**WRIB-1220 ...** According to Craig Healy: "We've arranged for WRIB-1220 in Providence, RI (tough state to hear!) to raise power to 1kw non-D every night at 2:55 to 3:05am. This will run through at least March and will have a recorded ID at 3am. Hopefully a special ID with Morse code can be added in the near future. There ought to be good propagation for a fair number of these nights, and it's late enough for the west coast folks to have a shot. Reception reports (with return postage) may be sent to Craig Healy, NG1U - WRIB - 200 Water St. - East Providence, RI 02914 OR <http://www.wrrib.com>." Arranged by Craig Healy and AM-DX.COM.

**Betty Lord ...** The NRC lost a long-time NRC member this week with the death of Betty Lord, the widow of Carleton Lord, known to his RADEX readers in the '30's as "Count de Veries". Ken Chatterton commented: "It is with great sorrow that I note the passing of a great lady of the DX hobby. Betty Lord has passed away after a long illness. Betty rode to a number of conventions with me and we were friends for many years. She always referred to convention goers as "her boys". She was DX-knowledgeable and a great friend. Betty - R.I.P."

**From the Publisher ...** Yup, I stretched things as much as possible in this issue, but even I can't stretch 17 pages into 24 ... so two Musings from ever-faithful editor Dave Schmidt will have to wait until next week. And I bet even Dave took off his gloves to type them up, so sorry about that, Chief!

For those interested in CQWSN, mentioned in #14: Tony Smith's e-mail address is [swler@dodo.com.au](mailto:swler@dodo.com.au).

Get those new addresses to the publisher BEFORE you notify the USPS - we're still being charged 70¢ an update by the USPS.

**Kulpsville 2004 ...** Richard Cuff, co-chair of Kulpsville 2004 (properly known as the Winter SWL Fest), asks that anyone in the NRC interested in maintaining a table for the NRC to contact him at [richard@thecuffs.us](mailto:richard@thecuffs.us). However, interested NRC members should contact NRC BoD chairman Ken

Chatterton first to coordinate efforts.

## DX Time Machine

### From the pages of DX News:

50 years ago ... from the January 23, 1954 DXN: Stan Morss, Bradford, MA received a verie from Tangier International-1232 for his 44th country verified; reports were sent to R. Athlone-565, his 28th new TA this season, and to Melnik-1286 and R. Tangier-1079. There were 102 CP's for new stations outstanding as of 1/1/54.

25 years ago ... from the January 29, 1979 DXN: Stan Morss, Bradford, MA reported on 1/6: "I had a couple free hours so I ran out a couple hundred feet of wire and hooked into HQ-150 ... so @ 5:40 ... I went to new antenna and 1520 had a strong signal which shocked me by signing off @5:43 as WGNB, much needed."

10 years ago ... from the January 16, 1994 DXN: Ron Musco, Poquonock, CT reported 17 new stations heard and 16 veries received, including YWA-516, ZLS-526, WASB-1590, KBOE-740, and WDFB-1170, adding that he had to call both WDFB and KBOE to remind them to run the tests, arranged by someone else.

## Status changes in AM stations, supplied by the FCC and listeners

**Editor's note:** The FCC announced a freeze on the acceptance of applications for what they term 'minor modifications' as of January 12 and extending to January 30, 2004. "Minor" changes include almost everything from coordinate corrections to frequency changes and power increases/decreases. The freeze was implemented as they've announced a filing window from January 26 to January 30, 2004 for what they term 'major improvements'. 'Major' means new station proposals as well as a myriad of other categories too detailed to go into here. This week we have those applications which made it past the FCC's 'IN' basket so far. I'm sure you'll agree there are some pretty interesting applications in the group. I can't wait to see what those engineering folks are brewing for the week of January 26!

**APPLICATIONS DISMISSED**

- 1320 KSDT CA **Hemet** - Station wanted to increase both day and night power levels from a new 4-tower sight. It seems the city owns the land on which the towers are located and elected not to renew the lease in October 2000. Therefore KSDT was forced to find a new site. The combination of new site and pattern design did not give proper coverage to the city-of-license plus adequate protection to co-channel KKSM Oceanside, and even with a waiver request, the FCC said 'no'. KSDT is currently operating under an STA. Would have been U4 1000/400, but remains U4 500/300.

**ENGINEERING AMENDMENTS TO CONSTRUCTION PERMITS SUBMITTED**

- 730 WSCC SC **Charleston** - Has a CP to build three new towers at a new site using it only for an increase in day power to become U5 5300/103. This amendment lowers the daytime power request, so if granted, will become U5 5200/103.
- 820 KUTR UT **Taylorville** - New station, not yet on the air, has a CP for U14 50000/2500 CH 10000. This amendment asks to change to U10 50000/2500 CH 50000.

- 1210 WILY IL **Centralia** - Station has a CP to increase day power and add CH service from a new site. This amendment asks to add night authorization from a second site. If approved, would become U11 10000/3 CH 1100 from two sites.

**CANADA THIS WEEK**

- 1570 C QC **Laval** - Word was filtering down this past week of the re-birth of a station here. The FCC web site has this new facility with U4 10000/10000 at N45-31-51 W73-50-31 which plots to a point east of two golf courses on the southwest side of Rue Principale in Laval. The lone pattern favors the northeast. Posts on the NRCDXAS AM board have indicated they were testing, with the announcement saying "This is Radio Nostalgia (Nostalgie, in French), testing on 1570 kHz. If you are receiving noise or interference, please contact our engineers at 514-497-1350. There are no call letters being given. The ID in French is 'Radio Nostalgie, AM quinze-soixante-dix' (Radio Nostalgia, AM fifteen-seventy)" and playing a mix of 50s to 80s music. Thanks to **Sheldon Harvey** for this news.

**DDXD-West**

**RANDOM STUFF**

- Gerry Bishop has managed to snag some nice DX recently. . . . take a look at his catches on 660 and 1240 for proof.
- KCNS-740 has joined KTNQ-1020 in fulltime IBOC operation, no doubt delighting the three or four people out there with IBOC-capable receivers. . . . something tells me there's a bigger potential audience of Esperanto listeners. . . . but I digress. . . . why not give a listen to these channels around their sunrise/sunset to see if you can catch some of the IBOC "dighiss" on adjacent frequencies? These might be interesting sunset skip targets here in the west.
- The next frequency challenges are 1040 (due January 21), 1120 (due January 28), 1160 (due February 4), and 1180 (due February 11). Listen and report!
- Your non-frequency challenge loggings are also welcome! Please follow the format you see below, including all pertinent information—frequency, call, state, city, date and time of reception, and details of your catch. Please use ELT for all times, regardless of your local time zone.

"WE DON'T NEED NO STINKIN' RULES!" (JW-CO) This sort of stuff wouldn't be happening if Michael Powell were alive. (Ed.-NV)

#### STATION NEWS, CHANGES, ETC.

720 WGN IL **Chicago.** According to Glenn Hauser's "World of Radio", has turned off its stereo and dumped its mid-day farm broadcast. (They also block their Cubs broadcasts on the internet, much to the disappointment of us who try to listen, especially when TV isn't carrying). (JEL-MO) I think the decision to block games on the internet is the doing of Major League Baseball, not the individual stations. (Ed.-NV)

#### DX TEST RESULT

1240 WKDK SC **Newberry. 1/11 0559.** Code ID for WKDK just before the top of the hour. Many, many thanks to Powell for setting up this test for us. Final good catch on 1240 for the morning of 1/11. (GB-FL)

I'd been hearing CNN news at TOH on 660 off and on for a week, but never could pull an ID from them before the news. (GB-FL) Great catch, Gerry! (Ed.-NV)

# International DX Digest

Foreign DX Catches. Times are UTC; for ELT, subtract 5 hrs.

How cold is it? It's so cold, as I'm preparing this week's column, the midday temperature atop Mount Washington, New Hampshire, is 20 below zero Fahrenheit with winds from the west at 101 miles per hour gusting to 125. Let's warm up with some DX loggings from tropical climates.

## Pan-American DX

- 750 **VENEZUELA** YVKS RCR Caracas JAN 10 0148 - Over WSB Atlanta with a man and woman talking in Spanish. "RCR" ID by woman and station promo at 0152. [Wolfish-ON]
- 760 **COLOMBIA** HJAJ RCN Barranquilla JAN 10 2348 - Over WJR Detroit with RCN station promo using clock sounds and news report of a car accident read by a woman, time check at 2351. Parallel to 1000 kHz. [Wolfish-ON]
- 780 **VENEZUELA** YVMN R.Coro, Coro JAN 10 2243 - Over WBBM Chicago with romantic Latin American vocals and ID by a man in between songs. [Wolfish-ON]
- 790 **VENEZUELA** YVKC R.Venezuela, Caracas JAN 12 0302 - Over top of mess with Latin American music and several "Radio Venezuela" IDs. Heard on car radio. [Wolfish-ON]
- 830 **CUBA** R.Relej, Holguin JAN 11 0208 - Mixing with WCCO/WEEU; usual news and time pips format. [Wolfish-ON]
- 1000 **COLOMBIA** HJAJ RCN Cartagena JAN 11 0247 - Soccer match mixing with WMVP and a second Latin American station playing music (Venezuela?). The play-by-play announcer went ballistic at 0256 when Colombia scored. [Wolfish-ON]
- 1020 **CUBA** R.Relej JAN 9 2314 - RR code IDs through unID Spanish (likely *Mundial Venezuela*) and KDKA, no sign of bubble jammer. + JAN 10 0035 - Signal becoming stronger, RR code IDs and syncopated clock over unID French (Florida?) and KDKA. New, unlisted. [CONTI-NH] When the jamming first began on 1020 kHz, summer 2003, the audio for *R.Relej* was added to the (upper?) sideband of the bubble jammer. When checking 1020 on Jan 8, it seemed to me that the *R.Relej* audio was fed on both channels, along with the bubble jammer. Relej was, consequently, much easier to copy on 1020 kHz. [Bishop-FL]
- 1060 **unID** JAN 10 2325 - Ranchero music heard mixing with KYW. Male announcer at 2330, but could not pick out any ID if there was one, just mentions of "buena vida." [Wolfish-ON]
- 1070 **COLOMBIA** HJAJ *Emisora Atlantico*, Barranquilla JAN 10 2342 - ID mixing with an unID Latin American station. [Wolfish-ON]
- 1070 **unID** JAN 10 2333 - Man in Spanish talking at great lengths about health and the economy. Also heard a mention of "Radio Correo" at one point. Would that be a "mailbag" program? [Wolfish-ON]
- 1130 **VENEZUELA** YVRL R.Ideal, Macuto JAN 11 0041 - Under WBBR with ID and Latin American vocal sung by a woman. [Wolfish-ON]
- 1160 **MEXICO** XEBE Perote, Ver JAN 10 0212-0300 - Dominant over another weak signal (probably previously identified XEVW) but it is difficult to get good copy when this one talks. It plays romantic vocals, full orchestra in most cases, with production announcements by a soft, deep-voiced man and (presumably) live announcements by a sultry-voiced woman. Sign-off time varies slightly. This night, had some electronic sounds with station ID beginning 0256. Orchestral version of Rachmaninoff's First Piano Concerto ("Tonight We Love") begins nightly sign-off announcement, the last words of which are "XEBE, Perote, Veracruz." I've not yet been able to confirm slogan. Female choral version of national anthem began this night at 0258:30. (On JAN 8, it began at 0256:15; I have heard it begin as late as 0300:+) XEVW R.Sensación, Acamabaro GTO presumably is the other station that continued. XEVW signs off an hour later. It plays, generally, Mexican pop music, and I've heard it, during some segments, alternate Spanish with obscure (to me) English rock tunes. In other words, it's easy to distinguish between XEBE and XEVW programming. [Callarman-TX]
- 1230 **MEXICO** unID JAN 10 0139-0200 - Definite *R.Fórmula* network programming skimmed in and out of a thinner than usual jumble and at 0157:50 I pulled a definite call letter ID out of the mess. Unfortunately, it was for XEAL, which on 1470 is the key station for one of the three *Fórmula* AM nets. The only known ORF station on 1230 is XEEX Culiacán SIN, but I have nothing local on which to base a claim. Power for XEEX is listed at 1000/250, but a couple of western Mexican graveyarders have listed higher powers, up to 10,000 watts for the one on 1450 that's probably what I've heard there. [Callarman-TX]
- 1500 **unID** JAN 12 0240 - Two stations heard on car radio mixing with WTOP Washington. One had typical sounding Latin American music. The second one had music that sounded almost Middle Eastern, certainly not something I'd expect to hear from somewhere like Colombia or Venezuela. I don't think this was a domestic station as Venezuela on 790 and 910 were also

- audible at this time. [Wolfish-ON]
- 1520 **MEXICO** unID JAN 7 0306 - I've been tracking a station here on the rare occasions when I can get a partial null on KOMA. At 0306, Mexican national anthem squeezed through, and I suspect this is from a station later heard JAN 8 0107-0201 while KOMA was broadcasting Oklahoma-Nebraska girls' basketball. This station plays full orchestra romantic music, has woman announcer; occasional male announcer with light production with a smooth guitar theme. A couple of commercial strings noted during this time period. The format is something one would expect from a station whose slogan is "Bonita," but it's definitely not XEJCC in Juárez, which played really wild, heavy rock when I heard it while in El Paso last month. The 2004 WRTH shows two stations signing off at 0100, another at 0400, a third at 0600, and lists XEJCC as 24 hours. The *IRCA Mexican Log* shows three XE stations with 0300 sign-offs, and XEJCC with 0200 closedown. [Callarman-TX]
- 1560 **MEXICO** XEJPV *Nueva R.Viva*, Cd. Juárez, Chih JAN 11 0229-0233 - This one has been more consistently heard recently, perhaps a power increase. I did not have the tape on a few nights ago when I heard full ID at 0600 (well after listed sign-off in WRTH; IRCA log has 0700 sign-off). This night, after a production ID that began "Desde la primera frontera de México," and included slogan but not call letters, began a program that appeared to be called "Religión Poética," in which a "declamadora" whose name sounded like Hermandad Aragon Marianarez read a poem by (it sounded like) Francisco Villa Espeza. It's interesting what can be heard on the smaller Mexican stations. [Callarman-TX]

*Callarman's concordance:* I've been busy analyzing the Mexican station listings in the 2004 WRTH, which arrived this past week, and I note they have made some changes. I'll try to get a detailed report worked up for Corazon website and others, if desired. There have been several frequency changes that coincide with the 2002 CIRT list, which hasn't been updated (by CIRT, much less by me) in two years. There have been a large number of power changes (which may be at least in part arbitrary, based upon listings from other sources) and many slogan changes as well. (But they don't have, for example, the "Radio Capital" slogan change for 1300 XEXV.) One frequency change that makes me wonder how well WRTH checks its information has XEQ in Fresnillo, Zac, moved from 640 to 890, but (1) I have solid tapes of XEQ on 640 from November and December, and (2) XEPC in Zacatecas, Zac, shown in every list as on 890, is only 66 kilometers away from Fresnillo. I think most of us who spend a good amount of time chasing these elusive Mexican signals realize there is no single source of accurate information, particularly since (1) it's been at least two years since CIRT has updated its list; (2) it's been at least three years since the government list on the SCT website has changed; and (3) we can't depend on the station power announcements to be accurate. I heard an ID the other night from XERF that was still giving its power as 250,000 watts! Dave Gleason reported it was 30,000 and Ernie Wesolowski said a station official during a visit there this summer indicated it was more like 17,000. (John, the WRTH is supposed to be working with the NRC for USA and Canadian listings; I would assume that non-domestic loggings from DXN are NOT used. Too bad -pls.)

## Las Noticias Internacionales

- CUBA:** The distinctive theme song in the *R.Progreso* "la onda de la alegría" canned top of the hour ID is Isao Tomita's version of Debussy's Arabesque No. 1, on Snowflakes Are Dancing, also the theme of *Stargazer*, Jack Horkheimer's weekly astronomy show on PBS television. [Juan Gualda, via am@nrcdxas.org]
- NORWAY:** Shortwave transmitters are closed but still powered in a mode dubbed "black heating." This way they can be kept operational without further maintenance for some time, contrary to a complete shut-down that would result in the transmitters becoming unusable. The staff at Kvitsoy and Sveio will be reduced from 13 to 5 until February. Not affected by the closure of the shortwave service is the 1314 mediumwave operation at Kvitsoy, at present again using only half power between 1630 and 0430 UTC, not by switching one transmitter off but instead by running both transmitters at half power (i.e. 300 kW each). For late January or early February DRM tests are scheduled, primarily to determine if the Telefunken S4006 transmitters are DRM-capable, something Telefunken was not able to confirm although the design is very similar to the S4005 500 kW shortwave transmitters. This time pure DRM will be used, so these tests will of course disrupt the AM service. During earlier tests on 153 and 675 kHz the disputed simulcast (analog/digital hybrid) mode was used.
