THERE'S A GOLD MINE IN THE (WESTERN) SKY

"Thanks to all concerned for making the NRC a goldmine of DX info, even for a West Coaster." - Bob Jacoby - 556 East Alvarado Street - Pomona, Calif. - 91767

SPECIALS

ke/s A.M., E.S.T.

Every Monday C H N O Sudbury, Ontario 1,000 watts 2:00 - 2:30 ALL
Mon. June 19 W W U N Jackson, Mississippi 5,000 2:00 - ??? NRC

EUGENE IS THE SCENE

Just a reminder of the great 1967 NRC Convention coming up in Eugene, Oregon, September 1-4. The Eugene Convention Committee - as outlined in previous DX NEWSes - has planned lots of things for visitors, including a bar-b-que, DXing session, deep sea fishing trip, crab feed, and all that radio talk that never seems to get boring.

If the Convention Committee ever gets into one place at the same time again, we'll try to draw up an hour-by-hour schedule to show you what's coming up.

Once again, we ask that anyone who knows he is coming to the Convention, please let us know either via the Musings or by writing to me. So far, we have assurances from only about SEVEN people, and that can't many! Also if anyone wants information on Eugene, Lane County, or Oregon, let me know, and I'll forward the information to the Chamber of Commerce to let them flood you with literature.

Also, I would like to see again the charter aircraft info from the New York delegation, and get something rolling on that.

If you are concerned about the weather: Last year, in the first four days of September, the temperature ranged from 44 to 94 with an average of 63.7. Humidity averaged 62% at 10am, 39% at 4pm, and 68% at 10pm, which is very comfortable.

OREGON OR BUST!

-Bart Cronin - Box 5353 - Eugene, Oregon - 97403

BEATLE LIFFY sends us an article which tells the surprising information that the FCC has exactly THREE (3) persons to investigate something like 14,000 complaints that are received annually by the FCC. The story says also they work in pairs, so it would seem that only two of the three can operate simultaneously. It is explained that out of the approximate 14,000 annual complaints from listeners, only "about 40" are actually investigated. So, is it any wonder that the seemingly endless equipment tests without any IDs continue unabated?

Next Issue June 3rd

And, this is two weeks from now. Since Tuesday, May 30 is a Holiday, the deadline will become Monday, May 29th for this issue. Then, the next DX NEWS will follow, two weeks later, dated June 17th, with a June 13 deadline. The July and August issues will be dated July 15th and August 15th, which will bring us through the 34 issues of Volume 34. We hope you will all support these Warm-Weather bulletins by sending in information for all sections. And, to those still experiencing delivery problems with DX NEWS via third class mail, how about considering subscribing via first class mail? It's a first-class publication (you tell us), so why not go first class all the way? You'll thus assure prompt delivery of your DX NEWS each issue.
May 20, 1967

AMARC will hold convention in CHICAGO 6/1-5-6

We are glad to offer space to AMATEURS interested in amateur exhibition. The site is the ESSEX INN, Michigan at 6th Street, within walking distance of Chicago's Loop.

Free parking, air conditioning, a basket pool, swimming in each room, free wake-up coffee maker in each room & free courtesy car service are among the items offered by the Essex Inn. All major credit cards are honored too. Warren Nordgren, 2123 Linden Avenue, Des Plaines, III. 60018 is in charge of arrangements. Send an AMARC to Warren for a registration form. As yet, the exact registration fee has not been settled but I believe $30 as a safe figure to quote. This will include the cost of one banquet, no doubt a luncheon as well. There will be a number of door prizes given, including a portable tape recorder & portable six band BC, donated by NASA rep Frank Peters in behalf of the Explorer Radio Association. The EX Foundation's Miss of the Year Award, along with possibly one or two others will be presented. There will also be discussions, talks on various aspects of DXing. In addition, there will be a special, informal meeting of the AMARC representatives in attendance. I urge you to make every effort to attend, pass the word to your club & correspondents. Let's make it a real success!

(by Gerry In Dexter - Executive Secretary - 503 Jefferson, Apt. 2 - West Des Moines)

AMARC, to those who do not know, is "The Association of North American Radio Clubs." It runs three types of DX Clubs - AE, EM, TV, BM, etc. It will be an all-wave Convention. It is hoped that many of our Midwest members will be able - and willing - to be present at this second annual AMARC get-together.

OTHER SPECTACULAR CONVENTIONS:

The CTXCV has their Convention at Indianapolis, July 20-25-30.

The IBO's Annual Convention is scheduled for Aug. 23-26-27, in Denver.

And, of course, our own NRC Convention, in Eugene, Oregon, Sept. 1-2-3-4.

The WNNC has a picnic get-together coming up on Sat. June 17th. Details later. It is in New Jersey, in the Ashbury Park vicinity.

FOR SURVEY COLLECTORS ONLY! A NEW SURVEY CLUB

Yes, it's true - the survey world is again organized! For $4 per year ($5.50 first class, $7.00 airmail) you can receive 25 bi-monthly bulletins containing questionnaires of the members, "hot" news on stations that may appear in surveys and "newly discovered" surveys, a perpetual list of the members' collections, plus articles on today's leading ro groups & artists. The name: NARC = North American Survey Club. Sample bulletins & back issues are available from George Jansik, 1320 North Villa Drive Avenue - Pasacana, Cal. 92107.

FOR TAPEPOINTER'S ONLY! A TAPEPOINTER'S CLUB

I read Action Line regularly as printed in the Detroit Free Press, & an interesting question-and-answer appeared in the 2/15 column. Somebody asked about how to contact persons in foreign countries by tape. Their answer: VOICE-SPURNER CLUB, Noel, Va., for membership. $4 per year for a directory of members' names from almost every country in the world - new members get a preference sheet with the world.

This membership directory also lists their interests & hobbies. So this may be your chance to contact those tapepointer from Angola or Burma whom you have been looking for for years! (The above two articles sent in by Frank Merrill, Milam, Michigan).

(Upon purchased from Cooper-Trent, Inc., 221 North Danville St., Arlington, Va.)

NEW CALL

1450 W TH U Thurmout, Maryland 1050 K P X E, Abilene, Tex., fr. KFAZ

EQUIPMENT

535 K H A R Anchorage, Alaska, 5,000 W. Taller antenna (3'6', from 20'5').

575 K E S S Flagstaff, Arizona, 1,000/500 W, 4. Move XR NE.

589 K I M O Hilo, Hawaii, 1,000 W. 4. Move XR NE.

610 G K D A Victoria, British Columbia, will be 50,000 u-3.

650 W J Z Mount Holly, New Jersey, 5,000 D-3. Minor pattern changes. (We believe this station is still stillic - BMC) (Has been since last Summer)

590 K K D U Ventura, California, from Ventura/Oxnard. Move XR SE. (Drops second main studio in Oxnard).

Let's keep these listings coming in, lads. Be sure to double space your reports, and please list dates & times of all contacts, call frequencies. Also, in listing "as heard, mention time on & off (both) or tune-in and/or tune-out time. Thank you!
An intended report the end of March

My I see from You

Perhaps this is an increase as all Massachusetts.

He says WABC puts in 

I first met Howard Cosell (kudos for him), who was in a pretty bad mood, and threatening to resign! Tjen I paraded up & down the picket lines w/WABC's AN DJ Charlie Greer. I had an interesting talk w/him. He said the All-Americans do not have FCC licenses; as all the engineering work is done by the engineers exclusively. He started at WLM-700! He's now happy w/his AN spot. He says WABC puts in such a great signal at night on the WC that his relatives in L.A. listen to him on their car radio regularly every night. I also spoke to George Hayes, an announcer, who told me about the company's operations. ABC occupies almost all of the 40 story skyscraper, but their operations are so large that half of it is in their 66th St. Central Park complex. The radio net occupies about six full floors, & the rest of it is on 66th along w/the TV network & WABC-TV. WABC occupies three full floors w/countless number of studios. The radio net employs about 400 engineers, & WABC has about 75 Nxmen, 26 staff announcers, & about 50 engineers. This, along w/their listening audience of about 14 million in the NYC area alone, & #1 nighttime ratings in many states just about places them as the largest station in the nation. That night I heard on WK BW that Stan Roberts, Jeff Kaye, Dan Newrath & Bud Fellau were leaving for NYC in sympathy w/AFRA so I went back the next day to see them, & they weren't there. You mean this was all an April Fool's joke?

Hal Robie - 273 South Street - Medfield, Massachusetts - 02052

On 11/1/65 I heard Aleppo, Syria on 764k. My original report wasn't answered after a considerable length of time so I sent a f/up. In due course this resulted in two replies via registered airmail. Both were exactly the same, very vague - & said only that my report had been received. So I took one of them & typed the word TO:, followed by my name & address, then I added "This will verify your reception of our station on a frequency of 746k to the body of their membv/f & left a space for signature. I enclosed a copy of my original report & a long letter explaining the value of a verie, along w/NRC DX Slip, explaining the hobby. On 5/1, long after, I had given up hearing & 18 months after my original receipt, I received a new member f/f that incorporated my additions including a space for frequency, which had been filled in as 764k. I didn't realize I was re-designing their verie or I would have included power, date, time, etc, hi. They do include a complete list of stations by frequency however, & the 746k outlet is listed as 100kw. Perhaps this is an increase as all other sources I have, including EBIS, show 20kw. I think this points up the fact that more foreign stations would reply w/specific veries if they were aware of what we wanted (Surface mail on this one, by the way, posted 3/30). Activity here has been nil. An intended report the end of March never got written. I see from my note that Cairo was the best of the season on 818k. 3/22, & was interested to read the exact words in Ren Dangfield's comment of 4/3 in TDXX on 773k. This frequency was not as good here as 615k. It's been a long time since Gordon's get-together which reminds me how remiss I have been in expressing my appreciation for the opportunity of meeting so many I knew only by name in the past. It was a real pleasure. The Admiral sure hosts quite a party! If the pressure of work eases up a little, perhaps there will be more time for DX another season. A pleasant Summer & 73 to all. FO- DX NEWS arrives here on Saturdays via third class mail!: Perfect for weekend or MM DXing.

Ralph Vatalaro Jr. - 27 Irner Franklin Street - East Somerville, Massachusetts - 02145

Hi again! DX hasn't been too great but veries are pouring in: WQUM VPON HJTA (& two pennants) MDR-1566 WLLH (pp/!) all ver. Andorra-818 & Batre-818 sent cards. Andorra also returned my tape. CSRA sent a nice printed card. Few reports out, & where's WCAS? 73 & remember, BOSTON in '68! Right now, I'm in a study in school so I can't exactly remember my DX times & reports sent out, hi. 73.
Greetings from the 60's of the Hudson. I really didn't mean to make it sound like a battle occurs when every DX WEF arrives at our house, but it's only because my wife & I enjoy reading it. She likes the gab (so do I), so I guess all y'g u guys are making everything very interesting - thanks. The wife's an SWL fan & I do have to give her the credit for WFA-820 way back on 6/22/66, the first night I started DXing for veries. I always enjoyed listening to distant stations but didn't know about the veries until Lee Leonard mentioned the hobby on WBC & that WMEC also had a whole department to take care of DX reports. Veries inspire me to keep on listening for new stations because when no mail comes I get lazy for a while. Also veries give me something to look back to as I have v/q from WAC & WEXR whose calls are now history.

Since last report the generous mailman has put into my clutches: v/q - WMIN, v/q & v/1- WAGS (returned stamp), v/q - WAFJ (my most Northern) WMEC WNET WPIL WCHW (finally - I got their s/off last August) WBAF-220 WMCV WVEC v/1 - WGMW WJFK WCHW. Also "sort of GSI" from WOA. If I twisted my dial all the way to the end & something about 1530K? I got a VOA broadast. Anyone else witness this phenomenon? ERC, I tried your hint on 12/30 on 4/22, but I found out my dial wasn't so calibrated. I got WJEF & WBEF-1300 both on WJMK (20 miles away). Anyhow I got to 12/30 a couple days later & all I got was WACL v/WCH depending on how I turned the RX (my OK #1820 - a real whin for a nine-transistor). Yes, ERC, WMEC is along US #1 just W of the Thames River. I saw it at night w/all the lights blinking - it even cut off WCMF. I didn't know whose array it was until I got their v/q which had a picture of the towers. For 54 reports out since 2/27 (when I started sending return postbox), I've gotten 30 QSLs. Reports are out to such as XERP VJDR & WJMR (w/a BASE). If any of this trio verifies, I'll flip. WCOM also has Mets BB in SS. WMAO has Chico. WRKL has funny s/off too - real noisy. WADK sent airm. Thes about it. Hasta la vista & Better DX! As they say in Donalde: FUB - Pittsburgh Just Beckons for '68.

H. W. "Tank" Ward - 6617 Penola Way - Houston, Texas - 77055

Since joining back into the fun of BCH DXing in mid-December & through 1/16, 190 stations were reported to. Verie return to date is 66.3%, a considerable improvement over the situation in the late 50s when I "retired" from DXing BCH. Local AM off the air 4/29 AM & KSJO & KNRY added on 12/30. Activity has slowed considerably w/return of Summer static; however, the CK have spurred activity on that other unmentionable phase of DX which is seen as well as heard, hi. Interesting to note that the petty bickering continues after a seven-year absence. Only some of the names are changed. If the attitudes are no better when an NECer visits a station perhaps the by-laws should be amended to make it verboten to set foot inside a station! This hobby needs a great amount of "missionary" work within its own ranks - its relationship w/stations - & particularly to help the neophyte DXer. The sooner the NFC sets itself to that task & knocks off the "in-fighting" - the sooner the hobby can & will improve. First step each of us can do is when visiting a station that has those non-Club member reports on hand is to ask for them or copy the names & send them to Collarman for sample bulletin to be sent. John can probably put together a letter of welcome to join the NFC & also enclose a DXCode of ethics. That way, if the person does not join the NFC, he will at least receive some guidelines to improve his situation if he so desires. Well - everyone has a great Summer & I hope we all get our WFT & KIMM veries before the snow sits this Fall! 73s.

- SGC/Phil Stiggle - 1301 1/30 Arby - 2nd Arm Div. - Fort Hood, Tex. 76546

Time for one of my very rare Musings. I guess I should report more often, but being in the Army sort of limits my DXing quite a bit. I just came back from leave about a week ago & needless to say I had a very wonderful time. The best was the time, when I was listening to CKW-800. As for recent DX, it goes like this: 4/1- KXAL-1600 @ 2:45 pm on FS. 4/2 brought in two new ones for my log book which were KOTA-1350 c/off @ 8:05 pm, then at 11:00 s/off, KRR-910. 4/4- KETA-1350 @ 1:0151:30 ft. KICK-1350 @ 1:30 FS. 4/23- KAND-1300 3:30 pm FS for a report. Then at 5:55 FS of KEEZ-1220. 4/26- KCOM-1550 NS @ 5:15 5:45 for a report. 4/27- WES-1310 @ 6:45am FS. At 7:00, KEVR-1300 came in on FS very nicely. Veries: KCOM-1550 KJOX-1440 WHH-710 - KZED-1200 KNBC-1470 KITE-910 KGIC-1450. Well, my totals have finally gone up a little as of now; I have 608/217. They should increase quite a bit in about eight months, for that is when I get out of the Army. 73s.

AS THEY DAY IN STRATFORD, NEW YORK, CAPT. "CONVENTION JOYS COMING SOON!" REMEMBER, EGER IS THE SCENE - SEPT. 1-2-3-4, OVER THE LONG LABOR DAY WEEKEND. BE THERE!
Hello again, everyone. DX For me lately has been nil, w/most of my listening time being spent w/WOR-AM. I did come across one interesting BCB item, though. On 5/7 @ 1am EST, I heard the VOA on 5480 w/"The Breakfast Show." In September '66, I had heard the VOA on 820-830; I have not yet seen it listed in any log. I don't know where the transmission was originating from, though the regular mailing address - Washington 25, D.C. - was given. I once heard spurs from the 80m band on the AM dial of another radio, but have never heard SW broadcasts on the BCB of my Hallicrafters S-120. I've shortened my outdoor antenna, clipping down the last 20' of wire, which ran parallel to the wooden fence of my backyard, & about five feet above the ground. Perhaps now my antenna & RX will be matched better. I sympathize w/those who are getting the bulletins late, although fortunately for me, I get them on Saturdays (I understand they are being mailed on Fridays). What if Mickey Mantle could stay healthy, & keep up his torrid hitting? Would you believe a pennant for NY? (No - MSC) The FB Giants next fall play Green Bay, Chicago, Detroit & Minnesota, among others. That's it, & 73s.

Greg Moors - 111 Forest Avenue - West Long Branch, New Jersey - 07764

I haven't reported to these pages for some time now, so I decided that it was about time to send in a report. I'm in my new location now, & I've repaired my loop & created a new DX den, so I'm ready to go. Unfortunately, all this comes rather late, as I can hear that Summer static starting to build up. Latest catches include, on 4/30: WRNY-11470, Tenn. @ 4:55am - 5/6: WIPR-1100, Pa., @ 7:01pm; WIXR-1450, Del. @ 8:16pm; 5/7: WISZ-1590 Mi. @ 3:34am. 3/8: WM - WIVD-590, Va. @ midnight /off; WLCB-1310 Mi. @ 12:57am; WOOD-1300 Mich. @ 1am; WNBX-1230, Mass.; @ 2am. All times EST, or is DX NEWS on BST now? (No, EST it is WPRM). No veries yet, only two reports sent out, to WWRL & WARM, who never answered my report of 1 1/2 months ago. Any day now I will send out my fourth report to WKYC. Anyone who might owe me a letter, please send it here. Don Kerstey, thanks for the info you sent. I almost forgot to say that I heard KM1-950 @ 1:45am, little QRM, umm. Also, for the second morning in a row, I heard an HI show on 920, looping SW &/or CKY, believed to be KARK, know of any other HI-ers on 920? (No - ERC) Totals now 624/127. LTX plus TV.

Frank Merrill Jr. - 10693 Saline-Milan Road - Milan, Michigan - 48160

I haven't done much DX here, because of the annual advent of static & the TV/FM DX season occurring almost simultaneously, hi. DX since last Mailing: 4/30- SMS, WPIK-730 5:37, KVOK-970 5:40, KJLY-1480 5:55, & FINALLY, CHIN-1590 6:30 e/on, all AM, & all in EST. No BCB veries since CSM's v/1. as I haven't been reporting (shame on me hi). Re the WFRU article in 4/22 DX NEWS: I believe we should send WFRU-1390 a large quantity of leaflets explaining how to report, also listing the major radio clubs (NRC, IRCA, MNRC, CDXC) & how to contact them. Then we could suggest to WFRU that whenever they get "poor reports" in the future, that they should NOT verify reception, but instead send out one of these leaflets. I feel this would help the "poor reports" situation a bit, because most all the poor-report senders are not affiliated w/radio clubs, & how else to "fill them in" on how to report? This leaflet idea would be especially helpful if we could get some of the 50,000+ giants to cooperate w/the idea. What do you think, fellows? Definitely the best way to combat this is to bring it out into the open. Unfortunately, it won't help most of the DXers who have already "hit" the large stations & are now sending to the smaller ones. The same could be done at WHOF. Jerry Starr, who is WLIK v/2? Another issue I wanted to bring up is the location of the Conventions, viz. the NRC & IRCA Conventions being on the same side of the "big river" every year. It would be better if the two clubs held their conventions on opposite sides of the river in any given year, especially for the two-club members who have access to both conventions but can afford only one of them, in a given year. The present method hurts these DXers, because the years when the Conventions are both held on the other side of the river they can usually afford to attend neither one that year, but they could probably attend conventions on their side of the river two years in a row. Thus, these DXers (me included) would be getting two conventions instead of one. Enu' said. 73. I think it's much better to list stuff in EST since most of the country is on it. If we keep EST, there will always be many who "miss" & list in EST instead of EST leading to mass confusion, hi. But for listing it in EST, there won't be that many people who will "go up" & list in EST. I'll remember! Who are the 11 states remaining on standard time?
May 20, 1967

Roy H. Miller - Box 6 - Marysville, Washington - 98260

Hello! Quite a spell since my last mailing; I wasn't sure that this DX NEWS would be published as DX NEWS of 4/1/67 didn't show till 4/17 w/4/3 & 4/5 issues little better. I fear pessimism re service from Boston area was justified; real worry about this, JAC. 3/26 found WHCU-570 TEST easy log. 3/27- I added-WTAW-950 s/on 5:30am r/17 round WOMB-1460 s/on 5:01am for welcome catch for Contest #3. (And, where are Contest Standings, RC?) (I'm wondering too; Roy -ERO) 4/21 netted CKOC-1240 Osoyoos, BC s/off 4:09am (I knew nothing of their DX for IRCA as DX NEWS late, some story on KJOU's TEST, sorry, Mike). 4/24 & local KXNW-1230 off so I added three new calls on that long neglected frequency, i.e.: KXDR Czech, Ore. s/off 3:02am (s/on 8pm, ZZ muco of the morning); KLAS Las Vegas; ID in heavy QRM @ 6:59am; KGBX Bakersfield ID 7:29am. Verifies: KFLL-950-TEST, WOMB-1570 (best on that frequency past season). Also KLOB * WHCU duplicates for contest. Above 1570 verifies brings totals there to 40 logged, 29 verified. Logged but unverified include: KFGR KINGS WAY (all Forest Grove, Ore. calls!); XECE (Mexicalli), Chinese outlet, WAPL (Boch, FLa) WTIK KLEX-WFUR & Asiatic Russian outlet. Verifies: CHUB KXIC WCRF KCVR KOUH KNIC (Salt Lake City) KXMS (Morris, MI) KXW WHRB KFIC (Cal.) CFAJ (Portage la Prairie, Man.) KOLS WWAJ CPOR WABS WAIC XMAR WDEW (Mass!)... WPIS WHOT (Campbell, O.) WITH KIRI KNDY KXLC KZOL KACE KFJJ WONA & KFLX. An interesting frequency; I would be interested in knowing how some of the other Western DXers have fared on 1570. '73. (This report was "returned to sender" by our famous Hobby-Hatch Post Office - very sorry, Roy -ERO)

Gene Allen - 13th Eret Harte Way - Vallejo, California - 94591

About time for my annual report! My commuting keeps me from DX much on a rare MM. However, 1967-68 season should be better as I'll be working here in Vallejo. Veries in the last two months are KREL-1370 CFAX-1070 WHCU-870 KAPBS-1470 KZIN-1370 KCTR-1520 XMR-1520 SRS-725 & KQD-1550. The letter was #31 from Australia. Total verifies now 2,574. I tried out the RA-700 at Lafayette in Berkeley but not a good test in the store & they wouldn't let me test it at home against the Hq-129-X. Dial calibration not equal to the Hammarlund dial. Sensitivity very good on all bands, including LW & all SW bands. Selectivity on KPAB-1400 not too good as they covered 30K! I hope to make the Eugene meeting if plans work out. '73.

Jerry K. Conrad - Box 144 - Alexandria, Kentucky - 41001

5/6 DX NEWS here on 5/6 via FIRST CLASS - that's the way, boys! Hey, Jerry Starr has no info about the Cincy get-together. That should read Jerry Conrad and Pat Flanagan! I sure hope GPN gets to feeling better. Yours truly is quite under the weather to the same as I write this. I had a nice chat 5/7 w/Tim Davisson who plans to come to Cincinnati 6/3-10-11 w/George Greene. Also letters from Chuck Raider who'll be here w/Chris Mussen. Alan Merriman also plans to be here, he writes. (Gordon & John plan to be here, also Dave Fisher (R.S.S.), Bob Foxworth, Frank Merrill, Walt Breval & others are going to try it, they say, so it should be a fun-packed weekend. As to the EST/EDT question, I think we should stick to EST year-round as most of our logs are in standard time & too many conversions lead to errors. EST may be observed by one & all but that doesn't change sun time one bit. On the "vote" question for the Conventions I feel that the two year plan is best. A mail vote would not necessarily represent the members who actually attend Conventions. BC Conventions should vote for BC Convention sites & WC Conventions for their sites. Only new DX here has been rollings on some TAs for another try at verifies. GPN has most of that. See you in '74 & everyone in Cincy June 9-10-11.

Jerry Starr - WHOT Radio - Youngstown, Ohio

Hi there. No new DX due to HNL, but Dr. Jerry's Verie Magnet strikes again. Friendly v/1 from non-verified (usually) WDXR & v/q from, would you believe, KARK. KARK card has pix of XR building w/h cheesy fence all around & a sign reading: "No visitors, No Photographs." Huh? KARK v/s is Dan Winn, CE, & WDXR v/s is Pepper Lipsinix. Pepper says they will soon be 10,000w fulltime, but still 1,000w nights at this time. This Miss - continued from 5/3. "One new station to report, my best Class 4 reception this morning (5/4) KXVL-1400 f/c-TT 12:10-12:25. This check not listed in any f/c list, Joe Fels, take note. Several more verifies in today: CGPY-920 for IRCA Special, they got only seven reports, & WOMP-1290 on report (rates). 73s, everybody, & please remember to double space your reports, boys! Also, please make sure you give start & finish (or tune-in & tune-cut) times when reporting frequency checks!
Greetings friends. No new DX to report since my last e-je to college work at U. of Md. keeping me busy. I would, however, like to call attention to my new address, printed above. As you can see, I’m no longer living on Dunloggin Road although I’m still living in the Ellicott City area. (You’re all ‘sun-logging’ there: hi - EBC)

My new home on High Point Road is about one mile from my old one on Dunloggin Road. My family & I will be living here only temporarily until we find a permanent residence somewhere else, probably some time this coming Autumn. In any event, I would like all of my letter correspondents to take note of my new address & use it until further notice. In six years of BCB DXing from my home on Dunloggin Road, I logged 735 AM radio stations from 43 states, seven Canadian provinces, & 11 countries. Back in early February during our college semester break, a friend named Dave Henninger journeyed w/me up to Syracuse U. to visit Russ Edmunds. We spent two enjoyable days there trudging through the snow & slush & managed to tour four Syracuse stations: WSYR-570 WHEE-620 WFLB-1390 & WOFF-1490. Several of you NRCers have written me and asked which nearby Washington DC radio stations are network affiliates & at what time these stations broadcast in. WTOP-1500 presents CBS NX every hour on the hour; WRC-980 presents NBC every hour on the hour; WMAL-630 presents ABC NX at five minutes before every hour & WIND-1600 presents Mutual (NBS) NX every hour on the half hour, while WOOK-1340 presents Mutual (NBS) NX at five minutes before every hour. WOOK evidently tapes the NBS Network when it is broadcasting a tape, & then presents that tape to their own station at five minutes before the hour. All Washington Senator BB games, both home & away, are being broadcast as usual & WTOP-1500 this season. I’ll report again next month. Have a great Summer & bysickle for now. (What’s the rest of the Washington BB net?)

Bob Shaw - 231 Columbus Street - Elyria, Ohio - 44035

As I write this it’s 3:00 & if we’re still CWSF... DX = 4:15... While logging un NX 1410 FT/OC, also one TJB record, for report, I finally heard CWSF-1410. They were in there weakly w/cy. WOTT was the strongest signal present. At the time, though, I was thinking it was 5/1 & said in my WOTT report which is a neat way not to get busy. 5/1-WMY-1310 concluding v/c-TT @ 12:31am. By the way, WOTT UT was heard 12:31-12:52am. WBUD-1290 ID 12:46, I believe for UT, not sure. WMRT-1340 almost no QRM @ 12:59. 5/8 was a loss since I tuned off the station without waking up. WAKR was back on 5/1. Verices are from WTVN v/q, & WCPA TEST v/f, also w/letter stating if you’ve got a verice by 5/15 to send a f/up. Does anyone have a WDXN-540 v/s? As to EST/DST, EIT would make more sense w/only 1/3 of the country not using it. But not in NYDD. Concerning the Conventions, a mail vote is the best solution for this year, I think, & then the two-year plan would be a fine idea. I read in Newsweek a story about NYDD-1150 & it said they plan to go 10kw. I haven’t seen anything on this, is it true? And now it’s cold outside & the rain is pouring down so I think I’ll say 73.

Dave Schmidt - 44 Green Lane - Green Ridge - Chester, Pennsylvania - 19014

Hi DX is really slow w/the few test weeks of school making it that way. In fact, I didn’t send any reports for three weeks up till 5/7 when I reported WMOG-1600 w/HI AN @ 5:33am, WICG-1300 on f/c-TT @ 4:31 till 4:40, then into s/on, & WPXV-1650 @ 5:02am s/on, then into c/y w/uncle Reise. That’s all. I haven’t been up for about six weeks for a MSA session, to tired, hi. Recent verices: v/l- WWMR-740-TEST (thanks to Pete & John), WPLB-1450. v/f- WCPA-1100-TEST. Total: 459. I finally Ided just who the HI gal is, alias Donna Holiday - wonder how many stations she’s at now? WIML-1450 has dropped their AN sked about five minutes back, now 6-12. Have gotten my third class permit in here recently, I may be working at WCHJ by the time you read this on SMs until school ends, then maybe the "stand-in" man for the Summer. This isn’t 100% positive as of 5/7 but I’m hoping, hi. If I do get in, maybe you’ll be seeing a TEST from WCHJ, & verices, too. I noticed they knocked out on 5/7 around 2pm & WGSN plus another one were on top. WEEZ wasn’t off, power failure in all of Brookhaven, phooey! Hey, BRC, have you heard of Heinen-Schmidt’s Beer from Schenectady, NY? That’s about all for now from the Land of WEEZ on 1590 & 1580 & 1600, etc.

Bob Schneider - 4 Pineview Circle - Corning, New York - 14830

Now on the air: WQRF-1000, Hofsheeck, NY. They came on @ 3pm 5/7, taking phone calls from as far as Oswego, NY (140 miles N) & Jamestown, NY (175 miles W). Address: Hanover House, Hanover Square, Horseheads, NY. They are "beautiful nx" rádio, & start RS 5/8. 73.
May 20, 1967

Bill Raczk - 3015 East Lincolnshire Boulevard - Toledo, Ohio - 43606

Unbelievable! The 5/6 DX NEWS came Monday 6/6, only two days after publishing! And that was third class! Maybe our problems are solved - or was it mailed early? DX is very little lately, & is almost as slow as last Summer. Here's what's been heard:

On 4/10, WMJJ-750 T'Ting w/JBC QRM @ 3:18am. 4/12- WCCM-13,9 @ 7:30pm s/off. 4/17- WBNW-1340 f/c @ 1:30am, WSSL-1400 2:55, WBAX-1240 @ 3:10, WXRT-1340 finally on f/c @ 3:20am. Then 4/21, WBGC-1550 on a test @ 3:50am IS time. On 4/23, @ 12:03am, c/w WBC & CFGM-1310. On 4/24, my wish came true w/RJR off, but just a Cuban, CMCD @ 1:25 am, I had hopes for R. Demarara, but WTR back on v/o @ 1:50 & s/o-SS @ 4:10. Later WPAZ-1370 test ID @ 1:30am, off @ 4:35. 4/26 brought WAWK-1140 @ 7pm. 5/1 was a mess, DST & all, times are EST: WZKY-1560 f/c @ 11:33pm (Sun. night), OFRA-550, pounding in @ 2:05am, KTRL-1280 w/talk show @ 3:19 w/FF QRM off. Finally, WSTL-1600 testing @ 3:42 & also WAMM OC w/some TD. 5/3, only WNZ-910 @ 2:15. Only newie 5/8 was KLQ-560 good @ 5:15am. Back to MM 5/1, who was the weak SS on 700 all AM w/WIN off? Really weak. Also an indT Titer, not too strong on 780 @ 1:43, definitely not WBEM. Veries: v/q- HJLQ WAMT CHNO for DX-test. v/l-. On 4/22 Ed Marr, an IRCA member from Joliet, Ill. came up on his way to California (kind of a round-about way) hi - & he stayed until 4/23, we had a lot of fun & just messed around. Attention, all SCers: I have begun collecting SCs again, & have traders of WTCO & WTHC, plus a few others. SC re, write? Looking back over the past season, my first full season of DXing, I find that my best veries were probably CS3A-665 CGB9-762 BFC-123H, R. Montserrat, KENO KQYD KQYD & CFCA. Totals now approximately: Stations 950/230, states 47/44, provinces 10/9, countries 32/19. Compare those totals w/95/249, 95/44, 7/13, 7/4, respectively, & you have a summary of my DX activity for the past 11 months. 73s & Pittsburg in '68:

Patrick Flanagan - 1987 Winding Lane - Loveland, Ohio - 45140

Hello again. Big news: WIM has initiated a new policy concerning MM s/off. From now on, they will be silent 6am the first MM of every odd-numbered month! Boy, is that good news! I recently picked up the current copy of Holiday Inn Magazine which lists all the HI AN stations. By frequency, they are: 560-WGAN, 570-KLUB, 590-WON, 630-KEDO, 770-KOB, 790-WMC, 920-KARK, 930-KLTV, 950-KRSI, 1060-CFCN, 1090-KWAL, 1110-KFRT, 1170-KYOS, 1330-WHIT, 1360-WKED & WJBC, 1360- WTR & WWK, 1350-KVMD, 1600-WKEs. This program is broadcast 12-5am local time. Well, I hope this clears up some of the confusion about these DX-Wreckers. DX: 4/26- WAWK-1140 @ 4:06pm, down from 1570, WSBU-1240 4:30pm, WERT-1220 5pm, WJS-1420 7:25pm, WAZY-1410 overriding semi-local WTRG @ 7:37pm, WPCF@1430 7:30pm. 4/28- WIL-1570 5:27pm, WBAX-1500 5:52pm @ 4:15pm, KMEF-1520 7:30pm, & logging #600; WAPX-1600 9:33pm. 4/29- KTVL-1410 12:30pm, thanks to Jim Morey's tip. 5/4- KLSM-1470 s/off 6:13pm. 5/3- WBX-560 10pm. Only recent veries: v/q- WQPA YSS WRCB. v/q- WMAS. 5/5-6 - I was at SPF in Oakland Pa. taking placement tests, & evening of 5/6 I had a nice phone chat w/Steve Weinstein. 73s & don't forget Cincinnati 6/9-10-11. As they say in Kittanning, Pa., WABC - We're All Cincinnati Bound.

Norm Shect - 200 Rainbridge Street - Malden, Massachusetts - 02148

First off, I've always thought that we should pick the Convention site by a vote of the whole membership. I don't think it is a very good idea to have Special DX Tests scheduled in the early part of the Summer. In June & most of July, Cx are at a low & long distance loggings are nearly impossible. Also, you run into many thunderstorms that can ruin reception for many miles. I'm in favor of DX TESTs for as early as August & I'm planning on setting some up at that time. When I helped out at JAC's a few weeks ago, I noticed so many members that I've never heard of. Come on, let's hear from you all! ERC needs the practice of the Summer. (You're not just a-whislin' Dixie, Norm, hi -ERC) Down to DX. 4/21- C???-1480 @ 9:40pm. This one is an FGC. Anyone know about this one? It's dominant most nights. 4/27- WRWM-810 @ 6:28, & that's all. CX seem worse now than they did last June. Reports went out to WXVA f/up WHLO f/up w/PP ZNQ f/up YENK SEMN WBA WSC. I logged & verified WBA w/lkw. If they verify, I'm going to count it as two veries. Should I also count it as two loggings? Veries since last time are: v/q- CFFB RXNW WBAX w/postage due, WTH & ZBEE, f/up. v/q- ONTV-1574 WCW & WRN. WBAX's reply was very friendly. I enclosed $20 postage & he mailed it up airmail. Also on the stationary, it said, "Pending final approval by FCC." 73, & Boston in '68?

Whether it's Boston or Pittsburgh in '68, remember, it's Eugene in '67! Sept 1-2-3-4!
Hi. DX was pretty good in April w/60 new ones logged & I'm off to a pretty good start this month. DX: MM 5/2- Only station logged was CJ00-1220 for report @ 1:58-2:12am. KGGU-1330 Mo. in c/WPS for a few minutes @ 7:34pm. KBBM-1220 Mo. clear @ 8pm. 5/6- KCIJ-980 La./w/5am s/on. WMX-700 NC w/5:06am s/on, then show. 5/7- KMMR-980 finally IDed as my mystery SS here - @ 12:44am. WSGN-1340 @ 1:03; KXAY-1360 Tex/ @ 5:19am s/on. KLGR-1360 s/on @ 6:01, KRBE-1560 @ 6:10-6:21 for report, WMX-1550 Gt. @ 6:12, WMQM-1480 w/NX @ 6:30, & WHIP-1570 o/SSB of local WOKX @ 6:45am to round out that SM. Still 5/7, KYND-1580 s/off is @ 9:12pm. MM 5/8- Tentative KPB-1310 Mont. on f/c @ 2:06-2:09. WGN-1340 another Mont. (!!!) w/f/c @ 2:45-3am w/several Morse code IDs. WCDT-1270 @ 8am. Report to WDNA-1250 @ 3:42-3:55 & also heard WABR u/them @ 3:55 - WREN was off. WITF-970 one of two s/on @ 4:03 - who might the other be? (Might be WERN - ERC) WHY-1870 putting in a good signal @ 4:06. 5/9- KMMR-1360 Neb. s/off @ 8:45pm. KPUR-1440 good w/rr @ 5pm despite a little WIL slop. 5/10- WJEC-1480 (1480 #15) s/on @ 4:59am. So far in ten days, 30 new stations! Only veries: v/q- WNOX. v/f- CJ00-1220. Totals now 559/153. 73s & go CARDS (and Stars, too)!

---

Bruce Reynolds - Route 2 - Warrensburg, Missouri - 64093

Hi. Not much DX lately, but I got Jazy & missed the last issue so some old stuff to catch up on. Fellow c/w lovers, we lost one. KSIR-900 changed ownership, call, & format. Now KEEN w/mild rr. On the bright side, semi-local KHIL-1180 is playing almost 100% c/w this afternoon, so they may be ready to walk the "straight & narrow." dx: 4/15- WFFP-1400 in well o/KFRI w/flight reports @ 4:01am & WMMN-1450 w/c/w @ 4:24am, HRTV-715 in @ 11:12pm. 4/16- Much-wanted KHEL-1280 through mess @ 12:51am & WKLJ-1370 thru much WSPD w/r/c @ 1:14am. 4/22- KBTO-1360 missed on DX TEST in @ 5:03pm u/KERS & KLMW-1230 also missed wanted u/KMIX @ 5:30pm, KSHL-990 @ 8:16pm s/off. MM 4/24- NWOZ-1240 through pest KFRI @ 3:28am, KFYF-1070 apparently Afing w/c/w @ 4:16am (heard again MM 5/8), WIKG off & WEGO-1410 in very weak @ 4:57am s/on, WCPH-1:20 @ 6:05pm, WFLA-950 @ 6:22am, KWSA-1260 s/on-SSB weak u/WIRM @ 6:30am, then c/w mx, KZYM-1220 way u/KVSA/WSM @ 6:51am s/on. 5/5- WAVJ-1210 @ 5:31am. MM 5/8- CX seemed good for a change, but only WAGA-1450 @ 4:40am & WHBO-1480 @ 4:46am. Veries have been slow, v/1- KVOL KHOS KMFR (#4CO, for Dec. report) KRDO KPAC KSWF & WFFR. v/q- CJAD CFRB KSO KWSC. v/f- WCOJ. Totals: 962/405. I'm in favor of retaining EST. A change would only cause a lot of confusion. Surely you Easterners can make this simple change for the off season months. The rest of us have to do it all the time. v/1 from YL traffic manager at KHOS says I might be hearing more of 'em, as they are applying for a "50 watt license!" I think she means 50kw. Hi. I guess I'll get busy & build a loop this Summer. Present equipment: Heath GR-64 w/mechanical filter & 200' longwire. My sympathy to any others who have to make do with a $40 RX. Hi. Well, as they say in Buck Owens Land, "Where does the Good Times Go?" "San's Place?" Hi, & 73s.

---

Bill Cheatham - 6900 Westmoreland Road - Falls Church, Virginia - 22042

DX: 4/29- WLAS-910 w/6:45 s/off. 910 most crowded frequency now, w/eight stations. 4/30- WAGC went off early @ 6:30pm; umn WOCO @ 6:35 & newie WDTF-1590 @ 6:44. This frequency is a solid pile of stations at this time w/the eight transistor I used. 5/1- WIDU-1660 s/2, then SSN @ 5:55. 5/3- WKWE-1550 rr @ 7:17-7:30 s/off & SSB. 5/7- WABP-820 @ 1:04am w/report taken - QRN from 830 Cuban. Veries: v/f- WKBE (five months). v/q- WOR & v/1, WCO. I wrote to a DJ on this one after two reports & received a very nice reply from Fred Adams. He said they have an LTA XR w/one "stick" in a very good location & kw. Also he said that "if anyone in your radio club would like confirmation, please feel free to give them my name & address which is: Fred Adams, c/o WCO Redio Carlisle - 33 West High St., Carlisle, pa. 17013. Presently they are in the processes of having a map printed w/info concerning pattern, power, & population of their area. I guess he means a CM so maybe they will mail these cut eventually as verification. R.S. Station, your J38O Richmond is WMM. They recently changed from WMBG. I'm now heading to ward the 400 mark of received stations w/37 to go. I'm going to have to write out order for wire (for loop) as local lafayette didn't have it in stock. Reports out to WFMD (third try) WAYE WJRU & WABP. That's it from here. 73s & Down w/Static!

---

R.B. - Richmond, Indiana

Keep DX NEWS on EST! We've got a problem either way & we may as well stick to a standard usage throughout the year! I "vote" for EST 12 months a year!
Hi there. Since this is my first report I might as well introduce myself. I'm 14 years old and in Grade 9 at school. My DX totals are: 424/175 stations; 32/26 states, & 5/5 provinces. Countries? I think I'll skip that for the present time. My RX is an RCA-Victor five tube clock radio. I don't use an antenna but one of these days I hope to build a loop. I am also an SCer (336 total) so SCers, please write. The 5/6 DX NEWS got here on 5/9 which is pretty good for third class. I think the NRC should stay on EST since it would only be of convenience to Eastern members to use EST. Now to DX: MM 5/1 (All AM): KONE-1450 frp, 4:42-5 w/r; KLOA-940 5:20-5:30 w/rr & NE; KPUR-1440 @ 5:46; KLEC-1460 @ 5:55; KWE-1340 @ 6:30; KHIB-1230 @ 6:47; KYLT-1340 unnamed @ 6:47; KREX-920 unnamed @ 6:50; KWE-1260 & KPUR-1440 heard once again 6:06-6:18 w/rr but much louder. WHYS-1360 @ 5:30; unID-1360 w/VOA IDs; 5:15-5:45 w/talking in a foreign language & NX. Is my radio "gobbled" or did I actually hear VOA on 1360? Well, so long for now, 73 & good DX. (Welcome to the NRC, Brian, & do report to us often! Someone else "up front" from here heard a VOA transmission on 820 or 830 kHz — maybe something's going on w/VOA — ENC)

Philip L. Sullivan - 54 11th Street - Troy, New York

Greetings! Time to muse again. DX lately about nil — just a few semi-local grave-yar- ders I hadn't bothered to log before. Noticed local WHAZ (1700 feet from here) was on all day today (5/13) programming // to WRFR AM/FM for special Parents Week-end feature here at RPI. Regarding the EST vs EDT question: O gee; the DX NEWS should stay on EST — I keep my logs in EST year-round as I find this makes it easier to check back on previous loggings at a later date without having to worry whether the time I logged for the station was EST or EDT. The same goes for times listed in the DX NEWS — I don't want to look up a reception of a station in a past issue, check the date of that issue & try to decide whether that issue was on daylight or standard time. The argument that daylight time is easier to use & understand because it corresponds to the local time only holds water for those in the Eastern Time Zone — members in other areas have to convert their local time anyway. Daylight savings time was invented by an old Indian who cut a foot off one end of his blanket & sewed it on the other to make it longer! The 5/12 issue of TIME magazine, pp. 58-60 has an article & map showing what areas are on daylight time & those that ain't. Southern Mich. & Eastern Ind. are on EST, same as CDT which the rest of those states are on. Parts of Central Neb. & Kansas are on CDT instead of EDT. Southwest N.D. & the El Paso region of Texas are on MDT (i.e., they stayed on CST). Alaska & Hawaii stayed on standard time. Ky. is a mess, w/four different zones. On to other topics — I like the idea of picking the Convention site two years in advance, the end result of which would probably enable more members to attend at least every other Convention. JAC — I like the SR/SS charts you've been running; the monthly table like you did for April seems to be the better way but EWM's maps sound like the best idea yet. Well, I must be near my 30 lines by now, so I will s/off. 73.

Harold S. Williams - 50 Third Avenue - Seymour, Connecticut - 06483

It has been some time since I have been in a Museum. The reason is that on May 5, I returned from my third three-week stay at the hospital following my third major surgery since last October. Very little DX activity has resulted & but eight DX reports have been sent since 1/1. They are WYNX-1550 Stryon, Ga., WOGO-1600 Walton, SC, WLOP-Jesup, Ga., WNO-970 Pineville, W.Va., WHEW-1600 Riviera Beach, Fla., WIP-1440 Livingston, Tex., WVO-1450 Lexington, Tenn., & WSRF-1560 Ft. Lauderdale. x Those underlined are verified. W/ wife seriously ill & hospitalized from 12/65 to 7/66, very little DX has been done here for the 18 months so that my totals now stand at 2,615/2,407. I want to add my thanks for the fine job done by Dick Cooper & Joe Brauner & to wish Hohn Callerman, Gordon Nelson & Ramdy Kane the best of luck in their new assignments. All they need is the support of the members. I would be remiss if I failed to also extend my thanks to Ernie Cooper for the great job he has done for these many years. I will try to get in some regular Musings in the future if I am lucky enough to catch some SR or SS DX. 73. (Sorry to hear of your illness, Hal — let's hope that all this is behind both you & Mrs. Williams for good — ENC)

Steve B. Russell - 200 Neckack Drive - Bethesda, Maryland - 20034

DX: 4/19- WJQB-1230 1:03am w/rr. 4/25- CHGB-1310 in FF 12:24-12:33 s/off, WERU-1400 on late w/Cincinnati PBB 1-1:43am s/off-SSB. Varieties: v/l— WJIN CHSO WMGE CHEN WBBR WAKR WJOB WYKB WSXQ CFFY WSM WJLX CHGB. v/q— WESU KYW WJCB WJIN WBAY KIQA WOKY. v/f— KJFB WMGE WOGPA KXOC. v/r— WSTP. UnIS tester of 4/3 on 1500 w/c/w mix was (F.11)
Several matters cry out for my comment. I am somewhat amused by the EST/EST controversy. Fellow, it really doesn't make ANY difference which zone is used; just so it's specified. Time is time. However, I think the best compromise is to go over to GMT. This would put WRCers in step w/the rest of the DX world; & GMT is far enough away from us that nobody could complain of favoritism. With twice yearly time changes in store for the US from now on, this is the best solution. Follow the wise example of WW! On Conventions, I see not why just ONE site must be the official NRC Convention each year. The Club covers a lot of territory, so why now have three, four, or more regional NRC Conventions every summer? One DXer complained that stations were stealing his money by not replying. Really, no one has any obligation whatsoever to reply to unsolicited correspondence. And another lambasted those who send reports to Cuba. Having a GSL from Cuba doesn't mean you're a Commie - just shows you're able to extract something YOU want from the enemy, hi. I suppose if he didn't like LBJ, this DXer would boycott WTBX. Can you imagine how much anguish this would cause poor KTBX? And, finally, I'd like to remind those domestic DXers who favor verifics for authenticity over tapes, that it's always possible to exchange report info w/ someone else & claim "verification". DX: 2/21- YSS-655 9:59pm EST w/ID & NX, for a new country here; & 4/10-1035 @ 10:04 w/hymns, for another. 2/25- After KKL s/off, KSFO-500 in clear w/NX @ 2:32am. 4/27- XEQK-1350 w/ads/TX @ 3:57. Two minutes later as I tuned across 800, I heard KNJ/R, for another new country in Albuquerque (Total heard: 21). On 3/10 XXEN-830 (studio Cugiazen; JR Navoloto) s/off w/"Cielito Llido" @ 8:59pm. On 3/12 a Mexican on 680 w/ID only as "R. Actualidades" heard 8pm c/off or power/antenna change, which station? 3/20- I noted XEFM-810 @ 9:18pm w/ID & beer ads claiming 50kw. On 4/4 KEER-1150 failed @ 12:52-12:59, allowing KGSN through w/local NX:55. 4/10, I heard KNJ/R-1200 (XR Arapaho County) in 88 concluding "Ardedcor Musical" 8:26pm, then s/off message on SS & EE, no anthem. 4/15, @ 12:55, KGHI-790 dominated, w/light mx. 4/20, @ 11:54pm, CJOC-1220 invited free messages for those isolated by snowstorm, as an emergency BC station. Now back to my TV DXing, hi.

In re DT/EST, it helped the DDD page by giving skeds in the actual station time, leaving the rest as heard in EST; the IDXX is best kept on EST. When the members Mase', they might mention as heard LT (their time), as many times the heard station time may not be known to the individual DXer. EST is just odd-looking in the EST zone as vice-versa. Red print v/q by CKWW-800; v/q black-on-white glossy WJKO-1530. v/l, CM written on WLTL-1420.23 Prather Bridge Road, Tococa, Ga. 205,777, mentioned each Mon. Friday @ 1:40am EST is f/c v/l, CM CJCR-1250, is AW, begins mostly N. v/l CTRF-920 (for 4/10 Special). v/l for Special WERA-1590 & CM. v/q, color/glossy by KGIP-1500. This Sat. Other no-answer & even Specials NIX. Andy Rugg, thanks for Expo-67 newspaper. 73.

Walter LeBeche - 175 Morrison Drive - Pittsburgh, Pennsylvania - 15216

Hi. v/l WNN. DX nil. I will be working most of the Summer in Germany (Essen) & will also visit France, Holland, & England. All those knowing of SC printing stations there ad/or those interested in receiving some, please write. I'll be leaving from Norfolk Va. (by coal ship, hi) cn or about 6/15, so w/Semesters & shots (& a parental NO) I can't get to Cincinnati. Also, for some reason, like money, no Eugene. Maybe PITTSBURGH in 68. 73s & Happy Static Collecting.

Dave Fischer - Prof., Dept. of Mathematics - Earlham - Box 836 - Richmond, Ind.

Well, this isn't much of a report, certainly not much for a Musings, but I thought I'd drop a line & say I'm pretty inactive now since I'm getting ready to move to Lincoln, Neb. where I've taken another job. I will give you all the support from Lincoln that I can muster when I'm set up again. Presently handicapped w/an S-38 RX w/IW & a good antenna coupler. I leave in June & should be in Nebraska by the end of June. This time I'm not going to get stuck w/an $30 this "R.S. Station" business. Take care, & I'll give you a note when I'm back at the dials. (Good luck & success in the new job, Dave, & we look forward to more of your interesting Musings! -ERC)

BE SURE TO LET THE BOYS IN EUGENE KNOW YOU'RE COMING TO THE XIII NRC CONVENTION THERE!
The season is just about over here w/warm nights just about cutting down all DX. Some of the better ones received this spring are V1- KARQ CKYK KVEG KLKD KQVP KAPS KMNC. v/q HSL KOL KRDU. That makes a total of 60 ones this season w/a few still trickling in. What DX there's been lately went like this: 4/17- KXIC-1550 Salt Lake City in very well at their 9:02 April s/off. Their v/1 advertises 10kw. non-directional. 4/17- KMJ-1230 Steckton s/off 3:06em. 4/17- KUDI-1480 Great Falls r/c in fair 3:05-3:15em. 4/24- KDE-11/90 Santa Barbara r/c O/KWAC 3:08am. KONE-14/50 Reno 3:30am w/rx & apparently AM. 4/25- XESS-1450 Ensenada logged for a newie w/55 DX @ 9pm. Listening since then I've found them atop 1450 many times. 5/4- KRDU-1130 2:15- 2:30am w/IT. Their v/1 mentions a null toward Pomona but they were still c/KMX. 5/6- KRDU-960 Hermosillo o/KB1 2:05em for another new Mexican. 5/10- KHFF-1430 Sierra Vista, Ariz. in well 9:10pm w/Dodger BB. 73, & thanks to all concerned for making the NRC a goldmine of DX info, even for a WcO.

I'm all for a NYC area meeting this summer if possible. For the "data" column: WENR, Beacon, NY wants to change corporate name from WENR Inc. to Beacon Broadcasters, Inc. I also hope WBOI verifies as they did Alan Merriman. I sent them a report for 1/2 hrs. of broadcast. O/ATH 1 Main St., Bly Shire, NY. Best of everything & Kenahiku Ruma Kolsu. (73!) (Thanks for the fine words Tcm! - ERC)

Ralph Trac Jr. - 4 Fox Ridge Lane - Avon, Connecticut - 06001

Greetings. I have nothing of significant interest to report this month except for a few sources such as WENR & WHIC both Conn. rolled in the mail box. However just to be a good sport I'll list a few catches, 1l. 4/30- WJIB-620 @ 8 59pm u/WMM, very weak & I'm not positive about ID. 5/7- WMW-1260 @ 11:02em, WHIB-1190 @ 11:04. Reports off to WHO WSAI WTV WPAG & WMH. I urge all you to push your suggestions for more contests via your reports to this section, if you want more contests. BOSTON in 60.

Bob Zeller - 383 West 17 Street - Holland, Michigan - 49423
No buses for a long time because we haven't DXed since March. It up time is about here, so does anyone have the v/s for these? CHER WMMA CKBW & Barbados. I would appreciate it if you would either write to me or put it in the v/s column. As they used to say in Brooklyn, "Wait Till Next Year." 73a.

Marc DeLorenzo - 535 Mount Hermon School - Mount Hermon, Massachusetts - 01346

Only item of interest here lately is a vague v/1 from WMHZ "acknowledging receipt of your reception report." 73.

Bart Brown - Box 5353 - Eugene, Oregon - 97403

5/6 DX NEWS received 5/10, but since 4/1, average time has been 10-15 days. More normal now compared w/bulletins from Kittanning.
This column will remain on Eastern Standard Time thru the summer.

A

(After Hours: Midnight to Sunrise)

550 KBOW-Mont. S/off nightly at 02:15. (Stewart Drake, Philadelphia, Pa.)

650 UnID Poorly modulated RR, s/off w/33B 02:00 MM 5/7. Either a bootleg or spur... (Tom Holmes, Waltham, Mass., via GEN.) Jerry Conrad or Johnny T: know of a likely NNW affiliate on at this time? (rk)

660 CHLO-Ont. Very loud on 5/5 @ 04:30! announces 24 hrs, probably off MM. No WRKO again! (Dave Schmidt, Chester, Pa.)

740 CBX-Alta. S/off Wednesday AM at 02:15. (Drake, Pa.)

790 WRUM-Mo. Has ET most MM's at 02:00. (Gordon F. Nelson, Watertown, Mass.)

CFCW-Alta. S/off MM at 02:05. (Drake, Pa.)

910 CJDV-Alta. Off nightly at 03:30. (Drake, Pa.)

990 UnID Strong TT & OC 00:00-00:31 5/9, no ID's. (rk)

1240 WCNO-N.C. Hrd 5/9 r/c, but still post 00:05, w/TT & ID's. (rk)

1290 WIRC-Fla. Hrd TT & ID 23:40 4/30. (rk)

1300 WLNG-N.C. Had f/o-TT 5/6, 04:30-40. (Schmidt, Pa.)

1370 WCOA-Fla. Atop at 00:03 a/off 5/6 w/Navy hymn; mentioned security agent patrolling their facilities while silent. (Foxworth, N.C.) Shucks, I had my eye on those towers, too. (rk)

1400 CKSW-Sask. Off nightly at 02:00. (Drake, Pa.)

1420 UnID Strong TT & DT 00:14-31 5/9. (rk)

1440 CFGP-B.C. S/off nightly at 03:15. (Drake, Pa.)

1450 WFTR-Va. F/6-70, ID every minute, 23:50 5/8. (rk)

1480 CHAC-Que. Drummondville? Hrd s/off 03:00 4/23, in FP. (Ralph Vatalaro, E. Somerville, Mass.) Hrd call ID for new station 23:35 5/12. (rk)

1490 WCVA-Va. R/c hrd under another TT 00:24 5/9. (rk)

1580 WNKH-N.J. Next f/c will be 6/9/67 per letter from James Pielko, ACE. Warning: I'm getting Xerox copies of their reports. (Vatalaro, Mass.)

WP UV-Va. R/c 5/9 u/CBJ in Russian (for Expo 67), 00:21 ID—this one is on EST... (rk)

B

(Sunrise & Daytime DX)

1300 WLNG-N.C. Hrd s/on 04:40 5/6 w/SSB. (Schmidt, Pa.)

1310 WDOO-Ky. S/on 04:45 5/6 for AM & FM. (Schmidt)

1340 WENT-N.Y. Finally hrd s/on 04:32 5/15 w/SSB. (rk)

1440 WGIG-Ga. Hrd s/on 04:00 5/16 w/Tixle. (rk)

1550 WPXY-N.C. Hrd s/on 05:02 5/6. (Schmidt, Pa.)

WYNA-N.C. Where, who is this one? Hrd 05:15 s/on 5/6 w/RR. (Schmidt, Pa.) Foxy says they are a daytimer in his area. (rk)

WRIZ-Fla. Hrd s/on 05:07 5/6 w/OC & ID. (Schmidt, Pa.)
May 20, 1967

DDXD

SUNSET AND EVENING DX

650 WBOE-Mass. Brandeis University Radio. 3/26 16:00, carrier NSP. (Tom Holmes via Fuzzy P. Nelson.)

690 WELD-W.Va. Hrd at 19:00 s/off. (Bill Alissaukas, now at Newport R.I.) What date, Bill? (rk)

910 KRRN-Tex. Signs off 23:00. (Phil Swingley, Fort Hood, Tex.)

1030 KCTA-Tex. S/off 19:05 w/prayer. (Swingley, Tex.)

1100 WLLB-Ga. Hrd s/off 19:29 several days in May. (Foxworth)

1090 WKTE-N.C. Hrd s/off 19:00 4/25 leaving WENR & WWMD. (Fox)

1120 WUST-Ta. Hrd's off 19:15 several days in May. (Foxworth, N.C.)

1090 WLLB-N.Y. Abrupt s/off 19:45 5/5. (Foxworth, N.C.)

1500 WKIR-N.J. Still s/off 17:00. (Alissaukas, N.J.) EST? (rk)

(Schedules)

550 KPYW-N.D. Off MM only. (Drake, Pa.)

640 WTBS-Mass. R5 07:00-01:00, carrier NSP. Nominally 5 watts carrier-should be on this summer. (Nelson, Mass.)

680 WPTF-N.C. Audible here in Medford, about 6½ mi. (rk)

850 WKIX-N.C. 04:00-approx. 23:57. (Foxworth, N.C.)

1080 CKSA-Alts. Off MM's, not NSP. (Drake, Pa.)

1240 WRNC-N.C. Silent MM only 00:00-04:00. (Foxworth, N.C.)

1410 CFUN-B.C. In NSP, not off MM. (Drake, Pa.)

1420 WVJS-KY. S/off 00:00 EST, s/on 05:00 their local time, 5/5. (Foxworth, N.C.)

1490 WSSB-N.C. Is AN-7. (Foxworth, N.C.)

Stew Drake says those tips of his are from a DX'er in Edmonton who saw the NRC Condition of Frequencies list; send us his name & address, Stew, & JAC will get a sample bulletin to him. Those carrier-current tips from Gorden should help those local DX'ers looking for good low-power catches; we have heard WTBS and signs of WHRB, during mid-afternoon, in Malden & Medford. We have held back several April s/off reved in May from Gene DeLorenzo; if we hear from enough DXers who want them, we will print them, otherwise they'll wait till next season. Keep up the good support, remember BOSTON '68.

73, randy

WGA5...

is now on the air, after a lot of blood, sweat, and tears ... sleepless nights ... endless days ... and, looking at Pete Taylor's jaw when the dentist got through with him, and JAC's eyes when bedtime finally came late this week, you can call us "Mugwump" and "Drugge" respectively. All this is a prelude to the fact that the bulletin is being mailed three days later than usual this time. (And here's another item to ponder: because I felt we should try to get a Saturday delivery if at all possible, I set a schedule up that would compress all the publishing functions into Thursday night. Most of the labor, however, has come from schoolboys (and working men) who have to get up Friday morning... and don't have to get up Saturday morning. The mothers have already objected regarding Friday morning conditions. And I have changed my schedule to where I get to work at 6:00 a.m. instead of 8:30...)

THE HIRSUTE ESTABLISHMENT...

strikes again ... with a foreign section which, for the first time in my memory, is bigger than the musings.

One thing that this Admial did not touch upon in his otherwise thorough summer DX treatise was the potential for reception of Australia and New Zealand in the Western half of the country after the eastern clear channels have faded out. Sometimes, it's quite good. Try Aussies on 700, 770 & 890; Zeddys on 750, 880... in JULY, yet!
DX conditions definitely seem to be on the downswing again. Here in the Northeast, conditions on most long-haul paths are definitely below par compared to the last few years. Only the highest powered AN TA's remain audible (for an hour or two after local sunset) and only a few traces of the South African have been noted. Unusually good reception from West Africa has been noted recently, however, particularly on the nights of 5/15 and 5/12. On the West Coast, DU's have also been generally poor, but Godwin experienced a major DU opening on 4/24 which netted 10 DU's including the New Zealand pirate, Radio Hauraki. Also in California, Reynolds reports an unusual reception from Malaysia on the morning of 4/17, a most excellent catch. In New Zealand, conditions are also way off normal: "To date, the South American DX season has not been up to par; signals at your editor's location have been later than normally expected for the beginning of May, and they have not been numerous at all. Once again we have had another quiet month on this band. Asians are about the best bet for a good nights DX... During this month, I have kept a careful watch on these bands and can say that I have not experienced worse conditions for years..."

On Reciprocal Paths. April-May loggings in New Zealand included: CBK good at 0245; KGA good at 0215; WBO good at 0245; KFAB good at 0300; W6AV good at 0200; CFWN excellent at 0145; and WSTR fair-good at 0115. In Morocco, Mike Ezruij notes that "Midwestern stations are cropping up with WCRF S8 at 2325 on 4/11, WBL S9 at 2334 on 4/11, KMOX 89 at 2030 on 4/14, WLS S7 at 2040 on 4/14, and CBA S6 at 1800 one day." Philippines. VOA latest schedule shows they have withdrawn the VOA transmitter Malolos (920 50 kw) from service. (NZDXT)

Malaysia. Radio Malaysia has signed a contract with a Tokyo Company for three 50kw BC transmitters to be installed next year at Johore Bahru to improve reception in Southern Malaysia. (NZDXT)

Thailand. The Australian High Commission to Thailand handed over their third transmitter to the Thai Government recently. Two are of 50kw and one of 10 kw. The new transmitter is installed at Korat 140 miles NE of Bangkok, while the 10 kw rig was installed at Ubon. These transmitters have been installed under SEATO. (NZDXT)

Taiwan. The government of Taiwan will shortly acquire a 1000 kw transmitter which will probably be used on the MW band. (NYNW)

El Salvador. The new relay station of Deutsche Welle will be erected in El Salvador. There will be two 250 kw-transmitters and one of 150 kw as well as one 100 kw medium wave outlet. (SCDX)

Megawatts for Outlaws is the title of a short article in the April 24th Broadcasting magazine which outlines the rapid proliferation of very high powered MW transmitters throughout the world. A couple of interesting items appeared in this piece: "Already in use in United Arab Republic is one-megawatt (1 million watt) medium-band (AM) transmitter striking into anti-WAR countries, and with new five-megawatt station under construction... Being installed in Beirut, Lebanon, to counteract Nasser, is three-megawatt station costing $4 million... Costa Rican station under construction by American is for commercial, rather than propaganda purposes, will use megawatt on lower band 'midchannel' and has not only U.S. broadcasters in know but United States Information Agency deeply concerned." Let's hope their information is better than their prose. (EU)

The BFC has ordered six one kw transmitters from Marconi Company for their Popular Music Program. These transmitters will operate on medium wave. (NYNW)

Navassa Island, a tiny U.S. owned piece of land between Haiti and Jamaica, seems to exert a strange influence on that handfull of DX'ers (?) who get their kicks from submitting fraudulent information to the DX community. The latest, probably inspired by Tom Knobert's irresponsible Confessions of a Radio Swam Hoaxer (Electronics Illustrated, May 1967), would have us believe that a 50 kw MW and 20 kw SW will soon go into operation from Navassa under the callsigns W5W and K1L. Unfortunately this information appeared recently in no less an authoritative source than the World Radio Bulletin and is therefore being widely reprinted. We suggest that this item be filed away with all the rest of the Navassa Island hoaxes until that time when convincing authenticication is supplied.
The Voice of America is reportedly now sending out a letter to the effect that no more VOA QSL's will be issued to U.S. DX'ers because the volume of reception reports "is diverting staff time from and funds from our basic mission which is to reach audiences in other countries." We suggest that anyone seeking verification from a VOA NW outlet write directly to the engineering staff of the overseas station concerned, since the station personnel have been very cooperative in the past. Let's hope that this turns out to be just a "front office" policy, a la the BBC.

The NZDXT Pacific-Asian Log supplement 1-A, dated May, 1967 includes:

**TALKS AGAINST RADIO ADVERTISEMENTS IN THE DOMINICAN REPUBLIC**

By Cesar Obispo

Just after mailing my last article "Dominican Products on the Air" there started some talks at the National Congress about passing a new law in which it is recommended to delete from the air rum and cigarette advertisements.

The supposed new law "under study" asks "to forbid rum, cigar and cigarette advertisements" through radio and TV between 6 a.m. and 9 p.m. because during this time there is the opportunity that children, boys and girls will have to listen and watch those ads urging them to smoke and drink all kinds of products and they "ask the opinion of all personalities who wish to speak about this matter, because of the harm that is being done to the Dominican youth in its moral, physical and intellectual education by the use and abuse of alcohol and tobacco, whose sales are increasing greatly due to so much propaganda used."

After this, a hurried meeting was called by leading personalities in Radio, TV and publicity agencies in order to face the problem since those advertisements are the lifeblood which supports most of radio and TV stations in the country. They said that if the ads are forbidden between the times mentioned, a privilege will be created on behalf of newspapers and magazines, which will be seen and read by minors.

Instead, they arrived at the conclusion of proposing the following recommendations: to forbid the advertisements in the way of free gifts of rum and cigarettes; to forbid contests in which there exists the exchange of labels or bottle caps; to protect the public against ill-intentioned ads such as: inciting the public to drink or smoke; to forbid the use of young people in the presentation of those products; to forbid that popular personalities, such as artists, singers, ball players, etc. be used to present those products; to forbid the presentation of the act of smoking or drinking; to forbid the sale of those products to minors and to create a commission which will watch for the fulfillment of these recommendations.

**MONITOR REPORTS...**

The editor calls your attention to logging of Malaysia on 660, Midway Island on 900, Nigeria on 1358, Guinea on 1403, and Radio Hauraki on 1485...

Dominican Republic. HLCM, R. ABC. Change of street name from Calle 28 to Avital Espinosa (560). In a visit to the station w/Richard Wood, director Jaime Nelson Rodriguez said he is going to answer letters, but he was waiting to have a QSL card made. Be patient, the QSL card will be mailed soon. (Obisco, D.R.)

Costa Rica. Can anyone tell me the exact frequency of R. Progreso, TJJJJ, Alajuela? I am at a loss to explain my consistent reception of them on about 27500 kcs, while far-fetched, their 59th harmonic would fall on that freq if the fundamental is up almost to 551. (Hauser, N.M.) Very unlikely, Glenn, since the power radiated in such a high harmonic is very, very slight. Much more likely you have a parasitic oscillation in your mixer or local oscillator. Do you ever hear this during the day, or only at night? (Ed)
Columbia. No I didn’t hear it again but I did do some research on it. The call is HJND, Rifa, Nacional de Columbia, Bogota. This info from JAC’s 8/13/66 IDXD section. (Shacat, Mass.)

Alaska. KQAR hrd w/mx and wx 0505 4/10. (Portzer, Wash., IRCA)

Australia. 5CK hrd w/much fading 0715-0730 MM 4/17 w/recorded pop mx and announcer w/very "Australian" accent. Too spotty for report. (Reynolds, Calif., IRCA)

Malaysia. Penang, "R. Malaysia" hrd w/weak but steady signal on MM 4/17 w/pop mx on Oriental stringed instruments and vocals by man in Malay language from 0745-0800. At 0800 a woman announced station in Indian, then a man in Malay, then another man in Chinese. Signal was fairly loud for a few minutes about 0755. I thought I may have had Taiwan until the 0800 ID, but when I hrd the 3 different languages used, I found a vast difference between Malay and Chinese. A real pleasant surprise for post-season DX’ing. (Reynolds, Calif., IRCA)

Senegal. Dakar hrd s/off w/anthem 1900. Anthem ending 1901:15 w/OC till 1901:55. This hrd on 4/26. (Shacat, Mass.)

New Zealand. 4YA in w/6 pipe and TC for 1900 MM 4/24. Then wx immediately after IS. (Godwin, Calif., IRCA)

Alaska. KINY w/SSB s/off under CKOK s/off at 0305 on 4/10. (Kesteven, Alb., IRCA)

Cuba. Reloj Nacional all alone on channel 0230 MM 4/23. (Ed)

Unid Ta. A very weak one hrd s/off and cut carrier 1900 on 4/26. (Shacat, Mass.)

Andorra. Norm. (Ed)

HISD, Servicio Cultural de R. Television Dominicana. 1200-2000 daily except Sundays. (Objjo, D.R.)

Peru. CBUH9, Radio Union, Lima in weakly w/6 note IS prior to s/off on 0555 MM 4/24. Is now 10 kw, but will soon go 50 kw according to OSL. (Godwin, Calif., IRCA)

Nicaragua. Definitely the best from that country. YNKM good from 2130-2200 w/RDR, ID’s between songs, and many TC’s as "La hora de Libertad...". (Shacat, Mass.)

Midway Island. K3TH in readably w/R&R show MM 4/17 0518-0625. Had AFRS mx thru 0618, then definite call ID. TC’s at 0624 and 0635, even the "EWW on top. Some CHMI, QRM prior to 0600. Reported. (Godwin, Calif., IRCA)

Alaska. KFBR s/off 0500 4/10 w/instrumental SSB. (Godwin, Calif., IRCA)

South Korea. HLKV w/nx in Korean MM 4/10 at 0800 amidst much QRN. (Reynolds)

Thailand. According to WRTTH, they use 1 kw on this channel for their North American Service at 2315-0015. How’s that for audacity? They even have a hard time making it on SW. (Haucon, N.M.) Wonder how many reports they’ve gotten?

Colombia. HJPI, Emilse Puentes, Cartagena drifts here again. (Silveta, Jam.)

Ecuador. HCBB-2 now back here, very strong signal. (Silveta, Jamaica)

China. Kwangyang JKT hrd MM 4/17 0825 w/mn making speech in Chinese w/lots of cheering. Also hrd MM 4/10 w/strange oriental language at exactly same time. (Godwin and Reynolds, Calif.)

Argentina. LIS10, R. Libertad 100% readable 0304-0312 w/XEBR lopped out on MM 4/29 for best reception of this one yet. Woman announcer. (Ed)

Puerto Rico. WLRW, Cayey hrd w/KRLD w/ID’s at 0411; ppm of nx and mx hrd 4/5. (Silveta, Jamaica)

Germany. A65, Munich s/off MM 4/17 0300 //872 w/DJ show and top 40 music; time and temp spots often, movie spots, etc. Some Russian QRM on 1106. (Bugay, Morocco)

China. Noted in Russian 0516 4/10, mentioning America and North Vietnam. (Peterson, Calif., IRCA)

Colombia. HJPI, Pregones del Quindio, Armenia quite weak at 1850 4/26; "CARACOL" sports report. (Silveta, Jamaica)

Egypt. Hrd here 4/10 2145 on a clear channel w/chanting. (Bugay, Morocco)

Kenya. VOA in weak at 0752, 4/24, but was in much better in Chinese at 0808. (Peterson, Calif., IRCA)
May 20, 1967

1187 Hungary. Szolnok c/o Caroline 4/10 at 2145. (Bugaj, Morocco)

**1194 Cuba. CMJP, Ciego de Avila is the one here down from 1190. (Silvers, Jamaica)

1200 New Zealand. 2XA probably the DU w/play 0515 and several tunes at 0530. Not good enough for log. Great NZ AM. (Godwin, Calif., IRA)

1235 Bermuda. Z81M very clear from 2250-2259 on 4/18 w/mixture of classical mx and R&R. ID as, "This is Z81M, the pioneer in broadcasting in Bermuda." Time then given and just before mx ID as, "This is the Bermuda Broadcast System." (Shacat, Mass.)

1268 Canary Islands. Radio Popular de Gran Canaria on is reportedly hrd in Central Europe at 1800, with full ID hrd at 1830. Not listed in WRTVHD. (R12TVW)

**1358 Nigeria. Ibadan logged for the first time this season 2335-0021 on 5/12 with the best signals ever noted from this station; 100% readable at times in spite of bad QRM. Highlife music and man announcer noted past 0000. This one definitely announced as the "National Service" at 0010, so is not the West Regional pm as listed in WRTVHD. This one is a best bet now that the channel is empty of other TA's. (Ed)

1370 Dominican Republic. R. Horizonte, Santo Domingo to move here from 1380 per announcements. (Silvers, Jamaica)

Unid. EE newscast pretty strong at 0143 MM 4/24. Maybe NHK-Japan or 2XP. A strange time for a newcast in New Zealand, tho I think. (Godwin, Calif., IRA)

**1403 Guinea. Conacry noted w/best signals ever hrd 0105-0116 in French. About 40% readable at best, and severe static. Watch for this when 1358 is in. (Ed)

**1440 Dominican Republic. HTPS, R. Pahera, Nagua. (only info available) (Objjo, D.R.)

1485 V International Waters. Radio Haaraki is the one hrd 4/17, and had good signals in 4/24 0330-0500. Frequent TC's and mention of NZ, w/Haaraki ID at 0442. Pgm was all R&R. Reported. Rich Heald in Sitka hrd this one on 1480 MM 4/10 and noted in NZ as low as 1477. (Godwin, Calif., IRA)

1490 Hawaii. KJTH s/off 0045 MM 4/24. Weak and not hrd for quite a while previously. (Godwin, Calif., IRA)

1510 Australia. 2NA was the strongest Aussie noted 4/24, in quite well at 0405. No signs of it 5/1 though. (Godwin, Calif., IRA)

1520 Czechoslovakia. CS1 hrd 4/10 2125 clobbering WKBW all morning, but KB was giving them a hard time, 40 db. Usually oc w/tone on and off. (Bugaj, Morocco)

**1540 Colombia. HJBSV, R. Canca, Turbaco now moved here from 1506 to fit new HJ pattern. (Silvers, Jamaica)

1550 Costa Rica. TICCR, R. Cima, Cuidad Quesada hrd at 2020 4/15 w/sports pgm. (Silvers, Jamaica)

**1560 Dominican Republic. R. Samanã. Address: Barrio Willmore, Samanã. Director: Franklin del Toro. Apartado 124. Operates 0600-2200 daily except Sundays with 1 kw. (Objjo, Dominican Republic)

V ERIFICATIONS

660 COLOMBIA. R. Tunja, Tunja (Bugaj) sent view card w/full details in SS for "1120 Kilocycles," Signed by illegible Gerente. (Wood, Ind.)

670 ARGENTINA. LUG, R. Mar de Plata. Mar de Plata sent nice long v/q in EE giving definite verification of taped report of Feb. 27th. Sent gold pennant and some huge postcards of Mar de Plata, also newspaper clipping in which my report was featured. V/c Evaristo Marin Palermo, Director. QTH: Cordoba 1851-65. (Silvers, Mass.)

715 HONDURAS. HFTV verified by Guadalupe de Murillo, Apartado 734, Tegucigalpa. (Mass.)

755 PORTUGAL. Lisbon QSLed w/beautiful extra large v/q in 1 month via airmail for 1 IRC. (Vitalaro, Mass.)

818 EGYPT. Batra in a month w/a colorful v/q and a 2 page pgm sked, by airmail for a single IRC. (Vitalaro, Mass.)
ANDORRA. Verified with a colorful picture postcard, 4 travel folders, pgm skeds and returned my tape for IRC. Took 3½ months. (Vitalaro, Mass.)

ARGENTINA. LT8, R. Rosario, Rosario sent verie typed on postcard signed by Amadeo Francisco Vitola, Director; very specific to as to time and date. QTH: Cordoba 1825. (Silviera, Jamaica)

MEXICO. XEIA, Buena Música en México. My report returned undeliverable at WRTVH address. Anyone know new address? (Wood, Ind.)

SPAIN. EPJ51, Huelva verified w/letter signed by Charles Hidalgo, Director. He was apologetic for taking so long to QSL; my 16th Spaniard, a very nice verie, and very glad to get it. (Gustafson, Ill.)

ECUADOR. HCDPZ, R. Ifesa v/l from Camilio O. Andrade Granda, Administrator. Says that their 1kw xmitter was made in their own factory in Ecuador which is a very large manufacturing firm. He goes on to say that they have been well received in the U.S. so they are thinking of boosting power to 5 kw. (Gustafson, Ill.)

COSTA RICA. TISRHR, R. Popular a "no esta completentemente" letter like Clarence Freeman's, gives SW freq but says details are correct - no pennant here though. (Hors, Mass.)

VENEZUELA. YVNA, Ondas de los Medanos, Coro sent definité v/l signed by R.J. Oberto Marmel, Director. QTH: Edificio Dom Beté, Calle Bolivar, Coro. (Silviera)

INTERNATIONAL WAVERS. R. Caroline North sent poorly worded QSL card. It lists both Caroline stations and simply says "Many thanks for your reception report". However it is obviously intended as a QSL card and I am counting it as such, especially as (1) it bears an Isle of Man postmark, and (2) my report to them, for reasons previously noted, program items from both stations. (Stanbury, Ont.) (-?? We always thought that the basic idea of a verification was for the station to actually confirm the fact that you had indeed heard the station. Where do postmarks come in, Stan? Ed)

EL SALVADOR. La Voz del Pacifico, Sonsonate. Letter from Vilma Estela Herrera, Secretaria Administradora. 3a. C. O. no. 19. In rather illiterate Spanish. Is key station of Cadena de Emisoras Departamentales, along with YSCG-1210, Zacatecoluca and YSCD-890, Santiago de Maria. All are 1 kw. (Wood, Ind.)

INTERNATIONAL WAVERS. R. Caroline South sent fine QSL letter signed by Mrs. Joan Dale, for Paul Dale, Engineering Department. (Stanbury, Ont.)

BERMUDA. ZM2 sent picture post card of the 96 ft. brigantine Yankee from Wes Sutton - Programme Director. Varie back 2 weeks after f/up sent. (Shacat, Mass.)

MONACO. R. Monte Carlo QSLed after 3 months for country # 20. (Vitalaro, Mass.)

COLOMBIA. HUQ sent a nice letter in SS, along w/2 pennants. Signer is Cristina M. Castro, Secretaria. Took just over a month via airmail for 1 IRC. (Vitalaro)

PERU. OER4D, Lima sent friendly v/l, quite specific, for f/up to 11/14/66 report of election returns. V/s Jorge Torres-Iara A., Director-Gerente. QTH: Jiron Ocona No. 484, Z0. Pisco. (Godwin, Calif., IRA)

FRANCE. ORTF sent letter in EE in a month via seaimail. Letter from J.F. Fabre-Chef des Services Artistiques. Reported in EE and FF. (Shacat, Mass.)

GERMANY. Westdeutscher Rundfunk by f/l and a colorful and specific card in just over a month. (Vitalaro, Mass.)

RANDONN ESS... Many thanks to all of you who expressed sympathy and concern while we were ill... It turned out to be a bad case of mononucleosis and we're feeling much better now... We'd like to extend our best wishes to veteran IDXD reporters Richard Wood, now on an extended research visit to the Netherlands West Indies, and John Hoogerheide, who's just begun a 3 year business stay in Santiago, Chile... And congratulations to Tom Holmes on his forthcoming June wedding... Had a very nice visit from longtime NRC'er Carl Parsons recently... Ops, credit sharp-eyed Yankee Stan Morse with spotting my accidental substitution of local personality Edward Snow's name for Edgar Snow's in the China article... Good Summer DX and be certain to drop in for a visit if you're passing through Boston...

Admiral Nelson
RADIO NACIONAL AGAIN

--- By César Objio ---

After the arguments held by Radio Nacional (1060 in Santo Domingo) and Radiorama with the Dirección General de Telecomunicaciones last year the matter came to a standstill. Then R. Nacional started again with test transmissions at the beginning of the year.

Later there comes the news that "A radio station is assaulted and transmitters destroyed". The station is R. Nacional and according to the news this is the other case (given to the press by the operator in care of the transmitters):

"In the night of March 29th, after 11 o'clock when the station has ended the tests of the day and the transmitter had signed off, one car arrives at the place with two persons, one of them, visibly drunk, threatens the operator with a gun, the driver comes out with a machine gun and holds him with his hands up while the first man starts destroying the equipment, finally the crystals are taken off the transmitter and the two men leave the place without a shot being fired."

The Government designated a Commission to investigate the case and this is the result:

The man who went to the R. Nacional transmitter that night was the Director General de Telecomunicaciones. There is no sign of violence in the transmitters except that the crystals were taken away. The owner of R. Nacional does not have permission to operate the station, he only had a test permission which lasted until November 10, 1966, and consequently is void. The Commission adds that although they recognize that the Director General is legally authorized to inspect any radio station in the country so that they work according to the rules, they do not understand why he did visit the station at such an unusual time, since the station had been working in the day also and that visit should have been paid in broad daylight. Other things mentioned is that R. Nacional has been requesting the permission to operate but it has been denied because there is another station to operate very close to this one (supposed to be Radiorama).

The operator in care of the transmitters then said that the Director General did not use a gun or any other weapon against him that night and that his statement given to the press at the time was false.

The owner of R. Nacional says that he has been asking the licence for a long time but it has been denied to him only because of political reasons and adds that he has invested money in this enterprise and until now it has not been permitted to operate. The Director General says that his denial is solely based on technical reasons according to the international agreements that our country has signed. The Commission presented the report and says that the final word will be said by the Government. After this incident Radio Nacional has not been heard anymore.

RF amplifier plans available. Forced to use a short antenna due to space restrictions? Not enough signal pickup from your loop? Then what you need is a field-effect transistor RF amplifier. We've designed and tested a very simple circuit based on the new Fairchild "cheap" (about 70¢) FET that fills the bill very nicely; more than 20 db of gain (a boost of more than 4 S units), extremely low noise (much quieter than a vacuum tube amplifier), and, best of all, high resistance to cross-modulation to reduce spurious responses. When used with a loop antenna, the high input impedance of the amplifier results in higher loop Q's and sharper loop tuning. All this from 1 transistor, 3 resistors, 2 capacitors and a battery! Anyone interested in trying out one of these FET amplifiers (still too new to be incorporated in any communications receiver that we know of) can just send us a SASE for plans and details.
SUMMER RECEPTION ON THE BROADCAST BAND

Broadcast band DX'ing, like many other hobbies, has accumulated a considerable body of expertise that is all too often simply taken for granted. Summertime DX is a good case in point. As early as the 1920's, North American MW DX'ers quitted the BCB dials in droves during May, not to return until "the DX season began again" in September. And in a very real sense, the old-timers were right - most if not all of the stations that were well received during the winter were in fact inaudible during the static-laden summer months. And so MW DX'ing, especially for foreign stations, all but vanished during the summer months, to be replaced by conventions, golf, and horseshoes.

Then, during the early 1960's, a handfull of Western DX'ers began to realize that many of the stations South of the Equator, especially DU's and Deep South Americans, were received if anything better during the midsummer months. Since that time many fine South American loggings have been reported by those Western DX'ers who were willing to brave the summer static. But, because these Western receptions depended in part upon the dawn-induced fadeout of the Eastern clear channel stations, there was still no motivation for the East Coast DX'ers to tackle the summer static.

In 1965, while developing the so-called "E20" computer program for the prediction of dawn-induced fadeout times, the editor began to realize that there were compelling technical reasons to suspect that reception from West, East and South Africa should be highly favored during the summer months. With the aid of the E20 predictions of fadeout times, we have been able to confirm these expectations with frequent midsummer loggings of stations in Botswana, Mozambique, Tanzania, Nigeria, etc. As the smaller African nations continue to install high powered MW outlets, more and more of these rare countries will become possible during the summer months.

The basic pattern of seasonal variation in reception from Europe and Africa is very simple and is outlined on the next page. Since, to a first approximation, the fadeout time of a weak TA signal coincides with dawn at the transmitting site (E20 times are almost always within 30 minutes of the time of transmitter site dawn), the most important factor controlling seasonal variation of reception is the orientation of the light-dark or shadow boundary. As the shadow boundary moves Westward (or, to be more precise, as the earth turns into daylight), various geographical areas fade out in a particular order depending upon the orientation of the boundary, which in turn depends upon the date. The diagrams on the next page explain why Lourenco Marques, Mozambique remains audible for some 20 minutes after RNR, Barcelona on 737 has faded out during midsummer. The Westward tilt of the shadow boundary during the summer months also illustrates why late reception of European stations is impossible, and why the African stations by and large remain perfectly free of European QRM during that season. The diagrams on the next page are not exact, and are meant only as illustrative examples. The shadow boundary actually follows the curve of a great circle, and thus cannot be represented by a straight line on "nice" map. At solstice, the exact figure of the shadow boundary can easily be represented by a taut string on a globe which makes an angle of 23 1/2 degrees with the Equator. West Coast summer receptions from Deep South America are easily visualized by merely moving the shadow boundary further to the West.

East Coast DX'ers trying for summer Africans need considerable patience. Since the distance is considerably greater than to the usual European TA's (8000 miles to Mozambique vs. 4000 to Vienna), the African signals tend to be rather weak. This, combined with the increased summer noise level and local static, tends to make these stations a real challenge to the North American DX'er.

Most if not all of the summertime DU and Deep South American stations (with the exception of a few of the AN'ers) haven't made it further East than the Panhandle of Texas. The Africans, because of the factors mentioned above, probably will not be heard very far to the West, and thus should be considered as primarily East Coast catches. A few have made it to the Midwest, however, Mali to Ohio and Nigeria to Illinois, so the inland situation is not totally hopeless.
2330 on the day of the winter solstice, December 21. On this date the shadow boundary reaches its greatest Eastward tilt, thus leaving a full darkness path to Europe as far East as Moscow at 2330. East Africa has been in daylight for several hours at this time, making reception impossible. As the shadow boundary moves toward the West, Western Europe remains in darkness even after dawn-induced fadeout has occurred in West Africa. As the season advances, the shadow boundary tilt is reduced daily as the Equinox is reached.

EQUINOX

2330 on the day of the Equinox, either March 21st or September 23rd. On these dates the light-dark boundary is oriented directly North-South. As the shadow boundary moves West, East Africa and East Europe first fade out, followed by most of West Africa and Central Europe. As the season advances into summer, the shadow boundary tilts increasingly to the West, reaching its extreme orientation during midsummer.

MIDSUMMER

2330 on the day of the summer solstice, June 21st. The shadow boundary is now at its maximum Westward tilt. As the boundary moves toward the West, dawn first occurs in Europe. By 2330 all but Easternmost Europe is in daylight, whereas a full daylight-darkness path from most of Africa to North America remains open. Dawn-induced fadeout occurs in Barcelona some 20 minutes before it occurs in Mozambique, thus leaving Lourenco Marques clear on 737. Within an hour, all Europeans have faded out, leaving the African stations alone on the TA channels. Stations in West Africa remain audible long after the Europeans have faded out.
FOREIGN TIPS FOR SUMMER 1967

The following is a guide to aid in the logging of those rare DX catches favored during the summer months. Generally speaking, most of Deep SA's will be logged only in the Western half of the continent, while African reception will be limited to the East. * indicates a good bet, ** a best bet, and # indicates that the station has not yet been logged in N. America. Tnx to Randy Seaver for the excellent South American list from ITCHA.
