

Twelfth Edition

(Second Printing)

## FOREWORD

RADIO'S MASTER is compiled with the approval of and in cooperation with the ASSOCIATION of ELECTRONIC PARTS \& EQUIPMENT MANUFACTURERS and the SALES MANAGERS CLUB, EASTERN DIVISION. It is the official buying guide and reference book of radio parts and electronic equipment for the industry. The distribution of this buying guide is not a representation by the person or firm distributing the same that all of the lines ${ }^{-}$ and all of the products contained herein are necessarily carried by such person or firm.

Every precaution is taken to insure accuracy in the preparation of display pages and indexes, but the publishers cannot guarantee against the possibility of error or omission, nor can they be held responsible for price changes or withdrawal of items during or after publication.

Enrolled manufacturers reserve the right to make mechanical changes in specifications necessitated by emergencies over which they have no control, and to change prices or withdraw items without notice.

To place orders for products listed in RADIO'S MASTER, mention the page number on which the item appears, and the specific catalog or code number, if any-this will help to expedite your order and lessen the chance of error.

List prices are furnished only for information-they are not offered as quotations.

## RADIO'S MASTER

# NUMERICAL INDEX OF MANUFACTURERS' DISPLAY PAGES 

By Section and Folio

NOTE: This is a bare outline of the eighteen sections of RADIO'S MASTER. It will serve for speedy reference and for the purpose of familiarizing yourself quickly with its general contents. Regular use of he Master will reveal many additional items too numerous to list here you may also discover an item in a section to which it does not directly relate. For more complete and precise information, consult the exhaustive detailed General Index at the back of book.

NATIONAL*UNION RADIO CORP.

Precise engineering techniques and rigid quality control under skillful technical supervision make National Union Transmitting and Special Purpose Tubes the "preferred" tubes for replacement and initial equipment service.
"War-born know-how" through National Union Research continues to assure the reputation that National Union Tubes enjoy for long life, economy and reliability.

*N. U. IONIZATION GAUGE measures degree of vacuum over range of pressures

Filament Voltage............ 3 Volts $\dagger$ Filament Current........ 2 Amperes $\dagger$ The filament voltage should be adjusted to give an Electron Collector Current of 20 Milliamperes.

Ion Collector Voltage....Negative 13 V . Shield Potential..............Negative 13 V . Electron Collector Voltage.......... 200 V. Electron Collector Current....... 20 Ma.

- Sensitivity-Ten times the ion current in amperes equals the pressure in mms. of mercury.
It is possible to expose the hot filament of this gauge to air at atmospheric pressure and later have it function efficiently under vacuum conditions.

* May be used as ionic heated cathode rectifier under some conditions.

## RAYTHEON HEARING AID TUBES

The hearing aid tubes listed below are an exclusive Raytheon development and have been used as original equipment in the majority of small wearable hearing aids which have been manufactured in the United States.

These tubes are also finding many new applications in circuits and equipment where very low battery drain, extremely small size, and long life are required. The types with an " $A$ " in the suffix are of the "flat" construction, designed and made only by Raytheon.

| Type No. | Construction | Application | Filament |  |  | Rated Voltages |  |  | Output Watts | Ampl. Factor |  |

** Each section.
Each of the types listed above is supplied with $11 / 4^{\prime \prime}$ leads which are tinned for easy soldering into the equipment. By substituting the letter " Y " for " X ", the tubes may be obtained at the same prices with 0.2 in . leads for use with commercially available sockets.

# CETRON ELECTRONIC TUBES 

## Engineered and Manufactured by Continental Electric Co., Geneva, III. CETRON PHOTOTUBES

CETRON phototubes are either of the gas-filled or of the vacuum type. With the gas-filled type, greater effective response is obtained particularly in low impedance circuits, while the vacuum type is recommended where maximum stability is desired

CETRON phototubes are selected as to their sensitivity and priced accordingly. Phototubes of the Super Class A/B are generally used for experimental purpose where very high sensitivities are required; Class C mostly for motion picture equipment; Class $D$ for relay work, etc.

## CETRON BLUE SENSITIVE TUBES

CETRON blue sensitive tubes comprise the most complete line of phototubes designed for sound reproduction work from dye recorded film.
Continental Electric also manufactures a complete line of special purpose phototubes such as: CE-5, CE-7, CE-8, CE-10, CE-15, CE-18, CE-20, CE-26, etc. We will be happy to work with you on design and development problem's. Full data, prices, etc., will be forthcoming upon request.

## GAS-FILLED PHOTOTUBES

The rated sensitivity for Super Class $A / B$ is 200 mieroamperes per lumen and up (average 300); Class C, 125-200 microamperes per Iumen (average 160); Class D, $75-125$ microamperes per lumen (average 100 ). These sensitivities are measured at recommended operation and test voltage as specified in our technical chart.

VACUUM PHOTOTUBES
The rated sensitivity for Super Class $A / B$ is 30 microamperes per lumen and more (average 35); Class $C$, $22-30$ microamperes per lumen (average 25); and Class D, 12-22 microamperes per lumen (average 16); all are measured at 250 Volts.

Engineering bulletins giving detailed specifications on all tubes listed here are available and may be had upon request. The extensive engineering and manufacturing facilities which we have, make possible the development and production of many types of special tubes. If you have a problem involving the use of any CETRON tubes you are invited to consult with us. We are also prepared to make special tubes to your specifications.

## WARRANTY

We guarantee all products manufactured by us to be free from all material and manufacturing defects and to give satisfactory service when operated in accordance with instructions indicated for their use.

Continental Electric Co.

For over a decade, Eimac tubes have led the field in performance - the acid test of electronic equipment. Ultra-modern Eimac tubes provide maximum power and efficiency for today's equipment, and are ready and waiting
for the needs of tomorrow. These pages contain basic data on many Eimac products. Refer to reverse side of sheet for brief technical data on Eimac products illustrated. Complete information is yours for the asking. Write today!

## SINCE 1928

Electrons, Inc. has concentrated on continuous, systematic research in the development of hot-cathode, gaseous-discharge Rectifier and Control Rectifier Tubes, which would satisfy the demand for power tubes of outstanding reliability. The combination of xenon gas, fantalum anodes and tough cathode coatings has resulted in EL Rectifier Tubes of long and dependable life. Our engineering staff is always available to help solve problems arising from new and unusual applications of gaseous rectifier or grid control (Thyratron) tubes.

## AVAILABILITY

EL Rectifier Tubes are now available in large or small quantities at the lowest prices. Whether your power requirements are measured in fractional amperes or hundreds of horsepower, EL Rectifiers offer you a stable and dependable source of supply. Electrons, Incorporated, as always before, stand back of every fube purchased, assuring complete satisfaction in performance and reliability.

Tubes listed on this page can be supplied direct from stock. Many other types are also available for immediate delivery. Write for catalog today. CHATHAM also designs, develops and manufactures special tubes to exact customer specification. Inquiries regarding this service are invited.

## CHATHAM 866-A RECTIFIER

A rugged half wave Mercury Vapor rectifier to withstand high peak inverse voltages. Heavy duty filament. Fil. 2.5 volts, 5.0 amp . . . . Peak inverse anode voltage 10,000 volts, 25 amp . average anode current.

## CHATHAM 394-A THYRATRON

A Mercury Vapor and Argon filled thyratron for grid controlled rectifier service...Amb. Temp. range of $-40^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$, Heater 2.5 volts, $3.2 \mathrm{amp} . .$. Peak inverse anode voltage 1250 volts, 640 ma . average anode current.

## CHATHAM 2051 THYRATRON

An Argon filled shield grid thyratron for grid controlled rectifier service. Permits use of high resistance in grid current. Heater 6.3 volts, 0.6 cmp . . Peak inverse plate voltage 700 volts. 75 ma . average plate current.

## CHATHAM 2050 THYRATRON

A Xenon filled shield grid thyratron for grid controlled rectifier service. Permits use of high resistance in grid current. Heater 6.3 volts, 0.6 amp. . . Peak inverse plate volt age 1300 volts, average anode current 100 MA.

## CHATHAM 884 THYRATRON

An Argon filled thyratron for use as a sweep circuit oscillator in cathode ray tube circuits. Stable oscillator. Heater 6.3 volts, 0.6 amp. . . . Peak forward plate voltage 300 volts, 75 ma . average plate current.

## CHATHAM 4B32 RECTIFIER

A rugged half wave Xenon filled rectifier. Operates in any position throughout an ambient temperature range of $-75^{\circ} \mathrm{C}$ to $+90^{\circ} \mathrm{C}$ Fil. 5 volts, 7.5 amp. . . Inverse peak anode voltage 10,000 volts, 1.25 amp . average anode current.

## CHATHAM 2D21 THYRATRON

A Xenon filled shield grid thyratron for grid controlled rectifier service. Permits use of high resistance in the grid circuit. Heater 6.3 volts .6 amp. . . . Inverse peak plate voltage 1300 volts, 100 ma . average plate current.

## CHATHAM 2A4G THYRATRON

An Argon filled thyratron for grid controlled rectifier service

Quick heating time High peak currents. Fil. 2.5 volts, 2.5 amp. . . Peak inverse plate voltage 200 volts, 100 ma . average, plate current 1.25 amp. peak plate current.

## CHATHAM 372-A RECTIFIER

A half wave Mercury Vapor rectifier to withstand high peak inverse voltages. Heavy duty filament. Fil. 5 volts, 7.5 amp . Peak inverse anode voltage 10,000 volts, 1.25 amp . average anode current.

## CHATHAM 885 THYRATRON

An Argon filled thyratron for use as a sweep circuit oscillator in cathode ray tube circuits. Stable oscillator. Heater 2.5 volts, 1.4 amp. . . . Peak forward plate voltage 300 volts, 75 ma. average plate current.

## CHATHAM 17 THYRATRON

A Mercury Vapor thyratron for grid controlled rectifier and general application... rugged filamentary cathode. Fil. 2.5 volts, $5.0 \mathrm{amp} .$. Peak inverse anode voltage 5,000 volts, 0.5 amp . average anode current.

## CHATHAM 3B28 RECTIFIER

This rugged half wave Xenon filled rectifier will operate in any position and throughout an ambient temperature range of $-75^{\circ} \mathrm{C}$ to $+90^{\circ}$ C. Fil. 2.5 volts, $5.0 \mathrm{amp} . .$. Inverse peak anode voltage 10,000 volts, . 25 amp. average anode current.

## CHATHAM IZ2 RECTIFIER

A small bulb high voltage vacuum rectifier. Low cathode heating power and low dielectric losses make tube suitable for radio frequency supply circuits. Fil. 1.5 volts, .290 amp. . . . Inverse peak plate voltage 20,000 volts, 2 ma . average plate current, 10 ma . peak plate current.

## GAMMATRON TUBES

# MCOHITT RADIO TRANSWITTING AND INDUSTRIAL PURPOSES 

MACHLETT LABORATORIES, Inc., the world's largest manufacturer of X-ray tubes, brings to radio and industrial uses its 49 years of electron tube experience.
The production techniques required for the successful manufacture of X-ray tubes are very similar to those used in producing highpower oscillators, amplifiers, and rectifiers. The chief differences in X-ray tube production are those due to the exceptionally stringent electrical and mechanical requirements. X-ray plate voltages may go as high as one million volts dc, while the necessity of controlling the electron stream within narrow limits requires the maintenance of the closest dimensional tolerances. The skills and techniques necessary to meet these conditions are both new and valuable in transmitting and industrial tubes. Some of the techniques are:

The use of heavy Kovar sections for glass seals to provide maximum: mechanical ruggedness
High-voltage exhaust to give complète outgassing and freedom. from art-over
Surgically-clean internal parts, assembled in air-conditioned departments to prevent introduction into the tube of particles that would shorten its life
During the war; Machlett employed these and other techniques in producing large quantities of highly-specialized electron tubes for radar, communication, and for the atomic bomb project. Thus this organization is well-versed in the requirements of modern highfrequency, high-power tubes.
The Machlett background of almost 50 years of continuous electron tube production, modern, laboratory-like manufacturing facilities, and up-to-the-minute experience assures the user that he will receive tubes thoroughly engineered, mechanically rugged, and characterized by trouble-free operation and long life.
For complete information, write our nearest representative, or to the factory at Springdale, Connecticut.

Visitron Phototubes are used the world over in Sound-on-Film equipment and in industrial and commercial controls. Visitron phototubes represent the best in high sensitivity and long life, resulting from long experience and the most advanced manufacturing techniques of the present day. Visitron phototubes are supplied in two types, gas-filled and vacuum, with sensitivities in the infra-red (" $A$ " type), blue (" $B$ " type) and ultraviolet (" C " type) regions of the spectrum.

CHART OF DIMENSIONS OF VISITRON PHOTOTUBES

Government

High Frequency Heating

Industrial Electronics end sobs Thraighrut the: "alphaber of boundless etweratic tup licition

United radio-therapy osciliators and rectifiers are used by the maiarity of shorf-wove generotor manufacturers. UNITED hos worked hond in hand with leading therapy instrument designers to develop bener fuoes.

These fubes are specifically designed for heavy
duty use in these self-excited oscillafor circuits, in which generol purpose fubes cannot properly be applied
Accurote replacement of tubes can most readily be made by selecting the proper UNITED types from the tables below.

RENEWAL TUBE INDEX FOR STANDARD MACHINES

## ND PRECISION CONSTRUCTION

$2-53$ to sell GOVErnment SURPLUS ELectron tubes)

Altec Lansing A-126, A-127 and A-255 series beam power amplifiers have been designed for the most exacting demand of high quality audio frequency power. Particularly, they are adaptable for broadcasting, wired music studio equipment, premium quality public address and music distribution use, and for disc recording where particular stress is placed on having full power available at all frequencies up to 10,000 cycles for orthacoustic preemphasized recording and where outside-inside high frequency equalization is used. These amplifiers will deliver POWER within 1 db of rating from 40 to $10,000 \mathrm{cy}$ cles thus assuring against intermodulation distortion; when operating 3 db below rating their frequency response is uniform within 1 db from 20 to 20,000 cycles, more than adequately spanning the FCC requirements for FM transmission. Input

A-255 AMPLIFIER
transformers have 90 db of shielding to allow operation near high external magnetic fields without danger of hum pickup.

These beam power amplifiers, finished in blue-grey baked enamel, are assembled on relay rack panels of recess pan construction making them adaptable for either rack or cabinet mounting. The front mat is readily removed exposing all wiring, terminals and components for quick servicing. A plate meter permits speedily checking the current of each vacuum tube, and a screw driver adjustment is provided for balancing the output tubes for optimum operation.

The A-126 amplifier has a built in equalizer with terminals which can be strapped to provide either low or high frequency boost or droop to compensate for pick-up deficiencies, transmission line losses and auditorium acoustics.

[^5]The Altec Lansing A-287 series of amplifiers are available for use where very high audio power is required. They are of the single stage push pull type with self contained power supplies and, in general, are constructed on the same lines as the A-126, A-127 and A-255 series amplifiers. Since these are strictly power amplifiers, having only 12 to 15 db gain, they must be operated from a driver amplifier such as one of the Altec Lansing A-126, A-127 or A-255 series.
These amplifiers, which are finished in blue-grey baked enamel and designed for rack mounting, are ideally suited for large auditoriums, electric organs, church chimes, skating rinks, sports fields and large industrial public address applications where audio power up to $1 / 4$ kilowatt is desired in one package.

A-420 PRE AMPLIFIER

The Altec Lansing A-420 is a two stagerfixed gain low level pre-amplifier designed to operate into the Altec Lansing A-126, A-127 and A-255 series of amplifiers from which it obtains its filament and plate supply. It is intended as a pre amplifier for microphone, phonograph pick-ups and other low level signals. The input tranaformer has 90 db of

A-287 F OR W AMPLIFIER
magnetic shielding so as to permit hum free operation when mounted on racks in close proximity to power equipment having high tray magnetic fields. This amplifier, which is finished in blue-gray baked enamel, is assembled on a relay rack panel of recess construction so that it can be readily mounted on a rack or in a cabinet.

SPECIFICATIONS

## A. 319 AMPLIFIER

The Altec Lansing type A-319 Amplifiers are compact, light weight, high quality, low mrice, AC -DC amplificrs, designod primarily for use in commercial wired music systems, hone phonographs and music systems, terminal amplifice for pacing systems, dance studios, etc.

The A-319A Amplifier which comes in the 10479 metal wall cabinet has a balanced bridging imput transformer with 5,000 ohms input designed to bridge across 250-500-600 ohm lines without requiring isolating transformers.

The A-319B Amplifier has a high impedance input for crystal pickup use. The 10479 cabinet must be purchased separately with this amplifier if required.

The amplifier chassis and cabinet are isolated from the power supply and may be grounded.

Both the A-319A and A-319B Amplifiers have an adjustable low frequency "BASS" boost. The A-319A has an adjustable high frequency 'TREBLE" boost to compensate for line losses. The A-319B has an adjustable high frequency droop to eliminate needle scratch. Inverse feedback from push puil output stage to input stage keeps distortion to a minimum. The feedback is taken from a tertiary winding on the output transformer thus leaving the output ungrounded.

## A-323B AMPLIFIER

The A-323B is a portable conventional chassis type generalpurpose amplifier designed for high quality reproduction of sound, music, and speech from records, radio and microphone. It is engineered and manufactured to meet the high quality standards required of an amplifier when used in conjunction with Altec Jansing speakers.
The outstanding features are: (1) Full rated POWIER out put within 1 db from 35 to 12,000 cycles. (2) Hum balancing potentiometer to eliminate necessity of careful selection of tubes for quiet operation. (3) Two inputs with selector frequency tone control gain. (5) Hich frequency variable low hrough use of a stepped controlled low pass fiter which sharp cutof of noise frecuencies yet allows full which gives f usable hish frequencies Operation of thi low pass filter of usable high frequencies. Operation of this low pass filter is quite diferent from customary trehie tone control and is ony avaiable generaly on the most expensive ampiniers. (6) equalzesioned phonograph pickup in the a esigned pr pickering piok no butwich metso the actance frekering pickup but which also meets the require commerial recordings. This phonograph equal zation which sot in the low rain input circuit for radio con be romoved sy in the low gain mput circut ior padre, can be removed y unsolang a strap when a microphone is used on high ain phonograph imput for P.A. Work. this leaves a fla and treble topo means of the bas and treble tone controls.

## fMiphtinit coitp of fMiAfICA 396 Broadway New York 13, N. 7.

MODEL 8 PB

MODEL 8 PB is the only truly two-way loud speaker system on the American market. This model is available from four stations to 90 wherein any station or combination of stations can be called individually or simultaneously. This executive system employs the "anti-snooping" feature which permits management to call and receive replies from any predetermined combination of stations but prevents any unwanted station from listening in. This model is the last word in tomorrow's high speed world.

MODEL 8 PB
Size $\|^{14} \times 11^{\prime \prime} \times 5^{\prime \prime}$ High

## MODEL 1137

Famous for its long life and crystal clear tone qualify, Model 1137 was developed more than ten years ago. Hundreds of special systems were installed and careful analysis made and from these records the the new Model II37 is offered. Available from 4 to 10 stations. Beautiful design and ease of operation make this the most outstanding apparatus of its kind. Sit at your desk, select any department and speak to a busy employee . . . even though the called party is several dozen feet away from his two-way loud speaker. This model is a replacement for systems not incorporating full two-way control.

## MODEL 320

This unit provides a low cost, high quality utility type two-way loud speaker system for general application. Economical in operation and initial cost, this equipment will operate long after many of its competitors have failed. Model 320 is made for use with up to 1000 feet of line and is available from 1 to 10 stations. A less expensive way to have more executive time, this model is your assurance of the utmost in performance, materials and workmanstip.

Sad26. . The oldest name in the two-way inter-communication field, hold basic patents on two-way loud speak inter-communication devices. There is no substitute for experience gained over a period of many years. Behind the product which you are buying, whether it be DuoVox, TeleVox or TeleMarine, is the most superb design which will meet your exacting requirements, year in, year out, for twenty-four hours a day. If if's Banks . . . it's instantaneous.

## The "BAND=MASTER" MODEL PA-3710-P <br> 10-WATT PORTABLE PHONO P.A. SYSTEM

The neatest "package of sound" ever offered in the low price field. The Band-Master has input facilities for a microphone (furnished), a record-player (included) and a musical instrument. Designed flexibility supplies individual or combined usage even to simultaneous mixing of all three inputs. Ample tone and volume controls, beam power push-pull output, inverse feedback circuit, fine quality phono assembly put, inverse feedback circuit, frine quality phono assembly Band-Master a long and eventful life. Phono assembly is protected from harm by being concealed (as illustrated inset) protected from harm by being concealed (as illustrated inset) on the bottom side of amplitier base, yet is instantly available by reversing the base even while system is operating. Three close-fitted sections sncrp together in a jiffy to form
one compact carrying case, all covered with durable Bellone compact carrying
gray simulated leather.

# THE FAMOUS RELL "SCHOOLMASTER" MODEL 2078 

Compact portable system includes full 25 watt amplifier, dual speed turntable, professional Tone Armi, microphone with stand, Heavy-duty 12" Speaker and all necessary cables. Ideal for schools, sales agencies, lodges, small industrials, etc. Thousands of users acclaim it.

[^6]

## The "OLD MASTER"

## 25-WATT PORTABLE P.A. SYSTEM MODEL PA-3725

Built around the famous 7 Tube Bell 25-Watt amplifier which has won public acclaim, this system is now presented in its modern version. Two microphone and one phono inputs its modern version. Two microphone and one phono inputs boost controls, adjustable speaker impedance matching boost controls, adjustable speaker impedance matching switch, auxiliary A.C. output, two speaker receptacles and
7 foot power cord for 117 volt, $50-60$ cycle A.C. connection facilitates complete operation flexibility. The amplifier carryfacilitates complete operation flexibinty. The amplifier carrying case and separate dual-speaker case are sturdily built of reinforced plywood, enhanced by beautiful Bell-gray simulated
leather covering. Two heavy-duty $12^{\prime \prime}$ wide range speakers, a leather covering. Two heavy-duty 12 " wide range speakers, a
choice of microphones, a mike stand, kit of matched tubes and all necessary cables and connectors provide the package purchaser with the perfect basic system. Auxiliary Bell turn-table units are available to complement the system.

NEW BELFONE "MAESTRO" LINE
The 1947 Belfone "Maestro" Series now being introduced to the market promises a new era in intercommunication systems. Entirely new from its very heart, the TESTALOK, to its newly styled exterior of ulta modern design, the new Belfone is a tribute to the engineer's skill. The beautiful cabinet is molded in two sections of Durez plastic, facilitating servicing of any part of the unit. The TESTALOK, a new feature of the series along with the new Bellswitch and new electronic circuit have elicited the highest praise from all who have tested its performance. The rounded body of the cabinet is of such design that the top cannot be used as a desk "catchall," which allows proper heat dissipation and prolongs the life of the entire unit. The Belfone "MAESTRO" unit will put a new interpretation on the business value of inter-office communication and will become an indispensable asset to every executive's desk

## THE

## 28-WATT MOBILE AMPLIFIER UNIT <br> MODEL 3728-M

Fourteen years of experience produced the new Bell Moto-Master. Ignoring fallacious peak wattages, Bell engineers guaraniee 28 watts undistorted output and believe the Moto-Master will cover $99 \%$ of all mobile jobs New from the base panel up, it incorporates all recent electrical and electronic advances blended with the same Bell "sound" engineering which made previous Bell Mobile units the leaders in their field. Mobile operators are acclaiming the new hinged-head pickup which by test will stay "in-the-groove" even when the 78 RPM turntable is tilted as much as 45 degrees. Its lower vertical inertia also laughs at acr or road vibration. Furnished with tubes as pictured the Moto-Master can be used with all standard mikes, trumpets or horns.

## THE "SOUND MASTER" 50 WATT AMPLIFIER MODEL 3750

This unit offers "powerhouse" performance with sufficient wattage for the majority of installations. With inverse feedback and push-pull beam power output tubes, it develops an undistorted 50 -watt output. Tone controls provide both boost and attenuation of high and low frequencies. Careful design has reduced both harmonic distortion and intermodulation distortion to very low levels. Tone controls permit exceptionally wide tone adjustment. Four input channels with separate volume controls allow three "mikes" and one phono to be simultaneously mixed in any combination. Tubes are furnished.

The ultra-modern housing for this expertiy engineered unit is furnished in Bell-gray with red trim. The illuminated pointer dials are inclined at a convenient level. To facilitate servicing, the easily removed one plece top. and back gives ready access to all components. A truly versatile, heavy-duty amplifier of Quality, power and Tone Excellence. Available also for remote stand-by control (Model 3750R) and in system form (Models PA-3\%50 and PA-3750-R).

## LOOK TO BELL FOR SOUND VALUES

[^7]

FOR offices, factories, homes, schools and other places where 2-station intercommunication is needed E-L UTILIPHONE is ideal in point of low-cost and long-time satisfactory operation.

Incorporating an efficient 3-tube amplifier, Utiliphone works with regular 110 V . DC or AC. The "master" station plugs into the outlet, while the second station may be located anywhere within 500 feet.

Housed in an attractive walnut baked enamel finish cabinet this efficient system is supplied complete with 14A7, 50A5 and 35 Y 4 tubes and 50 feet of wire. No installation service is required.

LIST PRICE $\$ 29.95$. $10 \%$ additional West of Rockies

# Bo6EN EX35 De Luxe "Streamlinez" Systems 

## MODELS WITH LOW AND HIGH IMPEDANCE INPUTS

## 35

Watts
$\star$ Exclusive New Triple Range Electronic Tone Corrector
$\star$ Controls Bass, Treble and Intermediate Tone Ranges
$\star$ Four Input Channels
$\star$ Three Microphones and Phono
$\star$ Remote Control Cir. cuits built in for all inputs
$\star$ lluminated Sloping Control Panels
$\star$ Push pull 6 L 6 Output

* Inverse Feedback and fixed bias
$\star$ Weatherproof Outdoor TrumpetSystems

C$\rightarrow$ OMBINING every desirable feature of advanced sound engheering with new and exclusive Bogen developments, the EX35 Streamliners" invite comparison with any equipment in their power fange. Chief among the axclusive features of the new "Sitreamliners" is the BOGEN TRIPLE RANGE ELECTRONIC TONE CORRECTOR. Exceeding all previous standards of performance this new oircuit offers complete control of three tone ranges-Bass, Treble, and the rifidie register. Three separate tubes, ecrch one acting as an electronic audio channel, control and amplify the overall tome range. A unique dual conirol system permits the operator to create any tone range desired regardless of the ccoustics of the installation. The Electronic Tone Corrector differs completely from ordinary Bass or Treble controls or equalizers, and it has none of the objectionable features of compensators or tone controls such as power loss or distortion. Other de luxe features of the new EX35 "Streaminers" are four Input Channels for three microphones and phono-Electrozic Mixing between all input channels-full range individual gain controls for all inputs and a low impedance model for installations where long microphone cables are required. The model EL35 low impedance amplifier provides one low impedance input EL35 low impedance amplifier provides one low impedance input channel. The other two microphone inputs and phono remain high impedance as in the model EX 35 but if desired, additional low
impedance inputs can be obtained builtin at an additional cost. impedance inputs can be obtained built-in at an additional cost. A. remote control circuit is built-in on all "Streamliner models permitting mixing and fading with Bogen wired or wireless remote
controls, of two microphones or one microphone and phono. Slop. ing control panels, illuminated, insure greater visibility and ease of operation. For further convenience variable tapped outputs are available at cr terminal strip and two speaker sockets-the variable taps permitting correct matching at both points. These and many other quality features contribute greatly toward making the new Bogen EX35 "Streamliner" cmplifiers second to none.
BOEEN DE LUXE MODEL EX35 "STREAMLINER"-Amplifier, complete with tubes.

## LOW IMPEDANCE AMPLIFIER

DE LUXE MODEL EL35 "STREAMLINER" - Ampifier, with Ifst microphone mput channel equipped for low impedance opera-thon-tapped at 50, 200, and 500 ohms. Specify tap setting desired when ordering. Model EL35 "Strecminer" amplifier, complete with tubes.

## BOGEN EX35 "STREAMLINER" SOUND SYSTEMS

MODEL EX35F-Complete basic system includes: l-EX35 amplifier, 1-Kit of matched tubes, 2-Jensen PM12B heavy duty 12" dynamic speakers each with $25^{\circ}$ heavy rubber covered speaker cable and plugs and, choice of 1-(a) Amperite BH velocity microphone, (c) Amperite BAH dynamic, (d) American D8T dynamic, (o) Astatic T3 crystal. Each with $121 / 2^{\prime}$ cable and plugs.

## FOR INDOOR INSTALLATIONS

MODEL EX35B-'STREAMLINER'-Complete system as above but with 2-WA12 de luxe walnut batles.

## FOR PORTABLE USE

MODEL EX35P-"STREAMLINER"—Complete system as above but with 1 -Heavy duty No. 134 X reinforced dual speaker case and one No. 133X de luxe amplifier case.

## FOR OUTDOOR INSTALLATIONS

MODEL EX35T-"STREAMLINER"-Complete system includes: 1-Model EX35 amplifier, 1-Kit of matched tubes. 2-Bogen-Univer-1-Model
sity $41 / 2$
Ex Bogen-University 25 -waft FM dynamic trumpet units (not dynamio cone speakers), choice of - (a) Amperite BH velocity microphone. (c) Amperite BAH dynamic, (d) American DBT dynamic, (e) Astatic T3 crystal. Each with $121 / 2^{\prime}$ cable and plugs.
MODEL SRC50-SR Remote Control, for use with any of above systems or amplifier. Complete with Model RC $50^{\prime}$ cable and plugs.

## MODEL EX35 "STREAMLINER" SPECIFICATIONS

POWER OUTPU'r: 35 watis undisforted (less than $5 \%$-peak power50 watts.
INPUT CIRCUITS: Four input channels-three Microphone inpute IMPUT Phono Lnput. All circuits may be mixed simultaneously.

PUT IMPEDANCES: Microphone channels-High impedance 500,000 ohms. (Low impedance channels arailable in Model EL35 provides taps of $50,200,500$ ohms). Phono input-high impedence -500,000 ohms.
OUTPUT CIRCUITS: Tapped terminal strip and two plug-in speares sockets.
OUTPUT INPEDANCES: 2, 4, 9, 250 and 500 ohms arailable at both terminal strip and sockets.
GAIN: Microphone Inputs, 130 db . Phono Inputs, 90 db .
FREQUENCY AESPONSE: 30 to 14,000 cYcIes + or -1 db . Tone cosrector range-bass control- 15 db . to +13 db . at 30 cycles. Treble control- 15 db . to +12 db . at 10,000 eycies.
TONE CONTROL: Triple Range Electronic Tone Coriector: Intermediate Range, fixed, 1 -Bass control, 1 -Treble control.
CONTROL PANEL: Illuminated, mounting three microphone controls one phono control, 2 electronic tone corrector controls and master AC powrer switch
REMOTE CONTROL PROVISION: Built-in_provides complete mixing and fading of ceny two of the 4 averilocble inputs from remote point.
TUBES: 4-6SFS, 2-6SL7GT, 1-6SJ7, I-6F6G, 2-6L6G: 1-7Z4, $1-5 U 4 G / 5 X 4 G$
POWER CONSUMPTION: 190 watts, 117 volts, $50-60$ cycles A.C. DIMENSIONS: $161 / 2^{\prime \prime} \times 81 / 2^{\prime \prime} \times 101 / 4^{\prime \prime}$.

#  

## UNIVERSAL FOR 6 VOLTS DC AND 115 VOLTS AC OPERATION

FEATURES

* 32 Watts
* No Outside Power Packs
$\star$ Constant Speed Mofor
$\star \underset{\text { rector }}{\star}$ Electronic Tone Cor=
* 3 Channel Input
* Automatic Change. over from $A C$ or DC
$\star$ Standby Switch-for Battery Economy

MODEL EX326 UNIVERSAL MOBILE SYSTEM is recommended wherever the finest in sound is required.
$\star$ Makes passenger car easily convertible for sound work. * Makes ideal portable unit for truck use.
$\star$ Will amply cover all average requirements for indoor and outdoor use.

## NO OUTSIDE POWER PACKS REQUIRED

The EX326 is completely self contained in one compact unit including amplifier, and phono assembly with its own hinged cover. A six volt D. C. and 115 volt A. C. power supply is built in. Changeover is automatic.

## THREE INPUT CHANNELS

The EX326 allows mixing of two microphones and phono at the same time.

## TRIPLE RANGE ELECTRONIC TONE CORRECTOR

An extremely important feature of the EX326 is the Bogen Triple Range Electronic Tone Corrector. Exceeding all previous standards of performance this new circuit offers complete control of three tone ranges, Bass, Treble and the Middle register. A unique dual control system permits the operator to create any tone range desired regardless of the acoustic condition of the installation. The Electronic Tone Corrector differs completely from ordinary Bass or Treble controls or equalizer, and it hás none of the objectionable features of compensaiors or tone controls such as power loss or distortion.

## STANDBY SWITCH

A switch located on the control panel cuts the B power but allows the tubes to remain heated, ready for instant return to operation. REMOTE STANDBY SWITCH is incorporated in special microphone handle-performs same function except at any distance awy from the amplifier. This standby switch on your Bogen amplifier means reducing battery consumption.

## CONSTANT SPEED RIM DRIVE PHONO MOTOR

A rim drive motor insures smooth running operation, eliminating wows or waver on either 6 volt $D$. C. or 115 volt A. C. An Astatic crystal pickup with a new type shock-proof arm is mounted on the phono assembly.
MODEL EX326-De Luxe Mobile Amplifier complete with phono assembly and tubes.

## DE LUXE UNIVERSAL SOUND SYSTEMS

MODEL EX326F MOBILE DE LUXE SYSTEM-Complete with Model EX326 Universal mobile amplifier and tubes. Two heavy duty 12 Jensen PM dynamic speakers, each with 15 ' of cable and plugs and, choice of l-( $\sigma$ ) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal microphone. Each with $12 \frac{1}{2}$ ' microphone cable and plugs.

## OUTDOOR INSTALLATIONS

MODEL EX326T DE LUXE MOBILE SYSTEM-Complete with EX326 cmplifier and tubes. Two high power University $31 / 2^{\prime}$ trumpets, each with 25 watt unit, choice of l-(a) Amperite BHE velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal microphone. Each with $12 \frac{1}{2} 2^{\circ}$ microphone cable and plugs.
MODEL AHG SPECIAL MICROPHONE HANDLE-With built-in remote control standby switch and complete with $25^{\circ}$ remote control cable and plugs.

## EX326 AMPLIFIER SPECIFICATIONS

OUTPUT: 32 watts.
OUTPUT IMPEDANCE: 4-8-15-250-500 ohnts.
GAIN: 120 db . on microphone, 81 db . on phono.
INPUT: 3-2 microphone at 500,000 ohms, l-phono 500,000 ohras. FREQUENCY RESPONSE: $\pm 30-12000$ cycles. PROVISION FOR REMOTE CONTROL: Built in. TUBES: 3-6SF5, 2-6SL7GT, 2-6L6G, 1-5U4G/5X4G CURRENT DRAIN: 6 volt D. C. $23.5 \mathrm{amps}$. . 117 volf A. C. 120 watts.
DIMENSIONS: $16^{\prime \prime}$ long $\times 16^{\prime \prime}$ wide $\times 101 / 4{ }^{\prime \prime}$ high.

## MODELS WITH LOW AND HIGH IMPEDANCE INPUTS

## 70

## WATTS

大 Less than 4\% disfortion

* Exclusive BOGEN dual construction
* Two complete 35 watt power amplifiers
* Separate power supply for each amplifier
* Three inpuł channel mixing
* Two microphone and Phono input
$\star$ Bass and treble tone compen= sator

THE NEW BOGEN E75 is a high powered amplifier retaining most of the outstanding features of the famous Bogen De Luxe EX70 Amplifier. It is designed for installations where high power and exceptional tone quality are desired-at an economical cost. Containing the exclusive Bogen Dual Amplifier circuit, the E.75 offers the greatest value in sound equipment at a price rant
previously considered low for SINGLE OUTPUT Amplifiers.

## GENERAL DESCRIPTION

The E75 is a dual unit consisting of two separate 35 watt power amplifiers, each with its own Driver Stage, Power Supply, Separate Fixed Bias Rectifiers, Inverse Feedback, and Separate Master Gain Controls.

## DUAL POWER AMPLIFIERS

The E75 may be used as two separate 35 watt Power ampli-fiers-driven by preamplifier common to both-or the outputs of both amplifiers may be parlleled to deliver 70 watts. The tapped output transformer of each cmplifier is connected to marked terminal strips. An external switch may be attached to obtain instant changeover from either outpuy, in cases of emergency.

## UNIVERSAL APPLICATION

This new low cost 70 watt amplifier is highly recommended for all high power installations such as Skating rinks. Athletic fields, Stadia, Dance halls, Airports, etc.
As an emergency feature the dual amplifier design of the E75 safeguards against complete breakdown. In the event of tube burn out, condenser or transformer failure, etc., half the power ( 35 watts) of the E75 is still available in the amplifier section not affected.

## MULTIPLE MICROPHONE AND PHONO INPUTS

Two Microphones and Phono may be mixed simultaneously thru the three High Impedance inputs. Each input has its full range volume control. A LOW 1MPEDANCE MODEL EL75 is available, at a slight additional cost, for installations where it is necessary to run very fong microphone lines. This provides one Low Impedance mput for ford one Phono Input.

## DUAL PROTECTIVE FUSES

Two fuses are located on the rear of the chassis, one for each power amplifier. A switch is also provided to obtain voltage for the preamplifier from either power supply.

## BASS AND TREBLE TONE COMPENSATOR

A complete variation of the overall tone is made possible by the Bass and treble compensator, insuring better flexibility of the tone ranges than is possible to obtain thru the use of ordinary tone controls.
Auxiliary equipment to use with the E75 for indoar and outdoor installations has been carefully selected to insure the
finest results for the purchaser of these splendid amplifiers.
BOGEN MODEL E75 AMPLIFIER-Complete with tubes.

## LOW IMPEDANCE AMPLIFIER

MODEL EL75 AMPLIFIER-Same as above Model E75 but with first micro-input channel equipped for low impedance. Uses first micro-input channel equipped for low impedance. Uses
special high fidelity input transformer mounted right on chassis, special high fidelity input transtormer mounted right on chass
humless, tapped at $50-200-500$ ohms. Complete with tubes.
NOTE: If additional low impedance inputs are desired, refer to price sheet.
NOTE: If any systerns are ordered less microphone refer to price sheet.

## BOGEN E75 SYSTEMS

MODEL ET5F BASIC SYSTEM - Complete E75 amplifier with tubes-Four Jensen $12^{\prime \prime}$ heavy duty PM12B speakers, 1-(f) Astatic IT30 Crystal Microphone. With 121/2' microphone cable and plugs.

## FOR INDOOR INSTALLATIONS

E75B SYSTEM-Complete system same as bove, but with 4 12 inch speakers mounted in De Luxe wainut baffles Model WA12.

## FOR OUTDOOR INSTALLATIONS

E75T SYSTEM-Complete E75 amplifier and tubes-four $41 / 2^{\circ}$ University trumpets and 25 watt units. 1-(f) Astatic JT 30 Crystal Microphone. Each with $121 / 2^{\circ}$ microphone cable and plugs.
CHOICE OF DE LUXE MICROPHONES other than listed above: (a) Amperite BH Velocity Microphone, (c) Amperite BAH Dynamic, (d) American D\&T Dynamic, (e) Astatic T3 Crystal. Each with $121 / 2^{\prime}$ microphone cable and plugs. For extra cost refer to price sheet.

## E75 AMPLIFIER SPECIFICATIONS

OUTPUT: 70 watts. ( $2-35$ watt power amplifiers) less than $4 \%$ distortion.
OUTPUT IMPEDANCES: Each power amplifier tapped-4-8-15-$500-1000$ ohms, may be parallel to deliver 70 watts.
GAIN: Microphone 124 db , Phono 95 db .
INPUTS: 3-2 Microphones, 1 Phono-each 500,000 ohms. (In Model EL75, low impedance channel is tapped at 50-200500 ohms.)
FREQUENCY RESPONSE: $30-14000$ cycles-1 db .
TUBES: 2-6SF5, 2-6SL7GT, 2-6F6G, 2-724, 4-6L6G, 25U4G/5X4G.
CONTROLS: (6) 2 Mike, 1 Phono, 2 Master Controls, 1-Bass and Treble Compensator.
CURRENT DRAIN: 290 watts at 117 volts- $50-60$ cycle. AC.
DIMENSIONS: $171 / 8^{\prime \prime}$ long $x$ 10" high x $121 / 2^{\prime \prime}$ deep.

EExSTABLISHiNG a new standard of quality, performance and features, the new Bogen E30 "Trail Blazer" amplifier and systems, leads the way in offering finer sound equipment at lower and more popular prices.

Available in both High and Low Impedance Models, the E30 "Trail Blazer" units are seven-tube high gain amplifiers using the popular 6L6 Beam Power Tubes in the output stage to insure maximum power output and excellent tone quality. Equipped with three input channels for two microphones and one phono the E30 amplifier permits wide flexibility of operation. Each input channel is individually controlled and all channels can be mixed and used simultaneously. All inputs are high impedance on the Model E30. The Model EL30 Low Impedance amplifier is provided with a low impedance microphone input channel which is extremely valuable for installations where long microphone cables are used. In addition, the EL30 amplifier includes a second high impedance microphone inpu: and a separate phono input thereby permitting the use of both high and low impedance microphones. For complete variation of tone, $a$ bass and treble compensator is built-in insuring better variation of tone ranges than the ordinary tone controls commonly used. An illuminated sloping panel, handsomely etched in bright modern colors matches the smart streamline chassis design. A variable impedance output strip and two built-in speaker sockets add greater convenience for speaker connection and matching. All component parts are selected materials of the finest quality and "Trail Blazer" amplifiers are engineered to give lasting and consistent service.
MODEL E30 "TRAILBLAZER"-Amplifier and tubes

## LOW IMPEDANCE AMPLIFIER

MODEL EL30-30-watt amplifier, same as above Módel E30 "Trail Blazer" but with first microphone input channel equipped for low impedance. When ordering specify one of the following impedances: 50, 200, 500 ohms. Model EL30, complete with tubes.

## BOGEN E30 "TRAIL BLAZER" SYSTEMS

MODEL E30F-Complete basic system, includes I Model E30 amplifier and tubes, 2-12" Jensen PM12C speakers each with. 25' cable and plugs. I-Astatic IT30 Crystal microphone, and $121 / 2^{\prime}$ cable and plugs.

## FOR INDOOR INSTALLATIONS

MODEL E30B-Same as above, with 2-WA12 Walnut speaker bafles.

## FOR PORTABLE USE

MODEL E3OP-Same as E30F but with Model K30 portable carrying case for 2 speakers and amplifier.
Price

## FOR OUTDOOR INSTALLATIONS

MODEL E3OT-Complete system includes: 1-E30 amplifier and tubes, 2 -Bogen-University $31 / 2^{\prime}$ reflexed non-resonant weatherproof trumpets each with swivel mounting brackets, $2-25$-watt Bogen-University PM trumpet units (not dynamic cone speakers), 1-Astatic Crystal JT30 microphone, and $12 \frac{1}{2}$ ' of cable and plugs.

CHOICE OF" MICROPHONES, other than those listed above: ( $\subset$ ) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal. Each with $12 \frac{1}{2} 2^{\circ}$ cable and plugs. Ask for information on additional cost.

## MODEL E30 'TRAILBLAZER" SPECIFICATIONS

POWER OUTPUT: 30 watts undistorted (less than 5 per cent), peak power, 40 watts.
INPUT CIRCUITS: Three input channels, two Microphone inputs, one Phono input.
INPUT IMPEDANCES: Microphone channeis: High impedance 50,000 ohms. (Low impedance channels available in Model EL30 provides taps of 50, 200, 500 ohms.) Phono input, High impedance, 500,000 ohms.
OUTPUT CIRCUITS: Tapped terminal strip and two plug-in speaker sockets.
OUTPUT IMPEDANCES: $4,8,15,250$ and 500 ohms available $\alpha$ both terminal strip and sockets.
GAIN: Microphone Inputs- 129 db .
Phono input-89 db.
FREQUENCY RESPONSE: 40 to 12,000 cycles + or -1.5 db . TONE CONTROL: 1-Bass, Treble compensator.
CONTROL PANEL: Illuminated. Mounting two microphone controls, one phono control, one tone compensator control and master A.C. power switch.
TUBES: 2-6SF5, I-6SL7GT, 1-67N7GT, 2-6L6G, 1-5U4G/5X4G.
POWER CONSUMPTION: 130 watts, 117 volts, $50-60$ cycles A.C. DIMENSIONS: $15^{\prime \prime} \times 73 / 4^{\prime \prime} \times 91 / 4^{\prime \prime}$.

THE new Model E14 "Pacemaker" Sound Systems set the pace for medium powered Public Address equipment in the popular price range.
No other amplifier or system incorporates all of the features, listed above, at these low prices. Most of these features have only been available in larger so-calld De Luxe units selling at much higher prices. The Bogen E14 "Pacemaker" is a 7-tube high gain amplifier providing three input channels for two microphones and phono. Each microphone imput has its own separate input tube and full range individual gain control. Phono input is also provided with separate gain control and electronic mixing is effected between all three channels simulfaneously. All input channels are high impedance and microphones, dynamic, crystal, volecity, or velotron. Low impedance inputs, an exclusive Bogen feature, are available on any or all inputs in the Model ELl4 amplifier (described below). A bass and treble tone compensator is another De Luxe teature built in the Model E14 "Pacemaker." This is not an ordinary tone control but permits accentuation of the bass or treble ranges at will. A pair of $6 L 6$ beam power output tubes in pushpull assure ample power with excellent quality. A beautifully etched, sloping control panel illuminated for greater visibility enhances the appearance of the new Bogen E14 "Pacemaker." For ease of connection, lock type shielded connectors are provided for the microphone inputs, terminal strips for phono inputs and a new variable output terminal strip tapped at 2, 4, 9 , 250, and 500 ohms insures quick and easy speaker matching. For further convenience two speaker sockets are built-in. The new E14 "Pacemaker" establishes a new standard in the medium priced field.
MODEL E14-Amplifier and Tubes.

## LOW IMPEDANCE AMPLIFIER

MODEL EL14-14 watt amplifier same as Model E14 "Pacemaker" above with first microphone input channel equipped for low impedance operation-tapped at 50,200 and 500 ohms. Specily tap setting desired when ordering. MODEL EL14, complete with tubes.

## BOGEN MODEL E14 SYSTEMS

MODEL E14F-Complete basic system consists of: 1-Bogen Model E14 "Pacemaker" amplifier, 1-Kit of matched tubes, 2-12' Jensen PM412C Dynarmic speakers each with $25^{\prime}$ of
speaker cable and plug. Astatic JT30 Crystal microphone and $121 / 2^{\prime}$ of microphone cable fitted with lock type connectors.

## FOR INDOOR INSTALLATIONS

MODEL E14B-Complete system. Same as El4F but with 2-WA12 Walnut speaker bafles.

## FOR PORTABLE USE

MODEL E14P-Complete system. Same as E14F but with Model K14 Portable Carrying Cases for two speakers and amplifier.
CHOICE OF DE LUXE MICROPHONES other than listed above (a) Amperite BH velocity, (c) Amperite BAH dynamic, (d) American D8T dynamic, (e) Astatic T3 crystal microphone. Each with $121 / 2^{\prime}$ cable and plugs. Ask for information on additional cost.

## MODEL EI4 AMPLIFIER SPECIFICATIONS

POWER OUTPUT: 14 watts undistorted (less than 5 per cent.), peak power, 25 watts.
INPUT CIRCUITS: Three input channels, two Microphone inputs, one Phono input.
INPUT IMPEDANCES: Microphone channels-High impedance 500,000 ohms. (Low impedance channels available in Model El14 provides taps of $50,200,500$ ohms.) Phono input, High impedance, 500,000 ohms.
OUTPUT CIRCUITS: Tapped terminal strip and two plug-in speaker sockets.
OUTPUT IMPEDANCES: $4,8,15,250$ and 500 ohms available at both terminal strip and sockets.
GAIN: Microphone Inputs- 125 db . Phono Inputs- 85 db . FREQUENCY RESPONSE: 40 to 12,000 cycles + or -1.5 db . TONE CONTROL: 1-Bass, Treble compensator.

#  <br> 4 

THE Improved new Bogen El620 moble system answers a long felt need for an economical amplifier that may be easily converted to operation from six volt storage battery or 115 volt A.C. Changeover from 6 volt battery to 110 volt A. C. is cutomatic.

The El620 amplifier comprises a single self-contained amplifier unit with its own amper supply and phono assembly. Microphone and phono inputs may be mixed or faded thru two independent volume or gain controls. A Bass and Treble compensator control is built-in. The E-1620 features a sloping recessed four color panel.

The E1620 is furnished with a phono assembly comprising a single speed motor, ply to eliminate any speed pariation or waver on 6 V . Dariation or waver on 110 V. A. C. The D.C. and lioly is complete with Astatic crystal pickup. Tapped output transformer -Speaker plug-in connec-tions-Smart styling and fine performance makes this an amplifier that lends itself to a wide variety of uses.

MODEL E1620 AMPLIFIERcomplete with phono assem. bly and tubes.

MODEL E1620F SYSTEM-Complete with E1620 amplifier and tubes. Two PM12C Jensen 12 inch dynamic speakers, Astatic JT30 crystal microphone with $122^{1 / 2}$ microphone cable and $15^{\prime}$ speaker cable and microphone with $121 / 2$ m
MODEL E1620T SYSTEM-Complete with Model E1620 amplifier and tubes. One University $3{ }^{1 / 2} 2^{\prime \prime}$ high power trumpet and 25 watt unit. Astatic JT30 Crystal microphone with $121 / 2^{\prime}$ microphone cable and plugs.
NOTE: Model E1620 Systems are available with choice of De Iuxe Microphone at an extra cost: (a) Amperite BH Velocity, (b) Amperite BAH Dynamic, (c) American D8T Dynamic, (d) Astatic T8 Crystal microphone. Each with $12^{1 / 2} 2^{\prime}$ cable and plugs.

The Bogen Model R-501 is a single band superheterodyne receiver, especially designed to provide standard broadeast reception for operation in public address and centralized sound systems. It incorporates a built-in power supply, simplifying connection to any existent system.
A stage of R.F. amplification provides sufficient selectivity and sensitivity to insure reliable and consistent reception of broadcast signals in the most congested areas. It represents a definite improvement in overall performance over previous tunets and the use of manual tuning insures foolproof operation.

FEATURES
$\star$ Superheterodyne Receiver

- R.F. preselection
$\star$ Single band-standard broadcast
$\star$ Electron ray tuning indicator
$\star$ Automatic volume control
* Large full vision dial
* Universal output
$\star$ Built-in power supply

THIE improved Bogen EPIO system meets the demand for medium powered, two speaker sound systems at an economical price. Many teatures of the more expensive de luxe systems are incorporated in the EP10.
The amplifier is equipped with separate input channels for one microphone and one phono. These two channels each have their own full range gain control. Electronic mixing permits fading and mixing between both channels and also their use simultaneously. A high frequency tone control is provided. Ail controls and A. C. switch are mounted on an especially styled and coloriul control panel.
The output circuit comprises a pair of C5 beam power tubes in push-pull amplification assuring excellent tone quality and at 4-8-i5-250-500 ohms and connected to a speaker terminal strip. In addition two speaker sockets are built in and provide quick and easy means of connecting speakers.
speakers. The Emplifier may be used in many types of installations for hard of hearing types of instaliations for hard of nearing
aids, sman paging systems, etc. The unit is
ideal for speech modulation and may be used as a driver for medium powered transmitters.
The components used in making up the EP10 sound systems assure fidelity of reproduction, and dependable long life for
continuous operation.

MODEL EIDF "Economy" system comprises I-EIO amplifier with tubes: 2-10" PM dynamic speakers. Each with $25^{\circ}$ cable and plugs, and one Astatic Crystal microphone Model JT30 and $121 / 2^{\prime}$ cable.

## $\star 6$ Volt DC and 110 Volt <br> AC Operation

## $\star$ Outpuł Equals Ordinary 15-18 Wat+ Amplifiers

The Bogen Model E66 is a radical departure in mobile amplifier construction, and has been designed in accordance with the specifications of Police yet highly efficient, it is intended for use in Police, safety, fire and emergency cars, and also as a public address system, sar outdoor and emergency cars, and also as a public address system tor outdoor gatherings. The Bogen Mode. E66 can be used on either a volt storage battery or a design, extremely simple to install and mounts directly under the dashdesign, extremely simple to instan and mounts directiy under the dash-
board. It takes as litile space in a car and is as simple to operate as a badio or small heater.
The speaker, developed as a companion unit for the Model E66 is a special Bogen University reflex trumpet of the folded exponential type. It may be mounted easily in the motor compartment under the engine hoodor on a fender alongside the headlight. This speaker is so amazingly of a 15 watt system. $100 \%$ waterproof and of all metal construction this of a 15 watt system. 10k waterproo and of all metal construction, this tion in high efficiency reproduction. A special bracket is included for speaker mounting.
The microphone, a streamlined Astatic crystal with a handle and $71 / 2$ feet of cable, can be used by the driver without ainterfering with his normal driving operations.
The Amplifier utilizes beam power output and incorporates a stand-by switch which reduces the current drain and keeps the Amplifier ready at all times for immediate use. A phonograph connection is provided and the unit is constructed so that tubes or vibrator may be removed without disturbing the amplifier mounting.
The usefulness of Police Cars is immeasurably increased when the compact, mobile E66 is added to the usual two way radio communication, making each nolice car an extremely effective traffic safety car.

# BOGEN Booster and Pre-Amplifiers • Phono-Players 

## NEW 50 AND 125 WATT BOOSTER AMPLIFIERS

MODELS GO50 and G0125

These new Bogen booster amplifiers are ideal for any sound system where undistorted high power is required.
Response is flat from $20-20,000 \mathrm{cps}$. within 1 db . Rated output is delivered at 60 and 15,000 cycles as well as 1000 cycles. Driving power is negligible-an input signal of only 5 volts will drive either booster to rated output. Additional outstanding features are transraitter type output tubes, multi-stage inverse feedback, provision mifter type output tubes, multi-siage inverse feedoack, provision output taps for easy speaker matching, tube regulated screen output taps for easy speaker matching, tube regulated screen supply in the ack switch, terminal board mounted components and laced lock switch,

Similar to Model 8016 but equipped with the new Model HP16 low pressure pickup with permanent sapphire stylus. Especiclly recommended for proessional use

## MODEL MT16 TRANSCRIPTION PLAYER

Identical with Model PH16 with addition of a microphone input stage. TUBES USED: 1-6SJ7; 1-6SL7GT; 2-6V6GT; 1-5Y3GT.

## 4 CHANNEL MIXER-PREAMPLIFIERS BUILT IN REMOTE CONTROL PROVISION FOR ALL CHANNELS ON EACH MODEL

## MODEL HH

## FOR ALL NORMAL

P. A. APPLICA. TIONS
This four position mixer and pre-amplifier will mix four highimpedance microphones into any high impedance amplifier. Each input channel has its own tube and gain control. A master volume control is provided for overall
 gain. The unit ingrin. The unit inin A. C. power supply. Will answer to a wide variety of uses such as mixing and fading microphones to recording equipment, also to increase the input channels of existing amplifiers. Compact and smartly styled.
SPECIFICATIONS: Input impedance 500,000 ohms on all inputs. Output impedance 500,000 ohins. For 110 volts A. C. operation. TUBES: 5-6SF5, $1-6 \mathrm{X} 5 \mathrm{GT}$. SIZE: $14-1 / 16^{\prime \prime} \times 8^{\prime \prime} \times 77 /{ }^{\prime \prime}$ high.
MODEL HH complete with tubes without meter. Gain $60^{\circ} \mathrm{D}$. B.

## MODEL HLO FOR REMOTE LINE APPLICATIONS

Similar to Model HH, with four high impedance inputs, but equipped with a zero level output amplifier built-in with output transformer terminating in 50-125-200-500 ohms taps. A DB meter is provided on control panel to indicate output level and master gain contról is built in. Ideal for use as a remote Pre-Amp on telephone lines or as a remole pre-cmp operated for P. A. work at a distance from the main amplifiers. All input impedances- 500,000 ohms. For 110 volts A. C. operation. SIZE: $14-1 / 16^{\prime \prime}$ long $\times 8^{\prime \prime}$ deep $x$
MODEL HLO with tubes and D. B. meter. Overall gain 76 D . B.

## MODEL LLO FOR PROFESSIONAL BROADCAST USE

Built to conform to strictest requirements of broadeast equipment. Embodies four low impedance input channels, each with separate gain control. Each input is tapped at 50-125-200-500 ohms. A master gain control is included along with a built in DB level A master gain control is included along with a built in ab ievel meter. Low impedance output of $50-125-200-500$ ohms is available
at zero level. Built in $A$. C. power supply is absolutely humless. Precision equipment combined with smart styling. SIZE: 14-1/16" long x $8^{\prime \prime}$ deep $\times 77 / 8^{\prime \prime}$ high. TUBES USED: 5-6SF5, 1-6SI7, 1-6X5GT. MODEL LLO with tubes and meter. Overall gain 76 D. B.

## MODEL HT16 TRANSCRIPTION PLAYER

This general purpose phono player with amplifier is designed to handle $16^{\prime \prime}$ transaription records along with the standard variety. The $12^{\prime \prime}$ turntable is driven by a special heavy duty General Industries dual speed motor for 33-1/3 and 78 RPM. Astatic Crystal pickup feeds the built in 7 watt high quality amplifier that is equipped with master gain and tone controls. 8' PM dynamic speaker mounted in cover of carrying case. Cover is removable and may be used at a distance frorn the main unit. Ideal as $\alpha$ portable record player to handle any size recordings. Operation is from 110 volt A. C. only.

DIMENSIONS:
$19^{3 / 4^{\prime \prime}} \times 19 \times 10^{1 / 22^{\prime \prime}}$
Complete with tubes.

TUBE COMPLE MENT: 1-6SL7GT, 2-6V6GT, 1-5Y3GT.

# BOGEN Cammuna-Phones 

## BOGEN TYPE "A" SYSTEMS

MODELS 4A, 12A, 219A

## Master to Remote Station Communication

BOGEN TYpe "A" Communo-Phones provide instant communication between distant points. Systems consist of one Master and additional remote stations. Up to four remote stations may be added on the Model 4A, up to eleven remote stations on the Model 12A, and up to eighteen stations on the Model 219A. A Master can select any one remote station to speak with, orwith a 4 A Master-all remote stations at once, thereby instantiy locating any person in your organization. Persons called reply through the remote station nearest to them-they need not be close to the station-replies made from 20 to 30 feet away can be received by the Master station clearly and distinctiy.

- The Master station can be set to permit any remote station to call it, or remote stations can be obtained with call-in switches, either built-in or external, to permit remote stations to initiate a call to the Master at any itme.

Masters are equipped with an "on-off" switch, "press-to-talk" switch, and station selector. On the Model 4A a special arrangement permits closing out background noise levels from remote stations by a "silent" position on the Master station selector. A volume control on the Master permits adjustment of volume to any desired listening level.

Masters are finished in highly polished walnut bakelite to harmonize with any office surroundings.

TUBES USED: 1-12SJ7; l-50L6GT; I-3575GT

Model 6C-One Master only, for up to 6 stations, complete with tubes.
Model 6CE-Same as 6C, except with earphone for privacy of conversation.
Model 12C-One Master only, for up to 12 stations. Model 12CE-Same as 12C, but with earphone.
Model 219C-One Master only, for up to 19 stations. Model 219CE-Same os 219C, but with earphone.

Model 4A-One Master only, for up to 4 stations, complete with tubes.
Model $4 A E$-Same as $4 A$, but equipped with earphone for privacy of conversation.
Model AR-Remote siation only, for all type "A" Masters.
Model RS-Same as AR, but with built-in call switch.

## MODELS 12A and 219A

These models are for larger installations than the Model 4A. They are similar in all features except that they do not include the ALL STATION call position or the SILENT position.
Model 12A-One Master only, for up to 11 stations.
Model 12AE-Same as 12A, but with earphone for privacy of conversation.
Model 219A-One Master only, for up to 18 stations.
Model 219AE-Same as 219A, but with earphone.
NOTE:-Type " $A$ " Systems require a 2 -conductor cable between Master and each Remote station
Systems using Remote stations with call switch require a 3 -conductor cable between Master and each Remote station.

## BOGEN TYPE 'C" SYSTEMS MULTIPLE MASTER SYSTEMS

 (Model 6C Equipped with Paging Switch)BOGEN Type "C" Intercommunication Systems have D been designed to meet the requirements of Multiple Station installations where a number of executive stations are desired. Systems for up to six, twelve, or nineteen stations are available. Each station is a Master and can call any other Master independently. Two Masters can converse with each other at will and several pairs of Masters can converse at once without interference.

An extremely desirable feature of the Model 6C is the All-Station switch which permits any station to call or page all other stations in the system at one time. This feature is not available on Models 12 C or 219C.

If private conversations are desired, earphone Masters are available for one or all the Masters. This type of arrangement works like an inter-office telephone system. An extremely important feature is that it is not necessary to use the "Press-to-Talk" switch on any Master equipped with earphone, when earphone is in use.

Each station is housed in a beautiful walnut finished bakelite cabinet and equipped with station selector, master volume control, talk-listen switch, on-off switch and pilot light that shows when system is on or off.

TUBES USED: 1-12SJ7, 1—50L6GT, I-35Z5GT
CABLE NOTE:-Installation of Type "C' Systems requires a cable with one more conductor than the number of stations to be installed (i.e.) five stations require a six conductor cable, etc.

All "A" and "C" systems are designed for use on 115 volts, AC or DC.

## ZAStEAN ${ }^{6}$ and

We have been making amplifiers and associated equipment for many years and we have achieved a high degree of perfection in both the design and reproducing qualities of our products.
After years of arduous effort in the manufacture of highly specialized electronic equipment, we are now prepared to carry out a long cherished plan of making our high quality Eastern amplifiers and sound systems available to the trade.

It is our desire to culminate the vast experience which our specialization has afforded us into presenting an entirely new concept of a high quality line of amplifiers and sound systems which incorporate the highest degree of electronic engineering as exemplified by the inherent 21-Star Features.

We believe you vrill find our claims fully substantiated.

## EASTERN AMPLIFIER CORPCRATION

## THE EASTERN AMPLITUBE-A boon to the serviceman as well as to the user.

The radically - new Eastern AMPLITUBES epitomize the zenith in modern amplifier design. Each AMPLITUBE consists of all the resistor and tubular capacitor components comprising a particular inter-stage circuit. Each AMPLITUBE is encased in a metal shell and is terminated in an octal base. The individual parts are specially matched to each other for uniformity and highest accuracy. All units are coded for identification, so that they can readily be plugged into their sockets.

A complement of these AMPLITUBES, which plug into their respective sockets as easily as a set of radio tubes, provides all the inter-stage circuits for the complete amplifier. The practical benefits of this ultro:- modern design include complete mechanical protection of the parts, controlled selection of the componénts, ease of service replacement without unsoldering a single wire, simplicity of wiring, the elimination of unsightly parts arrangement and an amplifier unexcelled for beauty and performance.

These amplitubes make it simple and fasi when servicing problems come up in the field.

## $21 \star$ STAR

1. Exclusive EASTERN "AMPLITUBE" design. Each "AMPLITUBE" incorporates all inter-stage capaci-tor-resistor parts in one plug-in unit. Easy to insert-easy to replace.
2. Small, compact, "More Watts per Cubic Inch" assure you of maximum performance with minimum space.
3. Exclusive EASTERN "UNTCABLE" construction. Every amplifier is wired with standard cable harness guaranteeing laboratory-performance from each production-assembled unit.
4. Master-coded cable wiring harness. All wires color-coded for easy identification.
5. Exclusive EASTERN modern functional design gives that "smooth", eye-appealing look that your customers will welcome.
6. Simple to service. All tubes and components readily accessible. Only four screws hold the cover, a few more screws for the base. Remove cover and base, and all parts and wiring are in view. No trailing wires.
7. Exclusive EASTERN "ROTO-VUE" dials instantly show position of each control setting.
8. Indirect panel illumination. Lights panel in dark places and shows when system is turned on.
9. Exclusive EASTERN recessed panel and carrying handles. Nothing to catch on to passers-by. Easy to

## FEATURES

place in confined space. No more broken knobs or handles.
10. Attractive, durable baked plastic enamel finish in beautiful two-tone effect. Abrasive-resistant and acid-resistant.
11. Exclusive EASTERN recessed, multi-vaned louvres for maximum cooling of tubes and parts.
12. True electronic mixing of input circuits to eliminate interaction between controls.
13. Exclusive EASTERN Direct Current heating of voltage amplifier tubes to minimize a.c. hum.
14. Extractor-type line fuse holder allows immediate replacement of fuse from front of panel.
15. Separable a.c. line cord with special built-in connector socket on back of chassis.
16. Additional a.c. line-outlet for phonograph connection. Supplied on most models.
17. Universal output impedances - 4-8-15-250-500 ohms allows proper matching impedance for any combination of speakers.
18. Not an inch of shielded wire or cable used eliminates the attenuation of high frequencies due to shielding.
19. Fully licensed under Western Electric patents.
20. Easily adaptable to rack mounting.
21. Conservatively rated-ethically engineered.

## Model 14-A-14 Watts

## LIST PRICE $\$ 100.00$

The "lead-off" amplifier in the Eastern 21-STAR FEATURE line delivers 14 watts of Class ABl audio power ( 25 watts peak audio power) into a 4-8-15-250-or 500 ohm loudspeaker load. It is ideal for two-speaker public address systems. Two high-impedance microphone inputs are provided for crystal, dynamic or velocity microphones delivering as little as -60 DB. True electronic mixing provides operating stability because interaction between contrals is eliminated. One highimpedance phonograph input is included for crystal or high-impedance dynamic pick-up delivering - 20 DB or more. Single high-low tone control. Hum level, with all controls at maximum, is approximately 75 DB below rated output. Use of d.c. on the first two voltage amplifier tube heaters results in minimizing a.c. hum. The Eastern Model, 14-A employs 7 tubes (1-6SL7GT, 1-6SN7GT, 2-14F7, 2-6V6GT, 1-5Y3GT). Four of these tubes are dual-purpose double-triodes, making the effective total 10 tubes!

## Model 25-A _- 25 Watts

## LIST PRICE $\$ 130.00$

The Eastern Model $25-\mathrm{A}$ combines all the fine Eastern 21-STAR FEATURES in an amplifier perfectly suited for two- to four-speaker applications. Twenty-five (25) watts of Class ABl audio output power, with a peak audio output of 39 watts, will amply fill a theatre, school or church with high-fidelity, low-distortion music or voice. The Eastern $25-$ A incorporates three separate input channels--two microphone channels and a phonograph input. This high-gain amplifier develops full output from any crystal, dynamic or velocity microphone delivering as little as -60 DB , and any crystal or magnetic pickup delivering - -20 DB or more. Use of d.c. on the first two voltage amplifier tube heaters results in minimizing a.c. hum. The hum level is down approximately 40 DB below rated output, with all input controls set to maximum. Seven (7) tubes are used in this powerful amplifier. These tubes include 2-6SL7GT, 2-14F7, 2-6L6 and 1-5U4G.

## EASTERN LEADER 14 B AMPLIFIER

Now you can count on a full 14 watts of clear audio power with perfect tone quality and at a rock-bottom watts-per-dollar cost. Low hum level-full, round tonal reproduction-crisp microphone repro-

LIST PRICE $\$ 65.00$, complete with Tubes duction-full frequency response-modern mechanical and electronic design-all are combined in the new EASTERN LEADER 14B Amplifier for use in Public Address installations up to $175,000 \mathrm{cu}$. ft. coverage (up to approximately 3,000 people).

Five tubes (one a dual triode) give the equivalent of six-tube operation. A 6SJ7GT tube is used as a microphone input voltage amplifier, a 6SL7GT is employed as a phase inverter working into two 6V6GT tubes in push-pull Class ABl and a 5Y3G tube is the rectifier.

Two inputs-both high impedance-allow the use simultaneously of a microphone and a phonograph. Each is controlled by a separate volume control so that $100 \%$ mixing is possible. The separate tone control at maximum allows an apparent bass boost of 18 DB at 50 cycles.

Five output impedances allow matching the amplifier to any combination of speakers or line. 4, 8, 15, 250, and 500 ohms taps are available at a convenient screw-terminal strip.

The amplifier is completely shielded and the chassis and cover are made of extra-heavy metal beautifully finished in chocolate brown with red and ivory overtones. (Continued)

## Model 18-A- 18 Watts

## LIST PRICE $\$ 110.00$

For the two- or three-speaker installations which require that extra "sock", we offer the EASTERN Model 18-A. This is an amplifier which consistently dinvers 18 watts of Class Al audio power, rising to a peak power output of 30 watts! Standard output impedances of $4,8,15,250$ and 500 ohms are provided for quick attachment to any speaker-load combination. A separately controlled phono input allows full audio output power from any crystal or magnetic pickup having as low as a - 20 DB output. Either of two separately controlled microphone inputs develops full amplifier output when connected to any crystal, dynamic or velocity microphone having an output as low as -60 DB. True electronic mixing provides operating stability because interaction between controls is eliminated. Two tone controls are included-one to accent or attenuate the high frequencies, the other to accent or attenuate the low frequencies. The hum level, with all controls wide open is approximately 75 DB below rated output. Use of d.c. on the first two voltage amplifier tube heaters results in minimizing a.c. hum. The Eastern I8-A amplifier uses 7 tubes (2-6L6, 2-14F7, 2-6SL7GT and 1-5U4G).

## Model 14-B (continued)

1. Full 14 watts at less than $3 \%$ harmonic distortion. 2. Peak watts-25.
2. Five tubes-1-6SJ7, 1-6SL7, 2-6V6, 1-5Y3G.
3. Push-pull class AB, Output Stage.
4. Very low hum level.
5. 2 Inputs-l microphone, 1 phono.
6. Separate control for each input.
7. Separate tone control and separate A-C switch.
8. 2 Hi-impedance inputs.
9. Choice of 5 output impedances-4, 8, 15, 250, 500 ohms.
10. Extra-sturdy chassis.
11. Completely shielded.
12. Extra-size transformers.
13. Microphone circuit gain-122 DB.
14. Phono circuit gain- 82 DB .
15. Flat from 50 to 12,000 cycles- $\pm 2 \mathrm{DB}$.
16. 117 Volt $50-60$ cycle power input.

The overall size is $14^{\prime \prime} \times 91 / 2^{\prime \prime} \times 6$ ".
Net weight 16 lbs . Shipping weight 22 lbs .

## Model 35-A—35 Watts <br> LIST PRICE $\$ 190.00$

When those larger installations for upwards of 10,000 people need a full 35 watts of low-distortion class AB2 audio power, we recommend the Eastern 35-A. Reserve peak power of up to 58 watts is available from a standard 4-8-15-250-500-ohm output. The hum level of this unit is approximately 75 DB below rated output. Use of d.c. on the first two voltage amplifier tube heaters results in minimizing a.c. hum. Two separate tone controls allow individual selection of the amplifier frequency response. The Treble control boosts or depresses the high-frequency end, and the Bass control boosts or depresses the low-frequency end. The Eastern Model 35-A incorporates 9 tubes (2-6L6, 2-14F7. 2-6SL7GT, 1-6SN7GT, 1-6X5GT and 1-5U4GT). As five of these tubes are double-purpose dual-triodes, an effective tube complement of 14 tubes results Three separate input channels are available-two microphone and one phonograph. Full output from either microphone channel is available from any crystal, dynamic or velocity microphone having as little as -60 DB output. The phono channel will deliver full rated output with either a crystal or magnetic pickup having an output of - 20 DB or more.

## 25825 Watt Leader

1. Full 25 watts at less than $4 \%$ harmonic distortion.
2. Six tubes-2-6L6, 1-5U4G, 3-6SL7GT. (Equivalent of nine tube operation)
3. Push-pull class $A B_{1}$ output stage.
4. Very low hum level.
5. 3 inputs- 2 microphone, 1 phono.
6. Separate control for each input.
7. Separate tone control and separate AC switch.
8. 3 Hi-impedance inputs.
9. Choice of 5 output impedances-4, 8, 15, 250, 500 ohms.
10. Extra-sturdy chassis.
11. Completely shielded.
12. Extra size transformers.
13. Microphone circuit gain-124 DB.
14. Phono circuit gain-84 DB.
15. Flat from $50-12,000$ cycles $\pm 2$ DB.
16. 117 volt $50-60$ cycle input.

LIST PRICE $\$ 92.00$. COMPLETE WITH TUBES

## THENEWCOMBDELUXE

KX-30. An amplifier of outstanding superiority, designed for use in auditoriums, churches, restaurants and nightclubs; its range of tone effects far exceeds the usual amplifier performance. Its extensive tonal range will satisfy the most critical professional.

KX-60. The finest quality 60 -watt amplifier modern engineering can produce; an ideal general purpose instrument for permanent installations, for rentals, for high-powered portable applications. Less than 5\% distortion at 60 watts.

SPECIFICATIONS KGO-P BOOSTER AMP.

SPECIFICATIONS KX-30, KX-60 . . . POWER OUTPUT: KX-3030 watts at less than $5 \%$ distortion: KX-60-60 watts at less than $5 \%$ distortion; both with wide, that power output versus frequency curve and extremely low distortion at any volume level. FREQUENCY RESPONSE: 20 to 20,000 cycles within 1 d.b. INPUTS: (5) 3 for microphones; 2 for phonograph. INPUT IMPEDANCES: Microphone 2 meg.; phonograph, $1 / 2$ meg. (Microphone inputs instantly convertible to low impedance by use of TR-91 plug-in transformer). OUTPUT IMPEDANCES: KX-30-(6) 3, 4, 6, 8, 16 and 500 ohms to terminal strip and two bakelite molded sockets: KX-60-(6) 3, 4, 6, 8, 16 and 250 ohms to terminal strip and four bakelite molded sockets. GAIN: Microphone inputs, 126 d.b. Phonograph inputs, 78 d.U. TONE COMPENSATION: Base range from -17 to +24 d.b. Treble range from -24 to +24 d.b. CONTROL PANEL: Etched metal, fully illuminated. CONTROLS: (9) 3 microphone, 1 phonograph fader for 2 pickups, 1 master, 1 bass, 1 treble, 1 volume indicator, 1 power switch (not under panel cover). CONTROL COVER: Thru-vision key locked cover protects controls from misadjustment by unauthorized persons. VOLUME INDICATOR: Electron Ray type coupled to calibrated control provides full scale deflection (KX-30-from 1 to 30 watta; KX-60-from 2 to 60 watts). OVERLOAD INDICATOR: Electron Ray tube indicating slightest overload of output tubes.

MISCELLANEOUS FEATURES: All resistance capacity coupling; multi-stage inverse feedback; plug-in filter condensers; electronic type dual tone controls with resonant bass and special shaped curves; crystal pickup equalizing networks in each phonograph input; reguiated screen power for output tubes; accessible fuse in insulated post type holder; AC outlet socket connected with main switch; thoroughly impregnated heavy duty transformers; Multiple winding output transformer with uniform output from all taps; heavy gauge welded steel chassis and cabinet; cabinet finished in durable, easily cleaned, baked enamel, grey Hammeroid finish. POWER CONSUMPTION: KX-30-136 watts, $105-129$ volts, $50-60$ cycles A.C.; KX-60- 240 watts $105-129$ volts, $50-60$ cycles A.C. TUBES: KX-30-(13) 4-6J7, 2-6J5, 1-6SN7, 1-6SQ7, $1-6 \mathrm{AF} 6 \mathrm{G}, 1-6 \mathrm{~V} 6 \mathrm{GT}, 2-6 \mathrm{~L} 6 \mathrm{G}, 1-5 \mathrm{~V} 4 \mathrm{G} ; \mathrm{KX}-60$ - (15) $4-6 \mathrm{JF} 7,{ }^{2-6 \mathrm{SN} 7,} 1-6 \mathrm{SQ} 7,1-6 \mathrm{~V} 6 \mathrm{GT}$, x $85 /$ " $^{\prime \prime}$ x $201 / 4$ ". SHIPPING WEIGHT: KX-30 -36 lbs ; KX-60-42 lbs .

## MODEL A POWER SUPPLY:

Compact, convenient power supply for use with the KX-6 Pre-Amplifier when the power cannot be conveniently obtained from a $\mathrm{K} 60-\mathrm{P}$ Booster. Power Consumption: 65 watts for $105-129$ volts, $50-60$ cycles A.C. Size: $3^{1 / 2 \prime} \times 6^{\prime \prime} \times 8^{\prime \prime}$. Shipping Weight: 8 lbs.

KX-6 PRE-AMPLIFIER. A pre-amplifier of superb quality, Used alone, it will feed a 500 or 125 ohm telephone line or a whole bank of boosters. Used in conjunction with a K60-P 60-watt booster, it's an unbeatable combination for power, flexibility, portabillty and Newcomb quality.

SPECIFICATIONS KX-6 * POWER OUTPUT: Plus 22 d.b. (lesa than $5 \%$ distortion). FREQUENCY RESPONSE: 20 to 20,000 cycles Within 1 d.b. INPUTS: (7) 5 for microphones and 2 for phonograph. phone inputs instantly convertible to low impedance by use of TR-91 plug-in transformer). OUTPUT IMPEDANCES: 500 to 125 ohms. GAIN: Microphone input 97 d.b. Phonograph input $47 \mathrm{~d} . \mathrm{b}$. TONE COMPENSATION: Bass range -17 to +24 d.b. Treble range -24 to +24 d.b. CONTROL PANEL: Etched metal, fully illuminated. CONTROLS: (10) 5 microphone, 1 phonoEtched metal, fully illuminated. CONTROLS: ( 10 ) 5 microphone, 1 phonograph fader for 2 pickups, ${ }^{1}$ master, 1 bass, 1 treble, 1 power switch (not
under panel cover). CONTROL COVER: Thru-vision, plastic, key locked under panel cover). CONTROL COVER: Thru-vision, plastic, key locked
cover protects controls from misadjustment by unauthorized persons. VOLUME cover protects controls from misadjustment by unauthorized persons. VOLUNE
INDICATOR: Electron Ray type adjusted for full scale deflection at " 0 " level INDICATOR: Electron Ray type adjusted for full scale deflection at " 0 " level output. MISCELLANEOUS FEATURES: All resistance capacity coupling; plug-in filter condensers; electronic type dual tone controls with resonant base and special shaped curves; crystal pickup equalizing networks in each phonograph input; thoroughly impregnated transformers; heavy gauge welded steel chassis and cabinet, finished in durable, easily cleaned baked enamel, grey Hammeroid finish. POWER CONSUMPTION: 310 V. D.C. at $27 \mathrm{ma}, 6.3$ V. at 3.3 amps. POWER OUTPUT: TUBES: (11) 6-6J7, 3-6.55, 1-6SN7, 1-6E5. DIMEN 60 watts at less than $5 \%$ with wide flat power output versus frequency curve and extremely low distortion at any volume level. FREQUENCY RESPONSE: 20 to 20,000 cycles, 1 d.b. INPUTS: (1) Direct to .1 meg. control. Instantly convertible to low impedance or bridging impedance by use of TR-91 or TR-92 plug-in transformer. GAIN: 66 d.b. ( 67.4 d.b. with TR-92, or 62.5 d.b. with TR-91 input transformers). OUTPUT IMPEDANCES: (6) 3, 4, 6, 8, 16 and 250 ohms to terminal strip and four bakelite molded sockets. CONTROLS: (2) 1 volume, 1 volume indicator. VOLUME INDICATOR: Electron Ray type coupled to calibrated control provides full scale deflection from 2 to 60 watts. OVERLOAD INDICATOR: Electron Ray tube indicates slightest overload of output tubes. MISCELLANEOUS FEATURES: All resistance capacity coupling; multistage inverse feedback; plug-in filter condensers; separate plate and filament transformers individually fused; 3 way A.C. male input socket provides access to either plate or filament transformer primary; provides power for KX-6 pre-amplifier; thoroughly impregnated heavy duty transformer; multi-winding wide range output transformer; regulated screen power for output tubes; heavy wide range output transformer; regulated screen power for output tubes; heavy gauge welded steel chassis and cabinet, finished in grey baked enamel, Hammer-$2-5 Z 4$. POWER CONSUMPTION: 193 watts, 10 Б̂-129 volts, $50-60$ cycles A.C.

## K-SERIES AMPLIFIRES

## KXP-30.

An amplifier with ample reserve power, ( 30 watts) able to produce superb quality even at lowest volume. Uniform fower at all useful frequencies to insure purity of all tones at any volume. The KXP- 30 has been designed particularly to meet the demands of critical listeners using today's wide range loudspeakers for: (1) -Less distortion. (2)-More uniform power at all frequencies. (3)-Extended frequency response. (4)-Distortion free tone controls of greater range. (5)-Maintenance of quality at low volume. (6)--Freedom from hum. (7)-Ample gain for high fidelity pickups. Separate bass and treble controls permit increasing or decreasing bass, and/or treble as desired, with minimum change in mid-range volume. The unit is housed in a beautifully finished steel cabinet and provided with a genuine etched metal escutcheon plate, illuminated for night visibility. The KXP-30 provides two inputs, one for phonograph, the other wired for use with the Newcomb TR-92 plug-in bridging input transformer, or TR-91 low impedance plug-

```
TR-91 PLUG-IN INPUT TRANSFORMER. ISee next page for details.l
``` in transformer, thus making the KXP-30 an ideal bridging amplifier for broadcast or recording studio or adapting it to low impedance pickups. Remarkably low distortion, ample reserve power superb tone control action and general versaility mark this amplifier as the logical choice for the professional or the music lover desiring the very best for his home.

WEDTE 2 case port. system with KX-30 amp bure menuine plywood cases give proWhive and weellent response. One case carTem wem. win space for mikes, cable and HErd: mithe \# of best quality 12 " sneakers,

LS-2 (not shown) IIigh Power Impedance matching nutotransformer liaving 28 impedance from 580 olims to 1.21 ohms. Camacity 100 watts. Shp. wt. \(51 / 4 \mathrm{lhs}\). LS-4 Muti-winding general purpose transformer. Range of impedane's from 3000 to is, 000 ohms in steps of 1,500 ohms Capacity 8 watts.

LS-5 TRANSFORMER. Similar to LS-4 with range of impedances from 500 to 3,000 ohms in steps of 250 ohms. Capacity 20 watts.
TC3 Weatherproof housing for use with all three transformers. Box size: \(3^{1 / 4} 4^{\prime \prime} \times 4^{\prime \prime} \times 53 / 4^{\prime \prime}\)

\section*{NEWCOMB PLUG-IN INPUT 'TRANSFORMERS. TR-91.}

A distinct contribution to high quality p. a. systems. Fcatures sextuple alloy and copper shielding for quiet operation right in amp. proper; alloy core and specially designed windings for extended frequency response from 20 to 20,000 cycles; plug base for easy installation without tools in any Newcomb amp. For use between 50 or 200 ohm mikes and grid. Shipping Weight, \(11 / 4\) lbs.

\section*{TR-92. PLUG-IN TYPE BRIDGING INPUT TRANSFORMER.}

Input impedance 5,000 ohms to grid for bridging a 500 ohm line. Alloy shielded for minimum hum. When plugged into the socket provided on \(\mathrm{K} 60-\mathrm{P}\), it converts this amp. for use as bridging amp. Shipping weight, \(11 / 4 \mathrm{lbs}\).

THE CHARTS BELOW SHOW ACTUAL RESPONSE AND DISTORTION CURVES FROM THE H-30 AMPLIFIER.

\section*{BUSINESS COMMUNICATION SYSTEMS}

The unlimited flexibility of the new Amplicall system creates a real desire for the possession of this outstandK ing communication equipment. Systems available range from the de luxe combination of multiple masters and remotes to the economical single master and remote series.

All Master stations with the exception of the 2105 and 2102 incorporate the distinctively advanced styling of the new two-toned plastic cabinet as shown. Striking new beacty coupled with functional sturdiness assures life time service.

Professional type handsets are available as optional equipment on all master stations (except the 2300 series)
to provide absolute privacy at Master station locations, with ample volume and natural speech reproduction.

\footnotetext{
Plug-in type masters permit the quick and easy transfer or exchange of Master Stations. All junction boxes are a combination receptacle and junction box and are designed for use with standard electrical conduit fittings or for surface mounting.
}

\section*{2400 Series De Luxe AC Systems}

The 2400 R series Amplicall identifies the de luxe system of unlimited flexibility which permits the use of any desired combination of Masters and Remote stations. Master units supplied with either 6, 12, 18 or 24 station selector keys. Masters are equipped with a visual "busy" signal to indicate when station called is busy. This service accomplished without additional wiring between stations. For AC operation only.

The 2400 series is a de luxe All-Master intercommunication system. Entirely AC operated, this series provides a completely private communication system second to none for dependable trouble-free operation. Stations available with \(6,12,18\) or 24 station selector keys. Built in "busy" signal insures uninterrupted communication at no extra wiring cost.

\section*{2300 Series Industrial Intercom \& Paging System}

Featured in the 2300 Series system is a high powered paging and intercommunication system consisting of one master control station as shown above, a separate 20 watt amplifier, and up to \(6,12,18\), or 24 remote stations. All remote stations can be called individually or simultaneously at the discretion of the operator.

Calls can be originated from any remote to the master station. Four Master stations are available: having respectively 6, 12, 18 or 24 buttons. Remote stations can be the 2100 S as shown below for quiet areas or 2300 remote speakers for coverage of noisy locations. Weatherproof remotes are also available.

\section*{2200 Series All Master AC-DC System}

The 2200 Series Amplicall system is similar to the 2400 series All Master system except that it is designed for operation from either 117V AC or DC. Does not have busy signal. Available with or without hand-
set and in either 6, 12, 18 or 24 button models. All private system-prevents eavesdropping or listening in from other stations.

\section*{2100 Series AC-DC Master and Remote System}

Four basic communication systems are offered in the 2100 Series Amplicalls, all designed for AC-DC operation. The first consists of a high quality Master Station in the distinctively styled cabinet as shown above, having either \(6,12,18\) or 24 station buttons, capable of calling or receiving calls from up to 24 remotes. Remote stations can originate calls to the Master by operating switch or can answer back when called without operating any control. The second system consists of All Masters, which by means of a simple change can be installed and operated as a non-private all-Master system. The third is an economy system using the 2105 Master station available
to operate up to five remote stations. The Master station is supplied in the modern design plastic case that houses the remote station shown below. The fourth system (Model 2102) is a simple two station communication system ideal for home or office use,
 or for any installation requiring two-way conversation between two locations only. Both Master and Remote are supplied in the same compact modern plastic case illustrated to the left.

\section*{INDOOR, OUTDOOR \& PORTABLE SYSTEMS}

Higher powered portable systems feature the Model 1820-20 watt and 1835-35 watt Amplifiers. Model PD or PX 1820 system has mixing controls for two high impedance microphones and dual phonograph. Separate bass and treble tone controls provide wide range of tone qualities to match acoustic conditions. Model PD or PX 183535 watt system incorporates four microphone mixers and two phono inputs. Separate bass and treble controls permit adjustment of highs and lows individually as required. The 20 and 35 watt Amplifiers and complete indoor and outdoor systems also available.

The Model PX 1814 System is a compact 14 watt AC operated system completely assembled in one de luxe three piece case of rugged construction finished in rich, dark green leatherette. True electronic mixing of two microphones and phonograph afford great flexibility of operation. Supplied with two \(12^{\prime \prime}\) PM speakers and either 1245 dynamic or 1238 crystal microphone and full length floor stand. Also available in permanent indoor or outdoor systems.

\section*{AMPLIFIERS FOR EVERY APPLICATION}

20 \& 30 WATT MOBILE AMPLIFIERS

A choice of two mobile amplifiers offers a selection of equipment for 117 Volt AC or 6 Voit DCoperation. The Model 1841 illustrated at left has a power output of 30 watts and incorporates provisions for using three high impedance microphones. Remote mixing of microphones is possible by the use of the 1933 Remote Mixer Unit. Phonograph has a high torque, constant speed motor and crystal pickup. Dual tone controls permits individual adjustment of highs and lows for acoustic correction.

The Model 1821 is ideal for the smaller mobile applications where 20 watts of power is sufficient. Controls include two microphones, one phono and one tone control. Standby switch conserves DC power during standby periods. Crystal pick-up assures the finest record reproduction. Complete indoor and outdoor systems available in both models.
\(35 \& 60\) WATT AMPLIFIERS
Every feature needed for most applications is incorporated in the Model 1835 Amplifier. Four separate microphones and two phonographs can be intermixed in the input channel with true
 electronic mixing. Phono control is dual fader type for high impedance crystal or magnetic pick-up. Separate bass and treble controls provided for fine acoustic correction. Remote mixing of three microphones possible with the use of 1933 Remote Mixer. All microphone inputs can be quickly adapted to low impedance microphones by use of Model 200 microphone transformers.

The Model 186160 watt amplifier incorporating the famous Bi-Power circuit is the ultimate answer for an amplifier that delivers giant power right up to its highest rated peak without "crack-up." Input provisions for four microphones and dual fader phonograph. Separate bass and treble controls. Remote mixing facilities on three microphone stages. Power takeoff to operate additional Model 161-60 watt power stages.

> Rauland offers a complete selection of dynamic, ribbon, and crystal microphones and reproducers. Also television picture tubes and antennas for FM and television reception.

MASCO 17 WATT PORTABLE OR PERMANENT SOUND SYSTEM

\section*{FEATURES}
- Tapped Output, 2-4-8-15-500 Ohms
- Beam Power Output (2-6L6G)
- Electronic Mixing Overall
- Aero-dynamic Design
- Full Range Controls
- Individual Controls
- Inverse Feedback
- 24 Hour Operation
- Custom Made

\section*{APPLICATION}

These systems are highly efficient and afford outstanding results to meet requirements for medium power installations. For coverage up to 175,000 cubic feet. Microphone and Phono may be used simultaneously through the use of separate controls. Hum and noise have been reduced to a negligible level through correct design and filter.

Ease of setup and operation, plus maximum output and excellent tonal quality are the salient features of these systems. The amplifier chassis is finished in a hard baked smooth gray wrinkle. The carrying case is styled after the finest aeroplane hand luggage with tweed facings and calf skin tan overall striping. The interior of the case is designed to hold the complete system and accessories. Amplifier is mounted on sliding panel for ease in removing from case when in use.
Specifications for Model MA-17 Amplifier: Power Output: 17 Watts - Gain: Microphone 118 DB, Phono 74 DB - Controls-Three: Microphone, Phono, Tone - Separate on-off AC Switch - InputTwo: Microphone and Phono Tubes: 1-7C7, 1-7F7, 2-6L6GA, 1-5Y3GT • Output: Tapped-2-4-8-15-500 Ohms • Power Consumption: 90 Watts - Hum Level: Below Zero Level-22DB - Frequency Response: 50 to 10,000 cycles •Dimensions: \(12^{\prime \prime} \times 63 / 44^{\prime \prime} \times 734^{\prime \prime}\).

\section*{PORTABLE SYSTEM}

The MAS-17 complete portable system consists of : Model MA-17 amplifier less tubes, mounted in carrying case. An Astatic JT-30 Microphoue with \(20^{\circ}\) cable with connectors, two \(10^{\prime \prime}\) PM speakers each with 25 ft . cable plus plugs.

EXECUTIVE MODEL 4A10 AND 4A11 10-STATION MASTER

\section*{EXECUTIVE MODEL 4A15}

20-STATION MASTER

FLEXIFONE MODEL 4 420 AND 4A21
REMOTE SPEAKER STATION

FIEXIFONE EXECUTIVE AND SUPERVISOR SERIES MEET THE DEMAND for any and every type of intercommunication system

The FLEXIFONE Executive series makes it possible to install an inter-communication system to meet any requirement. Streamlined, modern cabinets of durable die-cast metal. Smooth, attractive gray-tan Hammerloid finish compliments any desk. Self-clearing piano-action keyboard. Plastic station-selector keys with easily read name tabs. Talk Bar controls conversations-special lock-down feature holds bar in "talk" position, freeing both hands during dictation by FLEXIFONE. Plastic on-off switch and volume control knobs. Master stations provide instant conference connections between several executives. All models designed and engineered for highest quality performance.

\section*{SUPERVISORY SERVICE EXECutive SERVICE combined executive}

One fLEXIFONE Master station is connected with as many as 20 Speaker sta tions. The Master station can call each individual Speaker station and receive an answer. Speaker stations, it equipped with "Call switch," can orig inate conversations with Master station.

Master stations are shown connected for complete intercommunication be tween all stations. This hookup for swift executive service is limited only by number of stations connected. Several two-way conversations may be carried on simultaneousI \(Y\) in strict privacy.

AND SUPERVISORY SERVICE

This FLEXIFONE hookup permits connection of as many Master stations as may be required. In addiion, each Master station is connected with a group of Speaker stations. Master stations can be interconnected for two-way service or conference hook up. Each Master station can be connected with several Speaker stations.

MODEL No. 4ATO, EXECUTIVE 10 STATION MASTER: Can be connected with any combination of master stations or speaker stations up to ten units. Die cast metal case with smooth graytan Hammerloid finish. Plastic station selector keys and control knobs. Size \(91 / 4^{\prime \prime}\) wide, \(73 / 4^{\prime \prime}\) high, \(11-5 / 6^{\prime \prime}\) deep. Weight approx. 14 lbs.
MODEL No. 4A1I, EXECUTIVE 9 STATION MASTER WITH RMOTE PAGING KEY Same as No. 4A10, with remote self-paging" feature. Enables foreman or supervisor to leave desk. By depressing paging key all incoming calls will be reamplified and come through specker or horns out in plant............... \(\$ 84.00\)
mOdel No. 4A15, EXECUTIVE 20 STATION MASTER: Same as No. 4A10, except this uni can be connected with any combination of master stations or speaker stations
up to 20 units. Same dimensions as No. 4Al0. Weight, approx. 14 lbs. ... \(\$ 95.50\) ODEL No. 4A20, SPEAKER STATION: Provides talk-back communication with any model master station. Die-cast metal case with smooth, gray-tan Hammerloid
MODEL No. 4A2 call switch added. Call switch enables speaker station to originate calls to

MODEL No. 7A10, HANDSET ASSEMBLY: Optional phone type handset for confidential conversation on FLEXIFONE master stations 4A10, 4A11 and 4A15. When handset is in use, speaker is cut off. Handy hook switch and box may be in stalled at side of desk or any convenient location close to the master station \(\cdots\)................................................................................ \(\$ 39.50\) MODELS No. 200-5 AND No. 200-6, PLUG AND CABLE ASSEMBLIES: Provide simplified connection from master station to No. 8A10 junction box. No. \(200-5\) for use with No. 4A10 and No. 4All master stations. No. 200-6 for use with No. 4A15 master station connecting with No. \(200-5\) or No. \(200-6\) from No. \(4 A 10\). No. \(4 A 11\) or No. 4Als master stations

fLEXIfONE
FOR INTERCOMMUNICATION

MODELS 4M25 \& 4A25 MASTER STATIONS

MODELS 4A20 \& 4A21 SPEAKER STATIONS

\section*{MODEL 4M25 "OFFICIAL"' ALL MASTER SYSTEM AND MODEL 4A25 "SUPERVISOR" MASTER TO REMOTE SYSTEM}

FLEXIFONES Model 4M25 "OFFICIAL" all master system and Model 4A25 "Supervisor" master to remote system makes it possible for small business offices, plants, institutions, stores, garages, homes, and farms to enjoy the efficiency and ease of "talking instantly" with economical, dependable intercommunication units. Latest electronic developments assure clear, natural voice transmission. Durable, functionally designed die cast housings finished in Gray-tan Hammerloid.
Both the 4M25 and 4A25 master stations feature a selector switch for selecting any one of six outlying stations. There is also an "all-call" position making it possible to page or talk through all six speaker stations simultaneously.

Dimensions of the Model 4M25 "Official" Master, Model 4A25 "Supervisor" Master, Model 4A20 and 4A21 Speaker Stations are all identical . . . 63/4" wide, \(53 / 8^{\prime \prime}\) high, \(77 / 8^{\prime \prime}\) deep.

FOR EITHER AN "OFFICIAL" ALL-MASTER SYSTEM OR "SUPERVISOR" MASTER-TO-REMOTE SYSTEM USE THE FOLLOWING FLEXITONE EQUIPMENT

FLEXIFONE MODEL No. 4M25, "OfFICIAL" MASTER STATION: Designed for master-to-master service only. Selector switch makes it possible to select up to six other "Official" master stations. "All-Call" position, also included on selector switch, makes it possible to page or talk through all six masters simultaneously
FLEXIFÓNE MODEL No. 4A25, "5UPERVISOR" MASTER STATION: Designed for use with Model 4A20 or 4A21 Speaker Stations only. Selector switch makes it possible for selecting any one of six speaker stations. "All-call" position also included on selector switch, makes it possible to page or talk through all speaker stations simultaneously......................................................................... \$44.50 flexifone model No. 4A20, speaker station: Provides talk-back communication with Model 4A. 25 "Supervisor" FLEXIFONE.......................................... \(\$ 16.20\)
FLEXIFONE MODEL NO. 4A2T, SPEAKER STATION WITH CALL SWITCH: Same as Model 4A20, but with call switch incorporated. Call switch enables speaker station to originate calls to master station..
(See Cable Listed Under FLEXIFONE "Executive" Series)

TYPICAL FLEXIFONE MODEL \(4 A 25\) "SUPERVISOR'" SYSTEM WITH SIX OUTLYING SPEAKERS

Above is a typical "Supervisor" system consisting of one Model 4A25 Master Station, three Model 4A21 Speaker Stations with call switch, three Model 4A20 Speaker Stations.

TYPICAL FLEXIFONE MODEL 4 M25 "OFFICIAL" SYSTEM OF SEVEN MASTER STATIONS

In the above system all stations are 4M25 "Official" masters . . . and all are intercommunicating. Several conversations can be carried on at the same time.

\section*{PIANT-BRDADCASTER}

\section*{A STANDARD LOW COST SYSTEM FOR MUSIC AND VOICE PAGING}
 PLANT BROADCASTER

\section*{SIMPLIFED STANDARDIZED UNIT WITH POWER OUTPUT OF 125 WATTS. ADDITIONAL BOOSTER AMPLIFIERS CAN BE ADDED TO INCREASE OUTPUT UP TO 1000 WATTS OR MORE}

Operadio designed, engineered and built the original Plant Broadcaster . . . and now they are proud to present their latest model for Music and Voice Paging in industrial plants or commercial establishments - the Operadio Model 14A25 PLANT BROADCASTER! Experience in engineering and building some of the finest and largest plant broadcasting systems in the world enables Operadio to combine, all the quality features and advantages of custom-built equipment into a standardized unit for the average industrial plant.
The lower cost is brought about by eliminating special engineering costs and by standardizing construction, but only the highest quality components are used. Reproduction is of broadest quality. Relay control panel incorporated . . . makes it possible to select either one or two areas without change in volume.
Phonograph mechanism incorporated, and provisions for radio, enable desired programs to be played throughout the plant or to selected area. Dynamic microphone on special switchboard stand with twoarea foot-switch and \(25^{\prime}\) cable are furnished with unit. Loudspeakers are not included in the price of the equipment because the number and types vary with each installation.
MODEL No. 14A25, PLANT BROADCASTER: 125 watt output. Cabinet assembly complete with dynamic microphone on special switchboard stand, and footswitch, incorporating two area switches and 25 foot cable

MODEL No. IA50 - 125 WATt BOOSTER AMPLIFIER PANEL: Additional power for use with Model 14A25 Plant Broadcaster...................... \(\$ 434.00\)

OUTPUT: Full 125 watts at \(5 \%\) total harmonic distortion when measured across 250 ohm load resistance, across amplifier output terminals at 1000 cycles per second. OVERALL GAIN: 125 db . FREQUENCY RESPONSE: Approx. plus or minus \(11 / 2 \mathrm{db}\). from 40 to 10,000 cycles per second with 1000 cycles per second reference level. TUBES: Power amplifiers: 1-6F6, 1-6J5, 4-807, 2-866A, 1-5V4G. Voltage amplifier: 3-6I7. 16SN7GT, 1-5Y3GT/G. OUTPUT IMPED. ANCE: 31, 44, 62, 88, 125, 175, 250 at output terminals of Power Amplifier. POWER SUPPLY: \(110-120\) volt, 60 cycle single phase only. POWER CONSUMPTION: 450 watts at full power. I55 watts with tubes idling, no plate current. FINISH: Operadio dark green baked wrinkle. WEIGHT: 400 pounds (approx.). FLOOR SPACE REQUIRED: 22" x 18".

opERADO AMPLIFIERS
}

\section*{DESIGNED, ENGINEERED, AND BUILT TO TOP STANDARDS!}

\section*{MODEL 1 A65 FOUR POSITION PRE-AMPLIFIER}

The Model No. 1A65 Pre-Amplifier will drive from one to eight of the Model No. 1 A 70 Booster Amplifiers ... this flexibility permits the building-up of a paging or sound system to any required size. The Pre-amplifier has three microphone inputs, which can be either high or low impedance by means of individual selector switches.

SPECIFICATIONS: MODEL IAC5 PRE-AMPLIFIER TUBES: 4 (four) 6J7's-l (one) 6SN7-1 (one) 6X5GT. STAGE: Microphone 3 (three) stage-Phono 2 (two) stage. INPU'IS: 3 (three) High Impedance Microphones or 3 (three) Low Impedance Inputs available by means of selector switches: 1 (one) Phono Input. TONE CONTROLS: New Dynamic range high and low frequency controls. CONTROLS ON FRONT PANEL: 3 (three) Microphone: 1 (one) Phono: 1 (one) High Frequency Control: 1 (one) Low Frequency Contral: 1 (one) A. C. Líne Srequency Control: 10 V . across 5000 ohms at less than \(2 \%\) distortion at 1000 cycles. OUTPUT TERMINAL: 5000 Ohms Balanced Line: 500 Ohms Balanced Line: 5000 Ohms Single Ended Line: 1250 Ohms Single Ended Balanced Line: 5000 Ohms Single Ended Line: 1250 Ohms Single Ended
Line: 500 Ohms Single Ended Line: 125 Ohms Single Enced Line. Line: 500 Ohms Single Ended Line: 125 Ohms Single Ended Line.
POWER SUPPLY: \(105-125\) Volts- \(50-60\) Cycle. POWER CONSUMPTION: 40 POWER SUPPLY: \(105-125\) Volts- \(50-60\) Cycle. POWER CONSUMPTION: 40
Watts. DIMENSIONS: \(81 / 2^{\prime \prime}\) high x \(6^{\prime \prime}\) deep and \(16^{\prime \prime}\) long. WEIGHT: 25 ibs. MODEL No. IAG5, FOUR POSITION PRE-AMPLIFIER WITH TUBES.... \(\$ 115.00\) MODEL 1 ATO 50-WATT BOOSTER AMPLIFIER The Model No. 1A70 Booster Amplifier provides a full 50 watts at less than \(5 \%\) distortion and features high level, low level, high impedance phono. and intercom inputs. The several input levels make it possible to pick-up and amplify zero level signals for leased wire transmission and it can be used as a booster amplifier with a "FLEXIFONE" inter-communication system ... plus many other applications.

SPECIFICATIONS: MODEL IATO BOOSTER AMPLIFIER OUTPUT: 50 Watts at less than \(5 \%\) distortion. TUBES: 1 (one) GJ5 (three) stage for Phono or Driver Input. INPUT: 1 (one) High (three) stage for Phono or Driver Input. INPUT: l (one) High Input ( 10,000 to 50,000 Ohms). Requires approximately 8 Volts to drive amplifier to full output. 1 (one) Low Impedance Input ( 50 to 5000 Ohms). Requires approximately 1.7 Volts to drive amplifier to full output. CONTROLS: 1 (one) Master Volume Control. OUTPUT TERMINALS: This booster amplifier is equipped with 5 (five) output taps. Each tap will handle a range of load impedances: No. \(1-2\) to 4 Ohms: No. 2-8 to 16 Ohms: No. 3- 30 to 60 Ohms: No. 4-60 to 120 Ohms: No. 5-125 to 250 Ohms. POWER SUPPEY: 105 to 125 Volts- \(50-60\) CYcle. POWER CONSUMPTION: 240 Watts maximum. DIMENSIONS: \(81 / 2^{\prime \prime}\) high \(\times 9^{\prime \prime}\) deep \(x\) 173/8" long. WEIGHT: 39 lbs. MODEL No. IATO, 50-WATT BOOSTER AMPLIFIER............................ \(\$ 134.75\)

\section*{OPERADIO MODEL \(13 A 15\) RACK ASSEMBLY}

The Model 13 Al5 Rack is especially suitable for factories, hospitals, schools, hotels, institutions, and many other buildings requiring various and specialized types of sound installations. The flexibility of the Model 13Al5 Rack makes it possible to incorporate any combination of amplifiers, pre-amplifiers, booster amplifiers, switching arrangements, phone unit, etc.
Below we are listing the Model 13A15 Rack and components available for use with the 13A15 Rack Assembly

MODEL No. 13A15, RACK A5SEMBLY: Consists of: 1-Part No. 211.92 Top: 1-Part No. 560. 50 Blank Panel (27/8" \(\times 19^{\prime \prime}\) ); 1-Part No. 107-34 Mounting Bracket (Rear); 1 - Part No. 107-35 Mounting Bracket (Front); 1-Part No. 189-13 Left Side; 1- Part No. 189-12 Right Side; all neces: sary hardware. Dimensions: Height 45': Width \(211 / 8^{\prime \prime}\) : Depth \(147 / 8^{\prime \prime}\)............. \(\$ 35.00^{\circ}\)
PART No. 560-51, TOP PANEL: Panel is cut out to incorporate Automatic Record Changer ........................................... \(\$ 7.50\)
PART No. \(\mathbf{5 6 0 - 4 9 ,}\) bLANK PANEL: Dimensions: \(83 / 4^{\prime \prime} \times 19^{\prime \prime} . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ~ \$ 4.80 ~\)
MODEL No. 1B65, PRE-AMPLIFIER: A four position pre-amplifier designed to be mounted in the Model 13A15 Rack. Specifications are the same as the
Model 1 A 65 described above.. \(\$ 115.00\)

PART No. 560-56, MOUNTING PANEL: Panel is designed to convert the Operadio Model 1A65 Pre-amplifier to a Model 1B65 .... Making it suitable for mounting in Model 13A15 Rack Assembly

MODEL No. 1B70, BOOSTER AMPLIFIER: A 50 watt Booster Amplifier designed to be mounted in the Model 13A15 Rack. Specifications are the same as the Model 1 A70 described above.................... \(\$ 134.75\)

PART No. 560-55, MOUNTING PANEL: Panel is designed to convert the Operadio Model lA70 Booster Amplifier to a Model 1B65 . . . making it suitable for mounting in Model 13A15 Rack Assembly .. \(\$ 7.50\)

TYPICAL 13 AI5 RACK ASSEMBLY WIIH WEBSTER MODEL 56 RECORD CHANGER INCORPORATED

DESIGNED,ENGINEERED, AND BUILTTOTOPSTANDARDS:

MODEL 2A15 "SOUNDCASTER": Incorporates \(\alpha\) phonograph unit with automatic record-changing mechanism. Plays twelve 10" or ten \(122^{\prime \prime}\) recordings consecutively. 78 R.P.M. only.

Price on Hequest
MODEL 2A16 "SOUNDCASTER": Incorporates a 2 speed turntable providing \(331 / 3\) R.P.M. for transcriptions and 78 R.P.M. for standard recordings..................................................Price on Request

\section*{THE NEW SOUNDCASTER A QUALITY 50 WATT AMPLIFIER}

The Operadio Soundcaster is a rugged 50 -watt amplifier of the highest quality. The Soundcaster is a completely standardized, flexible unit - available in two models offering outstanding performance, features and durability. For plant broadcasting, a 3-way switch on the control panel permits pre-set volume selection. Two microphones may be used with the Soundcaster. A special auxiliary input is provided for separate record player, or leased telephone wire.
SPECIFICATIONS: OUTPUT: 50 watts at \(3 \%\) distortion, maximum 65 watts. TUBES: \(2-5 U 4 \mathrm{G}, 4-6 \mathrm{~L} 6 \mathrm{GA}, \quad 1-6 S N 7 G T\), 3-6I7. FREQUENCY RESPONSE: Within 2 db from 30 CPS to 10,000 CPS. STAGES: Microphone 4, Phonograph 3. INPUTS: 2 microphone channels; 1 phonograph input; 1 auxiliary input; 0 level for telephone lines; separate tone controls. OUTPUT: For microphone and phonograph. OUTPUT IMPEDANCE: 2 to \(4-8\) to \(16-30\) to \(60-60\) to \(120-125\) to 250 at output terminals. CONTROLS: 2 microphone volume controls, 1 phono volume control, 1 michrophone bass attenuator, 1 michrophone treble attenuator, 1 phono bass attenuator, 1 phono treble attenuator, 1 power switch, 1 paging switch and 1 service selector switch. POWER SUPPLY: 105-125, 50-60 cycle. POWER CONSUMPTION: 215 watts.

\section*{MODEL \(1 A 3020\) WATT AMPLIFIER}

The Operadio 20 -watt amplifier incorporates the newest electronic features in the field of audio-amplification. New method of tone control permits 24 db high and low frequency control with no apparent change in over-all level.

SPECIFICATIONS: OUTPUT: 20 watts at less than \(5 \%\) distortion. TUBES: 1-5V4G, 2-6L6GA, 1-6SN7, and 3-6I7. STAGES: Microphone 4, Phonograph 3. INPUTS: 2 microphone channels; 1 phonograph channel. TONE CONTROLS: New Dynamic range high and low frequency controls. LEVEL CONTROL: 2 microphone: l' phonograph. OUTPUT TERMINALS: This amplifier is equipped with 4 output taps. Each tap will handle a range of locd impedances. These taps are: No. 1, 3 ohms to 7 ohms; No. 2, 7.5 ohms to 16 ohms; No. 3, 100 ohms to 200 ohms; No. 4, 250 ohms to 500 ohms.
The amplifier is capable of delivering 20 watts of audio power at less than \(5 \%\) distortion into any of the range of impedances mentioned above. POWER SUPPLY: 105-125 volts, 50-60 cycle. POWER CONSUMPTION: 105 watts under fuli load. FINISH: High lustre, dark green wrinkle housing . . . lacquered aluminum grillwork. DIMENSIONS: \(81 / 2^{\prime \prime}\) high \(\times 9^{\prime \prime}\) deep \(\times 16^{\prime \prime}\) long.

\section*{MODEL 1 A45 50 WATT AMPLIFIER}

The Operadio Model 1 A45 50 watt amplifier meets the demand for the ultimate in high quality amplification . . . a unit that's outstanding in every respect.

SPECIFICATIONS: OUTPUT: 50 watts at \(3 \%\) distortion, maximum 65 watts. TUBES: \(2-5 U 4 \mathrm{G}, 4-6 \mathrm{~L} 6 \mathrm{GA}, 1-6 \mathrm{SN} 7 \mathrm{GT}, 3-6 J 7\). FREQUENCY RESPONSE: Within 2db from 30 CPS to 10,000 CPS. STAGES: Microphone 4, Phonograph 3. INPUTS: 2 microphone channels; 1 phonograph imput; 1 auxiliary imput; 0 level for telephone lines; separate tone controls. OUTPUT: For microphones and phonograph. OUTPUT INPEDANCE: 2 to \(4-8\) to 16 - 30 to \(60-60\) to \(120-125\) to 250 at output terminals. CON TROLS: 2 microphone volume controls, 1 phono volume control, 1 microphone bass attenuator, 1 microphone treble attenuator, 1 phono bass attenuator, 1 phono treble attenuator, 1 power switch, 1 paging switch. POWER SUPPLY: 105-125, 50-60 cycle. POWER CONSUMPTION: 215 watts.

\section*{STANDARD SYSTEMS}

LP-5 LP-10
MASTER SELECTIVE SYSTEMS

The TP-5 System consists of 1 Master Station working with up to a total ol 5 Sub-stations; the LP-10 System with up to a total of 10 Sub-stations. The
Master Station can talk privately to any of the Sub-stations or to all at one time You can begin with a Master Station and a single Sub-station and add up to 5 Substations in the LP-5 System and 0 e 10 Sub-statious in the LP-10 System. The Mas-Sub-stations in the Lr-10 System. The Mas ter has complete privacy; sub-stations cannot listen in on the Master. They can hear Only when the Master is talking to them. Exclusive Talk-A-Phone "Silent Feature" shuts out all sounds originating at the Substation, yct Sub-stations are able to origi nate calls to the Master at will. Suh-stations operate as far as 2000 feet from the Master Station. Individuals at Sub-stations may answer the Master when called without leaving work or touching units even though they may be up to 25 feet from the Sub-station itself. The volume level is controlled by the Master Station. LP-5 and LP-10 Systems operate universally on \(110-115\) Volts AC or DC.

LP-5 LP-10 LIST PRICES Model LP-5-Master Station Selective Unit for 5 Sub-stations, complete with tubes and instructions ............ \(\$ 34.00\) Model LP-10-Master Station Selec tive Unit for 10 Sub-stations, com plete with tubes and instructions.

Model RS-3-Sub-station Unit for use with LP-5 and LP-I 0 Masters. \(\$ 12.50\) No. 2330 Connecting Cable - The proper cable for connecting RS-3 Sub stations to LP-5 or LP-IO Maste Station, per 100 feet ............... \(\$ 4.50\)

\section*{HOW TO ESTIMATE CABLE}

Measure distance between Master Station and each Sub-station, then order equivalent to the total footage of these distances.

LP-100 LP-110
SUPER SELECTIVE SYSTEMS

The LP-100 and LP110 Systems are made up exclusively of Master Stations. With this system any station can call any other station in the oystem and in addifion a number of two-way number of two-way conversations can he carried can begin with 2 Masters and add up to a total of 5 in the LP-100 Systent and a total of 10 in the LP-110 System. In the latter systeni as many as 5 complete two-way conversations may be maintained simultaneously. Masters may call one another regardiess of whether station being called has power on or not. The voice volume is adjusted at each Master Station and whisper to a and can be varied from a to 25 feet from thess that can be heard up to 25 feet from the unit. The LP-100 and LP-110 Master Stations will operate with units as far as 2000 feet apart. IP- 100 and LPP 110 systems operate universally on 110 115 Volts AC or DC.

\section*{LP-100 LP-1 10 LIST PRICES}

Model LP-100-Master Station Super Selective Unit for 5 station use, complete with tubes and instructions.
\(\$ 39.75\)
Model LP-110-Master Station Super Selective Unit for 10 station use, complete with tubes and instructions
No. 3333 Conneoting Cable \(\$ 44.75\) proper cable for inter-connecting LP. 100 Master Stations, per 100 feet.
No. 6655 Connecting Cable, \(\$ 14.50\) proper cable for inter-connecting LP110 Master Stations, per 100 feet.
\(\$ 22.00\)

\section*{HOW TO ESTIMATE CABLE}

Simply measure distance between Master Units starting from any one Master to the second, to the third, etc., until you reach the last staion in the system, then order equivalent to the total footage of these distances.

LP-65 COMBINATION SYSTEM

The LP-65 Combination System consists of Master Stations and Sub-stations intermixed up to a to( 7 tal of 5 . Master Stations can talk to each other and call Sub-stations. Substations can answer Master Stations but cannot talk to other Sub-stations. You can begin with 2 stations (at least one must be a Master) and then add units as required up to a total of 5 . Another outstanding Talk-A-Phone feature is \({ }_{p}\) while Masters may have Sub-stations in common, each Master may also have his own: individual Sub-station for private conversation. When one Master Station calls another Master or Sub-station, the person being called can answer even though he is up to 25 feet away from his ctation. The LP-65 will operate universally on 110-115 Volts AC or DC.

With this system any station can call any other station in the system and in addition a number of two-way conversations can be carried on at one time. You can begin with 2 Masters and add up to a total of 10 in the KS-6010 System. In this system as many as 5 complete two-way conversations may be maintained simultaneously. Another exclusive Talk-A-Phone advantage found in this system is the "Silent Feature" which assures complete silence at every Master Station between conversations. Masters may call one another regardless of whether station being called has power on or not. The voice volume is adjusted at each Master Station and can be varied from a whisper to a loudness that can be heard up to 40 feet from the unit. The KS-6010 Master Stations will operate with units as far as 2500 feet apart. KS-6010 systems operate universally on 110-115 Volts AC or DC.

\section*{KS-6010 SYSTEM LIST PRICES}

KC-8050 COMBINATION SYSTEM

The KC-8050 Combination System is made up of Master Stations and Substations intermixed up to a total of \(\mathbf{5}\) stations. Master Stations may listen in at will to any of the other units, either Masters or Sub-stations in the system. The Sub-stations cannot listen in on the Masters except when they are called by the Masters. Master Stations may talk to each ther and to Sub-stations. Sub-stations can answer Masters but cannot originate calls to them nor tall to other Sub-stations. You can begin with 2 stations (at least one must be a Master) and add units as required up to a total of 5 . The KC-8050 System operates with units as far as 2500 feet away from each other without noticeable loss of volume. Volume is individually controlled at each Master Station. Persons at either Master Stations or Sub-stations being called may reply without leaving their work even if they are 25 to 40 feet away from their units. The KC-8050 operates universally on \(110-115\) volts AC or DC.

KR-40 MASTER SELECTIVE SYSTEM
KS-60 SUPER SELECTIVE SYSTEM
The KR-40 System consists of 1 Master Station working with up to a total of 10 Sub-stations. You can begin with a Master Station and a single Sub-station and add any number of Sub-stations up to a total of 10 as needed. This system affords private two-way conversation between the Master and any of the Sub-stations, as well as simultaneous address from Master to all Sub-station units. Sub-stations can answer and originate calls to the Master Station but cannot talk to one another. Individuals at Sub-stations may answer when called without leaving their work and without touching the unit from as far away as 50 feet. "Silent Feature" shuts out all sounds originating at Sub-stations yet permits Sub-stations to originate calls to Master Station. Volume is controlled by Master. Privacy Earphone is available as optional equipment on the Master Station but is not furnished on Sub-stations. The KR-40 system operates on \(110-115\) Volts AC or DC.

This system consists of Master Stations only. You may begin with 2 Masters and then add units up to a total of 10 as required. When 10 units are in the system, as many as five two-way conversations may be held simultaneously. Masters can call one another regardless of whether Master being called has power on or not. "Silent Feature" assures \(100 \%\) silence at every Master between conversations. Privacy Earphone is optional on the KS-60 Masters. When used, system work's like a telephone without the use of the "Talk-Listen" switch. You may use Master Stations without earphones as well as Master Stations with earphones in the same system. The KS-60 system operates with undiminished power with units as far as 3000 feet away from one another. Volume may be adjusted at each Master from a whisper to a loudness that can be heard 25 to 50 feet from the unit. The KS-60 operates universally on 110-115 Volts AC or DC.

\section*{Talk-A-Phone Booster}

The Talk-A-Phone Model HP-16 is a Booster Amplifier of advanced design delivering 15 watts of "VOICE RANGE" Power. When connected to Model C-410, the HP-16 becomes an integral part of these systems so that not only do you have the regular communication advantages but in addition paging facilities, as well as a supplementary 15 -watt inter-com system. Operation is simple. By merely pressing the button marked "Power" (in addition to the regular operation of the system) you immediately have a 15-watt inter-communication system. Voice of Master is heard at regular room volume and is controlled by the Master Station. The Booster is equipped with "on-off" switch. "Pilot Light Indicator" and "Variable Volume Control" which controls outgoing volume up to 15 watts. Operation is on 115 volts, AC, 60 cycles. Units are furnished complete.

HP-1 Auxiliary Speaker-Recommended in place of sub-station where it is necessary to use output of Power Booster at one station location. Housed in durable metal cabinet. Capacity up to 5 watts.
HP-2 Auxiliary Speaker-Same as above but for up to 15 watts capacity.

THORDARSON AMPLIFIERS
}

\section*{THORDARSON 8 WATT AMPLIFIER - T-30W08A \\ LIST PRICE \(\$ 49.90\) - WITH TUBES}

This amplifier combines maximum performance with minimum size. It is ideal for ballyhoo installations, carnivals, or inter-phone applications. The quality is such that it may be used for reproduction of the finest records. Individual controls for phono and microphone provide electronic mixing. The treble attenuation tone control has sufficiently smooth operation for satisfactory elimination of needle scratch or objectionable highs; or with the control in a normal position the highest treble tone can be clearly reproduced.

POWER OUTPUT-8 Watts \((+31.25 \mathrm{Db})\) at less than \(9 \%\) distortion. TWO INPUT CIRCUITS-
One high impedance microphone channel-115 Db gain (based on 100,000 ohms input impedance).
One high impedance phono channel-72 Db gain (based on 100,000 ohms input impedance).

All input circuits may be mixed.
Low impedance microphone input optional at slight additional cost ( 50,250 , or 500 ohms).
IMPROVED TONE CONTROL-(high frequency attenuator type). Maximum position attenuated 1,000 C.P.S. \(4 \mathrm{Db}, 5,000 \mathrm{C} . \mathrm{P} . \mathrm{S} .17 \mathrm{Db}\), 10,000 C.P.S. 22 Db.

FREQUENCY RESPONSE-Flat within 1 Db from 50 to 10,000 C.P.S. CHASSIS TYPE CONSTRUCTION-Attractive three-tone control panel.
OUTPUT IMPEDANCES-4, 8, 15, 250, 500 ohms-all available at an 8-prong receptacle.
MUM LEVEL- 60 Db below rated output.
TUBES-2-6SJ7; 1-6L6; 1-5Y3G.
DIMENSIONS-10" \(\times 6^{\prime \prime} \times 71 / 2^{\prime \prime}\) high.
POWER CONSUMPTION 70 watts, \(110-120\) volts, \(50-60\) cycles (other primary voltages on special order)
WEICHT NET-143/4 pounds; shipping 16 pounds.

\section*{THORDARSON 25 WATT AMPLIFIER - T-31W25A}

\section*{LIST PRICE \(\$ 115.00\) - WITH. TUBES}

Sufficient undistorted power is available from this unit for large auditorium or night club installations. Two low level inputs and one high level input will allow the use of two microphones with low impedances or high impedances to be satisfactorily mixed with a phono input for musical background. The attractive front panel is supplied with three gain controls and two tone controls. The tone controls provide individual bass or treble attenuation to eliminate undesirable highs in recordings or undesirable lows for crisp speech output. When the tone controls are in the normal position-Tru-Fidelity output is available.

POWER OUTPUT-25 watts ( +36.2 Db ) at less than \(3 \%\) distortion. THREE-INPUT CIRCUITS-
Two high-irapedance microphone channels- 116 Db gain (based on 100,000 nhms input impedance).
One high impedance phone channel-72 Db gain (based on 100,000 ohms input impedance).
Low impedance microphone input optional at slight additional cost ( \(50,250,500\) ohms).
IMPROVED TONE CONTROLS (Treble and bass attenuators)
Maximum attenuation positions.
Mass-50 C.P.S.-20 Db. 100 C.P.S. 12 Db .

DIMENSIONS-10RPTION-137 watts-110-120 volts, \(50-60\) cycles (other primary voltages on special order). WEICHT NET-28 pounds; shipping 32 pounds.

\section*{THORDARSON 50 WATT AMPLIFIER - T-31W50A}

\section*{LIST PRICE \(\mathbf{\$ 2 2 5 . 0 0}\) - WITH TUBES}

This amplifier employs 4-Beam Power tubes; is conservatively rated at 50 watts and will supply over 65 watts of peak power. The unit is ideal for large stadium or roller-rink applications. The three low-level microphone and two high-level phono imputs will satisfactorily handle the most elaborate mixing applications. Dual tone controls will attenuate individually either the bass or treble or individually boost the bass or treble. Either low or high impedance inputs may be accommodated. The range of output impedances provided will accommodate multiple speaker applications.

POWER OUTPUT- 50 Watts \((+39.6 \mathrm{Db})\) at less than \(5 \%\) distortion. FIVE INPUT CIRCUITS-
Three input microphone channels- 115 Db gain (based on 100,000 ohms input impedance).

Two phono fader inputs- -75 Db gain (based on 100,000 ohms input impedance).
Low impedance microphone input optional at slight additional cost \((50,250,500\) ohms \()\)
TWO TONE CONTROLS-
One bass control providing a bass boost of \(91 / 2 \mathrm{Db}\) at 80 C.P.S. to a bass attenuation of 25 Db at 80 C.P.S.

One treble control providing a boost of \(111 / 2 \mathrm{Db}\) at 8,000 C.P.S. to an attenuation of 25 Db at 8,000 C.P.S.
Nine extreme individual response curves available with the two tone
controls.
FREQUENCY RESPONSE-Tlat within 1 Lb from 30 to \(\mathbf{1 5 , 0 0 0 .}\)
CHASSIS TYPE CONSTRUCTION-All-steel strearnlined cabinetattractive three-tone control panel.
INVERSE FEED-BACK CIRCUIT.
OUTPUT IMPEDANCES-4, 6, 8, 15, 125, 250 and 500 ohmsselected by mieans of a selector switch.
HUM LEVEL-70 Db below rated output.
TUBES -2-5X4; 1-6X5; 4-6L6; 1-6V6; 4-6SJ7; 1-6J5.
DIMENSIONS \(17^{\prime \prime} \times 113 / /^{\prime \prime} \times 834^{\prime \prime \prime}\) high.
POWER CONSUMPTION-250 Watts at \(110-120\) volts, \(50-60\) cycles (other primary voltages on special order).
WEIGHT NET-44 pounds; shipping 50 pounds.

\section*{THORDARSON AMPLIFIERS}

\section*{T-31W26 AMPLIFIER-PRE-AMPLIFER}

This combination unit will satisfy the requirements for permanent installations. In addition to being used as a mixer, it will also deliver 25 watts of undistorted output for speaker installations in the vicinity of the pre-amplifier.

\section*{T-31W26 PRE-AMPLIFIER}

\section*{LIST PRICE \(\$ 115.00\) - WITH TUBES}

This pre-amplifier, booster combination unit is exactly like the T-31W25A amplifier but is constructed for rack and panel mounting. As both voice coil and line impedances are available, this unit may be used as a source of power and an exciter for T-31W27 booster amplifiers. If the unit is used only as a pre-amplifier a 500 -ohm secondary must be loaded with a 500 -ohm, 50 -watt resistor. An unlimited amount of booster amplifiers may be connected in parallel across the output of this unit. Low impedance inputs are available and for further tecknical data see those accompanying the T-31W25A.

DIMENSIONS- \(19^{\prime \prime} \times 83 / 4^{\prime \prime} \times 103 / 4^{\prime \prime}\) behind back of panel.

WEIGHT NET- 28 pounds: shipping 32 pounds.

\section*{T-31W27 BOOSTER}

This booster unit designed for operation in conjunction with pre-amplifier T-31W26 is convervatively rated 2 t 25 watts. An unlimited number of these units may be installed in a rack either with a pre-amplifier or at the end of a terminated line The master gain control will allow satisfactory adjustment of individual speaker installations.

\section*{T-31W27 BOOSTER}

\section*{LIST PRICE \$110.00-WITH TUBES}

An unlimited amount of these boosters may be connected in parallel across the T-31W26 pre-amplifiers. Each booster will deliver full 25 watts at less than \(3 \%\) distortion and is equipped with a master gain control for the adjustment of individual circuits. The over-all gain from high impedance input is 40 Db which makes it possible to excite the booster from any of the available impedances on the pre-amplifier. High impedance bridging transformers are available on special order if isolation is desired from a 500 ohm line.

FREQUENCY RESPONSE-Flat within 1 Db from 30 to \(\mathbf{1 5 , 0 0 0}\) C.P.S. INPUT IMPEDANCE--100,000 ohms.
HUM LEVEL- 75 Db below full output.
TUBES-1-5X4; 2-6L6; 1-6N7; 1-6J5.
POWER CONSUMPTION- 125 Watts at \(110-120\) volts, \(50-60\) cycles (other primary voltages on special order).
DIMENSIONS- \(19^{\prime \prime} \times 834^{\prime \prime} \times 103^{\prime \prime}\) behind back of panel.
WEIGHT NET-271/2 pounds; shipping \(311 / 2\) pounds.

\section*{(26) \\ rca PM Loudspeakers}
1. Engineered to RMA Standards
2. Rugged Mechanical Construction-Dustproof, Rustproof
3. Exclusive RCA Magnet Clamping Spring on \(12^{\prime \prime}, 5^{\prime \prime}\), and 4×6" Speakers
4. Magnet solder-locked in position on \(2 \times 3^{\text {:2 }}\) Speaker
5. Powerful Alnico V Magnet
6. Moistureproof Centering - an RCA developmens

RCA 2" \(\times 3^{\prime \prime}\) PM Elliptical Speake:

RCA 12" PM Loudspeaker

The RCA "Controlled Resonance" 12" PM Loudspeaker provides brilliant reproduction and natural tone quality through the use of a unique RCA device which automatically filters needle-scratch and other objectionable high frequency noices. A special voice coil mounting permits easy, accurate adjustment.

For outstanding performance in table model combinations and portable radios, use tha RCA 4" \(\times 6^{\prime \prime}\) PM elliptical speaker. The rigid one-piece stel-formed frame provides maximum strength with rattlefree operation. This rugged speaker includes a special cut-frame feature for optional mounting.

The RCA 5" PM Loudspeaker is specially designed to meet the radio serviceman's table model requirements. The moisture-proof voice coil suspension provides maximum flexibility throughout the entire operating frequency range. Siandard RMA mounting dimensions assure easy mounting in nearly every type of application.

The Altec Lansing Model 604 Duplex and associated N-2000-B network represents the finest loudspeaker on the market. Manufactured by the same company which makes the famous "Voice of the Theatre" loudspeaker systems used by leading motion picture theatres, this compact unit has all of the fine design principles and construction that has heretofore been available only in the most costly loudspeakers offered for professional use and laboratory standards. Price has not been spared to make the Duplex the peer of all loudspeakers.

The unusual features are: (a) Two way operation utilizing separate diaphragms aud voice coils for high and low frequencies. (b) Multicelluiar hom to provide uniform sound distribution over (b) Multicellular hom to provide uniform sound distribution over a wide area. (c) Anico No. 5 permanent magnets designed for total absence of external stray fields. (d) Easily replaceable high frequency diaphragm and low frequency cone making it unnecessary to return the complete unit to the factory for repair. (e) Both the high and low frequency voice coils made of edge-wise wound ribbon wire to provide \(22 \%\) qreater efficiency. (f) Mounting frame of diecast aluminum. (g) Large \(3^{\prime \prime}\) low frequency voice coil for high power capacity and to assure that the cone will operate as a stiff piston and not break up. (h) Frequency response more than spans \(F M\) range of 50 to 15,000 cycles. (i) Ideal \(180^{\circ}\), constant resistance, parallel type electrical dividing network having an attenuation of 12 db per octave on either side of 2000 cycle crossover. ( j ) Overall acoustic efficiency 3 to 5 db greater than the ordinary loudspoaker.

The Model 604 Duplex Loudspeaker and associated N-2000-B net work are available separately, or can be supplied together in a number of specially constructed baffle cabincts as illustrated. The cabinet combinations are known as Duplex Loudspeaker Systems.

The Duplex Loudspeaker particularly meets the critical require ments of broadcast and recording studio monitoring, high quality public address and music distribution systems, and when used with 16 mm . sound equipment will increase the audience coverage many fold. Music lovers and discerning people require the Duplex for home use with fine phonograph records and FM reception.

MODEL 603
DIACONE SPEAKER
The Altec Lansing 603 Multicell Diacone is now available to meet the tremendous demand for an economical high quality speaker for customers who desire a speaker priced lower than the "professional" Model 604 Duplex. This unit has the advantages of a 2 -way mul ticellular speaker system, and its performance efficiency, high frequency distribution, fre quency respone, and absence of distortion are surpassed only by the 604 Duplex. It is de signed for the discriminating customer who appreciates fine quality sound in his home AM or FM radio, phonograph, music system, and for the manufacturer who earnestly at tempts to meet these home requirements.
This Speaker, which is an Alnico 5 permanent magnet unit, in corporates a metal high frequency diaphragm and a low frequency cone coupled together by a mechanical dividing network and driven by a single \(3^{\prime \prime}\) voice coil. The metal high frequency diaphragm operates into a multicellular horn to assure uniform sound distribution over a wide area.
Although not normally supplied in a baffle-cabinet, the Model 603 can be installed in any of the illustrated Altec Lansing cabinets which can be ordered separately.

The Altec Lansing 515 low frequency speaker unit which is also used in the "Voice of the Theatre" loudspeaker systems is available for non theatrical applications where high power, high quality low frequency speakers are needed. The use of Alnico 5 permanent type magnet provides a compact, self energized speaker with its hiphly concentrated energy permitting higher efficiencies than ever before thought possible with a permanent magnet.
Equally important is the exclusive feature of edgewise wound copper ribbon wire used in perfecting the large \(3^{\prime \prime}\), voice coil. Ribbon

\section*{MODEL 515} SPEAKER wire permits the utilization of considerable more conductor material in the air gap greatly increasing efficiencies and decreasing operating temperatures. The diameter of the edgewise wound copper ribbon voice coil has been enlarged permitting uitlization of higher power with less distortion.

Another feature of this low frequency speaker is the highly efficient dome-inserted, moisture resistant, seamiess molded cone with effective driving area of 123 sq. in. Cone and voice coil assembly are permanently aligned in a \(15^{\prime \prime}\) die cast frame and clamping ring.

\section*{MULTICELLULAR HORNS}

Altec Lansing multi-cellular horns are constructed from exponential horn cells grouped in different configurations to meet various sound distribution requirements. Each cell is a true exponential horn. The large multi-cellular horn provides the best way of covering long distances and large areas with high levels of quality acoustic power in the frequency range above \(200-300\) cycles. By choosing the proper configuration of cells, the sound output can be directed for even distribution over any horizontal and vertical area desired; and conversely, to a large degree the sound can be kept from unand conversely, to a large degree the sound can be kept from unwanted areas such as walls and celling which mirht produce echoes, slaps, reverberations, ete. These horns find particular application in large buildings with high noise levels, reverberant cathe rinks, stadia, race tracks, airports, church carillons, parks, skating rink
The chart shows multicellular horms available. Note that a throat is not supplied as part of the multi-cellular horn and must be ordered separately according to the type required.

\section*{288 SPEAKER}

The Altec Lansing 288 speaker unit is designed to fit on the throata of various Altee Lansing multi-cellular horns. Using Alnico 5 permanent magnet, its efficiency when mounted on a multi-cellular horn

\section*{288 SPECIFICATIONS}

Signal Capacity - 40 watts for frequencles V.C. Impedance-2 24 ohms when operating under normal horn loading
Dimensions conditions.
Weight -21 IDs.

List Price
-\$200.00
is such that a sound level of 98 db (ref. \(10^{-16}\) watts per square centimeter) is produced at five feet distance for an electrical input of 0.1 watt at 1000 cycles.

The use of tangential compliances in the diaphragm and edgewise wound ribbon wire in the voice coil provide maximum power handling capacity and acoustic output. Beryllium copper leads, spot-welded to the voice coil, provide heavy duty connections which will not fatigue under use. The entire diaphragm and voice coil assembly, coded 20221 , which is mounted in a cast bakelite ring, is field replaceable.
When using the 288 speaker unit for all range reproduction, it is necessary to attenuate the frequencies below 300 cycles which would otherwise damage the diaphragm and voice coil assembly. This attenuation may be accomplished by the proper sized condenser either in the input or output circuit of the final power amplifier.

\title{
GENERAL ELECTRIC
}

\section*{ILIIC'O I P. II. LOLDSPEAKERS}

All component parts of the new Alnico \(V\) Loudspeakers are made to the rigid specifications of G-E quality control. These features, in addition to highly efficient manufacturing skill combined with the "know how" of G-E engineers, have made these new superb speakers possible - unsurpassed in fidelity, dependability and durability.

\section*{4" TYPE 400C}

GENERAL ELECTRIC'S new 4 -inch speakers are the result of years of intensive engineering research to produce units of reduced size with maximum efficiency for use in small portable and table model receivers. In addition to having the "staybright" finish and the aluminum foil base voice coil, the new 4 -inch speakers are considerably lighter in weight and more compact. This reduclighter in weight and more compact. This reduc-
tion in weight and space has heen accomplished tion in weight and space has heen accomplished
through the use of Alnico \(V\) magnet material, allweld construction, and smaller yoke assembly. Suggested List

\section*{51/4" TYPE 525C}

GENERAL ELECTRIC'S 51/4-1N. PM speakers have all been designed and developed to provide full, true, low notes and excellent high frequency definition for voice or music reproduction. Skillful designing has been applied to all details to assure the best possible results.
Suggasted List
\(\$ 5.00\)

\section*{61/2:7 TYPE 650C}

GENERAL ELECTRIC \(61 / 2\)-inch loudspeakers are the result of years of persistent development to improve performance. Never were ideas introduced and combined with better quality materials. Greater sensitivity and power capacity in more compact space was achieved by these methods.

Suggested List \(\qquad\) \(\$ 6.88\)

\section*{8" TYPE 800C}

The NEW ALN!CO \(V\) PERMANENT MAGNET material was chiefly responsible for maintaining the excellent performance of the \(G-E\)-inch speakers and still keeping the over-all size smaller The speakers are capable of handling full audio power with very little distortion. These speakers are recommended for quality in design and faithful reproducing characteristics.
Suggested List
\(\$ 8.97\)

\section*{10'1 TYPE 1000C}

GENERAL ELECTRIC'S new 10 -inch P.M. speakers are the result of application of latest developments in scientific laboratory tone reproduction. Especially designed for brilliant reproduction of voice and music. Types 10010 and 10000 represent balanced perfection in relative factors of anced perfection in relative factors of pertormance ability, cost, and appearance.

\section*{12" TYPE 1200C}

GENERAL ELECTRIC'S powerful 12-inch permanent magnet loudspeakers are designed to provide faithful tone reproduction at high levels. Types 1201 C and 1203 C equal or surpass the performance of electrodynamic speakers of the same size. Utiliz ing the moulded curved cones and having a cover for the magnet assembly, they are dustproof and moisture free. All weld construction has minimized distortion at maximum operation levels by eliminating vibration and assures perfect alignment of voice coil and cone assembly, even under the severest conditions. They require no external field supply or exciting voltage.
Suggested List ................................ \$16.50

\section*{G-E LOUDSPEAKER FEATURES}

ALNICO V MAGNET MATERIAL is one of the great wartime engineering developments. Its energy per unit volume-approximately three times as great as other magnets-has enabled G-E engineers to design a new line of smaller speakers with better performance character istics.

ALUMINUM FOIL VOICE COILS only are used in all G-E permanent magnet speakers. Exact concentric location with the collar of the spider assembly insures perfect alignment. Humidity or excessive temperature variations do not affect the aluminum foil voice coils, making this type of speaker ideal for receivers designed for use in export markets.

ALL WELD CONSTRUCTION of the newly designed G-E Alnico \(V\) Loudspeakers not only reduces the weight and size but also increases the rigidity necessary for perfect alignment of all parts. It also eliminates the possibility of dust and moisture accumulation and simplifies the replacement of damaged cones.

"Standard Series" speakers, in both PM and Field Coil models, are exceptionally good in performance and are highly recommended for radio receivers, low-power public address systems, intercommunication equipment, and similar applications. Completely redesigned in every feature, this postwar line embodies the highly efficient Alnico 5 magnets which insure unlimited life. All "Standard Series" speakers are completely dustproof and all field coil models have bucking coils.

No transformers are regularly furnished with these speakers but mounting facilities are provided for easy attachment of transformers. If transformers are desired mounted at the factory, add to the list price of speaker and transformer an installation charge of \(75 \phi\) list. Special field resistances are available on order. Write for prices, mentioning specific resistance required.

\section*{VOLUME CONTROLS}

These "L Pad" type volume controls are highly satisfactory for use in voice coil circuits. Complete with pointer knob and escutcheon.
ST-276-For 6 ohm v.c. 5 -watt rating.
ST-411-For 8 ohm v.c. 15 -watt rating. 3.00
 ST-606-For 16 ohm v.c. 15 -watt rating

\section*{Concert SPEAKERS}

These are heavy-duty highly efficient speakers and are widely used for Public Address and high quality Radio and Phonograph applications. All Speakers are designed so that they may be used in the Jensen BASS REFLEX Enclosures and Cabinets. All field coil models have bucking coils.

Facilities are provided for easily attaching any of the transformers listed on page C-14. Speakers are supplied without transformers attached unless specifically ordered, in which case increase list price by \(\$ 1.25\), plus list price of transformer.

\section*{SPECIAL EXTENDED RANGE - HIGH FIDELITY SPEAKERS}

For those applications where high fidelity performance extending to \(10,000 \mathrm{cps}\). is required, these Special Extended Range High Fidelity Speakers are recommended. Power handling capacity is limited by permissible distortion. They are designed for home and studio use and will accommodate indoor audiences on the order of 100 people. They are highly qualified for monitoring in broadcast stations and for high fidelity reproduction of voice at relatively low levels.

ALNICO 5 PM MODELS

\section*{"AUDITORIUM SERIES" SPEAKERS}

JENSEN Auditorium speakers are undeniably the best known and most respected high-quality single-radiator loud speakers available. Model PMM-15 is recommended as a general purpose unit while Model PMJ-18 was designed with greatest emphasis on reproduction of voice although in accomplishing this, bass response has not been sacrificed.

\section*{Hypex \\ PROJECTORS}

\author{
with Ammular Diaphragm Unit
}

\begin{abstract}
"Hypex" Projectors consist of a Type II "Ilypex" Hom and Type U "Amular" Driver Unit. The "Hypex" Hom (Patents Pending) is a Jensen development-not "exponential," but with an entirely new flare formula that gives increased efficiency in the region above accustic cut-off. Two horn sizes give nominal cut-off values of 165 cps . and 140 cps ., either
\end{abstract} of which can be used with any Type U "Annular" Driver Unit below.

Type U "Annular" Driver Units (U. S. Pat. 1,845,768), offered in PM design, employ the exclusive Jensen "Annular" principle in which the dural diaphragm is clamped at periphery and center. This gives extra stability, greater freedom from harsh "breakup" sometimes encountered with "dome" diaphragms.
"Hypex" Projectors are especially suitable for speech reproduction, since response extends from the vicinity of acoustic cut-off to the 5,000 cycle region with greatest emphasis on middle highs that add "punch" and "carrying power." Commercially acceptable music reproduction, within the limitations of all small reflex horns, is also provided. Sturdy steel encased unit, plus reflex horn construction insures dependable operation indoors and out, under all weather conditions. Finish is durable baked two-tone gray lacquer.

\section*{STANDS AND SUPPORTS}

EA-6. Adjustable Stand. Sturdy cast fitting with three-leg base, for mounting projector in wall or other surface. Horizontal and vertical adjustment.
ST-728-List Price. \(\qquad\) \(\$ 3.00\)
EA-7. Adjustable Support. Provides adjustment when projector is mounted on pipe mast. \(3 / 4\) inch pipe thread both ends.
ST-729——List Price...

\section*{ANTI-CORROSION TYPE}

The anti-corrosion type Hypex Projectors, similar to the regular series, are distinguished by their ability to withstand the corrosive and other deteriorating effects of continued exposure to salt-laden atmosphere, highly humid climates and other severe weather conditions. Their use is therefore specifically recommended where there is exposure of the units to atmospheric and climatic conditions of the seaboard, the tropics and semi-tropies and they are obviously recommended for all installations in the open.

Mechanical and acoustical specifications are identical to those of the standard Hypex series except that protective screens, nuts, bolts, washers and clamps are brass, stainless steel or approved equivalents. Gaskets and grommets are rubber or approved rubber equivalents. All surfaces of steel parts are bonderized, after which two coats of
primer are applied and baked and one coat of gray enamel applied and baked. All parts not inherently proof against corrosion, rust, etc., are nickel plated and/or suitably treated. When separately tested each complete projector, horn, driver unit and diaphragm is guaranteed to withstand a 100 -hour salt spray test. Sound chamber, driver unit and re-entrant horn sections are provided with suitable drains to remove condensate or water seepage when projector is mounted in proper position.
U-20I Driver Unit, ST-732 \(\qquad\) . List Price \(\$ 52.00\)

\section*{TYPE U "Annular' DRIVER UNITS}

U-20. "Annular" Driver Unit. Permanent Magnet type. Rated at 15 watts average, 25 watts maximum, with normal voice or music input. 16 -ohm voice coil. Internal screw terminals. Dustproof, screened sound chamber. Diameter, \(61 / 8{ }^{\prime \prime}\). Depth, \(3 \%\) ". Shipping weight, 11 lbs. Speçify ST-630.

List Price
\(\$ 41.00\)

\section*{Type H "дурех" PROJECTOR HORNS}

H-20. "Hypex" Horn only. Bell diameter, \(20 \%\) ". Depth, \(163 / 8^{\prime \prime}\). Acoustical length, 4 feet. Nominal acoustic cutoff, 165 cps . Stand coupling flange tapped for \(3 / 4\) " pipe thread. Net weight, \(111 / 4\) " lbs. Shipping wt., \(181 / 4 \mathrm{lbs}\). List Price................................................................ \(\$ 28.00\)
H-24. "Hypex" Horn only. Bell diameter, 24 多". Depth, \(201 /{ }^{\prime \prime}\). Acoustical length, 5 feet. Nominal acoustic cutoff, 140 cps . Net weight, \(14 \% / 4 \mathrm{lbs}\). Shipping wt., \(21 / 4 \mathrm{lbs}\)
.\(\$ 35.80\)

SPH-81—Projector, complete. PM Type. ST-633 EA-5-Adjustable Stand. ST-730.

List Price.
 List Price.

\section*{JENSEN Type "S" Peri-Dynamic Projector... \\ 15-25 WATTS CAPACITY}

These Projectors are complete assemblies of specially designed Driver Speaker and acoustic system utilizing the Peridynamic principle and correctly designed projector horn. Unusually good response is obtained in the 100 -cycle region and high frequency response at good efficiency is maintained to 5500 cycles, thus especially qualifying these projectors for applications emphasizing music reproduction and naturalness in speech quality. Except for opening into horn, projector is completely weatherproofed, suitable for use indoors and out. Power rating is 15 watts average, 25 watts maximum, with normal voice or music input. Yoice coil impedance, 8 ohms. Bell diameter, \(241 / 2 "\). Overall length, \(30 "\). Shipping weight, 30 lbs. Complete with plugs for voice coil and field connections.
\(\begin{array}{r}\text { List } \\ \hline\end{array} \mathbf{8 . 5 0} 5\)

List \(\$ 82.50 \quad\) Alf above Projectors are furnished complete with Driver Speaker, but LESS stand.

\section*{MODEL VH-91—HYPEX SPEECH MASTER REPRODUCER}

Model VH-91 Speech Master Reproducer meets a real need for paging and intercommunication applications. Particularly efficient in the voice frequency range, it delivers clear, intelligible speech with maximum "punch" to override high noise levels. By reason of an extremely clever mounting bracket, this projector can be pointed in any direction and securely locked into position with a single wing nut. Two holes in the bracket are provided for mounting on table, wall, ceiling or a post. The diaphragm is cloth base, phenolic impregnated. Nominal voice coil impedance, 8 ohms. Power handling capacity, 15 watts maximum speech signal input. Two-wire RC cable is provided for connections. Mounting facilities are also provided on the bracket for a \(5 / 8 \mathrm{x} 5 / 8^{\prime \prime}\) transformer. Because of the Hypex formula, useful output is attained for a 100 -degree total angle. Dimensions: Bell diam., \(87 / 8^{\prime \prime}\), length of bell, \(73 / 8\) ".
Model VH-91-Reproducer, ST-171.
\(\$ 32.50\)

\section*{JENSEN Speech Master REPRODUCERS}

Phone Communication: For amateur, commercial, police, aviation, as separate unit or integral equipment.

C W Telegraph: Aids selectivity, helps signals over-ride QRM and QRN. Husky voice-coil to withstand keying transients.

Intercom and PA: For modern Intercom, Paring and PA at moderate levels, Good "talk-back" performance.
Short-Wave Listening: Better than vour regular speaker. Can be used on any receiver.

\section*{5-Watt "AP-10, 11" for DESK AND PANEL}

The truly remarkable performance of these new "Speech Masters" is due to the Peri-Dynamic principle and special radiating system. Normal room level requires less than 0.5 watt input; maximum rating of 5 watts on speech insures dependability. Speech reproduction is especially clear, crisp, intelligible
. yet if required, music can be reproduced with better quality than that of the average "midget" radio.
Extra-sturdy construction, overall mechanical protection, double dust-proofing, beautiful streamlined design, exceptional acoustic performance . . . all these combine to set AP-10 and AP-11 "Speech Masters" entirely apart from conventional speakers.
AP-10 Desk Type "Speech-Master." Permanent Magnet design. For desk or wall mounting. Complete with "tilt" adjustment and base. Double dust-proofed, fully enclosed and protected. Internal mounting bracket for \(1 / 2^{\prime \prime} \times 1 / 2^{\prime \prime}\) transformer. R.C. cord \(36^{\prime \prime}\) long. Height \(63 / 4^{\prime \prime}\); depth \(51 / 8^{\prime \prime}\); diameter \(5^{\prime \prime}\). Shipping weight, \(51 / 4 \mathrm{lbs}\). Attractive Hammered Gray finish.
AP-10. ST-590. ( 4 ohm v.c.) List............................................... \(\$ 13.90\)
AP-10. ST-591.' ( 45 ohm v.c.) List............................................ 14.50
AP-11 Panel Type "Speech-Master." Similar to AP-10 less base and swivel bracket. Has clearance eyelets for mounting screws. Mounts in \(427 / 64^{\prime \prime}\) cut-out, extends \(41 / 2^{\prime \prime}\) inside panel (from front surface). Screws and drilling template included. Shipping weight, \(33 / 4 \mathrm{lbs}\).

AP-11. ST.592. (4 ohm v.c.) List....................................... \(\$ 11.30\)
AP-11. ST-593. (45 ohm v.e.) List.
11.90

\section*{6-Watt "AR-10" REFLEX SPEECH MASTER REPRODUCERS FOR GENERAL APPLICATIONS}

This new Jensen reflex type "Speech Master" has many applications for paging, intercom and call systems operating at medium levels under moderate noise conditions. Specially designed reflex horn increases efficiency in midfrequency range, giving added effectiveness and "punch" to speech quality. Though not classified as a strictly weatherproof device, reflex construction prevents direct access of rain and snow to speaker diaphragm. Voice coil impedance, 4 ohms or 45 ohms. Power rating, 6 watts. Internal space for \(1 / 2^{\prime \prime}\) by \(1 / 2^{\prime \prime}\) transformer (designs stocked for 4 -ohm v.c. only). Overall diameter \(10^{\prime \prime}\). Depth, \(8^{\prime \prime}\). Complete with mounting bracket. P.M. design.
AR-10. "Speech Master." 4 ohm v.c. ST-643. List Price
\(\$ 20.00\)
AR-10. "Speech Master" 45 ohm v.e. ST-644. List Price..................................................... 20.75

\section*{JENSEN COAXIAL SPEAKERS}

The four JENSEN Coaxial speakers shown here represent a wide range of performance and price and are recommended for FM-AM receivers, reproduction of transcriptions and commercial phonograph records, and recording and broadcast studio monitoring. Two speakers in a unitary assembly cover the entire frequency range, each speaker giving smooth, efficient response in that portion of the frequency range which it reproduces. Only "two-way" systems such as employed in JENSEN Coaxial speakers can give such excellent response and spatial distribution over the
wide frequency range required in advanced sound reproduction.

Two types of dividing networks are used in JENSEN Coaxial speakers: "Roll-off" network in Models HNP51, JAP-60 and JHP-52 and "Shelving" type in Model JCP-40. The H-F Range Control, furnished with Models HNP-51, JAP-60 and JHP-52, provides a choice of four cut-off frequencies to match the program material: \(15,000,10,000,7,500\) and \(6,000 \mathrm{cps}\). H.F. Level Control ST-606 may be added to Model JCP-40 if desired.

MODEL JAP-60 (15-Inch)
For FM-AM receivers, high quality phonographs, reproduction of commercial phonographs, reproduction or commerciat tions where smoother response and better balanced characteristics are required than balanced characteristics are required than offered by Models JHP-52 or single, directradiator speakers. O.D. \(151 / 8^{\prime \prime}\); Depth \(81 / \mathbf{s}^{\prime \prime}\); Baffle opening \(133 / 4\) ".

Frequency Range: 50 to 15,000 eps. Maximum Input: 17 watts. Field: PM. Input impedance: 500-600 ohms. Network: input impedance: \(500-600\) onms. Network: "Roll-off" type with 4 -position swtich.

Model JAP-60, ST-600, with H-F Range Control.
.. \(\$ 85.00\)
work: Inteminl two-ehamel type. HF Control: "Roll off" type wet 4-position switch

Model HNP-51, ST-122, with H-F Range Control.................. \(\$ 125.00\)

\section*{MODEL JHP-52 (15-Inch)}

For FM-AM receivers and high quality phonographs where slightly less smooth response throughout the entire frequency rance than available with Models JAP-60 and HNP-51 can be tolerated.

Frequency Range: 50 to 15,000 cps. Maximum Input: 14 watts. Field: PM input Impedance: \(500 \cdot 600 \mathrm{ohms}\). Network: Integral two-channel type. H-F Control: "Roll-off" type with 4-position switch O.D. \(15 \frac{1 / 8 " ; ~ D e p t h ~ 71 / 2 " ; ~ B a f f l e ~ o p e n i n g ~}{\text { " }}\) \(133 / 4^{\prime \prime}\) 。

Model JHP-52, ST-601, with H-F Range Control...................... \(\$ 72.00\)

\section*{MODEL JCP=40 (12-Inch)}

For FM-AM receivers and reproduction of commercial phonograph records where minimum space is an important factor. Excellent modernizing unit for replacement of single radiator, 12 -inch speakers in radio receivers and phonographs. Can be mounted above the baffle for 10 -inch speakers.
Frequency Range: 50 to \(12,000 \mathrm{cps}\). Maximum Input: 10 watts. Field: PM. Input Impedance: 6.8 ohms. Network: Simple "Bridging" type. H-F Control: Furnished only in complete reproducer; "shelving" type control, ST-606, may be added if desired. O.D. \(12^{1 / 8 \prime \prime}\); Depth \(5_{16^{\prime \prime}}\); Baftle opening 11 ".

Model JCP-40, ST-603.
\(\$ 30.00\)

\section*{甲8P HIGH-FREQUENCY SPEAKER \({ }^{\dagger}\)}

As used in \(15^{\prime \prime}\) coaxials. Designed to reproduce the high frequencies from 4,000 to \(15,000 \mathrm{cps}\)., when used with dividing network (such as A40-1) and suitable low frequency speaker. Impedance, 16 ohms. Overall diameter, 51/2". Depth, 35/8". P.M. design.
Q8P-H.F. Speaker. ST-589. List Price.
\(\$ 13.00\)
ST-605-Mounting Arms. Set of 4 as used on \(15^{\prime \prime}\) coaxials.
List Price
\$1.00

A40-1 NETWORK \({ }^{\dagger}\)
This uniqucly designed two-channel network is offered to those who wish to assemble their own two-way speaker systems, or add a highfrequency speaker to an existing single speaker. Frequency division is at 4,000 cps., with an attenuation outside pass band of 10.12 db per octave. Low frequency chanmel will accommodate any suitable 8 ohm \(12^{\prime \prime}\) or \(15^{\prime \prime}\) speaker. High channcl takes one to four Q8P High Frequency Speakers (16, 8 and 4 ohm taps). Input, 500 ohms. High Frequency Range Control Switch feature included. Specify ST-604-List Price \(\qquad\) \(\$ 35.00\)

\section*{ACCESSORY H. F. LEVEL CONTROL FOR JCP-40}

A simplified system of fidelity control which can be added by the purchaser to the JCP-40 Coaxial Speaker has been developed. This consists of a properly designed continuously variable resistance network which is easily connected to terminals provided for this purpose on the speakers. The control permits the user to adjust the level contributed by the high frequency speaker, thus permitting instant accommodation to prooram quality and listener preference. Control gram qua be ased as general purpose 16 -ohm can also be used as general purpose 1 ong for 15 -wnting on beavy cabints Complete with mounting on heavy caninets. bronze escutcheon and brown bakelite antique
knob.

ST-606-High Frequency Level Control List Price
\(\$ 3.00\)

\section*{BASS REFLEX CABINETS}

Type "D" Bass Reflex cabinets are handsomely styled, and are well constructed of beautifully striped satin finish veneer walnut, with interlaced bronze strip grille over matching fabric.

Type "B" cabinets, inexpensive but durably built enclosures, are well constructed of impregnated composition board and finished in hammered brown lacquer.

Type "D"

\section*{"RD" \\ REPRODUCER De Luxe Design}

MODEL RD-151 REPRODUCER

\section*{BASS REFLEX REPRODUCERS}

Type RD Jensen Bass Reflex reproducer is comprised of a combination of any one of the 4 models of Coaxial, with Type D Cabinet. Cabinet is beautifully styled, all walnut satin finished, Bass Reflex design. RD Reproducers all have program quality selector switches neatly installed on upper right hand side. "RB" Reproducer cabinets are heavily framed with solid lumber, and exterior uanels of cabinet are shaped of high quality wood composition material. Finish is baked on, dark tan color in a new hammerlaid design. Trim is chromium and aluminum. Jensen built-in Bass Reflex.

\section*{APPLICATIONS \\ SPECIFICATIONS}

\section*{"RB" REPRODUCER Utility Design}

Articulated Coaxial model recommended for FM receivers, reproduction of transcriptions, and recording and broadcast studio monitoring where smoothest performance, minimum distortion and unusually good polar response and "presence" are required.

Frequency Range: 50 to \(15,000 \mathrm{cps}\). Maximum Input: 25 watts. Efficiency: Substantially higher than other \(15^{\prime \prime}\) models. Field: Alnico 5 PM. Input Impedance: 500-600 ohms. Network: Integral two-channel type. H-F Control: "Roll-off" type with 4-position switch.

For \(F M-A M\) receivers, high quality phonographs, reprcduction of commercial phonograph records and similar applications where smoother response and better balanced characteristics are required than with Model JHP-52 or direct radiator type speakers.

Frequency Range: 50 to \(15,000 \mathrm{cps}\). Maximum Input: 17 watts. Efficiency: Higher than conventional \(15^{\prime \prime}\) models. Field: PM. Input Impedance: \(500-600\) ohms. Network: Integral two-channel type. H-F Control: "Rolloff", type with 4-position switch.

For FM-AM receivers, high quality phonographs and reproduction of commercial phonograph records, where slightly less smooth response throughout the frequency range than Models JAP-60 or HNP-51 can be tolerated.

Frequency Range: 50 to \(15,000 \mathrm{cps}\). Maximum Input: 17 watts. Efficiency: Higher than conventional 15" Network: Integral two-channel type. H-F Control: "Rolloff." type with 4 -position switch.

\title{
EMCO BAFFLES - BRACKETS
}

Manufactured and distributed biv cMCO SOUND EQUIPMENT CORP., BROOKLYN, N. Y.

\section*{NTETT/ARMORED ALL STEEL WEATHERPROOF MARINE STEEL \\ - FOR 6" - EASY MOUNTING}

These weatherproof marine horns will withstand direct driving rain without damage to the cone speaker, constructed entirely of heavy gauge steel to withstand extreme hard use. The speaker dome is lined with acoustic felt to absorb back pressure and eliminate extra high frequencies and metallic resonance. Ideal for use in all indoor and outdoor installations. The special construction of these horns enables the reproduction of both voice and music with excellent fidelity of tone. Finished in \(\alpha\) beautiful and durable weather resisting slate gray baked wrinkle enamel. Supplied with a unique and convenient mounting bracket which enables the speaker to be focused in any direction.
For 6" speakers
Model MM-6.
List Price \(\$ 14.50\)

\section*{MARINE MIDGET BAFFLE}

Designed for indoor and out-

Model MM-15 permanent magnet speaker ideally suited for use with above baffle. Oulput rating 5 watts.
Model PM-5
List Price \(\$ 4.00\)

Symphonic MUSIC BOX FOR 12" SPEAKERS
A beautifully designed cabinet made of choice Wainut Veneers, and handsomely finished. Heavily constructed and reinforced throughout. Cleverly designed grill adds to the beauty of this cabinet. The slope front gives the proper directional effect to the speaker. Supplied complete with
hardware for mounting speaker.
Model SM-12 .............................................List Price 02.00 For 8 " speakers, general construction and appearance same as above, physical size smaller to accommodate \(8^{\prime \prime}\) speakers.
Model SM-8
List Price \(290^{-}\)

\section*{ARMORED ALL STEEL BAFFLE}

This new armored all steel baffle is made to withstand the severest service, the all steel conservice, the makes it imposstruction makes it impos-
sible to dent or damage sible to dent or damage any part of this baffle. Resonance effects are eliminated due to the modern design incorpor-
 All holes for mounting. All holes for mounting speaker are punched, hardware for mounting speaker and hanging loops are supplied.
Speaker dome large enough to accommodate all types of \(12^{\prime \prime}\) P.M. and Dynamic speakers with sufficient room for transformer. Finished in a handsome and durable weather resisting slate Gray wrinkle baked enamel.
Model No. AB-12
List Price \(\$ 13.50\)
TRUCK MOUNT. ING BRACKET

Designed especially for our AB-12 baffles. A conin these balfles on sound trucks. Has four way swivel joint adjusiment for tilting these boffles on sound Made of extra heavy malleable steel ccisfing, finished in gray crinkle.
Model MT-8 List Price \(\$ 5.00\)

Saddle \& Swivel A convenient bracket for AB-12 baffles. Made of extra heavy malleable steel casting. Has four way swivel joint adjustment finished in gray crinkles with oositive grin locks, Model SŠ-7 List Price \$3.00

\section*{KAINER-SOUND PROJECTORS}

\section*{NEW KAINER "High Infensify" REFLEX TRUMPETS}

These NEW IMPROVED KAINER REFLLEX TRUMPETS are unique in design and construction. Spun of a special steel alloy with attractive offsets adding extra strength, ruggedness and durability The Reflex Trumpets are beautifully finished with a gray hammerloid baked on enamel assuring increased acoustic value and durability.
The mounting fixture furnished with both the RT-26 and RT-21 Trumpets is constructed of cast malleable iron highly finished and adjustable to all practical angles. This fixture includes a handle for ease in carrying.
An optlonal feature is the back which encloses the driver unit adding a streamline effect to the contour of the Trumpet and protection for the unit.
As standard equipment, a moulded rubber rim attached to the beading on the edge of the bell is supplied. Both models are equipped with a threaded attachment \(13 / 3^{\prime \prime} \mathrm{x} 18\) thread which will take a KAlNER P. M. Driver Unit or any other standard unit.
The RT-16 trump is very simar to the larger horns. It is a new addition to the KAINER line Permanent magnet Driver Units-Manufactured ta the highest its purpose.
and of the finest available materials. Two models designed to take care of all publle address work rated at the same handing capacity in watts. The chief difference is in the increased efficiency in power output and in tonal range evident in the larger models. Diaphragms are breakdown proof at the rated capacity of 25 watts continuous operation and the unit is waterproof from all angles.

\section*{All Steel Exponential Sound Projector for 12" Speakers}

Model J-12 all steel sound projector is the result of severe laboratory and field tests. It will accommodate all formers. including those with extra heavy permanent magnets.
Sturdily constructed of heavy spun steel alloy, it is light in weight yet strong enough to stand the abuse of heavy vibration under load as well as rough handling. Breather opening is sereened. Entire projector is beutifully finished with high lustre, baked-on, weatherproof art enamel. The malleable iron fixture to which the
lower bracket can be attached is welded to the baffle and extends up the sides to include two of the speaker bolts which assures the minimum of vibration in the entire instrument.

The malleable iron base and bracket carries a tilting dog-toothed adjustment with a swivel and lock nut.

\section*{CHANDELIER BAFFLES FOR UNIFORM COVERAGE}

\section*{CB-12}

A KAINER development in speaker batles for uniform coverage. The construction of this horn affords \(360^{\circ}\) dispersement of sound with lower deflector reducing feed back and areas of concentrated sound This design of horn is ideal for Restaurants, Clubs, Cabarets and Dance Halls where the necessity of projecting sound close to the performers is important. It will replace multiple wall speaker installations eliminating large installation cost with a minimum of maintenance. It is spun of heavy gauge steel and of maintenance. It is spun of heavy gauge steel and
finished in a beautiful bakedon enamel. It is simple to install, suspended from the ceiling with link chain. to install, suspended from the ceiling with link chain.
Accommodates any heavy duty \(12^{\prime \prime} \mathbf{P}^{\prime}\). . speaker. Accommodates any heavy duty \(12^{\prime \prime} \mathrm{P}^{\prime}\). M. speaker.

\section*{AIR COLUMN HORN Model A-C-8}

Specially effective for all outdoor work: Baseball Parks, Circuses, Athletic Fields, and all installations where power and direction of sound are particularly required. The A-C-8 Air Column Horn is well suited for applications where sound must be projected great distances and with the minimum of where sound must be projected great distances and with the minimum of
feedback. When using a microphone under conditions where ordinary baffes feedback. When using a microphone under conditions where ordinary baffes
would be unsatisfactory, this horn with its uni-directional qualities will allow in most cases double or more power to be used before the feed back point is reached. TThe back of this horn is completely closed, eliminating point is reached. The back of this horn is completely closed, eliminationg phone, and allowing the best possible placement of speakers either directly above and slightly forward of the microphone, or to the left or right of the microphone and slightly forward. Both of these positions eliminate bothersome "double tilk" and "lag" which is objectionable to audiences. This method of placement gives the best illusion that the sound is coming directly from the person using the microphone. The bracket attachment is welded to the horn, properly balanced, and mounting fixtures with base can be furnished as a complete unit, permitting exceptionally convenient means for installation. TTHE KAINER ATR COLUMN HORN is constructed of heavy spun steel alloy, light in weight, yet very strong. All parts finished with durable baked art metal enamel. Designed for 8 " HEAVY DUTY Speaker--Bell Opening 24"-Overall Length 36".

Horn Complete with Mounting Fixture, Base and Adjustable \(\$ \mathbf{4} \mathbf{4} \mathbf{8 0} \mathbf{8}\)

\section*{KAINER WEATHERPROOF} Model WH-5
FOR 5" SPEAKERS-COMPACT AND EFFICIENT The inverted reflex design is similar to that used in the wH-6
and WH-8 models, which aids materially to the performance of and wH-8 models, which aids materially to the performance of
any good cone speaker. F For all purpose use, including use as any good cone speaker. For all purpose use, including use as
a microphone in Talk-Back installations-wide frequency range, a microphone in Talk-Back installations-wide trequency range, structed bell and reflex cone are of spum steel alloy, finished with gray baked art metal enamel. The bell and cone are mounted on an aluminum alloy casting to which the base fixture is also attached. This insures a rigid assembly and makes it convenient to install \(5^{\prime \prime}\) cone speaker direct to the aluminum casting. SPECIFICATIONS
Over All Length- \(8^{\prime \prime}\). Bell Opening- \(1^{\prime \prime}\). Ship. Wt. \(51 / 2 \mathrm{lbs}\). Horn complete with base

\section*{QUAM HEAVY DUTY SPEAKERS}

THE QUAM Heavy Duty line of speakers is designed to fill the demand for speakers with unusual power handling capacity. The heavier field in the Electro-Dynamic unit and the larger magnet in the Permanent Magnet unit, plus the larger diameter voice coils, increase the power handling capacity of these speakers. In every respect these units meet the most exacting standards. Both the Electro-Dynamics and Permanent Magnet Dynamics are fully dustproofed and of rigid welded con-
struction, assuring permanent alignment of integral parts, and of course include the Adjust-A-Cone feature which is available only on the QUAM line of speakers.
The heavy duty line is suited for a wide range of installations such as custorm-built radios, combination sets, console radios, public address systems and auxiliary speakers. All speakers may be installed with minimum effort.

PERMANENT MAGNET

THE QUAM-NICHOLS organization is a pioneer in the Permanent Magnet Dynamic Speaker field. This type of unit, originally designed for applications where no current was available for field excitation,

\section*{PERMANENT MAGNET SPEAKERS}

has recently found a wide-spread use for replacements and original equipment in small AC-DC table models, record players inter-office communication systems and automobile receivers.

\section*{THE QUAM ADJUST-A-CONE FEATURE}

THE QUAM-ADJUST-A-CONE feature now included in every QUAM speaker, consists of a clamping ring securely fastening the spider to the basket by means of two machine screws, instead of cementing or otherwise permanently affixing the spider. Thus the QUAM spider can be moved if necessary. To recenter a voice coil, merely loosen the two screws and move the spider and voice coil assembly laterally. This will relocate the voice coil concentrically around the pole piece.

In many cases, a rubbing coil may be adjusted by means of the QUAM ADJUST-A-CONE feature withont removing the speaker from the chassis, or the chassis from the cabinet. Such repairs can be made in a matter of minutes with every assurance that they will be complete.

\section*{PERMANENT MAGNET HORN UNITS}

Latest improvements as developed during the war are now included in all units. Higher watt-handling capacity, greater efficiency and practically lifetime operation. All Permanent Magnet units use the finest grade of Alnico steel magnets and Armco iron throughout. All steel parts copper-plated to prevent corrosion. Units are magnetized, using an elec-
 tromagnetic cutout switch which gives the maximum flux density obtainable in the gap. All magnets are measured for flux density and each unit is tested with special machines for power-handling capacity as well as 300 volt ground-test, making for uniformity and ability to withstand all types of service. All units are supplied with corrosion-proof metal diaphragms or plastic diaphragms on request, without extra charge. Voice coil impedance on all units: 15 ohms. Special ohmages on request. Supplied blastproof to withstand explosion and gunfire, when requested, at additional charge.

Permanent Magnet High Frequency Speaker

An efficient and precision built speaker, to meet the latest requirements for widerange reproduction. Designed to cover the frequency band from 1,000 to 12,000 cycles. Special models are available for response up to 18,000 cycles. Supplied with horn, (as shown) and mounting bracket, (not shown). Designed to operate in conjunction with a suitable low frequency bpeaker (cone or horn type) in order to give high fidelity reproduction in the wide-range audio frequency ban.
made to operate below 1,000 cycles.
Voice Coil impedance 15 ohms.

\section*{ARMORED CONE SPEAKER PROJECTORS}

Efficient projectors for dynamic cone speakers. . . . Rugged and suitable for indoor and outdoor use. . . . All projectors have steel back enclosures and waterproof overlap. . . . Provided with mounting hook and mounting hole.

\section*{RADIAL HOUSING FOR CONE SPEAKERS}

A radial housing for cone operation. Speaker is designed to project sound over a complete circumference of \(360^{\circ}\), distributing the sound with even intensity and bringing out the high response lacking in direct cone horns. Particularly adapted for use on trucks and in auditoriums where complete coverage is desired. Can be camouflaged to blend with ceiling architecture.

IN ALL RACON RADIAL CONE HOUSINGS the upper deflector is made of heavy gauge steel, back cone cover of steel, and lower deflector of RACON ACOUSTIC material to prevent resonant effects prevalent in all metal reflecting surfaces. Storm-proofed for all weather conditions. These cone housings are furnished without speakers.

\section*{DOUBLE RE-ENTRANT MARINE SPEAKERS}

THE LATEST SPEAKERS IN MARINE PRACTICE! A double re-entrant type of horn. The Regular, Midget and Miniature Marine speakers are approved by the Bureau of Marine Inspection and Navigation, Department of Commerce, for all Emergency Loudspeaker Systems on ships, under the 53rd Supplement of the Bureau, after tests made by the Bureau of Standards, Washington, D. C. These Marine Speakers are used both as Loudspeakers and as Microphones. The driving Unit and connections are all enclosed, making a completely waterproof speaker not affected by temperature or weather, including use on sea even during storms! Made from a heavy aluminum spinning, having a base of heavy aluminum casting. Has special non-corrosive Aluminum casting; baked chromatic Undercoat Finish plus outside lacquer finish. Uses latest type of driver units. Supplied with three-legged flush type mounting or U-bracket mounting. All Speakers have waterproof boxes for interior mounting of transformers. Regular and Midget marine speakers supplied blastproof to withstand gunfire and explosion, when requested, at additional charge.

Bull Marine: For long range reproduction and pick-up.
Regular and Midget Marine: For long range reproduction and pick-up. Delivers 100 DB of sound 100 feet from horn with 1 watt input. Will pick up sound up to 100 feet. For Marine, General Public Address and Railroad work.
Miniature Marine: Has higher cut-off. Excellent for speech work in monitoring system, outdoor and indoor paging, intercom systems and railway work.

"Miniature Long Bell"
Miniature Marine Speaker with bell \(101 / 4^{\prime \prime}\) in diameter and \(10 / /^{\prime \prime}\) in depth-otherwise same characteristics as Miniature Marine MN-15B listed above:
Code REDIG Stock No. MN-16B List Price \(\$ 32.50\)

\section*{CONE MARINERE-ENTRANT SPEAKER HOUSINGS}

A re-entrant speaker housing of the Marine type for cone operation. Owing to construction this housing can be used outdoors as well in all weather and temperatures without damage. Cone diaphragm is protected not only from direct contact of rain, but also from physical damage. Can be used for voice or music reproduction.

IN ALL RACON CONE MARINE SPEAKER HOUSINGS bell is made of heavy gauge aluminum; cone mounting is made of aluminum casting; centre bullet is made of Patented Racon Acoustic material to prevent resonant effects. Material is stormproofed for all weather conditions. Cone Speakers not supplied with housings.
\begin{tabular}{|c|c|c|c|c|c|c|}
\hline Code & Stock No. & Cone Size & Bell Diam. & Depth & Weight & List Price \\
\hline RELIM & CM-12 & \(12^{\prime \prime}\) & 24" & 15" & 10 lb . & \$36.00 \\

\hline
\end{tabular}

\section*{STRAIGHT TRUMPETS}

RACON STRAIGHT TRUMPETS are the most efficient horns obtainable. Output from any straight trumpet is approximately 2 DB higher than any re-entrant type with the same input. This is because straight trumpets lack the attenuation from resistance and reflection which is inherent in all re-entrant horns. Will override extremely high noise level, indoors or outdoors.

RACON PATENTED ACOUSTIC TRUMPETS are made of Racon Acoustic cloth processed by a patented method which gives a non-vibratory wall, thereby increasing the output of the horn without loss due to wall vibration. Supplied for indoor use (DeLuxe type) and for outdoor use (Stormproof type)—guaranteed for life in all kinds of weather and temperature.

METAL TRUMPETS are made of heavy gauge aluminum spinning and cast aluminum throat sections with rolled beaded edge.

UNBREAKABLE TRUMPETS are made of heavy gauge aluminum spinning, reinforced and damped with Patented Racon Acoustic Material to prevent wall vibration.

\section*{RE-ENTRANT TRUMPETS}

A compact trumpet of the double re-entrant type, made to occupy a small space, yet having a long air column and delivering highly concentrated sound with the greatest efficiency over long distances. Threaded to take all sizes of PM units.

ALL RACON RE-ENTRANT SPEAKERS have base and inside tone arm made of aluminum castings, outside bell of heavy gauge aluminum spinning, and center reflecting section of RACON ACOUSTIC material to avoid resonant effects prevalent in all metal reflecting surfaces. Sturdy construction makes them practically abuse-proof.

Finished in wrinkle or flat color.

RE-ENTRANT SPEAKER ACCESSORIES

8tock No. TB-150

RE-ENTRANT SPEAKER SWIVEL BRACKET - a three-legged base and ratchet for mounting Reentrant Horns on wall or truck roof. Base is made of bronze casting, pipe and ratchet connection of steel. Overall height \(9^{\prime \prime}\).
Code RAMUG Stock No. TB-150 List Price \(\$ 4.00\)
WATERTIGHT REAR HOUSING-for enclosure of driver unit and transformer when used. Will fit all Re-entrant Horns.
Code ROGET Stock No. CO-80. List Price \(\$ 2.50\)

Stock No. UB-1A

Stock No. RB-IB

U-BRACKET AND SWIVEL RATCHET MOUNT. INGS-choice of either of these mountings will be supplied, on request, with any of the Re-entrant Trumpets listed above. No additional charge.

Specify stock number when ordering:
Stock No. UB-1A-U-Bracket Mounting
Stock No. RB-1B-Swivel Ratchet Mounting

\section*{CELLULAR HORN}

A new type of cellular horn for operation between 195 and 12,000 cycles, with an angular distribution of \(60^{\circ}\)

Made only in blocs of 4 cellsof Racon unbreakable material, having heavy aluminum throat castings and unbreakable bell sections.
Overall length \(42^{\prime \prime}\). Total bell opening \(14^{\prime \prime} \times 14^{\prime \prime}\). Weight 18 lbs.
Code: RAGIN Stock No. QB-641-C List Price \(\$ 120.00\) Cellular Horn without unit

\section*{RADIAL RE-ENTRANT SPEAKER}

A \(31 / 2\) foot re-entrant type horn designed to project sound over a complete circumference of \(360^{\circ}\), distributing the sound with an even intensity. For all sound installations where complete coverage is desired.

Base and tone arm made of heavy aluminum castings, center defiector and deflecting bells made of RACON ACOUSTIC material to prevent all resonant effects. Material storm-proofed and guaranteed against all weather conditions. Brass loose couplings for easy unit connection.

Uses standard RACON Units.
Code: RADAK Stock No. SR-35-R List Price \(\$ 40,00\) Width \(17^{\prime \prime}\)-Height \(15^{\prime \prime}\)-Weight 7 lbs.

\section*{MONITOR AND INTERCOM SPEAKER-CONETYPE}

A compact \(4^{\prime \prime}\) cone speaker designed for voice and excellent
 music reproduction. Mounted on a small base in a steel case and completely enclosed with protective wire grill. For use where quality combined with small size is a requirement because of space limitation or esthetic appearance.

Overall dimensions: \(51 / 4^{\prime \prime}\) diameter. \(23 / 4^{\prime \prime}\) deep. Wt.: 20 oz . Complete with cone speaker.
Code: RYBOB Stock No. CS-4N List Price \(\$ 10.00\)

\section*{AUDITORIUM HORN}

A 7 foot length horn folded to occupy a space \(211 / 2^{\prime \prime} \times 261 / 2^{\prime \prime} \times 231 / 2^{\prime \prime}\).

An excellent horn for auditoriums, small theatres, portable talkie equipment, etc., and for mounting in the proscenium arch of a large theatre. Small in size and light in weight.

A departure in standard horn design, giving excellent musical as well as speech reproduction out of all proportion to the small size of the horn.
Code: ROOST Stock No. FL-513-B List Price \(\$ 66.00\) Horn only-Delaxe Type for indoor use-wt. 25 lbs. Code: RETRO Stock No. FL-513-A List Price \(\$ 88.00\) Horn only-Stormproof Type-guaranteed for all climates and weather-wt. 29 lbs.

\section*{BALLTYPECONE SPEAKER HOUSING \\ DESIGNED FOR \(6^{\prime \prime}\) OR \(8^{\prime \prime}\) CONE}

A new type ball speaker to be used where directional sound is required and where the standard type of cone projections clash with the surround ing furnishings or architecture.

Will project a beam at an angle of \(45^{\circ}\).

Will operate with \(6^{\prime \prime}\) and \(8^{\prime \prime}\) cone speakers, and can be used for paging systems (voice reproduction) as well as for musical reproduc-
 tion.

Made of steel, with hanging lamp fixture. Finished as desired.
Ball Diameter Weight Code Stock No. List Price For \(6^{\prime \prime}\) Cone

\end{tabular}

\section*{D WARF RE-ENTRANT}

A small re-entrant speaker designed for speech reproduction only.

Very highly efficient, using dwarf unit.

Flange around bell for flush mounting.

Complete with unit and transformer housing. Can be supplied
 with ratchet mounting.

Bell Diam. 5"-Depth 21/4" - Weight 24 oz.
Code: REDOX Stock No. DW-9-R List Price \(\$ 27.50\)

\title{
TRU-SONIC SPEAKERS
}

\author{
COAXIAL SPEAKER \\ Living Vibrant Realism
}

The Stephens Manufacturing Company proudly presents its new Series 52 TRUSONIC Coaxial Speakers. Combined in a single assembly are a Low-Frequency unit of the cone type, a High-Frequency unit of the multicellular type and the complementary 2-channel Dividing-Network. By means of this Divid-ing-Network, or electrical crossover, the large cone, specially designed for efficient bass response, receives only the lower portion of the audible spectrum. The High-Frequency reproducer receives the energy carrying the treble tones and dis. tributes them throughout the entire listening area without loss of level. A unique feature is the unusual design, which permits the use of 8 cellular horns in a compact assembly. This provides the widest angle high-frequency distribution available in a reproducer of this size. These factors, and others, make the TRU-SONIC Coaxial Speaker the ideal for AM and FM reception, broadcast station monitoring and sound-motion. picture reproduction.

\section*{SPECIFICATIONS}

\section*{Electrical Characteristics}
(1) Power input: 20 Watts
(2) Crossoover Frequency: I200 C.P.S.
(3) Horizontal distribution angle: 80
(4) Vertical distribution angle : 40
(5) Field Excitation:
a) 5.5 lb . copper coil 30 watts
b) 6 lb . Alnico 5

\section*{Physical Characteristics}
(1) Overall Diameter: \(151 / 2^{\prime \prime}\)
(2) Baffle Opening: \(131 / 2^{\prime \prime}\)
(3) Depth behind mounting Panel \(10^{\prime \prime}\)
(4) Net Weight: 30 Pounds
(5) Cabinet Dimensions: \(26^{\prime \prime}\) wide by \(15^{\prime \prime}\) deep by \(34^{\prime \prime}\) high.

Licensed under Western Electric Patents

\section*{SINGLE SPEAKER}

\section*{- Model 52L Single Speaker Realism From a Single Unif}

A new presentation is this powerful \(15^{\prime \prime}\) speaker with curvilinear designed, highly efficient, seamless moulded and moisture-resistant cone. Suspension compliance has been carefully calculated to promote ideal piston-like action of the diaphragm. Effective driving area is approximately 125 sq. inches. Voice coil is 2 inches in diameter, treated with a refined temperature-resistant varnish, and wound with highly conductive copper wire.

\section*{SPECIFICATIONS}

\section*{Electrical Characteristics}
(1) Power Input: 20 Watts
(2) Field Excitation:
(a) 4 pound copper coil: 20 watts
(b) 4 pound Alnico 5 Permanent Magnet
(3) Input Impedance: 160 hms
(4) Field Resistance: 1700 Ohms or to specification
(5) Cone Resonance: 55 Cycles

Physical Characteristics
(1) Overall Diameter: \(151 /{ }^{\prime \prime}\)
(2) Baffle Opening: 131/2"
(3) Depth behind Mounting Panel: \(81 / 2^{\prime \prime}\)
(4) Net Weight: 25 Pounds
(5) Mounting Dimensions: RMA Standard
Licensed under Western Electric Patents.

\section*{A NEW HIGH IN FIDELITY}

In order to provide a deluxe presentation for the most discriminating audience, engineers of the Stephens Manufacturing Company have designed the TRU-SONIC Separate 2-W ay Speaker System. Space requirements are greater than for the TRU-SONIC Coaxial unit, for in order to extend the tone range and permit the ultimate in realism, larger physical proportions are necessary.

\title{
TRU-SONIC
}

HIGH - FREQUENCY UNITS and SPEAKERS

\section*{Tru-Sonic High-Frequency Units Make} - Sound-Reproduction History

As generators of acoustic power in the upper end of the audible spectrum, the TRU-SONIC High-Frequency units present the perfect blend of sound-engineering design and listener preference. Acoustic response, in combination with L-F units, has been adjusted to levels picked as being most pleasing to a large majority of selected listeners. Actual listening tests on scores of representative groups of living people have dictated the design of the acoustic proportions in the critical compression chamber.

- Type 40 H-F

- Type 15 H-f Unit

\section*{- HORNS}

Acoustic-loading and beam dispersion is accomplished by the complementary wide-angle 8 cell horns of the 400 and 800 series supplied as standard. Where special conditions call for wider angle distribution, horns of additional cells are available on request.

Model 40-424HX H-F Speaker SPECIFICATIONS-Type 40 Unit

\title{
Tocal Athe THE WORLD'S LOUDEST LOUD SPEAKER
}

1-18" horn
1-Vocal-Aire driver unit
1-20-watt amplifier
l—air compressor
l-microphone
add it up and it equals the audio outpat of a 500 -watt system.

Compressed air and the patented Voice-Valve do the job.

VOCAL-AIRE is something new in sound . . . the answer to the outdoor sound problem. . . it utilizes natural forces to project speech over large areas . . . it can be heard one to one-and-ahalf miles under average conditions . . . has been heard distinctly and with complete intelligibility at 5 to 10 miles under ideal conditions . . . it is a natural for any open-air set-up.
It doesn't blast your ears even at close range and has a remarkable \(360^{\circ}\) coverage with the \(18^{\prime \prime}\) horn . . . only 10 db drop-off directly in back of the horn . . . for use in stadiums, tracks, fairs, construction projects, railroad yards and on sound trucks for portable use.
It is now used by the U. S. Signal Corps, Floyd Bennett Field, New Haven Fire Department, Yale Bowl, University of Missouri, City of Huntingdon, W. Va., C. J. Dick Towing Co., Houston, Texas, and many others.

High intelligibility, penetrating clarity and full control of volume from zero to maximum make it ideal wherever voice must cover large areas over local noise . . . and simple to install . . . only two driver units needed to cover the huge Yale Bowl at New Haven.

Complete system weighs less than 250 pounds, easily portable. Systems available for \(115 / 230 \mathrm{v}\). AC, l-phase \(50 / 60\) cycle: \(220 / 440\) v. AC، 3 -phase, 60 cycle; or gas engine drive with built-in compressor and generator for portable use.

Easy to demonstrate... no need to string up multiple speakers and run long wire lines.
Write tor \(\operatorname{FREE}\) descriptive literature.
Sold exclusively through wholesale distributors of sound equipment.
National Sales Representatives
Hutchins Industries, Inc.
325 West Huron St.
Chicago 10, Ill.

\section*{VOCAL-AIRE IS MANUFACTURED BY DILKS, INCORPORATED, NORWALK, CONN.}

1

The UNIVERSITY line of super power speakers, reflex projectors, driver units, radial horns, and specialized marine and railroad speakers has a world-wide reputation for quality. If includes speakers with a consistent range of two miles, speakers that continue to function in a bath of live steam under 90 pounds pressure, and speakers that are explosion proof. All UNIVERSITY speakers are unconditionally guaranteed for a period of one year.

The model TS-10 adjustable tripod illustrated above provides a 10 ft . maximum height for any University trumpet or a 6 ft . maximum height for superpower speakers models \(\mathrm{B}-6, \mathrm{~B}-6 \mathrm{M}\) or 4 A 4 . Special fittings can be supplied for model B-12. Proof against \(50 \mathrm{~m} . \mathrm{p} . \mathrm{h}\). wind. Single lever control varies height. Folded length less than 4 ft. ............................................................................Price \(\$ 40.00\)

\section*{SUPER POWER}

\section*{SPEAKERS}

UNIVERSITY siper power speakers are multi-driver, multiple sound channel types. In the model B-12, twelve PM-dynamic driver units are mounted circumferentially on a rugged "tone chamber" casting. This casting provides individual acoustic paths from each driver unit to a mixing chamber at the center of the casting. The model B-6 is of comparable construetion to the B-12, but it is powered by six driver units. The patented design of the mixing chamber and the acoustic paths minimizes high frequency cancellation.

For marine application, the B-6 is available in a modified version, the model B-6M. This speaker differs from the B-6 in that it has a reflex air column, is made entirely of heavy aluminum castings, and is only \(71 / 2^{\prime \prime}\) deep. Designed for maximum compactness, its reflex construction makes it waterproof.

The model 4A4 has four driver units mounted on the back of a heary cast mounting plate. Each of the drivers opens into a reflexed air column on the front of the mounting plate. The four air columns feed into a common bell.

These speakers are completely weatherproof, and capable of sending sound with high intelligibility to any part of the largest outdoor installations. Power ratings are conservative, and stated projection ranges are often exceeded in actual operation. All of these speakers are mounted by swivel joints on "U" brackets an that they may be swung vertically through approximately \(120^{\circ}\) and locked in any position.

For portable use, the " U " bracket is mounted on the Model TS-10 tripod by means of a locking collar which allows the speaker to be rotated horizontally through \(360^{\circ}\). For permanent installation, the speaker may be used with a tripod or held in place by the " U " bracket alone. Type B and O horns also available with B-6 or B-12 for music. Type B, 24" diam., 100-6000 cps. Type C \(30^{\prime \prime}\) diam., 85-6000 cps.

UNIVERSITY pioneered in making reflex horns available to the public address industry. The reflex horn represents a major advance over the straight horm in that it provides compactness and protection from the weather without any sacrifice in performance. This is accomplished by folding the air column back on itself twice. Close attention to the dimensions at the "bends" and an exponential taper modified on the basis of intensive research give these units a response equal to that of straight horns.
Heavy gauge metal fabrication and corrosion resistant finishes on both horns and hardware enable these units to withstand any degree of outdoor exposure or vibration, and rubber damped rims remove every trace of mechanical resonance. Standard UNIVERSITY " U" bracket mountings are provided to simplfiy installation.

Accessories include Model TS-10 tripod, PMA adapter, and 2YC connector.
The model GH , with an air column of six feet, has a low frequency cutof well suited for the reproduction of the finest symphonic music. The model LH, with a somewhat higher cutoff is designed for general applications, and particularly recommended for music reproduction. Model PH will serve for both music and speech where a smaller horn is required, and the SMH finds wide application for high clarity reproduction of speech.

Model 2YC Connector Use with two drive Use with two drive
units to make 50 units to make 50 watt speaker of any UNIVERSITY trumpet or projec-
tor. Price \(\$ 10.00\)

UNIVERSITY breakdown-proof driver units are PM-dynamic types made with the highest quality Alnico magnets and one-piece molded phenolic diaphragms. Exclusive UNIVERSITY "rim centering" construction eliminates aligning pins and permanently centers the voice coil and head assembly in a much closer magnetic gap, so that higher conversion efficiency is attained and misalignment due to shock or vibration is almost impossible. The entire assembly is enclosed in an hermetically sealed housing for complete
protection from outdoor exposure.
The model PAH has the largest magnetic structure and, therefore a \(\mathbf{3 5} \%\) higher conversion efficiency and a better low-frequency response than the SAF or the MAH. Both the PAH and the SAH are suitable for higher power installations or for use involving occasional over-load hazard. The model MAH will give the most economical service where the power requirements are not over 12 watts. Note model 2 YC connector above.

These speakers are reftex air column horns with buit-in hermeti cally sealed driver units, Models CR, \(1 B 8\), and M1L are directional and models \(R C R\) and \(I B R\) have radial deflectors for uniform \(360^{\circ}\) dispersion. 'lhey are capable of continuous use for intercommuniation on shipboard, docks, loading platforms, terminals and industrial plants.

Models CR and RCR can handle 18 watts of input power contimuously, so that they are useful for high power alarm or annoumeing gystems. Models IB8 and IBR have a continuous power
handling capacity of 12 watts, which recommends them for paging or announcing in noisy industrial areas. The MIL with a 5 watt continuous power capacity is an efficient intercommunication speaker.

While capable of producing adequate volume with low power, these speakers can handle morc power than any other speaker of comparable size and weight. Modernization of old sound systems is easily accomplished by replacement of obsolete speakers with these models. Standard voice coil impedances permit installation without changes in the existing line or amplifier.

SUBMERGENCE, EXPLOSION, SHOCK, AND VIBRATION PROOF MODELS UNAFFECTED BY LIVE STEAM

UNIVERSITY submergence and explosion proof speakers are reffex air column horns built of rugged castings and equipped with ALNICO V PM-dynamic driver units.

The model MSR has a radial deflector for uniform \(360^{\circ}\) dispersion, and the model MM-2TC is a directional speaker. Both have hermetically sealed housings with built-in driver units and space for volume control and line matching transformer. Tapped holes are provided in the housings for access to the volume control and for receiving a conduit.

Models MM-2 and MM-2F are directional speakers with built-in, hermetically sealed driver units. The MM-2 has a swivel jointed mounting bracket which allows it to be mounted anywhere, tilted in any direction, and locked in that position. The MM-2F has a flanged rim for flush mounting in panels or bulkheads.

These speakers will function under water! They will drain automatically in their operating position, and provide uninterrupted service with a minimum of maintenance. They will operate efficiently on ships, docks, in railroad yards or locomotive cabs, in laundries, mines, and mills, wherever there is dirt, salt spray, excessive humidity, explosive dusts, gases, or where live steam is used for cleaning.

\section*{CARRON UNIVERSAL FIELD COILS}

Check maximum and minimum dimensions carefully. The winding must be physically close to the original. We have allowed a maximum variation of \(1 / 8\) inch spacing from coil to core, a variation in width of \(1 / 4\) inch and we suggest that the universal coil selected should have a diameter as close to the original as possible. \(3 / 8\) inch
smaller is the limit for safe operation. All of the wire in our universal field coils is in use at all times. Two resistance ranges are possible. One with the windings in parallel and the other with the winding connected in series. Complete directions furnished with each coil.

VIBRALOC ACOUSTIC PRODUCTS \\ DESIGNED AND BUILT TO AN ACOUSTIC STANDARD . . . AND PRICED ACCORDINGLY
}

\section*{Streamline UNIVERSAL CABINET}

Incorporating Patented ACOUSTICURVE Design.
Ideal for Sound Installations where an attractive cabinet and good tone quality is sought. Dimensional Characteristics ... Plus Natural Reproduction. Sturdy Construction...combining heavy plastic and wood. Complete with speaker mounting screws.

\section*{Madern Design WALL BAFFLES}

Designed and built for the wired music and phonograph trade... For Good Music Distribution.
Sturdy construction . . . combining heavy plastic and wood. Complete with master baffle and speaker mounting screws.

\section*{Pressure Contralled LOUDSPEAKER ENCLOSURES}

VIBRALOC acoustic pressure controlled loudspeaker enclosures achieve the ultimate in wide range, high level sound reproduction. Anti-Feedback characteristics contribute to unusual dimensional qualities. Original and basic Tri-angular design and small space requirements offer numerous and practical installation methods. Natural Volce Reproduction and True Tone Music Distribution may be accomplished with below average, or so-called inefficient speakers, when used with VIBRALOC enclosures. Thousands of installations have proved these baffles to be outstanding in high noise level installations, such as Roller and Ice Skating Rinks, Bowling Alleys, Drive-In Theaters, Baseball Parks, Factories, Hotel Lobbies, Dance Pavilions, etc.

Voice coil impedance 3.5 ohms at 400 cycles. All speakers are less transformer, with transformer mounting bracket.

\section*{CRESCENT AUTOMATIC RECORD CHANGER}

Physical size, \(153 / 4{ }^{\prime \prime} \times 121 / 2^{\prime \prime}\), has noiseless mechanism, crystal cartridge and can be disturbed during any operating cycle without damage thereto. The CRESCENT automatic record changer, while one of the newcomers in the field, is already being used as a component by many of the large set manufacturers in their combination console sets.

Finished in neutral biege Hammeroid (a brown gloss) and has plenty of eye-appeal. Designed to operate on 110 volts 60 cycles A. C. current.

CRESCENT automatic record changer Model C-200 will handle twelve \(10^{\prime \prime}\) or ten \(12^{\prime \prime}\) records.

Optimum Audio Watts-gives the range of audio input power in wats that can be safely dissipated by the voice coil structure before overheating will ocear and cause meriancal
applies to applies to comparing Permanent Magnet with Electro-Dynamic speakers. This rating takes into account the combined etfect of Magnet, Pole piece, Air gap, Voice Con, etc. For instance, two Utah speakers rated at 1.000 each would be equal to each other in magnetic efficiency regardless of size or type; while a speaker
rated at . 00 would be only half as efficient and one at 2,000 would be twice as efficient, etc.
The Index of Magnetic Efficiency. more than any other single factor. indicates the actual value of the speaker to the user as to conversion of electrical energy to sound versus cost.
Maximum Field Volts-Milliamps-provides information as to the proper field excitation for Electro-Dynamic speakers. The voltages given are measured directly across the speaker field and the current in milliamps is measured in series with the speaker feld.
Bucking Coils-are an integral part of all Utah Standard Group. Electro-Dynamie speakers. The bucking coils design has been improved to give greater
Field Colls and Pot Structure-of all Utah Standard Groups, Electro-Dynamic speakers have been designed to give maximum sensitivity as will be noted
Transformer mounting Brackets-are provided on the smaller speakers, and the frame of the larger speakers are punched to provide for mounting suitable output or line transformers:
}

\section*{HIGH FIDELITY PUBLIC ADDRESS SPEAKERS}

Operadio Manufacturing Co. pioneered in the field of quality Public Address Speakers and became one of the largest producers of loudspeakers in the world. Operadio engineers are engaged in constant research to improve the already high level of Operadio performance. Now, a complete new line of Operadio high fidelity, permanent magnet speakers is available for every application.

All models are boxed in compact, individual, shipping cartons. All speakers have transformer mounting brackets.

\section*{RADIO REPLACEMENT SPEAKERS}

The engineering and production experience, gained by Operadio in the building of millions of speakers for radio set manufacturers, qualifies this company as the logical source for Radio Replacement Speakers. Radio repairmen recognize this fact, appreciate the outstanding quality and are demanding Operadio Radio Replacement Speakers.

\section*{ALNICO 5-PERMANENT MAGNET SPEAKERS}

\section*{REPLACEMENT SERIES}

This complete line of speakers has been designed especially for the service man, the arnateur, and those requiring lightweight units. The speakers have been engineered to the same high standards of the larger Cinaudagraph units, but are equipped with lightweight magnets such as are generally used in small radio sets, inter-communication systems and centralized sound systems.

\section*{PUBLIC ADDRESS SERIES}

These units are primarily engineered for heavy duty public address service. They are conservatively rated, and are designed to give years of trouble-free service. The efficiency and the tone quality of these units are such that they are recommended for all purposes requiring heavy duty units.

\footnotetext{
\(8^{\prime \prime}\) and \(12^{\prime \prime}\)
Extended Range Speakers

\section*{EXTENDED RANGE SERIES}

Designed expressly for FM and television use, these units are also suitable for all installations requiring good performance to 10,000 c.p.s. Especially recommended for high quality home phonograph reproduction, studio monitoring, and similar wide range installations. These speakers are not recommended for general public address work, because of limited power handling capacity.

\section*{TRANSFORMERS}

These transformers have been designed to work in conjunction with Cinaudagraph speakers. They are conservatively rated, efficient, and match the tubes most commonly encountered. Larger units will be added to the line as materials become more readily available.

\(\ddagger\) Plate impedances of 2,\(000 ; 4,500 ; 7,000\) and 10,000 ohms (No C.T.)
\(\ddagger\) Plate impedances of 3,\(000 ; 5,000 ; 6,600 ; 7,000\) and 10,000 (All C.T.)

}

\section*{VR2 DYNAMIC MICROPHONE}

\section*{A Microphone with a NEW IDEA and a NEW USEFULNESS}

For the first time, the many desirable characteristics found only in several different types of microphones have been combined in a single unit. The VR2 has an easily accessible external adjustment of the most important acoustical reactors in the dynamic microphone. A smooth change from a communication-type response, with a cutoff below 500 c. p. s., through \(a\) flat response to an augmented bass, attained by a simple, positive adjustment.

The response adjustment on the VR2 has a very broad effect and does not introduce narrow peaks. It is different from anything previously introduced.

Complete with \(121 / 2^{\prime}\) cable and plug at microphone providing balanced line. Dull chrome finish. Net wt. less cable, 15 ozs. Hgt. 4". Greatest diameter \(3^{\prime \prime}\).

VR2T Dynamic ( 38,000 ohms), Code: VARIT. List \(\$ 42.15\)
Available on order in 200 or 500 ohms........List \(\$ 42.15\)
(Complete with \(121 / 2^{\prime}\) cable)
VRT Dynamic ( \(30-50\) ohms), Code: VARIA......List \(\$ 39.15\) (Complete with \(121 / 2^{\prime}\) cable)

\section*{D 8 T DYNAMIC}

\section*{MICROPHONE}

THE D8T DYNAMIC MICRO. PHONE has been carefully designed to have a consistent, well-balanced response. It is exceptionally rugged and assures the user of trouble-free service over a long period of time.

The D8T is particularly useful for all types of public address installations, orchestra pick-up, as well as solo work and straight announcing.

The D8T is \(31 / 4^{\prime \prime}\) long, \(2^{\prime \prime}\) in diameter, weighs only 13 ozs. A swivel mounting permits either nondirectional or semidirectional pick-up. Comes complete with 121/2' cable and plug at microphone and \(5 / 8^{\prime \prime} \times 27\) thread for suspension or stand mounting. Platinum Chrome Finish.

\footnotetext{
D8T Dynamic ( 38,000 ohms), Code: DATAH. \(\qquad\) List \(\$ 30.00\)
Available on order in 200 or 500 ohms. \(\qquad\) List \(\$ 30.00\)

D8 Dynamic ( \(30-50\) ohms), Code: DATAL \(\qquad\) List \(\$ 27.00\)
}

\section*{D5T DYNAMIC MICROPHONE}

\section*{IN FOURTH YEAR PRODUCTION}

THE D5T DYNAMIC MICROPHONE is well known. An excellent, diversified-purpose microphone. The dynamic is the most rugged type microphone and its life of trouble-free operation is indefinite. Being a pressure-operated instrument, the response is unaffectod by either a close or distant sound source. The D5T approaches the ideal microphone for general use due to its versatility and dependability. Sensitivity: 52 db below \(1 \mathrm{~V} / \mathrm{bar}\).

D5T Dynamic, 38,000 ohms, Code: DYHTM....................List Price \(\$ 39.00\)
Available on order in 200 or 500 ohms. List Price \(\$ 39.00\) D5 Dynamic, \(30-50\) ohms, Code: DYLOM List Price \(\$ 33.00\)

Moving-Coil, Permanent Magnet Dynamic - Semidirectional Close or Distant Pick-up - Excellent Frequency Response Freedom from Wind Noises - High Output, Low or High Impedance - Immune to Temperature Changes - Minimum Feed-Baci (Flat Response) -Low-Level Mixing • Exceptionally Rugged.

*At 1000 cps using Columbia \(10003-\mathrm{M}\) Test Record and Model TMC transformer
**Worn stylii can be replaced at our factory.
Insures Minimum Record Wear. Performance not affected by climatic conditions. Standard cartridge mounting holes. Semi-permanent stylus.
.003 volt open circuit output at 1000 cps , using Columbia Test Record 10003-M. Transformer TMC (Sub-motorboard mounting) develops 0.1 volt into high impedance amplifier "Phono" input under above test conditions.
TRANSFORMER TMC, Code: CADET...
List Price \(\mathbf{\$ 2 . 5 0}\)

\section*{C6 CRYSTAL MICROPHONE}

EXTREME SENSITIVITY. New crystal driving lever, twice as efficient as previously used, produces twice the voltage output with equal sound pressure.
BROADER RESPONSE. Results of new construction include extension of both low and high end. BASS END IMPROVED. Naturalness insured by improvement in low frequency response. LONGER LINES. By increasing the voltage output, the cable length may be increased proportionately. In laboratory tests, regular cables 250 feet in length have been used with a net voltage sufficient to operate any standard high gain amplifier.
MECHANICAL NOISE REDUCED. Mechanical and stand noise is no longer a factor. The C6 method of crystal mounting reduces mechanical noises by 12 db .
LESS AMPLIFIER AND INDUCED NOISE. The high output of this microphone assures a very desirable signal-to-noise ratio.
SWIVEL HEAD. All angles for semidirectional and nondirectional pick-up are provided by the \(5 / 8^{\prime \prime} \times 27\) (standard) mounting connector.
Complete with \(7^{\prime}\) cable and plug at microphone. Polished chrome finish. Net weight 8 oz Over-all height \(3^{\prime \prime}\). Diameter \(23 / 8^{\prime \prime}\). \(5 / 8 \times 27\) thread provided for suspension or stand mounting C6 Crystal, Code CESIX.

\section*{THE \\ "Clipper" \\ DYNAMIC}

D7 and D7T MICROPHONES equipped with \(121 / 2^{\prime} \mathrm{R} / \mathrm{J}\) cable and Amphenol plug. Chrome finish. 5/8-27 connector. Over-all height, \(21 / 2^{\prime \prime}\). Diameter, \(11 / 2^{\prime \prime}\). Net weight, \(81 / 2\) ozs.
APPLICATIONS: Excellent for communication purposes, airplane use, Marine safety-at-sea installations, police broadcasting, amateur communication, public address, indoor and outdoor installations.

\section*{D4T DYNAMIC MICROPHONE}

A QUALITY, LOW-PRICED, MOVING-COIL MICROPHONE. For general use where clear speech and natural music reproduction is required. This new AMERICAN microphone is a very efficient instrument, having a broad range, from 60 to 7500 c.p.s., and high output of \(-56 \mathrm{db}(0 \mathrm{db}=\mathrm{l} \mathrm{v} / \mathrm{b} a r\) ). The utility value lies not only in the quality and type of response but also in mechanical features, such as light weight (approximately \(101 / 2\) oz.), a full \(180^{\circ}\) vertical angular setting, and positive friction lock at the swivel.
The D4T, high impedance, is equipped with a single-contact, shielded plug. The 50,200 and 500 ohm models are equipped with a two-conductor plug and have a balanced line out.
The D4 raodel is of voice-coil impedance, approximately 30 ohms. Lines up to several hundred feet may be used on all models except the high impedance, where line should be restricted.
The complete assembly includes \(121 / 2\) feet of shielded, rubber-covered cable and shielded plug. Finished in platinum chrome. Standard mounting, \(5 / 8^{\prime \prime} \times 27\) thread.

D4T Dynamic ( 38,000 ohms), Code: DFORT................................................ist Price \(\$ 24.00\)
Available on order in 200 or 500 ohms.
D4 Dynamic ( \(30-50\) ohms), Code: DEFOR. List Price \(\$ 24.00\)
List Price \(\mathbf{\$ 2 1 . 5 0}\)

\section*{D6T DYNAMIC MICROPHONE}

Ideal for general publia address including stage sound-reinforcement, both permanent and portable instailations. It is entirely suitable for playground and athletic field direction, police and amateur broadcasting, and recording.
Net weight, \(13 / 4\) lbs. Packed weight, 2 lbs. Height, \(33 / 4^{\prime \prime}\), diameter \(21 / 2^{\prime \prime}\). Standard \(5 / 8-27\) thread provided for suspension or stand mounting. Finish: Polished Chrome. 12 \(1 / 2^{\prime}\) Shielded Rubber-Jacketed Cable supplied with each microphone.
Typical field calibration for the D6T. A chaice of frequency
characteristics may be had by varying the angle of the microphone to the source of sound. For nondirectional horizontal pick-up, the response is substantially flat

D6T Dynamic ( 38,000 ohms), Code: DIXIT List \(\$ 33.00\) Available on order in 200 or 500 ohms List \(\$ 33.00\) D6 Dynamic ( \(30-50\) ohms), Code: DIXIE List \(\$ \mathbf{3 0 . 0 0}\)

\section*{C7 CRYSTAL MICROPHONES}

The development of the new American Crystal Microphones, Model C7H and Model C7L, represents many features which have been available only in several previous types. The response characteristics have been chosen so that the C7 can be used equally well for recording with a minimum amount of amplifier equalization and also for public address. A new system of coupling the crystal element to the diaphragm is employed which produces a smoother response and \(100 \%\) greater efficiency equivalent to double the output of usual direct drive type of coupling.
High or low impedance may be had in the Model C7. An efficient transformer is used to reduce the inherent high impedance of the crystal generator to standard line impedances. Long lines with negligible losses may be used.

\title{
DHT DYNAMIC HAND-HELD MICROPHONE Shock-proof Diaphragm - Press-to-talk Locking Type Switch Retractable Hanger
}

This compact, sturdy microphone was designed for all applications requiring a dependable hand microphone for voice communication. Small and lightweight, it can readily be concealed in the pa'm of the hand. An Alnico \(V\) magnet, efficient magnetic circuit and newly developed diaphragm and voice coil assembly combine to generate the high output of 56 db below 1 volt per bar for the high impedance model.
Other desirable features are: convenient hanger which retracts into the case of the microphone when not in use; molded plastic diaphragm not affected by heat, moisture or mechanical shock; supplled with five feet of low loss cable; press-to-talk locking type switch for operation of the microphone unit. Additional switch contacts on request.

\section*{CRIA CRYSTAL CARTRIDGE}

CR-1A Cartridge is a high output, wide range unit, which incorporates a number of new developments in cartridge design. High output and improved response are obtained by a unique method
LIST PRICE used to drive the crystal element. The cortridge is supplied with
 pin plug connectors for ease of
assembly into the arm-no soldering iron is required. The needle chuck design incorporates a "locked-in" feature whereby the chuck is prevented from moving when tension or pressure is applied to the needle screw. This feature also insures that the needle socket will remain centrally located in its opening in the cartridge. High needle point compliance and minimum record chatter are thereby guaranteed. The cartridge will operate satisfactorily with any conventional needles; however, its highfrequency response will vary somewhat with the type needle used. Best operation will be obtained with off-set needles using sapphire or precious metal stylii.

New STUDIO "Ribbon" MICROPHONE

\section*{Models R80H—R80L}

\section*{A "Blastproof" Velocity}

\begin{abstract}
Eliminates Feedback Troubles
The finest in microphones, regardless of price. Reproduction is of the very highest type. Excellent for broadcasting, recording and public address. Eliminates feedback troubles. Will not become "boomy" on close talking. An entire orchestra can be faithfully reproduced.

Pick-up angle \(120^{\circ}\) front and back with practically no frequency discrimination. In spite of the wide pick-up angle, feedback is reduced to a minimum.

Not affected by temperature, altitude or humidity. Will operate under any climatic eonditions-indoors or outdoors. Not affected by wind.

Frequency range \(40-14,000 \mathrm{cps}\). Output - 56 db . Complete with switch, (optional), cable connector, and \(25^{\prime}\) cable. Finish - Chrome. Stand thread, Standard 5/8"-27.

> Model List

R80L-200 ohms output...... \(\$ 80.00\) 50 ohms available

\title{
New "RIBBON" MICROPHONE, RBHG—RBLG Automatically Adjusted for Close or Distant Pick-Up A "Blastproof" Velocity
}

\section*{New RSHG—RSLG "RIBBON" MICROPHONES}

Although low in price the RSHG and RSLG are excellent "ribbon" microphones built to Amperite standards. Can be used for P.A. or recording. Feedback very low. Not boomy on close talking-you can shout into it-or pick up an entire orchestra.

Not affected by temperature, humidity or altitude. Not affected by wind.

Output: - 60 db . Frequency response-70 to 8,000 cps. Complete with switch, cable connector, and \(12^{\prime}\) cable. Finish-Baked Enamel. Stand thread-Standard 5/8"-27.

Model RSHG-High impedance \(\$ 32.00\)
Model RSLG-200 ohms output 32.00

50 ohms available. Shipping Weight 8 lbs.

\section*{Amperite 7JH—7JL VELOCITY MICROPHONE "Lapel" Type}

Reproduction is so perfect-you can hardly tell a microphone is working. Free from annoying peaks or mechanical reproduction. Output does not change with any position of the head. It can be concealed in clothing. Will operate under all climatic conditions. Unusually low feedback. Frequency range \(60-7,000 \mathrm{cps}\). Output: - 63 db . Cable length \(25^{\prime}\). Rubber case. Model 7JH-High impedance List \(\$ 32.00\) Model 7JL-. 200 ohms output ..................List 32.00

50 ohms available. Shipping Weight 3 lbs.

\section*{Model LGP—Input Transformer (Cable Type)}

Enables the use of low impedance microphones and cable lengths up to \(5,000^{\prime}\) with amplifiers having high impedance input. Special shielding eliminates hum pick-up. Can be used with 25,50 , or 200 ohm microphones. Out-
 put connects directly into high impedance input of amplifier. Standard grade recommended for speech. Laboratory grade for music: Model LGP—Standard-60 to 2,000 cps. ................................List \(\$ 8.00\)
 Shipping Weight 3 lbs.

\section*{The CONNEAUT}
- The "Conneaut," Model No. 600 , is a new, streamlined, semi directional crystal microphone with relatively high output and wide requency range. Ideal for public address and paging systems, ama teurs' rigs and other communica ion uses. Overall frequency re sponse is exceptionally smooth up to 10,000 e.p.s. and will satisfy the most critical demands for high fidelity performance. The Conneaut is of modern, streamlined design and beautifully finished in bright chrome with lisht blond plastio rille Standard equipment include 5 ft cable and apring protector 5 ft . cable and pring protector Three models are available

\section*{MODEL K-2}
- Because of its smooth, undistorted reproduction and the fact torted reproduction and the fact that it cannot be acoustically overloaded, Astatic Model K-2 Crystal Microphone is favored and extensively used. In this model Astatic provides a small size, dual diaphragm type crystal micro phone for studio use, recording dance bands, public address instal lations and general applications where quality performance is re quired. With dual crystal unit design, Model K-2 has twice the capacitance of the usual crystal microphone and correspondingly longer cable lengths may be used. Standard equipment includes plug and socket connector and \(25-\mathrm{ft}\) cable. Bright chrome finish.

Astatic Crystal Devices manufactured under Brush Development Co. patents.

\section*{The JT-SERIES}
- Because of its wide range cf usefulness, excellent performance and low price, Astatic JT-Series Crystal Microphones are used extensively for amateur, public address and home recording. JT Series Microphones are available in both wide and voice range modela and, in addition to standard equip. ment, are furnished complete with concentric cable connector, convenient wood handle, interlocking metal base and \(15-\mathrm{ft}\). shielded cable. Wood handle may be removed and microphone used on foor stand. Output level -52 db provides ample reserve for use with high gain amplifiers. Opalescent gray with bright chrome grille.

\section*{Brush Miniature Recivers}

\author{
Model BA-201 Receiver
}

The model BA-201 is a miniature radio insert earphone, designed for use with personal vest-pocket radio receivers. Its small size, ( \(13 / 16^{\prime \prime}\) diameter and \(5 / 16{ }^{\prime \prime}\) thick) and its exiremely light weight, ( \(1 / 402\).) makes it most comfortable to wear with any standard ear mold. The light weight, 'Bimorph"* crystal drive element insures uniform response and high sensitivity. Normal loudness results when the receiver is driven with only 1 volt and a power requirement of 10 microwatts. Due to its rugged construction, a maximum of 50 volts may be applied without damage to the receiver. No parts to wear, loosen, or become defached.
Furnished in flesh color or black as standard, substantial quantities can be supplied in any anodized color to match your receiver.

\title{
Cardioid Unidirectional Microphones
}

\author{
NEW CARDYNE DYNAMIC \\ E-V Mechanophase* Principle gives true Cardioid performance . . . smooth, wide-range Response . . . High Output
}

New, rugged, single-head moving-coil construction. Virtually eliminates unwanted sounds . . gives you the sound you want, with greater definition and fidelity. Substantially reduces background noise and reverberation effects. Increases effective working distance from microphone. Stops feedback. Permits increased loudspeaker volume. Simplifies sound installations. Provides extremely accurate pick-up and reproduction of music and speech, indoors and outdoors.
New E-V Mechanophase* principle of unidirectivity gives wide-angle pick-up at front of microphone. Dead at rear. New E-V Acoustalloy diaphragm insures wide flat response, withstands extremely severe operating conditions. Used for the most exacting sound pick-up work, in studio and remote broadcasting, disc and film recording, public address and communications.

Trim, modern functional design, finished in rich satin chromium. Tiltable head. Built-in cable connector. Internal shock-absorber mounting. "On-Off" switch. \(5 / 8\) "-27 thread. Output level: 53 db below 1 volt/ dyne \(/ \mathrm{cm}^{2}\). Voltage developed by normal speech .0024 volt. Equipped with 20 ft . shielded cable. Available in \(50,250,500\) ohms impedance or Hi-Z (direct-to-grid, 25,000 ohms). Low impedances balanced to ground. Size \(21 / 2^{\prime \prime} \times 31 / 2^{\prime \prime} \times 9^{\prime \prime}\) including stud. Net weight, \(2^{1 / 2} \mathrm{l}\) lbs.

Frequency response, substantially flat, \(40-10,000\) c.p.s.

\section*{NEW CARDAX CRYSTAL}

\section*{For the first time, a Cardioid Crystal Microphone with Dual Frequency Response and Relatively High Output}

Easily solves everyday sound problems. New E-V Mechanophase* principle provides true cardioid unidirectional performance and relatively high output. Wide angle front pick-up. Dead at rear. Exclusive E-V Dual Frequency Response Selector gives you flat response for high fidelity voice and music pick-up, or rising characteristic for extra crispness of speech.
The Cardax is especially valuable in overcoming acoustic feedback, background noise and reverberation. Simplifies microphone and speaker placement. Permits greater loud-speaking volume levels. Highly useful for soloist or orchestra, for single speaker or group work-in public address, recording, remote broadcast, communications, paging and dispatching.
Output level: wide range high fidelity (Selector screw OUT) : 57 db below \(1 \mathrm{volt} / \mathrm{dyne} / \mathrm{cm}^{2}\), open circuit: wide range rising characteristic (Selector screw IN): 48 db below 1 volt \(/ \mathrm{dyne}^{2} / \mathrm{cm}^{2}\), open circuit. Convenient, compact size for easy portability. Smartly styled and finished in rich satin chromium. High capacity, moisture sealed crystal. Tiltable head. \(5 / 8\) "-27 thread. Built-in cable connector. "On-Off" switch. Rugged construction assures dependable service. Equipped with 20 ft . shielded cable. Size \(21 / 2^{\prime \prime} \times 27 / 8^{\prime \prime} \times 614^{\prime \prime}\) including stud. Net weight, \(13 / 4 \mathrm{lbs}\).

\end{abstract}

\section*{Model 630—High Fidelity, High Output Dynamic}

Finer performance than ever . . . in a moderatey priced moving-coil dynamic! E-V Acoustalloy diaphragm provides exceptionally smooth response from \(40-9000\) c.p.s. Assures high quality reproduction of speech and music, indoors and outdoors. Compact, rugged . . . withstands heat, humidity and other severe operating conditions. Tilting head for direntional or non-directional use. Buittin cable conncctor. \(5 / 8\) " 27 thread. "On-Off" switch. Widely used in all types of applications. Highest purity pressure-cast case, finished in lustrous satin chromium. Output level 53 db below 1 volt \(/ \mathrm{dyne} / \mathrm{cm}^{2}\). Equipped with 20 ft . shielded cable. Net weight, \(11 / 2\) lbs. Available in Hi-Z (direct-to-grid, \(25,000 \mathrm{ohms}\) ), \(50,200,250\), or 500 ohms impedance. Low impedances balanced to ground.
Model 630-C. List Price
\(\$ 32.85\)

Model 600-D_Widely Used Hand-Held Speech Dynamic Specially designed for clear, crisp speech transmission in communications, public address, call systems, and recording. Frequency response, substantially flat, \(100-6000\) c.p.s. Gives higher articulation, provides more usable power level, and is less fatiguing to the listener. Output level: 55 db below 1 volt \(/\) dyne \(/ \mathrm{cm}^{2}\). High impact black phenolic case. E-V Acoustalloy diaphragm. Extremely rugged. May be used indoors and outdoors in any kind of weather. Withstands temperature from \(-40^{\circ}\) to \(+185^{\circ}\) F. Press-to-talk switch operates microphone and relay simultaneously. Panel mounting bracket on rear of case. Equipped with 6 ft . shielded cable. Size \(2 \frac{1}{4} 4^{\prime \prime} \times 2^{\prime \prime} \times 4^{\prime \prime}\). Net weight, 9 ounces. Available in Hi-Z (direct-to-grid, 25,000 ohms), \(50,200,250\) or 500 ohms impedance. Low impedances balanced to ground.
Model 600-D. List Price .
\(\$ 30.10\)
Mode! 600-DL. With switch lock. List Price.
\$31.75

\section*{Model 605-Durable, General-Utility Dynamic}

A natural leader in the low-priced field. Attractive-dependablehighly satisfactory for general sound work, paging and call systems, dispatching, recording, communications. Frequency response 50 7500 c.p.s., substantially flat. Output level 57 db below 1 volt/dyne/ \(\mathrm{cm}^{2}\). Exelusive E-V Acoustalloy diaphragm. Pressure cast case. with \(22^{\circ}\) fixed tilt. \(5 / 8^{\prime \prime}-27\) thread. Built-in cable connector. Satin Chromium finish. Net weight, 12 ounces. Available in Hi -Z (direct-to-grid, 25,000 ohms), 50,200 , or 250 ohms impedance. Low impedances not balanced to ground.
Model 605-8. With 8 ft . cable. List Price . . . . . . . . . . . . . . \(\mathbf{\$ 2 1 . 9 0}\)
Model 605-20. With 20 ft. cable. List Price . . . . . . . . . . \(\mathbf{\$ 2 3 . 5 0}\)

\section*{Model 610-Modern, Low-Priced Dynamic}

Outstanding quality and value. Adds smartness to economical public address and paging systems, ham rigs, or similar installations. Fine reproduction of voice and music. Compact, convenient to use. Upright pressure cast case has \(15^{\circ}\) fixed tilt. Finished in rich satin chromium. Ruggedly built for durable service, indoors and outdoors. E-V Acoustalloy diaphragm. Frequency response, substantially flat 50.8000 c.p.s. Output level 53 db below 1 volt \(/\) dyne \(/ \mathrm{cm}^{2}\). Built-in cable connector. \(5 / 8^{\prime \prime}-27\) thread. Net weight \(13 / 4 \mathrm{lbs}\). Available in \(\mathrm{Hi}-\mathrm{Z}\) (direet-to-grid, 25,000 ohms), 50,250 , or 500 ohms impedance. Low impedances not balanced to ground.
Model 610-8. With 8 ft . cable. List Price.
. \(\$ 26.00\)
Model 610-20. With 20 ft . cable. List Price. \(\$ 27.50\)

\section*{Model 910-High Quality Crystal Microphone}

Deluxe appearance and performance-at low cost. Smooth, wide-range response, and high output assure fine reproduction of voice and music. Suitable for economical public address, paging, amateur communications. Compact, easy to handle and use. Ruggedly built for durable serv-
 doors. Upright pressure cast case has \(15^{\circ}\) fixed tilt. Satin chromium finish. Built-in cable connector. \(5 / 8^{\prime \prime}-27\) thread. High capacity, moisturesealcd crystal. Frequency response, substantially fat, \(50-8000\) c.p.s. High impedance. Outpüt level 40 db beluw 1 voli/ dyne/ \(\mathrm{cm}^{2}\). Net weight \(1 \frac{1}{2}\) lbs.
Model 910-8. With 8 ft . cable. List. . \(\$ 19.50\) Model 910-20. With 20 ft . cable. List. \$21.00

\section*{Model 902 COMET-Combination Crystal Microphone} and Stand

Modern, air-flow design and fine performance in a unique low-priced combination. Microphone and stand are functionally integrated into one unit, and perfectly balanced. Made of high impact, non-breakable molded butyrate plastic,
 in deep lustrous gray.
Light weight. Easy to use as a hand microphone. . . or stands firmly on its base. Smooth, wide-range response and high output. Excellent reproduction of speech and music, for home recording, small public address systems, paging, and amateur radio communications. High capacity, moisture-sealed crystal. Frequency response, substantially flat, 70-7000 c.p.s. Hi-Z. Output level: 48 db below 1 volt/ dyne \(/ \mathrm{cm}^{2} .71 / 2 \mathrm{ft}\). shielded cable. Net weight, 15 ounces.
Model 902. Comet. List Price . . . . . \(\$ 13.25\)

\section*{Model 905-Crystal Microphone}

New value leader! Same design as the Model 605 Dynamic. E-V engineered response gives quality reproduction of voice and music. Fine choice for low-cost public address, paging and call systems, amateur communications indoors and outdoors. Ruggedly built. Frequency response, substantially flat, \(50-7500\) c.p.s. High impedance. Output level: 54 db below 1 volt \(/\) dyne \(/ \mathrm{cm}^{2}\). High capacity moisture sealed crystal. \(22^{\circ}\) fixed tilt. \(5 / 8-27\) thread. Built-in cable connector. Satin chromium finish. Net weight 11 ounces.
Model 905-8. With 8 ft . cable. List. . \(\$ 13.25\)
Model 905-20. With 20 ft . cable. List \(\$ \mathbf{1 4 . 8 5}\)

\title{
No finer choice than Eleaformore Microphones \\ \\ Differential* \({ }^{*}\) \\ \\ Differential* \({ }^{*}\) \\ \\ Velocity
} \\ \\ Velocity
}

Electro-Voice close-talking, noise-cancelling Differential* microphones are specially engineered for maximum intelligibility speech transmission in high noise fields. For effective operation, they should be worked to closely within \(1 / 4^{\prime \prime}\) to \(3 / 8^{\prime \prime}\).
By the Differential principle, ambient or distant sound is fed into dual apertures in correct phase relationship to provide virtually complete cancellation. Only the speech that originates close to one of the apertures is fully reproduced. Average discrimination against noise is approximately 20 db (100:1 in intensity).

\section*{Model 606 DIFFERENTIAL* DYNAMIC}

Effectively used in airport control towers, police dispatching, special events broadcasting, close-talking public address, and high noise industrial applications-indoors and outdoors. Through exclusive E-V DifferenTisl* principle, surrounding or distant sounds are cancelled out. Transmitted speech gets through clearly and completely. Frequency response, substantially flat \(100-6000\) c.p.s. Outresponse, substanitaly fat \(100-6000 \mathrm{c}\). p.s.
put level: 57 db below 1 volt \(/\) dyne \(/ \mathrm{cm}^{2}\). E-V Accoustalloy diaphragm. Withstands severe service. Built-in cable connector. Pressure cast metal case, finished in satin chromium. Head at \(22^{\circ}\) fixed tilt. \(5 / 8^{\prime \prime}-27\) thread. Net wt., 12 ounces. Available in Hi-Z (direct-to-grid \(25,000 \mathrm{ohms}\) ) 50,200 , or 250 ohms. Low impedances not balanced 10 ground.
Model 606-8. With 8 ft. cable. List Price . . . . . . . . . . . . . . \(\$ 32.50\)
Model 606-20. With 20 ft. cable. List Price . . . . . . . . . . \(\$ 34.10\)

\section*{Model 602-Hand-H eld DIFFERENTIAL* DYNAMIC}

Close-talking, noise-cancelling speech microphone for convenient use where ambient noise is 100 db or more. Assures high articulation. Especially suitable for marine, industrial and emergency communications, high power sound projection, and for speech in any windy, wet or extremely hot or cold location-indoors or outdoors. Frequency response, substantially flat, 100-6000 c.p.s. Output level: 55 db below I volt/dyne/ \(\mathrm{cm}^{2}\). E-V Acoustalloy diaphragm. High impact phenolic case. Press-to-talk switch, operates microphone and relay control circuit. Panel mounting bracket. Size \(2 \frac{1}{4} 4^{\prime \prime} \times 2^{\prime \prime} \times 4^{\prime \prime}\). Net weight, 9 ounces. Equipped with 6 ft . shielded cable. Available in Hi-Z (direct-to-grid, 25,000 ohms) \(50,200,250\), or 500 ohms impedance.
Model 602. List Price.
\(\$ 35.00\)
Model 602-L. With switch lock. List Price . . . . . . . . . . . . . \(\$ 36.65\)

\section*{Model 205-S—Hand-Held DIFFERENTIAL* CARBON}

Close-talking, noise-cancelling microphone designed for maximum intelligibility under intense noise. Used in police, aircraft, marine, industrial and other communications applications; also in high power sound projection. Fits comfortably in the hand. Operates in all positions. High impact phenolic case, with panel mounting bracket on back. Blast proof, waterproof, shock resistant. Wind filter. Withstands temperatures from \(-40^{\circ}\) to \(+185^{\circ} \mathrm{F}\). Interchangeable with conventional carbon microphones. Frequency response, substantially flat from \(100-4000\) c.p.s. Output level: 10 db below 1 volt/ 100 dynes \(/ \mathrm{cm}^{2} .10-50 \mathrm{~m}\), a. button current. Press-to-talk switch actuates button and relay. Equipped with 5 ft . cable. Size \(21 / 4^{\prime \prime} \times 2_{1 / 4}^{1 / 4} \times 4^{\prime \prime}\). Net weight, 8 ounces.
Model 205-S. List Price.
\(\$ 27.35\)
Model 205-SL. With switch lock. List Price . . . . . . . . . . . . \(\$ 29.00\)

Proved E-V design makes the most of the ribbon velocity's high fidelity, bi-directional characteristics. It provides superb pick-up and reproduction of voice and music, for indoor public address, broadcasting and recording. That's why these Velocity Microphones are favorites of well-known orchestras and sound engineers. Response is substantially flat over a wide frequency range. Bi-directional polar pattern gives equal front and back pick-up and longer pick-up range; zero pick-up at sides, top and bottom. Proper tilting and placement of microphone reduce feedback and random noise-permit increased volume levels. Open-type, reflection-free housing. Internal shock absorber mounting. One-piece frame and internal mounting structure give extra ruggedness. Pole pieces scientifically designed to insure adequate high frequency reproduction, and yet provide ample output.

\section*{Model V-3 All Impedance Velocity}

Combines all popular impedances in one microphone. Vari-Z selector on back gives ready choice of \(50,250,500\) ohms, or \(\mathrm{Hi}-\mathrm{Z}\) ( 35,000 ohms). Permits the use of short cables up to 40 feet direct-to-grid, or long lines with matching transformer. Low impedances balanced to ground. Substantially flat response \(40-10,000 \mathrm{c} . \mathrm{p} . \mathrm{s}\). Output -58 db . Locking cradle for tilting microphone. Builtin cable connector. \(5 / 8^{\prime \prime}-27\) thread. Bronze gun metal finish. Size \(33^{1 / 2} \times 2^{3} 4^{\prime \prime} \times 8^{\prime \prime}\) including stud. Equipped with 20 ft . shielded cable. Net weight, \(21 / 2 \mathrm{lbs}\).
Model V-3. List Price.
.\(\$ 54.75\)

\section*{Model V-2 Velocity Microphone}

Similar to the V-3, but without Vari-Z selector. Choice of single standard impedance: \(50,250,500\) ohms, or Hi-Z ( 35,000 ohms). Frequency response, substantially flat, \(40-\) \(10,000 \mathrm{c}\). p.s. Output -62 db . Locking cradle mounting. Built-in cable connector. \(5 / 8^{\prime \prime}-27\) thread. Bronze gun metal finish. Size \(31 / 2^{\prime \prime} \times 2^{3} 4^{\prime \prime} \times 8^{\prime \prime}\) including stud. Equipped with 20 ft . shielded cable. Net weight, \(21 / 2 \mathrm{lbs}\).
Model V-2. List Price
. \$4 1.05
Model V-2A. Same as V-3, but in choice of one standard impedance, without Vari-Z selector switch. Output -58 db . List Price
\(\$ 46.00\)

\section*{Model V-1 Compact, Smaller Size Velocity}

Unsurpassed for excellence of design and performance at such moderate cost. Gives you high fidelity, bi-directional advantages in a compact, smaller size velocity microphone. Highly satisfactory for public adr dress, recording and remote broadcasting. Substantially flat response \(40-9000\) c.p.s. Output -65 db . Locking cradle mounting. Built-in cable connector. \(5 / 8^{\prime \prime}-27\) thread. Satin chromium finish. Size \(23 / 4^{\prime \prime} \times 21 / 8^{\prime \prime} \times 61 / 2^{\prime \prime}\) including stud. Equipped with 20 ft .shielded cable. Net weight, 2 lbs. Available in \(\mathrm{Hi}-\mathrm{Z}\) ( 35,000 ohms), 50,250 or 500 ohms impedance. Low impedances not balanced to ground.
Model V-1. List Price.

\section*{ELECTRO-VOICE FLOOR AND DESK STANDS}

\section*{Model 425-Unique New Floor Stand}

In this amazing new microphone floor stand, all dead weight is eliminated, but full stability retained. Simply press a convenient red button with one finger-and you raise or lower the shaft with same one hand. Automatically locks securely in any position by releasing button. Shaft can be rotated without touching any adjustment device. New type 3-legged die cast base with unique locking feature gives solid support; two adjustable legs permit stand to be placed flush against a wall, pulpit or speaker's stand. Folds conveniently into a small compact package for easy portability. High pressure die casting gives metal base extra strength and beauty. Entire stand is simple to assemble or take apart--easy to transport. No loose ends to worry about. Modern streamline design and rich satin chrome finish make it suitable for the most deluxe installation. Height adjustment, \(37^{\prime \prime}\) to \(66^{\prime \prime}\). 3 -leg spread, \(17^{\prime \prime}\). Net weight, \(7 \not / 2 \mathrm{lbs}\). Shipping weight, 9 lbs.

"556" SUPER-CARDIOID BROADCAST DYNAMIC \\ Solves Difficult Problems in Broadcasting and Recording for Studio or "Remote"
}

GENERAL FEATURES: The Shure " 556 " Broadcast Dynamic Microphone has all the essentials for high-quality broadcasting, recording, and public address work. It has a Super-Cardioid pickup pattern which reduces the pickup of unwanted random noise energy by \(73 \%\). It minimizes room reflection, reduces feedback and background noise, simplifies microphone placement, gives freedom of movement to the performer, assures better pickup and reproduction. APPLICATIONS: Model 556 is constructed and tested to meet the requirements of the broadcast studio, and is held within close tolerances in frequency response and directivity. It may also be used for highquality recording, public address, and similar applications. The swivel allows the head to be tilted to an angle of \(90^{\circ}\). The instrument is unusually rugged and is practically immune to the effects of moisture, temperature and mechanical vibration. HOW THE " 556 " IS CONSTRUCTED: The Shure " 556 " provides a smooth peak-free response from 40 to 10,000 cycles. Rear xesponse is down approximately 15 db . The super-cardioid pattern is achieved in a single unit, due to the "Uniphase" principle-a patented Shure developmont. The transducer unit is provided with a double wind-screen to permit quiet outdoor operation. The unit is spring-suspended inside the microphone case, which in turn is floated in live rubber in the special Vibration Isolation Unit, which eliminates reproduction of vibration transmitted through the stand. Standard \(5 / 8^{\prime \prime}-27\) thread which permits mounting on any Shure desk or floor stand. Adapters to W. E. or RCA stands will be furnished at no charge with this microphone only upon request.

MODEL 55
"UNIDYNE" SUPER-CARDIOID DYNAMIC

\section*{Solves Feedback - Permits Higher Volume}

GENERAL FEATURES: The Unidyne is perhaps the most widely used and publicized microphone in the world for public address. It has been specified by outstanding acoustic engineers for nationally-known artists and important events. A Super-Cardioid Dynamic Microphone, it reduces the pickup of unwanted random noise energy by \(73 \%\). The " 55 " is simple for the sound man to install, regardless of difficult acoustic problems posed by different hall or studio conditions. Loudspeaker levels can be increased without feedback. The Unidyne is practically unaffected by atmospheric conditions; comes in beautiful satin-chrome, streamlined case. AP. PLICATIONS: Models 55A, B, and C are suitable for high-quality public address, broadcasting, all types of recording and similar quality applications. The Unidyne picks up sound from greater distances, facilitates orchestral placement, gives freedom of movement to the performers, permits closer positioning of microphones and loud speakers.
HOW THE "UNIDYNE" IS CONSTRUCTED: The microphone has a speciallydesigned moving-coil element, operating in conjunction with a high-flux magnet providing high efficiency and smooth peak-free response from 40 to 10,000 cycles. The rear response is down approximately 15 db due to the "uniphase" unidirectional acoustic network. The head tilts to an angle of \(90^{\circ}\) to permit aiming at the source of sound for best pickup. A built-in cable connector is provided and a 25 -foot shielded rubber-jacketed cable with microphone plug attached is included. Microphone has standard \(5 / 8^{\prime \prime}-27\) thread and may be mounted on any Shure desk or floor stand.

\section*{"UNIPLEX" CARDIOID CRYSTAL}

\author{
Economical Cardioid Crystal Microphone
}

The Shure "Uniplex" is the only single unit cardioid Crystal Microphone with the patented Shure *"Uniphase" principle. The "Uniplex" is excellent for high-quality public address, communications, all types of recording and similar applications. Frequency response is from 40 to 10,000 cycles over a wide range angle at the front, yet practically unaffected by sound approaching from the rear (rear response down approximately 15 db ). Permits more volume without feedback-simplifies microphone and speaker placementgreatly improves systems using conventional microphones. Output level 63 db kelow 11 voll per bar. Has specially moisture-proofed Craphoil Bimorph Crystal for long life. Swivel head permits aiming at source of sound. Built-in cable connector. Standard \(5 / /^{\prime \prime}-27\) thread. Diameter \(3^{1 / 8 / " . ~ S h i p p i n g ~ w e i g h t ~}\) \(11 / 2\) pounds. Model 730B. 25 -foot shielded cable. Code: RUPEL.
FPatent No. 2,198,424.

MODEL 730B

\section*{707A CRYSTAL}

Quality performance at low cost. Good response characteristics and free from peaks. Suitable for P. A. systems, call systems, amateur 'phone transmitters and similar applications. Finished in Iridescent Gray with highly-polished plating on front grille. Moisture-proofed Graphoil Bimorph Crystal, mechanically isolatecl. High output level of 4.9 .7 db helow I volt per bar at end of 7 -foot cable. Sevea-foot single-conductor shiclded cable with spring connector. Standard 5/s"-27 thread. Diameter \(23 / 8 /\) ". Shipping weight 13/4 pounds. Model 707A. Crystal Microphone. Code: RUDOF.

\section*{SHURE 76B LAPEL MICROPHONE}

Designed for Public Address, lecturing in large halls, broadcasting from portable transmitters, and general uses where clear reproduction of speech is of primary importance. Pres-sure-actuated diaphragnt-type crystal microphonc desigrued for high-quality reproduction of speech when attached to the lapel. Crystal is a Graphoil (high capacity) Bimoryh wit, moisturc-sealed to withstand clinatic comitions. Microphone is inconspicuous, weighs only 11/2 ounces. \(17 / 8^{\prime \prime}\) diameter. Gray finish. Handy lapel cipp, 25 -foot
 shielded single-conductor cahe, Shipping weight, 1 pound. Model 76B. Lapel Microphone. Code: RULOP.

\section*{STRATOLINER CRYSTAL}

The microphone is always in the public eye. It is the only part of the sound system your audience or buyers see. The Shure "Stratoliner" gives you the opportunity to use an expensive-looking microphone even when low cost is an important factor. High output level ( 53.0 db below 1 volt per bar) with wide-range response (free from undesirable peaks) for good reproduction of either voice or music. Uses genuine Bimorph Crystal. Placed horizontally, the 708 A is semidirectional; used vertically, it becomes nondirectional, and the performers may be placed all around it without frequency discrimination. Swivel permits tilting of the microphone through an angle of \(90^{\circ}\). Case dimensions, diameter \(21 / 2^{\prime \prime}\), length \(4 \frac{7}{16}{ }^{\prime \prime}\). Stand thread \(5 / s^{\prime \prime}-27\). Shipping weight \(2 / 2\) pounds.

\section*{"STRATOLNER" DYNAMIC}

MODEL 508

A beautiful microphone that tells your customers you are using good equipment. The Stratoliner's projectile form its rich metallic-gray effect makes an impression on the public that you are using more expensive equipment. The Stra toliner Dynamic is a rugged microphone with unusually smooth response. Its faithful reproduction makes it ideal for music as well as voice. Its rug gedness qualifies it for hcavy duty work on Police transmit. ters, at Airports, in office and industrial paring systems. Prac. tically unaffected by heat or humidity. Moving conductor system. Die cast case, swive head, built in cable connector. Diameter \(21 / 2^{\prime \prime}\), length \(47^{7 \prime \prime}\) Shipping weight \(23 / 4\) Ibs. Stand thread 5/8"-27.

The microphone stand is the only part of a sound system operated by the performer. Don't annoy the performer and the audience with a cheaply constructed stand. Shure stands have been scientifically designed by microphone engineers. They are sturdy, heavy stands stabilized with base cushioning for maximum reduction of noise and vibration pickup from the floor. Model S60. Code: RUSIM.
(Above stand to be announced later.)

High-quality, carbon microphone specially designed for military and police equipment and other uses where ruggedness. and dependability are vital factors. Clear, crisp voice response that is ideal for situations where important orders, directions and reports require immediate understanding. High output. Easy to use, fits snugly into palm of hand. Heavy duty switch for push-to-talk performance. Furnished with hook for suspension and bracket for wall mounting. Adopted as standard microphone by leading manufacturers of police transmitters. Output level: 32 db below 1 volt for 10 bar speech signal. Net weight 14 oz. Shipping weight 1 lb . Case dimensions: \(33 / 4^{\prime \prime}\) higb, \(13 / 4^{\prime \prime}\) high, \(23 / 4^{\prime \prime}\) wide.

\section*{"100 SERIES" MILITARY CARBON MICROPHONES}

\section*{MODERN DESK STANDS}

MODEL S36A. Beautiful, streamlined Desk Mount with stable support at correct height. Fits Shure connector-type microphones, concealing plug in base. Adapter plate and tubing provided for other type microphones. Removable button at front for installation of \(3 / 8\) " standard bushing switch or volume control. Iridescent Gray finish. Base: \(21 / 2^{\prime \prime}\) high, \(5^{\prime \prime}\) wide, \(7^{\prime \prime}\) long. Shipping weight \(1^{1 / 2}\) lbs. Code: RUSEF.

\section*{CABLE-TYPE TRANSFORMER}

MODEL A86A. High quality Cable-Type Transformer. Matches 35 to 50 and 150 to 250 ohm microphones to high impedance amplifier input. Compact, sturdy. Case diameter \(158^{\prime \prime}\), length \(27 / 8^{\prime \prime}, 7 \mathrm{ft}\). cable. Shipping weight \(1 \frac{1}{2}\) lbs. Code: RUDEB.

A85B
conductor shielded cable, and only with crystal and high impedance dynamic microphones. Standard Shure cableconnector receptacle. Satin Chrome finish. Bakelite disc. \(13 / 4^{\prime \prime}\) high \(\times 11 / 8^{\prime \prime}\) wide \(\times 2^{\prime \prime}\) deep. Furnished without cable. Shipping weight \(3 / 4\) pound.
Code: RUNAT.

\section*{93A Elider CRYSTAL PICKUP}

GENERAL FEATURES: The Shure "Gliders" are light-weight crystal phonograph pickups with a needle force of only \(11 / s\) ounces. "Gliders" save records and needles, have smooth response, reduce surface noise, reproduce the full tone qualities of the record with natural life-like clarity. APPLICATIONS: Due to high output coupled with light weight, 'Gliders", are especially suitable for the replacement of heavy-weight pickups on older phonographs, as well as for installation on new record players. The low needle-point stiffness is a very important advantage for home recording because it brings out the best in home discs without record wear. "Gliders" are excellent as public address pickups-because they are less susceptible to vibrations, jar and shock. HOW TO TAKE ADVANTAGE OF THE NEW MARKET OPENED BY THE "GLIDERS": Shure "Gliders" are being used on many of the leading quality phonographs. Their advantages are many. Less needle and record wear . . . lower surface noise . . . the use of a permanent-point needle . . . better tone quality. Whenever a cartridge needs replacement in a manually-operated phonograph, don't bother to change the cartridge-install a new Shure "Glider." It costs so little more . . . and your customer will be so much more
 satisfied.
\begin{tabular}{|c|c|c|c|c|c|}

\title{
SHURE LEVER-TYPE CARTRIDGE
}

\section*{USES Lever-Driven Crystal and Pin-Tip Terminals}

gENERAL FEATURES: The Shure Lever-Type Cartridges listed here are for replacement of crystal cartridges in current use. They offer extremely low needle-point stiffness with high output voltages. Available in both steel and aluminum cases, furnished with quick, easy-to-use pin tips that eliminate the need of soldering. HOW THE LEVER-TYPE CARTRIDGE IS CONSTRUCTED: The crystal is mounted in an aluminum lever. The torque transmitted from the needle chuck to the crystal by means of the lever is built up approximately 5 times-permits the decreasing of the mass of the needle chuck and the considerable reduction in needle-point stiffness without loss of output voltage. It produces the highest relative output for given needle-point compliance. This provides a distinct advantage for replacing cartridges of other types. Shure Lever-Type Cartridges will replace most Rochelle Salt standard flat-type cartridges. The aluminum case cartridge-W57A - weighs only \(.43 \mathrm{oz} .\), much lighter than the heavier die-cast cartridges weighing from l to \(1 \frac{1}{2}\) ounces. Installing an aluminum cartridge in a heavy tone arm or record changer arm can reduce the needle force of an existing record changer or phonograph by \(1 / 2\) to 1 ounce. In many cases this converts the heavy-weight pickup into a light-weight pickup and permits the use of permanent-point meedles.
\begin{tabular}{|c|c|c|c|c|c|c|c|}

\section*{THE NEW D20 SERIES DYNAMIC MICROPHONES}

Most modern in appearance with departure from the conventional streamlining in that while it has all the elements of streamlined motion, it has a definite stability which enhances its lines. Its design makes it fit in the most modern of settings as well as most classic and yet it is rugged enough for industrial applications.

In addition to the rugged "DYNOID" construction, several other features make the D20 Series outstanding microphones. Mounted on substantial "Micro-Adjust Swivel," the unit may be positioned anywhere throughout a \(60^{\circ}\) angle without disturbing the balance or may be positioned anywhere throughout a \(60^{\circ}\) angle without disturbing the balance or
appearance of the microphone. The Universal "Micro-Adjust Swivel" brings to the Public appearance of the microphone. The Universal Micro-Adjust Swivel brings to the Public Address field the first and only swivel action which is smooth and that stays put. It responds in a velvet smooth manner without being frail and indete
eparture from the "knuckle-joint" swivel prevalently in use. Internal element is mechanically isolated, minimizing "stand and cord noises." Built-in cable connector is easily accessible without interference with microphone. Unaffected by weather conditions and vibration. Designed for use both indoors and outdoors with \(\sigma\) frequency range of 50 to 8000 cycles at - 54 db as referred to one volt per bar. The D20 is suitable for recording, public address, transmitters or wherever a full-ranged dynamic microphone is desired.

D20 SERIES; furnished with Satin Chrome finish. Standard \(5 / 8^{\prime \prime}-27\) thread stand coupling. Complete with \(20^{\circ}\) low loss cable and locking type connector. Dust proof cover included.

Dimensions: \(25 / 8^{\prime \prime}\) Wide, \(3^{\prime \prime}\) High,
\(31 / 4^{\prime \prime}\) Deep. Shipping Weight: \(33 / 4\) Pounds.

\section*{" 808 " VELOCITY MICROPHONE}

For use where a smooth responding microphone with a smart design is required. Suitable for stage presentations, orchestras and general public address applications indoors. Bi-directional response indoors. for pirctional of andience
allows and reaction without "feed-back." This microphone does not pick-up sound mrorophone the sides, thus it eleminates much of the feed-back difficulty much of the feed-back difficulty
encountered with other types of encountered
microphones.
Uses sensitive 5 mm ribbon element designed to reduce phase shift at high frequencies. This feature improves the high frequency response over the conventional velocity microphone.
Frequency Response: \(40-8000\) cycles per second.
Output level: 63 db below one volt per bar.
Satin chrome plated. Complete with locking type connector at housing and 25 toot rubber covered, low capacity cable. Stand coupling: \(5 / 8^{\prime \prime}-27\) thread. Microphone size: \(11 / 4\) inches square by \(4 \frac{1}{2}\) inches high. Shipping weight: 2 pounds.
MODEI. 808. High Impedance ( 40,000 Ohms.)
List Price
\(\$ 26.80\)

\section*{New and Improved Al74 CARBON MICROPHONE}

Replaces "W" Cartridge Type
Highly sensitive, single button carbon microphone. Light in weight and compact. Ideal detectaphone. An experimenter's favorite. Clear cut response to voice frequencies. Excellent for midget transmitters. Smallest complete microphone of its kind.
Ideal for student's electronics study kits, etc.

Button Impedance: 200 Ohms.
Output level: 12 db below 6 milliwatts for 100 bar signal.

Black plastic case with metal sus-
pension eye. Screw terminals. Complete with circuit diagrams, application sugestions, etc. Microphone size: Diameter \(17 \%\) inches, thickness \(1 / 2\) inch. Net Weight \(3 / 4\) ozs. Shipping weight 2 ozs.
MODEL "A 174" Impedance 200 Ohms.
List Price
. \(\$ 4.00\)

\section*{UNIVERSAL MICROPHONE CO.}

\section*{INGLEWOOD, CALIFORNIA}

\section*{HANDI-MIKES}

\section*{CARBON MICROPHONE SERIES}

A hand microphone whose popularity has been won by trustworthy performance and rugged dependability. Well balanced all-metal construction. For call systems, small transmitters; for use wherever a close-talking microphone with clear crisp voice reproduction is required. Single button carbon type with impedance of 200 Ohms.
Output level: 12 db below 6 milliwatts for high signal-to-noise ratio. Satin Chrome plated. Complete with snap switch on standard Model 200-A. 6 foot flexible cord incluced. Microphone size: 8 inches overall with \(2 \frac{1}{4}\) inch head. Shipping weight: \(11 / 4\) pounds.
200-A. 200 Ohms with Snap Switch.
List Price
…............ \$13.65
200-TA, 200 Ohms with Press to Tolk Switch ...... \(\$ 16.40\)
200-TC. 200 Ohms with Control Circuit.
\(\$ 17.50\)

\section*{"KD" DYNAMIC MICROPHONE}

New and improved design.
An economy microphone for home recording, amateurs, carnivals. Slightly rising frequency characteristics provides increased clarity. Uneffected by temperature and humidity.
Frequency Response: 50-7500 cycles per second.
Output level: 83 db below one volt
 per bar.
Deep brown housing with polished chrome grille front. Microphone size \(31 / 4\) inches in diameter, depth \(23 / 8\) inches. Stand coupling: 5/8 inch 27 thread. Spring steel, cable strain relief at housing. Complete with 10 toot rubber covered cable. Shipping weight \(13 / 4\) pounds.
MODEI "KD." High Impedance (40,000 Ohms).
List Price
\(\$ 17.75\)

\section*{D61A CONSTANT VELOCITY FREQUENCY RECORD}

For Direct Checking of Response Characteristics of Phonograph Pickups, Complete Lateral Disc Recording Systems and Complete Lateral Disc Reproducing systems.
For Indirect Checking of Response Characteristics of Recording Heads, Loud Specker Installations, Theatre Sound Equipment, Public Address Sound Equipment, and Almost any Component of Audio Frequency Equipment.
For Quick Checking of Equipment without Resorting to use of Complicated Calibration Equipment and
 Procedures.
A Handy Tool in the Hands of Technician, Engineer, and Student Alike. Data sheet includes output levels of popular pickups.

\section*{TECHNICAL DATA}

A 12-inch Recording at 78 RPM. Duplicate recording on each side of record. Disc is "pressed" in the new high grade flexible recording stock. (Will not break in shipment or handling.)

Recorded in three parts.
(1) A continuously rising tone of 50 to 10,000 eycles per second.
prequencies are voice announced in 15 "breaks." Range of frequencies is recorded at Constant Velocity in steps of 50 to 200 c.p.s. at \(+7 \mathrm{DB}, 200\) to 500 c.p.s. at +14 DB , and 500 to \(10,000 \mathrm{c}\) c.p.s. at +21 DB .
(2) A 1000 cycle tone recorded in steps of 2 DB from +8 to +18 . 3) A 400 cycle tone record

Zero reference is established at an arbitrary level.
D61A FREQUENCY RECORD with Data Sheet.
List Price

DYNAMIC MICROPHONE SERIES

\section*{Al32A RECORDING HEAD}

\section*{FOR HOME RECORDING}

An especially designed magnetic Recording Head Cartridge for replacement in popular national makes of home recorders, such as: Wilcox-Gay General Industries, etc. Úses spring temper phosphor bronze knife edge and steel spring attachment plate. The home recording version of Universal's patented Professional Recording Head-the first time
 ing skill has made a replacement recording head cartridge available to the general public
Response range exterds from 50 to 5000 Cycles per Second with a rise in the higher frequencies to offset loss in record materials, high frequency cut off of R. F. Tuners, etc.
Sensitivity:-It requires oniy \(1 / 2\) watt to make \(\alpha\) fine home recording. A feature of the Al32A patented design is that in additording. A takes only 3 watts to make a record of commercial level or loudness. Most recording heads in this price class cannot make loudness. Most recording heads in this price
Unaffected by high temperatures. Has powerful alnico magnet Available in one standard impedance for matching the 3.2 Ohms adopted by the R.M.A. as a standard for loud speakers. Dimen-
 MODEL Al32A Recording Head Replacement Cartridge. Complete with spring tempered phosphor bronze knite edge, steel attachment plate and mounting screws. Shipping wt. 6 ounces. List Price
\(\$ 11.50\)

\section*{A31 COMBINATION DESK STAND}

Two-piece desk stand with demountable upright (may be used as handle for converting desk into hand microphone). Upright is mounted into base with "push and twist"' of wrist . . . to remove simply "pull and turn" in reverse. Complete with rubber feet. Durable brown finish. All metal base with hardwood upright in matching finish.
Assembled height: \(91 / /^{\prime \prime}\). Upright \(63 / 4^{\prime \prime}\) long, \({ }^{\prime \prime}\), 27 thread on brass ferrule. Base \(412^{\prime \prime}\) in \(\begin{array}{ll}5 / 8^{\prime \prime}-27 & \text { thread on brass ferrule. Base } 41 / 2^{\prime \prime} \\ \text { diameter, } 11 / 8^{\prime \prime} \text { high. Shipping weight } 10 \text { ozs. }\end{array}\)
List Price

\section*{A63 FLOOR STAND}

Three-section type. Ideal for portable equipment. May be knocked down in two parts. Collapsed length \(24^{\prime \prime}\). Base \(91 / 2^{\prime \prime}\) in diameter, approximately high. Fits all microphones with \(5 / 8^{\prime \prime}-27\) thread Rattle proof construction. Easy to operate. Adjustable Rattle proof construction. Easy to operate. Adjustable height, 26 to 64 . In
Stand uprights are satin chrome plated. One-piece iron base is black wrinkle finished.
Base weight: Approximately 7 pounds. Floor Stand shipping weight 10 pounds. Packed in two cartons. List Price

Webster
RACINE

ELECTRIC

\section*{WISCONSIN}

Established 1909

\section*{Tone Arms}

In keeping with the Webster Electric tradition for fine design, precise construction and dependable performance, these pickup arms are now being produced for modernization or repair of standard record-playing equipment. Each is a series of precisely-matched components built into an integral unit. All are designed to minimize track-
ing error, and are coupled to resonate at a very low frequency. Resonance distortion and microphonic feedback tendency have been reduced to the minimum. They will accommodate \(10^{\prime \prime}\) or \(12^{\prime \prime}\) records. Single-hole mounting. All models are supplied with arm rests and mounting base brackets.

A new die-cast zinc alloy tone arm designed for use with \(F\) series cartridges, giving very low tracking pressure. Modern design complements the appearance of any record-player. Currently produced with cartridge model F5 (see reverse side for response characteristics). LIST PRICE \(\$ 8.45\)

A lightweight, low-inertia tone arm constructed of stamped aluminum, attractively fluted and internally braced for required rigidity. Designed for use with N series cartridges; currently produced with N8, N10 and N11 (see reverse side for response characteristics). Grey-tan enameloid finish. LIST PRICE \(\$ 6.50\)

The latest Webster Electric tone arm. Combines beautiful styling with exceptional rigidity, incorporating a high lateral ridge as an integral feature of the design. Currently available with \(N 7\) high fidelity cartridge, tracking at less than 1 oz . (see reverse side for response characteristics). Supplied with Sapphire needle. LIST PRICE \(\$ 15.95\)

\section*{AJ SERIES}

Model AJ-1. A bakelite pickup designed to operate at 1.5 oz. tracking pressure and \(200,000 \mathrm{ohms}\) impedance at 100 cps . Cartridge is an integral part of the arm. Output at 1000 cps. is . 5 volts minimum, Furnished complete with Permo-Point needles. LIST PRICE \(\$ 7.25\)
Model AJ-2. Cartridge and arm only for replacement of cartridge where model AJ-1 is presently installed. LIST PRICE ........................ \(\$ 4.45\)

\section*{AC and AE SERIES}

Models in these series are of stamped steel construction, finished in brown enamel, with rubber cushioned mounting. Model AC10-1. Designed to operate at 2.5 oz . needle pressure. Incorporates C 2 2.5 oz. needle pressure. Incorporates C2
cartridge. LIST PRICE ......... 85.50

Model AE10-1. Designed to operate at less than 2 oz. needle pressure. Incorporates N3 cartridge. LIST PHICE... \(\$ 6.10\)
Model AE10. Incorporates E4 cartridge with sapphire needle. LIST PRICE 37.50 (see reverse side for characteristics of cartridges contained in above tone arms)

\section*{Recorder Heads}

Webster Electric Recorder Heads are unique and outstanding in performance. They are of extreme simplicity in mechanical and electrical design. No "peaks" or "valleys" in the entire frequency range. Recordings are distinguished by their clean quality and remarkable musical detail.
\[
\hat{z}
\]

\section*{MODEL R-84}

A magnetic cutting head for professional and semi-professional use. 8 ohms impedance at 400 cps. Frequency range \(30-\) 6000 cps. Less than \(11 / 2 \%\) distortion at 400 cps . Input power 1 watt nominal for maximum recording level. Standard \(1 / 3\) inch spacing between mounting holes. LIST PRICE .... \(\$ 27.50\)

MODEL R-84G
Similar to above but with 500 ohms impedance at 400 cps. LIST PRICE ............ \(\$ 27.50\)

\section*{Crystal Cartridges}

Webster Electric Crystal Cartridges are supplied in four general styles having universal replacement application. They are manufactured under exceptionally high standards of precision, and each cartridge is individually tested before release, assuring flawless performance and maxi-
mum customer satisfaction. The range of characteristics described below permitg exact replacement of original cartridges found in the majority of record-players, record-changers and radiophonograph combinations.

C SERIES
Cartridges of this series were incorporated as original equipment in many thousands of phonographs in use today. Models \(\mathrm{C}, \mathrm{CS}\) and C 6 equipped with flange tor mounting, as shown. Model C3 supplied without flange for clamp-mounting. Model C4 equipped with special mounting stud. Solder cerminals.

D SERIES
For tone arms designed for side-hole mounting. This style is also widely used for reconditioning of equipment now in use. Solder terminals. Model D5 supplied with sapphire meedle.

\section*{\(E\) and \(N\) SERIES}

Cartridges in these series have been standard in new equipment for several years. Models N6 through Nil were recently introduced and are being incorporated in leading postwar makes of record-playing equipment, thereby assuring a growing replacement market. Model N5 is supplied with sapphire needle. All models are available with solder terminals, while models N6 to NII are also available with pin type terminals, and with choice of self-ground or separate ground lug.

\section*{F SERIES}

A new series of cartridges of very light weight, designed to track at low needle pressure. High fidelity models have a uniform drop of 6 DB per octage up to \(10,000 \mathrm{cps}\). Choice of self-ground or separate ground lug; solder or pintype terminals.

\section*{EASTERN MICROPHONE STANDS}
\(\|\) Because of technical changes, we are unable to present a new catalog at this time. Write us for a copy of temporary catalog sheet \(646-\mathrm{A}\), describing our SENSATIONAL patented new line of "SPEED-A-JUST" microphone floor stands
 featuring "SLIDE-LOCK" with "SLEEVE ADJUSTMENT."

T" \({ }^{\text {SLEEVE ADJUSTMENT" }}\) is the NEW MAGICAL method of changing height without twisting or turning. Height is automatically set when tube is lifted upward. Your weight will not permit you to lower the microphone unless you grasp the "SLEEVE" and make the downward movement.

If "SLIDE-LOCK" is also being applied to a new line of instantaneously operated BOOMS which make obsolete the old thumbscrew method of boom adjustment.

\section*{EASTERN 'NECK SUSPENSION"}

\section*{Catalog No. ES160}

For switchboard and applications calling for a chest mounting, the EASTERN "THIRD HAND" leaves your other two hands free for required manipulations. Made from die cast metal and supplied with a 7 flexible gooseneck. An integral part of the casting is a call letter plate which is suitable for station or chain affiliation (letter in your own call letters). Has a neck strap which is held by snap fasteners and a body strap which prevents shifting of microphone when leaning forward. Finished in beautiful black wrinkle.

\section*{PORTABLE STANDS}

\section*{LIGHTWEIGHT STANDS FOR PACKAGE SOUND AND RECORDING SYSTEMS}

\section*{EF94-A specially designed 3 -sec-} tion stand, ideal for portable applications where a full weight stand is specified. Has a new "BRAKELOCK" telescopic tubing with sections non-removable when extended. Heavily weighted modernistic base, \(3^{\prime \prime}\) high with \(9^{\prime \prime}\) diameter, requires very little space. Height of stand \(241 / 4^{\prime \prime}\) to \(60^{\prime \prime}\). Has \(1 / 8^{\prime \prime}\) pipe and \(5 / 8^{\prime \prime}-27\) thread. Base finished in Grey wrinkle and tubing in Chromium. Net weight 9 lbs .

EF92-A full height two-section floor stand with same \(9^{\prime \prime}\) modernistic Grey wrinkle base as supplied with EF94 described above, and
 tubing in Chromium. Height \(35^{\prime \prime}\) to \(64^{\prime \prime} .5 / 8^{\prime \prime}-27\) thread. Net weight 9 lbs.

\section*{FOLDING TRIPODS}

EF73 - A three-section folding stand, of heavy material, made especially for microphone use. Ideal for all portable applications where light weight and minimum space are essential factors. Height \(26^{\prime \prime}\) to \(60^{\prime \prime}\). Base spread \(24^{\prime \prime}\). Folds to \(213 / 4^{\prime \prime}\). Thread \(5 / 8^{\prime \prime}-27\). Net weight \(33 / 4\) lbs. Thumbscrew adjustment. All Chromium finish. Has rubber
 bumpers.

EF74-A four-section folding stand similar to above but with fourth section added, giving adjustable height from \(27^{\prime \prime}\) to \(78^{\prime \prime}\). Folds to \(223 / 4^{\prime \prime}\). Thread \(5 / 8^{\prime \prime}-27\). Rubber bumpers. Net weight 4 lbs. Thumbscrew adadjustment. All Chromium finish.

EMCO MICROPHONESTANDS
}

\section*{Manufactured and distributed by EMCO SOUND EQUIPMENT CORP., BROOKLYN, N. Y.}

EMCO now introduces a new and more complete line of microphone stands, incorporating the latest features that modern engineering could produce. EMCO presents smooth action, a means for raising and lowering the microphone easily, smoothly and noiselessly. EMCO brings you the new wear-ever, sure grip automatic friction clutch lock, for locking the stand at any
desired height. Due to the hardened fibre bushing incorporated in the clutch construction of these stands, all possible wear is eliminated, and will allow them to last for an indefinite period of time. All EMCO stands incorporate heavy gauge brass tubing throughout, which is extra heavily chrome plated. All have \(5 / 8 \times 27\) thread for all crystal or velocity microphones.

"MAX MIXER"
—adds Microphone Inputs to any Amplifier
For Hill-Billy Bands, Orchestras, Instrumentalists, Vocalists, Entertainers, Dramatic Clubs, Night Clubs, Concessions, Sound Men

WHAT IT DOES: The SPECO "MAX-MYXER" provides a low-cost method of adding to and mixing up to two more microphones than provided for by regular input of any amplifier.

HOW IT DOES IT: By plugging the "MAX-MIXER" cable into the microphone input of an amplifier and then plugging one, two or three high impedance microphones into the "MAXMIXER", the user can regulate each by a separate volume control. Individual string instrument, pianos and/or voices can be blended in any desired proportion. It is small enough to be placed on a small stand or table near the operator for handy finger-tip controI.

NOTE: Use of a SPECO "MAX-MIXER" eliminates necessity for using contact microphones which incorporate a volume control. The controls on the "MAX-MTXER", itself, serve the purpose.

SPECIAL PRODUCTS COMPANY

\section*{Model MIX STO.95 List}

9115 BROOKVILLEROAD, SILVER SPRING, MD., P. O. BOX 471

\section*{Brush \\ pRODIUTS}

Each application of headphones requires some special qualification for satisfactory performance. Brush has a most complete line of crystal operated headphones, and each model is designed for a specific group of applications. Brush crystal phones possess the following outstanding features:
. BIMORPH* crystal drive element of such high impedance that line or circuit characteristics are not affected when monitored by Brush phones.
2. Wider range response with more uniform output,
3. Compensation for ear coupling.
4. Light-weight, rugged, shock-proof construction.

MODEL "BA-303" HUSHATONE*
A miniature, molded plastic extension speaker for under pillow use. Disc shaped (4\%16 dic. by 1116 thick). Makes no uncom fortable lump beneath the pillow. Tone quality comparable to cone-type speaker because of specialy designed piasicic dia phragm. Speaker gives ample output with low power consumption .001 watt). Hermetically sealed, can be dipped into disinfeciing solution (temperature not above \(120^{\circ} \mathrm{F}\) ). Light weight BIMORPH* crystal drive element insures uniform response and high sensi tivity. No parts to wear, loosen, or become detached. Furnished in maroon with satin chrome trim.
HUSHATONE* with 10 cord. Fair Trade Fetail Price . . . \(\$ 9.75\) Net Wt. 8 oz. Shipping Wt. 2 lbs.

HIGH FIDELITY MODEL "A-1"

For use where HIGH FIDELITY and extended frequency response are of paramount importance. ( 60 to 10,000 cps. Corrected for rising response below 200 cps .) Especially suited to monitoring, sound measurement. audiometry, and similar exacting headphone applications. Sensitivity approx. 1.5 bars per volt at 1,000 cps. Impedance over 80,000 ohms at any frequency.
Headset complete with \(5^{\prime}\) cord and headband. List Price . . . \(\$ 18.00\) Net Wt. 6 oz. Shipping Wt. 2 lbs. Code Mihif

BRUSH MODEL "A" LORGNETTE PHONE

The " \(A\) " lorgnette phone is designed for use in group hearing aid sound systems installed in churches, concert halls, theatres and auditoriums. Telescope extension from \(12^{\prime \prime}\) to \(17^{\prime \prime}\). Aftractively finished in satin black. Light weight, easy to handle, and comfortable \(\alpha t\) the ear.
Single phone complete with \(5^{\prime}\) cord and lorgnette handle.
List Price . . . . . . . . . . . . \(\$ 8.20\) Net Wt. 5 oz. Shipping Wt. 1 lb . Code Milme

COMMUNICATIONS MODEL "BJ"

Developed for COMMUNICATIONS work where light weight, durability, and uniform response are required. Soft rubber housing insures good ear seal and wearing comfort over long hours of constant use. High output mpedance .008 mfd ( 40,000 ohms at 500 cps .), response 100 to \(10,000 \mathrm{cps}\). Headset complete with \(5^{\prime}\) cord and adjustable lock-type headband.
List Price . . . . . . . . . . . . \(\$ 15.85\) Net Wi. 6 oz . Shipping Wt. 2 lbs. oz. Sode Micom

BRUSH MODEL "A" GENERAL PURPOSE
Designed for GENERAL PURPOSE applications including laboratory, studio and skilled amateur home sfudio and skilied amateur home use. The BIMORPH* crysial drive element insures wide range, uniform response ( 100 to \(10,000 \mathrm{cps}\).) and high for multiple installations.
Headset complete with \(5^{\prime}\) cord and adjustable lock-type headband List Price . . . . . . . . . . \(\$ 12.00\) Net Wt. 6 oz . Shipping Wt. 2 lbs.

\section*{BRUSH MODEL "A" SINGLE PHONE}

Particulariy adapted to individual or group hearing aid and radio applications. Light weight, good ear seal, and comfortable to wear. Spring steel headband with soft rubber and cushion to eliminate slipping.
Single phone complete with 5' cord and headband.
List Price . . . . . . . . . . . . . \(\$ 6.45\) Net Wt. 3 oz. Shipping Wt. 1 lb . Code Milod

\section*{BRUSH MODEL "B' SINGLE PHONE}

Excellent for hearing aid applications because of extreme light weight. Has very low power conweight. Has yery low power contion. Hermetically sealed aqainst ear moisture and adverse humidity con moisture and adverse humidity conditions. Same general characteristics Sisommunicaions Model BJ phones. and headband.
List Price . . . . . . . . . . . . . \(\$ 6.65\) Net Wt. 3 oz. \(\underset{\text { Code Mibor }}{\text { Shipping Wt. } 1 \text { lb. }}\)

Leather covercd headband in place of the braid band, List 45 c extra

\section*{THE BRANDES 'SUPERIOR'" MATCHED TONE HEADSET}

THE SUPERIOR

The Brandes "Superior" headset has been on the market since 1908. It was one of the first headsets available to amatcurs. It is the outside terminal type. The diameter of the diaphragm is \(21 / 3^{\prime \prime}\). Aluminum cases, Black bakelite caps. Double coils, two in each recciver. Magnets made of chrome magnet steel. It has a steel headband with permanent adjustment and having no removable parts. Cotton covered cord four and a half feet long.

No. BS-2-2000 ohms D.C.
List \(\$ 3.50\)

\section*{THE "MASTER" CANNON-BALL-That Old Reliable Headset}

The "Master" Cannon-Ball headset is of exceptional high quality and rupged construction. It is used extensively in institutions, hospitals and prisons, and by radio servicemen and amateurs everywhere. It is of the concealed terminal type. The diameter of the diaphragm is 2 , Aluminum cases. BakeLite caps. Double coils, two in each recciver. Magnets made of chrome magnet steel. It has a steel headband with permanent adjustment and having no removable parts. Cord is cotton, four and a half feet long.

"America's Finest Portable Recorder" Illustrated-Model RA-II6

\section*{NEW . . . IMPROVED}

Here's the answer to your recording problems in a single, compact, portable unit! Radiotone, a pioneer in instantaneous recording, with over 10 years experience backed by thousands of units in service is now manufactured by Ellinwood Industries, famous for Design Simplicity-Dependability. Check these features -note the improvements-then see your local representative for complete, illustrated catalog describing the RA-116 and other portable models.

\section*{FEATURES}

THE RA-116—Produces acetate recordings of professional quality from \(6^{\prime \prime}\) up to \(16^{\prime \prime}\).
DUAL SPEED -78 or \(33-1 / 3 \mathrm{rpm}\). instantly selected by an improved lever shift which locks into position. LEAD SCREW-_Positive feed overhead lead screw insures perfect grooves and dependable operation. Direction of cuf can be changed instantly from outside-in to inside-out. Run-in grooves may be made when desired.
VARIABLE LINES-The number of lines per inch on the dise may be varied from 90 to 130 .
DEPTH OF CUT ADJUSTMENT-Accurate regulation of pressure at the cuffing stylus is obtained by furning a knob on an indexed dial.
ERIVE SYSTEM - Radiotone has perfected a positive silent drive insuring perfect motion, correct pitch, and stobilify. Moving parts have been reduced to a minimum. Speed accuracy is maintained within \(.25 \%\). TURNTABLE-A \(16^{\prime \prime}\) balanced cast aluminum furnfable is used. The hardened sfeel driving shaff revolves on a single steel ball at the boftom of a \(6^{\prime \prime}\) cast bearing well which contains two bronze "oilite type" bearings.
DUO-CHROMATIC EQUALIZERS-allow independent response control af 80 cycles from - 15 to +15 db and 8000 cycles from - 15 to +15 db .
MULTIPLE INPUT CHANNELS - Two high impedance input channels are provided. (Low impedance also available.) Two jacks are for microphone use and háve an overall gain of 135 DB. The other fwo have an overall gain af 80 DB , which is suitable for most any
crystal, magnefic or dynamic pickup as well as a zero level line.
MIXERS - Two independent volume controls are provided and may be operafed simultaneously.
VOLUME INDICATOR-A volume indicatar meter is provided for accurate monitoring of recording level. OUTPUTS—All oufput impedances are 8 ohms.
AMULIFICATION STAGES-The seven fube amplifier has five stages. The first is a dual preamplier utilizing two 7F7 fubes which pravides the two microphone inputs. The second is a mixer utilizing one 7F7 fube. The third is the Duo-chramatic equalizer stage utilizing one 7F7 tube. The fourth uses one 7F7 as resistance coupled phase inverter. The fifth is a power output sfage using two 705 fubes in push-pull class "A." Power output is 10 watts wifh less than 5 per cent. distortion, less than 1 per cent. distortion af cufting level. Frequency response is plus or minus 1.5 db from 35 cycles to 15,000 cycles.

RADIO-A radio receiver designed for recording is available os an accessory to the RA- 116 and space is provided by removing the panel af the left side of the amplifier.
POWER REQUIREMENTS- \(110-120\) Volfs. 50 or 60 cycles AC. 150 Watts. May be used on DC by addifion of converter.
SPEAKER-Heary duły 12 -inch permanenf magnef dynamic type.
FINISH-Handsome leatherette case with chromium hardware. Exterior metal parts are finished in baked crackle lacquer.

\title{
PORTABLE STATIONARY SOUNDRECORDINGEQUIPMENT
}

\section*{PRESTO 8-D Recording Turntable}

Designed for making high quality masters and instantaneous recordings, the 8-D features instantaneous change of cutting pitch; and the Presto 1.D cutting head, providing higher modulation level, more uniform frequency response and ability to retain its calibration under wide temperature variations.

A heavy cast-iron turntable and mounting base assurt exceptionally low background noise in recordings. Adjustable feet permit accurate leveling on a bench or stand at a height to suit the operator's convenience.

Step pulleys having seven grooves and a feed mechanism equipped with reversing gear for cutting inside-out and outside-in provide the equivalent of fourteen separate feed screws. The overhead feed mechanism is driven by a shaft within the overhead mounting casting and no contact with the turntable is necessary. The entire overhead swings to the rear when changing discs.

Standard equipment includes a microscope, an automatic equalizer, a vertical damper and a Presto 1-D cutter.

\section*{SPECIFICATIONS}

Frequency Response: 50 to \(10,000 \mathrm{cps}\).
Impedance: Outting head 500 ohms. 15 ohms on request.
Power Requirements: Turntable motor draws 100 watts from a 110 volt, 60 cycle line. Available for 50 cycles or 220 volts at additional cost.
Speed Accuracy: \(0.5 \%\).

Pitch: Adjustable to cut \(96,104,112,128\) or 136 lines per inch inside-out or outside-in.
Turntable Noise: 40 db below program level.
Operating Dimensions: \(31^{\prime \prime} \times 18^{\prime \prime} \times 1914^{\prime \prime}\).
Weight: 150 pounds.

\section*{PRESTO 8-N RECORDER}

A precision instrument embodying the finest materials and workmanship throughout, designed in collaboration with engineers of the largest recording studios to include all of the operating conveniences necessary to produce consistent, high quality work.

The \(8-\mathrm{N}\) turntable records the widest frequency range with the lowest background noise obtainable on lateral recordings. It is particularly recommended to studios making master recordings for the production of commercial pressings.

Standard Equipment: The 8-N recorder consists of a turntable, motor drive system and overhead cutting mechanism mounted on a cast iron base equipped with shockproof mountings. The cutting mechanism includes the high fidelity cutting head, spiraling feed screw, time scale, vertical damper and automatic equalizer. Also included are the microscope and pickup. Accessories necessary to operate the \(8-N\) table include recording amplifier, microphone, dises and needles.

1

\section*{PRESTO 6-N RECORDER}

The Presto \(6-\mathrm{N}\) recorder is outstanding in its suitability for broadcast stations because it offers all the qualifications for good recordings, including master records, at the most economical price. It is ideal for the station requiring delayed broadcast of network programs, and for reference recordings.

The \(6-\mathrm{N}\) is the best type of unit for remote recordings because of the manner in which it packs so as to withstand transportation and yet is ready for operation within a few minutes. The overhead mechanism lifts cff the table and is stored in a specially fitted compartment.

Standard Equipment includes the Presto cutting head, spiraling feed screw, vertical damper, time scale and pickup.
Accessory Equipment, which may be added to the 6.N Recorder if desired, includes the \(160-\mathrm{A}\) automatic equalizer and the \(125 \cdot \mathrm{~A}\) microscope. A wood cabinet may be substituted in place of a carrying case at additional cost.

The PRESTO model Y recorder fills the need for a \(16^{\prime \prime}\) transerip tion recording and playback equipment which is extremely portable and yet capable of producing high grade recordings. It makes continuous 15 minute, \(331 / 3\) RPM electrical transcriptions of sufficiently good quality to be used by broadeasting stations. It also makes 78 RPM recordings on \(6^{\prime \prime}, 8^{\prime \prime}, 10^{\prime \prime}\) or \(12^{\prime \prime}\) discs and may be used to cut \(11^{1 / 2^{\prime \prime}}, 131 / 2^{\prime \prime}\) and \(171^{\prime \prime}\) " master recordings from which commercial pressings are produced. In addition to recording, which commercial pressings are produced. In addition to recording, scriptions and phonograph records and is widely used for auditioning scriptions and phonograph records and is widely used for auditioning
recorded radio programs to prospective sponsors. As a public address system it will provide sound for audiences up to 1000 persons. Among the important features of the model \(Y\) recorder are:
1. The exclusive Presto rubber-rimmed-turntable driven directly by a steel pulley on the motor shaft, a simple, foolproof drive system that eliminates vibration and holds the turntable speed absolutely constant. Maintenance is negligible. There are only two moving parts which need replacement about once a year
2. A lever changes the turntable speed instantly without stopping the table or removing the record.
3. A lever adjusts the cutting mechanism to cut either from the outside of the dise toward the center or from the center out.
4. A cam lever lowers the cutting head gently on the record preventing accidental damage to sapphire needles.
5. A vibration damper attached to the cutting head suppresses vertical modulation in the record groove and eliminates variation in groove depth due to surface irregularities in

\section*{PRESTO MODEL "L" TRANSCRIPTION PLAYBACK}

ably clear, wide range reproduction ordinarily expected from portable equipment

The Model L Playback was developed to meet an insistent demand among the larger broadcasting stations and agencies for "something better" in portable reproducing equipment. Those who "something better" in portable reproducing equipment. Those who use the Model L Playback in connection with important sates of well worth its cost.
L-2-Portable transcription playback
the disc. The damper also eliminates flutter when the records are played with pickups having a resonant peak in the low frequency range.
6. The cutting arm may be unlocked from the feed mechanism to cut spiral starting and runcut grooves.
7. A time scale on the cutting arm shows the starting point for each size record and elapsed recording time at both 78 and \(331 / 3\) RPM.
8. The cutting head feed mechanism is located beneath the turntable where it is protected from dust or accidental damage. The parts of this mechanism are hand finished and fitted and its performance is equal in every way to the overhead lathe type mechanism commonly used.
9. The recording amplifier includes a two microphone mixer, high and low frequency equalizers and a change-over switch for continuous recording or re-recording. The amplifier and loudspeaker fit together to carry in a single case.

Recorder
Recorder (low impedance inputs)

\section*{PRESTO MODEL "K" RECORDER}

The Presto model K is a portable sound recorder, record player and public address system complete in a single carrying case. Exceptionally light and compact, it is ideally suited to the needs of sales training and industrial schools, teachers of speech, music and dramatics, as well as professional actors and musicians who require an instrument that can be carried easily and set up for require an instrument that can

The model \(K\) records 15 minutes continuously at \(331 / 3 \mathrm{RPM}\) on one side of a \(131 / 4^{\prime \prime}\) disc. It may be connected to any home radio set to record complete radio programs. It also makes \(6,8,10\) and 12 inch records, and plays all makes of phonograph records. As a voice amplifying system it will serve audiences of about 500 persons.

Although it is the lowest priced complete Presto recorder, it contains many valuable features of the more expensive instruments such as:
1. A magnetic cutting head and pickup, the design used in the highest grade equipment.
2. A full sized, 6 tube amplifier having push-pull triodes in the power stage.
3. A high frequency equalizer for \(331 / 3\) RPM recording and a tone control for suppressing needle scratch when commercial records are played.
4. A safety cam lever for lowering the cutting head to prevent accidental damare to sapphire needles.
5. A detachable, dynamic loudspeaker which may be operated at any desired distance from the recorder.
6. A cutter feed mechanism located beneath the turntable where it is protected from dust or accidental damage.
7. Provision for quick change from cutting outside-in to inside-out.
g. The exclusive Presto rubber-tired turntable driven directly by a pulley on the motor shaft, a drive system that eliminates rubber pulleys and belts which are subject to rapid wear. Turntable speed may be changed in 5 seconds from 78 to \(331 / 3\) RPM by removing a brass pulley on the motor shaft.
These features, not found in any other low-priced recorder nable the user to make high quality recordings, consistently They simplify the operation of the instrument for non-technical owners and reduce operating costs by preventing spoilage of discs and needles. As a result of its excellent performance, more Presto model K recorders are now used by schools, industrial concerns and in the home than any other recorder in a similar price range. K-8-Complete Recorder less microphone and stand.

\hline
\end{tabular}

Type 300-A Re-Recording Equipment
The type \(300-\mathrm{A}\) re-recording equipment consists of an auxiliary turntable, which mounts on top of the recording turntable and an external pickup mounted on a pedestal. For re-recording or dubbing the \(300-\mathrm{A}\) equipment has several important advantages over a separately driven turntable. 1) The rotation of the recording and playing tuntable is locked together so that the playing time and pitch of the duplicate record are identical with the original. 2) No wows or wavers can be introduced during the re-recording since any variation in speed will occur simultaneously on both tables, 3) It is less expensive than a second complete turntable.

The 300-A equipment may also be used with the Presto model K-8 recorder to dlay \(16^{\prime \prime}, 33-1 / 3\) RPM electrical transcriptions.

Standard Equipment: The complete 300 -A equipment consists of a 140 -A turntable, 141-A magnetic pickup and 142-A pickup pedestal. Frequenty Response: Pickup 70 to 7,500 cycles. Impedance: Pickup 2,000 ohms. Finish: Gray enamel. Shipping Weight: 25 lbs . ( 11 kg .).

Six Needles Per Carton
Each Presto cutting needie is packed in an individual Lucite container having a chuck that holds it tightly in place to drevent damage. An addressed mailing bag is furnished for sending the needie to Presto for resharpening. Standard shipping cartons contain six cutting needles.

\section*{Type 75-A Recording Turntable}

The lightest 16" dual speed recording turntable made. Recommended for all services requiring a high grade portable recorder. Widely used by broadcasting stations that record local news events for delayed broadcasts; a rugged, compact recording installation for mobile pick-up units.

Standard Equipment: The equipment consists of a \(16^{\prime \prime}\) cast aluminum turntable, carefully machined to dynamic baiance, weighing 10 lbs. It revolves on a single ball bearing at the base of a bronze shaft well. A heavy live rubber tire on the rim of the turntable engages with a steel, step-pulley on the motor shaft to drive the table. The motor is suspended by rubber grommets in a carriage which is moved up or down by a lever to change the turntable speed. The motor drive and turntable are mounted in a cast aluminum base designed to combine extreme rigidity with light weight. The cutting mechanism consists of a fan gear, worm and pinion driven by a worm on the turntable shaft. The 1-C high fidelity cutting head, 171-A vertical damper, \(21-\mathrm{A}\) time scale and \(150-\mathrm{C}\) lateral pickup are included as standard equipment. The \(75-\mathrm{A}\) table is mounted in the 2 A carrying case. The \(75 \cdot \mathrm{~B}\) turntable is mounted in the \(3 \cdot \mathrm{~A}\) cabinet.

PORTABLE \\ PRESTO \\ STATIONARY SOUNDRECORDINGEQUIPMENT
}

PRESTO MODEL 'Y" RECORDER

The Presto model Y recorder fills the need for a \(16^{\prime \prime}\) transcription recording and playback equipment which is extremely portable and yet capable of producing high grade recordings. It makes continuous 15 minute, \(331 / 3\) RPM electrical transcriptions of suffciently rood quality to be used by broadcasting stations. It also makes 78 RPM recordings on \(6^{\prime \prime}, 8^{\prime \prime}, 10^{\prime \prime}\) or \(12^{\prime \prime}\) dises and may he used to cut \(111 / 2^{\prime \prime}, 131 / 2^{\prime \prime}\) and \(17^{\prime} / 4^{\prime \prime}\) master recordings from which commercial pressings are produced. In addition to recording, the model \(Y\) gives excellent reproduction of both electrical trauthe model Y gives excellent reproduction of both electrical trau-
scriptions and scriptions and phonograph records and is widely used for auditioning
recorded radio programs to prospective sponsors. As a public address recorded radio programs to prospective sponsors. As a public add
system it will provide sound for audiences up to 1000 persons. Among the important features of the model \(Y\) recorder are:
1. The exclusive Presto rubber-rimmed-turntable driven directly by a steel pulley on the motor shaft, a simple, foolproof drive system that eliminates vibration and holds the turntable speed absolutely constant. Maintenance is negligible. There are only two moving parts which need replacement about once a year.
2. A lever changes the turntable speed instantly without stopping the table or removing the record.
3. A lever adjusts the cutting mechanism to cut either from the outside of the disc toward the center or from the center out.
4. A cam lever lowers the cutting head gently on the record preventing accidental damage to sapphire needles.
5. A vibration damper attached to the cutting head suppresses vertical modulation in the record groove and eliminates variation in groove depth due to surface irregularities in

\section*{PRESTO MODEL 'L" TRANSCRIPTION PLAYBACK}
 ably clear, wide range reproduction . . .
ordinarily expected from portable equipment.

The Model L Playback was developed to meet an insistent demand among the larger broadcasting stations and agencies for "something better" in portable reproducing equipment. Those who something better in portable reproducing equipment. Those who station time and programs will consider its exceptional performance station time and prog
well worth its cost.
L-2-Portable transcription playback
the disc. The damper also eliminates flutter when the records are played with pickups having a resonant peak in the low frequency range.
6. The cutting arm may be unlocked from the feed mechanism to cut spiral starting and runout grooves.
7. A time scale on the cutting arm shows the starting point for each size record and elapsed recording time at both 78 and \(331 / 3\) RPM.
8. The cutting head feed mechanism is located beneath the turntahle where it is protected from dust or accidental damage. The parts of this mechanism are hand finished and fitted and its performance is equal in every way to the overhead lathe type mechanism commonly used.
9. The recording amplifer includes a two microphone mixer, high and low frequency equalizers and a change-oves switch for continuous recording or re-recording. The amplifier and loudspeaker fit together to carry in a single case.
Y-2 Recorder
Y-4 Recorder (low impedance inputs).
PRESTO MODEL 'K' RECORDER

The Presto model K is a portable sound recorder, record player and public address system complete in a single carrying case. Exceptionally light and compact, it is ideally suited to the needs of sales training and industrial schools, teachers of speech, music and dramatics, as well as professional actors and musicians who require an instrument that can be carried easily and set up for operation in a few minutes time.

The mode! K records 15 minutes continuously at \(331 / 3\) RPM on one side of a \(131 / 4^{\prime \prime}\) disc. It may be connected to any home radio set to record complete radio programs. It also makes \(6,8,10\) and 12 inch records, and plays all makes of phonograph records. As a voice amplifying system it will serve audiences of about 500 persons.

Although it is the lowest priced complete Presto recorder, it contains many valuable features of the more expensive instruments such as:
1. A magnetic cutting head and pickup, the design used in the highest grade equipment.
2. A full sized, 6 tube amplifier having push-pull triodes in the power stage.
3. A high frequency equalizer for \(331 / 3\) RPM recording and a tone control for suppressing needle scratch when commercial records are played.
4. A safety cam lever for lowering the cutting head to prevent accidental damage to sapphire needles.
5. A detachable, dynamic loudspeaker which may be operated at any desired distance from the recorder.
6. A cutter feed mechanism located beneath the turntable where it is protected from dust or accidental damage.
7. Provision for quick change from cutting outside-in to inside-out.
8. The exclusive Presto rubber-tired turntable driven directly by a pulley on the motor shaft, a drive system that eliminates rubber pulleys and belts which are subject to rapid wear. Tumtable speed may be changed in 5 seconds from motor shaft.
These features, not found in any other low-priced recorder enable the user to make high quality recordings, consistently. They simplify the operation of the instrument for non-technical owners and reduce operating costs by preventing spoilage of discs and needles. As a result of its excellent performance, more Presto model \(K\) recorders are now used by schools, industrial concerns and in the home than any other recorder in a similar price range. K-8-Complete Recorder less microphone and stand.

 Top Performing ... QUALITY Products
}

\section*{DEVICE}

STYLE—Styled by one of America's leading industrial designers the "MASTERPRO" is a symbol of streamlined efficiency.

RUGGEDNESS-Constructed of steel and branze, chrome plated, assures long wear and the ability to stand up against rough treatment and abuse.

QUALITY-The "MASTER-PRO" is machined to tolerances unheard of in pre-war production. Working surfaces and moving parts are polished to a "micro finish" to insure velvety smoothness and positive operation.

FLEXIBILITY-The "MASTER-PRO" is a universal machine that can be readily atfached not only to the REK-O-KUT Model \(V\) Recording Table but to any other make regardless of height that has a standard center pin.

FINISH-Blue-gray wrinkle with chrome highlights.

QUIET-No gear noise or ratchet click.
. FASTER-A spiral up to a \(3 / 16^{\prime \prime}\) pitch can be cut.
. ACTION-Velvet smoothness of action obtained by
the use of newly designed over-running clutch.
4. FOOLPROOF-The Rek-O-Kut spiral device is equipped with two over-running clutches as compared to only one used in all other makes.
(a) One clutch is built into the leadscrew for the spiral.
(b) The second clutch is built into the crank. This is an exclusive Rek-O-Kut safety feature which causes he crank to over-run. Should an obsty attempt to turn it in the wrong direction, the recording will not be spoiled. This safety feature permits the leadscrew to continue revolving without hesitating. leadscrew to continue revolving witho
thereby avoiding an overcut groove.
Standard units are equipped with 120 line outside in leadscrews. Also available in O. I. or I. O. - 90, 105, 120 , at no extra cost, if requested when equipment is ordered
Models M-5S equipped with magnetic cutter.

\section*{12" Dual-speed TRANSCRIPTION TURNTABLE - For professional performance at home.}

Construction, quality and performance are equal to our model " \(G\) " Transcription Turntable which has received such amazing acceptance in the braadcasting and wired music field.

FEATURES:
TURNTABLE - Lathe turned and balanced. Made of laboratory tested Aluminum Alloy casting.
TURNTABLE SHAFT—Ground to a micro finish and lapped into the bearing for a precise fit.
CHASSIS - Flush mount . Aluminum, ribbed L beam type rectangu'ar dimensions easily fitted into a cut-out motor panel.
IDLERS-Made of special Neoprene formula which gives maximum traction.
MOTOR-Constant speed fitted with REK-O-KUT exclusively designed meto; pulley.
MAINTENANCE-Minimum attention due to self-oiling features.

\section*{CABINET CONSOLE}

\section*{FACILITY INCORPORATED}

\section*{1. RECORD HOLDER}

A unique drop-front door which has a self-contained pocker for holding approximately \(10016^{\prime \prime}\) records. When the door is opened the records come clear of the cabinet, and any one can be selected and withdrawn from the compartment in a matter of seconds.

\section*{2. LEVELING LEGS}

Four adjustable screw jacks are provided for leveling the console. These jack: have round flat plastic feet which are highly polished. The cabinets can be pushed easily withaut marring the floors.

\section*{3. CABINET RUMBLE}

The motor panel is fitted snugly into a felt lined frame. No scews are used to fasten the panel to the cabinet. Its own weight plus that of the turntable keeps it securely mounted. This method of mounting isolates the motor panel from the cabinet. Transmission of outside vibrations is thereby reduced to a minimum.

\section*{4. ELECTRICAL FACILITIES AND MAINTENANCE}

All electrical outlets are attached to the motor panel. Installation and servicing are simplified.

\section*{5. VENTILATION}

The motor chamber is completely ventilated.

\section*{6. CONSTRUCTION}

Piano type construction is used for rigidity.
7. FINISH

Grey metallic finish-one coat of filler and three coats of lacquer insures fine finish that will not chip.

\section*{8. DIMENSIONS}
\(32^{\prime \prime}\) high \(\times 24^{\prime \prime}\) wide \(\times 26^{\prime \prime}\) deep.
MODEL C-7-Furnished with Motor Panel cut out for installing REK-O-KUT Model "V" Recording Turntable or REK-O-KUT Model "G" Transcription Turntable.
MODEL C-7A-Furnished with a Blank Motor Panel for installation of other make Turnfables.

\section*{MODEL P-11}

\section*{PORTABLECABINET FOR}

\section*{16" REK-O-KUT RECORDING EQUIPMENT}

This sturdy case is constructed of heavy plywood reinforced with a steel band. It was designed and built to withstand rough usage.

\section*{Features:}
1. The motor panel is cut out and drilled for mounting the Model " \(V\) " recording turntable.
2. All electrical facilities that are required are attached to the motor panel to facilitate installation.
3. A special drawer for storing the Master-Pro recording mechanism when the recorder is not in use, is built into the case.

PARA-FLUX IREPRDDIUCEIRS
}

Ideally Suited For . . .
* AM-FM BROADCAST STATIONS
\(\star\) RECORDING STUDIOS
* WIRED MUSIC COMPANIES
\(\star\) THEATRES AND FACTORIES
THAT UTILIZE RECORDINGS
* HIGH FIDELITY HOME SETS

The PARA-FLUX reproducer with interchangeable heads, illustrated below, for vertical, lateral or universal, uses only one arm and equalizer. All possess the same impedance matching to the equalizer. High output level affords an important advantage in broadcasting as to value of signal level to background noise. Response, all models, linear from 40 to beyond 11,000 c.p.s.

Universal Reproducer

Vertical Only Reproducer

Lateral Only Reproducer \({ }^{\circ}\)

Over 1500 PARA-FL.UX REPRODUCERS are now in use by \(F M\) and \(A M\) Stations.

PARA-FLUX reprodurers set a new high standard for performance, flexibility and dependability. They are well suited for ust wherever the most realistic reproduction of transcriptions is uecessury. Anong the outstanding design and construction features are found:
\begin{tabular}{ccc} 
HIGH OUTPUT: & I MW Ref. Level & 6 MW Ref. Lev \\
Vertical Head & -43 db & -60 db \\
Thateral Head \\
Universal Head & -53 db & -60 db
\end{tabular}

PLUG-IN HEAD: Vertical, lateral and universal heads use same arm and equalizer. Head can be removed and replaced in a few moments by means of plug connection.
LONG RECORD LIFE: Fxtremely low mass of moving element (only 18 milligrams) insures longer record life. Stylus pressure, all models, is under 25 grams (carefully factory adjusted)
DIAMOND STYLUS: Selected hard African diamond points, highly polished and finished to tolerances of \(1 / 10,000\) inch.
VARIABLE OUTPUT IMPEDANCE: 30, 250 and \(500 / 600\) ohms. DESIGNED FOR CUING: "Hair-Jine" indicator on head and precise stylus construction makt accurate cuing possible and permit "backtracking" without damage to record or head.
RUGGED CONSTRUCTION: So designed that no damage will result if reproducer is accidentally pushed across recording. A graceful finger lift prevents reproducer from slipping when lifted off the finger lift pronseription.
The PARA-FLUX reproducer is delivered completely assembled, ready for use. It comprises the head (your choice of lateral, vertical ready tor use, \(t\) comprises the head (your ch
or universal), arm and equalizer and switch.
UNIVERSAL HEAD MODEL UL-IDA: For superior performance where hoth lateral and vertical reproduction is required from the same unit. Selected hard African diamond stylus has 2 mil. radius. Design is such as to permit useful output should lateral transeription

Le started while equalizer is accidentally left in vertical switch position, and vice-verat. For best results on shellac records, use LL-1D tion,
VERTICAL HEAD MODEL VL TDA Pid VERTICAL HEAD MODEL VL-1DA: Provides maximum in quality of reproduction from vertical ("hill and dale") recordings, while discriminating apainst lateral response. The selected hard Arrican diamond stylus has il 2 mil. radius.
LATERAL HEAD MODEL LL.IDA: Designed to provide the most advanced quality in tateral reproduction, while discriminating against vertical response. Selected hard African diamond. Stylus has a 2.5 mil. radius.
REPRODUCER ARM MODEL A-16: Die-cast aluminum arm, swing. ing on a radius for \(16^{\prime \prime}\) records, makes use of unique and exclusive (patent pending) friction-free bearings that insure less side-of-groove wear; no oiling, cleawing or adjusting necessary. Counterbalance keeps stylus pressure at under 25 grams. Height adjustment permits adapting arm to any turntable platters in use. Arm (with stand) is fimished in attractive blue-gray and polished aluminum center. EQUALIZER AND SWITCH MODEL EL-2: Since PARA-FLUX reproducers are all inear in response, an equalizer is required to correct any frequency pre-emphasis used in recording. Model ED-2 equalizer is effective with all three types of PARA-FLIUX heads. It provides is effective with all coree types of PARA-Flux heads. it provides Equalizer switch, providing five positions (two for vertical and three for lateral recordings). The newly designed Equalizer, in one comprote packare embodies double housing which rives double shielding arinst hum pickup. Combines the switch mechanism as well as impedance natching and correct equalization for the switch por sitions.
By means of an adjustable shank, the switch can be adapted to wood or metal pancls of various thicknesses. Equalizer requires only single "" diameter hole for mounting. Accommodates any panel thickness from \(\frac{7}{2}^{-16}\) to \(\frac{19 n}{\frac{10}{2}}\) "

\section*{16" THANSCRHPTHON PLAYERE \(\underset{\text { MODEL }}{\text { 2-SPEED }}\) TP-IGC}

\section*{FEATURES}
\(\star\) Switch output impedance: 30,250 , and \(500 / 600\) ohms.
\(\star\) Fully Portable.
* Small overall size: in carrying position \(23^{\prime \prime}\) w., 171/2" h., \(8^{\prime \prime}\) d.
\(\star\) Light in Weight.
\(\star\) Compact for Convenient Carrying.
\(\star\) For Records up to \(16^{\prime \prime}\).
\(\star 2\)-Speeds, 78 and 33-1/3 R.P.M.
* Constant speed heavy duty motor, silent, smooth operation.
* Easy installation.

Model TP-16C—TRANSCRIPTION RECORD PLAYER, precision built and expertly engineered, fills a long-felt need for an efficient, trouble-free unit at a reasonable price. It is especially well suited for use by wired music studios, broadcast stations, and in homes where superior recorded entertainment is required. Records up to and including those \(16^{\prime \prime}\) in diameter can be played at either 78 or \(33-1 / 3\) r.p.m. Free of wow and rumble. The following features prove the worth of Model TP-16C:

MOTOR: Constant speed type, incorporating oversize bronze bearings. Runs cool (temperature rise only \(10^{\circ}\) over ambient). Underwriters Approved. Full "floating mount" panel so that no metal touches metal.
Drive wheel and idler have special formula neoprene "tires" that are precision ground for concentricity. These "tires" have natural adhesive properties that result in the turntable being driven with absolutely no slippage. Longer life is assured.

SPEED-CONTROL on panel permits instant selection ot 78 or 33-1/3 r.p.m. Switch has center "off" position;
when in "off" position, drive wheel and idler are automatically disengaged-this means that no flat spots can develop on the wheels.

16" TURNTABLE embodies special re-enforced construction (patent pending) similar to an automobile flywheel. You get "wowless" performance. Table fits snugly over a specially formed spindle assembly.

\title{
PICK-UP UNITS A \(\square \prod A\) A RECORDERS Thestandated by which Others are Gudged and Valued
}

\section*{NEW Addax HIGH FIDELITY CUTTERS}

AUDAX CUTTER H-5-Substantially
FLAT to 10,000 cycles. Distortion about \(.5 \%\) at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 500 ohms. Iisted at. . . \(\$ 185.00\)

AUDAX CUTTER H-4-Substantially FLAT to 9,000 cycles. Distortion about \(1.2 \%\) at 1000 cycles. Fully modulates groove with input of about 16 db with 96 lines. Impedances up to 500 ohms. Listed at. . . \(\$ 125.00\)

AUDAX CUTTER H-3-Substantially FLAT to about 7500 cycles. Distortion about \(1.8 \%\) at 1000 cycles. Fully modulates groove with input of about 18 db with 96 lines. Impedances up to 4000 ohms.

Listed at. . . \(\$ 83.00\)
AUDAX CUTMERS are magnetically powered - their characteristics are not
 affected by temperature or atmospheric changes. They are readily interchangeable on most good recording machines.

\section*{Audax PICKUPS using conventional needles}

L-17-For records up to \(12^{\prime \prime}\). FLAT within about 3 db to about 6500 cycles, with slightly rising bass curve reaching about 6 db at 50 cycles. Point-pressure about \(17 / 8\) oz. Output approx. - 20 db . Black and Silver finish. Overall length from turntable center to rear end of arm \(9 \frac{1}{16}\) ". High impedance or 200 or 500 ohms. Listed at. . . \(\$ 27.50\)

L-18—For records up to \(16^{\prime \prime}\). Performance identical with L-17 above. Overall length from turntable center to rear end of arm \(12_{16}{ }^{7 \prime \prime}\). High impedance or 200 or 500 ohms.

Listed at. . . \(\$ 39.50\)

AUDAX pickups are NOT affected by temperature or atmospheric changes.

\section*{There Is No Substitute for EXPERIENCE}

When you are buying a motor car, washing machine or refrigerator, etc., almost instinctively you know that of first consideration is the experience of the manufacturer behind the product. Has he the all-important KNOW-HOW that comes only with years of experience? In no other field of endeavor is this KNOW-HOW more important than in the field of ELECTRONIC Sound Apparatus, where ALDAX has set the pace for over twenty-five years.

\title{
Audax TIIVIVRIB POI
}

R-55
For recordings up to \(12^{\prime \prime}\). OUTPUT, high enough for most amplifiers (about-20 db). Response, FLAT within about \(21 / 2 \mathrm{db}\) from 50 cycles to 8000 cycles. Other details identical with R-61 below.

Listed at \(\$ 33.00\)

\section*{R-56}

For recordings up to 18 ".
Performance identical with R-55.
Listed at \(\$ 48.00\)

\section*{New . . .}

Because a "permanent-point" will maintain its original shape for only a limited number of plays, after which it progressively erodes the record grooves, the importance of being able to replace it has always loomed big. Heretofore such replaceability carried with it a severe penalty in range, compliance, point-pressure, etc., etc. . . . important factors with modern discs. Most of the TUNED-RIBBON Models were designed to satisfy these factors. (For technical details on this remarkable development, send for editorial reprint.l

73-A. . . For recordings up to \(12^{\prime \prime}\)
Response linear 50 cyc. to \(10 \mathrm{k} . \mathrm{c}\). Point Pressure about 25 grams. Genuine Sapphire Stylus, EASILY REPLACED BY USER. Output about 30 db (connected to matching load). Impedance 200 ohms. May be made in any imp. up to 500 ohms. Vibratory Momentum very low. Quick plug-in connectors. Arm is Tangent-Tracking, ball-thrust and pivot-point bearings. Bronze and Chrome finish. Turntable center to rear end of arm 10 ".

Listed at \(\$ 66.50\)
74-A. . .For recordings up to \(18^{\prime \prime}\)
Performance identical with 73-A above. French Grey and Chrome finish. Turntable center to rear end of arm 13 \(\frac{9}{16}\) ".

Bringing to Recorded Music Something That Was Not There Before

\section*{STUDIO-81}

For LATERAL recordings up to \(18^{\prime \prime}\). For use in Radio Stations, Studios and wherever superb-quality performance is paramount. Response Linear 20 cyc. to about 15 k.c. Point. Pressure about 14 grams. Diamond Stylus. Output about -35 db (connected to matching load). Impedance 200 ohms. Moving Mass Near Zero. Quick plug-in connectors. Arm is Special Studio Design, aluminum, Tangent-Tracking, ball-thrust and pivot-point bearings in gimbal mountingeliminating side-thrust and drag. French Grey and Chrome finish. Turntable-center to rear end of arm 181/2".

Listed at \(\$ 165.00\) (less equalizer)

STUDIO - 99
For VERTICAL recordings up to \(18^{\prime \prime}\). For use in Radio Stations, Studios and wherever superb-quality performance is paramount. Response Linear 20 cyc. to about 15 k.c. Point Pressure about 28 grams. Diamond Stylus. Output about - 40 db (connected to matching load). Impedance 200 ohms. Moving Mass Near Zero. Quick plug-in connectors. Arm is Special Studio Design, aluminum, Tangent-Tracking, ball-thrust and pivot-point bearings in gimbal mountingeliminating side-thrust and drag. French Grey and Chrome finish. Turntable-center to rear end of arm \(181 / 2^{\prime \prime}\).

Listed at \(\$ 195.00\) (less equalizer)

> AUDAX EQUALIZER FILTER - 200 ohms input - five positions, covering NAB Orthocoustic, Vertical, and 78 RPM—also includes Filter positions. Listed at \(\$ 83.00\)

AUDAX REPLACEMENT STYLUS-Genuine Sapphire Jewel—Designed expressly for TUNED-RIBBON reproducers.

Listed at \(\$ 3.00\)
Any model TUNED-RIBBON head may be had for replacement on automatic changers or other machines.

\section*{Motors for driving furntables, record changers, funing devices}

\section*{MODEL 80}

The famous Model 80 Alliance phonomotor, operating on 110 or 220 volts, is made for 40,50 or 60 cycles, 16 watts input, 78 RPM. The Model 80 has no gearsruns at an even speed-has a smooth, quiet, positive friction-rim drive. Amply proportioned bearings with large reservoirs assure long life. Motor and idler plate are shock mounted to minimize vibration trans-

Alliance Model K is a 25 cycle companion to the Model 80 phonomotor. It operates on 110 volts, 25 cycles, at 12-watt input. This phonomotor is especially designed for 25 cycle operation. It has all the advantages of the popular Model 80. The mounting may be interchanged without any sacrifice in performance. Motor and idler plate are shock mounted to cabinet mounting plate for low vibration transfer to the turntable and motor board. Available in 8 or 9 inch turntable sizes only. Maximum depth below base mounting plate, \(21 / 4\) inches.
fer to turntable and motor board. Forced ventilation gives cool operation-the slip-type fan avoids any possible injury. Mounting plate maintains correct turntable height, regardless of mounting board thickness. Available with 8,9 or 10-inch turntable tops. Maximum depth below base mounting plate, 21/16 inches.

Miniature Motors mass produced for every need

\section*{MODEL K}

Besides Dowering the Model K phonomotor, Alliance Model K PowrPakt Motors are raear power sources for driving a multitude of other devices, controls and mechanisms. It can be used to power fans, movie projectors, toys, motion displays, switches and control systems, business and vending machines, and will open or close valves or vents in heating systems. Here is a shaded pole induction type motor which is the last word in efficient design. Mass produced, precision made, and available at low cost in quantities, this motor can be incorporated in many devices.

\section*{MODEL MS}

The Alliance Powr-Pakt Model MS Motor is for 110 volt, 60 cycle operation. Here is a truly miniature power plant, so compact and light in weight that it can be used where many designs call for "tailored power". The Model MS has been developed to fill the growing need for small power to increase the motion and utility features of thousands of new products!

SPECIFICATIONS - Draws about 25 watts at 3000 R.P.M. no load. The speed is \(\mathbf{2 5 0 0}\) to \(\mathbf{3 0 0 0}\) R.P.M. depending on frequency and load. Develops about .006 h.p., \(5 / 32\) inch diameter, centerless, round steel shaff. Has latest type graphite bronze oilless bearings, self-aligning and amply proportioned. Motor measures \(i 3 / 4\) inches \(\times 2\) inches \(\times 31 / 8\) inches.

\title{
GARRARD GARRARD
}

The new GARRARD Model RC60 Record Changer is a radically improved design, incorporating all the scientific developments and technical knowledge acquired during the war years. Yet, the RC60 retains all the time-proven GARRARD features, which so many others now proclaim as "new".
Through the years, GARRARD users have learned that they can depend on this superior mechanism to give them quiet, efficient, trouble-free performance. Built up to a standard, not down to a price, GARRARD offers today; as always, several exclusive features not found elsewhere.
GARRARD'S speed-regulated, governor-controlled motor is built to give powerful, regular running. It is the finest motor of its type and runs silently without vibration or speed variation. It is fitted with patented governor and phosphor bronze bushings and fittings are used throughout. GARRARD'S speed regulator makes it possible to adjust the turntable for perfect speed ( 78 rpm ), or to retard or accelerate the tempo of any record.
The RC60 is a "mixer" changer. It plays both 10 " and \(12^{\prime \prime}\) records intermixed in any assortment, any combination. There are no buttons to push or switches to throw. It is entirely automatic.
GARRARD'S non-slip spindle is another exclusive feature. This spindle prohibits slipping and skidding between records, thus eliminating wows and watery reproduction.
The RC60 is available with either one of three excellent pickups. One is the GARRARD Magnetic pickup (high impedance). This pickup is a high quality pickup using conventional needles of the interchangeable type, or may be fitted with permanent needle by the user. For those who prefer a low pressure Crystal Pickup, this is also available, either with permanent stylus or with cartridge for replaceable needles. Specify pickup desired, when ordering.

All GARRARD pickups designed for use with replaceable needles are supplied in the new GARRARD swivel head which rotates to make needle insertion easy. All GARRARD pickups are interchangeable with one another.

With superior parts and craftsmanship, the GARRARD changer costs a bit more, initially. Over the normal life, it is most economical because of efficiency of operation and lack of servicing.

Minimum cabinet dimensions are \(15^{\prime \prime}\) wide \(x 13^{\prime \prime}\) deep \(\times 51 / 2^{\prime \prime}\) clearance above the unit plate and \(41 / 2^{\prime \prime}\) clearance below the unit plate.

Model 60/LC-AO Model, 110/130 Volts, \(50 / 60\) cycles; with lowpressure Crystal pickup and permanent stylus.
Model 60 LR-AO Model, as above, but furnished with crystal pickup for replaceable needles.
Model 60/LM-AC Model, as above, but furnished with Garrard's new Magnetic pickup for use with replaceable needles.

Above models availabie with Universal, AC-DC motor; 110/130 and \(200 / 250\) volts, \(25 / 60\) cycles. Substitute " U " for " \(L\) " when ordering.

The Type V Phono Assembly is the newest unit of a long line of high quality phono assemblies for playing single records.

Here again, GARRARD has spared no effort or expense to produce the finest possible player for those who demand the best in record reproduction.

The entire assembly is typically GARRARD in that it features the finest type of phono motor-speedregulated and governor-controlled. This exclusive feature makes it possible to adjust to perfect speed
( 78 rpm ) or to accelerate or retard the tempo to suit the listener.
The Type V Assembly features an entirely new, unique mounting arrangement which represents the first genuine forward step in mounting design. This "bow" mounting is so efficient that even a blow struck on the motor board will not cause the tone arm to skip or repeat a groove. This is another exclusive feature and another GARRARD "first."

The Type V may be had with either of your choice of quality pickups for faithful reproduction. It is available either with high fidelity, low-pressure Crystal pickup with permanent stylus, or with Crystal pickup for use with replaceable needles, or with the GARRARD high impedance Magnetic Pickup for use either with replaceable needls or with a permanent stylus of the user's selection. The latter two pickups are contained in the new GARRARD Swivel Head which makes needle insertions easy and convenient.

Minimum cabinet dimensions are \(15^{\prime \prime}\) wide x \(13^{\prime \prime}\) deep \(\times 4^{\prime \prime}\) clearance below the motorboard and \(31 / 2^{\prime \prime}\) clearance above.

Type V/LC-AC Model, \(110 / 130\) volts, \(50 / 60\) cycles; with Iowpressure Crystal Pickup and Permanent stylus.

Type V/LR-AC Model as above but furnished with crystal pickup for use with replaceable needles.
Type \(V / L M-A C\) Model as above but furnished with GARRARD'S new Magnetic Pickup for use with replaceable needles.
Above models available with AO-DC Dual Voltage-Universal110/130 and \(200 / 250\) volts, \(25 / 60\) Oycles.

\section*{GARRARD GARRARD}

The new GARRARD 201-V two-speed motor is the new and improved model of our internationally famous 201 T . It is now offered in its latest trouble-free form exactly as produced for the U. S. Navy and British Admiralty during the War.

The governor-controlled motor operates at either \(33-1 / 3\) or 78 rpm with absolute constancy and without waver or rumble. It is ideally suited for use where truly superior reproduction is desired.

Because of its extra-heavy rotor, which is slow-running, the resulting torque makes this motor amazingly smooth and silent. In sheer performance, it is the finest we have to offer. It is a self-starting induction type unit and is fitted with the patented GARRARD governor to insure perfect regularity.

The \(201-\mathrm{V}\) is equipped with Speed Regulator by means of which a wide range of speeds is possible-as well as perfect adjustment at \(33-1 / 3\) or 78 rpm . This regulator is on an extension arm so that \(16^{\prime \prime}\) records can be speed-controlled.

MODEL 204-V—Two speeds, \(331 / 3\) ard 78 rpm; dual voltage, AC-110/130 and 200/ 250 volts, \(40 / 60\) cycles.

GARRARD Carmying Canes and GARRARD Table Modol Gobinets are made especially for us, to our standards.

The Carrying Case is of solid wood throughout and is covered with finest procurable parchment type material. Sewn leather edges rum completely around the case. The Hardware used is the very finest and it has two locking snaps, with keys.

The Table Model Cabinet is a hand-inished case finished in striking mahogany. Its appearance is that of a high quality piece of furniture, and it makes possible the easy creation of "Combinations."

MODEL CC1--Carrying Case with Motor Board uncut.
MODEL CC6-Carrying Case with Motor Board cut out to accommodate GARRARD Model RC60 Record Changer.
MODEL TM1-Table Model Cabinet with Motor Board uncut.
MODEL TM6-Table Model Cabinet with Motor Board cut out to accommodate Model RC60 Record Changer.

\section*{GARRARD SALES CORPORATION}

\section*{315 Broadway}

New York 7, N. Y.

\section*{MODEL 50 for Smaller Radio-Phono Combinations}

Model 50, low in price, high in quality, is sturdily built, compactly designed for use with smaller radio-phonograph combinations where space is limited. More important Model 50 features are: - Spring cushioned spindle for record protection - Heavily Flocked Turntable - Famous Webster • Chicago heavy duty motor - "MANUAL" switch - Plays ten 12 -inch and.twelve 10 -inch records at one loading. Base dimensions: \(12^{\prime \prime} \times 121 / 8^{\prime \prime}\). Vertical space requirement: \(81 / 2^{\prime \prime}\) above, \(21 / 2^{\prime \prime}\) below top of mounting board. Complete with mounting hardware, template and instructions. Shipping weight: 17 lbs.

Model 56

\section*{with Automatic Stop}

The most popular and widely used record changer. Model 56 features velocity trip, fast change cycle and positive action. The stainless steel spindle is cushioned for record protection. Turntable is heavily flocked for quiet operation and rich appearance. Automatic stop is an operating convenience. Manual switch permits playing of small records, home recordings or "inside-out" discs. Smooth even power is provided by the Webster - Chicago shaded pole, 4 -pole motor. Base dimensions: \(14^{\prime \prime} \times 14^{\prime \prime}\). Vertical space requirement \(61 / 2^{\prime \prime}\) above, \(21 / 2^{\prime \prime}\) below top of mounting board. Complete with mounting hardware, template and instructions. Shipping weight: 18 lbs .

\section*{Model 70}

\section*{Webster - Chicago Intermix}

Model 70 is the finest Webster - Chicago record changer, designed and styled for the most elaborate combinations. Handles intermixed \(10^{\prime \prime}\) and \(12^{\prime \prime}\) records or a full stock of either size. Retract. able idler wheel is freed when the changer is not in use. Automatic stop. Removable spindle for easy loading and unloading. High impedance pickup with replaceable permanent-type needle. Attractive brown hammered finish. Base dimensions: \(14^{\prime \prime}\) x \(14^{\prime \prime}\). Vertical space requirement: \(91 / 2^{\prime \prime}\) above, \(21 / 2^{\prime \prime}\) below top of mounting board. Complete with mounting hardware, template and instructions. Shipping weight: 19 lbs .

These Webster Chicago changers operate on 105-120V. 60-cycle. Can be
 readily converted for 50 -cycle operation by using a 50 -cycle drive sleeve, Part \(17 \times 412-11\) to replace 60 -cycle sleeve.

\section*{ORDER NOW!}

\section*{websten If cuicaco}

\section*{MODEL 79}

\title{
WIRE RECORDER FOUNDATION UNIT
}

This Webster-Chicago Wire Recorder unit is especially designed for the experimenter, amateur and engineer for building a complete magnetic recorder or adding a wire recorder to a sound system.
Model 79 foundation unit consists of the complete wire transporting mechanism, a triple-purpose xecording head (records, erases and plays back), an oscillator coil, a 15 minute spool of recording wire, and an instruction sheet with suggested circuit diagram. The unit will make and play back continuous recordings ap to a full hour.
The recordings may be replayed thousands of times without any appreciable loss of volume or tone quality. If and when desired, old programs may be erased and new recordings made.
Physical specifications: \(101 / 2^{\prime \prime} \times 83 / 4 \prime \prime \times 51 / 2^{\prime \prime}\left(31 / 2^{\prime \prime}\right.\) below main plate, \(2^{\prime \prime}\) above) Net. Wt. 10 Ibs.

\section*{MICRO-SONIC \\  \\ RECORD CHANGERS}

No, other record changer compares with Micro-Sonic's British-built, automatic record changer. Feature by feature, Micro-Sonic's record changer leads all competitors in the field, according to the findings of a firm of impartial engineers.

Micro-Sonic's record changer is completely automatic; it's action, fool-proof. For instance: restraining the fone arm while a record is being played cannot possibly damage the mechanism. And there are dozens of other features that set Micro-Sonic's record changer apart from all competition.

You owe it to yourself to see this record changer. You will agree that it is "built like a battleship and has the precision of a fine watch." Micro-Sonic's record changer is being demonstrated at the showrooms of the MICROSONIC CORPORATION, 44 West 18th Street, New York, N. Y. Be sure to see it!
"Built like a battleship . . . with the precision of a fine watch."

\section*{Distinctive FEATURES}
1. Records of different sizes, \(10^{\prime \prime}\) and \(12^{\prime \prime}\). may be played intermixed.
2. Offset pick-up head insures precise tracking.
3. Pick-up does not fall into place; it is gently placed, mechanically, into the outermost record groove.
4. Restraining the movement of the tone arm by force, while the changer cycle is in operation cannat damage the changer.
5. Exłreme simplicity in loading and unloading.
6. Positive and fool-proof selection of \(10^{\prime \prime}\) and \(12^{\prime \prime}\) records by two selecting mechanisms. Micro-Sonic is the only unit with two; all others have one.
7. A straight non-rolating, unbent spindle, prevents record chewing and distortion.
8. Record drops by automatically controlled mechanism on a cushion of air.
9. Tilting does not interfere with performance. Records remain parallel to turntable, and to each other, of all times.
10. Automatically stops at the end of the last record, with pick-up off the record.
11. Repeat, reject, start, and stop incorporated into one control . . . convenient, simple.
12. Playing may be stopped at any point on the record, with no possibility of needle biting into record. Pick-up lifts off record when stop button is pushed.
13. Extremely low scratch level.
14. Super heavy-duty motor has the highest torque of any changer motor on the market.
15. A governor regulates speed of motor, insuring accurate reproduction.
16. A heavy \(12^{\prime \prime}\) turntable.
17. Plated changing mechanism remains rustproof, jam-free, and silent throughout its unusually long life.

\section*{RecarDise Hame Recarding Blanks "Smapshots-in-Sound"}
\(\mathrm{T}_{\text {hare }}\) ret two types of tootitrsa which may be applied to the surfaces of home may be appling blanks-cellulose nitrate or ethyl cellulose. Of these two, it has been proved cellulose. Of these two, it has been proved
that cellulose nitrate is far suparior bethat cellulose nitrate is far suparior be-
cause of a number of advantages, inchudcause of a number of adigh fidelity, life-like reproduction, long ing high fidelity, life-like reproduction, long
wearing qualities, and the ability to withwearing qualities, and the ability to with
stand age and playback without cracking stand age and playback without cracking
or peeling. In fact, cellulose nitrate is the specified coating for discs used in commercial broadcasting stations, recording studios, governmental agencies and all othar professional assignments. While ethyl cellulose may not enjoy the high rating of cellulose nitrate, it, nevertheless, has a tilm approved by the Underwriters Iaboratories, and affords satisiactory reproduction and playback life.
RecorDise blanks manufactured for regular stock are coated with cellulose nitrate-the finest that money can buy. Customers are assured of all the results explained in the foregoing paragraph. Made up on special order, and af no increase in cost, is a complete line of RecorDisc blanks employing ethyl cellulose with the U/L approved film. etayl cellulose with the either type of coating, are available in the following bases and identifying labels:

\section*{ORANGE LABEL}

BOND BASE
Designed primarily for the home recording fan, these discs are admirably suited to the average type of amateur transcription, where low price is required. Heavy and firm, with a compo base that is thick, these recording blanks are carefully coated with our standard RecorDisc surface compound. Because of their low cost, they are a "party" favorite. Professional nitrate coated.

\section*{RED label}

\section*{ALUMINUM BASE}

These aluminum base discs, made on heavy . 021 aluminum, are coated with the famous RecorDisc flawless compound to assure high fidelity reproduction over wide frequency ranges. Comparable in quality trequency ranges. Comparabe used by broadcasting stations and to those used by broadcasting "Red Label" discs have been reduced in size for unidiscs have been reduced in size for uni-
versal adaptation by those who want proversal adaptation by those who want pro-
fessional discs for equipment of non-professional dises for equipment of non-pro-

\section*{RECORDING AND PHONOGRAPH STYLI, NEEDLES AND ACCESSORIES}

\section*{SAPPHIRE STYLUS}

While this type of cutting needle represents a greater initial investment, it has the longest life and produces superior instantaneous recording. The specially lapped sapphire point cuts a clean shiny groove with the lowest suriace noise. Ordinarily, these styli can be used for ten hours of recording time. In addition, they may be resharpened, periodically, as many as 15 times. Used extensively in professional recording as well as by the semi-professional and the advanced amateur. Packed in plush lined, individual jewel boxes. List price, each

\section*{STELLITE STYLUS}

Carefully machined, of a special metal alloy, these needles produce results almost as good as those obtained from the sapphires. Not as fragile as more expensive sapphire styli. Recommended for less experienced recording operators. Packed one to \(a\) protective card. List price, each \(\$ 2.00\)

\section*{RECORDISC}
"Special QX-5" Recording Stylus Here is a recording stylus which presents an unbeatable combination in tonal repre duction, top performance, long life and unusual value. Made to our exacting laboratory specifications, it has a filter cutting point and recessed shank for smooth and easy cuiting. Precision made of processed and tempered steel, and especially designed for those who seek a very fine but not fragile recording tip. List price, each

\section*{HAND LAPPED STEEL STYLUS}

Carefully hand iapped for greater fidelity. Packed one to the protective card. List price, each

\section*{STEEL STYLI}
(Nickel Plated Shank)
Recording life of approximately 1 hour each. Packed 3 to a card. List price, 3 for \(\$ 1.00\)

\section*{RECORDISC}

Sapphire Phonograph Needles
Preferred by the most critical music lovers and discerning artists - for both phonograph records and recording discs. Advanced RecorDisc design and features result in higher fidelity, bell-like clarity, greater listening enjoyment, uniform performance throughout playing life, and less wear on the record suriace. It has been acclaimed as one of the best needles available today. 7000 plays. List price \(\$ 2.50\)

\section*{TRANSCRIPTION NEEDLES}

Scientifically designed to fit perfectly into the grooves of recording and transcription blanks. They have a wide frequency response and unusual tonal brilliance. Wear on records reduced to minimum. 25 in envelope. List price.........................er pkg. 25 \$

\section*{RECORDISC}

\section*{"Coronet" Phonograph Needles}

Clear, clean, brilliant reproduction throughout each musical note. Made from precious metal alloys, with a satin-smooth, noncorrosive tip. Your ears will convince you of the superiority of these needles, and tell you why they are the choice of juxe box and record changer owners. May be used on any type of phonograph-electrical or mechanical. 3000 plays. List price... \(\$ 1.00\)

\section*{RECORDISC}
"Imperial" Phonograph Needles
Made to our own special formula, RecorDisc "Imperial" Needles provide full tonal range, less scratch and hiss, minimum needle "talk," and longer record life. Uniformly excellent in quality, these needles become an integral part of automatic record changers for which they are an espe-
cial favorite. 5000 plays. List price...... \(\$ 1.50\)

\section*{ACCESSORIES}

\section*{RECORD PRESERVER}

This lubricant not only cleanses and preserves the fresh suriace, but lubricates the groove to a degree where the improvement in tonal qualities is readily discernible to the ear. List price........ 2 oz. bot., \(45 \%\)

\section*{TURNTABLE LUBRICANT}

This RecorDisc lubricant is recommended for smooth operation of all parts subject to friction wear. List price........per iar, \(40 ¢\)

\title{
audiodises
}

\section*{ALUMINUM BASE RECORDING \\ DISCS}

First produced in 1939, Audiodises quickly won the acceptance of both professional and amateur recordists. Beccuse of their many superior qualities, these instantaneous recording dises have gained a place of eminent leadership in the recording world.

\section*{AN AUDIODISC FOR EVERY RECORDING NEED}

RED LABEL AUDIODISCS are standard throughout the recording profession exceeding the professional demands of broadcasting stations, sound and movie studios and other exacting applications when top quality and dependability are essential requirements. Their many exclusive features have given new meaning to high fidelity recording and life-like reproduction. They are the finest discs obtainable.
SINGLE FACE RED LABEL AUDIODISCS have exactly the same fine qualities as standard Red Label and bring real economy to applications requiring but one side. Both sides are coated with the recordable side identified with embossed label.
YELLOW LABEL AUDIODISCS are the popular choice for all general purpose recording. Of high uniform quality, they are designed primarily for commercial recording studios, educational institutions, home recordists and other applications where the super quality Red Label Audiodiscs are not required.
REFERENCE LABEL AUDIODISCS are especially adapted for making test cuts, filing and reference recordings, auditions and equipment adjustments. Their unusually low price gives maximum economy.

BLUE LABEL AUDIODISCS offer the very best in recording quality for schools, homes, amateur and demonstration work. Made of exactly the same materials used in the manufacture of professional type Audiodiscs-except on a thinner aluminum base-these discs have brilliant tone, long-playing life, no audible needle scratch and are of consistent quality.

MASTER AUDIODISCS are the outstanding choice where copies of recordings (pressings) are to be made by the electroplating process. The excellence and consistent quality of these dises are well known to all record processors.

\section*{PROPERTIES THAT MAKE FOR} AUDIODISC LEADERSHIP

\section*{UNIFORM COATING}

Audiodiscs' exclusive machine process produces a smooth flat coating seven thousandths of an inch thick, free from swirls, waves and "orange peel" effect. The depth of the coating is consistent within one-half thousandth of an inch.

\section*{LONGER STYLUS LIFE}

The homogeneous coating is free from microscopic abrasive materials and surface imperfection which, in inferior discs, damage cutting points and cause extraneous noises in playback.

\section*{SILENT BACKGROUND}

Audiodises, cut under good recording conditions are entirely free from audible "background scratch."

\section*{LONG PLAYBACK LIFE}

With correct playing equipment an Audiodisc can be played for more than a hundred times with no noticeable increase in surface noise.

\section*{BRILLIANT FREQUENCY RESPONSE}

These discs are noted for their brilliant high frequency response. Audiodiscs "speak for themselves" with quality performance that pleases the most critical recordist.

\section*{NO DETERIORATION WITH AGE}

A special curing process removes from Audiodises the last trace of volatile constituents. Dises made over six years ago still cut easily and play back perfectly.

\section*{CONSISTENT QUALITY}

Audiodiscs are manufactured by a unique automatic precision-machine process which assures consistent quality. This uniformity is a feature that helps engineer and amateur attain the highest degree of recording excellence.

\section*{GENERAL NOTE:}

All Audiodiscs are manufactured on aluminum base. Red Label dises are embossed, Yellow and Reference discs have paper labels-Master Audiodiscs have no labels. All Audiodiscs have center-pin holes and three drive-pin holes except Master discs, which have one drive-pin hole. Lint-free envelopes are supplied in the packages of Red Label and Master discs. Otlier dises are packaged in their envelopes.

\section*{MICROSCCPPICALLY MATCHED RECOROIIGG AND PLAMBECK STYLI}

However excellent a recording disc may be, the quality of sound obtainable from it can be no better than the points used in the recording and playback. For this reason, the producers of Audiodiscs offer a complete Ine of recording and playback points engineered to bear proper relation to one another. Made by skilled craftsmen and conveniently packaged in cards or boxes, Audiopoints are available in three types of recording styli and three types of playback points.

\section*{AUDIO RECORDING POINTS}

RECORDING SAPPHIRE AUDIOPOINT No. 14. Intended for use by professional recordists, this Audiopoint produces the best possible recording. The jeweled point with \(87^{\circ}\) included angle, correct radius and fine polish, cuts a silent, shiny gronve for many hours. Each stylus is disc-tested to rigid specifcations on a recording machine, thus guaranteeing quality and uniformity. Supplied with short or stylus is disc-tested to rigid specifications on a recording
long shank. List Price \(\$ 7.25\) (Resharpening cost \(\$ 2.90\) )
RECORDING STELLITE AUDIOPOINT No. 34. A favorite recording stylus with many professional and non-professional recordists. With \(87^{\circ}\) included angle and correet radius, this point cuts a quiet, shiny groove for several hours. Each stylus is disc-tested on a recording machine. Supplied with short or long shank. List Price \(\$ 1.50\) (Resharpening cost \(\$ .75\) )
DIAMOND-LAPPED STEEL AUDIOPOINT No. 50. Particularly adapted for use by non-professional recordists. Each point when properl used with Audiodiscs, cuts a shiny, quiet groove and gives from 15 to 30 minutes actual recording time. A dozen of these Audio points should thus cut from 60 to 120 faces of ten-inch discs or, of course, a much larger number of smaller size discs. List l'rict \(\$ 4.00\) (per doz.) A card package, 3 per card, for \(\$ 1.00\)

\section*{AUDIO PLAYBACK POINTS}

PLAYBACK SAPPHIRE AUDIOPOINT No. 113. The materials, workmanship and design make this playback point the finest obtainable. It does the most difficult job a playback stylus can accomplish by reproducing the recorded sound with complete fidelity and minimum disc wear. With proper care, one of these points will play thousands of recordings. (Should not be used on shellac pressings.) List Price \(\$ 6.50\) (Repolishing cost \(\$ 2.00\) )
PLAYBACK STEEL AUDIOPOINT No. 151 (STRAIGHT SHANK) List Price \(\$ 1.25\) per 100.
PLAYBACK STEEL AUDIOPOINT No. 154 (BENT SHANK) List Price \(\$ 1.25\) per 100.
The most practical playback points for general use. These points are both well matched to Audio recording styli. No. 151 is for normal weight pickup while No. 154 is designed for use with heavy pickups. One hundred percent shadowgraphed.

NOTE: Audio Devices, Inc. offers a convenient resharpening service which materially reduces the cost in the use of Sapphire and Stellite Audiopoints. Each resharpened point is disc-tested. (When returning points, care should be taken to package them individually. For this purpose the original protective cards are strongly recommended.)

\section*{GOULD. Moody}

\section*{ALUMINUM INSTANTANEOUS RECORDING BLANKS}

For the first time in the history of recording blanks, Gould-Moody has developed a formula that will not dry out, and will be as faithful in reproduction after prolonged periods of storage as when originally cut. Head and shoulders above competition, Gould-Moody "Black Seal" blanks have such desirable advantages as engineered center thread action ... four holes in every disc . . . continued high fidelity through long months of playbacks... and greater economy.

\section*{Net Rrices to Broadcast Stations and Recording Studios}

\section*{DuoTone-VAN EPS CUTTING HEAD}

\section*{New Improved Model with Exfended Frequency Range}

This cutting head has a reed armature, which is rugged, and acts as its own damper, eliminating rubber, and other deteriorating materials which usually cause cutting heads to change from day to day.
The measured distortion is \(1.8 \%\) at 400 cps .
The impedance of the cutter is actually 500 ohms at 400 cps .
It requires only plus 20 db level ( 6 milliwatts in 500 ohms) for normal amplitude. This is less than 1 watt of power.
It is easily installed. The head comes equipped with an extra mounting plate for instant mounting and is easily interchanged where other heads are used.
It is carefully tested at our laboratory and a graph accompanies each cutter, giving the frequency response.
The head is hermetically sealed and GUARANTEED if the seal is not broken.

NATIONAL E HOLIYWOOD MAKES NEDDLE NEWS
}

From out of the West, a new and revolutionary needle... the long awaited

\section*{Symphonic Sapplivie.}
which now makes possible perfect reproduction of classical recordings... packaged in beautifully-designed lucite, \(\$ 5.00\)

\section*{AND THE}
which reproduces for the first time with full fidelity the high tension of jazz. This needle is specifically made for the vast market of is specifically made for the vast market of
jazz enthusiasts. In attractive lucite, \(\$ 3.00\). Both needles feature the fireball point** for permanent wear.

\section*{4F/|allor NEEDLEF}

RECDRDINFANO LLAYEACK

\section*{RIGID TYPE}

A semi-permanent, precious metal-alloy tip play-back needle for home or commercial use, coin phonographs, etc. Plays 4,000 records.

List 50¢

\section*{FLEXIBLE TYPE}

Semi-permanent needle for home use with new lightweight pick-ups. Reduces record scratch to a minimum. Precious metal alloy tip good for over 4,000 plays. List \(\$ 1.00\)

\section*{ALUMINUM SHANK}

Osmium-alloy tip for high fidelity reproduction is carried on .020 needle shaft for Iow scratch level. The aluminum sleeve reduces vibration and needle-talk, minimizes record wear. One of the newer needle types.

List \(\$ 1,50\)

\section*{OSMIUM ALLOY}

Scientific construction gives highest possible fidelity and full tone with lowest possible distortion and scratch. \(1 / 8^{\prime \prime}\) offset. Precision shaped osmium alloy tip for long playing life.

List \(\$ 1.50\)

SAPPHIRE POINT . . . RUBY POINT
Our finest permanent type full tone needle with \(1 / 8^{\prime \prime}\) offset Duraluminum shank and precision ground point set with finest quality long wearing sapphire, good for 5,000 plays. No. 571 -S (Sapphire) List \(\$ 2.00\) No. 571-R (Ruby)

\section*{OSMIUM ALLOY}

Similar in all respects to our No. 570 needle, but has \(3 / 16^{\prime \prime}\) offset shank which gives a softer tone. A very high fidelity needle with a minimum of scratch and noise.

List \(\$ 1.50\)

SAPPHIRE POINT . . . RUBY POINT
In all respects similar to our No. 571, but has \(3 / 16^{\prime \prime}\) offset shank for softer tone. You cannot obtain a finer sapphire needle anywhere, regardless of price. Good for 5,000 plays No. 581-S (Sapphire) List \(\$ 2.00\) No. 581-R (Ruby)

List \(\$ 2.50\)

\section*{CUTTING NEEDLES}

\section*{ALLOY TOOL STEEL}

Made of the finest alloy tool steel, microscopically ground and polished with diamond dust. Recommended for amateur home use. Will cut approximately twentyfive six-inch records.

List 35 ¢

\section*{PRECIOUS METAL ALLOY}

A high grade recording stylus, for the advanced amateur and professional use. Electrically welded precious metal alloy tip, microscopically ground, and polished with diamond dust. Fand finished tip cuts smooth, clean groove for best possible results. Will cut approximately five hundred six-inch records. List \(\$ 1.50\)

\section*{STELIITE}

This patented Stellite recording stylus, when used by the advanced amateur or professional, will give results closely approximating the finest Sapphire. Handfinished tip, cuts quiet smooth groove. Will cut approximately five hundred sixinch records. \(\begin{aligned} & \text { List } \$ 1.50\end{aligned}\)

A beautiful, eye-appealing new package for added display value and protection. Now supplied as standard packaging on all Miller Sapphire tipped needles at slight additional charge. Other needles are supplied individually on cellophane wrapped cards or may be purchased in bulk.

\section*{SHADOWGRAPH AND MICROSCOPE INSPECTION INSURE SUPERIOR QUALITY}

Each Miller "Carillon" Dynamic needle is triple checked to insure perfection. Micrometer measurements and microscope inspection are frecuently used during vital production stages, and each needle is finally checked under 200 times magnification in a powerful shadowgraph machine.

WHEN YOU NEED

Manufacturers of the World's Largest Line of Long Life Recording and Playback Needles M. A. MILLER manufacturing co. Inc. 1168 East 43rd Street

SYLVANIA electronic equipment
}

\section*{THE COUNTER TUBE TESTER}

Here's the last word in tube testers made for discriminating distributors, retailers and radio servicemen. Besides the special features noted below, they have been provided with extra sockets and switch contacts for newly-developed tube types. Size: \(53 / \mathrm{s}^{\prime \prime} \mathrm{x}\) \(14 \frac{3}{16}{ }^{\prime \prime} \times 143 / 4^{\prime \prime}\); weight: 17 lbs.

\section*{Dynamic Conditions} All tube elements tested under dynamic conditions.

\section*{Fingertip Controls}
make settings easy.

\section*{DeLuxe Design}
helps sell on sightbuilds prestige for serviceman or retailer.

Shorts Test
at voltage low enough to prevent tube damage or faulty indications - high enough for full brilliancy on Shorts indicator.
Tests Standard, Lock-In, Acorn Tubes.

\section*{Large Meter}
\(41 / 2^{\prime \prime}\) size for high legibility. Sensitive but rugged.

\section*{Legible Dial \\ Markings-}
lines and numerals in white against green panel.
8-Ft. Line Cordextra long for extra convenience.
Provision for Noise Test.

PORTABLE TUBE TESTER

Type 140
Retains the same electrical characteristics and special features as the Counter Model above left, plus steel carrying case, strong leather handle. Size: \(51 / 2^{\prime \prime} \times 12^{\prime \prime} \times 161 / 4^{\prime \prime}\); weight: 17 lbs.

\section*{THE POLY (multi-purpose) METER (Type 134)}

\section*{SPECIAL FEATURES}

Tests audio, A.C. and R.F. voltages from 20 cps to 300 mc . Uses proximity fuze-type tube built into handy probe. Full scale range of \(3,10,30,100,300\).

Measures D.C. from . 1 to 1,000 volts in full scale ranges of \(3,10,30,100\), 300, 1,000.

Measures D.C. current from .1 milliampere to 10 amperes in full scale ranges of \(3,10,30,100,300,1,000\) milliamperes and 10 amperes.

Measures resistance from \(1 / 2 \mathrm{ohm}\) to 1,000 megohms in full scale ranges of \(1,000,10,000,100,000 \mathrm{ohms}\) and 1, 10, 1,000 megohms.

\section*{ACCURACY}
D.C. ranges \(\pm 3 \%\) of full scale.
A.C. ranges \(\pm 5 \%\) of full scale up to 30 volts and \(\pm 7 \%\) above 30 volts. R.F. ranges \(\pm 5 \%\) of full scale up to 10 volts; \(\pm 7 \%\) from \(10-100\) volts; \(\pm 10 \%\) on 300 volt range. Error may be \(5 \%\) greater from 100 to 300 mc . Ohms \(\pm 6 \%\) to the left of \(1 / 2\) scale; \(\pm 13 \%\) to the left of \(3 / 4\) scale.
Current \(\pm 3 \%\) of full scale on all but 10 ampere scale which provides \(\pm \mathbf{5} \%\) of full scale.

\section*{INPUT IMPEDANCES}
R.F. ranges- 2.7 megohms resistance shunted by approximately 3 mmf . capacity.
A.C. ranges- 2.7 megohms resistance shunted by approximately 40 mmf . capacity.
D.C. ranges- -16 megohms resistance.

Beautifully styled, compactly designed; stabilized against errors due to line voltage variations or gas current in tubes. All essential accessories are included.

\section*{THE OSCILLOSCOPE (Type 131)}

Developed to simplify the solving of problems encountered in radios and electronic equipment. Ideal for servicing FM and Television units.

\section*{SPECIAL FEATURES}
1. Input ImpedancesThrough amplifiers -1 meg. \(20 \mu \mu\). Direct- 2.2 meg. 30 \(\mu \mu \mathrm{f}\).
2. Amplifier Frequency Response - Sine wave uniform within 3 db . from 10 cycles to 100 kilocycles.
3. Deflector Factor-Through ampli-fiers- 0.5 volts per inch.
4. Horizontal Sweep - Direction left to right. Frequency range 15 to 40,000 cycles. Synchronizing signal sources-Internal (Vertical Signal); External; 60 cycles.
5. Power Supply-105 - 125 volts, 50 - 60 cycles. 40 watts power consumption. 1 amp. line fuse provided.
6. Cabinet Dimensions \(10^{3 / 4^{\prime \prime}}\) high, \(81 / 8^{\prime \prime}\) wide, \(133 / 4^{\prime \prime}\) deep.

\section*{MODULATION METER}

1. Elimination of battery or AC power supply.
2. Direct, accurate readings.
3. Phone jack provided.
4. Easily-read, three-color scale.
5. Completely shielded.

\title{
BIRD ELECTRONIC
}

Instrumentation for Coaxial Transmission

CHARACTERISTIC IMPEDANCE IS MAINTAINED THROUGH ALL SWITCH DETAILS WITH . . .

\section*{COAXWITCH}

\section*{The Selector Switch for Coaxial Circuits}

USES: As a channel selector in transmitter or receiver controls; production line testing of coaxial circuited equipment; selection of antennas; with phase monitors in directionals; etc.
CABLE TYPES AND CONNECTORS: Three models now available for use with \(50 / 52\)-ohm cables and Type "N" Fittings. Adapters available for use with other type fittings. Other impedance levels, such as \(70 / 75\)-ohm, can be supplied. STANDING WAVE RATIOS: At 550 MC , SWR (voltage) is below 1.03; at 1000 MC , below 1.1; and at 3000 MC , it is not over l.3.
MODELS: Model 74 handles single circuit with choice of six channels. Model 72-2 handles double circuit with choice of two channels (DPDT). Model 718 handles single circuit with choice of eight channels. Can be supplied for remote operation.

\section*{BIRD ELECTRONIC CORPORATION 1800 East 38th Street \(\quad\) Cleveland 14, Ohio, U.S.A.}

\section*{VOLTMETERS for EVERY RF NEED}

Permanent accuracy, high stability and high impedance inputl You get all three with each of these three voltmeters. Suitable for laboratory, test bench or production linel Each has a frequency and voltage range adaptable to your particular needs . . . sturdy construction; easy-to-read meter scales!

\section*{WRITE FOR DESCRIPTIVE BULLETINS. \\ STANDARD ELECTRONIC \\ VOLTMETER MODEL VM-27A}

Technical Specifications
RANGE: 0.1 to 100 volts in five ranges \(\alpha-c\) and \(d-c\). ( \(1,3,10,30\) and 100 volts full scale.) ACCURACY: 2 percent of full scale on all ranges, on sinusoidal voltages.
CALIBRATION: Calibrated to read 0.707 of peak on a-c voltage, hence r.m. s . of a sinusoidal wave. FREQUENCY RANGE: 20 cycles to over 100 megacycles with full accuracy from 50 cycles to 30 megacycles.

INPUT IMPEDANCE: d-c input 7 megohms, \(\alpha-c\) input 4 megohms at audio frequencies and at radio frequencies equivalent to a capacity of 5 micro-microfarads having a power factor of \(0.5 \%\). POWER SUPPLY: 105 to 125 volts \(50-60\) cycles at 30 watts.
TUBES: One 6 HE in probe, two matched 6J5GT and one 6X5GT rectifier.
DIMENSIONS: \(8 \times 8 \times 8\), probe 2 inches diameter by 4 long.
WEIGHT: 11 lbs. less probe.
PRICE: \(\$ 150.00\) net, F.O.B. Flushing, N. Y.

\section*{MODEL VM-27-ZC}

Same as Model VM-27A but with means for setting meter to mid-scale on d-c
PRICE: \(\$ 155.00\) net, F.O.B. Flushing, N. Y.

\section*{HIGH FREQUENCY}

ELECTRONIC VOLTMETER MOdel 32
Technical Specifications
RANGE: 0.3 to 300 volts r-f in five ranges ( \(3,10,30,100\) and 300 volts full scale). ACCURACY: 5 percent of full scale on all ranges, on sinusoidal voltages.
FREQUENCY RANGE: 500 kilocycles to 500 megacycles.
INPUT IMPEDANCE: 0.5 to 1 micromicrofarad at a \(Q\) of about 200. (Steatite top.) POWER SUPPLY: 115 voits \(50-60\) cycles at 30 watts.
TUBES: One 6AL5 in probe, two matched 6J5GT and one 6X5GT rectifier.
DIMENSIONS: \(51 / 2 \times 91 / 2 \times 91 / 2\).
WEIGHT: 8 lbs .
PRICE: \$99.50 F.O.B. Flushing، N. Y. (net)

\section*{PRECISION MOVEMENTS BURLINGTON PANEL INSTRUMENTS}

Burlington panel instruments are designed and manufactured to fulfill the need for rugged and accurate indicators. Both AC and DC types are accurate to within \(2 \%\) of full scale value at any point on the scale.
DC instruments combine extremely light weight moving elements and powerful alnico magnets to produce a torque to weight ratio which reduces frictional error in obtaining readings to a negligible factor. This high torque to weight ratio also permits the use of pivots with ample pivot bearing surface to overcome the effects of rough handling, shock, and vibration.
\(A C\) instruments are accurate over the entire range of commercial power frequencies ( 25 to 125 cycles) and may be used at frequencies to 400 cycles if especially calibrated for these higher frequencies.
These instruments are of the repulsion vane type using carefully aged and impregnated field coils and multipliers which are wound with conductors of ample size so that temperature rise of the windings may be maintained at a minimum even though the instrument is subjected to continuous use in the circuit.

BROWNING WWVSTANDARD \\ \\ FREQUENCY CALIBRATOR
} \\ \\ FREQUENCY CALIBRATOR
}

\section*{MODEL RH-10}

\author{
F.Q.B. Winchester, Mass. \(\$ 175.00\) Ne†
}

Specifically designed for receiving transmissions from radio station WWV on either 5 or 10 megacycles and employing these as primary frequency standards. Provisions are made so that secondary standards which are in harmonic relation with 5 or 10 megacycles may be accurately compared. Filters are employed so that the 440 or 4000 cycle modulation may also be used as primary frequency standards.

\section*{ELECTRICAL FEATURES}
- Pre-tuned for 5 and 10 megacycles per second reception of radio station WWV. Either frequency may be selected by switch.
- Sensitivity better than \(1 / 2\) microvolt on either band.
- Selectivity 10 db down at 5 kc off resonance.
- Excellent image rejection minimizes interference. Rejection ratio of more than 50 db at 5 and 10 megacycles.
- Provisions are made for coupling secondary R.F. standard or any R.F. source and comparing their fundamentals or harmonics with WWV carrier on 5 or 10 megacycles. Comparisons can be made to accuracy of at least one part in five million.

- A dual filter system allows selection at will of either the 440 or 4000 cycle modulation of WWV. Either may be employed as a primary frequency standard. Output voltage adjustable from 0 to 5 volts.
- Accurate visual determination of zero beat with cathode ray indicator.
- Voltages supplies to stable local oscillator regulated to reduce drift to \(\alpha\) minimum.
- Panel speaker separate control allows output to be varied at will.
- 100-125 volts AC operation. 85 volt-ampere input.
- Tube complement: three Type 6SK7, one 6SA7, two 6SN7, one 6J5, one 6SQ7, one VR-105, one 5Y3, one 6U5.

\section*{MECHANICAL FEATURES}
- Supplied in either standard rack panel with dust cover or in a steel cabinet.
- Aluminum panel is finished in black leatherette with engraved labels.
- Large fluted knobs are provided.
- Panel connectors are standard universal binding posts which will also accommodate banana type plugs.
- Dimensions: Cabinet Mounting--Height 9". Width 19". Depth 11'. Rack Mounting - Height \(83 / 4^{\prime \prime}\). Width 19"。 Depth \(1012^{\prime \prime}\).
- Weight: Cabinet Mounting approx. 30 lbs., Rack Mounting approx. 25 lbs., Shipping weight approx. 45 lbs.

\title{
BROWNING POWER SUPPLY AND SQUARE WAVE MODULATOR
}

\section*{MODEL TVN-7}

Designed as the basic unit of a signal generator in the super high frequency range, the TVN-7 consists of a regulated power supply and square wave modulator for low powered velocity modulated tubes such as the \(417 \mathrm{~A}, 2 \mathrm{~K} 28\), (formerly 707A and 707B), 2K25, (formerly 723A and 723B).

\section*{ELECTRICAL FEATURES}
- Range of cathode voltage is 280 volts to 480 volts, continuously variable. Provision is made for reduction to 180 to 300 volt range.
- Range of reflector voltage is 15 volts to 210 volts. Controllable from panel.
- Provision is made for grid pulse modulation or reflector pulse modulation. Amplitude of grid pulse is 60 volts while the maximum reflector pulse voltage is 100 volts maximum.

F.O.B. Winchester, Mass. \(\$ 210.00\) Net
- Square wave modulation frequency is variable from 900 to 5,000 cycles.
- Provisions are made for external modulation.
- Supply voltage held constant by latest series tube electronic regulator.
- 110-115 volts 60 cycle AC operation. 170 volt-ampere input.
- Tube complement: one Type 80, two VR-150, one 6SN7. one 6V6, one 6A3, one 5R4GY, one 6SJ7.

\section*{MECHANICAL FEATURES}
- Unit designed for rack mounting.
- Heavy steel panel with black wrinkle finish.
- All labels engraved into panel surface.
- Dimensions: \(19^{\prime \prime} \mathrm{W} \times 83 / 4^{\prime \prime} \mathrm{H} \times 11^{\prime \prime} \mathrm{D}\).
- Weight: 33 lbs . Shipping Weight: 50 lbs .

\section*{BROWNING MODEL OL-15 OSCILLOSCOPE}

A laboratory instrument designed for the observation of wave forms and transient phenomena requiring a variety of time bases, triggers, phasing and delay circuits, and extended range amplifiers. It may be used for work on laboratory applications where extremely short pulses or phenomend of irregular occurrence rate must be studied. It is also designed for television, communication, radar, and facsimile work. The special features are combined with the functions of a standard oscilloscope with greater ease and convenience of operation as a result of improved design.

\section*{ELECTRICAL FEATURES}
- Five inch cathode ray tube with 3000 V accelerating potential for improved intensity and definition of images.
- Sawtooth sweep with range of 5 cycles per second to 500 kilocycles per second permitting observation of radio frequency wave forms.
- Single sweep triggered time base for observation of transient phenomend or phenomena of varying repetition rates.
- Internal trigger generator and built-in phasing circuit for use with single sweep time base.
- Extended range amplifiers. The vertical amplifier is flat within \(\pm 10 \%\) of the average value from 20 cycles per second to 4 megacycles per second. Maximum deflection sensitivity at input terminals is . 05 R.M.S. volts per inch. The horizontal amplifier is flat within \(10 \%\) of the average value from 20 cycles per second to 1 megacycle per second. Maximum deflection sensitivity is 0.1 R.M.S. volts per inch.
- Low-capacitance, high-impedance probe for use with vertical amplifier. Voltage attenuation of probe is \(10: 1\).

F.O.B. Winchester, Mass. \(\$ 1275.00\)
- Provisions for direct connection to all deflection plates.
- Internal or external blanking of beam for timing purposes and for elimination of retrace.
- Voltage regulation of all low-level stages for stability of operation under varying line voltage conditions.
- Built-in voltmeter and calibrating circuit for determining deflection sensitivity at any setting of the gain controls.
- Tube complement: four Type 6AC7, four 6AG7, four 6SJ7, six 6SN7GT, two 6J5, two 6V6GT, two 807, one 6X5GT, one 5U4G, two 2 X 2 A , one VR-105, one 5LPl.

\section*{MECHANICAL FEATURES}
- Steel cabinet finished in black wrinkle with \(1 / 8^{\prime \prime}\) aluminum panel.
- Panel finished in black leatherette with all labels engraved directly on panel.
- Chassis of steel copper plated and lacquered finish.
- Controls grouped according to function for convenience of operation.
- Components arranged for electrical efficiency and ease of servicing.
- Dimensions: Height 153/4", Width 123/4". Depth 193/4".

\title{
BROWNING FREQUENCY METER MODEL S-4
}

Specifically designed for checking the frequencies (as required by the Federal Communications Commission) of police and fire department, marine, and other special-service transmitters for either AM or FM, operating in the 1.5 to 100 megacycle range.

\section*{ELECTRICAL FEATURES}
- Custom-built and hand-calibrated for up to five specified frequencies in the range from 1.5 to 100 megacycles.
- Accuracy: \(\pm .0025 \%\) of the specified frequency.
- Stable electron-coupled oscillator used in special circuit.
- Extreme accuracy in frequency adjustment with 100 kilocycle crystal as secondary standard, using WWV as primary standard.
- Visual determination of zero beat with crthode ray indicator.
- Audio detection of zero beat.
- Voltage regulation employed in crystal and electron-coupled oscillators.
- 110-115 AC-DC operation. 40 volt-ampere input.
- Telescoping antenna at side of cabinet for easy coupling to transmitter.
- Tube complement: one 6SC7, one 6SA7, one 6J5, one 6SK7, one 6U5, one \(25 Z 6\). One special voltage regulator.

\section*{MECHANICAL FEATURES}
- Rugged steel cabinet and \(1 / 8^{\prime \prime}\) aluminum panel.
- Accurate reading assured by machined and engraved main dial, graduated to 100 divisions over 180 degrees. Vernier allows readings to \(1 / 10\) of dial division, or readability of one part in one thousand.
- Panel finished in black leatherette.
- Dial in instrument black for ease of reading.
- New non-jamming vernier dial drive for fine adjustment.
- All labels engreved into panel surface.
- Telescoping antenna forms convenient carrying handle.
- Dimensions: exclusive of telescoping antenna Height \(13^{1 / 12 "}\); Width 75/8"; Depth 67/8"
- Weight: 15 lbs . \(\quad\) Shipping Wt. \(181 / 2 \mathrm{lbs}\).

QUALITY INSTRUMENTS AT LOW COST
}

\section*{CIICo.}

\section*{FEATHERWEIGHT MINIATURE MODELS}

This group of three comprises an ideal selection of testing equipment for service use where compactness and accurcicy are required. This original unique design features built-in D'Arsonval type meter movement, potentiometer, rotary range selecting switch, and test jacks. The potentiometer compensates for battery voltage drop; the enclosed jacks and rotary switch simplify range selection. Two standard flashlight cells, secured and connected by spring clips, supply the testing current for the ohms ranges. All multipliers are bridge selected within one percent. The overall size of the molded panel and case measures 3-15/16" x \(27 / 8^{\prime \prime} \times 2\) "; average net weight, twelve ounces.

\section*{COMPACT VOLT-OHM MILLIAMMETER - MODEL 450A}

A sturdy one milliampere meter movement provides 1000 ohms per volt sensitivity on all voltage ranges. Shipping weight 2 lbs. ................................................................... Net \(\$ 9.75\)
SPECIFICATIONS: VOLTS DC: \(0-5 / 10 / 50 / 500 / 1000\) MILLIAMPERES DC: \(0-1\) OHMS FULL SCALE: 5000/50,000/500,000

Biddiretlonal Narrew Band Conpler DB 441

Typical wave guide assembly illustrating use of De Marnay-Budd components available from standard stocks.

When you Use any De Mornay-Budd wave guide assembly, you know exactly how each component will function electrically. You avoid possible losses in operating efficiency through impedance mismatches, or breakdown and arcing caused by a high standing wave ratio. (See chart below.)

De Mornay-Budd wave guides are manufactured from special precision tubing, and to the most stringent mechanical specifica-
tions. Rigid inspection and quality control insure optimum performonce.

De Mornay-Budd standard microwave components operate on the following frequencies: \(4000-6000 \mathrm{mcs}, 6000-8500 \mathrm{mcs} ., 8500-9400\) mes., \(23000-27000 \mathrm{mcs}\).

Complete laboratory service and consultations on micro-wave transmission line problems available.

OUNDITIT TUBES \(\star\) OSCILLOGRAPHS \(\star\) EDUIPMENT
}

\section*{"Precision electronics" is more than a slogan with Du Mont . . . it is a tradition!}

The superiority of the Du Mont cathode-ray oscillograph has made it the preferred instrument omong colleges, research laboratories, and industrial users throughout the world.

A few of the many practical uses includes the study and testing of: radio and television receivers, trans-
mitters, welding circuits, transmission lines, electronic control devices, circuit breakers, relays, and other electrical equipment. It is equally valuable in the study of vibrations, acoustics, metal properties, detonation in internal combustion engines, as well as the analysis of colors and the precision adjustment of watches.

\section*{5" DU MONT TYPE 274 OSCILLOGRAPH}

The Du Mont Type 274 cathode-ray oscillograph was developed as an inexpensive general purpose instrument for laboratory radio service and educational applications, A special design feature has been incorporated so that a series of demonstration units may be used in conjunction with the instrument deriving their power from it. A complete series of and practical method of instruction in electronic principles for schools, colleges, and laboratories.

\section*{SPECIFICATIONS}

Five-inch 5BP1-A tube with green, medium persistence screen and removable calibrated scale are standard equipment.

\section*{DU MONT CATHODE-RAY TUBES}

Into the making of the modern Du Mont Oathode-Ray Tube has gone all the experience, skill, and knowledge acquired during the many years since Du Mont commercially pioneered the cathoderay tube from its infancy to its present improved state. Complete
specialization, constant research, and careful supervision of every step from the design sheet to the finished manufactured product is largely responsible for making Du Mont cathode-ray tubes the accepted standard for quality, accuracy, and performance.

OUWDINTIN Cathode-Ray TUBES \(\star\) OSCLLLLOGRAPHS \(\star\) EDUIPMENT
}

\section*{5" DU MONT TYPE 241 OSCILLOGRAPH}

Designed for application requiring the observation of audio and video frequency signals above the operating range of standard oscillographs, the Type 241 is well adapted for problems involving non-sinusoidal waveshapes such as pulses and square waves. Cathode-loaded input stages to the balanced deffection amplifiers permit the use of a low-impedance attenuator thus preventing attenuator frequency discrinination. Elimination of over-compensation at high frequency greatly extends the useful range of the amplifiers. A test probe and shielded cable, for high frequency work, is contained in the removable front cover.

\section*{SPECIFICATIONS}

Five-inch intensifier-type 5JP1 tube with green medium persistence screen and calibrated scale are standard equipment. Four free deflection plates with neck terminals reduce input capacitance and permit the use of improved wide band deflection amplifiers.
INPUT IMPEDANCE: \(X\) and \(Y\) Axis; Terminals 2 meg. 40 uuf; Probe 1 meg., 10 uuf; Direct (balaneed) 5 meg .20 uuf. Direct (unbalunced) 5 meg., 25 uuf. FREQUENCY RANGE: Uniform within FREQUENCY RANGE: Uniform within 3 db., Y-axis 20 c. to 2 mc ., X -axis 5 c . to
100 kc ., Z -axis 30 c. to 2 mc . DEFLECTION SENSITIVITY: With amplifier, to \(Y\)-axis 0.07 rms volt/in., with Cat. No. Type No. Description \(\begin{array}{lc}\text { Cat. No. TypeNo. } \\ 1192-A & 241\end{array}\) \begin{tabular}{ll}

Ibs.

115 v. 50-60 cycles with 5Jl'11 Cathode-ray Tube 460.75

A moderately priced 5 -inch instrument embodying many recent mi. \(\quad\) Freedom from origin distortion, sharp focus at all deffecting fre-
provements that facilitate its application to the great majority of
quescies, and a high deflection sensitivity that permits the viewing provements that facilitate its application to the great majority of laboratory and production requirements. The Type \(208-\mathrm{B}\) is furnished with a 5 -inch intensifier type, high vacuum tube which operates at an accelerating potential of 1,400 volts thus insuring trace brilliance.
of moderately low potential sionals without the use of amplifiers are additional features. The wide-band amplifiers provide symmetric deflection and are direct coupled to eliminate "electrical backlash."

\section*{SPECIFICATIONS}

Type 5LP1 intensifier type, high vacuum CRT with four free deflection plates and green medium persistence screen is standard. Type LPP11 with blue short persistence sereen available at slight additional cost. Remov. able calibrated scale supplied.
INPUT IMPEDANCE: Amplifiers, X-axis 5 meg., 25 uuf, Y-axis 2 meg. 30 uuf. Continuous attenuation control without frequency discrimination or amplitude distor-

FREQUENCY RANGE: Plus or minus \(10 \%\) from 2 to 100,000 sinusoidal cycles for from 2 to \(Y\)-axis
VOLTAGE GAIN: Y-axis 2,000 , X-axis 43 . DEFLECTION SENSITIVITY: Maximum,

\section*{3" DU MONT TYPE 224-A OSCILLOGRAPH}

The wide range response of this instrument provides faithful reproduction of all waveforms with steep fronts and resuitant large harmonic content, thereby permitting the study of signals, such as pulses and square waves involving frequency components as high as 5 megacycles. Numerous combinations of signal input connections

\section*{SPECIFICATIONS}

Three-inch Type 3GP1 tube with green medium persistence screen and removable calibrated scale are standard equipment.
INPUT IMPEDANCE: \(X\) and \(Y\)-axis; Terminals, 2 meg., 30 uuf; Probe, 1 meg., 20 uuf; Direct (Balanced), 10 meg., 20 uuf; Direct (Unbalanced), 5 meg., 25 uuf.

at the front panel provide added flexibility and convenience of operation. A special feature is the provision for intensity modulation of the grid of the cathode-ray tube. Included is a test probe with shielded cable for high frequency work and to eliminate stray pickup.

\section*{Elactronic Valmeter Ohmmetr} FOR ACCURACY.STABILITY-CONSTANCY

A stable bridge circuit type vacuum tube for measuring AC-DC voltages and ohms by electronic means.
Measures DC volts up to 600 volts with a constant input resistance of 11 megohms. Resistor in DC probe permits readings in signal carrying circuits. Positive or negative indications simply obtained by use of a reversal switch. External multiplier extends range to 2400 volts.* (Input circuit for DC voltages well filtered and shielded against AC voltages.)
On AC input capacity is less than 9-MMF giving a frequency response of less than 50 cycles to better than 100 megacycles. Input resistance on AC is 8 megohms on all ranges.
Uses shunt type ohmmeter circuit, only one adjustment necessary for all ranges. Meter is protected by saturation in electronic circuit. Cannot be damaged by accidental overload. Accuracy not affected by average line voltage variations. Size of instrument \(10 \times 10 \times 7\) inches.

Acid etched panel.

\section*{Positive Clccuracy}
- Perfectly balanced - circuit highly degenerative

\section*{- Low Grid Current}
- Hand Calibrated
- Hand Calibrated Resistors

\section*{METER RANGE}

DC Volts 0-3; 0-30; 0-150; 0-300; 0-600; (Up to 2400 with multiplier probe)*.
AC Volts \(0-3: 0-30 ; 0-150 ; 0-300\).
Ohms 0-1000; 0-10M; 0-100M; 0-1 Meg; 0-100 Meg.

\section*{OUTSTANDING FEATURES...}
1. Zero control constant. Production samples have been run several months without changing zero control.
2. Easy to operate. Controls are self-explanatory.
3. Fungicide treatment protects against extremes in temperature and humidity.
4. All parts well overrated.
5. Instrument can be run continuously.

\section*{VOLOMETER}
*Trade Name for Volt-Ohm-Milliammeter
Here is an unusually attractive, EXCEPTIONALLY LOW-PRICED volt-ohm-milliameter. It is a rugged, flexible instrument, combining features which are not available in competitive models selling for more than double this price.
You will be convinced when you read the "Specifications" and "Special Features" that MODEL 101 VOLOMETER is just the instrument to have around the shop or lab whenever the type of measurement does not justify the use of expensive, complicated, highly sensitive equipment.

The fact that resistances between \(1 / 200 \mathrm{OHM}\) and 20 MEGS and AC voltages between 25 CYCLES and 1 MEGACYCLE in frequency can be measured with this unit, makes it a handy and very valuable instrument. In short, when it comes to value and versatility, MODEL 101 really sets the pace.

\section*{SPECIFICATIONS}

5 DC VOLTAGE RANGES (approx. 1000 ohms per v.): 0 to 6-60-300-600-3000 volts.
4 AC VOLTAGE RANGES: 0 to \(12-120-600-1200\) volts. 3 DC CURRENT RANGES: 0 to \(6-60-600\) milliamperes.
4 RESISTANCE RANGES: 0 to \(200-2000-200,000\) 20 megohms.

MODEL 101A
Open face as shown.
Price ....... \$17.50
Size: \(41 / 2^{\prime \prime} \times 71 / 2^{\prime \prime} \times 3114^{\prime \prime}\).
In portable case.
Price . . . . . . \(\$ 21.50\)
Size: \(61 / 4^{\prime \prime} \times 712^{\prime \prime} \times 31 / 4^{\prime \prime}\). Complete with test leads.

\section*{SPECIAL FEATURES}

Resistances from \(1 / 20\) ohm to 20 megohms. Low ohm scale is low drain back-up type. First 10 divisions are \(1 / 20\) ohm each.

AC volts from 25 cycles to 1 megacycle with no temperature error. No external source of power

\section*{required.}

Battery and rectifier replaceable without use of soldering iron.
Matched-pair multiplier resistors accurate within \(1 \%\). Meter accurate within \(2 \%\).

\section*{*VOLOMETER MODEL 100}

Trade Name for Volt-Ohm-Milliammeter

A new pocket size volt-ohm-milliammeter with features never before available in an instrument of this size and price. Quality engineered both electrically and mechanically. this instrument will trically and retire requirements of the electronics anginer exach engineer, laboratory worker or service man. Employing a speial rectifier circuit, this unit will accurately measure AC voltages from 25 CYCLES to 1 MEGACYCLE with no temperature errors and without the necossity of plugging into any external source of power. For this reason it is invaluable for Audio, I. F. or low R. F. voltage measurements. In addition, the instrument can be used to measure resistances from \(1 / 2\) ohm to 30 megohms.

Bakelite pancl and wooden case prevent any voltage breakdowns to either the panel or case when measuring high voltages. SPECIFICATIONS
6 D. C. VOLTAGE RANGES ( 1000 ohms per volt) 0 to 3-12-60-300-1200-6000 volts.

Price \(\$ 25.95\)

MODEL 100

MODEL 400

\section*{MODEL 400 ELECTRONIC LIMIT BRIDGE}

Here is an Electronic Limit Bridge that bas ALL the features you've been looking for: SIMPLICITY OF OPERATION-No adjustments to be made. Just plug into any 115 Volt A. C. line.
NO BATTERIES TO BE REPLACED-Model 400 is completely A. C. operated and contains no batteries.
WIDE RANGE-Resistance from 1 ohm to 3 megohms can be measured.
STABILITY-Zero does not shift every time the unit is turned on. Special push-pull circuit asModel 400A with \(3^{\prime \prime}\) meter as illustrated
Model 400 B with \(4^{111 / 4}\) square meter..........................
Nodel 400 C with \(7 \frac{1 / 2 "}{}\) square meter

\section*{FREED 1050-60 CYCLE FILTER}

Uses: The calibration of instruments, where the form factor of the applied voltages is important ( \(A C\) voltmeters and vacuum tube voltmeters).
The measurement of harmonic distortion of amplifiers, transformers and tubes.
Description: The instrument is composed of a constant voltage transformer, a variac, a 60 cycle low pass filter, a decade attenuator and a \(1 \%\) AC voltmeter.

The constant voltage transformer makes the instrument independent of the line variations.
The variac makes the instrument extremely flexible, since any voltage value can be obtained.
The decade aftenuator makes it possible to vary the output voltage from 0 to 110 volts in increments of 1 volt.
The \(1 \% A C\) voltmeter measures the \(A C\) voltage in the output of the filter.
The instrument is self contained and AC operated.

Frequency: 60 cycles.
Stability: There is less than \(1 \%\) variation in output voltage for a plus or minus \(10 \%\) variation in line voltage.
Output Impedance: 600 ohms unbalanced to ground.
Load Impedance: Where the filter is used without the attenuator the optimum matching impedance is 600 ohms.
When the filter is used with the aftenuator the lood impedance should be high (grid of a tube) or not less than 100,000 ohms.
Output Voltage and Power: When used directly, the open circuit voltage is 150 volts.
With matched load ( 600 ohms) the maximum power is 20 watts.
When used with the affenuator the maximum voltage is 150 volts.

Output Control: The output voltage is made continuously voriable by the use of the variac or made variable in steps by the use of the two attenuators.
Waveform: The harmonic distortion is less than \(.5 \%\) in full load condifions.
Temperature and Humidity Effects: The instrument is nat affected by wide variations of temperature and humidity.
Power Supply: 105-125 volts 60 cycles. The total power consumption is 60 watfs.
Mounting: The instrument is mounted on a standard 19" panel and is supplied with a portable streamlined all metal cabinet.
Dimensions: \(101 / 2 \times 141 / 2 \times 22\) inches.
Net Weight: 75 lbs.

Price: \(\$ 225.00\) net F.Q.B. New York, N. Y.

\title{
FREED TRANSFORMER CO., INC. INSTRUMENTS DIVISION
}

72-78 SPRING STREET

\section*{FREED No. 1020 MEG.OHMMETER}

Uses: The measurement of leakoge resistance of insulating materials, condensers, cables, motor and tronsformer windings. Description: The instrument is a precision balanced electronic ohmmeter.
The high voltage potential necessary for insulation measurements is included in the instrument. An exceptionally wide range of resistances can be measured on the six overlapping ranges. A zero adiusiment is provided for setting all the six ranges in a single operation. The resistance is read directly on a \(4^{\prime \prime}\) meter scole. The meter is profected against overloads.

A relay operated from the front panel disconnects the high voltage from the binding posts and this eliminates all danger of shock due to exposed high voltage potential.

In the stand by position, the relay connects a high resistance between the high voltage binding post and the chassis (ground) thus eliminating the danger of shock when measuring the leakage resistance of condensers.

The instrument is self contained, completely AC operated and has electronically regulated high voltage supplies.

\section*{SPECIFICATIONS}

Range: 1 megohm to \(1,000,000\) megohms in six averlapping ranges.

Accuracy: Plus or minus \(3 \%\) on the first four ranges; plus or minus \(8 \%\) on the last two ranges.
iemperature and Humidity Effect: The accuracy of the instrument is substantially independent of temperature and relative humidity variations within the normal range.

Stability: A plus or minus \(10 \%\) variation in the line voltage causes less than a \(1 \%\) variation in the meter reading.

Voltage on the Unknown: The voltage applied to the unknown
is 500 volts and is independent (less than \(1 \%\) ) of the value of the unknown.

Tubes: The necessary tubes are:
\begin{tabular}{ll}
\(2-6 \mathrm{C} 6\) & \(1-\mathrm{VR75}\) \\
\(2 — 6 \mathrm{SH} 7\) & \(1-1-\mathrm{V}\) \\
\(1-\mathrm{VR} \mathrm{105}\) & \(1-6 \times 5\)
\end{tabular}

Power Supply: 105 to 125 volts AC 50 or 60 cycles. Powe, Consumption- 32 watts.
Cabinet: Portable and of all metal construction.
Dimensions: \(91 /{ }^{\prime \prime} \times 101 / 2^{\prime \prime} \times 8^{\prime \prime}\).
Net Weight: 21 lbs.

Price: \(\$ 237.00\) net F.O.B. New York, N. Y.

\section*{FREED TRANSFORMER CO., INC. INSTRUMENTS DIVISION}

This compact, lightweight instrument is extremely useful to manufacturers of resistors, condensers and inductors for production resting, to consumers for inspection and acceptance tests, and for laboratory work requiring very accurate components.

A product of Freed specialized engineering, the No. 1010 contains many outstanding features both as a comparison and precision limit bridge. Completely self-contained, its small size and light weight allow it to be moved easily and set up wherever necessary - even in a noisy location. Percentage difference between unknown and standard components is easily read on a specially calibrated dial, and accuracy of measurement is assured by use of precision components in the arms of the bridge. High gain amplifier and adequate internal shielding guarantee sharp and distinct balance. Technical Folder Available.

\end{tabular}

These small panel instruments are particularly suitable for use in radio and other communications equipment where compactness, especially minimum depth belind the panel, is essential. Thinness is obtained by the use of a unique single-unit, hightorque element of the permanent-magnet, movingcoil type. In this element, the pivots, instead of being secured to the outside of the armature winding, are solidly mounted on the inside of the armature shell..

G-E internal-pivot instruments are available in a variety of standard ratings to measure direct current and voltage (Type DW-51), and radiofrequency current (Type DW-52). They are of the \(21 / 2\)-inch classification. The depth behind the panel is 0.89 inch for the molded Textolite case; 1.03 inches for the metal case.

\section*{OTHER TYPES}

Many other types of \(\mathrm{G}-\mathrm{E}\) indicating instruments are available for panel mounting. They include \(31 / 2^{-}\) inch a-c, d-c, r-f, and rectifier types in standard round cases as well as in rectangular cases, such as the one shown below. Also \(21 / 2\)-inch alternatingcurrent instruments. Still other types can be supplied to meet unusual requirements.

Tyue DO-54 31/2-inch instrument for panel mounting

\title{
DYNAMIC MUTUAL CONDUCTANCE (TRANSCONDUCTANCE)* TUBE TESTERS
}

\section*{MODELS 532-P AND 532-C}

Model 532-P

The most complete full coverage, all purpose tube tester available today.
The HICKOK Model 532 P (Portable) and 532C (Counter type) Tube Testers accurately test and sell more tubes in less time. Both have the world famous HICKOK Dynamic Mutual Conductance (Transconductance) circuit which was first choice of both Army and Navy throughout World War II. Duplicates the method actually used by tube manufacturers in the tube factory. Easy to read scales have MICROMHO ranges of 0-3,000, 0-6,000, 0-15,000 and English legends reading "Replace", "Doubtful" and "Good". Gas test provision quickly eliminates gassy tubes (which ruin AVC and IF stages). Highly sensitive noise test detects radio frequency disturbances. Locates shorts-hot or cold. Tests diodes separately with low voltage to prevent paralysis of the elements. Indicates accurately line voltage on a large test meter-from 100 to 130 volts. Tests all pres-ent-day tubes including Octal, Loktal, Miniature, Ballast and Magic Eye Tubes.
Provisions for new tube designs are made-this tester will remain up to date for a long time to come. Uses rectified current to energize both plates and grids using two rectifiers. Has flament voltage in steps to 117 volts. Panel is modern, legible, has satin chrome finish. In our selector switches complete flexibility has been provided to take care of musual base pin connections; but in routine testing seldom more than one or two manipulations are necessary. Roll chart in the panel makes tube data easily and quickly available. Tests grid controlled rectifier tubes. Continuity checks can be made by a special new feature of design. Wide range of voltage checks can be made.
*Mutual conductance and transconductance mean the same thing.

> Specify "P" for Portable, "C" for Counter Type When Ordering.

\section*{Crystal Controlled}

\section*{Microvolt Signal Generator Model 191X}

Moricl 191X is an accurate and dependable source of calimated, modulated or umodulated, radio frequency test voltares ranging in frequency from 125 kc to 120 mc , on fundamentals. Precision tests such as receiver sensitivity and selectivity tests are possibic, as a vacuum tube voltmeter has beet incorporated to accurately control the catibratad ontput voltages. Rapid and exact calibration and alignment of and bamts of a receiver can be made by using the cersta controlled output, at 100 kc , or 1000 ke , and veniently checked with the decibel meter. Permits drect calination of radio frequency output from \(1 / 2\) microvoll to 100,000 microvolts on all ranges.

\section*{SPECIAL FEATURES}

Internal vacunm tube voltmeter permits direct calinration of radio fermency output from \(1 / 2\) microvolt to 100,000 microvolts on all ranyes. AF output variable from 0 to 2 rolt. Minimum sional leakage as a result of complete shiclling and newly developed cast aluminum attenuator housing. \(01 \%\) accurate erystal controlled outputs. Both fixed and variable percent of amplitude modulation. Provision for external amplitude modulation from 50 to 10,000 cyclos. Solf-contained decibel output meter calibrated from -10 to +38 . Large \(8^{\prime \prime}\) dial with over \(100^{\prime \prime}\) of scale.

\title{
UNIVERSAL CRYSTAL CONTROLLED SIGNAL GENERATOR Models 277, 277X and 288X
}

The Universal Crystal Controlled Signal Generators, Models 277, 277X and 288X, are specifically designed to meet the many and varied needs of the radio engineer and service man working with frequency and amplitude modulated receivers and with television equipment. The wide range in radiofrequencies and audio-frequencies available, with the many choices of type of modulation, makes these Models most versatile and practical instruments.

All three models are the same except for the following features: \(0.01 \%\) accurate crystal controlled outputs, both amplitude modulated at 400 cycles and unmodulated, offered in Models 288X and 277X only. Self-contained decibel meter with \(42^{\prime \prime}\) cable, Model 288X only.

\section*{SPECIAL FEATURES}

Complete frequency modulation coverage with three variable bandwidths of sweep: \(0-30 \mathrm{kc}, 0-150 \mathrm{kc}, 0-450 \mathrm{kc}\). Frequency modulation at two self-contained modulating frequencies: C0 cycles and 400 cycles. Provisions for external amplitude and frequency modulation to 15,000 cycles. Self-contained amplitude modulation at 400 cycles. Continuously variable audio frequency from \(0-15,000\) cycles. Audio frequency and radio frequency outputs are continuously variable from zero to maximum. 60 cycle synchronized sweep voltage is available for use with an oscillograph.

\section*{NEW F.M. OSCILLOGRAPH \\ Model 505}

Specifically designed for use with frequency modulated, amplitude modulated and television equipment. Permits a complete visual analysis of the electrical and electronic circuits of the i-f and r-f hands as well as the audio frequency stages. The effectiveness of a tube or circuit as an amplifier, rectifier, or source of special wave shapes may be readily determined.
Interprets modulation, phase relations, voltage amplitudes, distortion, etc. Responds accurately to voltages in wide ranges of both frequencies and amplitudes.

\section*{SPECIAL FEATURES}

Wide band, high gain vertical amplifier, 30 eycles to 1 megacycle. Self-contained wide-band frequency modulated oscillator with variable sweep width, \(0-450 \mathrm{kc}\). Self-contained narrow-band frequency modulated oscillator with variable sweep width, \(0-30 \mathrm{kc}\). Signal tracer jack is incorporated so that, when used in conjunction with a speaker or ear phones, the signal may be simultaneously seen and heard. Provisions for modulation by an external audio frequency source to provide the equivalent of a frequency modulated transmitter for receiver checks. Self-contained mixer circuit provided so that when used in conjunction with any good external oscillator, wide band or narrow band trequency modulated outputs may be produced within the frequency limits of the external oscillator. High sensitivity amplifiers. Calibrated screen. Has self-contained frequency modulated oscillator. Can be used with any signal generator for servicing FM or AM sets.

Satin-clurome finished panel
Blue baked Hanmertex finished case.

Ranges- -CC Volts and DC Volts: \(0-2.5,10,50,250,1000,5000\); Ohms \(0-10\) megolms (4 ranges); Microamperes: \(0-50\); Miliamperes: \(0-2.5,10,50,250,1000\); Amperes: \(0-10\); Decibels: \(-20-+3,-8 \cdot+15,+6-+29 ;\) Output Volts: \(0-2.5,10,50,250,1000,5000\). Sensitivity: AC Volts: 20,000 ohms/volt; DC Volts; 20,000 ohms/voit; Meter: 40 microamperes. Battery Complement: 1 Di'y Battery, Radio C, 4.5 volts.

\section*{VOLT-AMPERE WATTMETER}

\section*{Model 900}

Electrical Appliance Tester and Circuit Analyzer. True to the Finest Hickok Tradition

For Measuring Actual Values of Volts, Amperes and Watts. Ranges: A.C. Watts: 0-20-100-500-1000-2000. A.C. Amperes: 0-1.3-6.-5-13-26. A.C. Volts: 0-130-260. A.C. Milliamperes: 0-260.

Scale is \(38 / 4 "\) lons, clear and legible. The Model 900A Volt-AmpWattmeter has been designed for all A.C. appliance-testing, from bell transformers and clocks to electric ranges operating on the 220 -volt three-wire Edison system. The extremely low range of \(0-20\) watts will measure the power consumed by the smallest of appliances and is protected from accidental overload by a fuse. For measuring electric ranges the Number 9 A and 9 B special leads are available with standard three-wire range connnctors. It tests appliances while in actual operation, indicating wattage consumption, amperes, and line voltage.

Mounted in a durable welded steel case with strap handle and rubber bumpers. Detachable Ieads, for small appliances, are furnished. Test leads with prods also included.

Service men will find a wattmeter especially handy for checking all A.C. sets.

Part No. C-105-This external current transformer is designed to give ranges of 5,000 and 10,000 watts and 65 and 130 amperes when used with Model 900 A . Part No. C-105 transformer may be installed in lead compartment of carrying case. When transformer and carrying case are ordered together, transformer will be installed before shipping.

\footnotetext{
Model 900A-Size: \(91 / 2^{\prime \prime}\) high, \(61 / 4^{\prime \prime}\) wide, \(3^{\prime \prime}\) deep.
}

Shipping Weight: \(81 / 2\) lbs.

Net Price, \(\$ 59.07\)

\section*{THE WHY OF "INDUSTRIAL INSTRUMENTS"}
- In the design of production test apparatus the aim of "Industrial Instruments" is to take basic laboratory technique and, using the tried and tested principles that are known to give high accuracy, adapt them to plant production use. In so doing the following goals are set and adhered to:
1. To retain the inherent accuracy and reliability of accepted laboratory circuits and techniques
2. To aim at modification toward simplicity so that the factory layman can use instruments without previous knowledge of them.
3. To increase the speed of readings for production use by utilizing basic laboratory circuits with novel adaptations.
Herewith listed are representative standard instruments. Other instruments are also available Furthermore, special instruments can be designed and built.

\section*{CAPACITY LIMIT BRIDGE}

For high-speed production testing of capacitors and inductances for conformance with tolerance specifications. Negligible setup time, great flexibility, wide range, accuracy, extreme ruggedness, moderate cost. Normally supplied complete with Decade Capacitor Model DK-2AA providing capacitance standards in .001 mfd . steps from .001 to 1.11 mfd .
This is a modified Wheatstone Bridge with high and low limit dials. Two "magic eyes" provide high and low indications. Self-incorporated switch-operated relays provide speed test operation either from switch on panel or at test fixture.

Accuracy: Plus/minus \(1 \%\) of standard. Unaffected by line voltage variations and tube characteristics. Range: Measures impedance at 60 cycles from 600 ohms to 2.6 megohms. Capacitors from .001 to 4 mfd , Inductors from 2 to 7000 henries. Limit dials continuously variableany tolerance between 0 and \(30 \%\) low, and 0 and \(40 \%\) high. Speed: Up to 1000 capacitors per hour. Instantaneous readings-no needle to come to rest. Hardwood case. Sloping bakelite panel. \(15 \times 8 \times 10^{\prime \prime}\) high. MODEL LB-1-DK2AA Capacitance and Impedance Limit Bridge with Decade Capacitor covering range . 001 mfd . to 1.11 mfd . in .001 steps. Wt. 20 lbs. net; 22 lbs., shipping. \(\$ 200.00\) MODEL LB-1 Capacitance and Impedance Limit Bridge alone for use with external standards. Wt. 14 lbs . net; 16 lbs ., shipping............. \(\$ 105.00\) MODEL TL-1 High-Speed Test Fixture for use with above. Wt. 7 lbs. net; 10 lbs., shipping.
. \(\$ 20.00\)

\section*{RESISTANCE LIMIT RRIDGE}

For high-speed production testing. Features negligible setup time, great flexibility, wide range, accuracy, extreme ruggedness. Built-in D.C. source. Balance indicated by sensitive galvanometer. Normally supplied with Model DR-1 Resistance Decade providing resistance standard in 1000 ohm steps from 1000 to 999,999 ohms. Other ranges available.

This is a modified Wheatstone Bridge with high and low limit dials. Self-incorporated switch-operated relays for speedy test operation either from. switch on panel or on test fixture. Used with external resistance standards, will check resistors between 1 ohm and 3 megohms. External batteries may be used for other voltages.

Accuracy: Model LB-2, guaranteed to plus/minus \(1 \%\) of standard; Model LB-3, plus/minus . \(1 \%\). Range: LB-2, from 1 ohm to 3 megohms. Limit dials continuously variable for any tolerance between 0 and \(30 \%\) low, and 0 and \(40 \%\) high. Model LB-3, same resistance range but limits from plus/minus 0 to \(11 \%\) in \(.1 \%\) steps.

Hardwood case. Bakelite sloping panel. \(15 \times 8 \times 10^{\prime \prime}\) high. LB-2 DR-1 Resistance Limit Bridge with Resistance Decade, 1000 to 999,999 ohms, in 1000 ohm steps. Wt.: 19 lbs.. net; 23 lbs. shipping
\(\$ 155.00\) LB-2 Resistance Limit Bridge singly for use with external standards. Wt.: 12 lbs. net; 16 ibs, shipping
\(\$ 105.00\) LB-3 Resistance Limit Bridge, with accuracy of plus/minus. \(1 \%\), for use with external standards. Wt.: 12 lbs . net; 16 lbs . shipping.
\(\$ 150.00\)
DR-50 Resistance Decade, range .1 ohm to \(9,999.9\) ohms in .1 ohm steps. Accuracy . \(1 \%\). Wt.: 5 lbs. net; shipping 8 !bs.... \(\$ 65.00\)

\section*{RESISTANCE DECADES}

Standard models with resistance ranges of .9 to \(999,999 \mathrm{ohms}\) total. Individual units and combinations available for any effective range between .1 ohm and 1 megohm.

Manganin-wire bifilar-wound coils with exception of 10,000 ohms and above, which are nichrome wire non-inductively wound. Ceramic cores. Oven aged and dipped. Switches are self-cleaning type, with four-leaf phosphor-bronze spring wipers and detent mechanism for position location on switch points. All switches and resistors mounted below panel for protection.
Accuracy: Models DR-1 and DR-2 guaranteed to plus/minus \(1 \%\) of nominal. Other models guaranteed to plus/minus \(.1 \%\) of nominal value and adjusted to \(.05 \%\) in manufacture, excepting values below 1 ohm which are guaranteed to plus/minus \(.25 \%\) of nominal. Zero resistance, .025 ohm or less.
\begin{tabular}{|c|c|c|c|c|}
\hline Model & Total Ohmage & Decade Steps & Accuracy & Price \\
\hline DR-1 & 999,000 & \(9 \times(1,000+10,000+100,000)\) & \(\pm 1 \%\) & \$ 50.00 \\
\hline DR-2 & 99,900 & \(9 \times(100+1,000+10,000)\) & \(\pm 1 \%\) & 50.00 \\
\hline DR-3 & 9;990 & \(9 \times(10+100+1,000)\) & \(\pm .1 \%\) & 45.00 \\
\hline DR-4 & 999 & \(9 \times(1+10+100)\) & \(\pm .1 \%\) & 44.00 \\
\hline DR-10 & . 9 & \(9 \times .1\) & \(\pm .1 \%\) & 20.00 \\
\hline DR-11 & 9 & \(9 \times 1\) & \(\pm .1 \%\) & 20.00 \\
\hline DR-12 & 90 & \(9 \times 10\) & \(\pm .1 \%\) & 20.00 \\
\hline DR-13 & 900 & \(9 \times 100\) & \(\pm .1 \%\) & 20.00 \\
\hline DR-14 & 9,000 & \(9 \times 1,000\) & \(\pm .1 \%\) & 22.00 \\
\hline DR-50 & 9,999.9 & \(9 \times(.1+1+100+1,000)\) & -. \(1 \%\) & 65.00 \\
\hline DR-51 & 99,999 & \(9 \times(1+10+100+1,000+10,000)\) & -. \(1 \%\) & 70.00 \\
\hline DR-52 & 999,990 & \(9 \times(10+100+1,000+10,000+100,000)\) & -. \(1 \%\) & 100.00 \\
\hline
\end{tabular}

DR-1 to DR-4: \(53 / 4 \times 8 \times 4^{\prime \prime}\) high. Net wt. 4 lbs: \(;\) shipping, 6. DR-10 to DR-14: \(41 / 8 \times 6 \times 4^{\prime \prime}\) high. Net wt. 3 lbs.; shipping, 5. DR-50 to DR-52: 61/8 \(\times 9 \times 41 / 4 "\) high. Net wt. 5 lbs.; shipping, 7 lbs.

\section*{WHEATSTONE BRIDGE}

A sturdy, carefully engineered instrument for service in laboratory or plant. Entirely self-contained with galvanometer and \(41 / 2\) volt battery. External galvanometer and batteries may be used if desired.

Both models have ratio dial settings of \(.001, .01, .1,1,10,100\) and 1000 , as well as built-in resistance standards of \(1,10,100\) and 1000 ohm decades. Model RN-2 has both Murray and Varley loop circuits with additional multiplier steps on ratio dial for Murray loop. Accuracy: Ratios are guaranteed to \(.05 \%\) tolerance, and resistance dial resistors to \(.1 \%\) of nominal value.

Self-cleaning switches with four phosphor-bronze spring wipers and detent mechanism for position location on switch points. Switches and resistors mounted below panel for protection. Manganin-wire biflar-wound coils on ceramic cores, oven aged and dipped, and finally adjusted to \(.05 \%\). Galvanometer of well-known moving coil type. Pointer dial has fifteen 1 milliameter divisions each side of zero. Adjusting knob and safety clamp. Sensitivity of 1 microampere per milliameter. Hardwood case with slide-type hinges for removable cover. \(91 / 4 \times 71 / 2 \times 61 / 4{ }^{\prime \prime}\) high.
MODEL RN-1. Standard Portable Wheatstone Bridge complete with batteries, ready to operate. Wt. 9 lbs. net; shipping, 12 Ibs.
\(\$ 100.00\)

MODEL RN-2. Standard Portable Wheatstone Bridge with Murray \& Varley loops, complete with battery ready to operate. Weight \(91 / 4\) Ibs. net; shipping, 121/4 Ibs....................... \(\$ 125.00\)

\section*{VOLTAGE BREAKDOWN TESTERS}

A simple, positive, safe and quick means of testing voltage breakdown of materials or components. Step-up transformer is accurately controlled by Variac. By an ingenious switching arrangement connected directly to Variac, varying resistance is placed in circuit to limit load to approximately 5 milliamperes over full range of Type P-1 (illustrated) for SAFETY. Also, safety switch makes power supply inoperative if chassis is removed from case.

Operates directly on A.C. line. Green light indicates when instrument is operative. Red light flashes to indicate voltage breakdown of sample. Direct reading taken from meter.

Range: Type P-1 or small model (shown) continuously variable from 0 to 4000 volts D.C. Type P-2, similar to P-1, but has an A.C. high-potential outlet in addition to D.C. voltage. Model P-3 or large upright cabinet model (not shown) has range from 0 to 10,000 volts D.C., and A.C. outlet for 0 to 8000 volts, with short-circuit current limit of 50 milliamperes.
MODEL P-1 Voltage Breakdown Tester, complete with tubes, ready to operate. Hardwood case with sloping metal panel. \(15 \times 8 \times 10^{\prime \prime}\). Wt. 29 lbs. net; 32 lbs. shipping. \(\$ 150.00\)
MODEL P-2 Voltage Breakdown Tester, complete with tubes, ready to operate, with added \(0-3000\) volts A.C. outlet. Hardwood case with sloping metal panel. \(15 \times 8 \times 10^{\prime \prime}\) high. Wt. 29 lbs. net; 32 lbs. shipping . \(\$ 200.00\)
MODEL P-3 Voltage Breakdown Tester, complete with tubes, ready to operate. Upright metal cabinet. \(15 \times 21 \times\) \(28^{\prime \prime}\) high. Wt. 150 Ibs. net; 195 lbs. shipping............. \(\$ 350.00\)

\section*{MEGOHM BRIDGE}

A rapid, accurate instrument for routine insulation tests. Simple, compact, portable. Equally useful to laboratory and non-laboratory workers for accurate, instantaneous readings.

This instrument is an adaptation of the Wheatstone Bridge, utilizing the "magic eye" indicator in place of costly and delicate galvanometer. Operates entirely from A.C. power line. Self-contained D.C. supply. Unaffected by line voltage variations. When testing capacitors and high-capacity cables, it automatically charges the tested unit as soon as connected with test terminals, thus facilitating rapid testing.

Accuracy: Within \(5 \%\) from 1 to 15 on scale, and as close as readabye on remainder of scale. Hardwood case with sliphinge removable cover. Wt. \(61 / 4 \mathrm{lbs}\). net; shipping, \(81 / 4\).
MODEL MB-4. 100 megohms to 100,000 megohms. 500 volt D.C. bridge source
. \(\$ 60.00\)
MODEL MB-6. 100,000 ohms to 100 megohms; 10 megohms to 10,000 megohms . \(\$ 60.00\)

BODEL MB-8, 1 megohm to 1,000 megohms; 100 megohms to 100,000 megohms \(\$ 75.00\)

MODEL MB-11. 1 megohm to 1,000 megohms; 10 megohms to 10,000 megohms; 100 megohms to 100,000 megohms....... \(\$ 120.00\)

\section*{MEGOHM METER}

For high-speed testing of capacitor leakage resistance, insulation resistance and insulation measurements in production and inspection of components. Extra charging terminals charge capacitors prior to test. Broad scale meter dial with wider than usual spacing at high end of scale.

Self-contained source applies voltage not exceeding 200. External battery voltage may be used up to 1000 volts. Internal checking standard enables operator to check and adjust calibration. Stability of operation, assured.

Accuracy: Within plus/minus \(3 \%\) of full scale from infinity position on meter. Range: 1 megohm to 100,000 megohms on four multiplier ranges of \(1,10,100\) and 1,000 . Highest range can be extended up to 500,000 meegohms by using external 1,000 volt D.C. supply.

Hardwood case. Sloping bakelite panel, \(15 \times 8 \times 10^{\prime \prime}\) high. Wt. net 19 lbs.; shipping, 25.
MODEL L-2A Megohm Meter complete with tubes ready to operate
\(\$ 145.00\)
MODEL L-2AU Universal Model for use on \(110-220\) V. A.C.
power line available on special order.
\(\$ 160.00\)

\section*{CAPACITY DECADES}

Calibrated directly in capacitance so that reading from left to right, dial settings give exact value in microfarads. Progressive adjustments in small uniform steps by means of three dials rotating parallel switches.

Accuracy of Models DK-3, DK-4 and DK-2A adequate for most laboratory and industrial applications. Where closer tolerances are desired, Models DK- 10 and DK-11 are recommended.

Hardwood cabinet. Bakelite top. DK-3, DK-4, DK-10 and DK-2A, \(7 \times 8 \times 51 / 2^{\prime \prime}\) high; DK-11, \(11 \times 81 / 4 \times 7^{\prime \prime}\) high. Weight: DK-3, DK-4, DK-10 and DK-2A, net 8 lbs.; shipping, 10 lbs . DK-11, net 10 lbs .; shipping, 12 lbs.
MODEL DK-3. 11.1 mfd . in .01 mfd . steps. \(1 \%\) accuracy. Paper dielectric. 1\% P.F: 150 D.C. Peak Volts......... \(\$ 50.00\) MODEL DK-4. 1.11 mfd. in .001 mfd . steps. \(1 \%\) accuracy. Paper and mica dielectric. \(1 \%\) and .2 P.F. 150 and 700 D.C. Peak Volts.
.\(\$ 50.00\) MODEL DK-2A. 1.11 mfd . in .001 mfd . steps. \(1 \%\) accuracy. Mica dielectric throughout, \(2 \%\) P.F. 700 D.C. and 500 A.C. Peak Volts
\(\$ 100.00\) MODEL DK-10. . 111 mfd . in .001 mfd . steps. . \(5 \%\) or 10 mmfd. accuracy. Mica dielectric. 2\% P.F. 700 D.C. and 500 A.C. Peak Volts............................................................. \(\$ 100.00\)
 MODEL DK-11, 11.1 mfd in .01 mfd steps. \(1 \%\) and \(.5 \%\) accuracy. Paper and mica dielectric. \(1 \%\) and \(.2 \%\) P.F. 150 D.C., 700 D.C. and 500 A.C. Peak Volts.............. \(\$ 125.00\)

\section*{DIRECT-READING COMPARISON BRIDGE}
A.C. slidewire bridge with vacuum tube null indicator arranged so that resistors, capacitors or inductors can be compared with similar standard. Covers range of approximately plus/minus \(50 \%\) of value of standard.

Designed specifically for rapid production testing where moderate accuracy is required. Since slidewire is uncalibrated, external standards are used. Resistors, capacitors or inductors under test are connected to "X" terminals, and rejected or passed by direct reading of meter. Components outside limits set up will result
 in meter deflection greater than set value. Limits may be set for any combination of high and low values such as minus \(5 \%\) plus \(14 \%\).

Range: Capacitance, between . 0001 and 1.0 mfd . Resistance, between 2000 ohms and 20 megohms. Inductance, between 5 and 50,000 henries. Bridge source voltage, 75 volts at line frequency. Accuracy: Sensitivity and stability permit successful operation within limits set as close as plus/minus \(5 \%\), or as wide as plus/minus \(50 \%\) of nominal.

Hardwood cabinet. \(7 \times 8 \times 51 / 2^{\prime \prime}\) high. Metal meter stand. Wt. 6 lbs . net; shipping, 8 lbs.
LB-10 Comparison Bridge, complete with tubes, milliammeter, and meter stand, ready to operate.... \(\$ 60.00\)

\title{
Instruments JBT Testers
}

\section*{APPLIANCE TEMPERATURE TESTERS}

Appliance Temperature Testers are time savers, developed by J-B-T for service men, factory maintenance men, Iaboratory technicians, contractors, and maintenance engineers. Handy and accurate for maintenance, installation and inspection work.

\section*{MODEL 60-JRT}
A. 3-way portable tester
 with two temperature scales to cover quickfreeze and deep-freeze temperatures as low as \(-100^{\circ} \mathrm{F}\) up to high oven temperatures of \(600^{\circ} \mathrm{F}\). Four cold zones and two heat zones can be measured at one time, simply by turning a selector switch to proper bulb and thermocouple positions. It gives accurate readings, on the spot, for checking new installation performance and for trouble shooting on deep-freeze units, walk-in coolers, refrigerated display cases, water and beverage coolers, air conditioning, and controlled processing and heating equipment. And it checks line voltage at the same time, \(A C\) reading to 300 volts.
Sturdy polished walnut case, \(151 / 2^{\prime \prime} \times 10_{3^{3}}{ }^{\prime \prime} \times 43 / 4^{\prime \prime}\), with compartments to accommodate 4 bulbs, 2 thermocouples and voltmeter leads. Rheostat and selector switch adjustments.

When the lower temperature scale of \(-100^{\circ} \mathrm{F}\) to \(80^{\circ} \mathrm{F}\) is used, \(60-J R T\) operates as a resistance thermometer. Bulbs have llat leads so refrigerator doors can be closed during tests. Four zones can be checked at one time.

When higher scale of \(0^{\circ}\) to \(600^{\circ} \mathrm{F}\) is used, the tester acts as thermocouple millivoltmeter with bridge compensation for ambient temperature. After thermocouples are placed and leads connected, procedure is the same as for bulbs.

Operation is simple, fast, positive. Once set, meter shows temperature changes as they occur, without further adjustment. Voltmeter scale to 300 volts AC and leads are provided for checking supply voltage to the equipment under test. Voltmeter circuit employs a copper oxide rectifier, which gives a linear scale.

Two bulbs with 14 leads are supplied. Accuracy of resistance thermometer and accessories, \(\pm 2 \%\) of full scale.

Two \(51 / 2^{\prime \prime}\) iron constantan couples with attachment clip and aluminum convection shield are supplied. Accuracy of thermocouple circuit and accessories, \(\pm 2 \%\) of full scale.

One set of 4' voltmeter leads with prods and plugs. Voltmeter accuracy, \(\pm 2 \%\); rectifier accuracy \(\pm 3 \%\) full scale. One size D flashlight cell.
```

32-JP-2 PORTABLE OVEN TEMPERATURE TESTER
Complete with steel case, $51 / 2^{\prime}$ calibrated thermocouple, attachment clip and convection shield ............................ $\$ 25.00$

## LABORATORY GALYANOMETERS

## MODEL G-6, Laboratory Galvanometer,

 double pivoted, moving coil construction, designed for high flux density, is an extremely sensitive, yet rugged instrument. lightweight $41 / 8^{\prime \prime}$ knife-edge pointer is easy to read against $30-0-30$ scale with 1 mm . divisions. Short period and ability to withstand vibration make this instrument ideal for test and production conditions. Good zero stability. Current sensitivity 3.3 microamperes per mm. division with 6 ohm DC coil-sensitivity higher with higher resistances. Case is handsome natural finished mahogany $71 / 4^{\prime \prime} \times 43 / 4^{\prime \prime} \times$ $21 / 4^{\prime \prime}$ with heavy phenolic panel. For best results, it is recommended that gaivanometer and circuit resistances be reasonably matched. Resistances are indicated by model number. G-6, G-17, G-33. G-156, G-400, and G-950.PRICE, each

$\$ 25.40$

# Instruments JBI <br> Testers 

## TEMPERATURE INDICATORS

WHERE TO USE: To check heat rise of motors, transformers and coils; for laboratory furnaces, inspection set-ups, for remote indication of infra-red and other oven temperatures; and to maintain controlled industrial processes such as heat treating and annealing. When used with selector switch, permits centralized reading of one to ten thermocouples, as in Diesel exhaust manifold applications.

## MODEL 32-J

MODEL 32-J PYROMETER IN SN-3 STAND. Mounted in sloping front black metal stoping $41 / 4^{\prime \prime}$ high $\times 4^{3 / 8}$. ${ }^{\text {metal }}$ stand, $41 / 4$ high $x 43 / 8$ deep x41/8 wide. Compensated for resistance system, damped resistance system, damped for quick reading on $23 / 8$. scale, assures ruggedness and pointer stability. To retain the $1 \%$ accuracy of the installation: use only the type and resistance of thermocouple and lead which are provided; do not cut extra lead-coil it - change in length changes calibration. A protection tube is not generally required. Many users find it convenient to keep an extra couple and lead on hand.

## MODEL 32-J IN SN-3 STAND

$0^{\circ}-650^{\circ} \mathrm{F}$ includes SA-91 thermocouple, SA-84 lead,
and CB-1 connector block ................................................. \$25.00
$0^{\circ}-1200^{\circ}$ F includes SA-87, SA-82, and CB-1 ................... 25.00 $0^{\circ}--2000^{\circ} \mathrm{F}$ includes SA-87, SA-82, and CB-1 .................. $\mathbf{2 5 . 0 0}$
Note: Centigrade equivalent scales available on order.
MODEL 32-J IN SN-5 STAND (not illustrated). With 3 binding posts to accornmodate flexible extra lead and thermocouple for hard-to-reach locations.
$0^{\circ}-650^{\circ} \mathrm{F}$ with SA-91 thermocouple, SA-84 lead, CB-1 connector block, and SA-86 flexible lead and thermocouple .............. \$28.00

## MODEL 60-JPS

MODEL 60-JPS. This portable makes it easy to know temperatures at one to ten locations. Excents of study of heat in various parts of the same equipment, ot in a battery oi units Knife-edge poinfer, 5.6 scale. Heavy duty thermocouple switch has average contact resistance of .00075 ohms or less. Automatically compensated for ambient femperature, indoors or outdoors. To retain accuracy of $1 \%$ full scale, use leads and thermocouples equal to resistance and e.m. f.vs-temperature characteristics for which instrument is calibrated. Medi-
 um resistance system assures portability. Housed in natural-finish wood case $113 / 8$, x $85 / 8 \times 45 / 8$ over rubber feet. A "must" for inspection, maintenance, and engineering. $60-\mathrm{JPS}-0^{\circ}-600^{\circ} \mathrm{F}$ with SA-86, $7^{\prime}$ thermocouple and lead
for small apertures
$60-10^{\circ} 1200^{\circ} \mathrm{F}$ with SA-88, SA-82, and CB-1 .............. 90.00 So-TP-For one thermocouple only; furnished with thermocouple and lead same as 60 -JPS, but without selector switch.
and lead same as $0^{\circ}-600^{\circ} \mathrm{F}$, with SA-86 60-JP- $0^{\circ}-1200^{\circ} F^{\prime}$, with SA-88, SA-82, and CB-1 $60-\mathrm{JP}-0^{\circ}-2000^{\circ} \mathrm{F}$, with SA-88, SA-82, and CB-1...................... 65.00
Note: When ordering additional thermocouples, specify couples and leads as above. Centigrade equivalent scales available on order.

## Model 70-J

MODEL 70-J PYROMETER, for accurate reading at a distance, has full $6^{\prime \prime}$ scale and spade pointer, with accuracy of $1 \%$ of total scale deflection. Automatically compensated for ambient temperature. Molded case mounted in steel shielding shell $73 / 8^{\prime \prime} \times 81 / 8^{\prime \prime} \times 1 / 2^{\prime \prime}$. Connections through bottom of case for wall or front-of-board mounting. When ordering, specify which standard scale range: $0^{\circ}-600^{\circ} F$ for 1938 std. I-C; $0^{\circ}-1200^{\circ} F$ for $C-A$;
 $0^{\circ}-2000^{\circ} \mathrm{F}$ for $\mathrm{C}-\mathrm{A}$, thermocouples.
PRICE, including $24^{\prime}$ ' thermocouple and $26^{\prime}$ lead ........... $\$ 55.00$

## ACCESSORIES

LEAD WIRES. To bring the reference junction within the pyrometer, compensating or extension lead wires should always pyrometer, compensating or extension lead wires should aiways
be used. See the instrument dial for (l) the kind of lead and (2) combined resistance of lead and thermocouple. Standard leads include:
SA-82 $6^{\prime}$ compensating lead for chromel-alumel couples; duplex, stranded; asbestos-insulated, cotton-braid impregnated with moisture-proof and flame-proot compound; terminals at instrument end; other end tinned for connector block ....... \$1,40 SA-83 26' compensating lead for chromel-alumel as above

SA-84 6' extension lead for iron-constantan, 1938 calibration; duplex; moisture-proof and flame-proof; prepared as above

SA-85 $25^{\circ}$ extension lead for iron-constantan, 1938 calibration; similar to above ... ................................................................................. $\$ 4.40$ SA-86 7' iron-constantan thermocouple and lead combined; twisted pair No. 20 Ga., asbestos-insulated-for intermittent use on $600^{\circ}$ scales; terminals at instrument end; other end welded; resistance is not interchangeable with SA-84 and SA-85
$\$ 1.70$

## $9 \square \square \square \square \square \mathrm{~m}$

THERMOCOUPLES. For pyrometers and leads above, J-B-T thermocouples are caretully selected, standardized, and tested. ## VIBRATING REED FREQUENCY METERS (fatented)

I-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone, and television service, on engine generator sets, in laboratories, in many types of electronic equipment, on panel and control boards in central stations and industrial plants-wherever constant or known frequency is important to efficient operation of equipment.

## PRINCIPLE OF OPERATION:

Simple in design, the J-B-T Meter consists of a case, base, dial and central mounting frame, with a series of spring steel reeds screwed to a reed mounting bar, individual driving coil surrounding each bank of reeds, permanent magnet, series resistor and terminal studs.
Each reed is adjusted to respond by resonance to but one frequency. As the alternating current (or interrupted direct current) excites the driving coil, the one reed "in tune" with the frequency in the coils will respond by vibrating rapidly because of permanent magnet polarization and induced magnetism from the coil. The instrument is adapted to specified operating vollage by a series resistor. Frequency of the current is read on the graduated face of the instrument.

## ADVANTAGES:

Some standard models are available in either half cycle or full cycle steps, as shown below on two meters indicating a frequency of 60 cycles.

Above: Models 30-F, 31-F, 33-F, 34-F; Metal Case Below: Models 30-FX, 31-FX, 33-FX, 34-FX; Molded Case

Both response patterns are extremely easy to read. In the half cycle instrument the response is broad; in the full cycle instrument, the response is shorp.
Guaranteed accuracy of $\pm 0.3 \%$ or better, depending on the model-not an overall percentage based on the maximum scale reading, but applied to each frequency being measured.
High fatigue safety factor for continuous operation, and outstanding temperature stability. Temperature compensators are not required.
All meters are permanently calibrated at the factory and do not require subsequent adjustment. Accuracy is not affected by wave form or external magnetic fields.
These meters are rugged. Built with no pivoted parts and with lock washers at every critical point, they can take rougher freatment than many instruments.

## CAUTION:

If a meter plugged in on a 60 cycle AC power line does not indicate a frequency of exactly 60 cycles, trust the meterl Power supply may momentarily be off-frequency due to changing load conditions beyond the control of Utility. All J-B-T Vibrating Reed Frequency Meters are accurately calibrated at the factory, entirely independent of frequency of power supply.

## MODEL 31-F

Used in standby power equipment. Handy for accurately measuring frequency of power source. Five reeds, $58-62$ cycles. Other characteristics same as Model 30-F.
31-F, 58-62 cy., $31 / 4^{\prime \prime}$ Metal Case ................................. \$21.50 31-FX, 58-62 cy., $31 / 2^{\prime \prime}$ Molded Case, AWS mtg. ............ \$21.50

## MODEL 30-F

Hange: 48-52 and 58-62 cycles. Double window for ease of reading frequency in either range. Often specified for export. $100-130$ volts; 130 ohms per volt; $l$ watt power consumption. Accuracy $\pm 0.3 \%$. Flush panel mounting. 30-F, 48-52 and 58-62 cy., $31 / 4^{\prime \prime}$ Metal Case ................. $\$ 25.00$ 30-FX, 48-52 and 58-62 cy., $31 / 2^{\prime \prime}$ Molded Case, AWS mtg . ................................. \$25.00

MODEL 31-F

## MODEL 34-FX

Used where a broader frequency band is desirable. Nine reeds, $56-64$ cycles, or in half-cycle steps (accuracy $\pm 0.2 \%$ ) 58-62 cycles. $100-130$ volts; 130 ohms per volt; 1 watt power consumption. Flush panel mounting.

# Instruments $\mathrm{JBI}_{\text {B }}$ Testers N C 

## MODEL 33-F

400-cycle. Used for measuring frequency of high-cycle power sources, including new heavy aircralt. Accuracy $\pm 0.3 \%$. Nine reed, 380 to 420 cycle range. $100-300$ volts; 70 ohms per volt; 1.75 waits power consumption. Flush panel mounting.
33-F, 380-420 cy., $31 / 4^{\prime \prime}$ Metal Case ................................. $\$ 31.00$ 33-FX, $380-420 \mathrm{cy} ., 31 / 2^{*}$ Molded Case, AWS mtg. ........... $\$ 31.00$

## MODEL 21-FX

Smallest frequency meter manu. factured. Meets ASA (AWS) C39. 2-1944 in depth of case as well as in mounting dimensions and mounting hardware. Matches other $22^{1 / 2}$ panel instru-
 $\begin{array}{lll}\text { 100-130 volts; } 5 & \text { reeds; } 58-62 \\ \text { cycles; } & 190 \text { ohms per volt; } & 0.6\end{array}$ cycles; 190 ohms per volt; 0.6
watt power consumption. Also 116 to 124 cy.; 160 ohms per volt; 0.7 watt power consumption. Flush panel mounting ${ }^{58}$-62 cy. ${ }^{\prime \prime}$ $\begin{array}{lll}\text { 2l-FX, } & 58-62 & \text { cy. } \\ \text { Molded Case } & 2-11 / 16^{\prime \prime} \\ \end{array}$ 21-FX. 116-124 cy., 2-11/16" Molded Case, AWS mtg. .. \$23.00

## PORTABLE FREQUENCY TESTERS

MODEL 33-FP-9. Handy, compact, portable instrument of excephonal accuracy even under poor wave-torm conditions, fluctuating voltage or external magnetic disturbences. Meets exacting test requirements of aviation, signal and communication equipment. Treated against fungus and moisture. Housed in sturdy metal case $6^{\prime \prime} \times 33 / 4^{\prime \prime} \times 37 / 8^{\prime \prime}$. Hinged top compartment provided for the $4^{\prime}$ leads which are supplied complete with sharp $5^{\prime \prime}$ insulated test picks and banana plugs. Electrical characteristics identical with 400 cycle $33-F$. Model $34-F P-9$ electrical characteristics identical with 60 cycle 34 -FX.
33-FP-9. $380-420 \mathrm{cy}$. $\qquad$ 34-FP-9. 56-64 cy., $\$ 38.00$

## ELAPSED TIME COMBINATION

MODEL 31-FE. A unique panel instrument which combines the elapsed time meter or running time meter with frequency reeds. It is especially useful on motor generator sets and on electrical equipment where maintenance routine calls for periodic servicing. Reads 9,999.9 hours; 58-62 cycles at 100-130 volts.
31-FE
$\$ 30.00$

## VACUUM TUBE FREQUENCY METERS <br> (PATENTS PENDING)

## PRINCIPLES OF OPERATION:

J-B-T Models 33-VTF and $39-$ VTF Vacuum Tube Frequency Meters are designed to provide the maximum degree of ac curacy in measuring frequencies located within definite bands. A special multi-vibrator circuit in the electronic unit divides the incoming frequency by two or three or even higher integers then permits the use of a vibrating reed frequency meter in measuring the resultant frequency. The inherent accuracy and Iuggedness of the vibrating reed instrument are thus used to full advantage in this combination.

## WHERE USED:

J-B-T Models 33-VTF and 39-VTF are especially useful for checking audio oscillators, frequency converters, radar equipment, and for standardizing less accurate frequency measuring

ADVANTAGES:
Extreme Accuracy-Measurement within $\pm 0.25 \%$ for any indicated frequency. Permanent Accuracy-Calibrated at factoryno subsequent calibration or siandardization required at any time. Temperature Dritt Eliminated-No initial stabilization period required. Burn-Out Proof-No protection needed against accidental frequencies above the range being measured. Few Controls-Requires no complicated controls for operation. Stability of Circuit-Accuracy of reading is independent of line voltage variation. No voltage regulator, external or internal, is required.

Model 33-VTF with cover removed. Vacuum tube unit attaches to rear of panel meter mounts nush.

## MODEL 33-VTF, FIELD TYPE

Frequency ranges: 380-420 cycles; 760-840 cycles; 1140-1260 cycles; available singly or in combination. (See Model 33-F ior single range $380-420$ cycle meters). Voltage range: 100-130 volts. Power to operate the units is obtained from an inverter or other source of frequency being measured. Power consumption: approximately 20 watts. This model requires no power supply other than the source whose frequency is being checked. Input other than the soutce whose frequency is being checked. Input impedance: approximately G5 onms. Tubes used. $\bar{G}$ rectifier
 Size: $45 / 8$ x ${ }^{51 / 2} x$ a ${ }^{\circ}$ weight: approximately 6 lb. Black wrinkle finish. Unit is provided with $3-1 / 4-28$ vibration-proof nuts for exther panel or bracket mounting. Frequency meter, std. $6^{31 / 2}$ flush panel mounting. Connecting leads included are $2^{4}$ leads between the electronic unit and frequency meter. Thiey may be located any desired distance MODÉ however

Single range $760-840 \mathrm{cy}$
$\$ 110.00$
Single range $1140-1260$ cy
125.00

## MODEL 39-VTF, LABORATORY TYPE

Frequency ranges: Basic range, $380-420$ cycles. Multiplier switch permits use in ranges of $2,3,4,6$ and 9 times the fundamental range. (400, 800, 1200, 1600, 2400 and 3600 cycle bands). Voltage range: 100-350 volts. Power consumption: Approximately 25 watts at 115 volts. 60 cvcles. Input sensitivity: 500,000 ohms. Tubes: $2-6 \mathrm{~N} 7$ multi-vibrators; 1-6N6 input; $1-6 \mathrm{~V} 6$ amplifier: 1-6X5 rectifier. Size: housed. in metal cabinet panel.

## shooter's check list . . . AND PROUD OF IT!

J-B-T Instrument Type Rotary Selector Switches were designed and developed to meet the need for trouble-free, dependable performance in hard service. These superior switches are used extensively in high quality test equipment, portable instruments, inspection setups and experimental circuits. Available in two basic types-14 and 20 position-the design gives extra contacts in minimum space. One to six decks. FEATURES:
Reliability-Rigid, 3-post deck suspension, instead of the usual 2; all parts heavily coin silver plated to meet 200 hour salt spray test; ball bearing action, beryllium-copper spring, and special design detent wheel assure positive indexing. Laminated plastic decks and rotors selected for maximum mechanical and dielectric strength.
Exceptional Compactness-14-position switch takes 13 circuits and "'off" in 2" circle; 20-position switch handles 19 circuits and "off" in $2-23 / 32$ " circle. Additional decks require only $5 / 16$ " spacing per section.

collector arms, and triple conLow Contact Loss-Double-grip collector arms; and inple contacts on collector rings, silver to silver, result in an average contact resistan
Ample Dielectric-Normal make-and-break with resistance load 25 Ma . at 300 volis AC or DC ; normal carrying capacity (not
make-and-break), 1 amp.; maximum momentary capacity (not make-and-break), 5 amp.; maximum voltage between contacts and ground, 1000 volts R.M.S.; between decks and ground, 2000 volts R.M.S.

* Standard items, but not regularly stocked; checir with your * $\begin{aligned} & \text { Sistributorator }\end{aligned}$

BASIC 14-POSITION: Knob supplied only on individually packed units-not on bulk orders unless specified. Collector arm placed directly opposite to shaft, unless otherwise specified. Contact lugs and common lugs positioned as shown, 13 contacts per deck. One to six decks; for each additional deck (or gang) add $5 / 16^{\prime \prime}$ to depth. Continuous rotation type supplied unless otherwise specified. Adjustable Stop supplied when requested. Panel
Locator available on special order. Special stabilizing end ring used on switches with three or more decks.
BASIC 20-POSITION: Knob supplied only on individually packed units-not on bulk orders unless specified. Collector arm placed directly opposite to flat on shaft, unless otherwise specified. per deck continuous rotation types. One to six decks; for each additional deck, add $5 / 16^{\prime \prime}$ to depth. Panel locator positioned as shown unless otherwise specified on bulk orders.

## NEW SWITCHES - 12-POSITION, $30^{\circ}$ INDEXING

For those unable to take advantage of the exceptional compactness of the SS-14 and SS-20 switches, such features as the 3 -post deck suspension will be made available in the new SS-12 Series. Design provides a stop which can be adjusted at any time.
The SS-12 Series will appeal to those who require high quality replacements for $30^{\circ}$ indexing switches. As no special assembly fixtures are required, kits will be offered when parts are available. As this catalog goes to press, prices and delivery information have not yet been released.

# UNIVERSAL SIGNAL GENERATOR - MODEL 641 AM FREQUENCIES 100 KC TO 120 MC - FM FREQUENCIES 100 KC TO 160 MC 

This instrument has been specifically designed to meet the requirements of the modern radio and electronic servicerepair laboratory. Amplitude modulated, frequency modulated and television receivers are all within the scope of this entirely new instrument.

## FEATURES

FREQUENCY RANGE-Amplitude modulation 100 KC to 120 MC while the frequency modulation extends from 100 KC to 160 MC .

AMPLITUDE MODULATION percentage continuously variable 0-80 percent.

FREQUENCY MODULATION - Two FM frequency sweep ranges are provided, narrow band adjustable from $0-40 \mathrm{KC}$ and wide band, adjustable from $0-400 \mathrm{KC}$.

AUDIO MODULATION FREQUENCY-A built-in variable RC tuned audio oscillator is incorporated in the instrument independent of the RF oscillator, covering the audible frequency range of 100 to 10,000 cycles in two ranges. The audio modulation of either the AM or the FM signal output can be varied throughout the entire range of 100 to 10,000 cycles and is available externally for audio testing.
METERED OUTPUT-The output is continuously read directly in microvolis on the meter dial of the high quality RF voltmeter section of the instrument. This RF voltmeter constantly monitors the output level (for constant reterence) of the RF voltage and is adjustable by the attenuator controls. There is no reference adjustment required, eliminating tedious preadjustments.

OUTPUT IMPEDANCE-The output impedance is constant for all ranges. The carefully designed and excellently constructed attenuator circuit, coupled to the powerful oscillator, develops the rated output voltage with 30 ohms output impedance. This is a feature found only in laboratory standards costing three to four times more.

FULL VISION DIAL glass enclosed, providing quick accurate frequency settings, also protects scale from disfigurement.

COMPLETE RF \& AF TESTS - Since the audio modulation frequency of both the cmplitude and frequency modulated sigral is variable throughout the audio range ( 100 to 10,000 cycles) the audio section including speaker of a receiver can be checked with a single connection of the instrument to the receiver antenna post and sweeping the band.

MULTIPLE RF SHIELDING and LINE FILTERS are featured to minimize stray RF and line leakage.

## SPECIFICATIONS

## AMPLITUDE MODULATION

(1) Frequency Range 100 KC to 120 MC (ALL FUNDAMENTAL) in 8 ranges.
(2) Accuracy: $1 / 2$ of $1 \%$ on all ranges.
(3) Audio Modulation Frequency 100 to 10,000 cycles adjustable. Can also be modulated with 60 cycles or externally if desired.
(4) Calibrated Output: 0-100,000 micro-volts, with a jack provided for high output.

## FREQUENCY MODULATON

(1) Frequency Range: 100 KC to 160 MC .
(2) Narrow Band: 0-40 KC adjustable. Fixed oscillator 1000 KC.
(3) Wide Band: 0-400 KC adjustable. Fixed oscillator 40 MC .
(4) Modulation Frequency: 100 to 10,000 cycles, adjustable. Can also be modulated with 60 cycle or externally if desired.

## AUDIO OUTPUT

(1) Variable Range: 100 to 10,000 cycles available from external (High Impedance) jack.

## VISUAL RESONANCE

(1) A 60 cycle sweep frequency is provided for visual resonance analysis. A locking pulse is furnished for CRO timing. The two ranges of $0-40,0-400 \mathrm{KC}$ furnish any desired range for either $A M$, narrow or wide band frequency modulation analysis.

## MECHANICAL SPECIFICATIONS:

(1) Construction: Ruggedly assembled using finest material arranged for best electrical efficiency.
(2) Multiple shielding on RF oscillator unit.
(3) Dials and controls grouped for maximum operating convenience.
(4) Designed to mount in any standard relay rack, such as Jackson "Service Lab" or "Bench Lab" units.

## ACCESSORIES

(1) Furnished complete with tubes and coaxial output cable. (2) Instrument is brotected by a fused line plug.

## dimensions

$163 / 4^{\prime \prime}$ long x $91 / 2^{\prime \prime}$ high x $7^{\prime \prime}$ deep.

## POWER SUPPLY

IO5 to 125 volts, $50-60$ cycle.
MODEL 641
$\$ 149.50$

# JACKSON THE JACKSON ELECTRICAL INSTRUMENI CO. DAYTON, OHIO 

## MODEL 636 DYNAMIC TUBE TESTERS

## WITH BUILT-IN ROTARY TUBE CHART

NEW in design and performance including the latest Jackson patented switching circuits.

MODERN in every feature of construction, appearance and operation.
COMPLETE with every valuable fecture. Up to date for all newest tube types.

## SPECIFICATIONS

"DYNAMIC" METHOD OF TEST--Makes a better test on every fube. The "Dynamic" method is more accurate, frequently finding "poor" tubes which might pass for "good" in ordinary testers.

NEW-HIGH VOLTAGE POWER SUPPLY is a feature of this tester. By testing tubes at higher plate voltages (over 200 V . for some types), more accurate results are obtained.

TESTS ALL TUBES-ALL of the popular receiving types and television amplifiers, including BANTAMS-LOCTALS-SINGLE ENDED-HIGH VOLTAGE FILAMENT TYPES and MINIATURES. Provision for many more. The tester is protected against obsolescence in every possible feature.

ROLL CHART tube index-simplifies corect settings.
FULL RANGE FILAMENT SELECTION From $3 / 4$ V. to 115 V. Selector marked directly in volts. This feature eliminates quess work and helps the operator to avoid mistakes.
MOST IMPROVED TYPE OF SWITCHING SYSTEM--Spare circuits and switch positions provided for future use. One "spare" socket position.

NOISE TEST jacks are provided for audible test of possible tube noise.

Illustrated above is the Model 636CP Portable. The tester is installed in a beautiful leatherette case. The hinged lid is removable. The Portable Model is recommended beccuse of the extra convenience and added protection for instrument panel.
Dimensions: $14^{\prime \prime}$ long x $12^{\prime \prime} \times 51 / 2^{\prime \prime}$. Weight II lbs.
MODEL 636CP
$\$ 62.50$

MODEL 636-C COUNTER TESTER

Model 636C
Installed in a professional, highly attractive case with rounded corners. Will add distinction to any dealer's counter or service bench.
Dimensions: $16^{\prime \prime}$ wide $\times 7^{\prime \prime}$ high $\times 133 / 4^{\prime \prime}$ front to back.
MODEL 636C

IMPORTANT-All models of Jackson Tube Testers are exactly alike in testing method. Regardless of the model you choose, it will have the same patented Jackson Dynamic testing features.

# JACKSON <br>  

## DYNAMIC OUTPUT TUBE TESTER <br> WITH COMPLETE UNIVERSAL METER RANGES MODEL 637

IN THE SHOP OR OUT ON THE JOB here's the ideal tester for modern servicing. Combines 27 ranges and 10 functions including-
(1) Dynamic cutput tube tester of the same type and quality as the Model 636 series.
(2) Multi-range AC Voltmeter 0-10/100/250/500/1000/2500.
(3) Multimeter DC Volimeter 0-10/100/250/500/1000/2500.
(4) Decibel meter-ranges from minus 10 to plus $14 / 10$ to $34 / 30$ to 54 .
(5) Multi-range DC Milliammeter 0-1/10/100/250.
(6) Ammeter range - 0 to 10 amperes DC .
(7) Triple range Ohmmeter 0-3000/300,000/0-30 megohms.

## FEATURES

AUTOMATIC PUSH BUTTON SELECTOR provides for instant use of any meter range; the new selector is marked directly in volts at each position. This feature eliminates guess work and helps the operator to avoid mistakes.
REMARKABLY EASY TO USE - Notice the simplicity of panel and controls. The engineering is all BENEATH THE PANEL. You don't lose valuable time figuring out the next move.
FULL VISION Jackson meter is an exclusive feature on this tester. Meter measures 6 inches over flanges.
CASE is cf finest material and construction, has removable hinged lid.

ACCESSORIES-Furnished complete with self contained battery (for ohmmeter) and test prods. DIMENSIONS-Overall $143 / 4^{\prime \prime} \times 133 / 4^{\prime \prime} \times 6^{\prime \prime}$. MODEL 637

## AUDIO OSCILLATOR MODEL 655

The Model 655 provides an audio frequency voltage DEVELOPED AT ITS FUNDAMENTAL FREQUENCY. The basic design of this instrument is entirely different from the "beat frequency" type of Audio Oscillator.

## FEATURES

RESISTANCE CAPACITY TUNED CIRCUIT DESIGN, engineered for improved operating characteristics of audio measurements.
NO ZERO ADJUSTMENT - Tuned Fundamental Frequency method provides permanently locked calibration.
OUTPUT CHARACTERISTICS - A choice of either transformer coupled or resistive output is available. The Model 655 meets the most exacting requirements as to WAVEFORM-UNIFORM FREQUENCY CHARACTERISTICS and OUTPUT LOAD IMPEDANCE SELECTION. A special feature of the output system is the 10 ohm tap for low impedance circuits such as speaker voice coils, etc.
VARIABLE FREQUENCY SELECTION throughout the four bands. There are over 33 inches of scale length making EXACT settings possible.
COMPLETE STABILITY-The stability of frequency calibration is constant throughout the entire range. The stabilized circuit permits large changes in line voltage to occur without affecting frequency or waveform and having negligible effect on output voltage.
SIMPLIFIED OPERATION - It is only necessary to select desired FREQUENCY and OUTPUT. THERE ARE NO OTHER CONTROLS-The possibility of errors in operation are therefore eliminated.
HIGH OUTPUT POWER-More than THREE TIMES the output usually available from ordinary audio oscillators.
CONSTRUCTION--Frequency dial is glass enclosed so that calibrations cannot become disfigured. Rugged mechanical features assure trouble free operation under service conditions.

## SPECIFICATIONS

FREQUENCY RANGE - 20 Cycles to 200,000 cycles in 4 ranges: $20-200$ cycles $/ 200-2000$ cycles/ 2000 to 20,000 cycles/ 20,000 cycles to 200,000 cycles.

CALIBRATION-Logarithmic variation of frequency over the scale provides constant percentage accuracy at all frequencies.
SCAIE LENGTH-Over 33 inches.
OUTPUT IMPEDANCE - Five values of output impedance: 10 ohms/250 ohms/500 ohms/5000 ohms/RESISTIVE. Controlled by selector switch.
OUTPUT POWER-500 Milliwatts 20 to 20,000 cycles transformer coupled).
OUTPUT CONTROL - Continuously variable from zero to maximum.
WAVEFORM - Less than $5 \%$ distortion at all frequencies between 30 and 15,000 cycles.
FREQUENCY CHARACTERISTICS-Plus or minus l DB 3015,000 cycles using transformer coupled output.
HUM LEVEL-Down more than 60 DB of maximum.
ACCURACY- $3 \%$ or 1 cycle whichever is greater.
TUBES - 1-6G6G, 1-6SL7GT, 2-6V6GT, 1-5Y3GT furnished installed.
DIMENSIONS-13" wide $\times 91 / 2^{\prime \prime}$ high $91 / 2^{\prime \prime}$ deep.
MODEL 655
$\$ 125.00$

Test Oscillator-Model 640

Condenser Tester-Model 650-A

## TEST OSCILLATOR — MODEL 640

A complete test oscillator for all general purpose work. Has full range direct reading dial from 100 KC up to 30 Megacycles, all fundamental. For added convenience there are Two Harmonic bands, 28 MC to 60 MC and 56 MC to 120 MC .

## FEATURES

PUSH-BUTTON selection of all ranges makes speedy and accurate operation possible.
GLASS ENCLOSED DIAL-prevents dust and avoids possibility of damage to pointer.
TWO CIRCUIT ATTENUATOR provides variable ratio and also vernier control.
HAS POWERFUL SIGNAL OUTPUT which may be used either as pure R.F. or Modulated R.F. Carrier is modulated at approximately $30 \%$. The A.F. voltage is available for external use.
ACCURACY GUARANTEED to $1 / 2$ of $1 \%$ on all ranges.
Operates from 100 volt 60 cycles. Uses three tubes (rectifier, oscillator and modulator).

MODEL 640.
..NET CASH PRICE $\$ 56.00$

## CONDENSER TESTER — MODEL 650-A

The Model 650 is a modern, accurate and complete instrument for detecting faulty condensers-ELECTROLYTIC, PAPER or MICA. Uses a new method for Leakage Test which will reveal otherwise unnoticed condenser defects.

## FEATURES

AUTOMATIC PUSH BUTTON CONTROLLED-Amazing in speed and simplicity of use. Capacity readings almost instantaneousl Leakage test by just pressing a button.
SCALE IS GLASS ENCLOSED and is equipped with the new Jackson SCALE EXPANDER indicating pointer-doubles effective scale length.
MEASURES ALL VALUES direct reading in Microfarads.
RANGES: .00001 to .001 mfd . .1 to 100 mfd .
.001 to . 1 mfd . 50 to 1000 mfd .
MEASURES POWER FACTOR on direct reading dial. Power Factor range calibrated from 0 to $60 \%$.
COMPLETE SELECTION OF TEST VOLTAGE. 20 volts to 500 volts.
ELECTRON RAY TUBE indicates exact balance or shows if leakage is present.
INSTANTANEOUS LEARAGE INDICATION-counting of flashes eliminated. No other quess-work with this modern tester. Has special built-in amplifier stage which actually responds to slightest leakage, if present. Thus all leakage defects may be located.
MODEL 650-A
NET CASH PRICE $\$ 49.00$

## COMPACT VOLT-OHM-MILLIAMMETER - MODEL 615

An excellent general purpose instrument, compact in size but unusually complete in ranges. Panel is finished in attractive twotone grey with white lettering.

## FEATURES

RANGE SELECTION-Rotary switch method saves time and reduces errors.
HIGH QUALITY METER-Three inch square type meter with two jewelled bearings.
RANGES-
Two Ohms Ranges--0-1000/0-500,000

Five D.C. Volts Ranges-0-5/50/100/250/1000 Four D.C.M.A. Ranges- $0-1 / 5 / 50 / 250$
Five A.C. Volts Ranges-0-10/100/200/500/ 2000
Additional High Voltage D.C. Range-$0-2500$ v.
Each instrument supplied complete with selfcontained battery for ohms ranges.
Test leads not included. Dimensions-7" x $41 / 4^{\prime \prime} \times 3{ }^{\prime \prime}$.

Volt-Ohm-Milliammeter Model 65

## CRYSTAL PROBE

Using this high frequency crystal probe with the Model 645 high frequencies of 200 KC to 200 MC can be read directly on the 4,10 and 40 volt DC scales. Ideal for FM and Television testing.

Model 645P

MODEL 645P
. $\$ 7.50$

## VACUUM TUBE VOLTMETER

Model 645 is an ultra-modern high sensitivity instrument, with all of the famous Jackson features, including exceptional accuracy and simplicity of use.

## FEATURES

BOTH A.C. AND D.C. VOLT RANGES ARE ELECTRONIC. This provides the maximum of sensitivity and overload protection for all A.C. ranges as well as D.C. and ohms ranges.
MEASURES RESISTANCE UP TO 1 BILLION OHMS (1 thousand megohms)-and as low as $2 / 10$ ohm.
3 MILLION OHMS PER VOLT SENSITIVITY on $0-4$ volt D.C. range. Constant input resistance 12 megohms on all D.C. volts ranges.
Over 4 million ohms per volt sensitivity on O-1 volt A.C. range. Input resistance of 4.4 megohms on all A.C. ranges. Flat frequency response between 50 cycles and 200,000 cycles.
METER CANNOT BE DAMAGED BY ACCIDENTAL OVERLOAD on any electronic range. Electronic overload-protection on all A.C. and D.C. volts, and ohms ranges. Variations in line voltage do not affect accuracy within the range of 100 to 125 volts. Instrument is equipped with ballast control tube and compensating circuits.
Contains 3 tubes ( $6 \mathrm{X} 5 \mathrm{GT} / 6 \mathrm{~K} 6 \mathrm{GT} / 7 \mathrm{~N} 7$ ); 1-41/2 volt battery and ballast; all self-contained and furnished with the instrument.

## METER RANGES-

A.C. Volts: $0-1 / 4 / 10 / 40 / 100 / 400 / 1000$.
D.C. Volts: $0-4 / 10 / 40 / 100 / 400 / 1000$.

Ohms: 0 - $1000 / 10,000 / 100,000 / 1 \mathrm{meg} / 10 \mathrm{meg} / 100 \mathrm{meg} / 1000 \mathrm{meg}$. M.A.: $0-1 / 4 / 10 / 40 / 100 / 400 / 1000$.

Decibels: Minus 30 to minus $5 /$ minus 10 to plus $15 / 10$ to $35 / 30$ to 55 .
Either positive or negative D.C. voltmeter indications instantly by means of reversal switch. Signal Tracing type test lead with isolation resistor in probe furnished.
MODEL 645 ...
NET PRICE $\$ 59.50$

## UNIVERSAL VOLT-OHM-MILLIAMMETER-MODEL 642 <br> (20,000 Ohms Per Volt)

A valuable and necessary instrument for all measurements of sensitive circuits such as A.V.C. voltages, etc. Many measure.

Universal Volt-Ohm-Milliammeter-Model 642 ments may be made with current drain as low as 2 microamperes. AUTOMATIC RANGE SELECTION - PUSH BUTTON CONTROLLED. Instant selection of any meter range is made simple with the eleven key push button selector.
TWENTY-THREE RANGES-SEVEN FUNCTIONS AC/DC volts-ohms-decibels-milliamperes-microamperes and amperes. Has special built-in shunt and 10 ampere range.
OHMS RANGES from $1 / 2$ ohm up to thirty megohms. No external batteries or line power required.
METER RANGES-
A.C. Volts: $0-10 / 100 / 250 / 500 / 1000 / 5000$. D.C. Volts: 0-10/100/-

250/500/1000/5000. Decibels: Minus 10 to plus $14 / 10$ to $34 / 30$ to 54. D.C. M. A.: 0-10/100/250. Microamps: 0-100. Amperes: 0-10. Ohms: $0-3000 / 300,000 / 30,000,000$. All D.C. volts ranges are $20,000 \mathrm{ohms}$ per volt. A.C. ranges 1000 ohms per volt.
CONSTRUCTION is of the finest in materials and workmanship. Case is welded steel finished in grey morocco. Fitted with removable hinged steel cover. Protects meter and controls. Case dimensions: $81 / 2^{\prime \prime} \times 81 / 2^{\prime \prime} \times 6^{\prime \prime}$. Weight 6 lbs. Complete with self-contained battery. Furnished with test leads.
MODEL 642.
NETT CASH PRICE $\$ 59.50$

## UNIVERSAL VOLT-OHM-MILLIAMMETER-MODEL 643

(1000 ohms per volt)
MODEL 643.
NET CASH PRICE $\$ 45.00$
Same ranges as the Model 642 except micro-amps range is $0-1000$ and ohms ranges are $0-3000 / 300,000 / 3,000,000$.

## JACKSON <br>  <br> the jackson gieitrical instrument co., dayton, ohio

## MODERN "SERVICE LAB" UNITS

Model 805

Jackson Laboratory units are designed to fill the need for attractive service benches.
STREAMLINED-Angled front panel for easy visibility of each instrument. This type styling makes the Service Lab more convenient in use and aftractive in appearance.
EXTRA ACCESSORY PANEL-Every Lab unit is equipped with this feature. The accessory panel (see illustration) is already machined for easy installation of any special test features you might wish to add. This is actually a "custom built" feature-yet is included at no extra cost with each Jackson Service Lab.
INTERCHANGEABLE PANELS --. Standard Relay Rack Size Panels-a feature originated by Jackson years ago in the first "Service Labs."
CUSTOMER APPEAL-Your well equipped modern shop will attract more customers and instill customer confidence. Test equipment mounted in these units will accelerate your volume of work, increase your accuracy, enabling you to obtain higher prices per job.
A.C. SWITCH and OUTLETS - Each lab is completely wired, ready for use. Two AC outlets and master switch on front panel. Also three AC outlets for installed instruments.

## MODEL 805

Illustrated at left is one of the many combinations of instruments that may be installed in the Service Lab units. This unit Model 805 contains three separate instruments. Each is a complete portable instrument in itself and may be removed easily.

- Model 655 Audio Oscillator - Model 640 RF Oscillator
- 650-A Condenser Tester

Start modernizing your shop today by ordering a Jackson Service Lab. Additional instruments may be added at any later date. Finished in aftractive two tone grey morocco matching all Jackson instruments.

## SERVICE LAB RACKS AND PANELS

1400-Bench Lab rack only.
1401-Service Lab rack only. Completely assembled, wired with master AC switch and two outlets.
1403 --Panel for single units such as 650,642، etc.
1404-Panel for dual mounting of units such as 650,642 , etc.
1407-Panel for 637.

1408-Blank panel.
1409-Accessory panel $51 / 4^{\prime \prime}$ high.
1410 -Panel for 655.
1411 -Panel 636.
1412-Panel 641.

## THE JACKSON ELECTRICAL INSTRUMENT COMPANY Dayton, Ohio

## MB <br> MINIATURE INSTRUMENTS

## 1-INCH INSTRUMENTS

MODEL 101

MODEL 102

A precision movement-the smallest made-provides fast response and dependable operation in the complete line of MB indicating instruments. It's a lightweight, conventional, moving coil type, ruggedly built to withstand vibration, shock, and long use. Expertly
designed, the many outstanding features of MB instruments include: soft iron pole pieces; Alnico No. 5 magnet; standard jewels and pivots; easy-to-read, all metal scale; anodized aluminum case. Accuracy of $\pm 2 \%$ of full scale at any point is standard in each model.

## I-INCH INSTRUMENTS

MODEL 100 is the last word in miniature instruments. . . it's the smallest, lightest made. The precision-machired case is hermetically sealed against moisture and dust. Fastens to panel with threaded mounting ring.
MODEL 101 is the smallest square meter you can find. It has a pressed aluminum case that mounts with four mounting screws. Securely sealed against moisture and dust.

MODEL 102 is similar to model 101 in constructional details, except for round shape. The pressed aluminum series.

## 11/2-INCH INSTRUMENTS

MODEL 150 contains the same accurate movement as the 1 -inch series. Its finely machined, hermetically sealed, anodized aluminum case self contains all nécessary shunts, multipliers and rectifiers. Mounts with threaded, locking ring.

MODEL 151 has an economical, pressed aluminum round barrel and a square aluminum round plate. Self contained in all standard DC and AC ranges. Mount to panel with four screws.

MODEL 152 offers the same fine features of Model 150, plus the economies of a pressed aluminum ease. Self contained in all standard DO and AC ranges. Mounts to panel with three screws.

# MARION ELECTRICAL INSTRUMENT CO. <br> MANCHESTER, NEW HAMPSHIRE <br> JOBBER SALES DIVISION Electrical instrument Distributing Co. 433 Broadway New York, N. Y. IN CANADA: THEASTRALELECTRIC COMPANY, SCARBOROBIUFFS, ONTARIO 

#### Abstract

A low-cost, low-powered induction heating unit, designed for use wherever production soldering of small metal parts and assemblies is part of the job. It increases the quality of soldering operations . . . minimizes time and expense involved... requires no experienced help . . . and can be put to work in such diverse fields as radio, electronics, jewelry, electrical fixtures, toys, kitchenware, motors, paint brush ferrules, can sealing, etc. As a production "tool" the value and performance of the Marion Portable Bench-type Induction Soldering Unit have been proved. Its many advantages in design and construction and surprisingly small initial cost and maintenance make it a safe and profitable investment for even the most cautious of investors or the smallest of shops. It may prove to be the economical solution to your present and future production problems.

## COMPACT . . . ADAPTABLE . . . EFFICIENT . . . ECONOMICAL . . . SAFE

- It increases the speed of soldering operations-and provides $\alpha$ result often impossible with other methods,
- Produces cleaner work and eliminates many cleaning operations.
- An entire seam, or a number of small parts which are jig-located, can be soldered simultaneously. This is not possible with torch or iron techniques.
- The unit lends itself to precise timing and exact duplication of work, consequently minimizing mistakes and rejects.
- Ideal for use with belt-line or turntable types of automatic feed.
- Even those with little experience con operate it efficiently once the job is properly set up and its time cycle established.
- It is cheaper than a solder pot, consuming only 775 watts at full load and only 100 watts on standby. Power is drawn only when soldering is taking place.
- There are no moving parts to wear out. Tube replacement costs low. All components are designed with generous safety factor.
- The heater offers less hazard than a soldering iron, and yet does a neater, cleaner, faster job... without danger of sparking or radio frequency burns.

## SPECIFICATIONS

Power Supply: 115 volts, 60 cycle.
Size: $153 / 4^{\prime \prime} \times 21^{1 / 2^{\prime \prime}} \times 15^{\prime \prime}$.
Mounting: Standard relay rack cabinet.
Weight: 150 pounds.
Power: 775 watts at full power output, 100 watts standby. The entire unit is rigidly assembled and mounted to prevent arc-over and failure of components.

Priced at only $\$ \mathbf{3 6 0 . 0 0}$

## F.O.B. Manchester

(Foot Treadle Extra)
Each heater is accompanied by a manual which covers not only operating and service information, but also the design of the work coils for fundamental shapes such as square, rectangular, round and oval. Engineering assistance is available when involved work pieces are encountered.

## PARTIAL LIST OF APPLICATIONS

- Solder windows in instruments, gauges, watches.
- Solder Kovar glass terminals to casings.
- Solder button and variable ceramic capacitors.
- Solder indicators, circuit breakers, fixed resistors.
- Solder potentiometers, rectifiers, relays, switches.
- Solder metallized jewels, small searms, assemblies.
- Solder glass-to-metal structural assemblies as in variable condenser bushings.
- Solder Alnico and other magnet assemblies without affecting properties of materials.
- Solder-seal all types of electronic components.

## MARION musem METERESTER

For use in any department and all laboratories where instruments are employed and their performance must be carefully checked. With self-contained power supply and control equipment for operation on 110 volts, AC, 60 cycles . . . for production testing and calibration of DC instruments. No additional accessories are required. Merely connect the two clips to the instrument under test, and proceed to analyze its accuracy and general performance.

## INCLUDES...

- Regulated Power Supply.
- Stepless Vacuum Tube Voltage Control.
- Large 81/2" Mirror Scale Standard Instrument, Hand Calibrated.
- Decade of $.1 \%$ Accurate Manganin Wire Wound Resistors.

The Marion MeterTester is designed with many operational features which will definitely improve the production rates of any meter inspection department. Moreover, its accuracy is such that it may be used for checking purposes in any department and all laboratories employing instruments. It may also be used as a source of DC current and voltage. Overall accuracy is better than $1 / 2$ of $1 \%$. Basic sensitivity of the Mirror Scale Standard Instrument is 10 milliamperes. The complete unit is housed in a hand-rubbed, solid walnut carrying case.

## MARION MULTI-RANGER-MODEL 575

The Marion Multi-Ranger is designed to permit the user to assemble a highly accurate instrument for use as a voltmeter, milliammeter, high and low resistance ohmmeter, AC voltmeter and decibel meter. Multi-Rangers are available in $31 / 2^{\prime \prime}$, $41 / 2^{\prime \prime}$ and $81 / 2^{\prime \prime}$ sizes, and each size is interchangeable electrically. All instruments use Alnico magnets, have full $100^{\circ}$ three-color scales, and use the new, tough Marion "Bulldozer" moving system which combines the engineering fectures essential to long life under severe service with those essential to the highest order of accuracy.

## DECIBELS

$-10-+14$ decibels $+4-+28$ decibels $+18-+42$ decibels $+30-+54$ decibels

The Marrion Approach in design, sealing and manufacturing now solves many of the problems which have been troubling manufacturers and consumers of equipment employing electrical indicating instruments. Marion "hermetics" are not affected by the extremes of heat or cold . . . the cases cannot warp or split . . . the moving systems are totally, permanently protected against dust, dirt, moisture . . . rejects of complete equipment due to instrument failure are minimized, if not altogether eliminated . . . and sustained performance over a longer period of time is assured.
The magnetic and electrostatic shielding so important in modern high frequency equipment, particularly small size equipment for portable applications, is afforded by the heavy steel case of the Marion Glass-to-Metal Truly Hermetically Sealed Electrical Indicating Instrument. This case, with its high conductivity plating, obviates the need for separate shielding, even when the instruments are to be placed in close proximity to strong alternating current fields. In many instances, this feature permits simplified, more desirable panel arrangements.

## Interchangeable Feature Permits

## Universal Application -- Simplifies Ordering

With the interchangeable flanges, it is now possible to order a minimum number of instruments in the most popular sizes and apply either the round or square flange as the individual use demands. One instrument can thus fill four different needs: for a round case, for a round case to be used in steel panel, for a rectangular case, for a rectangular case to be used in steel panel. This feature simplifies both ordering and inventory procedures for the manufacturer and jobber.

## SPECIFICATIONS

Model HM2-2 $\mathbf{1}^{1 / 2 "} \quad$ Model HM3—3 ${ }^{1 / 22^{\prime \prime}}$

- There are no rubber gaskets, and no cement seals.
- Can withstand all extremes of temperature and humidity, required by any service, or test specification, without deterioration to the seals, or harm to the efficiency of the moving system.
- Windows are of double thickness tempered glass processed for solder sealing, and are highly resistant to shock.
- Instruments are completely dehydrated and are filled with dry cir at sea level pressure.
- A newly designed crowned crystal permits greater scale length, reduces shadows, and makes for better visibility.
- Magnetic shielding permits interchangeability on any type of panel without affecting calibration; can be supplied silver plated for extra R.F. shielding.
- Silver clad beryliium copper hair springs reduce zero shift at all temperatures.
- Standard Kovar glass bead type terminals with solder lugs.
- Special enamel finish on cases meets 200 -hour salt spray test.
- Window sealing process developed and perfected with the cooperation of the engineers of the Corning Glass Works.
- Instruments manufactured in accordance with AWS Spec. C-39.2 1944 and JAN I-6 plus hermetic sealing.
- They are positively interchangeable-Type HM2 with AWS Types MR24 and 25; Type HM3 with AWS Types MR34 and 35.

## 100\% GUARANTEED - COMPETITIVELY PRICED

Marion Glass-to-Metal Truly Hermetically Sealed Electrical Indicaing Instruments are $100 \%$ guaranteed for six months, after which we will replace any $2^{1 / 2 \prime \prime}$ and $3^{1 / 2 "}$ type, ranging from 200 mieroamperes upward, for a flat fee of $\$ 1.50$, regardless of whether the instrument has been overloaded, burned out, or in any way mistreated, provided the seal has not been
broken. We will replace, for a flat fee of $\$ 2.50$, any $2 \frac{1 / 2^{\prime \prime}}{}$ and $31 / 2^{\prime \prime}$ instrument, with sensitivity greater than 200 microamperes, under similar circumstances. It is our faith in the quality and performance of Marion "hermetics" that prompts us to make performance of Marion hermetics that prompts us to make
this guarantee which is offered to customers in all parts of the this gua

Model 52N

Models 52 N and 52 S are standard $2 / /^{\prime \prime}$ class instruments, the 52 N meeting JAN 1.6 physical dimensions for MR 25 round series and the 52 S meeting commercial stand-
ards for the $21 / 2^{\prime \prime}$ rectaris for the $21 / 2$ rectangular types. These gained popularity in portable radio equipment, pocket test equioment and generaf electrical serviee where space is at a premium.

Model 52 S

## MARION STANDARD INSTRUMENTS

The most important ingredient of Marion design, engineering and construction is simplicity. Our instruments, in special and unusual types as well as conventional models, employ a minimum of parts, each selected for quality and durability. Combined with simplicity of design and engineering, this makes for betfer performance, under severe conditions, over longer periods of time. Whether your requirements demand custom-built or standard instruments, you can depend upon the functional simplicity of Marion designs to provide the most in service and value.

## CONSTRUCTION DETAILS

Large Alnico 2 or Alnico 5 Magnets, well aged and stabilized, are employed not only on sensitive microammeters, but on the entire line of instruments.

Sinfered Pole Pieces of high permeability iron form, in combination with the Alnico magnet, an ideal magnetic structure.
Hardened Beryllium Copper Frames, including the bridge, mounting pads and tail piece, are drawn and formed of a SINGLE piece of beryllium copper and then heat treated, after which jewel centers are pierced to a very high degree of accuracy.
The Moving Systems are wound of heavily insulated wire on aluminum coil forms which have been anodized for insulation purposes. Pivot assemblies are carefully insulated, too, before being cemented to the coils, and baked dry under infra-red light.
Bearings. To maintain an absolute minimum of pivot role, we use the permoalloy pivot and G.E. boro-silicate glass V jewel on sensitive microammeters and millivoltmeters. Less sensitive instruments combine a well hardened and polished steel pivot against the same glass jewel. With systems weighing appreciably more than .75 gram, $\alpha$ conventional polished sapphire jewel is used.

Cases of Marion Standard Instruments are of molded bakelite, designed with large cross sections to insure minimum warpage and maximum resistance to impact.

## AVAILABLE IN ZERO CENTER AND OTHER RANGES ON SPECIAL ORDER

Model 55 is a popular test equipment item, having a large case-45/8" x 4/8"-and long $100 \%$ scalo. It is well suited for use in vacuum tube voltmeters, bridges and volt-ohm-miliammeters. The internal construction is identical with that of the seales for special applications.

Model 57S
Model 578 is an $81 / 2^{\prime \prime} \times 7^{\prime \prime}$ instrument with a large open face and an extra long scale. It is constructed with enlarged pole shoes, and with a higher torque movement than other Marion types in order to give maximum performance in an with a very high damping factor and is not just an overgrown $3^{\prime \prime}$ meter. overall accuracy of $1 \%$, and can be supplied with mirror scales,
The 575 finds wide application in large vacuum tube voltrpeters, in multitesters, and as an easily read production instrument in many of the measurany elestrical or electronis manufacturing plant. It is commonly used, too as a production ohmmeter, limit bridge indicator, and in such varied applications as vibration amplitude measurements and autemotive tire balaneing.

## STANDARD SIGNAL GENERATORS

MEASUREMENTS
MODEL 65-B
A leader in its field, this soundly designed and expertly manufacłured instrument will greatly increase the efficiency of any laboratory.

## SPECIFICATIONS

FREQUENCY RANGE: 75 kilocycles to 30 megacycles in 6 push button ranges.
FREQUENCY CALIBRATION: The frequency dial is direct reoding and individually hand calibrated for each range. It is accurate to $\pm 1 / 2 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 microvolt to 2.2 volts.
OUTPUT IMPEDANCE: 5 ohms to 0.2 volt, rising to 15 ohms at 2.2 volts.
MODULATION: Continuously variable from 0 to $100 \%$. Modulation depth is indicated directly by a meter on the panel. Modulation may be obtained either from an internal source of 400 or 1000 cycles or from an external source.
ENVELOPE DISTORTION: Less than $4 \%$ of $100 \%$ modulation at 1 megacycle.

POWER SUPPLY: 117 volts, 50 to 60 cycies.
DIMENSIONS: $103 / 4^{\prime \prime}$ high $\times 19^{\prime \prime}$ wide $\times 91 / 2^{\prime \prime}$ deep, overall. WEIGHT: Approximately 35 pounds.
ACCESSORIES: (Order with instrument) Recommended - 80-ZH4 Cable; 80-2H3 Pad. Available - 80-2H1 Pad; 84-Z2-1 Cable; 84-Z2-2 Cable; 84-Z2-3 Cable; UG-201/U Adapter.

LEAKAGE AND STRAY FIELD: less than 0.1 microvalt leakage with attenuator set for 0 output. Less than 1 microvolt per meter stray field at any frequency.

POWER SUPPLY: 117 volt AC, 60 cycle.
DIMENSIONS: $11^{\prime \prime}$ high $\times 20^{\prime \prime}$ long $\times 101 / 4^{\prime \prime}$ deep, overall.
WEIGHT: Approximately 50 pounds.

## MEASUREMENTS MODEL 80

SPECIFICATIONS
FREQUENCY RANGE: 2 to 400 megacycles in 6 bands, individually calibrated direct reading dial.
FREQUENCY ACCURACY: $\pm .5 \%$
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.
OUTPUT IMPEDANCE: 50 ohms.
MODULATION: Amplitude modulation is continuously variable from 0 to $30 \%$. Modulation depth is indicated by a meter on the panel. An internal 400 or 1000 cycle audio oscillator is provided. Modulation may also be applied from an external source. Pulse modulation may be applied to the oscillator from an external source through a special connectar. Pulses of 1 microsecond can be obtained at hgher carrier frequencies.
LEAKAGE IN STRAY FIELDS: Attenuator leakage less than 0.1 microvolt. Power line leokage less than .5 microvolt Stray fields less than two microvolts.

## MEASUREMENTS

## PULSE GENERATOR MODEL 79-B

This instrument is specially adapted for plate pulsing of the Model 80 Standard Signal Generator; this combination will provide pulses down to one microsecond at the higher carrier frequencies.

## SPECIFICATIONS

FREQUENCY RANGE: 60 to 100,000 cycles.
PULSE WIDTH: Continuously voriable from .5 to 40 microseconds.
OUTPUT VOLTAGE: Approximately 150 volts positive with respect to ground. "SYNC" OUTPUT: 75 volts posifive with respect to ground. Displaced by $1 / 2$ period from pulse output.
"SYNC" INPUT: May be synchronized with as little as 2 volts peak from an external source.
POWER SUPPLY: 117 volts, 60 cycles AC.
DIMENSIONS: $10^{\prime \prime}$ high $\times 1358^{\prime \prime}$ wide $\times 1012^{\prime \prime}$ deep, overall.
WEIGHT: Approximately 31 pounds.

## STANDARD SIGNAL GENERATORS

## MEASUREMENTS <br> MODEL 84

SPECIFICATIONS
FREQUENCY RANGE: 300 to 1000 megacycles, individually calibrated direct reading dial.
FREQUENCY ACCURACY: $\pm .5 \%$.
OUTPUT VOLTAGE: Continuously variable from 0.1 to 100,000 microvolts.
OUTPUT IMPEDANCE: 50 ohms.
AMPLITUDE MODULATION: Continuously variable from 0 to $30 \%$ indicated directly on panel meter. An internal sine-wave oscillator choice of 400,1000 , or 2500 cycles is provided. External modulation up to 30 kilocycles may be applied.

PULSE MODULATION: Repetition rate continuously variable from 50 to 100,000 cycles. Pulse width continuously variable from 1 to 50 microseconds indicated on directly calibrated dial. Pulse delay (with respect to synchronizing output) continuously variable from 0 to 50 microseconds indicated on directly calibrated dial. May be synchronized with an external sine-wave or pulse source.

POWER SUPPLY: 117 volts, 60 cycles.
DIMENSIONS: $12^{\prime \prime}$ high $\times 26^{\prime \prime}$ wide $\times 10^{\prime \prime}$ deep, overall. WEIGHT: Approximately 125 pounds, including external line voltage regulator.
ACCESSORIES: Included with each instrument are four connecting cables, external voltage regulator, spare oscillator tube.

## MEASUREMENTS MODEL 78-FM <br> SPECIFICATIONS

FREQUENCY RANGE: 86 to 108 megacycles, individually calibrated dials. Accurate to $\pm .5 \%$.
OUTPUT VOLTAGE: 1 to 100,000 microvolts.
OUTPUT IMPEDANCE: 17 ohms.
LEAKAGE: Less than 1 microvolt.
MODULATION: Deviation continuously variable from 0 to 300 kc . Indicated on directly calibrated dial. 400 cycle internal audio oscillator can be modulated from an external source providing 6 volts across 5000 ahms. FIDELITY: Flat within two db fram DC to 15,000 cycles. Distortion is less than $1 \%$ at 75 kilocycles deviation. Transient response is excellent. POWER SUPPLY: 117 volts, 50 to 60 cycles.
DIMENSIONS: $10^{\prime \prime}$ high $\times 13^{\prime \prime}$ wide $\times 7^{\prime \prime}$ deep, overall.
WEIGHT: Approximately 25 pounds.

POWER SUPPLY: 117 volts, 25 to 60 eycles AC. DIMENSIONS: $10^{\prime \prime}$ high $\times 13^{\prime \prime}$ wide $\times 7^{\prime \prime}$ deep, overall. WEIGHT: Approxmately 22 pounds.

## MEASUREMENTS <br> MODEL 78

## SPECIFICATIONS

FREQUENCY RANGE: Model 78B-15 to 25 megacycles and 195 to 225 megacycles. Model $78 \mathrm{C}-15$ to 25 megacycles and 90 to 125 megacycles. Special instruments may be supplied on special order within the limits of 10 to 250 megacycles with a choice of two bands each having a 1.8 to 1 frequency ratio. Special one band instruments may be supplied covering the range of 100 to 275 megacycles or 250 to 420 megacycles.
OUTPUT VOLTAGE: Cantinuously variable from 1 microvolt to 100,000 microvolts.
OUTPUT IMPEDANCE: 35 ahms.
LEAKAGE: Less than 1 microvolt.
MODULATION: Amplitude modulation fixed at approximately $30 \%$. Madulation frequency for the Model 78B is 8200 and 400 cycles; for the Model 78C, 625 and 400 cycles.

## RADIO-FREQUENCY TEST INSTRUMENTS

## MEASUREMENTS

U.H.F. RADIO NOISE and FIELD STRENGTH METER

## MODEL 58

This versatile, portable instrument is useful in measuring signal-to-noise ratios, noise levels and for field strength surveys on television and FM transmitters.

## SPECIFICATIONS

FREQUENCY RANGE: 15 to 150 megacycles in five bands -dial directly calibrated in megacycles.
INPUT VOLTAGE RANGE; 1 to 100,000 microvolts across 72 ohm balance line. 1 to 100 microvolts on semi-logarithmic output meter, balanced resistance attenuator with ratios of 10,100 and 1000 ahead of all tubes.
GAIN STANDARDIZATION: Internal "shot noise" diode provides calibration standard. Special dial eliminates need for charts.
CIRCUIT: Superheterodyne circuit with tuned RF amplifier eliminates image response.

BAND WIDTH: 150 kilocycles @ 2X down.
POWER SUPPLY: Built-in regulated dual pawer supply far operation from either 115 volts $A C$ or 6 volts DC.

STANDARD EQUIPMENT: Power cables, 15 foot antenna cable, 9 inch loop antenna, carrying strap, and complete instruction book.
DIMENSIONS: $16^{\prime \prime}$ wide $\times 9^{\prime \prime}$ high $\times 11^{\prime \prime}$ deep, overall. NET WEIGHT: 27, paunds.

R. F. MODULATOR: 5 volts maximum carrier input. Iranslation gain is approximately unity-Output impedance is 600 ohms.

POWER SUPPLY: 117 volts, 60 cycles.
DIMENSIONS: $7^{\prime \prime}$ high $\times 15^{\prime \prime}$ wide $\times 71 / 2^{\prime \prime}$ deep, overall. WEIGHT: Approximately 15 pounds.

## MEASUREMENTS

## SQUARE WAVE GENERATOR

## MODEL 71

Recommended for many different applications in the development of $A M, F M$ and television equipment where square-wave analysis is of great importance.

## SPECIFICAFIONS

FREQUENCY RANGE: 5 to 100,000 cycles.
WAVE SHAPE: Rise time less than 0.2 microseconds with negligible overshoot.
OUTPU̇T VOLTAGE: Step attenuator giving $75,50,25$, $15,10,5$ peak volts fixed and 0 to 2.5 volts continuously variable.

SYNCHRONIZING OUTPUT: 25 volts peak.

## MEASUREMENTS MEGACYCLE METER MODEL 59

The Model 59 is one of the most useful instruments that the high-frequency radio engineer can possess. It is a compact, wide-range oscillator with a meter for indicating grid current and may be used as a dynamic wavemeter; for aligning r.f. and
i.f. circuits of receivers and transmitters without application of power; for tracing parasitic circuits and many ofter uses.
FREQUENCY RANGE: 2.5 to 400 megacycles. Directly caibrated to 250 megacycles, with chart to over 400 megacycles.

F-48

## ACCURATE MEASURING INSTRUMENTS

## MEASUREMENTS VACUUM TUBE VOLTMETER MODEL 62

A very compact, light instrument for either laboratory or field use where a zero current voltmeter is required. Its range selector push buttons and easily-read meter give it an ease of operation that has made it the most popular vacuum fube voltmeter with engineers.

SPECIFICATIONS
RANGE: Push button selection of 5 ranges- $1,3,10,30$ and 100 volts full scale $A C$ or DC.
ACCURACY: $\pm 2 \%$ of full scale on each range, both $D C$ and sinewave AC.
INDICATION: linear for DC and calibrated to indicate RMS values of a sine-wave or $71 \%$ of the peak value of a complex wave on $A C$
FREQUENCY ERROR: Less than $10 \%$ from 30 eycles to over 150 megacycles. Resonant frequency of the probe with input terminals shorted is 350 megacycles.
INPUT IMPEDANCE: The input capacitance is approximately 7 mmf .
POWER SUPPLY: 115 volts $A C, 50$ to 60 cycles. DIMENSIONS: $43 / 4^{\prime \prime}$ wide $\times 6^{\prime \prime}$ high $\times 81 / 2^{\prime \prime}$ deep overall.
WEIGHT: Approximately 6 pounds.

## MEASUREMENTS VACUUM TUBE VOLTMETER MODEL 67

True peak values of complex wave forms encountered in radio and allied electronic wark may be measured accurately with the Model 67. It indicates the true peak-to-peak value of symmetrical and asymmetrical waveforms varying from law frequency
square waves to pulses of less than five microseconds duration. Full scale values of .03 to 300 volts peak-to-peak or .01 to 100 volts r.m.s. af a sine-wave in five decade ranges are indicated on semi-logarithmic scales.

## CAPACITANCE BRIDGE

The MODEL 101 has been designed to measure capacitance from 0.1 mmfd . to 1 mfd . in five ranges, with power factors from 0.1 percent to 10 percent. Smoll size, ease of operation and convenient grouping of all controls make this an extremely useful and necessary instrument for production-line or laboratory use.

## MEGOHM METER

MODEL 183-B, for the accurate measurement of unknown resistances of values from 300 to 100,000 megohms in two overlapping ranges. The scale has the conventional ohmmeter characteristics and the measurements are accurate within $\pm 5 \%$. Beyond 10,000 megohms the error increases because of the compressed scale.

MODEL M = 234 R.F. ATTENUATOR

The M -234 is a co-axial attenuator of the mutual inductance type, operating on the transverse magnetic field as a wave guide belaw cut-off. A rack and split gear drive assure long life and smooth operation. This attenuator is well suited ta many specialized applications such as: AM, FM and television receiver production test equipment, stage gain test sets, filter test sets, etc.

## SPECIFICATIONS

OUTPUT RANGE: 0.3 to 100,000 microvolts.
OUTPUT CALIBRATION: Calibrated at 100,000 microvolts across terminated output by IN21 crystal.
OUTPUT IMPEDANCE: Matched 50 ohm line from type $N$ connector; 25 ohms when used with $4^{\prime}$ terminated binding post cable, Pt. 80-ZH4 (upper frequency limit approximately 200 Mc .)
FREQUENCY RANGE: Approximately 2 to 1000 megacycles.
DIMENSIONS: Approximately $101 / 8^{\prime \prime}$ wide $\times 95 / 8^{\prime \prime}$ high $\times 51 / 2^{\prime \prime}$ deep, including knobs. WEIGHT: Approximately $31 / 2$ pounds.
A balanced attenuator, Model $\mathrm{M}-235$ is also available; complete data will be sent on request.

## SERIES 920 Combination Dynamic Mutual Conductance Type Tube Tester, Battery Tester and 33 Range A.C.- D.C. Multi-Range Set Tester

## available in following models

* 920-p-(illustrated) In hardwood, walnut finished portable case with tool compartment and hinged removable cover. Size $12 \times 13 \times 6^{\prime \prime}$. Complete with battery, test leads and operating instructions. Code: Drive. NET PRICE \$84.22
* 920-MCP-Open type Metal Case Portable, black ripple linish as illustrated for Series 912-MCP. Size $101 / 2 \times 12 \times 6{ }^{\prime \prime}$. Complete as above. Code: Dicer.

NET PICE $\$ 84.22$

* 920-PM-Consists of Series 920-MCP inserted into matching steel panel and dust cover. Panel size $121 / 4 \times 19^{\prime \prime}$ for standard rack mount. Appearance same as illustrated for Series 912 PM . Unit removable from front for poriable use Code: Dream.

NET PRICE $\$ 86.22$

* 920-C-In modern, chrome trimmed, round cornered, counter type cabinet; black ripple finish on heavy gauge steel as illustrated for Series 912-C. Size $16 \times 131 / 2 \times 7^{\prime \prime}$. Slopes to 3 inches at tront. Complete, ready to operate. Code: Drake

## TUBE AND BATTERY ANALYZING FEATURES

* A DYNAMIC MUTUAL CONDUCTANCE TYPE TUBE TESTER employing an exclusive "pRECISION" engineered circuit, which in one operation, effectively tests all radio receiving tubes for both MUTUAL CONDUCTANCE and CATHODE STRUCTURE. $*$ TESTS ALL TUBE TYPES: FILAMENT VOLTAGES from 1.4 to 120 VOIts. LOKTALS, BANTAM JUNIOR AND BUTTON-7-PIN PORTABLE RADIO AND HEARING-AID BATTERY TYPES, SINGLE-ENDED, TELEVISION AND F. M. AMPLI FIERS, REGULAR OCTALS (MG, G, GT and METALS), SPRAY-SHIELD AND GLASS TYPES. * AUTOMATIC' PUSH-BUTTON SYSTEM: Flexibility for nonGLASS TYPES. * AUTOMATalysis * DUAL FREE-POINT FILAMENT TERMINAL SELECTION. $\quad *$ VISIBLE FILAMENT ${ }^{*}$ CONTINUITY TESTS. $*$ SPECIFIC INDI SIDUAL LOADS AND VOLTAGES: APPLIED TO ELEMENTS OF TUBE UNDER VIDUAL L VARYING A. C. SIGNAL appilied to control grids. * METER READS IN PLATE CIRCUIT: Indications entirely dependent upon control action (transiN PLATE Conductance) of the intervening elements. Shows up tubes having open elements. * Individual tests for each section of multi-section tubes. Visible tests of iluorescent screen and winking of cathode ray indicator tubes. $k$ HOT CATHODE LEAKAGE and INTER-ELEMENT SHORT TESTS. * NOISE TEST pin jacks for earphone or amplifier connection. $*$ BALLAST TESTS: The regular tube test sockets accommodate all ballast units. $*$ PILOT LIGHT TESTS. $*$ DOUBLE WINDOW ROLLER TUBE CHART. $\star$ MICRO-LINE ADJUSTMENT read directly on meter. No arbitrarily tapped transformer employed. * TESTS ALL POPULAR RADIO A, B, AND C BATTERIES 1.5 to I35 volts. UNDER ACTUAL LOAD. Condition read on simple 3 colored REPLACE-WEAK-GOOD scale. A single selector switch automatically applies appropriate load for the particular battery under test. * TELEPHONE CABLED WIRING EMPLOYED THROUGHOUT. ${ }^{*} A C C U R A C Y$ of tube test circuit closely maintained by use of individual calibrating controls.

## Dynamic Mutual Conductance Type Tube Testers

The PRECISION Series 910 and 912 are Dynamic Mutual Conductance Type Tube Analyzers incorporating the same time-proven tube test circuit features described for Series 920 , above. Series 910 makes use of an attractive $3^{\prime \prime}$ bakelite cased meter. Series 912 utilizes an extra large $45 / 8^{\prime \prime}$ meter, and in addition also provides the full battery testing facilities described for Series 920 . The physical appearance and overall dimensions of Series 910, 912 and 920 are the same. (See illustrations.)

* 910-P-(as illustrated for Series 920-P) In hardwood, walnut finished portable case. Size $12 \times 13 \times 6^{\prime \prime}$. Complete with operating instructions. Code: Front.

NET PRICE

* 9IO-MCP-Open type Metal Case Portable, as illustrated for 912 -MCP, at right. Size $101 / 2$ $\times 12 \times 6^{\prime \prime}$. Complete, ready to operate.
Code: Frail NET PRICE
* 910-C-In modern, chrome trimmed, round cornered counter type cabinet. Size $16 \times 131 / 2$ $x 7^{\prime \prime}$. Slopes to $3^{\prime \prime}$ at front, as illustrated at right, for Series 912-C. Code: Frisk.
NET PRICE
* 910-PM-Consists of Series 910-MCP, removably inserted into matching steel panel and dust cover. Panel size $121 / 4 \times 19^{\prime \prime}$ for standard rack mount, as illustrated for 912 PM at right. Code: Fried

NET PRICE

* 912-P— (as illustrated for Series 920-P) In hardwood, walnut finished portable case with tool compartment and hinged removable cover. Size $12 \times 13 \times 6^{\prime \prime}$. Complete with opercting instructions. Code: Fence.

NET PRICE $\$ 61.20$

* 912-MCP-Open type Metal Case Portable, black ripple finish, as illustrated at right. Size $101 / 2 \times 12 \times 6^{\prime \prime}$. Complete, ready to operate. Code: Felon ...................NET PRICE $\$ 59.20$
* 912-C-In modern, chrome trimmed, round cornered counter type cabinet. Black ripple finish on heavy gauge steel. Size $16 \times 131 / 2 \times$ $7^{\prime \prime}$. Slopes to $3^{\prime \prime}$ at front. Complete, as illustrated at right. Code: Frcme.

NET PRICE $\$ 63.20$

* 912-PM-Consists of Series 912-MCP, removably inserted into matching steel panel and dust cover. Panel size $121 / 4 \times 19^{\prime \prime}$, for stondard rack mount. See illustration at riaht.
Code: Fetid .....................NET PRICE $\$ 63.20$

## SERIES 844 <br> 34 Range A.C.-D.C. Volt-Ohm-Decibel-Milliammeter 6000 volts A.C. and D.C., 10 megohms, and 12 amps. 1000 OHMS PER VOLT A.C. \& D.C.

The Series 844 is an excellent general purpose A.C.-D.C. mul-ti-range tester, invaluable to laboratory, industrial, serviceman and engineer. Ruggedy constructed, it will maintain its nitially high degree of accura cy under constant usage and handling.

* 844I-(illustrated) Housed in wainut finished hardwood open type case with carrying handle. type case with carrying handle.

Code: Manse, NET PRICE (Less batteries and test leads)

## SPECIFICATION

* SIX A.C. and SIX D.C. VOLTAGE RANGES at 1000 ohms per voli: $0-12 ; 0-60 ; 0-300 ; 0-600 ; 0-1200 ; 0-6000$ volts.
- SIX D.C. CURRENT RANGES: 0-1.2 MA to 0-12 AMPERES.
* FOUR RESISTANCE RANGES: Batteries mount inside of case. $0-400 ; 0-100,000$ ohms; $0-1$ meg.; and $0-10$ megs.
* SIX DECIBEL RANGES from -12 to $+70 D B$.
* Large $45 /$ " " $^{\prime \prime} 400$ microampere bakelite cased meter
* All instruments individually calibrated and sealed against laboratory standards assuring $2 \%$ D.C. and $3 \%$ A.C. overall accuracy. Cómplete telephone cabling employed. (Less batteries and test leads) ................................... \$33.20 * 844PM-In standard panel mount. 19" x 121/4". Code: Maize. NET PRICE (Less batteries and test leads) ..............

## SERIES 845 <br> 41. RANGE HIGH SENSITIVITY A.C:-D.C. TESTER RANGES TO 6000 VOLTS, 20 MEGS., AND 12 AMPS. 5000 OHMS PER VOLT D.C. 1000 OHMS/VOLT D.C. 1000 OHMS/VOLT A.C.

Series 845 is a reliable, highly accurate, multi-range tester of moderate sensitivity for more accurate measurements in sensitive communications and electronic apparatus. Its dual-sensitivity feature, suits Series 845 to the requirements of laboratory, maintenance and production testing.

* 8451-(illustrated) Housed in walnut finished hardwood open type case with carrying handle. Compact in size $7^{\prime} \times 8^{\times 4}$. Code: Isben. NET PRICE (Less batteries and test leads)

## SPECIFICATIONS

* 6 D.C. voltage ranges at 5000 ohms per volt: $0-12 ; 0-60$; $0-300 ; 0-600 ; 0-1200 ; 0-6000$ volts.
* 6 A.C. and 6 D.C. voltage ronges at 1000 ohms per volt: 0-12-60-300-600-1200-6000 volts.
$* 7$ D.C. current ranges: 0-30C Microamps. 0-1.2-12-60-300-1200 MA and 0-12 Amps.
* 4 Resistance Ranges: Batteries mount inside of case. 0-2000200,000 ohms. 0-2-20 megohms.
* 6 Decibel Ranges from - 12 to +70 DB .
* 6 Output Ranges: same as A.C. voltage ranges.
* Large 45/8" 200 microampere, easy reading bakelite cased meter.
* $1 \%$ wire-wound shunts and matched multipliers, plus individual instrument calibration assures $2 \%$ D.C. and $3 \%$ A.C. overall accuracy.
* 845P-In closed type portable case. Code: Icing. NET PRICE (Less batteries and test leads)
* 845PM-In standard ponel mount. $19^{\prime \prime} \times 1214^{\prime \prime}$. Code: Ideal. NET PRICE (Less batteries and test leeds)

## SERIES 856 44 RANGE SUPER-SENSITIVE A.C.-D.C. TESTER, 6000 VOLTS, 60 HAMPS., 12 AMPS., 60 MEGS. 20,000 OHMS PER VOLT B,C. 1000 OHMS/VOLT D.C. 1000 OHMS/VOLT A.C.

The Series 856 is specitically designed for obtaining reliable measurements in modern communication and electronic circuits where only minute current drain of the measuring instrument can be tolerated.
The DUAL SENSITIVITY FEATURE doubles its utility. providing the equivalent of STRUMENT COMPLE INat standard 1000 OHMS PER VOLT sensitivity.

## SPECIFICATIONS

* SEVEN D.C. VOLTAGE RANGES: 20,000 ohms/volt: 0-3; 0-12 $0-60 ; 0-300 ; 0-600 ; 0-1200 ; 0-6000$ volts.
* SEVEN A.C. and SEVEN D.C. VOLTAGE RANGES: 1,000 ohms/volt: 0-3-12-60-300-600-1200-6000 volts.
* SEVEN D.C. CURRENT RANGES: 0-60, 0-300 microamps: 0-3. 30, 120, 600 MA; 0-12 AMPS.
* SEVEN D.C. CURRENT RANGES: $2 \%$ accuracy: 0-60, 0-300 microamps: $0-3,30,120,600 \mathrm{MA}$; $0-12$ AMPS.
* THREE RESISTANCE RANGES: Self-contained batteries: 0-6000 $0-600,000$ ohrls, $0-60$ megohms.
* SIX DECIBEL RANGES FROM - 12 to +70DB.
* SEVEN OUTPUT RANGES: 0-3-12-60-300-600-1200-6000 volts.
* Large 50 microampere $45 / 3^{\prime \prime}$ bakelite-cased meter.
* WIRE-WOUND SHUNTS, METALLIZED MULTIPLIERS- $1 \%$ ACCURACY.
* All ranges individually calibrated to within $2 \%$ D.C. and * $3 \%$ A.C. overall accuracy.
* Wox-impregnated telephone cabling and XXX bakelite mounting strips employed throughout.
* 856P—(illustrated) In attractive walnut finished hardwood portable case with removable cover and tool compartment. batteries and high voltage test leads)
$\$ 49.94$

## SERIES 864 <br> A.C.D.C. VOLT -OHM - DECIAEL - MILLIAMMETER A Leberatory Multi-Range Tester Incorporating a Large 9" Meter and Remote Control Selector Unit

* 864-In standard panel mount tinished in black ripple. Size $19^{\prime \prime} \times 1214^{\prime \prime}$ with dust cover 6 inches deep.
Code: Kapok. (Complete with batteries and high voltage test leads.)

## NET PRICE $\$ 59.60$

ELECTRICAL SPECIFICATIONS SAME AS SERIES 845 Conforming electrically to all specifications of Series 845 (adjacent), Series 864 Deluxe Multi-Range Tester is housed in standard $121 / 4 \times 19^{\prime \prime}$ panel with completely enclosed rear dust cover, and is designed to mount into any standard relay rack. The separately encased Selector Unit is easily slid out from its panel compartment for remote bench operation. A seven foot flexible cord, permonently connecting meter to Remote Selector Unit, allows complete freedom of manipulation.
The $9^{\prime \prime}$ Precision Rectangular 200 Microampere Meter with large easy reading scales and numerals, allows highly accurate readings with greatest ease and minimum eye strain. This instrument is an indispensoble adjunct to the modern laboratory for radio service, industrial and television application and wherever operator efficiency is at a premium.

## EV-10

 A NEW TYPE OF VACUUM TUBE MULTI-RANGE METER with Ranges to 6000 Volts A.C. and D.C. 2000 Megs. - 12 Amps. - 70 DB.PERFORMANCE, ACCURACY EASE OF MANIPU LATION-Series EV-10 provides eight distinct instruments for most all measure ments in the present and future electronics and communications fields. Combin ing both VTVM as well as trandard 1000 ohms per vol test circuits. Series EV-10 permits rapic check of all permits rapic check of an voltage, current, cind resis tances encountered in television, photo-electric, F.M roing, elcit without dis urbing operation of circuit under analysis.

## IMPORTANT FERTURES

* VOLTAGE REGULATED-BRIDGE TYPE CIRCUIT: provides unusually high VTVM accuracy. Uses one type 6C5; 6XS and VR-150.
* 2ERO-CENTER VTVM-READS voltage at any test point WITHOUT reversal of test prods
* SINGLE MASTER RANGE SELECTOR-Provides rapid, positive selection of all ranges.
* SHIELDED COAXIAL TEST PROBES-permit direct voltage measurements without disrupting apparatus under test.
* DUO-BALANCED ELECTRONIC-BRIDGE OHMMETER-BOTH ends of ohmmeter scales are independently zero adjusted, providing high accuracy throughout scale length. A single OHMS scale serves for ALL ranges.
* $1 \%$ wire-wound shunts and matched multipliers plus tele-phone-cabled, wax-impregnated, wiring employed throughout
* EACH INSTRUMENT INDIVIDUALIY CALIBRATED
$\star$ FULL VISION $7^{\prime \prime}$ RECTANGULAR 400 microampere METER.

## RANGES

* Eight Letu-Center Vacuum Tube Voltmeter Ranges-from $\pm 3$ to $\pm 6000$ volts D.C.-Input Resistance-131/3-262/3 and $1331 / 3$ Megohms.
* Six Circuit Probing, Zero-Center, VTVM Rarges-from $\pm 3$ to $\pm 600$ volts D.C.
* Six Wide-Range Ohmmeter-Megohmmeter Ranges: 0-2000200M ohms. 0-2-20-200-2000 Megohms.
* Eight A.C. and Eight D.C. Voltage Ranges at 1000 ohms per volt. 0-3-6-12-60-300-600-1200-6000 volits.
* Seven D.C. Current Ranges-0-600 Microcmps: 0-3-12-60-3001200 MA ; $0-12$ AMPS.
* Eight Output Ranges--0-3-6-12-60-300-600-1200-6000 volts.
* Eight Decibel Ranges-from - 26 to +70 DB .
* EV-10-MCP-(illustrated) In black ripple finished, hecrvy gauge steel case. Size $101 / 2 \times 12 \times 6^{\prime \prime}$. Complete with tubes, battery and testing probes. Code: Place. NET PRICE $\$ 69.81$

Cual TESTERS provide a practical solution to A.C.-D.C. circuit test and maintenance problems. Through motching design of Series " "J" A.C. Ammeter, these wide-range Circuit Testers will meet your individual sensitivity requirements. Merely combine Series " $J$ " with either Series 844 , 845 or 856 and a universal A.C.-D.C. circuit tester is produced to YOUR SPECIFICATIONS, providing every desirable range of Series 844, 345 or 856 , PLUS, the full facilities of Series "T".

## TEST AND MEASURING EQUIPMENT

## VOLTOHMYST (TYPE 195-A)

The handiest multi-purpose meter in the service field today. In one instrument, for one price, you get: 1) a six-range d-c voltmeter that measures up to 1000 volts, 2) an ohmmeter reading from .1 ohm to 1000 megohms, 3) a six-range a-c voltmeter for readings up to 1000 volts $\mathrm{rms}, 4$ ) a linear audio-frequency voltmeter, 5) an FM discriminator balance indicator.
Frequency response is flat from 20 to 100,000 cycles. The entire meter case is molded of a clear plastic designed for easy reading of all scales. There is no glass to loosen or break. Comes complete with cables and probes.

Net Price. . . . . . . $\$ 79.50$

Thoroughly reliable for study of wave shapes and transients, modulation measurements, radio receiver and transmitter adjustments, and peak-voltage determinations.

A timing axis oscillator provides a 10 c.p.s. to $60-\mathrm{kc}$ range. Other unusual features: a deep light-shield to aid accurate observation at low intensity, a removable graph screen to permit special observations, direct-deflector connections for r-f observations, and a "binding jack"-instantly adaptable to either binding post or pin plug-for handy, quick connections.

Portable, sturdy, versatile; fast becoming standard equipment in laboratories and service shops.

Net Price
$\$ 115.00$

# RADIO CITY PRODUCTS CO., Inc. NEW YORK 1, N. Y. TESTEQUIPMENT 

## COMBINATION TUBE AND SET TESTER

MODEL 805B

A deluxe instrument comprising a comprehensive battery tester, set tester, tube tester and condenser leakage tester.
Complete Leakage test under rated voltages for all electrolytic condensers. Regular Resistance test for electrostatic condensers at high voltage. Battery Tester for all popular sizes and types of radio batand types of radro batteries, giving true test nnder rated load.
on good-bad scale.
on good-bad scale. back-up, low-drain type. Medium-range ohmmeter is powered by self-contained battery. High-range ohmmeter is operated from plug-in line supply.

## RANGES

DC voltmeter: $0-2.5-10-50.250-1,000-5,000$ volts
AC voltmeter: $0-10-50-250-1,000-5,000$ volts.
Output voltmeter: $0-10-50-250-1,000$ volts.
DC milliammeter: $0-1-10-100-1,000$ milliamperes. DC ammeter: $0-10$ amperes.
Ohmmeter: $0.250-2500-25,000$ ohms; 0-2.5-25 megohms. Decibel meter: -8 to 15,15 to 29,29 to 49,32 to 5.

## FEATURES

- Famous Dynoptimum test circuit. Line fuse may be replaced at front of panel. All filament voltages. - Tests all ballast tubes. Tests condenser leakage. Tests separate sections of multi-purpose tubes. - Hot inter-element short and leak tests of individual elements. - Separate test for noise, hum and intermittents. -Latest type built-in "Rolindex" mechanical roller tube chart.
Model 805 B -supplied with high voltage test leads in a sturdy wood case with removable cover, $141 / 4^{\prime \prime} \times 13^{\prime \prime} \times 6^{\prime \prime}$. Weight $121 / 4$ lbs. Complete, ready for operation on $105-135$ volts, $50-60$ cycles. Dealer Net Price
$\$ 89.50$

## TUBE TESTER

MODEL 316
This instrument is outstanding because of its exceptional flexible switching arrangement which provides maximum protection against obsolescence. Simplicity and speed of operation are advantages inherent in this Model 316 because of good engineering in electrical as well as mechanical design.

## PERFORMANCE SPECIFICATIONS

1. Checks Octal, Loctal, Bantam Jrs., Miniatures and Midgets, as well as Acorn tubes.
2. Individual connections for each tube element.
3. Lever type switching gives individual control for each tube prong. This also takes care of roaming filaments, dual cathode structures and multi-purpose tubes.
4. Filament voltage switch takes care of all present and future
tubes with filament voltages from 1.1 to 117 volts.
5. Separate plate tests on diodes and rectifiers as well as each section of a multi-purpose tube.
6. Neon short test detects the slightest leakage between any two elements of the tube while the tube is hot.
7. Roll-chart lists all current tubes and types, and speeds up g. testing.
rectangular meter with "Poor-Good" scale
1C. Line fuse protects transformer; may be removed from front of panel.
Model 315 -Supplied in combination portable-counter case of natural oak. Highly attractive in appearance. Size: $141 / 4$ " $\times 13^{\prime \prime} \times 6^{\prime \prime}$.
Weight: $121 / 4 \mathrm{lbs}$. Dealer Net Price
$\$ 63.50$

## COMBINATION DYNOPTIMUM TUBE AND SET TESTER MODEL 802N

## - EASY OPERATION --

- Only 5 simple switches to operate both Tube and Set Tester The Tube Tester gives speedy leakage short tests between all elements. Separate noise tester for tubes that otherwise test good. Large scale $41 / 2^{\prime \prime}$ rectangular meter. Meter is protected against burn-out hy a special meter fuse for both multitester and tube tester. The complete instrument is also protected against burn-out by line fuse, which is immediately replaceable at extractor post on panel. The set tester provides AC measure-
 memperature and frequency errors prevalent in all copper oxide rectifiers. Unique AC voltage measurements coincide with DC. Tule Tester tests new and old types of tubes as well as all ballast tubes, and allows individual section tests of multi-purpose tubes, etc.

## RANGES

DC Voltmeter: 0-10-50-500-1000 at 1000 ohms per volt.
AC Voltmeter: 0-10-50-500-1000.
DC Milliammeter: 0-1-10-100-1000 DC Ammeter 0-10. Ohmmeter: $0-500-5000-1,000,000-10,000,000$. Low center scale resistance
D.B. Meter: $8-15-15$ to 20-29 to $49-32$ to 55 decibels

Four range output meter: Same as AC volts.
Model 802 N -supplied in handsome bardwood case, with special compartment for small tools, test leads (Included), etc. ${ }^{\text {Weight: }} 11 / 2 \mathrm{lbs}$. Complete with self-contained batteries, ready to operate.

NEW YORK 1, N. Y. TEST EQUIPMENT

THE "BILLIONAIRE" MODEL 665A
an insulation tester
 AC-DC VACUUM TUBE VOLT-OHMCAPACITYMETER

* 10 billion ohm insulation resistance test.
* 29 measurement range handle practically any service, or laboratory testing job.
* 8" giant meter accurate to $2 \%$ at full scale.
* Automatic line voltage check provides excellent AC and DC regulation to assure accuracy and stability.
- Automatic ohmmeter battery check which tells operator when to replace ohmmeter battery. Assures accuracy of low resistance measurements.
- This instrument brings you the same quality that gave such fine dous war production throughout World War II
- 5 separate instruments are combined in THE BILLIONAIRE. An insulation tester with the same resistance range alone would cost you as much as this Model 665A.

## RANGES

Insulation Testing: 1 megohm to 10,000 megohms at 500 volts. Vacuum Tube Ohmmeter: Direct reading. From 0.1 ohm to 1,000 megohms. $0-1,000-10,000-100,000$ ohms; 1-10-100-1000 megohms. Capacity Meter: Accurate measurements from 0.0000025 to 2,000 mid. $0-0.0001-0-002 \cdot 0.02-0.2-2-20-200-2,000 \mathrm{mfd}$.
AC Vacuum Tube Voitmeter: Direct reading Input capacity: 0.00005 mfd at terminals of instrument Input resistance: 160 and 16 meg ohms. 0-3-6-30-150-600-1500-6000 volts. Measures signal and output voltages from 10 cps. to $10,000 \mathrm{cps}$.
DC Vacuum Tube Voltmeter: Direct reading. Sensitivity 160 meg ohms on high ranges and 16 megohms on low ranges. 0-6-30-150-600-1500-6000 volts.
Model 665A-Supplied ready to operate, in sturdy steel case, complete with 4 leads and batteries. Size: $93 / 4^{\prime \prime} \times 121 / 2^{\prime \prime} \times 6^{\prime \prime}$. Weight: 13 lbs. Dealer Net Price
$\$ 94.50$

## THE SENSITIVE MULTITESTER MODELS 461A AND 461AP

Model 46IAP

A highly sensitive multitester providing a wide range of measurements and features required for general Iaboratory purposes. Also ideally suited for field and shop measurements.

Sensitivity 20,000 ohm per volt on all DC measurements results in negligible loading of delicate circuits. Wide scale, $41 / 2 "$ rectangular meter with a movement of 50 micro. amperes. Readings as low as 1 microampere can be made on the 100 microampere scale. Meter movement $1 \%$ accurate. Matched pair metallized voltage multipliers $1 \%$ accurate. A suppressor type copper oxide rectifier is used.

## RANGES

DC VOLTS: 0-2.5-10-50-250-1000-5000.
AC VOLTS: $0-2.5-10-50-250-1000-5000$
AC MA: $0.10-100-500 \mathrm{MA}$.
DC MICROAMPS: $0-100$ microamps.
OHMS: $0-1000-100,000$ ohms 10 megohms.
OHMS: 0-1000-100,000 ohms 10 meg
Batteries are readily accessible ...can be replaced merely by re leasing spring clamp . . . No soldered terminal connection.
Model 46IA-Open face, supplied in oak case with self-contained batteries and carrying handle. Size $7^{\prime \prime} \times 51 / 2^{\prime \prime} \times 3^{\prime \prime}$. Weight $31 / 2 \mathrm{lbs}$. Dealer Net Price
$\$ 39.50$

Dealer Net Price $\qquad$

## ELECTRONIC MULTITESTER MODEL 668

AN AC AND DC VACUUM TUBE VOLT-OHM CAPACITYMETER

- Line voltage calibration adjustment gives accuracy on capacity measurements.
- Matched-pair multiple resistors are $\pm 1 \%$ accurate.
- Circuit eliminates all errors due to line voltage fluctuations.
- Constant accuracy of low resistance ohmmeter ranges assured by test of ohmmeter battery under load to determine need for battery replacement.
- Accurate capacitymeter reads direct in microfarads- 40,000 ,000 to 1 measurement ratio.
- Meter cannot be damaged by using low range on high voltage reading.
- No danger of shock on high resistance or low capacity measurements.
- Entire instrument is thoroughly shielded.
- Easy rcplacement of line fuse at front panel.

## RANGES

DC VACUUM TUBE VOLTMETER-Direct reading sensitivity: 160 to 16 megohms. 0-6-30-150-600-1500-6000 volts. Voltmeter readings can be taken without affecting circuit constants.
AC VACUUM TUBE VOLTMETER-Direct reading. Input capacity 0.00005 mid . at terminals of instrument. Input res. 160 to 16 megohms. 0-3-6-30-150-600-1500-6000 volts. Measures signal and output voltages from 10 cps . to $10,000 \mathrm{cps}$.
VACUUM TUBE OHMMETER-Direct reading. From 0.1 ohm to 1,000 megohms. $0-1,000-10,000-100,000$ ohms; 1-10-100-1,000 CAPACITY. METER-Accurate measurements from 0.00005 to 2,000 mid. $0-0.002-0.02-0.2-2 \cdot 20-200-2,000 \mathrm{mfd}$.
Model 668-Supplied ready to operate, complete with leads, tubes, pilot light and batteries in steel case. Size: $93 /{ }^{\prime \prime} \times 91 /{ }^{\prime \prime} \times 73 /{ }^{\prime \prime}$ ".

## ULTRA SENSITIVE MULTITESTER MODEL 488A

DUAL D.C. SENSITIVITY: 20,000 and 1,000 OHMS PER VOLT . WITH HIGH AND LOW SENSITIVITY AC CURRENT RANGES. caccurate, sturdily constructed and suppied with a natural oak carrying case. It is the ideal instrument
of military and naval electronic equipment.

## CHECK THESE FEATURES

- Dual D.C. sensitivity of 20,000 ohms per volt
and 1,000 ohms per volt. AC sensitivity of 1,000 ohms per volt.
- Wide-scale $4^{1 / 2 \prime \prime}$ meter with movement of 50 microamperes $2 \%$ accurate.
- Readings as low as 1 microampere.
- All multipliers matched and $1 \%$ accurate
- Oenter of ohmmeter scale 37 ohms with readings as low as 0.25 ohms.
- Batteries are readily accessible. Can be replaced merely by releasing spring ciamp. No soldered terminal connec-
 dion to batteries.
- Overall accuracy $3 \%$ on
- Batteries are mounted for replacement-No wires special spring clips readily accessible RANGES

# RADIO CITY PRODUCTS CO., Inc. NEW YORK 1, N. Y. TEST EQUIPMENT 

VOLT - OHM - MILLIAMMETER MODELS 424A AND 424AP

Model 424AP

The mechanical construction as well as electrical design of this multitester puts it ahead of multi meters in its class. Tier construction and resistor board mounting of all shunts and multipliers gives accessibility to components. An outstandine feature is the self-contained battery - operated ohmmeter tery - operated ohmmeter with a high range of 10 megohms and with a center to rue low scale ratio of 125. The low ohm scale reads 5 ohms at center with 0.1 ohm for each of the first ten divisions. Each shunt and multiplier is individu. ally calibrated to a tolerance within $1 \%$. Basic meter movement is 400 provides a sensitivity of 2500 ohms per volt. A compensated suppres* sor-type copper oxide rectifier is used for $A C$ measurements.

## RANGES

## AC-DC MULTITESTER MODELS 447 AND 447P

The exceptional value in the 447 Model is made possible by the tremendous quantities produced. The resulting very low price is responsible for its great popularity. These units are in a class with other makes of testers that sell for considerably more.
A 3" square D'Arsonval meter is used, having an accuracy of $2 \%$. Ring type shunt circuits are employed. Multipliers are held well within $5 \%$ and an overall tolerance is kept within $7 \%$ on AO measurements with a better accuracy on DC. A suppressor type copper oxide rec-

## REINER COMPREHENSIVE MASTER TESTER MODEL 456

## "ONE TESTER DOES IT ALL"

A $200,000,000,000$ (two hundred billion) to 1 ratio in resistance measurements is available in this new REINER COMPREHENSIVE MASTER TESTER-an outstanding example of high quality in materials, construction and workmanship which is immediately apparent at the first glimpse of the instrument. The engineering design gives more useful ranges, more accurate measurements and more comprehensive application for testing than has ever before been accomplished in a single unit.

The $81 / 2^{\prime \prime}$ rectangular meter and its convenient position for reading affords a scale length and readability that is lighly desirable. Model 456 is a great asset to every industrial organization for both laboratory and production testing. It is ideal for research, development and experimental departments. It is equivalent to 61 individual single range meters, with eight types of testers in one instrument:-

1. Insulation Tester
2. DC Voltmeter
3. Capacity Meter
4. AC Meter
5. Ohm Meter
6. DC Meter
7. AC Volt Meter
8. Impedance-Inductance Meter A high degree of accuracy is combined with simplicity of operation.

## SQUARE WAVE GENERATOR MODEL 530 10 CYCLES TO 100 KILOCYCLES

1-HAND CALIPRATED FREQUENCY SCALE
2-DECADE MULTIPLIER (4 STEPS)
3-POSITIVE SYNCHRONIZATION WITH ANY STANDARD GENERATOR
4-OUTPUT VOLTAGE, IN STEPS OR CONTINUOUSLY VARIABLE
Model 530 was designed to meet the demand for a Square Wave Generator to be used in production and general testing. It incorporates a feature not found in other square wave generators, the
 facility of synchronization with any external frequency source.

HAND CALIBRATED SCALE-The instrument has a hand calibrated frequency scale that reads from below 10 cycles to more than 100 cycles.

DECADE FREQUENCY MULTIPLIER-The instrument is provided with a decade frequency multiplier to increase the range by $10-100$ and 1000 times. The actual frequency of the output is the dial reading multiplied by the setting of the frequency multiplier. The accuracy of the frequency calibration is $\pm 5 \%$ over extended periods.

SYNCHRONIZATION CONTROL - In cases where great accuracy of frequency is desired, the instrument can be made to synchronize with any standard frequency generator provided that a synchronizing voltage of at least 0.1 Volt is available. Synchronization can also be maintained with sources varying in frequency.

OUTPUT VOLTAGE--The output voltage may either be varied in fixed steps or may be continuously varied by means of the variable voltage potentiometer. When the variable voltage potentiometer is used, the output impedance is from 0 to 2,000 olims. If the output voltage is varied in steps, the output impedance is indicated by the output voltage selector setting. The maximum voltage output is approximately 20 Volts.
OUTPUT IMPEDANCE - The output impedances available are 100-200-500-600-1,000-2,000 ohms. The power supply is designed to operate on 110 . 120 Volts, 60 cycle A.C. Available for other voltages or line frequency at slight additional cost.
POWER CONSUMPTION: 30 Watts.
FUSE PROTECTION: 1 Ampere.
PHYSICAL SPECIFICATIONS: Height $8^{\prime \prime}$, Depth $9^{\prime \prime}$, Width 15". Weight 18 lbs. (Net).

## REINER MODEL 451 VACUUM TUBE VOLTMETER

U.H.F. AND OTHER MEASUREMENTS, EASILY, QUICKLY-AT YOUR FINGERTIPS

- 25 Millivolts AC Full Scale - 700 Megacycles Frequency Range -..Micro-Microfarads Input Capacity

Model 451, when used alone (without amplifier 101) has flat frequency characteristics up to 700 megacycles. This is accomplished by a practical, unique probe having input capacity of less than 7 micro-microfarads. Both AC and DC voltage ranges can be easily read on a single long, linear scale. Ranges: $0-2.5-10-25-100-250-1000$ volts AC and DC.

Meter movement $0-180$ microamperes-accurate within $1 \%$. A unique feature in an instrument of this type is a multi-range milliammeter. Ranges: 0-2.5-10-25-100-250-1000 milliamperes DC.
There is also a 6 range ohmmeter $0-1000-10,000-100,0000-1$ megohm-10 meg-ohms- 1000 megohms. A reading of 0.1 olm can readily be made on the low range with center of scale 10 ohms.

Equipped with tubes, fuse extractor post and pilot light, special test leads, service cord and probe are contained in a latched compartment built inside the case. Size $1034^{\prime \prime} \times 9^{\prime \prime} \times 8^{\prime \prime}$. Weight 20 lbs. $-110-125$ volt, $50-60$ cycles.
RANGES

AC Volts: $0-.025-.1-25$ (with amplifier) -2.5-10-25-100-250-1000.
DC Volts: 0-2.5-10-25-100-250-1010.
DC Current: 0-2.5-10-25-100-250-1000 MA.
Ohms: . 1 ohm to 1000 megohms.
AC Frequency Range: $10-5000$ cps. (with amplifier) - 50 cps. to 700 megacycles. Accuracy: $2 \%$ of full scale- $D C$ volt, ohm and current; $2 \%, 50$ cps. to 50 megacycles, AC volt; $5 \%$ accuracy entire AC frequency range.
Note the wide variety of ranges-that is why the Navy, leading laboratories and industrial institutions have purchased hundreds of Reiner Electronic instrumments, and continue to re-order. DEALER NET PRICE

## MODEL 101 AMPLIFIER

Can be used with either previous Model 450 or current Model 451 V.T. Volt-

Model 101 AMPLIFIER meter to increase sensitivity 100 times. Designed to plug directly into the measuring instrument and provide full scale $A C$ voltage ranges of 25 millivolts and 100 millivolts.

$$
\text { Output Hum Level-less than } 0.0005 \text { volt }
$$ Maximum Ac input- 0.2 volts R.M.S. Maximum Allowable DC at Input- 600 volts Frequency Range-Flat- 10 cps. to 5000 cps .

Size: $91 / 2 \times 51 / 4 \times 3$ inches. Weight $41 / 4$ lbs. Complete with tubes and cable with connector plag. Dealer Net Price
$\$ 50.00$
When used with older Model 450 instruments, which are not equipped with a 4 prong recessed receptacle, a coriversion kit (Cat. K 100) including installation instructions may be had for $\$ 1.50$

## REINER LABORATORY UNITS - MODELS 333 AND 334

Visible, accessible and removable multipliers and shunts make this an ideal unit for schools-as well as laboratories and service benches. The calibrated value is always visible-you do not get confused as to your reading.

Ten year guaranteed meter is at the optimum angle for easy reading and visual accuracy. Meter is hermetically sealed-positively no dust or moisture can get into the movement to cause the gradual deterioration and inaccuracies that their elements produce in the non-hermetically sealed meter.

Meter has extra long scale and is used against burn-out. Spare fuses are included in addition to the fuse provided in the easily accessible extractor . . . Attractive silvered bezel, heavy, durable crackle finish steel cabinet. . . Heavy duty insulated binding posts with non-back-off heads. . . . Heavy duty clips and ferrules insure extremely low loss contact resistance.

Handy slide drawer contains spare fuses, complete assortment of 12 shunts and multipliers and shorting connector all individually mounted in spring snap holders. Each shunt and multiplier is individually calibrated to an accuracy within $1 \%$.

Includes--2 meter fuses
6 DC Voltage Mulitpliers 1\% accuracy: $0-5-10-25-100-250-500$ volts. 6 DC Current Shunts: 0-5-10-25-100-250-500 milliamps.

In addition instrumment has basic ranges of $0-120$ millivolts and 0-1 milliampere.
MODEL 333--Size: $6^{\prime \prime} \times 71 / 2^{\prime \prime} \times 61 / 2^{\prime \prime}$. Weight: $43 / 4 \mathrm{lbs}$.
Dealer Net Price, complete

## $\$ 27.50$

OTHER SHUNTS AND MULTIPLIERS ARE AVAILABLE.
MODEL 334 is identical to 333 but has in addition 6AC 25 cycles to 1 megacycle. The new Germanium voltage ranges.

Each AC and DC range is at a sensitivity of 1000 ohms per volt. AC measurements are free from temperature and frequency errors throughout a range of rectifier is used.
Basic meter sensitivity is 400 microamperes full Scale. Dealer Net Price

## THREE NEW (BRI) PRODUCTS TELL HOW...

This capacitor discharge type magnetizer produces 15,000 amperes peak current surge released by simple push button switch. Universal charging bar arranged for convenient association with magnets is adaptable to nearly all permanent magnets. Charger weighs 75 pounds; measures $7^{\prime \prime} \times 12^{\prime \prime} \times 17^{\prime \prime}$; operates from $110 / 120$ volt $50 / 60$ cycle AC; consumes 25 watts.
Charges magnets for electrical indicating instruments, small motors, generators, loudspeakers, relays and controls, exposure meters, tools, compasses, toys, novelties. Write for Bulletin M5.

Designed As An American War Standard • Used By America's Leading Companies

MODEL 107
MAGNIT ChARGER

Simulating the roughest operating conditions right in your laboratory - the RFL Shock Tester makes it possible to PRE-TEST your instruments to find out how much impact or shock they can stand and still function satisfactorily. Adaptable to instruments or components not exceeding four pounds - electrical indicating instruments, radio components, small power relays, electric razors, watches, fountain pens, etc. Unerringly "putting the finger" on the weakest links of structure and design, this device points the way to improved performance through necessary changes BEFORE the item goes into production. Send for details-Bulletin T5.

## IEST EQUIPMENT

## R-F PROBE - MODEL 200*

This new R-F field indicator is the ideal hand instrument for anyone working with R-F. Many uses include the quick detection of standing waves, shielding and R-F choke leaks, and circuil tracing for R-F in all radio frequency equipment and associated components, without inducing interference. AM, FM and television transmitters up to 1500 megacycles, elcctronic heating and soldering equipment, antennas and transmission lines, diathermy apparatus and other R-F units can be checked throughout. An extremely valuable trouble-shooting aid in sceking out causes of lowered operating efficiency, damage or interference to neighboring equipment and components, radio interference and escape of R-F into power lines. Shape and size of probe permit convenient access to internal circuits, small openings. Probe element measures $3 / 4$ " in diameler, $5^{\prime \prime}$ in length: overall length is $11^{\prime \prime}$. Aperture in handle permits hanging probe near transmitter antenna leads for measuring R-F output to aid in tuning adjustments. Molded bakelite case with Weston Model 506 meter. Weight, 15 ozs.

MODEL 200 Range to 1500 Megacycles

## APPLIANCE ANALYZER - MODEL 185A

As this Analyzer quickly and accuratcly measures the actual load value of watts, volts and amperes used by all home appliances, a special costcomputing scale aids the user in determining the hourly cost of the appliance under test. Special connectors permit plugging Analyzer into a fuse box to measure power consumed by oil burners and similar equipment. Buffer action of clectronic tube used for measuring watts prevents overloads from damaging instrument. Pressed aluminum case with gray wrinkle finish is dust and water tight, sealed by rubber gasket. Handle is of ruhber. Weston Model 801 meler.
METER RANGES:
Watts: $0-50 / 100 / 500 / 1,000 / 2,000$ on $110 / 230$ volt, $50 / 60$ cycle lines. AC Amperes: $0-3 / 1 / 5 / 10 / 20$. AC Volts: $0-150 / 300$. Dimensions: $9^{1 / 2^{\prime \prime}} \times 9^{1 / 2^{\prime \prime}} \times 4^{1 / 2 \prime \prime}$. Weight: $8^{1 / 4}$ pounds.

## MODEL 185B

Model 185B is a smaller Analyzer for usc on $110 / 120$ volt, $50 / 60$ cycle lines. Measures watts in ranges of $0-100$ and $0-1000$; volts, $0-150$; amperes $0-2$ and 0-10. Weston 301 meter. Other features same as Model 185A.

MODEL 185A Dimensions: $7^{\prime \prime} \times 10^{\prime \prime} \times 31 / 2^{\prime \prime}$.

Weight: 6 pounds.

## INSULATION TESTER - MODEL 184

This direct reading, 10,000 volt megohmmeter provides a quick, pesitive and safe means for measuring insulation resistance of materials and equipment. The readable resistance is from 1 to 200 megohms on the 500 and 1000 volt ranges; from 10 to 2000 megohms on the 5,000 and 10,000 volt ranges. Low range is read directly; high range by multiplying the scale values by 10 . Unit operates from $110 / 120$ volt, $50 / 60$ cycle line, with maximum power consumption of 75 watts. A SAFETY switch interlocked with the range switch provides protection for the operator, as the voltage range cannot be changed without first breaking the high voltage output. Instrument is mounted in steel case with gray wrinkle finish. Weston Model 801 meter. As the high multiplier resistance is equal to the megohm reading at center scalc, the following values apply:

| Open Circuit | Maximum Meter <br> and Insulation | Megohms at <br> Center | Multiplier |
| :---: | :---: | :---: | :---: |
| Volt Range | Leakage Current | Center Scale | Resistance |
| 500 | 50 microamperes | 10 | 10 megohms |
| 1000 | 100 microamperes | 10 | 10 megohms |
| 5000 | 50 microamperes | 100 | 100 megohms |
| 10000 | 100 microamperes | 100 | 100 megohms |
| Dimensions: | $14^{\prime \prime} \times 10^{\prime \prime} \times 9^{\prime \prime}$. |  | Weight: 50 pounds. |

MODEL I84
Range to $\mathbf{1 0 , 0 0 0}$ Volts

## RADIO FREQUENCY LABORATORIES INC. BOONTON, NEW JERSEY

## Shurite PANEL METERS

Model 550-DC

Model 650-DC

Model 650-AC

Model 950-DC(or AC)

Shurite panel meters are attractive, rugged, dependable instruments with accuracy well within $5 \%$. All models are black enameled brass, all require $2{ }^{7}$, $6_{4}^{\prime \prime}$ hole. DC meters are polarized-vane solenoid type, AC meters are double vane repulsion type.
Advantages of this new and complete line:
All-metal dials, age and moisture resistant, lithographed in black on white for high visibility
Improved design, with new coil frames and attached insulators for greater rigidity, yet interchangeable in other respects with similar type greater rigidity, yet interchangea
Improved appearance, with concealed coils, full view scales, and Improved appearance,
Guarantee: All Shurite meters are guaranted to users anainat defective workmanship and material, and will be repaired or replaced defective workmanship and material, and will be repaired or replaced if sent to the factory postpa
Model $550-\mathrm{DC}$, flush case, narrow ring, round, has long U-bracket. Model 550-AC, flush case, narrow ring, round, has ring clamp.

Models $650-\mathrm{DC}$ and $650-\mathrm{AC}$, flush case, wide round flange, have screw holes for mounting, hardware included.
Models $950-\mathrm{DC}$ and $950-\mathrm{AC}$, flush case, square flange, have screw holes for mounting, hardware included.
MPORTANT-How TO Order: For Number, (2) Range, (3) Stock Number. If Model number and stock number are not stated, Model 550 will be supplied. ZERO ADJUSTERS (Z
Zero Adjusters are available only on Models 550-DC and 650-DC. When ordering, add $Z$ to stock number. Example: Stock number for Model $550-\mathrm{DC}$, voltmeter, 0 -1 volt range--without zero adjuster is M101. With zero adjuster, it is $5101-Z$. PANEL CALIBRATION(S)
Meters are calibrated for non-magnetic panels. If for magnetic (steel) panel mounting, specify thickness and overall size of panel, and add s panel mounting, specify thickness and overall size of panel, and add
to stock number when ordering, as $5101-5$. If thickness of panel is not specified, meter will be supplied for .040 panel.
(Prices shown are net for individually boxed meters)

A sturdy flange ring for use with any Model 550 (ronnd) Shurite meter Where a flange mount is preferred. Makes appearance similar to Model 650 Wide flange, $2^{3} \mathbf{4}^{\prime \prime}$ dia. Telephone black finish. Screws, lockwashers and Model 5-A,

## Pocket Type Meters

As this catalog goes to press, a series of shurite pocket meters is being put into production. They will be made in ranges suitable for prewar and postwar hearing aid batteries, portable radio batteries, and many other lowvoltage electrical applications, including polarity indication types. shape will provide sure grip.
For details, ask for bulletin, "Pocket Type Meters"

# MODEL 260 Set Tester <br> <br> World-Famous <br> <br> World-Famous High Sensitivity Set Tester 

## ....for Radio and Television Servicing

The simpson 260 has out-sold and out-performed every similar test instrument in its field since its introduction in 1939. The reason? It out-values them all. You cannot touch its precision, useful ranges, or sensitivity in any other instrument of equal price or selling for substantially more.
At 20,000 ohms per volt, this instrument is far more sensitive than any other instrument even approaching its price and quality. The practically negligible current consumption assures remarkably accurate full scale voltage readings. Current readings as low as il microampere and up to 500 milliamperes are available.
Resistance readings are equally dependable. Tests up to 20 megohms and as low as $1 / 2$ ohm can be made. With this super-sensitive instrument you can measure automatic frequency control diode balancing circuits, grid currents of oscillator tubes and power tube, bias of power detectors, automatic volume control diode currents, rectified radio frequency current, high-mu triode plate voltage and a wide range of unusual conditions which cannot be checked by ordinary servicing instruments. Ranges of Model 260 are shown below.

## MODEL 266 Vacuum Tube Voltmeter A Fine Instrument . . . .

Here is a vacuum tube voltmeter that offers the extreme accuracy modern electronic engineering demands. It is another new development-another new triumph of Simpson designing and manufacturing skill. It covers a wide range, and the high accuracy at 100 megacycles makes this instrument wholly suited for the new FM band.

The D.C. input circuit is well filtered so that the presence of superimposed alternating currents does not affect the D.C. measurements. A zero center switch is provided for discriminator circuit alignment, a feature which embraces all D.C. voltage ranges. The D.C. volt input resistance ranges from 50 megohms to 200 megohms; A.C. volts input impedance at 60 cycles is 6 megohms.

Special probe furnished for work on RF voltages has been designed to reach hard-to-get-at connections more easily; probe has input capacitance of approximately 4 micro-microfarads. Changing from lowest to highest range causes no zero drift, therefore one zero adjustment takes care of all ranges. Primary of the power transformer is well regulated, holding close control over filament as well as plate voltage.
Model 266 is housed in a handsome oak case, with sloping panel of anodized aluminum. Large meter provides quick, accurate reading.

SIZE: $81 / 2^{\prime \prime}$ WIDE $\times 91 / 2^{\prime \prime}$ HIGH $\times 8^{\prime \prime}$ DEEP.
WEIGHT: 8 LBS. SHIPPING WEIGHT: 15 LBS.

Dealer's Net Price........................................................... $\$ 79.50$

- Panel-Molded bakelite, satin grained finish. Characters, numerals, and dial divisions engraved and filled in white, insuring long wearing qualities. - Meter-4 $1 / 2^{\prime \prime}$ with four-colored dial indicating good, fair, doubtful, , and bad-also "Percentage of Mutual Conductance, " scale.
- Sockers provided for all rypes of tubes including acorn tube.
- Neon glow tube to indicate shorted tubes. - New simplified switching arrangement (see above.
above. Tube chart arranged for quickly identifying the tube and setting controls.
- Tests tubes with voltage applied automatically over the entire operating range, under conditions over the entire operating range, under con.
approximating actual operation in radio set. movable cọver with slip type hinges.

SIZE: $151 / 2^{\prime \prime} \times 91 / 2^{\prime \prime} \times 61 / 4^{\prime \prime}$. WEIGHT: 9 LBS. SHIPPING WEIGHT: 16 LBS .
Dealer's net price............................................. $\$ 98.50$

Model 335 is housed in a handy portable case, with panel and switches of molded bakelite. Meter proper is large $41 / 2^{\prime \prime}$ size for easy reading.

## MODEL 330

## Mutual Conductance Tube Tester . . .

Tube manufacturers consider that a radio tube has reached the end of its usable life when it falls to a certain percentage of its rated value.

The new Simpson Model 330 tests tubes in terms of percentage of rated dynamic mutual conductance-a comparison of the tube under test against the standard rate micromho value of that tube. The colored zones on the dial coincide with the micromho rating or the percent of mutual conductance, indicating that the tube is good, fair, doubtful or definitely bad. Thus, at a glance, you can check the tube against manufacturers' ratings. If it becomes desirable to know the actual value in micromhos, the percentage reading may be easily converted.

Tubes are tested with voltage applied automatically over the entire operating range, reproducing more completely than ever before the actual conditions under which a tube functions in a radio set.

Besides this revolutionary new method, Simpson offers you an equally revolutionary switching arrangement. The circuit is so arranged that, even though there are numerous combinations possible, very few switches require moving to test any one tube. Many of the popular tubes are tested in the "normal" position without moving any of the nine tube circuit switches.

Ten push button switches and nine rotating switches of six positions each provide infinite combination in tube element and circuit selection. Only a few settings are necessary for the most complicated tube. The tube chart provided is arranged for quickly identifying the tube and setting the controls.

When you have finished a tube test, the Automatic Reset takes over to speed and simplify the next test. Just press the reset button and instantly all switches, both push button and rotary, return to normal automatically!

## Plate Conductance Tube Tester

Another Simpson innovation, the Model 335 tests tubes today's way -under conditions simulating actual use in a radio set. The dial indicates percentage of rated plate conductance. With a minimum of settings a percentage reading is quickly obrained which, for all practical purposes, is a true percentage of the tube's rated value.
Regardless of tube load, filament voltages are maintained practically constant automatically. Each tube element is individually connected to proper potential. Reliable short test is provided. Diodes tested on low voltage. Automatic reset switch clears way quickly for the next test.

All standard tube sockets are available, and additional space is provided for new sockets. Every socket connection, and all grid leads, are connected through separate switches to provide for future tubes.
MODEL 335

SIZE: $151 / 2^{\prime \prime} \times 91 / 2^{\prime \prime} \times 61 / 4 \prime$ WEIGHT: 9 LBS. SHIPPING WEIGHT: 16 LBS .

# MODEL 305 

## Tube Tester

Attractive appearance, compactness and remarkable versatility are combined in this popular tube tester. It provides for filament voltages from .5 volts to and including 120 volts. It tests loctals, single ended tubes, bantams, midgets, miniatures, ballast tubes, gaseous rectifiers, acorn tubes, Christmas tree bulbs and all popular receiver tubes.

The 3-way switching makes it possible to test any tube regardless of its base connections or the internal connections of its elements. No adapters or special sockets are required. Has sockets for all tubes on the market, plus spare socket for future tube developments. This tube tester is fused, and has the latest improved circuit. It provides for line adjustment from 100 to 130 volts with smooth vernier control.

The Model 305 has a handsome, conveniently arranged panel, and is housed in an attractive leatherette carrying case. The large fan shaped meter provides an exceptionally long scale, which has both "good" and "bad" English markings, plus a percentage scale for matching and comparing tubes. Simplified instructions and tube charts in book form are carried in cover.

SIZE: $8^{\prime \prime} \times 103 / 4^{\prime \prime} \times 51 / 2^{\prime \prime}$. WEIGHT: 8 LBS. SHIPPING WEIGHT: 12 LBS.
Dealer's net price................................ $\$ 49.50$
For 60 cycle 115 volt current only.

## New! Simpson Wide Range Signal Generator for A.M. and F.M. . . . MODEL 415 Signal Generator

1. Direct reading dial with continuous coverage from 70 Kilocycles to 130 Megacycles in the following ranges: 75-200; 200-600; 600-1750 Kilocycles and 1.5-4.5; 4-15; 14-30; 29-65; 58-130 Megacycles.
2. Model 415 is practically independent of line voltage fluctuation. Calibration is stable regardless of wide variations in line voltage.
3. RF output is controlled through its entire range, eliminating the necessity of a separate connection for high uncontrolled output as found in other signal generators.
4. RF Output Voltage is practically constant throughout the entire frequency range.
5. Modulation from 0 to $100 \%$ using either the 400 cycle internal sine wave or an external source. A range from 0 to over 20 volts of 400 cycle sine wave is available for external use.
6. High fidelity modulation up to $100 \%$ from below 60 cycles per second to over 10 Kilocycles per second.
7. No unwanted frequency modulation present.
8. Each Signal Generator is individually calibrated against a crystal controlled frequency standard.
9. Substantial construction assures maintenance of calibration accuracy indefinitely.

## SPECIFICATIONS

PANEL-Lustrous black anodized aluminum. Dial is encased in a molded bakelite escutcheon with glass covering for protection against damage and dirt. Functional switches and controls are mounted on engraved molded bakelite panels. CASE-Steel, copper plated for shielding effect and finished in black durable wrinkled enamel. Leather carrying handle. SHIELDING-In addition to the overall shielding offered by the case and panel, the coils and tuning condenser are individually shielded, then an additional shield is placed over these two assemblies. This series of shields together with other factors reduce leakage to an absolute minimum.
COILS-Low loss RF coils are individually calibrated by
means of variable inductance and variable minimum capaci-
tance. These adjustments provide the means for greatest possible accuracy in calibration.
BAND SELECTOR--The rotating turret coil assembly permits the use of shortest possible wiring, resulting in minimum circuit capacitance and permits quick selection of any frecuency range.
CONDENSER-A two section tuning condenser using either one section or the other provides for ideal inductance to capacity ratio on all bands. Smooth vernier tuning permits accurate adjustment of the selected frequency.

SIZE: $55 / 8^{\prime \prime} \times 113 / 8^{\prime \prime} \times 151 / 8^{\prime \prime}$. WEIGHT: 19 LBS. SHIPPING WEIGHT: 22 LBS.
Dealer's Net Price................................................................... 115.00

## MODEL 315 Signal Generator

The Model 315 Signal Generator is designed down to the most minute detail for bighest accuracy, greatest stability, minimum leakage and good wave form. Big nine-inch meter type dial, with knife edge pointer, gives high readability. Smooth vernier control permits close settings.

CIRCUIT: Electron coupled circuit assures extreme stability and output uniformity throughout the band. Three tubes are utilized in the circuit-full wave rectifier, modulator and oscillator. Standard $30 \%$ modulation at 400 cycles is used.

OUTPUT: Signal is controlled through an ingenious step attenuator of the ladder type. Volume level of each step is regulated by a smooth non-inductive control which provides an RF output from $1 / 2$ microvolt to 0.1 volt and an approximately 400 cycle output from zero to 5 volts.

BANDS: Six RF coils provide ranges of $75-200$; 200-600; 600-1700 kilocycles and 1.5-4.5; 4-12; 10-30 megacycles. Coils designed to retain original inductance regardless of temperature or humidity changes. Special switch automatically eliminates "dead spots."

SHIELDING: Coils, attenuator and signal selector individually shielded. Oscillator and modulator as. semblies sealed in rigidly welded, entirely enclosed chassis. Effective line filter used. Even line cord is shielded. Result: leakage is negligible.

CALIBRATION: Each coil individually calibrated to close tolerances against crystal standards by means of variable inductance and variable minimum capacitance. Tests show negligible changes over long periods of time with extreme temperature and humidity variations.

## SIZE: $16^{\prime \prime} \times 10^{\prime \prime} \times 6^{\prime \prime}$. WEIGHT: 15 LBS. SHIPPINĞ WEIGHT: 20 LBS.

Dealer's-Net Price

## INSTRUMENTSTHATSTAYACCURATE

## MODEL 445

## Plate Conductance Tube E Set Tester

The Model 445 offers in compact form an instrument that handles every radio testing re-quirement-in or out of the shop. It is a brand new instrument-designed to cover the entire wide range of today's servicing requirements and to provide the hair-line accuracy so necessary.
Model 445 Tube Tester is the plate conductance type. The dial indicates percentage of rated plate conductance, which can also be considered as percentage of mutual conductance in most cases, since the amplification factor of the tube remains constant in practically every case. It interprets tube condition today's way-in percentage of rated value-yet with a minimum of settings. Automatic reset switch clears the meter for the next test, avoids subsequent mistakes. All standard sockets available; space for new sockets is also provided.

The volt-ohm-milliammeter is the same "high sensitivity" type that is identified with the name of Simpson. The practically negligible current consumption assures remarkably accurate fullscale voltage readings ranging from 2.5 to 5000 volts. Current readings range from 1 microampere to 500 milliamperes, resistance readings from $1 / 2$ ohm to 20 megohms.
The Model 445 is housed in a durable, easy-to-carry case. Panel is of molded bakelite. Large $41 / 2^{\prime \prime}$ meter insures quick, accurate readings.

## MODEL 321 Giant Set Tester

## A New and Better Version of An Old Favorite

A giant in size and in performance, the Model 321 Set Tester incorporates 50 ranges. It's an old favorite among radio service men. further refined by Simpson to make it more useful than ever. It is ideally suited for either bench use or panel mounting.

The meter proper is large $7^{\prime \prime}$ size, housed in an attractive molded bakelite case. All D.C. scales are in black and A.C. scales in red, to simplify reading. Knife edge pointer insures correct determination of values. The panel is of black anodized aluminum, with silver etched characters, excellently arranged for quick selection of ranges. The range selector is fitted with a large, easy-to-operate bakelite handle. Cabinet is of steel with black wrinkle finish.
Test leads, insulated for 3000 volts, are furnished with each instrument. All voltage ranges both A.C. and D.C. have a resistance of 1000 ohms per volt.

## RANGES

Warts: $0.300,0.600,0.1500,0-3000$
 SHIPPING WEIGHT: 4 LBS.

Dealer's Net Price................................................. $\$ 39.50$ Carrying case, with leads compartment.............. 4.00

RANGES: 0.15, $150,750,3000$ A.C. volts; 0.15, 75, 300, 750, 3000 D.C. volts; $0-15,75,300,750$ D.C. milhamperes; 0.3000 ohms (center scale 30), $0-300,000$ ohms (center scale 3000); 1000 ohms per volt A.C. and D.C.
The Hammeter was the first self-contained pocket portable instrument built expressly to check high voltage and all component parts of transmitters and receivers. It has since undergone steady improvement:

Completely self-contained, needing no external multipliers, with a sensitivity of 1000 ohms per volt and a maximum voltage of 3000 volts A.C. or D.C., it has all the variety of
useful ranges needed to do an all-around general service job for you. All components and the sub-panel are mounted directly on the bakelite panel. All figures are engraved and filled with white enamel.

Shock-proof, it has the famous Simpson movement with bridge-type construction and soft iron pole pieces, resistors in matched pairs to provide greatest possible accuracy for all ranges. Test leads furnished, insulated against 3000 volts, and fitted with rubber guarded alligator clips.

## MODEL 240 HAMMETER

## A.C. and D.C. Volt-Ohm-Milliammeter

## A.C. and D.C. Volt-Ohm-Milliammeter

RANGES: 0-10, 250,1000 A.C. volts; $0-10,150$, 250,1000 D.C. volts; $0.10,50,250$ D.C. milliamperes; 0.1000 ohms, $0 \cdot 100,000$ ohms.

This is one of the smallest A.C. and D.C. service instruments on the market, yet it contains a sufficient number of ranges to enable the experienced technician to do a complete servicing job. The entire case, including the
front panel, is molded of bakelite for complete protection against high voltages. Has full size $3^{\prime \prime}$ meter for easier reading, and all the refinements of Simpson construction such as resistors in matched pairs to provide greatest possible accuracy for all ranges. Furnished complete with test leads.
DEALER'S NET PRICE........................... $\$ 24.75$

MODEL 230

## Model 370 A.C. Ammeter

(With self-confained current transformer) (For use on 60 cycles)
RANGES: $0.1,0.2 .5,0.5,0.10,0.25$ Amps.
For the first time, a current transformer and indicating instrument have been combined in one small case to meet the consistent demand for a small multiple range A.C. ammeter, at a price that even a student can afford. Providing a complete range, from a fraction of an ampere to 25 amperes, it deserves a place in the equipment of every manufacturing estab.

## MODEL 370

lishment, every school, service organizations and all other branches of the electrical industry. Its many uses include the measurement of current draw by all types of electric appliances and motors, heating elements, lamps, radio sets, etc.

SIZE: $3^{\prime \prime} \times 57 / 8^{\prime \prime} \times 21 / 2^{\prime \prime}$. WEIGHT: 2 LBS. SHIPPING WEIGHT: 3 LBS.

## Model 371 A.C. Voltmeter

RANGES: $0.150,0.300,0.600$ Volts.
Particularly adaptable to testing line volt. age. When servicing motors, electric appliances, etc., it is most essential to know if line voltage is normal. High voltage may damage or burn out motors, heater elements, etc. Low speed in motors or improperly heated elements in appliances may be due to low line voltage. A very desirable unit for any industrial test kit or laboratory.

No. 44 Voltammeter for "Hot Shot" and Radio batteries and No. 6 dry cells, $0-35$ ampere scale, 1 ampere divisions; $0-10$ volt scale, $1 / 5$ volt divisions

List Price, $\$ 2.50$
No. 44A Voltammeter for 12 volt batteries and No. 6 dry cells. 0-35 ampere scale, 1 ampere divisions; $0-16$ volt scale, $1 / 2$ volt divisions.. $\qquad$ List Price, $\$ 2.75$
No. 45 Voltammeter for testing No. 6 dry cells and ordinary 45 volt radio " $B$ " batteries. 0-35 ampere scale, 1 ampere divisions; $0-50$ volt scale, 1 volt divisions.......................List Price, $\$ 3.60$
No. 45A Voltammeter for testing dry cells including the heavy-duty Ignition type and ordinary
45 v . radio " $B$ " batteries. $0-50 \mathrm{amp}$. scale, 1 amp . div.; $0-50 \mathrm{v}$. scale, 1 v . div......... List Prioe, $\$ 3.85$ Meters $21 /{ }^{\prime \prime}$ in diameter and $5 / 8^{\prime \prime}$ thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

## STERLING SPECIAL-PURPOSE POCKET METERS - NEW SERIES

No. 38A Voltmeter

No. 531 Plug-in Safety Type Double Voltmeter

## Testers for Portable Radio Batteries

The special "A" and "B" dry batteries built for the operation of Portable Radio sets cannot be satisfactorily tested with ordinary battery testers. The new STERLING double voltmeters are designed for testing with correct loads the special "A" and "B" dry batteries used on Porcable Radio sets. The new STERLING flexible plugs of these meters fit easily into the small closely spaced socket holes.
No. 37A Voltmeter for 45 v . "B" batteries and 1.5 v . "A" batteries. Scale 0.50 v., 1 v . div. Scale $0-2 \mathrm{v} ., 1 / 10 \mathrm{v}$. div. Tests 45 v . "B" and $11 / 2 \mathrm{v}$. "A" batteries
s ...............................................................L List Price, $\$ 3.00$
No. 38A Voltmeter for 90 v . "B" batteries and 1.5 v . "A" batteries. Scale $0-100$ v., 5 v . div. Scale $0-2 \mathrm{v} ., 1 / 10 \mathrm{v}$. div. Tests 45 v . and 90 v . "B" batteries and $11 / 2 \mathrm{v}$. " $A$ " batteries.

List Price, $\$ 3.25$
No. 39A Voltmeter for 90 v . and 135 v . "B" batteries and 1.5 v . "A" batteries. Scale $0-150$ v., 5 v. div. Scale $0-2$ v., $1 / 10 \mathrm{v}$. div. Tests 90 v . and 135 v . " B " batteries and $11 / 2 \mathrm{v}$." A " batteries. List Price, $\$ 3.25$
No. 40A Voltmeter for 90 v . and 135 v . "B" batteries and $4.5 \mathrm{v} ., 6 \mathrm{v}$. and 7.5 v . "A" batteries. Scale $0-150 \mathrm{v} ., 5 \mathrm{v}$. div. Scale $0-10$ v., $1 / 5 \mathrm{v}$. div; Tests 90 v . and 135 v . "B" batteries and $41 / 2 \mathrm{v} ., 6 \mathrm{v}$. and $71 / 2 \mathrm{~V}$. "A" batteries

List Price, $\$ 3.50$
No. 42A Graphic General Tester. Red and Green color chart for all standard batteries incIuding 45 v . and 90 v . " B " batteries and 1.5 v ., 4.5 v ., and 7.5 v " A " batteries. $0-100 \mathrm{v}$. scale for special sizes of " $B$ " batteries, 5 v . div. Tests all Portable Radio batteries.

List Price, $\$ 6.00$

## Testers for Hearing Aid Batteries

No. 31A Double voltmeter for special 30 or 45 v . " B " batteries and $11 / 2 \mathrm{v}$. "A" batteries, scale 0-50 v., 1 v. div., scale 0-2 v., $1 / 10 \mathrm{v}$. divisions. Carefully engineered to impose the correct loads on the small delicate batteries used to operate vacuum tube hearing aids. Equipped with new STERLING flexible plugs List Price, $\$ 3.50$ No. 531 Plug-in-Safety type double voltmeter for testing hearing aid batteries. This new tester has the same capacity and scales as the No. 31A. No cord is necessary because the rigid plug-in type terminals are designed to fit hearing aid batteries having accessible keyed sockets. This arrangement makes it impossible to overload the No. 531 instrument or reverse the polarity while it is being used for testing hearing aid batteries

List Price, $\$ 3.50$
No. 35A Voltmeter for batteries used on carbon type hearing aids, also "C" batteries, scale 0-5 v., $1 / 10$ v. divisions

List Price, $\$ 2.25$
Meters $21 / 4^{\prime \prime}$ in diameter and $5 / 8^{\prime \prime}$ thick. Nickel finish. Standard package, ten instruments, ship. wt. 4 lbs.

## STERLING PANEL ME'TERS

## AMMETERS, VOLTMETERS, MILLIAMMETERS FOR USE ON DIRECT AND ALTERNATING CURRENT A COMPLETE MODERN LINE

These improved STERLING Panel Meters while retaining the accuracy, beauty and ruggedness which have always characterized STERLING instruments, show a modern trend in the gracefully unique arrangement of the broader and more clearly defined scales. The meters for alternating current and direct current are perfectly matched and therefore suitable for mounting on the same panel. Both the A.C. and D.C. meters are of the permanent magnet, iron vane, solenoid type. This affords positiveness of action and breadth of movement suggestive of those of the D'Arsonval type. The large needle-tipped pointers and wide clearly marked scale divisions of these panel meters make them easily read.

STERLING Panel Meters may be had in any of the types illustrated.

## SPECIAL COMBINATION A.C.-D.C. METERS WITH HAIRSPRING REPULSION TYPE MOVEMENT FITTING SAME CASES, ARE ALSO AVAILABLE.

Standard package, 100 meters, Shipping weight 30 lbs . all sterling Panel Meters are guaranteed accurate within $5 \%$.

## TYPE 80

Flush case, narrow flange, stancard finish black enamel. Circular adjustable back clamp for mounting.
Diameter flange $2 \frac{5}{32}$ "
Diam. case $2^{\prime \prime}$. Depth case $\frac{31 "}{32}$. Requires hole $2 \frac{1}{32}$ " in Diameter Length terminals ${ }^{\frac{7}{6}}{ }^{\prime \prime}$

TYPE 70
Flush case, wide flange, standard finish black enamel. Screw holes in fiange for mounting. Diameter fiange $25 / 8$ "
Diam. case $2^{\prime \prime}$. Depth case $7 / 8^{\prime \prime}$ Requires hole $2 \frac{1}{3} \frac{1}{2}{ }^{\prime \prime}$ in Diameter

TYPE 68
Flush case, square flange, standard finish black enamel. Screw holes in flange for mounting. Width flange $25 / \mathbf{z}^{\prime \prime}$. Dia. case $2 \frac{1}{32}$ " . Depth case 3/4"。

Type 68 square fiange case furnished for any range of meter at an additional list price of $\mathbf{4 0}$ cents each.

# SUPERIOR TEST EQUPMENT 

## The New Model CA-II

## SIGNAL TRACER

## Simple to operate . . . because signal intensity readings are indicated directly on the meter!

Essentially "Signal Tracing" means following the signal in a radio receiver and using the signal itself as a basis of measurement and as a means of locating the cause of trouble. In the CA-11 the Detector Probe is used to follow the signal from the antenna to the speaker-with relative signal intensity readings available on the scale of the meter which is calibrated to permit constant comparison of signal intensity as the probe is moved to follow the signal through the various stages.

## Features:

* SIMPLE TO OPERATE-only 1 connecting cable-NO TUNING CONTROLS.
 Welanome elrevit.
* Tube and resistor-capacity network are built into the Detector Probe.
The Model CA-11 comes housed in a beautiful hand-rubbed wooden cabinet. Complete with Probe, test leads and instructions........Net Price
* COMPLETELY PORTABLE-weighs 5 lbs. and measures $5^{\prime \prime} \times 6^{\prime \prime} \times 7^{\prime \prime}$.
* Comparative Signal Intensity readings are indicated directly on the meter as the Detector Probe is moved to follow the Signal from Antenna to Speaker.
* Provision is made for insertion of phones. <br> \section*{SUPERIOR IEST <br> \section*{SUPERIOR IEST SUFENOR rournait} SUFENOR rournait}

The New Model 670 SUPER-METER

## A COMBINATION VOLT-OHM MILLIAMMETER

 plus CAPACITY REACTANCE INDUCTANCE and

## DECIBEL MEASUREMENTS

Added Feature: The Model 670 includes a special GOOD-BAD scale for checking the quality of electrolytic condensers at a test potential of 150 Volts.

## Specifications:

D.C. Volts: 0 to $7.5 / 15 / 75 / 150 / 750 /-$ 1,500/7,500 Volts.
A.C. Volts: 0 to $15 / 30 / 150 / 300 / 1,500 /-$ 3,000 Volts.
Output Volts: 0 to $15 / 30 / 150 / 300 /-$ 1,500/3,000 Volts.
D.C. Current: 0 to $1.5 / 15 / 150 \mathrm{Ma} .0$ to 1.5 Amperes.
Resistance: 0 to $500 / 100,000$ Ohms 0 to 10 Megohms.
Capacity: .001 to .2 Mfd .1 to 4 Mfd . (quality test for electrolytics).
Reactance: 700 to $27,000 \mathrm{Ohms} \mathrm{13,-}$ 000 Ohms to 3 Megohms .
Inductance: 1.75 to 70 Henries 35 to 8,000 Henries.
Decibels: -10 to $+18,+10$ to +38 , +30 to +58 .
The Model 670 comes housed in a rugged, crackle-finished steel cabinet complete with test leads and operating instructions. Size $51 / 2^{\prime \prime} \times 71 / 2^{\prime \prime} \times 3^{\prime \prime}$.

$$
\text { Net Price .... } \$ 2840
$$

## Model 670p

Identically the same as the Model 670 except housed in a portable, oak cabinet complete with cover. Dimensions: $81 / 4^{\prime \prime} \times 81 / 4^{\prime \prime} \times 43 / 4^{\prime \prime}$. Supplied with test leads and all operating instructions.

MODEL 589-A
TUBE AND BATTERY TESTER
$\leftarrow$

## MODEL 599-A TUBE AND SET TESTER

MODEL 589.A TUBE AND BATTERY TESTER has a completely modernized circuit. The tube test sockets are not wired directly to the circuit, but, instead, pass through the patented Supreme Double Floating Filament Return Selector system which automatically reconnects all tube elements to any possible tube base arrangement. Due to the fact that any or all elements of each socket can be rotated to any desired position, only one socket of each type is necessary. Tests every type of tube from $3 / 4$ volt to full line voltage at its correct anode potential under proper load. Tests separate sections in multi-purpose tubes. Checks all leakages, shorts, open elements and filament continuity with a neon lamp. A circuit insert is provided for checking noise, leakage, loose and bad connections.

The battery testing circuit of the Model 589-A provides the proper load at which each battery is to operate, plainly marked on the panel, for all $1.5,4.5,6.0,45$ and 90 volt portable radio types. The condition of the battery is indicated on an English reading scale.

This is the fastest and easiest tester to operate. Just "follow the arrows"-you can't go wrong. Roller type tube chart with brass geared mechanism lists tubes in logical numerical order. Each tester carries a one year free tube setting service. SUPREME Each tester carries a one year free tube setting service. SUPREME engineering
and construction PLUS the best materials the market affords, make and construction PLUS the best materials the market affords, make
the $589-\mathrm{A}$ your biggest dollar value. You will be proud to own this
instrument. instrument.
Dealer Net Cash Price.
\$49.75

MODEL 599-A TUBE AND SET TESTER is very similar in appearance to the Model 589.A, and includes all the features and advantages of this instrument. In addition, it provides the following ranges:
0.2 TO 1500 D.C. VOLTS-5 carefully selected ranges- $0 / 615 /$ $150 / 600 / 1500$ volts. 1000 ohmas per volt STANDARD sensitivity. 0.2 TO 600 A.C. VOLTS-4 A.C. ranges- $0 / 6 / 15 / 150 / 600$ volts. Rectifier guaranteed with instrument and fully protected from over load damages.
0.2 M.A. TO 600 M.A.-3 direct current ranges $0 / 6 / 60 / 600$ allow measurement of screen, plate, "B" supply and D.C. filament loads.
0.2 TO 600 OUTPUT VOLTS-0/6/15/150/600-ideal for alignment. No button to hold down-no external condenser necessary.
0.1 OHM TO 20 MEGOHMS-4 ranges $0 / 200 / 20,000$ ohms, $0 / 2 / 20$ megohms. A low range at high current with 3.5 ohms center scale. ELECTROSTATIC-ELECTROLYTIC LEAKAGE TEST-provides an excellent test of paper condensers by means of the highly sensitive 20 megohm range. Much better than neon lamp methods as the ohmmeter is calibrated. Equally useful in checking leakage in elecohmmeter is calibrated. Equally useful in checking leakage in electrolytic condensers. Just as
battery tester, the $599-\mathrm{A}$ is your best yalue in a combination tube battery tester, the $599-\mathrm{A}$ is your best value in a combination tube
tester, battery tester and set tester. All the features of the $589-\mathrm{A}$ tester, battery tester and set tester. All the features of the $589-\mathrm{A}$
PLUS a complete AC, DC, volt, ohm, megohm, milliameter, at a cost of only 47c per range.
Dealer Net Cash Price....
$\$ 62.50$

## MODEL 563 AUDIO OSCILLATOR

The SUPREME Beat Frequency Audio Oscillator has many important service applications. It provides three output impedances of 250,500 , and 5,000 ohms; output frequency of 30 to 15,000 cycles $\pm 1 \mathrm{db}$. from 30 to 10,000 cycles. Down 2 db . at 15,000 cycles; power output is 125 milliwatts; distortion less than $5 \%$ RMS over entire range; hum level - 60 db . below maximum output; large ratio dial, calibrated scale $11^{\prime \prime}$ in length; tube complement bf 2 type 6SK7, 2 type 6C5, and 1 6X5; power consumption 35 watts-fuse protection. Shipping weight 20 lbs.
Dealer Net Cash Price.
$\$ 62.95$

## MODEL 504-B COMBINATION TESTER

Model $504-\mathrm{B}$ is radio's finest quality combination tube tester, battery tester, condenser leakage tester, and a 31 range push-button operated multimeter. Correctly tests all types receiving tubes with filaments from $3 / 4$ volt to full line voltage. Uses patented Double Floating Filament Return Selector System which automatically re-connects each tube socket for any possible tube base arrangement. Due to this special circuit only one socket is required for each tube base. Tests all standard type tubes, including octals, loctals, miniatures, Bantam, Jr., pilot lamps, etc. Speedy operation. Set controls from left to rightjust "follow the arrows". Neon lamp checks for leakage, shorted elements, open elements and filament continuity. Pressing a button increases the sensitivity of the neon lamp to 2 megs. Circuit insert for noise test. Fast roll chart-free tube setting service for one year. Checks portable radio batteries under proper load. Checks leakage of electrolytic and electrostatic by-pass condensers. Quality of tubes, batteries, and electrolytic condensers all indicated on English reading "good-bad" scale. Multimeter section completely automatic with instantaneous push-button finger-tip control-7 ranges 0.1-5/25/100/250/500/1000/ 2500 D.C. volts; 5 ranges $0.1-5 / 10 / 50 / 250 / 1000$ A.C. volts and output; 7 ranges $10-500$ microamperes $/ 2.5 / 10 / 50 / 250$ mils., $1 / 10$ amperes; 5 ranges $0.1-200 / 2000 / 20,000 / 2 \mathrm{meg} . /$ 20 megs.-3.5 ohms center scale. Rectifier guaranteed- temperature compensated circuit. No external condenser required on output volts. Accuracy of calibration $2 \%$ on D.C. and $3 \%$ on A.O. Complete with batteries and detailed instructions.
Dealers Net Cash Price

#  <br> In the Model 576 SUPREME 

## MODEL 576 SIGNAL GENERATOR

 offers the radio service man Signal Gencrator which represents the ultimate in simplicity of operation. No longer is it necessary to have an isolating capacitor dangling from the lead connected to the receiver, nor to worry about "burning ont"' the output transformer when using the audio output since each of these sections is isolated from damage by DC voltages by isolating capacitors. Only two dial scalesbut five bands

DESCRIPTION
Simple Operation-All ranges read on two basic scales, accurately calibrated at both ends. Dual Tuning Ratio-One justments. Stability-Electron jusumed fabit imprectron coupled circuit, imprecrnated iron tuned inductors and air dielectric trimmers provide the Guards against shift due to line voltage, aging, temperature, and humidity. Ladder Multiplier-Four steps from minmom to maxi num. Also, contimously variable control. Double shielding minimizes leakage. Shielded line cord. Jlluminated Hair Line Dial.

SPECIFICATIONS
R. F. Ranges- $65-205 \mathrm{KC} ; 650-2050 \mathrm{KC} ; 2050-6500 \mathrm{KC} ; 6.5-20.5$ MC, Harmonies to 82 megracyckes. Audio Frequency- 400 cyclesooltare output contimunusly variable from minimum to maximum. Internal Modulation-R. F. Carrier modulatal at approximately $50 \%$ at 400 cycles. Can be cut off to provide unmodulated signal External Modulation-Jack provided for extemal audio modulation. Professional Appearance-Honsed in heavy stoel case; gray wrinkle finish. Supplied complete with shimbed tast leads amd instructions Power Supply-110-125 volts $50 / 60$ cycles. Special fremency on request
$\$ 68.95$

## MODEL 546-A OSCILLOSCOPE

Hodel $546-\mathrm{A}$ has merited the endorse ment of servicemen, radio sset manu fucturers in researeh and production, industrial laborateries, factories and colleges for more than foar years. A complete oscilloscope incorporating a cathode ray scope, vertical and horizontal amplifiers and linear sweep generator. Uses a high vacuum 3 cathote ray tube of the modium per sistance type. All controls are on the front pancl including special terminals for direct eonnection to deflecting plates. Can be used with or without the spocially designed sensitive linear amplifiers. Both vertical and horizon tal amplifiers have high impedance input and wide frequency response. Has built-in linear sweep penerator for providing timing axis from 15 to 30 , 000 cycles. Positive, stable synchronization, internal or external. Observations may be made using external or internal sweep. Ideal for checking alignment of radio receivers, percentage of modulation on transmitters, wave-forms. Extremely flexible design makes applications unlimited. Complete Extremely fexible design makes applications unlimited.
with detailed instructions. Dealer Net Cash Price.

MODEL 561 Combinatoin A.F. \& R.F. Metered Signal Generator

## SPECIFICATIONS

Meter-Large three-inch round meter used to set the desired amount of amplitude modulation. Variable from 0 to $80 \%$. SimplicityAll frequencies on the R. F. Oscillator read on two scalcs. Both A.F. and R.F. push-button operated. Attenuator-R.F. Oscillator has ladder type four position resistor push-loutton attenuator. Also, vernier control from maximum to minimum on either of the four steps of the multiplier. A.F. output is controlled from minimum to maximum with continuously variable control. Laboratory Ap-pearance-This fine instrument is housed in beautiful golden tone, lock cornered, natural finish ouk case. Black ribbed steel pancl with silver and red lichlights. Tube Line Up-6X5 Rectifier. 6SK7 A.F. Beat Oscillator. 6SK7A.F. Beat Oscillator. GSK7 R.F. Oscillator. 6C5 A.F. Oscillator Mixer. 6C5 A.F. Amplifier. 6Fs Audio Vacuum Tube volmeter-frequency modulation control tube. 6FS R.F. vacuum tube voltmeter-F.M. Oscillator. 6K6 Buffer Mixer.

## DESCRIPTION R.F. OSCILLATOR

Rames-5 band 65/205 KC, 205/650 KC, 650/2050 KC, 2050/$6500 \mathrm{KC}, 6.5 / 20.5 \mathrm{MC}$. Marmonics above 60 MC . Tuning Mecha-nism-Dual ratio from tunixg knob to dial. One direct for speed, a second about 5 to 1 for vernier settings. Accuracy-Low end of band tuned wilh iron core inductors. Migh and of band tumed with air dielectric fimmers providing for queatest accuracy possible with printed scales. Meter used to set earrier level at a prodetermined value, aligned for an accurate and variable per cent of modulation by the A.F. Oseillator. Frequency Modulator-F.M. signal available over range of R.F. Oscillator. Frequency modulated approximately plus or minus 15 KC . Rate of frequency modulation 120 cycles per second. 00 cycle time base provides for automatic positive synchronization.

## A.F. OSCILLATOR

Range-15 to 15,000 cycles. Output Impedances-Center tap transformer of $50 / 500 / 5,000$ ohms. High impedance resistor of 50,000 ohms. Distortion-Approximately $5 \%$. Voltage OutputOpen circuit 35 volts. Frequency Characteristics-Plus or minus 1 db between 30 and 10,000 cycles. 15 cycles and 15,000 cyeles down approximately 2 db . Attenuator-Controls voltage output from 0 to maximum. Power Output-Approximately 150 milliwatts. Power Supply- $\mathbf{1 1 0 - 1 2 5}$ volts- $50 / 60$ cycies. Special voltages and frequencies on request.
$\$ 138.45$

## MODEL 562 AUDOLYZER

This is a quick, easy, inexpensive test instrument for DYNAMIC TESTING of every radio receiver using the Signal Tracing method. Easy to operate. You alway HEAR the demodulated signal instead of watching a meter or magic eye. You can find the dead portion of any receiver by connecting your modulated signal generator to the receiver and touching the SUPREME AUDOLYZER'S prcbe first to the antenna post, then the grid of the R.F. tube, the R.F. tube plate, etc., right back through the complete receiver. You will hear a signal in the AUDOLYZER'S speaker (which has a volume control) until you hit the dead stage. You can use the AUDOLYZER'S vacuum tube volt meter to measure all D.C. Yoltages without disturbing receiver's normal operations. 7 D.C. voltage ranges of $0 / 1 / 3 / 10 / 30 / 100 / 300 / 1000$ at 15 megs input. Meter is center-reading type with 'plus' and 'minus' readings to each side of center eliminating reversing test leads for polarity changes. You can measure resistance from 0.1 ohm to 20 megohms. 5 ranges give you perfect overlap as the $0 / 200$ is the low range with 3.5 ohms center scale. Total ranges are $0 / 200 / 2000 / 20,000$ ohms and $2 / 20$ megohms. Next, you can check receiver's oscillator. If oscillator cuts out or is weak when receiver dial is rotated, AUDOLYZER meter immediately indicates it. To determine unknown frequency of oscillator, I.F., or R.F. signal, use tuning portion of SUPREME AUDOLYZER and AUDOLYZER'S V.T.V.M. as
requency meter.
For receiver's oscillator place probe on oscillator putput and tun AUDOLYZAR for greatest meter swing. Read frequency on AUDOLYZER'S direct-reading dial. For R.F. determination, connect your signal generator to receiver's input and place AUDOLYZER probe on output of R.F. stage under test. Adjust signal generator and AUDOLYZFR to same frequency. Adjust receiver trimmer until receiver dial reads correctly. To determine actual signal fed to I.F. stages connect AUDOLYZER probe to first Det. output, feed a
signal into receiver and adjust AUDOLYZER dial until you get maximum swing of its meter needle. Read actual I.F. signal's frequency on AUDOLYZER. Relative gain or loss of signal strength in any stage, tube or transformer can be determined. You can check A.V.C. circuits for correct applied voltage under actual operating conditions. You can adjust A.V.C. circuits. Distortion is easily noted by ear. Dealer Net Cash Price.

#  supreme by Comparison 

## MODEL 592 SET TESTER

Service men who know the principle of Model 592 operation will never go gack to rotary switch or pin jack operation. 44 ranges at your finger tips.
1 Microampere to 14 amps; 8 ranges ( $1 — 70 / 700$ microamps; $7 / 35 / 140 / 350 \mathrm{M} \mathrm{A}$; 1.4/14 amps.)
0.1 to 1400 D.C. volts; 7 ranges at 1000 ohms per volt and 7 ranges at 25,000 ohms per volt sensitivity of: ( $0.1-3.5 / 7 / 35 / 140 / 350 / 700 / 1400)$. Double Meter Sensitivity. $1 / 4$ ohm to 50 megs: 6 ranges ( $1 / 4-500 / 5,000 / 50,000 / 500,000 \mathrm{ohms}$ and $5 / 50 \mathrm{megs}$ ). All from self contained battery power.
0.1 to 1400 A.c. volts: 6 ranges $0.1-7 / 35 / 140 / 350 / 700 / 1400$ ). Temperature com-pensated-rectifier guarantced.
Complete output ranges: 6 ranges ( $0 / 7 / 35 / 140 / 350 / 700 / 1400$ ). No external condenser necessary.
-0 to +46 D.B.: 4 ranges 0.006 to almost 200 watts- $(0 /+16 ;+10 /+26$; $+20 /+36 ;+30 /+46)$.
50 meg. resistance range allows wery accurate leakage check of all electrostatic paper and mica condensers. New specially designed A.C. rectifier circuit minimizes burnouts from GUARANTEED the same SAFETY SWITCH TO HOLD DOWN. Copper-oxiae fectished so D.B. readings can also be taken on any line of known impedance. D.B. readings direct so D.B. readings can aiso be taken on any lise of known impedance. D.B. 500 ohm line. SUPREME 592 easiest multimeter to operate- just depress one button on left side of panel for desired function and one button on right side for desired range. One set of pin jacks serve 43 ranges. 14 amps range on separate binding posts. 40 microampere meter movement. Wire wound shunt resistors. Special push-button for quick ohmmeter zepo ad justment. Four ycars actual ficld use by thousands or service Men
prove the 592 to be tops in instrument value.
Dealers Net Cash Price........................................................................... $\mathbf{\$ 8 . 9 5}$

MODEL 542
MULTI-METERS

## A POPULAR COMPACT POCKET LABORATORY

## MODEL 543 POCKET MULTI-METER

The Model 543 Pocket Multi-Meter uses the same bakelite case as Model 542. Attractive two-color panel-full size $3^{\prime \prime}$ one-mil meter. A single rotary selector switch provides functions and ranges of: Resistance- $0 / 2000 / 200,000$ ohms; Direct Current-0/6/60/600 M.A.; AC- $0 / 15 / 150 / 600 / 3000$ volts; D.C. $0 / 15 / 150 / 600 / 3000$ volts. Batteries furnished and contained within case. Ranges at 1,000 ohms per volt standard sensitivity. With this instrument you can make A.C. and D.O. voltage measurements in radio and television receivers and if you are a "Ham" you can use the high voltage ranges on your transmitter and scope. This is a beautifully designed and rugged little instrument at an astonishingly low price.
Dealer Net Gash Price.
\$18.95

## MODEL 542 POCKET MULTI-METER

A regular little pocket laboratory with a case only $3 \times 53 / 4 \times 2^{\prime \prime}$ in size, weighing but 23 ounces- 24 ranges-just as accurate and even more convenient than you would expect to find in an instrument twice its price. 4 DC mil ranges (with first scale division 5 microamperes) of $0 / 0.3 / 6 / 30 / 150 ; 4 \mathrm{DC}$ volt ranges (with first scale division 0.1 volt) of $0 / 6 / 150 / 300 / 1500 ; 4$ ohms ranges (with 1 ohm first scale division and 25 ohms center scale) of $0 / 2,000 / 20,000 / 200,000 / 2$ meg; 4 AO volt ranges (with first $0 / 2,000 / 20,000 / 200,000 / 2 \mathrm{meg} ; 4$
scale division 0.1 volt) of $0 / 6 / 30 / 150 / 600 ; 4$ volt rat ranges of scale division 0.1 volt) of $0 / 6 / 30 / 150 / 600 ; 4$ output ranges of
$0 / 6 / 30 / 150 / 600 ; 4$ decibel ranges of $-6 /+10,+8 /+24,+22 /$ $0 / 6 / 30 / 150 / 600 ; 4$ decibel ranges of $-6 /+10,+8 /+24,+22 /$

## MODEL 565 VACUUM TUBE VOLTMETER

The Model 565 is SUPREMF'S answer to the demand for a vacuum tube voltmeter having the highest possible input impedance both on $A O$ and DC measuring functions, compatible with easy selection of ranges and functions. Supplied with new type hand-fitting probe which allows ease of measurements, handles just as any ordinary test lead. Probe, which is used for RF measurements, incorporates new high-frequency diode giving best possible frequency response. The very high imput impedances and low input capacity of probe result in a very minimum of detuning of RF tuned circuits.
Rugged SUPREME 4 inch meter fully isolated from test probes. Both AC and DC functions. $D C$ and $A C$ Audio measurements possible without removing probe from case. RF Measurements made by removing probe from case and touching voltage source with tip. Extremely High Input made by removing probe from case and touching voltage source with tip. Extremely High input
impedances both AC and DC. Negligible frequency error. Measurements possible directly in opimpedarces bonth AC and DC. Negigible frequency ehanges.
Range-DC $0-1,2.5,10,50,250,500$. AC $0.1,2.5,10,50,250$. Extended to 5000 volts by external multipliers.
Input Impedance-DC 80 megohms on 1 v . range. 40 megohms on 500 v . range. AC 60 cycle: 40 megohms on 1 Y. range. 20 ohms on 250 v . range. AC 100 mc .: 20,000 ohms. Input Capacity of Probe- 9 mmf . Frequency Range- 20 cycles to 100 megacycles with negligible error.

## SUPREME PANEL METERS

FEATURING A NEW DESIGN FOR GREATER EFFICIENCY:

ALNICO BAR MAGNET AND SOFT SINTERED POLE PIECES

DOUBLF BRIDGE CONSTRUCTION-SIMPLE RUGGED ASSEMBLY

CASE MODEL 2400--2" round

## "HAIRLINE" ACCURACY ASSURED BY:

(1) Efficient Alnico Bar Magnet.
(2) Double Bridge Construction.
(3) Selected Pivots and Jewels.
(4) Strong, Tough Pointer.

# Radio Talplet Testers 

## NEW TRANSCONDUCTANCE READING TUBE TESTER

Model 2425

Conclusive tests under set operating conditions are made with Model 2425, an entirely new tester providing transconductance (dynamic mutual conductance) reading in micromhos.

This simplified transconductance reading tube tester incorporates a new plate current test method which gives correct micromhos values on a $0-2500-5000-10,000$ Micromho scale. A scale is also provided for a separate test which indicates the percent of rated trancsonductance values. The percent scale has colored arc portions for reference as to good, questionable, and poor tubes, includiug diodes aud rectifiers.
Transconductance readings in micromhos, plus flexibility of Triplett's exclusive three-position lever switching cnables final analysis testing of all tubes with the Model 2425 Tube Tester.
Three-position lever switching makes this one of the most flexible of all tube testers. Simplified settings assure maximum speed in operation. Just snap the switch up or down. Provides the maximum in operating simplicity. Switching circuit gives individual control for each tube element. Takes care of roaming elements, dual-cathode structures, multi-purpose tubes, etc.
The only circuit with individual control of each tube element with respect to switching between plate and filament. Will always accommodate new tubes without regard to their element connections. One socket for each kind of tube base is used and there is a spare socket furnished as well as an extra element switch should future tubes require.
Constant improvement has been the keynote of Triplett superiority. Triplett engineering has combined in a most compact way the Model 2425 Transconductance reading tube tester to give a truly complete tcst through every tube elcment for quality, gas, shorted and open elements of all types of receiver tubes. Those wanting the ultimate in a tester that will furnish speedy, accurate, proven readings for all types of receiver tubes will find this their favorite tester.
Case: Metal with tan hammered enamel finish, brown trim. Size: $10^{\prime \prime} \times 10^{\prime \prime} \times 53 / 4$ Equipped with detachable hinged cover and compartment for holding large book-type tube chart.

## ROLL CHART ATTACHMENT FOR MODELS 2425 AND 2413

An external roll chart in a streamlined case that quickly can be attached to the tester case by the hinge posts when cover is removed. The roll chart fits in the carrying compartment in the tester cover when foot in ase.

This chart has all the advantages of a roll chart incorporated in a tester and yet has all the advantages of a book chart in reference to adding new data. The location is right, and settings can be made casily and quickly. A replacement chart may be obtained to cover new tubes at a minimum charge if the old one is returned.

The external roll chart is available at extra charge with Model 2425 or Model 2413.

Model 3212
A professional, highly attractive tube tester that will add distinction to any dealer's counter or service shop. Quickly and conclusively tests tubes for value, inter-element shorts and leakage-plus transconductance comparison test.
New slide-type three-position switch gives individual control for each tube element and makes this one of the simplest and speediest of all testers in operation. You will find testy easier to make than ever before. Simply snap the switch up or down. Generally, never more than a total of five settings per tube required. Takes care of roaming elements, dual cathode structures, multi-purpose tubes, etc. It is the final answer to simplified tube element control plus security, against obsolescence.

In the Transconductance Comparison test the test voltages are applied to the tube elements without any chance of overloading. In the direct reading Goon-...-BAD Value test the control and screen grids are tied to the plate which operates at minimum plate voltplate which operates at minimum plate volt. age. An appliance check leads permits "short" and "continuity" test
sistance elements, etc.

Modern two-tone metal case, $15^{\prime \prime} \times 113 / 4^{\prime \prime}$ $\times 6^{\prime \prime}$, is furnished in the new and highly attractive tan "hammered" enamel with brown molded sockets, knobs, etc. A design of unsurpassed styling and customer appeal. Its professional design and operation are a definite asset from the customer confldence aspect

For 110 v . 60 eycle AC. Complete with

## PORTABLE TUBE TESTER

Model 2413
Highly flexible yet speedier in use than any tube tester of this type Triplett has yet offered. The instructions and test chart are so simple that anyone can quickly acquire the necessary test procedure. Has an additional element switch and spare socket to provide for possiblc new-type tubes.
Multi-purpose test eircuit provides for cmission test, short and open element test and transconductance (mutual conductance) comparison test for matching tubes. In the transconductance comparison the test voltages are applied to the tube elements without any chance of overloading. In the emission test the control and screen grids are tied to the plate which operates at minimum plate volt. age. Nine three-position lever type switches provide fingertip control over each tube element. Continuity test provided for checking resistor and ballast utbes, pilot lamps, etc. $3^{\prime \prime}$ meter has red, yellow, and green BAD-?GOOD scale and is Red $\bullet$ Dot lifetime guaranteed. A 19 -step filament selector covets full range from 0.75 to 110 volts.
New SQUARE LINE case design, attractively fnished in a new tan "hammered" bakedon enamel. It is an impressive counter or portable unit. Size: $10^{\prime \prime} \times 10^{\prime \prime} \times 51 / 2^{\prime \prime}$.

## WIDE RANGE SIGNAL GENERATOR

Model 2432
A completely new signal generator, Model 2432 embodies features normally found only in "custom priced" laboratory models.
Frequency Coverage: Continuous and overlapping 75 KC to 50 MC. Six bands: 75 to $224 \mathrm{KC} ; 220$ to 750 KC ; 700 to 2500 KC ; 2450 to $8500 \mathrm{KC} ; 8$ to $25 \mathrm{MC} ; 24$ to 50 MC . All fandamentals. Strong second and third harmonic signals provide for extending coverage to 150 MC . Turret Type Coll Assembly: Six-position turret type coil switching with complete shielding. Coil assembly rotates inside a copper plated steel shield. Attenuation: Individually shielded and adjustable, by fine and coarse controls, to zero for all practical purposes. Stabllyt: Greatly increased by use of air trimmer capacitors, electron coupled oscillator circuit, and permeability adjusted coils. Internal Modulation: Approximately $30 \%$ at 400 cycles. Power Supply: 115 Volts, $50-60$ cycles A.C. Voltage regulated for in creased oscillator stability. Case: Heavy metal with $\tan$ and brown hammered enamel inish. Gize: $10^{\prime \prime} \times 10^{\prime \prime} \times 63 / 4{ }^{\prime \prime}$.
There are many other features in this beau. tiful model of equal interest to the man who takes pride in his work.

# Radio RIPLET/ Testers 

SENSITIVE YOLT.OHM-MIL-AMMETERS
Extreme sensitivity for your most exacting measurements . . 25,000 ohms per volt sensitivity for DC voltage ranges.
Has 10 A.C. and D.C. volt ranges; 10 A.C. and D.C. current ranges; four resistance ranges; decibel readings: - 10 to +55 and output readings. All easily readable on the long $5.6^{\prime \prime}$ instrument scale. Engineered to assure simplicity of operation, extrome accuracy and precision reliability.

Striking new "Square Line" case design has "eye appeal"attractively finished in a new tan "hammered" baked-on enamel. Size: $10^{\prime \prime} \times 10^{\prime \prime} \times 53 / 4$ ".

Ranges: D.C. Volts $0,10,50$, $250,500,1000$ volts at 25,000 ohms/v; A.C. Volts $0,10,50,250,500,1000$ at 1000 ohms/v; A.C. Amps. $0,0.5,1,5,10 ;$ D.C. Amps. $0-10$; D.C. Ma. 0, 1, 10 , 50, 250; D.C. Microamps. 0-50; Ohms 0, 4000, 40,000; Megohms $0,4,40$. Output uses eondenser in series with A.C. Volts ranges. Plug-in rectifier simplifies replacement in case of accidental damage by overloading. Banana jacks insure low contact resistance and trouble-free plug-in connections. MODEL 2400--Ranges: D.C. Volts 0, 10, 50, 250, 500,1000 volts at 5000 olmms $/ v ;$ A.C. Volts $0,10,50,250,500,1000$ at 1000 chms/v; A.C. Amps. 0.5, 1, 5, 10; D.C. Amps. 0-10; D.C. Ma. 0, 1, 10, 50, 250 ; D.C. Microamps. $0-250$; Ohms 0 , 4000, 40,000 ; Megs. $0,4,40$. Output wes A.C. Vilts scale with capacitor.
WATTMETER, AMMETER, VOLTMETER ELECTRIGAL WATMETER, AMNETER, CIRCUIT ANALYEER

Madel 2470 An el Myzer, new advanced design, that, measurts the watage that measures be watage consumption, rourrent and hold aphimees and smail hold ampinace and sman motors mader actual oper-
ating conditions. New ating oonditions. New developments for accurate testing on lines with unbalanced curents or volt-
Just the tester for watt, current, and rolt analyses of electric rferigerators, washers, radios, ironers, and other appliances, including ranges operating on 220 -volt single phase three-wire and three phase wire systems. Power used by the smallest appliances is readily checked on the extremely low scale range of $0-20$ watts, (fused to prevent damage from accidental overload). All switches and leads are ample to carry full load continuonsly.
Ranges: A.C. Watts $0,20,40,500,1000,2000,4000 ;$ A.C. Ma. $0-260$; A.C. Amps. $0,6.5,13,26$; A.C. Volts $0,130,260.4$ " Red•Dot meter. Tan metal case, matching "SQUARE LINE" series, $10^{\prime \prime} \times 10^{\prime \prime} \times 53 / 1^{\prime \prime}$ with leads

POCKET VOLT=OHM-MILLIAMMETER
Just the instrument for A.C.-D.C. voltage, direct current and resistance analyses. This handy Pocket Volt-Ohm-Milliammeter reads to 5000 volts without external multipliers. Has selector switch for all instrument readings. Molded case and panel, completely in. sulated. A.C.-D.C. Voltage at 1000 ohms per volt $0,10,50,250,1000,5000 ;$ D.C. Milliamperes $0,10,100,500$; Resistance0.300 ohms (shunt type circuit) 10 ohms reading at center scale; $0.250,000$ ohms reading at center scale; $0.250,000$ ohms
(series type) 3700 ohms at center scale. (series type) 3700 ohms at center scale.
Highcr resistance measurements are availHigher resistance measurements are avail-
able by using external batteries. Black molded panel and case, completely insulated. Handy pocket size $3 \frac{1}{15} \times 57 /{ }^{\prime \prime} \times 21 /{ }^{\prime \prime}$ deep. Complete with self-contained battery and special test leads with pee wee clips.

## MODEL 337-AVP

Model 337-AVP Voltage-Polarity-Phase Rotation Tester provides the maintenance man with a compact, handy size, portable unit for making all necessary checks of a power line.

This tester is used to check 115,220 , or 440 line voltages when servicing an electrical installation for open circuit,
 blown fuses or damaged wiring, or when installing new equipment to converted plant installations. It can also be used for the same functions as an electrician test lamp for locating blown fuses, etc.

Ranges are 0-440 A.C.-D.C. Volts, at 166 ohms per volt. Accurate indications fall well within the black blocks at 115,220 , and 440 volts. A small polarized vane green-vellow-red indicator mounted on the center of the dial shows whether the green or red prods are connected respectively to + or - D.C. Phase rotation is indicated on the isntrument dial by an up or down scale motion of the line voltage pointer when black prod is connected to the third wire of a threephase A.C. line.

## VOLUME UNIT METER

Internal impedance 3900 ohms. Steady state reference 1 milliwatt. For 600 ohm line, $0.100 \%$ scale; also minus 20 to plus 3 Y . U. scale. Model 426,

Price $\$ 39.50$

We also distribute a complete line of TRIPLETT Multipliers, Shunts, Ring Shunt Assemblies, Multi-Deck Selector Switehes and Bar Knobs.
ALL PRICES ARE SUBJECT TO CHANGE - ALL MODELS SUBJECT TO SUBSTITUTION

## QUALITY TESTING INSTRUMENTS

## 1/pDCLEITSCOPE

「NDUSTRIAL and television oscilloscope for radio and industrial electronic servicing as well as for educational applications. COMPACT . . . $7^{\prime \prime}$ high . . .5" wide . . . $11^{\prime \prime}$ deepLIGHT . . . only $83 / 4$ lbs. ...COMPLETE...measures $A C$ and DC with sensitivity better than 100 mv RMS/inch with fidelity within ... 2 db from 0 to 200 kc ; linear sweep from 3 cycles to 50 kc ; blanking of return trace; intensity amplifier . . . direct connection to plates. . . low input isolated from caseretractable light shield . . . leather handle . . . detachable graph screen.

## POCKETSCOPE PROBE.METER

 S. $20 \cdot \mathrm{~A}$

HIGH voltage and high frequency probe as well as meter calibration for oscilloscope trace. Input capacity is low and 3 -step frequency compensated attenuators together with continuous control, permit observation of voltages from 200 mv to 600 volts, of any frequency from 0 to 5 megacycles. With high voltage adaptor snapped on, voltages as high as 10,000 volts may be measured. Meter calibration with push-butron on probe permits accurate and easy calibration of vertical trace. Especially designed for S.11•A POCKETSCOPE, but may be used with any oscilloscope. Size . . . $2^{3 / 4^{\prime \prime}}$ high .... 43/4' ${ }^{\prime \prime}$ wide . . $1011^{\prime \prime}$ deep.

MODEL S•10•A

GENERAL purpose oscilloscope for servicing and educational applications. COMPACT... 63/8' ${ }^{\prime \prime}$ high, $4^{\prime \prime}$ wide and $10^{\prime \prime}$ deepLIGHT . . . only $53 / 4$ lbs.... COMPLETE. Sensitivity betfer than 1 V RMS/inch with fidelity within . . . 2 db from 20 cycles to $100 \mathrm{kc} .$. linear time sweep from 10 cycles to 50 kc . . . direct connection to deflection plates . . . retractable light shield.

## RAYONIC CATHODE RAY TUBE

 3 M P 1A$3^{\prime \prime}$ cathode ray tube for oscilloscope applications. P1 medium persistence screen, only 8' long. Zero first-anode current gun with high voltage accelerator electrode. Deflecting plates to separate terminals on duo-decal socket. Operation on voltages from 500 to 2500 volts. Accessories as sockets, magnetic shields, and detachable graph screens are available.

## PANEL INSTRUMENTS

Round Style

Rehind this group of panel instruments is aver half a century of instrument skill, and the Weston trodition of building instru. ments to the highest standards of cependabiliy and service.
Model 301,425 and 476 are regularly supplied in round flush $31 /{ }^{\prime \prime}$ bakelite cases, $33 \%$ bakelite, or $31 / 4^{"}$ metal coses with black finish Model 476 also available in surface metal. Model 301 or 425 in surface metal or bakelite Rectangular bakelite flush type anly are also available
Model 506, 507 and 517 instruments are regularly supplied in round flush $2 \frac{1 / 2}{}{ }^{\text {" }}$ bakelife ases, ar flush, narraw flange, in round flush $21 / 2$ bakehife cases, ar thush, narraw flange,
black finished metal cases, with a clamp for panel maunting. black finished metal cases, with a clamp for ponel maunting. Wide flange metal cases are also availabl
please specify style and type of case desired.
These instruments are normally calibrated for use on nonmagnetic panels. Instruments for use on magnetic panels will be adiusted for a steel panel thickness of .09' unless otherwise requested. Instruments for use on circuits above 300 volts should be ordered in bakelite cases when it is not possible to connect in grounded side of line.

For other instrument prices, write to Weston Electrical Instrumenः Corporation, Newark 5, New Jersey

Rectangular Style

Model 799

## MODEL 799 INSULATION TESTER

The hodel 799 insulation tester is a small compact device embodying a navel electronic circuit operating on the grid current characteristic and is an extremely sensizive resistance measuring assembly for a wide variety of purposes. High accuracy is sacrificed for a very broad coverage of from . 1 to 10,000 megohms and its use is indicated where the degree of the leakage resistance is wanted rather than exact values. Less than 50 volts are applied to the resistance under test.

An ideal one hand operated instrument for leakoge measurements on equipment, motors, electrical and radio components, insulating materials, etc., where bieakdown voltages are not desired.

An Electrical Guard Circuit is provided for proper eliminafion of surface leakage when checking cables.
The vacuum tube used is the tH 4. . . the filament battery is $11 / 2$ yoits. . . ond the plate battery is 67.5 volit, all self contained. Battery life about one year under average conditions. Accurate within $1 / 8^{\text {" }}$ of scole length...
....Scale Length: 2.375' ${ }^{\circ}$
Dimensions: 3-3/16' $\times 51^{\prime \prime} 4^{\prime \prime} \times 5^{\prime \prime}$ over binding posts
Approx. Weight: 3.8 lbs ,
RANGE: 0-10,000 megohms (logarithmic scale)
UST PRICE $\$ 54.00$

## MODEL 796 INSULATION TESTER

The constant check of insulation resisfence has long been recognized as the most complete insurance agcinst costly equipment failure.

This compact readily portable fester provides complete insulation and resisfance tests up to 200 megohms at a test potential of 350 to 500 volis d-c. It operaies from self contained, long life, light weight batteries, and there are no vibrators or fubes to replace.
The ocerator has the freedom of both hands, through elimination of the inconvenient hand crank generator.

Although the test potential is 500 volts at the ferminals, the current is only a few microamperes. it is therefore impossible, under normal conditions, for the operator to receive any harmful shock. The Model 796 is also ideal for concuctivity tests, e.g., conductive rubber safety shoes, flooring, etc.

Model 796 can also be used for general resistance measurements from 10,000 ohms to 200 megohms.

## MODEL 689 OHMMETER-TYPES IE AND IF

Model 689 is a very convenient pocket-sized instrument for the resistance and continuity method of checking circuits. The indicating instrument is a full sized $31 / 4$ inch meter. A selt-contained battery provides the necessary potentials for resistance readings.

Type 1E ohmmeter has a double range of $0-5,000$ and $0-50,000$ ohms.
Type if ohmmeter also has a double range of $0-10$ and $0-1,000$ ohms for the accurate measurement of low resisfance values. This type is widely used for production and maintenance testing of ormoture and field resistance of small motors, relay and coil testing, fransformer winding tests, and other similar applications.

## Weston RADIO INSTRUMENTS

## MODEL 564-VOLT-OHMMETER, TYPE 3-C

#### Abstract

A fine, Weston quality instrument with a very useful selection of voltage and resistance ranges. A self-contained $41 / 2$ volt battery provides the necessary potential for the ohmmeter ranges. Ohmmeter adjustment compensates for changes in battery potential without any effect on meter accuracy. Ranges are available from pin jacks. A toggle switch connects meter in circuit as a voltmeter. Complete with a pair of 4 ft . test leads. Accuracy guaranteed to be within $2 \%$.

RANGES: VOLTS, d-c, at 1,000 ohms per volt- $0-3 / 30 / 300 / 600$ OHMS (full scale)-0-1,000/10,000/100,000/1,000,000

Size: $51 / 2^{\prime \prime} \times 33 / 4^{\prime \prime} \times 29 / 16^{\prime \prime}$
Weight: $13 / 4 \mathrm{Jbs}$.

$\$ 7.00$

Model 564 Type 3-C

## MODEL 695-TYPE 11 POWER LEVEL METER, VOLTMETER, OUTPUT METER

Gives readings in decibels as well as volts making it ideal for power level measurements in all types of speech equipment and radio receivers. Medium speed, moderately damped movement. Constant impedance of 20,000 ohms. 11 Db ranges from - 4 to +36 Db . at zero on the Dh scale. 7 valtage ranges from 2 to 200 valts. Calibrated for 500 ohm lines with zero level of 6 milliwatts (. 006 watts) or 1.73 volts. Complete with pair of test leads. Accuracy guaranteed ta be within $5 \%$ on rectified a-c. Size: $5 \frac{1}{2} 2^{\prime \prime} \times 33 / 4^{\prime \prime} \times 31 / \mathrm{g}^{\prime \prime}$. Weight: $11 / 2 \mathrm{lbs}$.

## MODEL 697-VOLT-OHM-MILLIAMMETER

> Very popular pocket-size device with a-c and d-c valtages, d-c milliampere and ohm ranges. Precision resistors used throughout. Accuracy has not been sacrificed for size. All ranges brought out to pin jacks. Toggle switches protect and connect the meter in the circuit as a valtmeter or ohmmeter. Self-contained $41 / 2$ volt battery supplies necessary potential for ohm ranges. Ohmmeter adjustment campensates for changes up to $25 \%$ in battery potential without affecting meter accuracy. Accuracy guaranteed to be within $2 \%$ on $d-c$ and within $5 \%$ on a-c.
> RANGES: VOLTS a-c and d-c-0.7.5/15/150/750
> MILLIAMPERES, d-c only- $0-7.5 / 75$

## SUPER-SENSITIVE ANALYZER

1,000 or $\mathbf{2 0 , 0 0 0}$ OHMS PER VOLT . . .

MAXIMUM RANGES . . . MINIMUM SIZE

#### Abstract

Small . . . Light . . . Compact . . . Heavy molded bakelite panef . . . Rugged solid oak case . . . Removable cover . . . Convenient carrying handle . . . 26 Ranges . . . $5 \mathrm{~d}-\mathrm{c}$ Voltage ranges at a sensitivity of either 1,000 or 20,000 ohms per volt . . . A-c temperature compensated . . . Precision resistors throughout . . . A-c accuracy within $3 \%$. . . D-c accuracy within $2 \%$ up to 1,000 volts; $3 \%$ on 1,000 volt range.

Ideal for . . . Measurement of tube circuits, as in electronic receivers, low powered transmitters and electronic control equipment . . . Potentials and current in television equipment and wired communication systems . . . Power level in Decibels in audio equipment, P.A., telephone or speech lines . . . Cathode ray equipment . . . Maintenance of electronic control and alarm systems in industry . . . Production adjusiment and testing of sensitive electronic devices and communication equipment . . . Measurement of plate voltage and current on amateur transmitters, as required by F.C.C. . . . Diode currents in AVC circuits and AFC current . . . Leakage of condensers . . . Resistance of all types of circuits.

Model 766 Televerters may be used with Model 779 for applications requiring higher d-c voltage measurements. Type 1 for 5,000 volts; Type 2 for 10,000 volts. Model 666-1C Socket Selector (described below) may be used to to facilitate checking of tube cricuit conditons in radio service work. service work.

## SOCKET SELECTOR—MODEL 666 TYPE IC

The selector block mounts mechanically on any analyzer by means of two pin terminals. With the tester plug inserted in the radio set socket and the tube in the Selector Socket, tube circuit conditions (voltage, current, resistance) can be checked by plugging in jumper cables from the jacks on the selector block to the analyzer jacks or binding posts. The pin jacks are marked with the RMA tube base numbers. A comprehensive tube base chart is furnished. All adapters are supplied including octal, loctal and miniature types.

## LIST PRICES

Model 785-in Oak Carrying Case
$\$ 125.00$
Model 785-without Carrying Case

The Model 785 Circuit Tester with its 27 ranges is a multi-purpose instrument which not only performs many routine tasks, but also covers a broad field of measurements requiring an ultrasensitive instrument.

Its usefulness is by no means confined to sensitive circuit applications. General maintenance work, such as checking motors, lighting circuits, etc., can be accomplished with a minimum waste of time.

The broad range of application of this circuit tester is indicated below:

Electronic Transmitters and Receivers . . . Communication Sys-tems-Telephone, Telegraph, P.A., Radio . . . Network Protectors and Carrier Current Systems . . . Signal Systems-Police, Fire, Burglar Alarms . . . Servicing Electronic and Electrical Equipment . . . Sound Motion Picture Equipment . . . Automatic Control Equipment . . . Railroad Control Circuits, Switching Systems, etc. . . . Aircraft and Marine Communication, Electronic and Electrical Circuits . . . Laboratories - Production Control, Research, Development, School and College Courses . . .

D-C voltage sensitivity is 20,000 ohms per volt. Model 766 Type 1 Televerter extends the d-c voltage to 5,000 volts; Model 766 Type 2 to 10,000 volts. The use of Model 666-1C Socket Selector facilitates the checking of tube circuit conditions in radio service work.

## Westonn rado instruments

## MODEL 798 TYPE 3 - PROPORTIONAL MUTUAL CONDUCTANCE TUBECHECKER

Model 798 Vacuum Tube Analyzing equipment consists of a tube tester and a 10 range analyzer, mounted in one complete assembly and housed in a welded aluminum case. The case is provided with a two section storage compartment, equipped with a hinged cover. One section for the accessories, and one for spare parts, tools, etc.

The device is a proportional mutual conductance tube tester, which indicates transconductance on a differential frequeny system, wherein a 5 kilocycle signal is applied to the grid of the tube under test, and the 5 kilocycle current component is measured in the plate circuit. The grid signal may be varied in three steps providing 3 mutual conductance ranges, $0-3000 / 6000 / 12000$ micromhos.

Three different plate potentials are used providing proper values for diodes, battery types, and general type tubes. The multi-meter or analyzer section has ten full scale ranges.

Model 798 is equipped with eleven vacuum fube testing sockets, ten rotary controls, and four toggle switches, three indicator lamps. A $41 / 2^{\prime \prime}$ rectangular meter is used, providing ease of readability of all microhmo, voltage, current and resistance values, as well as a GOOD-BAD scale.

Size: $17 \frac{3}{4 \prime \prime} \times 11 \frac{1 / 2 " \times 61 / 4 \prime \text { " }}{}$

## VACUUM TUBE VOLTMETER=0HMMETER ProVAc With the R. 7 . Signal Tracing EDIPROBE

The PROVAC Model ED-100 is the last word in visual dynamic signal tracing. It will enable the laboratory engineer and radio service technician to measure every voltage required in the design laboratory and radio servicing.
Measure R.F. with the same ease as measuring D.C. with our most recent development-THE PROVAC. If is no longer necessary to guess at which paint the signal stops.
Our engineering skill and extreme care in the matching and selection of component parts has resulted in a unit we are proud to offer. The PROVAC is the finest in high quality test equipment.
D.C. Ranges: 0 ta $3-10-30-100-300$ and 1,000 yolts. All ranges have a constant input resistance of $11,000,000$ ohms. Accuracy $3 \% \pm$.
A.C. Ranges: 0 to $10-30-100-300$ and 1,000 volts. Sensitivify: 1,000 ohms per volt. Accuracy $5 \% \pm$.
Ohmmeter Ranges: $0-1,000$ ohms, $0-10,000$ ohms, 0-100,000 ohms, $0-1$ megohm, $0-10$ megohms, and $0-1,000$ megohms. R. F. Voltage ranges $0 / 3-10-30-50$. 50 Volts to be measured on 100 Volt range. (Feoture of the Provac.)
Bridge Amplifier Circuit Meter individually calibrated for use with set of test leads, signal tracer probe and batteries. The Provac and Model 100 are supplied in individual black steel cases, $9-5 / 16^{\prime \prime}$ high, $6^{\prime \prime}$ wide, $43 / 4^{\prime \prime}$ deep. Shipping weight $101 / 2$ lbs., complete.

## TEST EQLIPMBMT

## UNIMETER TYPE UM-3

A completely portable all around utility instrument, ideally suited for service work where extreme sensitivity and higher voltage ranges are not the important factor. This unit has a large face panel instrument which is calibrated and laid out to reduce the error possibility in readings.

A single control is used for zero setting each resistance range. The scales are printed in red and bluck for quick, easy identification.

Range coverage: D-C volts. 0-2 $1 / 2-10-50-250-1000-2500$ volts. Ail at 2000 ohms per volt. The highest range is obtainable at a separate jack.

A-C volts: $0-21 / 2-10-50-250-1000-2500$ volts. All are at approximately 1300 ohms per volt. The highest range is obtainable at a separate jack.

Resistance ranges: $0-1000,100,000$ and 1 megohms-center scale values are approximately 10,1000 and 10,000 respectively with a self-contained battery. Extended ranges may be obtaited with the use of external batteries.

Direct current: 0-1-10-100 milliampere. 0-1-10 ampere. The two ampere ranges are obtainable on two separate jacks.

Db calibrations: -12 to +55 db in 5 ranges, 6 milliwatts into 500 ohms is used as 0 reference level.

Case and finish: Welded steel case with rounded corners and removable snap-on cover. Grey wrinkle finish. High grade sturdy test prods supplied. Size $9^{\prime \prime} \times 10^{\prime \prime} \times 4^{5 / 8 \prime}$. Weight, $9^{1 / 4}$ Ibs,

SUGGESTED PRICE $\$ 28.50$

## UNIMETER TYPE YMW-1

Completely portable Uni-
 meter Type YMW-1 is a selfcontained unit enclosed in a fabricated steel gray case. It is a 20,000 ohms per volt multi-range portable instrument developed by General Electric for service and general laboratory work. lapid, accurate measurement of volts, ohms, current, and decibels, and extreme simplicity of operation are the features of the instrument. All functions except the 50 microamp and capacitor fur uutput are available without changing the leads to various jacks. A single rotary selector switch controls all functions and ranges. A separate two-position switch handles AC or DC volts. Yolts: AC and DC volts $0.25,10,50,250$, 1000. Sensitivity: DC volts, 20 K ohms per volt; AC volts, 1 K ohms per volt. Gutput meter: Same as $A C$ volts through .5 mfd 600 volt capacitor. Decibels: -10 to $+3,-2$ to $+15,+16$ to +29 , +30 to $+43,+42$ to +55 . 0 level is 6 milliwatts into 500 ohms. Direct current: $0.5,5,50,500 \mathrm{ma} ; 0.50$ microamps, available at separate jack. Resistance: 3 ranges, total coverage 1 ohm to 20 megohms; $\mathbf{R} \times 1,20$ olm center 2 K ohm maximum; $\mathbf{R} \times 100$, 2 K ohm center 200 K ohm maximum; $\mathrm{R} \times 10 \mathrm{~K}, 200 \mathrm{~K}$ ohm eenter 20 mecolim maximum. Meter: G-E type DO-58,50 microamp $\pm 2 \% .4 \mathrm{in}$, by $41 / \mathrm{in}$. case. Batteries: 1 -No. 2 flashlight cell; 2-7.5. volt C batteries. Accessories: (supptied) One set high grade sturdy test leads ( $40^{\prime \prime}$ long), Two slip-on alligator clips for test prods. Gase and finish: portable carrying case of fabricated sted with removable cover. Gray wrinkle finish. Size $125{ }_{5}{ }^{\prime \prime} \times 93 / 4^{\prime \prime} \times 51 / 2 "$. Weight: 12 lbs.

## SUGGESTED PRICE $\$ 66.00$

## TUBE CHECKER TYPE TC-3A

The portable model TC-3A tube checker is the latest emission-type tube checker for general service work and can be your most valuable service test equipment for this reason; a very large percentage of your service calls are usually tube failures and much time can be saved by shecking the tubes first, consequently, this light, easy to carry, portable model will pay for itself many times. Most receiving tubes having 4, 5, 6, or 7 pin, octal, loctal, miniature 7 pin, Bantam Jr. and miniature (Raytheon) 5 pin bases can be tested for emission and hot tested for inter-element for this checker.

No switching is required to apply filament voltages to the most common filament pins for each base type. Where other filament arrangements are encountered, eight lever switches are provided for the proper connections. A series of ten lever switches connects the other elements to the proper voltages for quality test. QUALITY TEST: This is a form of dynamic emission test where the grid is placed at cathode potential while the screen is placed at a lower potential than the plate. Cathode emission as wen
 as ability of other elements to control the plate current are tested simultaneously.
SHORT TESTING: This is accomplished without resetting the lever switches by rotating the Test Switch through four positions. This method ties the tube elements into groups which are then tested against each other for shorts or leakage. The four switch positions form four different groupings of the elements, thus making it possible to short-test all tube elements.

DC VOLTMETER CIRCUIT: By shifting the small push-switch near the meter to Batt. Test, DC Volts position, the DC Voltmeter Circuit is available at four pin jacks; one for common, three for ranges. Ranges are $0-10,100,1000$ volts. DC at a sensitivity of 1000 ohms per volt. This voltmeter circuit is useful for measuring tube operating and supply voltages and the conditions of service batteries while on service calls.

Size: $14^{\prime \prime} \times 14^{\prime \prime} \times 17^{3 \prime} 4^{\prime \prime}$. Case of wood with attractive leatherette covering. Metal corner protectors and feet. Sturdy carrying handle. Weight (including cover), 13 lbs.

# GENERAL (920) DLECTRIC 

## TEST EQUPMENT

## OSCILLOSCOPE TYPE CRO-3A

This new cathode-ray oscilloscope is ideal for accurate and rapid service work. It is entirely portable and designed for general radio service. Can be used for the study of wave changes and transients, measurement of modulation adjustment of radio transmitters, the determination of peak voltages, and the tracing of electronic tube characteristics. This model is equipped with a 3AP1 cathode-ray tube which has a green screen that can be viewed in daylight. All controls are conveniently located on the front panel. Welded steel case in gray wrinkle finish. Etched aluminum front panel. Size: $8^{\prime \prime} \mathrm{x} 121 / 2^{\prime \prime} \mathrm{x} 13^{\prime \prime}$. Weight 25 lbs.

SUGGESTED PRICE $\$ 98.50$
ELECTRONIC VOLT-OHMETER TYPE PM-17
Electronic Volt. Ohmeter Type PM-17
 was developed for general service and laboratory work in the design and repair of electronic equipment. This instrument permits measurement of actual operating voltages without undue circuit loading or detining. In addition to d-c voltages, both audio and radio frequency voltages may be measured from 200 cycles to beyond 100 megacycles. Voltages not measurable with an ordinary 1000 to 20,000 ohms-pervolt meter are easily measured at true potential with the PM-17.

An ohmmeter circuit is included for convenience in measuring high and low ohmic values of resistance. Due to the self-balancing circuit and the high degree of degeneration, fluctuations in line voltage and changing of tubes has little or no effect on calibrations.

The instrument is housed in an attractive steel case of rugged construction. Easy access to the instrument is obtained by simply removing the panel screws. This unit can be carried anywhere, and will plug into any 115 -volt 60 -cycle power line.
ACCESSORIES: (SUPPLIED) Two alligator clips. Two pairs of leads and an r-f probe. CASE: Steel, $81 / 2^{\prime \prime} \times 8^{\prime \prime} \times 8^{\prime \prime}$. Sloping panel of aluminum. Instrument accessible as a unit by removing panel screws. WEIGHT: 15 lbs.

SUGGESTED PRICE $\$ 75.00$

## OSCILLOSCOPE TYPE CRO-5A

An extremely high-quality instrument, this $5^{\prime \prime}$ Oscilloscope is portable and ideal for accurate, rapid service work and for laboratory and production testing use. Designed primarily for studying voltage and current wave-forms, it may also be used to study any variable which may be translated into electrical potentials by means of associated apparatus. Sturdy construction makes it possible for this instrument to withstand jars and vibrations. Tubes have been selected to give maximum amplification. All controls are conveniently located on front panel, making it unnecessary to reach to the side or rear of the case for circuit adjustments. Gray wrinkle welded steel case. PHYSICAL SPECIFICATIONS: Height - $14^{\prime \prime}$, Width $=8^{\prime \prime}$, Depth - $19^{\prime \prime}$, Weight - 40 lbs .

SUGGESTED PRICE \$195.00

## TYPE YGS-3 SIGNAL GENERATOR

Designed to simplify and speed up FM and AM receiver analysis, this new high-quality signal generator is comprised of four basic units, which may be used independently or in logical combination. The YGS-3 consists of an RF oscillator (fundamental freguency range 10 KO to 150 MC ), an FM oscillator (center frequencies of 1,20 and 50 MO anci frequency deviations of -20, -300 and -750 KC ); a 1 MC crystal calibrator and a variable frequency audio oscillator.

This combination of units has been enclosed in a single, portable case that has been copper-plated before receiving a grey wrinkle finish, to improve shielding characteristics. The removable cover contains a compartment for storing the output cables and miscellaheous tools. Size: $17 \frac{1}{16}$ " long $\times 93 / 4 /^{\prime \prime}$ high $x 9 \frac{11^{\prime \prime}}{}$ deep, including cover. Shipping weight: 41 lbs . Operates from 115 volt, 60 cycles. Net weight: 33 lbs.

## SUGGESTED PRICE \$225.00

## HIGH VOLTAGE MULTIPLIER TYPE YYW-1

For measuring voltages up to 10,000 volts, General Electric has developed the new YYW-1 High Voltage Multiplier. When used with the type YMW-1 Unimeter, or similar 20,000 ohms per volt equipments, this multiplier gives accurate measurement. Neat in appearance, designed to give long, efficient service, the High Voltage Multiplier Type YYW-1 is ideal for general service and laboratory use.

SUGGESTED PRICE \$18.75

Emico Precision Instruments
FOR
PANELS AND TEST SETS
Electro Mechanical Instrument Co. Perkasie, Pa.

CALIBRATION-Since the instruments are calibrated in steel cases, their accuracy is not affected by panels made of magnetic materials of nominal thickness.
ZERO ADJUSTERS-This feature is standard on all models except the NF2.
GUARANTEE—All EMICO instruments are guaranteed against defective materials and workmanship for a period of one year after date of purchase, and will be repaired or replaced if sent to the factory postpaid with a $50 \phi$ handling charge.
PRICES-Prices listed are net and include all hardware and individual boxing.

## MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING \& SIGNAL PILOT LIGHT ASSEMBLIES

## DIALCO JEWELS: Complete with Turned Brass

Jewels presented here are merely representative of our general line. We manufacture the most extensive line. For additional information on other types, or special jewels, send specifications.

${ }^{1 \prime}$ Jewel with Bushing \& Mounting Nut Single $1^{\prime \prime}$ hole for mounting. .. Allows removal of lamp from front
of panel through use of panel bushing with Jewe Holder Highly of panel through use of panel bushing with Jewel Holder. . . Highly polished chrome plated brass Jewel Holder . . . Faceted or SmoothFaced Jewels. . Colors optional: Red, Green, Amber, Mlue, Opal, White and Clear Jewels . . . Frosted White Jewels can be furnished with removable colored dises, color showing only when lamp is on. 910-JHF-Jewel Holder with Panel Bushing and Mounting
 Nut, Smooth Jewel............................................................ 910-JHD-Jewel Holder with Panel Bushing and Mounting Nut, Frosted White Jewel with Removable Colored Disc .... 1.00

1'" Torpedo Jewel Screw Type Assembly - Series TS97-01 Features: Water Tight . . . I" Hole Mounting . . . Length of thread behind Jewel Holder $\frac{5}{16 \prime}$. . Furnished with washer, lockwasher, and nut . . Material: Brass or 17 S.T. Aluminum. Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, or Ebinol. Lens Colors: Red, Green, Amber, Blue, Yellow, Opa, White, Clear.
${ }^{\prime \prime}$ " Jewel Assembly' Series TS97-01.
List Price $\$ 1.00$
1" Torpedo Jewel Friction Type Assembly - Series TS97-02 This model has the same features as the TS97-01 except that it is of the Friction Type, which makes possible the removal of lamp from front of panel. . Panel bushing is available in any length from $1 / 8^{\prime \prime}$ to $2^{\prime \prime}$ depending on the thiclaness bushing is avaiable in any length from ${ }^{1 / 8 \prime \prime}$ to $2^{\prime \prime}$ depending on the thiclcness
of the panel. $\mathbf{1}^{\prime \prime}$ Jewel Assembly Series TS97-02.............. List Price $\$ 1.00$ Jewel holders can be furnished with spocial finishes other than listed. NOTE: Specify color of Jewel or Disc when ordering.
1" Screw Type Jewel Assembly - Series S97-03
This unit has the same features as Model TS07-01 illustrated above, except for the difference in the letrs which is as shown. May be had ${ }^{\text {in }}$, cither Smooth or Diamond-faced jewel. Specify when ordering $1^{\prime \prime}$ Jewel Assembly Series S97-03...........................List Price $\$ 1.00$

## 3/4" Jewel with Mounting Nuf

Used where low priced large Jewel is needed ... Single $\frac{11}{18}$ " hole for mounting . . Highly polished chrome plated brass Jewel Holder ..
 Faceted or Snooth-Faced Jewels. Colors optional: Red, Green, Amber, Blue, Opal and Clear Jewels. 25-F-Jewel Holder and Mounting Nut,
Faceted Jewel ............................List Price $\$ 0.40$ 25-S-Jewel Holder and Mounting Nut, Smooth Jewel ..............................ist Price . 40 NOTE: Specif color of Jewel when ordering.

## $1 / 2^{\text {" Jewel and Mounting Nut }}$

Low Cost-All Purpose . . . Single $\frac{7}{16}{ }^{\prime \prime}$ hole for mounting. Nickel plated brass Jewel Holder. Faceted or Smooth-Faced Jewels. Colors optional: Red,
Green, Amber, Blue, Opal and Clear Jewels.

10-F-Jewel Holder \& Mounting Nut, Faceted Jewel $\$ 0.21$ 10-S-Jewel Holder \& Mounting Nut, Smooth Jewel.. . 21 NOTE: Specify color of Jewel when ordering.

## DIALCO SOCKET ASSEMBLIES

## Have Exclusive Anchoring Feature

Units shown here are only representative of our extensive line. For additional information, send specifications. sive Dialco Anchoring Feature permanently locks the lugs, washers, socket, and bracket. The result is a rugged, immovable, shake-proof, fool-proof assembly in which the danger of a short-circuit is eliminated.
Cadmium Plating on all brackets . . . Terminal lugs of tinned brass facilitate rapid soldering . . . Assemblies also available with single ug terminal, other connection effected througb grounded bracket . . . Terminals can be supplied in any desired position firnished assure positive contact, bayonet type sockets are furnishode insulating washers fur construction . . Highest grade insulating washers fur nished with all assemblies.

## DIALCO LAMP INSTALLER For All Lamps

Made of rubber; takes all types of miniature, neon and candelabra lamps . . . Designed to expedite mass production, this device makes lamp instalation extromely simple and rapid. Especially effective in places that are hard to reach or constricted.

Manufacturers who use Dialco assemblies will receive, on request, Manufacturers who use Dialco assemblies will receive, on request,
a sufficient quantity of Dialco Lamp Installers to meet their proa sufficient quantity
duction requirements.
Dialco Lamp Installer $\mathbf{N}_{0}$ L-73 List Price $\$ 0.40$

## MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING \& SIGNAL PILOT LIGHT ASSEMBLIES

The Pilot Lights presented on this and the adjoining page are only representative of the extensive Dialco line of $1^{\prime \prime}$ and $11 / 2^{\prime \prime}$ Pilot Lights. These units are in service in every conceivable Aircraft, Marine, Electronic, Radio, Electrical and Industrial application. Should you require a special unit, we can rapidly submit suggestions and samples to meet your specific requirements.

## GENERAL DATA

SERIES "A"-11/2" Marine Cap Screw Pilot Lights.
SERIES "B"-1" Marine Cap Screw Pilot Lights.
SERIES "C"-1" Marine Cap Screw Full View Torpedo Pilot Lights. SERIES "D"-1" Marine Cap Screw "Vari-Dim" Pilot Lights.

The following general features and specifications apply to all units in the Series presented on this page:
All units are water-tight, tested under 15 lbs. pressure per square inch. The Jewel Holder Cap screws on from front of panel. All lamps are removable from front of panel. Require $7^{\prime \prime}$ panel hole for mounting.

Navy Specifications 17-P-4-CFG Moulded Bakelite Housing. - Heavy terminals for soldering or terminal screw connection. Terminals are perfectly secured-so that they do not turn or become loose regardless of the severity of the tests to which they may be subjected.

- Material: Brass or Aluminum 17 S.T.
- Finishes: Dull White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, and Olive Drab Anodized Lusterless U.S.A. Signal Corps Specifications.
- Lenses: Series "A-B-D"-Smooth- or Diamond-faced. If smooth, specify clear color, Sandblasted-on-back or Sand-blasted-over-all.
Series "C"-Torpedo lens.
- Lens Colors: Red, Green, Amber, Blue, Yellow, Opal, White, Clear.
- Lamp Specifications: See page G-8 for 9 standard lamps applicable to these series of Pilot Lights.

51901-5

71901

## HOW TO ORDER

The choice of a Pilot Light is determined partly by the type and size of bulb to be used. On page G-8 are listed 9 standard bulbs. Select your Pilot Light from any Series in conjunction with the required bulb. Note: Prices quoted do not include the bulbs. Prices will be quoted on application. We are in a position to supply any standard or special General Electric or Westinghouse Bulb for any Dialco Pilot Light which you select.

ALL DIALCO PRICES SUBJECT
to change without notice.

## MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING \& SIGNAL PILOT LIGHT ASSEMBLIES

The units presented on this page are recommended for general applications other than marine. Precision engineered and ruggedly constructed, these Pilot Lights will give dependable and lasting service.

## GENERAL DATA

SERIES "E"-1" Lock-Tite Friction Bay-onet-Lock Pilot Lights.

SERIES "F"--1" Lock-Tite Friction Bay-onet-Lock, Full-View Torpedo Pilot Lights.
SERIES "G"-1" Standard Friction Fit Pilot Lights.

SERIES "H"-1" Standard Friction Fit FullView Torpedo Pilot Lights.

SERIES "R"-1" Standard Friction Fit Pilot Light, Porcelain Base.

SERIES "E"

41901

The following general features and specifications apply to all units in the Series presented on this page:

All "Lock-Tite" units are designed for service on vibrating panels. The positive "friction-lock" construction of the jewel holder prevents impairment of the unit even when subjected to severe vibration.
The "Friction Fit" units are designed for installation in which the vibration factor is of minor importance. The "friction-fit" Jewel Holder is inserted firmly and securely, assuring efficient, dependable service of the assembly.
All lamps are removable from front of panel. A $\boldsymbol{j}^{\prime \prime}$ panel hole is required for mounting.
Navy Specifeations: 17-P-5 FBG Bakelite Housing.
17-P-4 CFG Moulded Bakelite Housing.

- Heavy terminals for soldering or terminal screw connection. Terminals are perfectly secured - so that they do not turn or become loose regardless of perfectly secured - so that they do not turn or become
- Dialco anchoring feaures of the lamp housing permanently seals the position of the bayonet shell so that the lamp is easily removed from front of panel.
- Material: Brass or Aluminum S.T.
- Finishes: Dull White Nickel. Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, and Olive Drab Anodized Lusterless U.S.A. Signal Corps Specifications.
- Lenses: Series ' $E$ "', " G ", ' $R$ ": - Smooth or Diamond-faced. If smooth, specify clear color. Sandblasted-on-back or Sandblasted-over-all.
Series "F", "H": - Torpedo lens.
- Lens Colors: Red, Green, Amber, Blue, Yellow, Opal, White, Clear.
- LAMP SPECIFICATIONS: See page G-8.

UNDERWRITERS' LABORATORIES LISTED Pilot Light Assemblies and Warning \& Signal Lights are a major feature of the extensive Dialco line.

When ordering, please be sure to give the following information in regard to the Jewel: Color, whether SmoothFaced or Faceted; if Smooth-faced, whether Clear, Sandblasted-onback, or Sandblastedoverall. Also specify type of Socket and Lamp. See page G-8 for lamp chart and price list.

## SERIES PLN PILOT LIGHT ASSEMBLIES . . . designed for Ne-51 NEON LAMP . . . Features BUILT-IN RESISTOR for 110 and 220 VOLT CIRCUITS. Has these design features:

In the PLN-849 series Dialco introduces an important advance in the functional design of indicator light assemblies. These new pilot lights are the product of intensive development work and the cooperation of a number of leading manufacturers, In one compact unit are combined these features:

1. Integral housing of the resistor necessary for operating the NE-51 lamp. (See sketch at left for detail.)
2. The safety afforded by heavy molded bakelite socket and adequate elecrtical clearances.
3. Rugged construction to match the shock and vibration resistance of the neon lamp.
4. Full view jewel plastic cap giving wide angle visibility and brilliant color.
5. Simple one hole mounting, easy wiring to screw or solder terminals.

## SPECIFIC DATA: MODELS 951308-851308 INCLUSIVE

No. 951308-A compact, versatile unit fitted with a Jewel Plastic Cap which may be had in a choice of 5 colors: Red, Amber, Opal, White, and Clear. Jewel Cap is male-threaded and is readily unscrewed from front of panel, facilitating replacement of bulb. Terminals may be screw type, or permanent soldering type. Specify terminals desired when ordering.
*No. 911308 -This unit is the same as the above except that the Plastic Jewel Cap is longer. This unit is recommended for installations where space behind the panel is limited; also where greater visibility of the light is desired.
No. 811308-Has metal Jewel Head with screw-type (male threaded) collar. Fitted with $1 / 2$ " smooth or faceted lens. If smooth, the lens may be had in clear color, sand-blasted-on-back, or sandblasted over-all. Recommended for frontal "on-off" signal indication.
**No. 881308-This unit is the same as the above, except that the Jewel Head is longer. This unit is recommended where a more forward on-off signal is desired; also where space behind the panel is limited.
No. 871308 -This unit is the same as the No. 811308 shown above, except that the collar of the Jewel Head is of the push-in snap-fit type. When snapped into position, Jewel Head and body of assembly form one vibration-proof friction-tight unit.
No. 821308-This unit features a Jewel Head assembly $\frac{13{ }^{\prime \prime}}{16}$ in diameter with $1 / 2^{\prime \prime}$ lens. The collar of the Jewel Head is female-threaded, easily unscrews from front of panel, facilitating replacement of bulb. The lens may be smooth or faceted; if smooth, it may be clear color, sandblasted-on-back, or sandblasted over-all.

No. 851308-This unit features a $\frac{73}{16}$ " Jewel Head with $3 / 4$ " lens. The collar of the Jewel Head is female-threaded. Lens may be smooth or faceted; if smooth, it may be clear color, sandblasted-on-back, or sandblasted over-all. This unit is recommended where a large lens is desired on a unit mounting into an $\frac{111^{\prime \prime}}{18}$ panel hole.
TERMINALS: In all cases be sure to specify Binding Screw Type, or Soldering Type Terminals.

| Model No. | A | B | List Price |

## MANUFACTURERS OF THE MOST EXTENSIVE LINE OF WARNING \& SIGNAL PILOT LIGHT ASSEMBLIES

## GENERAL CHARACTERISTICS applying to ALL UNITS IN THIS SERIES

- LAMPS: Removable from front of panel. (All Dialco assemblies can be supplied complete with lamps.)
- MATERIAL: Body is machined of Brass or Aluminum and may be plated with any one of these finishes: White Nickel, Black Nickel, Satin Chrome, Polished Chrome, Anodized, Ebinol, Black Alumalite on Aluminum.
- SOCKET: Moulded bakelite housing.
- LENSES: Plastic or glass. Smooth or faceted. If smooth, specify clear color, sandblasted-on-back, or sandblasted overall.
- FLAT LENSES may be had with or without Etched Numbers, Letter or Words.
- LENS COLORS: Red, Amber, Yellow, Opal, White, Clear. Also Green, Blue and Yellow for use with incandescent lamps.
- MOUNTING: All units mount in $\frac{11 \text { " }}{16}$ hole on panels of any standard thickness. Mounting hardware (lock washers, space washer, and nut) supplied.
- TERMINALS: Binding Screw Type, or permanent soldering type. Plated or unplated brass. Specify type when ordering. .. All terminals are permanently secured and cannot turn or loosen under severe stress or vibration.

## SPECIFIC DATA: MODELS 12408-20138

No. 12408-A "Vari-Dim" unit containing a built-in Mechanical Shutter. A $60^{\circ}$ turn to the right reduces the light from a full glow to a complete blackout. Collar of head is female-threaded, readily unscrews from body of assembly. Terminals may be either screw type or permanent soldering type.
No. 201308-Another "Vari-Dim" unit. Similar in function to the units shown above. In this case, however, the head of the unit has a male-threaded collar and a flat lens. This type lens may be had with or without etched Numbers, Letters, or Words.

## SPECIFY COMPLETE or SEMI-BLACKOUT

## "LIGHT-SHIELD" PILOT LIGHT ASSEMBLIES

The following units are designed on the "light-shield" prin-ciple-to direct a beam of light within a rotation of 360 degrees. A turn of the knurled head directs the light on to any localized spot, at any desired angle. Housing and shield are made of brass. The head is a friction fit to the body permitting full rotation. It is secured by a snap lock and will not loosen under vibration but is easily removed. Units with different sizes of openings in the shields are provided as follows:
No. $21408-$ Has opening $1 / 2^{\prime \prime}$ wide $\times 1 /{ }^{\prime \prime}$ long; provides maximum illumination.
No. 89408 -Has opening $\frac{3}{16 \prime}{ }^{\prime \prime}$ wide $\mathrm{x} \frac{9}{\frac{9}{6}^{\prime \prime}}$ long.
No. 90408 -Has opening $1 / 2^{\prime \prime}$ wide $\mathrm{x} \frac{3^{\prime \prime}}{1^{6}}$ long.
No. 22408-Has opening $1 / 2^{\prime \prime}$ wide $\mathrm{x} \frac{3}{3^{\prime}}{ }^{\prime \prime}$ long.
PLUS LAMPS: DIALCO PILOT LIGHTS will serve you best if they are equipped with correct lamps. For your convenience we carry large stocks of genuine General Electric Neon Glow and Miniature Incandescent Lamps of all voltages. Prompt delivery can be made in large or small quantities.
All Units Shown Herein Are Also Available Without Resistors This series of Pilot Lights may be ordered without resistors for use on low voltage circuits with the following T-31/4 Incandescent Lamps: 44, 47, 313, 1488, 1815 and all other available voltages. The model numbers of the resistor-less units end with 10 instead of 08. For example:

No. 951308 , with resistor No. 951310 , without resistor

## MANUFACTURERS OF THE MOST EXTENSIVE LINE

 OF WARNING \& SIGNAL PILOT LIGHT ASSEMBLIES
## THREE-QUARTER INCH PILOT LIGHT ASSEMBLIES - Series 525-625-725

## Exclusive Anchoring Feature

All units shown on this page are absolutely fool-proof and "short-proof," thanks to the anchoring feature. Lugs, washers, bracket, and socket are permanently locked together, making a shake-proof, foolproof unit.

- Fills need for a low priced large jewel pilot light assembly.
- Requires single $\frac{11 \text { " }}{16}$ hole for mounting.
- Available with Candelabra 110V, Miniature Bayonet and Miniature screw base sockets.
- Faceted or Smooth Faced Jewels.
- Jewel Colors: Red, Green, Amber, Blue, Opal and Clear.
Note: Specify Color of Jewel When Ordering.

## ONE INCH OPEN TYPE PILOT LIGHT ASSEMBLY-Series 910

## Have Exclusive Anchoring Feature

A low priced unit for most applications . . . Requires single one inch hole for mounting . . . Embossed rib in center of bracket gives added rigidity and strength; assures perfect alignment . . Uses standard Mazda lamps, removable from front of panel through use of Panel Bushing with Jewel holder . . Jewel holder of highly polished chrome plated brass . . . Available with Candelabra 110 Volt, Miniature Bayonet or Miniature screw base sockets . . . Faceted or Smooth Faced Jewels . . . Colors optional, Red, Green, Amber, Blue, Opal, White, and Clear Jewels . . Frosted White Jewels can be furnished with removable colored discs color showing only when lamp is on.

[^9]
Every year, the life-rack tests thousands of General Electric Lamps: lights them and burns them continuously until they go out. The lamp life, light output, and wattage consumed are all carefully checked. And that's just another step General Electric takes to produce the long life and efficiency you get in G-E Miniature Lamps.
Many other tests and inspections are used.

Each makes sure the lamps you sell will give the best possible service at low cost. For radio dial lights and similar uses, consider these profit-points of G-E Minature Lamps:

1. Dependable, trouble-free performance.
2. High level of maintained light output.
3. Low current consumption.
4. Profitable to handle.
5. Greater dealer acceptance.
FOR INFORMATION on prices and types of G-E Miniature Lamps, see your nearby G-E Lamp Office. Or write to General Electric Company, Division 166, Nela Park, Cleveland 12, Ohio.

## G-E LAMPS

GENERAL ELSCTRIC

WORLD'S LARGEST EXCLUSIVE MANUFACTURER

# JEWEL LIGHT ASSEMBLIES 

1/2" Polarized Pilot Light

## No. 80 TYPE

PATENT NO. 2220516 Net Wt. 0.080 lb .

The patented No. 80 incorporates the use of polarized discs to regulate light intensity. A partial turn of the jewel dims the light. Supplied with three fibre washers which compensate for different panel thicknesses.

| Type <br> Number | Style <br> Socket | Length <br> $A$ to $B$ | Panel <br> Thickness | List <br> Price |

NOTE: Dimension $A$ to $B$ is over-all length from front of panel.

## SPECIFICATIONS

LAMPS REQUIRED: Miniature T $3^{1 / 1 / 4}$ tubular, 6-8 V. or other $T 3^{1 / 1 / 4}$ lamps of same over-all length. - Lamp removable from front of panel. - Mounts in $11 / 16^{\prime \prime}$ hole. HEWEL: diamond cut (faceted); Amber, Blue, Crystal, Green, Ruby, White (Milk White) and Yellow - SPECIAL FINISHES: Chrome, Black Nickel, Statuary Bronze. - PACKED in individual boxes for jobbing trade; in bulk and fully assembled for manufacturing trade. SPECIAL JEWELS: SP-Smooth, plain; SFA-Smooth, frosted all over; SFB-Smooth, frosted on back. - List price SFA and SFB, 2c each extra.

## 3/4" Jewel . . Horizontal Mounting No. 60 TYPE

This patented
itern is similar
to the No. 50 , lewel in a slip-fit‘ with three fibre with three inbre washers which campensater panelthickness. Its sturdy construction, ease of mountting, and small size makeit an ideal assembly. When used with a neon glow lamp, a transparent jewel is supplied.

PATENT NO. 2220516

## NELA SPECIALTY DIVISION LAMP DEPARTMENT

## G.E 

THE unique characteristics of General Electric Neon Glow Lamps recommend them for a variety of uses in radio and electronic devices . . . as indicators, voltage regulators, pilot lights and test lamps.

1. Distinctive orange-red glow-no colored coverglass needed.
2. Dependable performance and long life-rated at 3,000 bours.
3. Very low current consumption-less than $1 / 2$ milliampere for smallest lamp.
4. Variety of sizes and wattages.
5. High resistance to vibration, shock.
6. Normally usable on a-c or d-c.
7. Screw base lamps with internal resistors; bayonet base lamps available without internal resistors.
8. Produce practically no beat.
9. Nearly flat volt-ampere cbaracteristics.
10. Lamp life not seriously effected by voltage variations.

NE-2

NE-57

NE-45 NE-58

Screw Base Lamps
Required series resistor mounted within base. See values marked "IN"* in column "Series Resistance." Lamps may be applied to higher circuit voltages by use of suitable external applied to
resistors.

Bayonet Base Lamps
External means must be provided to limit current to normal amount. External resistors, to be supplied by user, should be of the values marked "EX" in column "Series Resistance" for rated volts.

#### Abstract

Gothard Indicator Light Assemblies were for many years made by the Gothard Manufacturing Co. of Springfield, Illinois, who established $a$ reputation for sound engineering design, excellent material and workmanship, a well rounded line, and fair aggressive merchandising. With its purchase by Johnson, continuance and improvement on these factors at every possible point are assured. This listing includes most of the standard units in greatest demand, but many other types are readily available. Inquiries are solicited for any not shown. Special assemblies can be furnished in production quantities.

## *COLORED DISCS

Where this designation appears, a colored plastic disc is placed behind a clear sandblasted (frosted) smooth jewel, to conceal color until lit. Also prevents external light from giving appearance of bulb being lit.
In addition, lettering, numerals, or insignia may be printed on a plastic disc back of the jewel, and arranged to be invisible either continuously or only after lamp is lit.
Bulbs used on all pilot lights may be identified from these illustrations, but are not included in prices.

Min. Min. or Screwr Cand Bay. T $41 / 2$ Cand.

## 4 AG VACUUM "LITTELFUSES"

Ultra-high-speed action. For protection of extremely delicate instruments, television, X-ray, bolometer circuits, cathode ray equipment, galvanometers, delicate thermocouples, mieroammeters, milliammeters. These fuses break at much higher voltage than non-vacuum type. Also for electrical circuits with low current, high voltage (up to 1000 V DC or 3000 V AC with power supplies of less than 500 watts). Std. Pkg. 100 -wt. 1 lb.

## 3 AB "LITTELFUSES"-250 Volis

Smallest, highest rated Underwriters' Laboratory approved fuses made. Bakelite-enclosed, arc-quenching, powder-filled fuses. Medium time lag
voltage rating must appear on the fuse caps of approved-fuses. Many new fields are opened up by the extension of approval from 3 to 6 amps., where formerly bulky cartridges or plug applies specially to electrical appliances, heavy duty power supplies, amplifiers, radios, communication equipment, electronic devices, motors, etc.

## Ratings thru $1 / 4$ Ampere- 250 Volts

"Slo-Blo" fuses with high time lag-for circuits with equipment having high inductive or capacitative surges, heavy starting currents and intermittent-duty circuits. Anti-fatigue con-struction-compound element with spring and resistor.

## Ratings $1 / 2$ thru 3 Amp. $\mathbf{- 2 5 0}$ Volts

Quick-acting Standard Littelfuses with low time lag. Protectivecoated elements prevent oxidation, promote clean fusion break. Diagonal element for accurate alignment, calibration.

Ratings 4 thru 8 Amp. 250 Volts Standard, quick-acting Littelfuses with diagonal elements. Low time lag-quick-acting.

Std. Pkg. 100 -wt., $11 / 2$ Ibs.

4 AG Aircraft Fuse showing reinforced twisted elemant

## AIRCRAFT LITTELFUSES-ANTI-VIBRATION TYPE

Especially designed for Aircraft Service. Characteristics: High Mechanical StrengthResistance to Fatigue-Long Vibration Life

CONSTRUCTION: Glass-enclosed. Littelfuse Locked Cap Assembly (no cements) prevents loosening of caps. Hiements mechanically depolarized by twisting age. $0^{\circ}$ (see illustrations) are braced against extreme vibration. "Gooseneck"' non-crystallizing fuse element takes up expansion and contraction. Ratinge element takes up expansion and contraction. Ratings 5 amps. wire The $4 A G$ and 5 AG sizes are supplied for Aircraft Services for their strength and greater carrying capacity than 3 AG fuses.

BAKELITE-ENCLOSED: 4 AB and 5 AB fuses recom ${ }^{-1}$ mended where severe overloads might shatter glass.

CURRENT RATING: Rated to NEC specifications
to carry $10 \%$ overload indefinitely, to blow on $35 \%$ overload within 1 hr., and $100 \%$ overload within min.

VOLTAGE RATING: Voltage at which fuses wil
break without arcing over, or bursting under short break without arcing over, or bursting under short circuit conditions.

VIBRATION FACTOR: Minimum hours these fuses endure our Magnetic Vibrator operating 120 cycles a econd, while carrying the rated current. Acceleration is 10 times the worst field conditions.

## 

LITTLEFUSE BERYLLIUM COPPER AND PHOSPHOR BRONZE FUSE CLIPS

Littelfuse fuse clips are available in three standard styles: "X," with "ears" or fuse stops; "XX," earless; and "XXX," "LugClips," a new Littelfuse clip having a lug or solder terminal made as an integral part of the clip. All styles are furnished in either Phosphor-Bronze or Beryllium Copper.

## BRAOLEY

## SELENIUM RECTIFIERS

Bradley selenium rectifiers give good efficiency and stability for medium voltage power applications at D.C. ratings up to 24 volts and at current ratings up to 5 amperes per plate. Ratings are for continuous operation in naturally circulating air at $35^{\circ} \mathrm{C}$. ambient.

The current density of Bradley selenium rectifiers is conservatively listed at 0.333 amperes per square inch of plate. For power applications, square plate designs allow a maximum ratio of rating to space factor.

In high voltage electronics uses they are rated up to 37 volts peak inverse per plate. Current ratings as low as 500 microamperes are available. Special designs can be supplied for high frequency applications at even lower current ratings.

Bradley engineers will gladly assist you in any rectification problem involving instruments, electrenic devices or power applications. Let them specify the proper selenium rectifier for your circuit, or design and produce a special unit for you.

- Above.ModelSe-11U20-F9. Fullwave rectifier rated at 110 volts A.C., 80 volts D.C., and 1.15 amperes D.C.

## COPPER OXIDE RECTIFIERS

"Coprox" rectifiers by Bradley feature gold-coated positive contact pellets to combat aging. Specially designed terminals and presoldering of lead wires prevent overheating during assembly.

High leakage resistance, low forward resistance make for eff. cient operation. To insure perfect sealing, standard units are sealed with waterproof lacquer and criti. cal application units are potted in wax.
All ratings of Bradley rectifiers are conservative. Highly adaptable mountings provide a wide variety of installations that will stand up longer in service.

Let Bradley's application experience help you solve circuit design problems. Bradley engineers are leaders in the development and production of special rectifiers for special jobs.

- Above, A Coprox Model CX. lC2B1, a center tap, full-wave rectifier. Completely enclosed in Bakelite, low capacitance. Rectifies high frequency current. Conservatively rated up to 4.5 volts A.C., 3.0 volts D.C., 500 microamperes D.C.
- Above, B Conrox Model CX. 2 E 4 F 2 , a full-wave rectifier rated up to 4.5 volts A.C., 3.0 volts D.C., 5 milliamperes D.C.

Bradley's Luxtron photocells efficiently convert light into electric energy sufficient to operate meters and meter relays without costly amplifiers. Lightweight, rugged and true to rating, they give long life under the most strenuous operating conditions.

Luxtron photocells are, so far as we have been able to determine, the very finest on the market although priced with inferior grades.

Shapes of Luxtron photocells vary from circles to squares, with every in-between shape desired. In size they range from the diminutive to the largest sizes required.

For precision control of light into electric energy, specify Luxtron photocells. Write Bradley today for samples and engineering assistance on any photocell problem you have in mind.

- Above, the pigtail contact model shown here is only one of a series of standard mountings. Others include housed models with plug-in contacts, tube socket and nut-andbolt types.

Over ninety per cent of all rectifier requirements are served by 12 types -4 basic

## Made on Aluminum

When preparing details for circuits that require rectifiers of minimum weight and size plus continuous, trouble-free service... write SELETRON into your specifications right at the start!

These advanced-type selenium rectifiers (built on aluminum) are specially engineered for long life span, minimum weight; compactness, and maximum heatdissipating value. No load is too big or too small for Seletron. Seven standard sizes of discs provide outputs ranging from milliamperes to thousands of amperes. Arrangement of discs in an infinite number of series and parallel
 combinations makes possible stacks to meet your individual needs.

There are no fragile or moving parts in Seletron rectifiers, assuring less trouble in production and less trouble-shooting in the field. Write NOW for Seletron application data sheet! Seletron literature is free for the asking as are also recommendations of Seletron applications.

## ELECTROX RECTIFIERS

Full and Half Wave Low-Capaciły Copper Oxide Rectifiers For Instruments, Test Sets, and Similar Applications

## TYPE A-3/16" Square Disks - DC Output = 5 Milliamperes

Type A-4, Cat. No. 5020-A full wave rectifier unit with

TYPE A. 4
CAT. ND. 5020 four $3 / 16^{\prime \prime}$ square copper oxide rectifying elements contained in metal housing and provided with four 3 -inch insulated leads. Continuous service output of 5 MA at a maximum of 3 volts DC. Maximum AC input 4 volts.
Type AA-4, Cat. No. 5064-A full wave rectifier unit with four $1 / 8^{\prime \prime}$ diameter copper oxide rectifying elements contained in bakelite housing and provided with four 4 -inch bare leads. Continuous service output of 1 MA at a maximum of 1 volt DC. Maximum AC input 1.5 volts.

## TYPE B-7/16' Round Disks = DC Output = 20 Milliamperes

Type B-1, Cat. No. 5048-A half wave rectifier unit

TYPE B-Z
CAT. NO. 5047
CAT. NO. 5049

Type B-4, Cat. No. 5016-A full wave rectifier unit with four $7 / 16^{\prime \prime}$ diameter copper oxide rectifying elements provided with five 3 -inch insulated leads. Continuous service output of 20 MA at a maximum of 3 volts DC. Maximum AC input 4 volts. with single $7 / 16^{\prime \prime}$ diameter copper oxide rectifying clement contained in bakelite housing and provided with two 3 -inch insulated leads. Continuous service output of $13 \mathrm{MA}, \mathrm{DC}$, and 3 volts AC in the reverse or high resistance direction.
Type B-2, Cat. No. 5047-A half wave rectifier unit with two $7 / 16^{\prime \prime}$ diameter copper oxide rectifying elements contained in a bakelite housing and provided with three 3 -inch insulated leads. Continuous service output of $13 \mathrm{MA}, \mathrm{DC}$. Maximum AC input 4 volts.

Type B-2, Cat. No. 5049-A half wave rectifier unit with two $7 / 16^{\prime \prime}$ diameter copper oxide rectifying elements contained in a bakelite housing and provided with three 3 -inch insulated leads. Continuous service output of $13 \mathrm{MA}, \mathrm{DC}$, and 3 volts AC per disc in the reverse or high resistance direction.

## TYPE C-3/4' Round Disks - DC Output = 50 Milliamperes

Type C-1, Cat. No. 5011-A half wave rectifier unit with single $3 / 4^{\prime \prime}$ diameter copper oxide rectifying element provided with two terminal lugs. Continuous service output of $32 \mathrm{MA}, \mathrm{DC}$ and 3 volts AC in the reverse or high resistance direction.

Type C-2, Cat. No. 5057-A half wave rectifier unit with two $3 / 4^{\prime \prime}$ diameter copper oxide rectifying
elements provided with three terminal lugs. Continuous service to supply an output of $32 \mathrm{MA}, \mathrm{DC}$ and 3 volts AC per disc in the reverse or high resistance direction.
Type C-2, Cat. No. 5010-Two half wave rectifier units, each with single $3 / 4^{\prime \prime}$ diameter copper oxide rectifying element, mounted on one bolt, and insulated from one another. Two terminal lugs provided for each section. Each unit rated to supply an output of 32 MA, DC, with maximum of 3 volts AC in the reverse or high resistance direction.
Type C-4, Cat. No. 5014-A full wave rectifier unit with four $3 / 4^{\prime \prime}$ diameter copper oxide rectifying elements provided with five terminal lugs. Continuous service output of 64 MA at a maximum of 3 volts DC. Maximum AC input 4.1 volts.
Type C-4, Cat. No. 5017-A full wave rectifier unit exactly the same as Cat. No. 5014, with the exception that 3 -inch insulated leads are supplied for connecting the rectifier units.

## SCA Selenium Instrument Rectifiers <br> SCA Selenium Power Rectifiers SCA Selenium Self-Generating Photo Cells

## RADIO-PHONOGRAPH REPLACEMENT CELLS

For restoring original life and brilliant tone to radio-phonograph sets. The high efficiency and wide frequency range of these Selenium Cells make them ideal replacement units for photo-electric radio-phonograph sets. Now available in quantity for immediate installation.

## R-100-W

Self-generating photo cell has output of 600 micro amperes at 100 ft . candles. Characteristics permanent and unit withstands severe conditions of use.
Ask for 12-page booklet on Photo Cells.

## SCA SELCOCHARGER

Use the Selcocharger as an "A" eliminator. Maximum AC input 18 volts, single phase. DC output 12 volts, 4.5 amperes DC into a resistive or inductive load.

## SCA SELCOPAC

Use the Selcopack as a "B" eliminator. Rating 80 to 90 volts, $0.240 \mathrm{am}-$ peres DC into a resistive or inductive load. AC input 110 volts, single phase.

## SCA INSTRUMENT RECTIFIERS

IHS-F
Half wave type rec* tifier assembled in plastic case with mounting extensions. Maximum AC input 25 volts, maximum DC current output . 008 amperes.

Half wave rectifier. Input 100 volts RMS. Output . 005 amperes. Assembled in plastic case with mounting extensions.

## IN-2-F

maty
Input 50 volts AC. Half wave. Continüus DC . 0 ôil amperes. Üseù witin meters, detector circuits, bias voltage.

## IN-25-F

Input 250 volts AC. Half wave. Continuous DC . 001 amperes. Suitable for high frequency applications.

## 100 Amp. 6 to 12 volts DC FULL WAVE BRIDGE

Permanent characteristics and adaptability to all types of circuits and loads. High efficiency per unit weight.

ICS-F
Consists of two center tapped type $S$ rectifying elements. Maximum AC volts 25. DC .008 amperes. Rectifying elements assembled in plastic case. 2 inch long flexible leads soldered to terminals are supplied with unit.

## S-214

Half wave hermetically sealed rectifier. Input 1000 volts RMS. DC output 350 volts. Dimensions $1 \frac{25}{32} \mathrm{x}$ $\frac{9}{16}$.

## S-213

Half wave hermetically sealed rectifier 4000 volts RMS input. DC output 1400 volts. .005 amperes maximum. Measures $4 \frac{25}{32} \times \frac{9}{16}$.

## IDS-F

Consists of two rectifying elements type $S$ connected in series, assembled in plastic case. AC volts 25. DC . 005 amperes. amperes. Pigtail mounting.

## IBS-F

Input 25 volts AC. Full wave bridge. Continuous DC .010 amperes. Unbreakable nlastie case with mounting extensions.

Half wave rectifier. Input 150 volts AC. Maximum input current . 001

WRITE FOR COMPLETE LITERATURE ON SCA SELENIUM RECTIFIERS
From 10 Micro Amperes to 10,000 Amperes

The Radia Amatew's Handloak

Text, data book, operating manual - it is all these and more. As a text it is probably more used in radio schools and colleges than any other single volume. As a practical constructional handbook, it stands in a class alone. As an operating manual, it provides information available from no comparable source. It is the All-Purpose Volume on Radio.

Standard Edition
The latest edition of THE RADIO AMATEUR'S HANDBOOK is postwar in content, containing 688 pages of the kind of information which has made the HANDBOOK world-famous. To maintain the high standard of practical usefulness set by previous editions, a new treatment of the constructional sections of the HANDBOOK has been accomplished. The theory and design sections cover every subject encountered in practical radio communication. Completely sectionalized by topics with abundant cross-referencing, and fully indexed. The HANDBOOK continues to be the world's most valuable and widely-used radio book.
\$1.25 In Continental U. S. A.
\$2.00 Elsewhere

Special Defense Edition
This edition of the HANDBOOK is designed especially for use in radio training courses. It eliminates those portions of the regular edition which are not useful for instruction purposes and has added chapters on mathematics, measuring equipment and code instruction. The first chapter covers the elementary mathematics necessary for the solution of all formulas and interpretation of graphs appearing throughout the text. A four-place log table is included in the Appendix. \$1.00 Postpaid Anywhere

A Course in Radia Fundamentals
The objective in preparing this course was to accent those principles most frequently applied in actual radio communication. "A Course In Radio Fundamentals" is a study guide, examination book and laboratory manual. Its text is based on the "Radio Amateur's Handbook". Either the special edition prepared during the war for training purposes or the Standard Edition may be used. References contained in the "Course" are in both editions. As a text, this book greatly smooths the way for the student of the technicalities of radio. It contains interesting study assignments, experiments and examination questions for either class or individual instruction. It describes in detail 40 experiments with simple apparatus giving a complete practical knowledge of radio theory and design.

Learning the Radiatelegraph Cade
This booklet is designed to train students to handle code skillfully and with precision. Employing a novel system of code-learning based on the accepted method of sound conception, it is particularly excellent for the student who does not have the continuous help of an experienced operator or access to a code machine. It is similarly helpful home-study material for members of code classes. Adequate practice material is included for classwork as well as for home-study. There are also helpful data on high-speed operation, typewriter copy, general operating information -- and an entire chapter on tone sources for code practice, including the description of a complete code instruction table with practice oscillator.

The A.R.R. L. Anterna Boak
A comprehensive manual of antenna design and construction. Sixteen chapters, profusely illustrated. Both the theory and the practice of all types of antennas used by the amateur, from simple doubtlets to multi-element rotaries, including long wires, rhomboids, vees, phased systems, u.h.f. systems, etc. Feed systems and their adjustment. Construction of masts, lines and rotating mechanisms. The most comprehensive and reliable information ever published on the subject.

How To Become A Radia Amateur
Universally recognized as the standard elementary guide for the prospective amateur. Features equipment which is simple in construction. The apparatus is of a thoroughly practical type capable of giving long and satisfactory service - while at the same time it can be built at a minimum of expense. The design is such that a high degree of flexibility is secured, making the various units fit into the more elaborate station layouts which inevitably result as the amateur progresses. Complete operating instructions and references to sources of detailed information on licensing procedure are given.

Price 25c
The Radia Amateur's License Manual
To obtain an amateur operator's license you must pass a government examination. The License Manual tells how to do that - tells what you must do and how to do it. It makes a simple and comparatively easy task of what otherwise might seem difficult. In addition to a large amount of general information, it contains questions and answers such as are asked in the government examinations. If you know the answers to the questions in this book, you can pass the examination without trouble.

Price 25c
Hints \& Kinks
Amateurs are noted for their ingenuity in overcoming by clever means the minor and major obstacles they meet in their pursuit of their chosen hobby. An amateur must be resourceful and a good tinkerer. He must be able to make a small amount of money do a great deal for him. He must frequently be able to utilize the contents of the junk box rather than buy new equipment. Hints and Kinks is a compilation of hundreds of good ideas which amateurs have found helpful. It will return its cost many times in money savings - and it will save hours of time. Price $\mathbf{5 0 c}$

Radia Type A
Price $\$ 1.00$
This calculator is useful for the problems involving frequency, wavelength, inductance, capacity, etc. It has two scales for physical dimensions of coils from one-half inch to five and one-half inches in diameter and from one-quarter to ten inches in length; a frequency scale from 400 kilocycles through 150 megacycles; a wavelength scale from two to 600 meters; a capacity scale from 3 to 1,000 micro-microfarads; two inductance scales with a range of from one microhenry through 1,500 ; a turns-per-inch scale to cover enameled or singler silk covered wire from 12 to 35 gauge, double silk or cotton covered from 0 to 36 and double cotton covered from 2 to 36 . Using these scales in the simple manner outlined in the instructions on the back of the calculator, it is possible to solve problems involving frequency in kilocycles, wavelength in meters, inductance in microhenrys and capacity in microfarads. Gives the direct reading answers for these problems with accuracy well within the tolerances of practical construction.

With this concentrated collection of scales, calculations may be made involving voltage, current, and resistance, and can be made with a single setting of a dial. The power or voltage or current or resistance in any circuit can be found easily if any two are known. This is a newly-designed Type B Calculator which is more accurate and simpler to use than the justly-famous original model. It will be found useful for many calculations which must be made frequently but which are often confusing if done by ordinary methods. All answers will be accurate within the tolerances of commercial equipment.

AMERICAN RADIO RELAY LEAGUE, INC., West Hartford, Conn., U.S.A.

## Radia's Outstanding practical text

## FULLY-REVISED, LATEST EDITIOD

Radio's outstanding practical text. How-to-build-it descriptions of dozens of tested-and-tried types of transmitting, receiving, and test equipment. Supplemented by basic electrical and radio theory in the simplest possible language for those without mathematical or technical training.

Illustrated with hundreds of diagrams and large photographs showing details of construction. Has the most complete tube tables to be found in any book.

New edition contains expanded u.h.f. sections, more test equipment which can be home-built, and mathematics for solving the simpler radio problems.

the ideal text for the practical radioman<br>durably clothbound, gold-stamped

of leading publishers $>$ EncGraw-Hill, Wiley, Editors and

## ELEMENTARY THEORY

## FUNDAMENTALS OF RADIO

## by F. E. Terman

A first book and also a good refresher for all radio students and workers. This text has been widely used in civilian and military classes. Requires no knowledge of complex mathematics.

The Fundamental Components of a Radio System, Circuit Elements. Resonant Circuits and Circuit Analysis. Fundamental Properties of Vacuum Tubes. Vacuum Tube Amplifiers. Power Amplifiers. Vac-uum-Tube Oscillators. Modulation. Vac-uum-Tube Detectors. Sources of Power for Operating Vacuum Tubes Radio Transmitters. Radio Receivers. Propagation of Radio Waves Receivers. Propagation of Navigation. Television. Acoutics.
Book No. TF10 458 pages $\$ 4.00^{*}$

## PRINCIPLES OF RADIO by Keith Henney

A basic course in radio which may readily be comprehended by highschool or trade-school students and may be used in independent home study. Well illustrated.

Fundamentals. Direct-Current Circuits. Electrical Meters and Measurements. Production of Current. Magnetism and Electromagnetism. Inductance. Capacitance. Properties of Alternating-Current Circuits. Resonance. Properties of Coils and Condensers. Vacuum Tubes. The Tube as an Amplifier. Rectifiers and Power Supply Apparatus. Audio Amplifiers. Detection. Receiver Systems. Oscillators. Transmitters. Antennas and Electromagnetic Radiation. Frequency Modulation. Ultra-High Frequency Phenomena. Electronic Instruments.
Book No. HP20 534 pages \$3.75*

## INTRODUCTION TO MICROWAVES

## by Simon Ramo

This book is unique in that it is a simple introduction to microwaves written in clear English and avoiding the use of mathematics altogether.
Book No. RMiO 138 pages $\$ 2.00^{*}$

## BASIC ELECTRICITY FOR COMMUNICATIONS

## by W. H. Timbie

A student wishing a sound grounding in electrical fundamentals before undertaking the study of communications, and the communications student or worker requiring a reference book or refresher course in electricity will find Timbie admirably suited to the need. The few mathematical applications, which never go beyond simple algebra, are completely explained in this book. A summary follows each chapter, and well chosen problems are offered to test the student's learning
and to give practice in applying electrical principles.
Book No. TB20 603 pages $\$ 3.75$ *

## UNDERSTANDING RADIO

by H. M. Watson, H. E. Weleh, and G. S. Eby

A high-school type textbook and laboratory manual for either resident or home study. This book is distinguished by its picture layouts and step-by-step instructions.
Book No. WU1O 601 pages \$2.80*

## ENGINEERING ELECTRONICS

by D. G. Fink
Using clear language and the absolute minimum of elementary mathematics, this book covers atomic and electronic theory, vacuum- and gaseous-tube circuit operation, photocells, cathode ray tubes, x-rays, television tubes, the electron microscope, electronic production of light, tube circuits for power, communication, and industrial control applications, and electronic measurements.
Book No. FE10 358 pages $\$ 4.00^{*}$

## ELECTRICAL FUNDAMENTALS

of Communication by A. L. Albert Contains the electrical theories under. lying electronic circuits and devices and their operation. Although this book goes into some mathematical treatments of the subject, it is extremely well written and is highly explanatory.
Book No. AFIO $\quad 554$ pages $\$ 4.00^{*}$

## PRINCIPLES OF ELECTRONICS

by R. G. Kloeffler
A short non-mathematical course in electronics written for engineering students but easily grasped by other readers as well.
The Electron. The Atom. Electricity. Gaseous Conduction. Electron Emission. Two-Electrode Tube. The Three-Electrode Tube. Multi-Electrode Tubes. Rectifying Devices. Some Physical Theories. Photoelectric Devices. Electronic Applications and Circuits.
Book No. KP2O 175 pages $\$ 2.75^{*}$

## PRINCIPLES OF RADIO COMMUNICATION

## by J. H. Morecroft

This is a standard reference book, foremost among the older texts in the field, covering the basic phenomena underlying radio. It is a good book for the discerning student of interme-
diate radio and it contains much material of historic importance.
Book No. MP20 1084 pages $\$ 8.50 *$

## ELECTRICAL COMMUNICATION

## by A. L. Albert

In this well-known basic textbook, the author offers both mathematical and non-mathematical explanations of telegraph, telephone, and radio systems. Only about ten percent of the book is devoted to actual radio systems, concentration being on wire communications.
Book No. AC20 $\quad 534$ pages $\$ 5.50^{*}$

## SHORT WAVE WIRELESS COM-

 MUNICATIONby A. W. Lardner and C. R. Stoner Devoted entirely to short-wave technique, this book covers the development and theory of high-frequency transmission and reception and describes the technical apparatus oemmonly employed. Written from the British viewpoint.
Book No. LC20 573 pages
\$6.50*
ELECTRICAL ESSENTIALS OF RADIO by M. Slurzberg and W. Osterheld
This book gives the ground work in electricity necessary for a sound understanding of radio, yet it does not resort to higher mathematics. The reader requires only a knowledge of arithmetic. Other mathematical aids are taken up, but they are clarified for the reader. Methods are given for solution of practical problems.
Book No. SE10 529 pages \$4.50*
RADIO: FUNDAMENTAL PRINCIPLES AND PRACTICE by F. E. Almstead, K. E. Davis, and G. K. Stone
An "intermediate radio" textbook, designed to bridge the gap between the elementary and advanced phases of radio study.
Book No. APIO 219 pages \$1.80*

## RADIO MATERIEL GUIDE

by F. E. Almstead and F. R. L. Tuthill Book No. AG10 242 pages $\$ 2.20^{*}$

## ADVANCED THEORY

## RADIO ENGINEERING

by F. E. Temman
A foundation engineering textbook for all radio libraries. Thoroughly revised.

The Elements of a System of Radio

Communication. Circuit Constants. Properties of Resonant Circuits. Fundamental Properties of Vacuum Tubes. Vacuum. tube Amplifiers. Power Amplifiers. Vac-uum-tube Oscillators. Modulation. Vac-uum-tube Detectors. Sources of Power for

Operating Vacuum Tubes. Radio Trans. mitters. Radio Receivers. Propagation of Waves. Antennas. Radio Aids to Navigation. Television. Sound and Sound Equipment.
Book No. TE10 813 pages \$6.00*

$$
\text { *Outside U. S. A., add } 10 \% \text { for packing and postage. All prices are subject to change witbout notice, and are in U. S. dollars. }
$$

These books (and catalog pages) are distributed to the radio parts trade by Editors and Engineers, Ltd., Santa Barbara, Cailf.

## APPLIED ELECTRONICS

by M. I. T. Electrical Engineering Staff
A mathematical treatment of electronic theory with special emphasis on applications to communications circuits. This book is very complete and will be invaluable to the advanced student or practicing engineer.

Electron Ballistics. Electron Emission from Metals. Electrical Conduction from Metals. Electrical Vaponduction through acuum, Gases, and apors. HighVacuum Electron Tubes. Gas Tubes. Sin-gle-Phase Rectifier Circuits. Polyphase kectiners. Vacuum cuit Elements. Class A Single-Stage Amplifiers. Cascade Amplifiers; Class A Amplifiers with Operation Extending beyond the Linear Range of the Tube Characteristic Curves; Class AB, Class B, and Class C Amplifiers. Vacuum-Tube Oscillators. Modulation and Demodulation, or Detection.
Book No. ME2O 772 pages \$6.50*

## COMMUNICATION ENGINEERING by W. L. Everitt

This book analyzes mathematically radio and telephone engineering problems. It is an outstanding collegegrade text which requires a mastery of calculus and associated mathematics.
Book No. EClO
727 pages
\$5.50*

## ELECTRONICS

by J. Millman and S. Seely
An engineering presentation of the subject, from first principles to con-
trol circuits. The student using this book must have a knowledge of calculus and college physics.
Book No. ME10 721 pages
\$5.50*

## ELECTRONICS FOR ENGINEERS

by John Markus and Vincent Zeluff This unique book condenses much invaluable electronic engineering data into graphs. charts, tables, and concise articles. In this way, it short-cuts the looking up of information. The tool value of this book is tremendous. Book No. MEII 390 pages $\$ 6.00^{*}$

## FUNDAMENTALS OF ENGINEERING ELECTRONICS <br> by W. G. Dow

A college-grade textbook recommended to the engineering student or to the practicing engineer, sometime out of school, who wishes to acquire this subject. The author approaches the subject from the mathematical angle.
Book No. DF20
604 pages $\$ 5.50^{*}$

## HIGH-FREQUENCY ALTERNATING

 CURRENTSby Knox Mcllwain and J. G. Brainerd This book presents a mathernatical analysis of high-frequency a. c. circuits and of vacuum tubes. It is suitable for use by senior college students in physics or electrical engineering and by graduate students.
Book No. MH2O 530 pages

## RADIO RECEIVER DESIGN

## by K. R. Sturley

This is an English-authored book of interest to communications engineers. Part 1 covers in detail the stage-bystage design aspects of the receiver section between antenna and detector. Book No. SD20 $\quad 435$ pages $\$ 5.00$ *

## THE TECHNIQUE OF RADIO DESIGN

## by E. F. Zepler

This book explains the practical application of design theory to conventional radio and electronic circuits. While a knowledge of complex algebra is presupposed, the author derives various formulae for the benefit of the reader and demonstrates their application to actual circuit design.
Book No. ZT20 312 pages \$4.00*

## PRINCIPLES OF RADIO ENGINEERING <br> by R. S. Glasgow

A basic work on vacuum-tube and communication circuit engineering. In order to derive the maximum gain from a study of this book, a good foundation in college mathematics and physics is required.
Book No. GP10 520 pages $\$ 4.50$ *

## COMMUNICATION NETWORKS

by E. A. Guillemin
Vol. 1 Book GN20 425 pages
Vol. 2 Book GN21 587 pages
$\$ 5.50 *$
$\$ 8.00^{*}$

## ELECTRON TUBES AND INDUSTRIAL ELECTRONICS

ELECTRON TUBES IN INDUSTRY

## by Keith Henney

This book, rich in industrial applications and explanatory theory, was written expressly for the industrial engineer and technician. It reviews electrical, tube, and circuit theory and describes numerous electronic devices which have been tried and proven in various electrical and non-electrical industries.
Book No. HT1O 539 pages \$5.50*

## ELECTRONICS IN INDUSTRY

by G. M. Chute
A non-technical treatment of the subject for the industrial technician or executive. Electron-tube applications in numerous industries are described. Concise, meaty explanations are augmented by well-chosen diagrams.
Book No. CE10 403 pages $\$ 5.00^{*}$

## THEORY AND APPLICATION OF ELECTRON TUBES

by H. J. Reich
The fundamentals of electron tubes and tube circuits. This well-known text has been revised and includes such modern topics as pulse generation. An excellent book for the communications man who wants to be well informed on tubes.
Book No. RT1O 670 pages $\$ 5.50^{*}$
PRINCIPLES OF ELECTRON TUBES by H. J. Reich
An abridgement of the same author's Theory and Application of Electron Tubes. Suited for use by those stu-
dents who do not require the concentrated detail of Book No. RT10.
Book No. RP10 398 pages $\$ 4.00^{*}$

## THEORY OF THERMIONIC VACUUM

 TUBESby E. L. Chaffee
A complete work on diode, triode, tetrode, and pentode vacuum tubes and their operation in radio circuits, this book has long been a classic in the field.
Book No. CT10 652 pages $\$ 6.50^{*}$

## INDUSTRIAL ELECTRONIC CONTROL

## by W. D. Cockrell

Industrial electronics explained especially for the electrical worker who must install and maintain electronic equipment in factories, offices, and homes. The electrician, factory or office executive, and salesman may gain a quick understanding of basic electronic principles and of related equipment from a study of this book.
Book No. CC10 247 pages $\$ 2.75^{*}$.

## FUNDAMENTALS OF VACUUM TUBES

by A. V. Eastman
A technical work on high-vacuum, mercury-vapor, and photoelectric type tubes. Contains mathematical theory of tube action in detector, amplifier, oscillator, and control circuits. Groundwork is required in basic college mathematics and physics in order to use this book profitably.
Book No. EF10 584 pages \$5.00*

PHOTOCELLS and THEIR APPLICATIONS
by V. K. Zworykin and E. D. Wilson This book will be invaluable to all persons who work with photocells or expect to. The style is lucid, and numerous industrial and scientific applications of the electric eye are described.
Book No. ZP2O 348 pages $\$ 3.50$ *
THE PHYSICS OF ELECTRON TUBES by L. R. Koller
A complete explanation of actual vacuum tube operation. In this book, the author concentrates almost entirely upon tubes themselves, rather than upon the associated circuits. This is an excellent book for those who desire a complete understanding of tube structure and mechanics.
Book No. KP10 234 pages \$3.25*

## GRAPHICAL CONSTRUCTIONS For Vacuum Tube Circuits

by Albert Preisman
This book explains the use of graphical methods to obtain design values for electron tube circuits. Abundant charts and reference data are included.
Book No. PC10 237 pages \$3.00*

## ELECTRON OPTICS and The Electron Microscope <br> by Zworykin, Morton, Ramberg, Hil- <br> lier, and Vance

Book No. 2020766 pages $\$ 10.00 *$
$\rightarrow$ Oweshde U. S. A., add $10 \%$ for paching arnd postage. All prices are subject to cbange without motice, and are in U. S. dollars.
These bookg (and catalog pages) are distributed to the radio Darts trade by Editors and Fingineers, Ltd., Santa Barbara, Caslf.

THEORY OF GASEOUS CONDUCTION AND ELECTRONICS
by F. A. Maxfield and R. R. Benedict Book No. MTIO 483 pages $\$ 5,00^{*}$

ELECTRONIC CONTROL in Resistance Welding
by G. M. Chute
Book No. CC11 389 pages
$\$ 4.50^{*}$

## PRIMER OF ELECTRONICS <br> by D. P. Caverly

Book No. CP10 235 pages $\$ 2.25^{*}$

## RADIO MATHEMATICS

MATHEMATICS FOR ELECTRICIANS AND RADIOMEN by N. M. Cooke
This book presents all of the mathematics needed for a clear understanding of a. c., d. c., and high-frequency circuits and of electron tube operation. The text material covers the entire subject from simple arithmetic to logarithms, trigonometry, and vectors. It is an excellent book for the radioman who wishes to prepare himself for a more rigorous mathematical course. A wealth of illustrative examples and problems demonstrate applications of mathematical processes
and reasoning to radio circuit investigation.
Book No. CM10 604 pages \$4.50*
APPLIED MATHEMATICS Far Radio and Communication Engineers
by C. E. Smith
An accelerated and easy-reading, yet thorough, course in mathematics. Ideal for home study.

Arithmetic. Logarithms. Algebra. Gemetry, Trigonometry. Vector Addition. Complex Quantities. Curves and Graphs. Simultaneous Equations. Quadratic Equations. Hyperbolic Trigonometry, etc.
Book No. SM1O 336 pages $\$ 3.50^{*}$

## ULTRA-HIGH <br> FREQUENCIES

HYPER AND ULTRA-HIGH FREQUENCY ENGINEERING
by R. I. Sarbacher and W. A. Edson A rigorous senior college mathematical text, covering subjects of interest to the $u$. h.f. engineer.
Book No. SH2O 644 pages
\$6.00*

## FIELDS AND WAVES in Modern Radio

by Simon Ramo and J. R. Whinnery An advanced engineering text dealing with the mathematical analysis of circuits, circuit elements, waves, and propagation in the microwave spectrum.
Book No. RF20 503 pages $\$ 5.50^{*}$
TRANSMISSION LINES, ANTENNAS, AND WAVE GUIDES
by King, Mimno, and Wing
A physical analysis of u. h. f. operation and antennas, transmission lines of conventional types, and wave guides. The physics of wave propagation is explained. While the authors have explained complex microwave systems in relatively simple language it is recommended that the reader of
this book have a good working knowledge of trigonometry and vector algebra.
Book No. KL10 347 pages $\$ 3.50^{*}$

## MICROWAVE TRANSMISSION

by J. C. Slater
A mathematical discussion of transmission lines and wave guides. The use of Maxwell's equations in transmission line design is described.
Book No. SM11 309 pages $\$ 4.00^{*}$

## COMMUNICATION CIRCUITS

by L. A. Ware and H. R. Reed
A college-grade mathematical text covering transmission lines, networks, filters, and wave guides. Recommended only for the advanced microwave student.
Book No. WC2O $\quad 330$ pages $\$ 3.75^{*}$
ELECTROMAGNETIC ENGINEERING by R. W. P. King
A mathematical treatise on electromagnetism and its relation to ultra-high-frequency phenomena and apparatus.
Book No. KE10 580 pages $\$ 6.00^{*}$
this new edition. May be mastered by the average high school or trade school student.
Book No. NClO 92 J pages $\$ 6.50^{*}$
HOW TO PASS Radio License Examinations
by C. E. Drew
A well illustrated and long-used question and answer manual for the coaching of candidates for the commercial radiotelegraph and radiotelephone operator license examinations.
Book No. DH2O 320 pages
\$3.25*

## RADIO DIRECTION FINDERS

by D. S. Bond
Theory and application of direction finders and radio compass for fixed and mobile installations.
Book No. BF1O 299 pages
\$3.50*

## PRINCIPLES OF AERONAUTICAL. RADIO ENGINEERING

by P. C. Sandretto
This book will be useful to both radio and aeronautical men. Concerned with aircraft radio installations, it contains sufficient "common ground" material to serve both groups effectively and to give each an insight into the other's problems and requirements.
Book No. SPII 414 pages
\$4.00*

## RADIO NAVIGATION FOR PILOTS

 by C. H. MelntoshRadio range navigation and direction finding technique. This book is written from the aircraft pilot's point of view.
Book No. MN10 171 pages \$2.75*

## RADIO SERVICING

PRINCIPLES AND PRACTICE of Rodio Servicing

## by H. J. Hicks

Explains operating principles of radio circuits and service test equipment, and outlines methodes of shooting trouble in radio receivers and making repairs. A good book for the radio man anticipating entry into his own repair business.
Book No. HS10 391 pages $\$ 4.00^{*}$

## RADIO SERVICE TRADE KINKS

by L. S. Simon
A practical trouble-shooter's manual dealing with household and car radios. Common receiyer troubles are diagnosed and their remedies given. No lengthy technical discussions. A good "bench book" for the busy radio shop. Book No. SK10 254 pages $\$ 3.50^{*}$

This book gives 20 lessons on sending and receiving radio code signals and messages. It contains selected practice material for use with code practice sets (construction of which is described) and gives a resume of rules and regulations governing radio operators.
Book No. NC11 174 pages $\$ 2.75$ *

## RADIO OPERATING QUESTIONS AND ANSWERS

by A. R. Nilson and J. L. Hornung A practical study guide of the ques-
tion-and-answer type useful for preparing for any of the radiotelegraph, radiotelephone, or amateur operator license examinations.
Book No. NQ10 415 pages
$\$ 3.50$ *

## PRACTICAL RADIO COMMUNICA-

 TIONby A. R. Nilson and J. L. Hornung A complete radio manual covering subjects of interest particularly to the commercial radio operator. Topics include basic electricity; transmitters, receivers, and associated apparatus; and operating instructions. FM and ultra-high frequencies are included in

[^10]
## FM AND TELEVISION

PRINCIPLES OF TELEVISION ENGINEERING
by D. G. Fink
A practical explanation of television receivers and transmitters. This book describes standard systems in simple language.
Book No. FT10
541 pages $\$ 5.50^{*}$

## TELEVISION

by V. K. Zworykin and G. A. Morton A complete treatise on electron optics and television transmission and reception, interspersed with occasional
mathematics including calculus.
Book No. ZT21 646 pages $\$ 7.00^{*}$

## FREQUENCY MODULATION

 by August HundA textbook of FM engineering. Compares amplitude, phase, and frequency modulation and covers FM transmitters, receivers, and antennas.
Book No. HM10 375 pages $\$ 4.50^{*}$

TELEVISION STANDARDS AND PRACTICE
by D. G. Fink
Book No. FS10 405 pages $\$ 5.50^{*}$

ELECTRON OPTICS in Television by I. G. Maloff and D. W. Epstein Book No. MOIO 299 pages $\$ 4.00^{*}$

## HANDBOOKS

RADIO ENGINEERING HANDBOOK

## by Keith Henney and Others

 An extensive reference book prepared by 28 specialists. Contains abundant explanatory material, diagrams, formulas, and tables in each branch of the radio field.Mathematical and electrical tables. Electric and Magnetic Circuits. Resistance. Inductance. Capacitance. Combined L, L , and $R$ Circuits. Measurements. Vacuum Tubes. Oscillators. Modulators. Detection A. F. and R. F. Amplifiers. Receving Systems. Power Supplies. High Frequencies. Code Transmission and Reception. Aircraft Radio. Antennas. Television. Fac simile. Broadcasting. Loud speakers and Acous
Book No. HH1O 945 pages \$6.00*

## RADIO ENGINEER'S HANDBOOK

 by F. E. TermanThe wealth of technical data contained in this handbook make it indispensable as a complete reference work on radio and electronics. Charts, tables, circuit diagrams, and concise text material simplify the solution of complex, as well as simple problems.

Tables. Mathematical Relations, and Units. Circuit Elements. Circuit Theory. Vacuum Tubes and Electronics. Vacuum Tube Amplifiers. Oscillators. Modulation and Demodulation. Power Supply Systems. Radio Transmitters and Receivers. Propagation of Radio Waves. Antennas. Radio Aids to Navigation. Measurements.
Book No. TH10 1019 pages $\$ 7.00^{*}$
STANDARD HANDBOOK FOR ELEC TRICAL ENGINEERS
by A. E. Knowlton and a staff of specialists
This 2303 -page volume is the leading reference work for electrical engineers. Prepared by a staff of over 100 specialists, it contains 26 sections covering every phase of electrical engineering from units and conversion factors to electrophysics.
Book No. KH $10 \quad 2303$ pages
$\$ 9.00^{*}$

## RADIO HANDBOOK

by W. W. Smith and Others This well-known manual, prepared by a staff of internationally-recognized specialists, supplies all of the the-
oretical and practical information required by the radio student and amateur station operator. The new revised edition covers such up-to-date topics as pulse-time modulation, klystrons, wave guides and cavities, butterfly circuits, and radar. This book is the amateur operator's bible.
Book No. RH $\quad 704$ pages $\$ 2.00^{*}$

## ELECTRICAL ENGINEER'S HANDBOOK

(Communications E Electronics Volume) by Harold Pender and Staff
This is a complete and well organized collection of engineering and mathematical data for communications and electronic engineers. Numerous tables, charts, circuits, and illustrations.

Mathematics, Units and Symbols. Properties of Materials. Electric Circuits, Lines, and Fields. Resistors, Inductors, Capacitors. Electron Tubes. Electrome. chanical-Acoustical Devices. Circuit Elements. High-Frequency Transmission. Acoustics. Electrical Measurements. Telegraphy. Sound-Reproduction Systems. Telephony. Facsimile Transmission and Reception. Television, etc.
Book No. PH2O 1022 pages $\$ 6.00^{*}$

## ELECTRONICS DICTIONARY

 by N. M. Cooke and John Markus
*Outside U. S. A., add $10 \%$ for packing and postage. All prices are subject to change without notice, and are in U. S. dollars. These books (and catalos pages) are distributed to the radio parts trade by Fditors and Eingineers, Itd., Santa Barbara, Calif.

# SHOWS EXACTLY HOW TO REPAIR OVER 4800 RADIO RECEEVER MODELS 

## Ghirardi's "Radio Troubleshoofer's Handbook"

Over 400 pages in Ghirardi's big manual-size RADIO TROUBLESHOOTER'S HANDBOOK contain specific common Trouble Symptoms, their catuses and remedies for practically every radio receiver in use today. This feature alone means that it enables modern service shops to eliminate useless testing, save time all along the line, and double their output of work! Not a "study" book. You simply refer to it when you need specific help on a specific problem. Goes right to work for you the minute you get it!

In addition, there are hundreds of other pages of essential service data including i-f alignment peaks for over 20,000 superhets; a big data section on i-f transformer troubles; the most up-to-the-minute tube chart you've ever seen; dozens of tips on tube substitutions; auto radio data; plug-in and ballast resistor replacement charts; condenser charts; coil, transformer, and wire data-and a wealth of other material to save you time and help you make more money.

## A. A. GHIRARDI - the man who makes Radio work easy to learn.

7.4 pages TAcnual Size (81/2" $\times 11^{\prime \prime}$ )

Get both Modern Radio Servicing and the Troubleshooter's liandbook-over 2030 pages of essential servicing dataat our special combination yrice of only $\$ 9.50$ for the two.

## CAPACITOR QUESTIONS

 ELECTROLYTIC CAPACITOR by Alexander M. Georgiev

## Answered!

Don't buy, specify, use, or replace Capacitors blindfolded! Save time, save money, and increase your service efficiency by really knowing all about this vital subject. Actually, no Radio-Electronic component is more important or less understood than the Electrolytic Capacitor. Modern equipment now being produced employs more Capacinow being produced employs more capacitypes with which you will want to be fully types with which you will want to be fully
familiar. This new book by Alexander M. Georgiev, a leader in capacitor research, M. Qeorgiev, a leader in capacitor research,
at last explains the entire subject -where, at last explains the entire subject-where,
wiien and how to use the ditterent types; whitn and how to use the ditferent types;
replacement and emergency repairs; operareplacement and emergency repairs; opera-
tion at low and high voltages and frequention at low and high voltages and frequen-
cies-and dozens of other essential features. cies-and dozens of other essential features.
Contains over 200 pages and 80 illustraContains over 200 pans. Price only $\$ 3$.

A COMPLETE RADIO-ELECTRONIC SERVICING EDUCATION

## Ghirardi's "Modern Radio Servicing"

Once in a blue moon a technical book is written that is so important, so complete, and so easy to understand that it is used almost universully by members of a profession-and Ghirardi's MODERN RADJO SERVICING is that kind of a book!
It is the only single, inexpensive book giving a complete course in modern Radio repair work in all its branches. Written so simply you can understand it without an instructor. Read from the beginning, it takes you step by step through all phases of the work. Used as a reference book by busy servicemen, it serves as a beautifully cross-indexed volume for "brushing up" on any type of work that may puzzle you.
Included is a thorough explanation of Test Instruments, how they should be used and why-and even how to build your own; Receiver Tronbleshooting Procedure and Circuit Analysis; Testing \& Repair of Components; Installations; Adjustments, etc., etc.-also How to Start a Successful Radio-Electronic Service Business. 1300 pages; 706 helpful illustrations, only $\$ 5$ ( $\$ 5.50$ foreign).

## 

Richard Hubbell's Timely Book on Radio's Latest and Greatest Development

Television is coming-and coming fast-BUT what kind of programs is it going to have? How will they be prepared and handled? What are the technical difficulties involved, and how can these be overcome? How culties involved, and how can these be overcome? How and where can and greatest development steps into fullRadio's latest and
fiedged growth?

TELEVISION PROGRAMMING \& PRODUCTION, an authoritative new book by Richard Hubbell, an '"old
timer", at the game, gives you the answers! Not only does it acquaint you fully with the most advanced techniques, but also discusses technical problems and their relation to program handling, and provides many chapters of additional material invaluable to all who want to participate in this important phase of Television work. Over 50 illustrations with lengthy explanatory captions provide a unique visual review of production and telecasting processes. Contains 208 pages. Only $\$ 3$.

The equivalent of 36 Racliaboaks

## Ghiracdis famous

 RADIO PHYSICS courseThe world's greatest collection of radio knowledge gathered together in one huge 972 -page inexpensive volume. A complete radio course so head-and-shoulders above anything in the field that it is used as the basic text by thousands of students and schools in 82 different countries.

Ghirardi gives you everything you want to know-the most simple, complete and comprehensive book published on the fundamentals of radio, electricity and sound. Everything is explained clearly, and is easy to understand for quick study and reference.

## AUTO-RADIO GADGET

Spots 444 special auto-radio "troubles" in all pos sible trouble-sources for 11 common symptoms: 1. "'Hum'; 2. "Weat"; 3. "Noisy" when both car and engine are at rest; 4. "Noisy" when car is at rest with engine 1dilng; 5 . "Noisy" when car is driven normally: 6. "Noisy" when car is coasting with ignition off; 7. 'No Reception'; 8. "Intermittent Research"'; 9. "Fading"; 10. "Distor- HOW RADIO GREW

RADIO'S CONQUEST OF SPACE by
Donald McNicol
and the who helped it grow
No story of scientific progress is more enthralling than this one. None has ever been told in more fascinating style than 'O'S CONOTEST RADTO'S CONQUEST OF SPACE. It is the story of men-amateurs, tinkers and scientists the who wrenched from the Universe one of its greatest secrets. In short, it is a book written in terms of the individuals many of whom are still living - who pieced the gigantic Radio jigsaw puzzle together. You'll thoroughly enjoy reading it-and you'll find that it contains a wealth of knowledge that is invaluable to all radio men and experimenters. Donald MeNicol, the author, is widely known as past president of the Institute of Radio Engineers.

347 pages: profusely illustrated.

# RIDER MANUALS 

# MAKE SERVICING EASY 

Greatest collection of servicing data ever assembled. You can't anticipate the year, make and model of the next set coming to your bench. You must have the complete servicing information only Rider Manuals give: Data on alignment, I-F
peaks, operating voltages, parts lists and parts values, voltage ratings of condensers, wattage ratings of resistors, coil resistance data, gain data, and all other information vital for speedy, accurate trouble-shooting.

VOL. XY. This newest Rider Manual contains servicing data on postwar receivers. "Clarified schematic" breakdowns on all multi-wave band sets. Special "How It Works" book supplement on theory of new circuits. Over 120 manufacturers. BIGGEST and BEST manual ever produced.

2000 pages, 181 -page book supplement, Net Price $\$ 18.00$
YOL. XIV. Contains servicing data on the receivers among the last produced in April, 1942. Every effort was made in compiling these data to bring them up to date for all manufacturers.

1,376 pages, Net Price $\$ 15.00$
VOL. XIII. Contains servicing data on receivers manufactured during the latter part of 1941 and early 1942. Cumulative index for Volumes XI، XII, and XIII. 1,672 pages, Net Price $\$ 15.00$
VOL. XII. Covers receivers manufactured up to April 1941 . . . . . Clarified schematics give breakdowns of complicated r-f and a-f switching circuits.
$\mathbf{1 , 6 4 8}$ pages, Net Price $\mathbf{\$ 1 5 . 0 0}$
VOL. XI. Covers receivers manufactured up to June 1940. Includes vest pocket manual containing push-button frequency ranges of all automatically tuned receivers and other handy servicing data.

1,652 pages, Net Price $\$ 15.00$
VOL. X. Complete information on receivers manufactured up to August, 1939. 1.664 pages, Net Price $\$ 15.00$

VOL. IX. Contains installation and servicing instructions on 1889 models manufactured up to October, 1938.
1.672 pages, Net Price $\$ 15.00$

VOL. VIll. Receivers manufactured up to October, 1937 will be found in this volume. Contains installation and servicing instructions on many types of intercommunication systems.

1,650 pages, Net Price $\$ \mathbf{1 5 . 0 0}$
VOL. VII. In this volume will be found sets manufactured up to October, 1936, together with data on older receivers hitherto unavailable.
1.600 pages, Net Price $\$ 15.00$

VOL. VI. In this volume will be found sets manufactured up to November, 1935. Data on more than 950 models.

1,240 pages, Net Price $\$ 11.00$

## ABRIDGED MANUAL

Volumes i-v

The servicing information you need to service the old receivers will be found in the Abridged Manual. Volumes I-V. It is a compilation of the most widely distributed receivers released after 1929 that formerly appeared in Volumes I-V.

In order to select the proper receivers for inclusion in the Abridged Manual, all the manufacturers who were responsible for the sale of the greatest number of sets between 1930 and 1935 were contacted and information was obtained as to the most widely distributed receivers. The Abridged Manual was then compiled.
2,000 pages..........Net Price $\mathbf{\$ 1 7 . 5 0}$ Individual Vols. I-V out of print.

RIDER'S MANUALS HAVE more schematics . . . more I.F. peaks . . . more alignment data . . . more circuit descriptions . . . MORE EVERYTHING THAN ANY OTHER MANUALS.

## RADAR: What It Is-Easy-to-grasp Explanation for only \$1

by JOHN F. RIDER<br>Lt. Colonel, Signal Corps (Retired) and G. C. BAXTER ROWE<br>Formerly Senior Editor, War Dept.,<br>Signal Service af Large

No tangling with technicalities! It's easy to understand what radar is and how it works, when Rider and Rowe unravel this knotty subject.
It's fascinating to discover what radar did toward victory. You feel the thrill a radar operator knows in a night interceptor, within radar range of a target. You learn how our Navy sank ships it never saw, how Doolittle's men surprised Tokyo. You learn how our flyers pulled their historical feint on the Germans

before dawn on D-Day. You'll now understand how radar reached the moon, how guided missiles are tracked.

Cartoon sketches, diagrams and pho-tos-sometimes three illustrations to a page-help make the story clear. Rider and Rowe describe different types of gear used by ground, sea, and air forces, and the different uses made of each.

Now it can be told! And now you can have these great war secrets for only $\$ 1.00$ !

## CHAPTER HEADINGS

Underlying Principles of Radar . . . The Basic Radar Set . . . Antennas and Indicators . . . How Ground Troops Used Radar . . How Radar is Used at Sea . . How the Air Forces Used Radar . . Radar IFF (Identification of Friend or Foe) and Countermeasures . . . Future of Radar.
72 Pages........ $81 / 2^{\prime \prime} \mathrm{x} 11^{\prime \prime}$...
.Flexible Cover........ $\$ 1.00$

## FREQUENCY MODULATION . . . A "must" for every serviceman with an eye to the future!

Frequency modulation introduces new ideas on reception of broadcast signals. Here is a simple, straightforward explanation, comparing the system with amplitude modulation.

Transmission and reception of $\mathrm{f}-\mathrm{m}$ signals are explained without involved mathematics. Special stress is laid on the different types of f-m receivers, their adjustment and maintenance. You get a graphic picture of what happens at the transmitter and the advantages and limitations of frequency modulation.

Everything has been included-test hookups, oscillograms, notations, instructions of all kinds-to help you do a real job! The text is liberally illustrated with drawings, circuit diagrams, and sample oscillograms.

## SERVICING BY SIGNAL TRACING

Signal Tracing is destined to become the universully adopted method of locating defects in communication systems, no matter what the nature of the system-if it is a home broadcast receiver, autoradio receiver, police receiver, commercial, marine, navy or army receiver. Every public address system, every ecntralized radio ssytem comes within the capabilities of signal tracing. ... Television receivers, facsimile receivers and other ssytems intended for special application can be serviced with equal ease. ... Sirnal Tracing, founded upon the signal itself, is the most basic, most fundamental method of trouble shooting ever devised. . . . It is free of every limitation which in the past has hindered speedy service operations.
You can't afford to be without this book. ... We mean every word of this statement. ... It is vital to your immediate welfare-to your future. . . . Get your copy today-Now!

CONTENTS
Chapter I-Introduction ot Signal Tracig. Chapter II-Amplifier Operation and The Signal. Chapter Hil-Diode Detector Tube Systems. Chapter IV-Multi-Element Detecotr Systems. ChapterVOscillator Tube Systems. Chanter V1-Mixer Tube Systems. Chapter VII-Conrtol Circuits and Voltages. Chapter VIII-Coupling Devices. Chapter IX-The T-R-F Receiver. Chapter X-The Superheterodyne Receiver, Chaptr XI-Television and Facsimile Receivers. Chapter XII-Public Address Systems. Chapter XIII-Localizing Defects by Signal Tracing. Chapter XIV-Signal Tracing in Receiver Design. 360 Pages........... 188 Illustrations. . . . . . . . . $\$ 4.00$ Spanish Edition. . . . . . . . . . . . . $\$ 4.00$

## CONTENTS

Frequency Modulation: Introduction; $\mathrm{f}-\mathrm{m}$ and $\mathrm{a}-\mathrm{m}$ compared. What Happens at the Transmitter: how f-m is broadcast; phase modulation. What Happens in the Receiver: How f-m signals pass thru receiver, are affected by limiter and discriminator tubes. Transmission of F-M Signals: How uhf waves are used and the area covered. F-M Receiving Antennas: Best types. Servicing F-M Receivers: Instructions for adjusting and maintenance; oscillograms.
136 Pages. . . . . . . . Profusely Illustrated
. $\$ 2.00$

## VACUUM TUBE VOLTMETERS

The vacuum-tube voltmeter has been rapidly forging to the front as a favorite tool of engineers, research workers and servicemen. By its proper use, dynamic measurements can be made under any and all conditions with a minimum of effort and time. Here is a book that is a perfect mine of information for everybody who wants to know all about these important instruments. Not only is the theory explained upon which the functioning of the different types of $v$-t voltmeters is based, but the practical applications of these instruments are completely described. Like nearly all types of voltmeters, multipliers and shunts are employed with vacuum-tube voltmeters to extend their ranges. These and their uses are explained, as is the calibration
 of the different types.

For those men who are interested in the construction of v-t volt meters, adequate information will be found for $v$ - $t$ voltmeters were meters, adequate information will be found for v-t voltmeters were
built in the author's laboratory, and constants are given for the components of many types, as well as a wealth of other useful data. CONTENTS
Chapter I. Fundamentals of Vacuum-Tube Voltmeter. Chapter II. Diode Vacuum-Tube Voltmeters. Chapter 111. Triode Vacuum-Tube Voltmeters. Chapter IV. Slide-Back Vacuum-Tube Voltmeters. Chap ter V. Rectifier-Amplifier Vacuum-Tube Voltmeters. Chapter VI. Tuned Vacuum-Tube Voltmeters. Chapter VII. Audio-Frequency and Logarithmic Vacuum-Tube Voltmeters. Chapter Vill. Vacuum-Tube Voltmeters for D-C Voltage, Current, and Resistance Measurements. Chapter IX. Design and Construction of Vacuum-Tube Voltmeters. Chapter X. Calibration and Testing of V-T Voltmeters. Chapter XI. Apllications of V-T Voltmeters. Bibliography.
180 Pages
.111 Illustrations
$\$ 2.50$

# Turn Rider's Know-How to Yaur Profit! 

## INSIDE THE VACUUM TUBE

No other book explains so simply and clearly the theory of the vacuum tube and its operation. In plain language-with fascinating pictures and diagrams that really tell a story-you get a solid grounding in theory and a good working knowledge of basic tube types.

The slight use of mathematics is "painless," says QST. Easily understood are the development and meaning of characteristic curves, and their associated load lines, power amplifiers, use of pentodes as triodes, etc. The final chapter describes the "acorn" type tube, cathode-ray tubes, photo-electric cells, gas-filled tubes, etc.

## CONTENTS

Introducing the Electron . . . Electron Emission . . . Movement of Charges ... Space Charge and Plate Current . . . Fundamentals of Tube Characteristics . . . The Diode . . The Triode . . . Static Characteristics of Triodes . . . Triode Dynamic Characteristics and Load Lines : . . Dynamic Transfer Characteristics ... Voltage Amplification... Tetrode and Pentode Vacuum Tubes ... The Cathode Circuit ... Power Amplifiers ... Miscellaneous Vacuum Tubes.
424 PAGES-Profusely Illustrated

## AUTOMATIC RECORD CHANGERS AND RECORDERS With Manufacturers' Service Data and Stroboscope Disc for Checking Turntable Speed

Gears, levers, cams-the mechanics needed to service any automatic record changer quickly and profitably are explained here. Service problems of specific makes are treated in 654 pages of manufacturers' service data.

A plan of analysis is outlined that will apply to any type of changer. The small electric motor is covered at length; recorders and phonographs are also described. Rider Manual Size . . . $81 / 2^{\prime \prime}$ x $11^{\prime \prime}$. 744 Pages
$\$ 9.00$

## THE METER AT WORK

Here is a practical book for
 all who employ electric meters in radio and the allied electronic arts.
It is only through knowledge of the principles underlying the functioning of any piece of apparatus that a man can get the utmost from it. To that end, it will be found that the subject matter of this book is treated from an entirely new angle, the theory upon which each meter is based is separate and distinct from any other type and complete in itself. Inasmuch as some types of meters can do several jobs, the practical aspects of the meter are confined to the latter portion of the book. Thus, you can cover whichever phase of the subject you are interested in, and with the new construction of the book-the separation of text and illustrations-you will be able to obtain the information quickly and with the minimum of effort.

1-General Considerations. CONTENTS Moving-Iron Meters. 111 -Moving-Coil Meters. IV-Electrodynamometer Meters. V-The Electrostatic Meter. VI-Thermal Meters. Vil-Components of Meters. Vill-characteristics of Meters. VX—Components of Thermocouples. X—Practical Applications of Meters.

## UNDERSTANDING MICROWAVES

## Ey Victor J. Young, Senior Project Engineer, Sperry Gyroscope Company

Foundation for understanding microwave radio and radar. Explained simply enough to profit servicemen as well as engineers. Young discusses basic problems and how they are overcome, design and operation of waveguides, magnetrons, klystrons, antennas, etc. Section I covers theory; Section II, terms, ldeas, and theorems.
385 Pages. . . . . . . . . . . . . . 2 Frequency-Spectrum Charits . . . . . . . . . . . . . . Liberally Hilustrated . . . . . . . . . . . . . . $\$ 5.00$

## A.C. CALCULATION CHARTS by R. Lorenzen

146 charts $7^{\prime \prime} \times 11^{\prime \prime}$ printed in two colors, covering all alternating current calculations from 10 cycles to 1000 megacycles. A tremendous time saver for all engineers and others who work on power, audio, supersonic, high frequency and ultra ligh frequency problems. Eliminates the slide rule.
160 Pages........................91/2 12 Inches.
Cloth Binding. .

## THE CATHODE-RAY TUBE AT WORK

A new era in the servicing of radio receivers, public-address sysoffing, It is the use of the cathoderay tube and the progressive servicethe change that is coming.
The theory underlying the functioning of the cathode-ray tube and the circuits that accompany it receives full consideration in this book. The second half of the volume is devoted to specific and practical apto mervicing and adjustment prablems. Order your copy today!

## CONTENTS

1-The Theory of the Tube. A complete explanation of the different types of cathoderay tubes. How the spot is focussed and how the beam of electrons is deflected. II-Sweep Circuits. How and why the on Both Sets of Plates. An explanation of the patterns formed on the cathode-ray tube screen when a.c. voltages are applied. IV-Commercisl Cathode-Ray Oscillographs. A detailed description of the various cathode-ray oscillographs that are on the market. V-Practical Applleation of the Cathode-Ray Oscillograph. General directions for adjustCfrcults. Understandable explanation of the theory of the frequency modulated oscillator and how it is used in testing with the cathode-ray oscillograph. VII-The A-F. Frequency Modulator. How overall a-i. response curves of andio inits are developed and what they mean. VIII-Auto Radio Vibrator Testing. The connections for testing vibraiors with the cathode-ray tulie oscillograph. IX-Transmitter Adfistment. How the modulation of a wave is measured and the trape-Cathode-Ray Osclllograph. Beat patterns, c-w. reception and detection.
338 Pages . . Profusely Illustrated . . Net Price $\$ 4.00$

## SERVICING SUPERHETERODYNES

No other circuit in the radio field has undergone all the changes that have been incorporated in the superheterodyne. In order to service these receivers with profitable speed, you must be able to analyze the different portions of the circuit quickly and this is just what Rider tells you how to do in this book. Not only is the theory of all types of Superhets thoroughly covered, but actual servicing details are most complete. Mary thousands of Servicemen are using "Servicing Superheterodynes" daily and are finding the investment one that paid dividends in increased profits.

## CONTENTS

I-The Principles Underlying the Operation of the Superheterodyne Receiver. II-The Generation of and the Relation Between Harmonics. III-Explanation of the Different Types of Superheterodyne Circuits. IV-Function and Characteristics of Individual Parts of the Superheterodyne Receiver. V-Special Circuits and Tube Applications. VI-Troubles and Symptoms Encountered in Superheterodynes. VII-Application of Test Oscillators. VIII-Vibrator Units. Appendix-Intermediate Peak Frequencies of Commercial Receivers with Model Numbers.
288 Pages . . Profusely Illustrated . . Net Price $\$ 2.00$

## Alternating Currents in Radio Receivers

Are you familiar with the different forms of alternating currents which are present in a radio receiver? When once You understand the basic facts relating to the cycle-fre-waves-shase relations-you will have no trouble in undertanding the servicing problems whioh involve these factors.

## D.C. Voltage Distribution

Only a casual glance at the schematics of some of the 1939 multi-tube sets will convince you that the distribution The many different forms these systems take should be recognized at a glance and understood. You should know thoroughly how the value of resistance and wattage fating of each resistor is calculated and why.
HARD COVERS
TYPE SET

96 Pages Each
Net Price $\$ 1.25$ Each

## Resonance and Alignment

Do you know what happens when you tune a circuit to resonance? In order to align a receiver. oscillator, or transyormer properiy, so that maximum efficiency is attained, you must be ramiliar with more than just the mechanical detector alignment for all types of circuits-singls, doublo and triple tuned systems?

## Automatic Volume Control

Automatic volume control has now become a standard every type in use and can you recognize one system from every the by examining the schematict Do you know how various types of tuhes are used in each circuit? Noise suppression systems, time delay circuits-audio-frequency yol-
ume expander systems and other sutch networks bave ume expander systems and other such networks have
greatly increased servicing problems.

## SERYICING REEEIVERS by means of resistance MEASUREMENT

Take the guesswork out of servicing by using an ohmmeter in your you how shooting. This book tell you how to make and correctly inmeasurements. It will simplify you to use the resistance data fur nished in RIDER MANUALS to the best advantage. Now that more ang resistance data, you need this ing resistance data, you need this with greater accuracy. Let Rider show you how to use a modern servicing procedure on the conplicated receivers-you will find in of explanation of how theory is applied to practice.
203 Pages. . . . Net Price $\$ 2.00$

## ALIGNING PHILCD RECEIVERS <br> Two Volumes

Everything you need for aligning Phico receivers peaks - adjustment frequenciescomplete and detailed information complete and detailed information
for aligning every Philco mode 1 from 1929 to 1941. These two volumes, prepared with the cooperation of the engineering staff
of the Philco Radio \& Television Corby are the authentic source of alignment information and the new way that makes aligmment easier and quicker You will find all the necessary data arranged so
that every sten in the alignment that every step in the alignment nite systematic time-saving manner. The necessity for referning presenting alignment data.
Vol. I - 1929 to 1936 - 176 pages - $\$ 2.00$
Vol.II - 1937 to $1941-200$ pages - $\$ 2.00$

HANDY POCKET SIZE

## AUTOMATIC FREQUENCY CONTROL SYSTEMS

From the simplest tyne of A.F.C. circuit to the most complicated push pull control circuit . . you will find them all clearly explained in Rider's hook. The first part of the book is devoted to a review of the combination of D.C. voltages, the phase relations in inductive, capacitive, and transformer circuits, with particular reference to the manner in which these principles appear in A.F.C. circuits. The remaining chapters cover the operation of all types of discriminator circuits, the operation of the various types of control tube circuits, including the push-pull type the reffected ing the push-pull type, the reffected reactance type, and the mutual induc-
tance type. Let Rider tell you all about A.F.C. in this up-to-the-minute book that combines theory and practice.

## Photofact-the complete and accurate radio data service

IN REGULARLY ISSUED FOLDER SETS
The most accurate and complete Radio Data ever compiled - an absolute MUST for all Radio Servicemen! Includes easy-to-understand, time-saving information on all new radio receivers. Everything you need to know in handy, unified form-large schematics, photo views keyed to parts lists and alignment data, complete listings of parts values and replacements, alignment, stage gain, circuit yoltage and resisiance analysis, coil resistances, dial cord stringing, disassembly instructions, record changer analysis and repair. ALL EXCLUSIVE in PHOTOFACT Folders. Subscribe paday for monthly issues of Sets.
PER SET -- INCLUDES 35 to 50 FOLDERS -
$\$ 1.50$

## ORIGINAL DATA

Based on study of the actual equipment in the Howard W. Sams
laboratories

IN HANDY VOLUMES_WITH DELUXE BINDERS
You can get the first 20 Sets of PHOTOFACT Folders in DeLuxe Volume form. VOLUME 1 covers Sets Nos. 1 through 10. VOLUME 2 covers Sets Nos. 11 through 20. Both volumes contain more than 3700 pages of the most accurate and complete servicing information available on approximately 1800 model and chassis designations produced in 1946 and 1947. Each volume is in a Deluxe Binder, easy to use, ruggedly made to stand up under shop conditions. PHOTOFACT Volumes give you the finest service data library in existence.
PER VOLUME - OVER 1800 PAGES -

## DIAL CORD STRINGING GUIDE

Only Book of its Kind

Handy Pocket Size
Over 96 Pages
Easy to read
Diagrams and Data

There's only one right way to string a dial cord. And there's only one book that shows you how. It's the Howard W. Sams DIAL CORD STRINGING GUIDE. Here, for the first time, in one pocket-sized book, are complete dial cord diagrams and data covering 1938 through 1946 receivers. Actually, there are many ways you can go about stringing a dial cord-but only one is right. You know from your own experience that if you get started the wrong way, you can waste hours of your valuable time and work yourself into a nervous lather. You can say "goodbye" to wasted time when you have a SAMS DIAL CORD STRINGING GUIDE. It licks the knottiest dial cord problem in a matter of minutes. This low-cost book is a "must" for servicing. Order yours today! You'il want two copiesone for your tool kit and one for your shop bench.
OVER 96 PAGES--Profusely Illustrated-PER COPY. 756

## MODEL SP-44

Closeup of Skyrider Panoramic Scope shows graphic visualization of the spectrum.

## Radio spectrum made visible . . . see what you hear . . . with the new SKYRIDER PANORAMIC

Hallicrafters new Skyrider Panoramic adaptor, Model SP-44, offers all the advantages of panoramic reception in an unusually compact and inexpensive unit. With this adaptor connected to a Hallicrafters receiver it is possible to monitor up to 200 kilocycles of the radio spectrum visually and to analyze the characteristics of radio signals from your own or other transmitters.

Panoramic reception is one of the greatest aids to efficient radio operation that has ever been developed. With the Model SP-44 you can keep track of all stations in a "round table" QSO and can locate operating frequencies which are comparatively free from QRM. A phone jack on the rear of the chassis permits audible monitoring of all signals within a 200 kilocycle range at one time. No modifications are necessary in your receiver in order to connect the Model SP-44 and it does not interfere in any way with normal receiver operation. This new adaptor may be used with any receiver having an I.F. between 450 and 470 kilocycles.

## CONTROLS

EQUALIZER, SWEEPWIDTH, GAIN, CENTER FREQUENCY (all on front panel), HORIZONTAL POSITION, VERTICAL POSITION, SWEEP PAD, INTENSITY, FOCUS (on rear of chassis). RF input cable terminated in small loop to fit over plate pin of converter tube. Alligator clip for ground connection. AC cord and plug. Note: In permanent installations the RF
input cable may be terminated in a coaxial connecto instead of the loop and alligator clip and the receive may be equipped with a coaxial terminal.

## PHYSICAL CHARACTERISTICS

The Model SP-44 is housed in a steel cabinet finishe to match the new Hallicrafters line. Operating con ponents are mounted on a cadmium plated steel chassi The cathode ray tube is provided with a light shade fl greatest visibility.

## TEN TUBES

1-6SG7 RF amplifier; 1-6SA7 converter; 1-6SC IF amplifier; 1-6SQ7 detertor, video amplifier; 16 AC 7 reactor; 1-VR105 voltage regulator; 1-6SN sawtooth generator and amplifier; 1-902A cathode r: tube; 1-6X5 low voltage rectifier; 1-6X5 high volta ${ }^{\text {i }}$ rectifier.

## OPERATING DATA

The Model SP-44 panoramic adaptor is designed operate on $105-125$ volts, $50 / 60$ cycle alternating curres Power consumption is approximately 55 watts.

## DIMENSIONS

Model SP-44. Cabinet only, 11 inches wide by 6 inch high by 10 inches deep. Overall, 11 inches wide $6-3 / 16$ inches high by $10-7 / 8$ inches deep.

## WEIGHT

Model SP-44. Adaptor only 13 pounds. Packed for sh ment $151 / 2$ pounds.

MODEL

## $\$ 275.00$

AMATEUR NET

# Greatest continuous frequency coverage of any communications receiver. From 540 kc to 110 Mc 

n the Model SX-42 Hallicrafters sets a new high standrd of receiver performance and versatility. Covering all requencies from 540 kilocycles to 110 megacycles, the X-42 combines in one superbly engineered unit a topight standard and VHF communications receiver, tandard, short-wave and FM broadcast receiver and igh-fidelity phonograph amplifier.
The tremendous frequency range of the SX-42, greater ontinuous coverage than has ever before been available 1 a receiver of this type, is made possible by the develpment of a new "split-stator" tuning system and the use f dual intermediate-frequency transformers. Reception $f$ amplitude modulated and continuous wave telegraph gnals is provided for throughout the entire range of the $\mathrm{X}-42$. In addition, a discriminator and two limiter stages re available on bands 5 and 6 ( 27 to 110 megacycles) to ermit the reception of frequency modulated signals. usical reproduction of true high fidelity is assured by 1 audio system with a response curve essentially flat om 60 to 15,000 cycles and an undistorted output of ght watts.
The controls of the SX-42 are arranged for maximum invenience and simplicity of operation. MAIN TUNING 1d BANDSPREAD knobs are mounted coaxially, focus$g$ the tuning functions in a single precision-built unit. ANDSWITCH and VOLUME are located at either side : the main dial. Auxiliary controls such as CRYSTAL HASING, SENSITIVITY, etc., are logically placed so at those most frequently used are in the most accesble positions. Hallicrafters new system of color coding
makes it possible for the entire family to enjoy this fine receiver. The normal control positions for standard broadcast reception are indicated by tiny red dots while FM adjustments are in green.

The main tuning knob is provided with a precision vernier scale which is separately hluminated through a small window in the one-piece Lucite main dial housing. The main tuning dial is calibrated in megacycles and is marked with the numbers in the new FM band of 88 to 108 megacycles. The bandspread dial is calibrated for the amateur $3.5,7,14,28$, and 50 megacycle bands. An additional logging scale is provided on this dial for use in other ranges. The small locking knob mounted coaxially with the main and bandspread tuning knobs permits either to be rotated freely while holding the other firmly in position.

The many new and ingenious circuit features which make possible the amazing versatility of the SX- 42 stem directly from Hallicrafters' long experience in the design and production of VHF and UHF communications equipment. The newly developed "split-stator" tuning system used on the three higher bands provides a far greater gain per stage than is possible with older methods. Each I-F transformer contains windings for both 455 kilocycles and 10.7 megacycles and the changeover is accomplished automatically between bands 4 and 5 . As band 4 runs to 30 megacycles and band 5 starts at 27 megacycles, it is possible to use either narrow-band standard communications receiver performance or wideband FM performance on the amateur frequencies from

## hallicrafters rado

## (SX-42 continued)

28 to 29.7 megacycles. A type 7A4 tube functions as a beat frequency oscillator for CW reception. When the receiver is switched to FM, however, this tube becomes a direct-current amplifier to operate the FM tuning meter. This meter performs as a normal carrier level indicator for AM reception. A four-position switch on the panel selects the desired mode of operation-PHONO, FM, AM or CW.

In addition to its many new features, the SX-42 continues all of the time-tried advantages characteristic of Hallicrafters top models. Freedom fromı "drift" and maximum stability are provided by temperature compensation and the use of a type VR-150 voltage regulator tube. A crystal filter circuit combined with variable intermediate-frequency channel width offers six different degrees of selectivity on the four lower bands (to 30 megacycles). CRYSTAL PHASING, CW PITCH, SENSITIVITY and four-position TONE control for LOW, MED, HI FI, and BASS, are all conveniently placed on the front panel, as are RECEIVE/STANDBY, NOISE LIMITER, and AVC switches.

## FEATURES

1. Continuous frequency range- 540 kilocycles to 110 megacycles in six bands.

Band 1-540 to 1620 kilocycles.
Band 2-1.62 to 5 megacycles.
Band 3-5 to 15 megacycles.
Band 4-15 to 30 megacycles.
Band $5-27$ to 55 megacycles.
Band 6-55 to 110 megacycles.
Adequate overlap is provided at the ends of all bands.
2. Wide vision main tuning dial accurately calibrated.
3. Separate electrical bandspread dial calibrated for amateur $3.5,7$, 14, 28, and 50 megacycle bands.
4. Beat frequency oscillator functions throughout entire range of receiver. CW pitch adjustable from panel.
5. Four-position switch selects mode of operation, PHONO, FM, AM, or CW.
6. RECEIVE/STANDBY switch.
7. Series type automatic noise limiter.
3. Push-pull final audio stage delivers over 8 watts with less than $8 \%$ harmonic distortion.
9. Audio amplifier response curve is essentially flat from 60 to 15,000 cycles.
10. Red markings for broadcast reception and green markings for FM reception simplify operation for general use.
11. Connections for coordinated operation with Hallicrafters transmitters.
12. Separate SENSITIVITY (RF) and VOLUME (AF) controls.
13. Four-position tone control provides LOW, MED, HI FI, and BASS.
14. Special socket for use of external power supply.
15. High frequency oscillator temperature-compensated to reduce drift.
16. "Micro-set" permeability-adjusted coils in RF section.
17. AVC switch.
18. "Airodized" steel top provides full ventilation and swings open on full length piano hinge for greabest accessibility.
19. Wide band FM, AM or CW available from 27 to 110 megacycles.
20. Six-position selectivity switch with crystal filter operates on frequencies between 540 kilocycles and 30 megacycles.
21. Combination carrier level meter and FM tuning indicator. BFO tube performs dual function as FM tuning indicator amplifier.
22. New FM band marked with channel numbers in addition to megacycle calibration.
23. Dual intermediate frequency transformers; 455 kilocycle IF for standard operation, 10.7 megacycle IF for VHF and FM operation.
24. "Snlit-stator" tuning makes possible superior performance in VHF range.
25. Ohassis and panel can be removed as a unit for rack mounting.
26. Grystal phasing control
27. Antenna input impedance matches 300 ohm line.
28. New Hallicrafters Type HA-6 crystal used in crystal filter circuit. Holder of Mycalex, non-hygroscopic and unaffected by temperature.
29. Two limiter stages for maximum quieting on FM.
30. Two tuned RF stages using miniature tubes for superior VHF performance.
31. Phonograph input connections on rear of chassis.
32. Type VR-150 voltage regulator tube provides maximum stability in high frequency oscillator, converter, BFO, and FM tuning meter circuits.
33. MAIN and BANDSPREAD tuning controls and dial lock are mounted coaxially as a single precision-built unit.
34. Main tuning knob provided with precision vernier scale, separately nated through small window in one-piece Lucite dial housing.

## CONTROLS

BAND SELECTOR. MAIN TUNING, BAND SPREAD, and selective DIAL LOCK, VOLUME and POWER OFF, AVC, NOISE LIMITER, RECEIVE/STANDBY, SELECTIVITY, TONE, SENSITIVITY, CRYSTAL PHASING, RECEPTION, CW PITCH. "S" meter adjustment on rear of chassis.

## EXTERNAL CONNECTIONS

Antenna connections for doublet or single wire antenna. Input impedance matches $300-0 h m$ line except on broadcast band which is designed for use with ordinary single wire antenna. Output terminals to match 500 or 5000 ohm speaker. Phone jack on front panel. Phonograph input connector on rear of chassis. Socket for use of external power supply. Remote standby switch connections provided for in power socket. Power cord and plug.

## PHYSICAL CHARACTERISTICS

The Model SX-42 is housed in a steel cabinet of true functional design. Panel and chassis are assembled as a unit and may be removed for servicing or for mounting in a relay rack. Panel is finished in deep gray, top of cabinet is of "airodized" steel finished in satin chrome and swings open on a full length piano hinge for maximum accessibility. Main dial housing is a single piece of Lucite fabricated by an injection molding process. Panel lettering is in light gray with incidental red and green markings for standard AM and FM reception. Dials are a light translucent green and are indirectly illuminated.

## FIFTEEN TUBES

1-6AG5 1st RF amplifier; 1-6AG5 2nd RF amplifier; 1-7F8 converter; 1-6SK7, 1st IF amplifier; 1-6SG7, 2nd IF amplifier; 1-6H6 AM rectifier and noise limiter; $1-7 \mathrm{H} 7$ 1st FM limiter amplifier; 1-7H7 2nd FM limiter; 1-6H6 FM discriminator; 1-6SL7 audio inverter; 26V6 Audio output tubes; 1-7A4 beat frequency oscillator and FM tuning meter amplifier; 1-VR-150 voltage regulator; $1-5 \mathrm{U} 4 \mathrm{G}$ high voltage rectifier.

## OPERATING DATA

The standard Model SX-42 is designed for operation on $105-125$ volts $50 / 60$ cycle alternating current. The tuiversal Model SX-42U may be operated on 110 , 130, 150, 220 or 250 volts, 25 to 60 cycle, alternating current. The standard model draws 0.93 amperes at 117 volts. When operated from batteries through the auxiliary power supply socket it requires 5 amperes at 6 volts DC for heater current and 150 milliamperes at 270 volts DC for plate current. Total battery current when operating from a 6 volt battery and using a Vibrapack as a source of plate power is 16 amperes. Listed by Underwriters Laboratories.

## DIMENSIONS

Model SX-42. Cabinet only, 20 inches wide by $93 / 4$ inches high by 16 inches deep. Overall, 20 inches wide by $101 / 4$ inches high by 18 inches deep.

## WEIGHT

Model SX-42. Receiver only, approximately 52 pounds. Packed for shipment, approximately 65 pounds. Model B-42. Adjustable base, packed for shipment, approximately 5 pounds.

# hallirefifters nallo 

## Function, beauty combined in an outstanding value 540 kc to 43 Mc

The sensational new $\mathrm{S}-40$ with the finest performance ever presented in the popular price field is housed in a cabinet of true functional design-a completely new conception of receiver beauty and styling. Full use is made of newly developed materials and techniques. Maximum ventilation is assured by a multitude of tiny openings in the upper section of the cabinet which also imparts a smart and pleasing appearance. The entire top of the cabinet opens on a full length piano hinge for complete accessibility. Panel and chassis may be removed from the cabinet as a unit without disturbing any controls or connections. All controls are clearly identified and the normal positions for standard broadcast reception are marked in red, making it easy for the whole family to use this fine receiver.
The Model S-40 incorporates many circuit refinements and features never before available in this price class.

## FEATURES

1. Overall frequency range- 540 kilocycles to 43 megacycles in 4 bands.

Band 1-540 to 1700 kilocycles.
Band $2-1.7$ to 5.35 megacycles.
Band $3-5.35$ to 15.7 megacycles.
Band 4-15.7 to 43 megacycles.
Adequate overlap is provided at the ends of all bands.
2. Wide vision main tuning dial accurately calibrated.
3. Separate electrical bandspread dial, inertia flywheel tuning.
4. Beat frequency oscillator, pitch adjustable from front panel.
5. CW/AM switch.
6. Standby/receive switch.
7. Automatic noise limiter.
8. Maximum audio output-2 $1 / 2$ watts.
9. Internal PM dynamic speaker held in robber shock mounts.
10. Red markings for broadcast reception simplify operation for general use.
11. Oonnections for co-ordinated operation with Hallicrafters transmitters.
12. Separate SENSITIVITY (RF) and VOLUME (AF) gain controls.
13. Three-position tone control.
14. Special socket permits use of external auxiliary power supply.
15. High frequency oscillator temperature compensated to reduce dritt.
16. "Micro-set" permeability adjusted coils in RF section.
17. AVC switch.
18. Exceptional accessibility of all parts due to new cabinet design.
19. Socket for connection of Model SM-40 " S " meter.

NINE TUBES: 1-6SG7 RF amplifier; 1-6SA7 converter; 1-6SK7 1st IF amplifier; 1-6SK7 2nd IF amplifier; 1-6SQ7 2nd detector and 1st audio amplifier; 1-6F6G output audio amplifier; 1-6H6 automatic roise limiter and gas gate; $1-6 J 5$ GT beat frequency oscillator; 1- 80 rectifier.

DIMENSIONS: Model S-40. Cabinet only, $18 \frac{1}{2}$ inches wide by $81 / 2$ inches high by $95 / 8$ inches deep. Overall, $181 / 2$ inches wide by 9 inches high by 11 inches deep.

WEIGHT: Model S-40. Receiver only, approximately 28 pounds. Packed for shipment, approximately 33 pounds.

This new external "S" meter is available as an accessory and can be easily connected through a special socket on the rear of the receiver chassis. May also be used with other Hallicrafters models such as the S-20R, S-18, etc.

Model SM-40 Meter-Overall

## MODEL

## For hams, beginning hams and all who want the finest receiver available at a low price

The Model S-38 meets the demand for a truly competent communications receiver in the low price field. Styled in the post-war Hallicrafters pattern and incorporating many of the features found in its more expensive brothers, the $\mathrm{s}-38$ offers performance and appearance far above anything heretofore available in its class. Four tuning bands, CW pitch control adjustable from the front panel, automatic noise limiter, self-contained PM dynamic speaker and "Airodized" steel grille, all mark the S-38 as the new leader among inexpensive communications receivers.

## FEATURES

1. Overall frequency range-540 kilocycles to 32 megacycles in 4 bands.

Band 1-540 to 1650 kc .
Band 2-1.65 to 5 mc .
Band 3-5 to 14.5 mc .
Band $4-13.5$ to 32 mc .
Adequate overlap is provided at the ends of all bands.
2. Main tuning dial accurately calibrated.
3. Separate electrical band spread dial.
4. Beat frequency oscillator, pitch adjustable from front panel.
5. AM/CW switch. Also turns on automatic volume control in AM position.
6. Standby/receive switch.
7. Automatic noise limiter.
8. Maximum audio output-1.6 watts.
9. Internal PM dynamic speaker mounted in top.
10. Controls arranged for maximum ease of operation.
11. 105-125 volt $\mathrm{AC} / \mathrm{DC}$ operation. Resistor line cord for 210.250 volt operation available.
12. Speaker/phones switch.

CONTROLS
SPEAKER/PHONES, AM/CW, NOISE LIMITER, TUNING, CW PITCH, BAND SELECTOR, VOLUME, BANDSPREAD, RECEIVE/. STANDBY.

The S-38 is an especially fine receiver for younger people just beginning to find the unending fascination offered by radio as a hobby. In addition to being a good standby receiver for any amateur, the $\mathrm{S}-38$ has unlimited uses. Its compact functional design, its high performance on both short waves and standard broadcast reception makes it an ideal receiver for use in den or library, in college dormitory, at camp or cottage or in any room around the house wherever a good extra receiver at a low cost is desired.

## EXTERNAL CONNECTIONS

Antenna terminals for doublet or single wire antenna. Ground terminal. Tip jacks for headphones. Line cord and plug.

## PHYSICAL CHARACTERISTICS

The Model S-38 is housed in a sturdy steel cabinet finished in rich satin black. Speaker grille in top is of airodized steel. Chassis is cadmium plated. Lettering is in light gray and switch knobs are red.

## SIX TUBES

1-12SA7 converter; 1-12SK7 IF amplifier; $1-12 \mathrm{SQ} 7$ second detector, AVC, first audio amplifier; 1-12SQ7 beat frequency oscillator, automatic noise limiter; $1-35 L 6 G T$ second audio amplifier; I-35Z5GT rectifier.

## OPERATING DATA

The Model S-38 is designed to operate on $105 \cdot 125$ volts AC or DC. A special external resistance line cord can be supplied for operation on 210 to 250 volts AC or DC. Power consumption on 117 volts is 29 watts.

## DIMENSIONS

Model S-38, Cabinet only, $12 \%$ inches wide by $67 / 8$ inches high by $77 / 8$ inches deep. Overall, $127 / 8$ inches wide by $75 / 8$ inches high by $8 \frac{5}{8}$ inches deep.

## WEIGHT

Model S-38. Receiver only, 11 pounds. Packed for shipment, $131 / 2$ poundis.

## hallicrafters rado

## MODEL IIT-9

## A real ham rig - Medium power - Maximum flexibility

Hallicrafters Model HT-9 is an ideal medium power transmitter. Designed for maximum flexibility and convenience, it is completely self-contained, requiring only a microphone or key, antenna, and source of AC power to go on the air, in addition to coils and crystals.

Five individual plug-in tuning units and crystals may be accommodated in the exciter section simultaneously. Band switching is easily accomplished by changing one coil in the final amplifier and selecting the desired exciter frequency by means of a panel switch. Exciter
units are pre-tuned and the only additional operation needed is a slight adjustment of the final tank tuning capacitor.

Separate meters are provided for the power amplifier plate and grid circuits and a third meter may be switched into either the exciter or modulator cathode circuits. All controls are conveniently arranged on the panel and a safety interlock switch is provided for protection against accidental shock when the cabinet is opened.

## FEATURES

1. Frequency range 1500 kilocycles to 18 megacycles and amateur 28 megacycle Band.
2. Power output 100 watts on CW, 75 watts on phone.
3. Antenna coil will match any resistive load from 10 to 600 ohms.
4. Maximum ventilation provided by louvers on sides, cutouts at rear.
5. Hinged top permits access to interior for changing coils and crystals.
6. All operating controls on front pancl.
7. Self-contained power supply for $105-125$ volts, $50 / 60$ cycle AC operation.
8. Input for any medium level, high impedance microphone.

## FOURTEEN TUBES

1-6L6 crystal oscillator (used above 8 Mc only): 1-6L6 crystal oscillator or doubler; 1-814 final RF amplifier; 1-6SJ7 1st speech amplifier; 1-6J5 2nd speech amplifier; 4-6L6 push-pull parallel modulator stage; 2-5Z3 rectifiers; 1-80 rectifier; 2-866 rectifiers.
9. Metering of cathode current of exciter or modulator, power amplifier grid and power amplifier plate.
10. 100 per cent modulation with low distortion.
11. Carrier hum more than 40 db below $100 \%$ modulation.
12. Frequency response flat within 3 db from 100 to 500 cycles.
13. Five operating frequencies may be pre-set in the oscillator and buffer-doubler stages and selected at will by meats of the band switch.
14. Line fuses mounted on rear of chassis.
15. Convenient table mounting.
16. Rugged construction and oversize components assure dependable operation.

## DIMENSIONS

Model HT-9 overall clearance: $291 / 8$ inches wide by $121 / 2$ inches high by $201 / 2$ inches deep.

WEIGHT
Model HT-9 transmitter, 120 pounds. Packed for shipment, 125 pounds.

## Amateur Net

A precision instrument for very high frequency work
The Model S-37 has been designed to fill the need for very high frequency equipment with the performance characteristics of Hallicrafters top communications receivers, and a frequency range extending above 200 Mc . Basically similar to the Model S-36A this new receiver incorporates the latest developments in VHF circuit design and provides sensitivity and selectivity in the range from 130 to 210 Mc that is in every way comparable to the performance of fine communications receivers on the standard frequencias.

## FEATURES

1. Frequency range continuous from 130 Mc to 210 Mc .
2. Main tuning dial accurately calibrated in megacycles.
3. Mechanical bandspread.
4. FM/AM switch.
5. Send/Receive switch.
6. Automatic noise limiter.
7. Provision for break-in operation.
8. Separate RF and AF gain controls.
9. Variable tone control.
10. Socket for external power connections.

1I. Oscillator compensated for frequency drift.
12. AVC switch.
13. Dual purpose " $S$ " and tuning meter with adjustment from front paneI.
14. RF assembly easily removed for servicing
15. Antenna compensator mounted on panel.
16. Two RF stages with acorn tubes.
17. 500 or 5000 ohm output
18. Voltage regulator tube for maximum stability
19. Hermetically sealed transformers and reactors
20. All paper condensers oil impregnated and hermetically sealed.
21. Moisture-proofed wiring.
22. Switch on chassis permits operation on 105-125 or 210-250 volts 50/60 cycle AC.
23. Inertia fly wheel tuning.

## EXTERNAL CONNECTIONS

mput terminals for single wire and doublet antenna. 500 ohm and 5000 ohm terminals.

## FOURTEEN TUBES

2-954 (Acorn) Radio Frequency Amplifiers; 1-954 (Acorn) Converter-Mixer; 1-6AC7 1st IF Amplifier; $1-6 \mathrm{AB7}$ 2nd IF Amplifier; $1-6 \mathrm{SK} 7 \quad 3 \mathrm{rd}$ IF Amplifier; $1-6 \mathrm{H} 6$ AM $\quad$ Detector and Automatic Noise Limiter; 1-6AC7 FM Limiter; 1-6H6 FM Discriminator; 1-6SC7 Audio Amplifier; 1-VR150 Voltage Reonlator; 1-6VfGT Power Audio Amplifier; 1-5U4G Rectifier; 1-955 (Acorn) High Frequency Oscillator.

## DIMENSIONS

Model S-37: $191 / 4$ inches wide by $91 / 2$ inches high by $143 / 4$ inches deep.

## WEIGHT

Model S.37. Receiver only, 90 pounds. Packed for shipment, 100 pounds.

## Outstanding on 4 counts... sensitivity, stability, high fidelity, VHF versatility

The Hallicrafters $A M / F M / C W$ receiver, Model $S-36 A$, is designed for maximum performance on the very high frequencies. Using acorn tubes in the RF amplifier, first detector, and high frequency oscillator circuits, the $S-36 A$ provides continuous frequency coverage from 27.8 to 143 megacycles. Either a limiter and discriminator for FM or a third $I F$ amplifier, diode detector and noise limiter for AM may be switched into the circuit from the front panel. A beat frequency oscillator is provided for the reception of CW telegraph signals. The S-36A incorporates a new five-watt audio system with a response curve Which is essentially flat from 40 to 15,000 cycles. All components are of the highest quality and the entire recoiver is designd for service in any climate. Combining $F M, A M$, and $C W$ telegraph reception in one superbly engineered unit, the $\mathrm{S} \cdot 36 \mathrm{~A}$ provides the utmost in very high frequency reception.

## FEATURES

1. Frequency range 27.8 to 143 Mc continuous in 3 bands. Band $1-27.8$ to 46 Mc
Band $2-46$ to 82 Mc .
Band $3-82$ to 143 Mc .
Adequate overlap is provided at ends of all bands.
2. Main tuning dial aceurately calibrated on all bands.
3. Mechanical bandspread.
4. Beat freguency oscillator, pitch variable from the front panel.
5. BFO switch.
6. FM/AM switch
7. Send-receive switch.
8. Automatic noise limiter.
9. Push-pull high fidelity output stage
10. Provision for break-in operation.
11. Separate RF and AF gain controls.
12. Four-position tone control with bass boost.
13. Socket for external DC power connections.
14. Oscillator compensated for frequency drift.
15. AVC switch.
16. Sharp-broad selectivity switch.
17. Dual purpose " g " and tuning meter.
18. RF assembly easily removed for servicing.
19. Antenna compensator mounted on panel.
20. RF stage with acorn tube.
21. 500 or 5000 ohm output plu's special balanced 600 ohm line with jack
22. Voltage regulator tube for maximum stabilitr.
23. Hermetically sealed transformers and reant. a.
24. Hermetically sealed transformers and
25. Moisture-proofed wiring.
26. Switch on chassis permits operation on $105-125$ or 210-250 rolts $50 / 60$ cycle AC.
27. Line fuse on front panel
28. Inertia flywheel tuning.
29. Improved gear drive, in dust proof housing.

FIFTEEN TUBES
1-956 (Acorn) radio frequency amplifier; 1-954 (Acorn) converter; 1-955 (Acorn) high frequency oscillator; $1-6 \mathrm{AC7}$ 1st IF amplifier; 1-6AB7 2nd IF amplifier; 1-6SK7 3rd IF amplifier;
 limiter; $1-6 \mathrm{H} 6$ FM discriminator; $1-6 \mathrm{GL} 7 \mathrm{GT}$ audio amplifier and phase inverter; $1-$ VR-150 voltage regulator; $2-6 V 6 \mathrm{GT}$ power

## DIMENSIONS

Model S-36A: $191 / 4$ inches wide by $91 / 2$ inches high by $153 / 4$ inches deep. WEIGHT
Model S-36A. Receiver only, 90 pounds. Packed for shipment 100 pounds.

# hallicrafters rado 

## NEW SPEAKERS

The R-42 and the R-45 (the rack mounting version of the R-42) represent one of the greatest innovations in speaker design in recent years. This is the first speaker of its size to offer the splendid advantages of the bass reflex principle. Heretofore the famous Jensen-originated bass reflex reproduction has been available only in large cabinet speakers. Now in this sleek, highly functional design, matching the new line of Hallicrafters receivers, the bass reflex feature is available in a compact speaker that offers a new high quality of reproduction. The R-42 was designed as a companion piece to the SX-42 receiver. The $\mathbf{R}-45$, rack mounted, makes an ideal piece of equipment to use with the SX-42 when mounted in a standard rack. The speaker size is 8 inches, with extra heavy magnet. Two-position switch on front panel for communications or high fidelity reception. Terminals on rear for $500 / 600$ ohm line R-42, size: $121 / 2$ inches deep, $113 / 4$ inches high, 17 inches wide. R-45, size: $121 / 2$ inches deep, $123 / 4$ inches high, 19 inches wide.

R-42 Speaker. Amateur Net $\$ 29.50$
R-45 Speaker. Not available at present.
(This was formerly R-45 Speaker. Amatevir itet $\$ 27.50$ )
The R-75 is a strictly professional model specifically designed for use in radio studio, den or ham shack or any place where an above average reproducer is desired. It is carefully designed around the bass reflex principle. Sturdy, business-like and smartly designed, the R-75 makes a perfent reprodueny for the new Hallicrafters models. The R-75 cabinet to conmmentil mitarefully selected woods, totally enclosed and finthed ta matm binck with contrasting gray lacquer trim. Switch prowtan where of low and high frequency cut-off or high-fidelity maperam Hented or rear panel are input terminals for $500 / 600 \mathrm{ohm}$
 Bre: githem akep, 30 inches high, $211 / 2$ inches wide.

The R-80 offers a 10 -inch, high quality, bass reflex reproducer in a handsome walnut cabinet that will prove a worthy addition to any living room, library or den. Beautifully designed to express its modern functionalism, it matches the new line of Hallicrafters receivers and will blend perfectly with almost any type of home decoration. Proportioned so that receivers like the SX-42 can be placed on top to form a unit. Can be used with any other receivers, phonographs or sound systems where a good looking, highfidelity reproducer is required. Control switch permits choice of low and high frequency cut-off or high fidelity. Input terminals for $500 / 600$ ohm line located on rear panel. Cabinet size: 23 inches deep, 30 inches high, $211 / 2$ inches wide.

ABBOTTTR-4B

## Ultra High Frequency 2 meter TRANSMITTER-RECEIVER For 144-148 Mc Operation with Acorn 955 Tube Used in Receiver

The TR-4B Radiotelephone \& Receiver Unit can be used for fixed station operation or as a mobile unit in an automobile, truck, boat or plane or anywhere where a 6 volt battery or 110 volts 60 cycles AC is available.
GENERAL SPECIFICATIONS: The TR-4B incorporates a separate receiver using an Acorn 955 as the super-regenerative detectior and a separate transmitter utilizing a Hytron HY-75 as an ultrahigh frequency oscillator.
The receiver portion incorporates a specially designed circuit and many mechanical refinements such as: front of panel control variable inductive coupling, variable sensitivity control, and audio volume control.
Because of the separate transmitter and receiver incorporated in the TR-4B, it will be found much more convenient for various typs of services in view of the fact that no retuning is required when going from SEND to RECEIVE during a contact. It will also be noted that the TR-4B incorporates a ganged antenna send-receive switch which is automatically thrown when the lower send-receive is operated. This reduces the operating controls during a contact to one control, and also makes possible the use of a common antenna for both transmitter and receiver. During many field tests covering a period of several months, the TR-4B has performed brilliantly and has proven itself to be a piece of outstanding ultra-high frequency equipment. It will prove itself particularly useful in many types of services. A $5^{\prime \prime}$ PM speaker is self-contained and good volume will be obtained from most stations.

## OPERATES FROM VIBRATOR OR AC POWER SUPPLY

less tubes

## NET PRICE <br> TO AMATEURS

## FEATURES:

1. Radiation from the receiver is reduced to a negligible value.
2. The receiving circuit and its antenna coupling can be adjusted for optimum performance.
3. The transmitter circuit and its antenna coupling can be tuned for maximum power output and efficiency.
4 Retuning is eliminated when changing between transmitting and receiving.
4. Jacks are provided for measuring oscillator and modulator current.
FREQUENCY COVERAGE: Will cover 144 to 148 mc, the amateur 2 meter band. RANGE: The working range of the ABOTT $\overline{T R-4 B}$ will depend upon the location in which it is used. The range will vary between 5 and 75 miles. In actual field tests, ranges up to 290 miles have been covered.
POWER REQUIREMENTS: Any standard 300 volt ma vibrator power supply with filter added will serve as satisfactory power equipment for mobile use. For fixed operation the unit can be operated from an AC power supply having an output of 300 volts at 100 milliamperes and 6.3 at 3.5 amperes.
SIZE: $9^{\prime \prime} \times 8^{\prime \prime} \times 41 / 2^{\prime \prime}$.
TUBES USED: One Acorn 955
One Hytron HY-75
One 7F7
One 6L6 or 6V6

## "HQ-129-X" AMATEUR RECEIVER

The Hammarlund "HQ-129-X" amateur communications receiver is designed to meet the demands of the most critical amateurs. Its design includes every feature essential to finest performance.

The "HQ-129-X" has a continuous range from .54 to 31 megacycles in six separately calibrated bands with continuous bandspread throughout the entire range. In addition, the bandspread dial is calibrated for each of the four most important amateur bands- $3.5-4 \mathrm{mc}$, $7-7.3 \mathrm{mc}, 14-14.4 \mathrm{mc}$ and $28-30 \mathrm{mc}$.
The "HQ-129-X" has the Hammarlund patented variable wide-band crystal filter which works exceptionally well on phone or short wave broadcast signals.

There are many other features: Variable antenna compensator, beat oscillator, voltage regulator, series noise limiter, send-receive switch, automatic volume control, calibrated " S " meter, audio gain control, sensitivity control-plus all that goes into a receiver built by engineers who have spent a lifetime designing commercial communication equipment.
The "HQ-129-X" is available complete in a two tone gray finish including tubes and a 10 inch $P$. M. dynamic speaker.

## SERIES 400 <br> "SUPER-PRO"

The Series 400 Commercial "Super-Pro" receiver covers a new and wider range of frequencies. The SP-400-X model covers from .54 to 30 megacycles taking in all of the standard and short wave broadcast bands as well as amateur bands down to 30 megacycles. The "Super-Pro" has become standard equipment with many engineers in the radio press and broadcast fields. During the recent war, "Super-Pros" were standard equipment in practically every Army Airways Communications System installation throughout the world. Many letters from the men who operated them attest to the soundness of design and ability to withstand the most gruelling operating conditions.
The "Super-Pro" has continuous variable, selectivity from razor-sharp "single-signal" to wide band high fidelity for broadcast reception. This feature together with the high power high fidelity 8 watt audio amplifier makes this an ideal receiver for use in entertainment installations as well as for home use. In addition the SP-400-X has AVC, continuous bandspread, calibrated "S" meter, BFO, noise limiter, send-receive switch, ear phone terminals, phono-input and separate heavy duty power supply.

## NATIONAL HRO-5A1

## DESCRIPTION

The development of the National HRO-5A1 Radio Receiver brings the famous HRO series to a new high in receiver performance.
Items characterizing the HRO-5A1 Receiver are as follows: Two R.F. preselector stages; separate mixer and local oscillator tubes; two I.F. stages with a crystal filter employing phasing and selectivity controls; combined second detector AVC and second audio stage; first audio stage $e_{i}$ double action limiter stage; audio output stage; C.W. oscillator with pitch control; and a signal strength meter Metal tubes, first used in the HRO-5, are also employed in the HRO-5A1. The Loud Speaker and Power Unit are separate units. The data listed below indicates the versatility and the extremely high standards of performance to be found in the HRO-5A1.

## CONTROLS

Main Tuning Dial: AVC Switch: $B+$ ON-OFF; Audio Gain. R.F. Gain; C.W. Oscillator Pitch Control; Selectivity Control; Phasing Control; S-Meter Switch; Limiter Control.

## SPECIFICATIONS

## Frequency Range:

The Frequency Range of the HRO-5A1 with the 4 Coil Sets normally supplied is 1.7 - 30.0 MC . Each Coil Set covers the frequencies listed below:

| Coil Set | General Coverage | Bandspread |
| :---: | :---: | ---: |
| D | $1.7-4.0$ | $3.5-4.0$ |
| C | $3.5=7.3$ | $7.0=7.3$ |
| B | $7.0-14.4$ | $14.0=14.4$ |
| A | $14.0-30.0$ | $28.0-30.0$ |

NATIONAL Coil Sets to cover the low frequency range of the receiver are available as follows:
TypeJ $50-100 \mathrm{KC}$. Type F 480 - 950 KC .
Type H100-200 KC. Type E900-2050 KC.
Type G 180 - 430 KC.
SELECTIVITY:

|  | Crystal Filter Out |  |
| :---: | :---: | :---: |
|  |  | min |
| 6 DB. |  | 3.0 KC . |
| 60 DB. |  | 21.5 KC . |

## NATIONAL NC-46

## DESCRIPTION

The National NC- 46 is a 105 to 130 Volt ACDC receiver which provides 3 watts of audio output. The Recerver tunes the Broadcast and Short Wave bands and employs 10 tubes. Electrical bandspread is provided for vernier funing. The circuit consists of a 6 K 8 converter-oscillator stage, two 6SG7 IF stages, 6H6 detector-limiter stage, 6SF7 AVC Amplifier, 6SJ7 CW Oscillator, 6SC7 Audio-Inverter, push-pull audio output stage with two 25L6GT tubes, and a $25 Z 5$ Rectifier.

## CONTROLS

Main Tuning Dial; Bandspread Tuning Dial, Sensitivity Control, Volume Control; Tone Switch; C. W. Oscillator Switch; AVC Switch, Limiter Switch; Band Selector Switch, B+ Switch and Power Switch.

## TERMINALS

On Rear Panel; Phone Jack; B + Terminals; 8 Ohim Spkr. terminals; Ant. Terminal; Fuse extractor post.

## SPECIFICATIONS

## Frequency Range:

The Frequency Range of the NC-46 Receiver is $540 . \mathrm{Kc} .1030$. Mc. covered in four bands.

Band General Coverage Band Spread
A $11.5-30.0 \mathrm{Mc} .28 .0-30.0 \mathrm{Mc}_{;} 40$ dial div. 14 0-14.4 Mci 56 dial div.
B $\quad 4.4-12.0 \mathrm{Mc}$. $7.0-7.3 \mathrm{Mc} ; 50$ dial div.
C $\quad 1.55$ - 4.6 Mc . $3.5-4.0 \mathrm{Mc} ; 70$ dial div.
$0.540-1.6 \mathrm{Mc}$.

## Sensitivity:

Approximately 5 microvolts input provides a 50
Milliwatt output over the entire range.

## Selectivity:

The total bandwidth is approximately 4.5 Kc . at 6 db. down and approximately 70 db . attenuation 10 Kc. off resonance is obtained.
Automatic Volume Control:
The Receiver output with AVC operating varies less than $\pm 4 \mathrm{db}$. with inputs ranging from 10 to 100,000 microvolts.

## NATIONAL NC-173

## DESCRIPTION

The new NC-173 is a truly versatile Receiver engineered to fulfill a wide variety of applications The Amateur will find this Receiver chock-full of features which greatly widen his scope of activsty. Commercial installations will realize in this Receiver a dependable performer under the most adverse receiving conditions. Shori Wave Listeners can enjoy world-wide reception as well as the standard broadcast band with a minimum of tuning adjustments and a maximum of life-like reproduction. The distinctive appearance of the NC-173 exterior will add attractiveness to any type of installation.

The frequency scope of the NC-173 is exceptional in that it includes the conventional 540 kc . to 31 mc . range plus the 48 to 56 mc . portion of the spectrum which covers the Amateur six meter band. The funing system employs separate directlycalibrated dial scales with associated control knobs for General Coverage and Bandspread tuning. Both dials are well-illuminated and have auxiliary linear scales for logging purposes. Calibrated bandspread tuning is provided for the main Amateur bands, i.e., 6, 10-11, 20, 40 and 80 meters. Band changing is accomplished by means of a highly efficient band-switch system.
A complement of 13 tubes in a superheterodyne circuit is used to provide such features as an RF Amplifier stage, a separate AVC Amplifier, a voltage regulator for circuit stabilization and a double-diode noise limiter. Essentially the circuit consists of one stage of radio frequency amplification, a first detector and a separate stabilized high frequency oscillator, two intermediate Frequency amplifier stages, a diode type second defector, an audio limiter, a high gain type audio stage and an audio output stage plus an automatic volume control, a stabilized beat frequency oscillator, a voltage regulator and rectifier stages. A crystal filter is connected between the first de-
tector and first IF stage. Highlighted in the above line-up are:
Crystal Filter - A new highly flextble crystal filter providing an adjustable selectivity characteristic with a wide range from broad-band broad. cast requirements to sharp Amateur single-signal CW reception. A phasing control gives phasing action for the attenuation of interfering singals.

Noise Limiter - A new concept in noise limiter design is introduced in the NC-173 Receiver. This new limiter could be termed "double action plus": and the noise limiting action is equally effective on either phone or CW reception. A panel-mounted threshold control permits adjustment of the level at which limiting action starts.

Voltage Regulator-A voltage regulator tube efficiently minimizes frequency drift in the high Frequency oscillator and also in the beat frequency oscillator. Frequency stability is thereby assured for both phone and $C W$ reception.

Additional refinements include an S-Meter with adjustable sensitivity, a continuously variable tone control and a phono input jack for connection to external apparatus such as a phonograph.

## Controls -

Main Tuning; Bandspread Tuning; Band Switch; RF Gain-AC Off; AF Gain, Send-Receive; AVCMVC, Tone; CWO; CWO Switch, Limiter; Phasing; Selectivity; RF Trimmer.

## Power Input -

Approximately 83 volt-amps; 110/120 volt, $50 / 60$ cycle, single-phase AC (adaptable to $220 / 240$ volt operation as well as operation from batteries).

# - NATIONAL Radio Products $\Leftrightarrow$ 

 NATIONAL 1-10A RECEIVERThe 1-10 A is an improved superregenerative Receiver covering all wave lengths from 1 to 11 meters. The 1-10A is designed for use in both Amateur and Commercial services and the natural advantages inherent in a superregenerative receiver make this one of the simplest and most reliable receivers for use on these wave lengths. This Receiver is suitable for the reception of voice and tone modulated code signals. The 1-10A is supplied in a table mounting model which through virtue of its compact size can be handily used for portable operations.

The circuit of the 1-10A Receiver employs 4 tubes and consists of one stage of tuned RF, a selfquenching superregenerative detector transformer coupled to a first stage of audio which, in turn, is resistance coupled to a power output stage. Receiver controls are held to a minimum and include Audio Gain, Regeneration, RF Trimmer and Main Tuning Controls. Plug-in type coils are used to tune the frequency range of the Receiver in six tuning bands. The location of these coils in the receiver make them readily accessible for interchanging. Tuning is accomplished by a twogang variable capacitor geared to a micrometer dial which reads directly from 0 to 500 and has a linear scale length of approximately 12 feet, reguiring ten revolutions to cover any one band. The scale length plus the vernier action of the

Main Dial gives the operator the equivalent of continuous bandspread tuning on all bands.

The 1-10A Receiver is designed for operation from National type 5886 Power Unit, all voltage dividers, etc., being built in so that but one $B$ voltage lead is necessary. The 5886 Power Unit operates on $105-120$ volts, $50-60 \mathrm{cps}$. This Power Unit furnishes 6.3 volts at 1.6 amperes to the heater circuit and 180 volts at 35 milliamperes to the plate and screen circuits. A 3 volt C battery, mounted in the receiver, is used to supply bias to the RF tube. The 1-10A Receiver may be operated from batteries by connecting suitable batteries to the pins of the 4 prong power plug.

## THE RME 84

FOR HOME-PORTABLE OR MOBILE OPERATION

RME 84 at right, VP-2-6 volt power pack with cable attached, optional for RME 84 in center, CM-1-Carrier Level " S ". Meter with cord and plug, optional for RME 84 at left.

The Coverage Is Complete .540 to 44 Megacycles
An important feature is the continuous coverage ranging from 540 kc to 44 megacycles. This coverage, in addition to providing for the regular broadcast band, takes in the $80,40,20,15$ and 10 meter amateur bands. The calibration is made on a 7 inch diameter scale. In addition, a smooth-running vernier dial gives band spread on any setting of the main scale. The vernier scale makes five complete revolutions for the 180 degree rotation of the tuning condenser.
Seven Tubes Have Been Chosen For The RME 84

1. A 7B7 loctal radio frequency amplifier is ahead of the first detector. 1. A 787 loctal radio frequency ampliner is ahead of the first detector. 2. A 7 S 7 loctal is used as a first detector and radio freque 3. A 7 B 7 serves as the first IF operating at 455
2. A 7 B 7 scond IF further amplifies the signal.
3. A 7B7 sccond IF further amplifies the signal.
4. A 7 K 7 loctal acts as second detector and first audio amplifier. 6. Another 7 K 7 provides the beat frequency and acts as noise limiter. 7. The 6 G 6 G provides the final audio frequency output.
5. A 5 Y 3 GT is the power rectifter tube.

Portability Built Into The RME 84
Conscious of the fact that many thousands of amateurs want a receiver for portable operation, the new RME 84 is equipped with a special socket connection making possible connections to either a $B$ battery and an A battery supply or a similar source of power such as an external vibropack. 135 volts of $B$ and 6 volts of A battery will operate the RME 84 at full power. The drain on the $B$ battery is only 32 milliamperes at 135 volts and the 6 volt $A$ battery provides 1.5 amps, including the two dial lights.

The new noise limiter, of the series type, performs exceptionally well. Also made available for future use with the RME 84 is a signal strength meter to be connected through the special socket located on the rear of the chassis apron.

SENSITIVITY: The average sensitivity of the RME 84 is of the order of 2 microvolts over the entire range of the instrument.

RME 84, CODE HANDY, complete for 115 volt, 60 cycle operation and for use with external battery supply. May also be had for 230 volt, 25 cycle operation at additional cost. f.o.b. Peoria, Illinois, Net Selling Price

## since

1. 550 kc . to $33,000 \mathrm{kc}$. coverage in 6 bands.
2. Two speed tuning control mechanism.
3. Band spread dial an integral part of main dial, giving constant calibration.
4. 5 amateur bands calibrated on band spread dial: $3.5 \mathrm{~m} ., 7 \mathrm{mc} ., 14 \mathrm{~m}, 21 \mathrm{mc} ., 28 \mathrm{mc}$.
5. 0-100 added scale on bandspread dial to facilitate logging on all bands.
6. 5 position variable crystal selectivity with phasing control.
7. Decibel meter calibrated from 0 to R9and past R9 to 96 decibels.
8. Automatic noise suppression.
9. High signal to noise ratio.
10. VR-150 voltage regulator tube.
11. 455 kc . intermediate frequency.
12. Antenna input terminals for single wire or transmission line.
13. Uniform audio response with headset of any impedance from 50 to 30,000 ohms.
14. Four watts of audio output.

# 1 Pa-45 RECEIVER <br> CAL-O-MATIC TWO SPEED TUNING 

The new RME-45 is a sensitive communications receiver which employs the new Cal-O-Matic two speed tuning mechanism to give continuous coverage from 550 kc . to $33,000 \mathrm{kc}$.

Cal-O-Matic tuning has won unqualified approval ever since it was introduced in the first RME receiver. This RME development gives to the user of a 45 the ability to log all stations accurately, since the bandspread dial and the main tuning dial operate from one control shatt.
There are two tuning knobs, concentrically mounted. The smaller knob turns approximately five times while the larger knod is turning once. A frequency band is quickly covered by using the large knob, and the critical adjustment necessary for finding a particular station is made with the smaller one.

Five amateur bands are calibrated on the band spread dial, with plenty of spread on each band. A station once logged can be quickly found again as there is no separated dial to adjust. . . An additional scale of $0-100$ is also incorporated on the band spread dial so that stations on any frequency within the tuning range of the receiver can be accurately logged.
Automatically calibrated over the entire tuning range-that's what Cal-O-Matic means.

Because of their high frequency tuning characteristics, loctal tubes were chosen to perform each rf, if, and af function in the critically balanced superheterodyne circuit used.

Very high stability is obtained in the 45, and one of the reasons is the use of a double spaced rf oscillator condenser and temperature compensated padders.
RME was the first to introduce a crystal filter circuit into a communications receiver many years ago. A variable selectivity crystal filter is a must in a receiver of the quality of the 45 and so is the DB meter, also introduced first in a communications receiver by RME.
Because of its overall sensitivity, its appearance and its ease of accurate tuning and logging, the RME-45, although designed for communications, is nevertheless also an excellent receiver for the home listener. Tube line-up:
7B7-rf. ampl. 7B7-2nd if 7C7-af. ampl. 7S7-det. \& osc. 7B6-det. \& BFO 7C5-beam power 7B7-1st if 7A6-limiter 80-rectifier

The receiver is mounted on a relay rack panel measuring $19^{\prime \prime}$ wide by $101 / 2^{\prime \prime}$ high with four correctly spaced mounting slots on each side. The unit can easily be taken out of the cabinet and is then ready for relay rack mounting.

Gray crinkle finish with black trim gives receiver and speaker a fine appearance.

Controls, from left to right across bottom of panel are: Off-on switch with tone control, headset jack, rf gain control and AVC, tuning control, band-switch, BFO pitch control, BFO off-on switch, audio gain control, transmit-on-standby switch.

RME-45 communications receiver in crinkle gray with black trim cabinet measuring $221 / 4^{\prime \prime}$ wide by $1038^{\prime \prime}$ deep by $11^{\prime \prime}$ high overall, complete with ten matched tubes, including 8" PM speaker in crinkle gray, black trim cabinet, $191 / 8^{\prime \prime}$ wide by $93 / 8^{\prime \prime}$ deep by $101 / 8^{\prime \prime}$ high overall, for 115 volt $50-60$ cycle operation. SUPREME TRANSMITTER CORPORATION 280 NINTH AVENUE. NEW YORK 1, N. Y.

# COMPLETE COMPACT and INEXPENSIVEd 

SUPREME TRANSMITTER Model AF-100, 6-Band, 100 Watt (outpuf) Desk Type Transmitter. Embodies ALL the features most desired by the majority of the amateurs. Designed to cover the amateur bands most frequently used: $10,11,15$, 20, 40 and 80 meters for CW, ICW, AM and FM Phone transmission. This is the very first transmitter offered to the amateur which has the new feature of Frequency Modulation in the band of frequencies assigned for this purpose, namely 27.185 to 27.455 and 29 to 29.7 megacycles. Model AF-100 is continuously tunable throughout the range of each of the amateur bands. A highly stable variable oscillator followed by slug-tuned buffer and doubler stages which are ganged to the oscillator dial simplifies the problem of working through
severe QRM and further enhances the pleasures of easily establishing and retaining QSOs. Band changing is easily accomplished in the exciter by a band selector switch and in the final by the plugging in of a coil for the particular band selected. This unit is one of the simplest to operate-and highly efficient on all bands, for all types of emission.
Front Panel Controls: Oscillator Dial; Final Amplifier Dial; Oscillator Selector Dial; Modulation Selector Dial; Microphone Gain Control; Band Selector Switch; Filament Power Switch; Plate Power Switch; Emission Selector Switch; Standby Control.

Metering: PA Plate Current; PA Grid Current; Modulator Plate Current.

# THE NEW TEMCO SUT 

## TEMCO 75GA Multi-Frequency VFO and CRYSTAL 75 WATT PHONE - 100 WATT CW TRANSMITTER

This new Temco 75/100 watt phone and cw transmitter with multi-frequency VFO and crystal control is causing a sensation, for here at last is the complete rig that puts everything at your fingertips.
It's a typical Temco masterpiece that leads the field in operational simplicity, maximum frequency flexibility and superlative craftsmanship. It covers all 5 amateur bands from 3.5 to 28 megacycles and doesn't require any external equipment to obtain the frequency flexibility needed as greater channel congestion occurs.
All tuning adjustments are at the front and within short reach. Band switching or changing from VFO to crystal control is accomplished with ease. When using crystal control

(The 75 GA accommodates two crystal holders) the transmitter becomes a one-dial unit. For telegraph operation, break-in by the grid block method is employed to assure clear-cut, clickless keying. On phone a high impedance crystal or dynamic mike is used and a built-in relay transfers antenna from transmitter to receiver.
The 75 GA is compact, yet every component is very accessible for easy servicing and it is as excellent in its engineering design as it is handsome in appearance and construction. The only accessories needed to go on the air are mike, key and antenna.
A most striking feature of the 75 GA is the fact that it is also the exciter unit for a 500 watt output power amplifier ( 500 GA .) Never befare has a complete transmitter been so engineered that it can be utilized in its entirety as an integral unit of an enlarged rig. This means that your initial investment in the 75 GA is good forever and represents a substantial saving when stepping up to higher power. Once and for all, Temco engineers have designed equipment that practically eliminates the factor of obsolescence.
Tube Complemeni:

Type Function
1-6J5 VFO
1-6AG7 Class A amplifier or crystal oscillator

TRANSMITTER EQUIPMENT MFG. CO., INC. 345 HUDSON STREET • NEW YORK 14, N.Y.

JAM區S MIULEN

MILLEN RADIO PRODUCTS are divided, for cataloging purposes, into three groups, covered by three separate catalogs:

I Component Parts<br>II Communication Receivers and Transmitters<br>III Laboratory and Measurement Equipment

THIS CONDENSED CONSOLIDATED CATALOG describes and lists a representative group of our standard components, instruments and special products. Our distributors carry in stock our complete line of component parts and amateur receivers and transmitters, but due to the engineering correspondence generally required in connection with the merchandising of the laboratory equipment (described in detail in Catalog 1ii) these instruments are normally sold through our district offices or from the main sales office at the factory. Any of our distributors, however, will, upon request, be happy to place your order on the factory and thus secure for you any of the items they do not normally carry in stock.

MILLEN RADIO COMPONENTS are well designed Modern Parts for Modern Circuits, attractively packaged, moderately priced, and fully guaranteed. They have been designed with a view toward easy and practical application as well as efficient performance. For instance, the terminals are located so as to provide shortest possible leads, mounting feet are designed for easy insertion of screws and socket contacts, so that the solder won't run down inside them and make impossible the insertion of the tube, etc. Thus our slogan "Designed for Application."

THE PRICES IN THIS CATALOG are stricily net for the eastern part of Continental U. S. A. (Prices on some items are slightly higher west of the Rockies and approximately $60 \%$ higher, because of customs duties, etc., in Canada.) All discounts have already been deducted for your convenience. The code numbers used are all that is necessary to give in placing an order. They fully describe each item and also are selected so as to count as only "one word" when sent by telegraph. Most combinations of letters and numerals generally used for this purpose normally count as three words. All prices are subject to change without notice.
OUR DOMESTIC DISTRICT SALES OFFICES are maintained in all principal cities where full information about our products and policies may be promptly obtained by telephone or mail.

OUR EXPORT SALES OFFICE is located in New York City at 9 Rockefeller Plaza, under the direction of Mr. C. Lohman Janik, whose many years of experience in handling export sales and the shipment of radio and electrical apparatus enables us to handle export shipments quickly and efficiently, with a minimum of expense and delay to our customers, in all parts of the world. The central location of our export office in New York City enables us not only to give quick replies to our foreign correspondents, but also to offer the facilities of our office and the services of its staff to our many friends and customers from other countries who normally visit this country through the great port of New York.

GOVERNMENT AND COMMERCIAL APPARATUS. In addition to our standard line of catalog items distributed through our foreign and domestic dealers, we operate a special design and contract manufacturing department where we specialize in the development and manufacture of component parts and complete Transmitters, Receivers, Amplifiers, Control units, etc., for the different government departments and such commercial communication equipment manufacturers as the General Electric Company, the Western Electric Company, the Radio Corporation of America, the Federal Telegraph Company, and many others. We are very much interested in receiving inquiries from commercial equipment manufacturers for this department.
OUR PRODUCTS ARE GUARANTEED in accordance with the terms of the standard uniform guarantee of the Radio Manufacturers Association, in which organization we hold membership.

PATENTS. Our products are manufactured under many patents and paient applications of our own as well as licenses from the principal pools. See special labels attached to products. Trademarks Reg. U. S. Pat. Office.

Copyright 1946

## SECONDARY FREQUENCY STANDARD

A precision frequency standard for both laboratory and production uses, adjustable output, provided at intervals of $10,25,100$ and 1000 kc , with magnitude useful to 50 mc . Harmonic amplifier with tuned plate circuit and panel range switch. 800 cycle modulator with panel control switch. In addition to oscillators, multivibrators, modulators and amplifiers, a built-in defector with phone jack and gain control is incorporated. Selfcontained power supply.
Model 90505, with tubes.
$\$ 155.00$

## ABSORPTION WAVEMETERS

The 90600 series of absorption wavemeters are available in several styles and many different ranges. Most popular is kit of four units, covering range of 3.0 to 140 mc .
Model 90600.
$\$ 18.00$

## FREQUENCY CALIBRATORS

The cavity type frequency calibrator covers a range of 200 to 700 mc ., with a maximum error of not over $0.25 \%$. This range is covered by two plug-in cavity type tuning units, which may be easily interchanged. The calibrator consists of an accurately calibrated cavity-type tuning unit, a crystal detector, a two-stage video amplifier and a peak reading VT voltmeter.
Model 90630, with tubes.
$\$ 375.00$

## SYNCHROSCOPES

The $5^{\prime \prime}$ synchroscopes are available with and without detector-video strips.
Model P-4, with tubes. . . . . . . . . . $\$ 300.00$ Model P-4E, with tubes . . . . . . . . . . 395.00

## OSCILLOSCOPES

The basic type $2^{\prime \prime}$ oscilloscope is complete with power supply, focusing and centering controls and 60 cycle sweep, for use in normal form for transmitter monitoring or as basic unit for addition of specially designed externol sweeps, amplifiers, etc., for specialized applications.
Model 90902, less tubes
$\$ 42.50$

## REGULATED POWER SUPPLIES

A compact uncased, regulated power supply, either for table use in the laboratory or for incorporation as an integral part of larger equipments. 50 watts, with regulated voltage from 0 to 200 volts.
Model 90201, less tubes. .
$\$ 100.00$

## FREQUENCY SHIFTER

A favorite frequency shifter, plugs in, in place of crystal, for instant finger-tip control of carrier frequency. Low drift, chirpless keying, vibration immune, big band spread, accurate calibration.
Model 90700, with fubes. $\$ 42.50$

## 50 WATT TRANSMITTER

Based on an original Handbook design, this flexible unit is ideal for either low power amateur band transmitter use or as an exciter for high power PA stages.
Model 90800, less tubes. . . . . . . $\$ 42.50$

JAMES M MILLEN

## SHAFT LOCKS

In addition to the original No. 10060 and No. 10061 "DESIGNED FOR APPLICATION" shaft locks, we can also furnish such variations as the No. 10062 and No. 10063 for easy thumb operation as illustrafed above. The No. 10061 instantly converts any plain $1 / 4$ shaft" volume control, condenser, etc. from "plain" to "shaft locked" type. Eash to mount in place of regular mounting nut.
No. 10060.............................. $\$ .36$
No. 10061.
No. 10062. .45
No. 10063. .45

## DIAL LOCK

Compact, easy to mount, positive in action, does Compact, easy to mount positive in action, does " $A$ " depresses finger " $B$ " and " $C$ " without imparting any rotary motion to Dial. Single hole mounted. No. 10050. $\$ .45$

## RIGHT ANGLE DRIVE

Extremely compact, with provisions for many methods of mounting. Ideal for operating potentiometers, switches, etc., that must be locoted, for short leads, in remote parts of chassis.
No. 10012.
$\$ 3.75$

## THRU-BUSHING

Efficient, compact, easy ta use and neat appearing. Fits $1 / 4^{\prime \prime}$ hole in chassis. Held in place with a drop of solder or a nick from a crimping foal.
No. 32150.
$\$ .05$

## FLEXIBLE COUPLINGS

The No. 39000 series of Millen "Designed for Application" flexible coupling units include, in addition to improved versions of the conventional types, also such exclusive original designs as the No. 39001 insulated universal joint and the No. 39006 "slideaction" coupling (in both steatite and bakelite insulafion).
The No. 39006 "slide-action" coupling permits longifudinal shaft motion, eccentric shaft motion and out-of-line operation, as well as angular drive without backlash
The No. 39005 is similar to the No. 39001, but is not insulated and is designed for applications where relatively high tarque is required. The steatite insulated No. 39001 has a special anti-backlash ball and socket grip feature, which, however, limits its serviceable operation to torques of six inchpounds, or less. All of the abave illustrated units are for $1 / 4^{\prime \prime}$ shaft and are standard praduction type units.

## CATHODE RAY TUBE SHIELDS

For many years we have speciolized in the design and manufacture of magnetic metal shields af nicaloi and mumetal for cathode ray tubes in our own complete equipment, as well os for applicaions af all other principal complete equipment manufacturers. Stack types as well as special designs to customers' specifications promptly available.

## BEZELS FOR

 CATHODE RAY TUBESBezel of cast cluminum with black wrinkle finish. Camplete with neaprene cushian, green lucite filter scale and four "behind the panel" thumb screws far quick detachment from panel when inserting tube.

## 04000 and 11000 SERIES TRANSMITTING CONDENSERS

A new member of the "Designed for Application" series of transmitting variable air capacitars is the 04000 series with peak voltage ratings of 3000,6000 , and 9000 volts. Right angle drive, 1-1 ratio. Adjustable drive shaft angle for either vertical or sloping panels. Sturdy construction, thick, roundedged, palished aluminum plates with $13 / 4^{\prime \prime}$ radius. Constant impedance, heavy current multiple finger rotor contactor af new design. Available in all normal capacities.
The 11000 series has $16 / 1$ ratio center drive and fixed angle drive shaft.

| Code | Volts | Capacity | Price |
| :---: | :---: | :---: | ---: |
| 11035 | 3000 | 35 | $\$ 6.90$ |
| 11050 | 3000 | 50 | 7.14 |
| 11070 | 3000 | 70 | 7.80 |
| 04050 | 6000 | 50 | 16.00 |
| 04060 | 9000 | 60 | 18.00 |
| 04100 | 6000 | 90 | 18.00 |
| 04200 | 3000 | 205 | 20.00 |

## 12000 and 16000 SERIES

 TRANSMITTING CONDENSERSRigid heavy channeled aluminum endplates. Isolantite insulation, polished or plain edges. One piece rotor contact spring and connection lug. Compact, easy to mount with connector lugs in convenient locations. Same plate sizes as 11000 series above.
The 16000 series has same plate sizes as 04000 series. Also has constant impedance, heavy current, multiple finger rotor contactor of new design. Both 12000 and 16000 series available in single and double sections and many capacities and plate spacing.

## THE 28000-29000 SERIES VARIABLE AIR CAPACITORS

"Designed for Application," double bearings, steatite end plates, cadmium or silver plated brass plates. Single or double section $.022^{\prime \prime}$ or $.066^{\prime \prime}$ air gap. End plate size: $19 / 16^{\prime \prime} \times 111 / 16^{\prime \prime}$. Rotor plate radius: $34^{\prime \prime}$ Shoft lock, rear shaft extension, special mounting brackets, etc., to meet your requirements. The 28000 series has semi-circular rotor plate shape. The 2900 series has approximately straight frequency line rotor plate shape. Prices quoted on request. Many stock sizes.

## DIALS

Just a few of the many stock types of small dials and knobs are illustrated herewith. 10007 is $15 / 8^{\prime \prime}$ diameter, 10009 is $21 / 2^{\prime \prime}$ and 10008 is $31 / 2^{\prime \prime}$.

## I.F. TRANSFORMERS

The Millen "Designed for Application" line of I.F. transformers includes air condenser tuned, mica condenser tuned and permeability tuned types for all applications. Standard stock units are for 465,1600 and 5000 kc . B.F.O. and Crystal Filter units also available.

## JAMES MMULUEN

## TUBE SOCKETS

## DESIGNED FOR APPLICATION

 MODERN SOCKETS for MODERN TUBES! Long Flashover path to chossis permits use with transmitting tubes, 866 rectifiers, etc. Long leakage path between contacts. Contacts are type proven by hundreds of millions already in government, commercial and broadcast service, to be extremely dependable. Sockets may be mounted either with or without metal flange. Mounts in standard size chassis hole. All types have barrier between contacts and chassis. All but octal and crystal sockets also have barriers between individual contacts in addition.The No. 33888 shield is for use with the 33008 octal socket. By its use, the electrostatic isolation of the grid and plate circuits of single-ended metal tubes can be increased to secure greater stability and gain.

The 33087 tube clamp is easy to use, easy to install, effective in function. Available in special sizes for all types of tubes. Single hole mounting. Spring steel, cadmium plated.

Cavity Socket Contact Discs, 33446 are for use with the "Lighthouse" ultra high frequency tube. This set consists of three different size unhardened beryllium copper multifinger contact discs. Heat treating instructions forwarded with each kit for hardening after spinning or forming to frequency requirements.
Voltage regulator dual contact bayonet socket, 33991 black Bakelite insulation and 33992 with low loss high leakage mica filled Bakelite insulation.

## A NEW PHILOSOPHY THE EXPERIENCE BEHIND IT

In amateur radio two groups seem to be slighted - the beginner and the "ham" less than a relative millionaire. Liftle consideration seems given by manufacturers to amateurs short on money, knowledge, or space for their ham "shacks".

Born out of over thirty-five years of radio engineering and production experience, the new products herein catalogued are o sincere effort to go beyond usual high cost and non-essential complexity. Any sane, realistic philosophy seems to demand maximum results for minimum dollar expenditure. We believe that we can best serve all radio amateurs by striving to eliminate features representing costs disproportionate to results. We might do this by cheapening parts . . . by shoddy construction. This is not the SILVER way. It is not the way which has earned honor throughout the world for McMurdo Silver as an engineer as technically honest as he is competent.

Behind each "ATOM-X" equipment are positive thoughts: how to give to amateurs the maximum of results for the minimum of cost and complexity. How to strip the communication problems involved right down to amateur needs. How to cut out costly frills helpful to the oft-fimes busy military or commercial operator . . . who does not bring fond skill to the worlds grandest hobby. This is the SILVER philosophy - to give aciual communication performance streamlined to amateur essentials. Gained is both desirable moneysaving and real growth of technical knowledge through home assembly.
For example, we ve tested and retested to try to find just one u.h.f. receiver better than MODEL 800 - quite regardless of price. MODEL 801 is the time-proven standby of amateur communication - stands up to far more costly receivers in giving sensitive, dependable results. MODEL 802 provides the extremes of "single signal" CW selectivity and band spread - to give you big-receiver results dependably and economically. MODEL 700 has no commercial comparative today - it is low in cost only because of low SILVER overhead and that simplicity deriving almost from genius. MODEL 701 carries on this touch of genius - possibly only another word for extraordinarily broad and thorough experience - to give you a basic amateur transmitter of top-flight design compoct . . . yet easy to build ot home . . . of finished, commercial appearance . . . plenty of punch and power for mighty little money.

These models stem from those special skills which won for McMurdo Silver the Grand Prize awarded for receiver design at the 1937 Paris International Exposition for a 20 -tube set with plenty of convenience "frills". This became the communication receiver of the Bowdoin-Kents Island Arctic expedition . . . as a predecessor served Admiral Byrd in the Antarctic. "Mac" was responsible for production of the first Novy Sonobuoy submarine detectors . . . for the first Loran receivers of Navy and Army Air Forces. for design and production of C.A.A. u.h.f. receivers... of F.C.C. portable heterodyne frequency meter . . . in 1932 Class AB amplification came out of "Mac's" Silver-Marshall laboratories.

We may build conventionalized equipment at usual high costs. Or, we may employ experience unusual in being so wide and so extensive in time and scope as not to be bound to the obvious, to create the modern, streamlined maximum of amateur communication for the minimum of cost. Being amateurs ourselves, we feel that some manufacturer, should so serve by giving to amateurs equipments yielding performance well in excess of their cost by all comparative standards.

Our philosophy is almost identical upon measuring equipment to produce accuracy, ronge, utility closely approaching costly laboratory instruments . . . but at the low prices which volume production of any superior product insures. We are told we have been almost phenomenally successful in this aim during the first year of our activity. It is our single regret that we cannot "kif" measuring instruments - because their find calibration requires costly instrument standards not available to the home builder.

## MODEL 900 "VOMAX" V.T.V.M. AND VISUAL DYNAMIC SIGNAL TRACER

Acceptance of, demand for and satisfaction with "VOMAX" has been so overwhelming that we are told "it is the standard of comparison". Of new and original design exhaustively described in July and August, 1945 QST, in February, 1946 RADIO NEWS, it today receives that sincerest flattery, imitation.
"VOMAX" is a universal multi-meter plus new and exclusive techniques and inventions giving it a frequency range of 20 cycles to over 100 megacycles. It is the new, post-war combination of the service technicians basic tool, the volt-ohm-milliam. meter, plus the accurate r.f. vacuum tube voltmeter seldom found outside the research laboratary able to ignore cost. This is proved by the roster of its users, headed by the U. S. Bureau of Standards in Washington, D.C. and including atamic research laboratories and other supremely competent organizations. It is factory recommended to all BENDIX RADIO distributors and dealers.
"VOMAX" is a stabilized v.f.v.m. from which usual error-producing grid and gas current effects have been eliminated by a new invention. Its d.c. input resistance may be made as high as desired is 51 and 186 megohms for different voltage ranges. "VOMAX" may be used on circuits so sensifive to even light loading as to bar other instruments. The balanced circuits of three dual tubes wipe out usual variations due to difference in aging of separate tubes. and mains voltage fluctuations.
"VOMAX" has been purchased overwhelmingly by serious laboratory workers accepting only the best, and by serious service technicians here and abroad by the thousands. Every week they write " ' $V \bigcirc M A X$ ' is my most essential instrument.... it's far better than I even hoped. . . wouldn't part with it for any price if I couldn't get another'. The features below prove why.

1. New post-wer design. Nof a "warmed-ovar" pfe-war model.
. More than an "electronic" voltmeter. "VOMAX" is a true v.t.v.m. in every voltage, resistance db. function.
2. Complete visual dynamic signal-tracing from 20 cycles through over 100
3. megacycles by withdrawable r.f. probe.

7,5,30, 20,300 and 1800 volifs d.c. at 51 megohms.
Pot $30,75,300,750$ and 3000 volts d.c. at 186 megohms
5. $3,12,30,120,300$ and doubles number of d.c. ronges.
loading of 6.6 megohms, 8 mmfd.
7. $2 / 10$ n through $2 \mathrm{~K}, 20 \mathrm{~K}, 200 \mathrm{~K}$, and 2,20 and 2000 megohms.
8. -10 through $+50 \mathrm{~d} . \mathrm{b}$. ( 0 db . $=1$ mw in 600 n )
10. Absolutely stable. One zero adjustment sets yero for all ranges.
11. Honest, factual accuracy: $\pm 3 \%$ on d.c. $\pm 5 \%$ on a.c. 20 es through 100 mas.; $\pm 2 \%$ of full scale $\pm 1 \%$ of measured resisfance value. (Voltage accuracy is \% of fuli scale.)
12. Non confüsing meter scale. Only 5 color-differentiated scales on openace $4 \%$ " D Arsonval meter for 51 ranges.
13. Meter $100 \%$ protected against overload burnout on $V, n, D b$.
14. "Portably" convenient. Leather handle atop $193 / 8^{\prime \prime} \times 7 \frac{3}{8} 8^{n} \times 5{ }^{\prime}$ s steel cabinet MODEL Total weigh only 900 "VOMAX"
removable r.f, diode prove, 1 ted as above with tubes, permanently cabled

## MODEL 904 CAPACITANCE - RESISTANCE BRIDGE

Accurate measurement of capacitors . . . air, ceramic, mica, paper, oil, electrolytic, etc. . . . and resistors, is a prerequisite to suc assful design and servicing of radio and electronic apparatus. Created for use in our own and other serious design laborotories as was "VOMAX", the high accuracy, tremendous range and extraordinary llexibility of MODEL 904 place it in the class of costly laboratory equipnent heretofore beyond the reach of all but. a few.

MODEL 904 is direct reading in capacifance and resistance upon a 5 " diameter "logarithmic" dial of substantially constant percent age accuracy. A total of eight 100:1 ranges, four for resistance and four for capacitance, cover 10 ohms through 1000 megohms and 10 mmfd . through 1000 mfd . Capacitances down to $1 / 4 \mathrm{mmfd}$. and resistances to $1 / 4$ ohm are directly and accurately measurable as the increments they add to any convenient small value of $C$ or R simultaneously connected to MODEL 904 Bridge. The open dial scale makes measurement of low values easy and accurate. Ac curacy is to $\pm 3 \%$ or better up to 100 megohms. $/ \mathrm{mfd}$., diminishing slightly between 100 and 1000 meg. $/ \mathrm{mfd}$. The two high $C$ and $R$ ranges employ special "expanding" circuits to reach 1000 megahms/mid. accurately. Sensitivity control permits optimum null in dication over the great range of MODEL 904.
MODEL 904 enables direct measurement of all types of capacitors with from 0 up to 500 volts internal d.c. potential applied during measurement. This same confinuously variable built-in d.c. potential is applicable to electrolytic capcitors, and to specimens in insulation resistance testing. One terminal of the unit being measured may be grounded . . . capacitors may be measured without removing them from apparafus in most instances.

The power factor control is calibrated directly in \% powerfactor $0.50 \%$ for .1 through 1000 mfd , and $0.5 \%$ for .001 through .1 mfd . Power factor accuracy is $5 \%$. A 3-position lever switch controls the electron ray tube. Position 1 gives bridge balance indication. Positions No. 2 and No. 3 switch the "electron eye" successively into an 0.10 and 0.100 ma . milliammeter for direct indication of capacitor leakage currents.

Style, size, weight and convenience ore identical with "VOMAX" Quality of parts and construction parallel "VOMAX'"... to bring to the serious technician heretofore unable to afford them the accuracy and range of costly laboratory equipment.

MODEL 904 CR BRIDGE draws 35 watts from any 105/125 voli, 50/60 cycle a.c. line. Complete with 1 - 6 SN7GT bridge amplifier, 1 - 6E5 electron ray indicator and 1-5Y3GT rectifier tubes. A.C: input cord and plug and one pair of $30^{\prime \prime}$ test leads with alligator clips ore included. Size and weight identical to "VOMAX". Code CABRI.

NET PRICE $\$ 49.90$

## MODEL 905 "SPARX" DYNAMIC SIGNAL TRACER

In the design laboratory "VOMAX" provides the direct r.f. voltage measurements essential to design of radio receivers and other equipment. So providing, it is a visual dynamic signal tracer. Because the service technician pressed for time affen prefers to follow a signal from antenna to speaker audibly, MODEL 905 "SPARX" has been developed. "SPARX" also provides visual indication of signal strengths upon its electron-ray indicator, and so is a gain-measuring set. Gain or loss may be taken as the difference between its linear potentiometer readings required to produce identical electron-ray defection at input and oufput of an amplifier or any other usual electrical transmission element.
"SPARX" is a money and time-saving tool. With it the service technician con audibly trace a signal, stage by stage, grid to plate and successively throughout an entire receiver. Gain or loss is indicated by changes in signal volume; and by electron-ray tube for all except the weakest antenna input signals. Signal quality is automatically tested at every circuit point, as are hum, noise, open and short circuits. Even the presence of grid and plate supoly voltages is indicated visually! It is so sensitive as to make audible neaby broadcasting stations when its prod is contacted to the loop of usual small a.c.-d.c. set. It may substitute for inoperative stoges in PA amplifiers in emergency.

The red test prod contains isolating capacitor, resistor, and one of the new radar u.h.f. crystal diodes. This new SILVER combination loads a circuit being tested with only 3 mmfd . and higher than .5 megohm - so little as not to disturb usual receiver r.f., i.f. or a.f. circuits. In the cabinet are a three stage, 65 db . gain a.f. amplifier using $2-6 C 4$ and $1-6 A K 6$ tubes, gain control, 5 Y $3 G T$ transformer power supply, PM loud speaker and switching circuits. Useful frequency ronge is from 90 cycles to over 900 megacycles.

One panel switch permits 6E5 electron-ray tube to indicate signal input; super-heterodyne oscillotor or other valtages (with the gain control giving a wide range indeed as a voltmeter). or output voltage. A second lever switch connects the "SPARX" amplifier to its built-in speaker; to the output jacks; or connects speaker to output jacks. "SPARX" is a detector ond audio amplifier; an audio amplifier alone; a test speaker. Such flexibility makes easy the dynamic testing of all radio receiver circuits, phonogroph pick-ups, loud speakers, microphones, etc. Power supply transformer isolates a.c. mains from a.c.-d.c. or other set grounds.

MODEL 905 "SPARX". Complete as above, factory builf and lested, with tubes, $48^{\prime \prime}$ shielded red prod and $48^{\prime \prime}$ black alligator clip lead. Input 105/125 volts, 50/60 cycles a.c. Size and weight identical to "VOMAX". Code SPARX. NET PRICE $\$ 39.90$

194G.MAIN STREET, HARTFORD 3, CONNECTICUT, U. S. A. IN CANADA-MEMURDO SILVER DIVISION, GENERALRADIONICS,LTD. 46S. CHURCH STREET - TORONIO, ONIARIO, CANADA.

## ILLUSTRATION NOT READY AT TIME OF PRINTING. SIZE STYLE AND APPEARANCE SUBSTANTIALLY EQUAL TO MODEL 904 BRIDGE, BUT WITH MICROVOLT METER REPLACING $6 E 5$ INDICATOR TUBE.

## MODEL 906 FM/AM SIGNAL GENERATOR

MODEL 906 is the first signal generator to provide fundamental frequency coverage of all usual $A M$ bands . . . plus built-in frequency modulation and total range including the new FM bands up through 170 megacycles. As such it is an essential "must" for receiver design laboratories and for any service technician who expects to cope with post-war servicing of both AM and FM receivers. . . not to mention television sets.

MODEL 906 covers the frequency range of 90 kilocycles up through 170 megacycles in a potal of eight ranges, each using individual, rotary-furret mounted, inductors wound upon Steatite forms, each trimmed by TYPE 619 air-dielectric capacitors. Conventional wave-change switches are eliminated in favor of plug-in coils successively rotated to bring their short contact pins into contact with short phospher-bronze contact springs. This reduces lead inductance and capacitance and provides excellent operation at all frequencies. This construction is typical of instruments costing around $\$ 400.00 \ldots$ is basic laboratory design for fine highfrequency signal generators.

MODEL 906 circuit is MO.PA, using one triode of a 6.16 miniature dual u.h.f tube as oscillator and the second section as buffer amplifier. This buffer amplifier feeds a two-section, individually shielded resistive aftenuator patterned after the best laboratory instrument designs. Output voltage is indicated by a u.h.f. radartype crystal diode ond panel meter, calibrated directly in microvolts. One attenuator knob controls output in microvolts as indicated by the meter; the second aftenuator knob multiplies the basic range of $0-10$ microvolts by facfors of $10,100,1000,10,000$ and $100,000 \ldots$ to yield output continuously variable and directly metered from 0 to 1 volts. Through careful design and discrete location of grounds . . . through precise design and skillful multiple shielding . . . strays are held to a minimum.

One 6SN7GT dual friode functions as a Wein Bridge, 400is R.C oscillator of variable amplitude. This may be cut out, used to amplitude modulate the signal generator, or to provide frequency modulation at any output frequency. Thus variable frequency sweep is provided for 455 kcs . i.f. amplifier alignment, etc., plus frequency modulation with swing variable up to 400 kilocycles at police, communication and broadcasf FM frequencies. Amplitude modulation percentage is also variable 0 to $50 \%$. An $O B 2$ miniature voltage regular eliminates frequency shift due to a.c. mains flucluations.

MODEL 906 AM/FM SIGNAL GENERATOR. Complete as above with $105 / 125$ volt, $50 / 60$ cycle built-in-mains isolated a.c. power supply, tubes and 50 ohm shielded output cable and connector. Size and style identical to "VOMAX"; weight in carton 18 lbs. Code SIGEN. NET PRICE ONLY $\$ 89.90$

## MODEL 800 "ATOM-X" U.H.F. RECEIVER 144-240 MCS.

MODEL 800 Receiver is the first of a line of amateur/commercial communication equipment christened "ATOM-X". to describe super power and performance in a "package" small enough for crowded apartments and portable/mobile work, yet giving eX. travalue and punch worthy of the most serious home station.

Starting out to be a super-heterodyne, MODEL 800 was found to be too selective for present-day operation in the $144 / 148$ and $235 / 240$ megacycle amateur bands. Comparison with the new non-radiating super-regenerative receiver described by E. P. Tiltion, W1HDO, in February, 1946 OST revealed the latter to be the best u.h.f. communication receiver our engineers had ever seen. So we reduced W1HDO'S superb receiver to form capable of easy home construction and finished, commercial appearance.

Inductive funing a la Byron Goodman (see Nov., 1945.OST) gives MODEL 800 unusually high LC ratio for optimum sensitivity in the 6 AK 5 high-gain tuned r.f. stage and in the 6C4 super-regenerative detector circuit, which is followed by a 6AU6 pentode first audio stage driving a 6 AK6 power amplifier to produce a receiver having low internal noise, excellent usable selectivity, practically zero radiation and plenty of punch and power to bring in those weok signals. A built-in PM loud speaker completes what is confidently believed to be a supremely oufstanding performer - a receiver better for present-day u.h.f. operation than the most expensive superhets we ve tested.

Tuning is by the antenna knob, so non-critical as to require only setting to middle of band in ordinary operation, and by the main dial which spreads each band out over most of its eight revolutions and 7 feet-plus of effective dial length - band spread sufficient even for stable crystal-controlled transmitters like MODEL 700 which should soon be the standard even up to 240 megacycles.

Power supply can be anything from batteries to vibropack or simple a.c. power supply unit. Power consumption is but 1.05 amperes at .6 .3 volts, c.c. ord.c., and 40 ma. at 735 volts d.c.

MODEL 800 "ATOM-X" U.H.F. RECEIVER. As above, less power supply,

MODEL 800K "ATOM-X" U.H.F. RECEIVER KIT. Complete as above, but unassembled kit containing all necessory parts and instructions for home censtruction. Less No. 1051 cabinet, tubes and power supply Packed in corton

## MODEL 801 "ATOM-X" HIGH FREQUENCY RECEIVER

Hewing to the principle of maximum receiver performance for the utter minimum cost, MODEL 801 is the basic design which has been the bed-rock of amateur operation for nearly thirly years, now modernized and streamlined to new performance. A 6BA6 tuned r.f. stage precedes a GAU6 regenerative detector which drives a 6C4 a.f. amplifier feeding 6AK'6 power amplifier penfode. Regeneration control is extraordinarily smooth, entirely free fram fringe-howl and stickiness. The r.f. stage reduces: radiation to negligable proportions when the detector is oscillating for CW reception. Sensitivity is such that European short-wave broadcast stations can be "played" on the built-in PM loud speaker on a short indoor antenna in Hartford quite regularly-W6' likewise. Plug-in coils wound upon TYPE 185 "Micanol" forms make for short leads and maximum efficiency in combination with Series 600 Steatite insulated funing capacifors. The relatively noncritical antenna funing capacitor is directly controlled. The very selective detector circuit is driven through the $16: 1$ spring-loaded gear train of MODEL 800 U.H.F. receiver to give 800 dial divisions spread out over more than 7 linear feet of effective dial scale length. The 0-8 revolution-counting dial is visible through panel window to upper left of main $31 / 2^{\prime \prime}$ diameter dial.
Smooth regeneration control permitting easy adiustment to maximum sensitivity, plus gudio volume control and headphone jack give completeness of control which makes this powerful "atom" of semsifivity stand up beside big super-heterodyne receivers when it comes to bringing in weak DX sionals clearly and easily. Dry battery operation is feasible with either 0.3 or 1.4 volt tube models.
Moder but is a necessity to every amareur, beeinner or oldtimer, not only as a fine eceiver, but as a piece of sest equipment which will enable him to check frequencies more occurately than can an absorption wovemeter and to defermine presence and Irequency of weak signats in construction of his own tronsmitters ond receivers.
Harmonics of MODEL 801 are useful up to 950 megacycles and beyond. MODEL 801 will pive an excellent arcount of itself up through the $50 / 54$ megacycle band 801 will oive on excellent account of itself up through
where frequency-stable transmiters are now mandatory. each GBA6, 6AUB, $6 C 4$ 6AK $\sigma$ tubes ond power supply. Size $10^{01} \times 5^{\prime \prime} \times 51 /$, Style ond hinish identical
 MODEL 801K RECEIVER KIT. Complete as above but unassembled kit contoining all necessary ports and instructions for home construction. Less cobinet, tubes and power supply. ## MODEL 802 HIGH FREQUENCY "SIGNLE SIGNAL" SUPER-HETERODYNE

MODEL 802 is a full-performance, 6 -band, super-het receiver designed especially for amateur communication. Streamlined and modernized through new circuit elements and new tubes, it carries forward the A.R.R.L: Handbook teaching that one may escape costly crystal filters to get single signal CW selectivity, and obtain nicely variable selectivity for phone receptian too, by using one regenerative i.f. amplifier. That this is unquestionably the way to get the most for the least, thousands of amateurs who have built the OST designs hove learned to their profit.
In addition to such extreme and variable selectivity usually found only in many times more costly receivers. MODEL 802 gives other features of tremendous value. Covering the 3.5-4.0, 7-7.3, 14-14.4, 21-21.5, and 27-30 megacycle bands, it also includes the new 6 -meter, $50-54 \mathrm{mcs}$. band. If does this with each band spread over most of an effective dial length of over seven feet. Eight revolutions of the $31 / 2^{\prime \prime}$ main funing dial give that extreme of band-spread so essential for getting through on amateur bands soon to be more crowded than ever belore and to give precise relogging. Antenna funing is separate for precise circuit tracking, yet not critical as to require constant resetting. I.f. transformers are 'uned low-loss insulation is Steatite and mica-bakelite; tubes vew; beat frequency oscillator is variable i two audio amplific. : es $^{\text {a }}$ give volume to spare; complete r.f. and i.f. gain confrol, headphone jack, builf-in PM loud speaker and series-valve noise limiter. Antenna and oscillator-tuning is new, inductive, as in MODEL 800 , for maximum gain.
MODEL 802 employs a 6 BE 6 first detector/electron coupled oscillator, 6BA6 regenerative single-signal variable-selectivity 455 kcs . i.f. amplifier, 6 J 6 dual u.h.f. triode infinite impedance second detector and beat oscillator, 6 J 6 noise limiter and 1 st a.f. amplifier, and 6AK6 power pentode 2nd a.f. amplifier. Power supply can be a.c. pack, vibropack or batteries-anything capable of supplying 1.65 amperes at 6 volts a.c. or d.c. and 135 volts at 50 ma . on up to. 250 volis d.c. at 60 mo .
MODEL 809 SINGLE SIGNAL RECEIVER. Complefe as obove, less power supply, 1.6 BAG 1-6EEO, Q-6JG ond 1-6AK6 tubes ( 8 -tute performance plus) and coils.
 MODEL' gOZK SINGLÉ SIGNAL RECEIVER KII. Complete as obove, but unassembled kit contoining oll necessary ports and instructions for home construction. Less No. 1051 cobinet, subes and power supply. Pocked in carton

## MODEL 700 "ATOM-X" U.H.F. TRANSMITTER

MODEL 700 TRANSMITTER pioneers the shift from energyspreading modulated oscillators to energy concentrating MO.PA crystal control in the 140/144 and 235/240 megacycle bands. with the reduced inferference and increased power effectiveness which frequency stability brings.
Compact almost beyond belief, its "ATOM-X" design houses in a cube only $10^{\prime \prime} \times 5 \times 514^{\prime \prime}$ a complete two-band transmitter and voice modulator, including all funed circuits for two u.h.f. bands! The inferior construction is open and easy of assembly through new SIL VER design. The circuit uses ane 6AQ5 (miniature 6V6GT) as a Tritet crystal oscillator tripling in its plate circuit to drive a 6C4 frequency doubler. A second 6C4 acts as a frequency doubler For $144 / 148 \mathrm{mcs}$., or as a tripler for 235/240 mcs. This second multiplier drives an 832 push-pull beam power amplifier to 28 watts input. Crystal frequencies for $144 / 148$ mcs. may lie between 19 and $12.333+$ megacycles ( $1 / 12$ th operating frequency ; between 13.005 + and $13.333+$ megacycles for $235 / 240$ megacycles ( $1 / 18$ th operating frequency).
All inductors are permanently soldered to TYPE 619 funing capacitors, internally adjustable. The 832 employs a long-line plate circuit with adjustable hair-pin oufput coupling loop. This line is tuned by a fifth TYPE 619 capacitor. Band shift requires only chance of crystal and refuning of five TYPE 619 capacitors. Pane lamps eliminate costly meters to continuously register r.f. crystal current, and cathode currents of the three following tubes.
The built-in modulator employs two 6AQ5 beam power tubes in push-pull, and is complete with modulation and input transformers for operation with any good carbon microphone, current for which is supplied by the fransmifter. Modulation capability is $100 \%$ for 28 watts input to the final amplifier. Power output of 5 watts at 240 mcs. and 8 watts or more at 144 mcs. is customary with a 300 volt plate supply - plenty of power to cut a swath through these bands when concentrated by crystal frequency stability. Crystal socket accepts any of the new compact war-time holders having $1 / 2^{\prime \prime}$ pin center-spacing, such as Crystal Research Lab. we used.

First air fests were W1IJ to W1HDQ - 45 miles from Madison to West Harfford, Connecticut . . . a terrain span so unfavorable that no previous W1IJ rig had ever bridged it.

MODEL 700 U.H.F. TRANSMITYER. Complete as obove, less 3 - 6 AOS, $9-6 C 4,1$ - 832 fubes, power supply microphone and crystol. Size and

MODEL 700 K TRANSMITTER KIT. Complete as above, but unassembled kit cantaining all necessary ports and instructions far home, construction. Less cabinet,

## MODEL 701 "ATOM-X" 75-WATT TRANSMITTER

"ATOM-X" is most descriptive of power and punch in amazingly small size when applied to MODEL 701 Transmitter, for it is a power-house in miniature. Easy to construct as a result of new and unique SILVER design, it is a modern, 6 -band transmitter which will take 75 watts input to its 807 final amplifier at any frequency from 3.5 through 54 megacycles. It closely follows A.R.R.L. Handbaok teachings to get maximum results for minimum size and cost.
One 6AQ5 miniature beam tetrode functions as Tritet crystal oscillator, working straight through, doubling or quadrupling in its plate circuit to drive an 807 beam power amplifier. Panel controls are Tritet cathode, oscillator plate and final amplifier plate tuning, all Series 600 Steatite insulated capacitors. Tune-up and operation are sure-fire and positive. Lifting cabinet lid reveals crystal (new military $1 / 2^{\prime \prime}$ pin center-spacing) socket and three TYPE 125 plug-in coils accessible along top rear of front panel, in easy reach for band changing. Two dial lamps visible through panel grommets indicate crystal current and final amplifier plate current. The need for costly meters in tune-up or operation is eliminated, but with performance of essential circuits clearly and continuously monifored. Crystal lamp acts as fuse to prevent fracturing of crystal due to possible tune-up overload.
CW power output in all bands, 3.5 through 30.0 mcs., is a nominal 50 watts for 75 watts final input on crystal fundamental or second harmonic. Power output when quadrupling crystal frequency falls off somewhat, as in 50-54 mcs. band where a crystal lying between 12.5 and 13.5 mcs . must be used.
Buift-in 'phone modulator is identical to that of MODEL 700 and provides 14 watts oudio output to $100 \%$ modulate 28 watts final amplifier plate and screen input Though modulation falls only about 2.3 db . at 75 watts input, plate vothoee should be reduced when switching to 'phone operation to reduce interference to other tations. Shiff from CW to voice is by removing key plua and inserting microphone break-in operation oscillator cathode keying eliminates "chirps" and permits break-in operation
with a serious, stable and effective easy, sure and certain way to get an the air book or "shack" space precludes a "rock -crusher". For portable operation MODEL 701 leoves little to be desired, so small and campact is it, yet so powerful for its size and cost: It is an ideal driver for high -power f.f. amplifiers.

1-807 70175 WAII TRANSMIITER. Complete as above less 3-6AQ5, $1-807$ tubes, power supply, microphone, key and crystal. Size, inish and weight

## Werreurab Silver Company

INCANADA - MCMURDOSILVERDIVISION, GENERAIVRADIONICS ITO 405 CHURCH STREET - TORONIO, ONTARIO, CANADA.

## MODEL 903 ABSORPTION FREQUENCY METER

In transmitter design and construction by the amateur in his shop or in the commercial laboratory, few instruments are as necessary as the absorption wave-meter. With it operation of oscillator, amplifier and double stage's . . . super-regenerative and other receivers may be investigated and checked rapidly and effectively. Cf particular importonce, frequency multiplying stages driven by o low frequency oscillator can be checked to insurer output on the correct harmonic.
MODEL 903 Absorptian Frequency Meter covers the unusually wide frequency range from 1600 kcs . up through the new amoteur and civilian 400/500 megacycle ranges. It consists of an etched aluminum panel carrying a 600 -series, low:loss Steatite insulated funing capacitor, inductor socket and resonance-indicating lamp and sacket. A knob and hair-line poinfer permit accurate setting of the tuning capacitor to any point upon eighi scales, seven directly calibrated frequency ranges, the eighth scale 0-100. With suitable inductor plugged into the rear socket and held near a transmitter tank circuit, resonance and approximate frequency is indicated either by dip of plate current meter or by the indicator lamp.
The extreme frequency range of MODEL 903 Absarption Frequency Meier is made possible by two different types of funed circuits. Upon six ranges the tuning capacitor is in parallel with the selected inductor wound upon a low-loss TYPE 125 "Micanol" plug-in form and functions as a conventional parallel-tuned resonant circuit. Upon the seventh, or $400 / 500$ megacycle range, the inductor is a plug-in quarter-wave transmission line with series funing.
MODEL 903 ABSORPTION FREQUENCY METER. Complete as above, 7 -band, with calibrated, etched aluminum panel and indicator lamp, less inductors. Size $31 / 2^{\prime \prime}$ square, $334^{\prime \prime}$ deep overall. Packed in substantial carton $333^{\prime \prime} \times 33^{\prime \prime \prime} \times 4^{\prime \prime \prime} ;$ weight overall. TYPE 106 INDUCTOR. Plug-in quarter-wave transmission line. Range $400 / 500 \mathrm{mcs}$. No indicator lamp coupling coil. Other wise as above. Code SEVIN.

NET PRICE $\$ .75$

## MODEL 907 SIGNAL QUALITY AND KEYING MONITOR

There's a story behind MODEL 907. One Sunday morning, shortly after the 10 -meter band was reopened, a very famous amateur indeed called "Mac" and said "I want to know what my "bug" keying and my signal actuolly sound like. Why don't you do something for me and thousands of other amateurs?" So we went to work, with MODEL 907 as the tongible result. Of "ATOM-X" size, it's small enough to take practically no room on the omateur operating desk, where it will provide audible monitoring of keying, quality and frequency of the actual signal you pui on the air. Basically MODEL 907 is a simple unfuned receiver using a 12AT6 a.f. amplifier pentode, a 12ATO diode detector, 5085 a.f. power amplifier and 35 W 4 rectifier. As such it serves as an ideal phone signal monitor, picking up the transmitter signal by a small length of antenna wire brought out of its cabinet. For CW telegraphy it is, a gcad and stable frequency menitör, for the tricde section of the 12 ATO functions as a high-C, stable beating oscillator. This oscillator is tuned by a 600-Series capacitor driven by a $16: 1$ preloaded gear train actuated by the $0-100$ division, $31 / 2^{\prime \prime}$ diameter dial. A lever swifch on the panel selects ranges of 3.5-4, 7-7.3 and 12.5-15 megacycles. Each band covers most of the 800 dial divisions for accurate readability. Effective dial length is nearly 88", or over 7 feet. In operation MODEL 907 Monitor may be left on permanently to insure maximum oscillator frequency stability, since it draws but 20 watts from the a.c. mains. With a length of "antenna" pick-up wire determined by experiment, it is tuned to produce the desired audio beat note with the CW transmitter and monitor signal valume adjusted with the panel r.f. input gain control. The keyed signal is audible through the built-in loud speaker, or headphone jack. By adding two 1 mfd paper condensers and two leads, the monitoring signal may be fed right into. the regular receiver to give "side-tone" monitoring. For phone operation the oscillator is simply tuned away from the transmitter frequency to yield no beat-note. Adding a key and paper condenser makes it a fine code practice oscillator, phone ar speaker output of ample volume and power.
105/125 volt, $25 / 60$ cycle a.c. operated, MODEL 907 Monifor cabinet and panel is insulafed from the mains circuif to avoid danger of shock. It provides perpetual monitoring of CW signal auality, frequency and keying; of phone qualify (and phone carrier frequency when desired) and so is an essenfial part of any truly complete amateur station where the operators interest is in putting out the best possible signal at all times. Harmonics of basic frequency ranges provide pperation at 21-21.5, 27-30 . . 50-54 megacycles.
MODEL 907 MONITOR. Complete as above in "ATOM-X" size of $10^{\prime \prime}$ long, $5^{\prime \prime}$ high, $5^{1 / 4^{\prime \prime}}$ deep, less 2 . $12 \mathrm{ATO}, 1.50 \mathrm{M}$, and 1.35 W 4 tube
 MODEL 907 K MONITOR KII. Complefe as above but unassembled kit containing
all necessary ports for home construction. Less cabinet and tubes. Pocked in
cartion $1012^{\prime \prime} \times 51 / 2^{\prime \prime} \times 51 / 2^{\prime 2}$; weight 5 los. Code MOKIT. NETPRICE $\$ 19.95$

WS CHURCH STREEI- IORONTO. ONTARIO. CANADA.

## MINIATURE - U.H.F. STEATITE TUNING CAPACITORS

The first of an ever-growing line of new tuning capacitors, the 600 -series is familiar in appearance. Their small size makes Series 600 capacitors ideal for use where space is at a premium . . . for internally-adjustable band-sef capacitors. . . far u.h.f. tuning up to 500 megacycles and beyond. They are most useful for i.t. transformer tuning, and particularly for ulfra-compact transmitters and receivers.
Plates are of aluminum, rotor shaft is carried in spring-loaded, precisely machined single bearing free of back-lash and play Metal parts other than aluminum are cadmium plated for corrosion resistance and fine appearance. Stator tie rods are bonded together by soldered link to reduce self-inductance. Steatite end plates carry two square mounting studs $3 / 32$ " high, tapped $4 / 40$, with centers spaced $21 / 32^{\prime \prime}$ on shaft center-line. Shaft is $1 / 4^{\prime \prime}$ diameter $\times 34^{\prime \prime}$ long for knob attachment in front of panel.
Series 600 capacitors hove $1 / 4^{\prime \prime}$ thick ceramic end-plates $15 / 16^{\prime \prime}$ wide, $1 / 2^{\prime \prime}$ high above and $23 \sqrt[32]{ }{ }^{\prime \prime}$ long below shaft center. All are identical in construction, differing only in depth behind panel as a function of capacitance. Each stator rod projects $1 / 4^{\prime \prime}$ behind plate assembly and is grooved for soldering connections. Three-eared bronze rotor spring has solder lug extending rewardly for rotor connection. Rotor is ungrounded. Plate spacing is $.015^{\prime \prime}$. Each is individually packed in carton. Code is letters "CA" followed by the maximum capacitance figure.

| Type Number | CAPACITANCE <br> Max. Min. | Number of Plates | Depth | Net Price |
| :---: | :---: | :---: | :---: | :---: |

triode. Overall diameter $113 / 6^{\prime \prime}$, overall height $3 / 8^{\prime \prime}$. Mounts by one $3 / 4$ hole
 to pass acorn tube body between two No. 27 holes on 1 A6. centers. Packed TYPE 503 ACORN STEATITE SOCKET: Same as Type 502 except with five. contacts for 900 -series acorn tubes. Code fl AC-Net Price $\$ .60$.
TYPE 504 SHIELDED MINIATURE STEATITE SOCKET: Steatife body carries seven silver-plated, reely hoating, full-grip spring contacis to accept alt 7 -pin
miniature tube fypes. Body is firmly clamped in metal saddle extending upward miniature tube fypes. Body is firmly clamped in metal sadde extending upward $3 / 4^{"}$ as partial shield and to prevent glass breakage dus io rocking tube in tomoval. Cadmium pated containing coil spring to firmly retain tube in socket. Mounis in one $5 / 8^{\prime \prime}$ hole between two $1 / 8^{\prime \prime}$ holes on $7 / 8^{\prime \prime}$ centers. Overall diameter ${ }^{15}{ }^{16}{ }^{\prime \prime}$, overall length $21 / 2$ ". Packed in individual carton. Shipping weight 3 oz. Code STEMI. Net Price $\$ 75$.
TYPE 505 B MINHATURE LOW-LOSS SOCKET. Of construction paralleting Types 500 and 504 sockers, TYPE 505 B is a miniature low-loss, metal saddle mounted, mica-bakelite socket. Mounts above or below chassis with $5 / 8$ socket
hale between two No. 32 holes on $7 /$ " $^{\text {s chenters. In carton, shipping weight }}$ hale between iwo No. 32 holes on
TYPE 506 STEATITE TRANSMITIING SOCKET: Designed for $826,829,839$, etc, tubes...7-pin glass button bases. Steatite base $25 / 8^{\prime \prime}$ square, with four $3 / 6$ bossed mounting holes at corners of $1788^{\prime \prime}$ square mounts beneath $2 / 8$ " chassis hole. Contacts are two-piece, spring reintorced, keyed into base to prevent turning. Packed in individual carton. TYPE 5075 PHi N 5075 PIN JUMBO STEATITE SOCKET: Same as TYPE 605 excepl designed
for $803,4-125$ A and other tubes having "jumbo" 5 -pin bases. Code STEJU.

TYPE 508 7-PIN GIANT STEATITE SOCKET: Same as TYPE 605 except designed for 813
$\$ 1.10$.

## TYPE 125 PLUG-IN COIL FORM

Recognizing the excellent high-frequency in sulating characteristics and the dimensional stability of RCA S micanol fransmitting tube amateurs and experimenters for use as coil forms, plugs, elc. They are most convenient for winding receiver and transmitter inducrors, pluain or fixed, for housing and protecting airwound u.h.f. coils, and for transmitter coils for plate inputs up to 75 watfs. Winding space is drilled. TYPE 125 forms fit standard 5 -pin tube sockets and are equipped with five substantial nickel-plated contact pins.
IYPE 125 PLUG-IN CORL FORM. Size $13 / 8 "$ $\times 132^{\prime \prime}$ long. 5 pins project $9 / 16^{\prime \prime}$ below solid
end. In carton size $112^{\prime \prime} \times 12^{\prime \prime} \times 14^{\prime \prime}$ end. In carton size $112^{\prime \prime} \times 11 / 2^{\prime \prime} \times 134^{\prime \prime} ;$
weight 2 oz. Code PLUCO. Net Price $\$ . .15^{\prime}$

7 THundo Silver Company

## TYPE 180 ROTARY

## 3.5-54 MCS. TRANSMITTING INDUCTOR

TYPE 180 Rotary Inductor brings to the radio amateur for the first time the military/commercial type of multi-band transmitting coil. TYPE 180 replaces the six usual bulky plug-in coils required to cover the 3.5 through 54 mcs. bands! It eliminates costly variable capacitors, substituling small fixed ceramic or air condensors selected by a panel switch for bond changing. In oscillator and fre-quency-meter construction TYPE 180 provides extreme bandspread through its multi-revolution $233 \mathbf{4}^{\prime \prime}$ diameter $0-100$ division main dial and positively locked furn-counting rear-of-panel dial viewed through a $5 / 16^{\prime \prime}$ diameter panel window immediately above the fiducial marker.
Wound of No. 12 tinned copper wire upon threaded $21 / 4^{\prime \prime}$ diameter low-loss Steatite form, division of this winding into two discrete sections at critical inductance and spacing enables the single coil to cover the 3.5-4, 7-7.3, 14-14.4, 21-21.5, 27-30 and 50-54 megacycle amateur bonds with excellent. $Q$. Power handling capacity is up to 500 wotts plate input, while heavy, rugged and substantial construction, coupled with positive lateral retention of the trolley-rod makes for extraordinarily high accuracy of resetability in frequency meter construction. TYPE 180 is a direct descendent of the rotary inductor of F.C.C.'s McMurdo Silverdesigned portable heterodyne frequency meter.
Positive, spring-loaded contact is made af both end-plates to the rotor shafts terminating the coil winding, as well as to both ends of the trolley-rod carrying the movable contact-roller. A fwo-turn coupling coil is mounted on the inside face of the rear Steatite end-plate with appropriate terminals thereon. Two $6 / 32$ tapped holes in the boltom edge of each end plate provide for chassis mounting. Eight No. 26 heles, one at each corner of both endplates allow close and convenient mounting of associated paris. Four screws and spacers are supplied for $1 / 16^{\prime \prime}$ to $1 / 4^{\prime \prime}$ thick fronspanel mounting where desired.
TYPE 180 ROTARY INDUCTOR. As above, 3.5 through 54 mcs. complete with $234^{\prime \prime}$ 0-100 polished black anodized, whitefilled direct-drive main dial with $15 / 8^{\prime \prime}$. bakelite knob, $\cdot 35 / 8^{\prime \prime \prime}$, $0-30$ rear-of-panel turn-counting dial and mounting hardware. Size $71 / 8^{\prime \prime}$ deep behind panel, $41 / 8^{\prime \prime}$ high, $21 / 2^{\prime \prime}$ wide. In carton $8^{\prime \prime} \times 41 / 2^{\prime \prime} \times 412^{\prime \prime}$; Weight 5 : lbs. Code ROIND. In carton $8^{\prime \prime} \times 41 / 2^{\prime \prime} \times 412^{\prime \prime}$; Weight $5:$ lbs. Code ROIND. $\$ 6.90$
NET PRICE
TYPE 180 A INDUCTOR. Inductor only as above. For use with variable tuning capacitor of 80 mmfd . or more capacity. Taps may be soldered to turns so switch or fexible lead and clip may be used for band changing. Size $21 / 4^{\prime \prime}$ diameter, $55 / 8^{\prime \prime}$ long. Mounts by four 4/40 screws supplied tapped into either end on $21 / 6^{\prime \prime \prime}$ diameter circle. In carion, size $6^{\prime \prime} \times 3^{\prime \prime} \times 3^{\prime \prime}$; weight 2 lbs . Code STIND. NET PRICE $\$ 2.25$

## TYPE 619 HIGH -Q AIR TRIMMER CAPACITOR

A new and novel air-dielectric capacitor of unusually high $O$, extraordinary stability both mechanical and electrical, easy of adjustment, small in size and useful well beyond 500 megacycles as either trimmer or tuning capacitor is now available. Produced af the famous Philips warks in Holland, this new capacitor is brought to American amateurs and experimenters through SILVER jobbers by the McMurdo Silver Co.
Less than $12^{\prime \prime}$ in diameter, less than $17 / 16^{\prime \prime}$ in length, SILVER TYPE 619 capacitor provides 3 to 30 mmfd . at insulation resistance above 10,000 megohms, at power factor of .007 at 1 mcs . and 8 mmfd , due to high-quality ceramic insulation. Both rotor and stator are of one-piece, low inductance, multiple aluminum cup construction. The rotor meshes with the stator to give a linear capacitance range of 27 mmfd . over $100^{\circ}$, (three full rotations). Rotor position once set is permanent by virtue of retention spring, while vibration does not affect capacitance since o long rotor bearing sleeve closely hugs a matching central ceramic insulotor. Temperature coefficient is $+300 \times 10.6$ per ${ }^{\circ} \mathrm{C}$.
Weighing less than $1 / 4$ oz., TYPE 619 capacitors have iwo solder terminals, are so light they may be mounted directly by their connecting leads. Supplied with a low-loss phenolic mounting plate having fwo No. 25 mounting holes in 1" centers. Capacitor mounts thereto by wo ears which are given a slight twist with nose pliers after insertion through matching slots in the insulated mounting plate.
TYPE 619 CAPACITOR. Best nows is price - in line with the usuof compression mica trimmers which they may so advantogeously reploce in all circuits. Code
MICAP. Packed in cortons of 10 .

## RADIO'S MASTER

# A TRIUMPH IN COMMUNICATIONS ENGINEERING 

## The New Improved KI - 8 BI

## Receiver

The KP-81 is offered today as the receiver of tomorrow, having been designed and developed by Karl E. Pierson who formerly designed the famous PR series of receivers. Engineered to meet present day conditions and to anticipate future requirements, the KP-81 is packed with advantageous features. Two tuned RF or Pre-Selector stages in operation at all times on all bands, combined with highest design efficiency, gives an unusually brief image ratio on all bands. Electrical Band Spread eliminates paralax, employs a shutter system which gives 0 to 100 scale as well as accurately calibrated frequency scales for all han bands, has provisions for accurate frequency setting, and is designed to literally spread each ham band over the entire band spread dial. The main Tuning Condensor is 4 gang, non microphonic, rigidly constructed and mounted. Band Change is

The KP-81 is an 18 tube receiver consisting of 2 stages of RF Pre-Selection, local oscillator, modulator or mixer, 3 IF stages, noise amplifier and rectifier, automatic threshold control, second detector, first audio, push-pull output, beat oscillator, squelch, calibrator, and rectifiers. The power supply is arranged for either 110 or 220 volt $50-60$ cycle operation. The speaker is heavy duty, $10^{\prime \prime}$ dynamic P. M.

accomplished by use of a slide coil drawer, an improved adaptation of the turret system. Contacts are heavily silvered knife switch type. There are Five Bands: $71 / 2$ to 550 meters. Frequency indicators consist of printed information on dial shutters (see table). The Crystal Filter combines band pass and series-parallel types, the component parts separately shielded. Utilizes precision one-peak crystal, air tuning, is isolantite insulated, has phasing condensor with insulated sliaft, and assures maximum efficiency of operation. Intermediate Transformers are of new and unusual design and help give a type of selectivity and interference elimination heretofore unknown in communications receivers. High Frequency Oscillator is electron coupled type of unusually high stability. Changes of oscillator plate voltage as high as $50 \%$ have a negligible effect on oscillator frequency even when operating on highest frequency band. Inter Channel Noise Suppression may be switched in or out of any band, may be adjusted to open on a signal of any $R$ strength, is of extraordinary benefit in stand-by work where carrier of station received is turned off during transmissions. Tone Controls are variable highpass and low-pass audio filters, make possible adjustment of the audio curve to fit the particular noise or such conditions of any situation normally encountered in communication work. In full "on" position the audio curve beconies a sharp peak at 1000 cycles, an ideal situation for code reception, particularly through heavy noise.

## FREQUENCY COVERAGE

| Band-1 | 550.0 KC to 1700.0 |
| :---: | :---: |
| Band-2 | 1.7 MC to 5.5 MC |
| Band-3 | .5.5 MC to 12.0 MC |
| Band-4 | 12.0 MC to 20.0 MC |
| Band-5 | 20.0 MC to 40.0 MC |

We are making every effort to meet the heavy demand for the new KP-81 receivers. However, Pierson Electronic Corporation will adbere to their policy of precision construction, and suggest that you place your order well in advance.

## NATIONAL DIALS

The four-inch N and AD Dials have engine divided and die stamped scales respectively. The N Dial has a decimal vernier; the AD Dial employs a pointer. The planetary drive has a ratio of 5 to 1, and is contained within the body of the dial. 2, 3, 4 or 5 scale. Fits $1 / 4^{\prime \prime}$ shaft. Specify scale.
N Dial
List \$
AD Dial
List \$
"Velvet Vernier" Dial, Type B, has a compact variable ratio 6 to 1 minimum, 20 to 1 maximum drive that is smooth and trouble free. The case is black bakelite. 1 or 5 scale. $4^{\prime \prime}$ diam. Fits $1 / 4^{\prime \prime}$ shaft. Specily scale.

## B Dial

List \$

The original "Velvet Vernier." mechanism is now available in a metal skirted dial $3^{\prime \prime}$ in diameter. The planetary drive has a ratio of 5 to 1 . It is available with 2,3,4, 5 or 6 scale and fits $1 / 4^{\prime \prime}$ shaft.

## AM Dial

## List \$

The BM Dial is a smaller version of the B Dial (described in the opposite column) for use where space is limited. The drive ratio is fixed. Although small in size, the BM Dial has the same smooth action as the larger units. 1 or 5 scale. $3^{\prime \prime}$ diam. Fifs $1 / 4^{\prime \prime}$ shaft. Specify Scale.

## BUFFER COIL FORMS

National Buffer Coil Forms are designed to mount directly on the tie bars of a TMC condenser using the PB-5 Plug and XB-5 Socket. Plug and Socket are of moided R-39.

The two coil forms are of Isolantite, left unglazed to provide a tooth for coil dope. The larger form, Type XR-13, is $13 / 4^{\prime \prime}$ in diameter and has a winding length of $23 / 4^{\prime \prime}$. The smaller form, Type $\times R-13 A$, is $T^{\prime \prime}$ in diameter and provides a winding length of $23 / 4^{\prime \prime}$. Both forms have holes for mounting and for leads.

## TRANSMITTER COIL FORMS

The Transmitter Coil Forms and Mounting are designed as a group, and mount conveniently on the bars of a TMA condenser. The larger coil form, Type XR-14A, has a winding diameter of $5^{\prime \prime}$, a winding length of $33 / 4^{\prime \prime}$ ( 30 turns total) and is intended for the 80 meter band. The smaller form, Type XR-10A, has a winding length of $33 / 4^{\prime \prime}$ and a winding diameter of $21 / 2^{\prime \prime}$ ' ( 26 turns total). It is intended for the 20 and 40 meter bands.

Either coil form fits the PB-15 plug. For hisher frequencies, the plug may be used with a self-supporting coil of copper tubing. The XB-15 Socket may be mounted on breadboards or chassis, as well as on the TMA Condenser.

## R-300 <br> List \$ <br> R-300U <br> List \$ R-300S <br> List \$

RF chokes R-300, R-300U and $R-3005$ are similar in size to $\mathrm{R}-100$ series but have higher current capacity. The R-300U is provided with a removable stand-off insulator at one end. The R-300S has non-removable stand-off insulator and cotter-pin lug terminals. Inductance values of $0.5,1.0,2.5$ and 5.0 millihenries are available with a current rating of 300 millamperes. R-300, R-300U and R-300S are identical electrically.

R-33
Lis: $\$$
The R-33 series chokes are 2-section RF chokes and available in 1, 10,50 and 100 microhenry sizes. They are rated af 33 milliamperes. The chokes are wound on a $5 / 8^{\prime \prime}$ long form and range in diameter up to $5 / 6^{\prime \prime}$ maximum diameler.

## R-33G <br> List \$

The R-33G choke is a 2 section 750 microhenry RF choke hermetically sealed in glass with a current rating of 33 milliamperes. The choke body is $1^{\prime \prime}$ long by $5 / 8^{\prime \prime}$ diameter.

## R-152

For the 80 and 160 meter bands. Inductance 4 m.h., DC resistance 10 ohms, DC current 600 ma. Coils honeycomb wound on Isolantite core.

## R-154 <br> List \$ <br> R-154U <br> List \$

For the 20,40 and 80 meter bands. Inductance $1 \mathrm{~m} . \mathrm{h} ., \mathrm{DC}$ resistance 6 ohms, DC current 600 ma . Coils honeycomb wound on Isolantite core. The R-154U does not have the third mounting foot and the small insulator, but is otherwise the same as R-154. See illustration.

## R-175

## List \$

The R-175 Choke is suitable for parallel-feed as well as series-feed in transmitters with plate supply up to 3000 volts modulated or 4000 volts unmodulated. Unlike conventional chokes, the reactance of the R-175 is high throughout the 10 and 20 meter bands as well as the 40,80 and 160 meter bands. Inductance $225 \mu \mathrm{~h}$, distributed capacity 0.6 mmf ., DC resistance 6 ohms, DC current 800 ma., voltage breakdown to base 12,500 volts.

## R-50 RF Choke List

The R-50 series chokes are 4 -section RF chokes and available in $0.5,1,2.5$, and 10 millihenry sizes. They are rated at 50 milliamperes. The chokes are wound on a $1^{\prime \prime}$ long form and have a maximum diameter of $15 / 2_{2}^{\prime \prime}$. The 10 millihenry R-50I choke is wound on an iron core.

## R-60 RF Choke Lis! \$

The R- 60 choke is a high current RF choke ( 500 milliamperes) available in 2 and 4 microhenry sizes. The choke is $11 / 8^{\prime \prime}$ long by $5 / 6^{\prime \prime}$ diameter.

## NATIONAL CRU OSCILLOSCOPE

National Power Supplies are specially designed for high frequency receivers, and include efficient filters for RF disturbances as well as for hum frequencies.

## National Radio Products

## NATIONAL PRECISION CONDENSERS

The Micrometer dial reads direct to one part in 500 . Division lines are approximately $1 / 4^{\prime \prime}$ apart. The dial revolves ten times in covering the tuning range, and the numbers visible through the small windows change every revolution to give consecutive numbering by tens from 0 to 500. The condenser is of extremely rigid construction, with four bearings on the rotor shaft. The drive, at the mid-point of the rotor, is through an enclosed preloaded worm gear with 20 to 1 ratio. Each rotor is individually insulated from the frame, and each has its own individual rotor contact. Stator insulation is Steatite. Plate shape is straight--line frequency when the frequency range is $2: 1$.

PW Condensers are available in 2, 3 or 4 sections, in either 160 or 225 mmf per section. Larger capacities cannot be supplied.

A single-section PW condenser with grounded rotor is supplied in capacities of 150, 200 , 350 and 500 mmF , single spaced, and capacities up to 125 mmF , double spaced.

PW condensers are all with rotor shaft parallel to the panel.

Small padding condensers having very low temperature coefficient. Mounted in an aluminum shield $114^{\prime \prime}$ in diameter. The UM CONDENSER is designed for ultra high frequency use and is small enough for convenient mounting in PB-10 and RO shield cans. They are particularly useful for tuning receivers, transmitters, and exciters. Shaft extensions at each end of the rotor permit easy ganging when used with one of our flexible couplings. The UMB-25 Condenser is a balanced stator model, two stators act on a single rotor. The UM can be mounted by the angle foot supplied or by bolts and spacers. See table for sizes.
Dimensions: Base 1 " $x$ $21 / 4^{\prime \prime}$, Mounting holes $5 / 8^{\prime \prime} \times 1233_{22^{\prime \prime}}$, Axial length $21 / 8^{\prime \prime \prime}$ overall.

Plates: Straishtline capacity, $180^{\circ}$ rotation.
The UM-10D and UMA-25 condensers are double spaced versions of the UM condenser. The UMA-25 is assembled with nuts and bolts so that the capacity may be reduced if desired.

## TYPE TMC

is designed for use in the power stages of transmitters where peak voltages do not exceed 3000 . The frame is extremely rigid and arranged for mounting on panel, chassis or standoff insulators. The plates are aluminum with buffed edges. Insulation is steatite. The stator in the split stator models is supported af both ends:

## NATIONAL TRANSMITTING CONDENSERS

## TYPE TMA

is a larger model of the popular TMC. The frame is extremely rigid and arranged for mounting on panel, chassis or stand-off insulators. The plates are of heavy aluminum with rounded and buffed edges. Insulation is steatite located outside of the concentrated field.

## TYPE TML

condenser is a 1 KW job throughout. Steatife insulators, specially treated against moisture absorption, prevent flashovers. A large self-cleaning rotor contact provides high current capacity. Thick capacitor plates, with accurately rounded and polished edges, provide high voltage ratings. Sturdy cast aluminum end frames and dural tie bars permit an unusually rigid structure. Precision end bearings insure smooth turning and permanent alignment of the rotor. End frames are arranged for panel, chassis or stand-off mountings.

## STANDARDS OF GOMPARISON

TRIM-AIR MIDGET CAPACITORS
Combine essential sturdiness with the flexibility obtained only in a spacer-built rotor and stator type of assembly.

## GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C.
FRAME: End Plates of $5 / 32^{11}$ thick Isolantite.
SHAFT: $1 / 4^{11}$ diameter, nickel plated brass.
PLATES: . $020^{\prime \prime}$ thick aluminum, specially treated to remove burrs. FINISH: Spacers, bushing nuts and screws nickel plated brass.
MOUNTING: Singles require one $3 / 8^{\prime \prime}$ hole in panel; Duals provided with four No. 4 -36 screws in square brass tie rods. Trim-Air mounting posts or brackets fit both single and dual types. Singles are fitted with tapered nuts acting on split bushing for locking rotor shaft for tixed tune. Duals have rear shaft extension for coupling to other units and have a removable intersection shield, on airgaps of .020 and .030 .
Note: Single sectian Trim-Airs normally stocked with full length shaft for knob or dial. Stub shaft equivalents, with slot for screw driver adjustment only, available to arder. ZS type singles have $.040^{14}$ thick plates with rounded buffed edges.

## TRIM-AIR HEAVY DUTY SPECIALS

Four-tie-rod frame, ball and strap rear bearing construction, aug menting the simplified Trim-Air construction, to give even greater strength and rigidity. Genera characteristics otherwise same as standard Trim-Airs.
Dual section units have balanced rotor and stator sections and both single and dual section types may be single hole mounted or used with standard Trim-Air mounting accessories. Standard Trim-Air shaft locking nut may be used for fixed tune. PL-6069 and PL-6068 are duals with rear shaft extended; all others have ball and strap type rear bearing.

PL-61 13

PL. 6076

Cardwell offers a new line of 90 degree condensers with butterfly rotor plates, fulfilling a demand created by engineers and amateurs since the publication of an article "'Stabilizing The 144 Megacycle Transmitter" in Apri1, 1946 "QST." Also see pages 351 to 353 inclusive specified in these articles. Fectures of these 90 degree midget condensers are as follows:

Electrical Symmerry
Lpw Distributed Inductance.
No Moving Confacts.
Phates easily removable to change capacity range.
Isolantite Insulation.
Single Hole Mounting.
Small Size; ? $7 / 16^{\prime \prime} \times 1$ 13/32" per general outline dimensions
for differential "Trim-Airs" as shown on Poge 6 of Catalog No. 46. These condensers are made to fit all standard Cardwell "Trim-Air" hardwore.
Note maximum and minimum capacity values shown are measured from stator-to-stator and are effective values as used when a coil is connected stator-to-stator, with rotor floating.

## MIDWAY TRANSMIT.

 TING CAPACITORS The Midway is ideal for low and medium power transmit ters for portable Mobile and aircraft equipment, due to its light weight, comoact size and exiremely sturdy construction. Incorporates original potented features of the nal potented features of tandard transmitting condenser.

MT-100-GD PL-7030 with PL-505i Mtg. Brackets

## GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C.
FRAME: All aluminum end plates and tie rods.
SHAFT: $1 / 4^{\prime \prime}$ C.R. steel, cadmium plated.
PLATES: . $025^{\prime \prime}$ aluminum. On sizes having airgap of $.070^{\prime \prime}$ or over plates have rounded edges, buffed to minimize corona loss BEARINGS: Brass, nickel plated shoulder type front bearing with bal! thrust rear bearing.
INSULATION: Mycolex.
MOUNTING: 3 point frant panel mounting by means of 3 screws ond hex. posts. Two aluminum maunting feet with screws, Cardell Part List No. 5052 for regular chassis mounting, pravided instead if so ordered. Type " $\mathrm{M}^{\prime}$ special brackets (Part List No. 5051) permit inverted maunting.

## "N" TYPE TRANSMITTING CAPACITORS

Designed for medium power high frequency transmitters and short requency ransmiters and short wave "Ne" sepy apparatus the cardwell " $N$ series maintains the customary high standard of Cardwell construction, yet eliminates closed circuit loops completely.

## GENERAL SPECIFICATIONS:

CAPACITY CHARACTERISTIC: S.L.C.

FRAME: Improved aluminum end plates support heavy lateral ceramic insulating bars which carry the stators.
SHAFT: $1 / 4^{\prime \prime}$ diameter cadmium plated steel.
PLATES: Aluminum, $.040^{12}$ thick, with rounded edges. PL.7106 and 7116 have buffed and polished edges. PL-7105 has .025" thick plates, buffed and polished edges.
BEARINGS: Cardwell shoulder type front bearing, with ball thrust rear bearing.
MOUNTING: Can be single hole mounted, or by three mounting posts and screws, to front panel. Chassis mounting on feet which form part of end plates, or use Sardwell " $M$ " brackets, Cardwell part No. 301, for inverted moynting, for lowest stator-to-ground capacity.

## GARDWELL COMDENSERS

THE ALLEN D. GARDWELL MANUFACTURING CORPORATION

## STANDARDS OF COMPARISON

## "X" TYPE STANDARD TRANSMITTING CAPACITOR

The original grounded rotor, metal frame variable air capacitor.

Rounded edges, polished aluminum plates, $.040^{1}$ thick on all but 'XT" and "XR" types.
Frames, tie rods, bearing bushings, spacers and stator mium plated $1 / 4^{\text {"1 }}$ steel shaft mium plated $1 / 4$ stee shaft assembly. Mycalex insulation. Panel spaces $4 / 8^{\prime \prime} \times 33 / 8^{\prime \prime}$. Panel mounting. N.P. brass mounting teet provided on special order, for chassis mounting. See Accessories.

"T" TYPE HEAVY DUTY TRANSMITTING CAPACITORS
61/4" wide, $53 / \mathbf{y}^{\prime \prime}$ high, plates unmeshed. Corona shields on stators for wider airgap types. End plates $1 / 8^{\prime \prime}$ thick, heary nickel ploted. Massive bearings, $3 / 8^{11}$ stainless steel shafts; heary, two finger phosphor bronze rotor contactor bears on sturdy contact ring built to carry very heavy current without power loss. Rotor plates $4^{4} / 2^{12}$ diameter $\quad 050^{11}$ thick PL-9110 aluminum. Heavy mounting feet formed as part of end plates. Ball thrust rear bearing. Mycalex insulation.

## STANDARDS OF COMPARISON

## V.H.F. OSCILLATOR KIT

This kit includes 3 sets of coils covering 144-148 mG, 220-225 $\mathrm{mc}, 420-450 \mathrm{mc}$ bands. (The $6 \mathrm{F4}$ tube is not included.)
Ideally suited for local oscilla. tor, for super-heterodyne receiv-
ar, as plate modulated oscillator or low power transmitter or transceiver, driver unit for amplifier tube in higher powered ransmitter, V.H.F. signal generator, etc., etc.

## CARDWELL PRECISION CAPACITOR Type PL-24,050

Designed for frequency meters requiring maximum mechanical and electrical precision. Type No. 4.080 gear and worm driven capacitor incorporates special design features representing years of research and usage of this component in special measurement equipment which has successfully withstood most rig. orous usage our armed forces could give it.

CAP RANGE Max Cap 220 mid Min
PLATE SHAPE: S.L.F.
DI-ELECTRIC SUPPORTS: Steatite.
BACKLASH: Negligible.
RESETTABILITY: To 10 parts in one million.
GEAR DRIVE: Precision split warm gear, equipped with precision bail bearings. Ratio-100 : I over 360 degrees.
DIALS: $3^{\prime \prime}$ DRUM: 50 divisions over $180^{\circ}$ condenser rotation. 3" FAST RUNNING DIAL: Graduated 100 divisions, makes 1 revolution for each drum division. VERNIER RING: Divides each division on fast running dial into 10 parts.
DIMENSIONS: $558^{\prime \prime}$ lg. (over drum dial) $\times 31 / 8^{\prime \prime}$ deep $\times 31 / 8^{\prime \prime} \mathrm{high}$.
WEIGHT: $13 / 4$ lbs. (with cast aluminum frame).
ROTOR CONTACT: Silver plated phosphor bronze spring, with 2 silver contacts bearing on silver plated disc.
MOUNTING: 3 point, to bottom of main casting.
PRICE: Capacitor, PL-24,050, Type 4.080, only.... $\qquad$ List $\$ 95.00$ Drum Dial
Fast Running Dial Vernier Ring

TYPE "P" LIGHT HEAVY WEIGHT TRANSMITTING CAPACITORS

Designed to accommodate capreitance values up to 150 mmfd. per section in a dual section type having an airgap of .500 ", the "p" type construction permits higher capacity for a given airgap and therefore a shorter frame than the "T" type construction. Typical Cardwell sturdiness is builtcal Cardwell sturdiness is buit, and the 1 the transmitting andenser built for its size yo
 condenser built for its size, ye completely satisfactory for hearyweight use. No single section types are catalogued; parallel or series connect for double or half single section capacity listed in table.

## GENERAL SPECIFICATIONS:

FRAME: End plates are $1 / 8^{\text {t }}$ thick formed aluminum, satin finish. SHAFT: $3 / 8^{" 1}$ diameter, non-magnetic stainless steel, extended both front and rear end.
PLATES: . $064^{\prime \prime}$ ' thick, rounded and buffed edges. Rotor plates are 63/4" in diameter.
BEARINGS: Heavy nickel plated brass front and rear shoulder bearings.
ROTOR CONNECTION: Heavy, two finger N.P. phosphor bronze wiper bears on $1 / 8$ thick N.P. brass contact ring, af each end. STATOR CONSTRUCTION: Plates permanently staked into slotted, rounded edge aluminum stator blocks.
INSULATION: Mycalex (glass bonded mica).
MOUNTING: 3 clearance holes for No. 10 screws in each side of each end plate permitting mounting on any side, as well as provision for mounting associated components such as inductance coil mountings, etc.
TYPE "P": LIGHT HEAVYWEIGHT DUAL CONDENSERS

## STANDARDS OF GOMPARISON

## INSULATED COUPLINGS

For isolating R.F. controls. Ceramic insulation (Alsimag No. 196). All flexible types have N.P. phosphor bronze springs, and heavy N.P. brass hubs, permanently swedged or spin riveted into the springs. Two fillister head, cup point, case hardened steel set screws in each hub insure positive lock to shaft.

All rigid types have improved three-point-spider construction, carefully machined solid brass castings, and are absolutely rigid.
Flexible types $C, D, E$ and $F$ fit both $1 / 4^{\prime \prime}$ diameter shaft or a $3 / 8$ " shaft by removing bushing supplied.

## ACCESSORIES <br> "MIDWAY" MOUNTING FEET

Heary aluminum, with 2 screws: for Midway condensers. Parts List No. 5052.

## INDUCTANCE CLIPS

For tapping air-wound inductors. Cadmium plated phosphor bronze spring clips for No. 12 or 14 wire. Thin blades prevent shorting turns. Type 804-A. Parts List No. 5104.......List Price $\$ 0.20$

## ROTOR LOCK

For locking ' X '" standard or "M" Midway rotor shafts in position for fixed tune. Can be set behind panel or attached to any $1 / 4^{"}$ shaft, mounted directly on front of panel. Nickel plated brass; diameter [1/2".

## SHAFT LOCK PANEL BUSHING

Long panel bushing for $1 / 4^{4 \prime}$ shafts, has tapered nut for locking shaft in position. Fits $3 / 8^{1 "}$ hole in panel. Complete with panel nuts. Nickeled brass.
Parts List No. 5055 (Type ALB)
...List Price $\$ 0.40$

## TYPE " ${ }^{\text {'P }}$ BRACKET

Use with type "N" U.H.F. duals or "M" Midway condensers. Turns condenser upside down for shortest plate leads in balanced R.F. amplifier. Regular mounting feet can be used to support a tank coil or jack base. Made of strong, satin finished, $1 / 16^{1 \prime}$ aluminum, and supplied with proper screws and lock washers.
Parts List No. 5051.................................................. List Price, each $\$ 0.25$
"STANDARD" TYPE "X" MOUNTING FEET
Heavy nickel plated brass; for " $X$ " transmitting types with four screws.
Parts List No. 5053 ....................................................ist Price, pair $\mathbf{\$ 0 . 2 5}$

## TRIM-AIR ACCESSORIES

As catalogued, Trim-Air singles are equipped for single hole mounting. Additional mounting accessories listed below are sold separately.
MOUNTING POSTS— $11 / 4^{\prime \prime}$ hex. $\times 3 / 4^{\prime \prime}$ long, tapped 6-32 N.P. brass). Pair, with screws and lockwashers.
Parts List No. 5054........................................................ist Price $\mathbf{\$ 0 . 2 5}$

(4) No27 DRILL (.144)

Ports List No. 5050
"TRIM-AIR" MOUNTING BRACKET

For dual and single Trim-air condensers. Insulated from rotor and stator; N.P. brass. with two screws and nuts.

## MODEL CE-25

HIGH FIDELITY AUDIO AMPLIFIER

SPECIFICATIONS

POWER OUTPUT: 25 wotts undisforted
GAIN: Microphone 135 do phonograph 86 db .
FREQUENCY RESPONSE: Response at 50 cycles controllable fram - 15 to +17 db . Response ad 10,000 cycles controllable from -15 to +22 db . In addition, Audio Compensation is used on the phonographic input which boosts bass as the volume level is reduced. This compensation is effective over a 40 db range in volume level and results in exceptional tone balcince. POWER REQUIRED: 115 watts af $105-125$ volts 60 cycles $A C$.

DIMENSIONS: Length $151 / 2^{\prime \prime}$. Depth $101 / 4^{\prime \prime}$. Height $85 / 3^{\prime \prime}$ CONTROLS: Two microphone volume contrais and ane phonograph volume control. One bass boost and one treble boost control.
TUBES: (2)-6SJ7, (3)-6SL7GT, (2)-6L6G, (1)-5U4G OUTPUT IMPEDANCES: 2, 4, 8, 16, 250, and 500 ohms. INPUT IMPEDANCES: Microphone chonnels- 10 megohms. Phonograph chonnel-500,000 ohms. WEIGHT: 26 tbs. All aluminum case.

COMPLETE WITH TUBES PRICE ON REQUEST

## MODELCE-26 SOUND REPRODUCER

## SPECIFICATIONS

CASE
SIZE: $14^{\prime \prime}$ wide, $91 / 2^{\prime \prime}$ deep, $17^{\prime \prime}$ high. WEIGHT: 26 lbs. ne
fiNISH: Gun metal gray, with silver trim. Harmonizes with any interior.

## AMPLIFIER

OUTPUT: 8 watts undistorted, 11 watts maximum output. Taps on output transformer permit use of 4 additional speakers.
INPUT: One zera level input delivering 8 watts output for 0.5 valts input.
Input impedance 500,000 ohms.
One high impedance microphone input. input impedance to mezohms POWER CONSUMPTION: 70 watts at 115 voits, 60 cycle A.C.
(Note: Special transformer $110-220 \mathrm{~V}$ $50-60$ cycle supplied on CE-26E export model.)

CONTROLS: One "Phono" Gain control with 11 db . bass compensotion of 100 cycles of low level. (Right).
One "Microphone"' Gain contral. (Left) One Tone control. (Center). ON-OFF toggle switch.

FREQUENCY RESPONSE: With Tone Control set at maximum, response is flat trol sel ct
within 2 db . from 60 cycles to 8000 . Maximum voriation in response at 5000 Maximum voriation in response af 5000 cycles
25 db.

INTER-MODULATION: less than $8 \%$ at normal rated output.

TUBES REQUIRED: 2-6V6GT, 2-6SL7GT 1-5Y3GT, 1-6S.7.

SPEAKER: Ten inch heavy duty, high quality permanent magnet type. Correctly matehed to amplifier output.

PRICE ON REQUEST

## (DE.F. JOHNSON Company $=$

VARIABLE CONDENSERS

IOHNSON C and D condensers are sturdily constructed to give rouble-free operation under the most severe service. Only the finest materials are employed yet these units are lower in price than any other quality condensers.
All dual models have center rotor connections, to insure balanced operation at ultra-high frequencies. Heavy laminated phosphor bronze contact springs insure low resistance circuits.
Important features include: Heaviest aluminum plates of any similar condenser, $.051^{\prime \prime}$ thick-Steatite insulation-Large laminated rotor brushes-Center rotor contacts on all dual con-densers-Heavy $5 / 16^{\prime \prime}$ diameter aluminum tie rods for frame strength and rigidity-1/4" stainless steel shafts.
Supplied with single hole mounting brackets which fit either top or bottom of end plate so that stators may be mounted to top or bottom as preferred.

## MOUNTING BRACKETS

Extra brackets for mounting other components above condenser.
Cat. No.
$115-100$ List
$115-101$-Two Hole Bracket for C or D ( D condenser

$16 \quad 2$
Type E Dual
Type F Single
Designed as rugged, compact units for medium and low power ransmitters, type $E$ and $F$ condensers are in a ciass by them selves. They have more capacity per cubic inch and occupy less panel space for their rating than any other condenser on the market. Their rapid adoption by manufacturers of high grade equipment and discriminating amateurs is ample proof of their excellence.
Points of superiority: Heavy aluminum plates, $0.032^{\prime \prime}$ thick with rounded edges for maximum voltage rating-heayy alumi num tie rods $1 / 4^{\prime \prime}$ dicmeter for frame strength and rigidity-Steatite insulation-Stator mounted above to reduce capacity to ground-heavy phosphor bronze contact springs, cadmium plated -Center contact on dual models-Chassis or panel mountingStainless steel shafts.
In addition to mounting foot shown, removable single hole brackets are furnished so that condenser may be inverted from position shown, or other components mounted above,

Special plate spacings capacities, shaft extensions, insulation mounting brackets, terminals, etc., can be furnished to specifications for commercial applications.

## CONDENSERS FOR HIGHER VOLTAGES

The IOHNSON line includes heavy duty pressurized or air dielec tic fixed and variable condensers for high voltage commercia applications. Data sheets furnished on request.

## EXPLANATION OF TYPE NUMBERS

The first part of the type number indicates the capacity per sec ion in momfd. The following letter indicates the frame size o type. A second letter D indicates a two section type. The final number multiplied by 100 is the approximate peax breakdown voltage. Capacity measurements of the $E$ and $F$ types are made with the condensers in the position shown in the above illustration. The C and D types are measured in inverted position

## 1

Two End Plates Single End Plate
The Type $H$ condenser was designed for aircraft transmitters and combines a minimum of weight and size with simple but rugged construction. Capacities and spacings are provided for low and medium power stages. Use of steatite for end plates avoids any possibility of "short circuit loops" and permits panel mounting with both rotor and stator insulated from ground. Has aluminum plates $.020^{\prime \prime}$ thick. End plate $1^{1 / 2} 2^{\prime \prime}$ square. Capacity measurements are taken with condenser in position shown above.

TYPE J CONDENSER

The Type $I$ condenser is a midget with big condenser charac teristics. It has wider spacing than most small types, ye occupies hitte more space and is ideal for oschlator and low power stages. It can be used in conjunction with JOHNSON iube socket type inductors to provide an extremely compact tank unit The spacing is $025^{\circ}$ and universal type mounting brackets make possible a variety of mountings including chassis, panel, or in side tube socket type inductors. Steatite end plate is $11 / 8^{\prime \prime}$ wide.

## TYPE G CONDENSER

The Type $G$ condenser is extremely popular as a neutralizing condenser for medium and low power stages. It is also widely used for grid and piate tuning at high and ultra-high frequen cies. A wide range of capacities and spacing make it adaptable to many applications. It has a single end plate of steatite and ow minimum capacity. 032 rounded aluminum plates, universal mounting bracket locking nut, and front and rear shaft extension are among outstanding features.

All IOHNSON insulated shaft couplings are characterized by best steatite insulation properly proportioned for electrical and mechanical strength, by accurate metal parts heavily plated, by advanced design, and by skilliful manuiacture.
The phosphor bronze springs of the -250 and -251 series couplings provide flexibility without backlash and adjust to minor shaft misalignments:
The hub assemblies of the new -260 and -263 coupling move freely on their supporting posts, accommodating misalignment and strain without dependence upon a flexing metal, and yet are well secured to prevent accidental disassembly. Rigid types -252 , -262 and -261 meet the requirements of accurate shait alignment and high torque. $2503^{\text {" }}$, bar type couplings recommended for high voltages or very high frequencies.

## TYPE N CONDENSER

Small mounting space require-
 ing in proportion to size, fine adjustment with uniform voltage breakdown rating throughout the full capacity range, and low cost, make these neutralizing condensers ideal for, the modern transmitter. "Plates" are cluminum cups supported on a steatite frame with cast aluminum mounting bracket. Because of the design these condensers will withstand much higher vollage than conventional flat plate condensers of the same spacing. The $N 375$ has been improved and now features a bushing for the guide shaft for greater stability and a beaded lower cup for high voltage rating. Peak R.F. Breakdown Ratings at 2 Mc .; N125 8,500, N250 11,500, N375 14,500.
Cat. Part List Capacity

ROTATING COIL "HI-Q" INDUCTORS

JOHNSON Hi-Q inductors were designed for optimum LC ratios on all bands. Numbers 660 through 664 and 680 through 684 contain rotating coupling coils which permit adjustment of interstage or output coupling of any circuit as desired. These coupling coils provide means of working directly into non-resonant lines without coupling or matching networks. On the higher frequency bands the coupling coils are adequate for working directly into a 600 ohm open wire line, while on the lower Irequency bands coupling may be easily made into a 70 ohm line.

For capacity coupled stages and other applications, inductors are supplied less the coupling coil. Two sizes are supplied. The 660 and 670 series on forms $4 \frac{1}{16}$ " long are for inputs up to and including 350 watts, and the 680 and 690 series on forms $63 / 4^{\prime \prime}$ long are for inputs up to and including 1000 watts.

* 

## TUBE CAP CONNECTORS

JOHNSON tube cap connectors are carefully designed, specifically for transmitting and industrial uses. Numbers 119-853 and 119-855 have steatitle covers assembled with $12^{\prime \prime}$ and $15^{\prime \prime}$ high voltage insulated leads. They are particularly recommended for rectifier and high voltage service. The 119-856 and 119-857 are similar to 119-852 and 119-854, but have $6^{\prime \prime}$ copper straps for low-loss R.F. uses. Collet types, numbers 119-838 through 119-841 are recommended for heavy current industrial uses. The outside diameter is $7 / 8^{\prime \prime}$ and connector may be tightened with spanner wrench listed below. The 119-843 is a pari of the 124-212 socket for 833A tubes and is recommended for other tubes having .500 diameter caps and requiring radiator type connectors for high R.F. currents. The lexible strap is $51 / 8^{\prime \prime}$ long and $5 / 8^{\circ \prime}$ wide. $\begin{array}{lll}\text { Cat. Tube Cap List } & \text { Cat. Nos. -278 A and B are two sizes, they include an inside soil spring to hold the

120-267 tube firmly in position

## ACORN SOCKETS

Nos. -235, and -265 were all designed for new "acorn" tubes. Nos. -235 and -265 are similar except for size. No. - 235 is more rugged but requires slightly more mounting space. No. -245 is a plated metal base and includes built-in by-pass condensers as an integral part of each contact. Contacts insulated by mica All contacts silver plated beryllium copper.

IOHNSON wafer sockets are insulated with grade L 4 steatite or better, top and sides alazed, underside impregnated in contormance with latest Army Navy specifications. Contacts are brass with steel spring, cadmjum plated and are mounted against phenolic washers in molded recesses to prevent movement. Rivets are countersunk and mounting holes bossed to permit sub-panel mounting. Locating grooves facilitate tube insertion.

## "BANANA SPRING" TYPE

Nickel-silver springs and high grade nickel plated brass sarew machine parts with accurate threads and milled nuts. Studs exmachine parts with accurate threads and mill
tend full length of springs for added support.
75D is designed for riveting. Spring is beryllium copper
75 BB has $13 / 8^{\prime \prime}$, black plastic handle; 75 BR same but red.
77BB has $13 / 4^{\prime \prime}$ black plastic handle; 77BR same but red.
75 or 75A can be furnished with beryllium copper spring on special order, and all plugs can be furnished with nickel, cadmium or silver plating if required.
108-7451 is a red plastic insulated jack similar to the 108-74 and furnished with fibre washers. 108-7452 same but black.
if washers used for insulated mounting fits $\frac{5}{26}{ }^{\prime \prime}$ holes, $\frac{p}{2}^{\prime \prime}$ maximum panel thinckness.

These jacks have maximum current carrying capacity, minimum resistance, great mechanical strength, and snug fit. Wiping action of spring on insertion insures good electrical contact Tension is maintained by phosphor bronze spring sleeves. two sizes available. Furnished regularly nickel plated, but cadmium or silver can be supplied on special order Cat. No

AND JOHNSON " $Q^{\prime \prime}$ BEAM
The consistent results obtained by the thousands of users of the JOHNSON $Q$ antenna system are due to the extremely high efficiency of this famous antenna. Applications include half-wave doublet, either horizontal or ver tical, harmonic or "long wire" radiator, radiator-reflector, radiator director, The IOHNSON $Q$ Beam and others
The JOHNSON $Q$ Beam is a special application of the $Q$ system. It consists of two half-wave $Q$ antennas spaced $1-5$ wave and $Q$ sections connected in parallel at the bottom. In ordering specify two $Q$ antennas for the lowe frequency of the two bands desired. For example if you want a $Q$ Beam to operate on 20 and 20 meters, order two JOHNSON Qs for 20 meters.

## ENAMELLED COPPERWELD ANTENNA WIRE

JOHNSON Enameled Copperweld Antenna Wire is the ideal material tor any system where the wire must not stretch nor sag. The steel core provides almost three times the strength of ordinary copper wire, the copper coating provides a low RF resistance and the enamel prevents corrosion. Prices are per 100 feet. Carried by most suppliers in bulk, it is available from the factory in any specified length.

## ANTENNA INSULATORS

These insulators are of genuine WET PROCESS porcelain, with smooth white glazing. The all-porcelain types are 1 in diameter. Their long leakage path, low capacity, and reedom irom moisture absorption result in exceptional efficiency. The Commercial Type is $11 / 2^{\prime \prime}$ in diameter, for uses where much greater strength is necessary End fit tings are of non-corrosive aluminum alloy. No. 136-104 is dry process $4^{\prime \prime}$ antenna insulator, $5 / 8^{\prime \prime}$ square for service

# ( <br> 2. F. JOLINSON Company wersom 

JOHNSON insulators were introduced in the early twenties, and soon established the sort of dominance that occurs occasionally when one line offers more in choice of style and size; in aavanced but practical design; and in mass production economy than others. This position has been maintained through the years by careful attention to the product, the line, and the needs of the user.

JOHNSON insulators are specifically designed for high R.F. Insulating materials were selected affer exhaustive laboratory lests. Superior grade, low absorption, well glazed electrical porcelain, and Grade L 4 or better steatite are used.

| Cat. | List | Dimensions |  | Hard. |

The stand-off insulators feature heavy, breakage-resistant bases and adequate "glaze grooves" around mounting screw holes. Numbers 135-65, 135-66, 135-67 and $135-68$ have unbreakable, cadmium plated, drawn steel bases. Brass bases are optionally available and indicated by suffix " B " behind catalog number.

The No. 500 cone insulator series are steatite for better high frequency insulation. Threads are tapped directiy into the ceramic. Furnished complete with machine screws, brass and cushion washers.

## BRASS BASES

For outside use, particularly under corrosive condifions, lacquered brass bases are recommended, if necessary for replacement, on numbers $-65,-66$. -67 and - 68 insulators.

Cat. No. List Price For Use With

| Cat. No. | List Price | For Use With |
| :--- | :---: | :---: |
| $135-865$ | $\$ 0.09$ | $135-65$ |
| $135-866$ | .14 | $135-66-135-68$ |
| $135-867$ | .20 | $135-67$ |

Of the insulators appearing under the headings "Steatite" all but the 500 series and the $135-55$ are offered in this finer material for the first time. Their dielectric losses are but a fraction of those for the same parts in porcelain, and they are particularly recommended for high frequency work.
In addition to fine quality insulating materials the JOHNSON line distingurshes itself with a perfection of ceramic design; logical proportions; clean-cut accurate molding; and high grade nickel plated brass hardware, with milled (not stamped) nuts.

THRU-PANEL INSULATORS AND BUSHINGS

In the thru-panel and bushing series special attention has been giver to special attenion has been given to through heavier construction and at the same time increasing the breakdown voltage. Flat mounting surfaces with cushion washers eliminate breakage Bottom pieces have long internal and external portions for higher breakdown voltaga rating, and grooved surfaces to increase leakage path. Jack types have terminals permitting connection above as well as below the panel.
JOHNSON lead-in bushings are designed to have even greater mechanical strength and long leakage path in proportion to size. Numbers $135-53$ and parts are supplied as single porcelain parts including cushion washers.
Nos. 135-50 and 135-55 are steatite and have a special interlocking feature which permits mounting on thin panels
without extra spacing washers.
Nos. 20, 20, 22,22 and 24 are now also steatite with heavily plated brass hardware.

STANDARD ANTENNA R. F. COILS
Standard type air-core coils of superior construction, designed to cover the Broadcast band from 545 to 1580 ke ( 190 to 550 meters) with a 365 -mmfd. tuning condenser. These coils make excellent replacement units and are used as original parts by discriminating set-builders and experimenters in the design and construction of Broadcast ro-
 ceivers.
AIl coils have high-impedance primaries, wound with Litz wire, fully protected against humidity. Shielded coils are in black crackle-finished nonmagnetle cans, $17 / 8^{\prime \prime}$ diameter by $21 / 2^{\prime \prime}$ high.

## DOWEL TYPE PRIMARY

Popular replacement for burned out primaries in high impedance anterna coils. Unfyersal wound on $1 / 2^{\prime \prime}$ diam. by $1 / 2^{\prime \prime}$ long dowels moisture protected. Inductance 1700 uh .
No. $14-6865$ List Price...... . 42

## MAJESTIC REPLACEMENT

Exact duplicate of original assembly. Coil only, without can or trimmer. Exactly replace defective burned-out units. Used in 2nd I. F. Number 10253 or 11014 of the popular Majestic model 460.

STANDARD OSCILLATOR COILS
High-quality Broadeast band ofcillator coils designed for use with any of the Antenna and $\mathbf{R}$. F . coils listed above, using a $365-\mathrm{mmfd}$. tuning condenser. Frequency coperage is 545 to 1580 kc ; units are provided for all popular intermediate frequencies.
Coils are mounted on bakelite base with tinned soldering lugs for connections. Unshielded coils have singlehole stud mounting. All coils are thoroughly impregnated to rosist severe climatie conditions. Shielded coils are in cans, $11 / 2^{\prime \prime}$ diameter by $13 / 4$ " high, blaek crackle finish.

## 'PLASTIC" I. F. TRANSFORMERS

Particularly suitable for use in small receivers, where space is at a premium and yet superior performance is required, these remarkable transformers are only $11 / 4^{\prime \prime}$ square and $21 / 2^{\prime \prime}$ high! Made in a complete series of frequency ranges and positions, they will provide results second to none in any type of receiver.
The one-piece molded plastic coil-form and trimmer-base eliminates many separate parts that were required with other types of construction. The assembly is, therefore, simpler and more rigid. The iron core series are highly rcommended for use in compact receivers and auto sets where only one I-F stage is permitted. It is not recommended that they be used in a two-stage system because of their high-gain which would cause instability and oscillation.

## CARTWHEEL I. F. TRANSFORMER

A brand new, ultra-compact, unshielded I-F Transformer, complete with dual trimmers; finds useful application in many plete with dual trimmers; finds useful application in many, by $1_{3^{1} \frac{1}{\prime \prime}}$ by $11 / 4^{\prime \prime}$ high; one-piece molded plastic trimmer base; by $1 \frac{1}{12}{ }^{\prime \prime}$ by $114^{1 / 4}$
for $456 \cdot \mathrm{kc}$ only.
No. $16-6661$ List Price
$\$ 1.39$

## STANDARD I. F. TRANSFORMERS

The Meissner series of Air-Core I. F. Transformers has been accepted as "standard" for general replacement purposes. Gain characteristics have been designed to correspond closely with average values found in the majority of commercial receivers. All transformers are double-tuned with ceramic base, mica-dielectric trimmers. Windings of high-grade Lita wire are fully impregnated Well-insulated RMA cegnated ed lead wires Black or-cod fish thiold is $13{ }^{\prime \prime}$ " ${ }^{\prime \prime}$ 1/2" high is $13 /{ }^{\prime \prime}$ " square by $31 / 2$ " high.

## MANUALS

## I. F. REPLACEMENT MANUAL

This manual has 254 pages listing 9.981 models made by ${ }^{224}$ manufacturers. Every superhetrodyns mace on number, original part number and factory peak frequency, and recommended replacement. Will be a great help to any service man.
I-F Replacement Manual. Price
$\$ 0.35$

## "HOW TO BUILD MANUAL"

Contains 168 pages of material including Charts, formulas, Theory of coils and etreuit apylications. Treatise on Frequency Modulation, Schematic and Pictorial wiring diagrams of Receveirs, P. A. Tuners, Test equipment, Amateur Gear
Instruction Manual Price ........................................................... $\$ 0.50$

## SIGNAL CALIBRATOR

 Precision Frequency Standard$100 \mathrm{KC}, 50 \mathrm{KC}$ and 10 KC "markers" up to 20,000 KC - Push-button control of frequency - Delivers modulated or unmodulated signal - Easily set ... In-- Precision accuracy - Precision accuracy

The Model 9-1076 Signal Calibrator is designed to operate from a 115 volt, single
phase, $50 / 60$ cycle AC power source phase, $50 / 60$ cycle AC power source. The The Model 9-1076 Signal Calibrator is a portable self-contained unit designed, to generate extremely accurate "marker" signals over the RF range of 10 KC to $20,000 \mathrm{KC}$. The "Signal Calibrator" is a secondary irequency standard against which unknown frequencies may be checked and accurately determined. The Signal Calibrator provides the means for checking and adfusting radio A. To accurately adjust the radio transmitter to a desired frequenoy.

## ANTENNA INDUCTORS

## TYPES TA AND HDA

Wound with tinned copper wire for ease in tapping feeders to coils. Equipped with fixed center links for coupling to either fixed or variable linked final tank circuits through a low impedance line. Two tinned clips come with each coil. TYPE TA COILS for power input up to 500 watts. TYPE HDA COILS for power inputs of one hilowatt.

## "RMC" CAPACITOR

The new "RMO", Rugged Midget Capacitor, is particularly designed for use in applications where strength and solid construction is as important as sound electrical design. Its sturdy frame consists of $\frac{3}{32}$ " aluminum end plates reinforced by three horizontal burs or pillars which hold the assembly absolutely rigid.
Two low loss silicone treated cer amic insulated bars are used to support the stator. Bearings are hand-fitted
 sleeve in the front and single ball
thrust in the rear-torque is smooth thrust in the rear-torque is smooth
and uniform. Contact to the rotor is made through a silver-plated berylkum forked spring bearing on a wide disk on the rotor shaft. Brackets are provided for mounting either side down, or to a front panel with spacing pillars-threaded mounting holes are provided for panel mounting. Voltage rating- 1000 V .

List

## "VU" UHF CAPACITOR

The capacitors listed below are available for use by manufacturers, engineers and amateurs for all types of communications equipment hav ing tuned circuits operating as high as 500 mc . The many advantages of these new capacitors are of course due to the silent electrical operation made possible through the use of pyrex glass ball bearings. These new bearings completely eliminate sliding or wiping contacts and metal sleeve, or ball type bearings, commonly used in ordinary variable capacitors.
Elimination of the rotor contact further precludes the possibility of noise and permits a more symmetrical design of the capacitor tself and consequently alow the one side and the inductor on the other side of the capacitor. Yoltage ne side and the

[^13]High efficlency, high frequency dual capacitors with

Same as above but single stator types. Stator is mounted at top to reduce capacity to chassis. The "FFFB" has insulated mounting brackets and control shaft.
Code Capacity
 quency dual capacitors with brackets and control shafta are insulated. DC can be applied to rotor we applied to rotor as well as stator. 1solantite end plates, soldered brass construction, cadmium plated. End plate size 133". Type "E" has rounded edge plates.

## "NZ-10" NEUTRALIZING CAPACITOR

Rounded edges, Isolantite. Fine adjusting screw. Positive lock. Horizontal adjust ment. Dimensions: $2 \frac{15}{18 \prime \prime}$ high $\times 1 \frac{13}{16} "$ deep.
Code
List
NZ.10-(2.3——10 mmf.) ............... $\$ 5.25$
"FS-135-C" FREQUENCY STANDARD

The FS-135-C is a compact frequency standard which due to its small size can be built in to almost any receiver. With the FS-135-C, the receiver becomes an accurate frequency meter. A special 100 KC crystal generates marker signals every 100 KO throughout the entire range of the receiver. The erystal frequency can be adjusted to zero beat with WWV and once this adjustment has been made the accuracy of the unit equals that of a costly frequeney standard

[^14]List
FS-135-C

## FLEXIBLE COUPLINGS

These fiexible couplings are designed for both insulated and non-insulated applications. The FC-46-S is insulated for 6000 volts with silicone treated ceramic, will compensate for considerable shaft misalignment, but will not give springy action. Overall depth $\frac{13 \prime \prime}{16}$, diameter $11 /{ }^{\prime \prime}$. The FNC-46-S is a non-insulated coupling for use where insulation is unnecessary The general design is the same as the FC-46-S but has a heavy metal the instead of ceramic. Overall depth $\frac{23}{32^{\prime \prime}}$, diameter $1 / 4^{\prime \prime}$.

## Code

List
FC-46-S—Insulated .................................................................. $\$ 1.10$
FNC-46-S—Non-insulated ........................................................ 1.10

## BUTTERFLY CAPACITOR

The new butterfly capacitor is designed for use in VHF and UHF applications where the butterfly desion is indispensable. Can be used as a single scries unit or as a split stator with grounded rotor. This new butterfy capacitor is ideal for use in transmitters as well as receivers. Has soldered rotor and stator assembly; is plated to resist corrosion; silver plated rotor contact; sleeve type bearing, low-loss ceramic end panel. Approximately $13 / 8$ " square. Depth behind panel depends on number of plates. Insulated mounting studs prevent rotor from being grounded when mounted to metal.

## "HFD" MICRO DUAL CAPACITORS

A compact dual-ideal as a high frequency tuning capacitor, for tuning and neutralizing low-powered short wave and for very high frequency transmitters, etc. Heavy Isolantite base. Equipped with new outstanding Hammarlund split rear bearing and individual noiseless wiping contact for each section. Rotor contacts variable to several positions for shortest leads. Shield between sections for grounding. The 140 mmf. size is only $11 / 2^{\prime \prime}$ high x $33 / 4^{\prime \prime}$ long behind panel. $1 / 4^{\prime \prime}$ shaft. Cadmium plated soldered brass plates.

## ANTENNA AND R.F. COILS

## Important! Read This Before Ordering

The coils in the following list are so grouped that a selection may easily be made. Coils of the same group may be tracked together, and where used in a superheterodyne, choice of an oscillator coil having the same color code dot will result in proper tracking over the desired range.
Two general ranges are covered-1715-550 K.C. and 1500-540 K.C. In each case, some overlap is obtainable. The coils for the $1715-550 \mathrm{~K} . \mathrm{C}$. range (coded red dot) are usually tuned with a 410 mmfd. gang condenser, while the latter (coded green dot) are tuned with 365 mmfd . condenser.

## SHIELDED LITZ WOUND HIGH GAIN SOLENOIDS

Employing a new type of bank winding these coils give practicall constant gain and selectivity over the broadcast band for the high impedance primary types. Wound on a $7 / 8^{\prime \prime} \times 21 / 4^{\prime \prime}$ long impregnated tube, sealed against moisture absorption. Mounted in $17 / 8^{\prime \prime} \times 21 / 4$ round cans with spade bolt mounting on $13 / 4$ " centers.

MIDGET COILS

Furnished shielded or mashielded, these colls represent the latest trend in the design of small air core inductances. "Universal Progressive" bank wound with "Iit\%" wire on impregnated tubes, high impedance primaries of sink enamel wire, and carefu, desion make these coils exceptionally hot. Even gain is obtained over the broadcast band due to the ding or "Ghoice of winding type. Oscillator Code "Green Dot.

Unshielded Type

OSCILLATOR COILS
Designed for. operation with any tule using conventional feedback methods. Color coded for connection. Padder values furnished. In choosing an oscillator coil be sure to choose the proper code to agree with" the R.F. and antenna code, "red" or "green" dot. Wound, on a special new form which we have developed, with cotton covered enamel wire thoroughly dehydrated, treated with Carron HQ711, and flash dipped in a high melting point wax.

## BUD "CE" MIDGET CONDENSERS—DOUBLE BEARING

These Midget condensers were designed to meet the rigid requirements in design of efficient ultrahigh frequency, electronic devices and precision laboratory equipment. Brass rotor and stator plate stacks are assembled into permantent units by means of electro-soldering, which assures long life and accurate plate spacing. End-plates of solid Steatite, insulate the mounting bushings and angles from the rotor and stator asangles from the rotor and stator assemblics. A large front sleeve and smooth rotation. Wiper contact pro smooth rotation. Wiper contact provides noise-free tuning. All other metal parts are corrosion-resisting cadmium plated. Rotor plates are
semi-circular shaped. Provision for semi-circular shaped. Provision
either panel or base mounting.

BUD "CE"TYPE SINGLE BEARING MIDGET CONDENSER

A rotor locking nut, provided especially, adapts these single bearing condensers to portable and mobile service. A screw-driver slot in rotor provides means of adjustment. Either insulated panel mounting or bracket mounting is incorporated. General construction is same as "CE" doubte bearing condensers.

## BUD "CE" TYPE DUAL MIDGET CONDENSERS

These well constructed dual condensers are similar in design to the double bearing types. They feature a rotor wiping contact placed at center of the rotor assembly to assure maximum efficiency at ultrahigh frequency. Opposed rotors assure perfect counter-balance and provide even torque at any position of rotation. Steatite insulation eliminates any possibility of closed induction loop in frame.

## BUD TINY MITE PADDERS

For applications requiring a constant padder capacity under all temperature and humidity conditions, these units are ideal. They lend themselves readily to I. F. transformer applications, fixed 1. F. transformer applications, fixed tuned circuits for exciters, ganged condenser air trimmer, and plus-in-coil padding as they fit iuside of standard $11 / 2$ " diameter coil forms. Rotor and stator assemblies ure made up of brass plates and rods electrically soldered into a solid unit and then are bright cadmium plated. Insulation is Steatite.

BUD TINY MITE TUNING CONDENSERS—Single Section

This series of condensers has been designed for applications where space or weight are limiting factors, and for tuning of ultra-high frequency circuits. Rigid construction, close fitting bearing, positive rotor contact, and Steatite insulation are the outstanding features. Cadmium plated soldered brass plates and rods insure high frequency efficiency.
nsure high trequency efficiency.
Each unit may be mounted in
Each unit may be mounted in any of three ways without additional panel mount, (2) insulated panel mount, and, (3) insulated base mount.

## BUD GIANT TRANSMITTER CONDENSERS

These are built into a trame consisting of $\frac{{ }^{3}}{1^{\prime \prime}}$ thick aluminum end $5 /{ }^{\text {ple }}$ diameter together by 5/8" diameter duraluminum rods. Formed brackets at top and bottom of end plates provide the means for mounting these units and permit the
placing of associated inductances directly on the condenser.
The large two finger
 rotor contac spring assures positive contact with noise-free operation. These condensers are made in a variety of capacities with plate spacings for various voltages.

## BUD JUNIOR SINGLE SECTION CONDENSERS

 Construction of these condensers features BUD clectrosoldered plate assemblies, assuring correct plate spaeing, overall rigidity, and light weight. End-plates of the frame have formed angles at top and bottom for mounting allowing associated tuning inductance to be mounted on the condenser frame.
The lower minimum capacities of these units make them especially suitable for multi band applications where a high maximum-tominimum capacity is required. Panel space for mounting, only
$23 / 4$ " by $27 /{ }^{\prime \prime}$. . with various air-gaps for rarious voltages.

## BUD JUNIOR DUAL SECTION CONDENSERS

Rotor contact is made by a four fingered plate pressure spring. placed at the center of the rotor shaft between the two sections, thercby providing perfect balance and improving the high frequency characteristics. The tic-rods are insulated at both ends with Steatite insulators to prevent the development of inductive loops in condenser frame.

## BUD MIDGET CONDENSERS

In high frequency and ultra high frequency receivers, low power transmitters, wave meters, monitors and many other electronic devices the small size of this unit makes it ideal.
Embodies such noteworthy features as: Steatite insulation; long, accurately fitted bearings which eliminate side motion; spring cup washers, large surface silver plated
 beryllium copper wiper contacts, which insure smooth, noise-free operation; Cadmium-plated electrosoldered brass rotor and stator plate assemblies, which ensure perfect plate spacing, and minimize series resistance; rigid construction, which minimizes vibration.

BUD DOUBLE BEARING MIDGET CONDENSERS may be had in either the mid-line type plates (straipht line wave length) or semicither the mid-line type plates (straticht line wave length) or semp-
ciraight line capacity) They can be single hole panel mounted or chassis mounted. The double and triple spaced panits are ideally suited for use in exciter and low-power transmitter units are ide
applications.

## BUD DOUBLE GANG MIDGET CONDENSERS

Where space is at a premium and split - stator capacitors are called for by circuit layout, BUD DOUBLE GANG MIDGETS are desirable.

Plate construction and finish,
 workmanship and materials, are identical with other Midget Condensers. Panel mounting and chassis: mounting are provided for in the design of the DOUBLE GANG MIDGETS. They are built in either mid-line or Semi-Circular type plates. These condensers are available in all commorly used capacities and in various air gaps.

## BUD UNIVERSAL NEUTRALIZING AND HIGH FREQUENCY CONDENSERS

This type condenser is applicable to many neutralizing and high frequency tuning circuits. The advanced two pillar construction eliminates any capacity variation due to vibration. The movable plate is adjusted by means of a threaded

| Cat. No. | Plate <br> dia. | Overall <br> Length |

## BUD FEED-THROUGH AND BASE MOUNTED NEUTRALIZANG CONDENSERS

Feed through and base mounted neutralizing condensers particularly suited in circuits utilizing tubes with the grid leads terminating in the bave. One hole required for mounting. Threaded brass rod holding condenser in place also brings the connection to the bottom plate through the chassis, thus simplifying wiring. Number 890 and number 852 are idcal neutralizers for popular low powered beam tubea. Number 890 base mounted only.

| Cat. No. | Plate dia. | Size Hole For Mtg. | -MMFD. CAPACITY- |  | Your |

| NC-890 | 1" |  | 6 | . 5 | 1:14 |

The diffculty of designing a radio frequency amplifier to cover any large frequency range and maintain a proper L/C ratio, is overcome by paralleling the proper Stat-Air Condenser with the tank condenser.
Soldered brass plates, bright cadmium plated and Steatite insulation insures maximum operating effciency.

## BUD COMPACT NEUTRALIZING CONDENSERS

In applications where space is the prime factor, these units are ideal for neutralizing and high frequency tuning. Low loss steatite is used for dielectric. Mounting of these condensers features either one hole mounting or fastening to solder lugs provided. All brass parts are nickel plated. A knurled locknut permits locking of movable plate.

## BUD 75 WATT OSCILLATOR AND BUFFER COILS

The coramic mounting base heeps the coil a safe distance from the chassis when the coil socket is mounted on the chassis. It also permits gasy coil removal without disturbing the winding. All eoils are air-wonnd with brierht tinned copper wire and mount in 5-prong tube sockets.

OEL Colls have fixed end link and are NOT center tapped. OCL Coils have fixed center link with main winding center tapped. OLS Coils have adjustable center link with main winding center tapped.

## BUD AIR-WOUND TRANSMITTER COILS

The power ratings of these coils indicate the maximum mpnt power alowable to the stare $n$ which they are to be used. The "Air-wound" construction of all these cobls, together with the bright timed copper whefings and stcatitw mountime bars, make all three serbes umanablly cfficient. Coils are self-smportmon mot are rigidly held in place by fere-resistant locking strips. All units are center tapped and have semi-adjustable link at center.

ADJUSTABLE LINK TRANSMITTER COILS
Since one of the most effective means of varying the loading of an R. F. Stage is by the use of a variable link to the plate tank, these three lines of inductances have this feature incorporated in them. In each series the link winding is connected to the jack bar into which the coils are plugged. The one link may thus be used with any of the coils. This link winding is of the helical type and is so arranged that it may be radily controlled from the panel by means of an extension shaft if required.
All coils in this series are of the "Air-wound" type, making them very efficient. Windings are made of bright tinned copper wire, and the mounting and plug bars are made of Steatite to ensure a minimum of loss. Windings are held firmly and positively in place by fre-resistant locking strips to ensure constant inductance. The links couple to the coils at the center and all inductances are center tapped.

## BUD ANTENNA MATCHING NETWORK COILS

The low frequency coil in each rating is designed for operation from 160 meters to 40 meters, and the high frequency coil in each rating is designed for operation from 20 to 10 meters. All coils and links have a suffeient number of taps

| Cat. No, | Height | Range in <br> Meters | Mtg. Hole <br> Dim. |
| :--- | :--- | :--- | :---: |
| ACV-1 | 500 W | $160-40$ | $61 / 2^{\prime \prime}$ |
| ACV-2 | 500 W | $20-10$ | $61 /{ }^{\prime \prime}$ |
| ACM-1 | 1 Kilowatt | $160-40$ | $71 / 2$ |
| ACM-2 | 1 Kilowatt | $20-10$ | $71 / 2^{\prime \prime}$ |

provided to allow both the inductance and the coupling to be varied over a wide range.

The coils are supported on Steatite insulators, which are mounted on a Black Crackled base. This base is provided with two holes for convenience in mounting.

## BUD CODE PRACTICE OSCILLATOR

This audio oscillator has a built-in dynamic speaker. Operates up to twenty earphones. Speaker is automatically cut out of the circuit when earphones are inserted. Ten phones may be connected in parallel. More than ten marphones, connect in series-parallel.
A volume control and a pitch control are provided. Any number of leys may be connected in parallel for group practice. Operates on 110 volts, A.C. or D.C.
No. CPO-124—Sh. wt. 6 lbs. Your Cost $\$ 12.50$

## BUD WAVE METER

The new Bud Wavemeter offers radio amateurs and experimenters positive waveband identification and ease of line-up of frequency multiplier and amplifier R. F.
 units in multi-stage transmitters. The sensitivity of this unit makes it useful as a neutralization indicator and for detecting weak R.F. currents when closely coupled to a circuit. Antemna tuning adjustments are simplified if this wave meter is used to determine position of standing waves on antenna feeder systems.

Wired and assembled in an attractive black crackled enameled stcel case, this waverneter is complete with indicator bulb and neat calibrated name plates with seven plotied bands from 160 meteris to 5 meters, including the new 15 meter band.

Your Cost
WM-78 4 lbs . $\$ 8.25$

## BUD WIRELESS PHONOGRAPH OSCILLATOR

Any standard record player easily converted to wireless operation. Record reproduction is then possible through a regular radio receiver without the necessity of cumbersome interconnecting wires. Easily installed. Instructions furnished.
Faithful reproduction. Unit wired and tested, includes tube. Black Crackle Enamel. Operates from 115 volts A.C. or D.C. Frequency range, approx. 1100 to 2150 K.C. $41 / 2 " x 21 / 2 " x 21 / 8^{\prime \prime}$ ".

Cat. No. W0-6-Ship. wt. 5 lbs.........................Your Cost $\$ 7.85$

BUD 50 WATT BANDSWITCH ASSEMBLIES

This 50 watt bandswitch assembly with $\mathbf{1 0 - 1 5}$ -20-40-80 meter coils is excellent for use in capacity coupled oscillator, buffer, or amplifier stages. The coils are mounted on a low-loss ceramic switch which is furnished with a suitable maker plate.
Cat. No. ONS.1 ..........................Your Cost $\$ 4.29$

## BUD 100 WATT BANDSWITCH ASSEMBLIES

For pushpull plate or grid circuits or where plate neutralization is intended,
use a Bud XCS-1 bandswitch coil assembly. Either a single section 100 mmfd condenser such as Bud C-1534, or a dual section 200 mmfd condenser, Bud JC-1569, should be used to tune all bands. Coils are center tapped and center linked and cover all bands 80 to 10 meters.

For single ended circuits Bud XES-2 end linked coils use the Bud XEs-2 end hithed coil assembly with a Bud JC-1534 100 mmfd condenser.

Each assembly supplied complete with a band-marked dial plate and installation instruction.
$\begin{array}{ccr}\text { Depth } & \text { Ship. Wi. } & \text { Your Cost } \\ 3^{\prime \prime} & 2 \text { lbs. } & \$ 4.29 \\ 5^{\prime \prime} & 3 \text { lbs. } & 9.06 \\ 5^{\prime \prime} & 3 \text { lbs. } & 7.92\end{array}$

PIE-WOUND R.F. CHOKES With Strap Leads For radio receivers and transmitters. No. CH-876 is a heavy duty choke for transmitter plate circuits. $11 / 2^{\prime \prime} \times 5 / 8^{\prime \prime}$.

## ULTRA HIGH FREQUENCY

## R.F. CHOKES

For ultra high frequency receivers and transmitters. Consists of a ceramic rod with a single layer winding. Suitable for use on $21 / 2$
 or 5 meters. The CH- 570 is sometimes used as a filament choke in certain types of ultra high frequency oscillator and amplifier circuits. CH-570 is supplied with a mounting foot.

## BUD CONE STAND-OFF INSULATORS

All applications requiring insulated mountings and supports are readily aceommodated by these various types and sizes of ceramic insulators. Each unit is made from high grade glazed ical strenrth, Nos. T-300 to J-303 are tapoed at each end and are supplicd with necessary hardware. Nos. I-304 to I-306 are supphed with No. PJ-940 Banana Plug Jack and accommodate standard phed with No. PJ-940
banana and GR plugs.

BUD REGULATOR CONE INSULATORS

BUD CONE FEED-THROUGH INSULATORS

In bringing high voltage and R. F. leads through pancls and chassis, and for numerous other uses, this line of two-piece insulators will be found indispensable. Made of the same cerimic material as the stand-Off Insulators.
Vos. I-436 to $\mathrm{I}-438$ are supplied with threaded rod and necessary hardware, while Nos. I-453 to J-455 are supplied with No. 1'J-949 jack top attached to appropriate threaded rod.
RUD REGULAR CONE FEED-THROUGH INSULATORS

BUD JACK TYPE CONE FEED-THROUGH INSULATORS

 BUD PILLAR INSULATORS

The need for a firm support for high voltage leads such is those going to plates of rectifier tubes or large transmitting tubes is adequately filled by these two numbers.
on top of a crazed Steatite rod Fach unit consists of a hoavy lug foot for mounting purposes. Fittings are nickel plated.

BUD NEW TYPE FEED-THRU INSULATOR BUSHINGS

$1-457$

$1-456$

New type Bud feed-thru insulator bushing made from JUCITE, in two sizes to simplify insulation problems when high voltage wires are fed through chassis or panels. If wires are insulated, it is not necessary to remove insulation as the center holes are large enough to pass it. If larger size hole is required, material can be easily drilled. Each bushing supplied with nut for mounting on material up to $1 / 8^{\prime \prime}$ thick.

| Cat. No. | Description |  |  |
| :--- | :--- | :--- | ---: |
| $1-456$ | Diameter $1 / 2^{\prime \prime}$ with $1 / "^{\prime \prime}$ wire hole | Your Cost |  |

## BUD LUCITE INSULATORS

Here is a new series of feeder spreaders, stand-off insulators, and feedthrough insulators designed for applications that demand the finest type of insulation. They are made of Dulpont Lucite, a new plastic that has extremely low losses at radio frequencies. It is water-clear, and all outside sumfaces are hishly polished.
In addition to their remarkable electrical propertics, these insulators will greatly add to the finished appearance of any piece of equipment in which they are used.

## BUD LUCITE FEEDER SPREADERS

Designed for all average feeder requirements. A 600 ohm line can be made with any size wire from No. 12 to No. 18 by using one of the spicaders listed below. The spreader used for this application depends on the wire size. Further data on this subject is available in any an* tema handbook. These spreaders are furmished with locking screws to clamp the wire in place. All spreaders are $3 /{ }^{\prime \prime}$ in diameter, and are drilled for No. 12 wire.

## BUD LUCITE STAND-OFF INSULATORS

The Lucite pillar-type stand-off insulators listed below are made in a convenient number of sizes to fit a variety of applications. They are intended for chassis mounting in a single mounting hole. The $1 / 2^{\prime \prime}$ diameter insulators are suppifed with $6-32$ mounting serews. The $3 / 4$ " diameter insulators are supplied with 10-32 mounting serews.

BUD LUCITE FEED-THROUGH INSULATORS
These Lucite feed-through insulators are made in two diameters, and five convenient heights. They are ideal for bringing high-frequency leads through a chassis or shield and are superior to ceramic insulators for this purpose. The $1 /$ " diameter insulators are furnished with 6-32 hardware. The $z_{4}^{\prime \prime}$ diameter insulators are furnished with 10-32 hardware.

Lucite Rod can be supplied on special order in any of the four diameters listed above, in lengths up to $48^{\prime \prime}$.

HEAT RADIATING CONNECTORS
These connectors have been scientincally designed to aid dissipation of heat generated at the plate and grid termibals of transmitting tubes and to protect the glass seal at these points. TC-488 and TC-489 are for wire leads. TC-1920 and TC-1921 are for cap type leads.

Lead size indicated in column is the maximum for each type.

## BUD VERNIER DIAL-GEARED TYPE

This new and improved precision-built, vernier dial of attractive appearance, has been designed for industrial, laboratory and amateur radio applications. Many uses can be found for this gear-driven dial on electron-coupled oscillators, frequency meters, receivers and many other types of instruments and laboratory equipment which requires ease of tuning and accuracy of calibration.

Freedom from back-lash is obtained by the use of spring-loaded laminated steel gears which are of the ratio ten to one. Each dial comes furnished with threc paper dial scales upon which calibration marks can be imprinted. These dial scales are printed with five calibration arcs for wave band identification and each arc is divided into five equal sections over 150 degrees, which makes each section the equivalent of one rotation of the circular dial or 100 dial divisions. This enables a calibration of 500 divisions over the cntire seale.

The dial is furnished complete with all hardware. An attractive gray crackle frame outlines the dial scale which is further protected by a "Plastacele" window. The whole dial seare assembly mounts independent of the gear without disturbing the dial drive. Mounting area of the dial is $51 / 4 "$ x $53 / 4 "$. Depth behind panel is $11 / 2^{\prime \prime}$.

Cat. No. D-1729.
Your Cost \$3.18

## BUD NAME PLATES

Made of aluminum with polished letters on black enameled background. Plates are $3 / /^{\prime \prime} \times$ $11 / 2^{\prime \prime}$. Shipping weight of $10-1 / 2 \mathrm{lb}$.

## VERNIER DIALS-

 FRICTION TYPEFriction drive gives smooth vernier action. Dials calibrated 0 to 100 clockwise over 360 de clockwise over 300 degrees. The face of dial is glossy black enamel; rim and numerals are pol" ished metal. Dials fit $1 / \mathbf{L}^{\prime \prime}$ shafts. Included are a
single line indicator and single line indicator and a black knob on the vernier drive

over $180^{\circ}$. Runs perfectly concentric with the shaft and is well insulated. Nos. D-1732 and D-1734 supplied with a single line indicator. Nos. D-1895 and D-1897 supplied with vernier indicators which enable readings of one part in 1000 to be made accurately.

## BUD DE LUXE STREAMLINED PROFESSIONAL RELAY RACKS

deal for housing your Transmitter, P. A. System, or other Electronic Equipment, this large, sturdy cabinct is of modern design, fcaturing rounded vertical front cormers and handsome red-striped, chrome-trim at bottom. Top has louvres in front and rear for additional ventilation.
These Relay Racks are of rugged construction being fabricated from I6-gage ( $\frac{\mathrm{H}^{\prime \prime}}{}$ ) cold rolled steel; the panel mounting supports, which are welded to each side of the cabinet, are of $1 /{ }^{\prime \prime}$ steel, accurately punched to accommodate rack parrels. The holes are tapped 10-32. These panel mounting supports are recessed so that no edres are exposed.
The rear door is hung on loose-joint hinges, and is held securely in place by two snap catches. The construction and application of this door enables it to be easily removed when equipment repairs are necessary. An Interlocking Switch Bracket is provided with each cabinet.

The cabinets are shipped "knocked down," all nec essary hardware for easy assembly being suppliet. The cabinets are available in either Black or Grey Crackle finish. When color is not specified, Black will be furnished.
The calinet can be supplied without louvres on one or both sides at no extra cost. This is a desirable fea ture when two or more cabinets are to be placed side by side.

Base of cabinet has four supports welded into each corner These supports are tapped so that our RC-7756 casters can be easily attached to these cabinets and therelby eliminating the necessity for using cabinct rack Dollies Casters are not included in price of these cabinets.

## BUD PROFESSIONAL RELAY RACKS

Professional appearance will be added to any Transmitter, P. A. System or any Electronic Equipment when housed in one of these excellent Cabinet Relay Racks. Complete protection from damage and dust is provided for equipment.

The enclosed rack is substantially constructed from I6. gauge ( ${ }^{\prime \prime \prime}$ ) cold rolled steel. Panel mounting supports which are welded to the sides are $1 / 3^{\prime \prime}$ thick, and are accurately punched; holes are tapped $10-32$. Holes are spaced to accommodate either Western Electric or Amateur

Standard Notched Panels. The panels it mio a recess, so that the edges are not exposed. The removable rear door is provided with two snap catches. An interlock switch bracket is provided with each cabinet.

These Relay Raciss are painted in either Black or Grey Crackle Enamel finish. They are shipped "Knocked Down," Crackie Enamel finish. They are shith all necessary hardware for assembly. We supplied with all necessary hardware for assembly. We
also supply a sufficient number of $10-32$ screws and cup also supply a sufficient number
washers for mounting of panels.

## BUD SMALL CABINET RACK

The long-felt need for a small and inexpensive cabinet rack to house low power transmitters and similar apparatus is filled with the introduction of this new addition to the Bud line. This cabinet is constructed to accommodate two panels, one $101 / 2{ }^{\prime \prime}$ and one $83 / 4$ ". Cabinet height, $20 \frac{1 / 4^{\prime \prime}}{}$, width $19 \frac{1}{8 \prime \prime}$, depth $101 / 2^{\prime \prime}$.

The rear of the cabinet is covered by a hinged door with an efficient locking device, and the sides are louved for ventilation. The entire unit is formed from Black Crackled steel and is furnished complete with panels.

Cat. No. RC-1749.
.Ship. Wt. 25 lbs..
Your Cost $\$ 14.10$

## BUD STANDARD RELAY RACKS

Where a sturdy mounting for a number of panel and chassis units such as in a transmitter, public address system, etc., is desired, allowing complete accessibility to all parts, this line of Relay Racks is indispensable. The one-eighth inch steel channels, three inches deep, are held together by angle cross-pieces of the same material. The base design has been improved to incorporata a chassistype bottom, together with the usual side angles, making the rack stronger and more stable.

These units are intended to accommodate standard 19 -inch panels with either Western Electric or Amateur Notching. Holes are drilled and tapped for $10-32$ thread. The finisis of these racks is baked Black Crackle Enamel, and they are shipped "knocked down." Assembly is very easy, and all necessary nuts, bolts, and washers are included.

The No. RR-1265 Rack is a professional heavy duty rack for heavier types of commercial installations. Uprights are heavy channel iron supported by a heavy $3 / 8^{\prime \prime}$ thick angle-iron base. Finish and drilling same as above.

| Cat. No. | Overall Size |  |  | Panel Size |  | Ship.Wt. Your Cost |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| RR-1264 | $701 /{ }^{\prime \prime}$ | $20^{\prime \prime}$ | $22^{\prime \prime}$ | $661 / 2{ }^{\prime \prime}$ | $19^{\prime \prime}$ | 48 lbs . | 18.00 |
| RR-1265 | $721 / 2^{\prime \prime}$ | $20^{\prime \prime}$ | $15^{\prime \prime}$ | $66^{1 / 2}{ }^{\prime \prime}$ | 19" | 104 lbs | 31.50 |

## BUD DESK TYPE RELAY RACKS

These small relay racks are perfectly suited for table mounting of low and medium power transmitters, public address systems, and other electronic instruments. Each rack is built around a heavy chassis on which the side uprights mount. This type construction permits the rack to hold great weights. Racks come "knocked down" but are complete with all necessary hardware and are easily assembled. Finish is Black Crackle Enamel. Either Western Electric or Amateur Standard notched panels can be used. Panels set in a recess so that no edges are exposed.

NOTE: H—Denotes Height; D—Depth; L—Length; W—Width.

## BUD RACK SHELVES

Heavy power supplies, modnlator units, etc., can be mounted on these rack shelves which are supported in the cabinet by the chassis-supporting angles listed betow. They are designed to slide in from the rear of the cabinet. Made of heavy gauge steel and finished in Black Crackle Enamel.

## BUD CHASSIS SUPPORTING ANGLES

In a relay rack it is frequently desirable to have some support in addition to the panel for an unusually heavy panel-an-chassis unit. To fill this need, these Supporting Brackets may be screwed on the sides of a relay rack cabinet in such a manner that the chassis may slide and rest on them in much the same way as a desk drawer does. The angles No. SA-1349 are $141 / 2^{\prime \prime}$ long and project $3^{\prime \prime}$ from each side of cabinet. The
angles No. SA-1350 are $12^{\prime \prime}$ lons and project $3^{\prime \prime}$ from each side of cabinet. Afford ample sup. port for a standard $17^{\prime \prime}$ width chassis. These brackets are sold in pairs, finished in durable Black Orackle Enamel, and come complete with necessary mounting hardware.

## BUD STREAMLINED AMPLIFIER FOUNDATIONS

The utility of these new Amplifier Founda. tions can be appreciated only after they have been seen. Intended to house public address amplifiers, speech amplifiers, and similar apparatus, these units present a handsome appearance heretofore not avail. able for such apparatus.
Each of these foundations consists of a standard chassis on which is mounted a removable cover held on by screws. This cover has the front and rear horizontal corners rounded; sides and ends are attractively louvred; and top contains grilled cutouts. Chromium trim is used on top and sides, and handles are used on ends of chassis. All chassis are
$3^{\prime \prime}$ high, and all units are $9^{\prime \prime}$ overall height. Standard finish for this series is either Black or Grey Crackle Enamel. Black will be supplied unless Grey is specified.

## BUD SLOPING PANEL AMPLIFIER FOUNDATIONS

These foundations add a real "Commercial" appear* ance to any amplifier. The $4^{\prime \prime}$ sloping front on the amplifier chassis provides adequate space and easy visibility for controls and indicators.

Each foundation consists of a sloping front chassis on which is mounted a removable top cover. The top horizontal comers of this cover are rounded and the sides and ends are louvred. The top contains grilled cutouts for adequate ventilation. This cover is attractively finished with red striped chromium trim. Handles are placed on both ends of the chassis. All chassis are $31 / 2^{\prime \prime}$ high and all units are $91 / 2^{\prime \prime}$ over-all height.

The appearance of these foundations is further enhanced by the two-tone finish. The cover is finished in Grey Crackle Fnamel and the ehassis is finished in Black Crackle Enamel.

## TYPE "C" CABINET RACKS

These are professional type racks that have been used on many commercial installations, and make a DeLuxe job of any amateur or broadcast transmitter. The racks are of all-steel construction, welded into an integral unit, to give a lifetime of service.

All panel mounting screws are concealed by means of a full length corner trim on each side at the front. ln keeping with modern design, this front trim is rounded on the vertical corners. The rear corners are finished with regular angle trim. The front of the rack is trimmed with chrome moulding top and bottom. The door has a grille at top and bottom, and is hung on sturdy loose-joint hinges; it is held closed by two flush snap-action catches. Additional ventilation is provided
by louvres at the sides. The panel mounting angle irons are $3 / 16^{\prime \prime}$ thick, with mounting holes accurately, drilled and tapped $12 / 24$ thread on multiple $11 / 44^{\prime \prime}-1 / 2$ " spacings. The rack is made from $1 / 16^{\prime \prime}$ thick cold rolled steel, rigidly braced and reinforced throughout; the bottom is $\frac{7}{64}$ "thick steel. A rectangular opening is provided in the bottom for conduits, leads, etc. A duplex receptacle and outlet box are provided in the back under the door.

FINISHES: Either black ripple or slate grey ripple enamel. Corner trims are supplied in dull black or slate grey smooth enamel to match.
RACKS WITHOUT LOUVRES: To permit racks to be set up in gangs or rows of two or more, the louvres at sides are omitted. Racks may be joined by a flat trim fastened to front of adjacent racks, overlapping both racks. Shipped with corner trim as illustrated; where specified, front joining trim will be substituted in place of corner trim at same price. Front joining Trims cannot be used on racks with front doors.

## TYPE "C" TRANSMITTER RACKS

STANDARD TYPE

Similar to standard type "C" racks listed on page J-98 except that they have been reinforced at rear corners for use with heavier apparatus. At the rear, knockouts are provided for conduit and $4^{\prime \prime}$ square duct, as well as a double convenience outlet with receptacle. Knockouts are also supplied at sides for conduit, suitable for entry of cables when units are ganged. The rear door, which is removable, has ample louvres for ventilation, and is covered on the inside with mesh screening. Front trim rounded on vertical corners. Racks are regularly supplied with corner trim for use as a single unit, but will be furnished with suitable front connecting strips for ganging in rows of two or more without additional charge.

FINISH: Black ripple enamel with dull black corner trim is standard. Slate grey ripple enamel furnished without additional charge, if so specified. For grey lacquer finish, add $8 \%$ to prices.

PANELS: Type "C" panels to fit the G-2218 and G-2219 racks are listed on page J-102. For cost of $30^{\prime \prime}$ blank panels to fit the G-3024 rack, add $100 \%$ to prices of 19 " panels on page J-102.

| Catalog | Overall | Panel | Clear | Ship. | Net |
| :--- | :---: | :---: | :---: | :---: | :---: |

## DELUXE TYPE

This rack is undoubtedly the finest standard transmitter rack which we have ever made. It is constructed of $1 / 16^{\prime \prime}$ sheet steel, with a base of $1 / 8^{\prime \prime}$ steel, and is reinforced for use with heavy duty apparatus. The meter panel at the top is $7^{\prime \prime}$ high, has a glass front, and is provided with a blank bakelite sub-panel. The inner sides of the rack are reinforced with $1 / 8$ " steel channels, to which may be attached angle brackets to support the chassis. These channels may also be used as wiring ducts.

The rack will accommodate panels $24^{\prime \prime}$ wide; the front panel mounting angles are recessed to allow 2" clearance behind the front door for dials, knobs, etc. The front door is mounted on concealed hinges; the rear door has loose-joint hinges so that it may be removed. Both doors are equipped with handles, and the front door also has a lock. The rack will accommodate chassis up to and including those $26^{\prime \prime}$ wide by $22^{\prime \prime}$ deep, listed on page J - 103 . Blank panels $24^{\prime \prime}$ wide can be supplied at prices listed on page J- 102 plus $50 \%$.

No. G-8024
Overall dimensions: $831 / 8^{\prime \prime} \times 301 / 2^{\prime \prime} \times 27^{\prime \prime}$.
Available panel space: $70^{\prime \prime} \times 24^{\prime \prime}$.
Clear inside width at front: 24"
Clear inside width at rear: $261 / 2^{\prime \prime}$.
Clear inside depth behind front panels: 23".
Shipping weight: 540 lbs .
Net Price: $\$ 213.00$.
Black ripple enamel finish is optional.

# PAD-MEA RACHE - CHASSIS CRBILETS for ELECTRONIC APPARATUS 

## TYPE "A" ENCLOSED RELAY RACKS

All of the racks on this page are shipped "knockeddown" for easy assembly with all necessary bolts supplied. Made for standard 19" wide panels, they are substantially constructed from $1 / 16^{\prime \prime}$ cold rolled steel; panel mounting angles are of $\frac{7^{\prime \prime} 1}{64}$ steel, accurately drilled on universal centers for either "Amateur" or type "C" panels, tapped for 10/32
machine screws. Panels fit into a recess, so that edges are not exposed. Louvres in sides and screen sections in rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Ample panel mounting screws and washers supplied with each rack.

## STANDARD TYPE

This completely enclosed rack will give your job the "professional appearance" so desirable on transmitters, test equipment, public address systems, etc. lt is made in three heights in accordance with specifications below:

## BLANK STEEL CHASSIS BASES

## STANDARD TYPE

Construction is the same as our heavyduty chassis. Stamped from one piece of cold rolled steel, and have four solid sides with welded corners. Bottom edges are flanged in on four sides to provide additional reinforcement, and they are drilled for bottom plates. The chassis are made from \#20 gauge steel, except those marked (*) which are stamped from $\frac{1}{16}$ " steel exactly like our heavy-duty type.

## STEEL RACK PANELS - 19' LONG

These panels are made from $1 / 8$ " stecl and are slotted for standard amateur mounting. Twelve standard sizes. Furnished in black or grey wrinkle finish. These panels are also supplied with commercial (H.E.) slotting. When ordering commercial type indicate by adding W to our catalogue number bolow.

| Cat. No. | Width | Weight | List Price |
| :---: | :---: | :---: | :---: |

## Thank You!

When writing for additional information or when ordering from sources of supply listed in this book, please mention

RADIO'S MASTER

## ACRO MODEL "M" SNAP ACTION SWITCH

Built with the patented Beryllium Rolling Spring. New, stronger molded case with four $3 / 32^{\prime \prime}$ mounting holes. Sturdier barriers between turminals, affording generous electrical clearances. Heavier solder terminals with . $082^{\prime \prime}$ terminal holes for easier wiring. Greater compactness for multiple assembliesfour can be mounted in a space of less than $11 / 8^{\prime \prime}$. Size: $17 / 64^{\prime \prime}$ thick, $1-13 / 64^{\prime \prime}$ long and $53 / 64^{\prime \prime}$ high. Made with single pole, single or double throw contacts. Rated at 10 amps. 125 volts A.C. May be fitted with leaf actuators.

MIDGET SINGLE POLE OPEN BLADE
Designed for compactness and long life Operating pressure 3 to 6 ounces. Overall dimensions $2-1 / 32^{\prime \prime} \times 3 / 8^{\prime \prime} \times 23 / 64^{\prime \prime}$. Normally open, normally closed and double throw eircuits. Rated at 10 amps. 125 volts A.C.

lilutitration $1 / 1 / 2$ Times Actual Size
A new push-button type switch with a double break shorting bar feature for panel mounting applications. $\frac{29}{32}$ diam. Cadmium plated brass case with asturdy threaded sleeve $\frac{15}{3}-32$. Normally open and normally closed circuits. Rating is 15 amps . at 125 volts A.C.

OPEN BLADE MODEL "M"
This ACRO switch fills the need for a compact, low priced, sturdy switch for vertical mounting singly or in multiples. Operation pressure 6 to 10 ounces. Dimensions $1-13 / 32^{\prime \prime} \times 1-1 / 64^{\prime \prime}$ $x \quad 5 / 16^{\prime \prime}$. Normally open, normally closed and double throw, Rated at 10 amps. 125 volts A.C.

These three standard enclosed snap-action Acro switches operate on the rolling spring principle giving instantaneous make and break. Features of this switch are: Frictionless operation, long life, low operating pressure, high contact pressure, small size, unaffected by ordinary vibration, easy installation. Weighs less than one ounce, plastic case drilled for two $6 / 32$ screws Comes with a variety of actuators, actuation pressures, gaps, overtravel, movement differential, to meet various applications. Normally open, normally closed or double throw. Rated 125 v. 10 amps. A.C.

Size: $1 \frac{115^{\prime \prime}}{16} \times \frac{11^{\prime \prime}}{16^{\prime \prime}} \times \frac{27^{\prime \prime}}{32}$

2M-ROLLER LEAF ACTUATOR

# 0 <br> <br> SMALL SWITCHES, <br> <br> SMALL SWITCHES, LIMIT SWITCHES, AND MAGNETIC RELAYS 

## SMALL SNAP-ACTION SWITCH, G-E SWITCHETTE CR1070-C103

This new, lightweight switch mechanism lends itself especially to applications where space is limited and long life is required.
The Switchette is operated by movement of the spring-return button located in the housing. This button can be actuated by a lever, bellows, or other means. Snap-action, double-break-contact construction gives the G-E Switchette a high current rating and makes it suitable for applications where the vibration is severe.

## FEATURES AND ADVANTAGES

1. Small (approximately $11 / 4 \mathrm{in}$. by $1 / 2 \mathrm{in}$. by $1 / 2 \mathrm{in}$.) and weighs only 9 grams ( 0.02 lb ).
2. Resists vibration and corrosion.
3. Phenolic-resin operating button provides safety from live parts during operation.
4. Contact tips are 99.95 per cent pure silver.
5. Particularly suited to electronic applications because of negligible amount of contact bounce.
6. Two terminal arrangements are available, as shown above.
7. Wide variety of forms available, for example, three basic contact arrangements: single-circuit, normally open; singlecircuit, normally closed; and two-circuit, normally open and normally closed. Also many special forms.
Switchettes are available in ratings up to 10 amperes at 115 or 230 volts a-c. Write for Bulletin GEA-3818.

Switchettes having two terminal arrangemenis

## LIMIT SWITCH, CR1070-D101

This sturdy, open-type limit switch is operated by a plunger which provides $\frac{7}{32}$ inch overtravel. The contact mechanism of this device is the G-E Switchette, which can be wired to control one normally open circuit and one normally closed circuit. Rated 10 amperes at 230 volts a-c. Write for Bulletin GEA-3821.

## MAGNETIC RELAY, CR2790-E

The CR2790 relay is a compact, attractively finished device for use either as a motor starter or a relaying unit. Available in either an open form or enclosed in a general-purpose housing. Three contact arrangements available: singlepole, single-throw; double-pole single-throw; and double-pole, double-throw. In the open form, all three contact arrangements use the same base, which facilitates mounting. In the enclosed form, the U -shaped cover makes wiring and servicing convenient. Rated 10 amp. continuous, $110 / 120$ volts a-c.

## Applications

Control of pilot circuits in response to remote control switch or thermostat, or for direct control of small motors.
As a fractional-horsepower motor starter, or in conjunction with a magnetic switch controlling larger motors, heating or lighting circuits, and signal systems.

Enclosed magnetic relay

## MALLORY CIRCUIT SELECTOR SWITCHES

## $1200 L \cdot 1300 L$ mutr-gang

- All contacting members of the 1200 L and 1300 L series of switches are silver plated except rotor contact slugs, which are solid silver. This insures low contact resistance. The high lift of the contact springs provides a wiping and self-eleaning action.

A new and improved index spring gives long-life operation. The adjustable stop feature permits extreme flexibility wider variety of circuit combinations. All switches supplied with $3 / 8$-inch diameter $3 / 8$-inch long brass bushing, and 2 -inch long shaft-grooved for easy cut ting at popular lengths.

Three- and four-gang switches have one-inch spacing between sections, all others one-half inch. If necessary, these switches can be disassembled, the spacers cut down to meet the requirements as to length of the switch and the spacing of the sections.
(Prices include Mallory No. 366 Knob, one No. 232 Nut and one No. 227 Lockwasher, but do not include Dial Plates. See page 32 for special Dial Plates.)

*These switches are provided with an "off", position which is in addition to the number of positions listed in third column.

## 1400 L CIRCUIT OPENING SWITCH

- Mallory No. 1400L Switch will "open" any one of twelv, "Tines" for the insertion of a current reading meter ans maintain a "through" circuit on the other eleven lines. Thi switch has found wide application in the construction o test sets, tube checkers, analyzers, and other apparatu where it is desirable to use only one meter.

Multiplying resistors can be wired to the switch, so tha the switch not only opens the line but also automatically cuts in the proper multiplying resistor.

Special Circuit Opening Switch complete with Mallor: Bar Type Knob No. 366, one No. 232 Nut, one No. $22^{\prime}$ Lockwasher, and Mallory Etched Dial Plate No. 382-
No. 1400L. List Price.
$\$ 5.91$

## 13124L

## 24-POINT TAP SWITCH

- A special single circuit, 24-point non-shorting switch witl $3 / 8^{\prime \prime}$ bushing and $2^{\prime \prime}$ grooved shaft, particularly useful in tes equipment applications. No stops-switch is capable of con tinuous rotation.

Complete with Mallory Bar Type Knob No. 366, one No 232 Nut, one No. 227 Lockwasher, and Mallory Dial Plat No. 394 -
No. 13124 L . List Price.
$\$ 3.5$

# 151L <br> "HAMSWITCH" 

[^16]
## MAlLORY CIRCUIT SELECTOR SWITCHES

## $3100 J \cdot 3200 J^{\text {single gang }}$ SWITCHES

- Compact, enclosed, lowvoltage switches, ideally suited for radio frequency, tone control, antennae switching, intercommunication, test equipment and many other electronic devices where space is at a premium.

Available in single section only, and in two sizes - $11 / 4$ inch and $111 / 16$-inch diameter base. The circuit combinations shown below indicate respective sizes. All combinations made in both shorting and positive non-shorting action. Adjustable stop feature is available only in the $111 / 16$-inch base.

All $3100 \mathrm{~J}-3200 \mathrm{~J}$ series are equipped with universal shaft, 2 inches long and grooved to provide easy cutting at popular lengths.
(Prices include one Mallory No. 366 Knob, one No. 232 Nut, and one No. 227 Lockwasher, but no Dial Plate. See page 32 for special Dial Plates.)

## UNIVERSAL MOUNTING BRACKET RB254

- For baseboard or rear support mounting of all Mallory circuit selector switches, volume controls and jacks. Universal Mounting Bracket No. RB254 packed five to the carton. List price each.
. $\mathbf{\$ 0 . 2 5}$

## 171 CERAMIC SECTION SELECTOR SWITCHES

- These are new Mallory circuit selector switches, especially useful in high frequency circuits where the ceramic insulation minimizes RF losses as well as moisture absorption. An adjustable stop permits choice of from two to eleven positions and may be adjusted without removing switches completely from the panel. Features are heavily impregnated ceramic stators and rotors, heavy silver plating on all current carrying parts, low-resistance self-cleaning contacts and, in addition, a special silver-indium surface treatment of rotor segments, providing low torque, long life, and low contact resistance over an extended temperature range.

The new series is finding widespread use in laboratories, by manufacturers of transmitters, receivers, test equipment and other electronic apparatus, by experimenters, and radio amateurs. Prices include 2-inch grooved shaft and one each No. 366 Knob, No. 232 Nut and No. 227 Washer.

$\dagger$ Non-shorting.

## 160C

CERAMIC SECTION "HAMBAND" SWITCHES

- For transmitter band switehing.

HamBand Switches are rated for use in transmitter plate circuits using up to 1000 Volts DC with power up to 100 watts inclusive.

Impregnated magnesium silicate ceramic provides low losses at high frequencies. No stops; switch shaft is capable of continuous rotation. $90^{\circ}$ indexing. Technical data sheet. Form Y-646 available on request. Prices include $2^{\prime \prime}$ grooved shaft, $3 / 8^{\prime \prime}$ bushing and one each 366 Knob, No. 232 Nut and No. 227 Lockwasher.

2000
PUSH-BUTTON
SWITCHES (SINGLE)

- Eight different circuit combinations permit a wide variety of applications for Mallory 2000 Series Push-Button Switches. They are especially adapted for use in laboratories, on test panels, in meter circuits and other equipment where permanent or momentary contact is desired.

Each circuit combination of this Mallory switch is available in either a locking or a non-locking type. Locking types keep the circuit closed until the button is pulled out. Nonlocking types maintain contact only while the button is depressed. Special construction features provide improved electrical characteristies and assure long operating life. The switch frame and bushing are nickel-plated brass. Lowresistance contacts are silver. Contact springs are nickelplated phosphor bronze.
Furnished with polished black Bakelite Knob, one each No. 232 Nut, No. 225 W asher and Set Screw. Mounts in single hole $7 / 16^{\prime \prime}$ diameter on panels up to $1 / 4^{\prime \prime}$ thiek.

# MAlLLORY LONG FRAME, JUNIOR, MIDGET, TYPE XP JACKS 

## IACKC LONG FRAME, JUNIOR AND MIDGET TYPES

- All Mallory Jacks-long frame, junior and midget - mount in a single $3 / 8$-inch bole in panels up to $5 / 16$-inch thick. They fit all standard Mallory plugs of two and three-conductor types as shown at right. Nickel-plated phosphor bronze, specially selected for its spring qualities, gives uniform ten sion and wiping action of contacts in all spring assemblies. Contacts between springs are fime silver, giving minimum contact resistance. All frames and bushings are nickel-plated brass. Junior Jacks are small and compact; extend only $15 / 16$-inch back of panel.

Spring combinations are illustrated below. All Long Frame, Junior and A1 (Infant) Jacks are supplied with one each No. 232 Nut and No. 225 Washer. All Midget Jacks have two No. 232 Nuts and one No. 225 Washer.

Above - Midget Jack
At Left - Junior Jack

## IACKS trpe Xp JACKS iong frame

- Type XP Jacks are similar to the Long Frame types listed at left, except for plain bushing and special dust protector frame construction commonly used in telephone and industrial applications. Type XP's have nickel-plated phosphor bronze springs, fine silver contacts, nickel-plated brass frame, bushing and mounting plate. Fit the standard Mallory phone plugs.

"GROUNDING" JACK No. GJ-I
For "grounding" airplanes while refueling. Similar in construction to A1 Jack (at left) except for insulation. List Price. . . . . . . . . . . . $\mathbf{\$ 0 . 4 5}$

## LEVER ACTION SWITCHES

A line of lever action switches with spring return index is also being designed. Time did not permit their listing in this catalog. Full defails will be sent on request.

Mallory Series 5000 Lever Action Switches are suited to a wide range of industrial and test equipment applications, but are particularly adapted to intercommunication, centralized radio, sound distribution and public address equipment. They are available in six different circuit combinations, all with positive indexing, with either shorting or non-shorting contacts.

Indexing is two, three or four positions with $20^{\circ}$ between positions. Dimension between mounting hole centers on bracket is $15 / 8$ inches. Switches may be mounted singly or grouped in multiple mounting with $3 / 4$-inch spacing between levers on conventional rack and panel installations. Standard push-button type knob, two $6-32$ bolts and nuts are included.

## YO <br> YARD-OHM RESISTANCE KITS

- Each Yard-Ohm Resistance Kit consists of an envelope containing all necessary materials to construct flexible resistors of a wide range of values. The Yard-Ohm Kit provides a real solution to the odd-value resistor problem. In addition to replacement applications, resistors made from the YardOhm Kit are ideal for meter shunts, and for use wherever a high quality flexible resistor is desired.
Each Mallory Yard-Ohm Kit consists of an envelope containing the following:
1 yard spiral wound resistance wire
1 yawd insulated braid
24 spiral wire leads
The kit is available in eight resistance values
Dissipation-all types: $1 / 2$ watt per inch.

## GRID BIAS CELLS

- The Mallory Grid Bias Cell is a small acorn-shaped, selfcontained device. The metal container or cup is the negative electrode. The black disc is the positive electrode. Available in two types- the original 1-volt cells and the new 11/4-volt cells. For new installations, the choice of Bias Cell types will depend on the voltage deisred. Replacements should be made with the type of Bias Cell used as original equipment.
The $11 / 4$-volt Bias Cells may be distinguished from the 1 -volt unit by the concave depressions in both the upper electrode and bottom of the shell case.

## Application

The principal use of Mallory Grid Bias Cells is in the biasing of the first audio amplifier tube in modern high-gain receivers. Diagram of a typical circuit is shown at right. bypassed to ground.
Correspondence is invited regarding the application of Mallory Grid Bias Cells. Special Technical Bulletin No. B-303 may be obtained on request.

## Characteristics

The no-current potential of Mallory Grid Bias Cells is within plus or minus $10 \%$ of their rated voltage.
Current-The cell is strictly a potential or voltage cell for biasing class "A"' amplifier tubes and should not be used for biasing power tubes or oscillators; or for any circuit where direct current may flow
through, or be drawn from, the cell.
Temperature-The cells may be used in ambient temperatures from $14{ }^{\circ}$ above zero to $120^{\circ}$. The volt age of the cell remains reasonably constant throughout this wide temperature range. It is recommended, how bias cell be placed in the coolest
 ocation.
Humidity-The cell exhibits no change in characteristics when exposed to a relative humidity of $90 \%$ at $120^{\circ} \mathrm{F}$.

Impedance-Mallory Grid Bias Cells are non-reactive at audio frequencies. For the 1 -volt cell, the DC resistance ranges between 11,000 and 50,000 ohms. The DC resistance of the $11 / 4$-volt cell ranges between 10,000 and 40,000 ohms.

Noise - The cells do not cause the development of any noise.

## GENERAL CIRCUIT CONTROL RELAYS

 Alternating and Direct CurrentThese sturdy, compact General Circuit Controls are available for operation on both alternating and direct current-Series 100 and 200 respectively-and incorporate many superior construction features not usually found in economically priced lines. "Full Floating" armature suspension, "wiping" contacts, and more than adequate insulation are but a few of their highly desirable qualities.
The switch stacks, composed of

Dimensions- $3^{1 / 4^{\prime \prime}} \times 2^{1 / 4^{\prime \prime}}$
die-cut, spring phosphor-bronze blades, Bakelite spacers, and hard rubber sleeving, have a break-down test of 2500 volts, and will give a lifetime of service.

Each unit, mounted on a Bakelite base and equipped with binding posts for the coil connections, is entirely "above ground" and all current carrying screws and terminals are fully counter. sunk to prevent any possibility of "short-circuiting."

PRICE CHART—For Series 100 (A.C.) and Series 200 (D.C.) Relays

[^17]
# Aduance RRLIIS 

Isolantite model Antenna Change-Over. Designed for use in Amateur Transmitters.

The contact system is Double Pole-Double Throw, using $1 / 4^{\prime \prime}$ Pure Silver contacts, with exceptional wiping action. Three and four pole arrangements are available on special order.

For high radio frequency control. Entirely hum-

Type 400
free where intended for A.C. operation, and highly efficient on D.C. supplies. All metallic parts are cadmium and chromium plated.

Standard coils are for 110 V A.C. and may also be used for 24 V D.C. However, they will also be supplied for lower A.C. or D.C. voltages at no increase in price.

List Price $\$ 9.90$

## KEYING RELAYS

Type 101K—A.C. Type 201 K-D.C.

TIME DELAY RELAYS
Type 300-N.O. Type 350-N.C.

Designed expressly for use in Keying Circuits where it is desired to use low voltage across the key to control high voltage transmission through the Relay contacts. The heavy duty coil and strong return spring makes possible an exceptional keying speed. Two sets of $1 / 4^{\prime \prime}$ Pure Silver contacts in series allow a carrying capacity of 2500 volts. The complete unit, mounted on a $3 / 16^{\prime \prime}$ Bakelite base with binding posts for coil connections, has over-all dimensions of $3^{\prime \prime} \times 2^{\prime \prime} \times 13 /{ }^{\prime \prime}$ and is obtainable for A.C. operation to 115 volts or D.C. operation to 60 volts.

List Price $\qquad$ .$\$ 5.50$

Particularly suited for use where short time delays (10 sec. to 1 min .) are required, these Relays are available with both normally open and normally closed thermostats. Types 300 and 350 respectively, the former being widely used for pre-heating tube filaments, etc. The contact combination on both models is Double Pole Single Throw with $1 / 4^{\prime \prime}$ Pure Silver contacts. Mounted on $3 / 16^{\prime \prime}$ Bakelite bases measuring $33 / 4^{\prime \prime} \times 23 / 8^{\prime \prime} \times 11 / 2^{\prime \prime}$ with binding posts for coil connections. Standard operating voltage is 110 A.C...

Low voltage units are available on special order.

## LATCHING RELAYS

These Relays are highly desirable for applications where it is impractical to have the holding coil in constant service. When the coil actuating the contact arrangement is momentarily energized, the armature is locked in the closed position, and may
 be released electrically (Type 600 ) or manually (Type 650).

The above list prices are for $1 / 4^{\prime \prime}$ contacts. For $3 / 16^{\prime \prime}$ points deduct 25 c-for $1 / 8^{\prime \prime}$ points deduct 50 c. When ordering these types SPECIFY THE VOLTAGE.

# Aduance likilis 

Type 700

## OVERLOAD RELAYS

These Relays are designed to provide accurate and positive protection against current surges and continuous overloads, and both the Manual Reset (Type 700) and Electrical Reset (Type 750) are divided into two classifications: Type "A" allows the Relay to attract on any current value between 250 and 500 mills, and Type "B" for any setting between 500 mills and 1 ampere. When the current flow passes the safety setting, the Double Pole-Single Throw $1 / 4^{\prime \prime}$ Pure Silver contacts are opened, breaking the power supply circuit until reset.

List Price

Type 750-Base dimensions $4^{\prime \prime} \times 21 / 2^{\prime \prime}$............................................. 13.20

MIDGET RELAY
Of particular interest where size and cost are factors, this new series of Midget Relays, of improved design, incorporates all of the fine construction features typical of the ADVANCE line. This unit measures only $11 / 2^{\prime \prime} \times 3 / 4^{\prime \prime} \times 11 / s^{\prime \prime}$ high. Pure Silver contacts are used, $1 / 8^{\prime \prime}$ in diameter. Standard coils are obtainable from 2 to 32 V D.C. and 1 to 115 V A.C. The following switch combinations can be supplied:

| A.c. | D.C. | CONTACT COMBINATION | LIST PRICES |
| :---: | :---: | :---: | :---: |
| K1505 | K1605 | DP-ST NOR. OPEN | \$3.25 |
| K1506 | K1606 | DP-ST NOR. CLOSED | 3.25 |
| K1504 | K1604 | DP-DT | 3.50 |

## ELECTRONIC RELAY

An ultra-sensitive unit for use in electronic tube circuits, providing positive, dependable control on as little as 12 milliwatts. Adjustment screws to change the air-gap between the armature and the pole face, allow operation on a voltage differential of $30 \%$, a condition ideal for electronic applications. The contact combination is Single Pole-Double Throw, employing $1 / 8^{\prime \prime}$ Pure Silver points to safely handle 100 watt non-inductive loads. Obtainable in resistances of $2500,3000,5000$ and 10,000 olims at no increase in price.

List Price.... $\$ 7.15$

## GENERAL PURPOSE RELAYS

## Types 951B - 952B - 953B

These Relays afford maximum power and efficiency at very low cost. $1 / 4^{\prime \prime}$ Pure Silver contacts are standard on the Single Pole-Single Throw (N. O.) Type 951B-Single Pole-Single Throw (N. C.)-952B-and Single Pole- Double Throw-953B-switch combinations. Adequately insulated and entirely above "ground," these Relays may be mounted on any type of panel, quickly and easily, by means of the metal mounting bracket. Coils are obtainable to 115 V A. C. or 60 V D. C.
List Price
$\$ 3.85$

## GEN-E-MOTOR STARTING RELAY <br> Type 951C

An exceptionally sturdy power transfer Relay, easily capable of handling the heavy current surge encountered on "cold" starts in motorgenerator systems. The contacts are $3 / 8^{\prime \prime}$ Pure Silver and have ample carrying capacity for the usual $200-500 \mathrm{~V}$ converters. Heavy-duty in every phase of construction, this unit is not to be compared with the coman five and ten ampere circuit controls. Base dimensions are $3^{\prime \prime} \times 2^{\prime \prime}$ and each unit is complete with a braided generator-cable pig-tail and binding posts for all connections. Coils for $51 / 2$ to 32 V D. C. or 1 to 115 A. C.

List Price.... $\$ 6.60$

# Adhance hillils 

## MIDGET TYPE CIRCUIT CONTROLS

These Relays are designed for general circuit control applications where the space for mounting is limited, and measure only $21 / 2^{\prime \prime}$ in length, $11 / 2^{\prime \prime}$ in width, and $11 / 4$ " in height. A.C. operated Relays in this series require but 4 watts on $50 / 60$ cycle current, and the D. C. models from $1 . .5$ to 2 watts, affording maximum effi-

Contact Combinations
Double Pole Double Throw
Double Pole-Single Throw (N. O.) .............................................. 105AM
Double Pole-Single Throw (N. C.)
ciency without sacrifice of power and dependability. Metal brackets (not shown in the illustration) are supplied with all Relays of this type, and except on special order, these models are limited to the following contact arrangements and the usual standard operating voltages:

Type Numbers Contact Sizes and List Prices The above chart lists type numbers for A.C. operated Relays. D. C. coils may be obtained by changing the series number from 100 to 200. Prices apply to both.

## INDUSTRIAL CONTROL RELAYS

Series 960

Designed mainly for industrial applications - air conditioning, lighting, and power transfer systems, the Series $960 \mathrm{Re}-$ lays embody all of the rugged construction features demanded in units of this type without sacrificing the desirable qualities of the midget style. Available in the following contact combinations, and to operate on standard A. C. and D. C. voltages.

For smaller contacts, deduct 25 c for $3 / 16^{\prime \prime}$ or 50 c for $1 / 8^{\prime \prime}$ points, from the above list prices.

Having the same characteristics as the Series 960 Re lays, these Three Pole units, Series 970 , may be used for fractional h/p 3phase motor controls, etc. The area required for mounting $25 / 8^{\prime \prime}$
 $\times 17 /{ }^{\prime \prime}$ for Type 970 Relays, as against $21 / 2^{\prime \prime} \times 114^{\prime \prime}$ for the Type 960 's, is due to the slightly larger frame. The metal brackets are the same in both instances- $2-5 / 16^{\prime \prime}$ long, and $2^{\prime \prime}$ between centers of the $6 / 32$ mounting holes. Available in the voltages indicated in the preceding series, and in the following contact combinations:
Type 977B-Three Pole-Single Throw (N. O.)...................... List
Type 977B-_Three Pole-Single Throw (N. O.)........................ $\$ 5.75$
Type 978B-Three Pole-Single Throw (N. C.)........................... 5.75
 from the above list prices.

## IMPULSE RELAYS

This is another type of Relay for use where it is not feasible to have the holding coil in constant service, but differs from the latching types in that it may be controlled with a single push-button. Coils to operate this type of unit are extremely heavy-duty, and are for intermittent (impulse) use only. Available for standard A. C. and D. C. voltages in the following combinations:

With $1 / 4^{\prime \prime}$ Pure Silver contacts.... When ordering these type, be sure to

## MIDGET TYPE R.F. RELAYS

These models are sturdy, compact Double Pole-Double Throw Transmitter Relays, designed expressly for use in all types of mobile-portable communications
 equipment where space is at a premium. The insulation on this, as on the Type 400 's, is Isolantite for both the cross-arm and end pieces, with all holes adequately well spaced to prevent structural weakness and possible "creepage." Coils are obtainable for all A. C. and D. C. voltages, and will operate in any position, the former consuming approximately four watts-the latter, two watts of power. Dimensions are $23 / 4^{\prime \prime} \times 11 / 2^{\prime \prime} \times 11 / 4^{\prime \prime}$.
List Price
.$\$ 8.25$

# relays by guardian 

## A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

SERIES R-100 H.F. RELAY

## HIGH FREQUENCY RELAYS

The Series R-100 and A-100 are primarily designed for high frequency applications. They are low loss AlSiMag insulated, compact, economical and sturdily constructed. For single wire fed installations, specify the A-100-C which is a single pole, double throw unit. Two A-100-C in place of one A-100 in open wire line systems will avoid possible impedance mismatch. Radio Applications-Antenna changeover, break-in, high voltage keying, grid controlled rectifier keying, remote control of receiver and transmitter, and other high frequency applications.
Industrial Applications-Oven control, remote motor control, short wave therapy and diathermy, heating equipment.

## X-100 ADJUSTABLE OVERLOAD RELAYS

This relay provides low cost, accurate, dependable protection against current surges and overloads. Adjustable to operate on any current flow from 150 to 650 mils. Silver contacts rated at 1500 watts on 110 volts, 60 cycle $A C$, non-inductive, and in AC primary circuits of any inductive power supply up to 1 KW . Positive locking action of contacts cannot be reset or points held in contact until overload is removed.
X-100-4 $1 / 16^{\prime \prime}$ long, $25 / 16^{\prime \prime}$ wide, $31 / 8^{\prime \prime}$ high. Shipping Weight 12 oz .
List Price $\$ 12.85$ ec.
Net Price
$\qquad$ . 7.71 ec.

## B-100 BREAK-IN RELAY

Specially designed for breakin operation on amateur transmitters. Low current drain and compact construction, plus the use of $a$ laminated field piece and
 armature insuring efficient operation, make the $\mathrm{B}-100$ an ideal relay for this application. Standard coil operates on 110 50-60 cycle. AC. Silver contacts rated at 1500 watts, 60 cycles AC non-inductive, and in AC primary circuits of any inductive power supply delivering up to 1 KW .
B-100-2 $21 / 32^{\prime \prime}$ long, $21 / 4^{\prime \prime}$ high, $29 / 32^{\prime \prime}$ wide. Shipping weight ll oz.
List Price
. $\$ 9.60 \mathrm{ec}$.
Net Price . $\$ 5.76$ ea.

## K-100 KEYING RELAYS

A low voltage relay controlling high voltage transmission, the K-100 relay will follow key or bug at highest WPM rate attainable. High speed response, plus a strong magnet and return spring, gives a clean make and break, producing the best CW note.
A standard coil operates on $11 / 2$ to 4 volts DC, 5 to 16 volts AC. Coils for other voltages and currents on specification at $10 \%$ addition to list price. Contacts-Oversize silver. Will handle 1500 watts 60 cycles and in AC primary circuits of any inductive power supply up to 1 KW .

Control capacity-up to 2000 volts with clean make or break.
Applications-Control of battery receivers, transmitters using filament center tap keying of any stage having up to 2000 volts on plate, primary keying or control of power supplies up to and including 500 watts and grid-controlled rectifier keying of 3000 volt power supplies.
K-100-2 21/32" long, 2 9/32" wide, l 15/16" high. Shipping weight 10 oz .

## A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS

COIL
ASSEMBLY

## SERIES 200—INTERCHANGEABLE

Two basic interchangeable parts, a coil assembly and a contact assembly, are combined in a versatile universal relay. Coil assembly consists of coil and field piece. Contact assembly consists of switch blades, armature, return spring and mounting bracket. The two contact assemblies listed below can be used with any one of 9 coils to make a required relay. Contact points are rated at 8 amps, $115 \mathrm{~V}, 60$ cycle AC , noninductive load.

## RC-100 REMOTE LOCKING CONTROL RELAY

A Guardian development of the momentary impulse locking control relay. The circuit to the coil needs to be energized only long enough to close armature; contacts lock automatically. Each impulse reverses position of contacts. Standard coils operate on 115 volts, $50-60$ cycles AC. Coils for other voltage and currents on specifications.
Contacts, $1 / 4{ }^{\prime \prime}$ fine silver metal rated at 1500 watts at 115 volts, 60 cycle, non-inductive. Can also be used in AC primary circuits of any inductive power supply delivering up to 1 KW . $3^{\prime \prime}$ long, $21 / 8^{\prime \prime}$ wide, $117 / 32^{\prime \prime}$ high.
Applications-break-in control and phone to CW switching. Any circuit control where locking circuits are used.

## U. 100 AND U- 200 ADJUSTABLE UNDERLOAD RELAYS

Sensitive, precise, designed and constructed for long, trouble-free service. Relays are encased in attractive black finished metal containers, protecting them from dirt, dust and maladjustment. Normal current through the coil on the U-100 is 300 amperes with an adjustable range of 100 to 200 milliam-
 peres DC. Normal current through the coil on the U-200 is 600 milliamperes with an adjustable range of 200 to 400 milliamperes. Oversize contacts of fine silver, rated on the $A C$ primary of any power supply delivering up to 500 watts.
Radio Application--protection of class " $B$ " audio equipment in case of class " C " load failure.
Industrial Application-Any DC circuit where it is desirable to maintain currents above a set value. U-100 and U-200 are $35 / 16^{\prime \prime}$ in diameter, $2 \frac{1}{4} 4^{\prime \prime}$ high. Shipping weight 14 oz.
List Price
$\$ 9.75$ ea.
Net Price
$\$ 5.85$ ea.

## T-100 AND T-110 TIME DELAY RELAYS

Standard coils operate on 115 volts, $50-60$ cycles non-inductive AC. Coils available on other voltages on specification. Oversize contacts rated at 1500 watts on 115 volts, $50-60$ cycles non-inductive. Can also be used in the AC primary of any inductive power supply delivering up to 1 KW . Adjustable time delay for any period between 10 and 60 seconds.
Applications-Radio. In transmitter circuits to prevent damage of rectifiers and tube filaments by application of plate current before filaments are sufficiently heated. Industrial. Any control problem requiring the changing of circuits after a predetermined interval.

T-100- $5 \frac{1}{4} 4^{\prime \prime}$ long, $3^{\prime \prime}$ wide, $21^{\prime \prime} 4^{\prime \prime}$ high. Shipping weight $11 / 4 \mathrm{lbs}$. List Price .... $\$ 15.40$ ea. Net Price
. $\$ 9.24$ ec.
 The T-110 is a compact, sturdy, economical time delay relay for use in applications not requiring the capacities of the T-100. Contact capacty- 1250 watts on 110 volt, 60 cycle non-inductive AC. Can also be used in the $A C$ primary circuit of any inductive power supply delivering up to, and including, 1 KW .
T-110-5 $5 \frac{5}{32}{ }^{\prime \prime}$ long, $3 \frac{1}{16}{ }^{\prime \prime}$ wide, $2 \frac{7}{16}^{\prime \prime}$ high. Shipping Weight 8 oz . List Price..... $\$ 9.60$ ea..
Net Price
$\$ 5.76$ ea.
 parts are kept on hand for quick assembly, resulting in unusually prompt delivery and lower prices. From these relays a type can be selected for almost any application where the contact load does not exceed 20 amperes.

MR Series<br>MEDIUM DUTY<br>POWER RELAYS

4 volt amperes. DC types require approximately 3 watts. Relay contacts on PR3A, PR3D, PR4A and PR4D rated at 20 A , non-inductive load 110 V AC or $1 \mathrm{HP}, \mathrm{AC}$. All other relay contacts rated at 15 A , noninductive at 110 V AC. Size approx. $25 / 8^{\prime \prime} \times 29 / 16^{\prime \prime} \times$ $21 / 4^{\prime \prime}$ high. When ordering, specify coil voltage and frequency.

## LS Series PLATE CIRCUIT RELAYS

Designed for application where size and cost are important. Often used in photo-electric circuits, temperature control circuits and electronic timing devices. Similar to the LM Series but less sensitive. Available in all resistances up to and including 5000 ohms. Requires .09 watt minimum actuating power.
Single pole double throw, 2500 ohm coil, net $\$ 1.68$.
Single pole double throw, 5000 ohm coil, net $\$ 1.99$.
Size $25 / 8^{\prime \prime} \times 13 / 8^{\prime \prime} \times 13 / 8^{\prime \prime}$ high.
When ordering, specify coil voltage and frequency.

## POTTER \& BRUMFIELD SALES COMPANY

## LM Series PLATE CIRCUIT RELAYS

Designed to meet demand for high grade medium cost plate circuit relays in both single and double pole contact arrangements. Large coils are particularly sensitive. The single pole LM operates on as low as . 015 watts, the double pole types on . 070 watts. Applicable to smoke control, packaging, counting and other electronic control circuits. Contacts supplied are $3 / 16^{\prime \prime}$ fine silver. Approximate size of single pole units $2 \mathrm{I} / \mathrm{A}^{\prime \prime} \mathrm{x}$ $13 / 8 "$ " $23 / 8 "$ high. Double pole units $2 \frac{1 / 4 " ~}{4} \times 2 \frac{1}{8}$ " $\times 23 / 8^{\prime \prime}$ high. When ordering, specify coil resistance.

## KL Series

Light Duty Multiple Coniact

Similar to the KR Series but differing in the method of mounting, coil sizes, and larger number of poles available. KL relays have approximately twice as much coil space as the $K R$ and are therefore more sensitive. Type KL5D will operate on values as low as 2 watt. Larger coils provide more power on multiple pole models for applications which must withstand aircraft vibration. Frequently applied to fractional horse power motor controls, transceiver switching and audio circuit switching. Contacts are rated at 3 amperes 110 volts, 60 cycle non-inductive load. Approximate size of KL5D $17 / 16^{\prime \prime} \times 113 / 16^{\prime \prime} \times 113 / 16^{\prime \prime}$ high. Approximate size of KL17D $19 / 16^{\prime \prime} \times 17 / 8^{\prime \prime} \times 115 / 6^{\prime \prime}$ high. When ordering, specify coil voltage and frequency.

## SU Series MULTIPLE LEAF RELAYS

Unique construction provides many valuable features at low cost. Larger coil space permits most efficient winding for hipler voltages and lower consumption. May be mounted either vertically or horizontally, terminals easily accessible in either mounting. Suitable for applications such as signal or alarm controls, remcte indicators, temperature controls, overload or underloas protective devices, etc. Contact's rated at 4 amperes 110 volts AC nonnductive load. Contact combinations up to and including 4 -pole double throw. DC types require 1.5 watts actuating power. Dimensions of SU17A (illustrated) are $21 / 2^{\prime \prime} \times 17 / 16^{\prime \prime} \mathrm{x}$ $21 / 2^{\prime \prime}$ high. When ordering, specify coil voltasye and frequency.

## 549 WEST WASHINGTON BOULEVARD - CHICAGO 6,ILLINOIS

EXPORT SALES AT 2020 ENGINEERING BLDG., CHICAGO 6, U.S.A. • FACTORY AT PRINCETON, INDIANA

## PHOTO RELAYS \& NDOUSTRAL CONTROLS

## PHOTO RELAY TYPE R-010

Photo Relay Type R-010_Price, $\$ 56.00$

MECHANICAL SPECIFICATIONS: The unit is self contained in a strong crackle-finish cast aluminum housing:
WIDTH- 3 inches DEPTH- $31 / 2$ inches HEIGHT- 5 inches Base is designed for mounting directly on standard $1 / 2$-inch electrical conduit. This provides the means of electrical connection as well as support for the unit . . . providing sure contact for any secondary switching arrangement. On special order at no extra cost, a high speed unit is available with $1 / 20$ th of a second for both operation and release.
ELECTRICAL SPECIFICATIONS:
PRIMARY SUPPLY VOLTAGE-115 V 50/60 cycle AC
OUTFUT CONNECTIONS-those of single pole double throw switch.
CONTACTS—pure silver rated at 5 amps non-inductive load.
SENSITIVITY CONTROL—provided as a screw driver adjustment; enables optimum operation at varying distances up to 35 feet.
TUBE COMPLEMENT-1 type 921 photo tube; 1 type $2 D 21$ thyratron. SPEED-1/20 second for operation; $1 / 4$ second for release.

## POSITIVE ACTION PHOTO RELAY TYPE R-012

Identical with type $R-010$, except in response to activating light. In this unit the relay is normally open and stays oyen until a light beam hits it. This is just the opposite of type R-o10 where the relay is held open by the beam from the light source and closes only when that beam is interrupted. Price is same as $R$-010.

## QUICK CHANGE PHOTO RELAY TYPE R-011

mechanical specifications: Identical with type R-010, except for mounting.
puick change mounting feature: A plug-in mount is provided with five connecting prongs which plug into a mounting stand. This feature permits quick replacement of the entire unit in applications where repair time must be held to a minimum. Unit Without Stand. Price, $\$ 61.00$. A variety of stand heights are available as follows:

| TYPE | HEIGHT | PRICE |
| :---: | :---: | :---: |
| R-011A | 12 inches | \$66.00 |
| R-011B | 18 inches | \$67.00 |
| R-011C | - 24 inches | \$68.00 |
| R-011D | 32 inches | \$69.00 |
|  |  |  |
| R-011X ---any special |  |  |
|  | under 34 | \$72.00 |

* Height is measured from center of lens to bottom of base.

## 2-in-1 PHOTO RELAY-COUNTER TYPE C-010

Small and compact this one unit combines the functions of both a photo electric relay and electrically actuated digit counter. No need to buy two units or string long interconnecting wires. This 2 -in-1 SPECO-RHEIN unit provides both in one small case. Ease of installation and dependability make this counter ideal for application

Photo Relay-Counter, Type C-010 Price $\$ 70.00$ to industrial problems of counting where it is impossible to touch objects being counted, or where objects are so small they would not actuate a normal mechanical counter.

## MECHANICAL SPECIFICATIONS:

Both units are self-contained in cast aluminum housing.

$$
\text { WIDTH-3 inches DEPTH- } 31 / 2 \text { inches HEIGHT-5 inches }
$$

BASE: Provides for mounting directly on a standard $1 / 2$-inch electrical conduit. COUNTING MECHANISM: Completely enclosed; virtually tamper proof. Face is visible from rear of case. This unit is designed to maintain mechanical operation, without interruption, far beyond normal ribration and impact requitements.
El.ECTRICAL SPECIFICATIONS:
OPERATING VOLTAGE: 115 Volts AC
CONNECTIONS: Two; made to wires extending $6^{\prime \prime}$ below the counter base. SENSITIVITY CONTROL: enables adjustment for optimum operation at various distances. A minimum of $8^{\prime}$ candles is required for satisfactory operation. Used with light source L-010, the operating range is 25 feet maximum; with infra red fitted lens is 18 feet.
SPEED: 400 per minute maximum.
TUBE COMPLEMENT: One Type 921 photo tube. One Type 2D21 thyratron.

## ELECTRONIC TIMER TYPE T-010

USES: For time delay-action in timing short intervals.
For continuously repeating a definite cycle of time.
No slipping clutches. No timing gears to wear.
For sequencing entire processes, such as filling of tanks, heating, curing operations in injection molding machines, timing of machine tool operation like grinding, honing, heat treating, spot welding and induction soldering.

## MECHANICAL SPECIFICATIONS:

SIZE: Fits in $5^{\prime \prime} \times 7^{\prime \prime} \times 31 / 2^{\prime \prime}$ case.
CASE: Cast aluminum designed for walt mounting. Holes with removable plugs provided for entry of connecting wires.

## ELECTRICAL SPECIFICATIONS:

TIMING ELEMENTS: High quality resistor and capacitor.
RELAY ARMATURE: Only moving part in unit will withstand millions of operations. AVAILABLE TIMING RANGE: $1 / 10$ th second to 60 seconds. Other ranges available on application at no extra cost.
OPERATING VOLTAGE: $115 v, 60$ cycle AC.
OUTPUT CONNECTIONS: Those of single pole double throw switch.
RELAY CONTACTS: Pure silver rated at 5 amps $A C$, non-inductive load.
INTERVAL VARIATIONS: Less than $2 \%$ in repeat cycle timing. Less than $3 \%$ for as high.as $10 \%$ line voltage variation.
TUBE: Type GL-502A Thyrairon.
OTE: The timer design permits complete interchangeability of equipment; that is machine process calibration for one timer applies to all timers, permitting the use of
a standard dial nuithout special a standard dial without special calibration for each unit. Because of the character-
istics of the resistor capacitor elements, the range is spread out in a logarithmic scale istics of the resistor capacitor elements, the range is spread out
making the dial dimensions mider in the shorter time periods.

## ELECTRONIC RELAY SWITCH TYPE S-010

APPLICATION: This unit provides a means of switching an electrical current off-and-on where is is impossible to provide a direct electrical contact to carry the required load. This relay has been designed to obtain a reliable contact from the touch of two conductors through which only a very, very small current may, or can, flow.

Type S-010 may be applied where the contact making instrument, or

Elecrtonic Relay Switch Type S-010 Price, $\$ 38.00$ medium, is only a damp thread. It operates on the condensation of moisture between two points located closely together, on a liquid column of mercury such as a contact type thermometer, or any conductive liquid such as milk, chemicals, and even distilled water.

These features make it possible for the S. 010 to be used as a liquid level control without the use of a float to increase the life of sensitive limit switches, feeler arms or water-type relays. It is especially adaptable for use with combustibles because of the low voltage and microamperes of current necessary for operation.

## MECHANICAL SPECIFICATIONS:

Designed to mount in cast aluminum case $5^{\prime \prime} \times 7^{\prime \prime} \times 31 / 2^{\prime \prime}$ but can be supplied without case where wanted to incorporate into manufactured equipment.
Case designed for wall mounting. Holes with removable plugs provided for entrance of connecting wires. May be mounted any distance from control probe or point as only one wire and normal grounding are necessary for operation.

## ELECTRICAL SPECIFICATIONS:

OPERATING VOLTAGE: $115 \mathrm{~V} ., 60$ cycles $A C$ (on special order 230 V . $A C$ ).
OUTPUT CONNECTIONS: Those of S.P.D.T. switch.
RELAY CONTACTS: Pure silver rated at 5 amps AC non-inductive load.
RELAY CONTACTS: Pure silver rated at $S$ amps AC non-inductive load. of probe resistance of 5,000 ohms to 7 megohms.
POLARITY INDICATOR: Neon lamps insure correct connection and operation. If an error is made in connection or any changes in supply line, this lamp will glow.
TUBE: Type GL-502 A thyratron.

## ACCESSORIES

INFRA-RED FILTERS, Type F-011: to make light beam invisible. Price $\$ 1.40$.
LENS SHIELD, Type L-011A: Is supplied to replace the lens mounting ring, and is easily installed by removing three screws and using the shield instead of the lens mounting ring. For use when photo relay units are placed out of doors in direct sunlight. Price, $\$ 2.00$.

## OBSTRUCTION LIGHT CONTROL SYSTEM <br> Three electronic units meet CAA requirements

Flash Indicator Unit L-C10A Price, $\$ 5000$
Electronic Flasher L-C103 $\qquad$ Price, $\$ 48.00$ Light Sensitive Switch L-C10C $\square$ Frice, $\$ 76.00$

## LIGHT SOURCE TYPE L-010

MECHANICAL SPECIFICATIONS:
Unit is self-contained in cast aluminum housing identcal in size to Photo Relay units.
BASE: Provided with mounting for $1 / 2$ inch electrical conduit.
LENS: Two inch diameter, prefocused. No other adjustment normally required.
ELECTRICAL SPECIFICATIONS:
LAMP: 21 candle power, single contact automobile Lamp.
SUPPLY VOLTAGE: $115 \mathrm{~V} 50 / 60 \mathrm{cy}$ cle AC. Price, $\$ 12.00$.

5 -pin, molded bakelite base with snap-on aluminum enclosure.

## SIGMA

## A. C. RELAYS

The Series 4 and 5 relays are available with a built-in, full-wave bridge-type rectifier for operation on alternating current at any audio frequency. In specifying, add the letter " $S$ " to the designation of the desired type.
The operating characteristics on A.C., including sensitivity and precision, are essentially the same as for the D.C. input relays.

Series 41 A.C. Relays are of shaded coil construction and do not require rectifiers. They are unusually efficient and absolutely quiet. Coils are available for any voltage from 1 to 230 volts-minimum input of 0.1 vole amperes. In specifying, the letter " $Z$ '" is added to the designation of the
desired type.

## RELAYS FOR AUTOMATIC CONTROL

Representative samples of the comprehensive line of relays made by Ward Leonard. The ones illustrated are those particularly adaptable to electronic and the more common industrial applications.

MIDGET MAGNETIC RELAY - TYPE No. 106. For remote control of A.C. or D.C. circuits. Has wide application for use on power circuits or electronic circuits in which the currents to be controlled do not exceed the ratings of the contacts. May be energized from main line or from an independent circuit. Built on a molded Bakelite base. Front or back connected terminals.

Coil Voltages -
D.C. $-6,8,12,24,32,115$ volts.
A.C. ( 60 cycles) - $6,8,12,24,32,115$ volts. 115 volts.
Contract Arrangement -
Single Pole, Double Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole (Common Feed), Single Break, Normally Open, Normally Closed and Double Throw.
Contact Ratings, in Amperes -

| Volts | D. C. |  | 60-Cycle A.c. |  |
| :---: | :---: | :---: | :---: | :---: |

*0.7 Amperes if Double Throw.
Dimensions - $2^{\prime \prime}$ wide; $21 / 4^{\prime \prime}$ high; $21 / 8^{\prime \prime}$ deep.
Type No. 106 Relays for 3 -wire control are also available. Details will be furnished on request.
HEAYY DUTY MIDGET RELAY - TYPE No. 105. A general purpose relay designed for remote control of the ordinary type of electrical appliances, such as electric heaters, electric signals, electric lights, electrically operated pumps, and most types of electronic equipments. The Heavy Duty Midget Relay is sturdily built on a molded Bakelite base. Heavy, front connected terminals are provided. The Heavy Duty Midget Relay, as a standard unit, is of the open type, but it can be furnished with a steel knock-out box enclosure.
Coil Voltages -
D.C. $-6,10,12,24,32,115$ volts.
A.C. ( 60 cycles) $-6,10,12,24,32,115,230$ volts.

Contact Arrangement -
Single Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Contact Ratings, in Amperes -

| $25-115$ | 1 | 1 | 20 | 15 |
| 230 | 0.5 | 0.5 | 15 | 10 |

Dimensions - Single Pole: $17 / 8^{\prime \prime}$ wide; $23 / 8^{\prime \prime}$ high; $11 / 2^{\prime \prime}$ deep. Double Pole: $21 / 2^{\prime \prime}$ wide; $23 / 4^{\prime \prime}$ high; $13 / 4$ " deep.

SENSITIVE RELAY - TYPE No. 250. - For use in applications where a high degree of sensitivity is required such as in electronic circuits. Built on a Bakelite base with large knurled heads and nuts to facilitate adjustment of the contacts and the spring tension on the armature. The use of nickel alloy in the magnetic circuits insures good contact torque at pull-up and crisp drop-out. Contact Arrangement -
Single Pole, Double Throw.

> Contact Rating, in Amperes -

| :---: | :---: | :---: |
| 115 | 0.75 | 2.0 |
| 230 | 0.5 | 1.5 |

Dimensions - $25 / 8^{\prime \prime}$ wide; $25 / 8^{\prime \prime}$ high; $15 / 8^{\prime \prime}$ deep.
midget metal base relay - type No. 104. - For use in small radio transmitters, sound equipment, aircraft control circuits, and other similar applications. Available with Bakelite insulation or ceramic insulation. Small size permits installation in limited spaces. Built on a metal base. Vibration resistant up to 10 times gravity when energized. Front connected, solder type terminals.
Coil Voltages -
D.C. $-6,10,12,24,32,115$ volts.
A.C. ( 60 cycles) $-6,10,12,24,32,115$ volts.

Contact Arrangement -
Single Pole and Double Pote. Various combinations with or without auxiliary contacts.

| $00-24$ | 4 | 4 |
| $25-115$ | 0.5 | 4 |

heavy duty relay - TYPE No. 130.-A relay that lias heavy current carrying and rupturing capacities for use in A.C. or D.C. circuits. Contact fingers are heavy stiff metal blades with large stainless steel springs for pressure. Large gap contacts with adequate surfaces. As high as four separate circuits may be opened simultaneously with the closing of up to four other circuits.
Coil Voltages -
D.C. $-24,32,115,230$ volts.
A.C. ( 60 cycles) $-24,32,115,230,440$ volts.

> Other voltages and frequencies available on special order.

Contact Arrangement -
Various combinations of contacts from one to four poles.
Contact Ratings, in Amperes -

| Volts | Direct <br> Current | D.C. with <br> Blowout | A.C. <br> 25 Cycles | A.C. <br> 60 Cycles |

| $126-250$ | 1 | 10 | 25 | 25 |
| $251-440$ | $\ldots \ldots$. | $\ldots \ldots$ | 10 | 15 |

Note: Blowouts required for relays that control Direct. Current circuits in excess
of 23 volts or a of 23 volts or a
current of 1 ampere.
Dimensions - Base dimensions vary according to size of relay. Maximum depth, $31 / 8$ ".

## RELAYS FOR THE RADIO AMATEUR

A few examples of Ward Leonard's popular line of relays for use in radio circuits are illustrated here. Information on specifications and prices are detailed in Catalog D-11 which will be furnished on request made to Ward Leonard directly or through one of its agents or distributors.
R. F. BREAK-IN RELAYS. -

Otherwise known as
"Push-to-Talk" Relay for' phone transmitfers. Pushing button in control circuit connects proper transmitter circuifs and disconnects proper receiving circuits to transmit. Releasing button switches all circuits

Midget Type

Heavy Duty Type
back to normal position for receiving. Furnished in two sizes, Midget Type for light duty and the Heavy Duty Type.

Low Volłage Type

High Voltage Type

KEYING RELAYS.-Low voltage type for centertap or grid-bias keying. High voltage type for use with grid controlled high voltage rectifier tubes. Use of Kaying Relays reduces length of circuit wiring and permits control of keying with key located in convenient position for operating. Capable of keying up to 40 words per minute.

UNDERLOAD RELAY. - Protects against damage to tubes and other components of amplifiers when load failures occur, due, for example, to inability of one or more vacuum tubes to hold the load because of loss of excitation. De-energizing of relay coil when load drops opens confacts and prevents damage to transformers or tubes. Available from stock with coil adjusted to pick up at 100 m.a. to 200 m.a. DC or with coil adjusted to pick UP at 200 m.a. to 400 m.a. DC.

ROTARY RESET OVERLOAD RELAY. - For protection against overloading vacuum tubes of power amplifiers or transmitters. Current surge causes armature to be pulled in, breaking the rectifier primary circuit. A mechanical latch holds the contacts open until the operator closes them by turning the reset knob. Designed for panel mounting. Available from stock with 250 m.a. DC coil and 500 m.a. DC coil.

The use of Ward Leonard Relays in an Amateur Rig not only modernizes it, but also improves its efficiency and stability. Short r.f. leads prevent stray currents. Convenient control is provided.

THERMAL TIME DELAY RELAY. - Delays the application of voltage to the plates of vacuum tubes until the filaments have heated. The relay illustrated is adjustable over a range of from 15 seconds to 45 seconds. Other time delay relays - thermal type and motor driven type - are also available. Furnished with 110 volt, 60 -cyele AC coil.

SAFETY RELAY. - A relay that should be installed in every amateur rig. it gives automatic protection against the hazards of high voltages in filter condensers when power supply unit is turned off. Furnished with resistor through which condensers are discharged. Furnished with normally closed contacts which open when transformer primary circult is closed, energizing relay coil.

MIDGET LATCH-IN RELAY.-A mulìpurpose relay especially useful in circuits where interference might be caused if relay coils were continually energized. Momentary energizing coil "pulls in" armature which is locked in position by mechanical latch. Momentary energizing reset coil releases latch allowing armature to drop to normal position.

BAND SWITCHING RELAYS.- Automatically changes frequency bands through two-wire control circuit. Installation on the relay in the set near the coils eliminates the need for long R. F. leads, such as are required when a panelmounted switch is used. Mycalex insulation used for base and contact arms. Contacts and terminals spaced to insure against leakage or creepage of high frequency and high volfage in the circuit.

ANTENNA GROUNDING RELAY. - For grounding transmitting of receiving antenna when not in use. Contact arms supported on Lucite crossarm. Circuit contacts and terminals supported on ceramic insulation block. Coil terminals and grounding terminals mounted on Bakelite base. Double pole, double throw contacts, with fixed of adiustable normally elosed contacts.

## SPEEES

#### Abstract

SPEED-X keys, formerly made by Les Logan Co. of San Francisco, Calit, have attained a pre-eminent position as the leading complete line. Now manufactured by JOHNSON, their reputation will be maintained, and improved wherever possible.

## HIGH SPEED SEMI-AUTOMATIC KEYS

SPEED-X Semi-Automatic Keys are designed and constructed to rigid specifications and are approved by the experienced professional and amateur C. W. operators. They are fully adjustable from lowest to highest speeds. Manufactured in four distinctive and attractive models. Fully guaranteed against any defect in material or workmanship. Bases of all models drilled for stationary mounting.

STANDARD MODEL 114-500. New-Improved Standard Model Semi-Automatic Key mounted on extra heavy steel base $31 / 2^{\prime \prime} \times 61^{1 / 4} \times 1 / 2^{\prime \prime}$ finished in attractive wrinkle baked enamel. Mounted on four rubber feet to insure stationary position at all times. The finish will not scratch or chip and will last indefinitely. The frame is finished same as base and has five adjustments with lock nuts, assuring dependable operations at all speeds. Vibrator arm, posts, switch and all machine parts heavily plated in beautiful satin chromium. Complete with adjustable weight, two sets $1 / 8^{\prime}$ pure silver contacts, circuit-closing switch and two paddles adjustable to any desired height. Net weight $41 / 2 \mathrm{lbs}$.

## 114-500........................................................... List Price $\$ 17.50$ <br> $114-500-\mathrm{I}$ (Lefthanded model) <br> List Drice 18.50

MODEL, 114-501. New-Improved Beautiful Chrome finish. Heavy steel base $61 / 4^{\prime \prime} \mathrm{x}$ $31 / 2^{\prime \prime} \times 1 / 2^{*}$ with four non-slip rubber feet. Heavy brass connector strips mounted under base. Heavy die cast frame with same finish as base and with five screws for sensitive adjusiments. Vibrator is designed to obtain slowest and fastest speeds required by high speed operators. Two sets of $1 / 4$ "pure silver contacts. Pigtail connections to vibrating arm. Perfectly aligned free acting vibrator bearings. Lock nuts on all adjustments. Paddles adjustable to any required height. All machine parts heavily chrome plated, which makes this the most outstanding semi-automatic key on heavily chrome plated, which makes this the most outstanding semi-aut
the market. Furnished with circuit closing switch. Net Weight $41 / 2 \mathrm{lbs}$.

## $\sqrt{\text { ree }}$ <br> Vibroplex

# A SEMI-AUTOMATIC TELEGRAPH AND WIRELESS TRANSMITTING MACHINE 

## Embodying the latest exclusive features

Prominent features which have been contributed to the success of the Vibroplex are:

> Simplicity - Durability

Perfect control - Easy adjustment Strong carrier - Ease of manipulation Adaptability to changing wire conditions Ability to transmit perfect Morse and Continental signals at high speed These features, which are found only in the genuine Vibroplex models illustrated on these pages, make for clear, rapid, easy transmission; relieve the arm of strain caused by sending on the ordinary key; rest
and strengthen the overworked muscles, and prevent telegrapher's paralysis.

## CLEAR, RAPID SENDING MADE EASY

The Vibroplex transmits the same grade of Morse and Continental code as the strongest clearest hand sender, faster than is possible on the ordinary key, and with less than half the labor.

There is no tensing of the muscles, no nerve strain, no pounding on the key in order to make clear, rapid signals. You simply press the lever - the machine does the rest.

## THE Improved ''ORIGINAL'' VIBROPLEX

Suitable for All Classes of Transmitting work Where Speed and Perfect Morse Are Prime Essentials

## SPECIFICATIONS

The improved model, single lever. Two pairs of contact points: one for dots, the other for dashes. Weight, 3 lbs .8 oz . A handsome and efficient transmitting machine, with unlimited sending possibilities. Complete with cord and wedge.
Standard-Polished Chromium top parts, black base ... Amateur Net Price
$\$ 15.95$

DeLuxe-Polished Chromium base and top parts, with jeweled movement. Amateur Net Price
19.50

## THE ''ZEPHYR'' VIBROPLEX

A Genuine Vibroplex. Slightly Lighter in Weight. Having Plenty of "Pep" and "Power" Smaller and more compact but designed in most details the same as the "Lightning Bug" model. Planned to meet the demand for a low priced, efficient and high speed transmitter for telegraph use.

## SPECIFICATIONS

Single lever with standard size contact points. Mounted on slightly smaller base. Weight 3 lbs. 2 oz. Equipped with circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.
Amateur Net Price.
$\$ 12.50$

THE "CHAMPION' VIBROPLEX For Radio Use Only

Designed to Fulfill the Demand for a Low Priced Radio Transmitter

The new "Champion" is an inexpensive transmitter having exceptional sending qualities . . . clarity . . . speed . . . sending ease, which will appeal alike to amateur and professional radio operators. Designed to meet the demand for a low priced Vibroplex in the radio field.

## SPECIFICATIONS

Single lever with two pairs of contact points. Mounted on large standard size base. Weight 3 lbs. 8 oz. Without circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.
Amateur Net Price
$\$ 9.95$

Very similar to the Original Vibroplex except that it is only half the size. Suitable for all classes of telegraph work and in high favor with wireless men.

## VIBROPLEX

Small and compact, the "Bluc Racer" Vibroplex can be carried around and never be in the way. Embodies the same sending possibilities, the same carrying qualities, the same strength and durability as the larger models. Built especially to meet the demand of telegraphers requiring a small, lightweight and efficient sending machine.

## SPECIFICATIONS

Single Lever. Two pairs of contact points-one for dots, the other for dashes. Weight, 2 lus. 8 ozs. Complete with cord and wedge. Standard-Polished Chromium top parts, black base . . . Amateur Net Price

## VIBROPLEX CARRYING CASE <br> Keeps the Machine Free from Dust, Dirt and Moisture Insures Safe-keeping When Not in Use

A cloth-lined case, finished in liandsome simulated black morocco. Corners are reinforced, adding to its durability and atlractiveness. A flexible leather handle makes it more convenient to carry. Has lock and key. PRICE
\$5.50

Parts for all VIBROPLEX equipment are always available. Price List for parts will be furnished at once, upon request.

The JEWELS used in this Model Vibroplex are the same as placed in the world's finest precision made watches and instruments.

A JEWEL bearing main lever insures a "LIFETIME" of service and an ease of operation that can only be referred to as "FEATHERTOUCH" sending.

The "Original" and "Blue Racer" Vibroplex models have been vastly improved. To insure still further absolute uniformity in appearance and in precision construction, the main and damper frames of both models-in Standard and DeLuxe finishes-are now manufactured from streamilined high-pressure castings. No priorities are required on Vibroplex machines.

The advanced development and pace-setting design of the AX2 plated crystal again demonstrate Bliley's leadership in the manufacture of crystals for amateur frequencies.

Primary electrodes in the AX2 consist of a microthin metal film, deposited directly on the major surfaces of the crystal by evaporation under high vacuum. This film exhibits extremely high adhesion and can almost be considered as a chemical bond to the quartz. Secondary electrodes, under spring pressure clamp the crystal in position and provide a medium for thermal dissipation.

Bliley's plated crystal gives you better grid current stability over a wide temperature range plus improved frequency stability under high drive conditions, and in addition such famous Bliley qualities as:
-Acid etching to frequency to prevent aging.
-Nameplate calibration accurate to $\pm .002 \%$ at $25^{\circ} \mathrm{C}$ in factory oscillator.
-Temperature stability better than $\pm .02 \%$ between $-10^{\circ}$ and $+60^{\circ} \mathrm{C}$.
-Activity level tested between $-10^{\circ} \mathrm{C}$ and $+60^{\circ} \mathrm{C}$.
-Solid, stainless steel pins. Welded contact between pins and contact plates.
-Neoprene gasket seal. Moisture resistant, molded phenolic case and cover.
-Compact size for easy stacking. Two units may be mounted back to back in standard octal socket.
-All nomenclature on top for easy identification.
Nothing has been overlooked to insure top performance under conditions encounter ed in amateur equipment.

Finger tip adjustment is provided by a three position modulation selector and a five step attenuator, with vernier output from 0 to 15 volts. An external socket accommodates extra crystals for special requirements.
Simply connect the Bliley CCO to the receiver to be tested and select the frequency desired. The crystals are instantly on frequency as soon as the oscillator is energized. Save hours of time, eliminate guess work and increase your prestige as a radio service technician. The CCOisa"techniquality"product of the same engineering skillthat has kept Bliley Crystals foremost in dependability for over 15 years.

## $\$ 69.50$ complete with seven crystals

## tops in TECHNIQUALITY

TYPE FM6-S 100kc.
Recommended primarily for use as a frequency standard. Plated precision crystal is rigidly clamped between resonant pins providing exceptional electrical and mechanical stability. Frequency is adjustable to exactly 100 kc . at $25^{\circ} \mathrm{C}$ when unit is used in recommended oscillator circuit. Frequency stability $\pm .005 \%$ at any temperature between $0^{\circ} \mathrm{C}$ and $50^{\circ} \mathrm{C}$. Separate tank coil, with proper characteristics for correct performance, supplied with each unit.

Price $\$ 18.75$

> TYPE CF6
> $455 \mathrm{kc}$.

Single signal filter crystal unit. Exceptionally low holder capacity permits sharp signal discrimination in filter network of general communications receivers. Frequency 455 kc . free from spurious responses within $\pm 7 \mathrm{kc}$.

Price $\$ 4.50$

TYPE CF3
455 kc .
Single signal filter crysta. unit. Frequency 455 kc ., $\pm 5 \mathrm{kc}$. -free from spurious responses within $\pm 7 \mathrm{kc}$. of fundamental. Designed for intermediate frequency filter in general communications receivers.

Price $\$ \mathbf{5 . 0 0}$

TYpe MC9 3105kc.
This unit is suggested for use in private aircraft transmitters operating at 3105 kc. The crystal is guaranteed to be within $\pm .02 \%$ of 3105 kc . at any temperature between $0^{\circ} \mathrm{C}$ and $50^{\circ} \mathrm{C}$ and is factory tested for performance over this temperature range. Plug-in type holder is gasket sealed against moisture and humidity.

Price $\$ \mathbf{5 . 5 0}$

> TYPE SMC100 100-1000kc.

Dual frequency crystal provides either 100 kc . or 1000 kc . frequency source. When used in recommended oscillator circuit 1000 kc . frequency is within $\pm .05 \%$ at $25^{\circ} \mathrm{C}$ and 100 kc . frequency can be adjusted to zero beat at $25^{\circ} \mathrm{C}$. Suggested for signal generators used in alignment of radio receivers.

Price $\$ 8.75$

TYpe VX2 3105ke.
Designed for applications where space is at a premium, this unit is recommended for private aircraft communication at 3105 kc . Guaranteed to maintain frequency within $\pm .02 \%$ at any temperature between $0^{\circ} \mathrm{C}$ and $50^{\circ} \mathrm{C}$. Solder lug connections permit mounting under chassis and assembly is gasket sealed against moisture and humidity.

Price $\$ \mathbf{5 . 0 0}$

## CRYSTAL BLANKS TO YOUR SPECIFICATIONS

Quartz crystal blanks can be supplied in quantitylots in either of the four stages; rough diced, surface ground, semi-finished or finished (pre-aged). Quotations supplied upon request depending upon quantity and specifications.

## HEAVY DUTY CRYSTAL UNIT

A rugged communication crystal unit designed for rough treatment. Heavy molded bakelite holder, $1-7 / 16^{\prime \prime} \times 3 / 4^{\prime \prime} \times 2-1 / 16^{\prime \prime}$ (excluding pins). Screw-in banana type plugs with $7 / 8^{\prime \prime}$ spacing center to center. Stainless steel contact plates. Neoprene gasket seal. Shock proof construction, engineered for heavy duty in mobile units. Frequency range 2000 to 9000 KC .

Type 265-PM-Quotations supplied upon request depending on frequency and specifications.

## 1519 McGee St.

## Kansas City

 8 Missouri
## A NEW MULTIPLE CRYSTAL UNIT Specially Designed for Amateur Use

Positive contact, low capacity, excellent for switching to four different frequencies instantly and accurately. Operates in any position and requires very small space. Will improve the appearance of any transmitter either in front or behind panel mounting. Over-all dimensions $2^{\prime \prime}$ high, 1-1/4" in diameter with octal socket base. Frequency range 3000 KC to 9000 KC supplied in any combination. Frequency masked name plate.

Type 275-M-Prices will depend on your specifications as to frequency and tolerance. Quotations

Type 275-M upon request.

## I. F. FILTER UNIT

455 or 465 KC Filter for most intermediate frequencies in receivers. Rugged design, dust and moisture proof. Dimensions $1-3 / 16^{\prime \prime} \times 1-3 / 8^{\prime \prime} \times 5 / 8^{\prime \prime}-$ Crystal accurately ground for peak performance free from interfering spurious frequencies. $3 / 4^{\prime \prime}$ pin spacing for regular mount or standard 5 -prong socket.

Type 220-F-Quotations on request.

## THIRD HARMONIC OPERATIONS

This crystal has been engineered to supply an Amateur unit that is dependable on the 14 MC or 20 meter operations. Mounted in a sturdy water and dust proof holder sealed with fibre gasket. Black phenolic holder, $1-1 / 2^{\prime \prime} \times 3 / 4^{\prime \prime} \times 1-3 / 4^{\prime \prime}$ (excluding pins). Solid stainless steel contact plates. Pins $1 / 8^{\prime \prime}$ in diameter, $3 / 4^{\prime \prime}$ from center to center. Stocked frequency range 14,000 to 14,500 furnished within 10 KC of desired frequency and $.01 \%$ of frequency marked on crystal.

100 K.C. precision unit for Frequency Standard. Temperature coefficient less than 2 cycles per MC . per ${ }^{\circ} \mathrm{C}$. Temperature control not required for ordinary use.
TYPE Z-6-100 K.C.
Neł \$7.50

## CHECK SUPERIORITY OF PR CRYSTALS

STABILITY-Drift characteristics of PR Crystals limited to less than 2 cycles per MC per degree. You get low drift combined with high output, dependable frequency control. X-Ray orientation guarantees uniform cut for maximum low-drift performance.
ACCURACY-Guaranteed accurate within .01 per cent of specified frequency or better. You KNOW where you are with PRs.
POWER OUTPUT-PRs are designed to give maximum power output from the exciter stage.
ACTIVITY-PRs give you high activity. They "come in" instantly, key without chirps. No excessive "backing off" necessary.
UNCONDITIONAL GUARANTEE-Every PR Precision CRYSTAL is guaranteed unconditionally by the makers of fine crystals since 1934.

## COVERING FREQUENCIES FROM 90 KC TO 35,000 KC FOR Ewery PURPOSE...

For 14 years RSMC crystals have been filling the industry's requirements for quartz crystals ground to the most rigid standards. Each crystal blank is from the highest grade Brazilian quartz and is carefully checked by X-ray diffraction methods during orientation. All crystals may be supplied with a temperature coefficient, better than 2 cycles per megacycle per degree centigrade, and normal current carrying capacity. Tolerance to $.01 \%$ can be met over any reasonable temperature range. Crystals are processed to prevent ageing, aud holders are hermetically sealed. Electrodes are made from highest grade stainless steel. All crystals unconditionally guaranteed.

## BROADCAST AND FREQUENCY STANDARD

Type 1076 approved by FCC for use in broadeast transmitters and frequency standards. Air gap is adjustable. Crystal ground to specified frequency. Frequencies: 90 kc to 6000 kc .

## MARINE CRYSTALS

This type crystal is available in type 1041 holders on any marine frequency. It may be supplied in type 1059 with banana pins on special order. Low drift with $.02 \%$ tolerance.

## AMATEUR CRYSTALS

Available in type 1071 holders for any amateur frequency. Tolerance within 1 kc . of specified frequency. Fundamental crystals are furnished to $20,000 \mathrm{kc}$. and third harmonic crystals from $20,000 \mathrm{kc}$. to $35,000 \mathrm{kc}$. Price: to 10 mc . \$2.65

## AIRCRAFT CRYSTALS

Supplied in type 1071 holders for any aviation frequency. Tolerance $.02 \%$. Fundamental crystals furnished to $20,000 \mathrm{kc}$. and third harmonic crystals higher to $35,000 \mathrm{kc}$., simplifying design of new VHF equipment. CAA type certified crystals (CAATC No. 1015) furnished in type 1058-1-1 and 1058-1-2 holders (CAATC No. 1017) are available on request. Tolerance meets CAA specifications of $.015 \%$.

## PRICES ON REQUEST

Type 1041

# MEET HIGHEST <br> PERFORMANCE STANDARDS 

## MOBILE AND POLICE CRYYTALS

This type crystal is supplied in type 1041, 1071 and 1072 holders. Tolerance $.02 \%$ on any frequency from 1000 kc to $35,000 \mathrm{kc}$. (Third harmonic type beyond $20,000 \mathrm{kc}$.)

## GENERAL COMMERCIAL CRYSTALS

Available in type 1041, 1071, 1072, 1044, 1059, 1078, 1079 and 1080 holders. By special order they can be supplied in type 1075 and 1077 holders. May be ground to any tolerance required if type of oscillator circuit and constants are supplied with order. For frequency coverage see holder specification table.

## CRYSTAL SOCKET ADAPTOR

Adapts new, small type 1071 and 1072 holders (FT-243) to $3 / 4$ " crystal sockets. Saves re-wiring and re-vamping when new type holders are used in old equipment.

## WESTLINE <br>  <br> TYPE W7: Range 7.0 to 7.4 MC. <br> 

A highly active oscillator. Made for maximum performance in the 40 and 20 meter and higher frequency bands. Expertly designed and constructed . . . molded phenolic holder . . . stainless steel electrodes . . . copper contact plates . . . this unit offers the ulfimate in precision and long life. We guarantee this crystal to maintain constant calibrated frequency. Drift is less than I cycle/MC/ ${ }^{\circ} \mathrm{F}$. Westline specially processed Units offer you this precision. Plugs into either octal or 5 prong socket, or 2 units can be plugged octal or 5 prong socket. Size of holder, $11 / 8^{\prime \prime} \times 13 / 16^{\prime \prime} \times 7 / 16^{\prime \prime}$. Pin size 3/32": Pin spacing .483": Unit comes accurately marked to calibrated frequency.
Type W7: 7.0 to 7.4 MC: Supplied within 1 KC of desired frequency $\$ 3.50$
From Dealer's Stock......... $\$ 2.80$

TYPE W6: Range 6.0 to 6.75 MC . Another example of WESTLINE precision. These crystals will maintain constant calibrated frequency. Drift due to temperature change is less than I cycle/MC/ $/{ }^{\circ} \mathrm{F}$. 8th harmonic falls into 50 to 54 MC band; 24th harmonic falls into 144-148 MC band; 36th harmonic falls into $220-225$ MC band. Fine materials and expert craftsmanship gives you the finest unit that money can buy at competitive prices. Frequency accurately marked on holder. Plugs into either octal or 5 prong sockets. Size o\$ holder, $1 / 8^{\prime \prime} \times 3 / 16^{\prime \prime} \times 7 / 16^{\prime \prime}:$ Pin size $3 / 32^{\prime \prime}:$ Pin spacing .483": Two units will plug into one octal socket.
Type W6: Supplied within 1 KC of requested frequency . . . . . . . $\$ 3.50$
From Dealer's Stock . . . . . . . . . $\$ 2.80$ ONE YEAR REPLACEMENT GUARANTEE
Each WESTLINE unit is rigidly tested in our laboratory and is guaranteed for a period of one year against faulty construction.

TYPE W3: Range 3.5 to 4.0 MC. Brazilian Quartz Crystal expertly processed by master craftsmen . . . mounted in molded phenolic holder. Stainless steel electrodes, nickel plated brass contact pins, copper contact plates, stainless steel spring, neoprene gasket. These are the reasons why WESTLINE UNITS maintain proper frequency. (Average frequency drift is less than 1 cycle/MC) ${ }^{\circ} \mathrm{F}$.) That's why you get BETTER performance. Plugs into either octal or 5 prong socket. Two units will plug into one octal socket. Frequency accurately marked on holder. Size of holder, $11 / 8^{\prime \prime} \times 13 / 16^{\prime \prime} \times$ 7/16": Pin size $3 / 32^{\prime \prime}$ : Pin spacing .483"
Type W3: Supplied within i KC of frequency requested . . . . . . . . $\$ 3.50$ From Dealer's Stock . . . . . . . . . $\$ 2.80$

TYPE WH14: Range 14.0 to 14.8 MC. Three new units, especially designed and angineered by WESTLINE to operate in any circuit with plate tuned to the 3rd harmonic. Type WHI4 oscillates in 14 MC band when used in oscillator with plate circuit tuned to 14 MC . Highly active, these units will give you top performance . . . at a price designed to fit your pocketbook. Supplied within 5 KC of requested frequency. Size of holder, $11 / 4^{\prime \prime}$ $\times 15 / 16^{\prime \prime} \times 7 / 16^{\prime \prime}$ : Pin size $3 / 32^{\prime \prime}$ : Pin spacing . $483^{\prime \prime}$ : Plugs into either octal or 5 prong socket. Two units will plug into one octal socket.
Type WH14: 14.0 to 14.8 MC . Price
$\$ 3.50$ TYPE WH21: Range 21.0 to 21.5 MC. Oscillates in 21 MC band when used in oscillator with plate circuit tuned to 21 MC. Price.
$\$ 3.50$
TYPE WH28: Range 28.0 to29.7MC. Oscillates in 30 MC band when used in oscillator with plate circuit tuned to $\mathbf{3 0}$ MC. Price. . . . . . . . . . . . . $\$ 3.50$

## WESTLINE

$1500-18000 \mathrm{kc}$
A very stable-hich cetivity-moisture proof unit for all types of equipment. $3 / 4$ " blank mounted in stainless steel electrodes. Will stand severe abuse. Holder size is 1.375 x $1.375 \times .500$, pins fit 5 prong socket.

TYPE WC-34
Stock frequency ............. $\$ 7.50$
Other
. $\$ 9.50$

400-500 kc
For use in filter circuits of communications receivers. Supplied within $\pm 2 \mathrm{kc}$. Low capacity holder. Overall dimensions are $.5 ミ 1 \times .937 \times .430$ with solder lug attachments.

TYPE WF-4
$\$ 3.75$
ONE YEAR REPLACEMENT

## GUARANTEE

Each WESTLINE unit is rigidly tested in our laboratory and is guaranteed for a period of one year against faulty construction.
To obtain our Amateur or Commercial catalog write:

WESTLINE CRYSTAL CO.
10860 Santa Monica Blvd.
Los Angeles 25, Calif.

Small size, commercial type, general purpose holder. Stainless steel electrodes. Recommended where space is limited in low power oscillators. Accommodates a $1 / 2^{\prime \prime} \times 1 / 2^{\prime \prime}$ quartz plate.
Dimensions of holder are $1.125 \times .812 \times$ .437. Standard octal socket accommodates this unit.

TYPE WC-3
Słock frequency . . . . . . . . . . $\$ 6.00$
Other ........................ $\$ 7.50$

W-3A

## AIRCRAFT FREQUENCIES

## ONLY

3105-6210 kc.
Stainless steel electrodes, sealed against moisture for use on airborne equipment; AT cut, drift, less than $2 \mathrm{c} / \mathrm{mc} / \mathrm{oC}$ within temperature range $0^{\circ} \mathrm{C}-50^{\circ} \mathrm{C}$. Freq. Tol. $.02 \%$. Size of WA-3 holder is $1.6 \times 1.125$ $x .656$ plugs in octal socket. Size of W-3A is $1.125 \times .812 \times .437$ plugs in octal socket.

TYPE WA-3 . . . . . . . . . . . . . $\$ 7.50$
TYPE W-3A
$\$ 5.50$

## INVARIABLY IT'S VALPEY

For every crystal application, VALPEY invariably gives outstanding performance. Select your VALPEY unit from the above chart, or send your specific crystal requirements to VALPEY. In every field where accurate crystal control is the aim invariably it's VALPEY.

Crofismanship in Crystols Since 1931

1

No. 2. $11 / 2$ volts. Standard tubular cell. Size, $25 / 6^{\prime \prime} \times 15 / 16^{\prime \prime}$. Standard package 48. List price, \$ . 10 .

No. 1. $11 / 2$ volts. Baby tubular cell. Size, $17 / 8^{\prime \prime} \times 1^{\prime \prime}$. Standard package 12. List price, \$ . 10.
No. Z. $11 / 2$ volts. Pen-Light Uni-Cel. Size, $17 / 8^{\prime \prime} \times 9 / 16^{\prime \prime}$. Standard package 12. List price, \$ . 075 .

## (BCA) RCA preferred Type Renewal Products

## RADIO BATTERIES

General dry batteries confain many outstanding advancements such as extra heavy seamless extruded zinc cups, the famous paper thin separator permitting more mix and more active zinc area by utilization of the cell bottom. The curled rim lock seal which seals each cell individually. These features assure long shelf life as well as the maximum in dry battery performance.

## GENERALA \& B RADIO FARM PACKS

General A-B packs are made with $L$ size cells in the $A$ section. These cells are $40 \%$ longer than the largest conventional $11 / 4^{\prime \prime}$ diameter cell. This construction assures the perfect balance between these " $A$ " and " $B$ " sections for current drains established by the Radio Industry.

## GENERAL ABC HOME RADIO BATTERIES

All cells used in General batteries are filled with active mix by loading equipment developed by General which automatically puts the right amount of mix into each cell and packs it uniformly. General home radio batteries are accepted for their uniformity, dependability and long service.

## GENERAL PORTABLE A\&B PACKS AND

A\&B BATTERIES
The small size cells used in portable batteries greatly reflect the benefits derived from General's patented construction. General Batteries deliver more service hours per dollar, therefore you will find them used as original equipment in more battery radios than any other brand.

## GENERAL FLASHLIGHT CELLS AND LANTERN BATTERIES

General Flashlight and Lantern batteries are designed to give brighter light and recuperate rapidly while idle. The Heavy Duty cells are made for moderate home use. The Industrial is to be used where light is needed frequently and for long periods.

## GENERAL IGNITION BATTERIES, MULTIPLE AND ELECTRIC FENCE

All General batteries are designed to use the most efficient cells available. The 4 Ll Hywatt is far superior in service and shelf life to any other battery of comparable size because it consists of four $L$ cells, the service being about double that secured from the conventional No. 6 dry cell. These same $L$ cells are used in the Electric Fence and Multiple batteries and produce most satisfactory performance. GENERAL Electric Fence batteries have no equal.

## THE SNAPPER

## A Long Insulated Test Clip and A "Triple Threat" Radio Teol

U. S. Patent No. 2,074,324

No. 99-7" Long Insulated
The long tube is of insulating material and is fitted with spring contact jaws on the far end.
The jaws are operated by a push of the thumb on the near end. Wire is quickly and easily connected in a hole in the insulator knob binding post on the near end.
May be used as (1) A "Deep Sea' Electric Test Clip-test contacts with ease, deep in the recesses of radio chassis with no danger of short circuits; (2) An Electric Contact Prod-clip jaws may be used to make quick prod contacts, or clip one Snapper on ground circuit and prod with another; (3) A Retriever-start small screws and nuts or pick up odds and ends that may accidentally be dropped into inaccessible places.
PRICE.... $\$ 0.80$ EACH Dealers Wholesale Price, each... $\$ 0.48$ Net Snappers are generally used in pairs-1 red and 1 black.

## INSULATED GRID CLIP ASSEMBLY

## One Universal Clip That

 Fits Them AllThis assembly is made up of a Pee-Wee Olip with jaws specially constructed to give a firm grip on all sizes of grid caps, a rubber insulator over the clip, 10 inches of flexible, rubber-covered wire and a of flandard phone tip
FEATURES: Will Never Weaken or Break - Bull-Dog Grip-in eitber vertical or horizontal position, will not come off or horizontal position, will not come off cap no matter how hard tube is pounded. - Will Not injure or Break Grid Cap-ii clip itself is struck accidentally it will pull loose without damaging cap. - Wire Will Not Pull Loose from Clip-soldered connection at both ends. Quick and Easy Application-fits all sizes of grid caps. No. 106 -Insulated Grid Clip Assembly. EACH NET \$0.22 LOTS OF 10 \$0.15

## CLAMPIPE GROUND CLAMP

U.S. PATENT No. 1,794,976

## ATR InVERTER VIBRATORS

ATR Vibrators, the heart of vibrator-operated power supplies, are proven units of the highest quality, engineered to perfection. They are backed by more than twelve years of vibrator design and research, development and manufacturing-ATR pioneered in the vibrator field.

ATR Inverter Vibrators incorporate the following features:

- Large Oversized $1 / 4^{\prime \prime}$ Diameter Tungsten Contacts having Full Wiping Action-for greater reliability and longer life.
- Highest Quality Spring Stcel Recd-for uniform flexibility and prevention of reed breakage.
- Highly Efficient Magnetic Circuit with Formed Base-for greater accuracy and more uniform operation on both high and low voltages.
- Mica and Metal Stack Spacers with Bolted Stack Construction-for adjustment permanency under any operating condition.
- Highest Precision Construction and Workmanship-practically all parts are held to within a tolerance of 0.0005 of an inch.
- When Ordering ATR Inverter Vibrators for replacement, he sure to mention the type number, model number, and serial number of the ATR Inverter for which it is intended. Consult the ATR Inverter Vibrator Guide.

## ATR Low Power InVERTERS

Illustrating all ATR Low Power Inverters except Types 6 and 12.

For Operating Small A. C. Motors, Electric Razors, and
Devices of Approximately 35 watts Consumption from
$6,12,24,32,110$, and 220 volt D. C. Lines.
This line of ATR Low Power Inverters was specially brought out to meet the insistent demand for a good, low power, inexpensive portable Inverter for operating phonograph and other A. C. motors and a host of small A. C. devices from D. C. voltage sources. These Inverters operate at an efficiency in excess of $90 \%$ and are designed for operation of loads having a power factor as low as $60 \%$. They are ruggedly built and powered by a special ATR six-contact plug-in Inverter Vibrator utilizing four $1 / 4^{\prime \prime}$ diameter tungsten power contacts and two silver alloy driver contacts.

| Type | Input <br> D. C. volts | A.C. Output 60 cycles | Wattage |  | Code Word | List Price |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Intermitteat | Continuous |  |  |
| 6 LIC | 6 | 110 volts | 35 | 25 | ALICM | \$21.50 |
| 12 LIC | 12 | 110 | 50 | 35 | BLICN | 21.60 |
| 24 LlC | 24 | 110 | 50 | 35 | FLICR | 25.00 |
| 32 LlC | 32 | 110 | 50 | 35 | CLICO | 25.00 |
| 110 LlO | 110 | 110 | 75 | 35 | DLICP | 21.50 |
| 220 LIC | 220 | 110 | 75 | 35 | ELICO | 25.00 |

Radio frequency interference not suppressed. Built-in filter model available, $\$ 7.95$ watitional. Protective cover, $\$ 2.00$ additional.
Any of the above type Low Powor Inverters are available with 220 volt A. C. output at prices $25 \%$ higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word " $T$ "; that is, if a 110 volt D. C. Low Power Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110 S covered by code word, "DLICT". Dimensions, $53 / 8^{\prime \prime} \times 4^{\prime \prime} \times 65 / 8^{\prime \prime}$; shipping weight, $6 \frac{1}{2} \mathrm{lbs}$.
Replacement Vibrators for any of the above Low Power Inverters are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.

Illustrating Types 6 and 12 Low Power

## ATR "A" BATTERY ELIMInATORS

Hustrating Heavy Duty "A" Battery Eliminator, Type 120C ELIO. SUGGESTED USES:

As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D.C. electrical and electronic equipments. In the laboratory, for supply
voltages by simply using a rheostat in one side of the A.C. cord.

Battery Fliminators may be treated as batteries in the sense that they can be connected in series for higher voltages at the same current output per unit or in parallel for the same output voltage per unit at higher currents.

Equipped with Fuil-Wave Dry Disc Type Rectifier, Assuring Noiseless, InterferenceFree Operation and Extreme Long Life and Reliability.
TYPE 60 ELIA--Rated output 6.3 volts at 6.5 ampcres. Size $8^{\prime \prime} \times 61 / 4 " x 71 / 4 "$; shipping weight, $183 / 1$ lbs. Code word "SELIA". List Price................................. $\$ 38.00$

Code word "HELIM"
Rated Output: $6.3^{\text {polts }} 14$ amperes or 14 volts at 7 amperes. Fither output obtainable by means of simple output terminal switching arrangement. List Price

All ATR Flim cator 10-Ampere Fuse Rubber Mounting Feet 6 ft All Rubber Cord of heavy gauge metal having attractive black-wrinkled finish.

Specially Designed for Testing D. C. Electrical Apparatus on Regular A. C. Lines, 105-125 Volts 50-60 Cycles

- Eliminates Storage Batteries and Battery Chargers.
- Operates the Equipment at Maximum Efficiency at all Times.
- Delivers Filtered Direct Current at the Correct Voltage for Proper Operation.
- Fully Automatic and Fool-Proof.

## ATR - INVERTERS. ATR

## AMERICAN TELEVISION \& RADIO CO.

## ATR STANDROD ANTV RADIO INVERTERS

Ifustrating all Standard Types ATR Radio Inverters extept Types 6 and 12 . For Heavy Duty styles-see cut below.

Specially Designed for Operating A. C. Radios, Public Address Systems, Television Sets, Amplifiers, Intercall Systems, and Radio Test Equipment from D. C. Voltages in Vehicles, Ships, Trains, Planes, and in D. C. Districts.

This group of ATR Inverters is expecially recommended for use with A. C. radion, amplifiers, and similar electronic equipment, being exceptionally well fittered to insure interierencefye radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life radio operation. All models indicated are equipped with an ATR ten-contact plug-in Inverter Vibrator of new design and construction having dual arms and utilizing eight $1 / 4^{\prime \prime}$ diameter tungsten power contacts and two silver alloy driver contacts, insuring increased long life and reliable servicr. These Inverters also come equiped with four point voltage regulators, which make possible the correct output voltage for minimum to maximum loads and alko help compensate for imput voltares which are lower or higher than normal; the operating efficiency is in excess of $85 \%$.

| Type | $\begin{aligned} & \text { Input } \\ & \text { D.C. } \\ & \text { Volts } \end{aligned}$ | A. C . <br> Ontput 60 Oycles | Output Wattage |  | Corle <br> Word | I ist Price |

| 220 RSB | 220 | 110 | 250 | 150 | LRSSBO | 42.00 |
| 220A-RSB | 220 | 110/220 | 250 | 150 | MISSBP | 49.50 |

Any of the above type Inverters are available with 220 volt A. C. output at prices $25 \%$ higher. In ordering, specify " $s$ " after the type number and
substitute for the last letter in the code word "T"; that is if a 110 volt D . C. Inverter having a 220 volt $A$. C. output is desired, this would bo ordered as Type 110s covered by code word, "GRSBT"

ATR Standard and Meavy Duty Hadio Inverters are housed in attractively
fllished black-wrinkled metal cabinets.
Dimmsions of Standard Model Radio Inverters, $77 / 8^{\prime \prime} \times 8-3 / 16^{\prime \prime} \times 4 \frac{1 / 2 "}{}$; Shtpping weight, 17 ibs

## ATR SANDAARD ANO IMDUSTRIAL INVERTERS

For Operating A. C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A. C. Electrical Appliances from D. C. Lines.

These units are specially designed for applications as indicated, permitting the use of standard A. C. equipment on D. C. lines. These Inverters operate at an efficiency in excess of $80 \%$ and are carefully built and equipped to give the longest possible life and operating satisfaction. All Inverters indicated utilize ATR ten contact plug-in vibrators, and are also equipped with four point voltage regulators as fully described above. These Industrial Inverters are recommended for use with loads having power factors as low as $60 \%$, and as low as $50 \%$ for the "P" Inverters indicated. These Inverters should not be used with Neon signs.

Radio frequency interference not suppressed.
Any of the above type Inverters are available with 220 volt A. C. output at slightly higher prices. In ordering, follow similar directions given above.

ATR Standard and Heavy Duty Industrial Inverters are housed in attractively finished black-wrinkled metal cabinets.

Dimensions of Standard Model Industrial Inverters, $77 / 8^{\prime \prime} \times 8 \frac{7}{16} " \times 41 / 2^{\prime \prime}$.
Shipping weight, 17 lbs.
 For correct replacement vibrator, cousult Inverter Vibrator Guide.
Mustrating Heavy Duty Models Radio and Industrial Inverters except types 6 and 12 : *"p" Inverters are corrected for loads having power factors as low as $50 \%$. Built-in filter, $\$ 10.00$ additional.

# Gyclohm POWER PLANTS 

CYCLOHM POWER PLANTS, which proved their dependability and popularity with the Armed Forces of the Allied Nations, are now available for civilian use. Powered by Briggs \& Stratton air-cooled gasoline engines . . . embodying the most advanced features of power unit design. Known for their efficient, dependable performance as LIGHTING PLANTS (portable or stationary) for homes. boats. fisheries, farms, mines, camps, etc. . . BATTERY CHARGERS for mechanized
equipment, industrial works, radio, farms, boats, mobile repair plants, truck fleets, etc.
The following optional equipment is available at additional cost: - ignition radio shielding-carrying handle - battery charging cables with terminals in lengths of 3,9 and 15 feet - connections and flexible hose for exhaust extension - remote control starting and stopping - vibration insulated sub-base - fungus proofing-stellite faced valves and seats for operation on highly leaded fuels.

## a fraduct of CYCIOFM MOTOR CORPORATION <br> Long Island City 1, N. Y., U. S. A.

## CARTER—the oldest name

## CARTER SUPEIR DYNAMOTOR

The Carter Super Dynamotor is widely acclaimed as the finest and most reliable Power Supnly by leading Communications Equipment Manufacturers, Enginecrs, Police Departments, Government Agencies, etc. Exacting care in the selection and design of armature, brushes, commutators, bearings, and other component parts, assures trouble-free, efficient operation. Excellent regulation, minimum AC ripple, easy to filter and install.

SUPER DYNAMOTOR
81/4" long, $41 / 2^{\prime \prime}$ wide, $43 / 4^{\prime \prime}$ high, weight 13 lb .
 volts DC input.

CARTER GENEMOTOR
The oldest Genemotor in continuous production! That's the record of the Carter Original Genemotor. Available in 3 frame sizes, it is the recognized standard Power Supply of Police Radio, Aireraft, Amplifier, and Marine radio equipment Minimum ripple, efficient and dependable. Complete filter and starting relay available as illustrated.
$1 / 2^{\prime \prime}$ frame, $5 \frac{9}{16}{ }^{\prime \prime}$ long, $41 / 8^{\prime \prime}$ wide, $31 / 2^{\prime \prime}$ high, weight 7 ibs.

## CARTER SUPER CONYERTER

The Carter Super Converter is a small, compact, fuiet running, two pole, 3600 RPM fanncooled unit for ehanging DC to AC. This long life double-wound type unit is ideally suited for non-inductive loads such as radio equipment, public address systems, musical instruments, testing devices, small signs, etc. Available in $85 \%$ to $100 \%$ Power Factor only, ball learing equipped, from 40 to 250 watt capacities

## CATEER MAGMOTOR

The exclusive patented Permanent Magnet field design of the Carter Magmotor permits higher efficiency, longer life, and greater output from a-small, compact frame.
The preferred Power Supply for Police Mobile FM and AM reeeivers, small aircraft transmitters. Low drain, ball bearing equipped.

801 A typical standard E-L frequency changer. Input: 115 volts $A C, 25$ cycle; power: 100 watts; Dimensions: $195 / 8^{\prime \prime} x$ power: $1 / 4^{\prime \prime} \times 10^{\prime \prime}$; Weight: 29 pounds.

619 A typical E-L standard vibrator con* verter for transmitter application. Input: 6 volt DC and 115 volt $A C$; Output: 300 volts DC; Outpul power: 60 walts; Dimensions:
$93 / 4{ }^{\prime \prime} \times 53 / 46^{\prime \prime}$ : Weight: $141 / 2$ pounds,

E-L Vibrator Converters have been designed to make possible the operation of equipment requiring high DC voltages from 6,12 or 24 volt storage batteries. Offered in an extensive line of models, there is a Standard E-L Converter for every popular application, including the provision of plate and grid supply of radio receivers and transmitters in stationary, portable, or mobile applications, public address systems, communications equipment, electrical and electronic test equipment, and the like.

## RECTIFIER PACKS

The rectifier pack is a power supply with an AC input and DC output, and is useful in electrical and electronic laboratories as well as in radio service shops.

FREQUENCYCHANGERS
A frequency changer is a vibrator power supply with an $A C$ input of one frequency, and an AC output of a different frequency. This makes possible the use of standard 110 volt 60 cycle AC equipment, such as amplifiers, public address systems, etc. from 110 volt AC of different frequency.

## SPECIAL FOR AMATEUR PORTABLE MOBILE RADIO OPERATION

2606 A brand new improved E-L portable amateur radio power supply, completely filtered with bum-free output. Input: 6
volts DC at 8 amps.; Output: 300 volts $D C$ volts DC at 8 amps.; Output: 300 volts $D C$
at 100 ma; uses vibrator number 1823. at 100 ma; uses vibrator number 1823.
Dimensions: $41 / 4^{\prime \prime} \times 47 / 8^{\prime \prime} \times 51 / 4^{\prime \prime}$; Wt.: 5 lbs. 2 ozs.

ForEFFICIENCY ECONOMY SERVICE

Changing the characteristics of electric power is the job of E-L Vibrator Power Supplies. Available for applications up to 1500 watts, they have established an outstanding record of efficiency and economy in accomplishing these basic power conversions: Inverters for changing direct current to alternating current; Rectifier Packs for changing alternating current to direct current; Converters for increasing or decreasing DC voltages as desired, and Frequency Changers for changing frequency of alternating current.
E-L Vibrator Inverters have been designed to make possible the operation of standard 115 -volt $A C$ equipment and appliances from various DC voltages. Offered in an extensive line of standard models, there is an E-L Inverter for every popular application, such as the operation of radio receivers and transmitters, public address systems, intercommunication systems, coin-operated equipment, motors, electrical appliances, refrigerators, etc.

204 A standard E-L zibrator inverter operating on 115 -volt $D C$ source. Especially useful in $D C$ areas existing in large cittes, as producing 115 volts DC. Input. pow volts DC Output: 115 volts AC; Output power: 150 twatts (max.); Dimensions: $93 / 8^{\prime \prime} x 63 / \mathrm{s}^{\prime \prime} x 45 / 8^{\prime \prime}$; Wt:: $12^{1 / 2}$ lbs.

307 A standard E-L vibrator inverter operating on 115 -volt AC equipment (up to 100 watls) from 6 -volt slorage batteries. Input: 6 volts DC; Output; 115 volts $A C$; Output power: 100 watts (max.), Dimensions: $103 / 4^{\prime \prime}$ ${ }_{x} 71 / 2^{\prime \prime} x 8^{1 / 4} 4^{\prime \prime}$; W $t .: 231 / 2$ lbs.

502 A typical E-L stamdard vibrator inverter operating on 12 volts $D C$ for powering radio receivers and electric appliances. Input: 12
volts DC: Output: lls volts AC. Output power: 100 watts; Dimensions: $93 / 8^{\prime \prime} \times 63 / 8^{\prime \prime}$ $x 45 / s^{\prime \prime}$; Weight: $141 / 2$ pounds.

146 A standard E-L vibrator inverter operating on 32 volts $D C$ for powering radio receivers and transmitters, coin phonographs and orher equipment which demands 350 watts power. Input: 32 volts DC; Output: 115 volts AC;' Output power; 350 watis; Dimensions:
$16^{\prime \prime} \times 10^{\prime \prime} \times 8^{3 / s^{\prime \prime}}$; ${ }^{\prime}$ eight: 48 pounds.

268 A standard E-L vibsator inverter with output power of 750 watts operating on $115-$ volis DC for powering radio transmitters, electric motors and appliantes. Input. 115 wolts DC; Outbul: DSO volts AC; Output power: ${ }_{x} 71 / 2^{\prime \prime}$; Wa t.: 66 lbs.
of Current Replacement Demand

- $\varepsilon \cdot \mathcal{C}$ has led the way in the standardization and simplification of auto-radio vibrators with its outstanding new line. Just 4 $\mathcal{E} \cdot \mathcal{L}$ Models will service $95 \%$ of the current demand for auto-radio vibrator replacement! Also, $\varepsilon \cdot \mathcal{L}$ makes available nine additional models, which, together with the four volume leaders, provide exact replacements for all current auto-radio demands. Here's simplification that really countsreducing vibrator inventories over two-thirds-speeding up turnover-and increasing profits in vibrator sales!

- $\mathcal{E} \cdot \mathcal{K}$ Auto Radio Vibrators leave nothing to be desired in service and performance. Embodying many improvements in design and construction, developed during the war, they produce life and operating characteristics far superior to the best that was known prior to the war.

Write for full information on $\mathcal{E} \cdot \mathcal{C}$ Auto Radio Vibrators. They'll please your customers. . . build your business . . . and make you money!

A complete Vibrator Replacement Guide is available. It lists alphabetically every auto radio model serviced by E-L Vibrators, and the proper E-L Vibrator Model Number.

# Elughto ELEGTAICAL ANO RADIO EOUIPMENT <br> BATTERY ELIMINATORS Distinction 

## ELECTRIFY with ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.
FOUR TYPICAL MODELS are shown on this and
the following page. These are ruggedly constituted units of unusually long life-easy to install-no liquids to spill-no moving parts to get out of order and wear out-operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue crystallac.

## MODEL "Q" SYNCRO POWER

Operates Any 1.4 Volt- $-4,5$, or 6 Tube Battery Radio from 6 Volt D.C. Source
This Eliminator is to be used where 115 volt A.C. lines are not available. Will provide all "A" and "B" voltages more efficiently and at lower cost from 6 volt battery. Will operate a 4-tube radio three weeks at 3 hours a day on a single storage battery (100 A.H.) charge. Low battery drain-one-eighth that of ordinary auto radio-one-third that of 6 -volt farm radio. Excellent for use at farm, summer cottage or camp, in automobile, motor boat, etc.

## Technical Dała

"A" Supply Output
5-6 tubes (average)........................1.4 V. @ 320 ma.
4 tubes
1.4 V.@ 250 ma.

4 tubes
1.4 V.@200ma.
"B" Supply Output
90 Volts D.C.@ 12 ma. (max.)
Primary
6 Volts D.C.@ 0.8 amp . (for 4 tube radio).
Specifications
Cord and battery clips on primary.
On and Off switch in Eliminator turns power on. Size: $5^{\prime \prime} \times 5^{\prime \prime} \times 23 / 8^{\prime \prime}$.
Weight packed: $31 / 2$ pounds.
LIST PRICE $\$ 16.50$

## MODEL 'R" SYNCRO POWER

Operates Any 2 Volt-4, 5, 6 or 7 Tube Battery Radio from 6 Volt D.C. Source
Ideal for use where 115 volt 60 cycle lines are not available. Provides " $A$ " and " $B$ " power for portable radios for 3 weeks at 3 hours per day from single 100 A.H. storage battery charge. For use with 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1G5, 1H4G, etc. Permits longer use of portable radios at less cost and with greater volume. Fine for use at the farm, summer cottage, camp, in motor boat, trailer or auto.

## Technical Data

"A" Supply Output

(Size: $35 / 8^{\prime \prime} \times 61 / 8^{\prime \prime} \times 51 / 2^{\prime \prime}$ )

## GUARANTEE

This unit is guaranteed against electrical failure for three years from date of manufacture, provided it has been used for the purpose for which it is intended and has not been abused. This guarantee does not cover mechanical breakage of parts.
Our liability under this guarantee is limited to repair or replacement only.

# MAllory VIBRAPACKS* (Vibrator Power Supplies) 

TYPE VP-552

- Vibrapacks are the ideal vibrator power supplies designed for providing dependable and low cost high voltage direct current from a low voltage storage battery. Proved efficient and dependable by more than ten years of actual field service. Available in various types and sizes, with outputs up to 60 watts at 300 and 400 volis.

## Outstanding Advantages:

1. High efficiency - low battery drain.
2. Dependable-trouble free-time-tested in thousands of installations.
3. Low cost-low maintenance.
4. Compact-light in weight.
5. Ease of installation.
6. Flexibility. Single unit Vibrapacks can be adjusted to give 4 output voltage ranges each.

## Applications

Vibrapacks are widely used for furnishing " $B$ " power in the following applications:
Automobile receivers-police, sheriff, amateur short wave, etc.

Aircraft and marine receivers and transmitters.
Farm receivers.
Police mobile two-way equipment.
Automobile P. A. systems.
Military, lighthouse, and furestry service radio communication apparatus.

Miscellaneous electronic applications where commercial power is unavailable.

## NOISE SUPPRESSION

- Vibrapacks are equipped with complete, built-in noise suppression equipment. Type VP-555 also includes an efficient low-frequency hum filter. Type VP-557 incorporates the first input filter condenser only. Other Vibrapacks do not include the high voltage hum filter. High voltage filter requirements are similar to equivalent $A C$ power packs.

TYPE VP-554

## TYPE VP-540

- Designed for use as a complete "B" power unit for automobile, airplane, and marine service. May be used to operate long wave, broadcast-band, and short wave receivers, or any elec-
 tronic device within its load capabilities. Rigid anchorage of components permits satisfactory operation under conditions of considerable vibration. Completely filtered for both RF and audio so that the hum and hash level is extremely low.

Universal mounting, any position, with horizontal pre ferred. VP-540 is of the synchonrous, or self-rectifying type. Nominal output, 250 volts at 60 ma. Nominal input, 6.3 volts. Size $71 / 2 \times 315 / 16 \times 51 / 8$ " high, exclusive of mounting brackets and leads. Weight, 7 lbs., 14 oz .
No. VP-540 Vibrapack. List price.
. $\$ 26.00$

## TYPES VP-555, VP-557

 (See listing at left)- Special Dual Packs for high output. Tube rectifier types permit "B-" to be isolated from ground if desired. Output voltages indicated are nominal. Actual average output voltages at yarious loads will be found in the graphs of our Form No. 555 E , when operated at rated terminal voltage. Vibrapacks are supplied complete with special Mallory vibrator. Rectifier tubes included in the interrupter types.

## TYPE VF-223 AUDIO FILTER

- A complete audio filter system for use with all single-unit Vibrapacks. Designed to give maximum suppression of hum with minimum voltage drop. Especially recommended for applications which are sensitive to hum, or where voltage regulation is important as in Class "B" audio amplifiers.
No. VF-223 Filter.
List price................ $\mathbf{\$ 8 . 0 0}$

## MALLORY REPLACEMENT VIBRATORS

- Mallory Vibrators are better than ever today-and here's why:
- Heavy frame holds springs in permanent alignment
- Extra heavy cans insure better sound deadening
-High-grade clock spring steel eliminates reed breakage
-Precision measurements in increments of $.0001^{\prime \prime}$ insure long life
- 105 -strand lead wire defies vibration - connections stay intact
-Optical adjustment methods insure accuracy not obtainable with unaided eye
-Individual testing for output, starting voltage and wave form assures high quality
There is a Mallory Replacement Vibrator for most automobile receivers and vibrator-powered equipment.
For recommendations by receiver make and model number, see your distributor for the Mallory Vibrator Guide, or consult the 5th Edition Mallory Radio Service Encyclopedia.
