HOTEL ACCOMODATION & CONVENTION SESSIONS

The official convention hotel is the HOLIDAY INN - PLACE DUPUIS, in Montreal's east end. The hotel is easily accessible by public transport: the central bus terminus is across the street from the hotel, and a major station in the subway system is immediately below the hotel.

A special convention rate of \$ 65 per night, single or double occupancy, has been obtained for the convention. The triple & quad rates are \$70 & \$75 .

HOTEL RESERVATIONS MUST BE MADE DIRECTLY WITH THE HOTEL, using the yellow card which is enclosed with your registration kit. PLEASE NOTE that a one night deposit or your credit card number must be enclosed with your hotel reservation card.

In order to guarantee your hotel reservation your card must be received by the hotel by JUNE 25/86. If this deadline is met, the hotel will confirm your reservation by mail. You should allow at least ten days for your reservation card to get to the hotel. Hotel reservations cannot be guaranteed if received after the June 25 deadline. AVOID PROBLEMS AND GET YOUR RESERVATION IN EARLY.

PLEASE NOTE: The convention rate for accomodation applies to your entire booking, should you wish to stay for several days before or after the actual dates of the convention.

THE HOTEL ACCEPTS ALL MAJOR CREDIT CARDS.

If you should have to make a cancellation of your hotel accomodation at the last minute you can contact them at - (514) 842 - 4881 .

IF YOU ARE ATTENDING THE CONVENTION WITH A PARTY OF PEOPLE WITH WHOM YOU WILL BE SHARING HOTEL ACCOMODATIONS, ALL RESERVATION CARDS SHOULD BE SENT TO THE HOTEL AT THE SAME TIME TO AVOID CONFUSION.

.....
If you would like to share accomodations, but do not have a prearranged partner to share with, PLEASE STATE PREFERRED AGE RANGE, AND NUMBER OF PEOPLE YOU WOULD LIKE TO SHARE WITH(Maximum of 3).

I would like to snare with ___ other people, on nights of July __, __, __, __.

Age Range Preferred, _____

PLEASE NOTE: The convention organizers will try to arrange shared accomodation, but this cannot be guaranteed. If it is not possible to arrange shared accomodation as requested, then single accomodation will be booked for you. The deadline for requests for such shared accomodation is June 1/86 .

IF YOU ARE REQUESTING SHARED ACCOMODATION AS PER THE ABOVE, PLEASE FORWARD YOUR HOTEL RESERVATION CARD TO THE ANARCON-86 ADDRESS, AND NOT TO THE HOTEL.

PLEASE DO NOT FORGET TO ENCLOSE THE FIRST NIGHT'S DEPOSIT (\$ 65) WITH YOUR HOTEL RESERVATION CARD

CONTACT

Editor: Stephen G. Moye, 178 Bartlett Ave., Cranston, RI 02905 Phone: (401) 941-6497

We're going to start this month with a letter from the originator of the 'give-a-transmitter' idea, Gerry Bishop (Clark Air Force Base, the Philippines). It will be interesting to see what his reactions are to the response thus far:

Hi! Greetings once again from the Philippines

My bizarre idea seems to be taking form. While it wasn't clear in the original proposal, I never intended to force a transmitter on someone or some organization that didn't want it. Though undoubtedly exotic, the utility of SWBC just doesn't apply to some places such as Pitcairn, or even Easter Island. On the other hand, the situation (geographically) of much of the Pacific almost dictates SWBC, and the gift would be welcome.

The concept of a QSL bureau for a fledgling SW broadcaster is a good one, and might ease the sting of SWBC. During the first year of operation, this bureau may receive over 12,000 reports -- over 40 a day. That could become a full time job for someone simply checking the reports and mailing QSLs. Obviously that much time must somehow be compensated. I have no ideas on how to achieve that painlessly.

On the subject of selecting the recipient, and before we go any farther with this, there are several points that we need to settle.

1) If we have more than one candidate, shall the membership at large vote on a winner? The loser might have some hard feelings, leading to future repercussions.

2) Will this be a 'one shot deal' or shall we make it a habit? This could ease the pain of the previous problem. Could cost a lot more money, too.

3) Can we, legally, retain ownership of the transmitter if a station ceases operation? How long do we attach a string like this? The developing nations are dynamic, and media sometimes get caught on the wrong side of revolutions. A cancelled license could break a lot of hearts.

4) Can we remain apolitical? Donating a transmitter to a revolutionary government might be smart by DX standards, but not so bright in the long run.

As I wrote at the outset, this is a bizarre idea that might just work. We have to make sure we do it right, or we'd be better off not doing it at all.

I'm sure that in the overall view of the world, this donation will neither improve nor degrade it much. Still, let's all work for improvement if there's any to be had.

We have seen some very creative thinking about this idea. What we need now, if this is ever to become a reality, is a consideration of the practical problem areas (fund raising is the chief one that comes to mind) that need to be tackled. It is also not too soon to hear from people who would like to volunteer in putting this together.

As there was only one letter this month, this gives me a chance to make good on my promise to examine some of the reference materials available to the SWL -- with an emphasis on those that are issued more frequently than once a year. The principal annual reference, of course, is the World Radio TV Handbook. Everybody should have a copy of this very and comprehensive reference. Why? In addition to containing the largest available listing of time and frequency, it also is an excellent source of names and addresses of radio stations and their principal employees. The problem, however, with a work that is revised only once a year is that SW broadcasting schedules are revised anywhere from two to six times a year. The problem is how to keep up with these changes.

An obvious answer is to apply directly to the stations in which you are interested for copies of their program schedules. This works in several ways depending upon the broadcaster. The BBC, for instance, issues a monthly program guide (London Calling) to

which you can subscribe for about £12 a year. Other broadcasters issue frequency and program guides at various times of the year -- usually March, May, September, and November; Radio Moscow changes its frequency schedule as much as six times a year. Depending upon the broadcaster, these schedules may be free of charge, they may cost a small amount, or the schedules may be sent in return for a reception report. You will have to ascertain if the station in question will provide you with schedules for a year, or if you must ask for *each* new schedule as it becomes available. If you are interested in a large number of stations, this could get to be a very demanding, expensive, and time consuming project. There is a further disadvantage in that stations are in no way bound to their schedules: they can, and do, change them as the need arises. Schedules provided by the station can thus become useless.

The answer is to let **somebody else** do all that work. The problem can be approached in two ways. First, information from the stations themselves can be made the basis of a listing. Ideally, the compilers would also keep a check on the broadcasters to ensure that they are in fact broadcasting on the frequencies that they say they are; i.e., schedule information from the broadcasters ought to be confirmed by monitoring research. The second approach is represented by those listings that are the result solely of monitoring, thus bypassing completely the broadcasters as a source of information. There are strengths and weaknesses in both approaches: information from broadcasters is certainly not guaranteed to be accurate/up-to-date, while the monitoring-only approach requires a large number of skilled monitors who have access to a large, stable and flexible database.

The first approach is used by the International Listening Guide [Merianstrasse 2, D-3588 Homberg, West Germany] which lists world-wide broadcasts in English. International broadcasters are asked to submit schedules of their frequency use, and these schedules form the basis of a database. Monitoring of frequency use is done to check on the accuracy of the stations' information. The ILG is issued four times a year, timed to coincide with the schedule changes instituted by the great majority of international broadcasters. The format of this work (which has changed with the March 1986 issue) is of particular interest. Briefly, there are two major sections. The first is a listing by time, in blocks of three hours each. Included (among other things) is information about frequencies, target areas, transmitter locations and program content. A fascinating and useful feature of this section is a listing of all the DX/SWL programs available in that three-hour block of time. Also listed in this section are major general (or world) services, as well as news/commentary programs. The second section is a listing by frequency (in March and September this is in tabular form, in May and November this section is presented in graphic form--very clear and easy to use) starting with (roughly) the 49mb; selected future editions will include the tropical bands as well. I have used this work for about two months and I find it accurate and easy to consult -- highly recommended. The cost is US\$14 (or 26 IRCs worldwide) for four issues. A sample copy can be obtained for 6 IRCs.

Radio Database International (INTERNATIONAL BROADCASTING SERVICES LTD, P.O. Box 300, Penn's Park, Pennsylvania 18943) uses the results of a team of monitors as the source of its database. It was indicated in this column some time ago, when we were all anxiously awaiting the appearance of RDI, that it would appear in revisions about twice a year. A recent conversation with Larry Magne (Editor, RDI) has revealed, however, that revised editions will be issued annually. The reason for this change of procedure lies essentially in the accuracy of the information that makes up the database, and the accuracy of the prediction procedures which indicate which broadcasters are most likely to use which frequencies and when. The work is issued in two parts: part one covers the international SW bands -- 5.73 - 26.1 MHz (US\$9.95 + 1.85 s/h); part two covers the tropical bands -- 2.247 - 5.72 MHz (US\$4.95 + 1.00 s/h). Buy both volumes together for \$12.95 + 1.95 s/h. I think that, as long as only annual revisions are planned, that the international and the tropical volumes could be published as one volume; it would be very convenient to have this treasure of information complete between only two covers. As it is, this is a superb reference work and very highly recommended.

Another source of constantly up-dated information that is easily available to all of us are the DX/SWL programs broadcast by a number of stations. It is a good habit to get into listening to these programs. Shortwave Listeners' Digest from Radio Canada International and Media Network from Radio Netherlands International are two excellent and long established sources of information. There are a number of others, though and you might want

to 'shop around' for one that appeals to you. A source like the ILG (or the WRTH which also lists DX/SWL programs, but not in so convenient a form as the ILG) is very useful in a case like this.

Last, and most certainly not least, comes a very current and useful source of SWBC information. You are holding it in your hands -- FRENDX with UPDATE and LOG REPORTS. These are purely the results of monitoring/listening and are thus up-to-the-minute and true reflections of the state of SWBC at any given time. Clearly, though, they can only be as useful as the extent to which the membership supports them; without your loggings, UPDATE and the LOG REPORTS become less useful to all of us. The point is this: SUPPORT UPDATE AND LOG REPORTS. -- CONTRIBUTE YOUR LOGS! 'Nuf said.

§ § CONTACT NOTES § §

I hope that I will not be trying anybody's patience beyond reasonable limits when I say that it will be a few more weeks before my MUF tome will be ready. The wait, I think, will be worth while. In addition to an expanded bibliography, I am also working on programs for the Hewlett-Packard 41CV (or 41CX). By the way, I have translated the MICROMUF (this is the predictive algorithm from Radio Netherlands International) program to the HP-41CV, and have obtained some interesting results from it; I will send a copy to anyone who is interested. In any case, I am awaiting some information from West Germany to complete my work -- things should be ready for mailing in the middle of May. Please be patient.

I just received from Larry Magne two excellent pieces of literature -- the first in a series of papers entitled: A Radio Database International White Paper. These works go into somewhat greater detail about their subjects than is usually found. The first two titles are: HOW TO INTERPRET SPECIFICATIONS AND LAB TESTS WHEN CHOOSING A RECEIVER OR TRANSCEIVER (EXCELLENT! -- sgm) and RDI EVALUATES THE JAPAN RADIO NRD-525 RECEIVER. The first title forms a fine introduction to the second. Both works are superb and worth the \$4 [EACH] (in North America, elsewhere \$6 by air). (Send to address given above for RDI.)

My thanks, as always, to readers and writers. Let's hear from you! 73--

NEW COUNTRY LIST/AWARDS PROGRAM BOOKLET AVAILABLE

The new issue of NASWA's Country List/Awards Program booklet is now available. The price is \$2.00 in North America and \$3.00 overseas. For further information please check John Kapinos' column on page 10.

NOTICE, PLEASE

The question of paid advertising appearing in FRENDX has come up again from companies wishing to advertise. NASWA/FRENDX does not accept paid advertising of any type, but will print ads from companies free of charge when space is available providing that the advertising company or somebody therewith connected is a member of NASWA and the material advertised is SW related. We follow this policy in order to give NASWA members the latest possible information on the SW Market Place. Fliers, brochures, and new releases printed on one side only are preferred.

Easy Listening

Editor: Alex Batman, 4636 Alvin Dark, Apt. 2, Baton Rouge, LA 70820

SUNDAY

1300-1330: "Norway Today" (Radio Norway International). This is Radio Norway's only English broadcast to North America, and it's usually quite good. The program always begins with fifteen minutes of Norwegian news, followed by one of several revolving features, including "Tasty or Not, It's Norwegian," "Letter from Norway," "Trends and Traditions," "Pop Inn," "Made in Norway," and "Listeners' Corner". Just which fifteen minute feature follows the news on any given Sunday remains somewhat of a mystery. I'm sure there's a logical order; I just haven't been able to figure it out yet. Adds the spice of suspense to Sunday morning listening. (15.305. Repeated at 1400 and 1700 on the same frequency and at 0000 on 9.605).

0050-0125: "Music Box" (BRT). Most Sundays this program begins with a selection of hits from the Top 30 in Belgium, giving their current and previous rankings on the chart and sometimes a bit of background information about the performers. The last twenty minutes of the program features Belgian tunes that haven't made it yet to the Top 30. The fourth Sunday of the month, however, features traditional Flemish music rather than current pop songs. Unlike other BRT programs, this one is not repeated the following day. (5.910/9.925)

MONDAY

* 0125-0130v: "Myths and Legends" (RAE, Argentina). The program features Argentine Indian myths and rural folklore, including the history and legends behind many religious festivals in the Argentine provinces. The problem with this program is predictability. Sometimes it's on later in the one hour transmission, sometimes it's not on at all, and sometimes it shows up on Tuesday night (or even some other night). It's a rather interesting program, and it may be worth waiting for if you don't mind listening to an awful lot of tangos in between. (9.690/11.710).

0225-0235: "Tourism" (Radiobras, Brazil). The program reviews the most popular tourist attractions in Brazil, describes the scenery (including the most notable points of interest), and gives some idea of things to do once you're there. One of the most useful features of this program is that it not only gives you an idea of the available accommodations (including the relative prices), but it also tells you how you can get there--trains, and boats, and planes--and what highways lead in and out of the area. (11.74 Every other week).

TUESDAY

1320-1330: "Sports Review" (BRT). The program usually begins with a review and description of one or two of the most important soccer matches in Belgium over the weekend, followed by the league standings in Division I and Division II. Next are the Belgian basketball results and league standings, and finally other sports of interest, like Grand Prix racing, motorcross, cycling, boxing, etc. (15.590. Broadcast earlier on Monday night at 0050 on 5910/9925)

0120-0125v: "Our Personalities" (RAE, Argentina). The program is a brief biography of notable Argentine historical, political, and cultural figures from the founding of Argentina to the present. Like "Myths and Legends" (and it seems, all RAE programs), the problem is predicting just when it will be aired. Nine times out of ten, it's on Tuesday (although not necessarily always at 0120 or so), but that's apparently no guarantee that it will be all the time. I think RAE is purposely out to make life difficult for me. (9.690/11.710)

WEDNESDAY

2240--2250: "Balkan Panorama" (Radio Sofia). This program takes the place of the usual daily editorial review "Events and Developments" on Wednesdays. Like "Events and Developments," it, too, is a series of editorials, but these are strictly confined to stories pertaining to the Balkans: Greece, Yugoslavia, Albania, Romania, Bulgaria, and Turkey (Cyprus included). (9700/11720. Repeated at 0010 on the same frequencies and at 0410 on 7115).

0200-0230: "Unshackled" (HCJB). These are the dramatized true life stories of people who have had severe life problems and have been helped by the Pacific Garden Mission in Chicago (which interrupts the program with an advertisement half-way through). Sometimes there are even interviews with the people themselves. Even though the stories can sometimes be quite interesting, the acting is amateurish, and the background music is a throwback to radio melodramas of the Forties and Fifties. (6.230/9.870. Repeated at 0500. Also different episodes on Monday and Fridays at the same times and frequencies).

THURSDAY

0045--0055: "Culture and Current Events" (Radio Portugal). This program was titled "History and Culture" up until around February, and the only change is that current events are now occasionally included in the program (especially during the recent Portuguese elections). Past programs have featured a biography of Henry the Navigator, a river frigate that has been converted into an art museum, a special on the Ritz Hotel in Lisbon, and the donations of the relics of Maderos de Almados (a Portuguese millionaire) to the national museum. (9.680. Repeated at 0300 on 9.565--and a few times I've heard them on unannounced 6.070).

0140-0150: "Science and Engineering" (Radio Moscow). A science magazine program of pretty fair quality (though sometimes used as a springboard for political ideas as well). Past programs have featured medical developments in the USSR, the Russian space probe to Halley's comet, research on nuclear fusion, and even Reagan's SDI program (with predictable political commentary about it). (7.115/9.700 and other N.Am. Service frequencies.)

FRIDAY

2320--2335: "Newsreel of the Socialist World" (Radio Berlin International). The program usually has two or three major stories--recent co-operation between the GDR and USSR in health services, economic co-operation between other socialist countries, etc--and ends with "Information in Brief", the only true "newsreel" part of the program, which features short items of interest, like a new planetarium, railway construction, drop in the prices of electricity, etc. (6.125/6.165/ 6.070. Repeated at 0020, 0105, and 0150 on 6.980/9.730 and at 0250 on 6.080/9.730, 0350 on 6.010/6.080/9.560 and 0650 on 6.010/6.080. All the transmission to Eastern North America have been moved up fifteen minutes since around early March, but I believe those to Western North America, beginning at 0230, remain the same).

0225-0235: "Cultural Happenings" (Radiobras, Brazil). A short review of the most important cultural events in Brazil. Recent shows have featured a new play by a director who has been absent from Brazil for ten years, a new art museum planned for Brazil, and, of course, the success of the Brazilian film, The Kiss of the Spider Woman. (11.745. Every other week).

SATURDAY

1115-1120: "Clippings from the Chinese Press" (Radio Beijing). A brief review of items of interest in the most important Chinese newspapers, like Peoples' Daily, Beijing Evening News, Economic Daily, and China Youth News. (9.535. Repeated at 1220 on 9.535/9.6 and at 0020 on 15.445/11.685. Also, now that they have their RFI relay, 0220 on 9.635/6.015 and at 0520 on 9.565).

0100-0115: "What in the World?" (HCJB). A news show that features a number of items that would otherwise be overlooked by most international broadcasters, especially items of interest to those doing missionary work--the confiscation of Bibles in the Peoples' Republic of China, attacks on missionaries in South America, Africa, Asia, etc., and court rulings on such controversial issues as abortion, pornography, and prayer in public schools. Also includes five minutes of major international news items and a reflection on the events. (9.870/15.155. Repeated at 0530 on 9.870/6.230).

Oh, yes, by the way, "Let's Speak Latin" in last month's column was an April Fool's joke. As a matter of fact, the program on Vatican Radio at 0050 on Fridays is "The Church Today", and Vatican Radio offers no language course that I know of. Before I even sent the column in, I wrote to Vatican Radio telling them what I was going to do and asked them to forgive me, as I also now ask the readers of "Easy Listening" to do. Now that I've gone to confession, I hope the penance will not be too severe.

Technical Topics

MAY DAZE
OF

Tech Topics Enters the 21st Century

Well troops, it finally happened. Your humble editor is now assisted in his task of bringing you the latest radio drivel with the aid of his trusty Commodore SX-64. My Sears/Smith Corona is now relegated to lesser tasks. Besides, this dingus can help with the spelling (and you all know I need that). For you hacker heads, I am using Omniwriter 64 and Paperclip, reasonable Word Processing programs. Please let me know if the new format makes the column more readable. Also the printer is the Star SG-10C on Near Letter Quality mode. For those of you who think all this computer stuff is Greek, hang in there. These miracles if modern man are becoming so easy to use that even I can fly one. Heck, we even have hopes for Bill Oliver.

This month we feature Paul Lannuier as Guest Editor with his words of wisdom on the venerable Radio Shack DX-160. There once was a time when the Log Reporters section of FRENCH listed many users of this receiver. A poll of all subscribers might have shown that the DX series (the 150, 150A, and 160) were the most used rigs on the block. The DX-160 gave fair-to-middlin performance at a paper-route and borrowed allowance price. Many would say the passing of the DX-160 sounded the death knell for good entry level radios. But I can jabber later. Take it away Paul.

The Radio Shack DX-160 by Paul Lannuier

My DX-160 was purchased in late 1976. I saved something like 6 weeks worth of paper route earnings to come up with the cash, which I believe was \$159. My original intentions for the receiver was to use it for amateur radio activities. Unfortunately, I never did get my ham ticket; but with its help, I did become an active SWL in both the amateur and international broadcasting idioms.

The front panel controls include a main tuning dial, AF gain/OFF knob, an RF gain knob, an antenna trimming knob, BFO pitch, band switch, and bandspread dial. Also there are 4 two-way switches for the Automatic Noise Limiter (on/off), Mode (AM/SSB & CW), Automatic Volume Control (fast/slow), and Operate (receive/standby). Frequency readout is done by a large, colorful analog display, with a separate rotating display for band spread. The band spread itself is divided into 6 scales: 80-, 40-, 20-, 15-, and 10- meter ham bands (10 meters also includes 11 meter Citizen Band), along with a log scale. With the main tuning set at certain red markers, an accurate frequency readout is supposed to be obtained. Other markers, in this case white ones, are for tuning the international SWBC bands, with the use of a conversion chart included in the owners manual. Needless to say, this hardly

works. The rear panel had a screw-type antenna terminal, attached 120 volt power cord, fuse holder (0.5A), speaker jack, 12 volt power jack (3-pin), and stand by switch connector for use with a transmitter. The DX-160 came with an external speaker (SP-150), and a 12 volt connector.

The owners manual is very complete, with plenty of operating tips and many explanations of electrical and radio related terms necessary for a total newcomer (such as I was) to get by with. The last 7 pages of the manual explain antenna principles, SW band allocations, time and frequency conversion, operating notes for each band, Morse code, codes, and a country log.

The manual gave the following specifications:

FREQUENCY COVERAGE: 150 to 400 khz (1w), plus .535 to 30 mhz in four bands.

SENSITIVITY: (on SW bands): approx. 4uv at 10 dB S/N.

SELECTIVITY: Band A -48 dB; band B -65 dB; band C -45 dB; band D -35 dB; band E -20 dB.

FREQUENCY RESPONSE: 300 to 3000 Hz, -6 dB.

AUDIO OUTPUT: 700 milliwatts at less than 10% distortion.

SPEAKER/HEADPHONE IMPEDENCE: 8 ohms.

SEMICONDUCTOR COMPLEMENT: 1 Integrated Circuit, 5 Field Effect

Transistors (FET's), 6 Transistors, 15 Diodes.

POWER REQUIREMENTS: AC: 120 volts, 60 Hz, 3-6 watts; DC: 12 volts negative ground, 30-180 mA.

How accurate these measurements are is a mystery to me, as I do not have the proper test equipment to do my own analysis.

After 10 years of owning this dinosaur of a radio, I still have it in my shack with all my other gear. It is mainly used for amateur reception, as was originally intended; once it warms up, it is a bit more stable on SSB than my SONY ICF 6500W. The audio quality is also more pleasant than the tinny sound of the SONY, so it also gets use when listening to programs from stronger stations. As a DX machine...well, lets just say it ain't no ICOM! To get around the problem of poor frequency readout, I devised my own graphs on which I marked frequencies and names of regular stations (such as BBC/6175) on charts calibrated identically to the log scale on the radio's bandspread dial. After logging a handful of stations on each band, I could compare new stations to the chart to determine an approximate frequency; this worked pretty well. I never did any modification to this receiver, but would be interested in hearing from anyone who has. I am particularly interested in improving CW/SSB selectivity.

Thanks Paul. I modified quite a few of these radios for people replacing the emitter bypass capacitors with tiny ceramic filters. This was about all I could swing in terms of selectivity although I recall once seeing a DX-160 with a Collins mechanical filter installed. My book says you can't get the impedances right to make it a successful swap but, if memory serves, this rig sounded just fine to me. If anyone has any knowledge of this modification, drop us a line. I am really curious to see how this modification was done even though my DX-160 is about six owners past me at this point.

There were a few modifications published for this rig in previous issues of FRENEX. If I can find my old copies under the mildew I'll do a review. Of course you folks could always put pen to paper (or fingers to keyboard) and come up with some new ideas for this fine old receiver.

I think one of the neatest features of the DX-160 was its optional 12 volt power. This made it a great standby rig when the lights went dim. I wouldn't trade my SONY in for one, but I still miss my DX-160.

Well then, who else out there wants to take us all on a trip down memory lane with a review of their favorite old radio?

CATALOG CORNER: This month we have two catalogs from parts supply houses.

Circuit Specialist Co.
P.O. Box 3047
Scottsdale, AZ 85257
1-800-528-1477
and
Digi-Key Corp.
701 Brooks Ave. South
P.O.Box 677
Thief River Falls, MN 56701
1-800-344-4539

Both of these places stock a wide range of semiconductor and other components. They both offer fine catalogs with competitive prices. While they tend to deal more with professionals and computer types I have always found them to be willing to supply the hobbyist.

Well that brings us to the end of another exciting adventure of Technical Topics. Next Month we will discuss how to take full advantage of those Flea Markets and Radio Conventions. Stay tuned folks, and keep those cards and letters coming. 73,

Shij W02GHA

Tiare Publications

FOR IMMEDIATE RELEASE

P.O. Box 493 • Lake Geneva, WI 53147

The winning name has been drawn in the Radio Botswana QSL Contest Attempt.

The lucky DX'er is Nelson M. George of Fayetteville, North Carolina. George has been a DX'er since 1981 and uses an ICOM R71A receiver.

Gerry L. Dexter will now go to work in an attempt to get a verification from Radio Botswana for Mr. George.

The Botswana contest was held to introduce Dexter's newest book - SECRETS OF SUCCESSFUL QSL'ing - The Complete Guide to Reception Reporting and QSL Collecting.

The 128 page book - illustrated with QSLs and with foreword by Ian Mc Farland of Radio Canada International - is available for \$9.95 plus \$1 postage and handling (\$2 on foreign orders - U.S. funds only) - from Tiare Publications, P.O. Box 493, Lake Geneva, WI 53147.

NASWA Awards Program

Awards Chairman: John M. Kapinos, 86 S. Quinsigamond Ave., Shrewsbury, MA 01545

Congratulations to the following folks who received NASWA Awards during the month of March 1986:

Rev. John C. ECKERT, Norristown, PA: World Wide DXer
Ray FORSGREN, Chippewa Falls, WI: Senior Nigerian DXer
Steve FORST, Clifton Heights, PA: World Wide DXer
Kenneth R. HILL, Somerville, PA: All Continent QRP DXer (50 KW)
Sheryl PASZKIEWICZ, Manitowoc, WI: Arab World DXPert
John WILKINS, Wheat Ridge, CO: All Voice of America DXer

** KAP'S KOMMENTS **

We are pleased to announce the availability of the all new 1986 edition of the NASWA Radio Country List and Awards Program booklet. Due to increased production costs, we have been forced to increase the price to \$2.00 via First Class Mail in North America, \$3.00 U.S. Airmail to the rest of the world. IRC are acceptable at U.S. 50¢ each. This new booklet includes all of the new Awards that have been announced in the past few years and also a very comprehensive country listing, thanks to our Country List Committee Chairman, Don Jensen. Kindly place your orders directly with me at the address above.

Over the past few years we have accumulated a large selection of West German 1.60 DM stamps (the air mail rate from there to the U.S.). We'd like to move some of them out, so a special price of 50¢ U.S. until they are gone. That's quite a bit under face value at today's rate of exchange. An SASE or IRC would be appreciated also.

If anyone would like a photo of ye olde Kap just drop us an SASE. Your photo would also be welcome. If nothing else mine make great dartboard targets.

NASWA Publisher Bill Oliver tells me that he has a new stock of Foreign Language Reporting guides in stock. Available are French, Spanish and Portuguese. 75¢ each, please order these directly from NASWA HQ in Levittown, PA.

We've still had no response to our request for Radio Moscow Portuguese and French report forms. We would like to have these to distribute to our readers. Any replies will be greatly appreciated.

Every now and then we louse up an Award, usually by misspelling the recipient's name. Should this happen to your Award, just return it to me and a replacement certificate will be sent to you. We can also supply duplicate Award certificates if your's have become damaged over the years. The regular price applies here, kindly furnish me with the Serial number of the Award or at least approximately when it was issued.

It's not too early to start planning for the ANARC Convention this July in beautiful Montreal. Full information is available from the Convention Committee at: RCI, PO Box 6000, Montreal, PQ H3C 3A8. With the U.S. Dollar at a record favorable rate against the Canadian "lucky buck", costs will be very reasonable and I can assure that a good time will be had by all. If you are planning to fly up, make your airline reservations early to take advantage of "Super Saver" type rates, which are often less than 50% of the regular ones.

Till next month,

BEST

Twilight Listening

On start up, you enter the UTC time and date you want scanned. The program then computes, for each transmitter location stored in memory, the geographical coordinates (gc's) of the reflection points at the ionosphere on the path to the receiver assuming a maximum hop of 4000km. For example, to the Cook Is. from St. Catherines, Ontario is a distance of about 10000 Km, requiring 3 hops. The program finds the gc's of these hop points. Of course other paths are possible, but for long distances, this is probably dominant, and in any event, the only one for which the hop points can easily be computed. Next, the program determines for each hop point the times of sunrise, sunset, onset and end of twilight (accurate to a few minutes; the equation of time and declination of the sun are computed from the date entered). Then, it determines whether each hop point is in darkness, twilight or light. It then prints out the darkness paths with at least one hop in twilight or through a polar dark region, on the assumption that these hops might enhance the signal.

John Auer
 5 Vergorde Circle
 St. Catherines, Ontario
 L2T 2P1

ED's Note: NASWA member John Auer is a mathematician at Brock University in St. Catherines, Ontario. He wrote Twilight Listening on a Burroughs 7900 mainframe, however, the program will run on any micro with at least 5k of memory. The program DATA statements contain the following 5 items in this order: transmitter location, longitude degrees, longitude minutes, latitude degrees, latitude minutes. You must use a minus [-] sign with west longitude degrees and minutes as well as south latitude degrees and minutes.

To check the program after typing it: enter only the data statements printed here and run the program. Enter 0,0 for time and 25,1,86 for the date. The listings for Belize and Costa Rica will be printed out. If you get other results, there is an error. If the program is OK, you can then enter your own data.

HOW TO CHOOSE A SHORTWAVE RECEIVER THAT FITS YOUR NEEDS

by
Lawrence Magne

The good old days? You remember them. No crime, no drugs, the trains ran on time, and grandpa's automobile was crafted to last a lifetime. Shortwave radio was at its peak, too, with excellent sets providing pleasant audio.

Of course, as with grandpa's automobile, hazy nostalgia comes with the truth. Shortwave did sound better 40-50 years ago...but not because of the receivers. It was because there were so few stations on the air that interference was a relatively minor problem. With stations spread liberally throughout the shortwave spectrum, receivers utilized wide bandwidths to let in all those lovely high audio frequencies. With decent fidelity assured from the transmitter through the receiver's bandwidth filtering, manufacturers often went the last step to assure pleasant audio by designing high-quality audio stages and loudspeakers. True, these old sets needed periodic realignment and new tubes, plus their resistors fried and wax-coated paper capacitors dripped and shorted. But when they worked they did sound oh-so-good.

Obviously, one alternative in your quest for a suitable shortwave receiver is to consider one of the better tube-type veterans from the 'Golden Age' of radio. Among the lesser-known assets at International Broadcasting Services, Ltd., is a pre-WW II Hammarlund Super Pro 400, formerly (and briefly) owned by none other than NASWA's wagonmaster, Bill Oliver. This receiver, which has been overhauled and aligned to near-perfection by vintage receiver boffin Steve Bohac, features mellow audio and a platoon of tubes to keep the office warm even during a January 'Siberian Express'. Its frequency readout is surprisingly precise, once you do some jiggling and twiddling, and with its massive hulk and beefy controls it has the feel and appearance of Authority.

Trouble is, the world of shortwave broadcasting isn't what it used to be. What was once a relative handful of selections has since mushroomed into a smorgesbord of choices. Stations are crammed alongside each other more tightly than ANARC conventioners at a new receiver display. So while our SP-400 museum piece continues to provide wideband reception, our ears vote to turn the thing off. Sure, it sounds great when tuned to Spain on 9360 or Vietnam on 15010; these are so far out-of-band that the only interference is from passing seagulls. But when you're trying to hear Luxembourg on 15350 -- or nearly any other station in-band -- that wideband receiver not only lets in the channel you want to hear, but also its gabby neighbors. The result is a wideband cacaphony, and no amount of knob twiddling helps.

Still, not all tube-type receivers fare this badly. Some of the veterans from the 1955-1975 period were designed to cope with conditions of high adjacent-channel interference. When they are priced right and are in good operating condition, they can continue to provide very enjoyable results, provided you are able to keep them properly maintained. In this regard, certain makes are preferable to others. The R.L. Drake Company continues to provide service and parts even for its earliest models, which go back a quarter century. At the other extreme, Hammarlund folded up years ago.

But if you're prowling around hamfests or the classifieds for one of these 80-pound heavyweights, models to consider include any of the R-4 series made by Drake; many of the R-390 and related series made for the U.S. Government by Collins, Hammarlund, and Motorola; The HQ-180 series made by Hammarlund; The Super Pro 600, also by Hammarlund; the SX-62, SX-100 and certain other larger Hallicrafters models; and the British-made Racal RA17 series.

* * *

In practice, you almost certainly will prefer to live with a new receiver. Although solid-state shortwave receivers got off to a rough start, what with such dismal models as the 1962 Heathkit Mohican, they have in the past few years made up for lost time. Inexpensive ceramic filters are now capable of providing superb selectivity. Hit-and-miss tuning has been replaced by all manner of tuning aids from precise digital frequency readouts to keypad frequency entry to fully automated computerized tuning. Reliability is up, but price, size, and cost are down. And the dismal audio quality of many recent models is gradually being supplanted by advanced-technology reception systems that improve audio quality while further reducing interference. So while AM and FM radio sound pretty much as they did fifteen years ago, and TV looks the same, shortwave reception today is much improved over what it was fifteen -- or even ten -- years back.

Provided you purchase the right shortwave radio, and that's the rub. Most people know more about particle physics than they do shortwave radio, so as the word has leaked out that something wonderful is happening to shortwave, all manner of hucksters and fast-buck artists have moved in for the kill.

One of the worst problem is the marketing of old-technology shortwave radios by credit card companies, airline and magazine direct-marketing operations, along with some retail radio outlets. Most of these abominations use technology from the 1960's and come with frequency guides that may be years out of date. The results for the hapless buyer are predictable: dreadful, noisy reception with no indication of where or what one is tuning. The sharper makes his fast buck, and the buyer -- stung and disappointed -- abandons shortwave listening, perhaps for life.

* * *

What should you look for in a shortwave receiver?

First, price and portability. At present, the careful shopper can obtain a decent double-conversion travel portable for as little as \$65. At the other extreme, exotic professional communications receivers sell for upwards of \$2,000. But, for most serious shortwave listeners and DXers, the optimum mating of price and performance is in the \$100-300 range for portables and \$300-950 range for communications receivers.

For a first set, it makes little sense to spend great sums, as you may find that shortwave is not your cup of tea. On the other hand, if you don't choose something that performs reasonably well you will not experience the fidelity potential of the medium. As a NASWA member, you are almost by definition a veteran of the medium, but the point is still well taken: to define what you seek and can afford, then to study the marketplace for a suitable selection.

Do you travel? If so, will you want a portable to take along? And, if so, would you rather have a single high-caliber portable for use both at home and on trips, or would two sets -- a small, inexpensive portable and a more sophisticated communications receiver -- be more appropriate?

In general, the answer will be determined by your degree of interest in the medium. If shortwave listening is one of your passions, you're not likely to be satisfied with a \$150 portable as your sole receiver. In this instance, the best bet would be to obtain a reasonably priced portable, then supplement it with a worthy communications receiver for use at home.

Once you have resolved the questions of price and portability, the more complex issues of features and performance have to be resolved. Unfortunately, there is little assurance that specifications and descriptions found in sales literature will mean that a given model will perform the way you might be led to believe. For one thing, specifications are often given selectively. Measurements that might reflect ill on a model may be omitted altogether or replaced by meaningless data (a classic diversionary tactic is to omit dynamic range or some other meaningful measurement, but to wax eloquently about the loudspeaker, e.g., its size, or that it has a genuine Alnico permanent magnet). However, there are a number of clues as to what separates an acceptable model from a squawk box.

Who Do You Trust?

From a manufacturer's viewpoint, features can be a low-cost means to entrap the gullible. From the buyer's standpoint, better alternatives than relying on sales literature include reading unbiased published reviews, asking others about their experiences, talking with salespeople, and trying out various models.

Published Reviews

Anybody can publish for ego or enrichment, so you need to 'review the reviewers' to your own satisfaction before committing yourself to a purchase made on the basis of a published review. Is the review done systematically, or does it represent one listener's subjective impressions (subjective individual impressions can be useful, but belong in the category of 'asking others about their experiences')? Is the review gushy and one-sided, like a sales talk or your neighbor talking about his favorite sports team, or does it appear that the reviewer's aim is to call the shots -- warts and all -- straight? Does the review focus on what is important, or does it skirt controversial points by dwelling on secondary matters? Is the reviewer or publisher employed by or otherwise beholden to the manufacturer whose equipment he is testing?

The optimum review is a mix of quality laboratory tests and experienced user evaluation performed in concert. Nothing equals good lab tests in determining the details of performance. On the other hand, lab tests in isolation can be misleading, especially if the tests are not tailored to the specific requirements of shortwave broadcast listening. An experienced engineering-oriented listener, armed with worthy lab reports, can lace through the plusses and minuses of a given model with surprising accuracy.

Conferring with Others

Conferring with others can be a useful way of finding a given model's plusses and minuses, especially if you contact a large number of users, such as NASWA club members. Especially helpful are those 1) whom you trust, and 2) whose receiving environment and objectives are comparable to yours. If cousin Charlie has always given you good advice over the years and -- like you -- likes to hear Radio Blotto evenings and lives in a garden apartment, then his thoughts will almost certainly be valuable.

At the other end of the scale is the sales person. Surprisingly, perhaps, the chief problem with salespeople is not bias, but lack of experience with shortwave. The local Electronics Heaven may know computers or hi-fi or amateur radio, but is not likely to be authoritative about shortwave listening. For this reason, among others, shortwave specialty stores have sprung up. These tend to be much more knowledgeable. Of course, if you are interested in a Glatzenpopper 635 and they don't carry it, don't be naive and expect the salesperson to heap praise on it.

Trying Out Receivers

With cars, you usually take a test drive before sealing the purchase. Why not do the same with a shortwave radio?

If you can compare several models side-by-side at various times of the day, when propagation varies, and with comparable antennas hooked up -- and you are experienced enough in shortwave listening to know what to look for -- this can be a very effective procedure. Problem is, shortwave receivers are almost never sold this way. Various shortwave-oriented firms have tried this, but usually have given it up because most of their sales are by mail and the bother and cost of such a showroom are not worth the few extra sales generated. Two exceptions in the US are Electronic Equipment Bank near Washington, DC, and Universal Shortwave near Columbus, Ohio -- both of which have fully-equipped shortwave radio showrooms with outdoor antennas. If you're in Japan, many stores in Tokyo's Akihabara shopping district are similarly equipped.

What to Look for in A Receiver

Once you have decided on how to find out whether a receiver is suitable, you then have to poke through the various performance and feature characteristics to see whether they apply to your situation.

Accurate Frequency Readout

Will you be able to find a station easily? If it takes a flick of the wrist to find TV channel 3, why should you have to hunt and peck about the radio wilderness to find 15125 kHz?

One of the world's finest radio monitors, Tony Jones of International Broadcasting Services in Paraguay, answers in the negative. He feels that one of the best ways to become a first-rate monitor or DXer -- as opposed to a shortwave listener -- is to bandscan using a receiver without precise frequency readout. This forces the operator to rely on programming and other aural clues to ascertain a station's identity, and in so doing imparts skills that are invaluable if one is to be truly expert.

Nowadays, most advanced shortwave radios provide digital frequency readout to the nearest kilohertz or better to tell you precisely where you are tuning. A low-cost compromise involves 'bandspreaded' analog frequency readout, but this technique is dying out as digital electronics circuitry comes down in cost.

Other tuning aids include programmable channel memories, up/down pushbutton or scan frequency slewing, and keypad frequency entry. Whether these are of interest is a matter of taste. Remember to look for a tuning knob or high-tech alternative, not simply a pair of one- or two-speed slew ('up'/'down') buttons.

With a digital frequency readout, you can use an accurate shortwave reference to set your radio immediately to what you wish to hear. You also can have a good idea of what you're hearing should you be tuning about and come across a station you can't immediately identify. But in order to do so, you need some sort of 'roadmap' to let you know what's on the shortwave spectrum. There are literally thousands of signals on the air, so sorting them out is no mean feat.

This need for suitable shortwave references was the genesis of Radio Database International and the World Radio TV Handbook. The RDI is a two-volume guide for daily use, whereas the WRTH is a reference tome, so active shortwave listeners tend to keep both on hand.

A radio should cover the complete shortwave spectrum from 2.3-30.0 -- or at least 3.2-26.1 -- MHz if it is to be of use night and day, year after year.

'Multiple conversion' -- usually double conversion -- helps reduce the presence of 'images' that create unnecessary interference to what you're trying to hear. Demand it if you value your hearing and sanity.

The shortwave broadcasting bands are crammed, often viciously so. The ability of a radio to separate what you're trying to hear from competing signals is probably the most important feature to look for in a shortwave receiver. This vital ability is termed 'selectivity'.

Selectivity consists of three main variables: 'bandwidth', 'ultimate rejection', and 'shape factor'. Ideally, the desired signal is completely boxed off from competing signals on adjacent frequencies. Thanks to enormous advances in ceramic filter technology, this ideal is being approached in the best of the newer models.

'Bandwidth' refers to the amount of signal that will be let in when the station you want to hear is of comparable strength or stronger than competing stations on adjacent channels. With the 5 kHz channel spacing norm in effect for shortwave broadcasts, bandwidths of between 4-6 kHz are common on shortwave receivers. But reception conditions vary from situation-to-situation and day-to-day, so better shortwave radios include one or more narrower bandwidths.

'Ultimate rejection' refers to the maximum signal depth at which a receiver can isolate a desired signal from a relatively powerful signal alongside.

'Shape factor' -- a very important figure -- refers to the ratio between the bandwidth when adjacent stations are of comparable strength (within 6 dB of each other) and when the competing signal is far greater (usually 60 dB stronger) than the signal you're trying to hear. If the difference in bandwidths is 1:2 or less, the shape factor is excellent.

'Dynamic range' refers to the receiver's ability to pick up weak signals in the presence of strong signals in the vicinity. This ability is best measured in the lab, using stringent measuring norms suited to shortwave broadcast listening. However, the end result is that a set with mediocre dynamic range will produce a mishmash called overloading, which then has to be 'cured' by desensitizing the receiver (e.g., switching in an attenuator).

Sensitivity was prized years ago, when weak stations were the norm. It continues to be an important variable, but in reality few communications receivers suffer from inadequate sensitivity. However, portables tend to be relatively insensitive when used with their telescopic antennas and batteries, so a measurement of 'field sensitivity', using the built-in antenna and a nearby test transmitter, is particularly useful for portables.

With modern synthesized receivers, stability is usually good, often excellent. Still, there are exceptions, which testing flushes out.

High-Tech Detection Reduces Interference, Fading & Distortion

An important use for a receiver with first-rate single-sideband reception qualities is in receiving ordinary double-sideband broadcasting signals as though they were SSB. This technique, known as exalted-carrier selectable sideband (ECSS), allows the listener to choose the quieter of the broadcaster's two sidebands. For example, if Canada on 17820 kHz is interfered with by jamming splatter from 17815 kHz, Canada's lower sideband is likely to be seriously degraded, whereas its upper sideband may be sufficiently clear of the jamming that it comes in free from interference. Not only is ECSS capable of reducing or eliminating interference, it also replaces the fade-prone transmitted carrier with the fade-free carrier synthesized within the receiver. This results in reduced distortion -- not only on shortwave, but also on mediumwave AM.

Problem is, ECSS is tricky to tune, and even when carefully adjusted is not quite what it could be. So manufacturers are now producing receivers with automatic phase-locked exalted-carrier selectable sideband (ECSS-s). When these models perform properly, they provide substantial and audible advantages over conventional receivers.

Should Receivers Be Modified?

Should your receiver be modified?

In the past, receivers were often marketed with selectivity shortcomings that could be remedied by clever technicians. As a result, some shortwave specialty firms began offering selectivity enhancements, sometimes supplemented by other modifications. Sometimes these modifications have been helpful in improving receiver performance. However, in other cases improvements have been minor relative to the cost and untoward side effects resulting from tampering with the receiver's circuit design. With the passage of time the proportion of receivers with mediocre selectivity has been reduced, so modifications are becoming progressively less necessary.

At International Broadcasting Services, we examine and test modified receivers separately from 'stock' factory models, then publish our findings in Radio Database International and the World Radio TV Handbook. Only thus have we found it possible to ascertain with accuracy whether a given modification or series of modifications is worthwhile.

With common sense and careful research, you can obtain a state-of-the-art shortwave receiver that provides surprisingly good results under reception conditions worse than those which formerly stumped the then-available shortwave models. Unlike the pleasant old sets of the 1930's, today's models tend to be compact and reliable, while allowing you to know exactly where you're tuned. Thanks to digital chip technology, these advanced sets are affordable and can provide surprisingly pleasant fidelity, given the trying conditions found within the congested shortwave spectrum.

Lawrence Magne, who edited FRENCH's 'Log Report' and 'Clandestine Bulletin' in the early 1970's, has been an annual contributor to World Radio TV Handbook publications since 1972 and is Managing Editor of the Radio Database International series of publications. He is also a regular voice over Radio Canada International's 'Shortwave Listener's Digest' and maintains Radio Database International's monthly presentation for shortwave listeners over Swiss Radio International and Radio Canada International.

Larry, who was awarded an M.B.A. in 1964, has participated in computer database design and management since the mid-1960's. He currently is President of International Broadcasting Services, Ltd., with headquarters in Penn's Park, Pennsylvania. In addition to radio and television guest appearances, he finds time to contribute articles to such varied publications as High Technology and American Express' Expression!, along with a variety of specialized radio magazines and books. In 1980 he was chosen 'Man of the Year' by the Association of North American Radio Clubs in recognition of his achievements in the fields of international broadcasting and shortwave listening.

His wife, Jane, is a molecular biologist at the University City Science Center in Philadelphia. When not busy working, they may be found tilling the fields at their colonial farm in rural Bucks County.

contrary, above sked already takes into account DST; should have said one hour
later after summer time (gh)

B O L I V I A Noted on 19/3, Radio Santa Ana from early 2245 f/in to an apx
0400*. Best 2330 to beyond 0100 when clear of SSB tfc; sig a solid fair.
Readout of 4749 kHz. SSB QRMing intermittent, but severe when present. Much
of mx the very romantic serenade variety so typical of the Beni region. On
several occasions hrd a song by cute-voiced girls singing "O Mi Papa"--almost
thought it was their theme song, but apparently not--just a very popular song
at Santa Ana. Primary ID noted as "Ésta es Santa Ana, La Radio!" Checked a-
gain 25/3 2430 & was present at P level to VP; suspect 19/3 reception was on a
VG evening. Thanks to Codina & Nuzzi reports in Play-DX via Dec LN, ID of
this made easy (Maxfield Greenwood, Sedgwick ME)

B R A Z I L R Verdes Mares, Fortaleza, 4924.6, 19/3 & 20/3 2350-2435, G-VG
(Dario Monferini, Italy and Juan Carlos Codina, Switzerland, Play-DX) That
name belongs to a MW stn on 810; R Dragão do Mar was on 4925 since 1975; both
are in Fortaleza, Ceará. R Globo, 11805, vy strong 30/3 from 0100 w/PT nx &
mx; also hrd two Globo spurs on 11783.3 and 11826.6; don't confuse these w/R
Guaíba or something else (Ernie Behr, Kenora Ont)

R Dif de Amazonas, 4805, 0236-0244* 2/4, SIO 444, Braz pops to ID & sudden
off (Richard A D'Angelo, Wyomissing PA)

C A M B O D I A V of the People of Kampuchea reported 29/3 that from 1/4 it
'd add 45 mins to midday pgm daily (WBI 3/4)

C A N A D A RCI's sked from 30/3 shows reorganisation in xmsns to Eu, moving
them so that local time in reception area remains same summer and winter.
This summer, bcs in Czech/Slovak, GM & HC are simply one hour earlier by UTC
than in winter, but pgms in Polish, Russian and Ukrainian reorganised and in-
creased--now two half hour pgms in PL at 1500 & 1800 instead of one 45-min
xmsn. Now four half-hour bcs in RS at 0215, 1330, 1530, 1930 and two in UK,
1400 & 1600. Output in both langs has increased by 1:45 a week to 14 & 7 h
resp. EG & FR slightly reorganised and reduced (WBI 27/3)

SWL Digest sked w/J86 fqs: Sat 2035 on 17875 17820 15325 11945, D9555 &
D7130. Sat 2135 on 17820 15150 11945. Sun 2305 on 11710 9755 M930. Mon 0306
on 9755 5960 (gh)

C H I N A On 15/4, R Beijing began relays via RFI, French Guiana! 0200 EG
NAM 6015 9635, 0300 SP Mex/Cam 9565 9635, 0400 Std CH NAM 9565, 0500 EG NAM
on 9565 (RB via George J Poppin & gh) 9565 is excellent after the QRM clears
before 0500; 9635 fair, and 6015 co-channel Nicaragua; overall, quite an im-
provement in ENAM over the direct xmsns (gh)

C O L O M B I A LV del Llano, 6116, hrd 6/4 at 0604 w/EG anmt & ID: "Inter-
national Voice of the Llano...25 years of service...welcome to SW listeners,"
pgm of Col mx, vy strong (Ernie Behr, Kenora Ont)

DPA nx agcy, Hamburg, reported from Bogotá 29/3 that the Colombian Emisor-
as CARACOL net, grouping more than 50 stns, and the most important in the
country, has been on strike for 25 days. The problem, unprecedented in Col
comml radio, originated from disputes betw owners and the workers' union over
job stability and wage increases. Since CARACOL execs have rejected Labour
Minister Jorge Carrillo Rojas, alleging that he was assuming a position con-
trary to their interests and favourable to those of the workers' union, Pres
Belisario Betancur appointed Educ Minister Lilian Suárez Melo, legal special-
ist, to try to secure an agreement between the two parties (WBI 3/4)

C O S T A R I C A No sign of R Lira/AWR on 15460; other fqs mentd in Dec
85 were 11870 & 15210 w/2.5 or 5 kW (Ernie Behr, Kenora Ont)

/Cf March LN-23/ The planned 500 kW relay for REE/SFR here is another ex-
ample of extreme overkill and shows incredible ignorance about propagation and

actual reception conditions in the western hemisphere. To get an idea what 250 kW from the Caribbean sounds like, just check Habana on 6100 or Antigua on 6085. A 250 or 100 kW relay would be more than sufficient to cover the Americas, and SWLs should urge SFR to change their plan before it's too late. Another solution would be a common relay site for SFR and R Japan in Panamá, as proposed last year. (Ernie Behr, Kenora Ont)

Meanwhile, another new CR SW stn is planned, but this one is low power, probably too low—2.5 or 10 kW w/yagis on 19 and 49m—Radio For Peace, in cooperation with World Peace University in Portland OR. Currently raising funds and hope to be on in about 6 months, producing pgms in Oregon for automation system. Covered in detail on WORLD OF RADIO weekend of 18/4 and in REVIEW OF INTERNATIONAL BROADCASTING 108 (gh)

CUBA Cuban TV reported 29/3 on planned improvements in broadcasting there. Last year, 40 projects were started and they're expected to be completed during the first half of this year. R Rebelde and R Progreso'll cover the entire natl terr and each prov stn'll cover all its municipalities. Old towers as well as xmtrs and TV relay towers'll be replaced and others'll be installed in required areas. A lot of this eq'll be manufactured locally. Low-powered relay towers'll run on solar batteries, thus saving energy. Work is being done to create a channel w/spl pgms for Guantánamo and the Isle of Youth and a third channel is being considered for the capital and Havana province. There are not the technical possibilities for other provinces. BCing TV pgms via satellite'll be the greatest contribution in this field during the 5-year period (WBI 10/4)

Since 22/3 0242 I've been hearing the relay of Russian svc on 4745 instead of 4765; still 4745 on 25/3 (Christos Rigas, Chicago IL)

CYPRUS see MOROCCO

DOMINICAN REPUBLIC R Netherlands reported 3/4; R Discovery, the V of the Caribbean in English, and R Descubrimiento, LV del Caribe in SP, has been testing a SW xmtr from Santo Domingo since 31/3. Daily tests incl Carib mx, anmts in EC & SP for N&SAM between 18 & 20 GMT on 15045 and 01-03 on 6220; currently 50 watts but should be at full power of 1 kW soon. This is a full-fledged SW stn not connected w/R Earth, which is a pgm via other xmtrs from somewhere else. Addr for R Discov is: Box 25454, Tampa FL 33622. The R Earth people are going ahead w/plans to build a 50-kw SW xmtr on Curaçao (WBI 10/4) Jeff White also revealed that the name came both from the DR being /one place/ where Columbus discovered the New World, and having been the name of a shop run by one of the stn's Florida owners. And Mike Poulos of R Earth in Evanston reveals that White has resigned from RE, in order to pursue RD and other business interests (gh) /cf Apr LN/

FINLAND R Finland reported 19/3: MinCom has granted Yleisradio—FBC—just under 25 megafinnmarx in assistance for bldg the Pori bc stn. Govt'll pay 2/3 of the finance of 102 MFM needed; Pori to be completed by end of next year.... This report is practically identical to one bc 28/8/85 (WBI 27/3)

GERMANY WEST For those who'd like to draw a distinction between DW and pgms produced by DLF & carried on DW SW xmtrs, the latter are sked: 0430-05 CS & 05-0530 PL 11905 9650. 1030-1120 CS 7150 7130 6020 5995. 1130-12 HG 7130 6065 6020. 1215-1250 PL 7130 6065 6020. 18-1830 PL 11865 9615, 1830-1930 CS same, 1930-2030 HG same (WBI 10/4)

GUAM Per Andrea Steele, talking on RA's Talkback pgm, AWR is to use four TCI 611 curtain array ants, along w/two Thomsen CSF xmtrs from France. It is expected that this stn will get on air no earlier than Aug or Sept 1986 (Jim Conrad, Waterloo IA)

GUATEMALA R Maya on 3325 at 1050-1107 2/4 w/Latin mx, light conversation by M; nice "Radio Maya" ID by W at 1105, SIO 343 (R A D'Angelop, PA)

J O R D A N Petra-JNA nx agcy, Amman, reported 5/4: an agreement betw the Jor govt & the Swiss Brown Boveri Co to set up an integrated radio stn was signed at the Jord Central Bank 5/4. Stn comprises radio xmsn eqp covering SW, MW, LW and'll cost 14.5 Jordanian megadinars. Project'll be implemented in 28 months. Signing the agmt were Info Min Muhammad al-Khatib, /appropriately surnamed -gh/, company reps, Finance Min Dr Hanna Awdah, and reps of the Swiss & German banx which'll finance stn w/joint loan. Info Min said it'd provide complete and excellent radio coverage on local & Arab levels and that radio xmsns'll reach a number of regions w/complete clarity via SW (WBI 10/4)

M É X I C O R Universidad de Sonora hrd on 6115 at 1405 23/3 w/fqt IDs and local mx (Christos Rigas, Chicago IL)

MONACO see MOROCCO

M O R O C C O R Médi-Un hrd on 9575 since 9/3, ex-9580 and 9577; strong 4/4 from 2130 pop mx, 2200 FR mx, more mx to 2250 REE s/on (Ernie Behr, Ont, 8/4)

R Monte Carlo hrd on 9795 since 19/3 w/all-mx pgm 1800-2100*; 22/3 & 23/3 had AR & FR pgm, 24/3 only mx, not hrd since 30/3; vy strong sig & RNMN 3/4 said via Cyprus xmtr, gave addr: SOMERA, 78 Ave Raymond Poincaré, 75016 Paris France (Ernie Behr, Kenora Ont, 8/4) /submitted as Cyprus?/

Monaco: Monitoring 19-25/3 shows R Monte Carlo testing since at least 19/3 on 9795 at 0500-0953 & from 1450, and 15465 between 1000 & 1450. On week-

days test xmsns have consisted o'pop mx fqtlly interspersed w/stn ID jingle "RMC - Radio Monte Carlo". On the weekend of 22/3 & 23/3, these channels carried RMC Arabic svc which is normally only available on MW 1233 from Cyprus. This svc also contains some nx in FR. Aerial bearings tend to indicate that 15465 and 9795 might possibly come from the same location as the Radio Mediterranean Int'l (Médi-1) xmsn on 9575 (WBI 27/3)

Monaco: RMC continues to xmit mainly on 9795, but partly on 15465. They have increasingly consisted of a relay of RMC Arabic svc rather than just pop mx interspersed with an RMC jingle. An anmt monitored from RMC-Arabic on 1233 from Cyprus said from 1/4 it'd start at 05 and end at 2030; until now it has been on the air at 04-07 & 11-21 (WBI 3/4)

Monaco: RNMN 3/4 had a translated phone interview w/a: French speaking spokesman from Sofirad: At the moment we're testing 9795 around 05-21. I'm an adviser for Sofirad, a holding co representing amongst others the interests of Radio Monte Carlo. And RMC has interests in turn in a group called SOMERA (Société Monégasque d'Exploitation et d'Études de Radiodiffusion) and it's SOMERA which is doing the tests. The tests are IDed as coming from RMC and not from SOMERA because that's the agreement that SOMERA has w/RMC as regards bcs to ME. Now, RMC has powerful xmtr in Cyprus on MW 1233, at the moment for commercial pgms in FR & AR and that's been running for about a sesquidecade. But listeners in the ME have asked us to provide SW coverage as well. Now, the SW xmtr is also in Cyprus but I'm not sure of the power being used at the moment. We are interested in reception reports from listeners and we've already hrd from some in Waf.

Monitoring research 1-7 Apr: aerial bearings indicate that RMC on 9795 is coming not from Cyprus but from a site in Morocco, possibly from Nador where the xmtrs for Médi-1 are located (WBI 10/4)

In Australian DX News, Bob Padula says there is no evidence for any new HF facilities on Cyprus; and Morocco seems the likely site, but not via VOA Tangier, which has no spare xmtr capacity for RMC or Médi-un (gh)

NETHERLANDS RN's Apr pgm notes issued in Mar says there is internal reorganisation. Many depts were reorganised, to be completed by mid-Apr and should help streamline present pgm production. Some lang sections, incl EG are being split up into World, Asia and Africa sections, working more closely w/otherlang colleagues serving similar target areas. These internal structural changes'll not suddenly mean we change our ID to R Neth WS. However, our Asian pgming in particular will be adapted to go live as much as possible. BBCMS ed note: since 10/3, RN "Afroscone" nx in EG at 1630, 1830, 2030 has been bc once a week only, on Fris, instead of also on Weds. This had happened while output to AF was being reviewed and plans being made to revise it (WBI 27/3)

PAKISTAN R Pak back on 9465, hrd 12/3 from *1642 IS & EG, 1744 UD pgm to 1900*, also in FR *1912-2015*. Was on 9545 for several weeks in Feb, as reported on SWL Digest 15/3 & Apr LN; not a mistake (Ernie Behr, Ont)

On 9465 1713-1725 6/4 w/nx by W, 1715 ID "This is R Pakistan WS", then commentary and TC for 20 mins past 10, PST; into Pak mx; SIO 444 (D'Angelo)

PERÚ R Melodía on 6260 6/4 0520-0537 w/Pv mx, long anmts, banco ad, TC, 0531 nice ID, SIO 333 (Richard A D'Angelo, Wyoming PA)

Panamericana TV net, Lima, reported 2/4 that José Eduardo Caveró, owner of R Victoria, R Reloj and radio net in the provs, 1/4 went to Govt House to thank Pres Alán García for return of these stns, which were confiscated a sesquidecade ago by mily admn. Caveró said, newspapers from Chicago, Miami, Argentina and Chile have reported this event as something out of the ordinary. We can now say that we do have freedom of expression in the country. In the past it was said that we lived with local freedom of expression, but this was not true because as long as 25 radio stns remain under govt control, one could not say that there was FOE (WBI 10/4)

PHILIPPINES R Veritas Asia, the Roman Catholic stn, obs using one SW xmtr since gmt late evening 17/3, i.e. morn of 18/3 local time. Monitoring confirms this sked: 22-2225 Korean 9585. 2230-2325 Std CH 11725, 2330-2355 Karen 11725. 00-0030 Sinhalese & 0030-0055 Tamil 11730. 01-0125 Burmese, 0130-02 Telugu, 02-0230 EG, 0230-03 Viet all 15195. 1030-1125 Std CH on

11770. 1130-1155 Karen 9695. 12-1225 JP 9560. 1230-1255 Korean 11830. 13-1330 Burmese, 1330-14 Kachin, 14-1425 Tamil, 1430-1455 Viet, all on 9595. 15-1530 EG 9540. 1530-16 Bengali 9540. Nine svcs from the sked before Marcos' fall are no longer obs: 2330-2355 Indo, 2330-2355 Viet, 00-0025 JP, 0030-01 EG, 1130-1155 IN, 12-1255 VT, 13-1330 Std CH, 1330-14 Telugu, 1430-15 Sinhalese. RVA xmits two pgm blocks daily, 22-03 & 1030-16. Stn ammts continue to say RVA is on the 31, 25 and 19 mbs, but each pgm hrd on only one fq. 21/3, ammt at end of JP pgm: Our stn is now operating experimentally; still unk when normal opn'll begin, nor know we exact fqs to be used, but'll be ancd (WBI 27/3) & I hrd somewhere since that 2nd xmtr was back on the air (gh)

Q A T A R My unID on 9585 in Apr LN is possibly Qatar; hrd again 21/3 from *0243 w/IS & AR pgm, weak sig & mod; this is s/on time of Qatar per WRTH. AR stn on 11730 at 1530-1700 probably also Q, hrd 5/4 mixing w/Tunisia in AR. Q on 9905 not hrd since Mar; does anyone have their new sked? (Ernie Behr, Ont)

R W A N D A ? Stn hrd u/CHU on 3330 at 0400 22/3 w/apparent nx in unID lang (Christos Rigas, Chicago IL)

T H A I L A N D R Thailand ES, all on 11905 9655 927 and 97 MHz: 23-0430 EG, 0430-05 FR, 05-06 EG, Sat/Sun 0600-0800 music. 0915-1000 Laotian, 10-1030 Std CH, 1030-11 Thai, 11-1130 Viet, 1130-1230 EG, 1230-1310 Cambodian, 1310-14 Malay, 14-1430 JP, 1430-15 Burmese; all targeted as Eu/As/Au/Am/Dom.

R Thailand first pgm on SW: 2230-07 7115 6070 4830, 07-10 7115 6070, 10-16 7115 6070 4830 (WBI 27/3) Among the pgms is a preview of the week's news, Sat & Sun 1400-1420, a neat trick, or is all the nx managed in Thailand? (gh)

T U N I S I A RTVT on 11730 was clear from 1700 in AR to 1727 RN s/on, also in AR, 5/4; RTVT on 11750 same day w/diff AR pgm 1615-1849*, varies to 1852*; 11730 closes at 1753*v; also see QATAR (Ernie Behr, Kenora Ont)

U A E R Dubai on 11955 1724-1736 6/4 w/AR mx to 1730 ID, //9595-SIO 433. In-to soft instl mx which was lead-in for a radio drama; 11955 was SIO 444 (Richard A D'Angelo, Wyomissing PA)

U S A WHRI Indiana hrd on new 9690 at *0100-0257*, since 29/3 CST, on top of Argentina; no respect for other stns. 7400 was inaudible for months, but sud denly strong since 29/3 from 0300 w/bad audio & loud hum (Ernie Behr, Kenora Ont) see also DOMINICAN REPUBLIC. R Earth dissatisfied w/7400 and hoped to get it changed, but J86 sked shows it still in use; R Earth time of 0300 UTC not expected to change this summer since Indiana disregards DST (gh)

WORLD OF RADIO on WRNO for J86: UTC Sat 0300 on 6185, 2330 on 9852 $\frac{1}{2}$, Sun 1300 on 9715. 18/4, KCBI started signing off at 2045* from 11735, due to FCC order to prevent QRM w/VOA new svc, obviously higher priority; VOA not hrd. KCBI kindly kept WORLD OF RADIO on the air Fridays, but moved it up to 2015-2045 and there could be no advance notice. I have no idea whether this will continue in J86, but'd expect pgm times to be one hour earlier by UTC, i.e.

compared to original sked of Fri 2100 & Sun 1830, the new times would be Fri 2000 & Sun 1730. The fq 11735 could also change w/out notice; so far KCBI has always used the 25mb, so look around (gh)

On KCBI 30/3 & 4/4 Capital DXers of Sacramento reported "La Pantera," Hermosillo, Mexico on 11820 at 0100, which was probably BBC in SP; they also reported R Monibo (sic) on 6260 at 0100, obviously R Melodía; and, would you believe, R Bata on 5005 at 1300, instead of Sarawak or Nepal. This nonsense does not deserve any publicity & is repeated here only to warn listeners (Ernie Behr, Kenora Ont) The risks you run by putting on the air anybody who wants to do a DX report, and not having the experience necessary to recognise obvious mistakes. I trust Ernie also enjoyed hearing his 1940s HCJB sked in Feb LN being given as if it were current.... (gh) To make things absolutely clear: I have no problem at all with KCBI doing its own DX program; the more the merrier; but persistent dissemination of misinfo cannot go unnoticed (gh)

U S S R Petropavlovsk -- site presumed -- on 4485 at 1046-1105 w/RS talk by M to 1054 classical piano mx. 1059 W mentd Moscow, 1100 6 time pips, possible nx; SIO 151, 6/4 (Richard A D'Angelo, Wyoming PA)

An article in 'Soviet Uzbekistani' 18/2, R Tashkent receives more than 4000 letters annually from 70 countries on all continents. In their letters radio listeners attach great value to R Tashkent pgms; one fan is Babrak Karmal, Afghan leader. In some countries, RT fan clubs have been set up, about 70 of them, a strong blow against bourgeois ideology (WBI 27/3)

Monitoring 30/3 reveals R Stn Peace & Progress has doubled bcs in Creole for Haiti. Original xmsn at 00-0030, adtl one at 02-0230, both on 9820 9745 and 7300. (WBI 3/4)

V A N U A T U R Vanuatu, 3945, had fair sig 1/4, local talk & NA to 1105*, 3/4 until 1115* (Ernie Behr, Kenora Ont)

Y E M E N S O U T H E A S T Monitoring 3/4 showed that PDRY Radio in Aden has resumed being the V of Palestine pgm, hrd 1820-1900 on 7190 & 1188, first time hrd since coup d'état 13/1 (WBI 10/4)

CLANDESTINE CRANNY On WORLD OF RADIO 15/3 hrd speculation that Afghan & Persian clandestine last year was via Israel or US xmtr. I hrd 7425 in May 85 at 0130-0255 w/V of Unity and R Iran, vy strong sig, but no doubt this was due to excellent propagation from xmtr in Egypt; same site also used by V of Lib of Iran, V of Iran, and former R Vatan on 9027, 15315, 15555, etc (Ernie Behr, Kenora Ont)

V of the Communist Party of Iran (Persian: Seda-ye Hezb-e Komonist-e Iran), first monitored 26/8/84, but believed to have been in existence for some time. Now monitored at 1730-1900 daily in Persian, may also contain items in Azeri, and repeated 0315-0445 both on 4480v and 3870v. For listeners' letters it has ancd addr in W Germany, Italy, UK (EM, Box 2123, London WCLN 3XX). This stn is believed to be associated with the V of the Iranian Revolution (WBI 27/3)

V of Afghanistan, hostile to govt of Afgh and to Soviet involvement, and ancd addr in Peshawar, Pakistan, hrd 27/2 ancd that it includes items in Russian, in addn to Pashto, Dari, Uzbek, but not confirmed then due to reception difficulties. Monitoring of 1130 xmsn 5/4, revealed not only RS but also nx & commentary in English. The xmsn started on 5823 USB but by 1400 had switched to 5825; lang content approx: 1130-1230 Pashto/Dari, 1230-1245 UZ, 1245-1255 EG, 1255-1400 Pashto/Dari, 14-1410 RS, 1410-1420 EG, 1420-1425 pashto. It is not yet known how freqly VoA xmsns are extended to apx 3h duration or how often includes RS & EG; adtl monitoring 7/4 indicates 1130 xmsn on 5825 similarly extended but timing of various lang segments different than 5/4 (WBI 10/4)

V of the People of Malaysia, reported raided by Thai troops at a location some 15 km N of Betong, Yala prov in Thailand 16/2, hrd again 20/3 w/regular pgms on normal fq 7050; last positively IDed 10/2. Stn amts indicated sked unchanged from previously (WBI 27/3)

I.e., daily 1130 Cantonese, 1200 Std Chinese, 1230 Malay, 1300 Tamil, 1430 Cantonese, 1500 Std Chinese, to 1530. 2130 Cantonese, 2200 Malay, 2230 Std CH 2300-2330 Tamil. First hrd 4/5/76 as V of the People of Malaya; name changed 11/12/83 to V of the People of Malaysia (Malay: Suara Rakyat Malaysia) as result of merger of Marxist-Leninist CP of Malaya with the Rev'ly Wing of the CPM, into the Malaysian CP (WBI 3/4)

VOPM reported in Malay 22/3 that it was the 10th anniversary of stn founding... Establishment of VOPM is in accordance w/the people's wishes and the interests of the revolution. During initial stages, there was an impressive campaign to support the stn both in the border area and in the country. Our comrades and friends gave strong material and moral support for the stn. They donated money from their savings and bought radio eqp w/out thinking of any danger. They patiently listened to our bcs from various parts of the country and sent back invaluable data and constructive suggestions... VOPM is now so important that even some foreign nx agencies and domestic reactionary forces have to monitor our xmsns. Our radio has become a bright beacon enlightening the hearts of people of various nationalities in the (?gloomy) enemy-controlled area, where an atmosphere of white terror prevails, but it has become a thorn in the enemy's flesh. Over the past 10 years, our radio stn has developed itself as a strong, perfect and mature stn which continues to advance to achieve higher objectives.. Initially, only 3 langs, Malay, Std Chinese and Cantonese, but added Tamil three years later... Aim is for VOPM to really become the most outspoken stn and reliable spokesman for the people (WBI 3/4)

Radio Darío /ghb suggested name/ From an interview on RNMN 27/3 with Congressman Bill Livingston of Louisiana, who has introed a bill in Congress to set up an anti-Nicaraguan version of R Martí: There is not enough info going into Nic upon which Niccits can truly rely. VOA doesn't seem to get in there /baloney/ and it's not properly homed, it's not directed in that area. VOA says it's not within their charter so we're attempting to fill a void. We're encouraging committees and sub-committees here in Congress to hold hearings in order to develop the details, but they really haven't been formulated at this point. I don't think there's any indication it might be passed immediately. It's under study; right now we're attempting to gather info which'd bolster our case. We estimate the cost wouldn't be much more than roughly two to three megadollars initially (WBI 3/4)

R 15 de Septiembre on 6265, new? 0550-0610* 6/4 w/much of usual rhetoric to ID at s/off, fair (Richard A D'Angelo, Wyomissing PA)

R Camilo Cienfuegos on 9940 at 1104 6/4 w/ns, ID, into a Voz del CID pgm, fair (Richard A D'Angelo, Wyomissing PA) Noted on 9942 18/4 1325 (gn, OK)

R Venceremos, first hrd in Jan 1981, hostile to El Sal govt, claims to bc from Morazán dept in El Sal; on spl occasions it linx up w/R Farabundo Martí. Ancs addr as P O Box 7-907, México DF. 75-min SP bcs: daily 0000-0015 /sic, presumed typo for -0115/ and 0200 on 6557 3725 and 98 MHz; Mon-Sat 1215 on 6557 3725, 1830 on 6557; Sun 1400 on 6557 and 6557 /sic/, 2000 on 6557 (WBI 10/4)

R Free Surinam RNMN reported 20/3: A few years ago a group in Holland under the name of the Council for the Liberation of Surinam, CLS, hired airtime on a low-power xmtr owned by the Miami-based 'Cuba Independiente y Democrática' organisation, CID, which has for some time beamed pgms towards Cuba and Cuban troops in Angola from high-power xmtrs believed to be in CAM. 12 months ago bcs to Surinam were stopped, reception being so bad in Paramaribo that it made little sense to continue. On 15/3, tho, RFS, as the 30-min bcs are called, started up again. Glenn Tjong-Akiet, president of the Rotterdam-based CLS, gives more details: the pgmme uses a 50 kW xmtr w/an antenna directed towards Surinam. Up to now there have been good reception reports from the Carib area and from Sur. Tests'd been carried out on the xmtr before, but w/ant towards Cuba. Stn is carrying on where it left off. The CLS's objective is to eliminate press censorship in Sur. Bcs are on 9940; as of 18/3 at 5.30 am (as broadcast) (0830 gmt) each day for half anhour in DT

as the ofll lang; Sranan Tongo, a native lang; Surinami, a sort of Hindi; and Javanese. English and Spanish'll be introed later. The thrust of the bcs is against the regime. New addr is Box 5517, 3088 AM, Rotterdam. Not even the CLS has been told by LV del CID exactly whence their bcs come. On Sat it held its congress and bc live thru a phone connexion. Otherwise material is taped and sent to the xmtr. This makes nx a problem but there is no other choice. Ed note: the above xmen has so far not been obs on 9940 at time given (WBI 27/3) Found 8/4 on 9940 starting at apx 0720, until 0750. Before & after 9940 carried R Camilo Cienfuegos of CID (WBI 10/4) Surinamese must be real early-risers; do they really think this is an ideal time? (gh)

R Truth ZBC, Harare, Zimbabwe, reported 2/4: the US has come under heavy criticism from the Deputy Min of Info, Posts & Telecomms, comrade Naomi Nhwatiwa, for supporting the racist and propaganda stn, R Truth, in South Africa. Comrade Nhwatiwa told bcng chiefs and engrsr from Kenya and the Southern African Development Co-ordination Conference /SADCC/ countries in Harare today that R Truth is being beamed to the frontline states by the Pretoria regime to foment trouble. DepMin said stn has drawn funds and personnel from the US to support UNITA bandits in Angola, MNR rebels in Mozambique and super-ZAPU dissidents in Zimbabwe. Com Nhwatiwa urged govts to use bcng systems to promote peace, unity and development instead of using such facilities for propagandistic purposes. She called for coop among SADCC radio stns in exch of pgms and in standardisation of eqp w/final aim of manufacturing eqp themselves. Noting that 70% of region's population is illiterate, com Nhwatiwa said one way of communicating w/them is thru radio. Bcng chiefs are looking at ways of improving planning, implementation and management of bcng systems in the SADCC region. The 7-day workshop is being sponsored by the ITU, the Friedrich Ebert Foundation of the Federal Rep of Germany, the Intl Pgmme for the Development of Communication /IPDC/ and the Zimbabwe Broadcasting Corp. Ed note: R Truth bc at 0430 & 1700 on 5015; pgms in EG, Ndebele, Shona hostile to PM Mugabe and the Zimb govt (WBI 10/4)

Spy Numbers on 6997 hrd 12/3 0305 CM 5-digit by W to 0312* w/"Ende"; strange accent: "fünef", "dreh"; vy strong DSB. On 9958.4 from *0230 unusual 4-digit in SP by W to 0240*; 31/3 vrs strong USB, same level as LV del CID on 9940.6 (Ernie Behr, Kenora Ont)

Prezado Senhor.

Com prazer acusamos o recebimento de a/carta de 20 último.

Queremos nesta oportunidade agradecer as informações prestadas, que para nós são de grande valor.

Aproveitamos a oportunidade para informar a V.S. que agora estamos transmitindo em nova frequência - 2.490 KHZ, com um sistema irradiante mais eficiente, que deverá melhorar a recepção af em sua cidade.

NOTES: Wendel Craighead like the Radio Rebelde QSL card. He says that the card is rather reminiscent of the style of cards used by the Latins in the 60s. I agree Wendel. Ray Forsgren has lots of time to DX since he received 18" of snow recently! Peter Dillon is finding time very precious since he is working two jobs. Only sent out 3 reports last month. John Sprulletta has a 1986 Amateur Foreign Callbook. If you need an address give John a call or drop him a line. Bill Harms wonders if anyone besides Radio Korea issues a different QSL each month? Does anyone know? Guess work leads me to think of HCJB and the NHK. Also received letters of correspondence from Steve Lare, Bill Matthews, Jean Burnell and Mike France.

CHINA, PEOPLES REP. OF: Radio Beijing 9550 cd. in 5 wks. (Bowden). 9820 cd. in 3½ wks. (Kirkland-ONT). f/d cd. in 3 wks. (Eckert). "Toy" cd. in 28 ds. (Forsgren). 11980 f/d cd. in 1 mo. for a SP rpt. (816) 523-7292 7-10 pm only

UPCOMING DEADLINES: 10 May (Mid-May) 20 May (June) 10 June (Mid-June)

Reproduction permitted. Credit original reporter and NASWA UPDATE. Dates, times and days GMT: freqs kHz.

For those of you still waiting for your mid-month Update, there was no mid-April UD. There was no mid-April Update for one reason and one reason only: there were no contributions to UD for that period. I hope that I need not remind you of what that means, but it does not speak well for any of us. Each and every column in Frendx survives only so long as you support it. UD has no paid staff of monitors, and certainly I, like all of the other editors, am a volunteer. There is no one, in short, to do the work for you. There is no one who will contribute if you don't, no one who will reach out to other club members, no one to make the club go if WE don't do it. Let me emphasize that. In NASWA we get what we give. If we give nothing, we get nothing. No UD, no FRENDX, nothing. Please remember that, and support your club.

I understand that HQ will make appropriate arrangements concerning adjustments for mid-month subscribers, but there is neither rhyme nor reason in having an indefinitely long subscription if you get empty pages. Please contribute.

MONACO Radio Monte Carlo, 15465 nf, t/in 1228 to past 1330, continuous test transmission consisting of orchestral pops and jingle ID every two minutes, "RMC, Radio Monte Carlo." This format continued to 1335 t/out. While this is reminiscent of RMC Arabic feeders to be heard at least a few years ago, this seems to be different. It is much stronger and full AM modulation. Perhaps new service? Only problem is Moscow splatter off 15475. (Dave Walcutt, NY 3-26)

Some interesting material in the special contributions section. First via John Henault, our distribution editor, comes a series of reports from Roland Schultze in Stuttgart, Germany. I have taken the liberty of using them as a report of some interesting Euro DX, here because they arrived too late for the LR sections.

- 3222 TOGO Radio Kara, 1852-1900 FR, African folk mx, la press at 1900, early fade in. (3-25)
- 3229.1 PERU R. El Sol de los Andes, 2355-0035, SP, political reports, clear ID, Peruvian folk mx. This one rare in Europe. My first log. (3-26)
- 3249.5 HONDURAS R. Luz y Vida, 0018-33, SP. Religious prgms, religious songs. Clear ID w/ call, freqs, "musica la hora." Also rare in Germany. (3-27)
- 3305.7 ZIMBABWE ZBC Radio 2, 1835-45, tentative, music at 1845 male talk. Best in LSB, too much QRM overall, high noise floor. (3-22)
- 3310.3 BOLIVIA R. San Miguel, 0103, SP, religious prgms, "Noticia Christo." (3-28)
- 3320 SOUTH AFRICA SABC, 1850, verns, slow instr. mx, ID, nx. (3-18)
- 3335v MOZAMBIQUE RMOzambique, Emissao Inte provincial, 1745, PT, high life mx, ID as R. Mocambique, 1800, nx. (3-21)
- 3360 GUATEMALA LV de Nahuala, 0240, in SP, religious prgms, marimba mx. (3-28)
- 4895 BANGLADESH R. Bangladesh, 1540, EG, nx by a woman, ID. (3-23)
- 4910.2 PERU R. Tawantinsuyo, 2315 active here. SP, ID, fine Peruvian mx. (3-26)
- 5199.1 PERU R. Imagen, 0508-0620, SP, LA mx, Peruvian mx, clear ID. (3-23)
- 6260.1 PERU R. Melodia, 0428-0700, SP, LA mx, a lot of talks. (3-23)
- 7115 GUAM KTRW, 1355-1359, Japanese, ID, s/off w/ one IS. (3-23)
- 9615nf IRAQ R. Baghdad, 2040, GM, not listed, reports, nx, local mx. (3-20)

Thanks to Roland and John for getting this to you.

Next, a report from Dr. Richard Wood, one of our two Hawaiian DX connections:

AUSTRIA ORF, 11945, in GM 0810. Talk on Austrian organist. Good. (4-3)

CANADA RCI, 6150, // Daventry 7295 and Sackville 9760, in FR *0500. EG 0515, FR 0530, EC 0545-0600*. Morning nx to Europe, Middle East, Africa, new time. EX-0600-0700 sked in 1986 WRTH. (4-3)

CHINA CPBS Minority Languages Service, 17635//15670, at *0528 IS (from "East is Red" but different from RB external service version). "East is Red" s/on 0530, Tibetan ID, nx,

mx, 0555* 0558 IS, 0600 into Uighur, ID: "Merkazi Khalik Radiostansi" (=CPBS), mx and nx, 0625*, 0628 IS, 0630, Kazakh ID, nx ("khabarlar"), mx, 0655 ID, s/off. Both good. (4-1 and nightly)

Clandestine to Kampuchea via R. Beijing, 17680 // 15400, at *0400-0457* in Khmer, similar to RBijing in prgram style, modulation, tone, timing and all else, but no Beijing ID at s/on or s/off melodies. Supports Norodom Sihanouk and attacks Vietnamese presence in Kampuchea. Both good. (4-5 and nightly)

DENMARK RD, 11785, in Danish to Greenland 1800. Nx, remote reports. Good. (4-2)

FINLAND RF, 11755, in Finnish, "uicitiset" (nx) 1800, fair. QRM RBeijing in RS. (4-2)

Also on 6120 in Finnish, economic nx 0445, 0453 nx of funeral of Olav Palme, to Europe. Good. (3-16)

GERMANY (FED REP) SDR, Stuttgart, 6030, *0452, repeated electronic mx IS, 0455 ID, s/on on a Sunday. Quite good. QRM VoA. (3-16)

IRAN VoIRI, 11975, in AR 0400. ID: "Huna Tahrán, Sawt ul Jumhuriyat ul Islamiya a Fi'l Iran." Note the subtle change in ID text from that listed in 1986 WRTH. Ending "zI Rianiya" (of Iran, belonging to Iran). The new title suggests the Islamic republic does not belong to Iran but is only (at the moment) located there, whereas in the future it could equally well be located elsewhere, e.g., in Iraq or Lebanon. New freq. Good (3-16)***Interesting. tba

ISRAEL KY, 15615, 0635, Hebrew cultural discussion, good. (4-2)

KOREA (N) RP, 21450, *0500-0650* in Chinese, announced sked in Beijing time. Highest freq ever noted for R/ Pongyang; highest freq listed in 1986 WRTH, where RP sked seems incomplete and outdated, is 15415. (4-3)

RP, 13650, *0500-0550* KR, *0600-0650* EG, mailbag answering Ethiopian listener. This freq well established but unlisted in 1986 WRTH, which tends to ignore the now-booming 21 (or 2270 meter band. Good. (3-16 and 4-3)

RP, 9570, *0600 in RS, "Govorit Pkhengyang," into nx, fair QRM BBC. (4-1)

LUXEMBOURG RTL, 6090, going into GM 0600, gospel transcription, from a W German evangelist. Good. (3-16)

MEXICO XEWW, 6165, in SP 0653, spot for "Mexico 86 en Panamex," ID for XEW. Good. (3-16)

N. MARIANA IS. KFBS, 9535, 1545 in Ukranian accented RS (g pronounced as h), gospel, ID 1600, good. (4-1)

OMAN RO, 17735, in Ar 0500, time signal, listed freqs, beamed to Egypt, Middle East, Europe and the Americas. In distinctive Comani Arabic which shares hard g (not j) with Egyptian but is like Saudi AR in most other ways. New freq. Oman appears to be in Ar only on SW, has dropped EG. Beware Iraq and other AR speakers around this freq. Good. (4-5)

PAKISTAN RP, 17760, 0630 in UR, ID, film mx. Good. (4-2)

RP 17692, 0600 in UR, ID, azan; good but hummy modulation, probable drift here. (4-9)

PHILIPPINES FEBC, 15350//11850 in EG 0730, world and Filipino nx, interesting listening at this time when Ferdinand Marcos lives only 300 miles from me. 11850 replaces 11890 sked in 1986 WRTH. Good. (4-3)

POLAND RP, 6095//7145, 9525 in PL 0440. Talk on increased food prices. All good. (3-16)

SOUTH AFRICA R. Suid Afrika, 9555, in AK 0600. "Hier is die nuus" (=nx). Good. WRTH 1986 says may use 9555 or 11885; 9555 is used. Good. (4-1)

SYRIA SRTO, 12085, 0700 in AR, inspirational mx, talk of Damascus, uncheduled this time in WRTH 1986. Good. (4-2)

UAE R. Dubai, 21695, in AR 0655, mx. 0700 time signal, ID, high freqs are open late here these evenings. Good. (4-2)

VATICAN RV, 6250//7250, 9750, 11715, Esperanto talk on family life, declaration by Patriarchate of Moscow 0512, at 0515 11715 went into Irish accented EG to Africa. All Good. (4-3)

Thanks to Richard Wood, and to Roland and John for special reports and to Dave, who also reported.

Next time reports from Dale Parks, the other half of our Hawaiian connection. We simply ran out of space this time around.

Please take a second and reread the comments at the front of this column. UD and all other NASWA departments are what you make them, no more and no less.

LOG REPORT

section A

+++ If your items didn't appear this month it was probably because they were out of date. Please submit loggings only from the month before the deadline date, i.e. loggings submitted by May 12 should not be older than April 1, loggings submitted by June 12 should not be older than May 1, etc. +++ Thanks, as usual, to the monthly regulars who make LR possible. +++ And remember to not give up on the low bands during the summer. Static makes things more difficult, of course, but there's always something interesting happening on these fqs. 73-

LOG REPORT

section C

6200 to 11699 kHz

Editor: Peter Drizhal, P.O. Box 663, Oxon Hill, MD 20745

ON THE WAVE: An interesting letter received from Douglas W. Johnson, in Issaquah, WA:

The April issue contained LRC comments about RM's transmission on 9490 and referred to Roger Legge's UHN, issues 40 & 44. I authored both UHN issues and would like to comment on the RM site question as follows:

Subsequent to publication of UHN issue 44, November 1982, additional data has been collected regarding the Nikolayev/Yevpatoria site question. On page 108 of Jeffrey T. Richelson's fine book Sword and Shield (Ballinger Publ., Cambridge 1986) is this reference to Yevpatoriya:

"Soviet space surveillance assets including ground stations (both foreign and domestic), radars, and specially equipped surface ships and other sensors. Thus, there is a network of at least twelve sites within the Soviet Union equipped with receivers to measure the Doppler shifts in radio signals, tracking radars, and photo theodolites and which transmit data to a central computational center. The network includes stations at Yevpatoria, Tbilisi, Bear Lake, Dzuhsaly, Izopashevo, Novosibirsk, Ulan-Ude, Irkutsk, Ussuriysk, Simferopol, Tomsk, Novokazalmsk, and Petropavlovsk-Kamachatka."

The current US Government TACTICAL PILOTAGE CHART (1:500,000) for Nikolayev and Yevpatoria shows the following vertical obstructions:

Nikolayev (Posad-Pokrovskoye, G.C. 46°48'N, 32°13'E):
 395 ft. multiple
 525 " "
 230 " "
 590 " single
 Yevpatoriya (G.C. 45°11'N, 33°13'E):
 215 ft. single
 235 " "
 240 " "

After I observed, in person, in 1984 the RM sites south of China and NE of Novosibirsk, I realized how little could actually be discerned from an examination of Landsat satellite photos. The Nikolayev/Yevpatoriya site question remains open, but the latest map data favors Nikolayev.

The April 1986 Friendx suggested confusion between Nikolayev and Nikolayevsk-na-Amure (see entry for 9780). RM persists in listing Nikolayev-na-Amure, a small town at the mouth of the Amur River on the north end of the Tatar Strait, but the more likely site location is south of Komsomolsk-na-Amure, near the village of El'ban. The specific 9780 kHz transmission mentioned in the April issue was likely from this FE site, not from the one in the Ukraine, and was beamed to Australia.

... Many thanks to Douglas Johnson for his insight. Okay, class dismissed. Here are May's reports:

 As in the past, items listed under Log Section D last month were not repeated again this month. However, there were several good new items received despite the continued lowering of the ionospheric layer. Thanks to all who contributed and especially to those who took the trouble to arrange their loggings in frequency order and band them together.

+++++

Welcome to several new contributors this month in addition to the monthly regulars that this column so greatly enjoys and appreciates.

New Contributor this month, Tom McElvy of Norfolk, VA. is the Chairman of the "Old Dominion DXers" Awards Section. Those of you who are into the awards for SWL's might be interested in contacting the Old Dominion DXers for info on their awards and memberships. Tom can be contacted at PO Box 9645, Norfolk VA. 23505-0645. ***Please send an SASE along to help out with the postage***

Your editor was in attendance at the DAYTON HAMVENTION (if all went as planned) Scheduled to be along was John "KAP" Kapinos, our own Awards Chairman, Bob Thunberg (SPEEDX Asia/Oceanic Editor) and Daryll Symington (Below 30MHz Editor for All Ohio Scanner Club). More Info in June's Column. *73 to John*

NO COLLECT CALLS ON THESE ADS, PLEASE

Ads are printed in FRENDX at no expense to members when space permits. Please specify who is to pay postage on items. Send all ads to NASWA, 45 Wildflower Road, Levittown, PA 19057. While it is all right to use a postal card, remember that the cancelling system now used by the post office sometimes gets the wrong side of the card. This, of course, makes your ad rather difficult to read.

A WEDDING INVITATION

from Rob Harrington and Joyce Arrington.

We have great news for you. We are getting married and we are telling the whole world about it! You and your family are most welcome to attend our wedding, but, since we need to know how many are going to be here, we request that you RSVP by May 29, 1986 to P.O. Box 21564, Denver, CO 80221. Please RSVP by letter. The wedding will be held on July 26, 1986 at 1:00 pm at the Littleton Christian Church, 6130 South Penn Street, Littleton, CO with a reception to follow at 2:30 pm at Joyce's sister's house in South East Denver.

P.O. Box 493 • Lake Geneva, WI 53147

HERE'S THE ANSWER
to
FOREIGN LANGUAGE RECEPTION REPORTING

LANGUAGE LAB

Compiled By
Gerry L. Dexter

No more "four page guides" or multi-lingual report forms. Now you can develop an endless variety of individualized letters and reports!

LANGUAGE LAB gives you:

- * 15 ways to open your letter!
- * 36 ways of describing reception conditions!
- * hundreds of program descriptions!
- * lets you tell the station about yourself
- * lets you ask questions
- * provides 17 ways to ask for the QSL!
- * gives you 23 letter closings!
- * hundreds of handy phrases and useful words!
- * plus pages and pages of sentences for use on follow-ups, tentatives and prepared cards!
- * Approximately 50 spiral-bound pages for easy use at your typewriter!

The Spanish edition of LANGUAGE LAB - translated by Dr. David Korn, University of Wisconsin System, will be available in June.

Just \$12.95 plus \$1 shipping, \$2 shipping overseas (add \$1 in each category for first class/airmail) - US funds, please.

Order your copy of LANGUAGE LAB now from:

Tiare Publications
P.O. Box 493
Lake Geneva, WI 53147
USA

NOTE: French and Portuguese editions of LANGUAGE LAB will be available later this year.

!!! JIM'S CORNER !!! JIM'S CORNER !!! JIM'S CORNER !!!

WOW! It's already April 1986! This year seems to be going by fast here at RW! Before it gets any later in the year, I'd like to thank all of you who gave support to Radio West in 1985. We had a good year, and are planning on a great year in '86. Plans for Catalog 8 are in the works and some really great pieces of equipment will be included, so keep watching the mailbox for that.

DKing here in Southern California lately has produced a few good African openings and some stations not heard in a few years. Radio Truth on 5015kHz provides some interesting listening at 0430, as does Falkland Islands on 3958kHz at 0500. Both have been fairly strong lately. Interesting varieties in the mailbox have been Radio Djibouti on 4780kHz and R.A.I. Sicily on 7175kHz (which took no less than 3 years!)

Well, that's about all at this end. Your comments, suggestions, and criticisms are always welcome here at Radio West, please write any time!

NEWS RELEASE

GILFER ASSOCIATES, INC.

52 Park Avenue, P. O. Box 239, Park Ridge, N. J. 07656 (Area Code 201 391-7887)

FOR IMMEDIATE RELEASE

GILFER SHORTWAVE ANNOUNCES

THEIR SPRING 1986 CATALOG

Park Ridge, NJ: GILFER SHORTWAVE has just released their Spring 1986 catalog. It is jam-packed with lots of new items--the most tempting being the new Japan Radio Company's NRD-525, ready for distribution mid-May. Rainer Lichte, author of the now famous "RADIO RECEIVER-CHANCE OR CHOICE", has completed his extensive testing of this fine receiver. Those interested can obtain a copy of his full review plus a colorful brochure of the NRD-525, first class mail, by sending \$3.00 to GILFER SHORTWAVE, 52 Park Avenue, Park Ridge, NJ 07656.

Also included in the catalog is the innovative line of DATONG products. DATONG has been billed in popular publications as one of the best accessory manufacturers. There are also two DRESSLER active antennas (as advertised in the "World Radio TV Handbook,") the ara 30 and ara 500.

In GILFER's book line, there are two new titles of particular interest:

First: The Radio Hacker's Code Book—a computer do-it-yourself book exploring the world of codes and ciphers while using your home computer — shows how to program your computer for these interesting signals using BASIC & Assembler 80. This book is just off the press.

Second, The Wave Antenna for Reception of Medium and Long Wave, by Walter Schultz: explains theory and application of these specialized antennas for the medium wave DXer -- reviewed on "Media Network" by Jonathan Marks.

GILFER is proud of its stock of fine products for the discriminating shortwave listener. Phone to order at (201) 391-7887. New customers can receive a catalog by sending \$1.00 (refundable with first order) to 52 Park Avenue, Park Ridge, NJ 07656.

ANARCON-8 6

MONTREAL, CANADA - JULY 18 - 20, 1986

HOLIDAY INN - PLACE DUPUIS

and U.S. only) OR BY MONEY ORDER.

.....
I WILL / WILL NOT BE ATTENDING THE FRIDAY EVENING WINE & CHEESE RECEPTION

I WILL / WILL NOT BE ATTENDING THE SATURDAY EVENING COCKTAIL PARTY

(Please circle appropriate word above)

I WILL BE TRAVELING TO THE CONVENTION BY: CAR: _____ BUS: _____ AIR: _____ TRAIN: _____

I WOULD LIKE TO REQUEST THE FOLLOWING SPECIAL MEAL ARRANGEMENTS FOR THE ANARC BANQUET

Please note: The banquet main course is filet of beef brochette. Requests for meal substitutions may be made for religious or dietary reasons only.

CONVENTION ACTIVITIES

All convention activities will take place at the convention hotel, the Holiday Inn - Place Dupuis, 1415 St. Hubert Street, Montreal (Cross Street is St. Catherine East)

MEALS

The convention registration fee does not include any meals. In addition to the restaurants in the hotel there is a wide variety of places to eat in the area around the hotel, and prices are very reasonable. Your convention registration package will include details on area restaurants.

CONVENTION COSTS

FULL CONVENTION REGISTRATION - 3 DAYS	\$ 20 PER PERSON.
SINGLE DAY REGISTRATION (ANY DAY)	\$ 10 PER PERSON
ANARC AWARDS BANQUET	\$ 25 PER PERSON
BUS TOUR OF MONTREAL	\$ 9.50 PER ADULT
	\$ 5.75 - 5-11 yrs.
	Under 5 yrs. Free.
MONTREAL HARBOUR SUNSET CRUISE	\$ 5.00 DEPOSIT
	PER PERSON.

PLEASE NOTE: The final price for the harbour cruise will depend on the number of people who wish to go, and who have sent their deposit by July 1. The balance of the price will be collected at the convention.

THE ABOVE AMOUNTS ARE PAYABLE IN ADVANCE & SHOULD BE SENT ALONG WITH YOUR COMPLETED REGISTRATION FORM. THEY ARE PAYABLE IN CANADIAN OR U. S. CURRENCY. PERSONAL CHEQUES ARE ACCEPTABLE FROM THE U.S. OR CANADA. MONEY ORDER OR BANK DRAFT SHOULD BE USED FOR OTHER COUNTRIES. MAKE CHEQUES ETC. PAYABLE TO: ASSOC. OF N.A. RADIO CLUBS /ANARCON-86.

OPTIONAL CONVENTION ACTIVITIES

The BUS TOUR of Montreal, and the MONTREAL HARBOUR CRUISE must be booked in advance, when you return your registration form. Last minute reservations will only be accommodated on a first come, first served basis, if there is any space available. The BUS TOUR is a two and a half hour trip around Montreal. The BOAT TOUR will be a one or two hour long sunset cruise starting at the Montreal harbour. The duration of the cruise will depend on the number of people who take part.

Included in the package you will receive along with the confirmation of your convention registration, will be information about other attractions and places to see in and around Montreal, for those who might wish to come a few days ahead of the convention, or stay a few days afterwards.

THE ANNUAL ANARC AUCTION

If you attended ANARCON-85 in Milwaukee you'll know that a now annual event at the convention is an auction, following the ANARC Awards Banquet. Start saving all your spare cash (if you have any left after the tax man has his way with you), and come prepared to bid yourself silly and take home some of the auction goodies. This auction is for the benefit of ANARC.

PLEASE NOTE: Since HAP-USA is no longer in operation there will not be a HAP Auction at the convention. This has now been replaced by the ANARC auction.
