There's lots of news on hand this week, so we might just as well begin this Bulletin by telling you that.

First of all we want to extend our greetings to the Canadian DX Relay who are celebrating their Birthday Anniversary on Sunday morning, December 15th with a mammoth DX Party, during which time in the neighborhood of 20 stations will join in the Gala Celebration.

We want to congratulate Walter C. Birch on having secured for us a dedication which will assume the proportions of an Inter-National Good-Will Broadcast. This program will take place from CE-90 1360 kcs, whose address is: Radio Estacion El Mercurio, Santiago, Chile on Thursday morning, January 9, 1936 between 3:00 and 4:00 A.M., EST. It will be noted that this station has recently changed frequency and it is therefore logical to assume that there has been an increase in power, hence with favorable conditions this station should be heard on this broadcast by American and Canadian Listeners. However it will be necessary to have WEUX, Dayton, Ohio stand by for this program if we are to have any chance of hearing it, hence we are urging all our members to write a courteous letter to WSNS, asking them to please remain silent for this broadcast. We also request that all other club presidents do likewise with their members, inasmuch if WSNS receives sufficient number of requests we feel that they will be kind enough to grant us this favor. We are sure that the members of all the clubs will want to take advantage of this opportunity of hearing this station, hence our request that all the clubs cooperate with us in this matter.

Art Brackbill, our CPC Chairman sends us word that there is a new Mexican, KEEH 1000 kcs, Hermosia, Sonora, Mex. P. O. Box 68, that is being heard daily between 3:00 and 4:00 A.M., EST.

Mr. Paul J. Breedy, WEEU's DX Commentator, advises us that this program is now on the air every Saturday morning at 10:00 A.M., EST. Please note the change in time. Be sure to send in your comments to WEEU regarding this program, your editor has charge of writing the script for this broadcast each week.

A. J. Parfitt, Villamont, Va. advises us that KROC 1310 kcs, Rochester, Minn. have advised him that they run a DX program every Sunday from 4:00 to 5:00 A.M., EST.

We want to again call your attention to the excellent DX Party that has been arranged for the members of our club by Floyd Smith, our Greenville, Ill. CPCer. This party will take place December 21 and 22. The latest acceptance that Floyd has received is from KROC 1310 kcs, Rochester, Minn. who will be on the air, Saturday morning, December 21 from 4:30 to 5:00 A.M., EST. All members are urged to listen in and send reports to all the stations participating in this Party for us.

William Jetterhahn, 2843 Dudley Ave., Bronx, N. Y.

We hope that Mr. Jetterhahn will find his membership in our club very beneficial to his DXing activities, which we understand are at the present time confined mostly to the Short Waves.
DX CHATTER

DO YOU KNOW that Rennes (1040 kcs.) and Bordeaux (1077 kcs.), both of France, start their broadcasting day at 1:45 A.M., EST, with chimes for the first five minutes... KEUN, 1010 kcs., Vera Cruz, Mexico, will DX December 15 from 3 to 5 A.M., EST, as will their SW station KEUW (6.02 mgs... CHNC, 1410 kcs., New Carlisle, Quebec CRC test on the 10th of every month, from 3:01 to 3:09 A.M., EST... WMN, 1210 kcs., Clarksdale, Miss. is off the air until January.1... KLRA, 1390 kcs., Little Rock, Ark., have changed their weekly NNRG DXes to Saturdays, from 12:30 to 1:15 A.M. EST... CQX, 760 kcs., Cienfuegos, Cuba DXes December 25th from 3 to 6 A.M., EST... KLX, 880 kcs., Oakland, Calif., DX the third Thursday and Friday of each month, 2 to 3 A.M., EST... CKO, 1410 kcs., CFCT 1450 kcs., CFCO, 630 kcs., and CJCA 730 kcs., are on after 3 A.M., EST on Sundays... another new station in Texas—this time at Pampa, and to be owned by the Daily News, Inc. has been licensed to operate on 1310 kcs., with 100 watts... also a new station for St. Paul, Minn., owned by Edward Hoffman to operate on 1370 kcs., with the usual 100 watts power... WHBL, Sheboygan, Wis., will change frequency from 1410 kcs. to 1500, but reducing power simultaneously to 250 watts... KECA, 1430 kcs., Los Angeles, Calif., expect to increase their power to 5000 watts shortly... the three 1400 kilocycle Brooklyn stations (WARD, WFVY, and WLF) have again had their demise postponed until December 23...?

HERE AND THERE

By A. W. Oppel

The United States Immigration Department has installed a new 200-watt transmitter at Detroit, Mich., to help patrol the border. Messages are broadcast every thirty minutes to immigration cars and boats within a radius of eighteen miles, via radio telephone. Success in apprehending and thwarting illegal entries and liquor smuggling has already been noted. If very successful similar stations will be placed at various cities along our borders, with El Paso, Texas, the next receiving such a transmitter.

It is rumored that the I. T. & T. contemplates a SW South American hook-up shortly after January 1st. South American markets have not been extensively open to United States advertisers up to this time. Programs will emanate from some shortwave station located in Buenos Aires, who will direct their signal northwest by southeast, covering every country efficiently with the exception, possibly, of Chile. In turn broadcast band stations will have SW transmitters picking up this signal and re-broadcasting the programs over their BCB frequencies. Announcements in Portuguese and Spanish should take care of the nationalities at which the programs will be directed.

I understand that the new Canadian government is seriously considering the abolition of the CRC; introduction of more commercial programs abolishing the $2.00 levy on radio receivers in favor of a tax on radio tubes and brightening up of all broadcasting in Canada. In other words, it realizes that the majority of residents in Canada are not satisfied with conditions and programs and turn to American stations for their radio enjoyment. We have been advised that this will take affect about March 1st, if not by then.

The "big-shakeup" is being stalled without the assurance of any action until Spring or next Summer. It is seriously believed that stations on "cleared Channels" will be allowed to increase their power to 500,000 watts, if they care to do so (not for DXers with old time
Page three  NATIONAL RADIO DX NEWS  DECEMBER 11, 1935
receivers!). As mentioned before in this weekly, regional channels are expected to be seriously affected at the same time, although this is denied (for political reasons) by the FCC at this time.

An old time program is back again. It is the Cliquot Club Eskimos, directed by Harry Reser, who was on NBC for this sponsor from December 1925 to July 1933, recording an eight-year run—one of the records of radio. I'm sure all CT's will be gratified at this return to the air of one of radio's best-loved programs. The time is 8 to 8:30 P.M., Saturday's on CBS's eastern network.

SHORT WAVE DEPARTMENT

Radio El Munifico of Buenos Aires has been testing the new transmitting equipment of LRU and LIX. Transmission has gone over the ether wave on a frequency of 9830 kilocycles, signified by the call LSN-3. LRU and LIX, according to reports will take the air soon using channels of 15290 kcs. and 9530 kcs. respectively.

Several notices have come to the editors desk regarding the 'amateurs vigilant' taking place on the bands near 60 meters. It can be readily seen that the attachment of additional wavelengths by the amateurs will be a distinct advantage towards the prevailing interference conditions. Your reports to this department will be of much interest as we are anxious not only to know what you think of the amateurs trying to reclaim lost territory, but also to know just how many stations you do hear on these channels.

Reception from Cuba has tempted us to watch for good reception from South America. W2BC Caracas was sending an excellent signal into New England last week. On Friday evening we heard a Spanish speaking station near the 6500 kcs. wave. We thought at first it was HJLBB but in signing the call which was broken by the static, we heard the numberal '4' thus bombarding our hopes. Who can identify this one?

The editor of this department wishes to acknowledge all the kind letters and cards received during the past week. Being slightly self-conscious about his penmanship, he felt somewhat reluctant to answer the letters individually. The joke about the editor is that he is trying vainly to learn the touch system on every typewriter he can get his hands on. On his desk, he looks sadly at the faithful old Corona which has served in his family for nearly twenty years, for the old hop is not standard and the touch system cannot be used therewith. This week's copy is going through the mill in a New York office.

Watch these waves for:

HRN 5370 kcs. after 10 P.M. EST. TC 2X 5940 kcs. till 1 A.M. EST.
HH2S 5900 kcs. about 8 P.M. EST. C09UR 11,300 kcs. 4-6 P.M. - 9-11 P.M.
C06R 8070 kcs. 9 AM - 5 P.M. EST.

SHORT WAVE DX CHARTER

By ALFRED W. OPPEL

DID YOU KNOW...that XEUW, 6.02 megs., Vera Cruz, Mexico, will DX December 15 from 3 to 5 A.M. EST; simultaneously with their BCB trans on 1010 kcs...we recommend HJLBB, 6.77 megs., Cartagena, Colombia, on their English-speaking broadcasts every Monday evening from 10:30 P.M. to 11:15 A.M. EST...JVIS, 10.74 megs., Japan is still coming thru FB, being heard this past week on our receiver with a QSA-4, R-5-8 signal...you should try HH2S, 5.90 megs., Port au Prince, Haiti, from 7:30 to 10 P.M., EST, with an interesting program in French, signing off with Ted Lewis' "Good Night" song...British overseas re-broadcasts may be heard daily.
BOARD OF DIRECTORS’ MEETING

The first Board of Directors’ meeting was held at club headquarters Monday evening, January 9. Ways and means of improving the club Bulletins was discussed. The important topic for discussion however was "How we might do something to eliminate the interference the 'All Nighters' are giving us." I brought up several suggested plans, as well as the proposition which was suggested by Carl Forestieri in one of his recent letters. After much discussion we decided to adopt a plan quite similar to Carl’s original suggestion, namely that:—Those DX Fans and DX Clubs who were in sympathy with the idea should follow our suggested plan. The Plan as offered is as follows:—Those persons interested in preserving the general welfare of the DX game should write a courteous letter to the Federal Communications Commission, Washington, D. C. Attention:—Mr. Herbert L. Pettey, Secretary stressing the following points:—First that the "series of all night broadcasts"from stations now indulging in this practice, was tending to 'kill' the interest in DXing. Second that even though DXers and their welfare might not be of any grave concern to the Commission, that they were not to overlook the fact that the valuable information that has been contained in the reports of many of the DXers, has been largely responsible for many of the improvements which make radio broadcasting what it is today. Third that the stations feel that DX programs and DX reports are essential for that reason. Fourth that if these all night broadcasts are permitted to continue that DXers will lose their interest, inasmuch as so many of the channels will be blocked with these broadcasts, thus making it impossible to continue DXing satisfactorily. Fifth that if this interest does die out, it will mean that the stations will suffer inasmuch as they will no longer be able to depend upon the valuable reports and suggestions that are received from the DXers. Sixth that the broadcasters themselves, are finding it a waste of money and time to try to put on DXers on channels that are continually blocked by the All Night Broadcasters. Hence stations will not conduct tests that might otherwise prove very valuable to them.

As a remedy you might suggest to the FCC that they either curb the number of broadcasts that each station may put on a month, or assign them to frequencies which could be set aside purposely for the "All Nighters". We are certain that if all DXers concerned about this grave situation which we are now faced with, will co-operate in writing a letter to the Commission that stresses all of the above mentioned points, that we may be able to persuade the FCC that the DXers have really done a service to radio broadcasting and deserve some consideration in this matter. Let’s all do our part to put this great movement across. Don’t delay, we invite the other clubs to join us in this movement to better conditions for the DXers.

The Board of Directors have given their approval to the above mentioned plan. The first meeting was brought to a close and light refreshments were served.

NATIONAL POST OBSERVER REPORTS

J. Warren Routzahn, NPO #1, York, Penna. — Reports excellent reception from WJBC during their dedication to us Sunday morning, as well as fairly good reception from KIUN on Monday morning during their program for our club.

J. C. Oriel, NPO #2, Irvington, N. J. — Reception Dec. 2, 5:30-6:30 P.M. very good. Every channel logged between that time. On S’s LSX, 10.35 mc. Buenos Aires, Argentina, coming thru 1SA4, R7-8, in phone with N.Y. at 6 F.. Eliz, 8.85 mc., Madrid, Spain weak, and DJC, Germany, not audible because of heavy QRM. En lid and Italian stations fine business,
Page five

with South American stations going wild on their respective channels.

Reception Dec. 3 - quite good. KDFP, 1120 kcs. Boston, Mass. an easy catch at 7 A.M. Reception Dec. 4 - very bad. WN so bad I couldn't hear myself snore! Dec. 5 - 2-3:30 ... so fair, but K.LB, 1420 kcs. Alexandria, La., too weak to identify, with WDAI, 1310 kcs. ditto. On S's the 15,000-cycle band FB. All the foreigners using that band KO, with Japan, 10-74 mega, heard QSA-4, R-6-8 signal. Reception Dec. 6 getting poor. Our special brand of WN in evidence, which usually preasages bad weather in these parts. The sound?...like a buzz-saw, or similar to what sounds like automobile ignition on S's. Try and get a signal thru it! This continuing until today Dec. 7, and rain is here.

J. B. (Fat) Leilley, NFO #4, Jamestown, N.Y. - Dec. 3 - Good reception.

From usual line of stations, WNL at 4:15 . N5. KSSL on frequency check KO and KSDK at 6 A.M. KO. Dec. 4 - XEAF at 3:15 A.M. R5 QSA3, faded very bad. PB dedications heard for NWC from WSOU, and WKBN, Dec. 5 heard the station on 790 kcs. again, believed to be 4YA. Dec. 6 heard another station on 722 kcs. at 4:40 A.M. playing funny music and woman singing. Can anyone identify? At 5:02 A.M. heard the Englishman on 790 kcs. which we believe to be 4YA with their new 10 KW transmitter. CBBC heard on 940 at 8 F.M. Dec. 7 - 1YA heard at 4:20 but faded badly. Heard station on 750 kcs. at 3:30 A.M. which Pat believes was KGU, signed off at 4 A.M. Sunday, Dec. 8 - quite noisy, WTL heard having battle with CKCV. WHO had Xmas Fund Broadcast with Gene & Glenn, these programs to take place beginning at 11:45. EST for the next to Sunday mornings. KUSD heard at 3:15 A.M. R6-QSA4. CBBC heard R7, stronger than any time they were ever heard before. Dec. 9 - Bordeaux heard at 2:33 A.M. R6, quite a bad heterodyne most of the time. FBCamp 1113 kcs. R7 at 3 A.M. English announcer at 3 A.M. at 4:35 A.M. heard 1YA again. KGU heard at 4:17 A.M. man told of his visit to Hawaii. Pat also tells us his verif from XETF announces the fact that they use but 12 watts power. Fine work old timer.

Mrs. A. C. Johnson, NFO #7, Henry, S. D. - Nov. 20 KYWI, QSA5/R6/N/N. heard at 5:30 P.M. KGFX, QSA5/R7/N/N. has been heard regularly during the daytime at Mrs. Johnson's residence. Nov. 22 - KUSD QSA5/R9/N/N. on from 4 to 5:30 P.M. Radio unusually good. CJGX QSA5/R9/N/N at 11:30 to 12, then 3:30 and 4:30 which took possession! Nov. 23 - WAPI QSA5/R6/S/N. at 5:25 P.M. KSD and WKB station announcement heard. Nov. 25 - heard lots of the police calls coming in, reception unusually good for that section of the dial. KGFX announce that they began signing off at 5 P.M. as of December 1st.

Miles A. Hart, NFO #9, Plainville, Conn. - Dec. 1 - KKYZ quite good. XEIZ heard excellent until static began setting in around 3 A.M. WMIN heard like a local. Nothing heard of CF4. GJU3 also heard like a local. Nothing on either KUJ or CHAB. Nothing on the TAs or TPs so far this season, SAs have been fair at times.

William K. Stone, NFO #10, Toronto, Ontario. - Nov. 17 reception good. Heard 3O, KBF, WOM and WMAE all R9. CFCH and WJBD R7. Nov. 16 reception also very good. CWG and WMAQ on regular broadcast at 5 P.M. WJBD R9. KTSD R7, WD10 & KSO R7. Reception poor until Nov. 24 at which time the following were heard R9. CKL7, CFCC, CFPG, WMAQ, KALC and WJBD. Nov. 27, CAU R9, WLO R5-7. Dec. 1. Reception fair, WIAW, KIBC R9, KLOK R5-7, KTUL R7, WADY R5, WJAD R6-7, KVOA R7. XENZ, XEU and GJLS R5.

Eddie Grant, NFO #11, N. Sydney, N.S. - Nov. 15 - Poor European reception, only a few French stations heard. General reception very good. Nov. 16 General reception poor till 9 P.M. Only 6 Europeans heard, of which four were French, very weak. Nov. 17 - General reception very good, European reception poor, all French. Nov. 18 - Reception perfect, heard 16 Europeans, French, German and Italian. Nov. 19. Reception perfect, first US station 7-7:30 A.M. WDQ heard 5 Europeans. Nov. 20 reception good, only 3 Europeans, none heard till 7 A.M. Nov. 21 - reception very good, Only Athens and Lisbon heard and US Europeans. Nov. 22 - reception-
