VOLUME 37

JUNE 6, 1970

NUMBER 29

"Enjoy and appreciate DX NEWS and thank you and the entire staff for your hard work, I know your problems are endless and most of the time it is a thankless job."

(Ken Davis, K3CCN, Md.)

IN THIS ISSUE:

LATEST VENEZUELAN LIST - Cesar Objio SUPREMACY RATINGS - Norm Maguire NRC CONVENTION '70 NEWS! - Russ Edmunds

MORE NEW MEMBERS!

*Virginia Lyle, 3050 3rd Ave., North, St. Petersberg, Fla. 33713

Welcome to the NRC, ladies and gentlemen, your New Member Kits are already in the mail on their way to you. We hope to see your contributions often here in the pages of DX NEWS!

RENEWALS...

Geoff Fox Bob Duggan Dough Myers John F. Wilson

NRC DOMESTIC LOG AVAILABLE SHORTLY ...

The long-awaited 1970 NRC Domestic Log is now being printed; full information on the handiest, most useful and complete domestic station log ever produced is contained in this issue of DX NEWS...

DON'T BLAME THE POST OFFICE THIS TIME...

The delay in delivery of the last issue of DX NEWS was due to printing delays resulting from our decision to hold the bulletin until ERC's late copy arrived: since commercial printers operate on very tight schedules and are usually booked up weeks in advance, if we miss our deadline we're stuck until the printer can find a place to fit us back in the schedule. In the future we will be forced to go to press at the predetermined publication time whether or not all of the sections have arrived! It's a choice between producing a late bulletin or an incomplete bulletin; judging from the mail and calls received here at HQ, the latter is preferable.

A call to ERC at deadline time for this present issue revealed that he'd misunderstood the deadline date for this issue; held-over Musings will appear next issue. The Quasiapocryphal Foxworth's IDXD section has also not arrived this week; it too will appear next issue...

We once again apologize for the delays in delivery and wish to emphasize that that these problems are TEMPORARY - we will (indeed we must if we're going to avoid a hopeless logistical tangle) be back on a reliable schedule by the end of this Volume when we once again go weekly. Fortunately our recent problems have hit during a period of protracted poor DX conditions...

JOHN LOMBARD JOINS HQ CREW!

The publication crew wishes to welcome the newest regular member of the publication crew - John Lombard - who's already put in a lot of work for the NRC during the past couple of weeks - the volunteer efforts of Boston area members keep the NRC in operation! And by the same token we'd like to say goodbye and thanks to 4 of the original BAD guys who've departed the Boston area for greener pastures: Bart Cronin and Bob Karchevski - both regular attendees of the old "crank and collate" mimeograph publication sessions - and former NRC Publisher John Callarman (to WMIX-940) and former IDXD editor Peter V. Taylor (to head Kaiser Broadcasting operations from San Francisco). Each of these members has put in hundreds of hours for the NRC and their efforts should go remembered by us all!

OUTSTANDING NRC PROJECTS UNDERWAY!

A number of great NRC projects are slowly but steadily nearing completion. The fabulous new 1970-1971 NRC Domestic Log is now being printed and proofread by the HQ crew... Paul Hart of Texas (who recently spent a most enjoyable evening chatting here at HQ) has a very interesting and useful project in the works to make available to the NRC membership antenna pattern information which'll indicate how much power a directional station really puts in your direction. Here at HQ we're preparing a number of unique maps which'll show the DX'er just which stations - both foreign and domestic - will and will not be audible during different levels of auroral disturbance. Howard Fountain reports that he's in the final stages of completion of the comprehensive NRC Latin American Log containing complete and up-to-date information on all stations in South and Central America. And once the HQ crew gets the NRC Log out of the way we'll be making available the kits for construction of the FET Altazimuth Loop...

GIVE A HELPING HAND ...

One of our newer members, Fred Wilson Jr., 435 High St., Berlin, N.H., 03570, recently wrote HQ requesting that we terminate his membership in the NRC because he'd just gone blind and was no longer able to read the bulletin. Fred's been incapacitated with an incurable and progressive disease for some time now and has been forced to curtail his DX'ing as a result. We know that many of our members are active tapesponders and this is an ideal chance for some NRC'ers to bring a little cheer to Fred. Can we find some volunteers out there who would be willing to transcribe the highlights of DX NEWS onto tape for Fred so he'll be able to keep in touch with the hobby? If you'd like to devote a little of your time to bring a lot of cheer into Fred's life by taping the highlights of DX NEWS on a regular basis, please drop us a note here at HQ! We'll see to it that Fred has a tape recorder and we'll pass along further details to interested members.

Our active and enthusiastic member in Australia, Chris Hambly, would like to tapespond with NRC members. Chris is particularly interested in hearing domestic sign-on and sign-offs, some typical programming from southern U.S. stations, and some programming from L.A. area stations. He'd also like a tape of KING's "thrush" interval signal. Chris is using a cassette recorder and'll be glad to swap tapes with anyone in the NRC. His address is 47 Chessell St., Box Hill Nth., Victoria, Australia 3129.

The station Manager of 3UL in Warragul, Australia, has also written to NRC HQ asking assistance. He'd like to hear some air checks and on-the-air promo's from U.S. stations and is glad to reimburse for postage and tapes. Here's a chance to start an interesting correspondence; write Colin McL. Cameron, Manager 3UL, 43 Victoria Street, Warragul, Victoria, 3820. Tapes should be 3-3/4 on two tracks.

FOR SALE SECTION

Want a real bargain on an HQ-180C? Lew Collins, the NRC's Number One Equipment Sleuth reports that there's one available for only \$190 from an acquaintance, Stan Pope, 511 Washington, Cramerton, N. C. 28032 (Phone 704-824-1883).

SPECIAL THANKS

To Lenny Goldberg of Brooklyn for a couple of fine plugs for the NRC in the magazines "Rock" and "Stormy Weather".

NRC TIME POLICY SURVEY

The results of the membership preference poll on the times to be used here in DX NEWS indicate that most of the membership doesn't care enough one way or the other to bother to respond. For the International section, feelings have run about 5 to one in favor of switching to GMT; beginning next issue the IDXD will therefore make the switch to GMT. The feeling for the Domestic sections is not quite so clear-cut; at the moment the majority has indicated that it prefers Eastern Local Time. We'd like to hear from some more of you before the final decision is made; meantime we'll stay on ELT.

EDITOR:

r.j. edmunds box 946 wayne, n.j. 07470

Well, folk, I have no idea when this'll be read, as today (6/1), I've still not received the 5/16 bulletin, and due to that item, plus the fact that cx have been really bad since the last week in April, this'll be another small column, tho' there are quite a few changes to report.

(all DX sections (A, B, & C) are listed together this time)

```
CKTS-Qu Hrd w/ Montreal Expos EE BB 5/11 2200, so add this to
               BB Net listed last DDXD (5/16). (RjE)
1150 WEMA-Oh Erd well atop WCOP, w/ regular CHSJ not audible 2352 5/24
1230 WHUC-MY Finally bagged this at s/off 5/11 2225. (RjE)

Errors Dept.: Please correct list of Baseball Net Feed Stations for K.C. Royals: It's MBZ -980.

.. have a bunch of PSA's & Net changes, but will hold for Updater scheduled for next issue.

Had some R/c' & one "A" item from Page Taylor, which I got on the phone last eve., and then intelligently forgot to bring to work w/ me.

Be sure to read the Convention News carefully, and let us know if we'll see you there.

Among Page's r/c's I remember were: WNAK-730; KSYL-970.

Still waiting on WRAN-1510 QSL's for TEST. Cards hadn'T come in as of last week. As soon as they do, they'll go out. But, meanwhile, where are the veries from the WEXT-250 TEST ??? *

That's it from here, and lets get some more DX happening out there...

73's de RjE

*Peter & | have been very pressed for spare time months - he with his WRYTRadio deties, I with school - and Geoffrey left for Florida and his new job. We hope to be able to get together and do it within the next few weeks; over 100 reports were received and just addressing envelopes is quite a job.

INTERNATIONAL DX Digest

Propagation & Features: Gordon Nelson, 19 Irma Ave Watertown, Mass. 02172

IN OPERATION

SAN ANDRES ISLAND. Conflicting information has cropped up about this small Colombian-owned island in the Caribbean which counts as a separate country for DX purposes by virtue of its greater-than-50-mile separation from the mainland. They've been listed by a number of sources as having stations in operation on the MW for a number of years now; letters to the listed stations have elicited negative responses, Caribbean-listeners have been unable to hear any traces of the listed stations, and, though the stations have been listed, it's generally been assumed that the stations were inactive at best. Now comes the first information to indicate that there may indeed be an active station on San Andros. Ross Hansch, W9BG, recently worked HK0BKW on San Andres who reports that there's a Radio Morgan in operation on 1260 with 1 kw; according to him they operate 0900-2000 EST with a 45 foot high longwire. So who'll hear them first?

ANTARCTICA. Ross also recently worked KC4USV at McMurdo who updates the information in the last IDXD; according to him the only station in operation is WASA on 600 kHz operating NSP with 50 watts; antenna is a 40' longwire and power is derived from the famous McMurdo "sinking" atomic piles...

INTERNATIONAL WATERS (ENGLAND). Radio Nordsee vacated the band on 4/30 following a short test period on 1385; on 5/15 she began tests on 1232V and resumed regular operations on 5/15. Schedule is 2330-2000 according to Ken Brownless; reports from other sources indicate that Nordsee is still being jammed by the British Government.

YUGOSLAVIA. Radio Capodistria (Radio Koperin in Slovenian) has been heard in Italian on 1169 in Italian around 0600; this is the only commercial operation in a Communist country. (SCDY)

MOZAMBIQUE. A new 50 kw station will soon begin operation from Lourenco Marques on 1007 kHz; this one will be just marginally possible from North America this summer. (Ed)

PROJECTED OPERATIONS

MALTA. Deutsche Welle, the West German federal station is expected to begin operations from here with a 600 kw transmitter in 1972. (SCDX)

CAMBODIA. An American firm (no doubt based in Virginia) is rushing to put a new 1 megawatt station into operation from Phnom-Penh; freq unknown but the station is supposed to counter broadcasts from Peking and Hanoi. (Ed)

SAN MARINO. The new commercial station on 1484 is expected to begin operation shortly. (SCDX) Lots of luck, folks...

- HOLY BUSIN TOST 90%/10%/F0[4x]

Dear Sir,

- 1. We have just received a letter from Ladio Australia, which contained relevant details from your radio reception report sent to them.
- 2. Your report, for the date and time specified was correct regarding programme and frequency.
- 3. The location from which your report originated really has our technical representatives intrigued. They cannot quite understand how you the copy our station at Korat, (even though at poor mailing) when PHAN HANG have no luck at all? As we run 500 watts to a top-loaded 100 foot vertical of signal.
- 4. This station was established with funds and equipment donated by the Australian public. The aim of the station is to provide entertainment, sport and reas of an Australian origin to our servicemen stationed in South Leunan.
- 5. As you can see from our programme, a copy of which is enclosed, a large segment of our programmes are directly relayed from Radio Australia. They are identified at least every hour as being relayed by AFRV.
- 6. Any further reception reports (particularly any improvement or deterioration of signal quality) would be of great interest to us, and can be sent to the above address.

Yours faithfully,

(F.H. LO.9)

SUMMER-SUPPLEMENT to

DEAR FRIEND

Every DXer and Shortwavelistener just must have WRTH 70 and its Summer (or Mid-year) Edition at hand! New schedules and corrections from all major short wave stations is only part of what you will find in the Summer-Edition of the WRTH 70, which will appear during June next.

It will also contain:

Complete revised Shortwave Sections

from Latin-American countries.

Table containing all operating Short Wave Stations of the World.

and of course the lists necessary for every Shortwave Listener:

News in English

& DX-Programmes.

It will not cost you more than the below mentioned rate to get your copy of the 1970 Summer Edition, which will enable you to be right up to the minute on what is going on in the world of broadcasting and television.

Get your copy and open the door to world-wide DX-ing - it's the key to all that's to be heard.

Sincerely yours,

full Editor

Radio Geronimo on Monte Carlo

BY RAY DOWNING

LONDON—Three years after the poppirates were forced off the airwaves, Britain at last has its first all legal, all above board progressive music radio station. Run by a group of Englishmen, Radio Geronimo is now test-broadcasting two to four hours of continuous rock, classical and eastern religious music across Europe, from the transmitters of Radio Monte Carlo from midnight every Saturday.

Transmitting on 205 meters in the medium waveband, it's been testing for seven weeks and hopefully will eventually go out four hours a night, seven nights a week. When that will be depends on how soon enough advertising can be found.

"The response has been fantastic," says Terry Yason, a former pop music public relations man who started planning the station last year with pop journalists Hugh Nolan and Goeffrey Bass after he'd returned from the States where he'd returned on to FM radio. "We've been getting 200 letters a week from all over Turkey, Czechoslovakia, Poland, Morocco, even Nigeria. It's an international sigh of relief."

The concept of the station, says Yason, is to break down barriers of prejudice with rock music. "We've found a way to get a legal alternative to the BBC's [British Broadcasting Corporation] monopoly, and we're completely free to play whatever we want. We aim to use rock music as a bridge—to get across to people."

Which means a continuous program of Rolling Stones, John Coltrane, the Fugs, J. S. Bach, Tibetan religious chants, Judy Collins, the Who, whole albums if necessary, with no gaps, no DJs on ego trips, "just intelligent information, as little talk as possible."

When the station gets underway every night, Yason hopes to slot in about four minutes of ads an hour, with no jingles. "Again, the ads will go out as straight information."

Geronimo is Yason's second attempt to set up progressive radio from a legal European station. The first was Radio Andorra, in the Pyrenees between France and Spain. He abandoned it when test transmissions to England proved the signal to be too weak, and so started looking around for another station.

He found Radio Monte Carlo—owned jointly by France and Prince Rainierand secured the financial backing of record producer Jimmy Miller and manager Tony Secunda. Radio Geronimo was on its way.

At the moment, program tapes are made in London, air-expressed to Monte Carlo and put on by French technicians. Yason hopes to have some live shows in the future, but everything depends on the advertising. There's been no big capital outlay, as with the pirate radio ships. Running costs are about 200 pounds a week.

With a 400 kilowatt transmitter—the largest in Europe after midnight—reception in England is, not surprisingly, good.

What is surprising is that it's not been done before.

(from 5/28 Rolling Stone, via Big George)

From 5/23 Billboard, via Jerry Starr:

LOS ANGELES — A stereo broadcasting transmission system for AM radio has been developed by a Long Island firm. A local middle-of-the-road operator, XTRA, will be the first station in the country using the equipment. XTRA's transmitter is located in Mexico; no U.S. station yet has an AM stereo broadcast permit.

Developed by Kahn Research Laboratories of Freeport, L.I., the new transmitter now allows an AM operator to enter the domain of two-channel stereo broadcasting which heretofore has been the forte of FM broadcasters.

There have been some AM stations, like WQXR in New York, which in early experiments

programmed stereo by broadcasting one channel on their AM frequency and broadcasting the second channel on an FM outlet; usually their FM counterpart. (WOXR-FM is now stereo.) The new system involves a special AM stereo transmitter which allows the station to send out two signals by the use of two sidebands. Thus a teen-ager can now hear stereo at the beach by placing two transister AM radios six to eight feet apart and having them both tuned to the origination station.

Once the radios have been spaced far enough apart to obtain stereo separation, the listener tunes in the station on the right radio and then off-tunes that radio slightly to the right. He next tunes in the station on the left radio and then off-tunes the station slightly to the left.

As Bob Young, an executive with the McLendon Pacific Corp., which is the sales agent for XTRA, said listeners are picking up two signals on sidebands adjacent to the station's prime frequency. XTRA broadcasts with 50,000 watts, with one transmitter in Tijuana, Mexico. The station is owned by Mexican interests who lease sales and programs rights to the Mc-Lendon organization which prepares the two-channel 71/2 inches-per-second tapes in its Dallas facilities.

All the music is played on automated tape players. There is no interference of the prime signals when heard on only one radio.

Since beginning its stereo broadcasts May 2, XTRA has been promoting the new sound by pointing out that no adapters or special receivers are required as in the case with FM multiplex.

Just how strong the AM stereo signal is received depends on where the listener lives, Young said, XTRA's stereo signal is particularly strong, he said, in the southern regions of Los Angeles, Orange and San Diego counties,

XTRA's MOR programming is stereo 24 hours a day. McLendon's FM station, KOST-FM went multiplex two years ago with a similar format.

Kahn Research, formed in 1952, specializes in the development of communications and broadcast equipment. Its parent company, Electrospace (AMEX) of Westbry, L. I., manufactures the transmitting equipment.

Welcome back to Bob Karchevski who is starting a new log from California. ## indicates year started DKing. Hope you fellows with the * or ** will bring your totals up to date during the summer so that you will not be dropped from the listing. Next month will feature North America totals and best veries plus "heard" stations and countries totals. Have a good summer. Aloha from Diamond Head. 73.
