**COURTESY PROGRAMS COMMITTEE...**

The work of the Courtesy Programs Committee is to provide members the opportunity to log stations they otherwise might not get a chance to hear. The quality of a CPC is not measured by the amount of programs it puts in the DX calendar, if those "Special Programs" are merely part of a station's regular schedule, an adjust to its regular frequency check, or an E/T on the 7th day for an AM station. This Executive Secretary is getting fed up with complaints that our CPC is being outdone by somebody else's... let's come up with some REAL Special programs. DX is getting pretty doggone ludicrous...
November 4, 1967

DX NEWS (Stewart Drake) but nothing I could put a name to. 10/16- I saw WWBD-1260, Fla. ET @ 11:30am. Then on 10/17 XEQ-960 Nuevo Laredo, Mexico on w/very good signal, @ 3:30. 10/20- I took a relog on HICN-540 Santo Domingo, D.R., & sent report. Previous report went to HICAB, my mistake. 10/22- I looked in on 1260 for WMTA Ala. WADO, NY, & CJS Montreal were prominent but four minute breakthrough of college football marches leads me to believe this might have WMTA. Report sent as tentative. In the QSL department, I picked up a few: YWVW-865. Anyone needing this should write to Apartado 885, Managua. She wrote a real cute broken GQL. YNSC-700, WMN-1400 (my 69th log on the spot, 68-QSL's). CJHS-1510 returned my pp/c, WGCN-1060, KEAR-665, WTON-1570 WNSM-1340 WYWD-1280 & XEQ-960. Totals are 2,356/2,221. Two new tubes should perk up the HRO somewhat. I have heard several Qs but nothing new. Good DX!&

Walt Breville - 9127 Coral Drive - St. Louis, Missouri - 63123

Hi, I'm back! - I missed my last regular contribution to this column on pulling a real boo-boo & sending it to Club HQ in Cambridge my mistake. It came back 'unclaimed!'

So always associate Musings & ERC w/Brooklyn & Double-Spacing; to keep things up to snuff. DX lately included: 9/11- CPRA-580 Ottawa 3:30am, CBA-1070 w/MDLA 4-1:30am, sixth province heard & verified. 9/14- WMAX-570 caught at last while looping WKNR's signal, 11:30pm. 9/26- WGAD-1400 Temm., 3:56am, WDEF-1370 Cattanocca 4:02am s/on, WMMI-1460 NC 11:31am. 10/9- W仏R-1370 Ca. h:15am, the only new one, poor MM. 10/22- Best signal yet from KJFF-3580 (ex-WYDI) 7:50-7:59pm, finally got a report off to Arizona. MM 10/23- XEEM-1560 Hermosillo very strong, 2am. Cuba-590 over two 3-units stronger than the other one on 600 - what gives here? WCFC-1060 Calgary weak @ 3am, KORL-650 in weak all this morn, but not able to get second report on it though. WSM TT messed it up @ 3:17am. WAW-850 limped in @ 3:30, WDE 1-1150 Del. good @ 4am s/on, drowned out two minutes later by WKNR's s/on, so no report to needed Delaware.

Veries came from WBAB-910 WRZO-590 WMAX-570 CBA-1070 WGCN-1060 KJFF-1580. WKNR-920, my favorite local, is a real hucy target for the rest of you, as they have never received any reports from outside Mo./Ili. They are c/w, of course, w/a 500w signal that is non-directional save for a slight null to the NE. 73.

Jody Coles - 315 Bremond Street - Houston, Texas - 77006

Hi all. Long time no hear from me. I have been out of pocket for the last few months due to work. I just put my RX back into shape so I will have something to DX with. Say, does anyone have an RME DB-22 pre-selector they would part with for a reasonable price? Write me if you have one, & even if you don't, write anyway. I am anxious to hear from anyone! DX to date is as follows: 10/20- KBBT-1490 Bli Springs Tex, heard on 6s/rr @ 11:10pm. 10/21- KLZ-560 Denver, heard @ s/off @ 1:15. KTOC-920 Jacobsburo, La. heard on f/c-TT @ 1:25, w/1:30 s/off. That is as far as the log goes for now. I am looking forward to a good MM so look for me in the next Musings for the info on that DX fiesta. The latest veries in here are from KJFF Metro. & WKNR Ala. The totals here are 689 w/79 & 34 countries w/six. I have noticed that Dekas has made the scene here & Monroe. I haven't tried too hard for anything this season, but I did hear a strong set on 736 that I am going to check out. Well, I guess that is all for now so I'll say 73 & best DX. HOUSTON TN '69 - HOUSTON IN '69

Sheldon Miller - 840 80th Street - Miami Beach, Florida - 33141

Time for a report, as I haven't been in these pages in several months. DX time has been sparse, & little to hear when I do have time. I can report that the Cuban station on 590 now must be on high power, perhaps 50kw, or more. Their signal is now as good as any CM on the dial. Other DX: HICV-1240 Barahona, noted many evenings. HJUL-960, Barraquilla, a new station, very strong evenings. Slogan is R. Sutanzen, per Mike Silvers. Belize-830 can now be heard weekly days, behind CMCA. They are now smack on 830. YVOP-1100 Tovar, Venezuela, noted evenings. WGCN-1240 Cuba, noted w/RAJJ's program, 10/22. DX of MM 10/23- WQCM-560 off 2am, & WFXL like a local on the MM. WQCM seems to go off every MM now. WMCA-570 noted very strong, & a c/w station u/t en, who? (WKNR -ERC) WJLT-1290, Babylon, L.I. altie very clear w/r oldies, 3:15am. Local WQCM-1320 was off all day 10/22, & had ET 3:17am 10/23. They are installing their new 5kw fulltime XR. CBK-540 noted very strong around 3am, also CRC-1050 & CBR-1010. If IQ-1520 now right on frequency, well o/unID rr, WKBR Local situation since last report: WGCN-610 now AM-6 w/HI show. WGBS-710 now on ABC net. WGCN-1450 & WFRF-1450 are Mutual outlets. WTAI-1560 & WJSS-1000 are not yet on the air. ERC, your pal WRJ-970 has a great signal down here! 73. WSVG-1060 NSP! AS THEY SAY IN BINGHAMTON, NEW YORK, "WBNR." "WEEKLY ISSUES NOW - REPORT!"
Greetings! Fellow DXers: Almost three-quarters of a year has passed since I penned my last Musing, so it's about time for another one. A summary of 1967 DX at my shack zilch. Due to an excessive work load at school, I was unable to do any serious DXing. In fact, so far only 1½ new stations were logged in 1967. Varies over the Summer: v/l - WDIC-1430 Clitham, Va & WSYB-1380 Rutland, Vt. wrote "confirmed" on my report. A little tuning around the band on 10/10 revealed previews of a great season to come. Heard were: una WQOD-800 Creve, Va. ten o/b-9 @ 6pm s/off. UN WCRN-760, Tarboro, NC 8-5 & clear (verified in 12/65) @ 6:15pm RE. At 6:15, semi-local WDNS-730 Remount, NY s/off - probable s/off time for NY State stations between 6-6:45pm. UN WHIC-950 Henderson, NC (verified in 11/65) heard S-6 & clear @ 6:20pm. My first prog. log of the season came on 10/17 in the form of WIRV-1550 Irvine, Ky 20 o/b-9 u/o CBS w/s/off @ 7pm. With the logging of WIRV, my total heard stations stands at 1,060 w/verified stations somewhere around 125, hi. Just prior to the writing of this Muse una WQVI-1530 Quantico, Va. was heard topping 1530 w/a powerful ten o/b-9 signal at their 6:30 s/off, 10/19. To those who have just joined the NRC, I will re-introduce myself. 1'm 15 & a sophomore in High School. Equipment in the shack includes a Halcrafters SX-99, Starlite A-140, Lafayette HA-50 FM Police RX, Grundig tape recorder & a GE 12 transistor AM/FM/SM DX. My antenna system consists of one 4' x 11 loop, double cut for the Si meter Si band, & a random-length longwire. My totals stand at 1,069/125 (sic), states 45/39, provinces 7/7, countries approximately 20/11 (I'm lazy to count for sure, hi). The verified total is right. Well, I've said enough for the time being. If I can get up enough material for another Muse, I L C U N 14. 73 Dick Truss - 3363 Bbieshower Road - Columbus, Ohio - 43224 Greetings all! DXing so far has been limited to SSS & EMS. Many new ones logged, but only listing some of better ones. 10/1-4 KHAM-990 @ 6:26pm s/off o/WDFX; KLFN-1700 @ 6:33pm s/off. 10/17 WKMD-1100 w/NX @ 5:35pm s/off o/WCLF; WGGC-1000 @ 6:02pm s/off o/WCLF WSCP-940 @ 6:20pm u/CBS w/religious x/o; WXYT-1000 @ 6:23pm w/NX followed by "Day by Day" religious program- s/off @ 6:30pm. All above logs on 1000 w/WCLF, very unusual CK. 10/19 CFRA-580 @ 7:55pm w/rr o/WCHS. 10/20 WQX-1000 @ 5:13pm s/off o/WCLF WSPF-1000 @ 5:37pm w/rr, s/off @ 5:45; WCJQ-1010 @ 5:45pm w/NX; WHEL-940 @ 6:15pm w/rr o/MIND. 10/21 KSAL-1510 @ 6:15pm w/ABC NX; WDEL-1150 at 7pm 3/NBC Monitor NX. First TAs of season: MWR-1510 @ 7:15pm w/ff followed by CG NX @ 8pm; at times even WAKR was splattered badly, hi. ORSF-1550 @ 8:15pm w/ff & FF announcer; another weaker one on 1595 at 8:25pm but no ID - just continuous s/off. Any ideas, anyone? Definitely looped toward Europe. 10/23 KON-770 @ 1:31am s/off; I noticed that KVEN-1520 is NSP as of 10/16 (she). HEC-1090 @ 2:05am s/off; XEMO-860 @ 2:15v/Curtis Springer program s/off @ 2:30; WGGC-1340 @ 2:53am w/rr followed by Mutual NX; WIRV-710 @ WCLF, I tuned in @ 2:40, till 3:05am made. WPMX-1460 ET/rr prior to 2:45am & after 3:10am tune-in & tune-out. That's it. 73s for now.

Stewart Bane - 2108 South Simpson Street - Philadelphia, Penns. Ivanica - 19126

My 10/7 DX NEWS arrived 10/21. That poor ole mailman walked all the way from Cambridge, I think. He'd have made better time except for his having to drag that can-tankerous mule along! First off: My 9/4 WQHN-1400 Ohio log was correct. On 10/9 I had a test on 1220 at midnight that might have been W3D Ve. No ID noted but quality was good & close proximity to Phila. Then @ 4:06 WMBB-1340 s/off. On 11/11 WCHQ-920 NY heard at completion ID of test @ 12:14am. Later on that day, & my thanks to Dave Schmidt, WPHD-930 Del. ex-WKSB logged on RE @ 10:30am. On 10/15 YSF-860 El Salvador was only heard u/first EE ID. SN was noted u/the bad humming from Cuban CC. (P. 4)
Hi again. DX, KB-140-X @ 1001 longwire. New veries in are W0HH-1550 Jackson, WDBX-1460, Augusta, KMTW-1590 El Paso, KCBX-560 Great Falls, KKM-1350 Pueblo, KFDR-900 250w. Floydade, Tex. & KIIL-1260 San Fernando. New loggings & reports as follows:

10/15 - 1am, Friendly Voice of Cuba CMCA-830 La Habana w/ off followed by QRN from Oriental; SS & KIIL, 250w. Honolulu. Not enough for a report on any, but definite KIIL ID. WCCO off? I moved to 840k @ 2am for YSP DX - only faint trace (8-3) of signal from SS. Back to 830 - @ 2:20, I noted WCOU u/QRM. 2:45am, I noted XERB off on 1090, w/s-7 signal from GHEC. XERB back on @ 3:02am. 10/16 - 10:30pm, I passed over umid SS on 1650k w/5 strength & light VSS splatter - maybe WNOX, Nicaragua?

10/17 - 4:25am, KFAR-660 Fairbanks w/ex till 4:30, 8-6 strength w/light QRN, probably from WNBC. 10/19 - 8:40am, KUHF-1580 w/e/uv mx till 9am, then KDAY e/on. 10/21 - 8:45am, KNNU-570 Alturas w/uv mx program till 8:51am. 10/22 - 7:37am, KVU Walla Walla w/late s/on due to failure & then "Early Bird Show," 1420k, 5,000w. I would like to hear from any So. Cal. DXers in regard to stations logged outside state. 73s.

Bruce Reynolds - Route 2 - Warrensburg, Missouri - 64093

Hi! Time again to muse. First of all, I've got to mention the veriey I got today.

Nice v/q from WKNX-1210 in on 10/26/67 for a report of 10/20/66! How's that for timing, ui? KOOL-960 is NS, but not rr. They have "good music." DX: 10/15- YSF

DX in good except for hidden QRN. I got about an hour's log despite the static, though. Also, WSW-930 @ 6pm that morning. 10/17 - KEGH-1130 w/c/w 6:50-7:15pm s/off.

KUHK looped. 10/21 - Brand new KNDK, N.D., in weak from 6:31-6:44pm s/off w/KR1D partially looped out. KDAY-1110 u/KFAB 6:46-7pm s/off, & KNAB-1140 cloubering WWA 7:03-7:15 s/off. 10/22 - KAGE-1380 had ET/TT, ID @ 1:42am & WNPT-1280 TEST logged from 2:07-2:30 w/much KTNN QRN. (WNPT was also on earlier, heard @ 129 after TT). MM 10/23 - Most welcome WNBC-660 through CJOB/CHPT @ 3:30am, & KSTB-1170 c/KVCO 5:06-5:30 am. 10/26 - WADE-1210 u/WCAU w/loop @ 5:25am & fresh-wanted CURR-1220 in w/CBC NX @ 7pm. Veries: v/q - WYDE KKK & WVWM, v/1 - KCCB KOOL WTPU KBGH, v/f - KNEW. Totals 1,079/469. 73s for now & happy listening!

Robert H. Hostettler - 437 Irving Street - Lake City, Minnesota - 55041

Hi! DX is definitely on here anymore, especially since I finally got my NBC LOOP finished. One thing I can say about it - it works! Roger Winsor, I was the DXer mentioned in your KGO v/1, but I'm not from Minneapolis, hi. DX: 10/16- WFBX-1390 @ 2:23am, WPXN-1400 @ 22:45 w/SS, WATE-620 @ 31:51, WRAD-1460 @ 9:54, WKEN-570 @ 8:32-10/17 - KSEO-750 @ 6:41pm, KNBL-1550 @ 5:49. All that was without the loop. Following was with Loop: 10/20 - WOXM-690 @ 6:15am, WKBX-870 @ 7:15, WBGO-740 @ 7:14, KXJZ-1140 @ 2:02pm w/KGOO null, KWWO-1470 @ 2:44pm w/KANO null, KFLG-1510 @ 3:52pm, WRCO-1490 @ 4:34pm, WBBX-680 @ 5:14, WCMO-990 @ 5:56 w/e/off, KXJZ-200 @ 6:30 a/off.

10/21 - CHSC-1220 @ 12:15am s/off o/CJTQ, KUDL-1380 @ 8:50am. 10/22 - WMTX-1360 @ 2:33am w/HI, no WMTX-1280. Also on 10/16, neither WAAB nor WVAR were heard here.

10/23 - WARM-1310 @ 1:11am, KARK-920 @ 1:53m w/HI, WVO-850 @ 2am, KBBM-1270 @ 2:12 testing, KCSB-1390 @ 2:40, KBEN-1900 @ 3:19, WHUN-1150 @ 6:50:54 w/TT & IDs every minute, WIRC-630 @ 4:10 w/KHOU nulled for the third Hickory heard here. 10/25 - KNAB-110 @ 5:45am w/ID, way w/KGOO, WLYX-1210 @ 7:34 w/last QRN from WKNX, WHBL-1330 @ 8:05am, way o/KLO/KNBL, KXJZ-930 @ 8:24 w/much WTQD QRN, KUSD-690 @ 10:30 w/KCCR null.

Veries since last time: v/q - WATT CHIR WMBL WENR KXW YWWY KXJZ. Totals are rising: 630/171. That's it, 73, & good DX.

Ron J. Peake - 6079 Dale - Centerline, Michigan - 48015

Hello everybody! Not too much DX but here goes: 10/14 - WWJA-1550 @ 6:03pm s/off, WBJF-1540 @ 6:16pm s/off, ZNS-1950 @ 6:30pm, well o/KCCL. 10/16 - WABB-1440 TEST @ 1:25am, WBBY-1230 @ 1:06am s/off, WKO-1240 @ 1:25. 10/17 - CJKI-560 @ 9:21pm, KINS. 10/19 - WAO-1510 @ 6:08pm s/off, KJXJ-1540 @ 6:30pm, KXJZ-1530 @ 6:46pm, WDXN-540 @ 6:23am w/Dir. 10/25 - WABA-1580 @ 6:31am s/off, WEGO-1580 @ 6:15pm. 10/26 - CNJS-1220 @ 9:24pm I got my IN back up to 601, also WDKO-1210 Daginav, Mich. started to verify. They have a nice v/q. Veries, v/1: WMUJ. v/q - WKNX WSBA-SC. That's all so 'bye till next week, if get DX, hi.

Bob Ryder - 351 West 1st Street - Holland, Michigan - 49422

DX has been limited here due to a touch of the flu. 10/2 - KDA-1560 on TEST @ 2:30am, WKNX-970 @ 4am, & CPEP-680 @ 4:01. 10/16 - XERPM-660 @ 2:33am w/piano mx, WUBE-1230 @ 3am w/new calls, WKM-1470 s/off @ 3:34am way w/WMED, & WHIS-1320 s/off @ 4:02pm. Also heard that morning were CKCY-920 possibly AN, WB9S-1480 s/off for test (P.7).
Hi. School & KBK take a lot of time but I’m still getting in pretty fair amounts of DX. 9/24 - KYKN-1520 Chs. & KTWF-1580 (ex-KYND) noted @ S85 in good so reports on both. MM 9/25 - KLCJ-570 Calif. beginning talk show @ 3:05 w/WKRF on. KKKX-580 rr (ex-KTWF) @ 3:29, KENN-1390 NM ending f/c @ 3:45, WCCX-1420 PA /s on clear @ 3:58, WACL-570 @ 4:25, 9/30- WERB-1230 Va. /s /n @ 5:01pm. 10/3- KDDA-1560 first test of the season @ 2:20. KETA-1340 f/c /n 2:44, KALB-580 La. @ 4:16. 10/7 - KXOK off; CKRC-650 made it w/Cuba @ 4am. WHIS-1440 r/c u until 4:44 /s /n. 10/8 - CUXC-1050 CBC TD & local NW @ 9pm. MM 10/9 - WCCX-1260 NC /s /n @ 4am. 10/12 - WSJC-610 finally heard @ 5:14am, & WJTS-560 WA. @ 6:07. 10/13 - KMAX-570 SD @ 7:50pm. 10/15 - WIBX-550 r/c, while trying (unsuccessfully) for YSF DX. KWIC-1560 Salt Lake City 900 @ 7:44pm /s /n as was KALP-1510 Ariz. @ 7:59. 10/19 - KJLO-1060 q/KWY briefly @ 7:15pm w/A. KMMW-620 Iowa @ 10pm w/KXKX splatter. 10/21 - WBRW-950 (ex-NAWP) "W-Great" s/o "6:15pm w/whoo QRM. 10/22 - WNPX-1280 in well @ 2:01-2:30 w/Southern Belle announcer, hi. Also, by best graybeard in WFGU-1450 WI (State #41) in good @ 3pm beginning NX after a Bud commercial, then lost to WMOG & others! MM 10/23 - CTWV-910 Alts. in fairly good @ 2:25pm /s /n thanks to a Bruce Reynolds tip. WHUN-1150 Pa. test w/TD's every minute @ 3:45-3:54am, WLAIK-1430 /s /n @ 4:01, WLCO-1370 /s /n @ 4:05. So far, 28 new stations in October. Recent veries: v/f- WOCX-950. v/f- KETA-1340 & KTBV-1580. v/= WHIS-1440. v/g- KELO-1320, KQH-790 (state #47), also verie #200. WILL-580, CBL & WDEB-050. Totals: 712/205, states 11/37, w/hope that WTEL will up it to 38 verified. That's about it from here. 73s from the HOME OF THE CHAMPS!

Len Kruse - 1677 Glen Oak Street - Dubuque, Iowa - 52001.

Three brand new Alaskan radio stations have taken the air the past several weeks. So when you ardent BCB DXers are DX'ing these up-coming Winter months, try for all three of these: KYKN-630 in Anchorage; KSRM-920 in Soldotna, & KJNP-1170, North Pole. But for those of us who have never logged even one Alaskan station our chances of hearing these three brand new Alaskans are slim. The DX TEST on 10/16 from WMM-660, Richwood, WA. was not heard at this den, although I tried real hard, but heard only the Cuban super-powered station on that frequency, along w/ANek WLCX. And speaking of all stations KUDJ-1380 Fairway, Kansas has resumed 24-hour programming, just recently, to battle it out nightly w/ANek WNK in St. Louis at this location. The number of brand new stations that have early morning EES are few, for each week brand new stations are reported on the air by the FCC, but few if any DXers report hearing their early AM EES. The very latest ones "out on the air" other than the above-mentioned Alaskans are: KNDR-1080 Longdon, ND, 1000-D, WCSI-1590 Cherryville, NC, 500 D, WHN-1170, Milford, Del. 500 D; KVVX-1290 Madisonville, Tenn. 500 D, & WQUS-1590 Bryson City, N.C, 500 D. We have certainly missed the regular reports of Everett Johnson of Mendota, Ill. Best of DX to all the WBC boys in this DX season!

Hi Gang! A little DX came this way recently. On 9/23 KNBO-1560 @ 1:54-2:05pm. They were testing for a power increase from 500 to 5,000w. On 9/24 KGWA-960 @ 9:49-10:04pm ES. 9/25 - KCDX-1560 @ 7:13-7:30 ES. As for veries I KBXK KSWS KJEF KBBB KEBK KELP KJIM & KFOL. I haven't been getting a chance to try for any of the Specials, because when I do I always fall asleep on MM. But in about 95 days, watch out - I'll return to Muncie, Ind. & hit the dials regularly. Total stations received now stand at 625, veried 195. Percentages of veries returns at 84.2%. Anyone waiting any KYNO-560 SCs drop a line. Almost forgot these two on 10/23PKWDS-710 @ 12:01-12:05pm & KLZ-560 @ 12:05-12:15. I tried for KARI-550 TEST but couldn't pull it in. 73s.

Jeff Ross - 125-12 Cronron Avenue - Rockaway Park, New York - 11691.

Hi fellas. CX have been good, but not too many new ones. 10/7 - WMOV-1500 @ 5:40 on, CREO-1320, NS @ 11:00, & WDXR-1560 @ 11:12, then 10/14 WCTV-1580 Ga. @ 5:19pm. They were also in for the next three nights w/strong signal. Veries P WJKI WMOG WDXR WBS. v/f- WIV. v/g- WRATZ. By the way, in the 10/21 issue, Ernie typed my totals incorrectly. It should have been 560/412 for heard/verified. The miniature loop I mentioned in a past issue is a flop, hi. I hope you didn't get your Hopes up. It seems to work now, only between 1000 & 1050. Oh well! I guess that's it, so see you in 14 or so. (oughta be terrific for WREZ, hi - ERC)

REMEMBER TO SEND ONLY REPORTS TO STATIONS THAT YOU WOULD BE WILLING TO SEE HERE IN PRINT IN DX NEWS. MAKE SURE EVERY REPORT YOU SEND REFLECTS CREDIT NOT ONLY ON THE N.R.C., BUT ON YOURSELF AS WELL! ALWAYS ENCLOSE RETURN POSTAGE.
Hi all. Heard: Finally on 10/23 @ 11:30-12:30, WOAI-1200, San Antonio, horribly chopped up twixt WCAU & WOWO, but in fair after WOWO s/off @ midnight. (This leaves the two guys in Baluchistan who haven't heard WOAI yet, huh?) 10/23- WNDR-1260 for a report to Syracuse from 4:25-4:35pm. 10/26- WBOS-1600, Brookline for the first real good log on these w/ve Oldie HI Lady, 2:45-3am. 10/26- WOL-1430 Wash, DC, w/Soul DX 3:20-3:30. CJBC-860 Toronto like a ton of bricks @ 7:50. Verified: WQOK, White Horse Road, Box 10007, Greenville, SC; a v/f for s/on AM of WABA’S TEST, WGBQ & WVOX are being sold by Whitney Communications to Hudson-Westchester Radio, Inc. 73. (That could mean two call changes there - better verify them quickly! - BRC)

Marc De Lorenzo - 35 Sylvan Drive - Hyannis, Massachusetts - 02601

Hi. I got to work at WGAU WANO & WHTC. New DX... 8 10/16- WOAI-1060 weak through two unID Ss & 12:45 on r/c-wx, WAAB-DX of course L&C, used old rr; WWJF-1300 fair through WRE w/vf/c-IT @ 1:10, off @ 1:11; unsub CHER-950 ET/wk 1:20-1:30. PM, WPXK-730 5:29 s/off. 10/17- WYBB-780 @ 5:45pm s/off, WBWB-960 @ 6:40pm. 10/16- Long-wanted WSBW-1420 Vt, S-9 @ 5:13pm s/off. 10/19- WNAV-920 @ 5:40pm. 10/20- VBA-1196 Munich fair in EX 5:30-6:30pm s/off. 10/21- YVWH-940 u/HEQ @ 12:50 s/off, CBN off. SM 10/22- EGC-914 5:30-1:05 fade, CBN-1250 @ 2:20 c/w/WWA, CMCD-670 w/La Voz de Cuba net @ 2:20, WCFS-760 weak w/JWR @ 5:09pm w/rr. MM 10/23- R. Tirana-1394 in: Albanian (?) @ 12:15, unsub KGBS-1020 & KTIM-950 @ 1:30, R. One-1214 w/hr, folk mx, comedy @ 1:33, wks-1460 w/hr 1:55-1:58 when on comes WBNX to wreck it, KDCW? 10/24- WRIC-540 @ 5:43pm s/off. 10/25- CF5R-1410 on top ANX @ 6pm. 10/26- WIKO-1060 weak through WTVJ @ 5:43-5:52 w/hr, WNJL-1110 even w/NET @ 6pm s/off. 10/27- WKGR-800 weak during WML peace @ 6pm. Totals now 879/203. 73.

Bill Cheatham - 6900 Westmoreland Road - Falls Church, Virginia - 22042

Well, here I am again: This DX Season I'm going to try to get a Nailing in every week so as to keep each one down in size. That's a good goal. Speaking of goals, DX-wise, I'm trying to reach 590 stations received before the end of the year. I should be able to manage that if my rate continues as it has been going. New DX: 10/20- WJDX-1470 4:39pm, thanks to tip from another DXer; WBWI-1600 5:40s s/off-SSB w/WXJX looped out. 10/21- WBRF-1290 in for brief instant @ 6:38pm on RE for second NF. I was really surprised at this one. It also makes my ninth 1200. MM 10/23- WCCS-1440 @ 3 am w/good signal; WAMH-1590 3:39m w/c/v; WSBG-1410 4:01am; WEP-760 1:14am w/c/v; 980 s/on @ 4:15am was covered by WRC s/on, who? 10/25- WBEM-1600 5:14pm s/off, SSS, w/c, difficult reception. Veries: v/- WMAL v/- WXYZ, & v/1, from (would you believe?) WTRI-1520 in Brunswick, Md. The CE said he found my report in the engineering files & that the engineer who proceeded him apparently failed to send me a reply. So WTRI replaces WIXY as being my slowest reply to a report, seven months, 23 days beating five months. I didn't have any luck on the TESTS which I tried for - YSP-940 & WVAR-600. On well, Reports out to quite a few stations: WGR WSPD WJED WCCS CURN WYX FPR & WHLI. To Harold Williams; I doubt if there is a WJAF-1000 in Tappan, Ny. All I get in the daytime is WQO, with not a trace of anything else. I've also been working that frequency at SSS & only WYX WJQ & WICO are heard. 73 & C U N 7.

OK, CHEMS - WE'RE ON OUR REGULAR WEEKLY SKED NOW, BUT WE DON'T SEEM TO BE GETTING THROUGH TO A LOT OF YOU. YOUR MUSINGS ARE NEEDED TO CONTINUE THIS SECTION AS THE VERY BEST IN ANY RADIO CLUB ON EARTH! PLEASE, BOYS - LET'S HAVE THOSE MUSINGS REPORTS!
(Bob Zwier) for test @ 3:18 am w/SSB; CURW-1260 noted on, & unid CHIQ-1280 s/on @ 3:59 am w/GSQ.

I also heard a station on 980 in the EMD Zone w/rt who s/on @ 3:59am.

Any help on this one? Verities back include WYND-1260 WWOP-970 WATF-820. I was looking through the IDX & I noticed many reports without the date. Perhaps we should all take care to include the time & date in all sections of DX NEWS. It sounds like everyone had a great time at the Convention. I wish I could have been there. That's why does it for now.

Ken Lyon - 8028 Tremont Creek Road - Lockport, New York - 14094

Hi, fellow members. Things are getting pretty cold around here but the good DX comes with the cold WX. On 10/15 I decided to stay up & listen so I caught these UMM WMAK-970 w/TT from 1:26-1:34 & 1:52 EST; WEUG-1460 w/TT from 1:30 to 1:40, WYND-820 w/TT from 2:01 to 2:15 pm. I tried for the special TEST from YSF but could not hear it. I did hear a very weak SS there though, & I assumed that was it but it was too weak to copy. I have sent out nine CPC letters but so far I have not received any answers. That doesn't discourage me, though. I'm sure that some will come through. I don't like the idea of not assigning certain stations to each member though, because more than one member might write to the same station & this could be annoying to that station. I have gotten a few verities lately. WYBD-580 sent nice card, (WMAK-970 also sent nice card), KLON-910 sent a typewritten card, CFBC-930 sent nice v/1, said they were surprised I could hear them because they have a very tight directional pattern. WYBD-950 sent nice card, & WEUC sent a nice v/1 verifying my report of their PoP. They said that it was their YEARLY test, the only time they are on at night is this one time each year. Needless to say, I am pretty proud of this one. I was glad to hear that the Convention is in Boston next year - maybe I'll make it. I guess this is it for now, down w/WKBW's NSP! 73s to all.

Joe Fela - 167 Goodwin Avenue - Newark, New Jersey - 07112

Hi again. Recent verities are w/1s from WGRG-1390 WAFM-580 & WMTT-1390, a form from WINN-1430 (a "Harri Griffis Station"), & a card from WEZQ-1260. Recent DX: 10/11-12:08am s/on, WRPC-960 followed by WYAM's @ 4:02. 4:20, WAFM-1460. 3:42 s/on WHIL-1430; 4:34 s/on WGRG-1390; 4:59 CKTS-900; 5:01 s/on WGRG-620; 5:17 pm, WDEE-1260 in for a few minutes, eventually taken out by WRHG; 5:22 WCBC-1390 all by itself - odd; 5:44 s/off WRPC-1570. 10/16 - No WVAR-600, just WICC & an SS. 2:28 pm, WABW-1440-DX in OK; 2:45 WEER-1240 r/c-TT, &C covering 1240 as it usually does; 2:46 what sounded like WOLR-1490 noted. 10:19 4am s/on, WHIL-1290. 4:28 s/on WGRG-950; 4:29 s/on WBBB-920; 4:53 WNYR-680. 10/23-5:53 pm, WGRG-1060 through KWX at night but not enough for a report; 5:37 FF atop 1360 but KHBC IDed there (then in ES) @ 5:40 so I guess that's it was...

10/24 - Thanks to ERC's tip, WMDR-1490 at times around 5:26 pm. Another Vt. station is there, probably WKVT; 5:42 s/off WITL-1580; 6:01 CKBC-1320 atop the channel. 10/25 - 4:59 pm, WILM-1440 surfing atop the FM occasionally; 5:13 s/off WBBB-1570 plugging WDRG-FM, then to 1600 to hear WYAM's s/off also plugging WDRG-FM. It's amazing how much trouble both these stations took to make sure the WDRG-FM call was given clearly while giving their own call as if it didn't mean anything. Locally, the WDRG-970 move to Hackensack has worked out quite well as they are considerably weaker here w/the new facilities. Now if WVAR-1490 will only move to Brooklyn... 73 for now. (They once WERE in Brooklyn, Joe, as WBEN, hi -ERC)

Roger L. Winsor - 739 North Juniper Drive - Valparaiso, Indiana - 46383

Oh where oh where did my verities go? That's the song I'm singing this week, what with only two received. They are KAKC v/1 letter & WGAP v/their old card when 250w. A 1s card, no less. Let's hope that increase in postage doesn't go through. DX has been great, especially SS to Wisconsin. As follows since last week: 10/22- WWPT-1280 in weak during TEST period & beyond w/SS announcer w/a sense of humor. Logged from 2:15-2:35. Dubs & dabs of CKSA-1080 on ES, but no log possible due to KBRD/WTC/WKLO combo. First time heard on 1080. CBFR noted off the air, but only CBR o/WINS. Later that day, WJMN-1110 heard w/KHI w/WM @ 5pm, but no log possible. 10/23-FM-1480 @ 11:23-11:25 when ID sounded like WHIS. Could be WIGS? Anybody else hear it? Then KNZ noted LCO 12-10:39 s/off. WIND now s/off at midnight, bless their hearts. WITL in/out w/KLZ. KIMA-1460 for Washington 79 for two minutes. During that time I heard two spots plus the sports for positive logging. Monoco-1466 heard @ 12:52 LCO & briefly. 10/24- WTWI-1580 on SS w/KHI 5:45-6 s/off. Up to 1260 to log WEKZ-1260 w/ss on ES to 6:15 s/off. 10/25- Wisconsin still in good, w/WBCF-740 s/off @ 6:15. CBL nullled. WMTR-510 heard on s/off @ 6:18, unm. Then a good catch in the form of (P. 8)

WATCH FOR NEW WIBS-1000, Leominster, Mass., sked to go on RC on 11/6, says John Callerman, via the telephone as we go to press. WMN-1550 has just gotten the OK for a different site, tower not up as yet, so still a way off. Will be 10kw. D-1, 1550k.

C.P.C. NEEDS NEW BLOOD!

It is NOT easy to arrange for a special TEST or DX these days, but there are many NRCers trying hard. They could use some more of you boys who would like to have the fun of trying to get some stations to come on the air during the test period for special TESTS or DX programs. ALAN MERRIMAN is the Chairman of this important activity, so please contact him at Box 6, Fairfax, Virginia. He will clue you in on the ins and outs, the dos and don'ts. Don't put it off - write him today!

We would like to take a little space here to thank Joe Fela for the fine f/c list we received two weeks ago, and Cesar Obilo for his most interesting articles about radio stations in the Dominican Republic, and Randy Kane for his fine section, and of course, Admiral Nelson who is doing such a terrific job with the DDXD, and also to commend John Callerman for his tireless work in getting out these tremendous issues we have seen of late. We urge all members to keep tips coming to all the sections, to keep them all TOPS in the field! We note that yearly around the time we go weekly, there is a dearth of reports to all the sections. Let's get with it, lads, for the DX is there, and we ALL want to read about what you are hearing. Also, keep the verie signers coming in, but please do NOT send in any that have appeared in the list this season - repetition serves no purpose except to fill up space. Please weed out any v/s that have been listed since Vol. 35, #1. Thank you, and C U N 7.
Mike Tarnary - 1205 14th Street - South Houston, Texas - 77589

D.X. NEWS

November 4, 1967

Hi! Things are looking good on my new radio, a Realistic DX-150. So far I have logged 101 new stations, thus bringing my totals to 235 stations in 36 states & ten countries & two provinces. A list on new stations follows (all times EST, PM, unless otherwise indicated): 10/7 - WRFC-950 @ 3:55am, WJAZ-950 @ 4am, WIBX-580 @ 12:32am, KELO-1480 @ 5:16am, WBRC-1300 @ 6:30am, WIRR-1400 @ 5:28am, WNOX-990, KMRC-1430, KYW-1100, KENA-1450 KLZ-560, KO-1460 WWIN-1400 @ 5:26am, WCSC-1390 KIST-1500, WAVE-970, KWBQ-1410. On 10/7 Bobby Smith & I had a DX party so much of the credit goes to him. We also stayed up on 10/12, 10/14, 10/15, 10/12-1450 WJIK-550 WNOX-KEUY KTKQ KIST. 10/14-15 KPPC-1560 WDBQ-700 VPWY-730 WJCN-910 WXFC-910 WQOD-910 KCRW-910 KCRW-1480 KGW-910 JAPD-915 WLCX-910 KBEH 10/15, See DXDD. It seems that the DX-150 is a good RX & I expect to log lots of stations with it. And remember, HOUSTON in '69. (Hi, Mike, and welcome to the NRC's & to our Musing's Section! We hope you'll be in here often!) -ERC

Lynn Brooks - 2109 Mary Street - Ponca City, Oklahoma - 74061

CX are improving here, & DXing is getting better all the time. But my success w/TESTS is poor, as none has been heard here. I wonder if they were on. Latest versions: v/q- WHFX-1270 WJAM-1180 KTKQ-1000 KPEX-560. v-1. KMBX-1140 w/CM, KMBX-1310 KSW-560 KEPI-780 WGMX-1440 WXFM-1410 w/program sked. KMBX said that they had installed some expensive equipment to increase their coverage, & my report was their first proof that it was doing what was supposed to do. Very friendly from then. DX: 9/27 - WJAM-1180 NY 10:33pm (only my second NY station), WJET-1280 Al. 10:59 ID only, WONO-1480 Mmm. 11pm NY w/WSDI also on 1280, KCRG-1600 11:44 (U/KEHZ) & s/off @ 11:59 w/singing "God Bless America." 10/2 - No KDDA TEST heard, but I see where others heard it. WAKR-1590 Ohio 1:59am, WLAC-1510 2:21 TT in progress, WOKX-1320 Mich. 2:30, KERU-1400 Mo. 2:58 NX, WPJR-1250 Pa. 3:30 w/good signal. 10/7 - WWO-1190 Ind. 6am NX, KSWF-1260 Al. 1:14, 10/12 - No KNEI-1140 TEST, only 1100 WWRN w/good signal. 10/14 - WKKC-1230 Ga. 12:03am s/off-SB, KWWB-1470 Tex. 12:06 FB scores, WXFM-1410 Ws. 12:08 o/WKB-1270, KFKM-550 Kan. 11:14am, KSWF-560 No. 11:29am, WDAP-610 No. 5:08pm. Anyone w/experience w/an HQ-180, please write & let me know what you think of it, as I am seriously considering the purchase of one. I am also interested in hearing from any NRCers who would like to correspond. (Thanks, Lynn -ERC)

Ernest B. Cooper - 438 East 21 Street - Brooklyn, New York - 11226

As Editor, I of course like to see Musings from all over the continent, but speaking as a DXer now, I look forward to reports from others in the NRC area, particularly notes on your

What says, boys? Let's see more Musings! Back to 10/23, MM-560-1750 was not quite AN - they seemed to have s/off somewhere around 3am. AN SSBs were noted on 760-795-980. meter on 1350 a/WSIR ended a:55, probably KXCH, but no ID heard. 10/26 - A lot more on WIO1-1060 5:39-5:45pm s/off, but still not enough to report. A little more added on 10/27, so a combo report out for these twilights" worth of loggings. SM 10/29 - "H. El Mundo"-1335, KUHF, San Pedro Sula, Honduras, logged 3:23-4:01am s/off & reported. UnID SS-1241 noted AN or at least till 3am or so, but tough to separate from the 1240 gang, has a "hard sell" announcer. XEPR-1380 came in clearly just before its 4:15am s/off, mentioning slogan "R. Felicidad," and the call letters. I noted its famous 1090k image of WAM-1110 in good 4:35 w/TT, 4:50 w/OC, & then IS 4:45-4:46 & then s' on & hynms, reported. 560 &620 barely perceptible here at the same time. We noted the HI lady today on WBM-1330 (on top), WBBF-1580 WTRAN-750 WMM-1380. I for one will not spend a dime at a Holiday Inn - I hope no other DXers do it. MM 10/30 - WNOR-1230 noted AN-rr as was WAOY-1100, the latter probably due to that "human interest story" of the deranged gunman. I noted images of WBMX-1150 today on 1020, 1460, & 1620. Nothing much of interest on, except unID SS-660 in/out w/AM/WHFI w/no other 600-er audible, mucho yakking, & a little band & fanfare type music, I imagine it was CFM, but no ID, so no report. I noted on both 10/29 & 10/30 that no daytimers were heard at their old 4am s/off time, so I guess the FCC new rule has gone into effect. 10/30 & 10/31, on 1060, WIO1 was stifled by not only KYW, but by WNCE-rr as well. I enjoyed having Bob Foxworth here the other evening along w/ex-NRCer now living in Brooklyn, Deve Roye. Don't forget our annual get-together will be on Saturday, November 29, noon-6pm, the Saturday after Thanksgiving Day, at my friend Hubert Buckner's apartment at 635 East 21 Street, Apt. 4, on the first floor. We hope to see lots of NRCers, new & otherwise. Come on, now, gang - let's MUSE! C U N T.
The problem of verification of Latin American MW stations has been around as long as the hobby itself. The combination of casual Latin American attitude toward broadcasting, lack of station logs, language barriers, lack of understanding on the part of English speaking DX'ers, and postal problems has led to the "blacklisting" of many LA stations by the DX community and has generally discouraged DX'ing for LA stations. But the situation has definitely improved lately: visits to LA stations by articulate Spanish-speaking DX'ers, improved SS report form letters, the ANARC prepared card program, and informative feature articles by experts on Latin American stations have begun to take hold. In the near future IDXD will feature information on Richard Ue.

Station managers would like DX'ers to report, even with reports that are not the most relevant or accurate, so that they can get an idea of what is going on in their area. But I can tell you that, living as I am in the area; I have sometimes gotten the feeling that the hobby itself is being misrepresented by some DX'ers.

The answers to these questions rarely come up. Just because a DX'er has heard a program on the radio, it doesn't mean that it is a program worth reporting. Just because a DX'er has heard a program on the radio, it doesn't mean that it is a program worth reporting. But the situation has definitely begun to improve. Station managers are now being returned to ANARC by cooperative stations as part of a program to improve both reception reports to Latin America, and to foster improved understanding of the DX hobby at Latin American stations.

One of the most important projects underway seeks to eliminate the totally meaningless term, "Typical LA music" from reception reports to Latin American stations. Just as there is no meaningful "typical North American music" (Lawrence Welk, The Supremes, Jack Jones, or ?), there are many different varieties and categories of music broadcast from our sister nations to the south. Several top LA experts are working on this problem at the moment, but the problem of describing different types of LA music for English speakers is quite refractory. Two different approaches seem promising at the moment - (a) a listing of programs from various LA stations which feature different types of LA music, and (b) a tape recording featuring representative types of music.

This is a very important project, and we'd like to urge readers with the appropriate expertise to contact the IDXD Editor.

REPORTS TO LATIN AMERICA
By César Cobió

Many are the complaints voiced by DX'ers through periodic publications against the non-replying policy of certain stations in certain countries. Station managers or directors are constantly being blamed either by Bulletin editors or by angry reporters after several unanswered reports have been sent, dispie the IRC's sent with reports. Usually they ask: "Why this silence? Why not answer the kind and almost begging letters sent to the stations?" The answers to these questions rarely come up. To what countries are these reports sent? To Latin America - an area which, for the same reason, is especially "blacklisted" by DX'ers.

It is a usual habit of people, including DX'ers, to think mainly of themselves, caring little for what anyone else might think, blaming others for things, and claiming that their rights be considered when their requests are not satisfied. But has anybody given a thought, even for a moment, to the reasons for this, and placed himself in that "somebody else's" place - that is, in the place of the LA station director? doubt it. But I can tell you that, living as I am in the area; I have sometimes seen in that place, as a DX'er willing to help other DX'ers in various countries. And I have seen myself in uneasy situations due to lots of letters received by stations asking for verifications. (This is in no way to imply that these reports should not be sent).

Too much, much too much has been said about how to write a correct reception report; it is probably useless or unduly repetitious to keep mentioning the same thing, time and again. But it's almost unnecessary to say this since the blame is easily hung over the necks of beginners and non-club members, dedicated to the hobby for themselves without being aware of the strict rules of the hobby. Yes, there are many such persons, that is the truth. But these are not the only cases seen by me here in Latin America. There are many things to be taken into account when mailing a report to this large area of the globe, things that should be known to everybody, even if he is not an experienced DX'er:
**International DX Digest**

**November 4, 1967.**

*Editor: Gordon P. Nelson, 19 Irma Ave., Watertown, Mass. 02172. Phone: 617-924-9007*

---

**Reporters:** Mail deadline is Tuesday **11**; phone deadline is Tuesday night. Please put Monitor Reports and Verification material in IDXD format; one side of the page, preferably on regular 8½ x 11 sized paper.

DX conditions here in the Northeast are still very good, but have begun to cool off a bit the last few days. The really hot period was from 10/21 to 10/26, with optimum conditions on 10/22 and 10/26. From the high point in TA reception on 10/26, condition suddenly fell to only fair the next night, 10/27, and have ranged from fair to good since. Still no Deep Russians, good Mideasters, or any trace of China on 1525. As expected, these nights of exceptional TA conditions were not confined to the Northeast; proceeding to the West, we find Starr, Ohio, reporting "Finally a half-way decent TA morning 10/23... but it was wild on the East coast!" Hostettler, Minn., reports, "Radio One, England hrd 10/21 w/fair signal; my first TA!" Miller, Washington, postcards, "Things have really popped!! It seems like conditions have regressed to those of 3 and 4 years ago; I am indeed amazed..." Kenney, California, writes "Conditions have improved spectacularly with many, many TA carriers in... reception of IA's has been normal, EC US reception has been good, but not that good... likewise TA reception good, but not fantastic... no DX's at all." Freeman, Calif., relates, "...found a beat between 1035 and 1034 on 10/20 and was surprised when 1034 looped EUROPE... checking showed European carriers on 1043, 1214, 1205, and a trace of 1586... later in the evening 764 showed good strength." By the same token, Conrad in Kentucky reports very good TA reception during this period (including his first audio on 1484), and Dangerfield, Pa., (whose rx is back in the hospital again) reports many hits on his car radio.

*The reasons for the last week's remarkable TA receptions are of course very poorly understood because of the present abysmal lack of experimental data concerning the factors which influence and control atypical receptions on the BCB. It has long been a contention of the IDXD editor that a high sunspot count will not necessarily result in the total elimination of "good foreign DX" on the BCB - and we've even attempted to provide some evidence to this effect (as in our Surnspots Don't Count article in DX News some years ago). Based on the presently available technical concerning MW propagation, we believe (and last week's conditions have supported us to some extent) that a rising sunspot count will not necessarily make exceptional MW DX receptions impossible - only less frequent. The average level of long-haul DX should most certainly fall as mean path absorption increases with rising sunspot numbers; but, nevertheless, while average signal strength on TA paths may be down, and the total number of long-haul openings to a given area may be depressed, the extremely variable nature of ionospheric structures will tend to guarantee that reception during rare and infrequent "openings" can be just as good in years with high sunspot counts as in more "favorable" years. All of which boils down to the following practical dictum: even if the sunspot count is way up, the persistent and systematic MW DX'er should be alert for periods of exceptional reception every bit as good as experienced during sunspot minimum years.

*TA's for the West Coasters to watch for (including both those logged in past years and high powered outlets which have gone on since): BBC-1214 and 1088; France-1205; Dakar-764; Germany-1586; East Germany-1043; Albania-1214 and 1394 (just about equal strength now); Tallin-1034; Austria-1025; and Greenland-1425. New high powered TA outlets not on during past West Coast TA openings include: RNE-638, 1223; Germany-1322; Andorra-701; Spanish Sahara-998 (wandering).

*On Reciprocal Paths. No information in yet from overseas reporters about conditions during the TA "hot period". Prior to that, Arctic notes reception from WSM @ 2240 and CBA at 1902. U.S. reception in Finland seems to have been better in September, however including WFL 2130-2145; WFT 2030; KMOX 2015-2105; WWO 2100-2200; and WBAY-1360 at 2105. (DX-Kuantalija)

*Liechtenstein may have a broadcasting system sometime in the future, according to an item from the German periodical "Der Spiegel" reported in Arctic. Haven't managed to get a Swedish translation of the Arctic item yet, but would seem to indicate that an "International Radio and TV Corporation" plans to operate a stn named "Vox Humana" on LW, MW, and FM. More details next time.
MORON REPORTS...

529 Switzerland. Beromunster. fair level 0208 on 10/22 in GG; better on 10/23 at 0220; no trace of other carriers on Scope, haven't had Ain Beida yet this year; still on this freq? (Ed)

548 Algeria/Spain. Oran and RNE, Oviedo about equal strength 10/22 0213; audio's badly mixed. Oran on top 10/23 and 10/24 around 0200 but still lots of RNE. (Ed)

550 Cuba. La Voz de Cuba quoting propped letter from Che Guevara, 011410/18; listed CMAN, R. Rebelde, Pinar del Río. (Huizer, N.M.)

590 Cuba. Dual to 550, over CMW-Rebelde-Habana outlet. (Huizer, N.M.)

602 France. ORTF, Lyon fair 1730 on 10/23; only single carrier visible. (Ed)

** Unid TA. Very weak carrier f/up or s/on 2210 on 10/21; faded out by 2225; DF ambiguous, could be East Germany or Saudi Arabia. S/on time is about right for Saudi dawn time, and f/out time checks also. Now 1.25 million watt stn? (Ed)

611 Morocco. Sebba-Aioun noted nightly around 1730; best on 10/23 w/man in AA at 1742. Second carrier visible; likely German. (Ed)

629 Tunisia. Tunis noted nightly around 1730, not usually as good as 611 tho. (Ed)

638 Spain/Czechoslovakia. RNE, La Coruna. Recent power boost to 100 kw now puts this on usually over Prague; fine jumble of audios 1702 10/23 tho w/Prague up. (Ed)

** England. New BBC s/on format first noted 10/21 (thought we had Saudi Arabia): open carrier with "bonk" every 30 seconds 2225-2227, then a series of high pitched "beeps" (about once a second) 2227-2228, then regular morse code "V" on Timpani until 2230 s/on of European service. (Ed)

656 Italy. Still only RAI audible 1700-1900; the jumble of carriers from RAI common wave makes it impossible to tell if Spanish Sahara has a weak carrier there or not; certainly there's not enough for audio if that's the case. Do note pulling of mean bearing on some nights before 1800; this could be due either to Spanish Sahara or the Nigerian (listed s/off 1800 for both of them). Will continue checking. (Ed)

665 Portugal. Lisboa way on top 1800 10/21; second carrier visible, likely German, but no readable audio. (Ed)

674 France. ORTF all alone 1800 10/22; only carrier on channel, no sign of 100 kw Libyan stn on this channel per last IDXD. (Ed)

683 Spain. RNE, Sevilla is about the only stn in all of Europe strong enough to put audio through WRKO-680 splash; fine level 1807 10/21 but brutal WRKO. (Ed)

701 Andorra/Morocco. R. Andorra (woman in FF) and Sebba-Aioun (man in FF) both readable at times 1750-1755 10/23; Morocco a bit off freq - enough for an audible hit - and a second carrier visible w/Andorra, most likely the Czech. (Ed) R. Andorra audible most evenings w/Sebba-Aioun. Seems like an unholy freq for them to pick to operate on. (Bugaj, Morocco)

719 Portugal. Free from all QRM once caused by Andorra. (Bugaj, Morocco) Norte on top around 1800 10/21; good second station SAH and some audio from second stn 1740 on 10/22; DF and the night's reception patterns make the German more likely than the Swede. (Ed)

723 Unid TA. EE noted mornings after 1900; weak, but sounds like EE. Causes het to 719 and 728. (Bugaj, Morocco) Mike, the Saudi Arabian on this channel is supposed to carry EE programming; latest sked for EE is 1200-1500 tho. But is still most likely to be them; if they're on that late we'll have a good chance for 'em over here. Please check, Mike. (Ed)

737 Spain. RNE, Barcelona fantastic level most nights now; especially impressive around 1800 on 10/21, 1745 10/23, and 2245 10/24. Splashed CBL. Second carrier visible around 1800 most nights; no chance for audio. (Ed)

746 East Germany/Syria/Holland. Good triple pattern around 1800 on 10/21; Holland dominant audio but some AA there almost certainly. Aleppo dominant w/AA mix 1745 10/23 w/woman in Dutch in background. Cottbus dominant after Hilversum s/off 1803. (Ed)

750 Nicaragua. Cf last week. Estación Equis, YNX, Managua, hrd announcing 50kw at 0002 10/18; claims to serve whole "continent" now. About 80 cycles away from WSE. (Huizer, N.M.)

755 Portugal. Lisboa, Voice of the West EE ID and "V" IS, then into GG. Good level. (Karchevski, Mass.) Ditto here; both receptions on 10/23. (Ed)
1. **Languages.** Latin American countries speak Spanish, Portuguese, or French mostly, as you can tell from listening to their broadcasts. Then why send a report totally in English? Have you considered that if you don't speak Spanish, the station personnel may not speak English? What would you do if you were to continually receive letters in Spanish, didn't understand them, didn't know what to reply, and didn't have sufficient funds to pay for bi-lingual employees? The solution to this problem is simple: send a recorded tape with at least-one recorded ID of the station heard. This is a good way to make yourself understood. If you don't own a taperecorder, use one of the Spanish, Portuguese, or French report forms that have been provided by the DX clubs; this will also help. But never take for granted that there will be someone at the station that speaks English. By all means try to use Spanish - your efforts will produce improved results.

2. **Details.** A detailed report is a must, and names should be mentioned; if you don't speak the language, play particular attention to commercial names which are constantly being repeated. Try to catch and include them - even if they are not correctly written, they can be understood by the pronunciation. Other helpful items are record titles; most of the stations usually buy foreign-made records and English names of popular songs can be mentioned and will be understood. Likewise soundtrack music from well-known movies.

3. **Postage.** Most of the LA stations are impoverished enterprises with two or three station employees including the owner, and have no personnel for the task of replying to large numbers of letters in unfamiliar foreign languages. At first they will be overjoyed, yes, but later they get tired of this since it will not help them commercially; on the contrary, money has to be spent for stamps, and when you have to reply to 50 letters just in courtesy, well, this is more than just tiring. Postal rates in the Dominican Republic are not the same for every country of destination: for instance, an airmail stamp to the U.S. costs 10¢; to Canada 12¢; to Europe 33¢; Africa, 36¢ to 55¢; Asia 38¢ to 55¢; and 50¢ to Australia - our peso is equal to one American dollar. Another important fact is that certain LA countries will not exchange IRC's (e.g., Bolivia - BI); even in countries that will accept them, many station personnel and local post office employees in remote cities will be unable or unwilling to exchange IRC's without a direct order from the Central Communications Office in the country. Many station owners have to just pile up these effectively useless papers or throw them away; other station owners don't even understand what IRC's are for. Remember, they are not even exchanged in the Dominican Republic. (These things change from time to time with the vagaries of International politics - be sure to check with your local post office when sending out IRC's. (BI)). Naturally I don't recommend against sending IRC's to countries which honor them, but (especially to stations remote from capital areas) mint postage stamps are much better. (see the ad for Sax Ringer's stamp service in IDXD circa February, 1967. BI)

4. **The DX Hobby.** Most important is this: our DX hobby is not understood at many stations, especially in remote areas. They don't quite understand what is being asked of them in a DX report, and they don't appreciate or even understand such specialized hobby terms as, "QSL" and the "SINPO" code.

After qualified DX'er visit the stations and talk to the officials, many station officials aren't willing to believe the DX'er's explanation because they think it strange or queer, and they repeatedly ask, "Is that all they do, listen to the radio?" and then they laugh. Yes, this is the sad truth - don't think I'm exaggerating - it's real. (Yes, Cesar, we can confirm this - even at stations in Baja California which had perfect English speakers, the very concept of DX'ing seemed to be alien. Perhaps this is one of the first observations that has been made about DX'ing as a sociological and cultural phenomenon - certainly we're all aware that the DX'ing hobby, with its strictly abstract values and measures, is restricted to just a few of the countries of the world. BI) A proof of this is: how many DX'er do you know of in Latin America? Not many - they can be counted on the fingers of your hands with fingers left over - because the hobby is unknown in Latin America and because most of the hobby publications are in English.
Another fact deserving of mention is that many remote LA stations are unwilling to differentiate between MW and SW reception reports. Many times BCB reception reports are verified for SW frequencies due to misunderstanding by the station personnel. Many replies to reception reports do not contain verification statements and cannot be considered as QSL letters. Naturally, not all replies are like this; there are exceptions, and many stations, especially in the capital cities, have been informed about the DX hobby and thus can distinguish between friendly letters and DX reception reports. Frequent letters from foreign DX'ers explaining the DX hobby have really helped to open the doors of ignorance in some places and have increased understanding of the DX hobby at some stations.

Now, returning to the main subject, am I really wasting my time and yours by repeating the same information about QSLs again? I don't think so, because I've seen entirely too many poor reception reports at Dominican stations - entirely in English and containing inadequate program details. Many of these reception reports have been sent by supposedly well qualified DX'ers who should be well familiar with the standards of reception reporting. But some of these DX'ers continue to send meaningless or inadequate reports in spite of their experience in such matters. Please, gentlemen, improve your reception reports.

Finally, don't forget that you are asking a very real favor of the stations. Try to put your reception reports in as clear and simple a format as possible - give help as much as you can to the stations - the DX'er is much more interested in verification than are station directors and personnel. -30-

*The Questionbox. Roy Millar asks, "Would appreciate s/o on times of Castres, St. Lucia on 840 if known." Clarence Freeman enquires, "What time is being used in the Dominic Republic, EST or AST? Didn't they change one way or the other recently? Is Venezuela now AST? How about the Guianas and W.I. - on an odd time still?"

*Quotation without Comment. Referring to the recent list of Asiatic Russian stations which appeared in IDXD, Roy Millar, Washington state, writes "Now that you've ID my station on 1570 as Khabarovsky, I've logged more stations in that city than I've logged in Washington, D.C."

MONITOR REPORTS . . . .

The editor calls your attention to a new Congo station on 836, an improved chance for Biafra (If they still exist!) on 953, and a report of power increase at Guinea-1403:

---530 Japan. Apparent NHK outlet hrd here 10/26 much of the morning, but quite weak and plagued by CW beacon. Any ID? (Millar, Wash.) Yes, Roy, it's JO6AD, a low powered experimental NHK stn at Morioka City. A good catch! (Ed)

550 Cuba. CMW. Were they the one I hrd // to CMQ around 0341 on 10/16? (Hostettler)

584 Spain. RNE the only TA on the low end of the band 10/29. (Conrad, Ky.)

590 Cuba. CMW must have been the one hrd here on 10/16. (Hostettler, Minn.) CMW; R. Rebele, Habana excellent signal all AM 10/23. Never noted anywhere this strong before. Power increase? Sounded local-like at 60 over S9, very little fade. (Starr, O.)

600? Saudi Arabia. Booming in during the evenings. Hrd best at 1500 and seems to s/off irregularly. Hrd s/off 1700 one night, 1746 another. Noted w/jazz one night at 1610! Power 500 or 1000 kw. (Ericsson, Sweden) Believe this should be 602. (Ed)

647 England. Daventry w/history pgm 0058 10/22; ID at 0059 as "This is BCC Europe from London." (DeLorenzo, Mass.) BCC quite good around 0010 10/23, unID language, possibly GG. Unneeded but first TA of this season, and a surprise considering sun-spot cycle. (Millar, Wash.)

650 Hawaii. KORL was hrd w/weak signal at 0320 on 10/16. (Hostettler, Minn.) KORL, after a long absence, hrd well again while WSM off, at 0336 promoting R&B sound at 11:00 w/TC's in EST. On 10/23. (Hauser, N.M.)

664 Portugal. Lisboa I at good level 0200 on 10/23; pop mx in both PP and EE; female-type announcer. (Starr, O.) Is it Lisboa that's slightly off freq, Jerry or the unit IA that's been reported in the past? Measured the freq of Lisboa the other day and it came out deadcenter, but there was a weak het from a LA there on the low side. Please check. (Ed)
Portugal. Lisbon I hrd on 10/9 w/very strong signal at 0142. (Vatalaro, Mass.)

Libya. The new high powered xmitter is currently signing off at 1720, which makes it a good bet on the EC as solstice approaches. (DX Xuntelliya)

YSF DX seemed R. Andorra logged *leak, consistent to have a tape of the at Can you Will earlier (0345) some lingo here could have been JJ. (Kenne~.)

This is going to be a challenge. Very anybody else hearing this? (DF impossible because of Millar, CP34, Sounds very much like DF still is he hrd similiar fanfare when he logged CP34 from Texas. Keep after it! (Ed)

Andorra. R. Andorra logged 10/19 from 1816. Fair signal for a few minutes, then faded pretty badly. (Staburn, Ont.)

Costa Rica. TIXL reported on 10/10 running past 0133. Previous reports unanswerd By R. Columbia outlets. (Freeman, Calif.)

Japan. JOLB, Sapporo, NHK2 fairly hrd at 0940 w/monotones talk; evidently EE by radio, 10/23. (Hausser, N.M.)

Senegal. Dakar, very strong (for Dakar) as late as 0230 10/26, but very little audio due to KFM (760), KOB (770). This is going to be a challenge. Can you make a guess as to 0200 time, Gordon - MN may be the only time it's possible to tp get a good log on this one here. (Kenney, Calif.) Will be as late as 0330 by winter solstice time, Don.

Universal. SS short but too much hash from WGY for ID on 10/23; best 0330. Is HCFV1 AN on MM? (Starr, C.) Has been so in the past, Jerry. (Ed)

Andorra. Fox mx w/woman in FF 0020 10/28 probably this one. (Sullivan, Mass.)

Congo. R. Kinshasa hrd testing 1520 in Europe w/5 kw. (ARC)

France. ORTF, Nancy strong in FF 0016 10/21. (Vatalaro, Mass.)

El Salvador. YSF did not make it thru rather high noise level; only traces of SS at the time, seemed more likely the Cuban. (Freeman, Calif.) YSF DX seemed to be hereon 10/15 but severe QRN and hnl made copy impossible. (Hostettler, Minn.)

Colombia/Universal. HJJC. Pronasa Nuevo Mundo, Bogota a powerhouse at 0433 s/on w/ National hymn 10/23. Earlier (0315) some lingo here could have been JJ. (Hauser)

Venezuela. YVNN fair w/IXE at 0058 s/off 10/21; CHM off. (Vatalaro, Mass.)

Biafra. The Biafra stn previously on 620 is now here. (ARC)

Universal. Who is weak AN SS on 10/30; very far below domestics? (Cooper, N.Y.)

Universal. Ditto above item.

Spanish Sahara. Tentatively ID'd ed R. Sahara still being hrd from f/in about 1615 to s/off 1702. Arabic music mostly, but SS announcements by woman announcer noted at s/off. Very good at times but always fades at ID time, it seems. DF still is consistent w/Spanish Sahara location, but DF can be regions of Southern Morocco and Algeria, tho. Frequency control not good; noted on 997.46 on 11/1. Not a trace on 11/2 - moved again? (Ed)

Universal. Who's the third weak carrier on this channel evenings? (Conrad, Ky.)

Austria. In nicely 10/26 from 2345-2357 w/apparent time checks in GG; Viennese mx and it's inded lovely "wake up" mx, hi. Third TA of this season, and one of the best TA catches ever made! (Millar, Wash.)

Estonia. Tallinn was surely the stn w/Russian std for several minutes at 2302 on 10/25. First European of the season w/audio. Best bet for West Coasters needing Europe. Unneeded here. (Millar, Wash.)

Haiti. 4VEF now apparently running to 2230 w/EE religious pgms; much better for West Coast DX ers at this hour. (Freeman, Calif.)

Mexico. XEDY, R. Morelos. Cuervos, BCN in over KRLD briefly at 0757 10/26 w/ads for San Luis and Mexicali; low het, later QRM'd by KSCQ. (Hauser, N.M.)

Japan. NHK2, sounded like 750, at 0352 10/23. "JOTB and JOHB, 10 kw here. (Hauser)

Colombia. HJAC call hrd well at 0000 s/off. Not yet reported: are they QSL'ing? (Freeman, Calif.) Think so, Clarence. (Ed)
November 4, 1967

1140 Mexico. Item in 10/7 IDXD should be on this freq instead of 1160. (Ed)

1170 Hawaii. KO9O found very weakly in J2 thru KV00 0240 10/23. (Kenney, Calif.)

1178 Brooklyn. VOA Okinawa in loud and clear from an almost inaudible level at 0900, 10/22, beginning program in Korean. Obvious antenna change then. (Millar, Wash.)

1196 Germany. VOA Munich quite high 10/26 around 2290; apparently in GG. Faded down at half hour; unseeded; 2nd TA of this unexpected "open season" on TAs. (Millar) TA, presumed to be VOA noted between 2300 and 0000 10/25; low pitched het or buzz; are they being jammed again? (Kenney, Calif.) No, Don, not that we know. Ht from LA on 1195 or TVI? (Ed) Finally logged Munich 0100-0110 10/28 after (unprintable) TV set turned off. Fair level. (Sullivan, Mass.) VOA in EE 1740-1830 s/off 10/2 at fair level. (DeLorenzo, Mass.)

1205 France. ORTF in like local 10/9 0022-0100. Pop French type mx. (Vatalaro, Mass.) Bordeaux noted fair level 0140 10/23. (Starr, 0.)

1210 Haiti. Weak instrumental mx 2300-0000 10/25. ORTF still s/on 0000? (Kenney, Ca.)

1215 England. In weakly 0000-0200 10/23, 24, 25, 26. Never very good. Before 0000 channel is dominated by high pitched het and what little audio there is seems to be Tirana. (Kenney, Calif.) BBC TT, Don. (Ed) R. One, BBC pop mx pgm; "Countdown" show w/EE accented DJ and very American spots. First hrd 0100; strong, deep fades. F/off for good 0153 10/23. Rpt sent. (Starr, 0.) R. One hrd 10/21 0100-0130, fair signal. Had TC's and R&R; not enough for rpt. First TA! (Hostettler, Minn.) R. Two, new light service pgm can be hrd on Saturday mornings; hrd 10/21 0006 w/WCAU slop. S9 plus. (Vatalaro, Mass.)

1235 Albania. Tirana hrd clearly at s/on 2230 in AA(?) 100% readable until 2250 the language unfamiliar. Never hrd as well on SW! (Kenney, Calif.)

1241 Bermuda. Very strong w/middle or road mx pgm 10/9 0145. (Vatalaro, Mass.)

1268 Spain. EAKL, R. Popular de Madrid is 15 kw here. (Weber, UK; SDXK)

1335 Honduras. R. El Mundo, HH6 on SM's until 0400; usual LA mx; frequent ID's; TC's between records, no commercials hrd. (Cooper, N.Y.)

1394 Albania. Tirana logged txm to tip from GPN at daily s/on 0000 10/21; 8 note IS played 20 times 2358-0000, then anthem, ID's by man and woman; not // 1214; S9 plus average. (Vatalaro, Mass.) Tirana in a German tongue 0015 10/23 w/brief ID. Also hrd EE pgm 1722-1725 s/off; accented woman announcer. (DeLorenzo, Mass.)

1403 Guinea. R. Conakry is reportedly now 100 kw and is reported on past 1900 some nights. Very good bet after RTP s/off 1800. (Slater, U.K.; SDXK)

1457 Denmark. BBC in weakly 10/21 at 0012. (Vatalaro, Mass.) BBC loud and clear w/weather forecast 0058 10/23. (DeLorenzo, Mass.) BBC fair to good level, 1st time this season. Which number is it now that it's no longer "home service"? (Starr)

1458 England. First audio ever hrd on this channel 10/25 was dominantly EE; likely BBC outlets; also a Slavic speaker there at times. (Starr, Ky.)

**1505 Spain. EAK59, R. Popular de Crense to 1805 s/off in Europe. (ARC)

1510 Japan. NHK2, sounded rather like 750 outlet; several stns listed on this common wave channel. (Hauser, N.M.)

**1578 Ivory Coast. Low powered regional station formerly on 1544 is now hrd on this channel according to one of ARC's African correspondents. (ARC)

1594 Libya. KVOH is the call of the AFRTS outlet at Wheelus Field; s/off time is reportedly 1705. (SDXK)

Only a few QSL's this time and since we have to stick to an even number of pages this week, will have to hold 'em over. Special welcome to new reporters Robert Hostettler Minn.; Bengt Ericsson, Sweden; and to the Suomen DX-Kuuntelijat ry of Finland. Good L
