To travel hopefully is better than to arrive. We read KMPC Los Angeles will switch to all sports in April. Does anyone know if KMPC will change their call letters? 73, John.

QUIPS / QUOTES / unID HELP

=====

FROM MIKE HARDESTER: (1/19) I DX'd last night but nothing
great noted. However, like last weekend, this AM (after sunrise) I
did note quite a few non-"locals" dominating frequencies normally
occupied by NC stations - some 10kw and 50kw adjacent state
stations, but still, on frequencies where I normally have AM
groundwave from NC. Interesting. Years ago, there was the
"theory" that soil salinity had an effect on reception cx and was,
for a while, discussed in DX bulletins and gradually the topic died.
I'm really curious about the salt content of the surrounding soil
(being a "few" miles from the Atlantic), and aside from my
location in San Marcos, CA., I would have to say this area has
provided me with rather good logs. Since we'll be living here
for the next "few" years, I should have an opportunity to see just
how good an area this is for reception.

FROM BILL HARDY: Karl Jeter's unID "Sports and Entertainment
Network" on 1530 in 11/23 EDXR w/KVEG-840 North Las Vegas
IDs is almost definitely KXTD in Wagoner, OK. KXTD is the only
1530 outlet listed in the SEN lists Larry Godwin and I recently
obtained from KVEG. KXTD is a relay for WWLS-640 in Moore,
OK, and KXOL-1320 is also on this mini-net; primary format is all
sports.

Hello members. I'm writing this at a local SCADS meeting on 18 Jan where the main subject is shortwave but all people interested in most bands are welcome. Jim Hilliker was in Anaheim to visit his family and called me on the 17th. Spoke to him today and invited him to the 1:30 PM meeting but he couldn't make it. I now apologize to Mike Sanburn for complaining he never comes to a club meeting in Bellflower where he lives. Well, surprise, he was there and displayed some copies of DXM for anyone interested. Several days ago after reading Steve Mittman's forum in #18, I called XEKAM and talked to GM Luis Alvarado who says new trans. is solid state and currently uses two towers putting out 18 kw 24 hours. Plans call to put the third tower at site in service later this year which will increase signal into L.A. area. Most programs are from Los Angeles studios fed by satellite to the trans near Rosarito Beach B.C. Currently I hear them much better than in past both at home and in car on that radio. Luis says mail should go to PO Box 6184, Glendale, CA 91205, not to Sunset Blvd address where they really are; said mail doesn't reach them addressed this way. Office phone is 213-962-9520 and for call-ins 800-540-9526 (translates 540-95 AM). I was planning to give Duncan Shaw a ride to SCADS today but he said he was going to visit a friend in San Luis Obispo. I said to dx and see whats happening on local radio scene. Thanks Jim H. for the call - maybe I can call you at KNRY or KOCN, sometime. Semi local fm KDVO (KRSO 590's FM) plans a format change from ezl to a yet unknown format on 1/31. Will be taping lots of the current music on cassettes. 73

First 1992 QSL was KRMG-740, heard 1/17. Unusual conditions here 1/24. CIAO-530 good to excellent over local Visitor Info. Station around 2100-2200 EST. The V.I.S. has been off some lately. CHIN-1540 in Arabic over KXEL after 2200. TWR-800 very good at 2200 with news in English. Radio Progresso-640 good to excellent as WGST faded in and out. Played Paula Abdoul at 2320. Before 2100 I had heard some very weak TIS activity on 1610. Came back at 2340 and found one under the Caribbean Beacon. Using the Sony 2010 Svne and a Select-A-Tenna I got it on LSB with an OM announcing "Illinois Dept. of Transportation" followed by a YL with road/weather conditions. It faded away but after midnight I heard Illinois DOT again, best on USB. This was an OM with winter weather drivers' advisory and driving tips. Gave a hot line phone number that began with 312. Chicago? Two different stations or the same with program change due to weather conditions? (As I recall, there is a TIS on the north side of Chicago on 1610--rce)

Karl J. Zuk, 154 Old Post Road North, Croton-on-Hudson, New York 10520

Digital radios have bit me in the leg again. During the commute home I got all excited at hearing a new beacon on 1610 kHz - "GKQ" near Ardsley and Dobbs Ferry, New York. I thought it was a part 15 low power experimenter on the air. Then I recalled "GKQ" is the call of the beacon at Newark Airport. WFAS, White Plains, New York is on 1230 kHz. 1230 + GKQ's frequency of 379 = 1609 kHz. Receiver products strike again! Hand me that 12AU6 please! 73s KZ.

Leonard Hyde, 1805 Whipple Drive, #26, Blacksburg, Virginia 24060

Messages: Steve Hawkins - I use 17 gauge electric fence wire for my Beverages. Not as conductive as copper, but works great for me. At *10.95 for 1/4 mile, who can complain? Use 1/2 mile to make up, hi. Also, if something happens to it, you're not out that much \$. To Mike Hardester: Great to see your report. The UNID SS you heard on 820 with time ticks & code is R. Relej, one of our East Coast super-pests. When Cx are good to Cuba, the dial seems covered by them. Gary Jackson - welcome to IRCA. I lived in Sacto. for 8 years in the Fruitridge-Freeport area, just a few miles from your QTH. Used to go to a field near Florin Road and Freeport Blvd. to stargaze. That field is covered with houses now. Your UNID SS on 830 might be Belize. They play Mexican mx at times, and I've heard them giving soccer results in SS w/frequent mentions of Costa Rica and Guatemala. By the way, does anyone else out there combine the hobbies of DXing and astronomy, as I do? Drop me a card - I'd like to hear from you. It does seem like a good DX season so far. Here in mid-January, good cx most nights to the deep south, and Cuba strangely subdued. (thankfully) 73 for now de LLH.

Rick Evans, 4841 South 26th Street, Milwaukee, Wisconsin 53221

One report not printed this week because it's strictly a travelogue, with nothing about BCB DXing or the club in it. As I type this, I've had my new '92 Ford Escort for 12 days. It's a digital radio in the car, and so far I've found it is nice to know exactly what frequency it's on--except a couple of times it's sounded like the radio isn't "quite" on the frequency. Probably most people would never have noticed it. One interesting thing on the radio is the seek button, where it will stop at the next strong station on the radio (either up or down, depending on how the button is pushed) and I've found that one of the stops is WOPA-1200 on the south side of Chicago. I never think of it really being strong here, hi. 73.

NOTES: 1) TRH: I believe this would be FRANK PRECIADO, who signed my verie a few years ago.

I've been sick just about all month (very rare for me), and I'm back on my 60-70 hour work weeks.... but I am getting caught up on my DX correspondence and various outstanding Almanac updater tasks. Keep those reports coming! 73, TRH
