This month we are well into the MW DX season in the northern hemisphere and this is reflected in the expanding DX Logs column. Please keep your contributions coming in. If you've never contributed before yours will always be welcome.

## Gabriel Ivan Barrera RIP

Juan Carlos Aragon writes on [digitalspy.co.uk](http://digitalspy.co.uk): Well known Cono Sur Dixer and radio listener Gabriel Ivan Barrera passed away on 14 September, suffering a heart attack in Santiago de Chile. He was a collaborator of Radio Enlace of Radio Nederland and a great DXer and informer about radio in Argentina and Chile and worldwide. Gabriel was a former member of the Circle and he also signed my QSL card from Radio Nacional LRA1 back in 1989. R.I.P.

## New book predicts failure of DAB Digital Radio

Digital radio switchover is unlikely to ever happen in the UK writes radio specialist Grant Goddard in his new book "DAB Digital Radio: Licensed To Fail" published on 1 October 2010 by Radio Books in the UK and US.

Mr Goddard uncovers a secret deal struck between the government and the UK commercial radio industry to force DAB radio upon the British public. In return for the radio industry promising to press ahead with DAB, the government bowed to pressure from the largest commercial group to amend the law so that its most profitable national FM radio licence could be renewed without a public auction.

Mr Goddard also exposes a wealth of inaccurate and distorted data published by radio industry lobbyists as part of their campaign to convince the government and consumers that take-up of DAB radio has been a success in the UK and overseas.

However, while the radio industry was assuring the government of its commitment to DAB as the future of radio, Grant Goddard's book reveals that the largest commercial radio group was quietly closing its digital radio stations and selling off its investments in DAB radio licences.

Goddard estimates that the UK radio industry has invested almost £1 billion in DAB which has contributed significantly to the current lack of profitability in the commercial radio sector. He concludes that UK radio's misplaced faith in European DAB technology has destroyed the viability of much of the UK's previously profitable local commercial radio industry.

Written as diary entries between 2008 & 2010, Mr Goddard's 314-page book uses charts and graphs to chronicle a critical period in DAB radio's development. The government had launched a number of initiatives intended to solve the problem of slow consumer take-up of DAB radio; the Digital Radio Working Group, the Digital Britain consultation, Digital Radio Upgrade and the Digital Economy Bill. The book documents these efforts and the last-minute legislation of the Digital Economy Act during the last days of the outgoing Labour government in 2010.

Author Grant Goddard is a London-based media analyst specialising in the radio broadcasting sector. For thirty years, he has worked in the radio industry as a senior manager and consultant, in the UK and overseas, and has written extensively about the radio business for consumer and trade magazines. More information on the Radio Books website [www.radiobooks.org](http://www.radiobooks.org)

## Pirate broadcasts spark terror alert

A pirate radio broadcaster whose equipment sparked a major terrorist alert has been jailed. James Cooper, 28, from Walderslade, Kent, strapped a laptop computer and an aerial to the top of a 50-foot water tower at Blue Bell Hill, Kent to pump drum 'n' bass from Flex FM to his audience.

But the crudely-assembled broadcast gear, placed on private property behind a six-foot chain-link fence in Common Road, was mistaken for a bomb by a suspicious South East Water employee. He called police, who brought in the bomb squad. A frantic five-hour disposal operation, in which two controlled explosions were carried out, followed. Cooper was arrested when he arrived at the 50-metre cordon set up by officers and was able to give information about the equipment. He was sentenced to 150 days in jail after a hearing at Medway Magistrates' Court in September.

## USA supports Amateur Radio Allocation at 461-469 & 471-478 kHz

The Federal Communications Commission and the National Telecommunications and Information Administration (NTIA) -- the spectrum regulators for United States private sector and government users, respectively -- have agreed to support a secondary MF allocation to the Amateur Radio Service at 461-469 kHz and 471-478 kHz at the 2012 World Radiocommunication Conference (WRC-12), to be held in Geneva, Switzerland from January 23-February 17, 2012.

According to ARRL Chief Technology Officer Brennan Price, N4QX, the proposal reconciles two widely divergent proposals for WRC-12 Agenda Item 1.23, adopted by consensus of the private sector and government users. Agenda Item 1.23 calls on WRC-12 "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services." The FCC's WRC-12 Advisory Committee (WAC) had adopted a proposal for a secondary amateur allocation at 495-510 kHz, but the NTIA, acting on the advice of government maritime interests, initially supported no change.

Some maritime interests, have opposed any amateur allocation in the range 415-526.5 kHz, citing existing NAVTEX applications at 490 and 518 kHz, as well as future plans for the band that have yet to be fully characterized, Price explained. To the extent future maritime uses of the band have been discussed, the focus has been on the 495-505 kHz segment. Despite the lack of plans for the remainder of the range under consideration, the International Maritime Organization (IMO) has adopted a draft position of "no change" and has communicated this position to the ITU. IARU President Tim Ellam, VE6SH, has met with IMO officials in efforts to soften this position.

## US company installs MW triplexer in Taiwan

LBA Technology has designed, built and delivered to Taiwan an advanced technology AM Triplexer system for Broadcasting Corporation of China (BCC). This is the second successful multiplexer project undertaken by the North Carolina company for the BCC.

The project is especially notable because the tower site posed an engineering challenge. The AM triplexer had to be incorporated into an electrically short tower in the middle of a lake, with the tower base and triplexing equipment fitted snugly on a small platform area 30 feet above the water.

An AM triplexer allows the simultaneous use of 3 MW AM transmitters on a single antenna. AM triplexers combine an antenna tuning unit and a rejection filter section for each frequency, which sort out and pass through desired frequencies and reject undesired frequencies. The triplexer for BCC was designed for 531kHz, 648kHz and 963kHz, and 10,000 watts power at 125 percent modulation for each frequency. Full story: <http://antennablog.lbagroup.com/am-triplexer-taiwan/>

Now on with the show.

73s Steve

## SPAIN: COPE Local Programmes

with Stefan Schliephacke

During the summer months I made some DX preparations for the up-coming season. Checking my verification count and preparing myself to make the "100th goal", I realized that there are still lots of COPE I don't have a QSL yet. I prepared a list with all the local "opt outs" in order to tune in to there local programmes when propagation allows. I also found that the information provided in the EMWG for the COPE stations does not match with several station's schedules published in the official COPE web site. Please not that for Burgos and Alermeria there was no information available and there is a evening sced for Caceres only (even I speak Spanish, my emails remained unreplied or I was advised to check the official web site... All times valid for Monday thru Friday only. All times are in **CET**. I don't know whether local advertisement opt outs previously aired in the evening hours are still in place. The only programme listed during the weekend is a local church service between 09:45h and 10:00h aired from all stations. Other observations are highly welcomed to: stefan.schliephacke@gmx.de

# NORTH AMERICAN NEWS

✉ Sand Gap, Bursea, Holme-on-Spalding Moor York YO43 4DF

with Andrew Brade

e-mail: [na-news@mwcircle.org](mailto:na-news@mwcircle.org)

Hello again.

Here is what's been happening on the North American AM dial. May I express my gratitude to the organisations which make this summary possible? Thanks this month to: - IRCA, ABDX, NRC DX News, FCC, CRTC, DXLD.

It's a fairly quiet month with the main news relating to 1060 WBIX and 1290 CFRW, but little else of major interest, so here are the details:

- 1060 WQOM** Natick, MA; With format to Catholic religious ("The Station of the Cross") and call sign change to WQOM, the former business radio station has only been on the air temporarily in the last days of September 2010. It is due to return on 1<sup>st</sup> November 2010.
- 1060 WILB** Canton, OH; This daytimer adds 15kW Critical Hours
- 1170 WWVA** Wheeling WV; Still down on power following weather damage
- 1290 CFRW** Winnipeg MB; Returns to sports (ESPN) format
- 1590 WVNA** Tuscumbia, AL; Although licensed for 5kW days / 1kW nights, the station is broadcasting from temporary facilities at 2kW days and nights following loss of its transmission site
- 1660 WGIT** Canovanas, PR - reported back on air with Tropical format // WEKO 1580

More Disney stations are reported silent from 30<sup>th</sup> September per IRCA:

550 WDDZ Providence, RI  
600 WBWL Jacksonville, FL  
680 WDRD Louisville, KY  
1550 WDZK Hartford CT

Meanwhile Disney is taking over 1250 WEAE Pittsburg PA from ESPN, potentially forcing 540 WWCS Canonsburg to drop Disney when its contract expires at the end of 2010.

## CANADIAN RADIO NEWS

From IRCA and NRC

### FORMAT CHANGES

- 650 CBF-3 Lebel Sur Quevillion, QC CBF-3 Change feed source from CBF 95.1 Montreal to CHLM 90.7 Rouyn Noranda
- 710 CBF-1 Senneterre, QC Change feed source from CBF 95.1 Montreal to CHLM 90.7 Rouyn Noranda

1140 CBF-4 Matagami, QC Change feed source from CBF 95.1 Montreal to CHLM 90.7 Rouyn Noranda  
710 CBF-17 Lac Edouard, QC Applies to change feed source from CBF 95.1 Montreal to CBF-8 96.5 Trois Rivieres  
710 CBF-18 Parent, QC Applies to change feed source from CBF 95.1 Montreal to CBF-8 96.5 Trois Rivieres  
990 CBF-16 Clova, QC Applies to change feed source from CBF 95.1 Montreal to CBF-8 96.5 Trois Rivieres  
1240 CKDR-6 Atikokan, ON The CRTC has approved the application for CKDR-6 to change their programming source to CFOB-FM Fort Francis, Ontario instead of the current CKDR-2-FM Sioux Outlook.  
1290 CFRW Winnipeg, MB Returns to sport (27.9.10) having been in Oldies format since 2002. Uses slogan "Sports Radio 12-90 all sports all the time"

**OFF THE AIR**

1220 CHSC St.Catharines, ON As reported last issue, CRTC have terminated the station's licence effective from 31<sup>st</sup> August but the station was reported transmitting on 1<sup>st</sup> September. CHSC owner Pellpropco filed a motion on Aug 25th with the Federal Court of Appeal and a stay to appeal was granted on Aug 31st. CHSC is therefore on the air legally for the time being, probably at least until the appeal is heard and/or ruled upon.  
1240 CBMO Lac Megantic, QC Has apparently been dark for quite some time. No CBC English service now in Lac Megantic.

**FACILITY APPLICATIONS**

1610 CHHA Toronto, ON Application denied to decrease daytime power from 10,000 watts to 6,250 watts. Increase nighttime power from 1,000 watts to 6,250 watts (rejected due to non-compliance)

(A) = application, (G) = grant, (D) = Dismissed

550	KTZN	Anchorage, AK	U1 3100/5000 relocating to the tower of co-owned KENI-650. (A)
590	KTHO	South Lake Tahoe, CA	Licensed for U2 2500/500, KTHO is in the process of converting its towers from series-fed to skirted in order to accommodate the installation of an FM translator antenna and up to three cell phone facilities on the towers. They are operating with U1 1000/125. No date was given in the application as to when they anticipate returning to their licensed power levels. (A)
600	WREC	Memphis, TN	Licence to Cover 5K/5K DA-2 (G)
630	WMAL	Washington, DC	Modify Licence to 10K / 5K DA-2 (G)
640	WNNZ	Westfield, MA	Licence to cover 50 K / 1 K DA-2 (A)
690	WIST	New Orleans, LA	Licensed for U4 10000/5000, WIST applied for U4 9300/2500. They have amended the application to read U4 9300/2100. (A)
740	KBRT	Avalon, CA	Filed for an STA or D1 1000/0 on 1690 kHz for the purpose of making conductivity tests "for a few days" in preparation to submitting an application for changes. The form doesn't specify the dates, so if anyone hears KBRT on 1690 . . . this is what's going on. (A)
740	new	Kihei, HI	U1 5000/5000. Kihei is on the southwest coast of the island of Maui. (G)
750	KSEO	Durant, OK	D1 220/0 CH 220 and to re-locate to a new tower with co-owned FM sister station KLBC. (A)
860	new	Black Hawk, SD	U4 50000/350. (A)
910	KCJB	Minot, ND	CP for 5 K / 5 K DA-2 (G)
910	KCJB	Minot, ND	Increase nighttime power to become U4 5000/5000. The new night pattern is basically a circle anchored at Minot headed to the northeast. (G)
930	KNSA	Unalakleet, AK	Licence to cover 4.2K/4.2K NDA (G)
1000	KTOK	Oklahoma City, OK	U4 5800/5800. (A)
1060	KOAI	Van Buren, AR	Licensed for D3 500/0, KOAI operated at an unspecified 'reduced power' from a back-up transmitter as their main transmitter was

borrowed by co-owned KFAY-1030 Farmington, Arkansas to continue broadcasting as their transmitter failed. KOAI has now returned to their licensed operating parameters.

1060 WBIX Natick, MA (now WQOM) Licensed for U7 40000/2500 CH 22000 operating from two transmitter sites (day co-located with the CH; and night at the second site), WBIX has a CP for U4 50000/2500 (eliminating the CH operation) and consolidating all operations to the current night site. This amendment requests reducing the number of towers used during daytime operation from five to three, altering the pattern slightly (both patterns throw all of the signal in a large circular shape due east). (A)

1060 WILB Canton, OH Licence to cover 15K/15K DA-2 (G)

1170 WKFL Bushnell, FL Licensed for D1 1000/0, WKFL had a CP for D4 10000/0 CH 5000, which the FCC deleted due to inactivity. But now they have re-applied for the same facilities. (A)

1170 WWVA Wheeling, WV Having lost all but about 40-50 feet of all three of their three towers to a windstorm, WWVA is now operating U1 12500/12500 (normally U2 50000/50000). The application describes their action: "WWVA has removed the damaged section of tower, leaving stubs of each tower in place. From the top of the eastern most tower in the array, a long wire has been attached and bonded to this tower at the highest accessible point. This wire extends approximately 125 feet in a westerly direction to an appropriate insulating assembly, which is itself suspended by a remaining stub tower, at approximately 40 foot above ground level". Now, what does that mean to the Dixer living west of Wheeling? Since their normal nighttime pattern is directed eastward, those 12,500 Watts at night throws a significant amount of signal to areas not normally covered. So, if you've never logged WWVA, this may be the opportunity. (A)

1200 WXKS Newton, MA Applies to alter its daytime pattern by utilizing an existing fourth tower in their current tri-plex array shared with WRCA-1330 and WUNR-1600. By utilizing the fourth tower, the pattern would change from a balloon shape to the east-northeast to . . . well . . . what may be described as a heart-shape with the 'bottom' of the heart headed northeast and the two 'top' portions to the south and northwest. They would remain U4 50000/50000

1230 KLIC Monroe, LA Move to Richwood, LA 1 K / 1 K (A)

1230 KSLO Opelousas, LA Licence to cover 1 K / 15 NDA (A)

1230 new Summerville, WV U1 1000/1000. (A)

1240 new Green River, UT U1 250/250 from a 54 foot tower. Green River is on I-70 about 160 miles southeast of Salt Lake City (G)

1240 new Merrill, OR New CP 1 K / 1 K NDA (G)

1240 new Prescott, AZ U1 1000/1000. (A)

1250 new Mesquite, NV U4 5000/48 from two towers. The day pattern is kidney-shaped with the null to the southeast while the night pattern is basically a circle anchored at Mesquite headed to the southeast, with a small lobe to the northwest. Mesquite is on I-15 at the Nevada-Utah border.(G)

1260 KWEI Weiser, ID Licence to cover 8.4 K / 360 NDA (G)

1260 KBSZ Apache Junction, AZ CP for 3.5 K / 50 NDA (G)

1260 KWEI Weiser, ID Licence to cover 8.4 K / 36 NDA (A)

1280 KYRO Potosi, MO Licensed for U1 500/84, KYRO applied to move to Troy with U1 660/70. This amendment requests U1 660/45 at Troy. (A)

1290 WTKS Savannah, GA Minor change to 5.3 K / 5 K DA-N (A)

1300 WGDJ Rensselaer, NY Licence to cover 10K / 8 K DA-2 (G)

1320 WJAS Pittsburgh, PA Licensed for U2 5000/5000, WJAS had a CP for U2 5000/3300. This CP has been cancelled, leaving an application for U2 7000/3300. (A)

1340 KIKO Miami, AZ Licensed for U1 1000/1000, KIKO has been operating with U1 1000/1000 at a temporary location since January 2010 in order to conduct soil conductivity tests. They have now applied for U1 380/380 moving to Superior. (A)

1340 KVGC Jackson, CA New station, not yet on the air, has a CP for U1 270/1000. This amendment requests U1 440/210. (A)

1340 WDCR Hanover, NH Licence to cover cancelled per applicant's request. Station and Call sign DELETED (G)

1340 WOYL Oil City, PA Call sign and Licence deleted

1350 KDZA Pueblo, CO CP granted for U1 1300/150 relocating to the #1 tower of co-owned KCSJ-590 at 38-21-28/104-38-19. Since the KCSJ tower is twice as tall as the ones formerly used, KDZA is forced to reduce both day and night power levels. Along with the lower power at night, they can operate in a non-directional mode.

1360 KDJW Amarillo, TX Licence to cover 6 K / 320 DA-2 (G)

1360 new Santa Maria, CA U4 2000/2000 from three towers. The day and night patterns are identical: circular lobes to the southwest. (G)

1360 WMOB Mobile, AL Licensed for U4 5000/212, WMOB is feeling the effects of urban sprawl as construction of warehouses as close as 270' from their transmitter site has caused significant problems trying to maintain their licensed parameters. Most recently, they've had to reduce the daytime power to 3.3 kW in order to reduce incidence of RF burns from the metal inside those buildings. The owners have located and purchased the property housing the former 2-tower site of WLTV, and will be filing for a CP moving to that site. In the meantime, WMOB is operating under an STA with D1 1000/0 from a temporary site.

1380 WKDM New York, NY Minor change to 5 K / 13 K DA-2 (A)

1380 WMTD Hinton, WV U1 1000/13, adding night service. (G)

1390 WLAN Lancaster, PA Licence to cover 1.1 K / 18 NDA FCC lists this as 18 / 1.1 but the application is for 1.1/18 so it is a typo. Moves site to co locate with WLPA (A)

1410 WIHM Taylorville, IL Licensed for U4 1000/63, WIHM is operating under an STA with undisclosed power levels for the purpose of replacement of the cables from the transmitter to the towers. No 'get well' date is specified.

1430 WDIC Clincho, VA Add nighttime service as U1 5000/54. (A)

1440 KKMP Garapan-Saipan, MP This new station not yet on the air, has a CP for U1 3000/500. They are requesting an amendment to U1 1100/1100. (A)

1450 KENA Fort Smith, AR CP granted to move here from Mena, co-locating to the tower of KFPW-1230. (G)

1450 KVSL Show Low, NM Move to 1470 kHz with U1 1100/80. (A)

1450 new Flora Vista, NM U1 250/250 from a 53 foot tower. Flora Vista is located about 10 miles northeast of Farmington. (G)

1450 WSDV Sarasota, FL Move to 1300 kHz with U2 10000/8000. (A)

1460 WJTI West Allis, WI Licensed for U1 500/62 at Racine, WJTI has a CP to move to this west Milwaukee suburb with

U4 1000/240. This amendment requests U4 185/250. (A)

1470 KIID Sacramento, CA Minor change to 5 K /1 KDA-2 (A)

1470 WMGG Egypt Lake, FL Licensed for U1 5000/500 at Dunedin, WMGG has a CP to move here with U4 3600/800 . They subsequently applied for U2 750/800 which has been dismissed. (D)

1490 KBZY Salem, OR CP for 1 K / 1 K NDA (G)

1490 KRSN Los Alamos, NM Having operated from a temporary site under an STA with U1 1000/1000 since 2006, KRSN has indicated they have secured a new tower site and have applied for U1 1000/1000 from a folded unipole antenna. (A)

1490 new Lemont, PA Requests 1 K / 270 NDA (A)

1490 new Malmstrom, MT Minor change to exisiting app. 1 K / 700 NDA (A)

1490 new Malstrom AFB, MT New station, not yet on the air, has a CP for U1 1000/580. This amendment requests U1 1000/700. (A)

1490 WRCE Watkins Glen, NY Licensed for U1 400/400, WRCE has been operating under an STA of U1 100/100 since February 2010 when their tower collapsed. In May they applied for U1 880/880 from a new replacement tower (with a folded monopole, shunt fed antenna) built at the site of the old tower. About a month ago they applied to operate with U1 400/400 from that newly-built tower. But that tower, nor the 880 Watts hadn't been authorized, so that application was denied. Now, the FCC has granted U1 880/880 from the new tower. (G)

1500 KABR Isleta, NM City-of-Licence change from Alamo Community, increase day power and add night and CH operation as U1 5000/25 CH 4200, all this on 1510 kHz.

1510 KABR Isleta, NM CP to move COL to Islets, NM 5K / 4.2 CH (G)

1510 WQQW Highland, IL Licensed for D3 1000/0 and having a CP for D3 5000, WQQW applied for D3 1000/0 moving to Belleville, Illinois on 1530 kHz. This amendment requests D4 1000/0 CH 1000 at University City, Missouri. (A)

1520 WDCY Douglasville, GA Licensed for D1 2500/0 CH 800, WDCY has a CP for D3 50000/0. This amendment requests D4 50000/0 CH 50000. (A)

1520 WXYB Indian Rocks Beach, FL U1 640/60. (A)

1550 WNZF Bunnell, FL Minor change to 11K / 250 9.5 K CH DA-N (A)

1550 WRHC Coral Gables, FL U4 1000/1000 changing the city-of-licence to Doral. (A)

1560 new Greenville, GA Initial application was for U2 250/250 CH 250. This amendment requests U2 1400/250. (A)

1590 WVNA Tuscumbia, AL Licensed for U2 5000/1000, WVNA lost its transmitter site and is currently operating U1 2000/2000 (correct) from the tower of WVNAFM/WLAY-FM (and others) while they seek a permanent site.

1590 WSMN Nashua, NH Licensed for U3 5000/5000, WSMN lost the site of its 3-tower array and has applied for U4 5000/5000 at a newly-negotiated site. In the interim, they are operating under an STA with 'no greater than' 200 Watts non-DA from the tower of co-owned WGFM-900. (A)

1600 new Halifax, GA Initial application was for U4 3500/250. This amendment requests U4 1000/200. (A)

### CONSTRUCTION PERMITS ON THE AIR

The following CPs are on the air:

790	KWSW	Eureka, CA	U1 5000/110, reducing their nighttime power and eliminating the DA.
910	WSBA	York, PA	Having operated under a Special Temporary Authorization (STA) with U1 1250/250, WSBA has returned to its original parameters of U4 5000/1000.
930	KNSA	Unalakleet, AK	U1 4200/4200.
1060	WILB	Canton, OH	D4 15000/0 CH 15000.
1170	WRPM	Poplarville, MS	D1 1000/0 (ex-1530kHz)
1260	KWEI	Weiser, ID	U1 8400/360 from the tower formerly used by KIOV-1450. Since the new tower is almost twice as tall as the one previously used, the power reductions were necessary to cover the same area.
1300	WGDJ	Rensselaer, NY	U4 10000/8000. The day pattern, from 4 towers, sends a major lobe to the northwest with minor lobes to the southeast and southwest. The night pattern, from 6 towers, throws the majority of the signal to the north-northwest with a small lobe to the south-southeast.
1360	KDJW	Amarillo, TX	U4 6000/320. The new day pattern throws a large lobe to the west-northwest with small lobes to the east and south-east off the back. The new night pattern shoots a slender lobe to the southwest, with small lobes to the northwest, east-northeast and southeast.
1390	WLAN	Lancaster, PA	U1 1100/18, moving to the nearby tower of WLPA- 1490.
1430	KLO	Ogden, UT	Is now on the air with U4 25000/5000, increasing their daytime power. The pattern remains the same, with major lobes to the north-northeast and south and a minor lobe to the west.
1590	WHGT	Maugansville, MD	After relocating from Chambersburg, Pennsylvania, WHGT is now on with U4 15000/58 from 2 towers. Both patterns are identical: balloon-shaped lobes to the north-northeast/south-southwest.

That just about clears my "In Tray" for another month so I'll sign off with best wishes for some good DX all around The Circle.

Andrew

## Colombia

A powerful bomb exploded Thursday August 12, 2010 close to the Bogotá headquarters of national broadcaster *Caracol Radio*, reportedly injuring at least four people. The blast occurred at 5.30 AM as Caracol journalist Dario Arizmendi began his daily broadcast. The seventh floor ceiling collapsed above Arizmendi and several colleagues. The twelve-floor building was evacuated immediately and surrounding building have also been affected. The office of former Colombian President César Gaviria is located in the same building. Kirsten Begg, Colombia Reports via Mike Terry, DXLD <http://colombiareports.com/colombia-news/news/11302-bomb-blast-rattles-bogota-radio-station.html>

Caracol Radio of the "Colombian Radio Network" is one of the main radio networks in Colombia. Founded in Medellín in 1948 when La Voz de Antioquia station acquired the 50% of Emisoras Nuevo Mundo, based in Bogotá. Hello radiofriends,

DX-conditions are getting better and better, the nights are becoming longer so we can spend more time behind our receivers in order to make that great catches we are hunting for. Just modernized my shack, so I won't miss anything now.

## Afghanistan

1296 Heard on Sept18, 2329-2345 UTC on 1296 kHz but with QRM from UK station (XL Radio). However programme from VOA was in Special English which makes reception under QRM much easier. VOA is listed on its website on 1296 kHz from 2030 to 0030 UTC. But I cannot find a programme schedule on-line. (Steve Whitt-UK, Sept 19, MWCircle yg via dxld)

## Italy

Here is some information about Ondamedia Broadcast, the new Italian MW station on 1512 kHz. The Mosfet transmitter has a power of 600 W but currently its output is limited to 350-400 W into a vertical 1/8 wave antenna. In the coming future the ground system will be improved, with more radial wires. The transmitting site is San Pietro in Casale, between Bologna and Ferrara (northern Italy). At present the station is operating from 0700 to 2330 hours local time. The letterhead indicates also a frequency of 1503 kHz, possibly for the announced future DRM transmissions. Programs will be of local nature, with music, news and cultural contents. The head of the station is Roberto Furlan, an engineer. The e-mail address is [ondamediabroadcast@gmail.com](mailto:ondamediabroadcast@gmail.com). (Fabrizio Magrone via MWDX)

## Madeira

Here is the situation of PEF-Posto Emissor do Funchal [www.pef.pt](http://www.pef.pt) as obs'ed. & reported to me by PEF the other day:

1017 kHz Santana 1 kW

This site, at Chão da Felpa (São Jorge, near Santana, NE Madeira), was switched off end July last, and the tx was taken to the new site of Poiso, Chão dos Balcões, near Pico do Areiro. Audio from Funchal do Santana was via a dedicated telephone line from PR [www.portugaltelecom.pt](http://www.portugaltelecom.pt), and the stn claimed it was expensive. So this Santana tx would then be used temporarily at Poiso, possibly on 1530 kHz, not 1017, and would remain there as a stand by unit after the 10 kW for 1530 kHz is made operational... some day. However, PEF's plans were abruptly changed when the forest fires devastating areas of Madeira in July reached Chão dos

Balcões and affected parts of the new PEF tower as well as power lines for other stns, like RTP & one or two local stns at Pico do Areeiro.

So PEF is currently audible just via 1530 kHz 1 kW (reserve tx, to be scrapped), St.º António, west of Funchal, and is still (!) awaiting repair of its main, 10 kW unit, to be moved to Poiso when in condition. One of the reasons why PEF is running just 1 kW on 1530 is to reduce interference in the neighbouring households - at least that's what they claim -, but this is so for almost three years now! The other motive is the fault on its main tx which should have been made ready ages ago... so without speculating too much about the whole issue, I would say this huge delay is funds related, a detail PEF, like many other priv. stns, are not keen in disclosing. What PEF does not hide from the public, however, is that it got a severe blow from the [commercial] competition posed years ago when local stns were allowed to operate on the islands, so no wonder the [costly] MW operation faces hurdles.

The Santana tx on 1017 was able to provide daytime reception up here on mainland despite adj. QRM from Spain, and after nulling co-ch. QRM from the same country; night time reception was a nightmare - as far as I am concerned, no signal. The Funchal tx on 1530 is still able to reach mainland during daytime, but is typical worse than the formerly parallel 1017 via Santana: its modulation was slightly weaker; during night time, it's a regular catch despite QRM from CVA & STP (VoA relay), and most, if not all, evening prgrs consist of R.Renascença relays. (*Carlos Goncalves via Mediumwave.info*)

## Netherlands

Big L 1395AM will test the coming 4 weeks on Sunday between 19.00 - 20.00 hours CET with 20 KW during the Ron O'Quinn hour. It's the swinging Radio England Rewind hour on the Big L, it's all starting on September the 19th. For receiving a Big L QSL card, check out this link

<http://www.1395.eu/index.php?dir=qsl/bypost> (*Eric van Willegen via Mediumwave.Info*)

## Portugal

1584 R. Altitude, Guarda, 1 kW, est. 1948, [www.altitude.fm](http://www.altitude.fm) In a recent call to the station, once more, no information whatsoever was obtained on whether their MW outlet is already active, or was terminated, which is most probably the case! The typical reply to this question by anyone answering the phone at RA always shows their MW operation is kept under a cloak of [silly, even stupid I'd dare say] secrecy, and that any questions about it should be addressed to the stn director... my own experience after talking with him several times tells me he is also keen in avoiding this issue... So the more important or bigger the station is, the more information you [easily] get; it simply goes the other way round when it comes to petty, sorry, small [MW] stations here, here on mainland or in the islands. (*Carlos Goncalves via Mediumwave.info*)

## Russia

Radio Yunost in Russia no longer operates on medium waves. The transmitting is completely stopped on medium and long waves(153kHz). Now on them only noise, broadcasts nothing. You can find more correct actual information about Russian MW and FM on <http://victorcity.dxing.ru/f-indexr.htm> (Russian language). (*Andrew Nogovitsyn via Günter Lorenz,*)

## Sri Lanka

At lot of messages came about the new transmitter on 1125 kHz in Puttalam.

Medium Wave Transmission from Sri Lanka. For clients wanting to be heard in Sri Lanka and southern India, a Medium Wave transmission is now available through WRN Broadcast. The 50 kW transmitter represents a cost effective method of reaching local audiences in Sri Lanka during daytime and a far wider geographical area in the evenings and early morning. A free test can be provided to clients looking to trial the effectiveness of the transmitter prior to any formal agreement. For more information, please contact the Sales Department on sales @

wrnbroadcast.com or call +44 20 7896 4026. (*Wired News from WRN Broadcast via Fleur Nittolo, WRN via DXLD*)

It is out of Puttalam, where the MW TWR programmes come from. 50 kW on 1125 kHz. (*Glenn. Victor Goonetilleke via DXLD*)

This one will be on 1125 kHz and was moved location and frequency from somewhere else in Sri Lanka. They say the installation will be completed next week and we can start to run tests. (*WRN Broadcast via DXLD*)

Here are the details:

[http://www.slbc.lk/images/stories/tender\\_notice/OPPORTUNITIES\\_FOR\\_BROADCASTERS.pdf](http://www.slbc.lk/images/stories/tender_notice/OPPORTUNITIES_FOR_BROADCASTERS.pdf)  
(*Alokesh Gupta via DXLD*)

## Sweden

This just to remind you, that Swedish Radio will close down AM-broadcast on 1179 kHz from Sölvesborg by end of October, 2010. (*Ydun Ritz via Mediumwave.Info*)

## Switzerland

Seemingly RSR will close its mw 765 kHz Option Musique (Sottens site) already at the end of 2010. Thanks to Ydun M. Ritz for translation. <http://www.rsr.ch/#/corporate/frequences/> . Click on: Radio analogique AM (modulation d'amplitude) / OM (ondes moyennes). (Harald Kuhl)

The date of the closure: 5 December 2010 2359 Local time: [www.2222.ch](http://www.2222.ch) . (Franck Baste)

## Tanzania

The 10 kW transmitter at Chumbum on 585 kHz will be replaced by a new 50 kW Chinese unit. The transmitters fits in the following schedule:

585 at 0900-2100, 6015 at 0300-0600, 11735 kHz at 1500-2100 UTC, on FM at 0300-2100 (Unguja 97.4 and Pemba 90.5 MHz). (*WWDX-top news*)

## Ofcom News

### **Community Radio Stations In Breach**

**28 September, 2010**

Fifteen UK community radio stations have found themselves in breach of their licence conditions after failing to submit annual reports to Ofcom on time. One of the 15 and another station have also been found in breach for obtaining more than half their income through on air advertising and sponsorship.

Under the terms of community radio licences, stations are required to send Ofcom a report annually setting out how they've been meeting their 'key commitments'. One of these commitments is to produce the report itself. Under Ofcom rules failure to submit it represents a 'serious and fundamental breach of a community radio licence', as the absence of the information contained in the report means they're unable properly to carry out its regulatory duties.

Thirteen stations failed to submit the reports on time - with most missing the deadline by around four to six weeks. The stations are the 5 Garrison Radio licences (Colchester, Edinburgh, Salisbury Plain, Aldershot and Catterick) as well as a number of FM stations.

Ofcom said they are putting licensees on notice that their present contravention of their licences is being considered for the imposition of a statutory sanction. (via Steve Whitt)

## Commercial Radio News

### **talkSPORT boosts UTV turnover**

**19 August, 2010**

The owner of talkSPORT, UTV Media, has reported group revenue up by nine per cent in the first six months of 2010 to £59.2m. Its GB radio division had extra revenue strengthened by the World Cup, and the inclusion of Sport magazine which was acquired in May 2009.

Advertising revenue in talkSPORT in the second half of the year is expected to benefit from the two significant rights packages obtained for the Premier League, but its Irish Radio revenue is down four per cent on last year. The GB radio division's turnover is up by 22 per cent to £25.1m (2009: £20.6m), increased by talkSPORT. Local radio revenue remained unchanged.

John McCann, Group Chief Executive, UTV Media plc, said: "The first six months of 2010 saw a better trading performance due to the improving economic environment and the stimulus of the World Cup and this improvement in trading appears to be continuing in the third quarter." ([www.radiotoday.co.uk](http://www.radiotoday.co.uk))

Rushden and Diamonds	Radio Diamonds 1503 kHz	5 Darlington* 9 Mansfield* 30 Barrow	18 York* 30 Cambridge*

\*Evening Games

Traffic Radio says online listening to the station has gone up 350 percent in 12 months. The station responded to tabloid claims that the service is a wasting £2.8m a year of taxpayers' money.

The story, in the Daily Mail this weekend, reported that Traffic Radio's cost the taxpayer almost £10.4m in five years, but says fewer than 500,000 of the UK's 32 million vehicles have DAB radios to receive it. The Taxpayers' Alliance called for the service to be scrapped, saying it's something already provided by local radio stations so shouldn't be state-funded. The RAC joined the criticism too, adding that people can get the information online from websites such as their own.

Traffic Radio is managed and produced for the Highways Agency by Global Traffic Network (GTN) and is broadcast on 31 local DAB multiplexes, as well as on a long-term RSL on 1386 kHz medium wave around the NEC in Birmingham.

A spokesman for Traffic Radio told RadioToday.co.uk that listening numbers are up. "Because people tune in for instant traffic updates and listen for less than 15 minutes at a time, standard industry audience figures are not available," he said. "But we measure online listening and this has increased by 350 percent over the last 12 months. And listening to Traffic Radio increased almost ten-fold at the time of 2009 severe winter weather." (www.radiotoday.co.uk)

**OTHER NEWS**

Steve Whitt reported on 25 September, 2010 that he had heard **MAR** (Merseyside Alternative Radio) on 1314kHz from the Liverpool area. (0845utc). The Station gave full ID's, website, e-mail & phone number but it clearly was playing an old recording. The programme referred to "Sunday night" but it was Sunday morning and it was announcing 217 metres/1386kHz but in reality was operating on 1314 kHz. 25 September.

I have been hearing a relay of **Radio Caroline** on 1278 kHz at my QTH. I have checked it most days in the last week and the signal is weak/fair – using a loop pointed SE. My local LPAM **CRUSH 1278 kHz** (from Hertfordshire College Hatfield) is off air. An unusual frequency for a pirate and ironically Caroline used to use this frequency in 2004 for a month long RSL!

**Capital Network to launch January 2011**

**14 September, 2010**

I know it's an FM issue – but these changes are very significant to the UK radio scene. The owners of Capital Radio -Global Radio - is to scrap the Galaxy Network, Red Dragon FM, Trent FM, Leicester Sound and Ram FM and rebrand all stations as Capital FM.

The new nine-station “Capital Network” will launch on January 3rd 2011 when all programmes with the exception of breakfast and drive will originate from Leicester Square, London. Founder and Global Group CEO, Ashley Tabor told RadioToday.co.uk that only a “handful” of presenters will lose their jobs as a result of this move, which he describes as one of the biggest events to happen in UK commercial radio.

He said: “Since Global was created we have prided ourselves on being an industry innovator. The formation of the new Capital Network represents another huge innovation from Global Radio, taking an established, trusted and loved brand and extending it across the UK to create a true national network of stations reaching 6.3m with a clear hit music proposition.”

Local presenters on Trent, Ram, Red Dragon and Leicester Sound, plus some Galaxy presenters are affected by the changes. Split links will be used by all London presenters outside of breakfast and drivetime to keep local content on the regional and local stations.

Capital FM will replace the six Galaxy stations operating in Scotland, South Coast, Birmingham, and Manchester, Yorkshire and North East as well as the current Hit Music Network stations Red Dragon, Trent, RAM and Leicester Sound.

From 2011 the network will be known as “95 – 106 Capital FM, The UK’s No.1 Hit Music Station” but the stations will ID locally as [freq] Capital FM but local news hours will be extended and local advertising will remain locally sold. Global Radio has only just completed a similar programme of creating Heart as a national brand, closing 20 locations and merging them with nearby stations to create larger single stations.

Many thanks to the following reporters:

- AB Andrew Brade, Holme-on-Spalding Moor, East Riding of Yorkshire. AOR AR 7030 plus and Perseus SDR, Wellbrook phased array 290°, 305m beverage at 220°. Recording on Sony MZ-NH1 minidisc + Total Recorder.
- BD Barry Davies, Carlisle, Cumbria. Perseus, 3.7m x 10.0m Flag + FLG100 amp.
- DT David Towers, Leicester. Winradio G31DDC, Datong AD370 active vertical in loft.
- FB Franck Baste, St Bonnet de Rochefort, France. Icom IC-756 Pro III and PA0RDT mini-whip + ALA 1530 Loop.
- FW Friedhelm Wittlieb, Lünen, Germany. Grundig Satellite 700 with martens fram-antenna.
- JW John Williams, Hemel Hempstead, Herts. AOR 7030, 40m long wire.
- mah Martin Hall, Clashmore, Sutherland. Perseus SDR, RPA-1 preamp, beverages: 513m at 233°, unterminated; 506m at 279°, terminated; 550m at 338°, terminated. Total Recorder.

- MDe Maurits van Driessche, Zele, Belgium. Perseus SDR, several Kaz antennas, preamplifier +12 dB and DBX-1215.
- MTD Mark Davies, Malltraeth, Anglesey. AOR7030, 10x10 loop
- MvA Max van Arnhem, Hoenderloo, The Netherlands. AOR7030+; KAZ 35, 70, 160, 250, 290, 340 degrees.
- PC Paul Crankshaw, Troon, Ayrshire; Perseus SDR, Flag antenna, RPA-1 pre-amp, MFJ-1025 Phaser (modified).
- Rha Ronald Hagensen, Ottersberg, Germany. AOR7030+, 22m at 315°, 28m at 290°, 325m at 345° & 115m at 065°, coupled with the Mizuho AT-2000.
- SW Steve Whitt, High Catton, Yorkshire. AOR7030+ and dual reversible K9AY loop antennas.
- VS Vince Stevens, Jongenstat, South Africa. Drake R8A, beverages: 250m N-S, and 400m NW-SE.

Many thanks to **David** and to **Mark** for what I think are first contributions to DX Loggings – a very warm welcome to you both! David was using his Winradio G31DDC for overnight recording, and tells us that his antenna is a Datong AD370 active vertical in loft feeding the Excalibur and QS1R receivers, and that it works very well. Now for a few comments from our contributors.

**Barry** writes: “Nothing to shout about despite an active band. Hopefully the key DX month of October will bring some real goodies hi!”

Paraphrasing **Ronald**'s comments: “At the beginning of September I had some logs of (North America) east coast & Caribbean under weak to fairly conditions, then a week with bad conditions; since 12th again less good, but hearing most of the common east coast stations, and recently late evening few Asian stations. On 19, 20 and 22 September I listened in the early morning hours and found a little bit better conditions but short band openings and unstable signals. Hopeful October will be better for DX, with stronger signals and some reception from the west coast of the USA and Canada ;-)

**Maurits** comments: “More than usual, of course the conditions are good, and I'm home every day. Best here in the direction of LA (certainly Colombia) during the second weekend in September. I've bought also a monitor receiver, the R&S EK07/D2, and I'm using this in the evening for Middle Eastern reception - the sound is great and it's very sensitive”. *Unfortunately I've run out of space to include the picture you very kindly sent - mah*

**Max** adds: “Lately, some Africans were heard like Djibouti, Ethiopia and Sudan. Interesting, hopefully more Africans will be present in the future. I was busy with the set up of my new Perseus, so I am now hoping for good conditions. **Friedhelm**: “From 25th September to 16th October I spent my Kur-holiday in Bad Sachsa / Harz. I hope it's good for my health” – *I hope you came back refreshed after your break – mah.*

**John** mentions: “Just a few logs from me. All have been overnight recordings with the exception of using my Tecsun one evening and heard WWZN (induction loop)”.

Here in Clashmore I'm well back into the swing of DXing after the summer break. September has been an interesting month, with the first North American west coast and prairies stations being heard around 0500-0600 UTC when conditions have been good. Quite a few unusual east coast stations were also heard at this time, and propagation to Mexico produced some good results, though stations were rarely strong. In the last few days of the month daytimers were heard around 2300, and I'll be watching out towards the end of October an hour or so earlier, looking for those elusive stations (see the US Daytimer Targets list in last month's MWN) – mah.

The **deadline** for the November DX Loggings is **Tuesday 26<sup>th</sup> October**. I look forward to receiving your logs by then, preferably electronically/via e-mail using the Word pro-forma, which is available from the “Files” section of our Yahoo Group; **very many thanks** to all members making the effort to submit contributions following the format used in DX Loggings.

73, Martin
