EDITORIAL

with Steve Whitt

✉ Landsvale, High Catton, Yorkshire YO41 1EH
e-mail: mwneditor@mwcircle.org ☎ +44-1759-373704

This month we once again have some great and interesting loggings reported to Martin Hall's DX loggings column. Martin apologises for lack of a Treasurer's Report due to other pressures on his time. I too have been exceptionally busy in my business activities in October (nearly 3 months worth of sales in one month to cope with) so sadly I have little time for the enjoyable creative side of being Editor. So it is excellent to see that members like Gary de Bock continue to produce original articles of high calibre.

Utility Column.

We are still looking for a volunteer to take over from Andy Robins. If you are interested in utility transmissions, and would like to share your interest with the rest of the Circle please consider whether you could help by compiling a column for Medium Wave News. To find out more why not call me for a chat.

New look e-list

The new look e-list was launched and took off pretty smoothly. The Yahoo Groups on which is supported offer many more options than previously and around 135 members have joined to group to keep up to date with news, logs, information and the Circle community.

If you still haven't tried the Circle's e-list why not give it a try.

World Radio TV Handbook 2010

Once again we are pleased to team up with our friends at the British DX Club to supply pre-publication copies of the World radio TV Handbook. See pages 63/64 for full details.

In previous years we also offered Passport to Worldband Radio but that is not being published this year. This is sad but not wholly unexpected news given the continued decline of shortwave broadcasting and its almost total irrelevance to the "man in the street" in the affluent countries of the world. Larry Magne must be congratulated on a tireless and professional job spanning 25 years. For more on this visit <http://www.passband.com/passport-to-world-band-radio%c2%ae-in-limbo/>

Receiver News

Gary de Bock writes, "Thank you very much for publishing the recent 2009 Ultralight Radio AM-DX Shootout article, and many other of my articles (which is greatly appreciated). As luck would have it, immediately after completion of the 2009 Shootout article, the leading Chinese radio manufacturer released their most innovative DSP pocket radio, which would have been a strong contender for top honors in the Shootout. The radio has multiple DSP selectivity options (1, 2, 3, 4 and 6 kHz), and has already been used by many North American DXers to log TA's and TP's in stock form. Because of the great interest in this new Tecsun PL-310 AM-LW-FM-SW model, I quickly prepared a full review article detailing its capabilities for interested DXers, including a comparison with the top-rated Shootout model, the Kchibo D96L. (*lack of space means this will appear next month*).

Now on with the show

73s *Steve* .

2009 Ultralight Radio AM-DX Shootout

Part II

by Gary DeBock, Puyallup, WA USA September 2009

Shootout Day Arrives The gallant contestants assembled at noon on September 7, 2009 to decide their fate. They were joined by all surviving contestants of previous Ultralight radio Shootouts, who would join in the competition for ultimate Ultralight performance honors. The R911 and R9012 models were tested with the whip antenna in a vertical position. The D92L and D96L models were tested in the 1 kHz selectivity setting. Comments follow the grade in specific categories.

SENSITIVITY: (worst is 0, best is 5; final grade for model is listed after model)

	<u>530-TIS</u>	<u>620-KPOJ</u>	<u>750-KXL</u>	<u>1040-CKST</u>	<u>1130-CKWX</u>	<u>1520-KGDD</u>	<u>1650-TIS</u>
R911 (B)	3	1	0	0	3	3	4*
R9012 (B+)	3	2	0	0	3	3	4*
C.C. SWP (B+)	3*	2	0	0	3	3	4*
DE1123 (D)	2	0	0	0	2	1	2
G8 (B)	3*	2	0	0	3	2	3
D92L (D)	2	1	0	0	2	1	2
D96L (A)	3*	3	1	1	4	3	4*

SRF-59 (B)	3	1	0	0	3	3	3
SRF-39FP (B+)	3*	2	0	0	3	3	4

SRF-T615 (A-)	3*	2	1	0	3	3	4
SRF-M37V/W (B)	3	2	0	0	3	2	3
DT-400W (A-)	3*	2	1	1	4	3	4*
E100 (B+)	2	1	0	1	4	3	4*
DT-200VX (B)	3	1	0	0	3	3	3
DT-210V (B)	3	1	0	0	3	3	3

* Two TIS stations were received by these models on the frequency indicated (a superior result).

SENSITIVITY SUMMARY: The new Kchibo D96L has unsurpassed sensitivity on all AM frequencies, with a slight low and mid band advantage over all current contestants. It also has a slight edge over the DT-400W for top ULR sensitivity. The C.Crane SWP and R9012 are very competitive in sensitivity overall, with a slight high-band edge over the G8, which tends to perform better on the lower frequencies. The R911 tested here has a shade less sensitivity than its R9012 sibling on the low band, and both the D92L and DE1123 models are hopelessly outclassed in weak-signal performance--primarily because of weakly designed loopsticks.

SELECTIVITY: (worst is 0, best is 5; final grade for model is listed after model)

	560-KPQ	980-CKNW	1080-KFXX	1460-KARR
R911 (B-)	all KVI slop (0)	slight KOMO slop (4)	all KPTK slop (0)	heavy KSUH slop (1)
R9012 (B-)	all KVI slop (0)	slight KOMO slop (4)	all KPTK slop (0)	heavy KSUH slop (1)
C.C. SWP (C+)	all KVI slop (0)	slight KOMO slop (4)	all KPTK slop (0)	all KSUH slop (0)
DE1123 (B+)	all KVI slop (0)	no KOMO slop (5)	all KPTK slop (0)	no KSUH slop (5)
G8 (A-)	no KVI slop (5)	no KOMO slop (5)	strong KPTK slop (2)	slight KSUH slop (4)
D92L (B+)	all KVI slop (0)	no KOMO slop (5)	all KPTK slop (0)	no KSUH slop (5)
D96L (A)	no KVI slop (5)	no KOMO slop (5)	mod. KPTK slop (3)	no KSUH slop (5)

	560-KPQ	980-CKNW	1080-KFXX	1460-KARR
SRF-59 (B-)	all KVI slop (0)	slight KOMO slop (4)	all KPTK slop (0)	heavy KSUH slop (1)
SRF-39FP (B-)	all KVI slop (0)	slight KOMO slop (4)	all KPTK slop (0)	heavy KSUH slop (1)
SRF-T615 (C)	all KVI slop (0)	mod. KOMO slop (3)	all KPTK slop (0)	all KSUH slop (0)
SRF-M37V/W (F)	all KVI slop (0)	all KOMO slop (0)	all KPTK slop (0)	all KSUH slop (0)
DT-400W (C+)	all KVI slop (0)	slight KOMO slop (4)	all KPTK slop (0)	heavy KSUH slop (1)
E100 (B+)	all KVI slop (0)	no KOMO slop (5)	strong KPTK slop (2)	mod. KSUH slop (3)
DT-200VX (C+)	all KVI slop (0)	mod. KOMO slop (3)	all KPTK slop (0)	heavy KSUH slop (1)
DT-210V (B-)	all KVI slop (0)	mod. KOMO slop (3)	all KPTK slop (0)	strong KSUH slop (2)

SELECTIVITY SUMMARY: Once again, the D96L has superior performance with its 1 kHz DSP selectivity setting, an advantage that has practical DXing applications because of the model's class-leading sensitivity. The G8 is a close second, but lacks the D96L's 1 kHz filter choice option, and lags in sensitivity to dig out weak adjacent-channel DX. The DE1123 and D92L both have decent DSP selectivity designs, but suffer greatly from relatively deaf loopsticks in practical performance. The two analog models (R911 and R9012) have good selectivity for their price range, and the C.Crane SWP has fairly average selectivity in the general Ultralight category.

NULLING ABILITY: (final grade and comment)

R911 (A)	Excellent, near legendary performance (when whip antenna is raised to vertical)
R9012 (A)	Excellent, near legendary performance (when whip antenna is raised to vertical)

C.C. SWP (B)	Good, and decent sensitivity increases practical use
DE1123 (A)	Excellent, but lack of sensitivity limits practical use
G8 (B)	Good, and typical of the DSP models
D92L (B)	Good, but lack of sensitivity limits practical use
D96L (B)	Good, and excellent sensitivity increases ability to chase co-channel DX

SRF-59 (A)	Excellent, near legendary performance
SRF-39FP (A)	Excellent, near legendary performance
SRF-T615 (A)	Excellent, unique among non-DSP digital models
SRF-M37V/W (B)	Good, but terrible selectivity limits practical use
DT-400W (B)	Good, and good sensitivity increases practical use
E100 (B)	Good, and augments very good selectivity when chasing weak DX next to locals
DT-200VX (B)	Good, and decent sensitivity increases practical use
DT-210V (B)	Good, and augments good selectivity when chasing weak DX next to locals

IMAGES, SPURS and MAJOR SELECTIVITY DEFECTS (final grade after model)

R911 (A-)	Insignificant spurious whistle on 930
R9012 (A-)	Insignificant spurious whistle on 930
C.C. SWP (B)	KSUH-1450 image on 540 (strong); temporary tuning heterodynes on 935, 1041, 1144, 1250 and 1352 (all of which disappear after 2 seconds)
DE1123 (C)	Heterodyne on 1010 (moderate); spurious whistle on 1390 (strong); heterodynes from 1410-1440 (strong); spurious whistle on 1670 (strong)
G8 (C)	Heterodynes on 670 (strong), 1020 (moderate), 1130 (strong), 1140 (strong), 1240 (strong), 1410-1440 (strong), 1600-1640 (strong)
D92L (B)	Spurious open carrier on 730 (strong); heterodynes from 1410-1440 (strong)
D96L (B)	Heterodynes on 728 (strong), 1020 (moderate), 1410-1440 (strong), 1620 (mod.)

SRF-59 (A-)	Insignificant spurious whistle on 730
SRF-39FP (A-)	Insignificant spurious whistle on 730
SRF-T615 (C)	KSUH-1450 image on 550 (moderate); Puyallup TIS-1580 spur on 1600 (moderate); KZIZ-1560 spur on 1420; KSUH-1450 received from 1430-1510
SRF-M37V/W (F)	KSUH-1450 image on 550 (strong); spurious mix of KSUH-1450 and KZIZ-1560 on 1610 (strong); KKOL-1300 received from 1280-1340; KSUH-1450 received from 1410-1640
DT-400W (A)	Insignificant KSUH-1450 image on 550 (extremely weak)
E100 (A)	KSUH-1450 image on 540 (moderate)
DT-200VX (A-)	Insignificant spurious whistle on 750
DT-210V (B+)	KSUH-1450 image on 550 (weak); insignificant spurious whistle on 750

AGC (final grade and comment)

R911 (B)	Good; will not irritate the ears of searching DXers
R9012 (B)	Good; will not irritate the ears of searching DXers
C.C. SWP (B)	Generally good performance, but IBOC hiss not so pleasant
DE1123 (A-)	Excellent AGC, but poor sensitivity limits its practical value
G8 (B)	Generally good, but DSP chip's soft mute causes temporary delay in function
D92L (B)	Generally good, but DSP chip's soft mute causes temporary delay in function
D96L (B)	Generally good, but DSP chip's soft mute causes temporary delay in function

SRF-59 (B)	Good; will not irritate the ears of searching DXers
SRF-39FP (B)	Good; will not irritate the ears of searching DXers
SRF-T615 (A)	Outstanding AGC-- the best in the Ultralight class
SRF-M37V/W (B+)	Very good performance, except for IBOC hiss issue
DT-400W (A-)	Excellent AGC except for minor IBOC hiss issue
E100 (B+)	Very good performance, but minor issues with IBOC hiss and local slop
DT-200VX (A-)	Excellent AGC except for minor IBOC hiss issue
DT-210V (B)	Good; will not irritate the ears of searching DXers

AUDIO QUALITY (final grade and comment)

R911 (B)	Pleasing audio with emphasis on high frequencies
R9012 (B)	Pleasing audio with emphasis on high frequencies
C.C. SWP (B)	Generally good, but limited bass response
DE1123 (B-)	Very limited bass response; can be harsh at times
G8 (A-)	Pleasantly balanced audio is enhanced by relatively large speaker
D92L (A-)	Pleasantly balanced audio response (but can be affected by DSP filter selection)
D96L (A-)	Pleasantly balanced audio response (but can be affected by DSP filter selection)

SRF-59 (B+)	Pleasing audio with emphasis on high frequencies
SRF-39FP (A-)	Mellow audio with balanced highs and lows
SRF-T615 (A)	Excellent audio with great attention to fidelity
SRF-M37V/W (A)	Excellent audio with great attention to fidelity
DT-400W (A)	Excellent audio with great attention to fidelity; DBB function augments range
E100 (B)	Emphasis on high frequencies is acceptable for DXers; but not for music fans
DT-200VX (A)	Excellent audio with great attention to fidelity; DBB function augments range
DT-210V (A)	Excellent audio with great attention to fidelity; DBB function augments range

DIGITAL TUNING NOISE and DELAY (final grade and comment)

C.C. SWP (B-)	Moderate click and PLL chirp when using tuning knob on low AM band; no delay
DE1123 (A)	No noise, no delay
G8 (A-)	No noise, very short tuning delay; beep and 2-second delay when turned on
D92L (B-)	12-second digital "chuffing noise" when tuned; very short tuning delay
D96L (B)	5-second digital "chuffing noise" when tuned; very short tuning delay

SRF-T615 (A)	No noise, no delay
SRF-M37V/W (A-)	Function beep, no delay
DT-400W (A)	No noise, no delay
E100 (A-)	No tuning noise or delay, but two second delay and PLL chirp when turned on
DT-200VX (A)	No noise, no delay
DT-210V (B)	No noise, 1-second delay

QUALITY CONTROL RECORD (final grade and comment)

R911 (B)	All units have gained a significant improvement in AM sensitivity with alignment
R9012 (B)	All units have gained a significant improvement in AM sensitivity with alignment
C.C. SWP (B)	First unit received in 2007 was defective; variations in sensitivity reported
DE1123 (A)	No reports of defects; no problems in author's model

G8 (B)	Most models gain significant improvement in AM sensitivity with alignment
D92L (B)	Out of eight models, one model was received with a cracked loopstick
D96L (A)	No reports of defects; no problems in author's 2 models
SRF-59 (C)	Congenital breakdown of tuning capacitor over a 2-year period; AM alignment provides significant improvement in sensitivity in most models
SRF-39FP (A-)	Based on alignment of 24 units, 4 gained major improvement in AM sensitivity
SRF-T615 (A)	No reports of defects; no problem in author's 2 models
SRF-M37V/W (A)	No reports of defects; no problem in author's 3 models
DT-400W (A-)	Some reports of low AM sensitivity in isolated cases; author's 3 models are fine
E100 (B)	All units have gained a significant improvement in AM sensitivity with alignment; reports of other maintenance issues received, but good Q/C record in general
DT-200VX (A-)	AM alignment typically improves sensitivity on high or low band (but not both)
DT-210V (B-)	Own unit required AM alignment for optimum performance; first received unit was defective and not repairable; reports of other QC issues have been received

2009 Shootout Verdicts and Summary

The new Kchibo D96L model's impressive combination of high AM sensitivity and superb DSP

selectivity truly pushes the envelope in Ultralight radio performance, providing a new standard in overall DXing potential. The winners of the previous Shootouts (SRF-T615, E100 and DT-400W) are all very competent AM receivers, but lacking in DSP-enhanced selectivity, they cannot really compare with the D96L in adjacent-channel DXing capability. The D96L's unsurpassed AM sensitivity is the perfect complement for its 1 kHz DSP selectivity, which together provide a clear AM-DXing advantage over every other Ultralight radio. Although it does have some engineering quirks that make it less than perfect, for overall value, this Chinese market radio is a superb bargain—especially for those 9 kHz-split DXers looking for maximum fun at minimum cost.

The Tecsun PL-300WT (a.k.a. Grundig G8) models benefit greatly from their 4734 DSP chips, which provide class-leading FM sensitivity and selectivity. Unfortunately the Tecsun designers failed to ensure optimum AM sensitivity in their loopstick production process, leading to variable results in DXing performance. With the optimum 1 kHz DSP selectivity potential of the 4734 chip not available, the PL-300WT/ G8 models will never perform at the high level of the D96L, either in AM sensitivity or selectivity.

These models will certainly have high appeal for FM-DXers, however, and for urban AM-DXers troubled by multiple local pests. It has high resistance to overload, and can minimize the irritation of mixing products and spurious signals. The G8's overall appeal as an AM-FM DXing radio makes it a good choice as a travel portable, along with its D96L competitor.

The C.Crane SWP model provides decent sensitivity in combination with versatile digital features, and has earned a place of respect in the Ultralight DXing group despite its 2-year old design. It has a low-noise RF front-end and a 455 kHz IF, providing the essential ingredients to quickly become the modified Ultralight radio of choice among the somewhat fanatical ULR transoceanic DXers (of whom the author is a dedicated member). Although its stock capabilities are quite impressive, the radio becomes an overachieving DXing wonder when modified with a 7.5" sliding coil ("Slider") loopstick and a Murata CFJ455K5 IF filter. With capabilities similar to the Eton E100, it has low-band AM sensitivity superior to the E100, and generally provides very capable overall performance, whether in stock or modified form.

The Degen DE1123 model was inspired by some superb design ideas, but for practical application in AM-DXing, the radio's poor loopstick design is really a deal-breaker. The DE1123 is practically deaf to weak-signal DX, making its superior DSP selectivity and included digital signal recorder irrelevant. For an FM-DXer looking for maximum versatility in a compact travel portable the DE1123 would merit attention, and the option to record FM stereo music in an Ultralight radio is unique. For AM enthusiasts, however, the DE1123 is a classic example of how a poor loopstick design can ruin an otherwise innovative radio.

The Kchibo D92L is another classic example of great design objectives being nullified by poor manufacturing execution. The D92L has all the design ingredients for success, but the loopstick receives severe digital hash from adjacent circuitry, degrading the AM sensitivity to an unacceptable level. Apparently Kchibo learned many lessons from the D92L issues, however, in designing the superb new D96L model. The puzzle is why the Chinese market prices for the two models are so similar, with such a drastic difference in AM-DXing performance.

The two analog models, the Tecsun R911 and R9012, both prove an exceptional AM-DXing value for a rock-bottom price. In comparison with their SRF-59 competition, both models have a higher general level of quality and life expectancy, with similar sensitivity, selectivity and nulling ability. They also include an effective speaker, with multi-band SW coverage as a bonus. DXers preferring a round tuning knob should choose the R9012—but make sure that the Chinese seller is going to provide you with a new model (see the warning), and the color of your choice. In the author's opinion, there has never been such a \$9.90 bargain in the history of AM-DXing!

Conclusion The new DSP-enhanced Ultralight radios have added even more DXing potential to the pocket radio class, and even more excitement to a niche hobby that was already a major enthusiasm center among the AM-DXing community. It is the author's sincere hope that this exhaustive purchasing guide will introduce you to the amazing new capabilities of these innovative receivers, and motivate you to join our fast-growing group of Ultralight radio enthusiasts. We welcome you to join in the legendary fun, and enjoy the thrilling AM-DXing future along with all of us.

73 and Best Wishes,
Gary DeBock

(The author wishes to express gratitude for the extensive assistance of John Bryant in the preparation of this article, and for the assistance of Guy Atkins in the introduction of the Kchibo radio models)

NORTH AMERICAN NEWS

✉ Sand Gap, Bursea, Holme-on-Spalding Moor York YO43 4DF

with Andrew Brade

e-mail: na-news@mwcircle.org

Hello again.

Here is what's been happening on the North American AM dial. May I express my gratitude to the organisations which make this resume possible? Thanks this month to: - IRCA, DX Mid-America, ABDX, NRC DX News, FCC.

- | | |
|------------------|---|
| 540 WFLF | Pine Hills FL – power increase to 50/46kW but pattern change too. |
| 790 CIGM | Sudbury ON – gone to FM |
| 980 CKRU | Peterborough ON – also gone to FM |
| 1050 WBIX | Natick MA – application for daytime increase to 50kW rejected. |
| 1370 CFOK | Westlock AB – applied to go to FM |

Here is a general round up of what's been happening on the North American AM dial courtesy of our friends at the **International Radio Club of America and NRC.**

FACILITY AND PARAMETER APPLICATIONS / GRANTS

IRCA have combined the facility and parameter applications and grants into one section effective this issue for ease of typing the column, note key legend below

(A) = application, (G) = grant

540	WETC	Wendell-Zebulon, NC	8000/500 DA-2 to 10000/500 DA-2 (G)
540	WLIE	Islip, NY	2500/220 DA-2 to 10000/250 DA-2 (G)
590	WJMS	Ironwood, MI	5000/1000 DA-n to 5000/900 DA-N (G)
610	WVBE	Richmond, VA	5000/1000 DA-2 to 7000/2500 DA-2 (G)
630	KTKK	Sandy, UT	1000/500 DA-2 to 935/484 DA-2 (A)
780	new	Mulberry, FL	CP granted for U4 250/250 from three 195' towers. The day and night patterns have identical parameters. The plot is kidney-shaped with the null toward Chicago. Mulberry is southeast of Lakeland.
940	KTON	Belton, TX	1000/5 DA-2 to 3500 DA2 (A)
940	WCSY	South Haven, MI	1000/5 DA-2 to 300 DA-D (G)
610	WVBE	Roanoke, VA	CP for U4 10000/2500 is dismissed, leaving an application for U4 7000/2500.
950	WCTN	Potomoc-Cabin John, MD	Application for U5 2500/27 dismissed.
980	KRTX	Rosenberg-Richmond, TX	1000/4000 DA-N to 5000 DA-D (G)
980	WHAW	Lost Creek, WV	City-of-Licence change from Weston. (G)
990	KAML	Kenedy-Karnes City TX	Application for U7 500/500 CH 500 with a change in City-of-License to Mathis is dismissed.
1010	KXEN	St Louis, MO	50000/500 DA-2 to 50000/420 DA-2 (G)
1030	WNVR	Vernon Hills, IL	U7 27000/210 CH 8000 (A)

1140	KLTK	Centerton, AR	D1 5000/0 (A)
1050	WDVM	Eau Claire, WI	The STA which WDVM was operating under (U1 1000/430) has been deleted and the station is now U1 860/260 from a taller (replacement) tower. (G)
1060	WBIX	Natick MA	Application dismissed for U7 50000/2500 CH 50000.
1160	WIWA	St. Cloud, FL	U4 11000/500 (A)
1180	KYET	Williams, AZ	10000/250 ND to 6000/1 ND (A)
1180	new	Reno, NV	Application for a new station is dismissed.
1190	KRFT	Desoto, MO	10000/22 DA-2 to 10000/6500 DA-2 (G)
1210	WQLS	Ozark, AL	10000/4 ND-D to 10000/3 ND3 (A)
1250	WKDL	Warrenton, VA	Licensed for U4 5000/32, WKDL has a CP for U4 8000/25. This amendment requests U4 7800/125. (A)
1260	KWNX	Taylor, TX	1000/144 ND to 2500/400 (A)
1280	KZNS	Salt Lake City, UT	Licensed for U4 10000/600, KZNS has a CP for U4 50000/670, amended to U4 50000/725. Now they've requested U4 50000/730. (A)
1290	WATO	Oak Ridge, TN	5000/500 DA-2 to 1000/14 ND (G)
1290	WOWZ	Appomattox, VA	6000/17 ND to 10000/17 ND (G)
1290	new	Santa Clara, UT	U4 2000/250 (A)
1310	WTLC	Indianapolis, IN	Application for U1 5000/250 is dismissed.
1320	KSCR	Eugene, OR	1000/40 ND to 600/40 ND (G)
1330	WKTA	Evanston, IL	5000/17 DA-D to 5000/110 DA-2 (A)
1340	new	Holt, AL	U1 1000/1000 (A)
1340	new	Conway, NH	U1 620/620 (A)
1360	KDJW	Amarillo, TX	500/137 ND to 6000/320 DA-2 (A)
1380	WGVY	Greenville, AL	1000/89 to 500 DA-2 (G)
1430	WEEF	Highland Park, IL	1000/29 DA-2 to 1600/750 DA-2 (G)
1430	WHAN	Ashland, VA	1000/31 ND to 50000 DA-D (G)
1440	WFNY	Gloversville, NY	3600/500 ND to 5000/500 DA-N (A)
1450	WCOX	Camden, AL	Renewal of License dismissed.
1450	new	Glenwood Springs, CO	Initial application was for U1 180/180. This amendment requests U1 300/300.
1450	new	Flora Vista, NM	U1 250/250 (A)
1460	KHOJ	St. Charles, MO	Licensed for U4 5000/85, KHOJ held a CP for U4 5000/350, now applied for and granted U4 5000/210 (G)
1460	KBSF	Springhill, LA	Application for U1 5000/220 at Nash, Texas was dismissed by the FCC. Now they've resubmitted the application, but this time for U1 5000/160, still moving to Nash.
1470	KFMZ	Brookfield, MO	500/20 DA-1 to 5000/50 DA-2 (G)
1490	new	Fayette, AL	U1 1000/1000 (A) and (G)
1490	new	Lemont, PA	U1 1000/1000 (A)
1500	new	Winchester, NV	U2 1200/1500. (G)
1520	new	Snohomish, WA	Initial application was for U2 50000/1000. This amendment requests U4 20000/50000 CH 50000. This sounds like somebody mixed up some numbers, so we'll keep an eye on it.
1530	WMBE	Chilton, WI	250 ND-D to 4500 ND-D (G)
1570	WTLK	Taylorsville, NC	1000/244 ND to 900/198 ND (A)
1590	WABV	Abbeville, SC	1000/26 ND to 14000 DA-D (A)

CONSTRUCTION PERMITS ON THE AIR

The following CPs are on the air:

690	KRGS	Rifle, CO	U1 2300/160 is now on the air.
780	KCEG	Fountain, CO	CP reinstated for U4 1900/720.

840 KXNT North Las Vegas, NV Licensed for U4 50000/25000, KXNT has been granted a CP to build a new transmitter site. Since the computer modeling of the new nighttime pattern is inconsistent with licensed tolerances due to the placement of nearby electric distribution towers, an STA of U4 50000/16000 has been authorized.

860 KPAM Troutdale, OR U2 50000/15000 is on. KPAM added one tower to their array of three in order to triple their nighttime power. The new night pattern sends the bulk of the signal in a balloon-shaped lobe to the southwest, with small lobes to the southeast and north.

890 KJME Fountain, CO CP reinstated for U4 5000/640

980 WYFN Nashville, TN After operating under an STA with U2 4260/4420 for less than two weeks due to transmitter problems, they have returned full power (U2 5000/5000).

1400 KHCB League City, TX Station has relocated here from Galveston. After building two new towers, they are now U4 1000/1000. The day and night patterns are identical: kidney-shaped favouring the north-northwest and south-southeast with a major null to the southwest.

1450 KJCV Jackson, WY U1 1000/1000 is on the air.

1450 KIKR Beaumont, TX U1 1000/1000 (no change) from a new tower is now on the air.

1430 WBLR Batesburg, SC U1 4500/140 is on the air after moving to a slightly taller tower.

1490 WSGB Sutton, WV U1 900/900. The 100-Watt reduction was necessitated because they increased their tower height by 45 feet to a total of 195 feet, while installing new a folded unipole antenna.

1550 WCVL Crawfordsville, IN U1 250/5 is on, reducing nighttime power from 250 Watts and eliminating the night pattern.

FACILITY AND PARAMETER GRANTS

The following CPs have been granted:

540 WFLF Pine Hills, FL CP granted for U4 50000/46000. Along with this reduction in nighttime power, WFLF is adjusting the day pattern. Instead of throwing 90% of the signal out over the Atlantic Ocean, the new signal will direct about 88 kW ERP toward the Tampa Bay area.

980 WYFN Nashville, TN STA granted for U2 4260/4420 due to transmitter module failure. Replacement parts are on order and a return to full power (U2 5000/5000) is expected shortly.

980 KRTX Rosenberg-Richmond, TX U4 5000/4000, consolidating their daytime facilities to the original nighttime four-tower site. The new day pattern throws the majority of the signal to the southeast, with smaller lobes to the southwest, northeast and northeast.

1120 WEAJ St. Stephen, SC Move here from Camden on 1130 with D3 350/0. Station had a previous CP to move to Springdale with U1 1000/9 CH 1000 on 1120, but that has been deleted with this grant.

1210 KTBK Auburn-Federal Way, WA Licensed for U4 27500/10000 from two transmitter sites, KTBK has been granted U4 27500/227 if and when the Green River should overflow its banks.

1430 WEEF Deerfield, IL CP granted to move here from Highland Park with U4 1600/750. They will be adding two towers to their current four in order to produce two new patterns. The new day pattern will shoot a slender lobe due east toward Chicago, while the new night pattern will produce a large lobe to the northeast with a smaller lobe headed due west.

1570 WTLK Taylorsville, NC CP granted for U1 900/198, moving to the WACB-860 tower. The power reduction from U1 1000/244 is necessitated because WACB's 250' tower is 75' taller than the old WTLK tower.

LICENCE CANCELLATIONS

1240 KMCL Donnelly, ID Calls deleted.

PUBLIC LISTINGS COURTESY OF THERADIOJOURNAL.COM AND 10000WATTS.COM:

570 KACP Salt Lake City, UT reimages as "Freedom 570," with a new talk lineup separate from former simulcast KNRS-FM 105.7 Centerville/Salt Lake City UT.

590 WDWD 570 Atlanta GA Silent due to a flooded transmitter site.

660 KGDP Oildale/Bakersfield, CA returns to the air with a simulcast of contemporary Christian KWVE-FM 107.9 San Clemente CA; new calls KWVE are pending.

690 KIQN 106.9 Pueblo, CO and KWRP 690 Pueblo, CO return to the air, with country on 106.9 and classic hits/talk on 690.

700/1320 KALL North Salt Lake City, UT flips from Fox sports to ESPN; KFNZ 1320 Salt Lake City goes from ESPN to Fox Sports.

890/1400 WAMG Dedham/Boston, MA and WLLH 1400 Lowell & Lawrence, MA have dropped ESPN Radio; a new format is coming.

970 KCMD Portland, OR rebrands as "Freedom 970."

1030 WNOW Mint Hill, NC flips from Spanish tropical/religious to Spanish news-talk "Radio Lider."

1050 WSEN Baldwinsville/Syracuse, NY flips from a simulcast of classic hits WSEN-FM 92.1 Baldwinsville to a simulcast of oldies WFBL 1390 Syracuse NY.

1160 WSKW Skowhegan, ME flips from ESPN sports to oldies as "Legacy 1160".

1190 WIXE Monroe, NC returns to the air with classic country as "The Mighty 1190."

1260 KGIL Beverly Hills, CA flips from talk to standards as "Retro 1260."

1340 WDCR Hanover, NH returns to the air with "Dartmouth College Radio," simulcasting the WebDCR webstream.

1410 WSHY Lafayette, IN flips from talk to a simulcast of WBPE 95.3 with "Bob FM" adult hits.

1430 WXKS Everett/Boston, MA flips from Spanish tropical "Rumba" (still heard on sister station WKOX 1200 Newton MA) to Spanish AC "Mia 1430."

1490 WTJV DeLand, FL Silent, the victim of a truck crashing into a guy wire, bringing its tower down.

1580 WTTN Columbus, WI flips from oldie to ESPN Deportes Spanish-language sports.

That just about clears my "In Tray" for another month so I'll sign off with best wishes for some good DX all around The Circle. Andrew

Netherlands Antilles

800 TWR - The ministry of Trans World Radio across the Caribbean and South America is to continue unaffected during essential repair of their transmission towers on the island of Bonaire. Due to the harsh, salty environment of the island, parts of the transmission towers had rusted extensively and had to be replaced. The cost of replacing the towers would be over £600,000, so the team on Bonaire were keen to replace the individual braces, at a tenth of that cost, before the situation worsened. The transmission towers help the station broadcast across a vast area covering Brazil, Venezuela, Guyana and Cuba.

Argentina

Nautel to Provide Eighteen 25kW Transmitters to Argentina

Nautel Limited, Hackett's Cove, Nova Scotia has been selected by Radio Nacional de Argentina to provide eighteen NX25 AM transmitters for locations in provinces across the country. Delivery of the transmitters began last month and will continue through early 2010.

The Nautel NX25 leverages Nautel's advanced NX AM transmission platform to provide a 27.5 kW (maximum) power output in a compact footprint. Offering industry leading efficiency, outstanding linearity and robust solid state construction, the NX25 offers exceptional reliability and low maintenance. The company's exclusive Advanced User Interface provides an onboard instrument grade spectrum analyzer and full control both locally and remotely using a web browser.

Radio Nacional de Argentina selected the NX25 for its transmitters in Bariloche, Santa Rosa, Esquel, San Juan, Santo Tomé, Viedma, Santa Fé, Tucumán, Bahía Blanca, San Salvador de Jujuy, Río Turbio, Catamarca, Río Grande, Salta, La Rioja, Formosa, Mendoza, and Santiago del Estero.

“Nautel is thrilled to work with Radio Nacional de Argentina on this important project,” said Gerardo Vargas, Nautel’s Latin America Sales Manager. “Their choice of the NX25 confirms Nautel’s ability to provide robust, reliable transmitters for locations ranging from coastal urban centers to remote mountain locations.” Nautel Press Release, via Alokesh Gupta, New Delhi, India via DXLD

Ecuador

Ecuador to nationalize radio and TV stations

Ecuadorian President Rafael Correa is seeking to take control of the country’s radio and television stations in a bid to stave off “irregularities.” The president announced his decision on Monday 3.8.2009 due to the “corruption and mediocrity” of “many” Ecuadorian news outlets. However, the leftwing president has not indicated the nature of the “irregularities” within Ecuador’s broadcasting community. Correa’s decision comes two days after a similar measure was introduced in Venezuela, where the government ordered the closure of 34 radio stations, in the latest bid to rein in the country’s media. The Ecuadorian President has twice penalized opposition media since taking office in 2007.

Press TV 4.8.2009 via Andy Sennitt, RN Media Network

Uruguay

Uruguay legal time goes UTC -2 from 0500 UTC, Oct 4.

Horacio Nigro

Venezuela

E-mail address for Radio Nacional de Venezuela: rnv@rnv.gov.ve Dave Askine, NASWA via DXLD

The Venezuelan government has intensified its policy of imposing controls on the media with a swathe of new broadcasting rules, regulations and requirements to the point that it is now empowered to tell radio stations what to transmit during at least part of every day. Under a resolution published in the Gazeta Oficial, the Information and Communication Ministry now has the sole responsibility of deciding the content of what goes over the airwaves for three and a half hours a day. Nobody is betting that these are going to be the “graveyard” in the wee small hours of the night.

Latin American Herald Tribune via Andy Sennitt, RN Media Network 28.9.2009

e-mail: world-news@mwcircle.org

Hello radiofriends,

When I have finished this column I will prepare myself on a long weekend in the woods of Dwingeloo in our province Drente. With five other radiofreaks we have three days of listening in a noise-free neighbourhood in front of us. We have planned to do all kinds of DX-ing: Mediumwave, shortwave, utility and pirates. In such a weekend we can also compare different antenna-types. Of course we don't forget the nice talks on our hobby with a good beer in front of us! Lots of fun with this month's news.

Australia

Broken Hill 1656 The Axe: Graham Dawe in Broken Hill advises the following for 1656 that recently started transmission on 1656 khz about 50 watts into a trap dipole by the looks of things...Graham visited the station today. Hype FM 87.6 is the sister station. Address is 622 Beryl St, Broken Hill 2880 NSW Australia. (*Johno via MWOZ*)

Germany

AFN Bavaria put a new 1485 kHz transmitter on air at Garmisch-Partenkirchen:
<http://bavaria.afneurope.net/ArticleDisplayDD/tabid/707/aid/10052/Default.aspx>

They say that it took them quite some time to find an environmental-wise suitable location. So this is apparently indeed a new location, not the old one that had been closed down at some point in the past, probably towards the end of the nineties. <http://www.northernstar.no/afns.htm> says that this old transmitter was infamous for poor groundwave coverage, hardly exceeding three kilometres. For the new transmitter the engineer says that he hopes it will reach "to the autobahn", which would be about ten kilometres. The video footage reveals a quite simple antenna, just a long whip with some wires as top load. Noteworthy in the audio rack is an old analogue Optimod, almost dwarfing all the other equipment. Concerning the soldier (actually I was surprised about an AFN presenter only ranking as Private) announcing new FM coverage for Grafenwöhr, Vilseck and Bamberg, complementing but presumably not replacing 1107/1143 kHz: A few days ago a new transmitter in Grafenwöhr already went on air, on 98.5 MHz. (*Kai Ludwig via DXLD*)

Greenland

Greenland is most likely going to leave Medium Wave in 2010. The decision hasn't been taken yet - but is likely to be taken within the next 3-4 months. (*Stig Hartvig Nielsen via MWDX*)

Netherlands

Big L will return to AM 1395 sponsored by KBC import.com.

WE ARE COUNTING
DOWN.....THE
DAYS.....STARTING 1-11-2009

It has just been announced that new parts will be ordered next week to get the transmitter working again. We hope to get 1395 back again on the 1st November 2009. (*Eric van Willegen via Mediumwave.info*)

Pakistan

The Voice of America (VOA) is expanding its reach across Pakistan. A new arrangement with Pakistan Broadcasting Corporation (PBC) now allows VOA to broadcast Pashto language programs on medium-wave (AM) radio and Urdu broadcasts on FM stations for the first time.

"We're delighted Pakistan's Cabinet has ratified our agreement with PBC," said VOA Director Danforth W. Austin. "This arrangement will allow millions of people in all parts of Pakistan to listen to the VOA's popular news and information programs."

VOA's Deewa Radio, a Pashto language service for people in the Afghanistan-Pakistan border region, is now available on medium wave (AM) at 540 kHz from a transmitter in Peshawar, the capital of Pakistan's North West Frontier Province. From 1800 to 2200 daily, Deewa Radio's AM signal will broadcast news and current affairs programming plus call-in shows on politics, literature and poetry. Deewa, which began in 2006, continues to broadcast nine hours of radio programming daily on shortwave, FM (transmitters located in Afghanistan) and Internet (www.VOANews.com/Deewa/).

For the first time, VOA's Urdu language program Radio Aap Ki Dunyaa (Your World) (www.VOANews.com/Urdu) will be heard on the FM band. A 30-minute morning program at 0900

and a 30-minute evening program at 1800 will air on 11 FM stations across Pakistan, including Islamabad and Lahore. VOA's audience is strong in Pakistan, with almost 12 percent of the population listening to or watching Urdu programs. Beyond the Headlines is a 30-minute television program that airs on Geo News, Pakistan's leading cable and satellite TV news channel. (*Press Release, Washington DC via VOA website via Ydun Ritz via Mediumwave.info*)

Portugal

783 R. Club, Avanca, is (finally!) expected to be on the air very soon, possibly mid / end Oct'09. This site was made ready back in 2007 (!), and comprises a 100 kW, DRM compatible, THALES tx and a Spanish made 60 m folded monopole. The DRM compatibility just means either tx (see below) would need some extra [expensive] modifications the owner is simply not willing to meet. Also acc. to the stn, the continued break downs of the "twin brother" tx used on 1035 kHz (Belmonte, near Lisbon), lead to an agreement with the manufacturer whereby it will be their own people who'll be activating the Avanca unit, which will take place after the THOMSON team checks the Belmonte site.

It is almost obvious that MCR - the group owning RCP as well as other [VHF-FM only] stns like R.Comercial - may not feel that happy with the quality of those Thales (now Thomson) txs which, nevertheless, are simply not expected to be run at full power either; I was told the power level will almost surely be just a bit above the level of the active, albeit irregular, unit for 1035, i.e. something in the 30 kW range in order to step down the electricity bill. (*Carlos Gonçalves via Mediumwave.info*)

Switzerland

I have noticed by a pure coincidence that today Sep 28 a testing signal was hearable on 558Khz, as a continuous beep. I heard it in Switzerland at 10:00 UTC (ground wave, medium power) as well as Swiss evening time at 19:00 UTC. I heard it at home as well as in my car while driving in the Zurich area. The signal direction seems to come from Monte-Ceneri (formerly transmitting on 558Khz), South of Switzerland, close to the Italian border. Is this Monte-Ceneri doing a coverage test for somebody else? The Swiss-Italian broadcast was phased out in summer 2008. (*Philippe Aeby*)

I confirm the presence of 800 Hz test tone on 558 kHz. In all probability the transmitter and aerial the same used before July 1st 2008, at Alpe del Tiglio (Isona) know as MonteCeneri. The signal 25 km from the transmitter is rather strong. This test should be associated to the investigation of the Communication's Federal Bureau upon real interest in the use of Medium Wave. Further information on:

http://www.bakom.admin.ch/themen/radio_tv/01214/02379/02380/index.html?lang=fr (*Luigi Ghiringhelli*)

Mike Ahern Former Caroline DJ Dies

5 October, 2009

After reporting the death of Simon Dee last month another former Radio Caroline presenter Mike Ahern has died at the age of 67. Mike, who only last week celebrated his birthday, was also well known for his work on Radio 1 and Capital Gold. Most recently, at Easter this year, he was heard on Pirate BBC Essex.

A posting on Facebook's Pirate BBC Essex page says: "A few weeks ago, Mike had a lung removed, after being diagnosed with lung cancer. It also transpired that he had a brain tumour as well, which was going to be operated on. Sadly, Mike died before this could happen."

Born in Liverpool, he was a barman and a clerk before getting his big break on Radio Caroline, at first joining the station's North ship off the Isle Of Man. He moved to Caroline's South ship in 1965 to help aid the network's flagging figures.

He departed Caroline in 1967 for Radio One, though it was a short lived affair with Ahern departing for Australia to work for a slew of stations there including 4BC and 6PM. He returned to the UK in 1988 and worked for Essex Radio, Piccadilly Radio and Country-1035 among others.

UTV Head Ridicules Switchover

26 October, 2009

Scott Taunton, head of TalkSport's parent UTV Radio GB, has told the Guardian newspaper that he considers the government's target for planned digital switchover and the removal of the AM and FM frequencies from the radio spectrum by 2015 as "farcical". This comes after UTV quit membership of the RadioCentre trade body earlier this month.

"For us it came down to Global," said Taunton, "As the largest funder of the RadioCentre, [they were] making sure that the policies of the RadioCentre were in the interests of Global Radio," says Taunton. "At times, for me, that meant the [trade body] was pursuing an agenda that wasn't necessarily in the interests of all its members." Taunton has never made an attempt to hide his dislike of Global Radio's group chief executive, Ashley Tabor. (www.radiotoday.co.uk)

RSL & LPAM News

Details of the football clubs' broadcasting their home games are as follows:

Football Club	Station	November 2009	December, 2009
Crystal Palace	Palace Radio 1278 kHz	7 Middlesbrough 28 Watford	5 Doncaster 19 Barnsley 26 Ipswich
Blackburn	Radio Rovers 1404 kHz	7 Portsmouth 28 Stoke	5 Liverpool 19 Tottenham 28 Sunderland
Rushden and Diamonds	Radio Diamonds 1503 kHz	14 Histon 28 Wrexham	1 York * 19 Chester 28 Kidderminster

* Evening game

Radio BGWS (British Gurkha Welfare Society) a new community station has been licensed by Ofcom - (Farnborough, Aldershot, Camberley and Fleet) – broadcasting to the rapidly growing community of ex-Gurkhas and their families in this area. The station will broadcast on AM – but no further information given (Dave Kenny BDXC-UK)

Not heard from anyone to date that can check whether the Glasgow schools' that had been listed by Ofcom are broadcasting? (1287 kHz Sounds Educational and on 1350 kHz Hillpark Secondary School.)

- VC Valter Comuzzi, Pasion di Prato, Italy. Perseus, K9AY

I may be mistaken, but I believe this is a first contribution to DX Loggings by **Valter** and **Chris**, so a warm welcome to you both. I hope to receive many more logs from you in the future!

Unfortunately, I've had to leave out a number of logs on this occasion – the large log this month has taken a long time to compile and edit, and I've had no time left for the very time-consuming task of re-typing electronically submitted logs which aren't in the DX Loggings format, or which have been submitted in manuscript. Also, **Tim Bucknall** has been having some fun listening to Perseus recordings made by Bjarne Mjelde at Kongsfjord using various beverages – unfortunately due to the large DX Log I have no space to include them here either this month.

Now for some feedback from our contributors:

Barry says: “I guess a B I G job this month (compiling the log) hi! I am sending mine today (22 October). This morning's "K" 3s says it all for me. Last month I commented about October being a key DX month. It lived up to its reputation. I can't wait to see the full log and start reminiscing over all the ones I missed but heard elsewhere south of the border. November tends to be a bit quieter but I do need the rest! If anything else comes through overnight I'll send them along unless you tell me not to”. *Yes, compiling the log has been a big job this month, so my thanks to you and all those contributors who used the pro-forma and used the correct format, which helps enormously! – mah.*

John F comments: “I have just taken a look back through my loggings over the last month and cannot believe how many rare C calls are included and how many K calls there are in there too! Although conditions were good throughout most of the period, the period leading up to the 21st of October was impressive. Many personal firsts were heard and the signal levels from several stations usually considered rarities were booming through on a nightly basis! Can it get any better than this? October 2009 may well go down in my books as the best night of MW DX I have ever had”.

Paul adds: “Outstanding conditions from around 19-21 October with rare West Coasters like KJR heard along with San Diego 1700 and several stations from North and South Dakota. The first day of the good conditions coincided with the first use of my RPA-1 preamp and I thought it had worked miracles until I saw other people's logs!”

Jack: “It's been a good month for DX here. I was particularly pleased to catch 1270 KNWC and 1590 KVGGB, giving me two new states. The prairies and west coast openings that made it as far south as the Midlands on the 20th and 21st didn't extend down to Hertfordshire unfortunately. But it's still early days for this season, so I'm hopeful that propagation will keep improving. Am I correct in thinking that my logging of KNWC is a UK First? It doesn't appear in the all-time list you published in 2005 nor, as far as I can see, in any MWN since then. It's not in Ken Baird's all-time list either.

I've recently added a Wellbrook FLG100 preamplifier to my KAZ. This does seem to have improved the front-to-back ratio, though I probably now need to tweak the termination resistor because it was originally adjusted when I was using just a passive matching transformer on the feeder end”. *Yes, KNWC is indeed a UK First, so congratulations! This should be an inspiration to all our members in the southern counties of the UK – it's not just those of us living in the north that gets the good DX. Indeed, many of the stations reported this month by our contributors in England have yet to be heard in Clashmore! - mah*

John W: “With the good conditions have heard a few stations - pleased to hear the MI and IL States. Unusually 1290 CFRW was a frequent visitor. As always probably heard the same number of stations which I could not identify (particularly 1330)!”

Steve notes: “With Germany silent on 1593kHz the absence of continuous DRM noise meant I could get some signals on 1590kHz for the first time in ages, including a nice personal first from Kansas. Oddly this season some stations are notably missing (e.g. CJYQ 930) whilst others missing for years are seemingly common (e.g. CHUM 1050 and CFTR 680)”.

Charles tells us: “Just got back to Amersham Bucks after spending a few days in Cornwall. Luckily this co-incided with some good dx from NA. Attached is a log of the stations I identified. I'm pleased to get in particular KMOX, WHO, WFTL & WSCR. I was only using my Sony ICF-SW7600GR with its internal ferrite rod. I also used an Olympus digital voice recorder which I held up to the loudspeaker to record some good IDs for WFTL, WFED, WHO, KMOX, CHUM, CFRB and WSCR”.

Guido: “Recently, we made a weekend DX-pedition to Walsoorden in the Netherlands. We had some nice antennas to different parts of the world. Beverages of 200 metres to 40, 300, 350 and one reversible beverage of 300 metres that was 60/240 degrees. Conditions towards the Far East were not as good as last year but I managed to hear HLKN, Mokpo, Korea which was a personal first. TA-conditions were good. I received several first-timers, but from the west coast, I only had a tentative log of CJVB Vancouver. It looks like the following weekend had better conditions. There are also loggings made at home included. And there are even there made a few first timers, like WHO, Des Moines. I'm glad with this one received in a noisy suburb surrounding”.

As can be seen from the log, stations from the western coast of North America, prairies and plains have been widely heard throughout the UK. Daytimers were also widely heard at the end of September, and as this is being typed, the final days of October are also providing some good catches of daytimers. I was away from home between 13 and 17 October, so can't provide a complete report on conditions in **Clashmore**.

However, they were particularly good for morning reception from the western half of North America from 5-7 October, and in the period leading up to the blow-out on 21 October. Unfortunately a fault in the 338 degree beverage meant I wasn't able to take full advantage of the fine conditions, with the higher frequencies being badly attenuated. The problem seems to have been caused by damage inside the house to a coaxial cable that runs behind a wall, so possibly due to mice – as an interim measure an alternative feed has been used that seems to have cured the problem.

The **deadline** for the December 2009 DX Loggings is **Monday 23rd November**. I look forward to receiving your logs by then, preferably electronically/via e-mail using the Word pro-forma, which I can supply on request; all contributions should follow the format used in DX Loggings as closely as possible. I'd like to repeat the request made last month, since I'm still receiving logs that don't use the pro-forma, and these take about 80% of the time needed to compile DX Loggings. I will include such logs whenever I can, but if the log becomes very large during the winter months, and I run out of time, I will have to leave them out. Handwritten or typed logs sent to me by snail mail or fax should be restricted to a maximum of 20 logs, since typing them up is also very time consuming. Please ensure that logs are marked “tentative” or “presumed” if you do not hear a positive identification announcement or material that is unique to the station – and please include such announcements in the detail of your log.

Would newer members please note that DX Loggings is a consolidated permanent record summarising of stations heard, also available to those members not subscribed to the e-List; postings to the e-List are intended as hot tips and subject to correction where required. If you would like any tips sent to the e-List to be published in DX Loggings, please send them to me separately. All logs of stations transmitting from outside Europe are welcome. In common with the other sections of MWN, DX Loggings aims to include as many members as possible, and I'd like to ask those of you who listen to MW DX, but who haven't yet shared your catches, to make a special effort and send me a contribution for the next issue. Good DX!

73, Martin

World Radio TV Handbook 2010

The **64th edition** of this great directory continues to offer the most comprehensive guide to broadcasting on the planet. With the help of an international network of contributors WRTH again provides the most up-to-date information on MW, SW and FM broadcasts available in any publication.

WRTH is **the** essential guide for both DXer & serious listener and is praised for its accuracy. It includes:

- **National Radio** – Country by country directory of national radio stations, updated by worldwide contributors, many DXers themselves. Including MW frequency lists by region.
- **International Radio** – Up-to-date winter SW frequency schedules, comprehensive frequency-order list of SW stations and hour-by-hour broadcasts in English, French, German, Portuguese & Spanish. Plus DRM broadcasts.
- **Features** on BBC World Service, Cold War receivers, Samoan Journey and WRTH's regular Digital Update.
- **Television** broadcasters by country
- **Reviews** of the latest **receivers & equipment**
- **Maps** showing all SW transmitter sites
- **Reference** inc domestic SW transmitter sites.

UK cover price £23.00

Special MWC members price: £17.00 (UK) including postage;

Europe Air/Worldwide surface: £19 (or 25 Euros cash / Paypal); Outside Europe airmail: £24

Order Deadline 21st November 2009

Cheques/POs payable to **British DX Club** please, in £ sterling drawn on a UK bank. (Euro/dollar payments only by cash at the appropriate exchange rate or by Paypal).

Paypal payments to bdxc@bdxc.org.uk (please add 4% if paying by Paypal)

Email enquiries to Andrew Tett: andrew@bdxc.org.uk.

Please send orders to: **British DX Club, 19 Park Road, Shoreham-by-Sea, BN43 6PF, UK**

As you may have already heard, Passport to World Band Radio has suspended publication this year, but WRTH will be published in the UK as usual in early December.
