**RICHARD WOOD**  
1940 - 2007

# Quality Equipment From Universal Radio

**RFspace** SDR-IQ

The **RFspace SDR-IQ™** with **RFDSP™** offers unprecedented performance with a frequency coverage of 500 Hz to 30 MHz in 1 Hz steps. (Please note the low end tuning range is 500 Hz, not 500 kHz). It features the fastest and highest resolution plug and play spectrum display available. The **SDR-IQ™** comes with the latest version of **SpectraVue™** software CD (requires Windows 2000/XP/Vista). It supports AM, WFM, USB, LSB, N-FM, DSB and CW with fully adjustable DSP Filter bandwidths and FFT sizes of 2048 to 262144 points. The resolution bandwidth is as low as 0.031 Hz. The **SDR-IQ™** is the smallest SDR with **RFDSP™** that samples the whole HF band at once and performs the initial filtering at a 67 MHz sample rate with 23 bit accuracy. It has a high performance Analog Devices 14 bit analog to digital converter and sends 16 bits of IQ Data to the PC via USB. The **SDR-IQ** is USB powered so no power supply is required. Works great with laptops running on batteries. It offers incredible receive performance and high resolution spectrum display capability. The rear panel has a USB port, serial port and BNC antenna input jack. **SDR-IQ** Order #0106 \$499.95

**etón**

**E1 XM**

The **etón E1 XM** is the world's first radio that combines AM, FM, shortwave and XM Satellite radio into one ultra high-performance unit. The E1 is an elegant confluence of performance, features and capabilities. The look, feel and finish of this radio is superb. The digitally synthesized, dual conversion shortwave tuner covers all shortwave frequencies. Adjacent frequency interference can be minimized or eliminated with a choice of three bandwidths [7.0, 4.0, 2.5 kHz]. The sideband selectable Synchronous AM Detector further minimizes adjacent frequency interference and reduces fading distortion of AM signals. IF Passband Tuning is yet another advanced feature that functions in AM and SSB modes to reject interference. AGC is selectable at fast or slow. High dynamic range permits the detection of weak signals in the presence of strong signals. All this coupled with great sensitivity will bring in stations from every part of the globe. Organizing your stations is facilitated by 500 user programmable presets with alpha labeling, plus 1200 user definable country memories, for a total of 1700 presets. You can tune this radio many ways such as: direct shortwave band entry, direct frequency entry, up-down tuning and scanning. Plus you can tune the bands with the good *old fashioned* tuning knob (that has *new fashioned* variable-rate tuning). There is also a dual-event programmable timer. Whether you are listening to AM, shortwave, FM or XM, you will experience superior audio quality via a bridged type audio amplifier, large built in speaker and continuous: bass and treble tone controls. Stereo line-level output is provided for recording or routing the audio into another device such as a home stereo. The absolutely stunning LCD has 4 levels of backlighting and instantly shows you the status of your radio.

Many receiver parameters such as AM step, FM coverage, beep, kHz/MHz entry etc. can be set to your personal taste via the preference menu. The E1 has a built in telescopic antenna for AM, shortwave and FM reception. Additionally there is a switchable antenna jack [KOK] for an external antenna. Universal also sells a PL259 to KOK antenna jack adapter (#1052 \$14.95) as well as asturdy angled Lucite radio stand (#3873 \$16.95).

The E1 comes with an AC adapter or may be operated from four D-cells (not included). 13.1" W x 7.1" H x 2.3" D Weight: 4 lbs. 3 oz. We are shipping/greatest production. Get a **Free YB-300PE** with your E1 for a limited time.

**E1 XM** Order #0101 \$499.95 **CNP2000DUO** Order #0072 \$58.95

Note: The CNP2000 DUO antenna module and XM subscription are sold separately. Activation and monthly subscription fee required for XM.

**AUDIOVOX**  
**CNP2000**

The Eton E1 is XM ready, so you may purchase the Audiovox CNP2000DUO XM antenna module at any time. It has a 25 foot cable. (An optional XM-EXT50 50 foot extension cable is also available #4905 \$39.95.)

**GRUNDIG** YB-300PE

**FREE**  
Receive a **FREE**  
**Grundig YB-300PE**  
with your **Eton E1**  
purchase!

The **Grundig YB-300PE Professional Edition** is yet another model in the proud Yacht Boy series and offers impressive features and performance Coverage includes: AM and FM plus shortwave from 2.3-7.8 and 9.1-26.1 MHz. Shortwave tuning is in 5 kHz steps (AM is 9 or 10 kHz). FM stereo is provided to the earphone jack. Twenty-four memories store your favorite stations. Direct keypad entry, Band button, scanning plus Up and Down tuning provides rapid access to any frequency. The YB-300PE features a large LCD display with display lamp for momentary illumination. A built in 24 hour clock keeps you on U.T.C. Time. An adjustable 10 to 90 minute sleep timer turns the radio off even if your fall asleep. Other refinements include: DX-Local Switch, Scan and Lock. The back of the radio even has a flip-out tilt stand. The left side of the radio features the DC input jack, the external antenna input jack and earphone output jack. Includes an AC adapter, vinyl carrying case, carrying strap, plug in external wire antenna. Owner's Manual and stereo earphones. Operates from three AA cells. Titanium colored 5.9 x 3.5 x 1.25 in. 13 oz. Originally introduced at \$99.00. **YB-300PE** Order #0300 \$49.95

**etón** **E5**

**FREE**  
Receive a **FREE**  
**Grundig FR-200**  
with your **Eton E5!**

The **etón E5** is a world class portable radio covering long wave, AM, FM and shortwave. It offers SSB-Single Side Band, 700 memories, keypad entry, scanning and a 24 hour clock timer. You also get: Line Output, Local/DX Switch, Wide-Narrow selectivity and external SW antenna jack. Operates from four AA cells (not supplied) or the included AC wall adapter. Comes with a manual, wrist strap, protective case, wire antenna and ear buds. 6.675 x 4.125 x 1.125" 12.2 oz. One year limited warranty. List \$169.95 Order #0055 \$149.95

➤ Purchase your Eton E5 from Universal before 12/31/07 and receive a **FREE Grundig FR-200 AM/FM/SW** wind-up emergency radio with your order!

Except Alaska, Hawaii and Puerto Rico.

Just shortly after the Journal went to press last month, we learned of the untimely passing for noted Hawaiian DXer **Richard E. Wood**. Richard was well-known for his linguistic abilities having produced the famed Language Recognition Course distributed by Radio Canada International. He was also a former editor for our club during his four+ decades in the radio hobby. Besides shortwave broadcast, Richard was an excellent medium wave DXer and an author of numerous books related to the hobby. This information originated from **Ginny Boehnke**, wife of DXer Chuck Boehnke who passed 3 years ago, that Richard Wood of Hawaii died September 27, 2007 of a heart attack; he was 67. There are a number of interesting musings by some long time members in this month's *Journal* in memory of Richard E. Wood.

A new radio country was added to the club's radio country list. From **Don Jensen**, Chair, NASWA Country List Committee, comes word about an important update to the club's country list. The following new country has been added under Oceania: MICRONESIA, FEDERATED STATES OF. Under the gazetteer, alphabetically, between Mexico and Moldova: MICRONESIA, FEDERATED STATES OF (OC) Part of the Trust Territory of the Pacific Islands until May 10, 1979; independent Federated States of Micronesia since, and in free association with the U.S. since Nov. 3, 1986. Station location: Pohnpei. The Country List and Awards Program booklet has been updated and posted on the club's website. Those needing a hardcopy paper version can acquire that through Jim Strader at the Company Store. Also, Tinian was added to Northern Marianas in the Gazetteer portion of the list. Thanks Don and the committee which consists of Jerry Berg, Harold Cones, John Fisher, John Herkimer, and David Clark.

**Laura Lawrence** (Station Manager of Radio St. Helena) in Jamestown, St. Helena and **Robert Kipp** (Special Assistant to Laura Lawrence) in Langen, Germany informs us that Radio St. Helena is celebrating its special double anniversary year 2007 with a very special Radio St. Helena Day 2007 world-wide shortwave broadcast. The year 2007 marks a double anniversary for Radio St. Helena: the 40<sup>th</sup> anniversary of broadcasting for Radio St. Helena, and the 10<sup>th</sup> shortwave transmission anniversary. This year Radio St. Helena Day broadcast will be on Saturday, 15 December 2007 from 1730-0100 UTC on the familiar 11,092.5 kHz in upper side band with 1,000 watts using a 3-element monoband directional antenna. The time of transmission and target areas are as follows: 1730-1815 UTC to New Zealand; 1815-1900 UTC to India; 1900-2015 UTC to Japan; 2015-2145 UTC to Europe; 2145-2245 UTC to North America East; 2245-2330 UTC North America West; 2330-0015 UTC South America North; 0015-0100 UTC South America Central/South. There will be a very special and beautiful full-colour QSL card issued by Radio St. Helena for this special double anniversary shortwave transmission. The same procedures as in 2006 for reception reports, return postage, and QSLing will apply for this broadcast in 2007. Watch the station's web page: [www.sthelena.se/radioproject](http://www.sthelena.se/radioproject) for more information.

A number of members have asked me about Radio St. Helena QSLs for 2006 transmission. Many sent reports but never heard from the station although a number of replies have been reported. I spoke to Robert Kipp who helps organize the transmission. He mentioned that "To my knowledge, ALL QSLs for 2006 have LONG since been posted. I do not know any details about how many were sent to USA or to whom. It would be interesting to learn the email-address to

---

## Our Motto: Unity & Friendship

which the emails from USA were sent and to which no reply was received. It would also help to have a list of the persons still waiting for their QSL. Do you have any names of persons that have not received their QSL card(s)?" Robert believes that "it is possible that a package of QSLs never made it past South Africa; unfortunately, some mail via South Africa just disappears." I behalf of the club, I am willing to coordinate the development of a list of all those North American shortwave listeners that sent reports to Radio St. Helena but have not yet received a QSL by return post. Please get your name to me as soon as possible. I am targeting November 23rd to get a comprehensive list to Robert Kipp on behalf of North American shortwave listeners. Send your information to Rich D'Angelo, 2216 Burkey Drive, Wyomissing, PA 19610 or by e-mail: rdangelo3@aol.com (please indicate Radio St. Helena QSL as the subject).

**Eddie Muro**, a Winter SWL Festival regular, sent word that the halls and classrooms of Briarcliffe College in Bethpage will be rocking with signals when Ham Radio University 2008 (HRU) opens its doors on Sunday, January 13, 2008. New forums, exciting displays and presentations and live operating events are scheduled. The event is also the American Radio Relay League (ARRL) NYC/LI Section Convention and other forums will cover some new twists on contesting, low-power operating and many other aspects of ham radio. A highlight of the event will be the keynote address by **Gordon West WB6NOA**, who is flying in from California especially for HRU. Don't miss this year's HRU. Check the website (<http://www.hamradiouniversity.org>) for updates on forums and other news. Remember, it is scheduled for Sunday, January 13, 2008 starting at 9:00 AM local time at Briarcliffe College, 1055 Stewart Avenue, Bethpage, NY. Further information is available from Diane Ortiz K2D0, HRU 2008 Committee, K2D0@arrl.net, 631-691-1801.

Once again the value and utility of shortwave broadcasting has proven its worth. Burma (Myanmar) has seen pro-democracy rallies popping up around the country with the military dictatorship clamping down on media coverage. The country was

disconnected from the world wide web by the military rulers curtailing internet access. So much for using the internet as a means of disseminating important news and information to a country in crisis. What media continues to be successful in reaching the people of Burma? Shortwave radio ... surprise! Not really a surprise to us but this has to be embarrassing to broadcast organization leaders that have been curtailing international shortwave services while entertaining the use of the latest electronic gadgets as replacements. It is interesting how history has a way of repeating itself ... again ... and again ... and again!

Although never known for its stellar programming, Italy's public broadcaster—RAI—ceased all international shortwave broadcasting at the end of September. This was rumored to be on the horizon all summer but there was no official word from the station confirming or denying the reports. Without making much of a fuss, its short news bulletins in two dozen languages came to an end. The relays of domestic radio programs in Italian appear to be continuing but for how long? Stay tuned!

Meanwhile Radio Japan is cutting back its international broadcasting as well. There are no Japanese transmissions to Europe and North America. Also, much of their English broadcasts to various parts of the world are discontinued. French language transmissions to Europe, the Middle East and North Africa have been terminated. Also, Spanish language broadcasts to Europe are no more. The German, Italian, Malaysian and Swedish services were terminated entirely.

A new club regional group is now up and running. Yes, the infamous Reading Area DXers have finally met. The group's first meeting was at The Peanut Bar in downtown Reading on Friday, October 12th. In attendance were **Rich D'Angelo**, **Mark Ferrioli**, **Ron Hunsicker**, and **Ed Mauger**. **Rich Cuff** and **Dave Turnick** were last minute cancellations. Although no earth shattering news developed as a result of the gathering, a good time was had by all. Future meetings are under consideration but it looks like Friday, November 2nd is a likely second such event.

The Radio Heritage Foundation ([www.radioheritage.net](http://www.radioheritage.net)) announced the release of two new radio heritage documentaries through Radio NZ International (RNZI). The first of these is currently available as a podcast at [www.rnzi.com](http://www.rnzi.com) (Other Audio/Mailbox) and is a rare recording of the 1963 Top 20 radio show from 2ZC Hawkes Bay in New Zealand. The documentary comes complete with music, station IDs for 2ZC, local adverts and typical sound effects of the period. The documentary is linked with the article 'From Hawkes Bay to Replay' at the Radio Heritage Foundation website [www.radioheritage.net](http://www.radioheritage.net) which contains photos of the DJ and the panel operator and a personal story behind the scenes of the 2ZC Top 20 show. On Monday, October 1 2007, RNZI broadcast a second documentary featuring the history of Pacific radio during the 1941-1950 period. This covered the broadcasting scene around the region during WWII, the occupation of Japan, and the reconstruction period for Southeast Asia, the Philippines and other locations. The documentary included classic Pacific music melodies of the period, and also covers new stations in Samoa, Fiji and other colonies of the time, as well as reviewing broadcasting from Australia and NZ during wartime censorship. After being broadcast during the Mailbox program on RNZI, this documentary was also available via podcast at [www.rnzi.com](http://www.rnzi.com). The Radio Heritage Foundation is a non-profit charitable trust. Hundreds of pages of articles about Pacific radio and searchable Pacific radio databases are available for free at [www.radioheritage.net](http://www.radioheritage.net).

Don't forget about Radio Free Asia's 19th QSL card commemorating the radio network's first broadcast on September 29, 1996, which was in Mandarin Chinese. The QSL card will be issued for all valid reception reports through the rest of the year. Reports can be sent to Radio Free Asia, 2025 M Street, NW, Washington DC 20036. Reception reports are also accepted by e-mail at [qsl@rfa.org](mailto:qsl@rfa.org) or you can go direct to their website and submit at report at [www.techweb.rfa.org](http://www.techweb.rfa.org) (follow the QSL Report links).

The latest edition of the Association for International Broadcasters (AIB) Directory

of Global Broadcasting has been published. It is completely revised with listings for more than 1,250 broadcasters worldwide. The AIB Directory of Global Broadcasting is an indispensable sourcebook for the world's media—covering radio as well as television, plus emerging media in A4 perfect-bound format consisting of 228 pages and full-color throughout. The price is £120 or US\$200 or EUR176 and can be ordered from AIB, PO Box 141, Cranbrook, TN17 9AJ, United Kingdom or through their website at <http://www.aib.org.uk>. More than 147 countries' broadcasters and media operators are included in this year's AIB Directory of Global Broadcasting. From the rapidly expanding Indian media market to neighboring Nepal, Ghana to Venezuela, the Netherlands to Nigeria—the AIB Directory of Global Broadcasting is the only reference work covering TV and radio, plus emerging platforms. It's the ultimate sourcebook. If you order a copy, I would be very interested in hearing from you about its value. Please consider doing book review for the Shortwave Center. I am very curious about the AIB Directory of Global Broadcasting.

The new DX season is in gear. Having the club's electronic *Flashsheet* in your hands each week you will be up to date with news and information about the DX scene as the season progresses. If you have not signed up for the club's electronic *Flashsheet* service, you are missing out on timely news and information that will enhance your shortwave listening pleasure. It is now time for you to get on the distribution list for the club's electronic *Flashsheet* to stay up-to-date. The changing DX conditions will bring different DX opportunities and new listening targets. The club's electronic *Flashsheet* helps members stay on top of the action with breaking shortwave news and information. If you are a current member of the club and want to receive the electronic *Flashsheet* just drop **Rich D'Angelo** ([rdangelo3@aol.com](mailto:rdangelo3@aol.com)) a note with your e-mail address, location and membership expiration date from your mailing label. You can participate by sending your latest logs to the electronic *Flashsheet* edited by **Mark Taylor**, [markokpik@tds.net](mailto:markokpik@tds.net). Each week the electronic *Flashsheet* brings a lot of excit-

ing, late breaking DX news and information to our members. The electronic newsletter is an excellent supplement to the monthly Journal for the timely dissemination of DX loggings and breaking news. This is a service that is only available to our members. Deadlines are posted in the *NASWA Flashsheet* each week.

Once again, I have a small handful of wayward electronic *Flashsheet* participants. The following individuals recent e-mail distribution of the electronic *Flashsheet* have bounced with "fatal errors": **Lawrence Sweeney Jr., Robert Tupaj, and Joe Yadsko.** Gents, please contact me with a new e-mail address if that is the problem or help me

resolve the distribution issue(s) impacting delivery of the electronic *Flashsheet* to your e-mailbox. Thanks!

Please remember to direct all communications about subscriptions, bulletin delivery issues, Thanksgiving recipes, the use of PayPal as a payment method, etc. to **Bill Oliver** at the club's Levittown address or to his electronic address, [weoliver@comcast.net](mailto:weoliver@comcast.net). The regular postal address is the familiar 45 Wildflower Road, Levittown, PA 19057. Inquires sent to Wyomissing only slow down the process. Thanks!

That's it for this month. Enjoy this month's edition of the *Journal*; it's another good one. 

---

## FRENDX: Twenty-Five Years Ago (November 1982)

The cover of *Frendx* featured Association of North American Radio Clubs (ANARC) North American DXer of the Year, Stewart MacKenzie. *Roll Call* featured 66 new and returning members including Kevin Atkins, Steven Lare, Keith Thibodeaux and Larry and Gayle Van Horn. The club's distribution editor, Terry Colgan, was named the new Executive Secretary of ANARC. Nick Pappas was scheduled to replace Terry as distributing editor for the February *Frendx*. In the Shortwave Center, Randy Erickson in the "It Sounds to Me" section discussed radio listening and marketing. Neal Perdue wrote about simple home remedies for Kenwood R-1000 audio problems. In *Vintage Vignettes*, Bill Taylor wrote about the construction of a one-tube regenerative receiver of "twenties" vintage. Richard E. Wood wrote his impressions of shortwave listening in Saudi Arabia where he is teaching in the Department of English at King Saud University. In the *QSL Report* Sam Barto, with a new typewriter, noted that 92 countries were reported which was a below average month. Paul Buer sent in a copy of an envelope he received in 1962 from Radio Katanga without any contents. 

---

## Contribute!

Send your loggings and QSL information off to our Distributing Editor, **Bob Montgomery** (Address: 4621 C Street, Philadelphia, PA 19120). **Note: this is a new postal address as of July, 2007!** He will forward them to the appropriate editor. Remember, Bob also distributes QSL report information and totals for the **Scoreboard** column. He can also be reached through the Internet at: [rmonty23@verizon.net](mailto:rmonty23@verizon.net).

## Calendar Of Events

- Nov 1–4, 2007 Convention.** The next **European DX Council Conference** is scheduled for Lugano, Switzerland on 1–4 November 2007. Venue of the conference is the Hotel Dischma, Vicolo Geretta 6, CH-6900 Lugano Paradiso, Switzerland (hoteldischma@bluewin.ch). The conference fee is EUR 95. Further information is available from Tibor Szilagyi in Sweden at +46 8 500 264 83 (phone number) or tiszzi2035@yahoo.com (e-mail). Radio Miami International is issuing a special EDXC 2007 QSL card. RMI will make it available to DXers for reports through the end of 2007, but they must request the special EDXC 2007 QSL card.
- Nov 9 Meeting. Philadelphia Area NASWA Chapter.** Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 610-446-7831 or Internet: dcscckp@aol.com.
- Nov 9 Meeting. Boston Area NASWA Chapter.** The Boston Area DXers have found a new location for meetings. Inquiries about the BADXers may be sent to Paul Graveline at 978-470-1971 or Internet: ctcreditor@aol.com. The URL for the BADX guys is <http://www.naswa.net/badx/>
- Nov 19 Meeting. Tar Heel Scanner/Shortwave Listening Group.** Red, Hot and Blue restaurant, 6615 Falls of the Neuse Rd., Raleigh, NC. Dinner @ 6:30PM, meeting @ 7:30PM. Meetings the 3<sup>rd</sup> Monday of each month. Info, Curt Phillips, 919-773-4522, <mailto:curt@nerdster.net>curt@nerdster.net.
- Dec 1 Meeting.** The **Reading (England) International Radio** meets at the Reading International Solidarity Centre, 35-39 London Street, Reading from 2.30 p.m. Further information is available from Mike Barraclough at mikewb@dircon.co.uk.
- Dec 8 Meeting. The Cincinnati/Dayton Monitoring Exchange (MONIX)** meets at the Lebanon Citizens' National Bank (LCNB), 425 West Central Avenue (Ohio 73), Springboro, Ohio at 7:00 PM. For more information contact Mark Meece at 937-743-8089 or e-mail at <antennapig@siscom.net>. For additional information about MONIX, check out their web site at <<http://www.siscom.net/~mmeece/monix.html>>
- Mar 7–8, 2008 Convention.** The **21<sup>st</sup> Annual Winter SWL Festival**, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin on 7<sup>th</sup> and 8<sup>th</sup> March 2008. Richard Cuff and John Figliozzi co-chair the organizational committee. Although it is early, you don't want to miss this special FEST event. See you there!
- Aug 16, 2008 Convention. 2008 Madison-Milwaukee Radio Get-together.** The 15<sup>th</sup> Annual Madison-Milwaukee Get-together for DXers and Radio Enthusiasts will take place on Saturday, August 16, starting at 1 PM CDT. This year's venue is Milwaukee WI, and Tim Noonan will be hosting. Further information will be released as it becomes available.
- Sep 5–7, 2008 Convention.** The **2008 European DX Council Conference** is scheduled for Vaasa, Finland on 5-7 September 2008. Former EDXC Secretary General Risto Vahakainu of the Finnish DX Association is coordinating the event. Further information will be made available at a later date.
- Mar 13–14, 2009 Convention.** The **22<sup>nd</sup> Annual Winter SWL Festival**, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin on 13<sup>th</sup> and 14<sup>th</sup> March 2009. Richard Cuff and John Figliozzi co-chair the organizational committee. Although it is early, you don't want to miss this special FEST event. See you there!

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: rdangelo3@aol.com) or Ralph Brandi (Internet: ralph@brandi.org). 

---

## Musings

### **John Callarman, Texas**

Richard Wood was probably best known as a linguist who shared his knowledge of how to identify languages with DXers. His original home was Newcastle-on-Tyne, England, but as a traveling university professor of languages, he taught above the Arctic Circle in Norway, in the Royal Kingdom of Saudi Arabia, and, I think, several other overseas locations, at the University of Indiana, at a state university in New Hampshire, at a small private university on Long Island, and at Southeast Missouri State University, in Cape Girardeau, Mo., to name a few as he traveled the world, locating for a year or two at the sites he chose.

He was intensely active on shortwave, AM, FM, and TV DX, and attended many radio club conventions in the '60s, '70s and '80s.

When he was at SEMo, less than 100 miles from where I lived for 30 years in Mt. Vernon, Ill., he and I exchanged visits, and he was one of very few DXers my wife remembers with positive thoughts. My most successful FM DX was done on a Heathkit tuner (I forget the model number) that I had purchased from Richard.

Richard was not afraid to express his opinions about DX issues, and I understood that some DXers were uncomfortable about that, but I had nothing but good vibes from my relationship with him. Of the second wave of DXers who became adults after World War II, Richard Wood was one of the true giants.

### **Don Jensen <dnjkenosha@wi.rr.com>, Kenosha, WI**

I second John's sentiment that Richard was one of the major SW DXing forces of the 1960s and 70s. There was a small handful of people, Richard among them, who brought important information on certain specialized subjects -- language (Richard's specialty), music, other cultures, propagation, etc -- to the hobby. And that changed DXing permanently and definitely for the better!!

Before them, we were casual, ill-informed listeners. . . After them, we knew about things like tonal languages and glottal stops, could tell a quena from a charango, knew you never referred to anyone as an "indio," and understood grayline was something other than a bus tour of New York City.

Richard and a few others like him changed the SW DX hobby! In that sense, I don't think John overstates the case in using the term "giant."

Richard, whilst at Indiana University, also produced, at least for a short time, an excellent, though small SW bulletin. My recollection -- subject to correction by someone, probably JB or Herk -- is that it was called something like the America Central DX Club. It was a first rate publication and I invariably learned something important with each issue!

I had a smooth and very cordial relationship with Richard, though we were not really close friends. Richard was, indeed, outspoken, and that did turn some people off. He was an extremely intelligent person. And that definitely did not earn him their friendship. This carried into his professional life. He taught at many universities, large and small, as John has noted, and eventually, he left academia.

The SW hobby was the loser when Richard shifted his interests to medium wave/BCB, then moved to Hawaii and fruit raising/selling.

May he rest in peace!

**Jerry Berg <jsberg@rcn.com>, Lexington, MA**

I believe he started DXing in 1958. I met him a year or two later when I was living in Connecticut and he was traveling in the U.S. with a friend from (I think) Algeria.

He formed the American Central Radio Club in 1964. Richard "was" the club. It lasted only a year or so. For about eight months starting in 1968 he edited NASWA's "SW Broadcast Center" column, taking over from DNJ about two years after the club went all-SWBC. The next year he wrote "SW Voices of the World," which became a well-known SWBC text. Around the same time he was named "International DXer of the Year" by the NRC. And he also wrote a lot of the b/c content for the "Communications Handbook" from 1972 to 1977.

Very sobering.

R.I.P., REW.

**Scott Barbour <srjrswl@yahoo.com>, Intervale, NH**

The next year he wrote "SW Voices of the World," which became a well-known SWBC text. I picked that up, bundled with 4 other SW related books, from eBay last month. Good reading. Being one of the youngsters here, it amazes me to read just how prevalent SW was decades ago.

**Chris Lobdell <crlobdell@verizon.net>, MA**

I first met Richard Wood in 1971 at the ANARC Convention in Indianapolis where he was rooming with Dave Alpert. Dave and I spent most of the night keeping Dr. Wood awake while tuning the Drake SPR-4 in the hotel room. He had a great collection of Brazilian SWBC QSLs. The next time I saw Dr. Wood was at a local gathering of the BAD GUYS at Peter Schipelletti's house in Burlington, MA. He was teaching at a NH College in the late 1970s. Peter was a bit disappointed with Richard. He [Peter] went up to help him move his things and accidentally locked his keys in the trunk, it seems Richard didn't want to help him and left him to fend for himself! Despite his quirks he was a great DXer and will be missed.

**G. Victor A. Goonetilleke 4S7VK <victorg@slt.lk>, "Shangri-La," 298 Madapatha Road, Piliyandala. Sri Lanka.**

I remember Richard E. Wood REW very well, who wouldn't if one calls himself a dxer of any worthwhile caliber. When I started as a serious dxer, an unknown third world reporter to Sweden Calling DXers, NASWA, ASWLC and a few more ... maybe late 1968 or so I wrote a letter to Richard and he replied ... something exciting and great for me. We exchanged many letters over the years. I never even saw a picture of him. The memories of him are very affectionate indeed and of great respect as I love languages like most of us do. He contributed much to the hobby as stated by so many of you. I tried to contact him in recent years but couldn't. I wanted so much to get his book Short Wave Voices of the World, which I hope will surface somewhere some day.

We pass through this way but once and it is our duty and pride to remember people such as Richard who have contributed so much to our own enrichment of the hobby. For those

of us involved in linguistics as a profession, he showed a different perspective through radio and through the many Short Wave Voices we have heard.

Though we say May he Rest in Peace ... we know his memory and works will not just rest but be active as long as we are active in the area that we love so much to which he contributed much.

**Henrik Klemetz <hklemetz@yahoo.se>, Sweden**

I met Richard in the summer of 1961 when he came hitch-hiking all the way from the UK to northern Scandinavia. He was studying Russian at Trinity College, in Cambridge, and DXing on a Marconi CR100 surplus receiver. Very keen on NA MW DX, Richard at that time believed that instances of peak NA reception on MW coincided with areas of high atmospheric pressure across the Atlantic. He produced a bundle of weather maps from The Times to make his point. Among his QSLs there was one I particularly remember. In a letter from a station in the Brazilian Nordeste Richard was addressed with the term "A Sua Majestade", Your Majesty. And in languages he excelled. Proficient in Russian and German, he shortly afterwards surprised me by sending me letters in Swedish. His numerous contributions to the hobby have meant a lot for the DXing community.

**Dan Robinson <darobin@his.com>, Washington, DC**

The passing of Richard Wood reminds me of my early days in the hobby, reading Communications Handbook -- I believe it was the photo of Wood sitting in front of his Squires Sanders, SPR-4 and R-530 that fueled my early receiver addiction.

**Gerry Dexter <gdex@genevaonline.com>, Lake Geneva WI**

I have been misinformed! I was always told this period was supposed to be one of the most productive of the year. Certainly not so in 2007!

NOTE: Sorry to hear of the passing of Richard Wood. We too often forget that we're not the only ones adding years to our totals.

**Victor C. Jaar, Quebec, Canada**

Richard E. Wood's passing away is a great loss to the DXing community and to linguists alike. This came as a surprise to me. Like many other people, I had lost contact with him for many years; all we knew is that he lived in Hawaii. Many of his friends and acquaintances have written about him. I would like to add a few more stories.

I first met REW in the early 60's in Haiti; I had invited him and César Objio (from the Dominican Republic) to spend a few days in Port-au-Prince, where I used to live at the time. Right before that, he had spent some time in Curaçao for his Ph.D. dissertation on Papiamentu (the local language in the Netherlands Antilles). He was particularly interested in Creole languages and published many articles on this subject. He was involved (in 1977-78) with Language Problems and Language Planning, a learned socio-linguistic review. His language skills were well known.

He was particularly fond of Esperanto, the international language, and had encouraged me when I started learning it. Years later we only used that language in the letters we exchanged and often spent a lot of time over the phone talking about DXing, exclusively in Esperanto.

At the time he was a teacher in Long Island, he got engaged and had plans to get married, but his engagement was broken shortly afterwards and, to my knowledge, he never got involved in any serious relationship. Many of his friends have mentioned that he led a rather lonely life and I fully agree.

In the early 70's I invited him again to our house in Quebec City, where I had settled a few years earlier. Shortly after that I bought from him the Galaxy R530 receiver he had purchased in 1967, I think. I am still using that same set three decades later!

### **Mark Schiefelbein Springfield, MO**

Been a while since I checked in! A trifecta of a busy schedule + radio repairs + a summer thunderstorm bringing down my antenna kept me away for awhile. Replaced my deceased homebrew T2FD w/a Wellbrook loop. The difference really is impressive, not so much in the signal strength, but what it can do with the RF urban noise jungle I live in - even compared to the old T2FD (a low-noise antenna design itself).

### **Toshi Ohtake <ohtaket@yahoo.co.jp>, Tokyo, Japan**

First topic is major reduction of Radio Japan's new air time from October 1. Malay service to South East Asia and Italian, German, Swedish, Spanish and French services to Europe will be terminated. French service remains to Africa and Spanish to Central and South America. The program to Europe will be in English and Russian only. The English service to Europe will be from 0500-0530 UTC on 5975 kHz (UK relay), 1200-1230 on 17600 kHz (UAE) 1400-1430 on 13630 kHz (UK) and 0000-0020 on 5960 kHz (UK). There will be no Japanese service to North America, Hawaii and Europe. The English services to Asian Continent, Central America, Middle East and North Africa will be eliminated. The English service to Oceania will be reduced to one hour and 20 minute compared with 10 hours at present. The new schedule will be from 0900 to 0930 UTC on 11890 kHz, from 1200 to 1230 on 9625 kHz and from 2200 to 2220 on 13640 kHz. English service to North America will be via Canada relay only, from 0000 to 0020 UTC on 6145 kHz, from 0500 to 0530 on 6110 kHz, 1200 to 1230 on 6120 kHz and from 1400 to 1430 on 11705 kHz. Except Malay service and English to Asian Continent, there will be no change to Asian services. For more information, please check [http://www.nhk.or.jp/nhkworld/japanese/freq/all\\_j.pdf](http://www.nhk.or.jp/nhkworld/japanese/freq/all_j.pdf). The frequency changes for winter season will be made on October 28 as usual.

Second topic is visit of Dr. David Norrie, President of NZRDXL, to Japan. David visited Japan on his business, and we had a nice tour of Tokyo last weekend. We also talked about club administration and DX community.

This is all for this month and wishing you good DXing!! Toshi Ohtake, Japan Short Wave Club

### **Dr. Mark J. Ferrioli <Drmarkjf@AOL.Com>, P.O. Box 5000, Philadelphia, PA 19111**

A great time of 'Fellowship' was had on Friday evening October 12th at the first gathering of the 'Berks County, PA Based NASWA Meeting Group' which was held at 'Kramer's Peanut Bar and Restaurant' in Reading, PA (Other area eateries have been proposed for future gatherings). In attendance were our esteemed Executive Director Richard A. D'Angelo, Dr. Mark Ferrioli, Ron Hunsicker, and Ed Mauger. Ed brought along some wonderful 'Old Radio Magazines' (Some from the 1930's) which proved to be most interesting. Our various 'Hobby-Related Discussions' were also a joy; not to mention the good food and drink! Why not join us for the next gathering by contacting Rich D'Angelo to let him know of your interest and to learn of our next pending venue.

Now that's a hot radio transmission! An Erie, Pa cancer researcher has found a way to burn salt water, a novel invention that is being touted by one chemist as the "most remarkable" water science discovery in a century. John Kanzius happened upon the discovery accidentally when he tried to desalinate seawater with a radio-frequency generator he developed to treat cancer. He discovered that as long as the salt water was exposed to the

radio frequencies it would burn. The discovery has scientists excited by the prospect of using salt water, the most abundant resource on the earth, as a fuel. Rustum Roy, a Penn State University chemist, has held demonstrations at his State College lab to confirm his own observations. The radio frequencies act to weaken the bonds between the elements that make up salt water, releasing the hydrogen, Roy said. Once ignited, the hydrogen will burn as long as it is exposed to the radio frequencies, he said. The discovery is "the most remarkable in water science in 100 years," Roy said. "This is the most abundant element in the world. It is everywhere," Roy said. "Seeing it burn gives me chills!

**Richard A. D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA 19610**  
I was stunned to learn of the passing of noted DXer Richard E. Wood last month from a heart attack at age 67. Although we never met, we had corresponded over the years on various topics related to the club and the shortwave listening hobby. He was not a computer person so those letters were often hand written or typed but never via electronic media. When he first moved to Hawaii over two decades ago, his logs from the Big Island made every DXer aware of the potential of DXing from the Hawaiian Islands. Over the years many DXers have traveled to Hawaii with a shortwave radio to try their hand DXing from such an exotic location. My first contact with Richard goes back into the 1965/1966 time frame when I sent away for information about a club he was running at the time (the American Central Radio Club). He informed me that he just closed the club but strongly recommended the NASA (before the W slipped in). I have been here ever since!

Is the world safe now that the Reading Area DXers have finally met? Our first meeting was held on Friday, October 12th at the Peanut Bar in downtown Reading. Future meetings are under consideration. By the way, the "Reading Area" so far has included Allentown, Stow and Philadelphia, hi! A better name could be the southeastern area. Naturally, we wouldn't mind seeing members from Harrisburg, Lancaster and anywhere else within the greater region.

A reasonable haul of QSLs to report this month with a reply from Bangladesh the most interesting. Bangladesh Betar sent a full data card in from Senior Engineer Mahesh Chandra Roy who seems interested in receiving further reports. Open Radio for North Korea via KWHR in Hawaii sent a partial data letter from its office in Seoul. Radio Amanecer quickly responded to an e-mail report with an e-mail reply in a few hours but noted that there would be a delay in getting a postal response. A.J. Janitschek at Radio Free Asia verified an e-mail report with a full data card noting that the transmitter was IBB Kuwait. Finally, Star Radio verified with a full data Fondation Hironnelle card through the Swiss Office.

Time to get back to the radio dials. As we move closer to November it is time to begin planning our French Creek DXpeditions. It's hard to believe that it will soon be time for another DXpedition.

---

**For faster service with membership dues payments, address changes, or missing bulletins, send all information to NASWA, 45 Wildflower Road, Levittown, PA 19057-3209. The email address for these things is weoliver@comcast.net. Please send articles and comments for the Musings section of "NASWA Notes" to Rich D'Angelo whose address appears on his masthead**

## RAI English disappeared in September, Radio Budapest in June... are they missed?

### RAI

RAI ceased broadcasting in shortwave as of October 1<sup>st</sup>, with comparatively little notice. There was initial speculation that RAI's English programming might continue on a multilingual satellite radio channel from RAI International, but that channel appears to be kaput as well. If you still have a hankering for English language programming, there is still an option. The RAI radio program *Notturmo Italiano* which airs for 5 ½ hours overnight, includes English language news at the end of each hour's newscast. That program is available on medium wave within Italy and is also webcast. Helpfully, the program is parceled into 5 one-hour blocks and one 30-minute block for on-demand listening; the best way to get news about Italy in English is to visit the RAI International website, <http://international.rai.it>, then click on **Radio**, then click on **Notturmo Italiano** in the section labeled **I NOSTRI PROGRAMMI**. You'll then see the speaker icons on the right side of the page. Launching one of the one-hour audio blocks will bring you to an embedded RealOne player; right click in the player to bring up the standalone RealOne player. You can then move the time slider to approximately 5 minutes and 45 seconds into the audio; English news and sports runs approximately 3 minutes long.

Unfortunately, RAI became infamous in the 1990s for a female English language announcer who sounded like she was always "down a cup" of coffee...you could hear her yawn and sigh as she read the news...it was so pathetic it was comical. More recently, though, at the end of the spoken-word programming you'd hear a nice helping of folk

music. Nice, but nonetheless RAI's English language programming was pretty lame versus other western European broadcasters.

### Radio Budapest

**Radio Budapest** ended its English language programming this past June; I didn't become aware of that fact until September. Even though I generally pay attention to several shortwave hobbyist websites and e-mail lists, I somehow missed any mention of the end of Radio Budapest in English. That tells me that not too many people apparently missed their broadcasts.

I must confess that I listened to Radio Budapest only once in a great while, and that was when I was interested in a dose of news and information about Hungary. Radio Budapest, unfortunately, was like several of its Eastern European peers—unless you had a specific interest in the country's affairs, most of the programming would bore you to tears. Sometimes the music programming would be interesting—if indigenous folk music was available, but that seems to be the only draw for many when it comes to radio from Eastern Europe.

In some ways, I speculate that the availability of on-demand online audio generally dooms inferior radio programming; one can listen to (nearly) any program from (nearly) any station whenever you want, so you're not stuck listening to whatever broadcaster happens to be on air at the time you're spinning the tuning knob. Why listen to Radio Budapest when you could instead listen to the latest edition of *Quirks and Quarks* or *Research File*?

I am not sure that a letter-writing campaign would have saved the English broadcasts of either RAI or Radio Budapest, but that advice seems sound for any international broadcaster you consider important—let

them know you appreciate their programming, have some ideas for what you want to hear and don't want to hear, and that you want to continue to listen. Apathy is likely the biggest enemy of a broadcaster—it's better to be disliked than ignored.

## Radio Ukraine International available on-demand

The news isn't all bad from international broadcasters, **Radio Ukraine International**, which still uses shortwave to reach North America, and has offered a live Internet audio stream, has recently made its English language programming available on-demand. RUI encodes its audio in MP3 format, which enables you to download the audio to your own PC and easily transfer it to an MP3 player. The programs are individually available, so if you want only to listen to *Ukraine Today* or *DX Club*, and not bother with anything else, you can easily do that. Audio is encoded at 64kbps, which is comparatively high-quality audio stream versus the typical streamed audio offering.

You can visit the RUI website by visiting the main web page, <http://www.nrcu.gov.ua/>; Click on **Eng** (for English) on the upper right of the web page; you can then click on **Schedule and Real Audio RUI** to see the programming schedule for RUI and listen to the live stream in multiple languages. If you want to hear audio on demand, then click on, helpfully, **Audio on Demand**. It appears two hours of English language program are produced, though I am not sure what the difference is between the two hours. In any event, it appears that a week's worth of programming is available.

I sampled an edition of *Close Up*, which covers international current affairs of interest to Ukraine; the program quality and English language facility of the host were both pretty good, but the program nonetheless seemed dry.

If you're a regular RUI listener, and you have a favorite segment, let me know and I'll mention it in the next edition of the *Journal*.

For what it's worth, RUI English language program appear to be still on shortwave, though the RUI website states that the block from 01 to 06 UT targeting North America is "temporarily stopped". As of October 28<sup>th</sup>, the frequency will be 7530 kHz.

## Radio Netherlands Seasonal Changes

Some new programming begins on **Radio Netherlands** with the seasonal change; here are the details.

*Curious George* (Mondays 1230; Tuesdays 0030, 0130, 0530); *Curious George* is the Dutch culture show about more than windmills and tulips, produced and presented by Ashleigh Elson and Michel Walraven.

*Radio Books* (Wednesdays 1230; Thursdays 0030, 0130, 0530; Sundays, 1900); *Radio Books* is a series of short stories by Dutch and Flemish writers in English translation. It's an initiative of Flemish-Dutch Huis de Buren in Brussels in association with the Flemish radio broadcaster Klara and Radio Netherlands Worldwide.

*Earthbeat* (Thursdays 1230; Fridays 0030, 0130, 0530; Saturdays, 1900); *Earthbeat* is the new RNW program that examines the links in the chain that tie us to our planet. What we grow, build, consume and destroy and how that cycle affects our global footprint on the world. The program is hosted and produced by Dheera Sujana.

*Reloaded* (Sundays 1230; Mondays 0030, 0130, 0530; Sundays, 1930, 2030); *Reloaded* is RNW's weekly highlights program presented by Mindy Ran.

*Earthbeat* and *Curious George* are both being made in co-operation with RNW's

Dutch, Indonesian and Latin American departments so RNW promises a truly global approach to programming.

This means we say so long to **Research File**, which has been on for decades, as well as **Flatlanders** and the **Arts & Culture** documentary series than aired this past season. Meanwhile, life goes on for **Newsline**, **Amsterdam Forum**, **Network Europe**, and **The State We're In**.

Radio Netherlands, as usual, earnestly appreciates listener input, and the long-standing letters@rnw.nl e-mail address still works, as does that postal address we remember from years of **Media Network**: Box 222, 1200 JG Hilversum, The Netherlands.

Many thanks to RNW's Andy Sennitt for quickly forwarding this information to me!

## Request-A-Month: News and Current Affairs

First, an apology: I misspelled Bill Tilford's name in last month's *Journal*; I apologize for the error.

Bill chimes in again with some thoughts regarding news and current affairs:

*The real value of news and current affairs programming on the short waves for me is not so much having the same station on every day as the ability to weave in and out of different countries as events warrant. Nevertheless, I would rank different stations by their suitability for different purposes:*

### I. General International News:

*UK (BBC World Service): The Beeb bears any number of self-inflicted wounds, but News-hour is still out there and still one of the best overall general news programs. Easiest catch in the Midwest is at 2000 UTC on the African stream (15400 KHZ). Of course, there is also BBC America TV now. TV or not TV? The telly has pictures, but it also has those*

*annoying Bare Essentials adverts. The radio is free of this, and right now, it is also including historical bits in celebration of 75 years of broadcasting.*

*GERMANY (Deutsche Welle): Newslink is still excellent news radio, and DW TV doesn't have the same penetration as its BBC TV counterpart. This runs a half-hour with rotating features following. An easy catch in the midwest is at 2100 UTC on the African stream (11865 KHZ). [By the way...an hour-long version of Newslink, called Newslink Plus, airs at 0100 UTC on DW's live webcast, but is not otherwise available -ed.]*

### II. Regional News:

*JAPAN (NHK): I will miss Asian Top News, a sort of daily audio-clipping from several news services throughout Asia. This was a casualty of recent program cutbacks. Nevertheless, the surviving program appears (so far) to be committed to quality information about regional issues of import for Japan as well as news about Japan proper. At this writing, easy catches are via Sackville at 1200 UTC (6120 KHZ) and 1400 UTC (11705 KHZ). It is tempting to criticize the cutbacks, but I favor being supportive of NHK for not leaving the air entirely.*

*AUSTRALIA (Radio Australia): I won't do the hodgepodge of times and frequencies here, but the Asia Pacific program has excellent coverage of greater Southeast Asia and the Pacific Rim (especially Indonesia, East Timor, Fiji etc) and secondarily the war in Afghanistan, which sometimes gets short shrift in the US media by comparison.*

*FRANCE (RFI): Won't predict the best times and frequencies for your neighborhood here on the cusp of the B07 season, but the Africa stream has the some of the best African news coverage on the air.*

### III. National News:

*UKRAINE (RUI): The delivery may be a little dry at times, but the reporting is usually candid in a country that is having a political identity crisis. The outcome may significantly*

affect East-West relations generally, and it's worth listening as the nation converses with itself. What's more, the station is actually audible again (best midwest catch in A07 was 0000 UTC on 7440 KHZ). News and commentary are embedded in an hour-long variety program.

**SOUTH KOREA (KBS):** Many Americans would probably be surprised at where South Korea may be headed vis-a-vis North Korea. News and commentary are embedded in an hour-long variety program. An easy A07 catch was via Sackville at 1200 UTC on 9650 KHZ.

#### IV. General Current Affairs:

**RADIO NETHERLANDS (RNW):** The cream of the crop for special-interest stories.

#### V. As Events Warrant:

There are probably 20 countries that belong here. On the shorter list, besides the obvious mentions such as **RUSSIA (VOR)** and **CHINA (CRI)**, **AUSTRIA (ORF)** occasionally provides good coverage of diplomatic flareups in the Balkans, and **TURKEY (VOICE OF TURKEY)** may become must-listen radio as it gets drawn ever closer to being actively involved in Iraq.

#### VI. In Memoriam:

I miss the long-gone Swiss Broadcasting Corporation, the recently-departed CBC relays from Radio Canada International and the days when the VOA was walking tall. [Amen, brother....-ed.]

Bill's contribution was the only one I received this month...anybody else have any ideas?

Bill also updated his music programming suggestions from last month:

1. Jim Ronda mentioned *Music Time in Africa*, an excellent VOA program; I believe the correct frequency should have been 15455 kHz rather than the 15445 kHz that was printed.

2. I mentioned *Radio Habana Cuba's* English-language music block; this is now the second programming hour (0200-0300 and 0400-0500 UTC in A07) rather than the second half of the second programming hour on Sundays. (Same programs in rotation.) RHC has also been using some (10-minute) music blocks at the end of some weekday program hours.

For next month, let's have the *Request-A-Month* feature programming about radio / the DX hobby. I know that Arnie Coro still holds court on *DXers Unlimited* on Radio Havana Cuba, and Glenn Hauser (who often helps me with input for the NASWA Journal) continues to produce *World Of Radio* each week...what are your favorites?

May your November bring you good listening. Until next month,

73 DE Richard

---

## WWW Shortwave Listening Guide

Looking for programs to listen to? You can find what programs are on for the current hour or list programs of a desired type on a given day at the **www Shortwave Listening Guide** on NASweb. Visit the Guide at <http://www.naswa.net/swlguide/>.

## DX Target: Bangladesh Betar

The National Radio Network in Bangladesh

By Richard A. D'Angelo

### The Country

This underdeveloped and impoverish land is an exciting DX Target for shortwave listeners. The domestic and international shortwave outlets of Bangladesh are difficult to hear and getting replies back from the station is another challenge. Nobody said the life of a shortwave DX'ers had to be easy!

Europeans began to set up trading posts in the area of Bangladesh in the 16th century. Eventually the British came to dominate the region and it became part of British India. However, in 1947 West Pakistan and East Bengal (both primarily Muslim) separated from India (largely Hindu) and jointly became the new country of Pakistan. East Bengal became East Pakistan in 1955, but the awkward arrangement of a two-part

Bangladesh, officially the People's Republic of Bangladesh, is located in South Asia. It is surrounded by India on all sides except for a small border with Myanmar to the far southeast and the Bay of Bengal to the south. Together with the Indian state of West Bengal, it makes up the ethno-linguistic region of Bengal. The name *Bangladesh* means "Country of Bengal."

As noted previously, the borders of Bangladesh were set by the Partition of India in 1947, when it became the eastern wing of Pakistan (East Pakistan), separated from the western wing by 1,600 kilometers (1,000 miles). Despite their common religion of Islam, the ethnic and linguistic gulf between the two wings, compounded

by an apathetic government based in West Pakistan, resulted in the independence of Bangladesh under the leadership of Sheikh Mujibur Rahman in 1971 after the bloody Bangladesh Liberation War, in which it was supported by India. The years following independence have been marked by political turmoil, with thirteen different heads of government, and at least four military coups.

country with its territorial units separated by 1,600 kilometers left the Bengalis marginalized and dissatisfied. East Pakistan seceded from its union with West Pakistan in 1971 and was renamed Bangladesh. This DX Target will focus on the national radio network that covers this impoverished, flood-prone nation and the international, external service. Both are known as Bangladesh Betar.

The population of Bangladesh ranks seventh in the world, but its area of approximately 144,000 square kilometers (55,600 square miles) is ranked ninety-fourth, making it one of the most densely populated countries in the world, or the most densely populated country if small island nations and city-states are not included. It is the third-largest Muslim-majority nation, but has a slightly smaller Muslim population than the Muslim minority in India. Geographically dominated by the fertile Ganges-Brahmaputra Delta, the

country has annual monsoon floods, and cyclones are frequent. Bangladesh is one of the founding members of South Asian Association for Regional Cooperation (SAARC).

Despite sustained domestic and international efforts to improve economic and demographic prospects, Bangladesh remains a poor, underdeveloped, overpopulated, and inefficiently-governed nation. The per capita income in 2004 was a meager US\$440. About a third of this extremely poor country floods annually during the monsoon rainy season, hampering economic development. Although more than half of GDP is generated through the service sector, nearly two-thirds of Bangladeshis are employed in the agriculture sector, with rice as the single-most-important product. Major impediments to growth include frequent cyclones and floods, inefficient state-owned enterprises, inadequate port facilities, a rapidly growing labor force that cannot be absorbed by agriculture, delays in exploiting its natural gas energy resources, insufficient power supplies, and slow implementation of economic reforms. Reform is stalled in many instances by political infighting and corruption at all levels of government. Opposition from the bureaucracy, public sector unions, and other vested interest groups has also blocked progress. The BNP government, led by Prime Minister Khaleda Zia, has the parliamentary strength to push through needed reforms, but the party's political will to do so seems to be lacking. The World Bank noted in its July 2005 Country Brief, the country has made significant progress in human development by focusing on increasing literacy, achieving gender parity in schooling, and reducing population growth. On an encouraging note, growth has been a steady 5-6% for the past several years.

## The History of the Station

Bangladesh Betar, as an electronic medium of broadcasting, started functioning in Dhaka on 16 December 1939. The first radio station, the then East Bengal Radio, was set up in Nazimuddin Road, now an older part of Dhaka. The centre moved to Shahbag on 8

February 1960. On 30 July 1983, Bangladesh Betar moved to Sher-e-Bangla Nagar, north of Dhaka. At present, the Shahbag building serves as the National Broadcasting Authority (NBA) facility. Bangladesh Betar has the unique distinction of being associated with the liberation of the country when it put on air the historical proclamation of the Independence of Bangladesh on 26 March 1971. During the war, seventy-five million people depended on radio broadcasts from the station for the latest information about the war. Until December 16, 1971 the station's name was "Swadhin Bangla Betar Kendra" before being changed to the familiar "Bangladesh Betar" of today.

Bangladesh Betar modestly contributes to the income generation of the government. In the fiscal year 2002-2003, Bangladesh Betar earned revenue through commercial advertisements. It also earns foreign exchange by providing program transmission facilities to the British Broadcasting Corporation and the Voice of America. Every day a six hour time slot of the 10 kilowatt medium wave transmitter of Bangladesh Betar is rented to Metrowave Limited, a non-government broadcasting organization.

## Programming at the Station

Bangladesh Betar attempts to infuse the concept of democracy into its people through the dissemination of information, education and entertainment. The station highlights the history, legacy and cultural heritage of the country while providing an opportunity for talented local entertainers to perform. It inspires grass root people to play an active part in development activities and campaigns against unethical, anti-social and terrorist activities. Bangladesh Betar also helps the government to maintain peace, territorial integrity and sovereignty. Entertaining programs upholding moral values are broadcast for every age group of people. The station plays a vital role during natural disasters through the dissemination of vital news and information.

The External Services of Bangladesh Betar

broadcasts news and programs in six languages (Bangla, English, Urdu, Hindi, Nepali, and Arabic) in eight transmissions for listeners in foreign countries. The total duration of the broadcasts is 6 hours and 30 minutes per day. The programs are designed to project Bangladesh's history, culture, tradition and to discuss international events.

The Program and Planning cell of Bangladesh Betar is involved in policy making, strategic development and program planning in view of achieving the goals of Bangladesh Betar. It coordinates with the regional centers, units and other wings to improve the quality of programs.

The Monitoring Directorate monitors 43 programs, including news and commentaries from thirteen international radio stations and transcribes them for use by the central news organization of Bangladesh Betar as a source of foreign news and information in the hourly news bulletins. The directorate also publishes a daily monitoring report and over two hundred copies of this report are regularly sent to all important Government offices including the President's office and the Prime Minister's office.

One local, one commercial, one sports news bulletin, two news commentaries, (one in Bangla and one in English) are included in the daily bulletins. Two weekly presentations, News Review and SAARC News Bulletin (both in Bangla and in English), are also being aired from the Central News Organization.

The Central News Organization also prepares two news bulletins and one news commentary in English for the External Service of Bangladesh Betar, everyday. The English text of the six language bulletins by the External Service is supplied by the Central News Organization.

## How to Hear Bangladesh Betar

The location of the station in South Asia and the quality of the station's transmission facilities makes this a very difficult DX Target for shortwave listeners in North America. It is a little easier for our counterparts in Europe but obtaining QSL verifications is very difficult no matter where a shortwave listener is located although recently radio enthusiasts have been receiving full data QSL replies from the station.

### QSL VERIFICATION

**BANGLADESH BETAR**  
**RESEARCH & RECEIVING CENTRE**  
 121, Kazi Nazrul Islam Avenue  
 Dhaka, Bangladesh.

Dear

Thank you very much for your reception report of *Dec/06*. We are pleased to confirm that the station you heard is Bangladesh Betar operating on *4750* KHz, time *0038* UTC.

Your sincerely  
*Aman*  
 Senior Engineer

Research & Receiving centre.

### POST CARD

STAMP

Name *R. A. D'Angelo*

Address *2246 Burkey I*

*PA-19610, USA*

Bangladesh Betar, the only national radio network in Bangladesh, broadcasts its programs through ten (10) regional stations at Dhaka, Chittagong, Rajshahi, Khulna, Rangpur, Sylhet, Thakurgaon, Rangamati, Barisal and Cox's Bazar. These regional radio stations produce programs in order to meet the listening needs of the local and national audience.

The Central News Organization is responsible for all national and international news bulletins broadcast from Bangladesh Betar in Dhaka. Headed by the Director of News, this organization broadcasts twenty national news bulletins from early in the morning to midnight every day. Fifteen of them are in Bangla, while the rest are in English.

The Commercial Service broadcasts programs designed primarily to earn a profit from advertising revenues. Commercial advertisements, film songs and different musical programs are produced here in keeping with the objectives of Bangladesh Betar. In total, the

station broadcasts such programs from all stations for 16 hours and 55 minutes per day.

The Engineering Wing of Bangladesh Betar ensures the recording, editing and transmission of programs. This wing maintains the performance of medium wave, short-wave and FM transmitters of Bangladesh Betar. All the engineering activities are managed through 13 transmitting centers, 9 broadcasting houses, a maintenance unit, a planning cell, and a research unit.

The two 250 kilowatt ("KW") shortwave transmitters broadcast external service radio programs covering the Middle East, the Far East, South & South-East Asia as well as Europe. London, Paris and Germany are the primary audience targets for the European beam. Bangladesh Betar broadcasts radio programs in six languages and plays an important role for Bangladeshis abroad.

There are four high power domestic transmitting stations in Bangladesh. All are 100 KW and located in Savar (Dhaka), Noapara (Jessore), Kahalu (Bogura) and Kalurghat (Chittagong). All the stations are medium wave transmitting stations except one, which is a shortwave transmitting station used for home service broadcasts. This poorly performing transmitter is in the process of being replaced.

The National Broadcasting House is the central broadcasting centre of Bangladesh Betar. It was established in 1983 under a Government project funded by the government and a Japan International Cooperation Assistance group. There is a 300 seated modern auditorium, news and music studios, plus studios for talk and drama. The broadcasting house is linked with the two 250 KW transmitters by STL link transmitters. The station broadcasts live programs and pre-recorded programs.

Nine of the regional stations (Dhaka, Chittagong, Rajshahi, Khulna, Rangpur, Sylhet, Thakurgaon, Comilla, and Rangamati) have a broadcasting house and a transmitter in different locations. The rest of the regional stations (Barisal, Cox's Bazar, Rangamati, Banderban and Comilla) are self-contained

10 KW medium wave outlets. There are two transmitters of 100 KW and a 10 KW medium wave unit at the Rajshahi regional station.

The Home Service can be heard on short-wave using 4,750 kHz with 100 KW. Last DX season the Home Service could be heard opening in North America at 0000 UTC. The nominal broadcast times for the short-wave Home Service were 0000-0430 UTC, 1200-1500 UTC plus an English segment at 1500-1600 UTC. Recent reports indicate less favorable times of operation with transmissions scheduled from 0830 UTC continuous through 1600 UTC in English and Bengali. Hopefully, they will once again introduce the 0000 UTC transmission which was occasionally audible in North America.

### **The International Service of Bangladesh Betar**

Recently, the DX Window of the Danish Shortwave Club International carried a report that the external services of Bangladesh Betar, which are aired on shortwave in Bengali and five other languages, are in awful operating condition due to degradation from its old shortwave transmitter. The old short-wave transmitter is located in Savar. A station official mentioned that the external services were very popular among listeners of South Asia and countries in the Middle East despite the awful transmitting equipment. Also, the external services of Bangladesh Betar had become popular in India, Pakistan, Nepal and the Middle East. However, because of poor signal quality Bangladesh Betar has been losing many of its new listeners.

*"The quality of transmission has remained poor for two years. The signal has become too weak to receive. But the authorities are not willing to address the problem,"* a Bangladesh Betar official was quoted in The New Nation.

The article noted that the station is facing problems finding people who speak languages that the station broadcasts in to foreign countries. This is making the production of programs for its external service difficult.

Finally, the official noted in the article that the station was planning to discuss with the government about replacing the present transmitters. News bulletins, commentaries, press comments, economic reviews, talk shows, weekly magazines, songs and features on women and children issues are the main programs of the external services of Bangladesh Betar. The external service can be heard on 7,250 kHz at 1230 to 1630 UTC, with English from 1230 to 1300 UTC on 7,250 kHz. Another transmission block can be heard on 7,250 kHz and 9550 kHz from 1630 to 2000 UTC, with English at 1745 to 1815 UTC in the Voice of Islam service and 1815 to 1900 UTC in the General Overseas Service. Both transmissions are on a daily basis. Other languages used in these broadcasts include Nepali, Urdu, Hindi, Arabic and Bengali. Watch Al Quaglieri's *Listeners' Notebook* column for updates to the station's broadcast times and frequencies.

## Obtaining QSL Verifications

Historically, Bangladesh Betar has been an erratic verifier of listener reception reports. Everything is dependent on who is working at the station and the general mood at the station when your reception report arrives. Recently, I received an electronic reply from Mohesh Chandro Roy, Senior Engineer at the station confirming my reception of the 4,750 kHz domestic outlet. A few weeks later a full data Bangladesh postcard arrived signed by Mr. Roy. He has been sending out transmis-

sion information asking listeners to monitor their broadcasts and encouraging listeners to write to the station. Reception reports in English can be sent to the station but remember to enclose return postage in either US dollars or International Reply Coupons. As noted above, there have been some recent replies to e-mail reception reports sent to the station at [rrc@dhaka.net](mailto:rrc@dhaka.net) and an occasional reply to old fashion postal reports sent to:

Bangladesh Betar  
External Service  
121, Kazi Nazrul Islam Avenue  
Shah Bagh, Dhaka-1000,  
Bangladesh

As always, remember to send in those Bangladesh Betar logs to electronic *Flashsheet* editor Mark Taylor and to Dan Ferguson and/or Wally Treibel for the *Log Report*. Of course, QSL verifications should be sent to Sam Barto for inclusion in the *QSL Report* column. Good luck with this DX Target.

Government of the Peoples Republic of Bangladesh  
Bangladesh Betar

No:Betar /Research/RR(Foreign)/2007- 302

Date: 09.05.07

Dear Listener,

Thanks and warm greetings from Research and Receiving Center on behalf of Bangladesh Betar.

I have really appreciated your effort for tuning our SW frequency. For your kind notice I would like to inform you that we have two SW transmissions of frequency 4750 KHz (Home service, Bengali) that operates for the duration of 0830-1710 (UTC) and 7185 KHz, for external service that operates for the duration of 1230-2000(UTC). May I request you to receive both frequencies for the time being and report us for those frequencies?

With regards,

  
(Mahesh Chandra Roy)  
Senior Engineer  
Research and Receiving Center

# Reports on the HFCC B07 Conference

*(as reported in the October 2007 NASB Newsletter)*

## NASB at the HFCC Conference in Birmingham

The High Frequency Coordination Conference (HFCC) for the B07 broadcast period took place in Birmingham, England August 27-31. NASB's Vice President, Mike Adams, was there, along with representatives of other NASB member stations KTWR and WEWN, and various associate members. This was Mike's first time attending an HFCC Conference, and the following report contains his impressions of the event. Also in this issue of the NASB Newsletter you'll find the opening remarks at the conference by Oldrich Cip, HFCC Chairman, as well as a summary of the major decisions and discussions at the plenary sessions of the conference.

### First Timer at HFCC

by Mike Adams, VP NASB

FEBEC (FEC) is normally represented at HFCC by Chris Cooper, but as the conference was near my home in the UK, I was invited to join in and learn from the process. I was not sure if I would know anyone there, but it turns out that many also participate in DRM meetings or are at other International events, so I was amongst several friends. It was good to see Jonathan Clark from NASB associate member TCI there, and again 2 weeks later at IBC in Amsterdam.

The key business is the coordination of SW frequencies and the key "figure of merit" is the reduction of collisions with other broadcasters. The broadcasters who won't coordinate to avoid interference don't attend. If broadcasters are in attendance then it is their goal too—and all were helpful.

It was good to see a whole table full of NASB delegates sitting next to Tom Lucey of the FCC.

The tools of the job are an array of software programs to analyze interference problems and choose clear frequencies. People use many different programs, but a few are most common. You have to understand these tools before you can begin working. Some coordinators do still use primarily paper records, but this is less common and requires large paper files to be printed every day during the conference. It was encouraging to hear the HFCC discuss moving to "paperless" conferences. There was a suite of PCs for use by any delegates to make their submissions. At future HFCC events it might be helpful to have a training session the night before for new delegates who are trying to learn the coordination tools. Some of the NASB members who have attended for many years would be well qualified for the task as trainers.

Besides the frequency coordination, much other networking takes place over coffee breaks and meals. One could get a quote from a broadcast service provider, learn about the new RIZ transmitters, discuss swapping airtime with other broadcasters, and a whole range of other operational and technical topics that came up. I found the networking time very valuable.

CVC excelled themselves as host (assisted by Feba Radio and FEBEC) and provided a well equipped venue. They made sure everyone had an interesting English experience when we all went out to a medieval dinner banquet at a nearby Abbey. Many also joined in for a tour to Warwick Castle and Shakespeare's Stratford-upon-Avon.

### Opening Remarks from the B07 HFCC Conference

by Oldrich Cip, Chairman, HFCC

Ladies and Gentlemen, Dear Colleagues, Distinguished Guests,

It is my privilege now on behalf of all members of the HFCC/ASBU association who have

come to Birmingham to thank Mr Bob Edmiston who is the Chairman and founder of Christian Vision, and to Mrs Tracie Edmiston a director of Christian Vision for coming over on this nice bank holiday morning to our opening ceremony. I would like to thank to Mr Edmiston for his nice welcome and introduction to the conference. Real old-timers among us surely remember that the present conference in fact revisits after many years the UK and even the same region more or less:

One of early conferences, hosted by the BBC then, was held in Evesham—not very far from here. Participants of that early meeting were also able to get a glimpse of the beautiful, typically English, and mostly rural countryside of Cotswolds. Now we are in the West Midlands region again but this time in the second-largest city of the UK.

The Evesham Conference was held way back before our association was officially founded and its articles of association written. But even that piece of writing is almost ten years old and we have concluded that some revisions are needed. A too restrictive definition of membership was one of the drawbacks for example. The SB has already drafted an amendment—as well as a series of other minor corrections. The draft will be submitted for approval to the Plenary Meeting. We believe that membership should be opened more to persons or legal entities involved in the usage of the shortwave spectrum. In addition, the institute of “Associate Membership” will be created and will be available to other parties interested in shortwave broadcasting. Both these arrangements will make it possible that broadcasters like the BBC or RFI for example and other organizations will be able to become the members of the HFCC.

As you have read in the Minutes from the last Board Meeting or in the “what’s new” column of the website, HFCC has successfully carried on in the debate on the enlargement of shortwave spectrum for broadcasting that is on the agenda of the World Radiocommunication Conference or WRC07 later this year. Geoff Spells, “Our Man in the WRC07 world” has just reported

that European administrations have agreed on an ECP (European Common Proposal) to allocate a total of 350 kHz additional spectrum to shortwave broadcasting with 50 kHz out of this on a shared basis with the fixed and mobile services.

What is also important is that the ITU-R Study Group 6 have approved a new report called “Information relating to the HF broadcasting service” The report contains an analysis of the joint global operational schedules prepared by HFCC. A summarized HFCC position has been incorporated into the final version of the European-CEPT Brief for the world conference.

It is interesting to note that the organization of World Broadcasting Unions submitted their position to the same Brief. The WBU comprises the EBU, ASBU, ABU and other unions around the globe. The technical committee of this world union relates to the statistical analysis of global schedules prepared by HFCC and supports the enlargement. The HFCC Steering Board is now considering preparing yet another information document for WRC-07 that would support further the need for additional HF broadcasting spectrum.

Positive as it all may seem it does not mean that the battle for the enlargement of the spectrum has been won. The CEPT is only one regional group that supports the enlargement at present. We shall discuss this further in a specialized meeting that will take up the WRC07 matters as well as monitoring and spectrum usage.

Another ITU related subject is worth mentioning: this time connected with the introduction of DRM: The Radiocommunication Assembly of the ITU decided recently to study the possibilities for the use of DRM for local coverage in the 26 MHz broadcast band. Quite inevitably the provisions of Article 12 of International Radio Regulations are involved and this includes our global frequency co-ordination. The management of our association decided to submit the subject to the group of experts and we are ready to take part in all debates primarily with the aim to protect international trans-

missions from local DRM broadcasting and vice versa. Liaison of HFCC with national administrations and regional groups, e.g. CEPT, APT or CITELE may be also needed.

Let me return to our conference that has just been opened and to our hosts. I am sure that we are all impressed with the preparatory work of the Team headed by Andrew Flynn who has been the moving force behind the idea to take up the hosting of a shortwave seasonal conference by a relatively small organization. This has included all preparations here at the Hilton Metropole as well as the rich assortment of travel information and maps supplied by the Team to the HFCC website. Naturally, the CVI conference budget has been very much improved by a number of sponsors, and I would like to join Mr Edmiston in thanking them on behalf of all of us.

We do have problems from time to time in finding hosts but the Birmingham conference shows that the hosting can be done on a reasonable budget with a generous support of sponsors. We are confident that this will be an important motivation for future conferences and their hosts and even for those who have not hosted a conference yet.

In an effort to brighten up my introductory monologues I frequently resort to proverbs or quotes, and since we are in an English speaking country I have borrowed a quotation today from a well known English writer and novelist, W. Somerset Maugham: "The ability to quote is a serviceable substitute for wit" he once said—and I am not sure if I should take it as a word of caution or of encouragement.

Thank you for your attention!

## **Excerpts From HFCC/ASBU Plenary Meeting Minutes—Birmingham, UK**

27th- 31st August 2007

The HFCC/ASBU co-ordination conference for the Wintertime 2007 (B07) broadcast season was hosted by Christian Vision, in association with T-Systems and other

sponsors at the Hilton Metropole NEC Hotel in Birmingham, United Kingdom, between 27th-31st August 2007. Some 98 delegates representing 46 organizations attended this conference.

Mr. Bob Edmiston, the founder and Chairman of Christian Vision, welcomed everyone to the meeting in Birmingham. As a charity, CVI were only able to host the meeting due to the generosity of sponsors -- particularly the principal sponsor T-Systems Media & Broadcast. Other sponsors were Continental Electronics, Riz, WRN, VT Communications, Thomson Broadcast & Multimedia and TCI. Bob Edmiston noted that CVI joined HFCC in 1998 and recognized the importance of coordination. HF broadcasting still has advantages despite the poor quality compared to other radio systems, but this will be overcome in the future with DRM.

Horst Scholz announced that one of the founding members of HFCC, Umberto Tolaini from Vatican Radio had sadly passed away. He asked everyone to stand and observe a minute's silence as a mark of respect for the memory of Umberto. He noted that the dinner on Tuesday, at the kind invitation of Riz, would be held at the hotel. A further dinner would take place on Thursday at Coombe Abbey, hosted by Christian Vision.

Rachel Staviskaia drew attention to the 1st Russian Symposium on DRM to be held 8th-12th October in Moscow, organized by Radio Russia in cooperation with Deutsche Welle. More information is available on request and everyone would be welcome to attend.

Horst reported that the A08 conference was due to be a joint conference with ABU-HFC tentatively scheduled for 4th-8th February 2008. Following extensive discussion with ABU, it looks likely that the venue would be either Bangkok or Kuala Lumpur as a fallback. More information will be made available as soon as possible. Horst proposed Monday 14th January 2008 as the deadline for requirements for the A08 schedule.

Horst Scholz said there were no offers to host the August 2008 meeting. He noted

that there were still two large organizations that had not yet hosted a meeting. Bassil Zoubi advised that ASBU [Arab States Broadcasting Union] would like to host the A09 meeting in February 2009 in Tunisia. The Plenary welcomed the proposal. ASBU will pursue the organising process with the Steering Board.

The use of the 26 MHz band for local broadcasting had been discussed. To protect the use of part of this band for international, long distance broadcasting, it was proposed to informally segregate the band.

It was proposed to broaden the membership base of HFCC and to make it available to entities and persons involved in the usage of the HFBC spectrum, and also by introducing a category of Associate Members. This would allow organisations who were not Frequency Management Organizations but who had an interest in HF broadcasting to become members of HFCC. Associate membership would be available to other parties interested in shortwave broadcasting for example equipment manufacturers, broadcasting unions, etc.

Horst informed the meeting that Nexus [of Italy] had asked to re-join HFCC. He asked Alfredo Cotroneo to give a short introduc-

tion to Nexus for the benefit of members who were unfamiliar with the organization. Following this introduction, Nexus was approved as a member. Alfredo Cotroneo proposed to form an informal group, collaborating via email, to investigate how to increase knowledge and importance of HF broadcasting throughout the industry.

Bassil Zoubi of the ASBU announced that due to recent flooding, one of the HF transmitting sites in Oman was damaged. The Oman Ministry of Information had coordinated frequencies for this site as they hoped to have the site back on air during B07.

Allen Graham [of NASB associate member HCJB] said that for the last 20 years, HCJB has been expecting a new airport to be built in Quito, Ecuador, near their transmitting site, and they have already taken down some antennas. Once the airport has been built, the Board of HCJB have decided not to build a new transmitting site until the future of DRM is certain. They will continue some of their transmissions by renting the necessary capacity.

*These minutes were prepared on behalf of the HFCC Steering Committee by Geoff Spells, Member of the Steering Committee.*

## Preview Of EDXC Conference

NASB President Jeff White will be one of the speakers at this year's European DX Council Conference in Lugano, Switzerland November 1-4. He'll be telling the group about the NASB, the state of shortwave broadcasting in the Americas, and the latest news about DRM and its U.S. platform. Also speaking will be Bob Zanotti, formerly of Swiss Radio International, who will explain his view of the reasons behind the closing of SRI; his website [www.switzerlandinsound.com](http://www.switzerlandinsound.com), which is now the only source of "radio" reports about Switzerland; and his involvement in IRRS, The Italian Radio Relay Service, which he co-founded with Alfredo Cotroneo. Other speakers at the EDXC Conference will include Anker Peterson of the

Danish Shortwave Club International and Robert Kipp, who will speak about "Radio in the South Atlantic."

The last NASB Newsletter mentioned that the 2008 EDXC Conference will take place in Finland. Former EDXC Secretary General Risto Vahakainu, who is with the Finnish DX Association, provides us with a few more details in a recent e-mail: "For future planning I'm happy to announce that we have now fixed 5-7 September 2008 for the conference. We planned first for August, but the Beijing Olympics made us move a few weeks later. The city is Vaasa, on our west coast some 400 kilometers northwest of Helsinki."

# American Shortwave Panorama—CBS on the Air on Shortwave from Philadelphia

by Dr. Adrian Peterson

During the radio era before World War 2, there was quite a movement here in the United States, and in other countries throughout the world also, to establish shortwave relay stations in an endeavor to give wider broadcast coverage. At the time, television was a concept and not a reality, and FM radio was still a distant dream. The mediumwave band was not overcrowded though the mediumwave signal generally gave only local coverage. However, shortwave transmissions could give wide area coverage within the country, and even international coverage on a much wider scale.

Many mediumwave stations in the United States established shortwave relay transmitters during the late 1920s and throughout the 1930s to carry their programming to distant listeners. In fact, it is estimated that there have been somewhere around one hundred shortwave stations on the air in the United States during the past eighty years, and probably more than half of these were active during the pre-war era.

One of the shortwave stations that held a high reputation back during the early years was located in Philadelphia, Pennsylvania. This station was launched on behalf of the co-located mediumwave station WCAU under the callsign W3XAU. And again, even though a casual glance would seem to indicate that this was an amateur radio station, this is not the case. Station W3XAU was indeed a professional station, relaying the programming from mediumwave WCAU. The X in a prewar callsign indicated an experimental station, either amateur or professional; and in this case, indeed professional.

The mediumwave station WCAU was launched in 1922 as a very small operation located in the back room of a small radio shop in Philadelphia. Ten years later, following a couple of intermediate migrations, WCAU

was installed in a professionally built studio complex, the first building in the United States that was constructed specifically as a radio station. This facility was located at 1622 Chestnut Street in Philadelphia.

Now, at the same time, a new 50 kW mediumwave transmitter was under construction also and this was installed in a new building out at Newtown Square. The initial broadcast from this grand new WCAU was on September 19, 1932.

Before we leave the mediumwave scene and take a look at the shortwave events in Philadelphia, just a touch of humor from the TV series, "Gilligan's Island". On July 5, 1992, Gilligan and his six fellow castaways on a lonely and unidentified tropical island somewhere out in the Pacific tuned in their radio receiver and they heard a broadcast from a radio station that gave the identification announcement, "WCAU". At the time, the real WCAU in Philadelphia had become WOGL, and so there really was no radio station on the air with the callsign WCAU at that stage.

Not only was there a new suite of studios and offices, and a new transmitter facility back in 1932, but the relatively new medium of shortwave broadcasting was also under development. Early in the year 1930, a small locally made 1 kW shortwave transmitter with the callsign W3XAU was installed with the regular mediumwave unit in Philadelphia. It is claimed that this was the first license issued by the FCC for an international shortwave broadcast station as a commercial operation.

However, two years after the Newtown Square facility was inaugurated, a re-built version of the same 1 kW shortwave transmitter was installed alongside the huge 50 kW mediumwave unit. All of these developments took place during the era when the innovative William Paley of later CBS fame was at the helm.

Four years later, this same transmitter was re-built to 10 kW capacity and two V type antennas were erected for coverage into Europe and South America. Station WCAU became even more ambitious for a truly international outreach with the erection of two large curtain antennas for coverage into the same areas, Europe and South America. At the same time, they made a request to the federal licensing authorities for 50 kW operation on shortwave. In fact, on several occasions in the late 1930s and early 1940s, they made similar applications, but on each occasion the request was denied.

With war clouds developing over Europe in 1939, the FCC took a hard look at the international shortwave scene in the United States and issued three new rules. This edict, issued on May 23, 1939, required that shortwave callsigns should be regularized, power should be increased to 50 kW, and directional antennas should be installed.

As far as callsigns were concerned, this edict gave time for consideration and negotiation regarding desired call letters. Initially, the first new callsign chosen to replace W3XAU was WCAI. This new callsign for the shortwave outlet, WCAI, proved to be only temporary. With information derived from Time magazine, FCC news releases, and several other sources, it is learned that this temporary new callsign was in use for a little less than two weeks beginning in mid August 1939.

The FCC subsequently ruled that all callsign changes for the shortwave stations should become effective on September 1. However, some stations introduced their new callsign prematurely and at least a couple were a little tardy in implementing the change. As far as W3XAU was concerned, the change from the initial WCAI to the subsequent WCAB was implemented on August 26, one week before the official date.

As for the directional antennas, they were already in place. And the power increase to 50 kW? They had already applied on several occasions and been denied. However, there was another mitigating factor involved; CBS

had a large new shortwave station under construction at Brentwood on Long Island. Initially, the concept was for WCAB in Philadelphia to supplement the new Brentwood facility. However, in view of the power restriction, it was finally considered best to close the Pennsylvania station in favor of the large new facility under development on Long Island.

Programming from the Philadelphia shortwave station was initially a tandem relay from mediumwave WCAU, though separate identification announcements were given live over the air. However, when the station became a genuine international broadcaster, much of the scheduling was specifically prepared programming for the target areas, Europe & Latin America. Programming in foreign languages was taken on relay from the CBS sister shortwave station W2XE in Wayne New Jersey, and programming in English was also taken live from the CBS national network. This shortwave station was heard quite frequently throughout the Americas, over in Europe, and also in the South Pacific.

The new 50 kW shortwave transmitter WCRC at Brentwood was officially inaugurated on January 1, 1941. Just one year later, the 10 kW W3XAU-WCAI-WCAB at Newtown Square was finally switched off, and this nostalgic event occurred at midnight on December 31 in the same year 1941.

However, that is not the end of the story. The large new international shortwave station at Brentwood was taken into service with OWI-VOA (Office of War Information & Voice of America) programming less than two months later, on February 24, 1942 and the 10 kW unit in Philadelphia was packed up and sent over to England for use by the BBC in London.

How interesting it would be to find out the information from the other side of the Atlantic as to what happened to this famous American transmitter while it was in service over there in islandic Europe.

*[from the October 2007 NASB Newsletter]*

# News And Notes

*From the October 17th global media briefing, published by the Association for International Broadcasting, the industry association and networking organization that focuses on cross-border media...*

**The first public spending** round under Britain's new prime minister, Gordon Brown, saw BBC World Service receive an additional £70million (around US\$140million) in funding to allow it to launch a new Farsi-language TV service to Iran and to increase the Arabic-language television service—due to launch at the end of this year—from 12 hours to 24 hours a day. BBC World Service multi-media services are also to receive additional funding, enabling the Corporation to reach ethnic communities in the UK. It's not all good news at the BBC—the world's largest public broadcaster—however. On 17 October, Director-General Mark Thompson is to submit his restructuring plans to the BBC Trust—the independent body that oversees the BBC's operations—that will, according to press reports, mean around 2,000 job cuts across the Corporation. Particularly hard hit, the reports say, will be BBC News. The cuts are needed following a less than hoped for licence fee settlement. All UK television viewers pay a license fee that funds the BBC's domestic radio, TV and online operations.

**Meanwhile in Finland** YLE, the Finnish public broadcaster, has announced plans to restrict some of its online content to people who have definitely paid their TV license fee. A press report says that since the switch to digital television in Finland this summer, more than 26,000 TV licenses have been cancelled. YLE operates Arena, which is in effect an online public archive of radio and TV programs, and this is the first target for the license-fee only system. Since digital TV went live in September, the number of TV license fee payers has fallen to less than two million, against a population of 5.2 million, while around one in five households has subscribed to at least one pay-TV channel. YLE is fighting back, with investment in children's television, as well as sport—YLE

will be the only channel to carry live coverage of next year's Olympics in Beijing.

**US international broadcasting** has appointed Jeff Trimble to be the new Director of Programs at the Broadcasting Board of Governors, the organisation that oversees all US publicly-funded international TV and radio services. Trimble moves to the BBG from Radio Free Europe/Radio Liberty, the Prague-based broadcaster that targets audiences across the Balkans, countries of the former Soviet Union, Afghanistan and Iraq. (*Ed. Note: see more detailed article below.*)

**172 million**—that is the estimate of the number of internet users in China at the end of September 2007. The figure represents about 13% of the country's population and officials estimate that by 2010, the figure will rise to at least 200 million. The highest proportion of internet users are in urban areas; around 5.1%—37.4million—are in rural areas.

*And, from the AIB's October 9, 2007 global media briefing...*

**BBC World Service** will receive £70million of extra funding from the UK Government for the three-year period from 2008/2009 to 2010/2011. The announcement was made by Chancellor of the Exchequer Alistair Darling during his Comprehensive Spending Review announcement in Parliament. The announcement formally confirmed £15m per annum funding for a BBC news and information television channel in the Farsi (Persian) language for Iran which will be launched next year. The go-ahead for the service was announced in October 2006 by then Chancellor of the Exchequer Gordon Brown. BBC World Service also received funding to enhance its forthcoming Arabic language television news and information channel. The services in Arabic and Farsi will be the first television news services to be launched by the BBC in a decade. They will be the first television services to be publicly-funded by Grant-in-aid from the UK Foreign & Commonwealth Office. The new BBC Arabic

Television Service is due to launch around the turn of the year, initially as a 12-hour a day news and information service, at a cost of £19m per annum. This initial service was funded through reprioritization of the BBC World Service's language portfolio and self-help efficiencies. The extra funding announced today means the new channel would be able to broadcast 24 hours a day from an appropriate point during the next financial year. A full year's operational cost of the additional 12 hours of television broadcasting in Arabic will be an extra £6m per annum. The overall settlement also includes £1m per annum from 2009/10 to enhance BBC World Service's multi-media operations in languages relevant to ethnic communities resident in the UK. In common with other public organizations, BBC World Service plans to meet its rising costs from within its existing budget through a vigorous program of efficiency savings.

BBC World Service Director Nigel Chapman said: "As we mark the 75th birthday of the BBC's service to the world this December, this settlement strengthens BBC World Service's future as a multi-media provider of high quality independent and impartial news and information around the world. "It specifically means that audiences in the Middle East and Iran will have multi-media access—through television, radio, and online—to trusted journalism of the highest standing and increased opportunity for dialogue and debate. We believe this will be a popular and valuable asset for audiences in this troubled region. This is a good settlement for BBC World Service. We are grateful for the support we have received from our stakeholders in Parliament and across Whitehall in these discussions and, in particular, the Foreign & Commonwealth Office and the Treasury."

**The U.S. Broadcasting Board of Governors** is pleased to announce the appointment of Jeffrey N. Trimble as BBG Director of Programming.

As Director of Programming, Mr. Trimble manages the development of BBG-wide strategies, plans and objectives for coordinating, developing and improving the

broadcast programs of the BBG's broadcast entities, i.e., VOA, OCB, MBN, RFA, and RFE/RL. He oversees and coordinates the programming activities of the broadcast entities, including overseeing the development and implementation of joint programming efforts by the broadcast entities in priority countries; oversees, manages and coordinates related strategic planning, program research, analysis and evaluation and the development of related Board policies and directives; and provides expert advice to the Board on BBG programming objectives and activities, including the development of programming initiatives and related policy issues. Mr. Trimble recently served as RFE/RL Counselor to the President for Programs and Policy. He was Acting President of RFE/RL from November 2005 until March 2007. From 2002 to 2005, Mr. Trimble was RFE/RL Director of Policy and Strategic Planning. From 1998 to 2002, he was RFE/RL Director of Broadcasting. In 1997, he was RFE/RL Associate Director of Broadcasting. From 1982 to 1997, Mr. Trimble held a variety of positions with U.S. News & World-Report, including New York correspondent, diplomatic correspondent in Washington, Mediterranean Bureau Chief based in Rome, Moscow Bureau Chief, Deputy Foreign Editor, Foreign Editor and Assistant Managing Editor. Mr. Trimble received a master's degree and a bachelor's degree from Ohio State University. From 1979 to 1981, he did his graduate studies in Moscow. From 1991 to 1992, he was a fellow at the Joan Shorenstein Center on the Press, Politics and Public Policy at Harvard University and at the Harvard Russian Research Center.

**The BBC's** internationally famous English radio programs can now be heard on FM for the first time in the Maldives capital of Male. BBC World Service news bulletins, sporting and current affairs programs will broadcast daily on Capital Radio 95.6 following the signing of a new agreement with their owner Asna Maldives Pte Ltd. Helen Kathuria, BBC Business Development Manager for the South Asia Pacific region said: "The BBC has a strong tradition of loyal listenership in this region so it's great that we can reach yet more people in crystal clear FM quality sound. We are

also delighted to be partnering with one of the first private radio broadcasters in the Maldives." Mr. Abdulla Nasheed, Managing Director of Asna Maldives Pte Ltd said: "We are proud to be associated with the world's leading international radio broadcaster and thrilled that our listeners can now enjoy the BBC's unique mix of news, sports and feature programs across the city." BBC programming can be heard on Capital Radio 95.6 every day between 04.00 and 10.00 local time. In addition, BBC news bulletins will broadcast at 11.00, 14.00, 17.00 and 21.00 with sporting news at 13.50 and 20.50. Health Check can be heard on Mondays at 1530.

**The Voice of America's (VOA) Korean Service** today launches three new programs and transforms its Seoul bureau into a multimedia News Center. The initiatives expand VOA's reach to North Koreans. "North Korea is one of the most closed societies in the world," said VOA Director Danforth Austin. "It is imperative that we make every effort to provide North Koreans with accurate news and information about U.S. and world events that they don't receive in their domestic media." VOA's three new Korean-language programs—America Today, News Panorama, and VOA News Parade—will increase its radio broadcasts to five hours daily from three and half.

- America Today (11:00 p.m. Korean time, 1400 UTC) is a daily 30-minute evening program highlighting all walks of American society, people, and culture.
- VOA News Parade (4:00 a.m. Korean time, 2000 UTC) is a one-hour news program focusing on Washington's responses to the day's major news through discussions with experts in international affairs and foreign policy.
- News Panorama ( 9:00 p.m. Korean time, 1200 UTC) covers the main news around the Korean peninsula with live reports from Seoul, Beijing, Tokyo, and other parts of the world.

With an expanded staff and equipped for independent production, VOA's Seoul News Center will provide a steady stream of reports

for use throughout VOA with enhanced coverage of events in North and South Korea, as well as other parts of Asia.

*Finally, from the AIB's October 4, 2007 global media briefing...*

**Burma's military rulers** have disconnected the country from the worldwide web following the pro-democracy demonstrations in the country. Internet access both into and out of Burma has been curtailed, meaning that it's now not possible to watch Burmese state-controlled English-language TV, MRTV3. The breaking of Internet links comes soon after Burma gained its first home-grown and home-hosted blogs: MySuboo was launched in September and attracted press attention in Burma and around the world. It appears that the company's servers are outside Burma as, when checked on 3 October, the site was still running. The pro-democracy rallies brought with them immediate condemnation of international broadcasters who have Burmese-language services. The BBC, Democratic Voice of Burma, Radio Free Asia and Voice of America were all slated in the local press and on state-controlled television with commentators saying that each of these broadcasters was fomenting unrest and were "killers of the airwaves". Each of these broadcasters has been attracting increased audiences in recent months, according to anecdotal evidence from the country. A survey by the BBC World Service Trust survey found that more than two thirds of radio listeners listen to BBC World Service at least once a week, with 38 per cent listening to VoA. Broadcasts have been increased to Burma to provide people with news from outside the closed country—both VoA and RFA have doubled their transmissions and the BBC has increased its broadcasts by 45 minutes. The only major TV news organization that was able to report directly from the country during the rallies was Al Jazeera English, who managed to smuggle a correspondent into the country and film the rallies. It is clear that the widespread use of mobile phones in Burma enabled the pro-democracy demonstrators to spread word of the rallies and encourage people to participate. However, realizing that the mobile network was being used

by the demonstrators, the military regime quickly cut off some connections. The exact number of mobile subscribers in Burma is not known.

**Italy's public broadcaster, RAI**, stopped all international radio broadcasting at the end of September. Without much fanfare, its short bulletins—produced in 25 languages—came to a close. After 72 years, RAI is now relying principally on its international television operation to reach audiences abroad. Relays of domestic radio programs continue and, because the country has a German-speaking region, programs in German continue to be

produced. Riccardo Pedrizzi, a member of the Alleanza Nazionale opposition party, has asked in parliament for an explanation of the close-down.

**Another international radio broadcaster cutting back is NHK Radio Japan.** From this month, there is no Japanese broadcast to Europe and North America, while English ceases to much of the world. French to Europe, the Middle East and North Africa, and Spanish to Europe both cease. German, Italian, Malaysian and Swedish services—both direct by radio and over the Internet—also stop.

## VT Communications Continues Broadcast Operations in Face of Adversity

*from The Oracle, July-December 2007*

On 5th June 2007 VT Communications were informed that a category 5 cyclone (Typhoon Gonu) was heading towards the BBC Oman Relay Station on the southeastern coast of Oman near the town of Aseela, causing major disruption to services throughout the country. The station was built for the BBC World Service by VT Communications in 2002, replacing the aging relay station located 100 km south on Masirah Islands which had been in operation since 1967. As part of its contract to design and build the Oman facility, VT Communications also operates and maintains the station on behalf of the BBC World Service. The station provides optimum coverage to the BBC's target audiences in the region, including those in Pakistan, India, the Arabian peninsula, Iran and Afghanistan.

The Omani authorities warned all residents to evacuate the coastline and 7000 inhabitants were taken off the island of Masirah. VT Communications employs over 35 staff at the station and at this stage all

non essential staff were evacuated 40 km inland. A few engineering staff remained at the station where they were housed for the duration of the storm and equipped with satellite phones as back up for telephone networks that were out of service.

Fortunately by the time Gonu reached the site it had decreased to a category 3 cyclone as wind speeds dropped. Despite the torrential rain and the excessive winds the station escaped unscathed, apart from a few minor water leaks. Unfortunately the surrounding area was affected by quite severe flooding with many homes and businesses being destroyed. Local amenities remained closed for several days and the water and electricity supply was severely disrupted.

Despite the devastating effects of this cyclone VT Communications managed to ensure that the BBC's programming remained on the air and there was no disruption to service. The fact that the station survived relatively unscathed is a credit to the design and construction of the facility.

# Alisher Saipov, Journalist Reporting for the Voice of America, Killed in Osh, Kyrgyzstan

(October 24) Alisher Saipov, a journalist who reported extensively for the Voice of America (VOA), was killed outside his office earlier today in Osh, Kyrgyzstan. Mr. Saipov reported for VOA's Uzbek language service on a variety of sensitive political issues critical to the audience throughout Central Asia.

"We call for a full and complete investigation of the circumstances surrounding this tragedy," said James K. Glassman, Chairman of the Broadcasting Board of Governors, the federal government agency that oversees the Voice of America.

Preliminary information is that he was shot dead at close range some time after 6:00 p.m. local time in Osh.

"A professional journalist has paid the ultimate price by doing his job," said Voice of America Director Danforth Austin. "We are all deeply saddened by Alisher's brutal death but firmly resolved to continue reporting events in Kyrgyzstan and throughout Central Asia."

VOA colleagues remember Saipov as a fearless journalist, with impeccable skills and deep knowledge of the region, who was always willing to go to the scene to report events. His reporting focused on the volatile Ferghana Valley that straddles Kyrgyzstan, Uzbekistan and Tajikistan and is a hotbed of Islamic fundamentalism.

Mr. Saipov, age 26, was a native of Osh. He leaves behind his wife and three-month-old daughter.

The Voice of America, which first went on the air in 1942, is a multimedia international broadcasting service funded by the U.S. government through the Broadcasting Board of Governors. VOA broadcasts more than 1,000 hours of news, information, educational, and cultural programming every week to an estimated worldwide audience of more than 115 million people. Programs are produced in 45 languages.

[VOA Office of Public Affairs]

## News Report: DRM at IFA 2007

News, views and comment presented by Mike Barraclough (*World DX Club Contact*)

In the DRM software radio forums Douglas Kaehler reported that in response to emails Sangean had informed him that the DRM 40 would not be displayed at IFA or released this year due to "market and receiver performance issues".

Kai Ludwig attended the DRM press conference at IFA given by Peter Senger and reported to DX Listening Digest:

It is understood that Canada will adopt DRM, and there are indications that Mexico will do

so as well. He confirmed that the Sangean/Roberts DRM receiver has been withdrawn. He said not to expect a big marketing campaign for DRM from a big commercial {or public, government?} broadcaster anymore. He regretted the overly optimistic announcements made two years ago about the availability of receivers "which brought me personal attacks by the press".

Otherwise the session dealt mainly with the VHF version of DRM, presented by the Hannover University and Niedersächsische Landesmedienanstalt (NLM). NLM's Detlef Pagel thinks that the roughly 180 kbps of DRM+ (as the VHF version is called) are

enough for four programs, which thus would get 48 kbps each, see below.

He mentioned a vision to remove FM signals from a part of band II {87.5-108 MHz} in 2015 to make way for DRM+.

Apart from the Morphy Richards 27024 and Himalaya DRM 2009 the other DRM products shown at the stand were:

Bosch/Blaupunkt Advanced Digital Receiver (ADR), a new DRM car receiver prototype. Digital long, medium and short wave can be received with the latest integrated standard AM/FM RF front-end using the "Advanced Digital Receiver (ADR)" IC up to baseband; Starwaves Car Box is a DRM / DAB digital radio converter box for vehicles or boats and can also receive analogue short, medium

and long wave broadcast; TechniSat's MultiRadio 1 can receive analogue FM, long-, medium and shortwave as well as DAB and DRM transmissions. The device is equipped with integrated high quality stereo-bass reflex loudspeakers and a detachable ferrite antenna; Sarapulsky Radiozavod with Russia's first DRM prototype radio; Analog Devices ADSST-260 Multimode tuner IC suitable for AM, FM, DRM and DAB; and the Blackfin based Digital Radio.

In an interview with Dave Graveline of Into Tomorrow Peter Senger said that the next generation of DRM receivers would be chip, rather than DSP based, so cheaper and with lower power consumption. He expected those to be ready by the end of this year or beginning of 2008.

## DRM News

*from the DRM Newsletter, August 2007, courtesy of Fanny Podworny, DRM Communications and PR Assistant*

### Digital Radio Mondiale (DRM) introduces its latest products at IFA 2007 in Berlin

Berlin—"DRM 30 is ready! DRM+ is coming" was the key message of Digital Radio Mondiale for one of the world's largest consumer electronics trade shows, IFA in Berlin. This year DRM was featured in IFA's Science and Technology Forum (TWF), where the latest DRM radios were on display. Since the commercial launch of the Morphy Richards DRM / DAB capable receiver, more than 1500 devices have been sold online. Consumer interest in radio receivers with DRM technology is rising and apart from the aforementioned device from Morphy Richards, the following DRM products were be on display at IFA:

- Bosch/Blaupunkt showed the Advanced Digital Receiver (ADR), a new DRM car receiver prototype. Digital long, medium and shortwave can be received with the latest integrated standard AM/FM RF

front-end using the "Advanced Digital Receiver (ADR)" IC up to baseband

- Himalaya's DRM 2009 is on the market now and can be purchased online. (See, more on this below.) The stand-alone radio supports DAB/DRM /AM/FM services. It is a portable receiver that can be run either on AC or by batteries. With the SD card slot, it can also be used as MP3 player
- STARWAVES' Car Box is a DRM / DAB digital radio converter box for vehicles or boats and can also receive analogue short, medium and longwave broadcasts
- TechniSat's MultiRadio 1 can receive analogue FM, long-, medium and shortwave as well as DAB and DRM transmissions. The device is equipped with integrated high quality stereo-bass reflex loudspeakers and a detachable ferrite antenna
- Sarapulsky Radiozavod is Russia's first DRM prototype radio
- Analog Devices introduced the ADSST-260 Multimode tuner IC suitable for AM, FM, DRM and DAB and the Blackfin based Digital Radio.

In order to increase the understanding of Digital Radio Mondiale technology and its capabilities, DRM took part in a talk session called "Talk im TWF" on Sunday, September 2. DRM Chairman Peter Senger and expert speakers from DRM member companies Fraunhofer IIS, Niedersächsische Landesmedienanstalt, Robert Bosch GmbH and Leibniz University Hanover provided an up-to-date overview about DRM 30 and the current DRM+ developments.

## DRM Receivers and Equipment

You can order the latest DRM-capable receivers online at:

- For international delivery: [www.igear.com](http://www.igear.com)
- For delivery in various countries: [www.rebelio.com](http://www.rebelio.com)
- For delivery in Germany: [www.t-online-shop.de](http://www.t-online-shop.de)

## DRM / DAB Capable Receiver Himalaya 2009 is Officially Launched

Long time DRM supporter Himalaya (Power) Electronics is proud to present the DRM 2009 to the European market. Based on the

experience of manufacturing the first two DRM receivers, namely the Maya DRM2010 and the Coding Technologies Digital World Traveller, Himalaya (Power) Electronics is pleased to deliver a new generation of high quality DRM receivers that are more affordable than ever.

The Himalaya DRM2009 is a stand alone radio which supports DAB/DRM/AM/FM services. It is a real portable receiver that could be run either by AC or batteries.

With the SD-Card slot, it can also be used as an MP3 player. In addition to MP3 playback features, the SD-Card can be used for scheduled recordings of DAB/DRM programmes. Furthermore, features of Play/Pause for DAB and DRM services are supported through the internal memory. EPG (Electronic Programme Guide) is also supported for DAB service. The specialised user interface allows for easy navigation of these advanced radio features. DRM2009 uses an advanced RadioScape multiband module, allowing reception of a wide range of digital and analogue services. DRM2009 is a truly portable and flexible system.

Further information about the receiver can be found under <http://www.himalaya.com.hk/>. You can order the receiver in Germany and in Austria from the T-Online Shop on <http://www.t-online-shop.de>.

**BRAZIL** Samuel Cassio-BRZ has sent an updated list of broadcasting stations in the Brazilian States of AC, AM, AP, PA, PI, RO and RR which cover the vast Amazon area. It is compiled by Paulo Roberto e Souza in Tefe, Amazonas and has the following changes to SW-frequencies in WRTH2007 and/or DBS-9:

3375 **Radio Municipal**, Sao Gabriel da Cachoeira, AM, schedule: 0900(Su 1000)-1300 2100-0100.

4765 **Radio Rural**, Santarem, PA, although scheduled 0800-0300, it was impossible to hear this in Tefe in Sep. I have contacted the director of the station regarding this frequency, but he has not answered.

4785 **Radio Caiari**, Porto Velho, RO, new e-mail address: [comercialcaiari@gmail.com](mailto:comercialcaiari@gmail.com)

4805 **Radio Difusora do Amazonas**, Manaus, AM, new schedule: 0930-1330 1500-1800 2000-0100. New e-mail address: [fesinha@uol.com.br](mailto:fesinha@uol.com.br)

Ex 4815, but still on 670 MW, **Radio Mesoregional**, Tabatinga, AM, is ex **Radio Nacional**, Tabatinga. They now have a website:—<http://www.radiobras.gov.br>

4865 **Radio Verdes Florestas**, Cruzeiro do Sul, AC was heard in Tefe in Sep.

4875 **Radio Roraima**, Boa Vista, RR, ex Radio Difusora, Boa Vista. New e-mail address: [i-rico@hotmail.com](mailto:i-rico@hotmail.com)

4885 **Radio Clube do Para**, Belem, PA, new ZIP-code: 66095-000. New e-mail: [clubedamanha@radioclubedopara.com.br](mailto:clubedamanha@radioclubedopara.com.br)

4885 **Radio Difusora Acreana**, Rio Branco, AC, schedule: 0900-0400, not 0900-1400! New e-mail address: [comercialdifusora@ac.gov.br](mailto:comercialdifusora@ac.gov.br)

4895 **Radio Globo Manaus** (ex **Radio Bare**), Manaus, AM. New e-mail addresses: [adm@radiobare.com.br](mailto:adm@radiobare.com.br) and [manhadaglobo@radiobare.com.br](mailto:manhadaglobo@radiobare.com.br), New website: <http://www.radioglobomanaus.com.br>

4915 **Radio Difusora de Macapa**, Macapa, AP, new e-mail address: [difusoramcp@yahoo.com.br](mailto:difusoramcp@yahoo.com.br)

5015 **Radio Pioneira**, Teresina, PI, although scheduled 24 hours a day, it was impossible to hear this in Tefe in Sep.

6160 **Radio Rio Mar**, Manaus, AM, 1000-2100 // 9695 (which is heard until 2300v during football matches). In Tefe it was also possible to hear 6160 in Sep. (Souza-BRZ/DSWCI DX-Window/Petersen-DK)

Summer Time in Brazil: From Oct 14, 2007 (0300UTC) till Feb 16, 2008 (0300 UTC) in the regions: South, South-east, Center-West. (Cassio-BRZ, Sep 23/DSWCI DX-Window/Petersen-DK)

Ex 3385, **Radio Guaruja Paulista** (now Globo Santos), is no more on SW, the last frequency, 3385 also is not heard. (Cassio-BRZ Sep 24/DSWCI DX-Window/Petersen-DK)

(DX Mix-BULGARIA)

**CANADA** 4877.49 **Radio Canada International**, Sackville, 0205-0220 UT on Oct 12, Surprisingly good signal in Spanish. Sub-harmonic of 9754.98 kHz. (Brian Alexander-PA-USA, DXplorer Oct 12/ WWDXC BC-DX/Bueschel-DE)

I just received the following email in response to a query about the **CFRX** transmitter on 6070: We are working on a replacement from a European supplier, but it does not yet have type approval to be used in North America Still working on it.

(Ian Sharp, Engineering Supervisor CFRB CFRX CKFM CJEZ SRI Toronto, Canada, via Steve Lare-MI, dxld Oct 15/WWDXC BC-DX/Bueschel-DE)

**CENTRAL AFRICAN REPUBLIC ICDI** possibility imminent—I have no idea whether propagation would be favorable now, but just a reminder that the weekly possible window for reception of **Radio Boali/ICDI**, Central African Republic, is imminent on 6030, nominal \*0500, UT Mondays only in the crucial absence of DentreCuban jamming and FueraCuban Mart. I am aware of no reports of this yet from Europe or the Americas. But watch out for CFVP and whatever else might be on 6030 (Glenn, 0410 UT Monday Oct 15/DX Listening Digest/Hauser-OK)

**CHINA China Huayi Broadcasting Corporation** schedule:

2230-1700 6185

Address:

China Huayi Broadcasting Corporation  
P.O.Box 251  
Fuzhou, Fujian Province  
China 350001

(NDXC via ARDXC News Oct/WWDXC BC-DX/Bueschel-DE)

**CLANDESTINES 4366 Voice of Iranian Revolution**, 1533-1633\*, Aug 28, ID: "Dengi Shurashi Kurdistanana Irana" in Kurdish, followed by the communist hymn in instrumental version "The International." Before 1533 there was an interval signal with motives from suite "Sheherazada" by N. R. Korsakov. (Pankov, in Australian DX News via Contact via Taylor/DSWCI DX-Window/Petersen-DK)

**4366 Voice of the Communist Party of Iran**, \*1657-1705, Aug 28, interval signal with motives from the "Nutcracker" ballet by Tchaikovsky. At 1701 began the program of the Iranian Communist Party but strongly jammed by Iran (sometimes irregular, seems to be parallel on 3801. (Pankov, in Australian DX News via Contact via Taylor/DSWCI DX-Window/Petersen-DK)

**5102 Voice of Jammu Kashmir Freedom**, Oct 06, \*1259-1310, Kashmiri, 1259 sign on with opening music, ID, Kor'an, Opening announce, Talk (Kouji Hashimoto, Japan Premium/DX Listening Digest/Hauser-OK)

**7335 Voice of Meselna Delina**, via Armavir, Russia, Mo-Fr 1700-1730 Tigrinya to Eritrea on this new frequency, ex summer frequency 11765, according to the TDP schedule website. (Trutenau in DXplorer, Sep 19). Seems to be a bad frequency choice, as on Mo Sep 24 it was covered by Radio China Int. in English on new frequency plus UNID station underneath playing non-stop music. (Petersen). It is no longer heard at 1700 on 7335, but instead CRI. (Green and Savolainen, via Hauser/DSWCI DX-Window/Petersen-DK)

15260 **Moj Them Radio**, via Taipei, the TDP schedule website now shows 0100-0130 on Mo/We/Fr instead of Tue/Thu. (Trutenau in DXplorer, Sep 19/DSWCI DX-Window/Petersen-DK)

**Andenet Le Democracy (ANDE)** Radio current broadcasting frequency is 11720 kHz in the 25 meter band. Our day and time of the broadcasts are Sunday, Wednesday, and Friday from 7pm to 8pm Ethiopian Time. Please inform our frequency and schedule to your contacts in Ethiopia.

We would like to inform our listeners that we are approaching the Winter time and this is the traditional time for moving to Winter frequencies. Hence, as of Sunday October 28, 2007 Andenet Le Democracy (ANDE) Radio will change its broadcasting frequency to 9445 kHz in the 31 meter band. The day and time of the broadcasts remains at the same. Please relay this message to your contacts in Ethiopia. ANDE will also announce its change in frequency on its Radio program. (ANDE website via Johnson Cumbre DX Oct 23)

**CONGO—DEMOCRATIC REPUBLIC 4845 Radio Tangazeni Kristo**, Aru (near Uganda) may be active again on SW (with its 300 watts according to BDXC) or on FM. The following was found at [http://www.icc-cpi.int/library/about/newsletter/16/en\\_05.html](http://www.icc-cpi.int/library/about/newsletter/16/en_05.html): "...The first three of five programs, "La CPI en RDC", "Les droits des victimes" and "Les droits de la defense" were produced with Radio Okapi and distributed to Canal Revelation, Radio Candig and Radio Tangazeni Kristo for broadcast throughout the Ituri region. Starting in July until the end of September, each theme will be aired by each station, twice a week for one month in French, Swahili and other local languages. Other radio stations in the Ituri region will also receive pre-recorded versions. It is envisaged that the remaining two programs will be broadcast from October until the end of 2007." (Kuhl-DE in DXplorer, Oct 15/DSWCI DX-Window/Petersen-DK)

**ETHIOPIA** Re 5970/5980. Yes, situation seems a bit confusing. Monitoring by Mauno Ritola and myself the past few days shows that the station on 5970 is in fact **Radio Fana**. It is in parallel with 6110 and 7210. So three Fana transmitters on the air. **Voice of Tigray Revolution** has been noted on 5980 // 6185.

I've asked for info about this new situation from Radio Fana, but no reply (yet). Possibly Fana got a third transmitter which was placed on 5970 and VOTR moved 10 kHz higher. Or maybe the picture is more complicated, we'll hopefully know it later (Savolainen, Finland, Oct 2/DX Listening Digest/Hauser-OK)

**GERMANY** Some changes of DTK T-Systems Media & Broadcast:

**Radio Trau-land** from Sep.16:

1300-1400 German 5945 JUL Su, ex 1300-1430

**Radio Republica**, cancelled from Oct.1:

2300-0400 Spanish 5910 WER Mo-Fr

**Bible Voice Broadcasting Network (BVBN)** from Oct.6:

1930-2000 English 9775 WER Sa,ex 1900-2000

Some changes of **Deutsche Welle** in English in DRM mode:

0500-0600 17525 TRM from Sep.16

(DX Mix-BULGARIA)

**HUNGARY** Winter B-07 schedule of **Hungarian Radio** in Hungarian:

| 1615-1715 | NF 10330 DEL, ex 9875 Russian        |

(DX Mix-BULGARIA)

**INDONESIA** 3266.42 **RRI Gorontalo**, 1300-1551\*, Oct 07, 08 and 13, Indonesian songs, odd wailing, female talks in Bahasa Indonesia (BI), 1549 **RRI** jingle, South Sea music. (Van Arnhem-NETH, and Wilkins-CO in DXplorer/DSWCI DX-Window/Petersen-DK)

3325 **RRI Palangkaraya**, 1520-1608\*, Oct 07 and 13, English songs, 1600 SCI, BI news,music, South Sea music. (Van Arnhem-NETH/DSWCI DX-Window/Petersen-DK)

3345v **RRI Ternate** noted off the air again around 1300, Sep 20. (Wilkins-CO in DXplorer/DSWCI DX-Window/Petersen-DK)

3976 **RRI Pontianak**, 1019-1022, Sep 16, talk in Bahasa Indonesia. (Eramo-ARG and Slaen\_ARG/DSWCI DX-Window/Petersen-DK)

3987.05 **RRI Manokwari**, 1327-1400, Oct 11. Older English Country and Western, 1329 IS on dulcimer-like instrument; pips to 1330:05, then ID: "Radio Republik Indonesia Manokwari..berita...," and into apparent local news, which ended at 1337 with the same song that is played at the end of Jakarta relays, English and Indonesian vocal music followed, hosted by the same woman; Jakarta news at 1400. (Wilkins-CO in DXplorer/DSWCI DX-Window/Petersen-DK)

3995.03 **RRI Kendari**, 1505-1552\*, Oct 07 & 13, Bahasa Indonesia talks, music, South Sea music. (Van Arnhem-NETH/DSWCI DX-Window/Petersen-DK)

4604.9 **RRI Serui**, 0932-0940, Oct 15, pop music, but no ann. Signal was fair. (Bolland-FL/DSWCI DX-Window/Petersen-DK)

4749.96 **RRI Makassar**, 0935-0945 and 1337-1404\*, Oct 07 and 15, Qur'an to 1350, then instrumental and vocal music, short closing ann and ID. (Bolland-FL, and Wilkins-CO in DXplorer/DSWCI DX-Window/Petersen-DK)

4790 **RRI Fak Fak**, 0947-1133, Oct 04 and 10, comments in Bahasa Indonesia and pop music, Call to prayer. The Peruvian was down so far this morning. Fak Fak at a fair level. (Bolland-FL, and Wilkner-FL on River DXpedition/DSWCI DX-Window/Petersen-DK)

4920 **RRI Biak**, 1224-1400, Oct 09. Vocal music to 1230, then a long Koranic program of uninterrupted recitations; 1300 Jakarta relay, 1320 vocal music. Nice S-9 peak around 1330. No sign of Tibet or anything underneath. (Wilkins-CO/DSWCI DX-Window/Petersen-DK)

9680 **RRI Jakarta**, 0900-0934, Sep 23 (Sun), singing KGRE jingle, ID in Bahasa Indonesian (BI) for KGRE and the Indonesia Australia Language Foundation, into English with Kang Guru Radio English program #5701 presented by Kevin and Maggie, talking about SMP students and the KGRE's Joeys Club, song "Blue Sky Mine," segment "Quick Fix" about using in and on for dates, mentions KGRE has new recording studios, mostly good. Suddenly off in mid-sentence about 0909, open carrier on and off, back on at 0912:40 without the KGRE program. Pop music, mention of KGRE in BI, (explaining why they went off the air?), more pop songs, on-air phone conversation. At 1000 noted RRI ID and into the usual Ramadan/Islam program in BI. For the past two years during Ramadan I did not hear KGRE

during their usual 1000-1020 time slot (Su and We), so assumed they were completely preempted, but maybe if I had tuned in an hour earlier I could have heard them. They have an extensive website: <http://www.kangguru.org/index.htm>. (Howard-CA).

**IRAN** 3945 *VOIRI Zahedan*, 0115-0140, Sep 29, Farsi special Ramadan program with Quran recitations—not // 3985. (Petersen-DK/DSWCI DX-Window)

3985 *VOIRI, Kamalabad*, 2305-0154\*, Sep 19, 20, 21, 23 and 29, extraordinary Ramadan program of prayers, talks in Farsi about Iran and Islam, Qur'an recitations. (D'Angelo-PA and Petersen-DK/DSWCI DX-Window)

**JAPAN** 3925 *Radio Nikkei* (program 1), 0830-0900, Sep 29, "Let us read the Nikkei Weekly" with Jeffrey Swiggum, in English and Japanese, talk about Japanese support for the war in Afghanistan, segment "key words and phrases," gives vocabulary. This half hour program is sponsored by Society for Testing English Proficiency. // 6055 and 9595, all fair to good. Website <http://www.radionikkei.jp/LR/>. (Howard-CA/DSWCI DX-Window/Petersen-DK)

3945 *Radio Nikkei* (program 2), 0830-0900\*, Sep 29, easy listening songs, fair. Parallel to 6115 (strong). After sign-off noted Voice of Strait (presumed) on 6115 with Chinese programming // 7280. (Howard-CA/DSWCI DX-Window/Petersen-DK)

6055 *Radio Nikkei* (program 1), 1300, Mo Sep 24, apparent English lessons, mostly in Japanese discussing English expressions. May be the same program I heard previously with bits of English mixed in. (Hauser-OK/DSWCI DX-Window/Petersen-DK)

**LAOS** 6130 *Lao National Radio*, at 1158 UT on Oct 10. Finally some propagational hope. First log of season. Still using same sequence of programming leading up to 1200 UT. Orchestral prelude at tune-in. Gongs heard at 1200 UT followed by another orchestral theme. Lao announcements reached fair level on peaks by 1215 UT tune-out. (Jerry Strawman-IA-USA, DXplorer Oct 7/WWDXC BC-DX/Bueschel-DE)

**LIBYA** Winter B-07 of *LJBC Voice of Africa*, all via Sabrata, Libya:

|           |         |             |
|-----------|---------|-------------|
| 1200-1400 | Swahili | 17725 21695 |
| 1400-1600 | English | 17725 21695 |
| 1600-1700 | French  | 15660 17725 |
| 1700-1800 | French  | 11965 15215 |
| 1800-1900 | Hausa   | 11965 15215 |
| 1900-2000 | Hausa   | 11860 11965 |

(DX Mix-BULGARIA)

**MICRONESIA** 4755.25 *Pacific Mission Aviation* (PMA), Pohnpei, 0715-1510, Oct 05, 06, 07, 08, 09 and 10—then Off for some days and heard again Oct

15, mostly religious-sounding music, but also pop/rock music with occasional ann in English by young-sounding female, Melinda, and a male announcer from time to time, 1100 short ID sounding something like "This is Radio Pohnpei..." and "...88.5 FM The Cross music," 1135 a sermon. During the broadcast, there appeared to be numerous drops in the audio/modulation level without any change in strength. Maybe the engineer was adjusting the equipment. Not very strong and deep fades (S 2-8), but awful CODAR. In the morning also mixing with Radio Educacao Rural on 4755.

Got 2 messages from Melinda Espinosa on Guam on Oct 08 at [info@pmapacific.org](mailto:info@pmapacific.org). Both stating that she would be forwarding my reception report and recent observations on to Pohnpei. (Churchill, Valko-PA, Wilkner-FL and Wilkins in DXplorer). Also heard in Finland at 1300-2000, Oct 03 and 15, fully readable signal. Actually surprisingly well, thinking how bad the conditions were, so they may have a stronger transmitter now. They are still testing and have some off-periods. (Ritola-FINLAND/DSWCI DX-Window/Petersen-DK)

Also heard in New Zealand at 1259-1330 on Oct 07, ID at 1300 which was the only ann heard. The program consisted on continuous vocal recordings. Have tried several times for this one but this was the first time I have heard them at all. These contact details were sent to me direct from the station along with an e-mail verification for my reception:

Adrian Sainsbury explained that RNZI has been off the air a lot the last few weeks to repair antenna damage. This can only be done in the local daytime and when weather is good. Something about the antenna being 17(?) meters high, requiring the usage of an expensive huge crane. (Hauser). As I remember the masts when I saw them in Rangitaiki in 1998, they were at least 17 metres high. (Petersen-DK/DSWCI DX-Window/Petersen-DK)

**PAKISTAN** Presently the following transmitters of **Radio Pakistan (PBC)** are on air, which have been monitored by me recently in October:

API-3 Islamabad 100 KW 1968 International Broadcasts  
 API-4 Islamabad 100 KW 1974 News & Current Affairs  
 API-5 Islamabad 250 KW 1972 International Broadcasts  
 API-6 Islamabad 250 KW 1972 International Broadcast  
 API-8 Islamabad 100 KW 1979 Domestic Broadcast  
 APP-2 Rawalpindi 10 KW 1962 Domestic Broadcast [should be APR-2?—gh]  
 APP-2 Peshawar 10 KW 1960 Domestic Broadcast  
 APQ-2 Quetta 10 KW 1962 Domestic Broadcast

The rest are either dismantled, dysfunctional or there is no information about their usage.

(Aslam Javaid, Pakistan, Oct 12/DX Listening Digest/Hauser-OK)

# Saftitza 50 kW  
 (DX Mix-BULGARIA)

**SAINT HELENA Radio St. Helena** is celebrating its special **DOUBLE ANNIVERSARY** year 2007 with a very special Radio St. Helena Day 2007 world-wide shortwave broadcast.

The year 2007 marks a DOUBLE ANNIVERSARY for Radio St. Helena: the 40th anniversary of broadcasting for Radio St. Helena, and the 10th short-wave transmission anniversary.

Saturday, December 15 2007

1730-1815 New Zealand  
 1815-1900 India  
 1900-2015 Japan  
 2015-2145 Europe  
 2145-2245 North America East  
 2245-2330 North America West  
 2330-0015 South America North  
 0015-0100 South America Central/South

RSH will be transmitting on 11092.5 KHz in USB with 1000 Watts and using a 3-element monoband directional antenna. There will be a VERY SPECIAL and beautiful full-colour QSL card issued by Radio St. Helena for this special DOUBLE ANNIVERSARY shortwave transmission. The same procedures as in 2006 for reception reports, return postage, and QSLing will apply for this broadcast in 2007. Watch our web page: [www.sthelena.se/radioproject](http://www.sthelena.se/radioproject) for more information. With best greetings and wishes for good listening conditions,

(Laura Lawrence, Station Manager of Radio St. Helena/ Robert Kipp, Special Assistant to Laura Lawrence/DSWCI DX-Window/Petersen-DK)

Of note are the new direct-from-Thailand frequencies to NAm, 12095 and 15275, to supplement (or eventually replace?) Greenville and ex-Delano on

5890 kHz. A 12095 trans-polar shot to EeNoAm thru the Arctic night is particularly daring and it will be interesting to see how well it work if implemented.

1600-1800 Persian 7520 SMF, ex 16-17

(DX Mix-BULGARIA)

**Radio Free Asia's** expanded Burmese service since Sept 27, mixed with VOA Burmese expanded since Sept 26:

2300-2400 VOA on 7430 Sri Lanka, 6185 Thailand, 11980 Tinang  
0030-0230 RFA on 13820 Sri Lanka, 13865 Tinian, 17835 Saipan  
1130-1230 VOA on 11965 & 15540 Tinang, 17775 Sri Lanka  
1230-1330 RFA on 9320 Sri Lanka, 13645 Tinian  
1330-1430 RFA on 9320 & 11540 Tinian, also  
1330-1400 9455 Sri Lanka 1430-1530 VOA on 9325 Sri Lanka, 11910 Tinang, 12120 Tinian; also 1575 Thailand until 1500 weekdays, 1530 Sat & Sun.

Oct 1 begins a new USG fiscal year, and had been foreseen as the date for major cuts in VOA language services. However, at least one of them, Korean, is about to increase its SW output from 3:30 to 5 hours a day, and so is Radio Free Asia Korean, from 4 to 5 hours a day.

The two services become closely coordinated, so one can hear one or the other straight through from 1200 to 2200 UT. Note the rather late hours, not starting until 9pm local time in the DPRK, and running until 7am, presumably since listeners tune in undercover when they are supposedly sleeping!

1200-1500 VOA on 5890 & 7235 Tinian; also 1200-1300 11625 Thailand,  
1300-1500 11740 Tinang, plus MW 648 at 1300-1400 from Vladivostok  
1500-1600 RFA on 5870 Sri Lanka, 7210 Irkutsk, 11660 Sri Lanka, 11660 switching at 1530 to Saipan 1600-1700 RFA on 5870 Tinian, 11660 Sri Lanka  
1700-1800 RFA on 5870 Tinian, 7210 Sri Lanka, 11660 Saipan  
1800-1900 RFA on 5870 & 7210 Tinian, 11660 Saipan  
1900-2100 VOA on 6060 & 7125 Thailand, 9510 Tinang  
2100-2200 RFA on 7460 Ulan Bator, 9385 & 9770 Tinian, 12075 Saipan.

(Glenn Hauser-OK-USA, Sept. 30/DX Listening Digest)

**URUGUAY** Possible special activation for 6155 "**Banda Oriental**" Good news on this expected special reactivation! (Pse, see last updated info below)

The idea: The plan is coming from the "Primer Museo Viviente de la Radio y las Comunicaciones "Gral. Jose Artigas," (Radio Museum in Uruguay, created and directed by my friend Antonio Tormo, whom I give also some support to his activities) for

the coming week Oct 9-15 to join the "Semana de Sarandi del Yi." ("Sarandi del Yi Week"). Sarandi del Yi is a town at the south of the Departamento de Durazno.

Following my idea, last week M Antonio begun conversations with the owner of "Radio Sarandi del Yi," in that special transmissions could be made during that week, from their SW—6155 "Banda Oriental."

Since a couple of years, "Banda Oriental" had ceased regular one hour daily broadcast with nocturne programs towards the region, which had Uruguayan folk music and horse cross country kind of races called "Raid Hípico" on some occasions during a few daylight hours. They had said to us that the transmitter was fired on regularly now and then, for maintenance, but we haven't been able to log them.

The Museum plans to carry an exhibition on the town and there is a chance that he could be performing some kind of special broadcast thru the MW station as well as the SW.

In case these transmissions are confirmed to be carried, we will inform the sked. Those listeners reporting the station should send a reception report with two copies, one to the Museum, the other one to the radio station, in the same envelope. They will be answered with a special "Certificado de Escucha."

We hope this idea could be brought to reality. At least to revive "Banda Oriental" for a few days.

Last minute info!: I have just received an SMS from Antonio that he's departing from Montevideo to Sarandi del Yi tomorrow (Tue) at 1600 local time. They will be inaugurating the local event on Wed at local night, so this would be the (first?) day of the broadcast. He also added that he contacted the President of the local Council and said this person stayed very interested on the idea of this special broadcast in the 49mb, promising to this event all his support.

It remains to learn which will be the exact sked and if more days are expected to occur for the broadcasts. Stay tuned! 73 de (Horacio Nigro, Uruguay, Oct 8/DX Listening Digest/Hauser-OK)

Horacio, Hope this works out. To be heard beyond the local area, they need to be on the air when the big stations are off 6155 at night. Per Aoki, Austria runs from 0400 to 2208 or so. Spain at 2300-2400. So the best time would be 0000-0400 UT, and I see Banda Oriental used to operate at 0100-0300 anyway. Also maybe before local sunrise when Austria has faded out in America, like 0700-1000. Is Fides, Bolivia active on 6155? If so that needs to be avoided too; per Aoki (and may be out of date), it is off the air 0200-1000. 73, (Glenn Hauser, ibid.)

"Banda Oriental"—Bad news now...

6155 Banda Oriental...reactivation cancelled

Antonio who is in Sarandi del Yi with his radio expo with an activity focused toward school boys there, says that it's impossible to get the operation done since the transmitter is out of order and the nearby area where the transmitter site is, is under flood.

He adds that some time in the future it could be possible, and they will advise him. I cross fingers...and in some way I'm sad this project failed. Anyways, I believe that it has a positive aspect, for the station owner can think there is some interest to get their SW on. (Horacio Nigro, Montevideo, Oct 11/DX Listening Digest/Hauser-OK) [damn! -ed.]

**RICHARD E. WOOD** I was saddened to hear of the passing of Richard E. Wood of Hawaii. Although I never had the good fortune of meeting Richard, I remember his formidable contributions to the hobby. He married his love of linguistics to his love of radio (BCB, FM and shortwave), and in the process shared his knowledge with the DX community around the world. Nowadays it's simple to propagate one's contributions to all corners via the internet...Richard did it the hard way, with a typewriter, a radio, and a lot of postage stamps. I know somewhere in my attic are a number of Richard Wood articles buried in various old DX bulletins. Over the holidays, I'll try to scan a few of them and make them available online. try to scan a few of them and make them available online. [ed.] 

**LISTENERS NOTEBOOK EXTRA** *Because Al can't leave well enough alone, two extra pages of the latest schedule information. Sorry this isn't incorporated into the main column; didn't have time.-rb*

# Pirate Radio Report

Chris Lobdell • P.O. Box 146 • Stoneham, MA 02180-0146 • clobdell@comcast.net

---

Hello and welcome to the combined October-November *Pirate Radio Report*. Sorry about missing last month's column but I mistakenly emailed it to the incorrect address!

Don't forget to send in all those *Halloween* loggings for our next column. My new email address is clobdell@verizon.net.

Many thanks to the following fine folks for their contributions: Brian Alexander-PA, Scott Barbour-NH, Rich D'Angelo-PA, Gerry Dexter-WI, Mark Taylor-MI, Joe Wood-TN, George Zeller-OH.

**Captain Morgan**, heard on 6924.8 kHz from 0107-0124 UTC on September 3<sup>rd</sup>. Rock and blues, "Twilight Zone" Theme, off 0124. No ID, but format and use of "Twilight Zone" theme at s/off would make Captain Morgan likely. [Taylor-WI]

**Good Evening Radio**, logged September 20<sup>th</sup> from 2201 to 2225 UTC on 6925 kHz USB. Classical piano music, Mr. Good Evening with ID and talk, another short classical piano piece, 2205 "Good evening", more classical piano music, claimed to be working only 25 watts, off about 2225. Good in noisy conditions. [Taylor-WI]

**KIPM**, noted on 6925 USB from 2157-2217 UTC sign off. On September 28<sup>th</sup>. Odd program for this station. Odd rant by OM who discusses how to be larger than life. One is to inflate yourself with helium, and another is to eat too much. Various instrumental mx during program. Virtually begs listeners to send in reports, and gave Lula address that I believe has not been valid for a long time at P.O. Box 24, Lula, GA 30554. Offers premiums along with QSLs, including a KIPM program guide, a Tom Thumb Radio that fits in your pocket, and a parabolic dish antenna for the Tom Thumb Radio. OM tears his shirt and pants to get attention, and

puts an "attitude bag" on his head. Took a bad fade at 2211, and poor copy thereafter. Several KIPM IDs despite not matching that station's usual format, but at 2217 also mentioned R. ? where I could not make out the ?. [Zeller-OH]

**Laser Hot Hits**, a relay by North American pirate, was logged on 6925 kHz from 2215-2230 on September 1<sup>st</sup>. Dance club music with OM DJ. Ads for T-shirts and a British SW publication. Lost signal without any close down announcements or relay ID. Fair. [Wood-TN]

**Long Range Radio**, logged on 6925 USB from 0107 to 0154 sign off on September 1<sup>st</sup>. Program of rock, pop, and novelty tunes w/ OM announcer. Also some comedy sketches, consisting of two comics discussing various issues and laughing at each others' jokes. Several IDs, but no address announced. [Zeller-OH]

**Mac Radio**, noted on 6850.9 kHz, from 1735-1800 UTC, On October 13<sup>th</sup> with pop music. IDs. Yahoo.com e-mail address. Good. [Alexander-PA]

**Northwoods Radio**, logged on 6925, kHz from 0017-0032 UTC, September 23. Hard rock/pop music re-mixes; very creative. OM with loon call, ID and shout out to all at the FRN. Gave an e-mail address that I couldn't fully copy. Off at 0032 with loons, "North Woods Radio, broadcasting freedom from the Great Lakes" and short CW bit. Fair/good. [Barbour-NH]

**Possum Hunting Radio**, noted on 6925 USB at 2013 UTC on October 20<sup>th</sup>. Someone playing around with Halloween type screams, weird sound effects. Cutting out every few seconds. Into semi-regular talking about 2040, 2052 a rather delicate bell-like effect as if an interval signal, frequent dead air

and misc. noise. Then a rare copied item "Your time has been pressed into a tube, "whistles, low rumbles, woman moaning and laughing. 2111 "Radio, you understand.. This is ..radio" and suddenly a clear mention of "This is Possum Hunter Radio" and many, many "ya understand?" and one of my all time favorites on the Stupid Hit Parade: "You know what I mean?" [Dexter-WI]

**Radio Jamba International**, noted on 6925 USB, at 1928 UTC, on October 13<sup>th</sup>. ID, fake ads. Talk about liquid heroin. Fair. [Alexander-PA] This station sometimes also IDs as Kracker Radio and The Bowling League, just to make things interesting.

**Radio Free Speech**, noted on 6925 USB mode from 1733-1801 sign off on October 21<sup>st</sup>. Bill O. Rights w/ad for Iraq Chiropractic Center. Mailbag segment. Replay of a trucker sketch from R. Free America, which Bill O. Rights identifies as a predecessor stn to R Free Speech. Remarks by station editorial director Earl Pitts. USA NA by band at close. [Zeller-OH].

**Radio Paisano**, another new one, heard on 6925 AM from 2018-2048 UTC on October 7<sup>th</sup>. Italian cowboy song and other Italian tunes similar to 1254 10/6 program. A male comic with crowd laughter. Anthem at close, and gave radiopaisano@gmail.com addr. [Zeller-OH]

**Random Radio**, noted on 6925 USB from 0242-0248 sign off on September 8<sup>th</sup>. First log of this station. OM with mentions that this was a repeat broadcast. Recording of President Lyndon Johnson's speech on not seeking a second full term. Theme from "Bonanza," and Johnny Cash's "Ring of Fire." Announcer mentioned that he would QSL via the FRN.net. ID and off at 0248. Good. [Wood-TN].

**Reflections Europe**, a quasi-pirate Christian programmed station in Ireland was noted on 6295 kHz AM mode from 2227-2246 UTC fade out on October 14<sup>th</sup>. Woman with

religious vocal followed by a man with religious talk. Poor at best but mainly threshold until faded. [D'Angelo-PA]

**The Crystal Ship** was heard operating down on 90 meters on 3274.6 kHz at 0411 UTC. Man with political talk in English with ID mentioning the "Blue States Republic." Poor. [D'Angelo-PA]

**Undercover Radio**, heard on 6925 USB from 2210-2235 sign off on September 1<sup>st</sup>. Dr. Benway with an announced Labor Day weekend broadcast. Mostly a program of rock mx. Merlin address. [Zeller-OH]

**We Monkey Radio**, an apparent new one was heard from 1915-1923 UTC sign off on October 14<sup>th</sup>. ID as "WMR-We Monkey Radio". Short songs. Fair-good. [Alexander-PA]

**WBNY**, the most active North American pirate by far, was logged on 6950 USB, from 2355 to 0016 UTC on Sept 22<sup>nd</sup>. Musical selections re Commander Bunny and monkeyboys sung to the tune of various oldies. Commander Bunny/Kracker for President in 2008 with endorsements from various pirate ops. Call to check tire pressure, stop picking ones nose and touching oneself at s/off. Fair. [Barbour-NH]

**Weekend Music Radio**, The Scottish pirate operated by Jack Russel was logged on 6400.07 kHz from 2118-2135 UTC on September 23<sup>rd</sup>. Pop music, IDs. Weather. Weak but readable. [Alexander-PA]

**Wolverine Radio**, logged on 6925 USB from 0107-0157 on September 1<sup>st</sup>. "I shot the sheriff" parody, comedy skits (including one about artificial insemination) and songs (including a song to the pancreas), ID, off 0157. Good. [Taylor-WI]

Happy Pirate DX!

PUBLIC RADIO OF ARMENIA  
"Voice of Armenia"

Alex Manoogian street 5, Yerevan 25, Republic of Armenia  
Fax (374 1) 584 600, Tel: (374 1) 570970, 554761, 552650

Mr./Mrs. Richard A. D'Angelo

Dear Friend,

We read with pleasure your letter addressed to our Editorial, on the programmes being broadcasted from Yerevan. We have reflected to your letter during the "Our Mailbox" programme.

Thank you for your attention and interest shown towards our station.  
We are glad that you are listening to the "Voice of Armenia".

We are hopeful that our programmes would help you get better familiarized with the history of the Armenian people, the domestic and foreign policy of Armenia.

We are waiting to receive new letters from you.

Dear Friend, we are sending you our complete programme-schedule as well as the QSL card, with delight.

Our entire staff warmly greets you, wishing good health, happiness and all the best.

Yours truly,

Armen Amirian

General Director

Until next month...73's

## Company Store

Jim Strader KB1KYW • 74 Miller St. • Middleborough, MA 02346-3216 • jimstrader@msn.com

---

Hello everyone, are you missing the sunspots as much as I am? The 2008 *Passport to World Band Radio* is now being shipped and The Company Store is offering this valuable reference to our members for \$18.90 plus \$4.60 priority mail to US addresses.

I am pleased to announce that The Company Store is now stocking the *World QSL Book*, 1st edition, by Gayle Van Horn, W4GVH. This is an outstanding eBook on CD that covers every aspect of QSLing. The *World QSL Book* is published in Adobe Acrobat (PDF) electronic format and is fully searchable and printable. This self-loading, easy-to-use reference begins with a comprehensive tutorial on how to QSL (verify) radio stations followed by address sections for broadcaster and utility stations. The Company Store is offering this eBook to our members for \$18.00 plus \$3.00 shipping and handling US (\$6.00 Can).

That's it for this month and hopefully the sun will become more active over the next few months so we can all enjoy some quality DX.

Peace and Good DX, Jim Strader

# Tropical Band Loggings

Dan Ferguson • 4205 Friendfield Trace • Little River, SC 29566 • troplogs@zerobeat.org

- 2310 **AUSTRALIA VL8A** Alice Springs 1245-1255 talk by woman on Islam; poor 10/14. (Johnson-NV) 1035-1050 talk, pop mx; // 2325, 2485 - all very weak; 9/28. - 3329.6 **PERU Ondas del Huallaga** Huánuco at 1107-1110 with very poor signal in lsb; 10/4. (Wilkner-FL River DXPedition)
- 3335 **PNG R. East Sepik** Kieta 1211-1235 in Tok Pisin; M talking rapidly & emphatically through bottom of hour; f/o started 1225 and was out at 1230. The only thing over 500 miles away in the band. 9/30. (Taylor-WI) 1218 M preaching in Tok Pisin; CHU splatter 9/23. Also 1151 local pops; fair 9/30. (Brown-MO)
- 3340 **HONDURAS HRMI** 0406 SS, modern Christian music. Canned ID at 0412; fair 10/6. (Wood-TN) 3339.96, 0935-0950 SS pops, ballads, rel mx; "Radio MI" ID 0937 & 0948; fair 10/6. (Alexander-PA) 3339.98, 0555-0625 SS rel mx, "Radio MI" ID 0603; SS rel talk w/ EE translations at 0620; fair 9/28. (Alexander-PA)
- 3345 **S.AFRICA Channel Africa** 0425 rooster, cow noises, M welcome in EE, into phone interviews; 9/30. (Brown-MO)
- 3350 **COSTA RICA REE** Carari 0512-0600 W in SS talk, several articles, music, ID, off 0601; fair 9/20. (Taylor-WI) 0425 M&W in SS w/variety pgm; pips 0430; 9/30. (Brown-MO)
- 3395.04 **INDONESIA RRI Kendari** 1318 talk program 1338; poor 10/6. (Herr-CA)
- 3905 **PNG R. New Ireland** 1125-1300 M&W in discussion, I believe in EE; several C&W in EE; s/off with anthem 1300; poor 10/6. (Herr-CA)
- 3925 **JAPAN R. Nikkei** 0830-0900 "Let's Read The Nikkei Weekly" with Jeffrey Swiggum, in EE & JJ; talk about JJ support for the war in Afghanistan, segment "key words and phrases", gives vocabulary. This half hour program is sponsored by Society for Testing EE Proficiency. // 6055 & 9595, all fair to good. 9/29. (Howard-CA) 1231 in JJ; W w/ fairly long talk, ham QRM; 9/29. (Taylor-WI)
- 3945 **JAPAN R. Nikkei** 0830-0900\* EZL songs, fair; // 6115 strong. After s/off noted Voice of Strait (presumed) on 6115 with Chinese programming // 7280. 9/29. (Howard-CA)
- 3976.06 **INDONESIA RRI Pontianak** 1155 mx & talk in Indo; poor 10/6. (Herr-CA)
- 3985 **CLANDESTINE (S.KOREA) Echos of Hope** 1305 alternating M&W in KK; heavy ham & probably jamming interference; poor 10/6. (Herr-CA)

- 3985 **IRAN VOIRI** Kalamabad 2257-2355+ lite instl mx, talk in unid language 2300, Koran at 2302; talk, lcl mx; reception varied from poor to good depending upon the amount of HAM QRM. 9/29. (Alexander-PA) 0045-0154\* apparent special Ramadan program with Koran recitations, Farsi language talks and short music selections. Fair but interrupted by an amateur net at 0100 that lasted 15 minutes. 9/29. (D'Angelo-PA) 0115-0135\* talk in unid language. Local music. Koran. National Anthem at 0130 followed by Koran, talk & off at 0135. Poor to fair with occasional HAM QRM, 10/12. (Alexander-PA)
- 3987 **INDONESIA RRI Manokwari** 1255 best level ever heard here but still too much rain storm static for many details. Apparent anmt & theme mx 1300. Ham whistling and het from tune-up ended this log. Nikkei 3925 absent at this time. 10/14. (Strawman-IA)
- 4052.5 **GUATAMALA R. Verdad** 0402-0420 W SS ancw w/marimba mx, 0410 ID in passing; 10/11. (Taylor-WI) 1138 rel vocals at fair level in rain static; 10/13. (Strawman-IA) 1106-1114 in SS with M ancw, vocals 7 organ mx, possibly rel, ID by W; quite strong 10/1. (Parker-PA) 0415 M SS ID & inspirational talk over organ music; fair 10/6. (Wood-TN)
- 4394.5u **SPAIN Onda Cero Radio; noted** 2350 to 0030 per log by Mauricio Molano Sánchez in HCDX. (Wilkner-FL) 0227-0245 SS banter b/w ancw at what appeared to be a live event. Tx is presumed to be via military txmitter for SS troops abroad. Thanks Molano and Wilkner tip; fair 10/15. (Barbour-NH)
- 4604.94 **INDONESIA RRI Serui** 1343 sounds //3995.04; poor 10/6. (Herr-CA) 4605, pop tune "Wind of Change"; very good audio; fair 9/23. (Brown-MO)
- 4716.6 **BOLIVIA R. Yura Yura** 1000 usual man and woman with ID's, pleasant audio for Bolivian music. 10/4. (Wilkner-FL River DXpedition) 4716.62, noted return to air at 0940 with usual excellent flute music and om and yl IDs, this off for about 48 hours possibly due to transmitter issues? 10/15. Previously reported 0040 to 0045 carrier on 13 October but no audio, carrier disappeared. R.Yura provides most excellent CP programming with excellent signal in South Florida. (Wilkner-FL)
- 4732.06 **BOLIVIA R. Universitaria** Cobiji 0040-0120 SS pop mx; some Bolivian style pop mx; talk, IS; P-F in noisy conditions, 10/13. (Alexander-PA) Exc at 2300. (Wilkner-FL)
- 4746.8 **PERU R. Huanta 2000** 1009-1026 M SS talk, ID, ad strings; hosting program of OA vocals; poor with severe CODAR QRM 10/21. (D'Angelo-PA)
- 4749.96 **INDONESIA RRI Makassar**, 1340 M with call-in show; good 10/14. (Johnson-NV) 1348 Indo pop music; fair 10/6. (Herr-CA) 4750, 1307 ME vocals by W; fair 9/23. (Brown-MO)
- 4755.25 **MICRONESIA Pacific Mission Aviation "The Cross"** Pohnpei (T) 1232 Christian pop mx, ID 1241 EE "Hi this Malvia(?) you are listening to Pacific ---Aviation" followed by M preaching the Gospel in EE; P-F. (Herr-CA) 1120-1152 a "me too log"; M w/EE sermon at fair but consistent level, after local sunrise. Picked out only a few words here and there, mention of "Jesus Christ" twice. 1158 music as was fading out totally. 10/8. (Wilkner-FL) (T), carrier noted at 0845 to 0900 but did not recheck. 10/15. (Wilkner-FL)
- 4760 **INDIA AIR** 1230-1300 SC vocals; fluttery threshold signal; couldn't make out language, which would tell the site. 9/23. (Brown-MO)
- 4762.49 **CANADA R. Nederland** via Sackville 2345-2357\* another Sackville sub-harmonic with a fair signal. Talk in listed Dutch. ID. 1/2 x 9524.98; 10/18. (Alexander-PA) 4762.5, 2334-2357\* Dutch program featuring multiple IDs and features about the country. Poor to fair with fundamental at threshold level. Sub-harmonic from leaky Sackville facility. 10/16. (D'Angelo-PA)
- 4770 **NIGERIA R. Nigeria** Kaduna 0503 M w/regional news in EE, ID 0513, into Afro-pop mx; still vocals 0520; into talk 0522; fair 10/1. (Ronda-OK) \*0428-0437 OC, choral NA 0430; M ID & EE talk; P-F but seemed to be rapidly deteriorating, 10/13. (D'Angelo-PA)
- 4774 **SWAZILAND TWR** 0346-0355\* choir vocals, M preaching in listed Lomwe language; after another selection of choir vocals another M gave ID and closedown anmts, then IS; fair 10/3. (D'Angelo-PA)
- 4777 **GABON R. Gabon** 0459, 10/21/07. Just opening. Weak, and tormented by CODAR. (Dexter-WI) 0501-0510 M FF nx; segments from additional reporters; the only African station heard with a decent signal tonight, fair 10/17. (Evans-TN) \*0457-0533 OC, orchestral NA, W FF ID & anmts; fast talking M introduced a W conducting an interview with a M by telephone; no sign of usual news at opening; highlife vocals program from 0510; F-G 9/29. (D'Angelo-PA) \*0543-0600 s/ on w/ short fanfare & opening FF anmts w/ IDs; possible news headlines; Afro-pop mx 0545; fair 10/6. (Alexander-PA)

- 4780 **DJIBOUTI R. Djibouti** 2050-2101\* AA talk, s/off w/ NA; poor, weak in noisy conditions 10/20. (Alexander-PA) 2105-2200\* vernacular talk, phone talk, Horn of Africa mx; s/off w/NA; very weak at tune-in but slowly improved to a fair level by sign off, 10/7. (Alexander-PA) 2153-2202\* vernacular/AA, local mxw/ W b/w selections; s/off anmts 2159, NA s/off; fair 10/1. (Barbour-NH) 2158-2201\* M AA sounding lang, presumed NA and off 2201\*; poor 10/9. (Kohlbrener-PA)
- 4780 **GUATEMALA R. Cultural Coatan** 0145-0210 in SS with M anc, slow songs, wedding march, ID at ToH, over instrumental %London Bridge" ditty; exc and QRM free in USB, 9/26. (Parker-PA) \*1028-1047 OC till choral NA 1030; M SS ID, freq anmts & opening, then instl mx; several IDs & a TC, then by vocals; fair with some CODAR QRM 10/21. (D'Angelo-PA) 0054-0103 rustic vocal; M anc w/canned ID & SS anmts 0057; after a short talk over mx there was another series of quick anmts before mx pgm; fair with intermittent RTTY QRM 10/4. (D'Angelo-PA) 1235 EZL vocals, M in SS; fair 9/23. (Brown-MO)
- 4790 **INDONESIA RRI Fak-Fak** 1133 M with call to prayer. Peruvian had faded out. this in lsb no lock. 10/4. (Wilkner-FL River DXPedition)
- 4790 **PERU R. Vision** 0431 rel singing; weak, 60 meters nearly completely dead - even CODAR was down; 10/19. (Dexter-WI) 1057 rel songs; SS ID 1058; fair 10/13. (Ronda-OK) 4790.15, 0725-0805 M SS Bible teaching (not obviously before a live audience), 0754 music bridge, diff. M w/ apparent anmts; 0755 W joins him (testimonial?), 0800 ToH anmts ID, 0802 Andean mx; signal fair, CODAR QRM made signal poor, 10/9. Also 0053+ music; also fair signal, severe CODAR QRM, 10/13. (Taylor-WI)
- 4790.04 **INDONESIA RRI Fak Fak** 1400 M anc & Island music; good 10/6. (Herr-CA)
- 4796.4 **BOLIVIA R. Mallku** Uyuni 0930 W, good signal with good audio. 10/4. (Wilkner-FL River DXPedition)
- 4800 **GUATEMALA R. Buenas Nuevas** 0220-0230 M SS anc, children's mx, call-ins from small children; very loud 9/22. (Parker-PA) 1241 SS rel pgm; good but CODAR 9/23. (Brown-MO)
- 4805 **BRAZIL R. Difusora do Amazonas** Manaus 0056 vocals; extremely weak and suffering CODAR, QRM and general noisy band conditions; 9/30. (Dexter-WI) 2145-2350 in PP with M and W talks and listeners calling in; punching through CODAR nicely; good 10/3. (Parker-PA)
- 4811.5 **BRAZIL R. Difusora** Londrina 0003-0010 M in PP, poss ID 0003; good but CODAR QRM. (Parker-PA)
- 4812.49 **CANADA CBC** Sackville \*1100-1110+ FF talk; thanks to Dave Valko tip; good signal; Sub-harmonic of 9624.98; 1/2 x 9624.98; the 4 MHz frequency was actually stronger than the 9 MHz frequency; 10/19. (Alexander-PA) 4812.5, 2316-0005 EE service with letters & magazine features; nx 0000; nice signal but CODAR splash; sub-harmonic heard // to 9625 fundamental channel; another leaky Sackville operation. 10/14. (D'Angelo-PA)
- 4814.99 **ECUADOR R. El Buen Pastor** Saraguro 0135-0200 SS rel talk & mx; tentative; poor with strong CODAR QRM & weak co-channel QRM possibly from Brazil's R.Difusora; 10/12. (Alexander-PA) 4815, 0225 presumed rel pgm; het from presumed Londrina, 9/28. (Dexter-WI) 4815, 0250-0302\* M&W SS ancrs, ments of "Estados Unidos", jingles & ID followed by a few notes of guitar mx before off at 0302; good 9/27. (Parker-PA)
- 4825 **BRAZIL R. Canção Nova** Cachoeira Paulista 0025 in PP with M giving long impassioned speech (either religious or political), ID jingle at 0025. F-G despite CODAR 10/3. (Parker-PA)
- 4828 **ZIMBABWER. Zimbabwe** (P) 0414-0509 continuous music mostly local/regional stuff; interesting to listen to but no announcements; P-F 9/27. (D'Angelo-PA) 0316 mx, weak 9/26. (Parker-PA) 0336 vernacular; very tentative with reggae type music; poor 9/21. (Wood-TN)
- 4840 **INDIA AIR Mumbai** 0045+ vernacular; W w/talk poking thru noise floor, not much to work with; signal improving at 0100 recheck; P-F 10/16. (Barbour-NH)
- 4845 **MAURITANIA R. Mauritanie** 0228 in presumed Vern. M w/phone-ins, MX and prayers. ID at 0407, more talk; fair 9/21. (Ervine-TX) 0231 good signal but modulation was way down, 9/28. (Dexter-WI) 0255-0306 M AA talk, segment of instl mx, then another M w/Koran recitation; good signal and presumably on late for Ramadan, 9/20. (D'Angelo-PA) 0322-0330 in AA with M anc speaking very slowly and deliberately, similar to VOAs %Special EE% bcsts; strong 9/26. (Parker-PA) 0415 AA two M with discussions of Koran; good 9/21. (Wood-TN) (P), 0420-0432 M in AA, bouncy Western sounding song, AA style mx; still on 24 hours for Ramadan. (Taylor-WI) 0443-0446 pleasant local vocals, AA anmts byW; good but watery 9/30. (Brown-MO)
- 4845.2 **BRAZIL R. Cultural Ondas Tropicales** 0005-0048 M PP talk, choir vcls; seeming rel talk followed; fair in noisy conditions and audible with Ramadan over; no Mauritania; 10/17. (D'Angelo-PA)
- 4860 **INDIA AIR Delhi** 0057-0105 vernacular; Hindi mx at t/in, ID 0100, right back to music; poor/choppy 10/16. (Barbour-NH)
