Pacific Asian Log AM Radio Guide Updated

The classic Pacific Asian Log of mediumwave [AM] radio stations on air across the entire region has now been updated at www.radioheritage.net.

Produced by **Bruce Porter** in Seattle WA, this extensive radio guide covers literally thousands of AM radio stations and is hosted by the Radio Heritage Foundation. It draws on monitoring by many volunteers across the region, as well as information directly from broadcasters so it's accurate and up to date.

You can search the database or download a pdf version for your own non-commercial use by visiting www.radioheritage.net/PAL_search.asp today.

Amongst the stations you'll find on 1602 AM are 2CP Cooma [Australia], All India Radio, Ziro [India], JOKK Kotu [Japan], HLQE Sabuk [South Korea], Radio Reading Service, Levin [New Zealand], and DZUP Quezon City [Philippines]. The most powerful station listed in the region is 50kW Radio Khost, located in Afghanistan.

You'll find the Pacific Asian Log Radio Guide useful for business and vacation travel [just print out the stations from the countries you're visiting], radio monitoring, advertising and PR campaign media planning and much more... it's up to date and it's free.

The Pacific Asian Log traces its origins back to radio station call lists first published in New Zealand during the 1930's, and is volunteer supported and produced as a free service for everyone.

837 **Unid**, Nov 30 1435 - Weak audio with woman singing. Not // NHK. (NP-AB)
864 **Unid**, Nov 30 1431 - Man talking. Strong carrier but very low audio. (NP-AB)

936 **Unid**, Nov 30 1432 - Audible through IBOC hash with instrumental music. Unfortunately faded before any speech. (NP-AB)
945 **CHINA**, Jiaohu CNR1, Nov 30 1403 - Man speaking in Chinese //5030 khz among others. (NP-AB)
954 **JAPAN**, Tokyo JOKR, Nov 30 1434 - Presumed the one with pop tune and woman speaking in Japanese. (NP-AB)

1008 **Unid**, Dec 12 1452 - Conversation between man and woman. About 95% sure it was in Japanese, so JONR seems probable. (NP-AB)

1026 **CHINA**, Beijing JGD, Nov 30 2141 - Song by a man, then fanfare, mentions of Beijing in possible ID at 1430: New catch for me. (NP-AB)

date restrictions are also noted (such as when the country was formed or ceased to exist). There are also a few instances where I've added comments clarifying a country's status.

A place qualifies for inclusion on the list if it meets one or more of the following criteria:

1. It is internationally recognized as independent, either because it is a member of the United Nations or International Telecommunications Union (ITU), or has diplomatic relations with multiple countries.
2. It has a high degree of internal autonomy. This characteristic can be for historical reasons, such as the various parts of the UK, or established through formal agreement, such as Hong Kong or Macao. A portion of a country may also qualify based on de facto autonomy, even if the parent country does not recognize it as such. Taiwan, for example. This qualification is largely a judgment call based on the amount of self-rule and political stability.
3. It is separated from the rest of the country by at least 200 km of open water (no other islands between it and the mainland), or 100 km of land, such as and Alaska.
4. These places will only be listed if they currently have a MW radio station, have had one or more stations in the past, or have sufficient residents (permanent or temporary) to justify broadcast facilities. As a result, this list doesn't include most of the small islands and other uninhabited territories that appear, for example, on the ARRL list.
5. It is under international or other special administrative control, such as Antarctica.
6. It has historically been considered a separate DX "country", even though it doesn't seem to meet any of the above criteria ("We do it that way because that's the way it's always been done").

Country list junkies are welcome to examine the following four lists. Each has its own set of criteria, resulting in some interesting differences and similarities.

- The **ARRL Country List**. This list is used mainly for issuing DX Century Club awards. The criteria are well-thought out, but hotly debated in the ham community. It includes a large number of obscure uninhabited specks of land that would otherwise go unnoticed.
- The **NASWA Radio Country List**. This is a list of countries with active shortwave broadcasters, past and present.
- The **Travelers' Century Club List**. This organization gives certificates to those who have visited at least 100 countries. The most recent list has 350 places listed.
- **How many countries are there?** This list analyzes several sources, including the ARRL/DXCC and TCC lists, and concludes that there could be anywhere from 191 to 493 countries, depending on what you count.

Any comments or questions on the list should be addressed to **bportzer@comcast.net**

OVERTIME: SportChannels remembers Tom Dillon, who died Dec. 1 at the age of 66. He had been with Dial Global's Sports USA Radio Network since 2005. He called Arizona SU games from 1979 to 1997 and Arizona CARDINALS games for 12 years until 2001. He also was voted state Sportscaster of the year 17 times.... Incidentally, Westwood does not have a monopoly on NFL radio coverage: Sports USA airs a Sunday NFL doubleheader plus holds the rights to the Las Vegas, Independence, Sun, Insight.com and Capital One bowl games. Lead announcers are Howard David, Eli Gold, Larry Kahn and Josh Lewin. Analysts are Charles Arbuckle, Gary Barnett, Terry Donahue, Dan Fouts, Tim Parnetti, Doug Plank and John Robinson....

ABBREVIATIONS USED: a-away games only, b-backup or conflict station, d-daytimer, h-home games only, p-partial schedule, r-relays another station, s-side-line reporter, ST-studio host, "/-personnel alternate. In network listings, flagship stations are in **boldface**. College campus stations are in lowercase. Data sources and station cities are available upon request from dxrf@aol.com, as well as updates and corrections to previous columns. Folks, this is a one-person effort, which is why I haven't devoted as much time lately to the feature as I would like. My holiday wish is for you to send me radio network lists of your favorite pro and college teams. Until then, Mele Kalikimaka!

SPECIAL FEATURE

Global Tuners Internet Radio

If you've ever gone on a DXpedition you know the excitement you feel when you pick up stations you've never heard before. But what if you've never been away from the home receiver or for one reason or another you can't go anywhere else. If you have a computer connection to the internet the problem is solved. Just go to www.globaltuners.com, establish an account and you have access to over 35 receivers worldwide. These receivers are linked through the internet to the global tuners website and offer the world of listening on AM, FM, Shortwave, and VHF/UHF frequencies. Most of the receivers are ICOM PC1000 or PC 1500 but there are also AOR AR-7030 s, ICOM R-75's and various other ICOM, Kenwood, and Yaseu units.

One of my favorites is one called Atlantic DX. It is a station on the Atlantic Ocean near the coast in Devon, England. It seems to have great antennas and as the gray line approaches the coast of the US you can hear AM stations start to come in between the European ones. My heard list includes WBZ Boston, WWKB Buffalo, WWZN Boston, WFED, Wash DC, WOCM St. Johns, NF, and my best one KVN5 Brownsville, TX. This is particularly exciting for those of us who are landlocked and have minimal chance of good reception from Europe, Africa, or Asia. There are enough tuners that there is always something available somewhere in the world.

For AM DX my favorite is the Atlantic DX site. On this side of the pond the Albany, NY, Northwest Connecticut, Pennsylvania, and Vero Beach, FL are the best AM receivers on the website. The

Albany, NY site has an ICOM R-75 with a 160M full wave loop and is one of the quietest receivers I've ever heard. The only downside of this site is that multiple members can go on one receiver and while there is instant messaging on the site everyone doesn't play nice and people may hijack the receiver while you're on it. But most other users are kind enough to ask permission before tuning over what you're setting on.
