VOLUME XLXIII NUMBER 4

APRIL 2014

Radio Singapore QSL  
G. P. O. Box 1902  
Republic of Singapore

Date: 5-4-75

We are pleased to receive your report on

from: **W5LWT** to: **W5LWT**

Your report agrees I add highlights to our programme schedule

We hope you have enjoyed the programmes and will continue listening to broadcasts

for Director of Broadcast

W5LWT

Singapore by night

Radio Singapore International

North American Shortwave Association — America's Shortwave Broadcast Club

# Quality Radio Equipment Since 1942

**WORLD RADIO TV HANDBOOK 2014**

This long established publication is filled with schedules, frequencies and addresses of shortwave broadcast stations. Organized primarily by country. Also includes a by-frequency listing of shortwave broadcast stations, radio club info., plus receiver reviews. *WRTH Pub.* 2013 68' Edition. List price \$34.95.  
Order #6014 .....\$29.95

**WORLDWIDE LISTENING GUIDE**

By **J. Figliozzi**. Modeled on the author's popular *Worldwide Shortwave Listening Guide*, this new book covers all of today's formats: live on-demand, podcast, satellite, Internet, digital, analog, AM, FM, shortwave and wi-fi. Learn what can be heard how, where and when! Spiral bound 6th Edition. 160 p. ©2013.  
Order #2967 .....\$24.95

**2014 SHORTWAVE FREQUENCY GUIDE**

By **J. Klingenfuss**. This guide has the latest shortwave broadcast schedules and includes 7300 abbreviated entries from *Guide to Utility Stations 2013-14*. So you get great coverage of broadcast and utility stations in one up-to-date book! 18' Edition ©December 2013. 360 p. [CD version on pg. 107].  
Order #6153 .....\$49.95

**MTXpress COMPLETE ANTHOLOGY 1999-2013**

This wonderful compilation includes every issue of *Monitoring Times* from 1999-2013 on one computer DVD. In PDF format and searchable on any word. ©2013 Grove Ent.  
Order #6214 .....\$99.95

## ✓FREE Radio Go-Bag

**IC-R6-16**

The compact *Icom IC-R6* is big on coverage, tuning 0.1-224, 851-866,995 and 896-1309.995 MHz in AM, FM Narrow and FM wide modes. The triple conversion circuit provides amazing sensitivity for the size. It has 1300 alphanumeric memories storing frequency, mode, step size, duplex direction and offset, CTCSS tone, tone squelch and skip settings. And it can up to 100 channels per second in 7 different scan modes. Frequency steps include 5, 6.25, 9, 10, 12.5, 15, 20, 25, 30, 50, 100 or 200 kHz. It features a large backlit LCD display. Audio Output is 150 mW 8 ohms 10% Dist. The very efficient circuit design offers extended battery operation. The IC-R6 comes with wrist strap, belt clip, two AA NiMH cells, AC adapter and SMA flexible antenna. 2.3 x 3.4 x 1.2" 7.1 oz.  
List \$246.00 Order #1006 \$489.95 \$179.99

## ✓FREE Radio Go-Bag

**IC-R20 Sport**

The *Icom IC-R20 Sport* has wide coverage from 150 kHz to 3305 MHz (less cellular) in FM, WFM, AM, USB, LSB, CW modes. Advanced features include: built-in 4 hour recorder, 1250 alpha memories, dual VFOs, dual watch, band scope display, auto squelch, atten., lock, RF gain, MW ferrite bar, NL, weather alert, ANL and AF filter. The IC-R20 Sport operates from 4 alkaline AA batteries (not supplied) and comes with: belt clip, battery spacer, BNC tel. antenna and wrist strap. Optional AC chargers and rechargeable batteries are available.  
List \$625.00 Order #6020 \$499.95 \$179.99

## Radio Go-Bag

This insulated bag is great for creating an *Emergency Go Bag* for your radio. It is the perfect size for HTs, scanners and small shortwave portables. There is plenty of room for your radio, batteries, accessories, directories and more. The top is zippered and it has a carry strap plus an open pocket on the front panel. 8 x 6 x 5 inches. Not made by Icom. This Go-Bag will be included FREE with your Icom IC-R6, IC-R20 Sport, ID-31A or ID-51A for a limited time.

**RF PRO-1B**

The *Pixel Technologies RF PRO-1B* magnetic loop antenna provides exceptional MF/HF performance, even in high noise environments.

RF PRO-1B Order #6142 \$499.99

**MINI-WHIP**

The *Benito Mini-Whip* antenna receives from 10 kHz to 30 MHz with impressive performance, despite its diminutive size. Requires 12 VDC. BNC cables between components are not included.

Order #6147 \$119.95

## DC DVM

Here is a low cost way to measure DC volts in the range of 3 to 30 volts. The refresh rate is 500mS. Error is 1%. Size is 24x15x10mm. The digits are 0.36 inches high. Three wires: red power + (3-28VDC), white sense +, black power/sense -.  
DC DVM BLUE Order #0794 \$4.95  
DC DVM RED Order #6165 \$4.95

## POPULAR COMMUNICATIONS YEAR SETS

Receive all 12 back-issues for 2011.  
Order #5803 .....\$9.98  
Receive all 12 back-issues for 2012.  
Order #2356 .....\$9.98  
Receive 11 issues (no Dec.) for 2013.  
Order #6174 .....\$9.15

Excludes Alaska, Hawaii and Puerto Rico

We start this month off with some sad news. Long time club supporter and former editor **Bob Montgomery** passed away on March 6th. Bob edited a number of columns over the years and frequently helped out around the Levittown HQ. Bob was also a regular at the French Creek DXpeditions and the Winter SWL Festival over the years. Rest in peace, om!

We had another successful Winter SWL Festival at the Plymouth Meeting location on 14-15 March. About 115 radio hobbyists packed the Doubletree for the event. Thanks to Co-Festmeisters **Rich Cuff** and **John Figliozzi** and a big thank you to the usual large team of volunteers that make this event happen each year. Also, a special "thank you" to **Ed Mauger** who singlehandedly manned the club's table at the event. This year **Don Jensen** was posthumously selected by NASWA's Executive Council as the club's William P. Eddings award recipient as the member of the year. Don was the main force behind the club's move to all shortwave broadcast back in the mid-1960's and worked closely with Bill Eddings during the early years. Don remained a long time club supporter including donating many of this radio memorabilia to the club to turn into cash through sales to the hobby community. Next year we do it all over again on the 27-28 February 2015.

From **John Herkimer**, Chair, NASWA Country List Committee comes the following update on the radio country situation in the Crimea area: "Recent events in Crimea have caused speculation that a new NASWA radio country may be emerging. The NASWA Country List Committee has briefly discussed the implications of events in Crimea as it relates to the listening hobby and, specifically, the Simferopol transmitter site. For country counting purposes, the Crimea region has long been considered Ukraine. With the

formal annexation of Crimea by Russia on March 21st, the Crimean Peninsula simply becomes Russia (Russian Fed.-European). While the dust has not completely settled in the region, we feel Crimea does not merit separate radio country status at this time."

**Kari Kivekäs**, Secretary General of EDXC and **Jan-Mikael Nurmela**, Assistant Secretary General of EDXC have sent official notification about the 2014 European DX Council conference to be held in the Southern France on 19-22 September 2014. The first part of the conference (19-21 September) will take place in a beautiful small village Saint-Dalmas de Tende situated approximately 80 km North-East from Nice. The latter part of the conference (21-22 September) will take place in the city of Nice. The price for the basic package will be around 175 € (single) / 120 € (double) including: accommodation: 2 nights in Saint-Dalmas de Tende, banquet dinner, 2 Coffee breaks and Conference fee. The preliminary programme is as follows: Friday, 19 September 2014: 1630 EDXC conference check in starts; 1800-2000: Opening of the conference, some lectures and presentations; 2000 Dinner on your own. Saturday, 20 September 2014: 0700-0900 Breakfast, 0930-1230 EDXC programme, 1230-1400 Lunch, 1400-1600 A tour in Tende; 1630-1830 DX programme; 1900 EDXC Banquet. Sunday, 21 September 2014: 0730-0930 Breakfast; 1000 Check out from the hotel + the Excursion "Visiting three countries in one day": Ventimiglia, Italy: a short walk in the city & a coffee break, Monaco: a visit of the Radio Monte Carlo (Italian service) studios (to be confirmed), a tour around the city by walk, lunch on your own. 1800-1900 arrival in Nice, check in at the hotel(s). Our recommended hotel is Hotel St Paul ([www.lesaintpaul-hotel.fr](http://www.lesaintpaul-hotel.fr)). 1900 Free time in Nice, dinner on your own. Monday, 22 September 2014: 0700-0930 Breakfast, 1000-1500 Excursion in Nice with

---

## R.I.P. Bob Montgomery

possible visits at radio stations (Christian Ghibaudo is working hard to arrange visits at radio stations in Nice), around 1500 End of the conference. If you have anything to ask, please, do not hesitate to contact Kari (ksk@sdxl.org) or the main organizer **Christian Ghibaudo** (chr.ghibaudo@gmail.com). More information can be found also on EDXC blog ([www.edxcnews.wordpress.com](http://www.edxcnews.wordpress.com)).

for listeners, radio hobbyists.... download or search online at [www.radioheritage.net/PAL\\_SearchC.asp](http://www.radioheritage.net/PAL_SearchC.asp) and provided as a free community service by the Radio Heritage Foundation. One of the longest running radio guides outside the World Radio TV Handbook and maintained by **Bruce Portzer** from Seattle USA. Now over 50 years of service to the radio community.

The famous *Pacific Asia listener Radio Guides* have just been updated. Medium wave and shortwave stations from throughout the region, thousands of stations, useful data

That's it for this month. Enjoy this month's edition of *The Journal*; it's another good one. 

## Musings

Jerry Lineback • P.O. Box 1220 • Grantham, NH 03753-1220 • [jerrylineback@comcast.net](mailto:jerrylineback@comcast.net)

---

Please e-mail musings to [jerrylineback@comcast.net](mailto:jerrylineback@comcast.net) or send to P. O. Box 1220, Grantham, NH 03753. Next deadline is February 19. Thanks to all contributors.

**Robert D Wells, 544 Thompson St., Peshtigo, WI 54157**

The BBC and its money wizards must be playing some sort of game. Who is it supposed to impress. Every so many years the big wigs juggle the funds so much they don't know themselves where all the funds are going.

Personally, I think someone is making their pocketbook fatter at the expense of the employees and listeners. Their magic dreams are neither intelligent nor funny. It's far from being a quick fix or even any sort of logical improvement. How can they expect any advancement in the programming? They have all these millions of listeners tuned into all their frequencies so why would anyone experiment with the funds and the programs just to brag about all the cuts in funding just to see how they can operate their transmitting stations with the least amount of funds and keep the so-called high standards of programs on the air. The old mechanic's saying applies, "if it ain't broke, don't fix it."

Reducing shortwave transmissions to save money is not going to benefit anyone. BBC World Service management might think it will, but the idea to invest in "new" TV and digital programming seems to be somewhat off base. The World Service has more than 192 million listeners around the Globe. This number will fluctuate according to the desires of the audience.

The bottom line is: The BBC World Service should be funded by the Foreign Office, not by the British Radio Fee. The British Government must leave the BBC World Service to operate directly by its own BBC people. That is my two cents worth of mind-twisting thought.

Thank You, 73, Bob

**Richard A. D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA 19610**  
I had another great time at the annual Winter SWL Festival in Plymouth Meeting along with about 115 other radio hobbyists. Thanks to Rich Cuff, John Figliozzi and a big support team for a job well done. Some of the highlights included Australian Mark Fahey with two excellent presentations about broadcasting in North Korea (Mark made four separate trips to this strange land over several years), David Goren's Shortwave Shindig parts of which were heard live over WRMI (7,570 kHz at 0200 UTC Sunday) and the usual pirate and scanner forums. The food was good and the Presidential Suite was turned into our hospitality room. This year Don Jensen was posthumously selected by NASWA's Executive Council as the club's William P. Eddings award recipient as the member of the year. Don was the main force behind the club's move to all shortwave broadcast back in the mid-1960's and worked closely with Bill Eddings during the early years. Don remained a long time club supporter including donating many of this radio memorabilia to the club to turn into cash through sales to the hobby community.

The QSL returns continue to be strong with another healthy batch of QSL verifications to report. Bangladesh Betar verified an electronic report with a full data Kantajee's Temple Card and a short personal letter from v/s Abu Tabib Md. Zia Hasan, Senior Engineer, Research and Receiving Centre with the envelope covered with the usual pile of stamps. "Gruss an Bord" of NDR via Issoudun and Nauen verified an electronic report with a full data including site logo postcards. Radio Öömrang via Issoudun verified an electronic report with a full data PDF attachment indicating transmission site was Issoudun, not Nauen from v/s Michael Puetz, Sales Consultant, Business Unit Radio at Media Broadcast mentioning the report would be forwarded to the client. Voice of Russia - Tajikistan verified an electronic report with a full data Saint Basil's Cathedral card including a 2014 pocket calendar, holiday card and brief note.

Unfortunately, the QSL card did not mention the transmitter site which the old Radio Moscow used to do regularly. Radio Australia - Al-Dhabbaya kind of verified an electronic report with an electronic reply indicating they are not sending out QSL cards at this time but they can confirm the time and frequency as mentioned in my report from the Radio Australia Transmission group. WRMI - Okeechobee verified an electronic report for a PCJ Radio relay broadcast with a full data "Greetings from Okeechobee, Florida" card from v/s Jeff White.

73, Rich

*Thanks to our contributors. 73, Jerry Thanks to our contributors. 73, Jerry.*

## **NASWA Yahoo Group**

Join moderator **Dan Ferguson**, the club's Yahoo Group, and other club members to discuss reception of shortwave radio broadcasts, program content, propagation, reception conditions, loggings, hot news and information as well as radio equipment and accessories and any topics related to shortwave radio in general. Please keep in mind that loggings, QSL news, schedule changes should also be reported to the appropriate column editor of the Journal for publication. This forum is a supplement to, not a replacement of, The Journal. Subscribe by going to <http://groups.yahoo.com/group/NASWA/>. Any club members wishing to participate in the NASWA Yahoo Group, moderated by Dan Ferguson (k4voa@zerobeat.org), but not interested in registering direct with Yahoo should contact Dan direct by e-mail for further information. Dan can manually add you to the group.

## That Was The Fest That Was

It was great to meet up with approximately 115 fellow radio enthusiasts at the 27<sup>th</sup> (!) Winter SWL Festival that just wrapped up. It was great to meet up with old friends and make some new ones as well.

There were a couple highlights that made this Fest special; first was Mark Fahey's riveting two-part forum on North Korea's radio and TV broadcasting along with other aspects of propaganda dissemination and life inside this secretive country. The forum was entitled *North Korea: Behind The Curtain*, reflecting the fact that Mark gathered this information *while in the country*, surreptitiously recording audio and video and capturing a variety of still images. Mark's presentations were simultaneously riveting and horrifying with the juxtaposition of anti-American belligerence amidst typical "pop culture" memes one could see anywhere in Asia.

The second highlight of this year's Fest, for me, was our successful live one-hour broadcast from the Fest on **WRMI** on 7570 kHz. I can remember one previous instance of a live broadcast from the Fest, and that was back in the mid-1990s, when the media program *Spectrum* was on the air; in that instance, *Spectrum* originated at the Saturday night banquet and had three folks producing the program. I believe they used phone lines to get the program on air. However, this time around, yours truly acted as the broadcast engineer, as we set up a Shoutcast audio stream which WRMI then used to get us on their 100 kW transmitter. Considering that we sorted out how to get the program from Plymouth Meeting, PA to Okeechobee, FL exactly one week ahead of time, and it went off without a hitch, I am certainly relieved. I'm reasonably certain we'll try this again at a future Fest, but don't let that be your excuse to miss another one – and experience over two days what others only got to experience for one hour.

We've penciled in the dates of February 27-28, 2015 for next year's Winter SWL Fest, so go ahead and get that time reserved on your family calendar or work vacation calendar!

As part of that one hour broadcast, David Goren interviewed Jeff White to find out more about WRMI's investment in the Okeechobee facility and what that means for the future of shortwave broadcasting in North America. I know of at least one recording of the shortwave broadcast that you can hear online; visit the *SWLing Post* blog at <http://swling.com/blog/> and enter the term "shindig" into the search box; the first link will lead you to the audio.

We believe there will be another shortwave airing of the program at some point; I'll post an announcement in the NASWA electronic *FLASHSheet* when I know the date and frequency.

Keep in mind that you can hear several programs in English on WRMI that are hobby focused, including Adventist World Radio's *Wavescan*, WRMI's own *Viva Miami, World Of Radio*, and as mentioned last time, **Radio Prague** and **Radio Slovakia International**.

## Radio Ukraine International

While **RUI** is no longer on shortwave, RUI has maintained a daily English language webcast that is streamed live on its website. The webcast was missing early in the Ukraine political upheaval, but as of March 19<sup>th</sup> the stream was up and operational. English was on live at 2200 UTC when I checked. Other airtimes for English include 0000 and 0300 UTC.

Check out <http://www.nrcu.gov.ua/en/> and click on the tab labeled <RUI> to see RUI's live programming as well as an archive of programming that dates back more than 60 days if your listening scheduling doesn't line up with RUI's schedule.

Program features include the following:

**Ukraine Today** - a digest of the day's events.

**Ukrainian Diary** - key events of the week.

**Close Up** - analytical program about current events in the life of Ukraine.

**Roots** - a cultural program.

**Hello from Kyiv** - RUI's listener contact / music program.

**Outlook** - themed radio magazine about modern trends in public life in Ukraine.

**Music from Ukraine** - A Sunday concert with Ukraine's finest folk bands and popular artists.

**Reading Lounge** - About Ukrainian writers and poets.

**World.ua** - Ukrainian media - about events abroad and foreign media about Ukraine and events in the country.

**Highlights** - a program of Ukrainians, their achievements and lifestyle.

**Famous Ukrainians** - sketches of prominent sons and daughters of the Ukrainian people.

**Insight** - a program of spiritual and cultural aspects of life.

## **BBC World Service easier to hear on smartphones and tablets**

With multi-purpose devices such as smartphones and tablets becoming increasingly popular for portable Internet access, it's worth noting that the BBC World Service's *iPlayer Radio* website application now appears to work on Apple and Android devices, thus providing access to a greater variety and deeper archive of programming than is available through such multi-station apps as *TuneIn*.

The benefit of this approach is that programming is often available directly

from the BBC's on-demand links before it's available via podcast, and some World Service programming is not offered via podcast (though most is). Unfortunately the Kindle Fire uses an Amazon-curated version of the Android operating system as well as its own app store, and the website often points to the *iPlayer Radio* app for some programming...which isn't offered in the Amazon app store.

However, all is not lost on the Kindle Fire; live radio plays via the web version of the *iPlayer* using Amazon's "experimental streaming viewer" which can handle Flash streams; I was able to navigate to **The Newsroom** - which is not offered for podcast - via this manner.

This is admittedly a clunky approach to getting to BBC World Service content, but perhaps Amazon can be nudged to offer the BBC *iPlayer Radio* app in their own app store.

## **Deutsche Welle: Remember them?**

Used to be that **DW** was the epitome of an "Easy Listening" broadcaster in North America, effectively using relays and Germany-based transmitters to send a reliable signal into the region. DW has served as a continental Europe voice balancing the influence and perspective of the BBC World Service, with steady, well-crafted programming across a variety of subjects, anchored by a daily current affairs program with a European bent. Most recently that program was **Newslink**; before that, **European Journal**.

Nowadays the only daily English language service of any ilk - either via the Internet or via shortwave - targets Africa. **Newslink** has morphed into **AfricaLink**, with topics selected to appeal specifically to an African audience. **AfricaLink** is the first part of each weekday program, with a rotating set of features rounding out the second half-hour. Thankfully some of the African services do make it here to North America, though the times of day aren't optimal - 2100 UT and 0400 UT; nothing in the evening hours when I used to listen on shortwave.

Interestingly, you can get a “shortwave-like” experience by listening to DW’s live audio stream; the URL <http://www.dw.de/program/africalink/s-30300> leads you to a site where you can bring up a live audio stream. That way you don’t necessarily know what you’ll hear when you tune in.

In addition to *AfricaLink*, the radio program schedule includes *Concert Hour*, *Inside Europe*, *Living Planet*, *Pulse*, *Spectrum*, *Worldlink* (a weekend hour-long, expanded view of *AfricaLink*), and *World In Progress*.

With the loss of Radio Netherlands, Deutsche Welle offers perhaps the most robust program offerings of any continental Western Europe broadcaster when considering content with a pan-European focus.

The place to start is the DW website, <http://www.dw.de>.

## Radio Exterior de España improves program availability

REE was a relative latecomer to on-demand audio via the Internet, and its availability has been somewhat spotty, with delays and missing programs frequently the case on its website. I’m happy to report that a recent check of the REE website found all programs posted without delay – keeping in mind that the only new content is produced

on weekdays; the programs we hear on Saturday and Sunday evenings (Sunday & Monday UTC) are repeats of the features originally produced during the week.

REE’s English language broadcast is a bit hard to find on the Radio TV España website; click on <http://www.rtve.es> then click on <Radio>, then <Radio Exterior>, then look for the text *Lenguas Extranjeras* where you will see English listed.

## Voice Of America keeps English in its FY2015 budget

Just a quick note that the VOA has kept shortwave in its budget for fiscal year 2015, recognizing that shortwave remains the most effective means of reaching listeners in parts of Africa and Asia where other delivery platforms and local relays aren’t reliable. While I’m sure the VOA budget was developed after the recent request for public comments regarding shortwave, NASWA – as an organization – as well as other individuals and groups – advocated for the continued use of shortwave as an important medium that works when other media are blocked by unfriendly governments or during times of political upheaval...precisely the times when reliable access to information is important.

That’s all for this month – 73 DE Richard 

## NASWA Flashsheet

Are you getting the latest hot information about what is happening on the shortwave bands? If you have not signed up for the club’s electronic *Flashsheet* service, you are missing out on timely news and information about the DX scene that will enhance your shortwave listening pleasure. If you are a current member of the club and want to receive the electronic *Flashsheet* just drop **Rich D’Angelo** ([rdangelo3@aol.com](mailto:rdangelo3@aol.com)) a note with your e-mail address, location and membership expiration date from your mailing label. You can participate by sending your latest logs to the electronic *Flashsheet* edited by **Mark Taylor**, [markokpik@gmail.com](mailto:markokpik@gmail.com). The club’s electronic *Flashsheet* helps members stay on top of the action with breaking shortwave news and information. The electronic newsletter is an excellent supplement to the monthly *Journal* for the timely dissemination of DX loggings and breaking news.

## The BBG hears about the future of shortwave

In late February, the Broadcasting Board of Governors sought "feedback from external experts and stakeholders on their perspectives on the role of shortwave radio broadcasting as a BBG distribution platform. We are particularly interested to hear views that consider the evolving media consumption of target audiences, changing access to shortwave and other platforms, and the need to prioritize in an austere federal budget environment."

I broadcast this BBG announcement on VOA Radiogram, an experimental weekly program that transmits digital text and images on an analog shortwave broadcast transmitter in North Carolina.

Listeners responded. Mark in Virginia wrote: "Shortwave broadcasting operates 'off infrastructure,' thereby offering listeners anonymity against potential government tracking attempts and/or denial of service disruptions. In areas of the world where conflict displaces people away from reliable power sources and robust infrastructure, shortwave radio still has tremendous benefits in being able to reach those in dire circumstances...."

"Over the past year, I have been an active participant in the VOA Radiogram program and have come to appreciate the possibilities this technology could offer shortwave listeners around the world. Even during non-optimal propagation conditions, text and graphic images have been successfully transmitted to listeners via the shortwave transmitter system in Greenville, NC. VOA Radiogram experiments have even shown that text and images can be transmitted simultaneously with voice and music content. The technologies being explored in the VOA Radiogram program suggest that new possibilities exist for shortwave broadcasting.... 7

"Given today's budget constraints, I would suggest that the BBG not abandon its high-power shortwave broadcast capability altogether but instead establish a separate organization dedicated to 'repurposing' the technology to support the needs of multiple Government users. For instance, I would recommend exploring DHS/FEMA applications for nationwide emergency broadcasts to augment automotive radio and cell phone-based systems. Also, I would recommend exploring potential applications for military and aviation users as a means of augmenting their existing HF communications infrastructure. By sharing this high-power transmission capability, the existing transmitter infrastructure could more readily be viewed as a unique, shared national asset rather than a burden for a single government agency."

## New modulation type could bring savings

From John in Oregon: "The U.S. Military has ... been using for many years a completely AM backward-compatible modulation known as AME, Amplitude Modulation Equivalent, or Compatible Sideband (ITU designation R3E). AME can be received on regular shortwave receivers, as the received signal is effectively identical to AM. By using this modulation type the transmitted signals can be very close to 100% efficient with the amount of wasted RF power being nearly zero. By using AME with the same VOA 500,000 watt transmitter as the example above, nearly all 500,000 watts contain information thereby increasing the effective range of the signal. Alternatively the amplifier output power can be reduced 66% to 165,000 watts while maintaining the same level of received signal strength. This power reduction can help to reduce VOA's shortwave broadcasting budget without discontinuing or reducing broadcast services. ..."

"VOA shortwave can also be used to reliably transmit slow digital data as has been proven by the VOA Radiogram program. These digital data-streams are more resilient to shortwave interference and jamming than voice-audio and therefore can be transmitted with lower power than a voice transmission carrying the same information. If digital data-streams are combined with AME transmitters the power and therefore monthly cost saving benefits can combine to reduce broadcast costs even further. ... Unlike listening to voice transmissions, received digital data does not have to be consumed immediately but can instead be read at a more convenient time or shared with others."

## Dongles are the future

The blog of trade publication *Radio World* summarized arguments in favor of the VOA Radiogram concept submitted by Benn Kobb and Christopher Rumbaugh: "Radiogram is soundly premised on modern digital techniques and mitigates longstanding impediments to HF transmission. Users around the world have documented reception of 50 VOA Radiogram programs in more than a thousand YouTube videos. BBG must not allow its own pioneering developments to wither, but should advance them toward operational status.' ...

"Radiogram broadcasts Web content via error-detecting/correcting AM tone modulation, using standardized formats commonly used by ham radio. They say this approach is robust and resistant to interference. "The user's ordinary shortwave receiver, tuned to a Radiogram transmission, feeds its audio to a user device. These could include mobile phones, tablets, laptop and desktop computers and the new ARM-based miniature computers and embedded devices. The user device decodes the tones and displays text and imagery despite propagation impairments and intentional interference — and without Internet connection."

"They point out that no hardware connection is required; putting the radio near the

phone or computer is usually sufficient. 'By adding a simple audio cable between receiver and user device, however, reception can be silent and covert. No specialized hardware is needed, and the software platform for decoding is long in the public domain.'

"They have further ideas. Another approach would use 'dongle' technology that puts a software-defined radio inside a USB enclosure. "The operating system and decoding software could also be incorporated into the device, which could boot the computer, eliminating the need to install any PC software."

"The user need not be present to receive content, and essentially receives a web magazine 'updated at will and always ready for use' that can be redistributed.

"Naturally, the audio tone transmission can be recorded for later playback. Even when buried well under music or noise, the nearly inaudible recorded broadcast can nevertheless deliver 100% copy upon decode."

"Sent over regular broadcast transmitters (no modifications needed), this approach effectively extends the reach of the transmitter. In other words, the digital text mode will decode in locations where the audible speech over the same transmitter would be too low for aural intelligibility. The audio recorded or captured could be replayed over another transmitter to even further extend the reach of the broadcast."

"They conclude that BBG should capitalize on Radiogram as a 'circumvention tool, readily consumable by mobile devices,' and integrate Radiogram into its media strategy and networks. They want the board to reconfigure HF facilities with Radiogram in mind, and support development and distribution of open-source Radiogram decoding applications for mobile devices and platforms."

# Shortwave Center

John Figliozzi • 45 Algonquin Road • Clifton Park, NY 12065 • jfiglio1@nycap.rr.com

*[Editor's Note: Our space this month is taken up by what amounts to an important discussion—or rather several discussions—on the current state of U.S. shortwave and international broadcasting, especially that of its most recognizable entity: the **Voice of America**. The pieces that follow are presented in chronological order, including two authored by Dan Robinson, who retired in March after a stellar career spanning more than three decades as an international, Congressional and White House correspondent for the **VOA**. We were honored to have Dan—who also served as Log Reports editor in *The Journal* for many years--as our keynote speaker at the **27th NASWA Winter SWL Fest** last month. His remarks are reprinted here in full for those who were unable to attend. In the opinion of your editor, all the pieces speak for themselves and—in combination—paint a stunningly accurate picture of the state of things.]*

## PRESS RELEASE

# Shortwave Committee Request For Comment

February 28, 2014

Broadcasting Board of Governors

Shortwave radio has been a mainstay of U.S. international media since the 1940s. Over time, however, the number of countries in which shortwave is the medium of choice for audiences overseas has been shrinking. In many places, people are increasingly turning to other means to get news and information – including but not limited to FM radio, satellite television, web sites, social media, and their mobile phones.

The Broadcasting Board of Governors (BBG), the independent federal government agency that oversees U.S. civilian international media, has been adjusting to these changes over the years and now delivers news and information programs on a wider variety of platforms in more languages than any other media organization. To support its commitment of reaching audiences on their preferred media, the Board recently established a Special Committee on the Future of Shortwave Radio Broadcasting, which has been conducting a thorough review of the agency's use of shortwave radio as a distribution platform, the associated costs, and

the likely reliance on it by next-generation audiences.

This Committee is now seeking feedback from external experts and stakeholders on their perspectives on the role of shortwave radio broadcasting as a BBG distribution platform.

We are particularly interested to hear views that consider the evolving media consumption of target audiences, changing access to shortwave and other platforms, and the need to prioritize in an austere federal budget environment.

The BBG is committed to sustaining shortwave broadcasting to regions where a critical need for the platform remains.

The Shortwave Committee has held two meetings focused on the shortwave audience's listening experience, the BBG networks' success in reaching target audiences, the role of shortwave in the networks' engagement strategies in various markets, the cost of operating shortwave transmitting facilities, and the BBG's research into how shortwave is being used and its impact on audiences.

Your input will better inform the Committee's recommendations and could help shape its comprehensive report to the plenary Board.

Please contribute questions, comments or suggestions via e-mail by March 14, 2014. To facilitate the review process, please limit your submission to 1200 words or fewer. The comment period is now closed.

All comments may be reprinted as part of the Committee's proceedings and may be made public.

The news and information provided by our networks helps bring the light of truth to some of the darkest corners of the world. By supporting the free flow of news and information, including combating Internet censorship and providing news and information tailored for specific audiences, devel-

oping local media, and creating access to global media, we purposefully support the freedom to speak, the freedom to listen, and the freedom of expression.

If you are aware of anyone with special interest in this topic, I encourage you to share this request with them.

Thank you for your interest in taking part in this process to help the BBG become more efficient and effective in supporting U.S. national security and foreign policy.

Sincerely,

Matthew C. Armstrong

Chairman BBG Special Committee on the Future of Shortwave Broadcasting

## Comments Submitted by NASWA to the BBG Special Committee on the Future of Shortwave Broadcasting

March 7, 2014

On February 28, 2014 the Broadcasting Board of Governors ("BBG") posted to its website a request by Matthew C. Armstrong, Chairman, BBG Special Committee on the Future of Shortwave Broadcasting for comments about the future use for U.S. international media of shortwave radio. These comments submitted on behalf of the North American Shortwave Association ("NASWA") support the continued use of shortwave radio as part of a balanced approach of utilizing multiple platforms to reach audiences in times of need. When a crisis arises, no other media platform is better than shortwave radio to communicate and to reach affected areas, however, that requires an ongoing presence on the shortwave bands to make sure that our voices are heard when it counts the most.

As you noted, people are increasingly turning to other means to get news and information (FM radio, satellite television, web sites, social media, and their mobile phones) on a daily basis. This trend has been hap-

pening all over the globe as more and more electronic communications tools become available at a reasonable cost. However, it is important to maintain some sort of shortwave radio presence while adjusting to these changes. For the end user (the listener), the use of shortwave radio is inexpensive and effective. Because of this, there will always be a certain shortwave radio audience which will grow substantially during times of crisis as other platforms are crimped by local governments attempting to cut off the local population from open news, information, dialogue and balanced opinions. We believe there is a strong likelihood of some level of reliance on shortwave by the next-generation audiences as an alternative when the usual array of communications tools become ineffective.

NASWA supports the BBG's commitment to sustaining shortwave broadcasting to regions where a critical need for the platform remains (Africa quickly comes to mind as a primary need as well as certain parts of Asia). NASWA also feels that it is

important for the BBG to maintain a shortwave platform – at a reduced level – in other areas of the globe for times when an international crisis brews and the use of FM radio, satellite television, web pages, social media and mobile phones are not available because host countries can eliminate those platforms seriously curtailing those seeking an open media dialogue.

We agree that the news and information provided by BBGs networks/stations helps bring the light of truth to some of the darkest corners of the world. By supporting the free flow of news and information, including combatting Internet censorship and providing news and information tailored for specific audiences, developing local media, and creating access to global media, the BBG is actively supporting the freedom to speak, the freedom to listen, and the freedom of expression. However, these freedoms are vulnerable to interference by local oppressive governments which do not necessarily share the same views as we do in terms of freedom of information, news and ideas. An active shortwave radio voice helps facilitate the BBGs goals of supporting the free flow of news and information effectively combatting local government censorship.

Dependence on the Internet, mobile or other electronic means of communication may be premature at this stage. The Internet and mobile isn't even yet universally available in highly economically developed countries like the United States, let alone in less developed areas around the globe.

Therefore, a premature over reliance on, and over emphasis of, the Internet and mobile devices in an information dissemination strategy means that whole and important populations residing outside urban and developed areas around the globe will be inaccessible. Also, over reliance on the use of the Internet introduces the possibility of "cyber-warfare". Internet radio is susceptible to such aggressive, intentional disruptions, in addition to the more "traditional" censorship strategies of jamming, closing down transmitters, revoking local licenses, etc.

One does not have to look further than the current situation in Ukraine where we do not have a shortwave voice in the region making the ability of the BBG to communicate news, information and the United States views next to impossible within the problem area. An effective shortwave voice is required to be able to effectively communicate when it matters most. Eliminating a shortwave voice makes it almost impossible to restore that voice when it is needed because the modern technology fails to deliver during times of crisis. Curtailing the use of shortwave radio at this time would be a major detriment to the United States.

Respectfully submitted,

Richard A. D'Angelo, Executive Director

North American Shortwave Association  
("NASWA")

## **Keynote Remarks by Dan Robinson At The 27<sup>th</sup> NASWA Winter SWL Fest in Plymouth Meeting, Pennsylvania**

March 15, 2014

"For decades the main anchor of U.S. government-funded international broadcasting, VOA is now just one among a number of outlets under the Broadcasting Board of Governors (BBG).

"VOA and other journalists have over the years taken big risks to cover the news. Some have lost their lives or remain missing. You can see a display of some of these names if you visit 330 Independence Avenue.

"The news business has been transformed. Twitter, Tumblr, Pinterest, You Tube and

other channels allow us all to basically operate our own personal news agency (and tell everyone what we had for lunch).

"Associated Press or Reuters "news alerts" are now relayed instantaneously. The moment a President, or White House spokesman, or a foreign leader say something, the Internet is filled with Tweets and re-tweets, photos that are Instagramed...something someone says or sees amid a gun battle in Syria, or Libya, in whatever language, is all instantly seen.

"VOA and other government-funded broadcasters have been challenged to adapt to technological changes and the imperative of maintaining relevance amid shrinking budgets, and questions about usefulness and efficiency.

"The tensions involved in what John Chancellor, who headed VOA at one point in the mid-1960's, called "the crossroads of journalism and diplomacy" continue.

"I was an enthusiastic supporter of international broadcasting. But when necessary also a critic, trying to ensure we do the best job possible. Because for me, that kid from Levittown, Pennsylvania with his ears glued to the radio, the job we do and who we are doing it for, always mattered.

"In a letter to the bipartisan Broadcasting Board of Governors (BBG) I made some blunt criticisms about news coverage and management issues in a place many Americans, and still many people overseas, don't know still exists, or why.

"Little reason to wonder why, by the way. VOA lacks a 24 hour live global TV presence, like BBC or CNN. It's unlikely you will see it in your hotel room, and VOA simply does not have the resources to compete on such a scale.

"Despite recent modifications to a 1948 era law few Americans know exists (the Smith-Mundt Act) government-funded broadcasters still cannot direct their programming at audiences in the United States.

"Russia's military intervention in Crimea, and other major stories laid bare the damage

done over the past decade to VOA's news gathering capabilities, especially its central newsroom, from a string of poor management decisions, and deficiencies hobbling its ability to compete.

"All too frequently VOA's English website has been unable to quickly reflect breaking news about Ukraine and U.S. responses, including statements by President Barack Obama and members of Congress.

"BBC, al-Jazeera, and Russian government outlets routinely clean VOA's clock even on U.S. domestic news. Chris Christie's January news conference was live on the BBC, but not VOA.

"Indeed, alarms should go off when an American president grants more interviews to foreign broadcasters and social media channels than to something called Voice of America, and officials in such places as the Pentagon bluntly question VOA's reach and effectiveness.

"VOA White House correspondents used to travel with the president on every foreign trip and years ago on domestic trips as well, but not anymore. VOA veteran reporters shook their heads when managers excluded them from attending the 2012 U.S. political conventions.

"Because VOA and other U.S. government broadcasters operate under the radar, so to speak, of more intense public scrutiny or congressional attention, other problems continue year after year.

"These range from the aforementioned failings in breaking news coverage to a multi-million dollar digital production system widely acknowledged as a disaster, and a reputation for poor management, and a hostile working environment that has placed the BBG at or near the bottom of employee satisfaction surveys.

"Anyone visiting VOA's website will find some superb journalism. But many current and former employees wonder whether money, employee hours, and other resources devoted to TV products moves the meter in

measurable ways with verifiable impact of programming and enough “engagement” with foreign audiences.

“Another issue involves “mission”, now being defined ever more unambiguously by the bipartisan Board as a tool for U.S. policy and national security interests.

“VOA journalists are supposed to be shielded from policy-related interference. But some reporters were admonished last year by one official to ensure that reports support the “BBG mission” — differentiated from the VOA Charter which upholds news standards.

“In the Columbia Journalism Review last year, former VOA correspondent Gary Thomas wrote: ‘The core problem afflicting the BBG and its various entities is institutional schizophrenia. It is simultaneously a news organization trying to be a government agency, and a government agency trying to be a news outlet. . . If the mission of US broadcasting is to be “messaging” and policy advocacy, then stop hiding behind the label of journalism.’

“Things are at a crucial juncture. At a proposed FY 2015 level of \$721 million, taxpayers and Congress should ask: Does the United States still need government-funded broadcasting (here referring also to social media and other methods)?

“If the answer is yes, can a new international broadcasting CEO, as is planned [with the BBG moving into more of an advisory

role] do more to help VOA journalists and support staff undertake consistent, quality work across media platforms, absent action to significantly increase funding?

“The new BBG chairman, Jeffrey Shell, has carried out some key personnel changes and also identified improving worker morale as a priority.

“More needs to be done, including identifying bad managers in the International Broadcasting Bureau (under the BBG), and in VOA’s central newsroom, which many believe has been permanently damaged as some of its best talent fled.

“VOA and other U.S.-funded media organizations have many excellent people, and reporters who take big risks to cover the news. But the overall appearance is of something that still just isn’t working very well, perhaps unfixable in any short period of time.

“Decisions Congress makes will determine whether VOA and the numerous brands in the BBG alphabet soup trying to compete with CNN, al-Jazeera, China TV, and RT (Russia) for global audience share will survive the budget axe.

“These issues may be seen as inside the beltway, but taxpayers across the country deserve at least to be aware of them, and if they so choose, have a voice in what happens next.

## Transformation Is Upon Us: Handwriting Is On The Wall

Posted to BBG Watch Blog Page March 25, 2014

Dan Robinson

At VOA, with its devastated and still plummeting morale attributable to a string of poor decisions by a largely discredited IBB management structure, employees usually go from day to day hoping for some better news. They are usually disappointed.

Tuesday was such a day of disappointment as the “interim management team” appointed by the new BBG laid out initial information on impacts from FY 2015 budget-related proposals sent back to Capitol Hill.

Staff sources reporting from today’s “All Hands” meeting, and others being conducted in language services and the Voice of America (VOA) Central Newsroom, provided a summary:

- ¶ Closure of VOA's Jerusalem news bureau, and the US domestic bureau in Houston.
- ¶ Elimination of VOA Albanian, Bosnian, Macedonian and Serbian services for a projected \$2.25 million savings.
- ¶ Reductions in VOA's Latin American service at a projected savings of \$680 thousand
- ¶ A "realignment" of VOA English at a projected savings of \$550,000
- ¶ Some cuts in VOA's Indonesian, Georgian, Azerbaijani and Uzbek services
- ¶ Reduction in VOA Persian at a projected savings of \$2.3 million.

The Jerusalem closure could well be a trial balloon and stands a good chance of being reversed once news of it hits on Capitol Hill. It's likely that more than a few members of Congress would raise questions about the wisdom of shutting a bureau in such a strategically important place.

That is, those lawmakers who still care to any degree about the comedy show (funny if dysfunctions weren't so serious for staff) that continues just down the street at 330 Independence Avenue, and numerous questionable decisions made by the IBB bureaucracy.

As explained by the BBG-appointed triumvirate, and earlier by VOA Executive Editor Steve Redisch and VOA's Barbara Brady, the bureau closures are among proposals in which VOA would absorb approximately \$10 million in cuts.

Then there is the VOA newsroom. You remember — the place that Redisch and VOA Director David Ensor repeatedly extolled saying it would be the "core" of the grand scheme to bring together BBG resources to build a more efficient and aggressive news operation. . .

. . .but which actually suffers from a wide range of technical and human capital and management issues that were largely ignored as IBB managers left for home each day, leaving employees to suffer with Dalet (production software) and Pangea (content management) breakdowns, and arrogant managers.

Remember — the Newsroom ranks at the bottom of all divisions in VOA when it

comes to morale. That's a striking record for an Agency still struggling in the morale pit (remember, said a senior IBB official — repairing it will take 3-5 years!).

In 2014, the U.S. Senate rejected proposed cuts that would have eliminated many jobs in Central News. Under the proposals now sent to the Hill, the newsroom would absorb just over \$2 million of cuts. Nineteen positions, which have remained authorized but vacant, would be eliminated.

There is speculation among some staff members that the decisions to close Jerusalem and Houston could be related to the fact that veteran correspondents there could be close to retirement.

Redisch is reported to have said that VOA might co-locate in Jerusalem with MBN (Middle East Broadcasting Network). But — MBN faces its own budget difficulties, including potentially eliminating its own Jerusalem bureau. So — where does that leave things? Tune to this frequency (if VOA has any left) for further details.

As has occurred in other overseas locations, the focus continues to be on consolidation — combining what for decades were Voice of America bureaus with operations of other BBG entities (the popular new BBG-preferred word for these is "networks").

Remember, each network technically operates under its own journalistic code, though all were informed by, and conformed to one degree or another with, the VOA Charter. What everyone knows from the statutory and historical record is that missions and methods are not always the same.

At one time or another, every news organization has faced the difficult task of determining which foreign or domestic bureaus to close. Many factors come into play, when it comes to advantages and drawbacks, in terms of news strategy and impacts on human beings.

Are freelance stringers (and backups to stringers) available? What are the effects of losing on-the-ground presence — being seen not to have a full-time correspondent

in a particular location? What impact does a decision to close in Jerusalem have on regional coverage, in places like Syria and Iraq? (VOA would have to rely to a greater degree on its Cairo bureau or news reports sent from Europe.)

VOA managers have made some highly questionable bureau closure decisions over the decades that ended up leaving the organization in a difficult spot amid major breaking news.

At one point, consideration was given to shutting the East Africa bureau in Nairobi. Given events in South Sudan, Somalia and Central African Republic, Uganda and the threat from al Qaida-inspired groups, and the significance for U.S. policy, the IBB would have to have its head examined if it were to propose this today.

VOA's Islamabad bureau was slated for closure at one point, something that today would be inconceivable now given the situation in Pakistan and neighboring Afghanistan.

VOA's bureau in New Delhi, capital of the other major South Asia nuclear weapons power, will be closing, an already-announced budget-linked decision.

Where Jerusalem is concerned, a case could be made that stringers can meet VOA needs for coverage of news. But a whole range of positives, obvious and below the surface, simply go away when a news organization shuts down an official presence.

The decision to close VOA's Houston bureau (actually located in the home of the resident correspondent there) removes one key base VOA has had to cover American domestic news with its own correspondent, one of the few remaining veterans in the reporting corps.

Back to the big picture. Remember that the current IBB management structure was responsible for the now infamous "43 Newsrooms" approach in which language services received formal access to raw news agency content, though the historical record shows many services were unprepared to shoulder new burdens.

The current IBB group was also responsible for attempting to implement several newsroom reorganizations based on a shaky foundation by reappointing someone who was removed from the position more than a decade earlier by a former VOA director.

As has already been mentioned, VOA managers say the newsroom staffing cuts will eliminate only vacant positions that were on the books. That's fine as far as it goes. But remember — in meetings with newsroom staff the current VOA director repeatedly vowed "I will cut you", while largely blaming the White House and Congress for the situation.

As additional information becomes available, let's review for a moment the record of the current VOA-IBB management team. These are individuals who:

- ¶ Stood by for years as a series of Internet/VOA website and other reporting failures played out in front of the world, and VOA was repeatedly embarrassed by BBC, Russia's RT and other outlets (see Ukraine).
- ¶ Set out to destroy what was once a robust VOA English radio operation, and failed to appreciate the effects of correspondents being thrown into labor-intensive multi-day "TV" projects that often sacrificed breaking news coverage.
- ¶ Ridiculed staff members, including veteran reporters who repeatedly raised concerns about these and other problems.
- ¶ Failed to adequately support some bureaus, domestic and foreign, with equipment they needed to do their jobs.
- ¶ Were apparently clueless until receiving vociferous complaints, about wastes of time involving mandatory Defense Department administrative training imposed on VOA's best foreign correspondents (VOA's Moscow correspondent recently resigned, reportedly in part over this issue).
- ¶ Tolerated and it would seem condoned destructive personnel practices carried out against staff that included efforts, using the official evaluation system, to denigrate performance and personal commitment as a pressure tactic.
- ¶ Amid all of this, merrily traveled across the country on government-funded trips

to wax enthusiastically to various groups about what a good “bang for the buck” American taxpayers were getting.

U.S. international broadcasting bureaucracy (see RFE/RL, RFA, etc) that still have more “throw weight” on Capitol Hill.

So, again as additional information emerges on the budget decisions announced Tuesday, keep all of this in mind, as well as many other aspects of the picture at 330 Independence Avenue.

What should not be forgotten is the extent to which the record of poor management of taxpayer-funded resources — financial, physical and human — has undermined the confidence that Congress and the American public have in these efforts.

It’s been observed several times in recent months that VOA may be getting a lot smaller, very quickly.

It’s going to take a lot of work by the new Board to persuade members of Congress that the dysfunctions in the agency can be transformed into something that can be described in any appropriate way as “nimble and streamlined”.

That may well be the picture for VOA, though the historical record shows that it may not be the case for other parts of the

## PRESS RELEASE

# VOA Seeks to Boost Services to Asia, Africa in 2015

March 27, 2014

Internet censorship.

by VOA News

*[Editor’s Note: To this reader’s eyes, there’s something almost Orwellian in the disconnect between this release’s headline and the content of the release that follows it.]*

The BBG is also planning to set up a new satellite television channel and expand FM radio in the Sahel region of north-central Africa. A new Lingala language service is planned for the Democratic Republic of Congo.

The Broadcasting Board of Governors, the U.S. government entity that oversees the Voice of America, has released details of a 2015 budget request that will cut Balkan language services but add spending aimed at Asia and Africa.

VOA’s English Learning programs would also be expanded.

The BBG is asking Congress for \$721 million, a reduction from a \$731 million budget in the current fiscal year. Agency officials say their goal is to reach a new generation of audiences through media that global listeners and viewers increasingly use.

But the 2015 budget would eliminate the VOA language services for Albania, Bosnia-Herzegovina, Macedonia, and Serbia. The Azerbaijani, Georgian, Persian, and Uzbek services would see reductions and broadcasting to Cuba would also see a very significant cut.

The proposal also calls for the closure of VOA news bureaus in Jerusalem and Houston.

The 2015 budget request includes youth-oriented video and digital initiatives for Cambodia, Vietnam, and Burma - also known as Myanmar.

Dave Allison, acting president of the union representing many VOA employees, said with the cuts in services VOA is “retreating” from its historic mission that began in 1942. He said Balkan broadcasters had tears in their eyes when they were told their shows face elimination.

In China, the BBG plans to increase the use of social media and programs to fight

**CANADA** The former *Radio Canada International* transmitter masts at Sackville, New Brunswick are being demolished. Some of the towers have been at the site since the late 1930s but recent budget cuts and a shift toward the internet have made the towers and shortwave transmission technology unsustainable. (CTV Atlantic 27 February via Mike Terry-UK/British DX Club) RCI towers near Sackville coming down: The first of 13 towers at the former Radio Canada International site outside Sackville will be coming down this week. After budget cuts in 2012, CBC announced that the shortwave service would end after 67 years of broadcasting around the world. At that time, CBC said it was trying to sell the towers and land together because of the high cost to dismantle the facility. Larry Wartman, senior manager of transmission operations for Western and Atlantic Canada for CBC, says CBC has been unsuccessful in

finding a buyer. So far over 1000 wooden poles and all of the antennas that used to stretch between the steel towers have been taken down. "Barring any unforeseen difficulty I would say in the next three weeks they'll probably have all 13 of them removed." Wortman says the property will be offered for sale again once the towers are gone. He says there are a couple of parties interested in the 222 acre property. "It's part of history it's part of the culture of the community so it's tough to take something down that served such a purpose for the country you know during the Second World War... there's just not many of them around the world anymore." (CBC News via John Chapman NASWA YG)

**CHINA Voice of Jinling** has new schedule on 5860: 1230-1505. (WRTHmonitor Update)

**CLANDESTINE Syrian Opposition Radio Station Broadcasts from Istanbul: ISTANBUL** — Over a million Syrian refugees have fled to Turkey. Most have been housed in camps along the border, but growing numbers are now fleeing to cities like Istanbul, which is estimated to have as many as 200,000 refugees. Others are looking for work or trying to get to Europe. But for others, Istanbul has become a center of resistance to the government of Syrian President Bashar al-Assad, with Turkish-based opposition radio stations being set up to broadcast into Syria. **Radio Al Kul** broadcasts into Syria from atop a building in a commercial district of Istanbul. According to Obi Sukkar, Al Kul's founder, the station's strictly uncensored and independent news reaches an audience of around 100,000 via a network of secret transmitters. As Sukkar shows me around, he explains he fled Syria after his wife - a doctor - began fearing for her life when the regime found out she was treating opposition forces. Leaving with just a suitcase, they ended up in Istanbul, courtesy of the Turkish government's open door policy for Syrian refugees. "In Turkey, the situation is really good because we have what we need to be treated as human beings, more than people feeling sympathy. We don't need sympathy. We just need to live our lives normally," he said. Sukkar's radio station is backed by wealthy Syrians, making his transition in Istanbul relatively easy. But for others, Istanbul has not been a seamless transition. At a mosque in Istanbul's Fatih district, local residents give out food and aid to Syrian refugees. Many of them, like Ayse and her two children, are struggling to survive. "We fled Syria, after my brother was kidnapped by Islamic jihadists," she said. "The whole

region has become too unsafe." She says she did not want to go to the refugee camps. "Many say it's like prison - you cannot work, you cannot go out," she said. She thought she might find work in Istanbul and maybe even get to Europe. "But everything is so expensive," she said. In local parks and shopping districts, Syrians begging for money is an increasingly common sight. Bulent Yildirim, head of the Humanitarian Relief Foundation, an Islamic charity supported by Turkey's ruling AK Party, is critical of some of the refugees. "If you see refugees in the street, you can call us and we will take them to the camps of the government," he said. "But they don't want to go. For some of them, begging on the streets has become a habit." Observers warn the growing number of Syrian refugees in Turkey, especially on the streets of the country's main cities, is threatening to become a political embarrassment for the government. The AK Party strongly back the Syrian opposition and predicted the Syrian regime would quickly collapse. Kadri Gursel, diplomatic columnist for the Turkish newspaper Milliyet and al-Monitor website, says the growing number of refugees underlines a failed policy. "The AKP foreign policy is a wreck, because Syria is soaking up financial resources," he said. "We have a huge refugee problem right now. There are nearly one million Syrians on our soil and we don't know what we will do with them. Because this crisis can last years and years, maybe a decade more - we don't know." While Radio Al Kul primarily broadcasts to Syria, its founder says he is looking into broadcasting inside Turkey because of the growing number of Syrian refugees now living in the country. (VOA via Radio World Newsbytes)

New target broadcast to Rwanda called **Radio Impala** heard from sign-on at 1700 on 15 February with excellent signal here on 17540. WRTH update says this is on-air daily at 1700-1800 via Madagascar. Opening announcements and IDs in Kinyarwanda (presumed), English and French. Says it aims at promoting democracy in Rwanda and the Great Lakes region. Web site radioimpala.com says it broadcasts from London. Online audio feed not working when checked on. Appears to replace another Rwandan target station Radio Mara which had been on at the same time and frequency since November. (Dave Kenny-UK/British DX Club)

The following two transmissions of **NEXUS-IBA IRRS Shortwave** via Radiocom already are jammed with white noise like broadband DRM:

**Radio Xoriyo**

1500-1530 on 15515 TIG Somali Fri

**Radio Warra Wangeelaa-ti**

1500-1530 on 15515 TIG Oromo Sat  
(DX Re Mix News, Bulgaria)

**Voice of Khmer M'Chas Srok:**

1130-1200 on 17860 secret/hidden site on March 14  
(DX Re Mix News, Bulgaria)

The new station, Voice of Khmer M'Chas Srok, has only been on the air for a few days, as perhaps noted by other ARDXC members. I monitored its broadcast last night for the full 30 min transmis-

sion, and it puts a very solid signal into Mount Evelyn. Here is the entry from my logbook. 17860, TAJIKISTAN (perhaps....) Voice of Khmer M'Chas Srok. Site is unconfirmed at this time. Hummy transmitter on at 1125 then s/on 1130 in Cambodian with ID and opening anncts. Then a short burst of instrumental music before long talks with occasional mentions of Kampuchea, Khmer and Phnom Penh. Later, another short burst of music before ID, website and email addresses, then music to s/off at 1200. Big signal throughout with some slight txer hum from the beginning of the broadcast until 1150 when the hum just disappeared! I guess they must have found the fault!! The sound of the txer does smack somewhat of Dushanbe. Mar 22. (Rob Wagner-Australia VK3BVW/ARDXC)

15515, *R Warra Wangeelaa-ti*, via NEXUS-IBA IRRS SW via Radiocom, via Tiganesti, Romania, Sa 1500-1530 in Oromo to East Africa is jammed with white noise like broadband DRM. (Ivanov-Bulgaria/DX Window)

New UNIdentified broadcast of *NEXUS-IBA IRRS Shortwave*:

1530-1600 on 15515 TIG English Sat from March 8 (DX Re Mix News, Bulgaria)

17500, *Radio Ndeke Luka* heard yesterday 17 Feb at 1700-1729 on 17500 (via Dhabbaya UAE) with weak but clear signal with mainly French programming to Central African Republic (CAR) SINPO 25432. Station website doesn't seem to mention this new shortwave relay, only local 6030 frequency (is this still on air?). <http://www.radiondekeluka.org/index.php>. Also there's a recent article about the station (in English) "Crisis in CAR: Radio Ndeke Luka - A Place to Be Heard" at: <http://www.hirondelle.org/home-page/8608/?lang=en>. (Alan Pennington-UK, BrDXC-UK Feb 18/TopNews)

**EQUATORIAL GUINEA** 5005, *R. TV de Guineea Ecuatorial* - Bata. Weak signal at 2035 featuring fabulous jivey Afro dance music and occasional Spanish anncts. Best heard in USB due to TVI, and finally faded by 2055. Nice to hear this one again, not too regular here! Mar 18. (Rob Wagner-Australia/ARDXC)

**FRANCE** Frequency change of *Radio TV Algerienne*:

0600-0605 NF 7295 ISS French news, ex 5865

0605-0658 NF 7295 ISS Arabic Holy Quran, ex 5865 (DX Re Mix News, Bulgaria)

**GABON Africa No 1** has not been heard on its shortwave frequency 9580 since early 2013, Tony Rogers recently emailed the station to ask about the shortwave transmissions and received this reply on 9 February from Dominique Guihot "Unfortunately, it doesn't work anymore. Technical problems. But the team is working on that." (Tony Rogers-UK/British DX Club)

**GERMANY Trans World Radio Europe Summer A14 schedule** - Nauen:

0700-0720 on 6105 English Daily  
0830-0900 on 7215 Hungarian Daily  
1400-1428 on 7320 Russian Tue-Sun  
1400-1428 on 7320 Belorussian Mon  
(Bernhard Schraut-Austria, TWR Europe)

*Radio Öömrang* from Amrum Island, German North Frisian Islands was heard on 15215 from 1559-1658 on February 21 as scheduled. Watch for them again on February 20, 2015 (Friday) possibly even the same time and frequency. Verificatins through Media Broadcast (QSL-Shortwave@media-broadcast.com) have been received with Issoudun noted as the transmission site. (Rich D'Angelo-PA)

3995, just heard an announcement on *HCJB Weenermoor* that the German Service for listeners in South America will stop its Nauen relay (9835 @ 2300-2330 UT) at the end of June. Costs are too high and reception quality is too low. They are now looking into the possibility of broadcasting the service directly from Quito again on 6050 and ask listeners in South America to send in reception reports for that channel. Some of their listeners in South America are living in remote areas and shortwave is the only way for HCJB to reach them. Maybe Jeff White can offer another solution. (Harald Kuhl-Germany/DXplorer)

**GREECE ATHENS** - The new Greek public radio-television NERIT and 12 regional radio stations will begin broadcasts within the next two months. The Deputy Minister revealed that past experience will play an important role in the recruitment of journalists and that about 20% of employees were recruited in positions irrespective of their qualifications. Journalists who will join NERIT will have to have at least five year's experience. (ANSAmEd))

**INDIA** 4990, *AIR Itanagar* one beautiful QSL today: Itanagar 4990 after one week: (via itanagar@air.org.in): *Sir, The reception of our SW Transmitter on Date: 11. February 2014, Time: 0549 - IST = 0019 - UTC time, is checked in consultation with my colleague of Programme wing of this station through audio file sent by you and it is to be confirmed that you have correctly monitored AIR, Itanagar. Thank you for monitoring and sending the reception report. Rajesh Chandra, Deputy Director (Engineering), All India Radio, Itanagar. Many reports since the last years, but now I have it. And the next reports are Golmud and Gangtok, than I have all Himalayan transmitters complete: Azad Kashmir, Srinagar, Leh, Shimla, Nepal, Bhutan, Lhasa, Qinghai, Imphal, Itanagar...* (Christoph Ratzer-Austria/SWBulletin)

9526v=9525.9 (DX Re Mix News, Bulgaria)

**IRAN** *Saut Falestin* "Voice of Islamic Palestinian Revolution"

Arabic @ 0320-0420 on 9610kam 11875sir  
(IRIB via wwdxc BC-DX TopNews March 15)

**IRAQ** *Radio Free Iraq*, BBG Mourn Dr. Al-Shammari: Members of the Broadcasting Board of Governors and employees of RFE/RL's Radio Free Iraq are mourning the death of their Baghdad bureau chief. Dr. Mohammed Bdaiwi Owaid Al-Shammari was shot and killed over the weekend (March 22/23) at a checkpoint near his Baghdad office in an area near the Presidential Palace, according to the BBG. The shooter has been identified as a member of Iraq's presidential guard, reports BBG, which also says Iraqi Prime Minister Nuri al-Maliki met briefly with members of Al-Shammari's family afterwards and promised them quick action. Dr. Al-Shammari had been working for RFI since 2006 and became its Baghdad bureau chief in 2012. A

journalist for two decades, he was on the editorial boards of several Iraqi media institutions and was an associate professor at Al-Mustansiriya University in Baghdad. He is the third RFI journalist to be shot and killed since the service began broadcasting in 1998. The 46-year-old is survived by his wife and three children. BBG Chairman Jeff Shell described Dr. Al-Shammari as "a committed journalist working to ensure that the people of Iraq received reliable, unbiased news. In so doing, he faced many risks, making this final and apparently random act of violence all the more difficult to bear." The BBG called on the government of Iraq "to spare no effort to bring his killer to justice." The BBG is the independent federal agency overseeing U.S. civilian international media, including Voice of America, RFE/RL, Radio and Television Marti, Radio Free Asia, and the Middle East Broadcasting Networks. (Radio World NewsBytes)

**IRELAND** Both these facts indicate that the transmitter really is on Tenerife as also indicated by a QSL received by Andreas Schmid. (Anker-Petersen-Denmark/DXplorer) That's not true Anker. Best signal both the evening and the morning is coming from England / Ireland. Wolfy Bueschel heard today from some remote Perseus SDR and the best signal was in the area of Blackpool and Manchester. On my 300 degrees Beverage (> UK) the signal is very strong, from the direction of 240 degrees, (> Tenerife) only a very weak signal. And the sent QSL images show only the FM transmitter on Tenerife - there's not one picture of the shortwave transmitter on Tenerife. Why? This show reminds me of the broadcasting from „San Marino“ in the 80s. (Christoph Ratzer-Austria/DXplorer) Checking now via various remote receivers it looks like it has the strongest signal in Western Britain, so it must be coming from Ireland as Wolfy already said. (Mauno Ritola-Finland/DXplorer) So, maybe (during weekends) the program is produced in UK / Ireland and then web streamed from there to Tenerife for rebroadcasting on FM. This would explain why the shortwave program is around 40 seconds "faster" than the web streamed program. I discussed this last night with Wolfy. (Harald Kuhl-Germany/DXplorer) The response from Andy is also sent via a web access from Ireland. (Christoph Ratzer-Austria/DXplorer) Thanks, Christoph, this perfectly fits into the picture. There are btw several "stations" on the Canary Islands FM dial just rebroadcasting programs coming from other countries; like Radio Maria and several stations for "tourists" (expats). I suspect most of them are still doing this without

having an official broadcasting licence. They are all piratas. Harald Kuhl-Germany/DXplorer) No, these two tourist stations on Tenerife seems to be official. Their websites show under Contact: Address Horizon FM, Apartado De Correos 150, 38626 Valle San Lorenzo, Tenerife and You can send a text to the studio on (+34 616 834 758) any time or telephone (+34) 922 860 406 during office hours, or reach us by email - Office & Administration: info@atlantis.fm; Advertising Sales: sales@atlantis.fm; Atlantis.fm Studio: studio@atlantis.fm. Atlantis Media Europe, Avenida Maritima 13, Las Palmeras 10BV. 38683 Puerto de Santiago, Tenerife. Both FM-stations broadcast 24 hours all days. As a British broadcaster, I would certainly prefer to live in sunny and warmer Tenerife, than in cold and very rainy England. (Anker Petersen-Denmark/DXplorer)

**Horizon FM 6245:** "We had some antenna problems that resulted in a blown output device on the transmitter. Back on now on 6245 (our planned new SW home if it proves OK over the next few days). Power still at 75 watts but we plan an increase for next weekend if all goes to plan." (Mike Barraclough-UK/British DX Club via DXplorer) Canary Is. /Ireland, apparently ex-5780 (see below), decent on 6245, 2245 Mar 9, though declined a bit in last 15 min. //< <http://www.horizon.fm/listen.html>>. (Jerry Berg-MA/DXplorer)

Same-day reply from **Horizon FM**, "Ireland/Canaries," is below, and QSL is attached. I sent my rpt with MP3 file to studio@horizon.fm. I asked for info on the site, and you can see the reply. In my rpt I mentioned the fact that I could hear them on the internet as well as over the air, but I did not say anything about a delay. In fact there was a delay. I didn't measure it exactly, but it seemed like the internet stream was about 15 seconds behind the shortwave signal, and I didn't notice anything different during the hourly news (although I was comparing intermittently). From: Andy <andy@horizon.fm>, To: Jerry Berg, Subject: Re: Horizon FM heard on shortwave in Massachusetts, Hi Jerry, Many thanks for taking the time to email us. We moved to 6245 last weekend and were also testing a new antenna. Power is indeed still at 75w however we plan an increase this weekend from our site at La Corona, North Tenerife. We have had suggestions that the signal is not originating from Tenerife however as has been pointed out on some forums, the transmission has no delay. This has been noted during our 'Sky News' hourly broadcasts. An internet relay would have to include a small time delay

I enclose our latest QSL. I wish you all the best and hope you manage to hear us again. Kind Regards, Andy. (Jerry Berg-MA/DXplorer) Canaries? Ireland? 6255, Horizon FM, as reported yesterday by John Hoad-UK in BDXC-UK NL, ex-6245 & 5780, decent at 2300 Mar 15; website streaming <<http://www.horizon.fm/listen.html>> is about 17 secs. behind signal. (Jerry Berg-MA/DXplorer) Frequency change for weekly weekend broadcasts of Horizon FM and Atlantis FM from 2200 Friday to 1000 Monday: new 6255, ex 6245/5780. (DX Re Mix News, Bulgaria) I am finally hearing Horizon FM right now, been pretty good since tune in at 0230, and running nicely in parallel with their website audio, tho a slight lag. (Ralph Perry-IL) Nice to see this making it to the Midwest. (RAD)

Re 6245.003 maritime radio band pirate intruder, at 0945 March 10 do you know the un-licensed Pirate anorak stn relay location in Ireland? Re poor 75 watt power, even now on deep morning/noon time seen/heard only in SDR remote net at few posts in England like Manchester-Liverpool, and Ipswich posts, latter S=6 signal at G3XVL post. 500-700 kilometers distance from Ireland. Very weak in Belgium, some 1000 kilometers away. Nothing heard in Germany, Switzerland, Italy, and Greece. Probably virtual produced and operated by 'Andy' like Andrew Yeates and Jelena Sevcenko in East Grinstead, West Sussex U.K., used two PC pre-recording files and fed also to Irish pirate relay station outlet on weekends. I'll never understand why this small tiny shortwave outlet is a most prestigious project in the ANORAK scene, so accordingly expect the effort will make everything make it appear the program is "legal" and "factual", so look at the F\_B page. OFCOM England U.K. would do much sharper action in a non-license crimes matter. Even 6245 frequency selection is MIDST ON MARITIME RADIO BAND. But the Irish authorities are determined as much negligent on such crime? May you have contact to Baldock (IMS) OFCOM monitoring finding station staff and may ask them on azimuth measurement towards Ireland? [http://www.itu.int/online/mms/mars/monitoring/l8\\_station.sh?lang=en&stationid=127&admid=84](http://www.itu.int/online/mms/mars/monitoring/l8_station.sh?lang=en&stationid=127&admid=84) read 7th line, like Direction-finding measurements 1.5 MHz to 10 MHz, 24hrs service. Better than + 0.5 degrees dependent on the signal to noise ratio of the wanted signal. (Wolfgang Büschel-Germany, wwdxc BC-DX TopNews March 10) Seems to be active only weekends/irregularly and originating not from the Canary Islands, obviously from Ireland (Walter Eibl-Germany/WWDXC)

**KUWAIT** High-frequency antenna and dish manufacturer ASC Signal Corp., has announced a deal with Kuwait's Al-Rashed Holdings for equipment for Kuwait's Ministry of Information. The equipment listed includes 5.6-meter Ku and DBS band satellite dishes, a Next Generation Controller management unit and supporting equipment for the MoI's facility in Kuwait City. The design of the system is multi-frequency. The equipment is to be used for distribution of programming for the Middle East and African markets through Nilesat and Arabsat satellites. (Radio World)

Frequency change at IBB *Deewa Radio*:

**RUSSIA** *Tatarstan Wave* is no longer on shortwave; in January Tatarstan was using just one frequency [12095 via Krasnodar at 0810-0900] but the station has now closed. (Allen Dean-UK/British DX Club)

25900, *Radio MTUCI, R "Zeleny Glaz"* ("Green Eye") started to send QSL-cards by mail. Received acknowledgment from the station in 2013: Mar 31, 2013 on 25900 and Dec 31, 2013 on 1584. On the card lists all these radio stations, including location, transmitter power and antenna type used for broadcasts. Also interesting is placed for printing

QSL. Mailing address: 115326, Moscow, Pyatnitskaya str., 25, b.1, RBT Ltd. E-mail: arb@radiostation.ru. WEB: www.radiostation.ru, www.cqf.su. Plant manager Sergey Komarov said: "The station is in the air: On Fridays from 1200 to 1500 UTC. Frequency 25900 kHz AM - until the end of March. Then there will be a change of frequency - we are running out temporary permit for her." (Klepov in RUS-DX no. 756, Feb 23/DX Window)

**Voice of Russia** to close down shortwave broadcasts by 1st April, 2014: After several online stories & predictions about closure of shortwave services by Voice of Russia received this official response today.... "Dear Mr. Gupta, This is just a short message to thank you for your letter and let you know that the Voice of Russia is closing shortwave broadcasts as of April 1st. Our programs will be available online at <http://voiceofrussia.com/play>. We hope you will stay with the Voice of Russia and hope to hear from you soon again. Sincerely yours, Elena Osipova, Letters Department, World Service, Voice of Russia (via Alokesh Gupta-IND, DX soAsia March 20)

**RWANDA** New website, URL and parent organization for *Radio Rwanda*. Rwanda Broadcasting Agency is the new name for that country's state radio and television organisation, and they have a slick new website and URL at <http://www.rba.co.rw>. The site is presented in English, French and Kinyarwanda and offers live streams and on-demand archive files of their Rwanda TV and Radio Rwanda services, in addition to live streaming of Magic FM. There are also frequency details of five RBA community radio stations. (David Kernick-UK, intervalsignals.net Feb 18/TopNews)

**SEYCHELLES** The fate of the site and facilities is yet to be decided since the land was leased from the Seychelles government but definitely the towers will be decommissioned. Some of the test equipment and auxiliaries will be deployed to other BBC sites. The transmitters unfortunately will most likely be scrapped. Undoubtedly what was priceless in terms of the devices for the transmitters a few months ago will now be a worthless heap of metal. Regards, Jose. (Jose Tambara, Senior Engineer, Babcock International Group PLC)

**SOLOMON ISLANDS SIBC** correct address is P. O. Box 654, Honiara. The schedule is 1900-1200 on 1035, 5020 & 9545. (WRTHmonitor Update)

**SOUTH AFRICA** Frequency change of *Deutsche Welle* in Swahili from March 7:

0300-0400 NF 5925 MEY, ex 9800 DHA //5905  
KIG, 7425 KIG  
(DX Re Mix News, Bulgaria)

**SRI LANKA** Frequency change of *PCJ Radio International* from March 16:

1802-1847 Daily 9500  
1847-1902 Fri/Sat 9500  
1745-2045 Daily 3200  
(TWR schedule via Rumens Pankov/British DX Club)

**UAE** Frequency change of *BBC* in Hindi:

0100-0130 NF 5980 DHA, ex 6165\*//7325, 11995,  
15510; \* to avoid Thazin Radio Reg.Sce in  
Karen.  
(DX Re Mix News, Bulgaria)

**UKRAINE** 11980.089 the dubious rather amateur radio station of the transmitter engineering in 25mb listed 0800-1000 as *UKR Radio Dniprovskya Hvylya Ukr Zaporizhia* is now on air, heard at 0825 on 1st March, with S=7 here in western Europe, in eastern Europe and Russia a bit stronger like S=8 on air. But sounds more like a preserve program of religiosity, ideology, literature, tradition, - But I don't understand anything anyway ... now at 0826 a piece UKR Pop mx. Krym Tatar TV livestream on <http://atr.ua/live>. (Wolfgang Bueschel-Germany/PlayDX) 11980, "Dniprovskaya volna" from Zaporozhye, 0800 (start of transmission) to 0930 (end of transmission). SINPO: 35333. Ukrainian radio broadcast transmission. (Dmitry Kutuzov-Russia / "dneb-radio-dx")

**UNITED KINGDOM** The *BBC World Service* will further reduce its shortwave transmissions next

year as part of a £15m savings drive. The money will be used to invest in new TV and digital services, part of a programme called "Invest to Innovate". The World Service will also start carrying advertising. (Guardian.com 19 February via Mike Terry-UK/British DX Club) I understand that BBCWS DRM transmissions to Europe may cease from the start of the A14 schedule period at the end of March, but that there are unlikely to be any other substantial cuts to shortwave transmissions until next year. (Dave Kenny-UK/British DX Club)

**URUGUAY** *Radiodifusión Nacional del Uruguay* has reactivated its transmitter on 6125. (WRTH-monitor Update)

**USA** Agency tries to improve its low employee morale by Joe Davidson. When it comes to employee morale in federal agencies, the Broadcasting Board of Governors has long lived among the dregs. It's still there, but the BBG is trying hard to move to a better neighborhood. This isn't a success story, at least not yet. This is a story about a federal agency that recognizes it can't continue to live near or at the bottom of employee morale surveys. Success might be coming, but a lot of work remains. The BBG, which oversees the government's international broadcasting operations, is doing that work. Since 2007, the BBG has been at or near the bottom in the "Government" ratings, issued by the Partnership for Public Service and using FEVS data. Nonetheless, the agency's workforce "has an enormous belief in the mission," said André Mendes, BBG director of global operations. Management can use that to leverage morale. Mendes thinks having a CEO will be "a tremendous improvement." The board of director's setup was a big problem. In January 2013, Hillary Rodham Clinton, then secretary of state, said "our Broadcasting Board of Governors is practically defunct in terms of its capacity to be able to tell a message around the world." The week before that, a report by the State Department inspector general called the board "dysfunctional." (Washington Post via Radio World Newsbytes)

Broadcasting Board of Governors is asking for \$721.26 million for its fiscal 2015 budget, which would be a slight reduction from its enacted budget of \$733.48 million in 2014. The budget includes what BBG describes as "significant reductions in staff positions that are predominantly not tied to content production, as well as costs involving less-effective signal transmissions." The BBG is an independent federal entity responsible for U.S.

nonmilitary international broadcasting programs like the Voice of America, Radio Free Europe/Radio Liberty, Radio Free Asia, Radio and TV Marti, and the Middle East Broadcasting Networks — Radio Sawa and Alhurra Television. The FY 2015 request provides \$4.8 million in broadcasting capital improvements funding to maintain the BBG's transmission network, including the security requirements of facilities, maintenance, repairs and improvements to existing systems. Overall, the BBG's budget request includes what the broadcaster considers to be substantial reductions and also investments that rebalance the agency's resources away from legacy markets in Europe and toward current foreign policy priorities such as Africa, Asia and the Middle East. The BBG is rejiggering its platform resources as well, continuing to move funding from legacy platforms such as shortwave and medium-wave in order to devote more money to platforms such as FM, television, streaming and social media in markets where the audience prefers the latter. The BBG intends to reduce language service duplication in some markets. (Radio World)

Two new registered frequencies of **Radio Miami International**:

0000-2400 on 5030 English from March 9  
0000-2400 on 5950 English from March 9  
(DX Re Mix News, Bulgaria) Registered but will not necessarily be used for the full 24 hours. (Dave Kenny-UK/British DX Club)

Additional transmissions via **WRMI** Okeechobee, Florida from March 4:

2300-1100 on 5850 English TruNews + others  
2300-1100 on 7455 English TruNews + others  
(DX Re Mix News, Bulgaria)

RFE/RL Appoints Interim Managers: The board for Radio Free Europe/Radio Liberty appointed vice president of finance, chief financial officer and treasurer John Giambalvo and editor-in-chief for programming Nenad Pejic as interim managers of the broadcaster. The change became effective on March 2, following the departure of Kevin Klose as president and chief executive, and remains in effect until a new president is appointed. The RFE/RL board consists of all of the members of the Broadcasting Board of Governors. We recently reported on the departure of Klose. Giambalvo joined RFE/RL as deputy CFO in 2009, after five

years on the BBG staff as policy and program coordinator. Pejic, who was named editor-in-chief in December 2013, joined RFE/RL in 1993 as the first director of RFE/RL's Balkan Service. Prior to that, Pejic held various positions with Sarajevo Television including head of the news department, Belgrade correspondent and program director. The board has a search underway for a new RFE/RL president. (Radio World NewsBytes)

**KVOH** Voice of Hope:

0200-0400 on 9975 English Sun/Mon, ex 0300-0500  
1300-1900 on 17775 Spanish Mon-Fri, ex 1400-2000  
(DX Re Mix News, Bulgaria)

The new **Radio Africa Network** broadcasting from Okeechobee, Florida is proving to be an exceptional Outreach for our ministries, and the broadcasts continue to be a blessing to all people that are listening to the station...Praise God! Since the first day we began broadcasting from the Florida site, December 1, 2013, we continue to monitor the effectiveness of the station, as well as fine tune the transmission in order to ensure that we receive optimum coverage and maximize the transmission quality of the signal. During our three months of broadcasting, we have received numerous reception reports, and we look forward to receiving more reports from listeners around the world! If you have sent us a reception report in the past couple of months, we thank you! It is amazing to receive your letters and reports, and they inspire us and the ministries to continue with the broadcast service. We are excited to announce that effective March 30th, 2014 The Radio Africa Network is adjusting its frequencies in order to provide optimum coverage to its targeted areas. The new schedule will be as follows: 17790 on 0800-2100 and 15190 at 2100-0800. Your reception reports are very important to us, and we look forward to receiving each and every one of them. We are excited to announce that we have 3 different QSL cards. Additionally, we continue to track where in the world the Radio Africa Network is being heard and you can see the results at <http://www.radiopanam.com/QSLmap.html>. Again, we thank you for tuning into the Radio Africa Network, and please continue monitoring the station and providing us with feedback and reception reports. Have a wonderful day! (Jeff Bernald & the Pan American Broadcasting Team [INFO@panambc.com](mailto:INFO@panambc.com))

**UZBEKISTAN CVC** *Voice Asia* will probably leave shortwave from March 30. Nothing registered in HFCC database. (DX Re Mix News, Bulgaria)

CVC *Voice Asia* will probably leave shortwave from March 30. I know that many stations are missing in the public version of HFCC. But CVC has never been lacking so far. (Ivo Ivanov-BUL, via wwdxc BC-DX TopNews March 20) Ivo, the public file misses ALWAYS some few hundreds Asian and Australian entries like Radio Australia and others. Unfortunately WRN broking bookings contain only entries at ISS and SOF-Spaceline guys.

13630 0400 1100 Hindi UZB CVC  
(wwdxc, BC-DX TopNews March 20)

**VANUATU R.** *Vanuatu* operates currently on shortwave at very low power only on 3945 kHz between 1830-1230. Transmitters repair is planned for March. (WRTHmonitor Update)

**YEMEN** 6135, *Yemen Radio* - Sana'a. Can't be heard here till the Korean jammer switches off, which on Mar 18 was at 1858. This revealed a fair signal from the English service of Sana'a with several news items, then ID and address before s/off at 1900. (Rob Wagner-Australia/ARDXC)

**ASSOCIATION OF ADVANCED RADIO LISTENERS** is offering a free copy of their hourly newsletter, DX This Hour, for only 25 cents per issue - or per hour - payable using only PayPal. Some selected items from DX This Hour have been used in this month's column with Papal permission. Contact editor Glenn Williams (glennismorethanokay@yahoo.com) for complete information and detailed payment instructions plus a lecture on how to report discreetly. (Glenn Williams-Undisclosed Location)

**CUSIB URGES BBG TO KEEP RADIO AS PART OF MULTIMEDIA STRATEGY:** The independent Committee for U.S. International Broadcasting (CUSIB) sent a letter to the Broadcasting Board of Governors (BBG) urging the bipartisan federal board to keep radio as part of a multimedia outreach strategy that would serve all foreign audi-

ences — billions of poor people around the world and especially those persecuted by repressive regimes or suffering other forms of political, economic or social oppression. The CUSIB letter was addressed to the Broadcasting Board of Governors' Shortwave Committee, chaired by BBG Governor Matt Armstrong, but it also deals with larger management of resources and programming issues at the BBG, the International Broadcasting Bureau (IBB), and BBG's media entities. "Radio can be the lifeline for poor people in many places in the world where they don't have access to television, Internet access or electricity. Radio is cheap, and unlike Internet users, radio listeners cannot be tracked and monitored." The letter also said BBG should resist "suggestions or requests to cut or eliminate funding from Voice of America and Radio Free Asia's shortwave radio broadcast services to China and Tibet." CUSIB is concerned by the 37% growth of IBB positions in the last seven years while numerous news programs and programming positions at Voice of America (VOA) and grantees were being cut. CUSIB also sees the push for centralization as leading to possible further increases in the IBB non-programming budget, which at 34% in FY2014 already consumes the largest part BBG's Congressional budget allotment. "Radio can be the lifeline for poor people in many places in the world where they don't have access to television, Internet access or electricity. Radio is cheap, and unlike Internet users, radio listeners cannot be tracked and monitored." The letter also said BBG should resist "suggestions or requests to cut or eliminate funding from Voice of America and Radio Free Asia's shortwave radio broadcast services to China and Tibet." (Radio World NewsBytes)

**WRTHMONITOR** contains news items for the National Radio section of WRTH and other reference items. The updates are posted up to August each year. They consist of selected items supplied to us by our contributors, some other items of interest, and corrections to the previous edition of WRTH. Select items used in this LN.

Schedules, news and other information about shortwave broadcasting activity can be sent to Richard A D'Angelo, 2216 Burkey Drive, Wyomissing, PA 19610 or via e-mail to rdangelo3@aol.com (please indicate in the subject that your contribution is for Listeners Notebook). Thanks! 73, Rich

Your reception reports about several transmissions of different Customers during 2003 and 2004

Dear Mr. Barto,

At first, we would like to thank you very much for your kind letters which included the very detailed reception reports about the following customers:

- Bible Voice Broadcasting (3 reception reports)
- The Overcomer (2 reception reports)
- Swiss Radio International (1 reception report)
- Voice of Russia (1 reception report)
- Radio Taiwan International (1 reception report)
- Voice of Croatia (1 reception report)
- Radio Miami International (1 reception report)
- Free People's Mission (1 reception report)
- Family Radio Inc. (2 reception reports)
- International Broadcasting Bureau (2 reception reports)

We confirm your reception reports and sent them to our customers, too, if possible. Please find attached the last edition of the actual summer schedule A05 which gives to you an overview about all the programs which we are broadcasting at present.

We have 2 NA pirate stations to report but we can do those next issue...best of QSLing...Sam.

## DEADLINE FOR CONTRIBUTIONS IS THE 10th OF THE MONTH

The following members sent in contributions:

Rich BARTON, El Mirage, AZ

Bob BROSELL, WI

John CHAPMAN

John COOPER, Lebanon, PA

Rich D'ANGELO, Wyomissing, PA

John & Sandra DAVIS, Columbus, OH

Jim EVANS, Germantown, TN

Elliot FEINBERG, Brooklyn, NY

John FIGLIOZZI, Sarasota, FL

Steven HANDLER, Buffalo Grove, IL

Glenn HAUSER, Enid, OK

Steve LARE, Holland, MI

William MCGUIRE, Cheverly, MD

Richard O. MICHAEL, Hartsville, OH

Kevin MURRAY, Jamestown, RI

Ralph PERRY, Wheaton, IL

Pamela PRODAN, Wilton, ME

Alan ROE, Teddington, UK

Mark TAYLOR, Madison, WI

Robert WILKNER, Cedar Key, FL

HQ-200, HQ-120X, SP-600, R8, PL-660, random w  
NRD-545, Eton E1, Sony ICF SW 77

WR-G33DDC Excalibur Pro, RF Space SDR-IQ

RX340, Alpha Delta DX Sloper

R-390 & 391As, Mackay 5050A, WJ HF-1000A

RX340, R75, E1, ICF-SW7600G, G6, 90' lw, 100m loop

Sangean AT5-909, Tecsun PL-660, indoor whip

HF150

Icom R-75, Tecsun PL-660, 33' indoor wire dipole

FRG-7, DX-398/ATS-909, YB400, ICF SW-07

Drake R7, R8, R8A & R8B, 70' & 200' wires

DX-380

Grundig G3 with whip antenna

AOR 7030, R-8, Carolina Beam antenna

R8B, NRD-545, E1, 355' bi-dir LW

YachtBoy 400PE

Winradio G31 Excalibur, 17m long wire

Perseus, Winradio g313e, E1, Sat 800, 40m dipole

NRD-545, 535D, R8. IC746Pro, E1, Sat 800, Flex EWE

The A-14 Broadcasting Season has started. It provides an opportunity for you to try to log and perhaps QSL stations or countries which have eluded your grasp. I wish everyone Good DX, 73 -Steve Handler

## Tropical Band Loggings

2000-5900 kHz

Scott Barbour • P. O. Box 893 • Intervale, NH 03845 • srbjrswl@yahoo.com

- 2325 AUSTRALIA *VL8T* Tennant Creek 1130-1140 Sig f/up w/ M & W ancr in EE banter; 3/11. (Wilkner-FL)
- 2485 AUSTRALIA *VL8K* Katherine 1200-1220 F/in w/ M ancr; nothing on 2325; 2/14. (Wilkner-FL)  
1120 Threshold sig; improved by 1135 w/ M & W ancrrs talk; 1137 great jazz blues fusion mx at good strength; f/out 1150; 3/10. (Wilkner-FL)
- 2850 NORTH KOREA *KCBS* Pyongyang 1125-1136 W ancr talk; fair; 2/5. (Wilkner-FL)
- 3195 USA *WWRB* Manchester 0426 World of Radio 1708 monitoring: confirmed w/ previous preacher stop at 0426:10, then some hum & dead air; no ancrment until 0427:05 WoR starts; 2/14. (Hauser-OK)
- 3240 SWAZILAND *TWR* Manzini 0339 Hymn; announcer in listed N'debele; ID: 0340 off; 2/10. (Taylor-WI)
- 3310 BOLIVIA *R. Mosoj Chaski* Cochabamba 0030-0036 Noted w/ weak sig; same time previous days; 2/14. (Wilkner-FL) 0000-0020 Vclist in Quecha?; good; 3/7. Also: 1010-1030 Noted w/ vclist; 3/8. (Wilkner-FL)
- 3320 NORTH KOREA *Pyongyang BS* Pyongyang 1157 (T); Tuned w/ ECSS to center a het heard on this freq; //6400; 2/20. (Figliozi-FL)

- 3345 **SOUTH AFRICA Channel Africa** Meyerton 0337 (P); EE discussion re markets; article on immunization in southern Africa to stop common communicable diseases among children by Nigerian specialist; fair; 2/10. (Taylor-WI)
- 3364.85 **BRAZIL R. Cultura** Araraquara 0110-0200 Noted here in PP; 2/14. (Wilkner-FL) 0000-0057 Tenor vcl in PP; 0005 new mx; good; 3/7 & 8. (Wilkner-FL)
- 3375.1 **BRAZIL R. Municipal** São Gabriel da Cacheira 1020-1040 M anc in PP w/ mx; 3/10. (Wilkner-FL)
- 3480 **SOUTH KOREA V. of the People** Kyonggi-do 1159 (T); W vcls 1159; poor/fluttery sig; no apparent sign of noise jamming; actually N. Korea using powerful txmitter & domestic stn to jam?; 2/20. (Figliozzi-FL)
- 3925 **JAPAN R. Nikkei 1** Tokyo-Nagara 1203-1223 M anc in JJ; poor-fair; ham QRM; 2/8 & 20. (Figliozzi-FL)
- 4055 **GUATEMALA R. Verdad** Chiquimula 1208 SS; M anc w/ talk; ment. Puerto Rico several times; good; 2/20. (Figliozzi-FL) 0100 M anc in SS; ID; 3/8. (Wilkner-FL) 1236 Now that I'm awake this early, find R. Verdad still audible w/ hymnic harmony but about to f/out; our sunrise today is 1249; Chiquimula's was 1209, so getting out a semihour past LSR on this band is doing well; 3/10. (Hauser-OK)
- 4500 **CHINA Xinjiang PBS** Urumqi 0100 Poor sig in (P) Mongolian; weakest of the bunch; 50 kW; ND; 2/14. (Hauser-OK)
- 4699.9 **BOLIVIA R. San Miguel** Riberalta 2335-2345 M anc español; seems off 2300-0030 on some scans; weak; 2/6. (Wilkner-FL)
- 4716.65 **BOLIVIA R. Yura Yura** 0000-0025 Mx; fair; 2/15. (Wilkner-FL) 0020-0030 Weak sig in SS; 3/16. (Wilkner-FL) 4717 0058 R. Yura no doubt; on characteristic off-freq; vp-poor but enough for some mx to be heard; 2/14. (Hauser-OK)
- 4750 **BANGLADESH Bangladesh Betar** Shavar 1150-1245 SC mx; M & W anc at 1210; f/out; 2/5. (Wilkner-FL) 1306 Talks in listed Bengali; fair; 2/14. (Brossell-WI) 1215 W w/ SC vocals; poor; 2/20. (Figliozzi-FL)
- 4750 **INDONESIA-SULAWESI RRI Makassar** 1246 (P); Fair sig rivalled only by 4940 China; with vcl mx & CCI; on the FRG-7 I can't decide whether the stronger one is on lo side, as RRI Makassar normally is vs. Bangladesh; mx seems more S Asian than SE Asian to me; 1254 W ancment is too brief & weak for me to pin it as Indonesian; however, Aoki shows the Bangladesh domestic svc is in EE at 1235-1255 & this was mostly mx; I gather that the two CC stns listed on 4750 are not much of a factor lately, maybe one or both not even on?; mx continues past 1300; 3/14. (Hauser-OK)
- 4765 **CUBA R. Progreso** 0410 Talk in SS; good; still no QSL after 23 weeks & multiple e-mails; 2/28. (Brossell-WI) 0047 R. Progreso is on already w/ mx; 3/14. (Hauser-OK)
- 4775 **BRAZIL R. Congonhas** Congonhas 1102 PP; Series of short musical themes w/ few words between; "Rádio (not clear if "Sora" or "Difusora") Congonhas"; into mellow Brazilian mx; f/out almost completely by 1115; poor; 3/15. (Taylor-WI)
- 4775 **SWAZILAND TWR** Manzini 0344 M & W anc in listed Lomwe; TWR theme; 0357 off; fair; 2/19. (Taylor-WI) 0415 Talks & hymns in GG; fair; 2/28. (Brossell-WI)
- 4780 **DJBOUTI RTD** Atta 0337 M anc in listed Afar; good; 3/3. (Brossell-WI)
- 4789.9 **PERU R. Visión** Chiclayo 0050-0100 (T); Weak distorted sig operating w/ hum on sig; 3/8. (Wilkner-FL)
- 4810 **PERU R. Logos** Chazuta 1055-1100 M vclist in SS; v. strong sig; 3/10. (Wilkner-FL)
- 4815 **BRAZIL R. Difusora** Londrina 0050 (P); PP preacher vs some CODAR; PL-880 in USB mode, narrow BW, gets rid of the big ute on 4812; I still have no luck w/ its opposite neighbor, 4810 R. Logos, Perú; 3/15. (Hauser-OK)
- 4815 **EQUADOR Radio El Buen Pastor** Saraguro 2329-2342 (T); W anc w/ SS talk w/ some pleasant vcls; phone call w/ another W; weak w/ CODAR; no ID heard; poor; 3/1. (Murray-RI)
- 4824.49 **PERU LV de la Selva** Iquitos 1041 Instrumental mx noted to 1110 f/out; 3/10. (Wilkner-FL)
- 4834.57 **UNIDENTIFIED** 2350-2355 Español during band scan; 2/2. (Wilkner-FL)
- 4835 **AUSTRALIA VLBA** Alice Springs 1300 Nx bulletin; poor in noise; 3/4. (Brossell-WI)
- 4835 **PERU Ondas del Sureste** Quillabamba 0023 M anc en español; signal noted to 0050; 0000-0010 noted in español during band scan on & previous band scans same time; 2/14 & 15. (Wilkner-FL) 2330-2350 Noted here en español; weak sig; fading at times; 3/6. (Wilkner-FL)
- 4850 **CHINA Xinjiang PBS** Urumqi 0100 Second weakest in talk & splash from 4840 WWCR; this one is PBS Xinjiang in Kazakh, 100 kW ND from Urumqi; 2/14. (Hauser-OK)
- 4875 **BRAZIL R. Difusora Roraima** Buena Vista 0843 (P); Brazilian pop mx segued; fair; 2/13. (Taylor-WI) 0012-0015 Lively mx in PP; v. strong sig; 2/15. (Wilkner-FL) 0340 Contemporary Braz mx; poor; 2/14. (Taylor-WI) 0340 Songs & ancments in PP; fair; 3/3. (Brossell-WI)
- 4885 **BRAZIL R. Clube do Para** Belem 0643 Mx in PP; fair & better than usual, no doubt from the 24h stn, R. Clube do Pará, Belém, & not Acreana; 2/23. (Hauser-OK)

- 4915 **BRAZIL R. Difusora de Macapa** Macapa 0030 ID & talks in PP; fair; 2/25. (Brossell-WI) 0005 Talk in PP; fair; re-check of this at 0330 had Macapa at an excellent (almost lcl) sig lvl; 3/11. (Brossell-WI)
- 4920 **INDIA AIR Kolkata** 1220 Noted here w/ poor sig; //4800; 2/20. (Figliozzi-FL)
- 4930 **BOTSWANA VOA** Moeping Hill 0330 World nx; fair; 3/12. (Brossell-WI)
- 4939.9 **UNIDENTIFIED** 2330-2340 Weak SS; (P) Perú-Radio San Antonio de Atalaya Ucayali ?; 3/11. (Wilkner-FL)
- 4940 **CHINA V. of the Strait** Fuzhou 1305-1312 Talk in CC; poor-fair; 2/20 & 3/4. (Brossell-WI) 1231 Lively prg w/ incidental mx; M & W ancrs in CC; fair; 2/20. (Figliozzi-FL)
- 4980 **CHINA Xinjiang PBS** Urumqi 0100 5+1 timesig about one second late; fair, but rough distorted modulation; in (P) Uighur; 100 kW, 230 degrees; 2/16. (Hauser-OK)
- 4985 **BRASIL R. Brasil Central** Goiania 0010-0100 Mx w/ no RTTY for once; vcls; 0025 musica romantica, possible cover for English song; 0100 chorale mx; no ID heard; 2/15. (Wilkner-FL) 0101 Finds few sigs from S. America, & the only readable Portuguese here, i.e. R. Brasil Central, w/ the usual heavy RTTY taking Saturday night off; nothing audible on //11815; not propagating on off?; lots of flutter on all Brazilian sigs including RNA on 6180; 2/16. (Hauser-OK) 0035 Talks in PP; fair; 2/25. (Brossell-WI)
- 4985.5 **PERU R. Voz Cristiana** Huancayo 1103-1110 (T); M en español w/ sig f/out; 3/10. Also: noted f/out at 1125 on 3/11. (Wilkner-FL)
- 5010 **CUBA RHC** Havana 0629 Weak mx matching 5040 RHC, so the leapfrog mixing product over 5025 Rebelde at same site is in play; can also hear a vp sig on 5055, leapfrog across the other way; 2/19. (Hauser-OK) 0549 Rebelde is off already before 0600; 3/15. (Hauser-OK)
- 5010 **MADAGASCAR RTV Malagasy** Antananarivo 0423 M ancr in (P) Malagasy; fair; 2/26. (Brossell-WI)[watch out for that RHC leapfrog, see above-ed.] 0242 (P) M ancr; indigenous mx bridge to W ancr at length; fair; no indication of Cuban intermod; 3/13. (Taylor-WI)
- 5025 **CUBA R. Rebelde** Havana 0633 R. Rebelde is off again; 2/13. (Hauser-OK) 1022-1030 W ancr in SS; then M w/ nx; musical interludes; good; 2/27. (Prodan-ME) 0614 R. Rebelde is on, but distorted w/ modulation at peaks; 3/9. (Hauser-OK) 1207 SS prg in progress; poor; 3/11. (Handler-IL)
- 5040 **CUBA RHC** Havana 0552 EE svc w/ mx; //6000, 6060, 6100 & 6165, but 5040 goes to dead air by 0600 & off by 0602, while the 4 x 6 MHz overkills resume another hour of EE w/ IS; 3/10. (Hauser-OK)
- 5060 **CHINA Xinjiang PBS** Urumqi 0100 Fair in CC tho distorted, but less so than 4980 Uighur; as usual; the best strength of the bunch; 2/14. (Hauser-OK)
- 5085 **USA WTWW** Lebanon 0029 World of Radio 1708 monitoring: confirmed on WTWW-2; 2/16. (Hauser-OK) 0632 Bro. Stair via WTWW-2 is distorted & splattering considerably up & down, worse during mx; 2/28. (Hauser-OK)
- 5110 **USA WBCQ** Monticello 0403 CUSB; World of Radio 1707 monitoring: confirmed on Area 51 via WBCQ, starting at 0403.5, after Jean Shepherd ran a bit over; 2/16. (Hauser-OK) 0005 "Cold as Ice" by Foreigner; 0008 more rock mx; fair; 2/16. (Cooper-PA) 0103 "Allan Weiner Worldwide" remarking that he will be at some fest May 2-3; //9330 & 7490 but the three are not synched: 7490 about a semiminute ahead of 5110; 3/15. (Hauser-OK)
- 5460 **PERU R. Bolivar** Bolivar 0020-0039 Possible reactivation; first time noted this season; mx in deep fades; confirmed as Radio Bolivar by Pedro F. Arrunátegui, Lima-Peru; trx; 2/14. (Wilkner-FL)
- 5580.2 **BOLIVIA R. San José** San José de Chiquitos 2350-0010 Noted here in SS w/ deep fades; 3/11. (Wilkner-FL)
- 5830 **USA WTWW** Lebanon 0401 WTWW-1 is on w/ big sig to bring us successfully WoR 1712; 3/16. (Hauser-OK)
- 5860 **CHINA V. of Jinling** Nanjing 1308-1312 M & W ancrs in CC; v. weak sig w/ flutter; 3/12. (Evans-TN)
- 5865 **FRANCE RTV Algérienne** Issoudun \*0359-0440 Mx opening followed by M ancr in AA; mx & a male w/ a recitation; ID at 0430 followed by the nx; mx prg began at 0435; fair; 1/18. (D'Angelo-PA)
- 5875 **THAILAND R. Thailand** Udon Thani 1117 (P); M ancr in listed Khmer w/ theme type mx; poor; 3/15. (Taylor-WI)
- 5875 **UNITED KINGDOM BBC** Woofferton 0320-0359\* M & W ancrs in AA w/ news features prg; several nice IDs & jingle at closedown at 0358; p-f; 3/7. (D'Angelo-PA)
- 5885 **VATICAN CITY Afia Darfur** St. Maria de Galeria 0304 Off-AA talk w/ very heavy splash from 5890-WWCR; Aoki shows it's Afia Darfur/Hello Darfur in Sudanese dialect, 0300-0330, 250 kW, 146 degrees from Vatican; 3/1. (Hauser-OK)
- 5900 **RUSSIA V. of Russia** Irkutsk 1320 Talks in listed CC; fair; 2/20. (Brossell-WI) 1313-1315 W ancr in CC; weak sig w/ flutter; just above the noise; 3/12. (Evans-TN)

- 17540 **CLANDESTINE (Rwanda) Radio Impala** (presumed), 1741-1752\* Feb 14, apparently this replaced Radio Mara although could not confirm ID. Local music followed by a man talking in presumed local language. Fair to good signal. (D'Angelo-PA)

- 17540 **CLANDESTINE (Rwanda) Radio Impala** Talata Volonondry, 1730-1755\* Mar 8, program of local musical selections with periodic IDs in three languages (Kinyarwanda, English and a local language). Program closed at 1755 after song. Still none of the usual talk you would expect from an opposition radio station. Fair. (D'Angelo-PA)
- 17540 **MADAGASCAR Radio Mara** clandestine, 17:24 to 17:33 and 17:45 to 17:46 with an ID at 17:46, SINFO=4,5,4,4,4, I heard R&R music before lunch and then an English ID afterward.. 2/19. (Davis, OH)
- 17550 **KUWAIT R Kuwait** 2340. Interesting mix of Middle Eastern music and M and W cohorts. Off abruptly at the ToH, as per sked .VG. (IN spite of my usual equipment list, this was heard very good on Grundig portable with Wilson rooftop CB antenna). 3 / 6 (Barton-AZ)
- 17705 **USA WHRI** 1558 S9 EW (Michael-OH)
- 17775 **USA KVOH** 1558 S4 SP. (Michael-OH)
- 17790 **USA R. Africa Network** via WRMI 1859 S5 EE (Michael-OH)
- 17840 **IRAN VOIRI** Zahedan, 0539-0545. Talk in Arabic by a man. Short musical bridges. Mention of Iran by a woman at 0544 followed by more talk. Poor to moderate signal strength with fading. 3/9/2014 (Evans - TN)
- 21740 **AUSTRALIA R. Australia** 2059 S4 EE (Michael-OH)
- 21740 **AUSTRALIA Radio Australia** 2210-2215 GMT English language program with Good signal on 03/14/14 (Handler-IL)
- 25900 **RUSSIA Radio MTUCI** Moscow, 1310-1405+ Mar 7, thanks to a tip from Harold Kuhl in Germany noted with woman announcer in Russian hosting a music program with long talks. At around 1330 after a quick station ID, a man began hosting playing Iron maiden music. Fair signal with periodic deep fades. (D'Angelo-PA) 

## Contribute!

Send your loggings and QSL information off to our Distributing Editor, **Steve Handler** (Address: Steve Handler, 113 McHenry Rd #178, Buffalo Grove IL 60089-1796). He will forward them to the appropriate editor. Remember, Steve also distributes QSL report information and totals for the **Scoreboard** column. He can also be reached through the Internet at: [handlersmail-naswa@yahoo.com](mailto:handlersmail-naswa@yahoo.com).

### NASWA Yahoo Group

Join moderator **Dan Ferguson**, the club's Yahoo Group, and other club members to discuss reception of shortwave radio broadcasts, program content, propagation, reception conditions, loggings, hot news and information as well as radio equipment and accessories and any topics related to shortwave radio in general. Please keep in mind that loggings, QSL news, schedule changes should also be reported to the appropriate column editor of the Journal for publication. This forum is a supplement to, not a replacement of, The Journal. Subscribe by going to <http://groups.yahoo.com/group/NASWA/>. Any club members wishing to participate in the NASWA Yahoo Group, moderated by Dan Ferguson ([k4voa@zerobeat.org](mailto:k4voa@zerobeat.org)), but not interested in registering direct with Yahoo should contact Dan direct by e-mail for further information. Dan can manually add you to the group. 

### NASWA Facebook Page

Join moderator **Richard Murphy** <[richard.murphy@swri.org](mailto:richard.murphy@swri.org)> at the club's Facebook page which provides members with another way to keep in touch. While the existence of the group is visible to all Facebook users, the online postings are available only to group members and group members must be NASWA members. Comments and suggestions from the membership are welcome. To locate the NASWA Facebook page, simply enter "North American Shortwave Association" into the search box on the top toolbar. If you are into social media, give it a try. 

# On the Shortwaves

[www.ontheshortwaves.com](http://www.ontheshortwaves.com) • Devoted to the history of shortwave broadcasting and the shortwave broadcast DXing hobby

---

< [www.ontheshortwaves.com](http://www.ontheshortwaves.com) > Update, February 23, 2014 -- Under "CPRV," in "The CPRV Gallery," we have posted a compilation of New Zealand medium wave QSLs (including the 1YA and 2ZP QSLs that had been posted previously). The date range is from 1929-1950, plus one from 1991. There are some real oldies here.

< [www.ontheshortwaves.com](http://www.ontheshortwaves.com) > Update, March 2, 2014 -- As shortwave stations developed foreign audiences, some offered language courses providing some basic knowledge of the language of the country where the station was located. Among these stations was "Zeesen," the Deutschen Kurzwellensender (German Shortwave Station). In connection with its German-language course the station offered a booklet, "Kleines Deutsches Rundfunk--ABC." Under "DX History/Stations" we have posted a version published in 1938. Subtitled "A Guide to the German Language for English-speaking Listeners of the German Short Wave Station," its 24 nicely-illustrated lessons are built around radio-related topics: announcements, greetings to listeners, music, talks, drama, news, etc. The course ends with a contest. The booklet's Introduction contains some background on the course. -- Also this time, under "Specialized Resources/Wavescan," there are two new "Wavescan" entries: "Focus on Asia Philippines-6: Navy Wireless Station at Cavite" (N260, February 16, 2014), and a continuation of Adrian Peterson's history of WYFR: "Tribute to Shortwave WYFR-8: The Final Years With Walter Lemmon" (N261, February 23, 2014).

< [www.ontheshortwaves.com](http://www.ontheshortwaves.com) > Update, March 9, 2014 -- Previously we had posted a 1956 copy of the *Universalite*, bulletin of the Universal Radio DX Club. Now we have gone back another decade and posted two earlier issues, one from June 1, 1945 and another from November 1, 1946. These are under "DX History/Clubs & Publications." These bulletins belonged to the late Kermit Geary, and thanks go to Wayne Heinen of the National Radio Club, who provided them to John Herkimer. Many of the top DXers of the day belonged to the URDXC. -- And under "Specialized Resources," Adrian Peterson returns to the Philippines with a new "Wavescan" entry: "Focus on Asia Philippines-7: Tunnel Radio on Corregidor" (N262, March 2, 2014).

< [www.ontheshortwaves.com](http://www.ontheshortwaves.com) > Update, March 16, 2014 -- In 1924, Irving Vermilya of Mattapoisett, Massachusetts operated his broadcast band station, WBBG, on 1250 kc., 240 meters. In those days people often held multiple licenses in different categories, and that was the case with Irving. His call letters as a "special land station"--reserved for experimental operations--were 1XAL (no relation to the later Boston SWBC station W1XAL), and he was authorized to operate on 200 meters and 1277-1304 meters (1500 kc. and 230-235 kc.). Irving used 1XAL to conduct long distance tests, and he made a series of broadcasts in which he hoped to reach Manchester, England. Whether he accomplished this is unknown, but he definitely was heard closer to home. Under "DX History/General Radio History" we have posted a group of 13 postcard reports that Irving received for a 1XAL test on Saturday night-Sunday morning, May 10-11, 1924. Most were from nearby places--Massachusetts, Connecticut, Rhode Island and Maine--but a few were from farther afield: Norwich, New York and New York City, Philadelphia and Tamaqua, Pennsylvania, and distant Valparaiso, Indiana. Judging from these cards it looks like Irving used broadcast programming for these tests. Most of the cards are in the nature of applause cards rather than classic reception reports; in only two did the writer request a confirmation. -- Also this time, under "Specialized Resources/Wavescan," we have posted two new articles by Adrian Peterson: "Radio Broadcasting in Albania" (N263, March 9, 2014), and "Canadian Radio Panorama: The Intervening Years" (N263, March 9, 2014). Thanks for keeping these coming, Adrian.

< [www.ontheshortwaves.com](http://www.ontheshortwaves.com) > Update, March 23, 2014 -- The Voice of the United Nations Command was an American psychological warfare operation, inaugurated in 1950 with headquarters in Tokyo. Over the years it used both mediumwave and shortwave transmitters at various places in Japan and Korea, and Okinawa. From 1967 to 1971 it broadcast from Okinawa over 20 kw. transmitters on 9840 and 13830 kc. The transmitters were at Deragawa, while studios and Okinawa HQ were at Machinato. VUNC was DXer friendly, and in "The CPRV Gallery" under "Shortwave Broadcast/Asia" we have posted the station's QSL together with a copy of a VUNC-Okinawa newsletter from 1967 which contains some interesting details about the station. -- And under "Specialized Resources/Wavescan" we have posted three new entries: "BBC Indian Ocean Relay Stations: Five In a Row!", "Focus on Asia: On the Air Shortwave from India's First Capital City--The Calcutta Story," and "What is a Kilohertz?" (all N264, March 16, 2014).
