STOP PRESS:

Welcome to new members this month. Susan Philpotts, Cornwall; David Henry, Aberdeen; Gerhard Hoehne, Germany; Roberto Celestre, Italy; and Chris Ridley, Republic of Ireland. Welcome to the Circle!

Lord Haw Haw microphone fetches £8000 at auction

Last month we reported on the rediscovery of the microphone used by wartime traitor Lord Haw Haw and its imminent auction. The microphone and related paper were expected to fetch up to £4,000 but in fact they sold for double this amount.

“A private collector snapped-up the microphone of Nazi broadcaster Lord Haw Haw for £8,000 when it went to auction in Marlow, England, yesterday. The amount paid by the mystery buyer was double the estimate auctioneer Steven Bosley had put on the Second World War artefact. Mr Bosley, of Bosley’s Military Auctioneers and Valuers, said he was both surprised and delighted: “Honestly, we didn’t know how much it would go for because it is something which you can’t quantify.” (Source: Maidenhead Advertiser Online)

e-mail: mwneditor@mwcircle.org ☎ +44-1759-373704

At last I've managed to rebuild my antennas and find some time to tune the MW band, but sadly my dormancy ensured that I missed the good DX prevalent in mid-September (see DXlogs).

Utility Column.

We are still looking for a volunteer to take over from Andy Robins. If you are interested in utility transmissions, and would like to share your interest with the rest of the Circle please consider whether you could help by compiling a column for Medium Wave News. To find out more why not call me for a chat.

New look e-list

For many years we have had an email list for the use of Circle members which was set up and operated by Remy Friess in France. I tried to find out when we started the service but without searching all my back issues of MWN I managed to find out that the e-list is at least 11 years old. Eleven years!

For some time we've considered whether the list needed upgrading but the existing list was simple, generally reliable even if it was lacking in features for users and proved a bit difficult for administrators.

This summer the club officers decided to move the e-list from erefnets.com to Yahoo Groups and the new list was launched a few weeks ago. The move was precipitated by Remy's hospitalisation which exposed some of the admin limitations of the previous system. The good news is that Remy's health is on the mend and he is back home having benefited greatly from the French medical system. To take pressure off Remy whilst he recuperates, administration of the e-list has moved to Herman Boel supported by the other club officers who also have administrator privileges.

It is also great to see that within days of the launch of the system well over 100 members had signed up to the new group.

If you have never used the MWC e-list before why not consider trying the new system. All you need is e-mail or access to the internet in order to send and receive messages from the list. If you want to keep up to date with news, loggings and other timely communication between Circle members then the e-list is for you. It is a private spam-free environment for Circle members and it is free of charge. If you want to keep up to date with developments between the monthly publication of MWN then the list is for you.

If you previously used the old system but opted out because it lacked the features or controls that you wanted, please take a look at the new Yahoo Group. This gives every user direct control over their registration, their account details, control over how and when messages are received and the ability to see an archive of older messages (hopefully Yahoo will fix the widespread problem that is preventing search of the message archive). To join up to the list visit our website and enter your e-mail address:

Now on with the show

73s *Steve* .

2009 Ultralight Radio AM-DX Shootout

by Gary DeBock, Puyallup, WA USA September 2009

Introduction: What started in November of 2007 as a TP-DXing craze on the humble analog Sony SRF-59 has managed to spread worldwide in a little over a year, providing not only a rejuvenating force for dozens of medium-wave DXers, but for the general hobby itself. Based on the concept that a skilled, determined DXer can use superior knowledge and skill to make outstanding loggings on basic equipment, the thrilling challenge of Ultralight Radio DXing has proven irresistible for many, and provided a major force for innovation, experimentation and optimism among both new and experienced hobbyists.

From the beginning, one of the major attractions of “the Ultralight Boom” has been the chance to enjoy the latest in innovative pocket radios from the Far East, all offered at reasonable prices. The stiff competition between Chinese manufacturers has provided AM-DXers with amazingly capable and compact receivers, which continue to improve at an extremely rapid pace. Despite the current global economic issues, the Ultralight Radio DXer in 2009 is offered an unprecedented variety of exciting new radios, many of which incorporate breakthrough design improvements.

Fueled by the excitement offered by these innovative pocket radios, the collective enthusiasm and optimism of the Ultralight Radio enthusiast group has quickly spread to all

continents of the world, flying completely in the face of pessimism over the future of the medium-wave DXing hobby. With the booming Ultralightdx Yahoo group now boasting over 350 members, the future of our cherished hobby has been firmly reestablished—although perhaps in a direction that few of us could have envisioned.

The Ultralight Revolution Meets the DSP Revolution Prior to this year, digital signal processing had been refined in table receivers to provide superb selectivity, offering hobbyists unprecedented freedom

to chase weak-signal DX adjacent to strong local stations. Most DXers probably assumed that this superb technology would remain limited to relatively expensive communication receivers—until the first DSP-enhanced pocket radios appeared in the Chinese domestic market early this year.

Suddenly the performance gap between Ultralight and table receivers was greatly narrowed. Major Chinese manufacturers invested heavily in new DSP-enhanced pocket radios, and the competition between them (and the Chinese sellers on eBay) kept prices relatively low for North American purchasers. The combination of excellent DSP-based performance and reasonable prices has led to an ordering boom for these breakthrough Ultralight radios, and intense interest in their relative DXing capabilities.

The Contestants: The seven Ultralight models chosen for the 2009 Shootout contain some innovative features that would have been unthinkable only a few years back. One radio combines DSP capabilities with a built-in MP3 recorder, and two of the models have five DSP selectivity choices. One radio has already proven to be a phenomenal performer as a fully modified DXpedition receiver, surpassing even the E100 equivalent in weak-signal capability. This combination of affordability and innovation is fairly unique in the radio hobby, and makes 2009 an ideal time to join in the fun of Ultralight radio DXing.

The seven pocket radios competing for top honors in this Shootout are two analog models--the Kaito WRX911 (a.k.a. Tecsun R911) and the Tecsun R9012, and five digital models: the C.Crane SWP (a.k.a. Redsun RP300), the Degen DE1123, the Tecsun PL-300WT (a.k.a. Grundig G8), the Kchibo D92L and the Kchibo D96L. Informed readers will note that all of these models are products of the Chinese domestic market, a recent center of innovation and competition which has come to dominate the worldwide radio production system. Despite the negative global economic trends, the large Chinese manufacturers have invested heavily in research and development, especially in the practical application of the American-designed DSP chips. The huge Chinese domestic market is their primary target, made obvious by the

fact that several of these models have only Chinese labeling for the radio controls, and Chinese owner's manuals. For those of us willing to accept these challenges, however, tremendous bargains are offered—as well as a possible DXing bonanza, due to breakthrough DSP-enhanced selectivity in several of the new digital models covered in this Shootout review.

As is customary, after thorough descriptions of each model, these contenders will be matched against all other top Ultralight radio models from previous Shootouts in relative judgments of sensitivity, selectivity, nulling ability, images/spurs, AGC, audio quality, digital tuning noise and quality control record.. As always, it is the author's sincere hope that this definitive purchasing guide will motivate even more hobbyists to join our booming niche group, and personally experience the legendary DXing fun that these innovative pocket radios have to offer.

Tecsun R911 (a.k.a. Kaito WRX911)

This is first of two highly capable analog pocket radios, refined to excel in the highly competitive Chinese domestic market. Despite the rock-bottom price of \$19.99 shipped (from eBay seller “Anon-co”), both the R911 and its Kaito WRX911 clone are high quality, well-built radios with an astonishing range of features: AM, FM (76-108 MHz) and 9 shortwave bands (covering the major international broadcast bands from 4.7 to 21.95 MHz), an LED tuning indicator, a built-in 150 mw speaker with decent audio quality,

very long run time on two AA batteries, and even a carrying pouch (R911 only).

This 4.75” x 3” x 1” (117 x 75 x 24 mm) radio weighs 3.7 ounces (88g) and is available in two colors: cobalt blue (both WRX911 and R911) and black (R911 only). The WRX911 variant (available from Amazon for \$23.02 shipped) has been aligned to cover the 530-1700 kHz AM frequency range, while the R911 requires a simple alignment to extend its AM coverage to 1700 kHz. For AM DXers willing to tolerate the analog thumb wheel tuning, this model provides exceptional nulling ability, along with competitive sensitivity (but only when the FM/SW whip antenna is raised away from the loopstick at the top of the cabinet—a quirk in both this model and the R9012). The R911 is available from multiple Chinese eBay sources, generally for around \$20.00 including shipping to North America.

Tecsun R9012

Analog DXers unimpressed with thumb wheel tuning can have an actual round tuning knob on this model, along with one more shortwave band than the R911 (3.7-4.1 MHz)—all for generally the same price. The sensitivity specs are the same as the R911, as well as the high quality and generous features. As with the similar single-conversion R911, this generally acceptable shortwave receiver avoids image problems by covering only narrow segments of the international broadcast bands.

The Chinese-market only R9012 model is slightly larger than the R911 at 5” x 3.25” x 1.25” (130 x 77 x 25 mm) and weighs slightly more (4 ounces, or 95g), but the main attraction is the comfortable round knob tuning,

especially at the high end of the band. Three different colors are available: white, black and yellow, so make sure that your Chinese eBay seller knows which one you prefer. Also be advised that the R9012 shares the R911 quirk of requiring that the FM/SW whip antenna be raised away from the top of the cabinet for best AM sensitivity, and make sure that your eBay seller knows that you want a model manufactured after April of 2007 (R9012 models made prior to that date have an inferior loopstick design, and cannot be aligned for good AM sensitivity. The preferred newer models have “2007.5 VER.2” on the shipping box flap). Like the R911, the factory R9012 will only cover up to about 1650 kHz, but can easily be adjusted up to 1700 kHz by a simple alignment. The current lowest eBay “buy it now” price is \$19.99, including shipping from China (from sellers “Anon-co” and “Liypr”). These models come with a cloth carrying case and Chinese instruction manual, among other Chinese documents. For an outstanding analog DXing value, the R9012 is very tough to beat.

C.Crane SWP (a.k.a. Redsun RP300)

This digital AM-FM-SW model was initially reviewed in the 2008 Spring Shootout, but unknown at the time, the early production run model had a defective part on the RF board, which was not detected during alignment. The low sensitivity was therefore deemed to be a congenital problem typical of the model, and a harsh verdict was issued. A

The Redsun RP300 Chinese market model was inspired heavily by Tecsun’s innovative PL-200 (a.k.a. Eton E100) introduced years ago, and has very similar size (5” x 3” x 1.2”, or 127 x 75 x 28 mm), weight (6.5 ounces, or 150g) and features. Wideband FM (70-108 MHz) is offered with stereo capability through headphones, along with SW coverage from 2.3–7.5 MHz (SW1) and 9.2–22 MHz (SW2). AM coverage using 9 kHz tuning steps is from 522-1620 kHz, and is 520-1710 kHz with 10 kHz steps. 1 kHz AM tuning is also possible using the tuning knob, or direct frequency input. Auto-scan and memory-scan tuning options are offered, along with 200 memories. Two AA batteries supply power. The C.Crane SWP is available from C.Crane for \$49.95 plus \$6.95 shipping (\$56.90 total), and comes with stereo earphones, a vinyl carrying case, English owner’s manual, and registration card. The RP300 is available from the Chinese eBay seller “Tquchina” for \$34.99 plus \$14.00 shipping (\$48.99 total).

The C.Crane SWP (RP300) models have several quirks of which purchasers should be aware. The push-button volume controls have caused consternation because of the wide variation in audio levels between steps on the low end. Unlike the E100 (PL200) models, there is no meaningful signal level bar graph, but only a “tune” display when signals reach a certain level. The digital input controls require serious fingertip pressure to operate properly, and such input changes will not cause the LCD display to light up automatically, as on competing models.

Despite these quirks, the C.Crane SWP (RP300) models have an effective low-noise RF front end, and have proven to be outstanding performers when modified with external 7.5” sliding-coil (“Slider”) loopsticks and Murata CFJ455K5 IF filters, surpassing even the E100 equivalents in 9 kHz-split DX chasing capability. Even in competition with the new DSP models, these super-modified Ultralights are tough to beat in transoceanic DXing.

Degen DE1123

At first glance, this DSP-enhanced model with a built-in MP3 player would seem like a dream receiver, combining excellent selectivity with the ability to directly record DX signals. With an extremely compact size (4.3" x 2.7" x .5", or 110 x 69 x 15 mm) and light weight (3 ounces, or 80 g), this innovative receiver was designed to provide a unique combination of freedom and modern function. The DE1123 combines FM stereo (87-108 MHz) and AM (522-1710 kHz with 9kHz steps, 520-1710 kHz with 10 kHz steps) with 2.3- 23 MHz SW coverage (5kHz steps), all with the ability to record DX signals directly on a built-in recorder (WAV format) combined with an MP3 player (1 GB memory capacity). Maximum recording time is 69 hours, with a built-in microphone for recording voice, or any other live audio. Recordings may be uploaded to your computer through a USB 2.0 jack, through which MP3's can also be dragged into the DE1123's memory for playback.

The radio has 255 preset memories, but only 25 for the AM band (which unfortunately gives a hint of the AM band performance priority in this radio). The radio operates on three AAA batteries, and has a built-in speaker, very short (7", or 180 mm) whip antenna, a digital clock with 12/24 hour options and alarm function, 5-90 minute sleep timer, push-button volume and tuning controls, various tuning methods (manual, auto-scan, and auto-tuning storage) and a multi-function LCD display showing time, date, band, frequency, battery condition, volume level, signal strength and memory status. Included in the DE1123 package are a "switching rechargeable adaptor" (110-250v) which supplies 5 VDC through a USB connector output, stereo earphones, 3 AAA rechargeable batteries, USB cable, carrying case and English manual.

Unfortunately, the designers of the "dream receiver" seem to have ignored AM performance, giving the DE1123 one of the worst loopsticks ever seen in a pocket radio—a midget 1.5" (88m) bar buried in the center of the cabinet. The on-board recorder also has a severe quirk, in which the user needs to adjust the radio volume to maximum before recording anything, presumably running down the batteries accordingly (the manual advises to plug in earphones during any recording, even if you aren't using them to listen to the radio signal). There is no in-line recording jack, making the radio incapable of recording any signals from an external source. The radio's 7" whip antenna looks fragile, and the SW reception seems mediocre at best. Only the FM section seems to have been a real priority with the designers—FM sensitivity and selectivity are not bad for the radio's size, but are not quite up to the standards of the newer DSP units. Possibly for this reason, the eBay going rate for the DE1123 has been seriously discounted recently, with the lowest current price being \$49.99 shipped, from the Chinese seller "G8hkshop."

Tecsun PL-300WT (a.k.a. Grundig G8)

Tecsun's introduction of the DSP-enhanced PL-300WT model in May caused a sensation among Ultralight radio enthusiasts, who ordered the innovative LW-AM-FM-SW portable in droves from the Chinese eBay sellers. Powered by Silicon Labs' superlative new 4734 DSP chip, the PL-300WT immediately set a high new standard for FM sensitivity and selectivity among small portables, as well as for AM selectivity. Just when the Chinese sellers of the PL-300WT were enjoying an ordering boom in June, Grundig-Eton introduced their electrically identical G8 "Traveler II" clone through Amazon.com at a shipped price of \$50, substantially undercutting the Chinese PL-300WT sellers on eBay. The G8's introduction was accompanied by a bizarre official denial by Eton's Austin Parker that the model had a DSP chip, along with incorrect size and weight information on Amazon and Universal Radio's web sites, as well as

incorrect photos.—all of which continue to this day (along with absolutely no mention of DSP capability on Amazon’s site).

The real PL300WT (G8) is a true FM-DXing powerhouse, fully capable of astonishing fringe reception using only the built-in 21.5” (55 cm) whip antenna. Unfortunately AM sensitivity is not always at such an optimum level, due to a possible inductance mismatch between the loopstick coil and the DSP chip—an issue which can be corrected by alignment.

At 5.25” x 3.5” x 1” (135 x 85 x 27 mm) and weighing 7 ounces (204g), these models are packed with innovative features derived from the 4734 chip. A multi-functional digital display can show frequency, signal strength, S/N ratio, clock and alarm settings, temperature and battery condition. The 24-hour digital clock can be set to display both local and world zone time, according to a selection switch behind a front panel door (which has developed a reputation for being stubborn and tricky to open, in certain units). The alarm can be set to use either a buzzer or radio signal for wake-up, and the radio has a selectable 1-120 minute sleep timer. 500 total preset memories are available, with 100 memories for the AM band. The models have an innovative fast tuning option which speeds up manual tuning according to the user’s input on the tuning thumb wheel, which somewhat compensates for the radio’s lack of a direct frequency input keypad. Besides manual tuning, the radio can auto-scan local stations and store them in memory, with memory recall tuning of the auto-scanned stations, or of the user-selected memory stations. Power comes from 3AA batteries, or a 4.5 VDC power adapter.

These models do have several quirks, which have proven to be disappointing to some owners. The AM band has several internally-generated heterodynes, notably around 640, 980, 1400-1430 and 1600-1640 kHz. The 4734 chip “soft mute” function causes a serious drop off in signal strength when tuning 1 kHz up or down from a DX station’s frequency, during attempts to escape local QRM. This function also causes “audio pumping” of the AGC action, making it less than effective in smoothing out variations in stations’ signal strength. There is no direct entry keypad for wide frequency changes, forcing the user to use the tuning thumb wheel if the desired station is not in memory. The PL-300WT (G8) models do not offer choices for DSP selectivity filtering, and the fixed option is not at the optimum 1 kHz DSP selectivity potential of the 4734 chip (as can be selected in the Kchibo D92L and D96L models).

As mentioned initially, the AM sensitivity of these models has proven to be variable, depending upon inductance matching between the loopstick coil and the DSP chip. The LW and SW performance of these models is mediocre at best, and certainly was not a top priority in the radio’s design. As mentioned previously, the front panel access door (to the world time selector switch and other controls) sticks badly on some units, and may require serious force to pry open. Finally, the English owner’s manual supplied with the G8 is notoriously brief and incomplete, making it necessary for a purchaser to obtain the PL-300WT English manual (from the Ultralightdx Yahoo group file site) to understand even the basic radio functions. A wide variety of PL-300WT English owner’s manuals has been received from the Chinese eBay sellers, including the good, bad and ugly. The best is from “Anon-co,” who also happens to be the top-rated PL-300WT Chinese eBay seller in buyer satisfaction.

Despite the quirks, these models do offer AM selectivity superior to all previous pocket radios, and because of uniformly high FM sensitivity and selectivity, have quickly become the

FM-DXing portables of choice—of any size. The PL-300WT models are available in three different colors—black, silver or gray, and have a standard plastic finish. The G8 models come only in black, and have a “rubberized” finish similar to that of the Eton E100. These models come with an English manual, vinyl carrying case, stereo earphones and registration card (G8 only). The current lowest price for a PL-300WT is \$49.99 (including shipping) from Chinese eBay seller “Trinityforevertrading,” and the current lowest price for a G8 is \$50.00 (including shipping to the USA) from Amazon.com.

Kchibo D92L

The D92L is one of two innovative receivers offering the full range of selectivity choices available from Silicon Labs’ 4734 DSP chip—1, 2, 3, 4 and 6 kHz options. As the first such Ultralight radio available to North American purchasers, this Chinese-market model was the subject of intense local interest in August, after its discovery by fellow Puyallup, WA resident Guy Atkins (following extensive web-based research).

China’s Kchibo company made a serious effort to ensure high quality in both the D92L and D96L DSP models, despite a previous reputation for making low-priced radios of questionable reliability. The emphasis on quality has paid off, and foreign orders have boomed—despite the fact that all the radios’ labels and documentation are in Chinese.

The D92L is the more basic model which tunes only in 9 kHz fixed AM steps (from 522-1710 kHz), although manual tuning steps of 1 kHz are available. It can tune the FM band from 64- 108 MHz (50 or 100 kHz steps), and can tune the SW band from 2.3- 21.85 MHz (1 or 5 kHz steps). 900 total memories are available, including 300 for AM. Five tuning methods are possible—manual, memory scan, direct frequency input, manual tuning shuttle, and auto-search. The digital clock is one of several functions shown in the bright green LCD display, along with battery condition, month, day and week (when power is off), and frequency, band, S/N ratio, signal strength, DSP selectivity choice (1, 2, 3, 4 or 6 kHz), and volume step (when power is on). There is a 10-90 minute sleep timer function, and an alarm which can use either live radio signals or a beeper to awaken the user. FM stereo reception is provided through the phone jack, and FM reception in general is excellent due to the DSP chip’s processing (although not quite up to the PL-300WT/ G8 standard). The volume can be adjusted in 40 digital steps, with pushbutton up and down controls.

The D92L uses a rechargeable 3.7v lithium-ion battery (type KL-01) for power, two of which are provided with the radio, along with a 220VAC adapter/ battery charger. The 220VAC adapter/ charger typically does not provide a full charge for the batteries when used with 110VAC house current, even when connected overnight. A 110 VAC 6 volt or 5 volt DC adapter can provide a full charge, if the user carefully connects the negative lead to the center conductor of the supplied adapter’s plug, and the positive lead to the outer conductor of the plug (this is the opposite of the D96L system, by the way).

The batteries are reputed to have a life span of 300-500 charging cycles. The D92L has a .25 watt speaker with 100 mw output power, and has a size of 5.25” x 3.25” x .8” (135 x 80 x 20 mm) and weighs 5 ounces (135g). It comes in black plastic cabinet, with all the control labels in Chinese only (and no export model available, or currently contemplated).

Unfortunately, the D92L has some severe quirks which limit its usefulness as an AM-DXing receiver. The loopstick receives serious RF hash from nearby digital circuitry, reducing AM sensitivity significantly on all frequencies. The direct frequency input keypad is little more than a joke, being far too small for the average North American user to operate without consternation. The model has a serious digital “chuffing noise” after any control is changed, further reducing AM sensitivity for about 12 seconds. The “soft mute” issue affecting the PL-300WT/ G8 models also affects the D92L, with negative effects on AGC, and the ability to tune 1 kHz further away from QRM when chasing weak signals. The model also suffers from the tuning heterodyne issue affecting the PL-300WT/ G8 units.

The Chinese control labels and Chinese owner’s manual may confuse native English speakers (a roughly translated English manual is posted in the Yahoo Ultralightdx file site), and warranty service is still a question mark, with no Kchibo service facilities on this continent. In competition with the slightly more expensive D96L, the D92L really has nothing to offer except for the savings of a few dollars (or yuan). It is available from seller “hygt” on <http://www.ecrater.com> for a price of \$63.60 including shipping to North America, and comes with two 3.7v rechargeable lithium-ion batteries, a 220VAC adapter/ charger, stereo earphones, clip-on external wire antenna, cloth/vinyl carrying case, Chinese owner’s manual and registration card.

Kchibo D96L

This model is Kchibo’s best DSP portable radio, and its combination of high AM sensitivity and variable DSP selectivity certainly makes it a formidable contender. The D96L is essentially a larger D92L with correction of most (but not all) of the AM-related deficiencies. The D96L has a larger loopstick for improved AM sensitivity, and there is no whining digital hash to cover weak signals. The radio will tune in both 10 and 9 kHz steps, and has a larger direct entry keypad for those with normal-sized fingers.

Otherwise, the D96L shares many features with the D92L, since they are both based on Silicon Labs’ 4734 DSP chip. AM frequency coverage is from 522-1710 (9 kHz steps) or 520-1710 (10 kHz steps), with 1 kHz steps available on the tuning thumb wheel. Wideband FM coverage is from 64- 108 MHz (50 or 100 kHz steps), and SW coverage is from 2.3- 21.85 MHz (1 or 5 kHz steps). There are 900 total memories, with 300 available for AM. Five tuning methods are possible—manual, memory scan, direct frequency input, manual tuning shuttle, and auto-search. The digital clock is one of several functions shown in the bright green LCD display, along with battery condition, month, day and week (when power is off), and frequency, band, S/N ratio, signal strength, DSP selectivity choice (1,2, 3, 4, or 6 kHz), and volume step (when power is on). There is a 10-90 minute sleep timer function, and an alarm which can use either live radio signals or a beeper to awaken the user. FM stereo reception is provided through the phone jack, and FM reception in general is excellent due to the DSP chip’s processing (although not quite up to the PL-300WT/ G8 standard). The volume can be adjusted in 40 digital steps, with pushbutton up and down controls.

The D96L uses a rechargeable 3.7v lithium-ion battery (type KL-1000) for power, two of which are provided with the radio, along with a 220VAC adapter/ battery charger. The 220VAC adapter/ charger typically does not provide a full charge for the batteries when used with 110VAC house current, even when connected overnight. The supplied USB cable also

allows battery charging from a computer, and several owners have obtained fully charged batteries this way. Another option to fully charge the battery is to use a 110VAC 6 volt or 5 volt DC adapter after rewiring the supplied adapter's plug, making sure that the positive lead is connected to the center conductor (the opposite of the D92L polarity system). The batteries are reputed to have a life span of 300-500 charging cycles. The D96L has a .25 watt speaker with 100 mw output power, and has a size of 5.6" x 3.5" x .9" (145 x 90 x 23mm) and weighs 7 ounces (200g). It comes in a black plastic cabinet with a metallic front panel, with all the control labels in Chinese only (and no export model available, or currently contemplated).

The D96L has some moderate quirks relating to design issues, which are mostly those that affect all of the Silicon Labs' 4734 DSP chip radios. The tuning heterodyne issue also affects the D96L, and the "soft mute" function affects AGC negatively, causing a large DX signal drop off when tuning 1 kHz farther away from QRM than the DX station's fundamental frequency. Like the D92L, the model also has digital "chuffing noise" whenever one of the controls is changed (with the LCD lit up), but it only continues for 5 seconds in the D96L (during which reception of weak signals may be compromised).

With the exception of the 1 kHz selectivity choice, the DSP filtering selections are displayed incorrectly on the LCD (the actual 2, 3, 4 and 6 kHz settings are displayed as 6, 4, 3 and 2 kHz respectively). The keypad numerals are hard to read. The Chinese labels on the radio controls and the all-Chinese owner manual (and other documentation) may confuse native English speakers (there is a roughly translated English owner's manual posted in the Yahoo Ultralightdx file site), and warranty service is still a big question mark, with Kchibo having no known service facilities in North America.

Despite the quirks, the D96L provides far greater DXing performance than its D92L predecessor. Several DXers have found the D96L to be the first DSP ultralight radio with 1 kHz selectivity competitive for serious 9 kHz-split transoceanic DXing in North America, with performance roughly similar to the premium Murata CFJ455K5 ceramic filters transplanted into the Eton E100 units. As such, it really sets a high standard for relatively inexpensive pocket radios. The Kchibo D96L is currently available only from China, with the seller "hygt" offering the radios on <http://www.ecrater.com> for \$70.46 including shipping to North America, and the same seller ("hygt369") offering the units on eBay for a bid price of \$54.77, plus \$16.80 shipping (\$71.57 total). The D96L is also available from <http://www.trafind.com> for \$52.58 plus \$11.60 shipping (\$64.18 total), the current lowest price for North American purchasers. The radio comes with two rechargeable 3.7v lithium-ion batteries, a dedicated 220VAC adapter- charger, USB cable, stereo earphones, a clip-on external wire antenna, cloth/vinyl carrying case, Chinese owner's manual and registration card.

Shootout Day Preparations

To prepare for the live signal competition, all 7 contenders were given fresh batteries (or recharged batteries, in the Kchibo models), operational checks, and in most cases, AM-band alignments (details on request). Fringe stations were chosen to test each radio's sensitivity and selectivity during mid-day ground wave conditions, and detailed checks were made for spurious signals and images in the author's typical suburban location in Puyallup, Washington (35 miles south of Seattle). Nulling tests were conducted outdoors, away from electrical house wiring and other metallic distractions. Quality control data includes all reports received from owners of each model.

Next month we find out what happened on "Shoot Out Day" in Part II

NORTH AMERICAN NEWS

✉ Sand Gap, Bursea, Holme-on-Spalding Moor York YO43 4DF

with Andrew Brade

e-mail: na-news@mwcircle.org

Hello again.

Here is what's been happening on the North American AM dial. May I express my gratitude to the organisations which make this resume possible? Thanks this month to: - IRCA, DX Mid-America, ABDX, NRC DX News, FCC, DXLD.

- 610 CHNC Simulcast period extended to 1.12.2009.
- 1150 CHGM
- 890 WAMG Dedham, Boston – the station ceased broadcasting its ESPN format on 14th September and is currently silent (explaining why WLS is now commonly reported in UK!)
- 1310 WCCW Traverse City MI – increases daytime power to 50kW, nights remain the same at 7.5kW.
- 1510 KGA Spokane WA – reduction in nighttime power to 15kW from 50kW application granted.
- 1660 WFNA Charlotte NC – call changes via WBMX to WBCN with format change from sport to talk.

Here is a general round up of what's been happening on the North American AM dial courtesy of our friends at the **International Radio Club of America and NRC.**

FACILITY AND PARAMETER APPLICATIONS / GRANTS

IRCA have combined the facility and parameter applications and grants into one section effective his issue for ease of typing the column, note key legend below

(A) = application, (G) = grant

| | | | |
|-----|------|-----------------------|--|
| 540 | WETC | Wendell-Zebulon, NC | 8000/500 DA-2 to 10000/500 DA-2 (A) |
| 540 | WGOP | Pocomoke City, MD | 500/243 ND to 1000/1000 DA-2 (A) |
| 540 | WLIE | Islip, NY | 2500/220 DA-2 to 10000/250 DA-2 (A) |
| 540 | WWCS | Canonsburg, PA | 5000/500 DA-2 to 3800 DA-D (G) |
| 550 | WASG | Atmore, AL | 10000/143 to 2500/19 ND (G) |
| 580 | KSAZ | Marana AZ | Application to move to Queen Creek with D3 7000/0 Dismissed. |
| 590 | WDWD | Atlanta, GA | 5000/4500 DA-2 to 12000/4500 DA-2 (G) |
| 610 | WVBE | Roanoke VA | Licensed for U4 5000/1000, WVBE has a CP for U4 10000/2500. This amendment requests U4 7000/2500. |
| 620 | KJOL | Grand Junction, CO | 5000/79 ND to 5000/320 DA-N |
| 630 | KTKK | Sandy, UT | 1000/500 DA-2 to 500/500 DA-2 (A) |
| 640 | WMEN | Royal Palm Beach, FL | 7500/460 DA-2 to 50000/25000 DA-2 (G) |
| 648 | WVUV | Leone, American Samoa | 10000/10000 ND to 5000/2000 ND (G) |
| 670 | WVVT | Essex Junction, VT | 50000/300 DA-3 to 15000/260 DA-3 (A) |
| 680 | WRGC | Sylva, NC | 1000/250 DA-N to 5000/210 DA-N (G) |
| 700 | WDMV | Walkersville, MD | 5000 DA-D to 50000 DA-D (A) |
| 720 | WVOA | Dewitt, NY | 2500/390 DA-N to 10000/390 DA-2 (A) |
| 730 | WLTQ | Charleston, SC | 1100/103 ND to 5000/103 ND (G) |
| 730 | WOHS | Shelby, NC | 1000/160 ND to 10000/190 ND (A) |
| 740 | WNYH | Huntington, NY | 25000/43 DA-2 to 20000/50 DA-2 (A) |
| 770 | KCBC | Riverbank, CA | 50000/1000 DA-2 to 50000/4100 DA-2 moving to Manateca (A) |
| 770 | WEW | St Louis, MO | 1000 ND-D to 10000/200 DA-3 (A) |
| 790 | KBRV | Soda Springs, ID | 5000/29 ND to 50000/27 ND (A) |
| 790 | KWSW | Eureka, CA | 5000/112 ND to 5000/750 DA-N (G) |
| 790 | WAEB | Allentown PA | Licensed for U4 3600/1500, is now operating at (unknown) reduced power levels, or up to 25% of those powers non-directional. |
| 810 | KLVZ | Brighton CO | CP granted for U4 10000/430. The new day pattern directs a large circular plot to the southwest, while the nighttime facilities remain the same. |
| 810 | WKVM | San Juan, PR | 50000/50000 DA-1 to 50000/50000 DA-2 (A) |
| 820 | WCPT | Willow Springs, IL | 5000 ND-D to 5000/1500 DA-N (G) |
| 830 | WACC | Hialeah, FL | 1000/1000 DA-2 to 5000/1000 DA-2 (A) |
| 840 | KXNT | North Las Vegas, NV | 50000/25000 DA-2 to 50000/16000 DA-2 (A) |
| 840 | WHAS | Louisville KY | Granted auxiliary facilities of U1 50000/50000 from a new 196' tower located or 136 meters east of their 654' regular tower. |
| 850 | WFTL | West Palm Beach, FL | 50000/24000 DA-2 to 50000/20000 DA-2 (A) |
| 860 | KPAM | Troutdale, OR | 50000/5000 DA-N to 50000/15000 DA-N (G) |
| 860 | WAMI | Opp, AL | 1000/47 ND to 250 ND (A) |
| 860 | WFMO | Fairmont, NC | 1000/12 ND to 50000/740 DA-2 (G) |
| 860 | WWDB | Philadelphia, PA | 10000 DA-D to 10000 DA-2 (G) |
| 870 | KRLA | Glendale CA | Application for U4 50000/32000 Dismissed. |
| 870 | KPRM | Park Rapids, MN | 25000/1000 DA-N to 40000/1000 DA-N (G) |
| 890 | WFAB | Cieba PR | Licensed for U1 250/250, WFAB applied for U1 2500/600. This amendment requests U1 5000/600. |
| 900 | KAML | Kenedy-Karnes Cty, TX | 250/70 ND to 500/500 DA-3 (A) |
| 900 | new | Bend, OR | 50000/2000 DA-2 to 50000/2400 DA-2 (G) |
| 910 | WAVL | Apollo, PA | 5000/69 DA-2 to 6700/700 DA-2 (G) |
| 910 | WUBR | Baton Rouge, LA | 1000/1000 DA-1 to 1200/51 DA-2 (G) |
| 920 | WURA | Quantico, VA | 2000/970 DA-2 to 7000/970 DA-2 (A) |
| 930 | WEZZ | Monroeville, AL | 5000 ND-D to 450 ND (A) |
| 940 | KDIL | Dillon, MT | 10000/350 DA-2 to 1000/250 DA-2 (G) |
| 940 | KICE | Bend, OR | 10000/60 DA-2 to 10000/95 DA-2 (G) |
| 940 | WCSY | South Haven, MI | 1000/5 DA-2 to 300 DA-D (G) |

950 WPEN Philadelphia, PA 25000/21000 DA-N to 43000/21000 DA-2 (G)
 960 KOVO Provo, UT 5000/1000 DA-N to 50000/940 (G)
 960 WFIR Roanoke, VA 5000/5000 DA-N to 10000/4800 DA-N (G)
 960 WSVU North Palm Beach, FL 1200/1400 DA-2 to 2400/1400 DA-2 (G)
 970 KFEL Pueblo, CO 3200/180 ND to 15000 DA-D (G)
 970 KHVN Ft. Worth, TX 1000/270 ND to 600/245 ND (A)
 980 KGLN Glenwood Springs, CO 1000/225 ND to 2000/225 ND (G)
 980 WJYK Chase City, VA 500 ND-D to 1000/26 ND (G)
 980 KRTX Rosenberg/Richmond TX U5 5000/5000 (A)
 990 WLEE Richmond, VA 1000/13 ND to 4000/2000 DA-2 (G)
 1010 KIHU Tooele, UT 50000/194 DA-2 to 50000/225 DA-2 (A)
 1010 WFGW Black Mountain, NC 50000/500 DA-1 to 47000/90 ND (A)
 1010 WOLB Baltimore, MD 250/30 ND to 1000/30 ND (A)
 1010 KXEN St. Louis MO CP granted for U4 50000/420. Along with the slight reduction in night power, they have gone from four to five towers, making some changes to the pattern.
 1030 KVOI Cortaro, AZ 10000/1000 DA-2 to 10000/1800 DA-2 (A)
 1040 WZNA Moca, PR 5000/245 DA-D to 9000/250 DA-2 (A)
 1050 KTCT San Mateo, CA 50000/10000 DA-2 to 50000/50000 DA-2 (A)
 1050 WFSC Franklin, NC 1000/153 ND to 5000/153 ND (A)
 1050 WJOK Kaukauna, WI 1000/500 DA-1 to 5000/1000 DA-2 (G)
 1050 WEPN New York NY U4 50000/50000 (A)
 1050 WZAA Silver Spring, MD 3500/44 ND to 10000/44 ND (G)
 1080 KGVY Green Valley, AZ 1000 ND-D to 1400 ND-D (G)
 1080 WHOO Kissimmee, FL 19000/190 DA-2 to 27000/2000 DA-3 (A)
 1080 WOAP Owosso, MI 1000 ND-D to 50000/4500 DA-2 (G)
 1090 KUCU Farmington, NM 1500/250 DA-2 to 10000/250 DA-2 (G)
 1100 KWWN Las Vegas NV U4 22000/2000 (G)
 1110 KJSA Mineral Wells, TX 20000 DA-D to 50000 DA-2 (G)
 1110 WOMN Franklinton, LA 1000 ND-D to 50000/250 DA-3 (G)
 1120 KANN Roy, UT 10000/900 DA-2 to 10000/1100 DA-2 (G)
 1120 KTXW Manor, TX 250/153 DA-2 to 430/153 DA-2 (A)
 1130 WEAJ Camden, SC 5000/7 ND to 1000/9 ND (G)
 1140 KCXL Liberty, MO 500/5 ND to 4000/6 ND (A)
 1140 KHFX Cleburne, TX 5000/710 DA-2 to 25000/710 DA-2 (A)
 1150 KCKY Coolidge, AZ 5000/1000 DA-2 to 5000/185 DA-2 (G)
 1150 WDEL Wilmington, DE 5000/5000 DA-2 to 10000/5000 DA-2 (G)
 1150 WSNW Seneca, SC 1000/58 ND to 370/58 ND (A)
 1150 WHBY Kimberly WI CP granted for auxiliary facilities of U1 83/83.
 1150 NEW Easton CA Initial application was for U4 700/10000, then amended to U4 260/5500. The latest application is for U4 260/5000.
 1160 WCFO East Point, GA 50000/160 DA-2 to 50000/138 DA-D (G)
 1160 WCXI Fenton, MI 1000/1000 DA-1 to 15000/1000 DA-2 (A)
 1170 WPLX Germantown, TN 1000 ND-D to 5000/26 DA-3 (G)
 1170 WRPM Poplarville MS Having been just granted a CP to move to from 1530 with D3 5000/0, WRPM now has applied for an amendment for D1 1000/0 CH 1000 on 1170.
 1180 KORL Honolulu, HI 1000/1000 ND to 330/140 ND (G)
 1190 KNUV Tolleson, AZ 5000/250 DA-2 to 400 (G)
 1190 KREB Bentonville, AR 5000 ND-D to 5000/14 ND (G)
 1190 KRFT De Soto, MO 10000/22 DA-2 to 10000/6500 DA-2 (G)
 1190 new White Hall, AR 10000/350 DA-N to 25000/350 DA-2 (A) (from Pine Bluff)
 1200 WRTO Chicago, IL 10000/1000 DA-2 to 20000/4500 DA-2 (G)
 1210 KEBR Rocklin, CA 5000/500 DA-D to 5000/1800 DA-2 (A)
 1210 KQEQ Fowler, CA CP granted for D3 5000/0 moving to, and using three towers of, the KXEX-1550 four-tower site in Herndon
 1210 WDGR Dahlongega, GA 10000 ND-D to 10000 ND (A)
 1210 KTBK Auburn-Federal Way WA Licensed for 27500/10000, applies for an auxiliary licence for U4 27500/227 due to flooding problems.
 1220 WSRQ Sarasota, FL 1000/159 DA-2 to 1000/39 DA-2 (G) This currently silent station has been granted a Special Temporary Authorization (STA) for D1 150/0 using a 145' vertical long wire.

| 1600 | WLAA | Winter Garden, FL | 2200/35 ND to 4000 DA-D (G) |
| 1660 | WWRU | Jersey City NJ | Licensed for U4 10000/10000, WWRU has a CP slightly loosening the small lobe headed to the northeast. But due to the same reasons given in the WKDM STA (above), they are operating on the CP until "late 2010". |

CONSTRUCTION PERMITS ON THE AIR

The following CPs are on the air:

| | | | |
|------|------|--------------|---|
| 960 | WLPR | Prichard AL | U1 6000/32 is on. The '6000' caught me by surprise, as their CP had read '5000'. |
| 1060 | KOAI | Van Buren AR | Operating under an Special Temporary Authority (STA) with D1 125/0 after component failure of their directional tuning unit damaged the transmitter. |
| 1180 | WPLX | Turrell AR | Move here from 1170 kHz is on the air with U7 5000/26 CH 3500 from a new 2-tower array. All three patterns are dissimilar, with the day and CH patterns headed to the northeast, and the small night pattern directed toward the southwest. |

1270 WNOG Naples FL U4 5000/5000 is now on, increasing the nighttime power and adjusting the pattern slightly from southwest to due south, and changing a small east lobe to one heading west. I'll bet they put a great signal over the Keys . . . and Havana.

1330 WKTA Evanston IL U4 5000/110 is on the air.

1410 CFUN Vancouver BC Began testing its new transmitter in late August. Similar testing for CKST-1040 began shortly thereafter. Both stations will be U4 50000/50000 from the new site. CFUN will radiate directionally from two towers with the same pattern (huge balloon to the northwest) day and night, while CKST will be directional from 5 towers with different patterns day (kidney-shaped with lobes to the east-northeast and west-northwest) and night (same shape only rotated counter-clockwise with lobes to the north and southwest). Full operation is expected in a few weeks.

1430 WION Ionia MI U2 4700/330 is on. A reduction of 300 Watts during the day affords them the opportunity to go non-directional and pick up some coverage to the east, south and west.

1480 KRAE Cheyenne WY U1 1000/72 is now on, from a new 200' tower.

1490 KWUD Woodville TX U1 1000/1000. Woodville is about 80 miles northeast of Houston.

1510 KCKK Littleton CO U4 10000/25000 is now on the air.

1520 WCHE West Chester PA D4 1000/0 CH 800 (adding the CH operation) is now on. The CH pattern replicates the day pattern, with a large lobe to the northeast and a smaller lobe to the southwest.

1550 KIVA Albuquerque NM U1 50000/27.

1580 WNTF Bithlo FL D3 10000/0. They added two 140-foot towers to their original single stick to produce the new pattern, which directs the bulk of the signal to the northwest, with small lobes to the northeast, southeast and southwest.

PUBLIC LISTINGS COURTESY OF THERADIOJOURNAL.COM AND 10000WATTS.COM:

690: KNKN 106.9 and KRMX 690 Pueblo CO go silent pending sale; they're changing calls to KIQN and KSIP, respectively. (Note: station still silent as of 8/22/09).

780: CFLT 92.9 Dartmouth/Halifax NS signs on with soft AC as "Lite FM," replacing now-silent CFDR 780.

950: WNTD 950 Chicago IL adds jazz at night as "Avenue 950."

980/1480: WAZS 980 Summerville/Charleston SC drops oldies "Rocket 980" to simulcast Spanish top 40 "El Sol" WAZS-FM 98.9 McClellanville SC. The "El Sol" simulcast also replaces talk/sports on WZJY 1480 Mt. Pleasant SC.

1390: WRSC 1390 State College PA flips from news-talk (now heard on sister station WRSC-FM 103.1) to progressive talk, retaining a simulcast of the FM station's morning show.

1490: WKDR 1490 Berlin NH signs on as "Kiss 102.3," simulcasting sister station WXXS 102.3 Lancaster NH.

1570: WNDA 1570 New Albany IN flips from sports "Indiana 1570" to oldies "Kool 1570," simulcasting with WTSZ 1600 Eminence KY.

That's all for this month, 73 - Andrew

Cuba

Radio Rebelde goes easy listening

Radio Rebelde was founded by Che Guevara in 1958. It has gone from bastion of youthful revolution, and playing Guerrilla Commander, to playing classic American songs and Cuban pop hits. If you listened to this morning's broadcast, instead of first-hand reports on the battles against the Batista Army, you would have heard back to back songs by Nat King Cole ("That's All" and "Mona Lisa") and the Lloyd Price tune "Personality." The latter was in Spanish. Like a 45 record spinning on a turntable.

Mexico

The Mexican Comisión Federal de Telecomunicaciones says that it has now initiated the work of assigning FM frequencies to the stations wishing to switch from AM to FM. In early August the frequencies for Veracruz, Chiapas, Oaxaca and Guerrero were announced. The remaining states will follow according to a running schedule. Out of the total of 850 AM stations, 450 are expected to switch to the FM band, where a total of 1176 allocations are available.

Hello friends,

The nights are becoming longer, so mediumwave comes alive! Many nice loggings have been made already. So start your receivers, clean up your ears and have a lot of listening fun. Don't concentrate on TA-DX but look also to the other side of the globe! The following tips will help you in finding the stations.

Algeria

Algeria to change working week to Sun-Thurs

Algeria's government has decided to break with the 33-year-old practice of observing the weekend on Thursdays and Fridays. The cabinet has ruled that starting from next month the official weekend will be moved to Friday and Saturday, in line with the practice in many Middle Eastern states.

Investors complain that having the weekend on Thursdays and Fridays, with Saturdays and Sundays as working days, meant they only had three days a week to conduct business with partners outside Algeria. The practice had been costing Algeria between \$500 and \$700 million in lost business each year, according to estimates from business lobby groups.

Saudi Arabia and Yemen also mark the weekend on Thursday and Friday. Kuwait switched to a Friday-Saturday weekend two years ago as part of efforts to promote its non-oil economy. "It's a very good move," said one Algerian businessman who works with foreign companies. "If they moved it to Saturday and Sunday it would be even better," said the businessman, who did not want to be named.

Andy Sennitt comments: This will also affect the radio & TV schedules, especially regional stations. (*Andy Sennitt via Media Network Weblog*)

Denmark

The Danish Parliament has asked the Culture Minister, Mrs. Carina Christensen, to outline the opportunities and prospects of using DRM digital radio for long-range broadcasts. The question comes after nine months of successful DRM tests on 243 kHz from the historical longwave towers of the Kalundborg transmitter, which underwent a five year lifetime extension last year.

The previous long-range AM analog transmissions on 243 kHz were shut down in early 2007, despite protests from maritime organisations, politicians and

listeners. At the time, public service broadcaster DR told Radionyt.com that it would keep the 243 kHz frequency for future DRM transmissions, in line with the provisions in the broadcaster's 2005 Media Initiative (page 26) that "present transmissions ... cease in 2007 to allow the frequencies to be reserved for DRM technology". Whereas the remaining 250 kW high-power transmissions from Kalundborg on 1062 kHz have limited range and can be received over long distances only at night, reception of 243 kHz is virtually constant around the clock and covers most of Western Europe, the North Sea, the Faroe Islands, Iceland and the southern parts of Greenland.

Internationally, India has announced that it will expand its present DRM transmissions with a national network of 78 medium-range DRM broadcasting stations over the next five years. In Russia, a state organisation has released additional frequencies to cover that country with long-range DRM broadcasts. With a combined population of 1.3 billion, these two countries are expected to trigger the mass production of affordable DRM receivers, and exhibited new low-cost designs and chipsets at the latest international IFA radio exhibition.

The major Western European countries already have extensive long-range DRM transmitter networks, with the BBC, RTL and German public-service broadcasters in front. Egypt

Egyptian Radio and Television Union Boosts AM Radio Signals With New Thomson DRM Transmitters from Grass Valley. The Egyptian Radio and Television Union (ERTU) has placed an order with Grass Valley™ for two Thomson TMW 2050D 50 kW medium-wave digital transmitters and complementary antenna systems to upgrade its existing AM radio broadcast network and ensure reliable regional coverage.

The new Thomson DRM transmitters and antenna systems, which are now being installed in Cairo, Egypt, will be on the air in October 2009, with Grass Valley engineers providing complete design, installation, commissioning and training services. The installation required a special antenna design due to limited space available. ERTU has used Thomson transmission technology since 1969.

"Grass Valley is committed to advancing DRM technology for AM and FM radio providers by continuing to invest considerable resources in the future of radio broadcast technology," Jeff Rosica, Senior Vice President of Grass Valley. "Broadcasters like ERTU will see significant improvements in their terrestrial service by using our latest generation of radio transmitters and antennas and that's why we continue to sell many such systems around the world."

By installing the new technology, ERTU will realize a significant reduction in operational and maintenance costs, thanks to the Thomson systems' innovative design and configuration of its internal system components. Thomson antennas provide high-efficiency to ensure that programs arrive at the given coverage area with the lowest possible energy consumption at the broadcasting site.

Digital Radio Mondiale (DRM) is the universal, open standard, digital radio system for short-wave, medium-wave, and long-wave digital radio for frequencies below 30 MHz. It has been standardized by the International Telecommunication Union, and Thomson is one of the founder members of the DRM consortium, which helped develop the key specifications. (*Press release from digital transmission producer Grass Valley IBC — Stand 1.D11 via Alokesh Gupta via DXLD*)

Germany

The planned move of BFBS Germany from Herford to Bergen- Hohne, as mentioned in <http://www.w4uvh.net/dxld9013.txt> has meanwhile been carried out: <http://www.bfbs-tv.com/pages/extranet/bfbs-germany-moves---dur-53-i-2042.php> (*Kai Ludwig via DXLD*)

The Hessischer Rundfunk, Germany, will close down its two 594 Khz txs by the end of 2009, due to high financial costs. (*Jurgen Bartels via MWDX*)

Iceland

LW programming in Iceland. This is unverified by me, but it seems that Eidar (207kHz) broadcasts mostly P1 nowadays while Gufuskálar (189kHz) is fed P2. Before, both were fed a mix of P1 and P2. The URL below points at a site with field strength maps for the two LW transmitters. The text is in Icelandic, though.

http://www.fjarskiptahandbokin.is/index.php?Itemid=125&id=461&option=com_content&task=view. (*Reynir Stefansson via Mediumwave.info*)

Kenya

The Kenya Broadcasting Corporation (KBC) is to stop using short and medium wave frequencies so as to save on costs, writes Dennis Itumbi for journalism.co.za. Information Permanent Secretary Dr Bitange Ndemo said the frequencies were consuming too much power and were already overtaken by technological advances.

The national broadcaster has also committed to reduce its power bills by at least Shs. 25 million (\$330,000) as a way of dealing with its debts. After a meeting with the Parliamentary committee on Energy, Communication and Information, he said a review of spending at the KBC would be conducted so as to make it more competitive. (*Journalism.co.za via Media Network weblog*)

Kuwait

According to the Middle East Digital Production website the government of Kuwait has issued a tender for the Supply, installation, integration, testing, commissioning & guarantee of 25 kW MW broadcasting system at Subbiya Radio Station. I cannot find any additional information, but the website Kuwaittenders.com has an entry for 23 July for Supply, installation and delivery of radio broadcasting system with 1530 kHz frequency which is probably the same one. I rejected the invitation to pay \$750 for a subscription to find out <http://www.digitalproductionme.com/article-1622-kuwait-issues-new-round-of-broadcast-tenders/> <http://www.kuwaittenders.com/CategoryResult.asp?CategoryId=30> (*Andy Sennitt via Media Network Weblog*)

Netherlands

Amsterdam-based commercial radio station Magic Jazz is now broadcasting on mediumwave 1557 kHz 24 hours a day. Amsterdam City Council has not yet given permission for a permanent transmitter site, so the station is being forced to use a very low power transmitter in the city centre.

A spokesperson for the station said it's incomprehensible that the national government can award the station a licence, but a lower authority can frustrate its plans. The spokesperson said that a number of suitable locations have been identified and discussed with the council, but a signed agreement is still lacking. The problem with the current location is that because it's in a built-up area, only low power can be used to avoid causing RF interference rather than the 1 kW for which it is licensed. The station is, however, also available to digital customers of cable company UPC, and via the Internet. (*RadioFreak.nl*)

Pakistan

Instead of upgrading the equipment and replacing the old transmitter of Lahore Station, one of the major medium wave (MW) stations of the Radio Pakistan [630 kHz], has been shutdown completely on the directions of Director General Murtaza Solangi on the other day. This medium wave station had been working since 1937 and was widely listened throughout the world, including the main cities of India on 630 kilo watts (KW). It played a key role in the wars of 1965 and 1971 by broadcasting patriotic national songs.

Interestingly, besides closing the chapter of Lahore Station, Solangi also sealed another major news and current affairs channel of Lahore Station that was being listened on 1332 kilo watts for the last 4 years. It is pertinent to mention that 1332 KH was established by investing almost five hundred million rupees. An official of Radio Pakistan disclosed that the Ministry of Information and Broadcasting was keeping mum over the solo initiative, as the DG has close relations with higher authorities. That is the reason why he is making such decisions from the time he took the charge of this key post. The source further says the federal ministry is authorised to establish or close Radio Pakistan's any station but it has remained silent over this solo step owing to various reasons.

The DG Radio Pakistan is of the view that the closed station was in loss costing expenditure; moreover, old infrastructure was not fulfilling the modern requirements of broadcasting. For meeting modern needs, on the further directions of DG, a new short wave channel FM 93 has been established by replacing Lahore Radio Station, which is listened on short range covering the area of 30 or 40 km. (*The Nation.com.pk via Mediumwave.info*)

LATER: Radio Pakistan Lahore is loud, clear - not silent!

The Pakistan Broadcasting Corporation (PBC) has clarified a news item published in a section of the press that Radio Pakistan Lahore has gone silent. The transmission of age old mediumwave transmitter which aired programmes on 630 kHz has not been shutdown but its hours have been reduced due to lack of its reach in the city of Lahore and also due to its old age technology and huge cost of operation. As soon as a new transmitter is available, it will be replaced, said a statement issued by PBC.

That said, this transmitter still airs its daily programmes Punjabi Darbar without fail which is heard in parts of Indian Punjab. Radio Pakistan Lahore is now transmitting its programmes on a 5 kW FM transmitter and is heard loud and clear in the city of Lahore. The broadcast hours of Radio Pakistan Lahore have been increased from 110 to 154 weekly and it has started new creative programmes to cater to the changing needs of Lahore populace. The statement termed the reports about sacking staffers and announcer as baseless and said on the contrary Radio Pakistan Lahore intends to hire more staff to meet the programming needs as it will soon broadcast 22 hours a day.

PBC has also denied the report of closing down of 100 kW mediumwave transmitter on 1332 KHz and said transmitter is down because of malfunctioning of some of the components of this German made transmitter. The engineers are working to fix the problem and expect resumption of transmission fairly soon. The PBC said the problem related to this transmitter could have been fixed earlier had the previous administrations planned and procured the spare parts of the transmitters. (*Associated Press of Pakistan via Media Network weblog*)

Radio Pakistan plans a number of new mediumwave transmitters. With mediumwave transmission of Radio Pakistan Larkana already off the air since 14 August, the recently-installed 2.5 kW transmitter for FM-93 designed to broadcast up to 80 kilometres radius, has also proved an enigma for the faithful listeners who claim it can only be heard within a 20-25 km radius.

The 2.5 kW transmitter replaced the 1.5 kW transmitter of FM-101 after its mast collapsed in December 2008 and the Pakistan Broadcasting Corporation renamed it FM-93. The radio station

was commissioned in October 1995 and was inaugurated by Benazir Bhutto. Sources in the PBC and listeners of FM-93 told Dawn on Tuesday that the new transmitter could hardly be heard beyond 20 to 25 km. It was neither properly tuned nor were its antennas properly fitted, restricting the transmission up to 20 km radius, said the sources. The sources said the officials at the radio station had refused to give certificate to the mast installers about the transmission range without carrying out tests and had informed PBC senior management about the faults. Najeeb Alam, the engineering manager of the PBC, had sent a letter to the controller of the procurement cell, requesting him to ask the mast company to send experts to check the FM-93 transmitter, they said. The old 1.5 kW transmitter's range was 60 to 70 km. A large number of radio listeners recently held a demonstration in Qambar and protested over small range of FM-93. They called for rectifying the fault.

The Director General of PBC, Ghulam Murtaza Solangi, said that mediumwave transmission had been temporarily suspended in Larkana because the old transmitter was giving barely 40 per cent output. It was, therefore, not fair to keep it operating and it would be replaced by a newly approved 100 kW mediumwave transmitter, which would take at least a year to get operational, he said. He claimed the range of old mediumwave transmitter of the Lahore radio station had almost doubled after necessary repairs and admitted the transmission of 100 kW mediumwave transmitter at Karachi had also been off the air temporarily. A new 5 kW FM transmitter installed in Karachi was quite enough for the whole metropolitan area, he claimed.

A 100 kW mediumwave transmitter purchased for Larkana was shifted to Turbat by the previous government and replaced with a 10 kW one, said the sources. The mediumwave transmitter of Khairpur radio also remained off the air for over six days, but the DG claimed it was now back on the air after necessary repairs. Mr Solangi said that a new 100 kW mediumwave transmitter would be installed in Hyderabad within a year and the PBC was planning to install mediumwave transmitters in Muzaffarabad, Multan, Guwadar and Turbat because the budget had already been allocated for them in the current fiscal year. He disclosed that an estimate for installation of 1000 kW mediumwave transmitter in Gwadar, which would broadcast to Iran, Afghanistan and Middle East, had been submitted to the Ministry of Information and hoped it would be okayed soon. New 150 kW mediumwave transmitters would be installed in Quetta and Dera Ghazi Khan while a 300 kW mediumwave transmitter would be installed in Peshawar, he said. (*Dawn.com via Andy Sennitt, Media Network weblog*)

Requiem for a falling giant! The days of Radio Pakistan appear to be numbered. The medium wave channel that, through well over half a century, remained a mainstay of people's lives and provided everything from news and crop season reports to song, poetry and drama, is rapidly falling silent: without warning even to people working in the channel Radio Pakistan Karachi has been switched off and the broadcast hours of Radio Pakistan Lahore have (on medium wave) been reduced to a pitiable 30 minutes a day. The reason appears to be the compounded problems of aging medium-wave transmitters, and the challenge offered by the FM stations. Instead of updating its equipment and pulling up its socks, the Pakistan Broadcasting Corporation appears to be in the process of letting Radio Pakistan sink without a trace, all requiems left unsung. (*Hajrah Mumtaz, DAWN Media Group*)

Slovenia

594 kHz and FM: Since June 22nd, 2009 the Slovenian stations Radio Odmev and Alpski Val are producing a joint programme called Primorski Val aired from 2000-1600 Local Time on the frequencies of both stations. Local programmes of Radio Odmev and Alpski Val are now only on-air between 1600-2000 Local Time. So the schedule for 594 kHz is: 1600-2000 LT Radio Odmev / 2000-1600 LT Primorski Val. (*Patrick Robic via Mediumwave.info*)

South Africa

An application has been submitted to the Independent Communications Authority of South Africa (ICASA) to have mediumwave frequencies re-designated from commercial to open. This would pave the way for stations such as Radio Veritas to apply for a mediumwave licence. There are 18 unused mediumwave frequencies that are locked as commercial.

Radio Veritas' Father Emil Blaser said, "If they change the allocation from commercial to open then there would most likely be many community radio stations that might like to bid for those frequencies." (*eyewitnessnews.co.za via Media Network weblog*)

Spain

Biribilondo is the new transmitter site for RNE and EITB in San Sebastián (province of Guipúzcoa, Basque Country, Spain). It consist in 4x50 Kw transmitters tetraplexed into the same antenna. It works on 558 (RNE-R5TN), 774 (RNE), 963 (R.Euskadi, Spanish lang.) and 1476 (Euskadi Irratia, Basque lang.). Note the interchanged frequencies of Radio Euskadi between San Sebastián and Vitoria (probably to meet the needs of the tetraplexer instaled in San Sebastián). This is the actual situation of the EITB stations:

Euskadi Irratia:

1197 EAJ162 Vitoria (Estíbaliz)

1386 EAJ362 Bilbao (Ganguren-Artxanda)

1476 EAJ562 San Sebastián (Biribilondo-Zubieta)

Radio Euskadi:

756 EAJ462 Bilbao (Ganguren-Artxanda)

819 EAJ262 Vitoria (Estíbaliz)

963 EAJ662 San Sebastián (Biribilondo-Zubieta)

View on the Vamesa transmitters

Some more info and photo of the equipment in the site of the supplier, VIMESA:

http://www.vimesa.es/web/noticias/2009/03/Tetraplexor_OM_RNE/Noticia.shtm (*Mauricio Molano via EMWG*)

In San Sebastian, Euskadi Irratia has left 1161 kHz and is now transmitting on 1476 kHz. The two French frequencies 1071 and 1161 kHz previously occupied by Euskadi Irratia (Bilbao and San Sebastian) are now free again. French authorities asked that to Spain since several years. (*Michel via Steve Whitt*)

From September 1st, the local news bulletin on RNE R5-TN stations returned to 09.15 local time (07.15 UTC). The duration did not change: 15 minutes. (*Mauricio Molano via MWDX*)

Vanuatu

Anyone else hearing Vanuatu on 1179 at higher level. Last week I logged it at the best level yet. Only the second time I've heard it. May be their good friends in China have donated them a 5 Kw rig ??? (*Chris Martin via mwoz via Mediumwave.info*)

VTBC are using two new 10kW transmitters supplied by NZ Aid – 1125/1179. RNZI technical people were at VTBC recently getting the new DRM capable SW transmitter on air as well and have generally been making sure that everything around that's meant to work is running properly. This may be why 1179 is suddenly sounding better. (*David Ricquish via mwoz via Mediumwave.info*)

First voice on Caroline, Simon Dee dies

29 August, 2009

Simon Dee, the first presenter to be heard on Radio Caroline in 1964 has died of bone cancer at the age of 74. Simon spoke those now famous words, welcoming listeners to Radio Caroline on 199 metres, "Your all day music station". He then went on to find fame on television, hosting television chat shows which attracted 18 million viewers in the late sixties.

Simon was born Cyril Nicholas Henty-Dodd and was also the first pirate broadcaster to become a BBC star when he was offered a show on the Light Programme in 1965 which also aired on Radio 1 in 1967.

He also had spells on Radio Luxembourg, Radio 210 in the 1980s, and BBC Radio 2 in 2003. Radio Rewind has a page all about Simon Dee, including sound clips.

Former colleague Tony Blackburn said on his Facebook profile today: "So sorry to hear that my old friend Simon Dee has died. I was out on Radio Caroline with him in the 60's and loved him. He was a brilliant broadcaster who threw it all away sadly because he couldn't handle fame. I appeared on his very successful Dee Time Saturday night TV show, people forget how big he was. My memories of Simon will always be happy ones."

RSL & LPAM News

Details of the football clubs' broadcasting their home games are as follows:

| Football Club | Station | October 2009 | November, 2009 |
|----------------------|-------------------------|----------------------------------|--------------------------------|
| Crystal Palace | Palace Radio 1278 kHz | 3 Blackpool 24 Nottingham For | 7 Middlesborough 28 Watford |
| Blackburn | Radio Rovers 1404 kHz | 17 Burnley | 7 Portsmouth 28 Stoke |
| Rushden and Diamonds | Radio Diamonds 1503 kHz | 3 Altrincham 17 Tamworth | 14 Histon 28 Wrexham |

Radio J-Com, Leeds 1386 kHz was heard testing on 1386 giving address PO Box 1386 Leeds LS17 1FX Call the studio on (0113) 218 5836 Website www.radiojcom.com Serving the Leeds Jewish community. Carrier is just offset below the nominal frequency – I measure 13.994 kHz. The test transmission says that they will be on air "in a few days' time". The station is now on air and their web site states "We broadcast 24 hours a day on 1386AM in Leeds and on the internet, from our purpose built studio"

The website has some interesting pages including one with "free downloads" -

Many thanks to the following reporters:

- AB Andrew Brade, Holme-on-Spalding Moor, East Riding of Yorkshire. AOR AR 7030 plus and Perseus SDR, Wellbrook phased array 290°, 305m beverage at 220°. Recording on Sony MZ-NH1 minidisc + Total Recorder.
- BD Barry Davies, Carlisle, Cumbria. Perseus, 3.7m x 10.0m Flag + FLG100 amp.
- DH David Hamilton, Ayrshire; Perseus SDR & indoor flag
- FW Friedhelm Wittlieb, Lünen, Germany. Grundig Satellite 700 with martens fram-antenna.
- JF John Faulkner, Sutton-in-Ashfield, Notts. Perseus SDR & flag antenna.
- JF/TB John Faulkner/Tim Bucknall, Matlock Forest, Derbyshire, recordings analysed by Tim Bucknall. Perseus SDR & 300m beverage at 30°.
- JW John Williams, Hemel Hempstead, Herts. AOR 7030, 40m long wire.
- JWe Jack Weber, Hertfordshire, Perseus SDR, KAZ at 280°
- mah Martin Hall, Clashmore, Sutherland. Perseus SDR, RPA-1 preamp, beverages: 513m at 233°, unterminated; 506m at 279°, terminated; 550m at 338°, terminated. TotalRecorder.
- MDe Maurits van Driessche, Zele, Belgium. Perseus and several super Kaz antennas, MFJ1026 (modified), DBX1215, 12 dB preamplifier..
- PC Paul Crankshaw; Troon, Ayrshire; Perseus SDR, EWE, MFJ-1025 Phaser (modified).

- RC Roberto Celestre at his summer location, Cava D'Aliga, Ragusa - Sicily Island, Italy. DEGEN 1103, no external antenna.
- Rha Ronald Hagensen , Ottersberg, Germany. AOR7030+, 22m at 315°, 28m at 290°, 325m at 345° & 115m at 065°, coupled with the Mizuho AT-2000.
- TB-K Tim Bucknall, listening to a Perseus recording made by Bjarne Mjelde, Kongsfjord, Norway, using various beverages.
- VL Vincent Lecler, Poitiers, France. TS850 + SDR IQ, EWE, BOG, LW.

Let me start by extending a warm welcome to new members **Maurits** and **Roberto**, who make their first contribution to DX Loggings. I hope to receive many more logs from you in the future!

Barry kicks off the comments on conditions: "Plenty of stations getting through to Carlisle in September including British Columbia and South Dakota. Unusual for me was to hear WCKY and WMKI which are both on Euro-channels. The FLG100 seems to be doing OK for me. Hopefully this all augurs well for the key DX month of October". **Paul** also comments: "Conditions have been fair over the past month, and in fact have been good over the past week or so. The graveyard channels have been alive with an amazing rumble of stations ... not that many have been IDed! With the antenna pointing roughly towards the Great Lakes some interesting stations have been heard from that area and from the Prairies. Only one station has made it from the west coast though - KOMO. Recording at 2300 and 0000 was also rewarded with a couple of new daytimers".

Jack tells us: "I had little time for DXing during the spring and summer, and on the few occasions when I did manage to listen, conditions were generally very poor. Fortunately, propagation seems to be improving now and I've found a little bit more time, so here are a few recent loggings". **John W** adds: "Just a few logs from me (all overnight recording!) Pleased to hear CFRW - but without their playlist on the web - it would have remained an UNID!"

In **Clashmore** stations from the prairies and westwards were coming in well during the last few days of August, and between 9 and 11 September. As I type this during the last week of September, the band has been open around 0600 to the plains, prairies and west coast. September has also proved itself once again a good month for the reception of low power east coast North American stations both in the late evening and early morning, with a good number of personal firsts heard.

As the new season gets underway, it's probably a good time for a reminder about the validity of logs. If you do not hear an ID or other information unique to the station, which makes it a definite catch, your logging should be marked "tentative", or "presumed".

The **deadline** for the November 2009 DX Loggings is **Friday 23rd October**. I look forward to receiving your logs by then, preferably electronically/via e-mail using the Word pro-forma, which I can supply on request; all contributions should follow the format used in DX Loggings as closely as possible. Some of the logs I receive do not use the pro-forma, and these take about 80% of the time needed to compile DX Loggings. I will include such logs whenever I can, but if the log becomes very large during the winter months, and I run out of time, I will have to leave them out. Handwritten or typed logs sent to me by snail mail or fax should be restricted to a maximum of 20 logs, since typing them up is also very time consuming.

Would newer members please note that DX Loggings is a consolidated permanent record summarising of stations heard, also available to those members not subscribed to the e-List; postings to the e-List are intended as hot tips and subject to correction where required. If you would like any tips sent to the e-List to be published in DX Loggings, please send them to me separately. All logs of stations transmitting from outside Europe are welcome. In common with the other sections of MWN, DX Loggings aims to include as many members as possible, and I'd like to ask those of you who listen to MW DX, but who haven't yet shared your catches, to make a special effort and send me a contribution for the next issue. Good DX!

73, Martin

Note and Verifications Signers

- 1 - v/s **Emidio Di Ciccio** who also sent CD - With the loc px I listened + some pics
- 2 - Rayway S.p.A, Zona di Ancona, Ufficio Tecnico, At the stns address (WRTH), sent some photos, Of the xmtr along with the card
- 3 - v/s **Inese**, stating that power was 700 watts
- 4 - v/s **Jean Claude Watry "Le Cordinateur"**. Also replied with ppc within 2 months for other report
- 5 - for German px via HQ
- 6 - wrote to that one about ten times
- 7 - radiotehran@irib.ir. v/s Bastani
- 8 - after reminder
- 9 - v/s **Lorraine Stavropoulos**, DX Secretary; (Istavrop@twr.org.sz)
- 10 - after reminder, lt. from Admin Mgr Victor Qin ; SASE attached to report; Heard back in Nov 2008 in DK
- 11 - v/s **Michel Mathieu VE2MM**
- 12 - v/s **Bob Galerstein**
- 13 - v/s **JJ Jeffrey**, WLOB Management newstalkwlob@yahoo.com

A: what was received; **B:** what return postage was sent; **C:** Days to get a reply

Stefan wrote: I attached azimuth map, pictures from the DX183 listening site and picture post card to all of my letters. Return postage not used despite of few exceptions stated.

Ge Huijbens wrote: For a QSL from France Info on the MW the best way is now:
Jean-Gerard ROBICHEZ ; Directeur-adjoint ; De France Info

Treasured QSL Cards

This issue with a QSL from John Whitbread

How obvious can it be that mine is the first one I had - from the first station I heard, WHDH Boston on 850 kc/s (not the kHz we have now!); even better, I received a pen with the callsign on. I was a young lad at school and had made the classic 40-inch wooden loop; we had a very small house and my parents let me have it in the living room, attached to a very old radio (with no back on it!). It had a vertical scale - I think it was a PYE.

Do you have a QSL card you

treasure and would like to feature in this column? Ancient or modern. If so, please scan it and save as a jpeg file of between 70 and 300 kB. Then e-mail it to mwneditor@mwcircle.org as an attachment, with a brief description of why you treasure it.
