FLEXIBLE VARNISHED TUBING AND SLEEVING

RADIO VARNISHED TUBING - (Spaghetti). A sleeving with a heavy coat of varnish, in high gloss vivid colors. Average dielectric strength: 7,000 volts.

SATURATED SLEEVING - A fibre yarn sleeving saturated with high grade insulating varnish. Cuts clean and has a smooth interior wall. Average dielectric strength: 2,000 volts.

MAGNETO VARNISHED TUBING-The production of this type of tubing is under rigid control so as to insure a maximum in quality. It is thoroughly impregnated with a varnish of maximum insulating value. It is resistant to heat, oil, gas and acids. Colors are bright and vivid. Average dielectric strength: 7,000 volts.

 3 to 13—plus or minus .004"
 14 to 20—plus or minus .002"

Standard Color: Black. Other colors to order.
 Sizes follow the B & S System of gauging wires. For instance, a No. 10 tubing will fit over a No. 10 bare wire or any wire with an insulation of which the O.D. is equivalent to No. 10 B & S gauge. If in doubt, it is best to submit a sample of the wire or product to be covered.

LENGTHS—STANDARD 36" LONGER LENGTHS AVAILABLE

SPAGHETTI TUBING

A superior varnished tubing for radio work. It will retain its dielectric and flexibility indefinitely. Takes up to No. 14 wire.

Colors: Black, Red, Yellow, Green and Brown

No. 2091 - 36" Lengths

P-A WIRES and CABLES

HOLLYWOOD MICROPHONE CABLES (Shielded-Jacketed)

Substantially made to withstand rough usage. Special low capacity color coded conductors. Braided with tinned copper shield. Tough weatherproof polished jacket overall.

Single Conductor — unusually low capacity. Can be used up to 100 ft. with high impedance ribbon microphones and up to 50 ft. with crystal microphones.

CRYSTAL MICROPHONE CABLE

Used with crystal, dynamic, velocity, ribbon microphones, and photoelectric cells. Birnbach No. 870 used widely for lapel microphones and photoelectric cells. Constructed of extra flexible, stranded, tinned copper, cotton serve—insulated with new low loss rubber compound, braided tinned copper shield cotton serve and covered with tough black rubber jacket.

Longer Lengths Available

BIRNBACH MULTIPLE CONDUCTOR FLEXIBLE CABLE

Constructed of individual 1/64 rubber wall No. 20 stranded, tinned cotton braid; color coded; conductors twisted and with a closely woven brown cotton braid overall. Used widely for P.A. systems, analyzers, remote control units, etc.

BIRACO TUBING

(Extruded Vinyl)

Synthetic plastic tubing especially designed for electronic and electrical insulation work. Extremely flexible and high resistance to abrasion. Has high dielectric strength, average 10,000 volts and high tensile strength. Will not support combustion, soften up to 257°F. or crack at -75°F. Its dielectric strength: 1100 volts per mil at room temperature when dry and 1000 volts per mil when wet. Impervious to water, oil, alkalis, alcohol, solvents, etc. Meets all ASTM specs.

COLORS: Black, Red, Green, White, Yellow, Blue, Brown, Orange and Clear. (36" lengths)

BIRNBACH COPPERWELD ENAMEL ANTENNA WIRE

Steel core covered with copper and heavily enameled. Will not elongate because of its high tensile strength . . . which is several times that of enameled copper wire. It has low R.F. resistance and is ideal for transmitting doublet and directional antenna systems as it will maintain the frequency characteristics of the antenna because of its stretchless qualities.

BIRNBACH GIANT PLUGS

The Giant Plugs are intended for use where heavy current is used. They are rated at 25 amps. The long life nickel silver alloy spring is secured over a pin preventing a collapse of the spring and also maintaining the full spring action of the spring when inserted into the jack. The No. 398A plug has a hole in the thread shank to permit soldering to it. It is used extensively on diathermy electrode pad cables.

BIRNBACH STEATITE BUTTON

This specially designed steatite button is intended for use to simplify wiring and to be used as a binding post or a binding post insulator. Attention is called to the uniqueness of the design which prevents either section of the insulator from turning in respect to the special screw. The specially designed screw locks both sections.

"LUCITE" FEEDTHRU INSULATORS

These feedthru insulators are ideal for bringing high frequency leads thru a panel. They are made of genuine DuPont Lucite. Because of its low loss at high frequency, it is well adapted to insulated elements of high frequency circuits. The 1/2" dia. insulators have brass nickel plated 6-32 hardware and the 3/4" dia. insulators, 10-32 hardware.

STEATITE PILLARS

(Without Hardware)

In many constructions, these unmounted threaded steatite pillars will facilitate assembly because of the one hole mounting and parallel mounting surfaces. They are made of glazed Steatite with threaded holes on both sides.

LEADIN INSULATORS

Each cone 2 3/4" high, made of low absorption, vitrified glazed porcelain. The Nos. 4237 and 4238 have insulating bushings to insulate rod that goes through the wall, 2 bushings are included, 1/4" and 1/2" long, allowing complete insulation of the threaded rod of any length in multiples of 1/4". Complete with brass nickel plated hardware and lead and cork washers to permit water-tight seal.

| 4052 | 1000 ft. Spool | 1000 |

Used on Motorola, RCA, GE, etc. Is extra thin!

AC-DC RESISTANCE CORDS

Consists of a line cord into which a third element has been incorporated. The voltage dropping resistor reduces the voltage to that needed for the filament of the tubes. The 135, 160, 180 and 200-ohm cords can also be used for single light 20 and 15-watt fluorescent fixtures. All 6-ft. long, color coded with tinned leads and all rubber plugs. All individually boxed.

| Cat. No. | Cord Rating | Sets Having Following Tubes: |
|----------|--------------|--|
| 35 | 135 ohm | 25Z5-43-4 (6.3 volt tubes) |
| 36 | 160 ohm | 25Z5-43-3 (6.3 volt tubes) |
| 34 | 180 ohm | 12Z3-43-4 (6.3 volt tubes) |

BIRNBACH ANTENNA KITS

Cat. No. 503 — AERIAL KIT

- 75 ft. 7/24 Copper Wire
- 35 ft. R.C. Lead-in Wire
- 1—No. 630 Lightning Arrestor
- 1—No. 600 Ground Clamp
- 1—No. 611 Lead-in Strip
- 2—No. 666 Porcelain Insulators
- 2—No. 669 Glazed Nallit Knobs
- 2—No. 665 Galvanized Screw Eyes

Std. Pkg. 24 Weight 6.5 lbs.

UNIVERSAL ALL WAVE KIT

The No. 149 All Wave Antenna Kit is designed for efficient operation with all types of receivers.

List of Parts:

- 2—30 ft. coils 7/24 bare copper aerial wire
- 1—50 ft. coil Stranded Transmission Cable
- 1—Transfer unit
- 2—Porcelain Insulators
- 2—All Wave Lead-in Strip
- 1—Ground Clamp
- 2—Glazed Nallit Knobs

The above completely assembled for simple installation.

Cat. No. 149—Universal All Wave Kit. 24

AIRPLANE SPRING

Rust-proof steel, cadmium plated thru. Compact compression spring for taking up slack in guy wire due to pull or strain on antenna.

Cat. No. 764—Airplane Spring 100

NAIL-IT KNOBS

Cat. No. 669—Glazed 100

PORCELAIN INSULATORS

Cat. No. 666—White 100

IGNITION FILTERS

Completely eliminate all ignition and high tension circuit interference. Copper wound inductance accounts for the low resistance of 120 ohms for the Ignition Filter. Due to the low resistance of these filters, less gasoline is consumed than when high resistance filters are used.

| Cat. No. | Std. Pkg. |
|--|-----------|
| 350—Ignition Filter (Bracket Type) | 25 |
| 351—Ignition Filter (Cable Type) | 25 |
| 352—Distributor Filter | 10 |
| 353—Ignition Filter (Screw Type) | 25 |
| 359—Ignition Filter (Slip-on Type) | 25 |

BIRNBACH MASTER FILTER

Eliminates all ignition interference, does away with necessity of having filter for each spark plug. Distributor type for easy insertion into distributor head, cable type to be placed into the distributor lead where impossible to insert into distributor head.

| Cat. No. | Std. Pkg. |
|---|-----------|
| 354—Cable or Distributor Type | 12 |

AERIAL SPRING ADJUSTER

Corrects excessive sag of doublet antennas. Prevents swinging and swaying, eliminates resultant fading of signals. Consists of two hooks with porcelain rings, powerful compression spring, cadmium plated thru-out.

| Cat. No. | Std. Pkg. |
|---|-----------|
| 765—Birnbach Aerial Spring Adjuster | 12 |

SCREW TERMINAL LEAD-IN STRIP

Locks wire together with strip in a secure connection assuring perfect contact. Has weather-proof covering over a copper strip with cadmium plated terminals. White or Black.

| Cat. No. | Std. Pkg. |
|--------------------------------------|-----------|
| 617—Lead-in Strip | 50 |
| 2617—Doublet Lead-in Strip | 25 |

No. 231-MC Microphone Connector

Made of milled brass and chrome plated. Wire secured by threading thru coiled spring and bending shield back on spring and soldering. Center conductor of cable is threaded thru eyelet of bakelite insulator and soldered. Set screw then tightened completing connection.

| Cat. No. | Std. Pkg. |
|---------------------------------------|-----------|
| 231-MC—Microphone Connector | 100 |

No. 232-FC Microphone Connector

Milled from brass, chromium plated. Fits all standard male fittings having 1/8-27 thread.

| Cat. No. | Std. Pkg. |
|-----------------------------------|-----------|
| 232-FC—Female Connector | 100 |

No. 235 PHONE PLUG ADAPTER

1/8-27 thread; screws into coupling ring of No. 232-FC Connector permitting cable to be plugged into standard phone jack. Made of brass and nickel-plated.

| Cat. No. | Std. Pkg. |
|------------------|-----------|
| 235-PC | 50 |

PORCELAIN TUBES

To bring a lead-in into a building, 3/4" diameter hole required.

LIGHTNING ARRESTOR

Glazed porcelain body, nickel-plated hardware. Outdoor or indoor use. Mounting screws and instructions.

| Cat. No. | Std. Pkg. |
|----------------------------------|-----------|
| 650—Lightning Arrestor | 50 |

BIRNBACH LEAD-IN STRIPS

Covered with a heavy cotton braid and weather-proofed, with numerous coats of lacquer. Clips are riveted and soldered at both ends.

| Cat. No. | Std. Pkg. |
|------------------------------|-----------|
| 611—Black 12" long | 50 |
| 613—White 12" long | 50 |

BIRNBACH GLASS INSULATORS

Made of crystal clear glass and have a smooth surface which prevents dirt or ice from collecting.

| Cat. No. | Std. Pkg. |
|-----------------|-----------|
| 00—3" | 100 |

No. 233-CC CHASSIS CONNECTOR

Milled of solid brass. Mounts in 3/8" dia. hole to ground shell directly to chassis. Mounts in 1/2" hole when insulation from panel is required. Supplied with shoulder and flat fibre and metal washers and hex lock nut.

| Cat. No. | Std. Pkg. |
|------------------------------------|-----------|
| 233-CC—Chassis Connector | 100 |

No. 234-CLC CHASSIS CONNECTOR

Circuit is closed before cable circuit breaks. Prevents open grid circuit howls. Milled of solid brass, complete with shoulder and flat fibre and metal washers and lock nut.

| Cat. No. | Std. Pkg. |
|---------------------------------------|-----------|
| 234-CLC—Closed Circuit Jack | 100 |

*Quality Products to Safeguard
Your Product Quality and Performance*

TURBO VARNISHED TUBING — All NEMA Grades

A cotton, rayon or glass braid impregnated with high quality insulating varnish. Recommended for general application requiring high tensile strength, flexibility, tear resistance, non-peeling and non-cracking qualities, low moisture absorption, oil and acid resistance. Radio Grade (NEMA B-1) and Magneta Grade (NEMA A-1) available from .022 I.D. Standard lengths bundled as follows: No. 24 — No. 6½ mm., 500 ft.; No. 2 — No. 0, 250 ft.; 9 mm. to ¾" I.D., 100 ft.; ¾" and larger, 52½".

TURBO SATURATED SLEEVING — All NEMA Grades

Produced from select cotton, rayon or glass braid saturated with a specially formulated insulating varnish to assure desirable sealing properties with excellent flexibility. Recommended for low cost insulation where dielectric is not the major problem. Features absolute concentricity, high tensile strength, low moisture absorption and flexibility. Available from .022 I.D. standard lengths. Sizes 13 to 24 inclusive can be supplied in continuous lengths put up on spools. Stack colors up to size 12 include black, yellow, red, green, brown and blue. Black and yellow standard on larger sizes.

TURBOSIL GLASS TUBING

A flexible glass braid reinforced with superior silicone insulating varnishes and developed specifically for those applications demanding flexibility with high heat resistance and dielectric strength. Exceedingly popular for use with circuits in small space where optimum protection with least bulk is prime requisite. Provides maximum safeguard against low and high temperatures (−70°C. to +200°C.), moisture, oil and grease. Available in natural color from No. 20 to ¾" I.D., in 42" standard lengths in four grades: Single Saturated (NEMA H-C-3), Double Dip (NEMA H-C-2), Triple Strength (NEMA H-C-1) and Magneta Grade (NEMA H-A-1).

TURBO CAMBRICS, TAPES, CLOTHS, PAPERS

Broad line affords desired protection against voltage breakdown, oils, moistures and alkalis under the most severe operating conditions. All standard types, sizes, lengths and colors are available. TURBO line includes varnished cambric in sheets and rolls; varnished cambric tapes; dry and oil type splicing tapes; plastic backing tape; duplex cambric slot insulation, varnished duck; silicone varnished glass cloth; treated asbestos cloth; duplex glass slot insulation; extra thin varnished insulation of cambric, nylon, rayon and silk; and varnished papers. All tested in accordance with A.S.T.M. Specifications. Detailed data in TURBO Catalog. Write for samples.

WRITE TODAY FOR YOUR COPY

SERVICE backed by quality products and experience of specialists is the keynote to the growing acceptance of TURBO products. The Brand research laboratories are continuously studying new materials, methods and machinery to improve standard products and introduce new products to keep step with increased demands placed on electricity. Whatever your insulation problem, look to The William Brand and Co., Inc. for study, recommendations, samples and SERVICE. Turba-Technician in your territory will be happy to serve you.

TURBO EXTRUDED PLASTIC TUBING

Vinyl tubing for wide application wherever you require resistance to tear and abrasion, toughness, elasticity, flexibility for broad temperature range. Available in three classifications up to 1.5" I.D., 7 colors and clear in continuous lengths or cut to length. Samples on request.

HIGH HEAT: Turbotrans 105 and Turbotherm 105 are U. L. approved for 105°C. uses Turbotrans is specially processed tubing of high quality used extensively for potting, baking, etc. Turbotrans 105 is suitable at temperatures of -40°C.

LOW TEMPERATURE: Turbozone 47 is a non-corrosive tubing providing unusual flexibility at sub-zero temperatures. Specially compounded to meet AAF12047A requirements. Not recommended for oil use.

GENERAL PURPOSE: Turbalex 63 meets JAN-1-631 requirements. Not recommended for high heat or oil use. Turbalex 85 is recommended for service for moderate heat and occasional exposure to oil. Not recommended for temperature applications below -30°C.

TURBO WIRE AND MULTI-CABLES

Multi-conductor cables up to maximum 3/8" O.D. Range of lays 1" to 10", right or left hand with fillers and cotton wraps if required. Can also pair conductors with range of lays 1/2" to 6". Manufactured to specifications.

TURBOTHERM 60: Radio and instrument hook-up wire. Approved for JAN-C-76-SR1R (1000 V.) and SRHV (2500 V.). Available with nylon jacket or lacquered glass braid in standard RMA colors. Nos. 16 to 24 solid or stranded.

TURBOTHERM 80: Radio, instrument and control hook-up wire. U. L. approved appliance wire for 80°C. 300 600 V., with or without cotton, rayon or glass lacquered overbraid. Nos. 12 to 26 solid or stranded. Nos. 14, 16 and 18 stranded U. L. approved for 80°C. - 1000 V. Standard RMA colors. Available also as a thin-wall instrument wire. Meets Buships 15-W-9, Type LV. Nos. 22 to 28 in solid or stranded. Standard RMA colors.

TURBOTHERM 90: Radio, instrument and control hook-up and motor lead wire with or without lacquered braid. U. L. approved 90°C. - 600 V. Nos. 16 to 26 solid or stranded. Standard RMA colors.

TURBOTHERM 105: Motor lead and appliance wire. U. L. approved 105°C. - 600 V. Nos. 16 to 26 solid or stranded. Standard RMA colors.

TURBOTHERM 105: Hook-up and appliance wire with lacquered glass overbraid. U. L. approved 105°C. - 300 and 600 V. Nos. 16 to 26 solid or stranded. Standard RMA colors.

TURBOLENE PE: Low voltage (150 V.) loop antenna wire. Nos. 22 and 24, solid or stranded, with natural or brown insulation.

TURBOLENE NF: High voltage Appliance Wire. U. L. approved 10,000 and 20,000 V. Nos. 14 to 22 solid and stranded in natural white.

NEON SIGN CABLE GTO-15: U. L. approved 15,000 V. Nos. 12 and 14 stranded in natural color primary insulation with black jacket.

TURBO TWIN-LEAD TRANSMISSION LINE: Available in heavy duty outdoor and light weight indoor types. 300 ohm and 150 ohm Twin-lead are standard. Special combinations of conductor gage and web dimensions are available. Can be furnished with your imprint on the web.

Additional colors, contrasting color tracer stripes, other construction and special packaging on special request.

TURBO MICA PRODUCTS Possessing ideal electrical properties, Mica is available in several grades and forms for every electrical need. TURBO Mica line includes: HEATER PLATE: can withstand direct contact with heat, 1000 F., 625 VPM. FLEXIBLE PLATE: soft mica bonded with non-hardening adhesive varnish can be bent or molded whether cold or warm. AMBER SEGMENT PLATE: soft edged for wearing down with copper commutator bars, 600 VPM. MOLDING PLATE: moldable at approximately 284 F., on flat sheets, 600 VPM up to .015" thickness, 450 VPM .015" and over. INDIA SEGMENT PLATE: distinguished from amber segment plate by increased hardness and higher thermal characteristics. B-H-1 and B-H-2 PLATE: built-up mica plate with high rigidity and good power factor suitable for condenser applications. BLOCK MICA to rigid specifications, all standard sizes. MICA FILMS for mica condensers.

TURBO IDENTIFICATION MARKERS Slip-on identification sleeves in braided fabric or extruded plastic are available imprinted longitudinally or circumferentially in any diameter or length in any combination of colors. Dimensioned to precise limits to insure snug fit, these markers clearly identify electrical conductors, tubing, wiring, hose, cable, rod and similar connectors. Fadeproof, bleedproof and smearproof, TURBO Markers will last the life of any product.

STERLING CABLE THRU BEAM INSTRUMENTS

Sterling Cable Company manufactures a full range of Electrical, Radio and Television wires and cables which is sold exclusively through Beam Instruments Corporation.

TV Lead-in Cables by Federal

Transmission Lines for Every Television Application by America's Largest Manufacturer of Solid Dielectric HF Cables

Type K-1046 300-Ohm TV Lead-In

Insulated with Federal "Silver" polyethylene—the revolutionary development that provides greater resistance to weather, heat and sunlight. Unchanging electrical and physical char-

acteristics assure long, trouble-free service. Installations are more attractive—silver insulation blends with any color scheme in home decoration.

GROUND RODS and CLAMPS

FOR RADIO AND TELEVISION

Copperweld Ground Rods and Clamps provide the reliable grounding protection necessary for successful performance, elimination of interference and safe operation of radio and television equipment. The rugged steel core gives the stiffness you need for easy driving. High conductance and lasting protection against corrosion are provided by the heavy molten-welded copper covering.

Millions of Copperweld Ground Rods are rendering permanent grounding protection. You're **SAFE** when you use Copperweld—the only Molten-Welded Ground Rods. They give you **PROVED** dependability — **PROVED** economy — **PROVED** longer service.

COPPERWELD GUY STRAND

Ideal for guying radio and television antenna masts and towers. It provides greater safety, permanent high strength and rust proof construction for the life of the antenna. Furnished in two sizes, 3 No. 18 (breaking strength 435 lbs.) and 3 No. 12 (breaking strength 2236 lbs.) Lengths of 100', 250' and 1000' are available.

COPPERWELD ANTENNA WIRE

Preferred for many years by professionals and amateurs. Because of its high strength, it maintains a fixed length. Furnished in 3 sizes, No. 12 Awg, No. 14 Awg and No. 18 Awg, in coil lengths of 100, 250, 1000 and 3000 feet.

COPPERWELD GROUNDING WIRE

Used to connect antenna mast to ground rod. Annealed for easy handling. Available in two sizes, No. 8 Awg and No. 10 Awg. Coils are furnished in various lengths ranging from 50 to 500 ft.

Copperweld is also for television twin-lead wire, coaxial cable, resistor and condenser pigtailed, radio tube parts and various allied components manufactured and sold by other companies.

**PACKAGED
WIRING SYSTEMS**

APPROVED BY
UNDERWRITERS
LABORATORIES, INC.

The Pierceway Packaged Wiring System shown here assembled is the 4-foot, 6-outlet system with back-feed section in center.

For more convenient
and efficient use
of portable power
tools . . .

Here is the quick, easy, economical way to get all the outlets you need for efficient use of portable power tools and appliances. With 2 outlets in each section of Pierceway plastic duct, you get an outlet approximately every 8 inches. Pierceway Packaged Wiring Systems are complete and ready to install, with copper conductors built in as an integral part of each section. These systems are easy to assemble and install—all you need is a screwdriver.

Pierceway Packaged Wiring Systems are available in both 2-wire and 3-wire systems, with a choice of end-feed or back-feed connection. Service is brought into feed section by non-metallic cable through any standard angle or straight 1/2-inch coupler.

Pierceway systems are packaged in 3 lengths: 4-foot system with 6 outlets; 6-foot, 8-inch system with 10 outlets; 9-foot, 4-inch system with 14 outlets.

FOR LARGER INSTALLATIONS

With the parts shown here, Pierceway systems can be assembled into many types and any size of electrical circuit. They provide an exceptionally flexible installation—if necessary, a Pierceway system can easily and quickly be taken apart and reassembled to meet any change in electrical distribution requirements. All parts are 100% salvable.

Pierceway systems can be provided for voltages of 125 and 250; for all types of 2-wire and 3-wire circuits; for single-phase or 3-phase systems, and for A.C. and D.C.

circuits. Made in bus capacities of 10, 15, 20, 30, 45 and 60 amperes. Available with outlets for 2-wire or 3-wire cord caps; with outlet capacities of 10, 15 and 20 amperes; with standard 2-wire or 3-wire polarized receptacles; with Pierceway Twist-Lock or Twist-Tite receptacles, and with adequate grounding facilities.

INSULATING TUBING SPECIALTY ITEMS

WALSCO SILICONE COMPOUND

For treating TV and amateur antenna lead wires, insulators and terminals to prevent impedance changes due to moisture conditions. Effective even in seacoast and marine locations.

This compound also prevents high voltage breakdown and arcing under humid conditions since it forms a moisture-repellent high-dielectric seal. WALSCO Silicone is very effective in waterproofing and preserving automobile and aircraft spark plugs and ignition systems.

WALSCO TELEVISION ANTENNAS

Exclusive advantages available in WALSCO Antennas assures outstanding performance in any climate . . . anywhere. All WALSCO antennas are unconditionally guaranteed for one full year. WALSCO originated the high tensile butt-seamed tubing in order to provide greater flexibility. It will not bend or break under adverse weather conditions. As a result of the exclusive U-bolt design, using hardened, serrated steel clamps, turning or slipping of the antenna on the mast is positively prevented. Antenna elements are made of special chromium - magnesium - aluminum alloy which has a 94% higher tensile strength than regular aluminum generally used for antennas. Special fold-over terminals with built-in strain relief are supplied with all WALSCO antennas and stacking bars. Stacking Kits are precision engineered for each antenna model and are formed to provide for an exact match to the transmission line. This guarantees maximum performance on stacked arrays.

WALSCO SIGNAL KING ANTENNA

The one antenna that does more to guarantee outstanding reception, trouble-free performance even in the fringe areas. The WALSCO Signal King, with its amazing new patented design, assures longer, dependable service under the most adverse weather conditions.

IMPORTANT FEATURES OF THE NEW SIGNAL KING ANTENNA

- High gain on all channels—no weak spots. Readily stacked for fringe area reception.
- Radically new insulator design (Patent Pending). Guaranteed unbreakable—outstanding and lasting dielectric properties, under all climatic conditions. Nothing like it anywhere.
- Marine type aluminum alloy elements. One end reinforced, other end sealed.
- Hi-Speed assembly—two nuts, three thumbscrews—takes less than two minutes. No loose hardware or parts.

WALSCO "DOUBLE-VEE" ANTENNA*

A new engineering idea in a Double-Vee Antenna . . . "TWINTUBE" element construction eliminates sag and makes breakage impossible; keeps elements in perfect alignment for lasting high-gain performance.

*Licensed under patents of the Workshop Assoc., Inc.

"TWINTUBE" elements have double wall, reinforced ends.

OUTSTANDING FEATURES OF THE WALSCO "DOUBLE-VEE" ANTENNA

- Extra-high gain on all channels.
- Highly directive—eliminates or reduces ghosts and interference.
- Completely assembled—no loose parts—ready in less than 30 seconds.
- "Twinlube" elements eliminate mechanical failure—even under severe weather conditions.
- New molded insulators guaranteed unbreakable—outstanding and lasting dielectric properties—nothing like it anywhere.
- Marine-type, chromium-aluminum alloy elements—closed outer ends.

WALSCO V-KING

A quality conical antenna embodying many outstanding and unique features. Improved mechanical design and excellent gain characteristics over entire TV spectrum. Readily stacked for fringe area reception.

WALSCO V-KING . . . The Quality Antenna

- New unbreakable high-impact styron insulator—silicone treated. Ideal for industrial or beach locations where soot or salt deposits are encountered.
- High tensile aluminum alloy element. Reinforced on clamped end—sealed on outer end to prevent wind noise or breakage.
- Weather-proof . . . corrosion-resistant alloys and A.N. specification plated hardware used exclusively.
- Fast assembly—Readily stacked.

WALSCO "5-ELEMENT YAGI"

Single-channel high-gain antenna of optimum performance. Designed for low signal areas or where interference makes a highly-directive array necessary. Cut for each channel. Improved signal-to-noise ratio. Minimizes co-channel or adjacent channel interference. Sharp forward pattern with negligible pick-up from sides or rear. Rugged aluminum-alloy construction. Completely assembled. No tools required.

BUILT FOR
RIGOROUS SERVICE

UNIVERSAL SWIVEL MOUNTS

Antennas built for the hardest mobile use. Separate components may be combined to meet any requirements. These rear-mounting Transmitting Antennas are designed for the 25-45 mc. services. Base mounts in such a way as to allow the whip rod to be held vertically regardless of contour of vehicle body.

← **SPP-3B**

SINGLE ROD

Special Alloy Whip Rod of maximum resilience and durability. 84" Single rod for use in the range of 30 to 45 mcs. Non-Corrodng, stainless steel tapered for proper stress distribution. Base Adapter threaded 3/8-24 to permit mounting on SPP-3 Base or SPP-3A Spring.

Individually packed. Approx. wt.: 2 1/2 lbs.

List Price \$11.50

SPP-12 →

ADJUSTABLE 2-SECTION ROD

Adjustable Rod. Telescopes from 85" to 103" and is equipped with a locking device that permits removal of the whip rod and replacement at the exact previous length. Heavy wall, hard drawn brass tubing — threaded 3/8-24 to fit either SPP-3 Base or SPP-3A Spring. See SPP-3B for Rod description.

Ind. packed. Approx. weight: 2 lbs. 10 oz.

List Price \$22.50

SPP-3

SWIVEL BASE

Swivel base for mounting at any desired point. Half balls of cast aluminum tapped 3/8-24 to accept whip rods and shock springs. Insulator of black bakelite — rubber gaskets — steel back-up plate. All screws are Allen Head type with wrenches supplied.

Individually packed. Approx. wt.: 1 lb. 10 oz.

List Price \$13.25

SPP-3A

SHOCK MOUNTING SPRING

This sturdy spring is used to lessen damage to the whip rod. A flexible lead through the center of the spring maintains constant electrical impedance through the spring assembly. 3/8-24 stud on one end — 3/8-24 tapped hole on opposite end — approximately 6" in height — made of oil tempered wire.

Individually packed. Approx. wt.: 2 lbs. 3 oz.

List Price \$7.90

← **NEW 10 METER MOBILE TRANSMITTING ANTENNA NEEDS BUT 1 HOLE FOR INSTALLATION!**

Ward's SPP-143 transmitting antenna can be installed on cowl, fender or flat rear deck of any automobile without the necessity of drilling a series of unsightly holes. It is developed to use one 15/16" hole, that can easily be plugged or used to mount a Ward 8-Ball standard broadcast antenna. The short, standard 55 1/2" rod reduces damage from overhead constructions.

MODEL SPP-143

List Price \$22.50

NEW POLICE TRANSMITTING ANTENNA → GIVES COMPLETE DISGUISE TO DETECTIVE CARS

To any criminal a long whip antenna is a police car giveaway. To achieve complete disguise, Ward engineered a standard automotive aerial to withstand transmitting currents and permanently fix the rod length.

MODEL SPPB-71

List Price \$22.50

MOTORCYCLE MOUNTS

These Antennas are designed for use on motorcycles and are built to withstand the rugged service and high vibration of vehicle. Rod is electrically short but can be used on all frequencies. 40" rod of same material as SPP-3B — 1/4-20 mounting stud in insulator for mounting to motorcycle. Flexible base of rubber to allow movement when rod is bent — Model SPP-6 with safety ring tip — no lead supplied. Individually packed. Approx. weight: 1 lb. 5 oz.

Model SPP-6 Ring Tip (Illustrated) List, \$9.25

ROOF TOP MOUNT

Developed for roof top mountings in 30 to 45 Megacycle range. Advantages of this type of antenna is that directional effects caused by car body shielding of antenna are avoided. Base is designed to be used with the SPP-3B rod which is sold separately. This unit consists of all components of Universal Swivel Mounts except that half-balls are replaced by SPP-3A Spring fastened permanently to insulator. No lead supplied.

Individually packed. Approximate weight: 3 lbs.

Model SPP-26 Base List, \$16.50

ROOF TOP ANTENNA →

This model is designed for taxicabs, police services, and others using the 140 to 165 Megacycles frequencies. Installed entirely from the outside of vehicle — 12 ft. length of RG-58/U coaxial cable attached permanently to antenna. Whip rod is replaceable.

Individually packed. Approximate weight: 1 lb.

DR. YAGI PRAISES WARD ENGINEERING

Dr. Hidetsugu Yagi, inventor of YAGI antenna, recently said of the Ward Yagi antenna: "The low numerical value of voltage standing wave ratio as recorded . . . is the proof of the exact matching between circuit elements. In this regard, I highly esteem the excellent ability of Ward engineers."

FM FOLDED DIPOLE

Bi-directional. Matched impedance to 300-ohm line for broad tuning, high signal gain over entire 88-106 mc. band. Adjustable mounting design for greater ease of orienting. Pre-assembly into component parts for quick installation. Contents: Dipole element of ¾" reinforced aluminum — molded bakelite insulator — 5 ft. 1" O.D. mast and guy wire ring — universal mounting base — conduit clamp—grounding solder lug—Technical Data and Instruction Sheets. Ind. packed: twelve to a master carton. Approx. individ. shipping weight: 5 lbs. List Price **\$9.40**
Model FM-55. 88-108 mc.

FM FOLDED TURNSTILE

Exceptional high signal gain from All DIRECTIONS. Does not require orienting. Packed complete, partially Pre-Assembled components for quick and simple installation. Contents: ¾" reinforced aluminum folded dipole elements — 5 ft. 1" O.D. mast — molded bakelite insulators — 60 ft. 300-ohm colinear line and ¼ wave length phasing loop—rubber stand-off pads — 6 plastic stand-offs, guy wire ring and conduit clamp — grounding solder lug — Technical Data and Instruction Sheets. Individually packed: six to a master carton. Approx. individ. shipping weight: 8 lbs. List Price **\$15.70**
Model FMT-56 88-108 mc.

FM REFLECTOR KIT — Model FMR-63 88-108 mc.

Combines quickly and easily to make high gain directional array with Model FM-55. Increases gain and eliminates reflections. Most effective when transmitting stations are in same general direction. Maximum energy transfer of signal from antenna to set as result of accurately determined spacing and correct reflector length. — Contents: ¾" reinforced aluminum reflector element—weather-proofed metal cross arm and brackets plus mounting hardware—Technical Data and Instruction Sheets. Ind. packed: six to a master carton. Approx. individ. shipping weight: 3 lbs. List Price **\$5.50**

THE WARD PRODUCTS CORPORATION

TACO ANTENNA EQUIPMENT

All Taco antennas are designed and manufactured to assure the serviceman and his customer of the most advanced antenna designs. Constant research in the laboratory and in the field assures mechanically and electrically perfect designs. Taco's workmanship is your insurance for long trouble-free performance. Taco Low-band antennas feature Jiffy-Rig construction whereby the installation man merely flips the antenna open and tightens a few screws and the antenna is ready for the roof. The Taco High-band

antennas are assembled by the Taco Click-Rig method, whereby the elements are swung into place and automatically locked, due to a spring-loaded action.

For the complete Taco antenna and accessory line, as well as complete technical data on the various antenna types, refer to Taco Catalog Number 35 and the various technical bulletins on individual antenna problems.

NEW 5-ELEMENT TWIN-DRIVEN YAGI

SPECIAL HIGH GAIN MODEL

A new antenna design incorporating the advantages of both the Twin-Driven Yagi and the 5-Element design. High gain provides reception in extreme fringe area installations where ordinary antennas fail. Excellent front-to-back ratio eliminates venetian-blind effect caused by co-channel interference.

Antenna consists of two directors, two folded-dipole antenna elements driven in parallel, and one reflector. The antenna elements driven in parallel raise the inherently low impedance of the Yagi design to match 300 ohm leadin, thus getting maximum energy from the array.

The 5-Element Twin-Driven antenna is designed primarily for fringe area installations. It is also used in many noisy locations in order to raise the signal-to-noise ratio. Unwanted signals are rejected due to the narrow beam width and sharp directivity of the antenna and the high gain minimizes the effect of noise pickup in the transmission line.

Light in weight, yet unusually sturdy, the Super 980-(*) is ideal for use with a rotator. Mechanically, the new antenna will withstand extremes in weather conditions.

The Super 980-(*) is available as either a single or stacked array, depending upon the available signal strength. The antenna is completely factory-assembled in the famous TACO Jiffy-Rig manner that requires only a few minutes to ready it for installation.

Comes tuned for any one of the low-band channels and is available in a stagger-tuned model, Super 980-(4½) or Super 981-(4½), that will receive both Channels 4 and 5. Specify channel desired.

CAT. No. SUPER 980-(*)—5-Element Two-Bay Twin-Driven Yagi Antenna less mast. (Ship. Wt.: 14 lbs.).....List Price \$47.00

CAT. No. SUPER 981-(*)—5-Element Single-Bay Twin-Driven Antenna less mast. (Shipping Weight: 7 lbs.).....List Price \$23.00

CAT. No. 989-(*)—Transmission lines for stacking 2 single-bay No. Super 981 antennas. List Price \$5.25

5-ELEMENT LOW BAND YAGI

The Taco 5-element Yagi is designed for the sub-fringe area same as the Twin-Driven Yagi shown above. It employs a two diameter type antenna section for stepping up the impedance of the antenna itself. With the directors and reflector element cut for each channel the match is correct for a 300 ohm transmission line.

The three directors give the antenna a very narrow pattern which helps to keep out ghosts and unwanted reflections. In areas with mountainous terrain a single bay antenna is frequently the only practical answer to the bothersome reflection problem.

The Taco 5-element Yagi is ruggedly built of hard-tempered heavy wall aluminum, designed with a high factor of safety—it's the "Storm-Proof" antenna.

CAT. No. 1325-(*)—ONE BAY YAGI ANTENNA. Consists of: 1 crossarm with U-bolt and saddle; 1 two-diameter driven antenna; 1 reflector and 3 directors mounted on crossarm. (Shipping Weight: 7 lbs.).....List Price \$16.00

CAT. No. 1326-(*)—TWO-BAY YAGI ANTENNA. (Consists of: 2 Cat. No. 1325-(*) assemblies with stacking lines. (Shipping Weight: 14 lbs.).....\$35.00

(*) Specify channel desired: 2, 2½, 3, 3½, 4, 4½, 5, 5½, 6.

CAT. No. 1350-(†)—ONE-BAY YAGI ANTENNA. Consists of: 1 two-diameter antenna element, 1 reflector and 3 directors mounted on crossarm; U-bolt and saddle. (Shipping Weight: 2 lbs.)

CLICK-RIG 5-ELEMENT YAGIS FOR CHANNELS 7-13

TACO's Click-Rig feature is a spring-loaded, fully automatic construction for rapid, foolproof erection. Used in all High-band antennas. Reception in the high frequency TV channels, especially for long distance reception, is often bothered by ghosts and weak signals. This is in part due to: greater loss in lead-in at the higher frequencies; lower sensitivity of the receivers in the high band; lower signal pickup due to shorter antenna elements.

To overcome these disadvantages it is recommended that high gain Yagi antennas, either single bay or stacked two bay Yagi's be used wherever possible. Higher gain antennas improve the signal-to-noise ratio at the receiver terminals, sharper directivity patterns reduce reflections and thus ghosts. A single-bay Yagi will cover 3 to 4 channels whereas a stacked unit will cover only a couple of channels due to the sharp tuning of the elements.

A High-band Yagi can be coupled with a low-band antenna by a Cat. No. 885 Matching Harness for feed through one single transmission line.

CAT. No. 1351-(†)—TWO-BAY YAGI ANTENNA. Consists of: 2 crossarms with U-bolts; 1 two-diameter antenna element, 1 reflector and 3 directors mounted on each crossarm; stacking lines. Click-Rig construction. (Shipping Weight: 5 lbs.)
List Price \$16.50

LOW-BAND ALL-CHANNEL LAZY-H ANTENNA TYPE 935

One of TACO's most famous antennas. Known as "old dependable." Lazy-II design with reflectors provides very high gain throughout the low-band. Used in many fringe areas as a stacked array. Improved electrically and mechanically over original design. When rotated 35° off broadside direction serves as excellent high-frequency antenna. Many of these antennas have been in service for as long as ten years.

CAT. No. 935-LM—LAZY-H ANTENNA. 2 antenna-reflectors mounted on separate crossarms mounting clamps stacking lines. (Shipping Weight: 6½ lbs.)
List Price \$19.50

TWIN-DRIVEN-CORNER ANTENNA

The TACO Twin-Driven Corner Antenna is a recent development in the line of all-channel antennas. It has an extremely high gain in channels 7-13. Its single lobe characteristic helps to reduce interference. It is recommended for all but the very fringe areas.

The Twin-Driven feature insures a stable field pattern as driven elements are easier to control than parasitically fed elements. It also accounts for the high front-to-back ratio.

Mechanically, this antenna is extremely light and rigid. It has low wind resistance which assures a quiet installation free from howling sounds. It is ideal for use with a rotator due to its high directivity and low weight.

May be stacked four high for extra gain in fringe areas.

CAT. No. 1700L—Stacked Twin-Driven Corner Antenna, consisting of: 2 bays of antennas with transmission line-crossarm; U-bolt mounting; stacking line with terminal panel and brace. (Shipping Weight: 6 lbs.).....**List Price \$20.50**

CAT. No. 1703—Single Bay Twin-Driven Corner Antenna, consisting of: two antennas with transmission line crossarm; U-bolt mounting. (Shipping Weight: 4 lbs.)
List Price \$8.50

FOLDED-VEE ALL-CHANNEL ANTENNA

The latest TACO all-channel design. Combines all the inherent broadband characteristics and mechanical rigidity of the folded dipole, along with the advantages of the conical forward angle. Excellent gain throughout all 12 TV channels. Recommended for medium signal strength areas. Available as single or stacked array. Folded dipole design results in an extra strong antenna mechanically.

CAT. No. 1400—Folded-Vee Antenna. Folded Dipole-Reflector with mounting V-bolt assembly. (Shipping Weight: 3 lbs.).....**List Price \$12.50**

CAT. No. 1402—Stacking Lines for converting two No. 1400 into stacked array. (Shipping Weight: 2 lbs.).....**List Price \$5.25**

LAZY X ANTENNA SERIES 950AL

One of the most popular types for areas where several channels are operating in both bands; introduced by TACO in 1940, the Lazy X has proved its versatility in both bands through its high gain, and stability of impedance at different frequencies. High front-to-back ratio helps eliminate reflections and co-channel interference from sides and rear. Available as either a 2 or 4-bay stacked array or as a single antenna. Stacked array providing approximately twice the gain of the single antenna. Matches popular 300-ohm lead-in. All Aluminum construction.

- CAT. No. 950AL—Stacked Lazy X Antenna for Channels 2-13, 2 X-Antenna-reflectors, connecting transmission line between antenna, accessories. (Shipping Weight: 12 lbs.) **List Price \$31.00**
 CAT. No. 953A—Single Lazy X antenna less mast (Shipping Weight: 5 lbs.) **List Price \$14.00**

- CAT. No. 954A—Transmission lines for stacking 2 single-bay antennas. (Shipping Weight: 3½ lbs.) **List Price \$2.50**
 CAT. No. 949A—Transmission lines for stacking two 2-bay antennas into a four-bay unit. (Shipping Weight: 1½ lbs.) **List Price \$4.75**

TRI-X ANTENNA SERIES

This antenna has been designed to provide extra gain on the upper end of the high-band. Where channels 11, 12, or 13, are weak, this antenna will outperform the Lazy-X design. The forward angle has been greatly increased over the Lazy-X. The single rod reflector provides practically the same gain as the X-type reflector. All aluminum construction.

- CAT. No. 1000—Stacked Tri-X antenna. Jiffy-Rig construction, 2 single-bays with transmission line for stacking. (Shipping Weight: 10 lbs.) **List Price \$25.00**
 CAT. No. 1001—Single Tri-X antenna, Jiffy-Rig construction, single-bay. (Shipping Weight: 5 lbs.) **List Price \$12.00**
 CAT. No. 1012—Stacking kit for above Tri-X antennas. Stacks two. Includes connecting transmission lines and terminal panel **List Price \$2.50**

JIFFY-RIG TELEVISION ANTENNAS HI-LO BAND ANTENNA TYPE 925L

An improved version of the original TACO Hi-Lo Band Antenna. Used in medium to high signal strength areas where both bands are operating. Has advantage of independent orientation for each antenna. Matching network minimizes interaction between elements and makes possible the use of one lead-in. In weak signal areas, separate leads from high and low with a switch at the receiver are recommended, or the addition of the special TACO No. 885 network. Sturdily constructed.

- CAT. No. 925L—Hi-Lo Band Antenna. High and Low-band folded-dipole antenna-reflectors, matching stub, accessories, mast swivel base. (Shipping Weight: 5 lbs.) **List Price \$16.00**
 A modification of the Hi-Lo band antenna for service in fringe areas where the signals are weaker. Yagi design in both the high and low-band elements gives added gain and directivity.
 CAT. No. 921L-(*)†—Hi-Lo Band Yagi Antenna. 1 Yagi high-band antenna, 1 folded dipole low-band antenna, matching network, accessories. (Shipping Weight: 5 lbs.) **List Price \$21.00**
 CAT. No. 922L-(*)†—Hi-Lo Band Yagi Antenna. 2 high-band Yagis, 1 low-band Yagi. Matching network for connecting elements, accessories. (Shipping Weight: 6 lbs.) **List Price \$30.50**

HI-LO BAND IN-LINE ANTENNAS

An all-channel antenna that features simplicity and compactness. Designed for average strength areas where all channels are received from one direction, or for use with a rotator. On the high-band, the low-band antenna acts as a reflector for the high-band antenna. Broad-band folded dipoles show good impedance stability over both bands. Connecting stub works efficiently in most locations of fair signal strength.

- CAT. No. 930L—Hi-Lo Band In-Line Antenna. In-line hi-lo band antenna, connecting stub. (Shipping Weight: 5 lbs.) **List Price \$14.50**

STACKED IN-LINE ANTENNA

Designed for areas where both the high and low bands are desired, this antenna provides almost twice the gain of the single in-line antenna. Antennas are stacked to provide a more constant gain over the 12 channels than the single array. May be used as a higher gain antenna in weaker areas, or again as a broad-band antenna in locations where many channels are received. Ideal for use with rotator, being a single lobe antenna. Matches 300-ohm lead-in and receiver input.

- CAT. No. 932L—Stacked In-Line Hi-Lo Band Antenna. 2 In-line antenna-reflector assemblies, stacking transmission lines, mounting hardware. (Shipping Weight: 9 lbs.) **List Price \$27.50**

JIFFY-RIG TELEVISION ANTENNAS

TANDEM YAGI ARRAY

The optimum in high-band reception. For the toughest assignments in high-band installations. Exclusively TACO design and manufacture. This antenna will produce acceptable results where other antennas produce nothing.

In addition to the high gain, this antenna has the advantage of matching either 300 or 72 ohm line with no modifications. The four Yagi antennas are brought together by 300 ohm transmission lines to one terminal post which has 72 ohm impedance. A 1/4 wave transformer is used to step up the impedance for connection to a conventional 300 ohm ribbon transmission line. In noisy locations it may be desirable to use 72 ohm coax, and therefore this antenna offers a real advantage in this respect.

CAT. No. 967L-(†)—Tandem 16 Element Antenna, consisting of: 4 Yagi arrays, 2 crossarm assemblies with U-bolt mounting clamps; four 300 ohm connecting links; two 1/4 wave length matching transformers with terminal panel; two 1 1/4" dia. (Shipping Weight: 8 lbs.) ...List Price \$32.75

FM ANTENNAS

FM OMNIDIRECTIONAL ANTENNA TYPE 624

An exclusive Taco design permitting FM reception from all directions with nearly the same gain as a single dipole, which is unusual for a non-directional type. Maintains practically constant gain throughout entire FM band. Bandwidth and gain greater than that of turnstile antenna.

Available as either a single antenna or stacked array for the weaker areas. As stacked array, it may be peaked for the weakest station.

CAT. No. 624-L—Omnidirectional antenna, "S" type folded dipole with terminal, 5-ft. mast, accessories. (Shipping Weight: 5 lbs.) ...List Price \$7.50

CAT. No. 624ST-L—Stacked omnidirectional antenna, 2 "S"-Type folded dipoles, stacking transmission line, terminal panel and mounting clamp, 2 5-ft. mast sections, accessories. (Shipping Weight: 6 1/2 lbs.) ...List Price \$15.75

FM FOLDED DIPOLE ANTENNA-REFLECTOR

The folded dipole is rated as the best FM antenna type, inasmuch as the band spread is only 10% above and below the mean frequency. It has a flat response over entire FM band. Ideal for noisy locations due to pinpoint directivity. Rugged mechanically. Electrically perfect.

CAT. No. 620-L—Folded dipole antenna-reflector. Folded dipole, reflector with crossarm, 5-ft. mast. (Shipping Weight: 4 3/4 lbs.)

List Price \$9.50

CAT. No. 635—Stacked folded dipole antenna-reflector, 2 folded dipoles, 2 reflectors with crossarms, 2 transmission lines with terminal panels, 2 5-ft. mast sections, mounting hardware. (Shipping Weight: 9 1/2 lbs.)

List Price \$18.50

TV-FM ANTENNA ACCESSORIES

U/L APPROVED LIGHTNING ARRESTER. A very important item in installations often overlooked. Protect yourself as well as your customer by using one of these Taco carbon-pile resistor type arresters. This is the type approved by the Underwriters as well as local codes. Standard package: 10.

CAT. No. 409—Lightning Arrester. (Shipping Weight: 2 lbs.) List Price \$1.35 each

BASE MOUNT. Versatile base mount for masts. Adjustable for any roof angle, adapts to flat, vertical or sloping surfaces. Will accept mast from 1" to 1 1/2" in diameter. U-bolt with V-type saddle assures positive, tight grip to prevent turning. Heavy duty quality. Plated to withstand weather.

CAT. No. 880—Base Mount—Standard packing: 10. (Shipping Weight: 5 lbs.)List Price \$0.80

MAST GUY ANCHOR. A fixed mast anchor for guy wires. After being tightened, will prevent mast from turning. Very rugged. Standard package: 10.

CAT. No. 192—Mast Guy Anchor. (Shipping Weight: 1 1/2 lbs.) List Price \$0.40

GUY ANCHOR. This anchor has been designed for use where the mast must be rotated for orientation, or where there are only a few spots on the roof for anchoring guy wires. Mast may be erected with guys attached, and tightened with turnbuckles after erection. Standard packing: 10 per carton.

CAT. No. 867—Guy Anchor. (Shipping Weight: 2 1/2 lbs.)List Price \$0.60

MAST COUPLING. Designed to assure positive coupling of mast sections. Will connect 1 1/4" or 1 3/8" tubing in tight grip through use of three 1/4" bolts. Standard package: 10 per carton.

CAT. No. 189—Mast Coupling (Shipping Weight: 5 lbs.)List Price \$0.85 each

MAST BRACKETS. Heavy duty brackets for mounting mast to wall, chimney or parapet. Provides rigidity by spacing brackets far apart. Made of heavy steel, hot-galvanized to resist rust. Will accept 1 1/4" or 1 3/8" diameter masts.

CAT. No. 190-7"—2 Brackets for 7-inch clearance from mounting surface. (Shipping Weight: 2 1/2 lbs.)List Price \$2.85

CAT. No. 190-14"—2 Brackets for 14-inch clearance from mounting surface. (Shipping Weight: 4 lbs.)List Price \$4.00

CAT. No. 190-21"—2 Brackets with brace for 21-inch clearance from mounting surface. (Shipping Weight: 6 lbs.)List Price \$5.50

TACOPLEX MASTER ANTENNA SYSTEM

▶ FOR APARTMENTS

▶ FOR COMMUNITIES

▶ FOR STORES

A product of one of the oldest designers and manufacturers of master antenna systems in America—TACO. A result of years of research into the requirements of master TV antenna systems for apartments, stores and communities.

The TACOPLEX Master Antenna Distribution System amplifies the TV signals and provides means for mixing and distributing them. As many as 200 TV receivers can be operated from one Master Chassis. However, several master chassis can be interconnected and operated from one set of antennas. In community systems one antenna system can easily feed 500 receivers. All equipment has been designed and manufactured to provide the dependable day-in, day-out service required by installations in apartments, stores and community installations.

The TACOPLEX System consists of the antenna array, the power amplifier and isolation boxes. All connections are made through coaxial cable to minimize noise pickup, and afford complete flexibility.

The required array is the TACO Yagi type antenna, for maximum signal-to-noise pickup. The signal is fed into the TACOPLEX power amplifier where individual, plug-in type amplifier strips boost the signal 200 times. Each amplifier strip has an individual gain control, thus making it possible to have all channels traveling in equal strength to the receivers. The signals are then fed through a mixer chassis that funnels all signals into the leads connected to the isolation boxes.

The mixer chassis is available in two models—tube-type and tubeless. The tube-type is ideal for store installations as it provides ten outlets. Two of high signal strength which can be used for the service shop where many receivers may be connected to

them through isolation boxes. The other eight of signal strength sufficient for very fine receiver operation at

the point of demonstration. The use of such a system in TV merchandising opens new opportunities for dealers. The tube-type mixer is successfully used for signal distribution in community installation systems. One thousand feet coaxial cable runs to distant receivers are practical.

The tubeless type of mixer chassis provides two high-signal-strength outlets which feed into transmission lines to the isolation boxes.

The new TACO isolation box-type 1585 is of the non-powered type providing complete isolation with minimum power drain from the transmission line. By using several master chassis in series, hundreds of receivers can be fed from one lofty antenna array.

The system using the tubeless type of mixer chassis is recommended for apartment house installations where one TACOPLEX System will provide television service for up to 200 TV receivers.

The present TACOPLEX System is used for Community Service installations where a master antenna is installed for a whole community, and the signal, via a high powered TACOPLEX System, is distributed to subscribers. This makes possible television in many communities beyond the useful range of stations, and has been used in communities as far as 100 miles from the transmitter.

For complete technical data and information, ask for the complete TACOPLEX Cat. No. 36 or write directly to Service Engineering, TECHNICAL APPLIANCE CORPORATION, Sherburne, New York.

PREMAX

Telescoping and Whip Antennas

PREMAX STAINLESS STEEL AUTO-MANIC ANTENNA

The Premax "Auto-Manic" Antenna can be raised or lowered with one hand, thus meeting the need for a marine installation that can be lowered simply and easily when passing under bridges or other obstructions.

The "Auto-Manic" locking device on each of the telescoping sections is free to move when the sliding sections travel upward and binds them securely when reverse pressure is applied. Each section can be extended inches at a time with one hand and will lock at any point. At full extension of each section, a positive locking action occurs which is proof against severe strains and vibrations. To lower the antenna, it is only necessary to raise a special ring on the base section which releases the lower lock. As the second section telescopes into the base, it releases the second lock and so on until the entire antenna is retracted, making about a 6' unit.

The Antenna is made up of sections of a special grade of welded stainless steel tubing, hard-drawn to an extremely high tensile and yield strength. Made in three, four and five sections. Standard Premax Mountings and Insulators will fit these Antennas.

PREMAX ALUMINUM ANTENNAS FOR LIGHT WEIGHT

Premax Adjustable Aluminum Antennas have the light weight with corrosion resistance and adequate strength to meet the needs for marine, mobile and commercial installations where convenience in erecting and dependable performance are requisites. They are built up of specially-drawn, seamless, tempered aluminum tubing with diameters and gauges to withstand wind velocities up to 60 m.p.h. Positive locking device is provided. Available in six lengths.

STEEL ANTENNAS FOR LOW COST

Low-cost, satisfactory Adjustable Tubular Steel Antennas that can meet budget requirements for commercial, municipal, amateur and other installations. Made of carefully engineered high-tensile, copper-nickel steel tubing, heavily cadmium plated and highly resistant to corrosion. Available in two, three, four, five and six-section models, varying from 11' 8" to 33' 9" extended length, fully telescoping and adjustable at any height. Simple, positive locking device provides secure and efficient electrical contact between sections. It is advisable to guy these antennas or support by stand-off insulators against abnormal winds or severe strains. NOT recommended for marine use on salt water.

ONE-PIECE SOLID TAPER WHIPS—TYPE E

The Type E Antennas have been designed for maximum strength and the required flexibility. Available in three types:

Aluminum Type—Employing a new aluminum alloy of exceedingly high strength. Recommended where durability, lightness and corrosion-resistance are paramount. 3/8" base tapering to 1/8" tip. Has an adaptor to fit all Premax mountings.

Chrome Silicon Steel Type—Exceptionally high tensile strength and uniformity of temper. Special heat treatment give high fatigue values. Base 1/4" tapering to 3/32" tip.

High-Tensile Stainless Steel Type—Special formula stainless steel, double previous strength—a hardened and tempered grade that compares favorably with the best spring steel, yet has the added advantage of stainless corrosion-resisting properties. 1/4" base, 3/32" tip.

JOINTED STEP-TAPER WHIPS—TYPE A

Type A Rods are made up of rods of varying diameters, jointed securely and permanently into a single step-tapered Antenna with 1/4" base fitting all Premax Mountings. Available in extremely high carbon content steel, heat-treated and oil-tempered and heavily cadmium-plated; also in polished hard-drawn stainless steel, highly corrosion-resistant.

SERIES B CENTER LOADED ANTENNAS FOR 2 TO 8 MC. COVERING AMATEUR "75", MARINE, AIRPORT, C.A.P. AND PUBLIC SERVICE FREQUENCIES

Premax Center Loaded Antennas are practically a "must" for efficient operation on all communication frequencies—mobile and marine—between 2 and 8 Mc. The basic 75 meter Antenna covers the entire mobile phone band. Other coils are available to cover the 2,000 to 3,000 Kc. marine, airport 3105 Kc., CAP 2374 Kc. and public service frequencies.

The 75 meter Mobile Antenna consists of a 6-foot tapered whip of either high-tensile aluminum alloy, high-tensile stainless steel or high-carbon heat-treated steel, mounted above a loading coil and a special aluminum alloy base rod 24 inches long, with couplings to fit any standard Premax Mount. Coil is wound on a specially treated wood form, weatherproofed after winding with low-loss insulating varnish.

With this Premax Center Loaded Antenna, a gain of 8 decibels or more can be secured over conventional "whip" types, which is equivalent to multiplying the power by 6.3 times. The importance of this gain is immediately apparent as it is a most inexpensive way of extending both the transmitting and receiving range.

This antenna may also be used for multi-band amateur operation by shorting out turns (approximately 75% on 14 Mc.) or by completely jumpering out the coil to make an efficient quarter-wave antenna on 10 meters.

Where it is not possible to utilize a 9½-foot antenna, the base section may be omitted. This results in a base-loaded Antenna with an effective gain of 6 decibels—equivalent to quadrupling the power over a plain type antenna.

* Amateur, Airport and C.A.P. Antennas can be used with various Premax Mountings as shown on page S-61. Type RS or Type S are particularly recommended.

SERIES C CENTER-LOADED TELESCOPING MARINE ANTENNA, 2 TO 3 MC.

The Premax Center-Loaded Collapsible Vertical Antenna, Type C, is especially designed for marine use and gives a remarkable gain over the signal produced by a straight vertical where the loading coil is housed in the transmitter cabinet. At the high-frequency end of its 2,000 to 3,000 Kc. range it gives a measured effective signal power gain of 6 decibels . . . equivalent to quadrupling transmitter power output.

This Antenna consists of two telescoping, adjustable base sections of seamless aluminum, monel or stainless steel tubing on which the loading coil is mounted, with a tapered top whip section. The total extended length is about 17 feet. The base section collapses to a single unit and the whip section telescopes through the coil into the lower sections, making a collapsed length of 7 feet. Coil is wound on low-loss bakelite tubing and treated after assembly with weatherproof varnish.

The base presents such a low impedance that little loss is experienced due to icing, wet weather or water spray. The line feeding the base is a low impedance line and is not critical as to length and body-capacity effects.

PREMAX ROTARY BEAM KIT—6, 10, 11 METERS

A 20-pound Beam for 6, 10 and 11 meters, built to commercial standards! Has a braced frame of heavy-duty angle aluminum and solid fibre insulation blocks that will not crack or snap under vibration and shock. Each telescoping element can be tightly clamped to provide positive connection. Parasitic elements may be left open at the center with tuning hairpins inserted or may be used as six elements on 6 meters.

The RB-6309 Kit includes frame and three pairs of elements with necessary insulators and hardware, including T-match accessories but without transmission line. Complete in single carton.

PREMAX CORULITE ELEMENTS

Premax Corulite Elements are designed to meet the need for lightweight but sturdy elements for use in horizontal arrays and similar applications. They are unusually light in weight and their special corrugated or reeded design provides exceptional strength and rigidity so essential in horizontal types of installation. All parts are heavily electro-plated to provide corrosion resistance and high electrical conductivity. A positive clamp, spot-welded to the tubing, permits adjustment in length and assures rigid joints and positive electrical contact between the telescoping sections. Ease of adjustment between the two halves of each component element is provided by the Premax "Hairpin" Tuning Bar. By its use it is possible to have all of the elements set at a single physical length and the variation in their electrical length may be accomplished by the "Hairpin."

Corulite Elements are available in two or four-section units as shown in the specifications below. These elements meet all requirements for the various arrays in general use and are ideal for combinations in commercial, F.M. television or amateur bands.

160 MEG ANTENNA

The Premax 160 mc. Roof Antenna is designed so that complete installation can be accomplished from the outside of the car by one man. A single small hole is cut in the metal roof, thru which the coaxial line may be fished and connected to the insulator mounting. The entire unit is then securely clamped to the roof and sealed by a rubber gasket. The antenna is stainless steel wire 18" long with ball tip and threaded fitting. Suitable for all frequencies in the 152 to 162 mc. band.

NO. DSK-118—Complete Antenna Assembly, less transmission line.

NO. DS-118—Antenna only.

NO. DSJ—Antenna with one-hole mounting, porcelain insulator.

Type R-1

TYPE R-1 Universal Mounting consists of solid aluminum split-ball fixture which can be adjusted to any angle. Attaches through heavy plastic insulation disc fitted with waterproof gasket. New type backplate provides positive ground and shielding for co-ax connector.

Type RS

TYPE RS Universal Mount as above, combined with spring in one unit. Includes new shielding and grounding plate.

Type F

TYPE F—New single-hole, super-strong, ball-and-socket mounting for fender, cowl or gravel pan. Will support 8' whip, 30° adjustment. Chrome-plated brass with heavy plastic insulation. Replaces any existing fender or cowl antenna without new holes. Fits all Premax 1' whips.

Type SA

TYPE S Spring Mount for roof or horizontal surface is a heavy-duty spring with plastic insulation, rubber gasket and steel backplate. Socket top to fit antenna. Over-all height about 5", base diameter 3".

TYPE SA Spring Adaptor is a supplemental mounting to be used with any Premax Mobile Mounting except R-1 and permits antenna to withstand shocks when in contact with overhead obstructions. Height 4 $\frac{3}{4}$ ", diameter 1 $\frac{1}{2}$ ".

Type K

TYPE L Insulated Bumper Mounting; permits 10" adjustment in antenna height. Has two pairs of ceramic insulators spaced 6" apart. Bracket parts heavy cadmium-plated steel.

TYPE XL Insulated Panel Mounting is similar to Type L above excepting that it does not have the steel bracket.

Type TA

TYPE K Insulated Bumper Mounting permits 10" maximum height adjustment of antenna. Insulators are heavy-duty glazed ceramic cones; bracket heavy cadmium-plated steel.

TYPE TA Trunk or Panel Mounting fits any contour of surface. Insulators are white glazed ceramic cones; lower support a solid brass rod joined to 12" brass tube with locking device at top; upper support 24" brass rod adjustable at any height on tube. Antenna tube provides for 10" maximum adjustment in antenna height. All metal parts heavily cadmium-plated.

Type NA

TYPE NA Bumper Mounting permits attachment by means of two heavy bolts and steel backplate. Special heavy-duty glazed ceramic cone with locking device.

Type V

TYPE V—Through-deck Mounting for B-25 Antenna or similar. (See page S-64) White porcelain cones, brass stud threaded $\frac{5}{16}$ "-24.

WORKSHOP ANTENNAS and ACCESSORIES

DUBL-VEE ANTENNA

MODEL VV — DUBL-VEE TV ANTENNA

The original patented DUBL-VEE antenna. All-channel, high gain, sharp directivity, and close match assure superlative reception — clear, steady, sharp pictures. Streamlined design and high structural strength make it equal to the most severe weather conditions. Assembly is easy and quick — a matter of seconds — saves time, expense, and trouble.

The remarkably high gain extends receiving distance, especially on high channels (see table).

MODEL 2VV — Double-stacked DUBL-VEE Antenna with twin lead cable harness connecting bays.

MODEL 2VV-A — Deluxe Double-stacked DUBL-VEE. Employs carefully engineered stacking bars to connect bays and make the entire assembly more rugged.

SERIES A — 3-Element TV Antenna — This is a high-gain (5 db.) directional antenna, made in 12 models — one for each TV channel. It is the basic unit of all WORKSHOP multi-channel systems and provides the ultimate in television reception. Designed for use with coaxial cable, ghosts, snow, and all types of interference are cut to a minimum. Elements are rugged, lightweight, 1/2 inch duraluminum. Pre-assembled, fold-up elements make installation fast, easy, foolproof — clamps on masts up to 1 1/4 inches in diameter. For multiple mounting on a single mast, see table.

SERIES 2A — Super High-Gain 6-Element Array — This array consists of two 3-element Series A bays spaced 1/2 wave apart and connected by a cable harness. Gain is 7.8 db. on its specified channel and 5 db. on adjacent channels. Provides outstanding reception up to 100 miles. Uses RG 51 or other 52 ohm coaxial line. Can be used with 300 ohm line in conjunction with Model T-300 matching transformer.

AMATEUR ANTENNAS — The Workshop offers a complete line of antennas for all amateur bands — 2, 6, 10 and 20 meters and for UHF. For exceptionally high gain on the 6- and 10-meter bands, double-stacked arrays are available. Write for "Amateur" Catalog.

SOLDERLESS CABLE FITTINGS

Silver Plated Solderless Cable Connector (Male)

Model W-50

Used with W-59 (RG-59/U) coaxial cable. Specially slotted to withstand considerable strain. Mates with W-60 receptacle (on R-4A switch) and W-80 junction listed below. Individually packaged and plainly marked. List Price \$0.60

Silver Plated Chassis Receptacle (Female)

Model W-60

Mates with W-50 cable connector. For chassis or panel mounting. Threaded stem 3/8 inch long. Soldering terminal protrudes from rear. Individually packaged and plainly marked. List Price \$0.80

Silver Plated Cable or Panel Junction (Female)

Model W-80

Mates at either end with W-50 male connector. A complete splice requires one W-80 junction and two W-50 connectors which must be ordered separately. Each W-80 individually packaged and plainly marked. List Price \$1.00

Cable Adaptor

Model W-100

Required when changing from larger size W-11 (RG-11/U) or W-8 (RG-8/U) to smaller W-59 (RG-59/U) coaxial cables. No soldering necessary. W-50 cable connector furnished. Individually packaged and plainly marked. List Price \$2.50

ACCESSORIES

Matching Transformer

Model T-72

Matches 72 ohm coaxial cable such as Workshop W-59 (RG-59 U) to 300 ohm receivers. Voltage step up of 2 : 1, with a flat response over the TV channels from 52-216 mc. A W-50 solderless cable connector is furnished. Size 2 inches long, 1-inch diameter. Strap provided for grounding and mounting container on receiver chassis. Negligible mismatch when used with W-8 52-ohm coaxial cable and W-100 adaptor. Individually packaged.

List Price \$4.00

New Coaxial Switch (SP4T)

Model R-4A

This virtually lossless, constant impedance switch will connect any one of four single-channel TV antennas to a receiver. By simply using additional switches it can also be used for demonstrating any number of TV receivers in a display room, or for low-level audio applications.

Receptacle fittings mate with W-50 solderless connectors for W-59 cable and must be ordered separately. Decals are supplied for panel marking of TV channels. Only one 7/16-inch hole need be drilled for panel mounting. Size—2 3/4 inches front to back; 2-inch diameter. Individually boxed.

List Price \$12.00

Model T-300

Exterior Matching Transformer

Completely weatherproof device for converting 72 ohm antennas for use with inexpensive 300 ohm Twin Lead transmission line at reasonable efficiency. Can also be used with 300 ohm antennas to realize benefits of 72 ohm coaxial cable. Individually packed.

List Price \$3.50

● **MODEL HIR**—the ultimate, fully automatic Alliance Tenna-Rotor. Simply set pointer—antenna turns to that point and stops. Light moves along dial—shows antenna position while rotating. No fumbling or "hunting" for direction—eraseable dial provides directional marking. Quickly accessible connections on control box make for fast installation. N—E—W—S directions shown. By far the most practical and convenient rotator!

● **MODEL DIR**—provides positive accurate instant control of rotation—has direction indicator dial.

● **ALLIANCE TENNA-SCOPE**—new Alliance Booster with two tubes offers electronic features for maximum reception in both fringe and primary TV areas. Features exceptional high channel reception; uniformity of picture and sound. Superbly styled walnut plastic case blends with all furniture. Brings in more stations, clearer, brighter images, stronger signals—works with indoor or outdoor antenna. Low noise factor.

● Special Alliance 4-conductor "ZIP" cable can be used with all Alliance Tenna-Rotors to speed installation. Alliance TV products are backed by more national advertising than any other TV accessories! Alliance Tenna-Rotor is the universal rotator!

TELEVISION ANTENNAS

COMPLETELY NEW DESIGN — BUILT TO LAST
RCA 12-CHANNEL TELEVISION ANTENNA —
TYPE 204A1

BASED UPON YEARS OF FIELD EXPERIENCE
 • Easily Assembled • Ruggedly Constructed • Uni-Directional

Here's an RCA "Leader" to meet the majority of your everyday antenna needs. Engineered and developed by RCA for plus-value service, RCA-215A1 is intended for use in most receiver locations where both high and low-frequency stations are in the same general direction. Unique RCA "V" attachments provide uniform directional characteristics for all 12 channels.

RCA-215A1 12-Channel Television Antenna is simple in design and appearance. Sturdily built of aluminum, it will withstand high winds, sleet, and ice. Designed for use with 300-ohm transmission line, the 215A1 rates "A" for antenna achievement:— for over-all performance and unusually flat response over each of the two television bands.

Supplied with all necessary hardware but less mast. Completely illustrated instructions for installation are included.

THE RCA REVERSIBLE-BEAM TV ANTENNA
ARRAY — TYPE 212A1

For Locations with Co-channel Interference

The RCA Reversible-Beam TV Antenna Array receives signals from only one direction at a time; eliminates co-channel interference where stations are approximately 180° apart. It also eliminates adjacent-channel interference where the receiver lacks selectivity. RCA-developed "V" attachments provide uniform directional characteristics for all twelve channels. A high overall front-to-back ratio is achieved through the use of driven elements, instead of parasitic elements. This design also makes possible the unique feature of lobe switching.

Sturdily built throughout of high-quality aluminum, the RCA Reversible-Beam Antenna consists of an array of four eight-foot dipoles in the form of a square. A dual transmission line connects the horizontal and vertical dipoles to an attractively packaged diplexing network located at the rear of the receiver. By the mere flick of a switch on the diplexer, antenna directivity can be reversed.

ANTENNA ACCESSORIES

Bright Picture Transmission Line

Especially designed for Television and FM. Special chemical-resistant plastic finish insures continued flexibility even in extreme heat or cold. Ultralow loss—less than 0.8 db per 100' at 50 Mc; less than 1.2 db per 100' at 100 Mc. 4.5 $\mu\mu\text{f}$ per foot capacitance. Propagation velocity 83%. Extra strong—supports a mile of its own weight (75 lbs.) before breaking. Stock No. 201A1. Sugg'd List Price: \$50.00 per 100'.

201A1

Antenna Mounting Brackets

Readily adjustable to permit mounting on any roof—regardless of overhang. Can be attached to brick, stone or wood. Entire bracket is plated with bright zinc, preventing rusting and subsequent staining of building surfaces. Special angular supports eliminate sagging. Stock No. 227A1. Sugg'd List Price: \$6.75 per pair.

227A1

Twin-Lead Lightning Arrester

For use with FM and TV antennas. Easy to install—cutting or stripping of transmission line is unnecessary. Fits any 1/2"-2" pipe. Continually dissipates static surges. Does not unbalance line. Brown plastic case. Stock No. 214X1. Sugg'd List Price: \$1.10.

New outdoor type arrester—wood screw firmly secured in body—no special tools needed. Stock No. 215X1. Sugg'd List Price: \$1.25

VEE-D-X MIGHTY MATCH

The VEE-D-X divider network is a great new development that permits the use of a single transmission line between separate high and low antennas mounted on same mast. Saves transmission line — saves installation time and money — saves extra accessory costs.

HOW MIGHTY MATCH OPERATES

The Mighty Match isolates the high and low channel antennas by preventing the undesirable high frequency signal received by the low band antenna from entering the transmission line. The Mighty Match also eliminates the partial shunting effect of the high band on the low band antenna.

VEE-D-X SECTIONAL TOWER

For Microwave — Communications — TV & FM — Radar

VEE-D-X towers are designed for use at any height from 10 to 200 feet, depending on load. They are self-supporting up to 20 feet and, where space is limited, semi-guyed* type installations may be used at 30, 40, and 50 foot heights. To facilitate erection of tower, the base mount is hinged so that several sections may be assembled on the ground and swung into position. VEE-D-X towers may be ordered by separate components or as a complete package for a specific height. (Either guyed or semi-guyed.)

* Semi-guyed towers employ one set of guy cables attached at a height of 10 ft. up the tower and anchored at a 6 ft. radius from the base.

- Rugged, all-welded construction diagonally laced with angle iron for maximum rigidity.
- Can be erected on ground or on flat or peaked roof.
- Patented plate spaced at two foot intervals prevents twisting and affords rigidity found in no other tower.
- Safe and easy to climb.
- Completely galvanized, light weight tubular steel . . . 20 ft. section 80 lbs.

"CONICAL-V-BEAMS"

The only Antenna that can produce FULL TONE, FULL VIDEO and Highest Signal to Noise ratio on all Frequencies!

TECHNICAL NOTES

Telrex "Conical-V-Beams" technically and practically assume characteristics similar to solid cones, giving broad band and high gain response with full audio and video band pass over the entire television frequency range. Therefore, "Conical-V-Beams" outperform any other antenna.

Nominal center impedance is 150 ohms and non-varying due to conical configuration. The dipoles are tilted forward presenting a "V" to the incoming wave, forcing the forward lobe to remain in line irrespective of channel being received. Thus the Telrex dipole is an effective $\frac{1}{2}$ wave element on channel 2, increasing to $\frac{3}{8}$ wavelength on channel 3, and increasing in effective "V" beam action to channel 13 where it becomes a full wavelength on each leg with the maximum receiving lobe being in line. The reflectors are effective at all frequencies with a front to back ratio of better than 12 DB on all frequencies. The "Conical-V-Beam" is the only antenna which can produce in this manner.

Unlike other methods of covering both bands, Telrex antennas do not introduce phase shift or favor one band versus the other and only one transmission line is used. Where stations are displaced beyond the normal acceptance lobe of a single "Conical-V-Beam" or array, the DO-X (Duo Orienting) array is recommended. This permits separate orientation of two groups of stations at any angle. Only one transmission line is needed due to the unique Telrex coupling line and phasing loop.

When the stations are within a 5 to 15 degree sector, the Telrex antenna used for maximum efficiency at low frequencies becomes a much more efficient antenna on the high frequencies than a separate cut-to-frequency stacked antenna.

The 150 ohm non-varying center impedance makes it possible to use any of the commercially available transmission lines from 75 ohm coaxial, to 300 ohm ribbon, with a standing wave ratio never exceeding 1.6 to 1 on any channel. Standing waves cause excessive phase-shift, blurred pictures, multiple images and decreased sensitivity.

"Conical-V-Beams" will outperform any cut-to-frequency antennas.

You are invited to consult our engineering staff on any unusual antenna problems.

"Conical-V-Beams" are produced under Re-issue Patent No. 23,346.

CONQUEROR OF VAST DISTANCES!

UNEQUALED FOR LONG RANGE RECEPTION

THE ULTIMATE in arrays for Long Distance Reception!

The Telrex 8X-TV or K8X-TV will outperform ANY antenna or combination of cut to frequency antennas. Unequaled for long distance reception up to 200 miles.

If the 8X does not provide a useable signal, TV reception is impractical or impossible.

Mica-Filled Bakelite

Duodecal and Diheptal Tube Sockets

Designed for television viewing tubes, oscilloscopes and other cathode-ray tubes. Provides means of grouping leads within the socket housing and bringing them out radially. Grouping of the wires in the enclosed raceway eliminates flexing at solder terminals, minimizing breakage. Socket cap and body molded from high quality electrical bakelite. Designed for easy assembly and dis-assembly . . . requires no special tools.

Compact in design, molded from high dielectric black Bakelite. Rated at 15 amp., 110 v. or 10 amp., 250 v. Two-pole type accepts any standard electric plug. Retainer ring type mounts in 1-11/64" keyed hole as punched by Tools 25-LD-1. Mounting plate type requires 1-9/32" D. chassis hole; has slotted screw holes on 1-1/2 to 1-7/8" centers—Mounting plate type is similar to Type "RS" Replacement Sockets.

AMPHENOL

Series 75 Microphone Connectors—Single Contact

Fit almost every microphone. Standard with leading manufacturers for many years. Compact, rugged, neat. Chassis receptacles are integral parts of microphones using single conductor cable. Widely used in amplifiers, transmitters, piezoelectric devices, home recorders and similar equipment. They are also suitable for connecting various units such as PM speakers, headphones, and for theft alarms or wall type coin operated devices, etc.

In the 75 Series, plugs mate with all cable jacks and receptacles. Circuit closing contacts are the same except that they close the circuit when plug is disengaged, eliminating open circuit grid howls.

Locknut Receptacles mount in .385" holes when grounding to chassis and 1/8" holes for ungrounded 2 circuit applications.

Series 80 Cable Connectors are designed for shielded cables; for single and two conductor coaxial cables, microphone cables; for twisted pairs, concentric lines, photo cell leads, patch cords and similar uses. Suitable for connecting model railroad equipment, pin ball games and other small electrical apparatus. Elements are high dielectric black Bakelite. Receptacles mount in 5/8" chassis holes. Maximum chassis thickness for locknut type receptacles is 11/32".

Mating families of connectors are listed in horizontal lines.

The most popular connectors are shown in bold face type.

Series 91 Microphone Connectors—3 and 4 Contacts

Extensively used on all types of portable apparatus, these connectors were designed primarily to use with microphones. Some of the advantages of Amphenol Microphone Connectors . . .

- Accidental disconnections are eliminated by a positive screw-type connection.
- Incorrect insertions are impossible because connectors are polarized.

- Pulling and twisting strain on soldered contacts is eliminated because a squeeze-type clamp grips cable securely after assembly.

Chassis receptacles mount in 27/32" chassis holes. Maximum chassis thickness for chassis receptacle is 1/8".

Mating families of connectors are listed in horizontal lines.

NEW "AN" CONNECTOR CATALOG

Amphenol also makes a complete range of AN approved connectors for power, signal and control circuits in aircraft and electronic equipment. The new A-2 Catalog is designed as a tool for the use of purchasing agents, engineers and executives in the field of electronics. It can be used effectively by manufacturers of aircraft and accessories, marine craft, instrument manufacturers and designers, laboratories and government procurement agencies. The A-2 catalog will be sent upon receipt of a request on company or government agency letterhead, or may be requested directly from the nearest Amphenol Representative.

Amphenol Coax and Twinax RG Cables

Amphenol Coaxial and Twinax RG Cables are produced to standards surpassing military specifications for electrical performance and mechanical excellence. Conductors are centered 20% closer for Coax and 50% closer for Twinax Cables than required by "AN" specifications.

Most cables utilize the exceptional dielectric properties of polyethylene—low loss, flexibility, mechanical stability. The outer jacket in the majority of approved types is a tough, highly resistant vinyl jacket which is non-hygroscopic and impervious to most acids, alkalies, oils and gasoline. Other types are armored for still greater mechanical protection.

Amphenol has cables that are designed to operate efficiently at temperatures as high as 500° Fahrenheit. Teflon is used as the dielectric because of its low loss, high voltage breakdown and its ability to withstand heat.

THE NEW AMPHENOL "AUTO-DIAL" ROTATOR

MODEL No. 509

Designed to rotate in one direction only, the Amphenol "Auto-Dial" TV Antenna Rotator utilizes a single directional motor, permitting greater power and higher torque than usually available in reversible motors. The antenna rotates rapidly—only 22 seconds required for a complete revolution. Positive braking action prevents coasting or backlash.

The "Auto-Dial" permits axis or "in-line" mounting of antenna and supporting mast, allowing equal weight distribution on the steel bearings and gears of the rotator. There are no fiber or laminated gears to fail—all gears are steel.

The attractive control unit houses the relay, automatic step gears with nylon insulation, contact breakers, and sturdy transformer that reduces 115 volt A.C. to 24 volt A.C. required by the rotator motor.

The new "Auto-Dial" Rotator for the first time permits accurate antenna field strength measurements because it can always be brought back to exactly the same direction. This is possible because rotation is in steps of 6 degrees, accurately calibrated on the direction indicator. With "Auto-Dial," servicemen are now able to determine whether the antenna is functioning properly, has the best front-to-back ratio and if it is located properly for the best possible picture.

Operating the rotator is as simple as ABC. (A) Turn switch under dial to "On" position; (B) if necessary, refer to log card for dial number indicating desired antenna direction; (C) turn knob until pointer lies over proper number. Then, automatically, the inside knob, which rotates in synchronism with the antenna and which has an arrow—turns to line up with the pointer. This indicates that the antenna is rotating. When the desired direction is reached, rotation stops automatically.

MODEL No. 509 "AUTO-DIAL" TV ANTENNA ROTATOR, including 100 ft. conductor cable, Auto-Dial Control Unit, Complete Rotator with mast support for stacked array and cone adaptor. List **\$59⁷⁵**

- Mast support included for two bay stacked array!
- Heavy-duty motor!
- In-line mast mounting!
- Cone adapter included—accommodates mast sizes from 3/4" to 2"!
- Lifetime lubricated!
- Neoprene sealed against dirt and moisture!

- Attractive "Walnut" finish plastic housing!
- Two 2.5 volt pilot lamps!
- Rubber feet on the base protect furniture!
- White plastic card insert for logging stations!

Universal Mounting Clamp

Will accommodate mast sizes of 1" to 1 1/2" O.D., which includes 1" water pipe as well as 3/4" to 1 1/4" electrical conduit. Two U bolts and channeled plate establish and maintain perfect right angle alignment. Stress to horizontal member is spread over entire length of clamp, thus preventing distortion and buckling.

No. 114-500..... List \$.55

Remote Control Wire

For wiring antenna rotators and other low voltage remote controls such as miniature electric trains. Recommended for circuits up to 28 volts. For easy wiring, each conductor with its insulation may be ripped apart without exposing the conductor. Conductors are 7/28 copper wire with one conductor tinned to facilitate tracing. High dielectric polyethylene insulation is weatherproof.

CANNON PLUGS APPLICATIONS

Type "K" Receptacle on Automatic Electric's Recorder Connector

Type "P" insert and barrel assembly on Altec-Lansing mike

Types "K" and "P" Plugs on television camera

Type "XL" Plug on Electro-Voice's #31 Microphone

Type "X" Plug and Receptacle on intercom telephone

TYPE XK FITTINGS

CANNON "TYPE XK" PLUGS AND RECEPTACLES — A quality line of Connectors, some inserts and similar in design to the "Type X" Series, but equipped with the fast-acting, sturdy Acme Threaded Coupling Ring and therefore, ideal for use on equipment which is subjected to considerable vibration and tension on cables, such as on sound trucks and other portable units. XK-1 500v; XK-3 200v; XK-4, 133v Service.

TYPE "XK-11" STRAIGHT CORD PLUG (With Socket Insert)

Shell is of die-cast zinc, cad. plated finish. Equipped with quick-acting coupling ring. Solder pot connections are easily accessible. Takes $\frac{3}{16}$ " to $\frac{1}{2}$ " cable. Built for long, dependable service. Mates with -12, -14.

CANNON ELECTRIC DEVELOPMENT COMPANY

TYPE XL FITTINGS

"XL-3-14N" Receptacle and "XL-3-11" Plug in engaging position. Compare small size of plug with hand.

The Cannon Electric Type "XL" Connector combines various features found in other Cannon types into a small fitting comparable only in size to the Type "X" for low level sound transmission circuits. Among the leading features are the following: (1) convenient latchlock device to hold connector tight. (2) lightweight. (3) polarizing means (4) compression gland with relief spring or integral clamp, if desired. (5) streamlined design. (6) tapped metal for insert retaining screw. (7) provision for special grounding contact and grounding to shell. Contacts are 15-amp. for No. 14 B&S stranded wire in 3 contact insert; 10-amp. in 4 contact insert. Shell is zinc or steel, with various finishes available, bright nickel being standard. Sotin-chrome finish available on steel shells. Flashover Voltage 1400-1600v.

ZINC SHELL TYPES

TYPE "XL-11" STRAIGHT CORD PLUG (Socket Insert)

Type XL-3-11 is equipped with latch lock device and has raised polarizing boss. No. 1 contact engages before Nos. 2 and 3, and may be used for grounding purposes, if desired. $\frac{3}{8}$ " cable accommodation. Overall dimensions: length, 2 $\frac{3}{8}$ ". with relief spring, 2 $\frac{3}{8}$ " approx.

CANNON ELECTRIC DEVELOPMENT COMPANY

TYPE P FITTINGS

REVISED PRICES

OCTOBER 23, 1950

CANNON "TYPE P" FITTINGS. Universally used in sound and allied applications. "Type P" Fittings include a size and type for every requirement, with a high standard of quality. All 90° Plugs have split-shell construction for quick, easy access for wiring or inspection. Splash-proof but not weather-proof. Plug and receptacle dust caps are available. Laboratory tests show an average voltage-drop of not more than 10 millivolts, with current flowing at the rated capacity. Insulating material is black phenolic which has a 0.7% absorption in 24 hours of immersion in water and a dielectric strength of 550 volts per mil at 60 cycles. Two to 6 contact inserts accommodate No. 10 B&S stranded wire; 8 contact insert No. 14 wire.

New shell designs of the P-CG-11S and P-CG-12S, cord plugs, replace both old type shells of zinc and steel, and such improvements as shorter length, new rubber bushing, improved latch and spring, integral clamp. Shell material is steel, integral clamp zinc.

NEW TYPES WILL MATE WITH CORRESPONDING FITTINGS, SAME AS OLD DESIGN

TYPE P-CG-11S CORD PLUG COMBINATION STEEL & ZINC (With Socket Insert)

This new type plug with steel shell and integral zinc clamp is $\frac{1}{8}$ " shorter than the old type and has an overall length of $2\frac{3}{8}$ ". The new rubber bushing allows a $\frac{1}{8}$ " D. cable entry, and on P4, P5, P6 and P8 $\frac{1}{2}$ " D. max. cable entry. Satin chrome finish.

"300" SERIES PLUGS AND SOCKETS

General Specifications

2 Contacts to 33 Contacts. All plugs and sockets are polarized.
 2 Contact Plugs and Sockets are round, others rectangular.
 Plugs of one size cannot fit into sockets of another size.
 Phosphor bronze "knife-switch" type socket contacts engage both sides of flat plug contacts—double contact area.
 Molded Bakelite insulation.
 Formed metal caps. Formed fibre linings in caps.
 Small size, with good separation between contacts.
 Plug or socket for panel mounting.
 Plug or socket with cap.
 Simple, fool-proof assembly.
 Finish on caps—Black Crystal.
 Plug prongs— $\frac{3}{32}$ " wide by $\frac{3}{8}$ " thick.
 We suggest using the 300 series in circuits not exceeding 45 Volts and 5 Amps., although circuit characteristics may permit higher ratings.

"400" SERIES PLUGS AND SOCKETS (Formerly "Heavy Duty")

General Specifications

2, 4, 6, 8, 10 and 12 Contacts.
All plugs and sockets are polarized.
Phosphor bronze "knife switch" type socket contacts engage both sides of flat plug contacts—double contact area.
Molded Bakelite insulation.
Fibre linings in caps.
Plug or socket for panel mounting.
Plug or socket with caps.
Finish on caps—Black Crystal.
Plug prong cross section $\frac{1}{16}$ " x $\frac{1}{8}$ ".
Locking fittings available for panel types or extension cables as shown.
We recommend using the 400 series in circuits not exceeding 110 Volts and 10 Amperes, although circuit characteristics may permit higher ratings.

LOCKS FOR 400 SERIES PLUGS AND SOCKETS (Formerly Heavy Duty)

ILLUSTRATING No. 93 LOCK. May be attached to any 400 Series plug for extension cables. If plugs are ordered with this lock, specify "with No. 93 locks."

No. 93 Lock when attached to plug, add to Ea. list per pair \$.43
No. 93 Locks ONLY per pair \$.43

ILLUSTRATING No. 63 LOCK. May be used on all panel mount 400 Series plugs and sockets when surface is flush with top of panel. Cannot be used on type DB plugs.

No. 63 Locks ONLY, per pair \$.43

“500” SERIES PLUGS AND SOCKETS

For Complete Listing of 500 SERIES, Write for No. 500 Catalog

Designed for 5,000 volts and 25 amperes per contact. Circuit characteristics, however, may alter this rating one way or the other.

Long leakage path from terminal to terminal, and terminal to ground. Contacts are brass and phosphor bronze, silver plated. Metal parts of caps and brackets are steel, parkerized (rust-proofed). Plug and socket blocks are interchangeable in caps and brackets.

All sizes are polarized in a manner to prevent a smaller plug being inserted in a larger socket. Thus different sizes may be used on one installation without danger of making wrong connections.

Extreme care has been taken to make terminal connections under cap very accessible both for original wiring and subsequent inspection. The cap is insulated with canvas bakelite. Plug prong cross section $\frac{5}{16}$ " x $\frac{3}{32}$ ".

IMPORTANT: For safety with high voltages DEEP BRACKETS should always be used on one plug or socket, when the other plug or socket has a CAP. SHALLOW BRACKETS are for use only in connecting two units, each unit having plug or socket with SHALLOW BRACKET.

Cable entrance: Because of the great variation in type and size of cables, we have considered it best not to supply cable clamps of any kind. The cap end is made to accommodate standard BX clamps which may be obtained at any electrical jobbing house. The cap end will be furnished with round hole from $\frac{1}{2}$ " diameter and $1\frac{1}{4}$ " diameter in steps of $\frac{1}{8}$ ", if the size required is given on order. If no size is given, plain cap end with center punch locating center will be shipped.

(Socket with Shallow Bracket)

LOCKS FOR 500 SERIES PLUGS AND SOCKETS

Locks shown above are used in connection with any DEEP BRACKET and cap combination.

The locks securely hold the units together, but they can be released instantly.

The mounting plates are made to fit all DEEP BRACKETS, and are fastened by the same screws or rivets that hold the deep brackets to the panel. Can not be used on shallow brackets. Sold in pairs only.

BARRIER TYPE TERMINAL STRIPS

Increased insulation is provided by having Barriers placed between each Terminal. These Barriers follow around the edge of the Strips and terminate at the base. They not only make a long leakage path but prevent direct shorts from frayed wires at the terminals. Mounting holes are at the ends as illustrated. The base is molded Bakelite.

The Terminals and Binder Screws are of brass, nickel plated. Marker Strips may be ordered and imprinted to supply terminal designations. These Marker Strips mount beneath Terminal Strips and also afford insulation from metal mounting surface. See page 21 for imprinting charges. See pages 24 and 25 for dimensions.

For Right Angle Mounting

Illustration at right shows a No. 3-162 A-R Fanning Strip connected to a No. 3-142 Barrier Strip.

JONES FANNING STRIP wired and in position on Jones No. 141 Barrier Strip

Jones Fanning Strip Terminals are of .032" Brass, Cadmium Plated. The Bakelite strips are furnished with a hole in either the right or left end for fastening the cable with a cable clamp or lacing twine. Simplifies cable or harness wiring, assuring positive connections. Makes replacement of units an easy matter and assures correct connections after servicing.

In many instances where there is not sufficient room for the standard Fanning Strips we can supply those listed formed for right angle mounting permitting use when Barrier mounts flush with the side of the chassis. Specify Series 160A, 161A and 162A instead of 160, 161 and 162. Prices slightly higher.

AG 76

AG-76
Standard Antenna-Ground strip using No. 76 terminals. Insulation: $\frac{1}{8}$ " Bakelite, $\frac{1}{2}$ " wide. Mounting centers $1\frac{1}{2}$ ". Ends rounded. Letters A and G are filled in white.
No. AG-76 Ea. \$.14

NO. 96 TERMINAL STRIPS

Terminal, Spring Temper Brass, Cadmium Plated
Perhaps the most popular socket terminal ever sold. Takes standard tube prongs (No. 99 or No. 100). Furnished for No. 99 prongs ($\frac{1}{8}$ ") unless otherwise specified. Insulation: XP Bakelite, $\frac{3}{8}$ " wide, $\frac{1}{8}$ " thick. Terminals mounted on $\frac{1}{2}$ " centers. Mounting holes $\frac{1}{8}$ " from center of end terminals.

CINCH SOCKETS ARE STANDARD

MOLDED OCTAL 1-5/16" MOUNTING CENTERS

Molded from high dielectric black bakelite or mica-filled low loss bakelite. Solder coated brass contacts and sturdy steel press-on type saddle with 4 ground lugs. Mounts in 1" chassis hole.

| No. | Description | List Price |
|-----|-------------|-------------|
| 8AB | Black | Each \$.15 |
| 8AM | Mica-Filled | Each .22 |

MOLDED OCTAL 1 1/2" MOUNTING CENTERS

Same as 8A series molded octal above except has cinch-on type saddle with 4 ground lugs and mounts in 1 1/8" chassis hole. Available in black, mica-filled bakelite, or ceramic.

| No. | Description | List Price |
|-----|-------------|-------------|
| 8EB | Black | Each \$.15 |
| 8EM | Mica-Filled | Each .22 |
| 8EC | Ceramic | Each .51 |

MOLDED LOKTAL

Steel mounting saddle with solder coated brass contacts and center guide clip with locking spring. 1 1/2" mounting centers.

Molded from high dielectric black bakelite or mica-filled low loss bakelite. Mounts in 1" chassis hole.

| No. | Description | List Price |
|-----|-------------|-------------|
| 8LB | Black | Each \$.22 |
| 8LM | Mica-Filled | Each .29 |

CHASSIS CLINCH OCTAL AND LOKTAL

Designed to save valuable chassis space. Mounted in specially punched 1" chassis holes, and are rigidly fastened by lugs sheared from the chassis. No mounting plate or ring required. Molded from high dielectric black bakelite. Solder coated brass contacts and center guide clip.

| No. | Description | List Price |
|------|-------------|-------------|
| 8CC | Octal | Each \$.13 |
| 8CCL | Loktal | Each .18 |

RING MOUNT OCTAL

Molded from high dielectric black bakelite. Solder coated brass contacts. Used extensively on test equipment, public address amplifiers and on other apparatus where sockets are exposed. Molded keyway

in side engages key in chassis hole, preventing socket from turning. Mounts in 1 1/2" chassis hole. Crimped retainer ring is furnished with these sockets.

| No. | Description | List Price |
|-----|-------------------------|-------------|
| 8R1 | For 1/8" thick chassis | Each \$.19 |
| 8R2 | For 1/16" thick chassis | Each .19 |

MOLDED LOKTAL

Has same characteristics as molded loktal shown in left column, except saddle has 4 ground lugs.

| No. | Description | List Price |
|------|-------------|-------------|
| 8LB1 | Black | Each \$.22 |
| 8LM1 | Mica-Filled | Each .29 |

WAFER LOKTAL 1-5/16" MOUNTING CENTERS

Laminated bakelite socket. Sturdy and positive grip solder coated contacts and center guide clip with locking spring. Mounts in 1 1/8" chassis hole.

Has two .136 diameter mounting holes.

| No. | List Price |
|------|-------------|
| 85WS | Each \$.17 |

GLASS TUBE SOCKETS

Laminated bakelite sockets with solder coated positive grip brass contacts. 1 1/2" diameter mounting

holes. Designed to fit four, five and seven prong tubes.

WAFER LOKTAL 1 1/2" MOUNTING CENTERS

Laminated bakelite socket. Solder coated brass contacts and center guide clip with locking spring. Mounts in 1 1/4" diameter chassis hole. Two .136

diameter mounting holes.

| No. | List Price |
|------|-------------|
| 85WL | Each \$.17 |

WAFER OCTAL

Laminated bakelite sockets with solder coated brass positive grip contacts. Designed to fit all standard eight prong tubes. Available with 1 1/8" or 1 1/2" mounting centers. Both styles have .136 diameter mounting holes.

| No. | Description | List Price |
|-----|-------------------------|-------------|
| 8W1 | 1 1/8" Mounting Centers | Each \$.15 |
| 8W2 | 1 1/2" Mounting Centers | Each .15 |

CINCH CAPACITOR "PLUG-IN" SOCKETS

Motion picture, telephone, airborne radio, broadcasting equipment, electric organs, and other electrical equipment need instant replacement when failures in electronic circuits occur at the capacitor connections. Cinch "Know How" has solved this problem.

SMALL

Designed for use with Mallory and Magnavox 1" FP type condensers. Molded from high dielectric black bakelite. Sturdy steel mounting saddle has 4 ground lugs. 1 1/2" mounting centers. 3 recessed center contacts for extended prongs of condenser and two outer contacts flush with surface for short prongs of condenser. All contacts are solder coated for fast, easy soldering.

| No. | List Price |
|-----|-------------|
| 2C5 | Each \$.55 |

LARGE

Designed for use with Mallory and Magnavox 1 3/8" FP type condensers. Molded from high dielectric black bakelite. Sturdy steel saddle has 1 1/2" mounting centers. Four recessed center contacts for extended prongs of condenser and three outer contacts flush with surface for short prongs of condenser. All contacts are solder coated.

| No. | List Price |
|-----|-------------|
| 2C7 | Each \$.68 |

CRYSTAL SOCKETS

2 PRONG 31/64" CENTERS

Molded from high dielectric black bakelite or mica-filled low loss bakelite. Silver plated beryllium copper contacts on 31/64" centers. .120" diameter recessed mounting hole. Socket body is 3/16" long, 1/8" thick, and 3/16" high. For use with FT243 type crystal.

9 PIN MINIATURE SOCKETS AND SHIELDS

MOLDED — SADDLE TYPE Bottom Mount

Molded from high dielectric black bakelite or mica-filled low loss bakelite. Designed for mounting through bottom of chassis in $3/4$ " diameter hole. $1 1/8$ " mounting centers with .093 diameter mounting holes. Solder coated brass contacts and center shield.

| No. | Description | List Price |
|-----|----------------------|-------------|
| 9EB | Black | Each \$.36 |
| 9EM | Mica-Filled Bakelite | Each .42 |

SHIELD BASE

Durable steel shield base designed for use with shields illustrated to right. $1 1/8$ " mounting centers. May be used with any 9 pin wafer or saddle type sockets shown in right column.

| No. | List Price |
|-----|-------------|
| 9SB | Each \$.24 |

TUBE SHIELDS

Made from durable steel. Complete with tube securing spring. "J" slot feature designed to fit securely with Cinch 9X series shield base type sockets illustrated to the right. Will also fit No. 9SB shield base shown at left. Available in three lengths.

| No. | Description | List Price |

MOLDED—SADDLE TYPE Top Mount

Molded from high dielectric black bakelite or mica-filled low loss bakelite. Designed for mounting through top of chassis in $3/4$ " diameter hole. $1 1/8$ " mounting centers with .093 diameter mounting holes. Solder coated brass contacts and center shield.

| No. | Description | List Price |
|-----|-------------|-------------|
| 9AB | Black | Each \$.36 |
| 9AM | Mica-Filled | Each .42 |

SHIELD BASE TYPE

Molded from high dielectric black bakelite, mica-filled low loss bakelite, or ceramic material. One-piece cadmium plated steel shield base and saddle with .093 diameter mounting holes on $1 1/8$ " centers. Solder coated brass contacts and center shield. Mounts through top of chassis in $3/4$ " diameter hole. Use Cinch 9S type shields with these sockets.

| No. | Description | List Price |
|-----|-------------|-------------|
| 9XB | Black | Each \$.63 |
| 9XM | Mica | Each .68 |
| 9XC | Ceramic | Each .96 |

WAFER TYPE

Has two laminations consisting of $1/4$ " top plate and $1/4$ " bottom plate made from $1 1/8$ " mounting centers with .093 diameter holes. Solder coated brass contacts and center shield.

CINCH SOCKETS ARE STANDARD FOR TELEVISION!

Television is growing by leaps and bounds. To meet the increasing demand Cinch "Know How" has engineered and perfected Magnal, Duodecal, and Diheptal sockets for cathode ray and television tubes. Other television products illustrated on this page include second anode connectors and Corona insulating shields.

MAGNAL—11 PRONG

Molded from mica-filled low loss bakelite. Socket is 1 1/3" wide and 1 1/8" high. Full floating silver plated beryllium copper contacts designed to insure easy insertion of tubes and yet provided excellent electrical connections. For use with 5BP1 and 2AP1 type cathode ray tubes.

| No. | Description | List Price |
|------|---------------------|-------------|
| 3M11 | Mica Socket | Each \$6.60 |
| 3R11 | Steel Mounting Ring | Each .46 |

DIHEPTAL 14 PRONG

Molded from high dielectric black bakelite or mica-filled low loss bakelite. 2 1/2" wide and 1 1/8" high. Possesses same features as Cinch Magnal socket shown above.

| No. | Description | List Price |
|------|---------------------|-------------|
| 3B14 | Black Socket | Each \$2.20 |
| 3M14 | Mica Socket | Each 2.75 |
| 3R14 | Steel Mounting Ring | Each .46 |

CORONA SHIELDS

Specifically designed for Television and high voltage wiring. These cadmium plated brass shields will provide excellent protection at proper positions in electrical connections. Outside diameter .470. Hole diameter .136. Thickness .172.

| No. | List Price |

110-250 VOLT SOCKET (Underwriters Listed)

When space is at a premium use this 110-250 volt 2 prong socket. Rated at 15 Amp., 110 V. or 10 Amp., 250 V. Molded from high dielectric black bakelite. Solder coated brass contacts on 1/2" centers designed to accept any 2 prong standard electric plug. Mounts in 3/4" x 3/4" hole. .144 diameter mounting holes on 1 1/8" centers. Ideal for radio chassis and many other applications.

| No. | List Price |
|-----|-------------|
| 2R2 | Each \$.22 |

DUODECAL—12 PRONG

No larger in diameter than the tube base and only slightly longer than the tube pin. A new feature incorporates wire strain relief as an integral part of the contact. Molded from high dielectric black bakelite. For use with 10BP4, 2BP1, 5TP4, etc., type tubes.

| No. | List Price |
|------|-------------|
| 3B12 | Each \$.88 |

SECOND ANODE CONNECTORS

For television tubes—Silver plated snap button type plug well insulated by 1 1/2" diameter rubber protective cap. Snaps into opening on side of tube. Available in three lengths wire leads.

| No. | Description | List Price |
|-----|---------------|-------------|
| 3A2 | 12" Wire Lead | Each \$.99 |
| 3A3 | 15" Wire Lead | Each 1.16 |
| 3A4 | 18" Wire Lead | Each 1.38 |

SECOND ANODE CONNECTOR

For diheptal based tubes. Cadmium plated brass contact surrounded by rubber insulator 3/4" wide and 1 1/4" long. Snaps over .096 diameter prong on side of diheptal tubes.

| No. | List Price |
|-----|-------------|
| 3A1 | Each \$.83 |

SUB-MINIATURE HEARING AID SOCKETS

Used extensively for hearing aids, radio controlled model airplanes and numerous other applications which require sub-miniature tubes. Molded from mica-filled low loss bakelite with silver plated beryllium copper contacts. For Raytheon type CK series sub-miniature tubes. Available with 5, 6, or 7 contacts. Four prong tubes use No. 2H5 five prong socket.

| 13B | Each \$.13 |

INSULATED PIN PLUG

Nickel plated $\frac{1}{8}$ " brass tube pin $\frac{3}{32}$ " long, assembled to $\frac{1}{32}$ " long fibre insulator. May be used with Cinch No. 81A and 81B type phono jacks or with No. 49 series contact strips illustrated in right column.

| No. | List Price |
|-----|-------------|
| 13C | Each \$.10 |

STAND-OFF TERMINALS

Insulated terminals for television and other high voltage electronic equipment. Provides excellent insulation for passing high voltages with through chassis. Molded from mica-filled low loss bakelite. Available in two lengths: $\frac{3}{32}$ " or $\frac{1}{32}$ ". Diameter of cylinder is .110. Mounts in $\frac{3}{32}$ " dia. hole. Actual size illustration of No. 16L.

ELECTRIC SOLDERING IRONS

These electric soldering irons embody features of design and construction that specialized experience dating from 1894 in the exclusive manufacture of electric heating appliances has demonstrated to be desirable for efficient and lasting service. Hundreds of thousands are in use throughout the world in a wide variety of manufacturing plants; in service, maintenance and repair shops and in telephone, telegraph, radio and TV stations. Because of their proven dependability, durability and efficiency they are preferred by those who measure the value of a tool or mechanical device by the service rendered.

No. 3128—For servicing TV, electronic and radio equipment and similar light work.

No. 3138—For TV, electronic and radio production; also for telephone, telegraph and similar work.

No. 3158—For the same purposes as the No. 3138 but for work requiring an iron of greater capacity.

No. 3178—For use on still heavier work than that for which the Nos. 3138 and 3158 irons are adapted.

No. 3198—For use on very heavy soldering operations of all kinds.

Made in standard voltages and for 32 volts. No. 3138 also made for 6, 12, 24 and 55 volts. All sizes can be equipped with 3-conductor cord, one wire grounded, at slight additional charge. Separate heat-insulating stand supplied with each iron.

TERMINAL CONDUCTOR ASSEMBLY

This illustration shows the Terminal Connector Assembly used in all American Beauty electric soldering irons. It is designed for use with either 2- or 3-conductor standard heater cord or rubber-covered cord—Types SJ, HSJ, etc.

This assembly permits easy grounding for safety by a third conductor—particularly desirable when irons are used on 220-volt circuits or on metal benches accommodating groups of operators.

The cord is held firmly in place by a strain-clamp.

American Beauty COPPER TIPS

American Beauty Copper Tips are made from commercially pure, drawn bar copper rod and are heavily nicked to resist corrosion and oxidation. Standard shaped tips with which various models are equipped are shown in illustration but pyramidal, instead of chisel type, and vice versa can be supplied when so specified without additional charge. For No. 3138 a special long, semi-chisel shaped tip (No. 3738-S) can be supplied for telephone, switchboard, television and radio work.

American Beauty TEMPERATURE REGULATING STAND

For use on (AC) Alternating Current Only

This is a thermostatically controlled device for the regulation of the temperature of an Electric Soldering Iron while at rest. Through an adjustment on bottom of stand the thermostat may be set for maintenance of any desired heat—from very low, or warm, to full working temperature. It is designed for use with Electric Soldering Irons up to 660 watts capacity and on circuits up to 240 volts.

MIDGET SOLDERING IRONS

FOR MANUFACTURING AND SERVICE
OF RADIO AND ELECTRONIC EQUIPMENT

APPLICATION

This 8-inch, 1 $\frac{3}{4}$ -ounce featherweight iron for close-quarter soldering with pin-point precision is used where conventional irons might cause damage . . . be clumsy to handle . . . be more expensive to operate. The Midget literally goes places with greater efficiency and less power . . . with no sacrifice in heat or speed. With its fingertip operation, this iron will help make an expert out of any solderer in a short time.

The Midget has ironclad copper tips either $\frac{1}{8}$ - or $\frac{1}{16}$ -inch diameter, as desired.

THIS MIDGET DOES A BIG JOB IN

- Boosting Production Rates
- Increasing Operator Efficiency
- Cutting Down Employee Fatigue
- Saving on Repair and Maintenance
- Reducing Rejects
- Manufacturing and Repairing:
 - Radios and other electronic equipment
 - Meters
 - Instruments
 - Jewelry
 - Appliances

. . . and many other products requiring precision soldering

Net weight iron less cord 1 $\frac{3}{4}$ oz.
Net weight iron including cord 5 oz.
Shipping weight complete iron 8 oz.

Standard package consists of 6 irons of one tip size. Tip and heater assemblies can be purchased in any quantities.

THE MIDGET OFFERS MAJOR ADVANTAGES

Low-cost soldering—Solders more efficiently, using only approximately one-fourth wattage normally used.

Fingertip operation—Only 8 inches long, weighs but 1 $\frac{3}{4}$ ounces. Styled for fingertip grip.

Quick, continuous heat—Famous G-E Calrod* heater built into ironclad copper tip for rapid heat transfer.

$\frac{1}{4}$ -in. dia tip, Cat. No. 6A210

SPECIAL TRANSFORMER (OPTIONAL) FOR G-E MIDGET SOLDERING IRONS

Single-tap, Cat. No. 84G392

Specially designed 115-volt transformers are available as optional equipment in two types:

1. Single-tap 115/6 volts—for use where only one soldering heat is required
2. Four-tap 115/6.3/6/5.7/5.4 volts — gives wide range of heats (from 20 to 30 watts) for close temperature control of tips

Transformers are small, lightweight, but sturdy. Their 6-foot extension cords can be plugged in any 115-volt a-c circuit.

| Description | Cat. No. | Price† |
|-------------|----------|--------|
| Single-tap | 84G392 | \$5.20 |

Publication Reference GEA-1.

Easy renewal—Ironclad tip and heater can be replaced as a unit merely by unscrewing from handle.

Long life, low maintenance—Low voltage permits use of heavy, long-lasting resistant wire. Reduced servicing with long-lasting ironclad copper tip.

ELECTRIC SOLDERING IRONS

GENERAL INFORMATION—Equipped with 6 ft. (10,000 cycle) approved heater cord (covered with twine braid for extra long wear) and rubber plug. Continental or English type plugs 25c extra list. Metal stand furnished with each iron. Heating elements made of best grade nickel-chromium resistance wire, insulated with finest mica obtainable. Elements in the plug tip irons are replaceable by the user and in the screw tip irons replaceable at

the factory. Tips in all irons are replaceable; made of hard drawn pure copper. Case is made from solid Hexacon steel (except No. 50 and P-30), affording it great mechanical strength, preventing denting. Terminal easily accessible and constructed to relieve cord strain. Smooth, cool, comfortable handle—readily replaceable. Voltage range: 32 to 250. Standard voltages 110/120, 121/130, 220/250. All other voltages \$1.00 extra list.

FOR FASTER SOLDERING... LONGER IRON LIFE

MAINTAINS DESIRED IRON TEMPERATURE BETWEEN JOBS • PREVENTS OVERHEATING
SAVES ELECTRIC CURRENT • ADJUSTABLE TO ANY SIZE IRON
SAVES TIME • NO LONG WARM-UP PERIOD

A practical, time and money saving device which accurately regulates and maintains soldering iron temperature between jobs. Lengthens iron life by reducing tip oxidation and amalgamation of tip with solder which increases with over-heating.

When placed on stand, iron rests in a copper cradle which conducts heat of iron and actuates a bimetal to open or close a switch. Temperature is easily regulated by an adjusting slide at bottom of stand. As iron is removed from stand, full current is instantly supplied. Stem rest adjustable to accommodate various lengths of irons. Stand is a heavy gray iron casting—stays firmly fixed without being fastened.

● SOLDERING POTS

Ruggedly constructed, cast iron pots for production work. Elements are easily replaced even while pots are hot.

CORROSION RESISTANT

Tips and core are forged of tellurium copper alloy and plated for resistance to corrosion.

HOT IN 90 SECONDS

Kwikheat Thermostatically controlled Soldering Irons are the only irons containing built-in thermostats. Allowing a much greater watt density with less radiation of heat.

TEMPERATURES ARE PRE-SET

Thermostat NOW set to give proper heat at the tip to flow solders allowed under tin conservation order M 8.

WHEN IRONS ARE TO BE USED FOR HEAVY OR HIGH SPEED SOLDERING SPECIFY A PRODUCTION IRON.

The use of recently developed alloys have permitted the increase of thermostat temperatures with reduced creep.

DUAL SPOTLIGHT

Built-in dual spotlight completely eliminates all shadows—locates the work quickly and shows you exactly what you are soldering.

READY, AIM... SOLDER

Fast 5 second heat comes on the instant trigger is pulled. No waste time or current. No need to unplug gun between jobs.

TRIGGER ACTION

Just pull the trigger switch... model WS-100 has single heat 100 watts; model WD-135 offers dual heat with two switch positions 100 and 135 watts.

ALL-PURPOSE

This universal model is ideally suited for all light soldering. It is also widely used by craftsmen and hobbyists for woodworking, leather tooling, plastic work, heating liquids, and many types of household repairs.

LONGER REACH

Plus flexible tip which can be easily formed to slip through chassis wiring, handles difficult, deep corner jobs with ease. Sturditip No. 7135, for models WS-100 and WD-135, is similar in design to tip type 7250 shown in the adjacent column. Package of 2 for 25c

DUAL HEAT

Model WD 250 has 200 watts normal heat on first switch position, and 250 watts instant heat on second trigger position. Model WS-200 provides 200 watts single heat.

5 SECOND HEAT

Pull the trigger switch, and solder. Fast 5 second heating eliminates waiting. Heat goes off automatically when trigger is released... no wasted time or current, no need to unplug gun between jobs.

STREAMLINED

Streamlined design gives perfect balance and soldering ease. Improved transformer engineering provides light weight, compact unit with increased capacity and efficiency.

INCREASED VISIBILITY

'Over and under terminal positions assure maximum visibility with built-in spotlight.

WELLERTIP

New, improved Rigditipt No. 7250 is standard with models WS-200 and WD-250. Chisel-shape tip has more copper and greater surface for faster heat transfer, and design provides bracing action for heavier soldering. Package of 2 for 35c.

ERSIN

Multicore

3-CORE SOLDER

**THE ONLY SOLDER MADE WITH NON-CORROSIVE,
EXTRA-ACTIVE ERSIN FLUX**

ACTUAL PERFORMANCE PROVES THAT ERSIN MULTICORE

- *melts more rapidly due to multiple core construction*
- *removes surface oxides and prevents reforming*
- *bonds properly on difficult metals*
- *saves money*
- *saves time*

Ersin Multicore, containing Ersin Flux, is the finest solder available for use where cored solders are required. It is fast acting, flows readily, and bonds difficult metals surely, safely and economically. The technical advantages listed below explain "how" and "why".

Multicore Solder is specified by many of the largest television and electronics manufacturers, as well as thousands of service and repair men, who have tested it against all others and use it exclusively for their requirements.

Every reel or carton of Ersin Multicore is clearly marked both as to gauge and alloy, showing the actual content of Tin and Lead. You know exactly what you are getting when you buy Ersin Multicore Solder!

Available in all Tin/Lead alloys and in standard wire gauge from 10 to 22. (14, 16 and 18 s.w.g. are most popular.)

TECHNICAL ADVANTAGES:

ERSIN FLUX

Ersin Flux is exclusive to Multicore and will not be found in any other solder. It is a high grade, water white rosin, homogeneously activated.

Ersin Flux has a vigorous fluxing action while retaining the non-corrosive and protective features of the original rosin.

Soldered joints made with Ersin Flux do not corrode even after prolonged exposure to humidity. It has been tested under climatic conditions ranging from the Arctic to the Tropics.

Ersin Flux reduces the surface tension of molten solder, causing it to wet metals rapidly, increasing speed of operation with resultant production economies.

Free from objectionable odor. Non-toxic in use.

Leaves nothing but pure rosin on the work after soldering, and may be used wherever plain rosin is specified. Complies with all pertinent Federal Specifications.

MULTICORE SOLDER

Three separate cores of flux eliminate possibility of no flux in a portion of the wire, which may occur in single cored solder. Guaranteed continuity of the flux stream prevents "dry" joints, i.e. those having high electrical resistance.

Although there are three cores of flux in Multicore, the total percentage of flux to solder is less than many single cored solders.

Very rapid melting results from the multiple core construction which provides thinner walls of solder than are found in same gauge single cored solder.

Multicore's unique properties make perfect joints possible on difficult metals and alloys, even if oxidized.

Ability to tin rapidly produces perfect joints with less solder. Greater coverage per pound.

by **ALPHA**

foremost in Quality

All Alpha Solders are approved by Underwriters Laboratories and exceed ASTM Class "A" Specifications. The most modern Rolling, Casting, Extrusion and Drawing Equipment, plus 58 years of experience in fabricating Tin Lead Alloys combine to bring you the finest solders that can be made.

TRI-CORE "ENERGIZED" ROSIN-FILLED SOLDER

Three cores for faster fluxing—contains faster acting "Energized" Rosin. Requires less heat, makes a fast, sure bond. "Takes" faster, especially on plated or oxidized surfaces. Non-corrosive, non-conducting. Used by leading Radio, Electronic and Television manufacturers.

SPOOLS—1 & 5 lbs.
DIAMETERS—.081 or .062
ALLOYS—Forty, Fifty or Sixty Grade*

ALPHA SOLID WIRE SOLDER

For use where separate flux is required. Made of finest virgin Tin & Lead. Alpha wire solder is extruded by the "Unity Process" assuring Homogenous alloy and uniform wire diameter throughout.

SPOOLS—1, 5, 25 or 50 lbs.
DIAMETERS—.125 or .062
ALLOYS—Forty, Fifty, or Sixty Grade*

OTHER ALPHA PRODUCTS

Bar Solder, Preforms, Sheet & Strip Foil, Powdered Solders, Lead & Tin Pipe & Tubing. Lead Anodes, Music Engraving Plates. Lead & Tin products in any form. Rolled, Cast, Extruded or Drawn.

TRI-CORE "LEAK-PRUF" ACID-FILLED SOLDER

For general all purpose soldering. Three cores of chalk-like flux which will not leak. No need to crimp or seal after using. Can be formed into rings, segments or pieces without loss of flux. Fast acting; solders Stainless Steel and other difficult metals. Non-sputtering, non-toxic, less corrosive. Used by leading metal manufacturing fabricators.

SPOOLS—1 & 5 lbs.
DIAMETER—.125
ALLOYS—Forty, Fifty or Sixty Grade*

ALPHA HANDY CANS — Rosin or Acid Core

For the small user, Ham, Hobbyist or Householder. A generous coil of Tri-Core solder in Acid or Rosin Core. Attractive metal tin packed in Handy counter display box. Retail 25c. 12 cans per box.

STANDARD PACKING

1 lb. spools—Individual Cartons—50 Cartons per Shipping Container.

KNOCKOUT PUNCHES AND CUTTERS

Greenlee Tool Co., Rockford, Illinois

NO. 735 KNOCKOUT PUNCH SET

Designed primarily for the electrical trade to permit fast, easy enlarging of knockouts and cutting of holes for conduit in metal boxes and cabinets. Also excellent for automobile work where holes are needed for heater pipes and other accessories. Simply insert the tool in a knockout or small drilled hole and give the screw a few turns with an ordinary wrench. No. 735 set has four punches for cutting $\frac{7}{8}$, $1\frac{1}{32}$, $1\frac{1}{16}$, $1\frac{1}{8}$ -inch holes for $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{4}$ -inch conduit. Set is neatly packed in leather case illustrated. The $\frac{1}{2}$ -inch punch will cut a $\frac{7}{8}$ -inch hole for $\frac{1}{2}$ -inch conduit where no standard knockout is provided when a $\frac{7}{16}$ hole is drilled.

Heavy Duty Drive for $\frac{1}{2}$ " Punch

To increase length of service of the $\frac{1}{2}$ -inch Knockout Punch in cutting $\frac{7}{8}$ -inch holes in heavier-gauge sheet metals, the No. 1387 AV Drive Screw with No. 1388 AV Drive Nut illustrated is recommended.

NO. 737 KNOCKOUT PUNCH SET

Similar to the No. 735 set, but consists of only two punches for cutting holes to accommodate $1\frac{1}{2}$ " and 2" conduit. Packed in leather case.

NOS. 738 AND 739 KNOCKOUT PUNCHES

For cutting holes to accommodate 2 $\frac{1}{2}$ " and 3" conduit. Design is similar to that of smaller GREENLEE Knockout Punches; insert in a knockout or drilled hole and turn drive nut with an ordinary wrench. Packed and sold individually.

NOS. 741 AND 742 KNOCKOUT PUNCHES

For quickly making smooth openings for 3 $\frac{1}{2}$ " and 4" conduit. Hole is clean, no filing of burrs necessary. Operation is similar to that of other GREENLEE Knockout Punches. Simply insert in hole for 1" conduit and turn drive nut with an ordinary wrench.

No. 740 Knockout Cutter

Companion tool to GREENLEE Knockout Punches. Enlarges knockouts to take 1 $\frac{1}{2}$, 2, 2 $\frac{1}{2}$ and 3-inch conduit. Operation is simple since an ordinary wrench drives the tool. Cutting is done by the drive action of two wheel cutters. Special discs

can be furnished for cutting odd sizes of holes from $1\frac{1}{8}$ to 3 $\frac{1}{2}$ -inch diameter. Packed in leather case.

NO. 7646 HydraRam KNOCKOUT PUNCH DRIVER

A powerful portable hydraulic unit for driving all GREENLEE Knockout Punches. Also drives GREENLEE Radio Chassis Punches using $\frac{3}{8}$ " or larger drive screws. Quickly cuts holes in 10-gauge metal. Excellent for use in tight places. Packed in metal case. List price complete, \$86.50. Weight, 20 lbs.

WIDE SELECTION OF SHAPES AND SIZES

Shown above, are but a few of the many Rogan plastic knobs available to you from our regular stock molds. These are supplied without tool charge, resulting in considerable savings in cost, faster delivery. Choice of a wide selection of sizes, shapes and colors. Molded of phenolic or urea thermosetting materials, which will not soften, warp, or scratch easily. Heat resisting materials can be used so knobs can withstand 350-400° F. continuous heat. Most knobs supplied with 1/4" shaft hole and set screws. Special shaft hole sizes and means of fastening can be supplied to specifications at nominal cost.

KNOBS CAN BE BRANDED, AS REQUIRED

Rogan's famous "deep relief" branding process, applied after molding, provides sharp perfect marking at low cost. Any type marking, graduations or numerals can be branded on blank knobs to fit your requirements. Rogan knobs are available in black, brawn or walnut, when molded of phenolic materials; and in all light pastel colors when molded of urea materials. Whatever your knob requirements may be, Rogan is equipped to supply you faster, better, more economically. The complete line of Rogan knobs with specifications is shown in the new Rogan catalog. ELMENCO FUSED PLUGS

COMPLETE PROTECTION!

The Elmenco Fused Plug is like any standard plug, is light in weight, but easier to handle because of finger grips. However, it contains 2 small fuses which provides complete protection against damage to the appliance and to the main line. The blown fuse is easy to remove and simple to replace. Fits any standard wall outlet.

NEW MARKETS! GREATER VALUE!

Approved by Underwriters Laboratories and used by many of the largest manufacturers of radio and electronic equipment, battery chargers, washing machines, curling irons, lighting equipment, automatic relay equipment, motors of every description, and practically every other type of product that consumes electricity. Every wired home, office and store is a prospect.

We list a few of the larger consumers of the ELMENCO FUSED PLUG

SWITCHES

SINGLE AND MULTI-GANG CIRCUIT SELECTOR SWITCHES

This Selector Switch line is the result of several years' search for an ideal switch for all users. It has withstood the most severe tests, both electrically and mechanically. Breakdown tests show this switch will withstand voltages from 2700 between contacts and shaft to 4600 between adjacent clips.

The indexing of the Selector Switch is positive at all times. On the multiple position switches an adjustable stop is provided so that the user can adjust his switch to utilize only the number of positions required in his application.

Each switch is supplied with bar knob and all shafts are slotted in three positions, 1/2", 3/4" and 5/8" from the base of the bushing. The shaft can be placed in a vise next to the desired groove, and by tapping the end of the shaft with a hammer it will break off easily. No sawing is necessary. All switches are packed in individual boxes.

RMC DISCAP CERAMIC CONDENSERS

THE NEWEST DEVELOPMENT IN CERAMIC BY-PASS CONDENSERS

Type B Series DISCAPS are the smallest disc ceramics available. 1000 mmf. and 1500 mmf. DISCAPS are actually less than one-half the size of competitive condensers. Their low self inductance, low power factor and moisture impervious characteristics place them in a class alone. Approved by leading makers of TV sets and tuners as well as manufacturers of specialized high frequency equipment is proof of their superiority.

PLUGS—MICROPHONE CONNECTORS

Single Contact Female Microphone Connector

This microphone connector assures a completely shielded connection. All metal parts are chrome plated brass except spring. Used extensively for making connections from microphone to amplifier. When used with our part No. 505 and 500, any combination of connection can be arranged. Equipped with coupling ring. No. 506 LIST PRICE 50c

Single Contact Male Microphone Connector

Similar to microphone connector No. 506 above except that it has a male thread $\frac{5}{8}$ -27 and no coupling ring.

No. 505 LIST PRICE 30c

PHONE PLUG ADAPTER

For use with the connector 506 shown at the top. Fits any standard phone jacks. No wiring or soldering necessary to make connection. Made of nickel plated brass.

No. 223 LIST PRICE 45c

DOUBLE PHONE PLUG

A two way phone plug. Will accommodate 2 sets headphones tips or lugs. Fits all standard jacks. Handle is molded bakelite. Metal parts are nickel plated brass. Available in red and black.

No. 211 LIST PRICE 50c
No. 224—Barrel only LIST PRICE 20c

SHIELDED TWO-WAY PHONE PLUG

Identical to our part No. 211 phone plug except that barrel is made of nickel plated brass for shielding purposes.

No. 221—Plug LIST PRICE 85c
No. 222—Barrel only LIST PRICE 50c

MALE CHASSIS CONNECTORS

No. 500. This mike connector is used on the chassis or in the mike. It is the open circuit type. Mounts in a $\frac{3}{8}$ " hole. Supplied with insulating washers, solderless lug and nut. Fits $\frac{5}{8}$ -27 connections.

No. 501. Similar to above, except for shortening feature when disconnected. Ideal for use with multiple mixer amplifier. Supplied with insulating washers, lug and nuts.

No. 502. Is an open circuit pressure connector, similar to No. 500 except the spring contact protrudes to make pressure contact. Supplied with insulating washers, solderless lug and nuts.

No. 507. Similar to No. 500 except equipped with a linen base bakelite plate for mounting centers, 1-5/32".

No. 508. Similar to No. 500 except equipped with mounting plate for mounting centers 1-5/32".

No. 509. Similar to No. 502 except equipped with mounting plate for mounting centers 1-5/32".

SHIELDED PHONE PLUG

A newly designed shielded 2 conductor miniature phone plug that fits all standard jacks. One conductor is brought through the entire plug to the tip where the connection is soldered to a finned insert. The other conductor is connected to a lug under the shell. The $\frac{1}{4}$ inch shank is ground to very exacting tolerances. Supplied with an internal rubber cord grip.

No. 231 LIST PRICE 55c

SHIELDED CAP

Used with our No. 500, 505 and 507 for shielding purposes. Equipped with ball chain to prevent loss.

No. 504 LIST PRICE 55c

SIGNAL CORP PLUGS

PL-55 PLUG

PL-55 plug is a standard 2 conductor phone plug used by the U. S. Army, Signal Corps and U. S. Navy. It fits the standard Signal Corps JK-34A and JK-24 jacks. Supplied with solderless lugs.

LIST PRICE\$1.35

PL-47 PLUG

PL-47 is a 2 conductor Signal Corps phone plug that fits all standard jacks and Signal Corps jacks numbers JK-24 and JK-34A. Generally used in switchboard work with braided cords. For strain relief the cord is threaded into the plug. Black handle.

LIST PRICE\$2.00

PL-68 PLUG

PL-68 plug is a 3 conductor microphone plug. It is designed for use with the JK-33 Signal Corps and Navy type jacks. Supplied with solderless lugs.

LIST PRICE\$1.75

TELEGRAPH APPARATUS CO.

INSULATED SOLDERLESS PHONE TIP PLUG

A standard insulated solderless phone tip plug which fits our parts 101, 106, 108 phone tip jacks. Metal parts are nickel plated brass. Overall length 2-3/16". The high lustre insulated handle is 1" long. Available in red, black, green and yellow.

No. 202.....LIST PRICE 18c

SOLDERLESS PHONE TIP PLUG

A standard solderless phone tip plug. Identical to No. 202 above, except for insulated handle.

No. 203.....LIST PRICE 10c

INSULATED SOLDERLESS JR. PHONE TIP PLUG

A standard insulated solderless junior phone tip plug made to fit our parts #101 and 106 phone tip jacks. Metal parts are nickel plated brass. The high lustre insulated handle is 1" long. Available in black, red, green and yellow. Overall length 1 1/4".

No. 204.....LIST PRICE 18c

SOLDERLESS JR. PHONE TIP PLUG

A standard solderless junior phone tip plug identical to No. 204 above except for insulated handle.

No. 205.....LIST PRICE 10c

Insulated Solderless SPRING BANANA PLUG

This insulated non-collapsible solderless spring banana plug is designed to give the greatest area of contact. Connection is made by a side set screw.

Metal parts are nickel plated brass except the four leaf banana spring which is nickel plated phosphor bronze. The high lustre insulated handle is 1" long. Available in red, black, green and yellow. Overall length 1-11/16".

No. 208.....LIST PRICE 20c

Giant Banana Plug & Jack

Designed to handle heavy high frequency currents. Made of nickel plated spring brass.

No. LIST PRICE
225—Jack 30c
226—Plug with threaded shank 35c
227—Plug with 10-32 hole with screw 35c

SPRING BANANA PLUG INSULATED

In this spring banana plug no metal parts are exposed around the insulated handle. Connection is made by soldering to special type tubular lug which is an integral part of metal body. Non-collapsible four leaf banana spring gives maximum area of contact. Metal parts are nickel plated brass except banana spring which is nickel plated phosphor bronze. The high lustre insulated handle is 1" long. Available in red, black, green and yellow.

No. 209.....LIST PRICE 18c

INSULATED SOLDERLESS SPRING BANANA PLUG

(INTERNAL SOLDERLESS FASTENER)

An insulated spring banana plug identical in appearance to our part No. 209 except that connection is made to an internal solderless fastener. The high lustre insulated handle is available in red, black, green and yellow.

No. 210.....LIST PRICE 20c

Insulated Phone Tip Jack

An insulated phone tip jack which makes very positive contact. Contact springs are made of phosphor bronze. Metal parts are nickel plated brass. The high lustre insulated head is 3/8" in diameter. Available in red, black, green and yellow.

Fits 1/4" hole in panels up to 1/2" thick. Supplied with nut and insulating washer.

No. 101.....LIST PRICE 15c

.. PHONE TIP JACK

A phone tip jack identical to our part No. 101 above except that it has a non-insulated 5/16" hex head. Metal parts are nickel plated brass.

Fits 1/4" hole in panels up to 3/8" thick.

No. 106.....LIST PRICE 10c

Open Circuit Phone Jack

Made to fit all stand-phone plugs. Contact spring made of nickel plated phosphor bronze and body made of nickel plated brass. Highest quality insulating material used. Fits 3/8" hole in panels up to 3/16" thick. Supplied with one metal washer.

No. 100.....LIST PRICE 30c

SPRING BANANA PLUG

This spring banana plug is used extensively for plug-in coils, etc. Greater surface contact gives low RF resistance. Threaded shank is 6-32 thread, 3/8" long. Overall length 1-3/16". All metal parts are nickel plated brass except the four leaf banana spring which is nickel plated phosphor bronze. Supplied with soldering lug.

No. 206.....LIST PRICE 11c

SPRING BANANA PLUG

Identical to our part No. 206 above except that threaded shank is 3/4" long.

No. 207.....LIST PRICE 12c

SPRING BANANA PLUG

Identical to No. 206 spring banana plug except that instead of threaded shank it has a female 6-32 thread. Supplied with soldering lug and 6-32 screw.

No. 212.....LIST PRICE 12c

BANANA JACK

A standard banana jack made of nickel plated brass. Overall length 5/8". Fits 1/4" hole in panel. Supplied with solder lug and nut.

No. 105.....LIST PRICE 9c

INSULATED BANANA JACK

All metal parts are nickel plated brass. The high lustre insulated head is available in red, black, green and yellow. Fits 1/4" hole in panels up to 3/8" thick. Supplied with solder lug, insulated washer and nut.

No. 107.....LIST PRICE 15c

Insulated Combination Banana Plug & Phone Tip Jack

An insulated combination banana plug and phone tip jack made to fit our parts Nos. 206, 207, 202, 203, 208, 209, 210, 212, and 220. The phosphor bronze contact springs assure positive contact. Fits 1/4" hole in panels up to 3/8" thick. The high lustre insulated head is available in red, black, green and yellow.

KLIPZON Type A Test Prods are designed for maximum time saving, convenience and safety. Self-holding jaws slip onto wires, lugs, terminals, and grip test points until pulled off. Streamlined, modern design adds minimum capacity to circuit; makes contact with inaccessible wires and terminals easy. Points fit into pin-jacks, sockets, binding posts; grip wires from finest to #12 B&S gauge. Points are needle sharp stainless steel in Duralumin holders. Handles, red and black, 4 3/4" long, of glossy Tenite. 4 ft., super-flexible rubber covered leads. With Type B Mini-prod Connectors as terminals. Solderless connection in handles.

KLIPZON Type V&C High Frequency Crystal Probes bring added versatility to laboratory and service test equipment. Both types include Self Holding KLIPZON Test Points and Type B Mini-prod Connectors as terminals. Type V provides accurate means of measuring V.H.F. voltages with a vacuum tube voltmeter. Germanium crystal in low capacity, high impedance circuit, supplies rectified voltage to DC input. Complete shielding reduces hand capacity and antenna effect to minimum. Completely insulated. Reads to 200 Mc with 10% accuracy. Input capacity 3.5 Mmf, 400 V DC rating. Input resistance (approx.) .25 Meg-ohms @ 500 Kc, 150,000 Ohms @ 10 Mc, 25,000 Ohms @ 100 Mc. Reads .707 X positive peak of sinusoidal voltage. Type C adapts volt-ohm-milliammeters for indication and comparison of V.H.F. voltages. Has Germanium crystal and suitable network of resistance and capacity for connection to DC circuit of VOM, with at least 200 Micro-amp. sensitivity.

HEAVY DUTY BAKELITE BARRIER TERMINAL STRIPS

This latest type of construction of bakelite strip is made of molded bakelite of very high tensile strength. The barriers between each terminal prevent any possibility of short circuits and leakage between terminals. The terminals and screws are brass, nickel plated. The strips are manufactured by the KULKA ELECTRIC MFG. CO. INC., Design Patent No. 136, 762 and are exclusively distributed by us to the Radio Parts Distributors.

COLUMN A

All the Barrier Terminal Strips enumerated in this column for the 600, 601, 602 and 603 series are made with the screw type terminals exactly as shown in the illustration at top of the page.

COLUMN B

All the Barrier Strips enumerated in this column 600, 601, 602 and 603 series are supplied with the two-solder connection lug illustrated above.

COLUMN C

All the Barrier Strips enumerated in this column 600, 601, 602 and 603 series are supplied with the one-solder connection lug illustrated above.

COLUMN D

All the Barrier Strips enumerated in this column for the 600, 601 and 602 series are supplied with the bottom type connection lug illustrated above.

The 603 series of Barrier Strips not shown here are heavy duty strips with thick barriers and cross sections. They will take up to 35 amps of current and are ideal for heavy duty electrical control units such as spot welding machines, molding equipment, etc., or any place where a rugged heavy duty terminal block is needed for heavy amperage. Height: $\frac{3}{4}$ ". Width: $1\frac{1}{2}$ " (incl. barrier), Terminals on Center: $\frac{1}{2}$ ", Base (thickness): $\frac{1}{4}$ ", Mounting Hole Spacing $\frac{5}{8}$ " (has 3 holes), Screws: 10-32 x $\frac{3}{8}$ " long with binding head.

WALSCO ALL-PURPOSE WIRE STRIPPER

All these features in ONE model:
• Strips all wires from 16 to 22-gauge • Strips 300-ohm twin lead • Has built-in wire cutter • Has automatic locking device which prevents crushing of stranded wire • Made entirely of steel and will last a lifetime.

Strips insulation quickly and cleanly. Precision-ground blades will not nick or cut wire strands. Especially made for wire types and sizes used in electronic work, but equally applicable for automotive, aviation, and telephone trade.

Blades are hardened and precision-ground, and will last for thousands of stripping and cutting operations. Can readily be replaced when dulled.

Operation is extremely easy, requires no particular skill or experience. From 700 to 1000 wires can be stripped per hour. Equally adaptable for the production line or for use "on the job."

WALSCO DIAL CABLES AND CORDS

WALSCO Dial Cables and Cords are manufactured to meet the most rigid standards of the Government, Radio Industry and Engineering Laboratories. The finest raw materials are used and production is controlled to supply a uniform product with an absolute minimum stretch factor. All standard Cords are made with NYLON braid, known to have the highest abrasion resistance. These selected materials, plus special chemical treatment after fabrication, make WALSCO Cords the finest on the market. WALSCO Dial Cords are used by leading manufacturers as a standard component.

25-ft. and 100-ft. spools are packaged in clear plastic, re-usable storage boxes with sliding lids.

WALSCO UNIBELT

A NEW UNIVERSAL DIAL-DRIVE BELT ADJUSTABLE TO FIT ANY DIAL DRIVE

Covered by Patent No. 2,300,706

- Eliminates need for stocking 96 different sizes of belts.
- Unibelt gives the Radio Man the correct size belt for every make and model set.
- Easily installed in a few minutes. No need for taking dial mechanism apart.
- Put up on spools in continuous lengths which will make five or more average belt replacements.
- New patented construction incorporates special stainless steel core and pure latex covering.
- Belts cannot stretch, and when properly installed will not slip, fray or break.
- Unconditionally guaranteed.

The ingenious construction of the New WALSCO Unibelt makes it possible to assemble any size belt by merely cutting the desired length and joining the ends with a simple "zipper-like" connector. The connected belt cannot stretch and has a breaking strength of over 60 lbs. **ONLY ONE SIZE NEEDED** for any belt replacement job.

WALSCO RADIO CEMENT

Vibration-Proof Heat Resisting
Unsurpassed Adhesive Power

An elastic cement especially made for the manufacture and repairing of speakers and for general radio work. Unaffected by vibration, dries fast and will not become brittle with age.

Walsco Radio Cement can also be used for repairing cabinets, loose tube bases, grid caps, etc. It will provide a strong bond between almost any materials and is not affected by high temperature, moisture or oil.

All bottles come with built-in brush and have an evaporation-proof cap liner.

| Cat. No. | List Price |
|-------------------|------------|
| 51—1 3/4 oz. tube | \$0.60 |

WALSCO POLYSTYRENE CEMENT AND COIL DOPE

For Bonding Polystyrene Parts and Coil Coating in Radio and High Frequency Work
A Polystyrene solution with a high solid content. Can be brushed on or parts can be dipped. Renders coils or other parts moisture-proof. Holds windings firmly in place due to a certain amount of shrinkage upon drying. Electrical losses due to coating with this cement are negligible—even if used for high or ultra-high frequency work.

| Cat. No. | List Price | Larger Sizes on Request. |
|------------------|------------|--------------------------|
| 152—2 oz. bottle | \$0.65 | |
| 154—4 oz. bottle | 1.10 | |

CEMENTS — SOLVENTS SPECIAL RADIO CHEMICALS

WALSCO FABRIC CEMENT

Does Not Penetrate the Fabric

Especially made for attaching grille cloth, turntable felt, covering of portable radios, etc. Dries very fast; is unaffected by moisture, sunlight, and high temperature and does not become brittle. Indispensable to Radio Dealers and Servicemen—eliminates the danger of spoiling the outside of a grille cloth, turntable felt, or other fabrics, since it does not penetrate the material.

| Cat. No. | List Price |
|-------------------|------------|
| 21-A—2 oz. bottle | \$0.65 |

WALSCO WOOD GLUE

An "extra strength" adhesive incorporating the latest chemical developments and resins. A "must" item for every repair shop. Bottle caps have non-sticking rubber gaskets.

CLEANING AND LUBRICATING COMPOUNDS — APPLICATORS

WALSCO "CONTACTENE"

New Improved "Contact Cleaning Fluid"

- Cleans contacts and controls.
- Keeps controls and contacts noise-free.
- Lubricates and reduces friction.

A fast-evaporating combination of special solvents affording greatest cleaning power without affecting insulating materials. Contains "No-Ox," which after evaporation of the solvents, forms a thin film that protects the contacts. Contactene is recommended for treating volume controls, band switches, tuning condensers, springs, etc., to eliminate noisy operation. Bottles come with built-in brushes.

| Cat. No. | List Price |
|-----------------|------------|
| 82—2 oz. bottle | \$0.55 |
| 84—4 oz. bottle | 0.95 |
| 88—8 oz. bottle | 1.25 |
| 89—1 pt. bottle | 2.00 |

WALSCO "NO-OX"*

"The Miracle Electronic Contact Fluid"

Fast-acting liquid chemical formulated with a neutral, non-gumming special lubricating base. The answer to the radio-man's need for an outstanding contact and control cleaner. Contains no solvents; its corrosion-dissolving action is entirely chemical. Cleans, lubricates and preserves. Proved in tens of thousands of applications by radio laboratories, service shops, broadcasting companies, motion picture, sound and recording studios, etc. "NO-OX" is highly recommended for treatment of volume and tone controls, attenuators, mixers, relay contacts and similar equipment.

| Cat. No. | List Price |
|---------------------|------------|
| 101—1 oz. bottle | \$ 0.85 |
| 102—2 oz. bottle | 1.60 |
| 100-16—1 pt. bottle | 12.50 |

* Mfd. under exclusive licensing agreement with NO-OX Laboratories. Trade mark registered.

WALSCOLUB - B

Counteracts oxidation, prevents corrosion of metals and eliminates noise on band switches, push buttons, tuners, volume and other controls, as well as air-exposed electrical contacts, attenuators, etc. Will not change electrical properties. It is superior to any graphite compound for this purpose. Ideal on metal surfaces to prevent rust. Large, handy applicator tube.

| Cat. No. | List Price |
|-------------------|------------|
| 22—1 3/4 oz. tube | \$0.65 |

Available also in 1 lb., 5-lb. and 25-lb. containers for industrial uses. Prices on request.

WALSCO "LUBRICATOR"

Very useful for applying light greases and oils, such as Walscolub B, Lubriplate, Tunerlub, etc. Designed to reach the many cramped and inaccessible points in radios, TV sets and record changers. Syringe-type plunger releases desired amount of lubricant.

| Cat. No. | List Price |
|----------------------------|------------|
| 988—Lubricator | \$0.80 |
| 988D—Display of 12 No. 988 | 9.60 |

WALSCO "LUBRIPLATE"

The latest development in chemicals for lubricating purposes. Much superior to ordinary greases because of its higher lubricating and lasting qualities. Its viscosity does not appreciably change with temperature. Used on phonograph motors, record changers, switches, and all appliances that require a grease-type lubricant. In large handy "applicator" tube.

| Cat. No. | List Price |
|-----------------|------------|
| 23-A—2 oz. tube | \$0.65 |

WALSCO "TUNERLUB"

A special lubricant for use on TV tuners and other high frequency switch contacts. Contains no zinc or other harmful metal oxides. Prevents oxidation and noisy operation.

| Cat. No. | List Price |
|-------------------|------------|
| 26—1 3/4 oz. tube | \$0.75 |

WALSCO RADIO DIAL OIL

A light-bodied lubricating oil for all electrical and electrical appliances.

| Cat. No. | List Price |
|-----------------|------------|
| 72—2 oz. bottle | \$0.50 |

WALSCO "CONTACTENE INJECTOR"

For applying WALSCO Contactene, NO-OX, Dial Oil, etc., to spots which are not accessible with ordinary applicators. "Injector Needle" will permit application of contact chemicals to most volume controls without unsoldering connections or taking control apart.

This tool is made with the highest quality surgical-grade needle, and an oil-resistant rubber bulb.

Comes complete with small glass vial. A handy, useful item for every radio and TV service kit.

| Cat. No. | List Price |
|----------------------------|------------|
| 989—Contactene Injector | \$0.75 |
| 989D—Display of 12 No. 989 | 9.00 |

"KILOVOLT" MULTIPLIER PROBE

A skilfully-made probe that combines the finest high voltage design principles with precision fabricating—a superb multiplier probe whose efficiency . . . sturdiness . . . popular price, is beyond compare.

Equipped with 15 K.V. range multiplier that provides full range PLUS existing meter voltage. For example, use of the ICA probe will increase the range of a 5,000-volt range voltmeter to 20,000 volts full scale.

The three (3) built-in 1% resistors (totaling 6 watts dissipation) are coaxially mounted, providing air-spacing to further assure heat dissipation and a completely insulated probe.

Highest grade components include sturdy thermo-plastic barrel with safety finger guard and sealed ends. Over-all length: 8 1/2". Supplied with 5-ft. heavy duty lead with insulated phone tip.

No. 6167—20,000 ohms per volt (50 micro amps. meter movement) \$6.95
6168—10,000 ohms per volt (100 micro amps. meter movement) 6.95
6169—5,000 ohms per volt (200 micro amps. meter movement) 6.95

NOTE: Probes of special resistance values up to 2000 megohms are available on order to quantity users.

NEW 30-KV PROBE

Similar to the Insuline "Kilovolt" No. 6167 above, for 20,000 ohm per volt, 50 micro amp. meters only. A precision instrument . . . 600 megohms 2% high voltage multiplier
No. 6220 Dealer Cost \$7.95

THE INSULINE "100 X" MULTIPLIER PROBE

A new 30KV to 50KV VTVM Multiplier Probe (Internal resistance 1090 megohms). For ALL 10 to 11 megohm input instruments.

This VTVM probe will multiply existing meter ranges by a factor of 100; thus, if the top range of the instrument is 300 volts, meter will read 30,000 volts with probe. If top range is 500 volts, meter with probe will read 50,000 volts.

A few of the most popular VTVM's with which this probe may be used follows:

FILTERVOLT NOISE FILTER

An efficient filter for disturbances caused by electrical appliances. For use with any all-wave or broadcast receiver.

Rated conservatively at 250 watts for 32, 110 and 220 volt AC or DC circuits. Can be installed either at the radio or at the source of disturbance.

Contains heavy duty R.F. chokes, large filter capacitor, and has a "PI" Filter circuit arrangement.

No. 338 Dealer Cost \$5.00

ICA FILTERVOLT

Improves extremely noisy radio reception due to interferences in power line caused by electrical appliances, lights, etc.

No. 394

Dealer Cost \$3.00

DUPLEX FILTERVOLT

Eliminates Radio Noises Caused By—

- Electric Shavers
- Refrigerators
- Fans • Elevators
- Motors, etc.

Unit is equipped with Dual outlet, both sides being filtered for noise elimination.

No. 90 Dealer Cost \$1.17

UNIVERSAL VOLTAGE REGULATOR

Voltage fluctuation often occurs not gradually but suddenly, thus bringing a tremendous strain on the tubes. This regulator protects tubes through scientific regulation of current fluctuations. Housing body and end rings are neatly constructed and of perforated japanned metal. For all Radio Sets, AC, DC.

No. 92 Dealer Cost \$1.17

ICA 3-IN-1 RADIO TUNER

Functions as either an Antenna Tuner, Wave Trap, or Aerial Eliminator. Operates on any make or model radio set.

As an Antenna Tuner, it will improve the reception of a weak station. As a Wave Trap, it will separate interfering stations and improve selectivity. As an Aerial Eliminator, it makes unnecessary the outdoor aerial. Easily installed within a few minutes.

No. 93 Dealer Cost \$6.00
Complete with Instructions.

ICA DELUXE SIGNA-TONE

AUDIO OSCILLATOR — CODE PRACTICE SET — KEYING MONITOR

The ICA Signa-Tone is a patented Audio Oscillator, having 3 different output frequencies and a continuously variable volume control. The Audio notes are similar to those of high quality commercial CW stations.

1. CODE PRACTICE SET—A number of phones and keys may be connected for intercommunication or for classroom or radio club instruction in code.

2. KEYING MONITOR—An invaluable aid in improving any ham's "fist." Will follow the "bug" at all speeds. No well-equipped station should be without this keying monitor. (A double pole keying relay is required for this function—one set of contacts for keying transmitter; other set for monitor.)

3. MODULATION SIGNAL—The steady note of the Signa-Tone is ideal for adjusting both the Modulator and modulated stages of your transmitter for 100% modulation.

4. SIGNAL TRACER—By feeding the output of the Signa-Tone into each stage of your modulator and listening to the output of that stage, detects and "bugs" can easily be located. Complete with tube and self-contained speaker, for 110 V AC-DC.

No. 4300—Dealer Net Cost \$15.75
No. 4301—Classroom Model (No Speaker)—Dealer Net Cost 13.50

ICA UNBREAKABLE MORSE CODE RECORDS
