**WCXH 780 kHz Monticello, ME DX Test**

Date: Saturday morning (late Friday night), Nov. 24, 2007.

Time: 4 - 5 a.m. Eastern Standard Time; 0900 - 1000 UTC.

5,000 watts using non-directional antenna pattern.

Programming will consist of special voice announcements, march and other special music, Morse code and sweep tones. Reception reports may be sent to Mr. Allan H. Weiner: WCXH Radio, 274 Britton Rd., Monticello, ME 04760-3110.

No eQSL service is being offered for this test. Recordings on disk in .mp3 or .wav format will be accepted as proof of reception. NOTE: All requests for verifications must be accompanied by return postage in order to receive a reply. Again, our sincere thanks to Allan Weiner for giving us a second chance to hear this station.

**KLAA 830 kHz Anaheim, CA DX Test**

Date: Saturday morning (late Friday night), Dec. 15, 2007. Time: 1 - 2 a.m. Pacific Time, 0900 - 1000 UTC. 20,000 watts using nighttime directional antenna pattern. Morse code IDs inserted into regular programming. Reception reports may be sent to Mr. Brian Clark, Director of Engineering, KLAA Radio, 2000 Gene Aulry Way, Anaheim, CA 92806. No eQSL service is being offered for this test. Recordings on disk or via e-mail in .mp3 or .wav format will be accepted as proof of reception. Address for e-mails is [bc1ark@am830klaa.com](mailto:bc1ark@am830klaa.com). NOTE: All requests for postal verifications must be accompanied by return postage in order to receive a reply. Brian says he would love to run the test using KLAAs daytime antenna pattern which would better favor the east but cannot because he must protect other stations on 830 kHz. Our sincere thanks to him for agreeing to conduct this test. It should be a good one for the folks to the west, and who knows how far east they may get if conditions are good?

**KQMS 1400 kHz Redding, CA DX Test**

Recordings on disk in .mp3 or .wav format will be accepted as proof of reception. NOTE: All requests for verifications must be accompanied by return postage in order to receive a reply. Our sincere thanks to Ms. Myers and to Chief Engineer Steven Mena for agreeing to conduct this test.

**WFAW DX TEST Results**

The first reports on last night's DX Test from WFAW are coming in. It looks as though lots of their signal was going north and south, and most of the more distant listeners - including yours truly - heard on Morse code and sweep tones. Those a little closer to the station heard some of their interesting programming, including special music and PSAs for amateur radio.

Thanks to Ernie Swanson for running this challenging, relatively low power test, and to everyone who listened. Please keep those e-mails coming, and I'll publish a final report in a couple of days. Here is the preliminary list of those who positively or tentatively logged the test.
