CPC Test Calendar				
KSTN	CA	1420	Jan. 1	0300-??

From the Publisher ... This issue is so tight you should be hearing it squeak, right here between your fingers! Lotsa great DX reported; thanks, all.

The Board has so far received three firm bids for convention sites for '00; but there's still time for you to forward a bid to Chairman Ken Chatterton (see list of suggestions in last week's DXN for submitting a bid). So I guess you can roll up your sleeping bags and pack your tents; and Gary Houdek can let the cattle back into the pasture, hi! No "sleeping-bag" convention this time.

CPC ... Blaine Thompson is sending out CPC mailings (thanks to contributions of stamps and test suggestions) and should have good news very soon.

DX GTG ... The annual "Lower Deck" Thanksgiving gathering at the Arrudas is fast approaching: Ray and Arlene have set it at noon, Saturday, November 20 (do I have to tell you that it's at 47 Burt Street, Acushnet?).

Contest ... Luke Steele has been hard at work compiling the results of the first contest: "Many thanks to all of you who sent in your entries. The current standings are below, but don't let that discourage you from entering the next contest, even if you missed out on the first one. Also, due to several suggestions, I am extending the time period of the contest to two weeks this time around.

"In alphabetical order by last name, here are the standings:

Nancy Johnson Billings, MT 21 points
Mike Sanburn Bellflower, CA 53 points
John Wilkins Wheat Ridge, CO 67 points

"For the next contest, try to get as many stations as you can with "W" calls if you're west of the Rockies, and "K" calls if you're east of the Rockies. This one will go for two weeks, and the scoring will remain the same: one point for clear channels, three points for each station on a regional channel, and five points for graveyard stations.

"The contest will start November 8 and will run for two weeks, until November 22. The deadline for entries is November 29, a week from the end of

the contest. You can now e-mail entires to <<midwesternairchecks@hotmail.com>>, or use snail mail @ 437902 E 278 Rd - Vinita, OK 74301-7633. Good luck!"

Slogans ... Shawn Axelrod has set up a web page dedicated to "listing of slogans used by AM band radio stations that use a slogan instead of their call signs." He has listed the stations in frequency order and invites all corrections and additions. I've sent in a couple of Topeka stations' slogans, and you can send in your locals by visiting the site at <<http://www.angelfire.com/mb/slogans/index.html>>.

Reflectors... From Saul Chernos, who has recently turned over the moderator's job to Rick Lewis: "AM, FM and TV DXers are invited to check out an e-mail list-serve devoted to DXing those three bands. The main intent of the list is to issue DX alerts and warnings and to discuss DX-related information pertaining to those mainstream broadcast bands (as opposed to shortwave and ham bands). To check us out on the Web, and to subscribe, visit: <<http://www.qth.net/archive/amfmtvdx/amfmtvdx.html.>> You will see postings, and within the site there is information on how to subscribe."

And ... don't forget NRC's own reflector, ably moderated by Fred Vobbe and reachable by sending e-mail to <<AM@NRCDXAS.ORG>>

DX Time Machine

From the pages of DX News:

50 years ago ... from the November 5, 1949 DXN:
Per M/Sgt Fred Anderson, Ft. Lewis, WA: KNBC-680 would give a \$100 U. S. Savings Bond to the most distant listener to their California Commentary program, aired at 7:30 pm, EST (he rushed them a nice report).

25 years ago ... from the November 11, 1974 DXN:
Mark Connelly, Waltham, MA reported taking a DX'ing and photography excursion to coastal NJ and LI, hearing the likes of Cuba, Surinam, Colombia, Dominican Republic, Mexico, and many domestics ... the NRC membership included 586 "dial twirlers", ranging from Chris Abercrombie to Neil Zank, both in Lincoln, NE!

10 years ago ... from the November 6, 1989 DXN:
Mark Connelly reported hearing Duba-1521, Saudi Arabia, from a seaside site "blowing away 1520 domestics long before sunset" on 10/5 ... Jim Renfrew inaugurated the first "Target DX" column.

MEDIUM WAVE RAMBLINGS

- o **Doug Smith** jumps onto the soapbox and says: "Visited Chattanooga on the 23rd for their annual hamfest. Nothing out of the ordinary noted (except for the extraordinary scenery!) except for the exquisitely horrible audio quality of WLMR-1450. This was by FAR the WORST-sounding radio station I've ever heard. Not even the un-engineered Mexican border stations of the early 1980s can come anywhere near the horrible signal WLMR's broadcasting - I have to wonder if an engineer has ever visited this facility?!"
- o A decent turnout for this annual transition period (from summer to fall) of DX activity. Of course it's colder up north already, but we in the south will be catching up soon. Keep those great reports coming. Remember . . . share those loggings and tips for others to use!

STATION NEWS & NOTES

1180	KOIL	NE Bellevue - 10/25 2358 - Something about Trick or Treat - Halloween in Nebraska can't be beat. Legal ID by brat at 0000: KOIL Bellevue - Omaha, then more Radio Disney. So, the KOIL calls are still here but the format has changed, ex-SPT. (JW-CO)
1310	WDOD	TN Chattanooga - 10/23 ~1300 - Noted // with same network news as 1370 WDEF, probably CBS but not sure. Presumably applies only to news, but didn't stay in Chattanooga long enough to know for sure. (DS-TN)
1320	WMSR	TN Manchester - 10/22 1240 - Noted format change to classic rock. (DS-TN)
1450	WLMR	TN Chattanooga - 10/23 ~1300 - Noted with southern gospel (white) music, with VERY poor audio quality . . . worse than a dial-up telephone line. (DS-TN)
1620	KAZP	NE Bellevue - 10/26 0100 - Out of ESPN programming with clear ID as ESPN 1620 KAZP Bellevue, with the call and city said extremely fast. I see others have reported KOIL here. If these logs (or any logs) were based on assumptions, they should be marked as (p)resumed or (t)entative when an actual ID is not heard. KOIL is NOT on 1620, at least not as of this date. (JW-CO) [All reporters . . . please note these words of wisdom - Ed.] (And yet I have a "KOIL" "legal" ID on tape from a few weeks ago! -pls)

UNIDs and UNID HELP

- 910 UNID ?? - 10/21 0300 - *Music of your life*, AM 910 KUCO. (DS-TN)
 940 UNID ?? - 10/21 0208 - Someone fighting with KXTK/KIOA with Art Bell and many *Newstalk 940* slogans, but no local material. (DS-TN)
 1440 UNID ?? - 10/21 0223 - With CNN Headline News and ID as *Newsradio 1440*. KEYS? (DS-TN)

STRANGE BUT TRUE

- 1470 "KCFL" CO *Arvada?* - 10/21 0200 - Usual Oldies format, *Super CFL* jingle. Previous DF efforts showed this guy (aka "KTLN") to be in Arvada. Wish he'd come out of his closet. Apparently he's not interested in audience feedback. (JW-CO)

TIS & OTHER STUFF

- 1630 TIS/HAR CA Los Angeles - 10/22 0530 - Operated by Los Angeles Convention Center. Announcement mentions . . . *operated by the City of Los Angeles* . . . coming events, etc. Very weak . . . deep fades. (GJ-CA)
 1670 WRD334 TX *Watauga* - 10/23 - Mystery solved! Thanks to a tip from Patrick Griffith who suggested this might be my pest unID on the frequency, I took a drive to Watauga and . . . voila! There it is, but with this call, not as I originally heard. The announcement says: *This is a test broadcast of WRD334, Watauga, Texas*. The announcer drops his voice on the last two words, which made it undistinguishable. At five miles, they must be operating a very low power, as Patrick suggested. Update: Have talked to the folks responsible, and they are running 1.5 watts (10 watts eventually) at 10 meters. QSLs should be sent to City of Watauga Public Safety, 7101 Whitley Rd, Watauga, TX 76148, Attn: Tom Blair. [Ed.-TX]

 1070 KNX CA Los Angeles - 10/19 0212 - Good at first, faded badly . . . *KNX Newstime*. (DS-TN)
 1100 KFNX AZ Cave Creek - 10/24 2355 - Telephone call-in program with female announcer

STATION NEWS

- 850 WRMR OH Cleveland - 10/22 1658-1703 - ID on their new antenna pattern, coming in very nicely in Fort Wayne 200 miles to the west. (BT-IN)
 1090 WMUS MI Muskegon - 10/23 - Has been simulcasting the ABC Stardust NOS format with WMHG-1600 since 10/19 at least. Not sure why, but this is the first time since about 1960 that WMUS-1090 has *not* simulcast WMUS-FM 106.9. Awkward slogan: "*Magic 1600 on AM 1090*." (PLB-MI)
 1580 WSMO? NC Camp Lejeune - Noted an ad in local paper with reference to a "*WSMO 1580 AM*" and "*Classic Country Radio*" as co-sponsor of a local event. Ex-WWJV? Not heard if on air; usually I'm out of the area from a bit before sunrise to

after sunset. I'll follow up when on air and ID confirmed. Nothing noted in FCC database. (MH-NC)

1600 WMHG MI Muskegon - 10/19 - Back on the air after a 10-day hiatus, simulcasting NOS with WMUS-1090, see above. (PLB-MI)

UNID AND UNID HELP

590 UNID ——— 10/21 1825 - "Radio America" into political talk show. (WM-MD)

610 CKTB ON St. Catharines - Re: SK-PA in No. 30 - CKTB does, to the best of my knowledge, carry Buffalo Bills football, and I believe also Buffalo Sabres hockey. (EC-ON)

650 UNID ——— 10/23 0745 - SS format, SS singing and music under WSM, very weak. (RCP-IN) [Likely Colombia. - DY]

730 UNID ——— 10/25 0700 - News, 2 Alabama items, then call sounding like "WBDA," over, under WLIL. I thought it was WUMP, but not so, unless a call change or a new parallel station. (RJE*PA)

740 UNID ——— 10/20 0650 - With BBD music, over, under REL from WVCH, again on 10/25. Is this WMBG or WMBL? Is WMBL even on the air after Floyd? (RJE*PA) [Or WGSM-NY // WHLI-1100? - DY]

760 UNID ——— 10/21 1900-2000 - Nice SS music, local-like signal but couldn't get an ID or location, slogan sounded like "CFF" or "CXX." Had to leave the radio, and signal was gone at 2015. (JEK-MD)

770 UNID ——— 10/25 1946-1959 - Good signal, often atop RCN-Colombia and WABC with Clark Howard call-in show, until suddenly gone mid-sentence at 1959. Lots of national 800 and dot.com ads during breaks. The talk show originates at WSB, and has affiliates around the country, but the web site doesn't give individual stations. Looped aimed west/southwest, in strongly auroral conditions. Too early for KKOB (Ragnar confirms this). KATL? WVNN? WWCN (Bob Foxworth's suggestion)? (JR-NY)

830 UNID ——— 10/22 1907-1932 - Fair in SS, U.S. Army spot, "... *todo deportel[s] ... fútbol primera.*" WFNO-LA? QRM from WCCO, Cuban Reloj. (HF*MI)

UNID ——— 10/24 0635-0710 - Very good, I think all one station with a variety of SS music except Mussorgsky's "Night on Bald Mountain," promo for "The Fox" or "The Fog," "We are your house of music, step by step, song by song" and "Radio Pocono(?)." (HF*MI)

960 UNID ——— 10/20 1910-2010 - One on One Sports. I suspect this is WILT-PA, which canceled plans to go with ESPN. WKQV is no longer One on One. (SK-PA)

990 WNTY CT Southington - Running SS programming, and apparently at 2,500 watts full time. Ads have frequent mentions of Hartford, Waterbury, and New Britain. This may be several recent unID's here. (KP-CT)

1010 UNID NC ——— 10/14 1937-1950 - Probably WSPC with Carolina sports call-in show, ads for Charlotte businesses. (JF-ON)

1210 UNID ——— 10/18 2015 - Song "You Can't Change That," under WPHT's baseball game. (WM-MD)

1330 UNID ——— 10/20 1840 - Don and Mike Show; a 2-year-old network list has KFHK and KVOL-LA. (SK-PA)

1530 UNID ——— 10/22 1925 - Gospel music station, slogan "The best in southern gospel," very good briefly in and over usual WSAI. I listened until sign-off, and I think I heard a country version of "My Country 'Tis of Thee" before sign-off. (RCP-IN) [Maybe WRPM-MS as below? - DY]

1540 UNID ——— 10/18 2235, 10/20 2209 - Eastern European (Slavic) man, Slavic folk vocals on the first day, apparently Greek programming on the second. No trace on cursory checks near sunrise. During the Greek segment, there was one "FM Stereo" reference. Fair-good on occasional peaks, with KXEL-LA "The Power Source, 1540 KXEL" often dominating. (TLK*KY) [CHIN-ON? - DY]

1560 UNID ——— 10/23 2037 - Poor, "Sooner Football 99" spot carrying Oklahoma vs. Texas A&M football, over and under presumed WQEW. (HF*MI) [KWCO, per Oklahoma Sooners web site. - DY]

1600 UNID ——— 10/18 2220 - Peaking often to fair level, and seeming to have some groundwave characteristics (as in semi-local) with non-stop, emphatic Hai-

tian Kreyol preacher. Looped about N/S, and I'm reasonably certain it wasn't the West Palm Beach area station up here. Nothing in any foreign language (or particularly strong in English) noted daytime. Any ideas? (TLK*KY)

LOGGINGS

530 CIAO ON Brampton - 10/17 1755-1801 - Fair, SS before and after ID break, "You are listening to AM 5-30, Multi-Cultural Radio, CIAO AM 5-30," later at 2316-0003 poor, 2 men in SS with religious discussion, EE ad 2349 for Protein Power Plan "all across Canada," then back into SS. Mainly under R. Visión Cristiana. (HF-MI)

560 WGAI NC Elizabeth City - 10/25 2259 - Full ID and sports slogan during program break, very strong. (JR-NY)

600 WSJS NC Winston-Salem - 10/25 2035 - Carolina Panthers call-in show, interviewing a Panther in a local sports bar and announcing WBT's phone number. (JR-NY)

610 WIOD FL Miami - 10/24 0530 - Good; traffic and weather together, news headlines, "South Florida's home ... 24-hour source of news, traffic, and weather, News Radio 610 WIOD," with local WGIR nulled. (BC-NH)

INTERNET UPDATES

News from Scott Fybus’s “Northeast Radio Watch,” used by permission: WGHQ-NY-920 has

switched from ABC Stardust NOS to syndicated talk, adding programs like G. Gordon Liddy, Bob Grant, and Tom Leykis. CIQC-PQ-940 will be moving here from 600 on the morning of November 24, according to the *Montreal Gazette*. Jim Duff will lose his morning show, as the all-news format and "940 News" moniker take over. Will CKVL move to 690 on the same day? WWLE-NY-1170 is being purchased by Charles Stewart, Sr., who publishes the Hudson Valley's only black newspaper, and is expected to switch from C&W (// WRWD-107.3) to urban. WGNV-NY-1220 is dropping standards for local talk mornings, and AP All News the rest of the day. WTTT-MA-1430 has been leasing part of its day to public radio WFRC-88.5 to carry additional news and talk programming; that service is now going 24h NSP under new calls "WPNI" (known on-air as 1430 PNI). WJJL-NY-1440 has been fighting with the city of Niagara Falls since a surprise health inspection last year (following on-air criticism of the fire department) prompted Niagara Falls to order WJJL's Main Street building condemned. They will build a new transmitter site in West Seneca, some 30 miles south, beaming their signal north across Buffalo to the city of license (as WHLD-1270 is now working on doing as well). WJJL remains eclectic OLD, TLK, and leased-time ETH.

Do you ever flip through an entire year's worth of *DX News*, trying to find clues for something you've heard? See if this is your experience: invariably the frequency I'm looking for almost never appears, almost as if no one listens on that frequency at all! The other invariable experience happens when I'm looking for something I definitely saw in *DX News* some time before, but I can't find it no matter how hard I try. Crop circles, UFO's ... and now *DX News*, the mysteries that keep us on our toes!

In a previous IDXD I mentioned enjoying Jean Shepherd's program on WOR when I was a teenager. Shep died a few weeks ago at the age of 78. On October 27th WOR had a special tribute program, but I could hear almost nothing due to interference from CJRN and Radio Rebelde. I did manage to hear Shep's signature tune through all the noise, but that was about it. It was also available in Real Audio over the web, but I don't have that capacity yet. He hadn't been on the air for many years, but rebroadcasts of old programs can be heard on Friday afternoons over WBCQ shortwave on 7415 kHz.

- 920.15 COLOMBIA Emisora Fuentes, HJAA, Cartagena, OCT 20 0106 - man with SS Colombian news; occasionally splittable from CJCH/WHJJ. [Connelly*R-MA]

- 920.2 UNID, OCT 23 0137-0139 - Poor; Heard words "Taino" & "Campeche"; up briefly & gone, Cuba? [Frodge-DXP] (More likely the Colombian which has been off-frequency here for years - Jim)
- 940 MEXICO XEQ, Mexico City, OCT 23 0957 - end of song, "Q" (coo) mention, then woman said "en la República Mexicana"; over Reloj Cuban. [Connelly*B-MA] OCT 24 0815 - Excellent; ad string with Distrito Federal mentions, "Cadena Q, verde y oro" ID, Mexican music, over R.Reloj-Cuba. [Conti-NH]

- 940 VENEZUELA R.Punto Fijo, Punto Fijo OCT 22 2350 - Fair; long ad string, "La emisora música de la fin de semana es por Radio Punto Fijo," over WIPR-Puerto Rico and R.Reloj-Cuba. [Conti-NH]

- 1529.54 unID OCT 16 0303 - het, bits of audio, but the identity remains elusive. I haven't seen it ID'ed elsewhere. Uruguay-1529.6 was heard in Newfoundland, but this is probably something else. [Connelly*H-MA]

- 1570 DOMINICAN REPUBLIC HIA, Santo Domingo (t), OCT 20 0127 - almost certainly R. Amanecer Internacional with religious music and SS talk; most of the domestic activity was knocked out by the cardioid array's null to the west. [Connelly*R-MA] OCT 23 2302 - SS religion just under low-power groundwave semi-local WNSH during aurora. [Connelly*B-MA]
- 1580 unID OCT 23 2250 - probably HJQZ Barranquilla (heard before); fast SS talk eventually covered by Caribbean culture program from WSRF-Florida. [Connelly*B-MA]
- 1610 ANGUIILLA Caribbean Beacon, The Valley, OCT 19 2322 - preacher asked for donations and said he'd been on the air "for 25 years with no hypocry and no subterfuge"; briefly atop TIS mess. [Connelly*R-MA]

TANTALIZING TALES FROM TERRE-NEUE

Just back from "BeachBeverage Newfoundland" and here a quick summary of the best during the week from 10/17-10/24. Conditions were usually auroral.

- 530 FALKLAND ISLANDS - Yes this now has been heard in North America!! Some nights they'd occasionally be way behind Turks and once and a while clear // audio to BBCWS 6175 would be heard. Phasing helped a bit at times.
- 531,873, 972,1215 BOTSWANA here.. 972 is easy .. all in //
- 1485 ASCENSION ISLAND - as always not to hard to here as the Bev's toward Brazil take out Spain pretty well... unfortunately. try as we did we couldn't here St.Helena 1548 // 11092.5' s DX special. The SW sounded like a local. Jean does have 1548 Qsled however in similar auroral conditions which killed Britain/Kuwait
- 1206 MOZAMBIQUE - we have a nice tape of ID Emisora Provincial do Inhambane... also an unlisted Mozambique stn on 963 is taped with an ID where we just can't copy the province name.
- 1529.6 URUGUAY - we were happy to log a nice R.Independencia ID from this 250 watter. Many

stronger Argentines, Uruguayans and Paraguayans were heard as well.

Off course the entire dial was full of Brazilians at sunset as always on our 1 KM long Brazil Bev. (As an example. Forteleza on 930 o/u local (100 km north) CJYQ in St. John's). Many of these stations are dominant all night. Due to auroral conditions nothing much further east than UAE 1476 // 13675 was heard on the 450 meter TA bev. Our African receptions were helped by a new 390 meter Bev just to the east of our long Brazil Bev. This wire (due to length has a wider beam than the Brazil Bev) and thus received some Africans better while displaying a very useful null of Euro QRM in the range on 800-1000. Thus 846 from South Africa was listenable most of the time with no QRM from Rome. The uncrowded dial combined with great receivers like the AR7030+ and the R8A coupled to good beach Bev's provides DX conditions that are unobtainable here in the USA. I heard some great stuff from the Maine coast from 1981-1983.. but it can't compare to Newfoundland. [Neil Kazaross]

The DXpedition is over. Al Merriman had said his goodbyes on Saturday morning, and he started his long drive back to Virginia. Neil Kazaross and I packed up the shack and brought in the antennas in the fog and gentle drizzle of Sunday morning, 24 October. It was a welcome change from the 100 km/h wind and the sheets of rain that had pounded us the previous evening! I dropped Neil off at St. John's airport just after noon, Newfoundland Time. Conditions were auroral for the final two nights. In spite of having a fully functional European antenna, it was largely ignored since the action was from the south: Africa and South America. Again, I think we landed some good ones!

The process of assembling a complete report is now beginning. I have a lot of tapes to review, so modification of some of these logs is inevitable. Also, I have a lot of possible IDs to listen to again, and I have a number of more routine catches to include. I should stress that the logs in these five reports are only my own, and the final report should also contain material from the other three DXers, John Fisher, Al Merriman, and Neil Kazaross. The final report will be submitted for inclusion in the National Radio Club's *DX News*, and other clubs have expressed an interest in picking up this report, at least in part. Also, the final report will be available on a new web site, and it will include some Real Audio clips and I hope, some photos. I thank the guys who make the trip up here to share in the DX. I also wish to acknowledge the assistance of two virtual participants in this DXpedition. I am very grateful to Werner Funkenhauser and Mark Connelly, both veterans of previous Newfoundland DXpeditions, for propagation forecasts, for parallel DX sessions, for their general encouragement, and for posting these reports on their web sites. Here are the logs. As always, comments and corrections would be much appreciated! Dates/times are UTC, and the order is still chronological:

- 1206 MOZAMBIQUE EP do Inhambane 2055-2115 22 Oct - Good peaks, but deep fades, pop mx, PP news from 2100
- 873 BOTSWANA Gantsi 2155 22 Oct - Mainly chat // 972, but weaker than 972. WRTH lists this as a "future plan." Clearly, some future plans become reality.
- 1512 UNID 0111 23 Oct - Second Koran chanting under the massive Saudi signal (also Koran), then talk in AA. Ideas please!?
- 720 PARAGUAY R. Patai Puki 0830 23 Oct - Seemed to have just signed on, ID, weather, time checks
- 780 PARAGUAY R. Primero de Marzo 0838 23 Oct - Big fat juicy ID after ads
- 1484.90 MADEIRA? probably Funchal 2018 23 Oct - Pop/dance mx, canned anmts in PP with wicked reverb
- 909 NIGERIA? 2043 23 Oct - Man in African lang over VOA Botswana, possibly mentioned "Abuja"
- 963 UNID 2058 23 Oct - and other times...PP stn (Not Renascenca, which could also be heard) w/ phone chat and music. Mentioned "Emisora Povincial" but we can't decipher the place name (yet!) Mozambique station??
- 747 BURKINA FASO R. Burkina 2114 23 Oct - African lang, mx, under Spain, // SW
- 657 UNID 2133 23 Oct - Possibly South Africa? Religious sings in EE, of course it faded away just before 2200, so no ID!
- 1020 PARAGUAY R. Nanduti 0846 24 Oct - Good signal with news until Margarita sign-on at 0850
- 1150 ARGENTINA stn?? 0903 24 Oct - Lots of lively accordion mx, woman host but lost to domestic QRM before it IDed
- 690 ECUADOR HCJB1 0920 24 Oct - Soft-spoken man in indigenous language, mx // 3220, but rising QRM from R. Recuerdos. [Jean Burnell (excerpts from a longer report)]

I've just posted the fifth and final part of the interim report of the Newfoundland DXpedition, which ended on Sunday. This year's participants logged highly interesting and rare mediumwave DX, including Falklands, among many others. A single HTML file of all five parts is available on my pages at: <http://Home.InfoRamp.Net/~funk/newfviii.html>. For individual DOC and PDF files, other information, interesting Newfoundland links and past DXpedition reports, and parallel DX efforts go to

Mark Connelly's Newfoundland DXpedition Page at: <http://members.xoom.com/MarkWA1ION/nfdxpage.htm>

[Funkenhauser, ODXA Medium Wave Notebook]]

I'm looking for logging reports of longwave and medium wave stations (150 to 2500 kHz) made between 8 and 25 October 1999. Stations outside the reporter's country are preferred (whether of broadcast, utility, or 160-m amateur). Selected reports will be posted under the Parallel DX Efforts heading on the Newfoundland DXpedition Web Page: <<http://members.xoom.com/MarkWA1ION/nfdxpage.htm>>.

Already reports from Germany, Brazil, and the United States ... both coasts ... have been listed. Some additional European coverage as well as DX from the Caribbean area (including south Florida), the Middle East, South Africa, Japan, Hawaii, and the Australia / New Zealand regions would round out the Parallel DX Efforts section nicely. The National Radio Club book "Season of Dxpedititions" gives a very thorough treatment of the autumn 1996 period. Coverage includes the legendary DXpeditions of DX teams in Cappahayden (Newfoundland), Sheigra (Scotland), and Lemmenjoki (Finland) as well as many smaller, but still significant, parallel efforts from around the world. See "<http://nrcdxas.org/catalog/>" for more information. Though the loggings are 3 years old, some are still relevant. Always of value are the discussions of operating techniques used on successful DXpeditions. Jean Burnell, John Fisher, Neil Kazaross, and Al Merriman are still working on the final version of the official 1999 Newfoundland DXpedition report. It will be accessible from the Web page as soon as it becomes available. Meanwhile, sit back and enjoy reading the reports these guys have already provided. [Connelly]

CUBA QUERY

I note that some reporters are reporting calls and locations for stations such as 840 CMHW Santa Clara and 890 CMDZ Santiago which match entries in my log from nearly 30 years ago. I also note that at Elliott Broadcast Services (radiostation.com) the by-frequency listings include everything that the FCC records show in the entire Western Hemisphere. This shows different calls and locations for these two and many others. (e.g., 840, CMOB, Isla de Juventud; 890, CMHB, Camaguay)

Many reporters to IDXD seem now to be omitting the call letters, in favor of the station names or network names, perhaps in reaction to the always-volatility of Cuban calls, but that doesn't necessarily get away from the questions around actual transmitter location.

Am I missing something, or is there some other standard which is considered authoritative in the post-RFS Cuban list era? I know that that some use WRTH, of which I don't have a current copy, but which in the "old days" (1970's) wasn't very current. Perhaps there's something somewhere else on the web? [Russ Edmunds, e-mail: <wb2bjh@hotmail.com>]

The 1999 and 1998 WRTH's are not helpful because they have given up on connecting slogans to particular stations due to the volatility you mention, so I keep a 1997 edition on hand. There were always two sets of call letters for each station, by the way, so the list you saw may be using the official set, which I don't believe are used on air, but are used for international frequency registration purposes. CMHW 840 is still "doblevé" ["W"] in on air announcements, as noted in one of our reports this week.

I've always been fairly conservative about using Cuban call letters, reporting only the slogan unless I actually hear the call letters, which means I almost never refer to them. Off the top of my head, I only remember hearing "W" and R. Trinchera Anti-Imperialista ever giving call letters. Some reporters use call letters and I assume they are coming from a list somewhere. More than a few stations are actually multiple transmitters on the same frequency, so even if they give clear ID's, we'll never get the antenna site, unless there is one with a wobbly frequency, and then we can conjecture we've heard both. I heard three different transmitters from Poland around the same frequency when I was in Newfoundland because none were dead-on. The RFS list was considered to be fairly accurate, but now much out of date.

I think that most transmitters can be identified by the program they run during the daytime or evening. After 1 AM many appear to shift to Reloj or Progreso. Anyone who knows more than Russ or I is encouraged to comment! [Renfrew's response]

DX'ing 'smart', with shared tips and requests by NRC members

Continuing last issue's discussion of WADO's tower:

Bob Smolarek <radiobob@ptd.net>: "The diamond shaped tower for WADO is gone!" That's sad!! It was a very unique tower, glad I was able to see it quite a few times. I know mgrs. Mount, Ingram, and Fybush feel the same way I do.

Patrick Griffith, N0NNK <AM-DXer@webtv.net>: I was looking thru the TIS licenses for 1700 kHz and noticed that most of the major oil companies hold high power (in comparison to the average 10 watt TIS station) licenses there. Upon further investigation I found that most of them also hold licenses on 1614, 1628, 1652, and 1676 kHz. The majority of these are for 40 to 60 watts. It turns out that these frequencies are assigned under part 90.65 in the Petroleum Radio Service. The licenses appear to be valid for the continental US (CONUS) and adjacent waters. The primary use is for oil spill cleanup operations but they can be used on a secondary basis for base to mobile communications and tone signaling! The voice modulation is limited to AM only. Looking further at the regulations I found that 1676 and 1700 kHz also appear in the Forest Products Radio Service allocations, 1628 and 1652 appear in the Film and Video Radio Service allocations, and 1630 appears under the Fire Radio Service! The latter shows no limitations and therefore can apparently be used for any purpose related to the Fire Service! Hmmm! As the chief of communications for my fire department, I should apply for a license on 1630 and retransmit all of our fire comms so that our volunteers can monitor call status on their car radios while enroute to the fire station. I'm joking of course but from what I am seeing it appears that would probably be legal! I suspect that most of these are very old allocations that remain on the books from the 30s, 40s, or 50s but it's interesting to note that the petro licenses are all still current and valid. Something to keep in mind in case you hear strange activity on these frequencies.

Fred Vobbe <fredv@nrcdxas.org>: You know, something like that would be nice in a community where you have a need to get information out fast. Out local EMA director and I were talking about this. With the deregulation in this town, and cutbacks on news, if we had a local emergency there is no way to get the information out to the community quick. Television is the fastest as it's staffed 24/7, but that does nothing for the mobile listeners. We had sort of a problem recently with a three alarm fire in the afternoon, and all the traffic getting tied up in the mess knew nothing about staying away from the area. Something like that could be crucial in civil warnings. As I recall, a lot of police agencies were just above the AM band. In fact, if I recall correctly, Toledo Ohio had a great Florida callsign, WPDQ at one point.

Patrick Martin <mwdxer@webtv.net>: Some of the channels have been used. 1640 & 1680 are high power (60w) for the DFW airport. The 1620-Channelview TX TIS (10w) is a Chemical plant they use for Emergency services. There also is a 3.5 watt fire dept TIS (Texas) on 1630 khz. So along with the X Banders there is still a lot of use 1610-1700 khz.

Fred Vobbe: Pat, It's obvious what the 1640/1680 are for at DFW, but I wonder how many times the others have been used, and what their purpose is?

Can't remember the last time I sent in a MUSE to Dave. Have been a BCB DXER since the early '60's and gone through a number of receivers. Favorites are the Hallicrafters 'hollow state'. In August 1998, I purchased a Drake SW8 and it does well with a good antenna. Last January, I ran a 950 foot longwire down the woods, over a stream and up the other hill as far as I could run it. Needless to say, my neighbor (about 200 feet of wire on his property) was somewhat curious about what I was up to and was much relieved to know the wire didn't carry any AC. Since installing it, the wire has shown very directional properties. Put it up mostly to improve reception from Europe but have had limited success, however Algiers and France are good on long wave (maybe I don't understand the properties of the SW8?). The domestic reception is a different story - like having a pipeline to New England! A few examples, I never logged WDER-1320 (WGET at 17 miles is nulled), graveyarders now actually have signals at night instead of a drone. Day locals include WLUX-540 even though, for some reason, WWCS from the west is still strong. Most stations to the W or NW are nulled. Cuba-890 is more prevalent than WLS, WKNR-1220 is almost impossible and CHTN-720 is a regular. I attribute the radio and antenna for most of the new logs on the band. #2500 came in the form as WHMP-1400! Total now is 2544. I don't count call letter changes as new stations, just frequency changes as that does make a difference in reception conditions. When the new stations in Montreal on 690 and 940 air, they won't be counted as new, because, no other circumstances concerning DXing them have changed. On the other hand, if I log the new 1100 station near Atlanta, from the old Carrollton, GA location, it would be counted as new. I was saddened to hear of the passing of Hank Holbrook. Visited him once in the late '60's and was impressed with his unique verie collection, if it had a transmitter (ie: airplanes, ships, whatever!), Hank DX'ed it! On Herring Bay, MD, he easily received FM stations from NY by nulling the local Baltimore/Washington stations. He was also just beginning his hobby on a 10 speed bicycle. In May '97, I won a mail in contest on WTAM, a trip to Cleveland to tour the Rock and Roll Hall of Fame, all transportation and hotel accomidations included. Well, that trip went from one nightmare to another, and to make a long story short, the R&R visit was OK, but if it wasn't for the efforts of Tim Davisson of Akron, the whole weekend would have been a waste.. To make amends, the airline gave me another free ticket to Cleveland and spent a very enjoyable day last November with Tim and also visited GEORGE GREENE. George must have the most extensive collection of radio collectables in the world! My and Tim's wife still don't understand why I would spend a day to fly to Ohio just to talk radio and DX. Station verification answers are slow to nil, must not be interesting to broadcasters anymore. I collect coverage maps and would appreciate copies of any of the following: WWTL-700, WWBG-1030, WBGR-860, WCTN-950, WOBM-1160, WJFK-1300, WHGT-1380. I've commented to various editors in the club but if I missed anyone, THANKS FROM THIS DXER FOR YOUR TIME FOR THE NRC! BCB DX is a GREAT hobby and has been so for me for many years. Sorry I missed the WV convention, work sked again! (Thanks for your comments too Joe, appreciated here-DWS) (and here -pls).
