Nice sized column this week. Or Month, that is. Sorry for no EDXR in the 6/8 DXM, but only had material from Jim DeYoung, and nobody else, and that's what happens when you don't support YOUR EDXR. However, I would make an educated guess that finals kept many from DXing. Word of note, Jim DeYoungs Material above is that which was held over from 6/8. DX here is nil, but I never stop trying...hi. The IRCA's own gallup poll shows you want the columns all expanded...there is only one way you can do that, and that is everyone contribute! Starting next month, let's hear from some new members, and a few of the older ones who haven't contributed in awhile! 73 'til next month!

Hard to express my thanks to the many fine DXers who have kept this column going thru what must be the noisiest spring in years. A big welcome, too, to all the new contributors in the last few issues. In case anybody hasn't caught on to what "per the list" is, here goes: around the first of each year, a frequency check list is published. Many stations have "f/c's" between 0000 and 0600 hours local time. Most of these are tones, although some use music. A check that is known to be regular is called a regular check (r/c). Stations are supposed to identify themselves during their checks. But sometimes you can't hear the ID even though the tone comes thru well, which is why DXers like code IDs. Also, some stations don't bother to ID although the law says they're supposed to. Which is why Jay Florian wants to have a new club, SPUT-- "Society for the Prevention of UnIDing TTers" ! Well, if anybody wants a copy of the f/c list, say so in your CDXR report and I'll try to get one out to you (I remember an old Burma-Shave sign that said "free, free, a trip to Mars, for 900 empty jars"--shows what an old-timer I am.) 73 and minimum QRN-Charley

Tests and Station schedules:

- 530 CA Westchester, low powered stn used to give parking instructions, etc. for LA Int'l Airport is on 1000-0200 daily per signs at airport.(BP)
970 KOIN OR Portland now rr and apparently NSP (expletive deleted). (BP-WA)
1230 CJOK ALB Fort McMurray, 1000 day 500 night omni-directional. Not a CBC affiliate. Appears to be owned by local interests and is run extremely professionally for a station of its size. PSA's and spots appear to be all locally produced and format appears to be block-programmed by the announcer's preference. First came on the air January 1, 1973. Now has a staff of 11 people and operates 0530-2400 MDT. Address is Box 3000 and Postal Code T0A 1K0. Evening format seems to vary from light to heavy rr. Mentioned that it receives regular reports from Scandinavia in the winter. Slogan is 'OK Radio and also may mention "Alberts' Northern Most Radio Station". Friendly. Accepts tapes. Expect them to be a pest here next winter. (From our Northern correspondent-JEP-NWT)
1420**KXOW**AR***Hot Springs beginning ET-TT 0600 4/5. Has been hrd doing this on a couple other Sat AM's at this time so likely an f/c or reg. ET. (BP-WA)

 Hi! This is my 1st EDXF, so my intro. I'm 18 & finishing my education w/a home study course. I DX on AM/FM & TV & I'm currently unemployed. My favorite sports are tennis, snow skiing, auto racing and badmitton to name a few. Does anyone have an old (or new) WRTH that he or she doesn't want? Just mail it to me & I will pay you for the postage. If anyone wishes to write me, please feel free, no matter where you live. 73's.

Richard Eckman - 1611 E. Mt. Pleasant Ave. Philadelphia, PA 19150

Greetings. Here's a quick re-intro since I haven't been in since November. I am 15, in 10th grade at Central High, have been DXing on the MW band for about 10 months. On the DX front, I seriously mis-Ided a stn in 4/4 DXWW. Tom Sundstrom, in the 5/25 issue says that a pirate from Phila. was on 1595 kHz in Greek. I had thought that this was CSB4-Portugal. Quite a mistake, considering the stn must have been w/in 10 mi. from me. Just recently received a Sanserino loop antenna. Haven't had much time to use it, but it seems to be working very nicely. Any local DXers please write or call me at CH8-3250. That's about it for this time, 73s and good DX.

Dominican Cities Station Lists

The info to follow is the result of hard travel and monitoring by Richard Clark (Pompano Beach), fellow NRC'er and close friend César Objío (Santo Domingo), and yours truly. The monitoring and frequency measurements were done on a Sony TFM-1600 portable receiver generally from the central plazas of the cities covered in our cross-island trip on 9 June 1974. The FM data is the most accurate on earth, but the limitations of the TFM-1600 frequency readout may mean an error of +/- 100 khz or more in a few cases. FM frequencies alone are generally low-power STL's; those marked "\$" programme separately, have higher power, and likely broadcast in stereo:

SANTO DOMINGO DE GUZMAN

540	Radio ABC	105.1

In the above lists, calls such as HIBI & HIGO are pronounced as words. "Stereo" becomes "estereo".

Dominican Daytime DX'ing

Puerto Plata - 9 June: Cuba strong on 580, 600, 670. Possible Cuban u/Puerto Rico on 740. Only USA was WGBS-710 fair & even w/Puerto Rico. ZMS1 good on 1540. Haiti surprisingly only fair on 840 & 1035; no other 4V's noted. Many Puerto Ricans noted, but mostly Dominicans.

Aeropuerto de las Américas, nr. Sto. Domingo - 10 June: Many powerful signals from the coast of Venezuela and NE Colombia. R. Rumbos-670 in around 1300 LT w/no hiss. Big surprise was Dominica-595 strong between R. Continente-590 & HJHJ-600. Other strong splits were 925 & 1435 on Aruba. Classical mx on 1500 likely R. Hoyer, per Richard Clark. Puerto Rico in well, but not like the YV's or HJ's. Possible CMKV-600, no other Cubans. No Haitians whatsoever! ZBVI & R. Antilles tried for w/out success. Mysteries: 620- "R. Cali"? Likely YV. 790- "Estación de la Alegría" Caracas? 930- "Estudio 93. 970- Maicao, Colombia, former 1170 khz, but R. "Azul"? 1050- "Notitiempo" nx pgm. 1210- "RC", likely R. Coro. 1500- classical mx, Hoyer?

Updated Deadline Info

A note just received by us editors from the SDPC has forced us to move up our deadline a few days, so if your contribution for this issue doesn't appear, that's why. § Deadlines for the rest of the summer are as follows: 7/24, 8/28, 9/11 - ignore those appearing on page one. Phone-ins will be accepted on the Thursdays following these dates before 1600 LT. Thnx (RFS)

Sabah-1475 in Sandakan?

Ref. Art Peterson's Sabah-1475: Best available info indicates Sabah-1475 is at Sandakan rather than Kota Kinabalu. Evidence: 1) ITU List of Broadcasting Stations Operating in Bands Below 5950 kc/s, Genève, 1 Feb 71, page 87 (Malaysia) shows a notification for Sandakan (118°E 06' & 5°N 52') on 1475 (but w/250 watts -RFS). 2) Kota Kinabalu is on the opposite side of Mount Kinabalu from the Philippines (the target area), while Sandakan is ideally situated as a forward xmt site to serve the Philippines. 3) Sabah-1475 opened at nearly the same time as the new 10-kw outlet, Sandakan-1080. Further, 565 khz is Tenom (per local ID at c/down). 750 is notified as Tawau & 780 as Sandakan, altho neither two have been monitored from Sorsogon, Sorsogon, Philippines. (Charles A. Taylor, 939 Eastern Ave.; Indianapolis, IN 46201) § Per some past QSL's, at least the studios are in Kota Kinabalu; likely another Hilversum - Lopik situation (RFS)

Guam for the money - TWR for the show ..

KTWR will be the callsign for the new "Bonaire" on Guam. An application for a CP includes a local "inspirational" station for the island on BCB. No mention of any hi-power BCB outlet in the TWR bulletin, but that doesn't preclude it (TWR)

Selfishness is taking advantage of the good info in DXWW, having something to report, and not doing so. What if NOBODY didn't report like you??

FLASH!

I think I have found a "legal" means of including long-wave information in DXWW: Under U.S. law, at least, anything is legal and constitutional until officially decided otherwise by a court or tribunal body, nor can a court rule on such a matter until it is OFFICIALLY brought to its attention, and then at least the Supreme Court may REFUSE to consider any such suit. Assuming that the IRCA BoD can work in this same way, I should be able to include LW info in these pages - on a non-priority basis - quite legally, until someone officially complains to the President and BoD, the BoD votes in favour of the complaint, and this editor OFFICIALLY receives a "cease and desist" order from the President. The inclusion of LW info in DXWW being extremely favoured by the membership, the BoD is privileged to abstain from voting on any complaint brought to its attention re the matter, and the President may even urge them to do so. With this legal interpretation in mind, LW info will be included herein until the DXWW editor is ordered officially to "cease and desist" (RFS)

So, back to the BBC:

- 1475 MALAYSIA, Sabah. For report of 12/8 rec. 5/23. Could not read signature. Signer is the Director General, Department of B'casting, Malaysia. Sent 3-part verie card & lots of cancelled Malaysian stamps & all sorts of goodies on the stn (Lobel)

"It was Greek to me!"

A note from Richard Eckman (Philadelphia) indicates that his entry in the 5/25 DXM as Portugal 1594 was really a Greek pirate operating out of Philadelphia (a city w/a Greek name, hi), this per Tom Sundstrom. A forgivable mis-ID in this case!

Detuned from the Gyrofrequency

Gordon Nelson's interesting article in the last DXM re the gyrofrequency is to be believed over any differing statements made in past DXWW's by this editor. I should have mentioned my comments as "speculative". However, comments were NOT based on local reception, but on a bibliography that included an excellent Soviet source. Please forgive my un-professional actions (RFS)

Thank you all for a very informative edition of DX World-Wide.

 Hello all. Since I haven't appeared in EDXF for ages I decided to drop a line & a re-intro. I am a high school freshman & have been in the hobby for about 2 1/2 years off and on. The rig here is a Lafayette HA 600A and a SM-2 to haul the signals in. Totals now are 351/160, 31d/29d, 3/3, & 9/4. Here's a question for anyone willing to answer! Lately I've been hearing chanting under KFI w/Cuba nulled. I don't know the language, might have been AA. Who might it be? Phone here is 201-889-4127. DXers are welcome to call. 73s.

Howdy gang! Well, if I didn't know better the bands are yuk. So what else is new. FM has even been yuk (sin). Before Reverend Al's sermon: v/q WOW, WMCA, WGY, WING, WCCO. V/l WBNS, WERM, WYEN, WRBJ. V/r WHLT. OK, are ya ready. Notice talking or reading about DXers that many of you call stations during PoP tests. Well, all I can say is to stay on the good side of the CE doing the test and don't call. The dude has enough to do as it is besides answering the phone. I'm talking on experience after doing some of the WGL PoP. That night we had 3 people doing it. Until the newsman left after an hour. Let me run the basics of a proof for ya. Ya got to run a tone from ye old tone generator into ye old control board. So every time you take a reading on the modulation meter you have to change the modulation on the board 75% or 25% or whatever, plus besides looking at the mod meter ya have to take a reading on the distortion meter (ours went out during the test). After ya get all that done you take down your readings. To me that night was busy enough. Could you imagine one person doing the thing? So next time you hear something like a proof or a proof, don't call. Save a dime and just send them a report of reception. That way the CE won't get T'd off and it may get you a verie that way. So enough for the editorial. Hope to see many at the NRC convention. I'm not even a member. Till then take it any way ya can.

Hello again. Summer hath sprungeth, or something (and sic to you, too, jz), and DX on the BCB is not so hot, but TV and FM DX are getting better. Best TV catch so far: WCBS-TV. KOAM-860 must love DXers. They have now sent me two QSL's to verify my report of reception. Here's some info for those of you who like to keep up-to-date logs: Grand Valley State College wants to build a 10 watt FM station on 88.7 MHz. Their present facility is limited to on-campus reception. Also, WKJR-1520 now has an FM side on 101.7 MHz, with 3,000w. The Seattle convention sounds like it'll be lots of fun, but I won't be able to attend it. Seattle is just too far away for me. But, seeing as how the last convention was in Hammond (I joined a month too late to go to that one, drat), I guess the WCGers ought to have a crack at hosting one, too. Correct my error in the last v/s list: Michael McDougald signs WAAX QSLs, not WKYX QSLs. AWO is right, as usual (?). 73s for now from the hole in the wall.

Howdy. Just renewed for my 5th great year with IRCA. DX has been almost nil, except for KCRC-1390 on Cardinal BB, logged w/net. List. One addition to the list: KOAM-860 Pittsburg, KS is on Cards net. KOAM stands for Kansas-Oklahoma-Arkansas-Missouri, by the way. As you might have heard, the Tulsa area was hit by 3 tornados and flooding on 6/8. All area AM stations were off the air except for KRMG-740, KTOW-1340. KVOO-1170 was back on about 0100 and all the others were back on by noon 6/9. A tornado passed over our house and hit about a mile away (whew). To change the subject, I still don't have an antenna, but have been doing some FMing. Best catches are WRVO-89.9 and WEZN-99.9. To "celebrate" my FM DX,

10
 KKUL-103.3 has gone NSP w/soul (ugh). The Tulsa AM situation: KRMG-740 MoR, off SW 0200, MM 0100; KAKC-970 Drake rr, NSP; KFMJ-1050 religious day-timer; KVOO-1170 C&W, off 2nd MM 0100-0600, all other MMs 0100-0200; KXXO-1300 EL, lite rr NSP; KTOW-1340 C&W, off daily 0100-0600; KELI-1430 rr NSP. For info on other area stations, just write. This report is too long already so 73.

Greetings. Summertime DX is alive and very well around here. Round about 21 new loggings since I've been back, with a verie in from WKPR 1420 Kalamazoo MI. Log as of 6/26 stands at 827 heard from 43 states and 6 provinces. 4 new states and 1 new provinces logged on TV, bringing me to 26 states seen and 5 provinces (still need Ontario, drat). Keep the reports coming- plenty of space for them in the summertime. 73.....

Despite the cx going downhill as the season ends I managed to add WCSC for a new state. Also WLCY, WSPD, and WAOK were added in May and June for a pretty good ending. Latest veries: v/l, KCRL KROP KSMA KAJN KJSK KREO. v/r, KLOV KUVR KCAD. v/f, KXYZ KGMO and a v/l and q from KEX.

I'm a new member, I just joined last month. I run a DX-150B on everything from a 30 ft. non direc. to a 50 ft. copper wire V. I've been DXing since about 1971. I've logged about 100 stations and 20 states, 1 province, and lots of Mexicans. I'm also an SWLER. My special interests are Australian and Canadian BCB and DXing low power and low educ. FM's. I like C&W, Soul and Standards mx. My main problem in my area is locals (31 to be exact) and I live a mile from the KFI tower. I get bleedover from 625 to 670 from them. Some recent veries are a v/l from CKWX WOAI KBUZ KSFO & KMJ, and v/q from XEROK ROB WGN WLS KGB KOA WLW KEX WWL KFAB KTAR KOMA WCCO WHO WHAS and KOGO. Here's some tips on my locals: try KWIZ-1480, they put out a good signal with standard/oldies/pop except for telephone talk show 7pm - 12 PDT. They're in Santa Ana. Also a local C&W, KFOX-1280 using "Constant Country, K-F-O-X." They could be confused for a top 40 because they mix C&W with an occasional pop cut. That's all. 73's

Station Move Set

TOKYO - (AP)—The United States notified the Japanese government Wednesday it will transfer the Voice of America relay station on Okinawa to a site outside Japan by May 15, 1977, the Foreign Ministry reported. The Japanese Socialist and Communist parties have repeatedly objected to the continued presence of the station on the island, which the United States returned to Japan on May 15, 1972.

Alberta's landscape ranges from flat farm land in the east to mountains in the west. Similarly it has radio stations of a wide variety, with powers anywhere from 20 to 50,000 watts. Unfortunately most of these stations beam away from the majority of the DXers in North America, that is they beam north. Thus even in southern Alberta many of the stations are heard at night under other stations on the same frequency. An example of this type is CKRD-850 which cannot be heard due to KOA. The easiest stations to hear seem to be CFCN-1060, CFAC-960, and CBX-740.

COMMENTARY:

As noted in the 5/4 DXM, I do have a new address. Starting up a new office has created problems for me, but things should be clearing up in a week or so.

Proposal 6.1-65 is being held for discussion at the business meeting in Seattle, set for July.

12

JULY 6, 1974

Proposal 6.1-71 was a technical amendment to the By-Laws, to bring the bulletin issuance into conformitv with the Postal Regulations for second class mailing permits. Now that we will be going back to first class service, the amendment may be withdrawn or re-written by the Board before it goes to the membership for ratification.

David Leach, 527 Walnut Street, Lemovne, Penn. 17043 will now be editing the lists of stations carrying sports broadcasts. He will be needing lists concerning football, basketball, and hockey.

POSITIONS OPEN:

New Member Welcoming Committee--to help co-ordinate the efforts of those helping new members to adjust to the club.

Technical Expert--to check out technical articles for possible errors before publication in DX Monitor.

Membership Committee--to head a committee attempting to attract new blood to the club.

Respectfully submitted,

Richard C. Evans
President, IRCA
