North American Shortwave Association — America's Shortwave Broadcast Club

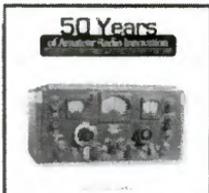

Fall Book Sale 2008

PASSPORT TO WORLD BAND RADIO 2009
 By Larry Magne. A *must have* book for every worldband listener. Here is everything you need to know about when and where to hear the world; hour by hour, country by country and frequency by frequency. Also includes candid, hard hitting reviews on worldband radios including portables and tabletop models. An expanded station address section is also featured. *Passport* is the world's number one selling shortwave guide. An indispensable reference with 528 pages!
New 2009 Edition

Save over \$4!

Order #1009\$29.95 \$18.90

50 YEARS OF AMATEUR RADIO INNOVATION 1930-1980
 By Joe Veras, K9OCO. This guided tour of more than 400 legendary radios from 1930 to 1980, depicts the Golden Age of American radio technology. Each truly beautiful photograph by Joe Veras, K9OCO, includes a brief description, the year the radio was introduced and its selling price at the time. Many of the radios and accessories are quite rare, others are sure to bring fond memories. ©2008 A.R.R.L. 128 p.
 Order #3269\$39.95

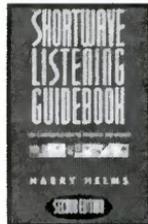

Companion CD with more photos & info.
 Order #1443\$19.95

KING OF THE SATELLITES SIX FIVE O
 By Thomas Balzer. Clearly the famous 650, was the "king" of the Satellite line. Author Balzer, draws from his sources in Germany to cover this famous receiver. Over 100 pictures are featured in this 80 page book. Learn about variants, production numbers, disassembly, adjustments, bulb replacement and much more. The Owner's Manual and circuit schematic are also fully reproduced. A great reference for anyone lucky enough to own a 650.
 Order #0650\$19.95

ZENITH TRANS-OCEANIC THE ROYALTY OF RADIOS
 By J. Bryant & H. Cones. Here is the untold story of the world's most romantic and expensive series of portable radios. With a wealth of photographs, ads and documents, the authors tell the engrossing story of the 40 year history of this famous line of radios. Expanded Second Edition. ©2008 Schiltner. 176 p. List \$34.95.
 Order #5144\$29.95

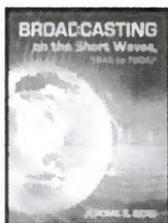

SHORTWAVE LISTENING GUIDEBOOK
 By Harry Helms. Here is understandable information on: selecting and operating a shortwave receiver, antennas, time stations, pirates and much more. With informative tables and diagrams. This noted author gives you a solid understanding of shortwave radio. ©1993 Second Edition 321 p.
 Order #2984\$49.95 \$17.90

WORLD RADIO TV HANDBOOK 2009
 This long established publication is filled with schedules, frequencies, addresses of shortwave broadcast stations. Organized primarily by country. Also includes a by-frequency listing of shortwave broadcast stations, radio club info., plus receiver reviews. WRTH Pub. 2009 63rd Edition.
 Order #3009\$34.95 \$29.90

WORLDWIDE LISTENING GUIDE
 By J. Figliozzi. Modeled on the author's popular *Worldwide Shortwave Listening Guide*, this new book covers all of today's formats: live on-demand, podcast, satellite, Internet, digital, analog, AM, FM, shortwave and wi-fi. A comprehensive guide to what can be heard how, where and when! Spiral bound. 112 p. ©2008.
 Order #0275\$24.95

BROADCASTING ON THE SHORTWAVES 1945 TO TODAY
 By Jerome S. Berg. The heart of the book, *Shortwave Year-by-Year* is a detailed account of the shortwave bands in each year from 1945 to present. It reviews what American listeners were hearing on the shortwave bands, describes the arrival and departure of stations, and recounts important shortwave events. ©2008 McFarland 384 p. List \$65.00.
 Order #2549\$59.95

LISTENING ON THE SHORTWAVES 1945 TO TODAY
 By Jerome S. Berg. Written from the standpoint of the serious shortwave enthusiast, this book examines the histories of the major North American shortwave clubs, DX programs, a chronology of the shortwave receivers, how receiver technology impacted listening plus PCs and shortwave listening. ©2006 McFarland 424 p. List price \$65.00.
 Order #1651\$59.95

2009 ARRL HANDBOOK FOR RADIO COMMUNICATIONS
 This massive 2-inch thick volume is the ultimate reference book for hams and techs. For all skill levels. With CD's. 86th Ed. ©2008. A.R.R.L. Softcover 1200 p. List \$44.95.
 Order #5187\$99.95 \$34.90

2008 ARRL HANDBOOK FOR RADIO COMMUNICATIONS
 The 2008 85th Ed. with CD. Closed cover.
 Order #5024\$44.95 \$22.98

DISCOVER DXING! HOW TO HEAR DISTANT AM, FM & TV STATIONS
 By J. Zondlo. A great intro to DXing the AM, FM and TV bands. Topics include: propagation, seasonal conditions, equipment, antennas and reference materials. Third Ed. ©2006 Universal Radio. 96 p.
 Order #0009\$6.95

UNIVERSAL CATALOG 08-08
 This informative, new 124 page catalog was printed October 2008. It features a wide assortment of items for the shortwave, amateur and scanner radio hobbyists. It is not being sent out automatically, so request your **FREE** copy by phone or email today!

www.universal-radio.com
 Guaranteed lowest prices on the web?

Not always. But we **DO** guarantee that you will find our website the most informative. Please stop by for a look. We offer a wide selection of new and used shortwave equipment, antennas and books.

*** U.S.A. flat-rate shipping: Under \$50-\$5.95, \$50-\$100-\$7.95, \$100-\$500-\$9.95, \$500-\$1000-\$14.95. Except Alaska, Hawaii and Puerto Rico.

Happy New Year everyone... welcome to 2009 and hopefully an outstanding year of DX activity as the sunspot count begins to rise. It looks like Santa was good to **Scott Barbour**. Read about Scott's new receiver, a Ten-Tec RX-350D. Did you get a new piece of equipment recently? How about sharing your thoughts about it with the rest of the club through the *Musings* column?

It is that time of the year once again. Besides trying to keep one or two of the less painful New Year's resolutions you foolishly made during the holidays, you should also be looking into your trek to Kulpsville for the 22nd Annual Winter SWL Festival sponsored by NASWA. Co-hosted by **Rich Cuff** and **John Figliozzi**, this is North America's premier radio gathering. You will not want to miss it. Rich and John have given me a sneak preview into what is in store for this year so I know this will be a banner gathering for sure. Mark your calendar for March 13 and 14, 2009 for this club sponsored event. The FESTmeisters — Rich Cuff and John Figliozzi — invite one and all to attend. Keep watching the pages of the Journal for updates as the event inches ever so close. I hope to see you in Kulpsville in two months!

The European DX Council (EDXC), the umbrella organization of shortwave clubs in Europe, invites everyone to the next EDXC Conference, August 28-30, 2009, in Dublin, Ireland. The venue of the Conference is the Grand Canal Hotel, Grand Canal Street, Ballsbridge, Dublin 4, Ireland. Phone : + 353 1 646 1000. Fax: + 353 1 646 1001. E-Mail: reservations@grandcanalhotel.com. Home-page: www.grandcanalhotel.com. This is a 3 three star hotel. Prices for a single room is €115,-- / room and night, double-room €115,--/room and night. If sharing the Double-room you only pay €57,50 per

person. This hotel accepts the following credit cards: VISA, Master Card, American Express and Diners Card. The organizers ask that you make your hotel reservations now to assure availability. The special password for this reservation: EDXC CONFERENCE 2009. The Irish DX Club, Edward Dunne and the EDXC, Tibor Szilagyi are working on the program of the Conference. Here is what they already have planned: interesting lectures about our hobby, sightseeing tour in Dublin by bus with English speaking guide and a visit at the Ye Olde Hurdy-Gurdy Museum of Vintage Radio in Howth, Dublin North. The traditional Banquet Dinner will take place at the Conference Hotel on Saturday evening, August 29. Further information about the program will be available at a later date. The conference fee is €115 per person, which includes use of the Conference Room, relevant papers, name tags, lunch on Saturday, sightseeing tour of Dublin, a visit to the Museum of Vintage Radio. Furthermore the Conference Fee includes the banquet dinner. What you consume as drinks during the banquet dinner, you will pay extra to the hotel staff. For further information you may contact: **Tibor Szilagyi**, Sweden. Phone: +46 8 500 264 83. E-mail: tiszi2035@yahoo.com and **Edward Dunne**, Ireland: E-mail: edunne@iol.ie, website: edxc2009@live.ie.

AJ Janitschek tells us that Radio Free Asia (RFA) is happy to announce its 26th QSL card commemorating the holiday season RFA recently announced its new QSL card which promotes world peace. The design is from one of the many holiday cards RFA has used in the past. Besides the dove as the card's center piece, there are eight different renditions of the word 'peace' on the right margin. The eight versions represent each of RFAs broadcast languages: Burmese, Chinese (Mandarin and Cantonese), Khmer, Korean, Lao, Tibetan, Uyghur and Vietnamese. The

Our Motto: Unity & Friendship

card will be used to confirm all valid reception reports for December 1, 2008 — January 31, 2009. RFA encourages listeners to submit reception reports. Reception reports are valuable to RFA as they help us evaluate the signal strength and quality of our transmissions. RFA confirms all accurate reception reports by mailing a QSL card to the listener. RFA welcomes all reception report submissions at www.techweb.rfa.org (follow the QSL REPORTS link) not only from DXers, but also from its general listening audience. Reception reports are also accepted by emails to qsl@rfa.org, and for anyone without Internet access, reception reports can be mailed to: Reception Reports, Radio Free Asia, 2025 M. Street NW, Suite 300, Washington DC 20036, United States of America. Upon request, RFA will also send a copy of the current broadcast schedule and a station sticker.

NASWA members have been in the news. On page 3 of the 21 November 2009 *St. Helena Herald* (<http://www.news.co.sh/Newspapers/SHH%2021.11.08.pdf>) an article by Gary Walters, the Station Manager of Radio St Helena, discussed the 2008 annual transmission on shortwave. The article mentions two of our members and includes a picture of **Steve Price** holding his son, Noah, and a letter from **Dan Robinson** ("from the prestigious Voice of America by Dan Robinson"). Steve and Dan's reactions are in this month's *Musings* column.

Via the *DX Window* publication of the Danish Shortwave Club International, we learn of the availability of the Rhein-Main-Radio-Club of Frankfurt, Germany — a leading German DX club for 30 years — offering the 4th edition of the unique QSL Calendar 2009. The full color art print calendar offers treasures from their historical QSL archives, covering QSL cards from the 1930's to present. The calendar is in English and costs 15 Euro or US\$20.00 including shipping worldwide. The new QSL calendar is now available. The calendar is rare, unique and a special gift to radio friends. The QSL calendar is a non-profit project supporting distance radio listening. You can order direct from **Harald RMRC Gabler**, Limburger Strasse 3, 61462 Königstein, Germany or at the club's homepage www.rmrc.de.

The Radio Heritage Foundation <www.radioheritage.net> is home to the *Pacific Asian Log AM Radio Guide* that covers the region. The latest edition is now fully updated and available for free from their website. Produced by **Bruce Portzer** in Seattle WA, this extensive radio guide covers literally thousands of AM radio stations and is hosted by the Radio Heritage Foundation. It draws on monitoring by many volunteers across the region, as well as information directly from broadcasters so it's accurate and up to date. You can search the database or download a pdf version for your own non-commercial use by visiting www.radioheritage.net/PAL_search.asp today. The Pacific Asian Log traces its origins back to radio station call lists first published in New Zealand during the 1930s, and is volunteer supported and produced as a free service for everyone. The Radio Heritage Foundation is a registered non-profit organization connecting radio heritage and popular culture across the Pacific.

The Reading Area DXers paid tribute to a fallen colleague, **Dr. Mark Ferrioli**, at its December 19th meeting at The Flying Dog. Mark's passing the day of our November meeting was a shock to all of us. Like so many of our club members, he was a quiet guy but he really stepped up to the plate in recent years making a big contribution. He will be missed as a friend as well as a fellow radio colleague. On a happier note, the Reading Area DXers are now meeting on the 4th Friday of the month through October. If you are within an hour or so from our home base, you may want to attend one of our gatherings. All are welcome!

The shortwave radio world keeps changing and so do approaches in providing news and information relevant to the shortwave listener. The Ontario DX Association (ODXA), a long time trend setter in the shortwave radio hobby, is planning a major change in the delivery of DX news and information normally contained in its monthly *Listening In* bulletin. In his December "Sign On" column, **Harold Sellers** informed the membership that he and his wife anticipate moving to British Columbia during the summer of 2009 to be closer to family. Although he plans to continue his editing chores for the club,

Harold mentioned "Next June we plan to shift most of *Listening In* to our website. You will retrieve your monthly magazine from the internet. Thus subscription fees will be phased out. However, some content will continue to be available by mail." More information will be available in subsequent months but it seems the traditional "membership" model utilized by the ODXA may no longer exist after the change over.

Once again the *Flashsheet* is experiencing some problems with its distribution list. The following people are not receiving their *Flashsheet* as far as I know since I get messages to that effect each week. Please contact me with your new e-mail address if you wish to continue getting the *Flashsheet* or check with your ISP since it may

be blocking a mass distribution list from an AOL e-address. The missing folks are: **David Askine, Arthur Brophy, John S. Brown, Jim Fedor, and Joseph M. Kelly.**

Please remember to direct all communications about subscriptions, bulletin delivery issues, snow removal tips, the use of PayPal as a payment method, etc. to **Bill Oliver** at the club's Levittown address or to his new electronic address, billoliver@verizon.net. The regular postal address is the familiar 45 Wildflower Road, Levittown, PA 19057. Inquires sent to Wyomissing only slow down the process. Thanks!

That's it for this month. Enjoy this month's edition of the *Journal*; it's another good one. 

NASWA Flashsheet

Are you getting the latest hot information about what is happening on the shortwave bands? If you have not signed up for the club's electronic *Flashsheet* service, you are missing out on timely news and information about the DX scene that will enhance your shortwave listening pleasure. If you are a current member of the club and want to receive the electronic *Flashsheet* just drop **Rich D'Angelo** (rdangelo3@aol.com) a note with your e-mail address, location and membership expiration date from your mailing label. You can participate by sending your latest logs to the electronic *Flashsheet* edited by **Mark Taylor**, markokpik@tds.net. The club's electronic *Flashsheet* helps members stay on top of the action with breaking shortwave news and information. The electronic newsletter is an excellent supplement to the monthly *Journal* for the timely dissemination of DX loggings and breaking news.

NASWA Yahoo Group

Join moderator **Dan Ferguson**, the club's Yahoo Group, and other club members to discuss reception of shortwave radio broadcasts, program content, propagation, reception conditions, loggings, hot news and information as well as radio equipment and accessories and any topics related to shortwave radio in general. Please keep in mind that loggings, QSL news, schedule changes should also be reported to the appropriate column editor of the *Journal* for publication. This forum is a supplement to, not a replacement of, *The Journal*. Subscribe by going to <http://groups.yahoo.com/group/NASWA/>.

Calendar Of Events

- Jan 9 Meeting. Boston Area NASWA Chapter.** The Boston Area DXers have found a new location for meetings. Inquiries about the BADXers may be sent to Paul Graveline at 978-470-1971 or Internet: ctreditor@aol.com. The URL for the BADX guys is <http://www.naswa.net/badx/>
- Jan 10 Meeting. The Columbus, Ohio NASWA Chapter** will be meeting at Universal Radio in Reynoldsburg at 10:00 AM. Further information is available from Mike Rohde at 614-527-1398 or via e-mail at merohde@columbus.rr.com. The purpose will be to gather other SWL/ DX listening enthusiasts together for informative discussions and sharing of knowledge and information about the hobby.
- Jan 10 Meeting. The Cincinnati/Dayton Monitoring Exchange (MONIX)** meets at the Lebanon Citizens' National Bank (LCNB), 425 West Central Avenue (Ohio 73), Springboro, Ohio at 7:00 PM. For more information contact Mark Meece at 937-743-8089 or e-mail at antennapig@siscom.net. For additional information about MONIX, check out their web site at <http://www.siscom.net/~mmeece/monix.html>
- Jan 19 Meeting. Tar Heel Scanner/Shortwave Listening Group.** Red, Hot and Blue restaurant, 6615 Falls of the Neuse Rd., Raleigh, NC. Dinner @ 6:30PM, meeting @ 7:30PM. Meetings the 3rd Monday of each month. Info, Curt Phillips, 919-773-4522, curt@nerdster.net
- Jan 23 Meeting. The Reading Area DXers** will hold another meeting at The Flying Dog in majestic Earlville, PA (Route 562 and Airport Road). Members gather around 5:30 PM near the bar area before heading into the restaurant for dinner and further discussions. Contact Rich D'Angelo (2216 Burkey Drive, Wyomissing, PA 19610; 610-678-0937; rdangelo3@aol.com) for further information about future meetings.
- Feb 2-6, 2009 Conference.** The Arab States Broadcasting Union will host the **HFCC/ASBU A09 frequency planning conference** from 2-6 February 2009 at its headquarters in Tunis, Tunisia.
- Feb 7, 2009 Meeting. Reading International Radio Group** will hold its next meeting on Saturday October 4 at 2:30 PM in Room 3, Reading International Solidarity Centre, 35-39 London Street, Reading. All are welcome, for further details email Mike Barraclough mikewb@dircon.co.uk or phone 01462 643899.
- Mar 13-14, 2009 Convention.** The **22nd Annual Winter SWL Festival**, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin on 13th and 14th March 2009. Richard Cuff and John Figliozzi co-chair the organizational committee. Although it is early, you don't want to miss this special Fest event. See you there!
- May'09 Annual Meeting.** The **2009 National Association of Shortwave Broadcasters and us DRM Group** will be held in Nashville, TN 7 and 8 May 2009. It will be co-hosted by World Christian Broadcasting and WWCR. Additional information will be available at a later date.
- May'09 Annual General Meeting (AGM) and DX Camp.** The **Danish Shortwave Club International** will hold its AGM and DX Camp from May 11th through May 17th at Vardeborg, Vejers Beach, Denmark. For further information contact Bent Nielsen (bent.elin@webnetmail.dk), Egekrogen 14, DK-3500 Værloese, Denmark. More information will be available later on.
- Aug '09 Conference.** The National Association of Shortwave Broadcasters will host the **HFCC/ASBU B09 frequency planning conference** from 24-28 August 2009 in Puna Cana, Dominican Republic.

Aug '09 *Convention.* **The European DX Council** will hold its annual conference from 28 through 30 August 2009 in Dublin, Ireland. It will be hosted by the Irish DX Club. More details to follow.

Mar'10 *Convention.* The **23rd Annual Winter SWL Festival**, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin on 5 and 6 March 2010. Richard Cuff and John Figliozzi co-chair the organizational committee. Although it is early, you don't want to miss this special Fest event. See you there!

May'10 *Annual Meeting.* The **2010 National Association of Shortwave Broadcasters and US DRM Group** will be held in Hamilton, Ontario on 13 and 14 May 2010. It will be hosted by Galcom International. Additional information will be available at a later date.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: rdangelo3@aol.com) or Ralph Brandi (Internet: ralph@brandi.org). 

FRENDX: Twenty-Five Years Ago (January 1984)

The "For Sale" ads featured new model portables recently purchased for RCI and WRTH reviews by Larry Magne: Grundig Satellite 300, Yacht Boy 700, Panasonic RF-9, Sony ICF-7600D and a Toshiba RP-F11. Jerry Strawman was selling his Kenwood R-1000 and Steve Lare was selling his AEA MBA-RO Teletype Reader. In Roll Call, Bill Oliver welcomed 60 new and returning members to the club including Ralph Brandi, Rev. John Eckert, and Bruce MacGibbon. After ten years of dedicated club work, Mac Leonhardt stepped down as the club's business manager with duties being transferred to Levittown. The Executive Council was down to only three members: Don Jensen, Glenn Hauser and Bill Oliver. An election was held to fill two spots with the following agreeing to serve if elected: Tom Alleman, Sam Barto, Jerry Berg, John Herkimer, Nick Pappas and Dave Walcutt. John Herkimer's Shortwave Center featured an interview with Don Jensen. David K. Maxfield provided an Index to Shortwave Center for 1983. Gilfer announced that Gerry Dexter's QSL Address book was about ready to be released. Nick Pappas began a new feature about programming on shortwave entitled Pappas on Programming. In his QSL Report column, Sam Barto noted "This month we had 99 countries reported with some extremely interesting QSLs. Good going!" Log Report A editor Mike Nikolich reported about his almost appearance on ABC Nightline program. Mike was to listen on camera for astronaut Owen Garriott's attempt to talk to other ham radio operators. Mike's network debut fell through when Garriott didn't transmit. In Log Report B, editor Jerry Berg noted 4VEH back on 4930 kHz, Apintie on 5005 kHz and German locals on 6030 and 6085 kHz. In the Log Reporter column, Nick Pappas thanked the fifty-four members that took time out to report this month. Also, he noted that only three members managed to report each month in 1983: Rufus Jordan, Dave Valko and Terry Weinhold. A total of 191 different members reported in 1983. 

Musings

Gary Walters, St. Helena Island and Robert Kipp, Germany

During Radio St. Helena Day 2008, RSH received 295 emails. There were two successful telephone calls:

- Mr. Shamim in Southern India
- Mr. Chris Wood in Tennessee, USA

The "new postal route" works.

Note that it is better to omit the words "South Atlantic Ocean" in this "new postal route", so as not to confuse your local post office.

Make certain that your letter reaches the United Kingdom. The P.O. in the UK then knows very well what to do with the letters. Be certain to include sufficient return postage inside your letter: (3+ IRC's or 3+ US Dollars, or 5 Euro or 5 GB Pounds (smallest banknote)). Be sure to put sufficient postage on your letter. You need airmail postage to the most remote country in the world (even if you are in the UK). From Germany, Euro 1.70; from USA, 94 cents; from UK, 81 Pence. This is for a standard, airmail, "world"-letter of (max.) 20 grams (USA: 1 ounce) weight.

The first two reception reports have reached Ascension Island. Christian Ghibaudo, France, sent his report on 18 November and Richard Mitchell, Raleigh, NC, USA, also sent a report. Both of these letters arrived on Ascension on 26 November.

In the mean time, several other reports have arrived. The Royal Mail Ship RMS St. Helena will pick these letters up at Ascension on 07. December and deliver the letters to St. Helena on 09. December 2008.

Do NOT expect any RSD 2008 QSL cards to be posted before about July of 2009.

The RSD 2008 QSL is, as of December, 2008, still being designed. The cards will, probably, be printed in January of 2009. It will then take about two months to ship the cards to St. Helena. From about April or May of 2009, RSH will be able to actually fill in the details and sign the QSL cards. That may take a month or two. Therefore, the RSD 2008 QSL cards will, probably, not be sent to SWLs before about July of 2009. This is the usual procedure and has been the approximate time table of events in the past years.

Unfortunately, the SUN did not help at all with the propagation of radio waves via the ionosphere this year, and we are still at the bottom of the old sun-spot cycle. Reception around the world was, generally, not good. Japan, however, had some phases of wonderful reception, but many areas of Europe and USA heard almost nothing. Lucky were those DXers who have big antenna systems in the right direction. Among others, Anker Petersen (DSWCI), Glenn Hauser, and Jerry Berg have published excellent and detailed summaries of the reception conditions in many parts of the world. Simply put, that is the way things are on the shortwaves. The shortwaves are like a box of candy, you never know what you are going to get.

The RSD 2008 Team at Radio St. Helena sends their thanks to all SWLs everywhere and sincere best wishes to everyone for current Holiday Season and for the New Year 2009.

Gary Walters, Station Manager, Radio St. Helena and Robert Kipp

Robert Kipp <RDC-Roberts-Data@t-online.de>, Germany
Christmas Greetings from Germany.

Hello Rich and all members of the NASWA and of the World DX Club, thanks for all your support for Radio St. Helena during 2008. Wishing everyone a joyous Christmas Holiday season and a healthy, peaceful, and successful New Year 2009.

Gerry Dexter, Lake Geneva, WI

Yesterday (11/22) was Antenna Day here. A huge dose of thanks to Mark Taylor who put up an RF Systems MK-1 (now re-christened The MARK-1). The effect was immediate and startling. Thank you, OM!

Mark Taylor, Madison, WI

My pleasure. It was exciting to turn on the rig using the new antenna and hear 6185 RN Amazonia at armchair level!

[Can there be a better example of "Unity and Friendship" than this? —RAD]

Don Jensen, Kenosha, WI

Re: XEQM: I sent MP3 clip and report to station tech, Ing. L. Orlando Gonzalez Balam (tecnico@rasayucatan.com) and got reply within hours. Still using same call, XEQM as in past when relayed Tus Panteras, and refurbished but same homebuilt 250 watt xmtr feeding quarter wave dipole. Currently relaying Merida FMer La Candela, but when technical difficulties are worked out, it will rebcast XEMQ, 810 kHz, now called R. Yoo'l I'ik, which programs in one of the local, Mayan-based Indian languages.

Toshi Ohtake <ohtaket@yahoo.co.jp>, 5-31-6- Tamanawa, Kamakura 247-0071, Japan

The first topic is Radio St. Helena Day 2008. Radio St. Helena Day 2008 was successfully conducted on 15th of November. The reception condition of Japan beam between 2000 and 2100 UTC was no so good, but dramatic improvement was experienced at 2112 UTC during European transmission when the signal jumped from SIO 252 to 454 in a few seconds. Throughout this transmission until 2230, the signal maintained a good level. Many Japanese listeners were excited and enjoyed this once a year event.

The next topic is the proposed BCL Day, or BroadCast Listeners Day of the Year. As reported earlier, we lost Mr. Koji Yamada last August due to his illness. In commemorating his greatest contribution in attracting millions of young people to the whole new world of short wave listening in mid-70's, many club members proposed to name December 17 the BCL Day of the year as this will be his 68th birthday. If he is alive. We asked many Japanese language stations to produce and air a special program to commemorate Mr. Yamada's remarkable activities in the short wave world on or around this day. KBS, in Seoul, South Korea, Voice of Russia, in Moscow, HCJB Japanese program, IRIB in Teheran and other stations agreed to broadcast the special programs and inviting letters from listeners to write about their memories of Mr. Yamada and other topics relating to enjoyment of short wave listening.

This is all for this month.

Wishing you FB DXing! Toshi Ohtake, Japan Short Wave Club

Stephen and Noah Price <vinyltocdr@msn.com>, Johnstown, Pennsylvania

My son and I made it in the Saint Helena Herald for Radio Saint Helena Day 2008. click on the link below, allow the PDF to load, and scroll down to page three! <http://www.news.co.sh/Newspapers/SHH%2021.11.08.pdf>. What an HONOR! Thanks Gary Roberts and Robert Kipp!

Stephen Price Family and Son Noah

Dan Robinson <darobin@his.com>, Washington, DC

Wow—and I see I made it into the paper too.... Thanks for the heads up without which I would never have known!

Giovanni Serra < dxer_gserra@fastwebnet.it > Roma, Italy

Ciao from Roma.

A cold and rainy weather here in Roma during the third week of November, fortunately with no strong wind as other part of Italy: in some Italian regions, the gusts of wind reached the speed of more than 70 mph (more than 100 Km / h), and some TV & ham antennas, tiles and entire roofs flew away. For the last week of November, forecasts announced rain and very cold temperatures from Arctic, with rains or sleet in Roma, and some snowfalls on mountains and hills elsewhere in Italy. For the upcoming winter, I hope in a clement weather with my AD Sloper antenna: last February 2008, I spent more than 8 hours for installing it on a telescopic mast of about 23 feet (about 7 meters) atop my home. Really, the major undertaking was the antenna assembly!

The second and the third week of November at night-time, good condition toward east and far east on Tropical Band of 60 mt: I caught some Indian and Chinese stations, after the sunrise at their site too. Also noted All India Radio - Thiruvananthapuram on 5010 with some news in English from 1730 to 1735.

Instead, no new rare DX from Latin America, but only usual Radios from Brazil as well as Radio Rebelde carrying out their well known broadcasts: I listened some of them since they fade in at evening during dinner time, together with of some African Radios on air.

October 26, and November 16 & 22, during late evening here in Roma, I listened a barely audible station on 4665, talking in a presumed Spanish, but unfortunately under statics crashes. Really, I have no idea what's on this frequency: any spurious, harmonics, a new frequency, or a new station from Latin America, Europe or elsewhere ? Till now, no trace about it I found out on DX bulletins.

Bad conditions toward Latin America at night time on Tropical Band of 60 mt during last week of November and the first days of December 2008; good conditions, instead, toward east and far east, above all with Indian & Chinese stations; only a seasonal new rare DX of a presumed R. Cultural Amauta, Peru on 4955; usual LA stations caught barely audible here in Roma (5025 R. Rebelde too!!), under strong rustle and static crashes. R Rebelde appeared again during late evening & night on December 6th, with its usual fair signal. Also some usual seasonal Radios from Africa on Tropical Bands were disrupted. It seems that some barely audible Brazilian Radios are appearing on 31 mt band during late evening.

That's all for now. Till the next.

Ron Hunsicker <ronhuns@ptd.net>, Wyomising, PA

Remember the new sunspot cycle?

Apparently it is not on the way because, after weeks with the solar flux at 68, it just dropped to 67!

Although, the theoretical minimum value for the solar flux is 67, it can be less. Read on...

On July 18 1996, the observed value of the 10 cm solar flux dropped to a low of 64.9. In many books it is stated that the 10 cm solar flux can not go below a value of 67. For example, the formulae given in the June 1996 edition of the IPS Solar Geophysical Summary show 67.0 as the minimum value. So how can we get a value of 64.9?

The answer is quite interesting—it depends on the orbit of the earth! The earth's orbit is not perfectly circular but is slightly elliptical. In July of each year we are a little further than average from the sun and so solar radiation, including the 10 cm flux, is very slightly weaker than average.

So the 10cm flux will tend to be lower in July than, for example, December when the earth is closer to the sun than its average value. The combination of the extra distance to the sun and the solar minimum conditions have acted to produce this very low flux value.

It is easy to correct for the earth-sun distance and, when this is done, a value of 67.0 is obtained. This is the text book value!

Values of the 10 cm flux are often given in two forms—first as directly observed values and secondly as values corrected for the earth-sun distance variation.

The last time that the observed 10cm flux was at a lower value was on July 26, 1964 when it stood at 64.8. The lowest value ever recorded was on July 02, 1954 with a value of 64.4. (Courtesy www.whatsupwiththat.com)

So, we are at 67 at a time when we are approaching the least distance to the sun. If it were now July, I wonder how low the value would be? Since solar flux is related to the inverse of the square of the radius, solar flux in July can be estimated. The sun is at its least distance in January at 147.2 million kilometers. In July, we are farthest from the sun at 152.6 million kilometers. Since November is 2/3 the way to January, assume the present distance to be 150.8 million kilometers. So, the July number would be $(67 \times 150.8 \times 150.8) / (152.6 \times 152.6) = 65.4$ Things could be worse !!!!

Interestingly, this information was posted on www.whatsupwiththat.com in July 2008 after the uncorrected solar flux had dropped to 64.2.

Scott R. Barbour Jr. <srbjswl@yahoo.com>, Intervale, NH
Greetings to all,

Just purchased a used Ten-Tec RX-350D. So far, so good. The learning curve is small which I appreciate as I am not very technically inclined. Once through the owner's manual is all it took. Programming frequencies to memory & menu options require a second look.

This receiver is behemoth with a large, easy to read display. All active functions are spaced across the screen for easy viewing. I like that both date & time (UTC or local) are always on screen. I also like the Sweep function which displays a "Spectral Snapshot" at the bottom of the screen, showing activity on either side of the tuned frequency. It appears useful in seeing which bands are open.

The 34 filter bandwidth is a treat. Those, combined with PBT, let me really tweak a signal for optimum reception. I can't say for sure if it's better at digging out the weak signals than my R8, as I'm still getting a feel for this receiver, but so far I'd say it edges out the R8 slightly. I find the audio quality to be as good, if not better, than the R8.

The only downsides, so far as I can tell, are what I already read on-line per other RX-350D owner's reviews. The large display seems to give off some RF buzz and the AM Sync loses lock too easily, which is a shame, because when it is locked, it works rather nicely. No direct entry keypad is a pain. I will definitely be purchasing the external tuning control/keypad.

Not exactly the most technical review, but then again, I'm not that technical. ;)

Off to play with my new toy, Scott

Jerry Ervine <JerryE5109@aol.com>, Clarksville, TN

I need someone to explain to me the value of a PHASER being used in SWLing and MWLing. Is it effective between a loop and rig?

Thank you.

Happy Holidays to All, and have a safe one!

Jerry KC5YRE (Young Rebel of an Engineer)

Marlin A. Field, 128 Oak Street, Hillsdale, MI 49242

According to a letter I received from TGNA in Guatemala City, its repeater station on 100.7 MHz in Panajachel was shut down by the government. Based on a court order, its equipment was confiscated and Marco Tulio, the person in charge of the compound but who had nothing to do with the repeater, was arrested. The charge was that the station was operating illegally on 109.9 MHz; a pirate was. The pirate station, which is within a block or so of TGNA's station and which had been giving interference to it, wasn't bothered by the government. It is still on the air.

I'm starting my 50th year in the hobby.

Bob Padula bobpadula@mydesk.net.au, Melbourne, Australia

Asia daytime propagation mode intensifies, 7, 9 MHz.

As anticipated, the annual summer occurrence of the daytime specialized Asian Mode has materialized.

This was apparent on December 9, here in Melbourne, with very strong signals from Malaysia, Vietnam, Myanmar, Japan and India audible in the period 0400-0500 UTC in the 7 and 9 MHz bands. This is 2pm-3pm local time, with this shortpath propagation following all-daylight transmission paths.

This phenomenon occurs each summer, and is more pronounced during years of low or declining sunspot activity. The propagation mechanism is not yet clearly understood, and has been studied by myself, with a few others, since it was "discovered" in the late 1960s.

It is believed to be caused by multi-mode activity, caused by reflection off the top surface of Sporadic E clouds passing over the Australian continent. Under such circumstances, signals enter the ionosphere, enter the E and F layers, and are refracted back towards the earth's surface, striking the top surface of Sporadic-E clouds. Signals then continue upwards, and are refracted by the normal E and F layers back to earth.

This means that there is no intermediate ground reflection, resulting in greatly reduced absorption/attenuation on the total transmission path.

Propagation up to distances of 10,000 km, and greater, have been observed for this specialized daytime mode, on frequencies which would not normally propagate via conventional ionospheric refraction.

In past years, signals on frequencies as low as 4 MHz have been observed, from transmitters in the Indochina and Indonesia regions, at local noon Melbourne time.

Careful study of this mode will reveal that signals do not "fade-in" or "fade-out", but appear and vanish very abruptly, similar to long-distance Tropo propagation of VHF or UHF.

Signals will appear quickly, remain audible for variable periods, ranging from a few seconds to an hour (or more), with no fading. Signal strengths can be extremely high, hitting S9+20 regularly! Peculiarly, transmissions from the same geographical area, on different frequencies, generally are not audible simultaneously. Unfortunately, the abandonment of many HF services from Asia in recent years has significantly reduced the "pool" of frequencies which may be observed.

The mode, due to its unpredictability and variability, offers excellent opportunities for study and research of HF propagation into South Eastern Australia, and for extending the growing body of comparative data about the phenomenon in the present period of very low sunspot activity, global warming and climate change.

Documentation of this propagation event at a professional engineering level is expanding, and the phenomenon is now included in the formal training curriculum offered by the Australian Government's Ionospheric Prediction Service, Department of Radio and Space Services.

These are the entries of December 9, 2008, relevant to the HF Broadcasting Service, from a field site near Melbourne, in the Dandenong Ranges National Park, using the Eton E5 and a couple of metres of random wire for an antenna!

It would be interesting to explore this propagation mechanism in greater depth (Spectrogram) with a narrow band spectrum computer controlled spectrum analyser, with a recordable digital screen display, measuring frequency versus amplitude over defined time spans, linked to a suitable professional receiver, rather than toys such as the Eton!

Richard A. D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA 19610

The chill of winter arrived early this year to southeastern Pennsylvania. Our first DXpedition to French Creek featured mid-30's temperatures, clear skies, plenty of sunshine and dry weather conditions. That made setting up and pulling down antennas a relatively easy project. The crew consisted of Rich Cuff, John Figliozzi and Ed Mauger with Fred Kohlbrenner a last minute scratch. However, although the temperatures slowly rose during our stay, it was wet Tuesday morning when it was time to trek through the woods to retrieve our long wires. I left with wet feet but a fat logbook.

Afternoon Africans were very good the first day; I only wish there were more of them to listen for. La Voix du Sahel on 9705 kHz was good and Uganda on 4,976 kHz ran late providing a nice window for listening. Zimbabwe's signal improved throughout the night with a smattering of English here and there and a nice English ID at 0342. Indonesia was heard and the Indian regional stations only put in weak carriers that I wasn't in the mood for. Bangladesh was tentatively noted with flutes around 0030. Eritrea's opening on 7,220 kHz was very good before being covered by a powerhouse station.

Fatigue set in so I slept to 1115 UTC the next morning so Latin stations were just about gone. Focus on the Pacific region yielded good signals from PNGs on 3335 kHz and 3385 kHz plus a Chinese regional and a Korean clandestine.

Openings to the Asian continent continued to be strong as afternoon reception the second day brought some good stuff. LRA36 from Antarctica made a nice appearance although at a very weak level. However, multiple IDs at 2002 helped nail down this elusive station.

The evening pasta banquet closed things up for the most part. Rain arrived around dark as temperatures slowly warmed up. Conversations carried us through most of the evening although I did manage a log of Radio Apintie before during in.

Once again I didn't get to the dials in the morning before 1115 UTC so Latin America wasn't considered. The Asian and Pacific was pretty good again with Thailand, Vietnam, Indonesia, PNG, all three Aussie 120 meter band outlets and the North Korean on 2,850 kHz all making it into the logbook.

Possibly the principal highlight of the DXpedition was Rich Cuff's chair in a bag. It is one of those you see all the time that fold into a neat carry case and has a cup holder on each arm. As Rich would sit or stand after being seated the chair would literally groan under the strain. Slowly but surely John Figliozzi would discover bits and pieces of the chair on the floor near Rich's equipment set-up. Naturally we would laugh about the chair collapsing at some point. Shortly after the pasta banquet, Rich sat down and the chair collapsed fulfilling a DXer prophesy. The chair could be found in the park's dumpster the next day. I suspect we may be talking about the chair for quite some time. A lot of holiday cheer with a decent batch of QSL returns to brighten the season. Now, on to this month's QSL returns. Radio Austria 1 International verified with a full data letter from the "Listener's relations department" including program and frequency information leaflets and "information on how you can listen to us via shortwave, medium wave, satellite, cable and the Internet." Bhutan Broadcasting Service verified an old report from 1993 with an e-mail response in two days. The reply confirmed the details in the e-mail but the attachment was for the current 6,035 kHz channel from v/s Dorji Wangchuk, Head of the Transmission Division <dwangk@gmail.com>. I followed up asking for the correct details and he quickly responded with a full data reply for the 1993 transmission

on 5,030 kHz. Thanks to Anker Petersen for opening this one up and Jerry Berg for the idea about following up the follow up reply to get the correct details. I had verified BBS many years ago through an embassy route but this has a much better feel to it. Nippon no Kaze via Darwin, Australia responded to an electronic report to info@rachi.go.jp with an electronic reply from hai@rachi.go.jp from the Policy Planning Division of the Headquarters for the Abduction Issue, a Cabinet Secretariat position within the Government of Japan. They gave the schedule for their programs as: Furusato no Kaze (Japanese), 1333-1357 UTC 9965 kHz, 1430-1500 UTC 9880 kHz, 1600-1630 UTC 9780 kHz and Nippon no Kaze (Korean), 1500-1530 UTC 9690 kHz, 1530-1600 UTC 9965 kHz, 1700-1730 UTC 9820 kHz. Radio Dabanga via Wertachtal verified a report to the radiodabanga@yahoo.com e-mail address from Leon Willems who replied using willems@pressnow.nl. Leon's e-mail stated "Please find attached additional information regarding Dabanga. Thanks very much for your report. We do not have a fixed QSL yet. But I hope this information is helpful to you." The three documents attached to the e-mail were: (1) How to receive Radio Dabanga, (2) Radio Dabanga On Air!, and (3) The meaning of Dabanga: life is changeable for good or bad. Press No states that "Radio Dabanga is a project of the Radio Darfur Network a coalition of Sudanese journalists and international (media) development organizations, supported by a consortium of international donors, humanitarian community organizations and NGO's. Radio Dabanga is conceived, operated and facilitated by Press Now in The Netherlands." The third document notes that Dabanga is a large storage vessel used by Sudanese farmers to preserve food. Also, from the third document comes the following: "Dabanga is a small village near El Fasher (North Darfur). It is also a well in the Wilayat area in South-Darfur 528 meters above sea level. In December 2007 over thousand people were displaced from this area due to insecurity in the area and lack of humanitarian assistance." Finally, Vatican Radio via Santa Maria di Galeria verified with a full data, Garden card along with a program schedule, sticker and blank QSL card of the shortwave 500 KW rotating antenna installed in 1988 at Santa Maria di Galeria. All in all, not a bad month for QSL returns. Having some back and forth correspondence with Bhutan was clearly the highlight of the month. It is good to have a contact at the station that is ready, willing and able to verify listener reports. So far I have only seen electronic correspondence to/from the station. It will be interesting to see if postal correspondence opens up too.

Nothing else to report. I was too busy with holiday company and a remodeling of the shack to actual listen once I returned home from our DXpedition at French Creek State Park. I will have to live off of those memories for a while until I can get something set up in the shack over the next few days. A lot of old junk made its way to the dumpster in the process. Every couple of decades the radio shack deserves a good cleaning.

73, Rich

by Jerry Berg

<www.ontheshortwaves.com> Update, November 6, 2008 — Under "DX History/Stations," a pamphlet from the BBC titled "This is London Calling!" As shortwave stations around the world become an endangered species, it is worth recalling a time when a station issued a special booklet to promote its North American service. Such was the case with this item from the BBC. The BBC "brings you the voices of the men and women of

Britain, speaking to you while the sirens wail in the streets and the gunfire roars in the London sky." It was on for six hours every night. "Help us to make the North American Service more widely known. Pass this folder to your friends or send us the names and addresses of those you think would like to have information about the BBC short-wave programmes." While undated, the names and events suggest that the pamphlet was issued during 1940-41. (The BBC North American service was set up in 1940.)

<www.ontheshortwaves.com> **Update, November 15, 2008** — Under "DX History/Stations," a copy of "America Calling All Peoples," a pamphlet published by NBC's "International Division" in 1941. Before the VOA was created in 1942, American shortwave broadcasting was in private hands, and NBC (an offspring of RCA) was one of the leaders. Operating 50 kw. WRCA and WNBI from Bound Brook, New Jersey (later operated as WBOU until it closed in 1966), the NBC "International Division," which consisted of 65 people, broadcast to Europe and South America. Although clearly intended for promotional purposes, this piece contains some interesting history and evidences the national mood at the time, and the belief in the efficacy of international broadcasting. Of special interest is the "Addenda" (blue pages) at the end. It was added after Pearl Harbor, which apparently occurred while the pamphlet was being printed. The author, Earl Sparling, is not otherwise identified, but a quick Google/New York Times search indicates that there was a writer/newspaperman by that name who wrote novels, and also wrote on business topics, in those years.

<www.ontheshortwaves.com> **Update, November 30, 2008** — Under "CPRV," "The QSL Gallery," some QSLs from Al Sizer of North Haven, Connecticut. I have lost track of Al since he donated his QSLs to CPRV in 1999, and several recent attempts to contact him proved unsuccessful. However, he will be remembered by his fine collection of QSLs dating from the 1960s to the 1980s. In this group: (1) a special Red Cross card from RAE, Argentina (1979); (2) a card from Azad Kashmir Radio (although this 1972 card, as well as other AKR varies from that era, gave the location as Trarkhel, the station was no longer using that site for shortwave); (3) HISD, Radio Santo Domingo (1968); (4) the Dubai Broadcasting Station, 6040 kHz. 1972 (earlier it had been known as the Voice of the Coast, and had transmitted from Sharjah); (5) Radio Angkatan Udara, the Indonesian air force station (1970); (6) an NU-produced prepared card, and a letter, from the BBC Relay Station (Radio Antilles) on Montserrat, 1977 (few of these prepared cards were ever returned); (7) Voz del Baru, the last shortwave station in Panama, 1979 (probably a response to a follow-up, as they had been off shortwave for years by then); and (8) the seldom-heard Paraguayan, Radio Charitas, 6110 kHz., 1975. Those were, indeed, the days.

<www.ontheshortwaves.com> **Update, December 5, 2008** — Under "DX History/Stations," more on Bafra. Posted in the past were Don Jensen's 1987 PopComm article about Radio Biafra and the Biafran war (under "Stations"), and two letters from the station to Connecticut DXer Al Sizer (under "CPRV/QSL Gallery"). Now, in the "CPRV/QSL Gallery," we add another letter, this one addressed to Bill Sparks, and, under "DX History/Stations," a recording of the station made by Al Sizer on September 8, 1969, at 2140 UTC on 6145 kHz. Al introduces the recording, and notes that it was made on a DX-150 receiver. The station IDs as "the Voice of Biafra, the external service of the Biafra Broadcasting Corporation," and the IDs are at 2:26 and 3:12. Thanks to John Herkimer for the recording.

<www.ontheshortwaves.com> **Update, December 12, 2008** — Under "DX History/Equipment & Advertising," The Scott News once again. This August 1932 edition focuses on the specifications and performance of the chrome-plated Scott Allwave Deluxe receiver, and illustrates the kind of DXing excitement that Scott promised his customers. 

Easy Listening

Richard D. Cuff • 42 North 37th Street • Allentown, PA 18104 • richard@thecuffs.us

2008 in review

Even an optimist like myself would have a hard time thinking that 2008 was a good year for “easy listening” caliber shortwave broadcasters:

- Radio Netherlands stopped using shortwave to North America
- Radio Austria International gave up on shortwave altogether
- The BBC World Service abandoned the remaining shortwave frequencies it had been using to reach Western Europe
- Radio Singapore International gave up. Period.
- Trinity Broadcasting Network shut down KTBN

Radio Netherlands—which had been one of the strongest supporters of shortwave to North America—threw in the towel at the end of October for multiple reasons:

- Listener feedback and input from North America has been steadily decreasing versus input from other English-speaking regions
- North American listeners who responded to Radio Netherlands (RNW) solicitations via diverse platforms (web, e-mail, shortwave) generally indicated they used multiple platforms for listening to RNW, and would be able to use other platforms if shortwave were to disappear
- RNW made a conscious effort to devote resources to programming and transmissions targeting Africa, a region still generally lacking in independent media choices

- Spanish speaking RNW listeners in the Americas were much more likely to use shortwave to listen to RNW than English speaking listeners, so the available shortwave resources were shifted over to Spanish language frequencies.

It is jarring to dust off old editions of *Passport to World Band Radio* and *World Radio TV Handbook* from the 1990s and before, when shortwave listening was much easier then it is today. I conservatively estimate that 15–20 frequencies on the air at a given “prime time” hour in North America—say, 0100 UTC—were utilized at the time by the likes of Deutsche Welle, the BBC World Service, Radio Budapest, the Voice of America, Radio Netherlands, YLE Radio Finland, Radio Norway, Radio Exterior España, Radio do Portugal, Radio France International, and the AFRTS to target this region, and all were of “easy listening” audibility. While Radio Budapest and Radio do Portugal remain on shortwave for languages other than English, and YLE Radio Finland and Radio Norway have left shortwave all together, all the others do remain on shortwave at some time of day, but that time may not necessarily be convenient for North American listening, and they are not as easy to hear.

Here in Eastern North America, though, we benefit by the fact that shortwave transmitters do not direct their RF at their target audiences with pinpoint accuracy. West Africa remains a region that is considered a priority for most international broadcasters, and transmissions that originate in Western Europe and South Africa that target West Africa can regularly be heard in North America. Similarly, transmissions that originate in East Asia and target the Pacific islands often reach North America, especially on the West Coast but also in the East to a lesser extent.

Broadcasters are especially keen to reach English speaking audiences in Africa, and services like *SW Radio Africa* (the “SW” doesn’t necessarily stand for *shortwave* or *southwest*...as Glenn Hauser reminded me...) use UK-based transmitters, owned by the BBC and managed by VT Communications, to reach the region; as I mentioned last month, *SW Radio Africa* can be heard without much difficulty via shortwave here in Eastern Pennsylvania.

The ability for shortwave signals to reach beyond their geographic targets illustrates why I purchased an Eton E1 over the past summer. There’s still something special about hearing an English language broadcast on shortwave that offers different content, and different perspectives, than I can pick up on my local AM and FM stations.

Looking ahead to 2009

If you expand your thinking beyond traditional shortwave delivery, though, the news is better: Many stations continued to expand the availability of audio programming via their websites, primarily by keeping an online archive of programming available for listening on-demand, and by offering podcasts—a simple way to make programming “portable” onto MP3 players, iPods, and personal computers. As I have mentioned before, the existence of on-demand program listening greatly opens up the options you have at any time of day: No longer do you need to schedule your listening to Radio Australia for 1000-1400 UTC; most all of Radio Australia’s programming can be heard whenever you want. Even such hard-to-hear services such as *Radio Nepal* and *Radio Pakistan* offer daily English-language programming for on-demand listening.

Yes, I know, I know, it just isn’t the same as in the “good old days.” There is an undeniable sense of *distance* and *exoticness* in hearing a broadcast via shortwave that is

totally lacking when you listen to streaming audio or download a podcast to an MP3 player. I’ve learned to adapt, and I listen to more international broadcasters nowadays than I did back in the 1980s and 1990s.

Who are the most vulnerable broadcasters likely to scale back their North American shortwave usage in 2009? I don’t want to jinx any broadcasters by naming names, but I believe that smaller European broadcasters in non-English-speaking countries are the most likely to consider deemphasizing shortwave usage to North America in favor of other platforms.

If I were counseling international broadcasters on maximizing their listenership in North America, I’d advise them to have at least some presence on as wide a variety of platforms as possible. Many appreciate the portability, accessibility and flexibility of web-delivered content; others appreciate the mobility of satellite radio (XM/Sirius); some like the ability to listen in high fidelity (though at inconvenient hours) from their local public radio stations; others like the feel and familiarity of shortwave.

Keeping in that vein, I’ll continue to highlight broadcasters’ utilization of multiple delivery platforms in *Easy Listening* in 2009, including broadcasts from sources that don’t use shortwave but would likely appeal to an audience that is interested in global perspectives.

Here’s where I’ll need your help: Many of you are able to listen to much more via shortwave than I can, because you have more hours available in the day to listen, and because you especially enjoy listening via shortwave. Please take a few minutes—whenever you can—to send me a note on what you’re listening to, what you’d like to listen to, or what you’d like to read about when it comes to shortwave programming content. Whether you send me a postcard or letter, an e-mail, or post a message in the NASWA Yahoo Group, your feedback, suggestions and input would sincerely be appreciated. Otherwise, you’ll be

reading about what I find interesting, and that might not be of benefit to you. Make this one of your New Year's Resolutions!

One service to watch for in January will be *Radio Austria International*; indications remain that this service will no longer be available via shortwave as of the end of the year, but there has been no indication that the content itself will no longer be available.

The importance of SW relays

Speaking of the audibility of content in North America via shortwave: As was reported by Glenn Hauser in *DXLD* and elsewhere, the CBC's Sackville transmitter site was totally off the air in mid-December. Obviously this made it difficult to hear *Radio Canada International* and the *CBC Northern Quebec* shortwave service. Not only was RCI not available, but several other stations lost all or part of their transmissions serving North America: China Radio International, Korea's KBS World Radio, Japan's NHK Radio Japan, Voice of Vietnam, Radio Austria International, Radio Sweden, Vatican Radio, Radio Prague, and the Voice of Turkey.

BBC World Service January highlights

Saturday, January 10th, 1800 UTC — **The BBC Debate: Obama's Washington and the World:** Washington, DC's public radio station WAMU teams up with the BBC for a live discussion ahead of the US Presidential Inauguration. The BBC's Owen Bennett-Jones and WAMU's Kojo Nnamdi will host the discussion. This will be the airtime for African shortwave services as well as live streaming and satellite radio platforms.

Sunday, January 11th, 2205 UTC — **Heart and Soul: Realms of Glory;** this is the second of two parts in this series. Gerald Butt argues that the experience of flying

can be deeply spiritual. He flies a single-engine plane over an ancient Cypriot monastery situated on a remote hilltop where the monks felt they were nearest to God. The Pope has described singing as, "almost like flying, rising up to God.....it is in some way an anticipation of eternity...." and the physical process of leaving the ground and rising into the sky can inspire intense spiritual reflection. Gerald Butt explores why, in discussion with other pilots; including the Reverend Steve Benson and Episcopalian Presiding Bishop, Katharine Jefferts Schori.

He asks airline passengers whether they derive any spiritual experience from gazing at clouds from 30,000 feet and talks to people who oppose the growth of flight for environmental reasons.

Monday, January 12th, 1405: **Monday Documentary — The Pardon Game:** A US president has a constitutional and inalienable right to grant pardons. He usually so just before he leaves office, and can grant pardons up to 12 noon on January 20th as he exits the White House on Inauguration day. It's a mysterious and controversial business — notorious past pardons include Jimmy Hoffa, Caspar Weinberger, Ford's pardon of Nixon, Patty Hearst and fugitive billionaire Marc Rich. Lawyers in Washington now specialize in the business of securing pardons. Owen Bennett-Jones asks whether presidential pardons sanctioned by a theory of justice, or if presidential pardons are more a question of selectively applied mercy. This is the West Africa air time most likely to be audible in North America; a 2105 repeat should also be audible.

Wednesday, January 14th, 1405: **Wednesday Documentary — Obama: Professor President:** Princeton Professor Kwame Anthony Appiah assesses Barack Obama as an intellectual, exploring the influences and ideas, which have shaped him as a scholar, teacher and academic. The President Elect taught Constitutional Law at the

University of Chicago for 12 years between 1992 and 2004, when he was elected to the United States Senate. However he has played down his 'Law Professor' credentials, believing that this cerebral image might fail to endear him to ordinary citizens. Obama's pragmatic style, his respect for competing arguments, skepticism of ideology, and often iconoclastic ideas, have been described as "very University of Chicago," whose law school has pioneered the analysis of legal issues from an economic point of view.

As well as interviewing Obama's Harvard mentors and teachers, Kwame Anthony Appiah talks to many American hard hitting intellectuals with insights into the 44th President's intellectual heroes and the ways he reasons, questions and analyses different issues.

Friday, January 16th, 1405 — **Friday Documentary — The Bicycle Diaries:** With more than a billion models around the world, the bicycle has found a place in every society. Since its invention in 1817, people have redesigned and used the bike for hundreds of different purposes, from sport and policing to knife-sharpening and selling ice cream. Using a lot of pedal power, **The Bicycle Diaries** visit three different parts of the world in a three-part series to meet the communities and people for whom two wheels are better than four. In New Delhi, India, the bicycle is crucial to the newspaper delivery industry — one of the city's essential economies. At 5 every morning, hundreds gather with their bicycles in the bazaars, ready to deliver the day's news. Here, two paper deliverers take us on their routes, sharing stories about the impact of the bicycle and the job on their lives. The bicycle has helped one, an 18 year old, to fund his studies, and the other, a man in his 40s, to put his children through school and university.

Ends and Odds

Voice of Turkey — addendum

One additional note regarding the **Voice of Turkey** from last month's mention of new

programming: The **Voice of Turkey** has a new and improved website that includes on-demand programming; before this recent change, you could only listen to live VOT audio via webcast.

The easiest way to navigate to the page with VOT audio is as follows: 1) Go to the main Turkish Radio & TV website, <http://www.trt.net.tr> 2) Click on the red "Voice of Turkey" icon 3) Click on "English"; this will take you to the website that includes two days' worth of archived Voice of Turkey audio.

BBC World Service — new program

Business Weekly: A weekly compilation edition of the weekday **Business Daily** program is now available; the program provides an opportunity to hear some of the key stories from the daily edition that you might have missed. When most people think of "business radio" they think of mind-numbing recitation of market numbers and thinly disguised shilling for one investment vehicle or another. **Business Daily** is different, instead focusing on the bigger, longer-term issues and trends that drive business and economic matters around the world. I don't believe listeners in Africa would hear **Business Weekly** on shortwave at all — it airs at 2330 on Sundays, a time when shortwave is not in use to Africa. Live "infotainment" web stream listeners can tune in Fridays at 2332 plus Sundays at 0532, 1332, and 1932 UTC. The most recent episode can be streamed on-demand and also downloaded or podcast. Website: <http://www.bbc.co.uk/worldservice/programmes/businessweekly.shtml>

Best wishes for a happy, healthy, and prosperous 2009 filled with informative and entertaining programming!

That's all until February...don't forget that New Year's Resolution to drop me a note!

Book Review

Listening on the Short Waves, 1945 to Today
(ISBN 978-0-7864-3996-6)

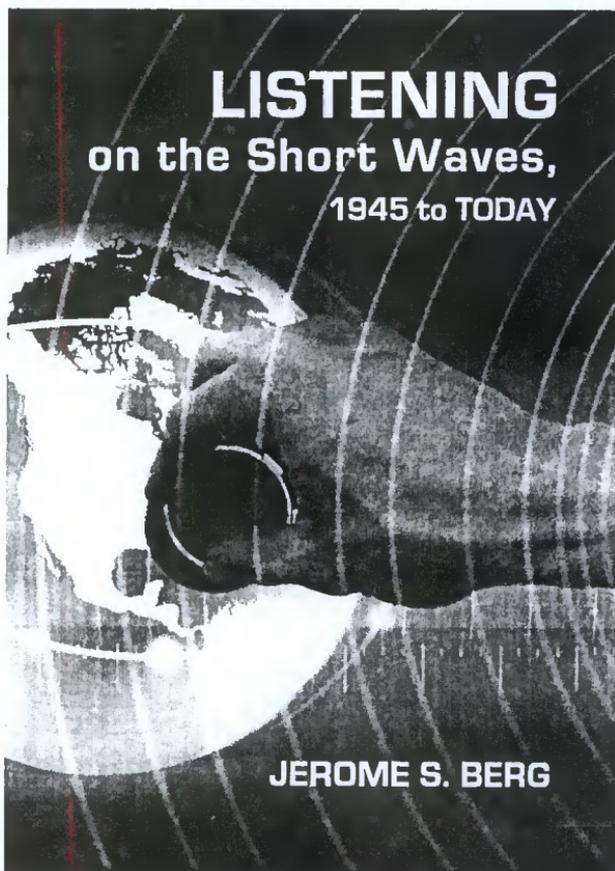

Written by Jerome S. Berg
Published by McFarland & Company

Reviewed by Richard A. D'Angelo

I can save you some time; if you have any interest in the history of the shortwave radio hobby from a listener's perspective go out and purchase this book and skip reading the rest of this review. This is really quite simple, *Listening on the Short Waves, 1945 to Today* is a marvelous story of the development of the organized shortwave listening hobby told by one of the great veterans of the era. Another historical masterpiece following upon the success of the author's first book a decade ago.

Back in 1999, Jerome ("Jerry") S. Berg's ground breaking masterpiece *On The Shortwaves, 1923-1945: Broadcast Listening in the Pioneer Days of Radio* was released to critical acclaim. *On The Short Waves* was a book that captured the thrill and excitement of the early days of radio broadcasting, radio listening and DXing. It quickly became a "must have" in every shortwave listener's library reflecting the extensive scholarly research into the history of medium wave and shortwave radio broadcasting and listening and the events surrounding the period 1923-1945. For the first time the com-

plete history of the pioneer days of shortwave broadcast, from the early concepts of Marconi & Armstrong, through the Golden Era of the 1930s and finally through World War II were captured in a fully illustrated hardcover reference for every shortwave listener. If you have never read it, this would be a good time to pick it up while embarking on the next two books in the series, *Listening on the Short Waves, 1945 to Today* and *Broadcasting on the Short Waves, 1945 to Today* (ISBN 978-0-7864-3674-3). The three books are essential readings for the shortwave radio listener, hobbyist and

historian. If you are looking to learn more about the history of shortwave radio, the role of the listener and the broadcasting organization that used the medium, the *On The Short Waves* trilogy is required reading and quite enjoyable reading too.

Since 1999, Jerry Berg has continued his research into shortwave listening with McFarland & Company releasing two new titles about its history that I am sure members will want to get their hands on for some good reading during the DX season. Jerry has done it again and again with two superb volumes; one from the listening perspective and one from the broadcasting perspective. There was so much material covered in Berg's research that writing one massive tome on shortwave history wasn't enough of a project so he expanded it to two separate books. This review will focus on *Listening on the Short Waves, 1945 to Today*; I'll have a review of *Broadcasting on the Short Waves, 1945 to Today* next month. By the way, McFarland is a leading U.S. publisher of scholarly, reference and academic books. Located in Jefferson, North Carolina, McFarland publishes books that can be found in libraries worldwide.

As many of you know, Jerry Berg has been an active shortwave listener for several decades. He has been a long time member of many clubs worldwide as well as a regular contributor. He has been involved in the affairs of the North American Shortwave Association for a very long time as an active member, contributor, former editor, current Executive Council member, a member of the club's Country List Committee and Chair of the Committee to Preserve Radio Verifications. Also, Jerry is a shortwave radio historian doing general research into the early days of radio broadcasting and listening, collecting much material over the years and disseminating this information during lectures at radio gatherings, conventions, etc. Consequently, there is nobody more accomplished than Jerry Berg to write about shortwave radio from both a listening and broadcasting perspective.

Listening on the Short Waves, 1945 to Today (ISBN 978-0-7864-3996-6) is written from

the standpoint of the serious shortwave enthusiast the book is sure to please the reader with the broad perspective and detailed history it offers. The book begins with an examination of the broad shortwave audience. It then presents in detail the histories of the major North American shortwave clubs, and reviews the professional and listener-generated shortwave literature of the era. It also covers the DX programs and other listening fare to which shortwave listeners were most attracted, and the QSL-cards sought as confirmation of their reception. The book presents a chronology of the shortwave receivers available to listeners, and discusses how changes in receiver technology impacted the listening experience. It also addresses the important role that computers have played in the shortwave listening of recent decades. The book covers numerous topics in its nine chapters.

The first chapter provides a general introduction to shortwave broadcasting through WWII. The second chapter describes the listeners and why they tune the shortwave bands. The meat of the book is the third and fourth chapters. Chapter three covers the clubs with detailed histories of North American Shortwave Association, American Shortwave Listeners Club, Newark News Radio Club, Society to Preserve the Engrossing Enjoyment of DXing, the Universal Radio DX Club, the International Shortwave Club, Canadian International DX Club, and the Ontario DX Association as well as many others plus histories of many foreign clubs such as the World DX Club and British DX Club in England and the Australian Radio DX Club and New Zealand Radio DX League in the Pacific that had an impact on the U.S. listener. Chapter four provides a review of the literature of the shortwave world from official sources to electronic magazines, monitoring magazines and other references, shortwave books, surveys, DX newsletters, club publications, recordings and DX humor. The fifth chapter provides a history of the main DX programs, plus a review of other programs and station-run DX clubs. Can the world of shortwave radio be complete without a serious discussion of the equipment available to listen with? Chapter six is a detailed historical review of the

development of shortwave receivers since World War II; communications receivers, tabletops, portables, and kits. This includes communications receivers by Hallicrafters, Hammarlund, National, and other manufacturers past and present, with special attention to receivers that were intended for SWBC listening. The seventh chapter covers verifications, station QSL policies, reporting techniques, QSL literature, DX statistics, awards and contests, country lists, SWL-card swapping, and WPE calls. Finally, the modern era of shortwave radio gets into computers and the Internet which is covered in the eighth chapter. The ninth and final chapter enables Jerry to draw some interesting conclusions and offers his thoughts about the future of shortwave broadcasting and shortwave listening.

So what does *Listening on the Short Waves, 1945 to Today* say about NASWA? Plenty! In covering shortwave clubs, our organization plays a major role in *Listening*. NASWA plays a significant role in the post-war period as the shortwave listening hobby developed. Significant contributions from key members of our organization were recognized. People such as Bill Eddings, Bill Oliver, Don Jensen, Gerry Dexter, Bob Brown, Harold Cones and many others tell the clubs story.

I found myself fascinated by chapters three and four. Chapter three is a filled with a detailed history describing the development of many radio clubs brought back many memories of my early days in the shortwave hobby. If you are relatively new to the hobby, this will give you some perspective about how the hobby developed and changed over the years. This chapter will bring back a lot of fond memories for those that lived through these years while tuning the shortwave bands. In a sense, chapter four is much of the same but on the literature side of the shortwave radio hobby. A number of long gone publications are covered and illustrated once again providing the newcomer to the hobby some perspective while rekindling warm memories for long time radio hobbyists. I subscribed to many of the magazines and publications covered in

this chapter. The collection of illustrations featured in the book is outstanding. The old expression about a picture being worth a thousand words is often true as I found myself staring at many of the illustrations while recalling my encounters with many of these great vintage publications. Naturally, many of the active names that dominated the club scene and also the publication scene are brought back to life once again; many of the names are still major players in today's listening environment.

The many DX programs and receivers described in detail in chapters five and six continue the flood of vintage great memories. The Happy Station with Eddie Startz, DX Juke Box morphing into Media Network all from Radio Nederland's are but a sampling of the history on the program side. The receivers covered are basically anything you can dream up and more. My first purchased receiver, a National NC-190 with its shortwave bandspread, is one of many covered. Early tubes all the way to modern marvels is the best way to describe what awaits.

Another important positive aspect of this book is the Chapter Notes. I diligently read them flipping from chapter text to the notes for additional details. There is almost another book buried in the Chapter Notes which are worth reading. If you follow them along with the text of each chapter, they add considerable additional texture to the adventure.

Over the years, numerous DXers and shortwave listeners, myself included, have gotten to know Jerry Berg. As Chair of the CPRV and an avid fan of radio history, Jerry has accumulated a wealth of radio broadcasting history, both medium wave and shortwave. Often at radio gatherings, hobbyists get to listen to Jerry telling stories from the early days of radio broadcasting while leafing through one of the many CPRV albums of QSL cards and letters from the early days. These discussions usually perk one's interest in the subject matter. Thankfully, he took the time to put together this terrific book which captures so much of the flavor of that

time period from a listener's perspective. What sets this book apart from any other books written about the early days of radio broadcasting is that a radio hobbyist, with the insight of a true radio hobbyist, has written this one.

Listening on the Short Waves, 1945 to Today By Jerome S. Berg is a 423 page, hardbound (7 x 10 inch) book, which includes 120 photographs and a detailed index. For the benefit of those wishing to do additional reading or research, comprehensive end-notes and a selected bibliography contain extensive references to both popular and academic resources. The book is available direct from the publisher, McFarland & Co., Inc., Box 611, Jefferson, NC 28640 for US\$65.00 plus US\$4.00 shipping and handling in the United States and US\$6.00 elsewhere. Also, orders may be placed by telephone (1-800-253-2187) or FAX (1-336-246-5018) or through the publishers' website

<<http://www.mcfarlandpub.com>>. Orders can be charged to VISA, MasterCard, AMEX, or Discover cards. The books are also available from Universal Radio in Reynoldsburg, Ohio, and from major Internet booksellers such as Amazon, Barnes & Noble, and Waterstone's.

Listening on the Short Waves, 1945 to Today is a radio book that needs to be in every radio listener's library whether for general shortwave radio hobby interest, academic or historic purposes. It is a remarkable journey from the shortwave listener perspective on how the shortwave hobby developed and grew post World War II. It is a historical masterpiece of hobby nostalgia that charts a path from tube gear to computers. What better time than today to dig into some terrific hobby reading. Definitely, *Listening on the Short Waves, 1945 to Today* is a "must read" for every radio enthusiast.

Powerline, HomePlugs and gaming: eight things you should know

The ins and outs of this increasingly popular alternative to wireless home networking

By Keith Stuart

From UK Guardian via Mike Barraclough

Fed up of your wireless network? Tired of the fact that your PS3 can't seem to find your router through two walls and a radiator? You're not alone. PLC (or power line communication) adaptors utilise your home's electricity wiring to extend your broadband network and are increasing in popularity at an impressive rate. According to the Homeplug Powerline Alliance, 16 million units were sold last year, eight million more than 2006—and numbers are set to rise again this year.

I have to admit, I knew little about the technology before I put my Xbox 360 and PS3 in the attic room a couple of months ago and found that the wireless signal from

the router in my living room was degrading by something like 70%. A fellow journalist suggested PLC, so I contacted D-Link and asked to borrow a couple of their DHP-300s, a 200Mbps adaptor promising complete plug-and-play performance.

Which turned out to be accurate. I plugged one in to the mains socket near my router, connected it via an Ethernet cable, then slapped the other one in the socket two floors up, using another Ethernet cable to hook up my consoles. The two adapters found each other within about 20 seconds, and the result has been reliable, Ethernet-quality broadband access, with a huge reduction in latency. At around £90 for a pack of two adaptors it's not cheap, but it meant I didn't have to install a wireless booster on the first floor, or attempt to lay an Ethernet cable between my attic and my living room.

So is there anything newcomers should know about this technology? Well, yes, lots—some good, some bad. Here are eight key points to bear in mind.

Maintaining standards

Ah, format wars—aren't they just the best part of consumer electronics? Turns out, there are two types of PLC product: Powerline, supported by the Universal Powerline Association and featuring a chipset manufactured by DS2, and HomePlug, supported by the HomePlug Powerline Alliance and built around a chipset by Intellon. These, naturally, are not compatible.

However, the IEEE is attempting to ratify a single standard for PLC products, with the HPA and UPA in competition to provide the specifications. Unfortunately, at a recent meeting in Madrid, the IEEE proposal failed to garner enough votes for the standard to be put in place. On top of that, the International Telecommunications Union G.hn group is attempting to drum up support for a rival standard, which places greater emphasis on interoperability and according to Andrew Mulholland, Marketing Manager for D-Link UK and Ireland, has more backing from the industry.

This doesn't mean much at the moment, but a single technological standard could make PLC technology more understandable and accessible to consumers, and may lead to overall improvements in performance. Either that or you'll discover you backed the wrong horse in the format war and your adaptors are now obsolete.

Speed counts?

PLC adaptors tend to come in two flavours—85mbps and 200mbps. There's some disagreement on whether you need to opt for the faster solution for gaming, though I know several tech journalists who say they get by just fine with 85mbps. It's when you're shifting HD video content around your house that you may want to upscale. As Andrew Ferguson of Thinkbroadband con-

firm, "The AV (200Mbps) units are needed if you are going to be using fast broadband in the 20Mbps to 50Mbps region, or are perhaps streaming HD video (20-30Mbps) from a home media server."

Distance still matters

"HomePlug units are range dependent, so in large houses the speeds experienced will vary," says Ferguson. "From second to ground floor should be achievable normally—but I've found the AV (200Mbps) units to have a better range".

Go for a pure connection

Always put the adaptor straight into the wall rather than an extension socket—that'll cause 'noise' which effects speed. However, D-Link reckon new adapters can cope with crowded sockets and extensions thanks to their modulation and error recovery mechanisms.

It's more secure than wireless, but not completely secure...

There's a possibility that you may share electricity circuitry with a neighbour, so in theory, if they plug a compatible PLC adaptor into a socket, they could hitch a ride on your broadband network. However, most units come with software that lets you secure your network, granting access only to properly configured adaptors—i.e. your own.

Interfering with people

When I asked Andrew Ferguson if there are any disadvantages to the technology, he simply replied, "talk to radio hams..." So I did. It turns out PLC adaptors produce RF interference, which may knock out short-wave radio reception within the immediate vicinity. Radio hams aren't happy, viewing this technology an indiscriminate and clumsy airwave pollutant. There are pressure groups dedicated to securing legisla-

tion against PLC—I contacted one named UKQRM, which has produced YouTube videos purporting to show the interference in action. Elsewhere, the Radio Society of Great Britain is pressuring OFCOM to take action.

I asked Andrew Mulholland for a comment. He told me: “PLC devices inject very low power into the electricity lines to avoid having interference to radio services. Additionally all D-Link devices based on DS2 technology have all the IARU frequencies notched out, with an average attenuation of 40dB each. This enables the devices to be radio friendly. Furthermore, the DS2 chipset has been tested and subsequently demonstrated to Radio Amateur associations such as ARRL in the US.

“Additionally to this, D-Link PowerLine products based on DS2 technology have the capability to add any other notch should the need arise, providing a completely programmable and flexible way to solve any interference regardless of the frequency. This is a unique feature that allows these devices to be 100% radio friendly.”

I also had a chat with Jonathan Lishawa, the managing director of Comtrend, which provides Powerline adaptors for use with the BT Vision service. He assured me the company is working closely with OFCOM and BT to overcome any interference issues. “We had to answer lots of questions from BT, we had to go through exhaustive field trials, and we had to conform to all the EMC certification, as well BS1363 parts 1,2,3. I can’t stress this enough, we’d like to engage with the Radio Society, but in a constructive manner. It is a concern, but we believe we’ve addressed and continue to address that concern”.

This does, however, remain a complex area with several ambiguities and uncertainties. From anecdotal evidence it seems there are products available that interfere with shortwave frequencies, not just amateur bands but with radio stations like the BBC World Service. I have been contacted by an ex-BBC transmissions engineer who claims to have investigated dozens of interference

problems reported by radio listeners, and has been personally affected, bringing in OFCOM to remove a neighbour’s PLC adapter due to ‘spectrum abuse’.

While PLC adapters may allow the ‘notching out’ of affected frequencies, it looks like it’s up to individual users to ensure they’re not blocking radio reception for all their neighbours.

Interfering with your keyboard

On a more local level, there have been instances of Comtrend Powerline adaptors interfering with wireless keyboards and mice.

“To put this into perspective we’ve shipped into the UK over half a million pairs of adaptors, and we’ve had 20 customers who’ve had interference issues—and we’ve managed to resolve all of those,” says Lishawa, who adds that the solution is often to ‘notch out’ or block the offending frequencies via the adapter.

Interfering with your fridge

There’s also a possibility that household appliances can interfere with PLC technologies, but modern adaptors are designed to cope with this. As Mulholland states:

“Despite PLC technology using OFDM modulation with FEC error recovery mechanisms, the powerline channel originally was not designed to be a clean communication medium like coaxial and there are some house appliances that could introduce some noise into the channel that vary its conditions along the time (Signal to Noise ratio). These variations are handled by the technology adapting its modulation schemes to transmit the data without losses and this can produce slight changes in the performance during the day, although continuous SW and HW enhancements are introduced into the adaptors to minimize its effects in the speed and in their general performance”.

Get that?

European DX Council Conference 2008

Report by Michael Murray

[World DX Club *Contact*, November 2008]

The 2008 EDXC Conference, the 41st, was held in the western city of Vaasa, Finland during the early part of September at the Hotel Silveria. Vaasa was founded in 1606 and built mainly of wood, but was burnt to the ground in 1852. A new city of Vaasa was built over the next 150+ years on the coast, some 4 miles away from the old town, and now has a population of about 58,000.

The conference, which was held in conjunction with the Finnish DX Association Summer Meeting, started on the Friday evening with the raising of the Finnish and Finnish DX Association flag's outside of the hotel. Following this there was a short resume of the past 50 years of the Finnish DX Association (FDXA), by Risto Vahakainu, the chairman of the organizing committee. The participants then entered the conference room to hear Jari Perkiomaki give a presentation about the DX listening room and the various receivers and antennas available for the evening dxing. After a DX quiz, which was won by Alexander Beryozkin from St Petersburg, Russia on the various languages heard on the radio, presented by Arto Mujunen, we received greetings from a representative of the Vaasa city council. In celebration of the 50th Anniversary of FDXA, Kari Kivekas, the chairman and editor Heikki Aarrevaara, presented a new 200-page book describing the history of the organisation. The evening concluded at the grill pit, in the grounds of the hotel, with snacks and drinks.

Saturday morning started with the official opening of the conference by Kari Kivekas, the President of FDXA, Tibor Szilagyi, EDXC Secretary General, Risto Vahakainu and Jari Sinisalo, organising committee. During the opening, Tibor Szilagyi mentioned that the Council now had 10 member clubs, 3 clubs and one radio station as observers, and one private member. He also mentioned that it

was very difficult to obtain any response from radio stations invited to attend the conference. A minute's silence was then held for Lajos Horvath, DX editor of Radio Budapest, who had passed away in March. Mr. Horvath had attended the EDXC conference held in Tampere in 1992. Greetings were also received from a number of non-attendees.

The next item on the agenda was an international panel featuring broadcasters and representatives of the Council. During this period we were introduced to Mr. Hasan Mueminoglu and Ms Ufuk Gecim from the Voice of Turkey. Mr. Mueminoglu spoke in Turkish about the station and the work it is doing, as they look more and more towards Europe. His words were translated into German and then into English for the audience. The station broadcasts in 30 languages on shortwave and in five languages on FM, for tourists in the Antalya area.

Arto Mujunen, from the IBB monitoring station in Finland, spoke next about his work, and the fact there are ten monitoring stations and twenty private monitors in the old Soviet Union. He also talked about the HFCC Conference, which was held in Moscow during August. Arto mentioned that international shortwave broadcasting is not dying, as it is still very difficult to find available frequencies. While there are fewer broadcasters, many more are now using relay stations. An interesting note is that international broadcasters are not interested in using the tropical bands.

At many of the EDXC Conferences, a city sight seeing tour takes place, and this year was no different. However, this time we drove slowly around the small city of Vaasa, which has been occupied by Sweden, then Russia, before it became part of Finland following independence in 1917. The first stop was to view the longest bridge in Finland. Replot bridge, which replaced a ferry connection in August 1997, takes you from the city of Vaasa to the island of Replot which houses the Kvarken Archipelago

World Natural Heritage Site, listed in 2006 by UNESCO. The resident population of the island is over 2000. After a drive round the island, we stopped at a local restaurant for a buffet lunch, which consisted of warm and cold meats, warm and cold fish, cheese and drinks. From the windows of the restaurant you could look out over the archipelago. On our return from the tour the official conference photograph was taken outside of the hotel.

The afternoon sessions began with a lecture by Tarmo Kontto on the subject of Software Defined Radio's. These types of radio came onto the market with the Win Radio and now you have the SDR-IQ and Persens. The future looks at featuring remote control, combined SDR and traditional receivers, with bigger hard-drives, more computer power, and the recording of a wider spectrum i.e. 1600kHz.

Jukka Kotovirta and Jukka Soini then summarised, for us, the results from of the summer FM DX season, which was the worst for sporadic E reception. It was reported that the Vaasa area has had poor reception for the past two years. Risto Vahakainu then gave us the latest news about Dxpeditons, and introduced five experienced MW Dxers, who discussed conditions they found from various locations in Finland, Sweden and the United Kingdom during solar minimum in 2007. These conditions did not provide as many catches as in previous lows 11 years and 22 years ago. Esa Saunamaki and Trevor Twyman, from the Scandinavian Weekend Radio, gave the final presentation of the day. They provided a live studio for their monthly Saturday broadcast.

The annual conference banquet, a typical Finnish meal, was held during the evening, in the hotel restaurant. Following the meal, Torre Ekblom and Jyrki Talvitie made speeches looking back over the history of Finnish Dxing up until the present day. Greetings were then received from the Danish SW Club International, Swedish DX

Federation, Hungarian DX Club and the St Petersburg DX Club. Trevor Twyman provided the entertainment, in which he looked at the differences between Finns and Brits. The evening finished with a lottery and auction.

On the final morning, the EDXC held its annual club meeting. Tibor Szilaygi received an invitation from Edward Dunne of the Irish DX Club to host the 2009 conference in August next year in the capital Dublin. A provisional invitation was also received from the Voice of Turkey (TRT) for the 2010 conference to be held in either Ankara or the Antalya area. Torre Ekblom reported on the low activity of the member clubs to any suggestions and activities, and asked for more participation. The new web site is now up and running at www.edxc.org, which is now much easier to use. The site has an updated Country List and contains reports from recent conferences, DX meetings and a history of the Council.

Anker Petersen reported that he is looking for assistance in updating the Reporting Guide.

Tibor then reported that the St Petersburg DX Club had become new Members, while the British DX Club and BCL Sicilian DX Club had become Observer Members. In addition two people had joined as private members. The final item on the agenda was a Geographical DX quiz organised by Jari Sinisalo and won by three Finnish attendees. The conference closed with the lowering of the flags.

In conclusion, 112 people had attended the conference from twelve countries, with the majority coming from the host country Finland. Other countries represented were Russia, USA, Sweden, Turkey, Denmark, Ireland, Italy, Japan, Vatican City, United Kingdom and Germany.

Report by Michael Murray, with additional material taken from the EDXC report written by Anker Petersen.

Radio Mosoj Chaski, Bolivia

By Marlin A. Field

Radio Mosoj Chaski ("New Messenger") has been broadcasting in the Quechua language since April 1991 from Cochabamba (See *Insert No. 1*), Bolivia (See *Insert No. 2*), on 3310 kHz. It was started by the Sudan Interior Mission (SIM), which started ELWA in Monrovia, Liberia, many years earlier.

The programs include indigenous Gospel music, Bible teaching, leadership training, and a wide range of information to improve the lives of the mountain Quechua people. Each year Christian workers from the cities of Bolivia travel long hours over the mountainous roads to bring teaching and encouragement to the remote Quechua villages. Each year the rainy season makes the roads impassable and so radio is very important. In addition, radio can reach more people than the limited number who go in person, and with the pre-tuned solar-powered radios even more so. Radio Mosoj Chaski also has a literature ministry. Radio team members have produced a Bible dictionary, concordance, and handbook and are working on a Bible atlas. The station has also produced some Christian videos and DVDs, a ministry it wishes to expand, in part by dubbing in Quechua some Christian material now only in English.

One person involved in the literature ministry and heard on the station is Simón Chavez. He quit school in the fifth grade. Later he attended a Bible Institute in the city of Sucre, Bolivia. He spoke the Quechua language but he had to learn to write the language and then to use the computer. In addition to writing radio programs, he wrote and published a one-year devotional in Quechua called "Bread and Heaven." (English translation of title). Last year he graduated high school with honors.

Insert No. 1: Cochabamba is a city in central Bolivia, located in a valley bearing the same name in the Andes mountain range. It is the capital of the Cochabamba Department and is the third largest city in Bolivia with an urban population of 608,276 in 2008 and a metropolitan population of more than 900,000 people. The name derives from a compound of the Quechua words *qhocha*, meaning "lake", and *pampa*, "open plain". Residents of the city and surrounding areas are commonly referred to as *Cochabambinos*. Cochabamba is known as the "City of Eternal Spring" and "The Garden City" due to its spring-like temperatures year round.

Insert No. 2: Bolivia, named after independence fighter Simon Bolivar, broke away from Spanish rule in 1825. Much of its subsequent history has consisted of a series of nearly 200 coups and countercoups. Democratic civilian rule was established in 1982, but leaders have faced difficult problems of deep-seated poverty, social unrest, and illegal drug production. In December 2005, Bolivians elected Movement Toward Socialism leader Evo Morales president - by the widest margin of any leader since the restoration of civilian rule in 1982 - after he ran on a promise to change the country's traditional political class and empower the nation's poor majority. However, since taking office, his controversial strategies have exacerbated racial and economic tensions between the Amerindian populations of the Andean west and the non-indigenous communities of the eastern lowlands.

Kim's Column

Did you DX the Queen on Christmas?

I wanted to listen to the Queen's Christmas message to the Commonwealth the proper, old-fashioned way: via shortwave. But, with no BBC frequencies beamed our way, and with pesky noise from some local source, I would have had to DX Her Majesty.

Insufficiently ambitious to do so, I opted for the BBC Radio 2 audio stream. (Radio 2 is actually quite a good station to listen to on Christmas day, with lots of specials and request programs.) The Queen's message came right at 1500 UTC, but suffered a few short dropouts throughout.

At the end, I was surprised not to hear the "God Save the Queen." That, for me, is a vital part of the experience. So, quickly as I could, I made my way to the BBC World Service stream, where the Queen's message started at 1505 UTC. This time, the UK national anthem was duly played at the end of her talk.

Listening to the Queen's Christmas message on BBC World Service is a slice of international broadcasting history. In 1932, Sir John Reith, founder of the BBC, suggested the idea to then King George V, as a way to inaugurate the BBC Empire Service, the shortwave predecessor to BBC World Service.

The Queen's message, and the Festival of Nine Carols and Lessons the previous day, sound better to me on shortwave. The ethereal quality of the occasional fading, of the less than perfect signal, give a sense of the actual distances covered by the old Empire, and more recently the Commonwealth.

I wonder how many people in the Commonwealth make a point of sitting by their shortwave radios on Christmas day to hear that message? In how many countries, where the Queen is head of state, is the message relayed by the local broadcaster? I noticed that CBC, for example, did not relay it. Canadians, presumably, would have to access the BBC via internet to hear it.

New media of international broadcasting, blocked

As more and more international broadcasters rely on FM relays of their programs inside their target countries, more and more countries are disinclined to those FM relays. Azerbaijan, for example, plans to take BBC and RFE/RL off its FM dial at the end of 2008, telling those stations to use cable, satellite, or the internet instead. Kyrgyzstan stopped FM relays of BBC, at least for a time, and as of this writing they won't let RFE/RL back on until the U.S.-funded station agrees to submit its content in advance. RFE/RL says they won't that. An RFE/RL press release proclaimed: "RFE/RL President Jeffrey Gedmin said the move may force Radio Azattyk [RFE/RL's Kyrgyz service] to put its broadcasts exclusively on shortwave frequencies for the first time since the collapse of the Soviet Union." How awful.

VOA, BBC, RFI, and other stations broadcasting in Russian have found themselves squeezed from the FM dial in Russia due to various regulations and political pressures. In response, they have not stepped up shortwave transmissions, on the premise that Russians don't listen to shortwave like they used to, and probably also because they no longer have the shortwave transmitters for such a saturation effort.

Instead, these stations have increased their internet offerings in Russian. This makes sense, as Russian are enthusiastic and savvy

internet users. But Russian officials also have the savvy to censor internet content. This is not happening – yet—against international broadcast sites, but it is to certain opposition sites. Will Russia eventually join China, Iran, and other internet-blocking nations?

Meanwhile, in Sri Lanka, BBC has a contract for its Sinhala and Tamil programs to be relayed by the SLBC. Lately, SLBC has been “jamming,” or inserting noise, just as the BBC content deals with certain sensitive Sri Lankan domestic issues.

So, in Azerbaijan, Kyrgyzstan, Russia, and Sri Lanka, among other nations, the local rebroadcasting model of international broadcasting is no longer working. Is shortwave the fallback? The big questions here are whether people in these countries still have shortwave radios to listen to, and, if they do, are they willing to listen to them to get uncensored news?

It's ironic that, in Russia, more people may have had access to shortwave back in the Soviet days, when Latvian made VEF receivers were in the shops. Now Russian have to buy Asian imported shortwave radios, which might be more expensive, and harder to find.

BBC backpedals in hiring a new World Service director

In November, the BBC's decision to cut back on its Russian radio broadcasts, in favor of more internet, caused a flurry on controversy, and letters backs and forth in The Times of London. BBC World Service director Nigel Chapman was recipient of much

of that wrath. By the end of November, it was announced that Chapman would leave World Service to become chief executive of the children's charity Plan International.

During December, The Telegraph newspaper revealed another controversy: the vacancy announcement for Chapman's replacement as World Service director had a very short deadline. This made it difficult for outside applicants to get the necessary materials in on time. A Conservative MP said, “This does sound like a jobs for the boy stitch-up.” In other words, BBC probably had already decided who it wanted as new BBCWS director.

Former BBCWS director John Tusa was among the signers of a letter to The Telegraph: “It is clear from even the most cursory comparison of broadcasting schedules that the claims by the minister and Nigel Chapman, the outgoing director, about ‘increased cultural output’ are empty; all longer features about literature, history and British culture are to be axed.... To maintain the BBC World Service's reputation, the new managing director must be chosen through a fully open selection process. In addition, a new managing director must be authoritative in news and current affairs, capable of resisting pressure from all governments and should not believe that the World Service can be founded on the perceived importance of marketing.”

This would ring true to those of us who miss the variety we used to hear on World Service.

Views expressed are my own. More at www.kimandrewelliott.com.

CANADA 6070 **CFRX** Toronto is being widely reported as back on air with new equipment, but lesser signal due to new northerly directionality. Station relays 1010 CFRB.

CHAD 4905 **Rdif. Nat. Tchadienne**, Gredia, N'Djamena, 1609-2231*, Dec 09, 10, 13, 14, 16, 17, 18 and 19. Back from 6165, but on Dec 22 back on 6165! Arabic talk about Muhammed and Ramadan, French ann, Afropop, Rap, (Liangas via EDXP, Mille, Otavio, Petersen, Romero, Ronda, Savolainen and Schulze). (DSWCI DX-Window/Petersen-DK)

CLANDESTINES 3960 **Radio Racja**, via Sitkunai, Lithuania, *1530-1730*, Nov 27, 28, Dec 03 and 07, Belarusian talks on new B08 schedule, often ID's and Radio Racja jingles, Belarusian pop songs, interview of a journalist from AFP about the Belarusian President, a couple of statements in Arabic and Farsi, ex-7565. (Petersen and Romero/DSWCI DX-Window)

7315 **Radio Dabanga**, via Wertachtal, Germany, *0430-0450, Nov 24 and Dec 07, several opening IDs in Arabic mentioning Darfur, local vocals music selections with short ann between songs and numerous IDs. (D'Angelo/FCDX, Petersen) They verified a report to the radiodabanga@yahoo.com e-mail address. Per the station, "We do not

have a fixed QSL yet. But I hope this information is helpful to you". The three documents attached to the e-mail were: (1) How to receive Radio Dabanga, (2) R Dabanga On Air!, and (3) The meaning of Dabanga: life is changeable for good or bad.

Press Now states that "Radio Dabanga is a project of the Radio Darfur Network a coalition of Sudanese journalists and international (media) development organizations, supported by a consortium of international donors, humanitarian community organizations and NGO's. Radio Dabanga is conceived, operated and facilitated by Press Now in The Netherlands."

The third document notes that Dabanga is a large storage vessel used by Sudanese farmers to preserve food. Also, from the third document comes the following: "Dabanga is a small village near El Fasher (North Darfur). It is also a well in the Wilayat area in South-Darfur 528 meters above sea level. In December 2007 over thousand people were displaced from this area due to insecurity in the area and lack of humanitarian assistance. (D'Angelo, Nov 30/DSWCI DX-Window)

DOMINICAN REPUBLIC 5010, **Radio Pueblo**, Santo Domingo, 2325-2350, Dec 13, popular Christmas music "...Navidad Radio Pueblo, parranda naviden de la 15-10 AM estereo digital...", at 2320 ID: "...en la Republica Dominicana, origina su senal ...Radio Pueblo 15-10 AM estereo digital...banda internacional de 60 metros..." Sitkunai, Lithuania (DX Mix - Bulgaria)

LATVIA 9290 *Latvia Today*, via Ulbroka, 1345-1355, Su Dec 14, talk about Latvia in English and rock music. I understand this transmitter will be closed down at yearend, so glad I had a chance to hear it this well. (Hauser-OK/DSWCI DX-Window/Petersen-DK)

MADAGASCAR KNLS says that they soon will be broadcasting an additional 30-35 hours from their new station in Madagascar in at least three additional languages: Arabic, Spanish and Portuguese. The construction in Madagascar is on schedule. (November NASB Newsletter direct and via DXLD) The transmitter building will contain three 100 kilowatt transmitters. The antenna towers are up and the wire will begin to be stretched in January 2009. (World Christian Broadcasting November bulletin/via WDXC-UK Dec Contact Dec 2/ Worldwide DX Club's DX Magazine/Eibl-DE)

MEXICO 6104.81, *XEQM Candela FM*, Merida, 1455-1500, Dec 10, back with strong signal, but distorted. (Wilkner). Also heard at 2030 with typical tropical music, IDs and commentaries in a Mayan language and a few words and ann in Spanish. Appeared to be a relay of XEMQ Merida 810 MW. Best reception since XEQM has been paralleling XEMQ. Also heard excellent at 0300-0400, for first time heard signal of XENK-620 over XEQM, "Radio 6-20," in Mexico City. Schedule is: 1100-0100 XEQM carries "Yeol lik" in a Mayan language, and at 0100-0500 the programming of XENK. (Santiago in Conexion Digital/DSWCI DX-Window)

PERU 5059.2, *La Voz de las Huarinjas*, Huancabamba, 1140-1200, Dec 14, folkmusic, to give time: "...seis, seis de la manana con 42 minutos La Voz de las Huarinjas les acompaña con la programación de la manana...", poor, bad modulation. (Rodriguez/DSWCI DX-Window)

6195.8, *Radio Cusco*, Cusco, 2204-2310, Dec 13, Reactivated, not heard by me since Aug 2007 when it was on 6193.4. Featuring a long program from Iglesia Dios es Amor without announcements or ads. During the program a feature called "Mensajes Cantados" with sung praises. At 2308 a short ID like "...Radio Cusco...", then continued

with another evangelical program called "La Voz de la Profecia." Also heard at 1100, Dec 14, again introducing Iglesia Dios es Amor. (Rodriguez/DSWCI DX-Window)

Pirate Radio Report

Chris Lobdell • P.O. Box 146 • Stoneham, MA 02180-0146 • crlobdell@verizon.net

Happy New Year and welcome to the January 2009 edition of the *Pirate Radio Report!* There was a lot of pirate activity over the Christmas Holiday period, so we've got lots to report.

Euro Pirates For those of you living on the East Coast Of North America, don't forget to try for those Europirates. Best times, conditions permitting, are from 2100-0300 UTC local Saturdays and from 0700-0900 on Sunday AM. Frequency range from 6200-6400 kHz.

Channel Z, heard on 6925 AM mode, December 20th at 1628 UTC Xmas special, opened with the B-52's "Channel Z" [Rohde-OH] same show noted here at 1615 UTC on December 26th, closing with a Ramones Christmas tune. Maildrop: Box 109, Blue Ridge Summit, PA 17214. [Lobdell-MA]

Gospel for Antarctica, the station founded by Preston Nickles, was logged on 6925 AM mode, from 1722-past 1743, on December 21st. My first catch of this new pirate playing various rock tunes, "Lost In Space" sound clips. Maildrop: Box 146, Stoneham, MA 02180 [Rohde-OH]

NOEL, a Christmas themed pirate, was heard on 6950 AM mode at 1841 UTC on December 21st, playing Classic Christmas music ID: "you are listening to NOEL Radio all Christmas all the time" Good. [Rohde-OH]

Northwoods Radio, heard on 6925 USB from 1624 UTC on December 20th SIO=151. I heard little of this broadcast, but at a signal peak there was a clear ID and the loon call IS [Zeller-OH] Heard fairly well in MA featuring a comedy bit called "Fessenden's Follies", ID at close. [Lobdell-MA]

Sycko Radio 6925 USB, UNID (later identified as Scyko Radio via FRN website) noted at 2135, UTC on December 7th.8. Indistinct words to several traditional fiddle tunes sung—including "Old Dan Tucker"—with indistinct talk between. Modulation was poor enough that I only could make out

the tune from the singing and could not make out any words. Off at 2142. Poor [Taylor-WI]

Undercover Radio, logged on 6925 USB from *2227-0043* on December 14th-15th. Lengthy broadcast that actually appeared to be in two segments. At first there was rock music with no IDs. But, then after an ID at 2346 with their IS slogan of "don't let them know what they are doing," into a more typical Dr. Benway program with a discussion of psychology. Gave address of Undercoverradio@mail.com for reports. Modest level that sometimes faded out completely toward the end. [Zeller-OH]

WBNY-Radio Bunny noted on the 48-meter frequency of 6210 in USB, from 1402 to 1558 UTC on December 21st. Phone interview with Bozo, plus lots of Christmas stuff [Rohde-OH]

WEAK Radio 6950 USB at 1720 UTC on December 20th playing punk type rock with many IDs as "W.E.A.K. WEAK Radio" [Rohde-OH]

WEAM, heard on 6925 kHz at 1444 UTC, playing 70s rock music, ADs for Toyota. Fair signal on December 7th. No contact info given. [Fisher-MA]

WMR-We Monkey Radio. An apparent new pirate was heard on 6210 kHz at 2038 UTC on December 7th. Played song Bette Davis Eyes, talked about the short attention span of Monkeys. [Lobdell-MA]

Wolverine Radio noted on 6925 USB from 0246-0310 UTC on December 13th. ID at 0252 as "Wolverine Radio." Music from the 1970's thru the 1990's featuring the Hollies, The Police, Steely Dan, CCR and many others. Very good signal strength but lousy propagation. [Wood-TN]

Many thanks to the following fine contributors: John Fisher-MA, Mike Rhode-OH, Mark Taylor-WI, George Zeller-OH. Happy Pirate DX! 

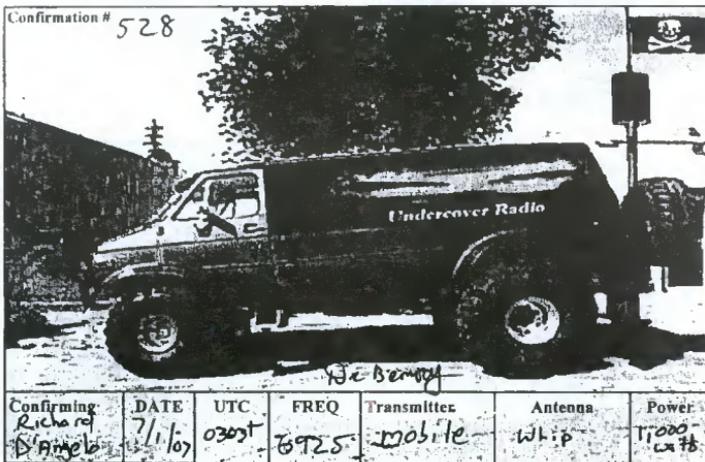

QSL Report

Sam Barto • 78 Blakeman Road • Thomaston, CT 06787

ANGUILLA: Caribbean Beacon 6090 f/d cd. in 67 ds. for \$1.00. (Colton-FL).
CZECH REPUBLIC: Radio Prague 7345 f/d cd. in 12 ds. for \$1.00. I also received the ever so popular Radio Prague "sponge" - go figure. (Colton-FL)...I don't have a comeback. I am speechless..Sam.
ENGLAND: Deutsche Welle 6130 via Skelton cd. in 3 wks. w/ schedule and a list of transmitter sites.(Field-MI). 15640 via Rampisham cd. in 3 wks. w/ full schedule. (Field-MI).
ETHIOPIA: Radio Fana 6110 f/d cd. in 38 ds for \$1.00 and a local post card.(Colton-FL).
ISRAEL: Galei Zahal 6973 f/d cd. in 40 ds. for \$1.00. The v/s suggested that I try to receive their station on 15785. Addr: Galei-Zahal, Military PO 1005, Zahal, Israel. (Colton-FL).
MEXICO: XERTA Radio Transcontinental de America 4810 f/d ltr. from Lic. Ruben Castanedo Espindalo, Gerente general. I received two QSLs from this station

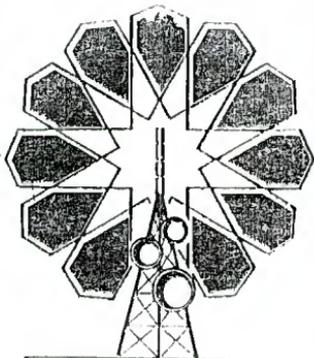

STATION NOTES: Radio La Hora 4857.5 v/s DXer Carlos Gamarra Moscoso, QSL Manager. Addr: Avenida Garcilaso 411, Distrito de Wanchaq, Cusco, Peru

Tropical Band Loggings

2000-5900 kHz

Scott Barbour • P. O. Box 893 • Intervale, NH 03845 • srbjswl@yahoo.com

- 2310 **AUSTRALIA VL8A** Alice Springs 1125 Heard as //2325; not as strong; 11/23. (Barton-AZ) 1103-1120 Good audio; //2325; 12/12. (Wilkner-FL)
- 2325 **AUSTRALIA VL8T** Tennant Creek 1115 Some type of intrview prg to BoH & fanfare mx into "ABC" nx; 25453; 11/23. (Barton-AZ) 1317 Story about Tasmania; good on peaks; //2310-much weaker; //2485-somewhat weaker; 11/23. (Strawman-IA) 1110 Strongest of the three NT stns at 1110; 12/10. (Wilkner-FL) 1404 Pop mx prg; weak sig slightly better than //2310; no sig heard on //2485; not even het; 12/14. (Strawman-IA)
- 2379.86 **BRAZIL R. Educadora** Limeira 0900 Weak but steady sig; 11/29. (Wilkner-FL)
- 2485 **AUSTRALIA VL8K** Katherine 1236-1255 ABC nx w/ W anc in EE; wx for Alice Springs & Darwin at 1239 followed by prg from 105.7 ABC Darwin.; fair & steady but //2325 VL8T-Tennant Creek was quite poor w/ pop vcl selechs until 1200; ABC ID & nx in EE followed by features; next day all three (2310 Alice Springs) noted // w/ mx around 1220; 11/24. (D'Angelo/FCDX-PA) 1050 Strongest of the three NT stns; 12/8. (Wilkner-FL)
- 2730h **USA WSBA** York-PA 1100-1115 3rd harmonic of 910; located about 25 miles from my location; FOX nx at 1100; lcl York County nx; News Radio 910 WSBA IDs; traffic & wx rpts; weak in noisy condx & audio somewhat distorted; no distortion on fundamental 910; 2nd harmonic not heard; 12/5. (Alexander-PA)
- 2849.95 **NORTH KOREA KCBS** Pyongyang 1407 Patriotic vcls in operatic style; v. weak; just above noise lvl; 12/14. (Strawman-IA) 2850 1206 M & W anc w/ KK talk under co-ch. data QRM; poor; 11/18. (Barbour-NH) 1312 Two ancrs alternating; fair; 11/23. (Taylor-WI) 1132-1216 Mix of KK lang mx & talk; poor at t/in but steadily improving to fair; //4450 was p-f; 11/25. (D'Angelo/FCDX-PA)
- 3105s **USA WWRB** Morrison 0345-0425 3105 leapfrogging spur of 3185; also 3225 leapfrogging spur of 3145; 40 kHz separation b/w each freq; spurs at v. weak to threshold lvls; 11/26. (Alexander-PA)
- 3200 **SWAZILAND TWR** Manzini 0305 Lcl mx & listed Ndebele dialect; fading by 0323; 11/21. (Strawman-IA) 03050326* M anc w/ relg talk in listed Ndebele followed by choir vcls & ID at close down; IS repeated several time before final ID by M in EE; good sig; 11/24. (D'Angelo/FCDX-PA)
- 3215 **USA WWCR** Nashville 0830-0840 Usual claptrap including phone conversation w/ 'Janice' about the US gov. making people undergo brain implants; 0838 launched into prerecorded speech by Congressman and one-time Pres. candidate Ron Paul in Houston; 11/26. (Barker-PA)
- 3220 **ECUADOR HCJB** Pifo 1046-1103 W anc preaching in Quichua lang followed by choral singing & more talks; time pips & ID at 1100 followed by more relg discussion; fair; 12/6. (D'Angelo-PA)
- 3230.58s **USA WWCR** Nashville 0555-0605 Weak spur of 3215; matching spur on 3199.42 at threshold lvl; +/- 15.58 kHz from 3215; 11/26. (Alexander-PA)
- 3235 **PNG R. West New Britain** Kimbe 1120-1140 W anc; some audio; best sig in a while; 12/12. (Wilkner-FL)
- 3240 **SWAZILAND TWR** Manzini 0325 Organ mx & possible sermon in listed Shona; fair w/ fading; 11/21. (Strawman-IA) 03050320 M anc w/ relg talk in listed Shona; good; 11/24. (D'Angelo/FCDX-PA)
- 3250 **HONDURAS R. Luz y Vida** San Luis 1110 SS only relg prgring; often SS/EE translation; 12/10. (Wilkner-FL)
- 3260 **PNG R. Madang** Madang 1148-1204* Ballads & anc in Tok Pisin thru ToH; NBC at 1202 w/ EE ID; nx & wx; pulled the plug at 1204; poor; 11/18. (Barbour-NH)
- 3303U **CHINA Zhoushan Maritime Meteorological Radio** *1400-1412* IS (Kenny G instrumental mx-"Forever in Love"); W in CC w/ assume the maritime wx condx; poor; QRN; after hearing them on Sept 29 & 30 I never heard them again until today; 12/5. (Howard-CA) [nice catch-ed.]
- 3320 **SOUTH AFRICA R. Sondergrense** Meyerton 0355-0401 ID & nx in Afrikaans at ToH w/ ments. of Zimbabwe. Poor; 11/28. (Wood-TN)
- 3325 **PNG R. Bougainville** 1120-1130 (P); Some audio; also noted 3315 & 3365 same time; 12/12. (Wilkner-FL) [WRTH list this PNG as R. Buka; Aoki lists R. North Solomons; DBS-10 says Bougainville. Take your pick-ed.]
- 3329.53 **PERU Ondas del Huallaga** Hunuco 0930 Noted early s/on w/ vcls & percussion; W w/ "atenciones" heard which seem rare in 2008; [date?-ed.] (Wilkner-FL) 1020-1100 Continues to provide a strong sig; much better than in past seasons; M & W anc; Feliz Navidad; Atenciones; mx

- absent during this period; 12/8. (Wilkner-FL) 3329.6 0233-0301* (P); Huaynos & traditional highlands sounds; a few SS ancmnts in b/w; apparent s/off ancmnt prior to s/off w/o anthem; weak; het; notched CHU but voice ancmnts caused some problems; overall the CHU carrier knocked down noise which helped; 11/18. (Jensen-WI)
- 3330 **CANADA CHU** Ottawa 1038-1048 After the usual time ancmnt was the following Beginning January 1st 2009 time signal transmissions on 7335 will be moved to 7850 kHz. Visit nrc.gc.ca/inms. However; that didnt seem to work but I did find the relevant info at http://inms.nrc.cnrc.gc.ca/time_services/shortwave_broadcasts_e.html; exc. sig here but //7335 was p-f at best; 12/13. (D'Angelo-PA)
- 3335 **PNG R. East Sepik** Wewak 1245-1313* Tok Pisin/EE; EZL tunes to closing cments; NA & several minutes of OC at 1300; then the mx started back up again; (P) relay of the nat'l network; abruptly pulled the plug at 1313; f-p; 11/23. (Schiefelbein-MO) 1218-1244 M ancr w/ long talk re various activities in PNG; TC; more features; mx from 1230; fair recep but beginning to fade by 1243; 11/24. (D'Angelo/FCDX-PA)
- 3340 **HONDURAS HRMI** Comayagua 0250-0304 M w/ inspired EE preaching followed by phrase-by-phrase translation into SS; fair; 12/7. (Wood-TN) 0502-0507 M ancr in SS; upbeat tunes followed by slow; sappy mx; sigs to 40dB+; good; [date?-ed.] (Parker-PA)
- 3350 **COSTA RICA REE** Cariar de Pococ 0304 ID followed by promos w/ soft-spoken M & W ancres; vg; 12/7. (Wood-TN)
- 3384.97 **PNG R. East New Britain** Rabual 1332 Pop mx prg; weak studio audio but S9 carrier; 11/23. (Strawman-IA) 3385 1145-1305 W ancr hosting mx prg featuring island mx; country & western tunes; NBC nx at 1300 by W in EE; p-f improving to f-g; 11/24. (D'Angelo/FCDX-PA)
- 3396 **ZIMBABWE ZBC** Gweru 0120-0400 M ancr in lcl lang w/ pop mx prg & later; lcl tribal vcls prg; p-f early but improving to good around 0330; 11/24. (D'Angelo/FCDX-PA) 0243-0405 African hi-life mx & songs; 0300 the usual canned ID in EE; back to hi-life mx & vern.; TC's ("18 past 5", "29 past 5", etc.); 0356 R. Zimbabwe ID & long choral anthem till ToH; drums & into prg of relig mx; f-p w/ QRN; v. enjoyable hi-life mx prg!; nothing heard on 4828; seemed to be off the air; 11/30. (Howard-CA) 0120 (P); Afropop/hi-life mx; v. weak tho improved after BoH re-check; 12/3. (Barbour-NH) 0123-0134 (P); Hilife mx w/ M ancr b/w selecx; no discernible ID at BoH; poor; 12/12. (Barbour-NH) 0336-0403 M ancr w/ talk in lcl lang hosting a pop mx & lcl mx prg; ID followed by nx at 0400 w/ W ancr; fair; 12/13. (D'Angelo-PA)
- 3905 **INDONESIA RRI** Merauke 1137 (very T); M ancr w/ Indo talk & mx; slow fades & peaks w/ peaks being barely audible & troughs being little more than hets; the sig was definitely in AM & the presence of mx makes me believe it was not an ARO; 11/29. (Taylor-WI)
- 3905 **PNG R. New Ireland** Kavieng 1217-1233 W ancr in Tok Pisin w/ a few EE phrases noted; up-beat island mx; (T) NBC in passing at 1222; f/out by BoH; f-p; 11/18. (Barbour-NH) 1125-1226 Nice prg of island mx; ID & EE talk at 1159 by W ancr ment. NBC nx but more mx happened at 1200 instead of nx; p-f battling QRM from AROs but steadily strengthened to fair & QRM disappeared; 11/25. (D'Angelo/FCDX-PA)
- 3912 **SOUTH KOREA V. of the People** Kyonggi-do 1343 Fair at t/in w/ long talk by M in KK; song by W & chorus at 1352 & back to KK talk by W ancr; beginning to fade by 1355 but still audible at 1400; 12/19. (Ronda-OK)
- 3925 **JAPAN R. Nikkei** Tokyo-Nagara 1348 M & W in extended discussion; reached S9 on peaks; 12/2. (Strawman-IA)
- 3985 **CROATIA Hrvatski Radio** Deanovec 0545-0550 Croatian talks; strapping 70dB sig; 10/30. (Parker-PA) 0258 Contemporary mx; 0300 "This is the Voice of Croatia with Croatia Today." EE prg start w/ headlines & nx items starting w/ Croatian political nx; fair; 12/13. (Taylor-WI)
- 3985 **UNIDENTIFIED** 0311-0322 Flute mx w/ vcls; QRM from VOX; poor; 12/8. (Wood-TN) [Deanovic, Croatia?-ed.]
- 4220 **CHINA Qinghai PBS** Xining 2326 Interesting pop mx that sounded like a fusion b/w CC & .S Asian tunes; then a long conversation b/w two people, in listed Tibetan, who sounded like they were both on the phone; first time heard here since last winter; listed as a seasonal freq only; poor; 11/20. (Schiefelbein-MO) [I enjoy DXing the CC seasonal regionals-ed.]
- 4319U **DIEGO GARCIA AFN** 2225-2230 In EE w/ NPR nx; 40dB sig; exc; 11/10. (Parker-PA) 2347-0003 Sunday morn political affairs prg until 2355 when a series of PSAs & prg promo ancmnts took place; nice ID at 2359 (You are listening to AFN) followed by nx at 0000; p-f w/ narrow filter necessary to avoid UTC QRM; 11/23. (D'Angelo/FCDX-PA) [UTC QRM?-ed.] 1405-1510 CBS Radio Network News; "You are listening to AFN"; Dr. Joy Browne call-in talk show; ID "American Forces Network"; 11/28. (Howard-CA) 1436-1449 Dr. Joy Browne call-in prg; Dept. of Defense sponsored ancmnt by McGruff the Crime Dog about the dangers of online chat rooms; "This is AFN"; 12/4. (Howard-CA) 2240 Mx & talk; RTTY QRM; weak; 12/8. (Dexter-WI) 00050035

- Nx; military PSAs; Sports talk prg w/ call-in; 0010 promos; fill mx; more call-ins re football; 00290031 caller talking about the Green Bay Packers!! brief promo at 0031 re vehicles; more football talk; acatch I've been trying to make for years; poor; 12/14. (Taylor-WI)
- 4330 **CHINA Xijiang PBS** Urumqi 0103-0133 (P); M & W anc in Russian-sounding lang; listed Kazakh; b/w musical selec's; weak but in the clear; 12/6. (Barbour-NH)
- 4440h **USA WSRC** Fair Bluff-NC 0330-0400 3rd harmonic of 1480; Country Oldies Show on Westwood One Network w/ country mx; lcl ad for Guitar Center; lcl ads w/ many ments. of Fair Bluff, North Carolina; v. weak but f-g on peaks; 1480 kHz not heard; 12/14. (Alexander-PA)
- 4451.14 **BOLIVIA R. Santa Ana** Santa Ana de Yacuma 2245-2255 M en espanol; high band noise; 11/29. (Wilkner-FL)
- 4460 **CHINA CNR-1** Beijing 1218 M & W w/ CC talk then W vcl; nasty CODAR QRM; 11/27. (Dexter-WI) 2305-2310 M & W talk w/ (P) nx; heard only using USB w/ inter-audio filter to avoid v. strong het; static & slight QSB; fair; 12/5. (Serra-Italy) 1407 #572 txmitter site; better than usual; per Aoki this one is non-direxional while 5030 is at 37 degrees; the latter almost always mixed w/ but atop Sarawak; fair; 12/16. (Hauser-OK) [have never had even a whiff of Sarawak here in NH-ed.]
- 4665 **UNIDENTIFIED** 2005-2041 Two men in (P) SS w/ talk for (P) live sport (soccer?); not sure if one stn or two co-ch b/casts here; heard in LSB w/ fast QSB & strong static; from 2031 increasing audio at times; v. poor w/ NIR12; first time heard on this freq: Oct. 26 2115-2131 w/ two M talking; barely audible for few minutes on Nov. 22 at about same time, then f/out; any idea?; 11/16. (Serra-Italy)
- 4500 **CHINA Xijiang PBS** Urumqi 0134-0202 (P); M & W anc w/ talk in listed Mongolian & listener phone-calls b/w musical selec's; sounded like a mx request prg; (P) ID at 0200; right back to mx; p-f; 12/6. (Barbour-NH) 0327-0330* M w/ (P) Mongolian talk; brief mx pause at 0329; brief note tune then s/off at 0330 as sked on PWBR 2009; best heard in LSB w/ rustle; fair w/ NIR12; 12/8.(Serra-Italy)
- 4699.3 **BOLIVIA R. San Miguel** Riberalta 2240-2245 M & W talks; guitar mx bridges; in the clear w/ 20dB sig; f-g; 11/10. (Parker-PA) 4699.31 0845-0910 Long discussion into promos for upcoming events; telephone numbers repeated; 11/27. (Wilkner-FL) 4699.4 0140-0212 W anc w/ SS talk; ID & TC; hosting prg of rustic vcls; poor; 11/25. (DAngelo/FCDX-PA)
- 4716.67 **BOLIVIA R. Yura** Yura 0920 W anc w/ ID; exotic flutes w/ yipping; 0925 W w/ ID; 11/29. (Wilkner-FL) 4716.7 0057-0105 W anc in SS; slow songs w/ M vcl; weak but in the clear; f-g; 11/21. (Parker-PA)
- 4746.9 **PERU R. Haunta 2000** Huanta 2337-2349 M anc w/ SS talk; ID alternating w/ instrumental mx; OA vcls at 2345; p-f w/ some CODAR QRM; 11/23. (DAngelo/FCDX-PA) 4746.98 0008 Mx & SS cmnt just above noise; CODAR sweeps reached S9; 12/9. (Strawman-IA) 4747 2333 M & W talk & occ. mx; poor but growing; ("Tuned by Taylor"); [?-ed.] 11/22. (Dexter-WI) 2331 W talk & vcl in SS; [date?-ed.] (Dexter-WI)
- 4749.97 **INDONESIA RRI** Makassar 1335 Best sig on the band; pop mx prg was S9 on peaks; 11/23. (Strawman-IA) 4750 1135-1203 Mx prg until SCI; RRI ID & Jakarta nx at 1200; poor w/ CODAR QRM; 11/25. (DAngelo/FCDX-PA) 1409 Glad to hear at least two of the RRI on 60m; 4750 Makassar & 4790 Fak Fak w/ talk & mx respectively; both bothered by CODAR & both registering about S9+15 tho 4790 sounded a bit louder; a few minutes later both w/ mx but not //; No other Indos detected on 60m; re-check at 1440; 4750 & 4790 still audible but weaker; sunrises are already getting earlier; the sunsets are still getting later; to gang up at the Winter Solstice for the shortest day overall; 12/14. (Hauser-OK) 1358 RRI txmitters come and go; & you never know which ones will be on the air from one day to the next; assuming propagation is cooperating; unlike two days before; no sign of Fak Fak-4790; but Makassar was in well on 4750; talk in Indo; still fair at 1433 w mx; 1440 W & M DJs on phone w/ someone; always CODAR QRM; 12/16. (Hauser-OK) 1338 M & W talking in Indo; poor; 12/19. (Ronda-OK)
- 4750 **CHINA CNR-1** Hailar 2331-2340 Two co-ch. stn's here; both in CC; the strongest one heard on 4749.99 w/ M & W talk; ancment (ment. Tung quo); some mx breaks; barely audible up-down the other CC stn on 4750 kHz; no idea which is from Hailar or Xining [PBS Qinghai-ed.]; best heard in LSB w/ slight QSB & rustle; 12/5. (Serra-Italy)
- 4754.9 **BRAZIL R. Imaculada Conceição** Campo Grande 2348-0001 (P); M & W anc in PP; mx fills; long talks; not too intelligible but definitely PP; no ID heard; but I believe there is only one Brazilian active here now; 11/11. (Brouillette-IL) 0116-0130 M anc in PP & very cheerful mx; similar to Christmas carols; strapping 70dB sig; 11/21. (Parker-PA) 4754.93 0308 SS ballads under CODAR; poor sig which is better than usual; 11/20. (Strawman-IA)
- 4760 **ANDAMAN & NICOBAR ISLANDS AIR Port Blair** 1509-153 SC music & songs; 1530 "The news at nine" in EE; // 4775, 4880, 4940, 4970 & 5040; 11/18. (Howard-CA)

- 4765.02 **TAJIKISTAN Tajik Radio** Yangiyul 1510-1518 (T); Sounded similar to RR; poor recep; 11/21. (Howard-CA) 4765.07 0221-0232 Lcl chants alternating w/ W & M talk; best heard in USB w/ rustle & static; QSB; fair; 11/15. (Serra-Italy)
- 4769.96 **NIGERIA R. Nigeria** Kaduna 2258-2301* M in EE w/ ment. Nigeria; final ancmnt; anthem at 2300 then s/off one minute later; best heard in USB w/ moderate static & QSB; p-f; 11/29. (Serra-Italy) 4770 2252-2258 M ancr in vern. & Abba's 'Dancing Queen'; 70dB sig; exc; 11/10. (Parker-PA) 2257-2300* M ancr w/ closing ID The English Service of Radio Nigeria & s/off ancmnts & orchestra NA; fair w/ some CODAR QRM; 11/23. (D'Angelo/FCDX-PA) 0604 Unaccompanied African choral mx; fair w/ CODAR; 12/12. (Ronda-OK)
- 4775 **PERU R. Tarma** Tarma 2302-2316 M ancr w/ SS talk & ID followed by instrumental mx; poor w/ significant CODAR QRM; 11/23. (D'Angelo/FCDX-PA) 0133-0139 W ancr in SS w/ reverb; just above the noise lvl; poor; 11/21. (Parker-PA) 0347-0353 M & W in SS; (P) TWR Swaziland barely audible underneath; 40dB sig; exc. 11/25. (Parker-PA)
- 4775 **SWAZILAND TWR** Manzini 0346 M ancr speaking in Lomwe [listed]; poor; 11/24. (Ronda-OK)
- 4780 **DJIBOUTI RTD** Atta *0258-0332 OC followed by opening ancmnts before beginning of Qur'an recitation; some group singing; tribal vcls & AA talk prior to another ID & nx at 0331; p-f; 11/17. (D'Angelo-PA) 0320-0330 M ancr w/ AA talk; heavy QRM & sweeper QRM; best in USB; poor; 11/28. (Wood-TN) 2055-2102* Lcl HoA style mx; AA ancmnts; s/off w/ NA; weak; poor w/ strong CODAR QRM; 11/29. (Alexander-PA) 4780.03 0345 Best recep ever reaching good sig lvl despite CODAR; lcl dialect heard; mx very much like that heard on R. Zanzibar; ancmnts at 0400:12 by low-pitched M; studio audio low compared to mx; faded down by 0415; 11/23. (Strawman-IA) *0316-0325 Abrupt; late s/on w/ AA talk; HoA mx at 0325; s/on usually at 0300; p-f w/ CODAR QRM; 12/5. (Alexander-PA) 0329-0335 ME mx w/ drums & vcls; into nx at BoH; sweeper QRM; poor; 12/7. (Wood-TN) 0346-0354 M w/ relig sing-song;(Allaaaaaaah.); heard in LSB w/ rustle & moderate QSB; almost fair w/ NIR12; 12/8. (Serra-Italy) 0432 Lcl vcls; v. good except for the usual CODAR; no sign of Chad-4905 at 0430; 12/11. (Dexter-WI) 2045-2102 AA talk & lcl mx; s/off w/ NA but strong CODAR QRM; 12/11. (Alexander-PA)*0300-0345 S/on w/ NA; Qur'an at 0301; AA talk at 0315; HoA mx at 0344; weak; poor w/ strong CODAR QRM; 12/13. (Alexander-PA) 2045-2107* Lcl & Europop mx; AA talk; s/off w/ NA; poor w/ strong CODAR QRM; 12/18. (Alexander-PA)
- 4781.5 **BOLIVIA R. Tacana** Tumupasa 2301-2307 In SS w/ disco-type mx followed by M & W talks; 35dB sig; rising to near exc. for brief periods; 11/10. (Parker-PA)
- 4790 **INDONESIA RRI** Fak Fak 1416 RRI regionals active on both 4750 & 4790 w/ similar soft mx; but not // & 1417 came an ancmnt on 4790 Fak Fak; 11/17. (Hauser-OK) 1332 Pop mx prg mixing w/ moderate CODAR; f-g; 11/23. (Strawman-IA) 4790.05 1358 (P); Pop mx to 1359:40 when ancmnt by low-pitched M; (P) ID at 1400:05; followed by Jakarta nx by W; decent sig but CODAR QRM; 12/14. (Strawman-IA)
- 4790 **PERU R. Atlantida** Iquitos 2308-2345 Spectacular prg of musica del campo; M ancr in SS w/ clear 'R. Atlantida' ID at 2320; unlike note in DBS-10 audio was outstanding; the huaynos completely filled the room & were an absolute joy to listen to; in the clear w/ an exc. 40-60dB sig; 11/10. (Parker-PA)[irr., great catch!-ed.]
- 4790 **PERU R. Vision** Chiclayos 0502-0505 Usual SS preacher addressing crowd over distorted PA system; 50dB sig & overcoming CODAR; 10/30. 22nd Anniversary

Winter SWL Fest

Sponsored by **NASWA**

March 13-14, 2009

Best Western—The Inn at Towamencin
1750 Sumneytown Pike, Kulpsville, Penna.

Plan to attend your favorite forums Friday and Saturday! Enjoy meeting with your friends in the Hospitality Room. Bring radio related items for the swap meet or to donate for the Silent Auction. Check out your friends' receivers, bring one of your own for others to try!

No frills; just shortwave, longwave, mediumwave, pirates, and scanning. Once again you will enjoy the camaraderie of your hobby friends.

Please note, there is an incentive for you to pre-register, as prices are more expensive for those who wait. Registration options are also more flexible than in the past, with new one-day and student registrations. **If you wish to participate in the meals, you must register and inform us that you will be attending by Friday morning, March 13th.** If you choose not to participate in the meals, the hotel has a restaurant, and there are other restaurants nearby.

Your registration must be received by February 28, 2009 for the best prices; registrations received after that date are priced higher. See the registration form below.

Many things, like the raffle, remain the same:

GRAND PRIZE To be announced

SPECIAL Register early to win a SW portable! One free entry for an early-bird registration received by February 23, 2009.

Please bring items for the Silent Auction. At least half of the proceeds are donated to charity.

Checks should be made payable to WINTER SWL FEST. Register directly with the hotel for your rooms by calling the Best Western at (215) 368-3800. For 2008, one special rate \$85 single or double! Tell the hotel staff you're with the WINTER SWL FEST to receive this special room rate. *You must make your reservation directly with the hotel to receive this rate; reservations via the Best Western 800 number or web site are not eligible for this rate.* Up to the minute info. can be found on the WINTER SWL FEST Web Page at <http://www.swlfest.com/> or from <http://www.naswa.net/>.

The Best Western—The Inn at Towamencin is located at Exit 31 of the PA Turnpike Northeast Extension-Lansdale Interchange. Improved access from the south with the Blue Route (1-476)—ask for details. Limo service is available from Phila. Intl Airport directly to the hotel.

Please submit the following form with your registration amount or send for more information to:

SWL WINTERFEST, P.O. Box 4153
Clifton Park, NY 12065
