(Make checks out to **Phil Bytheway** - funds not made out to **Phil Bytheway** will be returned)... or use PayPal to: **fokker_d8@yahoo.com** (please include an extra \$0.50 to cover the service charge).

2006 WRTH

The new World Radio TV Handbook 2006 (WRTH) should be shipping from Amazon.com any time. If you haven't pre-ordered yours yet, please do it through this link:

<http://www.amazon.com/exec/obidos/ASIN/0823059367/hardcoredxcom/>

It's only \$19.77 at Amazon.com (save \$10.18 off the regular price). I don't think you will find better deal from anywhere else. By doing this, you will also support Hard-Core-DX and keeping this email list and web site going for another 10 years.

And while you're at it... if you also order Passport for the World Band Radio (or anything else that brings your order > \$25), you will be eligible for the free shipping.

73! Risto, W6RK

It's always a nice treat to see multiple DX tests listed in these posts. Thanks to the efforts of Patrick Martin, we've got a rare West Coast X-Band test to announce! See details below. Happy Holidays and Good DX!

WNAR 1620 KHZ Lansdale, PA is still conducting a DAILY DX TEST at 0300 ELT. The test consists of code ID's between 0300 and 0305 and will continue until further notice. Reception reports with RETURN POSTAGE can be sent to **David McCrork**, WNAR-AM, Box 18, Tylersport PA 18971-0018. WNAR operates with a power of 100 MILLIWATTS! (The station was heard almost 5 miles from Lansdale on a recent trip to the area so it does get out very well).

PS: Web page at www.wnar-am.com has full station info.

WAPI 1070khz Birmingham, AL DX Test / WJOX 690khz Birmingham, AL DX Test. Date(s): December 27-29, 05. Time: Midnight CST-0300 CST (0600-0900 UTC). :60 Second long tests in duration. "Inventory Insert" format. Modes of Operation: Night Power/Patten. Programming: Morse Code ID's, Sweep Tones, Voice ID.

Notes:

Both WAPI and WJOX will air one insert at the TOH. :59 minutes fixed. Both stations will air a 2nd sixty second long test each hour according to the schedule below: WAPI's 2nd test will come at :30 past the hour, each hour between midnight and 3AM. WJOX's 2nd test will "float" between :19 after and :34 minutes each hour between midnight and 3AM, depending on programming.

Reception reports are desired via e-mail (first choice) and snail mail (only if e-mail is not available) Station would prefer to receive recordings of the test (MP3, CD, or cassette). Submit reports to: les@highnoonfilm.com. Please put "WAPI/WJOX DX Test" in the subject line.

All standard mail reports should go to:

Les Rayburn

High Noon Film
100 Centerview Drive Suite 111
Birmingham, AL 35216

Thanks to Frank Giardina and the staffs of WAPI/WJOX for arranging this test!

Some follow up information on the upcoming DX Test, quoted directly from the station staff:

The first will run on December 27th (Tuesday Morning) at 12:59 AM CST with the last at 2:59 AM CST. This will be repeated on Wednesday December 28th and Thursday, December 29th.

Note: This applies to WAPI only in regards to the "second test" on each night. WJOX has a floating format, meaning the local break comes between :19 and :34 minutes past the hour. Test starts late on Monday night-Tuesday morning.

As indicated in the original posting, I'll be handling QSL requests (for the test only) for the station(s). Verification will require a recording in almost all cases. With the test being on sixty seconds in length, I think it will be nearly impossible to verify reception based solely on a description and timing.

E-mail is my first choice, with snail mail a very distant second. Expect for it to takes months to receive a snail mail verification. We will produce a .JPEG file suitable for printing that will be e-mailed to all correct reporters. Mark Subject line: WAPI/WJOX RECEPTION REPORT

On January 8th, 2006, **CHWO/AM740 in Toronto** will be celebrating its 5th anniversary on the air. Although the station has been on the air since 1956, it moved to 740 in 2001 providing with a much larger signal and audience. In all of those years, it has remained a family run station and the adult standards format has never changed.

The Ontario DX Association has been the QSL manager for the station since it's move and has received more than 330 reception reports from as far as Finland, Jamaica, Washington State and all points in-between.

Once again, the ODXA and CHWO will be presenting a special QSL for January 8th, 2006.

Here are the details: Date: January 8, 2006, Time: 0000 TUC to 2359 UTC

When reporting, please include: program material (at least 10 minutes of specific program material heard: i.e., name of announcer, commercials heard, news items etc.), signal/sound report (a general overview of how well you heard the signal at your location and the sound quality of the program), the type of equipment and antenna you were using to hear the signal and your mailing address.

If you have any further questions, please email me at am740@rogers.com.

All the best this holiday season and a very prosperous new year from CHWO AM740 and the ODXA.

KAVT 1680khz Fresno, CA DX Test. Date(s): January 21, 2006 (Late Friday night-Early Sat. Morning) Time: Midnight PST-0500 PST (0800-1300 UTC)

Modes of Operation: 10KW ND

Programming: Normal Radio Disney Format ONLY. No codes, tones, etc. are permitted due to the stations contract with Disney.

Notes: Listeners are cautioned that WDSS, Ada MI also runs the Radio Disney Format. So ID's, local spots, etc will be needed for a QSL. A cassette or CD included with a report will be much appreciated, as it will be easier to tell for sure they heard KAVT, rather than WDSS.

The use of Phasers or directional antennas such as loops will likely be needed by DX'ers in the Eastern US to null WDSS. Hopefully the long duration of the test (5 hours) will make up for the lack of Morse Code, etc.

Reception reports should be sent to:

Patrick Martin
 PO Box 843
 Seaside OR 97138-0843

Cassette recording or CD is preferred to a written report. Return postage appreciated. E-Mail via: mwdxer@webtv.net.

Thanks to Paul, Patrick, and the staff of KAVT for making this test possible!

The upcoming WAPI/WJOX DX Test will be our first practical demonstration of a new format suggested by Fred Vobbe of the National Radio Club last year.

Fred's idea was that more stations might be willing to conduct DX tests if they did not require a change in overnight programming. Instead, we would request the stations to run a :60 second long DX test in one of their available "local" inventory slots.

With programs like "Coast to Coast" for example, the local station is allowed a certain number of local spots to run during the program. Stations often have a hard time selling the late night spots and often run PSA's, station promos, etc. instead.

Fred's idea is to take advantage of that time, by having a station send Morse Code IDs, sweep tones, etc. Since the test occurs on several nights, instead of one, you also have a better chance at having good propagation to the area at least one night.

WAPI/WJOX will run two of these :60 second long "mini-tests" each hour, for three hours each night on three nights in a row. That means you'll have 18 chances to catch each station. Of course, they won't change their power or antenna pattern!

I highly recommend recording the tests using software like Total Recorder. In the case of WJOX, you'll need to record the entire time period for each hour between :19 and :34 minutes past the hour, since the exact time of the test isn't "fixed" but rather "floating". WJOX runs a sports talk format, and is heavily automated.

It's also interesting to note that the station agreed to this test only during the period of December 25-31st, since this is one of only two periods each year where the station is not "rated". The other is the week of July 4th. This allows for popular hosts to take vacations without an affect on the ratings of their show.

If you're thinking about asking a station to help us out with a DX test, this may be the best time to ask them. Hope we all enjoy this test, and I can't wait to see how these type of test work out vs. the more familiar full blown tests.

73 & Good DX, Les Rayburn, N1LF, NRC/IRCA Broadcast Test Coordinator

(from the IRCA eGroup – but informative to all – pb) Pete Taylor's suggestion about presenting a professional appearance when approaching stations is one that we've taken to heart when reaching out for DX tests. Let me clarify some points however:

1. The "Inventory Inserts" are not a replacement for full duration tests. Rather a reflection of the real world problems facing stations, and a novel solution to getting tests from that stations that cannot or will not run traditional tests.

Short notice tests of all kinds are the future. DX'ers need to subscribe to e-mail lists to stay up to date and be sure they don't miss tests.

2. While a promotional kit is a great idea, it doesn't take into mind the realities of broadcasting. CE's are often managing multiple stations, and turn over among personnel is high.

This season alone, I've had two CE's who had already agreed to doing tests leave their place of employment. This leaves us without a test... and the Broadcast Test Coordinator back to square one.

No club could afford to mail and re-mail promotional kits to the stations.

For years the CPC position basically consisted of writing a form letter to dozens and dozens of stations annually asking for DX tests. This approach worked well when station staffing was fairly permanent, most CE's were also hams and understood DXing, QSL's, etc.

Nowadays, I get about a 5% return of "cold letters", though I continue to send a dozen or so per month. Most of the returns consist of "no longer employed here" or "we have obligations for our overnight programming and cannot interrupt those commitments", etc.

Much better luck is had with phone calls, e-mails, and best of all personal contacts and relationships.

3. I support the idea of a "QSL Manager" for stations. A great way to start might be to have DX'ers with the time, experience, etc. to volunteer their services to the Clear Channel stations in their towns, since they receive a large number of such requests.

This personal relationship can then be parlayed into convincing the station to also run a DX test. If they already have a good relationship with a DX'er then it isn't that much of a reach.

But Pete Taylor is right that such volunteers must be professional in their approach.

4. Unfortunately, I mainly hear the "horror story" side of QSL requests from station managers. Some DX'ers are pushy, rude, and overbearing in their quest to get that paperwork.

Personally, QSLing isn't a big part of my enjoyment of the hobby. If I have an MP3 file with the station ID, that is much better "proof" of reception than any card...but I do get them when I can...display them with pride, and enjoy them.

But I do think QSL'ers need to be very realistic about their request. You're asking someone to do you a favor. Take time out of their day to answer a letter from someone who enjoys something they likely don't understand.

Never be rude and remember that your actions reflect on all of us, good and bad.

I encourage all DX'ers to get to know their local broadcasters. Attend an SBE meeting or ask around at ham club meetings to see if others know engineering staff. If you're polite, most will be flattered by your interest. Buy the poor guy a lunch and talk about how he got into radio. Even if he isn't a ham, chances are he'll understand our love of radio on some level.

Then use that relationship to help all of us by asking for a test. Remember we're happy to provide test material, do QSL chores, or whatever it takes to make a test work.

Mark Riley & Rachel Maddow To Host New Air America Morning Shows

Air America Radio has announced a change in its morning lineup. Beginning Monday, January 2, the new morning format, "Air America Mornings," will broadcast weekdays from 5-9am EST. Mark Riley, currently the co-host of Morning Sedition, will lead off "Air America Mornings" with The Mark Riley Show from 5-7am EST. Rachel Maddow will follow with The Rachel Maddow Show in the 7-9am EST slot. Maddow has previously guest-hosted The Al Franken Show and serves as a contributor to MSNBC's The Situation With Tucker Carlson. Comedian and co-host of Morning Sedition, Marc Maron, is returning to Los Angeles and is currently in negotiations with Air America Radio to host his own syndicated show. "The upcoming year is going to be crucial year for Air America, for morning drive time radio in general, and for the United States. In the past several months, Rachel Maddow has experienced dramatic growth in visibility and audience, and we are very excited about giving her a bigger stage. Mark Riley is one of New York's most respected broadcasters and we are equally excited that he will shine in his new role," said Air America CEO Danny Goldberg. "At the same time, we are well aware of the intense and committed following that Marc Maron's brilliant work on Air America has created and would like him to be a major voice on Air America in the future." From USA TODAY, November 25, 2005:, Radio One plans black talk radio network

LANHAM, Md. (AP) — Radio One Inc. has plans to launch the first national talk-radio network geared for a black audience, the chief executive said. "We're in the black people business," Alfred C. Liggins III said in a recent conference call about Radio One Inc. "We're in the black people business," Alfred C. Liggins III said in a recent conference call. "We are in the business of aggregating audience for this particular demo and providing content to them." It is Liggins' latest effort to diversify Radio One from a pure radio company into a catchall for black consumers, who spend more than \$750 billion a year. He hopes that strategy will mean growth for the 69-station company despite a national slowdown in the radio industry, which has been depressed for several years with competition from satellite radio, Internet radio and MP3 players. Liggins has spent the last two years coming up with new ways for his company to reach black consumers. Last year, he launched TV One LLC, a cable network backed by Comcast Corp. that is aimed at blacks. Earlier this year he bought a 51% interest in Reach Media, which syndicates the popular Tom Joyner Morning Show on about 115 radio stations nationwide. The talk network is his current project. "We think the market for talk is there," Liggins said. "There are tons of talk options for non-African Americans." The network, which is still being

developed, will air 10 a.m. to 7 p.m. weekdays and include a political morning show hosted by Al Sharpton. Earlier this year Sharpton signed a deal to host a talk radio show for Chicago-based Matrix Media, which syndicates radio programs. But that show has yet to air, and Liggins said Radio One has locked Sharpton into a new agreement. Brothers Doug and Ryan Stewart of The 2 Live Stews sports show on an Atlanta AM station will host the afternoon drive. Their three-hour show brings together hip-hop and sports talk. Liggins said he is still trying to negotiate deals with other talent and could not discuss the rest of the lineup. Early next year he plans to put the talk network on some of Radio One's AM stations and try to sell it to other urban outlets not owned by the company. Liggins said he has not done any research to determine whether there is a market for such a national talk network for blacks, but the lack of black news programs convinced him there was room. There are 2,179 news talk radio stations in the country. Their primary audience, according to radio research firm Arbitron, is white men. Only about 7.6% of talk radio's listeners are black. Radio One began as one talk station in 1980, when Liggins' mother, Catherine L. Hughes, acquired WOL-AM. She changed the station's programming to talk and hosted a radio show. Now most of that company's radio stations are programmed with hip-hop and R&B music. Shares of Radio One fell 23 cents, or 2%, to close at \$11 in trading on the Nasdaq Stock Market.

DATE OF COLUMN: 12/26/05. Well, hope everyone had a Merry Christmas and a happy 2006. I'm on Christmas break but suffering from a fairly bad case of acute bronchitis, hope to get over this darn sickness (everyone down here in So. CA. seems to be sick of late, heh). Hopefully will be healthy to go back to work on 1/3/06. 73's.

all times UTC

Only a bit of DX to report this time around with all of the holiday activity. Dennis Vroom from Vancouver WA heard both Norway & Germany (VOR) though. So away we go.

TRANS ATLANTIC DX ROUNDUP

183 **ICELAND**, at 0315 UTC 12/18, medium level playing pop tunes with one Christmas tune just before 0400. Best I have heard a TA LWBC in quite a while. Only very weak hets on MW. (SR-OR)
 1314 **NORWAY**, poor to very poor with woman ancr in what sounded like NN and mx in splatter mostly from 1310 kHz at 0250 12/16. Better on the SPR4 than the R8! (PM-OR)
 + Audio hrd from female talking at 0605 UTC 12/26. (DV-WA)
 1323 **GERMANY**, VOR with woman in RR 0618 UTC 12/26, at 0624 woman & man talking. Even heard on my fence antenna. (DV-WA)

PAN AMERICAN DX ROUNDUP

530 **TURKS & CAICOS**, Grand Turk, Radio Vision Christiana finally IDed after hearing scattered SS rel. pgm for several nights recently. Got in on the car radio, because the Hammarlunds won't tune to 530. Woman gave ID at 0400 12/23 that included WWR? on 1330 and another station on 1310, plus the one I was listening to. Good signal for 40 kw, considering the distance and my equipment. (LG-MT)
 535 **GRENADA**, Radio Grenada 12/10 0830 Man introduced news from BBC World Service which begin with item on environmental conference in Montreal. First time logged in many years. (NP-AB)
 580 **MEXICO**, Monclova, Coah XEGIK 12/22 0241 noted with Nortena mx and announcements in SS, promo, local ads, Fair to poor with KLVV (EB-MO)
 600 **CUBA**, Radio Rebelde way o/CKBD with SS ancr and Tropical mx at 0500 12/13. Many mentions of "La Habana" also. This one may be new to me. If I have heard it before, it has been many years. (PM-OR)
 1090 **MEXICO**, Rosarito, BCN XEPRS 12/23 SIMPO 33544, ID in EE and SS at 0800 and what appears to be NA (MAS-OR)
 1170 **MEXICO**, Aguacalientes, XEUVA 12/12 0702. After hearing a SS language station much of the evening, I finally hrd a call ID and also the "La Rancheria" slogan through KFAQ and KJNP! interference. (NP-AB)

TRANS PACIFIC DX ROUNDUP

639 **FIJI**, seems to be a regular now at night, about as common as Tahiti 738. Heard with typical island mx and a man in Fijian at 0740 12/17. (PM-OR)
 820t **UNID**, AK, Fairbanks? KCBF During the same period I was hearing KJNP 1170, I was hearing an ESPN station u/KUTR with the usual Seattle pest very weak. It was on top at times, but never at ID time of course. Eventually I lost it as the Seattle station came back to normal levels (KGNW). Given propagation at this time it seems quite plausible this was KCBF (That was the first Alaskan I heard, but not logged since 1984). (NP-AB)
 1170 **ALASKA**, North Pole KJNP 12/12 0600. Very surprised to hear an ID mentioning KJNP and North Pole. Alaska while trying to ID the SS speaker (which turned out to be unneeded XEUVA). Much clearer ID and local weather at 0703 and similarly at 0803. (NP-AB) (Great going Nigel, I have not heard either KCBF or KJNP in years either. PM)
 + Also noted after reading the report about Nigel hearing KJNP from Don's place in Lamont AB. I decided to set up my timer/radio combo on 1170 At 0900 UTC 12/14, I heard a faint KJNP ID. At 1000 I heard another KJNP At 1100 I heard the full and complete ID giving KJNP AM & FM North Pole and KJAK Houston. First Alaskan station logged here since KINY 800 back in Feb 04. Thanks Nigel. (MS-AB)

QSL

612 **JAPAN**, Fukuoka JOLK. Full data QSL letter and station info from Takaski Otsuka, Associate Director, Planning and General Affairs Division in 22 days for an IRC. (NP-AB)

Hi everyone! I don't forum often and that's something I must change. With the DX season well upon us and some new members joining the IRCA it's nice to see the club doing well. As I've been quite busy with my ECC duties as well as editing columns for the IRCA and NASWA I haven't had much time to DX and this is another thing that must change! hi (advice is welcome here). I want to wish every member of this wonderful club and all of their loved ones a Most Healthy and Happy Holiday Season! For those members under the weather I pray for a speedy recovery so your lives may return to normal once again. I also hope Santa brings that special gift so desired to enhance your radio hobby! Please be well my friends and 73 de DX de NY, Ray Bauernhuber.

Mary Anne Sanford (KE7CGZ), PO Box 17551, Portland, Oregon 97217-0551

I had the opportunity to tour the transmitter site for KDZR & KKPZ in a quick tour by the chief engineer, John White. I don't remember much of the technical aspects of the site and much of the information is posted at the FCC site. However the Radio Disney (KDZR) is 10KW day and 1KW night omni-directional and the KKPZ (Spanish religious programming) is 5KW unlimited with a definite NW direction from a 3 antenna array. They KDZR shares the site and uses the center tower. They are located on the NE quadrant of Mount Scott (45°27'12.03" N, 122°32'47.86" W) in Portland, OR at about 1000 feet elev. John told me that he does testing and I told him that IRCA would definitely love to participate in his test(s). He also said that KDZR receives quite a number of QSL requests from Europe, so it does get out. I will coordinate test information as I find out. And interestingly enough KKPZ signed off at 0100 ET Sunday (10PM local time Saturday) as I write this. This was my first AM transmitter site tour in Portland and was very interesting. I've been to the Stonehenge (KGON) site which is all FM earlier. Mary Anne <http://ke7cgz.net>

Well, I decided to give myself a DXing Christmas present (actually pre-Christmas): a Winradio G313i receiver. Coverage 9kHz to 30MHz with good sensitivity across the range, even at the low end (which is often a weak point on general coverage receivers). I have yet to explore its full capabilities, and already I am very impressed. The whole thing (receiver, signal processing, etc.) is on a single, very well-shielded computer card and is entirely controlled by software; the only other accessory needed (aside from a good antenna) is the PC's sound card. I was originally skeptical of immersing a sensitive receiver into the guts of QRM-producing PC, but WRTH 2005 had a very favorable review of it, and I saw other positive comments by DXers, so I took the plunge and bought one from Grove (www.grove-ent.com). I also replaced my CRT monitor with an LCD model to eliminate monitor QRM radiation to antennas. Frequency readout is to the Hz, IF bandwidth is continuously variable from 1 to 15000 Hz in 1 Hz steps, and a marvelous spectrum display is included. What a toy! I am having a lot of fun DXing with it while experimenting with the numerous controls. 73 and good DX to all in 2006.

(1) First, I want to wish all a Merry Christmas and a Happy New Year. Didn't have much luck DXing this week until Sunday night, 12/18. Last week, I mentioned finally hearing number two on 890. This evening, I nailed number three WBAJ in SC. It would have been a semi-local for me if I were still living in South Carolina. Then, I nailed number two on 720 in KSAH in Universal City, Texas. Also, KRVN-880 NE was all over WCBS-880 NY and WITS-690 LA was basically all alone. I haven't done much

with the clear channels for awhile. Now at 640 heard here. This past Tuesday evening, I reset the car radio button to 740. CHWO-740 ONT seems to be spotty around here at night on the car radio with just a few hundred feet making all the difference on how well CHWO comes in. However, while I was driving to class Thursday evening at 1740 EST, I had a mixture of CHWO Toronto and KRMG Tulsa, Okla. coming in here on the southside of Indianapolis. It seemed weird but I had clear IDs for both stations with CHWO talking about Toronto and its 3 degrees below zero (Celsius--hi) and KRMG giving call letters. We had an inch or so of snow today--just enough to make wonder if I need to shovel before going to work tonight but I am wondering if it affected DX at all. 73.

(2) A quick note before getting this out to Seattle. I was up most of the night 12/26 listening to the Mighty 1090 on, what else, 1090 for better than three hours and never heard the call letters given. Plenty of oldies--not bad ones from the 60s and, I guess, the 70s, although I would still prefer CHWO-740 for my oldies station, hi. The jingle mentioned the oldies and Motown music but no spots and a morning DJ's name only once. It was extremely strong here and I am guessing CKKW in Kitchener, even though their coverage map shows them almost due north. It would be my only new station for the week. A note from Gary Siegel in Toledo was wondering about a test from my local, WXLW-950. I pulled up their coverage map and was amazed to find out their signal essentially goes straight south from their tower just northwest of downtown. Looks like their signal just makes it to the north part of the county. Now, I know why they weren't one of the 22 stations I heard on 950 when I was living up in Gary 160 miles north of here. This is the last issue for 2005, but not for the DX season. See you in 2006. 73.

NOTES: * [For this column] = See comment below

Martin indicates that the signer of his KTNQ-1020 verie is a casual DXer and a Ham; he also thanks IRCA member David Gleason for the contact. This column was prepared on 12/19/05, one week earlier than usual because of the holidays. Hope everyone has a wonderful holiday season! 73, SSH.

The IRCA is a non-profit organization devoted to the hobby of hearing distant stations on the Broadcast Band (510-1720 kHz). **DX Monitor**, the official publication of the IRCA, is published in "soft" form 35 times a year (weekly from November through March, twice monthly from April to November) and in printed form 30 times a year (weekly November through March, monthly April to November). **DX Monitor** contains members' loggings, articles on radio stations, receiver reviews, technical articles, DX tips, and other material of interest to Broadcast Band DX hobbyists.
