FLASH TIPS

There will be a DX Gettogether on Saturday, May 14, 1977, at the home of Bruce & Evelyn Portzer, 6546 19th Avenue N.E., Seattle, WA 98115, beginning at 12 noon. Anyone interested in any aspect of DX listening (BCB, SWBC, TV/FM, etc) is invited to attend. Refreshments (beer, pop, munchies) will be provided. For further info contact Bruce at 206-522-2521.

Latest word out of San Francisco is the BARF gang will take over the bulletin as of the July 9th issue. Don Kaskey will be the Editor-in-Chief, and Rich Segalis will be the Publisher. The club address will be: P.O. Box 26254, San Francisco, CA 94126. The present Ed-in-Chief has either 1 or 2 bulletins to go, depending on how my transfer turns out. (MGW)

Word from Albert Lobel is an old time radio club is being formed in the San Diego area. Plans are for a mimeo bulletin to be issued six times a year, and the North American dues to be \$3.00. For more info, write to Albert at 10514 Caminito Baywood, San Diego, CA 92126.

GTGT - GATEWAY TOWN GET-TOGETHER

There will be a BCB DX get-together on May 28-29, at the Ramada Inn, 216 N. Meramec, Clayton, MO 63105. Most of the DXers in the area are NRCers, but IRCans are also welcome. Reserve your room as soon as possible, and mention the NRC to help them get a discount on the meeting room. This info from Walter Breville, 9127 Coral Dr., St. Louis, MO 63123.

The third edition of the ANARC Directory of DX Club Publications is now out. Copies are available to any DXer by writing to ANARC, 557 No. Madison Ave., Pasadena, CA 91101. From the U.S.A. send a large business envelope (self-addressed) and 24¢ U.S. postage. From Canada send the same but a 24¢ mint Canadian stamp. From overseas send three IRCs, or the equivalent of 62¢ U.S. in mint postage stamps of your own country.

Michael L. Hogan, George McKay, Jr., Philip Boersma, Alan Mayer, Dan Gradin, Harry Weatherley, Charles Molloy.

New Member Packets will be mailed out with this bulletin at the latest, and I'm a little behind in doing Reprints at this point, so there will be a little delay for those who have ordered recently.

A few words concerning the move to San Francisco are in order. Current plans are for me to keep the merchandise sales here in Seattle. I am in the process of getting a P.O. Box a little closer to my home so that it will be easier for me to pick up the mail. This means that Reprints, Stationery, and Foreign Logs, as well as Rubber Stamps etc., will be taken care of by me, and "DX Monitor" publication will be taken care of by the SFPC group Don Kaskey et al. (their address appearing elsewhere this issue). My new address will appear as soon as it is available and it is hoped that the transition (decentralization) will go smoothly. SPC's last issue will be that which contains the ballot (i.e. June issue) and that is when the address changes will become effective.

Now that Daylight Saving Time is on, be sure to use correct times when reporting stations to WDXR. If your catch was heard before the switch to Daylight time, use Eastern Standard. If after the change, use Eastern Daylight Time. ADD three hours to Pacific time to get Eastern time. My next deadline will be Friday, May 13, so hope you'll report. 73

Phone: (219) 924-2361 - between 6 & 10PM except Mondays. This number is the DX hotline at this location. I'll chat to you about everything from soup to nuts and hopefully DX, too. Also, any members that are interested in taping here, let me know, cassette tape only! DX is much better since I purchased a TRF, that is the TRF II for me as I have used one in the past but was not pleased with it's performance. This TRF seems to be operating about 100% better than the first one did. I'll give this TRF my vote for the Radio Hall of Fame on the basis of it's early showing, batting 4 for 4 on FC's and 1 for 1 on DX tests. If it is not a candidate for the Hall of Fame, I'll at least give it my vote as MVR (Most Valuable Radio) in my DX equipment lineup. 73's and keep on DX'ing.

Fellow IRCA'ns: As of whole number 445 I do not know whether my lengthy "appeal-to-Stanbury" DXF report has appeared in number 446 or was out, so I'm in slight suspension as to where things stand, readers'-time wise. Hopefully it did the job, and Stan will use his talents for positive things from now on. Hopefully, also, we will be more careful with enforcing our Editorial Policy, so that members' private lives will not be further subject of wild speculation in print, and ugly controversies like the CMS matter will not be repeated. While occasional controversy will always be inherent in any democratically-run organization, they can be confined to issues rather than people. Now, re Zondlo's statement in the number 444 EDXF: As bad as our C&BL situation is, ratification to abolish the old Constitution and to establish a more suitable set of documents (if we could decide on one without a raging controversy) would require a logistical miracle, so since we're stuck with what we've got, I have opted for liberal interpretation of the C&BL as a more practical way of attaining the same ultimate purpose. Speaking of that "Survey-Questionnaire", how did the results come out?? Re the upcoming club elections: I am most definitely NOT a candidate for the office of Director; putting F's and O's on a postal card every so often is about all one does in that position, so I don't need it. I am also not too enthused about running for President of IRCA,

even tho no one else but I have been mentioned for the job as of whole number 445. Those of you who want to see me President, however, will have to nominate and campaign for me yourselves and leave Stanbury and R. Millón out as campaign issues. I will also decline the nomination if I am satisfied with any of the other candidates running for that office. If I do become President, IRCA is likely to become the biggest and best-known DX club in the world 2 years hence, since I have connections, but I won't be unless drafted. On more DX oriented matters, I am now preparing LSCA-3 plans for future appearance in DXM. For new members, the LSCA series is "unidirectional loops" with single gigantic nulls; the LSCA-3 is designed to be simple and inexpensive to build and operate, unlike the other two models. 73 de RFS

This will be my farewell forum. Yes, as mentioned in the 4/9 AD-VISOR, I have lost the 'DX bug' after 6 years of SWBC & MW DXing. I am not, however, in the broader sense, 'leaving the hobby', since I retain an interest in programming: SWBC, MW, FM, and even TV! This field has so much to offer, yet has been minimally explored by those who devote all their energies to chasing DX. I am not putting down the DX hobby; I understand what motivates the DXer, although this aspect of the hobby no longer interests me personally. Please recognize, however, as a growing minority have, that there are other fascinating aspects to the 'SWL-DX' hobby. I will be terminating my memberships in IRCA and NRC when they expire. I will likely continue my NASWA membership, although I violently disagree with recent changes in that organization. I hope to devote most of my time to supporting Glenn Hauser's new publication, "Review of International Broadcasting", which I hope will become a focus for those primarily interested in program content and comment on the world scene as it relates to broadcasting. In any case, may I wish IRCA the best for the future; my years as a member will never be forgotten. Perhaps someday my DX interest will be rekindled; in the meantime, IRCA has little to offer me. Don't allow minor squabbles to be the destruction of a truly democratic club and don't allow the club to become dominated by a NASWA-like elite. Keep IRCA #1! 73 + Adios - Dave.

And now for something completely different, (for the DXM nowadays) DX! Latest veries here are WYTH (3 months), WFIR (4 months), WIRE (5 months), WVOP, WRPC, WTMP, WJEM, WKEU, WKXV, WSNT, WINS, WAVG, WISE with many maps, also for sister stn WRJZ recently purchased, KFBK, KOMO (both jumbo cards, arrived in good condition despite hired killer at P.O.! hi). KOMO is a super nice card. Even you non-verie collectors should have this one! WLET also varied. WLET GE advises they conduct a f/c each Tuesday at 0001. This one not in f/c list. Looking at all the crummy v/r's I've received in the last few months, I can now say: Your v/r is only as nice as your request! I've started typing mine on bond paper, and it looks much nicer. Also, I send a legal size SASE inside of a jumbo kraft envelope so letters and big QSLs don't get all bent out of shape. While listening to CBC news the other night, they said due to the severe draught in Haiti, most of the country is without electricity (Haiti is all hydro-electric). Canada is shipping down some emergency generators. I wonder if this has affected broadcasting there? 4VEC seems to still be on. I hope we are all through with the very cruel responses by a few members. Turns my stomach, it does. Meanwhile, here's hoping the lightning storms subside. 73s de DD.

Okay, let's look at some positive developments for a change. In the preface to my just published novel I noted the low ebb to which articles in electronics magazines (and pulp mags in general) had sunk: I specifically cited the case of my R. Americas Libre investigation. However, during the past few months there were some hopeful signs, actually starting last fall with publication of

my R. Millón article in Elementary Electronics. And that turns out to be something more than a fluke, because in the March-April E/E I was able to summarize the background of R. Free Russia activities in Latin America which bears a striking resemblance to the background of George De Mohrenschildt who, as everyone knows, has now become a major figure in the Oswald case (but whether or not the "Dutch" version of the De Mohrenschildt story is true is another matter). Meanwhile, Hauser was able to get into April's Popular Electronics (PE was the offender in the R. Americas Libre case)(article printed in PE-jz) a discussion of future clandestine relays on the Moon (which sounds far fetched but isn't). Also, in PE's 1977 Communications Handbook Hauser even dared to suggest that CCB DXers might be interested in another nation's "character and concerns", which I take to mean something beside heard and QSL totals. There's still no telling what really lies ahead, but the rest of 1977 should be very interesting.

Hi, I haven't reported in quite a while, so here's an intro. I'm single and work at a local health food store. I collect and trade CMs, tapes of AM and FM stations, and tapes with just music. Anybody who wants to trade, please write. Gene Autry is buying WCAR and will drop NIS and switch to MoR. WCAR covers much of southern Michigan from Midland down to Battle Creek. Then it nulls toward Toledo (for KMOX?), and then has a small lobe toward Marion, OH. WCAR also has another null for WRVA-1140, so covers only NW Ohio. WCAR covers Ontario to just halfway between London and Kitchener. At night, WCAR covers only the thumb as it beams north. It only makes it south to about Monroe, MI. CBFF-540 is all FF and covers the thumb from just east of Flint to Bad Axe, then over into Canada to just west of Toronto. CBFF also covers NW Ohio with null toward Ann Arbor. (Night coverage is about the same.) 73 and more on locals next time.

This isn't a Musing (oops, did I say that?,hi!) (I see ERC has got you well trained, hi-Rth) Forum as such, but a follow-up to my Forum on the trip from OR to CA (pg 342, 09 Apr 77). After your comments, Rth, I tore the place apart looking for a CA map (not too many gas stations around here are that well stocked...or travel agents) (what, no travel agents, how rude!,hi-Rth) and finally located one. Going up, we picked I-5 to Weed, then US 97 to Klamath Falls. The return was via OR 140 to intersection of 39 to Merrill, OR where we headed towards Tulelake. Continued to the intersection of State 139 to Canby and on to Adin (SW of Canby) via State 299. This was to Burney and so forth. Now, looking back, a 75 mi/120 km area straight (though easily 100/160 via roads) was the area covered. However, the area around there is forest and basin type w/surrounding mountains which block incoming signals apparently. Have you ever been to Don Johnson's QTH at Elsinore CA? Much like that, but o/a greater area and with trees. (Sorry Mike, there is a tree in Elsinore, at Johnson's place, hi-Rth). To be quite honest, I hope no one ever builds a radio station in the area. Besides, the poor prospects for advertising, the area must be one fantastic area at night...for DX that is, hi. If you ever get a chance to go that way, you'll find it desolate w/high prices, but beautiful in its own way. Another area of interest is where my Aunt, Uncle & cousins live; Middletown, CA. It's a fairly small town in Lake County (about a 2 hr drive from SF-North-Rth). As far as quietness goes, it's really quiet for DX purposes. On our trip, we stayed up there a few days and one

night I strung 15' of wire out the window (second story) and attached it to the SPR4. The SWBC was a live like is never had been in Modesto & San Diego. While I checked out SWBC only that night, I logged 3 Peruvians....previously I hadn't logged any with a positive ID....except at Grant Manning's in Poway. That's another area I'll be checking out on return stateside in approx. 779 days, but then who's counting? About all, I just wanted to clear up a couple of things. (I can vouch for Lake Co on BCB. Slightly less than fabulous, just beyond groundwave from SF Bay area and Sacramento-RtH).

 Greetings from 50% of the IRCA MN delegation. Checking thru the membership list in the anniversary issue, I noted only 2 members in MN (virgin territory for IRCA recruiters, hi). Always get a big kick out of Randy Tomer's DU catches, etc. Keep up the good work, Randy. I probably wouldn't know an Aussie if I hrd one. Still trying for KDWB St. Paul. They must chop their signal off around Kellogg Av in St. Paul because it sure never gets up here, and speaking of directional antennas, Thunder Bay has 3 AM stns. GYer CFFA is hrd very well at 1kw daytime, 200 km away. CKPR @ 5kw is also very good. On the other hand, CBQ @ 10kw is nearly non-existent here. For those CA members that are interested, the following CA stations have been hrd at this QTH at one time or another. KMWJ 580 Fresno, KFI 640 L.A., KNBR 680 S.F., KCBS 740 S.F., KTNQ 1020 & KNX 1070 L.A., KFBK 1530 Sacramento, KKHI 1550 S.F., & KPMC 1560 in Bakersfield. The following NV stns have been hrd here:

 My apologies to all for a short section this time around. I've already discussed it w/our Editor in Chief and for all those who submitted a Forum while I'm away, and then another one for the next deadline, I'll hook the 2 Forums together. No more trips for me until vacation time next Fall. My agency gives me 3 trips a year, but because of length (10 days) and the cost, this counts as trips 2 & 3. We are Greek owned and have a huge Greek clientele, so it was in the interest that I should take this trip. And if the airlines are on time, no time to visit at JFK like I did last Fall. Next time gang. I've also reverted back to the nylon ribbon, carbon just died on me. Twisted the ole dials last MM, 04/18, 1906 Earthquake anniversary, and nothing noted that was earth shaking, oooooo, sorry 'bout that. However, on SM 04/17, noted Oriental on 1570 @ 0812, not CC, possibly KK, and almost like a drama type show, if not that, a Christian type drama. Maybe I'm way off, but that's what it sounded like. HLDA maybe? Anybody know? Somebody who was suppose to be on wasn't, and returned abruptly in the middle of a song @ 0822. Also, earlier noted JJ on 1190 way u/KEX around 0745, quien es? Also, who would be doing classical mx way u/KRGO around 0826? And don't nobody get cute and say KKHI, hi. CBE? Been a long time since I hrd them. Also noted KIKI = w/WCCO, KHVH = w/WHO on 04/18 @ 0302-0310. It might be my imagination, but I thought I heard a het on the low side of 1530 on 04/17 around 0825. Not too sure on that one, was just scanning the 1500's slowly and of course, KFBK was rather strong. For those interested, I have now completed a list of all daytime DX from this QTH, along w/XR QTHs (where known) and distance in mi & km from this QTH and Civic Centre. I have found Coast & Geodetic Survey maps to be quite helpful for XR hunting. Most libraries in major cities carry a complete line of these maps. Oh yes, RtH is also a map freak. Anyway, this list is available for a SASE. Gotta run, leaving here in 20 hrs (now 1200 PST on 04/23), and hope all remembered to set their clocks ahead, unless of course you live in AZ, HI, MI, and parts of other states & provinces, hi. See you all in 3 weeks. Good DX to all from RtH-73..

BCB Radio information gathered from recent issues of Billboard and Broadcasting magazines, as well as other places. (credit is always given, in one form or another)

#1: As a follow-up, WBAI-FM, NYC, is on the air again, as of 4/1.
 #2: In the 4/4 issue of Broadcasting, an article says that the Daytime Broadcasters Assoc. is upset with "the time restrictions on daytime stations and a current docket at the FCC that would permit 50kw clear-channel stns to operate with as much as 1 million watts." Quickies: WSVU, Peterborough, NH has switched "to a more-expanded low-key progressive format," per the 4/2 BB. Also, WGAL, Lancaster, PA, has changed calls to WDDL and continues programming uptempo MOR mx... WPOP, Hartford, CT, has gone from NNIS to CBS Net, and is still all-nx.

Recent BCB info gathered from various
 sources. This week: "Variety" magazine.
 (credit is always given)

From the 4/13/77 issue of "Variety"
 "KQV Pittsburgh, all-nx AM owned by
 Taft Broadcasting, has joined CBS Radio
 as a fulltime affiliate.

With the addition of the 24-hr. KQV,
 the CBS Radio net now services 13 all-nx
 stns - WTOP Washington, WPOP Hartford, CT,
 KLVG Omaha, NE, KFBK Sacramento, CA, WSTV
 Steubenville, OH, KHVH Honolulu, and the
 six CBS o&o news stns in New York (WCBS),
 San Francisco (KCBS), Los Angeles (KNX),
 Chicago (WBBM), Philadelphia (WCAU), and
 Boston (WEEI). A 14th all-news, WINZ
 Miami, FL, will join the list on June 4."

"WTGR Myrtle Beach, SC, has become an
 affiliate of the NBC Radio Network."
 "(Toronto, 4/12) Canada's all-nx nat'l
 radio network is gearing up for its sched-
 uled 7/1 bow. Frank Goerg...has been hired
 to help organize the 24-hr radio service.
 Initially, Toronto and Ottawa will be on
 the air, with Calgary, Vancouver, and Ed-
 monton next in line.

The radio web is privately owned & op-
 erated, and will be the first of its
 kind in Canada."

Still waiting to get lots of information
 from you programming nuts out there. 73.

What Is a DX CLUB?

From the Sept. 1937 RADEX

By "POOKY"

There aren't many members of any DX club who know how the darn thing runs. To most members, headquarters is a postal address and the officers of the club are names. They know that the thing does run, because they receive their bulletins on time. But only the men who put out those bulletins, and answer letters and run contests and keep ledgers and cut mimeograph stencils and arrange specials and buy stamps, know what a DX club really is.

This issue of RADEX is dedicated to the Universal DX Club, whose chief officer is Alfred J. Stansfield, whose headquarters are at 345 Maple Ave., Oradell, N. J. It's not the oldest DX club in the country, nor quite the largest, nor, perhaps, the best, but DX'ers should be proud to call it representative.

And if you'd like to know what a DX club really is, accept our invitation and travel in your imagination to the headquarters of this club and see with your own eyes how the thing runs. You may be disillusioned, but that's all right. The background of a club is more interesting than any false front.

Suppose you turn back the clock and time your visit to a night last winter, in the height of the DX season. Make it a night near the middle or the end of the month, just before the club's twice-monthly bulletin comes out. And make it some ungodly hour of the morning.

Oradell is a village of only 3000 souls, and you won't have much trouble finding Maple Avenue. All the houses along the street are dark—it's a respectable village—but you know that there must be DX'ers somewhere about. And at last you see the light in 345, a light streaming out over the snow, from the prominent window of a modest white frame house.

You know you're welcome, so tip-toe around to the back and go down cellar. Over to the left, under a bulb suspended from the ceiling, there's a small printing press, for this club prints all its own stationery at true cost. Beside it, there's a mimeograph machine. There seems to be no one about at the moment. The lady of the house would have fits if she could see the light burning.

But there's the sound of typing at the far end of the cellar, behind that door. Go over to it. What was that that slapped you in the face? Well, that was the laundry that has been hung in front of the furnace to dry.

Open the door, and there you are! Yes, this is the center of the world for the members of the Universal DX Club, this small, crowded, smoke-filled room under a bay window. The members have heard about the catches of those two radios in the corner. Their letters to headquarters have been answered on those two typewriters. Their dollars to complete membership in this club costs only a dollar a year; are in that box on that ledger. Their hobby is in the hands of those four tired, perspiring, worried men.

Last winter you would have found Allan Hoppenstedt there, the man of the house, aged 24, by day a member of an exporting firm in New York City, by night the Contest Editor of the bulletin. You would have found his brother Elbert there, aged 21, a clerk in a bookstore, and Managing Editor of the bulletin. You would have found Dave Owen there, aged 24, a writer and general cut-up, then BCB Editor of the bulletin. And always you would have found Al Stansfield, as the President, as Editor-in-Chief, and as guiding force and spirit of the club.

Elbert is cutting the mimeograph stencil of the first page of the bulletin, which will appear under the printed Old English "Universal News," and the blue seal of the club. This club takes more than ordinary pains with its bulletin and this first page must be perfect. Elbert is sitting hunched over the typewriter with his shoes off, his face a mask of concentration, meticulously tapping out the lines with two fingers. This is the SW column he's doing, sent in to headquarters from out of town by the SW Editor garnered by him from members all over the world, checked and classified by him and made in-

to clear, worth-while reading. There will be three neat white pages of it—if Elbert holds out.

Dave is kneeling on the floor, rearranging his BCB column for the last time. He's typed out each item on a separate slip of paper and it's a deadly serious game with him to line up those slips on the floor to make the best reading. He has a tip on an 8-watt rig in Quebec. He has the explanation of a new Mexican that's been causing confusion. He has the complete schedule of all the Scandinavian stations, worked out by the Norwegian Representative. He has a list of four new Aussies, sent up from down under. There will be three blue pages of these, and FCC data, and scheduled DX programs, and puns,—if Dave can arrive at a really artistic arrangement.

"Hoppy," as Contest Editor, is sprawled on the sofa, writing furiously, muttering under his breath. There were four UDXC contests last season, designed for all kinds and stages of DX, and they were all a trial to "Hop." He's writing up the Singleton and Eliminator Contest now, for which the prize is a year's subscription to RADEX. He's finished his work on the new Universal BCB Contest, for which the prize is nothing less than a silver trophy. He has still to comment on the Junior BCB Contest, for which the prize is a bushel basket of early tomatoes sent postpaid from the farm of a member in Texas! And then he has to look over the Universal SW Contest—another silver trophy. There will be two yellow pages of contest material—if "Hop" can win his own contest with the heat from the furnace and the smoke from Elbert's cigar and the time on the wall.

And Al-Al is doing a dozen things at once, from deciding the future policy of the club to stamping envelopes. Mostly he's watching the time on the wall and worrying. This isn't an unusual night for him. He's seen dozens of bulletins born. But he can't help feeling, each time a new one goes into print, that he's entirely responsible for it. Now he's addressing envelopes to DX'ers who want to see a sample. Now he's writing an editorial and greetings to members, and comment on the doings of the DX world, that will appear on one white page, the last page—without an "if."

Elbert hits the wrong key and nearly swallows his cigar. "Hoppy" finishes the S & E Contest and wearily tosses it onto the desk. Al makes a dive for it. Dave bellows, picks up his scattered slips, and thoughtfully rearranges them again.

The "Universal News" will go out on time. Before the date changes some of the members will have it in their hands. Within a few days members from Newfoundland to Nicaragua will be reading it. Within a week a chap in France will be pouring over it with the aid of a dictionary. Within a month a fellow in New Zealand will be sitting down in the summer evening to enjoy it.

But not many will realize that there is, and must be, such a place as the basement of 345 Maple Ave., and such men as Stansfield and the Hoppenstedts. Not many will realize that somewhere, in some room devoted to DX, someone devoted to DX has lost his sleep and a little more of his hair, for their sake. Someone has to run a club.

Along about dawn the light in the basement will go out, and the four men will trudge off to bed, or to work. There'll be a smudge of mimeograph ink on a shirt in front of the furnace.

Yes, that's what a DX club is.

BOOM! BOOM! ALSO BANG!!

"Wonder Device" is the title over a picture in the *Pendulum* (N. Y. Eagle-News) of Jan. 12, of a bank of large vacuum tubes, which includes the following in the caption: "A circular bank of water-cooled POW-BER tubes. Maybe there is a component in the tubes to shoot the waves across the Atlantic. Wonder device is right!"
