

"THE SWBC JOURNAL" OFFICIAL PUBLICATION OF THE

NORTH AMERICAN SHORTWAVE ASSOCIATION

NOVEMBER 1971

VOL. X NO. 11

NASWA HEADQUARTERS

POST OFFICE BOX 989

ALTOONA, PA. 16603 USA.

TEAM WORK IS A MUST!

We have seen clubs come and go over the years. Many begin enthusiastically, usually by young and inexperienced DXers who think the only important factor is the publishing of bulletins on a regular basis. For the most part, editorships are 'handed out' on a 'first come' voluntary setup. Sections are assigned with little or no forethought given except that each section is to deal with a particular phase or subject regarding the hobby. Each of the editors puts into his section that which he wishes, whether it be reports from members, articles copied from magazines or another clubs bulletins or original compositions the editor himself writes. They give of their time and they work diligently. So be it! But where the wrong is done is that each of the editors consider their section the only in the bulletin. Little consideration is given to the wants, the needs or the preferences of the majority of the membership. Such a club/bulletin does not last long, does not serve a useful purpose.

NASWA, via Frendx, has ever efforted to avoid such happenstances. Editorships are appointed and filled by DXers of experience. Each well knows/understands that he is part of a team, that his section is likened to a link in a chain which, combined with other sections, gives our bulletins worth and our club strength. Each is given to know that, on occasion, certain of his section contents may be subject to censure/omission, or that he may be asked to relinquish a number of pages; In such cases these actions are thought to be in the best interest of the club and in compliance with the wants and preferences of the majority of the membership, another part of the team. B.E.

* * * * *

NEW/HELPFUL PUBLICATIONS

Members interested in DXing the utility bands will be pleased to know that a new book will be available Jan. 1, 72. Written by Paul Mayo and Steve Handler, it is the "Utility DXers Handbook" and is to contain over 70 pages of valuable data for both expert and novice ute enthusiasts. Order before Jan. 1st and price is \$2.50 ppd. Order after Jan. 1st and price is \$3.00 ppd. Send orders to Jack White-SPEEDX, 780 N.W. Wallula Ave., Gresham, OR. 97030. (Do not send orders to NASWA Hdqs!!!!!!) *Not a rehash of "Utility Address Book".

Frequency lists and call books published by the International Telecommunications Union in Geneva, Switzerland can now be bought direct from Gilfer Associates, F.O. Box 239, Park Ridge, NJ. 07656. Write them for a complete list and prices of the ITU publications and tell them NASWA sent you. (For our younger members and newer DXers, the ITU is the worldwide treaty registration center for all radio stations and frequencies. Computerized lists of the 100s of 1000s of radio stations are updated quarterly.) Send for list/prices today!

NEW MEMBERS, WELCOME!

James B. Shirey, Fort Wayne, Indiana. Via friend/member Jerry Blake.
 George A. Ray, Delta, B.C., Canada. Via Communications World.
 Merrell Campbell, Kokomo, Indiana. Via PE Communications Handbook.
 Robert Carlsen, Sheffield Lake, Ohio. Via Elementary Electronics.
 Russell A. Lay, Virginia Beach, Va. Via WRTH and Bill Flynn.
 Richard J. Parkes, Kutztown, Penna. Via various magazines.
 Dr. James P. Ronda, Youngstown, Ohio. Via Radio Nederland/DX Jukebox.
 W. Norman Dittmann, Chambersburg, Penna. Via Communications World.
 Mohammad Reza Mohammad-Four, Woodside, New York. Via PE Communications World.

RENEWALS

Second year: Glenn Hinks, Dick Bartos, Larry Schlossman, Jim Roberts, Tom Smith, John Smallshaw, Mark Drogin, Ron Howard, W. Charles Ganscoe. Third year: Warner J. Selby, John Walenter, James Smith, Dan Morisseau, Carroll Patterson, David Williams, Al Drehman. Fourth year: Norm Starr, Whit Cole, Curne Chadwick, Al Friedman.

Fifth year: David Baltimore, Harry Smith, Ken Lyon, Robert Moser. Sixth year: Bill Matthews, Art Glover, Robert Padula, Charles Territo Jr. Seventh year: Marlin Field. Eighth year: August Balbi, Alex T. Primm, Donald Jensen.

(NOTE: Members joining or renewing after 15th of month will be listed next month.)

HELPING HAND SERVICE+

For sale: Drake SW4A receiver, minus spkr. Also SWL7 antenna. Write H. L. Reeder, 3276 Brevard Street, Memphis, Tenn. 38116.
 Wanted: JoyStick antenna + JoyMatch ATU. Must be in excellent condition. Contact Ben Lewis, 449 Pine Street, South Weymouth, Massachusetts 02190.
 Available: Copies of Friendx, Sept.'70 to Aug.'71. 25¢ per copy to cover the postage. Write Dan Romanchik, 24249 Beierman, Warren, Michigan 48091.
 Wanted: Copies of "How to Listen to World" prior to 1969/70. Write Anthony Marks, P.O. Box 521, LaGrande, Oregon 97850.
 For sale: Hammarlund HQ-200 in very good condition complete w/operating manual. I will also include frequency graphs for the SWBC bands. Write Tom Eby, 1235 N. Main Street, Naperville, Illinois 60540.
 For sale: Lafayette HA-600 receiver. Like new. Write Bob Cecala, P.O.Box 17161, Salt Lake City, Utah 84117.
 Wanted: Seventeen year old Tanzanian DXer is interested in pen-pals (prefers YL's). Address is Saidi A. Nauba, c/o Radio Tanzania, P.O.Box 9191, Dar es Salaam, Tanzania.

TIME TO COGITATE

Better start thinking about who you want to nominate for Board of Directors for the 1972-74 term. Also what member you wish to nominate as "Member of the Year". Next months bulletin will contain form(s) to be used for this purpose. All members in good standing are eligible for nomination, all have voting privilege which we urge everyone to exercise. It is of the utmost importance, especially in regard to Board of Directors.

In order to expedite publishing and mailing of this edition, there will be no photo page this month.

A BOUNTIFUL 'THANKSGIVING' TO ALL!!!

OUR TASK

We in the states this month celebrate a day of 'bountiful harvest' which is designated "Thanksgiving". It is a holiday, one filled with pleasure from table full. A day when relatives and friends from afar oft times gather together in a common home to enjoy food and recollect fond memories. It is a good day, one for giving thanks.

We friends in club though, in states or worldwide, should not set aside just one particular day for being thankful. Our blessings are many, our harvest bountiful; Much too numerous for one days thankfulness. Surely the pleasures we find and the friends we make through our club/hobby efforts are worth threefold thanks and more. So let us stop for just a moment, think, and give thanks, count our blessings. We be all the better so doing!

We should join together in heart and mind, no matter the club(s) we belong to or the type(s) of listening we prefer. Let us join together thankfully as common true friends and cast out criticisms and belittlenesses; Let to enter in compliments and commendations. Give to understanding and thankfulness; Find ourselves being recipient of same in return.

We need to learn the worth of being thanked, yet moreso that of giving thanks. Let us help one another, share with one another, give happiness and pleasure to one another through cooperation and sincere friendship. Let us work side by side, each doing our part as best we can, as oft as we can, not for ourselves alone, but for the everyone overall. Let "Unity and Friendship" be our task as few clubs have known but for those of us who are thankful to make it our own.

* * * * *

In behalf of all NASWA officers and the Friendx staff, a most blessed and peaceful holiday this THANKSGIVING 1971.

(Gregg Calkin, Gerry Dexter, Dan Ferguson, Edward Shaw, Bill Matthews, Al Niblack, George Schnabel, Warren Nordgren, Del Hirst, Don Jensen.)

Bill Eddings

#####

Next month is December which means we will have our annual Christmas edition of Friendx. Watch for some special features and extra 'treats'. And why not help us celebrate by sending in a report/etc to one/some section(s)?

NOW IS THE TIME TO KEEP NASWA GOING AND GROWING BY GIVING YOUR SUPPORT !!!!!!!

+ + + + + + + + + + +

A ONE TIME SHOT

1 **WORLD** 1
9 **RADIO** 9
7 **TV** 7
2 **HANDBOOK** 2

The 1972 edition of the World Radio-TV Handbook (WRTH) is sked to be ready for distribution by mid-January '72. List price per copy is \$6.95 ppd. NASWA members wishing to order through the club can save \$1.00 provided they order prior to December 15th. Orders must be received at Hdqs by that date or they cannot/will not be accepted! This offer is being made only once and will not be made again. So if you wish to order a copy(s) of the 1972 WRTH, complete the below order form and send to Hdqs with sufficient money (\$5.95 per copy) in check or money-order form made payable to NASWA. Canadian members must remit by postal money-order only, not by personal check. Mail order so it reaches club Hdqs prior to December 15th...this is very important!

I wish to order _____ copies of the 1972 WRTH at \$5.95 per copy. Enclosed is \$ _____ in check/money-order form (Canadian members remit by Postal money-order only) made payable to NORTH AMERICAN SW ASSN. I understand my copies will be mailed to me direct and postpaid.

Name _____
Address _____
City _____ State/Prov. _____
ZIP Code _____

Again be alert to fact that all orders must be received at Hdqs prior to December 15th or they will not be accepted/filled. Checks/money-orders should be made payable to NORTH AMERICAN SW ASSN. This offer is valied only to members in U.S.A.,Canada,Mexico.

* * * * *

CLUB SUPPLIES AVAILABLE

Club rubber stamps, \$1.50 ppd each. Order from Hdqs.

Club stationary, \$1.50 per 50 sheets ppd. Order from Corresponding Secretary Edward Shaw, 415 North Shore Road, Norfolk, Virginia 23505.

Foreign Language Report Forms, Spanish, French, Portuguese, Indonesian. \$.15 per copy. Order from QSL Editor Gregg Calkin, Calle Rio Blasas 35-702, Colonia Cuauhtemoc, Mexico 5, D.F., Mexico.

CLUB SERVICES AVAILABLE

Have a technical question/problem? Write Al. R. Niblack, 420 Shelby Street, Vincennes, Indiana 47591. Be sure to enclose SASE or mint stamp(s) for reply.

Want tape recordings of certain station IDs or IS? Write Edward Shaw (address above) or see this months Helping Hand Service column.

Want to buy or sell equipment, etc.? Notify Hdqs to put ad in upcoming bulletin.

Need report forms for submitting your loggings to Log Report Editor? Request same from Jerry Berg, 38 Eastern Avenue, Lexington, Mass. 02173. Enclose large size SASE.

Want names/addresses of other NASWA members in your area? Write Ed Shaw (see above for address) or contact club Hdqs. Be sure to enclose SASE.

* * * * *

THE LOUDENBOOMER REPORT

"Charlie," I'M frequently asked by leaders of newly formed DX clubs, "from your vast experience and expertise, can you offer any helpful hints for successful club operation?"

The answer, of course, is "Yes!" And so, I've compiled the following basic rules which, if followed, by the officials of fledgling DX clubs, will guarantee successful operation, rapid growth and long life.

HAVE A GOOD REASON FOR BEING. Don't found a new DX club unless there's a good reason to do so. Some examples of good reasons are: (1) If you don't like existing club A because they insist on printing their bulletin in black ink on white paper. What this hobby needs is a club bulletin in red and green. (2) If there is no internationally-oriented DX club headquartered in Gurney Junction, Vermont. Naturally this need must be met. (3) If you want to be a big wheel president of a club.

STICK TO THE TRIED AND TRUE. The major clubs got where they are today by beeting DXers needs; doing a job and doing it well. Therefore, for a new club the road to success is to slavishly follow the style, coverage and format of one of the large established clubs.

BUT HAVE YOUR OWN UNIQUE ASPECTS. Your club will grow by leaps and bounds when DXers find out that it is the only one (1) whose bulletins are bound in Morocco leather, (2) features a regular column covering harmonic frequencies of Nicaraguan aero beacon stations, (3) has a technical column in Braille (4) offers special member certificates for VAGO (Verifying all Greenville Outlets).

HAVE TOP QUALITY EDITORS. The sub-editors are the key to bulletin quality. But remember that (1) the hobby can be fully learned in less than three years, (2) Anyone can write intelligently, (3) Anyone can type stencils. Therefore it is safe to appoint any person who is sufficiently motivated (that is, hopes his name will be a household word in the DX hobby overnight) and is willing to volunteer for the job. Don't worry about making mistakes in your editorial selections. The editorial turnover will be significant and any duds that slip in will quickly leave of their own accord.

KEEP BULLETIN CONTENTS INTERESTING AND INFORMATIVE. The best way to keep members contributing useful tips and articles is to regularly leave largewhite spaces in the bulletins. These "holes" should be headed with appropriate comments such as "This space reserved for those members who failed to contribute anything this month."

KEEP YOUR FINANCIAL COOL. Money is the root of all evil, so don't give it a second thought in your club planning. Never mind the size of the treasury balance. Base membership fees on one criterion only..50 cents a year lower than those of any other DX club. It is irrelevant that it requires 41 new members monthly to have sufficient funds on hand to publish next month's bulletin.

PUBLISH BULLETINS REGULARLY. Remember that the regular publishing of your club's bulletin is the one critical factor. The bulletin is the glue that keeps your club from coming apart at the seams. Late bulletins and "skipped" months are permissable only when urgent, unavoidable problems intervene. Examples: (1) You get the measles (German measles only) (2) You start going steady with that zoftig cheerleader in Mr. McNerd's second hour algebra class. (3) Your dog eats the hectograph plate in the mistaken belief that it is orange jello.

Follow these precepts and success will follow.

Charlie

The A.N.A.R.C. REPORT

Greetings Fellow-DXers from the Commonwealth of Virginia. Each month I hope to bring NASWA's membership enlightening news concerning the overall hobby of DXing, but with specific emphasis on how ANARC relates to NASWA as an all-SWBC club.

I am convinced that, heretofore, the general membership had only the vaguest conception of ANARC's purpose. Being only a titular organization (basically, a congress of DX hobby clubs), ANARC has several hobby projects in various degrees of activity, all of which are chaired by individual members of the associated clubs, for the purpose of benefiting ALL clubs. This month, I am presenting a list of the ANARC structure for your information. Save this list; tack it on your shack wall, and refer to it when you have questions and suggestions. Don't forget to always send a stamped return envelope if you expect a reply. Best 73, and good DX. Edward SHAW.

BACKGROUND ON RADIO "JAMMING"

"Jamming" is a deliberate effort to prevent a potential radio audience from hearing certain broadcasts. This is usually accomplished by creating man-made interference on the frequency or frequencies carrying the selected program. Occasionally, two radio stations interfere with their own transmissions by inadvertently broadcasting on or near the same frequency. This is not jamming.

Jamming can be produced by superimposing a disruptive voice or music program on a frequency being used by another broadcaster. A transmitter designed specifically to broadcast noise can also be the jamming source.

All broadcasts can be jammed, whether transmitted on long, medium or short wave. Skywave jamming is accomplished by radiating the signal of powerful transmitters into the ionosphere, and, under proper propagation conditions, reflecting it back to earth a considerable distance from its origin. This jamming technique is used to cover large areas which are predominantly rural. All transmissions also have a groundwave component, and any signal received by skywave at a distant point is also being received in the vicinity of the signal source by groundwave. In large cities, several low-power transmitters can be used in this manner to disrupt the reception of tens of thousands of listeners by jamming the incoming signal. By combining skywave and groundwave propagation, governments engaged in a jamming effort attempt to blot out reception throughout an entire country.

In 1934, jamming was employed by the Dollfuss Government to prevent Austrian listeners from hearing of Nazi attacks. Jamming spread and developed rapidly as international tensions mounted before World War II. During the war, the Nazis used jamming on an extensive scale for the first time. Italy, and to a lesser extent Japan, also practiced jamming. The USSR jammed broadcasts from Germany in Russian, and France jammed French language broadcasts from Germany.

With the advent of peace, jamming continued. In 1946, Spain and the Soviet Union began jamming broadcasts beamed by each country to the other.

In February 1948, the USSR began to jam the Voice of America (and other Western) broadcasts to the Soviet Union. Most of the USSR satellite countries joined in this effort in 1950. Early in the 1950's East Germany began jamming the German language broadcasts of the Radio in the American Sector, (RIAS), the USIA-operated station in West Berlin. Communist China began jamming VOA's Chinese language broadcasts in 1956. In 1962, Cuba started a limited effort to jam VOA Spanish programs. At present, some jamming is in evidence against VOA Arabic broadcasts reaching the United Arab Republic.

It is impossible to estimate the number of jamming transmitters used by the Chinese, but the number has increased steadily over the past several years. It has now reached the point where it is extremely difficult to hear VOA Chinese programs on the mainland of China.

Estimates of the number of Soviet jamming transmitters vary. It is believed, however, that during the height of the Soviet jamming effort in early 1963, there were some 2,000 transmitters at several hundred sites both in the USSR and in Eastern Europe. In dollars the installation of such a network would cost about \$250 million with about \$185 million spent annually operating it.

No single, magical solution to nullify the effectiveness of jamming has been found.

BACKGROUND ON RADIO "JAMMING"
(continued)

One technique tried by VOA engineers has been the use of certain electronic devices, such as heterodyne filters, speech clippers and exalted carrier-type receivers. High-power transmitters, more difficult to jam, have been built. The transmission of the same program simultaneously from various VOA relay stations located at different geographical points and on many different frequencies has made jamming more difficult. This technique is called saturation broadcasting and is often effective in penetrating large metropolitan areas. The VOA uses this means in an effort to penetrate jamming of Chinese broadcasts by massing 18 transmitters from different locations one hour each day.

The U.S. Government shares with the great majority of the nations of the world the position that intentional interference to radio transmissions is a violation of the International Telecommunications Convention. It has supported the resolutions against jamming which have been included in all major international telecommunication conventions during the past several decades. Typical of such international agreements, is Article 48, passed at the ITU Convention in 1965, held at Montreux, which states:

"All stations, whatever their purpose, must be established and operated in such a manner as not to result in harmful interference to the radio services or communications of other Members or Associate Members."

After the USSR's jamming effort and that of other communist nations has continued and increased, the issue came before the United Nations. In December 1950, the General Assembly adopted Resolution 424 (v) which "condemns measures of this nature (jamming) as a denial of the right of all persons to be fully informed concerning news, opinions, and ideas regardless of frontiers." This resolution was supported by the United States.

Over the years, and in various public forums, such as UN debates, radio and TV interviews and in publications, Soviet leaders have attempted to justify their attempts to seal off the USSR from foreign broadcast information. They have referred to their sovereignty over the "ether" in their country and their "right and duty" to protect their people from "radio aggressions".

In November 1949, for example, the USSR delegate to the UN, told the British delegate that the reason for jamming was that the British broadcasts were full of untruths about his country and that the Soviet Government was afraid the Russian people would react so violently that cooperation between the two countries would suffer. This remark was the first open admission of jamming by a Russian.

Former Premier Khrushchev followed the same line during a U.S. television interview when he said: "If the Voice of America does become the voice of America--because we respect the American people--it will not be jammed in our country; but when it is not the voice of America--but a sort of wailing-over-radio, supposedly the voice of America --in that case, we want to avoid our people getting the wrong view of the American people." During his visit to the U.S. in 1959, Khrushchev stated: "We jam the voice with which some of you want to speak to our people. If the voice with which you want to speak to our people will be a friendly voice, we will not jam it. As head of the working class, I will protect workers from capitalist propaganda."

In December 1958, when the UN Special Political Committee was debating a resolution calling upon UN members to take practical steps toward friendly cooperation in the fields of economy, culture, science, technology and communications, the U.S. delegate appealed to the Soviet Union to end jamming of foreign radio broadcasts, as one way of removing barriers to friendly cooperation with the West. The Soviet delegate replied: "Moscow has atomic bombs to reply to aggression, and jamming transmitters to handle subversive broadcasts beamed to Moscow."

In 1956 Poland became the first East European country to stop jamming western broadcasts, in the wake of the uprising in Hungary. One of the first targets of the

BACKGROUND ON RADIO "JAMMING"
(continued)

Hungarian Freedom Fighters had been the hated jamming stations, which they proceeded to destroy. In neighboring Poland, the Gomulka regime, seeking to placate the population to prevent a similar uprising there, made a number of concessions, among them the cessation of jamming.

The Soviet Union unexpectedly stopped jamming VOA's broadcasts in the Armenian, Estonian, Georgian, Latvian, Lithuanian, Polish, Russian and Ukrainian languages on June 19, 1963. Quickly following suit, Romania stopped jamming VOA Romanian on July 29, 1963; Hungary, Hungarian on February 1, 1964; and Czechoslovakia, Czech and Slovak on April 1, 1964. Bulgaria has continued to jam VOA Bulgarian.

Shortly after the Soviets ceased jamming, VOA took its megawatt long wave transmitter at Munich out of service. This facility, on the air since 1953, had provided excellent coverage of Eastern Europe and the western parts of the Soviet Union. Since Radio Moscow also used the same frequency (173 kHz), it was decided to eliminate whatever unintentional interference occurred as a result of VOA's usage of this powerful transmitter. Without jamming, the need for a long wave facility was diminished.

The Soviet Union, however, resumed jamming of the Voice of America broadcasts in Armenian, Georgian, Russian and Ukrainian (and other western broadcasts) within hours of their invasion of Czechoslovakia in August 1968. After a year of futile diplomatic efforts to persuade the USSR to stop the jamming, which now affected all VOA programs in Russian, the megawatt was put back into service to try to recoup some of the lost coverage. Although VOA's use of 173 kHz may be causing some interference to Radio Moscow's use of the same frequency in the East European countries, there are many other frequencies carrying the same program that are clear and available to Soviet radio listeners.

Since the reactivation of the megawatt transmitter, the United States Government again (in July 1970) proposed negotiations for termination of broadcast jamming to the Soviet Government and stated that it is ready to close down 173. The Soviets rejected the proposal, insisting that "jamming" is an "internal matter." The United States is holding open its offer to discuss the matter, in its search to remove obstacles to the free flow of information.

Meanwhile, VOA is continuing to rely on the saturation broadcasting technique initiated in 1969. For one hour of the Russian broadcasts each day, 27 transmitters beam the same program to the Soviet Union. During this time, the listener in populated areas within the USSR can usually receive one to three frequencies and probably more frequencies in rural areas. And even at regular hours, it is impossible for the jammers to blot out all the signals, in all parts of that vast expanse of territory. Somewhere, each day and each night, people can and do listen to VOA and other free-world broadcasts in Russian, Armenian, Georgian, Ukrainian, etc. And because of the very evident attempts of the regime to interdict its free entry, the information is valued all the more.

In this sense, Soviet and similar jamming efforts have been selfdefeating.

* * *

This article is reprinted through the permission granted by the Voice of America, for which we are most grateful. Special thanks to Hoyt Prisock for submission to the Short Wave Center.

The preceding article shows the build up of jamming in the Cold War years following the Second World War. Since all listeners are plagued by this interference at one time or another, it was felt that the article warranted sufficient space to be presented in its entirety. The attitude taken by the Voice of America is well explained and should be of interest to DXers everywhere. Views expressed are those of the Voice of America.

A CENTER FED DIPOLE YOU CAN BUILD

Edward J. Insinger

Radio Nederland has a booklet in circulation that deals with various shortwave antennas. It is appropriately entitled "A Lot Depends on Your Aerial." Neither the booklet nor the title should be overlooked! One type of antenna covered in the booklet is the single dipole, or as I have called it here, the center-fed dipole. As the name suggests, the aerial consists of two equal lengths of antenna that are separated by an insulator at the center point. Here it gets "fed" into the receiver by a lead in or feeder line. So we can now visualize two equal sections of antenna separated at the center by an insulator, where a feeder line joins the two halves together and carries the signal on into the receiver. At this time, it becomes essential that we know what materials one can use in constructing such an antenna so as to gain optimum performance and be sure the setup will withstand the forces of nature.

The two equal lengths of antenna are going to be suspended between two supports at a distance of one hundred feet. (Or less, depending on which frequencies you use most often. I chose a length of one hundred feet because it offers good coverage over the entire shortwave spectrum. Of course, you must realize it is more sensitive to certain wavelengths than others: e.g. 31 meters brings in more signal strength than 13 meters. However, since it is nearly impossible to erect an antenna for each wavelength, one must compromise and choose a more generalized length which can be adapted to one's needs.) This means that the material used must be sufficiently strong to withstand the span, while being equally effective in picking up weak signals. For these conditions, I chose copper-clad steel wire, commercially available by the name Copperweld. This material has all the advantages of copper with the added plus of being infinitely stronger. An excellent combination for our purpose here! These characteristics are accomplished by creating a wire with an inner layer of steel over which a coating of copper is secured. This combination does not effect the conductance of the material because the signal -- consisting of a group of electrons -- travels along the surface of the wire only. It doesn't matter what material is below the copper conductor. So an inner layer of steel is used, affording excellent strength characteristics not present in a piece of solid copper wire. The copper-clad steel is also much stronger than hard-drawn copper. The diameter of wire used depends on local availability and the degree of concealment desired. My choice was #12, although a smaller diameter can be used equally well.

The Copperweld sections for the dipole now must be erected as high as possible above ground level (many books suggest 30 feet or more). Equally important is their being properly insulated from nearby obstructions which will drain off important signal strength. Here I used the well-known glazed porcelain insulator. This device is made of a material that will not absorb moisture. Also available are glass insulators that will work very well. The center fed dipole utilizes an insulator at each end and one at the center point. (I used the same type for the center). In effect, these insulators insure that the high RF potential existing on the antenna will be fed into the lead-in to the greatest possible degree and not lost because of leakage from a nearby object such as a tree branch. A branch touching the bare wire will lower the effective signal strength of the incoming signal by allowing it to pass off to a ground instead of passing through the lead in. Note on securing copperweld to a porcelain insulator: Before inserting the end of the antenna wire into the hole of an insulator, clean about 6 inches of the copperweld with emery cloth or a knife. Then tin the entire cleaned portion of wire. Now place it through the insulator eye and secure it by twisting the end over the long piece of copperweld. Now solder the two together easily -- your skin oils will not affect the solder and cause a poor fusion. The tinning also acts as an early "bond" or "flow" thus making it easy to now apply more solder.

To secure the antenna to a suitable stable object requires some type of rope which will support the antenna above the ground. It should be remembered that a good quality material be chosen. One such type readily available is $\frac{1}{4}$ inch polypropylene rope. Besides possessing excellent weathering characteristics, it has good tensile strength

A CENTER FED DIPOLE YOU CAN BUILD
(continued)

to withstand wear and tear. When securing this type of plastic rope to the insulators, it is important to tie tight knots and tape the remaining ends with all-weather vinyl tape, so they will not slip or loosen.

I chose two trees as supports for my antenna. Trees make excellent anchoring devices, offering perfect heights to suspend the antenna. But one important consideration should not be overlooked. You must compensate for wind movement, ice and snow storms. An antenna's chances of surviving even the most brutal storms and winds are enhanced by utilizing a pulley and counterweight system. Besides allowing for the lowering of a wire antenna, pulleys remove extreme tension present when antennas are supported by trees. The tension is relieved by fastening a counterweight at the end of one halyard. The weight, which may be made up of metal or a galvanized pail filled with sand or stone, should be adjusted experimentally for best results under existing conditions. The pulleys best suitable are good quality four inch clothesline pulleys made of plastic or alloys which will not corrode readily. Since they are designed to carry at least 50 feet of line loaded with wet clothing in stiff winds, they should be adequate for normal spans of 100 to 150 feet between stable supports. One such pulley has a 4-inch diameter plastic wheel with a $\frac{1}{2}$ -inch shaft in bronze bearings. The sheath is of cast corrosion-proof alloy. (For further rigidity and longer wear, the ends of the shaft should be coated liberally with epoxy glue. This prevents the shaft from turning inside the drilled sheath hole and thus eventually shearing the ends of the shaft off under considerable strain as occurs during heavy winds.

All that remains now is to connect the dipole to the receiver using a feeder line that will carry the incoming signal to the receiver with the least amount of energy loss. For these requirements, I chose low loss foam twin-lead. This type of twin lead has the two parallel conductors separated and wrapped in a foam material before the entire contents are sealed in a plastic jacket. Now this twin lead has an impedance of 300 ohms to 75 ohms, for a proper matchup. Besides being a "low loss" feeder line, the twin lead was easily adapted to a standard TV lightning arrestor. This provides protection for the receiver while also draining off static discharges that collect on the antenna. Any excess twin lead between the antenna and receiver should be cut off. (But remember to leave some extra twin lead outdoors to allow for movement of the antenna during wind and storms). And be sure to use standoffs to secure the twin lead from foreign objects. Keep the twin lead and antenna away from power lines! This will affect performance and be a safety hazard.

You should now be ready to test the efficiency of your dipole, by tuning across each band and noting its response. I immediately encountered a hyperactive S-meter and very low atmospheric noise. These two factors will give you the potential of real fine DX!!!

DEUTSCHLANDFUNK

The Federal Republic of Germany's youngest broadcasting station, the Deutschlandfunk, is also its smallest. What it lacks in size, however, it makes up for with its wide range of foreign-language broadcasts that can be heard throughout Europe and through its unique aim of reaching into the "inner-German reality" by giving a comprehensive and balanced picture of Germany--both East and West--to its German and non-German listeners, who are mainly outside the Federal Republic.

Deutschlandfunk (DLF) was called into existence by a law passed in 1960 (as was Deutsche Welle) dealing with overseas broadcasts.

The station first started broadcasting on January 1, 1962. It now employs about 600 people and is currently based in one-time private houses and rented new buildings in Marienburg, an affluent suburb in the south of Cologne. It transmits German-language programmes day and night without break on five wavelengths

DEUTSCHLANDFUNK
(continued)

and a further six and a quarter hours a day in 14 European languages.

Not only its range but also its content differs from that of the normal home stations. DLF does not aim at minorities at home and does not provide children's, women's or schools' broadcasts. While the home stations have the twin function of catering to the needs of all minorities if possible and giving priority to the educational and entertainment demands by the mass of the population, Deutschlandfunk only takes account of what is important in providing a comprehensive picture of German. This principle demands a high degree of quality, political responsibility and objectivity. This is what gives DLF a special appeal despite the lack of its own drama department or orchestra.

Another attraction is the hourly news service (altogether there are 29 news broadcasts on a weekday) followed by reports of breakdowns and conditions on trunk roads. The foreign-language editorial staffs--teams composed of both German-speakers and natives from the country broadcast to--always attempt to adapt to the interests and mentality of their listeners.

Deutschlandfunk is currently airing transmissions on shortwave to Italy via the Deutsche Welle's transmitters on 7130 from 1725 to 1755 GMT.

AUSTRIA CALLING ON SHORT WAVE

Have YOU done your part in the fight to save the Short Wave Service of the Austrian Radio? If not, WRITE TODAY to the Austrian Embassy and voice your concern over the SWF service of the ORF ending. The address.....

AUSTRIAN EMBASSY
2343 Massachusetts Avenue, N. W.
Washington D. C. 20008

YOUR CONCERN and YOUR LETTER may just help convince the Austrian Government to maintain the Short Wave Service. WRITE!!!!!! WRITE!!!!!! and WRITE!!!!!!
This is your chance to save one of Europe's better shortwave stations.

The December issue of the Short Wave Center will have a long article dealing with the Austrian Radio - be sure to look for it. In addition, this article will have something "extra" - this holiday special will be with you NEXT month in FRENDX!

Something a bit unusual for FRENDX...the story of a British pirate broadcasting on Short Wave. The station ended transmission on June 13, 1971, and a British DXer, Mr. A. E. Martin passed on this information to the SWC. So, off we go to the days of Channel Radio....

Channel Radio was formed in May 1970, when Roger Lane, a radio and sound engineer and Eddie Austin, a local Disc-Jockey, came up with the idea to form the station. Until this time no inshore pirate station had operated in the South-East Kent area.

The original transmissions were on short wave (6.22 MHz) in the European 49m broadcast band. The Station name was Radio Channel. Few acknowledgments were received, so it was decided that the transmitter should be overhauled and modified. In November, 1970, plans were made to operate the station on 240 metres, medium wave, under the name of Radio 240. Meanwhile, programmes went out on shortwave advertising the proposed broadcasts. During the reign of Radio 240 the station was joined by D.J. Steve England, a

CHANNEL RADIO
(continued)

well known East Kent D.J. who proposed a totally new format, and that the station should be re-named Channel Radio. January 31st, 1971, saw the first Channel Radio broadcast on both medium and shortwave. Andy Archer joined in on the day's broadcast, along with Roger, Steve and Eddie. Reception was reported first class on medium wave up to 20 miles and on shortwave reports were received from Holland, Denmark, Germany, Ireland and all over the United Kingdom.

Ex RNI D.J. Andy-Archer ran the day's transmissions alongside the original three. Local press aroused interest in Dover, and local firms sought advertising at the rate of 2 pounds (\$4.80) per minute, all revenue was donated to a local charity. Operating from a different location each time, Channel Radio continued transmitting every two weeks, on Sunday's for 4 hours. May 16th, 1971 saw the final medium wave transmissions.

On June 13th the final broadcast was made on Shortwave, in order to thank the many regular DX'ers for their support over the past year.

Medium Wave transmissions were carried out on 200.9 metres (1496 Khz)

Using a Collins T.C.S. 15 transmitter.

D.C. input...20 watts. E.R.P...15 watts into end fed $\frac{1}{4}$ wave aerial

Short Wave transmissions were carried out on 6.225 Mhz or 6.240 Mhz, depending on band conditons, using a modified 'type 19' set, TX.

D.C. input 18 watts. E.R.P. 14 watts into $\frac{1}{2}$ wave center loaded dipole.

During the short life of the station, our determination to present programmes of an individual and original format, have made the station's character well respected and well loved by the majority of our listeners even if sometimes we have upset a few people with our independent style. Every effort has been made to ensure that transmissions have been of a reasonably high standard, even though this has sometimes meant setting up equipment and rigging aerials in the early hours of the morning in the depths of winter.

So, the saga of Channel Radio ends. A most interesting and unusual chapter in short wave radio.

A. E. Martin, NASWA Member

NASWA REVIEWS THE HAMMARLUND HQ-200 RECEIVER

Hammarlund's HQ-200 Receiver basically follows the Hammarlund concept down through the years, ie, sturdy construction with quality parts, mounted on a heavy chassis and diecast aluminum front panel. With today's trend toward miniaturization the Hammarlund HQ-200 Receiver is somewhat smaller than some of its predecessors, measuring 17" wide, 9" high, and 9 1/8" deep. It is finished in conventional Hammarlund communication colors of black and gray.

While physical appearance has little to do with actual performance, the receiver is pleasing to the eye, and one's thoughts are, "Oh, what a pretty receiver," upon unpacking it. It weighs in at around 26 pounds shipping weight. Early production line runs of this model were all conventional tube jobs; however, later models became hybrids, with some solid state components being incorporated; namely in the AM Detector Stage, the Voltage Regulator Stage, Rectifier Stage, and Noise Limiter Stage.

The HQ-200 is a general coverage receiver covering from 540 kcs to 30000 kcs in four bands with no "gaps" in the tuning. The antenna input impedance is broad-band accepting any load between 50-600 ohms, though 100 ohms is the normal input match. In other words, the matching is not sticky, most any type of aerial will give a good response.

The HQ-200 has an Antenna Trimmer that compensates for loading effects of various types of antennas; either balanced or unbalanced transmission line. Included in the flexible operating arrangement is a BFO with provisions for SSB tuning, either upper or lower selectable sideband. A noise limiter provides limiting action. A well calibrated S Meter calibrated to 60 DB over S9 is conveniently mounted.

Main Tuning and Bandspeed ratios are satisfactory for optimum ease of operation, with

THE HAMMARLUND HQ-200 RECEIVER
(continued)

Hammarlund's always adequate broad tuning Bandsread much in evidence. Included are a Q Multiplier for variable selectivity; an AVC-MANUAL Switch; and OFF-AM-SEND-CW/SSB Switch. An RF Gain control is included. Hammarlund rates the audio output as 1.0 watt Undistorted.

The HQ-200 is a single conversion superhetrodyne receiver with two IF Amplifier stages, an RF Stage, and two Audio Stages. Plenty of signal gain there, in this lineup, though it is not quoted in sequence. As to operating specs, the receiver measures up quite well in the necessary three "S" category (Sensitivity, Selectivity, Stability).

Sensitivity-wise, the ability of a receiver to hear a signal, is no problem for the HQ-200. Attached to a 30' outdoors long wire antenna, all bands exhibit high and even sensitivity with no dead spots anywhere evident in the tuning range; Hammarlund includes a Performance Data Sheet with each HQ-200 and the performance figures as quoted for this particular receiver (one picked at random) shows an AM sensitivity of .58 microvolts at 600 kcs; at 4000 kcs, .30 microvolts; at 10000 kcs, .32 microvolts; and at 30000 kcs, .88 microvolts. And, your reviewer can believe these figures as on the air checks substantiate the quotes.

Stability is good for when the HQ-200 has had a warm up period of 30 minutes and zero beat with WWV on 10 megacycles it will cling to the marker without annoying retuning at intervals.

Selectivity, the ability to hear the wanted signal and reject all others, is good; one position for high quality broadcast; and a continuously variable Q Multiplier variable from 3 kcs to 100 cycles handles the duties of variable selectivity; it will be noted that the Q Multiplier is of the peaking type; upon peaking the control on the desired signal of the two, that the undesired signal will fall out of the passband of the receiver.

The Q Multiplier (as do all Q Multipliers) provides excellent on the "nose" selectivity; however it does not have steep sideband selectivity (this is normal with all Q Multipliers) and your reviewer judges the selectivity of the HQ-200 as reasonably adequate. It is not as excellent as a receiver with double conversion, and a T Notch. Speaking of double conversion, as stated before in this article, the HQ-200 is single conversion. Being single conversion, it is heir to repeat points. This is a necessary evil of all single conversion receivers. Due to a good RF stage before the first detector stage in the HQ-200, repeats are at a minimum and reasonably well suppressed. They are not annoying.

We come now to calibration; Hammarlund has evidently spent some labor time and money on the receiver for alignment. We found the calibration to be quite close on the AM broadcast band. And, checks across the shortwave bands proved the calibration good with 100 kc check points being nearly on the multiples, quite satisfactory. Of course, it is not frequency meter calibration and should not be taken or quoted as such. Hammarlund has not changed its method of direct drive for the main and bandsread tuning and still uses its famous combination "pinch-cluth" drive, which makes for positive drive action and ease and accuracy of resetability. More manufacturers should follow this method and get away from "string" drives. String drives are an odious practice, of value to no one. About the only place your reviewer can fault the HQ-200 is the placing of the phone jack on the rear panel. This is an unhandy spot and we can't award any orchids to the design engineer that so willed it. But its a minor thing really, a thing of little consequence. The phone jack is there. A vote of confidence should go to Hammarlund for including such a complete Description and Operating Book as goes with the HQ-200. In it there is a little bit for everybody, the ham operator, the DXer, the casual listener. The book even illustrates the drawing of a calibration chart for the receiver. Following it, one can make charts for all bands. The HQ-200 exhibits the audio response that is characteristic of all Hammarlund receivers, plenty of audio wallop, clean and crisp. The receiver is now selling for a price around \$ 345 and it invites comparison!

QSL REPORT

Verification
Info-Facts-Data

Deadline 15th of the Month

Gregg A. Calkin-Editor, Calle Rio Balsas 35-702, Colonia Cuauhtemoc, Mexico 5, D.F. Mex.

As you will recall, the September QSL REPORT did not appear as the stencils were lost in the mails between Mexico City and Altoona. For this reason, QSLs RECEIVED has been expanded this month to include the major QSLs received during August. We think you will find the listing of interest as many rare QSLs have been obtained.

- ALBANIA: Radio Tirana, 7300, b/w folder card in 2 months for 1-IRC (Hailpern)
- ALGERIA: Radio Algiers (RTA), 96.5, card and rpt forms in 2 months (Field) black/gold card for test tx in 2 months seamail. 9660 kHz (Rosen)
- ANGOLA: Radio Clube do Cuanza Sul, letter, card and the return of my tape re-recorded with Angolan folk music. 1 1/2 months after card of transmitter bldg rcvd (Berg)
Radio Clube do Huambo, 3345, nice card w/multi-lingual acknowledgement. 4 wks air for English report w/3 IRCs (Radula)
Radio Clube do Loxico, 5075, personal letter in Portuguese from Ivo Miranda Ferreira, who advises new 5 kw tx just installed and requests further reports. Also sent nice selection of mint Angolan stamps. 4 weeks air for Port. rpt w/3 IRCs (Radula)
Radio Ecclesia, 7215, letter verie in Port. plus sked from Inocencio Augusto Ferreira in 2 weeks. Seems friendly, no explanation for their years os silence (Dexter)
- ARGENTINA: LOL/Observatorio Naval, 5000, replied with friendly English/Spanish QSL folder in 4 months seamail for a report in English and 3 IRCs. V/S: Jefe del Observatorio Naval (Calkin) 15000, folder in 2 weeks air. 2 IRCs (Insinger) 2 mos (Dexter)
LBA9 time signal, Flanta General, rancheco, verified w/Spanish letter for Spanish rpt w/2 IRCs. 1 month for 6167.5 saying mine was 1st rpt from USA (Sizer)
Radio Nacional Mendoza, 6100, letter and stamps from Carlos O. Regnolo, Director, in 4 months. Rpted to Mendoza. Reply by air using my BASE (Field)
- ARUBA: BEC, 15105, Thames card in 27 days w/sked. 1 IRC sent (Schultz)
- AUSTRALIA: Radio Australia, 9500, Darwin aerial card in 27 days for 3 IRCs (Flum) 11765, card in 30 days (Roseliep) cards for Darwin/17715 and Shepparton/17795; 3 months sea (Sizer)
VL19, Melbourne, 9680, ALC map card in 39 days airmail. (Laufman) 72 days w/full verification (Hardester)
VLW9, Perth, card in 29 days air for 3 IRCs (Schultz)
- AUSTRIA: ORF, 6155, lake scene card, sked and rpt form in 7 wks air. (Iroll) 6155/9770, card air in 5 wks (Ricchezza)
- AZERBAIDJAN SSR: Radio Baku, 6110, paper QSL with English veri stmt and p/card of Baku; 4 months by registered mail; direct (Behr)
- BELGIUM: ORF4, 9550, map card in 33 days. No IRCs. Also sked and full verie (Laufman)
- BOLIVIA: Emisoras Rio Aji, Siglo XX, 5900, nominal 5955, now on 5901.5, sent 2-page letter in Spanish for report in same from Padre Ivo Lescouzeres, Director General. Full, highly specific verie, all details, admitting frequency discrepancy and drift. Tennant separately; 39 days air. ADDA: Casilla 404, Oruro (wood) letter in 2 wks (Field)
- BOTSWANA: Radio Botswana, card in 1 month for English report and 2 IRCs (Isen)
- BOUGAI VILL IS: VL9BA, 3221.5, folder QSL in 1 month air for 3 IRCs (Shaw)
- BRAZIL: Radio America, 11054, letter and 2 p/p/cards in 3 weeks after f/up (Dexter)

BRAZIL: Radio Clube do Para, 4865, letter and Brazilian stamps in 3 weeks air from V/S: Dr. F. Troecça. Frequency/date given. (Shaw)

Radio Timbira, 4975, letter, 2 years, mint stamps. Reply by registered air-mail in English from V/S: Dr. Joao Ferreira, International Correspondent (Sparks)

BRITISH HOURLAS: Radio Belize, 3300, map card in 31 months and 11 days after f/up w/mint stamps. Signed by the Chief Broadcasting Officer who says station is no longer on SWBC (Richalenka)

BRUNAI: Radio Brunei, 7215, Mosque/map of Borneo card in 21 days (Petersky) 4-color card plus sked from the C.S.; air in 22 days for 3 IRCs (Calkin)

BURMA: BBS, Rangoon, 5040, formal letter in 8 years after countless f/ups. Complete details and reply came via the Burmese Embassy in Washington (Shaw)

BYELORUSSIA USSR: Radio Moscow, Orsha, 9750, card by air w/full data (Schultz) Minsk, 15150, card in 3 weeks (Behr) Minsk, 15150, card via AM in 1 month (Kamp)

CAMBODIA: Radiodiffusion Nationale l'hmère, Phnom Penh, verified in 3 weeks with French letter from Im Saroeun, of the Ministry of Communications. Rpted in French for 6092, and enclosed U.S. \$1. Asks for more rpts (Sizer) I don't wonder (Ld.) letter in 17 days from same V/S for 3 IRCs (Matsuura)

CANADA: Radio Canada Int, special card commemorating the opening of new xmtrs (Glasberg) CBC Northern See, 15190, Eskimo sculpture card in 32 days (Carlson)

CHU Time Signal, Ottawa, 3330, card from National Research Council in 2 weeks (Glasberg) 14670, blue/white card in 8 days. 3 IRCs (Carlson) hardt)

CFCX, Montreal, 6005, card w/date/freq. only. 150 days for mint stamp (Leon-

CPRX, Toronto, 6070, City Halls card in 2 weeks from Clive Eastwood (Field)

CAPAL ZONE: RBA, form letter, direct from Balboa for time signal on 17697.5 (Sparks)

CANARY IS: RAL, 15365, b/w antenna card from Madrid. 1 IRC. 33 days (Carlson) full data letter written on reverse of RAL sked, indicating site, and enclosing pennant. 2 wks air (Kroll) 44 days for 2 IRCs (Kaufman)

CENTRAL AF. REE: Radio Bangui, 5055, OCORA card in 3 wks after f/up (Behr) 5038, after 4 reports reply received in 10 days. Form letter with full data. 3 IRCs (Ferry)

CHILE: L/V de Chile, CB969, 9690, large "Gracias" card w/white map/mike pennant. 36 days air for English rpt w/mint stamps (Zabransky)

Radio Presidente Balmaceda, card in 4 months air for 2 IRCs (Ricchezza)

CHINA: Radio Peking, 15060, color festival card, sked and letter; air (Rosen) 15435, card w/date and frequency in 46 days air (Hardester) thank-you letter and p/card w/out data (Kelleher) post cards and propaganda magazines in 2½ months, plus Lao's red Book u/sprte cover (Blossom) 15060, Yen'an p/p/card w/full details and confirmation stmtnt and request for more rpts, plus long extremely friendly personal letter. 6 wks air after about 20 tries in a decade. Ping-pong, anyone? (Lagne) card w/freq and date given in 96 days airmail (Watman)

CLAUDESTINE: Voice of the Funk, 10090, replied by friendly letter in French from the Bureau d'Information près le Bureau Politique du Comité Central du Front Uni National du Kampuchea in Peking. By air, for taped report in French, and included sked (Calkin)

Radio España Independiente, 12140, replied w/attractive card featuring Picasso drawing and full data verie on reverse, in English. Reported to Box 359, Prague 1, in Spanish w/2 IRCs. Reply posted in Paris 96, undoubtedly from their editorial offices, and it arrived in 4 months seamail. (Calkin)

Channel Radio, 6240, card in 14 days from ADER: 97 Oswalk Rd, Dover, Kent. Channel Radio was formed in May/70 and original xmsns were on 6220 and subsequently on 6240. SW channel has 18 watt power input and an LRF of 14 watts into ½ wave center loaded dipole. Final BC on SW on June 13/71. (Martin) recently reported active again, in SCDX, I believe (Ld.)

COLOMBIA: Em. Nueva Granada, 6160, letter and pennant in 1 week air. (Pyatt)

Radio Continental, Bogota, 6125, personal letter from V/S: Carlos Martinez R., Director, who expressed interest in reception of station at such a distance. Air in 2 weeks for rpt in Spanish w/US \$1. (Fadula)

Radio Nacional, 6030, card w/date only. 43 days airmail for MS (Leonhardt)

COLOMBIA: Radio Santa Fé, 4965, plantation card confirms report - no data, w/pennant in 10 weeks for Mint Stamps (Hilly)

Radio Vision, 6105, letter confirming statement, w/date. V/S: Maria Elena Vasquez U. Air in 16 days and said stamps were enclosed, but none were (Wood) 3 wks air for Spanish rpt w/3 IRCs. Sent Colombian stamps (Padula)

L/V Del Tolima, Ibaque, 6040, personal letter from Carlos J. Rojas Castro, who also sent a banknote (un peso oro - whats that worth?) plus QSL folder. Air in 3 weeks for rpt in Spanish w/US one dollar bill (Padula) 1 Col. Peso = approx .05 US (Ed)

Transmisora Caldas, letter and pennant in 1 month for 5020, reported in Spanish (Glasberg)

CONGO (DEM REP): R C/kinshasa, 15245, regular "QSL out of stock" letter in French for French rpt. /s: V. Mikuna. 67 days (Hilly) 15245, 6 weeks for 3 IRCs (Hailpern)

Radio Bukavu, letter in French w/Veri statement, no details, in 7½ months after 1st registered rpt w/mint stamps and 1 month after f/up. Note ADDR is B.P. 2220, different from WRTVM. V/S: Saewezi G., Le Directeur Provincial-Chef du Service de l'information (Berg)

CONGO REPUBLIC: ORTF, Brazzaville, 15190, card and sked in 56 days air. 3 IRCs (Schultz)

COSTA RICA: TIFC, 9645, card w/full data plus p/p/card, sked and travel lit. Temporarily out of pennants. 3 weeks air for 2 IRCs (Kroll) 23 days (Schultz)

CUBA: RMC, 9655, colorful card, form letter in 6 months air (Hilly) 9525, globe card, Castro lit and red/white/blue pennant, w/skeds in 315 days air. (Kroll)

CYPRUS: BBC, 11955, World Radio Club DX Award cert. 3 weeks; no return postage (d'Adolf)

CZECHOSLOVAKIA: Radio Prague, 7345, plain card in 29 days (Flum) 11990, color card of buildings stamped "35 years of Foreign Broadcasting". Air in 7 weeks (Banta)

DENMARK: Voice of Denmark, Copenhagen, card and personal letter from Vagn Skovgaard, for 11895. Said my report only one rcvd from Australia for this freq. 12 wks (Padula)

DOMINICAN REPUBLIC: Radio Comercial, 4880, letter w/full data except time in 1 month for NASWA Spanish form and 1-IRC. (Glasberg)

Radio Reloj, 3600, card from Pedro J. Santana, Director, in 3½ months air for SASE (Field) Is this a new station, Marlin? (Ed.)

Radio Libertad, Santiago, 3225, 3 cards for reception in March/71, October/70 and May/69. V/S: Lucia Vanderhorst S. Now admits station transmits in 90 mb. SASE sent, not used (Field)

L/V de las Fuerzas Armadas, 4825, two map cards and pennants after f/up and personal visit to station by out friend César Objio (Behr)

DUBAI: Voice of the Coast, 6040, card airmail from V/S: Abdul Hakim Totah, Advertising Manager; long time coming for rpt in Jan/71 (Padula)

ENGLAND: BBC, 15070, card in 2½ months for 1-IRC (Flum)

VOA/Wooferton, 7200, card lacking time from Anita Milavec in 5 days (Kroll) 17655, card in 9 days from same V/S (Relieher)

ECUADOR: Radio Jesús de Gran Poder, 5070, sent letter, stamps, 4 p/cards, slide of convent and press clipping of station personnel. V/S: P. Francisco H. Fernandez, Dir. SASE sent, not used. 1 week on 2nd try (Field)

Em. Luz y Vida, 4825, long personal letter from Misioneros Sociales de la Iglesia, Padre Julian Lorente L., and Ernesto Jimenez L., Gerente. Full, specific text. States frequency recently stabilized and further drift not expected. 19 days by special delivery air; SASE used w/extra stamp added (Wood)

Radiodif. Paz y Bien, Ambato, 4820, letter giving freq. only from P. Luis Florencia Leon E., Gerente. Says SW off the air recently for some time "debido a la irresponsabilidad del técnico"! Air in 55 days (Wood) See also L/V de Galapagos (Ed)

EQUATORIAL GUINEA: Radio Santa Isabel, 6250, b/w photo card of station w/personal veri on reverse; no data. 11 months seamail for 1970 logging on Kwajalein. Card dated Nov/70, but postmark June/71. Must be a long walk to the post office! (d'Adolf)

FINLAND: Radio Finland, 15105, card, sked in 3 wks (Lyatt) 6 weeks (Banta) 15205, 46 days air (Hardester)

- GABON: LV de la Renovation, 4777, Africa map card in 2 wks (Behr)
- GAMBIA: Radio Gambia, Bathurst, stencilled letter in 4 wks returning my IRCs. (Fadula) 2 weeks air; sked followed (Kroll)
- GALAPAGOS IS: L/V de Galapagos, Ito. Baquerizo, pleasant letter from F. Jorge H. Parvaez, standing in for P. Uria, Director. Padre Parvaez was formerly with Radiodif. Paz y Bien, Ambato; delete him as V/S there. 50 days air (Wood)
- G.D.R. RBI, 9730, p/card QSL w/full data in 73 days seamail. (Kelleher) 2½ mos (Kennedy) 121 days w/photo card (Schultz) 144 days seamail (Hardester)
- Deutschlandsender, 7105, card in 2 months w/all data (Weber)
- RBI, card from Budapest for Radio Budapest's relay of RBI on 6175. Card shows photos of Underground. 10 weeks seamail (Fadula)
- G.F.R. Bayerischer Rundfunk, Munich, '72 Olympic card in 3 weeks for 6085 (Glasberg)
- Deutsche Welle, 8040, 34 days seamail. No IRCs (Kelleher)
- DAN, Elmshorn, 6475.5, letter and brochure on time services from Dr. H. Anslin; 3 months (Dexter)

An excellent month, gentlemen, with 123 countries represented, containing many fine, rare QSLs. Just a reminder here that all reports should arrive at your editor's desk by the 15th of each month if they are to be included. Next month we will again feature our tri-monthly SCOREBOARD, with the spotlight again on ASIA which we missed due to the loss of the September stencils.

Director of Broadcasting,
Ministry of Culture.

B C 17—W 2475—10/67

This month's featured QSL is from Radio Singapore, one of Southeast Asia's voices which is currently well heard on the west coast on their 25 meter band frequency of 11940 kHz around 1200 GMT.

Sincere thanks this month to the following 66 reporters who made this month's Report possible:

- | | | | |
|----------------------|-----------------------|-----------------------|----------------------|
| Steven d'Adolf, Mass | Marlin Field, Mich. | M.R. Leonhardt, Ind | W. J. Flum, N. J. |
| John Banta, N. Y. | Dan Ferguson, W.Va. | Chris Lobdell, Mass | Ed J. Lyatt, N. Y. |
| Ernest Behr, Ontario | Irwin Glasberg, F.C. | Larry Mague, Tenn. | Ed. Ricchezza, Pa. |

| Gerry Dexter, Wisc. | Ed Kusalik, Ontario | Andrew Pappas, Ill. | Dr. Richard Wood, |
| Stephen Dildine, Va. | Mark Konen, Wisc. | Ralph Perry, Ill. | Louisiana |
| Donald Dickey, Minn. | Allan Kroll, Mich. | Paul Petersky, Wa. | Jim Zabransky, |
| Chris Drake, B. C. | Ben Lewis, Mass. | Bob Padula, Australia | Illinois. |

Just a brief reminder that all reports for QSL REPORT and SCOREBOARD (which will re-appear next month with the accent on ASIA) must reach your QSL Editor by the 15th of each month. Reports should be sent airmail, and with sufficient postage, or they are being returned to the sender. Until next month, Best 73's, GREGG.

LISTENERS DIGEST

News-Tips-Skeds

Dan Ferguson-Editor, 1521 Smith Road, Apt.7, Charleston, WVA.25314 Deadline 15th.

CHILE The scheduled special pgm in English for NZDXL, 26 Sept, was not broadcast by R.Presidente Balmaceda. The station simply signed off 0501.(DF)

CONGO(DR) Last month we indicated that Mbuji-Mayi, 7300 kHz might be heard around 0400-0500. Don Jensen has now indicated that the station may be inactive, since it is no longer heard at 0400, and was at one time fairly regular there.

NEPAL see October. Some sources show the 100 kw tx on 7165, 0100-0400; 0700-1000, and 1200-1700. If correct, NA DXers might try around 0100 and around 1200, later on WCNA.

HEATH COMPANY In response to a rather long letter detailing some of the needs of the SWBC DXer, in regard to possible replacement of the SB310 rx with a solid state model, as has been done with the ham-band receiver, I received a nice letter indicating that they agree with many of my suggestions, and they "will be incorporated in a new model of the SWL receiver." They indicate the new receiver is not sufficiently developed to release information on it. (DF)

TAPE RECORDINGS Ed Shaw notes that most stations would prefer to receive tapes recorded at $7\frac{1}{2}$ i.p.s., rather than $3\text{-}3/4$ i.p.s. Ed accomplishes this by recording at $3\text{-}3/4$ ips, then playing at $1\text{-}7/8$ ips while copying at $3\text{-}3/4$ ips. The result is a tape at $7\frac{1}{2}$ ips. This technique might be useful to those who do not have a recorder capable of operating at $7\frac{1}{2}$ ips.....Another thing to note is that you should record only one track. Do not record anything on the second track, and do not record anything on the second side of the tape. If more than one track is used, or if both sides of the tape are used, the station cannot play the tape on standard studio equipment, which is full track.

ETHIOPIA I have several copies of two or three pamphlets from ETLF, and will send to those who send SASE for them. Much info on the stn & its history. (DF)

MALAGASY REP Latest info available shows the R.Nederland relay will not be operational until December, at the earliest, and likely not until sometime in January. The fqys which may be used in December are 15330 in Indonesian to SEA at 1230-1350 - parallel the Lopik transmitters on 21480 and 17810. Also on 15330 in English at 1400-1520, to SEA, again //21480 and 17810. Of no consequence to NA listeners will be the transmission on 6020 in Dutch at 1700-1820, and in English at 1830-1950...Beginning in January, look for the Malagasy relay on 11895 in Dutch at 1530-1650, //Lopik on 17810 kHz.(Bill Eddings, John Banta, DF)

SWITZERLAND SBC will add 9750 kHz to the list of fqys in use to NA in English at 0130, beginning 7 November. Fqys will be 6120, 9535, 9750, 11715 kHz. (John Banta)

ZAMBIA - C. M. Drake forwards a letter from ZBS indicating that the new ZBS transmitters given them by the Chinese Gov't will not be operational until mid-1972. One is a 200 kw MW tx; the others, 50 kw SW txs, two of them. One SW tx will be used for the homo svc; the other SW tx may be used for limited external coverage in Africa, likely in the 25 m.b. (C. M. Drake, via Anthony Marks)

USA (?) National Bureau of Standards is operating a time & freq svc by satellite on 135.625 MHz, 1700-1715 & 2330-2345 GMT. For info, send postcard to Code 3, National Bureau of Standards, Boulder, Colorado, 80302.(Tom Gavaras)

SWEDEN R.Sweden announces freq change for 0000-0230 tx to NA. 11825 is dropped. Tx is now on 6175 kHz; English at 0030-0100 & 0200-0230. Another change. The 1400-1530 tx is now on 21505, ex 21625(SCDX)

W.GERMANY Deutsche Welle has indicated that the first 500 kw tx at Wertachtal will be used during the winter broadcasting quarter. The following transmissions are sked:

| | |
|----------------------------------|---------------------------------|
| 6000 kHz 1900-2100 to SEA/ANZ | 11810 kHz 1400-1900 to S.As/SEA |
| 6075 0600-0700 to NA | 11810 1900-2000 to NA |
| 6130 0000-0215/0700-0900 to NA | 11810 2230-0000 to NA |
| 6155 0230-0600 to NA | 11865 1945-2200 to NA |
| 6160 2100-2200 to Australia | 11895 0030-0300 to CA/SA |
| 9585 1800-2000 to NE Afr/ME | 11965 0700-0900 to E.Afr/S.Afr |
| 9585 2000-2200 to FE/Australia | 11965 0900-1200 to SA |
| 9610 1500-1800 to Eur/NE Afr/ME | 11965 1200-1400 to S.As/SEA |
| 9735 0615-0900 to SEA/ Australia | 15150 0900-1200 to E.Afr/S.Afr |
| 9735 0900-1200 to e.Afr/S.afr | 15150 1200-1900 to SA |
| 9735 1200-1500 to NE Afr/ME | |

With the overlaps contained in the above "schedule" it is clear that it cannot be for daily use by a single transmitter. The schedule seems to be for test purposes. So these fqys and times may serve those who are looking for the initial operations of the new transmitters.

SWITZERLAND SBC is listing the new 500 kw tx at Sottens for the following times for the winter quarter:

0600-0645 on 11765 to E.Afr/S.Afr in German/French/Italian
 0700-0915 on 11865 to Japan/Australia/NZ in EE/GG/FF/It/EE, EE at 0700-0730/0845-0915
 1315-1500 on 17845 to FE/India/Pakistan in EE/GG/FF/It, EE at 1315-1345
 1515-1730 on 21585 to SA
 1745-2145 on 11720 to Africa in FF/GG/It/FF/PP/SS/EE/GG, EE at 2100-2130.

POLAND Sked from R.Warsaw shows English at 0630, 1200, 1600, 1830, 2030, 2230, each for one half hour. Fqys are not given, only meter bands. (George Rabono)

PORTUGUESE TIMOR Bob Padula indicates Dili definitely back on the air on 3268 kHz. WRTH 71 shows sked as 1000-1430, Bob has heard them at 1010, and ARDXC member David Foster has noted the station at 1115-1205, according to the October ADXN. The fgy is a very bad one for reception in NA due to uto transmitters; those who hear Dili have a real prize!

RAMADAN We neglected to note last month that Ramadan runs 21 October to 19 November this year. Most should receive this month's bulletin before the 19th of November, so we mention it this month. During Ramadan many stations of the Moslem world operate on extended schedules. For many of these stations Ramadan is the only time of the year that the station can be heard in NA. A few stations that would be worth checking for follow.

Djibouti, AFARS & ISSAS, operates on 4780 kHz, and was scheduled last year to 0100 GMT during Ramadan. As far as I know, the station was not heard in NA, due to the strong LAs on 4780 kHz.

ABU DHABI operates on 4988 kHz, and normally signs off at 1950 GMT. During Ramadan it may operate late enough to be heard in parts of NA. DXers in the NE part of NA would soon to have the best chance at this one.

S.YEMEN. Another rare station is Aden on 5060 kHz, this one might also provide some good reception late afternoons(EST) in ENA. Watch for Tirana, also on 5060. Tirana signs on at 0400 and runs to s/off shortly before 2200. Aden runs from s/on 0330 to s/off 2200 (though has also been reported to s/off 2300 last year). Another stn on fgy is RC Huambo, ANGOLA....So, care is needed on this fgy. And remember, the sked for Aden may be extended during Ramadan.

ED SHAW indicates the trouble he was having with his new SX-190 receiver has now been corrected, and the receiver is performing excellently.

CONDITIONS the past few weeks have been poor, according to observations here in W.Va., and according to comments received from several other DXers. Hopefully they will be improving shortly....Earle Hall says one that has improved is the condition of his chimney, which has been repaired after being pulled down by a new antenna! 73, Dan

Jerry Berg- Editor, 38 Eastern Avenue, Lexington, MA. 02173 Deadline 12 th of Month

Gang, I won't bore you with any tales of woe about how much time it takes each month to put Log Report together--Dan made the point many times, and I can only emphasize what he's said. The point is, each of you--oldtimers and newcomers alike--can help make my job a little easier by following these few rules:

1. Put your items in order, by frequency.
2. Get your report in by the deadline, the 12th of the month. That means your report must be in my hands by the 12th, so give yourself a few days to allow it to reach me.
3. Please do not use lightweight or "tissue" type paper when you report. Each report must be cut apart, and slips of tissue paper have a way of getting lost. If you send a carbon copy of your report, please use a medium weight paper, even if legibility is reduced.
4. Put your initials after each item you report.

PLEASE COOPERATE and help bring a little light into my life. On to the goodies . . .

- 2390 GUATEMALA LV Atitlan, Santiago Atitlan, mx (maybe IS) 0200, ranchera mx. Tlk 0300, ID 0327, closing anmt 0335, 0339*. Call is TGDF. Barely audible. First time reported? (GH).
- 2390 MEXICO XEJN, R.Huayacocotla, Veracruz, ID 0114, call and anmt 0120. Drama 0130, march 0208, 0211*. Fair reception (GH).
- 2540 HAITI 4VSO, good w/Creole or FF tlks at 1018 (DJ).
- 2660 ECUADOR R.Canal 1330, 2x1330, TC at 1103 (GH).
- 2860 COLOMBIA R.Magdalena, 2x1430, probably the one weak, mentioning Bogota at 1053, also CARACOL net. Much QRN (GH).
- 2940 MEXICO Rdif.Comercial XESM, 2x1470, fair at 1017 (GH).
- 2960 GUATEMALA R.Rumbos, 2x1480, mx and many IDs at 0250 (MAF). Also at 0346 w/pop mx, TCs, IDs, ads, etc, and overmodulated. Fair then, but poor at *1115 w/marimba, barnyard sounds (GH).
- 3170 CZECH OLB5, time stnd stn, 5 kw, CW anmt 0230 (ECS).
- 3200 MEXICO Stn here is XERTP, San Martin Texmelucan, 2x1600. *1157 w/mx, many IDs, till arnd 1300. Also before 0100 (GH).
- 3204 NIGERIA Ibadan, old US C&W mx 2230, but better arnd 0615 (ECS). Also drum IS 0430, anthem, into EE w/YL. Poor (GH).
- 3210 MOZAMBIQUE Emis.Reg.de Zambezia, Quelimane, clear ID 1916, PP anmt and into pop mx. Vy weak but clear (BBy).
- 3227 LIBERIA ELWA, chants and EE anmts 0640, also vernacular (RWP).
- 3230 FIJI Suva, anmts and EE ads at 0940, good but het (BBy).
- 3242 INDONESIA(Celebes/Moluccas) Ambon, local mx and local ID by YL at 1001. Poor, w/utility QRM (BBy).
- 3250 S.AFR SABC, lite mx, man in Afrikaans at 0345. CW QRM (LM).
- 3255 LIBERIA ELBC, EE variety prgm, pops and comls at 2315, low but in the clear (ECS). N:E 2345 (JDT), same w/cmtry at 2350 (CSW). Good lvl w/N:E, 2350 (ARN)(Al, you rptd it as 3215--oversight?).
- 3255 VENEZ LV Tigre, good w/quality mx 0115, frequent IDs (ECS).
- 3265 GUYANA R.Demarara, mx 0210 (DF). Anthem twice 0903, EE ID 0905, into Hindi chants. *0854 (LM). Good, but fades by 1030 (RWP).
- 3265 MOZAMBIQUE L.Marques, "Happy Hour" in EE, 1930. Fair (RBy).

- 3268t TIMOR Vy, vy weak, but something here at 1400 that sounds like PP, but too weak to be certain (BBy).
- 3270.5 UNID LA, weak from 0315, off 0335 after tlk in SS(?)(DF).
- 3275 VENEZ R.Mara, hrd 0315 to 0330* w/ID, anthem. Vy poor (CSW).
- 3285 BRAZIL Em.Educ.Rural, fair at 0130 (TW).
- 3290 GUYANA GBS, clas.mx 0200, 0345* after ID, anthem (CSW). ID, ads 0945, TC, then nx (GH). *0845, EE prgm summary, Indian mx. Vy good. Also hrd fair another day at 0342* (RWP).
- 3300 BURUNDI Bujumbura, good w/ID at 2250 (TW).
- 3300t GABON Libreville, good, FF tlk to 2300 t/out(ECS)
- 3300 GRENADA WIBS, tlk 0124, then tropical rhythms(GH). Nx 0200, 0210* (REW). Tentative, 3300a, mx to 0200, presumed off 0215(RB).
- 3305 N.GUINEA R.Daru, ukelele mx 1130, EE/Pidgin anmts.Fine sig(RWP).
- 3307t RHODESIA Gwelo, N:E 0400, then mx. Heavy QRM (TDS).
- 3315 MARTINIQUE ORTF, piano mx 0215, FF ID 0230 (ER). 3314, good w/ clas.mx 2330, but degenerates and under the mud by 2345 (ECS).
- 3315 BRAZIL R.Gazeta de Alagoas, regular w/PP mx arnd 0045 (TW). Not sure which, but definitely a Brazilian at 2330, native programming, language (ARN).
- 3316 SIERRA LEONE Freetown, IS 2300, high life mx w/EE anmts to 2330* w/anthem (ECS). IS at *0600, Sun EE religious svc (BB).
- 3320t S.AFR SABC presumed (see 9/71 LR), vy poor, bad QRM. 1945 (BBy).
- 3322 BOUGAINVILLE 4-tone chimes, clear EE/Pidgin ID at 1132, then country mx, good prgmng(RWP). 3322.5, weak w/tlk by man, 0920(LM).
- 3325 GUATEMALA R.Maya, fair-good w/ID at 0100 (RWP). Rel mx, "Stars & Stripes" at 1107, EE/SS ID (AAM). 3320, rel mx, ID 0103 (MAF).
- 3335 BRAZIL A Voz do Sertao, Jap anmts mixed w/PP at 0015, chimes 0029, then PP ID. Poor (GH).
- 3335 N.GUINEA R.Wewak, good, overriding CHU at 1130 w/financial nx in EE, also earlier w/pops at 0945 (RWP). Chimes, TC 1145, ID 1158, then mx. Poor (GH).
- 3336 SENEGAL Ziguinchor, FF anmts, Afr pops and Arabic chants, very weak at 0710. Hrd 9/20 only (RWP).
- 3346 ZAMBIA Lusaka, Fish Eagle Bird Scream IS at pre-s/on, 0159(ARN).
- 3350 GHANA Ejura, fair w/Afr mx 0550 (DF), N:E 0610 (BS). Hymnals, ID in EE, fair lvl at 2245 (AEM).
- 3360 GUATEMALA LV Nahuala, marimba mx 0307, IDs, man ancr (CW).
- 3365 DOM.REP. R.Exitos, LA mx and ID at 0214. Fair (AAM). 0332 (RB).
- 3366 GHANA Accra, fair w/pop mx, ads, Afr lang, from 0550 (DF). N:E by YL 0605 (BS).
- 3375 BRAZIL R.Olinda Pernambuco, nx 2350, ID 003 (MAF).
- 3380 GUATEMALA R.Chortis, SS mx, many IDs 0240 (RB), songs 0335 (DF).
- 3380 MALAWI Blantyre, rooster at *0258, then nx. Vy strong (RWP). Tentative, w/EE ID 2000, then N:E, but vy weak and QRMEd (BBy).
- 3380 VENEZ R.Barcelona, mx prgm and ID 0200 (MAF). 3385, fair in SS arnd 0340 (DF).
- 3380 UNID In SS, w/local noise, to 0404* (LM).
- 3385 BRAZIL R.Cl.de Teresina, mx prgm, ads 0245 (MAF). Pop mx, PP anmts to 0250* (TW).
- 3385 FR.GUIANA Cayenne, pop mx, nx 0930, ID 0935 (LM). FF talk, folk mx at 0937. Fair (GH).
- 3390 ECUADOR R.Zaracay, weak, Ecuadorian mx 0420 (WH), from 0405, w/ID in SS 0433 (LM). IDs, sports coverage at 0813 (GH).
- 3395 BRAZIL R.Cl.de Conquista, PP tlks, pop mx 2330 (TW). Mx from 2250, ID at 2331 (MAF). Tentative, in PP 0125, but no ID hrd(ECS).
- 3396 NIGERIA Kaduna, vernacular chants, drums at 0530. Much QRM/QRN(ECS)
- 3400 CHINA Fukien, 1045 w/CC revolutionary mx (LM).
- 3559 UNID Asian, maybe China or Korea, vy weak 1132, tlks and mx(TDS).
- 3905 INDIA Delhi, EE ID in GOS at 2300, good clarity (AEM).

- 3952.5 ENGLAND BBC, tlk in GG to Europe, 0440 (LM).
 3960t W.GERMANY RFE, tlk in Eur lang, SSB QRM, 0445 (LM).
 3960 UNID Jazz mx 0145, few wrds and abrupt s/off at 0200. QRM(ECS).
 3985 ECUADOR Esc.R.Populares, local mx 0255, ID 0300, 0301*(GLD).
 3990 W.GERMANY R.Liberty, jammed at 0450 (LM).
 3995 ECUADOR LV Rio Tarqui, Andean mx at 0625 tune, past 0700 (GLD).
 4672t GHANA Sounded like "Ghana Radio" ID 2259 after US pops, DJ in Afr lang, church svc 2255. Anthem, then 2301* (HM).
 4679 ECUADOR R.Nac.Espejo, full ID 0132 (JDT), and 0215, then show of coastal mx, jingles, DJ anmts (HM). Ss talk 0155 (DF).
 4698.5 N.VIETNAM Hanoi, 1245, interview, singing by lady 1315 (TDS).
 4701 N.KOREA Stn listed in 10/71 LR believed Pyongyang, hrd opening in Korean 1203, then dictation. Hrd this type programming in Thailand on Pyongyang fcys (GH).
 4717 UNID Maybe Cape Verde, local pops at 1310, some PP tlks by lady, no ID hrd. R.Cl.Mindelo?(TLA) Strange hour for Afr (Ed).
 4719 INDONESIA(Sulawesi) Makassar, NF apparently ex-4752, singing ads 1225, Djakarta ID 1227, IS and local ID 1229 (GH).
 4725 BURMA Rangoon, weak in lang 1207 (DJ), play, C&W mx 1258 (TDS). Children's song 1259, anmt 1300, native percussion. Fair (GH).
 4734 ECUADOR R.Nac.Progreso, local mx, strong at 0154 (JDT), folk mx, Ss anmts, poor voice quality at 0245 (TW).
 4747a ECUADOR R.El Mundo, many IDs for "El Mundo" during LA mx show, 0155. Off abruptly 0200 during jingle. Hrd 10/10, not since(HM).
 4749 UNID Weak LA here at 0330 (GLD). These last two related? (Ed).
 4755 COLOMBIA Em.Nuevo Mundo, ID 2315, and pops (AEM).
 4765 BRAZIL Feira de Santana, tlk, pop mx, ID 0855. Talk 0900, pop mx 0910, faded by 0915. Fair (BBy).
 4765 COLOMBIA R.Catatumbo, futebol at 0256, fair (AAM).
 4765 CONGO RFVC-Brazzaville, 0429 w/FF ID, Afr mx (LM).
 4765 ECUADOR CRE, LA mx 0341, nx 0355, comls, IDs to 0421 t/out(KS).
 4770 VENEZ R.Bolivar, LA mx 0014 (AAM), Ss greetings, many IDs 2341-0020 (KS). IDs, ads, jingles 1005 (RWP). 4769, LA mx 0150 (DF).
 4770 LIBERIA ELWA, EE, pop and C&W mx, 2312-2348* (JDT).
 4771 UNID Oriental prgmng, some playing of "East Is Red." 4 pips at 1000, into a different lang. Hrd 0935-1033, 9/26, poor-fair(DC).
 4780 ECUADOR R.Atahualpa, mx at 0523 tune (DF).
 4780 VENEZ LV Carabobo, hrd by many running late lately, past 0546 anyway, though off by 0748 at recheck. Usual LA stuff--SS pops, IDs, ads, etc (GH,RBO,DJ,DF,AEM,TLA,LM,MAF,KS).
 4782 MALI Bamako, poor-fair w/FF pops, 0605 (TLA). 4783, tentative, Afr mx at 0620 (JDT).
 4782.5 DOM.REP. Onda Musical, mx at 0100 (REW).
 4794 ECUADOR LV Caras, on late Sun w/mx, 0440 (DF). Abrupt s/off at 0520 w/no ID or anmt (BS).
 4795 ANGOLA R.Commercial, PP songs, anmts. Strong but QRMd,2315(AEM).
 4795 BRAZIL R.Congonhas, ID 2328, then tlk. Listened 5-6 weeks to get ID (JDT). Congrats--that's the way we should all DX (Ed).
 4795 UNID Brazilian, good signal, pop mx and PP tlk, 2315 (TW).
 4795 INDONESIA RRI, ID 1130, then nx (TDS).
 4800 PERU R.15-50, Ss nx 0300, IDs. Poor, high QRM (ER).
 4800 VENEZ R.Lara, booming in at 0150 w/ID, mx (DF).
 4806a BRAZIL Rdif.de Amazonas, mx 0920, anmts 0924, ID and mention of Manaus 0938 (JDT).
 4807 SAO TOME Emis.Regional, good 2245, all PP w/high life mx, to 2300* w/AP (ECS).

INDIA 9525 AIR Aligarh, recently new, noted 1800 with EE GOS news to Europe, 10/17; signal improves rather quickly. (Bill Berghammer)

INDONESIA (FLASH) R. Angkatan Udara heard for the first time, finally!! at 1128 on 11323, weak sigs, prgm of pops. Peking slop de 11330 causing QRM. (Dan Jamison, Ky.) ...RRI Possibly Manokwari, West Irian, on 6279, at 1156, 10/11, with tunes, mixing with R. Peking, causing listening to be quite messy. (Dan Jamison)

ISRAEL Kol Yisrael, new 9685, from 0400 RR; QRM de Moscow to NA. (Ernie Behr)

LIBERIA ELWA, 15095, noted S/on 1615 in AA, fair lvl, 10/7. (August Balbi, Calif.)

KOREA (N) R. Pyongyang, 9514, EE 1330; at 1400 annrc 1 hour EE. This 10/15 (August Balbi) ...4772 Pyongyang presumed, 10/10, W spking Korean w/applause, 33333 (Glenn Nauser, Tex.) ...6290 Pyongyang list, 0730, with Korean talk, though a bit early. (Glenn Hauser)

MALI R. Mali, 17722, heard 10/12, 1620 EE ID, talk and African music, 1635 EE news, 1641 S/off with anthem. Better than Paris, 17720; annrc 17725. (Ernie Behr)

NORWAY 17825 R. Norway 1900-2030, Norwegian to ECNA, 10/17. (Bill Berghammer)

PERU 4995 R. Andina with lively music from 1048 tune, clear ID 1050...R. del Pacifico, 4975, light music, an ID at 0426, SS. (credit both to John Tuchscherer)

PLEASE TURN TO OVERLEAF

SAHARA(SP) (TENT) 7232 R. Sahara was heard at 0754 with AA and occasional anncts but no apparent ID, Reception quality was some pain, some strain lvl. (Mark Konen)
SEYCHELLES 11935 FEBA in AA after 1800 S/on; EE ID and prgming at 1830; on 10/13, fair to good lvl. (August Balbi)...FEBA, 11935, 1800-1900 S/off noted with strongest sigs ever, 20 over Sugar 9 lvl, with Back to God Prgm, and musical prgm. Requests reports. (Rich Higgs)

SINGAPORE R. Singapore on 5047 not 5050, past few days, EE news 1400, 10/15 (August
SO AFRICA 4875 0415, with Afrikaans talk, 10/7. (Bill Berghammer)...25790 / Balbi)
 R. RSA 1200-1300, FF to Africa, a new time this quarter, 10/17. (Bill Berghammer)
SPAIN RNE, Madrid, 9520, anncing as, "Centro Emisor de Nobeljas", 0000-0605 S/off, SS to C. America, not // any other fqy; SS prgm on 9360, 11775, 15145, anned as Arganda site. (Emmie Behr)

SWEDEN 6175 R. Stockholm 0038 on new fqy, in EE to USA, 10/14, fair lvl. (John Banta, N. Y.)...new 21505, 1415, R. Stockholm, EE to USA, good lvl, 10/14. (John Banta) ...RS noted with initial transmission on new 6175 10/13 (GMT date) from 0030-0100 S/off, EE. Is also on 21505 from 1400-1430 EE to ECNA; and 6175 from 0200-0230 ECNA, EE. (Larry Magne)

VATICAN VR current sked: 0030 SS; 0050 EE; 0010 FF, S/off 0125, 10/15. On 5995 // 9615 // 11725. (August Balbi)

VENEZUELA (TENT) Unid IA just moved here with ID seemingly given at 0800, 10/15, sounding like R. Sucre in Cumana, 6065.7V. (Bill Berghammer) (See Colombia, R. Super, 6065.3, first page this FS, Editor)...3324.7 R. Monagas, 0545 SS ID, "...canal 960", 44444, 10/17. (Bill Berghammer)

VIETNAM(N) Hanoi HS, 7416, at fine lvl around 1235 with Oriental music, YL annr. (Ralph Perry)

TURKEY 11880 R. Ankara relaying Turkish HS 1545, 10/17, new fqy, replacing 15160 at this time, and 9515 at 0400. (Bill Berghammer)

UGANDA 5026 R. Uganda with EE at 0345, 10/16, though DR splatter. (Bill Berghammer) ... (Bill, how about giving us the English ID used by this station? Thanks, Editor)

USSR 4850 Tashkent, Uzbek SSR, 10/10, 1253 in RR(?); 1300 ID, music. (Glenn Hauser) ...5015 Arkhangelsk, RSFSR(EUR), 0430 cultural prgm, 10/16. (Bill Berghammer)

YEMEN R. Sanaa, 5805A, S/on at 0300A; OM with slow unaccompanied AA chants; weak lvl with a het. (Mark Konen; Ralph Perry)

CLANDESTINES Per letter from Victor G., Ceylon: R. Bangla Desh now MW 830 only, no SW since around May. Seems to be 50-100Kw, AIR transmitter and is jammed from easterly W. Pakistan. Partial sked is 0120 and 0710 EE, 1330-1400 Bengali, 1400-1430 EE, and after 1430 in Hindi. (Larry Magne)

VOICE OF THE PATRIOTIC MILITIAMEN'S FRONT (TENT) This one may possibly ID as, "Day la tieng noi cua mat tran dan quon ai quan," though ID not noted, just observed from references. This station heard at 1053 here in Kentucky, on 9429 kcs plus a few cycles, at low lvl, with fluttery sigs, past 1100, with talks and music; a beacon type tone on fqy makes for strain listening, this 10/11. (Dan Jamison)

HARMONIC LISTENING (Via Glenn Hauser) COLOMBIA 2880 HJEK, R. Tulua, Tulua, 0306 tune, 0330 Caracol plug, various local anncts; 0344 ID as, "R. Tulua de Caracol (2x1440); also noted at 1100...GUATEMALA 2860 TGAG, R. Huehuetenango, 10/8, weak lvl; by 0340 was much better with ads, 0345 "musica guatemalteca", prgm ending; presented by a compania de transporte, ID; not audible at all on fundamental 1430 kcs, 33322...TGMS, 2898, with ID as, "R. Nacional Mazatenango", listed for 1450, so must be slightly off fqy. 0315 music, 0320 3 chimes, routine S/off giving date, ID, wishing, "paz y bien". Followed by anthem, 0323 off.
