From the publisher ... The DX world has lost one of its greatest hobbyists with the death of Arthur Cushen, New Zealand's best known shortwave and DX radio enthusiast. His death came at 12.30am NZ Time September 20 in Invercargill Hospital. His wife Ralda was with him at the end. Messages of condolence may be sent to: Mrs. Ralda Cushen - 212 Earn St - Invercargill, New Zealand, or via E-mail to Dawn Beckingsale (Arthur's secretary) at <<beckings@southnet.co.nz>>.

On a happier note, Ernest Cooper is recovering from heart surgery, replacement of a heart valve, and according to Ray Arruda would welcome cards and visitors at his home in Provincetown. Get well, Ernie; we need those quality reports!

Although not all Musings received appear in this issue, those received to date are 100% typed up and ready to appear, and now that Dave Schmidt is recovering nicely from hosting the convention, he promises to stay current on typing them up.

CPC Chair ... We have none. IRCA has none. What are you going to do about it? Contact NRC Board Chairman Ken Chatterton directly if you're interested. No CPC chairperson = no CPC tests.

ANARC ... It's time to start thinking about nominations for three slots on the ANARC Executive Board. The two-year terms of Harold Cones, Skip Arey, and Mark Meese expire at the end of this year. Only Club Representatives can nominate candidates (themselves or others willing to serve), and I'm sure that NRC ANARC rep Dave Schmidt would gladly nominate YOU. Thus far Chairman Mark Meese reports having received only one nomination.

DXGTG ... John Callarman has been persuaded to host a mini-GTG (Ernie W. can really twist that arm, can't he, John?) October 17-19 in Mt. Vernon, IL, with co-hosting by Rick Dau and John Tudenham. The host hotel will be Best Inns of America (1-800-BESTINN), located SE of the I-57 / Illinois 15 interchange. Festivities start at 6 pm Friday and conclude at noon Sunday and may possibly include a station tour of WMIX. Direct your questions to John at 1122 Maple St. - Mt. Vernon, IL 62864-4337, 618-244-2067, or work 242-0113.

MEDIUM WAVE RAMBLINGS

- No Redux or Fen-Phen used here. That's why we need your loggings and tips to fortify the healthy appetite of all the DXers who read this column. Let's hear from you. Since this is the start of the brand-new DX season and column-year, here are the few things I ask when reporting: Please submit your report to resemble the format seen here, divided into the various categories (time blocks, unIDs, etc) and use only NRC-approved abbreviations. In most cases, only a couple of additional letters either written or typed will form the entire word, leaving no doubt what you want to convey. Keep your reports reasonably concise. Long, rambling narratives will be edited. And you get to see your name in print!!! My deadlines are Mondays, five (5) days prior to the Topeka deadlines printed in *DX News*. This gives me time to finalize things before e-mailing the column to Topeka, which works the first time on most occasions.
- Bob Karchevski writes that as of September 15th: "KOFY-1050 is still the legal ID for KTCT. On the hour a quick 'KOFY Ten Fifty' is immediately followed by 'KTCT Ten Fifty' in a much louder and more distinctive voice." So beee-ware. Tim reports: "The KIWA Pocket Loop did a great job this time around. I have not had any luck with this antenna in areas like San Diego and Las Vegas where the dial is filled with slop. But in less congested areas it seems to perform very well." And "The following national parks and monuments do not yet have TIS stations: Canyonlands NP, Natural Bridges NM, Grand Staircase NM (Boulder-Escalante, UT), Four Corners NM. Nothing noted near Monument Valley, AZ/UT, but had to stop several miles short of park due to imminent flooding!" Looking southward, Shawn sez: "WTOP heard here. Cannot remember when was the last time, but it was long time ago. Conditions were weird on 9/21 with almost nothing heard after sunset like KSTP, WJR, WGN ... yet up pops WTOP. Take them as they come!!! Hope the season is a good one for all."
- Comment: I've noticed many loggings from NRC members on personal web sites that haven't been submitted to our DDXD columns. What gives?? I'm not against these sites in any way. But if you can send your loggings to these sites, how about a "cc:" to your DDXD column, too! Lots of folks aren't connected to the internet.

But Wayne Heinen says: "Boulder County is OK but they are AC music and "Extreme 1490" is nowhere near their "The Voice of the Boulder Valley" slogan. With their operation, a \$1490 Grand Prize would be very UNlikely. Could be 2 stations mixing up, too." - Ed.]

- (KOJ738) UT Capitol Reef National Park - 9/13 2000 - Station is silent pending repairs. Technical officer Mike McClain says approval has just been granted to proceed with the repairs. DDXD-East

Deadlines for DDXD-East are weekly on Tuesdays.

The DX season is well underway with some nice loggings and NRK-1314 blasting in here at armchair level as I type. Now that we are back to the weeklies, please make sure your loggings are current.

As we begin a new DX News season let me remind all of our contributors of what we're looking for here in DDXD-East: Make sure your loggings are DX (not stations you hear frequently, and definitely don't keep reporting the same stations over and over again). If you don't hear an ID or other specific information to ID a station, mark your logging "tentative" and you will save yourself and the column much embarrassment. For those contributing by e-mail, please make sure that the subject line of your report mentions the NRC or DDXD: when I work 65 hours a week (as I did this one) I don't read e-mails that come with the title "Hi" or "News". And please direct your loggings to the right place: DDXD-West for those living west of the Eastern time zone, and IDXD for non-US/Canadian stations.

And to those who read the column regularly without contributing ... why not make this the year that you start sending in your loggings to DX News? Let's break all the records in '97-'98!

Good to meet so many of our contributors at New Castle. Sorry I couldn't stay longer than I did, but it was a pleasure to see you all there!

- 830 HAR PA Sevier - 8/29 0920 - ID with continuous loop "KPD 8-4-zero, Willow Grove" first heard at this time, located at PA Turnpike's Willow Grove interchange. On 9/21 1620, heard continuous loop "This is KPD 8-4-zero Lansdale" mixing with Willow Grove, ultimately located at the Lansdale interchange of the PA Turnpike Northeast Extension. Then "KPD 8-4-0 Valley Forge" mixing with the other two 9/22 1840, also located at PA Turnpike interchange. This appears to be the beginning of the frequently-

rumored transmitter system along the PA Turnpike, similar to what New Jersey has. My location is almost exactly in the center of the triangle between these three transmitters, and one of them seems about 300 Hz off channel. (RJE-PA)

Monitored again 9/23 1800, same format, with DJ saying "Mejor de las noticias, mejor de los deportes, mejor de la música," sounded a little like "Radio Umpato" but I may be way off on that. (RH-NJ)

INFORMATION FOR THOSE SUBMITTING REPORTS TO INTERNATIONAL DX DIGEST

IDXD is a well-supported column in the National Radio Club's *DX News*, sometimes running many pages. This is a good sign, for all who are interested in international DX, and it is mutually beneficial to have more people looking for similar targets to enhance one another's efforts. This also means that IDXD is becoming a HUGE editing enterprise. Fortunately, most reports are sent via e-mail, which means I only have to type a small portion of the total text. Even so, I spend many hours at a time getting the column into shape.

So I would like to propose some "guidelines" for IDXD. These are not "rules", because then it would take me additional time to enforce the rules. I much prefer that reporters edit their own copy before it gets to me!

1. Have you done your very best to follow the format that is used in IDXD? **FREQ** [3 spaces] **COUNTRY** Call/Slogan, City, JUN 7 0234 - Text. [Last name-ST/PR/CT] Those who do not follow this format (there are quite a few!) add many hours to my work. Some reports need to be completely rewritten.

Note: the three spaces are essential for Pauls' formatting.

Note: I use this curious dating format to avoid confusion among those who might not know if 6/7 is June 7 or July 6.

2. Have you avoided abbreviations?

English is not the first language of many of our readers. Also, many English speakers are not fluent in "amateur-ese". Most people's eyes glaze over after lengthy lists of: "... after TC at BoH, M & W ancrs w/nx, wx & sx, folo by relg and clas, QRM de RHC, SAH from unID Spain, SIO 332 ...".

3. Are the details you are reporting going to help someone else find and identify the same station? Slogans, parallel frequencies, ads, schedule, s/off and s/on, program themes are helpful. Propagational information can be helpful too. Song titles are usually less helpful. "Man and woman talking" doesn't really help someone else. Tell us the language if different than expected. No need to write "SS talk" in describing a Cuban station, try "talk" instead. However, "EE talk" from a Cuban station would be a detail worth reporting. Additional details concerning new or unusual stations are very appreciated.
4. Has this station been reported often by you or others?
Cumbre DX and NASWA come to mind as examples of editors who will not duplicate loggings from the previous issue. I do not wish to do this kind of editing, but I hope that reporters will consider this a personal guideline in submitting loggings. During the weekly schedule, since many new reports are sent to me before the previous issue reaches you, it is not always possible to compare your loggings with others. But if you compare your new logs with your own previous logs, and weed out the repeats, it would be very helpful.
5. Is this logging, no matter how routine it may appear compared to others, a new one for you? Send it in! Always add "Tentative" or "Presumed" if you did not hear an ID.
6. Is there a way that you could avoid reporting a long list of your routine loggings by adding a summary paragraph to your more exotic loggings? I'm always happy to add your general comments at the end of the loggings section. You can comment on propagation, equipment, listening sites.
7. Have you included listening site, equipment/antenna information with each report? It takes time if I have to look this up in a previous issue.
8. Do you wish to share your e-mail address? I will include it unless within each submission you tell me NOT to.
9. Do these guidelines seem rigid and legalistic, removing fun and spontaneity from the hobby? I hope not!

Network listings for team sports stations

The CBS Radio NFL station list has not yet been updated on the web (<http://www.cbsradio.com/NFL/>), but the announcer list has. Here are the announcers for the 97/98 season: Hank Stram "NFL Preview" Jim Hunter host of pre/post game and "NFL Preview" Howard David play-by-play Monday evening Matt Millen analyst Monday evening Brad Sham play-by-play John Dockery analyst John Rooney play-by-play Pat Hayden analyst

Remember that CBS Radio Sports will carry the Major League post-season games. The network consist for baseball will vary from the network consist for NFL football, and both lists will vary from the list of stations that regularly broadcast CBS Radio News on the hour.

Chet Copeland sent me an article from the *Washington Post* that lists URLs for the MLB radio flagship stations. Since I received it near the end of the season, I will include the URLs next season.

I have one list of National Hockey League flagship stations, but I do not trust the source 100%. I will wait for a second list before I publish any NHL information. I do not have any announcer information. And I have one flagship station for the IHL. I left it at work, so I will include it in a future column.

Please send me any NFL and NHL (and other professional hockey leagues) information that you have. And remember that I do not handle college sports networks (for various reasons); Rick Dau gets those lists (send them to him at 2718 Wayne Ave., Apt. 7 - Iowa City, IA 52240-2533).

This DX'er still DX'es a little but nothing like the old days. I'm 56 and still single and now do a little TV DX in the summer. Travel is more of an interest now. My views of the 80% loss of skywave is due mainly to the stations placing a flat-top on their antennas, deteriorating ground systems of which many have never been replaced, and the jet aircraft depleting the ozone in the upper atmosphere. On an earlier trip to WA and BC, only a couple of stations could be heard on Western Vancouver Island - Seattle, Vancouver, and Victoria and Nanaimo. KFAB-1110, my hometown station, was never heard; they boomed in at night 35 years ago. KOA-850 Denver was the easternmost station heard on my Magnavox AE-3805 or the car radio. Seems like stations don't care to get out more than 100 miles, and most don't. KGO-810 and KXBT-1630 were best from CA. Looking at the Night Pattern Book, most locals cover Vancouver Island, but you just can't hear them. For those interested, watch the FCC news for allocations of the new TV channels for HD-TV. Nearly all stations will change channels around the year 2007. 73's

Remember me? I used to report in to you when you put together DX Digest East! Apart from being an avid DX'er and former broadcaster, I am also an aircheck collector. I have found that most DX'ers either find airchecks interesting or collect them themselves. I have thousands of airchecks from all over the world, all formats. I also have hundreds of vintage airchecks from the '50's, '60's, and '70's, plus many "historical" documentaries on stations like KJR, WNBC, Radio Luxembourg, etc. I read your recent Muse, and I couldn't believe the owner chased you with a gun when you went on the property. It must have made you think. It sounds like an old program director of mine. (I worked at CING, CKMW, CFGM, and CKO).

Stan Morss - R2 - Boxford, MA 01921

A real short season for me - minimal DX - both Dallas-Ft. Worth TIS heard, 1640 and 1680, with 1640 stronger one of the two. Best veries - WROR and WPTS because of their short-term use. Ben Dangerfield's memories of Pittsburgh radio brings back the memories of the Sunday AM DX'ing at 6 from stations across the country during the one-hour silent period on 1490. While 4 Pittsburgh stations have their original calls, 2 had other calls in their history. WJAS went to WAMP, WJAS again, then WKPQ, WKTQ, and back to WJAS. All changes verified here. WWSW went to WTKN for awhile and WCAE was WRYT. Boston's 1150 (WNFT at present) went through more changes this past season from Ethnic to Kids and now repeating WKLB-FM's c&w. In the past they've had 8 calls and more formats from c&w to business - even with WNRB for call changes, 8 each. Bought a Drake R8A but not thrilled with it - it joins the Worcester under the bed after a short trial. Hope nothing happens to the HQ 180A.

Jeff Ross - 7 Timberwick Dr. - Flemington, NJ 08822

It's hard to believe another season has gone by (of course, when my daughter reminds me how much hair I'm losing it starts to get much more believable!). After a gap of roughly 30 years, it's great to be back in touch with Bill Alisuskas. He and I corresponded for quite some time during the sixties but we lost contact around 1966. Thanks are in order for Charlie Gaharan for sending the HQ-180 manual, and also to John Sheehy and John Hanz for responding to my request for same. The information has been invaluable in allowing me to restore the old "specimen" which I acquire some time ago. The performance is so impressive that I've started looking for an HQ-180A but so far haven't had any luck (I can now understand why people are holding on to them). Looking for a low-cost way to improve the ability to dig stations out of the "mess" when listening with speakers instead of headphones led me to try a simple experiment. I place two speakers (connected in parallel) an equal distance from either side of the receiver so that when listening my head was on the centerline between the speakers. This caused the sound to emanate from a point well behind the receiver and also yielded a soundstage extending slightly wider than the spacing between the speakers. When I was listening to multiple stations on a given frequency, the ability to separate them was definitely easier than with only one speaker. Putting a switch in the line to one

speaker allows me to turn one off for comparison purposes. I've acquired a pair of Radio Shack Nova 56 headphones. They sound really great and provide plenty of volume, even when used with the R8. The past year wasn't too fruitful in terms of new DX, but I did manage to snag KXBT-1630. Hopefully, conditions will heat up a bit as we get further into the season. That's all for now. 73.

Don Trelford - P. O. Box 120 - St. Ann's Bay - Jamaica, WI

A couple of interesting items. First, KLAS-FM's call-in talk show connect with WAXS-1190 in Davie, FL twice per week. Last week a caller in Florida wanted to know why WAVS faded out every night (5000/250) and the reason was explained to him Then, lo and behold, a familiar caller voice was on, and I could tell that it was Mike Lantz, and he also explained the situation and said that he was a member of the National Radio Club. As is his habit he asked the Jamaican host what kind of music they played. Some member in the area of Miami or Fred Vobbe should tell Mike I heard him, and he is now a "radio star". Still in Florida, a report to WBZT-1290 (after many unanswered reports), I hit the jackpot with a WBZT T-shirt, bumper stickers, fridge magnet stick-ons. Making up for unanswered reports, or a new policy? And from Jamaica, it appears the merger of RJR and JBC will take place, but nothing about what will happen to their AM (and FM) stations that each are serving the same area. Essentially, both stations operate out of Kingston, and the other stations around the country are relays. QSL from KXBT-1630, and the writer says she spent several years in Jamaica as a young girl and knew my area well. Looks like a good year for DX, but have yet to get a CPC test. More later.

Robert C. Pote - 766 Ashford Lane - Greenwood, IN 46143

Greetings from Greenwood, fellow DX'ers; it's been awhile since I last Mused so I thought I'd write and let everyone know what I've been doing. The DX season has been busy here at my QTH. I have been trying to DX in the early morning before going to work; I've been putting in 12-hour workdays so most of my DX'ing is done when I can squeeze it in. I went on a mini-DXpedition in August. Fellow NRC member Mark Burns invited me out to his inlaws' farm at Poland, IN where he has a beverage antenna setup. I brought along the Drake R8A and managed to hear thirteen new stations from there. My best catches so far this season have been KKOB-770 and KFBK-1530. Hearing KFBK was a challenge as WSAI is virtually unnullable here. However, they do get quite fadey in the early morning. One early morning I was up at 3:00 am checking the clear channels to see if any were off when I went to 1530 and could hear another station under WSAI. KFBK faded up briefly twice, and I was able to get a good ID before they faded away for good. I've sent out quite a few tapes so far that I've made of the DX tests. Haven't had any confirmations yet from the participating stations. I still have out about 20 reports that I haven't heard from yet. I did receive a nice verie from KVOO the other day. They sent me a nice folder with the history of KVOO and also mentioned Bob Wills and Texas Playboys started there. Also some neat maps and other goodies. The postage alone was \$1.86. I had to send them a follow-up letter, but it was worth it. I really enjoyed the WBEE station profile by Tony Fitzherbert. Having grown up in Markham, IL, I lived about 2 miles west of their transmitter site near the Illinois toll road and 159th St. When I was in high school back in '57 I remember building a crystal set in the electrical shop in school and then taking it home and trying it out. Needless to say they came in like gangbusters. Trouble is I wasn't into rhythm and blues so I would wait until they signed off in the evening and listen to WLS or WCFL, the only other two stations that I could hear. I was saddened to hear WJJD leaving the air. I remember them as being one of the first stations in Chicago to play rock and roll back about 1955 or '56. I also remember listenign to the 560 club with Milo Hamilton on WIND. He sure played some great hits on his program. It would make for good reading to know what became of all those great deejays. *Popular Communications* is running a neat series on restoring old radios, a subject that is dear to me. At one time I had 75 old radios, but space limitations dictated their disposal. I have 12 left and fire them up on occasion, but they don't compare to my Drake and Quantum Loop when it comes to DX'ing. I also belong to the "Indiana Historical Radio Society". I've been giving out some of my old *DX News* in the hopes of gaining some new members for ythe NRC. Well, I'd better close for now as this is already too long.

Eddy Strickland - Rt 2, Box 183 - Warrenton, NC 27589

I'm still using my old Radio Shack DX-150A, Knight-kit Ranger, and a new YB 400 and spending time trying to ID several TIS's. Recently spent time talking to MJF rep on the phone describing my wish list. One item which may be of interest to other members would be an accurately-calibrated, analog readout, medium-wave (500-1750 kc) receiver with externally-mounted rotatable ferrite antenna, selective filtering, BFO?, battery-powered (with jack for wall-mounted power supply). Didn't Heath have a similar radio years ago? Anyway, MFJ rep said it sounded like a good idea, and if enough requests came in, this may be a reality. What do you

think? Give 'em a call or send a letter. I'm still repairing old tube-type radios for friends, etc., and experimenting with xtal sets. Have a good season; 73's to all.

Dick Truax - P. O. Box 39451 - Louisville, KY 40233-9451

Greetings from the Derby City area after a long absence. Semi-local WOCC-1550 IN began local programming with oldies and back up to full power; good candidate for a TEST soon. Several "new" loggings by DX'ing second harmonics: WXRQ-2920 (1460) TN is as early as 3:30 pm; WHAR-2680 (1230) KY nightly and so far unID on 2560 (1280) w/many mentions of Carolina football, perhaps Anderson? None of these stations ever heard on their fundamental channel. Give it a try sometime. Lastly, I have had a brief opportunity to compare my Superadio I with a friend's Superadio III, and I must say I can NOT agree with the recent article comparing the two. At least in my brief comparison, whatever could be heard in very weak daytime regulars with the I compares with the number I could hear equally as well with the III, and the larger speaker of the III actually enhanced the quality of the audio a bit. But the wide/narrow switch IS totally useless unless you want to listen to locals only. That's about it - more as it happens.

Ernest Cooper - 5 Anthony Street - Provincetown, MA 02657-1703

I've recently purchased an A-1 condition Hammarlund HQ-180A from Ray Arruda. I've gotten in a bit of tuning lately, but only two veries have found their way out here: WLUX-540-NY and KXBT-1630-CA, for California verie #79. I've been hearing a station on the bible Broadcasting Network on 830 u/WCRN-MA, and also WCCO still makes it out here from time to time in the wee hours. I haven't gotten an ID on the BBN station, but I believe 'tis WETR-NC - I'll just keep trying for an ID. On 1/10 I noticed WDFN-1130-MI about even with WBBR at 4:43 pm. They often do well here after WBBR has gone directional, and before WDFN has. I got a logging and report off to WQTM-540-FL, logged on 1/24 and 1/27 around 1 am. They're on the 1-on-1 sports network. One way to log new stations when you have 4,505 veries is to be on hand when a new station comes on the air. That's happened here, giving Eastern Massachusetts two more locals (just what we need, eh?). On Thursday, February 6, WJLT-1060 began RS at 9:45 am, located in Framingham, at 100 Mount Waite Avenue. The calls stand for (alternately) "Jay Light" and "Jesus is the Light". That gives us five area religious stations. I understand that religious stations get about 2% of the listening audience, so - divide 2% by 5 and you can figure each has a very small audience! The other one arrived on Sunday, February 9, with no fanfare - just relaying the "Talk-America Network", a seemingly right-wing outfit, and a solicitor of audience funds. their ID is for the whole network of about 20 stations - and their own ID is the last of the bunch, WRCT, Acton (I think). They give the call letters and city of license of the stations on the chain, but not the frequencies. Some of the stations are WAWK, WDIS, KSFA, KSYD-FM, WAFG, WPEP, WHKY, KLID, KNOX, WSYB, WWSJ, so apparently all these stations are automated with no live person to give an ID. Forward-March!

This is my first Musing and the first DX season that I really got hooked on MW DX. I picked up a Quantum Loop, and it has made DX'ing very interesting. I have an idea to help increase everybody's QSL returns. As you know, many stations have little or no staff ... not like the old days! Many times our reports are just trashed. I thought I'd steal an idea from my fellow ham operators. That would be the "QSL Manager". Here's the plan. NRC members could approach their local radio stations and volunteer to answer the reception reports. The station could supply the letter heads, QSL cards, and postage. We could supply the manpower to answer the reports. The ham operators have been doing this for many years. This is how rare DX operators answer the 1000's of QSL cards they receive. Maybe a form letter on an NRC letterhead could be produced explaining the QSL manager plan. These could be sent to our local stations. I think that some stations may go along with this. Any ideas from the rest of you guys? Would this work, and are the members interested in giving this a try? 73's.
