

"THE SWBC JOURNAL" OFFICIAL PUBLICATION OF THE

NORTH AMERICAN SHORTWAVE ASSOCIATION

AUGUST 1971

VOL. X NO. 8

NASWA HEADQUARTERS

ALTOONA, PA. 16603 USA.

RANDOM NEWS & NOTES

Beginning with this month, Jerry Berg assumes duties as NASWA Log Report editor. You have only to scan his first effort to see that he is making a most worthy start..... Be sure to note the new address for our QSL Editor, Gregg Calkin, who resumes his section next month. All QSL reports, data and Scoreboard data should now be sent to him direct. It is suggested you use airmail; Rate is same as within USA. (11¢ per ounce.)NewsRoom section will appear for last time next month. Will be replaced with new section, to be announced, edited by Dan Ferguson. Tony Marks will remain as one of his collaborators.....Due a freak accident in which his car was severely damaged, Hank Michalenka was unable to attend ANARC convention as planned. Fortunately no injuries were suffered.....Member Bob Moser reports that anyone planning to replace tubes in equipment should do so right away because GE and RCA have announced price increases to be effective August 16th. No doubt this will result in increased prices by other manufacturers also.....Prediction Department: Sooner or later, some member of some club will report logging Radio Tasadays. Just be certain it is not you!.....Another reminder that the new-revised official NASWA Country List (SWBC only) is available from HDQS. Simply send request and include 2 eight cents stamps, no coins please!..... Our friends at Gilfer Associates, New Jersey, inform us that makers of JoyStick and JoyMatch (Partridge Electronics, England) are way behind in deliveries even though word has been received that there will be a price increase. Gilfer suggests no orders be submitted at present, but that word will be given/announcement made when the units are available for immediate shipment.....Radio RSA advises, re its 'Jubilee Contest', that listeners will be asked to answer four (4) questions. The first will be broadcast every day in all transmissions in the week of September 6th. The second question will be put in the week beginning Sept. 13th, the third in the week beginning Sept. 20th and the fourth in the week beginning Sept. 27th. There will be valuable prizes for each language service and the grand prize will be two airline tickets plus tour of So. Africa. This advance info via M. van Tonder, Head of External Services-RSA.....Very special congrats to Donald Erickson, California in being acclaimed ANARC "Man of the Year" 1971. Not only does he do an excellent job of publishing the IRCA bulletins 'DX Monitor' as well as the ANARC monthly NewsLetters, but he supports all clubs in which he holds membership. Right on, Don!.....We hear that Bill Ray, EE/ASWIC is progressing and recuperating nicely from his recent heart attack. Atta boy Bill; Hang in there!Question; Of all 50 states, which has most NASWA members? Whats your guess????

* * * * *

BE A GOOD MEMBER/FRIEND: SUPPORT ALL CLUBS U BELONG TO: BE A GOOD MEMBER/FRIEND!!!!

NEW MEMBERS, WELCOME!!

Howard Wellman, Rancho Santa Fe, Calif. Via Communications World.
 Dave Wank, Willoughby, Ohio. Via PE Communications Handbook.
 Leon Jeter, Peoria, Illinois. Via Monitor DX Hdqs/Hank Bennett.
 Walter Trkula, Sharpsville, Penna. Via '71 World Radio-TV Handbook.
 Dan Kennedy, Windsor, Ontario, Canada. Via Communications World.
 Jay Lash, Jr., Canton, Ohio. Via PE Communications Handbook.
 Michel Delco, Toluca, Mexico. Via Radio Nederland 'DX JukeBox' NA Report/G.Hauser.
 P. J. Sturgeon, Burbank, California. Via World Radio-TV Handbook.

RENEWALS

Second year: Charles Hagen, Bill Whitacre.
 Third year: Steve Eisenberg, Marion Ely, Robert Shepherd, Martyn Madeley, Edwin Sloan, John Hedstrom.
 Fourth year: George Rabone, Al Reynolds, Bill Berghammer, Ed Kelly Jr., Peter Rudolph, Tom Waldron Jr.
 Fifth year: Stan Mayo, Danny Jamison, Dan Ferguson.
 Sixth year: Del Hirst.
 Ninth year: Frank Peters, Bill Stevens.

(NOTE: Members joining/renewing after the 15th of month will be listed next month.)

PACKAGE DEAL-SPECIAL OFFER

Gilfer Associates, Inc., P.O.Box 239, Park Ridge, New Jersey 07656 has made up a new special package deal which is now made available to SWLs/DXers. Consisting of one copy each of 'Shortwave Voices of the World' (by Dr. Richard E. Wood) 'Guide to Broadcasting Stations of the World' (via BBC) 'Address Book' (of SWBC stations) plus a supply of Log Sheets and Reporting Forms (latter to send to stations) the package retails for \$13.85, but is now offered for special price of only \$11.00 ppd (U.S. and Canada). This is a bargain 'starter' deal and we recommend it, especially to our new members or beginning SWLs/DXers. If/when ordering, be sure to mention that you are a NASWA member. Watch for additional deals and bargains via Gilfer in future Friendx.

MESSAGE VIA LR EDITOR

Be sure to read the special message our new Log Report editor-Jerry Berg writes in LR.

HELPING HAND SERVICE

For sale: Hammarlund HQ-200 in like new condition. Complete w/operating manual and original carton. Write Tom Eby, 1235 North Main St., Naperville, IL. 60540.
 For sale: AMECO PCL-F preamp and Heathkit GD-20 crystal calibrator. Contact Hank Michalenka, 14 Brook St., Central Falls, Rhode Island 02863.
 Wanted: Contact/mail from NASWA members in areas in and close to Virginia. Please write Greg Kelley, 108 Archer Street, Staunton, Virginia 24401.
 For sale: National NC-190 receiver. Needs realigned. Best offer takes. Contact Jerry Stuart, Box 1487, Lawton, Okla. 73501.
 Wanted: Copy of 1969 WRTH Summer Supplement. Willing to pay any reasonable price. Write Steven F. d'Adolf, 16 Westgate Dr., Woburn, Mass. 01801.
 For sale: Drake SPR-4 complete w/10 extra crystals. Also Mosley SWL-7 antenna. For details write Ben Lewis, 449 Pine Street, South Weymouth, Mass. 02190.
 Wanted: BC-221 frequency meter in good condition. Write Vic Argabright, RR#1, Perry Park, Larkspur, Colorado 80118.

NEW ORGANIZATION BORN

Latest to join the ranks of SWL/DX organizations is "Society for the Preservation of the Engrossing Enjoyment of DXing" or, as it is sure to become better known as, 'SPEEDX'. Watch for further info/data in upcoming Friendx.

AIRMAIL RATES

From USA to South America per 1/2 ounce, it now costs 17¢. To Europe, Asia, Africa, Australia and South Pacific 21¢. Rate per 1 ounce to Canada and Mexico is same as within continental USA 11¢.
 Our members in Canada fare better. It now costs them, per 1 ounce, to anywhere in the world, only 15¢.
 New IRC rate, in both USA and Canada, is now 22¢ (formerly 15¢).

Member Dick Heggs, Canada, also informs us that the 15% luxury tax which was, in past, levied on all radio's/TV's, has now been lifted by Canadian Government.

And, as the oldtimer said.. "It now costs 6¢ to put your 2¢ worth on a 1¢ postcard."

In future, what will it cost to send cowl to the moon????????????????????????????????

THERE ARE THOSE, AND THERE ARE THOSE!

As I have oft times writ, "It takes all kinds to make up this world/hobby". Therefore the following is offered for your cogitation. B.E.

A few weeks ago, the following (#1) was received at NASWA Hdqs. In reply, application form was sent. Response was (#2) and was given reply (#3). Your comments invited.

(#1)Dear Sirs; Enclosed is money-order for \$10.00 for membership, one year. I saw your association mentioned in PE Communications Handbook. My interest comes from the fact I am an active ham radio operator, but quite often listen to SWBC bands. J.G.Payne/Texas

(#2)Mr. Eddings; Okay confirming receipt of my \$10.00 money-order and request for membership. Having received application form, I have decided not to become a member. It is my feeling that you want too much personal information, and that it is an invasion on my privacy. First and foremost my interest is ham radio. I have been active in it for 15 years. However I do do some listening on the SWBC bands occasionally. When I joined the ARRL, they did not ask me anything but my name, address and ham call. In particular I object to giving information about my schooling, marital status, equipment, etc. I cannot see what this has to do with SWLing. Also, I do not want to be committed to any motto. My feeling about your association, judging from the info wanted on application, is that you are dominated by CBers. I would appreciate refund of my \$10.00. If not, I will chalk it up to sad experience. J.G.Payne/Texas

(#3)J.G.Payne/Texas

Jim OM; Enclosed herewith is \$10.00 refund per your request.

It is regretable that you took offense, apparently misunderstood purpose behind data/info requested on our application form. In all the years our club has been in operation (going on ten!), never have we had anyone react as you have done. Nearly 3000 applications have been submitted, each completed.

Ordinarily I would not reply at length to letter such as your most recent, but being I deem it best, in behalf of NASWA, I do so.

Firstly, we are in no way whatever, connected or concerned with CB. There are however, a number of our members who are CBers, just as an even larger number are ARO's. Our association/club is made up of SWLs and DXers the world over. In particular these are radio hobbyists who are interested in listening to and/or monitoring the SWBC bands. Our bulletins contain nothing regarding CB, ARO, MW, FM, TV, or any other bands; Only SWBC. I am sending you gratis copy of current bulletin which attests this.

As to data/info requested on application form;

When you request membership, you express want to join our association, not merely subscribe to our monthly bulletins as you would a commercial magazine. Our motto "Unity and Friendship" relates solely to the hobby and has nothing at all to do with any political faction, any racial group, any subversive or what have you, idea's or idioms. It merely infers that were are joined together, as fellow hobbyists, to better enjoy the hobby and to make friends of one the other so doing. I am certain there are a number of ham radio clubs with similar ideals.

Factually it is not necessary that you fill out all the application. What we are most interested in, aside from name, address, etc., is data on your equipment. The more personal info is not required; Neither you nor anyone is obligated to committ themselves to abiding by our motto; It is requested, not required!

You asked what your equipment has to do with SWLing. There are several things; The main being not all members have identical. Some have expensive set-ups, others have lesser. Being there are those who judge a DXers standing by his ability to hear/log and verify stations/countries, we like to compare the gear used. It is of no mundane concern to us whether it be latest equipment or that which be considered vintage. While there are competitive factors involved, they are friendly, just as is involved when you ARO's have DX competitions at times.

In any case Jim, as I said, it is regretable that you took offense, but nonetheless, we thank you for writting and extend best wishes for your continued luck
(cont'd, next page)

LOUDENBOOMER REPORT
THE BEST OF CL

As a service to my readers, many of whom are woefully unaware of the new products now available to the serious shortwave listener, I again repeat the following...

■ ■ ■ ■ ■ ■ ■ ■ ■ ■ ■ ■ ■ ■ ■ ■

The first piece of equipment to come across my test bench this month is the recently released Haplesscrafters S-007 communication receiver. This budget-priced model turned out by a Detroit-based electronics firm is designed from Haplesscrafters' S-007 series, the latest in the new line with the beginner in mind. Priced at \$59.95, the S-007 is the latest in the new line from Haplesscrafters. Like the other popular 'S' series models, it adheres to the company's recently announced policy of external set beautification.

The S-007 is housed in a stylish cabinet of rugged, extruded, anodized aluminum foil. Finished in a satin-smooth grey, with gold accessories, it is a sight to behold. With little delay, we put the test unit on the bench in my well equipped lab and began to probe its innards.

The first thing that struck this expert is the room the manufacturer has provided within the cabinet which, of course, allows for easy servicing. The Haplesscrafters engineers have accomplished this through the use of simplified circuitry, probably the most novel of which is the complete elimination of tuning condensers, transformers and other of the bulky components found in the average receiver today.

The operation manual points out yet another improvement found only in the S-007. Since one of the factors causing frequency drift in a receiver is heat, the firm eliminated this by designing its new model without tubes.

Never a company to jump on the bandwagon and use recently developed components simply because they are new, Haplesscrafters has refrained from replacing the missing tubes with unproven transistors. Haplesscrafters chief engineer, Kleen R. Mynd, in a paper delivered to the American Society of Mentally Stationary Engineers, revealed that a two year field study by his firm showed the electronic components most likely to fail in actual use are resistors and capacitors. I was pleased therefore, in my lab analysis of the S-007, to note he practices what he preaches. Both of these components have been completely eliminated. This should reduce the number of servicing problems for owners of this new receiver.

Now I happen to believe in printed circuitry being one of the big steps forward in modern electronics. However, ever broadminded, I realize there are respected electrical engineers who swear by traditional wiring. Both have their advantages and disadvantages. Haplesscrafters though has steadfastly refused to compromise its standards by accepting either type of wiring. The S-007 is designed with neither.

After my careful bench test of the receiver, I am happy to report that I recommend it to any listener looking for a set in this price range. In fact, so taken with the S-007 was I, that I ordered a second one. Placed at each end of my work bench, they do a very fine job of supporting the row of technical manuals stored between them.

= = = = = = = = = = = = = = = =

Coming soon! A report on the Neatkit 20 meter band antenna. I hope to complete construction of the test unit generously supplied by Naet Co. of Bent Tower, Mich. I've run into a few bugs which will doubtless be ironed out before full production begins. Construction itself was no problem. The plastic soda straws we glued end to end with the aid of the supplied tools (a single edge razor blade and tube of Elmos Goo!) in just under 26½ hours. A less experienced kitbuilder however, may need 30 hours to do.

...Charlie Loudenboomer

+ + + + + + + + + + + + + + + +

NOTE: If you ever find I make a mistake in one of my reports, please consider that it was there for a purpose. I try to publish something for everyone, including the fellows who do nothing but look for mistakes of others.

ANARC REPORT

NASWA/ANARC Rep-Gray Scrimgeour 227 Hanna Road, Toronto 350, Ontario, Canada

=====

Next month we hope to have a full report on the ANARC convention, also possibly have a photo page included. This month however, I'd like to discuss the ANARC DXers Census.

The census is a project that began about 2 years ago, and which many of you took part in by completing a form that was included in Friendx. In fact NASWA members gave the greatest percentage of returns for the census (60% of NASWA members cooperated!) 750 members of ANARC clubs sent in forms, and through HCJB, Radio Nederland, Popular Elec., Science and Electronics, and Todd Graves-SWL Guide, we were able to obtain info from over 500 other North American SWLs/DXers not belonging to any ANARC club.

The census results showed a number of interesting facts about we DXers. For example; only about 2% of our group are females. This seems true both for clubs and for those who listen to SWBC but are non-club members. Over 1/2 of ANARC club members are under 25 years of age (15 and under 10%; 16-20 31.5%; 21-25 14%; 26-30 12%; 31-35 6.5%; 36-40 5%; 41-50 8%; over 50 13%) Those replying via the radio stations and magazines were even younger, with over 60% being under 20. In all cases, the largest age group was the 16-20 category (30-40%).

When ANARC club members were asked what bands they listened to, SWBC was in first place with 84%. MW/BCB was second with 63%, followed by amateur 33%, utilities 22% and TV 17%, FM 16%, LW/LongWave 11.5% Those replying via HCJB and Radio Nederland were mostly SWBC DXers exclusively; Only 11% of them listened to MW and another 11% to amateurs. The magazine readers reported SWBC 82%, MW 33%, amateur 34%, other bands had very low ratings. Those reporting via SWL Guide were 94% SWBC, 18% MW, 15% amateur, 11% ute's. You can see that most club members DX more than one mode of broadcasting, yet large percentage of others (because of manner used to contact them) are solely SWBCers. 80% of club members do not hold license, 8% are ARO's, 12% are CBers.

The types of receivers used by DXers were also tabulated. We divided these into rather broad categories - noncommunication receivers (including portables, table models, etc) communication receivers priced less than \$125, communication receivers priced above \$125, military surplus, and home-brew. We tallied only the best receiver that the DXer reported (being some listed more than one). The largest group was communication receivers in the under \$125 class; Almost 1/2 of the DXers reporting, use this type. (many use the Realistic DX-150). Other statistics show that 14.5% use noncommunication type receivers, 33% use the more expensive i.e., Drake, Hammarlund, etc. Only 4.5% use surplus or build their own. 66% of club DXers have tape recorders, 50% have no interest in electronics, 51% do simple repairs as/when needed.

The most popular magazine based on reports (keep in mind there are now new mags which were not on the market in past) was Popular Electronics (72% read it regularly) then comes Electronics Illustrated (43.5%), RTVE (27%), QST (14%), Elementary Electronics (13%), CQ (11%), and Broadcasting magazine (9%); 75% of club members favor articles that give feature material on stations, 47% like propaganda items or clandestine data; 41% enjoy construction articles, 29% go for theory.

These are some of the more general bits of data resulting from the census; The entire and official report covers some 10 or more pages.

The ANARC DX Census was the first try at obtaining material from all clubs/members and it is hoped the data can be used by club officers in planning future bulletin contents and formats which will be of benefit to their clubs in general, the hobby in proper.

=====

As mentioned above we are hopeful of having a complete report on the actions/business that took place at 1971 ANARC convention...also a possible photo page therefrom. Could be that certain tapes will be made available (of the main talks/speeches) to members interested. Watch for next months ANARC Report and/or HDQ's section.

DX ATLAS: MADAGASCAR Edward J. Pyatt

Some of the Malagasy people who inhabit Madagascar like to call themselves the "first African-Asians." There are almost 7 million of them living on an island so big that it is almost a miniature continent but so far from the world's nerve centers that most of the time they are forgotten.

Centuries ago successive waves of Malay, Polynesian and Melanesian peoples drifted from the east to settle and to mingle with similar numbers of African emigrants. In Tananarive, the capital, which sprawls over steep hills on the central plateau, one finds flooded rice fields in the flats beneath the city and on the terraces that march up the distant slopes. There is a certain resemblance to San Francisco.

The largest of the 18 Malagasy tribes is the Merina, many of whom look startlingly like Indonesians. The other tribes mostly live off the central plateau nearer the sea and are collectively known by the French word "Cotiers," or coastal people. They outnumber the Merina 3 to 1. Early in the 19th century Merina kings unified Madagascar by conquering the other tribes. The Merina ruled until 1895 when the French subjugated Madagascar. Since independence in 1960, however, the non-Merina politicians, well-organized and unified, have controlled almost all Cabinet posts under the leadership of President Philibert Tsiranana.

The great majority of the Malagasy are farmers and their staple crop is rice. Madagascar was not a primitive place when seized by the French, but the seat of a flourishing exotic civilization. Some Malagasy even like to make the claim that they might have become a miniature Japan if the great powers had not finally abandoned them to France in the late 19th century. With their own tenacity and British help, the Merina monarchy kept the French at bay for more than 100 years. Before that coastal tribes had wiped out one of the strangest of the world's political experiments, a little republic called Libertia, founded by Pirates who used Madagascar as a base in the 17th century.

Tananarive is a hilly, rather Mediterranean looking town with solidly built two story houses clinging to its steep slopes, so steep that one street name translates as "old folks can't make it" and another as "out of breath."

The first two Merina kings unified the island, brought in English Protestant missionaries, imported bicorn hats, Napoleonic tunics and breeches and gowns from Paris and set the nation falteringly on the way to modernization. But the second king died young and his xenophobic queen, Ranavalona the Cruel, came to the throne. She kept the Paris gowns but rejected most things western. She threw Christians down a cliff from the porch of the palace, which she had whimsically named "Where it is Pleasant to Reign," and reinstated trial by ordeal. When she died, her son tried to overturn all her policies and reinstate foreign advisors and modernization. He was strangled with a silken cord by outraged conservatives after only two years as king.

The last of the dynasty were three queens who reigned successively from 1863 until 1896. A remarkable figure named Rainilailarivony married each of the queens as she came to the throne and ran the country as her prime minister. Madagascar signed two treaties with the U.S. (in 1867 and 1883), temporarily made the Church of England the state religion and tried to keep the persistent French from establishing a colony.

Officially known as the Malagasy Republic, this country has two shortwave stations. Radio Television Malagasy has international transmissions on 17730 kcs. Other SW

DX ATLAS: MADAGASCAR
(continued)

outlets are on 3232, 3288, 4960, 7105, 7155, 7230, 9515, and 9690 kcs.

The other SW station is Radio Universite on 3370 kcs. This is an educational network and its broadcasts are intended primarily for local listeners.

* * *

SPOTLIGHT ON N.H.K.
John Bañta

Radio Japan's shortwave service celebrated its 36th anniversary on June 1st of this year. Originally named Radio Tokyo, it was suspended for a time after World War II, but it resumed operation in February 1952 under the new name of Radio Japan.

The programs of N.H.K. originate in the Tokyo studios and are sent via landlines to transmitters located at Nazaki and Yamata, some fifty miles north of Tokyo. Sixty-three per cent of Radio Japan's broadcasts pertain to news and news commentaries. Transmitting 37 hours daily in 23 different languages it operates in two services. The General Service presented in English and Japanese covers mainly news. While the Regional Service (North American, etc.) beams musical, language, dx, and information programs to certain areas of the world. Reports on the 11th Winter Olympic Games to be held in Sapporo in 1972 will be carried over Radio Japan shortwave service.

During 1970, an average of 3,000 reception reports and letters were received per month by Radio Japan. Presently, N.H.K. is offering a very colorful "Japanese Festivals" QSL card for correct reception reports. Write today for the colorful QSL and their programme schedule to Radio Japan, Tokyo, Japan. The station also offers a monthly programme guide, entitled "Radio Japan News", showing photos of listeners and summaries of programmes to be aired.

I would like to thank Hyoji Kurakata, manager of programme control division of N.H.K. for his very kind assistance in making this article possible.

* * *

WWV on.....15150 khz.

Recently, NASWA member M. R. Leonhardt received WWV on 15150 - which is "out of band" for this station. A reception report brought the following interesting answer:

Thank you for the reception report dated April 6, 1971. The most common causes for reception of WWV outside of its assigned frequency channels are cross-modulation and receiver image response.

In your case, however, I am unable to cite a specific station which is likely to produce cross-modulation at 15.150 MHz with WWV. Also since your receiver is very selective and has a high intermediate frequency, it is not probable that reception on 15.150 MHz could be attributed to images.

Cross-modulation and image problems notwithstanding, it is conceivable that you received an extraneous signal from one of our several transmitters. Although spurious emissions from WWV are kept below the maximum levels permitted by government regulations, it is quite possible for high-frequency radiation of only a few milliwatts to travel great distances under favorable propagation conditions.

I shall be interested in knowing if this condition persists.

John T. Stanley, Engineer-in-Charge

SUPPORT NASWA

"Radio 4VEH"
Marlin A. Field

Radio 4VEH was founded by the East & West Indies Bible Mission under the direction of Rev. G. T. Bustin who first came to Haiti in 1942 in search of a property to begin mission work. In 1945 the first missionaries under the East and West Indies Bible Mission arrived to set up a ministry of national churches and a Bible School.

In 1950 as a result of Rev. Bustin's vision of a radio station connected with the work, Mr. Paul Shirk came from California to serve as the first radio engineer of Radio 4VEH installing equipment, erecting antennas and putting the station on the air. The first broadcast was in June, 1950. Late in 1951 a breakdown of equipment threw the station off the air for six months, at which time the transmitter was rebuilt to a power of 3000 watts.

Radio 4VEH became the outstanding voice of the Caribbean area. Letters came from every direction telling of reception loud and clear in many countries of the world, especially the U.S., Jamaica, and Colombia. However, due to lack of funds, the mission in Haiti was unable to expand as the founders had planned. By the close of 1957, Radio 4VEH was on and off the air due to various breakdowns of the worn-out equipment and power plants. It was evident that something soon had to be done.

Upon hearing that Rev. Bustin was looking for a group who might continue the work in Haiti, a group of men representing the laymen's branch of the Oriental Missionary Society, "Men for Mission", came to Haiti in January 1958 to survey the work. In June Men for Missions decided to take over the financial burden for the work. The Oriental Missionary Society was officially organized in Haiti in July of 1958 with Dr. William A. Gillam as the first Field Director. A cordial welcome was extended to the O.M.S. officials by the President of Haiti, Dr. Francois Duvalier.

The first broadcasts from a new transmitter building at Petite Anse were aired in October, 1960. In 1961 a new 10KW broadcast band transmitter was installed. The broadcasts continued to be aired from Petite Anse while the studio building at Vaudreuil served as recording and office center. Since 1965 all programs have been aired from the studios at Vaudreuil by using FM transmitter links. Projected plans call for the construction of a new studio-office complex near the present studios, and further expansion of 4VEH programming to eventually include 5 a.m. to 11 p.m. broadcasts in French/Creole, English and Spanish for continuous service to Caribbean listeners.

In 1957 Radio 4VEH was broadcasting from 4:00 until 10:00 each morning and from 6:00 until 10:00 each evening. During 1958, afternoon broadcasts from 2:00 to 4:00 were initiated in French and Creole. Later, Spanish broadcasts were added from 4:00 to 6:00 p.m.

The present schedule of dual broadcasting, i.e., broadcasting in two languages simultaneously was begun in January 1967 with 154 hours of programming per week. A second 10 KW broadcast band transmitter was installed in 1969.

In 1957 three transmitters were heard in 20 countries, 45 states and most of the islands of the West Indies. In 1961, the earliest accurate report available, 3,291 letters were received. In 1970, with seven transmitters in operation, 4VEH was heard in 32 countries, 45 states and the entire West Indies, with a total of 22,000 letters received.

The first 4VEH pre-tuned transistor radio was placed at Port Francais in January, 1960. A church was the result. At the present time, 2,500 radios have been distributed and plans are for the distribution of at least 2,000 additional sets, to be assembled and boxes constructed by Emmaus Vocational Bible School students in conjunction with their vocational training.

The staff of Radio 4VEH has grown continuously until at the present time there are 17 full-time Haitian workers who take complete charge of the French/Creole broadcasts. Seven foreign missionaries co-ordinate the technical department and English and Spanish programs.

"Radio 4VEH"
(continued)

Mr. Gaudin Charles, a young Haitian man, is presently co-director of Radio 4VEH with Mr. Mardy Picazo, who came to 4VEH in 1952.

Thanks to Radio 4VEH for supplying the material to make this article possible.

First Denmark,.....Then Austria

A recent edition of the famed Sweden Calling DXers Bulletin stated that due to financial reasons, the Shortwave Service of the Austrian Radio would be discontinued. Those SWLs and DXers who appreciate a station with excellent uninterrupted music, neutral commentaries and newscasts, and friendly cooperation will miss Vienna. Your voice counts.....if you do not want the Austrian Radio off the air, NOW is the time to write to the following address: Embassy of the Republic of Austria
Washington D.C. 20036

OR.....write to the Embassy in your nation's capital!

Be polite, state why you like the Austrian Radio's "Kurzwellendienst" and what you would think of its leaving the air. The ORF recently added high power transmitters and the maintenance on these cannot be so high.....Vienna is heard round the world....this voice of peace and understanding should not end transmission. A massive response to CBC cuts saved the International Service - in Denmark, we almost were successful - let us not fail in Austria. WRITE TODAY!!!!!!!!!!

Speaking of this number one station, we will shortly have a special presentation in the pages of FRENDX of the Austrian Radio....coming soon. But for now, WRITE that letter!

*

*

"RADIO FREE BENGAL"

"Radio Free Bengal" was on the air again today claiming that the West Pakistan Army had been routed in several areas by guerrillas of the liberation army. Over 500 regular troops had been killed and a gunboat sunk....

Unfortunately for many gullible and excitable Bengalis, the heroic battles and the pictures of a retreating and vanquished Pakistani Army are, like the underground station itself, perhaps figments of a fertile imagination.

Without wishing to deliberately shatter the hopes of the Bengalis, I used a radio direction finding coil this morning to try to track down the location of the radio which claims to be operating from somewhere inside Bangla Desh.

To my amazement the direction-finding coil indicated that the strong, clear transmission was not coming east from the direction of Bangla Desh but was emanating from the north on exactly the same bearing as All India Radio broadcasts. Other checks made from several points in the city pointed unerringly northwards towards Chinsura and Magra where All India Radio transmitters are located.

THE RADIO DIARY OF DR. ERNESTO GUEVARA, M.D.

Part II

George Schnabel

July 20th more doubt concerning the veracity of radio reportage is expressed: "...The radio gave the news of the identification of the corpse of the dead guerrilla as that of Moises Guevara, but Ovando, in a press conference was very cautious with respect to this and blamed the identification on the Ministry of the Interior. The possibility exists that the whole thing is a farce or the supposed identification invented..."

By August 30th the group may have been down to its last receiver as can be judged from this brief entry: "...The radio remained below so that there was no news..."

September 2nd, 1967 the VOA earns a mention: "...We heard disagreeable news on the radio about the liquidation of a group of ten men led by a Cuban called Joaquin in the zone of Camiri; however, the news was broadcast by the Voice of American and local stations said nothing..."

September 3rd: "...once more the Voice of the United States gave information about a combat with the Army and this time it mentioned Jose Carillo as the only survivor of a group of ten men. Since this Carillo is Paco, one of the drifters, and the liquidation occurred at Masicuri, everything seems to indicate that it is a phony story..."

September 7th: "...Radio Cruz del Sur announces finding the corpse of Tania the guerrilla fighter on the shore of the Rio Grande, it's news that does not have the aspects of veracity as does the report about Negro. According to this broadcasting station her corpse was taken to Santa Cruz, but this is not what was heard from Radio Altiplano..."

September 11th: "...The radio gave news in the morning that Barrientos asserted that I had been dead for a long time and everything was propaganda. Then again at night they spoke of an offering of \$4,200 for data that could facilitate my capture dead or alive..."

September 30th: "...Radio Balmaceda of Chile announced that high army sources said that they had corraled Che Guevara in a wild jungle canyon. The local broadcasting stations were silent..."

October 7th: "...The Army gave strange information about the presence of 250 men in Serrano to prevent passage of those encircled, saying there were 37, and giving our refuge as being between the River Acero and the Oro. The news seems to be diversionary..."

Major Guevara wrote his last lines on the 7th of October, 1967. The following day in a narrow ravine called the Quebrada del Yuro he was surrounded and captured.

Postscript

At 0300 hrs. GMT on the 20th of July, 1970 the BBC World Service News mentioned that two German mining engineers employed at an American owned gold mine near La Paz had been abducted by guerillas who also bomb damaged buildings containing machinery. The guerrillas issued a statement claiming that unless the government released ten prisoners taken captive with Major Guevara in 1967, the hostages would be shot within twenty four hours.

Later the BBC expanded the story adding details. Apparently the new guerrilla group consisted of seventy men, mostly disaffected university students from the cities with a sprinkling of foreigners from Argentina, Chile, Uruguay, and Cuba. Their leader Osvaldo 'Chato' Peredo, brother of the late Inti Peredo. (Inti Peredo made good his escape from the Quebrada del Yuro and kept on fighting for almost two years until killed in a pitched battle with Police in Cochabamba late in the Fall of '69).

After hemming and hawing the Bolivian government caved in and agreed to the guerrilla's demands. The ten wanted people were placed aboard a military transport plane and

RADIO DIARY OF DR. GUEVARA
(continued)

flown to Arica, Chile where they quickly set up shop issuing a long manifesto WE HAVE RETURNED TO THE MOUNTAINS. This was broadcast by Radio Havana on the 23rd of July, 1970 at 2200 hrs. on 25 meters in Quechua and was beamed to Ecuador, Peru and Bolivia.

The ever volatile student body of San Andres University in La Paz rebelled and occupied campus buildings. During the occupation they dismantled a new transmitter belonging to the University and passed it out to the awaiting guerrillas. The guerrillas then withdrew into the rugged mountains of the Alto Beni where they probably still are.

The hostages were released as promised and during a press conference told that: '... during the first two days we could listen to reports broadcast from La Paz on three radio receivers used by the Guerrillas...'

They also noted that the Guerrillas used walkie/talkie and short distance radio/telephones to communicate between their several groups. However, they were unable to ascertain if the group possessed other transmitters suitable for long distance communication.

In January 1971 the Bolivian government released all the prisoners resulting from the 1967 campaign and flew them to Chile.

THE TRANS-POLAR BEAM
Richard E. Wood

Many international broadcasters, in their schedules, specify the angle of beam of each directional transmission. This is an important factor for any directional outlet, and of more than academic interest to the listener. In fact, for stations whose beamed signals have to cross a zone of ionospheric disturbance, the beam is crucial. And the polar zones are such areas par excellence.

The careful listener keeps a regular check on propagation by listening to the forecasts on WWV, the sunspot numbers on SBC, and through practical observations. These are of great interest in themselves, but they also have practical application both in seeking new stations which may be heard under unusual propagation conditions only, and, as will be shown later, in continuing to listen to one's favorite programs from trans-polar stations even under disturbed conditions. For the North American listener, this means chiefly stations in northern Europe and northern Asia. In this connection, the precise angle of beam in use is of the utmost interest, as the following example shows.

The receiving location of the present writer, in the southern part of the Central Standard Time zone, is close to the azimuth of maximum radiation of Radio Sweden's Eastern North America transmissions, 295°. Under normal conditions, then, he receives a stronger signal from the 295° beam than from any other Radio Sweden transmission. Nevertheless, the signals from the Horby transmitter pass a little to the south of Greenland and along the coast of Labrador. This is the outer rim of the auroral belt, during average conditions. During conditions of intensified auroral activity, the belt moves much farther south, into the Mid-Atlantic. It is a rare day when the 295° beam is entirely flutter-free. F-4 in the SINFO code is average.

Radio Sweden uses two other beams to the Americas. A 325° beam points at San Francisco; on its way there it bisects Greenland and continues over the Northwest Territories, very close indeed to the Magnetic Pole. The result - an F-4 on a good night, but F-3 on the average.

On the other hand, a 235° beam down the coast of Brazil towards Argentina hugs the coast of Holland, France and Spain, well to the southeast of the normal auroral zone. In this location, while strength is never above an S-4, fading is negligible, F-5.

THE TRANS-POLAR BEAM
(continued)

On a normal night (ignoring factors of interference), summer readings from Radio Sweden are:

11705 kHz, beam 235° to S. America : 45554
 11825 kHz, beam 295° to Eastern N. America : 55544
 11705 kHz, beam 325° to Western N. America : 55533.

Now, however, observe a night of only moderate auroral disturbance. June 2, 1971, was such a night. South-west European stations were affected little or not at all. Even the more northerly BBC was only slightly affected. But the results on the three beams from Radio Sweden were dramatically altered. Again deleting the effects of interference and inserting a "5" in the "I" column, the tables were seen to be turned among the three beams:

11705 kHz, 235° to S.A. : 45554
 11825 kHz, 295° to E.N.A. : 35522
 11705 kHz, 325° to W.N.A. : inaudible.

These observations have a moral for both listener and station. Under disturbed conditions, to hear your favorite trans-polar station, if you do not hear the transmission beamed to your own area, try the frequency beamed one, or two, target zones farther south. For the station, the moral is a technique which may one day be adopted by the international stations which today show great alacrity at installing super-power units but which remain, in other ways, still in the age of Marconi. How many international broadcasters keep a careful check on current ionospheric conditions, day by day, hour by hour, and change their beams accordingly? The answer, of course, is none. Only the BBC occasionally, when an intense ionospheric disturbance is already well underway, announces the fact, and advises North American listeners to tune to a lower frequency or to the Ascension Island relay. Correct, sophisticated beaming techniques may - one day - become the norm in international shortwave broadcasting.

FROG-LEG RADIO

The Kickoff of the Age of Electricity was made by a frog leg, as every schoolboy learns. The leg jerked when Galvani touched certain metals to it, demonstrating the flow of electric current. Hardly anyone, however, knows that 130 years later another frog leg wrote radio history. In 1912 a French doctor clamped the upper end of a frog's severed leg to a board and attached its main nerve fiber to two lead-in wires from an antenna. He harnessed the foot to a pointer resting on a soot-blackened cylinder and when the dot and dashes of the Paris Observatory's 10:45 A.M. time signal were broadcast, the leg twitched along with them. Its motion scratched curves and jogs on the slowly revolving cylinder--reportedly the first written record ever made of a radio message. Scientists were duly impressed, but they correctly predicted that the frog-leg wireless receiver would never be a commercial success.

* * *

On occasions, the Short Wave Center is especially pleased to present an article or series of articles. Through the energies of our member in Auckland, New Zealand - Barry C. Williams - we have available to us a fine series on radio in days gone by. This is a rather long series, but worth the time to read it and keep it for future reference. I am sure that all NASWA members and friends will find this glimpse to days gone by - whether a pleasant memory or a fresh look on "history" - worthwhile. So, without further ado, let's turn back the clock....with PAGES FROM THE PAST....

PAGES FROM THE PAST

Part I

Barry C. Williams

Last year I made contact with a Mr. Alan Breen of Dunedin, New Zealand. Although I have never met Alan, we have corresponded and he kindly loaned me his rare and unique collection of shortwave and broadcast verifications covering his listening years 1930-1940. In all, there were around 250 verifications from shortwave stations. I have spent many enjoyable hours going through these fascinating cards and letters capturing a little of the early days of DXing. Alan must have been one of the founders of the hobby of SW DXing with his first verifications coming back in 1930. In a letter from CJRX Winnipeg they mention the reference which Alan made concerning reception in 1929. This is remarkable when one considers that PCJ commenced regular SW transmissions in 1927 only two years earlier.

As I have accumulated much interesting information from these verifications, I have made a series of articles under continental headings as follows:

Asia and Africa
Europe and Americas
Dutch East Indies
Early Pacific SW Stations
Summary

ASIA and AFRICA

During the thirties there was much development in the establishing of shortwave services by Asian broadcasters. A typical country would be Burma.

(1) Burma became independent from India in 1937 and on May 16 commenced experimental broadcasts on shortwave. An interesting verification letter was received by Alan, the letter-head being "Indian Post and Telegraph Dept. -"With India crossed out and Burma typed in, in place of it." The government radio station was located at Mangaladon and transmitted on 49.94 metres, 6007 kcs. The transmitter was a Marconi beam telephony set of the Government P & T Dept., installed for commercial speech (Indo/Burmese) and loaned daily for these transmissions. The aerial output power was 1.5 kW.

The letter mentioned that it was possible a broadcast station would be constructed in Rangoon at some future date. Transmission hours were 0930 - 1100, 2000 - 2115 BST. Programming was in Burmese and English.

A card verified reception of the Burma State Broadcast Service for a December 1938 report. Call signs given for the Rangoon station were XYZ on 6007 kcs and XZZ on 3488 kcs. A further letter dated 20th June 1940 confirmed reception of a test transmission from the Burmese Wireless Division, Rangoon on 6047 kcs. Regular transmissions were to be resumed on 6007 kcs.

(2) Another interesting letter was from the General Post Office Kuching, Crown Colony of Sarawak, 11th March 1940. The following details were included in the letter:

- (a) We only go on the air on telephony once a week at 0010 GMT on Saturdays, the frequency used at present is 6985 kcs but we shall probably be shifting to 8710 kcs within a month or two when conditions on the bands improve here.
- (b) The transmitter provides 50 watts to the aerial and modulation is about 80%.
- (c) Our call letters are VQE but announcers generally use the word "Kuching" in preference to the call. The programs consist of a few gramophone records followed by information of interest to Sarawak government officers and public in English and a summary of the week's news in Malay and Chinese.

(3) Government Broadcasting Station, Macau, 7th December 1936 "Station CQN" was on the air every Monday and Friday 1200 - 1330 GMT on the 31 metre band with an effective radiated power of 300 watts. They announced in Portuguese and English after every other "musica". Alan again verified Macau on January 9th 1939 when they changed their call sign to CRY9.

PAGES FROM THE PAST

(continued)

(4) During the early thirties the Malayan Amateur Radio Society in Kuala Lumpur operated a shortwave station. They verified Alan's report of January 8, 1933 of their station ZGE on a wavelength of 49.82 metres (6130 kcs). The society's secretary, T. E. Byer, gave transmitter details as a Marconi S3A, crystal controlled, grid modulated, a periodic antenna, with power of 180 watts. Schedule: Sunday, Tuesday and Friday 7 - 9pm local time. A note on the bottom of the letter informed Alan that his was the first report received from New Zealand, although they had had a number from Australia particularly Western Australia. They had also received several reports from Japan, New York, Chicago and one from Holland.

Another shortwave service from Malaya was operated by the Radio Service Company of Malaya (1934) Ltd. in the city of Singapore. They were a commercial firm owning radio shops throughout Malaya and were agents for Philco radios, Milnes batteries, Triotron valves, Belling Lee, Epock speakers, British Condensers, Elmeco resistors, Block accumulators and Engel mains components. Their broadcast station, ZHI, operated on 6015 kcs with 180 watts. Their schedule was Monday, Wednesday, Thursday and Sunday 6 - 8:30 pm Singapore time and every second Sunday a relay of the Presbyterian Church Service was presented preceded by an organ recital from 5:30 - 7pm.

The 24th of August 1938 saw the verification of another Malayan station. A letter was received from ZHP on 9690 kcs, 400 watts, the British Malay Broadcasting Corporation, Singapore.

(5) Alan's earliest Asian verification was an unusual station MTCY, the Hsinking Central Broadcasting Station, operated by the Manchuria Telegraph and Telephone Co. Alan verified MTCY by letter and card on October 2nd, 1931. MTCY was a 20 kW station operating on 25.48 metres, 11775 kcs, with programs consisting of news, music and informative talks. A friendly letter and an unusual rather attractive and detailed verification card made MTCY a valued addition to any verification collection.

(6) JQAK and shortwave station JDY, the Dairen Broadcasting Company commenced operation on the 16th of July 1937 in order to, "inform the world of Japan's righteous standpoint as well as Manchuokuo's wonderful progress against the incorrect and malignant propaganda broadcasts by China." JDY, The Voice of Manchoukuo, MTT Service, operated on 9925 kcs with 10 kW 1200 - 1300 GMT in Japanese, Manchus and English. The location was given as Dairen, Kwantung leased territory.

(NB) Kwantung was the name given to South Manchuria when Japan took it from China in September 1931. Dairen was a seaport there.

(7) The beginning of another SW service was the experimental broadcast station HS8PJ (which began in 1937) at Saladang, Bangkok, Siam. This station verified with an attractive card with large call letters on it. They operated a crystal controlled transmitter on 9500 kcs with a power of 5 kW into a centre fed Hertz aerial. The time of transmission was Thursday 1300 - 1500 GMT. In 1939 a similar QSL card was received from the Overseas Broadcasting Station at Saladang verifying HSP6 7968 kcs from HS8PJ and also listing HS6PJ, 19020 kcs, which was used on Mondays only. The power had increased to 10 kW and transmissions were now daily.

(8) The 20th of April 1935 was the date on a verification card very similar to that used in recent years, from Radio Hongkong's Experimental transmission on 8750 and 5410 kc. It was crystal controlled and operated with 250 watts. A verification card in 1936 was received from ZBW3 9525 kcs, 2 kW, and ZBW4 15190 kcs, 2 kw.

(9) The earliest verification from Japan was December 13th, 1934 from Kokusai-Denwa Ksaiha, Ltd. (International Wireless Telephone Company of Japan, Ltd.). This company had four transmitters at Nazaki relaying JOAK in an overseas service. They were JVT 6750 kcs, JVP 7510 kcs, JVN 10660 kcs and JVM 10740 kcs, all 20 kw into a vertical doublet antenna. Also listed on the verification card were 20 other stations 10 or 20 kW used in their International Telephone Service to Europe, USA, Java and Philippines, Manchukuo, Formosa, and ships.

PAGES FROM THE PAST

(continued)

Although Radio Japan commenced overseas transmissions in 1935, Alan's first verification was not received till October 15th, 1938. They verified his report on JOAK2 with a photo card from Radio Tokyo (Note not Radio Japan) showing their extensive array of directional aerials and modern 50 kW transmitters. In 1937, according to a reference book, NHK had an overseas service over station JZJ on 11800 kcs. It appears JZJ was relatively low powered and it was not till 1938 that NHK became a major shortwave power.

India and China proved to be an interesting DX field. All India Radio had shortwave transmitters located in Delhi, Madras, Bombay and Calcutta. Prewar China had numerous private stations such as XTJ 11691 kcs-Hankow, XPSA-Kwengyang, XGOX-Nanking, XGRS 11850 kcs-Shanghai and XMHA 11910 kcs-Shanghai. Two other Asian stations worthy of mention were Radio Hanoi, French Indo-China, on 11900 with 150 watts. Naturally, no connection with today's "Radio Hanoi". The other station was "Boy Laundry Radio" Saigon on 11710 kcs.

It appears that the continent of Africa was very rare on shortwave with only a very limited number of countries with regular or even experimental services. In Alan's 250 verifications received during the Thirties there were no more than six or seven Africans. Among them were VQ7LO on 6060 kcs from Cable and Wireless Ltd., Nairobi, Kenya, Tananarive 9380 kcs, Brazzaville "The Voice of Free France" heard during the war, Radio Maroc 12830 kcs, CR7BH 11718 kcs 250 watts "Radiofilos de Colonia de Mocambique" and ZRH Pretoria, Union of South Africa.

Probably the most interesting verification was a QSL card from EA9AH a ham in Tetuan, Spanish Morocco. EA9AH "La estacion Experimental Nacionalista" had regular news broadcasts in English and Spanish at 2145, 1100, and 0300 GMT. The QSL card verified reception on 20 metres. Power was given as 500 watts. Reception occurred in September 1937 and on checking back in a DX magazine I found EA9AH listed on 14004 kcs.

In a letter recently received from Alan he did make mention of what he termed his most interesting African verification. This was 1ABA, Addis Ababa - under Italian occupation. This verification was not among those I saw, but no doubt it would have been a very interesting catch.

* * *

AUSTRALIA

Radio will be fed into city homes by cable before the end of the century, according to the Australian Telecommunications Development Association. The association predicts that smaller diameter broad-band cable would provide the services for radio, television, and ancillary services in the next thirty years.

Radio frequencies at present used for medium wave broadcasting would be freed for other uses.

The cable would include channels for reading gas and electricity meters and for transmitting accounts to the householder.

Other channels would enable housewives to do their supermarket shopping, obtain bank statements or information from public libraries. The cable could also be used to bring a type of newspaper into homes.

ICB Bulletin

Remember - your letter to the Austrian Embassy today might just make the difference as to whether we have the Short Wave Service of the Austrian Radio tomorrow.

QSL REPORT

GREGG A. CALKIN-EDITOR
RIO BALSAS 35
COLONIA CUAUHEMOC
MEXICO 5, D.F., MEXICO

Deadline 15th of Month
(Note: Airmail rate to
Mexico is same as in USA)

+++++

- Algeria: RTA, 11.715, black and gold QSL card in 1 month for 2 IRCs (Kelley). card and schedule in 1 month for 11.835 (Pyatt).
- Angola: A Voz do Angola, 9.660, color view of city in 70 days, 2 IRCs (Kelley).
R. Clube do Huambo, 5.060, drummer card with verie statement in 3 weeks for Portuguese report and 3 IRCs (Sizer).
- Argentina: RAE, 9.690 card in 92 days airmail for English report and 3 IRCs (Hyre)
LOL, 15.000, bi-lingual folder card in 116 days for English report (Dildine), 7 weeks for Spanish report and 2 IRCs (Sizer).
- Asiatic Russia: Radio Moscow via Vladivostok, 8 weeks, full data from Mrs. S. (Berg)
- Austria: ORF, 6.155 photo card of recreation area, schedule & report form, 3 weeks air (Schultz), all data but wrong date (Lewis), 6 weeks (Pyatt), 7.250 and 9.765, seperate cards 6 to 8 weeks, also 17.850 (Padula), 15.200, 2 months surface (Estand), 3 different cards, 2 months air, no IRCs (Dildine).
- Australia: Radio Australia, Darwin Transmitter card in 150 days for 9.580, Shepparton, (Schultz), 15.330 & 17.820, 90 and 60 days (Marinoff), 11.710 in 3 months (report mailed to ABC Overseas Service, Suite 2708, 1270 Avenue of The Americas, New York, 10020) (failed to credit this reporter, sorry!), VLN15, Perth, 15.425 blue map card, full verie, 12 days for 4 IRCs (Dildine), Radio Australia, 11.710, 87 days, sea (Thomson), Shepparton 21.54 18 days air (Stuart).
ABC, Perth, 9.610, new map card in 8 days (Stuart), 13½ weeks airmail (Howard).
ABC, Sydney, 6.090 blue map card in 7 weeks for 3 IRCs (Howard), all data, 25 days, 3 IRCs (Sizer).
ABC, Brisbane, 9.660, 3 months, 2 IRCs (Bruce).
VNG, Lyndhurst, 12.000 folder card in 14 days, full details, returned IRCs (Bruce), 3 months airmail (Estand).
- Belgium: ORU, 9.550, card, mailbag letter script and schedule in 1 month for 1 IRC (d'Adolf), red, blue and yellow QSL and schedule, 33 days, air for 2 IRCs (Leonhardt), 11.755, 10 weeks airmail (Padula).
- Bolivia: Emissora Pio XII, 5.961, letter signed by Padre Yvo Lescouzeres, Director General, 13 days airmail (Dexter).
Radio Altiplano, 5.045, red and blue character card of Indian, date only, 6½ months for taped report and mint stamps, 2 months after follow-up (Berg).
La Cruz del Sur, 4.875, 2 page personal letter, QSL card and pennant from Alec Kerfoot, Engineer. All details, airmail, 15 days (Wood).
- Botswana: Radio Botswana, 4.845, card in 2 months after follow-up, English report and 2 IRCs (Kusalik).
- Brazil: R. Inconfidencia, 6.000, form letter signed by Oiamar Figueireala Vieira in 2 weeks for mint stamps, complete data (Pyatt).
Radio Brazil Central, 4.995, bilingual letter in 15 days for English report and 2 IRCs (Sizer).
R. Clube Goiania, letter in 21 days via airmail (Lobdell).
- Brunei: Radio Brunei, 7.215, 7 months after English report and 4 IRCs, 1 month after follow-up. White card with green map of Brunei and yellow picture of mosque and oil well. Date and frequency only, signer: N.J.A. Frigout, CE (Perry). card, all details in 11 days, also sent schedule (Padula).
- Bulgaria: R. Sofia, 9.700, card and schedule, air in 41 days, 2 IRCs (Leonhardt), 60 days seamail, no IRCs (Dildine), seaside view card and postcard for 7.670 ...

Byelorussian SSR: Radio Moscow via Minsk, 15.150 card with site indicated, 21 days airmail, no IRCs, also 1 month air returning mint stamps (Dildine).

Radio Moscow, Orsha, 9.755 card for NA service in 6 weeks from

Mrs. S. (Sparks).

Canada: Radio Canada, 9.625, Anik I card, 16 days (Gehan)(Dickey), 11.935 1 month (Magne) CBC Northern Service, Eskimo sculpture card in 48 days for 11.720 (Marinoff) 16 days, full data, no return postage, signer: Brian Townsley, Supervisor, Information Services (Berg).

CKZN, St. John's, 6.160 card in 13 days for Canadian stamp (d'Adolf).

CFRX, Toronto, 6.070, picture card and full data, 6 days, no return postage, signed by Clive Eastwood, VP Engineering (Berg).

CFCX, Montreal, 6.005 red, purple card, 49 days air for 1 IRC (Dildine).

CJCX, Sydney, 6.010 card via surface, date only (Schultz), 1 month for 1 IRC (Kelley).

CHNX, Halifax, 6.130 plain card in 2 weeks for 1 IRC, signer: Andrea Sears, (Plum), 6 days, 1 IRC (Kelley).

CFVP, Calgary, 6.030 card in seven days (Kusalik).

Canal Zone: NBA Time signal 17.697.5 prepared card from RMC F.R. Knutson, Box 5007, Port Amador, Canal Zone in 11 days for SASE. U.S. stamps unuseable, 11 days airmail (Dildine). prepared card in 6 days from Washington (Sizer).

Canary Islands: RNE Relay, Santa Cruz, 15.365 QSL'ed via Madrid in 10 days airmail returned 1 of 3 IRCs sent. Black and white tower card verie text in SS, special stamp for relay site from Jefe de Relaciones. Also various schedules and nice pennant (Michalenska), studio card direct, from Juan de Rojas, 2 IRCs, 3 months (Dildine), 11 weeks for mint stamps (Schnur).

Cape Verde Islands: Radio Clube de Cabo Verde, card in 2 months seaimail for PP report and 2 IRCs. Still lists frequency as 3.960. (Perry).

Central African Republic: Radio Bangui, 5.035 OCORA card, all data except frequency 2 months for French report and mint stamps. Airmail reply (Berg).

China (People's Rep. of): Radio Peking, 7.120, thank you card with no data, post cards and propaganda magazines in 3 months seaimail, no IRCs (Plum), 9.785 magazines, postcards, no verie info, 95 days (Lewis), friendly personal letter and color card for 3 IRCs. Airmail (Schnur).

Clandestine: Radio Espana Independiente, card from Paris in 5½ months for English report and 3 IRCs via Prague address. All data on dove design over map of Spain (Sizer), 10 weeks, all details for 1 IRC (Martin).

Colombia: Radio Nacional, 4.955 card with golden ceremonial headdress on blue background in 47 days, air, 1 IRC. (Jamison), card in 2 months airmail. Used SS report form (unk), postcard of village scene in 65 days for mint stamps (Schnur).

Emissora Nueva Grande, letter and pennant in 16 days for NASWA SS form and 2 IRCs, vague verie statement from Lucy Rodriguez (Jamison).

Radio Vision, 6.105, SS letter in 26 days for Spanish report and mint stamps (Sizer).

Radio Santa Fe, card and pennant in 2½ months via seaimail (Charnes), card in 2 months with pennant from Sr. de Bernal via seaimail (Pyatt).

La Voz del Caqueta, 5.035, postcard with date and verie statement signed by H. Arce H., Ing., 20 days airmail (Wood).

Transmissora Caldas, 5.020 letter from Doin Martinez e. also black, green, white pennant, 37 days sea for Spanish report and 3 IRCs (Dildine).

Congo Rep: ORTF, Brazzaville, 15.190, full verie handwritten on prepared (or picture ?) postcard, report to and reply from Paris, 4 months, air, 2 IRCs (Dildine), 27 days via air, full details on white card with yellow drawing of Africa and brown ceremonial mask (Rosen), folder QSL in 16 days air for FF report and 2 IRCs (Leonhardt)

Rdif. TV Congolaise, Brazzaville, OCORA card in 6½ months after taped report and 4 IRCs, 2 weeks after follow-up letter. Airmail (Berg).

Congo, Dem. Rep of: RNC, Kinshasha, stencilled letter in French for 15.245 for FF report, no IRCs (unuseable there). Reply in 8 weeks from V. V/s Sinar Guerra Madriz, Director (Berg), letter giving time and verification statement, 2 foot long pennant showing Angostura Bridge over Orinoco and boy at microphone, also many postcards. Used SASE with added stamps, airmail in 17 days (Wood).

Windward Islands: WIBS, 11.790, green card in 2 months for 2 IRCs. Took 6 follow-ups over 2½ year period (d'Adolf), 3.280, green card in 71 days seamail for 2 IRCs. Date, time and frequency (Schultz).

Yugoslavia: Radio Belgrade, 9.620, Dubrovnik folder with full verie statement in 41 days airmail, no return postage used (Dildine).

102 countries represented in the colum this month gentlemen. That is a lot of stamps and letters coming and going!

Some of you have commented that your reports were sent but not used etc. I must apologize for any slip-ups which have ocured over the past two months or so. Both of the times I have done the column, personal committments have made it necessary to advance the deadline for reports by some five days and I imagine that caused some of the reports which should have been in July's column to be delayed until August, as it will cause some August reports to be held over until the September issue. Double addresses and the like helped to confuse matters a bit too, as did my inexperience at this sort of thing.

Next month, Gregg should be back wearing the green shade and welcome he will be! I shall forward the Scoreboard reports I have on hand as well as any additional reports received here, on to Gregg in Mexico City in time for the September QSL section so, hopefully, things will be back to normal soon.

As long as a little space is left, a few additional comments. I don't know how Gregg goes about preparing this section each month but I feel I can pass on a few tips which would be of help to him. First, like every editor seems to say, use only 1 side of the paper! Please list the frequency involved and be sure that the country title is the same as that in the NASWA Country List. If you do not type, it helps if you can print. Leave some space between each item and place your last name after each one. I cut up each report and filed it by country and it is very easy to forget to add the name before cutting as I did on one report this month resulting in no credit being given. I'm sure Gregg would appreciate it greatly if you would follow these suggestions.

It has been interesting, educational, enjoyable..and work! Thanks for your continued support. Gregg, over to you.

73,

Gerry

NOTE: DUE TO MIX UP IN SIGNALS FROM GREGG
TO GERRY, THERE IS NO "QSL OF THE MONTH" FOR
AUGUST. GREGG ADVISES THIS FEATURE WILL AGAIN
RESUME WITH THE SEPTEMBER BULLETIN.
REMEMBER, ALL QSL INFO_DATA_ETC., NOW GOES TO
GREGG DIRECT. SEE ADDRESS AT BEGGINING OF SECTION.

NO QSL OF THE MONTH FOR AUGUST????!!!

NO QSL OF THE MONTH FOR AUGUST????!!!

.....
 Note: Reports rcvd after deadline, not used, will be forwarded to Gregg for use in next months section. This includes reports that were sent to Dexter or to Hdqs.

Thanks to the following reporters who checked in with us this month: Good show!

(PO Box 710, Rabaul)

Radio Wewak, 3335 & 6140, 10 kW,
20:00-22:00, 06:00-13:00; (PO Box 65)

Radio Western District, 3305, 10 kW,
20:00-22:00, 07:00-12:00; (PO Box 23,
Daru)

Radio Kerema, 3245, 2 kW, 20:00-
21:30, 06:45-12:00; (PO Box 36, Kerema)

Radio Milne Bay, 3235, 2 kW,
07:15-12:00; (PO Box 20, Alotau)

Radio Bougainville, 3322.5, 2 kW,
20:00-22:00, 06:00-13:00; (PO Box 35,
Kieta)

Radio Goroka, 2410, 2 kW, 19:45-
21:30, 07:30-12:00; (PO Box 146, Goroka)

Radio Mount Hagen, 2450, 2 kW,
20:00-22:00, 07:30-12:00; (PO Box 311)

Radio Madang, 3260, 2 kW, 07:00-
11:00; (PO Box 2036, Madang)

Radio Morobe, 3220, 2 kW, 07:00-
12:00; (PO Box 1262, Lae)

Radio Central (Australian Adminis-
tration Broadcasting Service); 11880,
10 kW, 01:00-02:00, 04:30-05:30,
(Radio Central Port Moresby, Department
of Information and Extension Services,
Konedobu)

Note: Radios Madang and Morobe are
both new; power increases for Kerema,
Mount Hagen, Goroka, and Milne Bay;
locations of proposed stations are Kimbe,
Lorengau, Vanimo, Kundiawa, Kavieng, Pop-
ondetta, Mendi, and Port Moresby. (BB)

U.S.A., WINB, Red Lion, PA

EE sked: Mn-Fr, 17:00-20:00, 17720.
20:00-22:00, 11795. St-Sn, 17:00-19:45,
17720. 20:00-22:00, 11795. (WINB, JK)

AUSTRALIA, Melbourne

EE to NA: 12:15-13:15, 9580/11710.
02:00-04:00, 15320/17820/21740. (JK)

SWITZERLAND, Berne
(Cf. NR-2 JULY) During the entire
first week of July, 15305 was still
coming in loud and strong in the state
of WA. Have not found 15235. (RO)

EE sked (as printed NR-1 JUNE)
01:30, 6120/9535/11715/15305. 04:00-
04:30, 9535/11715. (JK)

Perhaps they had not changed yet- ed.

SWEDEN, Stockholm

In order to avoid heavy QRM on
11825 to ECNA, 15295 is now being used.
This is for QTR 00:00-02:30, including
SS 00:00 & 01:30, EE 00:30 & 02:00, and
Swedish 01:00. // Tx to SA remain
unchanged on 11705. (Radio Sweden via DJ)

WEST INDIES; HAITI, Cap Haitien

4VE 6120; 4VEH 9770; 4VEJ 11835;
and 4VWI new QRG 19M w/.35 kW not yet
announced, are for the EE/SS programs.
4VSO 2450 w/.25 kW; 4VE 6120 w/1.0
kW are for French-Creole programs. (MM, SD)

The studios for 4VEH are actually
located at Vaudreuil, w/Tx at Petite
Anse. They advise that listeners will
receive quicker replies when they include
return postage of mint stamps which can
be purchased from DX Stamp Service, 466
Weaver Rd., Webster, NY 14580. (Good idea-ed.)
From letter signed Mrs. Kent Ragsdale,
QSL Secretary, 4VEH. (SD)

COSTA RICA, San José

Faro del Caribe, Lighthouse of the
Caribbean, TIFC was established in
1948 as the second missionary radio station
of the world. It broadcasts on 6037/
9645, 12:00-19:00, 22:00-04:00, EE being
03:00-04:00, the rest SS. The address
is Federico Picado, Manager, TIFC, Box 2710,
San José, Costa Rica. (Sorry but I lost
track of who sent this to me - ed.)

CANADA, Montreal

NEWSROOM SALUTE

We think we had better take this opportunity while we still have plenty of space left, to wish the retiring Log Report Editor, Mr. Dan Ferguson, all the best in his future. Dan has done a fantastic job for NASWA, and he will be missed. We also must wish the best to the new editor, Mr. Jerry Berg, who will need the support of all of you in order to make the column the outstanding one it has been. (ACM, HM)

CZECHOSLOVAKIA, Prague

Here is a list of abbreviations that have been used in LR in the past, and which I expect to continue using:

- AA-Arabic
- CC-Chinese
- EE-English
- FF-French
- GG-German
- PP-Portuguese
- RR-Russian
- SS-Spanish
- *O100-sign on at 0100
- O100*-sign off at 0100
- //-in parallel
- anmt-announcement
- C&W-country and western
- cmtry-commentary
- comls-commercial
- ECNA-E.Coast No.America
- exc--excellent
- fqy-frequency
- f/in-fade in
- f/out-fade out
- hvy-heavy
- HS-Home Service
- IS-interval signal
- LA-Latin American
- lang-unknown language
- LV-La Voz
- M&W-man and woman
- mx-music
- NA-North America
- nat'l-national
- N:E-news in English
- NF-new frequency
- nx-news
- Pac-Pacific
- prgm-program
- rel-religious
- RM-Radio Moscow
- svc-service
- t/in-tune in
- t/out-tune out
- tlk-talk
- TC-time check
- vy-very
- WCNA-W.Coast No.America
- WS-World Service (BBC)
- wx-weather

it with the same care evidenced by previous editors. I do not anticipate substantial changes in policy or format, but criticisms and suggestions are welcomed.

With this month's bulletin is a sample form which I encourage members to use when reporting. Column preparation is a big job, and this will make it a little easier. Have a heart--please use them. An SASE will bring you a supply.

Member Steve d'Adolf, now back from the Marshall Islands and living next door to yours truly, wants to remind everyone of the get-together at his place on Labor Day. A good time is in store for all those who come. Contact Steve at 16 Westgate Dr. (Apt.201), Woburn, Mass. 01801.

No one likes abbreviations, but they're necessary, so bear with them. If I've missed some above, I'll try to include them in a future bulletin.

ACKNOWLEDGEMENT: Thanks to all the regular contributors and sometimes contributors to this column. Your support is appreciated, especially so, during the summer doldrums. The QRN has been excessively high here in So. Indiana, and DX attempts useless in the low fqys. August will soon be with us and the approach of September should herald the coming of a new DX season. With the dropping Sunspot count this should be a prime low band DX season. Please keep the reports coming, without your help this column would not exist. Call last minute items to 882-3976 after 2200 GMT. Technical and Semi-technical questions in re receivers and etc may be addressed to this column. Just inclose an SASE. Now, off to ANARC Convention, Indy. Vy 73, AL
