## STOP PRESS:

**Netherlands:** Big L has reactivated 1395kHz on 3<sup>rd</sup> December 2009 using the Dutch transmitter at Trintelhaven. According the Media Network test transmissions started today around lunchtime Today the long-awaited return of the on 1395 kHz became a reality. The website of KBC Radio <http://www.kbcradio.eu> has photos of the (re-)installation work of the transmitter at Trintelhaven.

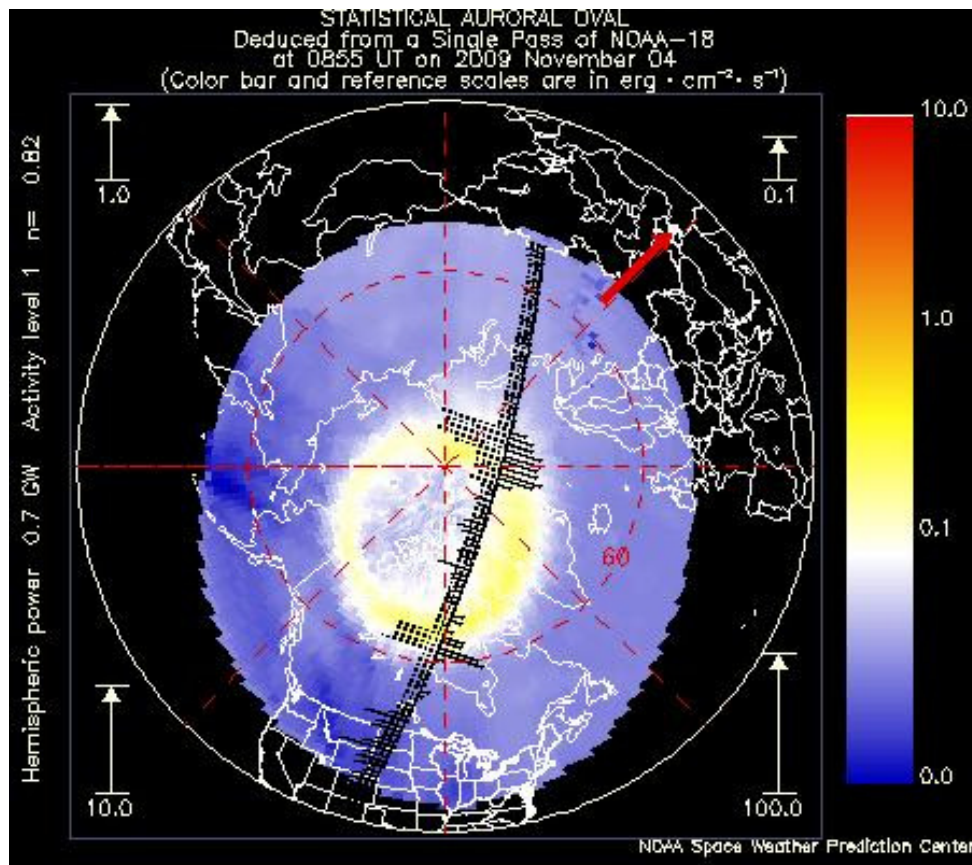

Stop Press Deadlines:	30 <sup>th</sup> December for January 2010	30 <sup>th</sup> January for February 2010
-----------------------	--	--

Cover illustration:	Seasons greetings!

## Coming Soon - Updated All Time DX Lists

It has been a while since the Circle has been able to update & publish the All Time DX Lists containing details of around 2500 MW stations from outside Europe heard in the UK & Ireland.

The good news is that Andrew Brade has been working hard updating the lists and improving the underlying spreadsheets.

In the early days we distributed the lists in MWN or as paper supplements via the club's Reprint Service. More recently the files were issued as spreadsheets on annual CDs. As the files grew it became increasingly unwieldy to distribute printed paper copies.

Now we are making the All Time Lists available to Medium Wave Circle members on-line via the Internet and we are introducing a new development. From 2009 we will be updating the lists on a monthly basis rather than annually.

We will still publish a “definitive” annual version, which will be as accurate and complete as possible. But for the active radio listener and anyone who wants to keep on top of news, the monthly updated list will be extremely useful. For the latest news please join other members on the Circle's Yahoo Group.

## Dates for your Diary

The next meeting of the Reading International Radio Group will be on Saturday December 5 in Room 3, Reading International Solidarity Centre, 35-39 London Street, Reading at 2.30 p.m.

The meeting will finish looking at unofficial political radio broadcasting in the UK, have a report on the Dutch Offshore Radio Day, look at the history of radio commercials in the UK, as well as other current and historical radio related items and audio extracts including some Cold War Iron Curtain stations.

All are welcome. For more information email me or phone 01462 643899.

The following dates have now been booked for 2010, all in Room 3: Saturday February 27 (N.B. This meeting has been rescheduled from the previously announced date of February 6); Saturday April 10; Saturday June 5; Saturday July 24;

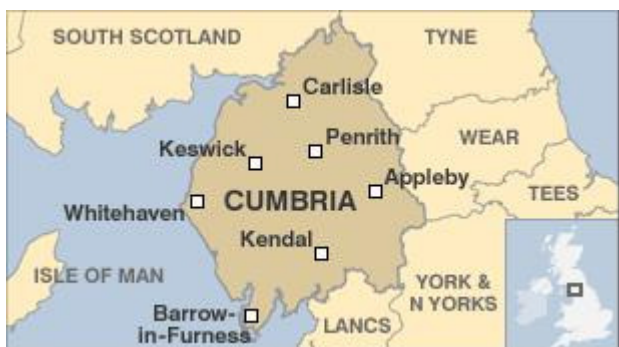

Mike Barraclough

## DX Test – advance notice – (one for the diary)

WGGH 1150 IL MARION. Date: Sunday morning (late Saturday night) February, 6, 2010.  
Time:0000-0200 ELT (0500-0700 UTC). Mode of Operation: 5000 watts (daytime pattern.)  
Programming: Classic Country, oldies music and various sound effects.

We will operate at our full 5000 Watts and Day pattern. The test will consist of classic country and oldies music along with tons of various sound effects. It should be fairly easy to identify the station, as our slogan is somewhat unique, "Monster Radio AM 1150".

## Cumbria Disaster

The record breaking rainfall and consequent floods in Cumbria caused untold damage and disruption that will last for months if not years. Without in any way meaning to be glib, there was some good news for MW DXers since BBC Cumbria stayed on air with full local programming overnight for 3 nights starting 21<sup>st</sup> November, instead of relaying the national 5 Live network. This would have offered a rare opportunity for distant listeners to hear and

positively identify the local low power MW transmitters on 756, 837 and 1458kHz.

## DX Tip

Unrelated to Cumbria, but another opportunity for DXers located in the Americas, it was noted that during November there were several nights during which Radio Vlaanderen Info, Wolvertem operated overnight on 927kHz. If I recall correctly, this transmitter is kept on air if the local weather at the transmitter site is freezing – presumably to stop the transmitter equipment cooling down too much, or perhaps the antenna icing over. Does anyone know the exact reason?

## Other stuff

Unfortunately there was not enough material to fill a page with Central/South American News Desk this month, so this column will be held over. Sadly this month the size of the DX loggings column has squeezed out all our feature articles, except for a report from the latest DX-pedition to Sheigra.

Next month I hope to have another fascinating contribution from regular contributor Gary de Bock. Look out for a DIY construction feature.

As this is the last issue before the holiday season, I would like to take this opportunity to wish all Circle members, wherever they may be, a wonderful Christmas and a splendid start to the New Year.

73s & Merry Christmas

*Steve .*

# NORTH AMERICAN NEWS

✉ Sand Gap, Bursea, Holme-on-Spalding Moor York YO43 4DF

with Andrew Brade

e-mail: [na-news@mwcircle.org](mailto:na-news@mwcircle.org)

Hello again.

Here is what's been happening on the North American AM dial. May I express my gratitude to the organisations which make this column possible? Thanks this month to: International Radio Club of America, NRC, ABDX, FCC.

There have been three changes in Canada this month affecting 1410kHz.

- 560 WQAM** Miami FL; applies for a large increase in power.
- 1380 WOTE** Clintonville WI; format change from oldies to adult contemporary.
- 1410 CKSL** London ON; format change from oldies to nostalgia.
- 1410 CFUN** Vancouver BC; Format change from talk to sports; change of call sign from CFUN to CFTE to match new station slogan "The Team".
- 1610 CJWI** Montréal QC; permission granted for this French language station to move to 1410.

## CANADIAN RADIO NEWS

From Dan Sys via IRCA

1040 CKST / 1400 CFUN Vancouver BC Now broadcasting from a joint tower in a new location both with 50kW

## AM FREQUENCY CHANGES

1610 CJWI Montréal, QC

CP granted for a frequency change to 1410 (the old CFMB-1280 frequency) with U3 10000/10000 has been approved by the CRTC. CJWI stated it is suffering interference from CHHA 1610 Toronto.

## FORMAT CHANGES

1410 CKSL London ON  
1410 CFUN Vancouver, BC

Now Oldies 1410, was Nostalgia.  
Now sports "Team1410", was talk. Late news received 29/11: CFUN call sign to be replaced by CFTE.

## GRANTED AM TO FM CONVERSIONS

570 CFWH Whitehorse, YT CP granted to move to 94.5 MHz with 3.3 kW. The new FM station will continue to offer CBS's English-language programming over the following existing relay stations:  
 CBDN-560 Dawson City, YT;  
 CBDD-560 Elsa, YT;  
 CBDM-690 Beaver Creek, YT;  
 CBDK-940 Teslin, YT;  
 CBDX-970 Swift River, YT;  
 CBQF-990 Carmacks, YT;  
 CBQJ-990 Ross River, YT;  
 CBDB-990 Watson Lake, YT;  
 CBDC-1230 Mayo, YT;  
 CBUA-FM-90.1 Atlin, BC;  
 CBQK-FM-105.1 Faro, YT,  
 CBDL-FM-105.1 Destruction Bay, YT; and  
 CBDF-FM-103.5 Haines Junction, YT.  
 When built, instead of the usual 90-day simulcast period, CFWH-570 will be allowed to simulcast for three years.

1240 CBXP Tahsis, BC The move of CBXP, a 40 watt low power relay of CBCV-FM Victoria, to FM at 90.5 MHz with 46.5 watts at minus 209 meters has been approved by the CRTC.

## FACILITY AND PARAMETER APPLICATIONS / GRANTS

Facility and parameter applications and grants are combined into this one section, key below: (A) = application, (G) = grant

560	WQAM	Miami, FL	5000/1000 ND to 50000/25000 DA-2 (A)
650	WHAN	Victoria, VA	Licensed for U1 1000/31 on 1370 kHz at Ashland, WHAN has a CP for D3 50000/0 moving here. This amendment requests D1 23000/0 CH 14000 at Powhattan on 650.
690	KRGS	Rifle, CO	900/11 ND to 2300/16 ND (A)
730	WOHS	Shelby, NC	1000/160 ND to 10000/190 ND (G)
740	WNYH	Huntington, NY	25000/43 DA-2 to 20000/50 DA-2 (A)
940	KTON	Belton, TX	Licensed for U4 1000/5, KTON applied for U4 600/100 moving to Kaufmann. They then amended the application to read D4 3500/0 CH 3500 back at Belton. That amendment has been rescinded. Special Temporary Authorization granted for U1 5000/1250. Pending construction on nighttime tower ATU housing unit (doghouse), they will be operating non-directional during nighttime hours at a quarter of their normal 5000 Watts. Their nighttime pattern favours the northeast.
970	WZAN	Portland, ME	
980	KMIN	Grants, NM	1000/250 ND to 5000/230 ND (A)
1000	KCEO	Vista, CA	2500/250 DA-2 to 5000/900 DA-2 (G)
1020	NEW	Sterlington, LA	(A)
1030	WNVR	Vernon Hills, IL	10000/120 DA-3 to 27000/210 DA-3 (A)
1040	WZNA	Moca, PR	5000/245 DA-D to 9000/250 DA-2 (G)
1050	WFSC	Franklin, NC	1000/153 ND to 5000/153 ND (G)
1050	WFSC	Franklin, NC	1000/153 ND to 5000/153 ND (G)
1060	WBIX	Natick, MA	40000/2500 DA-3 to 50000/2500 DA-3. If granted, WBIX would consolidate its day and night operation to the 5-tower nighttime site.
1090	KEXS	Excelsior Springs, MO	3400 DA-D to 8000 DA-2 (A)
1140	KLTK	South West City, MO	700 ND-D to 5000 ND-D (A)
1140	KHFX	Cleburne, TX	Licensed for U4 5000/710, KHFX applied for U7 15000/710 CH 15000. That application was amended to read U4 25000/710, which has now been dismissed.
1140	WCWC	Williamsburg, KY	2400 ND-D to 5700/32 ND (A)
1150	WSNW	Seneca, SC	1000/58 ND to 370/58 ND (A)
1150	KOLJ	Quanah, TX	500/73 ND to 520/77 ND (A)
1160	WIWA	St. Cloud, FL	2500/500 DA-2 to 11000/500 DA-2 (A)
1160	new	Braham, MN	U4 5000/2000. (A)
1170	KYET	Golden Valley, AZ	CP granted for U1 6000/1 moving from 1180 kHz and Williams (see below). (G)
1170	WRPM	Poplarville, MS	Licensed on 1530 but with a CP for D3 5000/0 here, WRPM amended the application to D1 1000/0 CH 1000. Now they are asking for D1 1000/0.
1180	KYET	Williams, AZ	10000/250 ND to 6000/1 ND (A)
1180	new	Reno, NV	U2 7500/1000 CH 7500 (A)
1190	KDYA	Vallejo, CA	1000 ND-D to 3000 DA-D (A)
1210	WQLS	Ozark, AL	10000/4 ND to 10000/3 ND3 (A)
1210	WDGR	Dahlonega, GA	Licensed for D1 10000/0 CH 2500, WDGR submitted an initial application for a facilities change and amendment, with a change in City-of-License to Lawrenceville (a move of about 30 miles). This latest request is for U11 20000/1 CH 12000. U11 = DA during Day and CH operation, non-DA at night.
1230	new	Beaver, UT	U1 1000/1000(A)
1250	WKDL	Warrenton, VA	5000/32 DA-2 to 7800/125 DA-2 (A)
1260	KBSZ	Apache Junction, AZ	Licensed for U1 350/100 on 1250 at Wickenburg, KBSZ was granted a CP for U1 320/50 moving here and up 10 kHz. Now they've applied to increase their day power to become U1 800/50.

1260 new San Juan, PR Application dismissed for U1 750/500 as another repeater for WISO.

1270 WMKT Charlevoix, MI Licensed for U2 27000/5000, WMKT was granted a CP for U2 50000/5000. This amendment requests U4 50000/5000.

1280 KZNS Salt Lake City, UT 50000/670 DA-2 to 50000/730 DA-2 (A)

1310 KTCK Dallas, TX 9000/5000 DA-2 to 25000/5000 DA-2 (A)

1330 KCKM Monahans, TX 5000/1000 DA-N to 12000 ND-D (G)

1330 WKTA Evanston, IL 5000/17 DA-D to 5000/110 DA-2 (G)

1340 new Holt, AL U1 1000/1000 (G)

1360 WIXI Jasper, AL 1000/40 ND to 12000/42 ND (G)

1360 KDJW Amarillo, TX 500/137 ND to 6000/320 DA-2 (G)

1370 NEW Charleston, RS Application for a new station dismissed.

1410 KCAL Redlands, CA 5000/4000 DA-N to 4700/4000 DA-2 (A)

1430 WCWC Williamsburg, KY U1 5700/32 (A)

1430 WBLR Batesburg, SC 4500/140 ND to 5000/163 ND (A)

1430 new North Las Vegas, NV U4 5000/390 (A)

1440 KTNO University Park, TX 50000/350 DA-2 to 50000 DA-D (A)

1460 KBRZ Missouri City, TX 5000/125 ND to 10000/112 DA-D (A)

1450 new Glenwood Springs, CO U1 300/300 (G)

1460 KBSF Springhill, LA 1000/220 ND to 5000/160 ND (A)

1460 KCLE Burleson, TX 5000/700 DA-2 to 12000/700 DA-2 (A)

1460 WQXM Bartow, FL 1000/155 ND to 10000/155 DA-D (G)

1460 KHOJ St. Charles, MO 5000/85 DA-D to 5000/210 DA-2 (G)

1550 WZRK Lake Geneva, WI 1000/1 DA-D to 1300 ND-D (A)

1560 WIOD Toledo, OH 5000 DA-D to 1500/3 ND (A)

1570 WTLK Taylorsville, NC 1000/244 ND to 900/198 ND (G)

1580 KWED Seguin, TX 1000/249 ND to 1000/1000 DA-N (A)

1610 WQLB319Lima OH U1 100/100 to Allen County EMA. They will be testing this at various times on Tuesday, November 24th.

1660 WGIT Canovanas, PR 10000/1000 ND to 10000/500 ND (A)

**CONSTRUCTION PERMITS NOW ON THE AIR**

780 WAVA Arlington, VA U1 12000/0 CH 9800

960 WSVU North Palm Beach, FL U4 2400/1400 is on the air, doubling their daytime power.

1050 WFSC Franklin, NC U1 5000/15300.

1130 KTRP Mount Angel, OR New station on with U4 25000/490. The day pattern is balloon-shaped to the NE, while the like-shaped night plot heads SW.

1170 WQHC Hanceville, AL STA granted for D1 10/0 (yes, that's 10 Watts) using a whip antenna while they attempt to find a suitable site for a new tower.

1210 WQLS Pike Road, AL CP to change the City-of-License from Ozark to Pike Road is now in effect.

1300 WGDJ Rensselaer, NY U4 10000/8000 is on the air. Their two patterns (both favouring the north) remain as before, but obviously larger.

1300 WKCY Harrisonburg, VA U1 6400/5

1340 WYBC New Haven, CT U1 1000/880.

1370 WSHV South Hill, VA U1 4200/41 has added the night operation.

1430 WION Ionia, MI CP for U2 4700/330 is on the air. They reduced their daytime power by 300 Watts, in order to go non-directional during daytime hours.

1480 KLVL Pasadena, TX U4 5000/500.

**PUBLIC LISTINGS COURTESY OF THERADIOJOURNAL.COM AND 10000WATTS.COM:**

590 WDWD Atlanta, GA silent due to a flooded transmitter site.

620 WDNC Durham, NC picks up Fox sports "Buzz" from sister station WRBZ 850 Raleigh NC, sending ESPN sports to new sister station WCMC-FM 99.9 Creedmoor/Raleigh NC, which will simulcast on 850 until a new format launches there.

740 WNYH Huntington, NY flips from oldies to Korean.

860 KKAT Salt Lake City, UT flips from oldies "The Wolf" to talk as "Utah's Big Talker."

1110 KJSA Mineral Wells/Ft Worth, TX flips from Tejano to religion, picking up the format formerly on KVTX 91.7 Dallas TX.

1140 KGEM Boise, ID and 1490 KCID Caldwell/Boise, ID flip from oldies and standards, respectively, to EWTN Catholic and Spanish Catholic under new ownership.

1160 WSKW Skowhegan, ME flips from sports to oldies as "Legacy 1160."

1300 WQPM Princeton, MN flips to a simulcast of KASM 1150 Albany MN.

1310 WOKA Douglas, GA flipped from ESPN to Spanish AC "La Líder."

1320 WTSJ Randolph, VT flips from country to talk/sports, simulcasting WEAV 960 Plattsburgh NY/Burlington VT.

1380 WOTE Clintonville, WI flips from oldies to standards as

1390 WFBL Syracuse, NY flips from oldies (still heard on former simulcast WSEN 1050 Baldwinsville NY) to talk as "CNY Talk Radio."

1400 KJOK Yuma, AZ changes calls to KCYK, flipping from oldies to "Outlaw Country 1400" classic country.

1450 KJCV Jackson, WY signs on with Bott Radio Network religion.

1550 WCLY Raleigh, NC flips from religion to ESPN Deportes Spanish sports.

1550 WZRK Lake Geneva, WI returns to air with standards as "Avenue 1550."

1550 WAMA Tampa, FL flips from regional Mexican "La Invasora" to ESPN Deportes Spanish sports, while sister station WAMT 1190 Pine Castle-Sky Lake/Orlando FL moves from talk to ESPN Deportes.

That just about clears my "In Tray" for another month so I'll sign off with best wishes for some good DX all around The Circle.

Andrew

## Germany

As of 3/11-2009 SR Heusweiler 1179 kHz will be on air around the clock:

<http://forum.mysnip.de/read.php?8773,747081>

"1422Member" is an employee of Saarländischer Rundfunk, directly involved in the operation of the Heusweiler site, so this is first-hand info. 1179 kHz is a Transradio TRAM 10 transmitter with 10 kW. It had been put on air in 2005 for Antenne Saar, a new talk program. Antenne Saar also relays RFI in French and DW in English, in order to ensure that nobody tunes in as polemics say. Only after lobbying from listeners they added RFI's German service to the program line-up, too. Cf. <http://www.sr-online.de/antennesaar/2113/> .

This transmitter uses the back-up antenna for 1422 kHz. Thus the frequency can not be too far away from 1422, because the back-up function (with a Telefunken, now Transradio, S 4002 transmitter) must still be ensured. If necessary 1179 will be taken off air in favour of 1422 of course. No idea why 1179, which is already at the fringe of the possible range. Probably the authority would have to be asked if no other frequency somewhere above 1179 kHz could be found.

Heusweiler is about 100 km away from the 1440 kHz transmitter in Luxembourg. The reference is quite appropriate, since the high power service on 1422 was a retaliation for Radio Luxemburg on 1440. In last year the 2 x 600 kW Thomson transmitters from the early seventies had been replaced by a new 400 kW installation, dramatically improving the audio quality. The old facility has been polemically described as sounding like a pressure chamber loudspeaker that has been put into a tin. An allegedly authentic photo shows an audio filter with the high-pass set to 320 Hz.

## Germany

There will be a special broadcast from DDH47 on 147.3 kHz in December: On 10th of December 1909 Prof. F. Braun and G. Marconi received the Nobel Prize for Physics at Stockholm. Both gentlemen were honoured for their developments in the field of wireless communication.

On its 100th anniversary, Prof. Braun Day (DL0PFB) will make a special transmission with the longwave transmitter DDH47 (147,3 kHz) of National Weather Service Deutscher Wetterdienst. From 9th December 2009 23:00 until 10th December 2009 01:00 UTC the transmitter is available for 2 hours in telegraphy. All people are invited to listen to the telegraphic transmissions of DDH47 and radio amateurs may contact DL0PFB on shortwave in cw only. DL0PFB answers to calls on the declared frequencies and keys DDH47 sometimes in parallel. During silence periods (h+15-18 and h+45-48) of former maritime radio service, there is ultra slow keying ( 1 dot in 3 seconds ) for long distance tests. The names of famous wireless pioneers will be keyed in that time for proof of reception!

Prof. Braun Day issues a special QSL card, contacts are exchanged via DARC Bureau or direct, when circumstances allow: (Deutschland SASE, Europe postage 2 US Dollars, overseas postage 4 US Dollars, No IRC) Contact: Prof. Braun Day, c/o J. Gerpott, Rebhuhnweg 21, 22880 Wedel, Germany. When: 9. Dezember 2009, 2300 UTC until 10. Dezember 2009, 0100 UTC. Transmit : DDH47 147,3 kHz und DL0PFB : (3565, 7025, 14052 kHz +/- qrm), Receive : DL0PFB only shortwave, see above QRS3 : hourly +15 to +18, and +45 to +48, ultra slow keying 1 Dot in 3

Seconds. Reception reports are welcome, especially from overseas! Internet: <http://www.mmqtaward.org> . (Alan Gale via Steve Whitt)

## Korea/Luxembourg

We have an exciting announcement about a new medium wave frequency available for KBS World Radio in European. As of Nov. 1, KBS World Radio's one-hour programming is now available on 1440 kHz at 0100 CET for European listeners in England, Germany, France, Denmark and the Netherlands. The programming will be also simulcast at [www.rtl1440.com](http://www.rtl1440.com). If you miss that slot, don't worry. You can listen to us again at 2100 CET through the internet audio stream at [www.rtl1440.com](http://www.rtl1440.com) .Enjoy listening.  
[http://world.kbs.co.kr/english/radio/notice/notice\\_read.htm?No=16](http://world.kbs.co.kr/english/radio/notice/notice_read.htm?No=16) (KBS via Mike Terry,MWDX)

## Netherlands

Big L's return to mediumwave 1395 kHz has been postponed. Due to some technical problems our start will have a small delay of a few days. Transmitter site is Trintelhaven. (KBC Radio via [Mediumwave.info](http://Mediumwave.info))

## Netherlands

Since many years Radio Seagull broadcasts on 1602 from 7pm till 7 am (CET). Last year we enlarged our hours to 24 hours a day on the internet. Starting November 2nd you can also listen to Radio Seagull via a terrestrial frequency in London, Kent, Essex, and the coastal area in SE England, NW France, W Belgium and SW Holland. Not the whole 24/7, but two hours for starters . Every day between 3 and 5 am [0200-0400 UTC] on 558 AM! Full details at <http://www.radioseagull.nl/news.html> . (Mike Terry via MWDX)

## Nigeria

FRCN Kaduna commissions transmitter.Latest news, written by Ibraheem Musa, Kaduna Friday, 13 November 2009 00:42:

About nine months after it was handed over by the Japanese government, the Federal Radio Corporation of Nigeria (FRCN) Kaduna's 200Kw medium wave transmitter was commissioned at the Jaji transmission station yesterday. This is not the first time Japan is granting such aid to the FRCN, Barrister Yusuf Nuhu, the Director General said.

"I can be recalled vividly between 1989 and 1990, it extended to FRCN a 2.5 billion yen, which is equivalent to N1.5 billion grant in aid of our alternative power generating project", he said. The Director General also disclosed that work was presently going on in the second phase of the same project at the Enugu national station. This donation, he further said, symbolized the mutual wish of both Nigeria and Japan to work together. Alhaji Halilu Getso, a former Zonal Director of FRCN Kaduna, praised the Japanese government for assisting the radio station. He however lamented that the commissioning was a day of sober reflection and not celebration. According to him, the station's Jaji transmitting station used to have 10 of such 200 mw transmitter that was being commissioned.

The former Zonal Director said the neglect of those in authority contributed to the collapse of the transmitters and the radio station was celebrating the receipt of one. Emir of Zazzau Alhaji Shehu Idris acknowledged the station's programmes, adding that radio was central to the Distance Learning Programme which the government had introduced. (Report above mentions no frequency but presumably is the transmitter handed over in February (reported in Media Network blog via DXLD 9-018) for FRCN Kaduna Ch1 in Hausa on 594 kHz? - Alan Pennington)

Nigerian newspaper Daily Trust website <http://www.news.dailytrust.com> via Alan Pennington, dxld yg (13/11-2009)

## Russia

Here's my translation of the news that appeared in Russian Open\_DX conference today:

The medium wave transmitter of R.Mayak in Kazan on 1521 kHz has been turned off. I called radio/TV transmitting center and was told it's for good - that's VGTRK's decision. Now we can enjoy China Radio International on AM, too.

Here's the formal announcement in Russian: <http://www.mcrt.ru/index.php?nodeid=2&id=8926>. Mayak's AM relay in Kazan was closed down on Nov.1. If I'm not mistaken it was a 20-kW transmitter.

MW tx which formerly carried Radio Mayak broadcasts on 1521 kHz in Kazan, Russia, is silent since 1 Nov. I phoned the transmitting center, and they told me that it has been switched off for good. 252 kHz with Radio Rossii / Radio Tatarstana / Na Volne Tatarstana was not affected by this decision and continues operation in regular mode. (*Dmitry Mezin via EMWG*)

## DX news from Kamchatka

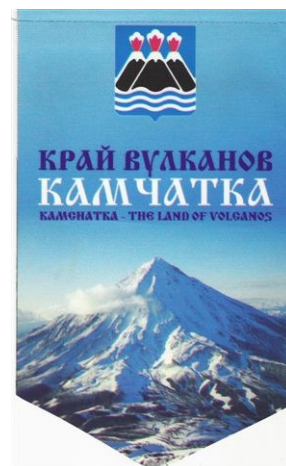

Last August my girlfriend and I toured the Kamchatka peninsula in the Russian Far East, travelling with Beluga, a Dutch travel company specialized in trips to Arctic and Antarctic regions. The journey involved a 9-hour non-stop flight from Moscow to Petropavlovsk, the longest domestic flight in the world. Several helicopter flights were made locally as there are very few roads in Kamchatka due to the rough terrain; it is after all the most volcanic region in the world with a total 150 volcanoes of which 30 are active. We also travelled in special huge 6-wheel all-terrain vehicles. The driver can adjust the pressure of all tyres from his driving position according to condition of the terrain. In addition to sightseeing, which also included watching lots of salmon-catching bears, I did some listening and visited the state radio & TV station in Petropavlovsk to collect some information. (All mentioned times are UTC, please add 1 hour for summer time).

The large Yelizovo transmitting station (LW, MW and SW) is located right next to Yelizovo Airport, 32 km North-West of Petropavlovsk. All FM and TV broadcasts originate from Mishennaya Hill overlooking Petropavlovsk. The FM stations I noted are 103.5 R Mayak, 104.5 R Tri, 105.5 R SV and 106.0 Yevropa Plyus. R Mayak is parallel to 576 MW, but on FM it is interrupted for local programmes during the last 10 minutes of each hour between 2100-0600. R Rossii's Far East programme is also broadcast from Yelizovo on 180 LW and 5920 SW. I found reception somewhat disappointing and they - as well as Yunost (1008) and Mayak (576) - may be running at reduced power. On 5920 I also noticed slight distortion and a hum; on comparison, 5940 Arman came in much better with a solid and well-modulated signal.

R Rossii is interrupted for regional programmes Monday-Friday only at 1910-1930, 2010-2100, 2300-2330, 0110-0130, 0510-0530 and 0810-0900. At 2040-2055 and 0710-0725 there are segments in vernaculars, alternately in Koryak and Itelmen. The programme "Kamchatka Fishing" (Kamchatka Rybatskaya) is no longer listed in the WRTH but is still on the air on Fridays only at 2010-2040 on all of R Rossi's frequencies: 180 LW, 5920 and 69.72 OIRT FM. Sorry to say that I did not succeed in getting it confirmed that they shift 5920 to 6075 kHz in winter.

I noted that R Rossii and R Mayak are commercial and I was somewhat surprised to hear that R Yunost now identifies as "YuFM". I checked the low-power MW outlets listed for Kamchatka many times, but no joy.

They may be off or I was beyond their reach, staying mostly in Southern Kamchatka. Other stations noted from the Far East and Siberia were: Arman 5940, & 7320, Yakutsk 7140, 7200 & 7345 and Krasnoyarsk on 6085. (*Maarten van Delft via BDXC-NL*)

## BBC News

### **BBC Radio Foyle programmes to be cut ?**

**17 November, 2009**

More than half of BBC Radio Foyle's programmes (FM and 792 kHz) could be axed and jobs lost under a major cost-cutting drive by BBC Northern Ireland, the 'Journal' has learned. The station's flagship "News at One" slot and the popular Sean Coyle and Mark Patterson programmes will be replaced by existing shows on Radio Ulster - if proposals by management in Belfast get the green light.

It's thought that as many as four jobs are at risk at the station. Weekend output will also suffer with plans to scrap the hour long 'Saturday Sports' programme and 'Saturday Club', presented by Eamon Friel.

The 'Journal' has learned that some of the station's presenters were told of the plans after being summoned to a city centre coffee shop. The National Union of Journalists (NUJ) fears the proposals will spell the end for Radio Foyle.

Under the current plans - which follow a two month review of the BBC's operations in the North - Radio Foyle will still have two-and-a-half hours of broadcasting in the morning but it's unclear what format those programmes will take. There are also plans for a new hour long evening programme at 6 p.m. - traditionally a time when most people are watching the early evening news on television.

One source said: "This is the end of Radio Foyle as we know it. It's devastating for the station, its staff and, more importantly, the listeners. The ethos and identity will be lost. People are in shock."

A BBC Northern Ireland spokesman said discussions were ongoing in relation to Radio Foyle. (<http://www.derryjournal.com/journal/Axe-hangs-over-BBC-Radio.5781799.jp>)

## Commercial News

### **UKRD and TLRC exit RadioCentre**

**12 November, 2009**

UKRD and The Local Radio Company have both resigned membership of the RadioCentre, commercial radio's trade body, to oppose the proposed digital switchover review date of 2013 and subsequent switchover date of 2015. The move comes less than three weeks after UTV were vocal about their decision to also opt out of the trade body.

UKRD and TLRC are now planning to work together with UTV Radio to make a case against the switchover date. Chief Executive of UKRD and TLRC, William Rogers said: "The proposal that there should be a review in 2013 which might lead to a switchover in 2015 needs to be exposed for the completely ridiculous proposal that it is.

In response, Andrew Harrison, Radio Centre's Chief Executive, said: "UKRD has confirmed that it will not be renewing its Radio Centre annual membership from November 2009. We are all naturally disappointed by this news. "Commercial Radio is a small sector and we are therefore stronger when we speak with one voice. Radio Centre will continue to work on behalf of all of its members, representing the broad range of views that exist within our sector, to help secure a viable future for all stations in a digital Britain. ([www.radiotoday.co.uk](http://www.radiotoday.co.uk))

**Commercial radio stations have been slow to embrace change. 12 November, 2009**

It's been a difficult year for commercial radio, with the sector losing market share to the BBC and accounting for just 42.4 per cent of listening time. Unlike the BBC, commercial radio groups do not have the luxury of focusing purely on content and distribution. They have encountered one of the toughest advertising markets in history, while trying to maintain quality and appeal.

Questions are now being raised about the future of the traditional spot advertising broadcast radio model and whether commercial radio has been innovating enough in the online space to ensure its survival.

Mike Gordon, Global's group commercial director, also highlights that commercially, the company's websites are a big part of their solutions to advertisers. But there is no escaping the fact that the traditional spot advert is still the main source of revenue for commercial radio groups. But one company, Absolute Radio, is pushing hard now to change that – with up to 40pc of its revenue now coming from non-spot advertising.

(<http://www.telegraph.co.uk/finance/newsbysector/mediatechnologyandtelecoms/digital-media/6555788/Digital-may-yet-kill-the-radio-star.html?>)

**Talksport revenues decrease 23 November, 2009**

talkSPORT owner UTV Radio GB has seen a 10 per cent decline in revenue, in a management statement issued today covering the last ten months. During the same period, UTV's Irish radio division declined 19 per cent, including accounting for the acquisition of FM104.

UTV Radio compares their figures to the market which declined by 13 per cent during the same period. "Airtime bookings remain extremely short-

term, offering limited visibility, and therefore we continue to be cautious about trading prospects for 2010," the company said. ([www.radiotoday.co.uk](http://www.radiotoday.co.uk))

**Absolute Radio reports £2.7m loss 23 November, 2009**

TIML, parent company of Absolute Radio, has reported a lost of £2.7 million for 2008, before tax. It was of course the year which saw the station change ownership and identity as Virgin Radio made way for Absolute. The station had operating costs of £24.7m compared with revenue for the year in total at £22m. The total loss, after tax, was £1.9m. Exactly as planned, says the station.

Adrian Robinson, Absolute Radio Chief Financial Officer: "This is exactly where we thought we would be at the end of 2008. The strategy has been to invest heavily in the national launch of Absolute Radio and in the product. We have made new talent signings like Frank Skinner, made a substantial investment in launching and marketing the new brand and continued innovation in the digital space. "This up front investment means short-term losses. However, we are building a successful digital company for the long-term." ([www.radiotoday.co.uk](http://www.radiotoday.co.uk))

**RSL & LPAM News**

Details of the football club's broadcasting their home games are as follows:

### **Forest of Dean Community station to close**

**23 November, 2009**

Forest of Dean Community Radio will cease broadcasting at midnight on 31st December 2009. This decision has been taken by the management group after a review of the funding and other resources available to the project.

This brings to an end almost 14 years of community broadcasting in the Forest, over half of which has been as a full-time Community Radio Station. Radio "for the people, by the people" was first broadcast in the Forest via a series of 16 short-term projects starting in 1995 which aired for a few days in each of the Forest towns, usually to coincide with a festival or event. As the new millennium arrived the Forest project was accepted as the only rural station in Government trials set up to test the concept of radio that is community owned and controlled.

The station became the UK 's very first full-time Community Radio station when it was awarded license number CR001 after legislation was passed in 2003 creating a whole new tier of radio which is aimed at giving local people access to the media. During the project's lifetime thousands of Forest people have been involved the station by making or appearing in programmes or helping in other ways. Despite many months of effort the project has been unable to secure sufficient funding and resources to enable it to continue until the end of its present five year license at the end of 2010

### **OTHER NEWS**

#### **Bankrupt DJ to sell £1 record collection**

**25 November, 2009**

Former Radio One DJ Mike Read has been forced to sell off his entire collection of 120,000 vinyl records – estimated to be worth £1million – after being declared bankrupt.

The 62-year-old, who also presented Top Of The Pops and Saturday Superstore on TV, needed to sell after he went deep into the red for a second time earlier this year owing unpaid taxes. The 350-box set of LPs has attracted the attention of collectors who have deemed it ‘too important’ to break up. He was a regular DJ on the Big L station 1395 kHz which closed down last year.

It is expected to have an auction guide price of £750,000. Experts, however, estimate its worth to be at least £1million. Valuation agent Hugh Thomson said: ‘This is proving to be one of the defining vinyl collections and is easily the most exciting to come on the market in years. The Eighties DJ’s collection of 120,000 discs has an auction guide price of £750,000, but is expected to fetch about £1m.

Read has been declared insolvent twice before. The first order in 2008 was annulled after he paid cash owed to Horsham Council in West Sussex. Then in February of this year he was declared bankrupt at Colchester County Court in Essex.

In 2004 Read said: ‘I’m known for my enormous record collection and have about a million tracks. It’s taken on a life of its own in a wing of my house in West Sussex.’

Financial woes appear to have dogged him in recent years.

(<http://www.dailymail.co.uk/tvshowbiz/article-1216876/DJ-Mike-Read-forced-sell-1m-record-collection-declared-bankrupt-second-time.html>)

# SHEIGRA DXPEDITION REPORT

2nd to 16th October 2009 - with Dave Kenny, Alan Pennington & Tony Rogers

---

## Receivers

Tony Rogers	AOR AR 7030 Plus and Palstar pre-amp
Alan Pennington	AOR AR 7030 Plus and Palstar pre-amp
Dave Kenny	AOR AR 7030 Plus and tuneable pre-amp

## Aerials (all long-wire beverages using 7-strand 0.2mm wire supported on 4-5ft bamboo canes)

45 degrees	620m beverage - terminated	Far East
90 degrees	500m beverage - unterminated	Mid East & Asia
160 degrees	450m beverage – terminated	Africa & UK LPAMs
240 degrees	120m beverage – terminated	South America
305 degrees	640m beverage - terminated	North America
310 degrees	500m beverage – terminated	North America (reserve)

## Dxpediton Report

This is the 51<sup>st</sup> DXpedition to Sheigra according to Tony's research, the first being back in October 1985. And this would be the 6<sup>th</sup> time we have stayed in Mary's cottage here in this far north-west corner of the Scottish mainland (the original DX cottage used from 1985 to 2001 sadly still stands empty and unoccupied). As we headed north, we heard that an Army lorry had crashed through the Laxford Bridge where the roads from Ullapool and Lairg meet and head north to Kinlochbervie and Sheigra. The bridge was closed so we faced a two hour detour via Tongue on the north coast. Fortunately, by the time we got there, the bridge had reopened to light vehicles and we arrived in Sheigra in good time to put up a couple of aerials before dusk.

The weather was generally unsettled during the two weeks with some periods of rain and very windy spells – indeed it was difficult to stay on your feet when putting up the final length of the 305 degree beverage on the first Saturday, such was the strength of the wind once above the shelter of Sheigra's valley! But we also took advantage of some calm sunny days when we could enjoy the wild landscape including two long walks to remote bothies at Strathan and Strathchailleach (via Sandwood Bay). The bothies would make good interference-free DX shacks but have no electricity and are miles from any road!

Plenty of sheep around in Sheigra this year, though they did not harm our beverages. But we suffered ten separate overnight breaks, all on the North American aerial, and all caused by deer we think. Repairs in the pitch Sheigra night by torchlight or first thing in the morning were needed to keep this aerial fully optimised. KLO, Ogden Utah on 1430 kHz we realised was heard on this beverage when it was broken a third the way down its length and therefore also unterminated! We see more herds of deer on the distant hills around Sheigra these days. But we think the overnight damage may just be done by one deer venturing right down near the houses under the cover of darkness. The 5 foot supporting canes we use will let sheep roam freely underneath the wires, but they are too low for deer (although they can leap over them in daylight). But at night deer must crash into the wire, drag it out of the canes and snap it (we use thin 0.2/7 strand wire which easily breaks so it won't cause any harm to the animals!) Eventually we put up a reserve North American aerial but this suffered exactly the same fate. Thankfully no problems with any of the other aerials. The 90 degree Middle East aerial we again left unterminated which would give possible catches from the opposite direction (Americas) at night. We again put out a southerly beverage for UK LPAMs and Africa, but with poor results, mainly as Spanish stations are in the same direction and occupy many channels.

We commented last year on electrical interference and sadly even in this remote area there was even more this year, for the first time affecting all our aerials at almost all times of day and night. Still, plenty of DX could be heard, but the QRN made reception of the weakest signals very trying at times. Also notable is the amount of digital noise audible on many North American channels, spillover from IBOC HD transmissions on adjacent frequencies (HD stations are still audible in AM but they put out digital noise affecting adjacent channels).

Conditions were similar to this time last year, and again did not change much from day to day thanks to the zero sunspots. On medium wave we had North America from fade-in around 2100 UTC until typical fade-out around 0930, a bit later on 15<sup>th</sup> when the band stayed open to the US and Canadian west coast past 1000. The Far East could be heard from around 1500 most afternoons, with many Chinese, Korean, Vietnamese and even Philippine stations logged, also India and Iran a bit later on. On shortwave we enjoyed superior reception to that possible at home, concentrating on Latin America, Africa and the Far East. Highlights included reception of Radio Congo on 6115 on two separate occasions. Our SW logs are as usual included in the HF & Tropical logbook sections.

Notable loggings or possible Sheigra "Firsts" are highlighted in bold.

- SW Steve Whitt, High Catton near York. AOR7030+ and HF225 Europa with dual loop K9AY.
- TB/JF John Faulkner/Tim Bucknall, Matlock Forest, Derbyshire. Perseus SDR & 300m beverage at 30°.

First, some comments from out European contributors. Writing on 21 November, **Maurits** says: “The past days are good and excellent for MW DX, also before midnight. The Perseus makes the DX complete with the overnight recording. Conditions also good direction LA”. **Hans** tells us: “Not much out of the quiet conditions heard this month. Just some standard East Coasters, often there was nothing at all around dawn. Best log this month is R VEA, Guatemala; also a nice ID from R. Planalto in Brasil. All logs made with real radios, as I didn’t find the time to switch on the laptop and run the Perseus SDR. I will be in Denmark visiting Wilhelm Herbst DX183 from Dec 4 - Dec 14. Therefore I hope the quiet conditions may last some more weeks. I will bring the Perseus SDR together with 2x1TB HDD with me. Results are posted to you in mid December or even later. Will be a lot of work to get through the recordings ...” – *good luck with conditions at DX183!* – mah. Another member planning a trip to DX183 is **Ronald** – he writes: “Some good trans-Atlantic conditions this Friday morning (6 Nov) with few of east coasters and also a great couple of west coast stations - the greatest highlight for me was CJSJL on 1280.1 kHz - this SK station get located here in Ottersberg ... the first log of CJSJL. Wish me luck on my visit Wilhelm

Herbst Beverage Antenna farm in January 12. 2007! :-)) – *yes, good luck certainly, and have fun – mah.*

While on the subject, **John F** tells us about his latest DX-pedition with **Tim** on 18 November: “This was our most successful Matlock Forest DX trip so far! This time we were able to eliminate the interference from the Megane car electronics which resulted in a lovely quiet band. I wondered if this might have been due to a slightly different beverage arrangement. Instead of using a terminating resistor (it failed on the day) we simply terminated the far end of the beverage straight to earth. The beverage was laid on the ground as usual.”

“One thing which aided station identification was the **time signals** which are aired by each country. While I realise this will not provide positive station identification for some DXers, it proves that the stations themselves were getting through. Time signals are like Morse code in the way that they are able to penetrate the noise, even when very weak, and the time signals of China, Korea and Japan are very distinctive. Tim explains: “The Japanese (NHK) & Korean time pips (they only have one pip each) were measured at 875 Hz. They are virtually identical and longer than other country’s pips. A distinctive characteristic of these is that they gradually fade out. Also note that Japanese & Korean time pips are always on time. Chinese six pips are sometimes late and were heard as much as 16 seconds after the top of the hour. Useful characteristics of the Chinese pips are that the first five pips were measured at 800 Hz and the sixth pip at 1600 Hz - one octave higher! The Taiwanese stations we heard did not have time pips.

Also worthy of note is that some of the Russian time pips are also late, particularly the Siberian stations. i.e. Surgut on 225 kHz was 2 seconds late when heard by Tim on the 18th Nov. We were amazed to note that sometimes two and as many as three different Chinese transmitters were heard on some frequencies. 540 was a good example where three sets of pips were heard, all a few seconds apart from each other. We have listed these in the log as “multi tx.”. Tim also adds: “apparently the domestic national network on LW is R Rossi, and Gollos Rossi is that External Russian service on 1323, 1143 kHz etc that gets relayed in the former Soviet republics, but I think they even carry the same news bulletins!”

After a long break, it was a pleasant surprise to receive a message from **Martyn**, who advises: “My first loggings to the News this season, up to recently it has been relatively quiet . It was a nice surprise to hear the Chicago stations - I have tried to I hear them but to no avail apart from WLS which picked in the early days upon returning to the UK while living in Worcester. (*I should explain that Martyn lived in Chicago for a while, many years ago – mah*)

I shall have further logs later on, including CJWW on 1310. I noticed that in the NRC Night Pattern book that the signal is beamed due north which would I think be difficult to hear this far south. When Norway left 1314 it was quite along time before anything appeared except on a couple of occasions a station with continuous music but no proper ID; however last March, the 17th to be precise, Radio Nacional Venezuela came in with a weak but clear signal. The programming at least in part sounded East European may have been mistaken the ID was in Spanish.” In a message with his logs, **Andrew** tells us: “Here’s a short selection of what has been heard. I’ve omitted many of the more common stations.” *Some nice catches in there – mah.*

Now, some comments about propagation. **Jack** notes: “It’s been another good month here, though the band seemed generally a bit more noisy than last month. Trans-Atlantic signals have been lingering longer in the morning, but Far Eastern/Alaskan stations haven’t really been much in evidence in the afternoons apart from the regular 1521 CRI Urumqi. I noted KBRW’s carrier on 680 a few times, but managed to hear no more than a couple of seconds of barely readable audio. **Paul C** comments: “I’ve been treated to some excellent conditions here over a sustained period. From 7 to 20 November I heard at least one West Coaster on every day apart from one, and accumulated 23 personal firsts over the period. Stations such as CHQR, CFRY, CFRW and even KJR became regulars here, whilst the 1230 kHz CBC station from Nunavut was a common evening visitor. KNOM became my second Alaskan station. It is probably the longest spell of continuous

good conditions that I can remember”. **Paul L** adds: “Highlights for me were the Japanese receptions on Nov 6th opening up a whole new area of the hobby in which to get carried away!”

Writing about his experiences, **Steve** tells us: I tried to capitalise on the continued absence of German DRM on 1593 kHz (has this gone for good?) and the delayed (alleged) reactivation of 1395 kHz by Big L but with limited DX success on these channels. During November Belgium on 927 kHz operated extended hours overnight on several nights which intruded on 930 kHz. I still have not heard CJYQ this season! I’ve not listed stations like WINS, WWKB, WWZN, WLAM, WEEL, WBBR, CHIN, CHUM, CFRB, CKAC, VOCM & Eastern CBC stations because these were audible most nights. Many others omitted for brevity leaving my rarer catches listed. Naturally I’m very pleased to hear a couple of West Coast stations and two stations from the Prairies. I’ve also left out the Chinese stations because they remain mainly “presumed”. CRI on 1521 was audible every day, WYFR from Taiwan on 1557 most days. Chinese was audible on clear channels like 1395 & 1593kHz most afternoons.

I have chased 1070 kHz in a (vain) attempt to hear KNX but I have been plagued by a high noise level that sounds digital and an unusual carrier that appears strongest at UK dawn on 1068.5 kHz with a Morse-like sound. This clearly not local as it has been reported by other DXers and it has been speculated that this is IBOC digital QRM emanating from WTIC in the USA. Not a bad month – at least 23 US states and 8 Canadian provinces heard and identified!”

As can be seen from the log, stations from the western coast of North America, prairies and plains have once again been widely heard throughout the UK, with many **personal firsts** reported by DXers. Daytimers were also widely heard at the end of October, and reception of them has continued throughout the month of November. I’ve not checked the records for **UK Firsts** this month, but I’m sure there are quite a few in the log. Conditions in **Clashmore** have been excellent throughout the month: I was away from home from 6 to 9 November, and so missed the good opening to Asia, on the 6<sup>th</sup>, but was rewarded with an exceptionally good day on the 17<sup>th</sup>, when a goodly number of Japanese stations were dominating the Europeans. Conditions to the west coast of North America and Alaska have been exceptional at times. As usual, logs of the more common stations have been omitted from my contribution – mah.

The **deadline** for the January 2010 DX Loggings is Boxing Day, **Saturday 26<sup>th</sup> December**. I look forward to receiving your logs by then, preferably electronically/via e-mail using the Word proforma, which I can supply on request if you don’t already have one; **very many thanks** to all members making the effort to submit contributions following the format used in DX Loggings - it makes my job of compiling the log so much easier, especially when it’s as big as the one we have this month!

Would newer members please note that DX Loggings is a consolidated permanent record summarising of stations heard, also available to those members not subscribed to the e-List; postings to the e-List are intended as hot tips and subject to correction where required. If you would like any tips sent to the e-List to be published in DX Loggings, please send them to me separately. All logs of stations transmitting from outside Europe are welcome. In common with the other sections of MWN, DX Loggings aims to include as many members as possible, and I’d like to ask those of you who listen to MW DX, but who haven’t yet shared your catches, to make a special effort and send me a contribution for the next issue.

**Good DX, and best wishes for Christmas and the New Year!**

73, Martin
