PUBLISHER and EDITOR-in-CHIEF NEEDED: READ THIS ITEM VERY CAREFULLY.

It's been a while since we mentioned this, but the IRCA is still looking for a Publisher and Editor-in-Chief. Over the course of the last two years, I've had discussions with at least two different groups that expressed interest in the job... BUT nothing definitive was decided, and talks have dwindled to nil.

As you all know, Ralph has agreed to continue with 'DX Monitor' until a new Publisher was found, however... this cannot go on forever. Unless a serious person or group comes forward soon, I will be forced to start discussion with the IRCA Board of Directors about closing the club down next year, perhaps as early as April. New Publisher Options that could be considered include raising dues or cutting back on the number of bulletins per year. If you or your group is at all interested in the job, please contact me for details as soon as possible: Phil Bytheway, 9705 Mary NW, Seattle, WA 98117-2334.

IRCA Mexican Log, 3rd Edition, Now Available!

After months of preparation, IRCA has published the 1994 edition of the IRCA Mexican Log.

The log lists all AM stations in Mexico by frequency, giving call letters, state, city, day power, night power, slogans, schedule in UTC/GMT, formats, networks, and notes. Stations that have changed frequency since 1990 are cross-referenced on the old frequency.

The call letter index gives call, frequency, city and state. The city index (listed by state, then city) gives frequency, call, day and night power. There is even a guide to the Spanish alphabet and numbers.

The log has been completely updated from the 1990 edition and carefully cross-checked by IRCA members in Mexico and the U.S. This is an indispensable reference for anyone who hears Mexican radio stations.

The price, payable to IRCA in U.S. funds:

IRCA/NRC Member: \$6 U.S./Canada/Mexico/seamail, \$7 rest of the Americas airmail. \$7.50 Europe/Asia airmail, \$8 Australia/New Zealand airmail

Non-Member: \$8 U.S./Canada/Mexico/seamail, \$9 rest of the Americas airmail, \$9.50 Europe/Asia airmail. \$10 Australia/New Zealand airmail.

The following is a transcript of several e-mail messages which distracted me on the dates in question. As you can see, Don Moman has discovered yet another reception mode for TA's: "between noon and sunset in central Alberta". This is probably similar to what Brian Vernon and the northern Scandinavians have heard at this time of year, but it's interesting that the reception peters out once a darkness path is completed. Perhaps it's due to a weakened D-layer in the polar regions during the daytime, but the arrival of night with it the auroral zone (which is not present on the daylight side).

Here in Victoria, there was a het on 1314 on the evenings in question, but that was it.

Fri, 17 Nov 1995: "2230 UTC as I type this...lots of TA's include 1179 Sweden like a local! in EE! 1287 also strong....many others too."

"2357 UTC: things have faded a bit ...1458 huge with VoA Washington ID. At 2330.....1544 was strong in AA - Morocco....."

"Nothing much after sunset, but wonder how early it had opened...tune in to 1287 was at 2236 (!) and great audio then. First inkling was 4905 chinese with echo! Thought I had spur from our ethnic local on 1480 when I heard Arabic on 1544, but Morocco listed here....Who is the VOA on 1458? s/off at 2330, s/l directed to the former Yugoslav area. 1580 was French and very strong in passing at 2331."

Mon, 20 Nov 1995: "2120 UTC and lots of hets already, even some with audio - 1017 1098 1458 seemed the best bets as i quickly tuned thru...this seems awful early but I'm not complaining! back to it...."

"1458 should be VOA Kuwait 100kw...it's huge now (2220 utc) and 1494 Russia in EE also great right now. 1314 barely a het. Wonder makes 1458 so loud??"

Tue, 21 Nov 1995: "Just checked the band here at 1909 UTC, some decent hets already (or is it still, hi!) such as 1494 1413 1386 1314 1287 1215 1179 and 1107. I think 1179 might be close to trace of audio if 1180 didn't have a signal! Wonder what conditions will be like Dec 21 if they're quiet?"

"I'm finding the -20 degree 2700' wire doing better (less domestic splatter) today, later on the other days it seemed like the more normal European wire (about 1300 at 40 deg) did better. 1386 and 1314 nearly were producing audio near 1930. Somewhat down now (2047 UTC)."

I hope this gives the flavor of the immediacy that e-mail can give when an opening is occurring somewhere. This was comparable to the amateur radio contacts we sometimes have between Alberta and coastal DXpeditions. It's too bad that Don's loggings didn't lead to anything earth-shattering down here. Don can be reached at: ve6jy@freenet.edmonton.ab.ca or Box 127 Lamont, Alberta T0B 2R0.

[Connelly-MA]
- 1179 SPAIN // CANARY ISLANDS, SER synchros, NOV 26 0137 - rapid-fire SS news by man & woman; atop jumble w/ WHAM phased. [Connelly*H-MA]

1431 unID, NOV 24 0557 - het, bits of talk in slop. Probably too late for Ukraine, so Portugal is more likely. This is a tough channel because of 4 strong stations (MA / NJ / NY / ON) on 1430. [Connelly-MA]

690 ANGUILLA, Caribbean Beacon, The Valley, NOV 25 0710 - US EE preaching about the accomplishments of the ministry including "the first 24-hour religious radio station". [Connelly*H-MA]

690 CUBA, NOV 26 0502 - audio pulled on the infamous "raspy buzz" station. It was a Progreso program of lively Cuban music // 640 & 740. CBF was nulled at the time; because the RTL-2 loop was used (instead of the wires), Anguilla QRM was also substantially weakened. [Connelly*H-MA]

700 JAMAICA, JBC R. 1, Montego Bay, NOV 26 0502 - JBC Radio One ID, Carib-EE talk about football coverage. Over several SS Latin Americans w/ WLW nulled. [Connelly*H-MA]

705 unID (ST. VINCENT ?), NOV 25 0630 - definite open carrier here: this is probably St. Vincent (despite reports of a possible move to 700). Many Caribbean stations run overnight open carrier after end of regular schedule. [Connelly*H-MA]

860 BRAZIL, R. CBN, ZYJ459, Rio de Janeiro, NOV 26 0635, PP sportstalk (futebol, Sao Paulo mentioned), atop the channel at times w/ the loop oriented SE/NW. CJBC was off at the time. Cuba and some other Latins came in when the loop was swung around to SW/NE. The Brazilian dropped out for a bit and then surged up again at 0646. CJBC started testing at 0650 and wiped out the other co-channel signals. When CJBC goes off, 860 can be a "shooting gallery" for interesting Latin American DX. [Connelly*H-MA]

1280 BERMUDA (t), VSB2, Hamilton, NOV 3 0300 (and after) - this was undoubtedly the US-accented religious station that I noted several times o/u WADO during mildly auroral conditions when I was at Tom Beaton's house in Manchester, MA. I had dismissed this as a southern USA domestic until I saw Dave Yocis's log of it. (Thanks Dave.) I was searching (unsuccessfully) for Tupi 1280 (Brazil) after having heard Fortaleza on 1200. [Connelly-MA]

1610 ANGUILLA, Caribbean Beacon, The Valley, NOV 25 0038 - soul religious vocal; mixing with Bar Harbor, ME and Albany, NY TIS stations. [Connelly*H-MA]

If you are considering entering the contests, time is getting short. New contestants must enter by December 31st. I am sorry for the confusion on the Domestic Contest bonus points, the "C" leading off Canadian calls does not count. This is only fair for those who live too far south to receive many Canadian stations. Letters repeated in a call do count, that is KAAA would contain 15 bonus points. Not many have entered the Foreign Contest this year. This could be your chance to win if you are not an avid DXer of foreign stations.

25 YEARS AGO

December 5, 1970 issue of IRCA's "DX Monitor"....Don Erickson of Riverside, CA commented on the slowness of mail service. Four days for mail to get to Riverside from Los Angeles....Rick Evans of Gary, IN added two new countries with veries from PJB and 4VEF....Jim Boyd of Tulsa, OK logged ZVBI-780...Lynn D. Brooks of Ponca City, OK found it difficult to find elusive foreign stations without the help of past issue's DXWW columns.

OPEN MIKE

The only thing funnier than how things don't work out, is how they do. Shawn said rain and snow have kept him and Wayne from going to Valhalla, but they have plans on a DX'pedition soon. Dale Park mentioned one of Randy Stewart's recent loggings, WODT-1280. Dale says WODT uses the slogan "Who Dat?" Here it is December already! Time to make out those lists for Santa. New receivers, loops, filters, etc. 73, John.

SPECIAL INTEREST

Wayne Heinen sends along a couple of notes from DXM-11/17.. WTYN 1160 is simo w/ WKJV (which is the calls I heard...WTYN has changed to WKJT...That might get a bit confusing.

Also WIS Columbia SC is actually WISW, altho they ID as WIS, except at TOH... WWNN in Pompano Beach, Florida also does the same thing, They ID as WNN..

1630 pirate I understand from David Gasque that a couple of Ham operators have tracked this one to a home in St. Pete. The operator told them he had a right to operate via the constitution (or some such nonsense) I have not been able to track down any other info..Altho it was on again last night (11/23) The Chief Op at WKES (John Stortz) knows nothing about it and did not know if the station was going to call the FCC or not..(Gee, they have a field office in Tampa, all they have to do is turn on a radio)

1140 WRMQ Orlando..Had a long talk with the manager at WHKR 102.7 about Park Barton's reception of 11/2. It amazes me how little these management types know about Radio ! They say IMPOSSIBLE...There is no connection between WRMQ/WHKR...However I had a nice conversation with WRMQ about it. They were not aware of any problem, but the manager promised that the owner/CE would call me next week. WATCH THIS SACE for further developments !!!

DX TESTS

1190 WDSC NY, Cobelskill 11/20 0000-0030 NRC Test. Nothing heard for first 29 minutes, except IRCA member Leonard Hyde and an uniden DX'er in FL calling in to WOWO to let listeners know what the 'strange sounds' they might be hearing were. Then at 0030, during a WOWO talk segment heard weak code with calls & city. (JD-AL)

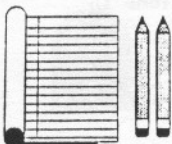

WDSC NY, Cobelskill 11/20 0000-0030 NRC Test, Weak, possible CW hrd at 0026 on SRIII..Frequency was mostly WOWO..first caller to WOWO in the tests first half hour was Leonard Hyde, former EDXR editor, who mentions the test (tho it was arranged by NRC and not IRCA as he said) and said he heard some CW--another caller, shortly after from FL (no it wasn't me, I was logging KQFN-ed) also said he hrd some CW. (LH-AL\$)

1240 WOON RI, Woonsocket 11/20 0100-0200. IRCA Test not heard (JD-AL)

WOON RI, Woonsocket 11/20 0100-0200. IRCA Test. Weak, possible CW hrd on SRIII at 0102. (LH-AL\$)=

1470 KLCL LA, Lake Charles 11/20 0330-0400, IRCA Test. Hrd several tentative code ID's (JD-AL)

I guess the only DX'ers in the East are in Florida and Alabama?? Only question here this week, is can I survive the Fla/Fl. State game Saturday !!..Will be on vacation all next week, so hopefully the DX time can pick up a bit..Hope you all had a GREAT Thanksgiving and took the time to remember what it was all about....see you in 7.....fresh

I recently marked the 75th anniversary of KDKA's famous broadcast on November 2, 1920 in Pittsburgh and enjoyed listening to their programming and tapes of old broadcasts. I was also struck by the thought that I've been ECB DXing for exactly one-third of the history of radio broadcasting. One of the things they mentioned on KDKA was that they were giving away pieces of their old transmitting tower, knocked down a year or two ago, encased in lucite, for a \$20 contribution to charity. I don't know if this is still available but it might make an interesting addition to your radio shack. I haven't written in a while so I'll introduce myself. I'm 39 years old, married to Donna, and am editor of a trade magazine in the metals field. I've been DXing for quite a while, as I already mentioned, and also enjoy shortwave DXing. Over the past two years I've spent much more time traveling than listening, either on trips for the magazine or on long, pointless car trips. It's fun to see some of the places that I may have heard 20 years earlier. This year along, I've taken car trips through Kansas, Colorado, northern Texas and Arkansas, southern California, Ohio and central Pennsylvania, and upstate New York. The only interesting radio-related activity was an intense E-skip opening on the afternoon of 7/1, while driving through northern and northwest Kansas on Rt. 36. I heard many Florida and Gulf Coast stations in the early afternoon, then east and south Texas in the late afternoon. I've only heard a few openings while traveling like this, once hearing a lot of Midwest FMers while driving through Eastern Wyoming in 1987. Last year's ECB highlights: Not many new loggings, but what was heard here was pretty good, like KDWN-720, heard during a WGN Sunday AM SP. Also new were WDAN-1490 (I think I only have three unheard Illinois stations); KERR-750, WVWI-1000 and St. Pierre et Miquelon-1375. 73.

R.C. Watts, 4109 Graf Drive, Louisville, Kentucky 40220-3016

Local WLOU-1350 now Interactive Christian Talk. New address is 2600 West Broadway, Suite 303, 40211. CID's from WSEZ-1560 test. Station not far away but a hard one for me to hear. The best catch was WQXY-1560 in Hazard, KY also testing and inadvertently put programming on the air. Said mine was not the only letter received about it! The H.A.R. in Lexington, KY is located at the I-64/75 split. It is used in conjunction with the cellular accessible Variable Message Signs (VMS). A VMS and 1610 kHz H.A.R. for northbound I-75 is located at Richmond, KY. The construction is called the Clays Ferry Bridge Project. It took three letters and almost four months to obtain this little bit of info! VIDs, CIDs and music from the WVAM-1430 test. A well done test. Had the other radio on WWCR-3315 with Rock the Universe and Ken's Country Classics. Good signal and good music I'd not heard before. Hope you all have a Happy Thanksgiving--Col. DX.

I can remember when Karl Forth was a teenager reporting to CDXR when I was editing it back in the early 1970s. Where does the time go?, hi. Have been putting in plenty of hours at work this month since the truck line I was working with merged with ANR Freight System, of Golden, CO, on 11/3. (It's now known as ANR Advance Transportation Co.) In the process, I almost wound up with a transfer to the Denver area, but they decided, almost at the last moment, to put the general offices here in Milwaukee and to shut down the offices out there. Seems we were doing

more work with less people than they were. Along with the 1900 to almost 0600 CLT work schedule comes a big desire to sleep so the radio and computer are rarely turned on at this point. I'm told that local WOKY-920 is now broadcasting old radio programs at 2100 CLT. I don't listen to them much at that time as I get a squeal on the signal, probably from a yard full of aluminum freight trailers and fluorescent lights. 73.

[11/13] Hello - On Nov 12, Santa Clarita had its first marathon starting a bit late at 7:20 am. The route went past studio of KBET-1220 which was airing live coverage via a cell phone w/mixer for two headsets. I went there to see the event and figured "Santa Clarita's only station" (as they promote themselves), would air coverage so, about 6:35 am, I tuned in near College of the Cyns and heard all of the commentary during the whole time while the leader was out. Listened both on a small portable as well as car radio. At finish area, KBET had mobile studio for later interviews. Spoke to ops mgr who told me KKZZ-1400 is also co-owned w/KBET and during this recent football season, they air a 2 hour call-in program heard on 3 am's - KBET (originates it), KKZZ and 610-KAVL (Prime Sports Radio). Marathon went well for first time. 690-XETRA is now 77,500 w. per mentions of it in sports columns here. Don't think it really sounds stronger here. 870 KIEV was off several mornings recently for tech. adjustments, per a call to local call-in line, where screener told me. 73.

[11/14] Greetings! I received my 1995 NRC Log around 10/31 and it's excellent, as always. Gilfer is now taking orders for the 1996 World Radio TV Handbook [WRTH] for \$19.95, incl. shipping; call 800-GILFER-1. Since my last report, I have heard two new Quebec catches. The first one was under unusual conditions that may never repeat. On 10/30, while the PQ referendum votes were being counted, I heard CJRC-1150 practically without interference. Usually that frequency is a madhouse of QRM from many closer stations, but this time CJRC's 5,000 watts went unchallenged most of the one hour-plus of reception. The other station was CBJ-1580, which I heard three nights in the same week around 2300 EST, much of the time with little QRM. (See DXR for details on both.) I am amazed how tough it normally is to hear stations like these, as well as NY and NJ catches, all of which are between 1,833 and 2,023 miles from Missoula. Likewise Alaska is very difficult; KCBF-820 with 50 kw. is 1,768 miles away. On the other hand, I hear several stations in Mexico City (2,070 miles) with powers of 10,000 to 50,000 watts on a regular basis. All three paths are 100% over land. Anyway, this is what makes DXing interesting. Good DX and 73.
