**WRITE UP'S**
WFCB-Dunkirk,N.Y. Here is another one of those swell DX Programs by a new station on the air in Nov. Perley W. Tribou-GE 49. This is WFCB first try as a Special Program 1410kc. 500Watts. so lets not dissapoint Mr. Tribou and all listen in and report. 1410Kc should be clear from all QRM. Arranged by Len Kruse.

KERG-Eugene, Oregon Station KERG has arranged a Special DX Program for your Club on Monday Morning, Feb. 13 L.W. Trommlitz-Manager. 3:00 directional pattern to 4:30AM EST. 1280kc 1000 Watts non-directional pattern. We will be happy to send verifications to all members of your Club who send in reports. Signed L.W. Trommlitz, Manager.
Fellows All I can add is that I know every one of you will be after this new Oregon station. No doubt he is lacking in your Logs. And we can be of help to Mr. Trommlitz in determining his Signal Strength from all over the country. Arranged by Len Kruse.

A word on WCAT-Evanston, I11.

We listed WCAT in the DX Calendar with the idea that many of you might be interested in trying for this station. It would be a wath while catch from a distance, however it cannot count in the DX Contest since IT IS NOT A BROADCAST STATION IN OPERATION FOR THE GENERAL'S PUBLIC Listening. WCAT is licensed by the FCC but is limited to it's Listening area. The address again - Dave Barnhizer-Pro. Director; Radio Station WCAT, S.A.E. House, Northwestern University, Evanston, 111. THANKS to Derek for information on this unusual Station.

750kc. Letter from Station WPDX-Clarksburg, W. Va. 1000-D

Dear Sir:

Please be advised that we do not have the personnel and time to carry out the Test program outlined in your letter of Jan. 15th.

We sincerely appreciate your interest in such a Test and if in the future we can comply we will be glad to get in touch with you in time to publicize the event.

Sincerely

(signed) Robert D. Hough-CE

Meeting of the members

Eldon E. Addy-PO Box 158 Marcus, Iowa.

Finally have room for a good report to the Bulletin. For January I logged exactly 51 new stations. On NNRG DXs were these: WJPG-KIE-WGRS-WDEV-WDSR-KWCR-WARE-WLNA-KEPO-WAFF-KBKW-WPEB and KNCR. Top thrill was WDEV DX and the KBKW DX. The 250 Watter rolled in here with a S6 signal the entire hour with a enjoyable program, and WDEV was my 2nd Vermont station. Those New England stations are tough here in midwest states. Other new ones in January on ET's- KWBG-KIVY-WFMB-WTXL-WGRA-WKTK-KFJS and KGIB. On PC's were: WDUN-KJAM-WGLO-WBAR. On NNRG DXs KFJS-KK9R-KFJS and on regular program KAFF-WEBS and WJAY. New veries in from WBRN-RT9R-WDSR-KAFF-WTXL-KIVY-KWAX-WJPG-KWRO-KGST-RRMG and the form letter from KTTK. Since XERF was off last Monday I caught KFJS first ET and he will be local here. This AM-31st KGIB 1540kc Bremerton, Wash. was testing all AM and asking for reports. QRM from WFR. WEAR now testing on 1230kc. Hurray! KLAS and KADA now no longer 24 hour broadcasting. but KERO is going strong 7 days on 1400kc. Station KGTA on 960kc also heard here but only with carrier and announcement on the half hour. Feb. 1st KIYI-1230kc Shelby, Montana had PC 4-5 AM EST with Cycle tone and music. WEAR was to test all AM on 1230kc but did not hear him. Nice veries in from KICK and WEAR. KITE is going to test for us in March acc. to word from Leo. Best of DX.

**************
Hi gang - here's a report from one of the "Three Little Griffy-Sniffs" of the Lake Michigan waterfront society of Elfie creatures. Gad! Why did I ever get mixed up with Frey? New ones here - Jan., 16, - KJR 1:11 to 1:15 on regular sked, 950 kc/s, WEIR 1:15 to 2:05 and 1240 kc/s, a tough behind KJR 2:14-3:10 regular sked. KPRA 1040 kc/s, 1:30-2:01 regular sked. This and WARC have very effective directional arrays, as they are weak here. XNO 1410 kc/s., f/c tt 3:08-3:15 and DX 3:48-5:46 - WICH, 1400 kc/s, Polio Show 3:40-5:57, KCSU 1490 kc/s, DX excellent here 3:48-4:04, WOTP, 1400 kc/s, TT f/c 7:30-4:45, WPM 1450 kc/s, TT - a great deal of open carrier, messing up KWCR DX 4:02-4:15, KCSR 1450 kc/s, 4:02-4:33, and 4:45-5:50, very poor signal with rapid garbled fading. Surprise catch through WHMN on 1400 kc/s, WTAU f/c TT 5:00-5:15. Jan. 21 - WAVE 1250 kc/s, on DX 4:02-4:29 good signals, WILN, 1420 kc/s, test 4:30-5:10 poor signals, rapid garbled fading. Jan. 22 - KEO 390 kc/s, DX excellent signals 4:00-4:29. See where Frey fried 'cause he only got a 104-minute report, then fade-cut, and the Lion roared with anger, 'cause we'd taken all the meat off the bone. Jan. 23 - WUSN, 1450 kc/s, short ET-M 2:55-3:00, WPBC test 4:11-4:55 quite good despite Freying QRM, which practically blanketed them, then-KWSW open carrier at 4:37 and WRO at 4:44 with intermittent TT. Frey got what the Lion didn't and he still roared with anger. Verie in: Letters underlined. NIX WOHI KFAB WOAP WWIN on re-write, KICK-DX KSO OFMN WOR WDON WBN WEAK KFST KLEM KITT KXKT all-nighter except Monday A.M. KVOE verification is easy to get - just copy the sign-off verbatim - the key words are in it. As one little "Griffy-Sniff" said to another "ugna uga ugar ugar ugar ugar ugar ugar ugar" with their Adams Apple's buzzing on the G's and in a high-pitched falsetto, with a throb and a bounce until the next source, 73s and a lovely 88. The next thing I know I'll be pounding the wall with my head- a- mutter and wonder: Why oh why did I ever meet Frey? Chesire, everybody, best of DX to all. My wife just phoned the shop and told me I had a letter verie from WRIA, 1450 kc/s, Caguua, P.R. Pulled a Frey on him like Frey fried WMIN. Verie signer will be in next issue, 78s.

Frank Wheeler - R.D. #6 - Erie, Pennsylvania

In my last report I made an error. In telling about Bill Pope, personnel of WPTR, I said that he was on WWRHG, it was supposed to be on WPTR. I also had received the folder from WPTR, instead of WWRHG. Since my last report (Jan. 14) to the bulletin, I had the following luck with the specials: KBE (mix both times), WARE R-9, KEO R-3, WHRL WCFW KEBK, no luck with these 3, KWSR R-9, but got my bulletin a day too late to try for WDSR. Other new stations since my last report are as follows: Jan. 15, KSOR, R-8 1:05 a.m. (Who's this one, Frank? - Ed.) WRIO R-9 1:30 p.m., Jan. 16 - WLOW R-9 4:01 a.m., Jan. 17 - KCSU R-8 4:12 a.m., Jan. 18, WNOH R-7 at 2:41, WNR R-9 at 2:45, WMFH R-9, 3:39 a.m. Jan. 22 - WGRF R-9, 5:49 a.m., their third ET. Jan. 24 - WGRF R-9 at 3:50 a.m. Jan. 23 - Mid-summer static. Jan. 23 - KBFL R-9 3:03 a.m., KWPC R-2, behind a bombardment of QRM) 4:45 a.m. New veries since my last report are: WPGR CECR KROM CCXK. I've DX'd 40 hours, 19 minutes, for an average of a new station every 41 minutes of DXing. It shows that some stations appreciate reports from DXers as from the veries received from CCXK as follows: "We wish to thank you for your very complete and accurate report on CCXK on Jan. 7th, 1950. As these are the kind of reports we like to receive, your suggestions and comments will be greatly appreciated." (signed) Tom Vannes, C.E. This year compared to last in sending out reports and receiving veries is as follows: Reports sent out 1949-49: 101, veries received 64. Reports sent out 1949-50: 66, veries received 39.

Ted Weiser - 19R Fair-view Avenue - Schuylkill_Haven, Pennsylvania

Veries from WMMB WORZ (2) WHRD KMEG KPRA KGBT KIT WHG WBQW WBNX KGBW KGBZ KGBL, and a much appreciated one from WHor, now merged with WGBB. Eng. on duty Wm. M. Bogart verified my report. Nice verie from Albert S. Newell of WORZ, his first verie was 2 pages full. C.E. at KRAL, Dave K. Woods says they are going to put on DX programs for us DX hounds soon. WBM's Lou Murray, manager, has received a letter from New Zealand (Dunedin) on Thurs. Jan. 22, was from their f/c, 1:25, KGB 950 in Enid, Okla., with carrier and voice, hrd call at 3:52, Loged WPTR 1340 on f/c thru the mob as per f/c list. I/26 WBR on new freq. 3050 copyable at times thru WBNR-WITH, WBIW with regular DX thru 1540 kilocycles, reports wanted.
Another week of DX rolled around, some good days, and some poor ones. I forgot last week to mention on 1/19 logged WICN at 4:50 a.m., with a good signal. 1/23 - WUSN on 1450 testing 2:50 to 3:00, used TI, and WGRF on 1300 for ET, heard Q4 R-S plus. Seemed to be a first test, heard at 3:12. WPB on 980 heard at 4:15 for a half-hour. 1/24 - WJET on 1450, test at 2:17. 1/25 - Arkansas morning was really big. KNBN on 1320, 2:07-2:45. KNBY on 1280, heard on what seemed to be some clear channel 3:12-3:30. KFPA on 1360 4:20-4:40 fairly well in spite of the Yakity Yakity Yan from the Mexican on that frequency who did cause plenty of storm. The Canadian did peak at Q4 R-S #4 twice, and KWMA on 630 at 4:12-5:00 for the #5 Arkansas station. Total of 6 new ones. Tried for KBS on 1340 but CJOB seemed to be on top here. Did hear once a statement about DX, don't know if it was Springdale or now, so no report sent them. Have faint prospect of a trip down there in the spring and by heck I'll hear them, I betcha! The other 2 Arkansas stations who were on I have verified from some time back. Anyhow that's my biggest DX festival for some time. 1/29 - Heard WATN but too poor for a report. WMFV on 1490 Portland, Me., on Polio program. QRMD by unknown tone tester who used from 1,000 down to 400. That 400 cycle tone raised Cain, too. 2:31-3:00. What Omaha Neb. station on 1110 kc/s was on a Polio program? (KFBK - Ed.) WWJP, Cagunis, P.R. tested on 1110 by rather poor so gave up logging him on 1/29. Veries, yes. CKBI KSOB, KSOB letter vere said he had filled 1 complete file with reports. Quote - 'There must be a lot of you DXers!' There is. KFBN letter vere, GJFP card in letter, and KVOO vere after a number of reports over a number of years. I logged him on Christmas A.M. so guess he had a bit of the Spirit. KTUR letter vere in week. WICB letter vere for early-bird program, and a vere on SW from Lisbon, Portugal. On Sunday night 180 or 190 kc/s said and found that TA coming in Q4 B9 with quite a bit of sharp static. 'Pretty near made up my mind the guy said - Oslo, don't find any Norwegian stations listed on that frequency. Thought it was Iceland but may have to send a report to Oslo or else get a Swede from down town to help me identify him. Could find out if it is Norway as we have a man in our factory who can speak it quite well. Anyhow I'm going to chase around till I get a TA vere from there. No go on KEDO 1/25 just too much N.Y. Was CJOY on 1450 DX on 1/29? Tried but no go. No CURL on 1220 due to atmospheric conditions. DXingly;

Monty Montulet - Elberon, New Jersey

Slow week here. Both incoming and outgoing. This batch from 1299 to 1400, or getting by the 13 hundreds is rough. The incoming trickle included KAPP (#50 in Calif.) WFBF Algiers '41 - Algiers 1113 - WILV - Nantes-Montbert 1366, to kick the gong up to 1368. Goal of 1500 by this Fall gets harder and harder to make. Outgoing very quiet too. 1/22, HJST 1040 kc/s, 9:00-9:30 p.m. s/off. 1/23 - KPCF, 960, on special taru terrible static. WALD, Walterboro, 1490, for his second report from here. 1/25 - WJET 1430 TT: 2:15-2:30 with Detroit. WARM, 1400, all A.M. WPCF 1400 to 3:00 s/off. 1/28 KWHN, 1320, on special. KDYL 1320 through KWHN carrier, just to have something to do. to 3:00 s/off. KNBY, 1330, 3:00-3:30 on special, KFRC, 1240 3:30-4:00 on special - KDFS 1440 4:15-4:45 on special for his second report from here. 1/29 - WBBF, 1300, to 3:30 on March of Dimes program. Just about finishes week's business here. Not much good weather - rain, fog, etc. Kept signals down and noise up, so it's more anom.

Ray Sahlbach, Jr. - 3239 Liberty - St. Louis 11, Mo.

This is my first report in a long time, so I have plenty to tell. My present log stands at 1404 verified with 75 reports out. Last two weeks A.M.'s have reported 45 stations. West Coast really came through, although some in f/c list did not show here. The boys in East say they heard, such as KXCA WNBK, and others. I've averaged about 5% of list as scheduled, but find stations checking different dates and times than listed, but not stating as regular f/c schedule. 800 kc/s is my trouble here - nothing but Mexican and CKLN 24 hours, so till they blow up, I won't get any DX there. Will check against list and send in my findings later, so you may compare with other boys, and maybe arrive at a medium. Can anyone furnish exact schedules of WSSO, 1230 kc/s, WLOI, 1570, WDFB, 1490, KERT, 1430? WAMK, 1240, just heard as scheduled, 4th Tuesday. Just heard WNAE, 1360, regular f/c, 4th Tuesday, 3:30-3:40 A.M., E.S.T. Till later - (KERC is shown 4th Thursday, 4:00-4:50 EST, heard in Dec. - Ed.)
This is, I think, my most successful DX season to date. Since my last note I had my annual holidays and that meant nearly three weeks with no DX at all. Veries are coming in regularly now and that is a good thing. Latest veries are two separate card veries from WBOO for a May 1945 report, and a 1947 report which goes to show that one should never give up hope. They were signed by G. W. E. Darby, who apologized for the delay. Others are cards from WHBF, KSDQ (old KUSN card), KDOC, WJOM, WJOL, WDEF, KSIG, KIUP (for his special) and a very nice card and letter from KFW. Letter veries from WAQA who said I was the first from New Zealand to report them, KMG, KFK, KTVK, KLEM, KHEU (who sent back my report with confirmation typed on it), KEXO, and KGWY whose verie consisted of a page out of their operating log with a long letter typed on it. Those veries bring my log to 105. Loggings recently are Dec. 19 - KOST at 3:00 a.m. testing and asking for reports from outside the state of California. An unknown Mexican was on 280 at 3:45, seemed to be testing. (XFAW, Murray - Monterrey, N.L. - Ed.)

And at 4:28, KFW on a frequency test. Dec. 29 - WLET frequency test at 3:10; KLUF was a powerhouse at 3:31. WINT on frequency test, and KXSY with a perfect signal equipment testing from 4:00 till 4:44. Dec. 31 - WFUN f/c at 4:00. Jan. 13 - KXSO testing with Kansas City at 3:32, KXCL frequency test at 3:55, WLOY opening at 4:08. KEMS concluding a test at 4:16. Jan. 15 - WFFI all nighting. Jan. 15 - XEOR on 1390 at 3:39, seemed to be a test, asking for reports. Jan. 16 - KTED signing off regular programs at 3:00. WCFG frequency test on 3:52, WFFR testing at 3:45 through KGG, KCSU on a special at 3:45 with an amazing signal. WMR at 3:58 also on a special (I didn't know to look for either of those two) but I did for KGJR whose special came in quite well at 3:00, but there was interference from WPAN on a test till 4:15 which was another one for me. And the last time at the shack was the 18th of January, when I logged KGJR on a test at 3:16. 73.

Stan Horse - R. R. #3 - Bradford, Massachusetts

1/21 - KCSJ f/c 2:00. WGRA ET 2:20. WPFR all night for March of Dimes. KGVE an 8-5 the best they've come in here. WCDL ET 2:30, very tough. WRAK March of Dimes at 4:30. XER, Raymond, Texas, 1300, to 3:32. KSAL 3:45 a.m. test.; 1/23 WPBC test tough but got a fair report. Reception very spotty, WOR-S-1 at test. WKBW an 8-5 at off. Verlies from KFAG, Frankfurt 1438, WPOF CNR & KNSO. WQMO a very nice letterhead, I think. Also a very nice letter from the mayor of Springfield, Mo. for being the most distant reporter on their DX. WHOM to 5:00 a.m. again every day, grr, and WINS is to add an all-night show to 4:00 a.m. or so says the New York Compass. To Pat Helasy - Hotel flamingo is KRAM I think. They've been heard around 4:00 here. Las Vegas, with 3 all-nights is over-doling it. 1/24 - WFMG to 3:00 with religious program. KFXJ March of Dimes to 3:07. WWBM all night for Boy Scouts; WJLD all night March of Dimes. WFMG regular monthly f/c 3:30-3:38 a/f. Verlies - Hamburg, a letter and booklet on stations both in German, WQK a card. KRTV and KIVY, WQFM is all set to go, so a friend in Fitchburg tells me. 1/28 - WBFM and WPBZ with March of Dimes Shows. WIBY a/f off 2:23 a.m. TMOR on again till 3:30. Arkansas morning noted one new one, EDITS, and a report to KNMA who already has a 19:30 report of mine. The 1340 specials no dice as WQBM took care of them as always: If I had only WHRM to fight probably would have had better luck. Verlies, KNIX & WTHH for 1659. 1/3 - WJIB a/f off 1:45 from test. WWHI March of Dimes show 2:15. KXOR with some QRM 2:15-2:45. KJFF very tough 3:03 on, even with XEF off - very hard to - WVM testing till after 4:00 a.m.

Bernie Duffy - 69 Watchouga Road - Staten Island 14, N.Y.

Only definite addition to my log this past week is WDRS's DX. Same A.M. I re-heard KNBY & KFFA. 1/29 - I got WBOO on 1400 kc/s instead of 930. A.M./a, how come? 1/30 - Heard some one on 1400 kc/s at 3:30-4:00, maybe KNOR. Those few veries came in: XEOR KCSU KUSA WDED & CJLP. The new Mexican answered immediately from McAllen, Texas, office. I'm glad we got a good used new mine machine.

Jack Rhea - 710 South Hampton - Springfield, Mo.

No time for regular report, but back in the DX circle after a two or three-week rest. Feeling good now. Agree with all - the bulletin is getting much better. Will make a report of what's been heard and new veries next week. 73s.

PLEASE SEND IN YOUR PLEDGES FOR THE MINE MACHINE TO HAROLD WAGNER, ADDRESS ON PAGE ONE...
Dear Mr. Johanne:

"This is to advise that your report of WHGR on 1400 kc December 19, 1949 was correct. 

"Opening day was December 21st, and that is the day that the two stations merged. You see, we were a daytime station on 980 kc, and had a chance to purchase the CP of WHGR, and also were able to keep our old established call letters effective the day we changed frequency. WHGR became WGBG on the day we started program test on December 21. "Our sign-on time is six a.m. weekdays, and Sundays at 7:30 a.m., and sign-off is twelve midnight daily.

"This Saturday night, and probably next Saturday night, we are going to run an all-night session, we hope, on behalf of our local March of Dimes Campaign. "As far as frequency checks are concerned, measurement is taken during our regular time on the air by a nearly measuring service. We appreciate your letter, and would appreciate your advising all other DXers who heard us on our test, that WHGR was never in existence as a station, so it did not have an individual box number.

"Incidentally, the NRC member in Dubuque, Iowa, finally got his letter to us. "Thank you for your interest, we remain --" DXingly yours --

GREENSBORO BROADCASTING COMPANY, INC.

We had a letter from WPCF, Panama City, Fla., sent us by Ray Edge, stating they'd be on to 3:00 a.m. Jan. 23-29, but we received it too late to inform you in advance.

"Thank you for your interest, we remain --"
February 4, 1950

We thank Ray Edge for compiling this list, added to by your Editor. If anyone sees any errors or omissions in it, let us know and we'll pass along what is correct and what is up-to-the-minute. Other channels are relieved free of American (etc.) all-night stations. 

D R. Sir,

"This is a belated report, delayed by illness & Christmas rush, on reception of portion of your program on 1490 kilocycles from approximately 3:22 and 3:55 a.m., Central Standard Time, December 18th, 1949.

At approximately 3:22 a.m. I was just able to hear through interference "Broken Bow" (then spelled) -- test program -- and then a tone modulation for several seconds followed by "Rocky yarn Cowboy" at approximately 3:29. At 3:30 was able to copy "You are hearing this from King Charles Nan Item located near Broken Bow (again spelled) Nebr. We continue by means of ---" Your signals again faded and an announcement at 3:34 was too weak to copy. A tone ran from 3:36 to 3:37 when another announcement, broken by the tone, was not readable except for the mention of KCNI. At 3:39 was able to recognize a portion of "Indian Love Call" when your signal again faded. (Several more items listed in this manner.)

There was considerable interference on your frequency although since WWIS in Pitts. switched to 970 kcs it permits hearing many stations herefor completely blanketed. Your signals were not too strong at this point although they were readable when in the clear. They faded completely several times. Weather at time of reception was foggy with temperature of 43 degrees."

"If the above checks with your station log I will appreciate your verification and an enclosing postage to cover. I use a Scott Marine SLR-M receiver with a 12-foot vertical antenna on the roof and an located 21/2 miles south of Harrisburg, our state capital. Hoping this rather meager information may be of interest to you, and apologizing for the delay in reporting, I am,"

-Sincerely (signed) C. S. Conley.
Here is one of my very few reports for this DX season. I have been busier this season than I have in any past one, it seems, it is about all I can do to get reports off to the various stations for verie, and to answer personal letters. I have done fairly well with my DX. I have over 950 verie now, and hope to have 1,000 before the end of this DX season. I just recently heard AFRS in Tokyo on 770. Some of my latest catches are: KCBS KDKB KEFO KEUS KCOA KOOI KRTN KTVN KWDR KPTW WTHJ WWHG WYBE, Also KFRR. My latest verie are: KAGH KEMK KCBK KOWG KCOM KFVE KJFM KMYB KOLK KPMO KCOG KXRE KYOR WATM WGO0 WNGC WJPG WMAK WAMS WEKO WWHG. I took a trip down into Kansas last part of October and I visited stations along the way and thought I might have a few procedures for you fellows, but it seems as though it won't come true. They were KAYS KRAL KTVW KGCN. However you all look for a special DX program over KNEW on their first day of broadcasting on their new frequency of 770. They are going to build two more towers, making five towers. They will be looking for your reports. I will try to get the exact date on the DX Calendar in time for you all to hear them. I find among various DXers that there is a great need for a dependable log -- CSB in particular. At present there are none. Don't you believe we need one? Why don't we all get together (clubs and DXers) and support and promote such a log? Carroll H. Wyrich plans one for September -- let us all back him 100%. (Good ideal -- Ed.)

Fat Reiley -- 11 Irvine Place -- Jamestown, New York.

New verie are: WHEB KEBR WENK WJTV KXRX KCBO KDSX WKRS, 1/24 -- So darned noisy, quit early. Unknown on and off TT on 1490 at 3:19, WWWE on Boy Scout fund-raising program at 3:40 -- heard one a/off f/c at 3:45, call sounded like KFAX on 1240 behind WWWE talking as WEDC very weak today. Thanks to Randy Hunt and Mel Oliver on KRAM dope. I identified them for a report on the 21st. 1/25 -- WMGR on f/c at 3:27 -- unknown behind XRMU on 1590 3:32 to 3:55 but no call heard. CKCR, 1490, on test at 3:55 -- heard through WMGM test 4:01-4:15, WSIR, 1490 on f/c 4:50 to 5:00 when WCGD came on. 630 here today at 3:00 a.m. 1/26 -- 610 here at 3:00 and very noisy. WJMJ on test 3:33 to 4:15, open carrier on 530 at 4:00 with KPOA behind. WAXJ, 1510, on ET, 4:18 to 4:45 when I went to bed. 1/27 -- 200 and terrible noises -- plenty BB but no calls today. WJAY 1280 off test at 4:13. 1/28 -- KERRS & KDRS heard for new ones today. KFAX also heard. Unknown one on KDSX program, no voice used by him. KXRX has directional antenna, 610 true. That is why it is weak in the east, so verie says. 1/29 -- Very noisy and had cold, not much DX here today. KY00 on late program at 3:02, CJEK on their DX, WEstablish at 3:09 over KCBS, WBCR on test at 3:55, WMBD off at 3:00, WHEY with March of Dimes program. One on 1490 at 3:40, sounded like KGVA but too noisy to decipher correct call. 1/30 -- WJOT at 3:11 test, KQMO good but bothered by somebody else. KFBS off test at 3:33, unknown TT on 1490 pretty near all A.M., on end off, no voice heard. TT on 1600, 4:37 to after 5:00, no voice heard at all. KDSX has no stated time to check. To Eamie Duffy, KHON, 1380, signs off at 5:00 a.m., EST. For Ralphie -- WHCM doesn't slop over on my antenna set but who listens to "Big Joe" as "Old Joe" here listens for real DX. Ha ha. That last bulletin was a real one L & Hal!

Sid Rosenbaum -- 806 Market Street -- Wheeling, W. Va.

Did some twilights listening early part of week, due to working nights. On Jan. 24, WOKZ 5:45-6:00 p.m., s/off with "Top Tunes Survey." On Jan. 24, added WIFR with strong twilights signal at 5:45 through 6:15 p.m., s/off "Sidewalk Interviews." WATM, 5:30 to 6:15 p.m. s/off "Songs of the Isalnds." Jan. 26 -- WSIX reg. 5:45 p.m. "Big Top." Jan. 27 -- WATM, 5:00-6:15 p.m. "Organ Reversy." WCOC on top at 6:00 p.m., "CBS News." Jan. 28 -- KDBS KFPA HWDC KNYA all on DX. Only needed the 2 underlined. GJDO a blank here. I wonder if KFPA will verify this time? Previous reports ignored. WATL heard topping 11X0 from 5:45 to 6:00 p.m. s/off. Really had plenty of pep. Jan. 29 -- CJEK heard with weak signals through fairly heavy QRM. WHEB on ET with tone from 3:15 to 4:10 at intervals. CJOY failed to show through heavy QRM. KSTB on ET all morning. WMBC on all A.M. till 4:37 s/off, March of Dimes show. This completes a very dull week. Hope for better results on the 5th Monday. Verie in are KFVS (swell letter-head) KYOS KDB WTCH WAPP (very friendly) WLOH OHNO, all letter's. Lone card from WHOD. Verie total now 706. That's all from out of the hills.

BE SURE TO GIVE GOOD OLD NRC A PLUG WITH EACH OF YOUR REPORTS. ENCLOUE RETURN POSTAGE.

Ralph Johansen, 94 East Huron Street, Buffalo, N. Y.

To Pat Reilley - 1/29 and temperature 600, while in Venice, Italy, 2 feet of snow coated this city of lagoons, and so "City of Madam," (a boat on Lake Chautauqua) made an excursion trip on the lake. Today, 1/31, the lake froze and so was a good 'skate.' Did you know the "Walk-in-the-Water" was first steamboat on Great Lakes? Left Buffalo to Detroit 3/23/1818, yeah, and when 1 million dollar bills get dirty (they weigh 1 ton new) they weigh 120 pounds more, and song birds eat mistletoe berries in the winter, yeah, and some DXers have JOAK, others WJTQ verified while you and I eat hamburgers. Antenna, location, and special receivers help us; and without it, the solve is "Let's be happy with what we can get and be happy with the other fellow for what he gets." Pat, most of my reports are via 1934 vintage RCA model 125, a 3-band radio with 16 vertical on top of 2 stories high roof here in the business section. I've an R-5/ARN7 chassis using last detector stage going into a jukebox amplifier (that's an Army-Compass 200-1750 kc/s, in 4 bands) unable to get dial, and am using 3-band BC-433/3 diel) with 120 antenna from 400. This helps for sharper tuning, and then I can switch over to RCA and find it gives the 'works' with a little less 'reg'; 'baking' the 2 with both antennas sometimes helps "a-la-crystal." The biggest help is one can listen to different stations at one time, (a no-call TTR and an NTR etc.) Tonight listening to music, the concert opened with Brahms' Variations and there were frequent moments of audien breathless beauty after the cadenza. The lagoites was the stuff of dreams and then at 5:00 a.m. came a voice, BOC, Leopoldville, Belgian Congo etc. I looked and there I was on 9,78 mc instead of 9. Oh well, WBD (1340) D.J. Holt, C.E. Gen. Reg., finally sent me walter and KAYL (590) H. Carlson, C.E., says f/c first Thursday (listed) aired 7:15 a.m. - 11:15 a.m., Sunday 7:15 a.m. - 11:15 p.m. CST. Combs Broadcasting Co., Park Blg., Storm Lake, Iowa. 1/30 - KDKR special had Rx-7/11, a free bottle for a caller, followed by a dedication to Pat Reilley, WTV (1420) kept going all night and Big Joe (WOK) 3:01 s/off to return at 5:30 a.m., but came back with an auxiliary-transmitter test till 3:00 s/off. 1/29 - KSB (1430) all A.M. on 1490, Programa Nacional with 83 names and the "Bad Riders in Sky" in Spanish was good, 5:00-5:45. WGBG (1400) was OK this time with M/104; WRR (1340) same; WCL (1300) same but off at 3:33. 1/28 - KNA (1340) KRC to return at 6:00 a.m. (listed), WPZ (1230) M/104 and the Arkansas special. WGN (720) 2:05 s/off till 7:00 a.m. EST (1/30 checked) otherwise 24 hours. A few others heard at other times also and tried to find a good number for Frank Wheeler's "Heard" stations, must be 2-3 qr 4000. I don't know and you don't care, so how about making it "reports" out instead, or do you hate to admit that some aren't answer? Eh, Don, is Fri, 13th goal for WCMA's DX & will the Lion roar then? "WNBW" (1130) cost 1/2 million to W.S. Cherry, Jr. of Bristol, R.I. who got the OK from FCC and so "Longview Watch" owner, maybe now they'll send a verie-letten instead of penny card.

Ray B. Edge - 325 Shirley Avenue - Buffalo, N. Y.

Very little DX since last report. Shut off alarm again a few times so missed some DX-es which were really wanted here. So only report sent out was 1/30 to KNOO who had to fight KNOO. Got plenty, though. Letter varies in area. From KONI WEIN WAWF for my Sept. 5 report. WEBS for DX & KUR for WNRG DX. Total now 16/5. Bud Crawford of KONI says one of your boys in the "West" should clean out his years and see if you can't hear him. I intended to iron him a line explaining the all-nighters on 1490 on the west coast, but fail that of you lags, there could give him more definite info, so how about it, 1 of you West Coast members? 1/28 another sell bunch of DX News. To Reilley, No doubt your 920 kc/s is KDAY. This AM 1/30 heard KNOO mention the Florida Hotel. Thanks for infor on WOR using raised power on Mon, & Tues. AM. Lefty, I often wondered why they were so much weaker at times. This AM it was very noticeable & heard a TTR but only for a minute when they stopped & no am. Read with interest the verie-coming back fm. KTTR. Don't they have any als during their program which should afford definite verie info? if not then maybe 1 of us should write them with an explanation. Reading over comments of Rpt. From vs. letters, I'm inclined to have to go along with Bob Brown's comment. I too have used Fems almost exclusively & believe I can show just as nice personal verie as anyone. My total shows 1675 with 1282 letters, 393 cards. I always ask for itr in nice way, but use Fems. So, as Bob says, it's the way it's presented.
Musings of the Members

Kermit Geary - RFD #3 - Walnutport, Pennsylvania

Latest veries have come from KHEW KIYV KTUR WDKD & WTJH.  WDKD's was a nice card in an envelope, while the remainder were personal letters.  Conditions hit a low following their terrific pace which was set during the preceding week, so that only the following few catches were added to the log: 1/26 - CJOY testing from 2:39 to 2:51 a.m., through WDKD.  They were not heard on their scheduled DX of 1/29.  1/29 - KERS difficult to read through the VBGW-WHST QRM between 3:07 and 3:31 a.m.  1/29 - KJFU, Webster City, Iowa, 1570 kc/s., on its initial ET from 4:27 to 4:28 a.m., offering records to the 25 most distant reporters.  Luckily, XERF has again cut out part of its all-night schedule.  1/30 - KNOR excellent on its DX program from 2:00 to 4:00 a.m., and WELK, Cloquet, Minn., 1450 kc/s., heard briefly on ET from 2:00 to 2:26 a.m.  1/31 - KTYL on regular sked from 2:39 to 3:01 s/off.  Thus ends a slow week, but greatly # improved signal strengths this morning hold a promise of better days to come.  Glad that my tips on YMR and VORF have been helpful to some of the fellows, as noted in their reports.  A cheery 'Hello' to Charlie Conley, a former across-the-river neighbor.  I was just a little shaver in those days, although I did start DXing in 1925 and still have my old logs of those days.  Hope to see frequent reports from you in the bulletin and note with pleasure that you are also an apostle of the detailed personal report.  I've greatly enjoyed all the comments in recent issues on this reporting and verification problem.  It is interesting to note, however, that those members who claim to know what the stations want can't show any better averages for reports verified than those of us who believe that the problem is peculiar to each individual station.  Nobody has yet come forward with a report guaranteed to bring a 100% return of verifications and, although I hate to disillusion anyone, I doubt if anyone ever will.  In reply to Steve T'Brobridge, my reports are of the following pattern, although circumstances of reception frequently cause considerable alterations.  I open with a clear statement of when I heard the station, on what frequency, type of program, and where I am located.  Then I describe their signal in detail as to strength, readability, fading, static, interference, quality, and modulation, and anything else I might note that would be of interest.  I describe my equipment: receiver, antenna, ground, and weather conditions.  A request for verification is made, and offer as proof of my reception log which then follows, asking that it be checked against the station log.  In closing, I extend my best wishes, hoping to hear them again, and close with thanks for their anticipated reply.  It's just a solid report, nothing out of the ordinary, and I don't recommend its use because I can't claim that it will get you any more veries than you're getting now.  I believe that reports to stations should have just about as much individuality as the veries we expect in return.  I don't want every verie in my collection to look alike, and I am sure that the broadcaster, too, appreciate variety in the reports they receive which, in most cases, project the personality of the reporter himself.  I believe those who try to standardize reports are going off on the wrong tack.

Mel Oliver - 1722 Peerless Street - Houston, Texas

Veries still few and far between, those received during past week being from WMGM WMGR KTBL KWHO & WHO0.  Notice KATL's carrier on last few nights - must be testing their new 5 kw. transmitter which is scheduled to go on the air soon.  1/24 - WNAB, 1560, concluding regular f/c (they said) at 3:38, using band music.  1/28 - Got up too late for some, but heard KFFA KVRC KDJS & KWA on the Arkansas specials.  1/30 - KJFU, 1570 kc/s., a new station in Webster City, Iowa, testing from 2:00 to 5:00 this morning, and says he will be on same time all of this week.  KNOR was excellent on NRC special this morning, only KENO heard slightly in background.  They mentioned they'd be willing to go to 24-hour schedule if sufficient requests.  (I didn't request it.) Would be too bad, just as we are about to get KENO off of 1400 kc/s.  KKN on 1400 kc/s., beginning f/c at 4:15.  Reports this week went to KVRC KDJS KIVY KMAC (my 3rd) KJFU KNOR and KENO.  Best 73's.  (Who to 24 hours, Mel - KENO or KNOR? - Ed.)

New Ones Heard Lately

960 - Enid, Oklahoma
1450 T - Cloquet, Minnesota
1340 C K D A Victoria, British Columbia

Musing of the Members

Frank Gravelly— 201 Stirling Avenue— Martinezville, Va.

During the past week I've done no DXing have been trying to catch up on reports. I now have sent out 96 reports for the season, received 57 replies and sent 11 follow-ups and received only 2 replies. Varies received this week include: KTSF, letter, signed by Lea Engene, W. Texarkana Broadcasting Co., affiliated with WGNW, Greenville, Miss. WFTO, letter signed by R.F. Crotathwait, on DX special on 1/16. WFCB, letter signed by Perley W. Tribou, C.E., Dunkirk Broadcasting Corp., 316 Main Street, Dunkirk, N.Y. "DUN, letter signed by Jackson A. Bodd, C.E. 279 Main Street, Gainesville, Ga. Said they would be on for f/c each Wednesday morning 3:15-3:30 until their monitor is back in operation." The CE said he almost came here as CE of local WMVA. KRMG. form letter signed by Alden F. Wootzer, C.E., All-Oklahoma Broadcasting Co., 4th and Denver, Tulsa 3, Okla. Here is some information from their varie: "A word about KRMG: We began our regular schedule broadcasting on Dec. 23, 1949, operating with 10,000 watts at night, and 50,000 watts power during the daytime. Our antenna system consists of three 275 foot towers in the daytime and six 572 footers arranged in a parallelogram at night. The ground system, we believe, is the largest in the United States using more than 89 miles of copper wire arranged like spokes in a wheel from the base of each tower and covering nearly a hundred acres. Our major radiation is towards Oklahoma. City and Tulsa both night and day from the top of an isolated hill about 15 miles west-southwest of Tulsa and 90 miles south of Oklahoma, Okla. It may be of interest to you to know that our transmitter is the very first RCA type BTA 50 FI to be constructed, uses high level modulation and is air cooled throughout." Someone asked about who broadcast from the Flamingo Hotel. It is KBAM, 920, Las Vegas, Nevada, heard often on mornings when west is coming in good.

Lefty Cooper — 435 East 21 Street — Brooklyn 26, N. Y.

Variey now total 1856, with the addition of letters from KIJO, KJKX and KGUS, a really attractive letter-head and nice letter too. They seem to have slowed down again. Not much heard this last week. Noting symptoms of Aneurysm, I got up especially to land PRE-4 on 1300, and was successful, and sent them a report with Brazilian stamps, obtained from Walter Koester, 527 Brighton Road, Wilmington, Delaware. DXing on Sunday, no KJOY here, but did pick up KWE, 1450, Cloquet, Minnesota, behind WWDC and WLR's M/10Q (as Ralph calls it) show. WTCG & KGDB both with same type shows on 1400 battling it out, ruining WPCR, which was to be on till 3:00 a.m. WMRC also heard, and WHEQ for Polito Drive, 1/30 — Only one picked up, that being our DX from KICR, with KENO putting up a very strong second. Nice show. Feb. 1. — Up to land KZBY and did so, on TT/f/c 4100-4300, on top. Someone playing Perley Grobe's "Grand Canyon Suite" on 1010 kc/s., with no other heard here at all, 4:00-4:25 or later. On 1030, somebody playing "Dardanelles" again with no announcements. Snapshot it was WERA. Also a TT on 1240 kc/s. over WBC. If I stay up longer than 2 hours, I can't get back to sleep again.

1200 W S J B Charlotte Amalie, V. I. 1240 K G L N Glenwood Springs, Colorado

Only these few sent in new totals to Frank Wheeler for the 1698 - VARIE list, so we give you the rather abbreviated listing. First column, Varies, second, heard. RD #7 — ERIE, PA.

7. T. Saling 492-492

Now we'll run this list (up-to-date then) in the March 25 issue. Please, EVERYONE, send your totals to Frank now at address at head of this column. With only 19 members listed, this column doesn't mean much. What it needs is 6-8-UJR totals, McGee!
I guess it's about time for another one of my infrequent reports. School has kept me on the go. I did manage to report to 27 stations during December and to 7 stations during January. Maybe I don't have quantity, but quality -- wow! Those TA stations sure boomed in here. The following stations were reported during December and January: CE-76 (760) KDOM (1460) Toulouse I (812) KJJ (930) CMX 
Bordeaux I (1077) Bordeaux II (1158) Lille I (1213) Rabat (601) Limoges (648) Nice (1185) BFN (1095) 
Nantes (1366) Milan I (814) Lyon I (935) Ramès I (1040) LKS (850) LKA (625) 
TGW (1520) TGIX (1025) TIFG (625) Lopik I (995) Coblenz (1031) Algiers I (941) Hamburg 
(904) Quimper (1335) Frankfurt (1438) Koise (1204) FBC (1380) Algiers II (1113) Hertford 
(1336) CMQ (1150) and WFW (1490). Verification cards have been received from the following: CE-76 KDOM KFU CMXK Milan I LKS LKA Algiers I, Algiers II, Letters have been received from: Bordeaux I, Rabat, BFN, and Hamburg. I am now so spoiled from hearing foreign stations that I get no kick out of listening to US stations, but I imagine that this feeling will be temporary. I intend to flood Cuba with reports, and find out for myself just how many stations will answer. I have printed reply cards made up which are both in English and Spanish. I also have purchased several Cuban stamps. I will keep you informed as to the stations reported and will list the ones that QSL. This experiment should prove interesting. In the past two years without using Cuban postage stamps and reply cards, I have received confirmations from the following: CMDZ CMZL CMZK CMDU CMDL CMHT CMDZ & CMHT. However, many others were reported which did not answer. I know that's all for now. 73s and best of luck to all. 

Donald Frey - 3511 North Halsted - Chicago, Ill. 

Hi gang - had a good DX week, what with getting all Arkansas DXes on the 28th from this little Grify Sniff-in-answer to the other uga uga boo uga. And now for the report: 1/25: KLMO NNRC DX Test, f/0, M V TT 3:08-3:44, 1/25, WMM M 4:00-4:11. 
1/27/ WBA A f/0 M V 2:32-2:30, WMC ET M V 3:01-3:30. They were requesting phone calls, and the number was 776, KPO f/0 M V 4:09-4:27, 1/28 - KWW KNNRC DX M V TT 2:16-2:45, 
KERS NNRC DX M V TT 2:45-2:59, KENY test M V TT 3:08-3:25, KETA NNRC DX M V 3:32-3:44, 
KVRX NNRC DX M V TT 3:44-4:00, KFW NNRC DX V 3:48-4:11, KERS NNRC DX V TT 5:01-5:15, that's all. Received the following voices this week: 1/24, letter from WJBE, WMM, 1/25, my letter was returned with EKKO stamp from WCCO, letter from WLOW. 1/26 - letter from KCEC. 1/27, letter from WFCO. 1/28 - card from KWW, and that was all I got this week. That sample report of Leo's was sure good. Wish I could log that station, wow, what a catch! Haven't made up a sample report of my own yet, having a little trouble getting samples. I don't know Derek, why did you? I wish we could arrange some good DX, something half way round the world, some SO-weather or something. I wonder what happened to WMN? They have been coming in poorly for the past few months. I'll bet I can guess the winner of the contest -- it will probably be Bestebam. Derek overslept this A.M., and Leo fell asleep over the radio, then logging KWHN, so I guess I was the only one here in Chicago that heard the world, but I did miss the Canadian. That's about all for this time so will say 73s and best of DX. 

Joe Brauning - 23 Howard Avenue - Williamsburg 21, N.Y. 

DX slid to low levels this week & did not improve until Saturday. But despite exceptionally poor air, WFCO's DX rude in on a nice signal, for one of 4 new ones added this week. The others were WKAB, heard signing off back of WHAS a few times, but not good enough for a report yet. And indefinite reception of CJDG's DX. Had a few popular tunes through Mexican on 1360, and several remarks towards end of hour when signal improved. Last 3 selections heard with fair clarity but call was not positively logged. Signed off at 5:00 with no anthem heard here. Got frequency, power and what sounded like 'CJ, but Mexican ball chime blocked the balance. Fourth one is "Radio Popular" on 1250, who, along with Radio Barquisimeto on 1490 came on with another 5 AM program similar to one heard on WVBN on 12/11. Did not hear Venezuelan on 1270 (these on 18/29.) Also on Sun, AM WMBO WMAV & WGBG with March of Dimes specials. For anyone needing WHOD he seems to be in clear on 660 Sundays at 7 AM & WBB s/on in clear, 920, at 7:25, followed by WGST at 7:30 and WTTM at 7:45. WWG on 1560 with a dancey signal as late as 8:05am. Varied also few. Nice letters from KRMM KIVY KRMX & WJHN, card from WICH. Also letter from KOCS varied few yrs ago saying it was the station that had f/c recently hrd as WKBW blocked 1510. Glad I reported agn for this is an entirely new better 1/2head.

</table>

Addy-Brierley-Kirk-Seth-Shupe-Wagner-Wendt, no entries as yet rec.

DEADLINE FOR NEXT LISTINGS WILL BE MARCH 1, 1950 at 325 Shirley Ave Bflo.

Note: Two contestants submitted CJFP as NRC Specials. This was not an NRC Special. Specials that count as such must be at least 30 minutes in duration, arranged by an NRC CPC man (or info from him) and marked in the DX Calendar (or elsewhere in the DX NEWS when in cases of being too late to make the DX Calendar) as NRC or TEST.

Also thanks to all of you for your cooperation in submitting your entries. Listing them as you do, really helps a lot here. Again I say, if any of you find an error, please drop me a card so it can be corrected.

To you who have not as yet sent in entries, please do not wait until the last minute or ending of the contest. It will only mean a lot of extra work at this end. Why not sit down and drop me a listing now. Thanks a lot.

NNRC DXos

WKRM 1340 Columbia, Tenn February 7 0300-0330 EST report to Revois V Hobbs, Chief Engineer

WLW 1410 Norfolk, Va. March 6 0300-0330 report to Jack Siegal

Both these items from member Ed Lendziolszek who also adds that WLOW expects to go on 1400 kc soon and may be on all night.

News rather short this week and I hope it means you are busy writing reports, hi. However, response to the mimeo fund has been most gratifying and I want to thank you for remitting so promptly. A question has been asked as to how the fund is and what will be done with any excess we may have. Well, we are overplugged a few dollars and your publisher is hoping to get about 10 dollars over so he can buy an addressing machine. That is the next most tedious task here. Last weeks bulletin ran off in 1 hour and 20 minutes, no spoilage, normally this would take 3 to 3½ hours with the old machine with some scrap too. So you can see what a saving in time it means here, so thanks to you all.

Heard per the FC list WMAN WXAL WATW

A note seen in a publication recently that Brasil is on summer time for the first time in 10 or 11 years. This explains why the two on 1200 & 1300 are being heard and others should be showing up too. This makes Eastern Brasil 3 hours ahead of EST and Western Brasil 2 hours ahead.
