**DX Tests**

Please remember, what's listed as being on, say, Monday \*may\* be what you think of as Sunday night! Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

**Sunday, February 3, 2002** - WKDK-1240, Newberry, SC will conduct a DX test from 12:00-1:00am EST. Tones of 400 Hz and 1000 Hz as well as Morse code IDs will be broadcast. The station's regular format is AC - some DX music (marches) will be played. WKDK will be operating at 1000 W non-directional. For QSLs, a SASE is REQUIRED! QSLs will be sent on station letterhead with a refrigerator magnet, and a Newberry County calendar will be given away. Also, calls will be taken during the test at 1-800-749-WKDK (9535) - callers will be put on the air! Further, this station will send CW IDs every day during the month of February, 2002 at 6:04 am EST, immediately following ABC news.

Here's the result of the most recent DX test that has been received here:

**WRCS-970, Ahoskie, NC - tested Saturday, January 12, 2002 from 12:00-1:00 am EST:**

Bob Carter of WRCS has put together a web page of successful attempts at this test that have reached him...it's at <http://www.geocities.com/wrcs970am/dx.htm> - you'll get the best info on this test from there! Overall, the WRCS test was heard positively in 18 states/provinces and at sea, another 3 states/provinces were uncertain of the code they heard, and 4 states/provinces reported they tried for but didn't hear the test.

That's all for now...

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to a station, please remember to include return postage with your report...—**Lynn Hollerman** ([ircamember@geocities.com](mailto:ircamember@geocities.com))

**Web Sites for AM DX Stuff**

For a long time, **100,000watts.com** has been an excellent source of information on FM and TV in the United States; recently Chip Kelley has expanded the site to include AM stations. Call and format changes are highlighted prominently; this is where I learned of the KDBZ 620 change to KTLK. There's a new URL to go with the expansion, so look for this at <http://100kwatts.tmi.net/>.

By TOH, KEX was dominant and I heard a faint mumble underneath...then back to Gospel music. 2005, I phoned and worked my way though their automated input...when I was finally put on "hold" pending the "operator" the hold audio was the same as I was hearing in my headphones. I verified with the gal that they were indeed using their "on air" as hold audio, so I asked to be put on hold again, and verified once again the same music as was airing. I then verified that they were signing off at 2015, then hung up and back to the headphones. The Gospel music lasted until 1012. I have been hearing the music mixing with KEX for several weeks, so I was determined to get it this time! (pb-WA)

 KWSN SD, Sioux Falls 1/12 1814 basketball play by play of "Bulldogs" vs "Cougars" -- don't know if this was college or HS; time out called at 1819 "...here on Sports Radio KWSN," then a local spot. Fair for a while until other stuff started fading in at sunset. A new one here, SD #28. (JW-CO)
- 1240 KXLE WA, Ellensburg 1/10 1957 ads, ID as "Newstalk 1240 KXLE," weather, then ABC news. (NP-AB)
- 1250 KBRF MN, Fergus Falls 1/14 1929 out of talk and into ID at 1929:52 "Good Neighbor Radio serving western Minnesota and the eastern Dakotas, 1250 AM KBRF Fergus Falls," followed by CNN news. Fair. (JW-CO)
- 1260 KTTF MO, Springfield 1/12 1959 non-ID as "The place to be when you want (news?)...the News Station," 2000 AP news, at 2005 area news "From the award-winning KTTS 24-hour news center, here's what's happening." They apparently use KTTS as a "slogan" of sorts, although they have supposedly/"officially" changed to KTTF. This is probably my unID of Nov. 18. (JW-CO)
- 1280 KIT WA, Yakima 1/10 1956 ad for mattress store, ID as "Newstalk 1280 KIT." (NP-AB)
- 1290 KWFS TX, Wichita Falls 1/14 1945 Michael Reagan show, at 1955 guy says "Join us on your way home for all the news from News Center 3, live at 5 on Newstalk 1290 KWFS." Generally fair. (JW-CO)
- 1300 KKUB TX, Brownfield 1/15 2024 play-by-play of girls BKB, Lady Cubs vs ???; Brownfield ads; heard later at 2235 with another game, Mustangs vs ?? Game ended at 2240, followed by a long string of Brownfield ads, enough for a good report. Fair/poor mixing with KUBL and 2 Mexicans, all fair/poor. (JW-CO)
- 1360 KPXQ AZ, Glendale 1/11 1100 strong, ID'd with call letters only and made numerous references to Christian activities in the Phoenix area. (DG-CA)
- 1420 KITI WA, Chehalis 1/2 2050 solidly atop with slogan "Power Oldies." This is similar slogan as used by KSTN-1420. (DKK-CA)

- 1600 KVRI WA, Blaine 1/3 1045 "Radio Punjab" program in an Indian language, then ID at 1100 "This is KVRI 1600 Blaine" and disclaimer before going into "Radio India Broadcasting" program. New for me. (NP-AB)

Noted a "Radio Fiesta" slogan at 1015. This is exactly what KICN-1260 used to carry at this time. They supposedly have changed calls to KZNI, so apparently the Spanish format has gone to 1620. Good signal; no ID but KBLI usually dominates 1620 here during the post-sunset period. (JW-CO)
- 1670 WTDY WI, Madison 1/16 0344 sports talk into spot for local show "...Friday mornings from 8 to 10 on 1670, WTDY." (BB-ID)
- 1700 KBGG IA, Des Moines 1/16 0252 CNN radio format and repeated ID's as "AM seventeen Hundred" then finally ID as "AM Seventeen Hundred, KBGG." (BB-ID)

John sent in a correction from last week's column. His 1480 WTDY should have been WTOY. A nice turn out this week with 9 reporters! Note, 1/3 of the reporters are from Billings, Montana! A reminder to all reporters: Be sure to submit your loggings in the format you see above. Include frequency, call, state, city, date, reception conditions, and a brief description of items heard. Mention your name, location, and equipment. The subject line for all e-mail reports must say "CDXR Report" otherwise it could get tossed as junk mail or placed in a folder for something to look at when I have time. Hi Everyone

Hope you all had a good Holiday season. Here's the latest news on the foreign DX scene.

I've just updated the the Pacific Asian Log. This was the first update since it was issued last August. I've added central Russia and the Asian CIS countries to the log, so the PAL and the EMWG now have complete coverage of Asia and Europe. The country version is now sorted in country, frequency, location order, making it a bit easier to use. I've also incorporated several suggestions, and updated many of the listings. Special thanks to Miller Liu for a major update to the Taiwan listings.

The Log is available for free from the TPDX website: [www.qsl.net/n7ecj](http://www.qsl.net/n7ecj). You can download the log in Frequency or Country order. It now has over 3500 listings.

As always, your comments are most welcome, as are any additions or corrections to the list. I'm especially interested in the new Russia/CIS listings, since I'm not too familiar with the MW scene in that part of the world, and information is hard to find. Information on China would likewise be very welcome.

I've also added more material to the TPD website in recent weeks, including more links, logs from the November Grayland DXpedition, and several more audio files (including the final signoff for KAIM-870).

The 2002 *World Radio TV Handbook* is out. Recent editions have been highly criticized because of outdated, missing, or incorrect material. From what I've heard, they took it to heart and made some major improvements to the 2002 edition. It's available from amazon.com, plus the usual hobby oriented dealers.

## TRANS-ATLANTIC

**ALGERIA:** Noted here evenings in French on 252 kHz LW. They used to carry the international service 1900-2100 in Spanish and English but now is just carrying the French Channel 3. The international service broadcasts, both longwave and shortwave. are still listed on the station website but have not been heard for some time (Mike Barraclough, Jan World DX Club Contact via DXLD)

**AUSTRIA:** After 2100 hours 1476 relays Radio Africa International. Operating hours 1700-2308. (Whitt, MWC)

**EGYPT:** 1593 Matruh observed ending local programming at 2000 and seemingly taking a break (up to 60 seconds) to switch transmitters or antenna. After 2000 signal from Cairo was different strength and audio more muffled. (Whitt, MWC)

**ICELAND:** American Navy station on 1530 definitely has regular local breaks in its network programs (NPR). Heard with local public service announcements, event information and "Radio Newslines Keflavik". (Whitt, MWC)

**IRELAND:** From The Irish Times 29 Dec 2001: Calls for de Valera to prevent sale of radio mast, By Joe Humphreys The Minister for Arts, Heritage, Gaeltacht and the Islands, Ms de Valera, has been urged to prevent the sale of Ireland's only long-wave radio transmitter to an overseas commercial interest. In a last-ditch effort to stop the deal, Mr Enda O'Kane, a former RTÉ employee who has been campaigning on the issue for several months, has appealed to the Minister to ensure the transmitter is protected as a national asset. Located in Summerhill, Co Meath, the facility is currently used by the radio station Atlantic 252, which mainly broadcasts popular music to the UK and Ireland. Earlier this month, Radio Tara Ltd, which owns the station, sold 80 per cent of its interest for £2 million to TEAMtalk Media Group, which plans to use the transmitter to broadcast a 24-hour sports radio station to the UK. Mr O'Kane said the transmitter was currently being "misused" by broadcasting wall-to-wall pop music. But this was no reason to allow it be sold to a commercial interest with no public service broadcasting dimension, he said. RTÉ, which owns 20 per cent of Atlantic 252, along with the licence for broadcasting on the transmitter, sanctioned the sale two weeks ago. Mr O'Kane said, however, he believed the Minister had the power to prevent the deal going through. He said the transmitter could be used for a "national emergency channel" that could be utilised in the case of a nuclear emergency as part of the national nuclear emergency plan. It could also be used for all-Ireland programming in accordance with the aspirations of the Belfast Agreement. "There is an important north-south dimension. This is the only long-wave facility on the island of Ireland. It should be used for native programming," he said. Supporting the campaign for the retention of the transmitter is the former taoiseach, Mr John Bruton, who said it should be used "to rebroadcast to Britain a mix of Irish programmes output from northern and southern stations, both commercial and public." A spokesperson for Ms de Valera was unavailable for comment last night. (via Mike Terry, BDXC-UK via DXLD)

**ISLE OF MAN [non]:** I read a report that said that Paul Rusling proposed the antenna structure to be unmanned. This seems very brave to leave an expensive 500 kW transmitter five miles offshore with little or no protection. If a fault happened in bad weather, how long would it take get spare parts there and work on site without catering and other facilities?

Presumably the power would not be generated on site but use a high voltage cable buried beneath the sea bed to prevent ships anchors ripping it up. To me it seems one hell of an expensive way of getting on air, only to be undercut by stations that do not have such high overheads. The Dutch project Delta/The Lounge seems to have foundered with escalating costs and diminishing advertising expectations. My thoughts... (Andy Cadier, BDXC-UK via DXLD)

**LIBYA:** 1251 Voice of Africa has English news (followed by French) at 2030 and 2330; start time & duration vary but it lasts about 10 minutes

**MOROCCO:** 711.05 RTM has local program in Arabic with news from 2225 and local ID as ..."Maghribiyya Laayoune" (Whitt, MWC)

**NETHERLANDS:** "Q the Beat" stopped broadcasting on 1224 Dec 10. They hope to get FM frequencies next year. Nobody was listening to the mediumwave programmes with R and B and House music aimed at a young public, in Holland young people only listen to FM. (René van Hoof, the Netherlands, HCDX)

**NORWAY:** Radio Norway is presently broadcasting this message: "The Foreign service closes by the end of this year, and from Jan. 1st we'll broadcast our home service program 'Always News' during daytime UT, and the NRK 1st program during nighttime UT, instead. Our Europe program on 1314 from Kvitsoy will continue as before. More info at info@nrk.no" (Erik Kjøie, Radio Denmark, Dec 22, DX LISTENING DIGEST) (This would contradict the report in the last DXWW2. Norway-1314 is the easiest European here on the west coast, so this is good news for us. bp)

**SPAIN:** I have just uploaded the new update of the Spanish MW stations list named "España en Onda Media" by Martín Estévez at: <http://www.aer-dx.org/listas/eaenom.htm> that includes 3 PDF files sorted by QRGs, networks and locations. (Pedro Sedano, Madrid, España, HCDX)

## TRANS PACIFIC

**AUSTRALIA:** 3AW and 3AK Melbourne have been hard to verify for some time. However the latest 'gen' is that QSL's are possible from 3AW through Peter Illis, 3AW technician, P.O. Box 369F Melbourne 3001. For 3AK write to Paul Taylor, 3AK, Level 1,432 St Kilda Road Melbourne 3001.(MW OZ)

The Australian Broadcasting Authority has announced that it will move 5CS 1044 to FM (105.9) and allow 5AU Port Augusta to simulcast on both 1242 and 1044. (ARDXC)

John Wright ([dxer@fl.net.au](mailto:dxer@fl.net.au)) has issued the following information on the activity of Radio Melbourne 1629 and others on that frequency. To quote a release dated 27 November to MW OZ: "The key station is in Melbourne and is known as Radio Melbourne 1629AM. It is part of the Radio Promos and Radio Salsa Australian Network operating 24 hours a day 7 days a week on 1629 with a 400 watt narrowband transmitter located in Williamstown.

Narrowband signifies a maximum bandwidth of 6 khz whereas in-band stations have up to 9 khz. Programming is largely in English apart from 0700 to 0800 in Vietnamese, and 0800-1000 with Spanish Music. (no wonder we think we're hearing a SS Yank on 1630-ED) Macedonian and Chinese are planned. The official call of the station is VMS 264. Other narrowcast stations on 1629 with 400 watts and under the Rete Italia banner are in Adelaide, Shepparton, and Brisbane, and Hospital Radio Network (100 watts) in Newcastle.

**CHINA:** Noted 2230 on Dec 20 a presumed NEW, high-powered CNR1 station on 1134. ID's in CC and EE ("China National Radio"), parallel with the other CNR1 stations like 1377, 1359, 981 etc. but even stronger (S9+5 on a non-amplified K9AY). (Bjarne Melde, Norway, HCDX)

**NEW ZEALAND:** A press announcement this week states National Radio will move into the 100-108 Mhz FM range at some time in the near future. We can expect simulcasting however for some time. (NZDXRL)

**RUSSIA:** Since 20 December, Vladivostok on 1557 is carrying a relay of R.Shanson from Moscow, ex Yevropa plyus Vladivostok. This relay is provided in cooperation with R. VBC

which has its own prgr via Vladivostok on 612 & Dalnegorsk on 936 kHz. Email: [info@radiovc.ru](mailto:info@radiovc.ru). (Bernd Trutenau, HCDX)

#### LATIN AMERICA

**COLOMBIA:** HJGD-940 Cali, R Calima, is being heard in Ecuador on second harmonic 1881.00 (Malm/Arctic)

**EL SALVADOR:** Radio María El Salvador, ex LV Panamericana began operation Aug 8 relaying programs from Radio María Guatemala. Has been carrying its own programs since Sept 15. Is 24 hr with 12 kw. (Catholic Radio Update via Arctic)

**ST KITTS:** Radio Paradise changed from 830 to 820 kHz late August or September, but I don't know when the actual shift took place. Please note that the name of the station is Radio Paradise and not TBN. TBN (Trinity Broadcasting Network) is only the name of an audio feed of a US TV-channel, which Radio Paradise carries at local nighttime. So TBN is the name of a program - not the whole radio station. The name of the radio station remains Radio Paradise. In order to hear Radio Paradise's own programming try at these times: M-F 11-19 UTC, Sat 11-21 UTC and Sun 11-22 UTC. The transmitter is at St. Kitts but the local offices and studios are on the island of Nevis. (Stig Hartvig Nielsen, Denmark, HCDX)

**VENEZUELA:** YVXG-820 is 25/10 kw. YVZO-1390 is 10kw (Catholic Radio Update via Arctic)

Anniversary deadline is 3/12

Rick Evans, 7415 Hearthstone Way, Indianapolis, Indiana 46227

A quick note: I saw the reference to Radio Locator on the front page of the 1/12 DXM and gave it a try. It's a keeper as far as I am concerned, and I made it a favorite place in my AOL file. I made a quick check of the 1430 Indy station to see if it was up to date and it is. It showed the new calls and the new web page. One can search by calls, freq or location, then click on an icon for further information on the station. There is also a way to pull up the coverage maps for the stations. One thing, tho. All one needs to use is [www.radio-locator.com](http://www.radio-locator.com). The rest of the reference given in the DXM isn't needed, and actually threw me into the unknown page screen. That's it for this week. 73.
