Publisher's Notes

Charlie Taylor is preparing the 2002 IRCA E-mail Directory. The directory does not list your postal address, just your name, city, state/province, country, your e-mail address and the URL for your web page, if you have one. If you wish to be included in the directory, contact him at [taylor@del.ibb.gov](mailto:taylor@del.ibb.gov).

Remember, we're weekly now, so your editors need your support. Send in your DX and Forums! We're looking forward to reading about your DX! -- RT

In This Issue:

Positions Vacant

Reprints Service needs a manager, as Steve Ratzlaff has resigned from the post; you keep a copy of all of IRCA's reprints articles and copy and mail them per request. The Sports Editor position is still open, although we have some NFL station lists in this issue; compile lists of stations carrying sports events and/or teams. For more information, contact Lee Freshwater at [ENGWTRS@aol.com](mailto:ENGWTRS@aol.com).

DX Tests are coming

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or email to the station personnel, and thank them for going to the trouble to run a test! Please remember, what's listed as being

on, say, Monday morning "may" be what you think of as Sunday night! (THE TIME OF THE TEST IS IN THE LOCAL TIME OF THE STATION)

Monday, October 21, 2002 - WLCR-1470, Louisville, KY (COL Shepherdsville, KY) will conduct a DX test from 3:00-4:00 am EDT. The station's regular programming is EWTN - their slogan is "Louisville's Catholic Radio". IDs will be played in both Morse code and voice 0 the IDs will use a 1 kHz tone at 5 wpm sent every 5 minutes. The station's power will be 750 W (not sure of pattern). Reception reports (with return postage) may be sent to:

Saturday, October 26, 2002 - KNOM-780, Nome, AK will conduct a DX test from 12:00am-1:00am Alaska Local Time (e.g. 4-5 am EDT). From Les Brown, who arranged the test: "We are currently planning to go from nighttime power (14 kW) up to 25 kW within a minute or

two after midnight on 10/26, a Saturday. As I won't be here, I'll set it up with a regular operator to make the change as soon as the station goes into AP network news. The news ends at 12:05 and is followed by lengthy weather forecasts for various Alaska regions, typically ending around 12:09. Programming will be Polish polkas from then until the next newscast at 1 AM with a clear ID between every programming item. We'll run our normal public service stuff (we are non-commercial) along with time and temperature checks. Morse ID's will be frequent." Also - Les mentions that the station will stay at 25 kW until 6 am Alaska Time. Reception reports (with return postage) may be sent to:

Hi everyone,

Another great week of DX. We have some great tips from **Steven Wiseblood and Eric Bueneman**.. Great to see some good Mexican DX. Report often. So away we go.

\*\*\*\*\*  
 800 XEDD MONTEMORELOS, NL, MEXICO FREQUENCY CHANGE! (ex 1560)

[9/12] Heard with news program to 1500 UTC then local program featuring "musica romantica/ranchera". "La Doble D" 1520 UTC man in SS with anmts, ads "La temperatura en Montemorelos es 23 grados, ID, 1522 "saludos" greetings to the listeners, "La Grande del noreste de Mexico, X-E-D-D 800 de Montemorelos, Nuevo Leon, con Sonido Estereo." They mentioned that they are audible in NL, COAH, ZAC, and TAM. First day on the air at full power! Power not mentioned be estimated to be 150 KW. But depending on type of antenna, at least 50 KW.

XEDD AM DOBLE A MONTEMORELOS 800.0 kHz 01826

TELEFONOS EN EL ESTUDIO: 3435898, 3435998.

I'll keep listening until I get the power. (SW-TX) *(This is great. I wonder if they protect XEROK? Did you hear XEROK at the time? PM)*

[9/14] XEDD 800 Montemorelos, Nuevo Leon; power given as "10 mil watts" (10kW), so its not a HIGH POWER outlet as I had thought, still it puts out a GREAT SIGNAL. (SW-TX)

#### DX WORLDWIDE - II

Editor: Bruce Portzer - 6546 19th Ave. NE - Seattle, WA 98115  
E-mail: [bportzer@attbi.com](mailto:bportzer@attbi.com)

I've recently updated the Pacific Asian Log and posted it on my web site.

As many of you know, the PAL is a comprehensive listing of medium wave stations in Asia and the Pacific basin. It lists over 3600 stations in 59 countries, covering an area as far west as Afghanistan and as far east as Alaska. It's over 100 pages long and can be downloaded from <http://www.qsl.net/n7ecj> The website also includes audio files and logs of Trans-Pacific DX heard in the northwestern U.S.

This log is mainly an update to the January 2002 edition, with many changes and additions. I've also added a column to indicate inactive and drifting stations. As with previous editions, the log is available sorted by country or by frequency.

Thanks to everyone who commented on the previous editions. Your contributions are always welcome and appreciated.

#### TRANS ATLANTIC

**CYPRUS:** The Broadcasting Board of Governors (BBG) signed an agreement Thursday with the Government of Cyprus for a new transmitter that will give the Middle East Radio Network (MERN) broad reach in the region. MERN, known as Radio Sawa, will reach Egypt and areas of the Levant once the 600 kW transmitter is operational. The transmitter, located in southeastern Cyprus near Cape Greco, is expected to start carrying MERN in August 2002 on 981 kHz. Radio Sawa web: [www.radiosawa.com](http://www.radiosawa.com). (BBG press release 6 Jun 2002, via BBCM via DXLD, summarized by OA/Arctic)

**FRANCE:** 1062 The Paris transmitter that has broadcast DRM since the 1st of June, now transmits a program with Chinese sounding songs on 1062 kHz (Max van Arnhem, The Netherlands, MWC via BDXC-UK via DXLD)  
A couple of months ago it was suggested that Littoral AM might soon broadcast from the TdF site at Thourie. They will not. They will use another transmitter "somewhere in central Brittany", as a spokesman for the station put it. The power will be 30 to 50 kW into a 75m high quarterwave aerial. A 12 kW spare transmitter will also be installed. Most of the groups who have applied for AM licenses look into getting their own facilities rather than hiring air time on TdF sites. TdF is too expensive. Littoral AM would have to part with 686 Euros a year to broadcast via Thourie!!! (Various sources, mostly Thierry Vignaud, via Rglobe-L via Remy Friess, MWC e-mail news 1.8.2002)

**GEORGIA:** The grave economic situation, and the continuing energy crisis, also affect broadcasting. The LW transmitter on 189 is too expensive to operate daily and it is now only used on special occasions requiring nationwide coverage such as every Monday at 0600 for the weekly address to the nation by President Edward Shevardnadze. On MW, Georgian Radio ("Sakartvelos Radio" in Georgian) now only uses 1215 regularly. This is a relatively low-power transmitter at Dusheti, just 40 km north of Tbilisi. Even in the capital it suffers from co-channel QRM from Sari, Iran in hours of darkness. However, this outlet is frequently off during power cuts, and this also applies to other transmitters. The Tbilisi

transmitter, listed for GR2 on 1044, is now used by R. Iveria which belongs to the Georgian Orthodox Church (Iveria is an ancient name for Georgia). The station is on the air 24 hours a day and mainly broadcasts religious, cultural and educational programs. Address: King Erekle Str. 1, 380005 Tbilisi (Maarten van Delft, July BDXC, via DXLD)

**GERMANY:** Yet another transmitter is now up with Megaradio: Since August 1st they are in Munich on 945. Power is just 1 kW, transmitter site the Blumenburgstraße telecom tower; the antenna consists merely on two wires hanging down from a platform of the tower. According to a posting in a bulletin report, this outlet is so poor that it is at night subject of co-channel interference even within Munich. (Kai Ludwig, 5 August 2002, via Arctic)  
AFN: I find that AFN carries at least 60 seconds of local info at 2239 UTC. Heard 873: ID as AFN Frankfurt & local info update 1107: info on local flea market, 1143: 2 stns - one with local traffic info then all back together for an oldies radio network show. (Steve Whitt via MWC e-mail news 10.7.2002)

**IRELAND:** 252 TeamTalk Radio went off the air in the afternoon of July 31st. What will happen to this frequency now is an open question. (Various sources)

**MAURITANIA:** 783 I don't know what might happened to R Mauritania's MF outlet of 783 kHz as reception vanished for quite some time. (Carlos Goncalves, BC-DX Jun 24, 2002)

**NETHERLANDS:** Just some news that I have noted over the last few days (read from various news sources, some of them mainstream so perhaps not completely accurate).

1) it appears that as per 1 September, all national FM-frequencies are definitely going to be changed, giving more commercial station national coverage, including Radio 1, Radio 10 and BNR. See <http://www.radio.nl/fmtv> and then the item for 15-03 for some maps.

2) in principle the transmitters on 675, 891, 1008 and 1395 will be switched off then as well and can be auctioned off again. This seems to be certain for Radio 1 (891 and 1008), the commercial stations have not published anything definite. (Wian Stienstra, July 20, 2002 via Bengt Ericson/Arctic)

Yet a new development in the frequency saga in the Netherlands. The FM situation I wrote to you about has been changed in retrospect by the Rotterdam Court - it wants all frequencies auctioned to be used from 1 February 2002 for an 8year period, to be announced before 16 September. You can guess what happened to 1224: it has been switched on again. The carrier is silent at the moment. Medium wave is never mentioned in such decisions of course, but apparently the environmental license for 1395 runs out on 1 September. You can see some more reactions here:

[http://www.radio.nl/home/medianieuws/001.zero\\_base/zerobase\\_nieuws/](http://www.radio.nl/home/medianieuws/001.zero_base/zerobase_nieuws/)

<http://www.omroep.nl/nos/nieuws/binnenland/2002/juli/240702/radiofreqs.html>

(Wian Stienstra, July 24, 2002 via Bengt Ericson/Arctic)

1008 The NOS have announced that as of 1 September 2002 they will switch off their MW transmitters of Radio 1 on 891 and 1008 kHz. It is curious though that 891 kHz is currently off air for maintenance, and after that will only be put on for a couple of weeks. (Herman Boel via MWC e-mail news 31.7.2002) (also see 1296 UK. bp)

**OMAN:** ITU coordination details of the new BBC MW transmitters in Oman are as follows: Location: A'Seela, G.C: 59E27 21N57. This is some 60 km south of the easternmost tip of Oman, near the town of Al Ashkarah (Ashkirah).

702 800 kW, main lobe 290 to 340 degrees day/night

1413 800 kW, main lobe 320 to 110 degrees day/night (ITU Website)

**RUSSIA:** 171 Bolshakovo was reactivated with 600 kW on 1st August carrying Radio Rossii 0100-2100. (Timofeyev, confirmed from monitoring)

It has now been confirmed by official sources that the 1116 kHz transmitter carrying the regional prgr of GTRK "Yantar" (Kaliningrad) is now at the Bolshakovo transmitting center.

The projected power is 75 kW, but the transmitter is run with half power so far. Earlier, 1116 was located in Kaliningrad city (30 kW). (Bernd Trutenau via MWDX 27.5.2002)  
In regard to rumors about a relay of a European classic rock station via Bolshakovo, a well informed source in Russia has confirmed that a nighttime project is under preparation for 1386 kHz, but no further details are available yet. Acc. to this source, the start could take place in about 2-3 months. (Bernd Trutenau via MWDX 27.5.2002)

**SPAIN:** A new update of Spanish MW Stations List was uploaded at:

<http://www.aer-dx.org/listas/eaenom.htm>

The list is compiled by Martín Estévez, [ee@aer-dx.org](mailto:ee@aer-dx.org), and edited by Pedro Sedano, [editor@aer-dx.org](mailto:editor@aer-dx.org); both are members of AER Asociación Española de Radioescucha (= Spanish Radiolisting Association) [www.aer-dx.org](http://www.aer-dx.org) The data of every station are: QRG, Name, Location, Network, kW, Observations (e.g., local broadcasts), Tx Location, QSL policy, Address, Tel. and Fax . There are 3 PDF files sorted by frequency, by location and by network and, forma now, a map which includes all Spanish MW stations in GIF format. Changes inside this update: New telephone numbers of many stations, New map in GIF format with all Spanish MW station (Pedro Sedano, Madrid, Spain)

**UNITED ARAB EMIRATES:** Asianet Radio to go 24 hrs on MW in the Gulf. Asianet Communications Ltd. has announced plans to commence 24 hour broadcasting in Malayalam to the Gulf region on 657, a frequency currently used by Radio of the UAE. Regional Manager of Asianet Global, Joseph Francis, said that from 1 November, the station - which has its main production facilities in India - will also have a live stream on the Internet. In addition there will be a weekly online program archive. (ardicdxclub, DX\_india, Jul 26)

**UNITED KINGDOM:** As of 1st August, Radio Nationaal (*see Netherlands. bp*) will only be broadcasting non-stop music on 1296 via Orfordness. The decision to go non-stop music was made by Radio Nationaal themselves. They were prepared to put money into their initiative

as long as that gave them a chance to get a nice FM-package. Now that there will be an auction (where money will be the decisive factor and not quality), they know they will never get an FM-package and are therefore no longer prepared to put money into their initiative. So, basically, Radio National is dead and will probably continue to broadcast on 1296 until their contract ends. (Herman Boel via MWC e-mail news 1.8.2002)

The new 18th edition of RADIO STATIONS IN THE UNITED KINGDOM (ISBN 0-9540223-0-0) is now available from the British DX Club. RADIO STATIONS IN THE UK is a comprehensive 56 page directory of medium wave and FM radio stations in the UK. It covers all BBC, independent, access and long-term restricted service broadcasters and is a must for anyone interested in UK domestic radio - either as a casual radio listener or specialized DXer. This edition again includes a free supplementary guide to radio stations in the Republic of Ireland. Features include:

- All stations listed by frequency as well as in A-Z order

- ≡≡ Frequencies cross-referenced to show parallel channels
- ≡≡ Transmitter sites and powers, postal and e-mail addresses, telephone and fax numbers.
- ≡≡ Full details of the new Access radio stations
- ≡≡ Comprehensive listing of Low Power AM and FM stations at hospitals, colleges, schools, sports grounds, prisons and army garrisons
- ≡≡ Irish supplement covers all RTE and independent stations
- ≡≡ RADIO STATIONS IN THE UK is available from BDXC's London HQ:
- ≡≡ British DX Club, 126 Bargery Road, Catford, London SE6 2LR, UK.

PRICE per copy: 3 pounds sterling, or 5 Euros / 5 US dollars, or 7 International Reply Coupons (All prices include postage. For airmail please add 2 Euros/2 dollars or 2 IRCs)

Recommended methods of payment:- UK Check / UK postal order payable to 'British DX Club'. - International Reply Coupons. - Cash in Euros or US dollars

## TRANS PACIFIC

**CHINA:** 693 Sha'anxi PBS News & General Channel: June 11, 1710 s/off.

1008 Nanjing PBS: June 13, 1605 s/off. ID as "Nanjing Xinwen Tai" (Nanjing News Station) at 1535 or "Nanjing Renmin Guangbo Diantai, Xinwen Pindao" (Nanjing PBS News Channel) at the end of the program.

1026 Beijing PBS Economic Broadcast: June 2-10 schedule 2130-1700 (Tues 1600).

1107 Jiaying PBS News Station: June 10, 1530 s/off.

1215 Zhongguo Huaxia zhi Sheng: 1430-1500 in Cantonese (exc. Sat).

1503.7 Fuyang Economic BS: June 15-21, 1112-1300v s/off. Very poor. (All above T. Gima)

1017 Baoding PBS Modern Life Channel (Shishang Shenghuo Pindao): Power is 10 kW per station. (A. Yamanaka) (All above items from ABI July issue via Y. Kato, via Arctic)

**PHILIPPINES:** It appears that the VOA is planning a major overhaul of one of their transmitter sites in the Philippines at the former Wallace Air Station, Poro Point, La Union province. In an advertisement in the June 18, 2002 issue of the Philippine Daily Inquirer, the IBB called out to interested parties to qualify themselves with the agency to perform demolition and construction work on the site, as well as the erection of a five-tower antenna array for a 1 MW medium-wave transmitter and related facilities. The value of the contract is expected to be in the \$1 million - \$5 million range. (Paul Santos, June 21, DXLD)

**SAMOA, AMERICAN:** WDJJ logged here this afternoon on 580 kHz with a spoken program in Samoan. Is this a permanent move from their assigned frequency of 585 kHz? Thanks to Glenn Hauser's 'dxld2114' for the tip. Interesting the reason given for being on 580 is that their American radios cannot tune the 9 kHz spacing. How long will this last?? Signal at good level here, better than a few nights ago. (Chris Martin, ARDXC via DXLD)

**TAIWAN:** 1359 Fenlin Tientai, ID unofficial station in the Kaohsiung area.

1485 Nantien Tientai, ID unofficial station.

1593 Chihsi chih Sheng is now 24h. (All above T. Gima in ABI July issue via Y. Kato)

## WESTERN HEMISPHERE

**BELIZE:** Belize may be tiny, but it knows how to say "no" to Washington. Belize has flatly rejected a U.S. proposal to convert a Voice of America relay station to beam US-operated R Marti signals toward Cuba. (Miami Herald via Kim Elliott & Artie Bigley 6/12 via DXLD)

**COSTA RICA:** 1260 TIHM Radio Emaus, San Vito de Coto Brus, 5 kW, 1100-0300.DG:Luis Paulino Cabrera Soto. Slogan: "Oasis de Paz en el dial". 1430 CMJY R. Amanecer, Primero de Enero, Ciego de Avila, new part-timer to R. Surco (Novello-Exuma, Southern Bahamas, Dexplorer via RNM, May 2002, via Arctic)

**GREENLAND:** KNR (Kalaallit Nunaata Radioa): For some 10 yrs. the authorities have been considering closing down the current five 5-10 kw xmtrs; indications are that very few listen to the MW xmtrs, as all inhabited areas are now covered with FM and because audio quality is poor on most of the xmtrs (they utilize the same very narrow bandwidth of 4.5 kHz as in Denmark). Besides, electricity is very expensive. (Stig Hartvig Nielsen-DEN, DXLD)

**NETHERLANDS ANTILLES:** 800 PJB Trans World Radio are now 50 kW NDA days and 100 kW directional nights. Web: <http://www.gospelcom.net/twr/broadcasts/bonaire.htm> (Ron Gitschier, NRC-AM via DXLD)
