—ideal as a high frequency tuning capacitor, for tuning and neutralizing low-powered short wave and for very high frequency transmitters, etc. Heavy Isolantite base. Equipped with new outstanding Hammarlund split rear bearing and individual noiseless wiping contact for each section. Rotor contacts variable to several positions for shortest leads. Shield between sections for grounding. The 140 mmf. size is only 1 1/2" high x 3 3/4" long behind panel. 1/4" shaft. Cadmium plated soldered brass plates.

Code	Capacity	Net
HFD-50	50 mmf. per sect.	\$2.82
HFD-100	100 mmf. per sect.	3.18
HFD-140	140 mmf. per sect.	3.60
*HFD-15-X	15 mmf. per sect.	2.76
*HFD-30-X	28.5 mmf. per sect.	3.00

*Double-spaced.

BUD DE LUXE RELAY RACKS

These relay racks are made of 16 gauge steel with 1/8" panel supports. The panel mounting supports are recessed so that no edges of the panel will be exposed.

The front and back of the top, the two sides and the door are well louvered to provide adequate ventilation. Snap catches are positioned on the door. A stream-lined appearance is achieved by the use of rounded corners and red-lined chrome trim. The relay rack is shipped knocked-down and complete with all necessary hardware for assembly. All standard 19" panels will fit these racks.

A SPECIAL FEATURE IS THE USE OF FOUR STURDY SUPPORTS ON THE BOTTOM SO THAT CASTERS CAN BE FASTENED DIRECTLY TO THE BASE, THEREBY ACHIEVING READY MOBILITY. Bud RC-7756 casters will fit this unit. Casters are not included in price of cabinet. These relay racks are supplied in either black or grey wrinkle finish. The overall width is 22" and the depth is 17 1/4" on all sizes listed.

Catalog No.	Overall Height	Panel Space	Shipping Wt.	Dealer Cost
CR-1774	42 1/8"	36 3/4"	90 lbs.	\$30.00
CR-1771	47 1/8"	42"	100 lbs.	36.25
CR-1772	66 1/8"	61 1/4"	135 lbs.	44.50
CR-1773	82 1/8"	77"	155 lbs.	51.75

BUD DE LUXE CABINET RACKS

These cabinet racks have rounded corners and attractive red-lined chrome trim. There is a recessed, hinged door on the top with a snap catch. These cabinet racks are made of heavy gauge steel and are of sturdy construction. The three large sizes have a hinged rear door, while the small sizes have a welded panel in the rear.

Adequate ventilation is assured by means of louvered sides and a two inch opening in the bottom of the back extends the entire width.

"NO-SCRATCH" EXTENDED METAL FEET ARE EMBOSSED ON THE BOTTOM TO MINIMIZE MARRING OF A TABLE TOP. These relay racks are furnished in either black or grey wrinkle finish. Depth 14 3/4", width 22". Will fit standard 19" panels.

Catalog No.	Overall Height	Panel Space	Shipping Wt.	Dealer Cost
CR-1741	10 3/8"	8 3/4"	29 lbs.	\$10.35
CR-1742	14 1/2"	12 1/4"	32 lbs.	12.25

CR-1744	28 3/8"	26 1/4"	50 lbs.	19.32
CR-1745	36 1/8"	35"	60 lbs.	21.57

BUD JUNIOR CABINET RACKS

This cabinet rack is a multi-purpose unit that is inexpensive. The cabinet is constructed to accommodate two panels, one is 10 1/2" by 18 1/2", the other 8 3/4" by 18 1/2", these panels are supplied with the cabinet. The BUD Junior Cabinet Rack is spacious enough to accommodate a chassis up to 10" by 17".

The rear of the cabinet is covered by a hinged door with a locking device. The cabinet is furnished in black wrinkle finish only.

Catalog No.	Overall Height	Depth	Width	Shipping Wt.	Dealer Cost
RC-1749A	21 1/4"	10 1/2"	19 7/8"	25 lbs.	\$14.10

BUD DESK TYPE RELAY RACKS

Perfect for table mounting of low and medium power transmitters, public address systems, and other electronic instruments. Rack has strong chassis for mounting heavy components. Shipped knocked-down, with necessary hardware, easy to assemble. Standard notched 19" wide panels can be used, panels set in recess so that no edges are exposed. Furnished in black wrinkle finish only. Depth 12".

Catalog No.	Height	Panel Space	Shipping Wt.	Dealer Cost
RR-1248	24"	21"	15 lbs.	\$ 5.75
RR-1249	31"	28"	17 lbs.	7.20

BUD CHASSIS MOUNTING BRACKETS

Mounting brackets are essential to insure proper support of the chassis. Formed of heavy gauge steel, cut away at the bottom to provide chassis clearance so that chassis can be mounted flush against panel. Finished in Black. Numbers MB-450 and MB-451 designed for chassis height of 4". Sold in pairs only.

Catalog No.	Height	Depth	Dealer Cost Per Pair
MB-458	6 1/2"	8"	\$0.69
MB-448	6 1/2"	10"	.93
MB-459	6 1/2"	11"	1.02

MB-460	6 1/2"	13"	1.23
MB-450	8 1/2"	10"	1.45
MB-451	8 1/2"	13"	1.55

Where materials are specified Black Wrinkle Finish only, and Grey is desired, a charge of 15% additional will be made.

BUD STANDARD RELAY RACKS

A satisfactory means of housing transmitting equipment or any electronic equipment in a relay rack. The BUD STANDARD RELAY RACK is second only to the BUD DE LUXE RELAY RACK as a neat, complete and professional looking housing unit.

These relay racks are made of 16 gauge steel and have 1/8" panel mounting supports. A sturdy appearance is achieved through the use of square corners. The panels are recessed to eliminate exposed edges. A removable rear door is provided with two snap catches. These relay racks are furnished in Black Wrinkle Finish only and are shipped knocked-down with a complete set of necessary hardware. All of the racks in this series are 17" deep, 21" wide and with space for accommodating standard 19" wide panels.

Bud Standard Relay Racks and Cabinets temporarily discontinued due to steel shortage. Substitute Bud De Luxe Relay Racks and Cabinet Racks.

BUD STANDARD CABINET RACKS

If a neat looking, sturdy, economical cabinet rack that has many uses is what you are looking for, the BUD STANDARD RACK will satisfy your requirements. These cabinet racks are assured of adequate ventilation by ample side louvers and openings in the back. Hinged top door with snap catch supplied on all cabinets. The three large sizes have a hinged rear door while the small sizes are fitted with a solid back.

"NO-SCRATCH" EMBOSSED METAL FEET ARE WELDED TO THE BOTTOM TO MINIMIZE MARRING OF A TABLE TOP. These cabinets are available in Black

Wrinkle Finish only and are furnished with the necessary hardware to fasten relay rack panels to the front of the cabinet. All of these cabinet racks are 14 3/4" deep, 20 1/8" wide and will hold standard 19" panels.

Bud Standard Relay Racks and Cabinets temporarily discontinued due to steel shortage. Substitute Bud De Luxe Relay Racks and Cabinet Racks.

BUD TELEPHONE TYPE RELAY RACKS

Nos. RR-1263 and RR-1264 are made of 1/8" steel channels, three inches deep and are held together by angle cross pieces of the same material. The design of the base has been improved to incorporate a stanchion type bottom, together with the usual side angles, making the rack stronger and more stable.

RR-1265 is heavy duty and is made of heavy channel iron supported by two 3/8" thick iron angles that are bolted to the channels to provide additional support to the unit. Supplied in black wrinkle finish only. All racks accommodate standard 19" panels in accordance with standards set by RMA.

Catalog No.	Height	Depth	Panel Space	Shipping Wt.	Dealer Cost
RR-1263	35 1/2"	22"	31 1/2"	38 lbs.	\$15.00
RR-1264	70 1/2"	22"	66 1/2"	48 lbs.	18.00
RR-1265	72 1/2"	15"	66 1/2"	97 lbs.	31.50

BUD VENTILATING GRILLE PANELS

Made of 1/8" thick steel. The grille is stamped into the panel itself, and is recommended for use where additional ventilation is desirable. All panels are 19" long, furnished in either black or grey wrinkle finish.

Catalog No.	Height	Grille Size	Dealer Cost
PS-808	5 1/4"	3 3/4" x 14 3/8"	\$2.55
PS-809	7"	4 1/2" x 14 3/8"	2.73
PS-810	8 3/4"	5 1/2" x 14 3/8"	3.12
PS-811	10 1/2"	6 1/2" x 14 3/8"	3.51
PS-812	12 1/4"	7 1/2" x 14 3/8"	3.86

* Allows 3 1/4" space for chassis mounting.

BUD STANDARD RELAY RACK PANELS

Made of Steel, Masonite or Aluminum. Steel Panels are made of high grade steel 1/8" thick. Masonite Panels are made of 3/16" Tempered Masonite. Aluminum Panels are made of 1/8" thick Aluminum. All Panels are 19" wide. Furnished in either Black or Grey Wrinkle. Aluminum panels 3/16" thick may be had if desired at 60% increase in cost over 1/8".

BUD ENCLOSED METER PANEL

PS-439 Meter Panel is designed to give maximum protection to meters. The steel panel has a large cut-out, behind which is mounted a blank Masonite sub-panel. This sub-panel has a meter mounting area of 4 1/2" x 15 1/2" — sufficient space to mount four 3" meters. The meters are protected by a glass insert that mounts in slides. Due to danger from breakage during shipment, this glass is not supplied with the panel. The glass insert should be cut 15" long x 4 3/8" wide. Finished in either Black or Grey Wrinkle.

Cat. No.	Length	Width	Dealer Cost
PS-439	19"	5 1/4"	\$4.68

**BUD METER PANELS
STEEL AND MASONITE**

All meter panels are 5 1/4" high, 19" wide, available in either black or grey wrinkle finish. Small holes fit either 2" square or round meters, large holes fit either 3" square or round meters.

Catalog No.	Number of Holes	Diameter	Type Material	Dealer Cost
