We welcome as a new member, Mr. Elmer Volotny, Cleveland Heights, Ohio, who was a member back in 1939, and also the renewals of Vincent Stassen and S. Sgt. Al Malay. Thank you boys, and may the DX roll in for you!

**WTAX.** We received word on this only on Feb. 11, so there was no chance to tell you of this program before. We will attempt to persuade WTAX to repeat a little later on, when we have advance notice. Member Martin "Speed" Wright, personal friend of C.E. Van Swearingen will be at the mike with Mr. Swearingen. We hope many of you managed to hear the program from this 100-watt station, arranged by "Speed" Wright.

**WLEE.** An hour short notice on this one, but we understand Dick is sending cards to you on his list, and also stations VCUJ, W2TCN, W2ASK, and W2MOX, all on tests or DXes that AM were asked to publicize it. We remind you that WLEE has a very beautiful letter-head & it is well worth while for your collections. We thank George W. McGuigan, C.E. for this program, arranged by Len Kruss. We hope lots of reports are forth-coming.

**WLAN.** Between 3 and 4 AM, members Bob Weaver & Warren Rutzahn will appear on this show. This is one of the new daytime stations, and this long program will be a great chance to hear them coast to coast. WAN is believed to be an all-nighter, but we feel WLAN will get through all OK. We do not have the name of the verisign'er here, but send your reports to the Chief Engineer, whom we thank for this show, arranged by Bob Weaver.

**IMPORTANT--** BEST OF WRITE-UPS ON NRC DXES ARE ON PAGE 10, ALSO NNR'S.

We welcome Vincent C. Stassen this week as ASSOCIATE EDITOR of the DX NEWS. He will do "DX Down the Dial," and will give 2 pages. Any empty space will be filled by Ray Edge.
That is the DX DOWN THE DIAL FOR THIS WEEKS TIME. THANKS FELLOWS. Send in any news you have and I will cut the stuff for bulletin. How abt that Rielley. At least you got one item in. Do not wait to meet a dead line. Send the news in as you hear it and we will compile it all here and try and get you some news. So what say fellows? Let's all have some news for the next issue. Deadline is Feb. 18. So I will be waiting to hear from you AND I DO MISS YOU.

To Say Lefty: Already put the SW/FU on one stencil the carbon backing got jammed up near the end and that was the start of my troubles so I had to turn out another one without the carbon. Hope this works.

Heard on 2/10 WAGC K9RH AND WWSC with NRC programs. WAGC announced for NHC & NRC and mentioned latter from Lefty about the WWSC Spec. Hope you all heard it. Nice programs from all three.

Don't forget to listen to WATN on the list of March 24 on. Send those reports into Harry and let him know how they are getting out & he'll play all the requests you want to hear. It's your program so why not make it a real bang up one?

Another thing that I have noticed is that there is only a handful of you fellows who send in tips regularly for this section so how not all you active DXers sending in a postcard once a week and we should be able to get some kind of news for this here without me trying to think up something to say and take up a lot of space that we could use for some good dx tips. Just one little post card from all of you once a week ought to uncover something that will be of interest to the next fellow. So lets have that card from you now.

Guess I give you all a little information on myself. Been DXing since 1937 but never did much verifying. Now have 341 here with 45 total of some 850 heard but stopped logging them back in 1941. Have received biggest thrill when I just about got the BBC stations on 31st and 32nd of last month. But not enough to report on them and I now see via NRC that they have stopped verifying again so that is out. These boy JONES up in the other end of Philly seems to have them crawling right down his antenna. That is Jonos up in Bustleton. Hi. I'm in Germantown. That's 4TH up there? And how about a card from you? Well to get back to myself. Married with three little ones running around. Served a little time in the service. All on this isle of the USA 31 months and 14 days to be exact. Mostly AAF but got caught in the swing to the INF. but they gave me back to the AAF.

Which again reminds me. To RALPH & Co. only have one that is well known. The telephone caller upper. I've sent altogether so far three letters and tried phone call to WIDG but still have to hear from them. Even went as far to issue their verices for them if they would give me the names etc. of their reporters but still no answer. Have not given up thou. Have to go down and see them some time and see what I can find out about their verification status. I got them verified from back in 77 so that is long to be of any use. Maybe if you fellows would drop them a card and ask them to answer me on their standing we would hear something. Well this is it. Send those reports to V.C. ST: 5347 Friscilla St., Phila, Pa. 738
February 15 1947

Received from "KORC"

It grieved me deeply to have to disappointed you and the N.R.C. by not being permitted to carry out our scheduled broadcast of Jan 29th. I would like to quote the wire as received from the Commission, as this in some manner may make up for the loss of sleep and efforts so many of the Club Members must have lost. Quote "Retel 28. KORC authorized to operate daytime hours only. Section 3.10 of Commission rules states no station licensed for daytime hours of operation may broadcast any scheduled program during the time from twelve midnight and local sunrise" unquote.

"Mr. Corcanges also called me on the phone Sunday 2/2 and was very profound in his regrets. He was very much taken with the fact that fellows wrote in saying that they were unable to pull in KORC. Among letters and cards read to me were from Batson-Brauner-Feorstes and Stone. To Art:---

You will receive the back veric you requested. When permanent license is issued KORC, we will be notified of test programs. I am sure everyone appreciates the position. Mr. Corcanges found himself and we can't help but agree that he did the right thing in cancelling the program. Thanks for your efforts. Tom Carberry.

Seeing that this page would otherwise be empty your Exec Sec will fill in the remainder. Lefty did not have room for the above so sent it on to me to add to any space Vince had. But Vince having only one stencil this week, filled it in entirely. So will insert my DX from 2/8-2/14.

RAY EDGE-BUFFALO N.Y. Have sent reports to WBIK-WLHK-WGNS-KGBP-WWRC-WNDR-KTVW-KCNC-KFIR-WMBC-KHC. Verics are letters from KMKL-KFBI-CFOR-KQVP-KWEM-WILK. Total now 1090. Heard WILK 2/19 1:54-2:34 AM, not many announcements and veric states they tested 1-3 AM on 12-13th and will go on the air 6:30 AM the 13th for program tests. KQVP states they conduct a F/IE V on Monday 4-4:30 AM EST and try to make it like a DX program for those DXers who have not as yet verified New Mexico. Kinda nice.

KCNC was heard testing 2/13 from 4:03 till 3:31 and after.

Information from Bob Weaver says he is now hoping that "WLAN" doesn't run into the same thing as KORC. However besides Bob, Warren Routzahn will be present and it is hoped to have one swell program, so all you boys be in there listening. Says for all of us to report to WLAN.

No N.R.C. Report-forms or Letter-heads as yet. As soon as a supply arrives you will be notified through this bulletin.

Regarding the increase in NRC Dues. To make it a little more clear, this increase does not effect anyone having their dues paid. The increase applies to you when your membership comes up for renewal.

In ending this sheet I want to take this opportunity to Thank Every One of You Members for the swell support you have shown to Lefty and my self. Your club is strong in all positions. Now that Vance Stasen has agreed to help out Lefty by cutting the "DX DOWN THE DIAL" stencils, let all of us support him by sending him all the DX-info we have. (Pop Edge)
Notice is hereby being given that after Midnight, March 31, 1947, the International DXe Society will cease to be (as is.)

The reasons for dissolution are as follows: (1) The I.DX.S has been in existence for over 15 years, and in that period of time, only 3 persons were able to receive the IDXS cup (2 now dead) and only myself left. (2) It was stated as a private gift for the DXing hobby, and I feel that it has served its purpose, and as no one can guarantee that it will be kept going after my death, unless some organized club or group takes it over, to keep it going is useless! (3) The funds now on hand (trust) if allowed to go on with interest at the present rate, the sun would become as vast that there could never be winners enough to use it up; and with no one to keep it going the trust-fund would soon go elsewhere. (4) We feel (family) that this sum I have used to DXing fraternity, will be of more value to the DXers in the future, by attempting to convert it into other charms than by the giving of a loving cup to one or two DXers (who make the grade) over 5 to 10 years, and no one except the DXer who wins the cup ever benefits by it, and the average DXer gets nothing.

So with this idea in mind, plans will soon get under way for something like a memorial or a museum to house rare and verification collections (under glass so they may be seen) or any other equipment relating to DX activities.

This plan is still in the embryonic stage and details cannot be given at this time as they are unknown. But once it gets under way any DXer who has a rare verification or a collection, and wishes it to be perpetuated, he can give or will it to this memorial or museum at his death, and in this way those verifications (and in known cases the entire collection of a life-time) have been destroyed by the DXer's family after his death. We all know that a verification is of no value except to the other DXer himself, who has heard the station & satisfied his own ambition, or its value as a collection to the other DXers in the future ages. Persons not interested in this hobby of DXing may carelessly destroy precious old or rare verifications, and station curios, for to them they are worthless old letters, dust-catchers, and junk.

This plan will permit the DXer to know that his time verifications will be kept for years and years after his death, if he so desires it. Some veries are today priceless, providing post-mark and other details are shown.

If any DXer is now, or will be eligible for an IDXS loving cup before April 1, 1947, contact your club or IDXS at once, for no prizes will be ever given from here after 4/1/47. Should any DX club wish to take over the IDXS and make its rules a part of their by-laws, and guarantee that under no condition will they ever lessen the high standards required to the IDXS and make it a kind of exclusive aida-club of their regular club, & they contact me, I'll see that it is legally transferred into their club thru regular contract agreement (free.) This would permit some DX club to hold unto the restricted standards of the IDXS should they ever decide to use it again. DXingly yours, and signed by David F. Thomas, founder of the International DXers Society.

IDXS RULES
1) Must have 1000 ECB verify, over 1000 miles distant from the listener. (550-1600 Kc/s.)
2) Must have 1000 SW stations verified, 500 miles or more distant (no mure or code)
3) Must have 10 or more Long Wave verify, at least 3 must be broadcast, 1000 miles away.
4) Must have 1000 amateur verify, 2,000 miles distant.
5) Must have 3 verify from each amateur band. (Trophy priced at $156.00)
6) Must have (a) Verify from 150 countries and Islands of the world.
(b) 100 verify from each continent & their islands, inc. your own continent, & with 3 or more ECB verify from each continent, remainder can be SW or amateur, but no SW.
7) Stations count by call letters only. All must be legal stations at time heard.
8) All required verify must be submitted for inspection to IDXS HQ or to some authorized IDXS judge, by registered mail. Upon acknowledgement of your acceptance you must submit a complete & detailed history of yourself & your DXing, outstanding DX catchers also 3 or more personal references as to your st-nling in your community. You will then sign 'swear to under oath the Honor Pledge of the IDXS & return to David F. Thomas, the founder of IDXS. Upon receipt of this you will be sent your life-long IDXS membership, a beautiful engraved trophy which is the greatest trophy of DX ability & honor that can be given to any DXer in the world, at now or any future time. Code stations are not counted in rules 1,2,6B. Stations count by calls, even on SW where one may use several frequencies.

KBOY & POTER - 970 - KHGO, Mil, T.H. to 1,000 U, from 1800, 250 U
POWER - KIT, 550, Phoenix, Ariz., to 1,200 U, from 5,000-1,200 U, a decrease.
KJBR - WICA, 750, Ashland, Ohio, to 5,000 - 1,700 U, from 1,000 D.

The station mentioned on Page 3 in last issue as not being on, although it had been reported, was KJOS, Natchitoches, Louisiana - I noticed it was illegible. Sorry! -Ed.
The above changes in station data are from the latest group of F.C.C. releases, and in them there was no mention of a frequency change for WMT to 950, or for WGMC to 780, nor are the new stations in Bakersfield, California, or Santa Cruz, Cal., 1340 and 1450, respectively, so I believe we can assume they are non-existent.

Your Editor wants to call your attention that he would like you all to send in your votes on the questions which appeared on Page 10 of the February 1 issue. As this is being written, I have gotten only 9 votes, and they include my own. If you have any opinions at all as to what you want in DX News, then please make them known to me.

DX DOWN THE RAIL LINES GO TO VINCENT C. STEVENS - 1647 FISCHLIIA STREET, PHILADELPHIA 44.
"WISPERS OF THE LINES" GO TO ERNEST R. COOPER - 439 EAST 21 STREET - BROOKLYN 23, N.Y.
MEL OLIVER, HOUSTON, TEXAS Two new stations on regular schedule in this area - KGEC, Gal-
vaston, Texas, and KQRT, Goose Creek, and both like locals here. Daily sked for each is
8:00 AM to 7:15 PM EST (Sunday unknown.) Reports this week to KBKL KRCB WFAQ XELO XBOY,
a letter in Spanish, and varies from W/ZKEM KGBC (a poor typed card) W/RX ZAKK W/AHL W/DU
KQIL. 2/4- Heavy static, heard nothing but KQIL testing, 2/5- WX good but bad electrical
noise. W/LT & W/HE on 1340 but no W/HE. 2/6- KOPO & W/BQ testing at 4:00. 2/7- W/DU ag-
ain behind K/ZKEM, but can't copy for report. Varie signed by J.H. Mayberry of K/DU says
she feels they expect to go on regular sked about 2/15. Certainly surprised to hear KQIL
as hadn't heard them testing at all. Have to laugh at XELO's announcing "150,000 watt
clear channel station" when K/ZKEM was passably readable through them. W/AHL varie says
they have f/o every Tuesday at 2:15 a.m. (C8). I suppose.) W/DU's varie a nice picture
card of Johnny Murphy (anchor Liisman?) autographed by him and note of verification on
reverse side - of the card, that is! Hope to have a better week. Haven't heard XEX any
more on 730 K/s.

WILSON M., SELLER-RECHERDA, MD. I'm a new member of your club and am writing to get ac-
quainted. I have been DXing off and on since 1939. At present I run my own station with a
6000 watt rig and usually return quickly to the broadcast band. I have heard several of the new
stations on their equipment tests. Among these are WAC
KQRT FORX W/RX WFAQ XELO XBOY. KQOL was heard on the morning of 1/31. They hit a peak
of 2-3 at 4 a.m. K/HE was heard very poorly on 1/29. Letter varies recently received are
W/DU WAC KQRT W/HE W/FAQ W/PAM W/AHL XELO W/HE. Cards have come from USPA CHW/YOE.
KXL has been heard several times on mornings for 1200. YEJ was heard signing off at 1:19
AM on 990 on 2/7. W/HE was heard here from 6 to 6:30 PM on 1/30. What happened to W/HE?
(They should live so long; Hi - Ed.) This about does it for this time but I hope to have
another report soon. (I'm going to send a Christmas card, and welcome to the KBKL - Ed.)

TED MATSON, SCHAUMBURG, ILL. About time for a report so here goes. Reason for no reports
is that the SBC has been so noisy that I've done nothing but turn on the radio and im-
mEDIATELY turn it off again. Reports cut recently to the following: W/FSC WAKR WIZ WCY
(1 mile from the house) W/CF W/PAM W/AHL XELO XELO. My antenna is in a bad spot, telephone
wires and power lines all over the place! Can anybody advise me on those rod arial
that are placed outside the window? My inverted "L" is practically useless! (Sorry to hear of your troubles, Ted - Please, some one - any suggestions for Ted? - Ed.)

ROB DROUIN, COLUMBUS, IND. Latest reports went out to KD/LS V/RO KOAT K/PAC W/PA V/RO
WXMA W/NSA KTTL W/EX W/GAC I/EM SED WABB K/REO W/HE. The latter two were heard on the
KBCD DX program. W/SG's test gave XEDO a lot of trouble here. W/ABE is a fair daytime
station here. Latest varie received are: W/MAZ K/DSY W/PSY W/NSA W/DFW W/HE W/RO KOAT
The total is now 66. I'll get up there some of these years. K/M was my 45th California
varie. I sure would like to get that up to 50 by the end of the season. I got a new ho-
"1000 watt radio in my car so I might even DX on the road between here and Lafayette - so
for it sounds quite hot. A good daytime signal from W/HE with the antenna all the way
in - that isn't too bad. I think I'm going to have a schedule this coming semester
without Saturday classes so I might get home more often on weekend. That's about all
the DX done from here. I still have 5 new varie to put into my log so I'd better get
at it. Varie seem slow coming in. I'd rather did get mine from W/MAZ although I notice
that they did put out some. (None here, either, Bob - 3 reports, too. - Ed.)

FRED A. ANDERSON, CHICAGO, ILL. Well as I have changed locations so for I haven't done
much DXing. As have no antenna up yet, but have logged K/AB KD/AL K/F10Z W/DSY W/COS on
rig, sked. Rec'd one letter from CHW & W/CF, cards from XELO & W/REL. I think you mis-
took my 'Q' for a 'G' - the station was W/FAQ, not W/AC, and I believe the time was Mount-
ain Standard Time. Also think it would be a good idea for a list, or etc. of varie-
signers. Oh yes - what is the station on 780 or 790 K/s, in Quarry, Panama? Guess that
is about all for now - see you next week. (Your answer in last week, Fred - Ed.)

NORMAN, SELLER-ROTHA, IOWA. No DX lately. Varie in now are W/RO W/RX W/BE
Moved home again, also end-sem-
ister exam, so no DX. (Want's hoping you pass with flying colors. - Ed.) PHILADELPHIA. 44
DON'T FORGET TO SEND IN DX DOWN THE DIAL ITEMS TO VINCE STASEN, 5347 PRISCILLA ST., PA.

NATIONAL RADIO CLUB "DX NEWS"

MISCELLANIES OF THE WEEK

DR. J. E. KLINKHOFF, PLEASANT T., VA. Since my last report vies in from UNOS WHEN KF0U.

KOST GPOG KOAT XEAF (calling from 16th to 20th Jan. - ONLY, acc. to veris - Lefty check them close on Men. AM's) KQSP KFST YOKF with a new card slightly different and less colorful than their old one. (They must have noted my comments in recent DX News about their not verifying.) A letter from CFAE which may or may not verify, and which requests more information which I will send to them. Also a card from IYA (their form N.B.S.38-3) on which both pertinent lines are struck out so it neither verifies or does not verify, but simply acknowledges my report of Nov. 25. Should I count it as a veris? (You've get me I don't know Ed.) I think that the letter by Carroll H. Veyrich in Feb. 3 issue of "Broadcasting" was excellent. Let's try to back him, in his public attack on the all-nighters. Regarding the so-called bootleg stations - Maybe I can clear up a point or 2. Under present FCC rules the following is all OK - A station may emit waves on any frequency and with any type of emission provided that a distance determined by 187,000 divided by the frequency used the strength of the signal does not exceed 1/2 microvolts per meter. On BC this would be a distance from about 90 feet to about 295 feet. Beyond this distance the strength must be less than 15 microvolts per meter. With modern sensitive receivers most of which are sensitive to 1 microvolt per meter or less, it is quite possible to hear these signals for a long distance, during the way they were often heard for several hundreds of miles. In fact, SOUTY built special receivers which had specially shielded circuits just to keep enemy vessels from hearing the power output of the local oscillator stage. Feeling some better now and maybe more DX before long.

HANK WILKINSON-.KESDEA, CAL. Yesterday, Feb. 3d, I realized one of my DX ambitions. I read a veris from YW3H, 730 Kc/s, Caracas, Venezuela from a report of December 24, 1946. The reason that I was so surprised was that I've reported to him no less than 6 times previous in past 6 DX seasons and no answer whatever. I've written in Spanish and English, sent letter by straight parcel post and air-mail, and also enclosed an I.R.C. each time. However, with no answers to previous 6 reports I still thought that another try wouldn't hurt. Locus of story - Don't give up on any foreign station until you've reported to him at least 10 times - hi! No matter how you look at it, a veris from YW3H with California QRA, is very nice indeed. He received my report of Dec. 26 on the 30th of Dec. Varie sent was dated at Caracas, Venezuela, on 16th of January, last name of v/s is Zello. Power given is 5 KV. QRA - Cipriozas a Miraciales No. 1, Caracas, Venezuela.

RANDOLPH HUNT, ECINCAS, CAL. My effort to verify as many states as possible and no stations closer than 750 miles and all that sort of thing, is cut the window, no future in tugging where most of the 250 watts are and listen to 400 cycle notes, and all nighters. Now will try for anything up to 5,000 watts, will try for stations on the far side of states to get as high possible average mileage and of course 250 watts will be welcome to pull down the average power. Buoying out of DX for over 5 years - I did not know what poison the 400 cycle note is. I got off a pitiful report to W1UN because of the 400. KREO is about 90 miles from here and heard in daytime, on their DX I could not report, that's right, the 400 was on from unidentified station, and then KEOC cars on with same. Varies in from both Trinidad stations, and #4 WYDA KERY KREM, this one seems like an all-nighter to me. KMK is all-nighter. Note that the Bobsey Twins are to be separated, and again I read are to be separated, but this is correct! (Good catch, Randy, hi! Ed.) MY E. EDDIE-BUFFALO, N.Y. Letter varies in from WOOL KECN VAGP VGPA VDAR WGRA. Cards from KBEC. Reports went out to W1H4 KSVP KCBS KERC KFRE KBLX. Total varies now 1034. Letters from KTV & VGRA replaces card varies received a while back. DX FX not so hot this past week. Or was it me? Working 8 1/2-8 AM starting 2/10 so will get in lots of DX. Still have 44 reports out.

TED SARDING, ESPACADA, Ore. Have settled down to DX again, and got off quite a few reports, 1/13- Logged KERN & YVAG while waiting for them to s/off for the FXEMS DX which I hear didn't come off. 1/19- WGRD with March of Dimes program to 3:32, KREM @ 3:39, with FT, KGXX on DX @ 2:45, was after call from Len Kruse, KGCS @ 4:25 with FT & KREM @ 5:06 FT. 1/20- Fort for KEMP @ 4:30, KGXX on DX @ 2:35. 1/21- KFST @ 5:00, KDAL, KGXX @ 3:45 with f/c. & TVU3 @ 4:05:30, f/c. Then KREM & KFST @ 5:30 to 4 AM s/off & 5 Suns 1/26- KGXX @ 4:25, with FT & KGXX @ 4:30 with F/c. & KDAL DX. 1/31- KGY on reg. skad. to 2 that's a lot of rpts for me. I may turn out OK yet. Varies in from WSTM KEDN KEIO KEVR EDAS KDLD KGXX KREM VDAR KREM. About VDAR DX write-up 1400 is well covered out here by KRE to 4:15 & now KUIN to 4, KRON also strong till 5 AM.

Page 7
JOE FRAKER-WILLIAMSVILLE, N.Y. Still not finding AM DXing very good, but picking up stations on their regular schedule. New ones since last report, 1/30 - No trace of Miquelon here either, have heard him 3 or 4 times, but not this time. 2/1 - WDAR badly QM'ed, sent him a report, venie by return mail, but still no verie on Oct. test report. 2/3 - No KBEO here, much QM on 1450, could not make out any of the Ks, hrd a few Ws testing, WFUN OK here, as usual. Hrd WGRG on reg. sked. 6:30-6:45 PM. Usually get WGCS behind WOR but this time WGBL had the floor and was on top most of time. 2/5 - Sleeping thru WIXX DX. Get awakened in time to hear K3KL testing, Thx Ralph. 2/6 - Finally hrd WWG announce at 7 a.m., his present week-day s/on time, very poor thru WHA, KHUM comes on at 7:15, so not much time there. 2/8 - WIXX testing most of morning, also on 9th. Logged WNDR who is R-7 all day on 1260, at 1:30 PM, same day. 2/9 - Hrd WCLT on test to 2:15, too not good here. Also logged K3KL for 1st time, on 7 AM end in the clear until 8 Sundays, was R-3 but K3KL floored him at 8, and WKEW-CRLB side-bands finished the job. Verie, letters WDAR WCOJ KXRJ WGPA WORZ, cards from KOPC. old KE FY card with KXXL typed on it. Infinite thank-you letter from K3CT, dit- to card from K3OK, usual BBC reply, and a refusal from W3LC because they do not verify on announcements heard, and since they had no music while I had them, I could not give them anything else. Apparently another hard-to-statisfy station.

PAT HELLEY-JAMESTOWN, N.Y. New veries are WGPA WORZ WCPS K3XT KXXL, only 2 new ones heard this week, W8OD & WMJ. Have had lumber for over a week, and very little DX for me, one blizzard after another & near zero weather all week, today, Sunday, you can't see the corner store a block away because of the blizzard and cars only crawling past the house. Have sat all week getting veries into books by numbers as received here. I'll be glad to see wome nice weather again after these blizzards.

KERNUT OFARY-WALNUTPORT, PA. A nice bunch of veries were received this week, but few reports were sent out. The veries, 13 in all, came from Lilla, KAKS KEKS KECK KG9C KL4Q K3CT W3EM K3XX W3AR WGRG W3NR W3LH, all letters except K3CK, KG9C and W3LH. The letter from Lilla was written by English, and come by way of Frankfurt, Germany, bearing both Lilla and Frankfurt cachets. My report to W3NS was returned to me by the Boston Post Office for a more complete address. Fortunately, Ralph Johans had given their address in a back issue of the bulletin, so the report has been re-mailed with street address included. This incident has convinced me that street addresses are of value and should appear in the bulletin. The following stations were reported, on 2/5, WCLE was heard on an ET on 690 Kc/s, from 2:10 until 2:16 AM S/off, on 2/6, local WGPA, Bethlehem (60 air-line miles away) was heard on an ET from 3:24 to 3:50 AM. Their opening dedication program was heard on Sat., 2/8, from 2 to 3:15 PM. They signed on at 8 AM on 2/9, Sunday. WCOJ was heard on a f/f on 8/7 from 8:45 to 3:30 a.m. On 2/10, W3EC was heard on an ET from 2:40 to 3 AM. On 2/10, W3NS was logged from 3:34 to 4:00 thru heavy QM from WACG, K3KJ followed from 4:00 to 4:30 AM with light QM from W3OM, W3ED has been heard here poorly throughout the day under WAL's QRM, W3H signs off at 3 AM on Sunday mornings for equipment maintenance. How do you fellows like that nice quiet spot around 770 Kc/s. for the past week? With WWJ's finish as an all-nighter, I would like to hear a DX program from WWJ, if possible. (Phil Nichols post-cards WW3C is working on this -Ed.)

Even if you have only one item for "DX Down the Dial," please don't omit sending it to Vinco Stasen. Just jot it on the back of a postal card and send it to him, for it may be of decided help to some member or members. Share your DX tips, there-by helping others to enjoy this hobby of DX, too. 5347 Priscilla Street, Philadelphia 44, Pennsylvania

NATIONAL RADIO CLUB "DX NEWS"

BUDGETS OF THE MEMBERS

WATN-MINNEAPOLIS, MINN. DX has not been too good here lately, and so not much report-
ea. Reports were sent out to WMQ WCNU VE6Q UFJ3 RFJ3 VWE8 WHE1 KWE1. Latest ver-
ies received are KANE WATN KBJN KSNT KCMC, all NRC DXes, and WHBC KBZX WCJU KROT.
all regulars. KROT verified report of their first broadcast, they use 260 watts and come
in here with excellent volume, but they have a clear channel, which is a real boost
these days. WFUN well heard on DX. WDAR heard but with plenty of QRM. KOLO was very weak
here. WMSE has a f/c third Thursday of each month from 5:15 to 5:30 AM. Mr. Righter of
WATN verified my report with a very nice letter. Said the best report so far was from
Marcus, Iowa. Incidentally the mail man just brought me a veriee from WFUN - it is a
white card with the call letters in black. Also for the first time our NRC DX News came
on a Saturday - some speed, hi. This month marks my tenth year since I received my 1st
QSL. Started DXing in 1934.

JOHN LONG-DALTON, GA. Nothing heard the AM of 1/20 due to heavy buzzing noise. Did hear
WAYN 1/22 on DX for our club but very poor here due to the heavy fading and some noise.
1/25, no WTXS as usual, but KANE with good signal, didn't mention club, and was on for
just 15 minutes with a different f/c. Mr. L. R. Stagg. Noise again on 1/26 so no CMCO
nor CKSB. 1/27- Did hear K6OM call short twice and a selection or so but not enough for a
report so didn't bother about writing. Heard Mr. Righter WATN 1/29, he mentioned in
his letter about getting out to Marcus, Iowa, the furthest west he had ever heard from.
No KOTK on, but did log a new one on 650, KROT, with very good signal so sent them a
report. 2/5- WFUN with good signal for our club. Heard WBDX on first test yesterday AM
and also again this morning. They received a call from Junior Carberry from Buffalo this
morning and mentioned our club. See some very interesting DXes coming up. Mr. Edward
Bishop at WGB and Mr. Charles Baltin of W6ON are a DXer's friend by agreeing to stand
by for our DXes. Am glad to see the Bobsey Twins are going to or have separated, maybe
with fingers crossed we can have some DX on 1490. Varies received some last report
are KROT WATN KAME KBMY CPOS. Mr. Fulton mentioned in letter that they would be on aga
with an early morning program when they change to 1470 and increase power, will
let us know in advance. Forget to mention 2/1 DX of WDAR which came in with a faultily
good signal. 2/3- K6FX only fair at times, due to test of KEIO & KLIZ, they sounded at
times like they were going to put in a good signal then would fade under them. By the
way Ernie, thanks for newly-elected Governorship, hi hi.

LEO HERB-CHICAGO, ILL. Only a short report. Have still a very bad cold. Hence only got
up one morning. Reports went out to WMQ & WFUN, whose NRC Special came in good. Varies
in from WBAL EFJU & CPOS. All letter-heads. CPOS states my report was the one furthest
west. Will write a letter to Ray in regards to last week's questions. (They should come
here, Leo -Ed.) Hope I get rid of this cold as it has me down, as I can't hope to hold
my fifth place in the contest without some more real DX before the contest is over. I
can't think however, as I got 111 veries this season, had only 324 end of last season.
73s & DX to all.

PETE CLARIUS-STEVEN ISLAND, N.Y. Another DX program will be broadcast by station KFUO,
550 Kc/s., 5300 watts, on Saturday morning, March 22, 1947, from 3:00 to 5:00 a.m., E.S.
T. All reports to be sent to Rev. H. H. Hewson, Radio Station KFUO, 301 De Mun Ave-
ma, St. Louis 5, Missouri. All who report on this program will receive a 32 page, 4 x 6
booklet titled "Prologue to Forget." This will be a worth-while souvenir as all others
in the past have proven to be. So let's get those reports to KFUO. No new DX here as the
noise level has been terrible here and at Bernie's. (Here too, Pete. -Ed.)

LPN KRUZE-DURBNE, IA. Today received club bulletin - and do hope many others did, so
that they could tune in WFC. Incidentally, bulletin in one day ahead, mainly because
of this reason, possibly. (Yes, Len, also Ray was going to be busy over week-end so got
stencils to him a day earlier. -Ed.) It might be advisable to do the same this time, so
a number of the members can tune in WFC. This station has a swell-looking letter-head.
(I asked WFTT, WQJU, WASK, & WAXX to mention their program that same morning, also asked
Dick to send out cards. -Ed.) Letter from Howard Jewett, CE at WDAR said, "I am glad that
we had the opportunity to broadcast for the NRC last Feb. 1. We received more reports
than we had anticipated, and from many distant points." VEIX, Rome, Ga., 1190, hrd with
ET 3:30-4:00 Am, on 2/0. (Nice going on your D nodes, Len! -Ed.)

DEAD-LINES FOR ALL ITEMS FOR DX NEWS ARE TUESDAYS OF EVERY WEEK. PLEASE OBSERVE THIS.
VXER - This may provide many of you with your first New Hampshire station. We want to express our thanks to Mr. W. F. Martin, Jr., Manager of VXER for acceding to our wishes for this DX program, and it is hoped that all of you will hear VXER in what we assume will be a clear channel, coast to coast. This station has a wonderful letter-head also, and we are sure it will please your fancy. This program is also arranged by Len Kruse.

WVIG - Many of you have heard WVIG already, but please don't let that prevent your tuning in and sending Mr. Robbie O. Hattaway, Chief Engineer, a report. WVIG is very desirous of hearing from all of you and a portion of this program will be their regular f/c time. This station has a very strong signal on its checks, and it should be fairly easy for most of you boys. This program is another arranged by Len Kruse.

VXER - Many of you boys and girls need VXER we are sure, and now comes that big opportunity of hearing them. There may be a couple other stations on 1450 checking frequency at the same time, but we sincerely hope not, so that VXER will be widely heard and reported. Mr. Marvin Seals, Jr., is Chief Engineer here, and he will be looking for your reports which are ardently requested. Arranged by Len Kruse also.

VXER - It seems that so far the luck has been all bad in the reception of this most difficult catch on our DX Calendar. Who knows, though, when they will surprise us and break through, and then a new DX thrill will be experienced in adding Cranston to logs. The address again - Radio Station VXER, 1368th AABU - APO #362 - c/o Postmaster - New York, N.Y. Attention of Sr. E. A. Abser. Thanks again, fellows - arranged by Fred Van Voorhees.

VZUK - Another daytime station will reappear, and this time it is Lexington's VZUK. We feel that they should be well heard at least in the South and East, but it is believed that VZUK will be on at this time. But make a real try for a rare catch, and you will probably be fortunate enough to hear VZUK. Address reports to Mr. Oscar C. Hilton, Manager of VZUK. Thank you kindly. Mr. Hilton, and good reception! Arranged by (ahh let) Len Kruse.

VZUK - And still another of the daytime stations honors the N.R.C. with a DX show. This station, in Bristol, on the Va.-Tenn. state line, will provide us with an hour of DXing pleasure on a clear channel, barring the unforeseen of course, and we want to extend our thanks to Technical Director Mr. R. N. Smith of VZUK for his courtesy in granting DXers this rare change of logging his station. Thanks to you, sir, and again, it's Len Kruse.

VZUK - Address is HD, Newfoundland Base Command, Information-Education Section, Fort Poplar-all, A.P.O. #362, c/o Postmaster, New York, N.Y. More next week on this big DX.

ON THE NNRG DXES - XVYX - Raymond Bates, CR is v/s - should have clear channel. XVJR - Send reports to CR, name not available. Tough channel XVJR - Too early for west, but should be a snap in East. XVTR - J.H. Ellis, CR, says no signal due south, but other ways OK. Clear spot. XVBR - Joe Patterson, C.E., may be clear during second half. XVBR - Alfonso Bressan, CE is signer. Clear channel. XVKY - Calvin L. Hale, Gen. Mr., may be 10:30-5:30 instead.

QUESTION BOX
1230 KTH (to Kurnald) Signer - Daniel C. Paters. (Kirk) Dick Altman, Freq. Dir. (Oliver)
1370 ??? 1/31, 2:55 EST s/off after test, in Pacific Zone. PM? (Quintron) Sure, Jack?
Stations can't test till after midnight I believe, and this was 11:55 PM in PST. (Ed)
1438 AFS here was hrd to announce as Leghorn, Italy, 1/21, 1:50. (Ganny) Listed 350 w. !
1450 FNAB, Varie signer - Y. Do Laurentis, C.F. (Ganny)
990 XEL - QRA for Sees - Fidal Hernandez Calderon - Boulevard Kola 1015 Col. Navarte, Mexico, D.F. Mexico. (Spelling of that Blvd. is correct, too.) (freqs reversed)
1260 XVCL - QRA for Sees - Alfonso A. Larraca, Av. Padero mm. 621 - Mexico, B.C. (Ed)
1420 ??? Who testing mostly all AM 2/1, GST 4:30 EST? R-7-8 here in Brooklyn. (Lefty)
PHIL NICHOLS - E. HARTFORD, CONN. Just noticed your bulletin for 2/8 in list of stations to watch for you list "GBY" - This was hrd & rpted on list test 1/22, here. No verie in as yet, but was on top of all-nighters at time, no loud sign. WILK 1450 1:57 AM 2/10, test. Got a little on KGRH, noise and QRM very bad. DX putrid here.
PHIL NICHOLS - E. HARTFORD, CONN. Just noticed your bulletin for 2/8 in list of stations to watch for you list "GBY" - This was hrd & rpted on list test 1/22, here. No verie in as yet, but was on top of all-nighters at time, no loud sign. WILK 1450 1:57 AM 2/10, test. Got a little on KGRH, noise and QRM very bad. DX putrid here.

LEFTY COOPER - BROOKLYN, N.Y. Rpts to WQNC KGRH TMQ VEBX WYSC, veries from KWM VJMR FMDR letters, and 2 typed lines on a penny card from KGBC, but it is my 16th century verie, no. 1250. Not much DX done this week - old feather mattress had me most of the week. I gave Phil up there in Conn. tip on VFPRC, relayed me to Cuintron, and I don't get that, but he does, the irony of it all. Hi, Phil. WQNC was poor second to KGRH, and WQNC was better than WQNS here. What has happened to Dick Cooper? I've heard about that Iron Curtain. Are you behind it, Dick? C'mon - open the door to the South, Richard! 2/12 is holiday here, so will DX all night and sien all day. No wonder they call me "Owl Eyes."/Dis is a wolf!
