N4 Notes

Richard A. D'Angelo • 2216 Burkey Drive • Wyomissing, PA 19610 • rdangelo3@aol.com

Congratulations to our friends at the Japan Shortwave Club ("JSWC") who are celebrating their 50th anniversary this year. They have just published a special 50™ Anniversary book in Japanese that includes messages from friends around the world, a DX history in Japan compiled from club bulletins, messages from club members and a data sheet and some reprints of club bulletins. My copy came from JSWC 50th Anniversary Committee member Toshi Ohtake who many will remember from the last Winter swi. Festival. The JSWC has been participating with international broadcasters in presenting a number of special programs commemorating the occasion. Once again, congratulations to our friends at the Jswc.

I recently received the latest schedule for Trans World Radio-Europe from Chuck Roswell, who has performed frequency coordination and monitoring activities for TWR in Europe and Bonaire for many years. Chuck indicated that he will be retiring shortly and will be moving back to the USA in January 2003. He has always been quite helpful to the shortwave listening community over the years. Although retiring Chuck plans to continue being active plus he hopes to be able to attend the 2003 Winter SWL Festival in Kulpsville. Congratulations to Chuck on achieving this important milestone. Here is to many good, happy and healthy years enjoying a well-earned retirement.

Bob Padula (bobpadula@bigpond.com) of the Electronic DX Press is now taking orders for the 14th edition of the Australasian Shortwave Guide ("ASWG"). With over 1400 entries, covering the international shortwave transmission period commencing on 27 October 2002, and concluding on 30 March 2003, the BO2 period, the guide will be published on 10 November 2002. It is 36

pages, handy A5 format, saddle stitched. ASWG provides comprehensive information about English shortwave schedules to Australia, Asia, the Far East, the Indian subcontinent, the Pacific, and for broadcasts in all languages to Australia and the Pacific. The data is arranged in two sections, by studio country and starting time. Each entry shows broadcasting organization, frequency, starting time, finishing time, language, target area, transmitter site, transmitter country, studio country, and days of operation. For the first time, schedules of Digital Radio Mondiale (DRM) transmissions are included, as well as late-breaking international broadcasting news.

The ASWG costs A\$10.00 posted to Australian addresses, US\$10.00/A\$15.00/7 IRCs posted airmail to any other country. Payment may be in cash, bank check, personal check, postal order, mint Australian stamps, or IRCs. Checks must be drawn on Australian banks, in Australian currency. Orders and payments should be sent to the author: Bob Padula, 404 Mont Albert Road, Surrey Hills, Victoria 3127, Australia.

Last call for contacting Ron Hunsicker (1238 Cleveland Avenue, Wyomissing, PA 19610-2101; e-mail: ronhunsi@ptd.net) if you are interested in forming a regional NASWA chapter in the greater Reading, PA area. Anyone that has an interest in shortwave radio is welcome to participate. Ron is willing to be the coordinator so please contact him if you are interested in meeting other club members on a periodic basis. Hopefully we will have an announcement about an upcoming meeting in the near future.

Although it was too late for last month's Journal, Gary Thorburn sent word that "after several months without formal meetings due to the loss of our meeting space, the Boston Area DXers has scheduled an October meeting." The Boston Area DXERS ("BADX") held a meeting on 24 October at the Bedford Public Library, Mudge Way, Bedford MA. Mudge Way is off Rtes 4 & 225 in Bedford Center. Members receiving the electronic Flashsheet received timely notification (hint!). For more information about BADX and possible future meeting dates contact Paul Graveline at 508-470-1971 or Internet: 74007.3434@compuserve.com.

For the latest hot DX news, loggings, and information on the shortwave bands, you need the club's weekly electronic Flashsheet, edited by Sheryl Paszkiewicz, spasz@dataplusnet.com or P.O. Box 716 Manitowoc, WI 54221-0152 for non-electronic submissions. Join your fellow members in receiving our electronic newsletter which supplements the monthly Journal for the timely dissemination of DX loggings and

breaking news. It is only available to members. Deadlines are posted in the NASWA Flashsheet. If you are a current member of the club and want to receive the electronic NASWA Flashsheet just drop Rich D'Angelo (rdangelo3@aol.com) a note with your email address, location and membership expiration date from your mailing label.

Our esteemed publisher and business manager has been having some e-mail problems lately. Therefore, please direct all communications about subscriptions, bulletin delivery issues, etc. to Bill Oliver at the club's Levittown address or to his old electronic address, weoliver@worldnet.att.net. The regular postal address is the familiar 45 Wildflower Road, Levittown, PA 19057. Inquires sent directly to me in Wyomissing only slow down the process. Thanks!

That's it for this month. Enjoy this month's edition of the *Journal*; it's another good one.

FRENDX: Twenty Five Years Ago (November 1977)

The Frendx cover featured a photo taken by Jerry Lineback of Alan and Audrey Thompson of Wales during a recent visit to the United Kingdom visit. After 2 1/2 years as Publisher Alan Mayer stepped down. QSL Editor Bill Oliver replaced him. The club began searching for a replacement OSL editor. Jerry Lineback was elected to the club's Executive Council. James Wilson wrote about the Drake R-4 Series and the Wadley Triple Mix Loop. Roger Legge compiled English language broadcasts to North America. In Glenn Hauser's Listeners Notebook, there was a report that the British government was actively considering handing over the Falkland Islands to Argentina because the disputed territory hampered trade with Argentina and the islands were not defensible. Also, the Carter Administration wanted to reorganize USIA and VOA so those listeners would hear a clear distinction between policy statements and editorial opinions. Awards Manager Dan Henderson reported that Gerry Dexter earned the first Master Papua New Guinea Dxer Award. In his QSL Report, the big news noted by Bill Oliver were the recent veries from Suriname. Tom Alleman noted the name change from DX Hotline to Update. 73 reporters provided the Log Report editors with 16 an. pages of logs

Contribute!

Send your loggings and OSL information off to our Distributing Editor, Bob Montgomery (Address: POBox 1458, Levittown, PA 19058). He will forward them to the appropriate editor. Remember, Bob also distributes OSL report information and totals for the Scoreboard column. He can also be reached through the Internet at: RMonty3@worldnet.att.net.

Calendar Of Events

- Nov 15 Meeting. Philadelphia Area NASWA Chapter. Kulpsville Holiday Inn, Kulpsville, PA at 7:30 PM. For more information contact Dan Cashin at 610-446-7831 or Internet: dcsckp@aol.com.
- Nov 15 Meeting. Boston Area NASWA Chapter. The Boston Area DXers have found a new location for meetings. Inquiries about the BADXers may be sent to Paul Graveline at 978-470-1971 or Internet: ctreditor@aol.com. The URL for the BADX guys is http://www.anarc.org/naswa/badx/
- Dec 13 Meeting. The Cincinnati/Dayton Monitoring Exchange (MONIX) meet at the Lebanon Citizens National Bank on U.S. Route 42 in Mason at 7:00 PM. For more information contact Mark Meece at 513-743-8089 or e-mail at <radioscan@siscom.net>. For additional information about MONIX, check out their web site at http://www.siscom.net/~mmeece/monix.html
- Mar 7–8, 2003 Convention. The 16th Annual Winter swl Festival, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin (Kulpsville to the rest of us), located at Exit 31 on the Northeast Extension of the Pennsylvania Turnpike, on 7th and 8th March 2003. Richard Cuff and John Figliozzi co-chair the organizational committee. It's never too early to begin planning. See you there!

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: rdangelo3@aol.com) or Ralph Brandi (Internet: ralph@brandi.org).

Musings

This column provides a forum where members can express comments, ideas, and thoughts about NASWA or the SW radio hobby. Please feel free to comment on anything presented this month (or previous months). Opinions expressed here are are solely those of the submitters. Please submit all Musings to Richard A. D'Angelo, 2216 Burkey Dr., Wyomissing, PA 19610 or via email: rdangelo3@aol.com.

Sterling R. Marcher, 15056 Greenwood Drive, La Mirada, ca 90638

Greetings from smog bound 90638. The Journal is great. My Vtech companion E-mail machine is on the blink. I hope there are NASWA members in my area (LA and Santa Ana).

Very truly yours, S. R. Marcher

Paul Brouillette, 611 Illinois Street, Geneva, IL 60134

We keep hearing bits and pieces about the new Digital Radio Mondiale (DRM) standard for shortwave broadcasting, and there is some on-air evidence of tests being conducted. However, I have to wonder if DRM will ever become a reality. As written in the Technical Topics column in the July Journal, our current receivers won't work and are not readily adaptable to DRM. Also, a true consumer-level receiver is not available, only a pricey sort of experimental one. And yet even with this situation, the DRM consortium says that they would like SWLs worldwide to participate in the DRM evaluations.

I think that DRM could be exciting, and could deliver a far more reliable signal than regular AM, at least directly within a transmitter's target area. But, in practical terms, with the current situation, I think it is likely to fail. First, there is a trend among some stations, especially in Europe, toward ceasing analog shortwave broadcasting right now. They say they will return to the air some day with DRM. But will their audience wait that long? Second, DRM forces the scrapping of the existing equipment for both the broadcaster and the listener. With the current state of the world economy, it is difficult to expect government and commercial organizations to make such expenditure. It is almost unthinkable to ask the same of individual listeners. Throughout most of the world, one only needs to read the screaming headlines announcing thousands more professional-level jobs being lost, together with the sorry state of the stock markets. Will anyone be able to afford DRM, even if they want to?

Listen around the shortwave bands lately, and you hear an increasing number of broadcasters sounding ever less professional. You hear splashy, noisy transmitters, low and distorted modulation, intermittent audio feed, transmitters being turned on late or turned off early, cutting off part of the program in progress. And this kind of thing is not confined to small stations in out-of-the-way places. Some of our largest broadcasters have been suffering these ills lately. They don't want to be like this, but budget cuts for staffing, equipment maintenance, etc., force them to be like this. And then they are to be expected to fund the implementation of DRM?

-30-

'(On the very day I'm laying this out, I received e-mail from the DRM consortium about material they had added to their web site about modifying existing receivers for DRM, including, surprisingly enough, the Grundig Yacht Boy 400. None of them look like they're for the faint of heart, but it is indeed possible to modify an existing radio to serve as a front end for the software-defined "radio" (actually a software program) that the DRM consortium will be releasing in December. Detailed instructions and more information are available on the web at http://www.drmrx.org/. —Ralph Brandi)

Richard A. D'Angelo, 2216 Burkey Drive, Wyomissing, PA 19610

I should have a report about our first DX pedition of the new DX season to French Creek State Park in next month's Journal Musings. Also, the logs should make it into next month's Tropical and International logging sections. Of course, the best stuff has already appeared in the electronic Flashsheet, which continues to be the best way to stay current on shortwave band activity.

With a little luck, the November Journal will arrive in time to accompany me to the DXpedition site. Fred Kohlbrenner, Kris Field and Ed Mauger round out the band of merry DXers seeking rare and unusual radio signals. I can't wait to see what terrifying events unfold before our eyes.

73, Rich

Easy Listening

Richard D. Cuff • 42 North 37th Street • Allentown, PA 18104 • rdcuff@mochamail.com

What about frequencies?

I received a note from David Telker of southeastern Missouri who asked about sources of frequency information for broadcasters mentioned here in Easy Listening. It has generally been my approach here in the column to focus on programming subjects, not frequencies, since frequency information is available from other sources. David. you'll want to save the December Journal as it will contain extensive frequency information sorted by time of day. If your interest is more in the identification of broadcasters on specific frequencies, then the best reference is likely Passport to World Band Radio, a book annual published by Larry Magne. The NASWA Company Store is selling the newly-released 2003 edition; you can also likely find it at the large bookstore chains such as Barnes & Noble, Borders, and Chapters (in Canada).

Synopsis of Seasonal Changes

Radio Netherlands

There are a few changes in Radio Netherlands' program schedule for the new season.

First, Aural Tapestry goes on hiatus for the winter, as it did last year. It's replaced in the schedule by Sound Fountain; it kicks off with a five-part series called A War of Words-information in times of conflict. Some of the world's leading experts in the field of communications and peace studies give their views on propaganda, corporate media, war correspondents and negotiators. Part one, The Producers, which aired the last Sunday in October as Journal was in production, the program investigated how governments are manipulating information under the guise of the "war on terror." The general description of Sound Fountain: "...a torrent of ideas from award winning documentary producers Michele Ernsting and Dheera Sujan. Interesting topics approached in an

unusual way. Sound montage, esoteric conversations, inner musings and atmospheric music all add up to sound surprises..."

Second, Roughly Speaking has finished its run; through the end of the year you can hear Dutch Classics, in which Helene Michaud will be sifting through the Radio Netherlands archives of Dutch classical music. In the new year, The Amsterdam Forum will debut. This new program will be an extended interview with a leading Dutch figure.

Third, Wide Angle will have its initial airing one day earlier—on Saturdays—apparently replacing the current feature entitled Best of Wide Angle.

By the time you read this, there's also a decent chance that Radio Netherlands will have implemented its new audio-on-demand capability, with program editions available for download by selecting a program title, instead of the somewhat clumsy method of selecting a time slot, as has been the case. The window of availability will be longer than the 24 hours currently provided.

Radio Canada International

The North American component RCI schedule tends to follow the seasonal shifts in daylight / standard time; from a programming perspective, the weekday morning (1300-1600 UT) program has entirely new content since the domestic CBC morning schedule has been overhauled.

1300 UT weekdays: RCI listeners will be able to hear the final hour of the new program *The Current*, hosted by Anna Maria Tremonti, a CBC journalist who won awards for her coverage of the war in Bosnia. There isn't much information on the CBC website regarding *The Current*, but an item in the *Toronto Star* newspaper calls *The Current* an "...on-the-news show..." whatever that means.

1400 UT weekdays: Sounds Like Canada has already debuted: the Star characterizes the program this way: "...Sounds Like Canada aims to address [the concern that CBC Radio One didn't resonate with listeners outside of Metro Torontol head-on: Rather than Toronto-based producers feeding material to a studio host, items will be fed from producers across the country-staff and freelance. [Program host Shelagh] Rogers will be criss-crossing the country, on location as much as in the studio. The idea is to capture that holy grail of diversity the CBC has always sought. The hope is we get more color, flavor, texture, all those things," as quoted by Adrian Mills, the architect of the new CBC Radio One schedule that produces the programming relayed by RCI on shortwave weekday mornings.

By the way, you won't see either program listed in the new season's RCI brochure now reaching your mailbox. RCI chose not to hold off on the new brochure until the new Radio One schedule kicked in; it would have made sense for them to at least footnote the 1300–1600 time block as "subject to change", since these CBC changes have been in the works for much of the year.

It is possible that other RCI programming

originating with the CBC Radio One domestic spoken-word network (e.g. *Quirks and Quarks, The House, Vinyl Cafe*) might also disappear from the RCI schedule as the Radio One overhaul continues.

So far, the reviews I've seen for *Sounds Like Canada* are middling at best. Shelagh Rogers' talents appear to be squandered, based on the initial program editions. However, given Ms. Rogers' foreign correspondent experience, one hopes that the segments with Ms. Rogers in the field will be of greater interest and quality.

Radio Australia

As I mentioned last month, on Sunday, October 27th, Australia moves to Daylight Saving Time, resulting in some program shuffling. On Saturday and Sunday *Grandstand* will be heard at 0110-0700 UT. *Australia All Over* will move to 1905 UT on Saturday. Interestingly, the Radio Australia overnight relay of Radio National (currently 1500-1900 UT) will remain the same in Universal Time even though its domestic time will change.

BBC World Service

The schedule changes are as I'd predicted, and are summarized in the following table:

Summer Time	Winter Time	Program
0000	0100	Meridian / Popular Music
0100	0200	Science / technology / health
0200	0300	Sports / Business / Analysis / FOOC (Wednesdays)
0300	0400	Music / Religion
0400	0500	World Today
0900	1000	World Update
1200	1200	Newshour
1300	1300	Outlook, Off The Shelf
1400	1400	Meridian / Popular music
1500	1500	Science / technology / health (Sundays: Fooc, People and Politics)

1600	1700	Europe Today / business / sport
2200	2300	World Today
2300	0000	Outlook / Westway / various features

BBC World Service Highlights

The most interesting program on the November World Service schedule looks to be Young In China, a four-part documentary series beginning Friday, December 8th, 0230 UTC, repeated the following Monday, 1530. The series attempts to reveal the thoughts and aspirations of the first generation growing up under China's one-child policy. A group of young people at home, at work, and out socializing is profiled over the course of the series.

Tuesdays, beginning November 5th, 0430: **A History of Political Thought** is a new 12-part 15-minute weekly series exploring the issues of human governance—the individual versus the common good, and authoritarianism versus democracy. The series is hosted by Charles Haviland.

Wednesdays, beginning November 6th, 0045, with a repeat Thursdays, 0430: *Tell Me My Future* is a new four-part fifteen minute series in which Martin Stott takes a real life "guinea pig" approach to astrology, fortune telling, palmistry, and aura readings to gauge different predictions, and learn how and why people seek to be given a glimpse into their future.

Thursdays, beginning November 7th, 0230, repeated Fridays, 1530: **Sports International** runs a new four-part 30-minute series exploring the multi-billion dollar world of USA sports called **us Sports Incorporated**. The series looks at how the sports industry has grown and how USA sports have been exported elsewhere. The series tries to answer a question I've long pondered: Why are some sports entirely USA-based, USA-led, and USA-devised?

Sunday, November 10th, 1030: Since short-wave listeners are often history buffs, it's worth noting the annual *Service of Remembrance from The Cenotaph* in London. Each year in Britain, on the Sunday closest to Armistice Day (our Veterans' Day in the USA), those who have died in the two world wars and other recent conflicts are remembered. The Remembrance Ceremony will be broadcast live to all regions at this time.

Fridays, beginning November 15th, 2330, repeated Sundays, 0430: Inventors Imperfect is a three-part series in the usual Global Business timeslot looking at how people of flawed genius have influenced our times. Ada Lovelace—the daughter of Lord Byron—worked with Charles Babbage whose Difference Engine is considered the first computer. George Boole—remember Boolean Algebra?—and Sir Joseph Banks, a botanist who sailed with Captain James Cook, are also profiled.

Saturdays, beginning November 23rd, 0230, repeated Tuesdays, 1530: *I Have a Right* looks at how the rule of law in countries targeted by the USA and its allies has changed in the wake of last year's terrorist attacks. This is a three part, 30-minute series.

Saturdays, beginning November 23rd, 1330: *The Caribbean Connection* is a threeweek documentary on the Caribbean roots of black culture in Britain, and how the music and experiences of the region have influenced the arts and music in Britain. Hip-hop saxophonists Soweto Kinch and singer Juliet Roberts are the artists profiled in the first installment.

That's all for November; see you in December!

New Trends in Tropical Broadcasting

by Anker Petersen

Editor of the DSWCI Domestic Broadcasting Survey (DBS)

(This article may be reprinted, if the author and DSWCI are mentioned)

I recently finished editing DBS-4 and

wish to share with you my observations concerning the trend in the number of active frequencies of Domestic Broadcasting Stations in the Shortwave Bands between 2200 and 5800 kHz. For comparison are the equivalent numbers from our Tropical Bands Surveys covering 1972/73, 1984/85, 1996/97, 1999/2000 and 2000/01.

Region	72/73	84/85	96/97	99/00	00/01	01/02
cis (former USSR)	61	59	47	26	22	24
Central Africa	102	76	40	36	25	27
Southern Africa	57	39	33	17	12	11
Middle East	10	18	16	0	0	0
Indian Subcontinent	62	45	45	35	30	34
South East Asia	40	29	21	11	7	11
Indonesia	171	105	65	40	22	22
China, Taiwan, Mong.	119	110	75	40	40	52
Far East	38	28	28	18	16	18
Pacific	27	24	33	27	28	27
North America	1	0	7	5	7	6
Central America/Mex.	21	23	24	22	17	18
Caribbean	29	3	3	5	4	4
Brazil	107	87	67	56	53	52
NW South America	98	41	19	13	7	8
High Andes Countries	188	163	160	119	99	97
Southern S. America	5	5	1	2	0	1
Totals	1136	852	684	472	389	412
		Pag	e 8			

World Radio History

During the 24 years period 1973–1997 452 stations disappeared with an average of 19 per year. In the 4 years of 1997–2001 the disappearance drastically did increase to 295 stations or 74 per year on average! However, the big surprise is that during the past year the downgoing trend has stopped and the number of active stations on the Tropical Bands has increased slightly due to more usage in Asia and particularly in China! As you can see, the situation is more or less unchanged in all the other continents.

But the technical standard of a large part of the transmitters on the Tropical Bands is poor. In more developed countries they are being replaced by FM-networks and it can be feared that the trend again will go downwards

However, you can still hunt for 412 Domestic Broadcasting Stations on the Tropical Bands, before it is too late. Fortunately the interfering broadcast and utility stations are also disappearing. So do not give up your Tropical Bands DXing!

International Broadcasting

An editorial by Bob Padula

EDXP #261

I am amazed at the extraordinary number of frequency and schedule changes being made by International Broadcasters during the course of the A-O2 season. It is virtually impossible to keep up to date with all these movements, as broadcasters reposition their services to avoid interference effects, and to take account of continuing high solar activity.

The A-02 season is quite long (seven months) and it is of course quite impossible to establish frequency allocations for such a lengthy period, especially when the actual process is done up to two months before the start of the season! Many of the changes have been brought about by the use of unsuitable frequencies, either based on flawed propagation predictions, or by selection of channels which create interference effects by other broadcasters.

I note that some alternations are now being made by broadcasters with no consultation with other administrations, on the basis of "we'll be using these new frequencies as from xxx and we hope that they won't cause any interference..."

Whilst the work of the ITU-accredited HFCC is to be commended, in attempting to sort out a very complex task, I suggest that the

frequency planning process places far too much emphasis on computerised predictions, and falsely assuming that HF transmissions always travel in tight "beams!" Such is not the case. Many of the frequency changes have been made to avoid co-channel interference, even though the intended target areas of the interfering broadcasters may be thousands of km away!

Many broadcasters have now reverted to using an extraordinary number of parallel channels, on the basis that something "may get through," with a willingness to sacrifice some transmissions which will be buried under services from other administrations.

Governments are now becoming acutely aware of the high cost in operations, maintenance, and production of international broadcasts, and it seems to me that a large part of these resources could be better used in actual management of frequency planning. I know one frequency manager who has absolutely no technical or engineering background at all, and who is responsible for schedule development and validation for a major international broadcaster. That is ludicrous; no wonder that broadcaster is hardly ever heard where it is intended to!

Listeners to international broadcasters are customers; if frequency usage is incorrect, people will go elsewhere, and the administration will then believe that it has no audience, and the service will be closed down, even though it may be running ten 500 kW transmitters on the wrong frequencies or at unsuitable times!

If international broadcasting is to survive, then administrations need to get their acts together. It is not simply a case of putting up proposals for more spectrum space at the next World Administrative Radio Conference, but of improving existing internal engineering management processes, actively seeking and using more direct technical feedback from listeners, and taking account of what listeners have to say about reception effectiveness.

Furthermore, the monitoring hobby is now littered with people who I regard as "GSL haters"—who put out drivel over the Internet and in the print media with their continuing denigration of reception reporting and GSLS. Local radio relies on the immediate feedback from "talkback" programs to sustain an enthusiastic audience—international radio demands more effective linkages to its customers through the QSL process.

And, I might add, our own Radio Australia has out-sourced its management of reception reports to such an extent that there is no longer any informed or competent analysis made of what listeners may be saying in their reports! The reception reports are obviously regarded as junk mail, and invariably result in the listener being sent literature promoting computer-based products and services. The "out-sourcing" is actually the process of physically transcribing name and address details onto the OSLs and envelopes - I am led to believe that there are no checks made of the actual content of the reports. Seems like a free picture-postcard service—that worries me, as an Australian taxpaver....

One EDXP member in Australia (not me!) has written to the Board of Management of the ABC querying this practice, and asking for advice as to the exact nature of this relationship, and whether this advertising was the result of competitive tendering, or what. If RA is sending out material promoting commercial products and services accompanying "OSLs," then there are countless organizations who would also like that opportunity!

HFCC Conference

By Jeff White-Radio Miami International

(This article relates to Bob Padula's editorial in that the HFCC Conference is where A-02 frequency usage was supposedly coordinated and gives some insight into the process of frequency coordination-ye editor.)

The Gaestehaus Petersberg, a stately mansion atop a hill overlooking the scenic Rhine River just south of Bonn, Germany, was the site of the A-O2 High Frequency Coordination Conference (HFCC) February 4-8, 2002, sponsored by Deutsche Telekom. The Petersburg is an official guest house of the government of Germany for visiting foreign dignitaries, and also serves as a commercial hotel. Past guests have included the likes of Leonid Brezhnev, Bill Clinton, and, in December of 2001, the delegations to the United Nations Conference on Afghanistan,

where Hamid Karzai was chosen as the interim leader of the country. So it was appropriate that this international guest house was the venue for the semi-annual HFCC-ASBU Conference, where shortwave frequency planners from around the world gathered. (ASBU = Arab States Broadcasting Union.)

In fact this HFCC Conference had a record number of participants—something like 135. Approximately 80% of the world's shortwave frequency usage is planned at the HFCC, in this case for the period from March 31–October 26, 2002. This was my second opportunity to represent the National Association of Shortwave Broadcasters (NASB) at the HFCC Conference, the first being in Montreal in August of 2001. Twice each year, for four and a half days, the world's HF frequency planners get together at the HFCC

Conference to plan their frequencies and negotiate deals to avoid interference and chaos on the shortwave bands. This time. the task was even more monumental since the terrorist attacks of 9/11/01, had sparked a sudden increase of approximately 25% in shortwave transmissions (particularly to Afghanistan and the southwest Asian region, and a corresponding increase in frequency usage. Each day of the conference, new lists were produced -- hundreds of pages long -- of station broadcast schedules and "collision lists," the latter of which show co- and adjacent-channel frequency usage by two or more stations at the same time to the same target areas which could result in mutual interference.

In addition to many hours of hovering over laptop computers and conversing with frequency managers of other stations, there were some interesting seminars presented at the conference. For example, Norbert Schall of Deutsche Welle spoke about a relatively low-cost remote monitoring system he has developed, and Merlin Communications presented a prototype receiver to pick up DRM digital shortwave transmissions.

In addition to myself, NASB member station sent Terry Borders and Dennis Dempsey to observe the frequency process. Their frequency manager, Stanley Leinwoll, normally attends the HFCC conferences, but was unable to attend this time. Also NASB member station KTWR had a representative, Jeff LeCureux, who was very active in the coordination activities for his own station. The Adventist World Radio and Far East Broadcasting delegations looked out for their stations on U.S. territory as well as their overseas stations. George McClintock of wwcr in Tennessee also attended the conference. In his opening remarks, HFCC Chairman Oldrich Cip thanked the NASB for its continuing assistance in gathering frequency requirement data from some of the major Latin American shortwave stations. Tom Polzin and Tom Lucev of the FCC's International bureau were on the scene in Bonn. This was the first time the FCC has sent two delegates to an HFCC conference, and the Commission will likely only send one delegate to future conferences.

HFCC Chairman Oldrich Cip asked Tom Polzin and myself to meet with him to discuss the NASB's future participation in the HFCC and its conferences. I explained that while we find it very beneficial to attend these conferences, financial realities may prevent us from attending some meetings due to their distance and costs. (For example, the next two meetings will be in Bangkok and South Africa.) For this reason and others. I explained that we prefer to remain a part of the FCC delegation, rather than seek separate membership status in the HFCC. Tom Polzin said that he welcomes the NASB's participation in the FCC delegation to assist him since we have more detailed knowledge of the individual member stations and their technical characteristics and needs. Also, Tom pointed out that the FCC's budget is very changeable, and at any moment it could decide not to send any more delegates to the HFCC conferences. Therefore, he thinks it is very prudent for the FCC-licensed stations to familiarize themselves with the frequency coordination process and make contacts, so that they could take over their own frequency coordination at a moment's notice if this were to become necessary at any point in the future. As a result of our meeting, Oldrich Cip agreed to approach the HFCC Steering Board about the possibility of granting pass codes to the frequency managers of all FCC-licensed shortwave stations which would give them access to the private area of the HFCC website where tentative frequency requirements are posted approximately three weeks prior to each seasonal meeting. This would permit stations to identify potential collisions and come up with possible solutions even before the HFCC conferences, thus making everyone's jobs a little easier. The Steering Board later approved this measure, and it is hoped the new system can be implemented very soon.

Our presence in Bonn enabled us to solve several scheduling problems involving the privately-owned U.S. shortwave stations. For example, we were able to notify Doug Garlinger of LeSEA Broadcasting about a potential collision involving KWHR, whit fortunately did not seem to be a problem. Doug e-mailed us a list of schedule

changes that he had originally submitted in December, but for some reason did not appear in the updated HFCC list. We gave these to Tom Polzin, who got them into a revised list. However, Tom noticed a problem with a change of azimuth from Africa to Europe, which produced a co-channel collision with Radio Portugal. I e-mailed Doug to see if he preferred to look for an alternate frequency for that transmission, or if he preferred to leave the azimuth toward Africa and thus avoid the collision. He chose the latter course, and a collision was avoided. We were also able to notify member stations WIJC and KNLS about collisions indicated on the HFCC lists. Hans Johnson, the frequency manager of WINB-a non-member of NASB at that time—had submitted their A-02 schedule to us before the conference, and I found that their new requirements were not on the HFCC list. Again, the correct requirements were given to Tom Polzin, and the next day they were in the updated HFCC list. However, careful checking revealed four WINB listings with incorrect start and stop dates, plus an extraneous listing that would have made it appear that WINB was listing "wooden transmitters." These errors were pointed out to Tom, and they were duly corrected in the following day's update. As a result of the assistance we provided to WINB. Hans Johnson indicated that the station had decided to become a member of NASB.

For frequency planning purposes, Tom Polzin of the FCC's International Bureau explained that the use of out-of-band frequencies by FCC licensees has to be approved by an interagency governmental body. He provided us with a list of pre-approved out-of-band frequencies which we were authorized to make available to legitimate frequency managers of any NASB member station. This list will save a lot of time and possible frustration for our members.

Both Adventist World Radio and independent frequency manager Bernd Friedewald approached us in Bonn to offer surplus transmitting equipment to members of NASB who might be looking for shortwave transmitters, antennas, etc. I asked them to submit the details to us by e-mail for

inclusion in the NASB Newsletter. We were also approached by Walter Brodowsky of Deutsche Telekom regarding an agreement to broker air time on their large shortwave station in Julich, Germany. Deutsche Telekom will be preparing a draft agreement for NASB's review. Even if NASB as an entity decides not to pursue this type of commercial activity, some of our member stations may find it an attractive opportunity.

At the Plenary Session of the Conference, it was announced that the next HFCC Conference will be August 26-30, 2002, in Bangkok, Thailand, sponsored by Merlin Communications. July 19, 2002, was set as the deadline for submission of tentative requirements for the B-02 season. HFCC delegates accepted the invitation of Rodgers Gamuti of Sentech to sponsor the February 2003 HFCC Conference in Sandton (near Johannesburg), South Africa. Independent frequency manager Ludo Maes of the wellknown Transmitter Documentation Project (TDP) in Belgium was admitted as the newest member of the HFCC with a round of applause. Brief reports were presented by the heads of HFCC committees dealing with propagation and coordination software, a survey of antenna designs used by members worldwide, a monitoring group which will verify whether stations are actually on the air according to their coordinated schedules, and shortwave-related issues to be discussed at the 2003 World Administrative Radio Conference, Jan-Willem Drexhage of Radio Nederland explained a bit about Power Line Communications (PLC)—a new system that will give very fast Internet connections to people in Europe, but will also interfere severely with shortwave listening. "It is very dangerous for our broadcasts," said Jan Willem. (For more information on PLC, see the "Projects/Links" section of the HFCC Web site: www.hfcc.org. Finally, a few financial matters were discussed. The Bonn HFCC Conference wrapped up around mid-day on Friday, while many of the participants left throughout the day and on Saturday to return to their respective countries, in most cases much more confident about the clarity of their transmission schedules for the coming six months.

Why Shortwave?

Editorial by Tony Ford from the FEBA webpage via ARDXC.

Strolling around the shopping areas of Thailand in 1999, I discovered it was impossible to hire films on videotape. DVD has superseded VHS. Home entertainment technology in Thailand has leapfrogged the UK. Thai people might think VHS tape is unavailable in the UK right now, but they would be wrong. We don't use shortwave radio in the UK, but shortwave is not dead. It is used elsewhere. Most of us in this compact country can hear high quality FM radio, with a wide choice of stations. A few listen to foreign radio stations, either on medium wave (remember Radio Luxembourg?) or shortwave.

The story is different in Africa and the Middle East where millions listen to shortwave radio every day, according to a good friend of mine (he should know because for years he was head of audience research for BBC World Service). FEBA got hold of some survey results from Afghanistan this year. Almost exclusively Afghans use "foreign radio"—that means shortwave—to meet their need for news. In FEBA, we are delighted to hear that. Our focus has been to reach countries that are difficult to enter

with the Gospel. Don't be fooled by the short in shortwave. This type of broadcasting makes giant strides from transmitter to receiver. So, even though it might be hard for real people to enter some countries, their voices can be heard talking about the Lord Jesus. This kind of international radio is still hugely important for African and Asian audiences. As my researcher friend tells me, shortwave radio is still widely used by listeners where it provides services that are otherwise not available.

What about the future? Will shortwave continue to be useful? There are some helpful and interesting indicators. Recently China has been investing huge resources in shortwave transmitters for domestic use; all their transmitters are being upgraded ready for digital radio. Listeners with new digital receivers will get audio quality much better than good medium wave-still keeping the same long distance potential for broadcasters—all for a few dollars more on the cost of their radio set. When digital quality arrives, international broadcasting will get a new lease of life, especially when listeners find something they cannot get on local radio. FEBA's world is changing and the opportunity to share the Gospel with our listeners will continue for a long time yet.

Visit to Radio Vanuatu

By George Brown (originally published in Play-DX 1151)

At the end of November last year, I visited the headquarters of Radio Vanuatu while on holiday in Port Vila.

Vanuatu is a "Y" shaped chain of 83 islands running north and south in the Coral Sea 2,500 km north-east of Sydney, 2,200 km north of Auckland, and 800 km west of Nadi, Fiji. Port Vila is located on the southwest corner of the island of Efate, which is roughly at the joining of the legs of the "Y."

The headquarters is located on the west side of Port Vila and contained administration offices, radio and television studios, and facilities for producing programs. The station is on the air from 1900 hours until 1115 hours UTC Monday to Saturday and from 1900 hours to 1000 hours UTC on Sunday. Vanuatu is 11 hours ahead of UTC. Most of the programs are in the national language of Bislama, which sounds like English since 85% of the vocabulary is English based. There is a daily relay of Radio Australia news and Pacific Beat at 2000 hours UTC and the BBC World Service news at 2200 hours

UTC except Sunday. A daily relay of news in French from RFI is broadcast at 2100 hours UTC. In addition, there are broadcasts of programs produced by Radio Australia, the BBC, and VOA in English and RFI in French at various times.

The transmitter site is on Emten Lagoon about 5 km south east of Port Vila. the site houses a transmitter building containing two short wave and one medium wave transmitter and their associated antennas. The programs are broadcast on short wave from a 10 kw two channel energy Onix Broadcast Transmitter Model HF-10K-2 tuned to 4960 and 7260 kHz. The signal is fed via coaxial cable to dipole antennas directed north and south to the islands in the group. 7260 kHz is used from 1900 until 0600 hours UTC, switching to 4960 at 0600 hours ure until the end of the transmission. If one of the channels develops a fault, as happened on 7260 while I was there, the other frequency acts as the standby. There is a standby transmitter tuned to 3945 kHz, but this is currently out of service because of shortage of spare parts to make it operational, and the date for its return to service is unknown.

The station will answer correct reception reports with their QSL card. The organization had not returned to normal operation last November after the journalists strike in the earlier part of last year and some of the locally produced scheduled programs were not on the air. Consequently, I recommend that you address your report to the Radio Technician, Willie Daniel. Willie is familiar with the verification of reports, although he was unable to locate the stock of cards while I was there. However, he is fully occupied keeping the studio and transmitting equipment operational as well as presenting the occasional program, so don't expect a prompt reply. The station appreciates the inclusion of a self addressed envelop and return postage costs. If you can obtain postage stamps, the cost of a 20 gram letter by air to Europe is 135 Vatus, the current exchange rate is approximately 200 Vatus to One Pound Sterling.

Request for Article

Ye editor has noted recent articles regarding the planned implementation of DRM by International Broadcasters. Also the FCC recently announced approval of a system for implementing digital domestic broadcast services in the U.S. Recent articles by Bob Padula in SWC indicate that something called Eureka 147 is the system likely to be used for digital domestic radio in many countries outside of the US.

We need an article by a knowledgeable person regarding the differences and similarities of the various systems. Particularly with regard to their compatibility. Or are we going to have to have one digital radio for shortwave, another for US domestic broadcasters, and yet a third to hear digital radio in other countries??

In addition to that, Motorola's Semiconductor Products Sector in Austin, Texas has announced that they have developed a silicon chip set that will apply sophisticated digital processing to standard analog signals. Called Symphony Digital Radio, such a system installed in stereo systems, boom-boxes, and car radios would negate the need for digital broadcasts and satellite radio both. They claim near CD-quality sound from analog AM or FM signals. Such a system also eliminates intermodulation, multipath (phase) distortion, and static.

Any takers?? Send same to ye editor.

Adrian Peterson's Diary

Dr. Adrian M. Peterson • Box 29235 • Indianapolis, IN 46229

The "I Will Return" broadcast by Douglas MacArthur in the Philippines

It is just 58 years since General Douglas MacArthur made his famous "I have returned" speech from the shortwave facilities on board three different radio ships at the beginning of the return invasion of the Philippines. The date was October 22, in the year 1944. This is how it all happened.

In their concerted drive into the Pacific, the Japanese army landed on the north coast of Luzon Island in the Philippines on December 10, 1941. The American and Filipino troops were slowly pushed southwards until they were concentrated on Bataan Peninsula and on Corregidor Island, near the mouth of Manila Bay. General Douglas MacArthur was on Corregidor Island at the time and he listened to the daily news bulletin every evening on shortwee from KGEI in San Francisco.

General MacArthur was ordered by the president of the United States to evacuate to Australia, and before leaving he told his support staff that he intended to return as soon as possible. MacArthur, together with his wife and son, were quietly taken out of the Manila Bay area by small boat to a port in the southern Philippines where they boarded a plane for Australia. Soon afterwards, both Bataan and Corregidor surrendered.

However, in the meantime, the American forces in the Philippines established a shortwave radio station that identified on air as "Freedom Radio." This new station was first noted in Australia in February 1942 using a channel in the 31 metre band.

Now, in the era immediately prior to these events, the original Far East Broadcasting Company, station KZRB, operated at least two mobile radio stations on shortwave. It is thought that one of these mobile sta-

tions was taken over by the American army and used on the Bataan peninsula for the broadcasts of "Freedom Radio."

This station was afterwards transferred to Corregidor Island, where it was noted until the time of surrender. It is probable that army equipment was also used for the broadcasts of "Freedom Radio," both on Bataan Peninsula and on Corregidor Island.

MacArthur's flight to Australia took him across Indonesia and Timor, with the intent to land at Darwin. However, because of an air raid at the time, his flight was diverted to Batchelor, some 30 miles further south. Here it was that he made the first of three speeches, re-iterating his promise to make a triumphal return to the Philippines.

According to several of his biographies, he made the same speech again at Alice Springs a day later, and a couple of days later again at the railway station in Adelaide, using on each occasion his handwritten notes on the back of an envelope. Radio station KGEI also rebroadcast this information on shortwave to the Pacific.

In Australia, MacArthur made his headquarters at first in Melbourne and then later in Brisbane. Radio magazines of that era state that a railway train was fitted up for use as his headquarters, complete with several communication transmitters, though this is not mentioned in any of his available biographies. As the fortunes of war changed, MacArthur again moved his headquarters, to Port Moresby and then to Hollandia, both on the island of New Guinea.

At this stage, the radio ship "Apache," followed by the smaller radio ship "FF47," arrived in Hollandia from Sydney Harbour

in Australia. The return invasion was imminent and the American forces sailed for the Philippines, together with the "Apache" and the little "FP47" trailing at the end of the invasion fleet.

This massive fleet arrived in Leyte Gulf on the evening of October 20, the "Apache" made a series of inaugural broadcasts on October 21, and MacArthur announced to the world on October 22, 1944, "I have returned," in fulfillment of the promise he had made more than two years earlier.

The inaugural invasion was made at Red Beach, north of Palo on Samar Island. Here it was that MacArthur waded ashore in preparation for his "I have returned" speech. An American army vehicle, a weapons carrier, was fitted up as a mobile communication station and MacArthur made his speech from this location.

This mobile broadcast was picked up on the navy vessel "Nashville" and re-broadcast on several shortwave frequencies for reception throughout the Philippines. The "Apache" also relayed this broadcast, and the "FP47" carried news despatches in Morse Code containing the same information.

Two days later, MacArthur returned to the navy vessel "Nashville" and made a repeat broadcast, this time for all the world to hear. The "Apache" relayed this programming to the United States where it was picked up in California and proadcast to the Pacific via KGEI as well as via other shortwave stations in California.

Almost every biography on General Douglas MacArthur makes reference to his legendary radio broadcasts, "I will return," and subsequently "I have returned." The date of his first "I have returned" broadcast was October 22, 1944.

Interestingly, October 22, 1844 is a very significant date in Bible prophecy and in American religious history. General Douglas MacArthur made his famous "I have returned" speech exactly 100 years later to the very day, a fact that is sometimes presented by Gospel preachers on radio and television.

This week forms the anniversary 58 years later of these famous radio broadcasts that were carried on shortwave from the transmitters located on three vastly different ships. These ships were the freighter "Apache," the U.S. Navy vessel "Nashville," and the converted fishing trawler "FP47."

The Story of the Little Radio Ship, the FP47

Two weeks ago, we presented the story on Wavescan of the now famous radio broadcasting ship, the "Apache," with its role as a relay station for AFRS radio and the "Voice of America" during the latter part of the Pacific War.

At the time, we mentioned that the "Apache" had a co-traveller, a little vessel known as the FP47. Let's look now at the story of this lesser known sea traveller which was in reality another radio broadcasting ship.

The FP47 was a much smaller ship than the "Apache," at just 125 ft. long, and it was built originally for the Alaska freight and passenger traffic. This ship was also taken

to Sydney in Australia at the same time as the "Apache," where it also was completely rebuilt and re-outfitted. Two diesel generators were installed in the FP47 as power units for all of the electronic equipment, which included two American army Morse Code transmitters at 500 watts each.

In rebuilding the ship, the original masts were re-positioned in an attempt to counteract the weight of the heavy electrical equipment. However, the calculations were incorrect and the masts leaned forward, giving the appearance that the ship was moving backwards. The official radio code for the FP47 was "Bedpan."

The original delivery date for both the "Apache" and the FP47 was planned for late November 1944. However, the events of the war speeded up, and the FP47 hurriedly sailed from Sydney Harbour with the "Apache" right at the end of September. Both ships, with their electronic equipment still untested, arrived at General MacArthur's forward headquarters in Hollandia, New Guinea, on October 10, just two days before sailing time for the return invasion of the Philippines.

Two days later, the whole invasion fleet left Hollandia for the Philippines, with the "Apache" trailing behind, and the smaller FP47 trailing behind the "Apache." The entire flotilla arrived in Manila Harbor exactly one week later.

The purpose for the radio ship, the FP47, was to be a subordinate radio ship to the

"Apache." The Morse Code transmitters sent war news and despatches to the "Apache" for onward transmission to the United States. The FP47 was a communication vessel for use by newspaper and radio correspondents, whereas the "Apache" was a radio broadcast station and a navy communication facility.

The FP47 saw duty in the coastal areas of the Philippines and other islands in the western Pacific, usually in conjunction with the "Apache," but not always. After the conclusion of hostilities, the FP47 was sent back to the Philippines, where it carried radio traffic in Morse Code, apparently in conjunction with land based stations that had been re-established.

That's the last that is known about the little radio ship, known by number and not by name.

The Mystery of Irish Radio History— Early Shortwave Era

There was indeed a shortwave service on the air in Ireland in pre-war days. It was just a small unit and it was on the air spasmodically for a period of around three years. This is the story.

A high powered mediumwave station was erected in 1932 near Athlone in the centre of the Emerald Isle. This station was on the air without callsign, and it identified as "Radio Eireann".

In June 1938, the American radio magazine, "Radio News," announced that a 2 kW station was under construction near Moydrum in Ireland. In March of the following year, the same magazine announced that the station was now on the air and testing on five different channels with a power output ranging from 2 to 5 kW.

The transmitter was constructed and installed by the Marconi Company of England and it was co-sited with the larger mediumwave unit at Moydrum, a small village near Athlone. Programming was generally a parallel relay with the mediumwave unit.

"Radio Eireann" on shortwave was heard in the United States, Australia and New Zealand, as well as the British Isles and in continental Europe. Several QSLs, probably in the form of a typed letter, were received in the United States and Australia.

In mid 1939, the scheduling from "Raido Eireann" was described as irregular, and apparently the station went silent just before the beginning of the 1939 emergency in continental Europe. However, a year later the same shortwave transmitter was noted on the air again with the same style of programming in English as noted previously.

At this stage it was announced that the programming was directed towards the United States, though it was heard just as well in the South Pacific. The final monitoring report of "Radio Eireann" with 2 kW on shortwave appeared in the Australian magazine "Radio & Hobbies," in December 1941.

That then was the end of the first era of shortwave broadcasting in Ireland, an era that lasted a little under three years.

(Observer-BUL)				

CANARY ISLANDS 6715usb still alive: I was curious to know if this stn is still alive. So on Wed, 2 Oct at 1953 I tuned to 6715U and there it was. Having same distorted audio at times as earlier, but no question, same stn. Korean lang religious progr. Haven't seen any reports of its origin so far. (Jari Savolainen-FIN, DXLD Oct 3/BCDX/Bueschel-D)

Actually, there is the bc schedule on the home page of Yoido Full Gospel Church http://www.fgtv.com/fgtv/B_9/WB_91_L. htm> But, as would be expected, it won't mention the freq 6715 kHz. (Pentti Lintujaervi-FIN, hcdx Oct 4/BCDX/Bueschel-D)

They apparently shifted to "summer time" in the end of March as all progrs were one hour earlier since that. Here is a monitored "summer time" schedule (s-on/off times are variable. sometimes up to 10-20 mins):

Sunday: fade in 1845-1920, Wed: 1915-2030, Fri: 2045-2230,

They have also been totally unheard here on some Sundays and Fridays, maybe off the air for some reason. It will be interesting to see if they switch to "winter time" at the end of this month. (Jari Savolainen-FIN, BC-DX Oct 7/8/Bueschel-D)

"I got reply from Yoido church and a religious organization called AG. They said they didn't know the existence of 6715U. But after I investigate many full gospel churches and listen to Mr. Hodgson's recording many times, I find the church relayed by 6715U transmission is 'Full Gospel Las Palmas Church.'

The pastor of FGLC is Mr. Jung Byung Sung. I send him E-mail and waiting for his reply. Do you know where Las Palmas is? In a gospel church article, Mr. Jung said many Korean people can't go to his church because many Koreans are fishermen. Maybe 6715U is meant for Korean fishermen who can't go to FGLC. Las Palmas is located in islands? I don't know Las Palmas at all.

FGLC belongs to Yoido Full Gospel

Church and Mr. Jung is sent by Yoido Full Gospel Church." (Sung Chul Cho-KOR, via WWDXC BC-DX Oct 16/BCDX/Bueschel-D)

Full Gospel Las Palmas Church, Plaza de Augustin del Castillo 3, Las Palmas de G.C., Spain. email <fglc@jet.es> fax 928-20-0139 telephone 928-20-4245 Pastor's name is spelled as Chung Byung Sung. (Hans Johnson-USA, Cumbre Oct 16)

An answer, finally: The 6715-USB transmission is directly operated by Broadcasting Department of Laspalmas Full Gospel Church.

transmitter POWER = 100 W (= 0.1 KW) transmitter ANTENNA = Dipole (reverse L type) directional to Western Africa

Sundays 1000 Sundays 1800 Wednesday 1930 Fridays 2130 Info source= Mr.Chung Byoung Sung (the pastor of the church) (via Cho from Korea, Oct 18/DX Listening Digest/Hauser-OK)

A nice e-mail verification was just received for a report sent from last Wednesday's broadcast. The v/s Mr. Chung says: "Our church is from YOIDO FULL GOSPEL CHURCH which is in Korea. One of the missionaries from YFGC, is working as a priest in FGLP. The radio for the crew who work in the sea to hear live worships. We play this radio on live every Sunday at 11.00am and 7.00 pm in LP time, on Wednesday at 8.30 pm, and Friday at 10.00pm also in Las Palmas time." He wants reports to be sent to pulse@121.net 73, (Mauno Ritola, Finland, Cumbredx mailing list, Oct 18/DX Listening Digest/Hauser-OK)

CLANDESTINE - MIDEAST New schedule for anti Syrian station **Voice of Homeland** in Arabic:

0330-0400 9950 1500-1530 12085 only (deleted 12115) 1600-1630 12115 (Observer 210 Oct 4, 2002 via CDX-ML/Clandestine Radio Watch/Schoech-D)

The Syrian clandestine radio has identified itself as: **The Arabic Radio** [Ar: Al-Idha'ah al-Arabiyyah]. The radio has a web site with the following URL: http://www.arabicsyradio.org

Listeners can access the radio's weekly broadcasts from Sunday to Saturday via its web site. The Arabic radio shows the following motto: Syria Arab Free Nation

The radio broadcasts daily as follows: From 0430-0500 on 9950 kHz From 1500-1530 on 12085 From 1600-1630 on 12115

The Arabic Radio broadcasts material condemning the Syrian government and its human rights record. Source: BBC Monitoring research 18 Oct 02 (via BBCM/DX Listening Digest/Hauser-OK)

dispute on the West Coast of the U.S. has held up the shipment of a 100,000-watt shortwave transmitter to **HCJB World Radio**-Australias property near the continents northern coast. The transmitter, designed and built at the ministrys Engineering Center in Elkhart, Ind., is destined for Kununurra near the northern coast of the continent. (HCJB Web Site/Gupta-IND)

FRANCE I think the following message from Alain Delorme of TDF, France finally explains who, where and why on 25775 kHz. 73 (Jari Savolainen, Kuusankoski, Finland, Oct 7/DX Listening Digest/Hauser-OK)

We are doing field trials for the DRM consortium. What you heard is an old test program (in order not to be considered as a real one) we use on a 200 W short wave transmitter in Rennes (Brittany - France). These trials are made in a simulcast mode (analog + digital) of DRM protocol. I hope this answer your question. AD (Alain Delorme, TDF, Oct 7 via Savolainen/DX Listening Digest/Hauser-OK)

GREENLAND It turns out that the KNR frequency is 3815 kHz (USB) -and not 3812 kHz as previously reported. The transmissions are no longer unofficial since.

KNR has started paying for the transmissions!! Broadcasting hours are 1200-1300 and 1800-1900 local time which is 1400-1500 and 2000-2100 UT (when local DST is observed). One hour later UT [1500-1600, 2100-2200] when Greenland return to normal time from October 27th. I believe the transmissions consist of news in Greenlandic, followed by some PSAs of some sort and then finally news in Danish. The transmitter is located in Tasiilag on the East Coast of Greenland and is running around 100-200 W. There's a general election coming up on December 3rd in Greenland, but there are no plans to let the short wave transmitter run for any longer on that date - but of course plans may be changed before the actual date (Stig Hartvig Nielsen, Denmark, Oct 17/DX Listening

active again with talks in Mongolian and Mongolian folkmusic. The crystal is defect, so it drifts up and down in freq 4865.48 _ 4866.20. There are also modulation problems and the transmitter power seem to be less than 12 kW as listed. 25332. (Roland Schulze-PHL, DXW Sep 12-14/BCDX/Bueschel-D)

MOZAMBIQUE 4925: I guess
Mozambique operates here. On 7 Oct,
Indonesia signed off at 1500, but even after
that, weak broadcast of another station
continued. Language sounded like Spanish
or Portuguese, and that astonished me very
much, because the time did not fit for
American opening. After consulting with
ILGRadio database, I became convinced
that Portuguese might come from
Mozambique, Africa. Signal totally
disappeared by 1600 (Vladimir
Doroshenko, Dneprodzerzhinsk, Ukraine,
Signal Oct 18/DX Listening Digest/HauserOK)

NEPAL Radio Nepal back till 1715 soff on both 5005 and 6100 kHz. Since about late Sept. Checked a little while ago at 1715; s-off after Nepali nx update and NatAnthem. (Victor Goonetilleke 4S7VK, BC-DX Oct 2)

5920, **WBOH**. Per David Robinson, station engineer A 50 kW converted AM transmitter engineered by Transcom (as heard), a Canadian company, is in place at a site about 5 miles from WTJC. They are running low power tests right now with just the exciter at about 50 watts to check and tweak their antenna pattern. At this time, they will keep it on most of the time. Once these are complete, they will go to full power. The antenna is a rhombic at 180 degrees. They are using a cable to feed the signal to this transmitter. While the tests are // to WTJC on 9370, WBOH will have about 50% Spanish programming of its own. Like WTJC, it will be on 24/7. The

website says the call stands for Worldwide Beacon of Hope. They will verify these tests. They will also write the power on the card if you ask them, they did for me when I heard them at low power during an ice storm a few years ago (Hans Johnson, Sep 30, Cumbre DX/DX Listening Digest/Hauser-OK)

The FCC has released a public notice showing the grant of a permit for the Aurora Communications International HF station in Alaska. The Site is at 11621 Sterling Highway, Ninilchik, AK 60-06-34 N 151-34-21 W. No Call Letters listed in the notice.

The notice also shows the grant of a new HF station to Grace Missionary Baptist Church, apparently at the same location as WTJC. (Donald Wilson, Sept 27/DX Listening Digest/Hauser-OK)

VATICAN Vatican Radio Sked eff. 27 October 2002 to 30 March 2003 [as

27 October 2002 to 30 March 2003 [as usual, durations are not specified! If you really want to know, hunt for the same frequency elsewhere in the list, and leave a break of 5 minutes or so between services -

Pirate Radio Report

Chris Lobdell • P.O. Box 146 • Stoneham, MA 02180-0146 • clobdell@attbi.com

Hello and welcome to the November 2002 edition of the **Pirate Radio Report**. Well, by the time you read this Halloween 2002 will be history. Hopefully there was a lot of activity and you will report your logs to us here.

Europirate Season Is Here

Yes, it my time to remind all of you on the East Coast of North America that this is the season to try for these stations. Most operate between 6200-6300 kiloHertz and sign on the air between 0500-0800 UTC on Sunday Mornings. Also, you can try for Wrekin' Radio International on 12265 kHz and Radio Free London on 5805 kHz. The high frequencies find Alfa Lima International, the Dutch regular on 15070 kHz and the Dutch Pirate Sensation AM has been noted around 0600 UTC on 15725 kHz. Last-year, several Dutch pirates congregated about 21890 kHz on Sundays between 1200-1600 UTC, so keep an ear tuned there as well!

Loggings, sure, we've got em, thanks to Joe Wood-TN and George Zeller-OH.

Betty Boo Radio, a Halloween pirate was logged on October 16th, 2002 on 6953 kHz AM from 2309-2339 UTC. OM announcer named Kiel Ovranddy presenting the Halloween show. Is at 2309 of "Boop, Boop de Boop: followed by a pipe organ fanfare. Station ID by Ko at 2314 and 2316 along with address of POB 28413, Providence, RI 02908. Station IDs at 2323 and 2337 by James and Ravi Brownyard. Address given by Ravi was in Calcutta. Songs included: "I Want to be Bad" by Betty Boop at 2326, "Hell's Bells at 2330," "I'm the Bogeyman at 2334," "Skeleton in the Closet at 2330," and others. [Wood-TN].

Captain Morgan was presumed to be the one heard on 6950 kHz in AM on October 12th at 0108-0133. Celebrity Jeopardy with Sean Connery, Nicholas Cage, and YL at 0115. Chants of "Jerry" from "Jerry Springer Show" at 0109. Songs included: Dixieland Jazz at 0108, Theme from "Rawhide" at 0110, "You Wear it Well" by Rod Stewart at

0110, live version of "Hot Stuff" by James Brown, "Capt. Morgan" by Garth Brooks at 0122, "Maggie May" by Rod Stewart at 0122, "Mail Order Bride" at 0128, and the theme from "Twilight Zone" at 0132. Signal lost at 0133 with no ID heard. [Wood-TN]

Radio Pigmeat International, a new pirate was heard on 6927 kHz in the AM mode on October 21st 2002 from 0117-0138 sign off. I caught the last few minutes of this transmission. It had a good signal. This broadcast was hampered by heavy vox QRM and static. Station ID and address of POB 1. Belfast, NY 14711 at 0133 and 0134. The ID was "You're listening to Radio Pigmeat International." Songs included "The Tide is High" by Blondie at 0117, "Vampire" at 0123, and "Living on the Front Line" at 0127, all of which had a reggae flavor. Sign off announcements at off with "Radio Salvation" at 0135. Signal lost at 0138. It sounded like a QSO about the show followed. [Wood-TN].

wmpr or Micro Power Radio, the Techno-Pop station was logged on 6955.1 kHz from 0157-0240+ October 14th featuring rock mx and some instrumental mx, with frequent 0M/YL WMPR-6955 IDS. Solid AM signal. [Zeller-OH]

WPUP was logged on October 16th on 6953 kHz in the AM mode at 2212-2238 sign off. A very good reception with only slight fading and a little ORN/M. From the content of the show, I think this was a rebroadcast. The om announcer mentioned Y2K, Monica Lewenski. Station IDs at 2215 and 2229 as WPUP along with the Voice of the Runaway Puparishi, Cat Eater Radio, and others. An address of POB 1 Belfast NY 14711 was given. Songs included "Children of the Grave" at 2212 and "Paranoid" at 2218 by Black Sabbath (with Ozzy), "Along Comes Mary" at 2223, Paranoia" by the Kinks at 2231, and others. Ads for Ken-L-Ration at 2228. Dogs barking at 2235. Lost signal at 2238. This was a good show with good music; you don't hear much Black Sabbath these days. [Wood-TN]

Until next month, Happy Pirate DX!

Reception report checked and verified.

The Tibet QSL, as illustrated on this page, is the first one he has received in 9 weeks. He thought the drought was about water, not a lack of verifications. Bill Wilkins reports that the FCC has a TIS section in their website... www.fcc.gov/mb/audio/bickel/tis.html. This info may assist Marlin Field in his quest for the Cleveland TIS station on 1620. Wendel Craighead sent in some great clandestine QSLs. He was especially glad to get Khmer Krom since he has a number of Cambodian friends, some of whom are Khmer Krom. Scott Barbour reports that Mrs. Gulya Bosacova from Radio Tashkent will be in the US

to do a feature on US listeners of Radio Tashkent. Great....Sam.

Net Notes

Tom Sundstrom • P.O. Box 2275 • Vincentown, NJ 08088-2275 • Fax: 609-859-3226 • trs@trsc.com http://www.trsc.com

Compare this month's column to last month's iteration and you may note the fonts are different.

The home office changed last month, and the NASWA Webmaster will tell you it is for the better. An Apple iMac G4/800 MHz 17-inch replaced the Windows box. The changeover is ongoing, but so far so good and the iMac is a pleasure to use.

Gone are the problems of missing Windows files, overwriting of files, and blue "screens of death." The streaming audio players now play without hesitation.

Some files on the PC and on the Web sites have yet to be converted, but that all will be done in due course.

Radio-wise? The iMac sits next to the Ten-Tec RX-350 and JRC NRD-525. Preliminary tests show the noise levels (if any) are significantly less than with the PC.

Software for the Mac

Real's RealOne Player (for OS X only) is beta, but appears to be quite stable. As we mentioned last month, the optional audio-enhancing iQfx2 software is not available. The player will handle the audio distributed by live365.com. Dial up real.com and download the free application.

For DOS and Windows,
GeoClock is a marvelous worldwide
time-display program. Ralph Brandi
suggested a Mac near-equivalent
called Time Palette. We like it. There
are no less than 11 different globe
projections of the "Living Earth" and
the political earth, including zoom
evels; the program does not offer
the 400+ customizable maps found in
FeoClock. A floating time bar lets the
user set up multiple clocks for cities
round the world. And there is more.
Review, download and purchase

(US\$30) the program from www.timepalette.com.

Internet Relay Chat (IRC) networks are a fun way to share information, live. See the how-to page at www.n1dk.com to quickly connect to the #swl chat room on the StarChat network. For the PC, mIRC (www.mirc.co.uk) is probably the most popular program. For the Mac, IRCle (www.ircle.com) and Snak (www.snak.com) are two offerings, but at the recommendation of Jay Novello we looked at the beta OS X-only AkwaIRC (akwairc.online.fr). It is still in development, but already it is our IRC program client of choice.

Separate chat clients for users for AIM, Yahoo!, ICQ, MSN and others are readily available, but we recently wrote about about an all-in-one PC program called Trillian. For the Mac, we just discovered Proteus in beta form (www.indigofield.com). It is a bit rough around the edges but the potential is there to load one app and deal with a number of different chat clients at the same time. Unlike Trillian, Proteus does not (so far) seem to connect to IRC servers.

English Language Schedules

Revisiting Mark Fine's Web site for alternatives to the PC-only receiver control software, I have had another close look at the Java browser with the continuously updated schedules. Arrayed by country, frequency or time, the application is very easy to use. It is much easier than digging through reams of paper: www.fineware-swl.com.

In the next month we expect to do some update work on the Winter SWL Festival Web site. A few things have been gathering in the electron pile here. Check it out at *swlfest.com* and mark your calendars now.

Pirate Radio Extra-Vox America Offers Refund!

Were you one of the pirate DXers that heard this station back in April of 1995, sent the required \$3.00 for a QSL and were stiffed? Well, the station is back and is offering refund your \$3 if you send a request to them at their new maildrop: Box 1, Belfast, 14711. (Overflow from Chris Lobdell's Pirate Radio Report column.)

Tropical Band Loggings

Dan Ferguson • 12053 Kahns Road • Manassas, VA 20112 • troplogs@zerobeat.org

Deadline via Distribution Editor is Nov 10: or direct to troplogs@zerobeat.org by Nov17. DanF

- N.KOREA KCBS Pyongyang 1145 talk by man, sounds like a preacher in Spanish. Very weak, in the clear. 1148 seems to be abruptly gone. 1152 back with a man with a few words to music, female vocal, opera like, so must be Korea. 1200 time pips, very weak now, to talk., 1212 still here. 10/5 (Ziolkowski-WI)
- 3205 BRAZIL R. Ribeirao Preto 0022-0030 M PP prayers at t/i. Best copy of this one in sometime. S5 w/ rapid fades or flutter. W began comments at 0030 with what might have been the news. 9/17 (Montgomery-PA) 2 M in PP 2320-2334 w/futbol pre-game, crowd noise in background. Game started at 2333, visitors from "Bogota" ID heard during tlk. Poor 9/18.(Barbour Jr-NH)
- PAPUA NEW GUINEA R. West New Britain 1041-1047 Talk by M in Pidgin, followed by some lively music. Mention of "National Capital District", then more lively music. SINPO was 34433 with S8 signal strength, but the modulation was a bit low. 9/28 (Maroti-NY) 1216 local announcements by man in local language, upbeat pop/yocal music (Wiseblood-TX 9/30)
- 3240 SWAZILAND TWR Swaziland in Swazi? 0327-0348* M w/rel tlk and hi-life mx. Canned "TWR Swaziland" ID @ 0330. Choral mx and rel tlk until s/off w/2 ment. "Mozambique", IS. Good! 10/5.(Barbour Jr-Ni.)
- 3249v HONDURAS R. Luz y Vida 0330-0059 SS; rel mx and SS ballads. M tlk over music. ID during tlk at 0048 with freq announcement. Poor with deteriorating signal after 0058, 9/26. (Barbour Jr NH)
- PAPUA NEW GUINEA R.Madang 1044-1048 talk by M in Pidgin at tune-in, followed by vocals by YL. SINPO 34433. 9/28 (Maroti-NY) 1145-1204* w/bouncy vern pops, M ann. in Pidgin, fair sig w/notably good audio, but rapid fade to poor by time of ID 1203, brief orchestral anthem and off at 1204, but carrier still open past 1210. 9/28 (Newman-IN)
- 3266.5 SULAWESI RRI Gorontalo 1159 Oct 19, YL in Indo, SCI, poor, better at 1230 recheck. (Lineback-KS) 3266.4 1217 Mw/II nx w/taped reports from the field. Very Strong 9/30. (Wiseblood-TX)
- 1279.55 ECUADOR V del Napo 0750-0805+ SS ballads. Lcl rel pgming in lcl lang. Rel recitations. Choral mx. "R. Marie" rel pgming. Good-strong. Hd earlier around 0100-0300+ with a weak signal. 9/29.

 (Alexander-PA)
- 280.0 CHINA VO Pujiang 1219 presumed to be the one here with talk by a man & woman in a Chinese dialect. 9/30. (Wiseblood-TX)
- 291.25 GUYANA Voice of Guyana BBC World Service news followed by music program, //5975. Fair to good tonight. (D'Angelo-PA) R.Guyana 2, 0858-0920 Indian mx at t/i. Then male announcer with an event to take place this weekend in Georgetown which was providing free transportation. Gave phone numbers to call to make arrangements. Then back to American pop tunes. Fairly good audio with some fades at S10 signal level. Audio even though in the clear still below 100% modulation levels. 9/14. (Montgomery-PA) VoGuyana 0855 reading out birthday wishes, reggae song, ID @ 0901 as "The nation's sound, the Voice of Guyana" during more birthday wishes; excellent reception this morning, "You're listening to the Earlybird show, compliments of the Guyana Broadcasting Corporation", time check, into bhangra song; 9/21. (Brandi-NJ) VoGuyana(T) 0130-0230 EE, very weak, could only make out that lang was EE. M&W in very long talk apparently political by references to "the government" heard a couple times. Would like to get a solid log of this one. 9/21. (Brouillette-IL)
- 00 GUATAMALA R. Cultura SS 1115-1130, ID 1120 Rel. music. Good 9/13. (Ervine-TX)
- 15 INDIA AIR Bhopal 10/8 0024-0033 Song of India IS, followed by Vande Mataram, then brief announcement by OM. Mournful instrumental music followed. Presumed news by YL at BoH. A utility signal came on at 0031, making reception only possible on USB. Signal strength was good, S6-S7, but many static crashes spoiled things. SINPO 33232. (Maroti-NY)
- 15 PAPUA NEW GUINEA Radio Manus (Admiralty Islands), 1027-1102 Sep 26, island music until ID and news at 1030, economic news at 1045 and sports at 1047. More music until 1101 ID. Poor at tune in but constantly improving as dawn approached. (D'Angelo-PA) 9/28 1050-1052 Talk by 0M in Pidgin, then reggae music. SINPO 34333. (Maroti-NY)
- 25 INDONESIA RRI Palangkaraya 10/16 2157-2201 Soft vocals, then "Radio Republik Indonesia" ID by OM. Song of the Coconut Islands at ToH. SINPO 23232, pretty good considering this was during a noreaster. (Maroti-NY) RRI Palangkaraya, 1205-1212 Oct 19, M w/RRI nx, fair over Guat. (Lineback-KS)

- GUATEMALA R. Maya de Barillas 0909-0923 At tune in, a very pretty song by a female vocalist 3325 in SS. Male announcer with ID hrd at 0909 in unknown language. ID as Radio Mayo. Then to brief announcements and back to SS mx. Very nice clear copy at S7 signal level with some fades, 9/ 14.(Montgomery, PA) SS 1039-1059, ID 1047, music, into regional language 1100, 9/13.(Ervine-TX)
- MOLUCCAS RRI Ternate 1157 10/19, Instrumental mx, SCI 1159, poor. (Lineback-KS) 3345 PAPUA NEW GUINEA R. Northern 9/28 1053 Ska music with OM vocals, PNG signals starting to
- fade, SINPO 23333, (Maroti-NY) COSTA RICA CRI via REE 0350-0400 9/21 SS, music, nx. (Ervine, TX) 3350

3345

- GUATEMALA Radio La Voz del Nahuala 0309-0340 10/9, instrumental music and talk in Span-3360 ish and Quechua. Marimba music after 0321 ID. Fair. (D'Angelo-PA)
- GHANA R. Ghana Accra 9/17 2250-2302 EE. Pop ballads and M over mx at 2259, "Good evening. 3365 hope you are enjoying the program" ID and local TC (7 o'clock). M w/nx; signifigant drop in audio quality. Fair-poor. (Barbour-NH)

- GUATEMALA Radio Chortis (t) 09/21. 0520-0530. "Hail Mary" and rest of a Church service in 3380 SS. Fair to Good. (Wood TN 9/19)
- PAPUA NEW GUINEA Radio New Ireland 1051-1106 9/26, Wannouncer with Pidgin/English talks, 3905 island vocals. Mentions of New Ireland during talk at 1056, romantic vocal and ID at 1100 followed by News. Seemingly popped up out of nowhere to fair level as sunrise approached. (D'Angelo-PA) (presumed) 9/28 1056 Ballad with M vocals. (Maroti-NY) 1159 Oct 15, GSTQ very faint, poor. (Lineback-KS) JAPAN R. Tampa (tent) JJ 1115-1218 9/20; ment Kyoto, M&W talk. Classical mx 1156. (Ervine, TX) 3925
- INDONESIA R. Pontianak (tent) Lang. 1200-1300 most days. Fast talk w/music. (note: I was 3976 suprised to receive this. Have been listening regularly. I feel pretty sure of this since I do hear the 'Coconut Song" when signing off. I have only seen reports on this station from Japanese SWLers. Good mx.(Ervine-TX) 1215 Oct 19, M in Indo, poor under AROs (Lineback-KS)
- GERMANY DW in GG 0503-0533 9/17. Report from UN w/commentary. Heavy qrm from hams 3995 w/fading toward end.(Ervine-TX)
- SULAWESI RRI Kendari 1216 M in Indo, poor 10/19. (Lineback-KS) 4000.1
- GUATEMALA R. Verdad 0045-0505* variety of rel organ mx, lite organ mx, choral mx, marimba 4052.47 mx, lite instru mx. IDs, SS anmts, very little talk. EE ID anmts with addr, asking for rpts at 0221 & 0303, 0321. S/off with NA. Weak but in the clear. Fading up to fair to good levels at times, 9/28.(Alexander- PA)
- PERU R. Imperio 1036 man in Spanish preaching in a hall/auditorium with a lot of echo, 1108 religious 4388.9 announcements by man, brief upbeat religious vocal/choir music (Wiseblood-TX 9/28) 9/28 1025-1036 alternating talk by M&W, then the M alone. Folk-type song, with a canned ID heard over the music. At 1036, what sounded like a prayer service. SINPO 32332 with some sweeper QRM. (Maroti-NY)
- PERU R. Bambamarca; 1039 ads, man in Spanish greeting listeners, schedule of religious event 4421.3 for Sunday, 1044 "Gloria, Gloria, Gloria a Dios", into a man preaching before a live audience (Wiseblood-TX 9/28)
- 4461.55 PERU Radio Nor Andina; 1048 Andean stringed instrument/vocal music. Strong UTE QRI (Wiseblood-TX 9/28)
- INDONESIA RRI Serui 9/28 1116-1130 Was surprised to find this one still hanging in there 4606.4 Indo pops until 1129, when a M spoke briefly. Then, they played what I assume is their ow interval signal (again I never heard this one before) ID at BoH as "Radio Republic Indonesi Serui" by M. SINPO 24332. (Maroti-NY)
- 4746.85 PERU R. Huanta; 1053 man in SS with TC, rel anmts (Wiseblood-TX 9/28) 1004 SS music an anmts, M w/ID. Poor 9/15. (Barbour NH)
- 4753.35 INDONESIA RRI Makassar 9/28 1057-1109 This one's been regular the past week. Indo pops wit YL vcls, then brief talk by OM. At 1059 what I presume to be the Makassar interval signal; Γ never heard this one before. At ToH, into presumed news, followed by an "anthem" or patriot song. SINPO 23333. (Maroti-NY) 4753.3 1202 M w/RRI nx, fair to good 10/19. (Lineback-KS
- BRAZIL R. Educação Rural 9/28 0150 lite pop mx, ads, M w/full ID (freq, power, callsign, st 4755 tion phone numbers) 0155. Nx 0200. Very good. (Brouillette-IL)
- ANDAMANISLANDS. AIR Port Blair 1214 South Asian/subcontinental vocal music, 9/30. (Wiseblood-TX) 4760.0 ECUADOR R. Centinela del Sur 1055 SS vocal ballads, "musica romantica"; 10/2. (Wiseblood-1
- 4770.0 BRAZILR. Congonhas 0035-0108* popballads in PP/EEg "Everytime you go away" w/M between son 4775 ID during tlk. Mat 0100, w/weakening signal, over music until s/off. Fair-poor 10/2. (Barbour Jr N
- PERU R. Tarma 1056 Cumbia vocal music, ballads, man in Spanish with announcements, a 4775 promos, slow choral anthem at 1100 with a prayer read by a man & woman in Spanish, 1 gave frequencies including 99.3 MHz, many "Radio Tarma" slogans; 9/28.(Wiseblood-TX)
- SWAZILAND Trans World Radio 9/17 0415 talk in German, music, into English program 4775 0430, IS 0431, but signal fading out. (Brandi-NJ)

- 4775.0 INDIA AIR 1213 presumed to be the one here with talk by a man & woman in Hindi? (Wiseblood-TX9/30)
- 4775.0 PERU R. Tarma 1054 Andean ballads, man in SS w/anmts, 1100 brief choral anthem, brief "oriental" sounding flute music filler, 1102 SS anmts. 10/2. (Wiseblood-TX)
- GUATEMALA R. Cultural Coatan 1211 religious announcements by man in Spanish, into cumbia vocal/religious music, brief instrumental filler music (Wiseblood-TX 9/30) 4779.995 R.Coatan (P)1120 mellow male Spanish vocal. Weak, noisy, swiper qrm. 1124 recheck M in SS, to another male vocal. 10/5.(Ziolkowski-WI) 4779.8 1105-1140 w/mostly instr. mx to 1130, then full ID 1130, and into rel tx. Pretty nice sig but sweeper QRM. Annor. IDs several times as "Radio Coatan," but canned ID is "desde el municipio de San Sebastian Coatan, Radio CULTURAL Coatan." 9/28.(Newman-IN) 4780 presumably recently reactivated R.Cultural Coatan, long version of Guatemalan NA in progress at 1032 10/1, SS ID 1036 but couldn't get much out of it, then into what seemed like an inspirational message, then C.Am vocals. Fluttery, and not very strong, on a poor 60 mb morning. (Berg-MA) 1048-1057 10/7 M w/long tlk; several ment's. "mano y mano" and ID, ballads. Fair-poor. (Barbour Jr-NH)
- 4781.35 ECUADOR R. Oriental 1055 man in Spanish with TC, announcements, ads, promos (Wiseblood-TX 9/28) 4781.3 (tent) 9/11 0155-0208, SS, very old LAm romantic vocals. Continuous mx over TOH, then annmts by W at 0208. No ID hrd. Poor in QRN. (Brouillette-IL) 4781.37 10/9 1005 local music with accordions, ID 1018.(Brandi-NJ) 4782v (Presumed) 10/02 0926-1004 SS. M w/tlk, musical bridge and applause 0930. Tent ID & fanfare w/mention, "Tena". Music program until 1001, same fanfare and tent ID 1003. Poor with "sweeper" QRM. (Barbour Jr NH)
- 4790 INDIA AIR 9/19 2358 IS, into talk 0000; lots of static, hard to make out any words, but IS was definitely them. (Brandi-NJ)

Last Minute Logging

This one arrived just as I was sending the column to Ralph Brandi, our esteemed publishing honcho:

21720 SWITZERLAND SRI Sottens in EG 1730-1820*, running nx rpts on business and govt. affairs, rpt into FR 1800 (Aden ID 10/17)

WORLD OF RADIO, CONTINENT OF MEDIA, MUNDO RADIAL BROADCAST SCHEDULE EFFECTIVE OCTOBER 27, 2002

It always pays to check all RFPI frequencies beyond their scheduled hours. Schedule shown is nominal, but it is not unusual for one transmitter to be down, and for programming to run up to an hour late. Due to a temporary internet outage, the latest show may not be available.

WJIE schedule is flexible; WOR may also appear during the 0100, and 1700 UT hours, and may not be the latest show. Plans to add 13595 soon.

For latest updates see our Anomaly Alert page: http://www.worldofradio.com/anomaly.html

Days and times here are strictly UT.

BROADCASTING STATION CERB BYAN'S ARZ GALLERIES IN Javas Helps, Toronto, Camero FIR & Matres Thank You Thank You:

You can appreciate that it is upt bignantly possible to personally
the many limit reports we receive from electrons on the we ask you to see
expression of appreciation as well as the thanks of these on the program es pression of appreciation or well as the thanks of these we the pregnam. We will always velocine point expendents and commented to the control of the cont denoting Station is incated approximately Lwesty &vi in remotely controlled from our Studio centrally syon, Jarvin and Wellinley Streets, Toronto, Canada.

nt of what that country's shortwave story was like. Here we feature uple of the early Canadians (turn to Canada in the future). (we'll 444 the top are the front and back of a 33 veri from VE9GW, which, as can be transmitted from Bowmanville. tarlo with 200 watts on 6095 kHz. (as II as 11810 and 24380). Frank Macedo s lucky to get this veri--it is dated nuary 13, 1933, and bears a notation at the station would cease operation CHICALS O

erely years. CFBH

it's an EKKO stamp on the card, graved with a picture of a beaver (Canadian EKKO stamps pictured a beaver, :rican EKKO's an eagle). +++ The veri at the bottom right is from old faithful K. which was on 6070 kHz. as long ago as 1938. Above it is an interesting 1929 from the station's MW parent, CFRB. It was then owned by Standard Radio ufacturing Corp. Ltd., producers of "Rogers Batteryless Radio Receiving Sets." los had operated on batteries during most of the 20's. Note the slogans at the tom of the card: "No batteries, no chemicals, no aerial--Just plug in, then tune CPRV is always happy to hear from people who have, or know the whereabouts of, OSL's in need of a home. If you are interested in the future of your OSL's. ck out our Registered Collections program operated by John C. Herkimer, P.O. Box Caledonia, NY 14423. We will supply stickers for your QSL albums, reflecting wish that your veries be donated to CPRV when you are no longer able to enjoy n. Details from John Herkimer (business size SASE, please).

VEOCH

16th Annual

Winter SWL Fest Sponsored by NASYA

March 7-8, 2003

Best Western—The Inn at Towamencin (formerly Holiday Inn), Sumneytown Pike, Kulpsville, Penna. Plan to attend your favorite forums Friday and Saturday. Enjoy meeting with your friends in the Hospitality Room. Bring radio related items for the swap meet or to donate for the Silent Auction. Check out your friends' receivers, bring one of your own for others to try!

No frills; just shortwave, longwave, mediumwave, pirates, and scanning. Once again you will enjoy the camaraderie of your hobby friends.

Please note, there is an incentive for you to pre-register, as prices are more expensive for those who wait. Registration options are also more flexible than in the past, with new one-day and student registrations. If you wish to participate in the meals, you must register and inform us that you will be attending by Thursday morning, March 6th. If you choose not to participate in the meals, the hotel has a restaurant, and there are other restaurants nearby.

Early Registration (rec'd by March 2, 2003)

Full registration: \$43

Two-day Partial (no meals): \$17 One-day Partial (no meals): \$9

Full spouse/son/daughter: \$28

Banquet only spouse/son/daughter: \$16

Student (w/ valid 1D, no meals): \$5
Many things, like the raffle, remain the same:

GRAND PRIZE To be announced

Late or On-Site Registration Full registration: \$50

Two-day Partial (no meals): \$20

One-day Partial (no meals): \$10 Full spouse/son/daughter: \$35

Banquet only spouse/son/daughter: \$20 Student (w/ valid ID, no meals): \$5

SPECIAL Register early to win a sw portable! One free entry for an early-bird registration received by February 12, 2003.

Please bring items for the Silent Auction. Proceeds are donated to charity.

Checks should be made payable to WINTER SWL FEST. Register directly with the hotel for your room by calling the Holiday Inn at (215) 368-3800. For 2003, one special rate \$75 single or double! Tell th hotel staff you're with the WINTER SWL FEST to receive this special room rate. You must make your reevuation directly with the hotel to receive this rate; reservations via the Best Western 800 number or web siare not eligible for this rate. Up to the minute info. can be found on the Winter SWL Fest Web Page: http://www.swlfest.com/ or from http://www.anarc.org/naswa/.

The Best Western—The Inn at Towamencin is located at Exit 31 of the PA Turnpike Northeast Exter sion-Lansdale Interchange. Improved access from the south with the Blue Route (1-476)—ask fi details. Limo service is available from Phila. Intl Airport directly to the hotel.

Please submit the following form with your registration amount or send for more information to:
